

Fluoride is a Poison!

Let's NOT Drink It...

Fluoride “Talking” Points

- **What is Fluoride?**

Fluoride is a toxic waste pollutant collected from industrial stacks by air pollution control equipment. It comes from steel mills, coal burning power plants, glass factories, aluminum factories and Phosphate fertilizer plants, among others, and has never been submitted to the FDA for approval as a drug. It is a witches' brew of pollutants.

- **Disposal of Fluoride**

There is a well coordinated effort to keep fluoride from being declared a toxic waste and to dispose of it cheaply and easily by feeding it to the people and letting their bodies “detoxify” it.

- **Tooth Care Products**

Sodium fluoride kills germs by poisoning the germs but it is not concentrated enough in water supplies to kill germs in the mouth but rather it gradually accumulates in the internal organs and inflicts harm on bones, teeth, thyroid and brain, etc.

- **A Great Fraud**

“Fluoridation is the greatest case of scientific fraud of this century, if not of all time.”

--Robert Carton, Ph.D., former US EPA scientist

“In point of fact, fluoroide causes more human cancer death, and causes it faster than any other chemical.” Dean Burk – Congressional Record 21 July 1976

- **Fluoride is a Poison**

“Fluoride is more toxic than Lead and only marginally less toxic than Arsenic.” --Clinical Toxicology of Commercial Products, 5th Edition 1984

- **“We would not purposely add arsenic to the water supply. And we would not purposely add lead. But we do add fluoride.**

- **The fact is that fluoride is more toxic than lead and just slightly less toxic than arsenic.**

From 30,000-50,000 deaths/year are directly traceable to fluoridation; 10,000-20,000 of these deaths being from fluoride induced cancers.” --Dr. John Yiamouyianni

- **Fluoridation Leads to Diseases**

“In point of fact, fluoride causes more human cancer deaths, and causes it faster, than any other chemical.” --Dean Burke, Former Chief Emeritus, US National Cancer Institute

Dr. John Yiamouyiannis states that from 30,000-50,000 deaths a year are directly traceable to fluoridation and 10,000-20,000 of these deaths are from fluoride induced cancers.

- **Follow the Money**

In 1969, the country of Sweden intended to fluoridate their water supply due to the strong advice of Professor Yngve Ericsson, a Swedish dentist who was also the senior representative on the World Health Organization's Expert Committee on Fluoridation and highly enriched by two profitable patents on fluoride toothpaste. A subsequent investigation disclosed that the comparative studies done simply didn't exist! The WHO report was deemed unacceptable from a scientific point of view and that some of the claims lack any and every basis in fact. Study deemed grossly defective. Sweden remains non-fluoridated, to this day.

- **Proof That Fluoridation Doesn't Prevent Tooth Decay**

If fluoridation were effective in preventing cavities, Native Americans would have the least cavities. They have had forced fluoridation for approximately 62 years yet four large reliable studies show INCREASED tooth cavities.

- **Fluoride Increases Uptake of Other Poisons**

Fluoride and aluminum in the body will tend to combine more avidly and cause serious problems such as kidney damage and dementia and Alzheimers.

- **Enzyme Damage**

The fluoride ion is also a major enzyme poison which is ruinous to good health. To avoid fluoride is to prevent the destruction of 83 enzymes essential to health as listed with references in *Good Teeth, Birth to Death* by Gerard F. Judd, Ph.D.

- **Fluoride Damages Many Organs**

Fluoride damages the left occipital lobe of the brain making people less energetic. (Dan Montgomery –Population Control)

- **Mistakes in Dosage Do Happen in Water Industry**

Too much fluoride cause splotchy teeth and mottling discoloration. AP Article, Press Democrat, Jan 8, 2011

- **Fluoride is Mass Medication and is Illegal**

We know the FDA (Federal Drug Administration must approve fluoridation and the FDA has NOT. The FDA has NO Ruling . . The Federal government promotes fluoridation through the CDC. The job of the CDC (Center for Disease Control) is NOT to approve a drug for safety and effectiveness. That's the FDA's job . . . And the FDA has NOT Ruled on fluoride.

- **Why Would California Mandate Fluoridation?**

In 1962 Francis Crick gave a keynote address at a pharmaceutical company recommending fluoride in the water as a chemical sterilization of certain population groups as discussed in *Full Disclosure* by Dr. Gary Glum. Fluoride contributes to sperm damage and infertility.

- **International Law**

By international law fluoride must be removed from fertilizer so that pastures, crops, sheep and cattle will not be harmed. Previously it was used almost exclusively as an insecticide and rodenticide which are exterminators.

Show Us the Proof in Writing

Ask your city councils, boards of supervisors, water agencies, health departments and any dentist that advocates for fluoridating the water supply to provide written and signed proof accepting liability with assurance that fluoridation is not a poisonous industrial pollutant. They MUST provide written assurances and written answers to these questions and not approve, pay or add fluoridation to the water until these requirements are met.

Your "IMMEDIATE ACTION" is REQUIRED. SHOW UP or SPEAK UP to prevent the poisoning of OUR DRINKING WATER.

We must educate ourselves and others, and let everyone know what fluoride is! It's a poisonous waste product!

Speak up NOW, spread the word and let the water agency, health departments, city officials and everyone you know that we will NOT allow poisonous fluoride to be added to our drinking water. The Solution to Pollution is Not Dilution! Improve Nutrition and Oral Hygiene...to Prevent Dental Decay...

Download flyers from the website and spread the word to everyone you know...

Your Silence is Your Permission...
