## *Manly P. Hall*

*Manly Hall's role in the field of philosophy is unique and enigmatic. He has delved into the abstruse sciences that form the common bond between the great minds of all ages and races. By his accomplishments he has won a place of distinction as a leader among those who seek to preserve idealism in civilization.*

*In twenty years he has delivered more than 5000 public lectures in addition to numerous radio talks and addresses to smaller groups. He has written 47 books besides unnumbered newspaper and magazine articles.*

*Hall's great strength is the understanding which characterizes everything he writes and says. Believing that the philosophies taught by Pythagoras, Plato, Buddha, and many forgotten sages of former times, would help men of today to live better and more richly; he has restated their teachings in the language of our times. He advocates the application of the principles of philosophy toward the solution of every problem with which we are faced. In thousands of personal interviews he has helped to untangle the snarled threads of life.*

*Manly Palmer Hall was born March 18, 1901. He is of English and Scottish descent. He has travelled widely, searching through libraries and bookstores to retrieve the priceless books and manuscripts now in his personal library. His next achievement will be the completion of a House of Philosophy in the Western World.*

Within the emblematic figures, allegories, and rituals of the ancients is concealed a secret doctrine concerning the mysteries of life.

Mr. Hall has condensed the leading postulates of over forty great religious and philosophic systems in his search for their underlying principles and truths. He had travelled in all parts of the world and had delivered thousands of public lectures before writing this book.

"The beautiful facsimiles of early and important books, and the voluminous bibliography appended to Mr. Hall's book will—apart from any other interest—make it highly desirable to every collector and student in this field."

—Paul Jordan-Smith, B. A., B. D.

"Across pages of time man has inscribed the universal language of symbols to express his deepest understanding of nature and of God. This volume is a library of great systems of symbology showing their ramifications through vast ranges of life; it is illuminating to scholar and layman alike, invaluable to seekers of wisdom of the inner world of causes."

—L. E. Behymer, Impresario.
