

A small list of useful plugins:

Joint Push Pull - This is an enhancement of the SketchUp Push Pull which allows you to push pull curved surfaces amongst other options.

(This is Part of Fredo 6 tools set and requires his library plugin too LibFredo6.)

A link to the Fredo6 plugin page on SketchUcation

<http://sketchucation.com/forums/search.php?keywords=plugin&terms=all&author=Fredo6&fid=180&sc=0&sf=titleonly&sr=topics&sk=i&sd=a>

Round Edge - Part of Fredo6 Library. Allows you to bevel or chamfer the edges of objects, see above for link

FredoScale - More of Fredo6. Scale, twist and bend objects. See above for link.

TOS (Tools on surface) - Fredo6 again. Allows you to draw on non co-planar or curved surfaces.

Soap Skin Bubble - A time limited plugin that allows you to create tensile structure surfaces in SketchUp. Current version is limited to April 2015 so reinstall latest version from the website

<http://tensile-structures.de/>

Weld - This simple plugin reforms broken curves or joins together multiple lines into 1. Great for use with the Follow me tool. Available on the SketchUp Extension Warehouse

SmartDrop - Drops groups or components at intersection, useful for populating terrain with trees for example.
