# LOEB CLASSICAL LIBRARY PLUTARCH MORALIA VOLUME XIII PART I PRINCE Translated by HAROLD CHERNISS

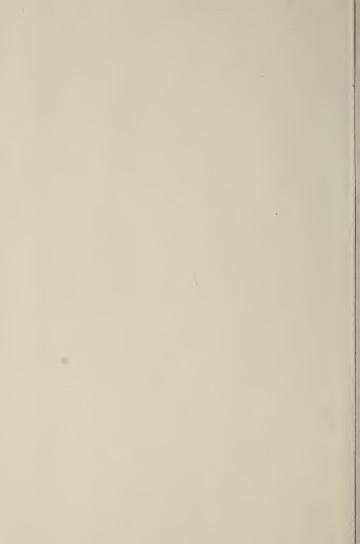

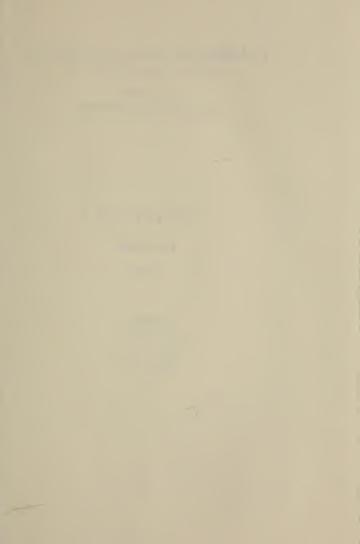

PLUTARCH (Plutarchus), ca. AD 45–120, was born at Chaeronea in Boeotia in central Greece, studied philosophy at Athens, and, after coming to Rome as a teacher in philosophy, was given consular rank by the emperor Trajan and a procuratorship in Greece by Hadrian. He was married and the father of one daughter and four sons. He appears as a man of kindly character and independent thought, studious and learned.

Plutarch wrote on many subjects. Most popular have always been the 46 Parallel Lives, biographies planned to be ethical examples in pairs (in each pair, one Greek figure and one similar Roman), though the last four lives are single. All are invaluable sources of our knowledge of the lives and characters of Greek and Roman statesmen, soldiers and orators. Plutarch's many other varied extant works, about 60 in number, are known as Moralia or Moral Essays. They are of high literary value, besides being of great use to people interested in philosophy, ethics and religion.

The Loeb Classical Library edition of the *Moralia* is in sixteen volumes, volume XIII having two parts. Volume XVI is a comprehensive Index.

TREFACE	VII
TRADITIONAL ORDER OF THE MORALIA	xxiii
PLATONIC QUESTIONS	1
ON THE GENERATION OF THE SOUL IN THE TIMAEUS	131
EPITOME OF "ON THE GENERATION OF THE SOUL IN THE TIMAEUS"	347

The following are the manuscripts used for the edition of the six essays in this volume and the sigla that refer to them:

- A = Parisinus Graecus 1671 (Bibliothèque Nationale, Paris)—A.D. 1296.
- B = Parisinus Graecus 1675 (Bibliothèque Nationale, Paris)—15th century.
- E = Parisinus Graecus 1672 (Bibliothèque Nationale, Paris)—written shortly after A.D. 1302.
- F = Parisinus Graecus 1957 (Bibliothèque Nationale, Paris)—written at the end of the 11th century.
- J = Ambrosianus 881 C 195 inf. (Biblioteca Ambrosiana, Milan)—13th century.
- X = Marcianus Graecus 250 (Biblioteca Nazionale di S. Marco, Venice)—the first part (containing the De Stoicorum Repugnantiis) written in the 11th century, the second part (containing the Platonicae Quaestiones) written in the 14th century.
- d = Laurentianus 56, 2 (Biblioteca Laurenziana, Florence)—15th century.
- e = Laurentianus 70, 5 (Biblioteca Laurenziana, Florence)—14th century.
- f = Laurent. Áshburnham. 1441 (not 1444 as in Hubert-Drexler, *Moralia* vi/1, pp. xv1 and xx) (Biblioteca Laurenziana, Florence)—16th century.

g = Vaticanus Palatinus 170 (Bibliotheca Apostolica Vaticana, Rome)—15th century.

m = Parisinus Graecus 1042 (Bibliothèque Nationale,

Paris)—16th century.

n = Vaticanus Graecus 1676 (Bibliotheca Apostolica Vaticana, Rome)—14th century (cf. Codices Vaticani Graeci: Codices 1485-1683 rec. C. Giannelli [1950], pp. 441-443).

r = Leiden B.P.G. 59 (Bibliotheek der Rijksuniversiteit, Leiden)—16th century (see p. 150, n. b in the Introduction to the De An. Proc. in Ti-

maeo).

t = Urbino-Vaticanus Graecus 100 (Bibliotheca Apostolica Vaticana, Rome)—A.D. 1402.

u = Urbino-Vaticanus Graecus 99 (Bibliotheca Apostolica Vaticana, Rome)—15th century.

v = Vindobonensis Philos, Graec. 46 (Nationalbibliothek, Vienna)—15th century.

z = Vindobonensis Suppl. Graec. 23 (Nationalbiblio-

thek, Vienna)—15th century.

a = Ambrosianus 859 - C 126 inf. (Biblioteca Ambrosiana, Milan)—finished in A.D. 1295 (cf. A. Turyn, Dated Greek Manuscripts of the Thirteenth and Fourteenth Centuries in the Libraries of Italy [University of Illinois Press, 1972] i, pp. 81-87).

 $\beta$  = Vaticanus Graecus 1013 (Bibliotheca Apostolica

Vaticana, Rome)—14th century.

γ = Vaticanus Graecus 139 (Bibliotheca Apostolica Vaticana, Rome)—written shortly after A.D. 1296.

 $\delta={\rm Vaticanus}$  Reginensis (Codices Graeci Reginae Suecorum) 80 (Bibliotheca Apostolica Vaticana, Rome)—15th century.

 $\epsilon$  = Codex Matritensis Griego 4690 (Biblioteca Nacio-

nal, Madrid)-14th century.

Bonon, = Codex Graecus Bononiensis Bibliothecae Universitatis 3635 (Biblioteca Universitaria, Bologna)-14th century.

C.C.C. 99 = Codex Oxoniensis Collegii Corporis Christi 99 (Corpus Christi College, Oxford)—

15th century.

Escor.  $72 = \text{Codex Griego } \Sigma\text{-I-}12 \text{ de El Escorial (Real$ Biblioteca de El Escorial)-15th and 16th centuries (ff. 75<sup>r</sup>-87<sup>r</sup>, which contain the De An. Proc. in Timaeo, were written in the 16th century).

Escor. T-11-5 = Codex Griego T.11.5 de El Escorial (Real Biblioteca de El Escorial)—16th century.

Laurent. C. S. 180 = Laurentianus, Conventi Soppressi 180 (Biblioteca Laurenziana, Florence)— 15th century.

Tolet. 51, 5 = Toletanus 51, 5 (Librería del Cabildo

Toledano, Toledo)-15th century.

Voss. 16 = Codex Graecus Vossianus Misc. 16 (I) = Vossianus P 223 (Bibliotheek der Rijksuniversiteit, Leiden)-15th century.

In such matters as accent, breathing, crasis, elision and spelling I have followed without regard to the manuscripts the usage explained in the Introduction to the De Facie (L.C.L. Moralia xii, pp. 27-28).

The readings of the Aldine edition I have taken from a copy that is now in the library of The Institute for Advanced Study (Princeton, New Jersey) and that has on the title-page the inscription in ink, -: Donati Jannoctii :- Ex Bibliotheca Jo. Huralti Borstallerii: Jannoctii dono; and from the margins of this copy I have cited the corrections or conjectures which in a note at the end of the volume

(pp. 1010 f.) <sup>a</sup> written in the same ink as the inscription on the title-page are ascribed to Leonicus and Donatus Polus.

For the editions and other works to which there is frequent reference in the *apparatus criticus* and notes the following abbreviations or short titles are used:

Amyot = Les œuvres morales et philosophiques de Plutarque, translatées de Grec en François par Messire Jacques Amyot, . . . corrigées et augmentées en ceste presente édition en plusieurs passages suivant son exemplaire, Paris, Claude Morel, 1618.<sup>b</sup>

Andresen, Logos und Nomos = Carl Andresen, Logos und Nomos: Die Polemik des Kelsos wider das

Christentum, Berlin, 1935.

Armstrong, Later Greek . . . Philosophy = The Cambridge History of Later Greek and Early Medieval Philosophy, edited by A. H. Armstrong, Cam-

bridge, 1967.

Babut, Plutarque de la Vertu Éthique = Plutarque de la Vertu Éthique: Introduction, texte, traduction et commentaire par Daniel Babut, Paris, 1969 (Bibliothèque de la Faculté des Lettres de Lyon XV).

<sup>a</sup> It is the same note as that quoted by R. Aulotte (Amyot et Plutarque [Genève, 1965], p. 180) from the end (p. 877) of the Basiliensis in the Bibliothèque Nationale (J. 693), the title-page of which, he says, bears the inscription Donato

Giannotti.

b This definitive edition has been compared with the first edition, Les auvres morales et meslées de Plutarque . . ., Paris, Michel de Vascosin, 1572, and with Œuvres Morales et Mélées de Plutarque traduites du Grec par Jacques Amyot avec des Notes et Observations de MM. Brotier et Vaulvilliers, Paris, Cussac, 1784–1787 = Tomes XIII-XXII of Œuvres de Plutarque . . ., 25 vols., 1783–1805.

Babut, *Plutarque et le Stoïcisme* = Daniel Babut, *Plutarque et le Stoïcisme*, Paris, 1969 (Publications de l'Université de Lyon).

Basiliensis = Plutarchi Chaeronei Moralia Opuscula . . ., Basiliae ex Officina Frobeniana per H. Frobenium

et N. Episcopium, 1542.

Benseler, De Hiatu = G. E. Benseler, De Hiatu in Scriptoribus Graecis, Pars I: De Hiatu in Oratoribus Atticis et Historicis Graecis Libri Duo, Fribergae, 1841.

Bernardakis = Plutarchi Chaeronensis Moralia recognovit Gregorius N. Bernardakis, Lipsiae, 1888-

1896 (Bibliotheca Teubneriana).

Bidez-Cumont, Les Mages Hellénisés = Joseph Bidez et Franz Cumont, Les Mages Hellénisés, 2 vol-

umes, Paris, 1938.

Bolkestein, Adversaria = Hendrik Bolkestein, Adversaria Critica et Exegetica ad Plutarchi Quaestionum Convivalium Librum Primum et Secundum, Amstelodami, 1946.

Bonhöffer, Epictet und die Stoa = Adolf Bonhöffer, Epictet und die Stoa : Untersuchungen zur stoischen

Philosophie, Stuttgart, 1890.

Bonhöffer, Die Ethik . . . = Adolf Bonhöffer, Die Ethik des Stoikers Epictet, Stuttgart, 1894.

Bréhier, Chrysippe = Émile Bréhier, Chrysippe et l'ancien stoïcisme, Paris, 1951 (nouvelle édition revue).

Bréhier, Théorie des Incorporels = Émile Bréhier, La Théorie des Incorporels dans l'ancien Stoïcisme, Paris, 1928 (deuxième édition). This was originally published in 1908 as a "Thèse pour le doctorat." It was reprinted in 1962.

Burkert, Weisheit und Wissenschaft = Walter Burkert, Weisheit und Wissenschaft: Studien zu Pythagoras, Philolaos und Platon, Nürnberg, 1962 (Erlanger Beiträge zur Sprach- und Kunstwissenschaft X). There is an English edition, "translated with revisions," Lore and Science in Ancient Pythagoreanism (Harvard University Press, 1972); but this appeared too late to permit the use of it instead of the German original.

Cherniss, Aristotle's Criticism of Plato . . . = Harold Cherniss, Aristotle's Criticism of Plato and the

Academy, Vol. I, Baltimore, 1944.

Cherniss, Crit. Presoc. Phil. = Harold Cherniss, Aristotle's Criticism of Presocratic Philosophy, Baltimore, 1935.

Cherniss, The Riddle = Harold Cherniss, The Riddle of the Early Academy, Berkeley/Los Angeles, 1945.

Cornford, Plato's Cosmology = Plato's Cosmology: The Timaeus of Plato translated with a running commentary by Francis Macdonald Cornford, London/New York, 1937.

Diels-Kranz, Frag. Vorsok.<sup>6</sup> = Die Fragmente der Vorsokratiker, Griechisch und Deutsch von Hermann Diels, 6. verbesserte Auflage hrsg. von Walther Kranz, 3 volumes, Berlin, 1951–1952 (later "editions" are unaltered reprints of this).

Döring, Megariker = Die Megariker, Kommentierte Sammlung der Testimonien . . . vorgelegt von Klaus Döring, Amsterdam, 1972 (Studien zur antiken Philosophie 2).

Dübner = Plutarchi Chaeronensis Scripta Moralia.
Graece et Latine ed. Fr. Dübner, Paris, 1841.

Dyroff, Die Ethik der alten Stoa = Adolf Dyroff, Die Ethik der alten Stoa, Berlin, 1897 (Berliner Studien für classische Philologie u. Archaeologie, N.F. 2ter Band).

Dyroff, Programm Würzburg, 1896 = Adolf Dyroff, Ueber die Anlage der stoischen Bücherkataloge, Programm des K. Neuen Gymnasiums zu Würzburg für das Studienjahr 1895/96, Würzburg, 1896.

Elorduy, Sozialphilosophie = Eleuterio Elorduy, Die Sozialphilosophie der Stoa, Gräfenhainichen, 1936 (=Philologus, Supplementband XXVIII, 3).

Emperius, Op. Philol. = Adolphi Emperii Opuscula Philologica et Historica Amicorum Studio Collecta edidit F. G. Schneidewin, Göttingen, 1847.

Festa, Stoici Antichi = I Frammenti degli Stoici Antichi ordinati, tradotti e annotati da Nicola Festa, Vol.

I e Vol. II, Bari, 1932-1935.

Giesen, De Plutarchi . . . Disputationibus = Carolus Giesen, De Plutarchi contra Stoicos Disputationibus, Monasterii Guestfalorum, 1889 (Diss. Münster).

Goldschmidt, Le système stoïcien = Victor Goldschmidt, Le système stoïcien et l'idée de temps, Paris, 1953 (Seconde édition revue et augmentée, Paris,

1969).

Gould, The Philosophy of Chrysippus = Josiah B. Gould, The Philosophy of Chrysippus, Leiden,

1970 (Philosophia Antiqua XVII).

Grilli, Il problema della vita contemplativa = Alberto Grilli, Il problema della vita contemplativa nel mondo Greco-Romano, Milan/Rome, 1953 (Università di Milano, Facoltà di Lettere e Filosofia, Serie prima: Filologia e Letterature Classiche).

Grumach, Physis und Agathon = Ernst Grumach, Physis und Agathon in der alten Stoa, Berlin, 1932

(Problemata 6).

H. C. = the present editor.

- Hahn, "De Plutarchi Moralium Codicibus" = Victor Hahn, "De Plutarchi Moralium Codicibus Quaestiones Selectae," Académie Polonaise: Rozprany Akademii Umiejetności, Wydzial Filologiczny, Serya ii, Tom xxvi (1906), pp. 43-128.

# PLATONIC QUESTIONS (PLATONICAE QUAESTIONES)

### INTRODUCTION

OF Plutarch's works which, to judge by the titles listed in the Catalogue of Lamprias, were devoted particularly to the interpretation of Plato  $^a$  only two are extant, the  $\Pi\epsilon\rho$ i  $\tau\hat{\eta}s$   $\epsilon\nu$   $T\iota\mu\alpha\dot{\iota}\omega$   $\psi\nu\chi\rho\gamma\nu\dot{\iota}\alpha s$  (65)

and the Πλατωνικά ζητήματα (136).

The term ζητήματα had come to be used in a quasitechnical sense for problems or questions raised concerning the meaning first of expressions or verses in the text of Homer and then of specific passages in other texts or of particular statements or opinions or incidents, problems which with the solutions suggested might be made available to interested readers in the form that today would be called "collected notes" but sometimes in that of a "symposium," <sup>b</sup>

<sup>a</sup> Nos. 65-68, 70, 136, and 221; cf. also on Academic doctrine Nos. 64, 71 (=131?), 134, and especially No. 63.

b For the history of the term and genre, ζήτημα, cf. A. Gudeman, R.-E. xiii/2 (1927), cols. 2511, 46-2529, 34 (cols. 2525, 18-2527, 13 on Plutarch); H. Dörrie, Porphyrios' "Symmikta Zetemata" (München, 1959), pp. 1-6; K.-H. Tomberg, Die Kaine Historia des Ptolemaios Chennos (Diss. Bonn, 1967), pp. 54-62; R. Pfeiffer, History of Classical Scholarship (Oxford, 1968), pp. 69-71 and p. 263. Dörrie (op. cit., p. 2) says that in the technical vocabulary of philosophers the word was almost entirely avoided. Nevertheless, Plutarch cites works by Chrysippus entitled ήθικά ζητήματα and φυσικά ζητήματα (De Stoic. Repug. 1046 D and F and 1053 E-F, De Comm. Not. 1078 E and 1084 D);

### PLATONIC QUESTIONS

a literary frame not inappropriate, since in intellectual circles questions like these were proposed for discussion by the company after dinner. Plutarch himself in his Symposiacs b uses the term  $\zeta\eta\tau\dot{\eta}\mu\alpha\tau a$  of the questions or problems there propounded and discussed, of which several without their literary embellishment could appropriately have been included in the Platonic Questions, just as all the latter could have been used as material for the Symposiacs.

The Platonic Questions, as we have them, are ten separate  $\zeta \eta \tau \dot{\eta} \mu \alpha \tau a$ , e each concerned with the meaning of a passage or apparently related passages in the text of Plato f but unconnected with one another

<sup>a</sup> Cf. Plutarch, Quaest. Conviv. 614 A-E and 686 в-D; Aulus Gellius, vII, xiii, 1-12 and xvIII, ii, 1-16 (especially

6-14).

<sup>c</sup> Cf. Quaest. Conviv. 645 c, 660 p, 736 c, 737 p.

<sup>a</sup> Notably Quaest. Conviv. vii, 1 and 2; viii, 2; and ix, 5.
<sup>c</sup> That they are just ten may be only an accident; but ten is also the number of questions that Plutarch expressly allocated to each book of the Symposiacs (cf. 612 ε, 629 ε, 660 n) save one, the ninth, which he begins with a special apology for exceeding "the customary ten" (736 c).

' QUESTION VIII (1006 B—1007 E), for example, begins with *Timaeus* 42 D 4-5, considers the possible relation to this of 40 B 8-c 2, and then returns to interpret 38 c 5-6 in

a work entitled σύμμικτα ζητήματα is ascribed to Aristotle (V. Rose, Aristotelis Fragmenta [1886], p. 17, # 168; cf. P. Moraux, Les Listes Anciennes des Ouvrages d'Aristote [Louvain, 1951], p. 117, n. 17 [on pp. 118-119] and pp. 280-281); and Porphyry (Vita Plotini, chap. 15, 18-21) says that Eubulus wrote and sent from Athens συγγράμματα ὑπέρ τινων Πλατωνικῶν ζητημάτων.

For the literary form and "historicity" of Plutarch's Symposiacs of. J. Martin, Symposion (Paderborn, 1931), pp. 167-184; H. Bolkestein, Adversaria, pp. 1-46; K. Ziegler, R.-E. xxi, 1 (1951), cols. 886, 40-887, 55.

### PLUTARCH'S MORALIA

by any transition and without any general introduction or conclusion to give the collection unity or to suggest a reason for the sequence in which the questions are arranged.a Had the sequence been determined by the subject-matter, II and IV would not have been separated from each other by III and VI would not have been placed between V and VII; and, if by the source of the passages treated, III and IX, which deal with the Republic, would have come together, as would II, IV, V, VII, and VIII, all five of which deal with the Timaeus. The ten ζητήματα may not all have been written at one time and for a single work. It is at least as likely that at some time Plutarch put together ten separate notes on Platonic passages that he had written at different times and had found no suitable occasion to incorporate into his other compositions.<sup>b</sup> If this is so, any indication of the relative chronology of one of

relation to expressions in Republic 506 E-509 D and Timaeus 37 B-39 B. By the remark at the end of VIII, 3 and the beginning of VIII, 4 Plutarch practically admits that VIII is in fact two Intimata rather than one.

that VIII is in fact two ζητήματα rather than one.

<sup>a</sup> Cf. what is said by Elias (In Aristotelis Categorias, p. 114, 13-14) of the σύμμκτα ζητήματα ascribed to Aristotle and by Athenaeus (v, 186 e = Usener, Epicurea, p. 115, 9-11)

of the Symposium of Epicurus.

b Cf. what he says of his De Tranquillitate Animi at the beginning of that essay (464 f): . . . ἀνελεξάμην περὶ εὐθυμίας ἐκ τῶν ὑπομημάτων ὧν ἐμαυτῷ πεποιημένος ἐτύγχανον. Paccius had asked him also for something on the passages of the Timaeus that require exegesis (464 f), and Plutarch probably had in those "note-books" of which he speaks such things as our ζητήματα or the material for them. One can well imagine that De Defectu Orac. 421 f—431 λ (chaps. 22-37) is the elaboration of such a ζήτημα concerning Timaeus 55 c 7-d 6 (cf. K. Ziegler, R.-E xxi/1 [1951], col. 834, 47-53).

the ten would not necessarily be pertinent to that of the others.

That Plutarch had not himself been the first to pose questions about these particular Platonic passages is clear from the fact that he commonly discusses or refers to answers other than those he finally gives as his own.a That he had himself discussed at least one of them earlier is made certain by the remark that his answer is τὸ πολλάκις ὑφ' ἡμῶν λεγόμενον (1003 A). This is the answer to IV, which is a complement of that of II b and together with it gives in brief the interpretation that Plutarch was later to set out in detail in the De Animae Procreatione in Timaeo but himself says here had frequently been stated earlier than IV.c There is no other indication even of the relative chronology of any of these ζητήματα unless the mistake in V, " each of which consists of thirty of the primary scalene triangles" (1003 D) be thought to prove V earlier than De Defectu Orac., where in 428 A this is corrected; but that would be a precarious inference, for the mistake in 1003 p is part of the interpretation of others to which Plutarch then gives his own as an alternative.

The text of this work, No. 136 in the Catalogue of

<sup>b</sup> See also the end of VIII (1007 c-n); cf. Quaest. Conviv. 718 A and 719 A with H. Dörrie, Philomathes . . . in Memory

of Philip Merlan (The Hague, 1971), pp. 40-42.

<sup>°</sup> So he begins De An. Proc. in Timaeo itself by saying that it is to bring together in a single work τὰ πολλάκις εἰρημένα καὶ γεγραμμένα σποράδην ἐν ἐτέροις ἔτερα. . . .

Lamprias and No. 38 in the Planudean order, is here printed on the basis of X J g a A  $\beta$   $\gamma$  E B  $\epsilon$  n Voss. 16 Bonon. C 3635 and Escorial T-11-5, all of which I have collated from photostats. Of these only X J g E B  $\epsilon$  and n contain the whole of the work; and in E itself, although the whole is written by a single hand, folio  $606^{\circ}$  has above the first column, which begins with the words  $\tau o \hat{\nu} \nu o \eta \tau o \hat{\nu} \mu \dot{\nu} \nu o \nu \dot{\epsilon} \sigma \tau \dot{\nu} \nu \dot{\delta} \nu o \hat{\nu} s$  (1002 d), the superscription  $\Lambda$   $\Theta$   $\pi \lambda a \tau \omega \nu \iota \kappa \dot{\alpha}$   $\zeta \eta \tau \dot{\eta} \mu a \tau a \dot{\delta} \nu \nu \dot{\alpha} \dot{\gamma} \epsilon \dot{\nu} \rho \dot{\epsilon} \theta \eta \dot{\eta} \dot{\alpha} \rho \chi \dot{\eta}$ , through which in the same ink a line has been drawn. This same superscription occurs in a A  $\beta$  Bonon. C 3635 Voss. 16 and Escorial T-11-5, in all of which  $\tau o \hat{\nu} \nu o \eta \tau o \hat{\nu} \kappa . \tau . \lambda$ . (1002 d) are the first words of the work preserved, and also in  $\gamma$ , where the first words, however, are  $\tau i \dot{\delta} \eta \pi o \tau \epsilon \tau \dot{\gamma} \nu \psi \nu \chi \dot{\eta} \nu$  (1002 e), the beginning of Question IV.

<sup>a</sup> This was accurately described by Treu (*Ueberlieferung* i, p. 1x). *Cf.* Pohlenz, *Moralia* i, p. x, n. 3 (p. x1); Wegehaupt, *Philologus*, lxiv (1905), p. 396; Sandbach, *Class. Quart.*, xxxv (1941), p. 110; Manton, *Class. Quart.*, xliii

(1949), p. 98.

b This is true also of  $\delta$  = Vat.Reg.80 (cf. H. Stevenson, Bibliothecae Apostolicae Vaticanae . . . Codices Reginae Suecorum et Pii PP. II Graeci [Romae, 1888], p. 63 and Hahn, "De Plutarchi Moralium Codicibus," p. 57) and of Marcianus 259, in which latter, however, the text ends with  $a\lambda\lambda a$  erepov in 1008 A, where the first hand of n leaves off (cf. Treu, Lampriascatalog, p. 23 and Hubert-Drexler, Moralia vi/1, p. xiv). In Voss. 16 by an error in binding the text of the work has been divided; it appears on folios  $2^{r}$ -10° and  $26^{r}$ -28°.

<sup>c</sup> This is also the case with Laur. 80, 5 and Laur. 80, 22 (cf. Wegehaupt, Plutarchstudien, pp. 27-28 and "Corpus Planudeum," p. 1034, n. 1), with Marcianus 248 (cf. Treu, Lampriascatalog, p. 23 [where what is said of the beginning in Parisinus 1671 = A, however, is a mistake]), with Tolet. 51, 5 (cf. Fletcher, Class. Quart., xxi [1927], pp. 166-167

If  $\gamma$  was copied from A, as has been supposed,<sup>a</sup> the scribe of y must purposely have omitted the end of QUESTION III (1002 D-E) which a and A preserve, to begin with QUESTION IV (τί δήποτε) and must also have disregarded either purposely or inadvertently the lacuna indicated in a and A between σωμάτων and o oilnoos in 1005 c. Otherwise y differs from a and A (uncorrected and corrected) in only six places, none of which is decisive. b Only once does  $\gamma$  agree with α against A (1005 c [μέν τι : μέντοι -A, Esc.]). Four times it agrees with A against α (1003 A [n]:  $\hat{\eta}$  -a], 1005 A [οὐρανὸν:  $\hat{r}$  -a<sup>1</sup>;  $\hat{\eta}$ κον -a<sup>2</sup>, n;  $\epsilon \hat{l}$ κον -A, γ and all other MSS.], 1007 A [εκγονος: εγγονος -A,  $\gamma$ , 1011 A  $[\tau \dot{o}\nu : \tau o\hat{v} - a]$ ) and twice with A<sup>2</sup> against  $A^1$  and a (1003 E  $[\pi a\sigma \hat{\omega}\nu : \pi a\theta \hat{\omega}\nu - a, A^1]$ , 1005 c  $[\tau \rho i \psi \epsilon \iota : \tau \hat{\eta} \tau \rho i \psi \epsilon \iota - A^2, \gamma]$ ). It appears, then, that the scribe of  $\gamma$  copied this work from A after A had been corrected.

Since  $\beta$  contains the end of QUESTION III (1002 D-E), which is not in  $\gamma$ , the source of  $\beta$  for this work cannot have been  $\gamma$ . Nor can it have been X, J, g, B,  $\epsilon$ , n, or E.  $\epsilon$  All these contain the beginning of the work,

and p. 170, n. 6), and with Parisinus 2076 (ff. 132v-145v), which last was generously verified for me by M. Joseph Paramelle of the "Centre National de la Recherche Scientifique."

<sup>a</sup> Cf. B. Einarson and P. De Lacy, Class. Phil., xlvi (1951),

p. 103, col. 1 and Valgiglio, De Fato, p. XLII.

 $^{b}$  1003 B (σπέρματος: σώματος -γ), 1006 D (λαμβάνοντας: λαμβάνοντας -γ, Esc.  $^{1}$ ; λαμβάνοντα -a, A, E, B, ε, n), 1008 C (περὶ ἀτα: περὶ τὰ ἀτα -γ), 1008 D (λογιστικόν: λογικὸν -a, A, β $^{1}$ , E, B, ε), 1010 C (ἀλας: ἄλλας -γ, J). In the sixth (1006 A) γ has the negative οὐ which is erased in a and cancelled in A; but this cancellation, a dot under the οὐ, might easily have been overlooked.

 $^{\circ}$  B and g are presumably younger than  $\beta$  anyway, being

which  $\beta$  does not have and says has not been found; but besides that in one passage or another after the point at which the text in  $\beta$  begins all of them lack words that were present in  $\beta$  even before correction,<sup>a</sup> as do  $\alpha$ , A, and  $\gamma$  also. In more than a dozen places where  $\beta$  originally agreed with  $\alpha$ , A, E it has been changed so that it agrees instead with the reading of Bonon., which is frequently shared with X and n and occasionally with J or  $\epsilon$ . In half a dozen of these places words not present in a, A, E, and y have been added by  $\beta^2$  either in the margin or superscript (1005 c-D, 1007 D [bis], 1010 c, 1010 D, and 1011 B). In 1010 c  $\beta^2$  has added in the margin ten words that occur in X,  $\epsilon$ , n, Bonon., Voss., and Escor., nine of which are omitted by J, g, a, A, y, E, and B. In 1005 c-D, where J, g, and γ have σωμάτων. ο σίδηρος and where a lacuna of varying length between σωμάτων and ὁ σίδηρος is indicated by a, A, E, B, and β1, the five words ίλυσπῶν οὕτως ὑπὸ τοῦ Πλά- $\tau\omega\nu$ os have been added in the margin by  $\beta^2$ . These five words with the last four deleted are in Bonon.; otherwise they are preserved—but with είλυσπᾶν instead of  $i\lambda \nu \sigma \pi \hat{a} \nu$ —only in X,  $\epsilon$ , and n. Moreover,  $\beta$ 

<sup>a</sup> This eliminates the possibility that  $\beta$  might have been copied from E before the lost beginning had been discovered

and added to that Ms.

of the 15th century, whereas  $\beta$  is of the 14th; n, which has generally been dated to the 15th century, is of the 14th according to C. Giannelli (*Codices Vaticani Graeci* [1950], pp. 442-443).

 $<sup>^</sup>b$  e.g. 1005 A (ἄμα -omitted by n), 1006 A (οὐ -omitted by X,  $\epsilon$ , n [erased in  $\alpha$  and cancelled in A]), 1006 c (ἰλλομένην . . . ἀνειλουμένην -omitted by J, g), 1009 B (λόγον . . . vac. . . . καὶ -α, A, γ, B), 1011 A (ἸΟδυσσέα . . . vac. . . . οὐ -X,  $\alpha$ , A, γ, E, B,  $\epsilon$ ).

has uncorrected readings that differ from those of a, A, and E and agree with those of Bonon., shared sometimes by X, J, n, or  $\epsilon$  as well (1006 D, 1007 C, 1009 A, 1009 B, 1010 B, 1010 D, and 1011 A [bis]); and in the last of these places  $\beta^1$  agrees exactly with Bonon. alone ( $\lambda \nu \gamma \hat{\omega} \nu \tau \alpha \pi \rho \hat{\sigma} s \tau \hat{\eta} \nu \tau \hat{\omega} \nu \pi \rho \rho \beta \hat{\alpha} \tau \omega \nu \dots$ ). It is probable therefore that  $\beta$  was not just corrected by reference to Bonon. but was copied from the archetype of the latter.

Bonon. C 3635 not only has the end of QUESTION III, which is not in  $\gamma$ , and words that are not in  $\beta^1$  but also preserves words that are missing from X, from J, and from  $\alpha$ , A,  $\gamma$ , E,  $\epsilon$ , and n.<sup>a</sup> Though very often in agreement with  $\alpha$  and A against J and sometimes against X or both X and J, it agrees at times with X or J or both of them against  $\alpha$  and A and occasionally disagrees with all four—X, J,  $\alpha$  and A.<sup>b</sup>

b Examples of this last case are 1011 A in the preceding note, 1010 B (διάλεκτος: διάλογος-Bonon.), 1010 D ( $\mu\dot{\eta}$ ) omitted by X, J, a, A); of agreement with X against a and A 1005 c-D, 1009 B, 1010 c, and 1011 B in the preceding note and 1006 c ( $\tau\epsilon\tau a\mu\dot{\epsilon}\nu o\nu$ ) and 1009 A ( $\tau\dot{\phi}$ ); of agreement with J against a and A 1002 D ( $\dot{\epsilon}\lambda\lambda a$   $\dot{\epsilon}\lambda\lambda \delta o c$ ), 1004 B ( $\mu\dot{\epsilon}\nu$  omitted by X, a, A), 1009 E ( $\kappa a\theta$ '  $a\dot{\nu}\tau\dot{\alpha}$ ); of agreement with X and J

It must have been copied from a Ms. which, though mutilated at the beginning of the work in the same way as a, had a text in some cases nearer to that of X and in a few nearer to that of J than to that of a.

The text of Voss. 16, though for the most part identical with that of Bonon., differs from it in seventeen places.<sup>a</sup> In six of these differences, moreover, Voss. agrees with J<sup>1</sup> and in three others with n<sup>b</sup>; and this suggests that Voss. was copied not from Bonon. itself but possibly from the latter's archetype or a MS. very much like it.

The same is true of Escor. T-11-5, which agrees with Voss. against Bonon. eight times and with Bonon. against Voss. seven times but disagrees with both Bonon. and Voss. in 31 cases, o in two of which

against a and A 1006 D (λαμβάνοντας), 1007 D (ἐστι omitted by a, A), 1008 D (λογιστικόν), 1011 A (τὰς omitted by a, A).

<sup>a</sup> This is assuming that in 1005 c-D (where Hubert's

apparatus is doubly in error) the line through οὖτως ὑτὸ τοῦ Πλάτωνος was drawn by the first hand of Bonon. Other-

wise the differences would be eighteen.

<sup>b</sup> 1004 a (εὐθύγραμμοι: εὐθύγραμμον -J, g, Voss.); 1004 a (συναρμοττομένοις: συναρμοττόμενος -J, g, Voss.); 1005 a (ἀφιεμένω: ἐφιεμένω -J¹, g, Voss., Escor.); 1005 c (τῷ: τὸ -J, g, Voss.); 1005 E-F (πληθύοντες: πληθύνντες -J, g, Voss., Escor.); 1011 b (θεωρικὰ: θεωρητικὰ -J, g, Voss., Escor.); 1010 c (Εὔηνος: εὔωνος -n, Voss.); 1011 a (παρὰ τοῖς: παρ οῖς -n, Voss.); 1011 a (πῶν προβάτων συν . . . : συν omitted by n and Voss.). The last is one of the two passages adduced by Pohlenz and Hubert (Hubert-Drexler, Moralia vi, 1, p. xiv); in the other, 1003 a, though Voss. disagrees with Bonon. and others (συνυπῆρχον), its reading, συνυπάρχον, is not that of J¹ as it is there said to be.

<sup>e</sup> Perhaps a dozen of these are errors of the scribe of Escor, himself, one of which is interesting as a warning, however, for it can be only by a coincidence that in 1004 A Escor, omits seven words that are omitted by J and g but

are preserved by all other MSS.

it agrees with others in the correct reading. In 1011 a Escor. like Voss. and n omits the prefix συν preserved by Bonon. and  $\beta$  alone but alone has λέγοντα instead of the λυγῶντα of these four mss., and in 1003 a it alone has συνυπάρχουσιν instead of the συνυπάρχον of Voss. and the correct συνυπῆρχον of Bonon. Moreover, it alone has καὶ ἰλυσπᾶν in 1005 c, παραλιπόντα μηθὲν καὶ in 1009 b where Bonon. and Voss. have μερῶν μηθὲν ἄμα καὶ, and in 1010 d δρῶ . . . vac. 30 . . . ἀλλ' ἄσπερ δμοῦ instead of their δρῶ

μέλλων νῦν όμοῦ τι.

In that part of E that fills folios  $606^{r}$ - $610^{r}$  ( $\tau o \hat{v} \nu o \eta \tau o \hat{v} \nu o \eta \tau o \hat{v} \nu o \eta \tau o \hat{v}$  [1002 p]—to the end) and was copied before the beginning of the work had been found E never agrees with  $\alpha$  against A. It agrees with A,  $\alpha^2$  and others against  $\alpha^1$  thrice, with A against  $\alpha$  eight times, and with A against  $\alpha$  and A against  $\alpha$  and A as corrected, and eight times it disagrees with both  $\alpha$  and A. One of these differences is a matter of word-order and is changed by E² (1003 B), one is the omission by E and B of two words that appear in all other MSS. (1010 A:  $\kappa \alpha \theta^{\alpha}$  av  $\tau \delta$ ), and three concern

<sup>a</sup> 1004 B (ἐντάσει -Ε, Β, n, Escor.), 1008 E (ον -Escor. with all except n, Bonon., Voss).

<sup>b</sup> 1002  $\mathbf{E}$  (δε $\hat{\mathbf{e}}$ : δ $\hat{\mathbf{h}}$  - $\mathbf{a}^1$ , ε), 1009  $\mathbf{D}$  (το πρώτον omitted by  $\mathbf{a}^1$ ),

1009 F (τον λέγοντα: λέγον -a1).

c In five of these cases E and A are wrong, though a is right (1006 β [δ δη -a], 1007  $\Lambda$  [ξκορονος -a], 1007  $\Gamma$  [πρότερον -a], 1008  $\Gamma$  [τιμωρίας -a], 1009  $\Gamma$  [καὶ -a]); in two E and A are right and a wrong (1003  $\Lambda$  [η -E, A] and 1011  $\Lambda$  [τον -E, A]); and in one all are wrong (1005  $\Lambda$  [ηκον -a²; εἶκον -E, A]).

<sup>d</sup> 1003  $\mathbf{E}$  (πασών -E,  $\Lambda^2$ ) and 1005  $\mathbf{c}$  (τ $\hat{\eta}$  τρίψει -E,  $\Lambda^2$ ).

<sup>e</sup> In 1006  $\mathbf{A}$  the οὐ after πρότερον that is absent from  $\mathbf{X}$ ,  $\epsilon$ ,  $\mathbf{n}$  and is erased in  $\alpha$  and cancelled in  $\mathbf{A}$  is present in  $\mathbf{E}$ .

the form of a single word a; but in two cases E with B has a word that is in no other Ms., b and in 1009 B there are in E three words, μερῶν μηθὲν ἄμα, that are absent from the lacuna in a, A, y, and B and occur only in X,  $\beta$ ,  $\epsilon$ , n, Bonon., and Voss. The scribe of E might have found these three words in the Ms. from which he later copied the beginning of the work and might then have entered them here in the lacuna that he had left; but, if so, it is strange that the scribe of B, whether he copied the whole work from E or from the Ms. whence E took the first part of it, omitted just these three words and preserved exactly the lacuna of  $\alpha$ , A, and  $\gamma$ . It is more probable that the scribe of E copied the three words in question and all this second part of the work from a congener of a, which was also the source of A's corrections.c

In the first part of the work (999 c-1002 p), which the scribe of E added later, there are 53 cases in which E agrees with X against J; and in fifteen of these E preserves a word or words missing from J (cf. 1000 A, c, and E; 1001 c and D; 1002 A). In only two cases does E agree with J against X; and in another, where it agreed with X, it was changed so that E2 agrees with J instead.d In eight cases

τητας: ώς μεσότητας -Ε, Β).

<sup>c</sup> Cf. Valgiglio, De Fato, p. xr. and his references to Treu

and Larsen, p. xxxix, n. 36.

a 1004 Β (ἐντάσει -Ε, Β, n, Escor.; ἐνστάσει -all other MSS.), 1004 c (κυκλοφορητικήν: κυκλοφορικήν -Ε, Β, n), and 1005 A (συνεπιταχύνων: ἐπιταχύνων -Ε, Β, Escor.).

δ 1007 F (σελήνην: την σελήνην -Ε, Β) and 1009 A (μεσό-

d 999 D (πότερον -E, B, J, g; πότερα -X, ε, n), 1001 B  $(\tau \hat{\eta} \ \tilde{v} \lambda \eta \ -E, B, J, g, \epsilon, n; \tau \hat{\eta} \ \tilde{\epsilon} \lambda \eta \ -X), 1001 c (\gamma \tilde{\epsilon} vous \ -E^1,$ X, ε, n; γένος -Ε2, J, g, B).

E with B in agreement has a reading different from that of X and Ja; and in still another E, agreeing with X and J, was changed by E2 to disagree with The first part of the work, then, must have been copied by E from a Ms. the text of which was much nearer to that of X than to that of J.

In the first part of the work (999 c-1002 p) B disagrees with E and all other MSS. seven times, c in agreement with J disagrees with E and all others once,d and in agreement with E2 disagrees with E1 thrice. In the second part of the work B agrees once with E2 and all other MSS. against E1 in the order of words (1003 A-B), disagrees with E eight times, f and once, though agreeing with E, has a "correction"

a 1000 F (η: καὶ -E, B; omitted by X, J, g, ε, n.). The other seven cases are 999 F, 1000 B, 1001 D (bis), 1002 A, 1002 в, 1002 р.

b 1002 A (εμφαινομένων -B, E2; εκφαινομένων -X, J, g, E1,

 $\epsilon$ , n).

c Twice in the order of words (999 E-F and 1001 B), thrice by wrongly omitting a word (1001 B [coiker], 1002 A [cr after ωσπερ], and 1002 B [τη̂s after ἔκ τε]), and twice in the form of a word (1000 A [διανομή: νομή -B] and 1000 D [νοητόν: νοητήν -Β]).

 d 1002 B (μικρότητα : μακρότητα - J, B).
 f 1001 c (γένους - E¹, X, ε, n; γένος -B, E², J, g), 1002 A (ἐκ δὲ: δὲ with three dots superscript -E; δὲ omitted by B), and 1002 A (έμφαινομένων -B, E2; έκφαινομένων -E1 and

all other Mss.).

† 1004 Β (καμπυλωτέρας: καμπυλοτέρας -Β, ε), 1007 Ε (άρμονία: άρμονίαν -Β), 1007 F (τον έν μέν τοις: τον μέν τοις -Β: τον μεν εν τοις -J, g), 1008 c (ορέξει: έξει -Β), 1008 c (τω λογισμῷ καὶ σύμμαχον: καὶ σύμμαχον τῷ λογισμῷ -Β; καὶ λογισμῶ σύμμαχον -n), 1008 D (ὑπάτη: ὑπάτην -B), 1008 F (ὁτὲ μέν τε μετά: ότε μέν μετὰ -Β; ότε ... vac. 5 ... μετὰ -J; ότε μετὰ -g), 1009 Β (λόγου μερῶν μηθεν ἄμα ... vac. 13 ... καὶ -Ε; λόγου . . . vac. 34 . . . -Β).

that points to a variant resembling the readings of J and g.a This last and the lacuna in 1009 B are the strongest indications that the second part of the work in B was copied neither from E nor from the source of E for this part; and, although no single passage decisively proves that B did not copy the whole work from E after E had been corrected. b it is at least equally possible that B copied it from the Ms. whence E had taken the first part of it.

Of the extant Mss. containing the whole work the oldest is J (13th century), for the part of X that contains it was written in the 14th century. It has been asserted that J is nearer than X to the Planudean text,d but the very opposite is true. In that part of the work which is preserved in a and A (1002 p ff.) J and X agree against a A E seven times and three more against a e; but, where J and X disagree, while J agrees with a A E against X twenty times, with a1 A1 E against X a2 A2 once, and with a1 against X a2 A E once, X agrees with a A E against J 167 times and with a against J four

α 1003 Β (διάφωνον -Β; διαφέρειν -Ι; διαφέρον -ς; διάφωvov -E and all other Mss.).

b For the controversy concerning the relation of B to E see Plutarch, Moralia (L.C.L.), xii (1957), pp. 26-27 and 31-32 (with B. Einarson, Class. Phil., liii [1958], p. 265, n. 3), ix (1961), p. 305, and xi (1965), p. 6; Pohlenz-Westman, Moralia vi/2 (1959), pp. 228-229.

<sup>&</sup>lt;sup>c</sup> J<sup>4</sup> = the corrections made by Demetrius Ducas in preparing J as "copy for the printer of the Aldine edition" (cf. Tren, Ueberlieferung iii, pp. 22-26).

<sup>&</sup>lt;sup>d</sup> Hubert-Drexler, *Moralia* vi/1, p. x11. <sup>e</sup> In all cases I disregard differences of accent and breathing alone.

f Of these 22 cases two are omissions of words in X and two are omissions of words in J.

times more.<sup>a</sup> Since not only X but all other Mss. preserve words that J omits, J cannot be the source of any other Ms. for this work, not even of g.

The agreement of g with J is striking even in the omission of words that are present in all other MSS.<sup>b</sup> and in the preservation of words that are missing from X <sup>c</sup>; but g agrees with X and others against J at least 38 times,<sup>d</sup> in two cases preserving words that are omitted by J alone.<sup>c</sup> The close agreement of g with J suggests, therefore, that both were copied from the same MS. and that this MS. itself exhibited most of the errors and omissions common to J and g. It may have been a copy or a twin of the archetype of X and may have contained some of the variants that X appears to have preserved from that

<sup>&</sup>lt;sup>a</sup> Of these differences between X and J 35 are omissions of a word or words in J and three are omissions of a word or words in X. If these omissions were the fault of the scribes of J and X themselves, their originals may have shown less of a difference in relation to  $\alpha$  A E, as is indicated by 1006 c, where X agrees with  $\alpha$  A E in preserving sixteen words omitted by J and yet in these sixteen words differs from  $\alpha$  A E three times.

b J and g agree against all other MSS. more than 150 times, in 45 of which they omit words that all others have, e.g. 1000 Ε (καὶ δεόμενον and καὶ βεβαιοῦντος), 1003 Β (τῶν δὲ κυκλικῶν · · · · τὰς τῶν εὐθυγράμμων), and 1006 c (ἰλλομένην · · · ἀνειλουμένην).

 $<sup>^{\</sup>circ}$  1003 B (ὑπὸ τῆς ψυχῆς) and 1011 A (λυγῶν πρὸς τὴν τῶν προβάτων -omitted by X, E, B, and  $\epsilon$  as well as by a, A,  $\gamma$ ).

d'There are also about 25 unique readings in g, some ten of which are omissions of a single word, probably the fault of the scribe of g himself.

<sup>1000</sup> c (οὐ προσδέξεται . . . τὸ πλῆθος) and 1004 D (πλειόνων). The statement in Hubert-Drexler, Moralia vi/1, p. xIII, line 1 concerning νοούμεν(ον), "exhib. g," is erroneous.

archetype, e.g. 1005  $\mathbf{F}$  (κενουμένας - $\mathbf{X}^1$ ; κινουμένας - $\mathbf{J}$ ; κενουμένας - $\mathbf{g}$  and all other MSS.), 1006  $\mathbf{B}$  (γαρ - $\mathbf{X}^1$ ; τερου

 $\tau \epsilon$  -J, g ; γάρ -all other Mss.), 1008  $\epsilon$  (ἀνωτάτω -X¹ ;

ἀνώτερον -J, g; ἀνωτάτω -all other MSS.).

Both  $\epsilon$  and the part of n written by the first hand a agree with X in preserving the many words omitted by J and g and almost never agree with J or g or J g alone against X, b and in the part of the work that is missing from the mutilated Mss. (i.e. before  $\tau \circ \hat{v} \circ \nu \circ \eta \tau \circ \hat{v}$  in 1002 d) they agree in several significant readings with X, J, and g against E and B. Thereafter, although they occasionally agree with a, A, E, and B against X, J, and g, d they preserve with X words that are missing from these Mss. and never agree with Bonon., Voss., or Escor. against all others; but both of them also preserve words omitted by X, f and each of the two has words

<sup>a</sup> That is from the beginning of the work through ἀλλὰ ͼτερον at the end of 1008  $_{\rm A}={\rm folios}$   $_{\rm 17-6}^{\rm v}$  (see p. 6, n. b

supra).

The exceptions are 1001 c (μαθηματικόν: μαθητικόν -J, ε), 1001 D (δὲ τοῖς: δὲ τῆς -J, g, n), 1005 D (τις -omitted by J, g, ε), 1005 F (ὑπείκοντος: ὑπήκοντος -J, ε, n), and 1006 B (τὸν: τὸ -J, g, ε).

1006 Β (τὸν: τὸ -J, g, ε). ο 1000 Β (φιλοσοφία -X, J, g, ε, n; σοφία -Ε, Β), 1000 Γ ( $\hat{\eta}$  τ $\hat{\eta}$ : καὶ τ $\hat{\eta}$  -E, B; τ $\hat{\eta}$  -X, J, g, ε, n), 1001 D (ἄνισα τμήματα . . . ἔτεμε -Ε, Β; ἄνισα τὰ τμήματα . . . ἔτεμνε -X, J, g, ε, n),

1002 B (θείοις: θεοίς -X, J, g, ε, n; νοητοίς -E, B).

 $^{a}$  1006 D (λαμβάνοντας: λαμβάνοντα ε, n, α, A, E, B), 1007 D (ἐστι -omitted by ε, n, α, A, β¹, γ, E, B), 1007 E (οὐ φαύλων: οὐδὲ φαύλων -ε, n, α, Λ, β¹, γ, E, B, J²).

g, γ). 1003 Β (ὑπὸ τῆς ψυχῆς), 1007 F (καὶ -omitted by X alone). 16

that the other omits.<sup>a</sup> Neither  $\epsilon$  nor this part of n, then, could have been derived from any of the extant MSS.; and both are probably independent copies of

the archetype of X.

This is not the case, however, with folios 7r-9v of n (οί γὰρ ώς κυρίαν [1008 A sub finem] to the end of the work). The text of these folios, written in a hand different from that of folios 1r-6v, while agreeing with  $\epsilon$  and X in preserving words omitted by J and g, by E and B, and by  $\alpha$ , A, and  $\gamma$ , also preserves words omitted by  $\epsilon$  and X °; and in all these passages n is in agreement with one or more of the group consisting of Bonon., Voss., and Escor., as it also is in 23 of the 24 cases in which—besides five readings unique to it—it disagrees with  $\epsilon$ . In eleven of these 23 cases, moreover, n is in agreement only with one or more of this group ( $\beta^1$  or  $\beta^2$  included in some cases). It was certainly from a ms. related to this group, therefore, and possibly from the archetype of Bonon, that this last part of the work in n was taken.

a e.g. 1001 A sub finem (τοῦ τεκνώσαντος -omitted by n alone), 1005 A (αμα -omitted by n alone), 1005 B (τὸ δ' ηλεκτρον . . . συνεφέλκεται τον σίδηρον -omitted by ε alone), 1007 E (καὶ πρώτω -omitted by ε alone).

<sup>b</sup> 1009 Β (λόγου μερών μηθέν άμα καὶ -ε, n, X, β, Bonon., Voss.; λόγου ... vac. ... καὶ -α, Α, γ, Β), 1010 A (καθ' αὐτὸ -omitted by E, B), 1010 c (κράτιστον . . . μέρος είναι -omitted by J, g, a, A,  $\gamma$ , E, B,  $\beta^1$ ), 1011 B ( $\nu \dot{\eta}$   $\Delta ia$  -omitted by J, g, a, A,  $\gamma$ , E, B,  $\beta^1$ ).

#### ZHTHMA A'

#### QUESTION I

1. Whyever did god, as is stated in the *Theaetetus*, a bid Socrates act as midwife to others but prevent him from himself begetting? Certainly he would not have used the name of god in irony or jest b; and besides in the *Theaetetus* Socrates has been made to say many arrogant and haughty things, among them this c: "For a great many men, my excellent friend, have got into such a state of mind towards me as practically to bite when I remove some silliness of theirs; and they do not believe that I am doing this out of benevolence, for they are a long way from knowing that no god is malevolent towards men and that neither do I do any such deed out of malevolence but that it is quite illicit for me to admit falsehood and suppress truth."

Is it then his own nature, as being more dis-

a Plato, Theaetetus 150 c 7-8.

b Cf. Plato, Symposium 216 ε 4-5 (εἰρωνευόμενος δὲ καὶ παίζων πάντα τὸν βίον πρὸς τοὺς ἀνθρώπους διατελεῖ). The tendency to dismiss as "irony" statements of Socrates that connected with god his behaviour in carrying on his elenchus is mentioned not only in Anon. in Platonis Theaetelum (Pap. Berl. 9782), col. 58, 39-49 (p. 39 [Diels-Schubart]) but also in the Platonic Apology 37 ε 5—38 A 1.

<sup>·</sup> Theaetetus 151 c 5-D 3.

 Heraclitus, frag. B 119 (D.-K. and Walzer) = frag. 121

d Heraclitus, frag. B 119 (D.-K. and Walzer) = frag. 121 (Bywater). For the implied polemic against the conventional notion of the δαίμων as the "destiny" assigned to a man cf. G. Misch, A History of Autobiography in Antiquity (London, 1950), pp. 94-95; and see Plato, Republic 617 ε 1 and 620 p 8, where the soul of each selects its own δαίμων, and Apuleius, De Deo Socratis xv, 150 ("...animus humanus etiam nunc in corpore situs daemon nuncupatur...daemon bonus id est animus virtute perfectus est") = Xenocrates, frag, 81 (Heinze).

\* This is surely a reference to the "divine sign," τὸ δαιμόνιον (cf. 1000 p infra), which in Plato's Apology 31 c 8-p 1 Socrates calls θείδν τι καὶ δαιμόνιον (cf. Proclus, In Platonis Alcibiadem Priorem, p. 79, 1-14 [Creuzer] = p. 35 [Westerink]) and the nature of which is discussed by Plutarch in De Genio Socratis 580 c—582 c and 588 c—589 r. ὑψηγήσατο could not properly be used of the sign which according to Plato ἀεὶ ἀποτρέπει . . . προτρέπει δὲ οὔποτε (Apology 31 p 3-4, cf. Phaedrus 242 c 1), but Plutarch seems to have neglected this limitation (cf. De Genio Socratis 581 в : δαιμόνιον εἶναι τὸ κωλίον ἢ κελεῦον ἔλεγε).

Cf. Plato, Theaetetus 210 c 2-4 and Sophist 230 B 4-c 3.

<sup>&</sup>lt;sup>a</sup> See 1000 c-d infra (οὐ γὰρ σώματος ἡ Σωκράτους ἰατρεία ψυχῆς δ' ἦν ... καθαρμός). The source is Plato's Sophist 230 c 3-E 3 and 231 в 3-8. Cf. Philo of Larissa in Stobaeus, Ecl. ii, 7, 2 (p. 40, 11-20 [Wachsmuth]); Albinus, Prologue vi (p. 150, 15-35 [Hermann]); Cebetis Tabula xix; Philo Jud., De Decalogo 10-13 (iv, pp. 270, 23-271, 13 [Cohn]).

<sup>°</sup> Cf. Plutarch, Quomodo Adulator ab Amico Internoscatur 72 A and Adv. Colotem 1117 p (cf. Pohlenz-Westman, Moralia vi/2, p. 237, note to p. 194, 26-28); Plato, Charmides 165 B 5-8 and Gorgias 506 A 3-5 and Cratylus 384 c 1-3.

## PLATONIC QUESTIONS 1, 999-1000

cussion of arguments and for disputations futile in wranglings and ambitious rivalries but not for anything fair and serviceable at all. So Socrates with his refutatory discourse like a purgative medicine <sup>a</sup> by maintaining nothing <sup>b</sup> claimed the credence of others when he refuted them, and he got the greater hold on them because he seemed to be seeking the truth along with them, not himself to be defending

an opinion of his own.c

2. In the second place, while the exercise of judgment is beneficial, begetting is an obstacle to it, for what loves is blinded about the thing it loves <sup>a</sup> and nothing of one's own is so beloved as is an opinion or an argument by its parent. For the distribution of offspring that is proverbially most just <sup>e</sup> is most unjust when applied to arguments, for in the former case one must take what is one's own but in the latter what is best even if it be another's. For this reason the man who begets his own becomes a poorer judge of others; and just as one of the sages said that Eleans would be better directors of the Olympic games if not a single Elean were entered in the contest, <sup>g</sup> so one who is going to be an upright moderator

Internoscatur 48 E-F and in De Capienda ex Inimicis Utilitate 90 A and 92 E; Plato in Laws 731 E has τυφλοῦται γὰρ περὶ τὸ φιλούμενον ὁ φιλῶν.

I have not found the proverb or saying cited elsewhere.
 f. Plato, Philebus 29 A (... δεῖν τἀλλότρια ... λέγειν
 ...) and Phaedo 85 c 8-9 (... τὸν γοῦν βέλτιστον τῶν ἀνθρω-

πίνων λόγων λαβόντα . . .).

The impartiality with which the Eleans administered the games was, nevertheless, held to be exemplary (cf. Plutarch, Lycurgus xx, 6 [52 c-D] = Reg. et Imp. Apophthegmata 190 c-D and 215 E-F; Dio Chrysostom, Oratio xiv =xxxi [von Arnim], 111; Athenaeus, viii, 350 b-c).

(1000) καὶ βραβεύσειν¹ οὐ δίκαιός ἐστιν αὐτὸς φιλοστε-Β φανεῖν οὐδ' ἀνταγωνίζεσθαι τοῖς κρινομένοις. καὶ γάρ οἱ τῶν Ἑλλήνων στρατηγοὶ τὴν περὶ τῶν άριστείων ψήφον φέροντες αύτους άρίστους έκριναν ἄπαντες² καὶ τῶν φιλοσόφων οὐδεὶς ἔστιν, δς οὐ τοῦτο πέπονθε δίχα τῶν ὥσπερ Σωκράτης όμολογούντων μηδέν ίδιον λέγειν οδτοι δέ καθαρούς μόνοι καὶ άδεκάστους της άληθείας παρέχουσιν έαυτούς δικαστάς. ώσπερ γάρ ό έν τοῖς ώσὶν άήρ, αν μη σταθερός ή μηδέ φωνης ίδίας έρημος άλλ' ήχου καὶ ροίζου μεστός, οὐκ ἀκριβῶς ἀντιλαμβάνεται τῶν φθεγγομένων, οὕτω τὸ τοὺς λόγους ἐν φιλοσοφία κρίνον, αν ένδοθεν άντιπαταγή ζτι β καὶ C αντηχή, δυσξύνετον έσται των λεγομένων έξωθεν. ή γὰρ οἰκεία δόξα καὶ σύνοικος οὐ προσδέξεται τὸ διαφωνούν πρός αύτήν, ώς μαρτυρεί των αίρέσεων τὸ πληθος, ων, αν ἄριστα πράττη φιλοσοφία,

b Cf. Theophrastus, De Sensibus 19 (Dox. Graeci, pp. 504,

a Cf. De Herodoti Malignitate 871 D-E and Themistocles xvii, 2; Herodotus, viii, 123.

and umpire in arguments is bound not to crave the palm himself or to vie with the contenders. For even the generals of the Greeks when casting their ballot for the award of excellence all gave judgment for themselves as best a; and of philosophers there is none to whom this has not happened apart from those who like Socrates admit that they say nothing original, and these alone show themselves to be sound and incorruptible judges of the truth. For as the air in the ears does not accurately perceive utterances if it be not still and free from sound of its own but full of ringing and buzzing, b so what judges arguments in philosophy will have poor understanding of statements coming from without if they are muffled by the clatter and noise (of something) from within.c For personal opinion to which one is wedded will not accept what disagrees with her, as the multitude of systems testifies, of which philosophy, if she is faring her best, involves a single one being right and all the others guessing and being in conflict with the truth.

3. Furthermore, if nothing is apprehensible and knowable to man,d it was reasonable for god to have

29-505, 2) and 41 (Dox. Graeci, p. 511, 6-8) = Diogenes of

Apollonia, frag. A 19 (ii, p. 55, 26-28 [D.-K.]).

 νοητὴν -B.

° Cf. Plato, Sophist 230 c—231 B and note a on p. 22 supra; and with ψυχῆς ὑπούλου cf. Gorgias 480 B 1-2 and

524 E 5-525 A 2.

<sup>&</sup>lt;sup>a</sup> Cf. Plato, Theaetetus 151 x 5-6 and 160 x 6—161 A 4. <sup>b</sup> Theognis, 432; cf. the use of the line (also with initial οὐδ') by Dio Chrysostom, Oratio i, 8 (von Arnim).

<sup>&</sup>lt;sup>d</sup> Cf. Cicero, Acad. Prior. ii, 115 and 147 and De Oratore ii, 30 ("cum plus uno verum esse non possit"); Seneca, Epistle cii, 13; Lucian, Hermotimus 14 (τὸ δέ γε ἀληθὲς . . . ἐν ἦν αὐτῶν . . .); and Aristotle, Anal. Prior. 47 a 8-9.

prevented Socrates from begetting inane and false and baseless notions and to compel him to refute the others who were forming such opinions.<sup>a</sup> For the discourse that liberates from the greatest of evils, deception and vanity, was not a slight but a very great help—

This gift god didn't grant even Asclepius' sons. b

For the treatment given by Socrates was not of the body but was a purgation of the ulcerous and corrupted soul.<sup>c</sup> If, however, there is knowledge of what is true and what is true is single,<sup>d</sup> he who has learned it from the discoverer does not possess it less than he who discovered it <sup>c</sup>; but the one who acquires it is rather he who is not sure that he possesses it,<sup>f</sup> and he acquires what is best of all, just as he who is not a parent himself adopts the child that is best.

4. Consider too that, while the other things, poetry and mathematics and rhetorical speeches and sophistic doctrines, which the spiritual power grevented Socrates from begetting, were worth no serious concern, what Socrates held to be alone wisdom, (that) which he called passion for the

Contrast the situation of those who . . . πρὶν ἢ λαβεῖν ἔχειν ὁμολογοῦντες οὐ λαμβάνουσιν (De Recta Ratione Audiendi 47 n).
 See note e on p. 21 supra.

Esee, however, De Recta Ratione Audiendi 48 B-D and Plutarch's advice there ἀσκεῖν ἄμα τῆ μαθήσει τὴν εὔρεσιν. The proverbial alternative ἢ εὖρεῖν ἢ παρ' ἀλλου μαθεῖν (cf. Plato, Laches 186 c and 186 E—187 Λ; Phaedo 85 c 7-8 and 99 c 6-9; [Alcibiades i] 106 D, 109 D-E, and 110 D; [Demodocus] 381 E 6-8; Aristotle, Topics 178 b 34-35) was itself converted into a proof that μάθησις is ἀνάμνησις (Maximus of Tyre, Philos. x, v h -vi b = pp. 119, 8-120, 20 [Hobein]).

(1000) ἐρωτικὴν ὑπ' αὐτοῦ προσαγορευομένην, ταύτης οὐ Ε γένεσις ἔστιν ἀνθρώποις οὐδὲ εὕρεσις ἀλλ' ἀνάμνησις. ὅθεν οὐδὲν ἐδίδασκε Σωκράτης, ἀλλ' ἐνδιδοὺς ἀρχὰς ἀποριῶν ὤσπερ ἀδίνων τοῖς νέοις ἐπήγειρε καὶ ἀνεκίνει καὶ συνεξῆγε τὰς ἐμφύτους νοήσεις καὶ τοῦτο μαιωτικὴν τέχνην ἀνόμαζεν, οὐκ ἐντιθεῖσαν ἔξωθεν, ὥσπερ ἔτεροι προσεποιοῦντο, νοῦν τοῖς ἐντυγχάνουσιν, ἀλλ' ἔχοντας οἰκεῖον ἐν ἑαυτοῖς ἀτελῆ δὲ καὶ συγκεχυμένον καὶ δεόμενον τοῦ τρέφοντος καὶ βεβαιοῦντος² ἐπιδεικνύουσαν.

 $^{\circ}$  Cf. Theaetetus 151 a 5-B 1 and 157 c 9-D 2. The ξμφυτοι νοήσεις here are not "inbred" as are the Stoic ξμφυτοι προλήψεις (see note b on De Stoic. Repug. 1041 E infra),

b Cf. Plutarch, De Defectu Orac. 422 B-c and the theses ascribed to him in Olympiodorus, In Platonis Phaedonem, pp. 155, 24–157, 12 and 212, 1-26 (Norvin). For parallels with this and the remainder of this section in Cicero, Albinus, Maximus of Tyre, and the anonymous commentator on Plato's Theaetetus cf. O. Luschnat, Theologia Viatorum, viii (1961/62), pp. 167-171; and for the Platonic doctrine of reminiscence cf. Meno 85 p.—86 B, Phaedo 72 E.—76 E and 91 E, and Phaedrus 249 B 5-C 4.

# PLATONIC QUESTIONS 1-11, 1000

divine and intelligible, a is for human beings a matter not of generation or of discovery but of reminiscence. For this reason Socrates was not engaged in teaching anything, but by exciting perplexities as if inducing the inception of labour-pains in young men he would arouse and quicken and help to deliver their innate conceptions ; and his name for this was obstetric skill, a since it does not, as other men pretended to do, implant in those who come upon it intelligence from without but shows that they have it native within themselves but undeveloped and confused and in need of nurture and stabilization.

### QUESTION II

1. WHYEVER did he call the supreme god father and maker of all things? • Was it because he is of gods, the gods that are engendered, f and of men father, as

despite the Stoic terminology: ef. Cicero, Tusc. Disp. i, 57: "...insitas... notiones quas ἐννοίας vocant..."; Anon. in Platonis Theaetetum (Pap. Berl. 9782), col. 47, 42-45: ... ἀναπτύσσων αὐτῶν τὰς φυσικὰς ἐννοίας ...; and especially Albinus, Ερίτοπε iv, 6 (Louis) = p. 155, 17-29 (Hermann): νόησις ... διττὴ ... ἡ μὲν πρὸ τοῦ ἐν σώματι γενέσθαι τὴν ψυχὴν ... γενομένης δ' αὐτῆς ἐν σώματι ἡ τότε λεγομένη νόησις νῦν ἐλέχθη φυσικὴ ἔννοια...

<sup>d</sup> Cf. Theaetetus 161 E 4-6, 184 A 8-B 2, 210 B 8-9; Olympiodorus, In Platonis Phaedonem, p. 159, 1-3 (Norvin) = Plu-

tarch, Moralia vii, p. 33, 7-10 (Bernardakis).

<sup>e</sup> A paraphrase of Timaeus 28 c 3-4 (τον μèν οὖν ποιητήν καὶ πατέρα τοῦδε τοῦ παντός), the interpretation of which is discussed at length by Proclus (In Platonis Timaeum i, pp. 299, 13–319, 21 [Diehl], especially pp. 299, 21–300, 28; pp. 303, 24–304, 22; and pp. 311, 25–312, 9) and which is paraphrased somewhat differently by Plutarch in Quaest. Conviv. 718 A (. . . πατέρα καὶ ποιητήν τοῦ τε κόσμου καὶ τῶν ἄλλων γεννητῶν . . .). Cf. also Timaeus 37 c 7 and 41 A 5-7.

a Iliad i, 544 and often elsewhere.

## PLATONIC QUESTIONS 11, 1000-1001

Homer names him, but maker of irrational beings and of inanimate things? b For not even of the placenta, says Chrysippus, though it is a product of the seed, is he who provided the seed called father. Or is it by his customary use of metaphor that he has called him who is responsible for the universe its father? So in the Symposium d he called Phaedrus father of the amatory discourses because he was instigator of them and in the dialogue that bears his name e called him blessed with fair children because as a result of his initiative philosophy had been filled with many fair discourses. f Or is there a difference between father and maker and between birth 9 and coming to be? For as what has been born has ipso facto come to be but not contrariwise so it is that he who has begotten has ipso facto made, for birth is the coming to be of an animate thing. Also in the case of a maker, such as a builder is or a weaver or one who produces a lyre or a statue, his work when done is separated from him, whereas the principle

<sup>b</sup> This interpretation is mentioned and rejected by Proclus, In Platonis Timaeum i, p. 319, 15-21 (Diehl).

<sup>c</sup> S. V.F. ii, frag. 1158.

<sup>a</sup> Symposium 177 D 4-5 (cf. 177 A 4).

· Phaedrus 261 A 3-4.

<sup>1</sup> Cf. Phaedrus 242 A 8-B 5 and Hermias, In Platonis Phaedrum, p. 223, 18-19 (Couvreur): ...καλούς παΐδας

τίκτοντα τοὺς λόγους.

P For this passive meaning of γέννησις cf. e.g. Cornutus, Theologia Graeca 30 (p. 58, 14 [Lang]) and Hippolytus, Refutatio, vii, 29, 14 (p. 212, 18 [Wendland]). The erroneous assumption that the word can have only the active meaning, "procreation," was apparently responsible for the drastic emendations of the passage made in the sixteenth century and adopted by later editors. It should be noticed, moreover, that Hubert's report of the readings of X in this passage is erroneous.

(1001) τοῦ γεννήσαντος ἀρχὴ καὶ δύναμις ἐγκεκραται τῶ τεκνωθέντι καὶ συνέχει τὴν φύσιν, ἀπόσπασμα καὶ μόριον οὖσαν τοῦ τεκνώσαντος. ἐπεὶ τοίνυν Β οὐ πεπλασμένοις ὁ κόσμος οὐδὲ συνηρμοσμένοις

ποιήμασιν ἔοικεν,² ἀλλ' ἔνεστιν³ αὐτῷ μοῖρα πολλή ζωότητος καὶ θειότητος, ην δ θεὸς έγκατέσπειρεν άφ' ε έαυτοῦ τῆ υλη καὶ κατέμιξεν, εἰκότως ἄμα πατήρ τε τοῦ κόσμου, ζώου γεγονότος, καὶ ποιητής ἐπονομάζεται.

### PLATONIC QUESTIONS 11, 1001

or force emanating from the parent is blended in the progeny a and cohibits its nature, which is a fragment or part of the procreator.<sup>b</sup> Since, then, the universe is not like products that have been moulded or fitted together but has in it a large portion of vitality and divinity, which god sowed from himself in the matter c and mixed with it, it is reasonable that, since the universe has come into being a living thing, god be named at the same time father of it and maker.

2. While this most nearly coincides with Plato's opinion, consider whether there will be plausibility in the following statement also: There are two constituent parts of the universe, body and soul.d The former god did not beget; but, matter having submitted itself to him, he formed and fitted it together e by binding and bounding the unlimited with suitable limits and shapes. The soul, however, when it has partaken of intelligence and reason and con-

a Cf. 1003 A infra and De An. Proc. in Timaeo 1014 E and 1016 B (quoting Timaeus 36 E 6—37 A 1). ἀρμονία, which I regularly translate "concord," means not "harmony" in the modern sense of notes played or sung together as "chords" but generally a "fitting together" and in music such a fitting together of sequential sounds to produce a tune or a "scale" (e.g. De An. Proc. in Timaeo 1021 B infra); and

## PLATONIC QUESTIONS 11-111, 1001

cord, a is not merely a work but also a part of god and has come to be not by his agency but both from him as source and out of his substance.b

### QUESTION III

1. In the Republic c he likens the sum of things to a single line that has been divided into unequal segments, again divides into two in the same ratio each of the two segments, that of the visible class and that of the conceptual, and, having made four in all, declares first of the intelligible segment that of the primary ideas, second the mathematical, and first of the perceptible segment the solid bodies and second the semblances and images of these. Also to each of the four he assigns its own peculiar criterion: intelligence to the first and thought to the mathematical segment and to the perceptibles belief and conjecture to matters of images and semblances. What, then, did he have in mind when he divided the sum of things into unequal d segof harmony in this sense the theory is h aquound (e.g. 1001 F infra).

<sup>b</sup> Cf. De Sera Numinis Vindicta 559 D (... έξ αὐτοῦ γάρ, οὐχ ὑπ' αὐτοῦ, γέγονεν ὤστ' ἔχει τι καὶ φέρεται τῶν ἐκείνου μέρος ἐν ἐαυτῷ . . .) and see Jones, Platonism of Plutarch, p. 10, n. 15 and p. 105; H. Dörrie, Museum Helveticum, xxvi (1969), p. 222 and Philomathes: Studies...in Memory of Philip Merlan (The Hague, 1971), pp. 40-41.

Republic 509 p 6-511 E 5.

d Even in antiquity some, apparently reading dv' loa or loa in Republic 509 p 6 (cf. dv, loa -cod. F), tried to explain why Plato had divided the line into equal segments (Iamblichus, De Comm. Math. Scientia, p. 36, 15-23 [Pseudo-Archytas, frag. 3, Nolle] and p. 38, 15-28 [Festa]; Scholia in Platonis Rem Publicam 509 p [vi, p. 350, 9-16, Hermann]); but contrast Proclus, In Platonis Rem Publicam i, p. 298, 18-20 and 26-27 (Kroll).

# PLATONIC QUESTIONS III, 1001

ments? And which of the segments is larger, the intelligible or the perceptible? For he has not made it clear himself.

On the face of it the perceptible segment would seem to be larger, a for the indivisible and invariably identical being of the intelligibles is narrowly and purely concentrated but the perceptible segment was provided by the dispersed and erratic being of bodies.<sup>b</sup> Moreover, incorporeality is proper to limit, whereas body, while in matter it is unlimited and indefinite, becomes perceptible whenever it is bounded by virtue of participation in the intelligible.d Moreover, just as each of the perceptibles themselves has a multiplicity of semblances and shadows and images and as generally both in nature and in art it is possible for numerous copies to come from a single pattern, so the things of this world must surpass in number the things of that world according to Plato's supposition that the intelligibles are patterns. that is ideas, of which the perceptibles are as semblances or reflections. Moreover, the ideas are the objects of intellection f(x) and intellection he in-

<sup>&</sup>lt;sup>a</sup> The course of studies in Republic 525 B 3-531 D 6 is meant. According to Plato (Republic 531 D 7-535 A 2) the whole of this is a progressive course of training leading up to dialectic, the method which alone reveals the ideas; but καταβιβάζων here implies that it is instead a graduated descent and departure from the ideas, and hence it is inferred that graduated abstraction in the reverse order (cf. ὅθεν ἀφαιροῦν-TES . . . [1001 F infra]) will bring one to the ideas themselves.

<sup>&</sup>lt;sup>b</sup> Because of τὰ δὲ στερεά infra and Republic 528 A 6-E 2 it has been thought that stereometry must have been mentioned after γεωμετρίαν, but the latter by itself could have been meant to include both plane and solid geometry (cf. Non Posse Suaviter Vivi 1093 p and Moralia vii, p. 113, 11-14 [Bernardakis] = vii, p. 90, 11-14 [Sandbach]; Proclus, In Primum Euclidis El. Lib., p. 39, 8-10 [Friedlein]).

# PLATONIC QUESTIONS III, 1001-1002

troduces as a result of abstraction or lopping away of body when in the order of studies he leads down a from arithmetic to geometry and then after this b to astronomy and crowns all with the theory of harmony, for the objects of geometry are the result when quantity has taken on extension, the solids when extension has taken on depth, the objects of astronomy when solid body has taken on motion, and the objects of harmonics when sound has been added to the body in motion. Hence by abstracting sound from the things in motion and motion from the solids and depth from the planes and extension from the quantities we shall arrive at the intelligible ideas themselves,d which do not differ from one another at all when conceived in respect of their singularity and unity.e For unity does not produce number un-

[Friedlein]).

<sup>d</sup> Cf. Albinus (Epitome x, 5 [Louis] = p. 165, 14-17 [Hermann]) for god like the point conceived κατ' ἀφαίρεσιν (also Clement, Stromata v, xi, 71, 2-3; vı, xi, 90, 4). Plato did not say or imply that the ideas can be reached by such a procedure, though Aristotle contended that those who posited the ideas did so by an invalid extension of the kind of abstraction legitimately used in mathematics (Physics 193 b 35—194 a 7; cf. Cherniss, Aristotle's Criticism of Plato . . ., pp. 203-204).

<sup>e</sup> Cf. [Plutarch], De Placitis 877 B = Dox. Graeci, p. 282, 17-25 (ὁ γὰρ νοῦς κατὰ μονάδα θεωρεῖται . . . τὰ γὰρ εἴδη ταῦτα πάντα καὶ γένη κατὰ μονάδας εἰσί); Sextus, Adv. Math. x, 258 (ἐκάστη ἰδέα κατ' ἰδίαν μὲν λαμβανομένη ἐν εἶναι λέγεται . . . );

# PLATONIC QUESTIONS 111, 1002

less it comes into contact with the unlimited dyad; and, when it has thus produced number, a it passes on into points and then lines and from these into surfaces and depths and bodies and qualities b of bodies in process of modification. Moreover, of the intelligibles there is a single criterion, the intelligence, for thought too is intelligence concerning the intelligibles that are reflected in the mathematical objects as in mirrors.c For the cognition of bodies, however, nature, impelled by their multiplicity, gave us five faculties and distinctive sense-organs; and these do not detect all bodies, but many by reason of their minuteness elude sense-perception. Moreover, just as in each of us, whose constituent parts are soul and body, the ruling and intellectual faculty is small, buried in the mass of flesh which is large, d Proclus, In Primum Euclidis El. Lib., p. 4, 18-24 and p. 11, 5-7 (Friedlein); Anon. Proleg. to Platonic Philosophy viii, 11-12 (p. 37 [Westerink] = Platonis Dialogi vi, p. 214, 1 [Hermann]); Scholia in Rem Publicam 509 p (vi, p. 350, 30 and p. 351, 2 [Hermann]). This notion that the objects of διάνοια are images of the ideas in the highest segment of the line still persists (cf. A. Wedberg, Plato's Philosophy of Mathematics [Stockholm, 1955], p. 105), although Plato never says this but asserts rather that, while διάνοια employs as likenesses sensible figures in the third segment, its objects in this procedure are the idea of the square or the idea of the diagonal, which are νοητά μετὰ ἀρχῆς (Republic 510 D 5—511 A 1 and 511 D 2; cf. P. Shorey, Plato's Republic ii (L.C.L.), v. 116, note b and p. 206, note a).

<sup>a</sup> The souls that rise from the body after death, ἀχλύν τινα καὶ ζόφον ὥσπερ πηλὸν ἀποσειομένους (De Genio Socratis 591 F), are said to be τὸν ὅγκον εὐσταλεῖς (De Sera Numinis Vindicta 564 A, cf. Non Posse Suaviter Vivi 1105 D). Cf. . . εἰς τὸν ὅγκον τὸν παχὺν τοῦτον εἰσκρίνονται (Proclus, İn Platonis Timaeum, iii, p. 297, 23-24 [Diehl]); ὁ δῆμος πλέον ἢ ὁ ἄρχων, καὶ τὸ σῶμα πλέον ἢ ψυχή (Maximus of Tyre, Philos, vii, ii d = p. 77, 10-11 [Hobein]); and what Plutarch

13; De Motu Animal. 701 b 24-28.

<sup>d</sup> See De An. Proc. in Timaeo 1016 B, where god is identified with τῶν νοητῶν . . . τοῦ ἀρίστου of Timaeus 37 A 1 (cf., however, for the meaning of νοητῶν in this phrase of Plato's Cherniss, Aristotle's Criticism of Plato . . ., p. 605 and Gnomon, xxx [1953], p. 372, n. 1).

## PLATONIC QUESTIONS III, 1002

such in the sum of things is likely to be the relation of the intelligible to the perceptible.<sup>a</sup> For in fact the intelligibles are principles of the corporeals,<sup>b</sup> and every principle is exceeded in number and size by that which comes from it.<sup>c</sup>

2. To the contrary, however, one might say first that in comparing (the) perceptibles with the intelligibles we are in a way putting mortal things on a level with the divine, for god is among the intelligible entities. In the second place, what is encompassed is in all cases surely less than that which encompasses; and the nature of the sum of things encompasses the perceptible with the intelligible, for god, having placed the soul in the middle, stretched it out through everything and further enveloped the bodies with it on the outside, and the soul is invisible and imperceptible to all the senses, as has been said in the Laws. That is also why each one of us is subject to destruction but the

<sup>e</sup> Cf. Proclus, In Platonis Rem Publicam i, p. 289, 6-18 (Kroll).

† Timaeus 34 B 3-4 (where διὰ παντός means through all the body of the universe, referred to by αὐτοῦ which Plutarch omits after εἰς τὸ μέσον, as he changes τὸ σῶμα in B 4 to τὰ σῶματα [cf. 34 B 2]); cf. De An. Proc. in Timaeo 1023 A

infra.

<sup>9</sup> Laws 898 ε 1-2, where ἀναίσθητον πάσαις τοῦ σώματος αἰσθήσεσι is followed by νοητὸν δ' εἶναι (for the meaning of which ef. Gnomon, xxv [1953], p. 372, n. 1). The possible influence of this passage upon Plutarch's treatment of the soul as "intelligible" and upon the doxographical statements that Plato held the soul to be οὐσία νοητή ([Plutarch], De Placitis 898 c = Dox. Graeci, p. 386 a 16; ef. p. 386 t 5 [Theodoretus and Nemesius]) is overlooked by H. Dörrie, who asserts "Niemals bezeichnet Platon die Seele als νοητόν . . ." (Porphyrios' "Symmikta Zetemata" [München, 1959], p. 187).

(1002) κόσμος οὐ φθαρησόμενος $\cdot$  ήμῶν μὲν γὰρ έκάστου $^1$ την ζωτικήν δύναμιν έντὸς περιέχει τὸ θνητοειδές καὶ διαλυτόν, ἐν δὲ τῷ κόσμῳ τοὐναντίον ὑπὸ της κυριωτέρας άρχης² καὶ κατὰ ταὐτὰ ώσαύτως έχούσης ἀεὶ σώζεται τὸ σωματικὸν ἐν μέσω περιεχόμενον. καὶ μὴν ἀμερές γε³ λέγεται καὶ ἀμέριστον τὸ μὲν σῶμα μικρότητι, τὸ δ' ἀσώματον Ο καὶ νοητὸν ώς άπλοῦν καὶ εἰλικρινές καὶ καθαρὸν άπάσης έτερότητος καὶ διαφοράς. καὶ άλλως εὔηθές έστι τοῖς σωματικοῖς τεκμαίρεσθαι περὶ τῶν άσωμάτων. τὸ γοῦν νῦν ἀμερές μὲν καλεῖται καὶ ἀμέριστον ἄμα δὲ πανταχοῦ ἐνέστηκε καὶ οὐδὲν αὐτοῦδ τῆς οἰκουμένης μέρος ἔρημόν ἐστιν, άλλὰ καὶ πάθη πάντα καὶ πράξεις φθοραί τε πᾶσαι καὶ γενέσεις αί<sup>7</sup> ὑπὸ τὸν κόσμον<sup>8</sup> ἐν τῷ νῦν περιέχονται. κριτήριον δὲ τοῦ νοητοῦ<sup>9</sup> μόνον έστιν ό νοῦς, ώς φωτὸς ὄψις, διὰ άπλότητα καὶ

<sup>&</sup>lt;sup>a</sup> This reason why the universe will never be destroyed is not that which is given in the *Timaeus* (41 A 7-B 6; cf. Plutarch, Quaest. Conviv. 720 B [δ θεὸς . . . ἐποίησε καὶ ποιεῖ καὶ 4.4.

## PLATONIC QUESTIONS III, 1002

universe is not going to be destroyed, for in our case what is subject to mortality and dissolution encompasses the vital force that each one has within, whereas in the universe on the contrary what is corporeal is for ever preserved by the more sovereign and invariably identical principle, in the middle of which it is encompassed.<sup>a</sup> Moreover, body is said to be without parts and indivisible because of minuteness but the incorporeal and intelligible because of its simplicity and purity and freedom from all diversity and difference.<sup>b</sup> And, besides, it is silly to judge of things incorporeal from things corporeal. At any rate, the now, while it is said to be without parts and indivisible, c is present everywhere simultaneously, and no part of the whole world is devoid of it; but all incidents and actions, all cessations and commencements of being under heaven e are encompassed in the now. It is because of the simplicity and similarity of the intelligible, however, that its sole criterion is the intelligence as

φυλάττει διὰ παντὸς . . . τὸν κόσμον]) but may be an inference

drawn from Timaeus 36 E 2-5.

b This is meant as a reply to the argument in 1001 D supra (ή γὰρ ἀμέριστος οὐσία . . . εἰς βραχὺ συνηγμένη καὶ καθαρόν . . .); cf. De An. Proc. in Timaeo 1022 E (chap. 21 init.). For the combination ἐτερότης καὶ διαφορά cf. De Virtute Morali 446 E (cited by Apelt); De An. Proc. in Timaeo 1015 Ε-F, 1026 A and c; De Comm. Not. 1083 E; Numa xvii, 2 (71 c).

<sup>c</sup> Cf. Aristotle, Physics 233 b 33-234 a 24 and Plutarch's

criticism of the Stoics, De Comm. Not. 1081 c.

d Cf. Plato, Parmenides 131 в 3-5 (... ἡμέρα μία καὶ ἡ αὐτὴ οὖσα πολλαχοῦ ἄμα ἐστὶ ...); Aristotle, Physics 218 b 13 and 220 b 5-6 (ὁ χρόνος ... καὶ ὁ αὐτὸς δὲ πανταχοῦ ἄμα).

<sup>e</sup> Cf. ὑπὸ τὸν οὐρανόν in Timaeus 23 c 7-D 1; and for κόσμος in this sense cf. Isocrates, Panegyricus 179; Polybius, xii, 25, 7 (Timaeus); Sextus, Adv. Math. x, 174-175.

(1002) όμοιότητα· τὰ δὲ σώματα, πολλὰς διαφορὰς ἔχοντα καὶ ἀνομοιότητας, ἄλλα ἄλλοις¹ κριτηρίοις Ε ὤσπερ ὀργάνοις ἁλίσκεσθαι πέφυκεν. ἀλλὰ μὴν οὐδὲ τῆς² ἐν ἡμῖν νοητῆς καὶ νοερᾶς δυνάμεως καταφρονοῦσιν ὀρθῶς· πολλὴ γὰρ οὖσα καὶ μεγάλη περίεστι παντὸς τοῦ αἰσθητοῦ καὶ μέχρι τῶν θείων ἐξικνεῖται. τὸ δὲ μέγιστον αὐτὸς ἐν Συμποσίω διδάσκων πῶς δεῖ³ τοῖς ἐρωτικοῖς χρῆσθαι, μετάγοντα τὴν ψυχὴν ἀπὸ τῶν αἰσθητῶν καλῶν⁴ ἐπὶ τὰ νοητά, παρεγγυᾳ μήτε σώματός τινος μήτ' ἐπιτηδεύματος μήτ' ἐπιστήμης κάλλει μιᾶς⁵ ὑποτετάχθαι καὶ δουλεύειν, ἀλλ' ἀποστάντα τῆς περὶ ταῦτα μικρολογίας ἐπὶ τὸ πολὺ τοῦ καλοῦ πέλαγος τρέπεσθαι.

#### ΖΗΤΗΜΑ Δ΄

Τί δήποτε, την ψυχην ἀεὶ πρεσβυτέραν ἀποφαίνων τοῦ σώματος αἰτίαν τε της ἐκείνου γενέσεως

<sup>2</sup>  $\tau \hat{\eta} s$  -omitted by J, g.

3 δή -a1, ε.

\* καλών -omitted by J (added in margin -J4), g.

<sup>5</sup> μηδεμιᾶς -Escorial T-11-5.

6 τί δήποτε -with these words begin γ, Tolet. 51, 5 (cf. Class. Quart., xxi [1927], p. 167), Laurent. 80, 5 and 80, 22.

b The voûs is the voερά δύναμις in us (cf. 1002 B supra: τὸ

<sup>&</sup>lt;sup>1</sup> ἄλλοις ἄλλα -J (corrected by J<sup>4</sup>), g, Bonon. C 3635, Voss. 16, Escorial T-11-5.

a This answers the argument in 1002 a supra (ἔτι τῶν μὲν νοητῶν ἔν κριτήριον . . .); and, as the subsequent words show, διὰ ἀπλότητα καὶ ὁμοιότητα refers to the homogeneity of the intelligible (cf. Αdv. Colotem 1114  $\mathbf{p}$  [. . . ὁμοιότητι πρὸς αὐτὸ καὶ τῷ μἢ δέχεσθαι διαφορὰν . . .]) and not to a similarity of intelligence and intelligible or of vision and light.

# PLATONIC QUESTIONS 111-IV, 1002

that of light is vision a; but, since bodies have many differences and dissimilarities, different ones are naturally apprehended by different criteria, as it were by different instruments. But furthermore it is not right of them to be disdainful even of the intelligible and intellectual faculty b in us men, for because it is ample and stout it transcends all that is perceptible and reaches as far as things divine.c The most important point, however, is that, when in the Symposium d Plato explains how one must manage the matter of love by diverting the soul from the beautiful objects that are perceptible to those that are intelligible, his own injunction is not to subjugate oneself and play the slave to the beauty of a particular body or practice or of a single science but to desist from petty concern about these things and turn to the vast sea of the beautiful.

### QUESTION IV

WHYEVER, when he declares that the soul is always senior to the body and the cause and origin of the

ήγεμονικόν καὶ νοερόν), and Plutarch thinks that he has the authority of Plato for treating this itself as a νοητόν (see note g on 1002 c supra). There is therefore no reason to read into this passage the distinction between νοητή and νοερά for which it is cited by H. Dörrie (Porphyrios' "Symmikta Zetemata," p. 189, n. 5).

<sup>c</sup> Cf. Philo Jud., De Ópificio Mundi 70-71 (i, pp. 23, 18-24, 1 [Cohn]) and R. M. Jones, Class. Phil., xxi (1926), pp. 101 ff.

d Symposium 210 D.

r Plutarch conveniently cuts short his paraphrase of the passage, for the end and purpose of the whole progress in the Symposium is the ἐπιστήμη μία of the idea of beauty (210 p. 6-211 p. 1; cf. Albinus, Epitome v, 5 [Louis]=p. 157, 14-18 [Hermann] and x, 6 [Louis]=p. 165, 24-29 [Hermann].

(1002)

 $^{2}_{
m F}$  καὶ ἀρχήν, πάλιν φησὶν οὐκ ἃν γενέσθαι ψυχὴν ανευ σώματος οὐδὲ νοῦν ανευ ψυχῆς ἀλλὰ ψυχὴν μὲν ἐν¹ σώματι νοῦν δ' ἐν τῆ ψυχῆ; δόξει γὰρ τὸ σῶμα καὶ εἶναι καὶ μὴ εἶναι, συνυπάρχον ἄμα τῆ

ψυχη καὶ γεννώμενον ύπὸ της ψυχης.

1003 "Η το πολλάκις υφ' ήμων λεγόμενον άληθές έστιν; ή μεν γάρ ἄνους ψυχή καὶ τὸ ἄμορφον σῶμα συνυπῆρχον άλλήλοις ἀεὶ καὶ οὐδέτερον αὐτῶν γένεσιν ἔσχεν οὐδ' ἀρχήν ἐπεὶ δὲ ἡ ψυχὴ νοῦ μετέλαβε καὶ άρμονίας καὶ γενομένη διὰ συμφωνίας ἔμφρων μεταβολης αἰτία γέγονε τη ΰλη καὶ κρατήσασα ταῖς αὐτῆς κινήσεσι τὰς ἐκείνης ἐπεσπάσατο καὶ ἐπέστρεψεν, ούτω τὸ σῶμα τοῦ

4 ἔμφρον -J1.

<sup>5</sup> αἰτία γέγονε -omitted by J¹, g. 6 κρατήσας αὐταῖς ταῖς -J1, g. 7 ἐκείνας -Escorial T-11-5.

8 επέστρεψαν - J.

<sup>a</sup> Plato, Timaeus 34 B 10-35 A 1 and Laws 896 A 5-c 8 (with 892 A 2-c 6); see De An. Proc. in Timaeo 1013 E-F and 1016 A-B (where Timaeus 34 B 10-35 A 1 is quoted).

b Timaeus 30 B 3-5 (cf. Albinus, Epitome xiv, 4 [Louis] = p. 170, 2-3 [Hermann]: ἴσως οὐχ οἴου τε ὄντος νοῦ ἄνευ ψυχῆς ύποστηναι). Here as elsewhere Plato does say that νοῦς cannot exist apart from ψυχή (Timaeus 46 D 5-6, Sophist 249 A 4-8, Philebus 30 c 9-10; cf. Cherniss, Aristotle's Criticism of Plato . . ., pp. 606-607) but neither here nor anywhere that soul cannot exist without body. This is simply a false inference from the statement that the demiurge did put soul into the body of the universe.

<sup>c</sup> See note c on De Comm. Not. 1075 r infra.

d With what follows cf. QUESTION II, 2 (1001 B-c) supra and De An. Proc. in Timaeo 1014 B-E and 1017 A-B. In those

## PLATONIC QUESTIONS IV, 1002-1003

latter's generation, a does he again say that soul could not have come to be without body or intelligence without soul either, b but soul in body and intelligence in soul? For it would seem that the body both exists and does not exist if it is at once coexistent with the soul and being generated by the soul.

Or <sup>c</sup> is that right which we frequently assert? <sup>d</sup> For soul without intelligence <sup>e</sup> and amorphous body <sup>f</sup> were always coexistent with each other, and neither of them had generation or origin; but, when the soul had partaken of intelligence and concord <sup>g</sup> and, grown rational through consonance, had become a cause of change for matter and had attracted and converted the motions of the latter <sup>h</sup> by having dominated them with its own motions, <sup>i</sup> this is the passages god or the demiurge, who is not mentioned in the present Question, is the subject of statements which here have for subject instead soul, <sup>i,e</sup>. intelligent soul; but this latter according to 1001 c supra is not merely the work of god but also a part of him.

 Cf. Timaeus 44 A 8: κατ' ἀρχάς τε ἄνους ψυχὴ γίγνεται, said, however, of the particular human soul when it enters the

body.

<sup>f</sup> Timaeus 50 D 7 and 51 A 7 (see De An. Proc. in Timaeo 1014 F [τὸ τὴν ὕλην ἀεὶ μὲν ἄμορφον καὶ ἀσχημάτιστον ὑπ' αὐτοῦ λέγεσθαι . . .] and cf. Timaeus Locrus 94 A [ἄμορφον δὲ καθ' αὐτὰν καὶ ἀσχημάτιστον]).

g See note a on 1001 c supra.

<sup>h</sup> According to Plutarch's own doctrine these could be only motions induced by disorderly soul not yet grown rational, for amorphous matter of itself would be δυνάμεως οἰκείας ἔρημον, ἀργὸν ἐξ αὐτοῦ, ἄμοιρος αἰτίας ἀπάσης (De An. Proc. in Timaeo 1014 r—1015 A, cf. 1015 E).

See the similar language used of the effect of νοῦς on ψυχή in De An. Proc. in Timaeo 1024 p: ἐγγενόμενος δὲ τῆ ψυχῆ καὶ κρατήσας εἰς ἐαυτὸν ἐπιστρέφει . . . (cf. Thévenax, L'Âme du Monde, pp. 71-72); and cf. Timaeus 42 c 4-p 2 with Cornford's note ad loc. (Plato's Cosmology, p. 144, n. 2).

(1003) κόσμου γένεσιν έσχεν ύπὸ τῆς ψυχῆς, καὶ κατασχηματιζόμενον καὶ συνομοιούμενον. οὐ γὰρ ἐξ αύτης ή ψυχή την τοῦ σώματος έδημιούργει φύσιν οὐδ' ἐκ τοῦ μὴ ὄντος, ἀλλ' ἐκ σώματος ἀτάκτου καὶ ἀσχηματίστου σῶμα τεταγμένον ἀπειργά-Β σατο καὶ πειθήνιον. ωσπερ οὖν, εὶ φαίη τις ἀεὶ την τοῦ σπέρματος<sup>3</sup> δύναμιν είναι μετά σώματος γεγονέναι μέντοι το σώμα της συκης η της έλαίας ὑπὸ σπέρματος, οὐδὲν ἐρεῖ διάφωνον (αὐτὸ γάρ τὸ σῶμα, κινήσεως αὐτῷ καὶ μεταβολῆς ὑπὸ τοῦ σπέρματος έγγενομένης, ἔφυ τοιοῦτο καὶ διεβλάστησεν) οὕτως ή ἄμορφος ὕλη καὶ ἀόριστος ὑπὸ τῆς ψυχῆς ἐνούσης σχηματισθεῖσα μορφὴν έσχε τοιαύτην καὶ διάθεσιν.

# PLATONIC QUESTIONS 1v-v, 1003

way in which the body of the universe got generated by the soul, in being fashioned by it and assimilated. For it was not out of itself that the soul fabricated the nature of body or out of what is non-existent either, but out of disorderly a and shapeless body it produced a well-ordered and disciplined b one. Therefore, just as there would be nothing inconsistent in the assertion if one should say that the potency of the seed is always associated with body and vet the body of the fig or the olive has come to be by the agency of seed (for the body itself had such and such a growth and germination because by the agency of the seed motion and change arose in it c), so the amorphous and indefinite matter got such and such a shape and disposition when it was fashioned by the soul existing within it.

### QUESTION V

1. Some bodies and figures being rectilinear and others circular,  $^d$  what was his reason for taking as the principles of the rectilinear figures the isosceles triangle and the scalene, the former of which produced the cube as element of earth while the scalene produced the pyramid and the octahedron and the

b Cf. De An. Proc. in Timaeo 1029 E for the word, there applied to the soul; but for the notion here cf. Timaeus 48 A

2-5 and 56 c 5-6.

° Cf. [Plutarch], De Placitis 905 A = Dox. Graeci, p. 417 A 2-5.

<sup>6</sup> Cf. Plato, Parmenides 137 D 8-E 6 and 145 B 3-5; Aristotle, De Caelo 286 b 13-16; Proclus, In Primum Euclidis El. Lib., p. 144, 10-18 (Friedlein).

<sup>&</sup>lt;sup>a</sup> Cf. Quaest. Conviv. 720 B (ή μὲν ὅλη τῶν ὑποκειμένων ἀτακτότατόν ἐστι . . .) and De An. Proc. in Timaeo 1024 A-B (οὕτε γὰρ τὸ αἰσθητὸν εἰλήχει τάξεως . . .).

(1003) πυρός σπέρμα το δ' άέρος το δε ὕδατος γενόμενον, το δε τῶν κυκλικῶν ὅλως παρῆκε, καίτοι μνησθεὶς τοῦ σφαιροειδοῦς ἐν οἶς φησι τῶν κατηριθμημένων σχημάτων ἕκαστον σώματος περιφεροῦς εἰς ἴσα

διανεμητικόν είναι;

Πότερον, ώς ύπονοοῦσιν ἔνιοι,² τὸ δωδεκάεδρον τῷ σφαιροειδεῖ προσένειμεν, εἰπὼν ὅτι τούτῳ³ πρὸς τὴν τοῦ παντὸς ὁ θεὸς κατεχρήσατο φύσιν ἐκεῖνο διαζωγραφῶν; καὶ γὰρ μάλιστα τῷ πλήθει τῶν στοιχείων ἀμβλύτητι δὲ τῶν γωνιῶν τὴν D εὐθύτητα διαφυγὸν εὐκαμπές ἐστι, καὶ τῇ περιτάσει καθάπερ αἱ δωδεκάσκυτοι σφαῖραι κυκλοτερὲς γίγνεται καὶ περιληπτικόν εχει γὰρ εἴκοσι γωνίας στερεάς, ὧν ἐκάστην ἐπίπεδοι περιέχουσιν ἀμβλεῖαι τρεῖς 'ἐκάστη γὰρ ὀρθῆς ἐστι καὶ πέμπτου μορίου συνήρμοσται δὲ καὶ συμπέπηγεν ἐκ δώδεκα πενταγώνων ἐσογωνίων καὶ ἰσοπλεύρων, ὧν ἕκα-

 $^2$  ἔτεροι ( $\nu$ ι superscript over  $\tau$ ε) -ε.  $^3$  τοῦτο -Voss. 16.  $^4$  διέφυγεν -J¹, g; διαφυγῶν -Voss. 16¹.

 $^{5}$  παραληπτικόν  $^{-}$   $^{1}$ , g.  $^{6}$  πανταγώνων  $^{-}$   $^{1}$ .

b Aristotle (De Caelo 286 b 27-33) interprets this as supporting evidence for his thesis that the sphere is the primary

solid figure.

<sup>c</sup> Timaeus 55 λ 3-4. Plato's words there are δλου περιφεροῦς διανεμητικὸν εἰς τσα μέρη καὶ δμοια, and δλου περιφεροῦς means "the whole circumference" of the sphere in which the tetrahedron is inscribed. At this point in the Timaeus only this, "the simplest solid figure," has been constructed, though what is said of its division of the sphere in which it is inscribed is undoubtedly meant to apply also to the four regular solids mentioned immediately thereafter.

<sup>&</sup>lt;sup>a</sup> Timaeus 53 c 4—55 c 4 and 55 p 7—56 g 6. For Plutarch's use of  $\gamma \hat{\eta}_S$  στοιχείον and πυρός σπέρμα in these lines cf. Timaeus 56 g 5 (στοιχείον καὶ σπέρμα) with Cornford's note (Plato's Cosmology, p. 223, n. 1).

# PLATONIC QUESTIONS v, 1003

icosahedron, which became the seed of fire and of air and of water respectively,<sup>a</sup> but for disregarding altogether the question of the circular figures,<sup>b</sup> even though he did mention the spherical in the passage where he says <sup>c</sup> that each of the figures enumerated has the property of dividing into equal parts an en-

circling body?

Did he, as some surmise, associate the dodecahedron with what is spherical, a since he said that god employed the former for the nature of the sum of things in tracing the design of this? For, furthest withdrawn from straightness by the multitude of its elements and obtuseness of its angles, it is flexible and like the balls that are made of twelve pieces of leather by being distended becomes circular and circumscriptive, for it has twenty solid angles each of which is contained by three plane angles that are obtuse, since each consists of a right angle and a fifth; and it has been assembled and constructed out of twelve equiangular and equilateral pentagons,

<sup>6</sup> Timaeus 55 c 4-6, more accurately quoted by Plutarch

in De Defectu Orac. 430 B.

b Neither Plutarch here nor Albinus in his Epitome xiii, 2

This is erroneous (cf. Heath, Manual, pp. 177-178), and Plutarch seems to make Ammonius call attention to the fact in De Defectu Orac. 428 A (... τὸ τοῦ καλουμένου δωδεκαέδρου στοιχεῖον ἄλλο ποιοῦσιν, οὐκ ἐκεῖνο τὸ σκαληνὸν ἐξ οὖ τὴν πυραμίδα καὶ τὸ ὀκτάεδρον καὶ τὸ ἐκοσάεδρον ὁ Πλάτων συνίστησιν). Albinus in his Epitome xiii, 2 (p. 77 [Louis] = pp. 168, 37–169, 2 [Hermann]) says that each of the twelve pentagons is divided into five triangles and each of these consists of six triangles, but it should be observed that he does not state what kind of triangles these are.

## PLATONIC QUESTIONS v, 1003

each of which consists of thirty of the primary scalene triangles, a and this is why it seems to represent at once the zodiac and the year in that the divisions

into parts are equal in number.b

2. Or is the straight naturally prior to the circular c or rather the circular line simply a modification of the straight line? For we do speak of the bending of what is straight d and the circle is described by a centre and a distance, this latter being the location of a straight line by which it is measured as well, for what contains the circle is at all points equally removed from the middle. Also, both cone and cylinder are generated by rectilinear figures, the former when one side and the base of a triangle are rotated about the other side, which remains fixed, and the cylinder when this same thing happens to a parallelogram. Moreover, what is lesser is nearer to the principle g; but the straight line is the least of all lines, h for the circular line has its (interior)

(pp. 75-77 [Louis] = pp. 168, 34-169, 3 [Hermann]) refers to any relation between the zodiac and the dodecahedron other than the numerical similarity that both of them (and the year) consist of twelve parts, each of which consists of thirty parts.

<sup>a</sup> Cf. Proclus, In Primum Euclidis El. Lib., p. 106, 24-25 (Friedlein); [Aristotle], Mechanica 847 b 23—848 a 3.

b Cf. Hero Alexandrinus, Def. a' (iv, p. 14, 13-19 [Heiberg]); Theon Smyrnaeus, p. 111, 14-16 (Hiller); Proclus, In Primum Euclidis El. Lib., p. 95, 21-26 (Friedlein); Aristotle, Topics 108 b 26-31 and Metaphysics 1016 b 24-31 with Cherniss, Aristotle's Criticism of Plato..., pp. 131-132 and note 322 on p. 397. Contrast 1002 A supra, where unity is said to produce numbers and then to pass on into points, lines, and figures.

c The unit, being the ἀρχή of number and not itself a number, is usually called "potentially triangular," 3 being the first triangular number as in De An. Proc. in Timaeo 1020 p (Theon Smyrnaeus, p. 33, 5-7 and p. 37, 15-19 [Hiller]; Nicomachus, Arithmetica Introductio, pp. 88, 23-89, 5 [Hoche]; Iamblichus, In Nicomachi Arithmeticam Introductionem, p. 62, 2-5 [Pistelli]). For triangular numbers cf.

# PLATONIC QUESTIONS v, 1003-1004

concave and its exterior convex.a Moreover, numbers are prior to figures, for the unit is itself prior to the point because the point is a unit in position.<sup>b</sup> Now, the unit is triangular, for every triangular number multiplied by eight and with addition of a unit becomes a square number, and this is characteristic of the unit also.c The triangle, then, is prior to the circle d; and, if so, the straight line too is prior to the circular. Moreover, the element is divided into none of the things that are compounded out of it, whereas the other things are subject to resolution into the element. If, then, the triangle is resolved into nothing that is circular, whereas the two diameters of the circle divide it into

Quaest. Conviv. 744 B (where 3 and 6 are the examples); Theon Smyrnaeus, p. 33, pp. 37, 7-38, 14, and p. 41, 3-8 (Hiller); Nicomachus, Arithmetica Introductio II, viii (pp. 87, 22-89, 16 [Hoche]). The algebraic formula is  $\frac{n(n+1)}{2}$ ;

and I conforms to this, being half of the product of itself and 2. The proposition that any triangular number multiplied by 8 becomes a square number when 1 is added is repeated by Iamblichus (In Nicomachi Arithmeticam Introductionem, p. 90, 18-19 [Pistelli]) but is not by him explicitly applied to the unit (cf. Heath, History i, p. 84 and ii, pp. 516-517; M. R. Cohen and I. E. Drabkin, A Source Book in Greek Science

[New York, 1948], p. 9, n. 2).

d This does not follow, for not only is the unit "square" as well as "triangular" (De E 391 A, De Defectu Orac. 429 E; Nicomachus, Arithmetica Introductio, p. 91, 4-5 [Hoche]; Iamblichus, In Nicomachi Arithmeticam Introductionem, p. 60, 3-5 and p. 75, 11-13 [Pistelli]) but even its being triangular does not prove the triangle to be a unit prior to the circle, which can itself be regarded as analogous to the unit (Aristotle, De Caelo 286 b 33-287 a 2; Iamblichus, op. cit., p. 61, 6-24 and pp. 94, 27-95, 2 [Pistelli]; Proclus, In Primum Euclidis El. Lib., pp. 146, 24-147, 5 and pp. 151, 20-152, 5 [Friedlein]).

(1004) τέμνουσιν αἱ δύο διάμετροι, πρότερον ἂν τῆ φύσει καὶ στοιχειωδέστερον εἴη τοῦ κυκλικοῦ¹ τὸ εὐθύ- γραμμον. ὅτι τοίνυν προηγούμενον μέν ἐστι τὸ εὐθύγραμμον² τὸ δὲ κυκλικὸν ἐπιγιγνόμενον³ καὶ συμβεβηκὸς αὐτὸς ὁ Πλάτων ἐνεδείξατο· τὴν γὰρ γῆν⁴ ἐκ κύβων συστησάμενος, ὧν ἕκαστον⁵ εὐθύγραμμοι⁴ περιέχουσιν ἐπιφάνειαι,² σφαιροειδὲς αὐτῆς γεγονέναι τὸ σχῆμά⁴ φησι καὶ στρογγύλον. ὥστ' οὐδὲν ἔδει ποιεῖν τῶν περιφερῶν ἴδιον στοιχεῖον, εἰ καὶ τοῖς εὐθυγράμμοις πρὸς ἄλληλά πως συναρμοττομένοις⁴ ὁ σχηματισμὸς οὖτος ἐπιγύγνεσθαι πέφυκεν.

<sup>&</sup>lt;sup>a</sup> Since the bases of the triangles into which the circle is divided remain arcs of a circle, the conclusion here drawn

# PLATONIC QUESTIONS v, 1004

four triangles, the rectilinear would be naturally prior to the circular and more elementary than it.<sup>a</sup> Furthermore, that the rectilinear is antecedent and the circular supervenient and incidental was indicated by Plato himself, for after making the earth consist of cubes,<sup>b</sup> each of which is contained by rectilinear surfaces, he says that the shape of it has turned out to be spherical or round.<sup>c</sup> Consequently there was no need to postulate an element peculiar to circular figures if this configuration does naturally supervene upon rectilinears conjoined with one another in a particular way.

3. Moreover, while a straight line, whatever its length, keeps the same straightness throughout, we see that the circumferences of circles are more curved, that is are more highly concentrated in their convexity, if they are smaller, and more relaxed, if they are larger.<sup>a</sup> At any rate, when set up on their convex circumference, some circles touch the under-

does not follow from the argument, with which cf. Nicomachus, Arithmetica Introductio II, vii, 4 (p. 87, 7-19 [Hoche]) and Simplicius, De Caelo, pp. 613, 30-614, 10 on Aristotle, De Caelo 303 a 31-b 1.

b Timaeus 55 D 8-56 A 1.

° Despite  $\phi\eta\sigma\iota$  this is not a quotation. In fact, in the Timaeus after 55 d 8—56 a 1 the sphericity of the earth is referred to only by implication in 62 d 12—63 a 3 (cf. Cornford, Plato's Cosmology, p. 263, notes 1 and 2 with Phaedo 108 e 4—109 a 7 and 110 b 5-7). Misguided attempts have been made to deny that even these passages refer to the earth's sphericity (cf. Lustrum, IV [1959], Nos. 660-661 and V [1960], Nos. 1464 and 1465).

d Cf. John Wallis, A Treatise of Angular Sections (London, 1684), p. 90: "... the lesser circumference is more crooked. For it hath as much of curvity in a shorter length.

And therefore . . . it is more crooked intensively."

(1004) οἱ δὲ κατὰ γραμμὴν ἄπτονται τῶν ὑποκειμένων ἐπιπέδων· ὥσθ' ὑπονοήσειεν ἄν τις εὐθείας κατὰ μικρὰ πολλὰς συντιθεμένας¹ τὴν περιφερῆ γραμμὴν ἀποτελεῖν.

4. "Όρα δὲ μὴ τῶν μὲν² ἐνταῦθα κυκλικῶν καὶ σφαιροειδῶν οὐδέν ἐστιν ἀπηκριβωμένον ἀλλ' ἐντάσει τῶν εὐθυγράμμων ἢ μικρότητι C τῶν μορίων τῆς διαφορᾶς λαυθανούσης ἐπιφαίνεται τὸ στρογγύλον καὶ κυκλοειδές, ὅθεν οὐδὲ κινεῖται φύσει τῶν ἐνταῦθα σωμάτων ἐγκυκλίως οὐδὲν ἀλλ' ἐπ' εὐθείας ἄπαντα· τὸ δ' ὄντως σφαιροειδὲς οὐκ ἔστιν αἰσθητοῦ σώματος ἀλλὰ τῆς ψυχῆς καὶ τοῦ νοῦ στοιχεῖον, οἷς καὶ τὴν κυκλοφορητικὴν κίνησιν ὡς προσήκουσαν κατὰ φύσιν ἀποδίδωσιν.

<sup>3</sup> ἐντάσει -Ε, Β, n, Escorial T-11-5; ἐνστάσει -all other

MSS.

 $<sup>^2</sup>$   $\mu \hat{\epsilon}_V$  -J1, g, Voss. 16, Bonon., Escorial T-11-5; omitted by all other Mss.

<sup>4</sup> κυκλοφορικήν -Ε, Β, η ; κυκλοφορητικόν -Escorial T-11-5.

<sup>&</sup>lt;sup>a</sup> This in fact has nothing to do with the preceding statement, for a circle however large will never touch the plane at a line unless both are material, and then it will do so however small it is (cf. Aristotle, Metaphysics 997 b 35—998 a 4 and Alexander, Metaph., p. 200, 15-21). It does not then support the subsequent conclusion either, to which Plutarch himself should not have subscribed anyway, for he held that the curvature of a circle is uniform (cf. De Facie 932 F and Class. Phil., xlvi [1951], p. 144).

<sup>b</sup> Cf. Proclus, In Primum Euclidis El. Lib., p. 54, 11-13

## PLATONIC QUESTIONS v, 1004

lying planes at a point and others at a line.<sup>a</sup> Consequently one might surmise that many straight lines when put together bit by bit produce the circular line.

4. Consider too that none of the circular or spherical things in this world is exactly perfect <sup>b</sup> but there is a superficial appearance of roundness and circularity, the difference being unnoticed because of the tension and distension of the rectilinears or the minuteness of their parts, this being the reason why none of the bodies in this world moves naturally in a circle either but all move in a straight line, whereas the really spherical is an element not of perceptible body but of soul and intelligence, <sup>c</sup> to which he assigns as naturally befitting them circular motion as well. <sup>d</sup>

(Friedlein); [Plato], Epistle vii, 343 A 5-9; and Plato,

Philebus 62 A 7-B 9.

<sup>c</sup> Cf. Atticus, frag. vi (Baudry) = Eusebius, Praep. Evang. xv, 8, 7 (ii, p. 367, 13-18 [Mras]); Proclus, In Primum Euclidis El. Lib., p. 82, 7-12 and pp. 147, 22–148, 4 (Friedlein). In calling the spherical, of which the natural motion is circular (cf. De E 390 a),  $\tau \hat{\eta}s$  ψυχ $\hat{\eta}s$  · · · στοιχείον, however, Plutarch seems to be perilously close to the identification of soul with the Aristotelian πέμπτη οὐσία κυκλοφορητική (cf. Cherniss, Aristotle's Criticism of Plato · · , pp. 601-602; P. Moraux, R.-E. xxiv [1963], cols. 1248, 37–1251, 12). Even "materialists" like the Atomists and Chrysippus had assigned the spherical to soul (cf. Aristotle, De Anima 404 a 1-9 and 405 a 8-13; S. V.F. ii, frag. 815).

d Plato, Timaeus 34 A 1-4, 36 E 2-37 c 3, 47 B 5-c 4 and Laws 898 A 3-B 3 (cf. Cherniss, Aristotle's Criticism of Plato ..., pp. 404-405); cf. De An. Proc. in Timaeo 1024 c-p.

## PLATONIC QUESTIONS VI-VII, 1004

### QUESTION VI

In what sense is it asserted in the *Phaedrus* <sup>a</sup> that the pinion's nature, by which what is heavy is raised on high, is among things of the body most closely akin to the divine?

Is it because the subject of the discourse is love and beauty of the body is the object of love and beauty by its similarity to things divine stirs the soul and makes it remember? b Or should one rather not labour the point at all but understand quite simply that, while there are a good many faculties of the soul concerned with the body, the faculty of reason or thought, whose objects he has said are things divine and celestial, is most closely akin to the divine? This faculty he not inappropriately called a pinion because it bears the soul up and away from the things that are base and mortal.

#### QUESTION VII

1. In what sense does Plato say f that, because there is void nowhere, the cyclical replacement f of

<sup>&</sup>lt;sup>a</sup> It was Plato's express purpose to banish δλκή from physical theory (Timaeus 80 c 2-3; cf. Cherniss, Aristotle's Criticism of Plato . . ., n. 306 on p. 387 sub finem). This point is missed entirely in "Timaeus Locrus" 101 p-102 A,

## PLATONIC QUESTIONS VII, 1004

motion is the cause of what happens in the case of medical cupping-instruments and in that of swallowing and of weights that are thrown and of flowing waters and of thunderbolts and of the apparent attraction <sup>a</sup> to amber and the loadstone and of the consonances of sounds? For he would seem in extraordinary fashion to be proposing a (single) cause as the source of numerous and dissimilar occurrences.

2. For, while in the case of respiration he has given an adequate exposition himself <sup>b</sup> of the way in which it comes about by the cyclical replacement of the air, for all the rest, after saying that these apparent wonders are produced because there is no void and these objects push themselves around into one another and interchange in going to their own positions, <sup>c</sup> he left it to us to work out the particulars.

3. Well then, in the first place, the case of the cupping-instrument is like this. The air, which along with heat it has enclosed next to the flesh, having become fiery and finer in texture than the pores of

where respiration occurs  $\epsilon \lambda \kappa o \mu \epsilon \nu \omega$  τ $\hat{\omega}$  ἀέρος ἀντὶ τ $\hat{\omega}$  ἀπορρέοντος, the cupping-instrument ἀπαναλωθέντος ὑπὸ τ $\hat{\omega}$  ατορός τ $\hat{\omega}$  ἀέρος ἐφέλκεται τὸ ὑγρόν (cf. ## PLATONIC QUESTIONS vII, 1004-1005

the bronze escapes not into empty space (for there isn't any) but into the air surrounding the cupping-instrument from without and pushes this air aside, as this air does that before itself; and at every step thus acted upon and acting the air that is in front gives way, making for the vacated space which the first had left, and so, falling upon the circumference of the flesh gripped by the cupping-instrument and pressing it up, it simultaneously squeezes the liquid out into the cupping-instrument.<sup>a</sup>

4. Swallowing occurs in the same way, for the cavities of the mouth and the oesophagus are always full of air. So, when the food is pressed in by the tongue, the fauces too having been stretched taut at the same time, the air, being squeezed out against the palate, follows closely upon that which gives

way and helps to push the food on.b

5. Weights that are thrown cleave the air and separate it because of the impact with which they have fallen upon it; and the air because of its nature always to seek out and fill up the space left empty

<sup>b</sup> Cf. the view opposed by Galen (De Naturalibus Facultatibus iii, chap. 8 = pp. 176-177 [Kühn]) that in deglutition the food is merely pushed down from above without any

δλκή.

<sup>&</sup>lt;sup>a</sup> Asclepiades of Bithynia, who compared the mechanism of respiration with the action of cupping-instruments, must have explained the latter also by a kind of περίωσις without the intervention of δλκή ([Plutarch], De Placitis 903 E-F = Dox. Graeci, pp. 412, 31-413, 1; cf. R. A. Fritzsche, Rhein. Mus., N.F. lvii [1902], p. 384).

<sup>b</sup> Cf. Aristotle's explanation of the downward motion of the thunderbolt contrary to its nature (Meteorology 342 a 12-

16 and 369 a 17-24).

 $^c$  i.e. την λίθον την 'Ηρακλείαν of 1004 ε supra called  $\eta$  σιδηρίτις as here by Plutarch in De Iside 376 в and Quaest.

<sup>&</sup>lt;sup>a</sup> Cf. Simplicius, Phys., p. 668, 25-32 on Aristotle, Physics 215 a 14-15 and the objections of Aristotle (Physics 267 a 15-20) and of Philoponus (Phys., pp. 639, 12—641, 6). Nothing is said in the Timaeus of the acceleration to which Plutarch refers (cf. A. E. Taylor, A Commentary on Plato's Timaeus, p. 572 on 80 A 1-2; F. Wehrli, Die Schule des Aristoteles, Heft v², p. 63 on Strato, frag. 73).

## PLATONIC QUESTIONS VII, 1005

flows around behind and follows along with the object discharged, helping to accelerate its motion.a

6. The falling of thunderbolts itself also resembles the hurling of missiles, for the impact that has occurred in the cloud makes the fiery substance leap out into the air, and the latter gives way when it has been rent asunder and, falling back together again, expels the thunderbolt from above, forcing it back

downwards contrary to its nature.b

7. Amber does not attract any of the objects placed near it as the loadstone c does not either, nor does any of the things in their neighbourhood spring to them of itself; but the loadstone emits certain effluvia which are heavy and like wind, and the contiguous air, forced back by these, pushes the air that is before itself, and that air, moving around in a circle and settling again upon the vacated space, forces the iron back and drags it along with itself.d

Conviv. 641 c; cf. Plato, Ion 533 p 3-5 and Pliny, N.H.

xxxvi, 127.

d The similarity of the ancillary cause of the iron's motion given by Lucretius (vi, 1022-1041) led R. A. Fritzsche to assume a common source and to identify this as Asclepiades of Bithynia, who is known to have denied the occurrence of όλκή in nature (Rhein. Mus., N.F. lvii [1902], pp. 369-373 and pp. 386-389); but cf. M. Bollack, Rev. Etudes Latines, xli (1963 [1964]), pp. 171-173 and pp. 183-184. Plutarch's συνεφέλκεται here and ἐφέλκεται in the next sentence are unfortunate expressions at least, for, although they refer to "traction" by the air which is driven from behind and not to any "attraction" by the magnet or amber, they might be thought to compromise the denial of όλκή, the original principle of the theory (cf. ovodev three at the beginning of this paragraph), and to represent a contamination with the Epicurean notions expressed by ducitur ex elementis (Lucretius, vi, 1012) and by συνεπισπάσθαι τὸν σίδηρον (Epicurus, frag. 293 [Usener, Epicurea, p. 208, 26-27]).

## PLATONIC QUESTIONS vII, 1005

Amber contains a substance like flame or wind which it ejects when its pores have been opened by friction of its surface; and this substance, when it has escaped, has the same action as that from the loadstone has but because of its tenuousness and weakness drags along the lightest and driest of the things in the neighbourhood, for it is not strong and does not have weight or impetus capable of expelling an amount of air with which to master the larger objects as the loadstone does. How is it then that the air pushes and presses against the loadstone neither stone nor wood but only iron? This, to be sure, is a difficulty that confronts equally those who think that the cohesion of the bodies comes about by the loadstone's attraction and those who think that it comes about by conveyance of the iron, a but Plato might provide a solution in the following way. Iron is neither exceedingly loose in texture like wood nor exceedingly close like gold or stone but has pores and passages and corrugations which by reason of their irregularities conform to the air; and the result is for the air, however in its motion to the loadstone it may fall upon the iron, not to slip off but, intercepted by certain lodgements and counter-

a i.e. by the iron's being "carried" or propelled to the magnet as in Plutarch's own explanation; φορφ does not here refer to any "impulse" of the iron itself, for such an explanation (as e.g. in Alexander, Quaestiones, p. 74, 24-30 [Bruns]) would not be confronted by this difficulty.

pressures with meshes that conform to it, to force the iron back and push it on before itself.<sup>a</sup> Well then, of these phenomena there might be some such explanation.

8. It is not similarly easy to comprehend the way in which cyclical propulsion is involved in the flowing of waters upon the earth. It must be observed, how-ever, that the water of pools is calm and at rest because it has spread and collected about itself from all sides motionless air that nowhere leaves an empty space. At any rate, the water on the surface in pools and in seas is agitated and undulates when the air begins to surge, for it straightway follows the latter as it changes position and flows off along with it because of the irregularity, the downward impact b producing the trough of the wave and the upward impact the swell until it has settled down and stopped as the space that encompasses the waters comes to rest. The streams of running waters, then, always pursuing the air that gives way and being driven on by that which is pushed around in turn, flow perpetually and unremittingly. This is also why rivers run more swiftly when they are full; but, when the water is low and shallow, it grows slack from feebleness, as the air does not

<sup>&</sup>lt;sup>a</sup> Cf. Lucretius, vi, 1056-1064 with R. A. Fritzsche, *Rhein. Mus.*, N.F. lvii (1902), p. 370 and p. 372, n. 14; and especially for the terminology cf. the use of the theory of effluvia, pores, and corrugations of a surface in Plutarch, *Quaest. Naturales* 916 D-F.

yield and does not undergo much cyclical replacement. It must be in this way too that the waters of fountains run upwards, the air from outside running down into the vacated underground spaces and thrusting the water forth again. In a darkened house where the air enclosed is still sprinkling the floor with water produces a draught or breeze, as the air shifts from its position before the moisture when it intervenes and is subjected to its impacts. Thus the two are naturally expelled by each other and yield to each other in turn, for there is no vacuity in which the one could be situated and so not partake of the change in the other.

9. And now as to the subject of consonance, he has himself stated a how the sounds (are made congruous by the motions). For the sound that is swift turns out to be high, and that which is slow to be low, which is also why the sense is set in motion sooner by the high sounds; and, when these as they are already fading out and dying away are overtaken by the slow sounds just beginning, the product of their blending because of the congruity affords the hearing pleasure which men call consonance. That the air is the instrument of this process is easy to see from what was previously stated. Sound, in

<sup>&</sup>lt;sup>a</sup> Timaeus 80 A 3-B 8. Of the genuine problems involved in this passage Plutarch appears not to have been aware. They are stated but not persuasively resolved by Cornford (*Plato's Cosmology*, pp. 320-326) and Moutsopoulos (*La Musique* . . . de *Platon*, pp. 36-42).

### PLATONIC QUESTIONS VII-VIII, 1006

fact, is the impact made by air through the ears upon the percipient, for the air, when struck by the agent that moved it, strikes sharply if that agent is vehement and more softly if it is dull. The air, then, that has been struck vehemently and intensely comes upon the hearing sooner and then, moving around again and catching up the slower air, accompanies it and with it conveys the sensation.

#### QUESTION VIII

1. What does Timaeus mean by saying  $^b$  that the souls were sowed in earth and moon and all the rest of the instruments of time?

Was he giving the earth motion like that of sun and moon and the five planets, which because they reverse their courses  $^c$  he called instruments of time; and ought the earth coiling about the axis extended through all  $^d$  be understood to have been devised not as confined and at rest but as turning and whirl-

b Plato, Timaeus 42 D 4-5 (see also 41 E 4-5); cf. [Plu-

tarch], De Fato 573 E.

° Cf. Timaeus 39 D 7-8 (... των ἄστρων ὅσα δι' οὐρανοῦ πορευόμενα ἔσχεν τροπάς...) and 40 B 6-7 (τὰ δὲ τρεπόμενα καὶ πλάνην τοιαύτην ἵσχοντα...) with Proclus, In Platonis Ti-

maeum iii, pp. 127, 31-128, 1 (Diehl).

<sup>d</sup> Timaeus 40 b 8-c 2. Plutarch's μεμηχανήσθαι represents Plato's ἐμηχανήσατο. Instead of διὰ πάντων (i.e. all the planetary orbits) the MSS. of Plato have διὰ παντός, δι' ἄπαντος, οτ διὰ τοῦ παντός; and instead of ἰλλομένην two of them (W, Y) have εἰλουμένην, while two (A, P) have εἰλουμένην (or εἰλλ-) τὴν (cf. Cornford, Plato's Cosmology, p. 120, n. 1; and for the textual tradition of Aristotle, De Caelo 293 b 31-32 cf. P. Moraux, Hermes, lxxxii [1954], pp. 176-178).

<sup>&</sup>lt;sup>a</sup> This seems to contradict the statement just above, ὅταν δὲ τούτοις . . . οἱ βραδεῖς ἐπιβάλωσιν ἀρχόμενοι . . ., and is certainly not in accord with Timaeus~80 a 6-B~4.

- (1006) ὕστερον 'Αρίσταρχος καὶ Σέλευκος ἀπεδείκνυσαν, ὁ μὲν ὑποτιθέμενος μόνον ὁ δὲ Σέλευκος καὶ ἀποφαινόμενος; Θεόφραστος δὲ καὶ προσιστορεῖ τῷ Πλάτωνι πρεσβυτέρῳ γενομένῳ μεταμέλειν ὡς οὐ προσήκουσαν ἀποδόντι τῆ γῆ τὴν μέσην χώραν τοῦ παντός.
  - 2. \*Η τούτοις μὲν ἀντίκειται πολλὰ τῶν ὁμολο-D γουμένως¹ ἀρεσκόντων τῷ ἀνδρί, μεταγραπτέον δὲ τὸ '' χρόνου '' '' χρόνω,'' λαμβάνοντας² ἀντὶ τῆς γενικῆς³ τὴν δοτικήν, καὶ δεκτέον ὅργανα μὴ τοὺς ἀστέρας ἀλλὰ τὰ σώματα τῶν ζώων λέγεσθαι καθάπερ 'Αριστοτέλης ὧρίσατο τὴν ψυχὴν ἐντε-

3 γενητικής -J1, g.

<sup>a</sup> Cf. Plutarch, De Facie 923 A with the references in my

note ad loc. (L.C.L. xii, p. 54, note a).

<sup>b</sup> Cf. Heath, Aristarchus of Samos, pp. 305-307; S. Pines, "Un fragment de Séleucus . . .," Rev. d'Histoire des Sciences, xvi (1963), pp. 193-209; and N. Swerdlow, Isis, lxiv (1973), pp. 242-243 in his review of B. L. van der Waerden, ibid., pp. 239-243.

<sup>c</sup> Theophrastus, Phys. Opin., frag. 22 (Dox. Graeci, p.

494, 1-3); cf. Plutarch, Numa xi, 3 (67 D).

a Like Chalcidius (Platonis Timaeus, p. 187, 4-13 [Wrobel] = p. 166, 6-12 [Waszink]) Plutarch here recognizes only two possible interpretations of λλομένην περὶ τὸν . . . πόλον: one, that the earth is stationary at the centre (with συνεχομένην καὶ μένουσαν cf. Prochus, In Platonis Timaeum iii, p. 137, 6-7 and 13-20 [Diehl] and Plutarch's own usage in Quaest. Conviv. 728 Ε: λλομένην τὴν ὅπα καὶ καθειργομένην), and the other, that the earth revolves like a planet around the axis common to all the planetary orbits (with στρεφομένην καὶ ἀνειλουμένην cf. Proclus, In Platonis Timaeum iii, p. 138, 7-8 [Diehl]: εἰλουμένην καὶ στρεφομένην; cf. εἰλουμέναν [Simplicius, Phys., p. 292, 28-29] and ἀνείλησων [Simplicius,

# PLATONIC QUESTIONS VIII, 1006

ing about in the way set forth later by Aristarchus <sup>a</sup> and Seleucus,<sup>b</sup> by the former only as an hypothesis but by Seleucus beyond that as a statement of fact? In fact Theophrastus even adds the observation <sup>c</sup> that Plato, when he had grown older, repented of having assigned to the earth as not befitting her the midmost space of the sum of things.<sup>a</sup>

2. Or is this in opposition to many of the opinions that the man admittedly held; and must we change "of time" to read "in time," adopting the dative instead of the genitive, and take instruments to mean not the stars but the bodies of living beings in the way that Aristotle defined the soul as actuality

De Caelo, p. 499, 15]). The way in which the second alternative is limited by the comparison with the hypothesis of Aristarchus is made clear by what Theophrastus is reported to have said and doubly clear by the reference in Numa xi, where . . . τῆς γῆς ὡς ἐν ἐτέρα χώρα καθεστώσης . . . shows it to be incompatible with the "more genuinely " Pythagorean theory of Simplicius which Cornford sought to identify as its true basis (Plato's Cosmology, pp. 127-129; K. Gaiser, Platons ungeschriebene Lehre [Stuttgart, 1963], p. 184, n. 155 [pp. 385-387]) but which is itself certainly post-Aristotelian (cf. W. Burkert, Weisheit und Wissenschaft [Nürnberg, 1962], pp. 216-217). Plutarch's two alternatives silently exclude the possibility that the Timaeus refers to a central earth with axial rotation (Aristotle, De Caelo 293 b 30-32 and 296 a 26-27) or with any sort of vibratory or oscillatory motion, discredited modern fantasies recently revived by K. Gaiser (op. cit., p. 183, n. 153 [pp. 381-385]) in the form of "wobbling motion about the axis . . . to produce a kind of nutation" and account for precession—which was unknown to Plato. On Timaeus 40 B 8-c 3, Aristotle's statements in the De Caelo, and the remark by Theophrastus cf. Cherniss, Aristotle's Criticism of Plato, pp. 545-564; I. Düring, Gnomon, xxvii (1955), pp. 156-157; F. M. Brignoli, Giornale Italiano di Filologia, xi (1958), pp. 246-260; W. Burkert, Weisheit und Wissenschaft, p. 305, n. 17.

(1006) λέχειαν¹ σώματος φυσικοῦ² ὀργανικοῦ δυνάμει ζωὴν ἔχοντος, ὥστε τοιοῦτον εἶναι τὸν λόγον αἱ ψυχαὶ εἰς τὰ προσήκοντα ὀργανικὰ σώματα ἐν χρόνῳ κατεσπάρησαν; ἀλλὰ καὶ τοῦτο παρὰ³ τὴν δόξαν ἐστίν· οὐ γὰρ ἄπαξ ἀλλὰ πολλάκις ὅργανα χρόνου τοὺς ἀστέρας εἴρηκεν, ὅπου καὶ τὸν ἥλιον αὐτὸν εἰς διορισμὸν καὶ φυλακὴν ἀριθμῶν χρόνου⁴ Ε γεγονέναι φησὶ μετὰ τῶν ἄλλων πλανήτων.

# PLATONIC QUESTIONS VIII, 1006

of body that is natural, instrumental, and potentially possessed of life, so that the meaning is like this: the souls in time were disseminated in the appropriate b instrumental bodies? This too, however, is contrary to his thought, for it is not once but frequently that he has called the stars instruments of time, since he even says that the sun itself along with the other planets came into being to distinguish

and preserve the numbers of time.

3. It is best, then, to understand that the earth is an instrument of time not by being in motion as the stars are but by remaining always at rest as they revolve about her and so providing them with risings and settings, which define days and nights, the primary measures of times.<sup>d</sup> That is also why he called her strict guardian and artificer of night and day,<sup>e</sup> for the pins of sun-dials too have come to be instruments and measures of time not by changing their position along with the shadows but by standing still, imitating the earth's occultation of the sun when

Plutarch need not therefore have written πρώτην ἐντελέχειαν (cf. Dox. Graeci, p. 387 a 14-15 as against a 1-3). The crucial word for Plutarch here, ὀργανικοῦ, comes from the second passage and in order to support the proposed interpretation of ὀργανα in Timaeus 42 p 4-5 should be taken to mean not "furnished with instruments" (cf. De Anima 412 a 28-b 4) but "instrumental."

<sup>b</sup> Cf. Timaeus 41 E 5. <sup>c</sup> Timaeus 38 c 5-6.

### PLATONIC QUESTIONS VIII, 1006-1007

he moves down around her, as Empedocles said

Night is produced by the earth when she stands in the way of the daylight.<sup>a</sup>

Such, then, is the explanation of this point.

4. One might rather have misgivings about that other point, whether it is not unlikely and absurd to assert of the sun that along with the moon and the planets he came into being to distinguish time.b For the sun is generally rated high in dignity and especially by Plato who himself in the Republic c has proclaimed him king and sovereign of all that is perceptible just as the good is of the intelligible, for of that good he is said to be the offspring, affording to things visible with their coming to light their coming to be even as that good is for things intelligible the source of their being and of being known. Now certainly for the god with such a nature and so much power to have come to be as an instrument of time and evident measure of the relative difference in speed and slowness of the eight spheres d seems to be not very proper and to be unreasonable besides. It must be stated, then, that because of ignorance

it, is mistaken in insisting that it must imply motion of the earth (*Rhein. Mus.*, c [1957], pp. 122-124).

b i.e. Timaeus 38 c 5-6, which was appealed to at the end

of section 2 supra (1006 D sub finem).

° Republic 506 E 3—507 A 4, 508 A 4-6, 508 B 12-C 2, 509 B 2-8, and 509 D 1-4; see also Plutarch, De Facie 944 E with

my note ad loc. (L.C.L. xii, p. 213, note g).

d Timaeus 39 B 2-5, where Plato says φοράς, however, and not "spheres" (cf. Cornford, Plato's Cosmology, pp. 78-79 and 119; Cherniss, Aristotle's Criticism of Plato, p. 555). So the "circles" of Republic 617 B 4-7 are called "spheres" by Plutarch in Quaest. Conviv. 745 c and in De An. Proc. in Timaeo 1029 c. Cf. also Albinus, Epitome xiv, 7 (p. 87, 1-8 [Louis] = pp. 170, 36-171, 7 [Hermann]).

### PLATONIC QUESTIONS VIII, 1007

those who are disturbed by these considerations think time to be a measure or number of motion according to antecedent and subsequent, as Aristotle said,<sup>a</sup> or what in motion is quantitative, as Speusippus did,<sup>b</sup> or extension of motion and nothing else, as did some of the Stoics,<sup>c</sup> defining it by an accident and not comprehending its essence and potency,<sup>a</sup> of which no mean surmise seems to have been expressed by Pindar in the words,

The lord, the lofty, time, who excels all the beatified gods, and by Pythagoras, when asked what time is, in the reply, the soul of the heavens. For time is not an attribute or accident of any chance motion but cause and potency and principle of that which holds together all the things that come to be, of the symmetry and order in which the nature of the whole universe, being animate, is in motion; or rather,

• Pindar, frag. 33 (Bergk, Schroeder, Snell) =24 (Turyn)

=14 (Bowra).

<sup>σ</sup> Contrast Aristotle, Physics 251 b 28 (... ὁ χρόνος πάθος τι κινήσεως), 219 b 15-16, and 220 b 24-28; and cf. Proclus, In Platonis Timaeum iii, p. 21, 5-6 (Diehl): οὐκ ἄρα ἀκολουθητέον τοῖς ἐν ψιλαῖς ἐπινοίαις αὐτὸν ἱστᾶσιν ἢ συμβεβηκός τι

ποιοῦσιν.

<sup>&</sup>lt;sup>4</sup> Cf. Proclus, In Platonis Timaeum iii, p. 20, 10-15 and p. 95, 7-20 (Diehl); V. Goldschmidt, Le système stoïcien, pp. 41-42.

Assigned to the Pythagorean 'Ακούσματα by A. Delatte (Études sur la littérature pythagoricienne [Paris, 1915], p. 278); but cf. Zeller, Phil. Griech. i/1, p. 524, n. 2 and p. 546, n. 2. A fanciful interpretation is given by R. B. Onians, Origins of European Thought... (Cambridge, 1954), pp. 250-251; but the definition here ascribed to Pythagoras might be connected with the theory mentioned by Aristotle (frag. 201 [Rose]), for which cf. Cherniss, Crit. Presoc. Phil., pp. 214-216.

(1007)  $_{\mbox{C}}^{\mbox{C}}$ οὖσα καὶ τάξις αὐτὴ καὶ συμμετρία χρόνος καλεῖται,

- This practical identification of time with the activity of the rational world-soul prefigures the doctrine of Plotinus (e.g. Enn. 111, vii, 12, lines 1-3 and 20-25; cf. II. Leisegang, Die Begriffe der Zeit und Ewigkeit im späteren Platonismus [Münster i.W., 1913], pp. 9 and 23-24; Thévenaz, L'Âme du Monde, p. 96). It is with a very different emphasis upon the Platonic contrast of time and eternal being that Plutarch in De E 392 ε makes his teacher, Ammonius, say: κυνητὸν γάρ τι καὶ κινουμένη συμφανταζόμενον ὕλη . . . ὁ χρόνος, οῦ γε δὴ τὸ μὲν ἔπειτα καὶ τὸ πρότερον . . . αὐτόθεν ἐξομολόγησίς ἐστι τοῦ μὴ ὅντος (cf. C. Andresen, Logos und Nomos [Berlin, 1955], pp. 284-287).

b Euripides, Troiades 887-888, adapted by Plutarch in De

Iside 381 B also (ayers - Euripides).

<sup>c</sup> The definition is ascribed to Pythagoras in [Plutarch], De Placitis 898 c = Dox. Graeci, p. 386 a 13-15 (cf. 386 a 8-11 ["Pythagoras . . . and similarly also Xenocrates"] and W. Burkert, Weisheit und Wissenschaft [Nürnberg, 1962], p. 57, n. 73); but Plutarch himself, ascribing it to Xenocrates, rejects it as a misinterpretation of the Timaeus (De An. Proc.

## PLATONIC QUESTIONS VIII, 1007

being motion and order itself and symmetry, it is called time, a

For all that mortal is, Going his noiseless path, he guides aright.<sup>b</sup>

In fact, the ancients even held that the essence of soul is number itself moving itself.<sup>c</sup> That is just the reason too why Plato said that time had come to be simultaneously with heaven <sup>a</sup> but there had been motion even before the generation of the heaven.<sup>c</sup> Time there was not, however, for there was not order either or any measure or distinction <sup>f</sup> but motion indeterminate, amorphous and unwrought matter, as it were, of time <sup>g</sup>; but providence,<sup>h</sup> when

in Timaeo 1012 D-F = Xenocrates, frag. 68 [Heinze] and 1013 c-D), which may account for his vague ascription of it to "the ancients" here where he cites it as testimony in support of an interpretation (cf. Thévenaz, L'Âme du Monde, p. 96).

d Timaeus 38 B 6.

<sup>e</sup> This refers, of course, to *Timaeus* 30 A 3-5 and 52 D—53 A; cf. De An. Proc. in Timaeo 1014 B, 1016 D-F, and 1024 C.

† Cf. Macrobius, Sat. 1, viii, 7 (". . . cum chaos esset, tempora non fuisse, siquidem tempus est certa dimensio quae ex caeli conversione colligitur"); and contrast the formula of Atticus (Proclus, In Platonis Timaeum iii, p. 37, 12-13 [Diehl]): χρόνος μὲν ἦν καὶ πρὸ οὐρανοῦ γενέσεως, τεταγμένος δὲ χρόνος οὐκ ἦν.

<sup>9</sup> In view of C. Andresen's misinterpretation (Logos und Nomos [Berlin, 1955], p. 285 and n. 28) it must be emphasized that χρόνου depends upon ὅλη, which is modified by ἄμορφος καὶ ἀσχημάτιστος (cf. De An. Proc. in Timaeo 1014 F: τὸ τὴν ὕλην ἀεὶ μὲν ἄμορφον καὶ ἀσχημάτιστον ὑπ' αὐτοῦ

λέγεσθαι).

<sup>'h</sup> Cf.' ἐκ προνοίας (De Facie 926 F), κατὰ θαυμασιωτάτην πρόνοιαν (Albinus, Epitome xii, 1 = p. 67, 20 [Louis] = p. 167, 10 [Hermann]); and [Plutarch], De Placitis 884 F (Dox. Graeci, p. 321 A 10-11) with Proclus, In Platonis Timaeum i, p. 415, 18-20 (Diehl).

<sup>&</sup>lt;sup>a</sup> Cf. Quaest. Conviv. 719 E (. . . τοῦ λόγου καταλαμβάνοντος αὐτὴν . . .) and 1001 B-C supra with note f there.

## PLATONIC QUESTIONS VIII, 1007

she took in tow and curbed matter with shapes a and motion with revolutions, simultaneously made of the former a universe and of the latter time. They are both semblances of god, the universe of his essence b and time a semblance in motion of his eternity, even as in the realm of becoming the universe is god. d Hence he says e that, as they came into being together, together they will also be dissolved again if any dissolution overtake them, for what is subject to generation cannot (be) apart from time just as what is intelligible cannot apart from eternity either if the latter is always to remain fixed and the former never to be dissolved in its process of becoming.f Time, then, since it is thus necessarily implicated and connected with the heaven, is not simply motion but, as has been said, motion in an orderly fashion that involves measure and limits

or even the reading  $\pi o \eta \eta \tau o \tilde{v}$  there instead of  $v o \eta \tau o \tilde{v}$  (though the latter is implied by De Iside 373 B, . . .  $\epsilon i \kappa \acute{v} \kappa \sigma \iota \tau o \tilde{v} v o \eta \tau o \tilde{v}$  (possibly supported by the misinterpretation of Timaeus 29 E 3 (cf. De Sera Numinis Vindicta 550 D and De An. Proc. in Timaeo 1014 B [. . .  $\pi p \acute{o} s$  a  $\mathring{v} \tau \acute{o} v \acute{e} \acute{e} o \iota \iota \iota v \iota v$ ]; but it may also have been inferred that, since  $\gamma \acute{e} \nu \epsilon \iota \iota s$  is an  $\epsilon \iota \kappa \acute{o} \nu v \dot{o} \iota \iota s$   $\acute{e} \tau \check{v} \iota \iota v \iota v$  (De Iside 372 F), if, as Plutarch proceeds to assert, the universe is god in the realm of  $\gamma \acute{e} \nu \epsilon \iota \iota s$  (see note d  $i \iota \iota \eta \tau o \iota v$ ), that of which it is the semblance must be god in the realm of  $o \dot{v} o \iota \iota s$ 

c Cf. Timaeus 37 p 5-7. Plutarch himself in De Defectu Orac. 422 B-c assigns eternity to the ideas (περὶ αὐτὰ τοῦ αἰῶνος ὅντος οἶον ἀπορροὴν ἐπὶ τοὺς κόσμους φέρεσθαι τὸν χρόνον); cf. Albinus, Εριίτοme xiv, 6 (p. 85, 5-6 [Louis] = p. 170, 21-23

[Hermann]).

<sup>d</sup> Cf. Timaeus 34 A 8-B 1 and B 8-9, 92 c 4-9, and Critias 106 A 3-4 (one of the passages cited by Plutarch himself in De An. Proc. in Timaeo 1017 c).

· Timaeus 38 B 6-7.

f Cf. Timaeus 27 b 6-28 A 4 and 38 c 1-3.

## PLATONIC QUESTIONS VIII-IX, 1007

and revolutions. The sun, being overseer and sentinel<sup>a</sup> of these for defining and arbitrating and revealing and displaying changes and seasons which according to Heraclitus <sup>b</sup> bring all things, turns out to be collaborator with the sovereign and primary god <sup>c</sup> not in paltry or trivial matters but in those that are greatest and most important.

#### QUESTION IX

1. About the faculties of the soul in the Republic, where <sup>a</sup> Plato likened excellently well the consonance of the rational and mettlesome and appetitive to a concord of intermediate and topmost and nethermost strings, <sup>e</sup> one might raise the question whether it is the mettlesome or the rational that he gave the rank of intermediate, for in this passage he has not made it clear himself. Now, the local disposition of the parts does put the mettlesome in the position of the intermediate and the rational in that of the topmost string. For what is above and first the ancients styled topmost, <sup>f</sup> even as Xenocrates calls

d Republic 443 D 5-7.

f Cf. [Aristotle], De Mundo 397 b 24-26; Aristides Quintilianus, De Musica i, 6 (p. 8, 8-9 and 27-28 [Winning-

ton-Ingram]).

<sup>&</sup>lt;sup>ο</sup> Cf. τὸν ἀνωτάτω θεόν (1000 Ε [QUESTION II init.] supra).

<sup>\*\*</sup> The note of lowest pitch in the scale was called "topmost" (scil. string); and its octave, that of highest pitch, was called "nethermost": ef. Nicomachus, Harmonices Man. 3 (Musici Scriptores Graeci, p. 241, 19-23 [Jan]); Theon Smyrnaeus, p. 51, 12-14 (Hiller); Chalcidius, Platonis Timaeus, p. 111, 7-11 (Wrobel) = p. 93, 8-11 (Waszink); and Plutarch, De An. Proc. in Timaeo 1021 λ infra (... βαρύτερον ψθέγξεται ὡς ὑπάτη πρὸς νήτην ... ὀξύτερον ὡς νήτη πρὸς ὑπάτην).

<sup>&</sup>lt;sup>a</sup> Xenocrates, frag. 18 (Heinze). "Nethermost Zeus" is the chthonian Zeus or Hades (cf. Aeschylus, Supplices 156-158 and 230-231 [with E. Fraenkel on Agamemnon 1386-1387]; Euripides, frag. 912, 1-3 and 6-8 [Nauck, Trag. Graec. Frag.2, p. 655]; Pausanias, ii, 24, 4 with Proclus, In Platonis Cratylum, pp. 83, 24-84, 1 [Pasquali]), whose domain, however, is no longer subterranean but is the whole sublunar region of the universe (cf. De Facie 942 r and 943 c [L.C.L. xii, p. 195, note d and p. 201, note c]; P. Boyancé, Rev. Etudes Greeques, lxv [1952], pp. 334-335; W. Burkert, Weisheit und Wissenschaft [Nürnberg, 1962], pp. 344-346). By "topmost Zeus" Xenocrates may have meant to refer to the monad which he is said to have given the station of father reigning έν οὐρανῶ, to have styled Zeus and νοῦς, and to have regarded as  $\pi\rho\hat{\omega}\tau$ os  $\theta\epsilon\hat{o}s$  (frag. 15 [Heinze] = Dox. Graeci, p. 304 B 1-7). To establish strict correspondence between the present passage (frag. 18) and frags. 15 and 5, however, one must assume that Xenocrates posited a Zevs

### PLATONIC QUESTIONS 1x, 1007-1008

Zeus who is among things invariable and identical topmost but nethermost him who is beneath the moon a and earlier Homer styled the god who is ruler of rulers topmost of lords. Nature has also duly assigned the position above to what is most excellent by establishing the reason like a pilot in the head and making the appetitive part dwell last and nethermost in distant banishment. For the station underneath is styled nethermost, as is made clear by the appellations of the dead, who are styled nether and infernal; and some people say that of the winds too it is the one blowing from underneath out of the unseen pole a that has been named

μέσος also (cf. A. B. Krische, Die theologischen Lehren der griechischen Denker [Göttingen, 1840], p. 324; H. J. Krämer, Der Ursprung der Geistmetaphysik [Amsterdam, 1964], p. 37, n. 58 and p. 82, n. 209; H. Happ, Parusia: Festgabe für Johannes Hirschberger [Frankfurt am Main, 1965], p. 178, n. 101); and, had he done so, it is unlikely that Plutarch would have omitted mention of it in this context. In Quaest. Conviv. 745 в the Delphian muses are said to have been named Υπάτη, Μέση, and Νεάτη from the regions of the universe guarded by each of them and not—as, in fact, is asserted by Censorinus (frag. 12 = p. 65, 13-15 [Hultsch])—from the musical notes or strings; but, even if this passage too derived from Xenocrates (Heinze, Xenokrates, p. 76), the latter may well have treated Zeus only in his two commonly recognized aspects as τψιστος and χθόνιος (cf. Pausanias, ii, 2, 8).

b'Iliad viii, 31; Odyssey i, 45 and 81 and xxiv, 473.

d Cf. [Aristotle], De Mundo 394 b 31-32; Joannes Lydus,

a The derivation of νότος (the "moist" wind or rain-wind) from νέατος, as false as would be that of "thunder" from "under," is probably reflected in τοῦ νότου πνέοντος ἀπὸ τῶν κάτω τόπων of Heracliti Quaestiones Homericae 47 (cf. Hermias, In Platonis Phaedrum, p. 29, 7-8 [Couvreur]) and in "Auster... qui et Notus, ex humili flans,..." of Isidore (De Natura Rerum xxxvii, 3) and persists in the etymological verses of Johannes Mauropus (R. Reitzenstein, Geschichte der griechischen Etymologika [Leipzig, 1897], p. 174, lines 37-38).

## PLATONIC QUESTIONS 1x, 1008

thunder-gust.<sup>a</sup> Since, then, the opposition of last to first and of nethermost to topmost is the relation in which the appetitive part stands to the rational, it is not possible for the rational to be furthest above and first and yet for another than it to be topmost. For those who assign it the rôle of the intermediate on the ground that this is a sovereign function b fail to understand that they are eliminating the more sovereign function of the topmost, which befits neither mettle nor appetite, for to be ruled and to follow is natural to either of these but to rule or to lead the rational is natural to neither. From their nature it will be still more apparent that the mettlesome part has the locally intermediate station among them, d if in fact ruling is natural to the rational but being ruled and ruling to the mettlesome, which, while obedient to the reason, dominates and chastises the appetite whenever it disobeys the reason. Also,

b Cf. 1009 A infra: τὴν δὲ πρώτην ἔχει καὶ κυριωτάτην

δύναμιν ώς μέση. . . .

<sup>c</sup> Cf. De Virtute Morali 442 A with Plato, Republic 441 E 4—442 D I; and De Virtute Morali 442 C (τὸ δὲ παθητικὸν ... τοῦ λογιζομένου καὶ φρονοῦντος εἰσακούειν ... καὶ ὑπείκειν ... πέφυκεν) with Aristotle, Eth. Nic. 1102 b 25-31, with Eth. Eud. 1219 b 28-31, and with Iamblichus, Protrepticus

p. 41, 20-22 (Pistelli).

The argument, which hitherto has turned on the meaning of  $\tilde{v}\pi\alpha\tau\sigma\nu$  and  $\nu\epsilon\alpha\tau\sigma\nu$ , now is based upon the nature of the parts of the soul; but its purpose is still to prove that the mettlesome part is in the locally middle position of the three. Hubert was mistaken, therefore, in wishing to construe  $\tau\tilde{\omega}$   $\tau\delta\tau\omega$  as an "instrumental" in comparison with  $\tau\tilde{\eta}$  φύσει and in emending the text to this end.

<sup>e</sup> Cf. Proclus, In Platonis Rem Publicam i, pp. 211, 7-212, 20 (Kroll) and Stobaeus, Ecl. i, 49, 27 (p. 355, 10-12 [Wachsmuth]); and for the characterization of the mettlesome part

## PLATONIC QUESTIONS 1x, 1008

just as among letters the semivowels are intermediate between the mutes and the vowels by having more sound than the former and less than the latter, a so in the soul of man the mettlesome part is not purely affective but frequently has a mental image of what is fair, b though one commingled with what is irrational, the yearning for retribution.c Plato too, when he likened the structure of the soul to a composite of team and charioteer, a represented, as is clear to everyone, the rational part as charioteer and in the team of horses represented as shaggy about the ears, deaf, scarcely yielding to whip and goads e the contumacy and utter indiscipline of the appetites but the mettlesome part as mostly tractable to the reason and allied with it. Now, as in the car and pair it is not the charioteer that is intermediate in virtue and function but that one of the horses which is worse than the charioteer but better than its yoke-fellow, so in the soul Plato allotted the intermediate station not to the dominant part but

b Cf. ὁ θυμὸς ὑπερορᾶ μὲν σώματος εἰς ἀσώματον δὲ ἀγαθὸν βλέπει τὴν τιμήν (Proclus, In Platonis Rem Publicam, i, p. 235, 16-18 [Kroll] with i, p. 211, 25-26 and p. 225, 27-30 and p. 226, 13-17 [Kroll]).

<sup>&</sup>lt;sup>a</sup> Proclus (In Platonis Rem Publicam i, pp. 212, 26–213. 16 [Kroll]) also makes the mettlesome part intermediate; but according to him its relation to the rational part is that of the fifth and to the appetitive that of the fourth, which implies that the appetitive part is  $\delta n d \tau \eta$  and the rational part  $\nu \dot{\eta} \tau \eta$  (cf. e.g. De An. Proc. in Timaeo 1019 D-E infra), the argument for this being that, while it makes the interval between mettlesome and rational greater than that between mettle-

### PLATONIC QUESTIONS 1X, 1008

to that in which the affective component is less than in the \( \)third but greater than in the \( \) first and the component of reason greater than in the third \( \) but less than in the first \( \). The fact is that this disposition also preserves the proportion of the consonances, of the mettlesome to the rational as topmost string the fourth and to the appetitive as nethermost the fifth and of the rational to the appetitive as topmost to nethermost the octave \(^a\); but if we pull the reason into the middle, it will remove to a greater distance from the appetite the mettle, which because of its similarity to appetite some of the philosophers believe to be identical with it.

2. Or <sup>c</sup> is it ridiculous to allot to local positions the status of first and intermediate and last, seeing that the topmost itself, while on the lyre it occupies the position furthest above and first, on the pipes occupies the one underneath and last <sup>d</sup> and that the

some and appetitive, it preserves the greater consonance of the mettlesome with the rational, the fifth being  $\mu \hat{a} \lambda \lambda \rho \nu$   $\sigma \nu \mu \phi_{\mu} \omega \nu i a$  than the fourth. Yet elsewhere, in the divine  $\dot{a} \rho \mu \rho \nu i a$  of mind, soul, and body it is  $\sigma \hat{a} \mu a$  that is  $\nu \dot{\eta} \tau \eta$  and  $\nu o \hat{v} \hat{s}$  that is  $\dot{\nu} \dot{\eta} \dot{\tau} \dot{\eta} \tau \eta$  to the  $\mu \dot{\epsilon} \sigma \eta$  of soul (In Platonis Rem Publicam ii,

p. 4, 15-21 [Kroll]).

b Cf. De Virtute Morali 442 B (᾿Αριστοτέλης . . . τὸ μὲν θυμοειδὲς τῷ ἐπιθυμητικῷ προσένειμεν ὡς ἐπιθυμίαν τινὰ τὸν θυμὸν ὅντα . . .). It is less likely that Plutarch had in mind here such classifications as those of S.V.F. iii, frag. 396, to which Hubert refers, especially since what he emphasizes as characteristic of Stoic doctrine is the denial that τὸ παθητικὸν καὶ ἄλογον is distinct from τὸ λογικόν (De Virtute Morali 441 c-d and 446 F—447 A, De Sollertia Animalium 961 d. De An. Proc. in Timaeo 1025 d.).

Göldi, Plutarchs sprachliche Interessen (Diss. Zürich, 1922), pp. 2-10.

## PLATONIC QUESTIONS x, 1009

### QUESTION X a

1. What was Plato's reason for saying b that speech is a blend of nouns and verbs? For it seems that except for these two Plato dismissed all the parts of speech whereas Homer in his exuberance went so far as to pack all together into a single line, the following:

Tentward going myself take the guerdon that well you may know it.º

In this there are in fact a pronoun and participle and noun and verb and preposition and article and conjunction and adverb, for the suffix "ward" has here been put in place of the preposition "to," the expression "tentward" being of the same kind as the expression "Athensward." What, then, is to be said on behalf of Plato?

Or is it that the ancients styled "primary p. 189 and F. M. Cornford, Plato's Theory of Knowledge (London, 1935), pp. 307-308.

<sup>c</sup> Iliad i, 185.

d For these eight parts of speech cf. Dionysius Thrax, Ars Grammatica § 11 (p. 23 1-2 [Uhlig]). As the Homeric line containing all of them the grammarians cite Iliad xxii, 59 (Scholia in Dionysii Thracis Artem Grammaticam, p. 58, 13-19 and p. 357, 29-36 [Hilgard]; Eustathius, Commentarii ad Homeri Iliadem 1256, 60-61); and there the noun is δύστηνον, for the adjective ("noun adjective" in older grammars [cf. O.E.D. s.v. "noun" 3]) was considered to be a kind of noun, δνομα ἐπίθετον (Dionysius Thrax, op. cit., § 12 [p. 33, 1 and pp. 34, 3-35, 2] with Scholia . . ., p. 233, 7-33 and p. 553, 11-17; cf. H. Steinthal, Geschichte der Sprachwissenschaft bei den Griechen und Römern², ii [Berlin, 1891], pp. 251-256).

Cf. Etym. Magnum 761, 30-32 and 809, 8-9 (Gaisford) and further for μόριον as "prefix" or "suffix" 141, 47-52.

f See 1003 A and 1008 E supra and note c on De Comm. Not. 1075 F infra.

(1009) καλουμένην πρότασιν νῦν δ' ἀξίωμα προσηγόρευον, δ πρῶτον λέγοντες ἀληθεύουσιν ἢ ψεύδονται; τοῦτο δ' ἐξ ὀνόματος καὶ ῥήματος συνέστηκεν, ὧν τὸ μὲν πτῶσιν οἱ διαλεκτικοὶ τὸ δὲ D κατηγόρημα καλοῦσιν. ἀκούσαντες γὰρ ὅτι Σωκράτης φιλοσοφεῖ καὶ πάλιν ὅτι Σωκράτης πέτεται,² τὸν μὲν ἀληθῆ λόγον εἶναι τὸν δὲ ψευδῆ φήσομεν, οὐδενὸς ἄλλου προσδεηθέντες. καὶ γὰρ εἶκὸς ἀνθρώπους ἐν χρεία λόγου τὸ πρῶτον³ καὶ φωνῆς ἐνάρθρου γενέσθαι, τάς τε πράξεις καὶ τοὺς πράττοντας αὐτὰς καὶ τὰ πάθη καὶ τοὺς πάσχοντας ἀλλήλοις διασαφεῖν καὶ ἀποσημαίνειν βουλομένους. ἐπεὶ τοίνυν τῷ μὲν ῥήματι τὰ

 $^1$  πρόφασιν -J  $^1$  , g.  $^2$  πέτεται -Pohlenz ; τρέπεται -Mss.  $^3$  τὸ πρῶτον ἐν χρεία λόγου -J  $^1$  , g ; τὸ πρῶτον -omitted by  $a^1$ 

<sup>1</sup>c Plato, Sophist 262 E 8-9 and 263 A 11-B 3; cf. [Apuleius], Περὶ ἐρμηνείας iv (p. 178, 1-7 [Thomas]) and Ammonius, De Interpretatione, p. 18, 2-22 and pp. 26, 31-27, 4. It

<sup>&</sup>lt;sup>a</sup> Plato, Sophist 262 c 6-7 (των λόγων ὁ πρωτός τε καὶ σμικρότατος) and 9-10 <math>(λόγον . . . ελάχιστόν τε καὶ πρωτον); cf. Ammonius, De Interpretatione, p. 67, 20-30 and pp. 78, 29-79, 9.

b Cf. [Apuleius], Περὶ ἐρμηνείας i (pp. 176, 15–177, 2 [Thomas]); Galen, Institutio Logica i, 5 (with J. Mau's note ad loc., Galen, Einführung in die Logik [Berlin, 1960], pp. 3-4); and Proclus, In Primum Euclidis El. Lib., pp. 193, 18–194, 4 (Friedlein). For πρότασις used in the general sense of "proposition" cf. Albinus, Epitome vi, 1 and 3 (p. 29, 1-4 and 19-20 [Louis] = p. 158, 4-7 and 21-22 [Hermann]) and Aristotle himself (Anal. Prior. 24 a 16-17 with Alexander, Anal. Prior., p. 44, 16-23); and for ἀξίωμα as the Stoic term for this cf. besides the passage of Proclus just cited Ammonius, De Interpretatione, p. 2, 26 and Mates, Stoic Logic, pp. 27-33 and p. 132, s.v. ἀξίωμα.

## PLATONIC QUESTIONS x, 1009

speech "a what then was called a pronouncement and now is called a proposition, that in the enunciation of which a truth or falsehood is first expressed? And this consists of a noun and a verb, the former of which the dialecticians call subject and the latter predicate. For upon hearing "Socrates philosophizes" and again "Socrates flies" we should say without requiring anything else besides that the former is true speech and the latter false. Moreover, it is likely that men first felt need of speech and articulate sound in desiring to designate and make quite clear to one another actions and their agents and patients and what they undergo. Since, then, with the verb we do make adequately clear

was express Stoic doctrine that every proposition is either

true or false (cf. Mates, Stoic Logic, pp. 28-29).

<sup>d</sup> Cf. [Apuleius], Περὶ ἐρμηνείας iv (p. 178, 12-15 [Thomas]); Martianus Capella, iv, 393; and Mates, Stoic Logic, pp. 16-17 with notes 34-41 and p. 25 with notes 79-81. Notice the difference between Diogenes Laertius, vii, 58 and Plutarch's statement (Mates, p. 16, n. 34); and with πτῶσις as used by Plutarch here cf. besides Sextus, Adv. Math. xi, 29 (Mates, p. 17, n. 40) Clement of Alexandria, Stromata viii, ix, 26, 4-5, cited by Pearson (Fragments, p. 75) in connexion with Stobaeus, Ecl. i, 12, 3 (p. 137, 3-6 [Wachsmuth]) = S. V.F. i, p. 19, 24-26. οἱ διαλεκτικοί in the present passage as in 1011 a and 1011 p infra are the Stoics (cf. Aulus Gellius, xvi, viii, 1 and 8; Sextus, Pyrrh. Hyp. ii, 146 and 247 and Adv. Math. viii, 93; Cicero, Acad. Prior. ii, 97; and see note d on De Stoic. Repug. 1045 r infra).

Plato, Sophist 263 A 8-B 3.

† i.e. λόγος in the sense of speech. Cf. De Sollertia Animalium 973  $\Lambda$  (προφορικοῦ λόγου καὶ φωνῆς ἐνάρθρου) with S.V.F. ii, p. 43, 18-20 (τῷ προφορικῷ λόγω = ἐνάρθρους φωνάς [but in S.V.F. iii, p. 215, 35-36 ἡ σημαίνου σα ἔναρθρος φωνή, with which cf. S.V.F. ii, frag. 143]); and De An. Proc. in Timaeo 1026  $\Lambda$  (λόγος δὲ λέξις ἐν φωνῆ σημαντικῆ διανοίας).

(1009) πράγματα καὶ τὰ¹ πάθη τῷ δ' ὀνόματι τοὺς πράττοντας αὐτὰ καὶ πάσχοντας ἀποχρώντως δηλοῦμεν, ώς² αὐτὸς εἴρηκε, ταῦτα σημαίνειν ἔδοξε³· τὰ δ' ἄλλα φαίη τις ἂν οὐ σημαίνειν, οἶον οἱ στεναγμοὶ Ε καὶ ὀλολυγμοὶ τῶν ὑποκριτῶν· καὶ νὴ Δία πολλάκις⁴ ἐπιμειδίασις⁵ καὶ⁵ ἀποσιώπησις ἐμφαντικώτερον ποιεῖ τὸν λόγον, οὐ μὴν ἀναγκαίαν² ἔχει⁵ πρὸς τὸ σημαίνειν ώς τὸ ῥῆμα καὶ τοὕνομα δύναμιν ἀλλ' ἐπίθετόν τινα ποικίλλουσαν τὸν λόγον· ὥσπερ τὰ στοιχεῖα ποικίλλουσαν οἱ τὰ πνεύματα καὶ τὰς δασύτητας αὐτῶν ἐκτάσεις⁵ τε καὶ συστολὰς ἐνίων αὐτὰ καθ' αὐτὰ¹ο στοιχεῖα τιθέμενοι, πάθη μᾶλλον ὄντα καὶ συμβεβηκότα¹¹ καὶ διαφορὰς¹² στοιχείων, ὡς ἐδήλωσαν οἱ παλαιοὶ¹ο διὰ τῶν ἑκκαίδεκα φράζοντες ἀποχρώντως καὶ¹¹νράφοντες.

<sup>&</sup>lt;sup>a</sup> Sophist 262 A 3-7, B 6, and B 10-c 1; but Plato here speaks only of πράξεις and πράττοντες as signified by verbs and nouns. For Plutarch's substitution of πράγματα for πράξεις cf. Scholia in Dionysii Thracis Artem Grammaticam, p. 215, 28-30 (Hilgard); Apollonius Dyscolus, De Constructione i, 130 and iii, 58 (p. 108, 11-14 and pp. 323, 9-324, 9 [Uhlig]).

## PLATONIC QUESTIONS x, 1009

acts and what is undergone and with the noun the agents and patients, as Plato has said himself, a it seemed that these signify, whereas one might say that the rest like the groans and shouts of actors do not signify; and, by heaven, suddenly falling silent with a smile often makes speech more expressive and yet has not the force requisite for signifying as do the verb and the noun but a certain supplementary force embellishing speech in the way that the letters are embellished by those who make independent ones of their breathings and aspirates and in some cases of their long and short quantities, b although these are rather modifications and incidental characteristics and variations of letters, c as the ancients showed by adequately expressing themselves in actually writing with sixteen letters.d

2. In the second place, take care lest we fail to heed what Plato has said, that speech is a blend of

p. 496, 19-24 (Hilgard).

d Cf. Plutarch, Quaest. Conviv. 738 F; Demetrius of l'haleron, frag. 196 (Wehrli); Varro, De Antiquitate Litterarum, frag. 2 (Funaioli, Grammaticae Romanae Fragmenta i, p. 184; cf. pp. 2 and 120 for L. Cincius, frag. 1 and Cn. Gellius, frag. 1); Pliny, N.H. vii, 192; Tacitus, Ann. xi, 14; Scholia in Dionysii Thracis Arten Grammaticam, pp. 34, 27-35, 13 and pp. 184, 7-12 and 185, 3-7 (Hilgard).

δ τὰ πνεύματα are the two "breathings," δασύ καὶ ψιλόν (cf. Dionysius Thrax, Ars Grammatica, Suppl. i, p. 107, 4 [Uhlig] and for the argument that such marks are letters cf. Scholia in Dionysii Thracis Artem Grammaticam, pp. 187, 26-188, 21 and p. 496, 11-13 [Hilgard]); but τας δασύτητας refers to the aspirates  $\theta$ ,  $\phi$ ,  $\chi$  (cf. Dionysius Thrax, Ars Grammatica § 6, p. 12, 5 [Uhlig]; Sextus, Adv. Math. i, 103; Priscian, Inst. Grammatica i, 24-25 = i, p. 19, 3-8 [Hertz]) and ἐκτάσεις τε καὶ συστολάς ἐνίων to the distinction of  $\eta$  from  $\epsilon$  and of  $\omega$  from o (cf. Sextus, Adv. Math. i, 115). ° Cf. Scholia in Dionysii Thracis Artem Grammaticam,

## PLATONIC QUESTIONS x, 1009-1010

these, not that it is blended by means of them, and lest then like one who, when the medicine is said to be a mixture of wax and galbanum, carps at the omission of the fire and the receptacle, without which it could not have been mixed, we too similarly object that Plato disregarded conjunctions and prepositions and the like, for it is not of these that speech is naturally blended but, if at all, by means of them and not without them. For it is not the case that as one by uttering "strikes" or "is struck" and again "Socrates" or "Pythagoras" has provided something to conceive and have in mind some-how so, when "indeed" or "for" or "about" has been pronounced by itself, it is possible to get some conception of an act or an object a; but, unless these are expressions about those other words and in association with them, they resemble senseless sounds and noises. The reason is that they naturally signify nothing either by themselves or in association with one another; but, however we may combine or mix together conjunctions and articles and prepositions in trying to make of them a single thing in common, it will seem that we are babbling gib-

matica § 12 (p. 24, 3-4 [Uhlig]). Since Plutarch has just given both verbs and nouns as counter-examples, however,  $\pi \rho \acute{\alpha} \gamma \mu a \tau o_5$  here is probably meant in the sense of  $\tau \acute{\alpha}$   $\pi \rho \acute{\alpha} \gamma \mu a \tau a$  in 1009 p supra (page 108, note a); cf. also Dionysius Hal., De Comp. Verb. xii, 69-70 (p. 46, 21 f. [Usener-Radermacher]),  $\acute{\alpha}$  σημαίνει τι σώμα  $\acute{\eta}$  πράγμα, where the preceding οὕτε ὄνομα οὕτε  $\acute{\rho} \acute{\eta} \mu a$  (ibid., p. 46, 18) indicates that  $\pi \rho \acute{\alpha} \gamma \mu a$  means "act" and not "thing." The use of  $\sigma \acute{\omega} \mu a$  for "object" generally reflects the Stoic doctrine that all agents and patients—and so all entities—are  $\sigma \acute{\omega} \mu a \tau a$  (see notes f and g on De Comm. Not. 1073 E infra and cf. Apollonius Dyscolus, De Constructione i, 16 = p. 18, 5-8 [Uhlig]).

<sup>a</sup> Plato, Sophist 262 c 4-7 and p 2-6.

<sup>&</sup>lt;sup>b</sup> Cf. [Apuleius], Περὶ ἐρμηνείας iv (p. 178, 4-7 [Thomas]); Apollonius Dyscolus, De Constructione i, 30 (p. 28, 6-9 [Uhlig] with Priscian, Inst. Grammatica xvii, 22 = ii, pp. 121, 21-122, 1 [Hertz]); and Scholia in Dionysii Thracis Artem Grammaticam, pp. 515, 19-517, 32 (Hilgard), where the

berish rather than speaking a language. When a verb is combined with a noun, however, the result is straightway language and speech.<sup>a</sup> Wherefore it is reasonable that some people consider these alone to be parts of speech <sup>b</sup>; and this perhaps is what Homer wants to make clear each time he says

gave word to the thought and announced it,°

for it was his custom to call the verb "word," as in these lines:

Verily, woman, a heart-breaking word is this thou hast spoken  $^d$ 

and

Joy to thee, reverend guest; if offensive words have been spoken,

May they be gone forthwith swept up and away by a whirlwind.

For what is offensive and heart-breaking to speak is not a conjunction or an article or a preposition but a verb expressive of a shameful action or of some improper experience. This is also why we customarily praise or censure writers of poetry and prose in doctrine is ascribed to the Peripatetics and some of the supporting arguments are answered (cf. Priscian, op. cit., ii, 15 and xi, 6-7 = i, p. 54, 5-7 and pp. 551, 17-552, 14 [Hertz]). An elaborate defence of the doctrine, in many particulars like Plutarch's, is given by Ammonius (De Interpretatione, pp. 11, 1-15, 13), who with explicit reference to the Cratulus and the Sophist asserts that Plato anticipated Aristotle in holding it (De Interpretatione, p. 40, 26-30; p. 48, 30-32; p. 60, 1-3 and 17-23). Cf. Aristotle, Rhetoric 1404 b 26-27; Theophrastus and Boethus of Sidon in Simplicius, Categ., p. 10, 24-27 and p. 11, 23-25; and Adrastus in Theon Smyrnaeus, p. 49, 7-9 (Hiller).

<sup>7</sup> Dübner (μοι ὁ 'Ρωμαίων ἔχειν, ῷ -Wyttenbach); μοι περὶ ρωμαίων λέγειν ὁρῶ μέλλω (μέλλων -β, n, Voss. 16, Bonon.) νῦν -all mss. except Escorial T-11-5 (μοι περὶ ρωμαίων λέγειν όρῶ . . . ναc. 30 . . . ἀλλ' ὤσπερ ὁμοῦ πάντες). <sup>8</sup> ὀλίνον -J.

<sup>b</sup> Evenus, frag. 10 (Bergk, Poetae Lyr. Graec. ii<sup>4</sup>, p. 271;

<sup>&</sup>lt;sup>a</sup> In such expressions ὅνομα (and the same could be said of ῥῆμα) is used in a different sense, i.e. τὸ κοινῶς ἐπὶ πῶν μέρος λόγου διατεῖνον (cf. Simplicius, Categ., p. 25, 14-17; Scholia in Dionysii Thracis Artem Grammaticam, p. 522, 21-28 [Hilgard]).

terms like these, "the nouns employed by so-and-so are 'Attic' and the verbs are 'elegant'" or again "pedestrian," whereas it would not be said by anyone that in the language of Euripides or Thucydides "pedestrian" or again "elegant and Attic articles" are used.

3. "What then?"—one might say—"Do these words contribute nothing to speech?" I should say that they do make a contribution to it just as salt does to a dish of food and water to a barley-cake. Evenus even said that fire is the best of sauces.<sup>b</sup> Nevertheless, we do not say either that water is a part of barley-cake or wheat-bread or that fire or salt is a part of greens or victuals, although we do always require fire and salt, whereas speech unlike this often has no need of those additional words. So it is, it seems to me, with the speech of the Romans, which now is used by nearly all men, for it has eliminated all prepositions except for a few <sup>c</sup>

Edmonds, Elegy and Iambus i, p. 476). The remark is ascribed to Evenus in Quomodo Adulator ab Amico Internoscatur 50 A and in Quaest. Conviv. 697 c-p but to Prodicus

in De Tuenda Sanitate 126 D.

c According to Hartman (De Plutarcho, p. 583) this is an erroneous generalization from those Latin expressions of relations of place in which no preposition is used; according to H. J. Rose (The Roman Questions of Plutarch [Oxford, 1924], p. 198 ad lxvii [208 A]) it is rather an exaggeration suggested by the contemporary fondness for archaic and poetical constructions which omitted the prepositions of Ciceronian grammar; and both these observations may be partial explanations of Plutarch's "odd statement," but it should be remembered also that many Latin "prepositions" were regarded by the Greeks as not being prepositions at all (Priscian, Inst. Grammatica xiv, 9-10 and 23 = ii, pp. 28, 19-29, 11 and pp. 36, 20-37, 6 [Hertz]). From a different point of view Plutarch's statement without being noticed is

(1010) άπάσας, τῶν τε καλουμένων ἄρθρων οὐδὲν προσδέχεται τὸ παράπαν, ἀλλὰ ὥσπερ ἀκρασπέδοις¹ χρῆται τοῖς ὀνόμασι. καὶ οὐ θαυμαστόν ἐστιν, ὅπου καὶ "Ομηρος ἐπέων κόσμω περιγενόμενος ὀλίγοις τῶν ὀνομάτων ἄρθρα ὥσπερ λαβὰς ἐκπώμασι μὴ² δεομένοις ἢ λόφους³ κράνεσιν ἐπιτίθησιδιὸ καὶ⁴ παράσημα τῶν ἐπῶν ἐν οῖς ταῦτα ποιεῖ⁵ γέγονεν, ὡς τὸ

supported by R. Poncelet (Cicéron Traducteur de Platon [Paris, 1957]), who characterizes the Latin penury of analytical instruments as "pas d'articles, peu de prépositions, peu de participes" (p. 18) and considers the rudimentary prepositional system of Latin along with its lack of an article to be one of the principal reasons for Cicero's difficulties in translating the philosophical Greek of Plato (pp. 52-61, pp. 105-129, p. 139).

<sup>a</sup> Cf. Quintilian, Instit. Orat. i, 4, 19; Priscian, Inst. Grammatica ii, 16 and xvii, 27 (i, p. 54, 13-16 and ii, p. 124,

16-18 [Hertz]).

<sup>b</sup> Cf. Democritus, frag. B 21 (D.-K.) and Pausanias, ix, 30,

and of the words called articles admits none at all <sup>a</sup> but employs nouns without tassels, as it were. This is not surprising either, since Homer too, who excelled in marshalling words,<sup>b</sup> attaches articles to few of his nouns, as it were crests to helmets or handles to goblets that do not require them <sup>c</sup>; and that is the very reason why critical marks <sup>a</sup> have been put at the verses in which he does so, for example:

Wrathful fury he chiefly excited in fiery Ajax, The Telamonian one.

and

Built it to let him clude and evade the notorious monster t and a few others besides. In the rest, however, countless as they are, though an article is not present, the expression suffers nothing in clarity or beauty.

4 and 12. The phrase κόσμον ἐπέων occurs in a line of Solon's quoted by Plutarch himself (Solon viii, 2 [82 c]); cf. also Parmenides, frag. B 8, 52 (D.-K.) and Philetas of Cos, frag. 8 (Diehl, Anth. Lyr. Graec. ii, p. 211)=10 (Powell, Collectanea Alexandrina, p. 92).

<sup>c</sup> There were ἐκπώματα of countless kinds (Clement of Alexandria, *Paedagogus* 11, iii, 35, 2), many without handles

(Athenaeus, xi, 783 a, 478 b, and 481 d).

<sup>d</sup> Cf. Aristotle, Soph. Elench. 177 b 6 (κάκει . . . παράσημα

ποιοῦνται).

r Iliad xiv, 459-460. Leaf (The Iliad ii², p. 97 ad 458-459) calls the use of τῷ in 460 " hardly Homeric." Cf. in general Scholia Graeca in Homeri Iliadem ed. Dindorf i, p. 70, 10-11 ad B 1 and p. 339, 14-15 ad K 1 (ἔστι γὰρ ὁ ποιητὴς παραλειπτικὸς τῶν ἄρθρων).

f Iliad xx, 147. For the use of the article here cf. Scholia Graeca in Homeri Iliadem ed. Dindorf ii, p. 199, 19-20; Leaf (The Iliad ii², p. 359) calls it very rare in Homer and says that "instances such as this are confined to late passages

in the Iliad."

8 συνδεκτικόν -J, g.

<sup>b</sup> Demosthenes, Oratio xxi, 200. Part of this passage is quoted for asyndeton by [Aristides], Libri Rhetorici i, 28

(pp. 13, 23-14, 1 [W. Schmid]).

6 Cf. Demetrius, De Elocutione 193-194 and 268-269; "Longinus," De Sublimitate xxi; Tiberius Rhetor,  $\Pi \epsilon \rho i$ 

<sup>&</sup>lt;sup>a</sup> Plutarch, the tyrant of Eretria (cf. Plutarch, Phocion xii-xiii [747 A-E]; Demosthenes, Oratio v, 5 [with scholion ad loc.] and xxi, 110).

of Plutarch, a knows the secrets of state, is too big for the city." b This is just the reason why the figure of asyndeton is very highly esteemed by the writers of the rhetorical manuals, and those who abide too strictly by the rules and leave out no conjunction of the ordinary language they censure for making their style dull and unemotional and wearisome from lack of variety. That the dialecticians have special need of conjunctions for the connexions and combinations and disjunctions of propositions, a as charioteers have of yokes and as Odysseus (in the cave) of Cyclops had of withes for binding the sheep together  ${}^{o}(\ldots)$ , this shows not that the conjunction is a part of speech  ${}^{f}$  but that it is a kind of instrument for conjoining, just as its name indicates, that

σχημάτων 40 (Rhetores Graeci iii, p. 78, 11-15 [Spengel]); [Cicero], Ad Herennium iv, 41. For ai τέχναι = "rhetorical manuals" cf. Isocrates, Adv. Sophistas 19 (τὰς καλουμένας

τέχνας) with the scholion ad loc.

The dialecticians are the Stoics (see note d on page 107 supra). The propositions in question are the conditional (συνημμένον), the conjunctive (συμπεπλεγμένον), and the disjunctive (διεζευγμένον): and the σύνδεσμοι required for these are respectively δ συναπτικός (εί), δ συμπλεκτικός (καί), and δ διαζευκτικός (ήτοι or ή): cf. Diogenes Laertius, vii, 71-72 (S. V. F. ii, frag. 207); Galen, Institutio Logica iii, 3-4 and iv, 4-6 (pp. 8, 13-9, 8 and pp. 10, 13-11, 12 [Kalbfleisch] = S. V. F. ii, frags. 208 and 217); and Plutarch, De E 386 F—387 A, De Sollertia Animalium 969 A-B, and De An. Proc. in Timaeo 1026 B-C.

e Cf. Odyssey ix, 427 and Euripides, Cyclops 225.

† As the Stoics held it to be: cf. Diogenes Laertius, vii, 57-58 (S. V.F. ii, frag. 147 and iii, p. 214, 1-2); S. V.F. ii, frag. 148; Scholia in Dionysii Thracis Artem Grammaticam, p. 356, 13-15 and p. 517, 33-34 with p. 519, 26-32 (Hilgard). Posidonius wrote against those who said that conjunctions οὐ δηλοῦσι μέν τι αὐτό δὲ μόνον τὴν φράσιν συνδέουσι (Apollonius Dyscolus, De Conjunctionibus, p. 214, 4-8 [Schneider]).

(1011) πάντων ἀλλὰ τῶν οὐχ ἀπλῶς λεγομένων, εἰ μὴ καὶ τοῦ φορτίου τὸν ἱμάντα καὶ τοῦ βιβλίου τὴν κόλλαν ἀξιοῦσι μέρος εἶναι καὶ νὴ Δία¹ τὰς διανομὰς τοῦ πολιτεύματος, ὡς ἔλεγε Δημάδης, κόλλαν ὀνομάζων τὰ θεωρικὰ² τῆς δημοκρατίας. ποῖος δὲ σύνδεσμος οὕτως εν ἐκ πολλῶν ἀξίωμα ποιεῖ συμπλέκων καὶ συνάπτων ὡς ἡ μάρμαρος³ τὸν συλλιπαινόμενον⁴ διὰ τοῦ πυρὸς σίδηρον; ἀλλ' οὐκ ἔστιν οὐδὲ λέγεται τοῦ σιδήρου μέρος καίτοι ⟨τὰ⟩ τοιαῦτά⁵ γε τοῖς κεραννυμένοις ἐνδυόμενα καὶ συντηκόμενα ποιεῖ τι [καὶ πάσχει]⁴ κοινὸν ἐκ C πλειόνων. τοὺς δὲ συνδέσμους εἰσὶν οἱ μὴ νό-

 6 [καὶ πάσχει] -deleted by Hartman (De Plutarcho, p. 588).

<sup>&</sup>lt;sup>a</sup> That is even for the Stoics the conjunction holds together only a molecular proposition, this consisting of two or more atomic (simple) propositions, each of which itself consists of a subject and predicate not connected by any conjunction: cf. Sextus, Adv. Math. viii, 93-95 and 108-109 (S. V.F. ii, p. 66, 28-37 and pp. 70, 36-71, 2) with Mates, Stoic Logic, pp. 95-96; and Diogenes Laertius, vii, 68-69 and 71-72 (S. V.F. ii, frags. 203 and 207).

Demades, frag. 13 (Baiter-Sauppe, Oratores Attici ii,
 p. 315 B 38-42) = xxxvi (De Falco, Demade Oratore<sup>2</sup>, p. 31).
 See note d on 1011 A supra.

is for holding together not all statements but those that are non-simple, —unless one also maintains that the strap is part of the load and the glue part of the book b and the dole, by heaven, part of the government, as Demades said when he called the festival-grants the glue of the democracy. What kind of conjunction, moreover, by combining and connecting a makes of many a proposition so thoroughly one as the marble makes the iron that is smelted with it in the fire? The marble, however, is not and is not said to be a part of the iron; and yet things of this kind make something common out of a multiplicity by permeating the objects that are being blended and by being fused with them. As to conjunctions, however, there are people who believe

ε Cf. 1010 Λ supra: έν τι πειρώμενοι κοινόν έξ αὐτῶν ποιείν. The marble is not fused with the iron, as Plutarch apparently believed it is, but supplies the limestone which unites with the non-ferrous minerals of the ore (the "gangue") and with the ash of the fuel to form the "cinder" or slag." It may be such a flux to which reference is made by [Aristotle], De Mirabilibus Auscultationibus 833 b 24-28 and by Theophrastus, De Lapidibus 9 (cf. H. Blümner, Technologie und Terminologie der Gewerbe und Künste bei Griechen und Römern iv [Leipzig, 1887], pp. 219-220; A. W. Persson, Eisen und Eisenbereitung in ältester Zeit [Lund, 1934], pp. 15-17; E. R. Caley and J. F. C. Richards, Theophrastus on Stones [Columbus, 1956], p. 77); but in no ancient text, so far as I know, is an explanation of the process offered, although the purpose of the flux used in refining gold is mentioned (cf. Agatharchides in Photius, Bibliotheca, cod. 250, p. 448, 19-30 [Bekker]; Pliny, N.H. xxxiii, 60; H. Blümner, op. cit., pp. 131-135). It is to a different stage in the working of the iron that Plutarch refers in Quaest. Conviv. 660 c and De Primo Frigido 954 A-B; cf. also H. D. P. Lee on Aristotle, Meteorologica 383 a 32-b 7 (L.C.L., pp. 324-329).

- (1011) μίζοντες εν τι ποιειν άλλ' εξαρίθμησιν είναι τὴν διάλεκτον, ώσπερ ἀρχόντων εφεξῆς ⟨ἣ⟩¹ ἡμερῶν καταλεγομένων.

that they do not make anything one but that language is an enumeration like that of annual magistrates  $\langle \text{or} \rangle$  of days listed one after another.<sup>a</sup>

5. Now, of the rest the pronoun is patently a kind of noun, not only as it shares the cases of the noun but also by reason of the fact that some pronouns, being expressions of definite reference, make an indication fully decisive as soon as they are spoken; and I do not know that a speaker uttering "Socrates" has by calling a name more clearly indicated a person than has one saying "this man." c

6. And as for what is called the participle, since it is a mixture of verb and noun,<sup>d</sup> it does not exist of itself,<sup>e</sup> to be sure, as the nouns of common feminine and masculine gender do not either <sup>f</sup>; but it is ranked with those parts of speech, since through its tenses it borders on the verbs and through its cases on the nouns. Terms of this kind, moreover, are

b The correction, καὶ προσηγοριῶν, is required because the Stoics had restricted ὄνομα to proper nouns and had made a separate part of speech called προσηγορία to cover common nouns and noun adjectives (Diogenes Laertius, vii, 57-58)

<sup>&</sup>lt;sup>a</sup> Cf. Priscian, Inst. Grammatica xi, l (i, pp. 548, 14-549, 1 [Hertz]): "sic igitur supra dicti philosophi [scil. Stoici] etiam participium aiebant appellationem esse reciprocam, id est ἀντανάκλαστον προσηγορίαν, hoc modo: legens est lector et lector legens, cursor est currens et currens cursor, amator est amans et amans amator, vel nomen verbale vel modum verbi casualem."

called reciprocals by the dialecticians <sup>a</sup> on the ground that they have the force of nouns, that is of appellatives, <sup>b</sup> as for example the reflecting instead of reflective and the abstaining instead of abstinent man. <sup>c</sup>

7. The prepositions, for their part, can be likened to capitals and pedestals and bases as being not speech but rather appurtenances of speech. Consider too that they resemble bits and pieces of words <sup>a</sup> like the fragmentary letters and dashes used by those who write in haste. For "incoming" and "outgoing" are plainly contractions of "coming within" and "going without," "foregoing" of "going before," and "undersetting" of "setting underneath," just as it is, of course, by quickening and abridging the expression that for "pelting with [S. V.F. ii, frag. 147 and iii, p. 213, 27-31]), which the grammarians, however, continued to call δνόματα or treated as a sub-class of δνομα (Dionysius Thrax, Ars Grammatica, p. 23, 2-3 and pp. 33, 6-34, 2 [Uhlig] with Scholia in Dionysii Thracis Artem Grammaticam, pp. 214, 17-215, 3 and p. 356, 7-23 and pp. 517, 33-518, 16 [Hilgard]).

<sup>c</sup> The Stoics, for whom the sage alone is φρόνιμος and σώφρων and alone φρονεῖ and σωφρονεῖ, could hold that  $\delta$  φρονῶν must always be  $\delta$  φρόνιμος and  $\delta$  σωφρονῶν  $\delta$  σώφρων and even that  $\delta$  φρόνιμος is always  $\delta$  φρονῶν, since the sage's exercise of virtue is continual and unremitting (S.V.F. i, frags. 216 [p. 52, 25-33] and 569; iii, p. 149, 16-18). Nevertheless, they did distinguish between  $\delta$  φρόνιμος and  $\delta$  φρονῶν (S.V.F. iii, p. 64, 3-5;  $\epsilon f$ . iii, frag. 244); and the same distinction between the appellative and the participle is implied by Chrysippus in S.V.F. iii, frag. 243 (De Stoic.

Repug. 1046 F-1047 A infra).

<sup>d</sup> ονομάτων here must have been meant in this general sense, since Plutarch proceeds to represent the prepositions in composition as fragments of adverbs and not of what he calls nouns. Varro also appears to have taken the prepositions, which he called "praeverbia," to be adverbs (frag. 267, 4-7 [Funaioli, Grammaticae Romanae Fragmenta i, p. 286]).

(1011) " λιθοβολείν " καὶ " τοιχωρυχείν " ἐπιταχύνοντες

καὶ σφίγγοντες τὴν φράσιν λέγουσι.

8. Διο χρείαν μέν τινα τῷ λόγῳ παρέχεται τούτων ἔκαστον, μέρος δὲ λόγου καὶ στοιχείον οὐδέν ἐστι, πλὴν ὥσπερ εἴρηται τὸ ρῆμα καὶ τοὕνομα, ποιοῦντα τὴν πρώτην τό τ' ἀληθὲς καὶ τὸ ψεῦδος δεχομένην σύνθεσιν, ἣν οἱ μὲν πρότασιν οἱ δ' ἀξίωμα Πλάτων δὲ λόγον προσηγόρευκεν.

 $^{1}\ \, \text{tuccoruceûn-}X\ ;\ \, \text{tolcoruceûn-}\epsilon.$ 

b See 1009 c supra. Of the six " parts of speech" besides noun and verb which had there been listed as present in

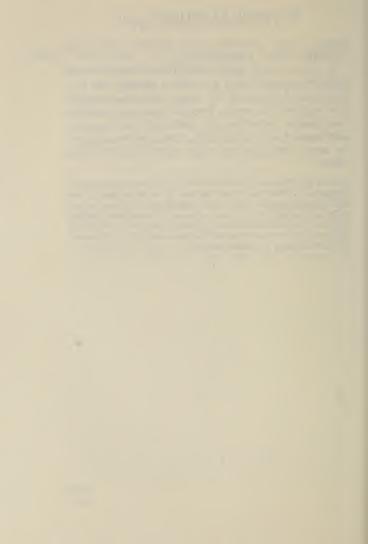

<sup>&</sup>lt;sup>a</sup> Cf. Ammonius, De Interpretatione, p. 12, 27-30 and for the στοιχεῖου added by Plutarch in explanation of μέρος ibid., p. 64, 26-27 and S.V.F. ii, frag. 148 (p. 45, 9-11) with Scholia in Dionysii Thracis Artem Grammaticam, p. 356, 1-4 and pp. 514, 35-515, 12 (Hilgard).

stones" and "breaking into houses" men say

"stoning" and "housebreaking."

8. Consequently, while each of these renders some service to speech, none is a part of speech, that is a constituent element of it,<sup>a</sup> except, as has been said,<sup>b</sup> the verb and the noun, for these produce the first combination admitting of truth and falsity, that combination which has been styled pronouncement by some and proposition by others but by Plato speech.

Iliad i, 185 Plutarch has accounted for all except the adverb (ἐπίρρημα). With his neglect of this cf. what is said of the Stoics, τὰ ἐπιρρήματα οὔτε λόγου οὔτε ἀριθμοῦ ἠξίωσαν, παραφυάδι καὶ ἐπιφυλλίδι αὐτὰ παρεικάσαντες (Scholia in Dionysii Thracis Artem Grammaticam, p. 356, 15-16 and p. 520, 16-18 [Hilgard]), for whose treatment of the adverb cf. M. Pohlenz, Kleine Schriften i (Hildesheim, 1965), p. 55.

# ON THE GENERATION OF THE SOUL IN THE TIMAEUS

(DE ANIMAE PROCREATIONE IN TIMAEO)

#### INTRODUCTION

This essay, Plutarch says at the very beginning, was written because the two sons to whom he addresses it thought that he ought to bring together in a separate treatise what he had frequently said and had here and there written of the way he understood Plato's doctrine of the soul, since this interpretation of his was not easy to manage otherwise and was in need of yindication.

The two sons addressed, who were themselves not the oldest of Plutarch's children (cf. Consolatio ad Uxorem 608 c and 609 D), could not have been much less than twenty years old when they made this suggestion, for it is assumed that they are familiar both with their father's earlier writings and also with most of the extensive literature about the disputed passage of the Timaeus (cf. 1012 D and 1027 A chap. 29 init.] infra). Plutarch, therefore, could not have been much less than forty-five years old and probably was a good deal older when he wrote the essay. In it he refers (1013 E infra) to an earlier treatise of his on the cosmogony as Plato meant it; and what in Plat. Quaest. IV is together with II the essence of the interpretation developed in the present essay he there had already called τὸ πολλάκις ὑφ' ἡμῶν λεγόμενον (1003 A). Aspects of it or parallels to certain aspects of it appear in the Quaest. Conviv., the De E, and the

De Iside; but there is no conclusive evidence to prove that any of these is earlier or later than the

present essay.a

The essay is in form a commentary on *Timaeus* 35 a 1—36 b 5 and falls into two parts, each of which is begun by way of preface with the quotation of that section of the Platonic passage with which it deals, the first (chaps. 1-28 [1012 b—1027 A]) with the quotation of *Timaeus* 35 A 1-B 4 and the second (chaps. 29-33 [1027 A—1030 c])<sup>b</sup> with that of *Timaeus* 35 b 4—36 b 5.

This second part is expressly divided into three sections, in each of which one specific question is discussed and answered (1027 c-D): first, what the whole numbers are that Plato adopts in the double and triple intervals and that will permit the insertion of the means described by him (1027 D-F and 1017 c—1022 c [chaps. 30 and 11-19]); second, whether these numbers are to be arranged in a single row or in the figure of a lambda (1022 c-E and 1027 F—1028 A [chaps. 20 and 30 b]); and, third, what is their function or for what effect are they employed in the composition of the soul (1028 A—1030 c

<sup>a</sup> In 1029 p here Plutarch asserts what in *Quaest. Conviv.* 745 c-F he denies in his own person but then has Ammonius assert. It would be equally easy to make out a specious but inconclusive case for the priority of either passage to the other.

<sup>&</sup>lt;sup>b</sup> The traditional numbers of the chapters and the pagination of Stephanus are retained, though they are confusing because they antedate the discovery and correction of the displacement in the MSS. The order in the text as rearranged is: chaps. 1-10 (1012 A—1017 c), chaps. 21-30 (1022 E—1027 F), chaps. 11-20 (1017 c—1022 E), chaps. 30 b-33 (1027 F—1030 c).

[chaps. 31-33]). All this by Plutarch's own admission (1027 A [chap. 29 init.] and 1022 c [chap. 20 init.]) contains little that is original; and it is of interest chiefly for the information that it provides about earlier treatments of Timaeus 35 B 4-36 B 5 and about the arithmological, musicological, and astronomical speculations related to them. With regard to the third question Plutarch rejects all the astronomical interpretations that he reports in chaps. 31-32 and says that the ratios and numbers in this passage of the Timaeus are meant to signify the harmony and concord of the soul itself (chap. 33 [1029 D-E and 1030 B-c]). As to the second question, which receives the briefest treatment, he accepts Crantor's arrangement because he thinks it almost explicitly prescribed by the order of the numbers in Plato's text. The treatment of the first question is the longest, and in the course of it Plutarch reveals some of his characteristic weaknesses. He is aware of the correct contention that Plato is concerned not with any particular integers but with the ratios that alone are specified; and yet he rejects it, "even if it be true," not only because it makes the matter harder to understand but also because it would prevent him from indulging himself in the arithmological speculations about the "remarkable numbers" to which he devotes several chapters (1027 p-F and 1017 с—1019 в [chaps. 30 and 11-14]). Then as the base for the intervals into which the means are inserted he chooses 192 instead of 384 because "the ' leimma' will have its ratio expressed in the numbers that Plato has given, 256 to 243, if 192 is made the first number," thus arguing with misplaced literalness as if it were the very numbers and not just the ratio

that Plato intended and at the same time showing that he could not have worked out the problem, since 192 will not serve the purpose of clearing the fractions after the first fourth (1020 c-D [chap. 16 sub

finem] and 1022 A [chap. 18 sub finem]).

The originality of the first part of the essay is emphasized by Plutarch himself. At the very beginning he says that the interpretation here advocated requires vindication because it is opposed to that of most Platonists (1012 B), and after criticizing the interpretations of Timaeus 35 A 1-B 4 by Xenocrates and Crantor he repeats in beginning his own that he must vindicate what is unusual and paradoxical about it (1014 A). In the first place, he insists that contrary to what the Platonists contend Plato must have meant the generation of the universe and its soul to be understood literally as a beginning, for otherwise soul could not be senior to body and so there would be nothing to Plato's argument against the atheists in the Laws (chap. 4, cf. chap. 3 init.). Plutarch holds, therefore, that according to Plato god did literally bring into being the soul and the body of the universe, though not from nothing, which is impossible, but from precosmic principles that had always existed, an amorphous and chaotic corporeality and a self-moved and irrational motivity that kept the former in disorderly turmoil (chap. 5). This irrational psychic principle Plutarch identifies with the "infinitude" of the Philebus, the "congenital desire "and "inbred character" of the Politicus, the "necessity" and even (1024 c) the precosmic γένεσις of Timaeus 52 D and says is openly called in the Laws "disorderly and maleficent soul" (1014 D-1015 A [chap. 6]). It is, moreover, this, he maintains, 136

that is the principle of evil whereby Plato avoided the absurdity into which the Stoics later fell, for the evil in the universe must have a cause and this cause cannot be god, who is entirely good, or matter, which is inert and without quality, but must be soul, which is the cause and principle of motion (1015 A-E [chaps. 6-7]); and this irrational soul, "soul in itself," it is that in the Phaedrus is proved to be indestructible because not subject to generation and not subject to generation because self-moved, the precosmic principle from which god by introducing into it intelligence and reason created the soul of the universe (chaps. 8-9), as he created its body out of precosmic matter by removing from this the cause of its turbulence and introducing into it form and symmetry (cf. 1015 E and 1016 D-1017 A).

The "creation" in the *Timaeus* had already been taken literally by Aristotle and others but so far as is known not by anyone regarded as a Platonist,<sup>a</sup> and no one at all is known to have anticipated Plutarch in interpreting it with a theory of the cosmic soul such as his.<sup>b</sup> This theory of his, despite all narrow literalism <sup>c</sup> and despite his protest against interpret-

<sup>a</sup> See note a on 1013 E (chap. 4 init.) infra.

b Plutarch's claim to the originality of his interpretation was accepted by Thévenaz (L'Âme du Monde, pp. 55-56), and Helmer argued that there is no reason to doubt it (De An. Proc., pp. 69-70), though Plutarch's "general lack of originality" made R. M. Jones doubt that he could have been the author of the theory (Platonism of Plutarch, p. 80).

<sup>o</sup> Such as the assumption that  $l\delta\epsilon a$  in the Posidonian interpretation must mean "idea" (see 1023 B-c [chap. 22] with note c on 1023 B) and the crucial assumption that  $\eta_{\rho\epsilon\sigma}\beta \nu r\epsilon \rho a$  used of soul must mean senior in the sense of earlier in origin (see 1013 E-F [chap. 4] and 1016 A-B [chap. 8]), concerning which cf. Cherniss, Aristotle's Criticism of

ing Plato for the promotion of one's own doctrines (1013 B), was not the consequence of his literal interpretation of the Timaeus but was the formulation of his own theology and theodicy, which, to be plausibly represented as in his words "something that agrees with Plato," required the "creation" in the Timaeus to be taken literally. This is indicated by the very reasons that he here gives for adopting this interpretation (1013 E-F and 1015 A-E) a and even more clearly by his way of manipulating Platonic texts to support it. Not only is there nothing in those texts to justify him in identifying with soul, as he does here, the "infinitude" of the Philebus or the "necessity" or yéveous of the Timaeus, but these identifications are incompatible even with what he says in other passages himself.<sup>b</sup> When he identifies

Plato . . ., pp. 424-426 and note 365 on pp. 429-431 and E. de Strycker in Aristotle and Plato in the Mid-Fourth Century, ed. I. Düring and G. E. L. Owen (Göteborg, 1960), pp. 90-91. F. Romano is mistaken, however, in supposing that Plutarch's interpretation was simply the consequence of his "cieco e pedissequo ossequio al verbo di Platone," which made him incapable of distinguishing logos from mythos (Sophia, xxxiii [1965], p. 119 sub finem).

a Cf. Zeller, Phil. Griech. III, 2, p. 191; Andresen, Logos und Nomos, pp. 281, 284, and 290; H. Dörrie, Philomathes: Studies . . . in Memory of Philip Merlan (The Hague, 1971), p. 46; and especially Babut, Plutarque et le Stoïcisme, p. 287, who considers this essay to be primarily a polemic against Stoic monism and a continuation of Plutarch's anti-

Stoic works (op. cit., pp. 139-142).

b For the ἀπειρία of the Philebus see page 185, note d (chap. 6); for the yéveous of Timaeus 52 D see notes c and d on 1024 c (chap. 24) and the comparison with De Facie 926 F in note a on 1016 F (chap. 9); and for the  $\frac{\partial}{\partial x} (x, y, y)$  of the *Timasus* see note c on 1014 E (chap. 6) with Cherniss, Aristotle's Criticism of Plato . . . pp. 446-450. As to the

with irrational soul the "congenital desire" and "inbred character" in the myth of the Politicus, adapting for this a quotation of Politicus 273 B 4-6, he suppresses Plato's phrase, τὸ σωματοειδές τῆς συγκράσεως, which would have embarrassed his interpretation a; when he insists that in the proof of Phaedrus 245 c 5-246 A 2 the soul that is not subject to generation is meant to be only "the soul that before the generation of the universe keeps all things in disorderly motion" (1016 A, 1016 c, 1017 A-B [chaps. 8-9]), he ignores both the words ψυχή πᾶσα with which that proof begins (Phaedrus 245 c 5) and of which the conclusion is certainly meant to hold and the express statement that it is impossible for the self-moving mover that sustains the universe, i.e. the cosmic soul, either to perish or to come to be

last, were ἀνάγκη, as Plutarch here maintains, the precosmic irrational soul from which by mixture with vovs the soul of the cosmos was created, his interpretation would be open to the objection that he opposes to Crantor's (1013 B-c, 1023 A), for what he calls the psychogony would not be distinguishable from the cosmogony, since Plato says μεμειγμένη γὰρ οὖν ή τοῦδε τοῦ κόσμου γένεσις έξ ἀνάγκης τε καὶ νοῦ συστάσεως ἐγεννήθη (Timaeus 47 ε 5—48 A 2).

<sup>a</sup> See note f on 1015 A (chap. 6). In this passage he also substitutes  $\frac{\partial r}{\partial x}$  for the elmapment of the Politicus (see note e on 1015 A); cf. his substitution of  $\frac{\partial r}{\partial x}$  for Plato's φορά or κύκλος (see note f on 1029 c [chap. 32]) and his insertion of the rina quasi-quotations of the Timaeus (see the end of note c, page 173 [chap. 3]). Sometimes by omitting words or curtailing the original he alters the meaning of a passage (see note c on Plat. Quaest. 1004 E supra), thereby eliminating what would otherwise impugn his interpretation (see note d on 1016  $\mathbf{F}$  [chap. 9] and notes f, b, and c on 1023 E-F [chap, 23]); and sometimes he inserts into an apparent quotation what is in fact an erroneous inference of his own (see note b on Plat. Quaest, 1002 r supra).

(Phaedrus 245 D 7-E 2); and, when he asserts that by all these Plato meant what in the Lars he called disorderly and maleficent soul and that this is "soul in itself," which became the soul of the universe (1014 D-E [chap. 6] and 1015 E [chap. 7]), he disregards the fact that the evil kind or aspect of soul there posited is never said to be precosmic or antecedent to beneficent soul or that out of which a single cosmic soul was created but to the contrary is represented as being coeval with the good souls, the movers of the celestial bodies and the universe, and distinct from them."

All this is far from literal interpretation of Plato's words; and so is the identification of the "divisible being" in the psychogony of the *Timaeus* with the irrational and maleficent soul elicited from the *Laws* (1014 D-E [chap. 6] and 1015 E [chap. 7]). Neither in the psychogony nor elsewhere in the *Timaeus* is there any mention of such an irrational soul or of any irrational element in the cosmic soul b; and

b Cf. Cherniss, Aristotle's Criticism of Plato..., p. 446 with notes 386 and 387 and Proceedings of the American Philosophical Society, xcviii (1954), p. 26 with notes 26-28. The soul that in Timaeus 44 λ 7-8 1 is said to become ἄνους is only the human soul when disturbed in consequence of its embodiment (cf. 86 в 2-87 λ 7); even in that soul there is no irrationality in the "immortal part" produced by the

<sup>&</sup>lt;sup>a</sup> Cf. Laws 896 d 10-E 6, 898 c 6-899 d 9, 904 a 6-c 4 and E 5-7, 906 a 2-7; see Cherniss, Proceedings of the American Philosophical Society, xcviii (1954), p. 26, n. 29. In De Iside 370 F Plutarch himself implies that what he takes to be the maleficent soul of the Laws is not antecedent to the beneficent soul but that the two are coeval and distinct, for he says that according to Plato there (i.e. Laws 896 d 10-E 6) the universe is moved by at least two souls, one beneficent and the other adverse to this.

Plutarch's assertion that this is what Plato meant by odolas...  $\tau \hat{\eta} \hat{s}$  ad  $\pi \epsilon \rho \hat{l}$   $\tau \hat{a}$  owhata  $\gamma \iota \gamma \nu o\mu \epsilon \nu \eta s$   $\mu \epsilon \rho \iota \sigma \tau \hat{\eta} \hat{s}$  (Timaeus 35 a 2-3) is made without any supporting argument a and apparently in reliance upon the mere assumption that in the Laws the proper name is used for that to which Plato elsewhere must have been referring covertly in enigmatic and metaphorical terms, a principle so pliable that in the very passage where it is enunciated this maleficent soul of the Laws is identified not, as it is in this essay, with the divisible being but with the difference, the  $\theta \Delta \tau \epsilon \rho o \nu$ , of the psychogony.

Identifying the "divisible being" of the psychogony with precosmic irrational soul from which god by introducing into it intelligence and reason created the soul of the universe ought to imply moreover that the "indivisible being" there is vovs; and Plutarch does explicitly make this identification also, d

demiurge, the circles of sameness and difference, when not so disturbed (44 B 1-7), while the "mortal and passible part" of it (i.e. the  $\theta\nu\mu\omega\epsilon\delta\epsilon$  and  $\epsilon m\theta\nu\mu'\alpha$ ), which Plutarch derives from the "divisible being," is in the *Timaeus* a confection of the "created gods" and is unrelated to the ingredients or the result of the psychogony (see note c on 1026 D [chap. 27 sub finem]).

<sup>&</sup>lt;sup>a</sup> The later attempts to account for the term μεριστή (1024 A [chap. 23] and 1024 c [chap. 24]) are not arguments in support of this identification and would not be cogent if they were intended to be so.

b Cf. 1014 D (. . . ἐν δὲ τοῖς Νόμοις ἄντικρυς . . . εἴρηκε . . .) with De Iside 370 E-F (πολλαχοῦ μὲν οἶον . . . παρακαλυπτόμενος . . . ἐν δὲ τοῖς Νόμοις . . . οὐ δι' αἰνιγμῶν οὐδὲ συμβολικῶς ἀλλὰ κυρίοις ὀνόμασιν . . .).

ο De Iside 370 E-F; see page 251, note c on 1025 F infra.

d See infra 1014 D-E (ἐν δὲ Τιμαίω τὴν τῆ ἀμερίστω συγκερανυμένην . . . αὐτη . . . νοῦ . . . μετέσχεν, ἴνα κόσμου ψυχὴ

although in the Timaeus not only is there no mention of precosmic voûs as an ingredient in the constitution of soul but in a passage from which Plutarch conveniently omits voûs a the latter is said to arise in the soul after its constitution and organization and as a result of its contact with the ideas. Plutarch's one attempt to justify his identification is an explication of the sense in which the terms auepès καὶ ἀμέριστον are used; but in this sense even according to him they characterize the incorporeal and intelligible as such, and so they are in fact more appropriately used of the being of the ideas and can be supposed to refer to vovs only because he takes νοῦς to be a νοητόν. Since for him it is god, however, the vontov par excellence and the only true being,d that is vous,e although in arguing against the Posidonians he contends that god's relation to soul is that of artificer to finished product (1023 c infra), he nevertheless asserts that the vovs introduced by

Plat. Quaest. 1002 c-D and 1002 E.

d Cf. De E 392 A (... μόνην μόνω προσήκουσαν την τοῦ είναι

προσαγόρευσιν . . .) and 393 A-B.

 $<sup>\</sup>gamma$ ένηται), 1016 c with note c, 1024 a (page 229, note d), 1024 c-D (δ δὲ νοῦς · · · ἐγγενόμενος δὲ τῷ ψυχῷ · · · ἡ κοινωνία γέγονεν αὐτῶν, τῷ ἀμερίστῳ τὸ μεριστὸν · · .) with note c there for an additional misrepresentation of the Platonic text.

a Timaeus 37 c 1-3; see infra 1023 r with note c there.
b See infra page 214, note a and the references there to

<sup>°</sup> See infra 1016 B with note d and the reference there to Plat. Quaest. 1002 B; and cf. De Iside 372 A, where Osiris is the ovoid vorth of which the sun is the visible light.

<sup>·</sup> Cf. De Iside 371 A (in the soul of the universe Osiris is νοῦς καὶ λόγος), 373 B (Osiris is λόγος αὐτὸς καθ' ἐαυτὸν ἀμιγὴς καὶ ἀπαθής), and 376 C (ὁ τοῦ θεοῦ νοῦς καὶ λόγος ἐν τῷ ἀοράτω καὶ ἀφανεῖ βεβηκὼς εἰς γένεσιν ὑπὸ κινήσεως προῆλθεν).

god into the irrational soul is itself a part of god a; and so he implicitly makes the "indivisible being" of the Timaeus substantially identical with the demiurge, which is itself to renounce the literal interpretation of Plato's text. Moreover, in 1024 c-p (chap. 24), where of the three, ον and χώρα and νένεσις, said in Timaeus 52 p 2-4 to have been before heaven came to be, Plutarch identifies the last with the irrational soul, the second with matter, and the first with the intelligible, the real existence that always remains fixed and of which semblances are dispersed in this world, he introduces without explanation or reference to the text that he has quoted a vovs which was "abiding and immobile all by itself " before it got into the soul; and this vovs he explicitly identifies with the "indivisible being" of the psychogony. This must be the voûs that is substantially identical with god, b added as a fourth to the precosmic three of Timaeus 52 D 2-4, for it cannot be identical with the ov, which Plutarch himself here clearly—and correctly (cf. Timaeus 52 A 1-4 and c 5-D 1 with 48 E 5-6)—treats as the being of the ideas, the stable and real existence with which, as he says, the circular motion of the soul made rational is most closely in contact; but this is to make Plato omit from the three that he lists as precosmic the "indivisible being" which he clearly treats as such in the psychogony and which must be the ον among the three that he here lists, not a fourth such as that gratuitously introduced by Plutarch.

<sup>&</sup>lt;sup>a</sup> See infra 1016 c with note d and Plat. Quaest, 1001 c referred to there.

<sup>&</sup>lt;sup>b</sup> See 1016 c, Plat. Quaest. 1001 c, and the passages of the De Iside, which are cited in the last two preceding notes.

That the "indivisible being" of the psychogony is the being of the ideas and the "divisible being" the dispersed being of phenomena, not voûs and the irrational soul, as Plutarch insists, and not ingredients of soul but external to soul, which after it has been constituted judges them by coming into contact now with the one and again with the other, this is clear from another passage of the *Timaeus*, which is partially paraphrased and partially quoted by Plutarch himself but for his own purpose and in a mutilated form that obscures its significance.a At the beginning of this passage which he omits (Timaeus 37 A 2-4) it is emphasized that the ingredients of soul were three. This was twice said in the passage of the psychogony (Timaeus 35 A 6-7 and B 1) quoted by him at the beginning of his essay (1012 B-c infra), where it was explained that of these three ingredients one is a "third kind of being" blended by the demiurge between the "indivisible being" and the "divisible being" and the other two are a sameness and a difference also constructed between the indivisible and the divisible sameness and difference. This intermediacy of the ingredients sameness and difference eluded Plutarch altogether,

a Timaeus 37 A 2-c 5, where in 37 A 5-B 3 the soul of the universe is said now to touch something that has οὐσία σκεδαστή, i.e. μεριστή (cf. Plotinus, Enn. iv, ii, 1, line 12 and Proclus, In Platonis Timaeum ii, p. 298, 24-25 [Diehl]), which is one of τὰ γιγνόμενα, i.e. the perceptible of 37 B 6, and now something that has οὐσία ἀμέριστος, which is one of τὰ κατὰ ταὐτὰ ἔχοντα ἀεί, i.e. the rational of 37 c 1 (cf. Proclus, ibid., p. 300, 5-10 and 17-19 [Diehl] and Cherniss, Iristotle's Criticism of Plato . . ., pp. 407-408); for Plutarch's paraphrase of 37 A 5-B 3 and quotation of 37 B 3-c 5 see infra pages 225, note f and 227, notes b and c.

as it has eluded many modern interpreters; and that of the "third kind of being" he misinterpreted by neglecting the statement that this is only one ingredient of soul and by taking it to be the literal mixture of "indivisible" and "divisible being" identified with  $\nu o \hat{v}_s$  and the irrational soul, with the result that in fact he made the soul of the universe a mixture of these two ingredients alone b or again a

a The "blending" (συνεκεράσατο [Timaeus 35 A 3]) of the "third kind of being" like the construction of the intermediate sameness and difference (κατά ταὐτά συνέστησεν [35 A 5]) is a figurative expression for the construction of a mean between two extremes (cf. Porphyry in Proclus, In Platonis Timaeum ii, pp. 162, 31-163, 1 [Diehl] and Proclus, ibid., ii, pp. 149, 14-150, 24 and p. 156, 16-24 [Diehl]; Themistius, De Anima, p. 11, 1-4; Simplicius, De Anima, p. 259, 11-29; [Philoponus], De Anima iii [i.e. Stephanus], p. 504, 8-12). The figure is used by Plutarch himself when he says that means involve την των άκρων · · · πρός άλληλα διά τοῦ λόγου σύγκρασιν (Plat. Quaest. 1009 A-B); and yet, when he uses as a "likeness of the proportion" in the psychogony the insertion of two means between extremes in Timaeus 31 B 4-32 c 4, he makes of the mathematical procedure in that passage a physical "fusion" and employs in his résumé of it the words ἐκέρασεν and συνέμιξε, which Plato there does not use in any form (see infra 1025 A-B [chap. 25] with note f there).

b See 1014 E (chap. 6): αὕτη γὰρ ἦν ψυχὴ καθ' ἐαυτήν, νοῦ δὲ ... μετέσχεν, ἴνα κόσμου ψυχὴ γένηται and 1024 A (chap. 23): ... κόσμου ψυχὴν συνίστησιν ἐξ ὑποκειμένων τῆς τε κρείττονος οὐσίας καὶ ἀμερίστου καὶ τῆς χείρονος, ῆν περὶ τὰ σώματα μεριστὴν κέκληκεν. ... Λ striking modern parallel is provided by l'. Friedländer (Plato iii [Princeton University Press, 1969], p. 366), who without reference to Plutarch and despite his bibliography (pp. 543-544) in obvious ignorance of the correct construction of Timaeus 35 A I-B 4 says: "The ingredients ... are, first, the being that is indivisible ... and second, the being that is divisible ... That would be enough, but in order to emphasize the difficulty of the mixture ... he

blend of four ingredients when to account for the obvious presence of sameness and difference in the psychogony he took these to be two extremes with the "indivisible being" and the "divisible" as two intermediates between them.a Plato's emphatic warning that the ingredients of soul are three he

simply disregarded.

Similar treatment of Plato's text and similar internal contradictions characterize Plutarch's literal interpretation of the generation of the physical universe. A single example will suffice. Timaeus begins his account of the creation by saying in a passage on which Plutarch lays much stress that god took over all that was visible but later says that he constructed the world visible and tangible.c Instead of explaining how these two statements can both be

adds as a third component the mixture of the previous twoor, as it may be put differently (35 A 3-4), the mixture of 'the same 'and 'the different.'"

b Timaeus 30 A 3-4 (παν όσον ήν δρατόν παραλαβών . . .);

see infra 1016 p with note q.

<sup>&</sup>lt;sup>a</sup> See 1025 B (chap. 25, where the proportion of four terms in Timaeus 32 B 3-7 is expressly cited as parallel to this) and note b there with references. It is the "divisible being" itself that Plutarch elsewhere calls intermediate, transferring to it, which identified with irrational soul or "soul in itself" he makes an ingredient of "created soul," the intermediacy of the three ingredients in the psychogony (see 1015 B [chap. 6] with note c, 1024 B [chap. 23] with note d, and 1024 c [chap. 24] with note d), two of which, sameness and difference, his interpretation fits so ill that in trying to explain them he flagrantly contradicts himself (see 1024 p [chap. 24] with note f, 1025 A [chap. 24] with note b, and 1027 A [chap. 28] with note a).

c Timaeus 32 Β 7-8 (. . . συνεστήσατο οὐρανὸν όρατὸν καὶ άπτόν); cf. 36 E 5-6.

taken literally <sup>a</sup> Plutarch simply omits "visible and tangible" from his quotation of the latter passage,<sup>b</sup> for he maintains that god did not create the tangibility of the matter out of which he formed the physical universe but that this was perceptible and corporeal <sup>c</sup>; and yet elsewhere he insists that Platonic "matter" is entirely without quality and becomes tangible and visible by participating in the

intelligible and simulating it.d

So Plutarch's interpretation upon closer inspection proves to be far from "literal." His motive was not strict fidelity to Plato's words but concern to enlist Plato's authority for the proposition that the universe was brought into being by god; and, since he says himself why he thought it necessary to insist upon such a beginning of the universe, the course of his reasoning can be plausibly explicated in the following manner. Soul as such must have existed without beginning, for, as Plato says himself, soul is self-moving motion, which itself is not subject to generation or destruction. This soul cannot be the soul of the universe, however, for, if it were, it would without beginning have always been producing in body the motions of the corporeal universe just as they are now organized by the soul of the universe e; and this

b See infra 1016 F with note d.

<sup>&</sup>lt;sup>a</sup> For the bearing of the contradiction on the question whether the creation was meant to be taken literally cf. L. Tarán in Essays in Ancient Greek Philosophy edited by J. P. Anton with G. L. Kustas (Albany, State Univ. of New York Press, 1971), pp. 382-384 with notes 98-104.

<sup>See infra pages 183, note d; 185, note c; 229, note i.
See infra 1014 F with note e and 1013 c with note d.</sup> 

See infra 1030 c (chap. 33 sub finem), and Plat. Quaest.

corporeal universe, if it had been so organized always and without beginning, would be coeval with soul, in which case there would be neither cogent evidence for the existence of god (see infra 1013 E-F) nor any need of his existence.<sup>a</sup> Therefore the existence of god requires that the soul of the universe have had a beginning antecedent to that of the corporeal universe organized by it. This beginning, however, could not have been a coming to be from what was not soul, since as soul it is without beginning, and so could have been only a change in preexisting soul such as would account for the regular motions of an ordered corporeal universe, i.e. a change in selfmotion from the disorderly or demented to the orderly and rational, which must have been caused by the introduction of vovs into the soul already existing. Therefore Plato, despite what he seems to say in the Timaeus, must have meant not that the demiurge created the substance of soul but that he compounded the soul of the universe by blending νοῦς with irrational soul, the vestigial irrationality of which is the cause of the evil in the universe as the rationality imposed upon it by god is the cause of the good b; and consequently the essential ingredients in the psychogony must be these two, both

<sup>b</sup> See infra 1026 D-E (chap. 27) and 1027 A (chap. 28).

preexisting and without beginning,  $vo\hat{v}_S$  and the self-motion that is soul in itself.

This interpretation has won for Plutarch the praise of some modern scholars for acuteness and ingenuity and even for "fathoming the thought of Plato better than did Plato's immediate disciples." <sup>a</sup> In fact, it is instructive chiefly because it shows how Plutarch could manipulate for his own purpose philosophical texts still available for comparison with his treatment of them and what arbitrariness and contradictions are involved in an attempt to prove Platonic the dogma of "creation" as an historical beginning.

A Latin translation of the essay made by Turnebus was published in 1552.<sup>b</sup> The first edition of the Greek text restored to its original order was published in 1848 by A. D. Maurommates <sup>c</sup>; and in 1873 B. Müller, who in 1870 had independently

a So Thévenaz, L'Âme du Monde, p. 95. Helmer (De An. Proc., p. 66) says that Plutarch's "Scharfsinn" can seldom be refused recognition. R. Del Re tries to defend l'lutarch's interpretation even in the crucial and embarrassing matter of the "divisible being" (Studi Italiani di Filologia Classica, N.S. xxiv [1949], pp. 51-64 [n.b. pp. 56-57]); and J. B. Skemp, while taking the "'analytic' view of the Timaeus... as at any rate the more probable," nevertheless treats Plutarch's interpretation very seriously (The Theory of Motion in Plato's Later Dialogues, Enlarged Edition [Amsterdam, 1967], pp. x, xiv, 26-27, 59, 76, 111-112, and 149).

b Plutarchi Chaeronei De Procreatione Animi in Timaeo Platonis Adriano Turnebo interprete. Parisiis, Ex officina

Adriani Turnebi Typographi Regis. M.D. LII.

\* Πλουτάρχου περὶ τῆς ἐν Τιμαίω ψυχογονίας, ἐκδόντος καὶ εἰς τὴν ἀρχαίαν συνέχειαν ἀποκαταστήσαντος ᾿Ανδρέου Δ. Μαυρομμάτου Κορκυραίου, εν ᾿Αθήναις, 1848. The text, based chiefly on that of Dübner, is preceded by an essay on the restoration of the proper order and followed by ten pages of notes.

discovered this order, published another edition of it.a There are two monographs devoted entirely to the essay. One of them by Joseph Helmer is entitled Zu Plutarchs " De animae procreatione in Timaeo": Ein Beitrag zum Verständnis des Platon-Deuters Plutarch (Würzburg, 1937 [Diss. München]). The other by Pierre Thévenaz, L'Âme du Monde, le Devenir et la Matière chez Plutarque (Paris, 1938), is a systematic study preceded by an annotated translation into French of the first part of the essay, i.e. chaps. 1-10 (1012 B-1017 c) and 21-28 (1022 E-1027 A). There are two earlier monographs of wider range in which the study of this essay is an important part, Plutarchi Chaeronensis studia in Platone explicando posita by Herbert Holtorf (Stralesundiae, 1913 [Diss. Greifswald]) and The Platonism of Plutarch by Roger M. Jones (Menasha, 1916 Diss. Chicago]). Unfortunately none of these four authors was aware of the correct construction of Timaeus 35 A 1-B 1, first pointed out in modern times apparently by G. M. A. Grube (Class. Phil., xxvii [1932], pp. 80-82), the crucial passage with which Plutarch begins his exposition.

The De Animae Procreatione in Timaeo is No. 65 in the Catalogue of Lamprias and No. 77 in the Planudean order. The text of it here printed is based upon E B e u f m r b Escor. 72, all of which have been

<sup>a</sup> Plutarch über die Seelenschöpfung im Timaeus, von Berthold Müller, Breslau, 1873 (Gymnasium zu St. Elisabet. Bericht über das Schuljahr 1872–1873). The text is based chiefly on E, and the apparatus reports mainly the readings of that ms., the Epitome, and the Aldine.

b r is Leiden B.P.G. 59 and not Voss. 59 as it is called in Hubert-Drexler, Moralia vi/1, pp. xv1 and xx; cf. Bibliotheca Universitatis Leidensis: Codices Manuscripti—VIII:

collated from photostats. In all these Mss. there is the same displacement of chapters 21-30 (1022 E—1027 F) from their proper place immediately after chapter 10, a displacement discovered first by A. D. Maurommates (Πλουτάρχου περὶ τῆς ἐν Τιμαίω ψυχογονίας . . . [Athens, 1848], pp. ιβ΄-ιε΄) and later independently by B. Müller (Hermes, iv [1870], pp. 390-403 b; cf. v [1871], p. 154) and again still later by P. Tannery (Rev. Études Grecques, vii [1894], pp. 209-211). All these Mss., therefore, derive from one ancestor, but their differences at the junctures resulting from the displacement show that they were not all copied from a single archetype and suggest the division of them into groups that is confirmed by their variations throughout the essay. At these junctures E and B are aliķe; e and u are alike and

Codices Bibliothecae Publicae Graeci descripsit K. A. de Meyier adiuvante E. Hulshoff Pol (Lugduni Batavorum, 1965), p. 82. For confirmation of this fact as well as for the correct photostats I am obliged to the generosity of

Dr. de Meyier.

<sup>a</sup> I report the readings of Escor. 72 because they seem to have remained unknown hitherto. From Oxoniensis Coll. Corp. Christi 99 (C.C.C. 99) I report only one correct reading, for my collation of this Ms. has confirmed the statement (Hubert-Drexler, Moralia vi/1, p. xvi) that it is close to f, m, r and especially close to r, with which in fact it agrees against all others seventy-six times, though it cannot be their source, since it disagrees with all of them at least eighteen times, in five of which it lacks words that they preserve. For Marciani 184, 187, and 523, which I have not collated, cf. B. Müller (1873), pp. 3-4 and Hubert-Drexler, op. cit., pp. xv-xvi.

b Here (p. 403, n. 1) Müller reports that the correct order had already been indicated in a marginal note made by Deodat Gröhe; but, since Gröhe published his doctoral dissertation in 1867, his note could scarcely have been made

before Maurommates' publication.

different from E, B; f, m, r are substantially alike and different from both E, B and e, u; and Escor. 72 agrees in part with e, u and in part with f, m, r (see the critical apparatus on 1022 E following 1017 c, chapter 21 init.). The text of the Aldine at one juncture is closest to that of e, u and at the other

two agrees with that of m, r.

B agrees with E (or with E corrected) against all the other MSS. more than eighty times, indicating lacunae where all the others show none but instead have words or letters missing from E and B (cf. 1015 c [τοῦ ... θέντος], 1015 [ως ... την], 1024 [ως ... την] $[\tau \hat{\omega} \nu \ldots \hat{\epsilon} \pi \iota \kappa \rho \alpha \tau \epsilon \hat{\iota}]$ , omitting words that all the others preserve (cf. 1014 A  $[\pi\epsilon\rho i \tau o \nu \tau \omega \nu]$ , 1025 B  $[\mathring{a}\lambda\lambda\mathring{a}]$ , 1018 B  $[\mathring{\omega}\nu]$ ), and preserving words omitted by all the others (cf. 1027 c [καὶ τριπλασίοις], 1018 A [καὶ ποιοῦσαι . . .]). B alone or in agreement with others differs from E in forty-nine places; but the negligence of the scribe of B might be held to account for many of these differences a and his own acumen for others, b although he must have been more than acute to have added the kai that E and all the others omit in διὰ τὸ καὶ τὰς ἀρχὰς. . . (1025 Ε).

a It is difficult to believe that negligence alone can explain  $\epsilon i \rho i \theta \mu \omega p$  for the  $\epsilon i \sigma i \rho \mu \omega p$  of E (1019 A) or συνήθειαν (unrecorded in Hubert-Drexler, Moralia vi/1, p. 179) for the perfectly clear συνήχησιν of E (1021 B).

b e.g. for  $\tau \hat{\eta}$   $\tilde{v} \lambda \eta$ , καὶ  $\tilde{v} \eta$  έκείνης (1016 d), where E alone

b e.g. for  $\tau \hat{\eta}$  ὕλη καὶ ὑπ' ἐκείνης (1016 D), where E alone omits καὶ (unrecorded in Hubert-Drexler, ibid., p. 153), and for "Aρεος (1029 B), where E with all others except f, m, r

has dépos.

c One of the eight cases of difference added by D. A. Russell (Class. Rev., N.S. v [1955], p. 161) to the "crucial instance" (p. 170, 9 f. [Hubert-Drexler] = 1018 Β: ἐν ὅσαις ἡμέραις [μοίραις]) adduced in Hubert-Drexler, ibid., p. xvi as proof that B is independent of E. Of Russell's seven remain-

This and the  $\mathring{\eta}\nu$   $\delta\mathring{\eta}$   $\delta$   $\theta\epsilon\grave{o}s$   $a\mathring{v}\tau\grave{o}s$  of B in 1017 A-B, where E has  $\tau\mathring{\eta}\nu$   $\delta\grave{\epsilon}$   $a\mathring{v}\tau\grave{o}s$   $\delta$   $\theta\epsilon\grave{o}s$ , a look like genuine variants rather than mere "slips" or arbitrary emendations; and so does the  $\kappa a \grave{\iota}$  that B alone has between  $\tau \hat{\omega}$   $\grave{\epsilon}\pi\sigma\gamma\delta\acute{o}\omega$  and  $\tau \hat{\omega}$   $\grave{\epsilon}\pi\iota\tau\rho\acute{\iota}\tau\omega$  in 1022 c (chapter 19 sub finem), for something is certainly missing here and the erroneous  $\kappa a \grave{\iota}$  may be a misreading by B of some sign to that effect in his original. There are indications, then, that this essay in B was not copied directly from E, though it must be admitted that none of them is tantamount to definitive proof.

While e and u are frequently in agreement with f, m, r against E and B b and more frequently in agreement with E, B against f, m, r, c it is still more

ing cases two (171. 3 and 176. 20, i.e.  $[\dot{a}\phi'/\dot{\epsilon}\phi']$  in 1018 B and  $\dot{a}\nu\tau i/\delta\nu\tau_t$  in 1020 a) are merely errors in the critical apparatus of Ilubert-Drexler, four others (150. 13, 159. 12, 163. 10, 187. 21 [Hubert-Drexler]) are cases in which the text of B might be accounted for by the corrections in E, and the seventh (156. 8 [Hubert-Drexler] = 1022 E:  $\theta\dot{\gamma}\gamma\sigma\sigma\sigma$  for  $\theta\iota\gamma\sigma\sigma\sigma$  is an error shared by B with u¹, a fact not recorded by Hubert-Drexler, as four other cases of the agreement of u with B in error against all the others have also gone unrecorded, though to many these might seem to be more significant than the "crucial instance" of 1018 B where B neglects two letter-spaces left vacant in E between  $\delta\sigma\alpha\iota_S$  and  $\mu\sigma\delta\rho\sigma\iota_S$ .

<sup>d</sup> η̂ν δὲ αὐτὸς ὁ θεὸς is the reading of e¹. Neither this nor the reading of B is recorded in Hubert-Drexler (ibid.,

p. 154, 26).

b Besides such cases as 1025 B and 1027 c already mentioned for the agreement of E and B against all the others see especially 1018 B (καὶ τὰ ιβ') and 1028 A (μονονονχὶ οὖν).

There are more than a score of cases, among which see τρίτα for ἐπίτριτα and the omission of πρὸς τὰ γ' καὶ μ' καὶ σ' in 1021 ε.

common for e and u or for e and u with Escor. 72 to be in agreement against all the others. A Nevertheless, e and u are clearly independent of each other, for they differ from each other in more than sixty places, in forty of which u is alone in error but in at least one of which it agrees with f, m, r in correctly preserving a word that is not in e or in the others  $(1017 \text{ F} [\kappa \alpha i \tau o \hat{v} \iota \beta'])$ , while in several places e preserves words that are lacking in u, most notably a passage of 21 words that the latter omits  $(1019 \text{ F} [\epsilon \nu \delta \epsilon \tau o i \tau \tau \nu \lambda a \sigma i \omega \nu \nu \nu \nu \nu \nu \tau \mu \nu \sigma \sigma s])$ .

While in agreement with e and u against E and B at least a dozen times and in five of these with words that are not in E or B at all, f, m, and r are clearly independent of e and u, since in about a dozen passages all three of them agree in having words that are absent from both e and u ; but f, m, and r, although they agree against all the others in more than sixty places and in more than a score of these alone preserve the correct text, are themselves independent of one another, for besides other striking differences each of them preserves words that the other two do not have. d Of the three the

<sup>b</sup> See 1014 A, 1018 B (twice), 1025 B, and 1028 A.

d Of the many cases see e.g. 1020 p and 1028 p for words in f and m that are not in r; 1025 r, 1019 p, and 1021 c for

<sup>&</sup>lt;sup>a</sup> Of the two score cases and more see 1015 D (ώς οὐκ εὖ τὴν), 1017 B (see the critical apparatus on μέγα), 1023 E (λέγειν), 1027 B-c (καὶ ὑπερεχομένην · · · ὑπερέχουσαν omitted by e, u, Escor. 72).

<sup>&</sup>lt;sup>c</sup> Of these the most significant are 1027 B-c (καὶ ὑπερεχο-μένην · · · ὑπερέχουσαν), 1018 A (see the critical apparatus on καὶ ποιοῦσαι), 1020 A (καὶ τοῖς τριπλασίοις), and 1021 E (πρὸς τὰ γ' καὶ μ' καὶ σ'). In all these cases the Aldine also lacks the words preserved by  $\mathbf{f}$ ,  $\mathbf{m}$ ,  $\mathbf{r}$ .

text of m is most nearly intact and the best by far.

Escor. 72,<sup>a</sup> though it often agrees with f, m, and r against e and u and more often with e and u against f, m, and r and in both cases frequently agrees with E and B, was not copied from any of these Mss. From E and B it differs more than eighty times and in at least seven of these exhibits in agreement with e and u or with f, m, and r or with all five of them words that are absent from both E and B.<sup>b</sup> So also, while f, m, and r have words that it lacks,<sup>c</sup> it preserves words that are missing from them,<sup>d</sup> as it does others that are missing from e or from u.<sup>e</sup> Although like f, m, and r more recent than the Aldine, like them (see page 154, note c supra) it too preserves words that are lacking in the Aldine,<sup>f</sup> from which it

words in m and r that are not in f; 1024 A, 1025 D, and 1019 E for words in f or r that are not in m.

<sup>&</sup>lt;sup>a</sup> The contents of this Ms. ( $\Sigma$ -I-12) are of different dates, the De Animae Procreatione in Timaeo (ff. 75<sup>r</sup>-87<sup>r</sup>) being of the 16th century according to P. A. Revilla, Catálogo de los Códices Griegos de la Biblioteca de El Escorial I (Madrid, 1936), p. 253 and p. 255 (No. 13).

<sup>&</sup>lt;sup>b</sup> See 1012 B, 1014 A, 1015 D, 1024 E, 1025 B, 1018 B, 1028 A.

There are more than a dozen such cases to testify that f, m, and r do not derive from Escor. 72; see especially 1020 A (καὶ τοῖς τριπλασίοις) and 1021 E (πρὸς τὰ γ΄ καὶ μ΄ καὶ σ΄).

There are half a dozen cases of this, the most striking being 1022 s, where a whole clause is missing from f, m, r; in 1025 r it is f alone that omits eleven words, and in 1025 c f and r that omit ten.

<sup>&</sup>lt;sup>6</sup> See 1027 D (περὶ δὲ τῆς τάξεως) and 1029 A (πέντε τετραγόρδων), and for u alone 1019 F (ἐν δὲ τοῖς τριπλασίοις...).

<sup>&#</sup>x27; See the critical apparatus on 1016 Ε (καὶ τῆν), 1017 Β (τεκμήριον ἐστι μέγα), and 1024 Α (καὶ τῆς χείρονος).

differs in more than thirty passages a and with which it is alone in agreement against all the other Mss. only twice. When it agrees with the Aldine against other Mss., it is usually at the same time in agreement with e and u or at least with e.

The Aldine itself cannot have been taken from E or B, with both of which it disagrees more than a hundred times and with neither of which it ever agrees against all the other MSS. In at least a dozen places it exhibits words that are in other MSS. but are missing from E and B<sup>d</sup>; and at 1027 B-c it agrees exactly with e, u, and Escor. 72 in a mutilated text entirely different from the text of E and B, although other passages prove that it could not have been taken from e or u either. Nor could it have been

<sup>a</sup> See e.g. the critical apparatus on 1016 B (συνέρξας), 1024 E (κρίσις), 1018 A (τὰ μὲν γὰρ), 1022 A (ἀναλόγως ήδη),

1030 c (ἐμμέλειαν).

b See the critical apparatus on 1017 A  $(\tau a \tilde{v} \tau a \delta \dot{\eta} \delta \epsilon \tilde{t})$  and 1021 E  $(\kappa a \tau \dot{a} \tau \dot{o} \nu \beta a \rho \dot{v} \tau a \tau o \nu)$ . In 1020 D  $(\nu \pi \varsigma')$  Escor. 72 has  $\delta$  superscript over  $\varsigma'$ , a miscorrection that might have come from the Aldine  $(\nu \pi \delta')$  or from the source of f, m, r  $(\nu o \delta')$ . There are more than half a dozen cases in which Escor. 72 has been corrected to a reading in which the Aldine and f, m, r agree.

<sup>6</sup> The nearest it comes to this is at 1029 D where for the first word in chapter 33 (σκοπείτε) it agrees with E, B, and

r against all the others.

<sup>d</sup> See e.g. the critical apparatus on 1014 A (περὶ τούτων), 1015 D (ὡς οὐκ εὖ τὴν), 1024 E (πλανήτων), 1025 B (ἄδεκτον

οὖσαν ἀλλά), 1018 Β (ἐπόγδοος ῶν), 1028 Α (μονονουχί).

" In half a dozen passages it agrees with u alone against all the other MSS. (see especially 1024 ε on κρίσις: κίνησις -u, Aldine); and yet in 1019  $\mathbf{r}$  it preserves twenty-one words that are not in  $\mathbf{u}$  (ἐν δὲ τοῖς τριπλασίοις . . .), while in at least two places it agrees with  $\mathbf{f}$ ,  $\mathbf{m}$ ,  $\mathbf{r}$  in words that are not in  $\mathbf{e}$  or  $\mathbf{u}$  (see 1014 B on πρὸ τῆς τοῦ and 1029 c on τῆ ὑπάτη τόνου). In more than thirty other passages it disagrees with  $\mathbf{e}$  and  $\mathbf{u}$ ,

taken from C.C.C. 99, which in many passages lacks words that it preserves.a

for which e.g. see the critical apparatus on  $1023 \text{ E} (\lambda \acute{e} \gamma \epsilon \iota \nu)$ ,  $1025 \text{ F} (\chi \omega \rho \grave{i}_S \tau o \acute{\nu} \tau \omega \nu)$ ,  $1018 \text{ A} (\tau \grave{a} \mu \acute{e} \nu \gamma \grave{a} \rho)$ ,  $1018 \text{ B} (\delta \iota \grave{a} \tau o \~{\nu} \tau o \kappa a \iota)$ ,  $1022 \text{ A} (\acute{a} \nu a \lambda \acute{o} \gamma \omega s \check{\eta} \delta \eta)$ , and  $1028 \text{ B} (\tau \grave{o} \nu 'E \rho \mu o \~{\nu})$ .

To mention none of the other cases, words that the Aldine

preserves and r omits in the following passages are also wanting in C.C.C. 99: 1017 A, 1017 B, 1020 D, 1022 B, 1025 C, 1026 в, 1028 р.

1012

# ΠΕΡΙ ΤΗΣ ΕΝ ΤΙΜΑΙΩΙ¹ ΨΥΧΟΓΟΝΙΑΣ

'Ο πατὴρ Αὐτοβούλω καὶ Πλουτάρχω εὖ πράττειν

Β 1. Έπεὶ τὰ πολλάκις εἰρημένα καὶ γεγραμμένα σποράδην ἐν ἐτέροις ἔτερα τὴν Πλάτωνος ἐξηγουμένοις δόξαν ἢν εἶχεν ὑπὲρ ψυχῆς, ὡς ὑπενοοῦμεν ἡμεῖς, οἴεσθε δεῖν εἰς εν συναχθῆναι καὶ τυχεῖν ἰδίας ἀναγραφῆς τὸν λόγον τοῦτον, οὔτ' ἄλλως εὐμεταχείριστον ὄντα καὶ διὰ τὸ τοῖς πλείστοις τῶν ἀπὸ Πλάτωνος ὑπεναντιοῦσθαι δεόμενον παραμυθίας, προεκθήσομαι τὴν λέξιν ὡς ἐν Τιμαίω γέγραπται. ''τῆς ἀμεροῦς² καὶ ἀεὶ κατὰ³ ταὐτὰ ἐχούσης οὐσίας καὶ τῆς αὖ περὶ τὰ σώματα γιγνομένης

ἐν τῷ Τιμαίῳ -Ε, B, e, u, Escor. 72.
 ἀμερίστου -Timaeus 35 A 1.
 καὶ ἀεὶ καὶ κατὰ -e, u, Escor. 72.

<sup>a</sup> Concerning these two sons of Plutarch's cf. K. Ziegler,

R.-E. xxi/1 (1951), col. 649, 9-63.

b Timaeus 35 A 1-B 4. The passage is here translated in such a way as to make it compatible with the construction of it implied by Plutarch's subsequent interpretation. The correct construction and interpretation of Plato's text are given by G. M. A. Grube (Class. Phil., xxvii [1932], pp. 80-82) and by F. M. Cornford (Plato's Cosmology, pp. 59-61), who might have cited in their own support not only Proclus, as they do (cf. especially In Platonis Timaeum ii, pp.

# ON THE GENERATION OF THE SOUL IN THE TIMAEUS

To Autobulus and Plutarch a from their Father with his Wishes for their Welfare

1. Since you think that there ought to be a unified collection of the various statements that I have frequently made and have set down sporadically in various writings explaining what I supposed to be the opinion held by Plato concerning the soul and that a separate treatise ought to be devoted to this account, as it is both difficult to deal with otherwise and in need of vindication because of its opposition to most of the Platonists, I shall make my preface the passage as it is written in the *Timaeus.*<sup>b</sup> "Of the indivisible <sup>c</sup> and ever invariable being and of the

155, 20-156, 24 and p. 162, 6-14 [Diehl]), but also the clear and concise paraphrases of the passage by Hermias (In Platonis Phaedrum, p. 123, 4-12 [Couvreur]) and by Aristides Quintilianus (De Musica iii, 24 = p. 126, 1-7 [Winnington-Ingram]). Proclus (ibid., pp. 162, 25-163, 3) implies that Porphyry understood the passage in the same way.

<sup>c</sup> Plato wrote ἀμερίστου here (Timaeus 35 A I), and Plutarch usually employs that word in referring to this passage (1012 Ε, 1014 D, 1022 Ε and Ε, 1025 B and Ε infra; cf. Plat. Quaest. 1001 D supra); but a few lines below (Timaeus 35 A 5) Plato himself used ἀμεροῦς in the same sense (cf. Theaetetus 205 c 2 and D 1-2 with Ε 2), and in 1022 Ε infra Plutarch remarks τὸ... μονοειδὲς ἀμερὲς εἴρηται καὶ ἀμέριστου.

1 συνεκεκράσατο -u.

3 ταὐτὰ -r, Timaeus 35 A 5 (in F but ταῦτα in A, P, W, Y).

4 αὐτῶν -m, r, Timaeus 35 A 6.

5 συνεκεκράσατο - υ.

6 ταὐτὸν -Timaeus 35 A 8.

<sup>7</sup> μοίρας ὄσας -Timaeus 35 в 2.

8 Omitted in Timaeus 35 B 3 by A, P, W, Y.

 $<sup>^2</sup>$  τοῦ ἐτέρου -Ε, B (cf. 1012  $\rm E$  infra: τοῦ δὲ ταὐτοῦ καὶ τοῦ ἐτέρου), Timaeus 35  $\rm A$  4-5 (in A, P, W, Y but θατέρου in F); τοῦ θατέρου -e,  $\rm u$ ; θατέρου -f,  $\rm m$ ,  $\rm r$ , Escor. 72.

<sup>&</sup>lt;sup>a</sup> Plato wrote κατὰ ταὐτὰ . . . αὐτῶν; but instead of the former Plutarch probably read κατὰ ταῦτα, and instead of the latter he certainly read αὐτὴν and construed τοῦ τ' ἀμεροῦς . . καὶ τοῦ . . . μεριστοῦ as a genitive of material with συνέστησεν αὐτῆν instead of as governed by ἐν μέσω, for in 1025 B and 1025 E—1026 A infra he says that between sameness and difference there was placed as a receptacle for them the mixture of the indivisible and the divisible. The change of αὐτῶν to αὐτῆν may have been occasioned by the same desire for an expressed object of συνέστησεν that led Hackforth (Class. Rev., N.S. vii [1957], p. 197), while adopting Cornford's construction of the passage, to

divisible on the other hand that comes to pass in the case of bodies he blended together out of both a third kind of being in the middle, and in regard to the nature of sameness again and that of difference he also in this way compounded it a in the middle of the indivisible and what is divisible among bodies. And he took them, three as they were, and blended them all together into a single entity, b forcibly fitting into sameness the nature of difference, which is refractory to mixture, and mixing them together with being.c And, when out of three he had made one, he again distributed the whole of this into fractions d that were appropriate and each of these a blend of sameness and difference and being; and he began the division in the following way." To recount at present all the dissensions that these words have

propose κατὰ ταῦτα ⟨ταὐτό⟩; but κατὰ ταὐτὰ συνέστησεν here needs a separately expressed object no more than does μεγνός five lines below (Timaeus~35~B~1) or  $\pi\epsilon\rho i$  τε  $\psi \nu \chi \hat{\eta}\hat{s}$  δύσεως διζδών κατὰ ταὐτὰ in Phaedrus 277 B~8.

b For Plato's use of iδέα in this sense cf. Theaetetus 184
 D 3, 203 E 4, 204 A 1-2, 205 C 1-2, 205 D 5; Parmenides
 D 7-E 2; Politicus 308 C 6-7 (and with this cf. Timaeus

28 A 8).

As Proclus saw (In Platonis Timaeum ii, p. 159, 5-14 [Diehl]), Plato meant simply "and mixing them (i.e. both of them) with being" (cf. Timaeus 37  $\Lambda$  2-4; and for this use of  $\mu\epsilon\tau\dot{a}$  cf. 83 s 5-6, 85  $\Lambda$  5, and Laws 961 p 9-10); but from 1025 s infra it appears that Plutarch took it to mean "and mixing them (i.e. the two of them) together with the help of being," as do Taylor (Commentary on Plato's Timaeus, p. 109) and Thévenaz (L'Âme du Monde, pp. 13, 39, 42).

<sup>a</sup> The εls δs, which here replaces Plato's σσs (cf. Lans 737 E 3-4 and 756 B 8-c 1), is in accordance with Plutarch's own usage (cf. De Comm. Not. 1081 c-p infra, De Defectu

Orac. 422 E, Quaest. Conviv. 719 E).

(1012) διαφορὰς ἄπλετον ἔργον ἐστὶ διελθεῖν ἐν τῷ παροντι, πρὸς δὲ ὑμᾶς ἐντετυχηκότας¹ ὁμοῦ ⟨τί⟩² ταῖς πλείσταις καὶ περιττόν. ἐπεὶ δὲ τῶν δοκιμωτάτων ἀνδρῶν τοὺς μὲν Ξενοκράτης προσηγάγετο, τῆς ψυχῆς τὴν οὐσίαν ἀριθμὸν αὐτὸν ὑφ' ἑαυτοῦ κινούμενον ἀποφηνάμενος,³ οἱ δὲ Κράντορι τῷ Σολεῖ⁴ προσέθεντο, μιγνύντι τὴν ψυχὴν ἔκ τε τῆς νοητῆς καὶ τῆς περὶ τὰ αἰσθητὰ δοξαστῆς φύσεως, οἷμαί τι τὴν τούτων ἀνακαλυφθέντων σαφήνειαν ὥσπερ ἐνδόσιμον ἡμῖν⁵ παρέξειν.

Έστι δὲ βραχὺς ὑπὲρ ἀμφοῖν ὁς λόγος. οἱ μὲν γὰρ οὐδὲν ἢ γένεσιν ἀριθμοῦ δηλοῦσθαι νομί-Ε ζουσι τἢ μίξει τῆς ἀμερίστου καὶ μεριστῆς οὐσίας· ἀμέριστον μὲν γὰρ εἶναι τὸ ἕν μεριστὸν δὲ τὸ πλῆ-

<sup>2</sup> <τι> -added by Hartman (De Plutarcho, p. 589, n. 1); ἐμοῦ ταῖς -r; ὁμοῦ ταῖς -all other mss.

<sup>3</sup> ἀποφηναμένους - Escor. 72.

<sup>4</sup> f, m; σωλεῖ -r; σολιεῖ -E, B, e, u, Escor. 72.

<sup>5</sup> E, B, e; ὑμῖν -u, f, m, r, Escor. 72.

6 6 -omitted by e. u. Escor. 72.

<sup>a</sup> Sextus according to the MSS. of Adv. Math. i, 301 asserts that πάντες οἱ Πλάτωνος ἐξηγηταί were silent about the passage; but cf. W. Theiler's suggestion (Gnomon, xxviii [1956], p. 286).

<sup>b</sup> Xenocrates, frag. 68 (Heinze [p. 187, 6-8]); cf. Plat. Quaest. 1007 c supra with note c there and Xenocrates, frags. 60-61 with Cherniss, Aristotle's Criticism of Plato

..., p. 396, n. 321.

° Crantor, frag. 3 (Kayser) = frag. 3 (Mullach, Frag. Philos. Graec. iii, p. 140). With the formulation, τῆς νοητῆς καὶ τῆς · · · δοξαστῆς φύσεως, cf. Plutarch, Adv. Colotem 1114 c; Albinus, Epitome ix, 4 (p. 55, 1-3 [Louis] = p. 164, 1-3 [Hermann]) and Apuleius, De Platone i, 9 (p. 92, 10-15 [Thomas]) referring to Timaeus 51 D-E; Sextus, Adv. Math. vii, 141 referring to Timaeus 27 D 6—28 A 4; and 162

occasioned their interpreters <sup>a</sup> is in the first place an immense task and to do so to you superfluous as well, as you have read pretty nearly the most of them. Since, however, of the men most highly esteemed some were won over by Xenocrates, who declared the soul's essence to be number itself being moved by itself,<sup>b</sup> and others adhered to Crantor of Soli, who makes the soul a mixture of the intelligible nature and of the opinable nature of perceptible things,<sup>c</sup> I think that the clarification of these two when exposed will afford us something like a keynote.<sup>a</sup>

2. The statement concerning both is concise. The former believe that nothing but the generation of number is signified by the mixture of the indivisible and divisible being, the one being indivisible

see Plato, Republic 534 A 6-7. Crantor, the pupil of Xenocrates (Diogenes Laertius, iv, 24), is called by Proclus (In Platonis Timaeum i, p. 76, 1-2 [Diehl]) ὁ πρῶτος τοῦ Πλάτωνος ἐξηγητής.

d Cf. De Defectu Orac. 420 F and 421 F, Quaest. Conviv.

704 E; Athenaeus, xiii, 556 a.

• The expression suggests that what follows was taken not directly from Xenocrates and Crantor but from a report

of their interpretations.

/ Xenocrates, frag. 68 (Heinze [p. 187, 11-23]). Cf. Cherniss, The Riddle, pp. 45-46 and p. 73 and Aristotle's Criticism of Plato..., pp. 396-402; and Merlan, Platonism to Neoplatonism, pp. 34-35, who on pp. 45-48 argues that Xenocrates' interpretation of Timaeus 35 a 1-8 4 is not "so thoroughly mistaken" although on p. 13 he had himself accepted as correct the interpretation given by Cornford (see note b on 1012 B supra), whereas it is by neglect of the latter and consequent misconstruction of Timaeus 35 a 1-8 4 that Xenocrates' interpretation is vindicated by H. J. Krämer (Geistmetaphysik, p. 328; cf. his Arete, p. 314, lines 1-3).

(1012) θος ἐκ δὲ τούτων γίγνεσθαι τὸν ἀριθμὸν τοῦ ένὸς δρίζοντος τὸ πληθος καὶ τη ἀπειρία πέρας ἐντιθέντος, ην καὶ δυάδα καλοῦσιν ἀόριστον (καὶ Ζαράτας ὁ Πυθαγόρου διδάσκαλος ταύτην μὲν ἐκάλει τοῦ ἀριθμοῦ μητέρα τὸ δὲ ἐν πατέρα διὸ καὶ βελτίονας εἶναι τῶν ἀριθμῶν ὅσοι τῆ μονάδι προσεοίκασι), τοῦτον δὲ μήπω ψυχὴν τὸν ἀριθμὸν² εἶναι τὸ γὰρκινητικὸν καὶ τὸ κινητὸν ἐνδεῖν αὐτῷ. τοῦ δὲ ταὐ-

<sup>1</sup> MSS. (cf. 1014 D infra [ἀπειρίων ... ἐν αὐτῆ πέρας οὐδὲν ... ἔχουσαν] and 1026 A infra with Quaest. Convic. 719 E [ἀπείρω πέρατος ἐγγενομένου]; Iamblichus, Theolog. Arith., p. 9, 1 [de Falco]); ἐπιτιθέντος -Bernardakis.

<sup>2</sup> τον ἀριθμον -deleted as a gloss by Papabasileios (Athena,

x [1898], p. 226).

a Cf. De Defectu Orac. 429 A (τότε γὰρ ἀριθμὸς γίγνεται

τῶν πληθῶν ἔκαστον ὑπὸ τοῦ ένὸς ὁριζόμενον).

b Cf. Proclus, In Platonis Timaeum ii, p. 153, 19-21 and 23-25 (Diehl) = Numenius, Test. 31 (p. 97 [Leemans]); Themistius, De Anima, p. 12, 13-27 (cf. Gnomon, xxxi [1959], pp. 42-43); and for number as the product of the one and the indefinite dyad see the references in note a on Plat. Ougest. 1002 A supra (where the terms used are upyas and

ή ἄπειρος δυάς).

e Plutarch mentions "Zaratas" only here and must have been unaware that this is just another form of "Zoroaster" (cf. Bidez-Cumont, Les Mages Hellénisés i, pp. 36-38), to whom he refers at 1026 в infra and for whom he accepted the date of 5,000 years before the Trojan War (De Iside 369 de E.; cf. Hermodorus in Diogenes Laertius, i, 2 and Hermippus in Pliny, N.H. xxx, 4). With the first part of Plutarch's parenthesis here cf. Hippolytus in Refutatio vi, 23, 2 (p. 149, 29-30 [Wendland]: καὶ Ζαράτας ὁ Πυθαγόρου διδάσκαλος ἐκάλει τὸ μὲν ἐν πατέρα τὸ δὲ δύο μητέρα), who for this cites no authority but who in Refutatio i, 2, 12 (p. 7, 2-5 [Wendland]) as his source for a highly contaminated account of the doctrine expounded to Pythagoras by Zaratas cites Aristoxenus (frag. 13 [Wehrli]; cf. F. Jacoby, F. Gr. Hist. III a, pp. 295, 20–298, 14 [ad 273 r 94]

and multiplicity divisible and number being the product of these when the one bounds multiplicity <sup>a</sup> and inserts a limit in infinitude, which they call indefinite dyad too <sup>b</sup> (this Zaratas too, the teacher of Pythagoras, called mother of number; and the one he called father, <sup>c</sup> which is also why he held those numbers to be better that resemble the monad <sup>a</sup>); but they believe that this number is not yet soul, for it lacks motivity and mobility, <sup>e</sup> but that after the

and W. Spoerri, Rev. Études Anciennes, lvii [1955], pp. 267-290 [especially pp. 272-273]) and an otherwise unknown Diodorus of Eretria. The explanation of this latter name attempted by J. Bidez (Eos [Bruxelles, 1945], pp. 16-17) is implausible even on chronological grounds; and it is more probable that behind this "Diodorus" lurks the name of Eudorus (ef. J. Roeper, Philologus, vii [1852], pp. 532-535), who is cited by Plutarch at 1013 B, 1019 E, and 1020 cinfra and who is therefore likely to have been his source not only for the parenthetical reference to Zaratas here but also for the summary in which it stands (see note e on 1012 p

supra and Helmer, De An. Proc., p. 13, n. 18).

d i.e. the odd numbers (cf. Nicomachus, Arithmetica Introductio 11, xx, 2 [p. 118, 4-6, Hoche]; Syrianus, Metaph., p. 181, 23-25), which are called male (cf. Plutarch, Quaest. Romanae 264 Λ and 288 c-p, De E 388 Λ-B) and "better" (cf. Quaest. Romanae 264 Λ init.; Demetrius in Proclus, In Platonis Rem Publicam ii, p. 23, 13-22 [Kroll]; Aristides Quintilianus, De Musica iii, 24 [p. 126, 24-27, Winnington-Ingram]). Plutarch himself speaks of their derivation from the monad as from "the better principle" (De Defectu Orac. 429 B), and Xenocrates seems to have identified with oddness the monad which as male he gave the rank of father (Xenocrates, frag. 15 [Heinze] and Aristotle, Metaphysics 1084 a 32-37 with 1083 b 28-30; cf. A.J.P., lxviii [1947], pp. 245-246 in note 86).

• Cf. infra τοῦ κινεῖσθαι καὶ κινεῖν (" of being in motion and setting in motion") and Aristotle's objection, De Anima 409 a 3 (εἰ [ħ] γάρ ἐστι κινητικὴ καὶ κινητή, διαφέρειν δεῖ) with

De Generatione 326 b 3-5.

(1012) τοῦ καὶ τοῦ ἐτέρου συμμιγέντων, ὧν τὸ μέν ἐστι κινήσεως ἀρχὴ καὶ μεταβολῆς τὸ δὲ μονῆς, ψυχὴν¹ γεγονέναι, μηδὲν ἦττον τοῦ ἱστάναι καὶ ἴστασθαι Ε δύναμιν ἢ τοῦ κινεῖσθαι καὶ κινεῖν οὖσαν. οἱ δὲ περὶ τὸν Κράντορα μάλιστα τῆς ψυχῆς ἴδιον ὑπολαμβάνοντες ἔργον εἶναι τὸ² κρίνειν τά τε νοητὰ καὶ τὰ αἰσθητὰ τάς τε τούτων ἐν αὐτοῖς καὶ πρὸς ἄλληλα γιγνομένας διαφορὰς καὶ δμοιότητας ἐκ πάντων φασίν, ἴνα πάντα γιγνώσκῃ, συγκεκρᾶσθαι τὴν 1013 ψυχήν· ταῦτα δ' εἶναι τέσσαρα, τὴν νοητὴν φύσιν

<sup>1</sup> μονὴν (μόνην -f) ψυχῆς -f, m, r, Escor. 72corr. ( $\nu$  and  $\varsigma$  superscript over  $\varsigma$  and  $\nu$ ), Aldine.

<sup>2</sup> τò -f, m, r; τοῦ -E, B, e, u, Escor. 72, Aldine.

a For difference and sameness as the principles of motion and rest respectively cf. Aristotle, Physics 201 b 19-21 (= Metaphysics 1066 a 11) and Metaphysics 1084 a 34-35 with Cherniss, Aristotle's Criticism of Plato . . ., note 305 on p. 385 and pp. 11-12, p. 122, p. 443. Aristotle argues that a self-mover must have an internal principle of motion (cf. Cherniss, op. cit., pp. 389-390) and that soul must be στατική as well as κινητική (Topics 127 b 15-16; cf. De Anima 406 b 22-24 with 409 b 7-11); and Xenocrates mistakenly tried to make soul as self-motion satisfy both these requirements (cf. Cherniss, op. cit., note 366 [especially pp. 432-433]). In "Timaeus Locrus" 95 E—96 a the sameness and difference mixed with the blend of indivisible form and divisible being are called δύο δυνάμιας ἀρχὰς κινασίων without further specification.

b Crantor, frag. 4 (Kayser)=frag. 4 (Mullach, Frag. Philos. Graec. iii, p. 140), with the whole of which cf. Albinus, Epitome xiv, 1-2 (p. 79, 3-14 [Louis]=p. 169, 16-26 [Hermann]). Unlike Xenocrates Crantor did not read into the psychogony any principle of motion or any identification of soul with number (Taylor, Commentary on Plato's Timaeus, p. 113); and P. Merlan in saying that "Crantor... interpreted the 'psychogony' of the Timaeus as being simply 'arithmogony'..." (Armstrong, Later Greek...

commingling of sameness and difference, the latter of which is the principle of motion and change while the former is that of rest, then the product is soul, soul being a faculty of bringing to a stop and being at rest no less than of being in motion and setting in motion. Crantor and his followers, on the other hand, supposing that the soul's peculiar function is above all to form judgments of the intelligible and the perceptible objects and the differences and similarities occurring among these objects both within their own kind and in relation of either kind to the other, asy that the soul, in order that it may know all, has been blended together out of all and

Philosophy, pp. 17-18) erroneously ascribes to him the very

interpretation that he in fact rejected.

<sup>c</sup> Cf. Albinus, loc. cit., p. 79, 3 (Louis)=p. 169, 16 (Hermann) and Proclus, In Platonis Timaeum i, p. 254, 29-31 with ii, p. 135, 24-25 (Diehl). This use of κρίνειν is frequent in Aristotle (e.g. De Anima 427 a 17-21, 428 a 3-5, cf. 432 a 15-16 and 404 b 25-27); for Plato cf. Republic 523 в 1-2 (ως ικανῶς ὑπὸ τῆς αἰσθήσεως κρινόμενα).

<sup>d</sup> That is the difference and similarity (1) of intelligibles to one another or of perceptibles to one another and (2) of intelligible and perceptible to each other. *Cf. Timaeus* 37 A 5-B 3 and Proclus, *In Platonis Timaeum* ii, pp. 304,

22-305, 4 (Diehl).

e Because "like is known by like" (cf. Albinus, loc. cit.), the assumption underlying the psychogony according to Aristotle (De Anima 404 b 16-18) and later interpreters generally (cf. Sextus, Adv. Math. i, 303 [cf. vii, 92-93 and 116-120]; Chalcidius, Platonis Timaeus, pp. 119, 14-120, 11 [Wrobel]=p. 100, 8-22 [Waszink]; Proclus, In Platonis Timaeum ii, p. 135, 23-30 and p. 298, 2-31 [Diehl]); but see Cherniss, Aristotle's Criticism of Plato..., pp. 408-411 (with note 339 sub finem on Crantor) and G. M. Stratton, Theophrastus and the Greek Physiological Psychology before Aristotle (London/New York, 1917), pp. 156-157 on De Sensibus 1 (Dox. Graeci, p. 499, 3).

(1013) ἀεὶ κατὰ ταὐτὰ καὶ ώσαύτως ἔχουσαν καὶ τὴν περὶ τὰ σώματα παθητικὴν¹ καὶ μεταβλητὴν ἔτι δὲ τὴν ταὐτοῦ καὶ τοῦ έτέρου διὰ τὸ κἀκείνων έκατέραν

μετέχειν έτερότητος καὶ ταὐτότητος.

3. Όμαλῶς δὲ πάντες οὖτοι χρόνω μὲν οἴονται τὴν ψυχὴν μὴ γεγονέναι μηδ' εἶναι γενητὴν² πλείονας δὲ δυνάμεις ἔχειν, εἰς ἃς ἀναλύοντα θεωρίας³ ἔνεκα τὴν οὐσίαν αὐτῆς λόγω τὸν Πλάτωνα γιγνομένην ὑποτίθεσθαι καὶ συγκεραννυμένην τὰ δ' αὐτὰ

<sup>1</sup> MSS. (cf. 1023 B infra [των νοητων τὸ ἀίδιον καὶ των αἰσθητων τὸ παθητικόν] and Dox. Graeci, p. 281 a 11 and B 9); παθητήν -Bernardakis (cf. De E 392 B from Eusebius, Praep. Evang. xi, 11, 4 <math>[των παθητων καὶ μεταβλητων]).

<sup>2</sup> γεννητήν -f, m, Aldine. <sup>3</sup> θεωρίαν -r<sup>1</sup>.

<sup>a</sup> Plato emphatically stated that the ingredients of the soul

are three (Timaeus 35 A 6-7 and 37 A 2-4).

<sup>b</sup> Called τῆς περὶ τὰ αἰσθητὰ δοξαστῆς φύσεως in 1012 d supra (see note c there) and in 1013 b infra simply τῆς αἰσθητῆς οὐσίας. With the expression used here (περὶ τὰ σώματα may have been taken directly from Timaeus 35 λ 2-3, but σf. τῷ περὶ τὰ σώματα πλανητῷ καὶ μεταβλητῷ in Quaest. Conviv. 718 d) cf. τῶν αἰσθητῶν τὸ παθητικόν in 1023 B-c infra, (φύσεως) οὐσης ἐν πάθεσι παντοδαποῖς καὶ μεταβολαῖς ἀτάκτοις in 1015 e infra, τὴν δὲ σωματικὴν καὶ παθητικὴν (φύσων) in De Defectu Orac. 428 b, and also Adv. Culotem 1115 e (τῆς ὕλης . . . πάθη πολλὰ καὶ μεταβολὰς . . . δεχομένης) and 1116 d (ταύταις αἶς ἐν τῷ πάσχειν καὶ μεταβόλλειν τὸ εἶναι).

<sup>c</sup> Cf. Albinus, loc. cit., p. 79, 10-11 (Louis) = p. 169, 22-24 (Hermann): . . . ἐπὶ τῶν νοητῶν ταὐτότητά τε καὶ ἐτερό-

τητα καὶ ἐπὶ τῶν μεριστῶν. . .

d Xenocrates, frag. 68 (Heinze [p. 187, 23-27]) and Crantor, frag. 4 (Kayser [p. 19])=frag. 4 (Mullach, Frag.

Philos. Graec. iii, p. 140).

<sup>e</sup> Cf. 1017 B infra (οὐ θεωρίας ἔνεκα) and οὐ τοῦ θεωρῆσαι ἔνεκεν (Aristotle, Metaphysics 1091 a 28-29; contrast Speusippus, frag. 46, 17-20 [Lang]), διδασκαλίας χάριν ὡς μᾶλλον γνωριζόντων (Aristotle, De Caelo 280 a I, with Taurus in Philoponus, De Aeternitate Mundi, p. 187, 1 and p. 224,

that these are four,<sup>a</sup> the intelligible nature, which is ever invariable and identical, and the passive and mutable nature of bodies <sup>b</sup> and furthermore that of sameness and of difference because each of the former two also partakes of diversity and identity.<sup>c</sup>

3. All these interpreters are alike in thinking a that the soul did not come to be in time and is not subject to generation but that it has a multiplicity of faculties and that Plato in analysing its essence into these for the sake of examination e represents it verbally as coming to be f and being blended to-

 I [Rabe]; Alexander, *ibid.*, p. 217, 23-24; Simplicius,
 De Caelo, p. 304, 4-6; [Alexander], Metaph., p. 819, 38 and p. 820, 5), σαφηνείας χάριν (Theophrastus, Phys. Opin., frag. 11 [Dox. Gracci, pp. 485, 18-486, 2], with Taurus in Philoponus, De Aeternitate Mundi, p. 187, 5 [Rabe] and Alexander, ibid., p. 216, 13), ἐπὶ τοῦ σαφοῦς χρεία (Atticus in Eusebius, Praep. Evang. xv, 6, 4=ii, p. 360, 7 [Mras]), and various combinations of these expressions in Plotinus (Enn. IV. iii, 9, lines 14-15), Proclus (În Platonis Timaeum i, p. 290, 9-10 [Diehl]), and Philoponus (De Aeternitate Mundi, p. 186, 14-16 and p. 189, 10-13 [Rabe]). With είς ας αναλύοντα . . . την οὐσίαν αὐτης cf. especially Proclus, In Platonis Timaeum ii, pp. 123, 27-124, 10 (Diehl) and Chalcidius, Platonis Timaeus, p. 97, 5-7 (Wrobel)=pp. 81, 26-82, 1 (Waszink), on which of. J. H. Waszink, Studien zum Timaioskommentar des Calcidius i (Leiden, 1964), p. 7, n. 3. For similar language used of the cosmogony cf. Taurus, Porphyry, and Alexander in Philoponus, De Aeternitate Mundi, p. 146, 13-20, pp. 148, 9-23 with 153, 23-154, 5, and pp. 217, 25-218, 10 (Rabe); Plotinus, Enn. tv, iii, 9, lines 15-20; and Simplicius, De Caelo, p. 304, 7-13.

f Cf. "Timaeus Locrus" 94c (cap. ii init. [7] ed. W. Marg):  $\pi \rho i \nu$   $\delta \nu$   $\delta \rho a \nu$  with Proclus, In Platonis Timaeum ii, p. 101, 1-14 (Diehl); ef. also Plotinus, Enn. vI, vii, 35, lines 28-29 (δ δὲ λόγος διδάσκων γινόμενα  $\pi ο \iota \epsilon \hat{\iota}$ ) with Enn. IV, iii, 9, lines 13-15 and viii, 4, lines 40-42 and in general Enn. III, v, 9, lines 24-29 (. . . καὶ οἱ λόγοι καὶ

γενέσεις των άγεννήτων ποιούσι . . .).

 <sup>3</sup> γεννητικῶν -f, m, r, Aldine.
 <sup>4</sup> προυποθεμένην -r.
 <sup>5</sup> εἰκότως -u.

<sup>a</sup> Xenocrates, frag. 54 (Heinze [p. 180, 21-26]) and Crantor, frag. 4 (Kayser [p. 19]) = frag. 4 (Mullach, Frag. Philos. Graec. iii, p. 140); cf. in Xenocrates, frag. 54 (Heinze) and Speusippus, frag. 54 a-b (Lang) Aristotle, De Caelo 279 a 32-280 a 8 with Simplicius, De Caelo, pp. 303, 33-304, 15 (cf. [Alexander], Metaph., p. 819, 37-38) and Scholia in Aristotelem 489 a 4-12 (Brandis). Crantor's further explanation of γενητόν as meaning not that the universe had a beginning but that it is dependent upon an extrinsic cause (frag. 2 [Kayser = Mullach, Frag. Philos. Graec. iii, p. 139 = Proclus, In Platonis Timaeum i, p. 277, 8-10 [Diehl]) cf. later Albinus, Epitome xiv, 3 (p. 81, 1-4 [Louis]=p. 169, 26-30 [Hermann]) with Proclus, In Platonis Timaeum i, p. 219, 2-11 (Diehl); Taurus in Philoponus, De Aeternitate Mundi, p. 147, 5-9 (Rabe); Plotinus, Enn. 11, ix, 3, lines 12-14 and Enn. 111, ii, 1, lines 22-26 and vii, 6, lines 52-54; Chalcidius, Platonis Timaeus, p. 89, 20-21 (Wrobel) = p. 74, 18-19 (Waszink); Simplicius, Phys., p. 1154, 9-11; and Proclus, In Platonis Timaeum i, p. 277, 10-17 (Diehl).

<sup>b</sup> Cf. Taurus in Philoponus, De Aeternitate Mundi, p. 187, 15-16 (Rabe) with Alexander, ibid., p. 216, 13-15; Chalcidius, Platonis Timaeus, pp. 91, 22-92, 3 (Wrobel) = p. 77, 8-13 (Waszink); Simplicius, De Caelo, p. 304, 6-10.

<sup>e</sup> That is neither Xenocrates in his arithmological explication of the psychogony nor Crantor in his epistemological explication of it, the two explications that Plutarch proceeds

gether; and they think a that with the same thing in mind concerning the universe too, while he knows it to be everlasting and ungenerated, yet seeing the way of its organization and management not to be easy for those to discern who have not presupposed its generation and a conjunction of the generative factors at the beginning, this course is the one that he took. Such being on the whole what they say, Eudorus thinks that neither party is without all title to likelihood c; but to me they both seem to

to say are both wrong. The passage has been misinterpreted to mean that Eudorus reconciled the interpretation of the cosmogony by Xenocrates with the "literal" interpretation of it by Crantor (H. Dörrie, Hermes, lxxix [1944], pp. 27-28 in his article on Eudorus, ibid., pp. 25-39), although Plutarch has just asserted that Crantor and Xenocrates and all their followers alike rejected the "literal" interpretation of both the psychogony and the cosmogony. He has also ascribed to all of them alike the same explanation of both, θεωρίας ἔνεκα, and has not mentioned Crantor's additional interpretation of  $\gamma \epsilon \nu \eta \tau \acute{\nu} \nu$  (see note a on p. 170 supra); and so C. Moreschini must be mistaken in supposing him to refer to these as the two different explications to both of which Eudorus gave some title to likelihood (Annali della Scuola Norm. Sup. di Pisa [Lettere . . .], 2 Ser. xxxiii [1964], pp. 31-32). For Plutarch's use of Eudorus in this essay see note c on 1012 E supra; and for Eudorus himself besides Dörrie's article cf. E. Martini, R.-E. vi (1909), cols. 915, 41-916, 66 and G. Luck, Der Akademiker Antiochos (Bern/Stuttgart, 1953), pp. 27-28. Pap. Oxyrh. 1609 (xiii, pp. 94-96; cf. Diels-Kranz, Frag. Vorsok. i, p. 352, 1-6), in which the author refers to his own commentary on the Timaeus, has for this reason been ascribed to Eudorus, who has recently been proposed as the source of an ever-increasing number of later texts (cf. P. Boyancé, Rev. Études Grecques, lxxiii [1959], pp. 378-380 and lxxvi [1963], pp. 85-89, 95, and 98; M. Giusta, I Dossografi di Etica i [Torino, 1964], pp. 151 ff.; W. Theiler, Parusia: Festgabe für Johannes Hirschberger [Frankfurt am Main, 1965], pp. 204 ff.).

δ For τῆς aἰσθητῆς οὖσίας, an abbreviation of the formulations given in 1012 D and 1013 A supra (see note b there), cf. Proclus, In Platonis Timaeum ii, p. 154, 1-3 (Diehl) with Plotinus, Enn. 1v, viii, 7 and Simplicius, De Anima, p. 28, 1-2.

<sup>&</sup>lt;sup>c</sup> Crantor may not have meant to make the μεριστή οὐσία of Timaeus 35 A 2-3 a constituent part of the soul and probably did not identify it with corporeal being or matter (cf. Helmer, De An. Proc., p. 11; Thévenaz, L'Âme du Monde, p. 61); but the present refutation assumes that he did, and the assumption may have been the easier for Plutarch to make because such an interpretation had already been adopted by others: it is attributed to Eratosthenes by Proclus (In Platonis Timaeum ii, p. 152, 24-27;

be utterly mistaken about Plato's opinion if as a standard plausibility is to be used, not in promotion of one's own doctrines but with the desire to say something that agrees with Plato.<sup>a</sup> \land For\rangle, as to what the one party calls the mixture of the intelligible and the perceptible being,<sup>b</sup> it is not made clear how in the world this is generation of soul rather than of anything else one may mention, for this universe itself and each of its parts consist of corporeal and intelligible being, of which the former provided matter or substrate and the latter shape or form for what has come to be,<sup>c</sup> and any matter that by participating in the intelligible and simulating it has got shape is straightway tangible \( \land \rangle \) visible,<sup>a</sup>

cf. F. Solmsen, T.A.P.A., lxxiii [1942], pp. 198 and 202) and is recorded by Chalcidius (Platonis Timaeus, p. 94, 4-10 [Wrobel] = p. 79, 9-14 [Waszink]), whose ultimate source for it is probably pre-Plutarchean (cf. "Timaeus Locrus") 94 A-B). Later (1023 A infra), when against those who interpret the psychogony as a commingling of corporeal matter with indivisible being the present refutation of Crantor is repeated, it is preceded by the argument that Plato in that passage uses none of the expressions by which he was accustomed to designate corporeal matter. In fact, like Aristotle (Physics 209 b 11-13) Plutarch identified with υλη the χώρα or receptacle of the Timaeus (1024 c infra; cf. 1015 D infra and Quaest. Conviv. 636 D), confusing this further with "precosmic" corporeal chaos (cf. 1014 B-c and 1016 D-1017 A infra; Jones, Platonism of Plutarch, p. 81, n. 34; Thévenaz, L'Âme du Monde, pp. 110-113); and, though he apparently knew that Plato had not used van in this sense (De Defectu Orac. 414 F; cf. Chalcidius, Platonis Timaeus, pp. 304, 4-7 and 336, 8-12 [Wrobel] = pp. 277, 18-278, 2 and 309, 3-6 [Waszink]), he even went so far as to insert the term into quasi-quotations of the Timaeus (cf. 1016 p infra and De Defectu Orac. 430 c-D).

<sup>d</sup> Cf. Plat. Quaest. 1001 D-E supra; and for ἀπτὸν ⟨καὶ⟩ δρατόν cf. Plato, Timaeus 28 B 7-8, 31 B 4, and 32 B 7-8.

(1013) (καί) δρατόν έστιν, ή ψυχή δὲ πᾶσαν αἴσθησιν έκπέφευγεν. ἀριθμόν γε μην ὁ Πλάτων οὐδέποτε την ψυχην προσείπεν άλλα κίνησιν αὐτοκίνητον άεὶ καὶ κινήσεως πηγήν καὶ ἀρχήν ἀριθμῶ δὲ καὶ λόγω καὶ άρμονία διακεκόσμηκε τὴν οὐσίαν αὐτῆς ύποκειμένην καὶ δεχομένην τὸ κάλλιστον είδος ύπὸ τούτων έγγιγνόμενον. οίμαι δέ μη ταὐτὸν είναι τῶ D κατ' ἀριθμον συνεστάναι την ψυχήν το την οὐσίαν αὐτῆς ἀριθμὸν ὑπάρχειν, ἐπεὶ ⟨καὶ⟩³ καθ' άρμονίαν συνέστηκεν άρμονία δ' οὐκ ἔστιν, ώς αὐτὸς ἐν τῶ περὶ Ψυχής ἀπέδειξεν. ἐκφανῶς δὲ τούτοις ηγνόηται τὸ περὶ τοῦ ταὐτοῦ καὶ τοῦ έτέρου λέγουσι γάρ ώς τὸ μὲν στάσεως τὸ δὲ κινήσεως συμβάλλεται δύναμιν είς την της ψυχης γένεσιν, αὐτοῦ Πλάτωνος εν τῷ Σοφιστῆ τὸ ὂν καὶ τὸ ταὐτὸν καὶ τὸ ἔτερον πρὸς δὲ τούτοις στάσιν καὶ κίνησιν ώς

<sup>2</sup> διακόσμηκεν οὐσίαν -r. <sup>3</sup> (καί) -added by Hubert.

<sup>a</sup> Plato, Laws 898 E 1-2 (see Plat. Quaest. 1002 c supra with note g there) and Timaeus 36 E 5-6 and 46 D 6-7; cf. Albinus, Epitome xiii, 1 (p. 73, 4-7 [Louis]=p. 168, 6-9

[Hermann]).

b Phaedrus 245 c 9 (πηγή καὶ ἀρχή κινήσεως). The preceding κίνησιν αὐτοκίνητον ἀεί is not a quotation but a formulaic summary of Phaedrus 245 c 7-8 and 245 E 2-4 influenced by the phraseology of Laws 894 B 9-c 1, 895 B 1-6, and 895 E 10-896 A 5 (cf. infra 1014 D [αὐτοκίνητον δέ καὶ κινητικήν άρχήν], 1016 Α [τῶ δ' αὐτοκινήτω πιστουμένη τὸ άγένητον αὐτῆς], 1017 Α [δύναμιν αὐτοκίνητον καὶ ἀεικίνητον], 1023 c [ή μεν γαρ ἀεικίνητος]), and it does not indicate that Plutarch knew αὐτοκίνητον as a variant of ἀεικίνητον in Phaedrus 245 c 5 (cf. Lustrum, iv [1959], p. 137, # 692 and # 693). Others also, who certainly read deixing there, say that in this passage of the Phaedrus soul is defined as 70 αὐτοκίνητον (e.g. Hermias, In Platonis Phaedrum, p. 108, 174

whereas soul is beyond the range of all sense-perception.<sup>a</sup> Then as for number, that Plato never called the soul; but he called it motion perpetually self-moved and motion's source and principle.<sup>b</sup> By means of number and ratio and concord he did arrange its substance c underlying and receiving the fairest form, which by their agency arises in it; but it is not the same, I think, to say that the soul is put together on a numerical pattern and to say that its essence is number, since (in fact) it is put together on the pattern of a concord but is not a concord, as he himself proved in the work on the Soul.d It is manifest too that these interpreters e have failed to understand the part about sameness and difference, for they say that to the generation of the soul the former contributes the faculty of rest and the latter that of motion, whereas by Plato himself in the Sophist 9 existence and sameness and difference and besides these rest and motion are distinguished and

6-17 and p. 118, 14-16 [Couvreur]; Philoponus, De Aeternitate Mundi, p. 271, 18-23 and pp. 246, 27-247, 2 [Rabe]); cf. Fernanda Decleva Caizzi, Acme, xxiii (1970), pp. 91-97.

<sup>6</sup> See 1023 D infra (... τὴν οὐσίαν ... τῆς ψυχῆς ... ταττομένην ὑπ' ἀριθμοῦ). That is the procedure of Timaeus 35 B 4—36 D 7, after which the soul is described as λογισμοῦ μετέχουσα καὶ ἀρμονίας ... καὶ ἀνὰ λόγον μερισθεῖσα καὶ συνδεθεῖσα (36 E 6—37 A 4). With Plutarch's expression here cf. infra 1015 E (... ἀρμονία καὶ ἀναλογία καὶ ἀριθμῷ χρώμενος ὀργάνοις), 1017 B (διαρμοσάμενος τοῖς προσήκουσιν ἀριθμοῖς καὶ λόγοις), 1027 A, 1029 D-E, and 1030 C.

<sup>4</sup> Phaedo 92 A 6-95 A 3. For άρμονία, translated as "concord," see note a on Plat. Quaest. II, 1001 c supra.

· Xenocrates and his followers.

<sup>&</sup>lt;sup>a</sup> According to Proclus (In Platonis Timaeum i, pp. 276, 31-277, 1 [Diehl]) Plutarch, Atticus, and "many other Platonists "took the cosmogony of the Timaeus literally; but Plutarch is the earliest of these named either by him (cf. op. cit., i, pp. 381, 26-382, 12 and for the psychogony ii, pp. 153, 25-154, 1 [Diehl]) or by Philoponus (De Aeternitate Mundi, p. 211, 10-20 and p. 519, 22-25 [Rabe]), and his "many others" are probably later Platonists like Harpocration (Scholia Cod. Vat. f. 34r in Proclus, In Platonis Rem Publicam ii, p. 377, 15-23 [Kroll]), who was a pupil of Atticus (cf. Proclus, In Platonis Timaeum i, p. 305, 6-7 [Diehl]), the anonymous source of Diogenes Laertius, iii, 71-72 and 77 (cf. C. Andresen, Logos und Nomos [Berlin, 1955], p. 283), and possibly even Severus with his "cyclical" interpretation (Proclus, In Platonis Timaeum i, p. 289, 7-13 and ii, pp. 95, 29-96, 1; cf. iii, p. 212, 7-9 [Diehl]) and the "eclectic" Galen (Compendium Timaei Platonis, p. 39, 11-13 [Kraus-Walzer]). Before Plutarch, however, the literal interpretation of the Timaeus, on which Aristotle had insisted (De Caelo 280 a 28-32 and 300 b 16-18, Physics 176

set apart from one another as being five things different each from each.

4. In any case, what frightens and embarrasses these men in common with most of those who study Plato a so that they manipulate and force and twist everything in the belief that they must conceal and deny it as something dreadful and unspeakable is the generation and composition b of the universe and of its soul which have not been compounded from everlasting or in their present state for infinite time. To this a treatise by itself has been devoted c; and now it will suffice to state that these people confuse or rather utterly ruin the reasoning of Plato's case for the gods,d which he admits he made against the atheists with a zeal extreme and unsuited to his years. For, if the universe is ungenerated, there is 251 b 17-19, Metaphysics 1071 b 37-1072 a 3) but about which Theophrastus was uncertain (Phys. Opin., frag. 11 [Dox. Graeci, pp. 485, 17-486, 2]), seems to have been adopted not only by the Peripatetics generally (cf. Philoponus, De Aeternitate Mundi, p. 135, 9-14 and his quotations from Alexander, *ibid.*, pp. 213, 17-222, 17 [Rabe]) and the Epicureans (cf. Cicero, De Nat. Deorum i, 18-21 [Usener, Epicurea, pp. 245-246]) but also by Cicero (Timaeus 5, p. 159, 2-3 [Plasberg]; cf. Tusc. Disp. i, 63 and 70 and Acad. Prior. ii, 118) and by Philo Judaeus (De Aeternitate Mundi 13-16=vi, pp. 76, 16-77, 20 [Cohn-Reiter]), who like Philoponus later appeals to Aristotle as the decisive authority for this interpretation.

b For σύστασιν here cf. Plato, Timaeus 32 c 5-6 and 36

р 8-9.

<sup>c</sup> Presumably the lost work, No. 66 in the Catalogue of Lamprias, Περὶ τοῦ γεγονέναι κατὰ Πλάτωνα τὸν κόσμον (vii, p. 474 and frag. xxviii on p. 140 [Bernardakis]).

 $<sup>^</sup>b$  Cf. infra 1016 c (. . . ἡγεμόνα τοῦ παντός ἐγκατέστησαν) and 1017 B (. . . ἐγκατέστησαν ἡγεμόνα τοῦ κόσμου · . .), in both places used of the created soul, i.e. the soul after it had been made rational by god. The title is not quoted from Plato, but cf. Timaeus 41 c 7 (θεῖον λεγόμενον ἡγεμονοῦν τε) with Phaedo 80 a 3-9 and 94 c 10-d 2 and ὡς δεσπότιν in Timaeus 34 c 5 (quoted in 1016 B infra).

# GENERATION OF THE SOUL, 1013-1014

an end of Plato's contention that the soul, being senior to the body, initiates all change and motion a installed in her position of chief b and, as he has said himself, of primary agent. What is meant by soul and what by body when she is said to have been prior and senior to it, this will be made plain by our account as it proceeds, for it is the failure to understand this that seems to occasion most of the perplexity and incredulity about the true doctrine.

5. First, therefore, I shall set down what I think about these matters, confirming and vindicating as far as may be by probability be what is unusual and paradoxical about my account f; and then I shall apply the interpretation and the demonstration to the texts, at the same time bringing them into accord with one another. For in my opinion this is the way matters stand. "This universe was not made by anyone either god or man," says Heraclitus h

<sup>e</sup> See 1013 B supra and page 172, note a.

[Mras]).

The object of συνοικειῶν is the texts, τὰς λέξεις " understood" from ταῖς λέξεσιν (cf. Kühner-Gerth, ii, pp. 575-576), and not, as Thévenaz has it, the interpretation and the demonstration; the reconciliation of apparently incompatible passages (1016 A and E infra) is itself taken to be an ἀπόδειξιε of Plutarch's interpretation (1015 F infra [chap. 8 init.]), a point overlooked by C. Theander in his treatment of this passage (Plutarch und die Geschichte [Lund, 1951], pp. 42-43).

Sage (Plutarch und die Geschichte [Lund, 1951], pp. 42-43).

(ὁ δὲ θεὸς τῶν αἰτίων ἄριστον).

<sup>c</sup> See Plat. Quaest. 1001 B supra with note e there.
<sup>d</sup> The Platonic source of this is Timaeus 29 E 3—30 A 3 (cf. 1015 B infra [. . . πάντα βουλόμενος αὐτῷ κατὰ δύναμιν 180)

b The identification, οὐσία καὶ ὅλη, is Stoic according to Plutarch himself (see De Comm. Not. 1085 Ε-Γ infra with note a on F, and of. De Amicorum Multitudine 97 Λ-Β); but he so far adopts this terminology as even to use οὐσία alone for what he considers to be Platonic ὅλη (e.g. De Defectu Orac. 430 Ε [οὐ γὰρ ὁ θεὸς διέστησεν . . . τὴν οὐσίαν ἀλλὰ . . . αὐτὴν . . . ἔταξε]), for which of. Diogenes Laertius, iii, 70 (p. 149, 16-17 [Long]) and Dox. Graeci, p. 447  $^{\rm A}$  27 (Areius Didymus) in contrast to p. 447  $^{\rm B}$  22 (Albinus).

as if afraid lest by absolving god we get the notion that some human being had been the artificer of the universe. It is better, then, to be persuaded by Plato and, chanting "for it is the fairest of things that have come to be and he the best of causes."a to assert that the universe has been brought into being by god whereas the substance or matter b out of which it has come into being did not come to be but was always available to the artificer to whom it submitted itself for disposing and ordering e and being made as like to him as was possible,d for the source of generation is not what is non-existent e but, as in the case of a house and a garment and a statue, what is not in good and sufficient condition. In fact, what preceded the generation of the universe was disorder, f disorder not incorporeal or immobile or

έξομοιῶσαι]). For the tendency to take that passage as identifying the demiurge with the model of the sensible universe see Plat. Quaest. 1007 c-D supra (εἰκόνες . . . τοῦ θεοῦ, τῆς μὲν οὐσίας ὁ κόσμος . . .) with page 89, note b; cf. H. Dörrie, Museum Helveticum, xxvi (1969), pp. 222-223 and Philomathes: Studies . . . in Memory of Philip Merlan (The Hague, 1971), pp. 41-42.

(1014) ἄμορφον μὲν καὶ ἀσύστατον τὸ σωματικὸν ἔμπληκτον δὲ καὶ ἄλογον τὸ κινητικὸν ἔχουσα· τοῦτο δ' ἦν ἀναρμοστία ψυχῆς οὐκ ἐχούσης λόγον. ὁ γὰρ θεὸς οὔτε σῶμα τὸ ἀσώματον οὔτε ψυχὴν τὸ ἄψυ- C χον ἐποίησεν. ἀλλὰ ὥσπερ ἁρμονικὸν ἄνδρα καὶ ρυθμικὸν¹ οὐ φωνὴν ποιεῖν οὐδὲ κίνησιν ἐμμελῆ δὲ φωνὴν καὶ κίνησιν εὔρυθμον ἀξιοῦμεν οὔτως ὁ θεὸς οὔτε τοῦ σώματος τὸ ἁπτὸν καὶ ἀντίτυπον οὔτε τῆς ψυχῆς τὸ φανταστικὸν καὶ κινητικὸν αὐτὸς ἐποίησεν ἀμφοτέρας δὲ τὰς ἀρχὰς παραλαβών, τὴν μὲν ἀμυδρὰν καὶ σκοτεινὴν τὴν δὲ ταραχώδη καὶ ἀνόητον ἀτελεῖς δὲ² τοῦ προσήκοντος ἀμφοτέρας καὶ

 $^{1}$  ἄνδρα, ρυθμητικόν (with  $\eta$  changed to  $\ddot{\imath}$ ) -r.  $^{2}$  δè -omitted by r.

b For the expression cf. De Iside 371 B (τῆς ψυχῆς τὸ . . . ἄλογον καὶ ἔμπληκτον); the motivity is τὴν κινητικὴν τῆς ὕλης καὶ . . . ἄτακτον καὶ ἄλογον οὐκ ἄψυχον δὲ κίνησιν (1015 Ε

infra).

 $^{\circ}$  i.e. ψυχὴν τὴν πρὸ τῆς κόσμου γενέσεως πλημμελῶς πάντα καὶ ἀτάκτως κινοῦσαν (1016 c infra). ἀναρμοστία ψυχῆς is interpretation of τὸ τῆς παλαιᾶς ἀναρμοστίας πάθος (Plato, Politicus 273 c 7-D 1), quoted by Plutarch at 1015 D infra; see also 1017 c (ἐκ τῆς προτέρας ἔξεως ἀναρμόστου καὶ ἀλόγου) and 1029  $\rm E$  infra (. . . ἀταξίαν καὶ πλημμέλειαν ἐν ταῖς κινήσεσι τῆς ἀναρμόστου καὶ ἀνοήτου ψυχῆς . . .).

d See 1017 a infra  $(\dots o \dot{v}\dot{\chi}\dot{i}$  σώματος ἀπλῶς οὐδ' ὄγκου καὶ τονης) and De~E~390 d  $(\sigma \dot{\omega} \mu a \dots \dot{a} \pi \tau \dot{o} v$  ὄγκον καὶ ἀντίτυπον) with the definition,  $\sigma \dot{\omega} \mu a \dots \dot{o} \gamma \kappa o s$  ἀντίτυπος in [Plutarch], De~Placitis~882 f (Dox.~Graeci,~p.~310 a 10-11) and Sextus,

<sup>&</sup>lt;sup>a</sup> In Timaeus 50 d 7 and 51 A 7 ἄμορφος is used of the "receptacle," whereas ἀσύστατον (used by Plato only in a different and irrelevant context [Timaeus 61 A 1]) shows that Plutarch is here referring to the "precosmic" chaos of Timaeus 53 A 8-B 4 (see 1016 E-F infra).

inanimate but of corporeality amorphous and incoherent a and of motivity demented and irrational, and this was the discord of soul that has not reason. For god made neither the incorporeal into body nor the inanimate into soul; but just as a man skilled in attunement and rhythm is expected not to create sound or movement either but to make sound tuneful and movement rhythmical so god did not himself create either the tangibility and resistance of body a or the imagination and motivity of soul, but he took over both the principles, the former vague and obscure and the latter confused and stupid and both of them indefinite and without their appropriate

Adv. Math. i, 21 (p. 603, 12 [Bekker]). From Timaeus 31 в 4-6 taken with 62 c 1-2 it could be inferred that corporeality entails tangibility and tangibility resistance (cf. Proclus, In Platonis Timaeum ii, p. 12, 20-23, p. 13, 2-12, and p. 17, 13-17 [Diehl]); but the explicit assertion that ἀντιτυπία is the distinctive property of corporeality as differentiated from the geometrical solid is Epicurean and Stoic (see page 824, note a on De Comm. Not. 1080 c infra [especially Sextus, Adv. Math. i, 21 and x, 221-222; S. V.F. ii, p. 127, 5-11 and p. 162, 29-31]).

See infra 1017 A (... τινα φανταστικής ... φοράς ... δύναμιν αὐτοκίνητον καὶ ἀξικίνητον) and 1024 A (... τὴν ... φανταστικήν ... κίνησιν ...). Cf. De Sollertia Animalium 960 D (πᾶν τὸ ἔμψυχον αἰσθητικὸν εὐθὺς εἶναι καὶ φανταστικόν cf. πέφυκεν); and for Plutarch's conception of τὸ φανταστικόν cf. Quomodo Quis ... Sentiat Profectus 83 A-c, De Defectu Orac.

437 E, and Coriolanus xxxviii, 4 (232 c).

<sup>7</sup> παραλαβών is from Timaeus 30 A 3-5 (cf. 68 E 1-3), cited by Plutarch at 1016 D infra (see also 1029 E infra and De Defectu Orac. 430 E [...παραλαβών ἔταξε...]).

<sup>9</sup> Cf. Plotinus, Enn. 11, iv, 10, line 30 (τοῦτο νοεῖ ἀμυδρῶς ἀμυδρὸν καὶ σκοτεινῶς σκοτεινὸν . . .); in Timaeus 49 A 3-4 γαλεπὸν καὶ ἀμυδρὸν είδος refers to the receptacle, χώρα.

\* See infra 1015 Ε (ὁπὸ τῆς ἀνοήτου ταραττομένην αἰτίας) and 1026 c (ἐμφαίνεται : . . αὐτῆς τῶ μὲν ἀλόγω τὸ ταραχῶδες).

<sup>1</sup> E, B; ἀπ' αὐτοῦ -e, u, f, m, r, Escor. 72. <sup>2</sup> γεννητών -f, m, r, Escor. 72. 3 Aldine : ¿gri -MSS.

a This idiomatic use of ἀτελές with the genitive is so frequent in Plutarch that its occurrence here is not likely to be a reminiscence of the pun in Phaedrus 248 B 4 (ἀτελεῖς της του όντος θέας) or to have any of the profound significance seen in it by Thévenaz (L'Âme du Monde, p. 18, n. 47).

b Cf. Timaeus, 30 B 4-c 1, 30 D 1-31 A 1, 32 D 1 f., 68 E 1-6, 69 B 8-c 3, 92 c 5-9; with Plutarch's συνήρμοσε cf.

Timaeus 36 Ε 1 (συναγαγών προσήρμοττεν).

· Timaeus 51 A 7 (πανδεχές [cf. 50 B 6: της τὰ πάντα δεχομένης σώματα φύσεως]), 52 Β Ι (έδραν δέ παρέχον όσα έχει γένεσιν πασιν), 49 Α 5-6 (πάσης είναι γενέσεως ὑποδοχὴν αὐτὴν οΐον τιθήνην). It is to describe the rôle of χώρα, itself incorporeal and imperceptible to sense (Timaeus 51 A 4-B 2 and 52 A 8-B 2), that Plato uses these terms; but to Plutarch they are indifferently designations of υλη (see infra 1015 D. 1023 A, 1024 C; cf. Quaest. Conviv. 636 D and De Iside 372 E-F) and, as in this chapter, of corporeality, with which υλη is thus identified (see 1023 A infra: δεξαμενήν . . . έκείνην [scil. σωματικήν ύλην] . . . μαλλον δέ σώμα . . .) and which is taken to have existed in precosmic disorder (see 1017 A infra [οὐχὶ σώματος ἀπλῶς . . . ἦν ὁ θεὸς . . . δημιουργός]; cf. Plat. Quaest. 1003 A supra [... τὸ ἄμορφον σώμα . . . and έκ σώματος ἀτάκτου . . .], and see page 173, note c supra). This precosmic matter Plutarch even calls perceptible (1024 Β infra [τὸ αἰσθητὸν . . . ἦν ἄμορφον καὶ adougray), although he had already insisted that Platonic matter is entirely devoid of quality (1014 r-1015 D infra) and had asserted that van becomes tangible and visible, i.e.

perfection, and he ordered and arrayed and fitted them together, producing from them the living being supremely fair and perfect. So the substance of body is none other than what is called by Plato the omnirecipient nature, abode and nurse of the things that are subject to generation.

6. As for the substance of soul, in the *Philebus* he has called it infinitude d as being privation of number

perceptible body, only when shaped by participation in the intelligible (see 1013 c supra with Plat. Quaest. 1001 D-E). When in [Plutarch], De Placitis 882 c (Dox. Graeci, p. 308 A 4-9 and B 5-9; cf. Theodoret, Graec. Affect. Curatio iv, 13) the Platonic "receptacle" is called ὅλη and characterized as at once corporeal and without quality, it may be an example of the identification of Platonic "primary matter" with the Stoic ἄποιον σῶμα (cf. Simplicius, Phys., p. 227, 23-26=S. V.F. ii, frag. 326). Others, however, who identified the receptacle with  $v\lambda_{\eta}$ , asserted that, being without quality, it is neither corporeal nor incorporeal but potentially corporeal (Albinus, Epitome viii, 3 [Louis]= p. 163, 3-7 [Hermann]; Apuleius, De Platone i, 5=p. 87, 10-20 [Thomas]; Hippolytus, Refutatio i, 19, 3=pp. 19, 13-20, 1 [Wendland]; Chalcidius, Platonis Timaeus, pp. 342, 16-344, 20 [Wrobel]=pp. 314, 17-316, 13 [Waszink]), an expedient obviously borrowed from Aristotle (De Generatione 329 a 33; cf. Areius Didymus, Epitomes Frag. Phys. 2 [Dox. Graeci, p. 448, 3-12] and "Ocellus Lucanus" ii, 6 [24] = p. 16, 22-24 [Harder]).

This assertion (see 1014  $\mathbf{E}$  in  $fra: \dot{\epsilon}v$   $\delta \dot{\epsilon}$  Φιλήβω . . .  $\dot{\epsilon}m$  ειρίαν . . .  $\dot{\epsilon}m$  ψυχῆ) is justified by nothing in the Philebus, not even by Philebus 26  $\mathbf{B}$  6-10 (the limitless appetites of wantonness and vice) or  $27 \mathbf{E}$  1—28  $\mathbf{A}$  4 and  $52 \mathbf{c}$  (pleasures and pains in the class of  $\tau \dot{\epsilon}$   $\delta \dot{\epsilon}m$  ειρον), for the nature of soul is not in question there and such "psychic infinitude" is expressly just one example among many of the  $\delta m$  ειρία in the world (cf. Philebus 16  $\mathbf{c}$  9-10,  $24 \mathbf{a}$  —25  $\mathbf{a}$ ,  $25 \mathbf{c}$  5—D 1). In De E 391  $\mathbf{b}$ - $\mathbf{c}$  the  $\delta m$  ειρον of the Philebus, though taken to correspond to the κίνησις of the Sophist, is said by its com-

bination with the πέρας to constitute πᾶσαν γένεσιν.

(1014) ψεώς τε καὶ ὑπερβολῆς καὶ διαφορᾶς καὶ ἀνομοιότητος ἐν αὐτῆ πέρας οὐδὲν οὐδὲ μέτρον ἔχουσαν ἐν δὲ Τιμαίῳ τὴν τῆ ἀμερίστῳ συγκεραννυμένην φύσει καὶ περὶ τὰ σώματα γίγνεσθαι λεγομένην μεριστὴν οὔτε πλῆθος ἐν μονάσι καὶ στιγμαῖς οὔτε μήκη καὶ πλάτη λέγεσθαι νομιστέον, ἃ σώμασι προσήκει καὶ σωμάτων μᾶλλον ἢ τῆς ψυχῆς ἐστιν, ἀλλὰ τὴν ἄτακτον καὶ ἀόριστον αὐτοκίνητον δὲ καὶ κινητικὴν ἀρχὴν ἐκείνην, ἡν πολλαχοῦ μὲν ἀνάγ-Ε κην ἐν δὲ τοῖς Νόμοις ἄντικρυς ψυχὴν ἄτακτον εἴρηκε καὶ κακοποιόν αὔτη γὰρ ἦν ψυχὴ καθ ἑαυτήν, νοῦ δὲ καὶ λογισμοῦ καὶ ἁρμονίας ἔμφρονος μετέσχεν, ἵνα κόσμου ψυχὴ γένηται. καὶ γὰρ τὸ

Theiler, Aristoteles über die Seele (Berlin, 1959), p. 101 ad 18. 1.

<sup>&</sup>lt;sup>°</sup> As in the Posidonian interpretation of chap. 22 infra (see in 1023 B δεξάμενοι τὴν τῶν περάτων οὐσίαν περὶ τὰ σώματα λέγεσθαι μεριστήν and in 1023 D οὐδὲ γραμμῶν οὐδὶ ἐπιφανειῶν corresponding to μήτε τοῖς πέρασι [see the last note supra]). For the distinction between the arithmetical and the geometrical interpretations cf. Iamblichus in Stobaeus, Ecl. i, 49, 32 (pp. 363, 26–364, 12 [Wachsmuth]) and Proclus, In Platonis Timaeum ii, p. 153, 18-25 (Diehl).

<sup>&</sup>lt;sup>d</sup> Cf. Proclus, In Platonis Timaeum ii, pp. 153, 25-154, 1 (Diehl): . . . μεριστήν μὲν οὐσίαν λέγουσι τὴν ἄλογον προοῦσαν τῆς λογικῆς . . . , καθάπερ Πλούταρχος καὶ 'Αττικός, . . .

and ratio and having in itself no limit or measure of deficiency and excess and difference and dissimilitude; and in the Timaeus that which is blended together with the indivisible nature and is said to become divisible in the case of bodies a must be held to mean neither multiplicity in the form of units and points b nor lengths and breadths, which are appropriate to bodies and belong to bodies rather than to soul, but that disorderly and indeterminate but self-moved and motive principle d which in many places he has called necessity but in the Laws has openly called disorderly and maleficent soul.f This, in fact, was soul in itself 9; but it partook of intelligence and reason and rational concord h that it might become the soul of the universe. For the aforesaid omnireci-

1015 A infra (ὥσπερ ἐν Πολιτικῷ λέγεται . . . ἀνάγκη . . .) with the notes there.

<sup>1</sup> In 1015 E infra Plato is said to have called it ψυχήν έναντίαν καὶ ἀντίπαλον τῆ ἀγαθουργῷ (cf. De Iside 370 F), which is closer to the terminology of Laws 896 p 5—898 c 8 (especially 896 E 5-6, 897 B 3-4, 897 D 1, and 898 c 4-5), the passage that Plutarch has in mind. For his interpretation of it, which Atticus adopted, cf. Proclus, In Platonis Timaeum i, p. 382, 2-12 and p. 391, 8-12 (Diehl); cf. also that of Numenius (p. 94, 6-11 [Leemans]) in Chalcidius, Platonis Timaeus, p. 326, 12-17 (Wrobel) = p. 299, 14-18 (Waszink). In fact, the passages of the Laws envisage no such evil "world-soul" as Plutarch reads into them and lend no support to the identification of evil soul or of soul at all with the "necessity" or with the "divisible being" of the Timaeus (cf. Cherniss, Proceedings of the American Philosophical Society, xcviii [1954], p. 26, n. 29; H. Herter, Rhein. Mus., c [1957], pp. 334-335; H. Görgemanns, Beiträge zur Interpretation von Platons Nomoi [München, 1960], p. 200, n. 1).

 See 1024 A infra: νῦν οὐχ ἀπλῶς ψυχὴν....
 Cf. Timaeus 36 E 6—37 A 1; see 1016 B infra and Plat. Quaest. 1001 c with note a and 1003 A supra.

(1014) πανδεχὲς καὶ ὑλικὸν ἐκεῖνο μέγεθος μὲν ἐκέκτητο καὶ διάστημα καὶ χώραν, κάλλους δὲ καὶ μορφῆς καὶ σχημάτων μετριότητος ἐνδεῶς εἶχεν ἔλαχε δὲ τούτων, ἵνα γῆς καὶ θαλάττης καὶ οὐρανοῦ καὶ ἀστέρων φυτῶν τε καὶ ζώων παντοδαπὰ σώματα καὶ ὄργανα γίγνηται¹ κοσμηθέν. οἱ δὲ τὴν ἐν Τιμαίω λεγομένην ἀνάγκην ἐν δὲ Φιλήβω περὶ τὸ μᾶλλον καὶ ἦττον ἐλλείψεως² καὶ ὑπερβολῆς ἀμετρίαν καὶ ἀπειρίαν τῆ ΰλη προστιθέντες ἀλλὰ μὴ Ε τῆ ψυχῆ, ποῦ³ θήσονται τὸ τὴν ὕλην ἀεὶ μὲν ἄμορφον καὶ ἀσχημάτιστον ὑπ' αὐτοῦ λέγεσθαι καὶ πάσης ποιότητος καὶ δυνάμεως οἰκείας ἔρημον εἰκά-

<sup>&</sup>lt;sup>b</sup> Politicus 273 c 6-n 1.

ing matter from all differentiation and putting the cause of evils at the farthest remove from god, he has written about the universe as follows in the Politicus a: "For it has got from him who constructed it all it has that is fair but from its previous state whatever troubles and iniquities occur in the universe —from that source it has these itself and produces them in its living beings." And a little further on still he says: "But with the passage of time and the setting in of forgetfulness the effect of the ancient discord becomes more potent," b and it is in danger of sinking again "dissolved into the boundless region of dissimilitude." Dissimilitude, however, is not connected with matter, since matter is without quality or differentiation.d Yet from misapprehension shared with many others even Eudemus rallies Plato for not doing right in declaring her to be the cause and principle of evils whom he frequently calls by the name of mother and nurse. In fact, while

d See 1014 F supra with note e there.

<sup>°</sup> Politicus 273 D 6-F 1. In Plato's sentence πάλιν goes with the words that follow (πάλιν ϵ φϵδρος . . . γιγνόμενος) and not with the preceding δύη as in Plutarch's paraphrase, κινδυνεύει . . . δῦναι πάλιν. On the other hand, all the MSS. of Plato like all those of Plutarch have τόπον (cf. also Plotinus, Enn. 1, viii, 13, lines 16-17; Eusebius, Praep. Evang. xi, 34, 4) and not the πόντον adopted by Burnet, Taylor, and Diès on the authority of Proclus and Simplicius (cf. the articles listed in Lustrum, iv [1959], p. 148 [# 746] and v [1960], p. 602 [# 1987]).

<sup>&</sup>lt;sup>e</sup> Eudemus, frag. 49 (Wehrli); cf. U. Schöbe, Quaestiones Eudemeae (Diss. Halle, 1931), pp. 43-45 and Cherniss, Aristotle's Criticism of Plato..., note 62 (pp. 95-97, especially p. 97). Eudemus is called by Simplicius (Phys., p. 411, 15-16; cf. p. 133, 21-22) the most genuine disciple of Aristotle.

(1015) νοντος. ὁ γὰρ Πλάτων μητέρα μὲν καὶ τιθήνην καλεῖ Ε τὴν ὕλην αἰτίαν δὲ κακοῦ τὴν κινητικὴν τῆς ὕλης καὶ περὶ τὰ σώματα γιγνομένην μεριστὴν ἄτακτον καὶ ἄλογον οὐκ ἄψυχον δὲ κίνησιν, ῆν ἐν Νόμοις ὥσπερ εἴρηται ψυχὴν ἐναντίαν καὶ ἀντίπαλον τῆ ἀγαθουργῷ προσεῖπε. ψυχὴ γὰρ αἰτία κινήσεως καὶ ἀρχή, νοῦς δὲ τάξεως καὶ συμφωνίας περὶ κίνησιν. ὁ γὰρ θεὸς οὐκ ἀνέστησε τὴν ὕλην ἀργοῦσαν ἀλλ' ἔστησεν ὑπὸ τῆς ἀνοήτου ταραττομένην¹ αἰτίας οὐδ' ἀρχὰς τῆ φύσει μεταβολῆς καὶ παθῶν παρέσχεν, ἀλλ' οὕσης ἐν πάθεσι παντοδαποῖς καὶ μεταβολαῖς ἀτάκτοις ἐξεῖλε τὴν πολλὴν ἀοριστίαν καὶ πλημμέλειαν άρμονία καὶ ἀναλογία καὶ ἀριθμῷ χρώμενος ὀργάνοις, ὧν ἔργον ἐστὶν οὐ μεταβολῆ καὶ κινήσει² Γ ἐτερότητος πάθη καὶ διαφορᾶς³ παρέχειν τοῖς

## GENERATION OF THE SOUL, 1015-1016

diversity and difference a but rather to make them inerrant and stable and similar to the entities that are invariably identical. Such, then, in my opinion

is Plato's meaning.

8. A first proof of it is that it resolves what is called and seems to be his inconsistency and selfcontradiction. b For one would not attribute even to a drunken sophist and it is nonsense then to attribute to Plato in regard to the doctrines about which he had been most seriously concerned such confusion and capriciousness as to declare of the same entity both that it is unsubject to generation and that it did come to be, in the Phaedrus that the soul is unsubject to generation and in the Timaeus that it came to be.c Now, almost everyone has at the tip of his tongue the discourse in the Phaedrus d confirming the soul's indestructibility by the fact that it is not subject to generation and its not being subject to generation by the fact that it is self-moved; but in the Timaeus e he says: "The soul, however, now later in the account that we are attempting, was not thus junior also in god's devising-for he would not have permitted the senior of those that he had coupled to be ruled by the junior -. but we, as we

(Diehl); Chalcidius, *Platonis Timaeus*, pp. 91, 9-12 and 92, 3-11 (Wrobel) = pp. 76, 10-12 and 77, 13-20 (Waszink).

<sup>e</sup> Timaeus 34 B 10—35 A I. See 1013 F supra and the notes there; and observe that Plutarch in his quotation here stops short of  $\epsilon_{\kappa}$  τῶνδε..., which modifies συνεστήσατο

in Timaeus 35 A 1.

<sup>&</sup>lt;sup>a</sup> Phaedrus 245 c 5—246 A 2. With Plutarch's summary of the argument here cf. Albinus, Epitome xxv, 4 (p. 121, 3-6 [Louis] = p. 178, 12-15 [Hermann]); Hermias, In Platonis Phaedrum, p. 115, 1-3 (Couvreur); and Macrobius, In Somnium Scipionis 11, xiii, 12.

<sup>&</sup>lt;sup>a</sup> Timaeus 36 E 3-4. Plutarch stops short of πρός τὸν αύμπαντα χρόνον which in the Timaeus follows ἔμφρονος βίου.
<sup>b</sup> Timaeus 36 E 5—37 A 2.

partake largely of the casual and random, express ourselves in this way too, whereas he constructed the soul prior (and senior) to body in generation and excellence to be mistress and ruler of it as her subject." And again, after having said a that "herself revolving within herself she made a divine beginning of ceaseless and rational life," he says b: "So the body of heaven has come to be visible; but soul herself, invisible but participant in reason and concord, is become best of the things generated by the best of intelligible and everlasting beings." a For here he has called god best of everlasting beings but the soul best of the things generated, and by this most manifest distinction and opposition he has removed from her the character of being everlasting and ungenerated.

9. What way of adjusting these statements e is there, then, other than what he provides himself for those who will accept it? For unsubject to generation is said of the soul that before the generation of the universe keeps all things in disorderly and jangling motion, but come to be and so subject to

<sup>o</sup> See supra 1014 E and note h there.

<sup>d</sup> What follows shows that Plutarch construed the passage in this way, the second of the three ways considered by Proclus (In Platonis Timaeum ii, p. 294, 1-18 [Diehl]); see also Plat. Quaest. 1002 B (δ γὰρ θεὸς ἐν τοῖς νοητοῖς) with note d on page 42.

doubt, and ready to hand a before the generation of the universe; but, when again he says that b body has come to be junior to soul and that c the universe is subject to generation because it is visible and tangible and has body and such things had been shown to be in process of becoming and subject to generation, it is clear to everyone that he attributes a genesis to the nature of body.d Nevertheless, he is far from contradicting himself and being so manifestly at odds with himself in matters of the greatest moment, for it is not in the same way and not the same body that he says is brought into being by god and exists before it came to be; it takes a downright sot e for that, whereas he himself explains the sense in which the genesis too must be understood. "For before this," he says, " all these were without ratio or measure; and, when it was undertaken to reduce the sum of things to order, fire first and water and earth and air, while having some traces of themselves, were nevertheless in the very condition that is likely to be the state of everything

<sup>&</sup>lt;sup>a</sup> Cf. Plutarch, De Facie 926 r (L.C.L. xii, p. 84, note b); but there the absence of god is said to mean absence of 206

## GENERATION OF THE SOUL, 1016-1017

whenever god is absent from it,a and so, this being then their natural state, god first gave them definite shape with figures and numbers." Still earlier, after saying that b it took not one proportion but two to bind together the mass of the sum of things since it is a solid and has depth and after explaining that c god put water and air between fire and earth and so bound together and constructed the heaven.d he says e: "from these, being such in kind and four in number, was the body of the universe engendered consentient through proportion, and from these it acquired amity so that banded in union with itself it came to be indissoluble by others than by him who had bound it together." So he most manifestly teaches that god was father and artificer not of body in the absolute sense, that is to say not of mass and matter, but of symmetry in body and of beauty and similarity.<sup>9</sup> This, then, is what one must suppose in

νοῦς καὶ ψυχή, whereas here it is assumed to be absence of νοῦς only with ψυχὴ καθ' ἐαυτήν (see 1014 Ε, note g supra), i.e. irrational soul, present and moving the precosmic chaos (see supra 1016 c with note f there and Plat. Quaest. 1003 A, note h).

<sup>b</sup> Timaeus 32 A 7-B 3.
<sup>c</sup> Timaeus 32 B 3-7.

<sup>d</sup> In fact Plato says συνεστήσατο οὐρανὸν ὁρατὸν καὶ ἀπτόν (Timaeus 32 в 7-8; cf. 31 в 4-8 and 36 ε 5-6 [quoted in 1016 в supra]), although in Timaeus 30 λ 3-5 (see 1016 в supra) the supposed precosmic chaos had been called ὁρατόν and Plutarch asserts that the tangibility of body was not created by the demiurge (1014 c supra with note d there).

· Timaeus 32 B 8-c 4.

<sup>&</sup>quot;Dans tout ce passage (scil. chap. 9) Plutarque applique aussi à l'âme ce que Platon ne disait que du corps." Plutarch in fact here abandons the literal interpretation that he professes to maintain, for the Timaeus speaks not of a precosmic soul regulated or organized by the demiurge but of soul produced by him "substance" and all (cf. Proclus, In Platonis Timaeum i, p. 383, 25-31 and ii, p. 119, 10-24 [Diehl] with insistence upon the  $\ell\kappa$   $\tau\hat{\omega}\nu\delta\epsilon$ ..., omitted by Plutarch in 208

the case of soul also,<sup>a</sup> that, whereas the one <sup>b</sup> neither was brought into being by god nor is the soul of the universe <sup>c</sup> but is a certain self-moved and so perpetually activated potency <sup>a</sup> of imaginative and opinionative but irrational and disorderly transport and impulse,<sup>c</sup> the other was regulated by god himself with the appropriate numbers and ratios <sup>f</sup> and then being generated was installed by him as chief <sup>g</sup> of the universe that had come to be.

10. That this is what he really thought about these matters and that he was not for the sake of examination supposing in like manner a composition and generation of the soul and of the universe which has come to be,<sup>h</sup> of this a strong indication in addition to many is the notorious fact that, while, as has been said,<sup>i</sup> he speaks of the soul both as ungenerated and his quotation of *Timaeus* 34 B 10—35 A 1 [see *supra* page 199, note e]).

<sup>1</sup> 1016 A supra (. . . όμοῦ καὶ ἀγένητον . . . καὶ γενομένην, ἀγένητον μὲν ἐν Φαίδρω τὴν ψυχὴν ἐν δὲ Τιμαίω γενομένην). Resolved by Plutarch in his fashion in 1016 c supra (chap. 9 init.), this was used by Proclus (In Platonis Timaeum i, p. 287, 18-23 [Diehl]) as evidence that Plato in the Timaeus could call the universe γενητόν also though holding it to be ἀγένητον κατὰ χρόνον.

(1017) καὶ γενητὴν λέγεσθαι τὸν δὲ κόσμον ἀεὶ μὲν γεγονότα καὶ γενητὸν ἀγένητον δὲ μηδέποτε μηδ' ἀίδιον. τὰ μὲν οὖν ἐν Τιμαίω τί δεῖ προφέρειν;¹ ὅλον γὰρ καὶ πᾶν τὸ σύγγραμμα περὶ κόσμου γενέσεως ἄχρι τέλους ἀπ' ἀρχῆς² ἐστι. τῶν δ' ἄλλων C ἐν μὲν ᾿Ατλαντικῷ προσευχόμενος ὁ Τίμαιος ὀνομάζει τὸν πάλαι μὲν ἔργω γεγονότα νῦν δὲ λόγω³ θεόν, ἐν Πολιτικῷ δὲ ὁ Παρμενίδειος ξένος τὸν κόσμον ὑπὸ τοῦ θεοῦ συντεθέντα φησὶ πολλῶν ἀγαθῶν μεταλαβεῖν, εἰ δέ τι φλαῦρόν ἐστιν ἢ χαλεπόν, ἐκ τῆς προτέρας ἔξεως ἀναρμόστου καὶ ἀλόγου συμμεμιγμένον ἔχειν· ἐν δὲ τῆ Πολιτεία περὶ τοῦ ἀριθμοῦ, ὅν γάμον ἔνιοι καλοῦσιν, ὁ Σωκράτης ἀρχόμενος λέγειν '' ἔστι δέ'' φησι '' θείω μὲν γενητῷ 'περίοδος ἡν ὁ ἀριθμὸς περιλαμβάνει

b Critias 106 A 3-4: τῷ δὲ πρὶν μὲν πάλαι ποτ' ἔργῳ νῦν

a Contrast Joannes Lydus, De Mensibus iii, 3 (p. 38, 13-16 [Wuensch]). What Plutarch here states as a fact (cf. Philoponus, De Aeternitate Mundi vi, 24 [pp. 199, 26–200, 3, Rabe]), taking it to be compatible with his previous assertion that Plato  $\tau \delta$  σῶμα  $\tau ο 0$  κόσμου  $\pi \hat{\eta}$  μὲν ἀγένητον ἀποφαίνει  $\pi \hat{\eta}$  δὲ γενητόν (1016 D supra with note f there), would have been denied by those who read Timaeus 27 c 5 in the way reported and rejected by Proclus (In Platonis Timaeum i, p. 219, 13-18 [Dichl]); and it would be untrue also if Timaeus 40 B 5 in the version of Λ, adopted by modern editors, were surely right, but the ἀίδια there used of the "fixed stars" was not in the texts read by Cicero, Proclus, and Chalcidius and so may not have been in that known to Plutarch.

as generated, he always speaks of the universe as having come to be and as generated and never as ungenerated or everlasting.a As to the Timaeus, what need to cite passages in it? For the whole work in its entirety from beginning to end is about the generation of the universe. Among his other writings, however, in the Account of Atlantis Timaeus invokes by name the god that in fact of old but now in word has come to be, b and in the Politicus the Parmenidean Stranger says c that the universe constructed by god partook of much good and that anything defective or troublesome in it is an ingredient retained from its prior discordant and irrational state; and in the Republic Socrates, when he begins to speak about the number that some call Nuptial, says: "A divine object of generation has a period that is comprised by a perfect number," e

δὲ λόγοις ἄρτι θε $\hat{\omega}$  γεγονότι προσεύχομαι (cf. P. Frutiger, Les Mythes de Platon, p. 209, n. 1 and p. 195, n. 2 on Timaeus 20 p. 7 and 26 p. 4-5). Plutarch's transposition of the words tends to diminish their ambiguity and so may not have been unintentional.

<sup>c</sup> Cf. Politicus 269 D 8-9 and 273 B 4-D 1 (see 1015 c-D

supra [chap. 7 init.]).

<sup>a</sup> Republic 546 b 3-d 3. With Plutarch's expression here cf. Nicomachus, Arithmetica Introductio 11, xxiv, 11 (p. 131, 8-9 [Hoche]): κατὰ τὸν τοῦ λεγομένου γάμου τόπου ἐν τῆ Πολιτεία. . . . Iamblichus refers to the passage as τὸν ἐν τῆ Πλάτωνος πολιτεία γαμικὸν ἀριθμόν (In Nicomachi Arithmeticam Introductionem, p. 82, 20-21 [Pistelli]), and Plutarch himself in De Iside 373 f speaks of τὸ γαμήλιον διάγραμμα there formulated.

• Republic 546 B 3-4. In 1018 c infra Plutarch says that six is  $\tau \epsilon \lambda \epsilon \iota os$  and is called  $\gamma \dot{\alpha} \mu os$  but does not suggest any connexion between that and this sentence of Plato's, the  $\dot{\alpha} \rho \iota \theta \mu \dot{o}s \tau \dot{\epsilon} \lambda \epsilon \iota os$  of which is not the "nuptial number" any-

way but is distinguished from it.

p. 394 and p. 407]) but is a warning against the common association of ἀμερές and ἐλάχιστον (cf. Xenocrates, frag. 51 [Heinze]; Alexander, Metaph., p. 247, 22-24; Simplicius, Categ., p. 39, 12-16) and, as is indicated by Plat. Quaest. 1002 c-0 (see note b there), was probably suggested by such misleading expressions as ἡ ἀμέριστος οὐσία · · · ἐστιν εἰς βραχὸ συνηγμένη · · · (Plat. Quaest. 1001 d): cf. the warning against taking indivisibly one to mean ἐν ὡς ἐλάχιστον (Damascius, Dub. et Sol., pp. 2, 24–3, 2 [Ruelle] = Speusippus, frag. 36 [Lang] and Anon. in Platonis Parmenidem 1, 20-24=Rhein. Mus., xlvii [1892], p. 602=P. Hadot, Porphyre

et Victorinus ii [Paris, 1968], p. 66).

<sup>a</sup> Cf. the characteristics ascribed to the νοῦς of Anaxagoras by Plutarch (Pericles iv, 6 [154 c]) and by Aristotle (Physics 256 b 24-25; De Anima 405 a 16-17, 405 b 19-21, 429 b 23-24) and by the latter to his own νοῦς ποιητικός (De Anima 430 a 17-18); and for Plutarch himself see infra 1024 a (τὸ γὰρ νοερὸν · · · ἀπαθὲς · · ·) and 1026 D (· · · ἔκ τε τῆς θείας καὶ ἀπαθοῦς · · ·) and De Facie 945 c-D (ὁ δὲ νοῦς ἀπαθής). In Plat. Quaest. 1002 c-D ἀπλοῦν καὶ εἰλικρινὲς καὶ καθαρὸν ἀπάσης ἐτερότητος καὶ διαφορᾶς (= μονοειδές here) characterizes the incorporeal and intelligible (as does ἀπαθές in Amatorius 765 a, τὰ νοητὰ · · · τῆς ἀσωμάτου καὶ ἀπαθοῦς οὐσίας είδη), but Plutarch treats νοῦς itself as a νοητόν (see note g on Plat. Quaest. 1002 c and note b on 1002 ε supra).

simplicity and impassivity and purity and uniformity of it a that is meant by its being without parts and indivisible, that with which when it somehow just touches b objects composite and divisible and differing it puts a stop to their multiplicity and reduces it to a state that is single through similarity. As to the being that becomes divisible in the case of bodies, if anyone should wish to call it matter homonymously in the sense of a nature underlying the former and capable of participating in it, this use of the term makes no difference to the meaning; but those who maintain that corporeal matter is mixed with the indivisible being are utterly mistaken, first because

b Cf. Timaeus 37 A 5-6 (ὅταν . . . ἐφάπτηται . . .) and Aristotle's criticism (De Anima 407 a 15-18) as well as his own use of the metaphor (Metaphysics 1072 b 20-21 and 1051 b 24-25); cf. also Theophrastus, Metaph. 9 B 13-16 and Speusippus, frag. 30, 10-11 (Lang) and among the many later occurrences especially Hermias, In Platonis Phaedrum, p. 64, 15-17 (Couvreur).

<sup>°</sup> Cf. Themistius, Anal. Post., p. 64, 18-20 (τὴν δὲ καθόλου ἐπιφορὰν ὁ νοῦς ποιήσεται. τούτου γὰρ ἔργον ἤδη τὰ πολλὰ ἐνοῦν καὶ τὰ ἄπειρα, ὅπερ φησὶ Πλάτων, πέρατι συνδήσασθαι [Philebus 27 p 9]) and at 1025 c infra the description of the function of "sameness": ὧν ἄν ἄψηται . . . συνάγειν καὶ συνιστάναι διὰ ὁμοιότητος ἐκ πολλῶν μίαν ἀναλαμβάνοντος μορφὴν καὶ δύναμιν.

<sup>d</sup> So Plutarch himself has called it: see 1013 c supra with note e on page 203 supra and cf. De Iside 374 E (την

ψυχὴν . . . . ώς ὕλην . . . τῷ λόγω . . . παρέχομεν).

\* See 1013 B-C supra with note c there. So here Crantor, while not the only one (see note d on 1022 E supra), is, however unjustifiably and Schwyzer to the contrary notwithstanding (Rhein. Mus., Ixxxiv [1935], p. 362), one among those whom Plutarch has in mind. In addition to the subsequent arguments of Plutarch's see the one adduced against Eratosthenes by Proclus (In Platonis Timaeum ii, p. 152, 28-29 [Diehl]): κράσις γὰρ οὐκ ἄν ποτε γένοιτο . . . ἀμερίστου καὶ σώματος.

1023 τάνουσι, πρώτον μέν¹ ὅτι τῶν ἐκείνης ὀνομάτων οὐδενὶ νῦν ὁ Πλάτων κέχρηται (δεξαμενὴν γὰρ εἴωθε καὶ πανδεχῆ καὶ τιθήνην ἀεὶ καλεῖν ἐκείνην, οὐ περὶ τὰ σώματα μεριστὴν μᾶλλον δὲ σῶμα μεριζόμενον εἰς τὸ καθ' ἔκαστον) ἔπειτα τί διοίσει τῆς τοῦ κόσμου γενέσεως ἡ² τῆς ψυχῆς, εἴπερ ἀμφοτέροις ἔκ τε τῆς ὕλης καὶ τῶν νοητῶν γέγονεν ἡ σύστασις; αὐτός γε μὴν ὁ Πλάτων, ὥσπερ ἀπωθούμενος³ τῆς ψυχῆς τὴν ἐκ σώματος γένεσιν, ἐντὸς αὐτῆς φησιν ὑπὸ τοῦ θεοῦ τεθῆναι τὸ σωματικὸν εἶτ' ἔξωθεν ὑπ' ἐκείνης περικαλυφθῆναι⁴ καὶ Β ὅλως ἀπεργασάμενος τῷ λόγω τὴν ψυχὴν ὕστερον⁵ ἐπεισάγει τὴν περὶ τῆς ὕλης ὑπόθεσιν, μηδὲν αὐτῆς πρότερον ὅτε τὴν ψυχὴν ἐγέννα δεηθείς, ὡς χωρὶς ὕλης γενομένην.

22. "Ομοια δὲ τούτοις ἔστιν ἀντειπεῖν καὶ τοῖς περὶ Ποσειδώνιον. οὐ γὰρ μακρὰν τῆς ὕλης ἀπέστη-

 περικεκαλυφθῆναι -r.
 ὕστερος -u.

<sup>a</sup> See page 213, note c supra; and for νῦν in this sense see 1024 A infra, Plat. Quaest. 1009 c supra, and J. H. Quincey (J.H.S., lxxxvi [1966], p. 149, n. 17) on Moralia 22 F.

b δεξαμενή occurs in Timaeus 53 A 3 (cf. Plutarch, De Iside 374 B; [Plutarch], De Placitis 882 c=Dox. Graeci, p. 308 A 4-9 and B 5-9), πανδεχές in Timaeus 51 A 7, and τιθήνη in Timaeus 49 A 6, 52 D 5, 88 D 6. See pages 185, note c and 197, note a supra.

° This last (cf. De Defectu Orac. 429 Β, εἰς πλείονα μέρη τοῦ αἰσθητοῦ καὶ σωματικοῦ μεριζομένου διὰ τὴν σύμφυτον ἀνάγκην τῆς ἐτερότητος) is implicitly denied by Plato in Timaeus 51  $_{\Lambda}$  4-7, where the receptacle is declared to be "not earth or air or fire or water μήτε ὅσα ἐκ τούτων μήτε ἐξ ὧν ταῦτα γέγονεν."

Plato in the present passage a has used none of the names for the former (for that it is his custom always to call receptacle and omnirecipient and nurse, b not divisible in the case of bodies but rather body that is divided into particularity c) and secondly wherein would the generation of the soul differ from that of the universe if both have had as constituents of their composition matter and the intelligibles? d In any case, Plato himself, as if warding off from soul the coming to be out of body, says that the corporeal was placed by god within her and then enveloped with her on the outside e; and, quite generally, it is after having produced the soul in his account that he introduces in addition the theory about matter,f having had no need of it before when he was generating the soul, as it presumably came to be apart from matter.

22. Similar objections can be made also to Posidonius and his followers. For they did not withdraw

<sup>d</sup> See 1013 B-c and note e on 1022 F supra.

• Timaeus 34 B 3-4 and 36 D 9-E 3 (cf. Cherniss, Aristotle's Criticism of Plato . . ., pp. 406-407 and n. 334), and see

supra Plat. Quaest. 1002 B-c with note f there.

7 Plutarch means the account of the receptacle, which is introduced at *Timaeus* 48 E 2—49 A 6; but he conveniently forgets both the earlier treatment of the corporeality of the universe (31 B 4—32 c 4), to which he had himself referred at 1016 F—1017 A supra, and the warning about the sequence given in *Timaeus* 34 B 10—35 A 1 and quoted by himself at 1016 A-B supra (cf. Helmer, De An. Proc., p. 15 and Cherniss, Aristotle's Criticism of Plato..., pp. 424-425).

of For this chapter (=F 141 a [Edelstein-Kidd]) of. especially Thévenaz, L'Ame du Monde, pp. 63-67 and in P. Merlan's last extensive treatment, Platonism to Neoplatonism, pp. 34-58, the bibliography on pp. 55 and 57, to which add Marie Laffranque, Poseidonios d'Apamée (Paris, 1964), pp. 373-374, pp. 379-380, and pp. 431-432. The

(1023) σαν, αλλά δεξάμενοι την των περάτων οὐσίαν περὶ τὰ σώματα λέγεσθαι μεριστην καὶ ταῦτα τῷ νοητῷ μίξαντες ἀπεφήναντο την ψυχην ιδέαν εἶναι τοῦ πάντη διαστατοῦ κατ' ἀριθμὸν συνεστώσαν άρμο
απέστησαν την ψυχην -Epitome 1030 ε infra.

phrase τοις περί Ποσειδώνιον (cf. Wyttenbach, Animadversiones on De E 385 A) might of itself mean only "Posidonius" (so Turnebus, Xylander, and Amyot) or only his pupils or "circle" (cf. Laffrangue, op. cit., p. 379, n. 37); but, as by οί περί τον Κράντορα (1012 F supra) after οί δέ Κράντορι . . . προσέθεντο, μιγνύντι . . . (1012 p supra) Plutarch must have meant "Crantor and his followers," so here too he probably meant to refer both to Posidonius himself and to his followers. His immediate source for the subsequent Posidonian interpretation, then, may have been something by one of those followers such as the work of Phanias (cf. Diogenes Laertius, vii, 41) or even the work by Eudorus that seems to have been his source for the interpretations given by Xenocrates and Crantor (see note c on 1012 E and note c on 1013 B supra; cf. P. Merlan, Philologus, lxxxix [1934], p. 211 and Helmer, De An. Proc., p. 17, n. 22). Such use of a secondary source, however, would not of itself prove that he did not know the original as well (cf. W. Crönert's observation concerning Galen, Gnomon, vi [1930], p. 155).

a i.e. so interpreting τῆς αδ περὶ τὰ σώματα γιγνομένης μεριστῆς (οὐσίας) of Timaeus 35 a 2-3, which, contrary to Marie Laffranque's assertion (op. cit., p. 379), is tantamount to saying that the following definition is "une glose posidonienne du Timée," though not that it stood in a "commentary" on the Timaeus. For the controversy about the existence of such a commentary see L. Edelstein, A.J.P., lyii (1936), p. 304, n. 72; E. Bickel, Rhein. Mus., N.F. ciii (1960), pp. 8-10; K. Abel, Rhein. Mus., N.F. cvii (1964).

pp. 371-373.

Neoplatonism, p. 38) calls this "Plutarch's somewhat careless reference to 'the substance of the limits,' 'i.e. την των περάτων οὐσίαν, and insists that this phrase means "that which is within the πέρατα," "the kind of being which 'has' or 'accepts' limits," οὐσία itself being "the πεπερασμένον

far from matter; but, having taken divisible in the case of bodies to mean <sup>a</sup> the being of the limits and having mixed these <sup>b</sup> with the intelligible, they declared the soul to be the idea of what is everyway extended, <sup>c</sup> herself constituted according to number

without its limits," that is, in fact, for a Stoic  $\Im \lambda \eta$ . This cannot be what the phrase meant to Plutarch, however, any more than  $\tau \eta s \psi \nu \chi \eta s \dots \tau \eta \nu$  ovaiav a few lines below means "the kind of being that 'has' or 'accepts' soul," for his first refutation of the Posidonians explicitly assumes that in their interpretation of the psychogony they use the limits themselves (τοις των σωμάτων πέρασιν [1023 c infra]) and not any "substance of the limits" in Merlan's sense, while at the beginning of the next chapter again (1023 p infra) the two constitutive factors of soul ascribed to them are the intelligible and the limits tout court (τοῖς πέρασι). Nor does this leave unexplained, as Merlan contends it would do, Plutarch's imputation of "materialism" to the Posidonians, for it has already been said in reference to their interpretation (1014 D supra, page 187, note c) that the nature said in the Timaeus to become divisible in the case of bodies must not be held to be μήκη καὶ πλάτη . . . ά σώμασι προσήκει καὶ σωμάτων μαλλον ἢ τῆς ψυχῆς ἐστιν. Whether Plutarch's imputation is justified is another question. He knew that according to the Stoics limits are incorporeal (De Comm. Not. 1080 E infra) but probably knew also that, while existing only in thought for the Stoics (S. V.F. ii, frag. 488), they exist in reality (καθ' ὑπόστασιν) as well for Posidonius (Diogenes Laertius, vii, 135); and, since according to the latter being that is κατὰ τὴν ὑπόστασιν differs from matter only in thought (Dox. Graeci, p. 458, 10-11), one might reasonably suppose that for him the limits, which exist in reality, must also be material.

<sup>c</sup> So much of the definition is identical with that ascribed by Iamblichus to Speusippus (frag. 40 [Lang]); in an obviously Stoic version it is ascribed to Plato himself (Diogenes Laertius, iii, 67: ἐδέαν τοῦ πάντη διεστῶντος πνεύμανος [cf. ibid. vii, 157: soul is πνεῦμα ἔνθερμον for Posidonius et al.]); and the first word by itself, idea, is the Posidonian definition in the list given by Macrobius (In Somnium

(1023) νίαν περιέχοντα τά τε γὰρ μαθηματικὰ τῶν πρώτων νοητῶν μεταξὺ καὶ τῶν αἰσθητῶν τετάχθαι, τῆς τε ψυχῆς, τῶν νοητῶν τὸ ἀίδιον καὶ τῶν αἰσθη

Scipionis I, xiv, 19). That Plutarch took idéa to mean a Platonic "idea" is clear from his second refutation (1023 c infra: ἀτοπώτερον δέ...); but that it was not so meant is equally clear if, as he here reports, the soul according to the Posidonians has her being between the intelligibles and the perceptibles. The word is used in Timaeus 35 A 7 itself and not in the sense of "idea" (see 1012 c supra with note b there), as Plutarch himself knew (see 1025 B infra: ... τὸ πᾶν . . . τῆς ψυγῆς είδος); and that passage of the Timaeus whether directly or through Speusippus is the source of its use in the Posidonian definition, where, if the exegesis of Plato was meant to be Posidonian doctrine as well, the meaning intended was "rational configuration" (cf. Proclus, In Primum Euclidis El. Lib., p. 143, 8-21 [Friedlein]: ... τον λόγον τοῦ σχήματος . . . αἴτιον . . . τῆς περιοχῆς with L. Edelstein, A.J.P., lvii [1936], p. 303) of the tridimensional (for πάντη [cf. Timaeus 36 E 2: πάντη διαπλακεῖσα] = τριχῆ cf. Aristotle, De Caelo 268 a 7-10 and 24-28 with Simplicius, De Caelo, p. 9, 17-29; Philo Jud., De Opificio Mundi 36=i, p. 11, 9-10 [Cohn]). As to the intention of Speusippus see 220

that embraces concord,<sup>a</sup> for (they said) the mathematicals have been ranked between the primary intelligibles and the perceptibles <sup>b</sup> and it is an appropriate thing for the soul likewise, possessing as she does the everlastingness of the intelligibles and the passivity of the perceptibles,<sup>c</sup> to have her being in the middle.<sup>a</sup> In fact these people too failed to notice that only later, after the soul has already been produced, does god use the limits of the bodies for the shaping of matter <sup>c</sup> by bounding and circumscribing its dispersiveness and incoherence with the surfaces made of the triangles fitted together.<sup>f</sup>

Cherniss, Aristotle's Criticism of Plato..., pp. 509-511 and The Riddle, pp. 73-74 with the rejoinder by Merlan, Platonism to Neoplatonism, pp. 40-48 and p. 56.

<sup>a</sup> See 1013 c supra with note b on page 174.

b Cf. Timaeus 38 A 3 (τὸ δὲ ἀεὶ κατὰ ταὐτὰ ἔχον ἀκινήτως) and Aristotle, Topics 148 a 20-21 (ἀπαθεῖς γὰρ καὶ ἀκίνητοι

. . . ai iδέαι . . .).

<sup>c</sup> Cf. Symposium 211 ε 1-3 (... εἰλικρινές, καθαρόν, ἄμεικτον ...), Phaedrus 247 c 6-7, and Timaeus 52 a 1-4 (... οὕτε αὐτὸ εἰς ἄλλο ποι ἰόν, ... ἀναίσθητον). The ideas are "separate," by which is meant τὸ ἀμιγὲς πάσης ὕλης καὶ μηδενὶ παθητῷ συμπεπλεγμένον (Dox. Graeci, p. 304 a 6-8 and b 27-31; cf. Olympiodorus, In Platonis Phaedonem, pp. 103, 25–104, 2 [Norvin]).

d Cf. suvép fas in Timaeus 34 c 2, quoted in 1016 B supra, where the soul is mistress of the body, so that the verb here is not likely, as Thévenaz supposes  $(L'\widehat{A}me\ du\ Monde,$  p. 26, n. 121), to refer to the notion that the body is the prison of the soul, the less so since the envelopment of the corporeal by the world-soul has just been emphasized by

Plutarch (1023 A supra with note e there).

c Cf. Timaeus 28 A 6-в 2, 28 с 6-29 A 6, 37 с 6-D 1,

and 39 E 3-7 with Plutarch, Quaest. Conviv. 720 B-c.

f See 1014 c and 1016 c supra and 1027 A infra, but

What is more absurd, however, is to make the soul an idea, for the former is perpetually in motion <sup>a</sup> but the latter is immobile <sup>b</sup> and the latter cannot mix with the perceptible <sup>c</sup> but the former has been coupled with body <sup>a</sup>; and, besides, god's relation to the idea is that of imitator to pattern <sup>e</sup> but his relation to the soul is that of artificer to finished product.<sup>f</sup> As to number, however, it has been stated above <sup>g</sup> that Plato regards the substance of soul not as number either but as being ordered by number.

23. It is an argument against both of these in common, moreover, that neither in limits nor in numbers is there any trace of that faculty with which the soul naturally forms judgments of what is notice also Plat. Quaest. 1001 c (... οὐκ ἔργον ἐστὶ τοῦ θεοῦ

μόνον άλλὰ καὶ μέρος . . .).

In 1013 c-D supra (see page 175, note c). By this reference Plutarch cannot mean, as both Helmer (De An. Proc., p. 18 [3]) and Thévenaz (L'Âme du Monde, p. 67) think he must, that the earlier refutation of Xenocrates is somehow applicable to the Posidonian definition too, for, as Thévenaz himself remarks, κατ' ἀριθμὸν συνεστῶσαν in this definition (1023 B supra) corresponds to κατ' ἀριθμον συνεστάναι (1013 p supra), which Plutarch used in refuting the Xenocratean identification of soul with number. He recurs to Xenocrates now because, as the Posidonian definition unlike the Xenocratean was obnoxious to the charge of materialism brought against others in the preceding chapter, so both the Xenocratean and the Posidonian are open to quite different objections about to be advanced in the subsequent chapter, where, as will be seen, the two interpretations are referred to as distinct despite the common defect imputed to them.

h i.e. the Posidonians and the Xenocrateans. Thévenaz (L'Âme du Monde, p. 27, n. 124) adopts from the Epitome 1031 B the erroneous reading ἀμφοτέροις τούτοις and so cannot account for κοινόν, which in his translation is omitted or

disguised as " il va de soi."

(1023) ή ψυχὴ πέφυκε κρίνειν. νοῦν μὲν γὰρ αὐτῆ καὶ (τὸ) νοητὸν ή της νοητης μέθεξις ἀρχης έμπεποίηκε· δόξας δὲ καὶ πίστεις καὶ τὸ φανταστικὸν καὶ τὸ παθητικὸν ὑπὸ τῶν περὶ τὸ σῶμα ποιοτήτων, τοῦτ' οὐκ ἄν τις ἐκ μονάδων οὐδὲ γραμμῶν οὐδ' ἐπιφανειῶν ἀπλῶς νοήσειεν ἐγγιγνόμενον. καὶ μὴν οὐ μόνον αἱ τῶν θνητῶν ψυχαὶ γνωστικὴν τοῦ αίσθητοῦ δύναμιν ἔχουσιν, ἀλλὰ καὶ τὴν τοῦ Ε κόσμου φησίν ανακυκλουμένην αὐτὴν πρὸς έαυτήν, όταν οὐσίαν σκεδαστὴν ἔχοντός τινος ἐφάπτηται καὶ ὅταν ἀμέριστον, λέγειν κινουμένην διὰ πάσης  $\dot{\epsilon}$ αυτ $\hat{\eta}$ s, ὅτ $\omega$  τ' ἄν τι $^{10}$  ταὐτ $\dot{\epsilon}$ ν  $\hat{\eta}$  $^{11}$  καὶ ὅτου $^{12}$  αν έτερον, πρὸς ὅ τι τε μάλιστα καὶ ὅπη καὶ ὅπως¹³ συμβαίνει κατὰ τὰ γιγνόμενα<sup>14</sup> πρὸς ἕκαστον

perceptible.<sup>a</sup> Intelligence and intelligibility have been produced in her by participation in the intelligible principle b; but opinions and beliefs, c that is to say what is imaginative and impressionable by the qualities in body, there is not anyone who could conceive of this arising in her simply from units or from lines or surfaces. Now, not only do the souls of mortal beings have a faculty that is cognizant of the perceptible; but he says f that the soul of the universe also as she is revolving upon herself, whenever she touches anything that has being either dispersed or indivisible, is moved throughout herself and states of anything's being the same and different with regard to whatever it is so precisely the respect and context and manner of its happening to be or to have as attribute (either of these) in relation to each

<sup>a</sup> Whereas this had been taken into account by Crantor and his followers, μάλιστα της ψυχης ίδιον υπολαμβάνοντες έργον είναι τὸ κρίνειν τά τε νοητὰ καὶ τὰ αἰσθητὰ . . . (1012 F supra with note c there on this use of  $\kappa \rho(\nu \epsilon \nu)$ .

b In the account of the Posidonian interpretation (1023 B supra) this would be represented by ταῦτα τῷ νοητῷ μίξαντες. With Plutarch's expression here <math>cf. τοῦ δὲ νοῦ μετέσχενάπὸ τῆς κρείττονος ἀρχῆς ἐγγενομένου (1026 E infra [chap. 27

sub finem]).

Timaeus 37 B 8 quoted in 1023 E infra.

a See 1024 A infra: την δοξαστικήν καὶ φανταστικήν καὶ

συμπαθη τῷ αἰσθητῷ κίνησιν.
The "units" and the "lines or surfaces" here refer respectively to the "numbers" of the Xenocratean and the "limits" of the Posidonian interpretations just above (see

1014 D supra with notes b and c there).

1 Timaeus 37 A 5-B 3, from which Plutarch omits as irrelevant to his argument the καὶ πρὸς τὰ κατὰ ταὐτὰ έχοντα ἀεί (Β 3) and so the τε after γιγνόμενα (Β 2); but then he ought also to have omitted the καὶ ὅταν ἀμέριστον in 37 A 6.

(1023) (ἔκαστα) εἶναι καὶ πάσχειν. ἐν τούτοις ἄμα καὶ τῶν δέκα κατηγοριῶν ποιούμενος ὑπογραφὴν ἔτι μᾶλλον τοῖς ἐφεξῆς διασαφεῖ. <sup>&</sup>lt;sup>a</sup> Cf. Albinus, Epitome vi, 10 (p. 159, 34-35 [Hermann] = p. 37, 1-2 [Louis]), where they are said to have been adumbrated by Plato in the Parmenides and elsewhere. A work by Plutarch entitled Διάλεξις περὶ τῶν δέκα κατηγοριῶν is No. 192 in the Catalogue of Lamprias.

among the things that come to be. As in these words he is simultaneously giving an outline of the ten categories a too, in those that follow he states the case more clearly still, for he says b: "Whenever true discourse is concerning itself about the perceptible and the circle of difference running aright conveys the message through all its soul, there arise opinions and beliefs steadfast and true; but, whenever on the other hand it is concerned about the rational and the circle of sameness running smoothly gives the information, knowledge c is of necessity produced; and, if anyone ever calls by another name than soul that one of existing things in which these two come to be, he will be speaking anything but the truth." Whence, then, did the soul get this motion that can apprehend what is perceptible and form opinions of it, a motion different from that which is intellective and issues in knowledge? It is difficult to say without steadfastly maintaining that in the present passage d he is constructing not soul in the absolute sense but the soul of the universe out of entities already available, the superior, that is to say indivisible, being and the inferior, which he has

 $^b$  Timaeus 37  $^{\rm B}$  3–c 5, from which Plutarch omits δὲ  $\dot{o}$  κατὰ ταὐτόν in  $^{\rm B}$  3-4 and γιγνόμενος . . .  $\dot{\eta}$ χ $\hat{\eta}$ s in  $^{\rm B}$  4-6 and

reduces νοῦς ἐπιστήμη τε in c 2 to ἐπιστήμη.

<sup>6</sup> By reducing Plato's νοῦς ἐπιστήμη τε to ἐπιστήμη alone Plutarch suppresses the embarrassing fact that νοῦς here is clearly treated as a state of soul and not a transcendent entity made an ingredient of it (of. Proclus, In Platonis Timaeum ii, pp. 313, 24–314, 5 [Diehl] and Cherniss, Aristotle's Criticism of Plato..., p. 607).

<sup>a</sup> This is not the last two passages cited (*Timaeus* 37 A 5-B 3 and B 3-c 5) but the central passage under discussion, *Timaeus* 35 A 1-B 4 (1012 B-c supra); for vôv see note a

on 1023 A supra.

(1024) περὶ τὰ σώματα μεριστὴν κέκληκεν, οὐχ ἐτέραν οὖσαν ἢ τὴν δοξαστικὴν καὶ φανταστικὴν καὶ συμπαθῆ τῷ αἰσθητῷ¹ κίνησιν, οὐ γενομένην ἀλλὰ ὑφεστῶσαν ἀίδιον ὤσπερ ἡ ἐτέρα. τὸ γὰρ νοερὸν ἡ φύσις ἔχουσα καὶ τὸ δοξαστικὸν εἶχεν ἀλλ' ἐκεῖνο μὲν ἀκίνητον ⟨καὶ⟩² ἀπαθὲς καὶ περὶ τὴν ἀεὶ μένουσαν ἱδρυμένον³ οὐσίαν τοῦτο δὲ μεριστὸν καὶ πλανητόν, ἄτε δὴ φερομένης καὶ σκεδαννυμένης Β ἐφαπτόμενον ὕλης. οὔτε γὰρ τὸ αἰσθητὸν εἰλήχει τάξεως ἀλλ' ἦν ἄμορφον καὶ ἀόριστον, ἤ τε περὶ τοῦτο τεταγμένη δύναμις οὔτε δόξας⁴ ἐνάρθρους⁵

<sup>b</sup> See supra page 209 with notes a to e and 1014 c referred

to there.

 $^{\circ}$  ή φύσις (called "wohl corrupt" by B. Müller [1873] ad loc.) is used here to designate the precosmic state as it is in 1015  $\mathbf{E}$  supra (οὐδ' ἀρχὰς τῆ φύσει . . . παρέσχεν, ἀλλ' οὕσης ἐν πάθεσι . . .).

<sup>d</sup> i.e. "the former" just mentioned, the "indivisible being" of Timaeus 35 A 1-2; cf. 1024 D infra, where  $vo\hat{v}_S = \tau\hat{\phi}$ 

άμερίστω . . . καὶ τῷ μηδαμῆ κινητῷ.

ε See 1024 c infra: δ δὲ νοῦς αὐτὸς μὲν . . . μόνιμος ἦν καὶ ἀκίνητος. Plato says nothing of the kind; but, since immobility and impassivity are characteristics of the intelligible being of the ideas (see page 223 supra with note b there), Plutarch, who identifies the indivisible being of the intelligibles (cf. Plat. Quaest. 1001  $\mathbf{D}$  supra: ἡ γὰρ ἀμέριστος οὐσία . . . τῶν νοητῶν) with precosmic νοῦς (see the immediately preceding note), naturally ascribes to the latter these characteristics of the former (see 1016 c supra with note c [τῆς μονίμου τε καὶ ἀρίστης οὐσίας ἐκείνης] and 1026  $\mathbf{\Lambda}$  infra [τῶρ 298

 $<sup>^</sup>a$  See  $supra~1015~\mbox{\ensuremath{\scriptscriptstyle{E}}}$  with note b and 1014  $\mbox{\ensuremath{\scriptscriptstyle{D}}}$  referred to there.

called divisible in the case of bodies,<sup>a</sup> this latter being none other than the opinionative and imaginative motion sensitive to what is perceptible, not brought into being but having subsisted everlastingly just like the former.<sup>b</sup> For nature <sup>e</sup> possessing intellectuality <sup>a</sup> possessed the opinionative faculty also, the former, however, immobile <sup>e</sup> (and) impassive <sup>f</sup> and settled about the being that always remains fixed <sup>g</sup> but the latter divisible and erratic inasmuch as it was in contact with matter, which was in motion and in dispersion.<sup>h</sup> The fact is that the perceptible had not got any portion of order but was amorphous and indefinite <sup>i</sup>; and the faculty stationed about this had neither articulate opinions nor motions that were

περὶ τὰ νοητὰ μονίμω]). Since at the same time he regards god as the source of rationality in the soul (see supra 1016 c with note d), he was perhaps not uninfluenced by the Aristotelian notion of god as νοῦς ἀκίνητος, which is read into Plato by Albinus in Epitome x, 2 (p. 57, 5-9 [Louis] = p. 164, 20-24 [Hermann]). The νοῦς as πρῶτος θεός may have been called μόνιμος even by Xenocrates, since he identified it with the μονάς (frag. 15 [Heinze]; and for νοῦς = μονὰς διὰ τὸ μόνιμον cf. Alexander, Metaph., p. 39, 14-15 and A. Delatte, Etudes sur la littérature pythagoricienne [Paris, 1915], p. 167, 3-4).

f See supra 1022 E, page 215, note a.

<sup>0</sup> Cf. 1024 D infra (περὶ τὸ μένον ἀεί) and Plat. Quaest.

1007 D supra (τὸ νοητὸν . . . ἀεὶ μένειν).

\* See supra 1023 c, note f and Plat. Quaest. 1001 p, note b with the references there. The combination of μεριστὸν καὶ πλανητόν here (the former referring to σκεδαννυμένης, the latter to φερομένης) recalls the identification as precosmic disorderly soul of both the divisible being and the necessity of the Timaeus (1014 p-e supra), since the latter is called a πλανωμένη αἰτία (Timaeus 48 A 6-7).

' For the confusion involved in speaking of "the perceptible" and of "corporeality" (just below) in this pre-

cosmic state taken literally see page 184, note c supra.

(1024) οὔτε κινήσεις ἀπάσας εἶχε¹ τεταγμένας ἀλλὰ τὰς πολλὰς ἐνυπνιώδεις καὶ παραφόρους καὶ ταραττούσας τὸ σωματοειδές, ὅσα μὴ κατὰ τύχην τῷ βελτίονι περιέπιπτεν ἐν μέσῳ γὰρ ἢν ἀμφοῦν καὶ πρὸς ἀμφότερα συμπαθῆ καὶ συγγενῆ φύσιν εἶχε, τῷ μὲν αἰσθητικῷ τῆς ὕλης ἀντεχομένη τῷ δὲ κριτικῷ τῶν νοητῶν.

24. Οὕτω δέ πως καὶ αὐτὸς² διασαφεῖ τοῖς ὀνόμασιν '' οὖτος '' γάρ φησι '' παρὰ τῆς ἐμῆς ψήφου λογισθεὶς ἐν κεφαλαίω δεδόσθω λόγος, ὄν τε καὶ Ὁ χώραν καὶ γένεσιν εἶναι τρία τριχῆ καὶ πρὶν οὐρανὸν γενέσθαι.'' χώραν τε γὰρ καλεῖ τὴν ὕλην

<sup>2</sup> Πλάτων -Epitome 1032 A.

b See 1015 Ε supra (την ύλην . . . ύπο της ανοήτου ταρατ-

τομένην αίτίας) with note g there.

 $^{\circ}$  Cf. Timaeus 69 B 6 (... οὔτε τούτων, ὄσον μὴ τύχη, τι μετεῖχεν ...), referring to the ἵχνη of Timaeus 53 B quoted

by Plutarch in 1016 E-F supra.

The subject of εν μέσω ήν as of the preceding περιέπιπτεν must be the precosmic disorderly soul, the δοξαστική καὶ φανταστική  $\cdot \cdot \cdot \cdot$  κίνησις identified by Plutarch with ή περὶ τὰ σώματα μεριστή οὐσία of Timaeus 35 λ (see also 1024 c infra : τὴν ἐν μεταβολαῖς καὶ κινήσεσιν οὐσίαν  $\cdot \cdot \cdot$  μεταξὲ τεταγμένην  $\cdot \cdot \cdot \cdot$  μεριστή προσηγορεύθη  $\cdot \cdot \cdot$ ), though in the Timaeus it is not this being that is ἐν μέσω but rather that produced by the demiurge between it and indivisible being to be the οὐσία that is an ingredient of soul. See the next note infra.

<sup>e</sup> Though τὸ κριτικόν can refer to the exercise of αἴσθησις as well as of νοῦς (see 1024  $\mathbf{E}$  infra with note e there), here it can mean only the latter, for it is explicitly distinguished

 $<sup>^{1}</sup>$  E¹ (in margin), B;  $\mbox{\'e}\chi ou\sigma \alpha$  -all other Mss., Aldine, Epitome~1031~F.

 $<sup>^</sup>a$  Cf. in 1026 ε infra the period ἐν ἢ τὸ μὲν φρόνιμον . . . καταδαρθάνει . . . and De Facie 944 ε-ε, where the substance of soul from which νοῦς has been separated is said to retain ἴχνη τινὰ βίου καὶ ὀνείρατα.

all orderly, but most of them were dreamlike <sup>a</sup> and deranged and were disturbing corporeality <sup>b</sup> save in so far as it would by chance encounter that which is the better, <sup>c</sup> for it was intermediate between the two <sup>a</sup> and had a nature sensitive and akin to both, with its perceptivity laying hold on matter and with its discernment on the intelligibles. <sup>c</sup>

24. In terms that go something like this f he states the case clearly himself, for he says g: "Let this be he account rendered in summation as reckoned from my calculation, that real existence and space and becoming were three and distinct h even before heaven came to be." Now, it is matter that he calls

from τῶ αἰσθητικῶ and moreover κριτήριον τοῦ νοητοῦ μόνον ἐστὶν o vovs (Plat. Quaest. 1002 p supra). Thus Plutarch's precosmic disorderly soul, though called ἀνόητος (1014 c and 1015 ε supra) and just distinguished (1024 A supra) as τὸ δοξαστικόν from the precosmic νοερόν, which comes to the former he maintains only by the action of god in the psychogony (see 1016 c supra [τῷ αἰσθητικῷ τὸ νοερὸν . . . ἀφ' αὐτοῦ παρασχών . . . ]; cf. 1026 E infra [τοῦ δὲ νοῦ μετέσχεν ἀπὸ τῆς κρείττονος άρχης ἐγγενομένου]), is here given the intermediate position that properly belongs to the "created" soul (see the immediate ately preceding note) and with it the faculty of vous that it should not have at all until after the psychogony. Similarly it is said in the next chapter (1024 c infra) to disperse in this world the semblances of the intelligible ideas, which in its context shows that the attempt to interpret literally the "precosmic chaos" of Timaeus 52 p-53 B was what constrained Plutarch here to contradict his own literal interpretation of the psychogony by ascribing to his precosmic disorderly soul characteristics proper according to his own account only to the " created " soul.

Euthydemus 304 E.

Timaeus 52 p 2-4.
 Cf. Proclus, In Platonis Timaeum i, p. 358, 11-12 (Diehl): ὅταν λέγη τρία ταῦτα εἶναι γωρίς....

(1024) ὥσπερ ἔδραν ἔστιν ὅτε καὶ ὑποδοχήν, ὂν δὲ τὸ νοητόν, γένεσιν δὲ τοῦ κόσμου μήπω γεγονότος οὐδεμίαν ἄλλην ἢ τὴν ἐν μεταβολαῖς καὶ κινήσεσιν οὐσίαν, τοῦ τυποῦντος καὶ τοῦ τυπουμένου μεταξὸ τεταγμένην, διαδιδοῦσαν¹ ἐνταῦθα τὰς ἐκεῦθεν εἰκόνας. διά τε δὴ ταῦτα μεριστὴ προσηγορεύθη καὶ ὅτι τῷ αἰσθητῷ τὸ αἰσθανόμενον καὶ τῷ φανταστῷ τὸ φανταζόμενον ἀνάγκη συνδιανέμεσθαι καὶ συμπαρήκειν ἡ γὰρ αἰσθητικὴ κίνησις, ἰδία ψυχῆς οὖσα, κινεῖται πρὸς τὸ αἰσθητὸν ἐκτός ὁ δὲ νοῦς αὐτὸς μὲν ἐφ' ἐαυτοῦ² μόνιμος ἦν καὶ ἀκίνητος,

<sup>1</sup> διαδοῦσαν -r.
<sup>2</sup> E, B, e, u; ἀφ' ἐαντοῦ -f, m, r, Escor. 72, Aldine.

<sup>a</sup> See note c on page 184 supra.

b Cf. Timaeus 52 A 1-4 with c 5-D 1, 48 E 5-6, 27 D 6-

28 A 4.

c Taking Timaeus 52 D—53 B literally, Plutarch had to identify the precosmic soul that he posited with one of the three alone there named as being "before heaven came to be." Of these there remained to him only γένεσις, and he may even have thought this identification supported by ψυχὴν . . . τὴν πρώτην γένεσις of Laws 896 A 5-B 1 and 899 c 6-7 (see 1013 F supra with note a there). Yet he must have understood that γένεσις in the Timaeus is not an entity transmitting to this world or dispersing in it the semblances of the other but is itself τὰ γιγνόμενα, the "offspring" of the intelligible and the receptacle and only in this sense something "between" them (cf. Timaeus 50 c 7-D 4), for this is the conception that he elsewhere himself ascribes to Plato (De Iside 373 E [ὁ μὲν οὖν Πλάτων τὸ μὲν νοητὸν . . . πατέρα, τὴν δὲ ὕλην καὶ μητέρα . . . καὶ χώραν γενέσεως, τὸ δ' 232

space, as he sometimes calls it abode and receptacle, a and the intelligible that he calls real existence b; and what he calls becoming, the universe not yet having come to be, is nothing other than that being involved in changes and motions which, ranged between what makes impressions and what receives them, disperses in this world the semblances from that world yonder. For this very reason it was called divisible d and also because it is necessary for that which is perceiving and that which is forming mental images to be divided in correspondence with what is perceptible and with what is imaginable and to be coextensive with them, for the motion of sense-perception, which is the soul's own, moves towards what is perceptible without 9 but the intelligence, while it was abiding and immobile all by itself, upon having got into the soul

έξ ἀμφοῖν ἔκγονον καὶ γένεσιν ὀνομάζειν εἴωθεν] and 372 F [εἰκὼν γάρ ἐστιν οὐσίας ἐν ὕλη γένεσις . . .]). In any case, Plutarch's precosmic soul, here identified with γένεσις, is irrational; and his giving it access to the intelligible world is an inconsistency resulting from his attempt to account for the "traces" and "modifications" in the chaos of Timaeus 52 p-53 B as literally precosmic (see note e on 1024 B supra).

<sup>d</sup> i.e. Timaeus 35 A, where, however, the μεριστή οὐσία is explicitly not μεταξύ τεταγμένη (see note d on 1024 B

supra).

· See 1024 A supra (μεριστόν . . . άτε . . . σκεδαννυμένης έφαπτόμενον ύλης) and cf. Simplicius, De An., p. 45, 8-10; for the term συμπαρήκειν cf. Boethus in Simplicius, Categ., p. 434, 3-4.

<sup>†</sup> Because τὴν . . . συμπαθη τῷ αἰσθητῷ κίνησιν is ἀπλῶς ψυχή (1024 A supra; cf. ψυχή καθ έαντήν in 1014 D-E supra).

° Cf. [Plutarch], De Placitis 899 E = Dox. Graeci, p. 394 A

15-20; Porphyry, Sententiae xliii (pp. 41, 24-42, 1 and 42, 13-14 [Mommert]) = Stobaeus, Ecl. i, 48, 5 (pp 313, 15-17 and 314, 5-7 [Wachsmuth]).

h See note e on 1024 A supra.

b Cf. Proclus, In Primum Euclidis El. Lib., p. 147, 15-18 (Friedlein). For περὶ τὸ μένον ἀεὶ see 1024 A, note g supra, and for the "circular motion" see Plat. Quaest. 1004 c

with note d there.

<sup>&</sup>lt;sup>a</sup> See Plat. Quaest. 1003 A with note i there for κρατήσασα . . .  $\dot{\epsilon}$ πέστρεψεν used of the rational soul's action upon the motions of matter. Similar language to describe the influence of god upon the world-soul and its νοῦς is used by Albinus in Epitome x, 3 and xiv, 3 (pp. 59, 5-7 and 81, 4-9 [Louis]=pp. 165, 1-3 and 169, 30-35 [Hermann]), with which cf. also Chalcidius, Platonis Timaeus, p. 226, 8-9 (Wrobel)=p. 205, 1-2 (Waszink).

and taken control makes her turn around to him a and with her accomplishes about that which always remains fixed the circular motion most closely in contact with real existence. This is also why the union of them proved to be a difficult fusion, being a mixing of the divisible with the indivisible and of the altogether transient with the utterly immobile and a constraining of difference to unite with sameness. Difference is not motion, however, as sameness is not rest either, but the principle of differentiation and dissimilitude. In fact, each of the two derives from another of two principles, sameness from the one and difference from the dyad f; and it is first here in the soul that they have been commingled, bound together by numbers and ratios and

° In Timaeus 35 A (see 1012 c supra) δύσμικτον is used not of the "divisible" or the "indivisible" but of "difference" alone, and this Plutarch himself later emphasizes and defends just after having distinguished the "divisible" and the "indivisible" from "difference" and "sameness" (1025 B-c infra).

<sup>d</sup> See supra 1013 p with notes f and g there;  $\eta_{\nu}$  here is

the "philosophical imperfect."

Cf. 1025 c infra (τό μὲν ταὐτὸν ἰδέα τῶν ὡσαύτως ἐχόντων ἐστὶ τὸ δὲ θάτερον τῶν διαφόρως...) and De Defectu Orac. 428 c (ἡ τοῦ ἐτέρου δύναμις... ἐνείργασται... τὰς... ἀνομοιότητας).

1 Of. Nicomachus, Arithmetica Introductio 11, xvii, 1 (p. 109, 2-6 [Hoche]) and on this passage Philoponus, B,  $\nu_{\rm e}$ , lines 12-15 (Hoche) and Asclepius, 11,  $\nu_{\rm e}$ , lines 17-19 (Tarán); Moderatus in Porphyry, Vita Pythagorae, 49-50 (p. 44, 8-18 [Nauck]); Plutarch, De Garrulitate 507 Λ (ή δὲ δυἀς ἀρχὴ διαφορᾶς ἀόριστος). With the derivation from these principles introduced here and reflected in the reference to "dyadic" and "monadic" parts in 1025  $\nu_{\rm o}$  infra Plutarch comes near to giving soul an arithmetical character not unlike that to which he objects in the Xenocratean interpretation (1013 c- $\nu_{\rm o}$  and 1023 c- $\nu_{\rm o}$  [chap. 22 sub finem] supra). See similarly note b on 1025  $\nu_{\rm o}$  infra.

<sup>7</sup> τοῦ -Ε¹ (added superscript), B, Epitome 1032 D;

omitted by all other Mss. and Aldine.

δ Cf. 1025 r and 1027 A (τῆ δὲ ταὐτοῦ καὶ τῆ ἐτέρου δυνάμει τάξιν . . . καὶ διαφορὰν . . .) infra; and for another use of the distinction between difference in sameness and sameness in difference cf. Porphyry, Sententiae xxxvi and xxxvii (p. 31, 1-9 and pp. 32, 15-33, 8 [Mommert]) and Marius Victorinus, Adv. Arium i, 48, 22-28 (Henry-Hadot).

c Cf. Aristotle, De Anima 432 a 15-17.

d Čf. De Virtute Morali 441 E-F. In Timaeus 36 c 4-D 7 the single and undivided outer revolution, into which all the "fixed stars" are set (40 A 2-B 6), is called the motion of sameness; and the inner revolution of seven circles, unequal and with speeds different but rationally related (and

<sup>&</sup>lt;sup>a</sup> Not "harmonic," for which Plutarch uses the regular technical expression,  $\hat{\alpha}\rho\mu\nu\nu\kappa\dot{\eta}$   $\mu\epsilon\sigma\dot{\sigma}\tau\eta_{S}$ , and which he knows is only one of the two means used in *Timaeus* 36 Λ (see 1019 n and 1028 Λ infra); see page 175 supra with note c there on  $\hat{\alpha}\rho\iota\theta\mu\hat{\omega}$  καὶ λόγ $\omega$  καὶ  $\hat{\alpha}\rho\mu\nu\dot{\alpha}\dot{\omega}$ .

harmonious means, a and that difference come to be in sameness produces differentiation but sameness in difference order, as is clear in the case of the soul's primary faculties. These are the faculties of discernment and motivity. Now, directly in the heaven motion exhibits diversity in identity by the revolution of the fixed stars and identity in diversity by the order of the planets, for in the former sameness predominates but its opposite in the things about the earth. Discernment, however, has two principles, intelligence proceeding from sameness to universals and sense-perception from difference to particulars it.

so "ordered"), into each of which one of the planets is set (38 c 7-D 1), is called the motion of difference. All these circles, however, are homogeneous in constitution (35 B 1-3 and 36 B 5-c 4); and their designations are not meant to distinguish as their respective constituents the sameness and difference that were ingredients in the blending of soul (so apparently "Timaeus Locrus" 96 c [...  $\tau \dot{\alpha} m \epsilon \rho a i b \dot{\epsilon} \rho a a c c c c \dot{\alpha} \dot{\mu} \dot{\epsilon} \nu \tau \dot{\alpha} \tau a \dot{\nu} \tau \dot{\alpha} \dot{\nu} \dot{\alpha} \dot{\nu} \dot{\alpha} u s \varepsilon \dot{\epsilon} \mu \epsilon \nu \tau \dot{\alpha} \dot{\alpha} \dot{\epsilon} \tau \dot{\alpha} \dot{\epsilon} \tau \dot{\epsilon} \rho \omega$ .)) or to indicate any predominance of one or the other of the latter in each of the two revolutions such as Plutarch here assumes and for which even Proclus tries to account though recognizing that the constitution of the two revolutions is homogeneous (In Platonis Timaeum ii, pp. 253, 23-255, 8 and p. 255, 13-16 [Diehl]).

<sup>e</sup> Cf. Aristotle, De Anima 432 a 16 (... τῶ τε κριτικῶ [see note c supra] δ διανοίας ἔργον ἐστὶ καὶ αἰσθήσεως) and see supra 1012 F, note c and 1023 D, note a on κρίνειν. With ἀρχὰς ... δύο here cf. Albinus, Epitome iv, 4 (p. 13, 14-15 [Louis] = p.

154, 28-29 [Hermann]).

the reports of the circle of sameness concerning the rational and of the circle of difference concerning the perceptible arise respectively knowledge and opinion; but the characters of these circles Plutarch here, as in the preceding sentence (see note d supra), equates with the sameness and difference that are ingredients of soul. For universals as

(1024) φοῖν, νόησις ἐν τοῖς νοητοῖς καὶ δόξα γιγνόμενος ἐν τοῖς αἰσθητοῖς ὀργάνοις τε μεταξὺ¹ φαντασίαις τε καὶ μνήμαις² χρώμενος, ὧν τὰ μὲν ἐν τῷ ταὐτῷ τὸ ἔτερον τὰ δ' ἐν τῷ ἐτέρῳ ποιεῖ τὸ ταὐτόν. ἔστι γὰρ ἡ μὲν νόησις κίνησις τοῦ νοοῦντος περὶ τὸ μένον, ἡ δὲ δόξα μονὴ τοῦ αἰσθανομένου περὶ τὸ 1025 κινούμενον. φαντασίαν δὲ συμπλοκὴν δόξης πρὸς αἴσθησιν οὖσαν ἵστησιν ἐν μνήμη τὸ ταὐτὸν τὸ δὲ

 $^{1}$  τε καὶ μεταξὲ -Aldine ; τε ταῖς μεταξὲ -Stephanus.  $^{2}$  γνώμαις -r.

the objects of knowledge or intelligence contrasted to particulars as the objects of sense-perception see 1025  $\mathbf{E}$  infra  $(\dots vo\hat{\epsilon}\hat{v})$   $\mu\hat{\mathbf{e}}\hat{\mathbf{e}}$   $\hat{\kappa}\hat{\epsilon}\hat{v}\hat{v}$   $a\hat{n}\hat{\sigma}a$   $\delta'$   $a\hat{l}o\theta\hat{a}\hat{v}e\sigma\thetaa\dots$ ) and cf. Aristotle, De Anima 417 b 22-23 and Physics 189 a 5-8; Areius Didymus, Epitomes Frag. Phys. 16 (Dox. Graeci, p. 456, 9-12); Proclus, In Primum Euclidis El. Lib., p. 30, 11-15 (Friedlein).

a i.e. the λόγος of Timaeus 37 в 3 (ratio in Cicero, Timaeus 28, p. 177, 2 [Plasberg] and motus rationabilis in Chalcidius, Platonis Timaeus, p. 172, 11 and 19-21 [Wrobel] = p. 153, 16 and 23-25 [Waszink]), which there, however, means "discourse" (see 1023 E supra) but discourse which is articulate thought (cf. Theaetetus 189 E 6-7 and Sophist

263 E 3-6).

b Cf. Proclus, In Platonis Timaeum i, p. 255, 2-24 and ii, p. 299, 16-24 (Dichl); and cf. also the διττὸς λόγος of Albinus, Epitome iv, 3 (p. 13, 8-11 [Louis]=p. 154, 22-25 [Hermann]) with the duplex virtus of the rational part of the soul in Chalcidius, Platonis Timaeus, p. 198, 22-26 (Wrobel)=p. 177, 14-17 (Waszink).

<sup>6</sup> For the connexion of μνήμη and φαντασία cf. Aristotle, De Memoria 450 a 22-25 and 451 a 14-17; with δργάνοις cf. Plutarch, frag. xv (vii, p. 111, 12-14 [Bernardakis])=frag. 23, 9-11 (Sandbach) and Adv. Colotem 1119 A (τὰ δὲ λοιπὰ 238

and reason <sup>a</sup> is a blend of both, becoming intellection in the case of the intelligibles and opinion in the case of the perceptibles <sup>b</sup> and employing between them mental images and memories as instruments, <sup>c</sup> of which the former are produced by difference in sameness and the latter by sameness in difference. <sup>d</sup> For intellection is motion of what is cognizing about what remains fixed, <sup>e</sup> and opinion fixity of what is perceiving about what is in motion <sup>f</sup>; but mental imagining, which is a combination of opinion with sense-perception, <sup>g</sup> is brought to a stop in memory

. . . ὄργανα τῆς τούτου δυνάμεως); and with μεταξύ cf. Plotinus, Enn. iv, iv, 13, line 13 and Proclus, In Primum

Euclidis El. Lib., p. 52, 10-21 (Friedlein).

The antecedent of  $\vec{\omega}\nu$   $\tau \vec{\alpha}$   $\mu \vec{\epsilon}\nu \dots \tau \vec{\alpha}$   $\delta'$  is not, as Thévenaz thought ( $L'Ame\ du\ Monde$ , pp. 29 and 81),  $\tau o \vec{\imath} s\ \nu o \eta \tau o \vec{\imath} s \dots \tau o \vec{\imath} s\ alo \theta \eta \tau o \vec{\imath} s$  but  $\phi a \nu \tau a \sigma (as\ r \kappa a)\ \mu \nu \eta \mu a s$  treated as neuter because of  $\partial \rho \nu \dot{\alpha} \nu o \iota s$ . Their dependence upon difference and sameness is explained in the second half of the next sentence, as was that of  $\nu o \vec{\imath} s$  and  $\vec{\alpha} o \theta \eta \sigma s$  in the preceding one (page 237, note f). The whole of this exposition has to do with the rôles of sameness and difference not in the existence of intelligibles and perceptibles but in the constitution of the soul's faculties (see 1024 r supra).

6 See 1024 D supra with note b there; and cf. Aristotle, De Anima 407 a 20-22 (on the Timaeus): νοῦ μὲν γὰρ κίνησις

νόησις. . . .

΄ Contrast τὸ δοξαστικὸν . . . πλανητόν, ἄτε δὴ φερομένης . . . ἐφαπτόμενον τλης (1024 α supra) and τῷ αἰσθητῷ τὸ αἰσθανόμενον . . ανάγκη . . . συμπαρήκειν (1024 c supra); but cf. δόξαι . . . βέβαιοι of Timaeus 37 B 8 (1023 ε supra) and the interpretation by Proclus, In Platonis Timaeum ii, p. 310, 5-10 (Diehl).

<sup>σ</sup> Cf. Aristotle, De Anima 428 a 25-26 (οὐδὲ συμπλοκή δόξης καὶ αἰσθήσεως) against Plato, Sophist 264 b 1-2 (σύμμειξις αἰσθήσεως καὶ δόξης), where δόξα means "judgment," however, διανοίας ἀποτελεύτησις, in distinction from its meaning in Timaeus 37 b 8 (cf. Proclus, In Platonis Rem Publicam i, pp. 262, 25-263, 8 [Kroll]).

machi Arith. Introd. B xxiv, 11 (p. 28 [Hoche, 1867]); Nemesius, De Natura Hominis v (pp. 153-154 [Matthaei]); J. H. Waszink, Studien zum Timaioskommentar des Cal-

cidius I (1964), pp. 74-82.

a Cf. Philoponus, In Nicomachi Arith. Introd. B xviii,  $1=\xi$ , lines 12-16 (p. 18 [Hoche, 1867]): . . . τὸ γὰρ ταὐτὸν ἀδιαίρετον. . . . So some derived sameness in the psychogony from the indivisible being and difference from the divisible or identified the two pairs (cf. Proclus, In Platonis Timaeum

united sameness and difference, contrary forces and antagonistic extremes, not just by themselves; but by first interposing other beings, the indivisible in front of sameness and in front of difference the divisible, as each of the one pair is in a way akin to one of the other, a and by then making an additional blend with those between after they had been commingled b he thus fabricated the whole structure of the soul, from what were various having made it as nearly uniform and from what were many as nearly single as was feasible. Some d say that it was not right of Plato to use "refractory to mixture" as an epithet of the nature of difference, e since it is not unreceptive of change but is positively friendly to it, and that it is rather the nature of sameness which, being constant and hard to change, does not readily submit to mixture but rejects and shuns it in order

ii, p. 155, 20-23 [Diehl]; Themistius, De Anima, p. 11, 10-12; A. E. Taylor, A Commentary on Plato's Timaeus,

p. 128).

b See infra 1025 E (τὴν ἐκ τῆς ἀμερίστου καὶ τῆς μεριστῆς ὁ θεὸς ὑποδοχὴν τῷ ταὐτῷ καὶ τῷ θατέρῳ συνέστησεν) and 1025 F (δεῖται τρίτης τινὸς οἰον ὕλης ὑποδεχομένης...). For the way in which Plutarch elicited this misinterpretation from Timaeus 35 A 4-B I see notes a and c on 1012 c supra with the reference in the latter note to Proclus (In Platonis Timaeum ii, p. 159, 5-14 [Diehl]), who construed the text correctly, inferring from it, however, contrary to Plutarch that (the intermediate) sameness and difference were combined first and the blend of them was then combined with (the intermediate) being.

to remain simple and pure and unsubject to alteration. They who make these objections fail to understand, however, that sameness is the idea <sup>a</sup> of things identical and difference of things various and that the function of the latter is to divide and diversify and make many whatever it touches but of the former is to unite and combine,<sup>b</sup> recovering from many by means of similarity a single form and force.<sup>c</sup>

26. Now, these are faculties of the soul of the sum of things a but enter besides into mortal and passible organs of bodies. Indestructible as they are themselves, in these faculties the form of the dyadic and indefinite part makes itself more apparent, while that of the simple and monadic part is submerged in greater obscurity. It would not be easy, however, to observe in man either an emotion entirely

<sup>a</sup> Cf. Plato, Sophist 255  $\pm$  5-6 and 256  $\pm$  12- $\pm$  3 (see 1013 D supra with note g there) and see  $l\delta\epsilon_a$  in 1023 c supra.

 $^{b}$  See note e on 1024 p supra with De Defectu Orac. 428 c referred to there and De E 391 c  $(\dots \tau a \dot{\nu} \tau o \dot{\nu})$  δε την μιγνύουσαν ἀρχην θατέρου δε την διακρίνουσαν); and cf. Proclus, In Platonis Timaeum ii, p. 155, 14-20 and p. 158, 18-31 (Diehl).

<sup>o</sup> See 1022 F supra with note c there; cf. Plato, Phaedrus 265 D 3-4 and Hermias, In Platonis Phaedrum, D. 171, 8-11

(Couvreur).

<sup>4</sup> Cf. Timaeus 41 D 4-5 (την τοῦ παντὸς ψυχην . . .) and De Virtute Morali 441 F (η τ' ἀνθρώπου ψυχη μέρος η μίμημα τῆς

τοῦ παντὸς οὖσα . . .).

<sup>e</sup> The text has been thought to be corrupt chiefly because of the failure to recognize παρεισιοῦσαι as a periphrastic present (cf. Weissenberger, Die Sprache Plutarchs I, p. 9: H. Widmann, Beiträge zur Syntax Epikurs, p. 135).

f i.e. in these that have entered into the mortal organs of

bodies.

<sup>9</sup> The dyadic part is manifested as difference and the monadic as sameness (see 1024 p supra with note f there).

b i.e. common to both the contemplative aspect and the practical (cf. De Virtute Morali 443 E [... τοῦ λόγου ... τὸ μὲν ... θεωρητικόν ἐστι τὸ δ΄... πρακτικόν] with Aristotle, Politics 1333 a 25 and Eth. Nic. 1139 a 6-15 [cf. Gauthier et Jolif ad loc., ii, pp. 440-442]); but it is so just because it is a blend of both principles, the one proceeding to universals and the other to particulars, and so becomes νόησις ἐν τοῖς νοητοῖς, i.e. contemplative, and δόξα ἐν τοῖς αἰσθητοῖς, i.e. practical (1024 F supra with notes a and b there). So both Thévenaz (L'Âme du Monde, p. 31, note 159) and

latter, a the reason common to both, b as it is continually coming upon difference in sameness and upon sameness in difference, tries with definitions and divisions c to separate the one and the many, that is the indivisible and the divisible, d but cannot arrive at either exclusively, because the very principles have been alternately intertwined and thoroughly intermixed with each other. It was just for this reason that god made from being the compound of the indivisible and the divisible as a receptacle for sameness and difference, that order might come to be in differentiation; in fact, "come to be" amounted to this, since without these sameness had no differentiation so that it had no motion either and so no coming to be and difference had no order so that it had no coherence either and so no coming to be.g

Helmer (De An. Proc., p. 53), whose interpretation he rejects and Hubert here adopts, are partially right.

· See 1026 D infra: ή δὲ ὁριστική δύναμις . . . καὶ τοὐναν-

τίον ή διαιρετική....

<sup>8</sup> σημαντική -Β, u.

4 δέτι - υ.

<sup>a</sup> For συμβέβηκε in this sense see Plat. Quaest. 1003  $\Gamma$  supra (τοῦτο δὲ καὶ τῆ μονάδι συμβέβηκε). Even Aristotle at times uses συμβέβηκε and συμβέβηκός simpliciter (De Anima 402 a 8-10, De Part. Animal. 643 a 30-31 with Metaphysics 1025 a 30-32) in referring to what he calls more exactly συμβεβηκότα καθ' αὐτά (Anal. Post. 75 b 1-2 and 83 b 19-20, Metaphysics 995 b 19-20). Cf. 1018  $\Gamma$  infra (chap. 14): ἴδιον τῷ τελευταίω συμβέβηκε, τῷ κζ΄...

b i.e. the intercommunion of ideas in Plato, Sophist 254 D 4—259 B 7 (cf. 256 B 1 and 259 A 7 for the term μέθεξις): by such "participation" in difference sameness like all the ideas is different from difference as it is from all the others, and difference like all the others is the same as itself by "participation" in sameness (cf. Proclus, In Platonis Parmenidem, cols. 756, 33–757, 8 [Cousin²]). For the ideas, sameness and difference, see supra 1025 c with note a there.

c In Timaeus 48 ε 3—49 α 6 the γενέσεως ὑποδοχὴ καὶ τιθήνη is introduced as a τρίτον γένος; and Aristotle refers to his substrate of contraries, themselves ἀπαθῆ ὑπ' ἀλλήλων, i.e. to matter, as τρίτον τι (Metaphysics 1069 b 8-9 and 1075 a 30-32, cf. Physics 190 b 33—191 a 1). Plutarch in De Iside 370  $\rm F$ —371 a also ascribes to Plato τρίτην τινὰ φύσιν between ταὐτόν and θάτερον (see note c on 1015  $\rm B$  supra);

For, even if it is a characteristic <sup>a</sup> of sameness to be different from difference and of difference again to be the same as itself, mutual participation of this kind <sup>b</sup> has no fruitful result; but a third term is required, a kind of matter serving as a receptacle for both and being modified by them, <sup>c</sup> and this it is that he first compounded when with that which abides about the intelligibles <sup>a</sup> he bounded the limitlessness of that which is motive in the case of bodies. <sup>c</sup>

27. As some sound is not speech and not significant but speech is an utterance in sound that signifies thought, and as concord is what consists of sounds and intervals and a sound is one and the same thing,

but there he takes  $\tau a \dot{v} \tau \acute{o} \nu$  to be the good principle and  $\theta \acute{a} \tau \epsilon \rho o \nu$  the evil, i.e. the evil "world-soul" that he professes to find in the Laws and which in the present essay (1014 D-E supra) he identifies instead with the "divisible being" here compounded with the "indivisible" to be itself the "third term," the receptacle for both  $\tau a \dot{v} \tau \acute{o} \nu$  and  $\theta \acute{a} \tau \epsilon \rho o \nu$ .

d See note e on pages 228 f. supra.

<sup>6</sup> See 1015 E supra (τὴν κινητικὴν τῆς ὕλης καὶ περὶ τὰ σώματα γιγνομένην μεριστὴν . . . κίνησιν) with notes b and c there and 1027 A infra (τῷ μὲν ἐνὶ τὴν ἀπειρίαν ὁρίσαντος ἵν'

οὐσία γένηται πέρατος μετασχοῦσα) with note a there.

' Cf. S.V.F. iii, p. 213, 18-21 and ii, p. 48, 28-30. The use of  $\phi\omega\nu\dot{\eta}$  for "sound" in the generic sense (so Plat. Quaest. 1000 B, 1001 F, and 1006 B; cf. Timaeus 67 B 2-4 and Divisiones Aristoteleae § 30 [24]=pp. 37, 23-38, 14 [Mutschmann]) is called catachrestic by [Plutarch], De Placitis 902 B=Dox. Graeci, p. 408 A 3-8 (cf. Aristotle, De Anima 420 b 5-16 and 27-33). For speech (λόγος) as articulate sound that is "significant" see also Plat. Quaest. 1009 D-E.

<sup>9</sup> Cf. Nicomachus, Harmonices Man. 12 (Musici Scriptores Graeci, p. 261, 4-6 [Jan]); Aristoxenus, Elementa Harmonica i, 15, 15-16 with P. Marquard's note ad loc., pp. 224-227; Theon Smyrnaeus, pp. 49, 18-20 from Adrastus

and 60, 13-16 (Hiller).

<sup>&</sup>lt;sup>a</sup> Cf. Aelian Platonicus and Thrasyllus in Porphyry, In Ptolemaei Harmonica, p. 35, 15-22 and p. 91, 13-18 (Düring); Bacchius, Isagoge 6 (Musici Scriptores Graeci, p. 292, 20-21 [Jan]). In 1020 ε infra it is defined as πᾶν τὸ περιεχόμενον ὑπὸ δυεῖν φθόγγων ἀνομοίων τῆ τάσει.

an interval the diversity and difference of sounds, and the mixture of these results in song and melody, so the affective part of the soul was indeterminate and unstable and then was bounded when there came to be limit and form in the divisible and omnifarious character of the motion. And, once having comprehended sameness and difference with the similarities and dissimilarities of numbers that produced consensus out of dissension, it is for the sum of things rational life and concord and reason guiding necessity that has been tempered with persuasion and which by most people is called destiny, by Empedocles love together with strife, by Heraclitus concord of the universe retroverse like that of lyre

pp. 82, 10-18 and 84, 10-88, 15 (Pistelli); see 1017 E infra: αἱ συζυγίαι τῶν ὁμοίων ἔσονται πρὸς τοὺς ὁμοίους.

· See 1030 c infra; for ζωή . . . ἔμφρων cf. Timaeus 36 E

3-4, quoted by Plutarch at 1016 B supra.

An inexact reminiscence of Timaeus 47 E 5—48 A 5; ef. Plutarch's Phocion ii, 9 (742 E), and for his interpretation

of ἀνάγκη in the Timaeus see 1014 D-1015 A supra.

Of. Iamblichus, De Mysteriis viii, 7 (p. 269, 13-14 [Parthey]) and Corpus Hermeticum xvi, 11 (ii, p. 235, 22 [Nock-Festugière]). Plutarch himself substitutes ἀνάγκη for εἰμαρμένη (see supra 1015 A, note e); cf. also [Plutarch], De Placitis 884 E-F (Dox. Graeci, p. 321 A 6-9 and p. 322 A 1-3) and Cicero, De Natura Deorum i, 55 ("illa fatalis

necessitas quam είμαρμένην dicitis ").

h Empedocles, frag. A 45 (D.-K.); cf. Empedocles, frag. B 115, 1-2 (D.-K.) with Hippolytus, Refutatio vii, 29, 23 (p. 214, 17-24 [Wendland]) and frags. A 32 and A 38 (D.-K.) with Simplicius, Phys., p. 197, 10-13, p. 465, 12-13, and p. 1184, 5-17. Zeller's estimate of this evidence (Phil. Griech. i, 2, p. 969, note 2) is still valid despite such attempts at rehabilitation and embellishment as that of J. Bollack's (Empédocle i [Paris, 1965], pp. 153-158 and 161); cf. H. Schreckenberg, Ananke (München, 1964), pp. 111-113 with note 97.

(1026) κόσμου ὅκωσπερ λύρης καὶ τόξου, Παρμενίδης δὲ φῶς καὶ σκότος, ἀναξαγόρας δὲ νοῦν καὶ ἀπειρίαν, Ζωροάστρης δὲ θεὸν καὶ δαίμονα, τὸν μὲν Ὠρομάσδην καλῶν τὸν δ' ἀρειμάνιον. Εὐριπίδης δ' οὐκ ὀρθῶς ἀντὶ τοῦ συμπλεκτικοῦ τῷ διαζευκτικῷ κέχρηται

Ζεὺς εἴτ' ἀνάγκη φύσεος εἴτε νοῦς βροτῶν

C καὶ γὰρ ἀνάγκη καὶ νοῦς ἐστιν ἡ διήκουσα διὰ πάντων δύναμις. Αἰγύπτιοι μὲν οὖν μυθολογοῦν-

<sup>1</sup> ἀριμάνιον -B¹; ἀριμάνιον -all other MSS.

 <sup>3</sup> Stephanus; φύσεως -MSS.
 <sup>4</sup> νοῦς -omitted by r.

<sup>a</sup> Heraclitus, frag. B 51 (D.-K. and Walzer)=frags. 45 and 56 (Bywater): cf. Dox. Graeci, p. 303 b 8-10 (. . . είμαρμένην δὲ λόγον ἐκ τῆς ἐναντιοδρομίας δημιουργόν τῶν ὅντων) and Diogenes Laertius, ix, 7 (p. 440, 2-3 [Long]). Both in De Tranquillitate Animi 473 r—474 λ and in De Iside 369 b the quotation from Heraclitus is followed by that of Euripides, frag. 21, 3-4 (Nauck, Trag. Graec. Frag.², p. 369). Neither in the former of these nor in the present passage is there reason to doubt that Plutarch wrote παλίντροπος, whether it was this or παλίντονος, as in the De Iside, that Heraclitus had written (cf. W. K. C. Guthrie, A History of Greek Philosophy i [Cambridge, 1962], p. 439, note 3 with references; M. Marcovich, Heraclitus [Merida, 1967], pp. 125-126).

b See Plutarch, Adv. Colotem 1114 B. Cf. Simplicius, Phys., p. 38, 18-24 (quoting Alexander); p. 25, 15-16; pp. 30, 14-31, 2; and pp. 179, 20-180, 12 with Parmenides, frag. B 8, 53-61 and B 9 (D.-K.). The belief that the second part of Parmenides' poem, called the κοσμογονία by Plutarch in Amatorius 756 E, was meant to be a valid account of the phenomenal world (Adv. Colotem 1114 C-E) goes back to Aristotle (Metaphysics 986 b 31-34; cf. Cherniss, Crit. Presoc. Phil., p. 48, note 192); but Plutarch is alone in identifying its two "principles" with ἀνάγκη, for which see

and bow,<sup>a</sup> by Parmenides light and darkness,<sup>b</sup> by Anaxagoras intelligence and infinitude,<sup>c</sup> and by Zoroaster god and spirit, the former called by him Oromasdes and the latter Areimanius.<sup>a</sup> Euripides has erred in using the disjunctive instead of the copulative conjunction in the prayer,

Zeus, whether natural necessity Or the intelligence of mortal men,

for the power that pervades all things f is both necessity and intelligence. Now, the Egyptians in a mythical account say enigmatically that, when

rather Parmenides, frag. B 10, 6-7 (D.-K) and frag. A 37

(p. 224, 7-9 [D.-K.]) with frag. B 12 (D.-K.).

<sup>e</sup> See De Iside 370 Ε (νοῦν καὶ ἄπειρον). Ćf. Theophrastus, Phys. Opin., frag. 4 (Dox. Graeci, p. 479, 14-15); and for Plutarch's ἀπειρία here cf. Aristotle, Metaphysics 988 a 28. Against the identification with ἀνάγκη see Plutarch himself in Pericles iv, 6 (154 B-C); but on the other hand see De Defectu Orac. 435 Γ (... τὸ κατ' ἀνάγκην ... μετιὼν ἀεὶ ...) and Aristotle, Metaphysics, 985 a 18-21 (cf. Cherniss, Crit. Presoc. Philos., pp. 234-235).

<sup>4</sup> See supra 1012 E with note c there on "Zaratas"; De Iside 369 D—370 c; and Diogenes Laertius, i, 8. Cf. Bidez-Cumont, Les Mages Hellénisés i, pp. 58-66 and ii, pp. 70-79; and J. Hani, Rev. Études Grecques, lxxvii (1964),

pp. 489-525.

<sup>e</sup> Euripides, *Troiades*, 886. For the "correction" suggested by Plutarch in Stoic fashion cf. Babut, *Plutarque et* 

le Stoïcisme, p. 141.

For this phrase cf. Cornutus, xi (p. 11, 21 [Lang]) and [Aristotle], De Mundo 396 a 28-29. It is used of the Platonic world-soul by Atticus, frag. viii (Baudry) = Eusebius, Praep. Evang. xv, 12, 3 (ii, p. 375, 17-19 [Mras]), though it is Stoic in origin: cf. Plutarch, De Iside 367 c with Diogenes Laertius, vii, 147; [Plutarch], De Placitis 882 A and 885 A (Dox. Graeci, p. 306 A 5-8 and p. 323 A 1-6); Alexander, De Mixtione, p. 225, 1-3 (Bruns); Plotinus, Enn. III, i, 4, lines 1-9.

μέν πατρὶ τὸ πνεῦμα καὶ τὸ αἷμα τῆ δὲ μητρὶ τὴν σάρκα καὶ τὴν πιμελὴν προσνεμηθῆναι. τῆς δὲ ψυχῆς οὐδὲν μὲν εἰλικρινὲς οὐδ' ἄκρατον οὐδὲ χωρὶς ἀπολείπεται τῶν ἄλλων άρμονίη γὰρ ἀφανὴς φανερῆς κρείττων καθ' Ἡράκλειτον, ἐν ἢ τὰς διαφορὰς καὶ τὰς ἔτερότητας ὁ μιγνύων θεὸς ἔκρυψε καὶ κατέδυσεν ἐμφαίνεται δὲ ὅμως αὐτῆς τῷ μὲν ἀλόγῳ τὸ ταραχῶδες τῷ δὲ λογικῷ τὸ εὕτακτον, ταῖς δ' αἰσθήσεσι τὸ κατηναγκασμένον τῷ δὲ νῷ D τὸ αὐτοκρατές. ἡ δὲ ὁριστικὴ δύναμις τὸ καθόλου καὶ τὸ ἀμερὲς διὰ συγγένειαν ἀγαπᾳ, καὶ τοὐναντίον ἡ διαιρετικὴ πρὸς τὰ καθ' ἔκαστα φέρεται τῷ μεριστῷ χαίρει δὲ δλότητι διὰ τὸ ταὐτὸν ἐφήδεταί ⟨τε⟩ μεταβολῆ διὰ τὸ θάτερον.' οὐχ ἤκιστα δὲ ἤ τε πρὸς τὸ καλὸν διαφορὰ καὶ τὸ αἰσχρὸν ἥ

<sup>a</sup> See De Iside 358 E and De Libidine et Aegritudine 6 (vii, p. 7, 2-16 [Bernardakis] = vi, 3, p. 56, 7-20 [Ziegler-Pohlenz, 1966]); cf. J. Hani, Rev. Etudes Grecques, lxxvi (1963),

pp. 111-120.

b See 1025 D supra with note b there and Plat. Quaest. 1008 c supra. In De Tranquillitate Animi 474 A, De Sollertia Animalium 964 D-E, and De Iside 369 c it is rather human affairs or life, nature, and the sublunar world that are said to contain nothing pure or unmixed.

e Heraclitus, frag. B 54 (D.-K. and Walzer)=frag. 47

(Bywater).

α Cf. τὴν δὲ ταραχώδη καὶ ἀνόητον (1014 c supra) and ἡμῶν τὸ ταραχῶδες (Quaest. Conviv. 746 A).

Horus was convicted, the breath and blood were assigned to his father and the flesh and fat to his mother.a Of the soul, however, nothing remains pure or unmixed or separate from the rest, b for stronger than manifest concord according to Heraclitus is the unmanifest, wherein god, making the mixture, sank and concealed the differences and the diversities; but nevertheless turbulence makes itself evident in the irrational part of it d and orderliness in the rational, e necessitation in the senses f and independence in the intelligence.g Its faculty for defining has a fondness for the universal and the indivisible by reason of kinship, and contrariwise that for dividing is moved to particulars by the divisible h; and it rejoices in integrity by reason of sameness (and) exults in change by reason of difference. More than anything else, however, the dissension in regard to fair and foul and again in regard to pleasant

ε Cf. τὸ νοερὸν καὶ . . . τὸ τεταγμένον (1016 c supra).

f. Cf. Plato, Timaeus 42 A 3-B 1 and 69 c 7-D 6; the senses are dependent upon external stimuli (Timaeus 43 c 4-7 and Philebus 33 D 2-34 A 9).

<sup>9</sup> Cf. De Facie 945 D (ὁ δὲ νοῦς . . . αὐτοκράτωρ) and De Amore Prolis 493 D-E (. . . αὐτοκρατὴς λόγος) with Anaxagoras, frag. B 12 (ii, p. 37, 18-20 [D.-K.]) and Plato, Cratylus

413 c 5-7.

<sup>h</sup> See 1025 E supra (ἐπιχείρει μὲν ὅροις καὶ διαιρέσεσι χωρίζειν . . . τὸ ἀμερὲς καὶ τὸ μεριστὸν . . .) and cf. Iamblichus, De Comm. Math. Scientia, p. 65, 11-15 and 23-24 (Festa). For τὸ καθόλου καὶ τὸ ἀμερές cf. Aristotle, Anal. Post. 100 b 2; Platonic diaeresis does not extend to τὰ καθ' ἔκαστα, of course, save in the sense of "infimae species" sometimes given this term by Aristotle (Anal. Post. 97 b 28-37, De Part. Animal. 642 b 35-36).

' Of the many emendations proposed for the corrupt text of this clause only Bury's, which is here adopted, has any

plausibility in the context.

(1026) τε πρὸς τὸ ἡδὺ καὶ τὸ ἀλγεινὸν αὖθις οἴ τε τῶν ἐρώντων ἐνθουσιασμοὶ καὶ πτοήσεις καὶ διαμάχαι τοῦ φιλοκάλου πρὸς τὸ ἀκόλαστον ἐνδείκνυνται τὸ μικτὸν ἔκ τε τῆς θείας καὶ ἀπαθοῦς ἔκ τε τῆς θνητῆς καὶ περὶ τὰ σώματα παθητῆς μερίδος, ὧν καὶ αὐτὸς ὀνομάζει τὸ μὲν ἐπιθυμίαν ἔμφυτον Ε ἡδονῶν τὸ δ' ἐπείσακτον δόξαν ἐφιεμένην τοῦ ἀρίστου. τὸ γὰρ παθητικὸν ἀναδίδωσιν ἐξ ἑαυτῆς ἡ ψυχή, τοῦ δὲ νοῦ μετέσχεν ἀπὸ τῆς κρείττονος ἀρχῆς ἐγγενομένου.¹

28. Τῆς δὲ διπλῆς κοινωνίας ταύτης οὐδὲ ἡ περὶ τὸν οὐρανὸν ἀπήλλακται φύσις, ἀλλὰ ετερορρεποῦσα νῦν μὲν ὀρθοῦται τῆ ταὐτοῦ περιόδω κράτος ἐχούση καὶ διακυβερνῷ τὸν κόσμον ἔσται δὲ τις χρόνου μοῦρα καὶ γέγονεν ἤδη πολλάκις, ἐν

b See 1029 κ infra (τῷ κρατίστῳ καὶ θειοτάτῳ μέρει) and supra 1024 Λ (τὸ γὰρ νοερὸν . . . ἐκεῖνο μὲν . . . ἀπαθὲς . . .)

with note a on page 215.

° See 1023 n supra (τὸ παθητικὸν ὑπὸ τῶν περὶ τὸ σῶμα ποιστήτων). For this part of the human soul as nıortal cf. Timaeus 61 c 7-8 and 69 c 7-Ε 4, where, however, it is a confection of the "created gods" (cf. also Timaeus 42 n 5-Ε 4) and not derived from "the divisible being" of the psychogony as it is according to Plutarch (see with what follows in this paragraph 1024 a supra [ . . . οὐχ ἐτέραν οὖσαν ἢ τὴν . . . συμπαθῆ τῷ αἰσθητῷ κίνησιν . . .]; cf. Jones, Platonism of Plutarch, p. 12, note 36 and p. 85, note 41).

<sup>d</sup> Plato, Phaedrus 237 D 7-9, cited by Plutarch in Quaest. Conviv. 746 D, where as here he writes ἐπείσακτον instead of Plato's ἐπίκτητος and where he explicitly identifies the latter

<sup>&</sup>lt;sup>a</sup> See De Virtute 447 c (οὐχ ἐνός τινος μεταβολῆς ἀλλὰ δυεῖν ἄμα μάχης καὶ διαφορᾶς) with Quomodo Adulator ab Amico Internoscatur 61 p-f; cf. Galen, De Placitis Hippoc. et Plat. iv, 7 (p. 401, 7-8 [Mueller]).

and painful and the raptures and ecstasies of passionate lovers and the conflicts of probity with incontinence a make plain the mixture of the divine and impassive part b with the part that is mortal and passible in the case of bodies.c Of these Plato himself denominates the latter an innate desire of pleasures and the former an extraneous sentiment longing for what is best, d for the soul puts forth of herself the affective part but partook of intelligence because it got into her from the superior principle.

28. From this dual association the nature of the heavens is not exempt either; but it inclines this way or that, at present being kept straight by the dominant revolution of sameness q and piloting the universe, whereas there will be and often has already been a period of time in which its prudential part with λόγος and the former with πάθος. For the meaning of δόξα in this passage of the Phaedrus cf. G. J. de Vries, A Commentary on the Phaedrus of Plato, p. 85 ad 237 E 2-3 and J. Sprute, Der Begriff der Doxa in der platonischen Philosophie (Göttingen, 1962), p. 113.

· See 1027 A infra (σύμφυτον έγουσαν έν έαυτη την τοῦ κακοῦ μοίραν) and 1024 c supra (ή γάρ αἰσθητική κίνησις, ίδία ψυχής οὖσα, . . .) with note f there. Contrast De Virtute Morali 451 A (ὤσπερ ἐκ ῥίζης τοῦ παθητικοῦ τῆς σαρκὸς ἀναβλαστά-

vortos).

f See 1024 c supra (ὁ δὲ νοῦς . . . ἐγγενόμενος δὲ τῆ ψυχῆ) and 1023 D supra (νοῦν . . . αὐτῆ . . . ή τῆς νοητῆς μέθεξις άρχης έμπεποίηκε); and see also 1016 c supra (ὁ θεὸς . . . καθάπερ είδος . . . τὸ νοερὸν . . . ἀφ' αὐτοῦ παρασχών . . .) with Plat. Quaest. 1001 c and note b there. There is no reason to suppose, however, as Thévenaz does (L'Âme du Monde, p. 71), that by "the superior principle" here Plutarch meant τὸ έν which in 1024 p supra he called the principle of sameness; but see infra 1027 A, note a on page 263.

<sup>9</sup> Cf. Timaeus 36 c 7-D 1 (κράτος δ' ἔδωκεν τῆ ταὐτοῦ . . .
 περιφορᾶ); on the "revolution of sameness" see supra

1024 E. note d.

τῷ αἰσθητῷ κίνησιν . . . ὑφεστῶσαν ἀίδιον . . .).

ο Cf. Timaeus 36 c 5-6 (τὴν μὲν δὴ ταὐτοῦ . . . ἐπὶ δεξιὰ περμήγαγεν . . . , on which of Lustrum, iv [1959], pp. 220-221 [#1039]) and Plutarch, De Iside 369 c (δυεῖν ἀντιπάλων δυνάμεων, τῆς μὲν ἐπὶ τὰ δεξιὰ . . . ὑφηγουμένης τῆς δ' ἔμπαλιν ἀναστρεφούσης καὶ ἀνακλώσης).

d Cf. Politicus 270 D 3-4 and 286 B 9, and see 1015 A

supra with note e there.

\* For the "pattern" see supra 1023 c (page 223, note e)

<sup>&</sup>lt;sup>a</sup> Cf. Politicus 273 c 6-dd 1, quoted by Plutarch at 1015 d supra, and with Plutarch's ἀμβλύνεται ef. ἀμβλύνερον in Politicus 273 d 3. In Phaedrus 248 c 7 the subject of λήθης τε και κακίας πλησθεῖσα βαρυνθῆ is the individual soul. In neither case does Plato mention "falling asleep"; but in 1024 b supra (see note a there) "dreamlike" is applied to the precosmic soul, and Albinus speaks of the soul of the universe or its intelligence as being awakened by god, who turns it to himself (Epitome x, 3 and xiv, 3=pp. 59, 6 and 81, 6-7 [Louis]=pp. 165, 2 and 169, 31-33 [Hermann]). Cf. R. M. Jones, Class. Phil., xxi (1926), pp. 107-108; and J. H. Loenen, Mnemosyne, 4 Ser. x (1957), pp. 51-52, who argues that Albinus got this notion from Plutarch.

## GENERATION OF THE SOUL, 1026-1027

becomes dull and falls asleep, filled with forgetfulness of what is proper to it,<sup>a</sup> while the part intimate with body and sensitive to it from the beginning <sup>b</sup> puts a heavy drag upon the right-hand course of the sum of things <sup>c</sup> and rolls it back <sup>d</sup> without being able, however, to disrupt it entirely, but the better part recovers again and looks up at the pattern <sup>e</sup> when god helps with the turning and guidance.<sup>f</sup> Thus many considerations make it plain to us that the soul is not god's work entirely <sup>g</sup> but that with the portion of evil inherent in her <sup>h</sup> she has been arranged by god, who

and cf. Plato, Republic 540 a 7-9 of the individual soul. The "pattern" here for Plutarch is not god or the "thoughts of god" (cf. Jones, Platonism of Plutarch, p. 102, note 72), whereas according to Albinus in Epitome xiv, 3 (p. 81, 6-9 [Louis]=p. 169, 31-35 [Hermann]) the soul or its intelligence is awakened by god ὅπως ἀποβλέπουσα πρὸς τὰ νοητὰ αὐτοῦ δέχηται τὰ είδη καὶ τὰς μορφάς, ἐφιεμένη τῶν ἐκείνου νοημάπων (cf. in x, 3, p. 59, 2-4 [Louis]=p. 164, 35-37 [Hermann]).

f Cf. Politicus 269 c 4-6 (τὸ πᾶν τόδε τοτὲ μὲν αὐτὸς ὁ θεὸς συμποδηγεί πορευόμενον καὶ συγκυκλεί . . .), 270 A 3, and 273 Ε 1-4; and Republic 617 c 5-7 (την μέν Κλωθώ τη δεξιά χειρί έφαπτομένην συνεπιστρέφειν . . . την έξω περιφοράν). Plutarch in De Defectu Orac. 426 c speaks of the gods των κόσμων . . . τῆ φύσει συναπευθύνοντας ἔκαστον. In the present passage the unexpressed object of συνεπιστρέφοντος καὶ συναπευθύνοντος is to be understood from την ... τοῦ παντός πορείαν supra, though the phrase has sometimes been interpreted in the light of είς ξαυτόν ξπιστρέφει (1024 D supra with note a there) as "conversion" of the soul or intelligence itself (Jones, Platonism of Plutarch, p. 83, note 35; Witt, Albinus, p. 131; Thévenaz, L'Âme du Monde, p. 72). In De Iside 376 B it is the rational motion of the universe itself that ἐπιστοέφει ποτέ καὶ προσάγεται . . . πείθουσα τὴν . . . τυφώνειον εἶτ' αὖθις . . . ἀνέστρεψε. . . .

<sup>9</sup> See 1014 c and 1016 c cited in note f, page 223 supra;

cf. J. H. Loenen, Mnemosyne, 4 Ser. x (1957), p. 47.

<sup>h</sup> See supra 1026 E (with note e there), 1015 A (with note f there) and 1015 E.

(1027) ρίαν δρίσαντος ἵν' οὐσία γένηται πέρατος μετασχούσα τη δέ ταὐτοῦ καὶ τη έτέρου δυνάμει τάξιν ταὶ μεταβολήν καὶ διαφοράν καὶ δμοιότητα συμμίζαντος πασι δε τούτοις, ώς ανυστον ήν, κοινωνίαν προς άλληλα καὶ φιλίαν έργασαμένου δι' ἀριθμῶν

with the one bounded her infinitude that by participation in limit it might become substance <sup>a</sup> and through the agency of sameness and of difference commingled order and change and differentiation and similarity <sup>b</sup> and in all these produced, so far as was feasible, amity and union with one another by means of numbers and concord.<sup>c</sup>

29. These last, though you have often heard and read much talk and writing on the subject, it is as well for me to explain briefly too after giving Plato's passage a as a preface: "First from the total amount he subtracted one portion, and thereafter he subtracted one twice as large as this, and then the third half as large again as the second and three times the first, and the fourth double of the second, and the fifth triple of the third, and the sixth eight times the first, and the seventh twenty-seven times the first. After that he filled in the double and triple intervals by putting in between the former portions portions that he continued to cut off from that original source so as to have in each interval two means, one that exceeds and falls short of the extremes by the same fraction of them and one that exceeds and falls short

rejects (1013 c-D and 1023 D supra) but from this part of which his own present formulation differs only in that the product for Xenocrates was  $\hat{a}\rho\iota\theta\mu\hat{a}s$  while for him it is now  $o\hat{v}o\hat{a}a$ . It is noteworthy moreover that in 1024 D supra (see note f there) Plutarch in opposition to the Xenocratean interpretation declared  $\tau\hat{o}$   $\hat{c}v$  to be the principle of sameness as distinguished from the  $\hat{a}\mu\hat{\epsilon}\rho\iota\sigma\tau$  or  $\hat{v}o\hat{a}a$  of the psychogony.

rows underneath, and concerning their use or function what effect is produced by their employment for

the composition of the soul.

30. First, then, with regard to the first question we shall decline to follow those who say a that it suffices to observe in the ratios themselves the nature of the intervals and of the means with which they are filled in, as the directions are carried out alike with whatever numbers one may assume that have spaces between them to receive the prescribed proportions.<sup>b</sup> Our reason is that, even if what they say be true, by the absence of examples it obscures the understanding of the subject c and debars us from another speculation that has a charm not unphilosophical.d So, if beginning from the unit we place the double and triple numbers alternately e as indicated by Plato himself, the result will be in succession on one side two, four, and eight and on the other side three, nine, and twenty-seven, seven

<sup>a</sup> Perhaps Eudorus, following Crantor (see 1020 c-D

infra).

δ See 1020 A infra (. . . τῶν αὐτῶν λόγων διαμενόντων, ὑποδοχὰς ποιοῦσιν ἀρκούσας . . .) and 1020 το infra (λόγον μὲν ἔχον τὸν αὐτὸν ἀριθμὸν δὲ τὸν διπλάσιον); and with the latter cf. Theon Smyrnaeus, p. 69, 7-9 (Hiller) in the same context: οὐδὲν δὲ κωλύει καὶ ἐφ' ἔτέρων ἀριθμῶν τὸν αὐτὸν εὐρίσκειν λόγον . . . οὐ γὰρ ἀριθμὸν ὡρισμένον ἔλαβεν ὁ Πλάτων ἀλλὰ λόγον ἀριθμοῦ.

numbers in all but, the unit being taken as common, a progressing to four by multiplication. Not only here, in fact, but in many cases does the affinity of the tetrad with the hebdomad become manifest. So thirty-six, the tetractys celebrated by the Pythagoreans, is thought to have a remarkable property in being the sum of the first four even and the first four odd numbers and in coming to be as the fourth pair of the successive numbers added together a: for the first pair is that of one and two and the second (11.) that of three and four and the third that of five and six, none of which pairs either by itself or together with the others produces a square number; \( \)but that of seven and eight \( \) is the fourth, and being

b Cf. Theon Smyrnaeus, p. 95, 2-13 (Hiller).

<sup>e</sup> Cf. Philo Jud., Quaestiones in Exodum ii, 87 (p. 527 [Aucher]=p. 137 (L.C.L.]) and De Specialibus Legibus ii, 40 (v, p. 95, 15-20 [Cohn]); Nicomachus, Excerpta 6 (Musici Scriptores Graeci, p. 277, 18-19 [Jan]) and Nicomachus in Iamblichus, Theolog. Arith., p. 58, 10-19 and

p. 59, 10-18 (De Falco).

d Cf. De Iside 381 r—382 A; Chalcidius, Platonis Timaeus, p. 104, 10-15 (Wrobel)=p. 87, 19-22 (Waszink); Philo Jud., Quaestiones in Genesin iii, 49 (p. 233 [Aucher]=pp. 247-248 [L.C.L.]). In all these passages, as here, one is explicitly an odd number (cf. Theon Smyrnaeus, pp. 21, 24-22, 5 [Hiller]; Speusippus, frag. 4, 22-25 [Lang]), whereas for Plutarch ordinarily three is the first odd number (see 1018 c infra: . . . έκ τε τῆς ἀρχῆς καὶ . . . τοῦ πρώτου περιττοῦ). For 36 as the sum of a "tetractys" formed in a different way cf. Nicomachus, Excerpta 7 and 10 (Musici Scriptores Graeci, pp. 279, 8-15 and 282, 10-14 [Jan]); and for the special properties of 36 see 1018 c-n infra.

<sup>-</sup>B. Müller (1873).

<sup>&</sup>lt;sup>7</sup> The figure as below in the margins of E, e, u, Escor. 72; A with the same numbers in the margins of B, f, m; omitted altogether by r and Aldine (see page 272 infra).

<sup>&</sup>lt;sup>a</sup> For the term "tetractys" used of this figure *ef.* Theon Smyrnaeus, p. 94, 12-14 and p. 95, 2-8 (Hiller) and Chalcidius, *Platonis Timaeus*, p. 104, 15-22 (Wrobel)=pp. 87, 22-88, 2 (Waszink): "... quadratura cognominatur quia continet quattuor quidem limites in duplici latere..."

added to the preceding pairs it gives thirty-six, a square number. The tetractys of the numbers set out by Plato, a however, has been generated in a more consummate way, b the multiplication of the even by even intervals and of the odd by odd; and it contains the unit, to be sure, as being the common principle of even and odd numbers, but of the numbers under the unit contains two and three, the first plane numbers,d and four and nine, the first square numbers, and eight and twenty-seven, the first cubic numbers, the unit being left out of account, which makes it quite obvious that he wishes f them to be arranged not all in one straight line but alternately, that is the even numbers together by themselves and on the other hand the odd numbers as drawn below.9 In this way numbers that are similar to one another

b See 1019 B infra (chap. 14 sub finem) : ὥστε πολὺ τῆς Πυθαγορικῆς . . . τελειοτέραν.

c Cf. Theon Smyrnaeus, p. 94, 15-16 (Hiller) and Chalcidius, Platonis Timaeus, p. 104, 24-25 (Wrobel)=p. 88,

3-4 (Waszink).

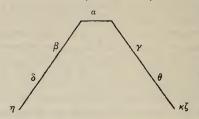

a See also 1022 D infra (ἐπιπέδων ἐπιπέδοις . . .) and De Defectu Orac. 415 E, where in the same context two and three are referred to as "the first two plane numbers." According to Nicomachus (Arithmetica Introductio II, vii, 3 [pp. 86, 21–87, 7, Hoche]) the plane numbers begin with three; and Theon Smyrnaeus in this context calls both two and three "linear" (p. 95, 17-19 [Hiller], cf. p. 23, 11-14), although elsewhere he calls two itself "oblong" (p. 31, 15-17). In De Iside 367 E-F Plutarch himself treats square and oblong numbers as species of plane numbers.

For the expression, ἐπιπέδους · · · τετραγώνους · · · κύ-βους ἐν ἀριθμοῖς, cf. Iamblichus, Theolog. Arith., p. 82, 17 (De

Falco) = Speusippus, frag. 4, 8-9 (Lang).

f See 1027 E supra with note f there.
f i.e. in accordance with Crantor's interpretation (see 1027 D supra with note e there), page 273 infra.

(1017) καὶ ποιήσουσιν ἀριθμοὺς ἐπιφανεῖς κατά τε¹ σύνθεσιν καὶ πολλαπλασιασμὸν ἐξ ἀλλήλων.

b Despite the "five tetrachords" of 1029 A-B infra and the musical significance ascribed to five in De E 389 D-F and De Defectu Orac. 430 A there is to my knowledge no relevant parallel to this enigmatic passage; and in default of one I adopt Tannery's emendation and explanation as the most plausible yet suggested, adding only that the use of τόνος alone as here for "mode" or "scale" is well estab-272

will form the pairs <sup>a</sup> and both by addition and by multiplication with each other will produce remarkable numbers.

12. By addition as follows: two plus three are five, four plus nine are thirteen, and eight plus twenty-seven are thirty-five. These numbers are remarkable, for of them the Pythagoreans called five "tremor," which is to say "sound," thinking that the fifth of the scale's intervals is first to be sounded, called thirteen "leimma," denying as did Plato that the tone is divisible into equal parts, and called

lished (cf. De E 389  $\,^{\rm E}$  [... τοὺς πρώτους εἴτε τόνους ἢ τρόπους εἴθ' ἀρμονίας χρὴ καλεῖν . . .]; Cleonides, Introductio 12 [Musici Scriptores Graeci, pp. 202, 6-8 and 203, 4-6, Jan]; Porphyry, In Ptolemaei Harmonica, p. 82, 3-6 [Düring]), though it is disturbing to find it used in a different sense in the very next clause. For a different interpretation of τὸ πέμπτον cf. H. Weil et Th. Reinach, Plutarque : De la Musique (Paris, 1900), p. LVI, note 5.

<sup>1</sup> See 1018 ε infra with note d there (. . διὸ καὶ τὰ τρια-καίδεκα λεῖμμα καλοῦσιν . . .) and 1020 ε-F infra (. . . οἱ δὲ Πυθαγορικοὶ τὴν μὲν εἰς ἴσα τομὴν ἀπέγνωσαν αὐτοῦ . . .). As for καθάπερ Πλάτων, I take it with what follows (see 1021 D-E infra [. . . καὶ τοῦτ ἐστὶν ὅ φησιν ὁ Πλάτων . .]), giving Plutarch the benefit of the doubt, for Plato did not "call thirteen 'leimma,'" although some said that he had done

so (cf. Theon Smyrnaeus, p. 69, 4-6 [Hiller]).

(1017) κοντα άρμονίαν, ὅτι συνέστηκεν ἐκ δυεῖν κύβων πρώτων¹ ἀπ' ἀρτίου καὶ περιττοῦ γεγονότων ἐκ τεσσάρων δ' ἀριθμῶν, τοῦ ϛ' καὶ τοῦ η' καὶ τοῦ θ' καὶ τοῦ² ιβ', τὴν ἀριθμητικὴν καὶ τὴν άρμονικὴν

## GENERATION OF THE SOUL, 1017-1018

thirty-five "concord" because it consists of the first two cubes produced from even and odd b and of four numbers, six and eight and nine and twelve, which comprise the arithmetical and the harmonic proportion.c The force of this will be more evident in a diagram. Let αβγδ be a rectangular parallelogram with five as the side  $\alpha\beta$  and seven as the side  $\alpha\delta$ ; and, the lesser having been divided into two and three at  $\kappa$  and the greater into three and four at  $\lambda$ , from the points of section let there be produced along  $\kappa\mu\nu$  and  $\lambda\mu\xi$  straight lines that intersect and make ακμλ six, κβξμ nine, λμνδ eight, μξγν twelve, and the whole parallelogram thirty-five, comprising in the numbers of the areas into which it has been divided the ratios of the primary consonances.d For the areas six and eight have the sesquitertian ratio, in which the fourth consists; the areas six and nine the sesquialteran, in which the fifth consists; the areas six and twelve the duple, in which the octave p. 63, 7-23 (De Falco), i.e. Nicomachus (cf. ibid., p. 56, 8-9 and Gnomon, V [1929], p. 554).

b 2<sup>3</sup> +3<sup>3</sup>=35; cf. Iamblichus, Theolog. Arith., p. 63, 7-9

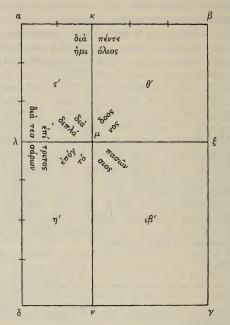

(De Falco).

c i.e. 35=6+8+9+12, in which 8 is the harmonic mean and 9 is the arithmetical mean of the extremes, 6 and 12; see 1019 c-p infra and cf. Nicomachus, Arithmetica Introductio II, xxix, 3-4 (p. 146, 2-23 [Hoche]) and Iamblichus, In Nicomachi Arithmeticam Introductionem, pp. 122, 12-

125, 13 (Pistelli).

<sup>d</sup> See 1019 D infra (τὰ πρῶτα σύμφωνα); cf. Theon Smyrnaeus, p. 51, 18-20 (Hiller), [Alexander], Metaph., p. 834, 1-2, and [Plutarch], De Musica 1139 c-d (... τὰ κυριώτατα διαστήματα ...). Since the octave consists of a fourth and a fifth, only the latter two were usually considered to be strictly "primary" in the sense of "simple" consonances (cf. Ptolemy, Harmonica, p. 11, 24-25 [Düring]; Porphyry, In Ptolemaei Harmonica, p. 96, 12-20 [Düring]).

(1018) ἔνεστι δὲ καὶ ὁ τοῦ τόνου λόγος ἐπόγδοος ὢν¹ ἐν τοῖς ἐννέα καὶ ὀκτώ.² διὰ τοῦτο καὶ³ ἄρμονίαν τὸν

-Escor, 72.

<sup>5</sup> 〈πρώτου〉 -added in margin of Aldine from codex of Donatus Polus and implied by Amyot's version; misplaced by Xylander before the ἀρτίου of διὰ τὴν τοῦ ἀρτίου just above. 6 καὶ τοῦ πρώτου ἀρτίου καὶ περιττοῦ -Wyttenbach; καὶ τοῦ

αρτίου καὶ τοῦ περιττοῦ πρώτου -B. Müller (1873).

b i.e. the pairs of numbers in the triangle of Crantor (1017 E supra [chap. 11 sub finem]), which in the preceding chapter gave the sums 5, 13, and 35, now by multiplication

yield the products 6, 62, and 63.

<sup>c</sup> See Quaest. Conviv. 738 F and Lycurgus v, 13 (42 F) and cf. Euclid, Elements vii, Def. 22; Nicomachus, Arith-

<sup>&</sup>lt;sup>a</sup> Cf. Iamblichus, Theolog. Arith., p. 51, 16-19 and p. 64, 5-13 (De Falco); Censorinus, De Die Natali xi, 5 (pp. 19, 28-20, 2 [Hultsch]); Macrobius, In Somnium Scipionis 1, vi, 15-16; Proclus, In Platonis Rem Publicam ii, pp. 34, 28-35, 23 (Kroll).

the number of days in which it is said seven months' babes are born fully formed.a

13. And again making a fresh start, by multiplication: twice three makes six, four times nine thirtysix, and eight times twenty-seven 216.b Now, six is a perfect number, being equal to the sum of its factors, c and is called marriage by reason of the commixture of the even and odd d; and furthermore it consists of the principle and the (first) even and the first odd number. Thirty-six is the first number at once square and triangular, square from six and triangular from eight f; and it is the result of the multiplication of two squares, nine multiplied by

metica Introductio 1, xvi, 2-3 (pp. 39, 14-40, 22 [Hoche]); Theon Smyrnaeus, p. 45, 10-22 and p. 101, 6-9 (Hiller); Anatolius in Iamblichus, Theolog. Arith., p. 17, 12-13 and p. 42, 19-20 (De Falco).

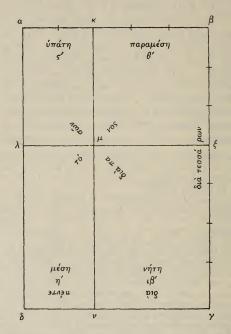

d Cf. Philo Jud., Quaestiones in Genesin iii, 38 (p. 206 [Aucher]=pp. 224-225 [L.C.L.]) with Joannes Lydus, De Mensibus ii, 11 (p. 32, 4-14 [Wuensch]); Clement of Alexandria, Stromata vi, xvi, 139, 3; Anatolius in Iamblichus, Theolog. Arith., p. 43, 3-9 (De Falco).

· For two as the first even number and three as the first odd number see Quaest. Romanae 264 A, De E 388 A, De Defectu Orac. 429 B; and for unity or the monad as ἀρχή άριθμοῦ see De Defectu Orac. 415 Ε (ἔκ τε τῆς ἀρχῆς καὶ τῶν πρώτων . . .) and 1017 p supra with note c there (cf. also Nicomachus, Arithmetica Introductio I, viii, 2-3 = p. 14, 18-19 [Hoche]; Iamblichus, Theolog. Arith., p. 1, 4 [De Falco]; and Macrobius, In Somnium Scipionis 1, vi, 7), but for one treated as the first odd number see 1027 F supra with note d there.

f For triangular numbers see the references in note c on Plat. Quaest. 1003 F supra. The expression  $\frac{n(n+1)}{2}$  is

satisfied for 36 by n=8, and none of the preceding triangular numbers (with the exception of 1) is a square (cf. Theon Smyrnaeus, p. 33, 16-17 [Hiller]).

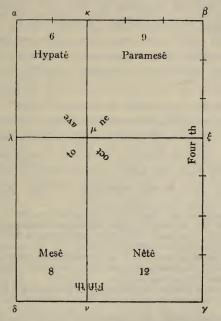

(1018) πολλαπλασιάσαντος, συνθέσει δὲ τριῶν κύβων, τὸ γὰρ εν καὶ τὰ ὀκτὼ καὶ τὰ εἰκοσιεπτὰ συντεθέντα

ποιεῖ τὸν προγεγραμμένον ἀριθμόν. ἔτι δὲ ἑτερο-Το μήκης ἀπὸ δυεῖν πλευρῶν, τῶν μὲν δώδεκα τρὶς

<sup>&</sup>lt;sup>a</sup> For 1 as a cubic number see Quaest. Conviv. 744 B with Iamblichus, Theolog. Arith., p. 77, 9 (De Falco), and cf. Nicomachus, Arithmetica Introductio 11, xv, 3 and xx, 5 280

four, and of the addition of three cubic numbers, for one a and eight and twenty-seven added together

produce the aforesaid number. Moreover, it is an oblong number from two sides, from twelve multi-

(pp. 106, 6-7 and 119, 12-15 [Hoche]); Plutarch himself, however, calls eight the first cubic number (1017 D supra, 1020 D infra, and Quaest. Conviv. 738 F), for which cf. Iamblichus, Theolog. Arith., p. 72, 2 (De Falco): πρῶτον ἐνεργεία κύβον.

(1018) γιγνομένων¹ τῶν δ' ἐννέα τετράκις. ἂν οὖν ἐκτεθῶσιν² αἱ τῶν σχημάτων πλευραί, τοῦ τετραγώνου τὰ ς' καὶ τοῦ τριγώνου τὰ ὀκτὰ καὶ παραλληλογράμμων τοῦ μὲν ἑτέρου τὰ ἐννέα τοῦ δὲ ἑτέρου τὰ ιβ', τοὺς³ τῶν συμφωνιῶν ποιήσουσι λόγους. ἔσται γὰρ τὰ δώδεκα πρὸς μὲν τὰ ἐννέα διὰ τεσσάρων ὡς νήτη πρὸς παραμέσην, πρὸς δὲ τὰ ὀκτὰ διὰ πέντε ὡς νήτη πρὸς μέσην, πρὸς δὲ τὰ ς' διὰ πασῶν ὡς νήτη πρὸς ὑπάτην. ὁ δὲ σις'⁴ κύβος ἐστὶν ἀπὸ ἐξάδος ἴσος τῆ ἑαυτοῦ περιμέτρω.

14. Τοιαύτας δὲ δυνάμεις τῶν ἐκκειμένων ἀριθμῶν ἐχόντων ἴδιον τῷ τελευταίῳ συμβέβηκε, τῷ Εκζ΄, τὸ τοῖς πρὸ αὐτοῦ συντιθεμένοις⁵ ἴσον εἶναι πᾶσιν. ἔστι δὲ καὶ περιοδικὸς σελήνης. καὶ τῶν

1 γ . . . vac. 2 . . . ομένων -r.

<sup>2</sup> ἐντεθῶσιν -r. The figure supra set into text -E; in margin -B; in margin (right angled parallelogram divided into four equal parts with letters and numbers only) -e, u, Escor. 72; figure omitted by f, m, r.

3 Between ιβ' and τοὺς f, m, r, and Aldine repeat καὶ τοῦ τριγώνου . . . παραλληλογράμμων supra; and Escor. 72 repeats

(but brackets) καὶ τοῦ τριγώνου . . . τοῦ μὲν έ.

4 f, m, r, Éscor. 72, Áldine (cf.  $\delta$   $\mu \grave{\epsilon} \nu$  s' and  $\delta$   $\delta \grave{\epsilon}$   $\lambda s'$  in 1018 c supra);  $\delta$   $\delta \grave{\epsilon}$   $\tau \hat{\omega} \nu$   $\sigma \iota s'$  -E, B, e, u  $(\tau \hat{\omega} \nu \ \sigma \iota \beta')$ .

<sup>5</sup> Maurommates ; συντιθέμενον -MSS. (συντιθέμενος -r).

<sup>&</sup>lt;sup>a</sup> Number of this kind is προμήκης and only that of the type n(n+1) is ϵτερομήκης according to Nicomachus, Arithmetica Introductio 11, xvii, 1 and xviii, 2 (pp. 108, 8-109, 11 and 113, 6-18 [Hoche]) and Theon Smyrnaeus, pp. 30, 8-31, 8 (Hiller). Theon himself at least once, however, uses ϵτερομήκης for any oblong number (p. 36, 13-20 [Hiller]), just as Plutarch does here (see also De Iside 367 γ, 282

plied by three and from nine multiplied by four.<sup>a</sup> Now, if the sides of the figures be set out, six the side of the square and eight of the triangular number and of the parallelogrammic numbers <sup>b</sup> nine the side of one and twelve of the other, they will produce the ratios of the consonances, for twelve to nine will be a fourth as nêtê to paramesê, to eight a fifth as nêtê to mesê, and to six an octave as nêtê to hypatê.<sup>c</sup> The number 216 is a cube from six equal to its own perimeter.<sup>d</sup>

14. Of the numbers set out, which possess such properties, the last, twenty-seven, has the peculiar characteristic fof being equal to the sum of all those before it. It is also the periodic number of the

where eighteen [i.e.  $6 \times 3$  or  $9 \times 2$ ] is called  $\epsilon_{\tau\epsilon\rho\rho\mu\dot{\eta}\kappa\eta s}$ ), as Euclid is supposed by Iamblichus to have done (In Nicomachi Arithmeticam Introductionem, pp. 74, 23-75, 4 [Pistelli]), and as Aristotle apparently did (Anal. Post. 73 a 40-b 1 with Philoponus, Anal. Post., p. 62, 15-20). Plato in Theactetus 148 a 1-B 2 used both  $\pi\rho\rho\mu\dot{\eta}\kappa\eta s$  and  $\epsilon\dot{\tau}\epsilon\rho\rho\mu\dot{\eta}\kappa\eta s$  indifferently of all oblong numbers.

b i.e. the oblongs,  $12 \times 3$  and  $9 \times 4$ , supra. Cf. Theon Smyrnaeus (pp. 27, 23–28, 2 [Hiller]), who uses the term for those numbers that in his sense are προμήκεις but not έτερομήκεις, i.e. those of the type n(n+m) where m is not

less than 2.

<sup>c</sup> Cf. [Plutarch], De Musica 1138 E—1139 B and 1140 A; Nicomachus, Harmonices Man. 6 and Excerpta 7 (Musici Scriptores Graeci, pp. 247, 7-26 and 248, 18-26; p. 279, 8-15 [Jan]). For the meaning of nêtê and hypatê see note e on Plat. Quaest. 1007 E supra; the paramesê is one tone higher in pitch than the mesê (cf. Nicomachus in Musici Scriptores Graeci, p. 248, 21-22 [Jan]).

a i.e. 216=63=the sum of the six bounding planes, each

of which is 62.

ε i.e. τῶν ὑπὸ Πλάτωνος ἐκκειμένων ἀριθμῶν (1017 D supra).

See page 251, note a supra.

<sup>9</sup> Cf. Theon Smyrnaeus, p. 96, 5-8 (Hiller).

(1018) ἐμμελῶν διαστημάτων οἱ Πυθαγορικοὶ τὸν τόνον ἐν τούτῳ τῷ ἀριθμῷ τάττουσι διὸ καὶ¹ τὰ τριακαί-δεκα λεῖμμα καλοῦσιν, ἀπολείπει γὰρ μονάδι τοῦ ἡμίσεος. ὅτι δὲ οὖτοι² καὶ τοὺς τῶν συμφωνιῶν λόγους περιέχουσι ῥάδιον καταμαθεῖν. καὶ γὰρ διπλάσιος λόγος ἐστὶν ὁ τῶν δύο πρὸς τὰ δυο τῶν τὸ διὰ πασῶν, καὶ ἡμιόλιος ὁ πρὸς τὰ δύο τῶν τριῶν ἐν ῷ τὸ διὰ πέντε, καὶ ἐπίτριτος ὁ πρὸς τὰ τρία τῶν τεσσάρων ἐν ῷ τὸ διὰ τεσσάρων, καὶ τριπλάσιος ὁ πρὸς τὰ τρία τῶν ἐννέα ἐν ῷ τὸ διὰ Ε πασῶν καὶ διὰ πέντε, καὶ τετραπλάσιος ὁ πρὸς τὰ δύο τῶν ὀκτὼ ἐν ῷ τὸ δὶς³ διὰ πασῶν⁴ ἔνεστι δὲ καὶ

καὶ -omitted by r.
 οὖτοι -omitted by r.
 δὶς -omitted by u.
 δὶς πασῶν καὶ διὰ πέντε -τ.

b See τὰ μελωδούμενα . . . διαστήματα in 1019 A infra with note f there; and for τὰ ἐμμελῆ διαστήματα cf. Dionysius Musicus in Porphyry, In Ptolemaei Harmonica, p. 37, 19-20 (Düring) and Gaudentius, Harmonica Introductio 3 (Musici

Scriptores Graeci, p. 330, 11-16 [Jan]).

<sup>c</sup> Cf. Boethius, De Institutione Musica III, v (pp. 276, 15–277, 1 and p. 277, 16-18 [Friedlein])=Philolaus, frag. A 26 (I, p. 405, 8-15 and 27-28 [D.-K.]). In fact, if the fifth, 284

<sup>&</sup>lt;sup>a</sup> Cf. Aulus Gellius, 1, xx, 6; Favonius Eulogius, De Somnio Scipionis, p. 12, 2-4 (Holder); and Chalcidius, Platonis Timaeus, p. 180, 20-21 (Wrobel)=p. 160, 9-10 (Waszink). The period of 27\frac{1}{2} days, also mentioned by Chalcidius (p. 137, 17-20 [Wrobel]=p. 117, 11-13 [Waszink]), is the approximate tropical month: cf. Geminus, Elementa Astronomiae i, 30 (p. 12, 24-27 [Manitius]); Pliny, N.H. ii, 44; Theon Smyrnaeus, p. 136, 1-3 (Hiller); Macrobius, In Somnium Scipionis I, vi, 50.

moon <sup>a</sup>; and of the melodious intervals <sup>b</sup> the tone is assigned to this number by the Pythagoreans, <sup>c</sup> which is also why they call thirteen "leimma," <sup>d</sup> for it falls short of the half by a unit. And it is easy to see that these numbers also comprise the ratios of the consonances. For the ratio of two to one is duple, in which the octave consists, and that of three to two is sesquialteran, in which the fifth consists, and that of four to three is sesquitertian, in which the fourth consists, and that of nine to three is triple, in which consists the octave plus a fifth, and that of eight to two is quadruple, in which the double octave consists;

fourth, and tone be raised to their least common denominator,

the numerator of the tone is 27.

d See 1017 F supra (page 273, note c). The "leimma" is the ratio 256.243 but was then identified with the difference between these two numbers, as is stated in 1022 A infra ( $\tau \hat{o} \mu \epsilon \tau a \hat{b} \hat{v} \tau \hat{\omega} \nu \sigma \mu \gamma' \kappa a \hat{\iota} \tau \hat{\omega} \nu \sigma \nu \epsilon' \cdot \cdot \cdot$ ) and Boethius, De Institutione Musica III, v (p. 277, 5-7 [Friedlein]) = Philolaus, frag. A 26 (I, p. 405, 19-20 [D.-K.]), a mistake of which Theon Smyrnaeus was aware despite his tendency to fall into

it himself (p. 67, 13-16 and p. 69, 3-14 [Hiller]).

\* The same explanation of the term "leimma," though without the additional mistake of μονάδι (for not thirteen but that of which it is a half falls short of twenty-seven by a unit), is given in 1020 r infra (... δτι τοῦ ἡμίσεος ἀπολείπει) and by Chalcidius (Platonis Timaeus, p. 112, 11-12 [Wrobel]= p. 94, 10-11 [Waszink]) and Gaudentius (Harmonica Introductio 14= Musici Scriptores Graeci, p. 343, 6-10 [Jan]); but the correct explanation, i.e. that it means "the remainder" after two tones have been measured off from a fourth (cf. Proclus, In Platonis Timaeum ii, p. 177, 10-13 and pp. 182, 30–183, 2 [Diehl]; Theon Smyrnaeus, p. 70, 3-6 [Hiller]), is given in 1022 a infra (... περίεστι...διὸ καὶ λεξιμμα ἀνόμαζον).

Cf. Theon Smyrnaeus, p. 95, 14-16 (Hiller); for what follows see De E 389 p and cf. Proclus, In Platonis Timaeum ii, p. 168, 2-8 (Diehl) and Macrobius, In Somnium Scipionis

11, i, 15-20.

<sup>6 &</sup>lt;μ> -added by Maurommates.
7 Ε; συντιθέντες -all other mss., Aldine.

<sup>&</sup>lt;sup>a</sup> The octave plus a fifth (12·4), though expressly included in 1018 E-F supra as the ratio of nine to three, the triple ratio, is (inadvertently?) omitted here, as it is by the MSS. of Chalcidius, *Platonis Timaeus*, p. 101, 4-5 (Wrobel) = p. 84, 22-23 (Waszink).

b Since eight and twenty-seven are cubic numbers, one and four must be the two square numbers (cf. De Defectu Orac. 429 ε [... πρώτων δυεῖν τετραγώνων ... τῆς τε μονάδος

by four, the result is four and eight and twelve and sixteen. These make up the number forty while comprising the ratios of the consonances, for sixteen is four thirds of twelve and twice as much as eight and four times as much as four, and twelve is half again as much as eight and three times as much as four; and these ratios comprise the fourth and the fifth and the octave and the double octave. Then, as to the number forty, it is equal to two square and two cubic numbers taken together, for one and four and eight and twenty-seven are cubic and square numbers amounting to forty when they have been added together. Consequently the Platonic tetractys is much more intricate and consummate in organisation than is the Pythagorean.

15. Since, however, the numbers postulated do not provide room for the means that are being inserted, it was necessary to take higher terms in the same ratios.<sup>d</sup> So one must say what these are. Before that, however, about the means <sup>e</sup>: of these the one

καὶ τῆς τετράδος] and De E 391 A), though one has just been treated as a cubic number (see 1018 c supra with note a on page 281).

<sup>c</sup> See 1017 p, note b supra.

<sup>4</sup> The "numbers postulated" are τῶν ὑπὸ Πλάτωνος ἐκκειμένων ἀριθμῶν (1017 D supra). See 1020 A infra, where after the digression on the means the substance of the present sentence is rephrased more clearly; and cf. Chalcidius, Platonis Timaeus, pp. 106, 24–107, 2 (Wrobel) = p. 89, 19-21 (Waszink).

With what follows cf. Nicomachus, Harmonices Man. 8 (Musici Scriptores Graeci, pp. 250, 12-251, 3 and p. 251, 10-13 [Jan]); Philo Jud., De Opificio Mundi 108-110 (i, pp. 38, 19-39, 11 [Cohn]); Chalcidius, Platonis Timaeus, p. 107, 2-20 (Wrobel)=pp. 89, 22-90, 12 (Waszink);

Martianus Capella, vii, 737.

<sup>a</sup> i.e. exceeds one extreme and falls short of the other. This is clear in *Timaeus* 36 A 4-5 (quoted in 1027 B-c supra) because this clause is preceded by that which defines the

harmonic mean and which contains των ἄκρων.

b Though Plutarch here says that ὑπεναντία is the term used for the harmonic mean by his contemporaries and so uses it in paraphrasing Eudorus (1019 ε infra), Iamblichus says (In Nicomachi Arithmeticam Introductionem, pp. 100, 22–101, 5 and p. 113, 16-22 [Pistelli]) that what was originally called ὑπεναντία was renamed ἀρμονική by the circle of Archytas and Hippasus (cf. Archytas, frag. B 2 [D.-K.]= Porphyry, In Ptolemaei Harmonica, p. 93, 7 and 13-17 [Düring]) and that afterwards the name ὑπεναντία was applied to a new, fourth mean, thought to be contrary to the 200

that exceeds and falls short a by amounts numerically equal men today call arithmetical, and the one that exceeds and falls short of the extremes by the same fraction of them they call subcontrary.<sup>b</sup> Of the arithmetical six and nine and twelve are terms, for nine exceeds six and falls short of twelve by numerical equality; and of the subcontrary six, eight, twelve are terms, for eight exceeds six by two and falls short of twelve by four, and of these two is a third of six and four a third of twelve. So it is characteristic in the arithmetical for the middle to exceed and fall short by the same fraction c and in the subcontrary for it to be inferior to one of the extremes and to surpass the other by the identical fraction of them, for in the former case three is a third of the middle and in the latter four and two are thirds, one of one extreme and the other of the other, for which reason it has been called subcontrary.d And to this they

harmonic (cf. Nicomachus, Arithmetica Introductio II, xxviii, 3=p. 141, 4-16 [Hoche] and Theon Smyrnaeus,

p. 115, 9-11 [Hiller]).

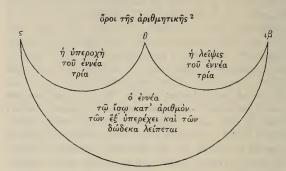

e i.e. by the same fraction of itself. Cf. Nicomachus, Arithmetica Introductio II, xxv, 3 (p. 132, 18-20 [Hoche] and for the whole of Plutarch's sentence ibid., pp. 132, 18-133, 2); Iamblichus, In Nicomachi Arithmeticam Intro-

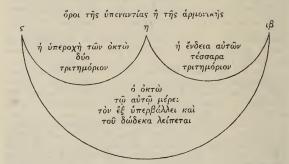

ductionem, p. 114, 5-8 (Pistelli).

<sup>4</sup> Cf. Iamblichus, In Nicomachi Arithmeticam Introductionem, p. 110, 17-23 with pp. 100, 25-101, 1 (Pistelli) and Nicomachus, Arithmetica Introductio II, xxv, 3 (p. 132, 21-22 [Hoche]). The contrariety is identified with another characteristic by Iamblichus, op. cit., p. 111, 18-26 and Boethius, De Institutione Arithmetica II, xlvii (p. 152, 27-31 [Friedlein]); cf. Nicomachus, op. cit. II, xxiii, 6 and xxv, 2 (pp. 126, 1-6 and 132, 11-15 [Hoche]). E. de Strycker (Antiquité Classique, xxi [1952], p. 531, n. 1) defended the latter explanation; Burkert (Weisheit und Wissenschaft, p. 418, n. 98) proposed still another.

relation to the least the octave and by the greatest in relation to the middle term the fifth and by the middle term in relation to the least the fourth, because, the greatest of the terms being placed at nêtê and the least at hypatê, the middle term turns out to be that at mesê, mesê in relation to the greatest making the fifth and in relation to the least the fourth, so that eight turns out to be at the mesê and twelve at nêtê

and six at hypatê.

16. The way the aforesaid means are found is set forth simply and clearly by Eudorus.<sup>a</sup> Of the two consider first the arithmetical. If you set out the extreme terms and take the half of each and add the two halves together, the resulting sum will be the middle term in the case of the double numbers and of the triple alike.<sup>b</sup> In the case of the subcontrary,<sup>c</sup> however, if in the double numbers you set out the extreme terms and take the third of the lesser and the half of the greater, their sum turns out to be the middle term; but in the triple numbers contrariwise you must take half of the lesser and a third of the greater, for the sum of this addition turns out to be the middle term. For let six be least term and

<sup>&</sup>lt;sup>a</sup> The general method of finding the harmonic mean (m), where of the extremes c>a, is given as  $\frac{(c-a)a}{a+c}+a$  by Nico-

eighteen greatest in a triple ratio: then, if of six you take the half, three, and of eighteen the third, six, and add them together, you will have nine, which exceeds and falls short of the extremes by the same fraction of them.a This is the way the means are found; but one must insert them in that designated position and fill up the double and triple intervals.b Of the numbers set out, however, some do not have any room at all between them and others do not have enough; so by increasing them with the same ratios preserved people produce sufficient accommodations for the aforesaid means.d First, for one they substituted as the smallest number six, since it is the first that has both a half and a third; and all those ranged underneath, as drawn below, they made six times as large with room to admit both the means to the double intervals and the triple too. Plato has

machus (Arithmetica Introductio II, xxvii, 7=p. 140, 8-13 [Hoche]), Theon Smyrnaeus (p. 119, 3-16 [Hiller]), and Proclus (In Platonis Timaeum ii, p. 172, 11-18 and pp. 172, 21-173, 4 [Diehl]). None of them gives the simpler formula-

tion,  $m = \frac{2ac}{a+c}$ , although this is implicit in the statement that

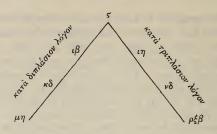

the sum of the extremes multiplied by the mean equals twice the product of the extremes, i.e. m(a+c)=2ac, made both by Nicomachus (op. cit. 11, xxv, 4=p. 133, 5-8 [Hoche] and Harmonices Man. 8= Musici Scriptores Graeci, p. 251, 3-10 [Jan]) and by Theon Smyrnaeus (pp. 114, 25-115, 4 [Hiller]).

monic transposition the whole scale is raised in pitch along with the first of the numbers.<sup>a</sup> Eudorus, then, following Crantor <sup>b</sup> took as the first of the numbers 384,<sup>c</sup> which is the product of six multiplied by 64; and they were attracted by the number 64 because it has 72 as sesquioctavan.<sup>a</sup> It is more in accord with Plato's words, however, to assume the half of this number, for the "leimma" that is left after the sesquioctavans are taken <sup>e</sup> will have its ratio expressed in the numbers that Plato has given, 256 to 243, if 192 is made the first number.<sup>f</sup> If the double of this be made the first number, the "leimma" will be the same in ratio, to be sure, but double in number, being as 512 is to 486, for four thirds of 192 come to

another possibility. Severus adopted 768, twice 384, in order to make the whole scale end with a "leimma" (Proclus, op. cit., ii, pp. 191, 1-192, 12 [Diehl]).

d Contrast Theon Smyrnaeus, pp. 68, 13-69, 1 (Hiller) and Proclus, In Platonis Timaeum ii, p. 177, 3-7 (Diehl).

<sup>e</sup> Cf. 1022 A infra (ἀφαιρουμένου δὲ τούτου [scil. διτόνου] περίεστι τοῦ ὅλου . . .) and Proclus, In Platonis Timaeum ii,

f So it was by Theon Smyrnaeus (pp. 67, 21-68, 12 and 86, 15-87, 3 [Hiller], with which cf. Porphyry, In Ptolemaei Harmonica, p. 130, 9-16 [Düring]), by Chalcidius (Platonis Timaeus, pp. 116, 12-118, 3 [Wrobel]=pp. 98, 3-99, 9 [Waszink]), and by Aristides Quintilianus (De Musica iii, 1 [p. 96, 25-28, Winnington-Ingram]). Plutarch's argument for 192 (see 1021 f—1022 A infra, and cf. Theon Smyrnaeus, p. 69, 3-6 [Hiller]) is invalid, however, first because Plato speaks only of ratios (cf. Theon Smyrnaeus, p. 69, 7-9 [Hiller], and see note d on 1018 f supra) and furthermore because 192 would not serve the purpose of clearing fractions after the first fourth but in the second would give 288, 324, 364½ (cf. Proclus, In Platonis Timaeum ii, p. 177, 8-30 [Diehl]), as Chalcidius himself duly records without recognizing the implication of it (loc. cit., pp. 117, 18-118, 3 [Wrobel]=p. 99, 6-9 [Waszink]).

a i.e. 192 (not Crantor's 384). Plutarch contends in what follows that the use of 64 as multiplier, by which 192 is originally reached, is what made Crantor's procedure appear to be reasonable. In the procedure as given by Proclus (In Platonis Timaeum ii, p. 177, 3-26 [Diehl]) 64 is first taken (lines 3-4; cf. Theon Smyrnaeus, pp. 67, 21-68, 1 [Hiller]) and is then multiplied by three to give 192 (line 8; cf. Plutarch infra and Theon Smyrnaeus, p. 68, 3-4 [Hiller]), and finally 192 is doubled to give 384 (lines 22-26).

256 but of 384 to 512. Raising it to this number <sup>a</sup> is not unreasonable either but even for Crantor and his followers is the source of what is reasonable in their procedure, for 64 is both a cubic number from the first square number and a square number from the first cubic number <sup>b</sup> and, multiplied by three, which is the first odd <sup>c</sup> and first triangular number <sup>d</sup> and the first perfect <sup>e</sup> and first sesquialteran number, <sup>f</sup> makes 192, which itself has a sesquioctavan also, as we shall show. <sup>g</sup>

17. What the "leimma" is and what is Plato's meaning you will perceive more clearly, however, after having first been reminded briefly of the customary statements in the Pythagorean treatises. For an interval in music is all that is encompassed by two sounds dissimilar in pitch h; and of the intervals

<sup>a</sup> See note c on Plat. Quaest. 1003 F supra.

<sup>e</sup> Cf. Quaest. Romanae 288 p. De Iside 374 A, Fabius Maximus iv, 7 (176 p), and Quaest. Conviv. 738 r and 744 p for the different senses in which three and six is each the "first perfect number"; cf. also Anatolius, p. 31, 7-9 (Heiberg) = Iamblichus, Theolog. Arith., p. 17, 4-5 (De Falco) and for six see note c on 1018 c supra.

f. Cf. Nicomachus, Arithmetica Introductio I, xix, 2-3 (p. 49, 10-19 [Hoche]); Theon Smyrnaeus, p. 81, 1-2 (Hiller); Macrobius, In Somnium Scipionis I, vi, 43 ("primus hemiolius tria...").

9 See 1021 F infra.

<sup>h</sup> This is not the same as the definition given in 1026 A supra (page 253, note a) and is not the "Pythagorean" definition but is that of Λristoxenus (Elementa Harmonica i, 15, 25-32) and his followers, as Porphyry says (In Ptolemaei Harmonica, p. 91, 1-3; p. 93, 19-28; p. 125, 16-24; p. 128, 5-6 [Düring]). Cf. Cleonides and Gaudentius in Musici Scriptores Graeci, p. 179, 11-12 and pp. 329, 23-330, 4 (Jan); and Λristides Quintilianus, De Musica i, 7 (p. 10, 18-19 [Winnington-Ingram]).

(1020) λούμενος τόνος, ῷ τὸ διὰ πέντε μεῖζόν ἐστι τοῦ διὰ τεσσάρων. τοῦτον οἱ μὲν ἀρμονικοὶ δίχα τεμνόμενον οἴονται δύο διαστήματα ποιεῖν, ὧν ἑκάτερον ἡμιτόνιον καλοῦσιν· οἱ δὲ Πυθαγορικοὶ τὴν μὲν εἰς ἴσα τομὴν ἀπέγνωσαν αὐτοῦ τῶν δὲ τμημάτων ἀν- Ε΄ ίσων ὄντων λεῖμμα τὸ ἔλαττον ὀνομάζουσιν, ὅτι τοῦ ἡμίσεος¹ ἀπολείπει. διὸ καὶ τῶν συμφωνιῶν τὴν διὰ τεσσάρων οἱ μὲν δυεῖν τόνων καὶ ἡμιτονίου ποιοῦσιν οἱ δὲ δυεῖν καὶ λείμματος. μαρτυρεῖν δὲ δοκεῖ τοῖς μὲν ἀρμονικοῖς ἡ αἴσθησις τοῖς δὲ μαθηματικοῖς ἡ ἀπόδειξις, ἡς τοιοῦτος ὁ τρόπος ἐστίν·

<sup>a</sup> This definition also is not "Pythagorean" but is that of Aristoxenus (*Elementa Harmonica* i, 21, 20-24 and ii, 46, 1-2), sharply criticized by Ptolemy (*Harmonica*, pp. 20, 13-21, 20 [Düring]; cf. Porphyry, In Ptolemaei Harmonica, p. 126, 7-19 [Düring]); cf. Bacchius and Gaudentius (*Musici Scriptores Graeci*, p. 293, 6-7 and p. 338, 11-12 [Jan]) and

Theon Smyrnaeus, p. 53, 5-8 (Hiller).

b Aristoxenus, Elementa Harmonica ii, 46, 3 and 57, 11-12; cf. Theon Smyrnaeus, p. 53, 8-10 (Hiller) and Boethius, De Institutione Musica III, i (p. 268, 21-25 [Friedlein]). By of δρμονικοί here Plutarch means neither theorists earlier than Aristoxenus (Elementa Harmonica i, 2, 8-11 and ii, 40, 25-26) nor "dilettanti" (Maria Timpanaro Cardini, Pitagorici: Testimonianze e Frammenti, Fasc. ii [Firenze, 1962], p. 213 note) but Aristoxenus and his followers, as is confirmed by οί μὲν δυεῦν τόνων καὶ ἡμιτονίου ποιοῦσων infra.

<sup>c</sup> See 1017 F supra (... την είς ἴσα τοῦ τόνου διανομήν ἀπογιγνώσκοντες) and cf. <sup>&</sup>lt;sup>a</sup> The following two experiments are ascribed to "various Pythagoreans" by Porphyry (In Ptolemaei Harmonica, pp. 119, 13–120, 7 [Düring]) and to Pythagoras himself by Censorinus (De Die Natali x, 8-12=pp. 17, 19-19, 2 [Hultsch]). Introduced by the story of the blacksmith's hammers, they are among those ascribed to Pythagoras by Nicomachus (Harmonices Man. 6 = Musici Scriptores Graeci, pp. 246, 5–248, 26 [Jan]), whose account was copied by Iamblichus (Vita Pyth. 115-119). Versions similar to this are given by Gaudentius (Musici Scriptores Graeci, pp. 340, 4—341, 25 [Jan]), Macrobius (In Somnium Scipionis II, i, 9-14), and Boethius (De Institutione Musica I, x-xi). The 306

# GENERATION OF THE SOUL, 1020-1021

as follows. It has been found by observation with instruments that the octave has the duple ratio and the fifth the sesquialteran and the fourth the sesquitertian and the tone the sesquioctavan. It is possible even now to test the truth of this a either by suspending unequal weights from two strings or by making one of two pipes with equal cavities double the length of the other, for of the two pipes the larger will sound lower as hypatê to nêtê and of the strings the one stretched by the double weight will sound higher than the other as nêtê to hypatê. This is an octave.<sup>b</sup> Similarly too, when lengths and weights of three to two are taken, they will produce the fifth and of four to three the fourth, the latter of which has sesquitertian ratio and the former sesquialteran. If the inequality of the weights or the

longest account of such experiments but without the story of the hammers is given—in part from Adrastus—by Theon Smyrnaeus (pp. 57, 1–61, 11; pp. 65, 10–66, 11; p. 66, 20–23 [Hiller]), whereas of them all Chalcidius (Platonis Timaeus, p. 112, 16-19 [Wrobel]=p. 94, 14-16 [Waszink]) mentions—and ascribes to Pythagoras—only that with the suspended weights (cf. Aristides Quintilianus, De Musica iii, 1=pp. 94, 11–95, 7 [Winnington-Ingram]). The experiments were dismissed as "inexact" by Ptolemy (Harmonica, pp. 16, 32–17, 20 [Düring]) but without mention and presumably without knowledge of the physical laws that make their professed results erroneous (cf. Burkert, Weisheit und Wissenschaft, pp. 354-357).

b The double weight would not produce an octave, for the frequency of vibration and hence the pitch varies with the square root of the weight stretching the string. For the opposite effect of increasing the length of the pipe and the weight suspended from the string cf. Nicomachus, Harmonices Man. 4 (Musici Scriptores Graeci, pp. 243, 10–244, 9 [Jan]) and Censorinus, De Die Natali x, 12 (pp. 18, 24–

19, 2 [Hultsch]).

(1021) Βαρών η τών μηκών η άνισότης, ποιήσει διάστημα τονιαίον οὐ σύμφωνον άλλ' έμμελές, ώς είπεῖν έμβραχυ, τω τούς φθόγγους, αν ανά μέρος κρουσθώσι, παρέχειν ήδύ φωνούντας καὶ προσηνές, αν δὲ όμοῦ, τραχὺ² καὶ λυπηρόν ἐν δὲ ταῖς συμφωνίαις, καν όμοῦ κρούωνται καν ἐναλλάξ, ἡδέως προσίεται τὴν συνήχησιν³ ή αἴσθησις. οὐ μὴν ἀλλὰ καί δια λόγου τοῦτο δεικνύουσιν. ἐν μὲν γὰρ άρμονία τὸ διὰ πασῶν ἔκ τε τοῦ διὰ πέντε σύγκειται καὶ τοῦ διὰ τεσσάρων, ἐν δ' ἀριθμοῖς τὸ διπλάσιον ἔκ τε τοῦ ἡμιολίου καὶ τοῦ ἐπιτρίτου· τὰ γὰρ ιβ΄ τῶν μὲν θ' ἐστὶν ἐπίτριτα τῶν δ' η' ἡμιόλια τῶν C δε ς' διπλάσια. σύνθετος οὖν ὁ τοῦ διπλασίου<sup>5</sup> λόγος ἐστὶν ἐκ τοῦ ἡμιολίου καὶ τοῦ ἐπιτρίτου καθάπερ ό τοῦ διὰ πασών ἐκε τοῦ διὰ πέντε καὶ τοῦ διὰ τεσσάρων, ἀλλὰ κάκεῖ τὸ διὰ πέντε τοῦ διὰ τεσσάρων τόνω κάνταῦθα τὸ ἡμιόλιον τοῦ ἐπιτρίτου τῷ ἐπογδόφ μεῖζόν ἐστι. φαίνεται τοίνυν ότι τὸ διὰ πασῶν τὸν διπλάσιον λόγον ἔχει καὶ τὸ διὰ πέντε τὸν ἡμιόλιον καὶ τὸ διὰ τεσσάρων τὸν έπίτριτον καὶ ὁ τόνος τὸν ἐπόγδοον.

a Cf. Nicomachus, Harmonices Man. 6 (Musici Scriptores Graeci, p. 246, 11-14 [Jan]); Ptolemy, Harmonica, p. 15, 10-17 and p. 16, 14-16 and 25-28 (Düring); Theon Smyrnaeus, p. 49, 4-5 and p. 75, 15-17 (Hiller).

lengths be made as nine to eight, however, it will produce an interval, that of the tone, not concordant but tuneful a because, to put it briefly, the notes it gives, if they are struck successively, sound sweet and agreeable but, if struck together, harsh and painful, whereas in the case of consonances, whether they be struck together or alternately, the sense accepts with pleasure the combination of sound.b What is more, they give a rational demonstration of this too.c The reason is that in a musical scale the octave is composed of the fifth and the fourth and arithmetically the duple is composed of the sesquialter and the sesquiterce, for twelve is four thirds of nine and half again as much as eight and twice as much as six. Therefore the ratio of the duple is composite of the sesquialter and the sesquiterce just as that of the octave is of the fifth and the fourth, but in that case the fifth is greater than the fourth by a tone and in this the sesquialter greater than the sesquiterce by a sesquioctave.d It is apparent, then, that the octave has the duple ratio and the fifth the sesquialteran and the fourth the sesquitertian and the tone the sesquioctavan.

18. Now that this has been demonstrated, let us see whether the sesquioctave is susceptible of being

d Cf. Euclid, Sectio Canonis 13.

<sup>a</sup> With the following demonstration cf. Anon. in Platonis Theaetetum (Pap. Berl. 9782), cols. 34, 47-35, 12 (p. 23 [Diels-Schubart]); Aristides Quintilianus, De Musica iii, 1 (pp. 95, 19-96, 4 [Winnington-Ingram]); Boethius, De Institutione Musica III, i (p. 270, 4-18 [Friedlein]); and Proclus, In Platonis Timaeum ii, p. 179, 18-25 (Diehl).

<sup>b</sup> This is inconsistent with the statement that between nine and eight there is no interval. The authors cited in the last preceding note speak of numbers and ratios rather than intervals, whereas Theon Smyrnaeus (p. 70, 1-3 and 15-16 [Hiller]) asserts that the sesquioctave is indivisible because the interval of nine to eight, i.e. the unit, is indivisible.

divided in half, for, if it is not, neither is the tone.a Since nine and eight, the first numbers producing the sesquioctavan ratio, have no intermediate interval but between them when both are doubled the intervening number produces two intervals, b it is clear that, if these intervals are equal, the sesquioctave is divided in half. But now twice nine is eighteen and twice eight sixteen; and between them these numbers contain seventeen, and one of the intervals turns out to be larger and the other smaller, for the former is eighteen seventeenths and the second is seventeen sixteenths. It is into unequal parts, then, that the sesquioctave is divided; and, if this is, the tone is also. Neither of its segments, therefore, when it is divided, turns out to be a semitone; but it c has rightly been called by the mathematicians "leimma." d This is just what Plato says e god in filling in the sesquiterces with the sesquioctaves leaves a fraction of each of them, the ratio of which is 256 to 243. For ! let the fourth be taken as expressed by two numbers comprising the sesquitertian

### GENERATION OF THE SOUL, 1021-1022

ratio, 256 and 192; and of these let the smaller, 192, be placed at the lowest note of the tetrachord and the larger, 256, at the highest.a It is to be proved that, when this is filled in with two sesquioctaves, there is left an interval of the size that numerically expressed is 256 to 243. This is so, for, when the lower note has been raised a tone, which is a sesquioctave, it amounts to 216; and, when this has been raised again another tone, it amounts to 243, for the latter exceeds 216 by 27 and 216 exceeds 192 by 24, and of these 27 is an eighth of 216 and 24 an eighth of 192. Consequently, of these three numbers the largest turns out to be sesquioctavan of the intermediate and the intermediate sesquioctavan of the smallest; and the interval from the smallest to the largest, i.e. that from 192 to 243, amounts to an interval of two tones filled in with two sesquioctaves. When this is subtracted, however, there remains of the whole as an interval left over what is between 243 and 256, that is thirteen; and this is the very reason why they named this number "leimma." b

<sup>a</sup> For the assignment of the larger numbers to the higher notes see 1018 p supra with note c there, and especially [Plutarch], De Musica 1138 E-F, 1139 c, 1140 A and Nicomachus, Harmonices Man. 6 and Excerpta 7 (Musici Scriptores Graeci, p. 248, 18-23 and p. 279, 12-14 [Jan]). For advocacy of the opposite procedure cf. Adrastus in Theon Smyrnaeus, pp. 65, 10-66, 11 (Hiller). On the two procedures cf. Burkert, Weisheit und Wissenschaft, p. 359, n. 54.

b See 1018 E supra with notes d and e there.

 $<sup>^1</sup>$  700 -Maurommates (p. 42 in note ad p. 29, 20), B. Müller (1873); 700s -Mss.  $^2$  < 700 > -added by Stephanus.

γ Maurommates after the version of Xylander; τὸ  $\lambda \epsilon \hat{\mu} \mu \mu \alpha$  τῶν δυοῖν τῶν -Stephanus; τῶν  $\lambda \epsilon \hat{\mu} \mu \alpha$  τῶν δυοῖν τῶν -Stephanus; τῶν  $\lambda \epsilon \hat{\mu} \mu \alpha$  τὸ . . . ? . . . in margin -e); τὸ  $\lambda \epsilon \hat{\mu} \mu \alpha$  δυοῖν τόνοιν -f¹, and m¹ in margin; τὸ  $\lambda \epsilon \hat{\mu} \mu \alpha$  δυοῖν -r¹ in margin.

<sup>8</sup> Stephanus;  $\dot{a}_{\nu\alpha\tau\alpha}\theta\dot{\epsilon}_{\nu\tau\sigma\sigma}$  -E ( $\tau_{\sigma\sigma}$  superscript over  $\theta\epsilon_{\nu}$  erased and replaced by  $\tau_{\sigma\sigma}$  on the line), B, u ( $\dot{a}_{\nu\alpha}$  over 314

So I, for my part, think that Plato's intention is most

clearly explained by these numbers.a

19. As terms of the fourth, however, others b put the high note at 288 and the low at 216 and then determine proportionally those that come next, except that they take the "leimma" to be between the two tones. For, when the lower note has been raised a tone, the result is 243 and, when the higher has been lowered a tone, it is 256, for 243 is nine eighths of 216 and 288 nine eighths of 256, so that each of the two intervals is that of a tone and there is left what is between 243 and 256; and this is not a semitone but is less, for 288 exceeds 256 by 32 and 243 exceeds 216 by 27 but 256 exceeds 243 by thirteen, which is less than half of both the excesses 32 and 27.c Consequently it turns out that the fourth consists of two tones and a "leimma," not of two tones and a half. Such, then, is the demonstration of this point. As to the following point, from what has been said

<sup>a</sup> See 1020 c-D supra with note f on page 301.

<sup>b</sup> The alternative procedure described in the following lines is given by Nicomachus, Excerpta 2 (Musici Scriptores

Graeci, pp. 269, 8-270, 6 [Jan]).

<sup>o</sup> This is not proof that the leimma is less than half of the tone, but the same mistake of substituting for the ratios the differences between their terms is committed by Nicomachus in Excerpta 2 (Musici Scriptores Graeci, p. 270, 4-6 and 6-12 [Jan]; cf. also ibid., pp. 267, 15-268, 2).

a i.e. in Timaeus 36 A 6-B 1 (see 1020 B supra), where in Β 1 Plato says τῷ τοῦ ἐπογδόου διαστήματι τὰ ἐπίτριτα πάντα συνεπληρούτο. In paraphrasing this Nicomachus explicitly included the ἡμιόλια (Harmonices Man. 8 = Musici Scriptores Graeci, p. 250, 10-11 [Jan]), and the filling in of the ημιόλια also was taken for granted by Proclus (In Platonis Timaeum

before it is not very difficult either to see why, after Plato had said that there came to be intervals of three to two and of four to three and of nine to eight, when saying that those of four to three are filled in with those of nine to eight he did not mention those of three to two but omitted them.<sup>a</sup> The reason is that the sesquialter (is greater than) the sesquiterce by the sesquioctave (so that with the sesquioctave's) addition to the sesquiterce the sesquialter is filled in as well.<sup>b</sup>

20. After the exposition of these matters the task of filling in the intervals and inserting the means <sup>c</sup> I should still have left to you for an exercise to do yourselves though no one at all had happened to have done it before; but now that this has been worked out by many excellent men and especially by Crantor and Clearchus and Theodorus, all of Soli, <sup>d</sup> it is not unprofitable to say a few words about the way in which they disagree. For Theodorus unlike those others does not make two rows but sets out the double and the triple numbers one after another in a single straight line, <sup>e</sup> relying for this in the first place

ii, p. 170, 25-26 and p. 175, 3-5 with p. 179, 3-6 and p. 185, 5-6 and 13-16 [Diehl]); cf. B. Kytzler, Hermes, ixxxvii (1959), pp. 401-402.

b Cf. Chalcidius, Platonis Timaeus, p. 115, 11-15 (Wrobel)

= p. 97, 7-10 (Waszink).

See 1020 A supra with note b there.

d Crantor, frag. 6 (Kayser)=frag. 6 (Mullach, Frag. Philos. Graec. iii, pp. 143-145) and Clearchus, frag. 4 (Wehrli); see 1027 p supra (chap. 29 sub finem) with notes d and e there.

6 So later Severus, Porphyry, and Proclus himself (Proclus, *In Platonis Timaeum* ii, p. 171, 4-9; p. 175, 17-21; and p. 192, 24-27 [Diehl]), who does not mention the priority of Theodorus of Soli.

<sup>&</sup>lt;sup>a</sup> Timaeus 36 b 6-7 (ταύτην οὖν τὴν σύστασιν πᾶσαν διπλῆν κατὰ μῆκος σχίσας . . .); cf. Proclus (In Platonis Timaeum ii, p. 237, 15-27 [Diehl] and In Platonis Rem Publicam ii, 318

upon what is stated to be the cleavage of the substance lengthwise that makes two parts presumably out of one,<sup>a</sup> not four out of two, and in the second place saying that it is suitable for the insertions of the means to be arranged in this sequence, as otherwise there will be disorder and confusion and transpositions to the very first triple from the first double of the terms that ought to fill in each of the two.<sup>b</sup> Crantor and his followers,<sup>c</sup> however, are supported by the position of the numbers, paired off with plane numbers over against plane and square over against square and cubic over against cubic numbers,<sup>a</sup> and in their being taken not in order but alternately even and (30 b.) odd by  $\langle Plato | himself \rangle$ .<sup>e</sup> For after

p. 143, 20-21 [Kroll]), who also takes this to show that the numbers were meant to be arranged in a single row.

<sup>b</sup> The harmonic and arithmetical means of the first triple  $(\frac{3}{2}$  and 2) are already given by the first double and its means  $(1, \frac{4}{3}, \frac{3}{2}, 2)$ ; cf. the objection to the lambda of Adrastus made by Proclus, In Platonis Timaeum ii, pp. 187, 28-188,

1 and p. 192, 27-29 (Diehl).

c Among them Clearchus, who was mentioned with Crantor just above, and Plutarch himself. The arrangement in the form of a lambda is assumed later by Theon Smyrnaeus (pp. 94, 11-96, 5 [Hiller]) and Macrobius (In Somnium Scipionis 1, vi, 46); of those who adopted it earlier Proclus names only Adrastus, who elaborated a triple form of it (Proclus, In Platonis Timaeum ii, pp. 170, 26-171, 4; p. 187, 17-26; and p. 192, 24-26 [Diehl]), which is represented by the three successive diagrams of Chalcidius (Platonis Timaeus, pp. 98, 13-118, 3 [Wrobel]=pp. 82, 20-99, 9 [Waszink]).

d See 1017 D-E supra (chap. 11), pages 271, note d-273,

note a.

e In Timaeus 35 B 4-c 2 the order is 2, 3, 4, 9, 8, 27, i.e. alternately even and odd (cf. Macrobius, In Somnium Scipionis 11, ii, 17), whereas the natural order (... 4, 8, 9, 27) would be ... even, even, odd, odd.

(1027) μονάδα κοινήν οὖσαν ἀμφοῖν προτάξας λαμβάνει τὰ η' καὶ ἐφεξης τὰ κζ', μονονουχὶ δεικνύων ἡμιν

1028 ην έκατέρω γένει χώραν ἀποδίδωσι. ταῦτα μὲν οὖν έτέροις προσήκει μᾶλλον έξακριβοῦν, τὸ δ' απολειπόμενον οἰκειόν έστι της ὑποκειμένης ήμιν πραγματείας.

31. Οὐ γὰρ ἐπίδειξιν ὁ Πλάτων θεωρίας μαθηματικής ποιούμενος είς φυσικήν υπόθεσιν μή δεομένην μεσότητας άριθμητικάς καὶ άρμονικάς παρεισήγαγεν άλλὰ ώς μάλιστα δὴ τῆ συστάσει τῆς ψυχης τοῦ λόγου τούτου<sup>2</sup> προσήκοντος. καίτοι τινές μέν έν τοις τάχεσι των πλανωμένων σφαιρων τινές δε μαλλον έν τοις αποστήμασιν ένιοι δ' έν τοις μεγέθεσι των ἀστέρων οι δ' ἄγαν ἀκριβοῦν δο-Β κοῦντες ἐν ταῖς τῶν ἐπικύκλων διαμέτροις ζητοῦσι τας είρημένας αναλογίας, ώς την ψυχην ενεκα τούτων τοῦ δημιουργοῦ τοῖς οὐρανίοις εναρμόσαντος3

1 E, B; μονονουχὶ οὖν -all other MSS., Aldine. 2 τοῦ λόνου τοῦ -u. 3 οὐρανοῖς ἐναρμώσαντες -u.

<sup>a</sup> See 1027 E supra with note a on page 269.

<sup>c</sup> See 1017 E supra (chap. 11) with note f on page 271. d With all that follows in this sentence cf. Proclus, In

Platonis Timaeum ii, pp. 212, 12-213, 7 (Diehl).

f Cf. Chalcidius, Platonis Timaeus, p. 167, 8-17 (Wrobel)

b Plutarch may have in mind here not only the order 9, 8, 27 to which he has just referred but also the omission of 16, the next power of two between 8 and 27 (cf. B. Kytzler, Hermes, lxxxvii [1959], pp. 404-405).

Plato in Timaeus 36 p 5-7 says that of the seven circles three move τάχει . . . ομοίως and four άλλήλοις και τοις τρισίν ανομοίως εν λόγω δε and in Timaeus 39 D 4-5 speaks of άπασῶν τῶν ὀκτώ περιόδων τὰ πρὸς ἄλληλα . . . τάχη (cf. Republic 617 A 7-B 3). For the introduction of "spheres" into the astronomy of the Timaeus see supra Plat. Quaest. 1007 A with note d there.

# GENERATION OF THE SOUL, 1027-1028

putting at the head the unit, which is common to both, a he takes eight and next thereafter twenty-seven, all but showing us the position that he assigns to each of the two kinds. Now, to treat this with greater precision is a task that belongs to others; but what remains is a proper part of our present

disquisition.

31. It is so because Plato did not as a display of mathematical learning drag arithmetical and harmonic means into a discourse on natural philosophy where they are not wanted but introduced them on the assumption that this calculation is especially appropriate to the composition of the soul. Yet certain people <sup>d</sup> look for the prescribed proportions in the velocities of the planetary spheres, <sup>e</sup> certain others rather in their distances, <sup>f</sup> some in the magnitudes of the stars, <sup>g</sup> and those with a reputation for exceedingly exact investigation in the diameters of the epicycles, <sup>h</sup> assuming these to be the ends for which the artificer fitted to the heavenly bodies the

Perhaps by interpretation of Republic 616 E 3-8: cf. Proclus, In Platonis Rem Publicam ii, p. 218, 2-28; p. 219, 23-29; and pp. 221, 28-222, 2 (Kroll) with Theon Smyrnaeus, p. 143, 14-18 (Hiller) and Taylor, Commentary on Plato's

Timaeus, p. 161, n. 2.

<sup>=</sup> p. 148, 12-19 (Waszink); Macrobius, In Somnium Scipionis 11, iii, 14-15 (= Porphyrii in Platonis Timaeum . . . Fragmenta, p. 63, 5-21 [Sodano]); Hippolytus, Refutatio iv, 10, 1-11, 5 (pp. 42, 17-44, 22 [Wendland]). These are all attempts to interpret Timaeus 36 p 2-4, for which cf. Proclus, In Platonis Timaeum ii, p. 265, 8-29 (Diehl).

Against the attempt to introduce epicycles into Plato's astronomy (e.g. Theon Smyrnaeus, pp. 188, 25–189, 6 [Hiller]; Chalcidius, Platonis Timaeus, p. 176, 6-13 [Wrobel] = p. 156, 19-24 [Waszink]) cf. Proclus, In Platonis Timaeum ii, p. 264, 19-25 and iii, p. 96, 13-32 and p. 146, 14-28 (Diehl).

<sup>a</sup> Cf. Plutarch, Numa xi, 1-2 (67 d): . . . τοῦ σύμπαντος κόσμους, οῦ μέσον οἱ Πυθαγορικοὶ τὸ πῦρ ἱδρῦσθαι νομίζουσι καὶ

τοῦθ' Ἑστίαν καλοῦσι καὶ μονάδα. . .

b Central fire and counter-earth identify this as the Pythagorean system referred to by Aristotle (De Caelo 293 a 20-27 and Metaphysics 986 a 10-13) and elsewhere ascribed to Philolaus (frags. A 16 and 17 [D.-K.]); but in that system the orbit of the sun was located immediately above that of the moon (Philolaus, frag. A 16 [D.-K.]; Alexander, Metaph., pp. 38, 20-39, 3 and p. 40, 3-6) as it was by Plato and Aristotle too (cf. Proclus, In Platonis Timaeum iii, pp. 60, 31-61, 2 and p. 62, 3-6 [Diehl] and In Platonis Rem Publicam ii, p. 220, 1-21 [Kroll]). The Pythagoreanizing interpretation of the Timaeus reported by Plutarch in the present passage is a contamination of the Philolaic system and the planetary order widely though not universally adopted later (cf. Heath, Aristarchus of Samos, pp. 106-107; Burkert, Weisheit und Wissenschaft, pp. 297-299, especially 322

soul that had been distributed into seven parts. Many carry over into this context Pythagorean notions too, multiplying by three the distances of the bodies from the middle. This is brought about by placing the unit at the central fire, a three at the counter-earth, nine at the earth and 27 at the moon and 81 at Mercury, 243 at Venus and at the sun itself 729,b which is at the same time a square and a cubic number c; and this is the reason why they sometimes call the sun too a square and a cube.d In this way these people increase the other numbers notes 121, 122, and 129, to which add Plutarch, De Facie 925 A), an order which, if the purpose of it was to make the sun midmost of the planets (cf. Theon Smyrnaeus, p. 138, 16-18 [Hiller]; Chalcidius, Platonis Timaeus, p. 140, 8-9 [Wrobel]=p. 119, 16-18 [Waszink]; Philo Jud., Quis Rerum Div. Heres 222-224 = iii, p. 50, 9-19 [Wendland]; Proclus, In Platonis Timaeum iii, p. 62, 7-9 and 18-22 [Diehl]), is incompatible with a system in which the earth and the counter-earth are planets.

°  $729 = 27^2 = 9^3$ . See the next note infra.

d Not the Pythagoreans to whom the original Philolaic system is ascribed (see the note next but one supra). They are said to have assigned the number seven to the sun as being the seventh of the moving bodies counted inwards from the fixed stars (Alexander, Metaph., pp. 38, 20-39, 3; Asclepius, Metaph., p. 36, 5-11; A. Delatte, Etudes sur la littérature pythagoricienne, p. 169 [Anecdota Arith. A 1. lines 20-22]); and, had they applied the triplication from the central fire as the unit that Plutarch here reports, they would have had to associate the number 81 with the sun. The later order with Mercury and Venus located between the moon and the sun, however, makes the sun seventh from the central fire; and in such triplication or multiplication by any given ratio the seventh number is always both a square and a cube (Philo Jud., De Opificio Mundi 92-94=i, pp. 31, 22-32, 12 [Cohn]; Anatolius, p. 35, 14-21 [Heiberg] and partially in Iamblichus, Theolog. Arith., pp. 54, 13-55, 1 [De Falco]: cf. Theon Smyrnaeus, pp. 34, 16-35, 17 [Hiller]).

(1028) τοις τριπλασιασμοίς, πολύ τοῦ κατὰ λόγον οὖτοί γε παραπαίοντες, εἴ τι² τῶν γεωμετρικῶν ὄφελός έστιν ἀποδείξεων, καὶ μακρῶ πιθανωτέρους παραβαλείν αὐτοίς ἀποδεικνύοντες τοὺς δρμωμένους έκειθεν, οὐδ' αὐτοὺς παντάπασιν έξακριβοῦντας άλλὰ ώς ἔγγιστα λέγοντας⁵ ὅτι τῆς μὲν ἡλίου διαμέτρου πρός τὴν διάμετρον τῆς γῆς λόγος ἐστὶ δωδεκαπλάσιος της δὲ γης αὖ πάλιν διαμέτρου πρός την σελήνης διάμετρον τριπλάσιος ό δε φαινόμενος ελάχιστος των απλανων αστέρων οὐκ ελάττονα της διαμέτρου της γης η τριτημόριον έχει

a They would be Mars: 2187, Jupiter: 6561, Saturn: 19,683, fixed stars: 59,049.

b These are approximately the figures of Hipparchus (the diameters of earth, moon, and sun are as  $1:\frac{1}{3}:12\frac{1}{3}$ ); cf.

Heath, Aristarchus of Samos, pp. 342 and 350.

c That is to say not less than the diameter assigned to the moon by Hipparchus (cf. Boll, R.-E. vi [1909], col. 2411, 6-11). Contrary to the contention that all the fixed stars are 324

also by triplications, a going far astray of what is reasonable, if there is any use in geometrical demonstrations, and proving that in comparison with themselves those who proceed from such demonstrations are far more credible, though these are themselves speaking not with absolute precision either but in close approximations when they say that the ratio of the sun's diameter to the diameter of the earth is twelve to one and of the earth's diameter on the other hand to the moon's diameter is three to one b and that what appears to be the smallest of the fixed stars has a diameter not less than a third part of the diameter of the earth c and that for the whole sphere of the earth to the whole sphere of the moon the ratio is as twenty-seven to  $\langle one \rangle^d$  and that the diameters of Venus and of the earth have the ratio of two to one e and their spheres the ratio of eight to

larger than the earth (e.g. Cleomedes, De Motu Circulari 1, xi, 58 and  $\pi$ , iii, 97 = pp. 106, 2-8 and 176, 11-24 [Ziegler]; Proclus, In Platonis Rem Publicam ii, p. 218, 5-13 [Kroll]) Philoponus (Meteor., p. 15, 18-23) in support of Aristotle (Meteorology 339 b 7-9; cf. Areius Didymus, Epitomes Frag. Phys. 8 [Dox. Graeci, p. 450, 10-11]) cites unnamed astronomers (possibly from Arrian, cf. ibid., p. 15, 13) to the effect that the earth is not smaller than all the fixed stars.

<sup>d</sup> i.e. 3<sup>3</sup>: 1<sup>3</sup> (cf. Euclid, Elements xii, Prop. 18). So Hipparchus as reported by Theon Smyrnaeus, p. 197, 9-12 (Hiller) and Chalcidius, Platonis Timaeus, p. 161, 18-22 (Wrobel)=p. 143, 5-8 (Waszink).

· According to Cleomedes, De Motu Circulari II, iii, 96 (p. 174, 25-27 [Ziegler]) the diameter of Venus is one-sixth that of the sun; it would then be to the earth's diameter as two to one if, as Plutarch has just said (1028 c supra), the sun's diameter is to the earth's as twelve to one. According to Ptolemy Hipparchus said that the apparent diameter of Venus is about a tenth that of the sun (B. R. Goldstein, "The Arabic Version of Ptolemy's Planetary Hypotheses," Trans-

<sup>a</sup> A sixth, a third, and a half of the excess of the longest night over the shortest day if added to the shortest day = the longest day, *i.e.* the day at the summer solstice and not that at the equinox. Plutarch's fractions should have been a twelfth, a sixth, and a fourth as in Cleomedes, *De Motu Circulari* I, vi, 27-28 (pp. 50, 15-52, 2 [Ziegler]) and Martianus Capella, viii, 878.

6 So also Aristides Quintilianus, De Musica iii, 19, who says (p. 119, 15-18 [Winnington-Ingram]), however, that these ratios of the seasons were ascribed to Pythagoras and that (ibid., p. 119, 10-15) they follow from assignment of the numbers eight (that of air) to spring, four (that of fire) to summer, six (that of earth) to autumn, and twelve (that of water) to winter. The correlation of these numbers with the

he subtracts from the day and adds to the night or contrariwise this is the ratio: in the first thirty days after the winter solstice he adds to the day a sixth of the difference by which the longest night exceeded the shortest day and in the next thirty a third and in the rest until the equinox a half, thus equalizing the disparity of the time in sixfold and threefold intervals. The Chaldaeans assert that spring turns out to be related to autumn in the ratio of the fourth and to winter in that of the fifth and to summer in that of the octave. If Euripides is right, however, in distinguishing four months of summer and an equal number of winter

And of dear autumn twain and twain of spring, a

seasons, however, depends upon the correlation in the Timaeus of the four regular solids with air, fire, earth, and water (ibid., pp. 118, 29-119, 9); and it results, moreover, in making three to two, the fifth, the ratio of winter to spring rather than that of spring to winter as professed and required. According to O. Neugebauer (A.J.P., lxiii [1942], pp. 455-458) the ratios were derived from twelve, nine, eight, and six, taken to be the number of days by which spring, summer, winter, and autumn respectively exceed a common measure (really eleven, nine, seven, and six respectively according to Callippus in the Eudoxi Ars Astronomica, col. xxiii=p. 25 [Blass]), so that originally the ratios of these increments or deviations were: spring to autumn (not to summer) as twelve to six (the octave), to summer as twelve to nine (the fourth), and to winter as twelve to eight (the fifth). This is rejected by Burkert (Weisheit und Wissenschaft, p. 333, n. 110), who seems to think that the parallel passage in Aristides Quintilianus makes it wrong to seek the origin of the ratios in any astronomical calculations and that the speculation was obviously meant to show in the numbers the opposition of summer and winter, though in fact neither the ratios nor the numbers in Aristides Quintilianus do this.

# GENERATION OF THE SOUL, 1028-1029

it is in the ratio of an octave that the seasons change. Some people, a moreover, assigning to earth the position of the proslambanomenos b and to the moon the hypatê and having Mercury c and Venus move in the positions of the diatonic parhypatê and lichanos a maintain that the sun himself as mesê holds the octave together, b being at the remove of a fifth from the earth and of a fourth from the sphere of the fixed stars.

32. But the eleverness of these people is not concerned with any truth, and those others do not aim at accuracy at all. To those, however, who think

(Philologus, cv [1961], p. 33, n. 2) thinks that the illogical ἐν διατόνοις καὶ λιχανοῖς was in Plutarch's source. The expression used for Mercury and Venus may be a reference to the fact that the parhypatê and the lichanos are "movable" notes: contrast τοὺς ἐστῶτας (1029 Β infra) and cf. Cleonides, Introductio 6 and Gaudentius, Harmonica Introductio 17 (Musici Scriptores Graeci, pp. 189, 20–190, 5 and p. 345, 4–12 [Jan]); Aristides Quintilianus, De Musica i, 6 (p. 9, 25–26 [Winnington-Ingram]).

\* For the sun as midmost of the seven planets—and so the paradigm of the musical mesê (Nicomachus, Harmonices Man. 3= Musici Scriptores Graeci, p. 242, 2-7 [Jan])—συνάγοντα καὶ συνδέοντα τὰς ἐψ΄ ἐκάτερα αὐτοῦ τριάδας cf. Proclus, In Platonis Timaeum iii, p. 62, 7-9 (Diehl); and for the mesê itself as σύνδεσμος cf. [Aristotle], Problemata

919 a 25-26.

<sup>f</sup> Cf. Censorinus, De Die Natali xiii, 4-5 (p. 23, 18-20 and pp. 23, 27-24, 2 [Hultsch]) and Alexander of Ephesus in Theon Smyrnaeus, p. 140, 8 and 15 with Theon's criticism

ibid., p. 141, 16-19 (Hiller).

° Cf. οὐδ' αὐτοὺς παντάπασιν ἐξακριβοῦντας (1028 c supra), which applies a fortiori to the preceding πολλοί who "carry over into this context Pythagorean notions . . . going far astray of what is reasonable . . " (1028 B-c). It is to these that the ἐκεῖνοὶ here refers and not, as Hubert supposes, to the "Chaldaeans" of 1028 E-F supra.

- (1029) ἔχονται. οἶς δ' οὖν οὐ δοκεῖ ταῦτα τῆς τοῦ Πλάτωνος ἀπηρτῆσθαι διανοίας ἐκεῖνα κομιδῆ φανεῖται τῶν μουσικῶν λόγων ἔχεσθαι, τὸ πέντε τετραχόρδων¹ ὅντων² τῶν ὑπάτων³ καὶ μέσων καὶ συνημμένων καὶ διεζευγμένων⁴ καὶ ὑπερβολαίων ἐν πέντε διαστήμασι τετάχθαι τοὺς πλάνητας, ὧν τὸ μέν

<sup>5</sup> B, f, m, r; ἀέρος -Ε, e, u, Escor. 72, Aldine.

<sup>6</sup> τούτων -r.

<sup>a</sup> Cf. De Defectu Orac. 430 A; Nicomachus, Harmonices Man. 11, 5-6 and Cleonides, Introductio 10 (Musici Scriptores Graeci, pp. 259, 13-260, 4 and p. 201, 8-13 [Jan]).

<sup>b</sup> In De Defectu Orac. 430 A it is not the intervals of the planets that are said to be five but their "periods" (cf. [Plutarch], De Placitis 892 B = Dox. Graeci, p. 363 A 9-15).

<sup>c</sup> So in De Defectu Orac. 430 a (... 'Ηλίον καὶ Φωσφόρου καὶ Στίλβωνος όμοδρομούντων). In [Plato], Epinomis 987 b 4-5 Mercury is said to be όμόδρομος with the sun and Venus; and "Timaeus Locrus" uses διὰ τὸ ὁμοδρομην άλίω of Venus (97 a) just after (96 ε) having called Mercury and Venus ἰσόδρομοι ἀελίω (cf. [Plutarch], De Placitis 889 c and 892 b = Dox. Graeci, p. 346 a 4-6 and p. 363 a 11-13; [Aristotle],

these notions not remote from Plato's meaning the following will appear to be closely connected with the musical ratios, that, there being five tetrachords—those of the lowest and middle and conjunct and disjunct and highest—,<sup>a</sup> the planets have been arranged in five intervals,<sup>b</sup> of which one is that from moon to sun and those that keep pace with the sun, Mercury and Venus,<sup>c</sup> second that from these to the fiery planet of Mars,<sup>d</sup> and third that between this and Jupiter, and then next that extending to Saturn,<sup>e</sup> and finally fifth that from this to the sphere of fixed stars,<sup>f</sup> so that the sounds bounding the tetrachords correspond to the planets.<sup>g</sup> Further-

De Mundo 399 a 8-9; Theon Smyrnaeus, p. 136, 20-21 [Hiller]). Plato himself, however, in Timaeus 38 p 2-3 says that the revolution of Venus and of Mercury is  $\tau \dot{\alpha} \chi \epsilon \iota \dot{\alpha} \dot{\alpha} \delta \rho \rho - \mu o \dot{\gamma} \dot{\lambda} \dot{\epsilon} \dot{\alpha} (cf. 36 \text{ D} 5: \tau \dot{\alpha} \chi \epsilon \iota \dot{\alpha} \dot{\epsilon} \dot{\alpha} \dot{\alpha} \dot{\alpha} \dot{\alpha} \dot{\alpha} \dot{\epsilon} \dot{\alpha})$  in Philo Jud., De Cherubim 22 (i, p. 175, 11-13 [Cohn]) and Philoponus, De Aeternitate Mundi vi, 21 (p. 199, 10-15 [Rabe]). For the form  $\Sigma \tau \dot{\iota} \dot{\lambda} \beta \omega v a$  page 330, note c supra.

<sup>4</sup> Cf. Plutarch, frag. ix, 5 (p. 46, 3 [Bernardakis]) = frag. 157, 80 (Sandbach); [Plutarch], De Placitis, 889 B = Dox. Graeci, pp. 344 A 20-345 A 1; Theon Smyrnaeus, p. 130,

24 (Hiller).

For the form Φαίνωνα see page 330, note c supra.

This reduction of the planetary intervals to five involves not only the mistake of making the orbits of the sun, Mercury, and Venus one and the same but also the inconsistency of counting the interval from Saturn to the fixed stars while at the same time omitting the interval from earth to moon

(cf. Helmer, De An. Proc., p. 59).

The five tetrachords, not being all consecutive, are bounded by seven different notes (cf. Boethius, De Institutione Musica IV, xii = pp. 334, 23-335, 6 [Friedlein]); but in the preceding scheme the five consecutive intervals must be bounded by six terms, one of which, since three of the seven planets constitute a single boundary, cannot be a planet and is in fact the sphere of the fixed stars.

333

(1029) ἔτι τοίνυν τοὺς παλαιοὺς ἴσμεν ὑπάτας¹ μὲν δύο τρεῖς δὲ νήτας μίαν² δὲ μέσην καὶ μίαν παραμέσην τιθεμένους, ὥστε³ τοῖς πλάνησιν ἰσαρίθμους εἶναι τοὺς ἑστῶτας. οἱ δὲ νεώτεροι τὸν προσλαμβανόμενον, τόνῳ διαφέροντα⁴ τῆς ὑπάτης,⁵ ἐπὶ τὸ βαρὺ ὑτάξαντες τὸ μὲν ὅλον σύστημα δὶς διὰ πασῶν ἐποίησαν τῶν δὲ συμφωνιῶν τὴν κατὰ φύσιν οὐκ ἐτήρησαν τάξιν τὸ γὰρ διὰ πέντε πρότερον γίγνεται τοῦ διὰ τεσσάρων, ἐπὶ τὸ βαρὺ τῆ ὑπάτη⁰ τόνου¹ προσληφθέντος. ὁ δὲ Πλάτων δῆλός ἐστιν ἐπὶ τὸ ὀξὺ προσλαμβάνων λέγει γὰρ ἐν τῆ Πολιτεία τῶν ὀκτὰ σφαιρῶν ἑκάστην περιφέρειν [εἶτ']δὲπ' αὐτῆ Σειρῆνα⁰ βεβηκυῖαν, ἄδειν δὲ πάσας ἕνα

<sup>2</sup> νήτεις καὶ μίαν -r.

<sup>3</sup> ev 8è -11.

<sup>4</sup> διαφέροντος -11.

<sup>&</sup>lt;sup>5</sup> τῆς ἐψπάτων ὑπάτης -H. Weil et Th. Reinach, Plutarque: De la musique (Paris, 1900), p. lxix, n. 4.

<sup>6</sup> E, B, f, m, r; ἀπάτη -e, u, Escor. 72, Aldine.
7 E (τόνω -E¹ with ω remade to ου), B, e, u, Escor. 72; τοῦ τόνου -f, m, r, Aldine.

<sup>8</sup> Deleted by Hubert; τὴν -Stephanus.

<sup>&</sup>lt;sup>9</sup> E, B; σειρηναι -e, u, Escor. 72, Aldine: σειρηναν -f, in; σειρηνας -r.

<sup>&</sup>lt;sup>a</sup> i.e., apart from the proslambanomenos, the seven fixed notes that bound the five tetrachords: cf. Boethius, De Institutione Musica iv, xiii (pp. 335, 8–337, 18 [Friedlein]); Cleonides, Introductio 4 and Gaudentius, Harmonica Intro-334

more, we know that the ancients reckon two notes called hypatê and three nêtê but one mesê and one paramesê, so that the stable notes a are equal in number with the planets. The moderns, however, by placing an additional note, the proslambanomenos, lower in the scale than the hypatê, b from which it differs by a tone, made the whole scale a double octave but did not preserve the natural order of the consonances, for the fifth turns out to be prior to the fourth when to the hypatê a tone has been added lower in the scale.d It is obvious, however, that Plato makes the addition to the higher end of the scale, for in the Republic he says e that each of the eight spheres f carries around in its revolution a Siren standing on it and they all sing emitting a single ductio 17 (Musici Scriptores Graeci, p. 185, 16-25 and p. 345. 1-4 [Jan]).

b That is the hypatê of the lowest tetrachord, as would be made explicit by the supplement of Weil-Reinach, της ζύπάτων> ὑπάτης; but τῆ ὑπάτη τόνου προοληφθέντος at the end of the sentence shows that Plutarch wrote simply τῆς ὑπάτης here just as Nicomachus wrote τὴν ὑπάτην for τὴν ὑπάτην (cf. Musici Scriptores Graeci, p. 258, 2-3

[Jan]).

° Ĉf. Nicomachus, Harmonices Man. 11, 4 (Musici Scriptores Graeci, p. 258, 2-11 [Jan]) and Boethius, De Institutione Musica 1, xx (pp. 211, 21-212, 7 [Friedlein]).

a i.e., the scale ought to begin with a tetrachord not increased to a fifth by the tone of the proslambanomenos, for the fourth is "naturally prior" to the fifth: cf. Nicomachus, Harmonices Man. 7, 9, and 12 (Musici Scriptores Graeci, p. 249, 2-19; p. 252, 4-15; and p. 262, 7-11 [Jan]) and Arithmetica Introductio 11, xxvi, 1 (p. 134, 5-15 [Hoche]); Theon Smyrnaeus, p. 66, 12-14 (Hiller).

· Republic 617 B 4-7.

J Plato said not "spheres" but ἐπὶ δὲ τῶν κύκλων . . . ἐφ΄ ἐκάστου. See supra 1028 A with note θ and Plat. Quaest. 1007 A with note d there.

(1029) τόνον¹ ίείσας² εκ δε πασῶν κεράννυσθαι μίαν άρμονίαν. αὖται δ' ἀνιέμεναι τὰ θεῖα εἴρουσι καὶ κατάδουσι³ τῆς ἱερᾶς περιόδου⁴ καὶ χορείας⁵ ὀκτάχορδον⁰ εμμέλειαν ὀκτὰ γὰρ ἦσαν καὶ οἱ πρῶτοι D τῶν διπλασίων καὶ τριπλασίων ὅροι λόγων, εκατέρα προσαριθμουμένης μερίδι τῆς μονάδος. οἱ δὲ πρεσβύτεροι Μούσας παρέδωκαν καὶ ἡμῦν¹ ἐννέα,

ἔνα ⟨ἐκάστην⟩ τόνον -Hubert.
 ² Ε; ἴσας -Β; ἰείσας -all other mss., Aldine.
 ³ Stephanus; εἴρουσαι καὶ κατάδουσαι -mss.
 ⁴ Ε, Β; προόδου -all other mss., Aldine.

<sup>5</sup> E, B; χωρίας -e, u, Escor. 72, Aldine; χορίαις -f, m, r.
<sup>6</sup> τὴν ὀκτάχορδον -f, m, r.

7 mss. (μούσαν -u) ; καὶ Μούσας παρέδωκαν ήμῖν -Pohlenz.

a Each emits one tone (Republic 617 B 6); but even Proclus, who elsewhere states this clearly (In Platonis Rem Publicam ii, pp. 236, 29–237, 1 and p. 238, 15 [Kroll]), says κινεῖ δὲ τὰς Σειρῆνας ἄδειν μίαν φωνὴν ἰείσας ἔνα τόνον . . . (ibid., i, p. 69, 10-12 [Kroll]). Hubert's supplement, therefore, would be a case of improving rather than restoring

what Plutarch wrote.

b Plutarch must assume that the Siren of the moon emits hypatê of the lowest tetrachord and that of Saturn nêtê of the highest so that the additional eighth, that of the fixed stars, would be a tone higher in pitch than the latter. Plato does not say, however, what tone is emitted by which Siren and nothing that he does say would prevent the eighth tone from being understood as an addition to the lower end of the scale, whether the tone highest in pitch or lowest is associated with the moon, for which two opposed theories of. Nicomachus, Harmonices Man. 3 and Excerpta 3 (Musici Scriptores Graeci, pp. 241, 18-242, 11 and pp. 271, 18-273, 24 [Jan]).

° i.e. "relaxed" in the musical sense, referring to the gentle sound of the harmony (cf. De Genio Socratis 590 c-D: ... την πραστητα τῆς φωνῆς ἐκείνης ἐκ πασῶν συνηρμοσμένης) and so differentiating the tones of these Sirens from the shrill song, λυγυρη ἀοιδή of Homer's (Odyssey xii, 44 and 183; cf.

tone a and all are blended into a single concord.6 These Sirens free from strain c entwining things divine d chant a harmony of eight notes over the sacred circuit of the dance, e for eight was also the number of the primary terms of the double and triple ratios, the unit being counted along with each of the two classes. And we too have got from our elders the tradition that there are nine Muses,9

Apollonius Rhodius, iv, 892-893 and 914), λιγυρή being όξεῖα and σύντονος, the opposite of ἀνιεμένη (cf. [Aristotle], De Audibilibus 804 a 21-29). Proclus is at pains to distinguish these two groups of Sirens and in fact maintains that according to Plato there are three different kinds (In Platonis Rem Publicam ii, pp. 238, 21-239, 8 [Kroll] and In Platonis Cratylum, p. 88, 14-26 [Pasquali]).

d Etymologizing Σειρήν, as is shown by Quaest. Conviv. 745 F (. . . Σειρήνας ονομάζειν, είρούσας τὰ θεῖα καὶ λεγούσας έν \*Aιδου . . .), apparently as if from σεῖα (Laconian for θεῖα) εἴρειν. Etym. Magnum 710, 19-20 (Gaisford) has παρὰ τὸ είρω, τὸ λέγω, εἰρήν καὶ πλεονασμώ τοῦ σ, σειρήν. ἢ παρὰ τὸ είρω το συμπλέκω, the latter from Herodian Technicus, Reli-

quiae ii, 1, p. 579, 13-14 (Lenz).

· Cf. Philo Jud., De Mutatione Nominum 72 (iii, p. 169, 27-28 [Wendland]) and De Specialibus Legibus ii, 151 (v, p. 122, 13-15 [Cohn]); [Plato], *Epinomis* 982 E 4-6 from Plato, *Timaeus* 40 c 3-4.

f For the unit as common to both even numbers and odd being counted twice and so giving eight terms (1, 2, 4, 8 and 1, 3, 9, 27) see supra 1018 r-1019 A with note b there, but for the same reason being taken only once and so giving seven terms (1, 2, 4, 8, 3, 9, 27) see 1027 E supra. With οί πρώτοι των . . . ὄροι λόγων here cf. των υποκειμένων αριθμών . . . έδέησε μείζονας όρους λαβεῖν ἐν τοῖς αὐτοῖς λόγοις (1019 Β supra with note d there).

"We too . . .," for this was not the universal belief: cf. Quaest. Conviv. 744 c-745 B (where at the end Plutarch identifies the three Fates of Republic 617 c with the three Delphian Muses) and 746 E; M. Mayer, R.-E. xvi/1 (1933),

a This tacit identification of the Sirens of Republic 617 B 4-7 with the Muses Ammonius in Quaest. Conviv. 745 F is made to assert explicitly after Plutarch in his own person had denied it (ibid. 745 c). It is later denied by Proclus too (In Platonis Rem Publicam ii, p. 237, 16-25 with ii, p. 68, 5-16 [Kroll]), who ascribes it to οί παλαιοί (In Platonis Timaeum ii, p. 208, 9-14 and p. 210, 25-28 [Diehl]). It is explicit in Macrobius, In Somnium Scipionis 11, iii, 1-2 (=Porphyrii in Platonis Timaeum . . . Fragmenta, pp. 59, 11-60, 10 [Sodano]) and implicit in Porphyry, Περί αγαλμάτων, frag. 8 (J. Bidez, Vie de Porphyre, p. 12\*, 14-15) =Eusebius, Praep. Evang. iii, 11, 24 (i, p. 139, 19-20 [Mras]) and Vita Pythagorae 31 (pp. 33, 19-34, 2 [Nauck]) and in the citation of Amelius by Joannes Lydus, De Mensibus iv, 85 (p. 135, 3-7 [Wünsch]). The Muses are not mentioned in the two interpretations of the Sirens given

eight of them, just as Plato says, being occupied with things celestial a and the ninth with those about the earth b to cast a spell upon them recalling them from vagrancy and discord and settling their capriciousness and confusion.

33. Consider, however, whether the heavens and the heavenly bodies are not guided by the soul with her own harmonious motions c when she has become most provident and most just and whether she has not become such by reason of the concordant ratios,d semblances of which are incorporated in the parts of the universe that are visible and seen, that is in bodies, but the primary and fundamental property of which has been invisibly blended in the soul e and

by Theon Smyrnaeus, pp. 146, 9-147, 6 (Hiller) or in that given by Chalcidius, Platonis Timaeus, p. 167, 1-7 (Wrobel)

= p. 148, 6-11 (Waszink).

δ So Ammonius in Quaest. Conviv. 746 A (μία δὲ τὸν μεταξὺ γης καὶ σελήνης τόπον ἐπισκοποῦσα καὶ περιπολοῦσα . . .); cf. ή τε ύποσελήνιος σφαίρα in Porphyry, Περί αγαλμάτων, frag. 8 (cited in the last note supra). Others resolved the difficulty of identifying the nine Muses with Plato's eight Sirens by making the ninth the concord produced by the other eight (Macrobius, In Somnium Scipionis 11, iii, 1-2).

<sup>c</sup> Cf. Porphyry in Proclus, In Platonis Timaeum ii, p. 214, 11 (=Porphyrii in Platonis Timaeum . . . Fragmenta, p. 60, 18-19 [Sodano]) and Proclus himself, ibid. ii, p. 268, 7-8 and p. 279, 10-12 (Diehl); and Simplicius, De Anima, p. 40, 37-38. With the reasons given by Plutarch here for rejecting the astronomical interpretations considered in chaps. 31-32 supra cf. especially Proclus, ibid. ii, p. 212, 28-31 (Diehl).

# GENERATION OF THE SOUL, 1029-1030

renders her concordant and docile, a all her other parts always agreeing with the part that is best and most divine. For the artificer, having taken over c a jangling disorder in the motions of the discordant and stupid soul which was at odds with herself,d distinguished and separated some parts and brought others together with one another and organized them, using concords and numbers e by which when blended and fitted together even the most senseless bodies, stones and logs and the bark of plants and bones and beestings of animals, provide statuary of wonderful appearance and medicines and instruments of wonderful potency. Wherefore it was that Zeno of Citium f summoned the lads to a performance of pipers to observe what a sound is produced by bits of horn and wood and reed and bone when they partake of ratio and consonance. For, while it requires reasoned argument to maintain with the Pythagorean assertion that all things are like unto number, g the fact that for all things in which out of difference and dissimilitude there has come to be some union and consonance with one another the cause is regularity and order consequent upon their participation in

EPITOME OF THE
TREATISE, "ON THE
GENERATION OF THE
SOUL IN THE TIMAEUS"
(COMPENDIUM LIBRI DE ANIMAE
PROCREATIONE IN TIMAEO)

#### INTRODUCTION

This Epitome or "Compendium," which is No. 42 in the Planudean corpus, is not listed in the Catalogue of Lamprias. It is rather an excerpt than an epitome or compendium in the proper sense, for it is merely a copy of chaps. 22-25 (1023 B—1025 B) of the treatise with two short paragraphs by way of introduction. In these the "epitomizer" refers to the author of the treatise in the third person, though not by name, and in summarizing his doctrine ineptly ascribes to him a theory of evil that is vehemently rejected in the treatise. The excerpt itself shows in several places that the "epitomizer" did not clearly understand what he was transcribing; and, though he made one intelligent substitution in his text, he also introduced a supplement that reveals his misunderstanding of a Greek verbal form.

It is practically certain that the Ms. of the treatise from which the excerpt was taken was not one from which any of the extant Mss. of the treatise was copied, for in five cases words absent from all the latter are present in all Mss. of the *Epitome.*<sup>a</sup> The text here printed is based upon  $\alpha$ , A,  $\beta$ ,  $\gamma$ , E, B, and

 $<sup>^</sup>a$  1031 c (ξκαστα), 1031 d (πάλιν), 1031 e (καὶ), 1032 d (πλανήτων), 1032 e (τὴν). See besides these the correct forms in all the mss. of the *Epitome*: ἀεικίνητος (1031 A), ἄκρα τὸ (1032 e), τοῦ ταὐτοῦ (1032 f).

# EPITOME OF GEN. OF SOUL

n, all of which have been collated from photostats. Their readings are fully reported in the apparatus; and so are those of Laurent. Conv. Soppr. 180, which was collated as a sample of the other Mss. containing the Epitome (cf. Hubert-Drexler, Moralia vi/1, pp. xvii-xviii). For the few readings cited of Vat. Reg. 80 I have depended upon the Variae Lectiones of Cruser-Xylander and the reports of Hubert-Drexler and upon the latter for those of Marc. Append. IV, 1 and Urb. 100(t). There are few decisive indications in this work of the relation among the Mss. collated; but in several cases B and n are in agreement against all the others, and it is quite clear that the scribe of B did not copy the Epitome from E.a

<sup>&</sup>lt;sup>a</sup> See 1030 ε (ἀναλογίας καὶ; ἀναλογικὰς -B, n), 1031 α (περιλαμβάνων; παραλαμβάνων -B, n), 1031 ε (νοερὸν ἡ φύσις; νοερὸν ιόσπερ ἡ φύσις -B, n), 1032 α (πως omitted by B, n). In all these cases the Aldine is in disagreement with B and n.

#### 1030 **D** ΕΠΙΤΟΜΗ ΤΟΥ ΠΕΡΙ' ΤΗΣ ΕΝ ΤΩΙ ΤΙΜΑΙΩΙ ΨΥΧΟΓΟΝΙΑΣ

1. 'Ο περί της έν τῷ Τιμαίῳ ψυχογονίας ἐπιγεγραμμένος λόγος όσα Πλάτωνι καὶ τοῖς Πλατω-Ε νικοῖς πεφιλοτίμηται ἀπαγγέλλει εἰσάγει δὲ καὶ γεωμετρικάς τινας αναλογίας καὶ ὁμοιότητας πρὸς την της ψυχης, ώς οιεται, θεωρίαν συντεινούσας αὐτῷ καὶ δὴ καὶ μουσικὰ καὶ ἀριθμητικὰ θεωρήματα.

2. Λέγει δὲ τὴν ὕλην διαμορφωθήναι ὑπὸ τῆς ψυχης και δίδωσι μεν τῷ παντί ψυχην δίδωσι δε καὶ ἐκάστω ζώω τὴν διοικοῦσαν αὐτό, καὶ πῆ μὲν άγένητον εἰσάγει ταύτην πῆ δὲ γενέσει δουλεύουσαν αίδιον δὲ τὴν ὕλην καὶ ὑπὸ τοῦ θείου διὰ τῆς ψυχης μορφωθήναι καὶ τὴν κακίαν δὲ βλάστημα της ύλης γεγονέναι, ίνα μή, φησί, τὸ θείον αἴτιον F των κακών νομισθείη.

3. "Ότι οἱ περὶ τὸν Ποσειδώνιον οὐ μακρὰν τῆς

<sup>1</sup>  $\tau \circ \hat{v} \pi \epsilon \rho \hat{i}$  -omitted by  $\beta$ . <sup>2</sup> ἀναλογικὰς ὁμοιότητας -Β, n. 3 αὐτῶ -y, Laurent. C. S. 180. 4 a; avéventor -all other MSS., Aldine.

<sup>&</sup>lt;sup>a</sup> The epitomizer passes without notice from the treatise to its author.

b See supra 1016 с and 1017 л-в.

<sup>&</sup>lt;sup>c</sup> See supra 1014 B and in the final chapter 1029 D-E and 1030 c, with which of. Plat. Quaest. 1003 A.

# EPITOME OF THE TREATISE, "ON THE GENERATION OF THE SOUL IN THE TIMAEUS"

- 1. The treatise entitled On the Generation of the Soul in the Timaeus reports what all the contentions of Plato and the Platonists have been and also introduces certain geometrical proportions and similarities pertaining, as he thinks, a to his theory of the soul and particularly musical and arithmetical speculations.
- 2. He asserts, moreover, that matter was shaped by soul and ascribes a soul to the universe but ascribes to each living being also the one that manages it; and he represents this as being in one way ungenerated and in another subject to generation b but matter as everlasting and given shape by the divinity through the agency of the soul as being in origin an excrescence of matter, in order, he says, that the divinity might not be thought responsible for evil things.

3. He says that Posidonius and his followers e did

<sup>a</sup> As B. Müller observed (*Hermes*, iv [1870], p. 396, n. 1) this is the very opposite to Plutarch's contention in the treatise (see 1015 c-E supra).

• = F141 b (Edelstein-Kidd). Save for the differences indicated in the notes the rest of the *Epitoms* is an exact copy

of De An. Proc. in Timaeo 1023 B -1025 B sunra.

(1030) ὕλης ἀπέστησαν τὴν ψυχὴν¹ ἀλλὰ δεξάμενοι τὴν τῶν περάτων οὐσίαν περὶ τὰ σώματα λέγεσθαι μεριστὴν καὶ ταῦτα τῷ νοητῷ μίξαντες ἀπεφήναντο τὴν ψυχὴν ἰδέαν εἶναι τοῦ πάντη διαστατοῦ

ναντο την ψυχην ιδεαν είναι του παντη διαστατου 1031 κατ' ἀριθμόν συνεστώσαν άρμονίαν περιέχοντα· τά τε γὰρ μαθηματικὰ² τῶν πρώτων νοητῶν μεταξὺ καὶ τῶν αἰσθητῶν τετάχθαι, τῆς τε ψυχῆς, τῷ νοητῷ³ τὸ ἀίδιον καὶ τῷ αἰσθητικῷ⁴ τὸ παθητικὸν ἐχούσης, προσῆκον ἐν μέσῳ τὴν οὐσίαν ὑπάρχειν. ἔλαθε γὰρ καὶ τούτους ὁ θεὸς τοῖς τῶν σωμάτων πέρασιν ὕστερον, ἀπειργασμένης ἤδη τῆς ψυχῆς, χρώμενος ἐπὶ τὴν τῆς ὕλης διαμόρφωσιν, τὸ σκεδαστὸν αὐτῆς καὶ ἀσύνδετον ὁρίζων καὶ περιλαμβάνων⁵ ταῖς ἐκ τῶν τριγώνων συναρμοττομένων ἐπιφανείαις. ἀτοπώτερον δὲ⁴ τὸ τὴν ψυχὴν ἰδέαν ποιεῖν· ἡ μὲν γὰρ ἀεικίνητος ἡ δ' ἀκίνητος, καὶ ἡ μὲν ἀμιγὴς πρὸς τὸ αἰσθητὸν ἡ δὲ τῷ σώματι συν-Β ειργμένη.¹ πρὸς δὲ τούτοις ὁ θεὸς τῆς μὲν ἰδέας ὡς παραδείγματος γέγονε μιμητὴς τῆς δὲ ψυχῆς ὥσπερ ἀποτελέσματος δημιουργός. ὅτι δ' οὐδ'

<sup>7</sup> συνειργομένη -B, n, Laurent. C. S. 180; συνηργμένη -Vat. Reg. 80.

<sup>&</sup>lt;sup>a</sup> The epitomizer misunderstood the second aorist ἀπέστησαν (1023 в supra) and, supposing it to be transitive, added the object, τὴν ψυχήν, that he thought was to be "supplied." The original was correctly translated by Turnebus and Amyot; but Xylander misunderstood it just as the epitomizer had done, and his mistake has been repeated by

# EPITOME OF GEN. OF SOUL, 1030-1031

not remove the soul a far from matter but, having taken divisible in the case of bodies to mean the being of the limits and having mixed these with the intelligible, they declared the soul to be the idea of what is everyway extended, herself constituted according to number that embraces concord, for (they said) the mathematicals have been ranked between the primary intelligibles and the perceptibles and it is an appropriate thing for the soul likewise, possessing as she does everlastingness with the intelligible and passivity with the perceptive, b to have her being in the middle. In fact these people too failed to notice that only later, after the soul has already been produced, does god use the limits of the bodies for the shaping of matter by bounding and circumscribing its dispersiveness and incoherence with the surfaces made of the triangles fitted together. What is more absurd, however, is to make the soul an idea, for the former is perpetually in motion but the latter is immobile and the latter cannot mix with the perceptible but the former has been coupled with body; and, besides, god's relation to the idea is that of imitator to pattern but his relation to the soul is that of artificer to finished product. As to number, however, it has been stated

Helmer (De An. Proc., p. 16, n. 21), Thévenaz (L'Âme du Monde, p. 26), Merlan (Platonism to Neoplatonism, p. 35), and Marie Laffranque (Poseidonios d'Apamée [Paris, 1964],

p. 431).

 $^{b}$  τ $\hat{\omega}$  νοητ $\hat{\omega}$  . . τ $\hat{\omega}$  aloθητικ $\hat{\omega}$  is a mistake whether of the epitomizer's own or of his original for τ $\hat{\omega}$ ν νοητ $\hat{\omega}$ ν . . . τ $\hat{\omega}$ ν aloθητ $\hat{\omega}$ ν (1023 в supra, where, however, all Mss. except E and B have aloθητικ $\hat{\omega}$ ν). It is uncertain what the epitomizer thought the text as he wrote it could mean—if indeed he thought about it at all.

- (1031) ἀριθμὸν ὁ Πλάτων τὴν οὐσίαν τίθεται τῆς ψυχῆς ἀλλὰ ταττομένην ὑπ' ἀριθμοῦ, προείρηται.
  - 4. Πρὸς δ' ἀμφοτέροις τούτοις¹ κοινόν ἐστι τὸ μήτε τοῖς πέρασι μήτε τοῖς ἀριθμοῖς μηδὲν ἴχνος ἐνυπάρχειν ἐκείνης τῆς δυνάμεως ἢ τὸ αἰσθητὸν ἡ ψυχὴ πέφυκε κρίνειν. νοῦν μὲν γὰρ αὐτῆ καὶ νοητὸν² ἡ τῆς νοητῆς μέθεξις ἀρχῆς ἐμπεποίηκε· δόξας δὲ καὶ πίστεις καὶ τὸ φανταστικὸν καὶ τὸ παθητικὸν³ ὑπὸ τῶν περὶ τὸ σῶμα ποιοτήτων [δ]⁴ οὐκ ἄν τις ἐκ μονάδων οὐδὲ γραμμῶν⁵ οὐδ' ἐπι-C φανειῶν ἀπλῶς νοήσειεν ἐγγινόμενον. καὶ μὴν οὐ μόνον αἱ τῶν θνητῶν ψυχαὶ γνωστικὴν τοῦ αἰσθητοῦ δύναμιν ἔχουσιν, ἀλλὰ καὶ τὴν τοῦ κύκλου φησὶν ἀνακυκλουμένην αὐτὴν πρὸς ἑαυτήν, ὅταν οὐσίαν σκεδαστὴν ἔχοντός τινος¹ ἐφάπτηται καὶ ὅταν ἀμέριστον, λέγη⁰ κινουμένην διὰ πάσης⁰ ἑαυτῆς, ὅτω ἄν² τι¹¹ ταὐτὸν ἢ καὶ ὅτου¹² ἂν ἔτερον,

# EPITOME OF GEN. OF SOUL, 1031

above <sup>a</sup> that Plato regards the substance of soul not as number either but as being ordered by number.

4. Besides both of these, moreover, there is equally b the argument that neither in limits nor in numbers is there any trace of that faculty with which the soul naturally forms judgments of what is perceptible. Intelligence and intelligibility have been produced in her by participation in the intelligible principle; but opinions and beliefs, that is to say what is imaginative and impressionable by the qualities in body, one could not conceive [. . .] as arising in her simply from units or from lines or surfaces. Now, not only do the souls of mortal beings have a faculty that is cognizant of the perceptible; but he says of that the soul of the circle d also as she is revolving upon herself, whenever she touches anything that has being either dispersed or indivisible, is moved throughout herself and states of anything's being the same and different with

<sup>a</sup> Thoughtlessly copied from 1023 D, for neither the passage to which it refers (1013 c-D) nor its content has been mentioned in this "epitome."

b Plutarch's κοινόν was made meaningless when the epitomizer mistook ἀμφοτέρους τούτους for ἀμφοτέροις τούτοις (see 1023 p supra: "... against both of these in common...").

° Plato, Timaeus 37 A 5-B 3.

d This is the epitomizer's mistake for "the soul of the

universe" (1023 p supra).

<sup>e</sup> I translate as if the correct λέγειν stood here (see 1023 ε supra), for with λέγη, which the epitomizer certainly wrote, it is impossible to construe the sentence at all.

<sup>&</sup>lt;sup>a</sup> From this point on the construction of the original is radically altered by the erroneous καὶ τὰ γιγνόμενα which 356

# EPITOME OF GEN. OF SOUL, 1031

regard to whatever it is so precisely the respect and context and manner in which a even the things that come to be happen to be or to have as attribute either of these in relation to each. As in these words he is simultaneously giving an outline of the ten categories too, in those that follow he states the case more clearly still, for he says b: "Whenever true discourse is concerning itself about the perceptible and the circle of difference running aright conveys the message through all its soul, there arise opinions and beliefs steadfast and true; but, whenever on the other hand again it is concerned about the rational and the circle of sameness running smoothly gives the information, knowledge is of necessity produced; and, if anyone ever calls by another name than soul that one of existing things in which these two come to be, he will be speaking anything but the truth." Whence, then, did the soul get this motion that can apprehend what is perceptible and form opinions of it, a motion different from that which is intelligible c and issues in knowledge? It is difficult to say without steadfastly maintaining that in the present passage d he is constructing not soul in the absolute sense but the soul

the epitomizer wrote instead of κατά τὰ γιγνόμενα (see 1023 E supra). On the other hand, the Ms. that he excerpted must have contained the correct exacta (cf. Timaeus 37 B 2) that is lacking in all our Mss. of the treatise.

b Timaeus 37 B 3-c 5.

<sup>c</sup> The treatise here has "intellective" (1023 r supra:

νοητικής), but the epitomizer probably wrote νοητής.

<sup>d</sup> This refers to neither of the two passages just mentioned but to Timaeus 35 A 1-B 4, which is quoted at the beginning of the treatise (1012 B-c supra) but has not been mentioned in the Epitome at all.

(1031) Ε έξ ύποκειμένης της τε κρείττονος οὐσίας καὶ ἀμερίστου καὶ τῆς χείρονος, ἡν περί² τὰ σώματα μεριστήν κέκληκεν, οὐχ έτέραν οὖσαν ἢ τὴν δοξαστικήν καὶ φανταστικήν καὶ συμπαθή τῶν αἰσθητῶν κίνησιν, οὐ γενομένην ἀλλὰ ὑφεστῶσαν ἀίδιον ωσπερ ή έτέρα. τὸ γὰρ νοερὸν ή φύσις<sup>5</sup> ἔχουσα καὶ τὸ δοξαστικὸν είχεν άλλ' ἐκεῖνο μὲν ἀκίνητον καὶ ἀπαθὲς καὶ περὶ τὴν ἀεὶ μένουσαν ίδρυμένον οὐσίαν τοῦτο δὲ μεριστὸν καὶ πλανητόν, ἄτε δὴ φερομένης καὶ σκεδαννυμένης ἐφαπτόμενον ὕλης. ούτε γὰρ τὸ αἰσθητὸν εἰλήχει τάξεως ἀλλ' ἡν ἄμορφον καὶ ἀόριστον, ή τε περὶ τοῦτο τεταγμένη δύνα-Γ μις ούτε δόξας ενάρθρους ούτε κινήσεις απάσας έχουσα<sup>6</sup> τεταγμένας άλλα τας πολλας ενυπνιώδεις καὶ παραφόρους καὶ ταραττούσας τὸ σωματοειδές, όσα μή κατά τύχην τῷ βελτίονι περιέπιπτεν ἐν μέσω γαρ ην αμφοίν και πρός αμφότερα συμπαθη 1032 καὶ συγγενη φύσιν είχε, τῷ μὲν αἰσθητικῷ τῆς

9 MSS.; aὐτὸς -1024 B supra.

<sup>&</sup>lt;sup>a</sup> Misled by  $\tau \eta s$  . . . οὐσίαs, which follows immediately, the epitomizer may have misread an abbreviation of the final syllable of ὑποκειμένων in the original (1024 A supra). Both entities, of course, were already available to the artificer.

of the universe out of being that is already available, a the superior, that is to say indivisible, and the inferior, which he has called divisible in the case of bodies, this latter being none other than the opinionative and imaginative motion sensitive of the perceptibles, b not brought into being but having subsisted everlastingly just like the former. For nature possessing intellectuality possessed the opinionative faculty also, the former, however, immobile and impassive and settled about the being that always remains fixed but the latter divisible and erratic inasmuch as it was in contact with matter which was in motion and dispersion. The fact is that the perceptible had not got any portion of order but was amorphous and indefinite; and the faculty stationed about this was one having e neither articulate opinions nor motions that were all orderly, but most of them were dreamlike and deranged and were disturbing corporeality save in so far as it would by chance encounter that which is the better, for it was intermediate between the two and had a nature sensitive and akin to both, with its perceptivity laying hold on matter and with its discernment on the intelligibles.

5. In terms that go something like this Plato d too states the case clearly, for he says : "Let this be

<sup>&</sup>lt;sup>b</sup> This is the epitomizer's error for "sensitive to what is perceptible" in the original.

<sup>&</sup>lt;sup>c</sup> I attempt in this way to render ἔχουσα, a mistake for εἶχε that was probably in the epitomizer's original, for it is common to all the MSS. here and most of those of the treatise (see 1024 B supra).

<sup>&</sup>lt;sup>a</sup> Here the epitomizer not unintelligently substituted the name of Plato for "he... himself" of his original.

<sup>·</sup> Timaeus 52 D 2-4.

# EPITOME OF GEN. OF SOUL, 1032

the account rendered in summation as reckoned from my calculation, that real existence and space and becoming were three and distinct even before heaven came to be." Now, it is matter that he also calls space, as he sometimes calls it abode and receptacle, and the intelligible that he calls real existence; and what he calls becoming, the universe not yet having come to be, is nothing other than that being involved in changes and motions which, ranged between what makes impressions and what receives them, disperses in this world the semblances from that world yonder. For this very reason it was called divisible and also because it is necessary for that which is perceiving and that which is forming mental images to be divided in correspondence with what is perceptible and with what is imaginable and to be coextensive with them, for the motion of sense-perception, which is the soul's own, moves towards what is perceptible without but the intelligence, while it was abiding and immobile all by itself, upon having got into the soul and taken control makes her turn around to him and with her accomplishes about that which always remains fixed a the circular motion most closely in contact with real existence. This is also why the union of them proved to be a difficult fusion, mixing the divisibility of the indivisibles and the

a It is probable that the epitomizer faithfully copied τὸ μέν ἀεὶ from his original; but, if so, he could not have construed the phrase at all.

# EPITOME OF GEN. OF SOUL, 1032

thorough transience of the utterly immobile a and constraining difference to unite with sameness. Difference is not motion, however, as sameness is not rest either, but the principle of differentiation and dissimilitude. In fact, each of the two derives from another of two principles, sameness from the one and difference from the dvad; and it is first here in the soul that they have been commingled, bound together by numbers and ratios and harmonious means, and that difference come to be in sameness produces differentiation but sameness in difference order, as is clear in the case of the soul's primary faculties. These are the faculties of discernment and motivity. Now, directly in the heaven motion exhibits diversity in identity by the revolution of the fixed stars and identity in diversity by the order of the planets, for in the former sameness predominates but its opposite in the things about the earth. Discernment, however, has two principles, intelligence proceeding from sameness to universals and sense-perception from difference to particulars; and reason is a blend of both, becoming intellection in the case of the intelligibles and opinion in the case of the perceptibles and employing between them mental images and memories as instruments, of which the former are produced by difference in sameness and the latter by sameness in difference. For intellection is motion of the mover b about what remains fixed,

<sup>b</sup> This is the epitomizer's own mistake for "motion of what is cognizing" (1024 r supra).

a The nonsense of this clause is the result of the epitomizer's reading as genitive plurals the dative singulars of 1024 p supra, a mistake that he made in 1031 E supra also.

<sup>7</sup> κινούντος -MSS.: νοούντος -Leonicus from 1024 F supra.

(1032) μένον, ή δὲ δόξα μονή τοῦ αἰσθανομένου περὶ τὸ κινούμενον· φαντασίαν δὲ συμπλοκήν δόξης πρὸς Ε αἴσθησιν οὖσαν ἴστησιν ἐν μνήμη τὸ ταὐτὸν τὸ δὲ θάτερον κινεῖ πάλιν ἐν διαφορῷ τοῦ πρόσθεν καὶ νῦν, ἐτερότητος ἄμα καὶ ταὐτότητος ἐφαπτόμενον.

6. Δεῖ δὲ τὴν περὶ τὸ σῶμα τοῦ κόσμου γενομένην σύνταξιν εἰκόνα λαβείν τῆς ἀναλογίας ἐν ή διηρμόσατο τὴν² ψυχήν. ἐκεῖ μὲν γὰρ ῆν ἄκρα τὸ πῦρ καὶ ἡ γῆ, χαλεπὴν πρὸς ἄλληλα κραθῆναι φύσιν ἔχοντα μαλλον δὲ ὅλως ἄκρατον καὶ ἀσύστατον όθεν έν μέσω θέμενος αὐτῶν τὸν μὲν ἀέρα πρὸ τοῦ πυρὸς τὸ δὲ ὕδωρ πρὸ τῆς γῆς, ταῦτα πρώτον άλλήλοις έκέρασεν είτα διά τούτων έκείνα πρός τε ταῦτα καὶ ἄλληλα³ συνέμιξε καὶ συνήρμο-F σεν. ενταῦθα δε πάλιν τὸ ταὐτὸν καὶ τὸ θάτερον, έναντίας δυνάμεις καὶ ἀκρότητας ἀντιπάλους, συνήγαγεν οὐ διὰ αύτῶν, ἀλλ' οὐσίας ετέρας μεταξύ, την μεν αμέριστον προδ τοῦ ταὐτοῦ προδ δε τοῦ θατέρου την μεριστήν, ἔστιν ἢ προσήκουσαν έκατέραν έκατέρα τάξας είτα μιχθείσαις έκείναις έπεγκεραννύμενος, ούτως τὸ πᾶν συνύφηνε τῆς ψυχῆς είδος, ώς ην ανυστόν, εκ διαφόρων ομοιον έκ τε πολλών εν' ἀπεργασάμενος.

<sup>&</sup>lt;sup>σ</sup> The erroneous ἐφαπτόμενον (in 1025 A supra emended to ἐφαπτομένην), which without doubt was in the Ms. excerpted by the epitomizer as it is in all the extant Mss. of the 364

## EPITOME OF GEN. OF SOUL, 1032

and opinion fixity of what is perceiving about what is in motion; but mental imagining, which is a combination of opinion with sense-perception, is brought to a stop in memory by sameness and by difference again set moving in the distinction of past and present, being in contact with a diversity and

identity at once.

6. The construction b that was carried out in the case of the body of the universe must be taken as a likeness of the proportion with which he regulated the soul. In the former case, because there were extremes, fire and earth, of a nature difficult to blend together or rather utterly immiscible and incohesive, he accordingly put between them air in front of the fire and water in front of the earth and blended these with each other first and then by means of these commingled and conjoined those extremes with them and each other. And in the latter case again he united sameness and difference, contrary forces and antagonistic extremes, not just by themselves; but by first interposing other beings, the indivisible in front of sameness and in front of difference the divisible, as each of the one pair is in a way akin to one of the other, and by then making an additional blend with those between after they had been commingled he thus fabricated the whole structure of the soul, from what were various making it as nearly uniform and from what were many as nearly single as was feasible.

treatise, could agree only with τὸ θάτερον ("difference") and

taken with this produces nonsense.

b This mistake for "fusion" (σύντηξω), which occurs in one ms. of the treatise also, may have been in the ms. excerpted by the epitomizer.

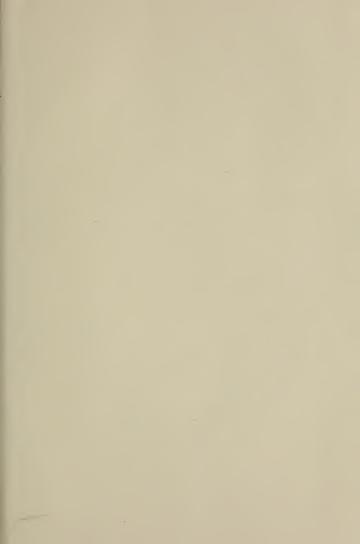

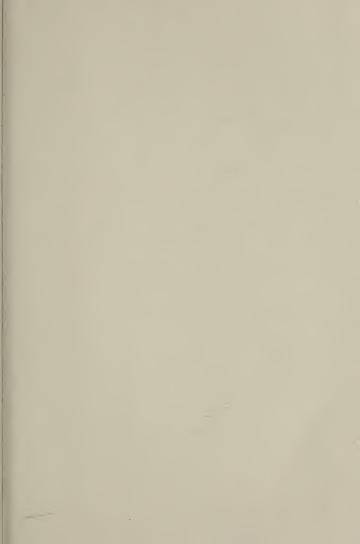

The Loeb Classical Library is the only existing series of books which, through original text and English translation, gives access to all that is important in Greek and Latin literature. A list of titles is available from Harvard University Press and at www.hup.harvard.edu/loeb.
