## Introduction

My original intention was to make an index of names and titles in Mariette's "Mastabas" only, but this scheme was enlarged so as to include first Lepsius' "Denkmäler", and afterwards the publications of the Archaeological Survey and the Egyptian Research Account, and some other works. It is, however, exhaustive only of the two first-named works, viz: Mariette's "Mastabas" and Lepsius' "Denkmäler".

Names are listed as they are written, e.g.  $\overline{\text{Ntr-wsr}}$  as Ntr-wsr, not Wsr-ntr;  $\overline{\text{K}^3\text{-gm-ni}}$  as K<sup>3</sup>-gm-ni, not Gm-ni-k<sup>3</sup>. Titles are listed as they are read, e.g.  $\overline{\text{Imi irti wi}^3}$ . Kings are arranged chronologically, and Nomes in numerical order. An asterisk \* denotes a woman's name.

On pls. 47-66 an attempt has been made to arrange the titles in their original order. No title is included that has not six, or more, holders; and every name is that of a person who holds six, or more, titles. This method of selection eliminates all merely household officials, and all minor titles such as  $\overline{\text{Sd}} \overline{\text{S}}$ ; but it excludes all women, none of whom appear to hold more than five offices. In the tabulated lists, pls. 59-66, the titles are arranged in order of frequency, the names in alphabetical order.

In this attempt at restoring the original order of the titles, the basis is the horizontal lines of the inscription. When the inscription was first drawn out by the scribe, the list of titles must have been written in horizontal lines, but the artist, when arranging the list to fit into vertical columns, altered the relative position of many of the titles in order to bring the most important to the tops of the columns. In the horizontal lines of the inscriptions we often get a certain sequence of titles, the same titles being so divided up in the vertical columns as to read alternately from one column to another.

The false-door of Ššꜣt-nfr-ššm (MM.E11) is a clear example. The horizontal lines begin  $\overline{\text{Sd}} \overline{\text{P}^3} \overline{\text{H}^3} \overline{\text{S}}$ , but in the vertical lines these two titles are separated so as to head two separate columns. Following this indication, we get the order of the titles by reading the columns alternately (even numbers refer to one column, uneven to the other): 1  $\overline{\text{Sd}}$ , 2  $\overline{\text{P}^3} \overline{\text{H}^3} \overline{\text{S}}$ , 3  $\overline{\text{P}^3} \overline{\text{A}^1}$ , 4  $\overline{\text{Sd}} \overline{\text{S}}$ , 5  $\overline{\text{Sd}} \overline{\text{S}}$ , 6  $\overline{\text{H}^3} \overline{\text{S}}$ , 7  $\overline{\text{Sd}} \overline{\text{H}^3} \overline{\text{S}}$ . No 6, which is probably an epithet and not a true title, is evidently placed here to fill up the line and so to space the other titles to better advantage.

Again, on the false-door of Ntr-wsr (MM.D1) the horizontal line begins with the three principal titles in their proper sequence; in the vertical columns they are divided thus: 1  $\overline{\text{P}^3} \overline{\text{S}}$ , 1a  $\overline{\text{S}}$ , 2  $\overline{\text{H}^3} \overline{\text{S}}$ , 3  $\overline{\text{Sd}} \overline{\text{H}^3} \overline{\text{S}}$ , 4  $\overline{\text{P}^3} \overline{\text{S}}$ , and so on. On the false-door of Pth-htp (MM.D62) the same arrangement appears to hold good,

# Introduction

though as the principal horizontal lines have perished it is impossible to check the results. But we find at the top of one column, and at the top of the next. Reading these columns alternately we get this order: 1 , 2 , 3 , 3a , 4 , etc. The reason why two titles should follow each other in the same line seems to be in order to balance a long title in the other column.

But even this method of reading is complicated in other ways. E.g. on the false-door of 'Issi-<sup>c</sup>nh, the outer jambs show that the horizontal lines, as well as the inner jambs, are to be read alternately, thus: 1 , 2 , 3 , 4 , 5 . On the inner jambs the fifth title is .

A further complication is introduced by the number of titles which appear in the vertical columns but not in the horizontal lines. These can be fitted in only by noting their positions in other lists, but even then a certain percentage remains of which I can make little. Long lists of rare titles, such as those of K<sup>3</sup>i (MM. D19), Pth-šps' (MM. C1), and Mr<sup>i</sup> (DM. 523 etc.), cannot be arranged entirely in their true order.

The tabulated list of festivals is compiled almost exclusively from Mariette's "Mastabas" and Lepsius' "Denkmäler". The festivals are arranged in the order in which they usually occur, so that every variation from the normal is apparent at a glance.

My sincere thanks are due to Dr J. H. Walker for much help in reading obscure signs and in transliterating; to Miss Porter for kindly allowing me to consult her MS of the "Index of Hieroglyphic Texts"; to Mrs Aitken; to Miss Noëmi Klingenstein; and to Professor Flinders Petrie to whom it is entirely due that this Index has ever reached the point of publication. I have also had the privilege of access to Professor Kurt Sethe's MS on the titles in "Sagqara Mastabas" vol. I.

## Suggestions and references:

- see Naville "Festival Hall" pl. IX.1 where the name is
- may perhaps read H<sup>3</sup> s<sup>3</sup>. See MM. D 38.
- compare PM. pl. 9.
- compare BN. 95.

## Errata:

- Pl. XI cancel LD. II 33.
- Pl. XXI " = AS. I 156.
- Pl. XXV omitted; inserted on Pl. XLVI
- Pl. XLI misplaced.
- Pl. XLI. = "
- Pl. LXXII inadvertently omitted MM. H1 and MM. H13
- Pl. LXXIII " " MM. F1 and Dend. pl. 6.
