Def Mar...GoPa Conspiracy...

the story of this sordid conspiracy. It began long before the American silver mines became productive. It arose out of the issue of five-twenty bonds and the decision of the French Court of Cassation. It gave rise to the Latin Monetary Union. It precipitated the demonetization of silver in Germany and other states. It surreptitiously altered the British Mint Code and in a similar manner and by similar means it scandalously altered the American Mint Code. It munificently rewarded all those who promoted its objects. It mercilessly attacked all who opposed them. It robbed this country of hundreds of millions. It influenced its politics and it still influences them. It has grown rich enough to lend fifteen millions to the Bank of England, eighty millions to Italy, ten millions to Chili, and two hundred millions each to Austria and the United States. It controls our foreign exchanges. It has plunged the commercial world into a long train of disasters and stands ready to repeat the achievement. Do we want any more of this? (Cries of No! No!) Then, let us put an end to it. Let us restore the law, and, if anything further is needed to regulate our monetary system, so that it shall serve, instead of control our commercial prosperity, let that, also, be done, not by entangling alliances with other nations, not under the guidance of hired and traitorous newspapers, owned by foreign syndicates, but according to American ideas, under the Constitution, and subject only to the principles of justice, and the immortal canons of the Civil and Common law. (Loud and long continued applause.)
