A WORD ABOUT **R.A.M.S.**

R.A.M.S. , the Restoration of Alchemical Manuscripts Society is a very loosely knit group composed of private citizens around the world who have contributed to the present work and others in one way or another. The goal of the society is to seek out and obtain copies of Alchemical manuscripts, tracts, printed works and other such materials and literature. From these, certain items are selected for 'restoration'. This consists in re-typing the material to render it readable, therefore useable. The reading is made more enjoyable by the use of charts, symbols, dictionaries, diagrams, insertion of printed illustrations and other annotations to shed additional light on the text.

R.A.M.S. is a non-profit organization with members from all walks of life. There is no 'organization' per se, just individuals desirous of performing a labor of love. It is their hope that these efforts will perhaps result in renewed interest in the science of Alchemy or even contribute to new discoveries or fields of experimentation. While this material is for all on the path of Alchemy, it is particularly for the sincere practicing Alchemist.

The transcription of this material is as verbatim as human skills permit. The only exceptions are to make the matter more readable, or understandable, with some 'modernization'. This is done ONLY where it is judged that no ambiguity will arise from a slight departure from the original and there is no danger of deleting key words or phrases where a possible use of Gematria, Temura, Notariqon or other form of written code exists. Thus, mis-spelled or grammatically incorrect material is to be found as well as archaic or strange words. This is in an effort to maintain the original text as far as possible. The completed material is then reproduced, sometimes bound and offered to interested parties. The costs for these copies are used to defray reproduction costs and to obtain additional material for restoration.

The work of **R.A.M.S.** includes such material as "Last Will and Testament" of Basil Valentine, important selections from the invaluable Bacstrom Manuscripts such as "Golden Chain of Homer", "Lamspring's Process for the Lapis Sophorum", "The Chemist's Key", "The Mineral Gluten of Nitre and Sulfur", "Coelum Philosophorum" and others. Additionally, material by other writer's is or will be offered. Such as Geber, Kalid, Ripley, Bacon, Hazelrigg, Hollandus, Becher, MonteSnyder, Albertus Magnus, etc etc

It is highly appropriate to acknowledge the many persons who have either materially or philosophically contributed to the present effort and future ones. For some this might well be the first indication that they are considered as members of **R.A.M.S.** or that such a group even exists! While the list is long, it includes: C. Collins, L. Muller, Doris Edlein, Arp. Joo, D. and J. Nintzel, N. Ogle, G. Price, F. Regardie, W. van Doren, K. von Koenigseck and especially David Ham. For their labors and contributions, grateful thanks are given. Let their unselfish efforts inspire others to light the fires of Alchemy.
