

Mars, Eris, and the Perfect Storm

or How the Illuminati Are Poised to Strike and Why They Will Fail (Part 2)

In the energetic grids of space-time, the Seers of the kingdom's many rulers detect a confluence of energy on the near horizon. To the Seers, the energy appears like a satellite picture of a monster hurricane with bands lashing the entire span of an ocean. A surge of exhilaration overtakes the Seers. As the realization of the energy's potential rises, their eyes lower to the thinnest slits, able only to burn with visions of greed and control. An opportunity such as this comes along once in an age. The Seers begin to believe that the ruler who makes the strongest mark will determine the course of the future.

What happens when psychopaths who are in control of the world deploy knowledge of celestial mechanics? What happens when they fail to see that they themselves are subject to those same celestial mechanics? We are about to find out because the New Moon in Aries on March 30, 2014, brings optimum astrological conditions for dramatic change in our experience of life. As such, it is an irresistible time for those whose agenda is tyranny over the human mind to run rampant. This article discusses these optimum astrological conditions, historical precedent for action, and the twist in the story that reveals an alternate outcome that is in alignment with natural world order as opposed to a new world order.

THE PERFECT STORM

THE RULER OF A NATION

The New Moon in Aries occurs on Sunday, March 30, 2014 at 2:44 pm ET/ 6:44 pm UT. Using the Sabian symbols, the code for each of the degrees of the zodiac, we discover the nature of the energy: *the ruler of a nation*.¹ This symbol discusses the energy of taking charge and taking control to bring order, discipline, or power. Each of the Sabian symbols has a positive and negative polarity and we will examine both.

The Sabian symbols are specific. The subject of this symbol is a *ruler – not a leader* – of a nation. The difference should not go unnoticed. “Ruling” is in line with tyranny and slavery whereas “leading” is in line with democracy and freedom. This is the first “hook” in the energy for anyone bent on lording over others. Their own frequencies are naturally engaged because this polarity of the New Moon energy carries powerful elements for taking control, imposing will, dominating, and expanding reach.

The positive polarity of this energy is rulership over oneself, in a sense. The power to maintain a grounded, stable, centered mind during the turbulence will lead to personal understanding or “mastery.” The primary teaching of the ancient Mystery Schools was prominently displayed: Know Yourself, Know the Universe. This is our mission *every month of every year*, but the effort is especially empowered by these astrological variables.

Another expression of the energy to consider comes from the opposite of the Rulers: the People. As we will see, the response of We the People (to whatever comes our way) is key.

THE NEW YEAR

The timing of this energy contributes to the perfect storm because it comes at the time of the astrological and natural New Year. The New Moon in Aries always signifies the time to begin anew. The energy is designed to “seed” new intentions. Setting a goal, intention, or wish at the New Moon in Aries works with the natural progression of time and the natural cycle of growth. As such it is especially empowered. The New Moon in Aries is also the time to re-invigorate intentions that were seeded in the past. Intentions build strength over time; long-term effort is rewarded.

Because the New Moon in Aries is the “seed” energy for the year, it plays out all year long. Intentions set and actions initiated during the Aries month develop *all year long* as they follow the cycle of growth that parallels the Moon’s phases.²

The New Moon in Aries energy is raw energy, ripe for whatever form one wants to make of it. Thus, it is just as powerful for good intentions as it is for bad intentions. As we will see, the New Moon energy as a whole is “stacked” in favor of good.

THE LORD OF LIGHTNING

A major contributor to the energy of the New Moon in Aries (and therefore the entire next year) is the New Moon’s tight conjunction with the planet Uranus. Uranus is the Planet of Change. It brings shocks and things that are totally unexpected. With Uranus, you expect the unexpected. Uranus feels like lightning in the body; it produces anxiety, insomnia, and erratic behavior. It is swift and sure. It’s wily because you cannot predict it, only make guesses.

Our best clue lies, of course, with the Sabian symbol for the degree of Uranus at the time of the New Moon in Aries: *13 Aries - a bomb which failed to explode is now safely concealed.*

The symbol paints a picture of suppression of pent up energy or emotions, secrets, and generalized anger. It could also represent superficial action designed to fool or misdirect people, as in false flags events.

Since we are dealing with Uranus, we won't know until it happens because it is hard to see it coming. But we should be mindful that Uranus is in Aries. Aries is ruled by Mars, the God of War. Aries, a fire sign, is the energy of conflict, aggression, initiation, leadership, assertion, beginning, and weapons – including bombs. Uranus rules electricity, the electrical grid, electro-magnetic signals, frequencies, and the electrical systems of the body. Any “bomb” - or physical, emotional, or mental threat – would tend to be focused with these types of things.

The combination of Uranus in Aries at the degree associated with explosions and contained explosions should not be overlooked. The theatre of war - whether on the global scale with the US/EU vs. Russia and potentially its allies, the national scale with attacks within borders, or the personal scale with personal and professional relationships –is highlighted.

The unexpected nature of Uranus means those who have an agenda contrary to the free expression of the human mind and experience cannot be guaranteed that their intentions and plans will proceed the way they think they will. They think they can control the outcome (bring order out of chaos) but they are mistaken. Uranus is controlled by nothing. The new world order is not immune to the surprising effects of Uranus. While this is potentially a good thing, it lends a tremendous instability to the geopolitical stage.

The positive polarity of the symbol involves discharging energy before it becomes a problem. It also implies rescue from a perceived threat of destruction. We will see how other special astrological configurations are working to counter negative agendas.

THE BATTLE TWINS

Adding another element of aggression with the New Moon in Aries is the activation of the Battle Twins, Mars (Aries) and Eris. Mars and Eris are in exact opposition at the time of the New Moon. Mars is retrograde at 22 Libra 17 and Eris at 22 Aries 21. This opposition is happening in tight conjunction with the Eris Point (21 Aries), which is a favored degree for the advancement of the new world order agenda.

The Eris Point is the degree in the sky where the planet Eris was located when it was discovered. My book **Eris: Archetype of Shadows, Crisis and Awakening (2007)** details the Eris connections and is available for free download at oraclereport.com.

The opposition of Mars and Eris impose another potent war element to the New Moon energy since the archetypes of Mars and Eris are associated with battle and war. The fact that the Mars-Eris opposition is happening so close to the Eris Point takes things to another level entirely.

PRECEDENT FOR THE ERIS POINT

The new world order takes advantage of astrological aspects with the Eris Point, 21⁰ Aries. When planets make an aspect with this degree, the new world order Illuminati take action. They understand

that repeated intentions build power, so they've empowered this degree over and over again with actions of war, particular with false flags events. False flag events are certainly acts of war, mostly war for hearts and minds. These actions take place during months when there are strong astrological aspects with the Eris Point in place at that month's New Moon. It is beyond the scope of this article to outline the evidence for the following events being false flag events, but the astrology is notable. The most recent "terror" attacks within in the US are listed.³

Boston Marathon – One year ago, the New Moon in Aries (April 10, 2013) was located at 21 Aries – the Eris Point. Additionally, Mars and Eris were conjunct. A few days later, April 15, 2013, the Boston Marathon bombing occurred. Since then the new world order's war against the American people has progressed. Healthcare has been decimated. Government agencies, including the postal service, have purchased massive amounts of ammunition. Liberties have further eroded to the point of door to door searches for guns in Connecticut. Control of the internet has been handed over to the United Nations. The list is extensive.

Sandy Hook - The New Moon of December 13, 2012, made a trine to the Eris Point. Mars was in square to the Eris Point. The Sandy Hook shooting took place in Connecticut the next day.

Virginia Tech - The New Moon of March 18, 2007, included a grand trine of Jupiter, Saturn, and Eris with the Eris Point. Mars and Neptune were sextile the Eris Point and the Black Moon opposed it. The very last day of that lunar cycle, April 16, 2007, was the day of the shootings at Virginia Tech.

The favored planets for aggression against We the People are Mars and Eris, and the favored time is when the Eris Point is activated. Both are in place at the New Moon in Aries, signaling heightened potential for further aggressive acts, particularly false flags.

The aggression may not look like a normal false flag. It may be more undercover. Eris is located at the degree of *a woman in pastel colors carrying a heavy and valuable but veiled load*. This indicates potential for a Trojan Horse ruse. Certainly the symbol implies efforts to conceal and deceive. It also implies a theme of money, treasure, or something with other measured value.

Mars' position at the New Moon in Aries is the degree of *a child giving birds a drink at a fountain*. This symbol discusses nourishment, refreshment, and revitalization. But Mars' opposition with Eris gives the flavor for something to be "offered" to keep us safe and sound. This is usually the given justification for the narrowing of freedoms, peace, and privacy. The practice of problem-reaction-solution may be implemented. This theory involves creating a problem to incite a reaction and to then offer the solution. It is a recipe for control.

WHEN ARCHONS ATTACK

“Archon” is the name given by the Gnostics to the inorganic beings that swarm around the human race and seek the race’s destruction. The Archons are rulers of the new world order’s Illuminati. Thus, it is the Archons who are the true enemy of humanity, with the Illuminati their mere minions.

Saturn is the home of the Archons. At the New Moon in Aries, the planet Saturn is located at the degree of *hunters shooting wild ducks*. This energy provides yet another element of aggression.

The line of fire may be the Arcadian Ley Line.⁴ In the United States, this relatively unknown line arcs through Massachusetts and Connecticut, through New York City, down to Washington, DC, through Charlottesville (and Thomas Jefferson’s Monticello), down through Atlanta, on to Montgomery and Mobile, and moving closely through New Orleans. Places on the Arcadian Lei Line seem to be targets for operations against the American people.

The energies of the New Moon in Aries form a perfect storm to seed the field of consciousness with grand intentions, positive or negative. But there are other energies at play with the New Moon, energies that twist events toward the positive.

X-FACTORS

TWISTED SISTERS

The Ladies of the Zodiac -Venus, Eris, Vesta, and Pallas Athena - form a Mystic Rectangle at the New Moon in Aries. Mystic Rectangles come about from two sextiles and two oppositions. Many astrologers feel that Mystic Rectangles are not very mystical. This is because the important shape in the configuration is unrecognized. The important shape isn’t the rectangle. The important shape in this configuration is the one formed by two triangles whose points meet. This is the shape of a torus.⁴

Energy flows in and out of this double vortex, forming a “doughnut” around the middle. This is more commonly recognized as the shape of a wormhole or a star gate. An energetic vortex opens with the New Moon in Aries. It connects it to the New Moon in Libra in September.

This particular vortex is comprised solely of feminine energies. It involves love, freedom, keeping the heart fires alive, and the weaving of patterns. This energy floods both the New Moon in Aries month and the New Moon in Libra month. Events that occur during the Aries cycle will be revisited during the Libra cycle.

PROMISES IN STONE

The celestial mechanics of the New Moon in Aries churn out another distinctive aspect with the Grand Cross between the Sun, Moon, Uranus, Jupiter, Pluto, and Earth. Grand crosses imprint energy. It’s like

making a “stamp” in the fabric of history or writing something in stone. It makes its mark and it lasts. The New Moon in Aries Grand Cross not only imprints something that lasts, but it also delivers a promise.

The promise comes from the degree of Jupiter – *a Chinese woman nursing a baby whose aura reveals him to be the reincarnation of a great teacher*. Dane Rudhyar, master of Sabian symbols, discusses how this symbol is “the promise to all men that God may take birth within their souls.” Humanity evolves.

The permanence comes from the degree of Pluto – *an ancient bas relief carved in granite remains a witness to a long-forgotten culture*. This symbol speaks to strength and longevity under the duress of changing times. Humanity endures.

The imprint of this Grand Cross is anchored by the degree of the Earth – *miners emerging from a deep coalmine*. The energy of this symbol always brings things to light. In this symbol the Earth herself, Gaia Sophia, emerges from darkness. The Earth will make herself known over the next year. Fully awake and hosting the actualization of human potential, her light will be brought to days. The Wisdom Goddess emerges and it will be a pleasure to see how this unfolds.

Further support for the promise in stone is found in the symbol for the degree of the North Node, the astrological indicator of destiny. The destiny for the energy of the New Moon in Aries – the seed energy for the next year – is *mankind’s vast, enduring effort to reach for knowledge transferable from generation to generation*.

So, though the energy and events may feel like the apocalypse is inevitable, the totality of the energy reveals a very different outcome. We can’t be absolutely certain how things will happen due to Uranus’ conjunction with the New Moon (recall that Uranus brings unpredictability and surprise; we expect the unexpected). We know that the New Moon in Aries offers a stellar chance for furthering any goal or intention. We also know that the new world order tends to take advantage of any opportunity to forward their agenda. Their agenda lies contrary to natural law. Dominion over others is unnatural.

Over the next year, the mission for anyone who is knowledgeable of these things is to keep hope alive when times seem bleak. We counter the negativity by holding strong personal energetic fields that resonate to natural world order – life based on the principles of freedom of mind, body, and soul. In the midst of all of the changes the world is about to undergo, we remember that the Spirit of Liberty is eternal. We help others dwell in a happier place in consciousness. It is not going to be the easiest thing to do because we are facing Archons and they have a mission of their own.

But the Damage Report from the Perfect Storm is already filed. The mechanics of the stars indicate that humanity has the favor. As the storm rages, this is what we remember.

Notes:

1. The degree of the Aries 2014 New Moon is 09 Aries 58. At the time of the New Moon, the tenth degree of Aries is almost totally expended (09 Aries 58 is only two astrological minutes from the next degree). Energy works in waves, and more of the energy of the eleventh degree of Aries is in play at the time of the New Moon.
2. This chart is a breakdown of phases. The degree of the New Moon determines which phase in the month falls within.

PHASE	DEGREES ON ECLIPTIC
New	0 ^o -45 ^o
Crescent	45 ^o -90 ^o
First Quarter	90 ^o -135 ^o
Gibbous	135 ^o -180 ^o
Full	180 ^o -225 ^o
Disseminating	225 ^o -270 ^o
Third Quarter	270 ^o -315 ^o
Balsamic	315 ^o -360 ^o

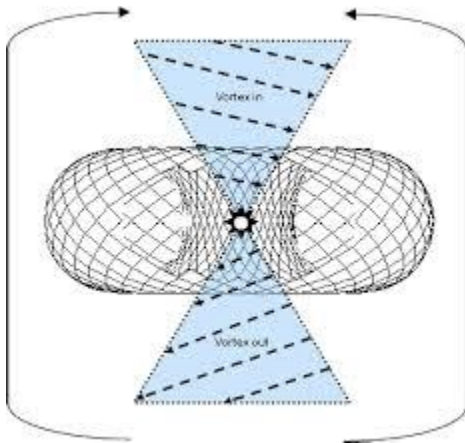

List of 2014-2015 New Moons and corresponding phase:

Aries 2014 New Moon	is like a month-long	New Moon Phase (intend/initiate)
Taurus 2014 New Moon		New Moon Phase (intend/initiate)
Gemini 2014 New Moon		Crescent New Moon Phase (persevere)
Cancer 2014 New Moon		First Quarter Moon Phase (act)
Leo 2014 New Moon		First Quarter Moon Phase (act)
Virgo 2014 New Moon		Gibbous Moon Phase (trust)
Libra 2014 New Moon		Full Moon Phase (realize)
Scorpio 2014 New Moon		Full Moon Phase (realize)
Sagittarius 2014 New Moon		Disseminating Moon Phase (share)
Capricorn 2014 New Moon		Third Quarter Moon Phase (revise)
Aquarius 2015 New Moon		Third Quarter Moon Phase (revise)
Pisces 2015 (1) New Moon		Balsamic Moon Phase (release)
Pisces 2015 (2) New Moon		Balsamic Moon Phase (release)

Note that there are two “New” phase months this year – Aries and Taurus. This means there is double the opportunity to seed intentions, adding more time to set more things in motion that will develop for a year. This will be discussed later in the month.

3. “Terror” attacks after the discovery of Eris are listed. Eris was first sighted on October 9, 2005, so the attacks of 9/11 are not included.

4. The torus shape.

5. The Arcadian Ley Line through the United States (best available image).
