Quick Installation Guide for BrainTrading System 7.0

I. METATRADER INSTALLATION.

II. BRAINTRADING SOFTWARE INSTALLATION.

Important: One license of BrainTrading System can only work on one specific computer. You may not transfer BrainTrading System to another computer. Make sure which computer to use before doing this installation.

Installation Procedures:

1. Download free MetaTrader Platform from our website <u>http://www.braintrading.com</u> (see 'Products' menu).

2. Download BrainTrading Software Files from our website <u>http://www.braintrading.com</u> (available after purchasing)

3. MetaTrader Platform Installation.

Just run MetaTrader Setup executable file (generally **mtsetup.exe**) and follow MetaTrader Setup Instructions. Program installation is not complicated. For all the questions just answer **Next**, **Yes** or **Ok**.

Some fields will show you the minimal required amount of symbols to be entered. In the field Leverage is necessary to indicate the bank shoulder (1:100 для FOREX), in the field Deposit choose DEMO deposit. After filling out all the required fields, press Register. If all the network settings are correct and you are connected to the network, you will see all your information on your demo account: your name, the one that you put in the field Name, demo account number and password. If you don't want to receive emails from broker you don't need to enter YOUR REAL EMAIL in Email field. Simple enter not-existing email.

Notes for users sitting behind a firewall or a proxy server:

If you access MetaTrader from your work place, it is highly likely that you are connected to the Internet through firewall or proxy server. In this case, try to switch on the option to work through SOCKS5 or HTTP proxy servers, using the program set up **Tools->Options->Server->Proxy**. In case of troubles, ask your system administrator to open port 1950 or set up the port mapping to get access into the trading server.

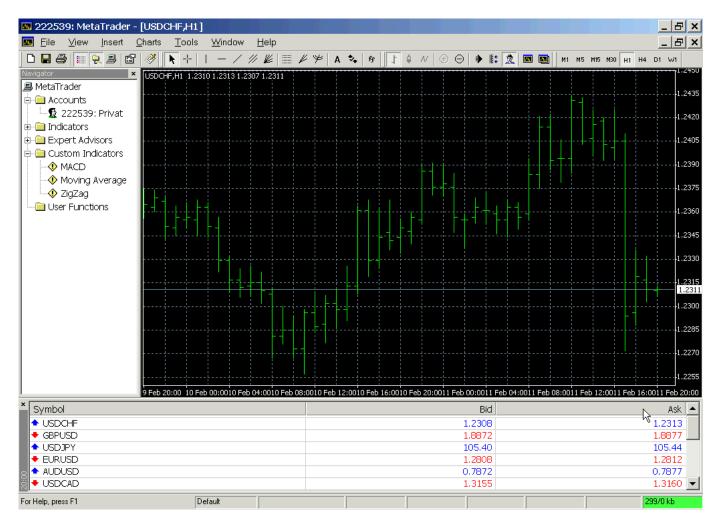

You may Open Demo Account anytime in future simple using the program set up menu Tools->Options->'Open an account' button.

5. Set Up your MetaTrader Desktop as you want.

When You load MetaTrader first time You will have next picture:
