King Bagyidaw (r. 1819–1838), who succeeded Bodawphaya in 1819, sent General Maha Bandula to govern Arakan as well as to suppress revolts in Manipur and Assam. The British, however, by this time were assisting the anti-Burman rebels in these areas, much to the annoyance of the Burman authorities. Bandula, who subsequently became a military hero, attempted to assert the authority of the court over this territory. In 1823, in hot pursuit of Arakanese rebels who fled across the River Naaf into British territory, Bandula threatened the British protectorate of Cachar and occupied an island in the middle of the river. The British responded in force. A large seaborne expedition sailed to the mouth of the Irrawaddy and took Yangon, then a small fishing town, by force.

The British plan was to force the Burmans to capitulate, but when their resistance stiffened, they were forced to send an expedition up the Irrawaddy River in 1825–1826, capturing a series of Burman towns along the route. When they reached Yandabo, the Burman side was forced to agree to the terms of the treaty, though they found its terms humiliating by the standards of Southeast Asian statecraft. The treaty required Burma to yield the provinces of Arakan and Tenasserim to Britain, as well as to abandon its claims to Manipur and Assam. Furthermore, Burma was expected to pay an indemnity of \$5 million to the EIC in Calcutta. An additional commercial treaty was also agreed upon between the EIC and the Burman court. The provisions gave the EIC extensive commercial privileges, and the British gained the right to station a permanent representative at the Burman capital.

The terms of the treaty marked the beginning of the slow process of Burma's eventual loss of sovereignty to Britain. The terms of the treaty not only undermined the prestige and power of the Burman government but also made clear Burma's inferior military and economic prowess in comparison with the growing power of imperial Britain. The imposed indemnity nearly bankrupted the Burman state, which eventually was able to agree to terms that allowed for the sum to be paid in four installments. John Crawford, who came to Ava to negotiate the commercial treaty, found the Burmans unwilling to compromise further, and while relations between Britain and Burma improved briefly following the First Anglo-Burmese War, the conflicting perceptions of the two sides made future wars seem, in retrospect, inevitable.

YOGYAKARTA (JOGJAKARTA)

Consequence of Javanese Disunity

The name Yogyakarta is derived from Ngayogyakarta Hadiningrat, a sultanate established in 1755. The toponym now refers both to a city and to the Special District (*Daerah Istimewa*) of Yogyakarta, which was established after Indonesia became independent of The Netherlands. The Special District forms an enclave surrounded on the landward side by the province of Central Java, and on the south by the Indian Ocean.

The Special District of Yogyakarta contains several important monuments from the kingdom of Mataram, the capital of which lay nearby. Important Buddhist shrines include Kalasan, consecrated in 792 C.E., and Candi Sari. Candi Sambisari is a Hindu monument of the early ninth century. To the west of the Progo River lies the fertile Kedu plain, site of the world-famous Borobudur monument, while to the east, just beyond the Opak River, is the major complex of Hindu monuments at Prambanan.

The ancient kingdom of Mataram vanished in the early tenth century C.E. The name was, however, revived in the early Islamic period of the sixteenth century, then referring to a kingdom the capital of which lay at various sites in the Yogyakarta and Central Java regions. In 1742 a combined force of Javanese and Chinese rebels destroyed the palace of Mataram at Kartasura. One of the nobles who remained faithful to Pakubuwono II (r. 1725–1750), the Mataram ruler, was Pangeran (Prince) Mangkubumi. Eventually order was restored with Dutch assistance. The price of Dutch support was high, however, including the cession of significant areas of territory. This loss of part of the kingdom required the reapportionment of vari-

ous appanages among the nobles of the kingdom, who drew from these lands their main source of income. The first allocation of appanage lands favored Mangkubumi, but when other nobles protested, the ruler, or *Susuhunan*, of Mataram revised the distribution of lands. Now Mangkubumi became upset, withdrew from court, and threatened to mount a challenge to the ruler.

Gradually more and more courtiers took the side of Pangeran Mangkubumi. Matters in the kingdom came to a crisis in 1749, when the Susuhunan's (Sunan) health deteriorated. The Netherlands East India Company (VOC in Dutch, *Kumpeni* in Javanese) seized upon this moment to achieve another of its goals. When the Sunan fell ill, the Dutch official Hogendorp went to Surakarta, bringing with him a new treaty. In his ill and weak condition, having been roused from his sickbed, the Sunan was forced to sign the treaty, which included the stipulation that the Sunan surrender the crown of Mataram to the Kumpeni and put the fate of his son, Pangeran Adipati Anom, in the Kumpeni's hands. The Kumpeni then obtained supreme power over the kingdom of Mataram, for not long thereafter Sunan Paku Pakubuwono II passed away.

The VOC then successfully persuaded the Sunan Pakubuwono III (r. 1750–1788) to divide the kingdom of Mataram into two, giving half of his kingdom to Pangeran Mangkubumi, in return for peace. On 13 February 1755 a treaty was signed between the Sunan and Pangeran Mangkubumi in the village of Giyanti, near Surakarta. Thereupon the kingdom of Ngayogyakarta Hadiningrat, or Yogyakarta as it is commonly known, came into being. The Sunan retained his title, while Pangeran Mangkubumi assumed the throne of Yogyakarta as Sultan Hamengkubuwono. After 1755 the kingdom was no longer referred to as Mataram. Surakarta and Yogyakarta became Dutch vassals whose main functions were to provide obligatory labor and deliveries of commercial commodities.

Competition was to intensify over the years as the rulers of Yogyakarta and Surakarta vied to be the sole legitimate king of Java. Unlike the Surakarta rulers in general, the sultans of the Yogyakarta court did not try to cultivate the friendship of the Dutch. Among the sultans of Yogyakarta who reigned during the high and

late colonial period, only Hamengkubuwono I (r. 1755–1795) was able to both maintain the autonomy of his kingdom and appease the Dutch.

The 1755 division of Mataram into two kingdoms, the kasunanan of Surakarta and the sultanate of Yogyakarta, as a result of the Treaty of Giyanti, considerably strengthened the Dutch position in Java. Instead of a unified kingdom controlling a large area and population, Central Java was divided between two rival kingdoms that were more likely to fight each other than to band together to resist the Dutch.

This situation brought some benefits to the common people. For the first time in many years there was relative peace in Central Java—a calm that lasted for seventy years. Economic conditions in villages improved, and the population grew, particularly in the *pasisir* (coastal area). This was the longest period of peace in Central Java in centuries, so the Javanese did not at first perceive the division of Mataram to be oppressive. This situation persisted until 1825, when hostilities known as the Java War broke out.

At the end of the Pacific War (1941–1945), the sultan of Yogyakarta threw his support to the nascent Republic of Indonesia. For a time, Yogyakarta became the capital of the nation. Republican forces were later forced to withdraw, but in a famous surprise attack republican units succeeded in retaking the city briefly. Although they withdrew soon thereafter, this success proved that the revolution was still a vital force to be reckoned with. The brief reoccupation of Yogyakarta is seen as one of the main turning points of the Indonesian revolution. In recognition of the unswerving support of the sultan, Yogyakarta was granted Special District status by the Republic of Indonesia, giving it greater autonomy than other provinces.

YOUNG MEN'S BUDDHIST ASSOCIATION (YMBA) (1906)

Initiating Burma's Nationalist Struggle

The YMBA was the earliest of the Burmese Buddhist associations that were the forerunners of the Burmese nationalist—and later independence—movements. Established in 1906 by students from Rangoon College—Maung Ba Pe, Maung Gyi, Maung Hla Pe, Maung Sein Hla Aung, and Maung Ba Dun—its membership soon expanded to include senior Burmese civil servants, Burmese who had just returned from education in England, and members of the Governor's Council. Modeled on the Young Men's Christian Association (YMCA), the YMBA initially sought to revive and restore Burmese Buddhist culture. The deposition and deportation to India of the last Burmese monarch, King Thibaw (r. 1878–1885), at the end of the Third Anglo-Burmese War (1885), and the subsequent British refusal to appoint a *thathanabaing*, supreme head of the Buddhist Sangha, had severely and adversely impacted on Burmese sociocultural heritage. Without king or Buddhist patriarch, Burma had lost the two poles of its traditional Buddhist culture. In addition, educational reforms under the colonial administration severely undermined the traditional role the Buddhist Sangha had played in education, particularly in rural areas. Two decades after the annexation of Upper Burma (1 January 1886), the YMBA aimed to revive and preserve Burmese Buddhist culture and language in the face of an alien Western colonial culture.

The YMBA may be compared to Budi Utomo (formed in 1908) in Indonesia. Neither the YMBA nor Budi Utomo was a political association initially, yet they both demonstrate the enduring strength of religion in mobilizing opposition to an invader. In both Indonesia and

Burma “religion was the matrix from which a nationalist movement took shape” (Trager 1959: 242). In the face of repression of all political dissent by the colonial administration, the YMBA in its public expressions was careful to enunciate loyalty to the British Crown and “appreciation for the blessings of the British administration of Burma” (Maung Maung 1980: 4). It organized annual conferences, produced a weekly newspaper in English, *The Burman Buddhist*, and by 1917 had fifty branches. A second newspaper, *The Sun*, a triweekly launched on 4 July 1911 with Rs (Indian rupees) 5,000 donated by friends, received financial support from a wealthy Burmese lady, Ma Ma Tin, and became an important outlet for nationalist aspirations.

After the YMBA's third annual conference in 1915, it became more political in orientation. Its political agenda included pressuring the British government in India for more rights and liberties. It demanded the appointment of Burmese to key posts, including Burmese deputy commissioners, district magistrates, land records department offices, customs officials, and Chief Court magistrates, to enable Burmese to have a voice in the formulation of national policy and the corridors of power. The transformation to overt political activities occurred with the release of the Montagu-Chelmsford Report in 1917, whereby Edwin Samuel Montagu, secretary of state for India (t. 1917–1923), announced a policy of gradual self-government for India but not for Burma. Outraged at being considered inferior, Burmese nationalists in the YMBA, and equivalent women's organizations, began pressing for constitutional reforms in Burma. A visit to Lord Montagu in India by U Ba Pe to press the case for separation from India was sunk by the Karens, beneficiaries of the colonial administration, who thought that Burma was not yet ready. The delegation urged the establishment of a legislative council of seventy-five members, of whom sixty were to be elected.

The YMBA split into the old guard loyalists and the Young Turks. Led by the barrister Maung Thein Maung, following the 1916 All Burma Conference of Buddhists at Jubilee Hall, Rangoon College, the “no footwear” campaign was launched, echoing the “shoe issue” of precolonial times. Under Burmese custom, shoes had to be removed in the precincts

of Buddhist temples and pagodas, and also upon entering a private house. The British sought to thwart the campaign by not visiting the Shwe Dagon pagoda in Yangon, or any other pagoda. However, that was not before an ugly incident had occurred at the Eindawya Pagoda in Mandalay, where irate monks attacked a group of Europeans, including women; four of the monks were tried and convicted. Their leader, U Ketya, was sentenced to life imprisonment. The revered Ledi Sayadaw, in support of the YMBA, published a ninety-five-page book in Burmese entitled *On the Impropriety of Wearing Shoes on Pagoda Platforms*. This radical turn brought stricter police surveillance and open defiance of the British administration, the first overt expression of anti-British political views in the nascent nationalist movement.

Up to 1920, Burma had experienced rapid economic growth, much immigration from India, extreme exploitation of its arable lands, and widespread indebtedness to foreign investors. There was little opportunity to develop the skills needed for self-government in the Legislative Council. With the establishment of Rangoon University in 1920, the nationalist movement gained a new dimension from the activities of students such as U Nu (1907–1995), president of the Students Union. With the support of two leading monks, U Ottama (1897–1939) and U Wizara, from 1920 onward, agitation against the colonial authorities became more focused.

U Ottama, known as the Gandhi of Burma, on returning from India in 1918 facilitated the involvement of Buddhist monks in the politics of the nationalist movement. Born in Akyab in 1897, U Ottama had declined an opportunity to study in England; instead he entered the Buddhist priesthood and as a young monk went to Calcutta to study, then to Tokyo, returning in 1911. His writings in *The Sun* contributed to the political awakening of the nationalist movement in its early stages. He preached widely in small towns, wrote letters to Governor Reginald Craddock (t. 1917–1922), and became a national hero. He was arrested in 1921 and sentenced to eighteen months' imprisonment. Subsequent periods of his imprisonment from 1921 to 1927 set the tone for nonviolent noncooperation in the Gandhian mode. People were incensed and protested, and the Buddhist Sangha led the campaign of polit-

ical agitation. Through the YMBA and U Ottama, the early nationalist struggle prepared the way for demands for home rule and self-government, which marked the movement during the 1920s. U Ottama died in penury in 1939. By then the nationalist movement was well on the way to independence.

In 1920 the YMBA became the General Council of Burmese Associations (GCBA). Its president, U Chit Hlaing, advocated noncooperation with the British-appointed Legislative Council and followed an overtly political program that gave rise to the Rangoon University strike in 1920. The newspapers and journals first launched by the YMBA contributed to the significant political awakening of the 1920s. The YMBA and its successor organizations contributed a lasting legacy of political debate to Burma's cultural life.

YUAN (MONGOL) DYNASTY (1271–1368)

The Yuan or Mongol dynasty was the Chinese portion of a Mongol empire that at its peak strength had dominated Europe and Asia. This expansionist dynasty was related to Southeast Asia in two distinctive ways: launching of numerous expeditions in an attempt to put Asian countries under its domain, and prosperous trade with such countries, whether turned into Mongolian vassal states or otherwise.

In 1271, Kubilai Khan (1215–1294), already elected in 1260 by other Mongol khans the *khaghanate* ("khan of khans"), founded the Yuan dynasty at Ta-tu (modern Beijing). The Yuan dynasty coexisted with four other khanates, all of which constituted a nominally unified Mongol empire formed by Genghis Khan (1162–1227), paternal grandfather of Kubilai Khan. Kubilai had to spend another eight years to conquer the Southern Song dynasty (1127–1279), a Chinese regime situated south of the Yangzi (Yangtze) River. However, the virtue and ability of Kubilai, which made him a great conqueror and then enlightened ruler of China (r. 1260–1294), were unfortunately not inherited by his successors, whose increasingly racist dispositions and inflexible fiscal policies caused government corruption. That in turn agitated the Han Chinese into an antigovernment mood, infrequently translated into riots throughout the fourteenth century, before the dynasty's collapse. Finally, Zhu Yuanzhang (1328–1398), a peasant leader, expelled the Mongols to Mongolia in 1368 and became the first emperor of the Ming dynasty (1368–1644), although in Mongolia some Mongol princes still adopted the title Yuan for their regime, which coexisted with the Ming and imposed continuing threats to its southern neighbor for another thirty years.

To a Mongol khan, military achievement was the cost of legitimacy rather than a prize, and Kubilai was no exception. Therefore, after the Southern Song were eliminated, Southeast Asia would naturally be the next target of invasion. Countries in the region had probably felt the imminent threat of the Mongols' military presence as early as 1253, when Kubilai conquered Dali (Tali), in modern Yunnan and bordering northern Indochina; he had a view to encircling the declining Southern Song China before a full-scale invasion began. After the

Kublai Khan and soldiers. Kubilai Khan (1215–1294) was a Mongol emperor and the grandson of Genghis Khan. Kubilai Khan founded China's Yuan dynasty and established Mongol power in China. (Corbis)

founding of the dynasty, three expeditions were sent to Champa (1281, 1286, 1287), two to Pagan (1281, 1287), and one to Java (1289). Some successes were achieved: the Pagan king was overthrown in 1287; Champa king Tran Nhon-ton acknowledged himself as Kubilai's vassal in

1288. All the remaining expeditions, however, suffered defeats. Therefore, the territory of the Yuan dynasty was no larger than part of Mongolia and land inhabited by the Han Chinese.

The alien nature of the Yuan dynasty implied less reliance on Chinese tradition in

making decisions, which contributed to the regime's openness in receiving visitors of virtually every ethnicity and religion—including Christians like Marco Polo (1254–1324) and Arabs like Ibn Battuta (1304–1377). This open disposition also led to a substantial reversal of the traditional Chinese bias against trade. Many restrictions previously imposed on merchants were lifted. External trade was regulated by the institution of Maritime Trade Supervisorates (*shiboshi*) at some port cities, with Quanzhou (in Fujian) and Guangzhou (Canton) handling the largest volume of trade. The “Spice Road,” a sea trade route connecting the Chinese ports with Persia with the Malay Archipelago as important calling ports en route, became a supplement to the Silk Road across Central Asia. For both routes Arab merchants were crucial agents. Champa, Palembang, and Java, where the influence of Islam was enhanced by the presence of such Arab traders, established strong trade connections with Quanzhou and Guangzhou and imported Chinese products, notably chinaware and silk. Wang Dayuan (b. 1308 or 1311?), a Chinese traveler during the Yuan dynasty, gave an amazing account in his travel writings of the Chinese products he saw in nearly every port he called on during his travels to and from Africa.

Migration followed trade, and coastal residents in South China (especially the Fujian province) were the most active immigrants to Southeast Asia. Because of their connections with China, Chinese immigrants gradually became influential and were employed by local rulers to serve as interpreters, often in tribute missions sent to China during the Ming dynasty; sometimes they even served as envoys for such missions. On the other hand, there were also cases of naturalized Arabians in China. Pu Shougeng, a Fujian shipowner and millionaire after naturalization, hired by the Yuan government as a trade representative, is a notable example.

The wealth of the empire and a bellicose khan constituted an admirable and fearful Cathay—as China was then known to Westerners—an image set before the Europeans by Marco Polo. However, Marco Polo did not see the disgraceful treatment of the subjugated Han Chinese, especially the subjects of the former Southern Song Chinese, who were at the lowest social stratum. The regime lasted for less than a

century, much shorter than the subsequent Manchu dynasty (1644–1912), which ruled China for 268 years with a stronger disposition to racial toleration and even assimilation.

YUNNAN PROVINCE

Back Door to China

Yunnan literally means “south of the clouds.” Yunnan province is a southeastern Chinese province that is bordered on the south by Myanmar (Burma), Laos, and Vietnam, traditionally an important gateway to Indochina.

Among other provinces in China, Yunnan province has the most diverse ethnic minority population, consisting of twenty-five out of the fifty-six ethnic groups in the country. They came from the descendants of troops drawn from various parts of the Chinese Empire to fortify the borderland. Indigenous groups such as the Dai people have maintained strong ethnic affiliations

with Indochina throughout their history. Strong fortifications were needed not only to prevent ethnic conflicts and safeguard the strategic land route to Indochina but also to protect Sichuan—a neighboring Chinese province that has traditionally been one of China's granaries—from falling into the hands of enemies.

The discovery of a section of the Great Wall, a monolithic creation during the Qin Dynasty (221–206 B.C.E.) and a symbol of national unity, in Yunnan in the late 1990s does not alter the fact that the early history of Yunnan was made up largely of autonomous tributary regimes. During the Tang dynasty (618–906), Nanchao reigned over the region, but during the Song dynasty (960–1279), Dali was preeminent. It was not until the Yuan dynasty (1271–1368) that Yunnan, conquered by Kub'lai Khan (r. 1260–1294), was permanently incorporated into the Chinese Empire as one of the then eleven provinces. This territorial amalgamation, however, did not end the status of Yunnan as a seedbed of disputes, both internal and external. In spite of the flexible policy adopted by the central government in dealing with Yunnan's ethnic complexity, conflicts between the dominating Han people and other ethnic groups remained unresolved. Consequently the ethnic minorities launched antigovernment revolts; the best-known uprising was led by Du Wenxiu, a Muslim, who managed an autonomous regime in Yunnan from 1856 to 1874.

Yunnan was regarded as an entry point to China by the Western powers, which were eager to gain concessions there in the second half of the nineteenth century. In 1875 a British vice consul, Augustus Margary, entered Yunnan from Burma without formal permission from the Chinese government and was killed by the local people. This Margary Incident was capitalized upon by Britain to gain further concessions from China through the Chefoo Convention in 1876. Another treaty in 1897 between Britain and China leased Nankan, Yunnan, to British Burma, and the lease was turned into a permanent acquisition in 1960. A more prominent foreign interest came from France, whose ambition in gaining Annam led to the Sino-French War from 1883 to 1885, resulting in Vietnam, traditionally a Chinese tributary state, being turned into a French protectorate. France's new territorial gain paved the way for its claiming Yunnan as a French sphere of influ-

ence in the late 1890s, with the right of constructing and managing the Haiphong-Kunming railway, completed in 1910.

As a landlocked and mountainous province, Yunnan is more accessible from Indochina than from the neighboring Chinese provinces, especially during civil wars. In the 1910s and 1920s, Chinese travelers to Yunnan always got a Vietnam pass from the French consulate, then went aboard a Hong Kong-bound liner, changed at Hong Kong to another passenger liner for Vietnam, and reached Yunnan after crossing the Sino-Vietnam border. The unique geographical setting of Yunnan vis-à-vis British Burma and French Vietnam rendered the province a very special role during the Sino-Japanese War in the late 1930s. It developed into a strategic transportation center, importing much-needed war supplies from Indochina to China and distributing them to the front, when Japan was imposing an embargo along the long Chinese coast. Yunnan thus benefited and prospered as a haven for traders of every kind until 1940, when Britain and France closed the borders under Japanese pressure.

Another round of border disputes concerning Yunnan took place after the Chinese Civil War (1946–1949) between the Chinese Communist Party and the Kuomintang (KMT, Chinese Nationalist Party), resulting in the latter's retreat to Taiwan. The remnant Kuomintang army, led by General Li Er, moved into Burma and established a military base at what is now known as the Golden Triangle. This agitated both Beijing and Rangoon (Yangon), as border guerrilla warfare imposed a threat to the national security and sovereignty of both newly emerging regimes. The problem was not solved until a large portion of the army retreated to Taiwan, where the Kuomintang government was seated, and Beijing ceded to Rangoon in 1960 part of the borderland with considerable Kuomintang military influence.

Yunnan became more peaceful after 1978 under Deng Xiaoping's policy of reform and openness. The large number of overseas Chinese with Yunnan as their native land became an important source of investments, and the colorful ethnic cultures render Yunnan a unique asset for the development of tourism, an important source of income for the province.

Z

ZONE OF PEACE, FREEDOM, AND NEUTRALITY (ZOPFAN) (1971)

On 27 November 1971 the member states of the Association of Southeast Asian Nations (ASEAN) adopted the *Kuala Lumpur Declaration*. This declaration called for the creation of a *Zone of Peace, Freedom and Neutrality (ZOPFAN)* in Southeast Asia. The Declaration of ZOPFAN states ASEAN's peaceful intentions and its commitment to build regional resilience free from interference by external powers. However, conflicts and tensions within Southeast Asia—for example, the Cambodian conflict—prevented the establishment of ZOPFAN for more than two decades.

The declaration of ZOPFAN was adopted in a regional context that was marked by intensifying militarized conflicts in Vietnam, Laos, and Cambodia in the late 1960s and early 1970s. The progress of the leftist forces in the three countries leading to total victory in 1975, coupled with the gradually diminishing U.S. involvement and later total withdrawal, created a totally new situation in Southeast Asia, bringing the perceived threat of international communism to the doorstep of the ASEAN members, in particular Thailand. However, the ZOPFAN concept failed to bring about a full rapprochement between ASEAN and the Indochinese countries, and Vietnam continued to perceive ASEAN as closely associated with the United States in the post-1975 years. Vietnam's military intervention in Cambodia and the ten-

sions between ASEAN and the three Indochinese countries in connection with the Cambodian conflict prevented any progress toward the establishment of ZOPFAN.

Developments in the 1990s, with the resolution of the Cambodian Conflict in 1991 and the gradual expansion of ASEAN membership to include all ten Southeast Asian countries, gradually brought the region closer to the conditions envisaged by ZOPFAN. Furthermore, in December 1995 in Bangkok, the ten Southeast Asian countries adopted the Treaty on the Southeast Asian Nuclear Weapons-Free Zone. The decision to establish a nuclear weapons-free zone is an important step toward the full establishment of ZOPFAN.

APPENDIX

Country Fact Tables

Words that appear entirely in capital letters represent entries in the A–Z section of the encyclopedia.

ICJ: International Court of Justice

GDP: Gross Domestic Product

N.A.: Not available

BRUNEI

Name:

Official: Negara Brunei Darussalam (Abode of Peace)

Common: Brunei

Area: 5,765 square kilometers

Climate: Equatorial

Population: 358,098 (July 2003 est.)

Ethnic Groups: BRUNEI MALAY 67%, CHINESE 15%, BRUNEI ETHNIC MINORITIES 6%, others 12%.

Religions: ISLAM (official) 67%; BUDDHISM 13%, Christian 10%, indigenous beliefs and others 10%.

Languages: Malay (official), English, and Chinese.

Literacy Rate: 87.9%

Life Expectancy: 71.8

Capital: Bandar Seri Begawan

Government: Constitutional monarchy termed as MĒLAYU ISLAM BERAJA (MIB, MALAY ISLAMIC MONARCHY).

Administrative Structure: Composed of four districts (*daerah-daerah*; singular, *daerah*), namely, Belait, Brunei and Muara, Temburong, and Tutong.

Independence: 1 January 1984 from U.K.

Legal System: Generally English common law. Binding for Muslims is Islamic Shari'a law; the Shari'a supersedes civil law in various areas.

Natural Resources: Primarily petroleum, natural gas, and timber.

Agricultural Products: Include rice, vegetables, fruits, chickens, and water buffalo.

Industries: Mainly OIL AND PETROLEUM, petroleum refining, liquefied natural gas, and construction.

Exports: Focus on crude oil, natural gas, and refined products.

GDP per Capita: Purchasing power parity: U.S.\$18,600 (2002 est.)

Currency: Bruneian dollar (BND)

CAMBODIA

Name:

Official: Kingdom of Cambodia

Common: Cambodia; Kampuchea

Local language: Preahreacheanachakr Kampuchea

Previous names: DEMOCRATIC KAMPUCHEA (DK); PEOPLE'S REPUBLIC OF KAMPUCHEA (PRK).

Area: 181,035 square kilometers

Climate: Tropical; wet season from May to November.

Population: 13,124,764 (July 2003 est.)

Ethnic Groups: KHMERS 90%, Vietnamese 5%, CHINESE 1%, others 4%.

Religions: THERAVADA BUDDHISM 95%, others 5%.

1476 Appendix: Country Fact Tables

Languages: Dominated by Khmer (official) 95%; some French and English are spoken.

Literacy Rate: 35%

Life Expectancy: 51.1

Capital: PHNOM PENH

Government: A constitutional monarchy established in September 1993 oversees a multiparty democracy.

Administrative Structure: There are twenty provinces (*khett*, singular and plural) and four municipalities (*krong*, singular and plural). The provinces are Banteay Mean Cheay, BATTAMBANG, Kampong Cham, Kampong Chhnang, Kampong Spoe, Kampong Thum, Kampot, Kandal, Kaoh Kong, Kracheh, Mondol Kiri, Otdar Mean Cheay, Pouthisat, Preah Vihear, Prey Veng, Rotanah Kiri, SIEM REAP, Stoeng Treng, Svay Rieng, and Takev. The municipalities are Keb, Pailin, PHNOM PENH, and Preah Seihanu.

Independence: 9 November 1953 from France.

Legal System: Basically a civil law mixture of French-influenced codes from the UNITED NATIONS TRANSITIONAL AUTHORITY IN CAMBODIA (UNTAC) period, royal decrees, acts of the legislature, customary law, and remnants of communist legal theory; there is an increasing influence of common law in recent years.

Natural Resources: Include timber, gemstones, some iron ore, manganese, phosphates, and hydropower potential.

Agricultural Products: Rice, RUBBER, corn, and vegetables.

Industries: Mainly tourism, garments, rice milling, fishing, wood and wood products, RUBBER, cement, gem mining, textiles.

Exports: Main items are timber, garments, rubber, rice, and fish.

GDP: purchasing power parity: U.S.\$19.7 billion (2002 est.)

GDP per Capita: purchasing power parity: U.S.\$1,500 (2002 est.)

Currency: riel (KHR)

EAST TIMOR

Name:

Official: Democratic Republic of Timor-Leste

Common: East Timor

Local language: Republika Demokratika Timor Lorosa'e [Tetum]; Republica Democratica de Timor-Leste [Portuguese]

Previous names: Portuguese Timor; Propinsi Timor Timur

Area: 15,007 square kilometers

Climate: Tropical; wet season stretches from December to March.

Population: 997,853

Note: Other estimate 800,000 (July 2003 est.)

Ethnic Groups: Largely Austronesian (Malayo-Polynesian), Papuan, with a small CHINESE minority.

Religions: Mainly CATHOLICISM 90%; others include Islam 4%, Protestant 3%, HINDUISM 0.5%, BUDDHISM, Animism (1992 est.).

Languages: Official are Tetum and Portuguese; both Bahasa Indonesia and English are used.

Note: Some sixteen indigenous languages remain current; the more widely used include Tetum, Galole, Mambae, and Kemak.

Literacy Rate: N.A.

Life Expectancy: N.A.

Capital: Dili

Government: Republic

Administrative Structure: There are thirteen administrative districts: Aileu, Ainaro, Baucau, Bobonaro (Maliana), Cova-Lima (Suai), Dili, Ermera, Lautem (Los Palos), Liquica, Manatuto, Manufahi (Same), Oecussi (Ambeno), and Viqueque.

Independence: Proclaimed independence from Portugal on 28 November 1975. 20 May 2002 marked the international recognition of East Timor's independence from Indonesia.

Legal System: In the process of formulation.

Natural Resources: Mainly gold, petroleum, natural gas, manganese, and marble.

Agricultural Products: Include COFFEE, rice, maize, cassava, sweet potatoes, soybeans, cabbage, mangoes, bananas, and vanilla.

Industries: Focus on printing, soap manufacturing, handicrafts, and woven cloth.

Exports: Largely COFFEE, sandalwood, marble.
Note: Potential for oil and vanilla.

GDP: purchasing power parity: U.S.\$440 million (2001 est.)

GDP per Capita: purchasing power parity: U.S.\$500 (2001 est.)

Currency: Indonesian rupiah (IDR)

INDONESIA

Name:

Official: Republic of Indonesia

Common: INDONESIA

Local language: Republik Indonesia

Previous names: NETHERLANDS (DUTCH) EAST INDIES; DUTCH EAST INDIES

Area: 1,919,440 square kilometers

Climate: Tropical; wet season generally from December to March except in MALUKU (THE MOLUCCAS), where it is from June to September.

Population: 234,893,453 (July 2003 est.)

Ethnic Groups: Javanese 45%, Sundanese 14%, Madurese 7.5%, coastal MALAYS 7.5%, other 26% (Sundanese, Balinese, BATAKS, MINANGKABAU, DAYAKS, BUGIS [BUGINESE], EAST INDONESIAN ETHNIC GROUPS). There is a very small CHINESE minority.

Religions: Predominantly ISLAM 88%, Christianity (Protestant 5%, CATHOLICISM 3%), HINDUISM 2%, BUDDHISM 1%, others 1% (1998).

Languages: Bahasa Indonesia (a variant of Malay) is the official; English, Dutch, local dialects (Javanese being the most widely spoken).

Literacy Rate: 83.2%

Life Expectancy: 62.9

Capital: JAKARTA (BATAVIA [SUNDA KELAPA, JACATRA, DJAKARTA/JAKARTA])

Government: Republic

Administrative Structure: Twenty-seven provinces (*propinsi-propinsi*; singular, *propinsi*), two special regions (*daerah-daerah istimewa*; singular, *daerah khusus ibukota*). The provinces are Bali, BANTEN (BANTAM), BENGKULU (BENCOOLEN, BENKULEN), Gorontalo, JAMBI, Jawa Barat, Jawa Tengah, Jawa Timur, Kalimantan Barat, Kalimantan Selatan, Kalimantan Tengah, Kalimantan Timur, Kepulauan Bangka Belitung, Lampung, Maluku, Maluku Utara, Nusa Tenggara Barat, Nusa Tenggara Timur, Papua, Riau, Sulawesi Selatan, Sulawesi Tengah, Sulawesi Tenggara, Sulawesi Utara, Sumatera Barat, Sumatera Selatan, and Sumatera Utara. The special regions are ACEH and YOGYAKARTA. Jakarta Raya is the special city district.

Note 1: From 1 January 2001 when decentralization came into operation, 357 districts (regencies) became key administrative units that undertook the provision of government services.

Note 2: As a result of the 30 August 1999 provincial referendum for independence that returned an overwhelmingly affirmative response of the people of Timor Timur, followed by the concurrence of Indonesia's national legislature in October 1999, the name East Timor was adopted

as the provisional name for Propinsi Timor Timur. On 20 May 2002 East Timor attained formal independence.

Independence: Proclaimed on 17 August 1945, but contested by the Dutch colonial government. Indonesia finally became legally independent from The Netherlands on 27 December 1949.

Legal System: Primarily based on Roman-Dutch law with substantial influence from indigenous traditional concepts of justice, and by new criminal procedures code. It has yet to abide by compulsory ICJ jurisdiction.

Natural Resources: Largely petroleum, TIN, natural gas, nickel, timber, bauxite, copper, fertile soils, coal, GOLD, and silver.

Agricultural Products: Include rice, cassava (tapioca), peanuts, RUBBER, cocoa, COFFEE, palm oil, copra, poultry and eggs, beef, and pork.

Industries: Petroleum and natural gas; textiles, apparel, and footwear; mining, cement, chemical fertilizers, plywood; RUBBER; food; and tourism.

Exports: Mainly oil and gas, electrical appliances, plywood, textiles, and RUBBER.

GDP: purchasing power parity: U.S.\$663 billion (2002 est.)

GDP per Capita: purchasing power parity: U.S.\$3,100 (2002 est.)

Currency: sian rupiah (IDR)

LAOS

Name:

Official: LAO PEOPLE'S DEMOCRATIC REPUBLIC (LPDR)

Common: Laos

Local language: Sathalanalat Paxathipatai Paxaxon Lao

Area: 236,800 square kilometers

Climate: Tropical monsoonal; wet season falls from May to October.

Population: 5,921,545 (July 2003 est.)

Ethnic Groups: Mainly Lao Loum (lowland) 68%; Lao Theung (upland) 22%; and Lao Soung (highland), including the HMONG ("Meo") and the Yao (Mien) 9%; and ethnic Vietnamese/CHINESE 1%.

Religions: More than half practice THERAVADA BUDDHISM 60%; animism and other 40% (including various Christian denominations 1.5%).

Languages: Lao is the official; French, English, and various ethnic languages.

Literacy Rate: 55.8%

Life Expectancy: 54.2

Capital: VIENTIANE

Government: A communist state

Administrative Structure: Partitioned into sixteen provinces (*khoueng*, singular and plural), one municipality (*kampheng nakhon*, singular and plural), and one special zone (*khetphiset*, singular and plural). The provinces are Attapu, Bokeo, Bolikhamxai, CHAMPASSAK, Houaphan, Khammouan, Louangnamtha, LUANG PRABANG, Oudomxai, Phongsali, Salavan, Savannakhet, Viangchan, Xaignabouli, Xekong, and Xiangkhoang. Viangchan is the only municipality and Xaisomboun is recognized as a special zone.

Independence: 19 July 1949 from France; 1954 recognized by international community (contested by Thailand and France; under French colonial domination since late nineteenth century).

Legal System: Largely reliant on traditional customs, French legal norms and procedures, and socialist practice.

Natural Resources: Timber, hydropower, gypsum, TIN, GOLD, gemstones.

Agricultural Products: Sweet potatoes, vegetables, corn, COFFEE, sugarcane, TOBACCO, cotton, tea, peanuts, rice, water buffalo, pigs, cattle, poultry.

Industries: TIN and gypsum mining, timber, electric power, agricultural processing, construction, garments, tourism.

Exports: Wood products, garments, electricity, COFFEE, TIN.

GDP: purchasing power parity: U.S.\$9.9 billion (2002 est.)

GDP per Capita: purchasing power parity: U.S.\$1,700 (2002 est.)

Currency: kip (LAK)

MALAYSIA

Name:

Official: Federation of Malaysia

Common: Malaysia

Previous names: Federation of Malaya, Sarawak, North Borneo (Sabah)

Area: 329,750 square kilometers

Climate: Equatorial; northeast monsoon season October to February and southwest monsoon May to September.

Population: 23,092,940 (July 2003 est.)

Ethnic Groups: MALAY and EAST MALAYSIAN ETHNIC MINORITIES (IBANS,

KADAZAN-DUSUNS, BAJAU) 58%, CHINESE 24%, Indian 8%, others 10% (2000 est.).

Religions: Official is ISLAM; others include MAHAYANA BUDDHISM, THERAVADA BUDDHISM, CONFUCIANISM, Daoism, HINDUISM, CATHOLICISM, Protestantism, Sikhism.

Note: Animism is widely practiced in East Malaysia.

Note: A multitude of indigenous languages are spoken in East Malaysia; the more significant are IBAN and KADAZAN-DUSUNS.

Literacy Rate: 83%

Life Expectancy: 70.7

Capital: KUALA LUMPUR

Government: CONSTITUTIONAL MONARCHY OF MALAYA/MALAYSIA

Note: Nine Malay sultans, each from the nine Peninsular Malay States, take turns serving as the Yang di-Pertuan Agong, or Supreme Head of State/Paramount Ruler (King), for a maximum five-year term.

Administrative Structure: There are thirteen states (*negeri-negeri*; singular, *negeri*) and three federal territories (*wilayah-wilayah persekutuan*; singular, *wilayah persekutuan*) The states are JOHOR, KEDAH, KELANTAN, MELAKA, NEGRI SEMBILAN, PAHANG, PERAK, PERLIS, PENANG (Pulau Pinang), SABAH, SARAWAK, SELANGOR, and TERENGGANU. The federal territories are LABUAN, Putrajaya, and Wilayah Persekutuan (KUALA LUMPUR [KL]).

Note 1: The capital city of KUALA LUMPUR (KL) is within the federal territory of Wilayah Persekutuan; hence these terms are not interchangeable.

Note 2: Federation of Malaya (presently Peninsular or West Malaysia) came into being on 31 August 1957; Federation of Malaysia (Malaya, Sabah, Sarawak, and Singapore) was created on 16 September 1963 (Singapore, however, seceded from the federation on 9 August 1965).

Independence: 31 August 1957 from U.K.

Legal System: Primarily based on English common law; judicial review of legislative acts in the Supreme Court at request of the Yang di-Pertuan Agong. It has yet to acknowledge compulsory ICJ jurisdiction.

Natural Resources: Mainly petroleum, TIN, timber, copper, iron ore, natural gas, and bauxite.

Agricultural Products: For Peninsular Malaysia mainly RUBBER, palm oil, COCOA, and rice; for Sabah largely subsistence crops, RUBBER, timber, coconuts, and rice; and for Sarawak, RUBBER, PEPPER, and timber.

Industries: In Peninsular Malaysia mainly RUBBER and palm oil processing and manufacturing, light manufacturing industry, electronics, logging and processing timber; in Sabah, logging and petroleum production; and in Sarawak, agriculture processing, petroleum production and refining, and logging.

Exports: Largely semiconductors and processors, electronic equipment, petroleum and liquefied natural gas, wood and wood products, palm oil, RUBBER, textiles, and chemicals (2000).

GDP: purchasing power parity: U.S.\$210 billion (2002 est.)

GDP per Capita: purchasing power parity: U.S.\$9,300 (2002 est.)

Currency: ringgit (MYR)

MYANMAR (FORMERLY BURMA)

Name:

Official: Union of Myanmar

Common: Myanmar

Local language: Pyidaungzu Myanma Naingngandaw

Previous names: Socialist Republic of the Union of Burma

Note: Since 1989 the military authorities in Burma have promoted the name Myanmar as a conventional name for their state; this decision was not approved by any sitting legislature in Burma, and the U.S. Government and others did not adopt the name, which is a derivative of the Burmese short-form name Myanma Naingngandaw.

Area: 678,500 square kilometers

Climate: Tropical monsoon; dry zone around MANDALAY.

Population: 42,510,537 (July 2003 est.)

Ethnic Groups: A diversity of peoples including BURMANS 68%, SHANS 9%, KARENS 7%, Rakhine 4%, CHINESE 3%, Indian 2%, MONS 2%, other (CHINS, KACHINS, PYUS) 5%.

Religions: Mainly THERAVADA BUDDHISM 89%; Christianity 4% (Baptist 3%, CATHOLICISM 1%), ISLAM 4%, animism 1%, others 2%.

Languages: Burmese is widely spoken and for official usage; the various ethnic minorities possess their own languages.

Literacy Rate: 82.7%

Life Expectancy: 54.7

Capital City: Yangon (RANGOON)

Government: Military regime

Administrative Structure: Partitioned into seven divisions (*taing-myar*; singular, *taing*) and seven states (*pyi ne-myar*; singular, *pyi ne*). The divisions are Ayeyarwady, Bago, Magway, MANDALAY, Sagaing, Tanintharyi, and Yangon (RANGOON). The states are Chin State, Kachin State, Kayin State, Kayah State, Mon State, Rakhine State, and Shan State.

Independence: 4 January 1948 from U.K.

Legal System: Has yet to acknowledge compulsory ICJ jurisdiction. Basically military rule by a military junta fashioned as STATE LAW AND ORDER RESTORATION COUNCIL (SLORC), established in 1988. In November 1997 SLORC was replaced by a State Peace and Development Council (SPDC); the key leaders drawn from the military remained the same.

Natural Resources: Rich in minerals including petroleum, timber, TIN, antimony, zinc, copper, tungsten, lead, coal, some marble, limestone, precious stones; also natural gas and hydropower.

Agricultural Products: Mainly rice, pulses, beans, sesame, groundnuts, sugarcane, hardwood, fish, and fish products.

Industries: Largely agricultural processing; knit and woven apparel; wood and wood products; copper, TIN, tungsten, iron; construction materials; pharmaceuticals; and fertilizer.

Exports: Chiefly natural gas, wood products, pulses, beans, fish, and rice.

GDP: purchasing power parity: U.S.\$70 billion (2002 est.)

GDP per Capita: purchasing power parity: U.S.\$1,660 (2002 est.)

Currency: kyat (MMK)

THE PHILIPPINES

Name:

Official: Republic of the Philippines

Common: The Philippines

Local language: Republika ng Pilipinas; Pilipinas

Area: 300,000 square kilometers

Climate: Tropical; wet season from June to November.

Population: 84,619,974 (July 2003 est.)

Ethnic Groups: Mainly Filipinos; MESTIZO (Sino-Filipino, Spanish-Filipino, and American-Filipino), ILANUN AND BALANGINGI, MOROS, SULUS, and TAUSUGS. There is a mainly urban-based small CHINESE minority.

Religions: Predominantly CATHOLICISM 83%; Protestant 9%, ISLAM 5%, BUDDHISM and others 3%.

Languages: Official are Filipino (based on Tagalog) and English. There are eight major dialects: Tagalog, Cebuano, Ilocan, Hiligaynon or Ilonggo, Bicol, Waray, Pampango, and Pangasinense.

Literacy Rate: 94.4%

Life Expectancy: 66.6

Capital City: MANILA

Government: Republic

Administrative Structure: Altogether seventy-eight provinces and sixty-one chartered cities. The provinces are Abra, Agusan del Norte, Agusan del Sur, Aklan, Albay, Antique, Apayao, Aurora, Basilan, Bataan, Batanes, Batangas, Benguet, Biliran, Bohol, Bukidnon, Bulacan, Cagayan, Camarines Norte, Camarines Sur, Camiguin, Capiz, Catanduanes, Cavite, Cebu, Compostela, Davao del Norte, Davao del Sur, Compostela, Davao Oriental, Eastern Samar, Guimaras, Ifugao, Ilocos Norte, Ilocos Sur, Iloilo, Isabela, Kalinga, Laguna, Lanao del Norte, Lanao del Sur, La Union, Leyte, Maguindanao, Marinduque, Masbate, Mindoro Occidental, Mindoro Oriental, Misamis Occidental, Misamis Oriental, Negros Occidental, Negros Oriental, North Cotabato, Northern Samar, Nueva Ecija, Nueva Vizcaya, Palawan, Pampanga, Pangasinan, Quezon, Quirino, Rizal, Romblon, Samar, Sarangani, Siquijor, Sorsogon, South Cotabato, Southern Leyte, Sultan Kudarat, Surigao del Norte, Surigao del Sur, Tarlac, Tawi-Tawi, Zambales, Zamboanga del Norte, Zamboanga del Sur, and Zamboanga Sibugay. Sulu, Surigao, Tacloban, Tagaytay, Tagbilaran, Tangub, Toledo, Trece Martires, and Zamboanga.

Independence: 20 January 1899, creation of the Philippine Republic, from Spain. Not recognized and contested by the United States. 4 July 1946 from the United States.

Legal System: Mainly based on Spanish and Anglo-American law. Abides by compulsory ICJ jurisdiction despite reservations.

Natural Resources: Mainly timber, petroleum, nickel, cobalt, silver, GOLD, salt, and copper.

Agricultural Products: Largely rice, coconuts, corn, sugarcane, bananas, pineapples, mangoes, pork, eggs, beef, and fish.

Industries: Mainly textiles, pharmaceuticals, chemicals, wood products, food processing, electronics assembly, petroleum refining, fishing.

Exports: Focus on electronic equipment, machinery and transport equipment, garments, coconut products, and chemicals.

GDP: purchasing power parity: U.S.\$356 billion (2002 est.)

GDP per Capita: purchasing power parity: U.S.\$4,200 (2002 est.)

Currency: Philippine peso (PHP)

SINGAPORE

Name:

Official: Republic of Singapore (City of Lions)

Common: Singapore

Previous name: TEMASIK (TUMASIK) (ancient)

Area: 692.7 square kilometers

Climate: Equatorial

Population: 4,608,595 (July 2003 est.)

Ethnic Groups: Mainly CHINESE 76.7%; MALAYS 14%, Indian 7.9%, others 1.4%.

Religions: MAHAYANA BUDDHISM (Chinese), CONFUCIANISM, Daoism, ISLAM (Malays), CATHOLICISM and Protestantism, HINDUISM, and Sikhism.

Languages: Official and national is Malay; other official are English, Chinese, and Tamil; English official for administration and education.

Literacy Rate: 91%

Life Expectancy: 78.8

Capital: Singapore

Administrative Structure: None

Government: Parliamentary republic

Independence: 16 September 1963 from U.K.; 9 August 1965 seceded from Federation of Malaysia.

Legal System: Based on English common law. It has yet to accept compulsory ICJ jurisdiction.

Natural Resources: Fish and deepwater ports.

Agricultural Products: Mainly RUBBER, copra, fruit, orchids, vegetables, poultry, eggs, fish, and ornamental fish.

Industries: Focus on electronics, chemicals, financial services, oil-drilling equipment, petroleum refining, rubber processing and rubber products, processed food and beverages, ship repair, entrepôt trade, and biotechnology.

Exports: Largely machinery and equipment (including electronics), consumer goods, chemicals, and mineral fuels.

GDP: purchasing power parity: U.S.\$105 billion (2002 est.)

GDP per Capita: purchasing power parity: U.S.\$24,000 (2002 est.)

Currency: Singapore dollar (SGD)

THAILAND

Name:

Official: Kingdom of Thailand (Land of the Free)

Common: Thailand

Previous name: Siam

Note: The name Thailand was adopted in June 1939.

Area: 514,000 square kilometers

Climate: Tropical; wet season June to October, cool season November to February, and hot season March to May.

Population: 64,265,276 (July 2003 est.)

Ethnic Groups: Majority are Thai (T' AIS) 75%; CHINESE 14%, others 11% (including MUSLIM MINORITIES).

Religions: Predominantly THERAVADA BUDDHISM 95%; ISLAM 3.8%, Christianity 0.5%, HINDUISM 0.1%, others 0.6% (1991).

Languages: Official and widely used is Thai; English is the secondary language of the elite; ethnic and regional dialects.

Literacy Rate: 93.5%

Life Expectancy: 69.2

Capital: BANGKOK

Government: Constitutional monarchy

Administrative Structure: There are in total seventy-six provinces (*changwat*, singular and plural): Amnat Charoen, Ang Thong, Buriram, Chachoengsao, Chai Nat, Chaiyaphum, Chanthaburi, CHIANG MAI, CHIANG RAI, Chon Buri, Chumphon, Kalasin, Kamphaeng Phet, Kanchanaburi, Khon Kaen, Krabi, Krung Thep Mahanakhon (Bangkok), Lampang, Lamphun, Loei, LOPBURI (LAWO), Mae Hong Son, Maha

Sarakham, Mukdahan, Nakhon Nayok, Nakhon Pathom, Nakhon Phanom, Nakhon Ratchasima, Nakhon Sawan, Nakhon Si Thammarat, Nan, Narathiwat, Nong Bua Lamphu, Nong Khai, Nonthaburi, Pathum Thani, PATTANI, Phangnga, Phatthalung, Phayao, Phetchabun, Phetchaburi, Phichit, PITSANULOK (PHITSANULOK), Phra Nakhon Si Ayutthaya, Phrae, PHUKET (JUNK CEYLON, UJUNG SALANG), Prachin Buri, Prachuap Khiri Khan, Ranong, Ratchaburi, Rayong, Roi Et, Sa Kaeo, Sakon Nakhon, Samut Prakan, Samut Sakhon, Samut Songkhram, Sara Buri, Satun, Sing Buri, Sisaket, Songkhla, SUKHOTAI (SUKHODAVA), Suphan Buri, Surat Thani, Surin, Tak, Trang, Trat, Ubon Ratchathani, Udon Thani, Uthai Thani, Uttaradit, Yala, and Yasothon.

Independence: Has never been colonized; 1238 C.E. is commonly adopted as the traditional establishment of the country.

Legal System: Adopted civil law system with influences of common law; has yet to accept compulsory ICJ jurisdiction.

Natural Resources: Mainly TIN, RUBBER, natural gas, tungsten, tantalum, timber, lead, fish, gypsum, lignite, fluorite, and arable land.

Industries: Mainly tourism; textiles and garments; agricultural processing; beverages; tobacco; cement; light manufacturing, such as jewelry; electric appliances and components; computers and parts; integrated circuits; furniture; and plastics.

Exports: Computers, transistors, seafood, clothing, rice, tungsten, and tin (2000); world's second-largest tungsten producer and third-largest TIN producer.

GDP: purchasing power parity: U.S.\$429 billion (2002 est.)

GDP per Capita: purchasing power parity: U.S.\$6,900 (2002 est.)

Currency: baht (THB)

VIETNAM

Name:

Official: Socialist Republic of Vietnam (SV)

Common: Vietnam; Viet Nam

Local language: Cong Hoa Xa Hoi Chu Nghia Viet Nam

Previous names: Democratic Republic of Vietnam (DRV) (NORTH VIETNAM [POST-1945]);

1482 Appendix: Country Fact Tables

Republic of Vietnam (SOUTH VIETNAM [POST-1945])

Area: 329,560 square kilometers

Climate: Tropical in the south; subtropical in the north; May to October is generally the wet season.

Population: 81,624,716 (July 2003 est.)

Ethnic Groups: VIETS 50%–90% as the majority; CHINESE, T' AIS, KHMERS, Cham, and mountain groups such as the HMONG and MONTAGNARD.

Religions: MAHAYANA BUDDHISM, HOA HAO, CAO DAI, Christianity (predominantly CATHOLICISM, some Protestantism), indigenous beliefs, and ISLAM.

Languages: Vietnamese is the official; English is increasingly being favored as a second language; others include some French, Chinese, and Khmer, and mountain-area languages (Mon-Khmer and Malayo-Polynesian).

Literacy Rate: 64%

Life Expectancy: 68.1

Capital: HANOI (THANG-LONG)

Government: A communist state

Administrative Structure: Divided into fifty-eight provinces (*tin*, singular and plural) and three municipalities (*thu do*, singular and plural). The provinces are An Giang, Bac Giang, Bac Kan, Bac Lieu, Bac Ninh, Ba Ria–Vung Tau, Ben Tre, Binh Dinh, Binh Duong, Binh Phuoc, Binh Thuan, Ca Mau, Can Tho, Cao Bang, Dac Lak, Da Nang, Dong Nai, Dong Thap, Gia Lai, Ha Giang, Hai Duong, Ha Nam, Ha Tay, Ha Tinh, Hoa Binh, Hung Yen, Khanh Hoa, Kien Giang, Kon Tum, Lai Chau, Lam Dong, Lang Son, Lao Cai, Long An, Nam Dinh, Nghe An, Ninh Binh, Ninh Thuan, Phu Tho, Phu Yen, Quang

Binh, Quang Nam, Quang Ngai, Quang Ninh, Quang Tri, Soc Trang, Son La, Tay Ninh, Thai Binh, Thai Nguyen, Thanh Hoa, Thua Thien–Hue, Tien Giang, Tra Vinh, Tuyen Quang, Vinh Long, Vinh Phuc, and Yen Bai. The municipalities are Hai Phong, Ha Noi, and Hồ Chí Minh City (SAIGON).

Independence: 2 September 1954 from France.

Legal System: Basically a combination of communist legal theory and French civil law.

Natural Resources: Phosphates, coal, manganese, bauxite, chromate, offshore oil and gas deposits, forests, and hydropower.

Agricultural Products: Include rice, corn, potatoes, RUBBER, soybeans, COFFEE, tea, bananas, SUGAR; also poultry, pigs, and fish.

Industries: Focus on food processing, garments, shoes, machine-building, mining, cement, chemical fertilizer, glass, tires, oil, coal, steel, and paper and paper products.

Exports: Largely crude oil, MARINE/SEA PRODUCTS, rice, COFFEE, RUBBER, tea, garments, and shoes.

GDP: purchasing power parity: U.S.\$183 billion (2002 est.)

GDP per Capita: purchasing power parity: U.S.\$2,250 (2002 est.)

Currency: dong (VND)

CHRONOLOGY

Ooi Keat Gin John Barnhill

Terms appearing in all capital letters are entries in this encyclopedia.

I. INDOCHINA (CAMBODIA, LAOS, VIETNAM)

ca. 8000 B.C.E.

LAO people begin their continuous presence in Laos.

3rd century B.C.E.–1st century B.C.E.

Van Lang nation in northern Vietnam; the most notable king is Hung King.

206 B.C.E.

The kingdom of NAMVIET (NANYUE).

179 B.C.E.

Au Lac nation falls to NAMVIET, who in turn falls to the Han empire. By 111 B.C.E. the Han is secure in the domination of the Au Lac nation, a dominance that lasts over a thousand years through Chinese dynasties including the Sui (590–618 C.E.) and Tang (618–906 C.E.). This period strongly influences the culture, religion, and virtually all aspects of life in Vietnam. CONFUCIANISM and MAHAYANA BUDDHISM are two major Chinese imports. Rebellions are many, but none succeed.

111 B.C.E.–936 C.E.

Chinese dominate NAMVIET, organizing it in line with other Chinese provinces under the Han dynasty (202 B.C.E.–220 C.E.).

ca. 2 B.C.E.

Central Vietnam is home to the kingdom of CHAMPA, which developed out of Sa Hyun culture.

1st century C.E.

Fiefdoms associated with the BAN CHIANG culture develop an economy based on wet-rice cultivation in the middle Mekong valley.

1st–6th centuries

INDIANIZATION in Southeast Asia is a slow and gradual process. The oldest Indianized polity in Southeast Asia, the era of the kingdom of FUNAN, is the time in which Cambodia's language develops, as does its religion, which incorporates HINDUISM and BUDDHISM, and its culture.

6th–mid-8th centuries

CHENLA kingdom flourishes in Cambodia.

7th century

T' AIS migrate from northwestern TONKIN (TONGKING) to Laos.

7th–8th centuries

THERAVADA BUDDHISM reaches Lao through the MON kingdom of DVARAVATI.

8th century

The most prevalent group, the T'AI-Kadai, migrate to Laos. Chiefs of this people are known as *jao meuang*.

Late 8th century

Jawa kingdom in CAMBODIA.

9th–15th centuries

Cambodia regains sovereignty and enters the prosperous ANGKOR period, empire of the KHMERS. With the ascendancy of King JAYAVARMAN II (r. 770/790/802?–834 C.E.), the Khmer empire begins a period of 600 years during which it dominates mainland Southeast Asia from Burma (Myanmar) to the South China Sea to Laos. The period is noted for the construction of the Khmer temple complex—ANGKOR WAT. Kings JAYAVARMAN II, Indravarman I (r. 877–889), SURYAVARMAN II (r. 1113–1145?), and JAYAVARMAN VII (r. 1181–1220?) construct the complex irrigation system of lakes and canals that allows up to three rice crops each year. Parts of the system remain in use in the early twenty-first century.

At its peak, ANGKOR has a population of 70,000 to 80,000, but the Thai and Vietnamese invasions of the later years diminish the kingdom. With the fading of the ANGKOR era, Cambodia shifts capitals south to Longvek, then to Udong, and finally to PHNOM PENH. This period also sees the waning of HINDUISM and the rise of THERAVADA BUDDHISM.

936

Victory over the Chinese at the Bach Dang River frees Vietnam from IMPERIAL CHINA.

939

Vietnam becomes an independent country and adopts the name DAI VIET (939 C.E.–1407).

939–1009

Independent Vietnam manages to repulse many attempts by the Chinese to retake the land. Rulers are, inter alia, the Ngo (939–954), Dinh (968–980), and Early Ly (980–1009) dynasties.

1009–1400

Vietnam under the LY DYNASTY (1009–1225) followed by the Tran dynasty (1225–1400).

Vietnam progresses in agriculture, trade, and culture. Buddhism and Confucianism are the dominant religions. Military competence is sufficient to hold off the efforts of the Sung dynasty (960–1279) of China in 1075–1077 and the Mongol assaults.

Mid-13th century

A large but peaceful Austro-T'AI migration from the north gradually occupies large areas of Laos, easing out the indigenes without violence.

1258

The first Mongol invasion of Vietnam results in the sacking of the capital, but the second Mongol invasion is repelled.

1287–1288

In China, the Mongols establish the YUAN (MONGOL) DYNASTY (1271–1368). For a third time, the Mongols fail to take Vietnam.

14th century

Chao Fa Ngum takes Wieng Chan for the Khmer empire. His other conquests include the kingdom of Xieng Khuang, the Korat Plateau (northeast Thailand or ISAN), and Meuang Sawa (later LUANG PRABANG).

1353

Chao Fa Ngum declares himself king, naming his lands *Lan Xang Hom Khao* (“Million Elephants and White Parasol”). Technically a Khmer state, this polity is the first Lao nation. Fa Ngum also makes THERAVADA BUDDHISM the state religion. Lan Xang’s symbol is the golden statue of the Buddha, the Pha Bang, in Meung Sawa, later LUANG PRABANG (or Phabang), translated as “Great Pha Bang.”

15th–17th centuries

CAMBODIA becomes a source of contention between Siam and Vietnam.

1400

The Tran dynasty of Vietnam enters a period of decline; subsequently replaced by the Ho dynasty (1400–1413).

1408–1428

Ho is unable to hold out against the MING DYNASTY (1368–1644), whose armies occupy the country. For two decades, the Chinese rule. When the Chinese army loses at Lam Son, the Vietnamese rid themselves of the Chinese. The new Vietnamese house is that of Le Loi (r. 1418–1420), who establish the LE DYNASTY (1428–1527, 1533–1789).

1428–1788

Under the LE DYNASTY (1428–1527, 1533–1789), for over three and a half centuries, Vietnam flourishes. Strides occur in literature, culture, trade and industry, and agriculture. In the sixteenth century, the country splits into two feudal states: TRINH FAMILY in the north and Nguyễn in the south.

1520

King Photisarath relocates the capital to Wieng Chan (modern VIENTIANE). Despite its size and power, Lan Xang never conquers the highland tribes.

Late 16th century

The Portuguese include Vietnam on their trade routes.

1614

CHRISTIAN MISSIONARIES propagate CATHOLICISM, with the Jesuits entering Vietnam.

1614–1682

Vietnam becomes involved in European rivalries: PORTUGUESE ASIAN EMPIRE, NETHERLANDS (DUTCH) EAST INDIES, BRITISH INTEREST IN SOUTHEAST ASIA, and FRENCH AMBITIONS IN SOUTHEAST ASIA.

1694

When Sulinya Vongsa dies without an heir, the LAO kingdom falls apart in the ensuing struggle for power.

Early 1700s

Sulinya Vongsa's nephew, steward of ANNAM, controls the river valley around Wieng Chan. Sulinya's grandsons control the kingdom of LUANG PRABANG, and a Siamese surrogate

establishes the kingdom of CHAMPASSAK in the south.

1763–1800s

Burma from the north and Siam from the south periodically send armies into Laos. Wieng Chan is also under pressure from the Annamites to pay them tribute. A considerable number of the inhabitants of Laos migrate to Thailand.

1787

The Nguyễn sign a treaty with France; the terms, however, are not implemented.

1788–1802

Three Nguyễn brothers lead the TÂY-SON REBELLION (1771–1802) in the late eighteenth century. They overthrow both the feudal states of Trinh and Nguyễn and the LE DYNASTY (1428–1527, 1533–1789), establishing the dynasty of Tay Son. After fourteen years, this dynasty falls to NGUYỄN ÁNH (r. 1802–1820), backed by French mercenaries procured by PIERRE JOSEPH GEORGES PIGNEAU DE BÉHAINE, BISHOP OF ADRAN (1741–1799).

1789

Vietnam defeats forces of the QING (CHING/MANCHU) DYNASTY (1644–1912).

Under the NGUYỄN DYNASTY (1802–1945), Vietnam enters yet another positive period, with an expanding economy, irrigated agriculture, literature, and culture. Vietnam opens trade contacts with European powers including France and England. In addition, trade grows with India and Indonesia. Friction develops with neighbors.

1804

NGUYỄN ÁNH (r. 1802–1820) officially gives the name “Vietnam” to his country.

1847

French forces bombard ĐÀ NẴNG (TOURANE).

1857

Vietnam closes its doors to foreign influence and expels European diplomats. This is an uneasy period of NGUYỄN EMPERORS AND FRENCH IMPERIALISM. FRENCH

1498 Chronology

AMBITIONS IN SOUTHEAST ASIA lead to France subsequently conquering Vietnam, imposing protectorates over CAMBODIA and LAOS, and eventually creating FRENCH INDOCHINA.

1858

The French take ĐÀ NẴNG.

1859

The French take SAIGON (GIA DINH, HỒ CHÍ MINH CITY).

1862–1867

Vietnam cedes three southern provinces to France in the Treaty of Saigon. The French colony of COCHIN CHINA is created.

1863

In the mid-nineteenth century CAMBODIA is under strong pressure from European imperialists. In 1863, Cambodian KING NORODOM (1836–1904) accepts a treaty of protection from the French.

1866–1868

LAGRÉE-GARNIER MEKONG EXPEDITION (1866–1868) aims to explore the possibility of the river as a “back door” to YUNNAN PROVINCE, southwest IMPERIAL CHINA, where it is popularly believed to offer profitable trade.

1867–1940

PHAN BÔI CHÂU (1867–1940), a Vietnamese revolutionary thinker and strategist, has a hand to play in every party and every agitation that opposes and criticizes the colonial administration in Vietnam.

1872–1926

PHAN CHAU TRINH (1872–1926), a Vietnamese reformer who advocates an anticolonial struggle that seeks reforms and modernization through learning from the West in efforts to create a modern Vietnamese society.

1874

When Tu Duc (r. 1847–1883) signs the Treaty of Saigon, he acknowledges that the French are sovereign over COCHIN CHINA.

1884

The French establish a protectorate over ANNAM and TONKIN (TONKING) through the Treaty of Hue.

1885

Emperor Ham Nghi (r. 1885–1886) leads the fight against France in the Battle of Hue.

1887

Creation of the FRENCH INDOCHINESE UNION (*UNION INDOCHINOISE FRANÇAISE*) (1887).

1888

The French capture Ham Nghi and exile him to Algeria, then under French colonial rule.

1893

France forces Siam to sign a treaty following the PAKNAM INCIDENT (1893) whereby the French gain territory east of the Mekong.

Late 19th century

France begins working on creating FRENCH INDOCHINA. One element is a Laotian protectorate. As Siam cedes the eastern side of the Mekong, LAOS unites into a single colony. Boundary commission establishes the borders of LAOS (which the French then establish as the colony's name by pluralizing the name LAO, which the inhabitants use to define themselves and their country). Under French control, LAOS is a buffer state between Burma and British-influenced Siam and the economically important ANNAM and TONKIN. Laotian exports include opium, RUBBER, COFFEE, and TIN. LAOS receives only 1 percent of French exports.

1897

France dominates Vietnam. FRENCH INDOCHINA (Vietnam, LAOS, CAMBODIA) comes into being. France takes thirty years to pacify Vietnam in the face of strong guerrilla resistance. The government of Indochina is reorganized and centralized under Governor-General Paul Doumer (t. 1897–1902). The NGUYỄN DYNASTY (1802–1945) remains a figurehead with the impotent royal court at HUE. French rule is characterized by exploitation through mining and development of plantation agriculture in tea, RUBBER, and COFFEE. The Lower Mekong becomes a vast

rice-producing and -exporting region. Vietnamese who adapt to the French have a chance of prospering; those who remain Vietnamese generally suffer.

1904

Vietnamese land reform causes higher taxes for farmers, leading to rebellion. Harsh suppression, including executions, keeps the rebels in check for decades. Failure to address the underlying problems, however, keeps them festering.

PHAN BÔI CHÂU establishes the Reformation Society.

1908

Tax revolt in Annam; uprising in HANOI (THANG-LONG).

1916

Annam and COCHIN CHINA in rebellion.

1925

PHAN BÔI CHÂU stands trial in HANOI.

1930

TONKIN-ANNAM witness significant anti-French uprisings. Nguyễn Ai Quoc, better known as HỒ CHÍ MINH (1890–1969), establishes the VIETNAMESE COMMUNIST PARTY (VCP).

1940

Fall of France to Nazi Germany. Imperial Japanese forces enter Indochina.

1941

With Japanese backing King SISAVANG VONG (1885–1959) declares the independence of Laos. Anticipating a French return, Prime Minister Prince PHETSARATH (1890–1959) forms LAO ISSARA (ISSARRAK), a resistance movement.

1945

9 March

Japan drives France out of CAMBODIA, VIETNAM, and LAOS.

2 September

HỒ CHÍ MINH declares independence of Vietnam.

With the war over, France relieves Prince PHETSARATH (1890–1959) of his functions and reinstates the protectorate of LAOS.

October

LAO ISSARA declares independence and deposes the king of Laos.

1946

April

King SISAVANG VONG (1885–1959) is back on the throne, the first Laotian king of all Laos. Two days later the LAO ISSARA (ISSARRAK) falls to Lao and French forces, and Phetsarath sets up a government-in-exile in Thailand.

Late 1946

France asks LAO ISSARA (ISSARRAK) to join an autonomous Laos. LAO ISSARA (ISSARRAK) is split three ways. There is Prince PHETSARATH's (1890–1959) independence movement. Also there is the leftist group under his half brother, Prince SOUPHANOUVONG (RED PRINCE) (1911–1995), which wants to link with the VIỆT MINH of HỒ CHÍ MINH. Then there are the supporters of the compromising half brother SOUVANNA PHOUMA (1901–1984), ready to negotiate with the French for an independent Laos.

1949

Mao Zedong (1893–1976) announces the People's Republic of China (PRC) following the defeat of NATIONALIST CHINA in the civil war (1945–1949) by the communists. As in the past, CHINA SINCE 1949 seeks the support of the CHINESE IN SOUTHEAST ASIA.

19 July

LAOS becomes independent as an “associated state” within the French Indochinese Federation.

1950

The VIET MINH lends support to Neo Lao Issara, which was established by Prince SOUPHANOUVONG (1911–1995) as an anti-French movement.

1953

As part of the U.S. INVOLVEMENT IN SOUTHEAST ASIA (POST-1945), the United

1500 Chronology

States, to counter the influence of the VIỆT MINH, begins supplying aid to LAOS.

October

LAOS gains full sovereignty under the Franco-Laotian treaty. The constitutional monarchy and in turn the monarchy itself are abolished on 2 December 1975.

9 November

After intense agitation led by King NORODOM SIHANOUK (1922–), CAMBODIA gains independence as the Kingdom of Cambodia. Under Sihanouk, CAMBODIA attempts to remain neutral, despite pressure from its neighbors and the superpowers. The COLD WAR gradually affects CAMBODIA.

1954

May

After nearly a decade of fighting, the French face defeat at the BATTLE OF DIEN BIEN PHU (MAY 1954) and withdraw. Under pressure from the staunchly anticommunist United States, the GENEVA CONFERENCE (1954) splits Vietnam into a communist NORTH VIETNAM (POST-1945) and a democratic SOUTH VIETNAM (POST-1945). War continues sporadically.

1956

Vietnamese elections canceled.
The Lao Patriotic Front (LPF) forms the “Neo Lao Hak Sat.”

1957

LPF forms the coalition government of national union under Prince SOUVANNA PHOUMA with the Royal Lao Government. The government collapses, and the LPF leadership, including SOUPHANOUVONG, is arrested. They escape to the countryside and establish a resistance movement. The new prime minister is Phoui Sananikone.

1960

Students for a Democratic Society (SDS) is formed in the United States. National Liberation Front (NLF) is created in SOUTH VIETNAM.

August

Neutralists under the command of General Kong Le stage a coup, and SOUVANNA PHOUMA

returns from France, where he has been ambassador, to be prime minister.

December

Rightist general Phoumi Nosavan attacks VIENTIANE. Khong Le flees to the combined PATHET LAO and North Vietnamese forces in Xieng Khouang.

1961

U.S. vice-president Lyndon Johnson (1908–1973) visits SAIGON. SDS issues the Port Huron Statement.

1962

May

A new agreement establishes Laos as neutral and independent. The government of National Union includes Prince Boun Oum for the right, Prince SOUPHANOUVONG for the PATHET LAO, and Prince SOUVANNA PHOUMA for the neutralists. This government does not hold together long.

1963

1 November

South Vietnam's president NGÔ ĐÌNH DIỆM (1901–1963) (t. 1955–1963) is killed following a coup that overthrows his regime.

22 November

U.S. President John F. Kennedy (t. 1961–1963) is assassinated in Dallas, Texas.

1964

After several coups, the Laotian government splits with the PATHET LAO against the rightists and neutralists. The PATHET LAO, assuming it will lack a voice in any government, boycotts elections.

The GULF OF TONKIN INCIDENT (AUGUST 1964), in which U.S. warships and North Vietnamese naval units are involved in naval exchanges, is used as a pretext for major U.S. involvement in Vietnam. The Gulf of Tonkin Resolution gives President Lyndon Johnson (t. 1963–1969) a free hand in Vietnam. Free Speech Movement begins at University of California, Berkeley.

1964–1973

U.S. bombers en route to raids on North Vietnam and the HỒ CHÍ MINH TRAIL trespass

Laotian air space to bomb the PATHET LAO and North Vietnamese in LAOS. On a per capita basis, Laos receives more bombs than any other nation in history. The U.S. Central Intelligence Agency (CIA) begins training HMONG and others to fight communist guerrillas. The leader of that army is General Vang Pao.

February

U.S. begins bombing NORTHVIETNAM.

March

U.S. Marines land at ĐÀ NẴNG.

July

U.S. draft calls increase.

1965

Antiwar demonstrations and marches in Washington, D.C., begin in the United States. In an antiwar protest, Alice Herz and Norman Morrison immolate themselves.

1966

June

U.S. bomb vicinity of HANOI.

1967

September

NGUYỄN VAN THIEU (1923–2001) elected president of SOUTHVIETNAM.

November

Secretary of Defense Robert S. McNamara (t. 1961–1968) secretly advises that the bombing of NORTHVIETNAM should cease.

1968

January

TET OFFENSIVE and siege of Khe Sanh begin.

February

General William Westmoreland (t. 1964–1968), commander of U.S. forces in Vietnam, requests 206,000 more troops. With 535,000 already committed, his request is denied.

March

Westmoreland leaves Vietnam.

16 March

MY LAI massacre. U.S. soldiers shoot in cold blood some 400 to 500 Vietnamese, mainly the elderly, women, and children, of the village of MY LAI.

31 March

President Lyndon Johnson announces his decision not to seek another term and a limited halt to the bombing of NORTHVIETNAM.

April

Agreement for preliminary peace talks between HANOI and Washington.

4 April

Martin Luther King (1929–1968), leader of the nonviolent movement for racial equality in the United States, is assassinated in Memphis, Tennessee.

October

Halt to U.S. bombing on NORTHVIETNAM. Peace talks open in Paris.

November

Richard Milhous Nixon (1913–1994) elected as the thirty-seventh U.S. president (t. 1969–1974). He promises that he has a plan to end the war in Vietnam.

1969

Antiwar march in Washington, D.C., brings out half a million people. President Nixon says that too much haste in withdrawal would be disastrous. A provisional revolutionary government forms in SOUTHVIETNAM.

September

HỒ CHÍ MINH dies, age seventy-nine.

November

U.S. public learns of the MY LAI massacre.

1970

Cambodian prince NORODOM SIHANOUK deposed.

30 April

President Nixon orders the invasion of CAMBODIA; troops remain until May/June. The incursion into CAMBODIA results in the repeal of the Gulf of Tonkin Resolution and the passing of the Cooper-Church Amendment,

1502 Chronology

which restricts the U.S. president's activity in CAMBODIA.

May

Kent State and Jackson State killing of university student protestors, following national student protests in the United States.

In CAMBODIA, Defense Minister LON NOL (1913–1984), a conservative pro-American, leads a coup d'état. Shortly afterward, LON NOL falls to the forces of POL POT (SALOTH SAR) (1925–1998).

1971

The Chinese presence in northern LAOS reaches 6,000 to 7,000, mainly in air defense forces.

China is also building roads in northern LAOS. ARMY OF THE REPUBLIC OF VIETNAM (ARVN) invades LAOS; Nixon commits only a token force. U.S. troops have mostly been withdrawn from the region.

1972

Henry Kissinger (t. 1969–1975), U.S. national security adviser, assures U.S. of imminent peace in Vietnam.

Democrat George McGovern runs against Nixon as the antiwar candidate but loses overwhelmingly.

Christmas

U.S. bombing of Haiphong and HANOI hits civilian targets.

1973

PARIS PEACE AGREEMENT (1968, 1973) concludes a cease-fire and the departure of the last U.S. combat troops from Vietnam. U.S. congressional hearings on the issue of the invasion of CAMBODIA begin. When Henry Kissinger and LE DUC THO (1911–) share the Nobel Peace Prize, the latter declines, noting that Vietnam does not yet enjoy true peace. Cease-fire in LAOS and a provisional government are set up.

1975

April

SAIGON falls to communist forces. ARMY OF THE REPUBLIC OF VIETNAM (ARVN) collapses in the assault of SAIGON by the North Vietnamese Army.

PATHET LAO seize a major crossroad on the LUANG PRABANG–VIENTIANE Road and begin pressing non-PATHET LAO military and civilian leaders to resign. Several do.

30 April

Vietnam is reunited as the Socialist Republic of Vietnam (12 July 1976).

May

Lao refugees begin crossing the Mekong into Thailand as the PATHET LAO take Pakse, Savannakhet, and CHAMPASSAK.

23 August

Without fighting, VIENTIANE falls.

December

The Lao People's Revolutionary Party (LPRP) becomes the ruling party in the LAO PEOPLE'S DEMOCRATIC REPUBLIC (LPDR). Prime Minister Kaysone Phomvihane holds the post until he dies in November 1992. Replacing him is Defense Minister Khamtay Siphandon, who becomes president in 1996.

1975–1979

DEMOCRATIC KAMPUCHEA (DK), POL POT's regime under the KHMER ROUGE, is a reign of terror, beginning with the executions of LON NOL's government and other political figures and soon extending to intellectuals, workers, and even children. It is estimated that as many as one-third of the Cambodian population die in the massacres, depicted in an American-made film entitled *THE KILLING FIELDS*. Vietnam invades, and the pro-Vietnamese HENG SAMRIN (1934–) ousts POL POT. The KHMER ROUGE wages guerrilla warfare from the jungles.

1975–ca. 1997

Harsh political and economic decisions by the leadership cause many LAO to become refugees.

1977

King Sisavang Watthana (r. 1959–1984?) loses his figurehead status when the anticommunist rebels implicate him in the battle for the town of Muang Son. Sent to a reeducation camp at Vieng Xai, the king and his family are rumored to have died a few years later (1984?) in northern LAOS. Reeducation camps and

prisons reportedly hold 70,000 Laotians until they finally close after 1989.

1982

July

Forces of POL POT, NORODOM SIHANOUK, and Son Sann (derivative of Lon Nol) establish the Coalition Government of Democratic Kampuchea (CGDK).

1987

Détente between the Soviet Union and the United States eases the friction of the COLD WAR and gives CAMBODIA space to pursue peace. CAMBODIA continues to suffer large casualties from left-behind civil war land mines, and has difficulty arranging the return of refugees.

1990

CGDK renamed the National Government of Cambodia, but the civil war continues.

1991

PARIS CONFERENCE ON CAMBODIA (PCC) (1989, 1991) is able to resolve some outstanding issues among the contending factions.

1992

UNITED NATIONS TRANSITIONAL AUTHORITY IN CAMBODIA (UNTAC) begins work in CAMBODIA.

1993

The United Nations oversees a general election and the inauguration of a new government in Kampuchea.

1995

Vietnamese-U.S. relations are normalized despite unresolved issues such as MIAs (MISSING IN ACTION). Vietnam becomes a popular travel destination for Western tourists. Vietnam gains admission to the ASSOCIATION OF SOUTHEAST ASIAN NATIONS (ASEAN) (1967).

1997

July

LAOS joins ASEAN.

1998–1999

ASEAN admits CAMBODIA as a member.

2000

U.S. president Bill Clinton (t. 1993–1998) pays official visit to Vietnam.

2001

November

The ratification of a trade agreement by Vietnam's National Assembly signals the restoration of normal relations between Vietnam and the United States.

2002

February

In CAMBODIA, elections are held at the level of communes (*khum*). The Cambodian People's Party (CPP) wins the local elections with 1,597 out of 1,621 *khum*.

Attempts to bring to trial former leaders of the KHMER ROUGE for genocide and crimes against humanity are disrupted when the United Nations surprisingly withdraws from negotiations with the Cambodian government. Even without the participation of the United Nations, the Cambodian government intends to set up a tribunal to hold the trials. The first to be brought to trial is Ta Mok, former military commander of the KHMER ROUGE. He faces charges of crimes against humanity.

July

Vietnam's National Assembly reelects Tran Duc Luong for a second term as state president.

2004

An outbreak of avian influenza hits Asia. By mid-February, Vietnam has suffered fourteen fatalities and has culled 35 million chickens. Poultry farmers suffer heavy losses. It is equally devastating for neighboring Thailand.

II. BURMA (MYANMAR)

ca. 3000 B.C.E.

MONS establish settlements in central Burma and along the eastern coast of the Bay of Bengal.

The MONS construct irrigation systems and establish commercial and cultural ties with INDIA. MONS of Burma also influence their brethren in neighboring Siam.

628 C.E.

The PYUS establish a capital near modern Prome.

1504 Chronology

800 C.E.

Migrants from Tibet and China populate Burma. The groups include the MONS from Cambodia, Mongol BURMANS from the Himalayas, and T'AI tribes.

Mid-9th century C.E.

BURMANS absorb communities of PYUS and MONS with which they come into contact.

1044–1077

King ANAWRAHTA (ANIRUDDHA, r. 1044–1077) unifies Burma under the PAGAN (BAGAN) kingdom, comparable to a Hindu kingdom, financed by household taxes.

1102

The term “Myanmar” is in use to refer to what is the Union of Burma and, since 1989, is the Union of Myanmar.

13th century

Burma begins to decline on account of its major investment of time and money in pagodas and the inherent weaknesses of the TEMPLE POLITICAL ECONOMY.

1253–1287

YUAN (MONGOL) DYNASTY (1271–1368) launches invasion that ends the PAGAN kingdom, leaving Burma disorganized and fragmented for the next 250 years.

1287

Kublai Khan (1215–1294) ransacks PAGAN, and Burma experiences continual internal conflict for centuries.

Mid-14th century

The so-called “period of Shan domination” is ushered in with the establishment of the FIRST AVA (INWA) DYNASTY (1364–1527 C.E.).

1500

The BURMA-SIAM WARS break out for control of the trade across the ISTHMUS OF KRA, upper Malay Peninsula, and along the Gulf of Siam. It is a protracted conflict over the next centuries until the first decade of the nineteenth century.

1531–1752

The TOUNGOO DYNASTY (1531–1752) expands under TABINSHWEIHTI (r. 1531–1550), uniting Upper Burma with Lower Burma. PEGU becomes the center of administration.

1551

BAYINNAUNG (r. 1551–1581) further enlarges the power of the TOUNGOO DYNASTY (1531–1752), which stretches from Manipur in the west to Laos in the east, Ayutthaya to the borders of Cambodia.

1597–1752

After Nandabayin's death, chaos reigns until Bayinnaung's grandson, Anaukpetlun (r. 1605–1628), establishes the Restored Toungoo dynasty (1597–1752) with its base at Ava, Upper Burma.

Mid-18th century

The twilight decades of the TOUNGOO DYNASTY (1531–1752) see the drifting away of the MONS and hill tribes—SHANS, CHINS, KACHINS, KARENS—which establish independent kingdoms, fragmenting Burma.

1752

The MONS of Lower Burma launch a rebellion and capture Ava, besides destroying much of the lands of Upper Burma.

Out of these troubled times emerges a chieftain of the BURMANS, ALAUNG-HPAYA (r. 1752–1760). In a series of campaigns, he reunites the fragmented country under the KONBAUNG DYNASTY (1752–1885), Burma's last and most powerful dynasty.

1767

BURMANS sack the capital of the KINGDOM OF AYUTTHAYA (AYUTHAYA, AYUDHYA, AYUTHIA) (1351–1767 C.E.).

1767–1809

The BURMA-SIAM WARS are at their peak.

1782

BANGKOK is the new capital built by RAMA I (CHAKRI) (r. 1782–1809), the founder of the Chakri dynasty.

19th century

As the European demand for rice grows, farmers in Lower Burma begin clearing the forests and growing rice as an export commodity. The Konbaung rulers oppose the exports, but after the British takeover of ARAKAN and TENASSERIM in 1826, the policy shifts in favor of exports. Rice cultivation expands throughout the century, especially after the British takeover of Lower Burma in the early 1850s. At century's end, Burma is the world's major rice exporter.

British influence on Burma is minimal until internal conflicts involve the GOVERNMENT OF BRITISH INDIA in Bengal. KONBAUNG RULERS AND BRITISH IMPERIALISM represent a struggle between two proud, imperialistic powers. Consequently in a series of conflicts—ANGLO-BURMESE WARS (1824–1826, 1852, 1885)—the British annex the entire country, referring to it as BRITISH BURMA.

1824

First Anglo–Burmese War (1824–1826) is consequent of unresolved border incursions and refugee issues.

1826

TREATY OF YANDABO cedes ARAKAN and TENASSERIM to the British.

1852

The British invade again, owing to diplomatic breakdown caused by misunderstanding and cultural differences (the “SHOE ISSUE”). Victorious in this second war, the British annex PEGU and Lower Burma.

1853–1878

Anglo–Burmese relations enjoy a cordial footing throughout the reign of MINDON (r. 1853–1878). He plays a balancing game of using the French to offset British influence.

1885

British fear of French influence in Upper Burma leads to its annexation following the Third Anglo–Burmese War (1885). This final conflict ends the KONBAUNG DYNASTY (1752–1885).

It is another two decades before pacification is achieved. Burma is administered as part of British India.

20th century**BURMA UNDER BRITISH COLONIAL**

RULE witnesses the transformation of the country into a world exporter of rice. Southeast Asia's plantations and cities are almost totally dependent on rice from Burma, Siam, and COCHIN CHINA. The supply exceeds even the Southeast Asian and European demand. The surplus feeds INDIA and NATIONALIST CHINA, both of which have large populations. INDIAN IMMIGRANTS often exploit the Burmese. The CHETTIARS (CHETTYARS), a South Indian moneylending caste, play a decisive role in the expansion of Lower Burma's rice industry in the late nineteenth century and early twentieth century. Social decline during the British period leads to a rise in nationalist feeling.

CONSTITUTIONAL DEVELOPMENTS IN

BURMA (1900–1941) seek to establish a Westminster system of governance with leaders remaining loyal to Britain.

1906**The YOUNG MEN'S BUDDHIST**

ASSOCIATION (YMBA) (1906) is set up by a group of educated Burmese who seek to reconcile Buddhist traditions with WESTERN SECULAR EDUCATION.

1909

Burmese intellectuals and British civil servants support the establishment of the BURMA RESEARCH SOCIETY. It is devoted to the study of Burmese culture.

1914–1918

The GREAT WAR (1914–1918) impacts Burma's economy, which relies heavily on rice exports. When prices fall owing to the war, many Burmese farmers who owe CHETTIARS have their rice lands foreclosed. Absentee landlordism and tenant farmers are the norm in Lower Burma. Dissatisfaction and frustration of the Burmese are directed toward the British colonial government and the immigrant Indian community.

1506 Chronology

1916–1917

A “No-footwear-in-pagodas” campaign is launched. It targets Europeans. It is the subtle Burmese way of fighting against the wrongs they suffered under the colonial regime.

1917–1918

The Montagu-Chelmsford reforms promise self-government to India and Burma.

1920

The GENERAL COUNCIL OF BURMESE ASSOCIATIONS (GCBA) (1920) is formed.

December

UNIVERSITY OF RANGOON is officially opened.

1929–1931

The GREAT DEPRESSION (1929–1931) hurts Burma with falling prices of rice, the mainstay of the economy. Consequently there appear peasant landlessness, widespread unemployment, anti-Indian riots, and general social unrest.

Early 1930s

Burmese nationalists use the term *THAKIN* to emphasize that they alone are the rightful masters of the country, and not the British colonialists.

1930–1931

The Saya San rebellion seeks to overthrow the British colonial government and in its place to rejuvenate the Burmese monarchy. Dr. BA MAW (1893–) gains public prominence as the defense counsel in the trial of Saya San. The India Round Table Conference is convened.

1931–1932

The Burma Round Table Conference makes no headway, owing to divergent expectations from the Burmese and British delegates. The Burmese expect a discussion on the drafting of a constitution; the British are willing only to hear opinions for future consideration.

1935

The Constitution of 1935 does not grant complete self-government, but a positive start has been initiated.

1937

Separation of Burma from British India leads to anticipation of self-rule. DR. BA MAW (1893–) becomes the prime minister (t. 1937–1939).

1941

BURMA DURING THE PACIFIC WAR (1941–1945) witnesses Japanese attempts to gain political support from the Burmese, for instance, the military training accorded to the THIRTY COMRADES. Tempted by the prospect of independence, Burmese instead opt for resistance.

1942

At the onset of the Pacific War, AUNG SAN (1915–1947) creates the BURMA INDEPENDENCE ARMY (BIA), and the Japanese train it. The BIA supports the Japanese occupation. Fighting little, they grow in strength until they are strong enough to topple the weak Japanese government at war's end. Their new name is the ANTI-FASCIST PEOPLE'S FREEDOM LEAGUE (AFPFL). AUNG SAN remains their leader.

1943–1944

The CHINDITS, commanded by Major General Orde Charles Wingate (1903–1944), undertake guerrilla operations behind Japanese lines in Burma.

1947

April

After postwar negotiating with the British over independence, the AFPFL wins a majority in the constitutional assembly. Within three months occurs the incident of U SAW AND THE ASSASSINATION OF AUNG SAN and most of his cabinet. The new postwar leader of independent Burma is U NU (1907–1995).

1948

Burma is independent and struggling to cope with internal problems because of revolts by Muslims, MONS, communists, and the hill tribes.

1960

U NU initiates the official program of BUDDHIST SOCIALISM.

1962–1987

GENERAL NE WIN (1911–2002), left-winger, overthrows the democratic government of U NU and imprisons him. Burma embarks on the socialist path and twenty-five years of a crumbling economy, with even retail stores nationalized. Meanwhile a black market booms. GENERAL NE WIN attempts to salvage something by giving the presidency to San Yu, but life remains bleak. Also, a government ruling establishes “associate citizens,” people of ancestry other than the original races. Specifically targeted are Sino-Burmans and Indo-Burmans. Although they can vote, they cannot run for office above a certain level.

1987

Protests and demonstrations against GENERAL NE WIN lead to clashes between prodemocracy advocates and the army. Over a six-week period, 3,000 perish. NE WIN’s appointment of several puppets probably instigates a military coup.

1988

In preparation for the election in 1988, DAW AUNG SAN SUU KYI (1945–), the daughter of independence hero Bogyoke AUNG SAN, forms a coalition, the NATIONAL LEAGUE FOR DEMOCRACY (NLD).

July

GENERAL NE WIN finally leaves after antigovernment riots in March and June by a people fed up with devaluation of currency (*kyat*) that destroys their savings and squeezes their budgets. GENERAL WIN’s departure is followed by months of protests, looting, and death.

September

The failure of President Maung Maung (1925–1999) to restore order sees General Saw Maung and the STATE LAW AND ORDER RESTORATION COUNCIL (SLORC) take charge, promising elections in 1989.

1989

“Burma,” the colonial term, is replaced with the indigenous name “Myanmar” (in use since 1102 C.E.).

Despite DAW AUNG SAN SUU KYI’s being under house arrest, the NLD wins easily, garnering 80 percent of the seats, 60 percent of

the vote. But SLORC declares that there can be no nonmilitary government until a new constitution is drafted.

The junta continues to fight the KARENS rebels. KARENS organizations include KAREN NATIONAL DEFENCE ORGANISATION (KNDO), KAREN NATIONAL LIBERATION ARMY (KNLA), and KAREN NATIONAL UNION (KNU). For the KACHINS there is the KACHIN INDEPENDENCE ORGANISATION (KIO). SHAN NATIONALISM demands a separate state. The SHAN UNITED REVOLUTIONARY ARMY (SURA) is involved in the drug trade to finance its separatist agenda.

1990s

Khun Sa, the notorious drug kingpin, is rumored to have made a deal with the military junta that allows him to live in luxurious house arrest while his “Heroin Inc.” remains in operation.

1991

Under house arrest while Tin Oo and other NLD leaders are in prison, DAW AUNG SAN SUU KYI wins the Nobel Peace Prize.

1993

Constitution drafting begins. SLORC orders that the military must have a major role, so the NLD walks out, leaving Myanmar without a new constitution; the military junta continues to hold the reins of power and government.

1995

SLORC releases AUNG SAN SUU KYI but bars her from leaving RANGOON (YANGON). When she tries to leave in September 2000, she is arrested once more.

1996

SLORC arrests more than 200 NLD members going to a party congress.

1997

To change its image, SLORC is disbanded. The old SLORC leadership leads the new State Peace and Development Council (SPDC).

1508 Chronology

2002

March

Consequent of the uncovering of an alleged coup attempt, orders of arrest are served on the relatives of GENERAL NE WIN, including his son-in-law and grandsons. Later his daughter is also detained and GENERAL NE WIN himself is placed under house arrest. Major General Soe Win, the chief of police, and Major General Myint Swe, the commander of the air force, are both removed from their positions for their alleged involvement in the coup.

May

DAW AUNG SAN SUU KYI is granted unconditional release from more than twenty months of house arrest. After negotiations with the government through a United Nations mediator, DAW AUNG SAN SUU KYI wins the right to go about her business without the previous restrictions. Democracy seekers and the government enter into reconciliation discussions and the junta promises to make reforms.

August

DAW AUNG SAN SUU KYI, in her campaign to secure the freedom of all political prisoners, demands that the SPDC hasten their unconditional release as evidence of the SPDC's good faith in working toward building a democratic Myanmar. Consequently fourteen political prisoners are released, six of whom are from the NATIONAL LEAGUE FOR DEMOCRACY (NLD).

2003

30 May

DAW AUNG SAN SUU KYI, accused by the military government of instigating unrest, is taken into "protective custody" following clashes between NLD supporters and pro-junta groups in northern Myanmar.

III. SIAM (THAILAND)

3600 B.C.E.

A Bronze Age culture, perhaps the world's first, exists at BAN CHIANG, near Udong.

600 B.C.E.

T' AIS migrate from China.

300 B.C.E.

INDIAN IMMIGRANTS bring trade as well as sociocultural influences and the beginnings of the INDIANIZATION process.

1st century C.E.

HINDUISM is established in Siam by Indian traders traveling to Indochina.

650–1250 C.E.

The T' AIS establish a kingdom, NAN CHAO (NANCHAO) (DALI/TALI), in southern China. Thereafter they migrate into the Menam Central Plain, then under the Khmer empire.

10th century

From Burma, the MONS migrate into central Siam and establish several Buddhist kingdoms from Nakhon Pathon on the Korat Plateau to CHIANG MAI.

1150

In Cambodia, situated to the south and east of Siam, SŪRYAVARMAN II (r. 1113–1145?) builds ANGKOR WAT (NAGARAVATTA).

1238

T' AIS establish SUKHOTAI (SUKHODAVA), the first independent kingdom not dominated by the Khmer.

SUKHOTAI period (1238–1378). Breaking from the Khmer and Mon kingdoms, T' AIS enjoy the "Dawn of Happiness," their golden era of enlightened and benevolent kings, most notably RAMA KAMHAENG (r. 1279–1298).

Based on Mon, Indian, and Khmer scripts, the Siamese (Thai) alphabet comes into use.

1350–1767

Ayutthaya period (1350–1767). King RAMATHIBODI (r. 1351–1369) establishes the KINGDOM OF AYUTTHAYA (1351–1767 C.E.). The Ayutthayan kings are culturally Khmer. Rather than paternal, they are absolute god-kings. Early in the period, Ayutthaya extends its control over neighboring principalities. The capital city of Ayutthaya is some 55 kilometers north of modern BANGKOK.

1498

VASCO DA GAMA (1459–1524) rounds the Cape of Good Hope and crosses the Indian Ocean. That lays the setting for the establishment of the PORTUGUESE ASIAN EMPIRE.

1500–1809

The protracted BURMA-SIAM WARS begin with a Burmese invasion of Siamese territory.

1516

The Siamese court receives a Portuguese envoy and signs a treaty of friendship and commerce.

1571

Established in MANILA, the Spaniards spread CATHOLICISM, embark on a HISPANIZATION process, and economically dominate the Philippine archipelago. SPANISH EXPANSION IN SOUTHEAST ASIA develops alongside the PORTUGUESE ASIAN EMPIRE and influence in Asia.

1576

The Burmese sack the KINGDOM OF AYUTTHAYA.

1584

Siam declares its independence. BURMA-SIAM WARS persist.

1593

In a duel on elephants, PHRA NARET (KING NARESUAN) (r. 1590–1605) bests the Burmese Crown prince at Nong Sa Rai near Suphan Buri. This duel temporarily resolves the BURMA-SIAM WARS.

1594

PHRA NARET defeats Cambodia.

1598

Spain and Siam sign a treaty of friendship and commerce. Terms are similar to those of the treaty signed with the Portuguese in 1516.

17th century

Siam establishes commercial and diplomatic links with various European powers.

PHRA NARET gives the VEREENIGDE OOST-INDISCHE COMPAGNIE (VOC) (1602) permission to build a trading station in

the south. In 1604 the Dutch arrive in the KINGDOM OF AYUTTHAYA and meet with the king.

1607

Siam sends an ambassador to The Netherlands. After a seven-month voyage, the ambassador becomes the first Siamese representative in Europe.

1610–1628

Kings Ekatotsarot (r. 1605–1610) and Songtham (r. 1610–1628) and the Japanese Shogun, Ieyasu Tokugawa (1543–1616), exchange ambassadors. This ushers in the beginning of Siamese-Japanese relations.

1611

The ENGLISH EAST INDIA COMPANY (EIC) (1600) establishes a factory in Siam.

1617

Siam's first treaty with the Dutch gives no exclusive trading rights.

1661–1664

The Dutch, dissatisfied with their commercial treaty with PHRA NARET, implement a warlike policy against Siam. Their actions include the taking of a merchant vessel by force, a blockade of the Chao Phraya River, and a forced treaty granting them a monopoly on the trade in cow and deer hides.

1662–1687

The French presence begins under the reign of King NARAI (r. 1656–1688). Louis XIV (r. 1643–1715) receives the Siamese ambassador and sends the first French ambassador in 1685. The second ambassador arrives in 1687 with 1,400 French soldiers and 300 craftsmen. This offers a foretaste of FRENCH AMBITIONS IN SOUTHEAST ASIA.

1682

CONSTANCE (CONSTANTINE) PHAULKON (d. 1688), a Greek adventurer, is a favorite of King NARAI and a prominent official at the Siamese court. Through his influence, Siam adopts a monopolistic commercial policy. He is de facto foreign minister who pursues a pro-French foreign policy.

1510 Chronology

1687

Because the British want to use Indian OPIUM in Siam as they do in China, King NARAI (r. 1656–1688) declares war against the EIC.

1688

To counter Dutch influence, NARAI turns to the French. The Dutch sign a new treaty reaffirming the terms of 1617. Once the renegotiations are finished, NARAI expels the French.

1767

Burmese forces capture the KINGDOM OF AYUTTHAYA. The occupation lasts only seven months as a result of the exploits of PHYA TAKSIN (PHYA TAK [SIN], KING TAKSIN) (r. 1767–1782), who escapes to Chantaburi and returns to expel the Burmese garrison.

1767–1772

Thon Buri period (1767–1772). Under PHYA TAKSIN, the capital relocates to Thon Buri, nearer the sea, thereby facilitating foreign trade. The new location aids the procurement of arms, defense, and withdrawal should the Burmese return. This period is characterized by an effort to revive the kingdom by bringing back provinces that have declared their independence and have gone their own ways after the fall of the KINGDOM OF AYUTTHAYA.

1782–1809

Rattanakosin period (1782–1809). General Chakri becomes RAMA I (CHAKRI) (r. 1782–1809), founder of the Chakri dynasty. He moves the capital to BANGKOK in 1800 and builds the Grand Palace.

1794

BATTAMBANG and SIEM REAP in Cambodia are ceded to Siam.

1809–1824

Rama II (r. 1809–1824) continues the restoration, a reassertion of Siamese sovereignty over neighboring territories including the peninsular SIAMESE MALAY STATES (KEDAH, PERLIS, KELANTAN, TEREANGANU).

1824–1851

King Nang Klao, Rama III (r. 1824–1851), seeks to reestablish relations with the West. Trade with IMPERIAL CHINA begins.

1833

The United States sends its first envoy to the court of Siam.

1833–1847

Thai-Vietnamese war after Rama III invades Cambodia to remove the Annamese (Vietnamese). Cambodia has a pro-Thai prince on the Khmer throne but continues to pay tribute to the Annamese emperor. When in midcentury France begins its imperial expansion in Vietnam, this mixed Cambodian behavior muddles Thai-Cambodian relations.

1850

Rama III's refusal to accept Western bullying angers the British and Americans, who threaten to take drastic measures against Siam.

1851–1868

King Mongkut, Rama IV (r. 1851–1868), lays the foundation of a modern Siam. PRESERVATION OF SIAM'S POLITICAL INDEPENDENCE is Mongkut's prime concern. He makes treaties with European nations and begins REFORMS AND MODERNIZATION IN SIAM.

1855–1868

Mongkut's aggressive diplomacy produces treaties with most of the world's powers. Assisted by SIR JOHN BOWRING (1792–1872), who initiates a treaty with Britain in 1855, Siam by the 1860s has treaties with the United States, France, Portugal, Denmark, The Netherlands, Germany, Sweden and Norway, Belgium, and Italy.

1868–1910

King Chulalongkorn, Rama V (r. 1868–1910), continues his predecessor's policy of instituting reforms: abolishing SLAVERY (1905), improving public welfare, and the reorganization of the administrative system. The royal princes, notably PRINCE DEWAWONGSE (1858–1923) and PRINCE DAMRONG (1862–1943), are instrumental in initiating, implementing, and ensuring that the various reforms are carried through to fruition.

1886–1907

Four times France demands Siamese territory. To avoid losing its independence completely, Siam

cedes large tracts of territory to France, including BATTAMBANG and SIEM REAP.

1893

The PAKNAM INCIDENT (1893) witnesses French imperialism over Siam. The Siamese give in to French demands and cede their tributary state of Laos on the left/east bank of the Mekong River. The French protectorate of LAOS is created.

1897

King Chulalongkorn becomes the first Siamese monarch to visit Europe. On his European tours (1897 and 1907) he attempts to promote friendly relations in hopes of arresting European IMPERIALISM in Siam and Indochina.

1898

Siam contracts a treaty with Meiji Japan.

1907

The French demand that Siam return BATTAMBANG and SIEM REAP to Cambodia. The two provinces come under Cambodian jurisdiction.

1909

British pressure sees the transfer of the SIAMESE MALAY STATES (KEDAH, PERLIS, KELANTAN, and TERENGGANU) to become protectorates of Britain. In return Siam is granted a preferential loan from Britain for railway construction.

1910–1925

Under King VAJIRAVUDH (RAMA VI) (r. 1910–1925), educational reform, including compulsory elementary education, begins. Penned by the king, “THE JEWS OF THE ORIENT” warns of the economic threat the Chinese pose to Siam; it fuels anti-Chinese feelings and heightens Siamese nationalist consciousness.

1917

22 July

Siam joins the Allied effort in the GREAT WAR (1914–1918). This is partly an attempt to increase Western awareness of Siam and in turn reduce European imperial influence.

1925–1935

KING PRAJADHIPOK (RAMA VII) (r. 1925–1935) oversees the conversion from absolute to constitutional monarchy. Prajadhipok abdicates in 1933, and his nephew, Ananda Mahidol (r. 1935–1946), ascends the throne in 1935.

1932

24 June

A CONSTITUTIONAL (BLOODLESS) REVOLUTION (1932) culminates in the replacement of the traditional absolutist monarchy with a constitutional king. PRIDI PHANOMYONG (1900–1983), a law professor, is instrumental in the revolution and drafts Siam’s constitution.

1939

FIELD MARSHAL PLAEK

PHIBUNSONGKHRAM (1897–1964) assumes the premiership. He effects the country’s name change: Siam adopts the name Thailand, meaning “Land of the Free,” emphasizing the country’s freedom from foreign domination, unlike neighboring territories throughout Southeast Asia.

1940–1941

Thailand demands that France return some of its Indochinese territories. France refuses, and fighting begins. With Japanese mediation, in May 1941, Thailand regains BATTAMBANG, SIEM REAP, CHAMPASSAK, and Lanchang.

1941

With the onset of the Pacific War (1941–1945), Thailand allies with Japan.

1941–1945

The JAPANESE OCCUPATION OF SOUTHEAST ASIA (1941–1945) witnesses several hardships and cruelties. Forced labor is utilized for the construction of the “DEATH RAILWAY” (BURMA–SIAM RAILWAY), where thousands of Thais, Malays, Chinese, and Allied prisoners of war (POWs) perish under extreme conditions.

1942

25 January

Thailand declares war against Britain and the United States. Because the Thai ambassador,

1512 Chronology

M. R. SENI PRAMOJ (1905–1997), refuses to serve the declaration of war to U.S. secretary of state Cordell Hull (t. 1933–1944), one perception is that Thailand is actually neutral. Instead, he heads the FREE THAI MOVEMENT in the United States.

1946

9 June

BHUMIBOL ADULYADEJ (r. 1946–) is recalled from his studies in Switzerland after Ananda Mahidol dies under mysterious circumstances.

16 December

Thailand becomes the 55th member of the United Nations.

1948–1957

Following a coup, FIELD MARSHAL PLAEK PHIBUNSONGKHRAM (1897–1964) assumes the premiership.

1950

After four years of regency, Bhumibol ascends the Chakri throne as Rama IX. He is the longest-ruling monarch in Thai history. His rule is largely ceremonial and his popularity is great. He is a spokesman for development projects and a stabilizing force in a turbulent political environment.

1951–1957

U.S. financial aid enables Thailand to achieve strong economic growth.

1952

The FIELD MARSHAL PLAEK PHIBUNSONGHRAM government proscribes the Communist Party of Thailand.

1955

Thailand joins the SOUTHEAST ASIA TREATY ORGANIZATION (SEATO) (1954). Other member nations are Australia, France, New Zealand, Pakistan (until 1972), the Philippines, the United Kingdom (U.K.), and the United States. This military organization is a response to the French defeat in Vietnam.

1957

Sarit Thanarat seizes power and becomes Thailand's prime minister. Unlike FIELD MARSHAL PLAEK PHIBUNSONGHRAM, who

distanced the government from the palace, Sarit Thanarat emphasizes close ties with the Thai monarch.

1963

FIELD MARSHAL THANOM

KITTIKACHORN (1911–) becomes prime minister of Thailand following Sarit's death.

1967

Thailand is one of the founding members of the ASSOCIATION OF SOUTHEAST ASIAN NATIONS (ASEAN) (1967).

1973

14 October

The STUDENT REVOLT (THAILAND), with huge street demonstrations in BANGKOK, overthrows the military government of FIELD MARSHAL THANOM KITTIKACHORN and Prapat Jarusathien. The revolt breaks the military hold on Thai politics.

1975

M. R. KUKRIT PRAMOJ (1911–1995) is prime minister from March 1975 to April 1976. SAIGON falls to the communists.

1976

M. R. SENI PRAMOJ (1905–1997) holds the premiership from April 1976 to 6 October 1976.

U.S. forces withdraw from Thailand.

1980

GENERAL PREM TINSULANOND (1920–) serves as prime minister until 1988.

1980s

Thailand becomes a leader in supplying the world's natural RUBBER.

1985–1995

Thailand's sustained growth rate of almost 9 percent per year is the highest in the world.

1988

Thailand elects its first prime minister since 1977, its first civilian since the 1975 coup.

1990s

With Japan, Singapore, and Hong Kong, Thailand is one of the leading economic successes during the first half of the decade.

1997–1998

In 1997 the baht crashes, bringing on the Asian Financial Crisis and economic downturn. The baht's lowest point comes in January 1998, when it drops to fifty-six to the U.S. dollar, far from the twenty-five to the dollar it enjoyed for years before the government floated it. The economy shrinks more than 10 percent.

1999–2000

Renewed economic growth is recorded at over 4 percent. Optimism is rife.

2000

King BHUMIBOL ADULYADEJ (r. 1946–) becomes the longest-reigning monarch in the world.

The Bangkok Sky Rail opens. However, much of the construction begun during the boom of the early 1990s remains either unfinished or empty.

2001

The economic growth rate slows to 1.4 percent because of poor performance in the financial sector, tardy corporate debt restructuring, and a generally weak world economy.

December

King BHUMIBOL ADULYADEJ (r. 1946–) publicly criticizes Prime Minister Thaksin Shinawatra and his government for favoring certain quarters over others.

2002**April**

Talks are held between Thailand and Myanmar over the issues of border tensions and the smuggling of illegal drugs.

October

Cabinet reshuffle is undertaken by Prime Minister Thaksin Shinawatra with the appointment of six additional ministers to head newly created ministries consequent of reforms of the government bureaucracy.

2003

Major Thai industries include tourism, textiles, light manufacturing, and agricultural processing. Thailand remains the world's second-largest producer and exporter of tungsten, and third largest for tin.

2004**January**

A spate of bombings, arson of schools, and several killings allegedly by Muslim separatist groups lead to the declaration of military rule in three provinces of southern Thailand, namely Yala, Narathiwat, and Pattani. MUSLIM MINORITIES (THAILAND) have long resented the Buddhist-dominated central government at BANGKOK; they advocate for greater autonomy, if not outright cession.

February

An avian influenza adversely impacts Thailand's poultry industry. Culling of chickens by the tens of thousands is undertaken. By mid-February, six persons succumb to the virus.

IV. INDONESIA INCLUDING EAST MALAYSIA, BRUNEI, AND EAST TIMOR

1 million–500,000 B.C.E.

“JAVA MAN” (*Homo [Pithecanthropus] erectus*) is reputed to be the first human fossil discovery in Southeast Asia from the Lower Pleistocene period. It is estimated to be from 500,000 to 1 million years old. This find in Trinil, East Java, by Eugene Dubois in 1891 offers a glimpse into Indonesia's past when the archipelago was a part of the Asian mainland.

100,000 B.C.E.

“SOLO MAN” (*Homo sapiens soloensis*) refers to fossilized human skeletal remains uncovered in Sambungmacan and Ngandong. They are believed to be from the Upper Pleistocene period of about 100,000 years ago.

40,000 B.C.E.

The NIAH CAVES (SARAWAK) offer the longest sequence of early human existence in Southeast Asia, ranging from the oldest artifact, from 40,000 years ago, to more recent findings from some 2,000 years ago.

1514 Chronology

3000–500 B.C.E.

Ice melts and raises the sea level, creating islands—the Indonesian archipelago. Indonesia’s population is a mix of Asian migrants intermarried with indigenes.

1000 B.C.E.

Intermingling of Indonesia’s inhabitants with migrants from the Indian subcontinent.

78 C.E.

Indian prince Aji Caka introduces the Sanskrit language and Pallawa script to Indonesia. The language incorporates Javanese words and phrases. Indonesia and South India possess a trading relationship. SUMATRA is known as SUVARNABHUMI (LAND OF GOLD), whereas JAVA is the “rice island.” There is cultural and diplomatic intercourse between Indonesia and INDIA.

1st–2nd centuries

HINDUISM and Indian BUDDHISM, both THERAVADA BUDDHISM and MAHAYANA BUDDHISM, spread to the Indonesian archipelago. The HINDU–BUDDHIST PERIOD OF SOUTHEAST ASIA witnesses the establishment of Indianized kingdoms, Buddhist centers of scholarship, and flourishing monumental art as exhibited in palaces and temples: MALANG TEMPLES, PRAMBANAN, BLITAR, and BOROBUDUR.

1st–7th centuries

INDIAN IMMIGRANTS, mainly Brahmins and some merchants, settle in various places throughout the archipelago, largely in SUMATRA and JAVA. Javanese at all levels incorporate HINDUISM, but the other islands maintain their original beliefs—except for the upper classes, which embrace HINDUISM. The INDIANIZATION process influences virtually all aspects of living, including intellectual discourse, philosophy, culture, and religion. Concepts of kingship impact on INDIGENOUS POLITICAL POWER.

Native rulers adopt HINDUISM and/or BUDDHISM, as well as accepting the cultures associated with those religions, incorporating them with local culture.

132 C.E.

JAVA and IMPERIAL CHINA establish diplomatic relations.

400 C.E.

Inscriptions at KUTAI (KOETEI) show Indian influence. East Sumatran polities are influential on the western coast of BORNEO.

413–414 C.E.

The Chinese Buddhist traveler Fa Hsien, on a pilgrimage to India, encounters a storm and lands on JAVA. There he finds an Indonesian Hindu culture. Similarly, indigenous Hindus rule BORNEO.

ca. 670 C.E.

ŚRIVIJAYA (ŚRIWIJAYA), with its center in present-day PALEMBANG, is established, gaining increasing popularity among Indian and Chinese traders.

671 C.E.

I-CHING (635–713 C.E.), Chinese Buddhist pilgrim on his voyage to India, visits ŚRIVIJAYA.

689 C.E.

ŚRIVIJAYA, is a major center of Buddhist learning, with strong links to INDIA. Its influence spreads throughout the archipelago as BUDDHISM gains in popularity.

8th–9th centuries

SAILENDRAS, translated as “King of the Mountain,” refers to a dynasty of Buddhist kings who rule the kingdom of MATARAM in Central JAVA.

778–824

SAILENDRAS rulers build BOROBUDUR.

991–1007

King Dharmavamsa (r. 991–1007) codifies laws and translates Hindu works into Javanese.

1006

ŚRIVIJAYA defeats Buddhist MATARAM.

1019–1049

AIRLANGGA (r. 1019–1049) rules over the greater part of East JAVA.

1025

The Cholas from INDIA invade and occupy SRIVIJAYA from 1026 to 1045.

1042

Airlangga divides MATARAM into Janggala and KADIRI (KEDIRI).

1135–1157

King Jayabhaya (r. 1135–1157) of KADIRI prophesies in his book that Indonesia will fall under the rule of first a white and then a yellow race before regaining its independence. This prophecy seemingly comes to pass with Dutch colonial rule, then the Japanese wartime occupation, followed by postwar independence.

1222–1293

SINGHASARI represents the first attempt at creating an empire in JAVA.

1290

KERTANAGARA (r. 1268–1292) defeats SRIVIJAYA.

1293

YUAN (MONGOL) DYNASTY (1271–1368) launches an assault on SINGHASARI.

13th century

Trade contacts are established between Persians and GUJARATIS with north Sumatran ports. These Muslim traders bring Islam to Southeast Asia. Largely through merchants and some missionaries, Islam spreads throughout the *PASISIR*, coastal regions of SUMATRA, and JAVA. Muslim city-ports flourish; Muslim sultans become politically ambitious. ISLAM IN SOUTHEAST ASIA begins to spread and flourish, particularly throughout the Malay Archipelago (present-day INDONESIA and MALAYSIA).

The Indianized kingdoms in the interior of JAVA, such as MAJAPAHIT (1293–ca. 1520s) and MATARAM, hold on to HINDUISM and Hindu traditions. BALI too remains steadfast to HINDUISM.

1293–ca. 1520s

The process of empire building culminates in MAJAPAHIT (1293–ca. 1520s), reputedly the greatest and last of the Indianized states in insular Southeast Asia. Under the ambitious and

able GAJAH MADA (t. 1331–1364) as grand vizier, the control of all *NUSANTARA*—lands beyond Java, the entire Indonesian archipelago—comes under MAJAPAHIT's rule.

14th century

Negaradipa, an Indianized kingdom, is established in the hinterland of present-day Bandjarmasin sometime in the mid-fourteenth century.

Early 15th century

The Malay Muslim sultanate of MELAKA emerges and strategically commands the East–West trade route through the international sea route—the STRAITS OF MELAKA.

1479

Raden Patah (r. 1479–1513) proclaims DEMAK an Islamic kingdom. DEMAK develops into a major Muslim power on JAVA and southern BORNEO with close ties with PALEMBANG.

Late 15th century

Muslim Malay BRUNEI principality begins to develop in northeastern Borneo.

16th century

Javanese *PASISIR* Muslim states claim sovereignty over south BORNEO. DEMAK exerts strong influence over Negaradipa.

1511

The Portuguese, having defeated the Muslim kingdom of MELAKA, arrive in Indonesia seeking SPICES AND THE SPICE TRADE. Their erstwhile rivals, the Spaniards, also attempt to corner the lucrative trade in spices. Both propagate CATHOLICISM. The Portuguese are successful in MALUKU (THE MOLUCCAS), where they receive a warm welcome. They maintain this spice trade for close to a century. However, their hold begins to decline when they try to monopolize the trade in cloves and nutmeg, and because of their general contempt for local practices and customs.

1512

The Dutch presence in Indonesia begins. Individual Dutch traders undertake trade in spices with local rulers.

1516 Chronology

ca. 1520

The Portuguese conduct trade in sandalwood with TIMOR. They set up a trading post in the area of Oekusi.

1521

The Portuguese visit BORNEO. Shortly afterward, the Spanish begin trading with BRUNEI.

1526

The Muslim kingdom of BANTEN (1526–1813), a PEPPER port, flourishes after the fall of MELAKA to the Portuguese. Likewise, many Muslim traders shift to ACEH, the SULTANATE of BANDJARMASIN, and BRUNEI.

1527

Muslim forces from DEMAK capture the capital of West JAVA, Sunda Kelapa. A Portuguese attempt to take the city is foiled.

1530

Pangeran Samudra, ruler of Negaradipa, embraces Islam with a new title, Sultan Surian Allah. It marks the beginning of the SULTANATE OF BANDJARMASIN.

The sultanate of BRUNEI exercises control over the coasts of northern and northeastern BORNEO, and SULU AND THE SULU ARCHIPELAGO of the southern Philippines. Eventually, BRUNEI declines owing to sustained royal succession problems, PIRACY, and the expansion of European COLONIALISM. BRUNEI from the late seventeenth century struggles to meet challenges from European adventurers and colonizers.

1561

Portuguese Dominican monks build a fortress on Solor Island, TIMOR.

Late 16th century

Contemporaneous with Malay MELAKA is ACEH (ACHEH), a Muslim polity in northern SUMATRA. Sultan Ali Mughayat Shah (r. 1496–1530) strengthens ACEH as a power in the STRAITS OF MELAKA.

MATARAM embraces Islam.

17th–19th centuries

The British and Dutch try to take over BORNEO's trade, especially in PEPPER.

1600

ENGLISH EAST INDIA COMPANY (EIC) is established to oversee trade and commerce in South, Southeast, and East Asia.

1602

The VEREENIGDE OOST-INDISCHE COMPAGNIE (VOC) ([DUTCH] UNITED EAST INDIA COMPANY) (1602) is set up to trade in Indonesian spices. This amalgamation of all the individual Dutch trading community seeks to maximize business efficiency, and hence profits. Dutch warships protect the merchant fleets from PIRACY.

BRITISH INTERESTS IN SOUTHEAST ASIA are based at BANTEN (BANTAM).

1605

The Dutch capture Ambon, one of the more important islands in MALUKU (THE MOLUCCAS).

1607–1636

ACEH reaches the zenith of its power during the reign of SULTAN ISKANDAR MUDA (MAHKOTA ALAM) (r. 1607–1636). ACEH dominates large parts of SUMATRA and the Malay Peninsula, including the JOHOR-RIAU EMPIRE. PEPPER is ACEH's economic mainstay. As a center for Islamic teaching and learning, ACEH attracts well-known Sufi scholars such as HAMZAH FANSURI, SHAMSUDDIN AL-SUMATRANI (d. 1630), and NURUDDIN AL-RANIRI (d. 1658).

1610–1630

Muslim MATARAM and the VOC struggle for political and economic ascendancy.

1613

The Dominican fort on Solo Island, TIMOR, is converted into a trading post of the VOC.

Through an agreement, the ruler of Kupang allows the VOC to build a fortress in Kupang, as well as to station a battalion-strong garrison there.

EIC opens a factory at Makassar dealing in textiles via BANTEN. The Portuguese deal in sandalwood from MACAU (MACAO) via

Makassar to the producing areas of TIMOR and Solor. At the same time the Portuguese also trade in textiles from India's Coromandel Coast via MELAKA to Makassar. The BUGIS (BUGINESE) of Makassar profit from intercourse with the Portuguese and English. Apart from this the BUGIS trade with the spice archipelago of MALUKU. Makassar's prosperity brings enmity with the VOC.

1613–1645

SULTAN AGUNG (r. 1613–1645) is the greatest ruler of Muslim MATARAM. From his base in Central JAVA, he expands MATARAM's hegemony over most of Java. A formidable opponent is the Dutch.

1616–1669

BUGIS–VOC struggle. Makassar falls to the Dutch in 1669. Many BUGIS who refuse to bow to Dutch control flee. The Bugis diaspora extends westward to JOHOR, where they play influential political roles.

1619

The Dutch expel the Muslim ruler of Sunda Kelapa. Establishing the city-port as their base, they later rename it BATAVIA (SUNDA KELAPA, JACATRA, DJAKARTA/JAKARTA). From this base, JAN PIETERSZOOM COEN (1587–1629) builds the NETHERLANDS (DUTCH) EAST INDIES.

1620s

After dividing the Indonesian island kingdoms, the Dutch destroy interisland and international commerce, making Indonesian agriculture a supplier to European markets through Dutch traders. They also act as middlemen in the China-Indonesia trade, replacing it with Dutch-dominated trade.

1623

The Dutch take Banda Island. The AMBON MASSACRE (1623) hastens the British withdrawal from Indonesia to focus on the Indian subcontinent.

1625

Dutch destruction of the clove plantations on Huwanmohel generates strong dislike, culminating in the uprising of 1635 and a

guerrilla war lasting until 1646. The Dutch reconstitute the clove plantations on Ambon and the Uliasers.

1629

The Dutch at BATAVIA repulse SULTAN AGUNG's forces.

1641

TIMOR is partitioned into spheres of influence: the Dutch in the West, the Portuguese in the East.

The Dutch acquire MELAKA after defeating the Portuguese. JOHOR assists the Dutch against the Portuguese. By then MELAKA has lost much of its advantage as a preeminent port-of-call; silting affects the once-deep harbor, and patronage by Muslim traders dwindles after the Portuguese takeover in 1511. Dutch interests, on the other hand, focus on BATAVIA and hegemony over the Indonesian archipelago.

Mid-17th century

To control the production of cloves, the Dutch annually check their islands for illegal trees or for evidence of smuggling, utilizing armed patrol boats. Such operations are referred to as *hongji* expeditions.

1650

With the market saturated and no outlet for non-VOC cloves, native growers and pirates rise against the Dutch, generating an unstable situation until late in the century. Eventually the Ambonese become loyal to the Dutch Crown, later fighting for the Dutch in wars in Indonesia and against the Japanese.

ca. 1665

The English reach BORNEO.

1674–1680

Prince Trunajaya (Trunojoyo) of MADURA begins a major uprising against AMANGKURAT I (1646–1677). The VOC assists the latter.

1677

AMANGKURAT II (ADIPATI ANOM) (r. 1677–1703) signs a treaty with the VOC. With VOC support, the Trunajaya uprising is crushed in 1681.

1518 Chronology

1685

The British establish an outpost at BENGKULU (BENCOOLEN, BENKULEN), on the western coast of Sumatra.

1704–1705

With Dutch support, Pangeran Puger ousts Amangkurat III (r. 1703–1704). As Paku Buwana I (r. 1704–1719), the victorious Puger signs a treaty with the Dutch. It marks the loss of MATARAM's sovereignty.

1704–1755

In a series of JAVANESE WARS OF SUCCESSION (1677–1707, 1719–1722, 1749–1755), MATARAM is weakened until finally it is divided into two kingdoms. Dutch intervention in supporting one contentious party against its foe results in the strengthening of Dutch power in JAVA.

1740

The Dutch crush a rebellion of Chinese and native Indonesians in BATAVIA. Ten thousand Chinese die.

ca. 1750s

CHINESE GOLD-MINING COMMUNITIES IN WESTERN BORNEO exist as independent, self-governing polities described as an *imperium in imperio*.

1755

The Third Javanese War of Succession (1749–1755) concludes with the division of MATARAM: the eastern half with its capital at SURAKARTA under Pakubuwono III and the western part with its center at YOGYAKARTA (JOGJAKARTA) under Mangku Bumi (as Sultan Amangku Buwono).

1762

EIC has an outpost on Balambangan Island, off northeast BORNEO. It lasts less than a year, owing to pirates. It is reestablished in 1773–1775 and 1803–1805.

1775

BRUNEI offers LABUAN (1847) to the EIC in return for protection against Sulu PIRACY. This offer is repeated in 1803.

1798–1799

The Dutch government nationalizes the VOC. The Dutch administration in BATAVIA takes over all company territories in Indonesia after the VOC drops into bankruptcy because of mismanagement and corruption.

19th century

Significant anti-Dutch revolts occur in Indonesia (1821–1837, 1825–1830, and 1873–1903).

Throughout the nineteenth century, the Dutch acquire large territories from rulers on the south and west coasts of BORNEO but have little influence in the interior.

ca. 1803

The PADRI MOVEMENT, a revivalist Islamic movement, seeks to bring Muslims to the true teachings of the faith. Beginning in the MINANGKABAU region of West SUMATRA, its influence spreads to some territories of the BATAKS.

1803–1815

The NAPOLEONIC WARS IN ASIA witness the EIC assuming control over Dutch territories in Indonesia. MELAKA in the Malay Peninsula and JAVA come under EIC administration. SIR (THOMAS) STAMFORD BINGLEY RAFFLES (1781–1826), during his tenure as lieutenant governor of JAVA (t. 1811–1816), abolishes the slave trade, allows limited self-government, and replaces the Dutch forced-agriculture system with a more palatable land-tenure system. Possessing a keen interest in the Malay Archipelago, RAFFLES undertakes research on JAVA's history and oversees the restoration of temples and other monuments.

1821–1837

Members of the PADRI MOVEMENT almost massacre the Minangkabau royal family. Taking the side of the latter, the Dutch launch an offensive against the PADRI MOVEMENT, erupting into the full-scale PADRI WARS (1821–1837).

1825–1830

The JAVA WAR (1825–1830) is financially devastating for the Dutch government. DIPONEGORO (PANGERAN DIPANEGARA) (ca. 1785–1855), the prince from the royal house of YOGYAKARTA who

heads the revolt, is known by the populace as the *RATU ADIL* (RIGHTEOUS KING/PRINCE).

1830–1870s

The Dutch introduce the CULTIVATION SYSTEM (*CULTUURSTELSEL*) in JAVA, whereby agricultural produce is cultivated for export as a source of income. It proves successful. Despite safeguards devised by the initiator, COUNT JOHANNES VAN DEN BOSCH (1780–1844), abuses set in, overshadowing the overall positive outcome.

1839–1841

JAMES BROOKE AND SARAWAK is the romantic tale of an English gentleman-adventurer who assists the sultan of BRUNEI in ending a rebellion. In return, Brooke becomes raja of Sarawak in 1841.

1847

BRUNEI finally cedes LABUAN to Britain; the island becomes a Crown colony. ANGLO-BRUNEI RELATIONS are established on a firm footing.

1853

Brooke and his heirs—SIR CHARLES ANTHONI JOHNSON BROOKE (1829–1917) and Charles Vyner Brooke (r. 1917–1941, 1946)—enlarge Sarawak at the expense of BRUNEI.

1854

The Dutch destroy CHINESE GOLD-MINING COMMUNITIES IN WESTERN BORNEO. The Chinese switch to farming and trading. Some flee across the border to Sarawak, where they settle as farmers.

1860

Eduard Douwes Dekker (1820–1887), under the pseudonym Multatuli, publishes the novel *Max Havelaar of de koffieveilingen der Nederlandsche Handelmaatschappij* [*Max Havelaar or the Coffee Auctions of the Dutch Trading Company*]. *MAX HAVELAAR* (1860) is a semiautobiographical novel, and Dekker draws from firsthand experience as a civil servant in the Dutch colonial administration to expose the myriad baneful effects of the CULTIVATION SYSTEM on the Javanese peasantry. The book

creates debate and controversy among the Dutch public regarding Indonesia.

1870s

Demise of the CULTIVATION SYSTEM in Indonesia.

1873–1903

ACEH (ACHEH) WARS (1873–1903) cost the Dutch more than 10,000 men besides a heavy financial burden as the Acehnese staunchly resist the erosion of their independence.

1879

Birth of RADEN AJENG KARTINI (1879–1904), regarded as a forerunner in Indonesian nationalism, is an advocate of women's rights and female education and careers.

1881

A royal charter is granted to the BRITISH NORTH BORNEO CHARTERED COMPANY (1881–1946) to undertake the administration of a territory known as North Borneo on the northeastern corner of the island of BORNEO. Acquired from both the sultanates of BRUNEI and Sulu, North Borneo is rumored to possess rich mineral resources, but in reality timber is the only viable export besides plantation agriculture (TOBACCO in the nineteenth century and RUBBER in the twentieth).

1888

SARAWAK AND SABAH (NORTH BORNEO), together with BRUNEI, are made British protectorates. The three territories constitute BRITISH BORNEO.

1900

The Dutch colonial administration in Indonesia adopts the ETHICAL POLICY (*ETHISCHE POLITIEK*).

1904

RADEN AJENG KARTINI (1879–1904) enters Indonesia's pantheon of national heroes by presidential decree in 1963, fifty-nine years after her death in the Dutch colony then known as the NETHERLANDS (DUTCH) EAST INDIES. In her homeland today, KARTINI is honored rather than studied. Republican

1520 Chronology

Indonesia shed KARTINI's inherited titles, Raden Ajeng, in favor of *Ibu* (mother), and imprinted her on the national consciousness as a nationalist and patriot.

1905

With the transfer of Lawas to Sarawak, the final boundaries of BORNEO are defined. Sarawak under the Brookes, North Borneo administered by the BRITISH BORNEO CHARTERED COMPANY, the Malay sultanate of BRUNEI, and the remainder of the island constitute DUTCH BORNEO.

1906–1908

After the early 1840s many areas of BALI come under Dutch control. Badung and Klungkung hold on to their independence. In September 1906 the Dutch send an expeditionary force to Badung. More than 3,000 Balinese commit *puputan*, or ritual suicide. Similarly, in Klungkung two years later, *puputan* is again committed.

1908

BOEDI OETAMA (BUDI UTOMO) (1908) is Indonesia's first significant political association. Its name means "high endeavor." It attempts to strengthen and rejuvenate Javanese aristocratic culture and emphasize educational pursuits.

1912

SAREKAT ISLAM (1912) is the first mass nationalist organization in Indonesia. It has a huge following, particularly in JAVA.

1913

The Dutch acquire West TIMOR; East TIMOR remains under Portuguese colonial rule.

1920

The PARTAI KOMUNIS INDONESIA (PKI) (1920), or the Communist Party of Indonesia, is established.

1926–1927

Dutch colonial authorities crush a PKI uprising. Many PKI members and sympathizers are killed or imprisoned; others go underground or flee abroad.

1927

The PERSERIKATAN NASIONAL INDONESIA (PNI) (1927) is set up by a group of Indonesian elites who place nationalism as the dominant ideological principle. They organize their struggle around SOEKARNO (SUKARNO) (1901–1970).

1930s

Under the leadership of PNI and the charismatic and consummate orator SOEKARNO, Indonesian nationalism gains momentum.

1942–1945

The JAPANESE OCCUPATION OF SOUTHEAST ASIA (1941–1945) includes the NETHERLANDS (DUTCH) EAST INDIES (present-day Indonesia) and BRITISH BORNEO. During the Japanese occupation, Indonesians carry arms for the first time. BATAVIA is renamed Jakarta. While SOEKARNO and MOHAMMAD HATTA (1902–1980) work with the Japanese but pursue nationalist objectives, SUTAN SJAHRIR (1909–1966) heads an underground resistance movement.

1945

17 August

SOEKARNO proclaims the independence of Indonesia. He assumes the presidency and MOHAMMAD HATTA the vice presidency of the Republic of Indonesia.

One of the most notorious Japanese atrocities of the Pacific War is the SANDAKAN DEATH MARCH. Of some 1,300 Australian prisoners of war, only six survive.

1945–1949

The INDONESIAN REVOLUTION (1945–1949) witnesses the armed clash between republican forces and the returned Dutch colonial government.

1946

SARAWAK AND SABAH (NORTH BORNEO) are declared British Crown colonies. Brunei remains a British protectorate.

A section of the Malay community of Sarawak opposes the cession of Sarawak to Britain. The anticeSSION movement loses its momentum following the assassination of the British governor by a young Malay in Sibu.

1947–1948

Despite the conclusion of agreements and cease-fires—the LINGGADJATI (LINGGAJATI) AGREEMENT (1947) and RENVILLE AGREEMENT (JANUARY 1948)—fighting continues between the Dutch and republican forces. The DUTCH POLICE ACTION (FIRST AND SECOND) takes place in July 1947 and December 1948.

1949**December**

The Dutch, under pressure from the United Nations, recognize an independent Indonesia. This is one of the earliest tests for the UNITED NATIONS AND CONFLICT RESOLUTION IN SOUTHEAST ASIA.

1949–1955

Political instability in Indonesia, with frequent turnover of prime ministers and changes in form of government.

1950

The Republic of Indonesia as a unitary state is born.

DUTCH BORNEO becomes part of Indonesia; it reverts to its ancient name, Kalimantan.

1955

Indonesia holds its first and only general election.

April

In hosting the ASIAN-AFRICAN (BANDUNG) CONFERENCE (APRIL 1955), SOEKARNO and Indonesia gain much political mileage on the international stage. The Bandung meeting initiates cooperation among countries of the Third World and the creation of the Non-Aligned Movement. The NON-ALIGNED MOVEMENT (NAM) AND SOUTHEAST ASIA seek to distance the region from the COLD WAR.

1957–1959

SOEKARNO voids the 1950 Constitution, advocating the return of the 1945 version under which he balances the communist party, the army, and himself. He introduces GUIDED DEMOCRACY (*DEMOKRASI TERPIMPIN*) in an attempt to strengthen his position as president.

1960s

SOEKARNO increasingly tilts to the left while trying to lead the Third World. There is economic decline, along with intense struggle and open, armed clashes between noncommunists (backed by the army) and communists (the resuscitated PKI).

1961

The MALAYSIA (1963) proposal is mooted by Malaya's prime minister, TUNKU ABDUL RAHMAN PUTRA AL-HAJ (1903–1990). Its goal is containing COMMUNISM, balancing the ethnic ratio, and facilitating independence from Britain for the Crown colonies of SARAWAK AND SABAH and SINGAPORE.

1962**December**

The PARTAI RAKYAT BRUNEI (PRB) launches the BRUNEI REBELLION (DECEMBER 1962). The PRB is led by SHEIKH AZAHARI BIN SHEIKH MAHMUD (1928–2002). In opposing Brunei's participation in Malaysia (1963), the PRB seeks to establish Kalimantan Utara, a proposed federation of Brunei, Sabah, and Sarawak. British Gurkha troops from Singapore rapidly suppress the uprising upon the request of OMAR ALI SAIFUDDIN III, SULTAN OF BRUNEI (1914–1986). PRB leaders flee abroad, seeking political asylum. SHEIKH AZAHARI BIN SHEIKH MAHMUD lives for many years in Jakarta.

1963

SARAWAK AND SABAH join the Federation of MALAYSIA with Malaya and Singapore. Indonesia strongly objects, labeling "Malaysia" a neocolony of Britain. Soekarno launches KONFRONTASI ("CRUSH MALAYSIA" CAMPAIGN).

1964

The Indonesian army conducts guerrilla raids into Sarawak, and several parachute forces land in Johor. Intrusions and small-scale skirmishes continue until August 1966.

1965**1 October**

The GESTAPU AFFAIR (1965) is a coup attempt, but there is uncertainty over who are the "real"

1522 Chronology

perpetrators: the communists, or the army, or both. The coup kills seven generals and between 300,000 and 500,000 communists and sympathizers. The coup is thwarted by General SUHARTO (1921–) and the army, who blame it on the PKI. Acting on this pretext, a horrendous purge of communists is undertaken.

1966–1998

The *ORDE BARU* (THE NEW ORDER) is officially dated 11 March 1966, when SUHARTO takes the reins of power from the deposed SOEKARNO. It represents a political and social system ordered around authoritarian corporatism.

1967

Indonesia, together with Singapore, Malaysia, the Philippines and Thailand, forms the ASSOCIATION OF SOUTHEAST ASIAN NATIONS (ASEAN) (1967) to promote greater cooperation.

HASSANAL BOLKIAH, SULTAN OF BRUNEI (1946–), ascends the throne when his father, OMAR ALI SAIFUDDIN III, retires.

1968

SUHARTO formally assumes the presidency of Indonesia. He realigns his foreign policy toward the Western democracies and shifts priorities, emphasizing economic development. Indonesia becomes a major producer of natural RUBBER for the first time.

1971

The first general election is held during SUHARTO's presidency. With political parties banned at the village level, SUHARTO's GOLKAR, or Functional Groups, win 62 percent of the vote against ten other parties. *ORDE BARU* is under way. GOLKAR holds elections once every five years but allows no real opposition for the next twenty-five years.

1974

Students protest against Japanese investments.

1975

28 November

FRETILIN (FRENTE REVOLUCIONÁRIA DO TIMOR-LESTE INDEPENDENTE) declares the independence of East Timor after seizing power.

7 December

The Indonesian army undertakes a suppression of this nationalist uprising in Dili, East TIMOR. FRETILIN conducts a protracted guerrilla struggle for independence from Indonesia.

1975–1976

The PERTAMINA CRISIS (1975–1976) reveals massive corruption in Indonesia's biggest government-owned company, PT Pertamina (Perusahaan Pertambangan Minyak dan Gas Bumi Negara).

1976

July

East TIMOR is incorporated as the twenty-seventh province of Indonesia.

1978

Students protest against SUHARTO's running for a second presidential term. The movement is crushed, leaders arrested, newspapers and magazines closed. With opposition ended and the army fully involved in the running of the country, the state protects businesses, including those belonging to ethnic Chinese, as economic growth soars. State-sheltered or ersatz capitalism creates racial tension from within and bitterness from without.

1984

Brunei gains independence from Britain. Because of the flourishing BRUNEI OIL AND GAS INDUSTRY, the country possesses one of the highest per capita GDPs in the undeveloped world.

1991

Massacre of civilians at Dili, East TIMOR, by Indonesia's military in an effort to clamp down on dissent.

1997

The Asian Financial Crisis (1997–1998) sweeps across Southeast Asia. In Indonesia, the deteriorating economic situation with the dramatic devaluation of the *rupiah* turns into a political crisis when SUHARTO decides to run for his seventh term in March 1998.

31 March

In Warton, England, at the Hawk fighter jet factory, four East Timorese are arrested for

protesting. The Hawk is the jet used by the Indonesian air force in East TIMOR.

12 May

Four university students are slain after a peaceful demonstration. Massive riots occur in six Indonesian cities, 13–15 May, with street demonstrations of hundreds of thousands of students and others.

1998

Instead of going for his seventh term, SUHARTO steps down, handing over the presidency to B. J. Habibie (1936–), the vice-president. President Habibie (t. 1998–1999) faces independence movements in Ambon, East TIMOR, Kalimantan, and IRIAN JAYA.

1999

East TIMOR votes overwhelmingly for independence. Militias believed to be Indonesian army-sponsored rampage through the country. General disturbance leads to the introduction of a United Nations and Australian peacekeeping force. Eventually East TIMOR separates, and the government and army of Indonesia change hands.

7 June

In the new Indonesian general election, 48 parties compete for 462 seats, with 38 seats retained for the military. This, the first contested election since 1965, sees the Indonesian Democratic Party of Struggle (Partai Demokratik Indonesia [PDI] Perjuangan) of Megawati Sukarno Putri (1947–) win 35 percent of seats but fail to attain the presidency or the post of speaker. Abdulrahman Wahid (1940–), a traditionalist *KIAI*, becomes the fourth president of the Republic of Indonesia (t. 1999–2001). Megawati, daughter of SOEKARNO, settles for the vice presidency.

2000

Abu Sayyaf, a MORO NATIONAL LIBERATION FRONT (MNLF) faction, kidnaps twenty-one Western tourists and Malaysian resort workers from Sipadan Island, off Sabah. They are taken as hostages to Jolo Island. Protracted negotiations secure the release of the hostages; it is unclear whether any ransom money is paid or political demands are met as a precondition for the freeing of the hostages.

2001

23 July

Indonesia's relations with Australia are tense; the economy is in bad condition. Abdulrahman Wahid gives way in favor of his vice-president, Megawati Sukarnoputri. She faces immediate problems in ACEH and IRIAN JAYA.

22 September

The KUTAI (KOETEI) monarchy returns. The Indonesian government recognizes as a largely ceremonial ruler the eldest son of the last ruling sultan. The new monarch is Sultan Haji Aji Mohammad Salehuddin II.

5–6 November

Bandar Seri Begawan plays host to the ASEAN+3 meeting. The ASSOCIATION OF SOUTHEAST ASIAN NATIONS holds its annual summit, to which three East Asian nations are invited to attend: People's Republic of China (PRC), Japan, and the Republic of Korea (South Korea). This event witnesses an ASEAN-PRC free trade agreement; it also further enhances ties between them.

20 December

A ten-point agreement is signed between opposing factions of Muslims and Christians in Central SULAWESI (CELEBES), aimed at ending the religious strife that has been going on since 1998.

2002

January

IRIAN JAYA assumes the official name of Papua following the granting of autonomous status to this province by the Indonesian government.

12 February

The signing of a peace agreement ends three years of Christian-Muslim clashes in MALUKU.

March

"Tommy" Mandala Suharto, son of former president SUHARTO, is charged with the murder of Syafiuddin Kartasmita in July 2001. Kartasmita was the presiding judge who upheld "Tommy's" prison sentence of corruption. He also faces a charge for illegal possession of firearms. For both capital offenses, as well as for fleeing from justice, he is given a fifteen-year prison term.

1524 Chronology

Akbar Tandjung, leader of GOLKAR and speaker of the Majelis Permusyawaratan Rakjat (MPR, People's Deliberative Council), is held on corruption charges.

East TIMOR promulgates its inaugural constitution.

April

After most parties sign the Malino Peace Accord in March, the radical Islamists reject the pact. A roused Muslim crowd kills twenty-one people in a massacre in Ambon. Religious unrest and disharmony persist.

May

In the fight against terrorism, Indonesia, Malaysia, and the Philippines embark on a trilateral pact whereby they agree to the sharing of intelligence and joint police operations to eradicate terrorism and terrorist organizations in Southeast Asia.

The Indonesian government holds talks with the Gerakan Aceh Merdeka (GAM, Free Aceh Movement) in Geneva, Switzerland.

The KUALA LUMPUR (KL) meeting of ASEAN ministers (of home and security affairs) on terrorism declare in a joint statement ASEAN's commitment to eradicating terrorism in the region.

August

East TIMOR gains independence following elections held under UN auspices. José Alexandre "Kay Rala Xanana" Gusmão, former FRETILIN leader, is unanimously the choice for president.

The MPR approves fourteen amendments to the 1945 Constitution. Inter alia, provisions allow for direct presidential and vice presidential elections from 2004, and the removal of thirty-eight parliamentary seats hitherto reserved for military appointees.

September

Sentenced to a three-year prison term for corruption, Akbar Tandjung launches an appeal. Despite his conviction, he remains the speaker for the MPR.

East TIMOR becomes the 191st member of the United Nations.

12 October

Terror comes to BALI when a bomb explodes, killing 202 foreign holiday-makers, mainly Australians.

2003

March–April

Indonesian Muslims, led by President Megawati Sukarnoputri, protest the unilateral invasion of Iraq by the United States.

June–July

Trial of suspects involved in the BALI bombing.

V. MALAYSIA AND SINGAPORE

ca. 9000 B.C.E.

"PERAK MAN" is discovered in Lenggong, central Perak, West Malaysia.

1st century C.E.

Malaysia's predecessor states become important to international trade. INDIA's two main sources of GOLD at the time are the Roman Empire and IMPERIAL CHINA. Huns cut the overland route from China at about the same time that Emperor Vespasian (r. 69–79) ends GOLD shipments to INDIA. Seeking alternative sources, INDIA sends ships to Southeast Asia, including the Malay Peninsula (West/Peninsular Malaysia), known to them as SUVARNABHUMI (LAND OF GOLD). Not finding GOLD, the Indians find TIN instead. For centuries thereafter the tin of Malaya (West Malaysia and Singapore) circulates through the Indian Ocean trade, and Malaya flourishes economically. Malay ships sail to the Middle East, INDIA, and IMPERIAL CHINA, carrying spices and tropical woods, and Malay ports transship the goods of their Southeast Asian partners. SPICES AND THE SPICE TRADE have long been the economic mainstay of the Malay Archipelago (present-day Indonesia and Malaysia). For the region known as MALAYSIA (from 1963), there is also a resulting Indian influence—INDIANIZATION—in culture, politics, religion, and the economy.

3rd century C.E.

SINGAPORE (1819) is referenced in a third-century Chinese account as the "island at the end of a peninsula."

4th century C.E.

Sanskrit inscriptions as well as Hindu and Buddhist images in Kedah point to a possible trading outpost with shipping links to INDIA.

7th century C.E.

Panhang is the Arab reference to present-day PAHANG. The Chinese call it Peng-Feng or Peng Keng. TIN in the Lembing valley is PAHANG's asset.

9th–13th centuries

ŚRIVIJAYA (ŚRIWIJAYA), an early Buddhist Malay kingdom centered in present-day PALEMBANG, SUMATRA, is the dominant power on the Malay Peninsula.

13th century

Chi-lan-tan is reported by a traveler of the YUAN (MONGOL) DYNASTY (1271–1368), referring to present-day Kelantan.

Chinese accounts mention Teng-Ya-nung or Ting-Chia-lu, referring to present-day Terengganu.

14th century

The Java-based Hindu kingdom of MAJAPAHIT (1293–ca. 1520s) takes control of the Malay Peninsula. Terengganu is mentioned in a list of polities and trading centers conquered by MAJAPAHIT.

1320

Mongol court sends for ELEPHANTS at Long Yamen (Dragon's Tooth Strait), probably present-day Keppel Harbor, SINGAPORE.

1330

Wang Dayuan of China visits Pancur (spring) and notes that it is already inhabited by Chinese.

1365

Javanese *Nāgarakterāgama* and a Vietnamese source refer to Singapore as TEMASIK (TUMASIK) ("Sea Town").

ca. 1380s

According to tradition, MINANGKABAU immigrants settle in Negri Sembilan.

Late 14th century

The Sanskrit place-name Singapura, or "Lion City," is in common use. SINGAPORE is caught between Siam and the MAJAPAHIT

empire of JAVA, which fight for control of the Malay Peninsula. The *SEJARAH MELAYU* (MALAY ANNALS) record that PARAMESWARA (PARAMESHWARA, PARAMESVARA), a prince of PALEMBANG, deposes the local ruler of TEMASIK and rules the island himself until the Siamese force him to flee to the Malay Peninsula. There he establishes the MELAKA sultanate. SINGAPORE is part of the sultanate, a fief of the admirals (Laksamana).

15th century

MELAKA becomes a rising force, serving as a major regional entrepôt for the exchange of Chinese, Arab, Indian, and Malay and Southeast Asian trade goods. Under a Malay Muslim monarch, MELAKA propagates Islam to the rest of insular Southeast Asia. Territorial expansion under the leadership of Bendahara/Chief Minister TUN PERAK (d. ca. 1498) results in Melakan influence over the STRAITS OF MELAKA, the Malay Peninsula, and the eastern coast Sumatran Malay States.

ARABS note the place-name Kalandan, whereas Chinese records relating to the voyages of ADMIRAL CHENG HO (ZHENG HE) (1371/1375–1433/1435) clearly show the name Ko-lan-tan. Both apparently refer to Kelantan.

16th century

MINANGKABAU immigrants from SUMATRA settle in Naning and Rembau, close to the Melakan hinterland.

1511

The Portuguese find MELAKA attractive. A Portuguese fleet conquers MELAKA, opening Southeast Asia to European expansion. SULTAN MAHMUD OF MELAKA (r. 1488–1511), the last Malay ruler, flees southward; his descendants establish the JOHOR-RIAU EMPIRE. Malay attempts to recapture MELAKA fail.

1528

Perak's first ruler is Sultan Muzaffar Shah (r. 1528–1545). In fact, he is the heir apparent of the JOHOR-RIAU EMPIRE following the demise of SULTAN MAHMUD OF MELAKA. But lacking political influence at court, he instead is sent to Perak, where a sultanate is established.

1526 Chronology

17th century

Triangular struggle for control over the STRAITS OF MELAKA among the Portuguese in MELAKA, the MALAYS of JOHOR-RIAU, and ACEH.

1641

The Dutch take MELAKA from the Portuguese after a long siege. By then MELAKA has lost its glory and importance. Moreover, apart from attempting to monopolize the peninsular TIN trade, the Dutch preoccupation is with BATAVIA and JAVA.

1699

Sultan Mahmud (r. 1685–1699) dies without an heir; Bendahara Abdul Jalil, claiming descent from a sayyid, usurps the throne. His death marks the end of the Malay MELAKA royal line.

1700

BUGIS immigrants who have settled in Selangor request that their JOHOR-RIAU EMPIRE overlord appoint a *Yam Tuan* (chieftain) to rule over them.

1773

Sri Menanti becomes the royal capital of MINANGKABAU settlements in present-day Negri Sembilan.

1786

One of the English COUNTRY TRADERS, CAPTAIN FRANCIS LIGHT (1740–1794), acting as a go-between for the Sultan of Kedah and the ENGLISH EAST INDIA COMPANY (EIC) (1600), establishes for the latter an outpost on the island of PENANG (1786); he renames it Prince of Wales Island, and the settlement George Town. LIGHT has for the past decade been trading along the western coast of the ISTHMUS OF KRA and Kedah from his base on JUNK CEYLON (UJUNG SALANG, PHUKET).

1795

During the NAPOLEONIC WARS IN ASIA, William V (1748–1806) of The Netherlands requests in the KEW LETTERS that the British assume control over Dutch possessions in the East Indies lest they fall to the French.

MELAKA then comes under British administration.

1816

PENANG FREE SCHOOL (1816), the first English school in Southeast and East Asia, is established by the Reverend R. S. Hutchings, PENANG's Anglican chaplain. By "Free" it means that it welcomes all children irrespective of race, religion, creed, or socioeconomic status. The school's tradition of excellence is displayed both in the classroom and on the playing field—not unlike English public schools.

1818

SIR (THOMAS) STAMFORD BINGLEY RAFFLES (1781–1826), lieutenant governor of BENGKULU (t. 1817–1819), receives permission from Lord Hastings, governor-general of India, to set up a trading station in the southern vicinity of the Malay Peninsula.

29 January

RAFFLES lands on SINGAPORE (1819) after a survey of the other islands.

1819

30 January

RAFFLES and Temenggong Abdul Rahman agree that Raffles can establish a trading post. Unfortunately, Temenggong is subordinate to Sultan Abdul Rahman of Johor, who has a treaty granting the Dutch control of the entire Johor-Riau sultanate, including Singapore.

6 February

RAFFLES knows that the current sultan has problems with legitimacy, so he smuggles in the exiled elder son of the former sultan, proclaims the pretender the rightful sultan, and signs a treaty giving the British exclusive rights to a factory in Singapore. When the Dutch protest, Hastings sends reinforcements from PENANG to SINGAPORE.

August

A treaty signed by both Sultan Hussein and Temenggong Abdul Rahman in August gives Britain the island of SINGAPORE in return for cash and pensions.

1824

The GOVERNMENT OF BRITISH INDIA supports RAFFLES'S actions. By then the ENTREPÔT TRADE AND COMMERCE OF SINGAPORE are a clear asset. By 1823, SINGAPORE proves more profitable than PENANG. ANGLO-DUTCH RELATIONS IN SOUTHEAST ASIA enter a new stage with the Treaty of London (1824).

March

Under the Anglo-Dutch Treaty (the Treaty of London), the Dutch accept the British presence in Malaya and give the British their bases on the peninsula and in INDIA. Britain gives the Dutch control of SUMATRA. The two spheres of influence meet at an imaginary line through the STRAITS OF MELAKA, south of SINGAPORE. The split ends the Johor-Riau sultanate by giving the British the states of JOHOR and SINGAPORE, now severed from each other. And the Dutch get the Riau archipelago, now part of Indonesia.

1826

The British create the STRAITS SETTLEMENTS (1826–1946) from their settlements on MELAKA, PENANG, and SINGAPORE.

Beginning in the mid-eighteenth century the British expand their area of influence in INDIA and their trade with IMPERIAL CHINA. The creation of the STRAITS SETTLEMENTS offers safe harbors for their merchant fleet plying the lucrative China trade. Controlled from the GOVERNMENT OF BRITISH INDIA, it is the British base in the nineteenth and early twentieth centuries for the establishment of protectorates over the Peninsular Malay sultanates.

PENANG is the seat of government of the STRAITS SETTLEMENTS (1826–1941).

1832

SINGAPORE replaces PENANG as the administrative center for the STRAITS SETTLEMENTS.

1867

Dissatisfaction with the GOVERNMENT OF BRITISH INDIA in the administration of the STRAITS SETTLEMENTS leads to representations made to London for a transfer.

Consequently the STRAITS SETTLEMENTS become a Crown colony under the British Colonial Office in London.

1869

The opening of the SUEZ CANAL and the advent of steamships in the 1860s make SINGAPORE, and to a lesser extent PENANG, major ports in the trade between East Asia and Europe.

1870s

Succession disputes, PIRACY, and secret society rivalries in the western Peninsular Malay States threaten life and property and disrupt tin production and trade. The influential European mercantile community in SINGAPORE urges the British government to diffuse the chaotic situation. An appeal for assistance from one of the Malay claimants to the Perak throne presents a justification for SIR ANDREW CLARKE (t. 1873–1875), governor of the STRAITS SETTLEMENTS, to adopt a forward policy.

1874

The British intervene in the WESTERN MALAY STATES. The PANGKOR ENGAGEMENT (1874) establishes the RESIDENTIAL SYSTEM (MALAYA); the resident advises the sultan on all aspects of governance except relating to Malay customs and practices or to the Islamic faith. The British next intervene in PAHANG in 1885. The PANGKOR ENGAGEMENT serves as a model for initiating the establishment of British protectorates over the Peninsular Malay sultanates.

1873–1913

A fourfold increase in SINGAPORE'S trade generates unprecedented prosperity. The prosperity attracts immigrants from around the region. TIN and RUBBER are the main commodities produced in the WESTERN MALAY STATES.

1876

The British India Office brings RUBBER seedlings (*Hevea brasiliensis*) from Brazil to SRI LANKA (CEYLON), SINGAPORE, and PENANG. Some also reach Dutch JAVA.

1528 Chronology

1890s

RUBBER increasingly replaces COFFEE in the Malay States, owing to disease and poor world prices consequent of surplus output from South American producers. H[ENRY] N[ICHOLAS] RIDLEY (b. 1855) enthusiastically promotes RUBBER among planters and devises the efficient herringbone tapping method to extract the latex without damaging the tree.

INDIAN IMMIGRANTS—mostly Tamils from South INDIA—are recruited as workers on the rubber estates.

1896

FEDERATED MALAY STATES (FMS) (1896) form from the WESTERN MALAY STATES and PAHANG. FMS coordinates infrastructural development, particularly HIGHWAYS AND RAILWAYS, more centralized administration based in KUALA LUMPUR (KL), and the poorer states supported by the richer ones.

20th century

1909

By the Treaty of Bangkok, Britain assumes protectorates over the former SIAMESE MALAY STATES (KEDAH, PERLIS, KELANTAN, TERENGGANU). Although styled advisers instead of residents, the British officers appointed to these sultanates perform similar functions—namely, holding the reins of administration, including revenue collection, in the name of the Malay sultan.

1909–1910

First world RUBBER boom. The WESTERN MALAY STATES become the chief RUBBER producer in the world, and SINGAPORE the main RUBBER-exporting port. RUBBER plantations are mostly European-owned, but Chinese also have holdings. Almost half the RUBBER cultivated in the Malay States is from smallholdings, largely family-owned, of Malays and Chinese.

The bulk of INDIAN IMMIGRANTS as labor for the RUBBER industry are recruited through the *KANGANI* SYSTEM. Most of them arrive during the early decades of the twentieth century.

ISLAMIC RESURGENCE IN SOUTHEAST ASIA (TWENTIETH CENTURY) witnesses the emergence of the *Kaum Muda* (modernist, reformist) challenging the *Kaum Tua* (traditionalist) in the Peninsular Malay States.

SYED SHAYKH AL-HADY (1867?–1934) utilizes the print media to propagate modernist Islamic thoughts. In fact NEWSPAPERS AND THE MASS MEDIA IN SOUTHEAST ASIA play a prominent role in the ISLAMIC RESURGENCE IN SOUTHEAST ASIA.

1909–1941

The British colonial period is characterized by systematic public administration, expansion of social services (schools and hospitals), a good network of HIGHWAYS AND RAILWAYS, and extensive development of RUBBER and TIN production for the export market. SINGAPORE and PENANG possess port facilities that are second to none. A multiethnic, multicultural, and multireligious society rapidly develops, with cosmopolitan urban centers such as SINGAPORE, KUALA LUMPUR, and PENANG.

1920–1922

Enthusiastic oversupply of RUBBER, coupled with a trade slump following the conclusion of the GREAT WAR (1914–1918), leads to declining RUBBER prices.

1921

The British build a naval base on SINGAPORE, followed shortly by an airfield. “FORTRESS SINGAPORE” gradually emerges.

1922–1928

The Stevenson Scheme restricts RUBBER production and exports in an attempt to stabilize falling prices.

1929–1931

Dramatic fall in commodity prices in the GREAT DEPRESSION to 1 percent of the 1910 peak price. Closure of RUBBER plantations and TIN mines; repatriation of Indian and Chinese labor to avoid social unrest.

1934–1941

International Rubber Regulation Agreement controls exports to stabilize prices. Smallholders are penalized with small quotas.

1938

KESATUAN MELAYU MUDA (KMM, YOUNG MALAY UNION) is formed by Malay nationalists to struggle for political

independence from Britain. Its leader, IBRAHIM YAACOB (1911–1979), looks to the Indonesian nationalist struggle for inspiration.

1941

8 December

Japanese invasion begins with landings at Kota Bahru, Kelantan, assisted by KMM members. KMM views the Japanese as allies and liberators from the colonial yoke. Japanese bombs fall on PENANG and SINGAPORE.

1942

15 February

SINGAPORE falls to the Japanese. The British surrender is unprecedented in military history and severely damages British prestige. SINGAPORE is renamed SYONAN-TO (“Island of the South”). The Japanese occupy it until September 1945.

1942–1945

Japanese invasion and occupation during the Pacific War bring hardships and deprivation. Unknown numbers of Chinese—probably in the thousands—are killed in *SOOK CHING*, “cleansing” operations in SINGAPORE and PENANG. The Chinese business community is extorted out of huge sums of money as punishment for its anti-Japanese stance prior to the war, such as supporting and contributing to the CHINA RELIEF FUND. The Chinese-based MALAYAN PEOPLE’S ANTI-JAPANESE ARMY (MPAJA) conducts a guerrilla war in the jungles, organized and led by members of the MALAYAN COMMUNIST PARTY (MCP). Similarly, WATANIAH, composed of MALAYS of PAHANG, undertakes a guerrilla war against the Japanese assisted by the Allied FORCE 136.

1945

15 August

Japan surrenders unconditionally after the atomic bombing of Hiroshima and Nagasaki.

September

BRITISH MILITARY ADMINISTRATION (BMA) oversees food supply, medicine, and other essential commodities; the release and repatriation of internees and prisoners of war; disarming and repatriation of the Japanese

military; and keeping law and order. Incidences of Sino-Malay clashes.

1946

PENANG and MELAKA join the MALAYAN UNION. UNITED MALAYS NATIONAL ORGANIZATION (UMNO) protests against the MALAYAN UNION. UMNO, under the leadership of ONN BIN JA’AFAR (1895–1962), gains support of the Malay sultans in its opposition.

March

Military administration ends. STRAITS SETTLEMENTS (1826–1946) dissolve.

1 April

SINGAPORE converts to a Crown colony.

1947

The legislative councils of Malaya and Singapore pass an ordinance to set up a university, later known as UNIVERSITY OF MALAYA. It is to comprise the amalgamation of the KING EDWARD VII COLLEGE OF MEDICINE and RAFFLES COLLEGE, set up in 1905 and 1919, respectively.

20 March

Singapore’s first election.

July

Because SINGAPORE after the war is more stable, less a country of transients, the merchant class and others want more voice in their government. The initial arrangement of a governor and advisory council switches to one of executive and legislative council in July 1947. Although the governor remains dominant, the council is subject to popular vote.

1948

June

The MALAYAN EMERGENCY (1948–1960) is declared because the MCP attempts by force to take over SINGAPORE and Malaya.

Several measures are implemented to combat the communists: military operations; enlisting the assistance of the ORANG ASLI, a propaganda war of winning the “hearts and minds” of the population; the BRIGGS PLAN of removing Chinese squatters from jungle fringes to “NEW VILLAGES,” thereby severing the communist’s

1530 Chronology

supply line of food and medicine, information, and recruits.

The harsh measures imposed by GENERAL SIR GERALD TEMPLER (1898–1979) gradually begin to bear results. His “carrot and stick” strategy and campaigns to win the “hearts and minds” of the people, especially the Chinese, are effective and successful.

FEDERATION OF MALAYA (1948) replaces MALAYAN UNION. The federation comprises the Peninsular Malay States and the former STRAITS SETTLEMENTS of PENANG and MELAKA. SINGAPORE remains a British Crown colony.

1953

Sir George Rendel leads a commission that reviews Singapore’s constitutional structure. When the government accepts the commission’s recommendations, Singapore has a new constitution that grants it greater self-government.

1955

The ALLIANCE PARTY (MALAYA/MALAYSIA), comprising cooperation between UMNO and the MALAYAN/MALAYSIAN CHINESE ASSOCIATION (MCA), wins fifty-one out of the fifty-two contested seats in the election for the Federal Legislative Council. PARTAI ISLAM SE MALAYSIA (PAS) manages to win the remaining seat. Automatic registration increases eligible Singapore voters to more than 300,000 from 75,000. For the first time the Chinese are politically active. In a hotly contested election, the Labor Front wins ten seats, and the PEOPLE’S ACTION PARTY (PAP) wins three of the four seats it contests.

The 1955 Constitution offers a limited measure of self-government for Malaya. TUNKU ABDUL RAHMAN PUTRA AL-HAJ (1903–1990) is appointed chief minister of Malaya.

6 April

DAVID SAUL MARSHALL (1908–1995) becomes the first chief minister of Singapore. His coalition government includes his Labor Front, UMNO, and MCA.

28–29 December

The holding of “peace” talks at Baling between TUNKU ABDUL RAHMAN PUTRA AL-HAJ, Malaya’s chief minister, and CHIN PENG

(1922–), the secretary-general of the MCP, is an attempt at ending the MALAYAN EMERGENCY. Other participants are DAVID MARSHALL, Singapore’s interim self-government chief minister, and TAN CHENG LOCK (1883–1960), president of the MCA. Accompanying CHIN PENG are Chen Tien and Rashid Mydin. The discussions fail, and the insurgency continues for another five years.

1956

6 June

When talks with London about full internal self-government for Singapore fail, DAVID SAUL MARSHALL resigns. LIM YEW HOCK (1914–1984) takes over as chief minister of Singapore.

MALAYAN/MALAYSIAN EDUCATION that supports a pluralistic school system promotes divisiveness in the multiethnic population. TUN ABDUL RAZAK (1922–1976), the minister of education of Malaya, chairs a committee that formulates a national education policy. The Razak Report emphasizes a national school system utilizing a single language of instruction, common syllabus and textbooks, and locally trained teachers.

1957

March

LIM YEW HOCK successfully negotiates a new constitution, signed in London on 28 May 1958.

31 August

Postwar sentiment is for independence, and finally, after a dozen years of effort, Britain grants independence to the FEDERATION OF MALAYA with TUNKU ABDUL RAHMAN PUTRA AL-HAJ as the first prime minister. The ALLIANCE PARTY—UMNO, MCA, and MALAYAN/MALAYSIAN INDIAN CONGRESS (MIC)—forms the government. Malaya becomes a leading producer of RUBBER as Southeast Asian RUBBER growers begin using higher-yielding trees in place of the older stock. Malayan planters also expand into previously unused areas with the new trees. Malaya maintains its lead as the world’s largest natural RUBBER producer into the 1960s.

1959

SINGAPORE becomes self-governing.

May

Singaporeans choose fifty-one representatives to their first fully elected legislature. PAP wins 53.4 percent of the vote and forty-three seats.

June

Governor Sir William Goode proclaims Singapore a self-governing state under the new constitution. Goode is *Yang di-Pertuan Negara* (“Head of State”); the first prime minister is LEE KUANYEW (1923–).

1960**31 July**

The Malayan government announces the end of the MALAYAN EMERGENCY.

1960–1961

PAP and communists had worked together against British COLONIALISM. Communist control is strong in many mass student and worker organizations. The balance is uneasy between PAP’s desire for an independent SINGAPORE within a noncommunist Malaya and the communist push for a communist takeover. In 1960 the factional conflict intensifies, and they split in 1961, with the communists creating the BARISAN SOSIALIS (SOCIALIST FRONT).

1961–1963

In order to overcome the communist threat, Malaya agrees to federate with Singapore as well as the BRITISH BORNEO territories of SARAWAK AND SABAH (NORTH BORNEO). Singapore’s foreign affairs, defense, and internal security remain the responsibility of the British.

On 27 May 1961, TUNKU ABDUL RAHMAN PUTRA AL-HAJ, prime minister of Malaya, proposes MALAYSIA (1963)—a political and economic merger of Malaya, Singapore, North Borneo, Brunei, and Sarawak. He and LEE KUANYEW agree to central responsibility for foreign affairs, defense, and internal security, with local autonomy regarding labor and education. BRUNEI remains out of the confederation but under British protection.

1962**1 September**

Singapore voters overwhelmingly approve the merger in “Malaysia.”

December

BRUNEI REBELLION (DECEMBER 1962) is launched by PARTAI RAKYAT BRUNEI (PRB) under the leadership of SHEIKH AZAHARI BIN SHEIKH MAHMUD (1928–2002), better known as A. M. Azahari. British forces swiftly suppress the rebellion.

1963**16 September**

MALAYSIA comes into being. It includes Malaya, SINGAPORE, and SARAWAK AND SABAH. The Philippines and Indonesia oppose; the former harbor the SABAH CLAIM, while the latter view Malaysia as a neocolonial plot. President SOEKARNO (SUKARNO) (1901–1970) of Indonesia launches three years of KONFRONTASI (“CRUSH MALAYSIA” CAMPAIGN). British and Commonwealth troops fight a low-key conflict on the Sarawak-Indonesia border.

1964

The United States accepts the creation of MALAYSIA in return for British support in Vietnam.

1965

Singapore joins the United Nations (21 September) and the Commonwealth (15 October).

9 August

Singapore leaves Malaysia on account of tensions between ethnic Malays and Chinese. SINGAPORE-MALAYA/MALAYSIA RELATIONS remain uneasy for many years, owing to various unresolved issues.

22 December

With Yusof bin Ishak as president, Singapore becomes a republic.

1966

Indonesia and Singapore resolve the political dispute that has raged since the establishment of the Federation of Malaysia. Indonesia had broken trade ties with Malaysia, thereby adversely affecting Singapore, whose second-largest trading partner had been Indonesia. Resolution of the dispute restores trade link.

1532 Chronology

1967

Britain decides to end its military presence in Malaysia and Singapore, effective from 1971, as part of its withdrawal of military commitments “east of Suez.” Singapore institutes compulsory military education.

August

Formation of the ASSOCIATION OF SOUTHEAST ASIAN NATIONS (ASEAN), which initially comprises Singapore, Indonesia, Malaysia, the Philippines, and Thailand.

1969

13 May

Sino-Malay riots take place in KUALA LUMPUR and other major urban centers in Malaysia, sparked by electoral gains by non-Malay opposition parties in the general elections. “MAY 13, 1969” witnesses the suspension of parliament and rule by decree of the deputy prime minister, TUN ABDUL RAZAK, as head of the National Operations Council.

A Department of National Unity is created that formulates a national ideology, RUKUNEGARA. A long-term measure to address the socioeconomic imbalances between *BUMIPUTERA* (*BUMIPUTRA*) (Malays and other indigenous ethnic groups) and non-bumiputera is the implementation of the NEW ECONOMIC POLICY (NEP) (1971–1990).

1970

TUNKU ABDUL RAHMAN PUTRA AL-HAJ steps down as prime minister; TUN ABDUL RAZAK assumes the premiership. TUN ABDUL RAZAK shifts Malaysia’s foreign posture away from the Western democracies and establishes relations with Afro-Asian Third World countries. Malaysia supports the NON-ALIGNED MOVEMENT (NAM) AND SOUTHEAST ASIA.

1971

Mid-year, Malaysia reverts to parliamentary rule. NEW ECONOMIC POLICY (1971–1990) commences, with focus on eradicating poverty and rural development.

The Kuala Lumpur Declaration by ASEAN calls for a ZONE OF PEACE, FREEDOM AND NEUTRALITY (ZOPFAN) (1971).

1972

ANGKATAN BELIA ISLAM MALAYSIA (ABIM), or Muslim Youth Movement of Malaysia, is formed in response to a worldwide ISLAMIC RESURGENCE IN SOUTHEAST ASIA. Basically an educative and reformist organization, ABIM is set up by a group of young Muslim students and intellectuals under the leadership of Anwar Ibrahim (1947–).

1974

TUN ABDUL RAZAK visits the People’s Republic of China (PRC) and establishes diplomatic relations between Malaysia and the PRC.

BARISAN NASIONAL (NATIONAL FRONT) (1974) is formed. UMNO and MCA are the main components of this coalition.

1976

TUN ABDUL RAZAK dies in London. Hussein Onn (1922–1990) becomes prime minister of Malaysia. He appoints DR. MAHATHIR BIN MOHAMAD (1925–) as deputy prime minister.

1979

The two oil crises of the 1970s force the government of Singapore to restructure the economy by changing education policy, emphasizing technology and computer education, providing financial incentives to industry, and emphasizing productivity. Another area of focus is public housing, with new towns and subsidized apartments and liberalized loan policies for home and apartment buyers.

1980

March

The KUANTAN PRINCIPLE (1980) is an Indonesia-Malaysia joint statement that is less confrontational toward Vietnam over the Cambodian situation.

1981

DR. MAHATHIR BIN MOHAMAD becomes prime minister of Malaysia upon the retirement of Hussein Onn (1922–1990).

The Mahathir administration continues with the NEW ECONOMIC POLICY (NEP) and also introduces the “Look East” policy or orientation (learning and imitating East Asian models of productivity, particularly those of Japan), the national car program, and industrialization.

1989**December**

The Malaysian government signs a peace agreement with guerrillas based on the border with Thailand. These guerrillas are the remnants of communist insurgents, mostly Chinese, from the MALAYAN EMERGENCY (1948–1960).

1990s

Malaysia enjoys its position as a “Tiger,” with rapid economic growth in a society delicately balancing its many ethnic groups. Opposition to the Mahathir government comes mainly from the DEMOCRATIC ACTION PARTY (DAP) and PAS.

1990**October**

A small-scale communist insurgency in Sarawak, dating from the mid-1960s, finally ends with a peace settlement at Simanggang, thereafter renamed Sri Aman.

1993

Anwar Ibrahim, the former president of ABIM and a vociferous critic of UMNO and the Mahathir administration, is appointed deputy prime minister after holding several ministerial portfolios in Mahathir’s cabinet. The Islamization policy shifts into high gear with Anwar instrumental in setting up the Bank Islam.

1997–1998

Malaysia’s *ringgit* falls to almost half its value as the Asian Financial Crisis takes its toll on Southeast Asia. The Mahathir administration opts for capital control to stabilize the *ringgit*, fixing it at RM3.80 to U.S.\$1.00.

1998**August**

Malaysia’s deputy prime minister, Anwar Ibrahim, is sacked from the government and expelled from UMNO over various charges, including corruption, abuse of power, and sex offenses, that carry heavy imprisonment terms under the country’s penal code.

Pro-Anwar supporters establish Parti Keadilan (Justice Party) and embark on a *Reformasi* (Reformation) campaign.

1999

In the general elections PAS makes inroads into rural Kedah, retaining Kelantan and Terengganu. DAP and Parti Keadilan have a poor showing.

2001**December**

Nineteen members of al-Ma’unah, an Islamic cult, are convicted of treason for plotting against the Malaysian government. They are arrested in July 2000 following clashes with government security forces; cult members kill two hostages during the confrontation.

Singapore authorities arrest fifteen people suspected of connections with planned bomb attacks on various U.S. and Western targets within the island republic. It is believed that thirteen of those arrested belong to the Jemaah Islamiah, a known terrorist organization. Some of the suspected terrorists are believed to have been trained at al Qaeda camps in Afghanistan, others at a base in the southern Philippines.

2002**January**

Twenty members of the Kumpulan Mujahidin Malaysia (KMM), a fundamentalist Islamic group, are arrested for allegedly plotting activities with the ultimate aim of overthrowing the government of Malaysia.

April

The Malaysian government invokes the Internal Security Act (ISA) on another fourteen alleged members of KMM.

13–15 May

During a visit to Washington, D.C., Malaysian prime minister DR. MAHATHIR BIN MOHAMAD is well received by President George W. Bush, who personally expresses his gratitude to Malaysia for its support and continued cooperation in the ongoing campaign against terrorism led by the United States.

20–21 May

Malaysia hosts an ASEAN meeting on terrorism at KUALA LUMPUR, participated in by ministers of home and security affairs. A joint statement is issued reiterating ASEAN’s commitment to cooperate in the fight against terrorism in the region.

1534 Chronology

22 June

DR. MAHATHIR BIN MOHAMAD announces his resignation as prime minister of Malaysia, a post he has held since 1981, during his presidential address to the UNITED MALAYS NATIONAL ORGANIZATION (UMNO). He was dissuaded from making this momentous decision. Nevertheless a week later, he reaffirmed his intention to step down in October 2003. His anointed successor is Deputy Prime Minister Abdullah Ahmad Badawi (1939–).

23 June

Abdul Hadi Awang assumes the interim presidency of PARTAI ISLAM SE MALAYSIA (PAS) following the demise of Fadzil Noor.

July

Terengganu Menteri Besar (Chief Minister) Abdul Hadi Awang, who is also acting president of PAS, announces the imposition of Islamic Shari'ah law in the state.

Former deputy prime minister Anwar Ibrahim loses his final appeal against his conviction for corruption.

2003

Severe Acute Respiratory Syndrome (SARS), the mystery viral disease, begins spreading into Singapore, with six dead by late March.

Quarantine measures with isolation of affected individuals are undertaken in designated public hospitals to contain the disease. Screening at entry points limits the spread.

The SARS outbreak adversely affects the travel trade and tourism sector of Singapore and Malaysia.

October

As promised, DR. MAHATHIR BIN MOHAMAD relinquishes the premiership to his deputy, Abdullah Ahmad Badawi, who becomes Malaysia's fifth prime minister.

2004

Despite Thailand's and Vietnam's openness to the adverse impact of the avian influenza, the contagion has yet to spread to Malaysia and Singapore.

VI. THE PHILIPPINES

30,000 B.C.E.

The first settlers in the Philippines cross land bridges from BORNEO and FORMOSA (TAIWAN). Evidence of human occupation in TABON CAVE on Palawan Island.

3000 B.C.E.

MALAYS migrate from Indonesia and Malaysia.

3rd century C.E.

The Philippines opens contacts with other nations of Southeast Asia, including SUMATRA, Indochina, and BORNEO.

Mid-14th century C.E.

A Chinese sphere of influence begins under the MING DYNASTY (1368–1644).

ca. 1405

Beginning of a century of Islamic influence from BORNEO on the southern half of LUZON and the islands south of LUZON. In northern LUZON, the Japanese have a trading post at Aparri and a loose influence in the area.

16th century

Cultivation of ABACA (MANILA HEMP) begins. Closer to the banana than to hemp, the fiber is valuable for items from marine ropes to hats.

1521

Ferdinand Magellan (1480–1521), during his circumnavigation expedition, lands in the Philippines, claiming them for Spain.

27 April

Magellan dies in a battle against Chief Lapu-Lapu of Mactan.

1542

In honor of the Crown prince of Spain (later King Philip II of Spain, r. 1556–1598), Ruy Lopez de Villalobos names the archipelago *Las Philipinas*.

1565

On Cebu, CAPTAIN GENERAL MIGUEL LOPEZ DE LEGAZPI (1500–1572) establishes the first permanent Spanish settlement, a town later known as San Miguel.

ca. 1560s–1898

The PHILIPPINES UNDER SPANISH COLONIAL RULE is harsh and oppressive of the native people. The twin processes of Christianization (CATHOLICISM) and HISPANIZATION (sociocultural heritage) provide CHRISTIAN MISSIONARIES and SPANISH FRIARS with enormous power over the common people. Spanish colonists (*encomendero*) seize land and demand tribute/taxes from the native farmers (*encomienda*). The FRIAR–SECULAR RELATIONSHIP is often strained.

MINDANAO remains primarily Muslim and opposed to Spanish control and influence, thereby establishing a tension and violence that persist to the modern era. Spanish economic impacts include emphasis on TOBACCO as a cash crop as well as the GALLEON TRADE in luxury goods between MANILA and Acapulco, Mexico, which remains under tight government control until MANILA becomes an open port in 1837.

ca. 1565–ca. 1837

The Spanish galleons try to avoid hostile powers, so they sail mostly across the Pacific to Mexico, then across the Caribbean and Atlantic to Spain. In Southeast Asia, the Spanish encounter Chinese pirates, who are occasionally bold enough to lay siege to MANILA, as well as European rivals Holland and Portugal and the indigenous peoples. Late in the sixteenth century the Japanese claim the islands, and Spain pays tribute to the Japanese under Hideyoshi Toyotomi (ca. 1536–1598), not only to protect the GALLEON TRADE but also to safeguard the Jesuit missionaries in Japan.

1570

Spain conquers the native city, MANILA, and declares it a Spanish city.

1596

The MOROS defeat the Spaniards. This victory encourages Moro raids on Spanish-occupied VISAYAN ISLANDS (BISAYAN ISLANDS, THE BISAYAS, THE VISAYAS).

17th–19th centuries

ANTI-SPANISH REVOLTS (THE PHILIPPINES) are commonplace. The uprisings prior to those during the last quarter of the

nineteenth century are localized, small-scale, short-lived, and the result of local grievances; they are easily suppressed by the Spanish colonial authorities and prove inconsequential. Armed rebellions in the latter part of the nineteenth century have nationalistic goals, with greater impact culminating in the PHILIPPINE REVOLUTION (1896–1898).

1637–1638

The MOROS suffer defeat, but the Spaniards are unable to occupy territory owing to insufficient troops.

1762

The British take MANILA but fail to extend their influence outside the city. The Treaty of Paris (1763) returns MANILA to Spain.

1840–1841

APOLINARIO DE LA CRUZ (1814/1815–1841) cofraternity of San José attracts large followings in Tayabas, Laguna, and Batangas. The Dominican friars oppose this religious organization. Consequently, Spanish troops attack and kill many followers during a meeting in Tayabas.

1861**19 June**

JOSÉ RIZAL (1861–1896) is born in Calamba, Laguna, of a wealthy family. Rizal is the most prominent nationalist who plays a major role in the struggle for Philippine independence. His writings inspire the PHILIPPINE REVOLUTION.

1869

SUEZ CANAL (1869) opens in Egypt, shortening travel time to Spain from the Philippines, bringing Europe closer, and allowing Filipinos of the upper middle class, the *ILUSTRADOS*, to pursue studies in Europe.

1872

CAVITE MUTINY breaks out when Filipino soldiers rebel against their Spanish superiors. Blaming the native clergy as prime instigators, the Spanish colonial authorities sentence to death three Filipino priests. Their martyrdom stirs and heightens Filipino nationalist consciousness.

1536 Chronology

1878

The MOROS are finally decisively defeated by Spanish forces. But hostile attitudes and strained relations characterize Moro-Spanish relations.

1880–1895

PROPAGANDA MOVEMENT demands political rights for the people in the Philippines, and that Spain introduce political reform in the country. Its members are drawn from educated Filipinos living in Spain; the propagandists utilize newspaper articles, books, pamphlets, and public speeches to propagate their cause.

1887, 1891

The publication of Rizal's novels *NOLI ME TANGERE* (1887) AND *EL FILIBUSTERISMO* (1891) explore the dilemma of reform versus revolution. The latter novel is a sequel to the former. Notwithstanding a ban by the Spanish colonial government in the Philippines, the novels are circulated clandestinely.

1889–1895

LA SOLIDARIDAD is a journal published by Filipino expatriates and exiles in Spain that advocates political reforms in the Spanish colony of the Philippine Islands. Lopez Jaena establishes this fortnightly Spanish-language journal. Later, Marcelo del Pilar assumes the editorship when its office moves from Barcelona to Madrid. It is a mouthpiece for the PROPAGANDA MOVEMENT.

1892

ANDRES BONIFACIO (1863–1897) establishes KATIPUNAN, a revolutionary society that seeks the separation and independence of the Philippines from Spain. It is the main organized nationalist group behind the PHILIPPINE REVOLUTION.

1896

Betrayal leads to the discovery of the revolutionary plans of the KATIPUNAN by Spanish colonial authorities. Bonifacio is forced to launch the revolution. Revolutionaries are able to control several parts of the Philippines; MANILA remains in Spanish hands.

1897

May

Following a factional struggle within the KATIPUNAN, ANDRES BONIFACIO is executed by the newly elected leader, EMILIO AGUINALDO (1868–1964).

1898

Outbreak of the SPANISH-AMERICAN WAR (1898). U.S. COMMODORE GEORGE DEWEY (1837–1917) leads the naval assault in Manila Bay. EMILIO AGUINALDO leads the ground forces against Spain, which surrenders.

12 June

Filipinos under EMILIO AGUINALDO declare the independence of the Philippines. With AGUINALDO as president, congress writes and approves a constitution. APOLINARIO MABINI (1864–1903) plays an important role in the drafting of the constitution. The U.S. government opposes, and President William McKinley (t. 1897–1901) declares EMILIO AGUINALDO an outlaw.

10 December

The SPANISH-AMERICAN TREATY OF PARIS (1898) witnesses the cession of the Philippines by Spain to the United States. EMILIO AGUINALDO and the revolutionaries feel betrayed by the United States.

1898–1946

The PHILIPPINES UNDER U.S. COLONIAL ADMINISTRATION (1898–1946) adheres to the basic objective of transforming the people and country in the image of the United States.

1899

4 February

EMILIO AGUINALDO declares war on the United States, beginning the PHILIPPINE WAR OF INDEPENDENCE (1899–1902).

1900–1941

CONSTITUTIONAL DEVELOPMENTS IN THE PHILIPPINES (1900–1941) prepare the country for eventual self-government and subsequently full independence.

1901

U.S. troops capture EMILIO AGUINALDO at Palanan, LUZON. Apparently he is forced to declare his allegiance to the United States.

1902

Despite the end of the war with U.S. control of the cities and coastal areas, a large occupation force is maintained for a decade-long mopping-up operation. The cost in Filipino lives is estimated to be as high as 250,000.

1907

Election of the first legislative assembly, bicameral and mostly under Filipino control. Another element of self-rule is a civil service, which the Filipinos control by the end of the GREAT WAR (1914–1918). Also, the church is reformed; the government purchases church estates and redistributes them to landless Filipino farmers.

1913–1921

The administration of U.S. president Woodrow Wilson (t. 1913–1921) shifts U.S. Philippine policy. Republican administrations regarded the Philippines as a colony, but the Wilsonians begin a slow process intended to end in independence. Emphasis is on establishing institutions that promote free and democratic government. Important tools for that end are a good system of public education and a solid legal system. Wilson gives the Philippines free trade status, bypassing the tariff barriers that keep Philippine goods noncompetitive in U.S. markets.

1916

Filipino House of Representatives is established.

1934

Under the Tydings–McDuffie Act, the Philippines is to become independent by 4 July 1944.

1935

MANUEL LUIS QUEZON (1878–1944) wins the newly created office of president of the Commonwealth of the Philippines and forms a government based on the principles of the U.S. Constitution. His political rival, SERGIO OSMENA, SR. (1878–1961), becomes vice-president.

1937

The official language is established as Tagalog, despite the fact that it is known to only half the population; the other half speak Visayan.

1938

By this time the Philippine economy is intimately tied to the U.S. market and taking advantage of the tariff-free exchange of goods. Philippine exports to the United States constitute primary commodities such as SUGAR, copra and coconut oil, ABACA, timber, cigars, and TOBACCO. The PHILIPPINES–U.S. “SPECIAL RELATIONSHIP” is basically built on such economic ties, political patronage, and military dependency of the colony on the metropolitan power.

1941**7–8 December**

The U.S. Pacific Fleet is attacked by the Japanese. Simultaneously, the Japanese invasion of Southeast Asia begins with amphibious landings in the Malay Peninsula and southern Thailand, HONG KONG, and Miri (Sarawak).

20–21 December

From their base in Vietnam, the Japanese launch an invasion of the Philippines with landings on north and south LUZON. MANILA is declared an open city. U.S. forces under GENERAL DOUGLAS MACARTHUR (1880–1964) withdraw to Corregidor and Bataan.

1942**2 January**

MANILA falls to the Japanese.

March

GENERAL DOUGLAS MACARTHUR, MANUEL LUIS QUEZON, and SERGIO OSMENA, SR., escape to Australia, thence to the United States. Prior to his departure MACARTHUR promises the Philippine people, “I shall return!” Urged by MACARTHUR, resistance in the form of guerrilla warfare persists throughout the war, making Japanese control tenuous, especially on LUZON.

LUIS TARUC (1913–), peasant leader from central LUZON, organizes and leads the HUKBALAHAP (HUKBO NG BAYAN LABAN SA HAPON) (PEOPLE’S ANTI-

1538 Chronology

JAPANESE ARMY) (1942) against the Japanese.

9 April

U.S. forces in Bataan surrender. The BATAAN DEATH MARCH, in which thousands die, is among the many human tragedies of the Pacific War (1941–1945) and the JAPANESE OCCUPATION OF SOUTHEAST ASIA.

6 May

Corregidor surrenders to the Japanese.

1942–1945

Japanese wartime policies of “ASIA FOR THE ASIATICS” and their GREATER EAST ASIA CO-PROSPERITY SPHERE have little appeal and impact on the Filipinos, who await the return of the Americans.

1943

October

Keeping to the promise made in January 1942 by Japanese prime minister Tojo Hideki (t. 1941–1944) guaranteeing independence of the Philippines if the Filipinos cooperate with the occupation force, the Japanese declare the Philippines independent. JOSÉ PACIANO LAUREL (1891–1959) becomes the president of the Republic of the Philippines. The Japanese-sponsored government is unpopular and enjoys little support or recognition.

1944

20 October

GENERAL DOUGLAS MACARTHUR and SERGIO OSMENA, SR., who became president when MANUEL LUIS QUEZON died, return to the Philippines. Fighting continues.

1945

2 September

GENERAL YAMASHITA TOMOYUKI (1885–1946), commander of the 14th Army, administering the Philippines, surrenders. The war kills more than a million Filipinos and leaves MANILA and other cities and towns in ruins.

1945–1953

The Huk Rebellion, a communist-inspired peasant revolt, is led by the wartime guerrilla movement, the HUKBALAHAP.

1946

4 July

The United States grants independence to the Philippines and provides reconstruction aid. MANUEL ROXAS (1946–1948) of the Liberal Party becomes the first president of the newly independent Republic of the Philippines.

1953

President RAMON MAGSAYSAY (1907–1957) during his tenure (t. 1953–1957) utilizes a combination of humane measures (land reform and land redistribution, rural development) and military operations, finally suppressing the Huk Rebellion.

1957–1965

President Carlos P. Garcia (t. 1957–1961) increases involvement with Asian neighbors, institutes internal reforms, and attempts to create a stronger and more diversified economy. DIOSDADO MACAPAGAL (1910–1997) during his single-term presidency (t. 1961–1965) attempts to address the problems of land ownership and economic underdevelopment; however, he faces many obstacles from within and without the government.

1965

Partida Nacionalista candidate FERDINAND MARCOS (1917–1989) is elected the sixth president of the Philippines.

1969

The NEW PEOPLE’S ARMY (NPA), military arm of the Communist Party of the Philippines (CPP), launches a protracted people’s war against the Philippine government. Several attempts to crush the NPA fail.

In the southern Philippines spearheading the Muslim separatist movement is the MORO NATIONAL LIBERATION FRONT (MNLF). Initially fighting for cession and independence from the predominantly Catholic Philippines, MNLF, after the intervention of the Organization of Islamic Conference (OIC), seeks autonomous status from the Manila regime. NUR MISUARI (1940–) is a prominent figure of the MNLF.

1972

Citing increased lawlessness and communist rebellion, Marcos declares MARTIAL LAW in

the Philippines and imposes a new constitution in the place of the commonwealth constitution of 1935. The period is characterized by diminished civil liberties and democratic institutions as well as rule by decree and popular referendum.

1981

17 January

MARTIAL LAW ends. Slowly the government normalizes. FERDINAND MARCOS wins a six-year term. Despite the lifting of martial law, the Marcos regime retains sweeping powers of arrest and detention and a low regard for human rights. There is economic decline, widespread corruption, and cronyism.

1983

After a long exile, Benigno (Ninoy) Aquino (1932–1983) returns to the Philippines. His assassination provides a focus for popular discontent and begins the process that ends in the election of February 1986.

1984

NPA becomes a serious threat, challenging the authority of the central government of the Philippines.

1986

25 February

In an election characterized by widespread fraud, FERDINAND MARCOS faces CORAZON COJUANGCO AQUINO (1933–), the widow of Benigno (Ninoy) Aquino, and Salvador Laurel of the United Nationalist Democratic Organization (UNIDO). Faced with criticism from international observers and a peaceful uprising of both civilians and military officers—the EDSA REVOLUTION—demonstrating the strength of “People Power,” FERDINAND MARCOS flees the Philippines. CORAZON COJUANGCO AQUINO becomes president (t. 1986–1992).

1987

11 February

The Philippines has a new constitution, under which CORAZON COJUANGCO AQUINO begins revitalizing democracy and civil liberties. Critics regard the CORAZON COJUANGCO AQUINO administration as weak and fractious.

Political stability and economic growth are hamstrung by several attempted military coups.

1992

FIDEL VALDEZ RAMOS (1928–) succeeds CORAZON COJUANGCO AQUINO as president (t. 1992–1998). He is the first career military officer and Protestant to assume the presidency in a predominantly Catholic Philippines. Ramos legalizes the Communist Party and prepares for talks with the military rebels, Muslim separatists, and communist insurgents represented by the NPA.

U.S. MILITARY BASES IN SOUTHEAST ASIA are a sensitive and controversial issue. The Subic Bay naval complex and Clarke Airfield base in the Philippines generate much opposition from Filipinos. Finally, the U.S. military presence in the Philippines ends with the closure of its last bases.

1994

June

General amnesty for all rebels and all military and police who committed crimes while fighting the insurgencies (mainly the NPA).

1995

October

NPA insurgency appears to have ended.

1996

The Philippines government signs a peace accord with the MNLF. Based on MINDANAO, the separatists have waged war for a quarter of a century, costing 120,000 lives. Because not all Muslim groups recognize the treaty, fighting continues on LUZON and elsewhere.

1997–1998

The Asian Financial Crisis impacts on the Philippine peso, reducing its value rapidly, which seriously retards the economy.

1998

May

Election of Joseph Ejercito Estrada as the president of the Philippines (t. 1998–2000). Estrada promises to reduce crime and poverty.

1998–2000

President Estrada’s failure in presiding over an effective government witnesses the NPA again

1540 Chronology

gaining strength, especially in the rural provinces.

2001

Foreign tourists vacationing on Sipadan Island off Sabah, Malaysia, are kidnapped by Muslim terrorists, the Abu Sayyaf, a splinter group of the MNLF. They are held hostage on Jolo Island, southern Philippines. Their release after several months of prolonged negotiations remains clouded: whether ransom monies are paid or there is a political compromise.

January

President Estrada is charged with corruption, but his impeachment trial breaks down. Popular protest leads to his replacement by Vice President Gloria Macapagal-Arroyo.

November

Outgoing governor NUR MISUARI of the Autonomous Region of Muslim Mindanao (ARMM), with some supporters in the MNLF, launches a revolt. The MNLF hence breaks a five-year peace agreement with the government of the Philippines and again destabilizes the country's southern provinces. Following the failure of the uprising, NUR MISUARI flees to neighboring Malaysia.

Farouk Hussein is elected governor of the ARMM. His candidacy was earlier endorsed by President Gloria Macapagal-Arroyo. Also elected is a twenty-one-member assembly for the ARMM.

2002

January

Malaysian authorities detain NUR MISUARI (1940–) shortly after his arrival in Malaysia; subsequently he is extradited to the Philippines to face charges of staging a rebellion.

February

To control the increasingly difficult Islamic fundamentalist groups collectively known as

Abu Sayyaf, the United States sends “advisers” to assist the Philippine military. Critics claim this action, especially having U.S. troops in combat environments, violates the Filipino constitution.

In accordance with the agreement between the Philippines and the United States, a 650-strong contingent of U.S. troops participates in joint counterterrorism operations with the Philippine military on the island of Basilan in the southern Philippines. Basically the U.S. personnel are entrusted to train the Philippine armed forces in counterinsurgency tactics.

April

Not only has the number of U.S. troops in the southern Philippines increased (from 650 to 1,000), the duration of their presence is lengthened to more than the six months originally envisaged.

Consequent of several bombings, which kill fifteen people in the city of General Santos, MINDANAO, President Gloria Macapagal-Arroyo declares a state of emergency in the city.

May

Peace agreements are contracted between the Philippine government and the Moro Islamic Liberation Front (MILF). Malaysia hosts the formal signing ceremony.

June

In the midst of rescue operations by Philippine troops, two hostages are killed and a third (a U.S. citizen) is freed. The Abu Sayyaf captured the three hostages in May 2001.

July

Withdrawal of U.S. military personnel from Basilan marks the conclusion of joint counterterrorism operations with their Philippine counterparts.

ABOUT THE EDITOR

Ooi Keat Gin obtained a degree in History from Universiti Sains Malaysia, Penang, Malaysia, an MA in History from the National University of Singapore, and a PhD in Southeast Asian Studies from the University of Hull, England.

With specialization in social and economic history, particularly of Malaysia and Brunei, Dr. Ooi's core area of expertise is on the historical development of Borneo. His more recent publications include *World Beyond the Rivers* (Hull, 1996), *Of Free Trade and Native Interests* (Oxford, 1997), *Japanese Empire in the Tropics* (2 vols., Ohio, 1998), *Rising Sun Over Borneo* (Macmillan and St Martin's, 1998), *Malaysia* (ABC-CLIO, 1999), *From Outpost to City* (Academia Sinica, Taipei, 2002), and a forthcoming coffee-table volume *Pulo Pinang: Harmony in Diversity* (State Museum & Art Gallery, Penang, 2004). He has numerous articles in journals like *Modern Asian Studies*, *Journal of Southeast Asian Stud-*

ies, *Indonesia and the Malay World*, *Journal of the Malaysian Branch Royal Asiatic Society*, *Journal of the Australian War Memorial*, and others.

Dr. Ooi is a Fellow of the Royal Historical Society (London), a life member of the Sarawak Association of the United Kingdom, and a recipient of several fellowships in the U.K. and Australia. Currently he is an affiliate fellow of the International Institute of Asian Studies (IIAS), Leiden, The Netherlands. He is a long-time trustee of the Penang Museum Board, a member of the Art Gallery, and editor-in-chief of *Penang Past & Present*.

Ooi Keat Gin is associate professor of Southeast Asian studies and coordinator of the Asia-Pacific Research Unit (APRU) of the School of Humanities at Universiti Sains Malaysia in Penang, Malaysia. His present research is on the period of the Pacific War (1941–1945) in Kalimantan (formerly Dutch Borneo).
