Preface

Learning Greek is lifelong education. When the opportunity to work on a second edition of *Introduction to Ancient Greek* was presented to me by friends and strangers from California to Pennsylvania, I had already retired from classroom teaching after thirty-eight years at the blackboard (which morphed into the overhead projector and finally the Elmo). I had no idea how much I would learn from this undertaking, about Greek, about myself and my writing, about approaches to teaching, and about changes in the world since I worked on the first edition, beginning in 1971. My colleagues and I have made hundreds of changes for the new edition: corrections of errors or infelicities; improvements in clarity, consistency, and pedagogy; additions of gender-inclusive material and helpful hints to learners and teachers. The changes are based on decades of teaching beginning Greek and learning from students what works for them.

The Book's Approach

I have assumed that students who study Greek at the university level really want to learn Greek, and learn Greek so that they will be able to read Greek or some particular thing(s) in Greek, not in order to recite paradigm after paradigm in endless and meaningless succession. Yet the paradigms must still be learned. When I began writing this book, the beginning Greek textbooks then in use tended to give students little more than the bare bones of Greek, and not in a very interesting way. The choice of Xenophon's *Anabasis* (and that Xenophon adapted so that it was barely recognizable) struck me as an unfortunate pick for the main or only reading. Readings from Greek authors chosen to introduce students to Greek literature should be intellectually stimulating: they should make the students want to read Greek. The readings in this book were chosen because they illustrate grammatical points; but many were selected in the hope that they would be interesting to the students, encouraging them to learn the new paradigms, and expanding their consciousness of Greek, so that they would read more. The readings are taken from a variety of sources representing different eras and different philosophies, some of which most students will not have heard of before reading them.

Languages, Living and Dead

To call Greek a dead language is to take a narrow-minded, exclusively pragmatic view of time and of life and death (at least of the life and death of languages). A language is only dead when it has passed from human memory,

leaving no literature and no living descendants. Perhaps we could say that Hittite and Tocharian are *dead* languages, because their literatures are scanty and they are known by few, though even they live for ardent Indo-European philologists, after their fashion. The life of a language is a relative thing. To call Greek a dead language is to admit that one knows no Greek and to imagine that it cannot be known and, indeed, is not worth knowing.

Greek is a living language not only because it never died but continues to develop and change and can still be heard in its heir, Modern Greek, but also because it has left us a literature that is part of our common heritage and that continues to influence the way we think, speak, and write.

A Traditional Approach

On the other hand the Attic Greek spoken in fifth-century Athens is no longer spoken in the same way. There is nowhere we can hear it and no one with whom we can speak it. For this reason I have taken the traditional, rational approach to teaching Greek, rather than a "natural method." The study of Greek has long been a bookish pursuit, and rightly so. For this language we have only the books (and other writings) of the ancient Greeks to study. We have only part of a language, the part that can be written down. I have therefore tried to present the forms in a reasonable order and hope students learn them through use, repetition, and review. I have also intended to treat the students as intelligent, rational human beings, who will one day be better than their teachers.

For the Second Edition

I used An Introduction to Ancient Greek: A Literary Approach for nearly thirty years to help undergraduates learn Greek, mostly at the University of Idaho, where, as it may surprise the world to learn there has been for many years a dedicated band of classical studies students. The book had a small and loyal following outside, but although at first it had its enthusiasts it never gained wide circulation. Until I heard from Richard Hamilton, Professor of Greek at Bryn Mawr, and Deborah Mitchell, computer programmer, book designer, and faithful guide to Internet language learners, early in 2005, each independently of the other, I thought my book was destined to languish in obscurity. That same year I heard from several other interested teachers and learners. I was amazed at the interest and jumped at the chance, first presented by Professor Hamilton, to revise the book for the publication of a second, more aesthetic, more gender-inclusive, more streamlined, and less flawed 21st-century edition. The book was tested in a beta-version at Bryn Mawr, Haverford College, and St. John's College, Santa Fe, in 2006–7. Many suggestions and corrections from both students and teachers have been incorporated. One aspect which I have kept from the old edition is the preview of coming attractions, introducing new material from the next lesson in readings with explanatory glosses and notes. In this way the new material will be a little less strange, since the students will already have seen it.

Acknowledgments

For this opportunity, I would like to thank Richard Hamilton and Deborah Mitchell for staying with the project they helped initiate, for their continued enthusiasm and encouragement, and above all for the Herculean labor that has gone into designing, formatting, and editing the new edition. I would also like to thank Professor Hamilton's graduate student, Dennis McHenry, to whom I owe a huge debt of thanks for entering and formatting the text, and his two teaching assistants, Andrew Beer and Sean Mullin, who worked with the new version. Thanks, too, to teachers who have used the book, Karelisa Hartigan, Deborah Roberts, Sherry Martin, Bruce Perry, and others in the past, who kindly contributed suggestions for the new edition. Thanks to students, my own and others, who have been, knowingly or not, contributors to this project; among them most recently, Robert Haas, Tracy Cogsdill, Billy O'Dell, Ivan Peterson, Travis Puller, and Aaron Mayhugh. Thank you, especially, betatesters, both students and teachers, for taking such joy in finding and correcting errata. Finally I would like to thank once again all the friends named in the first published book and especially Harry Fulton who typed and formatted the manuscript that remained in use for three decades. Only now do I fully appreciate what an enormous task it was and how well he performed it.

WorldWideGreek

For online help, supplements, interactive forums, useful links, and study guides, visit the official Web site: http://www.worldwidegreek.com/.

Students and teachers of Greek are invited to contribute to the Web site by sending submissions to admin@worldwidegreek.com or by writing to Cecelia Luschnig at cluschnig@moscow.com, and to discuss anything related to Greek in the Forum on WorldWideGreek. We are hoping to publish syllabi, suggestions for classroom use, and anecdotes about teaching and learning Greek. We are especially interested in additional unadapted readings from Greek authors with notes and glosses geared to the different lessons and vocabularies for texts for elementary and intermediate students.

This book is dedicated to learners of Greek everywhere.

Introduction

The Greek Alphabet and the Structure of Greek

In this lesson you will learn the letters and sounds of Greek, the diacritical marks, the classification of letters, the parts of speech, and useful definitions. You will be able to read words, recite the alphabet song, translate selected sentences, and read signs.

ALPHABET AND SOUNDS OF GREEK

The Greek alphabet has twenty-four letters (γράμματα: *grammata*), given below with their names, usual transliterations into the Roman alphabet, and a recommended pronunciation.

The Alphabet

Character	Name	Transliter	ation	Pronunciation
Α α	ἄλφα	alpha	a	short: cup; long: father
Ββ	βῆτα	beta	b	b
Γ γ	γάμμα	gamma	g (ng)	hard g, ng, goi <i>ng</i>
Δ δ	δέλτα	delta	d	d
Ε ε	ἒ ψιλόν	epsilon	e	short e, bet
Ζ ζ	ζῆτα	zeta	Z	sd, wisdom; dz, adze
Η η	ήτα	eta	e	long ε (<i>cf.</i> French <i>fête</i>)
Θ θ	θῆτα	theta	th	t-h
Ι ι	ίῶτα	iota	i	short: b <i>i</i> n; long: b <i>ea</i> n
Κκ	κάππα	kappa	k, c	k
Λ λ	λάμβδα	lambda	1	1
Μμ	μῦ	mu	m	m
Νν	νῦ	nu	n	n
Ξξ	ξῖ	xi	X	ks/x: ta <i>cks</i> , ta <i>x</i>
O o	ὂ μικρόν	omicron	O	short o: pot (German <i>Gott</i>)
Π π	πῖ	pi	p	p
Ρ ρ	ρ҅ω̂	rho	r, rh	trilled r (as in Italian)
Σ σ, ς	σίγμα	sigma	S	as in <i>s</i> ay
Τ τ	ταῦ	tau	t	t
Υυ	ὖ ψιλόν	upsilon	y	French u; German ü
Φ φ	φῖ	phi	ph	p-h
Χ χ	χῖ	chi	ch	k-h
Ψψ	ψῖ	psi	ps	hi <i>ps</i>
Ω ω	ὧ μέγα	omega	O	go

The capitals are the original forms, but the small letters are used in modern printed texts except for proper nouns and the beginnings of paragraphs.

Punctuation

In Greek printed texts, the period (.) and comma (,) have the same use in Greek as in English. A raised period (\cdot) is equivalent to both our semicolon (;) and colon (:). The semicolon (;) is used in Greek as a question mark (?).

Attic Greek

In Greek a variety of both literary and spoken dialects persisted. **Attic**, the dialect used by the Athenians, gradually became the standard for prose. Koinē, the common dialect, developed from Attic. The exercises in this book are based on Attic Greek. In the readings, words in other dialects (Doric, Ionic, Aeolic, Homeric) are explained.

Exercise A

- 1. Learn the names, sounds, and shapes of the Greek letters (concentrating on the small letters).
- **2.** Pronounce the following words. Transliterate them into the Roman alphabet. Do you recognize any words that are similar to English words? For the time being, stress or raise the pitch of the syllable that has the accent mark ('``^).

Example: πάθος: pathos; Engl. pathos, -path, patho-

- 1. ψυχή 5. μικρός 9. ποταμός 13. βάρβαρος 2. ξένος 6. θεός 10. ἀγορά 14. ζῷον 3. δένδρον 7. λόγος 11. φίλος 4. δρᾶμα 8. σκηνή 12. ἀρχή
- 3. Pronounce the following and write English derivatives.
 - 5. συμβίωσις 9. μητρόπολις 13. ἄνθρωπος 1. άλφάβητος 2. βαρβαρισμός 6. ἡινόκερως 10. τεχνολογία 14. ἀδελφός 3. ζωδιακός 7. ἐτυμολογία 11. ἐπιτομή 15. γυμνάσιον 4. ὀρθογραφία 8. Κύκλωψ 12. ἀποθέωσις 16. ἰσοσκελής

Έν ἀρχῆ ἦν ὁ λόγος.

Vowels, Diphthongs, and Iota-subscript

1. Vowels

The vowels (φωνήεντα) are α , ε , η , ι , o, v, ω . Of these, α , ι , and v are of variable quantity, that is, they can be either long or short. Of the others, ε ($\tilde{\varepsilon}$ ψιλόν plain e), and o (\tilde{o} μικρόν little o) are always short; and η and ω ($\tilde{\omega}$ μέγα big o) are always long. Long vowels were originally pronounced for about twice as long as short ones. Vowel length affects pronunciation, accent, and the meters of poetry.

2. Diphthongs (δίφθογγοι) and Vowel Combinations

A diphthong is a combination of vowel sounds that starts as one vowel and, within the same syllable, changes gradually to another vowel.

The diphthongs in Greek are:

Diphthong	Transliteration	Pronunciation
αι αυ	ai, ae, e au	(ai) aisle, high [ī] (au) sauerkraut
ει ευ (also ηυ)	ei, e, i eu	(ei) sleigh [\bar{a}] ($\varepsilon + \upsilon$)
οι ου	oi, oe, e, i ou, u	(oi) coin, toy (ou) soup [oo]
υι	ui	(uy) (cf. New York)

(The combination υ in Attic Greek always occurs before another vowel and is pronounced as υ followed by the semi-vowel y; there is no exact English equivalent.)

3. The Long Diphthongs: Iota-subscript

When a long vowel $(\bar{\alpha}, \eta, \text{ or } \omega)$ combines with ι to form a diphthong, the ι is (in most modern texts) written under the line: this is called iota-subscript or ι -subscript, α , η , ω . This is not an ancient custom, but dates from the Byzantine Age, when scholars were attempting to standardize the spelling of ancient Greek, although the pronunciation had changed over the years. Most but not all modern texts follow the Byzantine practice.

Note on *\ildalus*-subscript

In the Classical period, and in fact until the ninth century C.E., the capital letters were used for all formal writing. The small letters are simplified forms of these for faster writing, and began in the ninth century C.E. to be used as a formal (or book) hand. Before this time the long diphthongs were written with iota on the line with the other letters: AI, HI, Ω I, as in THI K Ω M Ω I Δ IAI, THI TPAF Ω I Δ IAI ($\tau \hat{\eta} \kappa \omega \mu \omega \delta i \alpha$, $\tau \hat{\eta} \tau \rho \alpha \gamma \omega \delta i \alpha$ for the comedy, for the tragedy), and iota was pronounced: spelling originally represents pronunciation (i.e., language), but often becomes standardized (or fossilized) as pronunciation changes.

4

By the second century B.C.E. this iota had been lost from the pronunciation in Attica, and it gradually ceased to be written. The Byzantines put it under the line to show that it no longer affected the pronunciation. When this little iota occurs, it must be learned as part of the spelling. Thus, it is necessary to distinguish - η (a dative ending) from - η (a nominative ending). After a capital letter, this ι is still written on the line in modern texts, A ι , H ι , $\Omega\iota$ (= φ , η , φ).

Breathings

- 1. In Greek, the symbol ', though not a letter, represents one of the sounds of the language, the *h*-sound (or aspiration).
- 2. Every word beginning with a vowel or diphthong must be marked with either the '(rough breathing for h) or the '(smooth breathing for the absence of an h): eig (eis) into ; eig (heis) one ; odos) $\operatorname{threshold}$; odos) $\operatorname{threshold}$; odos) $\operatorname{threshold}$; odos) $\operatorname{thr$
- 3. Words beginning with ρ and υ always have the rough breathing: $\dot{\rho}\dot{o}\delta\sigma v$ rose; $\dot{\upsilon}\pi\dot{e}\rho$ over (hyper).

Note on the Breathings

The alphabet given above is the Ionic alphabet, which was the one used by the Ionian Greeks and adopted by the Athenians (officially in 403) B.C.E.), and gradually by all the Greeks. Before this universal acceptance of the Ionic alphabet, a city-state might not only have its own dialect, but some even had their own versions of the alphabet. Now the Ionic alphabet is the one used both for Modern Greek and for classical Greek texts. The old Attic alphabet (and some others as well) used the H symbol for the h-sound (the aspiration), but the Ionians used the same symbol to represent the long *e*-sound: in their dialect, speakers tended to drop their h's. In some places, a new symbol was developed to represent the h-sound, at first used only to differentiate words that were otherwise the same—such as ὅρος (horos) *boundary* from ὄρος (oros) mountain—but later adopted universally. This symbol was developed from the H, by splitting it in half: F (used in inscriptions from the Greek colonies in Southern Italy, Hopog). It was later adopted in the form by the Alexandrian scholars from which it developed into our ', the rough breathing (πνεῦμα δασύ hairy breath). The Alexandrian grammarians also introduced the complementary \dashv (which became and then ') to indicate the absence of aspiration (calling it πνεῦμα ψιλόν plain breath, bald breath) again to indicate the correct reading of words otherwise spelled the same. It is now conventional to mark every word beginning with a vowel or diphthong with a rough (') or smooth (') breathing. It must be learned as part of the spelling of the word. It is written beside (to the left of) a capital letter: 'H, 'H, 'A, 'A.

The rough breathing is pronounced and transliterated as the letter *h*; the smooth breathing is not heard and is not transliterated.

Ὀρέστης, Orestes "Ομηρος, *Homer

*Note: in English the endings of personal names are often dropped.

The rough breathing is also used over an initial ρ , to indicate that it is aspirated. We represent this by trilling the ρ and transliterating $\dot{\rho}$ as *rh*: $\dot{\rho}\dot{\eta}\tau\omega\rho$ (rhetor), *orator*.

Classification of Consonants

The consonants (σύμφωνα) are divided into **Mutes** (or stops) and **Continuants** (including liquids, nasals, a spirant, and double consonants).

There are nine **Mutes** ($\alpha \phi \omega v \alpha$), divided according to (1) where they are produced, into labials, dentals, and palatals; and (2) the effort in breathing, into unvoiced, voiced, and aspirated (or rough).

The following chart shows the two classifications:

	Unvoiced	Voiced	Aspirated	Produced With
Labials	π	β	ф	the lips
Palatals	κ	γ	χ	the soft palate and tongue
Dentals	τ	δ	θ	the teeth and tongue

Unvoiced or voiceless (ψιλά) consonants are produced without vibration of the vocal cords.

Voiced consonants (called μέσα in Greek) are produced with vibration of the vocal cords: the difference between τ and δ , or κ and γ , or π and β (t and d, or k and g, or p and b) can be felt if you place your fingers on your Adam's apple; you will feel δ , γ , and β , but not τ , κ , π .

Aspirated (δασέα) consonants are followed by a blast of air, or the h sound ('), the rough breathing in Greek.

Note on the Aspirated Consonants

The three aspirates, ϕ , θ , χ , are equivalent to the three unvoiced mutes π , τ , κ plus the h sound. This means that they are pronounced more or less as follows: ϕ like ph in flop-house; θ like th in pot-head; and χ like kh in block-head; except that in Greek the two sounds would be in the same syllable. Actually in English our initial p is aspirated (and so probably very much like Greek ϕ): if you hold your hand in front of your mouth when saying put or pot, you will feel a blast of air (which is the aspiration). Then try spot or stop, and you will find that p in these positions is much less heavily aspirated. The same is true of English t and t sounds, as in top, t0, t1, t2, t3, t4, t5, t6 but Greek does. An English speaker would have difficulty in hearing the difference between t4 and t5, t6 and t7 and t8, t8 and t9 in the ancient pronunciations of these letters. Knowing that t9 and t9 and

The **Nasals.** There are three nasals in Greek: μ (a labial nasal), ν (a dental nasal), and nasal γ (a palatal nasal).

Nasal γ **:** when γ occurs before another palatal (i.e., γ , κ , χ , or ξ), it is pronounced ng (as in sing):

Example	Translation	Description
ἄγγελος	messenger (angel)	γγ as in a <i>ng</i> er.
ἀνάγκη	necessity	γκ as in i <i>nk,</i> a <i>nk</i> le
σύγχορος	partner in the chorus	γκ as in si <i>nk-h</i> ole, Ba <i>nkh</i> ead
Σφίγξ	Sphinx	γξ as in i <i>nks,</i> Sphi <i>nx</i>

The **Liquids** are ρ and λ .

The only **Spirant** in Greek is σ . Note that sigma at the end of a word is written ς , anywhere else σ . Some modern editors print the open or lunate form (c) found in papyri for sigma in all its positions.

The **Double Consonants** ($\delta\iota\pi\lambda\hat{\alpha}$): ζ , ξ , and ψ , are each two consonant sounds represented by one letter.

Labial mutes combine with sigma to become ψ : π , β , or $\phi + \sigma > \psi$.

Palatal mutes combine with sigma to become ξ : κ , γ , or $\chi + \sigma > \xi$.

The symbol ζ represents the sound combination $\sigma\delta$. There is, however, some dispute over the pronunciation of this letter: it may originally have indicated the sound dz and it is pronounced in this way by most English-speaking Greek scholars. The continual change in language often makes it difficult to find exactly how a given letter was pronounced at a given time: either combination (sd or dz) is acceptable for classroom use.

Exercise B: Diphthongs, etc.

1. Pronounce the following words aloud. (Try to guess at their meanings or find English words derived from them.)

1.	δαίμων	6.	ψευδής	11.	Σφίγξ	16.	ἵππος
2.	αἰθήρ	7.	ἄγγελος	12.	ηὕρηκα	17.	οὐρανός

5.	φαινόμενον	10.	αὐστηρός	15.	ἐγκώμιον	20.	ύποκριτής

2. Read the following proper names aloud and try to write English equivalents. Because there are many variant spellings of Greek names in English, there is no one right answer for each.

1. Αἴσωπος	9. "Ηρα	17. Ἡσίοδος	25. Αἴγυπτος
2. Άγαμέμνων	10. Κάδμος	18. Σωκράτης	26. Οἰδίπους

Obsolete letters

In the earliest Greek alphabets, three other letters are found in some inscriptions, but not in manuscripts. They are (1) $_{\rm F}$ (also written $_{\rm S}$) called digamma from its shape; it was pronounced like English w; (2) $_{\rm S}$, called koppa (corresponding to $_{\rm S}$) and used in place of $_{\rm K}$ before 0 and $_{\rm S}$; and (3) $_{\rm S}$, san or sampi, whose original sound is a little more obscure: it was probably another spirant (perhaps the $_{\rm S}h$ sound). In the alphabet, $_{\rm F}$ is the sixth letter (between $_{\rm E}$ and $_{\rm S}$); $_{\rm S}$ is between $_{\rm T}$ and $_{\rm P}$; and $_{\rm S}$ comes at the end, after $_{\rm C}$. These were used for numerical notation along with other letters of the alphabet (see below for numerals and numerical notation). The sounds these three obsolete letters represent were lost very early in the history of the Greek language, though traces of the digamma sound are found in Homer, the earliest Greek poetry, and the letter itself occurs in early papyri, most notably those of lyric poets, such as Alcman, Corinna, and Sappho.

Accents (τόνοι)

The predominant accent of classical Greek was one of pitch rather than one of stress (until about the fourth century C.E., by which time it had probably become a stress accent like that of Modern Greek). We know that it was a musical pitch accent from the descriptions of it by Greek grammarians beginning in the Hellenistic Age, and from the very terminology used to describe it. Stephen G. Daitz offers helpful suggestions in *The Pronunciation & Reading of Ancient Greek: A Practical Guide* with accompanying tapes. It is recommended that this be available in the library or language laboratory and that the use of pitch accents be encouraged from the beginning.

There are three accent marks in Greek:

Kind	English Name	Greek Name	Translation	
,	acute	ὀξύς	sharp	
`	grave	βαρύς	heavy, deep	
^	circumflex	περισπώμενος	pulled around	

which represent respectively a rising pitch ('), a flat pitch ('), and a rising-falling pitch (^). Most Greek words have one accent mark to indicate the dominant accent (κ ύριος τόνος) of the word. There are many rules on the placing of the accent, some of which will be given in this book, as they are needed, beginning now.

Placing the Accent Mark

The accent is written over a vowel or diphthong (over the second member of the diphthong): θάνατος death; νῆσος island; πλοῦτος wealth. Should the accent and breathing mark fall on the same letter, the acute or grave is written to the right of the breathing mark, the circumflex above it: ὅς or ⋄ς who; ὡ to whom; οἱς to whom (pl.). With capital letters, both accent and breathing are put to the left of the letter: Ὅμηρος Homer; Ὁ Oh! If the word begins with an accented diphthong, the breathing and accent are put over its second member as usual: Αἴγυπτος Egypt.

Accent Rules

- 1. The accent mark can fall only on one of the last three syllables of a word (see below for the definition of a syllable). These are usually called by Latin names: the last syllable is called the ultima (*last* in Latin); the next to last syllable the penult[ima] (*almost the last*); and the third from the last is called the antepenult (*before the next to last*). These terms are briefer than the awkward English phrases, and will be easy once they become familiar. (We need not bother with the anteante- or any others further back than the antepenult, since they are out of the running for the accent mark.)
- 2. The acute (τόνος ὀξύς) can fall on any of the last three syllables; the circumflex (τόνος περισπώμενος) only on one of the last two; the grave (τόνος βαρύς) only on the ultima.
- 3. The circumflex (which required a rising and falling pitch within the same syllable) can fall only on a long vowel or diphthong. The acute and grave can fall on either long or short vowels or diphthongs.
- 4. How far back (i.e., away from the end of the word) the accent can go is determined by the length of the ultima. For purposes of accent a syllable is long if it contains a long vowel (η , ω , $\bar{\alpha}$, $\bar{\iota}$, $\bar{\upsilon}$) or a diphthong, short if it contains a short vowel (ε , o, $\check{\alpha}$, $\check{\iota}$, $\check{\upsilon}$). The diphthongs - $\alpha\iota$ and -oι as endings are considered short in determining accent (except in the optative mood of verbs). (Note, however, that -oι ς , - $\alpha\iota$ ς are long and that -oι-, - $\alpha\iota$ in other positions are long, as in $\grave{A}\theta\eta\nu\alpha\hat{\iota}o\varsigma$.)
- 5. If the ultima is short, the acute can fall as far back as the antepenult and the circumflex no farther than the penult:

ἄνθρωπος, ἄνθρωποι man, men παιδίον, παιδία child, children θεός, θεοί god, gods δῶρον, δῶρα gift, gifts

Άθηναῖος, Άθηναῖοι Athenian, Athenians

6. If the ultima is long, the acute can fall only as far back as the penult and the circumflex only on the ultima (i.e., the circumflex cannot fall on the penult if the ultima is long):

ἀνθρώπου man's, παιδίου child's, δώρου of a gift, ἀρετή goodness, θεοῦ god's.

These rules will be treated again when we deal with the declension and accent of nouns.

7. The grave accent falls only on the ultima and is used only when a word that normally has the acute on the ultima is followed by another word with no intervening punctuation (to lead into the next word, the pitch is slightly lower than the normal acute).

ἀγαθός good ὁ ἀγαθὸς ἄνθρωπος the good man

Notes on the Accents

The accent of nouns and adjectives is inherent, that is, it belongs to the word and is not imposed on it by the rules for accent. The accent of nouns or adjectives may fall on any one of the last three syllables and it is persistent, that is, it remains in the same place unless forced, by the rules of accent, to move forward.

In classical times, the accent marks were unnecessary, and they are not found in inscriptions. Native speakers of Greek did not need to be told where to raise and lower their pitch, any more than we normally need to have the stress marked in order to pronounce familiar English words correctly. According to tradition, the marking of accents was started about 200 B.C.E. in Alexandria by the great Homeric scholar, Aristophanes of Byzantium. There are two explanations of why accent marks became necessary at this time: either Aristophanes instituted them, in connection with his work on Homer, to guide even native speakers in the proper pronunciation of the ancient epic forms that had by then become unfamiliar; or, because Greek had become an international language in the Hellenistic world, accent marks may first have been developed for teaching foreigners the correct accentuation. Whatever the reason, accent marks are a great help to us all, since we must all learn classical Greek as a foreign language. The system used now in all texts was developed by Byzantine scholars from the Alexandrian systems and is a very practical and economical way of indicating an important aspect of the Greek language: its tonal accent.

Syllables

- 1. For each separate vowel or diphthong in a Greek word there is a syllable (i.e., there are no silent vowels in Greek).
- 2. A syllable consists of a vowel or diphthong alone or with one or more consonants.
- 3. Some rules for syllabification:
 - a. A single consonant between two vowels in one word goes with the second vowel (e.g., ἄ-φω-να, φαι-νό-με-νον).
 - b. Any group of consonants that can begin a word in Greek goes with the following vowel, as does a mute before μ or ν (e.g., π ρ $\hat{\alpha}$ - γ μ α , μ η-τρός, τύ- π τ ω).
 - c. If the group of consonants cannot begin a word, it is divided, as are double consonants (e.g., ἄν-θος, ἐλ-πίς, ἄγ-γε-λος, ἵπ-πος).

Exercise C: Accents

According to the rules of accent given above, only one in each group is correctly accented: choose it. Be prepared to say why the other two are wrong. Be rational.

Vocabulary

Numbers

The earliest system of Greek numerical notation was alphabetic, that is, they used the letters of the alphabet (including the three that have since become obsolete, \digamma , \Lsh , \thickspace) as numbers, with the sign (′) to mark them as numbers. The following list gives the names of the numbers one to twelve and twenty, together with the letter used to represent each one. This system of numerical notation lacks a sign for zero and is therefore inferior to the Arabic system in use today. The Greek system was an additive system rather than a place system, using a separate figure for 10: ι ′; 11 is then 10 + 1: $\iota\alpha$ ′, etc.

Learn the names for the numbers 1–12 and 20.

	Value	Name		Value	Name
α'	1	εἷς, μία, ἕν	ζ΄	7	έπτά
β΄	2	δύο	η΄	8	ὀκτώ
γ΄	3	τρεῖς, τρία	θ΄	9	ἐννέα
δ΄	4	τέτταρες, τέτταρα	ι΄	10	δέκα
$\epsilon^{'}$	5	πέντε	ια΄	11	ἕνδεκα
s´	6	ἕξ	ιβ΄	12	δώδεκα
			κ΄	20	εἴκοσι

The first four, εἶς, δύο, τρεῖς, τέτταρες, and their compounds are declinable (i.e., change endings according to gender and case).

The Alphabet Song of Callias

Callias was an Athenian comic poet of the fifth century B.C.E. This choral song comes from a comedy called the *Alphabet Tragedy* (γραμματική τραγφδία).

```
τὸ ἄλφα, βῆτα, γάμμα, δέλτα, θεοῦ γὰρ εἶ ζῆτ', ἦτα, θῆτ', ἰῶτα, κάππα, λάβδα, μῦ, νῦ, ξεῖ, τὸ οὖ, πεῖ, ῥῶ, τὸ σίγμα, ταῦ, τὸ ὖ παρὸν φεῖ χεῖ τε τῷ ψεῖ εἰς τὸ ὧ.
```

The letters we call *epsilon*, *upsilon*, *omicron*, and *omega* were at this period called $\varepsilon \hat{\imath}$, $\delta \hat{\nu}$, $o \hat{\nu}$, and $\delta \hat{\omega}$. Epsilon or $\varepsilon \hat{\imath}$ (end of line 1) is called the god's letter because of a large E dedicated to Apollo at Delphi. The scholar Plutarch wrote a treatise on this monument (*Moralia* 392, called $\pi \varepsilon \hat{\nu}$ to $\delta \hat{\nu}$ to $\delta \hat{\nu}$ ded $\delta \hat{\nu}$ in which he gives various explanations for the E, which also represents the number 5. Especially charming is the suggestion that it is a greeting to Apollo. Instead of using the usual *Hello*, in Greek, $\chi \hat{\nu}$ for the explanations those who come to his temple with the inscribed words $\gamma \hat{\nu} \hat{\nu} \hat{\nu}$ occutov (*know yourself*) and the worshiper answers with the word $\varepsilon \hat{\nu}$ which means *you are*. $\tau \hat{\nu}$ (also, in another form, $\tau \hat{\nu}$) *the* is added before some of the letters to maintain the rhythm. Line $\Phi \hat{\nu}$ is a pairs went through the letters, making syllables by combining each consonant with each vowel in turn and in this way imitating the favored method of teaching young Greek children how to read.

```
βῆτα ἄλφα· βα
βῆτα εἶ· βε, κ.τ.λ. (καὶ τὰ λοιπά is Greek for etc.)

The Grammar of Dionysius Thrax

Dionysius Thrax (Διονύσιος Θρᾶξ, c.166–90 B.C.E.) was the author of the earliest Greek grammar textbook, τέχνη γραμματική. His treatise became a standard and continued to be used until the 18th century. The work is an admirable example of brevity and organization, beginning with a definition of grammar, listing its parts and discussing the letters and syllables (γράμματα καὶ συλλαβαί), from which the first readings have been excerpted. Later he defines the parts of speech, which you will sample at the end of the introduction. The most remarkable thing about this early grammar book is that, for all its faults and omissions, much of it is still useful. Although you probably will not be able to get everything in these readings, the learning and the fun come from the attempt.

Read aloud and try to understand these short sentences about the letters and sounds of Greek.

Letters: Γράμματά ἐστιν εἰκοσιτέσσαρα ἀπὸ τοῦ α μέχρι τοῦ ω.

```

9. Unvoiced, aspirated, voiced mutes: τούτων ψιλὰ μέν ἐστι τρία, κ π τ, δασέα τρία, θ φ χ, μέσα δὲ τούτων τρία β γ δ.

[$\mu\acute{\epsilon}\sigma\alpha$ in between: in Latin they are called mediae (middles), in English, unvoiced.]

Notes on the Alphabet

How important the art of writing was to the Greeks can be seen in the fact that it was the subject of myth, its invention being attributed to one of the gods or a folk-hero. One of the most popular stories of the origin of writing (told as history by Herodotus, V. 58–9) is that Cadmus (founder of Thebes) brought the alphabet from Phoenicia to Greece. This explains why the letters are called Φοινικήια γράμματα (*Phoenician letters*).

Grammar is a practical knowledge of the usage of poets and writers of prose.

English and Greek

The Greek language is very different from English: this is one thing that makes it endlessly exciting (and exacting) to learn. In studying Greek, we must study grammar. Grammar, though no longer stylish, is a good thing. A knowledge of grammar enables us to speak and write correctly, clearly, and elegantly, and to recognize the same qualities in others. Studying a foreign grammar forces us to see and to ponder the different ways in which things can be and have been said. It gives us a chance to look at other modes of expression than our own and to glimpse other modes of thought behind them. It makes us more aware (and more wary) of what we are reading and writing, hearing and saying.

To begin with, Greek is a highly inflected language. English is not. English has lost most of its inflections. In English often only the context (environment of words) can tell us even what kind of word (noun, adjective, adverb, verb, etc.) we are dealing with. Take, for example, the word *right* in the following phrases:

- 1. the *right* of way
- 2. to right a wrong
- 3. go west and turn right
- 4. the right way to do something
- 5. do it right away / right now

In (1) *right* is a noun; in (2) it is a verb; in (3) and (5) it is an adverb; and in (4) an adjective. We cannot take the word *right* out of its environment and say that it is a particular part of speech. In Greek, on the other hand, it is usually possible to recognize what part of speech a word is by how it looks: its *form* goes a long way in telling what part of speech it is, and what it is doing in the sentence.

English syntax is one of position. If we were to say such a thing as, "the warden gave Socrates a cup of hemlock," we would know who gave what to whom by the order of the words: the subject is first, then the verb, followed by the indirect object (to whom) and the direct object. Change that order and you change the meaning. In Greek, however, it is not the order of the words,

but their form which indicates their relationships to each other (i.e., their syntax). Socrates will have a different case-ending from the warden. The warden will be nominative because he is the subject; Socrates as indirect object (the recipient of the cup) will be dative; the cup (the direct object) will be in the accusative case in Greek. The order of the words will make very little difference because the endings (or inflections) tell the whole story. Of course English does have some inflections left: the personal and relative pronouns change their forms from subject to object. We must say "I like you," but "you like me." Even so, we cannot reverse or meddle with the word order ("me like you," "you me like," or "you like I") because the syntax of word order in English has taken precedence over that of case inflection to such an extent that these series of words are not only ungrammatical but nonsensical. And although the order of words in Greek is more flexible, some words are more mobile than others.

English still has some (though simple) verb inflection: add -s to form the third person singular of the present (work, works), add -d or -ed to form the regular simple past (worked) and so forth. Greek has a very elaborate verb system, expressing by inflectional variations all the subtleties for which English uses its rich system of auxiliary verbs and compound verb formations (*shall*, *will*, *may*, *might*, *should*, *would*, *used to*, *going to*, etc., besides the forms of *be* and *have*).

Both English and Greek are rich and subtle languages, but their richness lies in different directions. For the varieties of tense, mood, and voice, Greek has an abundance of verb endings and English of compound and periphrastic expressions. It is a tendency of language to simplify, to regularize, to analogize (to get rid of the differences). Greek and English are languages at different stages of development. There is no sense in making value judgments about whether an inflected language is better or worse than a noninflected one. In the 19th century, linguists and comparative grammarians considered our modern spoken languages the decadent progeny of the pure Aryan (an earlier name for the parent language of the Indo-European tongues) mother tongue. And they considered English among the worst of a bad lot. Now in our own less romantic age, it is recognized that languages tend to move in the same direction, from complexity of form to simplicity.

It is sobering for Greek scholars and beginning Greek scholars to bear in mind the opinion of the great Danish scholar of the English language, Otto Jespersen: "The so-called full and rich forms of the ancient languages are not a beauty but a deformity." This is perhaps going too far in the other direction, but, considered and judged in the only way a language can be judged, as a means of expressing thought, Greek will not be found wanting.

Note

The material treated below will be considered in more detail throughout the book. It is given now in the hope that you will feel safer and happier after getting a rational overview of the parts of speech of the Greek language and their equivalents in English.

The Parts of Speech (τὰ τοῦ λόγου μέρη)

In English the parts of speech are usually listed as these eight: noun, pronoun, adjective, verb, adverb, preposition, conjunction, and interjection. In Greek there are also eight parts of speech (by some ancient accounts at least), but the Greeks listed them differently: noun (ὄνομα), pronoun (ἀντωνυμία), verb (ῥῆμα), adverb (ἐπίρρημα), article (ἄρθρον), participle (μετοχή), preposition (πρόθεσις), and conjunction (σύνδεσμος). In English we define our parts of speech according to what role(s) each can play in a sentence. In Greek it is possible to define them according to their form (the shapes they can take = morphology).

A **noun** ($oldsymbol{o}$ voµ α) is the name of a thing, anything that has been given a name. In Greek a noun is described as a word that has case, number, and gender.

Case-declension ($\pi\tau\hat{\omega}\sigma\iota\varsigma$: literally, a *falling*) tells what part a noun is playing in a sentence. In English we use prepositional phrases and word order to show the relationship between a noun and other words in a sentence. Greek uses cases. Greek also has prepositions used with the cases to further define the relationships—it would be impossible to have a separate case for every possible relationship a noun can have with the other members of its sentence. The cases in Greek are:

Nominative $(\mathring{o}\rho\theta\mathring{\eta})$ for the subject of the sentence

Genitive (γενική) for one noun depending on another noun in relationships for which we use the preposition of (such as possession or origin); or the preposition from (for separation)

Dative (δοτική) for the indirect object and other relations for which we use *to* and *for*; for the locative (the place at which a thing is located: *by*, at, in, on, etc.); for the instrumental (the means by which, the manner in which)

Accusative (αἰτιατική) for the direct object of the verb; for the end of motion (to, into).

These are the important cases to learn now. There is a fifth case in Greek, the **vocative** ($\kappa\lambda\eta\tau\iota\kappa\dot{\eta}$), the case of direct address (for calling people or addressing them).

We are fortunate that Greek reached such an advanced stage of development and had dropped some of its original cases by the time it became a literary language. Indo-European, the parent of Greek and of English (and the other Germanic languages), as well as of Latin (and the Romance languages), and of the Indo-Iranian, Slavic, Armenian, Albanian, and Celtic languages, had more than these five. This parent had at least eight cases: Nominative, Genitive, Dative, Accusative, Ablative (for separation), Instrumental (for means by which), Locative (for place where), and Vocative.

In Greek, the genitive and ablative became melded into one form, and the dative, instrumental, and locative uses all drifted into one form (the dative). Old English had an elaborate case system too, but modern English has lost the case endings for all its adjectives and nouns, except for the genitive or possessive endings of nouns, -'s, -s' (we do have a plural of nouns, but that is not a case).

There are three **genders** (γένη) in Greek:

Masculine (m.), ἀρσενικόν

Feminine (f.), θηλυκόν

Neuter (n.), οὐδέτερον, neither

In English we do not have grammatical gender: if we know or believe (or wish to say) that a person or animal or thing (such as a ship, machine, or hurricane) is male or female, we use he or she (respectively); all other things are it. Greek and many other languages have grammatical gender: a noun is masculine, feminine, or neuter (and must have its article and adjective in agreement with that gender), sometimes quite regardless of its sex or lack thereof. For persons, grammatical gender usually follows natural gender; but things (things which we do not think of as having gender) are often either masculine or feminine grammatically, and sometimes people are neuter, grammatically (e.g., diminutives such as $\pi \alpha 1\delta 100$).

There are three grammatical **numbers** (ἀριθμοί) in Greek:

Singular, ἑνικός, for one

Dual, δυϊκός, for two

Plural, πληθυντικός, for more than two

We need not worry about the dual in Greek because it had grown obsolete by classical times and was used mainly for such natural pairs as hands and feet, or a yoke of oxen. Usually in Greek the plural is used for more than one.

Since **adjectives** have the same properties as nouns in Greek (i.e., they undergo changes in form to indicate case, gender, and number), they are considered to belong to the same part of speech as the noun (ὄνομα). Furthermore, any adjective in Greek can be used as a noun when the article is put before it. In English we say that an adjective modifies a noun (or better, that it gives an attribute of a noun). The adjective does not really change the meaning of the noun, but rather offers a subclass: *good people* are none the less *people* for their goodness, but they are a *part* of the class of *people*. In Greek if we want to say *the good people*, we can actually leave out the word for *people* because the gender of the article and adjective tells us that we mean *people* as opposed to neuter things: οἱ ἀγαθοὶ ἄνθρωποι *the good people*, or simply οἱ ἀγαθοὶ *the good*, with *people* understood from the gender. The masculine plural is used generically for human beings in general. If we want to narrow this down to *good women*, we change the gender of the article and adjective to feminine, αἱ ἀγαθοί.

A **pronoun** (ἀντωνυμία) is a word used instead of a noun: it has no meaning of its own, but is used when we choose not to name, or not to repeat the name of, whatever we are speaking or writing about. The reader is expected to know what the noun is to which the pronoun refers. Pronouns in Greek undergo declension with respect to case, number, and gender.

The **article** (τὸ ἄρθρον) we recognize (in English grammar) as belonging to the same class as adjectives. In Greek (ὁ, ἡ, τό) and in English (*the*), it is really

a demonstrative (cf. *this, that*): in both languages the article is etymologically related to the demonstrative. The definite article is used when we want to refer to a particular (definite) member or members of a class. Greek has no indefinite article (*a, an*), which we use in English to indicate that we do not mean a particular member of a class. In Greek the noun by itself suffices.

A **verb** ($\hat{\rho}\hat{\eta}\mu\alpha$) in Greek is a word showing the following properties: tense, voice, mood, person, and number. The Greek verb has many forms to express these properties. In English too we can express them all, not through changes in the form of the verb, but through auxiliary verbs and compound tenses.

The **tense** in Greek tells us two things: time and aspect. **Time** tells us whether the action or state expressed by the verb is past, present, or future. **Aspect** tells us the relationship of the action or state to the passage of time: is it going on, momentary, or complete?

Greek has seven tenses of the indicative mood: present, imperfect, future, aorist, perfect, pluperfect, and future perfect, which we can chart according to their aspect and time:

	Time			
Aspect	Present	Past	Future	
Durative Momentary	Present	Imperfect Aorist	Future	
Completed	Perfect	Pluperfect	Future Perfect	

Voice tells us the relationship of the subject to the action, whether the subject acts or is acted upon. The Greek verb has three voices: **active**, **middle**, and **passive**. (It will probably occur to you that the Greek verb has more than its share of everything.)

Active voice: the subject performs the action (*I stop the car*).

Passive voice: the subject receives (suffers) the action (*I am stopped*).

Middle voice: the subject is both the doer and the receiver of the action (*I stop myself*, *I cease*). It can be reflexive: the subject does something directly to himself, but usually it is more subtle; the subject does something for herself/himself or for something belonging to him/her (thus the middle voice can have an object). The middle voice implies that the subject is more directly (or more deliberately) involved in the activity.

The **moods**, or modes, (ἐγκλίσεις) tell us the manner of the action. Greek has four moods: Indicative, Imperative, Subjunctive, and Optative, besides the Infinitive (a verbal noun) and Participle (a verbal adjective).

The **Indicative** is, generally speaking, used to state a fact, the **Imperative** to give an order. The other two moods are less distinct. The **Subjunctive** was originally used for futurity, and many of its relationships have to do with the future: for exhortations, prohibitions, purpose, after verbs of fearing, in conditions (both future and general). The **Optative** is used for wishes and

possibilities and in the same types of clauses as the subjunctive. Which is used depends on the tense of the main verb.

Person and **Number:** the Greek verb changes its form to express the subject of the action. First, second, or third person, singular or plural (*I*, *you*, *he/she/it*; *we*, *you*, *they*) are expressed by the ending, and the pronoun can be omitted unless special emphasis is needed. Greek also has a dual form for the second (*you two*) and third (*the two of them*) persons.

Infinitives are formed from the various verb stems, but are not inflected. They are verbal nouns and share the characteristics of both nouns and verbs: as nouns they can be used with the article $(\tau \acute{o})$ in different cases and they can be subjects or objects; as verbs they have tense and voice and can take objects. Infinitives are fairly common in English, with or without to.

The **Participle** (μετοχή) shares the characteristics of verb and adjective: it was considered a separate part of speech by the Greek grammarians. The Greek language is φιλομέτοχος (fond of participles). Their uses are numerous, though not very difficult, once the concept is grasped that the same word can be two parts of speech. The participles are formed from the different tense stems of the verb and they are declined (according to case, gender, and number) because they are adjectives.

The possible forms of a (full) verb:

Present	Imperfect	Future	Aorist	Perfect	Pluperfect	Fut. perf.
Indic.	Indic.	Indic.	Indic.	Indic.	Indic.	Indic.
Subj.			Subj.	Subj.		
Opt.		Opt.	Opt.	Opt.		(Opt.)
Imper.			Imper.	Imper.		
Infin.		Infin.	Infin.	Infin.		(Infin.)
Partic.		Partic.	Partic.	Partic.		(Partic.)

All tenses and moods have the active voice, although the future perfect is very rare. The middle and passive voices are combined into one form (middle-passive, m.-p.) for the present, imperfect, and the perfect tenses. Aorist and future have separate forms for the passive and middle. (See Appendix I for a complete verb.)

Definition of principal parts

Every verb has **principal parts** which show what type of verb it is (active, deponent, thematic, etc.); the changes in stem for different forms; what kind of future, aorist, perfect it has; and whether it has all the possible tenses and voices.

The other parts of speech present no difficulties: an **adverb** (ἐπίρρημα) indicates an attribute (such as time, manner, degree, place) of a verb, adjective, another adverb, or may affect a whole sentence; a **conjunction** (σύνδεσμος) is used to join; a **preposition** (πρόθεσις) is used with a noun case to further define the use of the case. **Interjections** are outside the grammatical structure of the sentence. None of these elements is inflected even in Greek.

Reading Signs

Photo by L. J. Luschnig.

This is a typical Greek street sign. $O\Delta O\Sigma$ ($\delta\delta\delta\varsigma$ in classical Greek) means *road* or *way*. In English we have many derivatives, for example, odometer, exodus, method, period, cathode, anode, synod, episode, parodos (side entrance), electrode. In Greece you will see others, such as $EI\Sigma O\Delta O\Sigma$ (entrance), ANO $\Delta O\Sigma$ (ascent). In Greek cities, towns, and villages, an open central square is called a Plateia, which comes from $\pi\lambda\alpha\tau\epsilon\hat{\imath}\alpha$ $\delta\delta\delta\varsigma$ (wide way). From this English derives piazza (from Italian), plaza (from Spanish), and place (from French).

On the sign above, from the modern town of Delphi, the Street of the Philhellenes is named. Philhellenism, admiration for classical Greek culture, was a 19th-century movement in Britain and America that supported the Greek struggle for independence from the Ottoman Empire. Closer to home, survivals of the Philhellenic fashion are seen in the Greek letters of college fraternities and sororities.

LESSON I

Verbs and Nouns

In this lesson you will learn the present tense of verbs (the first principal part), the declensions of the article and nouns, important vocabulary, and how to read simple sentences. Most important, you will expand your understanding of the concepts of grammatical voice (the relation of subjects to verbs) and case (the relation of nouns to other words in a sentence). Learn these and the rest of Greek will be easier.

PRESENT INDICATIVE ACTIVE AND MIDDLE-PASSIVE OF -ω VERBS: THE FIRST PRINCIPAL PART

Characteristics of Verbs: Definitions, Forms

A **verb** shows person, number, tense, voice, and mood. The endings show the subject, that is, they include person and number: I/we; you; he, she, it/they. The stems and endings show tense and voice. In this lesson we will treat the present active and middle-passive.

In Greek there are two types, or **conjugations**, of verbs: (1) - ω verbs (or **thematic** verbs) and (2) - μ 1 verbs (**non-thematic** or **athematic**). The - ω verbs are characterized by the **thematic vowel** o/ ε (that is, o or ε), which connects the endings to the stem; the - μ 1 verbs on the other hand lack the thematic vowel (in certain tenses, as will be explained later).

There are three **voices** in Greek: active, middle, and passive. *Voice* indicates the relation of the subject to the action. In the active voice, the subject performs the action; in the passive voice, the subject suffers or experiences the action (is acted upon); in the middle voice, the subject acts upon himself (the reflexive use of the middle), or she acts for herself or in her interest, or on something belonging to herself: the subject is intimately involved in the action of the verb.

Uses of the Voices: Examples

1. The Greek verb form $\pi\alpha \acute{\nu}\omega$ (active voice, first person singular, present indicative) means I stop, in the sense of I bring to a stop (i.e., I bring someone or something to a stop). In the passive sense $\pi\alpha \acute{\nu}\omega \omega \omega$ (a form which is middle or passive, first person singular, present indicative), means I am stopped; in the middle sense, $\pi\alpha \acute{\nu}\omega \omega \omega$ means I stop myself or I come to a stop. The difference between the middle and passive is that the middle implies that I stop of

my own free will, the passive that I am forced to stop by someone or something outside myself. The active form is transitive (that is, it takes an object: *I stop* someone or something other than myself). In this example the middle is intransitive (since it is used reflexively).

- 2. π είθω *I persuade* (the active voice); π είθομαι in the middle voice means *I persuade myself*, and in the passive *I am persuaded*. From this, the middle and passive come to mean *I trust in*, *believe*, or *obey*.
- 3. Often the middle voice means to have something done for oneself. For example, $\pi\alpha$ 18εύω means I educate; $\pi\alpha$ 18εύομαι (as middle), I have (someone) educated or trained: for instance, the parents have (are having) their children educated in the best institutions. In this example, the middle voice is transitive, that is, it takes an object; and there is no implication that the parents are actually doing the teaching, but rather that they are having it done (i.e., are sending their children to the best teachers or schools).

λύω means *I release*; λύομαι (the middle form), *I have* (someone) *released* (by ransom); it can also mean *I release* something of my own. These uses of the middle are not reflexive and may take objects.

4. Other examples:

- 1. γράφω *I write*; γράφομαι *I write for myself*, i.e., I write something down for my own use (e.g., of taking notes).
- πέμπω I send; πέμπομαι I send for.
- 3. φέρω I bear or carry; φέρομαι I carry or bring (with me for my own use).
- 4. ἄρχω *I make a beginning*; the middle voice, ἄρχομαι, is used where personal action is emphasized.
- 5. βουλεύω I plan; βουλεύομαι I take counsel with myself, make plans for myself.

Note

Although in some of these examples the meaning of the verb appears to change significantly from the active to the middle or passive, a close look will show that these changes are only logical progressions caused by the differences in the uses of the voices. It is always possible to translate the word literally when you are unsure of the exact meaning, and then, as the context becomes clearer, to substitute a more suitable word in the translation. On the other hand, in some of the examples given above, the translations of the active and middle will be identical. Differences in meaning will be clear in the Greek but will be lost in the translation into English. This is but one of the many subtleties of the Greek language which make it difficult to translate adequately, but worth the effort of reading and understanding.

The same forms are used for middle and passive in the present system (which includes present and imperfect) and in the perfect system (perfect and pluperfect), but the meaning will usually be clear from the context. Just as in English, if you take the word *sets* by itself, you cannot tell whether it is a noun or a verb, but in a sentence its meaning will usually be clear; in the same way, παύομαι in isolation may mean either *I stop (myself)* or *I am stopped*, but in a sentence the surrounding words will tell you which is meant.

Tenses

The Greek verb has seven **tenses**, divided into **primary** and **secondary** tenses. The primary tenses are present, future, perfect, and future perfect; the secondary tenses, aorist, imperfect, and pluperfect.

The present tense is used for action going on in the present time. The Greek present tense can be translated by any of the three English present tenses: $\lambda \dot{\omega}$ may mean *I am freeing*, *I do free*, or *I free*; $\lambda \dot{\omega} \dot{\omega} \dot{\omega}$; are you freeing?, do you free?

Formation of Present Indicative and Infinitive

Formation: present stem + thematic vowel + primary endings

	Endings	with thematic vowel	
Active	Sg.	Middle-Passive	
-ω	1st	-ο -μαι	I
-εις	2nd	-ει/-ῃ [< -ε-σαι]	уои
-ει	3rd	-ε -ται	he/she/it
	Pl.		
-ο -μεν	1st	-ο -μεθα	we
-ε -τε	2nd	-ε -σθε	уои
-ουσι(ν)	3rd	-ο -νται	they
			-
-ειν	Inf.	-ε -σθαι	to

Notes

- 1. Note that the thematic vowel is absorbed in the long endings, $-\omega$, $-\epsilon\iota\varsigma$, $-\epsilon\iota$, $-o\upsilon\sigma\iota$. Otherwise it can be seen quite clearly as an element used to join the endings to the stem.
- 2. It is a characteristic of the Greek language that - σ between two vowels tends to drop out. In the second person singular of the middle-passive the ending was originally - $\sigma\alpha\iota$, but the - σ comes between the - $\alpha\iota$ of the ending and the thematic vowel, so it drops out; the resulting - ε - $\alpha\iota$ contracts to - $\varepsilon\iota$, for which the alternative form - η is also found.
- 3. $-ov\sigma(v)$: the movable v. Certain forms ending in vowels add v if the word following begins with a vowel, or if the form ends a sentence. This is true of words ending in $-\sigma(v)$ (whether nouns or verbs) and third person singular forms ending in $-\varepsilon(v)$. Compare the v-movable to the indefinite article: a confrontation, an ultimatum.

Example: λύω in the Present Indicative and Infinitive: Present Stem, λυ-

	Active		Middle-Passive
Sg.	λύω	1st	λύομαι
-	λύεις	2nd	λύει or λύη
	λύει	3rd	λύεται

	Active		Middle-Passive
Pl.	λύομεν	1st	λυόμεθα
	λύετε	2nd	λύεσθε
	λύουσι(ν)	3rd	λύονται
Infinitive	λύειν		λύεσθαι

Accent

The accent of verbs is recessive. This means that the accent goes as far back as the length of the ultima permits. If the ultima is long, the accent will be an acute on the penult; if the ultima is short, the accent will go back to the antepenult, if there is one. The few exceptions to this rule will be noted as they come up.

Deponent Verbs

Many verbs in Greek lack active forms for some or all of their tenses. If a verb has no active forms, it is called **deponent**; if it lacks the active in only some of its tenses, it is called **semi-deponent**. Such verbs are easily recognized because they will show principal parts in the middle-passive ending $(-\omega)$ rather than in the active ending $(-\omega)$. Although deponent verbs are middle and passive in form, they are translated as active.

Vocabulary

In the following vocabulary list, the first principal part is given for each verb. This is the first person singular present active indicative, or the first person singular present middle-passive indicative, if the verb is deponent.

The present stem of the verb is found by removing the first person ending, -ω or -ομαι. Examples: λύω: stem, λυ-; λείπω: stem, λειπ-; ἔρχομαι: stem, ἐρχ-; γίγνομαι: stem, γιγν-.

In the list below, find the present stem of each verb.

Vocabulary Notes

- 1. ἄρχω means be first, whether of time (begin, make a beginning) or of place or station (govern, rule). The word ἄρχων, the present participle of ἄρχω, is used in the masculine as a noun to mean ruler, commander, archon, and is the title of the top administrative magistrates in ancient Athens and many other city-states.
- 2. **βούλομαι** and βουλεύω are related. From βούλομαι (wish) comes the noun βουλή, which means (1) will, determination, and (2) the Council or Senate of Athens, referring to the Council of Five Hundred, established by Cleisthenes in 507 B.C.E. From the noun βουλή is derived the verb βουλεύω, take counsel, deliberate, be a member of the βουλή.

- 3. **βούλομαι** and ἐθέλω both mean wish, but βούλομαι implies choice or preference (εἰ βούλει, . . . if you please, if you like), and ἐθέλω is used of consent rather than desire: εἰ βούλει, ἐγὼ ἐθέλω: if you want to, I am willing to go along (εἰ if, ἐγώ I).
- 4. **νομίζω** is derived from the noun νόμος meaning *usage*, *custom*, *law*. The original meaning of νομίζω is *use customarily*, as in the expression νομίζειν γλῶσσαν, *to have a language in common use*; but it has the secondary meaning of *own*, *acknowledge*, *believe*, as in νομίζειν θεοὺς εἶναι, *to believe that the gods exist*.
- 5. Verbs ending in -ιζω and -ενω are called **denominatives**, that is, they are derived from nouns: νομίζω from νόμος, βουλεύω from βουλή. παιδεύω, derived from $\pi\alpha \hat{\imath}\varsigma$ (child), means bring up, rear a child; π ιστεύω, from π ίστις (trust, faith), means put faith in.

Learning by Rote

Sit down with your textbook and go over the new forms a few times; write them down from memory. This is a good start, but only a start. Later in the day, say them over to yourself, sing them in the shower (paying attention to the pitch accents), mutter them at breakfast, mumble them in rhythm as you walk along, count them over as you fall asleep (you may even begin to dream in Greek, a good sign). Make them a part of your memory, and you will never forget them. Learning a new language necessitates taxing your memory to the utmost, because you cannot know the language in the abstract. You must know its forms and structure (i.e., grammar) and its vocabulary.

Exercise A

1. Fill in the correct accents.

1. ἀγομαι	7. γραφει	12. λεγεται	17. παιδευειν
2. ἀρχεσθαι	8. έθελομεν	13. λειπουσι	18. παυει
3. βουλευεις	9. ἐρχεσθαι	14. λυονται	19. πειθεσθαι
4. ἀγομεθα	10. ἐχομεν	15. μενειν	20. πεμπομεθα
5. βουλεται	11. κρινετε	16. νομιζω	21. πιστευομεν
6. γιγνονται			

2. Conjugate (i.e., write out all the forms you have learned so far, in the order given; including infinitives) in the pres. act. (where it exists) and m.-p.

1. ἄγω	4. ἔρχομαι	7. ἔχω	9. παύω
2. βούλομαι	5. γράφω	8. φέρω	10. πέμπω
3. γίγνομαι	6. λείπω		

- **3.** a. Parse the following (i.e., identify them grammatically) and then translate them. (e.g., πέμπεσθαι: pres. m.-p. inf. of πέμπω; meaning to send for, to be sent; ἄγετε: pres. act. ind., 2nd pers. pl. of ἄγω; meaning you lead, are leading.)
- b. Change 1–10 to the opposite voice, if it exists (act. to m.-p.; m.-p. to active). Deponents have no active; $\dot{\epsilon}\theta\dot{\epsilon}\lambda\omega$ has no m.-p.
- c. Change 11–20 to the opposite number (sg. to pl.; pl. to sg.). (An infinitive has no person or number.)

1.	φέρεσθαι	16. πιστεύεις	
2.	ἀρχόμεθα	17. παυόμεθα	
3.	βούλει	18. μένει	
4.	ἐθέλεις;	19. λείπεται	
5.	πέμπομεν	20. ἔχειν	
6.	ἄγομεν;	21. φέρεις καὶ ἄγεις.

14.	λύειν	29. βούλει λύεσθαι;	
15.	λέγεσθαι	30. βούλομαι ἄρχειν. ἐθέλεις ἄρχεσθ	αι;

- **4.** Translate the following into Greek verb forms. (It may help to decide what voice, person, number, and verb to use. For example: *They are being sent:* they = 3rd pers. pl.; are being = pass.; sent = π έμ π ω > π έμ π ονται.)
 - we are being taught
 she trusts (persuades herself)
 we are being led
 you (sg.) begin
 we are ruled
 do you wish?
 you (sg.) become

- 38. He is willing both to rule and to be ruled.
- 39. Do you (pl.) wish to plan (make plans for yourselves) or to judge?
- 40. I both wish and consent to obey.

ἔργον δ' οὐδὲν ὄνειδος. No shame in work.

NOUNS OF THE FIRST (-η) AND SECOND (-0) DECLENSIONS; ARTICLE

Characteristics of Nouns

Number tells how many: one (singular) or more than one (plural). There is one set of endings for singular and another for plural. Besides the singular and plural, Greek has a third number, the dual, for two persons or things. You will not be burdened with learning the dual at this time, since it was archaic in the classical period and is not very common even in the earliest Greek literature. By the classical age, the dual was used mainly for certain obvious pairs, such as feet, hands, a team of oxen.

There are three **genders** in Greek: masculine, feminine, and neuter. All nouns have gender, either natural gender or purely grammatical gender. Usually nouns for males are masculine, those for females feminine: \dot{o} $\dot{\alpha}v\dot{\eta}\rho$ *the man*, $\dot{\eta}$ $\gamma vv\dot{\eta}$ *the woman*. But the names of things are very often masculine or feminine and nouns for people are sometimes neuter: e.g., all diminutive nouns in -10v are neuter, as $\tau\dot{o}$ $\pi\alpha\iota\dot{\delta}iov$ *little child*. The gender of every noun must be learned. Each noun in the vocabulary is accompanied by a form of the article (in the nominative) that tells you what gender it is: \dot{o} (m.), $\dot{\eta}$ (f.), $\tau\dot{o}$ (n.).

The **case** tells the relationship of a noun or pronoun to the other words in the sentence. There are five cases in Greek: nominative, genitive, dative, accusative, and vocative. The **nominative** is the case of the subject and of the predicate nominative (used with copulative verbs such as *be*, *become*). The **genitive** is the case of possession, denoting the relationship expressed by the preposition *of*, or by -'s, -s' in English. The **dative** is the case of the indirect object or the person interested, expressed in English by *to* or *for*. The **accusative** is the case of the direct object. The **vocative** is the case of direct address.

There are other meanings for the genitive, dative, and accusative cases besides the basic ones given above. As was mentioned in the Introduction, there were three other cases in the Proto-Indo-European language from which Greek was developed: the ablative, the instrumental, and the locative. (In Latin, the ablative assumed the meanings of the instrumental and locative.) In Greek, the genitive took over the meaning of separation (*from*) of the old ablative case, and the dative has the meanings of the instrumental (*by*, *with*) and of the locative (*in*, *on*, *at*). The accusative expresses the meaning of the end of motion (called the terminal accusative: the place, thing, or person motion is directed toward). These relationships in English are, for the most part, expressed by the use of prepositions.

It is impossible to have a separate case for every possible relationship a noun can have in a sentence. Finnish has sixteen cases and even that is not enough. In Greek, there are a number of prepositions that further define how the cases are used. Some of these prepositions are used with one case only, as $\dot{\epsilon}v$ in, which is used only with the dative case (the locative dative, the case for place at which); or $\dot{\epsilon}\dot{\epsilon}c$ into, to, used only with the accusative case (the terminal accusative, the case for place to which). Other prepositions are used with more than one case, and the word we use to translate them depends on which case follows. One such preposition is $\pi\alpha\rho\dot{\alpha}$ alongside of (at the side of, near). With the genitive, $\pi\alpha\rho\dot{\alpha}$ means from beside, from the side of, or simply from: this is the genitive of separation. With the dative, $\pi\alpha\rho\dot{\alpha}$ means at the side of, with, beside, near: this is the locative dative. With the accusative, $\pi\alpha\rho\dot{\alpha}$ may be translated to the side of, to: the terminal accusative. It is important to remember that the meaning of the case is generally retained when a preposition is used with it. As we go along the cases and their special uses will be treated in more detail.

It is important to become familiar with the case endings and with their uses, for it is only the cases that tell you what part a noun plays in a sentence. Greek, as an inflected language, is not bound by the place system of syntax as English is. The use of a word is not dependent on the order in which it appears in the sentence, but on its form.

Noun Endings

There are three declensions of nouns in Greek. **First declension**, or η/α nouns, are so called because $-\eta$ or $-\alpha$ is characteristic of their declension; the $-\eta$ type will be introduced in this lesson, the $-\alpha$ type in Lesson III. **Second declension**, or -0- type nouns, characterized by the vowel -0-, are divided into two types, -0ζ and -0v. The **third declension** will be introduced in Lesson V.

	First, –η type Sg. Pl.		Secon	Second, –ος type		Second, –ov type	
	Sg.	Pl.	Sg.	Pl.	Sg.	Pl.	
N	-η	-αι	-05	-01	-ov	-α	
G	-ης	$-\hat{\omega}v$	-ov	-ων	-ου	-ων	
	-ŋ	-αις	-ώ	-015	-φ	-οις	
A	-η -ην	-āς	-ov	-ους	-ov	-α	
V			- 8				

The vocative will be given separately only when it differs from the nominative.

The Definite Article

Corresponding to the English definite article, *the*, is \dot{o} , $\dot{\eta}$, $\tau \dot{o}$ in Greek. Like any other adjective, the article is declined: it has singular and plural, all three genders, and all the cases (except the vocative). Its endings are similar to those of the - η - and -o- declensions, though not identical with them. It should be learned thoroughly, the sooner the better.

Remarks on the Article

Notice that the forms of the nominative masculine and feminine, both singular and plural (\dot{o} , $\dot{\eta}$, oi, $\alpha \dot{i}$), the forms without τ , have no accent. They are proclitics, that is, they lean on the word following them for their accent.

Uses of the Article

- 1. In general, the definite article corresponds to English *the*, but is used in some instances where English would omit it.
- 2. Often proper names are accompanied by the article, e.g., ὁ Πλάτων (Plato).
- 3. Abstract nouns may be used with or without the article: $\dot{\eta}$ året $\dot{\eta}$ or året $\dot{\eta}$ (excellence).
- 4. Demonstrative adjectives are always used with the article in prose: οὖτος ὁ ἀνήρ (this man). [III]
- 5. The definite article is used with a noun in a generic sense, when a person or thing represents a class, ὁ ἄνθρωπος (man, in general), οἱ ἄνθρωποι (mankind, people).
- 6. The article can also be used as a possessive, to indicate that a thing belongs to someone mentioned in the sentence: that is, it may sometimes be translated as *my*, *your*, *his/her/its*, *their*, etc.
- 7. Greek has no indefinite article equivalent to our a/an. However, $\tau\iota\varsigma$, $\tau\iota$ (the indefinite pronoun) is sometimes used in a way similar to the indefinite article.

Nouns declined with the article

To find the base of a noun, remove the genitive singular ending. For this reason, the genitive is always given with a new noun in the vocabulary.

1. Nouns of the first declension [-η type]

All nouns of this type are feminine. The examples are chosen to show the different accents.

Formation: to the base of the noun, add -η type endings

	ἡ δίκη <i>justic</i>	re	ή ἀρετή excell	ή ἀρετή excellence		
	Sg.	Pl.	Sg.	Pl.		
N	ή δίκη	αί δίκαι	ἡ ἀρετή	αἱ ἀρεταί		
G	τῆς δίκης	τῶν δικῶν	τῆς ἀρετῆς	τῶν ἀρετῶν		
D	τῆ δίκη	ταῖς δίκαις	τῆ ἀρετῆ	ταῖς ἀρεταῖς		
A	τὴν δίκην	τὰς δίκας	τὴν ἀρετήν	τὰς ἀρετάς		

2. Nouns of the second declension ($-o\varsigma$ and -ov types)

The examples below show the different accents and genders.

Examples: -oς type

Formation: to the base of the noun, add -oç type endings

		ὁ λόγος word	ἡ ὁδός road	ὁ πλοῦτος wealth	ὁ/ἡ ἄνθρωπος human being
Sg.	N	ὁ λόγος	ἡ ὁδός	ό πλοῦτος	ὁ ἄνθρωπος
	G	τοῦ λόγου	τῆς ὁδοῦ	τοῦ πλούτου	τοῦ ἀνθρώπου
	D	τῷ λόγῳ	τῆ ὁδῷ	τῷ πλούτῳ	τῷ ἀνθρώπῳ
	A	τὸν λόγον	τὴν ὁδόν	τὸν πλοῦτον	τὸν ἄνθρωπον
	V	λόγε	òδέ	πλοῦτε	ἄνθρωπε
Pl.	N	οί λόγοι	αἱ ὁδοί	οί πλοῦτοι	οἱ ἄνθρωποι
	G	τῶν λόγων	τῶν ὁδῶν	τῶν πλούτων	τῶν ἀνθρώπων
	D	τοῖς λόγοις	ταῖς ὁδοῖς	τοῖς πλούτοις	τοῖς ἀνθρώποις
	A	τοὺς λόγους	τὰς ὁδούς	τοὺς πλούτους	τοὺς ἀνθρώπους

Examples: -ov type

Formation: to the base of the noun, add -ov type endings

	τὸ ἔργον deed	đ	τὸ δῶρον gift	•
	Sg.	Pl.	Sg.	Pl.
N	τὸ ἔργον	τὰ ἔργα	τὸ δῶρον	τὰ δῶρα
G	τοῦ ἔργου	τῶν ἔργων	τοῦ δώρου	τῶν δώρων
D	τῷ ἔργῳ	τοῖς ἔργοις	τῷ δώρῳ	τοῖς δώροις
A	τὸ ἔργον	τὰ ἔργα	τὸ δῶρον	τὰ δῶρα

Remarks on the endings

Be sure to learn the 1-subscript of the dative singular endings, - η and - ϕ : the forms are not correct without it. -1- is characteristic of the dative case: - η , - ϕ , -015, - α 15.

The endings for the $-o\zeta$ type and the -ov type are the same except for the nominative singular and the nominative and accusative plural.

Neuters always have the same ending in the nominative and accusative.

The numerous examples given above have been chosen to illustrate the accentuation of nouns; the endings are the same within each type, and should be your primary concern at this point.

Noun Accents

The accent of nouns is persistent, that is, it regularly stays on the syllable on which it starts, unless forced to move. You can learn where it starts by observation and by repeating new words to yourself.

An exception to this rule is that nouns of the *first* declension have the circumflex on the ultima in the genitive plural (regardless of where the accent falls in the other forms). Historically the $-\hat{\omega}v$ ending is the result of a contraction from $-\hat{\alpha}\omega v$ or $-\hat{\varepsilon}\omega v$ to $-\hat{\omega}v$.

Some Accent Rules

Using the nouns declined above as examples, study these rules:

- 1. The accent of nouns is persistent, and will stay where it starts. In the word δίκη the accent is on the penult, which is short, and remains there, except in the genitive plural (see above). Study δίκη, λόγος, and ἔργον.
- 2. In the first and second declensions, if the accent falls on the ultima, the circumflex is used in the genitive and dative, singular and plural. In the word $\dot{\alpha} \rho \epsilon \tau \dot{\eta}$, the accent is on the ultima and remains there throughout the declension. In the genitive and dative cases, however, the accent changes from the acute to the circumflex. Study the examples $\dot{\alpha} \rho \epsilon \tau \dot{\eta}$ and $\dot{\delta} \delta \dot{\varsigma}$.
- 3. a. If the penult is long and accented, and the ultima is short, then the accent on the penult must be the circumflex. In the words $\pi\lambda$ 0 $\hat{\nu}$ 00 and $\delta\hat{\omega}$ 00, the accent is on the penult. In these two words, the penult is long. Remember that the endings - α 1 and -01 are short for the purpose of accentuation. What is the length of the - α in the neuter plural, long or short? Study the declensions of $\pi\lambda$ 0 $\hat{\nu}$ 100 and $\delta\hat{\omega}$ 200.
- b. The circumflex can fall on the penult only if the ultima is short. If the ending is long (as are -ov, - ω , -ov ζ , the accent changes from the circumflex to the acute.
- 4. An accent can go as far back as the antepenult only if the ultima is short. In the declension of $\mathring{\alpha}\nu\theta\rho\omega\pi\sigma\varsigma$, you will notice that the accent shifts from the antepenult to the penult. The accent is forced to move by the length of the ul-

tima. If the ultima is long, the furthest back an accent can go is the penult: thus ἄνθρωπος, ἄνθρωποι, but ἀνθρώπω, ἀνθρώπου.

5. The grave accent is used when a word, accented with the acute on the ultima, is followed immediately by another word, without any intervening punctuation mark, e.g., τὸν ἄνθρωπον; ὁ λόγος καὶ τὸ ἔργον.

Vocabulary

You can recognize nouns in the vocabulary because they are given in the following way: nominative singular, genitive singular, article (in the nominative singular): e.g., ἄνθρωπος, ἀνθρώπου, ὁ/ἡ human being. The article given with each noun tells what gender it is. It is not always possible to determine the gender from the nominative form (e.g., ὁδός, feminine). Try not to think of declensions as having gender. As you will learn in Lesson III, there is a class of nouns of the first declension that is masculine; and, as you already know, a few nouns of the second declension are feminine. Therefore it is a good idea to get in the habit of learning the article with each new noun. The genitive should be learned as well, because the base of a noun is usually found from the genitive singular. As you will see [V], the base is not always clear from the nominative. The nominative and genitive together show you what paradigm (pattern) the noun will follow. Always learn the accent of a noun (by saying it aloud) when you study it, and notice what changes (if any) in accent take place from the nominative to the genitive. Some nouns are common gender (e.g., ἄνθρωπος and θεός), that is, they appear as either m. or f.

Particles

Many particles are **postpositive** (postpos.): they cannot come first in a sentence, clause, or phrase and are usually put second. In translation they may seem to begin a sentence, but in Greek they connect a sentence or thought to what comes before it.

γάρ	<i>for</i> , postpos. conjunction. Note that $\gamma \alpha \rho$ is not a preposi-
	tion (the English preposition for is usually expressed in
	Greek by the dative case without a preposition), but a
	causal conjunction, a milder way of saying because.
δέ	and, but, postpos. conjunction
μέν δέ	on the one hand on the other hand (both µév and δέ are
	postpositives and are used to point out that the words
	with which they are associated are being contrasted or
	differentiated, as in a list)

Prepositions

Prepositions are given with their basic meanings, the case(s) they take, special meanings if they take more than one case, and where applicable a selection of idiomatic meanings.

εἰς into, to, + acc.: (terminal acc., place to which)
 ἐν in, on, + dat.: (locative dat., place where)
 παρά alongside, by, near (used of persons) + gen., dat., acc. + gen. from the side of, from beside, from + dat. by the side of, beside, with, near + acc. to the side of, to, along; in addition to, contrary to
 σύν with; along with, by means of (of accompaniment or means) + dat. (older Attic spelling ξύν)

Vocabulary Notes

- 1. ἀρετή (excellence) is a very important word and concept in the Greek language and in the Greek mind. It is the word that comes to mind when we think of the Greek ideal—striving for perfection of the mind and body, and for the fullest development of human capabilities. Naturally the understanding of the word changed over the years. In Homer's heroic world, ἀρετή was martial valor, the quality of the hero, the ideal for which men lived and died. Later it came to have a more political connotation: under the influence of the Sophists, man's highest goal came to be political ἀρετή. Socrates' mission was spiritual perfection (ἀρετή), which he believed could be attained through knowledge of the truth. Ἀρετή became less sexist and more generalized, as is attested in the words of Antisthenes: ἀνδρὸς καὶ γυναικὸς ἡ αὐτὴ ἀρετή, of male and female, the same excellence.
- 2. γνώμη (cf. γιγνώσκω, root γνω-, know), although often defined as meaning opinion, has as its first meaning a means of knowing, and so an organ by which one knows or perceives, and thence intelligence, thought, judgment, opinion. The phrase γνώμην ἔχειν means to understand (to have intelligence rather than to have an opinion). The philosopher Heraclitus (fragment 41) wrote, ἕν τὸ σοφόν ἐπίστασθαι γνώμην (Knowledge is one thing: to know true judgment). Here the meaning of γνώμη is obviously quite different from our use of the word opinion. γνῶμαι are maxims, the opinions of wise men: cf. English gnome (not the garden variety), a short saying which expresses a general truth. To express a general truth (or a habitual action) in a vivid way, the aorist tense is often used in Greek, hence the designation gnomic aorist.
- 3. δ ikη is another word for which the usual translation (in this instance *justice*) is somewhat misleading. The first meaning of δίκη is *custom* or *usage*, that is, *the normal rule of behavior*. In a technical sense, δίκη refers to a *lawsuit* or *trial* (that is, the proceedings instituted to determine legal rights). In the writings of the Greek tragedians, especially Sophocles, the word δίκη seems to represent a

balance: if this balance is upset, all nature rebels until it is set right. A great crime against nature or society (such as Oedipus' murdering his father and marrying his mother, or Creon's refusal to bury the dead Polyneices, while burying Antigone alive) destroys the balance of δίκη. This in turn brings disaster, sometimes upon the whole city, until the balance is restored.

- 4. λόγος (derived from λέγω): in LSJ one finds six long columns under the entry for λόγος. These have been condensed into the following ten items, to give an idea of the ways this word is used.
 - 1. computation, reckoning, account
 - 2. relation, correspondence, ratio, proportion
 - 3. explanation, plea, case; statement of a theory, argument, thesis, reason, formula, law, rule of conduct
 - 4. debate (internal): reason, abstract reasoning
 - 5. continuous statement, narrative, story, speech
 - 6. verbal expression, opposite to ἔργον; common talk, repute
 - 7. a particular utterance: saying, oracle, proverb
 - 8. the thing spoken of: subject matter (in art, the subject of a painting)
 - 9. expression, speech: intelligent utterance: language
 - 10. the Word or Wisdom of God: in the *New Testament*, λόγος is identified with the person of Christ: ἐν ἀρχῆ ἦν ὁ λόγος.
- 5. ξένος guest-friend: the word ξένος applies to persons or states bound by treaty or ties of hospitality. When applied to a person, it means guest or host (though most commonly guest), i.e., a person giving or receiving hospitality. The people you stay with when you go to another town and who stay with you when they come to yours are your ξένοι. The relationship between guest and host was a sacred one and very important to survival in a land that was divided into many separate political entities. To harm or betray one's guest or host was considered a serious and unholy crime: many tales from Greek legend and folklore are concerned with the guest-host relationship (e.g., the cause of the Trojan War in Paris' theft of his generous host's beautiful wife). The stranger, wanderer, or refugee is also a ξένος and was under the special protection of Ζεύς ξένιος. Any stranger or foreigner, as opposed to a native or citizen, is called ξένος, and one addresses any stranger ὧ ξένε. The word is also used as opposite to φίλος, that is, the ξένος is *not* a member of the family. Thus we have the anomaly of the same word meaning both *friend* and *stranger*.
- 6. $\psi\nu\chi\dot{\eta}$ life or the force of life that escapes from the person at death: from this the word carries the idea of the departed spirit, the shadow or ghost of the person that goes to Hades after death. In Homer, this shadowy realm is described as a place where spirits flit around in a

vague and bleak eternity, clinging to the life they have lost. For Homer the real life of human beings was spent on earth under the sun. But this is not so for many later writers: the ψυχή becomes the more important part, the immaterial and immortal soul, one of the eternal verities. At death it escapes from the pollution of the body and returns to its essence: here we see the division into body and soul (σῶμα καὶ ψυχή). To Plato, the ψυχή is the immaterial principle of life and movement. To him we owe the tripartite division of the soul into λογισμός (reason), θυμός (spirit), and ἐπιθυμία (appetite), in which reason must rule. ψυχή can also mean the conscious self or personality, whence our use of the term psyche.

7. **Diminutives** (e.g., παιδίον from παῖς, child, stem: παιδ-), formed from noun stems by adding -ιον, are all neuter, even when they denote a person. They may be used to express endearment or contempt: πατρίδιον (from πατήρ, father), Daddy, is a term of affection; but the names Σ ωκρατίδιον and Εὐριπίδιον (little Euripides and little Socrates) are used by Aristophanes in ridicule. Many diminutive forms are not diminutive in meaning (e.g., βιβλίον book, πεδίον plain; this is especially true in Modern Greek, where diminutives abound).

Exercise B

1. Decline (i.e., give all the cases, in the order given in the paradigms).

Syntax

Study the following points before doing the translation exercises.

- **1. Instrumental Dative:** Besides being used for the indirect object, and with many prepositions (e.g., $\dot{\epsilon}v$, in; $\pi\alpha\rho\dot{\alpha}$, by the side of) denoting place where (locative), and with the preposition $\sigma\dot{\nu}v$ (with) denoting accompaniment, the dative is also commonly used for means or manner: the instrumental dative.
 - A. Dative of Means

The means by which anything is or is done is in the dative case. (It answers the question: "with what?"):

```
τοὺς θεοὺς πείθομεν δώροις. "We persuade the gods by means of gifts." 
 ὁρῶμεν τοῖς ὀφθαλμοῖς. "We see with our (the) eyes."
```

B. Dative of Manner

The manner in which anything is done is in the dative case. (It answers the question: "How, in what way?"):

τῆ ἐμῆ γνώμη in my opinion δρόμφ on the run σιγῆ in silence

- 2. **Verbs of ruling** such as ἄρχω take the **genitive** case.
- 3. The verb π ιστεύω and the verb π είθω in the middle (π είθομαι) take the **dative** case.
- 4. **A neuter plural subject takes a singular verb:** the neuter plural is thought of collectively. It's like spaghetti: you would never say "spaghetti are."

Elision

In both prose and verse, a final short vowel is often dropped before a word beginning with a vowel. This is called elision; it is marked by the apostrophe. For example:

μὶ' ἐστιν for μία ἐστιν δ' ἔργοις for δὲ ἔργοις

Conjunctions are used to connect words, phrases, clauses, or sentences. They are among the easier parts of speech because they are not declined or conjugated. The only changes they undergo are elision and crasis or combining with the words that follow, for example: κἀγώ crasis for καὶ ἐγώ, χἢ crasis for καὶ ἡ, κοὐκ crasis for καὶ οὐκ. The sign for

crasis looks like the smooth breathing. If you see a word beginning κ '–, it is from $\kappa\alpha$ i combining with another word.

Even conjunctions have their idiomatic uses. Some useful expressions using $\kappa\alpha i$ are:

καὶ τά λοιπά and the rest; abbreviated κτλ. = etc.

καὶ ἐγώ me too!

καὶ δὴ τί but then what? (in questions it raises an objection)

Καί is used for *plus* in numbers and addition (for example, *fifteen* is πεντεκαίδεκα; *one plus two* is $\hat{\epsilon}$ ν καὶ δύο. The only common English word using καί is *triskaidekaphobia*, "the fear of the number thirteen." Καί is still used in modern Greek, pronounced ke.

LESSON II

Verbs, Adjectives, Relative Pronoun

In this lesson you will learn the imperfect tense, how to augment verbs, the verb to be, adjectives, and the relative pronoun. The most important concepts you will learn are agreement, predication, and the definition of a pronoun.

IMPERFECT ACTIVE AND MIDDLE-PASSIVE; εἰμί

The **imperfect** tense is formed from the present stem (found by removing the personal ending from the first principal part) and is therefore said to belong to the present tense system.

The imperfect is a secondary (historical) tense, used for a continuous, habitual, or repeated act in past time (i.e., for action *going on* in the past) as opposed to the **aorist** tense [IV] which is used for a single act in past time (or action simply taking place in the past).

The Augment

Like all secondary tenses (in the indicative), the imperfect receives the **augment** (or increase, at the beginning of the form). The augment was originally an adverbial particle used to indicate past time, but became attached to the verb to mark past tense. The augment occurs in two ways: the syllabic augment (ϵ -) and the temporal augment. The **syllabic** augment adds a syllable to the word; the **temporal** augment lengthens an initial vowel but does not add a syllable. It is called temporal because the vowel takes longer to say.

1. **Syllabic Augment.** Verbs beginning with a consonant simply prefix the syllable ε - to the tense stem:

λύω	stem λυ-	έλυ-	impertect ἔλυον
λείπω	stem λειπ-	έλειπ-	imperfect ἔλειπον
βούλομαι	stem βουλ-	έβουλ-	imperfect ἐβουλόμην

Note: verbs beginning with ρ double the ρ after the augment: ρίπτω (throw) stem ρίπτ-, ἐρριπτ- imperfect ἔρριπτον

2. **Temporal Augment.** Verbs beginning with a vowel or diphthong are usually augmented by lengthening the initial vowel according to the following pattern:

Note

There are several instances in which verbs beginning with a vowel take the syllabic (ϵ -) augment. These will be treated as irregular forms. They occur when an initial consonant, Γ (w-sound), or σ has been lost; and the most common is ϵ augmenting to $\epsilon \iota$ (contraction of $\epsilon + \epsilon$): $\check{\epsilon}\chi\omega$, imperfect, $\epsilon \check{\iota}\chi o \nu$.

Formation and Meaning of Imperfect

Formation: Augment + present stem + thematic vowel + secondary endings.

Endings with Thematic Vowel

Middle-Passix

	Active		Middle-Passive	
Sg.	-0-V	1st	-ο-μην	I
	-ε-ς	2nd	-ου < [-ε-σο]	уои
	-ε-(ν)	3rd	-ε-το	he/she/it
Pl.	-ο-μεν	1st	-ο-μεθα	we
	-ε-τε	2nd	-ε-σθε	уои
	-o-v	3rd	-O-VTO	they

There is no imperfect infinitive.

Example:

λύω in the imperfect active and middle-passive:

	Active		Middle-Passive
Sg.	ἔλυον	1st	έλυόμην
	 ἔλυες	2nd	ἐλύου
	ἔλυε(v)	3rd	έλύετο
Pl.	έλύομεν	1st	ἐλυόμεθ α
	έλύετε	2nd	<i>ἐ</i> λύεσθε
	ἔλυον	3rd	έλύοντο

^{*}These are the most common and you should concentrate on them.

Translation of the imperfect: ἔλυον may be translated in the following ways: *I was freeing, I used to free, I kept on freeing.* (It also sometimes has the meaning *I tried to free.* This is known as the conative imperfect.)

Irregular Imperfect: as noted above, certain verbs augment irregularly. Among these is $\xi \chi \omega$, which has $\epsilon \tilde{\iota} \chi o \nu$ as the imperfect. When a verb deviates from the norm in the imperfect, the form will be given in the vocabulary.

Accent: remember that the accent of verbs is recessive, i.e., it goes back as far as the length of the ultima will permit.

 \rightarrow Explain the accent of εἶχον and ἦγον.

Irregular Verb: εἰμί, Present and Imperfect Indicative

The Greek verb εἰμί, like the English verb *be*, is very irregular. Learn by rote the present and imperfect indicative and the present infinitive of εἰμί.

	Present			Imperf	ect
Sg.	εἰμί	I am	1st	$\tilde{\eta}_V/\tilde{\eta}$	I was
	εἷ	you are	2nd	$\mathring{\eta}\sigma\theta\alpha$	you were
	ἐστί(ν)	he, she, it is; there is	3rd	ήν	he, she, it was; there was
Pl.	ἐσμέν	we are	1st	ἦμεν	we were
	ἐστέ	you are	2nd	ἦτε	you were
	εἰσί(ν)	they are	3rd	ἦσαν	they were
Pres. Inf.	εἶναι	to be			

Accenting Enclitics

The forms of the present indicative of $\varepsilon i \mu i$, except for εi , the second person singular, are *enclitics*; that is, they lean on the preceding word for their accent. Often enclitics are not accented at all, but are pronounced with the preceding word. Under certain circumstances, an enclitic will cause changes in the accent of the preceding word.

Study these rules explaining the accent of enclitics, along with the examples. Remember that the enclitic affects the accent of the word before it. The accent of a word, as you know, can fall no further back than the third syllable from the end of the word: the enclitic, as it were, adds one or more syllables to the end of the word.

a. Two accents will be marked on the word preceding the enclitic if the preceding word has either an acute on the antepenult or a circumflex on the penult. In either case an acute is added to the ultima.

ἄνθρωπός εἰμι ἄνθρωπος: acute on the antepenult δῶρόν ἐστι δῶρον: circumflex on the penult

b. If an enclitic of two syllables follows a word with the acute on the penult, then the enclitic has an accent on the ultima. (But the preceding word remains unchanged.) Under these circumstances, an enclitic of one syllable will not have an accent.

ξένοι εἰσίν but ξένος τις*

*τις is the indefinite pronoun-adjective *some*, *any*; and is enclitic [VIII].

c. An accent on the ultima of the preceding word remains unchanged. That is, an acute does not change to a grave. The enclitic itself does not take an accent in this instance.

θεός ἐστιν θεοί εἰσιν θεῶν τινων θεοῦ τινος

d. In a series of enclitics, the first ones are accented and the last remains unaccented. (In the example, the enclitics are underlined.)

εἴ πού τίς τινα ἴδοι ἐχθρόν

—Thucydides

Since enclitics lean for their accent upon the word that comes before them, they usually do not come first in the sentence. $\xi \sigma \tau \iota$ and a few other enclitics can come first for emphasis, and are accented.

—Aristotle, περὶ ψυχῆς (On the Soul)

ADJECTIVES: -ος, -η, -ον AND -ος, -ον TYPES

1. Adjectives are words used to modify nouns (or, better, to name attributes of nouns). In Greek they must agree grammatically (i.e., in gender, number, and case) with the nouns they modify. The endings of the noun and adjective are not necessarily identical, since the noun and adjective may belong to different declensions. (A declension in itself does not have gender.)

The good man in Greek is ὁ ἀγαθὸς ἄνθρωπος, but *the good road* is ἡ ἀγαθὴ ὁδός, because ὁδός is **feminine**, second declension.

- 2. Although there are several types of adjectives, the most common is the $-o\zeta$, $-\eta$, -ov type (or the second-first declension type: that is, the masculine and neuter forms are declined in the second declension like $\lambda \acute{o} \gamma o \zeta$ and $\acute{e} \rho \gamma o v$, and the feminine is declined in the first declension like $\acute{o} \kappa \eta$). The accent of adjectives is persistent, like that of nouns. The endings are the same as those you have already learned, and will give you an opportunity to review the declensions.
- 3. Endings for the -0ς , $-\eta$, -0v adjectives:

	Singul	ar		Plural	Plural			
	m.	f.	n.	m.	f.	n.		
N	-05	-η	-ov	-01	-αι	-α		
G	-00	-ης	-00	-ων	-ων	-ων		
D	-φ	-ŋ	-ώ	-οις	-αις	-01ς		
A	-ov	-ην	-ov	-ους	-ας	-α		
V	-ε							

Example: καλός, καλή, καλόν good, fine, fair

	Singular m.	•		Plural		
				m.	f.	n.
N	καλός	καλή	καλόν	καλοί καλῶν καλοῖς καλούς	καλαί	καλά
G	καλοῦ	καλῆς	καλοῦ	καλῶν	καλῶν	καλῶν
D	καλῷ	καλῆ	καλῷ	καλοῖς	καλαῖς	καλοῖς
A	καλόν	καλήν	καλόν	καλούς	καλάς	καλά
V	καλέ					

Adjectives will be given in the vocabulary in the three genders: as $\kappa\alpha\lambda\delta\varsigma$, $\kappa\alpha\lambda\delta\gamma$, $\kappa\alpha\lambda\delta\gamma$, and thus will be easily recognizable. Some adjectives, mostly compounds, have only two sets of endings, $-\varsigma\varsigma$ and $-\varsigma$, with $-\varsigma\varsigma$ serving for both masculine and feminine, e.g., $\dot{\alpha}\theta\dot{\alpha}\nu\alpha\tau\varsigma\varsigma$, $\dot{\alpha}\theta\dot{\alpha}\nu\alpha\tau\varsigma\nu$ *immortal*, *deathless*. They are declined in the same way as $\kappa\alpha\lambda\delta\varsigma$, omitting the feminine (-η) endings:

	Singular		Plural	
	m./f.	n.	m./f.	n.
N	ἀθάνατος	ἀθάνατον	άθάνατοι	ἀθάνατα
G	ἀθανάτου	ἀθανάτου	άθανάτων	ἀθανάτων
D	ἀθανάτῳ	ἀθανάτῳ	ἀθανάτοις	άθανάτοις
A	ἀθάνατον	ἀθάνατον	ἀθανάτους	άθάνατα
V	άθάνατε			

Of this same type are ἄλογος, ἄλογον and ἄδικος, ἄδικον.

The Position of Adjectives

There are two possible positions (with certain variations) which the adjective may occupy. These are—simply stated—(1) directly after the article or (2) *not* directly after the article.

The **first position** is called the **attributive** position and is used when the adjective is simply qualifying the noun. The most common order is **article-adjective-noun** (the same as the usual English order):

ό σοφὸς ἄνθρωπος	the wise man
ἡ ἀθάνατος ψυχή	the immortal soul
τὸ καλὸν παιδίον	the good child

But this position can be varied in the following ways: the article and the noun may be followed by a second article:

ὁ ἄνθρωπος ὁ καλός the good man

or the first article may be omitted:

ἄνθρωπος ὁ καλός the good man κατὰ γνώμην τὴν ἐμήν in my opinion

without changing the meaning; only the emphasis is slightly changed. The first arrangement is by far the most common, the most direct and natural. The second is formal, putting the emphasis on the noun, with the attributive being used as a further explanation, almost as an afterthought: *the man*, i.e., *the good one*. The third is common in poetry but less so in prose. The important thing to remember is that the adjective must come directly after the article for it to be in the attributive position.

Other words and phrases that are used in the same way as adjectives are put in the attributive position (any one of the three arrangements). That is, any expression that tells an attribute of a noun, or qualifies its meaning in the same way as an adjective does, goes into the attributive position. Genitives and prepositional phrases are commonly used in this way.

Examples:

Adjectives and Genitive

ἡ ψυχή the soul
 ἡ ἀθάνατος ψυχή the immortal soul
 ἡ τοῦ ἀνθρώπου* ψυχή the soul of man
 τὰ καλὰ παιδία the good children
 τὰ τοῦ ἀνθρώπου παιδία the person's children

*Note that the article τοῦ is used with man (generic article, ὁ ἄνθρωπος, man in general). The dependent genitive usually has the article if the noun on which it depends has it. It is not uncommon to have a series of articles, each agreeing with its own noun:

```
τὰ γὰρ τῆς τῶν πολλῶν ψυχῆς ὅμματα the eyes of the soul of the many
—Plato
```

Adverbs

οἱ τότε ἄνθρωποι the people of that time (the then people)
 οἱ νῦν ἄνθρωποι people of the present day (now people)

τότε and $v\hat{v}v$ are adverbs and are not declined. In these expressions they are used in the same way as adjectives, i.e., they tell *which* people.

Phrases

ό ἐξ ὁδοῦ ἄνθρωπος the man from the street οἱ ἐν ἄστει ἄνθρωποι οἱ ἄνθρωποι οἱ ἐν ἄστει the people in the city

Which people?—the people in the city: considered in the Greek mind as the same type of expression as the good man.

Other examples:

τὸ παρὰ τὸν Ἀλφειὸν ποταμὸν πεδίον the plain by the river Alpheius ὁ ἐν τῆ ἐμῆ ψυχῆ πλοῦτος the wealth in my soul (Xenophon) The **second position** the adjective may occupy (i.e., not directly following the article) is the **predicate** position. A predicate adjective may precede the article or follow the noun and its article.

A whole sentence may be formed, with the verb to be understood:

```
σοφὸς ὁ ἄνθρωπος δοφός the man is wise
```

The forms ἐστί and εἰσί are often omitted, especially in short sentences and proverbial sayings. It is not common to leave out other forms of εἰμί.

Adjectives Used as Nouns

The Noun-Making Power of the Article: attributive adjectives together with the article are often used as nouns.

oi ἀγαθοί means the good (people): the masculine gender of the article and adjective makes it clear that men/people is understood. (Cf. also oi τότε, those of former times, those then, and oi v $\hat{v}v$, people of the present day, those now.)

ή ἀριστή the best woman (the best of women)
ό σοφός the wise man
ἡ σοφή the wise woman
τὰ καλά good things
τὰ κακά evils

Note: in the plural the masculine is used for common gender, as in οἱ σοφοί, the wise. This is called the **generic masculine.** In tragedy even a woman speaking of herself in the plural will use the masculine.

The neuter singular of an adjective (and sometimes the neuter plural) is very commonly used as an abstract noun:

τὸ καλόν the beautiful, beauty τὸ ἄδικον injustice

In the sentence χαλεπὰ τὰ καλά, the verb ἐστί is omitted (neuter plurals take a singular verb), in the short proverbial statement. The article and adjective (τὰ καλά) are used as a noun. Note that although the word order does not tell which of the adjectives is the subject and which the predicate nominative adjective, we can tell that the sentence means *good things are hard*, rather than hard things are good, because the subject is usually accompanied by the article, the predicate rarely so.

An extension of this use of the article with an adjective (omitting the noun) may be seen in the expression $\delta \mu \dot{\epsilon} v \dots \dot{\delta} \delta \dot{\epsilon}$, the one . . . the other, and $\delta \dot{\epsilon} \dot{\epsilon} v \dots \dot{\epsilon} \delta \dot{\epsilon}$, some . . . other women. This

expression can, of course, be used in any gender and any case; so do not be surprised to see $\tau \grave{\alpha} \ \mu \acute{\epsilon} \nu \dots \tau \grave{\alpha} \ \delta \acute{\epsilon}$, some things . . . other things, or $\tau o \hat{\nu} \ \mu \acute{\epsilon} \nu \dots \tau o \hat{\nu}$ $\delta \acute{\epsilon}$, of the one . . . of the other.

In this instance, the article retains an original demonstrative force [III] which has largely been lost in Attic Greek (but is generally still retained in Homer, the earliest Greek literature). Thus, the original force of \dot{o} $\mu \dot{e} \nu \dot{o}$ $\delta \dot{e}$ would have been this (man), on the one hand, this (man), on the other hand (or simply this one . . . that one).

The Articular Infinitive

Under the *Noun-Making Power of the Article* we may include the articular infinitive: the infinitive used as a noun with the article. It can be used in any case, as subject or object, with prepositions, etc., in the neuter singular. It is the equivalent to the gerund in English:

τὸ λυπεῖν	to hurt; hurting
ἕνεκα τοῦ λαβεῖν	for the sake of gain
τὸ μὴ δύνασθαι	not to be able

The negative used with the articular infinitive is $\mu \hat{\eta}$.

The Relative Pronoun

The Greek relative pronoun (corresponding to the English *who, whose, whom; which, that*) is o_{ς} , η , o. The inflection is similar to that of the first and second declensions: see if you can discover where the differences are.

	Singular		Plural				
	m.	f.	n.	m.	f.	n.	English
N	őς	ή	ő	οἵ	αἵ	ά	who, which, that
G	οΰ	ής	οΰ	ών	ών	ών	whose, of whom/which
D	ώ	ή	$\hat{\phi}$	οἷς	αἷς	οἷς	to whom/which
A	őν	ἥν	ő	οὕς	άς	ά	whom, which, that

The relative pronoun introduces a relative clause and refers to a noun or pronoun (called the antecedent) in the main clause. In the sentence

The man to whom you are writing is coming. ὁ ἄνθρωπος ὧ γράφεις ἔρχεται.

the man is the antecedent and (*to*) *whom* is the relative pronoun.

The relative pronoun agrees with its antecedent in number and gender, but its case depends on the part it plays in its own clause. In our example, *the man* is masculine singular, and nominative, since it is the subject of the main clause: ὁ ἄνθρωπος. (*To*) *whom* will therefore be masculine and singular, but in its own clause it is the indirect object, and so is dative: $\mathring{\phi}$.

Be careful not to confuse the forms of the relative with the definite article.

→ Set the relative and the article side by side and list the differences between them, including differences in accent.

A note on the relative pronoun

The antecedent is often omitted, especially when it is indefinite and can be supplied from the context: e.g., ἔχει ἃ βούλεται, he has (those things) that he wants, or he has what he wants. Often the relative pronoun can best be translated by the one who, that which, or some such phrase. Cf. the saying from Hippocrates, χρόνος ἐστὶν ἐν ῷ καιρός, καὶ καιρὸς ἐν ῷ χρόνος οὐ πολύς, "Time is that in which there is a critical time [καιρός], and a critical time is that in which there is not much time."

Vocabulary Notes

1. Greek for *good:* ἀγαθός, ἐσθλός, καλός, and χρηστός.

'Ay $\alpha\theta$ ός good, is used as widely as the English word good. It generally means *good* in the sense of *capable*, *well-fitted* to something. In Homer άγαθός usually refers to physical excellence, hence the meanings valiant, brave (in battle); but it is extended to moral goodness as well. Frequently ἀγαθός is used with the accusative of respect to show what specific thing it refers to. οἱ ἀγαθοί in the political sense are the aristocrats (i.e., the *well-born*), especially in the phrase καλοὶ κἀγαθοί (καλοὶ καὶ ἀγαθοί). Ἐσθλός is equivalent to ἀγαθός, in all its senses, but is mainly poetic. **Κ**αλός properly means beautiful and may be used either of persons or things. In the moral sense (extending its meaning from beautiful to good, virtuous, honorable), it refers to noble deeds, differing from ἀγαθός, which would mean advantageous, useful. In Attic Greek, the word καλός is added to the name of a person (usually a boy) as a token of love: this is commonly seen on painted vases (Λέαγρος καλός), appearing again and again for the favorite of the day. **Χρηστός** also means *good*, but more definitely in the sense of *useful, serviceable, good of its kind*; it is in fact derived from χράομαι *use*.

2. **Κοινός:** the Κοινή (Koinē Dialect). The ancients cite five major dialects of Greek: διάλεκτοί είσι πέντε, Ατθίς Δωρίς Αἰολίς Ἰὰς καὶ κοινή, that is, Attic (spoken in Athens and environs), Doric (used in the Peloponnese and Northwest Greek), Aeolic (used in Lesbos, and with variations in Boeotia and Thessaly), Ionic (spoken on the coast of Asia Minor and on some of the islands), and Koinē, the *common* dialect as opposed to the four local dialects. It is not a combination of the other dialects, but is the common, or universal Greek language that had spread over the world as a result of the conquests of Alexander. The Koinē is based largely on the Attic dialect (both the written and the vulgar, or spoken, forms) with some Ionian influence. From the fourth century B.C.E. there was a gradual disappearance of the local dialects as the κοινή came into general use. Koinē is the language of the New Testament and of the Septuagint (the Greek translation of the Old Testament), and of the Jewish historian Josephus, but it was used by many secular writers as well: for example, Polybius, Diodorus, Plutarch, Dio. Modern Greek is descended from Koinē.

Accusative and Dative of Respect

1. Accusative of Respect

The accusative is used to tell in what specific respect an expression is true. If we say $\dot{\alpha}\gamma\alpha\theta\dot{\alpha}\varsigma\dot{\epsilon}\sigma\tau$ (he is good), it is a general statement; but if we want to say that someone is good in or at something, we use the accusative for the quality or the part:

άγαθὸς γνώμην good in intellect ἀγαθή ἐστιν πᾶσαν ἀρετήν she is good in every (πᾶσαν) virtue βουλὴν κακός ἐστιν he is bad in council

This accusative is very common with adjectives, but can also be used of parts of the body with nouns or stative verbs (i.e., verbs expressing a condition of being; this is called the accusative of the part affected):

άλγῶ τὴν κεφαλήν I have a pain in my head (I hurt as to my head)

2. Dative of Respect

The dative of respect, used similarly to the accusative of respect, is a form of the dative of manner [I].

Examples:

λόγω μὲν φίλοι εἰσίν, ἔργω δ' οὔ. They are friends in word, but not in deed.

ἀγαθός ἐστι πολέμφ. He is good at war.

The Bacchus Bar

Photo by L. J. Luschnig.

The ancient word for wine is οἶνος (cognate to Latin *vinum*, the origin of English *wine*); from it is derived *oenologist* (also spelled *enologist*), a specialist in wine. In Modern Greek the most common word for wine is κρασί, which comes from the practice of mixing wine with water in craters (mixing bowls, see saying 4). To drink wine unmixed (οἶνος ἄκρατος) was

a synonym for hard-drinking, except for breakfast which often consisted of bread dunked in pure wine.

TABEPNA (pronounced taver'na) is not originally Greek but entered Greek through Latin and may be of Oscan origin. It meant a *booth*, *stall*, or *inn*. There was a famous one about thirty miles from Rome called *Tres Tabernae*. From it we get *tavern* and *tabernacle* (the latter from the Latin diminutive *tabernaculum*, tent).

Bacchus, or Dionysus, was the god of wine and much more.

"[Dionysos'] domain is . . . the whole of *hugra phusis* [the principle of moisture], not only the liquid fire of the grape, but the sap thrusting in a young tree, the blood pounding in the veins of a young animal, all the mysterious and uncontrollable tides that ebb and flow in the life of nature."

—E. R. Dodds, in his edition of the *Bacchae*.

LESSON III

Future, First Declension Variations, Demonstrative Pronouns

In this lesson you will learn the future (active and middle: second principal part), the variations of the first declension, and the demonstrative pronouns.

FUTURE ACTIVE AND MIDDLE: THE SECOND PRINCIPAL PART

The second principal part of most verbs is the first person singular future active indicative; of deponent verbs, it is the future middle indicative. The future belongs to a different tense system from the present and has a different stem. When a new verb is introduced, the future will be given along with the present. The future middle and passive voices are different in form (the future passive is formed from the sixth principal part and will be treated in Lesson X).

The future is regularly formed from the present stem by adding $-\sigma$ - before the endings. For irregular verbs, you must learn special forms. For verbs with stems ending in consonants, certain changes in spelling take place when $-\sigma$ - is added, as described below.

Formation of Future

Rule for formation: present stem + σ + thematic vowel + primary endings

	Active		Middle
Sg.	λύσω	1st	λύσομαι
	λύσεις	2nd	λύσει or λύση
	λύσει	3rd	λύσεται
Pl.	λύσομεν	1st	λυσόμεθα
	λύσετε	2nd	λύσεσθε
	λύσουσι(ν)	3rd	λύσονται
Inf.	λύσειν		λύσεσθαι

Orthographic Changes for Verbs with Mute Stems

No problem arises in the regular formation of the future of verbs with stems ending in a vowel, as $\lambda \dot{\nu}\omega$, $\lambda \dot{\nu}\sigma\omega$; $\pi \alpha \dot{\nu}\omega$, $\pi \alpha \dot{\nu}\sigma\omega$; $\kappa \tau \lambda$. When the verb stem ends in a consonant, certain changes take place, depending on the type of consonant involved.

a labial	$(\pi, \beta, \phi) + \sigma \rightarrow \psi$
a palatal	$(\kappa, \gamma, \chi) + \sigma \rightarrow \xi$
a dental	(τ, δ, θ) drops out before σ

Examples:

Туре	Verb	Stem	Future
Labial	πέμπω	πεμπ-	πέμψω
Palatal	ἄγω	ἀγ-	ἄξω
Dental	πείθω	πειθ-	πείσω

→ Form the futures of the following:

ἄρχω, παιδεύω, βουλεύω, παύω, γράφω, πιστεύω, λέγω, δέχομαι (receive, deponent), λείπω, θύω (sacrifice)

Principal Parts

These verbs, from previous lessons, have irregular futures. They are conjugated regularly.

 Verb	Future
βούλομαι	βουλήσομαι
γίγνομαι	γενήσομαι
ἐθέλω	έθελήσω
ἔρχομαι	έλεύσομαι
ἔχω	σχήσω (I shall get), ἕξω (I shall have)
πράττω	πράξω (stem: πραγ-)
φέρω	οἴσω

Deponent Futures

There are a number of verbs that have their futures in the middle (though they have other forms in the active). These are usually verbs of perception or physical activity, such as:

άκούω, άκούσομαι	hear
μανθάνω, μαθήσομαι	learn
ὸράω, ὄψομαι	see [present, XI]
ἀποθνήσκω ἀποθανοῦμαι	die [contract future, XI]
λαμβάνω, λήψομαι	take

These futures are translated as if they were active.

Among the verbs with a deponent future is εἰμί, be, future ἔσομαι, I shall be:

Deponent Future of εἰμί

Singular		Plural
ἔσομαι	1st	ἐσόμεθα
ἔσει or ἔση	2nd	ἔσεσθε
ἔσται	3rd	ἔσονται
Inf.: ἔσεσθαι		

The forms are conjugated regularly except for ἔσται, which lacks the thematic vowel. This completes the principal parts of εἰμί.

Vocabulary

Along with the new verbs, you should study the futures of all verbs given so far. Some verbs with liquid or nasal stems $(\mu, \nu, \lambda, \rho)$ have a special kind of future that will be treated in Lesson XI (of the verbs given previously, this affects $\kappa\rho$ iv ω , μ ev ω , and ν o μ ic ω). These are given in brackets. Others form the future by adding a vowel before the σ : è θ e λ η σ ω , γ e ν η σ ω ω .

Verbs

ἀγγέλλω [ἀγγελῶ]	announce (angel; evangelist)
ἀκούω, ἀκούσομαι	hear (+ gen. of person) (acoustics)
ἀποθνήσκω [-θανοῦμαι]	die, be killed (< θάνατος) (contract future)
ἀποκτείνω [-κτενῶ]	kill
βάλλω [βαλῶ]	throw, hit (ballistics)
δέχομαι, δέξομαι	receive (cf. Mod. Gr. ξενοδοχεῖον, hotel)
θύω, θύσω	sacrifice
λαμβάνω, λήψομαι	take, seize (epilepsy; syllable)

μανθάνω, μαθήσομαι *learn, understand* (stem: $\mu\alpha\theta$ -, mathematics) πάσχω, πείσομαι *suffer, be affected* (stem: $\pi\alpha\theta$ -, pathos) φαίνω [φανῶ] *bring to light;* pass., *appear* (phantom)

Note: the imperfects of ἀποθνήσκω (die) and ἀποκτείνω (kill) are ἀπέθνησκον and ἀπέκτεινον, the verb being augmented rather than the prefix ($\alpha\pi$ o- in these two examples). The final vowel of the prefix is elided before the vowel of the augment. [IV]

FIRST DECLENSION NOUNS

The first declension has many variations. Type I has -η as characteristic of the singular, as in δίκη, ἀρετή, etc. (1).

If the base of a first declension noun ends in ϵ , ι , or ρ , however, $-\alpha$ is found rather than $-\eta$ in the singular (2). This $-\alpha$ is long in some words $(-\bar{\alpha})$ and short in others $(-\bar{\alpha})$, which does affect the accent in certain places. It is always long in the genitive and dative singular, but the length of the $-\alpha \nu$ in the accusative singular will be the same as that of the $-\alpha$ in the nominative.

There are also a few nouns with bases ending in letters other than ϵ , ι , or ρ which have - $\check{\alpha}$ in the nominative and accusative singular, but η in the genitive and dative singular (3). Nouns of these first three types are all *feminine*.

In addition, there are a number of masculine nouns of the first declension which end in $-\eta \zeta$ in the nominative singular (4), or in $-\bar{\alpha}\zeta$ if the base ends in ϵ , ι , or ρ (5), with the genitive in $-\upsilon \iota$ for both types (as in the 2nd decl. gen. sg.).

Note on the Accent of Adjectives

The accent of adjectives, like that of most nouns, is persistent. In the genitive plural, the feminine form, if it is the same as the masculine and neuter, is accented like them.

Demonstrative Adjective-Pronouns

The three most important demonstratives are οὖτος (this, that), ὄδε (this [here]), ἐκεῖνος (that [there]). They are declined as follows:

	Singular			Plural			
	m.	f.	n.	m.	f.	n.	
N	οὖτος	αὕτη	τοῦτο	οὖτοι	αὖται	ταῦτα	
G	τούτου	ταύτης	τούτου	τούτων	τούτων	τούτων	
D	τούτφ	ταύτη	τούτῳ	τούτοις	ταύταις	τούτοις	
A	τοῦτον	ταύτην	τοῦτο	τούτους	ταύτας	ταῦτα	

Observations

- 1. Notice that $o\hat{v}_{\tau o \varsigma}$ has initial τ where the article has it, but not where the article does not have it.
- 2. The endings are like those of the relative pronoun (i.e., the same as the $-o\varsigma$, $-\eta$, -ov adjectives except for the neuter singular nominative and accusative).
- 3. The spelling of the base is -ov where the ending is in an -o-sound and - $\alpha\nu$ where the ending is in an -a or e-sound.
- 4. οὖτος refers to what is near in place, time, or thought, and so can mean the latter (i.e., the one more recently mentioned). It can also mean the aforesaid and generally refers to what precedes.

	Singula	r		Plural			
	m.	f.	n.	m.	f.	n.	
N	őδε	ἥδε	τόδε	οΐδε	αἵδε	τάδε	
G	τοῦδε	τῆσδε	τοῦδε	τῶνδε	τῶνδε	τῶνδε	
D						τοῖσδε	
A		τήνδε			τάσδε	τάδε	

Observations

- 1. $\delta \delta \epsilon$ is formed by the article plus the enclitic particle $-\delta \epsilon$. It is, therefore, declined like the article, except that all forms are accented.
- 2. The fact that -δε is enclitic explains the accent of ἥδε, τήνδε, τούσδε, etc., which according to the rule should be circumflexed.
- 3. Meanings: ὅδε points with emphasis at someone or something. It also generally refers to what is near. It is sometimes used to mean the following. ὅδε may be used to call attention to the presence or approach of a person and in this sense should be translated here or there: Πλάτων δ' ὅδε . . . but Plato here . . . (and the speaker, Socrates in this case, would point to Plato).

	Singular			Plural			
	m.		n.	m.	f.	n.	
N	ἐκεῖνος	ἐκείνη	ἐκεῖνο	ἐκεῖνοι	ἐκεῖναι	ἐκεῖνα	
G	ἐκείνου	ἐκείνης	ἐκείνου	ἐκείνων	ἐκείνων	ἐκείνων	
D	ἐκείνῳ	ἐκείνῃ	ἐκείνῳ	ἐκείνοις	ἐκείναις	ἐκείνοις	
A	ἐκεῖνον	ἐκείνην	ἐκεῖνο	ἐκείνους	ἐκείνας	ἐκεῖνα	

Observations

- 1. ἐκεῖνος has the same endings and accents as οὖτος.
- 2. ἐκεῖνος sometimes appears as κεῖνος (especially in Herodotus and in poetry).
- 3. Meanings: *that*, ἐκεῖνος, generally refers to what is remote in place, time, or thought. Thus it can mean *the former*, and sometimes refers to what is to follow, as being unfamiliar and therefore remote.

Position

The demonstratives may be used as pronouns or as adjectives.

When used as adjectives in prose, they are used with the article, but are put in the predicate position:

οὖτος ὁ πολίτης or ὁ πολίτης οὖτος this citizen

The use of demonstratives is flexible and varies from writer to writer. You will learn more about them gradually by observation, but for the present should be content with knowing their forms and basic meanings.

Vocabulary Note

1. On dialect differences. It is the $-\alpha$ which is originally the characteristic ending for the first declension. In the Attic and Ionic dialects it changed to $-\eta$; in Ionic even after ϵ , ι , and ρ . In an Ionic writer such as Herodotus one finds χώρη, οἰκίη, ἡμέρη where Attic has χώρα, οἰκία, ἡμέρα. In other dialects (Doric, Aeolic, etc.), $-\alpha$ is retained (ἀλάθεια, ἡμέρα, σκανά for ἀλήθεια, ἡμέρα, and σκηνή.

Another characteristic of Attic is the spelling $\tau\tau$ for σσ, as in θάλαττα for θάλασσα; γλῶττα for γλῶσσα of the other dialects. The tragedians and early writers of Attic prose, such as Thucydides, did not use the $\tau\tau$, although it is known to have been in use at that time from inscriptions. Probably $\tau\tau$ seemed too provincial in the early period, when Ionic culture and literature were still the most important. Atticisms became respectable, however, when Attic became the top dialect.

- 2. A δικαστής is a member of a jury. Juries were made up of up to five hundred men, chosen by lot, fifty from each of the ten tribes. All (male) citizens over thirty were eligible for jury duty. Six thousand (six hundred from each tribe) were chosen annually as panels from which the jury would be drawn for each case, by an elaborate system of selection designed to prevent bribery (which nevertheless remained a problem). The great Athenian statesman Pericles introduced pay for the jury. The δ ικασταί not only heard the case and made the verdict, but set the penalty as well. The defense and the prosecution would each propose a sentence and the δ ικασταί would make a choice between the two possible penalties.
- 3. The original meaning of $\mu o \hat{i} \rho \alpha$ is part: a portion of land, a division of a people, a political party, a geographical or astronomical degree; and then the lot or share which falls to each person, especially in the distribution of booty. The word means the lot or rightful portion of an individual, but from this it came to mean the doom of death, mankind's inescapable lot. Thus $\mu o \hat{i} \rho \alpha$ came to have a fatalistic connotation and was personified first as the goddess of fate and then as the three Fates: Lachesis, who assigns the lot; Clotho, who spins the thread of life; and Atropos, who cuts it. In Greek folklore, the $Mo \hat{i} \rho \alpha$ come to the room where a child is born and at the time of birth determine his/her destiny, the whole course of life between birth and death.
- 4. The **Muses** were daughters of Zeus and Mnemosyne (Memory) and acted as patron deities of music, poetry, literature, and dance; in heaven they provided the gods with entertainment at the Olympian feasts. (Feasting being the Olympians' chief activity, the Muses kept very busy.) They inspired poets and gave them true knowledge. Homer calls on the Muse to tell him the story, to refresh his memory: Memory personified was their mother. Poets (both Greek and Latin) from Homer to the end of the Roman Empire celebrated the Muses as the inspiration for their art. Hesiod in the *Theogony* (lines 75 ff.) gives the following list of them:

ταῦτ' ἄρα Μοῦσαι ἄειδον Ὀλύμπια δώματ' ἔχουσαι ἐννέα θυγατέρες μεγάλου Διὸς ἐκγεγαυῖαι, Κλείω τ' Εὐτέρπη τε Θάλειά τε Μελπομένη τε Τερψιχόρη τ' Ἐράτω τε Πολύμνιά τ' Οὐρανίη τε Καλλιόπη θ' ἡ δὲ προφερεστάτη ἐστὶν ἀπασέων.

These things then the Muses sang, who have their homes on Olympus,

Nine daughters born of great Zeus, Clio and Euterpe and Thalia and Melpomene and Terpsichore and Erato and Polymnia and Urania and Calliope; she is the greatest of them all.

A museum (μουσεῖον) is a place connected with the Muses and their arts, but, even in antiquity, the word had a literary and educational significance rather than a strictly religious one. Plato and Aristotle both organized their schools as associations of the Muses and their cult. The Museum at Alexandria was the most famous in antiquity. Scholars from all parts of the civilized world (i.e., the Mediterranean area) congregated there, and were generously supported by the government.

- 5. The word $\sigma \kappa \eta \nu \dot{\eta}$ originally meant *tent* or *booth* (a booth in the marketplace). Perhaps the Greek plays—before permanent theaters with stage buildings were erected—were first performed in front of a tent or hut from and to which the actors made their entrances and exits and in which they changed masks. Later the word continued to refer to the stage building or *scene*, as the background for the plays. oi $\dot{\alpha}\pi\dot{\alpha}$ or $\dot{\alpha}$ or $\dot{\alpha}$ are actors (as opposed to the chorus who enter or exit along the *parodoi* or side passages).
- 6. The article was originally a demonstrative and is generally so used in Homeric Greek. In Attic this original meaning can still be seen in such expressions as \dot{o} μέν . . . \dot{o} δέ, the one . . . the other. (Also in the expressions τὸ καὶ τό, this and that, and τὸν καὶ τόν, this man and that one.) The relationship between article and demonstrative can be seen in the fact that ὅδε, ἤδε, τόδε is formed from the article, by the addition of the particle -δε. οὖτος is also from the article, perhaps with the article doubled as τούτου.

Genitives of Separation and Agent; ὑπό

1. Genitive of Separation

The genitive case is used to denote separation (*from*). It can be used with verbs meaning remove, deprive, release, cease, etc., and with adjectives (as a rule with those that imply deprivation, or some such thing). With verbs of motion, a preposition is used: two of the most common prepositions used with a genitive of separation are:

ἀπό away from, from ἐκ out of, from (from within)

Cf. also $\pi\alpha\rho\dot{\alpha}$ and $\pi\rho\dot{\alpha}$ with the genitive.

2. The Genitive of Agent with ὑπό

A subdivision of the genitive of source is the genitive of *agent*. The person *by whom* the action of a passive verb is performed is put into the genitive case, in prose, usually with the preposition $\dot{v}\pi\dot{o}$, *by*.

πέμπονται ὑπὸ τῶν θεῶν they are sent by the gods

3. Other uses of ὑπό (under)

With gen. of place: under, from under

 $\dot{\nu}$ π $\dot{\nu}$ γ $\dot{\eta}$ ς under the earth

τὰ ὑπὸ γῆς the things under the earth

With dat.: beneath, under, at the foot of (locative dat.)

With acc.: under (to a place under: terminal acc.); of time: at, during

ὑπὸ Τροίαν ἰέναι to go under [the walls of] Troy

ύπὸ νύκτα at nightfall

ύπὸ τὴν εἰρήνην at the time of peace

Crasis

In both prose and verse, a vowel or diphthong at the end of one word may contract with a vowel or diphthong at the beginning of another word. This is called *crasis* (*a mixing*); an apostrophe, called the coronis ('), is used to mark it:

τάγαθά for τὰ ἀγαθά

καλὸς κάγαθός for καλὸς καὶ ἀγαθός

ωριστε for ω αριστε

τάνθρώπων for τὰ ἀνθρώπων

ωνθρωποι for οἱ ἄνθρωποι

GREETINGS

When Aigeus, king of Athens, makes his entrance in Euripides' Medea (663), these are his first words. This is a clear example of the use of everyday speech combined with the formal diction of tragedy in Euripidean dialogue.

Photo by L. J. Luschnig.

Αἰγεύς: Μήδεια, χαῖρε τοῦδε γὰρ προοίμιον

κάλλιον οὐδεὶς οἶδε προσφωνεῖν φίλους.

Μήδεια: ὧ χαῖρε καὶ σύ, παῖ σοφοῦ Πανδίονος, Αἰγεῦ.

Aigeus: Medea, hello. For no one knows a better way

than this to address friends and wish them well.

Medea: Hello to you too, Aigeus, son of Pandion the wise.

These ancient greetings are still heard in Modern Greek: χαῖρε (familiar form, for close friends and relatives, young children, and animals), χαίρετε (polite form for everybody else: $\alpha \iota$ is now pronounced like ϵ , and χ is more like a heavy h-sound or a light ch-sound, though the exact sound depends on geography). Καλημέρα and καλησπέρα (good day and good evening) are more common greetings. The pronunciation is nearly the same as in classical Greek, except that η is now pronounced the same as ι , as are $\epsilon \iota$, ι , ι . By far the most common greeting, used for both hello and good-bye, is $\gamma \epsilon \iota \acute{\alpha}$ σου, also shortened to just $\gamma \epsilon \iota \acute{\alpha}$ [from $\dot{\nu}\gamma \dot{\epsilon} \epsilon \iota \alpha$ health + σου your].

Lesson IV

Aorist Active and Middle, Aspect, Indirect Statement

In this lesson you will learn the agrist active and middle (the third principal part), the concept of aspect, and the syntactical construction of indirect statement. Most important, you will be ready for your first extended reading, from Plato's Meno.

AORIST ACTIVE AND MIDDLE: THE THIRD PRINCIPAL PART

The Aorist is a secondary (or past) tense. It is used for a single act in past time, or one regarded as a single act, as opposed to the imperfect, which is used for continuous or habitual action in past time.

Imperfect ἔλυον I was releasing, used to release, kept on releasing,

tried to release

Aorist ἔλυσα I released

The aorist, like the future, has separate forms for the middle and passive.

There are two forms of the aorist called, for convenience, first and second aorist. These differ in formation and conjugation, but not in meaning and use. If a verb has a first aorist, it will not have a second aorist (there are a few exceptions to this rule, but they will be dealt with as needed). The first aorist is formed regularly from the present stem. To form the second aorist, changes usually take place in the verb stem. The two types correspond to our regular and irregular (weak and strong) verbs:

	Present	Past (= aorist)	Past Participle
Regular	look	looked	looked
Irregular	sing	sang	sung
	see	saw	seen
	drink	drank	drunk

¹ English *hang* has two pasts, *hung* (general) and *hanged* (used of an execution): they *hung* the picture but they *hanged* the man.

Note that in the three irregular verbs there is a variation in the stem vowel in the different forms. This is also common in the Greek verbs with second aorists: it is known as vowel gradation or ablaut.

Like the imperfect and the other secondary tense, the pluperfect, the aorist (both first and second) is augmented, but only in the indicative. The infinitive and all moods other than the indicative are *not* augmented.

The aorist active indicative, first person singular, is the third principal part of a verb. Fully deponent verbs, of course, have no aorist active. Deponents are divided into two classes, those that have their aorists in the middle and those with passive aorists, called respectively middle or passive deponents.

Formation and Conjugation of the First Aorist

1. Vowel and Mute Stems (Sigmatic Aorist)

Vowel Stems

Augment (ε) + stem + σ + - α (tense sign) + secondary endings (the secondary endings show slight modifications in the active of the first aorist):

			U	
	Active		Middle	
Sg.	-σ-α	1st	-σ-αμην	I
	-σ-ας	2nd	$-\sigma\omega$ < $[-\sigma$ - $\alpha\sigma\sigma$ 0	уои
	-σ-ε(ν)	3rd	-σ-ατο	he/she/it
Pl.	-σ-αμεν	1st	-σ-αμεθα	we
	-σ-ατε	2nd	-σ-ασθε	уои
	-σ-αν	3rd	-σ-αντο	they
Inf.	-σ-αι		-σ-ασθαι	to

First Aorist Endings

Note

These endings differ from the other secondary endings mainly in that they do not have the thematic vowel o or ϵ ; rather, $-\alpha$ - is the characteristic vowel of the first aorist endings. Notice that this α is short.

Example: λύω, aorist ἔλυσα

	Active		Middle
Sg.	ἔλυσα	1st	έλυσάμην
	ἔλυσας	2nd	έλύσω
	ἔλυσε(ν)	3rd	έλύσατο
Pl.	έλύσαμεν	1st	έλυσάμεθα
	έλύσατε	2nd	έλύσασθε
	ἔλυσαν	3rd	έλύσαντο
Inf.	λῦσαι		λύσασθαι

Note: the first agrist infinitive active is accented on the penult: $\lambda \hat{v} \sigma \alpha$, $\beta o v \lambda \hat{e} \hat{v} \sigma \alpha$, $\gamma \rho \hat{\alpha} \psi \alpha$.

Mute (Consonant) Stems

Before the $-\sigma$ - of the first aorist, mute stems undergo the same orthographic changes as in the future:

```
a labial (\pi, \beta, \text{ or } \phi) + \sigma becomes \psi
                    ἔπεμψα
                                     (future, πέμψω)
                    ἔγραψα
                                     (future, γράψω)
   γράφω:
a palatal (\kappa, \gamma, \text{ or } \chi) + \sigma becomes \xi
                    ἦρξα
                                     (future, ἄρξω)
   ἄρχω:
                                     (future, \piράξω) (stem: \piραγ-)
   πράττω:
                    ἔπραξα
a dental (\tau, \delta, \text{ or } \theta) drops out before \sigma (\zeta \text{ also drops out})
   πείθω:
                    ἔπεισα
                                     (future, πείσω)
```

These forms are conjugated in the same way as the vowel stems; the - σ - is present in the double consonants ψ and ξ .

2. The Liquid/Nasal First Aorist

Many verbs with stems ending in μ , ν , λ , or ρ (the nasals and liquids) do not add - σ - to form the first aorist. The combinations $\mu\sigma$, $\nu\sigma$, $\lambda\sigma$ and $\rho\sigma$ were generally avoided in Greek.

Note on the stem of the liquid first aorist

Compensatory Lengthening: In the formation of the liquid first aorist, the sigma is lost and, to make up for this loss, the stem vowel of the verb is often lengthened, according to the following pattern: ϵ becomes $\epsilon\iota$; α becomes η .

Formation: Augment + stem + $-\alpha$ - with the secondary endings:

	Stem	Aorist
μένω	μεν-	ἔμεινα
ἀγγέλλω	ἀγγελ-	ἤγγειλα
φαίνω	φαν-	ἔφηνα
κρίνω	κριν-	ἔκρῖνα

These are conjugated in the same way as ἔλυσα.

	Active		Middle
Sg.	ἤγγειλ α	1st	ἠγγειλάμην
	ἤγγειλας	2nd	ἠγγείλω
	ἤγγειλε(ν)	3rd	ἠγγείλατο
Pl.	ἠγγείλαμεν	1st	ἠγγειλάμεθα

Formation and Conjugation of The Second Aorist

The second agrist is a thematic tense: it has a vowel, o or ϵ , added to the stem before the endings. Note the accent of the infinitive.

Formation: Augment + second agrist stem + secondary endings (the same endings as for the imperfect):

	Active		Middle
Sg.	-ov	1st	-ο-μην
	-ες	2nd	-ου < [ε-σο]
	-ε(v)	3rd	-e-to
Pl.	-ο-μεν	1st	-ο-μεθα
	-ε-τε	2nd	-ε-σθε
	-o-v	3rd	-ο-ντο
Inf.	-ε î ν		-έσθαι

The Second Aorist Stem

There is no one way in which second aorists are formed, but variation in the stem vowel of the verb is a general characteristic. Learn the second aorist from the principal parts: the stem is found by removing the augment and personal ending. Often the second aorist stem shows the root (the most basic part) of the verb:

	Aorist Stem	Second Aorist
λείπω	λιπ-	_{έλιπον}
λαμβάνω	λαβ-	_{έλαβον}
βάλλω	βαλ-	ἔ βαλον
γίγνομαι	γεν-	ἐγενόμην
μανθάνω	μαθ-	ἔμαθον

There are some other kinds of changes which certain verbs undergo in the formation of the second agrist.

Examples:

	Aorist	
	Stem	Second Aorist
ἄγω	άγαγ-	ἤγαγον A reduplication (doubling) of the present stem $\dot{\alpha}$ γ- to $\dot{\alpha}$ γαγ

	Aorist	
	Stem	Second Aorist
ἔχω	σχ-	ἔσχον This stem is related to that of the future σχήσω.
φέρω	ένεγκ-	ἥνεγκον. This is also a reduplication, but unrelated to the present; a comparison could be made between this verb and the English verb <i>go</i> , <i>went</i> , in which the parts are taken from different verb stems.
ἔρχομαι	έλθ-	ἦλθον Note that the second aorist of this verb is active in form as well as in meaning, and has a different root from the present.

Example of Second Aorist, λείπω, aorist stem, λιπ-:

	Active		Middle
Sg.	ἔλιπον	1st	έλιπόμην
	ἔλιπες	2nd	έλίπου
	ἔλιπε(ν)	3rd	έλίπετο
Pl.	ἐλίπομεν	1st	έλιπόμεθα
	ἐλίπετε	2nd	έλίπεσθε
	ἔλιπον	3rd	έλίποντο
Inf.	λιπεῖν		λιπέσθαι

Note

The endings are the same as those of the imperfect, but even so, it is generally easy to distinguish the two tenses, because the imperfect is always formed from the present stem, and the second agrist from a different, usually simplified, stem.

Exercise A (continued)

- **4.** a. Fill in the accent.
 - b. Translate.
 - c. Change to the opposite number.

1. ἠγαγοντο	4. ἐλαβεσθε	7. ἐγενετο

3. ἐσχον	6. ἐλιπες	9. ἐμαθον

- **5.** a. Fill in the accent.
 - b. Give corresponding present and future forms.

1.	λιπειν	3.	ένεγκειν	5.	λαβειν
2.	γενεσθαι	4.	μαθειν	6.	έλθειν

6. For each of the present forms give the corrresponding imperfect, future, and aorist.

άγω
 φέρουσι
 λείπομεν
 ἔχεις
 ἔρχεται
 μανθάνετε

3. γίγνει

Principal Parts

A review of the principal parts, both regular and irregular, of verbs given in the previous lessons follows. Forms not yet treated are in brackets. An asterisk (*) indicates irregular verbs: pay special attention to the verbs so marked. Be sure that you know the meanings of all the verbs. Many of these verbs, though irregular, do follow a pattern.

*ἀγγέλλω [ἀγγελῶ] **ἤγγειλα** *ἄγω ἄξω ἤγαγον (ἀγαγ-) *ἀκούω ἤκουσα ἀκούσομαι [-θανοῦμαι] *ἀποθνήσκω ἀπέθανον *ἀποκτείνω ἀπέκτεινα [-κτενῶ] ἄρξω ἦρξα ἄρχω *βάλλω [βαλῶ] **ἔ**βαλον βουλεύω βουλεύσω έβούλευσα *βούλομαι βουλήσομαι (passive aorist [X]) *γίγνομαι γενήσομαι έγενόμην γράφω γράψω ἔγραψα δέχομαι δέξομαι έδεξάμην *ἐθέλω έθελήσω ήθέλησα ἦλθον (ἐλθ-) *ἔρχομαι έλεύσομαι *ἔχω έξω / σχήσω ἔσχον (σχ-) θύσω ἔθυσα θύω *κρίνω [κρινῶ] ἔκρινα **ἔλαβον** *λαμβάνω λήψομαι λέγω ἔλεξα (εἶπον) λέξω *λείπω λείψω ἔλιπον λύσω λύω **ἔλυσα** *μανθάνω μαθήσομαι **ἔμαθον** *μένω [μενῶ] ἔμεινα νομίζω [νομιῶ] ένόμισα παιδεύω παιδεύσω έπαίδευσα **ἔ**παθον *πάσχω πείσομαι παύω παύσω ἔπαυσα πείθω πείσω ἔπεισα πέμπω πέμψω ἔπεμψα πιστεύσω πιστεύω έπίστευσα *πράττω (πραγ-) πράξω **ἔπραξα** *φαίνω [φανῶ] ἔφηνα *φέρω οἴσω ηνεγκον (ἐνεγκ-), ηνεγκα

Note on finding the aorist stem

The agrist stem is found by removing the augment and the personal ending. You have to know what the form looks like without its augment to form and recognize infinitives and the other dependent moods, and to recognize at a glance what verb a particular agrist is from. You may have some difficulty recognizing augmented forms beginning with η , which represents lengthened ε or α . In most cases it can be determined whether an η represents an augmented ε or α from the relationship of the agrist to the present. For example: ἦρξα, first aorist of ἄρχω, will have ἀρξ- as its aorist stem because the η simply represents a lengthened α. Similarly ἤγγειλα (ἀγγειλ-) from ἀγγέλλω; ἤκουσα (ἀκουσ-) from ἀκούω; ἤγαγον (ἀγαγ-) from ἄγω; ήθέλησα (ἐθελησ-) from ἐθέλω. The only real difficulty arises in aorists that bear little or no resemblance to the other principal parts, such as ἤνεγκον (ἐνεγκ-), aorist of φέρω; or ἦλθον (ἐλθ-) from ἔρχομαι. In such cases, the agrist stem is given in the vocabulary along with the agrist indicative.

Notes on Time and Aspect

The second agrist stem often represents the simplest form of the verb. It is frequently the present that has something added: λείπω, ἀγγέλλω, etc. are lengthened forms. μανθάνω and λαμβάνω, and several other verbs of their class, have the whole syllable -αν- as well as an additional nasal added to form the present stem; their roots are $\mu\alpha\theta$ - and $\lambda\alpha\beta$ -, respectively. We may say that this simplest form of the verb (the root) contains the basic meaning of the verb—but why is it found in the agrist rather than the present? The agrist is in fact the simplest tense. The meaning of the term *aorist* (from the Greek ἀόριστος) is *un*limited, and it is so called because it has none of the limitations of repetition, continuance, or completion that the other tenses have: it refers to a simple act (in the indicative, in past time). The present refers to action going on, in progress; the imperfect to continued or repeated action, again, action in progress; the perfect to completed action. This is what we mean by the *aspect* of Greek tenses: the tenses refer not only to time (as present, past, or future) but also to the character of the action, whether it is in progress, simply taking place, or finished.

As has been mentioned above, the augment was originally a floating temporal particle and only later became attached to the verb. In Homer, secondary tenses of the indicative often appear without the augment. Only the indicative has the augment, and it is only in the indicative that the aorist is strictly a past tense. That is, the infinitive, optative, subjunctive, and imperative (all unaugmented forms) usually express aspect rather than time. An aorist infinitive (except in indirect statement, which will be treated below) differs in meaning from a present infinitive only in that the present refers to the action as going on, the aorist to a single act. (The present and aorist infinitives are by far the most commonly used of the infinitives.) The infinitive is a verbal noun and therefore does not express time any more than a noun does.

Examples:

λύειν to be releasing λῦσαι to release

γίγνεσθαι to go through the process of becoming

γενέσθαι to become

A linguistic note

Compound Verbs

Compound verbs are most commonly formed by prefixing a preposition to the verb. In these compounds, the meaning of the verb is the fundamental part, with the prepositional prefix modifying it more or less. The most important thing to remember at this point is that the augment is added after the preposition: that is, the verb is augmented and not the preposition, as $\dot{\alpha}\pi \circ \kappa \tau \epsilon i v \omega$, aorist $\dot{\alpha}\pi - \dot{\epsilon}\kappa \tau \epsilon i v \omega$. Prepositions ending in a vowel drop that vowel before the vowel of the augment, by elision ($\pi \epsilon \rho i$ and $\pi \rho o$ are exceptions to this rule). There are some other changes that take place when prepositions are added to verbs.

1. ἀπό, κατά, ἐπί, μετά, ὑπό before a rough breathing change their final consonant to an aspirated form (having dropped the vowel by elision):

ἀφαιρέω	take down, take away	ἀπό + αἰρέω
καθίστημι	set down	κατά + ἵστημι
ἐφίημι	send to	ἐπί + ἵημι
μεθίστημι	change	μετά + ἵστημι
ύφαρπάζω	filch, snatch away from under	ύπό + ἁρπάζω

2. ἐξ before a vowel, ἐκ before a consonant:

ἐκβάλλω throw, put out aorist, ἐξέβαλον ἐκφέρω bring forth future, ἐξοίσω 3. ėv, σύν before a labial (π, β, ϕ) become ėμ- and συμ-:

ἐμβάλλω	throw, put in	aorist, ἐνέβαλον
συμβαίνω	come to pass, happen	aorist, συνέβην
συμβάλλω	throw together	aorist, συνέβαλον

έν, σύν before a palatal (γ, κ, χ) become έγ-, συγ-:

έγγράφω	inscribe	aorist, ἐνέγραψα
συγχρονέω	be contemporary with	(cf. χρόνος)
συγγίγνομαι	keep company with	aorist, συνεγενόμην
συγκομίζω	bring together	aorist, συνεκόμισα

INDIRECT STATEMENT

Irregular Verb, φημί say

Principal Parts: φημί, φήσω, ἔφησα

Only the present system is irregular; the future and first aorist are conjugated like $\lambda \dot{\nu} \sigma \omega$, $\xi \lambda \nu \sigma \alpha$. $\phi \eta \mu \dot{\iota}$, like $\epsilon \dot{\iota} \mu \dot{\iota}$, belongs to the class of verbs known as - $\mu \iota$ verbs, and like $\epsilon \dot{\iota} \mu \dot{\iota}$ is enclitic in the present indicative (except for the second person singular).

	Present		Imperfect
Sg.	φημί	1st	ἔφην
	φής	2nd	ἔφησθα or ἔφης
	φησί	3rd	ἔφη
Pl.	φαμέν	1st	ἔφαμεν
	φατέ	2nd	ἔφατε
	φασί	3rd	ἔφασαν
Inf.	φάναι		

Constructions after verbs of saying and thinking

There are in Greek several ways of quoting a statement or thought indirectly. The construction to be used depends on the introductory verb of saying or thinking. The three ways of expressing indirect quotations are: (1) with $\delta \tau_l$ or δc_l , that and a finite verb (similar to English usage); (2) with the infinitive and subject accusative (similar to Latin usage); and (3) with the participle (see Lesson VII).

Of the verbs of *saying*, φημί regularly takes the infinitive construction; εἶπον (infinitive εἰπεῖν), *I said*, takes ὅτι οr ὡς with the indicative (or optative); and λέγω in the active usually takes the ὅτι/ὡς construction; in the passive, the infinitive. Verbs of *thinking* or *believing* such as νομίζω usually take the infinitive construction. Verbs of *seeing*, *hearing*, and *learning* usually take the participle construction [VII].

1. In indirect statements after $\delta \tau_l$ or $\delta \zeta_r$, each verb retains both the mood and tense of the direct quotation. (After past tenses the optative is often used [XIII]):

Direct	Indirect
μανθάνω, I understand	λέγω ὅτι μανθάνω, I say that I understand λέγει ὅτι μανθάνει, he/she says that he/she understands

Sometimes ὅτι introduces a direct quotation (quotation marks had not yet been invented): εἶπον ὅτι ἰκανοί ἐσμεν, they said "we are able" (Xenophon, Anabasis).

2. The verbs $\phi\eta\mu$ i and $vo\mu$ i $\zeta\omega$ (among others) take a construction in which the verb of the original statement is changed to the infinitive of the corresponding tense, as the following examples illustrate:

Direct	Indirect
γράφω, I am writing	νομίζω γράφειν, I think that I'm writing νομίζει γράφειν, he thinks that he is writing *ἐνόμισα γράφειν, I thought that I was writing *ἐνόμισε γράφειν, she thought that she was writing
γράψω, I shall write	νομίζω γράψειν, I think that I will write νομίζομεν γράψειν, we think that we will write *ἐνόμισα γράψειν, I thought that I would write
ἔγραψα, I wrote	νομίζω γράψαι, I think that I wrote νομίζει γράψαι, he thinks that he wrote *ἐνόμισα γράψαι, I thought that I had written

*Note: the tense of the English translation changes to comply with the rules of English tense sequence. In Greek, the tense of the infinitive remains the same because the infinitive still represents the same tense of the indicative. The present infinitive can also be used to stand for the imperfect indicative. In Greek, the tense of the indirect statement is relative to the time of the main verb: present tense for action at the same time, future for later action, agrist for earlier action.

The Subject of the Infinitive in Indirect Statement

1. In the examples given above, the subject of the indirect statement has been omitted. If the subject of the infinitive is the same as the subject of the main verb (i.e., the verb of saying or thinking), then it is usually omitted, unless it is to be emphasized. In that case it will be in the nominative (because it agrees with the subject of the main clause), and anything that agrees with it will be nominative.

The infinitive can stand for any person and number: ἔφην γράφειν, *I said that I was writing*; the infinitive stands for the first person singular. ἔφασαν γράφειν, they said that they were writing; the infinitive stands for the third person plural.

2. If the subject of the infinitive is different from that of the main verb, then it goes into the accusative case and it may not be omitted:

```
αὕτη γράφει, this woman is writing νομίζω ταύτην γράφειν, I think that this woman is writing
```

ὁ πολίτης ἐστὶ καλός, the citizen is good νομίζω τὸν πολίτην εἶναι καλόν, I think that the citizen is good

But, \dot{o} πολίτης νομίζει εἶναι καλός, the citizen thinks that he (himself) is good

In the last example, $\kappa\alpha\lambda\delta\varsigma$ is nominative because it refers to the same subject as that of the main verb.

Reading

Selections from Plato's Meno (77b-c; 78a-b and c-e)

Socrates $(\Sigma \omega \kappa \rho \acute{\alpha} \tau \eta \varsigma)$ and Meno $(M \acute{\epsilon} \nu \omega \nu)$, a young Thessalian gentleman, are discussing the problem of whether virtue $(\dot{\alpha} \rho \epsilon \tau \dot{\eta})$ can be taught. Socrates, disclaiming any knowledge of his own, first wants to discover what virtue is. Because this is your first reading of connected prose, you may not grasp everything the first time through it. Since this is a conversation, aiming at some degree of verisimilitude, there are a number of elliptical sentences. Pay special attention to the use of the particles.

Meno: Δοκεῖ τοίνυν μοι, ὧ Σώκρατες, ἀρετὴ εἶναι, καθάπερ ὁ ποιητὴς

λέγει, 'χαίρειν τε καλοῖσι καὶ δύνασθαι' καὶ ἐγὼ τοῦτο λέγω ἀρετὴν, ἐπιθυμοῦντα τῶν καλῶν δυνατὸν εἶναι πορίζεσθαι.

Socrates: Άρα λέγεις τὸν τῶν καλῶν ἐπιθυμοῦντα ἀγαθῶν ἐπιθυμητὴν εἶναι;

Meno: Μάλιστά γε.

[καθάπερ just as. καλοῖσι = καλοῖς. δύνασθαι to be capable (of it). ἐπιθυμοῦντα (participle, m. acc. sg.) desiring; with τὸν the one who desires (+ gen.). δυνατὸν εἶναι to be able (to).]

Socrates: Άρα ὡς ὄντων τινῶν οἱ τῶν κακῶν ἐπιθυμοῦσιν, ἑτέρων δὲ οἱ τῶν ἀγαθῶν; οὐ πάντες, ἄριστε, δοκοῦσί σοι τῶν ἀγαθῶν ἐπιθυμεῖν;

Meno: Οὐκ ἔμοιγε.

[τως ὅντων τινῶν (assuming) that there are some. . . . πάντες all (people: m. nom. pl.). το μοιστε = τω αριστε (voc.) my good man.]

Socrates: Ἀλλά τινες τῶν κακῶν;

Meno: Ναί.

[τινες (encl.) some (people: m./f. nom. pl.). Understand ἐπιθυμοῦσι. ναί = yes.]

Socrates: Οἰόμενοι τὰ κακὰ ἀγαθὰ εἶναι, λέγεις, ἢ καὶ γιγνώσκοντες ὅτι κακά ἐστιν, ὅμως ἐπιθυμοῦσιν αὐτῶν;

[οἰόμενοι thinking (participle, m. nom. pl.). γιγνώσκοντες (participle, m. nom. pl.). αὐτῶν them (gen. pl.).]

[ἀμφότερα both (things).]

Socrates: ³Η γὰρ δοκεῖ τίς σοι, ὧ Μένων, γιγνώσκων τὰ κακὰ ὅτι κακά ἐστιν

ὅμως ἐπιθυμεῖν αὐτῶν;

Meno: Μάλιστα.

[τις anyone (m. nom. sg.). γιγνώσκων (participle m. nom. sg.).]

Socrates: Τί ἐπιθυμεῖν λέγεις; ἦ γενέσθαι αὐτῷ;

Meno: Γενέσθαι τί γὰρ ἄλλο;

[γενέσθαι αὐτῷ to be/belong to him (dat. of possession).]

Socrates: "Εστιν οὖν ὄστις βούλεται ἄθλιος καὶ κακοδαίμων εἶναι;

Meno: Οὔ μοι δοκεῖ, ὧ Σώκρατες.

[ὅστις anyone who (m. nom. sg.). ἄθλιος, - α , -ov unhappy. κακοδαίμων unlucky (m./f. nom. sg.).]

Socrates: Οὐκ ἄρα βούλεται, ὧ Μένων, τὰ κακὰ οὐδείς, εἴπερ μὴ βούλεται τοιοῦτος εἶναι. τί γὰρ ἄλλο ἐστὶν ἄθλιον εἶναι, ἢ ἐπιθυμεῖν τε τῶν κακῶν καὶ κτᾶσθαι.

[Repeated negatives reinforce the negative idea. οὐδείς no one (m. nom. sg.). κτᾶσθαι to possess (pres. inf.).]

Meno: Κινδυνεύεις ἀληθῆ λέγειν, ὧ Σώκρατες· καὶ οὐδεὶς βούλεσθαι τὰ κακά

Socrates: Οὐκοῦν νῦν δὴ ἔλεγες, ὅτι ἔστιν ἡ ἀρετὴ βούλεσθαί τε τάγαθὰ καὶ δύνασθαι;

[ἀληθῆ the truth (true things) (n. nom./acc. pl.). οὐδεὶς understand is likely. νῦν δὴ just now. τάγαθά (crasis).]

Meno: Εἶπον γάρ.

 $[\gamma \acute{\alpha} \rho$ in conversation is often equivalent to *yes.*]

Socrates: Τάγαθὰ φὴς οἶόν τ' εἶναι πορίζεσθαι ἀρετὴν εἶναι;

Meno: "Εγωγε.

Socrates: Άγαθὰ δὲ καλεῖς οὐχὶ οἶον ὑγίειάν τε καὶ πλοῦτον;

Meno: Καὶ χρυσίον λέγω καὶ ἀργύριον κτᾶσθαι καὶ τιμὰς ἐν πόλει καὶ ἀρχάς.

[ἐν πόλει in the city.]

Socrates: Εἶεν· χρυσίον δὲ δὴ καὶ ἀργύριον πορίζεσθαι ἀρετή ἐστιν, ὥς φησι Μένων, ὁ τοῦ μεγάλου βασιλέως πατρικὸς ξένος. πότερον προστιθεῖς τούτῳ τῷ πόρῳ, ὧ Μένων, τὸ δικαίως καὶ ὁσίως, ἢ οὐδέν σοι διαφέρει, ἀλλὰ κἂν ἀδίκως τις αὐτὰ πορίζηται, ὁμοίως σὰ αὐτὰ ἀρετὴν καλεῖς;

Meno: Οὐ δήπου, ὧ Σώκρατες.

[εἶεν Ο.Κ., very well. τοῦ μεγάλου βασιλέως of the great king (the King of Persia: gen. sg.). πατρικός hereditary, ancestral. προστιθεῖς you add to (+ dat.). οὐδέν nothing (n. nom./acc. sg.). οὐδὲν διαφέρει it makes no difference. κἄν ... even if one acquires them unjustly. .. αὐτά them.]

Socrates: Άλλὰ κακίαν.

[κακία, -ας, ή (opp. of ἀρετή).]

Meno: Πάντως δήπου.

[πάντως absolutely, altogether.]

Socrates: Δεῖ ἄρα, ὡς ἔοικε, τούτῳ τῷ πόρῳ δικαιοσύνην ἢ σωφροσύνην ἢ ὁσιότητα προσεῖναι, ἢ ἄλλο τι μόριον ἀρετῆς· εἰ δὲ μή, οὐκ ἔσται ἀρετή, καίπερ ἐκπορίζουσα τἀγαθά.

[δεῖ it is necessary + inf. ὡς ἔοικε as it seems. ὁσιότητα piety (acc. sg.). προσεῖναι, inf. of πρόσειμι be added to, belong to. ἄλλο τι μόριον some other part. εἰ δὲ μὴ but if not, otherwise. ἐκπορίζουσα acquiring (f. nom. sg.).]

Σύνταξις γὰρ ἐμοὶ καὶ θάνατον παρέχει. Syntax is the death of me.

Meno and Mathematics

Plato's early dialogues make frequent use of mathematical examples. In the Meno, Socrates tries to demonstrate his contention that knowledge is innate in humans and that what we seem to be learning is really remembering. To do this he questions a young slave from Meno's household, who has no formal schooling, about a geometrical problem. Socrates draws a square (τετράγωνον χωρίον) in the dirt.

Then he draws lines that go through the middle of each side.

He asks the slave how to make a square that is double the size of the smaller square and the boy suggests doubling the length of the smaller square's sides. But the larger square (the length of whose sides is double that of the smaller squares) clearly contains four squares equal in size, making it four times (τ e τ p α k τ s) the size of the smaller square.

Finally, having demonstrated the boy's ignorance, Socrates draws a line from corner to corner (γράμμη ἐκ γωνίας εἰς γωνίαν) called a diagonal (διάμετρον) which cuts the first square in half. The square of this diagonal will produce a square that is half the size of the larger square and therefore twice the size of the smaller square. The young slave agrees to the truth of this demonstration. Q.E.D. or not? That part is trickier because Socrates is trying to prove that the boy's new understanding comes, not from anything Socrates has taught him, but from recovering knowledge he already had.

Put another way, the proof amounts to the Pythagorean theorem: in any right triangle, the area of the square whose side is the hypotenuse is equal to the sum of the areas of the squares on the other two sides. Besides their interest in mathematics, Pythagoras and Plato shared a belief in metempsychosis or transmigration of souls.

Lesson V

Third Declension

In this lesson you will learn the third declension, and complete the major patterns of nouns.

THIRD DECLENSION NOUNS

The third declension presents some difficulties because of the variety of base endings, which bring about some variations in the declension. Familiarity will resolve the difficulties.

The endings given below are added to the base of the noun, which is usually found by removing the $-o\varsigma$ ending from the genitive singular, which is always given in the vocabulary. If you learn these basic endings thoroughly, the variations will make more sense. It is now more important than ever to learn both nominative and genitive, as the pattern which a word is to follow is only clear if both forms are known. The base is often not complete in the nominative.

	m. and f.		n.
Sg.	variable; often -ς	N	base
	-ος	G	-ος
	-ĭ	D	-ĭ
	-ἄ [or -v]	A	same as nom.
	(like nom. or base)	V	same as nom.
Pl.	-ες	N	- α
	-ων	G	-ων
	-σĭ(ν) -ἄς	D	-σἴ(ν)
	-ἄς	A	- ἄ

For convenience in teaching and learning, we divide the third declension nouns into consonant bases and vowel bases.

Third Declension Consonant Bases

The examples below show some of the more common types of consonant bases. Look at each example, then consult the notes about it.

The accent of these nouns is usually persistent, but monosyllabic bases accent the ultima in the genitive and dative, singular and plural (e.g., κλώψ, base κλωπ-, gen. sg. κλωπός, dat. sg. κλωπί, gen. pl. κλωπῶν, dat. pl. κλωψί).

Notes on the Consonant Bases

1. $-\varsigma$ is the nominative singular ending of masculine and feminine nouns of the third declension except those with the base ending in ν , ρ , or $-\nu \tau$ -.

- 2. $-\varsigma$ of the nominative and $-\sigma$ i of the dative plural cause the same orthographic changes as in the futures and first aorists of verbs, that is:
 - a. A labial $(\pi, \beta, \phi) + \sigma \rightarrow \psi$ (e.g., κλώψ, base κλωπ-, dat. pl. κλωψί).
 - b. A palatal $(\kappa, \gamma, \chi) + \sigma \rightarrow \xi$ (e.g., κύλιξ, base κυλικ-, dat. pl. κύλιξι).
 - c. A dental (τ, δ, θ) is dropped before $-\sigma$ (e.g., ἐλπίς, base ἐλπιδ-, dat. pl. ἐλπίσι; ὄρνις, base ὀρνιθ-, dat. pl. ὄρνισι). (Cf. also the neuter plural nouns of the ὄνομα type: base ὀνοματ-, dat. pl. ὀνόμασι.) -οντ-bases have -ουσι in the dative plural, for -οντσι: both ν and τ are dropped before $-\sigma$ -, and the base vowel is lengthened to compensate for the loss of two consonants: o is lengthened to ον.
- 3. To form the nominative of bases in ν , ρ , σ , and -0 $\nu\tau$ -, no σ is added, but the last vowel is lengthened to form the nominative:

Nominative	Base
δαίμων	δαιμον-
ἄρχων	ἀρχοντ-
<u></u> ἡτωρ	ρ ητορ-

Note that ν , ρ , and σ are the only consonants which can end a word in Greek. So, τ is dropped from the -0 ν type for the nominative singular, e.g., $\alpha \rho \chi \omega \nu$, base $\alpha \rho \chi \omega \nu$; and from the - $\alpha \tau \omega \omega$ (genitive) type of neuter nouns, as $\delta \nu \omega \omega \omega$, $\delta \nu \omega \omega \omega$.

4. The accusative singular ending is usually - α for consonant bases, both masculine and feminine, but - ν is used for dental bases if the dental is preceded by an unaccented ν or ν (in which case, the dental is dropped from the acc. singular):

	Nom.	Base	Acc. sg.	Accent on -1-
	έλπίς	έλπιδ-	έλπίδα	yes
BUT:	ὄρνις	ὀρνιθ-	ὄρνιν	no
	χάρις	χαριτ-	χάριν	no

This will be easier to remember if you are in the habit of pronouncing the words aloud.

There are a number of other types of third declension consonant base nouns, but the ones given are the most common and will be sufficient for now.

Notes for Vowel Bases and Syncopated Nouns

- 1. -ευς nouns
 - a. all nouns of this type are masculine
 - b. -v- (of -evs) drops out before a vowel (i.e., in all cases except nominative and vocative singular and dative plural)

- c. $-\omega \varsigma$ in the genitive singular instead of $-\varsigma \varsigma$
- d. ϵ + ϵ contracts to - ϵ 1 (in nom. pl., thus - ϵ 1 ζ 2; the - $\eta\zeta$ form was, however, more common until 350 B.C.E.)
- 2. -ι and -υ bases
 - a. bases in ι and υ have ϵ in place of ι or υ in all cases except nominative, accusative, and vocative singular
 - b. -ως in genitive singular (for -ος)
 - c. masculines and feminines have - $\epsilon \iota \varsigma$ in nominative and accusative plural (the accusative ending is borrowed from the nominative). Neuters have - η for - $\epsilon \alpha$ in nominative and accusative plural.
 - d. accent of gen. in $-\epsilon\omega\varsigma$ is explained by transfer of quantity from $-\eta o\varsigma$
- 3. Neuters in -ος originally had base in -εσ-: γένος, original base γενεσ
 - a. $-\sigma$ between two vowels drops out
 - b. contraction occurs: ε + 0 becomes ov; ε + α becomes η

- 4. Syncopated nouns
 - a. drop ε of base in genitive and dative singular and dative plural (μήτηρ, base μητερ-, gen. sg. μητρός, dat. sg. μητρί, dat. pl. μητράσι)
 - b. dative plural in -ασι (πατράσι, μητράσι, θυγατράσι, γαστράσι, ἀνδράσι)
 - c. ἀνήρ drops - ϵ and inserts δ in all cases but nom. and voc. singular (i.e., decline as if the base were ἀνδρ-)

You are not expected to memorize these notes. Their purpose is to help you make sense of the patterns by pointing out the similarities and differences among them. Your time is better spent practicing the nouns themselves.

Vocabulary Notes

- 1. ἀνήρ man, corresponds to the Latin vir (as ἄνθρωπος is the equivalent of homo). ἀνθρωπος means man in the sense of human being, or man as opposed to animals, but ἀνήρ is primarily used of man as opposed to woman, or man as opposed to the gods (cf. Homer's epithet for Zeus, πατήρ ἀνδρῶν τε θεῶν τε). Usually ἀνήρ is a man in the prime of life rather than a youth (Xenophon gives the ages of man as παῖς, μειράκιον, ἀνήρ, πρεσβύτης: i.e., child, youth, man, elder).
- 2. ἄρχων is the participle of ἄρχω (see Lesson VII on participles), used as a noun, one who rules, ruler, chief, commander, etc. As an official title, it meant one of the chief magistrates at Athens, οἱ ἐννέα ἄρχοντες (the nine archons). Archons were also found in most states of central Greece, and the term generally refers to the highest office of the state. In Athens at first there were three ἄρχοντες, ὁ (ἄρχων) βασιλεύς, ὁ Ἄρχων (or ὁ ἄρχων ἐπώνυμος), and ὁ πολέμαρχος, who were elected yearly; and later their number was increased to nine (the other six being called θεσμοθέται, lawgivers). In 487 B.C.E. they began to be chosen by lot, and at this time seem to have lost any real political power and to have become administrators merely; at this time, the elected στρατηγοί (generals) became the most important officials. The ἄρχων ἐπώνυμος (eponymous) gave his name to the year: from 683 B.C.E. on, a continuous list of the archons was kept, by which the year was referred to (e.g., ἄρχοντος Ἀθήνησι Δαμασίου, when Damasias was archon at Athens, that is, in the year 582 B.C.E.). The Archon remained the nominal head of the state even after 487. The ἄρχων βασιλεύς seems to have had primarily religious duties, and the πολέμαρχος, though originally head of military affairs, later performed only judicial and sacrificial functions.
- 3. δαίμων: it is hard to give an exact definition of the word δαίμων, perhaps because even in antiquity it was a vague term, used in different ways by different writers. It can be applied to one of the great gods, but more usually corresponds to *divine power*, not exactly as an abstract idea but rather in its specific manifestations to men; the word θ εός on the other hand refers to a *god* in person. Sometimes the word δαίμων comes near to meaning *fate* (as in κατὰ δαίμονα *by chance*). And more particularly it may refer to the *destiny* of an individual, his *fortune* or *lot* (as in δαίμονα δώσω *I will give [you your] fate*, that is, *I will kill you*, from the *Iliad*). The poet Hesiod (whose works

along with those of Homer are sometimes considered the Bible for the ancient Greeks because Hesiod organized the myths about the origin of the gods and the ages of man) tells us that $\delta\alpha\mu\nu\epsilon\zeta$ are the souls of men of the Golden Age acting as protective deities.

For Plato and other philosophers, the δαίμονες had a more exact position in the universe. Being intermediate in nature, between gods and men, they had an intermediate dwelling place, in the air between heaven and earth. To the philosophers (though not to the poets, to be sure!) a god had to be morally perfect. This was a major bone of contention between the two, that the poets depicted the gods as being even more wicked than men (and enjoying it more); and this was one reason Plato considered the poets corrupting influences and would ban them from his ideal state. But though a god must be perfect, a δαίμων need not be so, and thus many later philosophers used δαίμονες to explain certain difficulties in the moral order and to help them to a solution of the problem of evil. Ancient stories about amorous, cruel, and vindictive behavior on the part of the divinities could be transferred to δαίμονες and not to genuine gods. Late Greek philosophy, particularly Neoplatonism, contained a large admixture of magic: real gods could not be influenced by sorcerers, but maybe δαίμονες could be; anyway it would not hurt to try. To the Olympians, these spirits were both good and evil, but to the Christians, since they were rivals to their one God, they became all bad, hence our *demons* are devils.

- 4. **Word formation:** we have now had a number of words derived from $\pi\alpha$ Ως, $\pi\alpha$ 1δ-: $\pi\alpha$ 1δίον, $\pi\alpha$ 1δίον, τ 6 little child, is the diminutive of $\pi\alpha$ Ως, the ending -10ν being the most common diminutive ending. Παιδεύω (teach, educate) bring up a child, is a denominative verb, i.e., derived from a noun, as the -ενω ending indicates. Other examples are βουλεύω from βουλή; βασιλεύω be king, from βασιλεύς; π 1στεύω from π 1στις. Παίδευμα, π 2αιδεύματος that which is taught (can mean either a pupil or a lesson), is derived from π 2αιδεύω, with the suffix -μα (-ματ-) added, denoting the result of an action. E.g., π 2ραγμα act, from π 2ράττω, stem π 2ραγ-, π 3, μάθημα from μαθ-, root and aorist stem of μανθάνω learn.
- 5. **πόλις** and **ἄστυ**: the territory of a πόλις included both the town and the country, what we call the *city-state*. The center of the government is in the town, and the surrounding country is politically, economically, and militarily dependent upon it, and is called after it. Ἄστυ is the actual *city* or *town* as opposed to the ἀγρός (*the country*), both of which make up the πόλις. The Athenians used the word ἄστυ as *the* city, that is *Athens*, just as the Romans used *urbs* to mean *Rome*. Sometimes πόλις is used more specifically to mean πόλις ἄκρη (or ἀκρόπολις), that is, the fortified part of the city, or *citadel*; while the lower town is called ἄστυ. But usually when ἄστυ and πόλις are used together, the former is the town in the material sense, buildings and so forth, while πόλις is the citizen body. (Who among the populace were actually *citizens* depended on the constitution of the particular state.)

6. τυραννίς: tyranny is a form of government in which the sovereignty is obtained by force or fraud, rather than by legitimate succession. Aeschylus in *Prometheus Bound* speaks of the tyranny of Zeus, $\dot{\eta}$ $\Delta i \dot{\delta} \dot{\varsigma}$ τυραννίς, because Zeus had seized the throne by violence, and his rule is furthermore given all the characteristics of a tyranny in the worst sense: might makes right, and justice is only for the strong. But the original tyrants (τύραννοι), who usurped the power in many oligarchic city-states (πόλεις) throughout Greece in the seventh and sixth centuries B.C.E. (during what is called the age of tyrants), generally brought improvement to their states. Sometimes tyranny was a step toward democracy, because the early tyrants came to power through political and economic championship of the lower classes, opposing the feudal rule of the nobles. The first tyrants did not change the constitutions but, as a rule, used the laws and institutions they had received as instruments of their own policy: their major contributions lay in economic modernization. They also contributed to culture, attracting the great musicians, painters, poets, and philosophers to their courts. Of course there is a danger inherent in tyranny, because the absolute ruler is potentially unlimited by law or constitution, and so there is no appeal beyond the man in power: everything depends upon the character of the tyrant. It is noteworthy that most tyrannies did not last beyond the second generation. (There is a story, no doubt apocryphal but amusing nevertheless, that Thales the philosopher, when asked what was the strangest thing he had ever seen, replied, "γέροντα τύραννον" an old tyrant.) The bad sense of the word tyranny was attached to it by the Athenian philosophers of the fifth and fourth centuries, especially Plato, who considered it the worst form of government, and finally by the later tyrants (especially the Syracusan dynasty) who proved that Plato was right. Thus, like the word δαίμων, which for religious reasons has given us *demon*, τυραννίς for philosophical and political reasons has deteriorated from a technical word for monarchy (whether good or bad) obtained through extra-legal means into *tyranny*, a wicked and despotic rule.

COLORS: χρώμα, χρώματος, τό color

English derivatives include: chrome, chromium, chromosome, Mercurochrome, monochrome, polychrome, chromatic, chromatics, and the more obscure and technical: chromodynamics, chromogenic, chromolithograph, chromomere, chromonemal, chromophil, chromophore, chromoplast, chromoprotein, chromosphere, chromous, adrenochrome, cytochrome, fluorochrome, phytochrome, siderochrome, stereochrome, trichrome, urochrome, chroma, chromaffin, chromate, chromatin, chromatogram, chromatograph, chromatography, chromatolysis, chromatophilic, chromatophore.

It has long been noticed that Greek terms for color, especially where hue, rather than brightness, is concerned, are deficient. Color terms are too few and those they have cover too much ground.

Some Greek color terms (these are just three examples):

Black (also dark, obscure: μέλας, μέλαινα, μέλαν) is used for wine, blood, a wave, water, the earth, ships (perhaps from the pitch they are sealed with), people, evening or night, and metaphorically of death, pain, fate, and necessity: θ ανάτου μέλαν νέφος, "a black cloud of death."

White (also clear, bright: λευκός, -ή, -όν cognate with Latin lux, *light*) is used of light, air, water, writing, snow, dust, marble, milk, teeth, bones, sails, hair, skin. White skin is a sign of beauty in women and effeminacy in men. λευκὴ ἡμέρα is a "happy day."

Greenish yellow (also yellow, green, pale, fresh: χλωρός, -ά, -όν) is used of plants, wood, sea-water, honey, sand, cheese, fish (not pickled), fruit (just picked), fresh (living) blood, skin that is sickly, fresh tears, wine, and fear. In a famous phrase of Sappho, the poet says she is "greener than grass":

χλωροτέρα δὲ ποίας ἔμμι. . . . —Sappho, fragment 31.14–5.

Lesson VI

Third Declension Adjectives, Result and Temporal Clauses

In this lesson you will learn adjectives of the third declension, completing the major patterns of adjectives, and some new constructions using verbs: result and temporal clauses, and conditions.

THIRD DECLENSION ADJECTIVES

Two important types of adjectives are declined in the third declension only: the $-\eta \varsigma$, $-\epsilon \varsigma$ type and the $-\omega v$, -ov type. Both are of two terminations (cf. $\dot{\alpha}\theta\dot{\alpha}\nu\alpha\tau \varsigma \varsigma$, -ov), the same form being used for the masculine and feminine. Many of these adjectives are compounds.

As you practice these adjectives, refer to the rules and examples of third declension nouns in the previous lesson.

Types and Forms

1. -ης, -ες type. Review γένος (stem γενεσ-) for the declension: these adjectives also have bases in -εσ-, but -σ- drops out as in γένος and the -ε- contracts with the vowel of the endings:

άληθής, άληθές (base άληθεσ-) true

	Singular m./f.		Plural	
	m./f.	n.	m./f.	n.
N	ἀληθής	ἀληθές	ἀληθεῖς [έ-ες]	ἀληθῆ [έ-α]
G	ἀληθοῦς [έ-ος]	ἀληθοῦς	ἀληθῶν	ἀληθῶν
D	ἀληθεῖ	άληθεῖ	ἀληθέσι	ἀληθέσι
A	άληθεῖ άληθῆ [έ-α] άληθές	ἀληθές	ἀληθεῖς	ἀληθῆ
V	ἀληθές			

The masculine-feminine accusative plural (å $\lambda\eta\theta\epsilon\hat{\imath}\varsigma$) takes the form of the nominative (as also happens with $\pi\delta\lambda\imath\varsigma$ and some other types of third-declension nouns).

2. -ων, -ον type. Review δαίμων:

εὐδαίμων, -ον happy

	Singular		Plural	
	m./f.	n.	m./f.	n.
N	εὐδαίμων	εὔδαιμον	εὐδαίμονες	εὐδαίμονα
G	εὐδαίμονος	εὐδαίμονος	εὐδαιμόνων	εὐδαιμόνων
D	εὐδαίμονι	εὐδαίμονι	εὐδαίμοσι	εὐδαίμοσι
A	εὐδαίμονα	εὔδαιμον	εὐδαίμονας	εὐδαίμονα
V	εὔδαιμον			

Besides compound adjectives like εὐδαίμων (base εὐδαιμον-), certain comparatives are declined similarly [X].

THIRD/FIRST DECLENSION ADJECTIVES

Several types of adjectives are declined in the third and first declensions: that is, masculine and neuter forms follow the third declensions while the feminine ones follow the first.

1. Bases in -υ-, with the nominative in -υς (m.), -εια (f.), -υ (n.). Review πόλις, ἄστυ, and the notes on -ι- and -υ- bases, for help with the masculine and neuter. The feminine is declined in the first declension [III], but with short -α- in the nominative and accusative singular:

εὐρύς, εὐρεῖα, εὐρύ wide

	Singular	•		Plural		
	m.	f.	n.	m.	f.	n.
N	εὐρύς	εὐρεῖα	εὐρύ	εὐρεῖς	εὐρεῖαι	εὐρέα
G	εὐρέος	εὐρείας	εὐρέος	εὐρέων	εὐρειῶν	εὐρέων
D	εὐρεῖ	εὐρεία	εὐρεῖ	εὐρέσι	εὐρείαις	εὐρέσι
A	εὐρύν	εὐρεῖαν	εὐρύ	εὐρεῖς	εὐρείας	εὐρέα
V	εὐρύ					

2. Bases in -ντ-: a few adjectives and many participles [VII] have bases in -ντ-. A very common adjective of this sort is $\pi \hat{\alpha} \varsigma$, $\pi \hat{\alpha} \sigma \alpha$, $\pi \hat{\alpha} v$ all, with the base $\pi \alpha v \tau$ -(v and τ dropping out before σ). The feminine is of the α/η type (like θάλαττα, θαλάττης sea [III]):

_	_	_	11
πας,	πᾶσα,	παν	all

	Singular	•		Plural		
	m.	f.	n.	m.	f.	n.
N	πᾶς	πᾶσα	πᾶν	πάντες	πᾶσαι	πάντα
G	παντός	πάσης	παντός	πάντων	πασῶν	πάντων
D	παντί	πάση	παντί	πᾶσι	πάσαις	πᾶσι
A	πάντα	πᾶσαν	$\pi \hat{\alpha} \nu$	πάντας	πάσας	πάντα

πᾶς (or σύμπας) usually is found in the predicate position, as in οἱ ἄνδρες πάντες all the men. In the attributive position it is used to mean the entire number, or the whole amount, or the sum total, as ἡ πᾶσα Σικελία the whole of Sicily, οἱ πάντες ἄνθρωποι all mankind. These distinctions are not very great. πᾶς can also be used without the article to mean all, every.

SYNTAX

Result Clauses

The conjunction $\omega \sigma \tau \epsilon$ (or sometime $\omega \varsigma$), so that, so as to, is used to express result, either (1) the actual result, or (2) the result which the action of the main verb tends or intends to produce or is capable of producing.

- 1. ὄστε with the *indicative* expresses the actual result, that is, it implies that the second action *actually* happened or is happening as a *result* of the first. The negative with this type of result clause is oὐ.
- 2. ὥστε with the *infinitive* implies a possible or intended result or a tendency, rather than an actual fact. The negative after ὥστε with the infinitive is μή.

Examples:

- τὸ ἀληθὲς λέγει ὥστε πιστεύεται.
 He tells the truth with the (actual) result (so that, and so) he is trusted.
- τὸ ἀληθὲς λέγει ὥστε πιστεύεσθαι.
 He tells the truth so as to be trusted (so that it is natural for him to be trusted).
- 3. οὕτως αἰσχρός ἐστιν ὥστε τὸν ξένον ἀπέκτεινεν. He is so shameless that he killed his guest.
- 4. οὕτως αἰσχρός ἐστιν ὥστε τὸν ξένον ἀποκτεῖναι. He is so shameless that he would kill his guest. (He is shameless enough to do it; but there is no implication that he actually did it. The indicative, on the other hand, emphasizes the actual occurrence of the result.)

Some examples from Greek authors:

```
πᾶν ποιοῦσιν ὅστε δίκην μὴ διδόναι.

They do everything so as not to be punished.

—Plato, Gorgias

οὕτως ἀγνωμόνως ἔχετε, ὥστε ἐλπίζετε αὐτὰ χρηστὰ γενήσεσθαι;

Are you so witless that you (actually) expect them to become good?

—Demosthenes
```

Temporal and Causal Clauses

A temporal clause is introduced by a conjunction of time:

```
ὄτε when ἕως as long as, until ἐπεί after, when ἐπειδή after, when πρίν before, until
```

When the clause refers to a definite time in the present or past, the indicative mood is used (except for $\pi\rho$ iv; see below). For temporal clauses referring to indefinite time, see the section on the uses of the subjunctive and optative. The negative is où, unless the clause is conditional.

Examples of temporal clauses:

- τὴν πόλιν ἐλίπομεν ἐπειδὴ (ἐπεὶ) ἔλαβον τὰ δῶρα.
 We left the city when they took the gifts.
- 2. ὅτε τὸ ἀληθὲς ἐμάθομεν, τοὺς ἀδίκους ἐκρίναμεν. When we had learned the truth, we judged the guilty.
- 3. ἐμείναμεν ἕως Ἑλλάδα ἐλίπετε. We waited until you left Greece.

ἐπεί and ἐπειδή also have a causal sense:

γράφω ἐπειδὴ (ἐπεὶ) γράφειν οὐκ ἐθέλεις. I am writing since you do not wish to write.

πρίν before, until:

- 1. After a negative clause, $\pi \rho i \nu$ means *until* and takes the indicative (of a definite time), in the agrist or imperfect.
- 2. After an affirmative clause, $\pi \rho i \nu$ means before and takes the *infinitive*.

Examples:

- 1. οὐκ ἤλθομεν πρὶν Ἑλλάδα ἐλίπετε. We did not come until you left Greece.
- 2. Ἑλλάδα ἐλίπομεν πρὶν τῶν σοφῶν ἀκούειν. We left Greece before hearing the philosophers.

Conditions

A condition consists of two clauses, the **protasis** (or *if*-clause) and the **apodosis** (or conclusion-clause). The negative used in the protasis is usually $\mu \dot{\eta}$; in the apodosis, $o\dot{v}$.

- 1. A **simple condition** has εi (*if*) with the indicative in the protasis, and the indicative (or whatever mood the sense requires) in the apodosis. A simple condition implies nothing as to actual fulfillment:
 - a. εἰ βούλει, ἐγὼ ἐθέλω.
 - *If you wish, I am willing.*
 - b. εἰ μὴ τῷδε πιστεύεις, σοφὸς οὐκ εἶ.
 - *If you do not trust this man, you are not wise.*
- 2. A **condition contrary-to-fact** has ε i with a past tense of the indicative (imperfect or aorist) in the protasis, and a past tense of the indicative with α in the apodosis. A condition contrary-to-fact (or unreal condition) implies that the supposition cannot be or could not be fulfilled. The imperfect refers to present time (or sometimes to continued action in the past) and the aorist to simple action in the past.
 - εἰ ταῦτα ἔλεγες, οὐκ ἂν τὴν ἀλήθειαν ἔλεγες.
 - If you were saying these things, you would not be speaking the truth.
 - b. εἰ μὴ ἤλθετε, ἐλίπομεν ἂν τὴν χώραν ἐκείνην.
 - *If you had not come, we would have left that place.*
 - c. εἰ οἱ δικασταὶ δίκαιοι ἤσαν, οὐκ ἂν τὰ ἄδικα δῶρα ἔλαβον.
 - If the jurors were just, they would not have received the unjust gifts.

—Isocrates, To Demonicus

Ἄνθος, -ους, τό flower, pl. ἄνθη

Photo by L. J. Luschnig.

Several English words relating to flowers come from Greek ἄνθος, including: ailanthus (the "tree of heaven," the weed tree of the title *A Tree Grows in Brooklyn*), chrysanthemum (golden flower), agapanthus (love flower, the African lily), and Dianthus (< diosanthos, Zeus' flower, a genus that includes carnations and pinks), as well as words for flower parts such as anther and perianth.

Anthology comes from Greek ἀνθολογία < ἀνθο - + λέγειν (to gather).

The Greek Anthology, also called the Palatine Anthology, is a collection of more than 6000 short poems (epigrams, songs, epitaphs) by over three hundred authors from the seventh century B.C.E. to about 1000 C.E. The term anthology comes from the name the first-century poet Meleager gave to his

compilation, $\sigma \tau \dot{\epsilon} \phi \alpha v o \zeta$ (the Garland or Crown of Flowers, in which each poet was compared to a flower), which became the basis of the Palatine Anthology. Its importance lies in the excellence of many of the poems, the continuity of the Greek poetic tradition that it illustrates, and its influence on poets in many languages and through the centuries.

Compare, for example, this anonymous Greek "valentine" to the second stanza of Ben Jonson's "To Celia."

πέμπω σοι μύρον ἡδύ, μύρω παρέχων χάριν, οὐ σοί αὐτὴ γὰρ μυρίσαι καὶ τὸ μύρον δύνασαι. I am sending you a sweet perfume, a favor to it, not you. You can make even perfume smell sweet.

I sent thee late a rosy wreath,
Not so much honouring thee
As giving it a hope that there
It could not wither'd be;
But thou thereon didst only breathe,
And sent'st it back to me;
Since when it grows, and smells, I swear,
Not of itself but thee!

Lesson VII

Participles

In this lesson you will learn the forms and uses of participles (present, future, aorist active, and middle or middle-passive). Because Greek is $\phi\iota\lambda o\mu\dot{\epsilon}\tau o\chi o\varsigma$ (fond of participles), use of participles is an important form of subordination.

PARTICIPLES: PRESENT, FUTURE, AORIST ACTIVE AND MIDDLE/MIDDLE-PASSIVE

Definition

Participles are *verbal adjectives*. That is, they have the qualities of both verbs and adjectives. Dionysius Thrax defines the participle as follows: Μετοχή ἐστι λέξις μετέχουσα τῆς τῶν ἡημάτων καὶ τῆς τῶν ὀνομάτων ἰδιότητος: *A participle is a part of speech which shares* (lit. *sharing*) *the peculiarities of both verbs and nouns/adjectives* (adjectives are classed under ὀνόματα in Greek grammatical theory). As adjectives they are declined in gender, number, and case and agree with a noun (whether expressed or implied). As verbs they have tense and voice, and can take an object. Participles are very common in English, but even more so in Greek.

Some examples of the uses of participles in English:

1. As adjective (Attributive Use)

The established Church

The *ruling* class

The *missing* link

2. In a descriptive clause or phrase (Circumstantial Use)

The soup is on the stove, *boiling* away.

The Greek troops, *led* by Agamemnon, defeated Troy in ten years' time.

3. Objective and Supplementary

He stopped *talking*.

4. Treatment of participles in forming compound tenses, such as "I wasn't *talking*"; "I have never *done* that"—since this use is so well known—will be omitted.

It is important to keep in mind that participles are adjectives derived from verbs. A participle can thus have tense, as is evident in the first two examples above: *established* is a past participle while *ruling* is present. Greek has present, future, aorist, and perfect participles. The participle also has voice; of the previous examples, *established* is passive and *ruling* active. Greek has separate forms for active, middle/middle-passive, and—in the aorist and future tenses—passive participles.

Forms

Review ὁ ἄρχων [V] and πᾶς πᾶσα πᾶν [VI] for the declension.

All tenses of participles are formed from the corresponding tense stem. Thus, the present participle of $\lambda \acute{\nu}\omega$ is formed by adding the proper participial endings to the present stem $\lambda \upsilon$ -. Likewise the future participle is formed from the future stem $\lambda \upsilon \sigma$ - (from $\lambda \acute{\nu}\sigma\omega$); the aorist from the stem $\lambda \upsilon \sigma(\alpha)$ - (from $\acute{\epsilon}\lambda \upsilon \sigma\alpha$: participles are not augmented). Review the principal parts of the verbs you have studied so far (p. 89).

Active Participles

All active participles (except the perfect, VIII) have bases in -vt-. Thematic tenses (present, future, and second aorist) form active participles in -ovt- (cf. $\alpha\rho\chi\omega\nu$). The first aorist, with its characteristic α , has - $\alpha\nu\tau$ - (as in $\pi\alpha\varsigma$, base $\pi\alpha\nu\tau$ -). The masculine and neuter are declined in the third declension, the feminine in the first.

Example: Present Middle-Passive Participle of λύω: λυόμενος.

Participles are not so very difficult once you recognize the logic of them and understand what they are: adjectives derived from verbs. The word "participle" comes from the Latin word participium (a sharing or partaking), which is a direct translation of the Greek word μετοχή. The Greeks thought of the participle as a separate part of speech, but as the name implies they recognized clearly enough that it shared the characteristics of two other parts of speech. We do not usually think of the participle as a separate part of speech, but we should realize that the parts of speech are not necessarily mutually exclusive.

Exercise A

1. a. Practice in the forms of the participles. Review verbs on p. 89 and translate these phrases, using the nom. sg. form, m., f., n.

Example: after learning—μαθών, μαθοῦσα, μαθόν

- 1. after announcing 7. planning for onself
- 2. in order to lead
- 3. in order to hear
- 4. dying
- 5. after killing
- 6. being ruled
- 8. in order to write
- 9. being thrown
- 10. ransoming
- 11. after judging
- 12. having become
- 1. b. Translate (for present participles use "-ing" / "being"; for future "in order to"; for aorist "after -ing"). After reading the section on uses of participles, see if you can identify the use of each participle in these sentences.
 - 1. πεμψάμεναι οὖν τὰ νέα βιβλία ἐμείναμεν.
 - 2. ἀκούοντες τῶν γε πολίτων οἱ ξένοι ἦσαν εὐτυχεῖς.
 - 3. ἔρχεται γὰρ εἰς τήνδε τὴν νῆσον ἀκουσομένη τῆς σοφῆς λεγούσης περὶ τοῦ κόσμου.
 - 4. ἐπαύσαντο δῶρα πέμποντες.
 - 5. ἤγαγε δὲ οὖτος ὁ νεανίας τὰ παιδία εἰς τὴν νῆσον πεμπόμενα.
 - 6. βουλεύσαντες ἔκριναν.
 - 7. ταῦτα πράττουσα εὖ [well] πράξει.

Uses of Participles

There are in general three ways of using participles.

General Usage

- 1. **Attributive.** The participle is used as an adjective, modifying the noun in the same way as the adjective does, often with the article (e.g., a *moving* vehicle, a *dangling* participle).
- 2. **Circumstantial.** The participle, used without the article, in agreement with a noun or pronoun (expressed or implied) and introducing a clause which defines the circumstances of an action (i.e., an action as expressed by the main verb). "He went home, *disgusted* at the behavior of his colleagues." Under this heading also comes the genitive absolute.
- 3. **Supplementary.** The participle is used to complete the idea expressed by the verb; there are a number of Greek uses that differ from English usage. Under this heading we may also place the use of the participle after verbs of perception and in indirect statement. Examples: "Stop *doing* that!" or "Keep on *going!*" or "He finished *eating,*" all of which correspond to Greek usage.

Examples of the Uses of Participles in Greek

- 1. Attributive (as adjective)
- a. Used with a noun and usually with an article:

ὁ παρὼν χρόνος, the present time (παρών, present participle of πάρειμι, being present)

Many English participles do not lend themselves to this use, and for this reason, many of the Greek participles must be paraphrased in the English translation either by a relative clause or by an adjective or noun; this is especially true of the attributive participle used as a noun (b).

b. Like the adjective, the participle may be used as a noun with the article (the *man*, *woman*, or *thing* being omitted; cf. oi $\dot{\alpha}\gamma\alpha\theta$ oí, *the good*: the masculine gender makes it clear that *the good people* is implied).

Examples:

οἱ φεύγοντες	those who flee/are fleeing; the fugitives, the exiles
ὁ διώκων and ὁ φεύγων	the one who pursues and the one who flees: in a
	courtroom context, the prosecutor and the
	defendant
ὁ ἄρχων	the one who rules, originally a participle from
	ἄρχω (the ruling man), hence the ruler, so

common that it is considered a noun.

τὸ ἄρχον in the neuter, that which rules (the ruling thing

can best be translated as the ruling party.)

the [woman who] died, the dead woman ή θανοῦσα

μῶν τὴν θανοῦσαν ἀφελεῖν τι προσδοκᾶς; Do you expect to benefit the dead woman in any way? —Euripides, *Alcestis*

Interesting too are the uses of the neuter participles of εἰμί: τὸ ὄν and τὰ ὄντα that which is/exists; those things which are/exist (lit. existing things) respectively; but both may be translated as the universe. Cf. also τὰ πάροντα the present circumstances.

> οἱ ἔχοντες and οἱ οὐκ ἔχοντες those who have and those who do not have, i.e., the rich and the poor, or the haves and the have-nots.

c. Remember that the participle is a verbal form and so can take an object: ὁ ταῦτα εἰπών (lit. the one having said these things) the one who said these things.

Exercise A (continued)

- a. Study the examples and translate these sentences.
 - 1. οί γὰρ διώκοντες τὴν φεύγουσαν ἔλαβον.
 - 2. ή γε ἀποθανοῦσα οὐ λέξει.
 - 3. οἱ ἐν ταύτη τῆ πόλει ἄρχονται ὑπὸ τῶν ἀρχόντων.
 - 4. ὁ ταῦτα ἀγγείλας ἀπῆλθεν.
 - 5. εἶπες οὖν τοῖς τοῦ ποιητοῦ ἀκούσασι;
 - 6. τούς δὲ οὐκ ἔχοντες ἐπέμψασθε;
- **2.** b. Make up sentences using the following.
 - 1. αί γραφόμεναι
- 4. ἡ πείθασα
- 2. τὰ πάροντα
- 5. ὁ βουλόμενος
- 3. τὰ βουλευόμενα 6. οἱ λύοντες

2. Circumstantial

The circumstantial participle defines the circumstances surrounding the action of the main verb and may express time, manner/means, cause, condition, concession: that is, when, in/by, since/because, if, although. It can also be merely descriptive. The context (or sense) of the sentence will usually tell you which is intended, though sometimes more than one of these relations may be implied. These different types of the circumstantial participle do not differ from one another *except in context*; therefore you need not make sharp distinctions among them. When translating them, first translate them literally, even though it may be awkward in English (having done, doing, having been done, etc.), and then as the whole sentence becomes clearer, you may add an appropriate word, such as *if*, *when*, *although*. There are, to be sure, clues which will sometimes make the meaning clearer (e.g., whether où or $\mu\dot{\eta}$ is used, and a number of particles).

A. Time (when, after): Temporal

In narration, the participle is very common for a series of events. The use of participles can extend the sentence indefinitely, as you will see when you read long passages from Thucydides and Isocrates.

In English, when narrating a series of events, we tend to use a series of finite verbs in separate clauses, whether coordinate or subordinate. We may say, for example, "After killing the man, he got away," or "He killed the man and got away," or "After he killed the man, he got away." The first uses a participle, the second two coordinate clauses, and the third a subordinate clause. In Greek the verb of the first clause would be expressed by a participle in the *aorist*, that of the second by a finite verb:

τὸν ἄνθρωπον ἀποκτείνας, ἔφυγεν.

There are other ways of expressing this in Greek, but this would be the most common and the easiest.

→ Note that in translating an English phrase or clause introduced by the word *after*, it is best to use the aorist participle.

Another example:

φεύγοντες ἀπέθανον fleeing (while they were fleeing) they were killed.

Participles used with temporal particles:

ἄμα at once, at the same time

ἄμα εἰπὼν ἔβαλε τὸν λίθον, at the same time as speaking,

he threw the stone.

αὐτίκα at once

αὐτίκα γενόμενος, as soon as born

μεταξύ in the midst of, while

μεταξὺ θύων, while sacrificing

λέγοντα μεταξύ, in the midst of the discourse

B. Causal (because, since)

Example:

πολλὰ εἶπε, βουλόμενος τὸν βασιλέα πεῖσαι. He said many things because he wished to persuade the king. The causal particles that can be used with participles are:

ἄτε inasmuch as, seeing that, since

ώς, ὥσπερ as causal particles give an alleged cause for which the

speaker/writer does not wish to take credit. They may be translated as as if, as though, as thinking, on the grounds that.

Example:

ἄτε τὰ χρήματα ἔχων seeing that he has the money

θαυμάζονται ώς σοφοί ὄντες

They are admired as if (on the grounds that) they are wise.

δεδίασι τὸν θάνατον ὡς εὖ εἰδότες ὅτι μέγιστον τῶν κακῶν ἐστι. They fear death as though they know well that it is the greatest of evils.

—Plato, Apology

C. Manner and Means (in, by)

τὴν ἀσπίδα ἀποβαλών, ἔφυγε τὸν θάνατον. By throwing away his shield, he escaped death. (means)

—Xenophon

ήκει τὰ χαλεπὰ φερόμενα.

The troubles have come <u>with a rush</u>. (manner) (lit. The troubles have come being carried. An idiomatic use of the middle–passive participle of $\phi \in \rho \omega$.)

D. Conditional (if)

ταῦτα λέγων, οὐκ ἂν τὴν ἀλήθειαν ἔλεγες. If you were saying these things, you would not be speaking the truth. (lit. Saying these things you would not be speaking the truth.)

The negative in the participial clause (which represents the if-clause or *protasis* of the condition) is $\mu \dot{\eta}$: this will give you a hint to translate it as a condition, since most other uses of the participle take $o\dot{v}$ as negative.

σοφοὶ μὴ ὄντες, οὐχ ἔξετε μαθητάς. If you are not wise, you will not have pupils. (lit. Not being wise, you will not have pupils.)

E. Concession (although)

πολλὰ χρήματα ἔχων, οὔκ εἰμι εὐτυχής. Although I have much money, I am not happy.

The particles καίπερ and καί (*although, even though*) can also be used with the circumstantial participle of concession.

F. Purpose (to, in order to) is usually expressed by the future participle, sometimes with $\dot{\omega}\varsigma$.

```
ἡλθε . . . λυσόμενος τε θύγατρα (= θυγατέρα)
He came to ransom his daughter.
—Iliad I.13
ὁ ἡγησόμενος οὐδεὶς ἔσται.
There will be no one to lead/who will lead [us].
—Xenophon
```

G. Description

ἦλθε πολλὰ δῶρα φέρων (or ἔχων) He came bearing many gifts.

The participles ἔχων, φέρων, ἄγων, λαβών are often used idiomatically and may be translated as with.

```
ἔρχεται τὸν υἱὸν ἔχουσα.
She comes <u>bringing</u> her son, or she is coming <u>with</u> her son.
—Xenophon
```

The Genitive Absolute

The genitive absolute is a special use of the circumstantial participle. A noun or pronoun and a participle are put into the genitive case in an absolute construction (so called because it does not agree with any other words in the sentence, and stands by itself, grammatically). It is translated by a clause and can be used to express any of the attendant circumstances a circumstantial participle does. In English we have a similar construction, called the nominative absolute (English being severely limited in the number of its cases): for example (from Eric Partridge, Usage and Abusage), "On the door being opened, she perceived a couch." The clause in italics is an absolute construction: grammatically it stands outside the main clause. On the other hand, had we written "Upon opening the door, she perceived the couch," the participial clause would be a descriptive, adjectival one agreeing with she. Common expressions in English using a nominative absolute are "other things being equal" and "that said." In the absolute construction, then, the participial clause which describes the circumstances stands outside the main sentence grammatically. The genitive absolute in Greek (like the ablative absolute in Latin) is very common and very versatile, owing to the many forms and uses of the Greek participle. It can express time, manner, means, cause, condition, concession, purpose, and description. It can be used plain or with any of the particles that can accompany the participles.

Examples:

καὶ τῶν φίλων τὴν χώραν λιπόντων, ἐμείναμεν. **Although our friends left the place,** we remained.

τῆς φίλης μὴ ἐλθούσης, ἐλίπομεν ἂν τὴν χώραν. *If our friend had not come,* we would have left the place.

τῶν πολιτῶν δικαίων ὄντων, δικαία ἐστὶν ἡ πόλις. Because the citizens are just, the city is just.

τοῦ πατρὸς οὐ βουλομένου, ταῦτα οὐ πράξομεν. Since father does not wish it, we will not do these things.

λόγων γενομένων, ἀπῆλθον οἱ νεανίαι καὶ αἱ γυναῖκες. The conversation having taken place (after the conversation), the young men and the women departed.

Some examples from Greek authors:

1. καὶ Πολυφόντου κελεύοντος ἐκχωρεῖν, . . . Οἰδίπους καὶ Πολυφόντην καὶ Λάϊον ἀπέκτεινε.

And when Polyphontes ordered [him] to get out of the way, Oedipus killed both Polyphontes and Laius.

- —Apollodorus
- 2. Άθηναίων δὲ τὸ αὐτὸ τοῦτο παθόντων, διπλασίαν ἂν τὴν δύναμιν εἰκάζεσθαι (οἷμαι).

If the Athenians should experience this same thing, I think their power would be estimated as double.

- —Thucydides
- πῶς δίκης οὕσης ὁ Ζεὺς οὐκ ἀπόλωλεν;
 If justice exists, how is it that Zeus has not perished?
 - —Aristophanes

Note: A rarer construction is the **accusative absolute**, which is used in the same way as the genitive absolute, but is restricted to the participles of impersonal verbs: these are put into the accusative in the neuter singular, $\pi\alpha\rho\delta\nu$ μ ou, it being possible for me; $\delta\epsilon$ ov $\dot{\eta}\mu\dot{\imath}\nu$ $\dot{\alpha}\pi\dot{\imath}\epsilon\nu\alpha\iota$, it being necessary for us to depart. $\delta\epsilon$ ov is the neuter accusative participle of the impersonal verb $\delta\epsilon\hat{\imath}$.

Exercise A (continued)

- a. Study the examples of circumstantial participles and translate. For the genitive absolute it may help to begin: with + the *noun* + the *verb* + *-ing* (e.g., "with poets be-ing present") and then try to make it more elegant as you understand the context ("because/when/if poets are present").
 - 1. τῶν ποιητῶν ἀκούσασα ἦλθον ὡς ἀκουσομένη τῆς σοφῆς.
 - 2. καὶ τὸν πατέρα ἀποκτείνας ἑκείνης τῆς πόλεως βασιλεὺς ἐγένετο.
 - 3. τὴν δὲ μητέρα ἀποκτείναντες ἔφυγον ἐκ τῆς πατρίδος.
 - 4. ταῦτα ἔπραξα ὡς ὄντα δίκαια.
 - 5. τῶν παίδων ἀποθανόντων ἡ μήτηρ ἔφυγεν εἰς τήνδε τὴν πόλιν.
 - 6. δῶρα φέροντες ἐρχόμεθα ὡς τὸν βασιλέα πείσοντες.
 - 7. ὁ γέρων ἦλθε ὡς τὴν παῖδα λυσόμενος.
 - 8. τοῦ πολέμου παυομένου εἰρήνην ἄγειν οἶόν τ' ἔσται.
 - 9. ξένων έλθόντων οὐκ ἂν ἐλίπομεν.
- b. Make up sentences using the following words.
 - 1. λυσομένη
- 4. ἀκούουσα
- 2. ὡς ἄν
- 5. παρόντων
- 3. λέγοντες μεταξύ 6. ἀποθανόντος

3. Supplementary

The supplementary participle is more closely related to the verb: it is used to complete the meaning of the verb, and without it the idea is incomplete. The supplementary participle may go with either the subject or the object of the verb, for example:

```
παύω (active): παύω τὸν ἄνδρα λέγοντα
I stop the man (from) speaking.
παύομαι (middle): παύομαι λέγων/λέγουσα
I stop (myself) speaking or I cease speaking.
```

This construction is found with verbs meaning begin, continue, stop (cf. in English "keep on keeping on"), and with those meaning repent, be weary, be pleased or displeased, allow.

```
ἄρξομαι λέγων I shall begin speaking.
παύσω τοῦτο γιγνόμενον I shall stop this from happening.
  —Plato
```

Some of these verbs may take both the supplementary participle and the supplementary infinitive constructions, but with different meanings:

In the first example, the participle *speaking* (λ έγων/ λ έγουσα) implies that I am actually speaking, ashamed or not; in the second, the infinitive *to speak* (λ έγειν) implies that my shame prevents me from speaking. This subtle difference in construction makes a great deal of difference in meaning.

There are several verbs in Greek which take a supplementary participle in a way that seems odd to us at first, because it differs from English usage. In these sentences the participle tells what the main action is, while the main verb tells something about how the action is occurring.

τυγχάνω happen (we use the infinitive, Greek uses the participle):

τυγχάνει δίκαιος ὤν, He happens to be (lit. being) honest or He really is honest. (Often forms of τυγχάνω are used to emphasize that something is indeed true.)

λανθάνω escape the notice of (we usually translate the participle by a finite verb and express the form of λ ανθάνω by an adverb, unawares, without being observed):

οὐ λανθάνει κακὸς ὤν lit. He does not escape notice being wicked ἔλαθον ἐσελθόντες They got in secretly.
—Thucydides

 $\phi\theta$ άνω *anticipate, come/do/be first* or *before* (the action in which one is ahead of somebody else is expressed by the participle):

ἔφθασαν τοὺς φίλους ἐλθόντες lit. They anticipated their friends having come. Or, They got there before their friends / They got the jump on their friends

Other uses of the supplementary participle:

In **Indirect Statement:** with verbs of *knowing* (and the opposite, those meaning *be ignorant*, *forget*) and *showing*, and with verbs of sense perception (*see*, *hear*, *feel*) the participle is used in indirect statement.

Examples:

ή ψυχὴ ἀθάνατος φαίνεται οὖσα.

It is apparent that the soul is immortal (i.e., it really is immortal).

—Plato

ὁρῶμεν πάντα ἀληθῆ ὄντα ἃ λέγετε.

We see that everything you say is true.

—Xenophon

ήκουσε Κύρον έν Κιλικία ὄντα.

He heard that Cyrus was in Cilicia.

—Xenophon

With **Verbs of Perception**, the participle not in indirect statement can be used to modify the object of the verb, as in these English sentences: "I saw Mommy kissing Santa Claus," or "I hear him coming"; compare with "I hear that he is coming."

The verbs ἀκούω and αἰσθάνομαι take their object in the genitive case (except in indirect statement). Consider the following examples:

ἀκούω τοῦ σοφοῦ λέγοντος. I hear the wise man speaking. (That is,

I actually hear him.)

ἀκούω τὸν σοφὸν λέγοντα. I hear that the wise man is speaking.

Exercise A (continued)

4. Translate.

- 1. τυγχάνομεν οὖσαι δίκαιαι γυναῖκες.
- 2. πράττοντες ἄδικα οὐκ ἐλάνθανον.
- 3. ἔφθασαν δῶρα ἐνεγκοῦσαι.
- 4. φθάνουσιν ἐκείνας φεύγοντες.
- 5. ἤρξατε βουλευόμενοι.
- 6. ταῦτα λέγοντες οὐκ αἰσχύνεσθε;

Tenses of the Participle

The tenses of the participle (except in indirect statement) represent time only as relative to the main verb. The **present** refers to an action *at the same time* as that of the main verb (*while*); the **aorist** refers to time *previous* to that of the main verb (*after, having*). The **future** participle is used for expressing *purpose* or *intention*, and is rarely used otherwise.

In indirect statement, however, the participle's tense represents the same tense as that of a finite verb, that is, the tense of the original statement, as in the infinitive construction [IV].

Notes on Participles

- 1. "There is but one difference between the supplementary and circumstantial participles. It lies in the fact that the circumstantial participle is an additional statement and does not form an essential part of the verbal notion of the principal verb [as does the supplementary participle]. The circumstantial participle may be removed and the sentence will not bleed." (A. T. Robertson, *A Grammar of the Greek New Testament in the Light of Historical Research* [New York: Hodder & Stoughton, Doran, 1914] p. 1124)
- 2. The Greeks, as mentioned before, were φιλομέτοχοι (fond of participles), and Greek has a rich system of participles, richer than Latin or English, for example. Latin has no present passive nor perfect active participles. And English must resort to long periphrases to translate some of the participles (notably the future participle). It may be said that wherever a participle is possible, Greek has one. This wealth of participles gives a great deal of flexibility to the language, as you will see, the more you read.
- 3. The dangling participle: For most of us our introduction to participles in our own language—if in fact we are introduced to them at all—is usually in connection with the problem of the *dangling* participle. This is a problem that does not occur in Greek.

→ Consider why not.

I saw the Grand Canyon driving through Arizona, contains an example of a dangling participle in English. Actually we know what this means, that I saw it while I was driving, because the grammatically correct alternative, that the Grand Canyon was driving, is absurd or the result of sampling the local hallucinogens. On the other hand, if, in the sentence I saw that man driving my car, I mean I saw him while I was driving, I do not say so, because, by the placement of the words, driving goes with that man. In the first example the intended meaning is clear, and a speaker of this sentence would only risk not understanding the hearers' laughter. In the second, carelessness could lead to confusion, because in English the placement of words is very important. In Greek there is no confusion about what words the participle goes with because it will be in the same case and gender as these words. If it goes with the subject it will be nominative. If it goes with the object it will be accusative. Its place in the sentence does not matter. Thus, if I saw that man while I was driving, driving is nominative to agree with *I*. If I saw him actually in the driver's seat of my car with his foot on the gas, driving is accusative to agree with the object of saw.

Recognizing participles

- 1. -ovt- tells you that it is an active participle of one of the thematic tenses: future, present, or second agrist.
 - a. most futures will have σ before the -ov τ -.

Gorgon Stories

Photo by L. J. Luschnig.

What happened next to the Gorgon's severed head? Medusa's head was ultimately fixed to Athena's shield or in the middle of her aegis, a grim medallion. It remained an image of horror because of its ability, even after the decapitation, to turn anyone who looked at it into stone. In John Barth's *Chimera*, it figures in the foundation of a sculpture museum.

In Euripides' *Alcestis* it is a symbol of revulsion to Admetus who says (1118), when he is asked to receive a new woman after his wife has died for him:

Καὶ δὴ προτείνω, Γοργόν' ὡς καρατομῶν

Then, I reach out my hand, as if to behead a Gorgon,

only to discover a moment later that the woman is his wife, returned from the grave. In Euripides' *Electra*, the Gorgon appears on Achilles' shield in a choral ode and is later (855–8) referred to when Orestes brings his sister the head of Aegisthus (their father's murderer and the usurper of his throne). Whether the head is still attached to the body is a subject of debate among critics:

ἔρχεται δὲ σοὶ κάρα 'πιδείξων οὐχὶ Γοργόνος φέρων, ἀλλ' ὂν στυγεῖς Αἴγισθον.

[Orestes] is coming now bringing not the Gorgon's head to show you, but Aegisthus whom you hate.

At the end of the play Orestes is told to go to Athens, where Athena will protect him from the Furies by shaking the Gorgon face at them.

In *Phoenician Women*, a later play of Euripides, the Gorgon figures again as a symbol of hatred and lack of communication in that most dysfunctional of families, the household of Oedipus, when Jocasta says to her son Eteocles, who is set on killing his brother Polynices (455–6):

οὐ γὰρ τὸ λαιμότμητον εἰσορᾶς κάρα Γοργόνος, ἀδελφὸν δ' εἰσορᾶς ἥκοντα σόν.

You are not looking at the Gorgon's severed head but at your brother who has come here.

LESSON VIII

Pronouns; Perfect, Pluperfect, and Future Perfect Active; Aspect

In this lesson you will learn more pronouns, the perfect active (the fourth principal part), and more about aspect. You will also begin writing synopses which help you see a verb in all its glory at a glance and practice six verbs in the time of one.

PRONOUNS: INTERROGATIVE, INDEFINITE, RELATIVE INDEFINITE, RECIPROCAL

The **interrogative pronoun** *who?*, *what?* is $\tau i \varsigma$, τi in Greek. It always takes the acute on the first syllable (and this never changes to the grave).

The **indefinite pronoun** *anyone, someone, anything, something* is enclitic, but otherwise is spelled in the same way as the interrogative. Both are declined in the third declension with the base τv_r .

Interrogative			Indefinite		
m./f.	n.	Sg.	m./f.	n.	
τίς	τί	N	τις	τι	
τίνος (τ	:οῦ)	G	τινός (1	τινός (του)	
τίνι (τῷ	τίνι (τῷ)		τινί (τα	o)	
τίνα	τί	A	τινά	τι	
m./f.	n.	Pl.	m./f.	n.	
τίνες	τίνα	N	τινές	τινά	
τίνων		G	τινῶν		
τίσι		D	τισ	ί	
τίνας	τίνα	A	τινάς	τινά	

The alternate forms given in parentheses are fairly common. You should be aware of them, and use the context to distinguish $\tau o \hat{\upsilon}$ and $\tau \hat{\wp}$ from the forms of the article that look the same. The accent and punctuation will help you to distinguish the interrogative from the indefinite.

The interrogative $\tau i \varsigma$ and the indefinite $\tau i \varsigma$ may be used as either pronouns or adjectives:

τίς ἔρχεται; Who is coming?	or	τίς ἀνὴρ ἔρχεται; What man is coming?
λέγει τις Someone says.	or	λέγει γυνή τις Some woman says.

The indefinite is sometimes equivalent to the English indefinite article (a, an):

εἶδον ἄνθρωπόν τινα. *I saw a man* (or, a certain man).

		m.	f.	n.
Sg.	N	ὄστις	ἥτις	ὄ τι
	G	οὖτινος (ὅτου)	ἡστινος	οὖτινος (ὅτου)
	D	ὧτινι (ὅτῳ)	ἡ̂τινι	ῷτινι (ὅτῳ)
	A	ὄντινα	ἥντινα	ὄ τι
Pl.	N	οἵτινες	αἵτινες	ἄτινα (ἄττα)
	G	ὧντινων (ὅτων)	ώντινων	ὧντινων (ὅτων)
	D	οἷστισι (ὅτοις)	αἷστισι	οἷστισι (ὅτοις)
	A	οὕστινας	ἄστινας	ἄτινα (ἄττα)

The short forms are common in verse, but rarely found in Attic prose. $\delta \tau_l$ is written as two words in modern texts to distinguish it from $\delta \tau_l$, the conjunction meaning *that*, *because*.

Example of ὅστις:

οὐκ ἔστιν ὅστις βούλεται κακῶς πράττειν. There is not anyone who wishes to do badly.

The indefinite relative is usually used in indirect questions:

οὐ μανθάνω ὅ τι λέγεις. I do not understand what you mean. θαυμάζω ὅστις ἐστὶν ὁ βασιλεὺς ὁ τῆς χώρας τῆσδε. I wonder who is king of this land.

The **reciprocal pronoun** ἀλλήλων, (of) each other is used only in the oblique cases of the plural (and dual). The plural (perhaps derived from ἄλλος doubled: ἀλλ-αλλο-) is declined as follows:

	m.	f.	n.
G	ἀλλήλων	ἀλλήλων	ἀλλήλων
D	ἀλλήλοις	άλλήλαις	άλλήλοις
A	ἀλλήλους	άλλήλας	ἄλληλα

οἱ ξένοι δῶρα πρὸς ἀλλήλους ἔπεμψαν. The strangers sent gifts to each other.

Vocabulary

The fourth principal part is included with new verbs.

PERFECT ACTIVE: THE FOURTH PRINCIPAL PART

The **fourth principal part** is the perfect active, first person singular. The perfect active stem is used only for the perfect and pluperfect active, there being another stem for the perfect middle-passive (the fifth principal part). You need to learn the fourth principal part to master the perfect active system.

Use of the perfect: The Greek perfect is a primary tense: it refers to present, not to past time. It expresses a present state resulting from a past act. For example, τέθνηκε he has died or he is dead. The perfect is used for a completed action with the effect of the action still continuing in the present. Often it stresses the lasting result of an action rather than the action itself, as in π έποιθα (perfect of π είθω) I am confident.

Aspect: Remember that Greek tenses show aspect (character of the action) as well as time.

The present and imperfect are used for ongoing, continuous action, the aorist for simple action, the perfect for completed action, for action that is finished in present time, or for a present state; the pluperfect is used for action finished in past time; and the future perfect (which is rare) for action to be finished in future time or for a future state.

	Past	Present	Future
Simple	Aorist		Future
Progressive (ongoing)	Imperfect	Present	ruture
Perfective (completed)	Pluperfect	Perfect	Future Perfect

Formation of the Perfect Active System

The perfect stem is formed by reduplication.

First Perfect

Formation: Reduplication + stem + κ + perfect endings.

Perfect Endings:

Singular		Plural
-α	1st	-αμεν
-ας	2nd	-ατε
-ε(v)	3rd	-ασι(ν)

Infinitive: -έναι

Participle: -ώς, -υῖα, -ός (m./n. base, -οτ-)

Second Perfect

Formation: Reduplication + stem + perfect endings (which are the same as the first perfect, above).

The perfect of many verbs (especially mute and liquid stems) is formed without κ ; this is called the second perfect. The same endings are used. The perfect stem of these verbs is also formed by reduplication, but the stem often shows a vowel change (often to -o-), as $\lambda \epsilon i \pi \omega$, perfect $\lambda \epsilon \lambda \omega i \pi \omega$. Sometimes the final mute appears in its rough form $(\pi, \beta \to \phi; \kappa, \gamma \to \chi)$ (a dental or a nasal will often be dropped and a first perfect formed). Examples: $\pi \epsilon \mu \pi \omega$, pf. $\pi \epsilon \pi \omega \omega$, second pf. $\pi \epsilon \omega \omega$.

How to Reduplicate

- 1. For verbs beginning with a single consonant or a mute and a liquid, double the first consonant with ε: λύω, pf. λέλυκα; γράφω, pf. γέγραφα; θνήσκω, pf. τέθνηκα. (An aspirated consonant reduplicates with its unaspirated form, θύω, perfect τέθυκα.)
- 2. Verbs beginning with a vowel usually lengthen the vowel: ἀγγέλλω, pf. ἤγγελκα; ἄγω, pf. ἦχα. (Note the aspirated final consonant for the second perfect).
- 3. Verbs beginning with two or more consonants (unless a mute and a liquid), a double consonant (ψ , ζ , ξ), or with $\dot{\rho}$, reduplicate with ϵ (ρ is doubled):

	Perfect
στέλλω (send)	ἔσταλκα
ῥίπτω (throw)	ἔρριφα
ζητέω (seek)	έζήτηκα

Do not confuse this with the augment. The reduplication is part of the perfect stem and is retained throughout the perfect system, including the infinitive, the participle, and all moods.

The Perfect Active of λύω: λέλυκα, I have released

Formation: $\lambda \varepsilon + \lambda \upsilon + \kappa + \text{endings}$

Singular		Plural
λέλυκα	1st	λελύκαμεν
λέλυκας	2nd	λελύκατε
λέλυκε(ν)	3rd	λελύκασι(ν)

Infinitive: λελυκέναι

Participle: λελυκώς, λελυκυῖα, λελυκός

The base of the pf. part. m. and n. is in -oτ-, gen. λελυκότος, see below.

The inflection of the second perfect is no different.

The Second Perfect of πέμπω: πέπομφα, I have sent

Formation: $\pi \varepsilon + \pi \circ \mu \phi + \text{endings}$

Singular		Plural
πέπομφα	1st	πεπόμφαμεν
πέπομφας	2nd	πεπόμφατε
πέπομφε(ν)	3rd	πεπόμφασι(ν)
Infinitivo, momo	μιδάνιση	

Infinitive: πεπομφέναι

Participle: πεπομφώς, πεπομφυῖα, πεπομφός

The Perfect Participle

The perfect participle is formed by adding the endings $-\omega \zeta$, $-\upsilon i\alpha$, $-\dot{\upsilon}\zeta$ to the perfect stem. It is declined in the third declension with base in $-\upsilon \tau$ in the masculine and neuter. The feminine is in the first declension with base in $-\upsilon \iota\alpha$:

		m.	f.	n.
Sg.	N	λελυκώς	λελυκυῖα	λελυκός
	G	λελυκότος	λελυκυίας	λελυκότος
	D	λελυκότι	λελυκυία	λελυκότι
	A	λελυκότα	λελυκυΐαν	λελυκός
Pl.	N	λελυκότες	λελυκυῖαι	λελυκότα
	G	λελυκότων	λελυκυιῶν	λελυκότων
	D	λελυκόσι(ν)	λελυκυίαις	λελυκόσι(ν)
	A	λελυκότας	λελυκυίας	λελυκότα

The Pluperfect Active

The **pluperfect** is used for a completed action in past time. The pluperfect is less common in Greek than in Latin or English, because in Greek the aorist tense is used for a verb in a subordinate clause that is more past than another verb. Since the pluperfect is rare, you need not memorize it now but should learn to recognize it and include it in your synopses (Ex.B4, p. 169).

Meaning of the pluperfect:

The pluperfect is a secondary tense and so is augmented. Like the imperfect, the pluperfect has only the indicative mood.

Formation: Augment + perfect stem (incl. reduplication) + endings.

Pluperfect Endings:

Singular		Plural
-η	1st	-εμεν
-ης	2nd	-ετε
-ει(ν)	3rd	-εσαν

Example: pluperfect of λύω: ἐλελύκη, I had released

Singular		Plural
έλελύκη	1st	έλελύκεμεν
έλελύκης	2nd	έλελύκετε
έλελύκει(ν)	3rd	έλελύκεσαν

The Future Perfect Active

Even rarer is the **future perfect**, which is used for an action to be completed in future time. For most verbs there is no special form for the future perfect, a periphrastic construction of the perfect participle and $ilde{\epsilon}\sigma \omega \mu \alpha u$ (the future of $ilde{\epsilon}u$) being used instead.

Example: fut. pf. of λύω: λελυκὼς/-υῖα ἔσομαι, I shall have released

Singular		Plural
λελυκὼς ἔσομαι	1st	λελυκότες ἐσόμεθα
λελυκὼς ἔσει	2nd	λελυκότες ἔσεσθε
λελυκὼς ἔσται	3rd	λελυκότες ἔσονται

The participle must agree in gender and number with the subject of the verb. Verbs with a special future perfect are:

	Future Perfect	Translation	
(ἀπο)θνήσκω	τεθνήξω	I shall be dead	
ἵστημι [XII]	έ στήξω	I shall stand	

The Fourth Principal Part (Irregular)

Verb stems and vowel gradation

As has been noted in previous lessons, many verbs show vowel gradation (or a change in the stem vowel from one form to another).

1. The second agrist usually shows a shortening of the stem vowel; this is known as the **weak** grade. The present and future have the normal or full grade (often in ε) as does the first perfect; but the second perfect often has o.

Examples:

λείπω, λείψω present and future have -ειἔλιπον aorist has ι (weak or zero grade)

λέλοιπα perfect οι (o-grade)

2. Another common grade can be seen in the liquid and nasal stems which often show $-\alpha$ - in the perfect.

Examples:

στέλλω pf. ἔσταλκα (send) τείνω pf. τέτακα (stretch)

- 3. Some of the other irregularities can be explained by stem variations: many verbs add to the stem to form the present.
 - a. $-\lambda$ added to form the present:

b. Many verbs add -1- to form the present stem:

Present: φαίνω Stem: φαν-, φηντείνω τεν-, ταἀποκτείνω κτεν-, κτονχαίρω χαιρ-, χαρ-

c. Some verbs add -v- or - α v- to form the present:

Present: μανθάνω Stem: μαθ-

λαμβάνω λαβ-, ληβλανθάνω λαθ-, ληθτυγχάνω τυχφθάνω φθα-

d. Some add -σκω (or -ισκω)

Present: ἀποθνήσκω Stem: θνη-, θανγιγνώσκω γνω-, γνο-

εύρίσκω εύρ-

Irregular Verbs

The verb $oi\delta\alpha$ (know) is an irregular second perfect in form with a present meaning. (It is related to $ei\deltaov$ I saw, and to the Latin verb video.) The perfect form is translated as a present, the pluperfect as an imperfect.

Infinitive: εἰδέναι

Participle: εἰδώς, εἰδυῖα, εἰδός

The future is εἴσομαι (a deponent future form).

The verb δέδια/δέδοικα (fear) is a second perfect used in a present sense. First perfect forms are also found for some persons (first perfect infinitive and participle are in parentheses):

Navel of the Earth

After their friendly greetings [III] in Euripides' *Medea*, Medea asks Aigeus (visiting king of Athens): *What brings you to this country?*

AIGEUS: I have just come from the time-honored oracle of Phoebus Apollo.

MEDEA: And why did you visit the oracular navel of the world?

Delphi, the site of the most important oracle (χρηστήριον) of Apollo was considered the navel (ὀμφαλός) of the earth. Votive *omphaloi* (of monumental size) are found at Delphi. There the god Apollo often spoke to humans in riddles through his priestess, the Pythia (or Pythias). In classical times the sounds of the Pythia were interpreted by priests.

A brief history of the oracle opens Aeschylus' *Eumenides*, in which its origin as a chthonic site (belonging to Gaia) is stressed, but the common story of Apollo's slaying of the monster Πυθών is omit-

ted. The Delphic oracle was visited by Laius of Thebes concerning his fathering of a child and later by Oedipus concerning his parentage.

Besides its prominence in Greek legends, Delphi had a political importance, being visited by both Greeks and foreigners on matters of state, such as colonization, law-making, and war. The ambiguous oracle to Croesus is one of the most famous: "If Croesus crosses the river Halys, he will destroy a mighty empire."

	D	σοί, σοι	to you	ύμῖν	to you
	Α	σέ, σε	уои	ύμᾶς	уои

The unaccented forms are unemphatic and enclitic; they are generally not used after prepositions. The nominative of the personal pronoun is usually omitted (since it is supplied by the verb ending) unless it is emphatic (for contrast or emphasis). For the personal pronoun of the third person, forms of $\alpha\dot{v}\dot{\tau}\dot{o}\varsigma$ (given below) are used in the **oblique** cases (that is, cases other than the nominative).

The genitive of the personal pronouns goes in the predicate position (the possessive genitives of other pronouns and of nouns usually take the attributive position):

ἡ μήτηρ μου my mother but

ή τοῦ παιδὸς μήτηρ the child's mother

αὐτός, αὐτή, αὐτό: Forms and uses

αὐτός has three uses:

- 1. In all cases it can be used as an intensive adjective-pronoun, '-self.' With this meaning it is found with another pronoun, as ἐγὼ αὐτός I myself, or with a noun, in the predicate position, αὐτὸς ὁ ἀνήρ the man himself. αὐτός, αὐτή, αὐτό in the nominative may be used without another pronoun to agree with the subject (as expressed in the verb ending): αὐτὸς ἔφη (cf. Latin ipse dixit) he himself said [it].
- 2. In all cases, when preceded by the article (i.e., in the attributive position), αὐτός means the same: ὁ αὐτὸς ἀνήρ the same man. (Note: αὐτός often unites by crasis with the article: αὐτός, αὐτή, ταὐτό or ταὐτόν the same.)
- 3. In the oblique cases (all except the nominative), the forms of $\alpha \dot{\nu} \dot{\tau} \dot{\phi} \zeta$ are the usual personal pronouns of the third person, *him*, *her*, *it*, *them*, etc. (Note that the nominative is not so used because the nominative, if used strictly as a pronoun, is used as the intensive, *-self*.)

εἶδον αὐτόν I saw him

Reflexive Pronouns

The **reflexive pronouns** are compounded from the stems of the personal pronouns (first $\dot{\epsilon}\mu$ -, second $\sigma\epsilon$ -, third $\dot{\epsilon}$ -) and the oblique cases of $\alpha\dot{v}\dot{v}\dot{\sigma}\varsigma$. In the plural of the first and second persons, the two forms are declined separately (the personal pronoun and the form of $\alpha\dot{v}\dot{\tau}\dot{\sigma}\varsigma$). There is no nominative of the reflexive pronoun. The reflexive pronoun refers back to the subject of its clause (or sometimes in a dependent clause it refers to the subject of the main clause).

	D	έαυτοῖς	(αύτοῖς)	έαυταῖς	(αύταῖς)	έαυτοῖς	(αύτοῖς)
			(αύτούς)				

To avoid confusing the alternate forms of the reflexive with forms of αὐτός, notice the difference in breathing.

Οἰδίπους τὸν ἑαυτοῦ πατέρα ἀπέκτεινε. Oedipus killed his own father.

Note: The $\dot{\epsilon}$ - prefix is the root of the third person personal pronoun, of which only the dat. sg. (oi) and pl. ($\sigma\phi i\sigma\iota$) are common in Attic prose. Instead of this pronoun, the demonstratives are used for the nominative and the forms of $\alpha\dot{\nu}\dot{\tau}\dot{o}\zeta$ in the other cases.

Possessive Adjectives

The **possessive adjectives** *my*, *your*, and *our* are derived from the personal pronouns:

ἐμός, ἐμή, ἐμόν	my
σός, σή, σόν	your (sg.)
ἡμέτερος, -α, -ον	our
ὑμέτερος, -α, -ον	your (pl.)

These are declined like other adjectives in $-o\zeta$, $-\eta$, -ov or $-o\zeta$, $-\alpha$, -ov; and like any adjective they must agree with their noun in gender, number, and case. (That is, they agree with the thing possessed, not with the possessor.)

For his, her, its, their, the genitive forms of αὐτός are used: αὐτοῦ (his, its), αὐτῆς (her), αὐτῶν (their). These are not adjectives but pronouns and so agree in gender and number with the possessor; their case is the genitive (of possession).

The possessive adjectives and the genitive of the reflexive pronoun go into the attributive position:

ὁ ἐμὸς πατήρ my father
 ἡ ἐμὴ μήτηρ my mother
 ὁ ἐμαυτοῦ/ἐμαυτῆς πατήρ my own father
 ἡ ἐμαυτοῦ/ἐμαυτῆς μήτηρ my own mother

But the possessive genitive of the personal pronoun goes into the predicate position:

ό πατήρ μου my father ό πατήρ αὐτοῦ/ αὐτῆς his/her father

Syntax: Dative of Possession

With the verbs ε ı́µı́ and γ í γ voµ α ı (and similar verbs), the dative may be used to denote the **possessor**. The thing possessed is then in the nominative.

Example: I have friends may be expressed as

ἔχω φίλους. or ἐμοί εἰσι φίλοι.

When the dative is used for the possessor, it emphasizes the interest of the possessor in the thing he/she possesses. Cf. this example from Thucydides:

ἄλλοις μὲν χρήματά ἐστι πολλά, ἡμ $\hat{i}v$ δὲ ξύμμαχοι ἀγαθοί. Others have a lot of money, but we have good allies.

PERFECT MIDDLE-PASSIVE: THE FIFTH PRINCIPAL PART

The perfect and pluperfect middle-passive are formed by adding the middle endings to the reduplicated stem. Complications arise because these endings are added directly to the stem: no thematic vowel is used in the perfect.

Forms: Perfect, Pluperfect, Future Perfect

Perfect

Formation: reduplicated stem + primary endings:

Primary Endings

Singular		Plural
-μαι	1st	-μεθα
-σαι	2nd	-σθε
-ται	3rd	-νται

Infinitive: $-\sigma\theta\alpha\iota$

Participle: -μένος (accent on the penult)

Pluperfect

Formation: augment + reduplicated stem + secondary middle endings:

Secondary Middle Endings

Singular		Plural
-μην	1st	-μεθα
-σο	2nd	-σθε
-το	3rd	-ντο

Perfect and Pluperfect Middle-Passive of λύω, λυλέ-λυ-μαι I have ransomed / I have been released έ-λε-λύ-μην I had ransomed / I had been released

	Perfect		Pluperfect
Singular	λέλυμαι	1st	έλελύμην
	λέλυσαι	2nd	ἐλέλυσο
	λέλυται	3rd	<i>ἐλέλυτ</i> ο
Plural	λελύμεθα	1st	ἐλελύμεθ α
	λέλυσθε	2nd	<i>ἐλέλ</i> υσθε
	λέλυνται	3rd	ἐλέλυντο

Infinitive: λελύσθαι

Participle: λελυμένος, -η, -ον

Since these endings are added directly to the verb stem, without a thematic vowel, certain orthographic changes occur in verbs with consonant stems:

μ	μαι, μην, μεθα, μένος	-μ	-γ	-σ	-σ
σ	σαι, σο	-ψ	-ξ	drops out	_
τ	ται, το	-π	-к	-σ	-ν
θ	*σθε, σθαι	-ф	-χ	-σ	-ν

^{*}σ between two consonants is dropped in the endings -σθε and -σθαι.

The endings of the third plural -vt α 1 and -vt α 2 are not used, but rather periphrastic forms consisting of the perfect middle participle (in the nominative plural, masculine or feminine) and the third plural of the verb ϵ 1 μ 1 (that is, ϵ 1 μ 3).

Liquid stems drop $-\sigma$ - between two consonants and use the periphrastic form of the third plural, but undergo no other changes.

Perfect and Pluperfect of Consonant Stems

Perfect		

		Labial	Palatal	Dental	Nasal	Liquid
		γράφω	ἄγω	πείθω	φαίνω	ἀγγέλλω
Sg.	1	γέγραμμαι	ἦγμαι	πέπεισμαι	πέφασμαι	ἤγγελμαι
	2	γέγραψαι	ἦξαι	πέπεισαι	πεφασμένος εἶ	ἤγγελσαι
	3	γέγραπται	ἦκται	πέπεισται	πέφανται	ἤγγελται
Pl.	1	γεγράμμεθα	ἤγμεθ α	πεπείσμεθα	πεφάσμεθα	ἠγγέλμεθα
	2	γέγραφθε	ἦχθε	πέπεισθε	πέφανθε	ἤγγελθε
	3	γεγραμμένοι εἰσί	ἠγμένοι εἰσί	πεπεισμένοι εἰσί	πεφασμένοι εἰσί	ἠγγελμένοι εἰσί
Inf.		γεγράφθαι	ἦχθαι	πεπεῖσθαι	πεφάνθαι	ἠγγέλθαι
Part.		γεγραμμένος	ἠγμένος	πεπεισμένος	πεφασμένος	ἠγγελμένος

Pluperfect Middle-Passive

		Labial γράφω	Palatal ἄγω	Dental πείθω	Nasal φαίνω	Liquid ἀγγέλλω
Sg.	1	έγεγράμμην	ἤγμην	ἐπεπείσμην	ἐπεφάσμην	ἠγγέλμην
	2	έγέγραψο	ἦξο	ἐπέπεισο	πεφασμένος ἦσθα	ἤγγελσο
	3	ἐγέγραπτο	ἦκτο	ἐπέπειστο	ἐπέφαντο	ἤγγελτο
Pl.	1	έγεγράμμεθα	ἤγμεθα	ἐπεπείσμεθα	ἐπεφάσμεθα	ἠγγέλμεθα
	2	έγέγραφθε	ἦχθε	ἐπέπεισθε	ἐπέφανθε	ἤγγελθε
	3	γεγραμμένοι ἦσαν	ἠγμένοι ἦσαν	πεπεισμένοι ἦσαν	πεφασμένοι ἦσαν	ἠγγελμένοι ἦσαν

Note: If the verb stem ends in $\mu\pi$ (as $\pi\acute{e}\mu\pi\omega$), drop the π before μ of the ending; otherwise π is retained, according to the rule for labial stems.

Example: πέμπω -perfect middle stem πεπεμπ-, πέπεμμαι.

Singular		Plural
πέπεμμαι	1st	πεπέμμεθα
πέπεμψαι	2nd	πέπεμφθε
πέπεμπται	3rd	πεπεμμένοι εἰσί
Infinitive: πε:	πέμφθαι	

Participle: πεπεμμένος, -η, -ον

Future Perfect

The **future perfect** is formed by adding $-\sigma \circ \mu \alpha \iota$ to the perfect tense stem: reduplicated stem $+ \sigma + o/\epsilon$ (thematic vowel) + primary middle endings.

Examples:

λύω	λελύσομαι
γράφω	γεγράψομαι
λείπω	λελείψομαι
πράττω	πεπράξομαι

The future perfect usually has a passive meaning: *I shall have been released, I shall be released.*

Syntax: Dative of Agent

The dative that denotes the person interested (cf. the dative of possession and dative of interest) also appears as the **dative of agent** with the perfect and pluperfect passive (that is, instead of $\dot{\nu}\pi\dot{o}$ with the genitive, we find the dative without a preposition).

ταῦτα πέπρακται αὐτῷ. These things have been done by him. ἐμοὶ καὶ τούτοις πέπρακται. It has been done by me and these men.
—Demosthenes

Fifth Principal Part

→ Fill in the blanks (which are regular).

ἀγγέλλω **ἤγγελμαι** ἦγμαι ἄγω ἦργμαι ἄρχω βάλλω βέβλημαι βουλεύω βούλομαι βεβούλημαι γίγνομαι γεγένημαι ἔγνωσμαι (acts as a dental) γιγνώσκω γράφω γέγραμμαι

form a vowel stem pf. mid.)

λαμβάνω εἴλημμαι (cf. pf. act. εἴληφα)

λέγω (λέλεγμαι) εἴρημαι (cf. εἴρηκα and εἶπον)

λείπω λέλειμμαι

λύω

νομίζω νενόμισμαι (acts as a dental)

παιδεύω

παύω

πείθω πέπεισμαι πέμπω πέπεμμαι

πιστεύω

πράττω (stem πραγ-) πέπραγμαι στέλλω ἔσταλμαι τείνω τέταμαι φαίνω πέφασμαι φέρω ἐνήνεγμαι

χαίρω κεχάρημαι, κέχαρμαι

Recognizing Stem Types

If the perfect middle has a vowel before -μαι, then it is a vowel stem, to be conjugated like λ ύω in the perfect middle. If it ends in -μμαι, then it is a labial stem, to follow the pattern of γράφω: γέγραμμαι. If it ends in -γμαι, then it is a palatal stem and follows ἄγω: ἦγμαι. Finally, if it ends in -σμαι, it can be either a dental or a nasal stem. Usually you can determine which it is (and so, which pattern to follow) by going back to the original stem.

Syntax: Time Constructions

1. Genitive of time within which:

ταῦτα τῆς ἡμέρας ἔπραττον. They were doing these things during the day. πέντε ἡμερῶν γράψω. I shall write within five days. νυκτός during the night

2. Dative of time when:

ταύτη τῆ ἡμέρα γράψω. I shall write on this day. τῷ αὐτῷ ἔτει ἀπέθανεν. He died in the same year.

Often ev is used when there is no modifying word, as ev νυκτί, at night.

3. Accusative of extent of time or space:

ταῦτα τὴν ἡμέραν ἔπραττον. They were doing these things throughout the day. πέντε ἡμέρας ἐμείναμεν. We remained for five days.

Σωκράτης was a citizen of Athens, son of a sculptor, probably a sculptor himself, married to Xanthippe, father of three sons, hoplite in the army. In his early adulthood he was interested in the scientific ideas of his time, but gave that up to become an eccentric. He devoted his life to a mission which involved annoying his fellow residents of Athens with questions and more questions in a self-appointed (or divinely commissioned) quest for the right way to live. He compares himself to a gadfly (μ ύω ψ) and is hardly surprised when his fellow citizens decide they would be better off swatting him (κ ρούσαντες ἄν μ ε) so they can sleep away the rest of their lives (Plato, Apology 30e–31a).

Because he left no writings, we know about his

life and thought from his younger contemporaries, especially Plato, Xenophon, and Aristophanes. His mission is described in Plato's version of his words —for it impossible to say where Socrates ends and Plato begins—as "every day making words about virtue (περὶ ἀρετῆς) and the other matters about which you have heard me conversing and examining both myself and others—for the unexamined life is not worth living for a human being: ὁ ἀνεξέταστος βίος οὐ βιωτὸς ἀνθρώπω" (Apology 38a). Socrates is the protagonist of most of Plato's dialogues.

In 399 B.C.E. he was prosecuted on the charges of not believing in the gods of the city, introducing strange gods, and corrupting the youth: ώς οὺς μὲν ἡ πόλις νομίζει θεοὺς οὐ νομίζοι, ἔτερα δὲ καινὰ δαιμόνια εἰσφέροι καὶ τοὺς νέους

διαφθείροι (Xenophon, *Apology* 9). He was convicted and put to death. Plato's *Crito* and *Phaedo* take place in his prison cell.

Socrates was a familiar enough figure about town that the comic poet Aristophanes in the *Clouds* represents him as being head of a school, the Φ povtiotήpiov (*Think Tank*), dedicated to scientific speculation. The hero of the play, Strepsiades, plans to enroll in this *phrontisterion* in order to learn how to argue so that he can avoid paying his debts. He goes inside and during a conversation with one of Socrates' $\mu\alpha\theta\eta\tau\alpha$ i he sees someone swinging around in a basket:

Στρ.: φέρε, τίς γὰρ οὖτος οὑπὶ τῆς κρεμάθρας ἀνήρ; Μαθ.: αὐτός. Στρ.: τίς αὐτός; Μαθ.: Σωκράτης.

Στρ.: ὧ Σώκρατες, ἴθ' οὖτος, ἀναβόησον αὐτόν μοι μέγα. Μαθ.: αὐτὸς μὲν οὖν σὰ κάλεσον. οὐ γάρ μοι σχολή.

Στρ.: ὧ Σώκρατες, ὧ Σωκρατίδιον. Σωκ.: τί με καλεῖς, ὧ 'φήμερε;

Στρ.: πρῶτον μὲν ὅ τι δρᾶς, ἀντιβολῶ, κάτειπέ μοι.

Σωκ.: ἀεροβατῶ, καὶ περιφρονῶ τὸν ἥλιον.

Str.: Tell me, who is that suspended in the basket? Stu.: Himself. Str. Who's himself? Stu. Socrates.

Str.: Hey, Socrates. C'mon, call up to him in a loud voice.

Stu.: Call him yourself. I'm busy.

Str.: Socrates, my sweet little Socrates. Soc. Why do you call me, mortal?

Str.: First, tell me, please, what are you doing? Soc.: I tread on air and contemplate the sun.

Socrates returns the compliment by quoting from these lines in the speech he makes in his defense (the *Apology*). Socrates keeps current in Maxwell Anderson's *Barefoot in Athens*, I. F. Stone's *The Trial of Socrates*, at the *Socrates Cafe* and in Christopher Phillips' book by the same name.

Lesson X

Comparison of Adjectives, Adverbs; Future, Aorist Passive

In this lesson you will learn how to add more and most to all types of adjectives, how to construct adverbs, how to make comparisons, and how to say nobody and nothing. You will also fill in the last tenses and voices of verbs with the future and aorist passive and complete the principal parts.

COMPARISON OF ADJECTIVES, ADVERBS

In English, adjectives are compared (1) by adding **-er** for the **comparative** and **-est** for the **superlative** (with spelling changes when necessary): *nice, nicer, nicest; big, bigger, biggest; lovely, lovelier, loveliest*. Or (2) by putting *more* or *most* before the adjective (this is common for words of more than two syllables): *beautiful, more beautiful, most beautiful.* (3) Some adjectives are compared **irregularly,** among them the very common: *good, better, best; bad, worse, worst.*

In Greek the most common method of comparison is:

(1) For the **comparative**, add -τερος, -τέρα, -τερον to the **masculine base** of the adjective. And for the **superlative**, add -τατος, -τάτη, -τατον. These are declined regularly, the comparative like δίκαιος, the superlative like ἄριστος.

Notes

If the penult of an adjective in $-\sigma_{\zeta}$ is short (in the positive degree), -o-is lengthened to $-\omega$ - for both comparative and superlative. The syllable is long if it contains a long vowel or diphthong, two or more consonants, or a double consonant (ζ , ξ , or ψ).

The masculine base of -0 ς adjectives is found by removing - ς from the masculine nominative.

Adjectives in - $\eta\varsigma$, - $\epsilon\varsigma$ have their bases in - $\epsilon\sigma$ - to which the regular - $\tau\epsilon\rho\sigma\varsigma$ /- $\tau\alpha\tau\sigma\varsigma$ is added.

On the analogy of these, $-\epsilon \sigma \tau \epsilon \rho \sigma \zeta / -\epsilon \sigma \tau \alpha \tau \sigma \zeta$ is added to adjectives in $-\omega v$ (base in $-\omega v$).

Examples:

Positive	Comparative	Superlative
-oς type, long p		
δεινός, -ή, -όν terrible	δεινότερος, -ā, -ov more terrible	δεινότατος, -η, -ον most terrible
ἐσθλός, -ή, -όν noble	ἐσθλότερος, -ā, -ον nobler	ἐσθλότατος, -η, -ον noblest
-oς type, short p	enult	
	σοφώτερος, -α, -ον	σοφώτατος, -η, -ον
wise	wiser	wisest
ἄξιος, -ā, -ov worthy	ἀξιώτερος, -ā, -ov worthier	ἀξιώτατος, -η, -ον worthiest
-ης, -ες type (ba	se in -εσ-)	
	άληθέστερος, -ā, -ον	άληθέστατος, -η, -ον
true	truer	truest
-ων, -ον type (ba	ise in -ov-)	
εὐδαίμων, -ον	εὐδαιμονέστερος, -ā, -ον	εὐδαιμονέστατος, -η, -ον
lucky	luckier	luckiest

(2) Adjectives in $-\upsilon\varsigma$ and a few in $-\rho\varsigma$ have a different comparison. For the comparative, add $-i\omega\nu$, $-i\upsilon\nu$ to the root (in the $-\rho\varsigma$ type, $-\rho$ - drops out, in the $-\upsilon\varsigma$ type, $-\upsilon$ - is lost: the root is found for these types by removing $-\rho\varsigma$ or $-\upsilon\varsigma$). For the superlative, add $-i\sigma\tau\varsigma$, $-i\sigma\tau\eta$, $-i\sigma\tau\upsilon$:

ήδύς, ήδεῖα, ήδύ	ἡδίων, ἥδιον	ἥδιστος, ἡδίστη, ἥδιστον
sweet	sweeter	sweetest
αἰσχρός, -ά, -όν	αἰσχίων, -ιον	αἴσχιστος, -ίστη, -ιστον
base	baser	basest

The -ίων, -ιον type of comparative is a two-termination adjective (-ίων for m. and f., -ιον for n.) of the third declension (review -ων, -ον type in Lesson VI). It is declined like $\varepsilon \dot{\nu} \delta \alpha \dot{\iota} \mu \omega \nu$ but has some alternate shorter forms.

αἰσχίων, αἴσχιον, more shameful, baser

	Singular		Plural	
	m./f.	n.	m./f.	n.
N	αἰσχίων	αἴσχιον	αἰσχίονες (αἰσχίους)	αἰσχίονα (αἰσχίω)
G	αἰσχίονος	αἰσχίονος	αἰσχιόνων	αἰσχιόνων
D	αἰσχίονι	αἰσχίονι	αἰσχίοσι	αἰσχίοσι
A	αἰσχίονα (αἰσχίω)	αἴσχιον	αἰσχίονας (αἰσχίους)	αἰσχίονα (αἰσχίω)
V	αἴσχιον			

(3) Irregular Comparison

Several of the most important adjectives are compared irregularly. In some cases there are several comparisons for one positive. (Most of the following are of the -1007, -10705 type, though in many cases the -1- of the comparative has been lost.)

1. ἀγαθός, -ή, -όν good

χείρων, χεῖρον	χείριστος, χειρίστη, χείριστον (lacking, less good)

swifter	swiftest
θάττων, θᾶττον	τάγιστος, ταγίστη, τάγιστον

Adverbs: Formation and Comparison

Adverbs of manner are generally formed from adjectives by changing the $-\omega v$ of the masculine genitive plural to $-\omega \varsigma$.

For example:

Adjective	Genitive Plural	Adverb	
δίκαιος	δικαίων	δικαίως	justly
σοφός	σοφῶν	σοφῶς	wisely
ἡδύς	ἡδέων	ἡδέως	sweetly
άληθής	ἀληθῶν	ἀληθῶς	truly
εὐδαίμων	εὐδαιμόνων	εὐδαιμόνως	happily
μέγας	μεγάλων	μεγάλως	greatly
$\pi \hat{\alpha} \varsigma$	πάντων	πάντως	in any case
ἄλλος	ἄλλων	ἄλλως	otherwise, in vain

There are many other adverbial endings, but they can be learned as they come up. The $-\omega \varsigma$ type forms the largest class.

Adverbs of manner are compared in the following way:

For the comparative, use the neuter singular accusative of the comparative of the adjective ($-\tau\epsilon\rho\sigma\nu$, $-\sigma\nu$). For the superlative, use the neuter plural accusative of the superlative of the adjective ($-\tau\alpha\tau\alpha$, $-\iota\sigma\tau\alpha$).

Positive	Comparative	Superlative
δικαίως	δικαιότερον	δικαιότατα
justly	more justly	most justly
σοφῶς	σοφώτερον	σοφώτατα
wisely	more wisely	most wisely
ἡδέως	ἥδιον	ἥδιστα
sweetly	more sweetly	most sweetly
ἀληθῶς	άληθέστερον	άληθέστατα
truly	more truly	most truly
ῥαδίως	ῥᾳ̃ον	ῥῷστα
easily	more easily	most easily

Syntax

- 1. *Than* is expressed in two ways in Greek.
 - a. By the conjunction $\mathring{\eta}$, *than*. In this construction the two words compared are in the same case.

οὖτος ὁ υἱός ἐστι νεώτερος ἢ ὁ ἀδελφός. This son is younger than his brother.

νομίζω τοῦτον τὸν ἄνδρα εἶναι σοφώτερον ἢ τὸν πατέρα. I think that this man is wiser than his father.

b. Instead of $\mathring{\eta}$, the **genitive of comparison** may be used.

οὖτος ὁ υἱός ἐστι νεώτερος τοῦ ἀδελφοῦ. This son is younger than his brother.

νομίζω τοῦτον τὸν ἄνδρα εἶναι σοφώτερον τοῦ πατρός. I think that this man is wiser than his father.

2. The **degree of difference** between the two things compared is in the dative case: How much younger is the boy than his brother? How much wiser is this man than his father?

οὖτος ὁ υἰός ἐστι πέντε ἔτεσι νεώτερος τοῦ ἀδελφοῦ. This son is five years younger than his brother.

νομίζω τοῦτον τὸν ἄνδρα εἶναι πολλῷ σοφώτερον τοῦ πατρός. I think that this man is much wiser than his father.

3. The **Partitive Genitive** (or Genitive of the Whole): The whole of which a part is taken is in the genitive. This genitive is used with nouns, adjectives, and verbs, and is especially common with superlatives and indefinite pronouns.

πολλοὶ τῶν ποιητῶν many of the poets

οἱ σοφοὶ τῶν ἀνθρώπων the wise of/among human beings,

people who are wise

πάντων τῶν πολιτῶν σοφώτατος wisest of all the citizens

θεῶν τις one of the gods

The partitive genitive goes into the predicate position.

Further Notes on Adjectives and Adverbs

1. The superlative may be used absolutely (that is, with no comparison implied) to mean *very*.

σοφώτατος ὁ Σωκράτης. Socrates is very wise.

As opposed to:

ὁ Σωκράτης ἦν ὁ σοφώτατος πάντων. Socrates was the wisest of all.

2. $\dot{\omega}\varsigma$ with the superlative forms a super-superlative, meaning as . . . as possible.

AORIST AND FUTURE PASSIVE: THE SIXTH PRINCIPAL PART

The Passive System

Aorist Passive

The First Aorist Passive

Formation: augment + stem + $\theta\eta/\theta\epsilon$ + endings (a type of secondary ending) $\theta\eta$ is used for the indicative and infinitive. $\theta\epsilon$ is used for the participle, the subjunctive, and the optative.

Aorist Passive Endings:

Singular		Plural
-V	1st	-μεν
-5	2nd	-τε
-	3rd	-σαν
T (: :.:		

Infinitive: -ναι

Participle: -είς, -είσα, -έν (base in -έντ-)

The Aorist Passive of λύω: ἐλύθην, I was released

Example: $\dot{\varepsilon} + \lambda \dot{v} + \theta \eta + v$

Singular		Plural
έλύθην	1st	ἐ λύθημεν
ἐ λύθης	2nd	ἐ λύθητε
ἐ λύθη	3rd	<i>ἐλύθησαν</i>
Infinitive: λ_1	θηναι	

Infinitive: λυθηναι

Participle: λυθείς, λυθεῖσα, λυθέν (λυθεντ-)

Before $-\theta$ - consonant changes take place (as in the perfect middle) by assimilation:

$$\pi,\;\beta,\rightarrow \varphi \qquad \qquad \kappa,\;\gamma\rightarrow \chi \qquad \qquad \tau,\;\delta,\;\theta,\;\zeta\rightarrow \sigma$$

Examples:

	Stem	Aorist passive
πέμπω	πεμπ-	ἐπέμφθην
ἄγω	ἀγ-	ἤχθην
πείθω	πειθ-	ἐπείσθην
νομίζω	νομιζ-	ἐνομίσθην

The Second Aorist Passive

A **second agrist passive** is formed without $-\theta$ - (cf. the second perfect active without $-\kappa$ -).

Formation: augment + stem (often with vowel gradation) + η/ϵ + endings Both first and second agrist passive systems are conjugated in the same way.

Examples:

	Aorist passive	
στέλλω	έστάλην	
φαίνω	έφάνην	
γράφω	έγράφην	

The Aorist Passive Participle

The aorist passive participle is declined in the same way as the active participles with bases in -vt- except that the base is in -evt- rather than -ovt- or - α vt-. The masculine nominative singular and the dative plural masculine and neuter are in -eíg and -eígl, formed by the lengthening of the vowel when -vt- is dropped before - σ -. The feminine is declined in the first declension (like $\theta \acute{\alpha} \lambda \alpha \tau \tau \alpha$).

Example: λυθείς, base (m./n.) λυθεντ-; (f.) λυθεισ- (having been freed)

		m.	f.	n.
Singular	N	λυθείς	λυθεῖσα	λυθέν
	G	λυθέντος	λυθείσης	λυθέντος
	D	λυθέντι	λυθείση	λυθέντι
	A	λυθέντα	λυθεῖσαν	λυθέν
Plural	N	λυθέντες	λυθεῖσαι	λυθέντα
	G	λυθέντων	λυθεισῶν	λυθέντων
	D	λυθεῖσι	λυθείσαις	λυθεῖσι
	Α	λυθέντας	λυθείσας	λυθέντα

The Future Passive

Formation: aorist passive stem $(-\eta$ -form) + σ + o/ϵ + primary middle endings

The long form of the stem (in $-\theta\eta$ or $-\eta$) is used throughout the future passive. Note that active endings are used in the aorist passive and that middle endings are used in the future passive.

Future Passive of λύω: λυθήσομαι (I shall be released)

Example: $\lambda \upsilon + \theta \acute{\eta} + \sigma + o + \mu \alpha \iota$

Singular		Plural	
λυθήσομαι	1st	λυθησόμεθα	
λυθήσει/-ῃ	2nd	λυθήσεσθε	
λυθήσεται	3rd	λυθήσονται	
Infinitive: λυθήσεσθαι			
Participle: λυθησόμενος, -η, -ον

The theater at Epidaurus is one of the best preserved of the older Greek-style theaters. Dramas are still performed there every summer. Although modern productions take place at night with artificial lighting, in classical times the action was performed outdoors in broad daylight, in front of a temple or house (for tragedies, usually a palace, but sometimes a military hut, a cave, or even a farmer's cottage).

The ὀρχήστρα (dancing floor) was the center of a Greek theater and perhaps the oldest part. Originally the orchestra was circular. Here the chorus

did its routines (singing and dancing); some of the action also took place in the orchestra. It is very likely that an altar was a permanent fixture there.

At the back of the orchestra was the σκηνή (scene, stage building), a flatroofed building (originally temporary), where actors changed costumes and masks and from which they made their entrances and exits. The top of the stage building (θεολογεῖον or "god-platform") furnished another level of action. From here the gods and, occasionally, mortals delivered speeches. Two stage devices were used in classical times, the ἐκκύκλημα (eccyclema, "thing rolled out"): a device rolled out of the skene to reveal what had taken place in the house where most of the violent actions took place and the μηχανή ("flying machine" cf. deus ex machina): a crane used to fly in gods who took part in the plays.

The Greek tragedies and comedies were popular entertainment. Everybody went: men, women, children; free and slave; citizen and foreigner. Tickets were subsidized by the state. Wealthy citizens were called upon to finance the training of the chorus: this was a public service ($\lambda \epsilon \iota \tau o \iota p \gamma \iota \alpha$) similar in importance to the fitting out of a warship. There is some dispute over whether women attended the theater, but the weight of the evidence suggests that they did.

LESSON XI

Contract Verbs

In this lesson you will learn the contract verbs and increase your vocabulary with many important new verbs, including several ways to say "I love you."

CONTRACT VERBS

In Attic Greek, ω -type verbs with stems ending in α , ϵ , or σ contract the stem vowel with the thematic vowel in the present system (present and imperfect tenses).

The rules for each type of contract verb should be memorized, since they apply to all the contracted forms of that type (with only a few exceptions).

Accent of Contract Verbs

1. If the accent does not fall on one of the original syllables of the contraction, it remains unchanged.

ἐνίκα-ον → ἐνίκων

2. If the accent falls on the first of the original syllables of the contraction, the contracted syllable receives the circumflex.

 $νικά-ουσι \rightarrow νικῶσι$

3. If the accent falls on the second, the contraction receives the acute.

νικα-όμενος → νικώμενος

The uncontracted forms of these verbs were not used in Attic Greek, but are found in other dialects.

Forms of $-\alpha\omega$, $-\epsilon\omega$, $-\omega$ verbs

α -contracts (- $\alpha\omega$)

Rules for contraction:

νικάω: stem, νικα-

1. An iota of the ending is written subscript.

νικά-εις → νικᾶς

2. α contracts with any o-sound (o, ω , ov, oı) to become ω (or ω for α -oι):

νικά-ομαι \rightarrow νικῶμαι νικῶ

3. α contracts with any *e*-sound (ϵ , η , $\epsilon \iota$, η) to become $\bar{\alpha}$:

 $\dot{\epsilon}$ νίκα-ε \rightarrow $\dot{\epsilon}$ νίκ $\ddot{\alpha}$ νικά-ει \rightarrow νικ $\dot{\alpha}$ νικά-η \rightarrow νικ $\dot{\alpha}$

The one exception (in fact, only an apparent exception) is that the present active infinitive does not have 1-subscript: $\nu_{\rm I}$ becomes $\nu_{\rm I}$ (not $\nu_{\rm I}$). The explanation of this is that the -e ν infinitive ending is itself a contraction for -e-e ν , so that the 1 was not originally part of the ending.

Present system of νικάω (conquer) (stem, νικα-)

Present Middle-Passive Active Sg. (νικά-ω) νικῶ 1st (νικά-ομαι) νικῶμαι (νικά-εις) νικᾶς 2nd (νικά-ει/-η) νικᾶ (νικά-ει) νικᾶ 3rd (νικά-εται) νικᾶται Pl.  ζ άω (*live*) contracts to -η- instead of -α-:

	ζῶσι	3rd	ἔ ζων

Infinitive: $\zeta \hat{\eta} v$

Participle: ζῶν, ζῶσα, ζῶν

A few other verbs in -αω have -η rather than -α in the contracted forms. Among them are διψάω be thirsty, πεινάω be hungry, χράω give oracles, χράομαι use.

χράομαι (use) is thus conjugated:

	Present		Imperfect
Sg.	χρῶμαι	1st	έχρώμην

	χρῶνται	3rd	έχρῶντο

Infinitive: χρῆσθαι

Participle: χρώμενος, -η, -ον

ε -contracts (- $\varepsilon\omega$)

Rules for contraction:

φιλέω: stem, φιλε-

1. ε + ε becomes ει

 $\phi i \lambda \epsilon \text{-ete}$ \rightarrow $\phi i \lambda \epsilon \hat{i} \tau \epsilon$

2. ε + o becomes ov

φιλε-όμε θ α \rightarrow φιλούμε θ α

3. ϵ before any long vowel or diphthong is absorbed

φιλέων \rightarrow φιλῶν

There are a few verbs of two syllables which have uncontracted forms: $\pi\lambda \acute{\epsilon}\omega$ sail, $\delta \acute{\epsilon}\omega$ need, want, contract only before - ϵ or - ϵ 1.

Present of πλέω:

Singular		Plural
πλέω	1st	πλέομεν
πλεῖς	2nd	πλεῖτε
πλεῖ	3rd	πλέουσι
Infinitive: π	ιλεῖν	

Participle: πλέων, πλέουσα, πλέον

Other verbs of this type are: θέω run; ῥέω flow; πνέω breathe; χέω pour.

o-contracts (-oω)

Rules for contraction:

δηλόω: stem, δηλο-

1. $o + \eta$ or ω becomes ω

$$\delta$$
ηλό-ω \rightarrow δ ηλ $\hat{\omega}$

2. $o + \varepsilon$, o, ov becomes ov

δηλό-εσθε
$$\rightarrow$$
 δηλοῦσθε δηλό-εται \rightarrow δηλοῦται

3. o + any ι-diphthong becomes oι

δηλό-εις
$$\rightarrow$$
 δηλοῖς

Again the exception is that the present infinitive does not have oi: $\delta\eta\lambda\acute{o}$ -ein contracts to δηλοῦν (**not** δηλοῖν).

The Present Active Participles of Contract Verbs

The participles of contract verbs follow the rules for contraction.

1. -αω

 $\alpha\text{-contracts}$ have -\$\omega\$- throughout the declension of the participle, resulting from \$\alpha\$ contracting with the o-sound (-\omega-, -o-, -o\u00bb-) of the participial ending.

Principal Parts of Contract Verbs

The principal parts of most contract verbs are regular.

1. α - and ϵ -contracts regularly lengthen α or ϵ to η in the principal parts.

2. o-contracts regularly lengthen the o to ω .

```
δηλόω δηλώσω ἐδήλωσα δεδήλωκα δεδήλωμαι ἐδηλώθην
```

Not all contract verbs have regular principal parts; the irregular ones are given in the vocabulary and are learned the usual way.

Note that the contract verbs have contracted forms in the present system only. Their other tenses are conjugated regularly. There are some exceptions, such as $\kappa\alpha\lambda\epsilon\omega$, and $\gamma\alpha\mu\epsilon\omega$ which have contracted futures (treated below).

The Contract Futures

1. **Liquid and Nasal Stems** (stems ending in λ , μ , ν , ρ) originally formed their futures by adding $-\varepsilon\sigma$ - + thematic vowel + endings. Between two vowels, $-\sigma$ -drops out, resulting in an ε -contract future (contracted like the present of $\phi \iota \lambda \acute{\varepsilon} \omega$).

Example:

	Future
μένω (stem, μεν-)	[μενέσω → μενέω] μενῶ
κρίνω (stem, κριν-)	κρινῶ

Often the verb stem appears in a simpler form in the future than in the present.

Examples:

	Future
ἀγγέλλω (stem, ἀγγελ-)	ἀγγελῶ
φαίνω (stem, φαν-)	φανῶ
τείνω (stem, τεν-)	τενῶ

The liquid aorists, which are also formed without -σ-, often appear in an extended form because of compensatory lengthening, e.g., μένω, aorist ἔμεινα; ἀγγέλλω, aorist ἤγγειλα.

2. Verbs ending in -i $\zeta\omega$ in the present usually drop the ζ and form the future like the liquids and nasals.

Example: νοίζω: future [νομίσω \rightarrow νομιέω] \rightarrow νομιῶ.

3. The Attic Future: In Attic Greek, contraction is more prevalent than in other dialects. Certain types of verbs, which show the sigmatic future in other dialects, have contract futures in Attic. Among these are some ϵ -stem verbs, such as $\kappa\alpha\lambda\dot{\epsilon}\omega$ and $\gamma\alpha\mu\dot{\epsilon}\omega$, which in Attic have futures identical to their presents. Like the liquid and nasal futures, these Attic Futures are ϵ -contract forms, and will present no difficulty. There are, however, certain - α - stems (not always immediately apparent as such) that have α -contract futures.

Example: ἐλαύνω, stem ἐλα- (aorist ἤλασα) which has the future [ἐλάσω \rightarrow ἐλάω] \rightarrow ἐλῶ. The few verbs of this sort will be identified in the following way: ἐλαύνω, ἐλῶ (-άω), ἤλασα, etc.

μία χελιδὼν ἔαρ οὐ ποιεῖ.

One swallow does not make a spring.

—Greek proverb

Photo by L. J. Luschnig.

The speech of foreigners to the Greek ear was like the swallow's twittering and the word χελιδών was actually used in Greek to mean βάρβαρος (non-Greekspeaking person), a double ethnic slur. In Aeschylus' Agamemnon, Clytemnestra says of the captive Trojan princess and priestess Cassandra

άλλ' εἴπερ ἐστὶ μὴ χελιδόνος δίκην ἀγνῶντα φωνὴν βάρβαρον κεκτημένη, ἔσω φρενῶν λέγουσα πείθω νιν λόγω. (1050–52)

Unless she is like a swallow with unintelligible foreign cry, I will persuade her by speaking within her understanding.

In early spring the children on Rhodes went trick-or-treating, pretending to be swallows and singing:

ήλθ' ήλθε χελιδών καλὰς ὥρας ἄγουσα. . . .

The seasons in Greek besides spring are:

θέρος (< θέρω heat) summer ὀπώρα late summer or autumn χειμών winter

Lesson XII

Athematic Verbs: The -MI Conjugation

In this lesson you will learn the other conjugation of Greek verbs, the -\mu or athematic conjugation, which includes some of the most frequently used verbs in Greek.

-MI VERBS

A second type of Greek verb is the $-\mu$ or **athematic** conjugation. A characteristic of the $-\omega$ (or thematic) conjugation is the thematic vowel (o/ ϵ) before the personal endings (in certain tenses). The $-\mu$ verbs, on the other hand, have no thematic vowel in the present, imperfect, and second aorist: they add their endings directly to the stem in these tenses. Other tense systems of these verbs are usually of the same type as those of $-\omega$ verbs (whether thematic or not: for example, the future is a thematic tense, the first aorist, perfect, and aorist passive are not).

The - $\mu \iota$ conjugation is so called because the first person singular, present active indicative ending is - $\mu \iota$ (rather than - ω). The - $\mu \iota$ verbs are divided into three categories.

- Irregular (also called Root class), such as εἰμί, φημί.
- 2. The **-vum** type, in which the syllable -vu- is inserted before the endings (in the present system only). The -vum class is the most regular type of the -m verbs. Except for the present system, they follow the - ω conjugation.
- 3. **Reduplicating** class, so called because in the original form, the first consonant was reduplicated with ι in the present system. (These verbs are also called the - $\omega\mu\iota$ /- $\eta\mu\iota$ type, because their first forms end in either - $\omega\mu\iota$ or - $\eta\mu\iota$.) Although there are a few irregularities in the verbs of this type, they do follow a pattern, which will be described below.

-μι Verb	Endings
----------	----------------

	Active			Middle		
		Secondary		Primary	Secondary	
Sg.	-μι -ς -σι(ν) -μεν -τε -ασι(ν) -ναι	-v	1st	-μαι	-μην	
	-ς	-5	2nd	-σαι	-00

	-ασι(ν)	-σαν	3rd	-νται	-ντο	
Inf.	-ναι	-ναι		-σθαι	-σθαι	

Note that the middle endings are the same as those for other verbs.

Verbs in -νυμι

One type of - $\mu \iota$ verb is that in which the syllable - $\nu \iota$ - is added before the endings to form the present stem. In all other tense systems they are conjugated like - ω verbs. These are the most regular of the - $\mu \iota$ verbs.

Reduplicating Class

The four most common verbs of the reduplicating class are: ἴστημι, δίδωμι, τίθημι, and ἵημι. The conjugations that follow are of the special athematic forms of these verbs.

I. ιστημι stem: στη-/στα-, make to stand, stand.

Principal parts: ἵστημι, στήσω, ἔστησα (1st aor.), ἔστην (2nd aor.), ἕστηκα, ἕσταμαι, ἐστάθην.

Variable Stems

One very important thing to remember about $\mathring{\iota}$ στημι and the other verbs of its class is that the stem is variable, showing a long and a short form. The stem of $\mathring{\iota}$ στημι is σ τη-/ σ τα-. In the present, it is reduplicated. The original form was * σ (σ τημι, but initial σ often changes to the rough breathing, resulting in $\mathring{\iota}$ στημι: present stem $\mathring{\iota}$ στη-/ $\mathring{\iota}$ στα-.

Study the present, imperfect, and second agrist until their pecularities are familiar. In the present system active, the long $(-\eta)$ form of the stem is used in the singular, the short $(-\alpha)$ in the plural.

The middle voice of ἴστημι and the other verbs of its type is very simple: the middle endings are added to the short form of the stem.

Special Peculiarities of ἴστημι

1. ἴστημι has two aorist forms. A few verbs have both first and second aorists, and when they do, the two aorists usually have different meanings. So it is with ἵστημι. The first aorist is transitive, *I made/caused to stand, I set up*; the second aorist is intransitive, *I stood*. There is no second aorist middle. The transitive forms of ἵστημι (*make to stand, set, place*) and of its compounds, are the present, imperfect, future, and first aorist active. The intransitive forms (*stand, be set*) are the second aorist, the perfect and pluperfect (ἕστηκα, εἰστήκη), and the passive forms of the present, imperfect, and future.

Explanation of the principal parts

Reduplicated forms (present and perfect systems) have the rough breathing. The forms that are only augmented (aorists) have the smooth breathing.

Transitive and Causal:

ἴστημι I set/am setting, I place

στήσω I shall set

ἔστησα I set, brought to a stop, caused to stand

Intransitive and Passive:

ἵσταμαι I am standing, set for myself

ἔστην I stood (set myself), came to a stand

ἔστηκα I stand (have set myself), stand firm, am standing

είστήκη I stood, was standing

ἑστήξω I shall stand

ἔσταμαι *I am set* (rare, used in passive sense)

ἐστάθην I was placed, was set

The intransitive and passive forms can serve as a stronger form of εἶναι to be (in such and such state or place). Compounds of ἴστημι show the same distinctions of intransitive and transitive (or causal) forms

2. There is a special form of the perfect (given above) and of the pluperfect:

Singular		Plural	
είστήκη	1st	ἕσταμεν	
είστήκας	2nd	ἔστατε	
είστήκει	3rd	ἕστασαν	

3. ἴστημι is one of the few verbs that have a future perfect active, ἑστήξω.

II. δίδωμι stem: $\delta\omega$ -/ $\delta\sigma$ -, give.

Principal parts: δίδωμι, δώσω, ἔδωκα, δέδωκα, δέδομαι, ἐδόθην.

The second aorist ἔδωκα is irregular. -κ- is dropped from all forms except the active singular. In all other forms of the aorist the stem is $\delta\omega$ - / $\delta\sigma$ -.

		Active			Middle	
	Present	Imperfect	2nd aorist	Present	Imperfect	2nd aorist
Sg. 1st	δίδωμι	ἐδίδουν	ἔδωκα	δίδομαι	έδιδόμην	έδόμην
2nd	δίδως	ἐδίδους	ἔδωκας	δίδοσαι	ἐδίδοσο	ἔδου

Special Peculiarities of δίδωμι

δίδωμι has the stem $\delta\omega/\delta\sigma$, which is reduplicated to δίδω-μι for the present system (giving the present stem $\delta\iota\delta\omega-/\delta\iota\delta\sigma$ -). Again, the long form is used in the singular (with the variation σ 0 in the imperfect), the short form in the plural and throughout the middle voice.

III. τίθημι stem θη-/θε-, set, place.

Principal parts: τίθημι, θήσω, ἔθηκα, τέθηκα, τέθειμαι, ἐτέθην.

The second aorist $\check{\epsilon}\theta\eta\kappa\alpha$ is irregular. $-\kappa$ - is dropped from all forms except the active singular. In all other forms of the aorist the stem is $\theta\eta$ - / $\theta\epsilon$ -.

Infinitiv	e: τιθέναι		θεῖναι	τίθεσθαι		θέσθαι
Particip!	le: τιθείς		θείς	τιθέμενος		θέμενος

Special Peculiarities of τίθημι

τίθημι has the stem $\theta\eta/\theta\epsilon$, reduplicated for the present system to *θίθη-μι. But the initial aspirated consonant changes to its unaspirated form for ease in pronunciation before another aspiration, hence τίθημι (present stem, τιθη-/τιθε-). Note the use of the diphthong -ει for -η (as ου for ω in forms of δίδωμι) in some forms of the imperfect and in the agrist infinitive.

IV. ἵημι stem: ἡ-/ἑ-, throw, send.

Principal parts: ἵημι, -ἥσω, -ἦκα, -εἶκα, -εἷμαι, -εἵθην. (The dash, -ἦκα etc., indicates that the form is found only in compounds, such as ἀφῆκα.)

The second aorist $\mathring{\eta} \kappa \alpha$ is irregular. $-\kappa$ - is dropped from all forms except the active singular. In all other forms of the aorist the stem is $\mathring{\eta}$ - / $\dot{\epsilon}$ - (- ϵ i- is the augmented form).

Particip!	le: ἱείς		-εἵς	ίέμενος		ἕμενος

Special Peculiarities of *inmi*

ἵημι has the stem $\dot{\eta}/\dot{\epsilon}$ which is reduplicated to ἵη-μι (present stem, $i\eta/i\epsilon$). Again, the diphthong (-ει) is found in the imperfect and in the aorist infinitive.

The Reduplicating Class of -μι Verbs: Review

Although you need to study the verbs of the reduplicating class carefully to learn their individual peculiarities, the following summary of their similarities may be useful:

- 1. All of them end in -ημι or -ωμι in the first form.
- 2. All have a long and a short form of the stem (the short form being used in the present and imperfect plural, in the present infinitive, and throughout the middle). The long form is usually the stem vowel in its long form, but sometimes a diphthong is substituted (ov for ω and $\varepsilon\iota$ for η).
- 3. A syllable (originally a reduplication) is added to each to form the present stem. This extra syllable occurs throughout the present system and only there.
- 4. δίδωμι, ἵημι, and τίθημι have irregular second aorists, with $-\kappa\alpha$, $-\kappa\alpha\zeta$, $-\kappa\epsilon$ and the long form of the stem in the singular, but $-\mu\epsilon\nu$, $-\tau\epsilon$, $-\sigma\alpha\nu$ with the short form in the plural.

The Active Participles of -μι Verbs

The active participles of -µı verbs are declined in the same way as those of other verbs, but are formed with the characteristic vowel of the verb.

δείκνυμι	present	δεικνύς, -ῦσα, -ύν	base: δεικνυντ-
ΐστημι	present	ίστάς, -ᾶσα, -άν	base: ἱσταντ-
	second aorist	στάς, -ᾶσα, -άν	base: σταντ-
	(first aorist)	στήσας, -ασα, -αν	base: στησαντ-
δίδωμι	present	διδούς, -οῦσα, -όν	base: διδοντ-
	second aorist	δούς, -οῦσα, -όν	base: δοντ-
τίθημι	present	τιθείς, -εῖσα, -έν	base: τιθεντ-
	second aorist	θείς, -εῖσα, -έν	base: θεντ-
ίημι	present second aorist	iείς, iεῖσα, iέν -εἵς, -εἶσα, -ἕν	base: ἱεντ- base: -ἑντ-

These participles are not difficult if you bear in mind that the characteristic active participial ending (-v\tau-) is added to the stem of the verb (short form, except when compensatory lengthening takes place). Form the aorist participles of $\delta i\delta\omega\mu\iota$, $\tau i\theta\eta\mu\iota$, $i\eta\mu\iota$ from the aorist stem rather than from the principal parts with the intrusive - κ -.

Note that for each verb the present and aorist participles are declined exactly alike, the only difference being that the present participle has one more syllable than the aorist.

Deponent Verbs of the -μι type

There are a number of deponent verbs of the athematic type, but these usually present no difficulty, since the middle voice is regular. For example, δύναμαι be able, ἐπίσταμαι (impf. ἠπιστάμην) understand keep -α- before their endings throughout the present system. Similarly, κάθημαι sit and κεῖμαι lie retain their stem vowels η or ει.

Irregular Second Aorist

A few verbs of the $-\omega$ conjugation have athematic second agrists. For example:

γίγνωσκω	aorist ἔγνων	βαίνω	aorist ἔβην
ἁλίσκομαι	aorist ἑάλων or ἥλων	φθάνω	aorist ἔφθην
πέτομαι (<i>fly</i>)	aorist ἔπτην		

These are inflected like second aorists of - $\mu\iota$ verbs, by adding the personal endings directly to the stem.

Examples:

βαίνω			γιγνώσκω				
Singular	1	Plural	Singular		Plural		
ἔ βην	1st	ἔβημεν	ἔγνων	1st	ἔγνωμεν		
ἔ βης	2nd	ἔβητε	ἔγνως	2nd	ἔγνωτε

Participle: βάς, βᾶσα, βάν (stem βαντ-)			Participle: γνούς, γνοῦσα, γνόν (stem γνοντ-)

ΔΙΟΓΕΝΗΣ, the Cynic Philospher

Photo by L. J. Luschnig.

(In the words of Diogenes Laertius)

λύχνον μεθ' ἡμέραν ἄψας περιήει λέγων 'ἄνθρωπον ζητῶ.'

He lit a lamp and went around in broad daylight asserting, "I'm looking for a human being."

Θεασάμενός ποτε παιδίον ταῖς χερσὶ πῖνον ἐξέρριψε τῆς πήρας τὴν κοτύλην, εἰπών, 'παιδίον με νενίκηκεν εὐτελεία.'

Once he saw a small child drinking with his hands. He threw the cup from his pack with the words, "A child has surpassed me in simplicity."

συνελογίζετο δὲ καὶ οὕτως τῶν θεῶν ἐστι πάντα φίλοι δὲ οἱ σοφοὶ τοῖς θεοῖς κοινὰ δὲ τὰ τῶν φίλων. πάντ' ἄρα ἐστὶ τῶν σοφῶν.

This is one of his syllogisms: All things belong to the gods. The wise are friends of the gods. Possessions of friends are shared in common. Therefore all things belong to the wise.

Πλάτωνος ὁρισαμένου 'Άνθρωπός ἐστι ζῷον δίπουν ἄπτερον' καὶ εὐδοκιμοῦντος, τίλας ἀλεκτρυόνα εἰσήνεγκεν αὐτὸν εἰς τὴν σχολὴν καί φησιν, 'οὖτός ἐστιν ὁ Πλάτωνος ἄνθρωπος.' ὅθεν τῷ ὅρῷ προσετέθη τὸ πλατυώνυχον.

When Plato came up with the definition, "A human being is a two-footed animal without feathers," and was applauded for it, he plucked a rooster, brought it into the school, and said, "Here's Plato's human being." From this the phrase with broad nails [a pun on "Platonic"] was added [to the definition].

The Cynics were called "dogs," allegedly because they did in public the sorts of things that dogs do, some of which are now considered committing a nuisance or even indecent exposure.

In this epitaph from the Greek Anthology, the passerby is imagined addressing the monument (as is common), which depicts a dog. The dog answers.

εἰπέ, κύον, τίνος ἀνδρὸς ἐφεστὼς σῆμα φυλάσσεις; τοῦ κυνός. ἀλλὰ τίς ἦν οὖτος ἀνὴρ ὁ κύων; Διογένης. γένος εἰπέ. Σινωπεύς. ὃς πίθον ὧκει; καὶ μάλα νῦν δὲ θανὼν ἀστέρας οἶκον ἔχει.

Tell me, dog, on whose memorial do you stand guard? The Dog's. Well, who was this man, the Dog? Diogenes. Where was he born? In Sinope. The one who lived in a jar [pithos]? Yes indeed, but now that he's dead his home is in the stars.

A pithos is a very large storage jar, equivalent to a modern packing crate or appliance carton in which homeless people sometimes find shelter.

LESSON XIII

Subjunctive and Optative Moods; Subordinate Clauses

In this lesson you will learn more about what mood means, how to form the subjunctive and optative of all types of verbs, and the major uses of these two moods. You will also learn new ways of making subordinate clauses.

The Subjunctive and Optative Moods

The **subjunctive** and **optative** are two moods expressing **degrees of unreality** (as opposed to the indicative mood, which, generally speaking, expresses a statement of fact). **Mood**, you may remember, indicates the manner (or mode) in which the speaker/writer conceives of the assertion made by the verb. The use of the subjunctive or optative implies that this assertion is not strictly factual: an intention, a wish, an order, a *maybe*, or a *might have been* is implied.

SUBJUNCTIVE

The subjunctive is found in the present, aorist, and perfect tenses. It has no future, but the basic idea of the subjunctive is future. The tenses of the subjunctive have no time value, but express *aspect*. The present is used for an action going on, the aorist for a single action, the perfect for a completed action or a present state. The most commonly used tenses of the subjunctive are the present and the aorist. The subjunctive, having no time value, is never augmented.

Forms: Present, Aorist, Perfect

Formation of the Subjunctive

The subjunctive is formed by lengthening the thematic vowel. The indicative has o/ϵ , the subjunctive ω/η :

				Plural		
	1st	2nd	3rd	1st	2nd	3rd
Act. Ind.	-ω	-εις		-ομεν	-ετε	-ουσι
Act. Ind. Act. Subj. Mid. Ind.	-ω	-უς		-ωμεν	-ητε	-ωσι
Mid. Ind.	-ομαι	-ει	-εται	-ομεθα	-εσθε	-ονται
Mid. Subj.	-ωμαι	-ŋ	-ηται	-ωμεθα	-ησθε	-ωνται

Primary endings are always used for the subjunctive, which refers to the future and is associated with primary tenses. Even the aorist subjunctive uses primary endings. Most athematic verbs, by analogy with - ω verbs, also use these endings with the long thematic vowel. Contract verbs follow their rules for contraction. The perfect subjunctive usually consists of the perfect participle and the subjunctive of $\varepsilon i\mu \hat{\iota}$.

Subjunctive Forms of εἰμί

Singular		Plural
å	1st	ὦμεν
ทิ๋ร	2nd	ἦτε
ή	3rd	ὦσι

Each tense of the subjunctive, optative, etc. is formed from the corresponding tense stem (from the appropriate principal part).

		2nd	λύησθε	λύσησθε	λελυμένοι ἦτε			
		3rd	λύωνται	λύσωνται	λελυμένοι ὧσι			

Note that in the compound forms the participle must agree with the subject of the verb in number and gender so that if the subject is feminine or neuter $\lambda \epsilon \lambda \nu \kappa \hat{0} \hat{\alpha} \hat{\delta}$, $\hat{\eta} \zeta$, $\hat{\eta}$ or $\lambda \epsilon \lambda \nu \kappa \hat{0} \hat{\zeta} \hat{\eta}$ is used. For the perfect active subjunctive there is another set of forms: $\lambda \epsilon \lambda \hat{\nu} \kappa \omega$, $\lambda \epsilon \lambda \hat{\nu} \kappa \eta \zeta$, $\lambda \epsilon \lambda \hat{\nu} \kappa \eta \zeta$, $\lambda \epsilon \lambda \hat{\nu} \kappa \omega \zeta$, which is less common than the periphrastic form given above.

The aorist passive is inflected as a contract verb. The short form of the aorist passive stem in $\theta\epsilon$ - (or ϵ -) is used for the subjunctive (and the optative); the ϵ - is then absorbed before the long vowel of the endings.

Review of the Subjunctive Forms

Characteristics of the Subjunctive:

- 1. Long thematic vowel
- 2. Primary endings

Nearly all the subjunctive forms have the same set of endings, the primary endings with the long form of the thematic vowel. Even the - $\mu \iota$ verbs are for the most part inflected in the same way as the others and are accented like the ϵ -contracts (the stem vowel contracting with the long thematic vowel). The exceptions are (1) α -contracts whose sub-

junctive and indicative are identical; (2) o-contracts, which have -ω-except where there is an ι-subscript in the ending (in which case they have -οι-); and (3) the -μι verb δίδωμι, which has -ω throughout the present and aorist subjunctive (- ω supersedes any other vowel).

Some Uses of the Subjunctive

The subjunctive in general refers to the future. Among its uses are exhortations, commands, expressions of purpose, and conditions. In most of these uses, the idea of futurity can still be seen: a command refers to the future, a purpose is future relative to another action. In conditions, the subjunctive refers either directly to the future, or to an indefinite time (it is never strictly present).

Independent Uses of the Subjunctive

The three most common uses of the subjunctive in the main clause are:

1. Hortatory

The first person (usually plural) of the subjunctive is used in exhortations. The negative is $\mu\dot{\eta}$.

ἴδωμεν Let us (Let's) see!

μὴ ταῦτα ποιῶμεν Let us not do these things!

2. Prohibitive

A negative command is expressed by the aorist subjunctive in the second person with $\mu \dot{\eta}$ (or by the present imperative with $\mu \dot{\eta}$: XIV).

μὴ ποιήσης τοῦτο Do not do that!

3. Deliberative

The first person of the subjunctive is used in questions in which a person asks himself/herself what he/she is to do. The negative is $\mu \dot{\eta}$.

τί εἴπω; What am I to say?

ταῦτα ποιῶμεν; Are we to do these things?

The Subjunctive in Conditions

1. Future More Vivid Conditions

When a hypothetical future case is stated distinctly and vividly (that is, as likely to occur) the subjunctive is used with $\dot{\epsilon}\dot{\alpha}v$ (also spelled $\ddot{\alpha}v$ or $\ddot{\eta}v$) in the protasis, the conditional (or if) clause, and the future indicative (or its equivalent) is used in the apodosis, the conclusion (or then) clause. The negative in the protasis is $\mu\dot{\eta}$, in the apodosis, $o\dot{v}$.

Protasis: ἐάν + subjunctive Apodosis: future indicative ἐὰν εἴπη τι, αὐτοῦ ἀκουσόμεθα. If he says anything, we will hear him. ἐὰν μὴ ἔλθη, ταῦτα οὐ ποιήσομεν. If he does not come, we shall not do these things.

2. Present General Conditions

This type refers to a customary or repeated action or to a general truth. The time is indefinite.

Protasis: ἐάν + subjunctive
 ἐὰν ἔλθη τις, ταῦτα ποιοῦμεν.
 If (ever) anyone comes, we (always) do these things.
 ἐὰν εἴπης τι, οὐκ ἀκούομεν.
 If (ever) you say anything, we do not listen.

Relative Conditions

Conditions may also be expressed with a relative pronoun (*who*, etc.) or a relative adverb (*when*, etc.). The subjunctive relative conditions follow the patterns for their simple counterparts.

1. Future (More Vivid)

Protasis: relative word + αν + subj. Apodosis: future indicative ὅταν ἔλθη ταῦτα ποιήσομεν. When he comes, we will do these (ὅταν = ὅτε + αν) things.

2. Present General

Protasis: relative word + αν + subj. Apodosis: present indicative ὅταν τις ἔλθη, ταῦτα ποιοῦμεν. Whenever anyone comes, we do these things.

Other uses of the subjunctive will be treated in the final section of this lesson.

OPTATIVE

The **optative** is found in the present, future, aorist, and perfect tenses. It is a somewhat vaguer mood than the subjunctive; some of its uses will be discussed below. The tenses of the optative usually refer to aspect rather than time. There is, however, one exception to this generalization: namely in indirect statement (see below). The future optative is not common and is used only in indirect statement, to represent the future indicative.

The optative is *not* augmented.

There are two forms of the optative (i.e., two sets of endings).

- 1. The 1-type: used for $-\omega$ verbs, $-\nu\nu\mu$ 1 verbs, and all middles (and generally in the plural of the active).
- 2. The -ιη-type: for the present of contract verbs (and liquid futures), for the present and aorist of -μι verbs (except -νυμι verbs), and for the aorist passive.

Thus one characteristic of the optative is the presence of i. Another is that the optative has secondary endings and is often associated with past tenses.

Forms: Present, Future, Aorist, Perfect

I. ι-type

Present, Future, and Second Aorist

Formation: Tense stem + thematic vowel -o- + ι + endings:

	Active		Middle-Passive
Sg.	οι -μι	1st	οι -μην
	οι -ς	2nd	οι -ο (< οισο)
	οι -	3rd	οι -το
Pl.	οι -μεν	1st	οι -μεθα
	οι -τε	2nd	οι -σθε
	οι -εν	3rd	01 -ντο

Present and future opta-	ive of λύω; secor	nd aorist of λείπω
--------------------------	-------------------	--------------------

		Present	Future	2nd Aorist
Active	Sg. 1st	λύοιμι	λύσοιμι	λίποιμι
	2nd	λύοις	λύσοις	λίποις
	3rd	λύοι	λύσοι	λίποι
	Pl. 1st	λύοιμεν	λύσοιμεν	λίποιμεν
	2nd	λύοιτε	λύσοιτε	λίποιτε
	3rd	λύοιεν	λύσοιεν	λίποιεν
Middle	Sg. 1st	λυοίμην	λυσοίμην	λιποίμην
	2nd	λύοιο	λύσοιο	λίποιο
	3rd	λύοιτο	λύσοιτο	λίποιτο
	Pl. 1st	λυοίμεθα	λυσοίμεθα	λιποίμεθα
	2nd	λύοισθε	λύσοισθε	λίποισθε
	3rd	λύοιντο	λύσοιντο	λίποιντο

First Aorist Optative

Formation: 1st aor. stem (in $-\alpha$ -) + ι + endings

	Active	DI I		Middle	DI I
_	Singular	Plural		Singular	Plural
	λύσαιμι	λύσαιμεν	1st	λυσαίμην	λυσαίμεθα
	λύσαις (λύσειας)	λύσαιτε	2nd	λύσαιο	λύσαισθε
	λύσαι (λύσειε)	λύσαιεν (λύσειαν)	3rd	λύσαιτο	λύσαιντο

The forms given in parentheses are the more common ones in prose, and it is recommended that you learn to recognize them.

Note that the -o₁ and - α ₁ of the optative third person singular (as in λ ύσι, λ ύσοι, λ ίποι, and λ ύσαι) are considered long for the purposes of accent.

The present optative of δείκνυμι is formed by adding the endings in -οι to the stem δεικνυ-: δεικνύοιμι, δεικνύοις, etc.

II. The ιη-type

Formation: Singular, stem + $\iota\eta$ + endings; plural, stem + ι or $i\eta$ + endings

Singular		Plural			
-ιη-ν	1st	-ι-μεν	or	-ιη-μεν	
-ιη-ς	2nd	-ι-τε	or	-ιη-τε	
-ιη-	3rd	-1-EV	or	-ιη-σαν	

The $\iota\eta$ endings are used in the singular, but are seldom found in the plural. The ι type is used throughout the middle.

Present Optative of εἰμί

Singular		Plural			
εἵην	1st	εἶμεν	or	εἴημεν	
εἴης	2nd	εἶτε	or	εἴητε	
εἴη	3rd	εἶεν	or	εἴησαν	

The **perfect optative** is formed by using the perfect participle (active or middle) with the optative of είμί: λελυκὼς εἴην (active), λελυμένος εἴην (middle-passive).

Present Optative of Contract Verbs and Liquid Futures

The thematic vowel o, joined with $\iota\eta$ (or ι), contracts with the stem vowel:

Examples:

		νικάω	φιλέω	δηλόω
Active	Sg. 1	νικώην	φιλοίην	δηλοίην
	2	νικώης	φιλοίης	δηλοίης
	3	νικώη	φιλοίη	δηλοίη
	Pl. 1	νικῷμεν (νικῷημεν)	φιλοῖμεν (φιλοίημεν)	δηλοῖμεν (δηλοίημεν)
	2	νικῷτε (νικῷητε)	φιλοῖτε (φιλοίητε)	δηλοῖτε (δηλοίητε)
	3	νικῷεν (νικῷησαν)	φιλοΐεν (φιλοίησαν)	δηλοῖεν (δηλοίησαν)
Middle-Passive	Sg. 1	νικώμην	φιλοίμην	δηλοίμην
	2	νικῷο	φιλοῖο	δηλοῖο
	3	νικῷτο	φιλοῖτο	δηλοῖτο
	Pl. 1	νικώμεθα	φιλοίμεθα	δηλοίμεθα
	2	νικῷσθε	φιλοῖσθε	δηλοΐσθε
	3	νικῷντο	φιλοῖντο	δηλοῖντο

The liquid futures follow the paradigm for φιλέω in the optative.

Monosyllabic stem verbs like πλέω, δέω, which contract only before

Monosyllabic stem verbs like πλέω, δέω, which contract only before ϵ or ϵ ι, show the ι-type optative: πλέοιμ, πλέοις, πλέοι, etc.

The Present and Aorist Optative of -μι Verbs

- $\mu\iota$ verbs use the short form of the stem before ι of the optative. The vowel before the ι depends on the stem vowel of the verb.

ἵστημι

			Present	Aorist
Active	Sg.	1st	ίσταίην	σταίην
		2nd	ίσταίης	σταίης
		3rd	ίσταίη	σταίη
	Pl.	1st	ίσταῖμεν (ἱσταίημεν)	σταΐμεν (σταίημεν)
		2nd	ίσταῖτε (ἱσταίητε)	σταῖτε (σταίητε)
		3rd	ίσταῖεν (ἱσταίησαν)	σταΐεν (σταίησαν)
Middle-Passive	Sg.	1st	ίσταίμην	
		2nd	ίσταῖο	
		3rd	ίσταῖτο	
	Pl.	1st	iσταίμεθα

For full conjugation of these and other verbs, see Appendix I.

The Aorist Passive Optative

Formation: Stem + $\theta\epsilon$ + $\iota\eta$ + endings

Singular		Plural	
λυθείην	1st	λυθεῖμεν (λυθείημεν)	
λυθείης	2nd	λυθεῖτε (λυθείητε)

λυθησοίμην	1st	λυθησοίμεθα
λυθήσοιο	2nd	λυθήσοισθε
λυθήσοιτο	3rd	λυθήσοιντο

Some Uses of the Optative

The Optative in Independent Clauses

1. The Potential Optative

The optative with α v expresses a future possibility. This use corresponds to the English potential forms using such auxiliaries as may, can, might, could, would.

ἔλθοι ἄν. He may/might/could/would come.

The negative used with the potential optative is où.

2. Optative of Wish

The Optative Optative: the name *optative* is derived from the Latin "opto," wish. A future wish is expressed by the optative; $\epsilon i\theta \epsilon$ or $\epsilon i \gamma \alpha \rho$, if only, would that may be used with this construction. The negative is $\mu \dot{\eta}$.

ἔλθοι. εἴθε ἔλθοι. May he/she come!
 μὴ ἔλθοι. εἴθε μὴ ἔλθοι. May he/she not come!

Wishes that refer to the past are expressed by the secondary tenses of the indicative (imperfect or a rist) with $\epsilon i\theta \epsilon$ or $\epsilon i \gamma \alpha \rho$ (which cannot be omitted). The negative is $\mu \dot{\eta}$.

εἴθε ἤρχετο. If only he were coming!εἴθε ἦλθεν. If only he had come!

Conditions: Past General, Future Less Vivid

1. Past General Conditions

For a customary or repeated action, or for a general truth *in past time*, use εi with the optative in the protasis and (usually) the imperfect indicative in the apodosis.

Protasis: εἰ + optative Apodosis: imperfect indicative

εἰ ἔλθοι τις, ταῦτα ἐποιοῦμεν. If (ever) anyone came, we (always)

did/used to do/would do these things.

A relative word may be substituted for εἰ:

ὅτε ἔλθοι τις, ταῦτα ἐποιοῦμεν. Whenever anyone came, we did these

things.

2. Future Less Vivid Conditions

When the future condition is stated less distinctly (that is, as less likely to occur) the optative is used in both clauses. Compare this with the English **should-would** condition: *If I should go* (or *if I went, were to go*), *I would do these things*.

Protasis: εἰ + optative Apodosis: optative + ἄν

(cf. potential opt.)

εἰ ἔλθοιμι, ταῦτα ἂν ποιήσαιμι. If I should come, I would do these

things.

This can also be expressed as a relative condition:

ότε ἔλθοιμι, ταῦτα ἂν ποιήσαιμι. Whenever I should come, I would do

these things.

SEQUENCE OF MOODS AND DEPENDENT CLAUSES

Sequence of Moods

In certain types of subordinate clauses, either the subjunctive or the optative may be used. Which mood is to be used depends upon the tense of the verb

in the main clause. The subjunctive, you will remember, has primary endings and is associated with primary tenses of the indicative. The optative has secondary endings and is used, as a rule, with secondary tenses of the indicative.

Primary Tenses	Secondary Tenses
present	imperfect
future	aorist
perfect, future perfect	pluperfect
subjunctive (all tenses)	optative (all tenses)

Some examples:

1. Purpose Clauses

Purpose clauses express the purpose of the action of the verb. They take the subjunctive if the tense of the main verb is primary, the optative if it is secondary. $\~v\alpha$ or $\~o\pi\omega\varsigma$ (in order that / that) is used in this construction. The negative is $\mu\dot{\eta}$.

έρχόμεθα ἵνα ταῦτα ποιῶμεν/ποιήσωμεν. We are coming so that we may do these things. ἤλθομεν, ἵνα ταῦτα ποιοῖμεν/ποιήσαιμεν. We went so that we might do these things.

Object Clauses with μή after verbs of fearing

After verbs of fearing, $\mu\dot{\eta}$ introduces a construction in which the subjunctive is used if the main verb is in a primary tense, the optative if it is secondary. $\mu\dot{\eta}$ in this type of clause means *that*, *lest*. The negative is $\mu\dot{\eta}$ où.

φοβούμεθα μὴ αὐτὸν ἴδωμεν. We fear that we may see him. φοβούμεθα μὴ οὐκ αὐτὴν ἴδωμεν. We fear that we may not see him. ἐφοβούμεθα μὴ οὐκ αὐτὸν ἴδοιμεν. We feared that we might not see him.

The Optative in Indirect Statement after ὅτι or ὡς

After secondary tenses (of the verb of saying), a tense of the optative is usually substituted for the same tense of the indicative after $\delta \tau$ 1 or $\delta \zeta$ 2 in indirect statement. The indicative may be retained for a vivid recreation of the tense of the original. This construction is the only common use of the future optative, which is used as a substitute for the future indicative.

Examples:

εἶπεν ὅτι ταῦτα ποιεῖ./ εἶπεν ὅτι ταῦτα ποιοίη. He said that he was doing these things. (ταῦτα ποιῶ)

εἶπεν ὅτι ταῦτα ποιήσει./ εἶπεν ὅτι ταῦτα ποιήσοι. He said that he would do these things. (ταῦτα ποιήσω)

εἶπεν ὅτι ταῦτα ἐποίησεν./ εἶπεν ὅτι ταῦτα ποιήσαι/ποιήσειεν. He said that he did/had done these things. (ταῦτα ἐποίησα)

εἶπεν ὅτι ταῦτα πεποίηκεν./ εἶπεν ὅτι ταῦτα πεποιηκὼς εἴη. He said that he had done these things. (ταῦτα πεποίηκα)

ΤΑ ΠΑΝΤΑ ΡΕΙ

Photo by L. J. Luschnig.

Heraclitus, one of the Ionian philosophers, was born in Ephesus, a major city on the west coast of what is now Turkey, and was in his prime toward the end of the 6th century B.C.E. His philosophy centers around the Logos, according to which all things happen, and for this reason he is credited with being the first of the Greek philosophers to concern himself with what is beyond the physical. He is ranked with Parmenides as one of the two most significant philosophers before Socrates.

Heraclitus believed in the unity of all things:

Frag. 50 οὐκ ἐμοῦ ἀλλὰ τοῦ λόγου ακούσαντας

όμολογείν σοφόν εν πάντα είναι.

It is wise for those listening, not to me, but to the Logos to agree that all things are one.

And in the unity of opposites:

Frag. 60 όδὸς ἄνω κάτω μία καὶ ὡυτή.

The road up and down is one and the same.

Frag. 67 ὁ θεός ἡμέρη εὐφρόνη, χειμὼν θέρος, πόλεμος εἰρήνη, κόρος λιμός. . . . God is day-night, winter-summer, war-peace, satiety-famine. . . .

Change is real and there is unending war (or strife) between opposites to maintain balance in the universe:

Frag. 53 πόλεμος πάντων μεν πατήρ έστι, πάντων δε βασιλεύς. . . .

War [strife] is the father of all and king of all.

On change and the river:

Frag. 218 (Plato, *Cratylus* 402a) λέγει που Ἡράκλειτος ὅτι πάντα χωρεῖ καὶ ὀυδὲν μένει, καὶ ποταμοῦ ῥοῆ ἀπεικάζων τὰ ὄντα λέγει ὡς δὶς ἐς τὸν αὐτὸν ποταμὸν οὐκ ἄν ἐμβαίης.

Somewhere Heraclitus says that everything is in motion and nothing stays put, and comparing existing things to the flow of a river he says that you cannot step into the same river twice.

The world is eternal fire:

Frag. 220 κόσμον τόνδε οὔτε τις θεῶν οὔτε ἀνθρώπων ἐποίησεν, ἀλλ' ἦν ἀεὶ καὶ ἔστιν καὶ ἐσται πῦρ ἀείζωον, ἀπτόμενον μέτρα καὶ ἀποσβεννύμενον μέτρα.

Neither god nor man created this world-order, but it was always, is, and will be: everlasting fire, kindling in measures and dying out in measures.

It is not easy to know:

Frag. 54 φύσις κρύπτεσθαι φιλεί.

Nature has a tendency to hide itself.

The Greek shop sign was photographed in the 1990s outside a boutique in Athens. Besides being a tribute to the great philosopher was it an invitation to passersby to come in and see what is new or an optimistic reference to the flow of merchandise? One wonders if the shop is still there.

LESSON XIV

Imperative Mood, Vocative Case

In this lesson you will learn how to address other people with the imperative mood and the vocative case. Among other useful things, you will learn to pray for rain.

IMPERATIVE

One last mood of the Greek verb remains to be studied, the **imperative**. Its meaning is simple enough: it gives a command or issues a prohibition. It is found in three tenses: present, aorist, and perfect. All commands refer to future time, and so, once more, the tenses of the imperative refer to aspect rather than time. The imperative is not augmented.

Present Imperative: Do it: keep on doing, be doing!

Aorist Imperative: Do it (once)! **Perfect Imperative:** Get it done!

The perfect imperative expresses a command that is meant to be *decisive* or *permanent*. (It is very rare.)

The imperative is found in the second and third persons: (you) *do it; let him/her/it do it; let it be done.* There is no first person imperative, the hortatory subjunctive (*let's do it*) being used instead.

The negative used with the imperative is $\mu \dot{\eta}$. But $\mu \dot{\eta}$ with the aorist subjunctive is used instead of the aorist imperative. That is to say, for a prohibition use:

 $\mu \dot{\eta}$ + the present imperative or $\mu \dot{\eta}$ + the aorist subjunctive

The future indicative can also be used to express a command that is familiar in tone; the negative is où. This is common in New Testament Greek (for commandments) but is also used in classical Greek.

The periphrastic forms of the perfect active imperative are the ones in general use.

Imperatives of contract verbs follow the rules for contraction. The endings with thematic vowel, as given with the present of $\lambda \acute{\nu}\omega$, are the ones to be used to form the present imperative of contract verbs.

Notes on the imperative

The only forms of the imperative which will present any difficulty are the second person singular forms. The others are easily recognizable from their distinctive endings which are added with the thematic vowel in thematic tenses, or directly to the stem in non-thematic forms. The second plural of the present is identical to the second plural indicative, but in most instances the context will tell which is intended.

The second person singular. *Active and passive*: The original ending is -θι which is retained in some -μι verbs and in the aorist passive (where it changes to -τι after -θη-). The thematic tenses of -ω verbs (present and second aorist) have only the thematic vowel -ε as ending. The -εω verbs have -ει (ε-ε > ει), but the accent will be on the penult: δοκεῖ *seems*; δόκει *think!*, *seem!* The first aorist active has -ον. A mnemonic device for the first aorist imperative is ἐλέησον (as in Κύριε ἐλέησον, *Kyrie Eleison*, part of the Christian liturgy and a popular song). *Middle* or *m.-p.*: the ending is -σο. In the thematic tenses -σ- drops out: -εσο > -εο > -ου. The -μι verbs usually retain the -σ-. The first aorist has -σαι.

An imperative (or hortatory subjunctive) may be strengthened by having ἄγε, φέρε, ἴθι (the present active second singular imperatives of ἄγω, φέρω, εἷμι go) precede it. They are translated *come!* or *come on!* and may be used with 2nd or 3rd person singular or plural.

VOCATIVE

The vocative case is used for direct address and in exclamations. In conversation, $\hat{\omega}$ is added for politeness, but usually need not be translated.

The first declension - η or - α types, all neuters, and all plurals (of any declension) have vocatives like the nominative.

ὧ ἄνδρες Ἀθηναῖοι gentlemen of Athens! ὧ Μοῦσα Oh Muse!

 $\hat{\omega}$ δόξα, δόξα Ah, reputation, reputation!

ὧ Σώκρατες, ὧ Σωκρατίδιον Socrates, my dear (little) Socrates

—Aristophanes, Clouds

The first declension masculines in $-\eta \varsigma$ or $-\alpha \varsigma$ have vocative singular in $-\alpha$. (Those in $-\tau \eta \varsigma$ have short $-\check{\alpha}$: most others have long $-\bar{\alpha}$.)

ὧ πολίτα (-α) ὧ νεανία (-α)

The second declension nouns in -05 have vocative in $-\epsilon$.

ὧ ἄνθρωπε sir!

The third declension vocative singular presents some variety. It is sometimes the same as the nominative and sometimes the same as the base.

Most nouns ending in a mute (except those in -1δ -), in a nasal, or a liquid (if accented on the ultima) have vocative like the nominative.

ὧ φύλαξ ὧ ποιμήν

Most others have vocative like the base:

ώ δαΐμον	(δαίμων)	
ὧ ἐλπί	(ἐλπίς)	(base ἐλπιδ-)
ὧ παῖ	(παῖς)	(base παιδ-)
ὧ πόλι	(πόλις)	(base πολι-)
ὦ Σώκρατες	(Σωκράτης)	
ὦ πάτερ	(πατήρ)	
ὧ ἄνερ	(ἀνήρ)	

VERBALS IN -τέος AND -τέον

Verbal adjectives ending in - τ éo ς and - τ éo υ are derived from verb stems. Most are formed from the aorist passive stem, omitting the - $\theta\eta$; but some are developed from the present stem.

ποιητέος (ἐ<u>ποιή</u>θην) ἀκουστέος (<u>ἠκούσ</u>θην)

They express necessity and are used with the dative of agent. The neuter is used as an impersonal.

ἐμοὶ ἀκουστέον It is necessary for me to hear

ποιητέον It must be done

Two Women Poets

Sappho, a lyric poet of the sixth century B.C.E., was born on the island of Lesbos. Of her Byron wrote:

> The isles of Greece, the isles of Greece where burning Sappho loved and sung. . . .

Photo by L. J. Luschnig.

Almost nothing is known for certain about her life, and of her nine volumes of poetry very little,

and most of that tattered, is extant. Still, it is enough to show us why she was so admired that she was called ἡ δεκάτη Μοῦσα, the tenth Muse. Ancient critics praised her most for her skillful arrangement of sounds, "the natural kinships and combinations of her letters" (in the words of Dionysius of Halicarnassus). A few examples must suffice here, but read them aloud.

> 160 τάδε νῦν ἐταίραις ταῖς ἐμαῖς τέρπνα κάλως ἀείσω

[1-2 τάδε τέρπνα < τερπνός delightful. 1 ἐταίραις = ἑταίραις: the Aeolic dialect drops rough breathings. 2 κάλως = καλῶς: in the Aeolic dialect the accent is recessive. ἀείσω < ἀείδω sing.]

> 168B δέδυκε μὲν ἀ σελάννα καὶ Πληΐδες: μέσαι δὲ νύκτες, παρὰ δ' ἔρχετ' ἄρα, ἔγω δὲ μόνα κατεύδω.

Praxilla, a lyric poet of the fifth century B.C.E. from Sicyon, was best known for her drinking songs and hymns. In this poem, the dying Adonis laments the things he will miss. The poem was famous for its supposed bathos: "more vapid than Praxilla's Adonis" became proverbial. But one person's bathos is another's pathos. Individual details of everyday life make popular songs appealing. The poem survives because Zenobius (second century C.E.) quotes it in explaining the proverb ἠλιθιώτερος τοῦ Πραξίλλης Ἀδώνιδος. ἠλίθιος silly.

κάλλιστον μὲν ἐγὼ λείπω φάος ἠελίοιο, δεύτερον ἄστρα φαεινὰ σεληναίης τε πρόσωπον ἠδὲ καὶ ὡραίους σικύους καὶ μῆλα καὶ ὄγχνας.

8. PRINCIPAL PARTS OF VERBS

Definition of principal parts

The principal parts of verbs show the type of verb (active, deponent, thematic, etc.), the changes in stem for different forms, what kind of future, aorist, perfect a verb has, and whether it has all the usual tenses and voices. For example, is it deponent or does it have a deponent future? Is it thematic or athematic? Is its aorist first or second? Is it missing some tenses or voices?

The principal parts are given in first person singular forms:

I Present: active indicative; middle indicative II Future: active indicative; middle indicative III Aorist: active indicative; middle indicative IV Perfect: active indicative V Perfect: middle indicative VI Aorist: passive indicative

Tense systems and the endings of principal parts

Appendix II: Syntax

1. CASES

Most of the examples are from Euripides' Alcestis and Plato's Euthyphro.

Nominative

Most Common Nominative Endings

First declension: $-\eta$, $-\alpha$, $-[\tau]\eta\varsigma$, $-\alpha\varsigma$; $-\alpha\iota$ Second declension: $-\circ\varsigma$, $-\circ\nu$; $-\circ\iota$, $-\alpha$ Third declension: $-\varsigma$ [$-\xi$, ψ], $-\omega\nu$, $-\circ\varsigma$, $-[\mu]\alpha$; $-\varepsilon\varsigma$ [$-\varepsilon\iota\varsigma$], $-\alpha$ [$-\eta$]

Uses of the Nominative Case

a. **Subject:** the subject of a finite verb is nominative. A finite verb is one in which the ending defines the subject, as opposed to an infinitive.

Examples:

ἀπωλόμεσθα πάντες, οὐ κείνη μόνη. We are all lost, not she only.

-Alcestis 825
ἔσται, τάδ' ἔσται. These things will be, (they) will be

-Alcestis 327

b. **Predicate nominative:** a nominative is used in the predicate after verbs meaning *be, become, appear, be named* and the like, in agreement with the subject. A few of these verbs in Greek are εἰμί, γίγνομαι, φαίνομαι, δοκέω, αἰρέομαι (*be chosen*), καλέομαι (*be called*), λέγομαι (*be said, be called*).

Examples:

μαθητής δή γέγονα σός . . . I have, then, become your pupil.
—Euthyphro 5a

οὐχ ὁμολογήσω ἄκλητος ἥκειν. I shall not admit that I have come uninvited.

—Plato, Symposium 174d

Genitive

Most Common Genitive Endings

First declension: $-\eta \varsigma$, $-\alpha \varsigma$, $-\circ \upsilon$; $-\hat{\omega} \upsilon$ Second declension: $-\circ \upsilon$; $-\omega \upsilon$

Third declension: $-05 [-005, -\omega5]; -\omega v$

Uses of the Genitive Case

Most uses of the genitive come under two headings: the defining (or adjectival) genitive, which is used for one noun depending on another; and the ablatival genitive, used for separation.

a. **Possession:** The genitive (in the attributive position) is used for possession and other close relationships.

Examples:

γυνη μέν οὖν ὅλωλεν ἸΑδμήτου, ξένε. Rather the wife of Admetus is dead, stranger.

-Alcestis 821

τοῦ ἡμετέρου προγόνου, ὧ Εὐθύφρων, ἔοικεν εἶναι Δαιδάλου τὰ ὑπὸ σοῦ λεγόμενα. The things said by you, Euthyphro, seem to me of our ancestor, Daedalus (i.e., seem to belong to our ancestor, Daedalus; this is also called the predicate genitive of characteristic).

—Euthyphro 11c

b. **Partitive Genitive:** (in the predicate position) used for the whole from which a part is taken. It can be used with nouns, adjectives, and verbs.

Examples:

οἶσθα γὰρ εἴπερ τις ἄλλος ἀνθρώπων. For you know if anyone else of men [does].

—Euthyphro 15d

This genitive is common with verbs of *touching*, *remembering*, and *forgetting*.

ἔθιγες ψυχᾶς, ἔθιγες δὲ φρενῶν. You have touched my soul, you have touched my senses. [ἔθιγες < θιγγάνω touch; ψυχᾶς = ψυχῆς]

-Alcestis 109

c. **Genitive of Comparison:** used with comparative adjectives and adverbs and with verbs implying comparison.

Example:

ψυχῆς γὰρ οὐδέν ἐστι τιμιώτερον. For nothing is more precious than life.
—Alcestis 301

d. **Genitive of Agent:** the one by whom something is done is expressed by $\dot{v}\pi\dot{o}$ (*by*) with the genitive.

Example:

φιλεῖται ὑπὸ <u>Θεῶν πάντων</u>. It is loved by all the gods.
—Euthyphro 10d

e. **Genitive of Cause:** verbs of emotion take a genitive of the cause of the feeling.

Examples:

 $\underline{o\hat{\upsilon}}$ δὴ χολωθεὶς τέκτονας Δίου πυρὸς / κτείνω Κύκλωπας. Angered at which, I killed the Cyclopes, workers of Zeus' fire.

—Alcestis 5–6

This genitive is often used in exclamations.

ιώ μοι <u>τύχας</u> [= τύχης]. Ah me for my [ill] fortune. —Alcestis 398

f. **Genitive of Source:** with verbs of hearing, the genitive is used for the person or thing heard; the sound heard is accusative.

Example:

άλλ ἄκουέ μου. But hear me.
—Alcestis 781

g. **Genitive with verbs:** Verbs of ruling take the genitive, which depends on the nominal idea of the verb (e.g., βασιλεύω *be king of*).

Verbs of reaching and obtaining take a genitive of the thing attained.

Examples:

πολλῶν μὲν ἄρχεις. You rule over many.

—Alcestis 687

<u>ὁσίου</u> γὰρ <u>ἀνδρος</u>, ὅσιος ὢν ἐτύγχανον. Being holy I met with a holy man.—Alcestis 10

h. **Genitive of Separation** (ablatival use): the genitive is used with verbs, adjectives, adverbs, and prepositions implying separation from.

Examples:

<u>ἐσθλῆς</u> γάρ, οὐδεῖς ἀντερεῖ, καὶ <u>σώφρονος/γυναικὸς</u> ἡμάρτηκας. For you have lost a noble—no one will deny it—and chaste wife.

—*Alcestis* 615–16

άλλὰ <u>σμικροῦ τινος</u> ἔτι ἐνδεής εἰμί. But I am still in need of a little something.

-Euthyphro 12e

i. **Genitive of Time within which:** The genitive is used of the period of time within which something happens.

Example:

Dative

Most Common Dative Endings

First declension: -η, -α; -αις [-αισι] Second declension: -ω; -οις [-οισι]

Third declension: -ι; -σι [v]

Uses of the Dative Case

The dative is used for the party interested (including the indirect object, the dative of advantage, and the dative of possession, *to*, *for*, *of*), for the instrument (means or manner, *by*, *with*), and for the locative (place where and time when, *in*, *on*, *at*).

a. Indirect object: the person or thing indirectly affected by the verb goes into the dative.

Example:

θάψεις δ' αὐτὸς ὢν αὐτῆς φονεύς,/δίκας τε δώσεις σοῖσι κηδεσταῖς ἔτι. You will bury her though you are yourself her murderer and you will still pay the penalty to your in-laws.

—*Alcestis* 730–1

b. **Dative with Verbs:** many intransitive and impersonal verbs take the dative: verbs meaning *benefit*, *obey*, *serve*, *assist*, *please*, *satisfy*, *advise*, and their opposites; and those expressing *friendliness*, *hostility*, *blame*, *anger*, *reproach*, *likeness*, *accompaniment*, and *agreement*. Compounds in σvv - and some in $\pi \rho o \varsigma$ -, $\pi \alpha \rho \alpha$ -, $\dot{\epsilon} v$ - and $\dot{\epsilon} \pi \iota$ - take the dative.

Examples:

οὐκ ἤρεσκέ σοι μόρον Ἀδμήτου / διακωλῦσαι; Wasn't it enough for you to have prevented the death of Admetus?

—Alcestis 32

καὶ τοῖσδέ γ ' οἴκοις ἐκδίκως προσωφελεῖν. And to help this house unjustly.

—Alcestis 41

οὐχ ἕπομαι, ὧ Σώκρατες, τοῖς λεγομένοις. I do not follow the things being said, Socrates.

—Euthyphro 12a

c. **Dative with Adjectives:** the dative is used with adjectives expressing *friendliness, hostility, likeness,* and meanings similar to those of verbs in b.

Example:

σὺ δ' εἶ παλαιὸς δεσπόταις ἐμοῖς φίλος. You are a friend of long standing to my masters.

—Alcestis 212

d. **Dative of Advantage/Disadvantage:** The person or thing to whose advantage or disadvantage something is or is done is in the dative and is usually translated with the English preposition *for*.

Example:

πάσαις δ' ἔθηκεν εὐκλεέστατον βίον/ γ υναιζίν, ἔργον τλᾶσα γενναῖον τόδε. She has made life most glorious for all women, having undergone this noble deed.

-Alcestis 623-4

The **Ethical** dative is a special type of the dative of advantage/disadvantage, in which a personal pronoun in the dative has the force of *for my sake*, *for your sake*, etc.

Example:

οὐ γὰρ ἐθέλουσι σοι μένειν, ὡς καὶ αὐτῷ σοι δοκεῖ. For they are not willing to stand still for you, as it seems to you yourself.

—Euthyphro 11c

e. **Dative of Possession:** with ε iµí and γ í γ voµαι, the dative is used of the possessor, with the thing possessed in the nominative.

Example:

μόνος γὰρ <u>αὐτοῖς</u> ἦσθα, κοὕτις ἐλπὶς ἦν / σοῦ κατθανόντος ἄλλα φιτεύσειν τέκνα. For you were alone to them (you were their only child) and there was no hope (they had no hope)—once you were dead—to produce more children.

—*Alcestis* 293–4

f. **Dative of Agent:** used with the perfect and pluperfect passive (and rarely with other passive tenses).

Example:

πολλαὶ θεραπεῖαι τοῖς ἰατροῖς ηὕρηνται. Many cures have been found by the doctors.

—Isocrates 8.39.

g. **Instrumental Dative:** cause, manner, and means are expressed by the dative.

Examples:

οὐδ' ἀλίσκεται τέχνη. . . . And it is not grasped by art. . . . —Alcestis 786

The **Dative of Respect** is a form of the dative of manner.

I am likely, then, my friend, to be more clever than that man, insofar as [by so much as] he made only his own [creations] not to stay put, but I, as it seems, in addition to my own, also [creations] for the people's [creations] [creat

—Euthyphro 11d

Third declension: -v, $-\alpha$, $-o\varsigma$, $-\mu\alpha$; $-\alpha\varsigma$, $-\epsilon\iota\varsigma$, $-\alpha$

Uses of the Accusative Case

The accusative is used for the direct object, for the end of motion (terminal, *to*, *toward*), as subject of an infinitive, and in various adverbial relationships.

a. **Direct Object:** the direct object is in the accusative. Two accusatives may be used with one verb.

Examples:

όνομάζουσι μέντοι <u>αὐτόν</u>, ὡς ἐγῷμαι [= ἐγὼ οἶμαι], <u>Μέλητον</u>. They call him, I think, Meletus.
—Euthyphro 2b
τί δῆτα σ' [= σε] ἠδίκησα; What wrong have I done you?
—Alcestis 689

b. **Cognate Accusative** (internal object): the cognate accusative repeats the meaning already contained in the verb and can be used with both transitive and intransitive verbs.

Example:

καὶ δὴ καὶ <u>τὸν ἄλλον βίον</u> ὅτι ἄμεινον βιωσοίμην. And in particular that I will live the rest of my life better.

—Euthyphro 16a

Example:

φησὶ γάρ με ποιητὴν εἶναι θεῶν. For he says that I am a maker of gods.
—Euthyphro 16a

d. **Terminal Accusative:** the place to which (usually with a preposition, εἰς, πρός, παρά, etc., but in poetry often without a preposition) is accusative.

Example:

εἰς Ἅιδου <u>δόμους</u> into the house of Hades —Alcestis 25

e. **Accusative of respect:** an adverbial accusative that tells in what respect something is true.

—Alcestis 355–6

g. **Accusative Absolute:** used instead of the genitive absolute when the participle represents an impersonal verb.

Example:

θνήσκω, παρόν μοι μὴ θανεῖν ὑπὲρ σέθεν. I am dying, it being possible [although it is possible] for me not to die on your behalf.

-Alcestis 284

Vocative

Most Common Vocative Endings

First declension: $-\eta$, $-\alpha$; $-\alpha$ 1 same as nominative

Second declension: $-\varepsilon$, -ov; $-o\iota$, $-\alpha$

C.A.E. Luschnig's *An Introduction to Ancient Greek: A Literary Approach* prepares students to read Greek in less than a year by presenting basic traditional grammar without frills and by introducing real Greek written by ancient Greeks, from the first day of study. The second edition retains all the features of the first but is more streamlined, easier on the eyes, more gender-inclusive, and altogether more 21st century. It is supported by a Web site for teachers and learners at http://worldwidegreek.com/.

"I have used C.A.E. Luschnig's text for my beginning Greek sequence for over twenty years. I find that her approach brings students to competency quickly and efficiently. The new version improves what was already a good text, keeping the many exercise sentences, providing a realistic selection of 'real Greek' readings with translation aids conveniently below. The proof is in the pudding: after doing beginning Greek with Luschnig's text, my Greek students have been able to move easily to the second year reading classes in either Euripides or Plato."

—KARELISA HARTIGAN, Professor of Classics, University of Florida

"Luschnig's excellent *An Introduction to Ancient Greek* offers a thorough and clear account of grammar and syntax, copious exercises for practice, and a wonderful array of brief passages from ancient authors for translation and discussion. My students and I have used the text happily for years, and this new edition is even better than its predecessor."

—Deborah H. Roberts, William R. Kennan, Jr. Professor of Comparative Literature and Classics, Haverford College

"An Introduction to Ancient Greek: A Literary Approach is the most successful of the more than half-dozen beginning Greek grammars I have used in the classroom, especially in this revised edition. Students meet 'real Greek' early and often, and the exercises are ample and varied. What I appreciate particularly is that this grammar has personality, even a sense of humor, so that my students feel they are learning ancient Greek from Cecelia Luschnig rather than an anonymous textbook. The Web site associated with this book is an invaluable resource."

—SHERRY GRAY MARTIN, Faculty, St. John's College, Santa Fe

"This accessible and reliable presentation of the essential grammar (backed by numerous exercises and readings) is so well-paced that a class, if it wishes, can speed through in fifteen or sixteen weeks and have the rest of the year to read a Plato dialogue or a Lysias speech."
