

Volume IV

This is a reprint of the English Translation of the *Nyāya Sūtras* of Gautama by Mm. Dr. Ganganatha Jha, the versatile Sanskrit scholar who will ever be remembered for his dedicated and selfless pioneer work and immense contribution in the field.

The work was first published serially in the *Indian Thought* (Vols. IV-XI), a quarterly journal devoted to Sanskrit learning, over a period of eight years from 1912 to 1919.

Dr. Jha's translation covers a large field and includes, besides the original Sütras of Gautama, the Bhāsya of Vātsyāyana and the Vārtika of Uddyotakara in full as well as relevant notes from Vācaspatimiśra's Nyāyavārtika-tātparyaţikā, Udayana's Tātparyaparisuddhi and Raghūttama's Bhāsyacandra. The work naturally became enormous in bulk and it is not surprising that it took for its completion so many years and so much energy of the author and as many as 1800 pages in print.

This reprint of the great work is issued in response to the increasing demand of the scholars.

DISCOURSE IV.

Daily Lesson I.

Section (1).

[Satras 1-2].

General Examination of Activity and Defect. Bhāşya on Su. 1),

[P. 194, L. 1 to L. 4.]

After Mind it is the turn of Activity to be examined.[•] All that has been said in course of the Examination of the Body as the receptacle of Merit and Demerit may be regarded as constituting the Examination of Activity;--this is what is asserted in the following $S\bar{u}tra$ (1).

•The Third Discourse has dealt with the first six of the twelve 'objects of cognition' mentioned in St. 1-1-9; these six—Soul, Body, Sense-organs, Things perceived, Apprehension and Mind—being the causes of the remaining six—Activity, Defect, Re-birth, Fruition, Pain and Release; these are the effects of the former six. [This is what constitutes the connection between Discourses III and IV]. In the First Daily Lesson we have the examination of the six 'objects'; and in the Second we have the Examination of the Highest Cognition, the Right Knowledge, (that leads directly to Release).—Parishuddhi.

Vardhamāna adds—Another connection between the end of Adhyāya III and the beginning of Adhyāya IV, consists in the fact that among the Objects mentioned in Sū. 1-1-9, it is 'Activity ' whose mention follows that of 'Mind'; hence it is only natural that the 'examination' also of Activity should follow that of Mind.

Vardhamina raises a further question—According to the rule laid down by the *Bhayya*, the 'examination' of a subject must be preceded by its 'mention' and 'definition'; and as 'Bight Knowledge' has nowhere been *mentioned*, there can be no justification for its *examination* in the second Daily Lesson of Adh. IV. The answer is that 'Bight Cognition' has been actually mentioned in S0. 1-1-1, where it is *mentioned* as leading to the Highest Good of Man; and further, to justify an 'examination' it is not necessary to directly *mention* a subject; for we find the Safras examining several subjects that are connected only remotely with the subjects *mentioned*. Another question that arises is—since Right Knowledge is the precursor of Release, it should have been dealt with beforehand. The answer to this is that a full account of Right Knowledge demands a previous account of the *objects* of that knowledge; it is for this reason that Right Knowledge has been dealt with *affers* the subjects that are connected only remotely as the objects of that knowledge; it is for this reason that Right Knowledge has been dealt with *affers* the subjects that a full account of Right Knowledge demands a previous account of the *objects* of that knowledge; it is for this reason that Right Knowledge has been dealt with *affers* the subjects that a full account of Release.

As AGTIVITY HAS BEEN DEFINED—(Sutra 1). so has it been examined.

Vārļika on Sū. (1).

[P. 450, L. 3 to L. 13.]

After Mind it is the turn of Activity to be examined. Hence says the Sū!ra—As Activity etc. The meaning of the Sū!ra is that Activity is to be regarded as examined in the manner in which it has been defined.

Q. "What is it that has been examined in regard to Activity ?"

Answer—All that has been investigated in connection with Merit and Demerit constitutes investigation into Activity. 'Activity' is of two kinds—that in the form of cause and that in the form of effect; to the former kind belongs 'the operation of Speech, Apprehension and Body'; and to the latter kind belong what are called 'Merit and Demerit,' as described under Su. 1-1-2; of 'Activity' of the former kind, twenty different forms have been described above; 'Activity'

• Activity has been defined under Sū. 1-1-17 as the 'Operation of Speech, Apprehension and Body'; and this may be regarded as its 'examination' also.

These words—so has it been examined—are, according to the Bhāşya, supplied to complete the Sūţra. Vishvanāţha has taken exception to this :—"It is not right to supply these words to the Sūţra; for if this is done then the word 'tatha,' 'so,' required as the necessary correlation to 'yatha,' ' as,' of the Sūţra (1), having already been thus supplied, there would be no syntactical connection between Sūţras (1) and (2). Hence the right way to construe is to take both Sūţras together, the meaning being—'just as Activity is as has been defined, so is Defect also as it has been defined."

This construction is perhaps better; but there is no point in the criticism of the Bhāşya-interpretation; for there is nothing wrong in construing the single 'yafhā' of Sū. (1) with two 'fafhā's'—one supplied by the Bhāşya and the other occurring in Sū. (2).

in the form of effect, (a) subsists in a single substance (Soul), since Prosperity (the effect of Merit) belongs to each individual Soul separately,-(b) it is permanent (relatively, and not evanescent, like Apprehension, Pleasure, Pain, &c.), because its time of fruition is fixed, -(c) as subsisting in the Soul, it is a subordinate quality and not eternal, as is shown by the fact that there is death, --as has been asserted in the Bhāşya (P. 191-192), where it is said that there is death upon the exhaustion of the Karmic residuum which has already borne its fruit, and where the cause of Birth also has been described (as consisting in the appearance of another Karmic residuum);-then again in Sū. 3-2-60, we read-' its birth follows from the continuance of the effects of previous acts,'-which indicates the causes of Birth-Rebirth and Release,-the meaning being that when this cause is present there is birth and rebirth, and when it ceases there is **Belease**; all this has been described [which shows that Activity subsists in the Soul].

Bhāşya on Sū. (2).

[P. 194, L. 4 to L. 9.]

It might be urged that after 'Activity,' there should follow the Examination of 'Defects,; hence the Saira adds-So ALSO HAVE THE DEFECTS-(Sūtra 2)

been examined. (A) Inasmuch as they subsist in the same substratum as Apprehension, Defects are regarded as the qualities of the Soul;—(B) inasmuch as they are the source of Activity, and as they have the power of bringing about re-birth, they are regarded as the cause of Metempsychosis, 'Samsāra';—and since metempsychosis (series of births and deaths) is beginningless, Defects are regarded as operating[®] in a continuous series.† Wrong Knowledge ceases when Right

[•] The right reading 'pravarfanfs' is supplied by Puri Ms. B.

[†] Defects are due to the contemplation of desirable and undesirable things; hence like Apprehension they must be qualities of the Soul; being qualities of the Soul they must proceed on lines similar to Activity, which is the product of the Soul's quality, Effort. Hence the examination of 'Defects' becomes included in that of 'Activity comparison https://www.holybooks.com

Knowledge is attained; and on the cessation of Wrong Knowledge, the whole series of Affections and Aversions drop off; whereupon follows Final Belease;—and from this it is clear that Defects (i.e. Wrong Knowledge, Affection &c.) are liable to Appearance and Disappearance;—all this in connection with Defects has already been explained (under Sū{ras 1-1-2 and S-1.25).

Varțika on Sū. (2).

[P. 450, L. 4 to P. 451, L. 3.]

It might be urged that after 'Activity,' Defects should be described; hence the Sütra says—So also have the Defects —'been described.' Subsisting in the same substratum as Apprehension, Defects must be regarded as qualities of the Soul; —Metempsychosis being without beginning, Defects function Vār. P. 451. in a beginningless series;—since Defects cease upon the cessation of Wrong Knowledge, which follows from Right Knowledge, they are regarded as liable to production and destruction;—and they are regarded as qualities, because while being products, they are perceptible by means of the inner organ (Mind)^{*}, and not perceptible by the Visual Organ.

End of Section (1).

Section (2).† [Sūţras 3—9.] Defects divided into three Groups

Bhāşya on 80. (3).

[P. 194, L. 9 to P. 195, L. 2.]

Question :--- It has been said in Sū. 1-1-18 that--- 'Defects have inciting (causing activity) as their distinguishing

[•] Indriganjaram manzh'-soys the Talparya.

[†]Vardhamāna remarks — 'Sūţra 2 having dealt with Defects, it would appear reasonable to regard Sūţra 3 et seq as continuing the same section. So that the proper arrangement would be to put Sū. (1) alone under Section I, dealing with 'Activity,' and Satras Scin Smunder Associated Scingerwith Defects. But

feature'; now the feelings of Pride, Jealousy, Envy, Suspicion, Selfishness and the like are all characterised by the said distinguishing feature; under the circumstances, why are not these enumerated by name?

The answer to this is supplied by the following Süfra.

Sū[ra (3).

Of Defects there are three groups, three types: (I). The *Drsire-type*—under which are included Love (for the other sex), Selfishness, Longing for acquiring, in a lawful manner, what belongs to another, Hankering (for Rebirth) and Greed (desire for obtaining, in an enlawful manner, what belongs to another); —, II: The Hatred-type under which are included Anger, Jealousy, Envy, Malice, and Resentment; —(III) The Illusion-type under which are included Error, Suspicion, Pride, and Negligence. Thus since all defects are included under one or the other of these three groups, they are not enumerated separately.

Objection-" Since all have the same distinguishing feature (of *causing activity*), it is not right to divide them under three groups."

Answer—The division into three groups is certainly right, since 'Desire' 'Hatred' and 'Illusion' are distinct from one another [though all are causes of activity, yet each has a distinctive character of its own]; e.g. 'Desire' is characterised by attachment, 'Hatred' is characterised by aversion (intolerance), and 'Illusion' is characterised by wrong notion; this fact is realised by every man in his own experience: every conscious person knows when Love appears, when he has the feeling ' the quality of Love has appeared in my Soul;' he also recognises the absence of Love, when he has the feeling ' the quality of Love is

to this arrangement there would be the objection that only one Süţra, the first, would form a 'Section' which is not right; as a 'Section' must consist of several Saţras. Hence the best explanation is that under Section I we have the treatment of 'Defects' only in a general way, and that too, as a side-issue, as something connected with Activity; while under Section II we have the detailed treatment, of 'Defects.'

not present in my Soul;' and similarly with the other two. As for the feelings of Pride and the rest, these are all found to be included under one or other of the three groups; and hence they have not been enumerated separately.

Vārțika on Sü. (3).

[P. 451, L. 8 to P. 453, L. 11].

"It has been said that 'Defects have inciting for their distinguishing feature;' and since Pride &c also incite people to activity,—and as such have the same characteristic as the feelings of Desire, Hatred and Illusion—these also should be separately enumerated."

They are not separately enumerated, because they are already included. "Wherein are they included?" They have been included in the definition itself that 'Defects have inciting for their distinguishing feature.' Of the Defects thus included—there are three groups &c. &c.—says the Sū{ra. There are three groups, three types, of Defects:— I—The Desire-type including Love, Selfishness, Longing, Hankering and Greed; II—the Hatred-type including Anger, Jealousy, Envy, Malice and Resentment; III—the Illusion-type, including Error, Suspicion, Pride and Negligence.

Question :---- "Are the terms 'Love,' 'Selfishness,' and the rest, synonymous, or have they different significations ?"---What do you mean ?--- "If they are synonymous, then it is not right to say that there are three groups; for things spoken of by a number of synonyms do not form a group; e.g. such terms as 'Indra,' 'Shakra' and 'Purandara' cannot be used as forming a group. If, on the other hand, the terms have diverse significations, it behoves you to explain this diversity."

Our answer to the above is that the feelings spoken of by the words are differention for the gps L/www.Langboind desire for women; the yearning that men have for women is called 'Love;' as is shown by the common saying—'unless a man is *in love* he does not bedeck himself;'—'Selfishness' is the desire not to give up a thing, even though it is inexhaustible; even though the thing is such as cannot become exhausted, either by giving or enjoying, if one has the feeling not to give that up, that feeling is what is called 'Selfishness;' e.g. the solicitude that one evinces when he wishes that people may not drink out of the royal well (which is large and inexhaustible);—'Longing' is desire to possess what does not

belong to oneself; when a thing does not Var. P. 452. belong to oneself, and yet he desires to have it, this is called 'Longing;'-that desire which leads to rebirth is 'Hankering;' the great wish that one has for being born again is called 'Hankering;'*-the desire for unlawful possession of what belongs to another is called 'Greed'; when one desires, to take possession in an unlawful manner, of what belongs to another, he is called 'Greedy';--among all these 'Desire' is the common element, under the generic term 'Desire' all these special feelings are included. II. The feeling that distorts the body and the receptacles of the sense-organs is called 'Anger'; when on the appearance of the feeling, the body and the organs become distorted, it is called 'Anger';-Jealousy is the feeling that one has of preventing another person to have possession of what belongs to both; when there is a certain thing which belongs equally to two men and is not taken up entirely by either, the feeling that one of them has of preventing the other from wishing to

[•] The special connotation attributed to the word '*Triana*' here and in the Bhāşya is interesting. This word in its Pali form '*fanhā*' conveys the meaning here mentioned, in Buddhist lilterature. The Sanskrit form is rarely found to be used in this restricted sense. Has the Bhāşya borrowed the usage from Buddhist literatur@@wnloaded from https://www.holybooks.com

have it, is called . Jealousy ';-Envy is intolerance of another's good qualities; the feeling of ' unbearableness ' that one has on hearing the good qualities of others described is called 'Envy';- 'Malice' is the wish to do harm to others; when one, being himself unable to do harm to another person, yet wishes to do him harm, this feeling is called 'Malice';--'Resentment' is intolerance of harm done to one ;---in all these the common element is 'Hatred,' under which generic term therefore they are all included. III. 'Error' is wrong cognition, the cognition of a thing as what it is not :---'Suspicion' is doubt in the form ' what may this be?'*;---'Pride' consists in the feeling of self-importance that one has, based either upon qualities that actually exist in him, or those that, though not present, are assumed-the feeling that is expressed in some such form as 'Oh! how great am I';--Negligence' consists in failure to do what one could do when a man is fully capable to do his duty and yet fails to do it, it is called his 'negligence' ;-- in all these the common element is 'illusion,' under which generic term therefore they It is for this reason that all 'defects' are all included. being included under the three groups, they have not been enumerated separately.

"How do you know that all this is so?"

We learn it from actual popular usage: As a matter of fact the several terms are used in the distinct senses described above, and not in the sense of mere *desire*; for instance, when a beggar desires alms, people do not say that 'he *loves* it.'

"Well, in that case, inasmuch as all have the same distinguishing feature (of *causing activity*), there can be no ground for the threefold division; Desire, Hatred and Illusion must be one and the same, since they are all possessed of the same characteristic,—just like the various forms of 'Desire'."

It is not true that there is no ground for the threefold division; because 'Desire,' 'Hatred' and 'Illusion' are distinct from one another. Though they all possess the common characteristic (of causing activity), yet each is endowed with a differentia which serves as the basis for their being subdivided into three groups; just as even though 'Love' and the others are all 'desire,' yet they can be differentiated from one another. Further, the mere possession of a common character does not make several things one and the same; if that were so, then there would be no 'Commonality' at all [for 'Commonality' implies 'diversity and multiplicity']; if 'Desire,' 'Hatred' and 'Illusion' were all one and the same, there could be so no such assertion as 'this character is common to them,' for nothing can be 'common' to a single thing.

Question:--- "What is the differentia that serves as the basis of sub-division ?"

Answer:—' Desire' is characterised by attachment; the attachment that people have for things is called 'Desire'; —'Hatred' is characterised by aversion; the aversion or the feeling of intolerance that one has towards Pain and what causes pain is called 'Hatred';—Illusion is characterised by wrong notion; that is, the notion of a thing as not possessed of a certain character, when as a matter of fact it is possessed of that character. These distinguishing features of 'Desire,' 'Hatred' and 'Illusion' are known to all men.

Sūtra (4).

[Objection] — " WHAT IS ASSERTED IS NOT BIGHT ; BE-CAUSE ALL THERE HAVE ONE AND THE SAME THING FOR THEIR ANTENERSIE ded ff (Suntide).//www.holybooks.com

Bhāṣya on Sū. (4). [P. 123, Ll. 4-5.]

"Desire and the rest cannot be regarded as distinct from one another; -- Why ?--Because they have one and the same thing for their antithesis; all three have one and the same thing for their antithesis-viz: that which is known under the names 'tattvajnānam', 'knowledge of truth', 'samyanmatik', 'right knowledge', 'āryaprajnā', 'truthful cognition', 'sambodhah,' 'right apprehension.'"

Vārțika on Sū. (4).

[P. 453, L. 13 to L. 15.]

"Desire, Hatred and Illusion must be one and the same, -because they have one and the same thing for their antithesis,—like Disjunction. Just as all Disjunctions, having for their antithesis the single thing 'Conjunction', are regarded as one, so Desire and the rest, having for their antithesis the single thing 'Right Knowledge,' must be regarded as one."

Süţra (5).

[Answer]—THE BEASON PUT FORWARD IS NOT VALID, AS THERE IS NO INVARIABLE CONCOMITANCE.

> Su. (5). Bhāşya on Sū. (47). [P. 195, Ll, 7-8.]

The Dark Colour and several such properties of Clay have the same antithesis in the form of 'fire-contact', and there are other qualities of it, which, being brought about by baking, have one and the same source;—and yet all these qualities are distinct from one another.*

Vārțika on Sū. (5).

[P. 453, L. 17 to P. 454, L. 2.]

The reason is not valid &c. &c.—says the Sūtra. The colour and other properties (of Clay), which are all des-

• The Variita and Taiparya construe the clause Saii charihanjarabhavi with the next Sair Row Buildes from http://www.theyitanstated. troyed by the same fire-contact, and as such have one and the same thing for their antithesis; and yet they are not all one and the same thing. Hence what is put forward as the Reason (in Su. 4, i.e. the fact of their having one and the same thing for their antithesis) is not invariably concomitant (with what is desired to be proved, i.e. being one and the same).

This same argument also demolishes the reasoning that "Desire, &c., must be one, because they have the same source, like Sound." For the Colour and other qualities (of the baked Jar) have the same source (fire-contact), and yet they are not one and the same.

Sūfra (6).

OF THESE ILLUSION IS THE WORSEE EVIL; AS FOR ONE WHO IS NOT UNDER ILLUSION THE OTHERS DO NOT APPEAR. (Su. 6).

Bhāşya on Sū. (6).

[P. 159, L. 10 to L. 16.]

Illusion is an evil; it is spoken of as the 'worser evil'; by taking the three two at a time." "Why is Illusion the 'worser evil?" Because for one who is not under illusion the other do not appear,—i. e. unless one is affected by Illusion, Desire and Hatred do not appear; and when a man has become influenced by Illusion, one or the other (of the other two) appear in accordance with the man's impressions; when the man's impressions in regard to a thing are attractive (such as create attachment), they produce in him Desire (for that thing); while when his notions are repulsive (such as create aversion), they produce Hatred. Both these notions are nothing other than 'Illu-

[•] Because the term ' *pāpīyān*' is in the comparative degree, it follows that what is meant is that, as between Illusion and Desire, and Illusion and Hatred, Illusion is the 'worser evil.'

[†] What is spoken of 'Sańkalpa,' 'Notions' is the remembrance, under Illusion, of a certain thing as bringing pleasure, and that of another thing, as bringing pain-**Adjuntua**ded from https://www.holybooks.com

sion,' which consists of wrong notion. Thus it is that Desire and Hatred have their source in Illusion. When Illusion is destroyed by Right Knowledge, both Desire and Hatred cease to appear; this is what accounts for their having one and the same thing for their antithesis. It is with a view to these facts that it has been explained under SQ. 1. 1. 2 that, after True Knowledge 'there is a cessation of each member of the following series—Pain, Birth, Activity, Defect, and Wrong Notion,—the cessation of that which follows bringing the annihilation of that which precedes it, and this ultimately leads to Final Release.'

> Vārļika on Sū. (6). [P. 454, L. 4 to L. 11.]

Each of the three being distinct, among them Illusion is the worser evil &c. &c.-says the Sütra, Instead of saying that 'Illusion is the worst evil' the Sūtra says 'worser evil,' as the comparison meant to be instituted is between the three, taken two at a time; the meaning being that-'between Desire and Illusion, Illusion is the worser of the two, and between Hatred and Illusion, Illusion is the worser of the two.' Why so? Because unless a man is under illusion the other two do not appear; it is only the man illuunder illusion that becomes angry; only the man under sion falls in love; and it is only the man having the proneness to Illusion that is deluded.[†] When True Knowledge has put an end to Illusion, Desire and the rest also cease; this is what accounts for these having one and the same thing for their antithesis; that is, it is because on the destruction of Illusion by True Knowledge, Desire and Hatred cease to appear that these have the same thing for their antithesis,and not because they are one and the same. It is only on the basis of these facts that it can be established that among

[&]quot;We have taken this clause of the Bhaşya along with the Bhaşya on Sū. 5.

[†] This apparently tautological sentence has been justified by the *Tätparya* by saying that the **Burnel** and the **burnel** and

Pain and the rest, the cessation of the succeeding brings about the annihilation of the preceding.

Bhāsya on Sū. (7).

[P. 195, L. 16 to L. 19.]

Objection :--- "If what is said in Sū. 6 is true, then there arises the following difficulty :--

Sūfra (7).

INASMUCH AS (BETWEEN ILLUSION AND THE OTHER TWO) THERE IS THE RELATION OF CAUSE AND EFFECT, IT FOLLOWS THAT 'ILLUSION' IS SUMETHING DIFFERENT FROM THE 'DEFECTS.'" (SU. 7).

"The effect is always different from the cause; hence if Illusion is the cause of the Defects (Desire and Hatred), it cannot itself be a 'Defect.'

> Varțika on Sü. (7). [P. 454, L. 11 to L. 14.]

"If what is said is true, then there arises the difficulty that—inasmuch as §c. §c.—says the $S\bar{u}$ [The reasoning being stated thus]—Illusion cannot be a Defect,—because it is the cause of defects,—like Colour &c."

Süţra (8).

[Answer]—THAT CANNOT BE; AS ILLUSION IS INCLUDED UNDER THE DEFINITION OF 'DEFECTS.'—(Sü. 8).

> *bhāşya* on Sū, (8). [P. 196, L. 1.]

Defects having been defined as those that have causing activity for their distinguishing feature—Illusion becomes included, by this definition, under 'Defect.'

> Vārțika on Sū. (8). [P. 454, Ll. 16-18.]

That cannot be fo. fc.—says the Sūfra. Whether a thing does or does not belong to a certain class is determined, not by the velation of converse of the set of the istic features being the same as those of that class; and since the characteristic feature of 'Defect' is present in Illusion, this must be regarded as a 'Defect.'

Sūţra (9).

FURTHER, SINCE IT IS QUITE POSSIBLE FOR THINGS BELONGING TO THE SAME CLASS TO BEAR AMONG THEMSELVES THE BELATION OF CAUSE AND EFFECT, THE OBJECTION (IN SO. 7) HAS NO FORCE. SU. (9).

> Bhāṣya on Sũ. (9). [P. 196, Ll 4-5.]

Among substances, as well as qualities, belonging to the same class, it is found that they bear to one another various kinds of causal relation.

> Vārțika on Sū. (9). [P. 455, L. 2 to L. 7.]

Further, since it is quite possible &c.&c.—says the $S\bar{u}_i$ ra. Even among things belonging to the same class we find several kinds of causal relation subsisting. E. g. One Apprehension is the cause of another Apprehension, and yet it belongs to the same class 'Apprehension'; the Shuttle, and such other substances are the cause of another Substance (Cloth), and yet they belong to the class 'Substance'; similarly with such qualities as propulsion, striking, contact with conjuncts and Faculty.

Thus have Defects been examined.

End of Section (2).

SECTION (3).

[Sūtras 10—13.] Examination of 'Rebirth.'

Bhāşya on Sū. (10). [P. 196, L. 6 to L. 15.]

After "Defects' comes 'Rebirth.' In regard to this the following objection is raised :---" There can be no such thing as *Rebirth*, as the Soul is eternal; and no eternal thing is ever found to be born or to die; so that the Soul being eternal, there is no possibility of *Birth* and *Death*; and yet it is only these two that constitute 'Rebirth ?''

On this point we have the following statement of the established conclusion :---

Sutra (10).

REBIRTH IS POSSIBLE ONLY BECAUSE THE SOUL IS ETERNAL. (Sū. 10),

As a matter of fact it is the *elernal* Soul that ' departs' (praifi),—i.e. abandons the former body, dies,—and having

• The doubt in regard to 'Rebirth' is as to its belonging to the Soul, or to Apprehension, or to the Body ;---says the Tatparya. To this form of Doubt, the objection is raised in Vardhamana's 'Prakasha' that, it having been already determined under Sū. 1-1-19 that Rebirth is of the Soul, there can be no room for such a doubt. The answer given is that from the definition provided under Sū. 1-1-19, 'Rebirth' appears to consist in death and birth'; hence the further question naturally arises - 'How can death and birth belong to the Soul, which being eternal, cannot die or be born ?' And the most fitting occasion for dealing with this question is that when the 'examination' of 'Rebirth' is taken up. Vardhamana also suggests another answer as offered by 'others' :- The Purvapaksin imposes upon the Naiyāyika the view that ' Rebirth' consists of ' destruction and production' and then raises the doubt and the objection against the view that 'Rebirth' belongs to the Soul ; and instead of urging the objection in this form, the Purvapaksin (in the Bhāsya) starts off with the Naiyāyika view that Rebirth is something belonging to the Soul, and then goes to say that such Rebirth is not possible ; as it is not possible for any such thing to belong to the Soul.

† Thus 'Rebirth,' is impossible under the theory of the Naiyayika; though it is quite compatible with the theory of the Bauddha, according to whom all these are evanescency undergoing destruction were hondonests.com

'departed' (prēļya), i.e. having abandoned the former body, 'comes' (bh wati)-i.e. is born, takes up another body; and it is these two (departing-coming) that have been spoken of as 'Bebirth,' '*Prēţyabhāva*,' under the Sūtra-'Rebirth consists in being born again' (Sū. 1-1-19); so that what is meant (by 'Rebirth belonging to the Soul') is that it abandons the previous body and takes up another;* and this is possible only when the Soul is eternal. On the other hand, he, for whom 'Rebirth' consists of the 'birth of one entity and destruction of another entity,' would be faced with the absurdity that one entity would be deprived of the effects of his deeds, while another would be saddled with the effects of acts not done by him. † And further, under the theory that there are causes bringing about destruction (of the Being in the body), the teachings of the sages would be entirely useless [as the Being to whom the teachings are imparted cannot live long enough to profit by them].1

Vārțika on Sū. (10).

[P. 455, L. 8 to P. 456, L. 1.]

After defects comes 'Rebirth'; and in regard to this the following objection is raised '---'' There can be no such thing as **Rebirth**, because the Soul is eternal; being eternal, the Soul cannot be born, nor can it die; and yet it is these two that constitute 'Rebirth'--which implies that the Entity, after having died, is born again."

^oThe sentence '*purvashariram* . . . *prēţyabhāva*' is not found in Puri Ms. B; but the context requires it.

[†] The entity that does the act, is destroyed immediately afterwards; the entity that is subsequently born, at the time when the result of the said act appears, is a totally different being; so that while the latter is saddled with the effects of the acts not done by him, the former becomes deprived of the effects of those act done by himself. Under the view that the eternal Soul is re-born, it is the same Soul that does the act and experiences its effects.

[‡] According to the Naiyāyika, on the other hand, the real Being, Soul, being everlasting, persists from life to life; and its birth and death consist respectively, in its becoming connected, and disconnected, with a Body, a set of Bense-organs, Intéllection and Samualitips://www.holybooks.com

1444

On this point we have the following statement of the established conclusion—Rebirth is possible etc. etc.—says the $S\bar{v}ira$. It is only when the Soul is eternal that it can die and be born again. "What is the meaning of its dying?" It means that it becomes disconnected with the proviously-produced Body, Sense-organs, Intellection and Sensation. "What of its being born?" It means that it becomes connected with a newly-produced Body, Sense-organs, Intellection and Sensation, forming a single aggregate. The 'birth' and 'death' of the Soul cannot mean that It is produced and destroyed ; for it is eternal; that the Soul is eternal has been already proved under Sū. 3-1-19.

On the other hand, the philosopher for whom the 'birth and death' of the Soul consist of production and destruction, is faced by the absurd contingency that one entity would be deprived of the effects of his deeds, while another would be saddled with the effects of acts not done by him;—as we have already pointed out in course of our explanation of Su. 3-1-4.

Bhāşya on Sū. (11).

[P. 196, L. 15 to P. 197, L. 2.]

Question....." In what manner does the production of things come about ? "

Section (11).

(Answer]-THE (PRODUCTION) OF PERCEPTIBLE † THINGS IS FROM PERCEPTIBLE THINGS; AS IS CLEARLY PROV-ED BY PERCEPTION. (Su. 11.)

Vishvanātha takes it as introduced for the purpose of bringing forward the various theories in regard to the 'production ' of the Body.

[†]The term 'vyakfa' stands, according to the Värtika, for that which is endowed with the conditions of perceptibility, i.e. anything endowed with such perceptible qualities as Colour and the rest. Hence the word 'vyakfāt' takes in the Atoms also, which are endowed with the qualities of Colour &c.

Activaties for ciesty www.Genicentta

[•] It is not easy to perceive the connection of this question with 'Rebirth, the subject-matter of the Section. The 'production' questioned about now, is the coming into existence of material objects; and the only connection possible would be that, the *Bkdsys* having declared that 'Rebirth' does not consist of 'destruction and production,' it becomes necessary to determine the exact nature of 'production,' and then to show that it is not possible for the non-material substance Soul; and hence in the term '*prētyabhāva*' 'Rebirth,' '*bhāva*' 'birth' cannot mean 'production.'

The question being-"in what manner, and from what sort of material cause is the perceptible thing, such as the Body, produced ? "-- the answer is that, 'from perceptible things,' known as 'material substances'-i.e. from Earth and the other material substances, in their extremely subtle cternal forms—is produced the 'perceptible thing,' i.e., the ordinarily known Substances (Earth &c. in their gross form), which appear in the form of the Body, the Sense-organs, the Objects and their appurtenances. The term 'ryakta,' ' perceptible,' stands for what is cognisable by means of the Sense-organs; and by reason of similarity to this 'perceptible' thing, its cause also is called ' vyakta,' ' perceptible.'-" What is the similarity?"-The similarity (between the perceptible thing and its cause) consists in the presence of Colour &c. Hence the meaning of the Sutra is that-'out of the eternal substances, Earth &c., which are endowed with the qualities of Colour &c., are produced the Body and such other things, which are endowed with the qualities of Colour &c.'

[That this is so] is clearly proved by Perception. We actually see that out of such substances as Clay and the like which are endowed with the qualities of Colour and the rest, are produced objects of the same kind (*i.e.*, possessed of the qualities of Colour &c.);—and from this fact (perceived in connection with visible Objects) we infer the same in connection with invisible things also; that is, in the case of the Clay &c., we find that the presence of Colour and other qualities is common to the material cause as well as its product; and from this we deduce the same in regard to the causal nature of the eternal super-sensuous things (Atoms) also;

Varlika on Sa. (11).

Question :--- "In what manner does the production of things come about? From what sort of cause are the perceptible things, Earth &c., (in their gross form), the Body, the Sense-organs &c. produced ?"

Answer—The production of perceptible things §c. §c.—says the $S\bar{a}$!ra. "What is the perceptible thing?" It is that substance which is equipped with the conditions of perceptibility; and perceptible softwain is too this, the cause of Earth &c., in the form of Atoms, is also called 'perceptible.' "What is the similarity?" The similarity consists in the presence of the qualities of Colour &c., and it is by reason of this similarity of 'Atoms' (to Earth &c.), in the shape of the presence of the qualities of Colour &c., that Atoms also are called 'perceptible.' [The meaning of the $S\bar{u}$ /ra thus is that] out of the Atoms possessed of Colour and other qualities are produced the perceptible things in the shape of the Jar and such (inanimate) objects, and also the Bull and such (animate) objects.

"What is the proof of this?"

That the production of objects possessed of Colour &c. is as described above is clearly proved by perception.

"The proof put forward is not right; as the premiss is not invariably true; it is not true that things endowed with Colour &c, are produced out of only such things as are endowed with Colour &c., for we find that such things as the Jar, the Bull &c., which are endowed with Colour §c., are produced out of Conjunction (of the component parts of these things), which is without Colour etc."

This objection has no force; as it shows that the objector has not understood the meaning of the $S\bar{u}!ra$; the $S\bar{u}!ra$ does not mean that things possessed of Colour &c., are always produced only from things possessed of Colour &c.; what the $S\bar{u}!ra$ means is that such 'perceptible' things as the Bull and the like are preceded by such causal factors as are endowed with Colour &c. In this sense the promiss put forward is not untrue; for no causal factors devoid of Colour &c., are ever found to bring about such products as are endowed with Colour &c.

811fra (12).

[Objection]—" WHAT IS ASSERTED IS NOT TRUE; AS THE JAR IS DOOR DOT DUT COUNT DO STATUS (Signature Country States)

Bhōṣya on Sū. (12). [P. 197, Ll. 4-5.]

"This also is a perceptible fact that the 'porceptible' Jar is never found to be produced out of the 'perceptible' Jar; hence, as we do not see the 'perceptible' thing being produced out of the 'perceptible' thing, it follows that the cause (of the production) of the 'perceptible' (Body &c.) is not a 'perceptible' thing."

Vartika on Sū. (12).

[P. 456, L. 17 to P. 457, L. 1.]

"What is asserted is not true &c. &c."-says the Sütra. Var. P. 457. This criticism is based upon the notion that things are produced out of only such things

as are homogeneous to them.

Sūfra (13).

[Answer]—INASMUCH AS THE JAR IS ACTUALLY PRODUCED OUT OF A 'PRECEPTIBLE' BUBSTANCE, THE OBJEC-TION HAS NO FORCE, (SQ (13).

Bhāşya on Sū. (14).

[P. 197, Ll. 7-10.]

We do not say that everything is the cause of everything; what we do say is that whatever 'perceptible' thing is produced, it is produced out of a similar (*i.e.*, perceptible) thing; and the substance Clay, which is called 'potsherd,' out of which the Jar is produced, is 'perceptible.' One who would deny such a patent fact could never be argued with by any person.

The truth of the matter is as we have described.

Vārļika on Sū. (13).

[P. 457, L. 1 to L. 9.]

The above objection (in SU, 12) has no force; as it shows that the objector has not understood the meaning of the $S\bar{u}$ fra. We do not say that everything is the cause of everything; the objection that the Ustrisvnot/produced out of the Jar can be rightly urged only against that person who holds that everything is the cause of everything. In fact—inasmuch as the Jar is actually produced out of a perceptible substance, the objection has no force—says the Sütra. The 'perceptible' things, Jar and the like, when produced, are produced only out of such 'perceptible' things as the potsherd and the like; so that the way in which the Jar is produced does not militate against our view. [The reasoning being formulated thus]—the perceptible things, Body and the like, are preceded by such causal factors as are possessed of Colour &c.,—because they are such that any one of them can be perceived by the organ of vision and of touch,[®]—like the Jar, or like Sound,—this latter being an example per contra. Such is the truth upon the matter under consideration.

End of Section (3).

SECTION (4.)

[Sūtras 14-18.]

Examination of the Theory that the Things of the World are produced out of the Void.

Bhāşya on Sū. (14).

[P. 197, L. 10 to L. 14].

We now proceed to show up the doctrines of philosophers (of several schools)[†]---

• This fact has been put forward in Sü. 3-1-1, in proof of the presence of the Soul in the body. It is not easy to see what bearing it has upon the Body being produced out of perceptible substances.

The only possible explanation is that the premise darshanasparshandbhyām ekār įhagrahaņā į does not mean here the same thing that it does in Su. 3-1-1. The meaning that fits in with the present context is that—' because Body and such things are such that any one of them is perceived by both Visual and Tactile organs,—which is the case with the Jar, and which is not the case with Sound, hence the Body must be regarded as preceded by such causal factors as are endowed with the qualities of Colour &c.

† The Parisuddhi calls Sections 4-11 'Aupadghāfika,' 'Introductory,' or (more correctly) 'Supplementary,' to the Section putting forward the theory that 'perceptible thingDaw production https://www.sec.com

Süfra (14).

"ENTITIES ABE PRODUCED OUT OF NEGATION; AS NO OBJECT COMES INTO EXISTENCE WITHOUT HAVING DESTROYED (ITS CAUSE)"---(Su. 14).

"One theory is that the entity is produced out of negation ;--Why?--Recause things are produced only after having destroyed (something); e.g. the sprout is produced only after the seed has been destroyed; and not till the seed is destroyed. If the 'destruction of the seed' were not the cause of the sprout, then it would be possible for the sprout to come into existence even without destroying tho seed."

Vārļika on Su. (14).

(P. 457, L. 9 to L. 18.)

We now proceed to show up the doctrines of philosophers —out of which some are rejected, while others are accepted. Among these, the doctrine held by some people is that "entities are produced out of negation"; and in support of this they put forward the following arguments :—" No object comes into existence without being destroyed;" as a matter of fact, until the cause has been destroyed; no effect is produced; e.g., the sprout comes into existence only after the seed has been destroyed. And if the 'destruction of the seed ' were not the cause of the sprout, then it would be possible for the sprout to appear without the seed being destroyed. But this is never found to happen. Hence the conclusion is that the 'cause of the sprout is the destruction of the seed [and Destruction is negation]."

It is interesting to note that the purely theistic doctrine of God having created the world has been put by Gautama among these 'doctrines.' held apparrently by other people. It is in view of this that the Variika has remarked that the Author of the Sütra has put forward these various doctrines here—some of these for being criticised, and others are put up as accepted. The Taiparya, the Parishuddhi and the Prakāsha however do not admit this view. (See below, Note on Sec. 5).

• Whenever an object is produced, its production is always preceded by the destruction of its material cause. Hence every object has for its cause this Destruction, and Destruction is its cause and the second statements.com

Bhāşya on Sū. (15).

[P. 197, L. 14 to L. 18.]

The answer to the above is given in the following Sūţra.

Sūļra (15).

THE BRASONING PUT FORWARD IS UNSOUND; AS IT INVOLVES SELF-CONTRADICTION.---(SU. 15.)

The premiss—' because there is no production without destruction'—is unsound; as it involves self-contradiction. That which destroys (the cause) cannot be said to come into existence after that destruction; since it must have been already in existence [in order to be able to destroy the cause; that which is itself non-existent cannot destroy anything]; and that which comes into existence (after destruction of the cause) was not in existence before, and being non-existent, it could not destroy the cause [consequently the assertion that 'the thing comes into existence after destroying the cause' is self-contradictory].

Vārļika on Sū. (15).

The assertion that—" an object comes into existence after having destroyed (the cause) "—involves a self-contra-

Vār. P. 458. diction. That which does the destroying must be already in existence; that which does not exist cannot be the cause of destruction; and that which comes into existence could not have been in existence before; as that which is already in existence can never be produced. So that to say that a certain object destroys (the cause) and then comes into cristence is to make a self-contradictory statement. "What self-contradiction is there?" By 'selfcontradiction' we mean incongruity; i.e. if the thing destroys the cause, it cannot come into existence (after that destruction), and if it comes into existence (after destruction), it cannot do that destruction.

Sū[ra (16).

[Not comprehending the purport of the Siddhantin's argumentions Stort Synthew Nihilistonaya].--- "WHAT HAS BEEN UEGED IS NOT BIGHT; FOR AS A MATTER OF FACT, WORDS DENOTING THE CASE-RELATIONS ABE APPLIED TO PAST AS WELL AS FUTURE THINGS." (Su. 16).

Bhāṣya on Su. (16).

[P. 197, L. 20 to P. 198, L. 8.]

[Says the Opponent]—" As a matter of fact words denoting the case-relations are used in regard to past as well as future things; e.g. 'the son shall be born,' [where the future son is in the Nominative case]— he rejoices at the son to be born,' [where the future son is in the Accusative Case],—' he appoints the name of the son to be born' [where the future scn is in the Genitive case],— 'the Jar existed ' [where the past Jar is in the Nominative case],—' he is sorry for the broken Jar ' [where the past Jar is in the Accusative case],—' these potsherds are of the broken Jar ' [where the past Jar is in the Genitive case],— 'Sons, not being born, are a source of anxiety, to the old Father'* [where the future son is in the Nominative case];— -we find several instances of such secondary (figurative) usage. 'What is the primary basis of this secondary on this basis of ' immediate sequence,' what the expression ' comes into existence after having destroyed' means is that ' when going to come into existence the sprout destroys the seed;' and the Nominative character (of the Sprout, not yet born) is purely secondary (or figurative)."

Vārtika or Su. (16). [P. 458, L. 6 to L. 13.]

What has been urged etc. etc.—says the Säfra. We find "that words denoting case-relations are applied to past as well as future things. *E.g.*, in connection with past things we find such expressions used as—'he is sorry for the broken Jar,' these potsherds are of the broken Jar,' the "Jar existed;' and in connection with future things we find such expressions as—' the son shall be born,' one rejoices at the son to be born,' 'he appoints the name of the son to 's be born,' 'sons, not being born, are a source of anxiety to "the old father;'-we find several such instances of figura-"tive usage. The sense therefore of the expression 'the "sprout comes into existence after having destroyed the "seed' is that 'when going to come into existence, the "sprout destroys the seed.' 'What is the meaning of des-"traction in this case? On the strength of (by reason of) "immediate sequence 'destruction' means 'coming into exist-"ence immediately after;' that is, inasmuch as the sprout "comes into existence immediately after the seed has been "destroyed '[the meaning of 'destruction' is immediate "sequence]."

Sū[ra (17).

[Answer]---[EVEN 80] THE VIEW PUT FORTH CAN-NOT BE ACCEPTED; BECAUSE AS A MATTER OF FACT THESE IS NO PRODUCTION OUT OF THINGS DESTROYED.---(SQ. 17).

Bhōşya Sū. (17).

[P. 198, L, 5.]

As a matter of fact, the Sprout is not produced out of the destroyed seed. Hence it is not true that "Entities are produced out of negation" (as alleged in Su. 14).

Vārļika on Sū. (17).

[P. 458, L. 18 to P. 459, L. 7.]

The answer to the above arguments has already been given under Su. 15—viz: that the view put forth *involves self-contradiction*; as a matter of fact, there can be no destruction by a thing that has not come into existence; nor is it that whenever a thing is born it has the capability of destroying (its cause). Then as regards the allegation that

[•] If the 'destruction of the seed ' were the cause of the birth of the sprout, then, how is it that we find no sprout appearing when the seed is broken up into pieces by the hammer, and the disruptured component pieces do not form another composite ? And how is it that the sprout appears only when the disruption of the seed is followed by a fresh composite formed out of its disjointed component pieces ? These facts clearly show that the birth of the sprout does not arise out of the 'destruction' of the condoc **Feiperp** ditps://www.holybooks.com

"words denoting case-relations are applied to past and future things" (Su. 16),-we do not deny that there is such usage : all that we mean is that there can be no production out of a non-existent cause. That words denoting case-relations are used in connection with past, present and future things, we have ourselves pointed out in the course of our consideration of the general question of the validity of cognitions; where we have cited such examples as 'the tree stands' &c. &c. Further, as regards the assertion of the Opponent-" by reason of immediate sequence 'destruction' means coming into existence immediately after,"-this is not true; for the cause of the sprout does not consist in the 'destruction of the seed'; what happens is that the component particles of the seed, which (in the seed) are combined in a certain fashion.[•] have their former composition or combination destroyed, and another combination of them takes place; † and it is out of the latter combination that the sprout comes into

Vār. P. 459. existence; —and until the previous combination (of the particles) has been destroyed, it is not possible for another combination to come into existence; it is only in this sense that 'production' can mean *immediate sequence*. For these reasons it is only right that the seed should be the 'material cause' (of the sprout). With a view to point out this fact we have the Sū!ra—' there is no production out of things destroyed.' The cause of the sprout is not the 'destruction of the seed,' but the component particles of the seed, through the abandoning of their previous composition. This is what the Sū!ra means.

[•] *Vyakrifavyahanam* ' is the better reading ; with 'vyahatavyahanam' the clause means ' which have their combination destroyed.' The Bhāşya on Sū. 18 teads 'vyahatavyahanam.'

⁺ The same particles that were originally arranged into the form of the seed come to be re-arranged in the form of the seed

Sūįra (18). 🗋

IN SO FAR AS 'SEQUENCE' IS MENTIONED, - THIS WE

DO NOT BENY. (Su, 18).

Bhōşya on Sū. (62).

[P. 198, L. 7 to L. 14.]

The fact that the 'coming into existence' (of the sprout) is perceived by the 'destruction' (of the seed) constitutes their 'sequence'; and in so far as this 'sequence has been put forward (by the Opponent) as the reason (probans) for the proposition that " Entities are produced out of negation;"-this 'sequence' we do not deny; all that we mean is that, when the composition of the particles becomes disturbed, the previous combination ceases and another combination takes its place; and it is out of this latter combination,-and not out of negation-that the next substance is produced. What happens is that the component particles of the Seed have aroused within them a cortain motion, by reason of some (unknown) cause,-whereupon they abandon their previous combination and take upon another; and it is from this latter combination that the sprout is produced; in fact we actually see that the 'particles of the seed' and their 'composition' constitute the causes of the production of the Sprout; and unless the previous combination has been destroyed, it is not possible for another combination to come into existence ;--this is all that constitutes the 'sequence' between 'Destruction' and 'coming into existence '; -but this cannot prove that "Entities are produced out of negation " (as alleged by the Pārvapakṣin). And inasmuch as for the production of the sprout there is no other cause except the component particles of the seed, it is only r ght that the seed should be admitted as the cause of the Sprout.

Vartika on Sü. (18).

[P. 459, L. 9 to L. 13.]

At first there is destruction of the seed, then there comes the production of the Sprout,—this is what the $S\bar{u}$ /ra means.

[•] This passage, in a somewhat altered form, has already appeared in the Variika on Sū 17.

[†]Because, says the *Tātparya*, unless the seed is there, the component particles of the seed cannot be that from https://www.holybooks.com

If mere 'Negation' were the cause of the production of the Sprout, then anything would be produced out of anything and everything; for the factor of 'Negation' is the same in[•] all cases; when for instance, the paddy-seed is destroyed there does not remain in it any capacity for persistence (or connection with anything); and if an effect were to be produced without any trace of connection (with its cause), then it could be brought into existence by the force of all things; as a matter of fact, however, every effect is found to be connected (with a cause). From all this it follows that mere Negation cannot be the cause of anything. Such is the meaning of the $S\bar{w}/ra.\dagger$

End of Section (4).

Section (5). [Sü(ras 19-2].]

Examination of the Theory that God is the Cause of the Universe. **1**

• There being no difference between the *total destruction* of the barley-seed and the *total destruction* of the paddy-seed ;—both destructions being total, without any trace of the previously existing things.

⁺The *Tāfparya* offers it own criticisms against the argument that—" since things are produced out of 'Negation,' the constituent cause of things is the Void,"—which argument also it reads in the *Pārvapakļa-Sāļra* 14. For details the reader is referred to the *Tāfparya*, p. 417.

[‡]In regard to this Section there is a difference among Commentators. According to the Bhāyya, the Vārfika and Vishvanātha, it is meant to propound the Naiyāyika Siddhānia that the Universe has been created by God; and in accordance with this view, Sū. 19 puts forward the final Siddhānia, Sū. 20 puts forward an objection against the Siddhānia, and Sū. 21 answere that objection from the standpoint of the Siddhānia. It is this interpretation that we have adopted in the translation. Downloaded from https://www.holybooks.com

Bhāṣya on Su. (19). [P. 198, L, 14 to L. 18.] Another philosopher says-Sūţra (19).

GOD 18 THE CAUSE; BECAUSE WE FIND FRUITLESSNESS IN THE ACTIONS OF MEN.

As a matter of fact, we find that Man, desiring a certain thing, does not always obtain the fruit of his desire; hence it is inferred that Man's acquisition of the fruits of his actions is dependent upon some other person; and that Person upon whom it is dependent is *God*; hence it follows that God is the Cause (of the World).⁶

In view, perhaps, of the fact that such an interpretation of the Section is inconsistent with the introductory assertion of the Bhågya (P. 197, iL. 10)—" we now proceed to show up the doctrines of philosophers,"—the *Tdiparya*, followed by the Parisuddhi and Prakāska, has taken it as representing the criticism of the Vedānta doctrine that "God is the constituent cause of the Universe." By this interpretation Sū. 19 represents the Vedānta 'view, [Sū. 20 shows the untenability of that view, and Sū. 21 puts forward the final Nydya-Siddhanta that God is the erealor, the efficient cause, not the constituent cause, of the Universe.

There is also a wider issue involved in this Soction. The Commentators are agreed that the Siddhanta view here put forward is that God is the Creator of the Universe. Now the question arises—How is it that this cardinal doctrine of the system has been inserted by 'Gautama as a side-issue? He has put it forward only among "certain philosophical doctrines;" and not as the true doctrine. Nor is it easy to reconcile the doctrine of God being the Creator with the view that there is no such thing as 'beginning of Creation '—as is often found re-iterated by the Värfiks (e.g. on P. 445 and P. 466) ; if there is no beginning, God may be the Controller, the Ruler, He cannot be the Creator. From the Bhäys also (P. 301, L. 3) it seems that God is held to be only the Seer, Knower, Omniecient, All-powerful.

[•]According to the *Talparys* this Sütra presents the Vedänta view that God is the constituent cause of the world; the *Parisuddhi* remarks that though the *Sulva* has used the general term 'cause,'yet it is clear from the context that the constituent 'cause' is meant. *Vardhamdna* remarks—' From this *Purepakya Sulva* it is clear that the purpose of the Section is to refute the Vedanta-theory.' In support of this view is also the fact that the preceding section also has dealt with the question of the constituent cause of the world.

The Vedänta doctrine is thus stated by the *Lafparya-"* The phenomenal world may not hDrevoims out for thirt for the phenomenal birth any birth in the produced out of

Vārļika on Su. (19).

[P. 450, L. 13 to P. 460, L. 2.]

God is the Cause elc. elc.—says the Sā!ra. We find that var. P. 460. From which fact we understand that Man's obtaining of the results of his act is dependent upon someone else; if Man, independently by himself, were capable of obtaining the results of his actions, then the action of no man could ever be fruitless; and no one would ever bring pain upon himself;—and both these are actually found to be the case; —hence it follows that God is the cause (of the Universe).

Sūļra (20).

[Objection *]—" IT IS NOT SO; BECAUSE AS A MATTER OF FACT, NO FRUIT APPEARS WITHOUT MAN'S ACTION." (SU 20).

Brahman, which becomes modified into the several names and forms [i.e. objects and their qualities, says Vardhamāna], exactly in the same manner as the clay is modified into the Var &c.; or (according to other Vedantins) Brāhman, through the limitations cast by the beginningless Nescience, appears in the form of the several phenomenal substances, just as the face appears in several forms, through the limitations of the substances in which it becomes reflected. It is this Brahman that is meant by the term 'Ishvara' in the Sūţra; this term connoting the powers of reflection and action, both of which are present in Brahman alone; and not in Negation, or in Primordial Matter, or in Atoms. Man himself does possess these powers. But if Man were the ordainer of the World, and had the necessary properties of omniscience and omnipotence, then he could never undertake an action that would turn out to be futile, fruitless. And masmuch as we do find the actions of Menturning out fruitless, we conclude that God,—i.e. Brahman—is the Cause of the World. Su. (19).

• According to the Bhaya this Süţra is an objection urged by the Pürvapakşin, against the Nyâya doctrine stated in Sü. 19. According to the Tāţparya, it is an objection urged by the Suddhantin Naiyāyika, against the Vedānta doctrine stated in Sü. 19. In pursuance of this interpretation, the Tāţparya introduces this Sü. 20 as follows: --It puts forth arguments against the Vedānta theory of things evolving or modifying out of Brahman, and concludes with the assertion that it is not right to hold that Brahman wakawa and a state of the state of the substances; and

Bhāşya on Sū. (20).

[P. 199, Ll. 2 - 8.]

[Objection]:—" If the appearance of fruits (of actions) were dependent upon God (entirely), then such fruits could be accomplished even without the desire (and action) of man."

Vārțika on Sū. (20).

[P. 460, L. 4 to L. 9.]

It is not so, etc. etc.—says the Sutra. If God were the cause of things, then there could be experiencing of pleasure and pain even without any act of Man; and the result of this would be that all activity of Men would disappear and there would be no possibility of Release; and the character of God being one and uniform, all His acts would be of one and the same kind. If, on the other hand, God brought about effects, with the help of (under the influence of) causes (other than Himself), then it would mean that He does not produce that whose help He requires; e.g., the potter does not build the stick &c. (which he needs). If it were only under the influence of Men's acts that God was the cause of the Universe, then so far as those acts are concerned, God would not be the all-powerful God at all."

as such is the constituent cause of things; though it may be that Brahman or God is the efficient cause of things; —and then it goes on to say that in connection with the view that God is the efficient cause of things, it might be held that in creating the world, God is not influenced by any other force; —and it is with a view to gnard against this view that we have S0. 20, which shows that God is influenced by the actions of men.

It may be noted that the roundabout manner in which the *Tātparya* has got to fit in the Sütra to its own interpretation shows that it is, perhaps, not what the *Sütras* really mean; that is the *Sütras* have monthering upon the *Sut* heory at all.

Sufra (21).

[Answer]—INASMUOB AS IT IS INFLUENCED BY HIW, THELE IS NO FORCE IN THE BEASON (PUT FORWARD).^{*} (SQ. 2]).

Bhāşya on Sū. (21).

[P. 199, L. 5 to P. 210, L. 15.]

As a matter of fact, God helps the efforts of Man; *i.e.*, when Man is trying to obtain a particular fruit, it is God that accomplishes that fruit for him; when God does not accomplish it, Man's action becomes fruitless;—hence since things are thus influenced by God, what has been urged to Bhā. P. 200. the effect that—" because as a matter of fact no fruit appears without man's action "—is no reason at all.

[The question now arises—What is God? The Bhaşya proceeds to answer this question]—God is a distinct Soul endowed with certain qualities; for as a being of the same kind as 'Soul' He cannot be put under any other category; hence God is defined as a particular Soul endowed with such

The *Täiparya*, in pursuance of its own interpretation, remarks :- 'Having rejected the two theories -(1) that the World is 'evolved out of Brahman, and (2) that God, independent of all other forces, is the Creator of the world, -- the author of the Szira now puts forward his own final Siddhanta,'

According to the Bhdgya, this Sütra is only the Naiyāyika's answer to the objection arged in Sü. 21;; the sense being that—' inasmuch as Man's efforts are influenced by God, what has been arged in Sü. 20, against the view that God is the efficient cause of the world, is not a valid reason.'

The Nysys-Siddhants is this expounded by the Titperys :-- The World has the Atoms for its constituent cause; and its efficient cause is God as influenced by Men's acts; and these acts also have God for their efficient cause; nor is there any incongruity in this; since even though the carpenter is helped and influenced by the axe, yet the axe also is made by him. The reason put forward in Su. 20 has no force against the view that the world is the work of God as helped by Men's acts, though it is an effective argument against the view that in creating the world, God does not require the help of anything sutfider Himself/www.holybooks.com qualities as—(1) absence of demerit, wrong knowledge and negligence, and (2) presence of merit, knowledge and intuitiveness, and to Him also belongs, the eight-fold 'Power' —consisting of 'minuteness' and the rest—as the result of His Merit and Knowledge;—His 'Merit' follows the bent of His Volition;—He controls the activity of the residuum of of Merit and Demerit subsisting in each individual Soul, as also that of the Earth and other material substances; and He is Omnipotent in regard to His creation, not however, failing to be influenced by the results of acts, done by the

Bhā. P. 201.

beings He creates ;—He has obtained [•] all the results of His deeds ; [and continues to act

for the sake of His created beings, because] just as the father acts for His children, so does God also act father-like for living beings. There is no other category except the category of 'Soul' to which God could belong; for (as in the case of Soul so) in the case of God, no other property, save Buddhi, Cognition, can be pointed out as being indicative of His existence. From scriptures also we learn that God is the 'Seer, the Cogniser and the Knower of all things.' If God were not discernible by the presence of Buddhi and such other indicatives of the 'Soul,' then, being, as He is, beyond the reach of ordinary Perception, Inference and Words, how could His existence be described and proved by any-Lastly, if God acted irrespectively of the effects one ? of acts done by the beings created by Him, then, this view would become open to all those objections that have been urged against the view that "the creation is not due to the acts of Souls" [Vide, end of I Daily Lesson, Adhyāya III].

Vārļika on Sū. (21).

[P. 460, L. 11 to P. 471, L. 9.]

Inasmuch as it is influenced by Him etc. etc.—says the $\hat{v}\hat{u}$ /ra. We do not say that God is the cause of the world, independently of the actions of Men &c.; what we do assert is that God helps the efforts of Man.

• We have adopted the reading of the Puri Ms. B. unterform instead of unterform, which latter is the reading adopted by the *Tapparya*; this latter also explains unterform as unterformer.

+ Though God differs from other Souls in the point of His Cognition &c. being eternal, while those of others are evanescent, yet He must be classed under the same category ; since, WW OTHER Sould, HORING WWW. HIS 2005 BOJ the &c. "What is the meaning of helping in this case ?"

What it means is that He instigates each act (of Man) in accordance with its true character, and in due consideration of the time of its fruition. The philosopher, who regards God as the cause of things, irrespectively of the acts of Men, becomes open to the objection that under his theory there remains no possibility of Final Release. Under the theory that God is dependent (upon the acts of Men) there is no such incongruity.

The rest is clear in the Bhāyya.

When the Author of the Sūţra declares that things are influenced by God, he admits that God is the efficient cause (of things); that cause is called 'efficient' which helps the other two kinds of cause—the constituent and the nonconstituent; e.g., the shuttle &c. help the yarns (which are the constituent cause of the Cloth) as well as the yarncombinations (which form the non-constituent cause of the Cloth).

"If God is the *efficient* cause of the World, then what is the direct constituent cause of the World?"

We have already explained that the constituent cause of the Var. P. 461. World consists of the Earth and other substances in their subtle form, known under the name of 'Atoms.'

It having been admitted that perceptible substances are the constituent cause of the World,—and there being a difference of opinion in regard to the constituent cause,—we have (in the Bhāşya) a treatment of the subject of God; that is, people have held different views in regard to the efficient cause of the World,—some people holding 'Time' to be that cause, others 'God,' while others again put forward Primordial Matter; and among these diverse opinions which is the right one Pholoaded from https://www.holybooks.com

The right view is that God is the efficient cause of the World; for it is in support of this view that we find proofs coming forward unimpeded. "But the very existence is still unproved." If you mean by this that-" it is only after the existence of God has been proved that it could be proved that God is the efficient,* and not any other kind of Cause;-as a matter of fact, the very existence of God is still unproved, hence the enquiry stated is not proper,"then our answer is that this is not right; because by this very enquiry the existence of God becomes established; that is, the existence of God is established by that same proof which establishes the fact of His being the cause (of the World); for the simple reason that that which does not exist can never be the cause of anything. "What is the reasoning that proves the fact of God being the cause?"

We state that reasoning as follows :—' Primordial Matter, Atoms and 'Karma' † can act only when, prior to beginning, they are controlled by an intelligent (conscious) cause,—because they are themselves unconscious,—like the axe and such other implements ;—the axe &c., being unconscious, act only when they are controlled by the conscious carpenter, —and similarly Primordial Matter, Atoms and 'Karma,' being themselves unconscious, are found to act ;—hence it follows that these also are controlled by conscious agents.

Those who regard Primordial Matter to be the cause of the World have held that what controls the activity of Primordial Matter is the 'purpose of Man,' *i. e.*, Primordial Matter acts when urged to activity by the purpose of man; this 'purpose of man' is twofold: (1) the perception of Colour &c. and (2) the perception of difference between the Soul and the Attributes (of Matter); and neither of these

• निमित्तकार्यमावर्य is the right reading.

^{†.}Some people ascribe the origin to the action of Primordial Matter; others to Atoms, and others again to the 'Karma,' or the collective residue of the deeds of Men. Downloaded from https://www.holybooks.com

purposes can be accomplished without the action of Primordial Matter.

This doctrine cannot be accepted; as before the activity it is not possible; that is, until Primordial Matter acts and becomes modified into *Mahat* &c., there is neither 'perception of Colour &c.' nor 'perception of difference between the Soul and the Attributes of Matter'; so that these causes (of the activity of Primordial Matter) being absent, no activity of Primordial Matter would be possible. In answer to this it might be argued that—"the said causes are present (even before the action of Primordial Matter) for that which does not exist already can never come into existence, and that which exists can never cease to exist;"—but in that case, the theory would mean that what urges the activity of Primordial Matter is the 'purpose of Man,' which is already in

existence; so that the activity of Primordial Matter could not be for the accomplishing of the 'purpose of Man'; in ordinary life when one already possesses a certain thing he does not act for the sake of obtaining that Further, (under the theory as now explained), thing. the activity of Primordial Matter would be unceasing, its cause being always there at hand. That is, the activity of Primordial Matter being for the 'purpose of Man,' inasmuch as the 'purpose of Man' would co hypothesi be there in existence, the said activity should be always going on. If, even though present, the 'purpose of Man' did not urge the activity of Primordial Matter, then the said 'purpose' cannot be the cause of that gotivity; for that alone can be regarded as the cause of the activity of Primordial Matter during whose absence the said Matter does not act and during whose presence it does act. It might be urged that-"Even though present, the 'purpose of Man' fails to urge Primordial Matteriate activitys // on account of obstruction."

-But in that case, since the removal of the obstruction would be impossible, there would always be absence of activity; it would be impossible to remove the obstruction to the 'purpose of Man, for the simple reason that according to you that which exists cannot cease to exist; so that the obstruction being everlasting, there would always be absence of activity. Further, you (Sānkhyas) hold the view that Primordial Matter consists of the Attributes of Salfva, Rajas and Tamas in the state of equilibrium; and it behoves you to explain why this equilibrium ceases; until the equilibrium has ceased, there can be no disparity (which is necessary for the activity of Matter). "The dispurity is due to relation of mutual subserviency among the said Attributes being unsettled." • On this point also we put to you the following question-How is it that in (Primordial Matter) what has been equal [i.e. the Attributes comes to be more or less ? For certainly there is neither addition of anything new, nor subtraction of anything that has been there (and under these two conditions alone can there be disparity where there has been equality]. Then again, Man perceives Sound and other things, not perceived before,-Buddhi makes them perceived ; now do these things-Sound &c.-have any peculiarities produced in them (when they become perceived ? or do they not have any such peculiarities produced in them ?---If, when perceived, they have some pecu. liarities produced in them, then this (involving the assertion that peculiarities, not Present before, are produced) goes against your doctrine that "what has not been in existence already cannot be produced." If, on the other hand, the things are perceived without having any peculiarities produced in them, then also your 'self-contradiction 'a remains : this view of yours going against your doctrine that "the

[•] At one time Saffva predominates over the other two; then *Rajas* predominates and then *Tamas*, and so on, this unsettled relation causes the disparity which leads to the activity inv MacKer from https://www.holybooks.com

purpose of man urges the activity of Primordial Matter,"^{*} Thus it is found that the more the doctrine of Primordial Matter being the cause of the World is examined, the more opposed to reasoning it is found to be.

There are others who hold that the cause of the World consists of Atoms as controlled by the 'Karma' of men. То these philosophers we address the following remarks :---(A) If Atoms are active, such activity should be unceasing? "But they act under the influence of the peculiarities of What has been said in regard to time." Var. P. 463. Atoms applies to Time also. That is to say, just as Atoms, being unconscious things, stand in need of a conscious controller, so does Time also; as unconsciousness is present there also. "But there can be activity in unconscious things also, as we find in the case of Milk ; i.e. just as Milk, which is unconscious, is active, flows out, for the nourishment of the calf, similarly Atoms, though unconscious, would be active for the accomplishment of the purposes of This is not right; for what is put forward as the man." premiss is itself still to be proved; just as it is still to be proved that Atoms are active by themselves, so is it still to be proved that the unconscious Milk is active by itself. In fact if the Milk were active by itself, then it could flow out of the tests of the dead mother also :---it is however never found to flow out of dead bodies :- hence it follows that the Milk also is under the influence of a conscious agent; specially because the reason (for postulating such influence, viz: unconsciousness) is found present in the case of Milk also, † From all this we conclude that whenever an unconscious

+ The right reading dad the right partitions://www.holybooks.com

[•] If the things are perceived, it means that the 'purpose of Man'—in the shape of the *Perception* of things—is accomplished; and if this is accomplished without the appearance of any fresh peculiarities in the things, then for what would the activity of Primordial Matter be necessary? So that the two doctrines are not compatible.

thing is active, it is so only under the influence of a conscious (B) The following is another reason:-It is agent. only when the perceptible world, consisting of the elemental substances &c., is controlled by a conscious agent that it becomes the source of pleasure and pain,-because it is endowed with Colour and such other qualities, -- like the shuttle &c?--Again, it is only when Merit and Demerit are controlled by a conscious agent that they bring about the experiences of man,-because they are instruments,-like "The Soul itself shall be the controlling the Axe &c. agent of Merit and Demerit; that same Soul to whom the Merit and Demerit belong shall be the conscious agent controlling them (and not any other Being in the shape of ' God ')." That cannot be; for they (Merit and Demerit) cannot be there before the Soul has already become endowed with Body and Sense-organs,* until the aggregate of the Body and the Sense-organs has been produced for the Personality (the Soul), it remains incognitive and does not perceive Colour and such other objects of cognition; and there being no cognition, how could he attain any Merit and Demerit ?

Vār, P. 446.

Further, if the Personality were independent in its actions, it could not bring about suffer-

ing for itself; for certainly no one desires pain for himself; further, when one strikes his own limb, or cuts off his own head, he does so with the notion that the maining (caused by the striking of the limbs) and the dying (caused by the cutting off of the head) are desirable for him [and this could not be so, if our Man were an independent agent]. If it be held that "the Atoms become active when controlled by Merit and Demerit,"—that cannot be right; because of their being unconscious things; no unconscious thing has ever by itself been found to be the controller of anything. Even granting (for the take of argument) that Merit and Demerit have

the power of urging the Atoms to activity,-the view put forward cannot be accepted; as no Instrument by itself (independently of a conscious manipulation) has the power of accomplishing * any act; as a matter of fact, no Instrument by itself is ever found to accomplish an act. If (with a view to avoid the said difficulties) it be held that-" the action is brought about by Merit and Demerit, through the Atoms,"-this also cannot be accepted, for no such thing is ever found to happen; as a matter of fact we never find action being brought about by what is an 'objective' or an 'instrument' [and the Atoms and Merit and Demerit belong to these two categories]. " The Soul shall be the doer (the agent)." That we have already answered by pointing out that (prior to the appearance of the Body and the Senseorgans) the Soul is entirely incognitive [and as such cannot do anything]. " "The (first) appearance of the Body &c. would be without cause." That also cannot be right ; as no such thing has ever been seen. And there is no other explanation possible. Hence the only possible conclusion is that Atoms as well as' Karma 'become active only when controlled by conscious agents.

Objection :-- "Not being imbued with action, the conscious Being cannot be the cause."

If you mean by this that—" the Potter and such active agents are always found to be such as are imbued with action;—God, on the other hand, is devoid of action,—hence He cannot be the cause (the creator, of the world),"—then, this cannot be accepted; for none of the alternatives possible under this view can be maintained: when it is said that "God is devoid of action," to what action does it refer? †

* multing an is the right reading ; as is clear from the following sentence.

⁺ The Purvapäksin takes his stand upon the position that action means vibration, which presupposes some sort of material body, and as God has no such body, it follows that he must be devoid of action. The Siddhantin's reply is that vibration is not the only form of action; as knowing, thinking, willing &c. also are actions; and there all solve presuppose were actions; and there are actions and the solve of presuppose were actions.

Our actions are of two kinds-(1) that in the shape of Throwing Upwards and the like, and (2) that which is spoken of by means of verbs. If the assertion that 'God is devoid of action' refers to actions expressed by verbs. the fact stated as the 'reason' (that God is devoid of action) is not true; for God is held to be self-sufficient (independent): as a matter of fact, God is ever independent. " What is the meaning of self-sufficiency ?" It means that He is not influenced by other agents and that He on His part influences other agents *; this we have already explained in course of our explanation of the 'case-relations'. If, on the other hand, the allegation that 'God is devoid of action' refers to such action as Throwing Upwards and the like, then, the premises put forward [' what is devoid of action cannot be the cause of anything, hence God, being devoid of action, cannot be the cause of the world'] is clearly 'inconclusive,; for as a matter of fact, we find both kinds of causes-active as well as *inactive*; at times substance produces Vār. P. 465. another substance after their action has ceased;

e.g. when two things (atoms) are in motion and they come into contact, their action (motion) ceases, and it is only then that the two things produce other substances, through the said contact; this provides an example of the production of things by causes not in action. again, when several substances (yarns, e g.) come together and form an aggregate, a single substance (Cloth) is produced out of such conjunctions as are distinct from the specific causes, [*i.e.*, the conjunctions between each pair of yarns, which are the 'simple causes' of each of those 'pairs of Yarns']; while when a certain component part of an object is separated from it [when for instance, the corners of a square piece of wood are cut off], the previous object (the wooden square) ceases to exist, and the remaining component substances (parts of the wood-square) bring into existence a different object

[&]quot;The sense required adoct atting the sense required adoct atting the sense required a sense result a sense required a sense r

(in the shape of the rounded piece of wood);-and here also we have the production of an object without any action on the part of the causes. On the other hand, some substances produce others only when endowed with action; e g. when two things come into contact by the action of one of them (e.g. when a ball of clay is thrown at the clod of Earth lying on the ground), and the said action comes to end on account of that contact, the new substance (the enlarged olod of Earth) becomes produced simultaneously with the cessation of the said action of one of the two substances; and here we have an example of the production of a substance by causes endowed with action. Further, your argument involves self-contradiction also; since your philosophy does not admit of such action as Throwing Upwards and the like.

[The Opponent raises fresh objections against the idea of God being the Creator of the World]-" God cannot be the Cause (of the World), because none of the alternatives possible under this theory is admissible: E.g. if God is the Creator, does He create things (a) through something else ? or (b) independently of anything outside Himself ? "What does this mean ?" (a) If He does it through the help of something else, then He cannot be the Creator of that by the help of which He creates other things; and so with other things also. The fact that 'God is not the creator of the thing upon whose help He depends' would also serve as an argument (against the idea of God being the Creator of the World). If it be held that God creates certain things independently of everything else,-then it should be possible for Him to create all things in the same manner. (b) And if God be held to create all things independently by Himself, then the action of men would become futile; and this would mean that there would be no Final Release for men; and all the objections, dihat hipsylowbeen/bourgedm (in Adh. III) against the view that the Creator of things is not dependent upon the actions of men, would become applicable to the the view now put forward."

[Our answer to the above is as follows]—Inasmuch as we have never held the view that God creates things independently of all things outside of Himself, our theory is not open either to the objection that Merit and Demerit are futile, or to those objections that lie against the view that the Creation of the World is not dependent upon the actions of men. As regards the argument that—"God cannot be the Creator of that thing by whose help he creates other things,"—this is not quite true; it is not true in all cases that one does not create that by whose help he does something else; e.g. a man who is well-versed in several orafts makes the axe with the help of other implements,

Vāa, P. 466.

and with the help of that same axe he makes sticks and such other things, and with the

help of this stick he again makes the Jar;---and yet by making these things one after the other, the man does not cease to be the 'maker.' Similarly with the help of Merit and Demerit, God makes the Body and its pleasures and pains,-and He also brings into existence Merit and Demerit with the help of Mind-Soul contact accompanied by pure and impure intentions (respectively)-and He also produces the pure and impure intentions through the remembrance (on the part of men) of past pleasures and pains, and with the help of things that brought about those pleasures and "At the time that He creates a certain thing, pains. He is not the maker of that which helps Him in that creation." If you mean by this that.—" at the particular time when He brings into existence something made by Him. He cannot be the Oreator of that with the help of which He brings that thing into existence,"-then our answer is that we do not say that God creates all things at one and the same time; what wewsaydes frehattip Herereaterschings one after another ; and the said objection does not lie against the theory of God creating things one after another. "The thing that He creates in the beginning-the creation of that must be without the help of anything else." If you mean by this that-" if God creates the Body &c. through the help of Merit and Demerit, how does He create the first thing at the beginning of creation ?"-then our answer is that since we do not admit of any 'beginning of creation' there is no room for the question; in fact we have already explained that the world is without beginning. It is thus also that Merit and Demerit come to be effective; that is to say, Merit and Demerit subsisting in the several living beings can be effective only if the world is without beginning and the Creator is dependent upon things outside of Himself.

[A fresh question is started]—" When God creates the world, for what purpose does He create it? In ordinary experience we find that when a man does something, he does it with a certain motive—such as 'I shall obtain such and such thing,' or 'I shall get rid of such and such a thing '; for God however there can be nothing to be got rid of, because He has no pain; nor can there be anything to be acquired, as He is all-powerful (and as such is already the master of all things)."

[There are two answers to this question]—(I) Some people have held that *it is for purposes of* amusement; some people explain that God creates the World for purposes of amusement. This view however is not right; for 'amusement' is that which brings happiness to those who, in the absence of that amusement, would not obtain happiness;—and certainly the Supreme Lord, having no pain, cannot be a seeker after happiness; as it is only persons in pain that seek for happiness; ded from https://www.holybooks.com (II) Others have explained that God creates the world for the purpose of showing His powers; these persons have held the view that it is with a view to make known the $v_{ar. P. 467.}$ manifoldness of the world (created by Him) that God creates it. This view also is as unsound as the former one; there is nothing gained (by God) by making known His powers, nor is anything lost by not making them known.

" For what purpose then does God create the world?"

The most unobjectionable view is that it is by reason of His nature being so that God creates things; just as the Earth upholds things, because such is its very nature,-and similarly with other things,-exactly in the same manner God acts because such is His very nature; for as a matter of fact the very nature of God consists of activity. " If God's activity is due to His nature, He should act constantly, without cessation." If you mean by this that-" if the very nature of God consists of activity, then it is not possible for Him to be active and inactive by turns; for it is not possible for that whose very nature consists of activity to cease from activity; nor should it be possible to create things one after the other, because the nature of a thing is one and uniform [so that there cannot be activity and inactivity, and consequent creation and non-creation, one after the other]; it will not be possible for God to say at one time 'may this come off,' and at another time 'may this not come off;' for out of a cause which is of one uniform nature, we never find different kinds of products issuing," -then our answer is that the objection does not lie against us, for we qualify God as endowed with intelligence; we have already explained that God's nature is endowed with intelligence, and what is dependent upon things outside itself can never be incessantly active; it cannot produce everything at menoleand frentisamevutimes din clast what alone

come into existence are the causes of which happen to come together, while that of which the causes do not come together does not come into existence; and certainly it is never possible for the causes of all things to come together at one and the same time; hence the contingency of all things being produced at the same time cannot arise. When God does become active, towards creating a certain thing He had to wait for (a) the time of fruition of Merit and Demerit to arrive, (b) the appearance of other (auxiliary) causes, (c) the proximity of beings related to the things to be created (d) the fruition of the Merit and Demerit belonging to the beings related to the thing to be created, and (e) the non-obstruction of the aforesaid conditions.

" The Godliness-Omnipotence-of God,-is it eternal or evanescent? If it is evanescent, you should point out the cause that produces it; in the case of the peron whose powers are evanescent, there is always a diversity of causes bringing about those powers-the power of being minute or large at will and so forth; and so in the case of all other beings. And (there being diverse causes of His Powers) 'What would be the harm there would be several Gods. if there were several Gods?' There would Vår. P. 468. be this difficulty, that if two Gods, with conflicting motives, intended to act towards the producing of a single thing,-there would be no (effective) action at all. If it be held that one would surpass the other, then the one that surpasses would be the God, and not the other. If. on the other hand, the powers of God are eternal, then there would be no use for Merit (in His case), as His powers, (being eternal), could not be the result of His Merit."

Our answer is that the powers of God are *eternal*. Nor would this view be open to the objection that in that case His Merit would be useless; for the Merit that belongs to God does not produce powerspin/ Hims// Wints it does is to help the aggregate Merit and Demerit subsisting in each individual Soul. [This answer has been given on the understanding that Merit does belong to God]; in reality Merit does not belong to God [all His purposes being accomplished by means of His Knowledge and Power, which are eternal]; so that the objection that has been urged has no application at all to our view.

"Inasmuch as we can have no definite conception of the nature of God, there would always be a doubt as to whether God is a 'substance' or He belongs to one of the other categories of 'quality' and the rest."

God is a substance, — because he is endowed with a quality, that of Intelligence, — like other substances. "If God is intelligent, He must be like other Souls (encased in a Body, and so forth)." No, He is not like other Souls, for the simple reason that He is endowed with distinct qualities; just as Earth &c. (though substances) are not regarded as Souls, because they are endowed with distinct qualities (which do not belong to Souls), in the same manner, since God differs from other Souls in His qualities, He cannot be like these other Souls.

"What is the difference in His qualities ?"

In answer to this some people declare that the merit, knowledge, dispassion and power of God are of a superior order,—this superiority consisting in their *eternality*.

This however we do not understand; for there is no such proof of the eternality of God's Merit &c. as there is of His being endowed with intelligence; and one cannot accept that for which there is no proof.

The real superiority of God, which constitutes His difference from other Souls, consists in the eternality of His intelligence; the intelligence of God is eternal, as also the other common qualities of Number &c.,—God being endowed, like Ākūsha, With size qualities://w/WWWababisstherproof of God's

intelligence being eternal?" The proof of this consists in the fact that Atoms are active only when controlled by "This fact only proves that God an intelligent agent. is possessed of intelligence; how does it follow that this intelligence is eternal ?" That follows from the fact that God's intelligence is not restricted to only one thing at a time; such intelligences as are restricted to one thing at a time are found to appear only when the Body and such other (accessory) causes are present; God's intelligence, on the other hand, is not restricted to only one thing at a time; as is shown by the fact that at one and the same time it brings about several effects; e.g. we find Vär P. 469. several immovable things (trees) coming into existence at one and the same time; and this could not be possible if God's intelligence were restricted to only one thing at a time. The qualities present in God are only the following : Number, Dimension, Separateness, Conjunction, Disjunction and Intelligence.

If, from the fact of God being an *intelligent* being, one were to deduce the fact of His having a body also,—the person who would make this deduction would have to admit those Body and other (attendant) things to be either eternal or non-eternal. If they are non-eternal, then the presence of Merit and Demerit also will have to be admitted (in God);^{*} and if that were admitted, then, being under the influence of Merit and Demerit, God would not be 'God', the 'Supreme Lord', at all. If then you assume the Body &c. of (iod to be eternal, then you would be making an assumption contrary to what is directly perceptible [no Body being ever found to be ever-lasting]; and if you are prepared to admit what is apparently absurd, you might as well admit Intelligence (Cognition) itself to be eternal; and if you hold that in God there are several (evanescent) intelligences appear-

[•] For, as already proved, the Body &c. of each individual Soul is due to its Merit and Demerit, Detthics dehiels the the to its Solid be ablody.

ing in a continuous series,—then in that case, it would not be possible for several trees &c. to come into existence at one and the same time. If (in answer to this) it be held that even though appearing in a series, those intelligences are operative upon all things * (So that it would be quite possible for several things to be produced simultaneously),—even so this would be assuming something quite contrary to wellknown facts; and one who would make such an assumption might as well admit Intelligence itself to be eternal. Thus then it is found that Intelligence can be either *eternal* or *appearing in a continuous series*; and it has been shown that it is not right to hold that it forms a continuous series.

[The Opponent takes up the thread of the original discussion]—" If God be held to be different (from other Souls) simply by reason of His being endowed with qualities different from those found in other Souls,—then this would mean that such things as are possessed of the same qualities are identical; e.g. Time and Space."

Certainly not; what you say does not necessarily follow from our hypothesis; what we assert is simply that from the difference in qualities there follows diversity (in the things), and not that from non-difference of qualities there follows identity (of the things); e.g. we find that though several Jars are possessed of the same qualities, yet they are many; so that even though Time and Space may be possessed of the same qualities, yet they are regarded as different, by reason of the fact that they bring about diverse effects.

Further, unless God were endowed with intelligence, it would not be possible for the World to come into existence. And this intelligence or cognition of God is operative upon all things, bearing upon past, present and future things—

[&]quot; The right reading vision and a standard the standard www.holybooks.com

and is direct (intuitive)^{*}; it is not inferential, nor verbal [nor analogical, nor sense-perception]; for neither Inference nor Soriptures bear upon that. God's cognitions being everlasting, there is no Faculty (Memory); *i.e.* inasmuch as God's cognition is eternal, there need be no Faculty or

Var. P. 470. Memory for Him; and because His cognition is eternal, and there is no Faculty in Him, He has no *Beeollection*; there being no Recollection He can have no *inferential* cognition. He has no pain, because He has no Demerit; and having no pain, He does not become disgusted with things; and for that same reason he has no hatred; Desire there is, but it is not tainted (by ignorance), and is unobstructed in regard to all things, just as is His Intelligence (or Cognition).

"Is God bound or released?"

He is not bound; because He has no pain; and not being *bound*, He cannot be *released*; as it is only one who has been in bondage that can be *released*; and there is no bondage for God; hence He cannot be *released*.

"Since God is not related to the other Souls, it can not be possible for Him to control them."

If you mean by this that—" the Merit and Demerit subsisting in the other things, (i.e. the other Souls), are not related to God, either directly or indirectly; and Merit and Demerit cannot be operative unless they are controlled (by God), "—our answer is that there is no force in this; as an unborn relation is always possible; some pepole have held that there is an unborn relation (of God) with the other Souls; and this 'unborn relation,' not having been denied in the Nyāya system, it may be taken for granted. The philosophers who have postulated the 'unborn relation' prove it by the following reasoning :—'God must be related to Akāsha

[•] Pratyakts means direct cognition, not cognition form of the Senses; for God's cognition being eterhally classific bir Bork the silver holybooks.com

and other all-pervading substances,—because He is in contact with corporeal substances,—like the Jar;—the Jar, being in contact with another Jar,[•] which is a corporeal substance becomes related to \overline{Akasha} and other all-pervading substances,—and as God also is similarly connected with corporeal substances, He also should be related to \overline{Akasha} and other all-pervading substances.' "This relation between God and Souls—is it all-pervading or not?" This question is meaningless, and as such, need not be answered at all; † all that we can say is that there is such a thing as the relation of God with other Souls; we do not go further to examine whether this relation does, or does not, pervade over God and the other Souls.

Those philosophers also who do not accept the presence of the 'unborn relation' (as between God and other Souls). -for them also, inasmuch as it is possible for God to be related to the atomic Mind, there would always be the said relationship (with other Souls); there is a Mind belonging to each individual Soul, and all these Minds are related to God; and thus then, it being possible for God to have this (indirect) relation, through relation (of Mind), with the other Souls,-it is by this relation that God controls all Souls;--just as action is produced in the hand by the Man's effort and the connection of the 'Soul with the hand, and the Hand, rendered thus active, becomes connected with the pincer or some such implement, and Var. P. 471. by means of these instruments he gets at the red-hot ball of iron (which the hand could not get at directly).

"What you have put forward may be accepted as an argument for God being regarded as the cause of the World at the beginning of Creation; but from this same argument.

[•] सम्मनिष्त्वेष व्या is the right reading.

t waracala provioud the fright the diverse who holybooks.com

it would seem that God cannot be the cause of the world at the present time."

The same argument holds good for the present time also; the same arguments hold good even now : (a) 'the Merit and Demerit of Souls dying must be controlled by an intelligent Agent; '--(b) 'the Earth and the other elemental substances down to Wind are operative in performing their respective functions of upholding (wetting, burning and blowing) only when controlled by an intelligent Agent,-because they are themselves unconscious,-like the Axe and such other instruments;'--(c) similarly wo can make 'Grass and such things' the subject of the syllogism (proving that they are controlled by an intelligent Agent), and the premiss put forward in the form 'because they are the objects of visual and tactile perception.'-In the same manner, in regard to whatever object there may be a difference of opinion,-and it may be found to have the character of a 'product, '--we can make it the 'Subject,' and prove the same fact in regard to it by means of the example of the Axe and such other instruments. The same conclusion is proved by the Scriptures also; that God is the cause of the world we learn also from the Scriptures; e.g. [we may quote the following Smriti |----'The ordinary man, ignorant and not master of his own happiness and unhappiness, can go to Heaven or to Hell, only as propelled by God. When that Lord is swake, then alone is the world active ; and when, with His mind composed, He goes to sleep, the entire world disappears.'*

Section (6).

(Sutras 22-24.)

Examination of the **Fiew** that the World is the result

of Chance.

Bhāęya on Su. (22).

[P. 201, L. 6 to P. 202, L. 5.]

Another philosopher asserts as follows :--

Sutra (22).

"THE PRODUCTION OF ENTITIES MUST BE WITHOUT AN ENFIGIENT CAUSE ; AS WE SEE SUCH THINGS AS THE SHABPERSS OF THE THOEN AND THE LIKE." (Su. 22.)

"The Body and such other entities must be regarded as produced without an efficient cause; since we see such things as the sharpness of the thorn and the like; such things as the sharpness of the thorn, the variegated colour of the minerals found in mountainous regions, the smoothness of stones, are found to be produced without any efficient cause, and yet each of them has a constituent cause "; the same must be the case with the production of the Body &c. also ".

* **चोपादान** of the printed text gives no seuse ; the right reading **चोपादानवच्य**, which is countenanced by the Vartiks, is found in the Puri Ms. B.

It is clear that what the Parsopakeis denies in the present Sutra is the Nydya-theory of God being the efficient cause of the world ; the Sütra distinctly mentions the 'nimiffa', and the Bidges makes it still clearer by saying that the things mentioned-the sharpness of the thorn &co.-have a constituent cause, and yet they have no efficient cause. Thus explained, the present section becomes connected naturally with the foregoing section dealing with God as the efficient cause of the world. In their anxiety to connect this section with what they consider the principal subject of the Addyaya-the constituent cause of the world-the commentators have needlessly confused the issues involved. E.g., the Parishuddhi says -" The Parcapatein proceeds to criticise the Siddhanta position (put forward under Sc. 4-1-11) that perceptible things are produced out of perceptible causes ; and for demolishing this view he begins with the demolition of the efficient cause-"; and Vardhamana adds that in reality the Purvapakein's standpoint is to deny all kinds of cause of the world. Vishvanätha also says-" If things are due to mere chance, then Atoms cannot be the constituent cause, nor God the efficient cause, of the world [hence the **Pareapaksin** insists upon the chance-theory, and the Biddkaptin controvecturit and from https://www.holybooks.com

Vartika on Su. (22).

[P. 471, L. 17 to P. 472, L. 6.]

Another philosopher (the Materialist) says—"The production of entities etc. etc.—says the Sūtra. Just as such things as the sharpness of the thorn and the like are found to be produced without an efficient cause, and yet each of them has a constituent cause,—so must be the case with the production of the Body &c. also—says the Bhāşya. This Sūtra is meant to put forward an illustrative example. What is the actual argument (that the illustration is meant to substantiate)? [The reasoning is]—'The Body and such other particular products must be without an efficient cause,—because they have a particular shape—like the thorn and such other things."

The Vartika offers its own answer to the above argument]-The reasoning cannot be accepted; because in the case of things of which we do not perceive an efficient cause, we can find out such cause by means of Inference; that is to say, when we cannot perceive by our senses the efficient cause of a certain thing, we have to seek for it by means of Inference. "Why so?" For the simple reason that the thing in question would be similar to things known to to have an efficient cause; as a matter of fact, we find that objects with shapes, such as the Jar and the rest, have efficient causes; the Body and the Thorn &c. also have shapes; hence it follows that these latter also have efficient causes. Further, this matter has been explained. "What has been explained?" It has been explained that-' the production of the Body is due to the influence of previous deeds' (Su. 8-2-60). And there is no object with shape as is admitted by both parties to be without cause (which could serve as the corroborative instance in the Resyapakein's explorism).

Sulra (23).

[The Ekadeshin's answer to the Purvapakea.]

SINCE THE NON-CAUSE IS (SPOKEN OF AS) THE 'CAUSE,' THE SAID PRODUCTION OF ENTITIES IS NOT 'WITHOUT CAUSE.'

Bhāsya on Sū. (23).

[P. 202, Ll. 7-8.]

[Some Naiyāyikas have offered this as an answer to the *Pūrvapakṣa* view expressed in Sū. 22]. It is alleged (in Sū. 22) that 'bhāvoțpațți', the 'production of entities', is 'animițțațați'; [and since this latter term ends in an affix which has the sense of the Ablative, it can only mean that the 'production' proceeds from 'animițța' 'non-cause']; and that from which a thing proceeds is its 'cause'; so that since (from what is said in Su. 22 it is clear that) the 'animițța,' 'non-cause,' is the 'cause' of the 'production of entities', it follows that the said 'production' is not 'without cause' (as is alleged by the Pūrvapakṣin).

Vārļika on Sū. (23).

[P. 472, L. 6 to L. 10.]

Some people offer, to the *Pürvapakşa*, the following answer—Since the non-cause fc. fc.—says the Sūfra. The 'non-cause' 'animiffa,' itself would be the 'cause,'; for that from which a thing proceeds is its 'cause'; hence arising out of 'animiffa', the said 'production of entities' cannot be said to be 'without cause.'

Suira (24).

'NIMITTA' (CAUSE) AND 'ANIMITTA' ('NON-CAUSE') BEING TWO DISTINCT THINGS, THE ANSWEB (OFFEED IN SU. 23) IS NO ANSWER AT ALL. (SU. 24). Bhasys on Su. 24).

[P. 202, L. 10 to L. 13.]

'Nimiffa', Cause, is one thing, and its negation (animiffa ('non-cause') is another; and the negation cannot be the same as Downth aded negative drywww. Buybgoks. When it is said

that 'the vessel is without water', this denial of water is not the same as water. So that there is no point in saying, as the *Ekadeshin* has said in Su. 23, that the 'animitta', 'non-cause,' is the 'nimitta', ' cause', of production].

[The real answer to the Pürvapakea put forward in Sū. 22 is that] the view therein put forward in no way differs from the view that 'the origination of the Body &c. is not due to the actions of men'; and being identical with this view, it must be taken as refuted by the refutation of that view, (under Sütras 3-2. 60-72).

Vartika on Sū. (24).

[P. 472, L. 10 to P. 473, L. 18.]

The answer offered in Su. 22 is not right; for 'nimitta' and 'animitta' beng &c. &c.--says the Sutra. 'Nimitta' is one thing and its negation is another; and the negation cannot be the same as the 'negatived '-siys the Bhasya. 'Nimitta' (being a positive term) affirms a thing, while, 'Animitta' is its negation; and certainly it is not right to identify 'affirmation ' with ' negation '.

The view propounded in Sū. 22 in no way differs from the view that ' the origination of the Body &c, is not due to the actions of men'; and being identical with that view, it should be regarded as having been refuted by the refuta tion of that view (under Su. 8-2. 60-72).

[The Vartika offers its own answer to the Purvapakea]-He, who asserts that "the production of the thorn and such things is without cause ", should be asked the following question-Is it the production of the Thorn only that is without cause ? or that of all things ? If it is the production of the Thorn only that is held to be without cause, then on the strength of that as an example, it can be proved that all the rest has a cause. If, on the Var : P. 478.

Dovothere hand http://www.iewyheld.cisnthat all things

are without cause, then there is self-contradiction; since you admit of the relation of the Teacher and the Taught; you hold all things to be without cause and yet you are expounding a certain doctrine (to some one), and this process involves a self-contradiction [the expounder is the active agent, the person to whom something is expounded is the objective ; and these two conceptions involve the notion of cause]. In fact, the very use of a sentence involves a self-contradiction on your part; when you put forward the sentence-" the production of entities is without cause, as we see such things as the Sharpness of the thorn and the like" (Sū. 22)-you make use of something that serves as the expounder (of a doctrine); and then to say that 'there is no such thing as cause' involves a self-contradiction [since the expounder is a kind of oause). Further, 'the production of entities is without cause,' and 'the production of entities is due to a cause,'---both these are sentences (verbal expressions);--now if you do perceive the difference between the meaning of these two expressions -then this very fact sets aside the allegation that "the production of entities is without cause ; " since the perception of the difference in the meanings arises from (and has for its cause) the difference in the two expressions. If, on the other hand, you do not comprehend the difference in the meanings due to the difference in the expressions, then there would be no point in making use of a particular expression,-any expression might be used to convey any meaning, (there being, en hypothesi, no difference in the meanings of different expressions). Then again, one who holds the production of entities to be without cause strikes at the root of all practical usages of men. And in asserting that 'the production of entities is without cause,' if you include underwite all calification works can have nothing

to serve as the corroborative instance (of your syllogism); if, on the other hand, you include under it only a few entities—such as the Body and the like—then, whatever might be cited as the corroborative instance, it would be wanting in one of the properties of the Probandum,—it would have the property of being with shape, and would not have the property of being without cause [according to both parties; and it is essential for the Instance to be one that is admitted by both parties to be on all fours with what is meant to be proved].

End of Section (6).

Section (7).

[Süfras 25-28.]

Examination of the view that All Things are evanescent. Bhāşya on Sü. (25).

[P. 202, L. 18 to L. 18.]

"ALL THINGS MUST BE EVANESCENT; BECAUSE THEY ABE LIABLE TO BE PRODUCED AND DESTROYED. " SQ (25).

^o The causes, out of which the things of the world are produced,—do they consist of all evanescent things? or of all eternal things? or of some eternal and some evanescent things? This is what is going to be considered now. If the first two alternatives are true, then there can be no 'Rebirth,' such as the *Naiydyska* postulates. Hence it becomes necessary to refute them; and the present section proceeds to refute the first of the three alternatives. The position controverted here is not the same as that in which all things are held to be momentary; because the Pürvapakşin here admits some sort of icontinuity of existence of things and as such differs from the thorough-going Kşaya bhangavadin Nihilist—Parishuddhi.

Varghamana, in view of what he has said in connection with the preceding section, says — Though what has been proved in the foregoing section is that the things of the world have an efficient cause, yet what the present section takes up is the question of eternality or evanescence of all three kinds of cause, because in a general way white has been proved with the present is applicable

1486

"What is the meaning of being 'evanescent'? That which exists only for some time is called 'evanescent.' That which is *liable to be produced* is non-existent while it is not produced, and that which is *liable to be destroyed* is nonexistent when it has been destroyed; * and what this means is that all material things—such as the Body &c.—and all non-material things—Cognition and the rest—both kinds of things are found to be *liable to production and destruction*; from which it follows that they are all evanescent."

Varțika on Sü. (25).

[P. 473, L. 16 to P. 474, L. 5.]

"All things are evanescent &c. &c.—says the Sqtra. What is the meaning of being ' Dvanescent'? That which exists for only some time is called 'evanescent;' that which is liable to be produced is non-existent while it is not produced, and that which is liable to be destroyed is non-existent after it has been destroyed; and what this means is that all material things—the Body &c. and all non-material things—Cognition and the rest—bath kinds of things are found to be liable to production; from which it follows that they are all evanescent,"—says the Bhāşya.

to the constituent and non-constituent causes also. The precise Doubt or question to be dealt with in the present section is—whether or not cognisability is invariably concomitant with examescence.

Vishvanatha says-If all things are uvanescent, the Soul also should be evanescent; hence it becomes necessary to controvert that view.

• The printed text reads **unique**; the Variaka (Bib. Ind. edition) and the **Tapparya read unique**; we have adopted the latter, as being more in keeping with the sense of the sentence as a whole. With the former reading the sentence would mean—' that which is liable to be destroyed is never not destroyed.' Though this will give some sort of sense, yet it would not be in keeping with the rest of the passage. The **Tapparya** construes the **Bhaqya** to mean—' things are nonexistent after destruction; hence liability to production and destruction proves that things exist only for sometime, they are evanescent.' [The Vārļika offers its own answer to the above arguments of the Pāroapakşa]—Inasmuch as the argument stated in the Sāļra stands in need of a corroborative instance,^{*}—and as it includes 'all things' under the Proposition itself[leaving nothing to serve as the required instance] it is vitiated by the absence of a corroborative instance; your proposition is that 'all things are evanescent,' and this makes

Var. P. 474. a corroborative instance impossible; as everything is included under the Subject (*all* things'), and what is itself to be proved cannot form the corroborative instance. Further, the *probans*—'because they are liable to be produced and destroyed '—is non-pervasive (*i.e.*, not present in the entire Subject); you make 'all things' the *subject*, and then predicate of them 'liability to be produced and destroyed;' but as a matter of fact this 'liability to be produced and destroyed' is not present in several such things as Atoms, Akāsha (Time, Space &c.), some qualities of these, and in Community &c.; so that the probans is nonpervasive.

Safra (26).

> Bhāşya on Sū. (26). [P. 202, Ll. 20-21.]

If the evanescence of all things is everlasting (eternal), then, by reason of the *eternality* of that 'evanescence,' it cannot be true that 'all things are evanescent; '---if, on the other hand, the said 'evanescence' is not ever-lasting, then while the 'evanescence' would be non-existent, all things would be *eternal*!

Vārļika on Sū. (26).

When the Opponent asserts that "all things are evanescent," he should be asked the following question—Is the 'evanescence' of all things everlasting? or evanescent? If the 'evanescence' is everlasting, then all things are not evanescent. If, on the other hand, the 'evanescence' is evanescent, then by reason of the absence (at times) of the 'evanescence,' all things would be eternal. For these reasons the Probans put forward is 'contradictory.'

Sülra (27).

[The Siddhānfin's objection to the Ekadeshin's argument in Su. 26.]

AS A MATTER OF FACT, THE 'EVANESCENCE' IS NOT ETERNAL; LIKE THE DESTRUCTION OF FIRE AFTER HAVING DESTROYED THE THING BURNT BY IT. (SU. 27.)

Bhägya on Sū. (27).

[P. 203, Ll. 2-8.]

The said 'evanescence' is not eternal. "How so?" Just as Fire, after having destroyed the thing burnt by it becomes itself destroyed (extinguished), similarly the 'evanescence of all things,' after having destroyed all things, becomes itself destroyed. [So that there need be no incongruity in regarding the 'evanescence' as 'eternal.']

Vārțika on Su. (27). [P. 474, Ll. 11-12.]

As a matter of fact go. gc.—says the Sütra. Just as Fire becomes destroyed after having destroyed the thing to be burnt, so does 'evanescence' also become destroyed, after having destroyed all things.

Sūţra (28).

[The Final Siddhanfa.]

THE WITEBNAL CANNOT BE BIGHTLY DENIED; BECAUSE THE DETERMINATION (AS TO A CERTAIN THING BEING BIEBNAL OR EVANESCENT) MUST BE IN ACCORDANCE WITH WHAT IS ACTUALLY PERCENTED of fr(Stutt29A) www.holybooks.com Bhāşya on Sū. (26). [P. 203, L. 5-9.]

The theory propounded (in Sü. 25) totally denies all 'eternality;' but the total denial of 'eternality' is not right.— Why?—Because the determination must be in accordance with what is actually perceived. That is, when a certain thing is rightly found to be 'liable to be produced and destroyed,' it should be regarded as 'evanescent', while what is not found to be so liable should be regarded as the reverse; and as a matter of fact, the said *liability to be produced and destroyed* is not perceived by any means of right knowledge, in such things as the elemental substances in their subtle forms, Akāsha, Time, Space, Soul and Mind,—some qualities of these,— Community, Individuality and Inherence;—hence the conclusion is that all these are eternal.

Vārfika on Sū. (28).

[P. 474, L. 18 to P. 475, L. 10].

The theory propounded in Su. 25-that "all things are evanescent "-- totally denies 'eternality'; but the sternal cannol be rightly denied &c. &c.-says the Sufru. It is not right to totally deny ' eternality,' because the determination must be in accordance with what is actually perceived; it is only in cases where we actually (perceive what has been put forward as the reason) i.e., 'liability to be produced and destroyed', that on the strength of that reason, evanescence can be admitted. If you regard things as evanescent without any reason, then the statement of the reason-' because they are liable to be produced and destroyed '-becomes stultified (futile). Further, one who speaks of 'non-eternality' (evanescence) must admit 'eternality 'also, as the negative particle always signifies either denial of what is possible, or exclusion, (contradistinction); as a matter Var P. 475. of fact, the negative particle, when used, is used in the sense of either (a) denying what is possible, or (b) evoluting (eliminating) and in either wase it presupposes

the existence of what is the second term in the negative compound; so that (a) if the compound 'non-eternal' denotes what is eternal, then, -- inasmuch as what is denied in one place is only what exists in another place, it follows that what is signified by the second term in' the compound exists ;--and (b) if the 'non-eternal' is that which is other than eternal, even so what is signified by the latter term in the compound becomes established; for unless the thing signified by the latter term exists, there can be no sense in a thing being other than that. And inasmuch as 'non-eternality' is an actuality-- ' non-eternality ' being accepted (by us also) as a property of things[#]-there would be nothing wrong (even according to us) in the assertion that 'all things are non-eternal' (if by 'all' are meant all those things that are actually found to be liable to be produced and destroyed); further 'non-eternality' is a property, and as such, it cannot exist if the object to which it belongs is non-existent ; and in this sense (since the very existence of the property of 'non-eternality ' presupposes the existence of things), there need be nothing wrong in the allegation that 'all things are non eternal.' It being; admitted (by both parties) that whatever is liable to be produced and destroyed is non-elernal, the Opponent might try to prove the 'non eternality' of all things on the ground of their being existent beings, the meaning of 'non-eternality' being either 'being suspected of being non eternal,' or ' being other than eternal '; -but for such a person also non-eternality would be possible only when there would be in existence that which is denoted by the second term of that compound (i.e., the eternal thing), and his very proposition would be faulty; and hence his allegation becomes rejected.

End of Section (7).

Section (8).

[Seiras 29-83.]

Reamination of the Theory that All Things are Eternal.

Bhāşya on Sū. (29). [P. 203, L. 9 to L. 12.]

Here is another sweeping assertion :---

Sufra (29).—[Purvapakea].—" ALL THINGS MUST BE ETERNAL; BECAUSE THE FIVE EIRMENTAL SUBSTANCES ARE ETERNAL."—(SU. 29).

"All this, everything in the world, is an elemental substance; and elemental substances are eternal, the total destruction of any elemental substance being impossible (according to the Naiyāyika himself) [hence everything must be eternal]."

Vārțika on Sū. (29).

[P. 475, L. 10 to L. 18.]

The following is another sweeping assortion:--" All things are eternal &c. &c.--says the Sūţra. Everything in this world is an elemental substance; and all elemental substances are eternal,--the total destruction of any elemental substance being impossible,--says the Bhāsya. Hence it follows that all things are eternal."

- Sūļra (30).

[Siddhanta.]

What has been asserted cannot be right; as we actually perceive the cause of production and of destruction.---(Sü. 20).

• If all things are eternal, there can be no Re-birth, as Re-birth pre-supposes the destruction of the Badyade Elements the setessary to be bound revertiable with the set of th

Bhāşya on Şū (30).

As a matter of fact, we actually perceive the cause of the production (of things), as well as the cause of (their) destruction; and this would be incompatible with the view that all things are eternal.

Vārļika on Sū. (80).

Snfra (31).

[Objection]---" INASMUCH AS ALL THINGS POSSESS THE CHARACTERISTICS OF ELEMENTAL SUBSTANCES, THE DENIAL (IN SUB. 30) IS NOT BIGHT." (SU \$1.)

> Bhāşya on Sū. (31). [P. 203, Ll. 17—18.]

"The thing, of which you think you perceive the causes of production and destruction, is not found to be anything totally different from, and devoid of the characteristics of, Elemental Substances; and inasmuch as everything possesses the characteristics of Elemental Substances, it must be an Elemental Substance; so that the denial (in Su. 80) is not right."†

* Things composed of elemental substances are not the same as the elemental substances themselves; the Bull and the Jas for instance are not the same as the subtle Atoms; for if they were so, they would be as imperceptible as the Atoms are. And since we actually perceive the cause of production and destruction of such things as the Bull and the Jar, these ognuct be eternal, even though the elemental substances may be so.—*Talparya*.

† Elemental substances are eternal ;---the Bull and the Jar are not anything different from Elemental substances ;---hence eternality cannot be denied of the Bull and the Jar. Downloaded from https://www.holybooks.com

Vartika on Sū. (81).

[P. 475, L. 1 to L. 18.]

Inasmuch as all things to. fo.—says the Sūtra. "That Vár. P. 476. of which you think you perceive the causes of production and destruction, is not found to be devoid of the characteristics of Elemental Substances; and inasmuch as everything possesses the characteristics of elemental substances, all things must be eternal."

The Vartika supplies its own answers to this argument of the *Pitruspak*sa]-(1) When the Opponent says that "all things are eternal," he admits that nothing is produced and nothing is destroyed; and since he admits this, all his activity, which is for the purpose of obtaining what is good and avoiding what is evil, would be futile. (?) Since 'all things' have been made the 'subject' (of the argument) there can be no corroborative instance. (3) The verv use of the verbal expression is stultifying; i.e., the verbal expression-"all things must be eternal, because the five elemental substances are eternal,"----is used only for the purpose of explaining things to the other party; now what does the Purvipaksin do by means of this verbal expression ? (a) Does he establish what is not known ? Or (b) does he disestablish (set aside) what is already known? (a) If he establishes what is not known,-what sort of establishing is it that is brought about by the expression ? If it is the knowledge of the (thing) that is brought about, then this goes against your view : you allege that ' all things are eternal,' and yet you admit that the knowledge (which also is included in 'all things') is brought about (or produced). If, on the other hand, the verbal expression does not bring about the knowledge, then what is that 'establishing' which is brought about by the active instrumentality of the sources of that you have

propounded) ? • Every active agent must accomplish something new; on one hand the very idea of the 'accomplishment of something new' is incompatible (with the Opponent's theory of all things being eternal); while on the other (if nothing new is accomplished) the 'active agent' loses its character; for if the thing is eternal, there is nothing to be brought about in it (by any active agent). (b) If the Opponent accepts the view that he intends (by his verbal expression) to disestablish what is already known,---this view also involves the Disestublishment, or setting aside, of what is eternal (which is absurd). If 'disestablishment' be held to mean disappearance from view (not destruction), then also it would have to be admitted that when a certain thing disappears from view, there is either something new produced, or some previously existing thing destroyed; so that in no way can you escape from 'self-contradiction:' i.e., when it so happens that a certain thing, not perceived before, comes to be perceived, -there is always either the production of something new, or the destruction of something that existed before; and since you cannot but admit this, you cannot escape from self-contradiction.

Süfra (32).

[Answer]--WHAT HAS BEEN URGED CAN NOT BE HIGHT; FOB AS A MATTER OF FACT, THE CAUSE AND PRODUC-TION ARE ACTUALLY PRECEIVED. (SQ. 32.)

* 'Sadhasa,' ' Means of accomplishment', is that which accomplishes something; and as such there must be something that is accomplished by it. The reading of the Bibliotheca Indica Edition gives no sense; that of the Benares edition is वा प्रवर्तमान सापने कराति, which may be rendered to mean--'that which (for its accomplishment) rendere the सापन active or operative.'

वां प्रवर्तमार्ग सावगं करोति appears to be the right reading, which has been adopted in the translationsaded from https://www.holybooks.com

Bhāşya on Sū. (32).

[P. 204, L. 1 to L. 16].

As a matter of fact (in the case of every ordinary thing, such as the Bull, the Jar and the like), the cause is actually perceived, as also the production of the thing possessing qualities analogous to the qualities of the cause; and neither of these can be possible in regard to an 'eternal' thing; nor is it possible to deny that there is such perception of the 'cause' and the 'production' (of the thing); nor again is it possible for a perception to be entirely devoid of a real objective basis; so that on the strength of this perception it is inferred that the product is produced (brought into existence) as possessing qualities analogous to those of its cause; and it is that product which forms the real objective basis for the said perception. This (the products having qualities similar to those of its cause) accounts for the fact that "all things possess the characteristics of Elemental Substances" (that has been urged by the Opponent in Sū. 31).*

Further, as a matter of fact, we find that the effort of the cognitive agent is put forth only when he is urged by a desire for the cause of the production (of what he wishes to obtain) and the destruction (of what he wishes to get rid of). [So that Man's effort also presupposes the production and destruction of things].

Thirdly, every composite substance is known to have that character; i. o., it is a well-known fact that every composite substance has the character of being liable to production and destruction.

Fourthly, what has-been urged by the Opponent is not applicable to Sound, Motion, Cognition and such things; as a matter of fact, the two reasons put forward—(a) "because the five Elemental Substances are eternal" (Su. 29) and (b) "because everything is possessed of the characteristics

1

[•] The fact of the Bull and the Jar having the characteristics of Elemental Substances is due to their being the *products* of those substances, and not to their being the same as those substances. Hence the said fact cannot prove the eternality of the Bubbandchadchar mathematics://www.holybooks.com

of Elemental Substances" (Sū. 31)—are not applicable to such things as Sound, Motion, Cognition, Pleasure, Pain, Desire, Aversion, and Effort, [as not one of these is either an elemental substance, or possessed of the characteristics of elemental substances]; hence the reason (is 'anekānta' (inconclusive; because non-pervasive).

[Says the Opponent]—" Like the cognition of things in a dream, the said perception (of the cause and of production) is wrong."

The same may be said of the perception of Elemental Substances also. What you mean is that—"The perception of the production and the cause of things is of the same character as the cognition of things in a dream"; but if that be so, then the same might be said also in regard to the perception of Elemental Substances; and the perception of Earth &c. also would have to be regarded as similar to the cognition of things in a dream [so that there would be no justification for regarding even the Elemental Substances as eternal].

The Opponent says]---"If there are no such things as the Earth &c. then the practical usages of men would come to an end."

The same would apply to the other case also; if there were no real objective basis for the perception of the production and the cause of things, then also all practical usages of men would come to an end.

Further, to argue that " the said perception (of production &c.) is as unreal as the cognition of things during dreams," is not a right argument at all [*i.e.*, it cannot prove any such conclusion as the Opponent desires to prove, *viz.* ordinary things like the Bull and the Jar are exactly like the Atoms of Elemental Substances];—(a) because Eternal Substances (Atoms) are beyond the reach of the senses (which the ordinary things of the world are *not*), and (b) because they are *not* objects of production and destruction (which the ordinary things of the world *are*).

Vārtika on Sū. (82).

[P. 476, L. 18 to P. 478. L. 12.]

It has been urged (in Sū. 31) that "everything is possessed of the characteristics of elemental substances. hence all things must be eternal"; but this is not right: as the fact put forward can be explained otherwise; the presence (in ordinary things) of the characteristics of Elemental Substances is capable of being explained otherwise (than on the basis of their *Dternality*) :- It is due to the perception of production and of cause. As a matter of fact, we perceive the production of things as possessing qualities analogous to those of its cause, and we also perceive the cause itself; both these would be impossible in regard to eternal things; of the eternal thing there is no production; nor is there any cause of the eternal thing. And yet both these actually exist (as vouched for by our perception). Hence the conclusion is that the product is actually produced. as possessing qualities analogous to those of its cause; and when it is produced as possessing qualities analogous to those of the cause, it is only natural that the product (ordinary things like the Bull and the Jar) should possess the characteristics of elemental substances (which substances are its cause). This argument has been already explained by as in detail when we pointed out that 'the production of perceptible things is from perceptible things, as is clearly proved by perception' (Sū. 4. 1. 11).

Further, the probans put forward (by the Opponent) ----"because the elemental substances are eternal" (Sū. 29) is non-pervasive. "How so?" For the simple reason that it does not apply to Motion and such other things; as a matter of fact, Motion, Cognition, Sound &c. do not fall under the premiss ' because the five elemental substances are eternal'." Further, the Opponent's argument becomes nullified by our perceiving the effort put forth by the cognitive agent; the effort of the cognitive agent is found to be put forth when he is urged by a desire for production and destruction; and this would pot be possible if all things were eternal (and there were no production, nor destruction).

Further the composite substance is known to have that property;—we have already proved that the composite substance has the property of being liable to be produced and destroyed; and what is alleged by the Opponent is not right.

Objection—"How is it that though the Reason (of the Opponent) is only 'non-pervasive' (not present in the entire subject, the Bhāşya calls it 'inconclusive', anēkānța'?"

Answer-What is meant by the reason being 'andkānļa' is that the Subject subsists during both ends (during existence as well as during non-existence) of it; the Subject of the Proposition 'all things are eternal' is \mathcal{All} ,--and this 'all' includes things known as 'Elemental Substances' as well as those that are not known as such; and since this 'subject' (\mathcal{All}) co-exists with 'both ends '--Daistence as well as Non-existence-of the Reason ('possessing the characteristics of Elemental Substances'), it is not right to say that 'all things possess the characteristics of Elemental Substances.'--It is in this sense that the reason has been called andkānta' (having the subject not restricted either to its Maistence only or to its Non-existence only).

[•] This passage is obscure. We have adopted the interpretation of the **76 parys** : It construes the sentence **questions according to the regions of the regions of the regions of the region of the reg**

Objection—" Like the cognition of things in a dream, the said perception (of the causes of production of things) is wrong."

If you mean by this that-" The idea that a certain . thing is produced and destroyed is not true; the real production and destruction not being there, the notion that the thing has been produced, and that it is destroyed, is a mere misconception; just as during a dream though the things do not exist, yet there is a misconception of them ",-then our answer is that this is not true, there being nothing to prove that it is as you say; that is, you simply assert that when we conceive of such things as the Bull and the Jar as being 'produced' and 'destroyed,' there is no such thing in reality as 'production' or destruction,'-and you do not bring forward any proof of such non-existence (of production and destruction); and unless proofs have been adduced in support of a certain assertion, it cannot be accepted. And how things have a real existence apart from sensations, we shall explain later on. Further, if the notions of 'Production 'and ' Destruction ' be regarded as mere misconception, then the same might be said of the conception of Elemental Substances also-this conception also being like the conception of things during a dream.

with the *swistence* of the reason, and 'non-elemental substances, 'which co-exist with the non-swistence of the reason; so that it is not right to say that 'all things possess the characteristics of elemental substances.'

The more natural meaning of the words would appear to be that—'the reason subsists in both ends of the subject;' but the difficulty in this interpretation is that if the Reason subsists in all conditions of the Subject then it is quite valid; and if by 'two ends' are meant 'existence and non-existence,' then it would be true to say that the Reason co-exists with the existence and the nonexistence of the subject 'all;' for as a matter of fact, 'possessing the characteristics of elemental substances,' which is the reason, is never co-existent with the non-existence of 'all things'. It is better on the whole therefore to accept the interpretation is interpretation is never in the subject the subject is interpretation in the subject is better on the subject is accept the interpretation is interpretation is interpretation in the subject is in the subject is interpretation is interpr "But if there were no such things as the Earth &c., then all practical usages of men would come to an end." If you mean by this that—" If the Earth and other Elemental Substances do not exist, then there would be an end to all practical usage which is based upon such substances,"—then our answer is that exactly the same may be said of the other case also: If the existence of Elemental Substances is admitted simply through fear of all usages coming to an end, then, for that same reason you should admit also the 'production' and 'destruction' of things; as no practical activity can be carried on unless there are 'productions' and 'destructions' of things.

Further,—(a) because eternal substances are beyond the reach of the senses, and (b) because they are not objects of production and destruction, &c. &c.—says the Bhāsya. Everything eternal is super-sensuous, and not the object of production and destruction; hence it is not right to assert that the said perception (of production and destruction) is as unreal as the cognition in a dream.

Further, when you speak of the 'misconception of Production and Destruction' it behoves you to explain what is the real object of 'Production and Destruction;' and for one who holds all things to be eternal, there can be no objects of 'Production and Destruction;' and if you deny the existence of the object, you have to deny the existence also of a misconception relating to that object.

Bhāşya on Sū. (83).

[P. 204, L. 16 to P. 205, L. 11.]

"What really happens', says another philosopher, " is that the Original Substance remaining constant, one property of it ceases and another property is produced;—and this is what forms the object (meaning) of the 'destruction' and 'production' of the thing; in fact when a thing is said to be 'produced,' it is something that has been already in existence (in Dtheleforemroofhttphereworiginaks substance) even before that 'production;' and similarly when a thing is said to be 'destroyed' it continues to exist (in the form of the Substance) even after that destruction [for all that has happened is that one *property* has disappeared and another has appeared]; and in this manner all things are eternal." *

[This doctrine is refuted in the following Sufra.]

Sutra (33).

There would be no possibility of any such differentiation as 'this is birth, and that is cessation; 'as under the theory put forward what is born and what has ceased to exist are both estant. (\mathbf{A}) [In regard to properties also] there could be no differentiation (as to Time), such as ' this property is born and that property has ceased', as both are equally extant ;- (B) nor would there be any differentiation as to time,-such as 'at this time there are birth and cessation, and not at that time,' for at all times things would be equally extant; (C) nor could there be any differentiation as to relationship, such as 'there are birth and cessation of this property, and not of that,' for both properties would be equally extant; (D) nor again, could there be any such differentiation in regard to Time, as ' this, not yet come, is in the future, and that is past; ' for under the theory all things are always extant, which means that they are always 'present' [and as such can never be spoken of as 'future' or 'past'].

None of these objections lie against the view (held by the Naiyāyika) that 'birth' (production) consists in the coming into existence (gaining its own nature) of what has not been in existence, and constant (destruction) consists in the ceasing to exist (losing its own nature) of what has

• The *Filparya* 'calls this doutrine *Sodyambhusdnämnajam*;' does it mean the '*Shaiva*' system? The dostrine is thus su amed up in the *Tdiparya*...'The modification undergone by Substances is of three kinds: (1) modification of properties, (2) modification of condition, and (3) modification of age. Eg. (1) (the original subtance *Gold* in lump becomes modified into the car-ring, and here we have the modification of the property (shape) of the gold; (2) when the car-ring is broken up and made into the bracelet, we have the modification of conditions, *i.e.*, the car-ring has remounced its *present* and reverted to the *present* condition, and the bracelet has removed its *future* and reverted to the *present* condition; and (3) in the beginning the bracelet is usew, young, and in time it becomes old; so that here we have the modification *QPTigod* (The orbital get *Y* is the beat and the time]." been in existence For these reasons we conclude that it is not right to assert, as has been asserted by the Opponent (Text L. 1, P. 205), that—"a thing exists before it is born, and it exists also after it has been destroyed."

Värfika 80. (88).

[P. 478, L. 12 to P. 479, L. 5.]

• Other philosophers have offered another explanation of the doctrine that "all things are eternal". What this means, according to them, is that — "the original substance remaining constant, only its property ceases, and another property comes into existence; that which has ceased continues to exist even after cessation, and that which comes into existence has also been in existence before that coming into existence."

When you assert that --- " that which has ceased continues to exist after cessation"-you should be asked the following question:-What is the meaning of the expression that the thing has coased ?* If you say that what it means is that 'it was perceived before and is not perceived now ',-then we ask, to what is due the non-perception of what exists ? If it were due to obstruction, then such obstruction should be perceived. In fact we have already explained (P. 470, L. 15 et seq.) that when a thing, not perceived before, comes to be perceived, it has to be admitted that a new peculiarity has been produced in it and a previous peculiarity has dropped off. If however you admit of this explanation, you contradict yourself [as for you there can be no predaction of anything new. or dropping off of auything]. Then again, as regards your assertion that-" that which comes into existence has existed before that coming into existence also,"-this cannot be

^{*} Regensente ferinde de therishtes Ains for bout be Saptaote.

right, as it involves a self-contradiction. To say that a thing comes into existence and then to say that 'it exists' is a contradiction in terms [that which already exists cannot come into existence]. If 'coming into existence' be explained as 'manifestation,' 'coming into view,' —even so, the objections urged before remain in force, and it further involves the admission (on your part) that the 'manifestation,' which was not in existence before, has come into existence [and this is incompatible with your doctrine].

End of Section (8).

Section (?).

[Sūtrās 34-36.]

The Refutation of the View that all is Dicersity, there

is no Unity.

Bhāsya on SQ. (34).

[P. 205, L. 11 to P. 206, L. 4.]

The following is another sweeping assertion (of the (Bauddhas) :--

Sūtra (84).

[Pūrvapaksa.]

"ALL MUST BE REGARDED AS DIVERSE; BECAUSE THE SYMBOLS (NAMES) OF THINGS REFER TO DIVERSE ENTITIES."" (SU. 84).

• It has been established up to this point that all things are aggregates of—' the Quality and the Qualified,' ' the negative and positive,' ' the intelligent and non-intelligent,' ' the eternal and non-eternal ;'—and it becomes necessary to refute the theory that there is no such thing as the 'aggregate whole.' This theory has been held in several forms—(1) the theory that there is no unity (refuted in S0. 34—36), (2) 'all is mere Void' (S0. 37—40), (3) 'there is only one thing,' or 'there are only two things,' and so forth, (S0. 41—48). All these have to be refuted, because— (1) if there is no unity, uo one thing, then of what could there be an aggregate ? (2) if nothing exists, and all is Void, there can be no aggregate ; and (3) similarly there can be no 'aggregate' under the theory of absolute Monicu., — Parishudghi.

The doctrine put forward under this Sûtra is thus explained in the *Tatparya* :---"All things must be diverse, distinct ; because there is no such thing as 'substance,' apart from colour &c., and colour &c., are distinct from one another ; nor is there any such thing as 'composite' apart from the components, and these latter are distinct from one another." Such is the view of the *SautrEntibas* and the *Vaibhésikas*. Downloaded from https://www.holybooks.com "All must be regarded as diverse; there is no single entity.—Why P.—Bhāvalakṣaṇa prifhak [vā]—says the Sūtra; the 'la'ṣaṇa' or 'symbol' of the 'b'āva',' entity,' is that which distinguishes it; i. e. its name; and the names refer to diverse entities; as a matter of fact, all 'names of things' denote combinations; eg, the name 'Jar' is applied to the combination of 'odour, taste, colour and touch,' (the qualities of the Jar), and also to the combination of the 'bottom, sides and neck' (the parts of the Jar) [and these are diverse, distinct from one another; and the Jar is nothing apart from these qualities and component parts]. The 'Jar' has been mentioned only by way of illustration [the same holds good in regard to the names of all things.]"

Värtika on Sū. (34).

[P. 479, L. 5 to L. 12.]

The following is another sweeping assertion;—' All must be regarded as diverse etc. etc.';—the 'name' of a thing is the word; as it is by its name that the thing is distinguished; and all the 'names of things' refer to diverse entities; e.g., the name 'Jar'; i.e. the name of a thing is applied to a diverse combination of components, as we find in the case of the word 'Jar'; similarly with other words. The argument may be formulated thus:—The word 'Jar' must réfer to diverse things,—(a) because it is a single word,—like the word ' army;' or (b) because when we hear a word pronounced we have the cognition of several things, i.e., because the hearing of a word gives rise to the cognition of several things,—as we find in the case of the word 'army'."

Sutra (85). | Siddhanta.]

WHAT IS ALLEGED CANNOT BE ACCEPTED ; BECAUSE (AN A MATTER OF FACT) SEVELAL (KINDS OF) THINGS GO TO MAKE A SINGLE ENTITY.--(Su. 35.)

Vishvafiaths states the dootrine thus-"Such things as the Jar and the like must be regarded as distinct, even from themselves; because the odour, taste, &c, of these things, as also their component parts, are distinct from one another; and the 'Jar' is nothing aparts from hitser/www.holybooks.com

Bhāşya on Sū. (85). [P. 206, L. 4 to L. 8.]

The compound 'anëklākṣaṇaiḥ' should be treated as one that has the middle word eliminated, and as standing for 'anēkuvidhalakṣaṇaiḥ,' 'several kinds of things.' As a matter of fact, it is the single entity (the composite substance, Jar) that comes into existence as related to Odour and other qualities, and to the Bottom and other components; in fact, the Substance is something different from its Qualities, and the Composite is something different from the Components; both these facts have been already explained by us (under Sū. 2-2-33 et seq.).

Varțika on Sū. (35).

[P. 479, L. 14 to P. 480, L. 8.].

Whot is alleged cannot be accepted etc. etc. The compound 'anekalakşanaih' should be treated as one which has the middle word eliminated, and as standing for 'anekavidhalakşanaih.' It is a single entity that is produced as related to Odour and other qualities, and to the Bottom and other components; and thus it being found that the names of things denote a single entity, the rest of the argument (in refutation of the *Pūrvapskşa*), though not actually stated in the Sütra, is understood to be implied. That the Substance possessed of Qualities is something different from the qualities, and that the composite is something different from the components, has already been explained by us.

As regards the argument put forward (in the *Vārţika* on Sū. 34)—that "the word 'jar' must refer to diverse things, because it is a single word,"—this cannot be right; as there is no corroborative instance : (a) As a matter of fact, there is no word that refers to diverse things; specially because such words as 'army' and the like are not admitted (by all parties) to be applicable to diverse things. We have already shown above thems words of the start of t

single entities; -- (b) secondly, since ' all ' (words) Vår. P. 480. have been made the 'subject' of the argument, there can: be no corroborative instance;-(c) thirdly, the fact that has been put forward as the 'reason' ('being a word') must be explained otherwise (than on the basis of the assumption that "the word must denote diverse entities;") for as a matter of fact. Colour and other qualities are actually perceived as subsisting in a single entity, and this single entity is perceived to be the composite object ;--(d) fourthly, inasmuch as the negative particle is known to denote either denial of the possible or elimination, the reason put forward is ' contradictory ' also; i. e. the term 'aneka' ('not-one', 'diverse') contains the negative particle; and the use of the negative particle is possible only as negativing things, in the sense of either ' denying what is possible' or ' contradistinction '; now in the case in question, if the negative denotes the denying of what is possible, then the assortion that 'things are $an\partial ka$ ' means that they are not-one; and since this is, ex-hypothesi, the denial of what is possible, it follows that being 'denied' in one place, it exists elsewhere; so that the use of the term 'aneka' implying the existence (somewhere) of the 'Eka, One,' your statement becomes self-contradictory. If, on the other hand, you hold the view that the negative particle (in 'aneka') denotes 'contradistinction', then the term ' $an\overline{e}ka$ ' means ' that which is other than one,' and this also involves the admission of the one; for unless the one exists, there can be no such thing as 'other than one.'

> Bhasya on Sū. (36). [P. 206, L. 8 to L. 20.]

Further.-

THE DENIAL CANNOT BE RIGHT, AS THE SYMBOLS (OF THINGS) ARE RESTRICTED IN THEIR APPLICATION. (Su. 36).

The denial-that "there is no single entity"-cannot be right ;-why ?-for the very simple wreason that "the symbols of things are restricted in their application'; as a matter of fact, the 'symbol' of entities, -i. e. the word that forms their name, is restricted in its application to single entities; as is clear from such expressions as 'I am touching that *Jar* which I saw before,' 'I am seeing that which I touched before.' Then again, as a matter of fact, we never perceive any mere 'group of atoms' as such, and these 'groups of atoms' (as composing the Jar) being imperceptible (by reason of their extreme minuteness), that which is actually perceived must be a single entity (composed of those atoms).

(A) It has been subsequently urged by the Opponent that-"there can be no single entity, because all things are mere groups (of several things)";-but if there is no single thing, there can be no group of things. What the Opponent means is that-" there is no single entity, as the names of things apply only to groups ":---but the fact is that if there is no *single* thing, there can be no 'group'; as the 'group' is nothing more than the conglomeration of several *single* things; so that the allegation-" There is no single entity &c."involving a self-contradiction, is most incongruous. That is, that (single entity) of which the denial has been alleged, (by the Opponent, on the basis of the premiss), " because the names of things are applied to groups,"-becomes admitted by the Opponent when he asserts that "the names of things are applied to groups"; for the 'group' is only a collection of several single entities. (B) Further, in making the allegation-"because the names of things are applied to groups of things"-you admit the 'group,' and then in the proposition, "there is no single entity" you deay each component of that 'group' [for each such component can only be a single entity] [and when each component is denied, the group also becomes denied ipso facto]. Thus then, the Opponent's allegation being beset with a twofold 'self-contradiction ' (A & B), it must be rejected as a frivolous assertion.

Vartika on Su. (36).

[P. 480, L. 10 to P. 481, L. 19.]

For the following reason also (the *Piirvapaksa* cannot be accepted :-- As the symbols of things etc. etc.--- says the Süfra. The theory that "there is no single entity" cannot be right; -- why?--because it count be right; application. As a matter of fact, when the name 'jar' is uttered, it does not give rise to the idea of scorral things. "How do you know that it does not give rise to this idea ?" (A) For the simple reason that the word takes the Singular termination; the word 'Jar' is in the Singular number; and a word in the Singular number could not apply to several things. ---(B) Further, as a matter of fact, the direction (addressed by the older person to the younger) and its comprehension (by the younger person) both pertain to a single entily; e.g., the direction 'bring the jar' refers to a single jar; and the person to whom this direction is addressed, on comprehending the meaning of the words, brings up a single jar; and the fact of the direction and its comprehension pertaining to the single object clearly indicates that the name 'jar' denotes a single entity.

Then again, you regard the qualities of Colour and the components (as denoted by the name of a thing); but as a matter of fact, these do not form the actual denotation of words, they come in merely by implication, this implication being due to the fact that they are inseparable from the thing (actually denoted by the word).

Further, if every thing were a mere 'group' of components, atoms), * there could be no end to its dismemberment; hence that point where the dismemberment ceases must be the single entity. That is to say, when the Opponent regards the Bull, the Jar and such things as mere 'groups of components,' he admits the 'group '; and under the Opponent's Var. P. No. 481. theory [by which all things are mere groups of endless component atoms] it would not be possible to conceive of any thing (e.g., the Jar) as having become 'smaller' and 'smaller' (by) dismemberment; as each dismembered piece would be capable of never-ending dismemberments);—such a conception could be possible only if the object could be conceived of as so many component substances constituting the Jar [and such notion would be impossible if there were no such single entities as the 'Jar' and the like]; so that for the purposes of the suid conception it has to be a lmitted that in the case of every object, there is a point which represents the smallest dimension to which it can be reduced (by dismemberment', and this smallest —sized thing would be indivisible; so that at that point all further dismemberment should cease; and that where no further dismemberment (into component particles) is possible must be a single entity.

Further, one who denies the one must deny the many also; as the many is only a collection of several ones. "You will perhaps take up the following position :---" (a) That which you regard as the *indivisible atom* is only a conglomeration of Colour and other qualities; " or (b) that " the four substances, Earth and the rest, combined together form the Atom."

(a) Now, under this theory, — which means that when Colour and other properties come together they constitute the Atom, — it has to be explained to what belongs the Colour that is found in the Atom; and similarly with the other qualities. (b) If, again, you allege that the four substances (Earth Water, Fire and Air) coming together constitute the Atom, — and it means that the quartette is a collection (of four substances) — then, it behoves you to explain of what things each one of the four substances singly—Earth, Water, Fire and Air—is the collection. If you postulate an endless series of collections, then you go against your scriptures, according to which the Atom is a collection of eight substances; as has been declared (in the Baugdha Sū(ra)—"Kāmēştagravyakogurashabdah," "Verily the Atom consists of eight substances, and is without Sound." (?)

^{*} The Author Bow tackled the theirs drenother partys of Buddhists.

Thus (we conclude that) if there is no *single entity*, there cannot be *many* entities; so that the theory of the Opponent has got to be entirely rejected.

The Pūrvapakṣa has put forward the reason—" because the names of things apply to groups;" but this is nothing, involving as it does a twofold self-contradiction. "Why twofold ?" (1) In the first place in the argument—" There is no single entity (Proposition), because the names of things are applied to groups (Probans),"—there is contradiction between the Proposition and the statement of the Probans; as unless there is a single entity, there can be no group;—(2) secondly, when you deny the single entity on the basis of the group, you deny the group itself. Thus the Opponent's allegation being beset with a twofold contradiction, it must be rejected as a frivolous assertion. The rest is clear in the Bhāşya.

End of Section (9).

Section (10).

[Sūfras 37-40.]

The Refutation of the Theory that All is Mere Void.

"ALL THINGS MUST BE NON-ENTITIES, BECAUSE ALL THINGS ARE KNOWN TO DE MERE NEGATIONS OF ONE ANOTHER." (SQ. 37).

with the notion of 'nou-existence' as also with negation; from which it follows that all things are non-existent or nonentities."*

[The Biaagy offers its own answer to the Nihilistic doctrine put forward in the Sigra]—The assertion put forward cannot be right; because there is contradiction between (A) the two terms of the Proposition and (H between the Proposition and the Statement of the Probans:

[(A) The term 'all' signifies several things without exception, while the term 'non-entity' signifies the negations of existence; of these two the former is something possessed of a definite character, while the latter is totally devoid of any character; now how can that which is spoken of as possessed of definite character, i.e., 'all,' be a mere 'non-entity,' which is devoid of any character? Certainly the 'non-entity,' which is totally devoid of any character, cannot be predicated either as 'several' or as 'without exception' [which are the two factors in the denotation of the term 'all.']

"But it is just all this that is non-entity; what you (Logician) call the 'all' is what is really only non-entity."

Even so the 'contradiction' does not cease; for the conception of 'several things' and 'without exception 'cannot

• This Nihilism is thus expounded in the Tatparya :-- " All things -- Pramapa and the rest-are actually found to the cognised as 'non-existent' and also spoken of in negative terms; hence it follows that the names of those things are concomitant with these (the notion of non-existence and negation); hence Pramana and the rest must be regarded as non-existent, as noneutities, just like the Cloth that has either not come into existence or has been destroyed. Further are these things-Pramana &c.-eternal or evanescent? If they are eternal, they must be non-entities, being without any capacity or power ; as we have already explained how no sequence being possible among things that are eternal, no eternal thing can ever bring about a product. If, on the other hand, the things are evanescent, then, since they would be liable to destruction, they would be as non-existent at the first as at the second moment. Further, if things are existent, they should not be liable to destruction, and as such they could not be destroyed at any point of time ; for the blue Colour, being brought about by its causes, can never be turned into yellow by even thousands of painters. In fact evanescent things can not but be regarded as liable to destruction. From all this we conclude that all things are more Void, Blank ; and it is only through assumed emistence that they appear as evicting. The reasoning may be formulated thus :-- " All names of things apply to non-existent things,-because they are concomitant with notions of non-existence and negation,-like the uniproducted und the /deutroyed/Otechstcom

possibly arise in regard to what is more non-entity; and yet it is just this conception that is expressed by the term 'all;' hence it follows that this 'all' cannot be a nonentity.

(B) There is contradiction also between the Proposition and the Statement of the Probans : the Proposition is in the form 'all things are non-entities,' and it denies the existence (of all things); and the statement of the Probans is 'because all things are known to be mere negations of one another,' which admits that there is 'mutual negation 'among 'things; and then on the basis thereof—the fact of there being mutual negation having been established,—it is asserted that 'all things are non-entities';—now if 'all things are nonentities,' then it is not possible for 'things' to be the 'negation of one another;' and if 'things' are 'negations of one another,' then 'all things' cannot be 'non-entities.'

Vārļika on Sū. (37).

[P. 482, L. 1 to P. 843, L. 2.]

Another sweeping assertion is—" All things must be non-entities, &c. &c. All things are non-entities;—why? because all things are known to be mere negations of one another. That is, inasmuch as the names of things are concomitant with the notion of 'non-existence,' and with 'negation,' all things must be 'non-entities,'—just like the unproduced and destroyed Cloth. As a matter of fact, all names of things are concomitant with 'non-existence,' and also with 'negation,'—just like the destroyed Cloth; as in the expression 'the Cloth does not exist.'—' But in what way is the Cloth non-existent; and when is it non-existent? '— It does not exist, in the form of the dish and such other things; and it does not exist when it has been destroyed. Similarly the word 'Jar,' being concomitant with the notion of 'nenexistence,' clearly indicates the absolute non-existence of

• The sight reading is mail nearly (as in the Puri Ms). Construe thus:

the Jar; in the same manner, all names of things being found to be concomitant with 'non-existence,' it follows that all things are *non-existent*."

In the above there is contradiction, (a) between the two terms of the Proposition, and also (b) between the Proposition and the Statement of the Probans. By two things being ' samānādhikaraņa,' or 'concomitant,' it is meant that the words expressing them end with affixer having the same meaning; i.e., affixes with the same signification are used with them; and when you make use of this expression ('sāmānādhikarnya' in your Statement of Probans), you admit the existence of things and also the existence of words that form the names of those things; so that your Statement of the Probans (wherein the expression 'samānādhikarana' is used) becomes contradictory * (to your Proposition). Further, your Proposition is in the form-" that which you regard as all must be a non-entity;" but as a matter of fact, the notion of 'that' can never arise in regard to a mere non-entity; nor can the notion of 'entity' arise in regard to it. Further the term ' non-entity ' denotes the negation of entity; and the use of the negative particle is not possible unless what is denoted by the term .compounded with it actually exists, as the negative particle can only mean either 'denial of what is possible ' or 'contradistinction,' as we have explained before, as is found to be in the case of such compound words as 'not-one,' 'non-eternal' and the like. In the same manner we can also find contradistinction between the term 'all' and the term 'non-entity.' The rest is clear in the Bhāsya.

Further, if all things are more non-entities, it behaves you to explain the exact nature (and signification) of the affixes; if everything is a non-entity, you should explain

1514

[•] For fat: read freger aneth fthen Bitharsin Midition ybooks.com

what is the character of the affix; if the affix also is a nonentity, then the assertion, that "sāmānadhikaraņya consists in the affixes having the same meaning," involves a contradiction in terms. You talk of "concomitance with the notion of non-existence and with negation," and yet you

Var: P. 483. deny the same when you make the sweeping assertion that "all things are non-entities;" and certainly that which is a *non-entity* can never be the substratum of anything; the 'substratum' is that wherein something subsists, and certainly nothing subsists in a *non-entity*.

Bhāşya on Sū. (38).

[P. 207, L. 13 to P. 208, L. 17.]

The following is the answer (to Nihilism) offered by the $S\bar{u}$ (ra—

Sū(rā (38).

WHAT HAS BEEN ALLEGED IS NOT BIGHT, BECAUSE THINGS ABE, BY VIETUE OF THEIE VERY NATURE, ACTUAL ENTITIES.

(A) All things cannot be non-entities ;--Why ?--Because by virtue of their very nature things are actual entities, (really existing). The proposition laid down is that by their very nature things exist. "What is the nature of things ?" 'Existence,' 'being an entity,' and so forth constitute the nature or character common to Substances, Qualities and Actions ;--'having action' and so forth are the 'character' peculiar to Substances; --the qualities ending with Touch belong to Earth ;--so on and so forth there are endless characters peculiar to the several things of the world ;--in Community, Individuality and Inherence also we find specific characters. All this distinction among things, which is recognised in actual experience, would not be possible [if all things were mere non-entities], as a non-entity is without any character;-and yet such distinction among things does exist ;--from which it follows that all things are not mere non-entities.

(B) [Another interpretation of the Sūţra]—Ors the words of the Sūţra may be taken to mean that—what has been asserted cannot borighter decomposed as having a distinct individuality of its own; that is to say, when the word 'Bull' is used, what is apprehended is a particular substance qualified by (belonging to) a particular community, and not a mere non-entity. If all things were non-entities, the Bull would have been recognised as a 'non-entity,' and the word 'Bull' would have denoted a non-entity. "But how do you know that the word 'Bull' does not signify a non-entity?" We know it from the fact that whenever the word 'Bull' is used, it brings about the notion of a particular substance, and not that of a non-entity. For these reasons what has been asserted by the Opponent cannot be right.

(C) Or, the words of the $S\bar{a}$ in a stabhavasiddhah, etc.' may be explained to mean as follows: ---When you assert (Bhā. P. 207, L.) that "the Bull is non-existent in the form of the Horse," why do not you say that "the Bull is non-existent in the form of the bull"? † That you do not say so indicates that in the form of the Bull the Bull is existent; this is what is meant by the expression 'Svabhāvasiddhi,' existence in its own form.' [If you really mean that things are nonexistent], why caunot you say that the Horse is not-Horse, or that the Bull is not-Bull? Since you do not say so, it follows that in its own form, the substance exists.

[‡] As a matter of fact, whenever there is denial of nondifference—' difference' consisting, in this case, of the absence of conjunction and such other relations, and 'non-difference' consisting of identity,—even really existing things come to be spoken of as co-substrate (concomitant) with the notion of 'non-existence,' as we find in the case of the expression 'the jujube fruit is not in the cup';§—so that in the case in question, in the expressions ' the Bull is non-existent in the form of the Horse,' 'the Bull is not-Horse', what is denied is the non-difference between the Bull and the Horse,—the meaning

"The right reading is menin बाबाजेन जानाव बच्चते, as found in l'ari Ms. B.

†सत्य गौगीवात्मनेति कत्माजीच्यते is the better reading, as found in Puri Ms. B.

‡ This, according to the Variika, explains how we have the negation expressed in the statement, 'the Bull is not-horse.'

1516

being that, 'there is no identity between the Bull and the Horse'; and this identity being denied, there comes about the co-substrateness or concomitance of the notion of 'non-existence' with the thing, 'Bull'; hence the expression 'the Bull is non-existent, in the form of the Horse'; just as in the sentence 'the jujube fruit is not in the cup', the conjunction of the fruit with the cup being denied, we have the co-substrateness of the notion of 'non-existence' with the fruit, which is a real entity. [All this shows that 'concomitance with the notion of non-existence,' upon which the Opponent bases his arguments, in Bhāşya, p. 207, L. 1-2, is not incompatible with real entities].

Vārļika on (38).

[P. 483, L. 2 to P. 434, L. 6.]

The answer given in the Snira is as follows :-- What has been alleged, etc., etc., (Su. 38). What we mean is that all things exist in their own respective characters; and this serves to point out the absurdity in the position put forward in the preceding Sutra. "How so ?" When in Sutra 37 you say that "things are known to be mere negations of one another," you assert the things to be mere negations, non-entities; and saying this you regard things to be, by their very nature, nonentities. Further, the statement "things are mere negations of one another" is open to the objection that it contains a needless. superfluous, qualifying term; in order to express the idea that all things are non-entities, all that need have been said is that 'things do not exist', and it is not right to say that 'one thing is not another' [and this is exactly what your words mean]. Then again 'another ' ('ifara') is a positive term, and when all things are non-existent, there is nothing that could be affirmed and spoken of by means of the word 'another'; what you have done is to admit the fact of a certain thing being spoken of by means of the word 'another,' and then to negative one thing in regard to that another; and in doing this you have admitted the fact of certain things having the character of entities.

"What is the own character of things?"-asks the Opponent.

[Our answer is as follows] - 'Existence' 'being an Entity' and so forth constitute the character common to Substances, Qualities and Actions; having action and so forth are the character peculiar (to substances); the qualities ending with Touch belong to Earth; and so on and so forth there are endless characters peculiar to the several things of the World—(Bhāşya). Among Community, Individuality and Inherence there are endless sub-divisions, some general and others special. All this distinction among things, which is recognised in actual experience, would not be possible, if all things were more non-entities; as a nonentity is without any character ;—and yet such distinctions among things does exist; from which it follows that all things are not mere non-entities.—(Bhāṣya).

(b) Or, the phrase scabhāvasiddhāh (of the Sūtra) may be explained as follows :---When the word 'Bull', is used it does not bring about the idea of a non-entity; what it expresses is a certain substance belonging to a particular community. If all things were mere non-entities, then the word 'bull', on being used, would express a non-entity. From this it follows that all things are not mere non-entities.

(c) Or, the phrase 'svabhāvasiddhāh' may be taken to Wār: P. 484. Vār: P. 484. Non-existent in the form of the horse', 'the Bull is not' Horse'; but why do not you say that 'the Bull is not-Bull'*? Since you do not say so, it follows that the Bull does exist (in the form of the Bull).† "The assertion that 'the Bull is not-Bull' would be self-contra-

^{*} The reading of the Bibliotheca Indica Edition is simpler.

⁺ Arcentin, the Digbanese ingings in the Apple oks.com

dictory." If it is only through fear of self-contradiction that you do not assert that 'the Bull is not-Bull', then, my friend, the existence of things becomes established.

"How then do we have the negation 'the Bull is not-Horse'?"

As a matter of fact, whenever there is denial of non-difference, even really existing things come to be spoken of as co-substrate with the ...otion of non-existence; as we find in the case of the expression 'the jujube fruit is not in the cup', (BhEsya) where what is negatived is the connection between the fruit and the cup, and yet neither the fruit nor the cup is a nonentity.

Sūįra (39).

[Objection.]—" THERE IS NO SUCH THING AS THE CHABACTER (OR INDIVIDUALITY) OF THINGS; FOR WHAT IS SO BEGARDED HAS ONLY A BELATIVE EXISTENCE." (Sū. 39).

Bhāşya on Sü. (39).

[P. 209, L. 2 to L. 4.]

"" Relative ' is that which is due to the relativity of things: e. g., a thing is spoken of as 'long' in relation to what is 'short,' and short' in relation to what is 'long;' and neither of the two has an absolute existence of its own—Why so?—Because such is the force of relativity. Hence we conclude that there is no such thing as the character or individuality of things."

> Vārļika on Sū. (39). [P. 484, L. L. 8-9]

"What is asserted cannot be accepted; as the *character* of things is purely relative; and nothing has an absolute

• Satish Chandra Vidyābhūşana reads in this Sūţra a reference to the Mūdhyamika-Sāţra.

†All things are relative : the blue is blue in relation to, in comparison with, the yellow, the father is Boim relation for the application for th

existence of its own; as we find in the case of such things as the Long and the Short, the Prior and the Posterior."

Sū[ra (40).

[Answer]—WHAT IS PUT FORWARD CANNOT BE RIGHT, AS IT INVOLVES A SELV-CONTRADICTION (Sū. 40).

Bhāşya or Sū (40).

[P. 209, L. 6 to L. 15].

If a thing is 'long' only relatively to the 'short,' then the 'short' should be *non-relative*; for to what would the 'short' be relative? (Similarly) if a thing is 'short' only relatively to the 'long,' then the 'long' should be *non-relative*; for to what would the 'long' be relative? And if the two depended upon each other, then the negation of one would imply the negation of the other, so that there would be negation of both. Hence it is not right to assert that the character of the 'short' is to be determined only relatively to the 'long.'*

Further, if there is no such thing as the 'character' (or individuality) of things, [and all is merely relative], why do we not have the relative notions of 'length' and 'shortness' in regard to two equal Atoms, or to any two objects of equal size? For, taken relatively or non-relatively, the two things remain the same; the two things taken relatively remain precisely the same two things, even when not taken relatively; the presence or absence of relativity does not alter the things themselves [so that under the $P\bar{u}rvapaksa$ theory, there can be no reason why the notions of 'length' and 'shortness' should not arise in regard to the two Atoms]; but if the character of things were purely relative, then the presence of *relativity* (of one thing or the other) would surely make a difference in the nature of things "What then is the effect of *relativity* on things)?" What *relativity* does is that when we perceive two things, it becomes possible for

° The whole of this passage is read better in Puri Ms. B. यदि इस्वापेषाकृत दीर्वं इस्वनेनापेषिकम् किनिदानीनपेष्य.....दीर्वननापेषिकम् । किनिदानीनपेषय दीर्वनिति युक्तते । प्रत्मितदेतराष्ठग्रतेत्रेक्यग्रेक्षक्रात्रात्रात्रक्रम्प्राज्या इम्रिप्रिक्रिक्वाक्षेत्रक्रमावस्थाऽनुपपना । us to perceive the preponderance of one over the other;⁵ that is, when one sees two things and notices a preponderance in one of them, he regards it as 'long,' and that which he finds deficient, he regards as 'short;' this is what is done by relativity.

Vārļika on Sū (40).

[P. 484, L. 11 to P. 485, L. 16].

'What is put forward cannot be right &c. &c. If the 'long' is only relative to the 'short,' then the 'short ' should be nonrelative; if the 'short 'is only relative to the 'long,' then the 'long' should be non-relative. If both are relative to each other, then that in relation to which the other is produced should become non-relative; so that the negation of one should mean the negation of both. Taken relatively or non-relatively, the two things remain the same ; the two things taken relatively remain precisely the same two things, even when not taken relatively, (Bhāşya); and it does not make any difference in one or the other. "How then does there arise any apprehension of preponderance (superiority)? If the two things, taken relatively and non-relatively, remain the same, then there should be no such conceptions as 'long' and 'short." Certainly such conceptions should not be impossible; when two things are perceived, a certain preponderance in one or the other is always perceived ; as a matter of fact, in regard to the two things we have two definite notions, one in regard to each; in one we perceive a certain preponderance (and hence regard it as 'long'), while in another we perceive 'shortness' (due to a certain deficiency); then we come to ponder over the two conceptions, and this pondering gives rise to the notion ' this is longer than that, that Vár. P. 485. is shorter than this;' this notion does not arise from the coming into existence of any new thing.

[•]E. g. When we perceive the bamboo relatively to the sugar-cane, this relativity leads us to the judgment that the former is 'longer' than the latter, or that the latter is ' shorter' than the aford for m https://www.holybooks.com

Further, if there were no such thing as the 'character of things, their 'relativity' also would be impossible. In fact, if the distinctions into 'long' and 'short' and the like were due solely to the differences of *relativity*, without any regard to the 'character' of things,—then, the said notions (of 'long' &c.) would be possible in regard to even things taken relatively to everything. As a matter of fact however, *relativity* has nothing to do with the notions of 'Colour,' 'Taste,' 'Odour' and 'Touch;' and when God perceives two minute atoms, He does not conceive of one atom as 'long' or 'short' &c., in relation to another. From all this it follows that the conceptions are not all brought about by *relativity*.

[Having explained the Bhāeya, the Vārfika proceeds to offer its own criticism of the Purvapaksa |-The assertion that "all things are pon-entities" is absolutely wrong. "Why is it wrong ?" Well, in the first place, it involves the absurdity of explaining and not explaining the nature of the Means of Cognition : the man who asserts that all things are non-entities should be asked to explain the nature of the Means of Cognition; if he explains it, he contradicts himself; while if he does not explain it, then he cannot prove anything, as for him there is no 'means of Cognition or 'proof.' Secondly, "all things are non-entities" is a sentence ; and if the person making this assertion comprehends its meaning, then, as before, there is self-contradiction ; while if he does not comprehend it, then the mere uttering of letters is absolutely futile. Thirdly, of the sentence 'all things are non-entities ' if the Püryapakşa perceives the speaker and the person spoken to, he contradicts himself. Fourthly, 'all things are non-entities' and 'all things are entities,'-these are two distinct sentences; and if the Opponent perceives the difference in their meaning, he contradicts himself; while if he does not perceive it, the use of different words in futile from https://www.holybooks.com

Thus we find that the more we examine this theory of all things being non-entities, the more unamenable to reason it is found to be.

End of Section (10).

Section (11).

[Sutras 41-43.]

Examination of certain sweeping assertions in regard to the exact number of things.

Bhāşya on Sū. (41).

[P. 209, L. 15 to P. 211, L. 8.]

The following are the sweeping assertions in regard to the exact number of things :--(I) "All things are one, all being equally existent"; (II) "All things are two, being divided into eternal and non-eternal"; (III) "All things are three, cogniser, cognition and cognised"; (IV) "All things are four, cogniser, means of cognition, cognised and cognition; and so on there are other assertions on the point. It is the examination of these views that proceeds now...

•These views are criticised, because they limit all things within one particular. number :--According to (I) there is only one thing, according to (II) there are two things, and so forth.

The Pariskuddi remarks—The question arises—why should the 1I, III and other views be criticised—when they are not incompatible with the Nyāya view of things being the conglomeration or composite of several component particles? But the fact of the matter is that those theories limit things within one definite number only : a.g., 'There are only two things', and *two* only,—then, inasmuch as those two would be everlasting, there would be no explanation of the fact that they ibring about their effects only occasionally; under this theory the Appearance of effects should be unceasing. Similarly with the other views.

The Taiparya offers the following explanations of the two views mentioned in the Bharya :--

(1) The entire phenomenon of the world is nothing apart from the Light of Consciousness; everything is an emanation from this Light. There is no difference among cognitions, nor between the cognised object and its cognition; as everything is a manifestation of Consciousness, which is cognition. (II) 'Eternal' and 'non-eternal', being contradictory terms, must include all things; there can be nothing that is new filter of the state of the state

Suira (41).

ANY ABSOLUTE LIMITATION OF THE NUMBER (OF THINGS) CANNOT BE ESTABLISHED, BITHER IN THE EVENT OF THE MEANS (OF PROVING IT) BEING AVAILABLE, OR IN THAT OF ITS BEING NOT AVAILABLE. (SQ. 41.)

If the means of proving the desired conclusion is (available, and) something different from the conclusion to be proved, then no limitation of number can be proved; as the said Means will always, exhapothesi, be someting outside that limited number (which, being included in the 'conclusion to be proved') could not include the means of proving (that same conclusion). If, on the other hand, there is no difference between the Means and the Conclusion to be proved by it, then also the li itation of number cannot be proved, as there is, ex-hypothesi, no real means of proving, and in the absence of such means nothing can be proved.

Vārțika on Sū. (41).

[P. 485, L. 17 to P. 486, L. 6.]

The following are the views propounding an absolute limitation of the number of things: "All things are one, all being equally estiment &o. &o. " says the Bhasya. The following Sufra is meant to refute all these views: Anv cosolute limitation of number &c., &c.---says the Sufra. It is not possible to establish any of the views seeking to limit the number of things; because the means (of Văr. P. 486. proving a proposition) must be something different from that which forms the subject-matter of the Proposition itself; i.e., having stated the Proposition in the form 'all things are one', if the person puts forward a proof in support of it, which is something different from what

The "other assertions" referred to in the Bhaysa are—(1) that of the Sakkays, that Soul and Primordial Matter are the only two entities ; (2) that of the Bauddha, that the only entities are the five shandhas of Colour, Name, Impression, Sensation and Cognition ; and (3) that of the Pashupata, that the only entities are the Pashu (living beings), their bondage, the removal of this bondage, and the Lord. Downloaded from https://www.holybooks.com

forms the subject of that Proposition, then the said limitation of the number of things to one only does not become established; for the means and the subject of the Proposition (being different from one another) would constitute two things. Similarly with the view that "there are only two things" and so forth [for the means of proving this also would be different from the two things that form the subjectmatter of the proposition; thus making three things]. If, on the other hand, there is no means of proving, apart from the subject of the Proposition,—then also the limitation of number c unot be proved; as in this case there would be no means of proving; for what is to be proved cannot itself be the means of proving.

Süfra (42).

Objection-"WHAT HAS BREN URGED IS NOT TRUE; AS THE MEANS (OF PROVING) IS ONLY A PART (OF WHAT IS TO BE PROVED)." (S0. 42).

Bhāşya on Sū. (42).

[P. 211, Ll. 56.]

"It is not true that the limitation of number cannot be proved ;- why ?- because the means is a part (of what is proved by it); it is only a part (of the subject-matter of the Proposition which is the Means of proving that Proposition; so that the Means need not be anything different. Similarly with the views that there are only two things, and so forth."

Farțika on Sū. (41).

[P. 486, L. 7 to L. 10.]

"What is urged is not true &c. &c.—says the Sufra. As a matter of fact, the Means is only a part of the Proposition to be proved, —this is what the Sufra means. The means is only a part of what is to be proved. Such being the case, the Means of proving our conclusion does not come to be anything different from the limited number sought to be proved by it; non-is-the proving/without its means."

Sufra (48).

[Answer]—THE BEASON PUT FORWARD IS NO REASON AT ALL; AS (ACCORDINC TO THE PORVAPAKSA) THINGS CAN HAVE NO 'PARTS'.—(SU. 43).

Bhāşya on Sū. (43).

[P. 212, L. 2 to L. 8.]

The reason put forward (in Sū. 42) is "as the means of proving is only a part of what is to be proved;" but this is not a valid reason; —why ?—because the Opponent has laid down the sweeping assertion that "all things are one only," without any exception at all; and then (in the reason put forward) he speaks of a certain thing (the Means of Proving) as being 'one' (part of the subject of the proposition); but there is nothing (apart from that 'one') which, in the Proposition, takes in, all things, that could be the 'part' and the necessary 'means of proving." Similarly with the other views limiting the number of things to 'two' &c.

If all these sweeping assertions in regard to the limitation of the number of things proceed on the basis of the denial of the indefinite number of diversities among things due to their distinctive properties, they militate against well-known facts ascertained from Perception, Inference and Verbal Cognition; and as such they have to be rejected as wrong doctrines. If, on the other hand, they proceed on the basis of the admission of the said diversities, then they, renounce their absolutism; as the inclusion of things (under any one head) is due to the presence of common properties, and the exclusion (or diversity) of things is due only to the presence of distinct properties [so that the admission of the diversity of things involves the admission of an indefinite number of diversities, and the renouncing of all limitation of the number].

[•]If there were such a thing as the part of what is to be proved, then this would mean that there is no absolute limitation of the number of things to one only. When it is stated that "all things are one,' nothing is left out; so that there is nothing that is not included in the Proposition which could be the proof of that proposition.

BHĀŞYA-VĀRŢIKA 4-1-43

All the above sweeping assertions (from Sū. 14 to Sū. 43) have been examined with a view to get at the discernment of True Knowledge.

Vārļika on Sū. (43).

[P. 486, L. 12 to P. 487, L. 7.]

The reason put forward is no reason at all, Gc. Go.-saysthe Sütra. That the Means is a part of what is to be proved is no reason at all; because the subject-matter of the Proposition is without parts. When the proposition is put forward in the form 'all things are one,' nothing is left out, all things, without exception, being made the 'subject;' so that 'all things,'--which can have no parts-being the 'subject,' there is nothing that could form the Reason or 'Middle Term;' and what is to be proved cannot form the Reason; specially as the operation of a thing upon itself is something incongruous; hence that which has itself got to be p oved cannot be the Proof; the 'object' can never be its own 'instrument.'

If all these sweeping assertions in regard to the limitation of the number of things proceed on the basis of the denial of the indefinite number of diversities among things due to their distinctive properties, they have to rejected as wrong doctrines, because they militate against well-known facts ascertained from Perception, Inference and Verbal Cognition : as a matter of fact, the diversity among such things as the Bull and the Jar is directly perceived ;---diversity is proved by Inference also; since what is inferred is always something different from the means of that inference ;- diversity is shown in verbal cognitions also; the Vár. P. 487. speaker is the person who knows the thing spoken of, while the person spoken to is one who does not know the thing [and these two persons must be different]. Downloaded from https://www.holybooks.com

If, on the other hand, the stid sweeping assertions proceed on the basis of the admission of the said diversities, then they renounce their abs latism. If it be held that—"there is nondifference among things by reason of their possessing common properties and there is difference by reason of their possessing distinctive properties,"—then, this does not militate against the Siddhān!a doctrine. In fact, unless there is diversity among things, there can be no room for commonality; so that when the Opponent speaks of 'commonality,' he must admit the 'diversity' also; and when he denies 'diversity,' he must deny the 'commonality' also; for the 'commonality' cannot subsist except on the basis of 'diversity.'

End of Section 11.

Section (12).

[Sūțrās 44—54.]

On Fruition-the Tenth Object of Cognition.

Bhaşya on Sū. (44).

[P. 212, L. 8 to L. 12.]

After Bebith, comes Fruition; and with regard to this-

THERE ARISES A DOUBT SINCE THE ACCOMPLISHMENT OF THE RESULT (OF ACTS) IS FOUND TO APPEAR IMMEDI-ATELY AS WELL AS AFTER SOME TIME. (SQ. 44.)

When a man cooks rice or milks the cow, the results, in the shape of the Rice and the Milk respectively, appear immediately; whereas when he ploughs the field and sows the seeds, the result in the shape of the Harvest, accrues to him after some time; —now the Agnihutra is an act, the performance whereof is laid down in the text 'one desiring heaven should perform the Agnihutra'; and in regard to the fruition of this act, theneovariased condenbet/was. they be the text or not any results follow it, and if they do, when they follow, and so forth).*

Vārļika on Sū. (44). [P. 487, L. 8 to L. 15.]

Fruition has been mentioned after Rebirth; and in regard to this there arises a doubt, etc., c'c.—says the $S\bar{u}$ /ra. Certain acts have their fruition appearing immediately; e g., the actions of cooking and milking; the results of these, in the form of Rice and Milk, appear immediately after the acts. Other acts again have their fruition after some time; e. g., the actions of ploughing and sowing; the results of these appear after some time, not immediately after the acts, in the form of the harvest. The Agnihotra laid down in the text 'the Agnihotra should be performed' and such other sacrifices are also acts; and in regard to these there arises the doubt—Is the fruition of these immediate, consisting of the heat (emitted by the sacrificial fire) or some such thing ?—or is their fruition such as appears at some other time?

Sūfra (45).

[Siddhānta.]— THE FRUITION IS NOT IMMEDIATE; BE-CAUSE IT IS SUCH AS OAN BE EXPERIENCED ONLY AT A LATER TIME.

• Says the Parishuddhi—It is not possible that there should be any such doubt regarding Fruition in general, as to whether it appears immediately after the act, or after the lapse of some time; for so far as the acts of cooking, etc., are concerned, it is already ascertained that their fruition is immediate; and in regard to the act of Agnihofra, etc., also, it is already known that its fruition comes only after the lapse of some time. But what gives rise to the doubt is the very fact of the Agnihofra, etc., being actions, involving the effort of an intelligent agent; and inasmuch as it is found that the activities of intelligent beings are of both kinds—some having their fruition immediately and others after the lapse of time, there is nothing to show for certain to which of the two classes the action of Agnihofra belongs.

† This Safra is not found in the Nydyasúchlaibandha; and the Tätparya calls it 'Bhāşya'. Vishvanātha treats it as 'Sutra', and it is found in the Puri 'Sūtra' Ms. as also in Sūtra Mss. C. and D.

The Siddhanfa embodied in the Sūţra is in answer to the Pārvaŗakļa that it is not necessary to assume any invisible superphysical results for Agnihotra, etc., since we find them bringing about the immediate result in the shape of Fame, etc.— Vishvanātha. Downloaded from https://www.holybooks.com

(Sū. 45).

Bhāşya on Sū. (45).

[P. 213, Ll. 1-2.]

'Heaven' is the result mentioned in the scriptures; and the attainment of Heaven accrues only to another body, which comes after the present boly has been destroyed; and in the case of actions done with a view to the acquiring of landed property also we find that the result does not appear immediately after the actions have been done. *

Varfika on Su (45.

[P. 487, L. 17 to P. 488, L. 5.]

The fruition is not immediate elc., elc.—says the Sufra.

Heaven is the result mentioned in the scrip-Vár : P. 488. tures; and an action enjoined in the Veda can never be fruitless; nor is the performer of the Agnihotra ever found to undertake its performance simply with a desire for obtaining heat from the fire; from all this it follows that from the contact of the Mind with the Soul,-which follows after the performance of the sacrificial acts. and which is aided by the presence of pure intentions, -there appears in the Soul Dharma, Merit; and this Merit, having its potency untrammelled, when sided by suitable conditions of time, etc., brings about the result (in the form of Heaven); and it is only when the present body has fallen off, and the Soul becomes equipped with another body, that the said result appears, and not immediately after the performance of the act.

Sufra (46).

[Objection.]—" THE FRUITION CANNOT APPEAR AT AN-OTHER TIME; AS THE CAUSE THEREOF WILL HAVE CEASED TO EXIST."

[•] Puri Ms. B. reads similaring which would mean that—'in the case of the sotions done by men still in the meshes of ignorance.' But in view of what follows later on in the Bhitman Bedth hold https://www.bithmopkintmintext is better.

Sa. (46.)

Bhāşya on Sū. (46)

[P. 213, Ll. 4-5.]

"The actual action (the sacrificial performance) having ceased to exist, the result of that action could not come about, in the absence of its cause (in the shape of the action); for as a matter of fact, no effect is ever found to be produced out of a cause that has ceased to exist."

Vārļika on Sū. (46.)

"The fruition, etc., etc.—says the Sūfra. What is declared is that the result of the sacrificial act appears in another body, long after the sacrificial oblation has ceased to exist, and also after the present body has been destroyed; —but this is not right; as nothing can be produced out of a cause that has ceased to exist."

Sū{ra (47).

[Answer.] — PRIOR TO THE ACTUAL ACCOMPLISHMENT OF THE FRUITION THERE WOULD BE SOMETHING (IN THE SHAPE OF AN INTERMEDIARY), JUST AS THERE IS IN THE CASE OF THE FRUIT OF TREES.

Sū. (47).

Bhūęya on Sū. (47). [P. 213, L. 7 to L. 18.]

The man who desires fruits renders such services to the tree as pouring water at its root, and so forth; and it is only after the actual act of watering has ceased to exist that the earth-particles (under the tree's roots become lumped together by the particles of water, and becoming heated with the heat underground, they produce a juicy substance; this juicy substance, as modified by the heat, comes into contact with the tree and, in a peculiarly modified form enters into it and produces the leaf etc., and the fruit; —in this manner the action of watering is fruitful, and yet the result does not quite follow from managements based on the state. In the same manner actions produce (in the Soul) a faculty in the shape of *Dharma-Adharma*, Merit-Demerit; and this faculty, after being produced, comes to be helped by other causes and thus brings about the result at a later time. This is what we have already explained under Su. 3-2-60, where it has been shown that 'the body comes into existence on account of the continuity of the results of previous deeds.'

Vartika' on Sū. (47.)

[P. 488, L. 10 to L. 18.]

Prior to the actual accomplishment, etc., etc.--says the Satra. We do not say that the effect is produced from a cause that has ceased to exist; what we do say is that by the action in the shape of the offering of the Agnihotra libations Dharma, Merit, is produced in the manner described, and from this Merit follows the result. Just as the man desiring fruits does the acts of watering the roots of the tree and so forth, but the fruit cannot be produced out of the act of watering that has ceased to exist; and what actually happens is that the act of watering having been done, it comes to be influenced by the 'Karma' or destiny of the man who would eat the fruits of the tree, and affects the particles of earth which being thus lumped together become heated with the heat underground and produce a juicy substance; this juicy substance directly permeates the tree till its fruits appear; and it is thus that the leaves and fruits are brought about. Such being the case, it is clear that the accomplishment of the fruit does not follow from the watering that has ceased to exist, nor is the watering useless.

Bhāşya on Sū. (48).

[P. 213, L. 18 to P. 214, L. 2]. Pürvapak**ş**a.

Says the Opponent-

"PRIOR TO IT'S ACCOMPLISEMENT, THE ACCOMPLISHED FEUITION (HERUIC)-CHANNORD BANNAUTRABO (14) CHON-BXISTENT. (B) OR EXISTENT, (C) OB EXISTENT-NON-EXISTENT; BECAUSE 'EXISTENT' AND 'NON-EXISTENT' ARE TOTALLY DISSIMILIAR.''• (SU. 48).

(a) A thing that is liable to be accomplished (produced) could not be non-existent, before its production; because of the restriction in regard to the material cause of things; that is, as a matter of fact, for the bringing about of a certain product (the Jar, e.g.) it is only one particular material (Clay) that is brought in; and it is not that any and every material is brought in for the making of all things; thore could not be this limitation or restriction (in the form that one product is produced out of only one material substance, and not from all substances), if the product were absolutely non-existent (before its production).⁺"

(b) "Nor could the thing be existent (prior to its production); because if the thing already exists, before it is brought about, there could not (need not) be a further 'production' of that same thing."

(c) "Nor could the thing be both existent and nonexistent; because 'existent' and 'non-existent' are totally dissimilar: the term 'existent' affirms a thing, while the term 'non-existent' denies it; and it is this mutually contradictory character that is spoken of as 'dissimilarity' (in the Sūțra); and because of this fact their being contradictories, no coexistence of them is possible."

•The question going to be discussed now is whether the Fruition or Result of Acts is something that, prior to its being brought about, was -(1) already existent, or (2) non-existent, or (3) both existent and non-existent, or (4) neither existent nor non-existent. The Purvapaksa propounded in the Süţra is that no one of these alternatives is possible, hence there can be no such thing as the 'fruition' of actions.—Tāțparya.

The fourth of these alternatives is found in the Varika, not in the Saira or in the Bhaiyz. In this Saira also Dr. Satish Chandra Vidyabhūgana finds a reference to the Mādhyamikā-Sāiras.

† The very fact that it is only out of Clay that the Jar is produced, clearly shows that the Jar already exists in the Clay. *Cf. Sakkhyakārikā*, 9— *' Upādānagrahaņi* []dwnloaded from https://www.holybooks.com Vārļika on Sū. (48).

[P. 488, L. 19 to P. 489, L. 9.]

"Prior to its accomplishment, the Result cannot be &c. &c.

(A) A thing that is liable to be produced could not be non-esistent before its production, because of the restriction in regard to the miterial cause of things; the non-existence (of the product, prior to its production) being common to all things, there could be no explanation of the restriction that certain products are produced out of certain causes only (and not out of all)."

(B) "Nor could the product be existent, prior to its production; for the production of what is already existent, would be an absurdity; it is a contradiction in terms to speak of a thing as 'existent' and yet as 'produced.'"

(C) "Nor could the product be both existent and nonexistent; as 'existence' and 'non-existence' are totally dissimilar; 'existence' affirms a thing, while 'non existence' denies it; and there can be no co existence between affirmation and denial; hence the product could not be both existent and non-existent."

(D) "Nor, lastly, could the product be neither existent nor non-existent; for the exact nature of such a product could never be determined; it is impossible to indicate the precise character of such a product (as is neither existent nor nonexistent)."

Bhāşya on Sū. (19). {P. 214, L. 2.} Siddhānta.

The truth of the matter is that prior to being produced, the thing to be produced was non-existent.—" How so ?"— $S\bar{u}$ fra (49).

BECAUSE WE PERCIVE THE PRODUCTION AN WE L AS DESTRUCTION (OF THINGS). (SU. 49.)

^o If a thing is existent, even prior being produced, it means that it is eternal ; and if it is eternal, there has be production destruction destated

Var(ika on Sü. (49).

[P. 489, L. 9 to P. 490, L. 17.]

Prior to being produced, the thing to be produced is nonexistent, --- this is the truth, i.e., the true view. "How so ?"---Because we perceive the production as well us the destruction of things-says the Sūlra. We find that a thing, not perceived before, comes to be perceived afterwards; and this can be possible only in the event of a thing being produced which was non-existent (before being produced); we find also the 'destruction' of the thing, when we cease to perceive the thing that was perceived before. All this could not be possible for him who regards all things as cternal; according to the theory that prior to being produced, the thing is existent there can be neither 'production' nor "destruction'; and he who denies the 'production' and 'destruction' of things will have to renounce all worldly activity. Because, when a man undertakes an activity, for what purpose does he do it? "Well, he does it with such motives as 'I shall obtain this,-I shall get rid of that." True, it is with such motives that the man undertakes activities; but for the person who holds things to be existent (even before they are pro-Vår : P. 490. duced) there can be nothing to be either obtained or gut rid of.

Further, for such a person there would be no use in putting forward the Proposition and the other factors of the inferential reasoning; as he denies the 'production' and 'destruction' of things; and if there is nothing that is either produced or destroyed, then there can be no useful purpose served by the putting forward of the several factors of the inferential reasoning [as these are put forward either for the *production* of, or bringing about, right cognition, or the destruction of wrong cognition]. If it be held that—" it is for the purpose of bringing_about, upper the several factors are purpose.

existent (even prior to production) (that the factors of the inferential reasoning are put forward),"-then (our answer is that), since (under the Opponent's theory) the said conviction would be already existent, there would be no use in the putting forward of the inferential factors; for when a man already possesses a thing, he does not have recourse to the causes calculated to bring about that thing. "The putting forward of the inferential factors would be for the purpose of removing ignorance (i.e., doubts and wrong notions)." This also stands on the same footing; and unless there is something new produced in the man, his ignorance does not cease. If again it be held that -" the bringing in of causes is for the purpose of manifesting (the effect),"-then we ask, what is this 'manifestation' that is brought about by the cause? If it is an 'effect,' then the allegation involves a self-contradiction (on the part of the Parvapaksin). If again, the 'manifestation ' be held to be some property of the effect.-even so the 'self contradiction' does not cease. If, thirdly, 'manifestation' means perception (apprehension) -then too, since your assertion means that 'such manifestation, i.e., apprehension, in regard to the effect, is produced," you do not escape from 'self-contradiction.' If, fourthly, it be held that-" the manifestation of a thing means that it has existed till then in the form of the cause and it now appears in the form of the product,"-even so the 'selfcontradiction' remains; for according to this explanation 'the appearance in the form of the product' is something that was non-existent before. If, fifthly, the 'manifestation' be held to be only a particular phase of the cause itself.--even then, it would mean that this 'phase of the cause,' which was non-existent, comes into existence, is produced: and this would involve 'self-contradiction' on your part. If, in order to meet this difficulty, it be held that the said phase of the cause lea has heen wheed so existent, -then the

bringing in of the cause can serve no purpose. If, sixthly, the 'manifestation' be explained as 'the augmentation (expansion) of the signs (indicatives) of the cause,'-then our answer is that the expression 'augmentation of indicatives' can have no meaning, if there is no coming into existence of something that did not exist before; so that in this case also the bringing in of the cause would serve no purpose; and further, this explanation also would mean that 'the augmentation of indicatives,' was non-existent before and comes into existence afterwards; so that thus also you do not escape from 'self-contradiction.' Thus it is found that in whatever manner 'manifestation ' is explained, in every case it militates against the notion that the product is existent (even before its production).

Bhāṣya on Sū. (50).

[P. 214, L. 4 to L. 8.]

It has been alleged (in the Bhāşya on Sū. 48) by the $P\bar{u}roupuksin$ that—" Prior to its production, the Product is not non-existent, because of the restriction in regard to the material cause of things;"—[the answer to that is as follows]—

Süfra (50).

THAT THE PRODUCT IS NON-EXISTENT IS CLEARLY PROVED BY THAT VERY CONCEPTION. (Sū. 50).

The conception (of restriction in regard to the material cause, which the Opponent has cited) is in the form 'this thing, and not all things, is capable of producing this effect;' and this conception clearly proves that prior to being produced, every effect is known as capable of being produced by a particular cause; and that this conception is correct is shown by the fact that the production of the effect is actually in accordance with that conception; and in fact it is only on the basis of this conception that we can explain the restriction in regard to the cause of the thing. If, on the other hand, the product is already existent, prior to being produced, then therefore the shown by the shown' is a that there could be no conception at all in regard to its being produced out of only a particular material cause].*

Värfika on Sü. (50 .

[P. 490, P. 17 to P. to P. 494, L. 4.]

It has been alleged that-" prior to its production the product in not non-existent, because there is restriction in regard to the muterial cause of things;" and the answer to this is that that the product is non-existent &c. &c.-says the Sufra. As a matter of fact, the restriction in regard to the material cause of things is due, not to the fact of the thing being already existent, but to its potentiality; the Vár. P. 491. idea (involved in the said restriction) being that - this effect is capable of being produced out of this cause, and it is not cupuble of being produced out of another '; and it is only when a man has conceived of the thing in this fashion (as something cap ble of being brought into existence) that he brings in, for the production of that thing, such a cause as is capable of producing it; and no one brings in all causes for the production of all things; and this for the simple reason that all things are never found to be produced out of all things.

Further, what the *Purvapaksin* admits is that there is a certain restriction in regard to certain things being the causes of certain effects,—and he admits this on the basis of the restriction that is found in regard to the actual production of things and also of that which is found in regard to the products (as pertaining to certain causes); but while admitting all this, he has got to explain the exact signification of the terms 'cause' and 'effect;' what is it that is

⁶ The very conception that a thing is produced only out of a certain cause proves that before being produced that thing must be non-existent. The weaver takes up the yarms with the idea -' the Cloth shall be produced out of this' and not that ' the Cloth is here already ;' for in the latter case, why should he put forth any effort to bring into insisted decide (Cloth/Whith addicated)?

meant by 'cause ?' and what is it that is meant by ' effect ?' "Well, that which does or brings about a thing is the cause, while that which is done or brought about is the But if it is the 'manifestation' (of the thing) effect." that is brought about [for the thing itself being already existent, could not be brought about], then this becomes open to the objectious already pointed out above "But even in connection with existent things we find the root ' karofi,' 'to do,' being used; e.g. in such expressions as 'keshān kuru' 'do the hair,' 'pris/han kuru,' 'do the flour'." But these examples do not serve your purpose; for in the case of the doing of hair, that which is done, or brought about, is a peculiar dressing of the already existing hair, and this peculiar dressing is something that is not already existent; similarly in the case of the doing of the flour, what is done is the removal of dirl out of the existent flour, and this removal of dirt is something not already existent; so that there is not a single thing which we ever find as being the object for the bringing about of which a cause operates. Hence the view put forward cannot be right.

The Opponent might urge—" if it is the non-existent thing that is brought about, then, why is it that the horn of the ass is not brought about?" But who says that the ass ' horn is not brought about? If there is such a thing as the 'ass ' horn ' (and it is only such a thing that could be spoken as 'ass ' horn,') it is certainly brought about. "But why does the Ass not become the cause of the horn? [why does not the horn grow out of the ass' body?]" We do not know why it does not grow out of it; that it does not do so we only conclude from the fact that we have never seen a horn being produced by the Ass. This also explains the case of the ' hare's horn.' The ' hare's horn ' is not brought about, not because it is non-existent, but because there is no cause that could broads.//win factor the does not consistence' of a thing cannot be treated as a reason for its being brought about; what is meant is that since what is already existent cannot be produced, it is the non-existent thing that is produced. Further, when you make the assertion that—" the Ass' horn is not produced because it is non-existent,"—you go against your own doctrine : according to you the ass' horn cannot be non-existent; and according to you, whether a thing is existent or non-existent, it is produced if its cause is present ! And it is thus that for the person who holds the view that all effects are existent (even before they are produced) all worldly usage comes to an end : For him nothing new—(that which is not already existent)—can ever be produced, and nothing old—(that which has been existent)—can ever be destroyed.'

Question.— "What is the proof for the view that the effect (prior to production) is non-existent?"

Answer.—Proof there can not be, either for the existence or the non-existence of things; there is Inference only when there is no difference of opinion in regard to the thing in question." "Whereupon then is there the quarrel (if there is agreement in regard to the thing itself, ?" The quarrel is in regard to the properties (exact nature) of that thing in regard to which both parties are agreed. So that in the case in question, the yarus being the things admitted and agreed upon by both parties, it is in regard to these (the exact nature of these, in

• This sentence, according to the Tatparya, should be construed as a साचे क unter (unuanter) united unanter to underlying the question of the Opponent is that if the thing, which would be the subject of any inference that the Siddhautin might put forward, is non-existent, it cannot form the 'subject' of any inference at all; so that every inference in regard to it would be dahraydsiddha, Baseless.

The answer anticipates this difficulty and means that no Inferential reasoning is possible in support of either existence or non-existence; for an interential reasoning is possible only if the 'subject' is admitted by both parties; and so long as there is no agreement in regard to the thing itself, there can be no inferential reasoning put forward by either patty://www.holybooks.com

1540

relation to the Cloth) that several theories are propounded : (a) One party asserts that the Cloth is only i. e. nondifferent from) the yarn; (b) others hold that the Cloth is the yarns arranged in a certain form; (c) a third party alleges that it is the yarns alone that appear in the form of the product (cloth); (d) according to others, one character (of the yarns) disappears and another appears; • (e) while according to a fifth party the Cloth is only the yarns endowed with a peculiar potency. (a) Among these several theories, --in answer to the first, all that is necessary is to prove that the Cloth is different from the more yarns; and this has been siready done (in Adh. II). (b) As regards those who hold that the Oloth is only the yarns arranged in a particular form, against them we have the following argument :- Prior to the time that the Cloth is actually perceived (as a finished product), the yarus were devoid of that particular form,because they are the cause of the Cloth, -like the Loom, etc. [This shows that the Cloth is something different from the yarns]. (c) and (d) 'This same argument also disposes of the view that the yarns themselves appear in the form of the product; as also the view that there is disappearance of one character and appearance of another. (e) The person who asserts that the Cloth is only the yarns endowed with a peculiar potency (admits that prior to the causal operation bringing about the Cloth, the yarns have existed as endowed with another potency and hence) does not militate against anything; and hence we do not put forward any argument against this view. In fact, what is asserted in the statement that ' the Cloth is the yarns endowed with a peculiar potency' is exactly the same that has been asserted by the Siddhantin in the statement-" That the product is non-existent is clearly proved by that very conception ' (Sū. 50). Under every one

of the (first four) theories mentioned, it is impossible to have the notion of the 'Cloth ' without the production of something that did not exist before; and as such the 'self-contradiction ' involved in them cannot be escaped.

[The *Pāroapukṣia* puts forward an argument in support of the theory that the Product is existent even prior to its production]—" What really happens (in the case of the Cloth) is that the yarns serve the purpose of manifesting that (Cloth) which already exists; and it is for this reason that they are brought in by the person who wants the Cloth; just as the spade (is brought in by the person who wants the water hidden underground, which is manifested, or brought into view, by the spade)."

But this 'manifestation' of the existent thing must be something that was non-existent before; and just as the nonexistent 'manifestation' is 'brought into existence so may also the non-existent product be brought into existence. All this has been fully explained before.

Further, the $P\bar{u}roupuksin$ has put forward (in $Bh\bar{a}sya$ on Sū. 48) the reason—" because of the restriction in regard to the material cause of things."—But the 'material cause ' is a cause ; and if the product is already existent, we do not see what purpose could be served by any oause ; this objection, which we have urged before, remains still in force. Then, as regards the corroborative instance of the 'spade, etc.,' that you have cited,—the fact is that the spade is brought in, not for the purpose of the water, but for the purpose of removing the incrustation (over the water); and this 'removal of the incrustation ' is a sort of disjunction and comes into existence after having been non-existent; so that your corroborative instance is not what it is meant to be. If the Opponent does not admit that there is disjunction (in the case of the digging out of water), --there is disjunction (in the case of the digging out of water), --there act admitting Accordynation,' he should be

asked to explain how the notion of 'disjunction' comes in (when one is digging the earth). He might explain that the notion of 'disjunction' is due to mere non-contact (between the buckets of earth dug out and the pit). But this ' non-contact ' -(a) is it merely absence of contact ? or (b) something other than contact? "What do you mean ?" (a) If 'non-contact' is only absence of contact, then you have to explain whence this absence comes about. If there is a cause that brings about the contrary of the 'contact',- then it is just this that is called 'Disjunction'; so that it is not true that there is no such thing as Disjunction; for we have already explained that what is denied in one place exists in another place.* Further, there are two kinds of 'non-contact' (1)-in which there is no touching at all, and (2) in which there is a going asunder of what were touching before; and this latter is what is called 'Disjunction,' and it is this disjunction that is brought about by means of the *spude* &c. (b) If on the other hand, 'non-contact' be held to be something other than contact,-this also will be of two kinds; and hence this view also will be open to the aforesaid objections. If (in view of the above difficulties) the Opponent holds 'Disjunction' to consist in the two things being produced in separate places [and 'Conjunction' to consist in the two things being produced close to each other, neither 'Conjunction' nor 'Disjunction' being regarded as quality],-then our answer is that, in view of the qualified expression being in the form, ' these two things have been produced in separate places, -- 'Disjunction' cannot consist merely in the two things being produced in separate places; in .fact, the

^{• &#}x27;Contact' or 'Conjunction', being a quality, can be destroyed either by the destruction of the substance to which it belongs, or by the appearance of a contrary quality; in the case in question we do not find any destruction either of the encrusting layers of earth, or of the water; so that there must be the appearance of some quality contrary to contact; and it is just such a quality that is called 'Disjunction's destruction wither's www.holybooks.com

qualification 'produced' is applied to the thing that is produced ;--- the qualification 'separate' is applied on the basis of things occupying different points in space ;- the qualification 'disjoined' is applied by virtue of the things being disconnected ;-all these several distinct causes or bases of the notions of diversity are inferred from the diversity in the notions themselves; and the three terms, 'separated', 'produced' and 'disjoined,' are not synonymous terms. [So that the notion of things being 'disjoined' cannot be due to their being produced in separate places, as held by the Opponent]. Further, (in course of our refutation of the momentary character of things) we have already refuted the view that the two things (on being disjoined) are produced in separate places; hence for this reason also 'Disjunction' cannot consist merely in the two things being produced in separate places.

"As a matter of fact," says the Opponent, "Disjunction itself is only momentary, hence it is not possible for any cognition of Disjunction to appear."[•] It is not so; for the time during which the cognition of Disjunction appears is that which is taken up (1) by the manifestation of the 'community' (to which the particular Disjunction belongs) and (2) by the destruction of conjunction; that is, when the Disjunction is produced by its cause, first it manifests (renders perceptible) the Community (to which it belongs),[†] and after this Community has been rendered perceptible, it beings of the Disjunction of the Disjunction

it brings about the cognition of the Disjunction itself,--then it destroys the previous conjunction,--and after

† This, says the *Tâtparya*, is according to the view that the specific cognition of every particular thing must be preceded by the cognition of the community to which it belonge. Downloaded from https://www.holybooks.com

[•]The cognition of Disjunction could be possible only if it continued to exist. long enough to allow of the functioning of either Perception or some other means of cognition. Since however it exists only for one moment, no such functioning is possible ; and hence no cognition.

the destruction of this conjunction, when there comes intoexistence another conjunction of the things concerned [as, when the two rams striking against each other, repeatedly], the Disjunction is itself destroyed. Thus then, inasmuch as Disjunction is found to exist for several moments, it is not right to say that it is destroyed as soon as it comes into existence.

From all this is follows that it is the (previously) nonexistent thring that is produced (by causes).

Sū(ra (51).

[Objection]—"THE BEORPTACLES BEING DIFFERENT [IN THE CASE OF THE FRUITION OF ACTS], IT IS NOT BIGHT TO ARGUE THAT IT IS LIKE THE FRUITION OF THEES."— (Sū. 51).

> Bhāşya on Sū. (51). [P. 214, L.L. 10-11.]

"[In the case of the fruition of trees] it is found that the services rendered, in the shape of the watering of the roots and so forth, as well as the *fruition*, both are in the tree itself,—both have the same tree for their receptacle; [in the case of the fruition of actions] on the other hand, the action occurs in the present body, while the fruition appears in the next body; so that there being a difference in the receptacles, what has been urged (in Sū. 47 does not prove anything at all (in regard to the sacrificial acts being the cause of fruition, in the shape of Heaven &c.)."

Vārļika on Sū. (51).

[P. 494, Ll. 6.8.]

The receptacles being different &c. &c.—The action of watering the roots and the fruition, in the shape of leaves and fruits, both appear in the tree; while the acts (of sacrifice &c.) are planeaisdthen present whether fruition (in the shape of Heaven) appears in the next body; so that there being a difference in the receptacles, the instance of the 'fruition of trees' is not applicable at all.'

Sū[ra (52).

[Answer]. -- INASMUCH AS HAPPINESS SUBSISTS IN THE SOUL, THE OBJECTION HAS NO FORCE AT ALL. (Sū. 52).

Bhāşya on Sū. (52).

[P. 214, Ll. 13-14.]

Happiness, being perceptible to the Soul, subsists in the Soul; action also,—in the form known as '*Dharma*,' 'Merit' —subsists in the Soul,—as *Dharma* is a quality of the Soul; thus then, there is no possibility of receptacles being different.*

Vārļika on Sū. (52).

[P. 494, Ll. 10-11].

Inasmuch as Happiness &c. &c. What the $S\bar{u}$ a means is that it is not true that there is difference in the receptacles ;—the act subsisting in the same substratum as the fruition of the act.

Sū(ra (03).

[Objection] --- "WHAT HAS BEEN JUST SAID IS NOT TEUE; AS [THE OBTAINING OF] SON, WIFE, CATTLE, CLOTH-ING, GOLD, FOOD AND SUCH THINGS ABE MENTIONED AS THE FEUIT (OF ACTS)." (SQ. 53).

Bhāşya on Sū. (53).

[P. 214, Ll. 16-17.]

"As a matter of fact, what is mentioned as the 'fruit' is the obtaining of such things as the son & ..., and not 'Happiness'; we have such assertions as—" one who desires landed property should perform this sacrifice,' one who desires a son should perform that sacrifice' and so forth. So that the assertion (under Su. 52) that 'Happiness' is the fruit of actions is not true.'

1546

^{. **} Heaven', which is the result of sacrificial acts, is only a form of *Happiness*; and Happiness subsists in the Soul, not in the Body; and the Soul remains the same through the Develet Heeffrom https://www.holybooks.com

Vārļika on Sū. (53). [P. 494, L.L. 14-15].

"What has been just said is not true, &c. &c.--What is mentioned as the 'fruit' is the Son and such things; and certainly the Son does not subsist in the Soul."

Sāļra (54).

Answer.—INASMUCH AS THE REAL FRUITION RE-SULTS FROM CONNECTION WITH THE THINGS MENTIONED, 11 IS ONLY INDIRKCTLY (FIGURATIVELY) THAT THESE LATTER ARE SPOKEN OF AS THE 'FRUIT'.—(SU, 54).

Bhāşya on Sū. (54).

[P. 215, Ll. 2-3.]

As a matter of fact the real fruition, in the shape of Happiness, results from connection with the son, wife, &c., and it is for this reason that these latter are regarded, or spoken of, only indirectly, as 'fruit'; just as food is (indirectly) spoken of as 'Life,' in such statements as 'Food is life itself.'

Vārļika on Sū. (54).

[P. 494, L. 17 to P. 495, L. 2.]

Inasmuch as the real fruition &c. &c.—As a matter of fact, from the connection of such things as the Son and like follows Happiness, which is the real 'fruition'; and the it is only by reason of being the cause of Happiness that the Son and others come to be spoken of as 'fruit.' Just as

Vār. P. 495. by reason of Life being sustained by Food, food comes to be spoken of as 'life'. That such usage is merely figurative or indirect we infer from the fact that in reality Food is not Life, and yet people make use of such expressions [which can be explained only on the basis of the assumption that the language is figurative].

[Sutras 55-58.]

Examination of the nature of Pain. Bhāşya on Sū. (55).

[P. 215, L. 4 to P. 216 L. 4].

After 'Fruition' (in Sū. 1-1-9) is mentioned 'Pain'; and this has been defined (in Sū. 1-1-21) as 'that which is connected with annoyance is *Pain*'. But now the question is raised—" Does the Siddhantin mean to totally deny such a thing as 'Pleasure,' which is felt by every personality ? or does he mean something else ? '•

• Question—" What is it that has to be *szamined* in the present section ? No one devies that there is such a thing as Puin; nor is there any doubt as to its being a thing to be got rid of; it might be useful to examine whether it is eternal or not; but it has already been established, in course of our refutation of the doctrine that all things are eternal; what causes pain is also well known to be such things as the serpent, the thorn and so forth; Activity has been fully examined, as also its Effects, in the form of Birth & o; ; and how the cessition of the cause leads to the cessation of its effects has been shown under Si. 1-1-2. What then has remained uninvestigated, for the sake of which the present section has been taken up?"

Answer-Pain has been defined as that which is connected with annoyance; by 'annoyance' here is meant the *feeling of annoyance*; and this according to the Biddhänta, includes, not only Pain and its causes, but *Pleasure* also. If this is duly realised, then there is no room for the question put by the *Parvapakin*; but he has put the question in view of the primary meaning of the term 'annoyance,' which is restricted to *Pain only.-Parishuldhi*.

The sense of the Pärvapakşa has been thus expounded in the Täpparya :--"We admit that Pain is that which is connected with annoyance; but that which is experienced by every personality'ss Pleasure, that cert inly could not be regarded as Pain; as this would be contrary to experience. As regards the Body and the sense-organs &c, -- if they are to be regarded as Pain because they are the Source of Pain, they may be regarded as 'Pleasure' also, as being the source of Pleasure. In fact the timidity involved in the idea of regarding everything as pain is likely to strike at the root of all worldly usage. As a matter of fact, when a man eats meat, he removes all the bones and hence does not suffer the pain that might be due to the bones; similarly a wise man will enjoy Pleasure only, taking care to avoid all that may be likely to bring pain."...It is in view of all this the the Berbéarkinthan/pat/theorgeatisn.com

Our answer is that the meaning of the Sid dhanfin is "Why so?" It is not possible to something different. totally deny Pleasure, to whose existence testimony is borne by all men. The teaching (of the Siddhanta) that Pleasure should be looked upon as 'Pain' is meant for the removal of all pain for the person who has become disgusted with the sufferings caused by the experiences undergone during a series of births, and deaths, and is anxious to get rid of all similar experiences. "But by what method (is this advice effective)?" The bodies of all livings beings, all the regions where people are born, all rebirth, (all conditions of life), every one of these is beset with 'annoyance, 'beinginseparable from Pain; and it is in view of this fact that the sages have tendered the advice contained in the Sütra 'Pain is that which is connected with annoyance' (Sū. 1-1-21); and the meaning of this is that all the aforesaid things should be looked upon as 'Pain'.† Reasons for this view are put forward in the following Safra.

Suļra (55).

THE BIRTH OF THE BODY &C. IS ONLY PAIN; BECAUSE IT IS BESET WITH ANNOYANOES, (SU. 55.)

The term 'janma' (in the $S\bar{u}$ /ra) stands for that which is produced, i. e. the Body, the Sense-organs and so forth; and the 'ufpaffi' of 'janma' is the coming into existence of the Body &c in their various forms. The 'several annoyances' are—the least, the medium, and the greatest; the greatest 'annoyance' is of those in hell; the medium is that of the lower animals; and the least is that of human beings; of the divine beings, as of those who have got rid of all attachment, it is still less. When a person perceives that every condition of life is beset with annoyance, he becomes confirmed in his idea that Pleasure and its causes, in the shape of the Body, the sense-organs and cognitions, are all regarded as 'Pain'; and when he has come to look upon all these as

• The Tilparya explains the expression ' uppatright least 'as the regions for the acquiring of things, which brings pleasure and pain.

†If it were possible to obtain pleasure unmixed with pain, no intelligent person would ever seek to get rid of it : as a matter of fact however, no such unalloyed pleasure is ever met with ; hence what the Siddhanfa means is, not the total denial of all Pleasure/buttimatall filedamps should be discover as Pain.' T& parya. [•] pain', he loses all attachment to all things of the world; and after he has harboured this dis-attachment, all his longings for worldly things come to au end; and his longings having come to an end, he becomes freed from all suffering, just as when one understands that by the contact of poison, milk becomes poison, he no longer seeks to obtain milk, and not obtaining it, does not suffer the pange of death.

Vārțika on Sū. (55).

[P. 495, L 3 to L. 16.]

After ' Fruition ' is mentioned ' Pain,' and this has been defined as 'that which is connected with annoyance is pain '; now is it meant to deny Pleasure which is felt by all men ? Or is the meaning something else? The answer is that the meaning is different ;- why ?- hecause it is not possible to totally deny Pleasure to whose existence testimony is borne by all men. The present teaching, that all things should be looked upon as 'Pain,' is for the benefit of that person who has become disgusted with the sufferings caused by the experiences of long-continued series of births and deaths ; the motive of the teaching being to make the person look upon all things as ' pain', and looking upon them as such to become disattached from them, and having become disattached, to become released. "In what manner is he to look upon all things as Pain ?" It has been declared by the sages that -' all bodies of living beings, all rebirth, and every condition of life, being intermingled with Pain, is Pain.' The said contemplation of all things as Pain has been taught; the following Sutra provides reasons for the same: The birth of the Body gc., gc.-says the Sutra. ' Janma' here stands for that which is produced,-i.e., the Body, the Sense-organs and Cognitions ; 'birth' stands for the coming into existence of the Body &c; the '*ū*{pa{{i', 'birth, of 'Janma' 'things produced,' is what is meant by 'the birth of the Body, dc.' The 'annoyance' is of various kinds-least, medium and greatest. The rest is clear in the Bhawaya ded from https://www.holybooks.com

Bhāşya on Sū. (56). [P. 216, L. 4 to L. 9.]

The teaching that all things should be looked upon as 'Pain' is not meant to be a denial of Pleasure; -- Why?

IT IS NOT SO; BECAUSE PLEASURE ALSO IS ACCOMPLISH-ED DUBING INTREVALS. (Sū. 56.)

By the teaching that all things should be looked upon as 'Pain,' it is not meant that there is no such thing as 'Pleasure' at all ;--Why? Because Pleasure also is accomplished during intervals; that is, as a matter of fact, in the intervals of 'annoyances,' Pleasure is actually accomplished and experienced by all living beings; and hence it cannot be denied entirely.

Varlika on Sū. (56).

[P. 495, L. 16 to L. 20.]

It is with the view explained above that we have the teaching that all things should be looked upon as 'Pain'; and it does not mean that there is no such thing as 'Pleasure' It cannot mean so; because Pleasure also &c. &c.—says the Sūtra.

Inasmuch as in the intervals of annoyances, we actually perceive Pleasure being accomplished (we cannot possibly deny the existence of Pleasure).

> Bhāşya on Sū. (57). [P. 216, L. 9 to L. 19.]

Further,---

THERE IS NO DENIAL [OF PLEASURE]; BECAUSE [ALL THAT IS MEANT IS THAT] INASMUCH AS THE MAN EXPERIENC-ING PLEASURE IS OPPRESSED WITH THE FRAILTY OF LONGING, THERE IS NO CRESSATION OF ANNOYANOE FOR HIM. (SU. 57.)

The 'non-denial' (in the Sūtra) is meant to be that of *Pleasure*—by the teaching that it should be looked upon as 'Pain'; that such is the meaning of the *Sūtra* is clear from

geneurourner is the reading of the Nyäyäsächinibandha, of the Süţra-Mes. C. and D. as also in VishvanathabadadtipomThipSimirSülteoMisocheschers. the context. 'Longing'—is wish, the eager desire for acquiring a thing; and the 'frailty of this longing' is as follows:—when the man experiences pleasure from a certain thing, he desires that thing,—and sometimes the desire is not fulfilled, or if fulfilled, it is fulfilled only in part, or is fulfilled in such form as is beset with obstaclea;—and from this 'frailty of longing' there arise various kinds of mental suffering; so that the man experiencing pleasure, being oppressed with the frailty of longing, there is no cessation of annoyance for him;—and it is because there is no cessation of annoyance that it has been taught that Pleasure should be looked upon as 'Pain'. It is for this reason that Birth is 'pain,' and not because there is no pleasure at all. This is the idea that has been expressed in the following verses :—

(1) 'For the man who desires a desirable thing, as soon as that desire is fulfilled, another desire quickly besets him.'

(2) 'Even though a man obtains the entire sea-girt Earth, along with all cows and horses, that seeker after wealth does not become satisfied with that wealth; what pleasure, then, can there be for one who desires wealth?'

> Var{iku on Sū. (57). [P. 495, L. 20 to P. 496, L. 9.]

For the following reason also, there can be no denial of Vár: P. 496. Pleasure & & & & , --says the Sūtra. Inasmuch as when a man goes through his experiences and finds out that such and such a thing brings pleasure, and such others bring pain, he tries to acquire those that bring pleasure and to get rid of those that bring pain; and when he tries to obtain the thinge that bring pleasure, there come upon him several kinds of mental sufferings; and it is on account of the experiencing of these sufferings that all this is called 'Pain', -- and not because there is no such thing as 'Pleasure.' It is exactly this idea that has been expressed by the sage in the following /warse stypeoks.com

1552

' For the man who desires a desirable thing, as soon as that desire is fulfilled, another desire quickly besets him'; and so forth.

Sū!ra (58).

Bhāşya on Sū. (58).

[P. 217, L. 1 to L. 13.]

"we have the instruction that Pleasure should be regarded as Pain" [these words complete the sentence of the Sn[ra].

The ordinary man, addicted to pleasure, regards Pleasure as the highest end of man, and feels that there is nothing better than Pleasure; and hence when Pleasure has been attained, he feels happy and contented, feeling that all he had to attain had been attained; and under the influence of illusion, he becomes attached to the Pleasure, as also to the things that bring about its accomplishment; becoming so attached, he makes an attempt to obtain the pleasure ; and while he is trying for it, there come down upon him several kinds of Pain, in the form of birth, old age, disease, death, the contact of disagreeable things, separation from agreeable things, the non-fulfilment of desires and so forth; and yet all these several kinds of Pain he regards as 'Pleasure,' In fact Pain is a necessary factor in Pleasure ; without suffering some pain no pleasure can be obtained; hence as leading to Pleasure, this Pain is regarded by the man as Pleasure; and such a man, having his mind obssessed by this notion of 'Pleasure', never escapes from metempsychosis, which consists of a running series of births and deaths. And it is as an antidote of this notion of Pleasure that we have the teaching that all this should be looked upon as ' Pain.'

Birth has been called 'paig,' because of its being beset with 'pain', and not because there is no such thing as Pleasure.

Objection :-- "If that is so, then why is it not said simply (in Sū. 55) that 'Birth is Pain'? When this simple expression might have been used, the fact of the Sūţra having used the expression 'Birth is only pain' shows that the idea meant to be conveyed is that others is supported by the state of the support of the su Answer: ---What the emphatic term 'Zva' 'only,' implies is that what is laid down is conducive to the cessation of Birth. "How [does the particle serve the purpose of indicating the cessation of Birth]?" What it means is that Birth is pain, not by its own nature, but by reason of its being beset with Pain; and so with Pleasure also [which is 'Pain' because it is intermingled with Pain, and not because there is no such thing as *Pleasure*]. This is what is meant by the words of the Sātra (55), -- and not that in Birth there is only Pain (and no Pleasure at all).

Vārțika on Sū. (58).

[P. 496, L. 11 to P. 497, L. 3].

Also because there are & c. & c.—says the $S\bar{u}$ tra. When a person makes an effort to obtain Pleasure, and suffers pain in the process, he regards that Pain as Pleasure, by reuson of its forming an accessory to Pleasure; and thus he betakes himself to it again and again; so that he does not escape from the series of births and rebirths. And it is with a view to counteract this notion of 'Pleasure' that we have the teaching that 'all is Pain.' "If that is so, then, why is it not said simply that Birth is Pain? When this was all that should have been said, the fact that the S \bar{u} tra has used the words 'Birth is only Pain,' shows that the idea desired to be conveyed is that there is no Pleasure at all.'

Var: P. 497. What is really meant is that even though there is Pleasure in the intervals of Pain, such Pleasure also is only Pain,—because it is beset with Pain, and not because there is no such thing as Pleasure at all; and the emphasising particle '*Zva*,' 'only,' is meant to indicate the means of putting an end to Birth; what the emphasis indicates is the putting an end to Birth; the sense being that when one contemplates that 'all is Pain,' he does not betake himself to things that bring Pain; and not betaking himself to those, he becomes released.

Section (14).

[Sūtras 59-68.]

Examination of the Nature of Final Release.

Bhāşya on Sü. (59).

[P 217, L. 14 to P. 218, L 3.]

After 'Pain,' 'Release' [has been mentioned and defined]. This Release is thus denied (by the Opponent)---

Sū(ra (59).

Pürvapakşa.

"SINCE THERE IS CONCATENATION (a) OF DEBTS, (b) OF ABERRATIONS AND (c) OF ACTIVITY,—THERE CAN BE NO RELEASE."—(Sū. 59).

" (a) On account of the concutention of debts there can be no Release. The 'debts' are thus described (in the Shatapatho, Brahmana, 1-7-2-1) - When the Brahmana is born, he is born under three debts: from the debt owing to the Risis he becomes freed by leading the life of the Religious Student, from the debt owing to the Gods he is freed by the performance of sacrifices, and from the debt owing to the Fathers he is freed by begetting children; '-the 'concatenation of these debts consists in the connection (presence) of acts connected with the debts; that it is necessary throughout one's life to perform these acts (towards the clearing of the debts) is thus mentioned (in the Veda)-'The sacrifices known as the Agniholra and the Darshaparnamasa should go on till old age or death,-it is only by either old age or death that one becomes freed from the necessity of performing the said sacrifices '.- So that the concatenation of these debts persisting (till the man's old age or death), there is no time left for the performance of acts conducive to Release; hence it follows that there can be no Release."

"(b) On occount of the concatenation of Aberrations, there can be no Release. The man dies beset with aberrations [viz. Ignorance, Egoism, Affection, Hatred and Yearning for Life], and he is born beset with aberrations; and he is never found to be absolutely free from the concatenation of these aberrations [Frem which it follows that he can never be free from Births and Deaths; insythered can be stork com "(c) On account of the concatenation of Activity there can be no Release. From birth till death, man is never found to be absolutely free from the ^s operating of Speech, Mind and Body.' From this it follows that the assertion made (in Sū. 1-1-2) to the effect that—^s there is a cessation of each member of the following series — Pain, Birth, Activity, Defect and Wrong Notion,—the cessation of that which follows bringing the annihilation of that which precedes it, and this ultimately leads to Release,'—is not true."

Varlika on Sū. (59).

[P. 497, L. 4 to L. 11]

After the mention of 'Pain' comes 'Release;' and this is thus denied by the following Sūtra:—'Since there is conentenation §c., §c.' (a) Since there is concatenation of Debts there can be no Belease; 'concatenation' means the necessity of having to act up to them continuously; the man is never freed from this concatenation of Debts, from birth till death. (b) Since there is concatenation of Aberrations there can be no Itelease; the man is born beset with aberrations and he dies beset with aberrations. (c) Since there is concatenation of Activity there can be no Belease; since there is no time at which the man does not do some act or the other."

> Bhdeya on Sû. (60). [P. 218, l., 3 to P. 221, L. 8.] Sid**d**hān!a.

Sū{ra (60).

INASMUCH AS THE WOBD CANNOT BE TAKEN IN ITS PRIMARY SIGNIFICATION, THE STATEMENT MUST BE TAKEN AS A. DESCRIPTION BY MEANS OF A WORD USED IN ITS SECONDARY (FIGURATIVE) SIGNIFICATION; SPECIALLY AS IT IS ONLY THUS THAT THE SENSE OF CONDEMNATION AND COMMENDA-TION IS OBTAINED CALL STORY SIGNIFICATION AND COMMENDA-

The word 'rinaih,' (in the passage quoted from the Shafapatha Brāhmaņa) is not used in its primary sense of debt; the word ' debt ' can be used in its primary sense only in a case where one gives to another something that has to: be repaid and another receives such a thing; and this condition is not present in the case spoken of in the passage quoted; hence it follows that-inasmuch the word ' debis' cunnot be taken in its primary signification, the statement must be taken as a description by means of a word used in its secondary (figurative) signification; the sense being that what are described are 'like delts.' Such figurative descriptions are very common; e.g., when the 'young student' is described as 'Fire:' just as the word 'Fire' elsewhere used in one (the primary) sense, is applied to the young student in another (figurative) sense, -so in the case in question, the word 'debt,' elsewhere found used in the primary sense, is used in the passage quoted in a different sense. " But why should there be a description by means of a word in the figurative sense?" Because it is only thus that the sense of condemnation and commendation is obtained ;--- the meaning of the passage being that 'if a person fails to perform the acts referred to, he is condemned in the same manner as the debtor, not repaying his debts; and if he does perform the acts, he is commended in the same manner as the debtor, repaying his debts; 'this is what is meant by the figurative description of the acts as ' debts.'

The word 'jayamānah,' 'when he is born,' is also used figuratively ; as otherwise (if the word were taken in its literal sense), the man would not be entitled to the performance of the acts mentioned; what the phrase, ' when the Brähmana is born' means is 'when the Brahmana enters the state of the Householder,'-this is what is meant by the man ' being born;' (that such must be the sense is clear from the fact that) it is only when the Brahmana enters the state of the Householder that he becomes entitled to the performance of the act mentioned; on merely being born from his mother's womb (which is the primary meaning of 'being born') the Brahmana is not entitled to the performance of those acts; as a matter of fact, when the child is just born from his mother's womb he is not in a position to perform any acts; for only such persons are entitled to the performance of an act as (a) are oderizour frof haoguining of the kreshits following

from that act and (b) are capable of performing it. (a) That to be entitled to the performance of an act it is necessary to have the desire, for results calculated to follow from that act is shown by the fact that the injunctions of the acts always speak of the presence of such desire; e.g., in the injunction ' one desiring keaven should offer the Agnihotra libations;' and (b) that to be so entitled one must be capable of performing the act is shown by the fact that it is only a person who is capable of doing an act that can do it; since it is only a capable man that can do an act it follows that it is only a capable man that is entitled to the performance of that act; as a matter of fact, it is only the capable man, and none other, who actually undertakes the performance of an act. If the word 'born' were taken in its primary sense (of coming out of the mother's womb), then both these conditions would be absent in the child just born; at the time that the child is just born out of the mother's womb, there is not present in it either the desire for the results following from any act, or the capability to perform it. An assertion made in the Veda in no way differs from an assertion made in ordinary parlance,-both being the work (utterance) of intelligent persons; and in ordinary parlance no one, even the most foolish, would ever address, to the newborn child, such injunctions as 'Study the Veda,' ' perform sacrifices,' ' lead the life of the Religious Student,' and so forth: how then could a wise Sage, who says only what is true and faultless, and who is prompted to teach pupils, ever address such injunctions (to the new-born child)? No dancer ever dances before blind men; no singer sings to deaf persons. Then again, it is only the person who comprehends what is taught that can be the recipient of the teaching; i. e., he alone who comprehends what is taught, can have the teaching addressed to him; and certainly this condition is not present in the new-born infant. Further, Bhi. P. 219. the Brahmana-passage itself (quoted by the Parvapakein) speaks of acts that clearly indicate the state of the Householder; as a matter of fact, the action that the passage speaks of is such as requires the presence of the

wife, and as such is clearly indicative of the state of the Householder. From all this it follows that what is meant by the term 'born' is one who has entered the state of the Householder.

Further, the assertion (in the text quoted) in regard -to old age and death (being the limit of the performance of the Agnihotra &c.) can be explained on the basis of the assumption that the acts continue to be performed till the ceasing of the man's desire. That is till the man's desire for the results (accruing from the act) does not cease-does not come to end-he should continue to perform the act ;-it is in this sense that the assertion in regard to 'old age and death' would be applicable to the man, Further. what the passage - ' by old age is the man freed &c.'-means is that when the man reaches the last quarter of his life. he enters the state of the Renunciate and thus becomes freed from the obligation of performing the sacrificial act'; the term 'old age 'standing for the last quarter of man's life, when he enters, the state of the Renunciate ; it is in connection with the last quarter of man's life that Renunciation has been enjoined. If the term 'old age ' meant absolutely decrepit senility, then the assertion-'by old age is man freed &c.' would have no sense at all ;* it could not be taken to mean that 'when the man is disabled (by decrepitude), he becomes freed from the obligation &c.;' as for the man who is himself unable to perform a sacrificial act, the Veda permits external aid; e.g. (a) 'or the pupil might offer the libations, his services having been secured by the teaching of the Veda,' (6) ' or the milk offerer might offer the libations, his services having been secured by presents of wealth." Such being the case, the passage can either be taken as 'descriptive' of what has been enjoined in another text. or some other meaning (that of direct injunction of the acts for the new-born infant) may be arbitrarily assigned to it. And there can be no doubt that the most reasonable course is to take it as containing a 'description' of what has been enjoined elsewhere, + the most natural meaning of the passage being that 'when the Householder undertakes the perform-

[•]Because when the man has reached the state of senility, or bas died, he actually becomes freed from all obligations.

[†]The passage itself does not contain a single injunctive word. Even so there might have been some justification for regarding it as an injunction if we had found no other Vedic text containing the necessary injunction of the Agnibotra &c. As a matter of fact however, there are hundreds of such texts. There can therefore be no justification for assuming the passage in question to be injunctive. -T4/parya. Downloaded from https://www.holybooks.com

ance of the sacrificial acts, he is as much under compulsion as a debtor.' Then again, what form the direct objective of man's effort are the means of accomplishing the desired result, and not the result itself; and when the said means have been duly accomplished they lead to the accomplishment of the Result; so that what has been enjoined previously (in some other passage) is the *coming into existence* of the means leading to the Result; and the same is also spoken of subsequently (in passages occuring later than the passage in question); so that it must be the person connected with the said means that is referred to by the term 'jayamina,' ' being born. •

"But," says the Opponent, "there being no direct injunction (of Renunciation)—[the passage in question cannot be regarded as referring to the state of the Renunciate]."

This, however, is not right; as there is no direct injunction of the negation of it either [so that the fact cannot be urged one way or the other].

"The Brähmana-text directly enjoins the state of the Householder; if there were other states also [such as that of the Renunciate], the Brähmana would have directly enjoined these also; so that, inasmuch as there is no direct injunction of these other states, we conclude that there is no other state."

There is no force in this, we reply; as of the negation of such other states also there is no direct injunction; we find no such direct injunction of the negation of other states

•This anticipates the following argument of the Opponent—" The new-born infant may not have the capacity of *discerning the result*, and of knowing and attempting to obtain, the means leading to that result. But it certainly has the capacity of bringing upon itself the results of acts: if the child does an act, however unconsciously of its being the means of a particular result, the merit or demerit acgruing from that act will certainly accrue to the soul of the infant. So that there can be nothing incongruous in the acts being enjoined for the new-born child."

The sense of the reply is thus explained in the *Tatparys* :-- The direct objective of man's effort cannot be the *Result*; what the man tries to obtain, in the first instance, is the means that leads to that *Result*; and certainly the new-born shild can have no idea of what is the means leading to a Result. Hence no imjunction could have any effect upon it. For this reason the only right course is to take the word double of the Bandatter (semeshak/sepisined above:

as-'there are no other states, that of the Householder being the only one state; 'hence, inasmuch as we do not meet with any direct injunction of the negation (of the state of the Renunciate), the argument put forward can have no force Then again, the direct injunction (of the state of the at all. Householder) in the passage in question is based upon the fact that it is that particular state that forms the subjectmatter of the context; just as we find in the case of the In the case of the sciences it is found that various sciences. the fact that each science directly lays down certain things only is due to those things alone being connected with its own subject-matter, -and not to there being no other things at all; similarly the fact that the passage live down things connected with the state of the Householder only is due to this state forming its subject-matter, and not to there being no other states.

Then again, we find verses and prose-texts speaking of Final Release; as a matter of fact, we find several Rik verses and Brähmana-texts speaking of Final Release (along with the means of attaining it, and the four states, specially that of the Renunciate, fall under these) As instances of verses, we have the following :-- (a) ' The sages, blessed with children and desiring wealth, fell into death (and rebirth) by performing actions ; other sages, who were endowed with wisdom transcending beyond actions, attained immortality, ;--(b). 'neither by action, nor by progeny, nor by wealth,-but by renunciation, only-did they attain immortality; that immortality which shines beyond Heiven, hidden in the cave (beyond ordinary cognitions, which the renunciates alone enter)' (Talliriya Aranyaka, 10-10-3) ;- (o) ' I know that Great Person, effulgent like the Sun, lying beyond Illusion, by knowing Him alone does man transcend death, there is no other path for going beyond' (Vājasanēyi Samhijā, 31-18); and as prose-texts we have the following :-(a) 'there are three stages of Dharma-Sacrifices, Study, and Charity; the first of these constitutes Austerity; the second is the Religious Student residing in the house of the Teacher; and the third is the same person putting himself under severe penance while residing in the Teacher's house; all these lead man to pure regions: it is only one who is firm in & Brahman (i.e. the Renunciate) who reaches immortality' (Ohhāndogya Upanisad, 2-23-1);-(b) 'It is with a view to Bha. P. 221. Dattaindthingmanionwthat WRenunciates take to

renunciation' (Brihadārasyaka Upanisaā, 4-4-22); (o)' They say that man is made up of desires; as he desires so does he put forth efforts, and as he puts forth efforts so does he act; and as he acts so does he become, '-having in this way described the process of metempsychosis determined by the performance of acts, the texts go on to lay down the real teaching thus—'when the man with desires becomes free from desires, he becomes without desires, beyond desires, having all his desires fulfilled, his desires centred in the Self,—then his life-breaths do not go out, they become absorbed here and now, being Brahman he attains Brahman itself.' (Brihadāranyaka Upanisad, 4-4-5 and 6).

Thus then we find that the assertion that—" Since there is concatenation of debts, there can be no Release "—is not right. There is yet another text—' the four paths leading to the gods' (*Taiffiriyasamhifā*,5-7-23)—which speaks of the four states; and hence also it is not right to say that there is only one state (that of the Householder) laid down in the Veda [and that the state of the Renunciate is nowhere enjoined].

Vārțika on Sū. 60.

[P. 497, L. 11 to P. 500, L. 5]

Our answer to the argument—"because there is concatenation of Debts"—is as follows:—Inasmuch as the word &c. &c., —says the Sūfra. In the passage quoted the word 'debt' is not used in its primary sense; as in the matter spoken of there is no receiving and repaying of something to be given back; it is only in a case where one person gives something that he expects to be paid back, and another person receives such a thing,—that the word 'debt' is applicable in its primary sense; in all other cases it is used in a figurative sense. It is for this reason that the passage should be taken as a

Var: P. 498. Var: P. 498. going student is 'fire'; the word 'Fire' primarily applies to

that particular form of Light which is capable of burning things; and being primarily applicable to such Light, it comes to be applied to the young hop the basis of a certain similarity between the boy and the said light; and the boy comes to be spoken of as 'fire'; in this expression the term 'fire,' being in apposition to the term 'boy,' does not express the idea that the boy is capable of burning things; all that it means is that the boy is endowed with the properties of tawny colour, vigour and so forth, which are found in Fire also; and since the word is applied to the Boy on the basis of the presence of the said qualities (gunas), such usage is regarded as 'figurative' (based upon gunas). Exactly the same is the case with the word 'debt' in the passage quoted. In fact the statement "man is born in debt " is a figurative one; the figure involved being 'simile' with some of its factors eliminated: "What is the exact signification of the simile? "It connotes absence of freedom, the sense being -just as the debtor is under compulsion, so the man, when born, undertakes the performance of acts under compulsion."

The term 'jāyamānah,' when born,' also is a figurative one; it cannot be taken in its primary sense: at the time that the child has just come out of the mother's womb (this being the primary meaning of ' being born'), it is a mere lump of blood, hands, feet and mouth ; and in this condition it is impossible for it to perform the acts of study and the rest. Hence what the term means is 'on becoming a householder.' "But what is the similarity between the Householder and the new-born child (on the basis of which similarity we could have the figurative expression)?" The similarity consists in connection with action; it is on account of the Householder becoming connected with the actions of Agnihotra and the rest that he is said to be 'born'; just as the new-born child, coming out of the mother's womb, becomes connected with the body (and its functions), in the same manner the Householder, becoming connected with the Agnihotra and other actions,-and thus bearing similarity to the child,comes to be spokenacef fresh heingwhorn, books But why (should

we have recourse to this explanation)?" For the simple reason that it is only one capable of doing an act, and desirous of obtaining the results accruing from the act, that is entitled to the performance of that act; the only man that can undertake the performance of an act is one who is capable of doing it, and who is desirous of obtaining its results. The child just born out of the mother's womb has neither the capability to do the acts mentioned, nor has he the desire for their results; while both these conditions are present in the Householder. Hence it follows that in the passage under consideration it is the Householder that is spoken of as 'being born.'

Further, says the Bhlsya, the assertion in regard to 'old Vir: P. 499. age and death 'can be explained on the basis of the assumption that the acts continue to be performed

till the ceasing of the man's desire. The injunction in the passage, in regard to the Brahmana performing the acts till 'old age' is capable of another explanation : What the mention of 'old age and death ' means is that the acts are to be performed till the man's desire for their results ceases ; that is, when there is cessation of his desire, -when his desire has ceased—then alone he should give up the Aynihotra. The term 'old age' stands for the last quarter of the man's life; if it meant that the act should be performed as long as the man lives, then there would be no sense in the statement that 'the man becomes freed from old sge &c. &c.,' specially as for the man who is himself unable to perform the act, the bringing in of external aid has been permitted; which means that so long as the man does have desire for the results following from the acts, he may have the offerings made through enother person; and when there is no desire, there is Renuncistion. "But on what ground is it said that the Agnihotra offerings are to be made only so long ab the man has desires

for its results?" It is done on the ground that in connection with the injunction of actions the Veda always mentions the *presence of desire*; in the case of every action we find the presence of desire mentioned in connection with its injunction; e.g. one *desiring heaven* should perform &c. &c.'

Further, the person to whom a teaching is addressed must be one who comprehends the teaching; it is only the person that understands a teaching to whom the teaching is imparted; no singer sings to a deaf audience; and no dancer dances before blind men; and since the new-born child cannot comprehend a teaching, no teaching can be addressed to it.

The Vedic utterance does not differ from ordinary utterances. No ordinary man, however foolish he may be, could ever address to the new-born child such words as 'study,' 'perform sacrifices,' 'lead the life of the Religious Student;' how then could a sage, who always says what is true and faultless, address such injunctions (to the new-born child)?

Such being the case, the passage can either be taken as a 'description' of what has been enjoined in another text, or some other meaning may be arbitrarily assigned to it; and there can be no doubt that the most reasonable course is to take it as containing a 'description' of what has been enjoined elsewhere (Bhāsya). If the passage were taken to mean something that is contrary to all evidence, this could be done only arbitrarily; the assumption of all meaning contrary to reason is possible only in a whimsical fashion; and this would exactly be the case if the passage were taken to Var: P. 500. mean that ' the new-born child is beset with debts.' On the other hand, if a passage is taken to mean something that is in accordance with evidence, it is taken as a 'description;' and we have an instance of this where we take the term 'being born' as meaning 'when the man enters the

state of the Hunseholden http: But who woods you know that it

is the Househol ler that is specifically meant?'' For the simple reason that that is the state conducive to the performance of sacrifices; our reason lies in the fact that the performer of the sacrifice is a part and parcel of the sacrifice. Further, the effort of the actor is always turned directly to the means of accomplishing the act, and not to its Result; for instance, the cook directs his efforts directly to the collection of fuel, which is the means of accomplishing the act of cooking,—and not to the Cooking itself, nor to the getting together of clods of earth and such other things as are not[®] conducive to the fulfilment of the act of Cooking.

The rest is clear in the Bhaşya.

Question.—"How do you know that the passage in question is meant for the person who has the desire for results accruing from the acts?"

Answer. — The direct injunction in the passage is based upon the fact that it is that particular state (of man) that forms the subject-matter of the context; just as we find in the case of the various sciences.

> Bhāşya on Sū. (61). [P. 221, L. 8 to L. 17]

As a matter of fact, the passage speaking of 'the Agnihofra and the *Darshapürņamāsa* sacrifice continuing till old age and death' must refer to the man that desires the results (following from that act). "Why?"

Sūįra (61).

INASMUCH AS THERE IS THANSPORTATION (OF THE FIRES) INTO THE SOUL, THE DENIAL (OF RELEASE) CANNOT BE BIGHT. (SQ. 61.)

It is laid down in the Veda that—' Having offered the **Prajapatya** sacrifice, having offered the libation of all his belongings, and having transported the Fires into his Soul,

[&]quot;The sense demagdhibe conding thttp diministry any by ks.com

the Brāhmaņa should go out as a Renunciate ';—and from this we learn that the 'transportation of the Fires' (which means the end of the Agnihofra) is only for the man who has risen above all desires for children, wealth and fame, and when his desire for the results (of the Agnihofra) also have entirely ceased. To this same end we have the following Brāhmana-passage (Brihadārāngaka, 4.5):—'Yājñavalkya, when going to undertake another austerity, said to Maitrēyi as follows: Oh, dear one, I am going to wander away from this place, I shall therefore make up an understanding between you and Kātyāyanī; you have already had your instructions, O Muifreyi.! Immortality extends only so far;—having said this Yājñavalkya went away a renunciate'.

Varțika on Sū. (61).

[P. 509, Ll. 9-10.]

Inasmuch as etc., etc.—says the $S\bar{v}/ra$. Inasmuch as the transportation of the Fires is laid down as to be done only after the desires have ceased [it follows that the passage speaking of Agnihofra etc. refers only to such men as have a desire for the results accruing from those acts].

Sūļra (62).

INASMUCH AS THE COLLECTING OF SACRIFICIAL VESSELS' COULD NOT BE POSSIBLE IN THEIR CASE, THE RESULTS MENTIONED' CANNOT PERTAIN TO OTHERS (THAN HOUSE-HOLDERS).

(Sū. 62).

Bhāşya on Sū. (62).

[P. 221, L. 19 to P. 222, L. 13.]

If the performance of the acts till 'old age and Bhi. P. 222. death' were taken as referring to all men (Householders as well as Renunciates), then the after-death rites ending with the 'collecting of the sacrificial vessels' would also have to be performed for all men; and in that case there would be no point in the describing of the 'rising above desires,' which we meet with in such passages as the following—'The ancient Brāhmaņas, great teachers and learned, do not desire offspring, their idea being from hats: shall how code constitute offspring, we for whom the Self is the whole world ?—it is these Brahmanas that, having risen above desire for sons, desire for wealth and desire for fame, live upon alms.' Brihadaranyaka--Upaninad, 3.5.1). Because for one who has 'risen above desires ' (including also the desire for results accruing from the Agnihotru etc.,), there can be no possibility of those rites that end with the 'collecting of sacrificial vessels.' Specially because Results do not supply sufficient motive to all men to the same extent.

Further, since we find four stages of life laid down in the Ifihasas, the Puranes and the Dharmashastra scriptures, it is not right to hold (as the Pürvapaksin does) that there is only one state (that of the Householder). It will not be right to regard the said scriptures as having no authority; for the authoritative character of these is vouched for by authoritative texts: as a matter of fact, the authoritative character of Itihasas and Paranes is vouched for by Brahmana-texts, which are entirely authoritative : e.g., 'The Atharvon nirasas declared the Itihasas and Puranas; and these Itihasas and Puranas constitute the fifth of the Vedas.' (Ohhandogya Upanis d 3.4.2). For these reasons it is not right to say that the said Illhasis and Puranas are not authoritative. As regards the Dharmashastra scriptures, if these had no authority, there would be an end to all business among living beings, which would put the whole world into confusion. Secondly, inasmuch as the 'seers' and 'speakers' are the same, there is no reason why these scriptures should not be authoritative; as a matter of fact, the 'seers' and 'speakers' of the Ilihatan, Puranas and Dharmashastra scriptures are the same as those of the Mantra and Brahmana texts (of the Veda). Thirdly, inasmuch as there is a (restriction in regard to their subject-matter (the said scriptures must be authoritative); as a matter of fact, the authority of each scripture bears upon its own special subject-matter; and the subject-matter of the Mantra and Brahmana texts is different from that of the Ifihāsas, the Puranas and the Dharmushusfra scriptures; e.g., 'sacrificial performance' forms the subjectmatter of the Manfra and Brahmana texts, the 'duings of of men' that of Ilihashus and Puranus, and the 'regulation of men's business' that of the Dharmashastra scriptures. 80 that, since no single one of these control all the said subjects, everyDonelofithem must/bennegardedcas authoritative

in regard its own special subject; just as every one of the sense-organs is an authoritative means of the cognition of its own special object of perception.

Vartika on Sü. (#2). [P. 500, L. 12-15.]

Insemuch as the collecting, &c., &c.—says the Satra; that is so say, it is not possible for the rites ending with the 'collecting of the sacrificial vessels' to be performed for those who, upon the cessation of all desires, have become renunciates. If the passage (quoted by the *Purvapakein*) applied to all men without distinction, the rites ending with the 'collecting of sacrificial vessels' would have to be performed for all men.

The rest is clear in the Bhaeya.

Bhaşya on Sü. (18).

[P. 222, L. 13 to L. 18]

As regards the second argument propounded by the *Pūrvapakşin* (in Sū. 59) viz: "since there is no cessation of concatenation of the aberrations (there can be no Release)," —our answer is as follows:—

Sūfra (63).

RELEASE IS POSSIBLE; INASMUCH AS (WE FIND THAT) THERE ARE NO ABBERATIONS IN THE CASE OF THE MAN IN DEEP SLEEP, WHO DEBAMS NO DEBAMS. (SU. 63.)

As a matter of fact, we find that when a man is in deep sleep and dreams no dreams, there is an end (for the time being) of all connection with attachment, as also of all connection with pleasure and pain. Exactly in the same way there could be an end of all these at Release also. In fact people who have realised the real nature of Brahman actually describe the condition of the 'released' Soul as similar to that of deep sleep.[•]

[•] The only difference being that while during deep sleep, the tendency of aberrations is present—[by virtue of which the man becomes beset with them on waking]—at Release there is no such tendency left; [so that there is no chance of the Released manDesing) raibes to mith physical productions by the second

Varlika on Sū. (63).

[P. 500, L. 15 to P. 501, L. 1.]

Our answer to the argument, based upon the fact that there is no cessation of the series of aberrations, is as follows:—*Release is possible etc. etc.*—says the *Süfra*. Just as in the case of the man in deep sleep, dreaming no dreams, there is an end of the 'concatenation of aberrations, ' as also of all connection with things bringing about pleasure or pain,—exactly in the same manner there would be an end Vār. P. 501. of these for the *released* man. In fact people have described the condition of 'deep sleep' as that of the *yogin* who has attained Release.

Bhāşya on Sū. (64).

[P. 222, 18 to P. 223, L. 2.]

As regards the third argument—viz., "because there is concatenation of Activity,"—our answer is as follows :— Sūtra (64).

FOB THE MAN, WHOSE ABEEBATIONS HAVE BEEN DESTROY-ED, ACTIVITY DOES NOT LEAD TO BECBUDESCENCE. (Sü. 64).

When Love, Hatred and Ignorance (which are the aberrations) have been destroyed, *Activity does not lead to recrudescence* ;—' Recrudescence' stands for re-birth at the end of the previous birth; and since this rebirth is always brought about by Desire,—when all Desire has been destroyed, • there is no further birth after the previous one has come to an end; and this is what is meant by 'non-recrudescence'; and this is *Release*. "But this would mean that actions are fruitless."

Certainly not; for our doctrine does not deny the experiencing of the fruition of one's acts. All that we say is that the previous birth having come to an end, there is no further birth, and we do not say that there is no experiencing of the fruits of one's acts; (our view being that) the fruition of all one's acts comes about in the last birth (preceding Release) [so that there is no fruition left to be experienced].

[•]The reading automatical does not fit in with acting. In the Variate we find the expression an granmitan; so that we prefer to read the Bhaya also as are granmitan; subto the second description of the

Vārļika on Sū. (64).

[P. 501, L. 1 to L. 10.]

In answer to the argument, " because there is concatenation of Activity,"-the Sütra says :-- for the man whose aberrations etc. etc. If the aberrations are not there, Activity, even though present, is not conducive to recrudescence; which means that it does not become the cause of (it does not bring about) Merit or Demerit. ' Recrudescence' means rebirth after the end of the previous birth; and this is brought about by Desire; as has been explained under Su. 3-1-25, where it has been shown that 'there is no birth for one who is free from attachments.' It might be urged that "this would mean that actions are fruitless;" but it is not so; because the experiencing of the fruition of actions is not denied; we do not say that the man is released, while the Actions are still there (whose fruits have not been experienced) ; what we mean is that during the last birth of the man all his 'actions are exhausted by fruition.'

Sū[ra (65).

[Objection]—" WHAT HAS BEEN JUST ALLEGED IS NOT POSSIBLE; AS THE CONCATENATION OF ABERBATIONS IS INNATE (IN MAN)." (Sū. 65).

Bhāşya on Sū. (65).

[Says the *Parvapaksin*]—"(lessation of the concatenation of aberrations is not possible;—why?—*because the concatenation of aberrations is innate in man*; as a matter of fact, the concatenation of aberrations is without beginning; and what is beginningless can never be destroyed."

> (Varțika on (Sū. 65). [P. 501, Ll. 12-14.]

"What has been alleged fc. fc. Cessation of the contenation of aberrations is not possible ;---why ?--because the concatenation Ofvaberrations is invale involutions a matter of fact, the concatenation of aberrations is without beginning, having been set up naturally by itself; and as such it can never be got rid of.

Bhāsya on Sū. (66).

[P. 228, L. 5, L. 9.]

To the above objection some people (Ekadēshi—Logicians) make the following reply:

Süfra (66).

(A) 'JUST AS THERE IS EVANESENCE OF THE NEGATION OF THINGS PRIOR TO THERE COMING INTO EXISTENCE, - SO THERE CAN BE RVANESCENCE OF INNATE THINGS ALSO.' (SU. 66.)

Vārțika on Sū. (66).

[P. 501, L. 14 to P. 502, L. 2.]

Some people offer the following answer to the objection urged in Sū. 65:-Just as there is evenescence &c. &c. Just as before a thing has been produced, its negation is beginning-

Var. P. 502. less, and is yet set aside by the existence of that thing,—in the same manner the ' concaten-

ation of aberrations' in the man who has not acquired the right knowledge of things, is beginningless, yet it can be destroyed by his right knowledge (whenever this is acquired).'

Sūfra (67).

(B) 'OR IT MAY BE LIKE THE EVANESCENCE OF THE DAEK COLOUB OF THE ATOM.' Sū. (67).

Bhāşya on Sū. (67).

[P. 223, Ll. 11-12.]

Others again offer the following answer to the objection (urged in Su. 65)horded from https://www.holybooks.com

1572

'The dark colour of the Atom (of Earth) is beginningless, and yet it is destroyed by contact with fire; similarly the concatenation of aberrations, [though beginningless, could be destroyed].'

Vārțika on Sū. (67).

[P. 502, Ll. 45.]

• 'It may be etc. etc. Just as the dark colour of the Atom is beginningless, and yet evanescent,—so also would be the concatenation of aberrations.'

Bhāşya on Sū. (68).

[P. 223, L. 12 to P. 224, L. 6.]

(A) As a matter of fact, 'eternality' and 'evanescence' are properties of existent things; so they can be predicated directly of positive entities only; to negative entities they can be attributed only indirectly (or figuratively). [So that it is not right to cite the case of the *negation of things*, as the *Ekadëshin* has done in Sū. 65]. (B) Then, as regards the 'dark colour of the Atom' (cited by the second *Ekadëshin* in Sū. 65), there is nothing to prove that it is without beginning," and hence it is not right to put that forward as an instance. Nor is there anything to prove that a thing not liable to production is evanescent.

The real answer to the argument of the $P\bar{u}$ computation (put forward in Sū. 65) is as follows:—

Sūfra (68).

WHAT HAS BEEN ALLEGED BY THE OPPONENT CANNOT BE BIGHT; ALSO BECAUSE (A) DESIRE AND THE REST HAVE THEIR SOURCE IN MIS APPREHENSION. 1 (SU 68).

• On the other hand, we have the following argument to prove that the dark colour of the Atom is not without beginning :— 'The dark colour of the Atom is a product, because it is a Colour of the Earth, just/like its red colour.'—Tāļpary«.

† On the exact meaning of the term 'saikalpa' in the present context, the **T**dfparya says:—Though it is the wish for a cognised thing that is generally called 'saikalpa,' yet here we have to take it as refering to the cognition that is the precursor of the wish; hence it should be taken here as standing for wrong cognition, misapprehension. Downloaded from https://www.holybooks.com

The particle 'cha,' 'also,' has a cumulative force, including the following two reasons also-(b) because Desire and the rest are due to action, and (c) because Desire and the rest are due to one another.

(a) As a matter of fact, Desire, Hatred and illusion proceed from such wrong cognitions as (respectively) the actual delighters, annoyers and deluders of men. (b) Action also is what brings about the bodies of living beings, and gives rise to Desire, Hatred and Illusion, within well-defined limits; that it is so we gather from the fact that there is a limitation in regard to these; e.g., a certain animal-body is found to abound in Desire, while another abounds in Illusion. (c) Lastly, the appearance of Desire &c. is due to one another; that is, it is the man under illusion who desires things; it is the man under illusion who is moved by hatred; the man under the influence of desire falls into illusion.

All misapprehensions cease to appear as soon as True Knowledge appears; and inasmuch as on the cessation of the cause, the effect cannot appear, there is absolute non-appearance of Desire &c. (on the disappearance of Misapprehensions, which are the source of Desire &c.).

Further, the assertion that "the concatenation of aberrations is beginningless" has no point at all. As all things related to the Soul, --e.y., the Body, the Sense-organs &c. &c. -are such as proceed in a beginningless series, and there is not a single individual of this series that is produced without another individual having gone before it; with the sole exception of True Knowledge (which is produced once and once only for a Soul); but our doctrine (that Desire &c. are destroyed) does not imply the assumption that 'things not liable to be produced are liable to destruction' (as the individual Desire &c. whose destruction we postulate are not without beginning; the beginninglessness of the series does not imply the beginninglessness of each individual constituting the series ; e.g., one series of Bodies for each Soul is beginningless, yet each individual Body has a beginning.] As soon as misapprehensions have been destroyed by True Knowledge, 'Action decales, htw high wish what brings about the

Body of each living body, ceases to be productive of Desire &c., though it continues to bring about the experiencing of pleasure and pain.

Vārțika on Sū. (68).

[P. 502, L. 5 to P. 503, L. 12.]

As a matter of fact, Eternality and Evanescence are properties of existent things, as we have pointed out in course of our consideration of the exact nature of 'Eternality' and 'Evanescence;' they can, therefore, be predicated of negative entities only indirectly. "What is the basis of this indirect or secondary application ?" It is this : the 'eternal' thing is without cause, and without cause also is the prior negation of things; and again the 'evanescent ' thing is that which, having come into existence, ceases to exist; this is exactly what the prior negation of things does ;- so there are these two similarities (between Prior Negation and Eternal things, and between Prior Negation and Evanescent things; and it is on the basis of these similarities that 'Eternality' and 'Evanescence' may be attributed to Prior Negation].* As regards the assertion that the dark colour of the Atom is beginningless,---this is not right; as there is nothing to prove that it is so; nor is there anything to prove that things not liable to production are evanescent.

The real answer therefore to the $P\bar{u}rvapaksa$ argument is that—What has been alleged &c. &c.—says the $S\bar{u}tra$. The particle cha has the cumulative force, including the following two arguments also—because Desire &c. are due to Action, and because Desire &c. are due to one another. 'Sankalpa' is the wish that one has for the things he has cognised, as has been already explained before. The meaning is that

Desire and the rest are produced from misapprehensions, which are the delighters, annoyers and deluders of men. Action also, which brings about the Body of living beings, produces Desire &c. through the said misapprebensions; some living beings are found to abound in desire; e.g., Pigeons &c; others abound in hatred (anger), as Snakes; others again abound in illusion, as the Python.

"If Action brings about Desire &c., these should always be there; so that there could be no Release."

Not so; because the necessary causal conditions would be wanting. Action brings about Desire &c. only through misapprehension; and never independently by itself.

"In that case, on the same grounds, Pleasure &c. could not have Action for their cause."

Not so; because as regards these it is independent. In the bringing about of Pleasure &c. Action does not stand in need of misapprehension; it brings them about only by the aid of their own specific causes. This case is analogous to the following: The action of *Throwing Upwards* produces the Faculty (Momentum) through *impulsion*, while it brings about conjunction and disjunction independently by itself.

The fact of Desire &c. being due to one another is perceived in ordinary experience; eg., the man under the influence of Love falls into Illusion;—under love's influence he comes to harbour hatred,—under the influence of Hatred he falls into Illusion; and falls into love,—and the man under Illusion is a victim to Hatred and Love.

Lastly, as regards the assertion that "the concatenation of aberrations is beginningless,"—this can have no point; as this case does not differ from others: Just as the concatenation of aberrations is beginningless, so also are all things related to the Soul; all which proceed in beginningless series; and there is nothing that is produced with our canothor like it having gone before. But with all this our doctrine does not involve the assumption that things not liable to production are liable to destruction.[•] True Knowledge is the only thing which, having no like precusor, is produced alone by itself; no other thing connected with the Soul is so produced.

End of Section (14),

End of I Daily Lesson of Adhyāya JV.

Aphyaya IV.

Daily Lesson II.

Section (1.)

[Süfras 1-3.]

Dealing with the Appearance of True Knowledge.

Bhāşya on Sū. (1).

[P. 224, L. 8 to P. 225, L. 20.]

† Question—" Now, Sir, does True Knowledge appear in connection with each one of the several things that there are? Or only in connection with some of them?—What difference does that make?—Well, as a matter of fact, it would not be possible for it to appear in connection with each of the things; for the simple reason that the number of things to be known is endless. Nor again could the True Knowledge be held to appear only in connection with some of the things; for in connection with those few things with reference to which True Knowledge would not appear, the man's Illusion would not cease; so that there would still be a residue of Illusion left behind; nor could the

• The passage **म किञ्चिरनुत्पत्तिवर्मकं प्रतिवायते** gives no sense. The right reading is **म किञ्चिरनुत्पत्तिवर्मकं व्ययपर्मकं प्रतिवायते** In the footnote we find a mis-reading of **व्ययप**र्मक'

+ The Tapparya introduces this Daily Lesson thus: Doubt, Instruments of and Objects of Cognition have been only examined ; -- Motive and the rest also have been examined by implication of the states of the sixteen cate. Illusion in regard to one thing be removed by True Knowledge in regard to another thing."

Answer-'Illusion' consists in wrong notion, misapprehension, - not in mere absence of True Knowledge; and what is to be sought after is the True Knowledge of that thing the wrong notion of which becomes the active seed of metempsychosis.*

Question : - What is that wrong notion [which leads to metempsychosis]?"

Answer:—The notion of what is not-Soul as 'Soul, '--appearing in such forms as 'I am'; this is the notion of 'I' (Egoism, Ahankāra', Illusion'; † When one looks upon the

gories have been examined. It has been declared in Su. 1-11 that the 'true knowledge' of these categories is the means of attaining the highest good; it has also been explained that it is the 'true knowledge' or cognition of objects that leads directly to the attainment of the highest good; that of the others helps only indirectly. What we proceed to examine now is whether from among the Soul and the other objects of cognition, is it the true knowledge of only a few, or that of all, that brings about the highest good.

On this the Parishuddhi—In the first Daily Lesson of this Adhyāya, six objects of cognition have been examined; and we now proceed to examine 'True Knowledge,' which pertains to them. The questions for determination are --(a) what is True Knowledge? (b) To what things does it pertain? (c) How is it maintained? (d) How does it improve? First of all we proceed to consider --to what does True Knowledge pertain and how does it appear?

The Nydyanibandhaprakdsha raises the objection, (i) that it is not right to proceed with the examination of 'True Knowledge' before having defined it; and (ii) that there is no sameness of subject-matter between the two Daily Lessons, and hence there is no reason why they should form part of the same Adhydya. The answers provided by it are as follows :---(i) the definition of 'True Knowledge' has been provided, by implication, in Safra 1-1-2; and (ii) the real subject of the Adhydya is the Examination of 'objects of cognition ' in the form of 'Effects;' and 'True Knowledge' also is an effect.

* It is the Soul and such things connected with the Soul, which, when wrongly known, lead to birth and death; hence it is the wrong notion of these things that has to be got rid of, as it is the True Knowledge of these that leads to the cessation of metempsychosis. The different views are -(1) True Knowledge consists of realisation of Brahman, says the Vedantin; (2) according to the Sänkhya it consists in discrimination between Matter and Spirit; (3) the Nyāya view is that it consists in the recognising of the Soul as eternal, as distinguished from the non-sternal things, Body, Sense-organs die. &c.

†The Taiparya, after having oriticised the other views, sums up the Nyaya view thus :- It is became after that him birs!/.constitution bir agenting as Soul, the Body not-Soul as 'I am,' this is the conception that is called the notion of I' (Egoism, *Ahankāra*).

Question :--- "What are those things in regard to which people have the notion of 'I'?"

Answer:-They are-the Body, the Sense-organs, the Mind, Feelings and Cognitions.

Question:—"In what way does the notion of '1' in regard to these become the seed of metempsychosis?"

Answer: -- When a man looks upon the Body &c. as ' this is I, 'he regards their destruction as his own destruction; so that he becomes imbued with a longing for the non-destruction of those, and thus becomes equipped with them over and over again; and thus becoming equipped with them, all his efforts tend to bring for him births and deaths; so that not being freed from these, he is never released. On the other hand, the man who looks upon Pain, Receptacle of Pain (Body), and Pleasure intermingled with Pain, -- on all these, things as 'Pain,'- he is the man who knows the real nature of 'Pain'; and when this 'Pain' has been duly recognized (in its true nature), it is not embraced by the man (as something desirable), and so comes to be dropped; just like poisoned food, This man comes to look upon 'Defects' and 'Action' also as sources of pain; and until the Defects have been removed, there is no possibility of cessation of the continuity of Pains ; hence the man renounces the 'defects'; and when the 'defects ' have been renounced, Activity does not lead to 'Rebirth,'-as has already being explained (' under Sū. 4-1-64),

Thus the man comes to the conclusion that Rebirth, 'Fruition,' and 'Pain' are things to be known, and that 'Action' and 'Defects' are things to be abandoned, 'Final Release ' is a thing to be attained, and True Knowledge is the means of attaining it. Thus when the man attends to, repeatedly looks upon and ponders over, the 'objects of cognition' as grouped under the aforesaid four categories,

de, which are not-Soul, that people have such hopes as 'may I not cease to be, may I continue to live. 'Such ideas come to only such men as regard the Body de. as their 'Soul', and never to one who knows the real character of the Soul, as different from Body de. This latter man looks upon his Body as the snake does upon its cast-off slough; and so does not feel artached to it, and does not fear separation from its cast-off model. [(1) things mistaken as 'Soul,' vis. Body etc; (2) things to be known, viz. 'Rebirth' &c.; (3) things to be renounced, vis: Defects and Action; and (4) things to be attained, viz: 'Release']—there comes to him right perception,—i. e. the cognition of things in their real character, i.e. True Knowledge.

It is with a view to the above that we have the following Satra:

Sūfra (1).

The 'objects of cognition ' beginning from 'Body' and ending with 'Pain' [i. e. Body, Sense-organs, Objects of Perception, Apprehension, Mind, Activity, Defects, Rebirth, Fruition and Pain] are called the 'cause of Defects,' because these are what form the subjects of wrong notions;—hence when the 'True Knowledge ' of these comes about, it sets aside the notion of 'I' in regard to them; for the True Knowledge of the said things (which are not the Soul, which alone can be rightly spoken of as 'I') is incompatible with the notion of 'I' in regard to those same things. Thus when True Knowledge has been attained, 'there is a cessation of each member of the following series—Pain, Birth, Activity, Defect and Wrong Notion,—the cessation of that which follows bringing about the annihilation of that which precedes it; and this ultimately leads to Final Release.' (Sū. 1-1-2.)

Thus we find that this brief statement of the main doctrine of philosophy is only a re-assertion (of what has been stated already under Sū. 1-1-2), and it is not meant to put forward any new doctrine.

Vārțika on Sū, (1).

[P. 504, L. 1 to P. 505, L. 9.]

Question—"When True Knowledge appears, does it appear in connection with each and every thing, or only in regard to certain particular things? In regard to each and every thing it is not possible for True Knowledge to appear:—why? —because the number of things to be known is endless. On the other hand, the person, who holds that only certain particular things/form-the-objects/of formeo/Kaowledge, should be met with the following detailed argument: It is clear that the Siddhantin means to exclude things other than the Soul and the other 'objects of cognition'; that is, the Sūtra (1-1-9), which speaks of the Soul and other things, does not mention all things; if it did so, then the specific mention of the 'Soul' &c., would be meaningless; it is clear therefore that it speaks of only a few particular 'objects of cognition', —just those in regard to which True Knowledge puts an end to metempsychosis, and in regard to which Illusion leads to the continuation of metempsychosis; it is just these few 'objects of cognition ' that have got to be known. Such being the position of the Siddhantin, the following question arises in connection with it :—

"Does True Knowledge appear in connection with each and every one of the several things, or only in connection with some of them? It could not appear in connection with each and every thing; as the number of 'Soul' and other things is endless.- "What is the meaning of these being endless ?" -The meaning is that in regard to the number of these things we are not cognisant of any limit If, on the other hand, it be held that 'True Knowledge appears only in connection with a few things,-then there would be no end of the Illusion pertaining to those other things in connection with which True Knowledge has not appeared; and where there is Illusion, there are Attachment and Hatred; and these latter constitute Bondage; so that under this theory there would be no possibility of Release. If you hold that-' the true knowledge of one thing will remove the Illusion in regard to another,-then in that case Release would be possible for each and every living being; for there is no such living being as does not know the truth in re-Vår : P. 505.

gard to a single thing."

Our answer to the above is as follows: There is no force in the above; asvit shews that the Opponent has not understood the real meaning of Illusion: 'Illusion' does not consist in the mere non-appearance (absence) of True Knowledge; Illusion is wrong notion; hence what is meant is that it is necessary to know the true nature of those things the wrong notion of which becomes the source of metempsychosis.

Question :-- "What is that wrong notion?"

Answer:-The notion of 'Soul' in regard to what is not-Soul. The rest is clear in the Bhāşya.

From the true knowledge etc., etc.—says the $S\bar{u}$ /ra, The Objects of Cognition—from 'Body' down to 'Pain'—are the 'cause of Defects;' as it is only in regard to these that there is wrong notion; and when True Knowledge appears in regard to these, it removes the notion of 'I' in reference to them; as 'true knowledge' of them is not compatible with the notion of 'I' in regard to them. All this has been explained under Sū. 1-1-2.

Bhāşya on Sū. (2).

[P.232, L. 20 to P. 226, L. 4.]

The order in which the true knowledge is to be attained is as follows.

Sū[ra (2).

COLOUB AND OTHER OBJECTS, WHEN THEY FORM THE SUBJECTS OF WRONG NOTION, BECOME THE CAUSE OF DEFECTS. (SU. 2).†

Such objects of Sense-perception as form the objects of desire are spoken of here as 'Colour and other objects;' when these are wrongly conceived, they set going Attachment Hatred and Illusion. Hence it is these objects that the man

* Puri Ms. B. reads stiwujujuju, which gives better sense.

'It has been declared that one should set aside the notion of '1' in regard to the Body etc., which are not-Soul. Now the Säşra proceeds to describe with which of these latter the process should begin ; and since the process is much easier in regard to external objects, the Säşra begins with these. 'Prasankkydna' means true knowledge resulting from contemplation. - Tá iparya.

+ ' Sanhalpa is explained by the Taiparya as meaning ', wrong notion .' Vishvanāšha specifies it fürtum andra inottobithat//www.haybooksandudesirahle things'.

1582

should seek to know (and understand in their true character) first of all. When the man knows the true character of these, his wrong notions in regard to Colour etc. disappear. When these have disappeared, then he should seek to know the things related to the Soul, such as the Body and the rest. When the knowledge of these has been attained, the notion of 'I' in regard to things related to the Soul ceases forthwith. Thus, the man, acting with his mind wholly unattached, either to external objects or , to objects related to the Soul, comes to be called 'released'.

Vārļika on Sū. (2).

[P. 505, L. 11 to P. 506, L. 5.]

Colour and other objects etc., eic.—says the Sütra. The objects of desire, which form the objects of sense-perception, are what are spoken of here as 'Colour and other objects.' When these objects are conceived of wrongly, they set up Attachment etc. "What is the wrong conception of these ?" It consists in their being looked upon as the exclusive possession of one's self-expressed in such words as 'these are mine only.' These should be looked upon as 'common' to others, belonging, in common, to such others as gods, thieves. fire and relatives. When the man looks upon things in this manner, his Illusion in regard to them ceases. After this has geased, the man should seek to rightly know the Body and such other things as are related to the Soul. "What would be the right knowledge of the Body etc?" It would be the knowledge that these are not the Soul, they are something totally different from the Soul. The man, who proceeds with his mind thus dissociated Vár : P. 506. from things external as well as those related to the Soul, comes to be spoken of as 'released.' This is the condition that has been described in the passage - "While still living, the wise person becomes released from joy and

Bhāşya on Sū. (8). [P. 226, L. 3 to L. 13.]

The author next proceeds to instruct us as to the propriety of our ignoring certain aspects of things and pondering over certain others; and the next Sütra has got nothing to do with either the proving or the disproving of things (as some people have supposed).

"What is this instruction ?"

Sūįra (8).

REGARD FOR THE OBJECT AS A WHOLE BECOMES THE CAUSE OF DEFECTS. SU. (3).

The regard or admiration for the object as a whole brings about defects. For instance (in connection with sexual love), for the Male, the conceiving of the Female as such, becomes a source of bondage, and for the Female the conceiving of the Male as such becomes a source of bondage. And there are two aspects in which the object (Male or Female) can be conceived of :---(1) the aspect of organs, and (2) the figurative or poetical aspect.*

The 'aspect of organs' pertains to the teet h and the lips, the eyes and the nose, one by one; and the 'figurative aspect' pertains to the teeth or the lips, being 'so and so beautiful.' All this three-fold aspect intensifies Desire and its attendant Defects; all which have to be avoided. The avoidance of the said object of love is to be done by conceiving of it in the terms of its limbs,—e.g. by conceiving of the Female as only made up of hairs, bristles, flesh, blood, bone, tendons, arteries, phlegm, bile, ordure and so forth. This is what is called the 'disagreeable aspect' (of the thing). When one ponders over this aspect of the thing, his desire and attachment for it cease.

Thus then we find that there being two aspects (agreeable and disagreeable) of each object, there is one aspect (the agreeable) which should be ignored, while the other (the disagreeable) should be pondered over. This is what is

[•] In translating 'parişkāra' as 'bondage' we have followed the Vāršika, which says—parişkāra 'dantitakinam https://www.holybooks.com

taught here. Just as in the case of the poisoned food, while the food-aspect is meant to be acquired, the poison-aspect is to be avoided.*

Vārļika on Sū. (3).

[P. 506, L. 2 to L. 14]

The author next proceeds to instruct us as to the propriety of our ignoring certain aspects of things and pondering over certain others; and the next Sūţra has got nothing to do with either the proving or the disproving of things; what is meant is that in regard to the object as it exists, a certain aspect has to be pondered over and another to be ignored and discarded.

Regard for the object as a whole &c., &c.- says the Sufra. Regard for the object as a whole brings about the Defects. The Female, in the aspect of a mere composite object, should be pondered over; and in the aspect of 'Female' she should be ignored; she constitutes a bondage for the Male. The term 'pariskāra' means 'bondage;' similarly for the Female the Male-aspect of the Male is a source of bondage. Of the Female-aspect (or the Male-aspect) also there are two aspects-the 'organ-aspect' and the 'figurative aspect.' The conceiving of the 'organ-aspect' is in the form-' teeth and lips,' in which the conception of the teeth is as teeth, and so forth. The 'figurative aspect' is in the form 'this is so and so '; in which the thing is described figuratively. All this constitutes Illusion, which leads to Attachment &c., and hence should be discarded. This does not mean that the object us a composite whole should be denied ;--because it has been proved by proofs that things are composite in their character.

End of Section (1).

[•] The Parishuddki remarks :- As a matter of fact, for one who seeks after Release, all things of the World, in all their aspects, are equally to be avoided, and are equally evil,-yet the author speaks of the two 'aspects ' in regard to the ordinary Man of the World, who becomes desirous of Release only after having gone through a life of the particular multips://www.holybooks.com

Section (2).

· [Sūtra 4-17].

Dealing with Components and Composites.

Bhāeya on Su. (4).

[P. 226, L, 14 to P. 227, L. 3.]

Now the Idealist, with a view to deny the Object, proceeds to deal with (and demolish) the 'Composite.' *

Süfra (4). Pürvopakşa.

"APPREHENSION AND NON-APPREHENSION BEING TWO-FOLD, THEBE ARISES DOUBT." (Sū. 4.)

"Since there is apprehension of existent as well as nonexistent things, Apprehension is of two kinds; and since there is non-apprehension of existent as well as non-existent things, non-apprehension also is of two kinds. † So that if we apprehend the Composite, there is doubt, since Apprehension is of both kinds;—on the other hand, if we do not apprehend the Composite, then also there is doubt, since non-apprehension also is of both kinds. Thus then, whether the Composite is apprehended, or not apprehended, —in either case it does not become free from doubt."

• Says the *Taiparya*.—The Idealist proceeds to deal with the Composite for the purpose of demolishing it. The conceptions spoken of under the preceding Sütra are possible only when there is an object composed of several component parts. But since there is no such object, how can there be any such conceptions? It is with this view that the Idealist Pürvapakşa proceeds to demelish the *composite*; and this we shall follow with the denial of the Atom. So that the Composite and the Component Atom being both demolished, Idea would be the only thing left.

On this the Parishufdhi-Some people have tried to get rid of the entire fabric of Instruction expounded under the preceding Sütra, by denying the Composite, in the absence whereof none of the 'conceptions' described above are possible.

Varțika on Sü. (4).

[P. 506, L. 15 to P. 507, L. 3.]

Now the Idealist, with a view to deny the Object, proceeds to deal with the Composite-(Bhāşya). ["Apprehension and non-apprehension &c., &c.-says the Sutra.] Since there is apprehension of existent as well as non-existent things, Apprehension is of two kinds; and since there is non-apprehension of existent as well as non-existent things, Nonapprehension also is of two kinds. So that whether the Vār. P. 507. Composite is apprehended, or not apprehended, in either case it remains doubtful."

[The Variaka offers its own answer to the above].--

The answer to the above has already been given; as a matter of fact, the twofoldness of Apprehension and Nonapprehension cannot be a ground for Doubt; as we have found (under Su. 1-1-23) that in the enumerating of the causes of Doubt, 'Apprehension and Non-apprehension' have been qualified by other terms prefixed to them.

Sāļra (5).

Siddhanfa.

THERE CAN BE NO DOUBT (IN REGARD TO THE COMPOSITE), AS ITS EXISTENCE HAS BEEN RETABLISHED BY REASONS ALREADY EXPLAINED BEFORE.—(SQ. 5).

> Bhāşya on Sū. (5). (P. 227, Ll. 5-6.)

No doubt is possible (in regard to the Composite) ;--why? because the reasons already explained before (under Su. 2-1-33 et seq.) have not been refuted; so that it remains established that there is such a thing as the Composite arising out of, and distinct from the Component two holybooks.com

Vārļika on Sū. (5).

[P. 507, L. 5 to L. 7.]

There can be no doubt &c. &c.—says the Süfra. It is not right to have a doubt in regard to the Composite; for the simple reason that the reasons already propounded in its support have not be refuted; that is, the reasons that have been put forward to show that the *Composite* is something distinct from the Components are such as cannot be refuted.

Sūfra (6).

[Objection.] — "IN THAT CASE, (WE MIGHT AS WELL RAY THAT), SINCE THE EXISTENCE (OF ANY SUCH THING AS THE COMPOSITE) IS IMPOSSIBLE, THERE CAN BE NO DOUBT (AS TO WHETHER IT EXISTS OF NOT)."* (SQ. 6).

Bhāşya on Sū. (6).

[P. 227, L. 3.]

"No doubt is possible. That is, there is no such thing as the Composite. This is further explained (in the next Sūțra).

Vārļika on Sū, (6.)

[P. 507, Ll. 9-10.]

[The Vārțika simply repeats the Sūfra and Bhāşya.] Sūfra (7).

[Objection continued.]—"INASMUOH AS THE COMPO-NENTS CANNOT BESIDE BITHER IN THE WHOLE OR IN A PART (OF THE COMPOSITE), IT FOLLOWS THAT THEER IS NO COM-POSITE."⁺ (Sū. 7).

Bhāşya on Sū. (7). [P. 227, Ll. 10-12.]

"As a matter of fact, each single *component* cannot reside in the entire *Composite*; (1) because both are not of the same dimension, and (2) because, in that case, there would be no

[•] This Sayra is not found in the Puri Sa. Ms. The Nydyasuch'sibandha has omitted Wite.

[†]Süţras 7 and 8 are not in Vishvanātha, nor in any Sū. M5. They are found in the Nydyasüchinibandha; and Vishvanātha also says that they have been regarded as Sūţra. From the Bhāşya—'*i od vihhajatā*' also it would appear that they are 'Sāşra,' Downloaded from https://www.holybooks.com

connection between the Composite and the other components. Nor can the component reside in only a part of the Composite; for the simple reason that the Composite has no 'parts' apart from the Components."

"If (in order to escape from this difficulty) it be held that it is the Composite that subsists in the Components (and not the Components in the Composit-),-[then our answer is as given in the following Su(ro]."

Vārļika on Sū. (7).

[P 507, L. 12 to P. 508, L. 5.]

"Inasmuch as &c. &c.—says the $S\bar{u}$ (ra. (A) Do the Components reside in the Composite ? (B) or, the Composite in the Components ?

"(A) If the Components reside in the Composite, do they subsist in the entire Composite or only in a part of it? It is not possible for the Components to reside in the entire Composite; because there is a difference of size between the Component and the Composite,—the Component being of smaller and the Composite of larger size; and it is not possible for the thing of smaller size to fill up the whole of the thing of larger size; and further, since a single Component

Vir. P. 508. would reside in the entire Composite, this latter would consist of a single substance (and not of several component parts), and certainly there is no object known to us which consists of a single substance and which subsists in a substratum which is indestructible [*i.e.*, tho hypothesis would mean that every Composite object, as composed of only one Component, is eternal, which is absurd].• Nor is it possible for the Component to reside in a part of the Composite; for the simple reason that the Composite has no 'parts' apart from the Components themselves; and further,

e The reading of the passage appears to be corrupt. We have adopted the reading **unique and an added an added and added and added and added and added and added and added added and added ad**

even in that part of the Composite, does the component reside in the whole of that part of or only in a part of it ? and so on, the objection may be stated at each step."

"(B) If, on the other hand, it is the Composite that resides in the components—[then that is open to the objection pointed out in the following S%fra]."

Sųfra (8).

[Objection continued.]—"INASMUCH AS IT IS NOT POS-SIBLE (FOR THE COMPOSITE) TO BESIDE IN THEM,—THERE CAN BE NO COMPOSITE." (SU. 8).

Bhāşya on Sū. (8).

[P. 227, L. 1416,]

"(a) The entire Composite cannot reside in each one of the Components,—because they are of different sizes; and further, because in this manner the (Composite) object would consist of a single component substance [and as such it would have to be regarded as eternal, which is absurd]. (b) Nor can the Composite subsist in parts in all the components; as it has no other parts (except those same components)."

"From all this it follows that it is not right to entertain any doubts (as to whether the Composite exists or not); the conclusion doubtless is that there does not exist any such thing as the *Composite*."

Varlika on Su. (8.)

[P. 508, L. 7 to L. 14].

Inasmuch as it is &c. &c —says the Sāfrs. The Composite cannot subsist in its entirety in each one of the Components; because they are of different sizes; and also because, if it did, then the Composite would be a substance consisting of a single component; as subsisting in a single component, the Composite would consist of that single component substance; and as such a composite would be produced out of a single substance, midiade would be produced out of a

1590

times. Further, being composed of a single substance the Diad would reside in a single Atom; and hence as there could be no disruption of its constituents the thing would be eternal. And yet we have no instance of any such thing as is produced and is eternal. If, on the other hand, the Composite subsists only in parts in the components, then it means that the Composite has component parts other than those of which it is composed, — which other parts alone would reside in the latter components."

Sūfra (9).

[Objection continued.] — "AND SINCE THE COMPOSITE CANNOT BESIDE APART FROM THE COMPONENTS (THERE CAN BE NO SUCH THING AS THE COMPOSITE .*" (Sū. 9).

Bhāşya on 80, (9).

[The correct reading of the Bhayys on this Safra is found in Pari Ms. B-Reason (1) and the start of the second start of the se

"There can be no such thing as the 'Composite'—these words have to be brought in from the preceding $S\bar{u}$ /ra. The Composite cannot reside apart from the components,—(1) because it is not so perceived, and (2) because in that case it would be eternal. For these reasons it follows that there is no such thing as the Composite."

Vārļika on Sū. (9).

[P. 508, U. 16-18.]

"And since the Composite cannot etc. etc. —says the Safra. The Composite cannot reside elsewhere than in the component; (1) because it is not so perceived, and (2) because it would, in that case, be eternal. If it existed apart from the components, it would have been so perceived; and it would also be eternal; as every substance which is without a sub-

[•] Vishvanätha notices three interpretations of this Sdyra :--(1) As in the Bharys. (2) the Composite could not subsist apart from the components ; as in that case it would be non-existent ;--(3) For ressons given in the preceding Sdyra, the Composite could have no existence even apart from the components ; hence it does not exist at Stivuloaded from https://www.holybooks.com

stratum is eternal [and the object existing apart from its constituent parts must be one without substratum; the constituent part being the only possible substratum of things]."

Ssfra (10).

[Objection continued.]—" LASTLY, THE COMPOSITE CANNOT BE THE SAME AS THE COMPONENTS."" (SU. 10).

[*Bhāşya* on Sū. (10).

[The printed text entirely omits the words of the Bhaaya on this Silra. They are found thus in Puri Ms. B :--- ज बा-वयवानां धर्मोऽवयवी । कर्मात् । धर्म्यास्य धर्मिभिष्ययोः पूर्ववत् सम्ब-म्बादुपपर्य: । पूर्धम् जावयवेभ्या धर्मिभ्यः धर्मस्याग्रहवादिति समानम् ।] "The Composite cannot be regarded as a mere qualifi-

"The Composite cannot be regarded as a mere qualification of the Components; —why ?—because, as shown above, there can be no connection of the said qualification with the qualified components; and apart from the qualified components, the qualification is never perceived; this last argument being the same as that urged before (in the preceding Sufr.)"

Vārļika on Sū. (10).

[P. 509, L. 2 to L. 8.]

"Lastly the Composite etc. etc.—says the Süfra. The Composite cannot be a mere qualification of the Components; —why?—because, as already shown before no relationship is possible between the Composite,—the qualification;—and the Components—the qualified. Further, the qualification, Composite, is not perceived apart from the qualified, Components; for if it did, then it would be eternal,—as we have just shown. Then again, if the Composite subsists in part only in the Components, then the Composite comes to be a mere conglomeration of the components. If the Composite subsisted in part in one component, then the perception of that single

1592

-

[•] This §6 trais directed against those persons who have held the following view :--- "The Composite is only a qualification of the Components, and it is neither absolutely different from them, nor absolutely non-different; it is both different and non-different from them."

component should bring about the perception of that part only of the Composite; so that the Composite would be perceived in place of that part only; but as a matter of fact, the perception of a single yarn does not lead to the perception of the Cloth. From all this follows the doubtless conclusion that there can be no such thing as the Composite."

8#(ra (11).

[Answer.—From the standpoint of the Siddhania.]— INASMUCH AS THERE IS NO DIVERSITY IN WHAT IS ONE ONLY, TERMS CONNOTING DIVERSITY CANNOT BE APPLIED TO IT; SO THAT THERE IS NO ROOM FOR THE QUESTION PUT BY THE PULVAPABSINT SU. (11).

Bhāşya on Sū. (11).

[P. 228, L. to L. 9.]

There is no room for the question—" Does the Composite reside in the Components in its entirety, or only in parts ?"— [as put by the Purvapaksin under SQ. 7 et. seq.].—Why ?— Because insemuch as there is is no diversity in what is one only, terms connoting diversity cannot be applied to it. As a matter of fact, the term 'Krifsna', 'entire', councies all members of a group consisting of several individuals, and the term 'Ekudësha', 'a par', 'connotes a few individuals out of

*A composite is so called only because it subsists in components; hence if only parts of the former subsisted in the components, then these parts would be real ' composites;' and as the former composite would subsist in the components, only in parts, and not in its entirety, it would not be entitled to the name ' Composite '. And as the Composite would be perceived only as subsisting in the components, —and it would be only its parts that would so subsist —the composite would be perceived in every such component in which its part subsists.' That is, part of the Cloth subsisting in yarn, the perception of this yarn should the lead to the perception of the Cloth.—Tatparya.

[†]The Varfiks remarks that there are two parts of the Parsapakes :--(1) De the components subsist in the Composite ? and (2) If the Composite subsists in the components, does it do so in its entirety or in parts ? The (1) is ignored by the Safrabars for the simple reason that no Logician acknowledges the subsistence of the component (cause) in the composite Effect.

Hence it is only the (2) that deranstyer of by the fight article this Safra,

several; so that both these terms, 'entire' and 'in part' are connotative of *diversity*; and as such they cannot be applied to the *Oomposite* which, being a single entity, is devoid of diversity.

Partika on Sū. (11).

[P. 509, L. 8 to L. 17]

The suggestion that the Components reside in the Composite cannot be accepted; as no such view is admitted by us; (according to us) it is not the Cause that subsists in the Effect, but the Effect that subsists in the cause. Then as regards the question—" If the Composite subsists in the components, does it do so in its entirety or in parts?"—our answer is as follows :—

Inasmuch as etc. etc.—says the $S\bar{n}/ra$. The term 'entire,' as well as the term 'in parts,' are both connotative of diversity, and as such they are inapplicable to what is one only; the term 'entire' connotes all of several individuals, and the term 'in parts' connotes a few of several ; and such terms are not applicable to the thing in question. So that neither the term 'entire nor the term ' in parts,' is applicable to the Composite (which is one only).

Bhāşya on Sūfra (12).

P. 228, L. 9. to P. 229, L. 3].

Further, the Pürvapaksin has argued that—" the Composite cannot reside in parts in the Components, because it has no other ' parts ' (apart from the components)";—but this is not right reasoning.

Sū{ra (12).

EVEN IF THEBE WEBE OTHER PARTS (OF THE COM-POSITE), # IT COULD NOT SUBSIST (IN THE COMPONENTS); HENCE THE REASONING IS NOT BIGHT. (Sũ. 12.)

• The printed text reads unquintrand; as also Vishvanätra, Puri Bbä. Me; Puri Sū. Me.; and Sū. Me. C. But Sū. Me. D, the Nysyasschinbandha and the Jeparys' read unquintrand. Mes. of the Variate contain both. In view however of the explanation given in the Bhappe, unquintrand should be accepted as the right reading. Downloaded from https://www.holybooks.com

In support of the proposition that the Composite cannot subsist in the components, or in its parts] the Opponent has propounded the reason "because the Composite has no other parts "; but " even if ' parts ' of the Composite were actually other than its Component, the meaning (of the Composite subsisting in part in the Components) would be that one part or component subsists in another part or component,-and not that the Composite subsists in them. If the Composite beaccepted as being something different (from the Components), then,-even though it had 'parts' other than its components, it would not mean the subsisting of the Composite; and hence it would not mean that it is in parts that the Composite subsists in the components ;- so that there can be no force in the reasoning-" because it has no parts apart from the Components (the Composite subsists in parts in the Components)."

Question:--- "What is the meaning then of the subsisting (of the Composite in the Components)?"

Answer: ----What it means is that there is on-existence (juxtaposition), consisting in the relation of container and contained, between the one (Composite) and the many (Components).

"What is the meaning of the relation of container and contained ?"

It means that when between two things it is found that one can have no existence apart from the other, the latter is called the 'container'; and as a matter of fact, the Product can have no existence apart from its constituent cause; but this is not the case with the constituents (which may exist apart from the product). [So that what is meant by the Composite subsisting in the Components is that it cannot exist apart from these latter].

"But how can this be so in the case of eternal things (which have no cause)?"

In their case we infer it from what we perceive in the case of non-eternal things. What you mean to ask is— "how can there be the relation of container and contained in the case of eternal things?"—and our answer is that when we perceive in the case of non-eternal things-substances and qualities-the relation of container and contained, we infer from this that similar relation exists in the case of eternal things also.

From all that has gone before (under Sutras 4-12) it follows that what has been prohibited (under Sti 8)—for the benefit of the person seeking after highest good—is the having of regard for objects as a whole; and it does not mean that there is no such thing as the Composite; just as in regard to Colour &c. what has been prohibited is the wrong notion of them; and the existence of Colour &c. themselves has not been denied.

Vārļika on Sū. (12).

[P. 510, L. 2 to P. 512, L. 18.]

Even if there were etc. etc.—says the Sāfra. "Because there is no other part,"—this is what you have put forward as your reason. Now if you admit of a part other than the Composite, even so it would mean that the part subsists in the part and not that the Composite subsists in the component; so that there is no force in the reasoning that—" the Composite cannot subsist in part in the component, because it has no other parts."

Then again, he who holds that one thing subsists in many, cannot be rightly taxed (with a request to explain whether the Composite subsists in the components in its entirety or only in parts); for, as we have already pointed out this question itself involves self-contradiction in both ways.

"If it is neither in its entirety nor in parts that the Composite subsists in the Component, then, in what manner does it subsist in them?"

The subsistence (of the Composite) in the components is in the form of the relation of container and contained; i. e., the relation of *Inherence*, "How does that relation come about?" When one thing is unable to exist apart from another, it is said from inhere win of this statter; e. g. the Product is unable to exist apart from its constituent cause; while the reverse holds good in regard to the constituent causes; *i. e.*, the causes do not exist only in the Product. "How can there be the relation of container and contained in the case of eternal things?" That such a relation is present in the case of eternal things is inferred from our perceiving it in the case of non-eternal things; *i. e.*, in the case of non-eternal things * it is found that they subsist in the thing wherein they are perceived, similarly eternal things also subsist in that thing in which they are perceived; the circumstances being exactly alike in the two cases.

"But no different colour can be pointed out." You mean by this as follows :--- " If the Composite is something different from the Components, then it behaves you to point out a colour of the Composite which would be different from the colour of the Components; just as, for instance, as you assert that the yarns that are not of variegated colour go to make up the Cloth of variegated colour. +" This however is not right; firstly because a thing can be regarded as the substratum of only that colour which is actually perceived in it; so that the colour of the Composite is exactly that which is perceived in it; the same being true of the Component also (of which also the colour must be that which is perceived in it);-and secondly, because your question involves the admitting of the relation of cause and effect ‡ (between the Composite and the Component), and as such

"auisferune any de. as found in the Benares edition.

+ wi चित्रवारवन्ते is the right reading.

The *Tdiparya* calls the citing of the instance of the variegated cloth as put forward in joke. The Nalyäyikas hold that several yarns, of which not a single one is of variegated colour, go to make the cloth of variegated colour. But this cannot be right; as no one colour can be called *variegated*,—the latter term implying diversity. Hence the jocular taunt is quite apt.—*Teiparya*.

The right realing in dien of whits follows, is median antistry annu .

lands you in self-contradiction ; when you say-" please point

Vär. P. 511.

out the colour of the Composite, "-you admit the 'Composite' and the 'Component'; and by

admitting these (which bear to each other the relation of cause and effect) you stultify yourself; and since this was the sole bone of contention between us, this admission proves that you have renounced the position you had taken up. Even admitting what you have said in regard to the variegated colour, we assert that the colour of the Cloth is the variegated one." "But this would mean diversity." Your meaning is as follows: -"When one admits the colour of Cloth to be paringaled, he admits the presence of several colours in the cloth; and certainly no single substance can have more than one colour; nor can there be one colour in several things. " But this is not right; because the term 'variegated' connotes singleness as well as multiplicity; as a matter of fact,... the term variegated connotes one as well as many: we have the expression 'chifram rapam' 'the variegated colour' (singular), as well 'chifrani rapani, ' variegated colours ' "This is not true; for the term is never (plurel). found applied to a single colour; as a matter of fact, we have never found the term 'variegated' used in reference to a single colour." This reasoning is not right; as it involves the renouncing of the position taken up; + one who does not admit one colour to be 'variegated' has to renounce the notion of several colours being 'variegated;' for 'several variegated colours' is nothing more than the collection of a number of single 'variegated' colours. 1f it be held that several non-variegated colours go to make up the variegated colour, -even so 'self contradiction' does

The right reading in the internet service and by books.com

1598

[•] We assert this for the purpose of meeting your jocular taunt. That the colour of the Cloth is variegated is vouched for by actual perception, and it needs no other proof.--Taiparya.

not cease; to assert that the non-variegaled becomes the 'variegated' is as self-contradictory as the assertion that 'non-white is white.' If you accept the view that-"" the non-variegated colours of the yerns coming together, produce, in the Cloth, the variegated colonr,"-then there is nothing in this that goes against our tenets. "But (if the cloth is of variegated colour, then) the other face of the cloth should be regarded as of variegated colour; that is, in the case where one face of the cloth is of variegated colour, while the other is not so, just as when we see the cloth we have the notion of 'variegated colour' in reference to one face, so we should have, in reference to the other face also, the notion that 'this is a cloth of variegated colour'." But you yourself say that 'only one face of the cloth is of variegated colour,' and in this case it is not the *cl*.th that is of variegated colour; as the one face is not the Cloth. "Why cannot we have the notion of puriequied colour in regard to the said cloth (of which only one face is of that colour) P As a matter of fact, the Cloth made up of one face of rariegated and another of non-variegated colour is certainly a Cloth of variegated colour; so that it stands to reason that just as we have the notion of variegated in reference to one face of the cloth, so we should have in reference Var. P. 512. to the other face also." Certainly no such

contingency is possible; one variegated colour cannot be productive of another; how can the variegated colour on one side ever produce another (variegated) colour in the whole Object (Cloth)? All that can be said is that the two colours of the two parts (the two faces of the cloth) produce a new colour in the whole (Oloth); this is proved by our actually perceiving the whole (Cloth) to be so; and if the whole had no colour, it could not be perceived; the perception of the whole could not be due to the colour for the whole could be possible, we could have perception $^{\circ}$ of Wind also; if the perception of one thing were due to the colour of something else, then it would be possible for us to perceive Wind also (which is colourless, through the colour in Fire)! And certainly there is no perception of Wind. Hence it has to be admitted that it is through its own colour that the Composite whole is perceived; and the perception of colour in the whole Cloth made up of its two faces arises from our combining the perceptions of the two colours of its two faces; but this does not make the *whole* Cloth colourless.

From all this it follows that what the Sütra means is to prohibit all regard for the *Composite* whole, along with its accompaniments, and it is not meant to deny the Composite; just as what has been prohibited is the wrong notion that we have in regard to Colour &c., and Colour &c. themselves are not denied. This fact has been expressed by the sage in the following verse :---

'The objects of sense-perception, if not duly discriminated, lead to evil, so that all persons acting through the senseorgans would become contaminated by evil. '

Bkāşya on 80. (13).

[P. 229, L. 8 to L. 7.] Under Su. 2-1.84 the Siddhanfin has put forward, in

Under Su. 2-1.3. the statement has put forward, in proof of the existence of the Composite, the argument that— 'if there were no Composite, there would be non-apprehension of all things '; and even though he has been answered by this, the *Purvapskein* re-asserts his contention [having been reminded of the previous arguments by the reference to them in Sū. 4-3-5]:—

S#fra (13).

"THE PERCEPTION OF THINGS WOULD BE POSSIBLE; JUST LIKE THE PERCAPTION OF THE MASS OF HALES BY THE PERSON OF DIM VISION (SQ. 18).

" As a matter of fact, we find that the man whose vision is dummed does not perceive each single hair; and yet he does perceive the mass of hair; similarly though each single Atom may not be perceived, yet it would be quite possible to perceive a mass of atoms. Thus the perception that we have of things (and which the Siddhäntin has put forward as inexplicable except by the assuming of the composite as apart from the component atoms) really pertains to the masses of Atoms (and not to any such thing as the Composite)."

Varlika on Sū. (13).

Though already answered by what has been said under Sä{ra 2-1-34, the Opponent comes forward with the following :---" The perception of things etc. etc.--says the Sä{ra. Though each hair singly is not perceived by the man whose vision is dimmed yet he perceives the mass of hair; similarly though each atom singly may not be perceived, yet it would be possible to perceive the mass of atoms ; so that the perception that we have is to be taken as pertaining to masses of atoms."

Stra (14).

THE EFFICIENCY (DISTINCTNESS) AND DULNESS (INDIS-TINCTNESS) OF THE PERCEPTION IS DUE TO THE REFICIENCY AND DULNESS OF THE SENSE-OBGANS; BUT THASE NEVER GO BEYOND THE BANGE OF THEIE BESPECTIVE OBJECTS; AND THEY CANNOL OPERATE UPON WEAT IS NOT THEIR OBJECT. (Su. 14).

Bhāşya or Su. (14).

[P. 229, L. 10 to L. 24].

This efficiency and dulness of the Sense-organs are in reference only to their respective objects; and it is from this that there follows the distinctness and indistinctness of the perceptions. That is, however efficient the Visual Organ may become, it can never apprehend Olour, which is not the special object of visual perception; and however dull it may become, it cannot fail to apprehend its own object. Now (turning to the case cited by the Opponent) there may be some person who, having his vision dimmed, does not perceive the hair singly; while there may when another on who perceives

the mass of hair; and yet both (the single hair and the mass of hair) are perceived by the person whose vision is not dimmed. [But in all cases the man's eyes apprehend the Hair, either singly or in mass, which is an object perceptible with that organ]. Atoms, on the other hand, are beyond the reach of sense-organs; they never become objects of perception with the organs; they are never apprehended by any sense organ ;-under the circumstances, if the Mass of Atams were perceived, (with sense-organs) it would mean that the organs have operated upon something which is not their object at all: for (according to the Opponent) there is no other object except Atoms (and Atoms are absolutely imperceptible). So that what the Opponent asserts (in Sū, 13) comes to mean that when the Atoms, being massed, become perceived, they renounce their inperceptibility,-and when, being disjoined, they fail to be perceived, they cease to be objects of perception by the sense-organs. All this would be entirely absurd, except on the supposition that a new object is produced (when the Atoms become massed). From all this it follows that what forms the object of perception is an object quite distinct (from the component Atoms).

It might be urged that " what forms the object of perception is merely the mass (of the Atoms themselves)." But this would not be right; for 'Mass' is only of the nature of conjunction, combination ; and the conjunction of things that are themselves imperceptible can never be perceived; hence the explanation propounded would be highly improper. As a matter of fact, the 'Mass' is only the conjunction or combination of several things; and when we perceive a conjunction -as that' this thing is in conjunction with that thing, '- it is only the conjunction of things that are themselves perceptible, and never that of things beyond the reach of sense-organs ;--hence the explanation put forward cannot be right. Further, in the case of things perceptible by the sense-organs, if they fail to be perceived, there is always found some thing, in the shape of an obstruction, that serves to prevent the perception [and we do not find any such thing as should prevent our perceiving of the Atoms, if they were perceptible]. It follows from all this that the non-perception of single Atoms can not be due to the inefficiency of the sense-organs ; just as the non-apprehension of Odour &c. by the Eye cannot be due to the inefficjency of that organaded from https://www.holybooks.com

Värfika on Sü. (14).

[P. 518, L. 8 to P. 514, L. 2]

The efficiency and dulness &c. &c.--says the Sufra. As a matter of fact, however efficient the Sense-organ may become, it never goes beyond its object; e.g., however, efficient the Eye may become, it can never apprehend Taste. Similarly however inefficient the Sense-organ may become, it can never totally fail to apprehend its object. In fact it is only in regard to the special objects of the organs themselves that the perceptions become distinct or indistinct in accordance with the efficiency or dulness of the organs concerned : A perception is called 'distinct,' when there is apprehension of the Community to which the thing belongs, of its specialities and of the thing itself as endowed with those; and it is called 'indistinct' when there is apprehension of the Community only. The man with dimmed vision fails to perceive the single hair, but succeeds in perceiving the mass of hair; while for the man whose vision is not dimmed, both (the single hair as well as the mass of hair) become objects of perception by the Eye. The Atoms on the other hand are beyond the reach of the senses, and never become perceptible by the Eye; so that it would be most absurd to hold that when massed, the Atoms are perseived by the Sense organs, and when not massed, they are not so perceptible; for unless some peculiarity is produced in the Atoms, they cannot become perceptible. From all this it follows that there is such a thing as the Composite (composed of Atoms) which forms the object of perception.

"What forms the object of perception is only the mass or group; it is the massed or grouped atoms that become objects of perception; d from https://www.holybooks.com This cannot be; the mass is only of the nature of Conjunction; when we come to examine the mass, it is nothing more than the Conjunction (Combination) of Atoms; and the Conjunction is perceived only as subsisting in things that are perceived,—the perception of Conjunction always appearing in the form 'this is in conjunction with that' [where both this and that are perceived]. It is only when a thing is ordinarily perceptible that where it fails to be perceived, we always find some cause, in the shape of obstruction, of that non-perception. The Atoms however are never found Vár: P. 514. to have the character of being perceptible; and hence their non perception (which is a fact) could not be due to the presence of any obstruction &c.

Süfra (15).

THE DIFFICULTIES IN CONNECTION WITH COMPOSITES-AND COMPONENTS WOULD CONTINUE TILL THE TOTAL NEGA-TION OF ALL THINGS. (SG. 15).

> Bhāşya on Sū. (15). [P. 280, L. 2 to L. 5.]

The Opponent has pointed out difficulties in the way in which the Composite may subsist in its components, and has, on that ground, denied the existence of the Composite. But the components (the pieces that go to make up the Jar, e.g.) also have their own component parts; and the said difficulties would be applicable to the way in which the Component may subsist in its own component parts; so that, these difficulties should either lead us to deny the existence of all things, or they would lead us on and on to the mere Atom, which has no component parts; —and either of these contingencies would mean that there does not exist anything that could be the object of perception, (the Atoms being imperceptible); —and in the absence of all objects of perception, there could be no perception; —and yet the denial of the subsistence of the Composite in its Components is supposed to be based upon facts of ordinary perception. Thus, when this denial (of the subsistence of the Composite &c.) ultimately leads to the denial of its very basis (im these form hof be Berception), it must be regarded as striking at its own very root. [Hence the fact urged by the Siddhāntin under Sū. 2-1-34, remains, that if there is no Composite there can be no perception at all.]

Vārļika on Sā. (15).

[P. 514, L. 4 to L. 12.]

The difficulties &c. &c.—says the $S\bar{u}$ (ro. On the strength of difficulties in regard to the subsistence of the Composite in its Components, the Opponent has denied the existence of the Composite ; but as a matter of fact, these same difficulties would be found in the subsisting of the Components in their own component parts; and these difficulties would end either with the denial of all things, or at the Atom, which has no further parts (and as such would not have the said difficulties). "How so?" Well, it has been urged that the Composite, subsisting in its Components, could subsist iu each Component either in its entirety on in parts; now the same might be said in regard to the Component subsisting in its own component parts,-to these latter subsisting in theirs; and so on and on, we would have to go on, either till we reached the indivisible Atom, or till we denied the existence of all things (on the strength of those difficulties). Under either of these contingencies there would be no object of perception; and yet the very argument of the Opponent-"Does the Composite subsist in its entirety or in parts?"is meant to be based upon perceptible things. Thus, striking at its very basis, the argument demolishes itself.

Bhāşya on Sü. (16).

[P. 230, L. 5 to L. 12.]

But as a matter of fact,-

THE TOTAL DENIAL OF ALL THINGS CANNOT BE RIGHT; FOR THE ATOM REMAINS (SQ, 16).

As a matter of fact however, the (Opponent's) denial of things based upon the difficulties in connection with the subsistence of components and their parts bucklam cease at the Atom; it cannot lead to the total denial of all things. Because the Atom has no component parts; and difficulties based upon the dividing of things into their component parts must end at the thing than which there is nothing smaller. For instance, when we proceed to divide a clod of earth, into parts, we get at smaller and smaller particles; and this division must come to an end at that piece thas which there could be no smaller piece, and which is (on that account) the smallest piece possible; and it is that very thing than which there is nothing smaller which we call 'Atom '.e

Varlika on Sū. (16).

[P. 514, L. 14 to L. 19.]

The total denial & c. & c.—says the $S\bar{u}$ (ra. As a matter of fact, the total denial of all things would not be possible; as the Atom would still be there. The division of things could continue only till we reach the Atom; for the name 'atom' applies to that at which the process of division ends and than which there is nothing smaller. When a clod of earth comes to be divided into smaller and smaller pieces, that point at which the division ceases, and than which there is nothing smaller, is what we call 'Atom.'

Suļra (17).

OR [THE ATOM MAY BE DEFINED AS] THAT WHICH IS BEYOND THE DIAD.-(SQ. 17).

> Bhāeya on Sü. (17). [P. 230, Ll. 14-15.]

As according to the Purvapaksa (a) there would be no end to the division of things into their component particles,

1606

[•] It is only for the sake of argument that the two contingencies have been put forward in the preceding Sätra. It is now shown that the denial of the Composite can lead only to the postulating of the Atom; and as this is imperceptible, the Pärvapaksa view would do away with all Perception, as urged by the Siddhanfin Dunder Säel Atol. https://www.holybooks.com

and (b) all things would come to consist of equally innumerable component substances,—there could be no such thing as the Diad.

Varlika on Sū. (17). [P. 514, L. 19 to P. 515, L. 16.]

In case the division is not regarded as ending with the Atom, then, since the Atom is that which is beyond the Diad, and since (according to the Opponent) there would be no end

to the division of things into their component Vår. P. 515. parts,-the Diad would become something immeasurable. As a matter of fact, the magnitude of the Diad is ascertained by means of number, size and gravity. And (if there is endless dismemberment of things) then no such conceptions would be possible as that 'in this Diad there is so much gravity,' 'so many Atoms on combining become the Diad.' "Why?" Because the very large object as well as the Diad would both, ex hypothesi, consist of an endless number of particles; so that just as the large object made up of a large number of atoms becomes immeasurable through any definite number, dimension or gravity,-so exactly the same would be the case with the Diad also, for the simple reason that in the latter also there would be an equally endless dismemberment of parts. It might be held that the division of objects (into their component parts) proceeds only so far as its disappearance. But this also cannot be right; because, inasmuch as no amount of division can put an end to the divided object, it cannot be right to assert that the division proceeds till the disappearance of the thing. As a matter of fact, the ' division' always rests upon the divided thing; hence it is a contradiction in terms

[•] The term 'fruit', literally, 'dismemberment;' has come to gnean the Diad. The point is that unless some end is postulated in the process of division, all things would consist of equally innumgrable particles; which would mean that the mountain is of the black size of the grade of the grad

to say that ' the divided object has ceased to exist ' and ' the division is there,' Further, he who regards the Atom to be something whose component parts can be further analysed, has to admit that the Atom is made up of component parts; and if it is made up of parts, the meaning of the term 'atom' should be explained ;-what is the exact meaning of the word 'atom'? Then again, are the component parts of the atom of the same division as the Atom. or of a different dimension? If they are of the same dimension as the stom. then it would be impossible to explain which of the two is the com osite and which the component; for we never find things, which are of the same Dimension, ever bearing the relation of 'composite' and 'component.' If, on the other hand, the components of the Atom are of a different dimension Atom; that is, the hypothesis would mean that the Atom is a product (produced out of the smaller particles); and this would be tantamount to the denial of the 'Atom' as such (which by its very nature, mast be indivisible, and an eternal constituent cause of things).

> End of Section (2). Section (3).

[Sütras 18-25.] Regarding the Atom being without parts.

Bhāṣya on Sū. (18). [P. 230, L. 15 to P. 231, L. 4.] The Nihilist, holding the view that "all things are nonexistent," urges the following argument[®] :---

• The theory of the whole world emanating from the Void has been disposed of under Sätras 4-1-14 to 17. The hypothesis taken up now is that all is mere Void. And in course of the refutation of this hypothesis, the Author proceeds to show that there do exist certain things that are devoid of parts ; this subject being a natural sequence to the conclusion arrived at in the foregoing section that there is such a thing as the Composite, gomposed of Component parts. Downloaded from https://www.holybooks.com

Sütra (18).

[Objection.]—"THERE CAN BE NO SUCH THING (AS THE INDIVISIBLE ATOM), AS IT IS SUBELY PERMEATED BY AKISHA." (SU. 18.)

"There can be no such thing as the impartite eternal Atom; —Why?—Because it is surely permeated by Akāsha; both inside and outside the Atom must be surrounded by Akāsha, permeated by it; and being so permeated, it must be made up of parts; and being made up of parts, it must be noneternal."*

Vārļika on Sū. (18).

[P. 515, L. 17 to L. 20.]

The Nihilist, holding the view that "all things are nonexistent," urges the following argument:—"There can be no such &c. &c.—says the Sūtra. As a matter of fact, the Atom must be permeated by *Akāsha*; and being so permeated, it must be non-eternal; just like the Jar."

Sūįra (19).

"OR ELSE, AKISHA WOULD BE NOT ALL-PERVADING." (Sū. 19.)

Bhāşya on Sū. (19).

[P. 231, L. 6.]

"If it is not admitted (that the Atom is permeated by Akāsha), then it would mean that there is no Akāsha inside the Atom; so that Akāsha would cease to be all permading."

Vishvanāţha introduces the section with the following remarks :-- The present section is introduced with a view to establish the existence of {the *impartits* Atom, in answer to the view that the world being a *Vold* there can be no such thing as the Atom, on which the whole argument of the Siddhanta in the foregoing section is based.

• The real point of this objection, as the *faiparys* points out, is that if the Atom is made up of parts, its existence will be open to the same difficulties as those that have been shown to beset any ordinary Composite; so that the inevitable conclusion could be that the Atom is as non-existent as an ordinary thing,—and that petking is existent, dillows worked from https://www.holybooks.com

Varlika on Su. (19).

[P. 516, Ll. 4-5.]

"Or else &c. &c.-says the Sulra. If there is no Akasha inside the Atom, then Akasha ceases to be all-pervading; not being present within the Atom."

Sütra (20).

[Answer.]--INASMUCH AS THE TERMS 'INSIDE' AND "OUTSIDE " ABE DENOTATIVE OF OTHER CONSTITUENT CAUSES OF THE PRODUCT,-THEY CANNOT APPLY TO THE CASE OF THE ATOM, WHICH IS NOT A 'PRODUCT.' (Su. 20).

Bhāşya on (Sü. 20). [P. 231, L 9 to L. 12.]

When one uses the term 'inside' (in regard to an object), it stands for that constituent (part) of it which is hidden (from view) by other constituents; and the term 'outside ' is applied to that constituent (part) which hides the others; and which itself is not hidden from view). And [since both these terms are applied to parts or constituent causes], these can apply only to such objects as are products; they can never apply to the Atom, because it is not a product; the Atom not being a product, the terms 'inside' and 'outside' cannot apply to it; and the object to which these terms are really applicable is only a product (composed) of the Atom, and not the Atom itself; because the Atom is the name of that than which there is nothing smaller.

Varțika on Sz. (20). [P. 516, L. 5 to P. 517, L. 13.]

When the Opponent argues that "the Atom must be non-eternal, because it is permeated by Akasha,"-he should be asked to explain the meaning of 'permeation', what is really meant when it is said that the Atom is permeated by Akāsha P

(a) If 'permeation' only means the relationship of Akosha to the Atom, then what is urged does not go against our doctrine; for the mere relationship of Akashe cannot make

the Atom either eternal or non-eternal. (b) If again, the Opponent were to put forward mere relationship as the ground for non-eternality (of the Atom), in that case the mention of 'Akāsha' would be pointless, as non-elernality would be established by mere relationship (not relationship to any particular substance); e.g. when the mere fact being a product is sufficient to prove the non-eternality of a certain thing, it is not right to put forward (as the ground of that non-eternality) the fact of being produced by Devadatta. (c) As for mere 'conjunction' (which may be regarded as meant by 'permeation'), this is referred to (by the Opponent) later on, under Sū. 4.2-24, as something that has already accomplished its purpose; and under the circumstances [if the 'permeation in Sū. 18, also meant only Ounjunction] there would be a needless repetition of the same (under Sū. 4-2-24). Hence this cannot be the meaning of 'permeation.' (d) If then 'permeation' meant the relationship of the inside of the Atom,-that also would not be right; as the Atom is not a product; the terms,' inside' and 'outside' denote only the different constituents (causes) of a Product; and the Atom is not a product; consequently there can be no 'inside' or 'outside' (of the Atom). (e) If the 'permeation by Akāsha' means the relation of Akāsha with the component parts of the Atom, this also would be exactly like the last explanation; the Atom, not being a product cannot have any component parts. (/) If again 'permeation' be taken to mean the dismemberment of the component parts of the Atom, -- this also may be taken as already rejected by the fact that the Atom is not a product; as a matter of fact, it is only the component parts of a product that can be dismembered; while the atom is not a product; and bence there can be no 'dismemberment of component parts' in its case. Even admitting that they ware component parts in the

Atom,-the Akāsha cannot be the cause of their Var : P. 517. dismemberment; for the dismemberment of things is really brought about by Action (Motion); and there is nothing to prove that it is brought about by Akāsha also; in fact if one admits Akasha to be the cause of the dismemberment of things, he would have to admit that no object ever remains intact; for the cause of dismemberment, in the shape of Akāsha, being present (always and everywhere), "But even though no object could ever remain intact. present, Akāsha would stand in need of other causes (in actually bringing about dismemberment)." In that case, there can be nothing to prove that the Akāsha also, as apart from these other causes, has the power to bring about the dismemberment. (g) If lastly it be held that what is meant by the Atom being 'permeated' is that it is hollow in side,that also cannot be right; for that thing alone is called 'hollow' which having its constituent parts intact in all parts, has no constituent parts in its interior; and as the Atom has no constituent parts, how could its 'per meation' mean 'hollowness'? There can be no other explanation possible (of 'permeation),' Hence the assertion-" because it is permeated by Akasha"-must be regarded as absolutely meaningless.

Then as regards what has been put forward under Sū. 19,—that "Akāsha would cease to be all-pervading, if it were not connected with the inside of the Atom, "—this also is not right; as it clearly 'shows that the Opponent does not know what is meant by 'all-pervading'; when a thing is called 'all-pervading, 'it does not mean that 'it must be connected with what does not exist '; what it means is that it is connected with every object that has a body (that is corporeal),—this/is_whatois meant/wby.ogl/opervadingness. And as there is no such thing as the 'interior' of the Atom, absence of connection with such an 'interior' cannot make the Akāsha cease to be all-pervading.

Sūļra (21).

IT IS BY REASON OF THE PERVASION OF SOUND AND OF CONJUNCTIONS, THAT AKASHA IS BEGARDED TO BE ALL-PEBVADING. * (Su. 21).

Bhāşya on Sū. (21).

[P. 231, L. 14 to L. 16.]

As a matter of fact, Sounds, that are produced anywhere, are found to pervade in $Ak\bar{a}sha$, and subsist in it;—similarly the conjunctions that take place,—with Minds, with Atoms, and with their products,—are also found to pervade in $Ak\bar{a}sha$; not a single corporeal object is ever found to be disjoined with $Ak\bar{a}sha$. From these two facts it follows that $Ak\bar{a}sha$ cannot but be all-pervading.

Vārļika on Sū. 21.

[P. 517, L. 15 to L. 18.]

It is by reason etc. etc.—says the $S\bar{u}/ra$. Inasmuch at the conjunctions with all corporeal objects pervade in Ak ishe —and as Sounds also, whenever produced by the presence of their causes, subsist in $Ak\bar{a}sha$,—and all these have Ak ishe for their substratum,—it follows that $Ak\bar{a}sha$ is all-pervading. $S\bar{u}tra$ (22).

"ABSENCE OF TEANSFIGURATIONS," UNOBSTRUCTIVENESS" AND 'ALL-PERVASIVENESS' ARE THE PROPERTIES OF AKE-SHA. + (SU. 22.)

• The Tāțparya expounds the compound in both ways—(1) Pervasion of Sound and of Conjunctions, and (2) 'Pervasion of the Conjunctions of Sounds.' The Bhāŋya has adopted the former.

+This Sigra anticipates the following objection :—"If Akāsha is really allpervading, as assorted under the foregoing Sigra, then it should offer obstruction to things moving in it, and it should undergo changes in its shape by such objects; as we find in the case of water; as no such phenomena are found to take place, Akāsha cannot be all-pervading.

The sense of the reply is that this reasoning would be all right, if Åkäsha also, like Water, willowmickaderal for mantipatharmarkibhebooks.com

Bhāşya on Sū. (22).

[P. 231, L. 18 to P. 232, L. 5.]

There is no transfiguration (or displacement) caused in $Ak\bar{a}sha$ by things moving in it or striking against it; as there is in Water by the piece of wood passing through it;—and what is the reason for this ?;—the reason for this lies in the fact that $Ak\bar{a}sha$ is not made up of parts. Secondly, $Ak\bar{a}sha$ offers no obstruction to things moving in it or striking against it; that it does not counteract that quality of the thing which causes its motion;—and why is this so ?—It is because $Ak\bar{a}sha$ is not tangible. It is only under contrary conditions, *i.e.* in the case, of such objects as are made up of parts and are tangible,—that we find obstruction; and certainly you can not attribute it to a substance where these conditions are not present.

Further, the character of 'product' must be denied to the Atom, because it would mean that the component parts of the Atom are smaller than the Atom; if the Atom were made up of parts, these parts should be smaller than the Atom;—why?—because it is always found that there is a difference of size between the Cause and its Product; it is for this reason that the parts of the Atom would have to be smaller than the Atom; as the Atom that is made up of component parts must be a Product.^{*} It is for this reason that we deny the fact of the Atom being a Product.

Lastly, the non-eternality of products is due to the dismemberment of its constituent cause, and not to 'permeation by $\Delta k\bar{a}sha'$ (as held by the Opponent, in Sū. 4-2-18): e.g. when the clod of earth is destroyed, it is so by reason of the dismemberment of its component parts, and not by the entering into it of $\Delta k\bar{a}sha$.

Vārtika on Sū. (22).

[P. 518, L. 2 to L. 11.]

Absence of Transfiguration etc. etc.—says the $S\bar{u}/ra$. A moving or active object does not transfigure (or displace) $Ak\bar{a}sha$; nor does $Ak\bar{a}sha$ obstruct the active qualities of the

[•] The right reding out superint mps // superint for ooks.com

moving and active object. —And why?—Simply because Akāsha is intangible. It is only a tangible substance that is displaced by, or obstructs, things; and Akāsha does not possess that property (of tangibility); hence it is unobstructive. You cannot attribute what you find in tangible and partite things to what is the reverse of it.

We have already pointed out that if the Atom were further divisible, it would no longer be the *Atom*.—Why?— Because the name 'Atom' applies to that at which the process of division ends, and than which there is nothing smaller.

Further, if the Atom were liable to destruction, such destruction could be due either to the destruction of its constituent (cause), or to the dismemberment of its constituents. As a matter of fact, neither of these is possible in the case of the Atom, because it is not a product, as we have already explained. For these reasons we conclude that it is not right to assert that "the Atom must be non-eternal, because it is permeated by Akāsha" (Sū. 4-2-18).

Sūţrā ,23).

[The Nihilist]—" BUT THE ATOM MUNT BE MADE UP OF COMPONENT PARTS; BECAUSE IT IS ONLY CORPOREAL OB-JECTS THAT HAVE ASHAPE." (Sū 23).

Bhāşya on Sū. (23).

[P. 232, Ll. 7-9.]

"As a matter of fact, shape belongs to only such things as are limited and tangible,—such shapes as triangular, rectangular, square, and globular; and this 'shape' is only a particular arrangement of component parts;—Atoms also are endowed with the globular shape;—hence these must be made up of component parts."^e

[•]The Variika and Vishvanätha constructhe Sutra as propounding two reasons :--•The Atom must be made up of components,---(a) because it is corporeal, and (b) because it likewinkpaded from https://www.holybooks.com

Vörlika on Sü. (23). [P. 518, L. 13 to L. 16.]

But the Atom etc. etc.—says the Safra. (A) Atoms must be made up of component parts, because they are corporeal; (B) because they have a shape, Atoms must be made up of parts; every object with shape, e.g. the Jar and such things, are found to be made up of parts;—the Atoms have shape;—therefore they must be made up of component parts."

Sülra (24).

"ALSO BECAUSE THEY ARE CAPABLE OF CONJUNCTION [ATOMS MUST BE MADE UP OF COMPONENT PARTS]." (SQ. 24).

Bhāşya on Sū. 124).

[P. 232, L. 11 to L. 21].

"When an Atom comes between two other Atoms and becomes conjoined to them, it brings about separation between them; and from this separation it is inferred that the intervening Atom is conjoined, in its fore-part, with the Atom lying behind it, and, in its aft-part, with the Atom appearing in front of it; and these fore and aft parts are the 'component parts' of the Atom. Similarly when the Atom becomes conjoined in all its parts, it must be regarded as having component parts all over."

> Vārļika on Sū. (24). [P. 518, L. 19 to P. 519, L. 5.]

"Also because etc. etc.—says the $S\bar{u}$ /ra. What the $S\bar{u}$ /ra means is that the Atom must be made up of component parts, because it is capable of conjunction. "What is asserted in this $S\bar{u}$ /ra has already been said under the preceding Sūtra, where the fact of the Atom having a shape has been put forward; and it is only a particular form of conjunction that has been spoken of by means of the term shape.' What

the terms 'corporeality', 'shape' and 'conjunction' is as follows]—(a) the 'corporeality' belongs to only such objects as are limited in extension and it consists in the six kinds of dimension,—small, largo, long, short, extremely small, and extremely short;—(b) 'Shape' is that particular kind of conjunction which is also called 'prachaya', 'collocation; —'and (c) 'Conjunction' is 'approach preceded by nonapproach.'

Bhāşya on Sū. (25).

[P. 232, L. 14 to P. 233, L. 6.]

[The Bhāşya answers the arguments of the Nibilist, as follows]-

(A) As regards the argument—" The Atom must be made up of component parts, because it is only corporeal objects that have a shape" (Sū. 23),—this has been answered by us already. "What is the answer that has been given ?" The answer given was—(a) that there can be nothing smaller than that at which the process of division comes to an end (P. 230, L. 9);-and (b) that the Atom cannot be regarded as a product, as, if it were so, then the parts of the Atom would be smaller still (P. 231, L. 22). (B) As regards the argument—"also because they are capable of conjunction" (Sü. 24), which means that "the Atom can bring about separation only if it is tangible, and conjunction not pervading over the whole of its substratum, it must be divisible into parts",—this also we have answered by pointing out that it is true that the Atom is tangible, but the separation caused by the intervening Atom is due to its being an obstacle in the way of the coming together of the two Atoms,—and not to its being made up of component parts. "But the Atom being tangible and causing sep-aration, inasmuch as the conjunction of the Atom does not pervade over the whole of its substratum, the Atom must be divisible into parts, and it would appear as if it were made up of component parts." This also we have answered by pointing out (above)—(a) that the process of division must end at a thing than which there is nothing smaller, and (b) that the Atom cannot be regarded as a product, as that would mean that its parts are still smaller ks.com As regards the arguments—"(a) Because it is only corporeal objects that have a shape (Sū. 24', and (b) because Atoms are capable of conjunction (Sū. 24), Atoms must be regarded as being made up of component parts ",—these arguments

CANNOT SET ASIDE (THE FAOT OF ATOMS BEING IMPARTITE', BECAUSE THEY LFAD TO AN INFINITE BEGRESS, AND INFINITE BEGRESS CANNOT BE RIGHT (SUTA 25).

The arguments put forward mean that everything that is corporeal, and everything that is conjunct,—all these are made up of parts; and as such these arguments lead to an infinite regress; and infinite regress cannot be right; if infinite regress were right, then alone could the said arguments have any force. Consequently these cannot set aside the fact of Atoms being impartite.

Further, as a matter of fact, it is possible for the division of an object to completely destroy that object; hence it is not possible to carry on the process of division till the disappearance of the object.

If there were an *infinite regress* (such as is involved in the Opponent's arguments), it would mean that in every object there are endless component substances; so that (a) there should be no conception either of diverse dimensions, or of gravity, and (b) after the dismemberment of the component parts of the Atom, the Composite and the Component would have to be regarded as of equal dimension.

Vārļika on Sū. (25).

[P. 519, L. 5 to P. 524, L. 2.]

The arguments cannot set aside, etc., etc.—says the $S\bar{u}$ /ra. Firstly, as regards the argument—" because they are corporeal, Atoms must be made up of component parts,"—this is not conclusive; the component parts of the Atom, for instance, would be corporeal and yet without parts; so that the premiss of the argument is not true. (With a view to avoid this difficulty) it might be held that "there will be component parts of the Atom also;"—but in this manner, the Diad would be immeasurable, either by gravity, or by number, or by dimension,—asowe/have mircady/explained (ander Su. 4-2-17.)

" But the corporeal object would go on being divided until it reaches the end." In that case that which is left at the end would have to be regarded as without parts. "That which is left at the end is division itself." That cannot be; for there can be no 'division' without something to be divided. In fact only the following alternatives are possible:—(a) the division ends with the Atom; (2) the division ends with the disappearance (of the thing divided); and (3) the division is endless. (1) Now if division be held to end with the Atom, then your reasoning involves self-contradiction; for in reality the Atom is with shape and is yet not made up of "What is the self-contradiction in this?" [When parts. you say that the division ends with the Atom] you admit the Atom to be without parts and to have a shape, and yet you assort that it is made up of parts; and this assortion of yours is contrary to your former admission. (2) and (5) If, on the other hand, the division be held to be either without end, or to end with the disappearance of the thing,-even so (1) there would be self-contradiction, (2) there would be the incongruity of the Diad being immeasurable (if there were no end to the division), and (3) the division would be without a substratum (if the division went on till the disappearance of the thing).

Further, in your Proposition 'the Atom is made up of parts,' the two terms are mutually contradictory. "How so?" The expression 'made up of parts' means that the thing has been produced out of, and subsists in, a homogeneous substance,—the component part being the homogeneous substance in which it subsists; so that when it is said that the Atom is made up of parts, it means that the Atom is a particular kind of product; and to call it the 'atom,' and then to say that it is a particular kind of product, involves a self-contradiction in terms http: Forwtheybueryconame 'atom' connotes that which is the final constitutent cause of things, which, as such, can never be a product]. If you hold that what is generally called the 'Atom' is preceded by (produced out of) just one (smaller) Atom;—then this would mean that the Atom is not made up of parts; according to this view

Var. P. 520. there would be no component purts in the Atom; all that it would mean would be that

being preceded by (produced out of) Atoms, the Atom is a product. And this assertion would be untenable, as there could be no instance to substantiate such a proposition; there is no instance available to show that there is any thing produced out of a single constituent cause. Further, in the event of the Atom being produced out of a single constituent cause, there would be no need of causal appurtenances or factors; so that there would be no such thing as the 'previous non-existence' of the Atom [as the 'previous non-existence' of a thing is that point at which all its causal factors are present and all that remains is the actually coming into existence of the thing; so that in a case where there are no causal appurtenances, there can be no ' previous non-existence '];---and there can be 'producing' (or 'coming into existence') of that of which there is no 'previous nonexistence.' "But in the case of Sound it is admitted that there is previous non-existence, even though it is preceded (produced) by a single sound." This also is not true; in the case of Sound there is not only one cause; what really bappens is that one Sound is produced by another Sound, only as aided by several factors in the shape of the particular receptacle and so forth.

Even admitting that the Atom is produced out of a single Atom,---what would be the meaning of its being made up of parts? Which (Atom) would be the composite, and which the component parts?which as the source would be the component part." In that case, since the cause-atom would not be existing at the time that the product-atom exists, you would have to explain what the meaning would be of being with parts.^{*}

Then again, when the Opponent argues-" because the Atoms are corporeal, they must be made up of parts,"-he should be asked the following alternative question :- What is that 'body,' 'mūr!i,' by virtue of which the Atom is called 'corporeal,' mūrțimān'? If there is such a 'body,' is it something different, or non-different, from the Atom itself? If the 'body' consists of a particular Colour &c.,-then, in accordance with your tenets, there is nothing that could be 'corporeal' by virtue of such a 'body'; for according to you there is no proof for the existence of any Atom apart from Colour &c.; you hold that the Atom consists of Colour &c. in their minutest form; and what is itself only Colour &c. cannot be regarded as 'corporeal' by virtue of the same Colour &c. And if the 'body' is not different from the Atom, then we do not see what could be the meaning of the possessive affix, 'malup' (in 'murfiman,' 'corporeal'). "But even in the case of non-different things, we find the possessive affix used : when, for instance, we speak of the army as being 'hastimati,' 'equipped with elephants'." Our answer to this is that we have never found the possessive affix used in the case of non-different things; (as regards the example cited) we have already shown above (in adhyaya II) how the 'army' is something different (from the elephant &c. constituting it).† Thus then, if the Atom is not something different (from Colour &c.,), and there is no 'body' (of the Atom), the statement 'atoms are made up of parts

[•] When the part is not present, how can the product, whole, be said to be with parts ?

because they are corporeal,' comes to mean that ' Colour &c. are endowed with Colour &c., because these are possessed of Colour &c.'! This same reasoning also disposes of the argument that "the cloth must be made up of parts, because it is corporeal" for the 'cloth' also you do not admit to be anything different from Colour &c.; nor do you admit its corporeality; and yet you assert that ' the cloth is made up

Var. P. 521. Var. P. 521. of parts because it is corporeal,'; and if by this statement you admit the cloth to be something different, then you stultify yourself; while if you do not admit it, then your desired conclusion is not proved; for the right corroborative instance is that which is endowed with both qualities (the probans and the probandum), while in the case of the cloth, 'being made up of parts' cannot mean 'corporeality.'*

What has been said above also serves to dispose of the Opponent's argument-" Atoms must be made up of parts because they are capable of conjunction " (Sū. 4.2.24). For if 'Conjunction' is admitted (as something different from Atoms), then there is self-contradiction (on the part of the Nihilist); while if it is not so admitted, then the "premiss ('because they are capable of conjunction') means 'because they are atoms'! If it be held that 'capability of conjunction' means being endowed with a peculiar configuration,then such a probans would be what is not admitted (by both parties); for 'being endowed with a peculiar configuration ' means exactly what is meant by 'being made up of parts, ' If by 'configuration' you mean that particular dimension of things which is not all-pervading,-in that case 'being endowed with configuration ' would mean the same as ' being corporeal '; so that there would be no point in putting forward both the premisses-" because they are corporeal' and

[•] This is an obscure passage : we have put upon it the best construction possible. But the sense is not QAWAS leaded from https://www.holybooks.com

'because they are endowed with a peculiar configuration.' It has also been pointed ou', (says the Bhāşya) that the process of division must end at a thing than which nothing is smaller, and that the Atom cannot be regarded as a product, as that would mean that its parts are still smaller.

Another way in which the Opponent puts his argument is as follows :—" Because the Atom is capable of conjunction, that Atom, which, appearing between two other atoms, becomes connected with both, must have parts. This same idea is expressed in the following verse :— 'Since there is simultaneous connection with six atoms, the Atom must have six parts; if all six occupied the same point in space [i. e. subsisted in the same substratum] * the aggregate would still remain a mere Atom. 'That is to say, inasmuch as (in the Triad) the Atom becomes simultaneously connected with six Atoms, it must have six parts, because the several connections must be in different parts of it; if all the connections were in the same part, then the aggregate formed of the six Atoms could still be a mere Atom.''

[Our answer to the above is as follows]—If what you speak of is in reference to each pair of Atoms (that are in contact with a central atom), then the conjunctions certainly do not appear in the same substratum \dagger [That is, one conjunction, that of the first Atom with the central atom, appears in the *first atom*, while that of the second atom with the central Atom, appears in the *second Atom*, so that they do not appear in the same substratum, and yet this does not prove that the Atoms have parts]. If, on the other he td, what is said is in reference to that central Atom with which the other Atoms are connected, then, inasmuch as

[•] The Tätzarya explains " desha' in this context as equivalent to adhara, " 'eubstratrum.'

⁺ The reading allowing to the flat paryavie and full the s.com

the several conjunctions of the latter would subsist in the single central Λ tom, there would be nothing objectionable in the statement that the con-

junctions (of the single Atom) with the several Atoms appear in the same substratum. Then, as regards the assertion (in the second part of the verse) that "the conjoined Atoms would occupy the same point in space (i. e. subsist in the same substratum)", -this is not right; because we do not hold any such view : [according to our view], there is no such thing as 'substratum' for the Atom; how then could they be said to subsist in the same substratum? Further. as a matter of fact, there is no object in nature that subsists in precisely the same substratum as another thing; so that the example cited in support of the Opponent's reasoning must be "But the Cause and its Product do untrue (unknown). subsist in the same substratum; e. g. when the Jar comes to be connected with a piece of Cloth, it becomes connected also with the yarns (constituting that cloth), and also with the parts of those yarns. [So that instances are not wanting in support of the allegation that several 'atoms subsist in the same substratum']." This is answered by the simple fact that we do not admit of any such thing; what happens (in the case cited) is that the conjunctions subsist in the same substratum, and not the Cause in its Product. †

• What subsists in a substratum can never be the Atom ; as the Atom does not subsist in anything ; so that in the case in question what would subsist in the same substratum would be the *Conjusctions*, not the *Atoma*.

 \dagger What we are denying is the fact that two things cannot subsist in the same substratum,—*i. c.* they cannot inhere in the same substratum ; we do not deny the conjunctions subsisting in the same substratum ; and it is only if several atoms subsisted in the same substratum, by *intersecs*, that they would remain a mere *atom* ; and there would be no enlargement in their dimension ; *s. the several* qualities of Colour, Odour, and Taste inhering in the same object do not enlarge its dimension three-fold; and the reason for this lies in the fact that these qualities are immaterial, incorporeal, and as such can inhere in the same substratum. In the case of corporeal substances, on the otherwichand from substratum.

[This has been said after admitting, for the sake argument, the hypothesis of the Opponent.] As a matter of of fact however, Conjunctions also cannot subsist in the same substratum as the conjunction subsists between each separate couple of things *. So that the allegation—" all six subsisting in the same substratum,"—is not true, either as referring to the co-subsistence of the substances (Atom), or as referring to the co-subsistence of the conjunctions.

Another argument propounded by the Nihilist is-"that in which there is diversity of space-points (as there is in the Atom, which combines with several Atoms on its several space-points) cannot be regarded as one [Hence that which is regarded as one Atom must be regarded as consisting of several parts]." But who says that there is 'diversity of space-points'? What are regarded as the 'several space-points' are only so many contacts with space; and when we speak of 'diversity of space-points' in regard to the Atom, we do so on the basis of the assumption that there are such imaginary contacts with space; in reality there is no 'diversity of space-points' in the Atom; nor is there any diversity in the Atom itself; the only fact that remains is that the Atom is in contact with space; and this is not incompatible with our theory. "In that case, as there would be no points of space in the Atom, there should be no shadow, nor screening." But shadow and screening are due, not to presence of space-points, but to corporeal-

possible; so that if the conjunction of these does lead to the enlargement of dimensions, there is nothing incongruous in this. Thus it is not true that the conjunctions of one Atom with several Atoms would not lead to an enlargement of the atomic dimension; for what would prevent such enlargement would be their co-inherence in the same substratum, and not conjunction with them.—T&parya.

[•] That is, when the fruit is in the basket, they form the substratum of the conjunction between the fruit and basket; while of the conjunction between a part of the fruit and a part of the basket, the substratum consists of these parts, and not of the Pruit and Basket Hier distributed.

ity and tangibility; it is only a corporeal and tangible object that screens another object. "What is the meaning of this screening?" What it means is that the Object being itself connected (with something) prevents the connection (with that same thing) of another object. Shadow also is due to the screening of the atoms of light; i.e., the corporeal Atom screens the atom of Light; and there is 'Shadow' where this screening takes place. In fact 'Shadow' is the name applied to such substances, qualities and actions as are connected with a smaller amount of Light (than the adjacent things); and when those same substances have all light completely turned away from them, they come to be called Var. P. 523.

dow' and 'screening' are capable of being otherwise explained, they cannot serve as valid reasons (in support of the proposition that Atoms are made up of parts).

What has been said above also disposes of the following reasons (that have been put forward in support of the contention that Atoms are made up of parts) :—(a) 'Because they have action,' (b) 'because they are tangible,' (c) 'because they are productive of substances,' (d) 'because they are the substratum of that faculty which is the cause of motion.'. (e) 'because they are endowed with priority and posteriority,' and so forth. "In what way are these disposed of ?" The argument-" Atoms must be made up of parts because they are corporeal "-has been found to be beset with defects in the Proposition, and also with defects in the premises; and these same defects-which fall under one or other of the fallacies of 'Contradiction,' 'Untruth,' 'Inconclusiveness' &c. may be pointed out in every one of the above-mentioned . reasonings propounded by the Opponent. The rest is clear in the Bhayya.

[&]quot; dancraanne diver her mpsy/www.holybooks.com

There are some people who seek to prove that "Atoms are not-eternal" on the ground of their having activity, and so forth. These people can only mean that this character of " having activity ' is either the ' discloser ' or the ' producer ' (of non-elernality). Now if the presence of action were the ' producer' of non-elernality, then anything that happens to be without action would have to be regarded as elernal. If what is meant by 'action' is being born, then the allegation of the Opponent comes to mean that "Atoms are non-eternal, because they are born "; and as a matter of fact, this character of being born is not accepted by all parties in regard to Atoms. If, on the other hand, the character of 'having activity' is meant to be only the discloser (of non-eternality). then, in that case, something else will have to be pointed out as being the cause of the 'non-eternality' of Atoms; for it is not in the nature of the discloser that it should bring into existence the thing that it discloses; what the discloser does is only to disclose, or bring to view, what has been brought into existence by something else; e. g. the Lamp does not bring into existence a thing that did not exist before and then illumine it. If the Nihilist means by 'action' in this connection, such actions as those of 'Throwing Upwards' and the rest, that are postulated by other philosophers,-then he stultifies himself. This same reasoning applies to the case of the Jar and such things that have been cited (by the Opponent) as corroborative instances. Further, when a certain thing is spoken of as 'having activity,' what is meant is that activity is inherent in it. If the Nihilist admits this. he stultifies himself; if he does not admit it, then his argument amounts to the allegation that " the atom is non-eternal, because it is the atom." [As for the Nihilist, the Atom is not something distinct from its Colour, Action &c.]. Then again, the possessive affix is used only in connection with something that differs from other filming osthetwo ossesses oit; so that the

use of this affix (in the term ' $Kriyava{tv\bar{v}t}$,' 'having action') involves 'self-contradiction' on the part of the Nihilist; while if the thing (Action) is not held to be something different (from the Atom), then he can have no instance in corroboration of his allegation.

In the manner shown above, other allegations of the Opponent also may be disposed of in detail and refuted.

It may be argued by the Nihilist that he puts forward the aforesaid reasons only as they are admitted by other philosophers (so that the urging of them cannot involve selfcontradiction on his part). But, in that case, if he admits them as cognised by means of the Instruments of Right Cognition,—then why should be call them 'admitted by others'? While if they are not so cognised, then, why should he seek Var. P. 524. to propound, for the convincing of others, a fact which he has not himself rightly appre-

hended?

End of Section (3).

Section (4).

[Sūțra 26-37.]

Refutation of the Denial of the External World.

Bhāşya on Sū. (26).

[P. 233, L. 6 to L. 13.]

[The Bauddha Idealist says]—"You take your stand upon Cognitions, and then go on to assert that the objects of these Cognitions exist; but all these Cognitions are wrong notions. If these were right notions, then alone could the proper examination of Cognitions enable us to form an idea of and comprehend the real character of their objects."

1628

[•]The foregoing two sections have proved that all ordinary things are made up of component parts, and that the Atom is not so made up,—we are now led on to discuss the question as to whether or not external objects exist. It is only when external things exist that there can be any occasion for considering whether or not they are compositionaded from https://www.holybooks.com

Stifra (26).

[Parvapaksa]—" As a matter of fact however, when we come to analyse things by our brason, we fail to apprehend their real character; and this non-apprehension must be like the non-apprehension of the 'cloth' after the yarns have been abstracted." Sutra 26).

"When we come to analyse each yarn in the Cloth,—as "this is a yarn," 'this is another yarn," and so forth,—we fail to perceive in it anything else besides the yarns, which could be the real object of the notion of 'Cloth;" and since we do not perceive things as they are ordinarily conceived of, it follows that no such things (as the Cloth) exist; so that the *Cloth* being non-existent, if there is a notion of 'Cloth,' it must be a wrong notion. similarly with all things."[†]

Vārļika on Sū. (26).

[P. 524, L. 3 to L. 15.]

"On the basis of Cognitions you regard things as existent; but the cognitions are all wrong; if they were right, then a careful scrutiny of them would have enabled us to apprehend the real nature of things. As a matter of fact however, etc. etc.—says the Su(ra. The objects of cognition,—the Jar, the Cow and so forth—do not exist in reality;—why ? because when we come to examine them by our reason, we fail to apprehend them as distinct from one another. E.g. when we come to analyse our notion of the 'Cloth,' we find that it is made up of the several notions of 'yarns'; and there is no such thing as the Cloth, which could form the object of the notion of 'Cloth'; similarly when we come to

• Cf. Bauddhakarika---- बुद्धया विविच्यमाणानां स्वभावा नावधार्यते । भतेत निरमित्राज्यास्ते निरस्वमावाध कीर्तिताः ॥

Satish Ch. Vidyabhūsaņa finde in this Sūţra an echo of the Mādhyamika sūţras.

There is no Cloth apart from the yarns; there is no yarn apart from its parts; and so on up to Atoms; of Atoms also we cannot perceive the real character. Hence from Atom Downlie and by the there is no yarn apart from its analyse our notion of the yarns, we find it to be made up of the notions of the parts of the yarns; and so with the parts of these parts, t^{""} we reach the Atoms; and when we come to analyse the Atoms themselves, we reach a point where nothing remains. Thus all things being non-existent, it follows that the notions of such things as the 'Jar,' as also of such things as the 'Cow,' are wrong."

Sūfra (27).

[Siddhānfa]—THE BEASON PROPOUNDED IS INVALID; AS IT INVOLVES SELF-CONTRADICTION. (SU. 27).

Bhūsya on Sū. (27).

[P. 233, L. 15 to L. 17.]

If an 'analysis' of things by reason is possible, then it is not true that the real nature of things is not apprehended; if, on the other hand, the real nature of things is not apprehended, then there can be no analysis or scrutiny of things by reason. So that to allege, that "there is analysis of things by reason —and the real nature of things is not apprehended," involves a contradiction in terms. We have explained all this under Sū. 4-2-15, where it has been pointed out that—the difficulties in connection with Composites and Components would continue till the total negation of things.'

Varlika on Sū. (27).

[P. 524, L. 17 to P. 525, L. 7.]

The reason propounded is invalid etc. etc.—says the Sāira. It is not right to say that when we analyse things by reason, all things are found to be non-existent.—Why ?—Because it

• The right reading is wiaini gau adara aruneranguadaalk as found in Puri B.

† When the real nature of a thing is not comprehended, how can there be analysis of it by reason? [As regards the analysis of things put forward by the Opponent under the preceding Sūţra] the process of analysing must end at a certain point; if it did not, then the Diad would become immeasurable, &c. &c. &c. as pointed out before. **Dflaturgied** from https://www.holybooks.com

1630

involves self-contradiction. "What self-contradiction is there?" The 'self-contradiction 'consists in incompatibility; that is, if there can be analysis of things by reason, then Var. P. 525. things cannot be non-existent; and if things are non-existent, then there can be no analysis of things by reason.

. When the Opponent asserts that all things are non-existent, he should be asked his proofs for this. If he does adduce proofs, then he stultifies himself; " while if he does not adduce proofs, then, in the absence of proofs, his purpose (of establishing his proposition) fails to be accomplished. If the purpose of establishing a proposition could be accomplished without proof, why could not the proposition that ' all things are existent ' be regarded as established ? In fact, the flaws that we have indicated in the view put forward under Sū. 4-1-37—viz. " all must be non-entities, because all things are known to be mere negations of one another, "—are found also in the present doctrine of the Idealist.

Sūţra (28).

THE NON-APPBEHENSION (OF THE WHOLE) APAET (FROM ITS PARTS) IS DUE TO THE FACT THAT IT SUBSISTS IN THESE. (Sū. 28.)

Bhāşya on Sū. (28). [P. 234, L. 2 to L. 5.]

As a matter of fact, the Product subsists, is contained, in its Causes; it is for this reason that it is not apprehended apart from these latter; there is separate apprehension only when the contrary happens to be the case; that is, two things are separately apprehended only when one is not contained in the other.

^{• &#}x27;Proof' being included under 'all things,' the adducing of the proof would mean the abaudoning of the position that nothing can be known, everything is non-existent. Downloaded from https://www.holybooks.com

Then again, the analysis of things by reason does lead to the distinct apprehension of things,—as is found in the case of Atoms, which are imperceptible; that is that which is perceived by the senses, when it comes to be analysed, is surely recognised as different (from the *imperceptible* Atoms).*

Vārțika on Sū. (29).

[P. 525, L. 7 to L 12.]

It has been argued by the Opponent that—" if the Cloth and such things were something distinct (from their component parts), then the analysis of the yarns could lead us to the apprehension of the cloth";—our answer to this is as follows:—the non-apprehension is due &c.&c.—says the $S\bar{u}$ tra. As a matter of fact, the product is contained in the cause; hence it is not apprehended apart from the latter; there is separate apprehension only when the contrary happens to be the case; that is, when between two things, there exists neither the relation of cause and effect, nor that of the container and contained, then alone we apprehend the one apart from the other.

🔪 Søfra (29).

IN BEALITY THINGS ARE COGNISED BY MEANS OF THE INSTRUMENTS OF RIGHT COGNITION. † (Sū. 29).

Bhāşya on Sū. (29).

[P. 234, L. 7, L. 11.]

When things are analysed by reason, what sort of apprehension of the real nature of things we have, and how we have it,—and also what sort of apprehension we do not have, and how we do not have it,—all this is known through what we can

•In the case of ordinarily perceptible composites and components—where both are perceptible, *e. g.* the cloth and the yarns,—it may be difficult to apprehend the composite as distinct from its parts. But when it comes to the composite thing, whose components are atoms, the distinct apprehension becomes quite easy; the composite being perceptible while the component is not perceptible.— *Tatparya*.

†This Sütra is meant to show that even in the case of ordinary things, where the composite and its components are both perceptible, we do have the distinct apprehension of things inclusive instructions.com cognise by means of the instruments of right cognition. In fact the very 'analysis of things by reason' consists of what is cognised by means of the instruments of right cognition; as it is only such cognitions that pervade through all scriptures and all actions, as also all activities of living beings. It is only when one comes to examine things by his reason that he comes to determine that a certain thing exists and another thing does not exist And such an examination or analysis does not warrant the conclusion that nothing exists.

> (Vārțika on 180. 29). [P. 525, Ll. 14-15.]

In reality things are cognized fc. fc.—says the Sütra. What exists and in what manner it exists,—as also what does not exist, and in what manner it is non-existent—all this is ascertained through what we cognize by means of the instruments of right cognition. The rest is clear in the Bhāṣya.

Sūfra (30).

BY BEASON OF THE POSSIBILITY AND IMPOSSIBILITY OF PROOFS [the Parvapaksa allegation becomes untenable].

(Sū. 30).

Bhāşya on Sū. (30). [P. 234, Ll. 13-16.].

Under the circumstances, the allegation "nothing exists" is untenable—Why ?—By reason of the possibility and impossibility of proofs. That is, if proof is available in support of the allegation that "nothing exists," then the allegation becomes self-condemned :—if, on the other hand, no proof is available in support of the allegation, how can it be established ? If it can be established without proofs, then why cannot the assertion "all things exist" be regarded as established ?

[•] The *fdparya* construes this last sentence with the following Sätra. It appears better to construe it with the foregoing *Bhåsya*. The connection of the next Safra follows **Fromits desyrromity to antipytic for w** holybooks.com

Vārļika on Sū. (30).

[The Vār!ika has nothing to say on this Sūţra.] Sūļras (31) and (32).

[The Idealist objects to what has been said in Su. 30.]-

"THE NOTION OF BEALITY IN REGARD TO THE 'IN-STRUMENTS OF RIGHT COGNITION' AND 'OBJECTS COGNISED' (BY MEANS THEBEOF) IS SIMILAR TO THE NOTION OF THE BEALITY OF DEFAMS AND THE OBJECTS DEFAMT OF; (Sū. 31) -OK, IT MAY BE LIKENED TO THE NOTIONS OF BEALITY IN REGARD TO MAGICAL PHENOMENA, IMAGINARY CITIES IN THE AIB, AND THE MIRAGE." (Sū. 32).

Bhāşya on Sū. (31) and (32).

[P. 234, Ll. 18-19.]

"In Dreams, no objects are existent, and yet we have the notion of reality in regard to them; similarly neither 'Instruments of Cognition' nor 'Objects of Cognition' are really existent, yet we have the notion of reality in regard to 'Instruments of Cognition' and 'objects cognised' by means thereof. [And it is not so in Dreams only, in the waking condition also, we have several such notions of reality in regard to things not really existent; e.g. magical phenomena &c. &c.]."

Vārtika on Sū. (31) and (32).

[P. 525, Ll. 18-20.]

"The notion of reality &c. &c.—says the $S\bar{u}$ tra. In dreams, no objects exist, and yet we have the notion of things dreamt of being really existent; similarly neither 'Instruments of Cognition' nor 'Objects of Cognition ' really exist, and yet we have the notion of these being real."

Sūįra (53).

[Answer.]-SINCE THERE IS NO BEASON (IN SUPPORT OF IT), THE PROPOSITION (OF THE OPPONENT) CANNUT BE BE-GARDED AS DESTABLISHED IN H(SELVISS) OLYDOOKS.com

Bhāşya on Sū. (33).

[P. 235, L. 1 to L. 11.]

As a matter of fact, there is no reason in support of the view that "the notion of 'Instruments' and 'Objects' of Cognition are like the notion of reality in regard to things dreamt of, and it is not like the cognition of things during the waking state ";-and since there is no such reason, the Proposition cannot be regarded as established. In fact there is no reason to show that what are cognised during dreams are non-existent things. "Inasmuch as things dreamt of are not perceived when the man wakes up, (they must be regarded as non-existent)." [According to this reasoning of yours] inasmuch as we do apprehend the things cognised during the waking state, the existence of these cannot be denied; if, from the fact of our not apprehending, on waking, the things cognised in dreams, you infer that these things are not existent,-then it follows that the things that we do apprehend when awake, are existent, because they are apprehended; so that the reason you put forward (in proof of the unreality of things dreamt of) is found to have the power of proving a conclusion contrary to your tenets. It is only when the existence of things can be inferred from their apprehension, that you can infer their non-existence from their non-apprehension. And if under both circumstances (of dream as well as of waking) things were equally nonexistent, then non-apprehension could have no power at all (of proving anything); when, for example, there is nonperception of Colour when the lamp is absent, what justifies our attributing the non-perception of Colour to the absence of the Lamp is the fact that the Colour is existent, + (and would have been perceived if the lamp were there).

The right reading is sugaring सद्भावेसति अनुपत्र त्यादभाद: सिध्यति as found in Pnri B., and countenanced by the Varfika.

[†]We can attribute the non-perception of colour to the absence of lamp, only if we know that colour is existent, and would have been perceived if the lamp were there. If all things were always—during dreams as well as during the waking state—con-existent, then their non-perception could not prove anything at all; as in that case we could have no such notion as that 'if it existed, it would have been perceived'. Downloaded from https://www.holybooks.com Further, you have to show cause for the diversity that is found in dream-cognitions: *e.g.* one dream is beset with dread, another with joy, and yet another is devoid of both; while at times one does not dream of anything at all. According to the theory under which the dream-cognitions are due to real causes, the said diversity can be explained as being due to the diversity in those causes.[•]

Varțika on Sū. (33).

[P. 526, L. 4 to P. 527, L. 11.]

What has been alleged by the Opponent cannot be accepted; as there are no proofs in support of it; no proofs have been adduced by the Opponent in support of his allegation that-" the notion of reality in regard to things is like the notion that we have in dreams." "Apprehension itself constitutes the proof; that is, what proves the fact that the things apprehended during the waking state are non-existent apart from Consciousness is the phenomenon of Apprehension itself,-the apprehension during dreams serving as the corroborative instance,"† This proof is ineffective : because the instance cited is as unproved as the Probandum itself [that objects dreamt of have no existence is as open to doubt as that objects perceived during waking have no existence]. What is the proof of your allegation that "the things that are apprehended during dreams have no existence apart from consciousness"? "The proof lies in the fact that they are not perceived when we wake up." If you mean by this that-" because the things are not perceived by us when awake, they must be non-existent, "-this can have no force; as you have introduced a qualifying term ('when

[•] This explanation cannot be available for the Idealist, for whom there is no real object at all.

[†] The argument being thus formulated—"Things perceived during the waking state have no existence,—because we have apprehension of them, --just as we have of things dreamt BfWnloaded from https://www.holybooks.com

awake '), which implies that those that are perceived by us when awake do exist; either this is the implication of the qualifying term, or the qualified phrase, "because they are not perceived by us when awake," has no meaning. Further, if you regard the thing perceived by us when awake as non-existent, what is your reason for believing that the Mind exists ?

Secondly, the fact of non-apprehension during the waking state, which you put forward as the reason for your allegation, has no validity at all; because non-apprehension is found to have the power (of indicating something) only under circumstances contrary to what you allege; that is, as a matter of fact, the non-apprehension of a thing can prove its non-existence only if its apprehension be taken as proved by its existence; so that 'non-apprehension' can serve as an efficient reason only under circumstances contrary to your assertion.

[The Idealist states his position with reasons]—" There are no objects apart from Consciousness, because they are capable of being apprehended, like Sensation and the rest. Sensation and the rest, being capable of apprehension, have no existence apart from Mind; similarly Objects also."

[The Varlika answers the Idealist's argument as follows]-

As a matter of fact, 'Sensation' is Pleasure and Pain, and 'Consciousness' is Cognition; and since *Cogniti on* is something different from *Pleasure and Pain*, the instance you have cited in corroboration of your reasoning is not applicable at all. That Pleasure and Pain are different from Vár. P. 527. Cognition is proved by the fact that while the the former are 'objects apprehended,' the latter is 'apprehension' itself, and certainly *Apprehension* is something different from the *apprehended object*. Even if Cognition were non-different from Sensation, yet there could be no instance to show other the apprehension of the prehended of the senset of the sen

Object' are one and the same; the action and its objective can never be one and the same. If you persist in regarding the two as one, without heeding what is vouched for by real experience,-still such a conception would be contrary to your doctrine that there are four forms of Consciousness. If the fourfoldness is not admitted, and mere Cognition or Idea be insisted upon as the only thing perceived,then the person holding such views should be asked to explain the ordinarily perceived diversity of Cognitions. There being no eternal or external cause for the diversity of Cognitions, whence does there arise diversity in Cognition ? If he admits that the diversity in Cognitions is like the diversity in dreams .- he should be forced to admit that in Cognitions the diversity is due to the impressions of real entities seen and experienced during life [the diversity in dreams being due to these]. If he should persist in believing that in dreams the diversity is due to mere fancy # (not necessarily of real entities), he should be met with the fact that there is always some distinction between the funcy and the funcied object; the fancie l object is not the same as the /ancy (So that if the diversity in dreams is due to fancy, this fancy must pertain to some real entity].

Sū!ra (34).

LIKE REMEMBRANCE AND DESIRE, THE COGNITION OF OBJECTS IN DEBAMS ALSO-

Bhāşya on Sū. (34).

[P. 235, L. 14 to P. 236, L. 7.]

has for its object something that has been preciously apprehended [this has to be added to complete the Sütra]. Just as Remembrance'and Desire have for their objects previously apprehended things, and are incapable of lending support to the denial of the reality of such things,—so in dreams also the cognition of things has for its object things that have

[•] The right reading is any of the management of the provided from https://www.holybooks.com

been previously apprehended; hence these also do not justify the notion that no such things exist. Thus in reality the Dream-cognition is always one that has its object previously perceived in the waking state; and when the sleeping man who has seen a dream wakes up, he recognises the dreamcognitions as his own, the idea in his mind being 'this is what I saw in my dream.' And it is only in relation to (and in comparison with) the said waking cognition that we come to the conclusion that the Dream-cognition is unreal. That is to say, when on waking one recognises the Bhā. P. 236. Dream-cognition-as 'this is what I saw in my dream '-it is the recognition that leads him to the conclusion -'my cognition of things in the dream is unreal.' If there be no difference between the two, the proof becomes meaningless; that is, he for whom there is no difference (on the point of reality) between the waking and the dreamcognition, for him the proof or reason,-that 'the notion of Instruments and Objects of Cognition is like the notions of things in a dream' (Sū. 31)-can have no meaning; for he has denied the very basis of such an allegation ; the idea of a thing as what it is not (i. e. a wrong notion)-is always based upon a real original (counterpart); e. g. the conception of the pillar, which is not man, as 'man' is always based upon a real original; i. e. until the original, the real man, has been perceived, one can have no conception of 'man' in regard to what is not man. Similarly the conception of things in a dream,-such as 'I have seen an elephant,' 'I have seen a mountain,'-can only rest on the basis of some real counterpart (the cognition of real elephants and mountains).*

Vārļika on Sū. (34).

[P 527, L. 11 to P. 529, L. 13.]

The dream-cognitions that rest upon such diverse things as 'city' 'chariot' and so forth, are unreal; and as such they can appear only on the basis of their similarity to certain cognitions during the waking state. When the Opponent asserts—" for me all cognitions would be unreal,"—

[•] Unless one has had a previous cognition of the real object, he can have no wrong conceptions in organized dedt from https://www.holybooks.com

he should be questioned in regard to the original counterpart (of the unreal cognitions); for we never find any wrong notions without a real counterpart.

The man who does not admit the existence of anything except Consciousness should be asked to explain the real character of Demonstration and Refutation. If these are held to be something external, then it involves self-contradiction on the part of the Opponent; if on the other hand, they are held to be of the same nature as Consciousness, then, since the Consciousness of one man is never apprehended by another, no conclusion could be proved (for the benefit of another person, by such demonstration and refutation); as a matter of fact, one man does not know the dream dreamt by another person, until it is described to him. If (with a view to escape from this difficulty) Consciousness itself be regarded as having the form of words, -Var. P. 528.

to explain the exact signification of the term 'form' as occurring in the expression, 'Consciousness has the form of words'; as a matter of fact, when, by reason of similarity to a counterpart, one thing is conceived of as that (counterpart) which it is not then alone is that thing said to have the 'form' of the other thing; and since under your theory, there is no such real entity as 'word,' the expression 'Consciousness has the form of words' can have no meaning.

Further, he who does not admit of things besides Consciousness, should be asked to explain the difference between the waking and dreaming conditions :—as for him, just as there are no real objects of dream-cognitions, so also there are no real objects of waking cognitions; so that to what is due the notion that ' this is the *dreaming* and that the *waking* condition'? Conditional the dreaming and that the waking

the waking and dreaming cognitions would be that there would be no distinction between Merit and Demerit (Virtue and Sin); for just as no demerit or sin attaches to incest committed in a dream, so would there be none attaching to that act committed during the waking state ! " Difference between the waking and dreaming conditions is due to the fact that while in one the man is beset with sleep, in the other he is not so." Even if the Opponent admits this, the difficulty still remains,-how does he know that the influence of sleep causes derangement in Consciousness? If again, he should admit this difference (between the waking and dreaming conditions) that in one the cognitions are distinct, while in the other they are indistinct,-then, he should explain what sort of distinctness or indistinctness there can be in 'cognitions' when there are no real objects. "But even in the absence of real objects we find diversity in the cognitions." You mean by this as follows :-- " From among persons born under the influence of similar destinies. while some (on death) have sight of a river full of pus-though in reality neither the river nor the pus is there; and though one and the same thing cannot have several forms, yet in regard to the same river we find diversity in the cognitions : Some other persons see that same river as full of water, others again as full of blood, and so forth; from all which it follows that in each case the Cognition appears in that particular form in accordance with the inner consciousness of each person, and it has no external basis in the shape of an object." But this view is not tenable; as it involves self-contradiction. When you say-" there being no external object, the Cognition itself appears in that particular form,"-you render yourself open to the question as to what is meant by the Cognition appearing in that form. If (it is meant that) the Cognition has the form of the 'blood,' then

[.] Throughout this passage for ris attpit / sadiog dyo for saddig of at for event.

you should explain 'blood',---what is 'blood'? Similarly you should explain the forms of 'water' and 'river.' Further, in the sentence 'they see the river full of pus,'when we var. P. 529. Come to examine the words one by one, we find that they can have no meaning; as (accord-

ing to the doctrine that nothing but Consciousness exists) there are no such things as 'Colour' and the other phases of Consciousness. Further, (under the Opponent's doctrine) there can be no restriction as to place &c.; that is, when no object exists, what would be the reason for the fact that persons see the river of pus in one place, and not another? He for whom there is something really existing in a definite form,-for him it is quite possible that all cognition in any other form should be wrong; and wrong cognitions, if they appear, never completely discard (do away with) their (real) counterpart; so that it behoves the Opponent to explain what is the counterpart of the cognitions of 'pus' and the rest; and just as in the case of the cognition of 'pus' so also in the case of the cognitions of magical phenomena, imaginary cities, miragic water and so forth (it would be necessary to point to real counterparts).

The Bauddha Idealist brings up the following further argument:---"[Under the theory of the Siddhānţin] the 'impression' is left by the deeds of the man in one place, while its result appears in an entirely different place. That is to say, the result of an act should appear in the same place where the act is done; but for him who admits of things other than Consciousness, the act is done in one place, while its result appears in another place; so that the action and its result are not co-substrate.".

^{*} For example, the man performs the *Putrëști* in the present body, while he gets the son after several months and appears elsewhere than in the Body of the performer. According to the Idealist, the act of performance and the birth of the son, both appear in the same 'Series of Consciousness' that constitutes the entire personality of the Daman loaded from https://www.holybooks.com

There is no force in this argument; as we do not admit any such thing; we do not admit that the act and its result are not co-substrate; the act and the result both accruing to the Soul; so that our theory is not open to the objection urged.^{*}

. [The $V\bar{a}rfika$ formulates arguments in support of the reality of external things]—Objects are something different from my Consciousness,—(a) because they are possessed of generic and specific properties,—like the Consciousness appearing in another 'series';—(b) because they are cognisable by the Instruments of Right Cognition;—(c) because they are preceded (brought about) by Merit.

Bhāşya on Sū. (35). [P. 236, L. 7 to L. 22].

Such being the case,-

THE DESTRUCTION OF WRONG APPREHENSION FOLLOWS FROM TRUE KNOWLEDGE; JUST AS THERE IS DESTRUCTION OF THE CONCEPTION OF THINGS DURING A DREAM, ON WAKING. (Sufra 35).

When one has the conception of 'man' in regard to the Pillar, this is 'wrong apprehension, '-being the apprehension of the thing as what it is not; whereas when, in regard to the Pillar one has the conception of 'pillar, this is 'True Knowledge'; --and what is set aside by 'True Knowledge' is the wrong Apprehension, not the object, --the generic character of 'object' being common to the Man and the Pillar. † Just as when the man wakes up, the cognition that he has sets aside the conception of things that he had during dream, --and not the 'object' in general. Similarly in the case of magical phenomena, imaginary cities and

• According to us the mere birth of the son is not the result, but the pleasure caused by the birth, and pleasure is in the Soul ; similarly the cause of it is not the mere Act, but the Merit produced by it,

† When we subsequently come to recognise the pillar as 'pillar,' all that this proves is that our former cognition of it was wrong, not that the 'man' (as which the pillar had been formerly apprehended) is non-existent, nor that the former cognition had no objectivicatidily from https://www.holybooks.com

mirage, we have the cognition of things as what they are not; and these wrong apprehensions also are set aside, in the manner described above, by 'True Knowledge, ' which does not set aside the fact of the cognitions having some sort of an object. As a matter of fact, in the case of magic &c. also. the Wrong Apprehension has always got some basis in reality; for what happens in what is called 'magic' is that the man equipped with the necessary appliances, takes up a real substance similar to that whose illusion he intends to produce, and in regard to this real substance, he brings about the wrong apprehension in another person ;- in the case of the 'Imaginary City, ' what happens is that either Snow or some such real substance actually comes to assume the shape of a city, and hence, from a distance, people come to conceive of it as 'City'; that this is what really happens is proved by the fact that the illusion does not appear when there is no such substance as the said Snow;-similarly again, when the Sun's rays, coming into contact with the heat radiating from the Earth's surface, begin to flicker, there arises the notion of 'water' in regard to it, by reason of the perception of the common quality of (flickering); that this is so is proved by the fact that when the man draws near, or when the Sun's rays are not there, there is no such illusion. Thus we find that in the case of every Wrong Apprehension there is some sort of real entity at the bottom somewhere, and no Wrong Apprehension is entirely baseless. We also find • that there is a distinct difference in the character of the two cognitions,-viz: (a) that of the magician and his audience (the former regarding the magic phenomenon as unreal, and the latter believing it to be real); (b) that of the man at a distance and of one who is near at hand, the former regarding the 'imaginary city' and the 'miragic water' as real, while the latter has no idea of such things at all; and (c) that of the sleeping man and of the waking man. All this diversity would be inexplicable if everything were non-existent, and as such entirely without any name or character.

Vārļika on Sū. (85).

[P. 529, L. 17 to P. 530, 3.]

Such being the case, the destruction of Wrong Apprehension &c. &c.—saya the Satranps: Thay someoption of the pillar BHÄŞYA-VÄRŢIKA 2-2-36

as 'man' is wrong apprehension; and this wrong Apprehension is set aside by the True Knowledge (of the Pillar as Var: P. 530. pillar), which latter does not set aside the general character of 'object,' which is common to the Pillar and the Man. Just as the conception of things apprehended in a dream are set aside by the waking cognition of things, which latter however, does not set aside the general character of 'object.' The rest is clear in the Bhāşya.

Sū{ra (36).

[Having disposed of the Idealist, who, while denying the reality of the External world, admits the Idea,—the Author next takes up the Nihilist, who denies the Idea also]—IN THE SAME MANNER, THE EX-ISTENCE OF THE 'APPREHENSION' AISO (CANNOT BE DENIED); BECAUSE WE ACTUALLY PEBORIVE ITS CAUSE, AS ALSO ITS BEAL EXISTENCE.

> Bhāşya on Sū. (36). [P. 237, Ll. 2-4.]

Just as the existence of the 'object' of Wrong Apprehension cannot be denied, so that of the Apprehension itself cannot be denied; —why ?—(a) because we actually perceive its cause, and (b) because we actually perceive its real existence; (a) as a matter of fact, we are actually cognisant of the cause of Wrong Apprehension; and (b) Wrong Apprehension also is found to appear in every person, and is actually cognised as such, being, as it is, distinctly cognisable. From all this it follows that Wrong Apprehension actually exists.

[And when even Wrong Apprehension is rcal, Bight Apprehension is all the more so].

Vārļika on Sū. (36). [P. 530, L. 5 to L. 8.]

In the same manner &c. &c.—says the Sil/ra. There is always a cause for Wrong Apprehension. "What is that cause?" It consists of (a) the perception of common pro-Downloaded from https://www.holybooks.com perties, (υ) the non-perception of specific properties and (c) the imposition of such specific characters as are not actually present (in the thing). When one admits that there are Wrong Apprehensions, it behaves him to point out its cause; and when one admits its cause, he must admit its 'object' also.

Sūįra (37).

WRONG APPENHENSION HAS A DOUBLE CHARACTER, BASED UPON THE DIFFERENCE BETWERN THE REAL ORJECT AND THE COUNTERPART.⁴ (SU. 37).

Bhāşya on Sū. (37).

[P. 237, L. 6 to L. 12.]

The 'real object' is the *Pillar*, and the 'counterpart' is the *Man*; and whenever there is a wrong apprehension of the Pillar as 'Man,' both of these—the real object and the counterpart—are manifested in it quite distinctly, and the misapprehension is due to the preception of their common properties;—similarly there is misapprehension of the *Flag* as a *line of cranes*; of a piece of stone as a pigeon. In fact, Wrong Apprehensions are possible only in regard to similar objects, because they are brought about by the perception of common properties (belonging to two or more similar objects).t (For these reasons, he for whom everything is without name and form,—according to such a person there can. be no possibility (of Wrong Apprehension).

As regards Odour and other such objects of Cognition, the notion of 'Odour' &c. (i.a. of the things in their own character),—which would be regarded (by the Opponent)

• The Bauddha argues that, since the object of Wrong Apprehension is non-existent, that of Right Apprehension also must be non-existent. This is what the present Satra traverses. The idea is that the object of Wrong Apprehension also is not entirely non-existent: What forms the object of Wrong Apprehension has a dual character—that of the real object 'Pillar' and also that of the counterpart 'Man'; and though in the character of 'man' the object is somverlatent, it is really existent in the character of 'Pillar.'

† The reading in the printed text is wrong. The right reading is either-(a) नत्यसमाने....सद्यव्ययस्थापात् or (b) तथ समाने....सद्यव्ययस्थापात् as in Pari B. We have adopted Eleviates ded from https://www.holybooks.com

1646

as Wrong Apprehensions,—must, in fact, be regarded as *True* Apprehension; for the simple reason that in the case of those Cognitions, there are no two things involved—in the shape of the real object and its counterpart,—nor is there the perception of any property common to two or more things.

From all this it follows that the allegation that—" the conceptions of the Instruments and the Objects of Cognition are wrong "— is not right.

Vārļika on Sū, (37).

Wrong Apprehension &c. &c.—says the $S\bar{u}$ fra. The 'real object' is the *Pillar*, the 'counterpart' is the *Man*; and it is only when both of those are manifested that we have Wrong Apprehension. The rest is clear in the *Bhāşya*.

End of Section (4).

Section (5) [Süţras 38-49.] The Development of True Knowledge. Bhāşya on Sū. (38). [P. 237, L. 12 to L. 17.]

It has been said above that when there is True Knowledge of the causes of Defects, there follows the cessation of the notion of 'I.' Now the question arises—How is True Knowledge brought about ?

• The reality of the External World and of Cognitions having been stablished, the Author reverts to what was said under Süţras 4-2-1 et erg. in connection with the causes of Defects, where the process was described. This cannot be regarded as sufficient for the purposes of the enquirer; as the True Knowledge there in described cannot do away with such illusions and wrong apprehensions as are of the nature of Direct Apprehension; hence it becomes necessary to describe such True Kuowledge as may be of the character of Direct Apprehension—*Parishuddhi*.

This is the particular form of 'True Knowledge' that is referred to by the question with which the Bhays introduces the Säşra.-Varghamana.

Vishvanātha adds-The Knowledge produced by the Scriptures is momentary, like all cognitious; nieadebuto whetpst//www.sebuty/bexist, wrong notions would

1

[TRUE KNOWLEDGE PROCERDS] FROM THE PRACTICE OF A PABTICULAE FORM OF MEDITATION + (SU. 28)

When the Mind having been abstracted (withdrawn) from the Sense-organs, is kept steady by an effort tending to concentration,—the contact that takes place between this Mind and the Soul, and which is accompanied by a conscious eagerness to get at the truth, is what is called 'Meditation.' † During this meditation, no cognitions appear in regard to the objects of the senses. From the practice of the said Meditation proceeds True Knowledge.

Vorțika on Sü. (38).

[P. 530, L. 12 to P. 531, L. 9.]

It has been said above that from the True Knowledge of the cause of Defects follows the cessution of the notion of '1'; now the question arises—How does True Knowledge come about? It comes, says the Sūfra, from the practice of a particular form of Meditution. The rest is clear in the Bhāşya.

Objection :— "The Internal Organ (Mind) being all-pervading in its character, no *abstraction* of it is possible." If you mean by this that—" since the Internal Organ is allpervading, how can there be an abstraction of it?"— then our answer is that there is no force in this; as this has been

again continue to appear and entangle the Soul. Hence it becomes necessary to explain the process by which the said True Knowledge may be developed and amplified and rendered capable of putting an end, once for all, to all possibility of wrong notions appearing again.

• The exact reading of this Söjra is uncertain. Sū. Ms. D. and Vishvaušiba read as in the printed text; Puri Sū. Ms. reads समाधितियात्रावाद (which is apparently wrong); the Taiparya reads समाधितात्वादयातादा; though the Nyayasachinbandha reads as in the printed text. Sū. Ms. O. however reads- तात्वावाविष्टदिस्स-

व्यकानवासनातः (? ततरवात्यन्तिकेा निष्याकाननाराः ।

† 'By concentration ' is meant the keeping of the Soul within its own abode in the lotus of the heart. As such concentration is present also during deep sleep, we have the additional qualification ' which is accompanied by &c.'--which excludes Deep Sleep.D-JM parjant from https://www.holybooks.com already answered. How the Internal organ is not all-pervading we have explained before (in course of our refutation of the Sankhys), by "pointing out that in reality the Internal Organ is atomic. "But in that case the perceiving of the movement of one's own limbs would not be possible."

If you mean by this that-"He whose Internal Vår. P. 531. organ is atomic can never have the perception of the movement of his own limbs; as the atomic Internal organ could not be in contact with the (moving) hand and the eye at one and the same time, ""-then our answer is that this is not right ; † because the effort (required for the movement of the hand) and the perception can very well appear at one and the same time, on account of the contact of the Soul, the Mind and the Body being simultaneous; that is, the contact of the Soul with the Body, and that of the Soul with the Mind 1 come about simultaneously; so that the movement of the limb would be due to the contact of the Soul with the Body, § while the activity of the visual organ (necessary for the perceiving of the said motion) would be due to the contact of the Soul with the Mind;-and while the movement of the man's limb is due to his effort, his perceiving of it is brought about by the contact of the object. perceived (i. e. the moving limb) with the says of right emanating from the eyes. Further, inasmuch as we do

• The moving of the hand is due to the effort of the Soul operating on that limb, so that when the Hand moves it should be in contact with the Mind; similarly when something would be seen by the Eye, the Eye would have to be in contact with the Mind. Now if the Mind is atomic it cannot be in contact with the hand and the Eye at one and the same time; hence the man could never see his own moving hand.

† Though the **q** is not essential, yet it is better to have it.

‡ The right reading is स्वात्मवारीरसम्बाधभारममनः वंयोगरच.

§ The reading in both editions is wrong. The right reading is तत्रारमदारीर स-सम्पन्त as found in the found in the state of the state not postulate any 'parts' for the Soul, the objection can have no force against us. If the Soul had parts, then alone could it be said that the Mind is in contact with one part of it, while the Body is in contact with another part, and then alone would the objection regarding the perceiving of the movements of one's own limbs have some force :--he, however, for whom the Soul has no parts, cannot be affected by the said objection; as (according to him) the Mind could very well be in contact with the Soul which is also in contact with the Body.

Bhöşya on Sü. (39).

[P. 237, L. 17 to P. 238, L. 3].

[Objection]—" It has been said that during "Meditation no cognitions appear in regard to the objects of the senses; but—

"THIS IS NOT POSSIBLE; (A) BECAUSE CERTAIN OBJECTS ARE EXTREMELY POWERFUL."- (Sûţra 39).

"In some cases, Cognitions will appear, even in the "absence of any wish on the part of the person; so that "what has been asserted cannot be right; --why?--be-"cause certain objects are extremely powerful. As a matter of "fact, we find that sometimes, even though the man has no "wish for the cognising, the cognition does appear, as we "find in the case of the thundering of the clouds and "such things (which we cannot help hearing, even against "our wish). So that the said particular kind of meditation "cannot be possible."

> Vārțika on Sū. (3?). [P. 531, Ll. 11-12.]

"This is not possible etc. etc.—says the Sāfra. The said prac-"tice of the particular Mind of Meditation is not possible; be-"cause in some cases even though the man does not wish it, the the Cognition does appear; as we find in the case of such things as the thundering of the clouds and the like."

Sū[ra (40).

"(B) ALSO BECAUSE COGNITIONS ARE BROUGHT ABOUT DOWNER DOWNER THE DOWNE THE DOWNER THE DOWNE DOWNER THE DOWNER THE DOWNE DOWNER THE DOWNER THE DOWNE DOWNER

Bhāşya on Sū. (40). [P. 238, Ll. 5-6.]

"Such things as Hunger and Thirst, Heat and Cold, and Disease bring "about cognitions even against our wish. Hence no concentration (or one-pointedness, of the Mind) is possible."

Vārļika on Sū. (40).

[P. 531, L. 14-15.]

"Also because &c. &c.—says the Sūtra. Cognitious are brought about "by Hunger and Thirst, even against our wish; hence also the said particular kind of Meditation is not possible."

Bhāşya on Sūţra (41).

P. 238, L. 6. to L. 11).

It is possible that the man may renounce Meditation and become agitated, and there may also be causes tending to bring about such agitation as constitutes an obstacle to Meditation; but even so,—

MEDITATION WOULD BE BROUGHT ABOUT BY THE FORCE OF THE FRUIT OF WHAT HAS BEEN FERVIOUSLY ACCOMPLISHED (SQ. 41).

"What has been previously accomplished '--stands for the Merit and Wisdom, acquired in previous lives,--which serve to bring about True Knowledge;-" Force of the /ruit'--stands for the faculty born of Yogic practices; if there were no fruits of such practices, people would never pay any heed to them; even in the case of ordinary worldly acts, we find that constant practice produces a certain faculty.

Varțika on Sü. (41).

[P. 531, L. 17 to P. 532, L. 6.]

Meditation is brought about &c. &c.—says the Sūtra. 'What has been previously accomplished '—stands for the particular form of Meditation practised in the preceding bodies;—the Vir. P. 532. 'fruit' of that is Merit, and this is what again brings about another particular kind of Meditation; and with is a particular wind books. Meditation leads to the suppression of external objects. Even in the case of the ordinary man it is found that when he is rapt in meditation, even though the external objects may gather round him, yet no cognitions appear for him; how much more so then should this be the case with the Yogin ? If Cognitions were to appear simply because there are external objects gathering round the man, then such Cognitions would appear also after Final Release; because for the released man also, certain external objects do gather round him, so that cognitions should still go on appearing, (which is absurd).

Bhāşya on Sū. (42).

[P. 238, L. 11 to L. 16.]

It is for the removal of the obstacles (to Meditation) that-

THERE IS THE ADVICE THAT YOGA SHOULD BE PRACTISED IN FORESTS, CAVES AND BIVER-BANKS. (S0. 42).

The Merit produced by the practice of Yogs follows the Soul in other births also; and when the Merit that brings about True Knowledge has reached a high stage of development, and the Exercise of Meditation has assumed high proportions,—True Knowledge appears. We have actually found that Meditation serves to suppress the force of even powerful objects; as for example, even the ordinary man says—' My mind was elsewhere, I did not hear this,' or ' I did not know this.'

Vārțika on Sū. (42).

[The *Vārļika* has nothing to say on this Sūțra.] Bhāțya on Sū. (43).

[P. 239, L. 17 to L. 19.]

[Says the Opponent]—"But if you admit the fact (urged in Sū. 39) that on account of the force of certain extremely powerful objects, Cognitions appear even against the man's wish,—then,

"THIS CONTINGENCY WOULD ABISE ALSO UPON FINAL RELEASE ".Do(Suadt8) tom https://www.holybooks.com ⁶ Even when the man has become released, it would be possible for Cognitions to appear, by reason of the force of external objects."

Vārfika on Sū, (43).

[The Varlika has nothing to say on this Sutra.]

Sū(ra (44).

Not so; for Cognition is sure to appear only in the accomplished Body. (Su. 44.)

Bhāşya on Sū. (44).

[P. 233, L. 21 to L. 23.]

It is only when the Body, -as the receptacle of Activity, Sense-organs and Objects, --has been accomplished, under the influence of Karma (past deeds) that the presence of this cause makes the appearance of Cognitions sure to come about; so that however powerful the external object may be, it is not able to bring about Cognitions in the Soul; for the external object has been found to have that power (of bringing about Cognitions) only when it is in contact with a Senseorgan. [And no such contact is possible in the case of the person who has attained Final Release].

Värlika on Sü. (44).

[P. 532, Ll. 10-11.]

Not so etc. etc.—says the Sūfra. It is only when the Body is there that the external object gives rise to Cognitions, —and not when there is no Body.

Sū[ra (44).

AND THERE IS ABSENCE OF THAT WHEN FINAL RELEASE HAS BEEN ATTAINED. (Sü. 45.)

Bhāşya on Sū. (45).

[P. 239, L. 2 to L. 6]

'That'-stands for the Body and the Sense-organs, which contain the causes of cognition; and of this there is absence when Final Release has been attained; for the simple reason that there are denoted Merits: and the Demorst collect (to bear fruition). Hence the allegation (in Sü. 43) that "the contingency would arise also upon Final Release"—is not true.

It is for this reason that Final Release consists of freedom from all kinds of pain; inasmuch as the root of all pain, and the receptacle of all pain,—*i.e.*, the Body and the Sense-organs absolutely cease upon the attainment of Final Release, it follows that Final Release consists in absolute freedom from all pain; for without its root, and without its receptacle, no pain can appear.

Vārļika on Sū. (45).

[P. 532, Ll. 13 15.]

And there is alsonce &c. &c. &c. says the $S\bar{u}$ (ra. 'Of that' —i. e. of the Body &c., which are the cause of Cognitions, there is absence when Final Release has been attained. It is for this reason that Final Release consists in freedom from all pain; that is, because upon final Release, the root of all pain as well as all pain cease to exist—therefore freedom from pain constitutes Final Release.

Section (46).

FOR THAT PUBPOSE (THERE SHOULD BE) EMBELL-ISHMENT * OF THE SOUL, BY MHANS OF RESTRAINTS AND OBSERVANCES AND SUCH OTHER METHODS OF INTERNAL DISCIPLINE AS MAY BE LEARNT FROM THE SOLENCE OF YOGA.

(Sū. 46.)

Bhāşya on Sū. (46).

[P. 239, L. 9 to L. 13.]

For the purpose of attaining Final Release, there should be 'embellishment of the Soul'.—' Restraints' are the means of acquiring merit, common to men in all conditions of life; while 'Observances' are peculiar to each condition. 'Embellishment of the Soul'—consists in the destruction of Demerit and accretion of Merit.—' Internal discipline' should be learnt from the science of Yoga; it consists of Penance, Controlling of the Breath, Abstraction of the Mind, Contemplation and Concentration of the Mind; and the practice of the

1654

[&]quot; Vishvanatha Bunda/ diousianakanakanskanskanskanska

renouncing of objects of sense serves to remove attachment and hatred. The other 'methods' consist of the details of conduct laid down for Yoga [such as concentrating of the Mind, eating only particular kinds of food, not staying at one place for any length of time, and so forth].

Varțika on Sü. (46).

[P. 533, Ll. 16. 1-2.]

For that purpose etc. etc.—says the $S\bar{u}$ fra. For the purpose of attaining Final Release, there should be 'embellishment of the Soul' by means of Restraints and Observances.

> Sūįra (47). [Thure should also be] Beprtition of the study of

THE SCIENCE, AS ALSO FRIENDLY DISCUSSION WITH PERSONS. LEARNED IN THE SCIENCE. (Sū. 47).

Bhāsya on Sū. (47).

[P. 239, L. 15 to 18.]

'For that purpose' has to be construed with this $S\bar{u}/ra$ also. The term ' $j\bar{n}\bar{a}na$ ' stands for that by which things are known, $j\bar{u}\bar{a}ya/\bar{e}$ anena, i. e. the Science of the Soul;—the 'grahana', 'study,' of this consists in reading it and retaining it in the mind;—the 'repetition' of such study means the carrying on of it continuously, in the shape of reading it, listening to it (being expounded) and pondering over it.— '*Friendly discussion with persons learned in the Science*'—is meant to bring about consolidation of the knowledge acquired; this 'consolidation' consists in—(1) the removing of doubts, (2) the knowing of things not already known, (3) the confirmation (by the opinions of the learned) of the conclusions already arrived at (by one's self).—the term 'samvāda' means * 'samāya vādah', ' discussion for the sake of coming to an agreement'; [*i. e. friendly* discussion.']

> Vārļika on Sū. (47). [P. 533, Ll. 4-5.]

Repetition of the study of the Science, elc., elc.— 'Jäänagrahana' means 'study of the Science'. 'Persons' learned in

[•] The reading of the printed text समापवाद gives no sense, the right reading समाप वाद is supplied/bjoatle (Pirch Mattps://www.holybooks.com

the Science' are those who know the means (of acquiring True Knowledge).

Bhāşya on Sū. (48).

[P. 239, L. 19 to P. 240, L. 1.]

The expression 'friendly discussion with persons learned in the Science' (occurring in the preceding *Satra*) is vague; it is explained in the following Sūtra.

Sutra (48).

THAT (FRIENDLY DISCUSSION) SHOULD BE CARRIED ON WITH THE PUPIL, THE TEACHER, COMPANIONS IN STUDY, AND OTHER WELL-KNOWN LEARNED PERSONS, WHO WISH WELL (TO THE ENQUIREE) AND WHO ABE NOT JEALOUS OF HIM².

(Su. 48).

The meaning of the $S\bar{n}/ra$ is explained by its own words.

Vārļika on Sū. (48).

[The Varlika has nothing to say on this $S\bar{u}$ /ra.]

Bhāşya on Sū. (49). [P. 240, L. 2 to L. 6.]

It might be thought that—the putting forward of theories and counter-theories would be unpleasant to the other party (the teacher and the rest); [with a view to this we have the following $S\bar{u}$ /ra.]

Sutra (49).

BEING A SEEKER (AFTER TRUTH) [THE MAN SHOULD CABBY IT ON] FOR THE ACCOMPLISHMENT OF HIS PUBPOSE, EVEN WITHOUT PUTTING FOEWARD ANY COUNTER-THEORIES.

1656

'He should carry on the discussion' (of the foregoing $S\bar{u}!ra$) has to be construed here also. Inasmuch as the man is desirous of acquiring knowledge from the other person, he should simply express a desire to learn the truth; and thus without trying to establish any theory of his own, he should clarify (correct) his own view of things,—specially by realising the fact that the doctrines of several philosophers are mutually contradictory [and from among these accepting what is right and rejecting what is wrong].

Vārļika on Sū. (49).

[The Vartika has nothing to say on this Sulra.]

End of Section (5).

Section (6). [Sūțras 50-51.] The Defending of True Knowledge. Bhuşya on Sū. (50). [P. 240, L. 7 to L. 10.]

Through excessive partiality to their own theories, some people transgress all bounds of reasoning; in that case-

DISPUTATION AND WRANGLING (SHOULD BE CARRIED ON) FOR THE PUBPOSE OF DEFENDING HIS DETERMINATION TO GET AT THE TRUTH, JUST AS THE HEDGE OF THORNY BRANCHES IS PUT UP FOR THE PROTECTION OF SPROUTING SKEDS. (Sū. 50).

This however is meant only for those persons who have not acquired True Knowledge, whose defects have not been removed, and who are still making an attempt for those purposes.

Vārļika on Sū. (50).

[P. 533, Ll. 14-16.]

Disputation and Wrangling etc. etc.—says the Süfra. What the Süfra means is that what is herein said should be done only by such persons in whom True Knowledge has not yet appeared unloaded from https://www.holybooks.com

Bhāșya on Sū. (51).

[P. 240, L. 11 to L. 14.]

When one has been rudely addressed by an Opponent. either through vanity (of superior knowledge, or through sheer prejudice (against truth), or through some other similar reason (i.e., desire for wealth, fam, &c.),—then he (failing to perceive the right answer to the ill-mannered allegations of the Opponent)—

SHOULD PICK UP A QUARREL WITH HIM AND PROCEED TO DEAL WITH HIM BY DISPUTATION AND BY WBANGLING. (SQ. 51).

* Pick up a quarrel '---i. e. with a view to defeating the Opponent, ---and not with a view to getting at the truth. But this should be done only for the purpose of defending true Science, * and not for the purpose of obtaining wealth, honour or fame.

> Thus ends the Bhāṣya on the II Daily Lesson of Discourse IV. Variika on Sū. (51).

> > [P. 533, L. 16 to P. 524, L. 5.]

When one has been rudely addressed by the Opponent etc. etc. he should pick up etc. etc.—says the Sūtra. 'Tābhyām'—i.e. by Disputation and by Wrangling. 'Pick up a quarrel' etc. with a view to defeating the Opponent, and not with a view to getting at the truth. But this should be done etc. etc.—says the Bhāgya.

⁶ Rebirth, as related to Activity and Defect, has been fully explained; Fruition, Pain and Release, as also the means of Release, have been described (in the fourth A dhyaya).

End of the Variika on Daily Lesson II of Discourse IV. END OF DINCOURSE IV.

Aphyiya V. Daily Lesson I. Section (1).

[Sāiras 1-9.]

The Fulle Rejoinders consisting in the Unfair Urging of the Fullacy of 'Neutralisation.'

Bhāşya on Sū. (1).

[P. 241, L. 1, to L. 9.]

Futile Rejoinder having been defined (in Sū. 1-2-18) as ' that objection which is taken on the basis of mere similarity and dissimilarity,' it was described briefly under Sū. 1-2-20, where it was pointed out that ' there is multiplicity of Futile Rejoinders owing to there being several and diverse varieties of it;' this Futile Rejoinder is now described in detail. The Futile Rejoinders herein described consist of arguments urged in confutation of the argument that has been put forward in demonstration of a certain conclusion; and their number is twenty-four; * they are as follows :--

• Among commentators there has been a great deal of discussion in regard to the exact character of this Fifth Discourse and its connection with what has gone before. To the end of Adh. IV, we had the *Examination*, 'Pārtkēā,' of what had been mentioned in Sū. 1-1-1 and defined in the rest of Adh. 1; so that the natural subject-matter of Adh. V should consist in the continuation of the same *Examination* of things; what we find however in this Adhy@ya are definitions of the several varieties of Futile Rejoinders and Clinchers. Hence the difficulty.

The *Tâţparya* says—The proper place for the *defining* of the particular kinds of *Futile Rejonder* and *Clinchers* was just after the general definition of these in Adh. I; yet the author of the Sâţra intentionally omitted to do it there, in order net to delay the examination of the 'objects of cognition,' for which the pupils were growing anxious; and having finished all that, he now naturally reverts to the *defining* of the several varieties of the two categories that he had left undefined. Further, the last *part* of the preceding $A_j ky_3 y_a$ having dealt with 'Disputation and Wrangling,' it is in connection with those that the Sage deals with Futile Rejoinder and Clincher, which can occur only in Disputation and Wrangling; so that the sequence of Adh. V is all right; its subject-matter arising directly out of what has occurred towards the end of the preceding $A_j ky_3 y_a$.

The Pariskuddhi enters into a long discussion as to whether Adh. V is meant to be 'Definition' or 'Examination'; and comes to the conclusion that its subject matter consists of Definitionded from https://www.holybooks.com

Sū[ra (1).

(1) PABITY,* PRE SIMILABITY, (2) PER DISSIMILABITY,
(3) PER AUGMENTATION, (4) PEE SUBTRACTION, (5) PEE UNOBETAINTY, (6) PEE CERTAINTY, (7) PEE SHUFFLING,
(8) PEE PEOBANDUM, (9) PER CONVERGENCE, (10) PER NON-CONVERGENCE, (11) PER CONTINUED QUESTION, (12) PEE COUNTER-INSTANCE, (13) PEE NON-GENEBATION (14) PEE DOUBT, (15) PEE VACILLATION, (16) PEE NON-PRO-BATIVENESS, † (17) PEE PRESUMPTION, (18) PEE NON-DIFFERENCE, (19) PEE EVIDENCE, (20) PEE APPRESENSION, (21) PEE NON-APPRESENSION, (22) PEE NON-ETERNALITY, ‡ ('33) PEE ETERNALITY AND (24) PEE CHABACTEB OF EFFECT.'-(SU. 1.)

When the argument urged in confutation is through similarity, and does not differ in validity from the argument put forward in demonstration, it constitutes 'Parity per Similarity'; the said 'non-difference' we shall exemplify in the particular instances that we shall cite. 'Parity per Dissimilarity' and the other Futile Bejoinders may be similarly described.

(Vārļika on Sū. (1).

[P. 535, Ll. to 535, L. 1.]

Futile Rejoinder having been described only briefly, it had to be described in greater detail; hence is the present

• Udayanāchārya in his Bodhasiddhi (Nyāyaparishişta) thus explains the signification of the term 'szma' occurring at the end of these names.—(1) According to the Vārtikā, it means 'equalising'; i. e the Futile Rej.inder is put forward for the purpose of counter-poising or neutralising the effects of the original Reasoning;—(3) according to the Bhāgya, it means that the Futile Rejoinder is put up with a view to show that there is nothing in the original reasoning which differentiates it from what is now put forward; [there is not much difference between these two].—(3) others explain it as meaning that the Futile Rejoinder puts the original reasoner on exactly the same footing as his Opponent putting forward the Rejoinder ;—(4 the Equality' of the Futile Rejoinder lies in the fact that while demolishing the reasoning of the first party, it demolishes itself also. [Udayanācharya himself accepts this last explanation.]

+ satalica is the correct reading.

1 The printed text reads gyales frequency, but from the later Su tras, it is clear that freq mountained unfrequences with night canding is gyan affect frequency with might canding is gyan affect frequency with a second second

Discourse started; the first $S\bar{u}$ whereof is—'Parity per Similarity §0. §0.' Futile Rejoinder is that reasoning set up in refutation of a reasoning propounded in demonstration, which (in reality) is incapable of refuting the latter.

"Inasmuch as the putting forward of the Futile Rejoinder has been prohibited, and as it consists only of wrong answers, it is not right to set it up at all. The use of the Futile Rejoinder has been prohibited in the following sentence—' Casuistry, Futile Rejoinder and Clinchers should be avoided by one in his own assertions' (*Bhaşya*, Text, P. 7, L. 2.),; and, further, Futile Rejoinder is not the right answer to an argument; hence it is not right to set up a Futile Rejoinder."

This is not right, for the useful purpose served by the setting up of the Futile Rejoinder has also been pointed out in the passage—' these can be urged with force against others' (*Bhāṣya*, Text, P. 7, L, 3). In fact sometimes the Futile Rejoinder may be set up even in refutation of a valid reasoning; *i. e.* though the first propounder of the thesis may think that the reasoning put forward against him is sound, yet being desirous of obtaining wealth, honour and fame [and being anxious to guard the Truth against attack] he sets up a Futile Rejoinder; his motive in so doing being as follows:—' It may be that being upset by my Futile Rejoindvar. P. 536. er, the other party may not be able to perceive the right answer to my Rejoinder; so

if the other party is really unable to find a suitable answer, he is defeated; while if I do not set up the Rejoinder, the other party would obtain absolute victory over me; and certainly rathes than suffer such to table for that I should render the issue (of the disputation) doubtful, hence it is best that I should set up the Futile Rejoinder.'

Other people have held that the Futile Rejoinder serves the purpose of rebutting invalid reasonings. Some people hold that the Futile Rejoinder should be set up for the purpose of setting aside unsound arguments. They declare as follows :—' When an unsound argument has been put forward, a Futile Rejoinder may be set up, either (a) by reason of the fact that the person setting it up, is unable to detect the flaw in the argument (and thus to set up the right answer), or (b) on account of the desire on his part to point out the flaw in the argument by placing before him an undesirable contingency (a dilemma).' †

This however is not right; as there would, in such cases, be no need for the Futile Rejoinder: if the first party knows that the argument put forward against him is unsound, then he should naturally proceed to point out the flaw in it that he has actually detected, and there would thus be no need for setting up the Futile Rejoinder. If, on the other hand,

+ Even though he knows the right answer to the Opponent's argument, yet he elects to meet him with the Futile Rejoinder, for the purpose of convincing him of the fallaciousness of his argument by placing before him the following dilemma: -- 'I know that my rejoinder is defective; but so is yours; so that if your argument is rightyminatembroachoulthbs/south-: Tayloropis.com

[•] In sheer opposition to Truth, the Opponent sets up an argument against it ;-the expounder of the Truth finds himself unable to meet that argument ;-he feels that if he fails to provide an answer, the audience, consisting of men of ordinary capacity, would be misled to believe that the Truth is otherwise than what has been propounded by him ;-hence he meets the Opponent's argument by means of a Rejoinder which he knows to be futile, and yet he sets up with the idea that, in case the Opponent fails to detect and expose the fallacy in the Rejoinder, the worst that would happen would be that the audience would be left in doubt as to the issue of the conflict. Even this is better than that the cause of Truth should suffer total defeat. Though as a matter of fact it is not possible that there should be any valid argument against a true thesis, yet the expounder of this may not be able t, perceive the fallacy in the argument against it, and so may regard it as 'valid'-Tatparya.

he does not detect any flaw in the Opponent's argument, how could he set up any Futile Rejoinder at all? He who does not understand things can not set up any arguments[®] If he were to set up arguments without understanding things, then he might say anything he liked; and there would be no restriction at all (to his assertions).

What we have just said also sets aside the view that the first five Futile Rejoinders are set up against the 'Indecisive' Reasoning. Some people have said that—" when the other party has put forward an *indecisive* reasoning, then should one set up the first five Futile Rejoinders."—This view also is set aside by what we have just said.—" How?"—If the man knows that the Opponent's reasoning is *indecisive*, it is this defect that he should point out; while if he does not recognise any such defect, he is ignorant (and can say nothing to the point).

What we have said also disposes of the view regarding the sequence of right and wrong arguments;—that is, the view that, "when the Opponent puts forward a right argument, he should be met with a right argument, and when he puts forward a wrong argument, he should be met with a wrong argument [and both these arguments in answer constitute the Futile Rejoinder]."—But the 'right' argument is that which consists in the pointing out of defects in the Proposition and other factors of the reasoning put forward by the Opponent; and such an argument would be a *right* answer, and it would not be a Futile Rejoinder. Thus the view in question cannot be right; as it shows that the persons who hold it are ignorant of the real character of 'Futile Rejoinder'.

[•]The subject-matter of the disputation is one that the first party has fully studied; and if he is unable to detect flaws in the arguments put forward against what he has fully studied, he cannot have the ready wit necessary for the setting up of the Futile Rejainsteaded from https://www.holybooks.com

'Parity,' 'Samā', consists in the propounding of an argument for the purpose of equalising (counterpoising, the original argument); and what is meant by the names of the Futile Rejoinders is that equalisng is done by similarity, Equalising is done by dissimilarity, and so forth; so that the setting up of these Rejoinders is for the purpose of equalising (the original argument): the 'equalising' may or may not be actually accomplished; but the man who puts forward the Futile Rejoinder does so with the intention of 'equalising'; just as in ordinary life a man makes efforts for the sake of his family [and the efforts may or may not be actually fruitful].

Or, 'Parity' may be taken to imply the absence of any Var. P. 537. peculiar reason (in favour of the original argument, as against the counter-argument set up in the Futile Rejoinder); the sense of the latter being—'you do not indicate any particular reason in support of your argument'; the idea with which the person puts forward the Futile Rejoinder being—'my reasoning is exactly like yours.'

The Futile Rejoinders can not all be urged against all reasonings (as some people have held); for the simple reason that they are not equally applicable to all. As a matter of fact, all Futile Rejoinders are not applicable to all reasonings; *e.g.*, when the original argument is based upon 'dissimilarity,' one could not set up those Futile Rejoinders that consist of 'Parity' per 'Superiority', or 'Inferiority', or 'Uncertainty,' or 'Certainty', or 'Shuffling.'

By 'Parity,' 'Equalising,' it is not meant that there is equality between the propounder of the original thesis and the propounder of the Rejoinder; because the *Futile Rejoinder* is always wrong answer; so that the propounder of the Futile Rejoinder mustobacaned whose view is careenes; while in regard to the propounder of the original thesis, it is uncertain as to what he says being right or wrong [so that there can be no equality between the two protagonists.]⁴

Bhāsya on Sū. (2).

[P. 241, L. 10 to P. 242, L. 11.]

The definition (of these Futile Rejoinders) is as follows :---

Sū{ra (2).

(1) and (2) — The original Proposition having been propounded on the basis of a similarity and dissimilarity, if the Opponent serks to prove the conteary of its predicate, also on the basis of similarity and dissimilarity, we have instances of 'Parity per Dissimilarity,' and 'Parity per Dissimilarity.'t (Su. 2).

(1) When the original proposition is propounded on the basis of similarity, if the Opposition to it, seeking to establish the contrary of its predicate, is set up also on the basis of similarity,—and this Opposition does not differ from the argument put forward in support of the original proposition, it is a case of that Opposition which is called 'Parity per Similarity'. E.g. The Proposition having been in the form 'The Soul must be active,—because every Substance is endowed with qualities conducive to activity,—the clod of of earth, which is a substance, is endowed with qualities conducive to activity, and is found to be active,—the Soul also is so,—therefore the Soul must be active; '—the Opponent sets up the following opposition to it, also on the basis of Similarity :—'The Soul must be inactive,—because every allpervading substance is inactive,—Akasha, which is an all-

• The twenty-four Futile Rejoinders have been classified under sixteen heads, described in Sections 2 to 17. I, comprising (1) and (2), is the wrong urging of the fallacy of 'neutralisation'; II, comprising (3) to (8) is in the form of putting forward alternatives regarding the Probaudum and the Example; III, comprising (9), and (10), bears upon the convergence and divergence of pairs of things; IV, comprising (11) and (12), also bears upon continued Question and Counter-instance; the rest comprising only one each.

+Sidharmysvaldhdarmysbhysm is to be construed with 'upseamh ird,' as also with faddharmaviparysyopapaffsh,'-according to the interpretation of the Bhigya. Vishvanätha appearDevoluments in purlytipsithetistics has com pervading substance, is inactive,—the Soul also is so, therefore the Soul must be inactive.' And there is no special reason why on the ground of its similarity to active substances the Soul should regarded as active, and it should not be regarded as inactive, on the ground of its similarity to inactive substances;—so that inasmuch as there is no special reason (which makes one or the other more valid), this is an instance of Futilo Rejoinder called ' Parity per Similarity.' [This is a case where the original Proposition is based upon Similarity, and the Opposition to it is also based upon Similarity].

(2) An instance of 'Parity per Dissimilarity' (in opposition to the same Proposition) is the following—'the clod of earth which is endowed with qualities conducive to activity, is found to be limited in its extent,—the Soul is not so limited therefore the Soul cannot be active, like the clod of Earth ;' there being no special reason why, on the basis of its similarity to an active substance, the Soul should be regarded as active,—and why, on the basis of its dissimilarity to the active substance, it should not be regarded as inactive; and inasmuch as there is no such special reason, it is a case of 'Parity per Dissimilarity.' [This is case of the Proposition being based on Similarity, and the Opposition on Dissimilarity].

(3) The original Proposition being set up on the basis of dissimilarity,- 'The Soul must be inactive, -because it is all-pervading,-every active substance is found to be not all-pervading, as in the case of the clod of Earth, -the Soul is not so non-all-pervading,—hence it must be inactive';— 'the following opposition is set up on the basis of dissimilarity :- ' the Akasha, which is an inactive substance, is found to be devoid of qualities conducive to activity,-the Soul is not so devoid of such qualities,-hence the Soul cannot be inactive';-and there is no special reason why, on the ground of its dissimilarity to the active substance the Soul should be regarded as inactive, and why, on the ground of its dissimilarity to the inactive substance, it should not be regarded as active; thus there being no such special reason, this is an instance of 'Parity per Dissimilarity'. [This is an instance of the Proposition as well as its Opposition both being based upon Dissimitavityaled from https://www.holybooks.com

(4) An instance of 'Parity per Similarity' (in opposition to the same Proposition) \bullet —'the clod of Earth which is active, is found to be endowed with qualities conducive to activity,—the Soul also is so endowed,—hence it should be active';—there is no special reason why, on the ground of its dissimilarity to the active substance, the Soul should be regarded as *insctive*, and why, on the ground of its similarity to the active substance, it should not be regarded as active; and there being no such special reason, this is an instance of 'Parity per Similarity.' [This is an instance of the Proposition being based upon Dissimilarity and the Opposition on Similarity.

Vārțika on Sū. (2).

[P. 537, L. 10 to P. 538, L. 9.]

The original proposition having been elc. elc.-says the Sulra. 'Parity per Similarity' and 'Parity per Dissimilarity' -are two forms of Opposition. (1) When the proposition is propounded on the basis of Similarity, there is opposition. set up against it on the basis of another Similarity, which is contrary to the former Similarity, (2) and when the Proposition is propounded on the basis of Dissimilarity, there is opposition set up against it on the basis of a Similarity, contrary to the said Dissimilarity ;- both these constitute 'Parity per Similarity.' E.g. (1) The Proposition being in the form 'Sound must be non-eternal,-because it has the character of being produced, and such things as the Jar and the like, which have the character of being produced, are found to be non-eternal, '---the following opposition is set up against it. 'If Sound is regarded as non-eternal by reason of its similarity to the non-eternal Jar, it should have to be regarded as *Eternal* also, because it has incorporeality, which forms its similarity to Akasha which is eternal." (2) The same Proposition being put forward

• The words and also Male disadron https://www.holybooks.com

on the basis of Sound's dissimilarity to $Ak\bar{a}sha$ [i. e. 'Sound must be non-eternal, because it has the character of being produced, —and $Ak\bar{a}sha$, which is eternal, is not possessed of that character], the following opposition is set up against it:—'If Sound is to be regarded as non-eternal by reason of its dissimilarity to the eternal $Ak\bar{a}sha$, it should have to be regarded as eternal, by reason of its similarity to the eternal $Ak\bar{a}sha$, in the shape of incorporeality;—if you think that even though this Similarity is there, Sound cannot be regarded as eternal, then it is not right for you to assert that 'Sound should be regarded as non-eternal, by reason of its similarity to the Jar, or by reason of its dissimilarity to $Ak\bar{a}sha$.'

The urging of the Futile Rejoinder serves to point out that there is no special reason (in support of the view propounded in the Proposition); and there being no such special reason, the Futile Rejoinder bears the semblance Vartika P. 539. Of the urging of the fallacy of 'Inconclusiveness.'

(8) Similarly when the proposition is propounded on the basis of Dissimilarity and Opposition is set up against it on the basis of Dissimilarity contrary to the former, and (4) when the Proposition is propounded on the basis of Similarity and Opposition is set up against it on the basis of a Dissimilarity contrary to the former—we have 'Parity per Dissimilarity.' E. g. (3) When the same argument is put in the form 'Sound must be non-eternal, by reason of its dissimilarity to Akāsha,' the Opposition is set up that 'it should be regarded as eternal by reason of its dissimilarity to the Jar, in the shape of incorporeality.' (4) The same argument being put forward on the basis of similarity to the Jar (in the shape of having the character of being produced by Opposition up a set up against it that—'If by reason of its similarity to the Jar, Sound is to be regarded as non-eternal, then, by reason of its dissimilarity to the Jar (in the shape of incorporeality', it should have to be regarded as eternal; '—if you think that even though there is this dissimilarity, Sound cannot be eternal, then, in that case, your reasonings—'Sound must be non-eternal, because of its similarity to the non-eternal Jar, and because of its dissimilarity to the eternal Akasha'—are inconclusive (not true). This is what constitutes the 'absence of special reason.'*

Bhāşya on Sū. (3).

[P. 242, L. 12 to P. 243, L. 6.]

The answer to the above two Futile Rejoinders is as follows :---

Sūţra (3).

THE PROPOSITION WOULD BE ESTABLISHED IN THE SAME MANNER AS THE FACT OF A CERTAIN ANIMAL BEING THE 'COW' IS ESTABLISHED BY THE PRESENCE IN IT OF THE CLASS-CHABACTER OF THE 'COW.'-(SÜ. 5).

If one were to seek to establish his proposition by means of mere 'similarity,' or by means of mere 'dissimilarity,'--then there would certainly be the uncertainty (inconclusiveness, urged in the Futile Rejoinder). There is however no such uncertainty when the conclusion is based upon a particular property [such as is invariably concomitant with what is sought to be proved]; e. g. that a certain animal is the

*Udayanachārya in his Bodāa-siddhi says—Each of these two Futile Rejoinders is threefold: (1) Bearing upon a true subject (2) bearing upon an untrue subject, and (3) consisting of wrong expression. The examples cited in the Vārtika belong to the first kind (Sound being really non-eternal). Following is the example of the second kind:—The Proposition being propounded in the form 'Sound must be eternal, because it is intangible, like Ākāsha,' the Opposition is set up against it that 'Sound being cognisable, and as such similar to non-eternal things, it should be regarded as non-eternal'. 'The examples cited in the Bhāşya belong to the third kind; as the subject thereof is true, it is only the verbal expression that is defective. A Rejoinder, even though quite right in matter, if it is put up in wrong form, the subject hereof.

dow is proved by reason only of that 'similarity of it to the cow' which consists in the presence of the particular class-charecter 'cow' (which is invariably concomitant with, inseparable from, all cows),-and not by reason of the presence of such other properties as are different from the presence of the dewlap * [which other properties are not invariably concomitant with all cows]. Similarly the proposition that a certain animal is the oow is proved + by reason only of that ' dissimilarity of it to the Horse' which consists in the presence of the class-character ' cow, '-and not that dissimilarity which might consist in a mere diversity of qualities &c. All this has been explained in the section on 'Factors of Reasoning' (in Bhaeya on Sū, 1-1-39), where it has been pointed out that in the sentence (formulating the inferential argument), several Instruments of Cognition combine together and conjointly accomplish the common purpose (of proving the conclusion), -and that the uncertainty (that the Futile Rejoinders point out) can apply only to Fallacious Reasonings (and not to valid reasonings).

Vārļka on Sū. (3).

[P. 588, L. J0 to L. 18.]

The answer to the above two Futile Bejoinders is as follows:—The proposition would be established etc. etc.—says the Süfra. Even though between the Horse and the Cow, there is similarity consisting of the character of being and so forth, and there is also dissimilarity, consisting in the (fact of one of them, the Horse, having) uncleft hoofs,

• The word 'slanddisambanikal' as it stands, would mean that the said conclusion cannot be proved by the presence of the dewlap de. This however would be wrong; as the presence of the dewlap de. is as peculiar to, and invariably concentiant with, all cows, is the class-character 'cow'itself. In view of this, the TStparys has explained the compound 'sdanddi' as meaning properties other than the presence of the dewlap.

tभ मेर: सिरमसि is wrong. Read भ in place of भ as found in Puri B, also in C and D. Downloaded from https://www.holybooks.com

-yet, on the mere ground of the said similarity in the form of the character of 'being' the Cow cannot become the Horse; nor on the mere ground of the dissimilarity in the form of uncleft houfs, the non-Cow can become the Cow. And what is the reason for this ?- The reason lies in the fact that one (the similarity) is not invariably concomitant (with the 'Cow), and the other (the dissimila, ity) is not exclusively precluded (from the 'Cow' only). • It is only that 'similarity' which is invariably concomitant, relatively as well as positively, with a certain property, that can serve as the ground for attributing that property to a certain object; and it is only the class-character 'Cow' that is so concomitant (with the character of being the Cow); hence it is only the presence of this class-character ' Cow' that can prove the fact of a certain object being the Cow. In the case in question, 'incorporeality' is a quality that is positively concomitant, as well as negatively concomitant, with both 'eternality' and 'noneternality'; hence the presence of that quality can be a ground for regarding Sound either as 'eternal' or as 'non-eternal.' On the other hand, on the ground of the presence of the character of being produced, which is positively and negatively concomitant (with 'non-eternality 'only,) we shall be justified in regarding Sound as 'non-eternal only.' Thus then, to your assertion-that there is no special reason (in support of the original proposition as against the Futile Rejoinders) -our answer is that what we have just pointed out (i. e., the necessity of invariable concomitance) for ns the 'special reason' (in support of the original proposition that 'sound is non-eternal, because it is endowed with the character of being produced.')

End of Section (1).

^{*} The character of ' being' is present not only in the Cow, but in all things ; uncloft hoef is absent not only unkindes of furthings with the buffalo.

Section (2).

[Sūtras 4-6.]

Dealing with the six Futile Rejoinders—(5) 'Purity per Augmentation' (4) 'Parity per Subtraction,' (5) 'Parity per Uncertainty', (6) 'Purity per Oertainty,') (7) 'Parity per Shuffling,' and (8) 'Purity per Probandum,'—which are bused upon the diversity of the character of the Subject and that of the Instance.

Sūfra (4).

BASED UPON THE DIFFERENCE IN THE PROPERTIES OF THE 'SUBJECT' AND OF THE 'EXAMPLE' ABE THE FUTILE REJUINDERS NAMED (3) 'PABITY PER AUGMENTATION,' (4) 'PABITY PER SUBTRACTION', (5) 'PABITY PER UNCER-TAINTY,' (6) 'PARITY PER CERTAINTY,' (7) 'PABITY PER SHUFFLING;' AND BASED UPON THE FACT OF BOTH (SUBJECT AND EXAMPLE) BEING 'OBJECTS TO BE PROVED' (BY INFER-ENCE) IS THE FUTILE REJOINDER NAMED (5) 'PARITY PER PROBANDUM.'-(SQ. 4.)

Bhasya on Su. (4).

[P. 243, L. 9 to P. 244, L. 2.]

(3) When the Opposer puts forward the contingency of an additional property of the 'Example' subsisting in the 'Subject', it is 'Parity per Augmentation '+ E. g. [against the Proposition that ' the Soul must be active, because it is endowed with properties conducive to action, like the Olod of Earth '] the

* 'Salkza', says Vishvanatha, stands here for 'pakga', 'Subject'. 'The diverse character' referred to are existence and non-existence.

† The property in question does not really belong to the 'Subject,' and the Rejoinder attributes that property to it; thus there is an accession to, an union of, the properties of the bould end of the notified attributes of the bould be attribute of the bould be attributed to the second te second Opposition is set up—" if by reason of the presence of qualities conducive to action, the Soul should, like the Clod of Earth, be regarded as active, then, like the Clod of Earth, it has to be regarded as tangible also; if it is not tangible, like the Clod of Earth, then it should not be active either; or you should point out some special reason (why it should be regarded as active, and not as tangible)." [Here the additional quality of tangibility, which is not existent in the Soul, is attributed to it]."*

(4) When the Opposer urges the contingency of the absence of a certain property in the Subject, on the analogy of the 'Example',—it is 'Parity per subtraction; e.g., (against the same Proposition) the Opposition is set up—"inasmuch as the Old of Earth is found to be active and not all-pervading, the Soul also, if active, should be regarded as not all-pervading; or you should point out some special reason (why it should be regarded as active and not as not all-pervading) [Here the property of all-pervadingness is subtracted from the Soul].

(5) and (6) 'Varnya' means 'khyāpanīya,' 'that which is yet to be known', hence 'uncertain'; and 'avarnya,' 'certain,' is the reverse of that; these two properties, 'uncertainty' and 'certainty', belong respectively to the 'Subject' and the 'Example' [the presence of the Probandum in the Example being known for certain, while its presence in the Subject is still uncertain |; and when, in opposition, the opposer reverses these qualities (by attributing uncertainty to the 'Example,' and certainty to the 'Subject'], we have the Futile Rejoinders, 'Parity per Uncertainty' and 'l'arity per Certainty.';

This Futile Rejoinder is intended to urge the Fallacy of 'Contradiction '- says Udayana.

† This is intended to urge the Fallacy of the 'Unknown'.

t'Parity per Uncertainty', by reducing the Example to Uncertainty, makes it equal to the 'Subject'; and 'Parity per Certainty,' by removing uncertainty' from the Subject', makes it equal to the 'Example'. The 'Subject' is that in which the presence of the Probandum is doubtful and is sought to be confirmed by the argument in question; while the 'Example' is that wherein the presence of the Probandum is known for certain.

As an example of 'Parity per Uncertainty' in the generalised form, Vishvanätha puts forward the following :--Against any argument that the First Party might put up in support of dis Respectition; the Opponent will bask up the following Opposi-

(7) The 'Example' being endowed with the property that constitutes the Probans (proving the desired Proposition,) -if the Opponent attributes to it some other property, and then urges the fact of this other property being such as is not invariably concomitant with the properties of the Probandum,-it is a case of 'Parity per Shuffling.' E.g. (against the same Proposition) we have the Opposition-"One thing endowed with qualties conducive to action is found to be possessed of Gravity, as we find in the Clod of Earth (Example), --- while another thing similarly endowed is found to be devoid of Gravity, as we find in the case of Air :--similarly it is possible that while one thing, the Clod of Earth, which is endowed with qualities conducive to action, is active, another thing, the Soul, which is similarly endowed, may be without action ;---or you should show some special reason (against this)."*

tion—"What can prove the Proposition is only that Property which, as Probans, subsists in the Subject of that Proposition ;—this Probans must, in order to be effective, subsist in the Example also ;—now the principal property that subsists in the 'Subject' is the character of having the presence of the probandum doubtful ; and this same character should reside in the Example ; hence the Example also should be one in which the presence of the Probandum is doubtful."—And the following is the example of 'Parity per Certainty :—"The Example must be one in which the presence of the Probandum is known for certain, the property in the Example must also reside in the Subject,—hence the Subject also must be one in which the presence of the Probandum is known for certain,—and if the Subject is so, then it loses the very character of the 'Subject', which must be one in which the presence of the Probandum is only doubtful."

The 'Parity per Uncertainty " is intended to urge the Fallacy of 'contradiction' and 'Parity per Certainty ' is intended to urge the Fallacy of the 'unknown'-says Udayana.

•Here the Opponent attributes to the Example, Clod of Earth, the quality of 'gravity,' and then shows that gravity, one quality of the Example, is not invariably concomitant with the qualities conducive to action (as in Air, we find these latter, but not the former),—and analogously it may be possible that qualities conducive to action, which also belong to the Example, may not be invariably concomitant with activity. Here we have a case of a property (gravity) being found in the Example which is not invariably concemitant with the Probans, 'qualities conducive to action.' This also includes case (i) where the property found in the Example is one with which the Probans is not invariably concemitant. This Futile Rejoinder is intended to urge the Fallacy of Inconclusiveness, eave Udayana. Downloaded from https://www.holybooks.com (8) That character is called 'Probandum' which is found to be one upon which the whole force of the Probans and the other Factors of the Reasoning is operative; and when such character is attributed to the 'Example', it is 'Parity *per Probandum.*' E.g., "If the Soul is to be regarded as active, in the same manner as the Clod of Earth is active, then it comes to this that the Clod of Earth is like the Soul,— and the Soul is the Subject in regard to which the presence of Activity is still to be proved,—hence the Clod of Earth also should be one in regard to which the presence of Activity is still to be proved;—if this is not so, then it is note true that the Soul is like the Clod of Earth (which means that the Example cited is not right]."[†]

Vārļika on Sū. (4).

[P. 539, L. 3 to L. 13.]

'Augmentation' consists in imposing a property that does not exist;—and 'Subtraction' is the withdrawing of the property that is already present;—'Uncertain' is that which is yet to be proved; and 'Certain' is that which has not got to be proved.—'Shuffling' consists in a peculiarity. The Opposition that makes use of these constitutes the five Futile Rejoinders, 'Parity per Augmentation', and the rest. And when the Opposition shows that the character to be proved, and that which has been put forward to prove it, stand on the same footing, it is a case of 'Parity per Probandum.'

For example, in the Proposition already referred to, it having been asserted that the conclusion must be true, because such is found to be the case with the Jar,—the opposition is set up that,—"if Sound is like the Jar, then, since the Jar has Colour, Sound also should be regarded as colour-

[&]quot;This q is wanting in the printed text; it is found in the Puri Mss. also in O. and D.

[†] The Subject, the Probans and the Example must be such as are definitely known from other source: of knowledge, and are not dependent upon the reasoning of which they themselves form parts. That which is to be proved, the Probandum is one that is not so known. If the Example is shown to be one which also is still to be proved, this vituates the entire reasoning.

This is meant for glothe Fallacy hip the Wather who oks.com

ed ;-this is a case of ' Parity per Augmentation.' If the Opposition is set up in the form-" since Sound is colourless, the Jar also should have to be regarded as colourless,"---it is a case of 'Parity per Subtraction.' If the Opposition is in the form-"That the Jar is non-eternal is certain, then the non-eternality of Sound also should be certain ', or ' the fact of Sound being eternal being uncertain, that of the Jar being so should also be uncertain',-these two are instances of ' Parity per Uncertainty ' and ' Parity per Certainty.' If the Opposition set up is-"Sound may be capable of being produced (like the Jar), -but Sound is produced by Disjunction, while the Jar is not produced by Disjunction, so that the diversity between the two, in the form of one being eternal and the other non-sternal, should be as possible as that in the form of one being produced by disjunction while the other is not produced by Disjunction;"-this is an instance of ' Parity per Shuffling.' Lastly, when the Opposition is set up in the form-"What is the reason for asserting that the Jar is non-elernal; this reason is as much to be made known as the Probandum of the original Proposition,"-since such an opposition consists in the setting up of the fact of the Reason being like the Probandum, it is called ' Parity per Probandum.'

Bhāşya on Sū. (5),

[P. 244, L. 2 to L. 7.]

The answer to the above six Futile Rejoinders is as follows :---

St [ra (5).

INASMUCH AS THE 'REAFFIBMATION' (LEADING TO THE CONCLUSION) IS ONLY SECURED ON THE BASIS OF A PARTICULAR SIMILABITY (BETWEEN THE 'SUBJECT' AND THE 'EXAMPLE)', THERE CAN BE NO DENIAL OF IT ON THE BASIS OF ANY MERE DISSIMILARITY.----(SQ. 5).

*Invariable concomitance is the evential element, and when we have even one point of gimilacity which in insertiably persentions on the Probandum.

1676

It is not possible to hide away (i.e. deny) what has been duly established ;—and the 'analogy' (between the Subject and the Example) is duly established, if there is some point of similarity between them; as we find in the case of the well-known analogy 'as the Cow so the Gavaya'; this being so, in regard to the cow and the Gavaya, it is not possible to urge that " there is some difference (of character) between the two (and hence the analogy is not right) ";— similarly (in the case in question) when on the point of that character which is meant to establish the conclusion, it is found that it is present in the Example (and in the Subject),—it cannot be possible to deny the conclusiveness of the said character merely by pointing out that there is some difference between the two, consisting in a diversity in their properties.

Vartika on Sū. (5).

[P. 553, L. 15 to P. 540, L. 6.]

What the Sūțra means is that all that has been urged above cannot be accepted; as it shows that the real meaning (character) of the Probaus has not been grasped We do not mean to say that in Sound (the Subject) there are found all the properties of the Jar (the Example); all that we say is that, that property which proves the Probandum, and which therefore is the (Probans), resides in both. In the Beaffirmation (which is the fourth factor in our reasoning process) we use the expression 'so is (the Subject, Sound); and what this expression means is that the character of being capable of being produced is re-affirmed of Sound. Such being the case, what has been urged under Sū. 4) can have no meaning at all. When it is said 'As the Cow so the Gavaya,' it is not meant that all properties of the Cow reside in the Gavaya, or that all properties of the Gavaya reside in

Var. P. 540. the Cow; all that is meant by the statement is that it *affirms* in regard to the two animals just that property which is common to them. If it meant

that is enough to prove our conclusion. It is not possible for the 'Subject' and the 'Example' to have no dissimilarity at all ; that would mean identity. All that is necessary is that they should resemble on certain such points as are invariably concomitant with the Problem dish, from https://www.holybooks.com the affirmation of all properties, then, there should not have been used the expression 'as—so'; the right expression, in that case, would be ' this is the same as that'. Exactly the same is the case with the case in question (Sound and Jar).

It has been urged (Varlika, Text, P. 539, L. 11 &c.) that-" since between Sound and Jar there is this difference, that while one is produced by Disjunction, the other is not so produced, it follows from this that there should be this difference also between them, that while one is non-eternal, the other is eternal."-But as a matter of fact, the character of being capable of being produced is invariably concomitant, negatively as well as positively (with Non-eternality); and such is not the case with the character of being produced by Disjunction. Further, as a matter of fact, no object, either eternal or non-eternal, (with the sole of exception of Sound) is ever found such as is produced by Disjunction in the same manner as Sound is produced.[•] [So that being produced by Disjunction in this manner would reside in Sound only, and as such being too specific, could not prove anything at all.] So that the contention of the Opponent (putting up the Futile Rejoinder) has no force at all.

Satra (6).

FURTHER, INASMUCH AS THE 'EXAMPLE' BECOMES AN 'EXAMPLE' ONLY BY BEASON OF THE INDICATION OF THE ACTUAL PERSENCE, IN IT, OF THE PROBANDUM [IT CAN NEVER BE SAID TO STAND ON THE SAME FOOTING AS THE PROBANDUM, WHAT IS STILL TO BE PROVED]. Suira (6).

Bh#sya on St. (6). [244, Ll. 9-10.]

What is indicated (in the Example) is only such a fact as is not incompatible with what is agreed upon by all men, ordinary as well as learned; and since it is only when the presence of the Probandum is so indicated that the Example becomes a true 'Example',—there can be no ground for saying that the Example stands on the same footing as the Probandum.[•]

Vārtika on Sū. (6).

[P. 540, L. 8 to P. 541, L. 3.]

When you said that "the Example is the Probandum, what is to be proved", you did not understand the true character of the 'Example'. The 'Example' is that which forms the subject of the undisputed cognitions (of both parties); and as such it can never be the Probandum, what is to be proved (which is always doubtful). If the cognition (involved in the Example) were disputed, it would not be a true Example,—being devoid of the obaracteristics of the 'Example'.

[In connection with Futile Rejoinders some people have held that—" their number should be *fourteen* only, not twentyfour, for if they are *twenty-four*, then] there is needless repetition of certain Futile Rejoinders." There is however no repetition; (a) because their meanings are distinct; it has been explained how the meanings of 'Parity per Augmentation' and the rest are different from one another;—(b) because we find a distinct difference in the manner in which each of them is put forward; as a matter of fact, the way in which 'Parity per Augmentation' and the

^{*}The answer given in Sū. 5, applies to all the six Futile Rejoinders described in Sū. 4. What is said in Sū. 6, is the answer that is applicable to only three of them—'Parity per Uncertainty,' 'Parity per Certainty' and 'Parity per Probandum'.—Tāpa Pjawnloaded from https://www.holybooks.com

other Futile Rejoinders are put forward is entirely dif-"In this manner there should be an endless ferent. mean by this that-" if the If you number." Futile Rejoinders are to be regarded as distinct simply by reason of difference in the way in which they are put for. ward, then their number cannot be twinty-four only (but endless),"-this has no force; as no limit is intended; it is not meant to limit the number of individual Futile Rejoinders to twenty-four only; but this endless variety is due to the variety of examples (all which fall within the twenty-four "How do you know that this well-defined groups). is what is meant?" Well, the single Fallacy of 'Neutralisation' has been divided into four kinds. If. in answer to this, the Opponent should say that, since all Futile Rejoinders have a certain common characteristic, they must be regarded as one and the same,-this would militate against his own assertion that the number of Futile Rejoinders is fourteen. If this diversity (into fourteen kinds) be held to be based upon some sort of difference among them. -then it cannot be rightly asserted that "Parity per Augmentation' and the rest do not differ from 'Parity per Shuffl-

Var. P. 541. ing;' for, just as on the basis of some difference among them, there would be *fourteen* Futile Rejoinders,—in the same manner, on the basis of some difference, the number would be twenty-four. In fact the argument that, "by reason of some sort of similarity among ' Parity per Augmentation' and the other Futile Rejoinders, they should be regarded *as one*", is itself of the nature of a Futile Rejoinder, called 'Parity per Non-difference.' And the answer to this Futile Rejoinder is mentioned **alsowhere** (under Su. 5-1-24).

End of Section (2).

' Downloaded from https://www.holybooks.com

Section (8).

[Sutras 7-8.]

Dealing with (9) ' Parity per Convergence' and (10)' Parity per Non-convergence.'

Sūļra (7).

"THE PROBANS (COULD ESTABLISH THE PROBANDUM) BITHEB BY UNIFING, OB NOT-UNITING, WITH THE PROBAN-DUM,—IF IT UNITRS WITH IT, THEN IT BECOMES NON-DIFFERENT FROM IT; WHILE IF IT DOES NOT UNITE WITH IT, IT CANNOT PROVE IT "—THESE ARGUMENTS CONSTITUTE (9) 'PARITY PRE CONVERGENCE', AND (10) 'PARITY PER NON-CONVERGENCE.'

Sū. (7).

Bhāşya on Sū. (7).

[P. 244, L. 13 to L. 16.]

"Is it by uniting with the Probandum that the Probans would establish it? Or by not uniting with it? It cannot establish it by uniting with it; because by uniting with it, it would become non-different from it, and as such could not establish it. When of two things both are existent, and are united,—which could be the 'probans,' the 'establisher,' and which the 'probandum' • the 'established'? If, on the other hand, the Probans does not unite with the Probandum,—then (on that very account) it could not establish it; for example, the Lamp does not illumine an object unless it is united with it." When the Opposition is urged on the basis of ' uniting' (Converging), it is ' Parity per Convergence'; and when it is Urged on the basis of ' non-uniting' (non-converging), it is ' Parity per Non-convergence.'

[•] It is only what is not already accomplished that can be established; what is united with anything must be an accomplished entity; hence no such thing can be what is to be established, the 'probandum'; and when two things anite, they become identified; hence if the Probans and the Probandum become united, there can be no relation of cause Endveltest between these.//wWaysooks.com

Vārļika on Su. (7).

[P. 541, L. 6 to L. 18.]

In the same argument when it is urged that 'Sound must be non-eternal because of its similarity to the Jar,' the following opposition is set up against it: -- 'If this probans becomes united with the probandum, then, having become united with it, it becomes non-different from it. 'What is the meaning of this non-difference?'. It means that both are existent; and since what is non-existent cannot be united with it, the 'probans' ceases to be the means of establishing (that Probandum with which it unites). If, on the other hand, the probans does not unite with the probandum, then the probans becomes non-different from the non-united (hence non-existent) probans; and as such ceases to be a probans ; the Fire that is not united with an object never burns it.

When the Opposition is urged on the basis of 'Uniting,' it is 'Parity per convergence,' and when it is urged on the basis of 'not-Uniting,' it is 'Parity per Non-convergence.'

[Even though both those Futile Rejoinders represent a single Opposition to the same argument, yet] they are mentioned separately, in view of the two different ways in which one may look upon these: If one comes to speak of the two as different, then the two may be regarded as two distinct Futile Rejoinders—' Parity per Convergence' and ' Parity per Non-Convergence;' but when they are spoken of as one and the same, they may be regarded as one only; just as in the case of the 'forest' and the 'trees' constituting it [If we wish to lay stress upon the diversity of trees, we regard them as many trees; but if we lay stress upon them as forming a single entity, we speak of them as the Forest.}

"What has been described cannot be regarded as a Futile Rejoinder, as it does not possess the characteristics of the Futile Rejoinder, which are the solution of the states of the solution of If you mean by this, that—" What form the characteristics of the Futile Rejoinder are not present in what has been just described, for the Futile Rejoinder consists in 'Opposition on the basis of Similarity and Dissimilarity '(Sū. 5-1-1); and that which does not fulfil this condition cannot be a 'Futile Rejoinder; e.g., the Horse, which does not possess the characteristics of the Cow, is not regarded as O_{100} ,"—then our answer is that this contention is not right; for it shows that the meaning of the Sūțra has not been grasped; it is clear that the objector has not understood the meaning of the Sūțra 'Futile Rejoinder consists in Opposition on the basis of Similarity and Dissimilarity'; hence the objection has no force at all.

This also serves to dispose of '*Traikālya-Sama*' and other such Futile Rejoinders (that have been propounded); as all this shows that the meaning of the *Sūţra* has not been understood.

Bhāşya on Sū. (8).

[P. 244. L. 16 to P. 245, L. 2.]

The answer to the above two Futile Rejoinders is as follows :---

Sūţra (8).

THE DENIALS (EMBODIED IN THE REJOINLEES) ARE NOT EFFECTIVE; (a) BECAUSE WE FIND THE JAB AND SUCH OTHER OBJECTS ACCOMPLISHED (WHEN THRIE CAUSES ARE IN CONTACT WITH THEM), AND (b) BECAUSE KILLING BY MAGIC (IS ACCOMPLISHED WITHOUT THE KILLER COMING INTO CONTACT WITH THE KILLED PERSON). (SU. 8).

The denial is not right, in either of the two forms: (a) Such effects as the Jar and the like are brought about by the Agent, the Instruments, and the Receptacle only when

+ The printed Wysykaschinibanalhatpendiventifent tor afferent

[&]quot;When it is said that Futile Rejoinder consists in 'opposition on the basis of similarity and dissimilarity'; it is not meant that these—Similarity and Dissimilarity should be with properties of the Example only; they may be with any property, other than that which forms the Probandum of the original Proposition.—*Tāparya*.

these are in contact with the Clay (out of which the Jar is made) [So that 'Parity per Convergence' can have no force];—and (b) when trouble (killing) is brought on a person by means of magical spells, we find that the cause brings about its effect without coming into contact with it. [So that 'Parity per Non-Convergence' also can have no force.]

Vārļika on Sū. (8).

[P. 542, L. 1. to L. 13.]

As a matter of fact, when the potter's stick and the other things (that are employed in the making of the Jar) unite with (come into contact with) the Lump of Clay (out of which the Jar is made), they do not become non-different from their effect, (Jar); nor does the relation of cause and effect cease (between them and the Jar); i.e., when the 'potter's stick comes into contact with the Clay, it does not cease to be the 'cause' (of the Jar), nor does the other (i.e., the Jar) cease to be its 'effect.' If you think that-" The Jar is the effect, and at the time that it is not in existence (as it is bound to be before it is made), what could any 'cause' do to'it ?",--our answer is that we do not mean that the cause operates upon what is non-existent; what is meant is that it tends to turn the Clay into the Jar | so that the cause operates upon the Clay, which is existent]. "What is the meaning of the Clay being turned into the Jar?"

What is meant is that the component particles of the Claylump renounce their former composition and take up a new composition, and out of this new composition arises the Jar.

In the case of killing by magic, we find the cause bringing about its effect without coming into contact with it. "What is the meaning of not coming into contact?" What it means is that the Effect is brought about by the cause without the two coming together. [It must mean this, as] otherwise, if a time and immeds have been at the second secon such arriving is present in the case in question (when the Killer does aim at the killing), as is shown by the fact that the operation 'of the killing) is restricted in its scope (to the single person whose death is compassed by the Agent).

This Futile Rejoinder is an attempt at discarding all kinds of Probans. [The Probans can only be either an indicator or a maker, and] if the Probans is regarded as an indicator, as also if it is regarded as a maker, in either case it becomes subject to the attack embodied in the Rejoinder. It stands self-condemned, however, by the very fact that it is based upon the total rejection of the entire fabric of the relation of 'Cause and Effect'. "What is the self-condemnation in it?" If what is urged in the Futile Rejoinder is true, then the Rejoinder itself cannot come up ;---why ?--- because the question would remain-does the Rejoinder accomplish its purpose (by denying the causal relation) without getting at it? Or by getting at it? And does it come into contact with what it denies? or does it not come into contact with it ?-So that the objections urged by the Rejoinder would apply to itself with equal force.

End of Section (3).

Section (4).

[Sūtra (9).

Dealing with—(11) 'Parity per Continued Question' and (12) 'Parity per Counter-instance.'

Sutra (9).

(a) WHEN THE BASIS OF THE 'EXAMPLE' IS NOT MEN-TIONED, IT IS (11) 'PABITY PER CONTINUED QUESTION' AND (b) WHEN THE OPPOSITION IS SET UP THROUGH A "COUNTER-INSTANCE, IT IS (12) 'PARITY PER COUNTER-INSTANCE.' SQ. (9.) Downloaded from https://www.holybooks.com

Bhāşya on Sū. (?).

[P. 245, L. 5 to L. 10.]

(a) When the Opposition is set up in the form of the 'Continued Questioning' that "it is necessary (for the propounder of the original Proposition) to point out the proof for the Probans also"—it is Opposition called 'Parity per Continued Question'. E.g., "You do not mention the reason (basis) for asserting that the Olod of Earth, which is endowed with qualities conducive to action, must be active; and until the reason is mentioned, nothing can be accepted as true."*

(b) When the Opposition is based upon a counter-instance, it is 'Parity per Counter-instance.' E. g. The original proposition having been put forward in the form - 'The Soul must be active,—because it is endowed with qualities conducive to action,—like the Clod of Earth, '—the Opponent sets up a counter-instance—" $Ak\bar{a}sha$, which is endowed with qualities conducive to action, is found to be without action [and hence why cannot the Soul be regarded as inactive, like Akasha?]". But what is that quality in $Ak\bar{a}sha$ which is conducive to action? "It consists of contact with Air, which aided by Faculty or momentum (leads to action), as is found in the case of the contact of Air with the Tree." \dagger

Vārļika on Sū. (9).

[P. 542, L. 16 to P. 543, L. 13.]

For example, in connection with the same argument, when it is based upon the similarity (of Sound) to such things as the Jar and the like, the Opponent sets up the following opposition—" What is the proof that the Jar itself is noneternal?"; and this constitutes 'Parity per Continued Ques-

[•] The *Tatparys* thus explains the difference between 'Parity per Continued Question' and,' Parity per Probandum.'—In 'Parity per Probandum 'the Opponent urges the increaseity of the Probans and all other Factors of Reasoning being provided in support of the Example, exactly in the same manner as is done in support of the Probandum; while in 'Parity per Continued Question, 'he only wants to know by what means of cognition the Example is known.

tion.' Of 'Parity per Counter-instance,' the example cited in the $Bh\bar{a}_{ijn}$ should be regarded as sufficient.

[In the Bhāşya, the contact of the Air with Akāsha has been cited as the quality conducive to activity; this is objected to]—"Inasmuch as the contact of Air and Ākāsha does not act as the cause (of any action), what has been said is not right."

If you mean by this that—" The contact of Air and $\bar{A}k\bar{a}sha$ is never found to be the cause of any action; it cannot bring about any action at any of the three points of time; *i. e.* the contact of Air and $\bar{A}k\bar{a}sha$ has never produced, does not produce, and will not produce, action in $\bar{A}k\bar{a}sha$;^e and that which is not found to act like a cause at any of the three points of time caunot be regarded as a cause at all; Vár. P. 543. just as one Jar can never be regarded as the cause of another Jar, "—this cannot be right;

for what is said is found possible in things resembling that Contact ; we do not mean that it is the contact of Air and Akāsha itself which is the cause of action; all that we mean is that similar contact is found to be the cause of action in other things,-as for instance, the contact of the Air and Tree; and the fact that the contact of Air, though of the same kind, does not bring about action in Akasha, is due, not to the fact of that (contact) not being a cause of action, but to the presence of obstacles (to such action). "By what is the action obstructed?" By the vast dimension of Akāsha; just as there is no action produced in the Clods of Earth, when they are struck by mild blasts of Air. If you were to regard a thing as the cause of action only after you have seen the Action (produced by it), then, for you, all kinds of causes would be reduced to this condition that their

^{*} The right reading on the real state of the right of the

causal character could be accepted only when it could be inferred from the actual appearance of their effect; and in that case it would not be possible for you to take up the material cause of an object (for the making out of it of the desired object), as it would be doubtful (until the Effect is actually produced) whether or not the Cause will produce the necessary Effect. For him however who would take up the cause, on the strength of its resembling another cause (which has been found to be productive of the object), the taking up of the cause would be quite reasonable. If you do not accept the view that what resembles a cause is itself a cause,-then it would be impossible for you to urge against anyone the 'Fallacy of Inconclusiveness'; for the 'incorporeality' that is in Sound is not the same as (but only similar to) that in Akasha &c. (on the strength of which the Fallacy could be urged). As a matter of fact, every Inference proceeds on the analogy of what is seen in one case to things in another case; certainly the properties in one smoke are not precisely the same individual properties as those in another smoke.

Bhāşya on Sū. (10).

[P. 245, L. 10 to L. 18.]

The answer to the above Futile Rejoinders is as follows :---

Sefra (10).

THE CONTINUED QUESTION COULD COME TO AN END JUST AS IT DOES IN THE CASE OF THE PRICHING OF THE LAMP. (SQ. 10.)

The first party, on being questioned by the Opponent in the manner described in the preceding $S\bar{u}$ /ra, can say (in reply)—Who are the persons that fetch the lamp? and why do they fetch it? [The Opponent will say]—"It is fetched by persons desiring to see, and they fetch it for the purpersymptical seeing https://things./socke.seen." But [the first party will ask again] Why do not people, desiring to see the Lamp (which is a thing to be seen) fetch another lamp?—"They do not do so, because they can see the lamp even without the second lamp." From this, it follows that for the seeing of the Lamp itself, the fetching of another lamp is useless. [Now turning to the case in question]—For what purpose is the Example put forward?—It is put forward for the purpose of making known some thing not already known. Why then is the mention of the basis of the Example sought for⁴ (by the Opponent setting up the Futile Rejoinder)? If it is sought for the purpose of making the Example known,—then our contention is that the Example is already known [as, if it were not known, it would not be put forward as Example]; for the Example is that in regard to which there is a consensus of opinion among all men, learned and unlearned; so that any mention of basis for the purpose of making the Example known would be absolutely useless. This is the answer to ' Parity per Continued Question.'

> *Vārļika* on Su. (10). [P. 243, L. 15 to L. 20.]

The Opponent should be asked—who are the persons that fetch the lamp and why do they fetch it ?—" It is fetched by persons desiring to see, and they fetch it for the purpose of seeing the things to be seen." Why do not they bring up another lamp for the seeing of the former lamp ?—" Simply because the lamp is seen without the other lamp."—Well then, for what purpose is the Example put up ?—For the purpose of making known what is not known.—Why then do you seek for another Example for the sake of the former Example ? If for the purpose of making it known,— then our answer is that it is already known.†

* The correct reading is truth as found in Mss. B., C., and D.

† The clause ungrangenerging appears to be superfluous. It might be construed with the next Sätra. But the phrase ungranger is nowhere found in the Pärvapaksa-of which this could be an ungrang here. We have therefore dropped it. Downloaded from https://www.holybooks.com

Bhāşya on Su. (11).

[P. 245, L. 19 to P. 246, L. 2.]

The answer to 'Parity per Counter-instance' is as follows :---

Sū[ra (11).

IF THE COUNTER-INSTANCE IS AN EFFECTIVE BEASON, THE EXAMPLE ALSO CANNOT BUT BE AN EFFECTIVE BEASON. (SO. 11).

When the Opponent puts forward the Counter-instance, he does not cite any special reason in support thereof—to show that for such and such a reason the Counter-instance is an effective reason, and the Example is not so. So that, when the Counter-instance is recognised as an effective reason, there can be no ground for saying that the Example is not an effective reason;—and when can it not fail to be effective reason? Only when it is itself not capable of being denied and is capable of proving the conclusion. [So that if it is effective reason, it must prove the conclusion.]

Varlika on Sū. (11).

[P. 544, L. 2 to L. 8.]

The Example cannot but be an effective reason—(says the Sūţra)—(A) Because of its being admitted : one who admits the fact of the Counter-instance being an effective reason, must also admit the fact of the Example being an effective reason; and being on effective reason consists in being able to prove the desired couclusion.—When can it not fail to be an effective reason?—When it is itself not capable of being denied and is capable of proving the desired conclusion—says the Bhāşya; and the Example is capable of proving the desired conclusion and is not denied.—(B) Also because the Opponent cannot formulate his argument : If he formulates it in the form—"As your Example so mine also,"—then, we readily admit this; so that what you urge is not a counter-instance against us. If, on the other hand, he formulates it -"Just as management is in the sight. Example, so is

yours also not the right example,"-then, inasmuch as this would involve self-condemnation, there would be no (correct) Counter-instance.

Section (5).

٠

[Sūtras 12-13.]

Dealing with (18) ' Parity per Non-generation.'

Sūfra (12).

"BEFORE THE BIETH (OF THE SUBJECT), SINCE [WHAT IS URGED AS] THE GROUND [FOR THE PROBANDUM BRING PREDICATED OF IT] CANNOT SUBSIST, [THE AEGUMENT CAN PROVE NOTHING],"—THIS IS 'PARITY PEB NON-GENERATION.' (Sū 12).

> Bhūşya on Sū. (12). [P. 246, L 4 to L. 7.]

The proposition being stated in the form—'Sound must be non-eternal, because it comes after effort, like the Jar,' the Opponent sets up the following Opposition :—''Before it is produced, the Sound has not appeared, hence (at that time) the character of coming after effort, which is the ground urged for its non-eternality, does not subsist in Sound; and since this character does not subsist in Sound, it follows that Sound is eternal; and that which is eternal is never produced.' —This opposition, based upou 'non-generation' (or nonproduction), 18 'Parity per Non-generation.'

Vārļika on Sū. (12).

[P. 544, Ll, 10-18.]

The proposition having been put forward that, 'Sound is non-eternal' because it is capable of being produced, like the Jar,'—the Opponent might set up the following Opposition —"Before Sound is produced, the capability of being produced does not subsisterimedide from dup this we have come in gabsent, Sound must be incapable of being produced; and being incapable of being produced, it must be eternal";—this Opposition based upon 'non-generation' is 'Parity per Nongeneration.'

Bhāşya on Sū. (13).

[P. 246, L. 7 to L. 12.]

The answer to the above Futile Rejoinder is as follows :---

Sū(ra (13).

SINCE IT IS ONLY WHEN IT HAS BEEN PRODUCED THAT THE THING IS WHAT IT IS, AND SINCE WHAT IS URGED AS THE GROUND (FOR THE PROPOSITION) DOES THEN SUBSIST IN IT,—THE PRESENCE OF THE GROUND CANNOT HE DENIED. (SU, 13).

(A) Since it is only when it has been produced that the thing is what it is—i.e., it is only when it has been produced that the Sound becomes 'Sound'; before it is produced, it is not even 'Sound;' and as it is 'Sound' only after it has been produced, and when the Sound has been produced, the character of coming after effort, which is the ground for noneternality, is actually present in it; and since the ground does then subsist in it, there is no force in the objection that 'before the birth of the Subject, the ground does not subsist in it" (urged in the Futile Rejoinder).

Vārļika on Sū. (13).

[P. 544, L. 16 to P, 545, L. 21.]

Just as before Sound is produced, the character of being produced is not there, so is the Sound itself not there; it is only when it has been produced that Sound becomes 'Sound'; and when it is produced, it comes to have the character of being produced also; and thence it becomes 'non-eternal; and inasmuch as on Sound being produced, the character of being produced does subsist in it, the presence of the ground (of non-eternality) cannot be denied. While it is not produced, Sound is not what it is groce, before vit is yproduced, it cannot be

1692

spoken of either as 'Sound,' or as 'having the character of being produced,' or as 'non-eterpal.'

Further, the probans put forward in support of the Proposition (i.e., the character of being produced) is Var. P. 545. an indicator, not a maker; and to urge, against the indicator, objections that are applicable to the maker, can have no sense at all.* "But both being efficient operators, there can be no difference between the 'indicator' and This is not right; as the 'maker' is the 'maker.'" the author (agent) of the making, while the 'indicator' is the author of the indicating. "That which is the Indicator may also make some thing, and it may thus be spoken of as 'Indicator' as well as 'maker." That does not affect our position ; because (the fact remains that) while the 'maker' is the cause of making, the 'indicator' is the cause of indicating; one of them (the former) brings things into existence, while the other brings about the cognition of the thing already existing.

When the Opponent says—" Before Sound is produced, the character of being produced being absent, Sound comes to be that which is not capable of being produced,"—he admits the existence of Sound; for a non-existent thing could not have the property of being not capable of being produced; so that the qualification 'before it is produced ' becomes meaningless.

Others have offered the following objection to the Futile Rejoinder in question :---" When it is said that ' before Sound is produced, the ground is not there (Su. 12), this becomes

[•] This is an answer to what has been said under Sü. 12 to the effect that "there the ground for non-eternality being absent, the non-eternality cannot be there, hence Sound must be eternal." The sense of the answer offered is that it is only the maker, which on ceasing to oxist, puts an end to the existence of the effect; such is not the case with the *Indicator*, whose presence or absence does not affect the presence of what it indicates. So that even though the character of being produced may not be present when the Sound is not produced, that cannot vitiate the proving) efficiency of them also shows holybooks.com

a case of 'Parity per Presumption.' And if the Rejoinder is put up in the form—'since before Sound is produced, the character of coming after Effort cannot belong to it, it follows, by implication, that it is not endowed with the character of coming after effort; and not having this latter character, it must be eternal '—the answer to this is as follows :—It is by no means necessary that what does not possess the character of coming after effort must be eternal; in fact a thing not possessed of the character of coming after effort can be of three kinds—(1) some are eternal, e. g. Akāshā and the like, (2) some are non-eternal, e. g. the lightning-flash and such things, and (3) some are absolute non-entities, e. g. the 'sky-flower' and the like."

This however we do not find to be quite right.-Why ?-Because, in the first place, it is not right to say that 'some things, that are not possessed of the character of coming after effort, are absolute non-entities '; because ' coming after effort' really qualifies the birth (production, coming into existence) of the thing; that thing is regarded as not having the character of coming after effort whose birth or production does not follow from effort;-and as the absolute non-entity never exists, it can have no birth; and that which is a nonentity, how can anything be qualified by it? This same reasoning disposes also of the assertion that ' some things not possessed of the character of coming after effort are elernal'; because what is 'eternal' cannot be spoken of as 'not coming after effort ' [as this latter implies birth, which is not possible in the case of eternal things].

"This Futile Rejoinder (Parity per Non-generation) is not possessed of the characteristics of the 'Futile Rejoinder,' hence it cannot be regarded as a Futile Rejoinder.'

This is not right; in what is urged in opposition, it is shown that there loss commitarity/wbetween okstangrounds put forward in support of the original proposition, and such other grounds as have not been produced (come into existence) at all; that which has not come into existence can never be the reason or ground for anything; e. g. the yarns that have not themselves come into existence cannot be the cause of the Cloth. \bullet

End of Section (5).

.

Section (6). [Sütras 14—15.] Dealing with ' Parity per Doubt.' Sūtra (14).

THE 'COMMUNITY' AND THE 'EXAMPLE,' BOTH BEING EQUALLY PERCEPTIBLE BY THE SENSES, [THE OPPOSITION] BASED UPON SIMILABITY TO 'ETERNAL' AS WELL AS 'NON-ETERNAL' THINGS CONSTITUTES 'PARITY PER DOUBT.' (SU. 14).

Bhāsya on Sū. (14).

[P. 246, L. 15 to P. 247, L. 2.]

The Proposition being put forward in the form—'Sound must be non-eternal, because it comes after effort, like the Jar, '—the Opponent opposes it by casting doubt over it : "Even though Sound comes after effort, it has this *similarity*

• The objection is that Futile Rejoinder should consist in Opposition on the basis of similarity and dissimilarity (as declared in S0. 5-1-1); and as the opposition in 'Parity per Non-generation' does not proceed on any such basis, it cannot be regarded as a true 'Futile Rejoinder.' The reply is that the Opposition in this also does involve some notion of similarity : 'just as the non produced yarn cannot be the cause of the Cloth, so the character of coming after effort, which is not produced before the production of Sound, cannot be the cause of the proving of non-eternality in Sound.' This also shows that the difference of this Futile Rejoinder from 'Parity per Presumption' lies in the fact that, while in the present Rejoinder, the similarity urged is that to such causes as are not produced,—in 'Parity per Presumption, 'the Opposition is based upon the imposing of a meaning contrary to the meaning of the distinguished of the proving of produced. to the elernal 'Community' that both are perceptible ly the senses;—and the same also constitutes its similarity to the non-elernal 'Jar';—thus, by reason of its similarity to both 'eternal' and 'non-eternal' things, there must be doubt (as to the real character of Sound)."

Vārļika on Sü. (14).

[P. 546, L. 3 to L. 6.]

The example of this Futile Rejoinder has been given in the Bhāsya. It might be argued that—" Parity per Probandum does not, in any way, differ from Parity per Probad." If you mean by this that—" Just as the example of 'Parity per Probandum' is based upon similarity, so is the 'Parity per Doubt' also, and hence there being no difference between the two, the latter should not be regarded as a distinct kind of Futile Rejoinder, "—this is not right; because in 'Parity per Doubt' there is similarity (of the Subject, Sound) to two things (eternal and non-eternal), while 'Parity per Probandum' is based upon its similarity to a single thing; this constitutes the difference between the two.

Bhāsya on Sū. (15).

[P. 247, L. 2. to L. 11.]

The answer to the above is as follows :-

Sūfra (15).

(a) As BEGARDS THE DOUBT BEING RAISED ON THE BASIS OF (MERE) 'SIMILABITY,' [OUR ANSWER IS THAT] THREE CAN BE NO SUCH DOUDT WHEN THE 'DISSIMILARITY' (TO THAT SAME THING) HAS BEEN DULY RECOGNISED; (b) IF, BVEN ON DOTH (SIMILARITY AND DISSIMILARITY) BEING ENCOGNISED, DOUBTS WERE TO ARISE, THEN THERE WOULD BE NO END TO SUCH DOUBTS,--- (c) AND SINCE MERE 'SIMI-LARIY' IS NOT ACCEPTED AS AN EVERLASTING SOURCE OF DOUBT,---THE OPPOSITION SET UP CANNOT BE RIGHT. SQ. (15).

(a) When, on perceiving the distinguishing feature of 'Man'—which constitutes its 'dissimilarity '(to the Pillar) it has been duby ascertained at that with the by object operceived is a 'Man,'-there is no room for any doubt arising in regard to it on the basis of some 'similarity' between Man and Pillar. Thus, in the case of Sound, the character of coming after effort, which forms its distinguishing feature and dissimilarity (to eternal things), having been recognised, its 'non-eternality' becomes duly ascertained; and there can be no room for any further doubt arising on the mere ground of its similarity to eternal and non-eternal things. (b) If such a Doubt were to arise, then, inasmuch as the 'similarity' between the Man and the Pillar would never cease, the Doubt would never come to an end. (c) Lastly, we do not admit that 'similarity' is an everlasting source of Doubt, even when the distinctive feature of the thing has been duly recognised; e. g. when the distinctive feature of Man has been recognised, a mere similarity between 'Man' and 'Pillar' does not become a source of doubt.

Varțika on Sū, (15).

[P. 546, L. 10 to L. 13.]

From 'similarity'—i. e. from perception of similarity there arises doubt; but when 'dissimilarity'—i. e. the distinctive feature—has been perceived, doubt does not arise. If, on both—similarity and dissimilarity—being recognised, Doubt were to arise, then there would be no end to Doubt. We do not admit that 'Similarity' always gives rise to doubt; because even when there is 'Similarity' between two things, Doubt is set aside when the distinguishing feature of one of them is recognised.

End of Section (6).

Section (7).

[Sūtras 16-17.]

Dealing with (15) ' Parity per Neutralisation.' Sofra (16).

"By BEASON OF SIMILABITY TO BITH, THEEM ABISKS VACILLATION ",---(OPPOSITION) BASED UPON THIS BEASONING IS 'PABITY DEBRIN NEW MENN (Norther Debring).com

Bhāşya on Sū. (16).

[P. 247, L. 13 to L. 18.]

By reason of the similarity (of Sound) to both, eternal and non-eternal things, there is likelihood of the two contrary views [i. e. the original Proposition as well as its contrary];-this is what is meant by the term ' prakriya,' or 'vacillation' in the Saira: One view being-'Sound must be non-eternal, because it comes after effort, like the Jar,'-the other view is propounded on the basis of the similarity (of Sound) to Mernal things ['Sound must be eternal, because it is perceptible by the Auditory Crgan, like the classcharacter Sound']. Thus then, it is found that when the Probans-' because it comes after effort '-- is put forward as constituting the similarity (of Sound) to non-eternal things, it is not free from the possibility of the contrary view being set up; and in the face of this possibility, the conclusion sought to be based upon that Probans cannot be established. The same holds good in regard to a Probans that would be put forward as constituting the 'similarity' (of Sound to eternal things #. The Opposition put forward on the basis of this 'vacillation ' constitutes ' Parity per Neutralisation.'

What has been said in this Sūtra applies also to the case of *Dissimilarity*; and 'by reason of Dissimilarity to both, there arises Vacillation,—and Opposition based upon this reasoning constitutes *Parity per Neutralisation*.'

Vörtka on Sü. (16).

[P. 536, L. 15 to L. 18.]

The example of this Futile Rejoinder in given in the *Bhōṣya*. Objection—" Parity per Vacillation or 'Neutralisation does not differ from Parity per Doubt and from Parity per Similarity—Why?— because here as well as in the other two the Opposition is based upon similarity."

Answer :- This is not right; the difference of Parity per Neutralisation from the other two is clearly shown by the fact

[•] The printed text is corrupt. The right reading is found in Puri B, and Ms. C., as follows— त्यसायम्प्रेंचोच्य-मानो न प्रकरयामतिवर्तते प्रकरयानतिवृत्तेस्तनिर्वाय-निर्वतंनयसमान चैतनित्यचायम्प्रेंचोच्यनाने हेता । तदिश This same reading is accepted by the Taiparya. Downloaded from https://www.holybooks.com

that in the former there is 'similarity' in support of both the contrary views; both disputants seek to establish their views in regard to 'eternality' and 'non-eternality' of Sound (on the basis of 'Similarity'), and this is not the case in 'Parity per Similarity' or in 'Parity per Doubt.'

Bhāṣya on Su. (17). [P. 247, L. 18 to P. 248, L. 3.] The answer to the above is as follows :--Sūtra (17).

INASMUCH AS THE SAID 'VACILLATION' CAN FOLLOW ONLY FROM THE COUNTER-VIEW, THERE CAN BE NO DENIAL OF IT; SPECIALLY AS THAT CONTRARY VIEW MUST BE REGARD-ED AS ESTABLISHED (BEFORE THE 'VACILLATION' CAN BE PUT FORWARD) $^{\bullet}$ — Sū. (17).

When the Opponent says that—" by reason of similarity to both there arises vacillation "—his assertion comes to this that there is 'vacillation,' because the *counter-view* is there; it is only when there is (real) similarity to both that one of them can be called the 'counter-view'; hence it follows from the statement that the 'counter-view' is an established fact; and the 'counter-view' being regarded as established, its denial cannot be right. If the 'counter-view' is *established*, its denial cannot be right; and it its denial is right, the 'counter-view' cannot be regarded as *established*; † for 'the establishment of the counter-view' and 'the right denial of the counter-view' are contradictory terms.

When however (as in the case of the Fallacy of Neutralisation, which also is based upon vacillation] the 'vacillation' is due to the absence of definite knowledge (in regard to the subject in question) [and to the mere existence of the counter-view], the 'vacillation' comes to an end, as soon

• The term 'pratipaksa' 'counter-view, stands for the view of the First Party; it is called 'counter-view' from the Opponent's point of view.— Udayanz and Viehvanātha.

as that definite right knowledge is attained; *i.e.*, as soon as definite right knowledge has been attained the vacillation ceases.⁴

Vārțika on Sū. (17). [P. 547, Ll. 3-5.]

The Futile Rejoinder is one that is not incompatible with its own contradictory. As regards the Fallacy of Neutralisation, the vacillation arises, not from the presence of a 'counter-view', but from absence of right knowledge; as we have already explained under the 'Fallacy of Neutralisation.' (Su. 1-2-7.)

End of Section (7).

Section (8). [Sūtras 18-20].

Dealing with (16) ' Parity per Non-probativeness.' Sūtra (18).

'PARITY PER NON-PROBATIVENESS' IS BASED UPON THE CONTENTION THAT "THE PROBANS AS SUCH CANNOT EXIST AT ANY OF THE THEFE POINTS OF TIME." (Sũ. 18).

Bhāşya on Sū. (18).

[P. 248, L. 5 to L. 9.]

"+ 'Probans' is that which proves; and this could exist only either (a) before, or (b) after or (c) together with, the

• When the Opponent puts up the Futile Rejoinder based upon the vacillation in regard to the exact character of Sound, on account of its being similar to eternal as well as non-eternal things; -he admits that the proposition that 'Sound is noneternal' is as admissible as that 'Sound is eternal;' that both possess an equal degree of truth; otherwise, if one were more reasonable, that would be definitely accepted and there would be no vacillation. And when he accepts the admissibility of the view that 'Sound is non-eternal', he cannot, consistently with himself, deny it.

The position of the person urging the Fallacy of 'Neutralisation' is different; he bases his denial of the conclusion of the first party, not upon any vacillation, but upon absence of true knowledge.

† The words चातेत्सम: रेतु: is not found in Mss. C. and D. They are superfluous. Downloaded from https://www.holybooks.com probandum (that which it is intended prove). Now, (a) if the Probans is held to exist before the Probendum,—at the time that the Probandum is not there, of what could it be the 'probans,' means of proving ? (b) If it is held to exist after) the Probandum,— in the absence of the Probans, of what could there be the 'Probandum' (to be proved)? (c) If the Probans and the Probandum are held to exist (simultaneously),—since both would be equally existent, which could be the 'probans' (means of proving) of what? From all this it follows that the 'probans' does not differ from what is non-probative.''

This contention, thus based upon similarity to what is non-probative, constitutes 'Parity per Non-probativeuess.'.

Vārļika on Sū. (18).

[P. 547, L. 7.]

Opposition based upon similarity to what is non-probative, is 'Parity per Non-probativeness.'

Bhāsya on Sū. 19.

[P. 248, L. 9 to L. 14.]

IT IS NOT TRUE THAT "THE PROBANS CANNOT EXIST AT ANY OF THE THREE POINTS OF TIME," BECAUNE IT IS BY THE PROBANS THAT THE PROBANDUM CAN BE PROVED. (SU. 19).

It is not true that "the Probans cannot exist at any of the three points of time"; --why?--because it is by the Probans that the Probandum is proved. As a matter of fact, we find that the accomplishing of what is to be accomplished, as also the

• This Futile Rejoinder differs from 'Parity per Convergence' and 'Parity per Non-convergence' on the following points :--(1) In these latter, the question raised was in regard to the form of the Probaus, while in the present case, it is raised in regard to its causal efficiency; (2) in the latter two the convergence or otherwise was in regard to the thing denoted by the words of the probans, while here it is the verbal expression that is taken up for enquiry; (3) there were only two alternatives, while here we have three; (4) those two had the semblance of the contention urging the fact of the qualification of the Probans being untrue, while here the contention the gradient of the qualification of the Probans being untrue, while here the contention the gradient of the qualification of the Probans being untrue, while here the contention the gradient of the qualification of the Probans being untrue, while here the contention the probane of the qualification of the Probane being untrue, while knowing of what is to be known, is brought about by a cause; and this patent fact of ordinary perception is an instance in point. As regards the question—" at the time that the Probandum is non-existent, of what could the Probans be the means of proving?"—our answer is that [it is the means of proving of what is to be proved; just as in the cases cited] the cause is the means of accomplishing what is to be accomplished, and of the knowing of what is to be made known.

Vārțika on Sū. (19).

[P. 547, Ll. 9-10.]

'Contradiction' is the defect in this Futile Rejoinder. As a matter of fact, a thing that is produced is never produced without a cause; and a thing that is made known, is never made known without a cause.

Sū. (20).

FUETHER, [ACCORDING TO THE OPPONENT'S BEASONING] THERE CAN BE NO DENIAL; FROM WHICH IT FULLOWS THAT WHAT HAS BEEN DENIED CANNOT BE DENIED. (SS. 20).

Bhāşya.

[P. 249, Ll. 16-17.]

[Exactly what you have urged against our Probans, we can urge, with equal force, against the Opponent]—The denial cannot exist, either before, or after, or together with what is denied);—and since there can be no 'Denial' at all (of the Probans urged by the first party), it follows that the Probans (being undeniable) is firmly established.

Vartika on Sū. (20).

[P. 547, Ll, 12-14.]

Contradiction is the defect of this Futile Rejoinder. That which does not prove a thing at any of the three points of time cannot serve as the means of denying; so that what

1702

[&]quot;Just as the accomplishing of what is to be accomplished is brought about by a cause, in the same manner the proving of what is to be proved (i.e., the Probandum) must be brought about bjos daties quality is in the probability of the proving the probability of the proving the probability of the proving th

has been urged against our probans applies with equal force to the Opponent's reasoning also. This argument has also been answered above; in connection with the contention— "Perception and the rest cannot be the means of right cognition, because they cannot exist at any of the three points of time" (Su. 2-1-8), we have answered the argument put forth in the Futile Rejoinder in question.

End of Section (8).

Sactor (9).

[Sùtras 21-22.]

Dealing with (17) ' Parity per Presumption.'

Sūţra (21).

WHEN THE CONTEARY CONCLUSION IS PROVED BY MEANS OF PRESUMPTION, IT IS 'PARITY PER PRESUMP-TION.' (SQ. 21.)

Bhāşya on Sū. (21).

[P. 248, L. 19 to P. to P. 249, L 2].

The proposition having been sought to be established by the reasoning 'Sound is non-eternal, because it comes after effort, like the Jar,'---if the Opponent seeks to establish the contrary conclusion by means of Presumption,---this is a case of 'Parity per Presumption;' it is as follows:--- 'If Sound is held to be non-eternal, on the ground of its coming after effort, which constitutes its similarity to non-eternal things,---then it follows by implication, that Sound must be regarded as eternal, on the ground of its similarity to eternal things, consisting in the fact that it is intermible, li'e eternal things.'

Vär/ika on Sū. (21).

[P. 547, L. 16.]

The Example of this Futile Bejoinder is given in the Bhasya. Downloaded from https://www.holybooks.com

Bhāşya on Sū (22).

[P. 249, L. 2 to L. 10].

The answer to the above Futile Rejoinder is as follows -Sūţra (22).

(A) IF WHAT IS NOT EXPRESSLY STATED CAN BE TAKEN AS FOLLOWING BY IMPLICATION, THEN THE BENOUNCING WOULD BE TAKEN AS FOLLOWING BY IMPLICATION, FOR THE SIMPLN BEASON THAT SUCH BENOUNCING IS NOT EXPRESSLY STATED; —(B) AND FURTHER, 'PRESUMPTION' WOULD BE INDECIS-IVE. (Sū. 22.)

(A) Without showing the capacity (of the words to afford the idea of what is presumed), if what is not expressly stated is held (by the Opponent) to be taken as implied,—then the renouncing by such an arguer of his own view may also be taken as implied, for the simple reason that it is not expressly stated; and thus inasmuch as the view that 'Sound is noneternal' would be regarded as established (by reason of its being taken as implied by reason of its not being expressly stated by you), this would mean that your own view that 'Sound is eternal' has been renounced.

(B) Further, Presumption would be indecisive; that is, Presumption would apply equally to both views; for 'if on the ground of its similarity to eternal things consisting of intangibility, Sound were to be regarded as eternal, like Akāsha, —it would be taken as following by implication that, on account of its similarity to non-eternal things, consisting in its coming after effort, Sound is non-eternal.'

Then again, conclusive Presumption does not necessarily follow from mere negation; for instance, because the *solid* gravel falls, it does not necessarily follow by presumption that there can be no falling of Water, which is liquid (not solid).

Vārţika on Su. (22).

[P. 548, L. 8 to P. 9].

Without proving the capacity of the word (to yield the the desired meaning), if one says that such and such a thing is implied, he renders himself liable to renouncing his own view.

^{*} This is the reverse alcine arguments par forward in the Batile Bejuinder.

--Why ?-Because, he does not explain how the words used have the power (of implying what is said to be implied). In this manner, the renouncing of his own view becomes possible.

Further, Presumption would be indecisive.

Answer:—There is no contradiction at all; for what is said to be 'indecisive' is what occurs in close proximity to the present Sūţra; what we mean is that the Presumption that has been put forward in the Sūţra (21) is indecisive and not that every Presumption is so. Just as it is only that Inference which is based upon wrong premises, that is not valid, and not any other inference, similarly here also (the untrue Presumption would be indecisive, not all Presumption).

End of Section (9).

Section (10). [Sūţras 23-24.] Dealing with (13) ' Parity per Non-difference.' Sūtra (23),

"IF THE PRESENCE OF A SINGLE (COMMON) PROPERTY WERE TO MAKE THE TWO THINGS NON-DIFFEBENT, —THEN ALL THINGS WOULD HAVE TO BE BEGABDED AS NON-DIFFERENT, BECAUSE THE PROPERTY OF 'EXISTENCE' IS PRESENT IN ALL'; —THIS CONTENTION CONSTITUTES 'PABITY PER NON-DIFFERENCED OWN Side (28), https://www.holybooks.com

Bhā**sya** on Sü. (28). [P. 249, Ll. 13—15.]

The single (common) property, in the case in question, is that of coming after effort; and because this single property is present in Sound and in the Jar, if these two things be regarded as non-different,—i. e. both be regarded as 'noneternal';—then all things should have to be regarded as non-different—Why?—Because the property of 'existence' is present in all; the one property of 'existence' is present in all things; and since 'Existence' is present in all things should be regarded as non-different. Such contention constitutes 'Parity per Non-difference.'*

Vartika on Sü. (28).

[P. 548, L. 12 to L. 15.]

The example of this Futile Rejoinder is given in the Bhāşya.

Objection—" Parity per Non-difference does not differ from Parity per Similarity—why ?—because both equally proceed on the basis of mere similarity."

Answer:—This is not right; as there is difference between the two, based upon the similarity being on one point and on all points; that is, 'Parity per Similarity' is based upon only one similarity, while 'Parity per Non-difference' is based upon similarity on all points. †

Bhāşya on Sü. (24).

[P. 249, L. 15 to P. 250, L. 10.]

The answer to the above Futile Rejoinder is as follows :---

* Udayana, in his Bojhasiddhi, notices a different interpretation of this Sūţra' by which the meaning is as follows :---' The single property that constitutes the Probans is really effective; so that if the Subject and the Example were taken as possessed of the unqualified probandum, then they would be non-different in every way, Sarodoishigab; because their co-existence is well known.'

The right reading is communication any books.com

Sā(ra (24),

THE ABOVE DENIAL DOES NOT HOLP; BECAUSE IN THE DASE OF SOME (COMMON PROPERTY) THE PRESENCE OF CERTAIN OTHER PROPERTIES OF THE SIMILAR THING IS POSSIBLE, WHILE IN THE CASE OF OTHERS SUCH PRESENCE IS NOT POSS-ISLE.⁰---SQ. (24),

"Bhi. P. 250. For instance, in the case where the one common property between the 'Subject' and the 'Example' consists of 'coming after effort, 'the presence of another property—which constitutes a further 'non-difference' or 'similarity' between them—is found possible; while in the case of the common property among all things consisting of 'existence,' the presence of no other common property is found possible; which could constitute a further 'non-difference' among them.

The following might be urged (by the Nihilist, who holds that 'existence' is invariably concomitant with 'Non-eternality'):—" Non-eternality would be the other property common to 'all things,' the presence whereof would be indicated by the presence (in them) of the property of existence."

(A) Under this assumption, the Proposition would come to be of the following form: 'All entities are non eternal, because they have the property of *Existence*'; and in that case, no 'Example' would be available, apart from what is already included in the Proposition (which includes '*all* things'); and there can be no valid reasoning without an Example; nor would it be right to put up as 'Example ' something that is already included under the Proposition; for what is itself yet to be proved cannot serve as an 'Example.' (B) Then again, inasmuch as *existent* things are t actually found to be both *eternal* and *non-eternal*, they can not all be regarded as *non-eternal* (on the ground of *existence*). From all this it follows that the sentence—"all things would have to be regarded as non-different, because the property of 'existence' is present in all" (Su. 23) is meaningless.

* The right reading of the Sayras is Rangary until a favorguent: s fa

+ For any reading the in Mattins and A. and/ino Rafpanya.

(C) Lastly, when the Opponent alleges, that "because existence is present in all things, they should be regarded as non-eternal,"—he admits that 'Sound is non-eternal'; so that opposition to this last Proposition is not quite consistent.[®]

Vār!ika on Sū. (24).

[P. 549. L. 1. to L. 4].

Vir: P. 549. What the Sufra means is that in some cases we do find a further common property, while in the others we do not. Further, the admission made is self-nugatory; *i. e.* by urging the 'non-eternality of all things' the Opponent admits the 'non-eternality of Sound.' If this is not so, then the mention of 'all things' has no meaning.

It has been explained by us (in Adh. III) that the difference is that what is a valid Probans is only that which is equipped with invariable concomitance, positive and negative;—and not any other kind of Probans †

End of Section (10).

Section (11).

[Sūtras 25-26.]

Dealing with (19) ' Parity per Evidence.'

Sūįra (25).

'PARITY PEE EVIDENCE' IS BASED UPON THE PRESENCE OF GROUNDS FOR BOTH (VIEWS)---(Sū. 25).

> Bhāşya on Sū. (25). [P. 250, Ll. 12-14.]

"If Sound is held to be non-eternal, because there is present ground (or evidence) for its non-eternality—there is present evidence for eternality also, in the shape of

[•] The Futile Rejoinder was urged against the Proposition 'Sound is noneternal'; and yet this is admitted by the Opponent in setting forth the Rejoinder.

Intangibility; so that it may be regarded as eternal also." This, being an opposition based upon the presence of grounds for both, 'Eternality' and 'Non-eternality,' is 'Parity for Evidence.'

Varțika on Sū. (25).

[P. 549, L. 6 to L. 10.]

. The example of this Futile Rejoinder is given in the Bhāşya.

[Objection :--- " ' Parity per Evidence ' does not differ from ' Parity per Neutralisation; ' in the latter, as here, there are eternality and non-eternality."

Answer-Not so; because (in 'Parity per Evidence') grounds for 'eternality' and 'non-eternality' are simply indicated as present in the same thing; in 'Parity per Evidence' all that is urged is that grounds for 'eternality' and of 'non-eternality' exist; while in 'Parity per Neutraliation' the opposition consists in the setting up of the two contrary views in detail;--this constitutes a difference between the two.*

Bhāşya on Sū. (26).

[P. 250, L. 14 to L. 21.]

The answer to the above Futile Rejoinder is as follows:— $S\bar{u}tra$ (26).

THIS DENIAL HAS NO FORCE; BECAUSE THE PRESENCE OF GROUNDS IN SUPPORT (OF THE ORIGINAL PROPOSITION) IS ADMITTED. (Sū. 26.)

When the Opponent alleges 'the presence of grounds for both views' (Sū. 25), he cannot deny that 'Sound is non-eternal, because there are grounds for non-eternality.'

[•] When the First Party has put forward his arguments, the Opponent puts forward his own arguments in support of a conclusion contrary to that of the First Party; this is 'Parity per Evidence;' the grounds for the two conclusions are merely indicated; and the full reasoning is not stated in detail.—While in 'Parity per Neutralisation,' the two views are set forth fully.—Udayana (Bodhasiddhi.) Downloaded from https://www.holybooks.com

If this could be denied, then it would not be true that 'grounds for both views are present.' When he speaks of 'the presence of grounds for both views,' he admits that there are grounds for 'non-eternality;' and having been admitted, it cannot be denied. "The denial is due to incongruity." But 'incongruity' applies equally (to both views). "When we pointed out the incongruity consisting of the possibility of both eternality and non-eternality, we put forth the denial." But the 'incongruity' applies equally to your own view as well as to that of the other party; and it cannot establish any one of the two views."

Vārļika on Sū. (26).

[P. 549, Ll. 12-14.]

End of Section (11).

Section (12). [Sūţras 27—28]. Dealing with (20) ' Parity per Apprehension.' Sūţra (27).

'PARITY PER APPREHENSION' IS BASED UPON THE FACT THAT WHAT IS PUT FORWALD IS FOUND TO EXIST EVEN IN THE ABSENCE OF THE CAUSE MENTIONED. SU. (27).

Bhāşya on Sū. (27).

[P. 250. L. 28 to P. 251, L. 2].

Even in the absence of the character of coming after effort, which is mentioned as the cause (ground) of ' non-

[•] If you admit the presence of grounds for both views, you admit the truth of the other view also; while if you deny the presence of the said grounds, you deny those for your own view also. So that the Futile Rejoinder you urge stultifies itself.—UBroundaded from https://www.holybooks.com

eternality,'-this 'non-eternality' is found in that Sound 'which proceeds from the breaking of the branches of the tree shaken by the wind [this Sound not being the Product of the Effort of any person];-and the Opposition, based upon this fact of the Probandum being found to exist even in the absence of the Probans, constitutes 'Parity per Apprehension.'*

Varțika on Sü. (27).

[P. 549, L. 16 to P. 550, L. 3.]

The example of this Futile Rejoinder is given in the *Bhāşya*. What 'Parity per Apprehension' does is to attribute to the Opponent the view that what he asserts applies to all kinds of the 'Subject' (to all Sounds, and not only to a particular kind of Sound), and then to show that the Probans is not invariably concomitant (with the Probandum).†

[The Vārtika cites another Example]—For instance, when the character of belonging to a certain Community and being perceptible by our external Sense-organs is put forward by the First Party as proving the eternality of a particular thing,—the Opponent attributes to him the proposition 'all things are non-eternal,' and then proceeds to urge that the said Probans is not invariably concomitant with the Probandum; as the said Probans does not subsist

• The Boghasiddhi mentions five kinds of this Futile Rejoinder: (1) The Subject existing in the absence of the Probandum, which makes it a case of the Fallacy of 'Contradiction;'--(2) the Subject existing without the Probans,--this being a case of the Fallacy of the 'Unknown;'--(3) the Subject existing without both Brobans and Probandum,--when there are both fallacies;--(4) the Probandum existing without the Probans--this being a case of untrue premises, the probans not being invariably concomitant with the Probandum ;--(5) the Probans existing without the Probandum, in which case also the necessary invariable concomitance between the two would be wanting. It goes to cite examples of the Futile Rejoinder based upon each of these five.

+ Though the Proposition of the first party 'Sound is non-eternal &c. &c.' is meant to refer to the *letter-Sounds* only, yet the Opponent attributes to him the proposition in the form 'all Sounds are non-eternal, because they come after effort,' and then gothern to above the itips of source on the probandum. in all non-eternal things, being, as it is, absent in the Diad vir. P. 550. and such other things. The Probans may also be shown to be not invariably concomitant

with what is expressed by the terms of the Proposition, as it is propounded [i.m., with the Subject]; e.g. the Proposition being put forward in the form, 'Sound is non-eternal, because it is productive of another Sound,'—it is pointed out that 'being productive of another Sound' is not invariably concomitant with all Sounds,—the last Sound of a series not being productive of another Sound.

Bhōşya on Sū. (28).

[P. 251, L. 2. to L. 6.]

INASNUCH AS THE PROPERTY IN QUESTION MAY BE DUE TO SOMEOTHER CAUSE, —THE DENIAL HAS NO FORCE AT ALL.

When the First Party says—'[Sound must be non-eternal] because it is the outcome of effort,' what is meant is that it is produced from some cause; and it is not meant to restrict the particular product (Sound) to one particular cause only; —so that if the property in question, 'Non-eternality,' is found in Sound produced from some other cause,—in what way does that militate against our view?

Vārļika on Sū. (28).

[P. 550, L. 5 to L. 10.]

When we say that 'Sound is non-eternal' (in regard to letter-sounds, proceeding from the speaker's effort), we do not deny that other kinds of the 'Subject' (Sound) can be due to any other cause (but *Effort*); we do not mean that the Subject can have no other cause.

Others have offered the following answer (to the ' Parity per Apprehension')—" What is meant by the original proposition is that the Sound which is the outcome of effort is, on that account, non-sternahm" https://www.holybooks.com

This however is not right, as there is no difference of opinion; the argument in support of the Proposition in question is not addressed to a person who admits the fact of Sound being an outcome of effort; for if the character of being an outcome of effort forms a qualification of the thing in question (and is admitted as such by both parties),—then some other Probans would have to be propounded (by the first Party, in support of the Non-eternality of Sound).*

"Not having the characteristics of the 'Futile Rejoinder," "Parity per Apprehension' cannot be a Futile Rejoinder."

This is not right; as it is a Futile Rejoinder, inasmuch as what it urges is the 'similarity' (of the Probans put forward) to what is not a probans.

End of section (12).

Section (13). [Sūtras 29—31]. Dealing with 'Parity per Non-apprehension.' Bhōşya on Sū. (29). [P. 25], L. 6 to L. 17].

[The First Party puts forward the Proposition in the following form]—'It is not true that even before it is uttered, Sound exists and (if it is not heard) it is simply that there is non-apprehension of it'; -this is not true—why ?—because we do not perceive any covering or obstruction; that is, in the case of such things as Water (underground) and the like, we find that when they are existent, if there is *non-apprehension* of them, it is due to the presence of obstruction (in the shape of the surface of the ground under which the water lies); in the case of Sound however, we do not find its non-apprehension to be due to the presence of obstruction or any such causes of non-apprehension; and such cause of

of its non-apprehension would certainly have been perceived (if it existed), just as it is perceived in the case of Water &c;—as a matter of fact however, no such cause is perceived (in the case of Sound); hence it follows that when Sound is not apprehended (heard), its condition is contrary (not analogous) to that of the Water &c. [i. e. while Water &c. are existent, Sound is non-existent].' [And against this the Opponent sets up the following Futile Rejoinder]—

Sūļ+a (29).

"INASMUCH AS NON-APPREHENSION OF THE OBSTRUC-TION IS ALSO NOT APPREHENDED, —IT FOLLOWS THAT THIS NON-APPREHENSION IS NON-EXISTENT; AND THIS PROVES THE CONTEARY CONCLUSION [*i. e.* EXISTENCE OF THE OBSTRUC-TION]"—THE OPPOSITION BASED UPON THIS CONTENTION 15 'PABITY PER NON-APPREHENSION.' (Sū. 29).

"The 'Non-apprehension' of Obstruction &c. is not apprehended; —and from this 'non-apprehension of the Nonapprehension,' it follows that the latter does not exist; and this 'Non-apprehension' being non-existent, what has been urged by the First Party as the 'Probans' of his reasoning is found to be non-existent; all which leads to the conclusion that Obstruction &c. are existent. And since the contrary conclusion is thus proved, the original proposition—'it is not true that even before it is uttered, Sound exists, and it is simply that there is non-apprehension of it'—is not proved.

Thus it is found that the probans, 'because Obstruction is not apprehended', is equally applicable to the Obstruction, and to the Non-apprehension of the Obstruction. "

This opposition, based upon Non-apprehension, constitutes 'Parity per Non-apprehension'.

Vārļika on Sū. (29).

[P. 550, Ll. 13-18.]

The example of this Futile Rejoinder is given in the Bhagya.

What has been urged in the Futile Rejoinder is not right; it has already been answered by us in Adhyaya II.

Bhāşya on 80. (30).

[P. 251, L. 18 to P. 252, J. 11.]

The answer to the above Futile Rejoinder is as follows :---

Sū(ra (30).

SINCE 'NON-APPEBERNSION' IS OF THE NATURE OF NEGATION OF APPREMENSION,[®] THE REASON URGED IS NO REABON AT ALL. (SQ. 30.)

The reasoning - "There can be no non-apprehension of Obstruction, because no such Non-apprehension is apprehended \dagger "-is no reasoning as all - why?-because Non-apprehension is of the nature of the negation of apprehension'; that is because Non-apprehension' is nothing more than mere negation of apprehension. As a matter of fact, what exists forms the object of 'apprehension,' and this, by reason of its being apprehended, is asserted to be existent; while of 'Non-apprehension' the object is that which does not exist; and this, by reason of its being not apprehended is declared to be non-existent. The 'non-apprehension of the non-apprehension of the obstruction' cannot negate the 'non-apprehension; operating as it does upon its own objective, which is Nonapprehension', it cannot negate that same objective'; ;-and

• It is of the nature of 'Negation of Apprehension'-i.e. mere 'Negation of Apprehension, without any further qualifications-Bodhasiddhi (Udayana).

The right reading found in C and D is matanagemburifen !

\$ This passage is rather obscure. In the first place, the reading of the printed text is incorrect. The right reading, supplied by Mus. B, C and D is disculationary and supplied by Mus. B, C and D is

We have adopted the explanation given by the Tatoarya:--What the Opponent, in putting forward the Futile Rejoinder, does, is to arge that there must be obstruction and the apprehension of this obstruction, because we fail to apprehend the non-apprehension of these. But it is far more reasonable to regard the latter absence of apprehension (of the non-apprehension of obstruction) as bearing upon the obstruction and its apprehension, than upon Mon-apprehension. Because as the Nydynmatjari points out, what is asguted by a negation must be something posities; apprehension proves the emissione, and 'non-apprehension' the non-apprehension' of only positive entities; hence even the 'non-apprehension', even though of the 'non-apprehension of obstruction', can prove the non-emissionce enly of the abstruction and apprehensione, which are positive entities, and not of the pon-apprehension itself.

The Bellasidde elesterpleine ciulity //www.holybooks.com

when the 'non-apprehension of obstruction' is not negated, it becomes capable of serving as an effective Probans (for proving the non-existence of the obstruction). 'Obstruction' can be the object of apprehension when it exists; and if it exists, there should be apprehension of it; -so that when it is not apprehended,-there being an absence of the 'apprehension ' that would indicate the existence of its own objective,-from this ' nonapprehension' (serving as the means of cognition) it is understood that the object in question (which would have been apprehended if it existed) is the object of 'Non-apprehension'; i.e., it is non-existent; the resultant conclusion being 'the Obstruction and such other things, which would have been the cause of (which could have accounted for) the non-apprehension of Sound (before its utterance), are non-existent.' And the reason for this lies in the fact that what 'Nonapprehension' (as a means of cognition) indicates is that there is no apprehension,—this fact of there being non-apprehen-sion forming the subject of the said ' Non-apprehension.'

Vārļika on Sū. (30).

[P. 550, Ll. 16-18.]

The argument (proving the non-existence of Sound before utterance) should be stated in the following form—! There being no possibility of Obstruction, and Sound being regarded as an entity,—since Sound is not apprehended [before utterance, it must be regarded as *non-existent*].' Stated in this form, the reasoning escapes from the *Olincher* of ' Shifting the Reason', as also from the *Fallacy* of ' Inconclusiveness.' Nor is it open to the *Fatlle Rejoinder* of ' Parity per Presumption'; because the indecisive character, that would have otherwise applied to the reasoning, is avoided by the qualifying phrases ' There being no possibility of obstruction' and ' Sound being regarded as an entity', which serve to indicate the contrary [i.e., the qualifying phrase 'Sound being

[&]quot;The visaya, object, the cognition of which is brought about by ' Non apprehension', is the non-existence of the about the stould have been apprehended.

an entity 'indicates the reasoning 'if Sound were an entity, it would be perceived', which is perfectly true and conclusive, and not open to 'Parity per Presumption', that might otherwise be urged against the reasoning, without the said qualifying phrases].

Sufra (31).

Nnd of Section (31).

[•] According to Talparys and Bodhasiddhi the Saşra would mean-'it is clearly perceptible to every person whether a certain cognition apprehends the Existence or Non-existence of a thing,' The translation adopts the interpretation of the Nyayamaijari whickerstart is keeping with the Biggsaks.com

Section 14.

[Sūtras 32—34.]

Dealing with (22) ' Parity per Non-eternality'.

Sūļra (32).

"IF BY BEASON OF 'SIMILABITY' TWO THINGS BE BEGARDED AS HAVING ANALOGOUS PROPERTIES, THEN ALL THINGS SHOULD HAVE TO BE BEGARDED AS 'NON-ETHENAL," ---THIS CONTENTION CONSTITUTES 'PARITY PER NON-ETHE-NALITY'. (Su. 32).

Bhāşya on Su. (32).

[P. 252, Ll. 20-22.]

"When the First Party says that—'Sound should be regarded as non-eternal, by reason of its similarity to the Jar, which is non-eternal,'—he becomes faced with the undesirable contingency of having to regard all things as non-eternal, by reason of their similarity (consisting of existence) to the Jar, which is non-eternal."—This opposition based upon 'non-eternality' constitutes 'Parity per Non-eternality.'*

Vārļika on Sū. (32).

[P. 551, Ll. 5-7.]

Everything would come to be regarded as non-elernal.— The example is given in the Bhāgya.

Objection.—" Parity per Non-eternulity does not differ trom Parity per Non-difference; there, as here, what is urged is the contingency of all things being of the same kind."

[•] This Futile Rejoinder is described as based upon 'similarity'; it includes also a similar rejoindern based upon 'dissimilarity'dy based the Bodhasiddhi.

There is a difference between the two; what is urged in 'Parity per Non-difference' is the *non-difference* of all things, while in 'Parity per Non-eternality' what is urged is only the *non-eternality* of all things.

Bhāşya on Sū. (33).

IF BEJECTION CAN BE BASED UPON "SIMILABITY," THERE SHOULD BE BEJECTION ALSO OF THE DENIAL (SET UP BY THE OPPONENT), AS THERE IS A SIMILABITY BETWEEN THE DENIAL AND THAT WHICH IT IS NOUGHT TO DENY.⁴ (Sü. 33).

The 'Denial' is that allegation which is fully equipped with the Proposition and the other Factors of Reasoning, and which, while representing the counter-view, sets aside the original view; †—and the said 'Denial' has this similarity to the original view that both are equipped with the factors of Reasoning, Proposition and the rest. Now, if there is to be a rejection of non-eternality of Sound) on the ground of the 'similarity' (of all things) with the non-eternal (Jar), —then, inasmuch as this would mean that 'similarity' leads to rejection, it would follow that there should be rejection of the Denial also, on the ground of its similarity to what is sought to be denied (i. e. the original view).‡

> Varțika on Sū. (33). [P. 551, Ll. 12-14]

The presence of the Proposition and other Factors of Reasoning constitutes the similarity between the Denial and

• The right reading of the Süşra, as shown by the Nydyasachinibandha, the Bhayya, the Varfika, the Tayparya and Boghasiddhi, is साथव्यांद्सिदे: प्रतिपेपासिदि: प्रतिपेपसायव्याप्रमाय.

The correct reading is unaffections, with the reading unaffection, the meaning would be which is meant to establish a counter-view.'

‡ The *Tsiparya* remarks that the answer contained in this *Ssira* only puts the Opponent on the same footing as the First Party. The real answer comes in the next Sütra. Downloaded from https://www.holybooks.com

the Original View that it seeks to deny. So that if what is sought to be denied by the 'non-eternality' in the reasoning set up by the Frst Party, has to be rejected on account of the similarity to the Jar,—then it follows that the Denial (by the Opponent) also has to be rejected, on account of its similarity to what is sought to be denied, consisting in the presence of the Proposition and other Factors of Reasoning.

Sū{ra (34).

WHAT SEEVES AS THE PBOBANS IS THAT PROPERTY WHICH IS DEFINITELY KNOWN TO SUBSIST IN THE EXAMPLE, AS BEING AN INFALLIBLE INDICATOR OF THE PROBANDUM; AND SINCE SUCH A PROBANS CAN BE OF BOTH KINDS, THERE CAN BE NO NON-DIFFERENCE (AMONG ALL THINGS). (Sū. 34).

Bhaşya on Sü. (34).

[P. 253, L. 7 to L. 12.]

That property, which is found in the 'Example' to be an infallible indicator of the Probandum, is what is put forward as the Probane. This Probane can be of both kinds, —i.e. it may be similar to certain things, and dissimilar to certain other things; when it is similar, it constitutes the 'similarity' (among those things); and when it is dissimilar, it constitutes the 'dissimilarity' (among those things). Now, it is only a particular form of 'similarity' that constitutes the real 'Probane, '—and not either mere 'similarity' without any qualification, or mere 'dissimilarity.' What you have urged (under Sü. 32)—that, "If by reason of similarity two things are to be regarded as having analogous properties, then all things should have to be regarded as non-eternal, and this constitutes Parity' per Non-eternality, "—is based upon mere 'similarity' and mere 'dissimilarity'; and as such cannot be right."

*What can rightly prove a conclusion is only such 'similarity' or 'dissimilarity as is invariably concomitant with the Probandum. While the 'similarity' that has been put forward by the Opponent as his 'probans' in the proving of the 'inon-eternality' of all things, is '*Existence*'; and there is no invariable concomitance between 'Existence' and 'Non-eternality'; there being several things that are spinted and you'derstell instabilized/wakw.holybooks.com

[In addition to what has been said here] all that was said (in Sü. 5-1. -24) in answer to Parity per Nondifference' should be taken as applying with equal force to the present Futile Rejoinder also.

> Vārļika on Sū. (34). [P. 551, L. 14 to P. 552, L. 7.]

· As a matter of fact, the argument put forward in support of the original view that 'Sound is non-eternal, because it is the outcome of Effort, like the Jar' is not based upon mere similarity'; it is based upon the force of a particular property [viz; 'being the outcome of effort'] which has been found, in the Example, to be invariably concomitant, negatively as well as positively (with the Probandum 'Noneternality'). There is no such property possible, in support of the counter-view set up by the Opponent. Hence the Denial cannot be right. In this connection it has already been explained that-' the denial cannot hold, because in the case of some common property, the presence of certain other properties of the similar thing is possible, while in the others such presence is not possible ' (Su. 5-1-24); so that the answer that has been given to 'Parity per Non-difference' is applicable to the present case also.

Var: P. 552. "The answer does not hold; because our argument is not intended to prove any conclusion."

If you mean by this that—" By pointing out the contingency of all things having to be regarded as non-eternal we do not mean to prove the non-eternality of all things; all that we mean is to show to the person propounding the original proposition, that in so doing he is faced with the undesirable contingency of having to regard all things as non-eternal",—then our answer is that even so your allegation cannot stand pobecauser/themprobansolyputks forward (by the first party) is of a particular kind: The Probans or Reason that I put forward is not mere similarity (to a non-eternal thing), but such similarity as is invariably concomitant with the proban lum); hence the contingency of all things having to be regarded as non-eternal does not arise at all. Further, there can be no reasons in support of the view that 'all things are non-eternal.' If the Opponent were to seek to prove it by the reasoning—'all things must be non-eternal, because they are existent',—then (we would point out that) there is no sort of invariable concomitance, either negative or positive (between 'existence and 'non-eternality').

End of Section 14.

Section (15).

[Sutros 35-36.]

Dealing with (23) ' Parity per Eternality.'

SRfra (85).

"THE CHARACTER OF 'NON-ETERNALITY' BEING ETER-NAL, IT FOLLOWS THAT THE 'NON-ETERNAL THING' IS ITSELF ETERNAL", BASED UPON THIS CONTENTION IS 'PARITY PER ETERNALITY.' (Sū. 35.)

Bhāşya on Sū. (35).

[P. 253, L. 14 to L. 17.]

"The proposition is put forward in the form—'Sound is non-eternal'; now, is this 'non-eternality' of Sound eternal, everlasting, or non-eternal, evanescent? If it is present in Sound at all times, then, since the property (non-eternality) is everlasting, the thing to which that property belongs '(Sound)' must also be everlasting, so that Sound should be *ternal*. If on the other hand, the said property ('Non-eternality') is not present in Sound at all times,—then since (at some time or other) 'Non-eternality' would be absent in Soundy/Soundrowould be//eteynalk's.com

This opposition, based upon 'Eternality', constitutes 'Parity per Eternality.'*

Vārļika on Sū. (35).

[P. 552, L. 9 to L. 13.]

This Futile Rejoinder is intended to point out defects in the factors of the Proposition 'Sound is non-eternal;'-the sense being as follows:--''In asserting that Sound is non-eternal, you admit the eternality' of Sound,-how?--because the 'non-eternality' that you predicate of Sound, is it always present in the Sound? or does it come into it only occasionally? If it is ever present in it, then, the property (of Non-eternality) being everlasting, it follows that the thing to which that property belongs must also be everlasting. If, on the other hand, the 'non-eternality' in Sound is not everlasting,--then on account of the absence (at certain times) of non-eternality in it, Sound must be 'eternal'.

Bhāşya on Sū. (36).

[P 253, L. 17 to P. 254, L. 9.]

The answer to the above Futile Rejoinder is as follows :--

Satra (36).

INASMUCH AN THE EVERLASTING CHARACTER OF THE 'NON-ETERNALITY' IN THE SUBJECT OF DENIAL (SOUND) [IS ADMITTED BY THE OPPONENT], THE 'NON-ETERNALITY' OF THE NON-ETERNAL THING (SOUND) BECOMES ESTABLISHED; SO THAT THERE CAN BE NO BASIS FOR THE DENIAL † (SU. 36).

•In this Sutra, the mention of 'non-eternality' is meant to include all those specific reasons that may be adduced in support of the non-eternality of Sound. The sense of the definition of 'Parity per Sternality' is as follows – When the Opponent puts forward certain exhaustive alternatives in regard to the property put forward by the First Party, and shows that none of these is admissible, and then proceeds to urge that the Subject cannot, on that account, be accepted as having that property ;-this form of Opposition constitutes 'Parity per Eternality.-Bodhasiddhi (Udayana).

+The No yayamaiguni oeabotio Batto without wine ale and with ale util ale util

When the Opponent speaks of the character of Non-elernality being 'everlasting' in Sound, which is the object whose non-eternality he seeks to deny,—he admits the non-eternality of Sound;—and when this 'non-eternality of Sound' has been thus admitted, there is no room for the Denial If on the other hand, he does not admit the 'everlasting' character of the 'non-eternality in Sound,' then for him, the expression,—'because non-eternality in Sound is eternal,'—cannot serve as the probans (of his reasoning); and in the absence of the Probans, the Denial cannot be proved.

In fact, what is meant by Sound being 'non-eternal is that it is produced and ceases to exist on being destroyed; and there can be no question against this; hence there is no room for any such question as -" does the non-eternality subsist in Sound at all times or not?"-Why ?-Because the non-eternality of Sound consists in its being produced and ceasing to exist on being destroyed,—it is not right to regard 'Sound 'as the container (the receptacle) and 'non-eternality ' as the contained; for such a conception would involve a selfcontradiction in terms.* Further, 'eternality' and 'noneternality' are contradictory terms (hence also the Denial cannot be maintained); that 'non-eternality' and 'eternality' -which are mutual contradictories-should belong to the same Object (Sound) is an impossibility. For these reasons we conclude that what has been alleged by the Opponentthat "Non-eternality being eternal, Sound must be eternal" -has absolutely no sense.

Vārtika on Sū. (33).

[P. 552, L. 16 to P. 553, L. 10.]

When the Opponent says that "non-eternality in the Subject of Denial is eternal," he admits its non-eternality; and

The presence or absence of **united** does not make any difference in the meaning. But from the explanation provided in the Bhisys, the Boghasiddhi and the Nysyamafijari, **united**; is the right reading for **freedury**;

• If 'non-eternality' is contained in 'Sound', then alone can there be any force in the contention that if the former is eternal, the latter also should be so; as in that case could the former not subsist without the latter. As a matter of fact, the relation of 'container and contained' does not subsist between Sound and Non-eternality. For such relationship belongs only to positive entities, and Non-entity is purely negative; and this only qualifies Sound, it does not subsist in it ;--says the Nytyamaūjart. Downloaded from https://www.holybooks.com

on account of this admission, the Denial has no force at all. If it is not admitted, then the reasoning—" because noneternality is everlasting, Sound should be eternal "—becomes baseless. Thus then, the very probans of the Opponent being an impossible one, the Denial becomes meaningless. Further,

there is no room for the question also; for the Var: P. 553. simple reason that 'non-eternality' is not held to be a distinct property. That is to say, when 'Non-eternality' is explained as consisting in the fact of the thing bring endowed with an existence which is not absolute (or everlasting). -there can be no occasion for the question-" is noneternality an absolute (eternal) entity or not?" For one and the same thing (Non-eternality) cannot be endowed with both absolute and non-absolute existence [and ' non-eternality ' has been explained as non-shoulute existence]; but when you say that "non-eternality is eternal", you attribute to one and the same thing 'non-eternality' the character of non-ubsolute existence which constitutes 'non-eternality,' as also absolute existence (which constitutes 'eternality'); and since these are mutual contradictories, such an assertion cannot be right.

"What we assert is all right, since it is only meant to point out a defect in what is sought to be denied [e.g., 'the non-eternality of Sound']." If you mean by this that --"we do not admit one and the same thing to be both eternal and non-eternal; all that we mean is that when you say that Sound is non-eternal, you render yourself open to the said absurd contingency,"--then [our answer is that] this cannot be right; because the criticism you urge is not found true in any alternative form: That is, what you urge is not a defect, either in our conclusion, or in our 'Reasoning'; it cannot be a defect in (i. e. it cannot vitiate) our conclusion, because, in the first place your down and points out any flaw in our Proposition or in any other Factor of our Reasoning; and in the second place, we have already answered the charge of 'self-contradiction.'

END OF SECTION (15).

Section (16).

[Sūtras 37-33.]

Dealing with (24) ' Parity per character of Effect.' Sūfra (37).

⁶ PABITY PER CHARACTER OF EFFECT ' IS BASED ON THE DIVERSE CHARACTER OF THE PRODUCTS OF EFFORT. (Sū. 37).

Bhāşya on Sū. (37).

[P. 254, L. 11 to L. 16.]

The original proposition is put up in the form-'Sound is non-eternal, because it is the outcome of effort'; now that which is ' the outcome of effort ' is such as, not having previous existence comes into existence; as is found to be the case with such products as the Jar and the like; that which is 'noneternal,' on the other hand, is such as, having come into existence, ceases to exist. Such being the condition of things, the Opposition is set up on the basis of the diverse character of the products of effort. 'Coming into existence after effort' we find in the case of the jar, etc., and we also find the 'manifestation' of things concealed under some obstruction, by the removal of the obstruction fand this also is the outcome of effort]; and there is no special reason to show whether Sound comes into existence after Effort, or there is only manifestation of it (after effort); and the Opposition set up on the basis of this fact of both these production and manifestation) being equally the 'products of effort,' is 'Parity per Character of Effect.'

Farțika on Sū. (37).

[P. 553, L 12 to L. 17.]

The proposition being put forward-'Sound is non-eternal, because it is the outcome of effort, '--the following

[&]quot;The more facts of Sound being the 'outcome of Effort' does not necessarily lead to the conclusion that it is non-eternal, it comes into existence, or is destroyed; for even if it were Dependent set of the state of the set of the s

Futile Rejoinder, called 'Parity per character of Effect' is set up against it :-- The 'product of effort' has been found to be of several kinds : E. g. Some things are merely manifested after Effort, while others are produced after Effort [and both of these are called 'product of Effort ']. What ' Parity per character of Effect' does is attribute (to the First Party) the idea that what proves the 'Non-eternality of Sound' is .the fact of its being perceived after Effort, and then to urge that this fact is not a conclusive reason; i. e. it urges that the reasoning-' Sound is a product, because it is perceived after effort'-is not conclusive (indecisive), on the ground that things perceived after Effort are found be of the nature of 'product', as also of 'non-product.' If the reason means ' being born of Effort.' then the rejoinder would be that the reason is not true (it being not admitted by all that Sound is born of Effort).

Bhāşya on Sū. (38).

[P. 254, L. 16 to P. 255, L. 6].

The answer to the above Futile Rejoinder is as follows :---

Sü!ra (38).

• We have translated the Sütra as it is explained in the Bhisya and read in all manuscripts. The interpretation however is far fetched; hence the Nydyamañjari has read the Sütra with the last term as unyune and an explain it to mean as follows: -- 'Even though there are various kinds of Products, -- Effort cannot be regarded as the cause (of the manifestation of Sound), as there is not present (in the cause of Sound) any cause of its non-apprehension.' This is much simpler. Downloaded from https://www.holybooks.com Even though there are several kinds of Products, there are present causes of non-apprehension,—hence Effort could not be the cause, of the manifestation of Sound. In a case where there is manifestation as the outcome of effort, it is possible that there may have been some cause, in the shape of obstruction, to which its non-apprehension (before manifestation) was due, so that when, as a result of effort, there is a removal of the obstruction, there comes about the apprehension of the thing, which constitutes its 'manifestation.' In the case of Sound however, no such cause of Non-apprehension is possible, by the removal whereof, as following from Effort, there could come about the 'manifestation' of the Sound consisting of its apprehension. From this it follows that Sound is produced, not manifested (by Effort.*

Vārļika on Sū. (38).

(P. 553, L. 19 to P. 554, L. 4.]

In the case of the thing that is manifested by effort, causes of non-apprehension are possible; in the case of Sound however, there can be no cause to which its non-apprehension (if it existed) would be due. Hence we conclude that Sound is not manifested.

Var. P. 554. Objection-"This Futile Rejoinder does not differ from 'Parity per Doubt'."

As a matter of fact, 'Parity per Doubt' is based upon similarity to both kinds of things; which is uot the case with the present Futile Rejoinder, and as such it is different from the former.

"It does not differ from Parily per Similarity."

That also is not true; as there is assumption of a different 'Probans.' 'Parity per Similarity' does not proceed on the

^oThe Nydyamafjari remarks that by having selected the 'non-eternality of Sound' as the Example, dealt with under all the twenty-four *Futile Rejoinders*, the author of the *Bhdyu* has accomplished two purposes: he provides examples of the Rejoinders and also sets aside all possible objections against the Nyäya doctrine of the *Non-eternal Dyst*/Basket from https://www.holybooks.com

basis of an assumed *probans*; while in the present Futile Rejonder, the Probans, which has been stated (by the propounder of the original proposition) in one form, [*i. s.* 'because it is an outcome of Effort'] is altered into a totally different form ['because it is *perceived* after Effort'].

End of Section 16.

Section (17).

[Sūtras 39-43.]

Dealing with the ' Satpaksi'-the six steps of a Futile Discussion.*

Bhāsyn on Sū. (89).

[P. 255, L. 6. to L. 13.]

[The first step consisting of the Proposition, 'Sound must be non-eternal, because it is the outcome of effort, like the Jar'] it is urged against this that the Probans is 'inconclusive,' and being 'inconclusive,' it cannot prove the conclusion ' (this represents the second step);—[to this the First Party, offers the following wrong answer, which represents the third step]—If my Probans cannot prove the conclusion because it is inconclusive, then—

That is, the Denial also is 'inconclusive'; it denies something, and does not deny other things; and being 'inconclusive,' it cannot prove the desired conclusion.

Or, the Opponent having said—"If Sound be held to be non-eternal, there is no special reason why what happens to

[•] Says the *Tâţparya*—It has been shown up to the last Section that when the Opponent sets up a Futile Rejoinder he is met by the First Party with a suitable answer; and in every such case, the disputants come to an understanding as to the true conclusion. But there are cases where the First Party also meets the Opponent with a wrong answer; in that case no right conclusion is arrived at; and an entirely futile discussion is carried on, to six steps. This is what the author of the SüţraDproceedsted show, https://ae.benefly/b6dis.popils.

Sound, after Effort, is its production, and not manifestation," —[he is met by the First Party with the following wrong answer]—if Sound be held to be eternal, then also there is no special reason why what happens to Sound is manifestation, not production. Thus special reasons being equally wanting in both views, both are equally inconclusive.

Vārļika on Sū. (39).

[P. 554, L. 5. to L. 10.]

The Futile Rejoinders have been thus described. With a view to show the six steps of a Futile Discussion, the Author says—the same fault lies with the Denial also (says the Sūtra). The propounder of the original proposition offers the following answer to the Opponent who has urged against him the Futile Rejoinder—If my reasoning cannot be true, because it is inconclusive, then your Denial also is inconclusive; as it denies something and does not deny other things. Or, special corroborative reasons may be urged as being equally wanting in both views. The rest is clear in the *Bhāşya*.

S#{ra (40).

THE SAME MAY BE SAID BY THE FIRST PARTY IN ANSWER TO ALL (FUTILE REJOINEDES)-(SU. (40).

Bhāşya on Sū. (40).

[P. 255, Ll. 15-16.]

In connection with all that may be taken as the basis of the Futile Rejoinders—e.g. 'Similarity' and the rest—whenever no special corroborative reason may be found,—the contention may be put forward (by the First Party) that both views stand on the same footing.

Varfika on Sū. (40).

[P. 554, L. 12.]

What the Sütra means is that the argument put forward (by the First Party, in the preceding Sütra) can be urged in answer to all Futile Rejoinders.

^{*}Examples of these magives by hipaying is the book asid hi.

Sūfra (41).

[Fourth Step] "WITH THE CONTEAVENTION OF THE DENIAL ALSO WOULD LIE THE SAME FAULT AS THAT WHICH LIES AGAINST THE DENIAL ITSELF.-(Sū. 41.)

Bhōşya on Sū. (41.)

[P. 255, L. 18 to P. 256, L. 3.]

It has been urged by the First Party that the fault of Inconclusivness that had been urged (in the Second Step) as lying in the original Proposition, lies also in the Denial (set up by the Opponent). But the same fault lies with this contravention of the Denial. Thus then, the First Step in this Futile Discussion consists in the propounding of the original proposition by the First Party-'Sound is non-eternal, because it is the outcome of Effort ;'-the Second Step consists of the denial or negating argument set up by the Opponent Critic, in the form-"Since the products of Effort are of several kinds there is Parity per Character of Effect"; this is what is called the 'Denial':-then comes the Third Step.-in which the First Party urges that the same fault lies with the Denial also; this is what is called (in the Sū(ra) Vipra(isedha' (Contravention) ;---then comes the Fourth Step (urged by the Opponent)----- "the same fault of Inconclusiveness lies also with the Contravention of the Denial."

Vārļika on Sū. (41).

[P. 554, Ll. 14-15.]

The Third Step consists of the Vipratizedha (Contravention). The Fourth Step is that " with the 'Further Denial' also lies the same fault of Inconclusiveness."

Satra (42).

[Fifth Step] — THE CONTINGENCY OF THE SAME FAULT LYING WITH THE CONTEAVENTION OF THE DENIAL IS UBURD (BY THE OPPONENT), AFTER ADMITTING THE PRESENCE OF THE FAULT IN HIS OWN CONTENTION ;—AND THIS INVOLVES 'CONFESSION OF CENEL CONTRAST WOULD CONTENT SUL 42.)

Bhaşya on Su. (42). [P. 256, Ll. 3-9.]

What the Opponent has done (in the Fourth Step) is to confess that the view he had expressed in the Second Step is faulty, and, without freeing his view from that defect, he has admitted it, and then has urged that the same fault of 'Inconclusiveness' lies also with the Contravention of the Denial in the Third Step; — and on the part of the Opponent this involves a 'Confession of the Contrary Opinion'. This is the Fifth Step [in the Futile Discussion].

Varțika Su. (42).

[P. 555, Ll. 1-3.]

Having admitted the Second Step, the Denial, to be faulty, the Opponent urges that the same fault also lies with the Third Step, by saying that "the same fault lies with Contravention also"; and this constitutes on his part a 'Confession of the Contrary Opinion. '—This represents the Fifth Step in the Futile Discussion.

Sūfra (43).

[Sixth Step]—" IT IS AFTER HAVING ADMITTED WHAT HAS BEEN UEGED AGAINST HIS OWN VIEW, THAT THE FIRST PARTY HAS UEGED THE PERSENCE OF THE SAME FAULT (IN THE OPPONENT'S VIEW), AND HAS PUT FOBWARD REASONS FOR THE SAME;—IN SO DOING HE HAS ADMITTED THE PRE-SKNCE (IN HIS OWN VIEW) OF THE FAULT UEGED AGAINST THE OPPONENT'S VIEW;—SO THAT THE FAULT OF 'CONFESSING THE CONTRARY OPINION' IS EQUALLY APPLICABLE TO HIM ALSO". SU. (43).

Bhāsya on Sū. (43).

[P. 256, L. 11 to P. 257, L. 11.]

The fault urged against the original Proposition of the First Party was that 'there are several kinds of products of effort' (Su. 87); and this is what, for the First Party who is propounding senses in support of that proposition, consti-

tutes 'Svapakealakeana,' ' fault urged against his own view 2;how ?-because it arises out of his own view :- now what he has done (in course of the present Futile Discussion) is to admit this fault that has been urged against his view, and without refuting it, he has admitted it and urged the presence of the same fault in the Opponent's view, -in the words 'the same fault lies with the Denial also' (Sū. 39); and he has put forward reasons in support of the same,-in the words 'the denial is inconclusive'. Thus it being a case where he has admitted what hus been urged against his view and urged the presence of the same fault in the Opponent's view, and has put forward reacons for the same,-this means that he has admitted the presence in his own view of the fault he had urged against the Opponent's view. 'How so?' The Opponent had argued that ' there are several kinds of products of Effort' by which he meant to indicate the fault of 'inconclusiveness' (as lying against the original proposition) ;-without refuting this the First Party has said-'the same fault lies with the Denial also ';-thus he has admitted that the arguments in support of the original proposition are faulty, and then urged the same against the Denial also; by doing so he admits the view of the Opponent, and becomes open to the same charge (of 'Confessing the Contrary Opinion'). Just as the Opponent, having admitted the faultiness of the Denial of the First Party, and having urged the presence of the same fault in the Contravention of the Denial also, has been charged (in the Fifth Step) with 'Confession of the Contrary Opinion',-exactly in the same manner, the First Party also, having admitted the faultiness of the affirmation of the original Proposition, and having urged the presence of the same fault against the Denial, becomes open to the same charge of 'Confessing the Contrary Opinion'.

This represents the Sixth Step in the Futile Discussion. Among the six steps, the first, third and fifth steps represent the assertions of the Propounder of the Original Proposition, and the second, fourth and sixth represent those of the Opponent denying that Proposition. When we come to consider the validity and invalidity of these assertions, we find as follows:--(a) Since there is no difference in

The right readings in more and signation in the second second

the meanings of the fourth and the sixth, they are open to the charge of needless repetition; for what the fourth says is that ' with the Contravention of the Denial also would lie the same fault as that which lies with the Denial itself' (Su. 41), which means that the other party is subject to the same fault ;-- and again in the sixth we have the assertion that by admitting the Opponent's view the First Party becomes open to the same charge ; and this also means that the other party is open to the same fault; thus there is no difference in the meanings of these two.-(b) The same charge of needless repetition lies also against the third and fifth steps; in the third what is alleged is that the same fault lies with the Denial also, which admits the equality of both views, and again in the fifth it is admitted that the denial of the Denial is subject to the same fault;-so that the fifth says nothing new .- (c) Again the fifth and sixth also are mere repetitions, there being no difference in what they allege.-(d) The third and the fourth involve the 'Confession of the Contrary Opinion.'-(e) In the first and the second, no special reasons have been adduced (in support of either view). Thus it is found that in the Futile Discussion consisting of the said six steps, neither of the two views becomes established. Whenever * this form of Futile Discussion with the six steps, takes place,-i. e., whenever the First Party begins the discussion with the contention that the same fault lies with the denial also, neither of the two views becomes demonstrated. When, however, the third step (in answer to the Opponent's denial which is the second step) is put forward by the First Party in the form-' Even though there are several kinds of Products, inasmuch as in the other kinds of Product causes of non-apprehension are present, Effort could not be the cause of the manifestation of Sound' (Sū. 38),-then the original view does become demonstrated, that 'What happens to Sound after Effort is that it comes into existence, and not that it becomes manifested '; and in this case there is no room for the six steps of the Futile Discussion.

> THUS ENDS THE FIRST DAILY LESSON OF THE FIFTH ADHYAYA OF THE Bhasya.

^{*} Read for mar, ' uar' as in U.

Downloaded from https://www.holybooks.com

Vartika on Sū. (43). [P. 555, L. 6 to L. 16.]

When the First Party admits the faults arising against his own view and urges the same against the Opponent's view,—he admits the faultiness of his own view; so that he is equally open to the charge of 'confessing the contrary opinion.' The rest is clear in the *Bhāgya*.

Among the six steps, the first, third and fifth represent the view of the propounder of the original proposition; and the second, fourth and sixth that of the Opposer of that proposition. When we come to consider the validity and invalidity of these assertions, we find—(a) that there is no difference of meaning between the fourth and the sixth, and there is needless repetition, \bullet —(b) that the same charge of needless repetition lies also against the third and the fifth,—(c) that between the fifth and sixth also there is needless repetition,—(d) that in the third and fourth there is 'confessing of the contrary opinion,'—and (e) in the first and second, there is no mention of any special reason (in support of either view).

In this Futile Discussion consisting of the six steps, neither of the two views is established,—and this is due to both parties making improper allegations. When, on the other hand, special reasons in support of one view are adduced,—e. g., 'because there being no cause of nonapprehension, Sound is apprehended only after the Effort (that brings it into existence)'—then there is no room for the propounding of the six steps.

The Futile Rejoinders do not belp in the discerning of truth; we have merely described the several forms of them.

THUS ENDS THE FIBST DAILY LESSON OF ADHYAYA V OF THE VABTIKA.

Adhyāyā V.

Daily Lesson II.

Section (1).

[Sūtras 1-6.]

Dealing with the Five Olinchers or Grounds of Defeat that bear upon the Proposition and the Scatement of the Probans.

Bhāşya on Sū. (1).

[P. 357, L. 13 to L. 23.]

Under Sū. 1-2-19 and 20 it has been briefly stated that— 'It is a case of Clincher when there is misapprehension, as also when there is non-apprehension; and there is a multiplicity of Clinchers owing to there being several varieties of both'; the same has now got to be described in detail. The Clinchers are actual occasions of defeat, the receptacles of faults; and they mostly bear upon the Proposition and other Factors of Reasoning, and they may affect the propounder of the true, as also that of the false, doctrine [but only so long as perfect wisdom has not been attained]. They are divided as follows :—

Sūįra (1).

(1) VIOLATING THE PEOPOSITION, (2) SHIFTING THE PROPOSITION, (3) CONTEADIOTING THE PROPOSITION, (4) RENOUNCING THE PROPOSITION, (5) SHIFTING THE PRO-BANS, (6) ILRELEVANOY, (7) MEANINGLESS JALGON, (8) UNINTELLIGIBILITY, (9) INCOMERENCE, (10) INCONSEQUEN-TIALITY, (11) INCOMPLETENESS, (12) REDUNDANOE, (13) REPETITION, (14) NON-BEPRODUCTION, (15) INCOMPLEE-HENSION, (16) EMBARBASSMENT, (17) EVASION, (18) CONFESSION OF A CONTRABY OPINION, (19) OVERLOOK-ING THE CENSUBABLE, (20) CENSUBING OF T E NON-CENSUBA-BLE, (21) INCONSISTENCY, AND (22) FALLACIOUS PROBANS ABE THE CLINOHEBS.—SU. (1).

All these, divided into twenty-two kinds, are defined one by one, in the following Sūtras.[•]

These twenty-two Clinchers have been grouped under seven heads, each of which is dealt viticia.the seven factions of Ahis Maily Econemon

Vārļika on Sū. (1).

[P. 556, L. 1 to P. 558, L. 14.]

Under 1-3-19 and 20, it has been briefly stated that 'it is a case of Olincher when there is misapprehension, as also when there is non-apprehension; and there is a multiplicity of Olinchers owing to there being several varieties of both; and the same has now got to be described in detail;—The Olinchers are actual occasions of defeat, the receptucles of faults—says the Bhāşya.

In a general way there are two Clinchers; [and the question arises]—from among the Agent (the propounder of the View), the objective (the View itself), and the instrument (the argument whereby the View is sought to be established), —whose are the Clinchers [i.e. on which do the Clinchers bear]?^{*}

This however is not right; since the View remains in the same condition; the mention of the defect does not alter the view; when the view is criticised, it remains just the same as it was when not criticised.

Nor could the Clinchers bear upon the *instrument* (the argument); because nothing can be effective upon other objectives; the instrument, consisting of the Proposition and other Factors of Reasoning, cannot be affected by the Clinchers; for the simple reason that no Instrument can be effective upon objectives other than its own; every Instrument is effective only upon its own objective [and hence if

the argument is a true argument it must be effective; it will not be effective only if it is made to bear upon things other than its own objective, in that case it is not a true 'Instrument' at all].

The fact of the matter is that it is the Agent (the Propounder of the argument) who is affected by the Clincher, by reason of propounding inefficient (improbable) Objectives (propositions) and Instruments (arguments). The Objective is regarded as 'inefficient ' when it does not accomplish the desired purpose for the accomplishing of which it has been put up; e.g., the Sand in the making of the Jar; and the Instrument is regarded as 'inefficient' when it does not accomplish the act for the accomplishment of which it was set up; s.g. the Shuttle &c. in the making of the Jar; in regard to their own true objectives both of these are efficient. Thus then, when an Object is employed in regard to an objective other than its own, or when an Instrument is employed in connection with an objective other than its own, this only indicates the ignorance of the Propounder of the argument; and since Ignorance consists either in 'misapprehension or non-apprehension,' it is the Propounder defeated,-and not either the Object becomes wha or the Instrument,-both of these being dependent on something else (and as such not to be blamed). For this reason the defeat must be of the Propounding Agent, who is not dependent upon anything else; specially as 'misapprehension ' and 'non-apprehension' are properties of the person, 'defeat' which consists of these, must also belong to the person. Since however that the man has misapprehension or non-apprehension, is known from the words he uses, the defects (constituting the Clinchers) are figuratively spoken of as 'defects of the Proposition and other factors of reasoning'; while a few of the Clinchers, such as 'Incomprehension' and so forth, affect the man himself directly m https://www.holybooks.com

An objection is raised—" It is not right to say that there are two kinds of Clinchers; since several Clinchers are found mentioned in the Sütra, it is not right to say that there are two kinds of Clinchers (as the Vartika has said on P. 556, L. 13)."

This is not right; whether they are called 'two' or ' of 'several kinds' depends upon whether we take them under groups or in detail: If we take them in groups then they are two, while if we take them in detail, they are twonty-two. Even the number 'twenty-two' is mentioned only by way of illustration; the actual number of individual Clinchers is endless.

Objection :-- "The Bhāşya has said that the Clinchers mostly bear upon the Proposition and other factors of Reasoning ;-- but since they really appertain to the Propounder of the Argument, it is not right to say that they bear upon the Proposition and other Factors of Reasoning."

If you mean by this that-"it having been Var. P. 558. asserted that Clinchers consist in misapprehension and non-apprehension, what connection could there be between them and the Factors of Reasoning, Proposition &c. ? "-there is no force in this, because the speaker can be regarded as ignorant only when his speech is found defective ; just as the actor is regarded as ignorant only when his action is defective ; it is through the action that the actor is found fault with; and it is through the speech that the speaker becomes found fault with; and it is in this way that the Clinchers (though really affecting the speaker) are said to bear upon the Proposition &c. When it is said that Olinchers bear upon the Proposition &c., it does not mean that they are contained in these [that there is the relation between them of the container and the contained]; what is meant is that the Clinchers are/unged fon thes basis of the Proposition &c.

Objection—" They may affect the Propounder of the true, as also that of the false, doctrine,—says the Bhāşya. But as a matter of fact, no Clincher can affect the propounder of the true doctrine; because he actually gives expression to it; when the man propounds the true doctrine, he actually gives expression to it; and when he does so, it cannot be said that he is defeated."

There is no force in this; it is quite possible for him to be defeated, by reason of being unable to detect flaws in the objections urged against him by the Opponent. The man who propounds the true doctrine even though he expresses the right view,—is *defeated* when he fails to comprehend the true character of the wrong objections that are urged against his view by the upholder of the contrary view. As a matter of fact, the true doctrine is fully established; what happens is that even in regard to the established doctrine, the man fails to recognise the true character of the wrong objection urged against his doctrine, and thus becomes *defeated*.

The first Sufra is meant to illustrate the various kinds of Clinchers that may be possible.

Sū[ra (2).

WHEN THE PROPERTY OF THE 'COUNTEE-INSTANCE' (URGED BY THE OPPONENT) IS ADMITTED BY ONE TO BE PRESENT IN THE EXAMPLE CITED BY HIMSELF,—IT IS A CASE OF (1) 'VIOLATING THE PROPOSITION.' (SE. 2).

Bhāşya on Sū. (2).

[P. 258, L. 2 to L. 8.]

The Opposition having been set up on the basis of a certain property which is contrary to the Probandum,—if the first Party admits that that contrary property, which belongs to the Counter-instance cited by the Opponent, is present in the Example cited by himself, he violates his original Proposition; hence this becomes a case of 'Violating the Proposition_wnloade Ememples...The Proposition having been put forward in the form—'Sound must be non-eternal because it is perceptible by the senses, like the Jar, '—the Opponent says—'"But we find that Community, which is elernul, is also perceptible by the senses; and why cannot Sound also be the same?''—Being met with this Opposition, the First Party may say—'if Community, which is perceptible by the senses, is eternal, the Jar also may be eternal'; and in this the First Party attributes 'eternality' to the Example that he had cited in support of his proposition; and in so doing he violates his entire thesis up to the 'Final Conclusion'; and violating his entire thesis, he is said to violate his Proposition,—since the Thesis rests in the Proposition.*

Vārļika on Sū. (2).

[P. 558, L. 15 to P. 560, L. 7.]

The definition of the Clinchers is as follows :- When the First Party admits that the property of the Counter-instance subsists in the Example cited by himself,-he should be regard. ed as 'defeated,' E. g., Step I consists of the statement of the First Party-'Sound must be non-eternal, because it is perceptible by the senses, like the Jar';-on this comes Step II, which consists of the following statement of Second Party-"Community, which the is eternal. is also perceptible by the Senses; why cannot Sound be the same?";-then comes Step III, in the form of the following from the First Party-'If Community, which is perceptible by the senses, is eternal, the Jar also may be eternal.' In this statement the First Party admits the presence of the property of the Counter-instance in the

[•] The Bodhasiddhi remarks that the Sûşra describes two kinds of 'Violating the Proposition'—the first is described by the very name 'Violating the Proposition,' and another by the rest of the Sûşra. The example of the former kind would be that case when, on finding that he cannot bring forward arguments to sustain his position, the first Party entirely surrenders his point.—'All right, I give up my point; Sound is not non-elemal.' What is cited in the Bhdaya is the example of the second kinthownloaded from https://www.holybooks.com

Example cited by himself, and by this admission he renounces Var P.559. the Example, and by so doing he gives up his whole thesis, down to the Final Conclusion; and this is what is called 'Violating the Proposition.'

We do not understand how, in the example cited by the Bhāşya, the Proposition becomes 'violated.' What the Opponent does is to urge, on the basis of the Counter-instance, the 'inconclusive' character of the Probans [by showing that the Probans, perceptibility by the senses, is not invariably concomitant with the Probandum, non-eternality],-and what the First Party does is to admit the presence of 'eternality' in his own Example, and does not try to show that his Probans is not beset with the defect of 'inconclusiveness'; and by this admission of 'eternality' in his Example, it is the Example that becomes vitiated with the defect of being 'untrue' [since not serving to show the concomitance of non-eternality with perceptibility by the senses]. Consequently it is either by the deficiency of the 'Example,' or by that of the 'Probans, ' that the First Party becomes 'defeated'; and there is no 'Violation of the Proposition.' It may be that by renouncing the 'Example' the Party renounces the 'Proposition ' also; hence the Clincher of ' Violating the Proposition ' is applied to him secondarily (indirectly). But unless there is an original primary there can be no secondary application; so that it has still to be pointed out what is that to which the name 'Violating the Proposition' applies primarily or directly.

"How, then, are we to explain the Sütra which distinctly says—"When the property of the Counter-instance is admitted to be present in the Example cited by himself, it is a case of Violating the Proposition "?"

The term ' *dristanța*' is to be taken in its literal sense of 'established,' bdwmonstratedlipsouthat the term of svadristanțë'

means ' in one's own thesis'; similarly the term 'pratidristanta' means the 'counter-thesis.' Thus the meaning of the Sutra comes to be-" When one admits the presence of the property of the counter-thesis in his own thesis'; e.g., the original thesis being 'Sound must be non-eternel, because it is perceptible by the Senses ', the Opponent urges against it the case of 'Community', and then the First Party says-' if Community, which is perceptible by the Seases, is eternal, then Sound also may be eternal' [and here the property 'Eternality.' which has been urged by the Opponent in the counter-thesis, has been admitted by the First Party in his own thesis] ;in this way does this become a case of 'Violating the Proposition'; for the former proposition set up by the man was 'Sound is non-eternal', and when faced with the case of ' Community,' which shows that his premiss is not true and the reasoning is inconclusive, he says ' Sound is elernal'; and since in doing so he gives up a fact that had been definitely known by him to be true, and thereby shows his misapprehension of things, it becomes a 'case of defeat', 'Cliucher.'

"But it is only the accepting of a possible contingency." If you mean by this that—" in the latter proposition also the man does not quite affirm the Eternality of Sound; all that he does is to admit a possible contingency—" if, as you urge, Community, which is perceptible by the senses, is eternal, then Sound also may be so," — this does not change the situation; as even so the Clincher becomes applicable; since, instead of defending his thesis against the charge of inconclusiveness, he goes and admits the possibility (of the Opponent's contention); thus he becomes "defeated."

Others have argued that what is urged in the 'Violating of the Proposition' is already included under the *Fullacy* (of Inconclusiveness) attaching to the Probans, hence it need not be regarded as a *Allinsberm They* contendors follows :--- '' It is not right to regard this as a Olinoher, as it is found included under Fallaciaus Beason; since what the man is 'defeated ' by is the fact of his Probans' because it is perceptible by the senses 'being inconclusive.''

This is not right; because what brings about his defeat is the fact of his not answering the charge of 'inconclusiveness' and thus showing his ignorance.* That this is so is shown by the fact that if he does answer that charge of 'inconclusiveness', he is not defeated. Hence mere 'inconclusiveness' does not constitute a Clincher or ground of defeat.

Sūįra (3).

THE SUBJECT OF THE (ORIGINAL) PROPOSITION BAVING BEEN DENIED, IF THE FIBST PARTY FINDS A DIVERSITY IN THE PROPERTIES (OF THE EXAMPLE AND THE COUNTER-IN-STANOS), AND PUTS IT FORWARD WITH A VIEW TO ESTABLISH THE FORMER PROPOSITION, —THIS IS (2) 'SHIFTING THE PROPOSITION.' (SU. 3.)

Bhayya on Sü. (3).

[P. 258, L. 11 to P. 259, L. 2.]

The 'subject of the original Proposition' is—'Sound is non-eternal, because it is perceptible by the Senses, like the Jar'; this Proposition having been propounded (by the First Party) there comes its 'denial' (by the Second Party), which consists in showing, by means of a counter-instance, that the Probans (of the original Proposition) is not truly concomitant (with the Probandum),—' Community, which is perceptible by the senses, being eternal';—and the subject of the original Proposition being thus denied, the First Party finds, a 'diversity in the properties of the Example and the Counter-instance', —i. e., he finds that while both (Jar and Community) have a certain property, being perceptible by the senses, in common, there are others in which they differ; e. g., Community is perceptible by the senses and all-pervading, while the Jar is perceptible by the senses and not-all-pervading; and perceiving this diversity of properties he puts it forward with a view to establish his former Proposition,—how ?—[in this way]—' just as the Jar is not-all-pervading, so is Sound

[•] The right reading in देखावरिका वेवाविमति www.holware gatais a न निग्टकते

also not-all-pervading, and hence like the Jar it should be non-eternal also';—now here the former Proposition was 'Sound is non-eternal', and 'Sound is not-all-pervading' is a totally different Proposition,—this is thus an instance of 'Shifting the Proposition'.

"In what way does this become a Ground of Defeat, a Clincher?"

Well, as a matter of fact, one Proposition does not prove another Proposition; what prove a Proposition are the Probans and the Example; hence the putting forward (as proof) of what cannot prove the Proposition is entirely Futile; and being futile, it becomes a 'Ground of Defeat.' •

Vārfika on Sū. (3).

[P. 560, L. 10 to L. 17.]

The example is the same as before. What the man does is to set up on the basis of the diversity of properties, consisting in 'being all-pervading' and 'being not-all-pervading'; another Proposition, in the form,—'Sound is not-all-pervading.'

"The original Proposition was—'Sound is non-eternal' and this being attacked† (by the Opponent) on the basis of 'Community, which is perceptible by the senses,—the 'First Party puts forward another Proposition in the form 'Sound, being not-all-pervading, must be non-eternal.' In what way does this become a 'ground of Defeat?'"

It becomes a 'ground of defeat' by reason of the man not knowing the real character of the Probans; without knowing

† The Benares Edition reads site and takes adopted the reading and explanation of the Tapparya which reads site as qualifying site, understood, which has far its weather the state of the second

[•] Though when the First Party puts forward the fact of Sound being not-allpervading, the idea in his mind is that, after having brought this home to the other party, he would add that as a qualifying clause to his original premiss—stating it in the form 'because Sound, while being not-all-pervading, is perceptible by the senses (it must be non-eternal) ';—yet until he actually does so, his position is clearly subject to the said Clincher.—*Tātparya*.

the real character of the probans, the man puts up the Proposition—' being not-all-pervading, Sound must be non-eternal.' And one Proposition cannot prove another proposition;—hence on account of the man not knowing and putting forward the real Probans, this becomes a case of 'shifting the Proposition'; and this becomes a 'Ground of Defeat' either by reason of 'misapprehension' or by that of 'non-apprehension.'

Sūįra (4).

WHEN THERE IS CONTRADICTION BETWEEN THE PRO-POSITION AND THE PROBANS, IT IS (3) 'CONTRADICTION OF THE PROPOSITION.' (SU. 6.)

Bhāşya Sū. on (4).

[P. 259, L. 4 to L. 8.]

The Proposition is stated in the form,—'Substance must be something different from Quality', and the Statement of the Probans is in the form—' because no objects are ever perceived, except Colour &c.';— and there is a contradiction (conflict) between these, Proposition and Statement of the Probans.—How?—If Substance is something different from Quality, then it is not possible that nothing except Colour &c. should be perceived—while if nothing except Colour &c. is perceived, then it is not possible that Substance should be something different from Quality; thus there is a conflict between the two statements—(a) 'Substance must be different from Quality' and (b) 'Nothing except Colour &c. is perceived '; i.e., the two are mutually Nugatory, and are impossible."

Vārļika on Sū. (4).

[P. 506, L. 19 to P. 561, L. 12.]

(a) When the Proposition is contradicted by the Statement of the Probans, and (b) the latter by the former,—it is a

[•] The Boghasiddhi remarks that the contradiction between the 'Proposition' and the 'Statement of the Probans' has been mentioned only by way of illustration; as a matter of fact, there is contradiction of the Proposition whenever there is any inconsistency between any two factors of reasoning, and also when the Proposition is inconsistence of the proposition of the proposition is incomplete the proposition of the proposition

case of 'Contradiction of the Proposition.' E. g., (a) 'Substance is different from Quality, because it is not perceived as different from it.'.

The same explanation applies also to the ' contradiction by the Proposition '—i.e., the case where the words of the Proposition itself are self-contradictory; e.g. the proposition 'the female ascetic is with child.'

It also applies to 'Contradiction by the Statement of the Probans',—where the Proposition is contradicted by the Statement of the Probans (the latter being more in keeping with actual experience); e.g., 'all things are diverse [*i.e.* there is no unity] because positive terms are always applied to an aggregate of things;' [to say that there is no unity is contradicted by the statement that terms are applied to an aggregate, which must be one.]

A similar explanation is applicable also to (1) the Contradiction of the Proposition by the Example [e.g. Sound is non-eternal because it is knowable, like $Ak\bar{a}sha$],—(2) to the Contradiction of the Statement of the Probans by the Example &c. (E.g. Sound is eternal, because it is perceptible by the Senses, like the Diad',)—and (3) also to the contradiction of the Proposition and the Statement of the Probans by well-known facts.

Similarly, when the Opponent urges (against the First Party) the fallacy of 'inconclusiveness'; on the basis of something that is possible only under the theory of the First Party, he incurs the Clincher of 'Contradiction.' That is, when the Opponent (the Baūddha who does not admit of any class or class-character) tries to show the inconclusiveness

[&]quot;This is an instance of the Proposition contradicting the Statement of the Probans, because the former is the stronger of the two, being more in keeping with actual experience,

of the Probans by citing the case of the class-character ' Cow," which is possible only under the theory of his disputant,such an answer should be regarded as 'Contradictory.' 'Contradictory' also is the Probans when it is one that is put forward without taking into account one's own main doctrine; i.e., when a man puts forward a Probans without regard to his main doctrine ;---e.g., the First Party having put forward his proposition in the form, 'Sound is noneternal, because it is perceptible by the Senses', if the Opponent (Bauddha) sets up his opposition on the basis of the eternality of the class-character 'Cow', which is possible only if there is an aggregate consisting of several individuals [and is as such incompatible with the Opponent's main doctrine that there is no 'aggregate ' and there is nothing 'eternal']-this becomes 'contradictory.' It is only when the counter-instance urged is such as is compatible with the doctrines of both parties that it can be a case of real 'Inconclusiveness;' it is only when some such thing is found as is admitted by both parties-and inconclusiveness is urged on the basis of that thing,-that the opposition can be right, and not ' contradictory.'

"How is it that the citing of the Wrong Example has not been mentioned among Clinchers?"

The reason for this lies in the fact that Wrong Examples are always preceded by (and based upon) Fallacious Probans and as such should be regarded as mentioned by the mention of these latter.*

Sū(ra (5).

^{*}The Example forms a part of the Probans, since the Probans not supported by the Examples is not convincing. Hence if the Example is wrong, the Probans becomes invalidated ownloaded from https://www.holybooks.com

Bkāşya on Sü. (5). [P. 259, Ll. 10-3.]

The original thesis having been put forward in the form, 'Sound is non-eternal, because it is perceptible by the senses,' the other party says—" Community is perceptible by the senses and is yet eternal, and similarly Sound also, which is perceptible by the senses, may be eternal";—and the original thesis being thus opposed, if the First Party happens, to say—' Who says that Sound is non-eternal?' This retraction of what had been affirmed in the Proposition is what is called 'Renouncing the Proposition.'*

Parlika on Sū. (5).

[P. 561, L. 14 to L. 17.]

When one abandons what he had before affirmed,—on its being opposed—it should be regarded as a case of 'Renouncing the Proposition.' The Example is as that shown before. The Probans having been shown to be inconclusive, on the basis of 'Community,' the First Party might say— 'Who says that Sound is non-eternal?' This also shows that the man is ignorant of the strength of his own reason, and thus it is a 'ground of defeat' based upon 'mis-apprehension.'

Sū{ra (6).

THE PROBANS IN THE UNQUALIFIED FORM HAVING BEEN OPPOSED, IF THE FIRST PARTY DESIBES TO QUALIFY IT, IT IS A CASE OF (5) 'SHIFFING THE PROBANS. '---(Sü. 6).

The Banddha Logician DharmakIrti has objected to this Clincher of ' Benouhoing the Proposition, 'on the ground that the First Party having been already ' defeated' by the pointing out of the inconclusiveness of his Probans, there can be no need for any further 'ground of defeat.' The *fdtparya* has answered this by saying that, as soon as the person finds that unless he renounces hic proposition he shall be faced with the Fallacy of Inconclusiveness ; hence with a view to save himself from that he retracts the Proposition ; so that this Betraction comes in before the charge of Inconclusiveness is brought home to him, and until this is brought wome ded him het partition the big for and done

Bhāşya on Sū. (6).

[P. 259, 16 to P. 260, L. 10.]

Example:—The Proposition is set up in the form, 'everything that is manifested has a single origin ';--why ?-- 'because products emanating from a single origin have a definite magnitude,—in the Cup and other products of Clay we find a definite magnitude, the product being of the same magnitude as the composition of the original substance--and such magnitude is found in every product ;-- and every manifested thing is found to have a definite magnitude ;-hence from the fact that every product emanating from a single origin has a definite magnitude, we conclude that everything that is manifested emanates from a single origin.'* Against this argument of the First Party, the following Opposition is set up with a view to show that the Probans is not invariably concomitant with the Probandum :--

'As a matter of fact, magnitude is found present in products emanating from the same origin, as also in those emanating from several origins." This opposition having been put forward, the First Party says — '[My reasoning would then be] 'because a definite magnitude is found in the Cup and other products, in all which there subsists the same ariginal substance; — every manifested thing, while having qubsisting in it Pleasure, Pain and Delusion (the constituent attributes of Primordial Matter), is found to have definite magnitude \dagger ; — and from this it follows that no other original substance being found subsisting in all manifested things, they must all have a single origin (in the form of Primordial Matter).'

Now here it is found that in the first instance the First Party stated the Probans in an unqualified form ['because they have a definite magnitude,],—and when this was objected to—he added a qualification to it [in the form 'while having the same original substance subsisting in them ']; and this thus becomes a case of 'Shifting the Probans.'

[The reason why this is a 'ground for defeat,' is as follows]—The second (qualified) probans having been put forward, if the party mentions an Example in corroboration

† The right reading is aftir fine week by Patharyapand in fi. and D.

The right reading, as found in B.C. and D. is squaligning muchilit

of what is stated in the Probans, then that manifested thing, which is cited as 'Example' (which, as 'example, cannot be included in the Proposition) ceases to be the emanation from a single origin, because, by its very nature (of Example), it must be the emanation from some other origin ";—if, on the other hand, no Example is cited, then the Probans, not having its truth corroborated by a suitable Example, cannot prove the desired conclusion; so that the Probans turning out to be futile, the 'ground of defeat' remains in force.

> Vārļika on Sū. (6). [P. 562, Ll. 1-2.]

The Example is given in the *Bhoqya*. By setting up another Probans, the first Party shows the weakness of the Probans put forward before;—this is what makes this a 'Ground of Defeat.' If the former Probans is efficient, then the setting up of another is absolutely useless.

End of Section (1).

Section (2).

[Sūtras 7-10.]

Dealing with the four Olinchers—(6), (7), (8) and (9)—which consist in the non-apprehension of what is needed for the desired purpose.

Safra (7).

The putting forward of statements beaking no connection with the purpose in hand constitutes (6) 'IRBELEVANCY.' (SQ. 7).

Bhāşya on Sū. (7).

[P 260, L. 12 to L. 18.]

The thesis and counter-thesis having been set up in the manner described above, the 'purpose in hand' being the

[•] The proposition is in the form—'all manifested things are &c.'; if the example is not included in this 'all,' then what is predicated of the 'all ' will not be true of the Example; if the Example is also included in it, then no Example can be possible. Downloaded from https://www.holybooks.com

proving of the Probandum by a proper Probans,-the First Party might make the following statement :-- 'That Sound is eternal is proved by the Probans, Hefu, because it is intangible ' [having said so far he finds that his Probans is not valid, hence he goes on]-' the term helu is a verbal noun derived from the root hi and affix fun,-a term is either a Noun or a Verb. or a Preposition, or Indeclinable Particle ;- the noun is that word which has its form qualified by the fact of the thing denoted by it having a distinct action,-the verb is either (a) an aggregate of the action and the active agencies, or (b) that which denotes the presence in the active agent, of a certain action qualified by a definite time and number,* or (c) that which is simply expressed by the root and is qualified by a particular time, —the Iudeclinables are those that, in actual usage, have no denotation entirely apart from what is expressed by the noun or the verb,-the Prepositions are used as prefixes and serve to qualify the action denoted by the Verb'; --- and so forth, [all which has nothing to do with the proving of his Propusition]; and this constitutes 'Irrelevancy.'

Varfika on Su. (7).

[P. 562, LL. 4-5.]

The Example is given in the *Bhāṣya*. This is a 'Ground of Defeat,' because what is put forward has no connection with the Proposition affirmed; what is relevant is only that which has been affirmed; all else is *Irrelevant*.

Sūfra (8).

THAT WHICH IS LIKE THE MERE BEPEATING OF THE LETTERS OF THE ALPHABET IS (7) 'MEANINGLESS JARGON' (SQ. 8).

Bhaqya on Sū. (8).

[P. 261, Ll. 2-4.]

E. g., 'Sound is eternal, because ka-cha-ta-ta-pa are ja-vaga-da-da-da-shat like jha-bha-ñ-gha-dha-dha-gha-sa'; -such state-

WREN THE PACTORS OF BEASONING ARE STATED IN THE BEVERSED ORDER, IT IS A CASE OF (10) 'INCONSEQUENTIALITY.' '(SQ. 11).

Bhāşya on Sū. (11). [P. 261, Ll. 16-17.]

Among the several Factors of Reasoning, Proposition and the rest, there is a definite natural order, in which they are stated,—which is based upon the nature of what is expressed by each of them; and when a statement is made in which this natural order is reversed,—it becomes a case of that 'Ground of Defeat,' which is called 'Inconsequentiality;' which means that what is expressed by the several Factors is not found to form a connected whole.

Varfika or Sū. (11).

[P. 563, L. 5 to L. 20.]

When the Factors of Reasoning are stated in the reversed order, it is a 'Ground of Defeat,'

Some people assert that this cannot be a 'Ground of Defeat,' as even such proposition with proposition These people

ŝ

THE NYÄYA-SÜTRAS OF GAUTAMA

(a) As regards • the first argument-" Even so the Proposition is proved, "---this might be analogous to the using of words in their incorrect forms: Even when such corrupt forms of words as 'gavi' and the like are used in the sense of the 'Bull,' they do afford the idea of the animal with the hump; and yet it is not useless to lay down the rule that the correct form of the word is 'go'; because what happens in the said case is that the corrupt form ' gavi' brings to the mind the correct form of the word 'go,' which latter provides the idea of the Bull with the hump; in the same manner, when the Factors are stated in a wrong order, they bring to our mind the Statement in the natural order, and this latter brings the idea of what is expressed by it [It is for this reason that the Proposition is found to be proved even when the Factors are stated in the wrong order]. "How does this come about ?" That there is a natural order of things, such as the objective is taken up first, then the instrumentis shown by several instances in ordinary experience; e. g. the clay-lump (is taken up first, then the wheel and other instruments needed in the making of the Jar out of the clay) [similarly in the case in question, the Proposition, which is the objective, should be stated first, then the 'instruments' consisting of the Probans, the Example, and so forth].

Trigg is the right mising m https://www.holybooks.com

(b) As regards the second argument—" we do not admit of any convention in the matter, "—our answer is that there is no convention in the matter; it is the mere natural order of things (spoken of by the several Factors); and when a person lays stress upon this natural order of things, he does not deserve to be censured.

(c) As regards the third argument—" because of actual usage, "—this is has no force; as it shows that the Objector does not understand what actually forms the 'Ground of Defeat.' [It is true that in Scientific treatises, the Factors of Reasoning are not always stated in their natural order; but] this is due to the fact that these treatises are written for the purpose of providing a comprehensive account of things [so that the writers have their eye on terseness,]; but when one has to explain or expound what has been once stated in the comprehensive (terse) form, he always does it by stating the argument in a form in which the Factors of Reasoning—Proposition and the rest—are stated in their natural order.

Sufra (12).

THAT WHICH IS WANTING IN ANY ONE OF THE FACTORS OF BEASONING IS (1) THE 'INCOMPLETE.'---(Sū. (12).

> Bhāşya on Su. (12). [P. 262, Ll. 1-2.]

When the statement is wanting in any one of the Factors of Reasoning-Proposition and the rest-it is a case of the

'Ground of Defeat' called 'Incompleteness'; for in the absence of a complete statement of the reasoning, the desired conclusion cannot be established.

Värlika on Su. (12).

[P. 564, L. 2 to L. 12.]

That statement in which one of the Factors-Proposition and the rest-is wanting, is to be regarded as 'incomplete'.

"In what way does this become a 'Ground of Defeat'?"

It becomes so by reason of the fact that in the absence of the well-equipped reasoning, the conclusion is not proved.

Some people argue that there can be no such 'Ground of Defeat' as 'wanting in the Proposition (the First Factor).'

But this is not right; these people should be met with the following alternative questions in regard to such statements as do not state the Proposition :---If a man propounds a statement without the Proposition,-is he, or is he not, defeated? If he is, which 'Ground of Defeat' is there? For none of the other Factors is wanting; nor are there any defects of the Probans etc. ; and yet the man is 'defeated'; and the only 'Ground of Defeat' possible is that his statement is 'wanting in the Proposition'.--If, on the other hand, he is not defeated-this would mean that even an incomplete argument proves the conclusion; that is, the Result is accomplished without the Means. If you say that-" The Proposition consists in the accepting of a certain doctrine ". -this also we do not understand. As a matter of fact. 'Proposition' consists in the mentioning of the object (to be proved), while ' the acceptance of a doctrine ' consists in the accepting of a certain fact which has been fully understood in all its general and special aspects.

Safra (13).

THAT WHICH CONTAINS SUPERFLUCUS ' PROBANS' AND ' EXAMPLE DIRITIE (12) I REDUNDANTybe (Sec. 13).

Bhāęya on Sü. (18). [P. 262, Ll. 4-5.]

One alone being sufficient for the purpose in view, (when more than one Probans or Example are put forward), one or the other must be superfluous. This, however, is to be regarded as a 'Ground of Defeat' only when there is a restriction (placed upon the speaker, in regard to stating on/y what is actually necessary for the proving of his proposition).

Vārļika on Su. (13).

[P. 564, L. 14 to P. 565, L. 2.]

That statement in which there are two 'probans' or two 'examples' is redundant; and it constitutes 'Redundance' as a 'Ground of Defeat.'

"This is not a Ground of Defeat, because it serves to add further strength"—say some people. These people argue as follows:—"This cannot be a Ground of Defeat, as it serves to strengthen the reasoning; we find that when several means of knowledge are available they bring about a strengthened (confirmed) knowledge of the thing; e.g., when smoke and light both help us to obtain the cognition of the presence of Fire."

This is not right; as the exact meaning of 'strengthening' is not explained; when you assert that several means of knowledge strengthen the knowledge, you do not explain what is meant by 'strengthening'---you do not explain what precisely you mean by saying that 'it serves to strengthen'?

"The strength of the cognition consists in easier conviction."

This also remains as before; what is meant by "easier"? If what you mean is that—" both (probans) help to bring about the necessary cognition ",—it is true that both help to bring about the cognition; but when cognition has already been brought about by means of one, the mention of the second disfrential ywwwseless skit or being like the bringing in of another light when the object has already been illumined by one.

Further, there would be an infinite series (of Probans and Examples) if more than one were permitted; for in that case one could go on adding proof after proof, even after the desired conclusion had been already established.

END OF SECTION (3).

Section (4).

[Safras 14-15.]

Dealing with the Clincher (13) Repetition.

Sūįra (14).

THE BE-STATEMENT OF WORDS AND IDEAS CONSTITUTES * REPETITION '--- EXCEPT IN THE CASE OF REPRODUCTION. (SU. 14.)

Bhāşya on Sū. (14).

(P. 262, L. 1 to L. 10.]

Except in the case of Reproduction, (a) Repetition' of Words and (b) Repetition of Ideas (constitute 'grounds of defeat') e.g. (a) 'Sound is eternal, Sound is eternal, 'here we have 'repetition of words'; and (b) 'Sound is non-eternal, Intonation is liable to destruction', here we have the 'repetition of the 'Idea' (of Sound being not everlasting). In the case of Reproduction, it is not 'Repetition' (a Ground of Defeat); because in that case the re-statement serves an additional purpose; when for instance, 'the re-statement of the Proposition on the basis of the Statement of the the Probans constitutes the Final Conclusion' (Sci. 1-1-39).

Vartika on Sū. (14).

[P. 565, Ll. 4-5.]

(a) We have 'Repetition of Words' in the statement 'Sound, is non-eternal—Sound is non-eternal'; and (b) we have 'Repetition of Idea' in the statement 'Sound is non-eternal—Intonation is liable to destruction.'

e.

In the case of Reproduction, it is not 'Repetition' because in that case the re-statement serves an additional purpose.

It is true that it brings conviction to other persons; but in expressing what has already been expressed, there is an element of superfluity, and by reason of this superfluity it becomes a Ground of Defeat; as it shows that the man does not fully understand the real nature of the means that he has to adopt for the accomplishment of his purpose (of proving the Conclusion). The man is neither the pupil nor the -teacher; hence there is no point in expressing the same idea again and again.

Sū́{ra (15).

THE ACTUAL STATEMENT BY MEANS OF DIBECTLY EXPRESS-IVE WORDS OF WHAT IS ALBEADY IMPLIED----

Bhāşya on Sū. (15).

[P. 262, L. 12 to L. 15.]

is Repetition,[•]—this term coming in from the preceding Sūtra.

Example [of this second form of Repetition]—Having asserted that 'Sound is non-eternal, because it has the character of being produced,' if the man goes on to add 'only that which does not have the character of being produced can be eternal,' which words are expressive of the idea

[•] The Nyâyasüchinibandha, the Tâțparya and Sü. Ms. D. makes 'JTSTRY ' part of the Suira 15 divele starithistic motion in the Suira Suira and Su. Ms. D. makes 'JTSTRY '

that is already got by 'implication'—this should be regarded as 'Repetition'; because words are used only for the purpose of conveying a meaning, and when this has already been done by implication [the actual using of words to the same effect is superfluous].

> Vārtika on Sū. (15). [P. 565, L. 14.]

This is a 'Ground of Defeat' for the same reasons as the . former kind of 'Repetition.

End of Section (4).

Section (5).

[Sütras 16-19.]

Dealing with the four Clinchers—(14), (15), (16) and (17)—which denote incompatibility with the right method of Answer.

Sufra (16).

IF THE FIRST PARTY FAILS TO BE-STATE WHAT HAS BEEN STATED (BY THE SECOND PARTY) THESE TIMES, AND DULY UNDERSTOOD BY THE AUDIENCE, IT IS A CASE OF (14) 'NON-LEPEQDUCTION.' (SU. 16).

Bhāsya on Sū. (16).

[P. 262, Ll. 18-20.]

When the meaning of the sentence has been duly understood by the audience, and it has been stated by the Opponent three times,—if the First Party fails to re-state it, it is a 'Ground of Defeat' named 'Non-reproduction.' Because, unless he re-states the position of the Opponent, on the basis of what would he put forward his arguments against that position ?⁶

Vartika on Sū. (16).

[P. 567, L. 17 to P. 566, L. 8.]

The point is clear in the Bhasya.

[The Bauddha raises an objection]-" Since the business of the First Party is to answer arguments, this cannot be a

[•] Though the man does not understand it, he does not say so ;—if he did, it would be a case of ficomprehension.' Nor does he desist from the discussion—if he did, it would be a pass OD ME would be Down With Bolt maid May May wholy books.com

'Ground of Defeat.' As a matter of fact, the business of the First Party consists in answering arguments; whether he is bewildered or not can be determined only by the efficiency or otherwise of the answer he propounds; —what then would be the use of his re-stating what the Opponent has said? Var. P. 566. It may be that the man is perfectly able to answer the arguments, and not able to reproduce them; and certainly he does not, on that account, deserve to be regarded as defeated. In fact when the man, having propounded his thesis, is unable to maintain it (in debate), all that we can say is that he is inefficient (and not sufficiently clever) [and it does not prove that his view is wrong]*."

There is no force in this; it shows that the Objector does not understand what the exact object of the Answer is. In fact if the man does not re-state the Opponent's arguments, his answer becomes objectless. If the man does offer the right answer, why does he not re-state the arguments he traverses? In fact it is a contradiction in terms to say that-' the man does not re-state the arguments, and yet he answers them.' Further, the objection is baseless, as we do not assert (what the objector denies); we do not lay it down as a rule that the man must first re-state the arguments he traverses and then answer them; in fact the arguments may be answered in any way possible ;-what we do mean however is that unless the man re-produces the Opponent's arguments, his answer in the absence of its right objective, would be an improper one; it is for this reason that *reproduction* is thought necessary, and 'non-reproduction' forms a 'Ground of Defeat.'

[•]If a man propounds a thesis, but is unable to maintain it in debats, though he is able to supply suitable answers to the Opponent's, strictures, —all that this can show is that the man is not strong enough to carry on debate in the right form, which consists in re-stating the Opponent's arguments and then confuting them; it does not prove that the view propounded by the man was wrong, so that mere 'non-reproduction's housed for be inguilled was of benuit of Defeat'. — Totparya.

Suiro (17).

WHEN THE STATEMENT IS NOT COMPREHENDED, IT IS A CASH OF '(15) INCOMPREHENSION'-(SQ. 17.)

Bhasya on Sū. (17).

[P. 262, Ll. 21-29.]

When the statement (of the Opponent) has been understood by the Audience, and has been repeated, by the Opponent, three times, if the First Party still fails to comprehend it, this is the 'Ground of Defeat' named 'Incomprehension.' Without understanding what the Opponent has said, whose refutation would be set forth ?

Vartika on Sü. (21).

[P. 566, L. 10.]

The Bhāşya is quite clear. This become a 'Ground of Defeat' by reason of non-apprehension.

Suira (18).

IT IS (16) 'EMBABASSMENT' WHEN THE PARTY DOES NOT KNOW THE ANSWER. (Sū. 18).

Bhasya on 88. (18).

[P. 263, Ll. 2-3.]

The 'answer' consists in the confutation of the Opponent's view"; when the Party does not know this, he is 'Defeated."

Vartika on Sü. (18).

[P. 566, Ll. 12-1*.]

When the Party proceeds to recite stray verses, and shows that he pays no attention to what the Opponent has said, and that he does not know what to say in answer to him—this is the 'Ground of Defeat' named 'Embarassment'; it shows that the man is confused.

Sutra (19),

WHEN THE PARTY BREAKS OFF THE DISCUSSION UNDER THE PRETEXT OF BUSINESS, IT IS A CASE OF (17) 'EVASION.' SQ. (19).

ganitia : Bounderglad inang the sil www.daybooks.com

Bhāşya on Sū. (19). [P. 263, Ll. 4-6.]

When the Party puts forward the pretext of having to do something else, and breaks off the discussion, saying—'I have got to do such and such a work, I shall resume the discussion after having finished that work,'—this the 'Ground of Defeat' n uned 'Evasion.' In such a case, since every discussion ends with a single 'Clincher,' the man, by breaking off in the said manner, concludes the discassion into which he had entered, and turns the discussion taken up, after the lapse of some time, into a new discussion.

Vārțika on Sü. (19).

[P. 566, L. 15 to L. 18.]

When the man sets up the pretext of having some business to perform, and breaks off the discussion,—it should be regarded as 'Evasion.' E.g. the man may say—'I have eaten a large quantity of *Basālā*, flakes of phlegm are obstructing my throat,' and so forth.

"Why should this be regarded as a 'Ground of Defeat'?"

Because such assertions are made for the purpose of concealing one's ignorance; so that by avoiding further discussion the man clearly shows his ignorance.

End of Section (5).

Section (6).

[Sutras 20-22.]

Dealing with the three Olinchers—(18), (19) and (20)—which bear upon flaws in the Statements.

Sūțra (20).

Bhāşya on Sū. (20).

[P. 263, L. 9 to L. 11.]

When the Party admits that defect in his thesis which has been urged against it by the Opponent,—and without trying to show that his statement is free from that defect, he simply says—' the same defect is found in your statement also,'—he admits the defect in his own thesis, and then tries to apply the same to that of the Opponent; and in doing this he confesses the opinion of the other party regarding his own thesis, and as such becomes subject to the 'ground of defeat' called ' Confessing the Contrary Opinion.'

Vartika on Sü. (20).

[P. 567, L. 1 to L. 11.]

When the Party, without trying to remove the charge from his own statement, simply says—' the same defect is present in your statement also,'—this constitutes ' confessing the contrary opinion;' *i.e.*, he admits, against his own thesis, what has been urged by the other party.

Esample.—Being charged as—'you are a thief, because you are a man'—the man simply says—' then you also are the same.' Here he admits the defect in himself and then urges it against the other party; and as such he is to be regarded as 'defeated.' The man who does not admit the charge would say in reply—' *Being a man* cannot be a reason for *being a thief*; what makes one a thief is the connection with (possession of) something belonging to another person, and not given away by him.' And since in the former case the man shows that he does not know this right answer, he becomes 'defeated.'

"Since the man urges an undesirable contingency arising out of the Opponent's statement, this cannot be a 'Ground of Defeat'"—so argue some people. These persons argue as follows :—" This cannot be a 'Ground of Defeat,' because the man urgeswrandemidesirablewwoontingency (against the Opponent). As a matter of fact, he does not continue to admit the presence of the said flaw in his own statement, all that he does is to point out that the same contingency arises out of the Opponent's statement—" if being a man is a ground for being a thief, then, since you also are a man, you also are a thief."

This however is not right, for the very reason that you put forward. It is just because he urges an *andesirable* contingency, when he ought to have given an answer, that it is clear that he is *ignorant* of the right answer, and is, on that account, ' defeated.'

S#fra (21).

When one Party has rendered himself subject to \land 'Clincher,' if the other party fails to being it home to him (by directly charging him with it), —the latter himself becomes subject to the Clincher of (19) 'overlooking the Censubable.'—(Sū, 21).

Bhāşya on Sū. (21).

[P. 263, Ll. 13-14.]

What is meant by the man being 'Censurable' is that he becomes open to the contingency of the application of the 'Clincher' being brought home to him; the 'overlooking' of this means that he is *not* directly charged with the words — 'you have become subject to a Chincher or Ground of Defeat."

This 'Ground of Defeat' however can be pointed out only by the audience, when directly appealed to with the question—'Who is defeated?' The man himself, who had rendered himself open to a Clincher, could not very well show his own cloven feet (by saying 'I had rendered myself to subject to a Clincher, and you failed to urge it against me').

Vārļika on Sū. (21).

[P. 567, L. 14 to L. 19.]

When one does not bring home the Clincher to the person that has incurred/that Clincher,/he-himselfkbecomes defeated; as he shows his *ignorance* of the fact of the other man having become subject to a Clincher.

Some people say that this is not a 'Ground of Defeat,' as the man goes on to say other things (in answer to the Opponent). These people argue as follows :—" This cannot be a 'Ground of Defeat,' as the man offers other answers; it is true that he does not bring home the Clincher to the party that has incurred it,—but he still speaks on, and offers some other answer."

This however is not right, for the very same reason that has been put forward. Just because, when he should have urged the 'Clincher,' he says something else,—he becomes *defeated*; if he really knew (that the other party had already incurred a 'Clincher'), for what purpose should he say anything else ?

Sūţra (21).

WHEN ONE PARTY UEGES A 'CLINCHER' WHEN THERE IS NO 'CLINCHER' (INCURRED BY THE OTHER PARTY),—IT IS A CASE OF (20) 'CENSURING THE UN-CENSURABLE.'— (SU. 22).

Bhāşya on Sū. (22).

[P. 263, Ll. 18-19.]

It is only when the man has a wrong conception of the true character of the 'Clincher' that he can urge—'You are defeated '—against the other Party who, in fact, has not rendered himself subject to a 'Clincher;' and in doing so, since he would be consuring one who does not deserve to be consured, he should be regarded as 'defeated.'*

[•] This is not the same as 'Enbarassment,' as in this latter the man does not know what to say in answer, while in 'Censuring the Un-censurable' he says something, as the answer, which is not an answer at all. It is for this reason that this 'Olincher' includes all *Fatile Rejoinders*. The difference between this and 'Fallacious Probans' lies in this that the 'Fallacious Probans' when pointed out, tends to the 'defeat' of the propounder of the argument, while 'Censuring the Un-censurable' is urged against the person who is answering an argument, ---Tatparge. Downloaded from https://www.holybooks.com

Varțika on Sü. (22).

[P. 558, Ll. 1-2.]

Even when there is no 'Clincher' incurred, the man says 'You are defeated.' The saying of this becomes a 'ground of defeat,' since it shows that the man is ignorant of what a 'Clincher' really is.

Sūļra (28).

HAVING TAKEN UP ONE STANDPOINT, IF THE PARTY CABBIES ON THE DISCUSSION WITHOUT BESTRICTION,—IT IS A CASE OF (21) 'INCONSISTENCY,'—($S\bar{u}$. 23).

Bhāşya on Sū. (23).

[P. 264, L. 1 to L. 15.]

Having affirmed a certain character in regard to a thing. if the party carries on further discussion without restriction -i.e., even contrary to the view taken up before—it should be regarded as a case of 'Inconsistency.' E.g. 'An entity never renounces itself, -there can be no distinction of what exists-that which is non-existent can never come into existence,---no non-existent thing is ever produced;' having taken up this standpoint, the Sankhya goes on to establish this thesis in the following manner :-- 'All that is manifested must be regarded as emanating from a single origin, because there is a common substratum running through all emanations. -and in the case of the Karthen Cup and such things it is found that they have the substratum of Olay running through them all, and are the emanations from a single origin,-and all manifested things are found to have Pleasure, Pain, and Delusion running through them all,-and from seeing the subsistence of this common substratum in these-Pleasure, Pain, and Delusion,-we conclude that the whole of this Universe must be the emanation from a single origin."----When he has said this, he is met (by the Logician) with the following question—' How is it to be determined that a certain thing is the origin, and another the emanation P'-Thus questioned, the Sänkhya answers-' That which itself remains constant while one character of it ceases to exist and another comes

^{*} The right reading is a quint if the solution of the solution

into existence is the origin; and the character that ceases to exist and comes into existence is the emanation.'*

Now here we find that the Sankhya has carried on discussion without any restriction, without regard to the view taken up by him before, in fact even contrary to the opinion accepted before. For the opinion accepted by him at the outset was-'the non-existent can never come into existence-the existent cannot cease to exist;' and it is a well-known fact that unless there is 'cessation of existence' of what has been existent, or ' coming into existence' of what has been non-exisient, there can be no disappearance or appearance; e.g. when, the Clay remaining constant, its own character, in the shape of the Oup, comes into existence, it is said to appear, and when it has ceased to exist, it is said to disappear; -all this should not be possible (according to the Sānkhya standpoint) even in connection with the character of the Clay. Having all this urged against himself, if the Sānkhya comes to admit that what is existent does cease to exist, and what is nonexistent does comes into existence, -then he becomes subject to the Clincher of 'Inconsistence; ' while if he does not admit the said facts, his thesis fails to be established. †

Vārļika on Sū. (23).

[P. 568, Ll. 5-6.]

The example is clearly explained in the *Bho***ę**ya. The man becomes *defeated*, by abandoning the position taken up, as apart from his original Proposition.:

S#{ra (24).

(22) THN 'FALLACIOUS PBOBANS' ALSO, (ABB CLIN-CHERS) AS THEY HAVE BEEN ALBEADY DESORIBED. (SU. 24).

• The best reading of this passage is found in the *Tatparya* and D-परवायरिपतस्य पर्याग्तरपियुत्ती यदम्यांग्तर प्रगति पात्र कृति: यद्यग्रांग्तरम्भवते विषते ते वा पविषार इति. In the case of the Jar, the Clay is the constant factor ; while the varying shapes of the Jar, Cup 2c., are the *smanations*.

† Without the said fact, no distinction is possible between 'Origin' and "Emanation;' and without this distinction, the original Proposition of the Sankhya can have no meaning.

\$ If he contradicts his Proposition, he is open to the charge of 'Contradiction.' In the present case what the man says, in the course of discussion is not the contrary of his Proposition fiself, but of something else, which he may have accepted in course of the discussion.'

Bhāşya on Sū. (24).

[P. 264, L. 17 to L. 22.]

The 'Fallacious Probans' also are 'Grounds of Defeat.' Question—'' Is it on account of the presence of some other character that the Fallacious Probans come to be regarded as Olinchers,—just in the same way as the 'Instruments of of Cognition' come to be regarded as 'Objects of Cognition'?"

In answer to this the Sū{ra says—as they have been described; i.e., it is in the character of the 'Fallacious Probans' itself that they become, 'Grounds of Defeat' (Olinchers) also.

Thus have the Instruments of Right Cognition and other categories been duly mentioned, defined and examined.

'The Science of Reasoning that revealed itself to the Sage Akşapāda, the chief of exponents,—of that Vāţsyāyana has propounded the Commentary.'

Thus ends the Second Daily Lesson of the Fifth Discourse in the Bhāya of Vāţsyāyana.

Vartika on Sü. (24).

[P. 568, L. 8 to L. 14.]

The Fallacious Probans are to be regarded as 'Grounds of Defeat' exactly in the same forms in which they have been classified according to their characteristics.

Thus have the 'Instruments of Right Cognition' and the other categories been duly mentioned in the first Sutra, defined, in the First Adhyāya, and examined, in the rest of the work; and thus the exposition of the whole Truth should be regarded an daming desn hfulfilled holybooks.com 'The Futile Rejoinders with all their details, the definition of the Clinchers,—and the conclusion of the Science —these have been expounded in the Fifth Discourge.'

¹The *Bhāqya*, which Vāţsyāyana, the very ploture of Akşapāda, wrote,—of that great *Bhāqya*, this Commentary has been written by the descendant of Bharadvāja.'

Thus ends the Fifth Discourse in the *Varlika* of Uddyotakara.

THE NYÄYA SÜTRAS OF GAUTAMA Translated by Satisa Chandra Vidyābhūsaņa Revised and edited by Nandlal Sinha

100

The present edition has the following special features. It contains (1) the Sanskrit Text (Sūtra) in Nagari characters, followed by (2) the meaning of each and every word of the Sūtra, (3) English translation of the Sūtra and (4) its exposition. It also has six useful Appendices. App. A contains the *Nyāya* Sūci Nibandhana of Vācaspati Miśra in English translation. App. B gives the Sūtras omitted in the second edition. App. C contains a summary of Vātsyāyana's Bhāşya in English. App. D gives an alphabetical list of the Sūtras. App. E gives the Word Index to the Nyāya Sūtras. And App. F contains the Index of Words in English. Rs. 80

ENCYCLOPEDIA OF INDIAN PHILOSOPHIES: Vol. II Nyāya-Vaišeşika Ed. Karl H. Potter

The volume provides a detailed resumé of current knowledge about the classical Indian philosophical System of Nyāya-Vaišeşika in its earlier stages. It covers the literature from the beginning, i.e. the Sūtras of Gautama and Kaņāda upto the time of Gangeśa (c. 1350 A.D.).

Herein are included summaries of the major works of the school such as Nyāya Sūtras of Gautama, Vaišesika Sūtras of Kaņāda, the Bhāşyas of Vātsyāyana and Prasastapāda, the Vārttika of Uddyotakara, and the works of Udayana, Vācaspati Miśra, Jayanta, Śrīdhara, Bhāsarvajña, Varadarāja, Šivāditya, Kešayamiśra and others.

These summaries are arranged in a relative chronological order to assist the reader in tracing the development of the school's thought. Scholars around the world have collaborated in the undertaking. Rs. 150

GAUTAMA : THE NYÄYA PHILOSOPHY N. S. Junankar

In this study of Nyāya Philosophy as propounded by Gautama and explained by Vātsyāyana and Uddyotakara the author has examined the empirical foundations of its theory of cognition and proof and the validity of the conclusions based on them. The analysis reveals that the Nyāya theory does not warrant the nature, career and destiny of the self (Ātman). The conceptual framework rests upon the questionable assumption that not only is the experience of the expert (āpta) incorrigible but his communication of that experience is authentic. The study is both a challenge to the traditional presentation of the Indian cultural heritage and a constructive hypothesis for further research and re-appraisal on new lines. Rs. 130

> MOTILAL BANARSIDASS Develoaded from https://www.holwbooks.com
