There are 800,000 sex registered offenders in the U.S., and they don't carry a card because it "violates" their privacy.

Keep that in mind.

So if you still need a booster after been fully vaccinated, and testing after been fully vaccinated, and hospitalisation after been fully vaccinated, and masks, social distancing & lockdowns all after been fully vaccinated?

Then it's time to admit that you've been FULLY conned.

WHAT?

“There will be, in the next generation or so, a pharmacological method of making people love their servitude, and producing dictatorship without tears, so to speak, producing a kind of painless concentration camp for entire societies, so that people will in fact have their liberties taken away from them, but will rather enjoy it, because they will be distracted from any desire to rebel by propaganda or brainwashing, or brainwashing enhanced by pharmacological methods. And this seems to be the final revolution”

— Aldous Huxley

TRUST THE SCIENCE, BIGOTS

Always Question "Settled Science"

In the 1940's-50's a Lobotomy represented the leading edge of psychiatric science and many considered the procedure "settled science." Infact, in 1949, the inventor of the procedure, Dr. António Egas Moniz, was awarded the Noble Prize for his discovery. Thousands of patients had their SELF destroyed by this procedure and became docile, robotic, non-humans,

Remember there is no such thing as "settled science," everything should always be questioned and studied.
