NATO–DOD/military telepathy/voices of operators – decoding thoughts/  
**Synthetic Telepathy has applications in covert operations designed to drive a target crazy with voices or deliver undetected instructions to a programmed assassin. Most of the scientists worked on highly sensitive electronic warfare programs for NATO, Intelligence Purposes (NSA, CIA,) including the Strategic Defense Initiative-DOD. It is claimed that directed energy weapons DEW might have been used to literally drive these men to suicide and accidents.**

### **NON-LETHAL WEAPONS/psychotron program/** **11. September MOSCOW 2002**

**PHARMACEUTICAL INDUSTRY: drugs development for mental illness**  
**CHEMICAL WEAPONS/SPACE: (Plasma/RF, HPM weapons)**  
**NEUROSCIENCE – increased understanding of chemical transmission in the brain**

**It techogenic methods which use: lower rapid irritation, an infrasound, ultrasound, superhigh-frequency radiation (MICROWAVES), torsionic radiation, shock waves.**

Even small intensity of the similar concentrated fluctuations considerably influences cognitive structures and nervous system, causing a headache, dizziness, frustration of sight, breath, a convulsion, and sometimes and switching-off of consciousness. Piercing of the elected sites of a brain by well focused ultra sound is applied to irretrievable withdrawal from memory of any memoirs. The ultrasound is used for suppression of will, oppression of immune system, deterioration of state of health, reduction of the person a passive condition. Pulses of ultrasonic radiation it is possible to stop heart of any person. Thus the death for associates will look natural, at opening a corpse of a violent death it is not found out.

**The MICROWAVES** of radiation modulated by speech, introduce the information directly in a brain, therefore people hear voices of operators which work with them, thus anyone psycho working up subconscious is accelerated. Waves actively modulated in frequencies of an alpha - rhythm of a brain, are capable to cause irreversible "kinks" in behaviour - schizophrenia. As aerials for transmitters of such waves telephone and radiorelay postings, pipes of the water drain and heating, the TV, the phone, the fire -prevention signal system are used! Under influence of the MICROWAVE of radiation there is a weariness, a nausea, a headache, heart, a brain, the central nervous system can be damaged. The irradiation directed the MICROWAVE causes spasms of legs, pains in ears, burning in soles of legs, рези in eyes, clicks in "hum" to a head, at impacts in a nasopharynx causes cough, sneeze, a cold, arrhythmia hearts, dumb hands.

**Electronic harassment and electronic torture list (military experiment)  
- December 24, 2009**

Below is the list of all (most) effects I experienced from these horrible electronic weapons. Few times I may not correctly describe the source of the effects. It is sometimes difficult to point to microwave or ultrasound. Both can be very damaging. High Power Microwave cooks your body cells while high power ultrasound simply destroys your body cells. But in the end the result is the same, a damaged body.

**MIND-READING - MIND-READING - MIND-READING**

<p><b>Subvocal speech</b></p>	<p>Special equipment is used to detect muscle contractions like the ones a person uses when speaking out loud. When spoken to itself these muscle movements can be detected by advanced equipment and translated into words and sentences. As most people talk to themselves when 'thinking' this resembles mind reading.</p> <p><u>How it is applied</u> They read your subvocal speech and react to it</p> <p><u>Feeling</u> Unbelievable at first, then you get depressed because the last thing you thought was private appears not to be private anymore. Then you accept that you probably are even more popular and watched then the big stars in the world and sometimes use it to deceive the bastards. Horrible torture</p> <p><u>Why it is applied</u> To drive you insane</p>
<p><b>Seeing through your eyes</b></p>	<p>Although some targets claim that they can see what you see. I have not (yet) experienced this. But they do everything to suggest that they can do this. E.g. on the highway you are bursted with the burp beam every time a favorite model car passes in the opposite direction. They are looking at you from some camera build inside your car or from another car. They are looking at your eyes to see what you are looking at. I experienced a few times I was bursted BEFORE I saw the favorite car. A lot of research in this area is going on, I will keep you updated.</p>

## HEARING VOICES - HEARING VOICES - HEARING VOICES

### Voice-to-skull

Special advanced equipment is used to beam voices, or in fact any sound, into your head.

#### How it is applied

They make you hear voices that you should not hear. For example, they let you hear voices from people far away very clear as if they are standing next to you. This an amazing experience. There are a lot of reports of people who claim they are attacked by voices

#### Why it is applied

To drive you insane

## HEAD - HEAD - HEAD

### Top of your head beam

The top of your head is very sensitive. They will burn the top with some laser or microwave weapon

#### How it is applied

They put the beam on your head and wait for you to move

#### Feeling

Can be very painfull if applied with enough intensity. You cannot do much with this beam on your head. Horrible torture

#### After effects

If applied with high intensity it may take several days for the painful feeling to disappear

#### Why it is applied

Prevent you from working, doing your thing

#### Should you worry

Yes, long term irradiation may cause brain damage, tumors

### Scratch beam

They just beam your head somewhere. The normal reaction is your will start scratching your head.

#### How it is applied

Mostly applied when other people can see you. If they do this everytime with the same people they may wonder whats wrong with you. They also apply this and have random people scratch their heads and then burn you

#### Feeling

Not very painfull, mostly a short pulse, although they may keep the beam on your head and remove it after you start scratchin your head

#### Why it is applied

Drive you out of your mind, drive you into attacking other people

Often your eye will start tearing</p> <p><u>How it is applied</u> Some kind of microwave burst, see also Phasr and other similar military weapons used to blind the enemy</p> <p><u>Feeling</u> Not really painfull but you cannot do much as you are used to two eyes.</p> <p><u>Why it is applied</u> Prevent you from working</p> <p><u>Should you worry</u> Yes, this is very damaging for your eyes</p>
<b>Eye sting</b>	<p>Your eye is bursted with some kind of laser beam</p> <p><u>Feeling</u> Like they drive a needle into your eye. Very painful</p> <p><u>Why it is applied</u> Stress discomfort</p>
<b>Just below eye, tremble</b>	<p>They beam at they area below your eye and the flesh below it starts trembling. They can do this in shops and through wall</p>
<b>Burn (beard) hair</b>	<p>They burn away hair at certain locations, e.g. your moustache hair just below your nose holes to create the illusion of a leaking nose</p> <p><u>How it is applied</u> This is just a laser hair removal procedure, like performed in many beauty parlors</p>

<b>Sneeze burst</b>	<p>You are bursted and must sneeze. This is a tinglin sensation that can make you sneeze in an instant</p> <p><u>How it is applied</u> You can turn your head in the other direction or hold your hand before your nose to make sure the attack is caused by electronic weapons</p> <p><u>Why it is applied</u> To make your body react to something</p>
<b>Runny nose</b>	<p>You have a runny nose but do not have a cold. You may start thinking you have some kind of strange cold but you have not. Once you are out of the beam, the runny nose disappears.</p> <p><u>How it is applied</u> I am not sure if this is done only by electronic weapon or by a combination of some drug and electronic weapon</p>
<b>Cough burst</b>	<p>Your throat is bursted with a high intensity burst and you start coughing instantly. This coughing does not look like normal coughing. You will have a sore throat immediately afterwards.</p>
<b>Dry cough</b>	<p>Like something fluid/moisture sticks in your lungs, or sometimes your throat. When you breath you hear/feel a rasping sound. You must cough very hard to throw it out.</p>

<b>Sore throat</b>	<p>Your throat is slowly cooked and you will almost immediately notice less volume and after some time pain while speaking</p> <p><u>How it is applied</u> They can do this in just one or two hours by aiming a high power beam at your throat.</p> <p><u>Why it is applied</u> Prevent you from speaking loud, prevent you to sing</p>
<b>Blackout beam</b>	<p>This is very high intensity burst on your head. There is no pain but it feels like the result having been hit on the head very hard. You feel a bit dizzy and your ears are ringing</p>

<b>Burp beam</b>	<p>This is a low power sophisticated version of the chest/lungs cook beam. It is difficult to locate the source direction.</p> <p><u>How it is applied</u> It takes approx. 2-3 seconds to make you burp, make your body react to events. They also may apply low intensity, so you get an irresistible urge to burp but cannot</p> <p><u>Feeling</u> Horrible torture</p> <p><u>Why it is applied</u> To make you suffer. This applied sometimes once every five minutes, but sometimes also several times a minute to let your body react to events like cars passing your window, etc. Horrible torture.</p>
<b>Heart attack incl. extra beam from left behind</b>	<p>This is a low frequency high power beam aimed at your heart, mostly from a position somewhere in front of you. To maximize the effect they simultaneously beam you from the left behind position with a microwave cook beam.</p> <p><u>How it is applied</u> As they may apply the from behind beam for a long period your flesh around the heart area may get cooked and the whole area may feel painful and stiff</p> <p><u>Feeling</u> This really gives you the feeling of having a heart problem, and in fact you have! The difference is that this one is applied by murderers. Horrible torture</p> <p><u>After effects</u> It may take several days before you recover (if they stop the beam)</p> <p><u>Should you worry</u> Yes, your heart is vital</p>

Horrible torture</p> <p><u>After effects</u> It takes at least one hour before the horrible cramps get a little less painful.</p> <p><u>How to detect</u> With normal cramps you will have other parts of your body react as well, like heavy sweating. In this case there is just intense pain.</p>
