Decide on one of these plans and learn enough about it to play it.

Full marks to Alex, who, when faced with the Caro-Kann looked at the position properly, had a think about what he could see, and tried to set his opponent some problems. That attitude will get you a long way in chess, more so than just playing the same old moves that you normally play.

(for more details see: http://www.ex.ac.uk/sheu/DR/Opening/wh_v_odd.htm)

French Defence (4)

Devon players played this defence as White and Black: I think it's quite a good choice for juniors, but you do need to have grit and patience if you are going to win with it as Black.

White players who haven't seen or thought about it before tend to play the Exchange Variation, which can be very drawish.

If you want to win for either side, try and keep pieces on and keep looking for weaknesses. Every exchange is a little better for either White or Black, so think carefully. Here Black is nearly good enough to be winning.

Or, if you don't mind playing an IQP¹ game, play an early c2-c4 or ...c7-c5 as Korchnoi often did.

The easiest variation to understand is the Advance Variation, but I think it's a bit easier to play for Black than for White, Black seems to hold the initiative.

Black often gets an endgame advantage, and needs to know how to dig deep and win these positions.

For White, the plan is to take over or block on the Queen's-side, then you can try and break through with your Pawn f2-f4-f5.

(for more details see: http://www.ex.ac.uk/sheu/DR/Openings/french_d.html)

(for more details see: <http://www.ex.ac.uk/sheu/DR/Openings/frencheg.html>)

¹ Isolated Queen's Pawn

Queen's Pawn games without c2-c4 (4)

These common systems, which include the Colle, London and Stonewall systems, usually don't set Black enough problems. Black can develop as they please and usually see any threats coming.

Mostly they are played as a Queen's-side Old Stodge: just a way of playing the first five moves without paying attention to what is happening. The key attacking piece is the Bd3

As Black, you can usually see this coming, and play your own Bishop to the Italian Diagonal b1-h7 and/or block the diagonal by a King's-side fianchetto

As Black, don't be in too much of a hurry to castle, and open up a line for your Rooks with ...c7-c5 (which also means: don't put your Queen's Knight in front of your c-Pawn, as Harry in R1)

There are some "clockwork attacks" in these openings. I talk about this at several times below. A 'clockwork attack' is where you learn a fairly set series of moves that lead to a winning attack. It's a bit like the "Four Move Mate" that we all learn as beginners (Scholar's Mate), which are fairly easy to avoid, but if you don't know what's about to happen, you can get caught in a horrible mangle.

See the Stonewall below.

(for White see: <http://www.ex.ac.uk/sheu/DR/Opening/custers.html>)

(for Black see: http://www.ex.ac.uk/sheu/DR/Opening/B_d4_ToC.html#RTFToC96)

Queen's Gambit (3)

In the Gambit Declined, the main problem for Black is how to get out the Bc8. Fianchettoing (Callum R3) is good if you can get away with it, but if you're going to play the Queen's Gambit as White, you need to know how to set Black problems.

Either White dances all over the weak light squares on the Queen's-side...

Marshall - Kline 1913

...or waits until Black has arranged all their pieces pointing at the Queen's-side then attacks on the other wing.

Pillsbury, H - Wolf, H 1903

Black can play a good Fianchetto line which is the main line for Black these days, if you are careful with the move order. This is the Tartakover Variation.

First, Black plays ...h6, to avoid a fork from c2 by the Queen hitting c7 and h7.

Then if White swaps off in the centre, hoping to make the fianchetto pointless...

...Black then can change plans and move the Bishop to e6 instead of having it shut in on b7. Black then makes use of the ...b6 move by playing ...c5

Bertok - Fischer [D59] 1962

Fischer-Spassky [D59] 1972

King's Gambit (3)

I think this is a fine opening for young players. Accepted or Declined, the attack is easy to understand. Karl (R2) has no trouble finding an attack right out of the opening.

When declining, Black must be careful not to castle into a clockwork attack (Bobby R3).

What should Black do? I quite like the Cunningham Variation, there are several traps for White to fall into.

1.e4 e5 2.f4 exf4 3.Nf3 Be7 4.Bc4 [4.Nc3 Bh4+] 4...Nf6 5.e5 [5.Nc3 Nxe4] 5...Ng4 6.h3 Bh4+ ...

(for more details see: http://www.ex.ac.uk/sheu/DR/Opening/kg_ideas.html)

(for more details see: http://www.ex.ac.uk/sheu/DR/Opening/kg_vars.html)

Stonewall Attack (2)

This is another one of those clockwork attacks that you should avoid falling into. Alex was very lucky not to get mated quickly in his R2 game. If you play over the opening you can see how easily White got an attack, even with Black playing sensibly.

As Black, don't be in a hurry to castle into the attack. Play your own Bishop to the Italian Diagonal if you can (see Bobby's R2 game).

Open a file for yourself, and/or blow up the centre with d6 and e5.

(for White see: <http://www.ex.ac.uk/sheu/DR/Opening/custers.html>)

and <http://www.ex.ac.uk/sheu/DR/Praxis/disaster.htm>

(for Black see: http://www.ex.ac.uk/sheu/DR/Opening/B_d4_ToC.html)

(for Black see: <http://www.ex.ac.uk/sheu/DR/Opening/antiindn.html>)

Scotch Game and gambit (2)

I think these are ideal openings for young players, although you do need to know your way around them more than some stodgy openings. Here White can play **4. Nxd4**, **4. c3** or **4.Bc4**, as mood and taste demand.

As Black, you can get ahead in development, which has to be good news (Michael R3).

As White, the Gambit line demands a bit of accuracy: here, castling gets you into the main line of the Two Knights' Defence with d4 (Ben R2)

There are some good opening repertoire books that include the Scotch, including a cheapie by Mike Basman (The Centre Game).

(for Black see: http://www.ex.ac.uk/sheu/DR/Opening/black_e4.htm)

Middlegame points

1. Generally I think people were far too ready to swap off. Every exchange makes either your position better or your opponent's position better, so one of you at least should be hesitating!
2. There were many examples of White playing a clockwork attack with a closed centre. When the centre is closed, and White has more space on the King's side, the Black King can find himself not in a fortress but a prison. I mentioned this several times above. It's a bit like the "Four Move Mate" that we all learn as beginners (Scholar's Mate), that is, a trick series of moves that, if you don't know what's about to happen, you can get caught in a horrible trap. If you aren't going to be crushed by these openings you need either to:
 1. delay castling to avoid giving White a target
 2. open up the centre and/or Queen's-side for counterplay
 3. avoid them completely if you know how – or all three!
4. Sometimes you seemed content to sit back and do nothing and wait for your opponent to make a mistake. This is really dangerous! If your opponent finds something good you might find out that you have been waiting to be trampled... and why should they make a mistake if you are not putting them under any pressure? Think up ideas, try and do things to your opponent, set your opponent problems, and then you will find they make mistakes.
5. A lot of the other advice I expect you have heard before: think about what your opponent is trying to do to you, And as usual, when you find a good move, look for a better one (Karl's R2
6. The things you all mostly did right, which was all good to see, were:
 - never giving up
 - trying to set your opponent problems
 - using all your pieces
 - playing slowly and carefully
7. Probably the three most common oversights were:

Missing Pawn forks

Forcing your opponent to play a good move (...Nxe5)

Swapping when there are better alternatives (...Bc5 instead of ...Nxd4).

Most exchanges either make **your** position better or **your opponent's** position better, they are **not** neutral.

8. A bit about Pawns.

Most of the Pawn moves you made were pretty useless, so I'd suggest leaving them alone: none of those Rook's Pawn moves were very impressive.

Some of you did fall foul of the Sicilian, when you might have found that Pawns in a wave can be very powerful.

But the Sicilian can tempt you to make too many Pawn moves, and you can die horribly.

Be careful out there.

Korchnoi - Szabo [A22], 1963

1.c4 e5 2.Nc3 Nf6 3.g3 Bc5 4.Bg2 0-0
5.e3 Re8 6.Nge2 Nc6 7.0-0 d6 8.d4 Bb6
9.h3 Bf5?

Following classical opening principles, but this is not a classical opening - rather, White is perfectly placed to harass the Black minor pieces which are strutting about without adequate cover.

10.d5 Nb8 11.g4 Bd7 12.Ng3 h6 13.Kh2
a5 14.f4 exf4 15.exf4 Nh7

White seems to have a pawn majority on both sides! 16.g5 Na6 17.gxh6 Qh4

6... Qc7 7.Qxa8 Nc6 8.Nc3 e6 9.Nxb5 1-0

Endgame points

I haven't got many examples of endgames where technique mattered, and most of you were either winning easily or had stopped keeping the score by then.

Remember to try and swap off Pawns, and keep pieces on, if you are losing.

Swapping off pieces when you are losing is just helping your opponent.

There were some interesting points in Joseph's first round game:

Perpetual check #2

Here is a perpetual check, which I'm sure you have seen before. Because the position gets repeated three times, it is a draw.

Perpetual check #1

Here is another, which you may not have seen before.

Perpetual check #3: White can only escape the Black Rook by taking it, when it will be stalemate! This is unusual, but look for this sort of chance as well when you are losing.

The Games

Well, I was quite impressed, overall, there was a lot of concentration, a lot of fighting spirit, and some of you were up against top English and Welsh squad players.

Obviously, read what I say about your games, but look at the rest as well if you get time, there's probably something in there you could think about.

1. Callum

I didn't get to see a lot of your chess, to be honest: what I saw was fine of course, and you were playing very good opposition, but each round you seemed to vanish quickly from the hall. If you played a bit slower, and dug a bit deeper for moves, you might be beating these people, and not going away just with draws.

(10) Glamorgan,C - Devon [C01]

[These little codes are ECO codes, the *Encyclopedia of Chess Openings* index]

U14 callum Chepstow (1.1), 31.01.2004

White played with little ambition: do you know how to play these positions for a win?

1.e4 e6 2.Nf3

[2.d4 d5 3.exd5 exd5 4.Bd3 c5 This move makes even more sense when the Bd3 covers the d5 Pawn from attack. 5.Nf3 Nc6 6.Qe2+ Be7 7.dxc5 Nf6 8.h3 0-0

VARIATION

White must have thought his position perfectly safe. 9.0-0 Bxc5 10.c3 Re8 11.Qc2 Qd6 12.Nbd2

VARIATION

Black's next is a reinforcement to the principle that the pawns in front of the castled king should only be moved when necessary. 12...Qg3 13.Bf5 Re2 14.Nd4

VARIATION

Black has a forced win. 14...Nxd4 15.cxd4 1-0 Tatai-Korchnoi 1995 (15.cxd4 Bxd4 16.Bxc8 Rxf2)

2...d5 3.exd5 exd5 4.d4 Nf6

[4...c5 is a nice way of playing for a win, like in the Korchnoi game]

5.Bg5 Bg4

[5...Be7 castle quickly and play Re8]

6.Nc3 Be7 7.Be2 0-0 8.0-0 Nc6

[8...h6 doesn't lose much time]

9.Ne5 Bxe2 10.Nxe2

10...Nxe5 Young players always seem too keen to swap, when there are sometimes better things to do.

[10...Re8]

11.dxe5 Ng4 12.Bxe7 Qxe7 13.Qxd5 Qxe5 14.Qxe5 Nxe5

Well, that's pretty dead.

15.Rad1 Rad8 16.Nc3 a6 17.Rfe1 Ng6 18.Nd5 c6

1/2-1/2

(11) Glamorgan,C - Devon [C02] U14 callum Chepstow (2.1), 31.01.2004

You got an advantage very quickly but seemed to get lost on the way to the win.

1.d4 e6 2.e4 d5 3.e5 c5 4.c3 Nc6 5.Nf3 Qb6 6.Bg5

Pointless

[6.a3;

6.Be2;

6.Bd3!?)

6...Qxb2 7.Nbd2 Qxc3 8.Rc1 Qa5 9.Be2 Bd7 10.0-0 cxd4

Really, the opening couldn't have gone better.

11.Qb3 Qc7

[11...Bb4 12.Nb1 h6 13.Bh4 b6;

11...Ba3 12.Rb1 b6]

12.Bb5

Right, now you have spent time grabbing those Pawns, and White is ahead in development. You need to dig deep and find the most accurate moves to finish your development, then you can win the endgame.

12...Be7

The Bishop and the Knight both want to move to e7.

[12...Nge7]

13.Bf4 a6

[13...f6 looks ideal but 14.exf6 Qxf4 15.fxg7;

13...f5 14.exf6;

13...Nh6 14.Nxd4 0-0 15.Bxh6 gxh6 16.Qg3+ Kh8]

14.Bxc6 Bxc6 15.Nxd4 Qd7

wastes time

16.Qb6 Rc8 17.Rb1 Rc7 18.Rfc1 Bd8 19.Nxc6 Rxc6 20.Qb4 Rxc1+ 21.Rxc1 Ne7 22.Qc3

Thanks to White pushing things a bit, you have got your position sorted and you should have an easy win. Do you have any more of this game written down? I imagine you could learn a lot from trying to find better moves later.

1/2-1/2

(12) Devon - Somerset,B [D53] U14
 callum Chepstow (3.1), 31.01.2004

If this is your main opening you need to learn how to set your opponent problems with it: after all, this is what you hope you will get to play!

1.d4 d5 2.c4 e6 3.Nc3 Nf6

[3...Be7 4.Nf3 Nf6 5.Bg5 0-0 6.e3 h6 7.Bh4 b6 8.cxd5 Nxd5 9.Bxe7 Qxe7 10.Nxd5 exd5 11.Be2 Be6 12.0-0 c5 13.dxc5 bxc5 14.Qa4 Qb7 15.Qa3 Nd7 16.Ne1 a5 17.Nd3 c4 18.Nf4 Rfb8 19.Rab1 Bf5 20.Rbd1 Nf6 21.Rd2 g5 22.Nxd5 Nxd5 23.Bxc4 Be6 24.Rfd1 Nxe3 25.Qxe3 Bxc4 26.h4 Re8 27.Qg3 Qe7 28.b3 Be6 29.f4 g4 30.h5 Qc5+ 31.Rf2 Bf5 0-1 Bertok-Fischer 1962]

4.Bg5 Be7 5.e3

[5.Nf3 Nbd7 6.e3 0-0 7.Rc1 b6 8.cxd5 exd5 9.Qa4 (9.Ne5 Bb7 10.f4 a6 11.Bd3 c5 12.0-0 c4 13.Bf5 b5 14.Rf3 Re8 15.Rh3 g6 16.Bb1 Nxe5 17.fxe5 Nd7 18.Bxe7 Rxe7 19.Qf3 Nf8 20.Rf1 Qd7 21.Qf6 b4 22.Na4 Qc7 23.Nc5 Bc8 24.Rb6 a5 25.Rf4 Rb8 26.Bxg6 Rb6 27.Qxb6 Nxb6 28.Qf6 Re8 29.Rf1 Be6 30.Qg5 Kh8 31.Qb5 Nf8 32.Nxe6 Rxe6 33.Rxe6 Pillsbury-Wolf 1903) 9...Bb7 10.Ba6 Bxa6 11.Qxa6 c6 12.0-0 Ne4 13.Bxe7 Qxe7 14.Qb7 Rfc8 15.Nxd5 Qd6 16.Rxc6 1-0 Marshall-Kline 1913]

5...b6

This looks very early but it is hard to prove it is a mistake. Do you know what sort of plans White has tried against this formation? It is important that you do, if you are going to play this opening. I've included a couple of lines above.

6.Nf3

[6.cxd5 exd5 7.Bd3 0-0

(7...b6; 7...Bb7)

8.Bxf6 Bxf6 9.Qh5 wins a Pawn]

6...Bb7 7.Qb3 Nbd7 8.cxd5 exd5

[8...Nxd5 makes life easier for Black]

9.Bb5 0-0 10.Bxd7 Qxd7 11.Bxf6 Bxf6

You've made a couple of exchanges here which give up the two Bishops for... well, what was your idea?

12.0-0 Rfe8 13.h3

As usual, I think a Pawn move at the side is usually a waste of time.

13...c5 14.dxc5 bxc5 15.Rad1

Black has more space, thanks to the 'hanging Pawns', and the two Bishops;

White looks vulnerable.

15...d4 16.exd4 Bxf3 17.gxf3 Qxh3 18.dxc5 Be5 19.Ne4 Bh2+ 20.Kh1 Rxe4

[20...Bf4+ 21.Kg1 Qh2# mates more quickly]

[...Some moves unrecorded...]

0-1

There is another classic game which show how to play against the hanging Pawns:

Fischer,R (2785) - Spassky,B (2660) [D59]

Wch28-Reykjavik (6), 1972

1.c4 e6 2.Nf3 d5 3.d4 Nf6 4.Nc3 Be7 5.Bg5 0-0 6.e3 h6 7.Bh4 b6

2. Harry

I thought you played well with mixed results: if you look at these games and the ideas in your Queen's Gambit book, you will learn to avoid some of the problems you had in these games.

(16) Devon - Somerset,B [A40] U14
 Harry Chepstow (1.2), 31.01.2004

You found something good to do after a peculiar opening

1.d4 e6 2.Nc3 Nf6

[2...d5 3.e4 is a French Defence]

3.Bf4

Nc3 belongs one system, and Bf4 belongs to another... what system did you have in mind when you sat down at the game.

3...Nc6 4.Nf3 Bb4

Black has defended in an unusual way;

normally you say, don't put your Queen's Knight in front of your c-Pawn in d-Pawn openings, but this has more the characteristics of an e-Pawn opening.

5.a3 Bd6

If he didn't intend to take the Knight, he could have moved it to d6 directly;

I think the a3 move might be useful to White.

6.Bxd6 cxd6 7.e3

[If White is going to claim anything from this quiet opening, I think he has to play 7.e4]

7...0-0 8.Bd3 e5 9.0-0

[9.dxe5 exposes the weak d-Pawns after either 9...Nxe5 (9...dxe5 10.Bc4) 10.Be2, but the opportunity will not go away.]

9...e4

Black can't count.

10.Bxe4 Nxe4 11.Nxe4 b5 12.Nxd6

Another free Pawn

12...Ba6 13.Ne4

[During the game I was more interested in 13.b4 making the Bishop look foolish.]

13...b4 14.Re1 Bc4 15.b3 Bd5 16.Qd3 bxa3 17.Neg5 f5 18.Rxa3

Black's excursion with the b-Pawn has created a further weakness on a7.

18...Nb4 19.Qd2 Nc6 20.c4 Be4 21.Nxe4 fxe4 22.Ne5 Qh4

Black has some hopes because the e-Pawns shut out the White pieces from the King's-side.

23.Nxd7 Rf5 24.Ra6 Rh5 25.h3 Rc8

Black shouldn't tie his pieces down to defence.

26.d5 Ne5 27.Nxe5 Rxe5 28.Rxa7 Rf8 29.Qb2 Rg5

I began to get worried here, Black has created real chances and I could see no way to keep hold of the h-Pawn.

30.d6

[30.Rea1 activates the Rook.]

30...Qxh3

31.f4

[31.Rxg7+ is necessary immediately.]

31...Rg3

[31...exf3 en passant and suddenly White may be in trouble 32.Qxg7+ Rxg7 33.Rxg7+ Kxg7 34.gxh3 f2+ when White has chances with his Pawns]

32.Qxg7+

Excellent!

32...Rxg7 33.Rxg7+ Kxg7 34.gxh3

1-0

(17) Devon - Somerset,B [D06] U14

harry Chepstow (2.2), 31.01.2004

Your good development and active play allowed you to get back into the game, and you even missed a couple of chances to win it.

1.d4 d5 2.c4 Nf6 3.Nf3 Bf5 4.Bf4

[4.Qb3 looks more to the point]

4...e6 5.e3 Ne4 6.Nc3

[6.Qb3]

6...Bb4 7.Qc1 unnatural

[7.Qb3;

7.Rc1 c6 8.Qb3]

7...c6

8.Be2

Complacent: did you see Black's threat?

8...Qa5

Suddenly White is losing: this has all the advantages of the Cambridge Springs for Black with none of the disadvantages.

9.0-0 Bxc3 10.bxc3 Nxc3 11.Qb2 Nxe2+ 12.Qxe2 Qc3 13.Rac1

[13.Rfc1 is a little better]

13...Bd3 Black is pushing his luck I think: if there is no forced win here he is better off completing development. **14.Qd1**

[14.Rxc3! Bxe2 15.Rb1 b6 16.cxd5 exd5 17.Bxb8 Rxb8 18.Rxc6 And White is right back into it, if still slightly worse.]

14...Qa3 15.Re1

[15.Bd6 saves the second Pawn]

15...Bxc4 16.Rb1 Qe7 17.Qa4 Nd7

[17...0-0 is calmer]

18.Rxb7 Again, White is right back into the game. **18...Bb5 19.Qa5 a6**

20.Ne5 even if you see a good move look for a better one

[20.a4 Bc4 21.Ne5 Qd8 22.Nxc4 dxc4 23.Qb4 is winning for White, although not quickly.]

20...Qd8 21.Qxd8+

[21.Qa3 takes some courage to play, but I don't think Black can round up the Rook.]

21...Rxd8 22.Rb1 Nxe5 23.Bxe5 0-0 24.Bc7 Rd7 25.a4

Were there many more moves? It looks like White can try and put together a blockade, but Black should have played on until that actually happened.

[25.Ra7 Rc8 26.Bb6 is probably a blockade]

1/2-1/2

(18) Glamorgan,C - Devon [D30] U14
 harry Chepstone (3.2), 31.01.2004

Once you had lost the Pawn, I think most of the mistakes were White's! A shame, you had all the ideas early on, but White's position was too solid.

1.d4 d5 2.c4 e6 3.a3

Presumably fearing the same fate as befell you the game before.

[3.Nc3 Nf6 4.Nf3 Be7 5.Bf4 c6 6.e3 Nbd7 7.h3 Ne4?

Tarrasch says: White will now pull the d-pawn to e4, attack it with f3, recapture with gxf3, attack down the g-file, and win (my phrasing not his!). 8.Nxe4 dxe4 9.Nd2 Bb4 10.a3 Bxd2+ 11.Qxd2 0-0 12.Qc2 f5 13.Bd6 Re8 14.0-0-0 Nf6 15.Be5 Bd7 16.f3 exf3 17.gxf3 b5 18.Rg1 Rf8 19.Rd2 Rf7 20.Rdg2

VARIATION

All predictions fulfilled! 20...a5 21.Qf2 Ne8 22.Rg5 Qe7 23.Qh4 Nf6 24.Qh6 Ra7 25.Bd6 Qxd6 26.Rxg7+ Kf8 27.Rxh7+ Ke7 28.Rxf7+ Kxf7 29.Rg7+ Kf8 30.Qxf6+ 1-0 Tarrasch-von Scheve 1894]

3...Nf6 4.Nc3 Nc6 5.Nf3 Be7 6.Bf4 Ne4 7.Nxe4 dxe4

I know in your first round game, a Pawn like this gave Black chances of a King's-side attack, but usually it's a weakness. Tarrasch's game shows the problems for Black.

8.Ne5 Nxe5 9.Bxe5 Bf6 10.Bxf6 Qxf6 11.e3 0-0 12.Be2 c6

You really don't want Pawns on light

squares.

13.0-0 Rd8 14.Qc2 Qf5 15.f3 e5

I guess you thought, White gets the e-Pawn, I get the d-Pawn, but White's move comes with tempo.

16.fxe4 Qe6

[16...Qg6 17.d5! (17.Rad1) 17...cxd5 18.cxd5 Rxd5]

17.d5 cxd5 18.exd5 Qd6

19.Bd3

[White missed one here: 19.c5! Qxd5?? 20.Rad1]

19...Qh6 20.e4

[20.Rf3 leaving the Bishop's line open, looked better to me.]

20...Qe3+ 21.Kh1

[21.Qf2 heading straight for the ending is better]

21...Bd7 22.Rae1 Qd4 23.Qc3 Qxc3 24.bxc3 Rac8 25.Rb1 b6 26.Rb4

White has arranged all his Pawns in quite the worst way possible to try and win this.

26...a5

Oops.

27.Rxb6 Ba4 28.Rb7 Rd7 29.Rxd7 Bxd7 30.Rb1 h6 31.Rb7 1-0

3. Michael

You didn't really get a chance to show us what you can do in these games because you went astray in the opening. I do think young players often spend too much time worrying about what to play in the opening, but in these games this was what was holding you back.

(25) Somerset,B - Devon [D00] U14
 michael Chepstow (1.3), 31.01.2004

You didn't really hit on a plan here... and then dragged a White Pawn into a place where you got forked.

1.d4 d5 2.Bf4 Nc6

As ever, the Knight should go behind the c-Pawn in d-Pawn opening.

3.Nc3 a6

Oh, you don't need to make Pawn moves, you need to get your pieces going.

4.Nf3 Nf6 5.h3

This is a modest waste of time which is often played in this opening, not to stop ...Bg4 so much as to give the Bf4 a retreat in case of ...Nh5

5...Bf5 6.e3 Nb4 7.Bd3 Bxd3 8.cxd3 Nc6

[8...c5 would have allowed you to repair your omission, but this is risky when you are behind in development.]

9.Qb3 b6

[9...Na5]

10.Rc1 Qd7 11.Qa4 e6

I thought there was a chance for White here, but it doesn't quite work as I thought... I don't know if White missed it entirely or couldn't calculate it.

12.a3

[12.Nxd5

unmasks an attack from the Rc1 to the Nc6

12...b5 13.Nxc7+ Qxc7 14.Bxc7 bxa4 15.Rxc6 with an extra couple of Pawns]

12...Bd6

[12...Nb8

A) 13.Qxd7+ Nbx d7 (13...Kxd7 14.Ne5+) 14.Bxc7;

B)

C) 13.Qa5]

13.Ne5 Nxe5

[13...Bxe5 still might lose a Pawn 14.dxe5 Nh5 15.Nxd5 b5 16.Qc2]

14.dxe5 Qxa4 15.Nxa4 Bxa3 16.bxa3 Nh5 17.Bg5 h6 18.Bh4 g5 19.Bg3 Nxe5

Don't swap pieces when you are losing.

20.fxg3 b5 21.Nb2 Rc8 22.0-0 0-0 23.d4 Kg7 24.Nd3 Rfd8 25.h4 a5 26.Nc5 Ra8 27.Rf6 b4 28.Rcf1 Kg8 29.Rxf7 bxa3

1-0

(26) Somerset,B - Devon [C45] U14
 michael Chepstow (2.3), 31.01.2004

You were behind from the opening, mostly because you were so behind in development.

1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Nxd4

4...Nxd4

[4...Bc5! 5.Be3 Qf6 6.c3 Nge7]

5.Qxd4 Qe7

Not sure what your idea was, but this just blocks in the Bishop.

6.Nc3 Qc5 7.Be3 Qxd4 8.Bxd4 c6 9.0-0-0 d6 10.Bc4 a6

Black has swapped off all his active pieces, and spent the rest of the time moving Pawns. It's no surprise that Black is on the point of losing.

11.Bb6 Nf6 12.f4 Be7 13.Bc7 b5 14.Bb3 Bb7

[14...b4 is the right time for this one.]

15.Bxd6 Bxd6 16.Rxd6 b4 17.e5 bxc3 18.exf6 cxb2+ 19.Kxb2 0-0 20.fxg7 Kxg7 21.Rg1

Rooks are rotten defenders, but this is an attacking idea. I was impressed by her attitude, I assumed White was just going to swap off everything and win the endgame.

21...c5 22.g4 Rfe8 23.h4 Re4 24.f5 h6

[24...c4 helps a bit]

25.g5 h5 26.g6 fxg6

this is the losing move, inviting the Rooks inside

27.Rgxg6+ Kf8 28.Rd7 Ke8 29.Rgg7

winning

1-0

(27) Devon - Glamorgan,C [B20] U14
 michael Chepstow (3.3), 31.01.2004

I wish I'd seen more of this, you did well to hold it together after getting in a mess in the opening, and losing a Pawn.

1.e4 c5 2.Bc4 e6 3.Nc3 a6

...b5 is already a threat.

4.Nf3 Nc6

[4...b5]

5.d3

[5.d4;

5.a4]

5...b5 6.Bb3 Nge7 7.0-0 d5

White already has the worse game: his 'nicely developed' pieces are just targets for the Black Pawn wave.

[...Some moves unrecorded...]

You did well to hold this game after going a Pawn behind, at the end your pieces had become active again, and that was the key to it.

1/2-1/2

4. David

I thought you played well in all the games, win or lose. You have a good attacking attitude that will always give your opponent problems and you will learn when not to push your luck.

(13) Devon - Glamorgan,C [A45] U14
 david Chepstow (1.4), 31.01.2004

After a do-nothing opening, you suddenly jumped all over your opponent and held it all together for a good win.

1.d4 Nf6 2.e3

Not the sharpest.

**2...g6 3.Nc3 Bg7 4.Nf3 d6 5.Bd3 0-0
 6.0-0 Nbd7 7.Re1 Re8**

White's formation lacks a focus.

8.Bc4 c6 9.e4 b5 10.Bb3 e5 11.d5 Qb6
 [11...b4]

12.dxc6 Qxc6 13.Nd5 Bb7

The most natural move in the world, but a mistake.

14.Ng5

Terrific! I thought you should have completed development before doing anything like this, but you saw something I

didn't.

**14...Qc5 15.Be3 Qc8 16.Nxf7 Bxd5
 17.Bxd5**

[17.Nxd6 is more accurate]

17...Nxd5 18.Nxd6

[18.Qxd5 again, is a slight improvement, but you find these sort of things all the time after a game]

**18...Nxe3 19.Rxe3 Qc6 20.Nxe8 Rxe8
 21.Rc3 Qb7**

[21...Qe6]

22.Qd5+ Qxd5 23.exd5

White still has a game to win.

**23...e4 24.Rc7 Nb6 25.Rxa7 Nxd5 26.c3
 Bh6 27.Ra5 e3 28.fxe3 Bxe3+ 29.Kh1**

unnatural but Black has the initiative

[29.Kf1 Rf8+ 30.Ke2 Rf2+ 31.Kd3 Rxb2
 32.Ke4 Nb6]

**29...Rf8 30.Rxb5 Nf4 31.Rf1 Rd8 32.g3
 g5 33.Rxg5+ Kh8 1-0**

(14) Devon - Glamorgan.C [E43] U14
 david Chepstow (2.4), 31.01.2004

You played with some good ideas but Black kept it together until he could come back at you on the Queen's-side.

- 1.d4 Nf6 2.e3 b6 3.Nf3 Bb7 4.c4 e6**
5.Nc3 Bb4

This has crept into known territory, a Rubinstein Variation of the Nimzo-Indian.

6.Bd2

[6.Bd3]

6...d6

Loose.

7.Qa4+ Nc6 8.d5! exd5 9.Nxd5

I see your thinking but the other way was better.

[9.cxd5 Bxc3 10.Bxc3 Nxd5 11.Bxg7 Rg8 12.Qe4+ Nce7 13.Qxh7]

9...Bxd2+ 10.Nxd2 0-0 11.Be2 Ne5
12.e4 Re8

Now White's position looks the looser. I was torn between applauding your attacking attitude and knowing that your were over-doing it a bit.

13.f4

Good attitude but didn't help...

13...Ng6 14.Bf3 Nxd5 15.f5 Nh4 16.cxd5
Bxd5 17.0-0-0 Nxf3 18.gxf3 Bb7

19.Rhg1 a6 20.Qd4 f6 21.h4 c5

22.Qc4+

Just a check... the other way was better.

[22.Qe3 d5 23.h5 and the odd Pawn probably won't matter for a while... a shame White can't get the Knight into the attack, if so, I think he would be winning.]

22...Kh8 23.Qf7 Re7 24.Qh5 b5 25.Nb3
Qc7 26.Qg4 c4 27.Nd4 c3 28.Qf4

[28.Ne6 is better but still losing after 28...Qa5]

28...Rc8 29.Ne6

[29.b3 c2 30.Rd3 (30.Rd2 Qc3 31.Nxc2 Qa1#) 30...Qc5 31.Kb2 Rxe4 wins, but none of these moves are easy to find for either side]

29...cxb2+ 30.Kxb2 Qc3+ 31.Kb1 Qb4+
32.Ka1 Rc2 33.Qc1

enough...

[33.Rb1 Qc3+]

0-1

(15) Somerset,B - Devon [C41] U14
 david Chepstow (3.4), 31.01.2004

You had lots of nice ideas in this game:
 missed a couple too, but your opponent
 couldn't cope with any of them

1.e4 e5 2.Nf3 d6

Not a bad choice, and will make a few
 players lose their confidence because they
 haven't seen it before.

3.Bc4 Be6

4.Bb5+

Just a check: actually forces Black to play a
 move he would like to play anyway...

**4...c6 5.Ba4 Nf6 6.Nc3 Nbd7 7.d4 Qc7
 8.Bg5 Be7 9.Qd2 h6 10.Bh4 0-0-0**

That looks a little risky

11.0-0-0

[11.d5]

**11...Qb6 12.Bxf6 Bxf6 13.d5 cxd5
 14.exd5 Bg4**

Good idea: White is on the verge of
 becoming worse.

15.Nb5 a6 16.Na3 e4

Great!

17.Nd4 Bxd1

Tempting, but there was a better move...

[17...Bg5 18.f4 exf3 en passant: did you
 miss this?]

18.Qc3+ Qc5 19.Rxd1 Nb6

20.Qh3+

Just taking away a vital defender

[20.Bb3]

**20...Kb8 21.Qf5 Nxa4 22.Qxe4 Rhe8
 23.Qf4 Qxd5**

[23...Bg5 Again!]

24.Nf5

Missing something much more important

24...Bxb2+ 0-1

5. Bobby

It's a shame I don't have more of the game that was your best result! You didn't really get a chance to show us what you can do in these games because you went astray in the opening. In all three games your opponents played unusual openings, and I guess as you know more about them you will avoid trouble.

(7) Devon - Somerset,B [B30] U14
bobby Chepstow (1.5), 31.01.2004

Well, this might have felt as though you were never in it, but you could have won a piece...

You need to decide on a way of playing against the Sicilian, and the other half-open defences.

**1.e4 c5 2.Nf3 Nc6 3.Bc4 g6 4.Nc3 Bg7
5.d3 e6 6.Be3**

[6.a4 Nge7;

6.0-0 Nge7 7.Re1 0-0 8.e5]

6...b6

White has developed rapidly, but needs a plan. Black is winding up for ...d7-d5, so getting a Rook to e1 looks like a priority... and so the Bishop on e3 probably isn't accurate.

7.Bg5

This Bishop never found a home. It was like you were thinking only one move at a time, not thinking of an idea that would last you two or three moves.

7...Nge7 8.0-0 h6 9.Bf4 d5

White's 'nicely developed' pieces are also targets for the Black Pawns.

10.Nb5

Nice idea. Black should castle before trying to mix it up.

10...e5 11.exd5 Nxd5

12.Bg3?

[12.Bxd5! wins a piece! 12...exf4 (12...Qxd5 13.Nc7+) 13.Bxc6+]

12...0-0 13.Bh4

[13.Bxd5 still wins]

13...g5 14.Bg3 Nf4 15.h4 Bg4

This pin proves very troublesome.

**16.hxg5 hxg5 17.Nc3 Nd4 18.Bxf4 gxf4
19.Bd5 Rb8 20.Re1 b5**

White is close to losing;

Black has made good use of his Pawns.

21.Be4 f5 22.Bd5+ Kh7 23.Bb3 Rh8

Winning: all White's minor pieces are locked out on the Queen's-side.

24.Bf7 Qe7 25.Bd5 Kg6 26.Ne2 Nxf3+ 27.gxf3 Bh3 28.Kh2 Qg5 29.Rg1 Bg2 # 0-1

(8) Glamorgan,C - Devon [D00] U14
bobby Chepstow (2.5), 31.01.2004

A nice sensible opening... I don't know how much more there was of this game.

1.d4 d5 2.e3

Most of these systems rely on White getting a Bishop pointing to the Black King from d3. So, either don't have your King in the way, or get your Bishop to f5 or g6 quickly.

2...Nf6

[2...Bf5 gets it to f5. 3.c4]

3.Bd3 Bg4 4.f3 Bd7

[4...Bh5 5.g4 Bg6 gets it to g6.]

5.Nd2 Nc6 6.f4 e6 7.Ngf3 Bd6 8.Ne5

Of course Black would like to play ...Nxe5 but can't.

8...Bxe5 9.fxe5 Ng8 10.0-0 Nh6

I expected White to keep playing by clockwork, playing his pieces to the King's side.

11.Nb3 b6

Now the Nb3 looks out of place.

12.e4 Qh4

Good, else I guess a White Queen would arrive on h5.

13.Bxh6 Qxh6 14.exd5 exd5 15.Qf3 Qe6 16.c3 0-0 17.Nd2 f6 18.exf6 Rxf6

Black looks at least equal here;

White's position makes no sense.

[...Some moves unrecorded...]

1/2-1/2

(9) Glamorgan,C - Devon [C30] U14
bobby Chepstow (3.5), 31.01.2004

A shame... you never really got going, but I hope you will know better for next time.

1.e4 e5 2.Bc4 Nc6 3.d3 Bc5

[3...Nf6 4.Nc3 Bb4 is the recommended line for Black.]

4.Nc3 Nf6 5.f4 d6 6.Nf3

I like this move order for White, getting into a reasonable line of the King's Gambit Declined.

6...0-0

Castling is good, except when you are climbing into the lion's den. Black's fortress quickly becomes a prison.

7.f5 g6

Making weaknesses just where White wants them.

8.Bh6 Re8 9.Ng5 Nd4

[9...Re7 10.fxg6 hxg6 11.Qf3 Rd7 is also gruesome.]

10.Bxf7+ Kh8 11.Bxe8 Nxe8 12.g4

[12.Nf7+ looked useful...]

12...Qf6 13.Nd5 Qd8 14.Nf7+ Kg8
15.Nxd8 b6 16.Ne7+ Kh8 17.Nf7# 1-0

6. Ben

You had some good ideas in the games and I like your choice of openings. With more experience you will avoid some of the problems you had in the games you lost.

(4) Glamorgan,C - Devon [C00] U14
ben Chepstow (1.6), 31.01.2004

This was hard to play for a win for black, and the draw came easily enough.

1.e4 e6 2.Nf3 d5 3.Nc3 Bb4

[3...Nf6 is more likely to give you standard French-style positions.]

4.exd5 exd5 5.a3

Waste of time. In this position there is no pin and it's not obvious the Bishop wants to be on b4;

in the Winawer, Black surrenders the Bishop pair only when the centre is closed.

5...Bxc3 6.dxc3 Nf6 7.c4 c6

No need for another Pawn move.

[7...0-0;

7...Nc6]

8.cxd5 cxd5

Black has an isolated Queen's Pawn and a potentially crummy Bishop. White should trade off the Black Knights and go for an endgame.

9.Bb5+ Bd7 10.Qe2+ Qe7 11.Qxe7+ Kxe7 12.Bxd7

Black's worst piece disappears.

[12.Bd3]

12...Nbx d7 13.0-0 Rhe8 14.Re1+ Kf8 15.Rxe8+ Rxe8 16.Be3 b6 17.Bd4

The Knight would benefit most from being here.

17...Ng4 18.h3 Nge5 19.Nxe5

[19.Bxe5 Nxe5 20.Nd4 is a better plan for White, although with Knights and Rooks, Black can surely hold this.]

19...Nxe5 20.Re1 f6 21.f4 Nc6 22.Rxe8+ Kxe8

White could still play for a win with Pawns on both sides of the board.

23.c3 Nxd4 24.cxd4

Dead equal.

24...h6 25.g4 g5 26.f5 a5 27.b4 axb4 28.axb4 b5

Even more equal.

1/2-1/2

(5) Devon - Somerset,B [A45] U14 ben Chepstow (2.6), 31.01.2004

It looked like you understood the position better but sadly fell foul of a Pawn push.

1.d4 Nf6 2.Bg5 d6

[2...g6 3.Bxf6 exf6 4.e3 Bg7 5.Ne2 b6 6.Nf4 d5 7.h4 h5 8.c4 dxc4 9.Bxc4 Bb7 10.Nc3 Bh6 11.Bxf7+ Kxf7 12.Qb3+ Ke8 13.Nxg6 Qd7 14.Nxh8 Qg7 15.Qe6+ Kf8 16.Nd5 Nd7 17.Ne7 1-0 Vaganian,R- Botterill,G/Hastings 1974]

3.Bxf6 gxf6 4.Nf3

The way I learned to play this opening was to hide the White pieces behind the Pawns. I can find some more information about this opening if you like.

[e.g. 4.e3 5.Ne2 6.h4 7.Nf4]

4...e5

This looks natural but encourages White to think about those weak f-Pawns.

5.e3 Bg4 6.Be2 Bg7

[6...Bh6]

7.h3 No need for that one.

[7.Nbd2;

7.0-0]

7...Bh5 8.Nc3 Nc6 9.Qd2

[9.d5 Ne7 10.Nh4 Bg6 11.Bd3]

9...0-0 10.0-0-0 Re8 11.g4 Bg6

12.Bd3??

[12.Nh4 is strategically perfect, exploiting the damaged Pawns, but fails to the discovered attack on the Knight after ...f5.]

12...e4 Oops. **13.Nxe4 Bxe4 14.Bxe4 Rxe4 15.Qd3 d5 16.c4 Re8 17.c5 b6 18.cxb6 cxb6 19.Rdg1** Great attitude. **19...Rc8 20.Kd1**

[20.Kb1 looks safer.]

20...Qd6 21.g5 Ne7 22.gxf6

[22.Nh4 looks a little easier.]

22...Qxf6 23.Ng5 Qf5

Once the Queens come off, White is doomed.

24.Qxf5 Nxf5 25.Nf3 Kf8 26.Rf1 0-1

(6) Devon - Somerset,B [C55] U14 ben
Chepstow (3.6), 31.01.2004

1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4 Nf6

5.c3 Too slow.

[5.0-0 Nxe4;

5.e5]

5...Nxe4 6.cxd4

[6.0-0 still looks best]

6...Nf6 7.Nc3 d5 8.Bb5 Bg4 9.Bg5 Be7 10.Qe2 0-0

11.h3

Ah, yet another Pawn move... not the way to play this opening. White more or less forces Black to win a Pawn.

11...Bxf3 12.Qxf3 Nxd4 13.Qd3 Nxb5 14.Qxb5 Rb8 15.0-0 h6 16.Bh4 c6 17.Qd3 Qd6 18.Rfe1 Rfe8 19.Rad1 Qb4 20.Bxf6 Bxf6 21.Rc1 Qc4

After this I couldn't follow the score... 0-1

[...Some moves unrecorded...] **0-1**

7. Richard

I thought your attitude and ideas at the board were great. Of course, experience will keep you out of trouble, but I thought your basic chess sense was pretty good, and I was very pleased with your fight back in the first game.

(28) Devon - Glamorgan,C [B51] U14
richard Chepstow (1.7), 31.01.2004

You drifted into trouble, I suspect because you weren't sure what you should be doing in the opening, but once you were in trouble you fought back very well and were on the verge of winning at one point.

1.e4 c5 2.Nf3 d6 3.Nc3 Nc6 4.Bb5

Not a bad system for White.

4...Bd7

[4...Nf6 5.e5 dxe5 6.Nxe5 Bd7 7.Nxc6;

4...g6 5.d4 cxd4 6.Qxd4 Nf6 7.e5 dxe5 8.Qxd8+ Kxd8 9.Bxc6 bxc6 10.Nxe5;

4...e5]

5.0-0 A little too straightforward.

[5.Bxc6 5...Bxc6 6.d4 cxd4 7.Qxd4 Nf6 8.Bg5 e6 9.0-0-0 Be7 10.Qd3 ideas Nd4, f4 (Movsesian) 10...Qa5 11.Kb1 0-0 12.h4 Rac8 (12...Rfd8 13.Nd4 Rab8 14.f4 b6 15.g4 Qc7 16.Bxf6 Bxf6 17.g5 Bxd4 18.Qxd4 b5 19.Rhg1 e5 20.Qf2 exf4 21.g6 fxg6 22.Qxf4 Voloshin,L-Kjartansson,G/Valoz Cup 2000/The Week in Chess 301/1-0 (55)) 13.Nd4 Rfd8 14.f4 a6 15.f5 e5 16.Bxf6 Bxf6 17.Nde2 17...b5 18.g4 b4 19.Nd5 Bxd5 20.Qxd5 Rc5 21.Qb3 Qb5 22.Nc1 a5 23.g5 a4 24.Qf3 Be7 25.f6 Bf8 26.h5 Qc4 27.Rh2 Qe6 28.Rf2 Rd7 29.Qg3 g6 30.Nd3 Movsesian,S-Banas,J/Nat. Ch. Open 1995/1-0 (51)]

5...a6

6.Bc4

Now White's Bishop gets chased by the Black Pawns.

[6.Bxc6! Bxc6 7.d4 is the previous line with White having castled.]

6...b5 7.Bd5 e6 8.Qe2

A good idea with a flaw.

[8.Bxc6 Bxc6 9.d4 b4 10.d5]

8...exd5 9.exd5+ Nce7 10.d4 b4 11.Ne4 Qc7 12.dxc5 Bb5 13.c4 bxc3 14.cxd6

[14.Qe3 is better, but it's all rather hairy]

14...Bxe2 15.dxc7 Bxf1 16.Kxf1 cxb2 17.Bxb2 Kd7

[17...Nxd5]

18.Ne5+

Suddenly White is right back in it.

18...Kxc7

19.d6+ Irresistibly natural.

[19.Rc1+ is even better, as it happens, because something like 19...Kb6 is mate in five! 20.Nd7+ Ka5 21.Rc5+ Kb4 22.Bc3+ Ka4 23.Ra5# But I don't expect you to see this sort of thing over the board.]

19...Kd8 20.Nxf7+ Ke8 21.dxe7

[21.Nxh8 again is a better option, but you need a lot of vision and courage to see this 21...Nf5 22.Rd1]

21...Kxf7 22.exf8Q+ Kxf8 23.Nc5

[...Some moves unrecorded...]

and I thought Black might start to unravel and win, but it seems you drew pretty soon after this: I guess you'd settle for that after losing a piece so early.

1/2-1/2

(29) Somerset,B - Devon [C30] U14
richard Chepstow (2.7), 31.01.2004

Not an easy opening to defend against, because Black's formation seems so defensive. It's always nice to have something positive to do in the opening.

1.e4 e5 2.Bc4 Nf6 3.Nc3 Nc6

[3...Nxe4 4.Qh5 is more complicated than the usual Two Knights' trick. The main line leads to a strong attack for Black, at the cost of the Exchange.]

4.f4

[Next time, try 4...Nxe4! e.g. 5. Nf3 Nxc3 6. dxc3 Qe7! idea d6/Be6 and if 7. O-O?? Qc5+!]

4...Bc5 5.Nf3 d6 6.d3 Bg4

I quite like this position for White.

7.Qe2? 0-0

[7...Nd4! makes White's last move pointless]

8.Be3 Nd4 9.Bxd4 Bxd4 10.h3 Bxf3 11.Qxf3

11...Qd7

White has an obvious plan and Black doesn't, so

[11...Bxc3+ 12.bxc3 exf4 13.0-0 c6 14.Qxf4 d5 was a better try for equality]

12.g4 exf4 13.Qxf4 Be5 14.Qe3 Bxc3+ 15.bxc3 Rfe8 16.g5 d5 17.gxf6 dxc4 18.Rg1 Qe6

That's all I have of this one, so I assume White didn't find

19.Qh6 Qxf6 20.Qxf6 g6

Anyhow, happily ...

[...Some moves unrecorded...]

0-1

(30) Somerset,B - Devon [C50] U14
richard Chepstow (3.7), 31.01.2004

A shame, you lost a piece but all your moves before and after that point were sound. Chess is an unforgiving game!

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Nc3

4...Bc5

[4...Nxe4 is the best response]

5.d3 h6

unnecessary but not particularly harmful

6.0-0 0-0 7.Be3

7...Bxe3

This gives White some extra plans along the f-file.

[7...Bb6]

8.fxe3 d6 9.h3 Qe8

A bit vague, what was your idea?

10.d4 Be6??

[10...exd4 uncovers an attack on the e-Pawn 11.exd4 Nxe4 12.Re1 Nxc3]

11.d5

oops

11...Bd7 12.dxc6 Bxc6

The rest of the game seems reasonably well played by both sides.

13.Nd5 Nxd5 14.Bxd5 Bxd5 15.exd5 e4 16.Nd4 Qe5 17.Qg4 Qxd5 18.Nf5 Qe5 19.Nxh6+ Kh8 20.Nf5 Qf6 21.Qh5+ Kg8 22.Nh4 Qxb2 23.Rae1 Qxa2 24.Nf5 g6 25.Qh6 gxf5 26.Rxf5

[26.Qg5+ Kh8 27.Rf4 is more accurate]

26...Qe6 27.Rg5+ Qg6 28.Rxg6+ fxc6 29.Qxg6+ Kh8 30.Rf1 1-0

The main line of the Giuoco Pianissimo, which I call Old Stodge, is equal after

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Nc3 Bc5 5.d3 d6 6.Bg5 h6 7.Bxf6 Qxf6 8.Nd5 Qd8 9.c3 Ne7!

Both sides are trying to advance the d-Pawn.

8. Sophie

I liked your attitude at the board, careful and methodical, and it got you some good positions against some good players. Despite your care, you did make some blunders, and I wonder what you can do about this -- you shouldn't play slower, so what do you do when you are thinking to check for good replies for your opponent? Also, I think your openings are not doing you any good: that Old Stodge stuff is no use to anyone.

(34) Somerset,B - Devon [C50] U14
sophie Chepstow (1.8), 31.01.2004

A blunder in a fairly sound position... not a lot to add, but the opening has some points you should notice for next time.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6

4.Nc3 Bc5

[4...Nxe4 is best for Black here.]

5.d3 h6

Unnecessary, but in this closed position, White can't take advantage of this waste of time.

6.0-0 0-0 7.Be3 b6

[7...Bb6]

8.d4

White should have aimed for this break much earlier (with 3. d4, or 4. d4).

8...Nxd4 9.Nxd4 exd4 10.Bxd4 d6 11.Bxf6 Qxf6 12.Nd5 Qg6

[12...Qxb2!;

12...Qd8? 13.b4]

13.Ne7+

Oops

13...Kh8 14.Nxg6+ fxc6 15.h3 Bb7 16.Qg4 Rf6

[...Some moves unrecorded...]

I didn't get any more than this, but I guess you have seen enough. You were playing very carefully throughout the tournament, so I was surprised you missed this... Ah well, it happens to us all occasionally.

1-0

(35) Devon - Glamorgan,C [C50] U14
sophie Chepstow (2.8), 31.01.2004

This was a really determined effort, and you fully deserved your win. Although you made a big mistake you kept going and turned the whole game around again, which was good to watch.

1.e4 e5 2.Nf3 Nc6 3.Bc4 h6 Yeuch. 4.0-0 Nf6

5.Nc3

[5.d4 seems a good way to go on, if Black is wasting time with ...h6]

5...Bc5 6.a3

I hate to see people moving Pawns on the sides when there are things to do to get on with your development... what was your idea here?

[6.d3]

6...a5 7.b3 0-0 8.Bb2

This development is not so focussed on the centre as d3/Be3

8...d6 9.h3

Not another Pawn move at the edge... I don't mean to be rude, but I always think moves like this mean that a player doesn't really know what they should be doing. So, is this a good opening system for you?

9...Qe8 10.Nb5 Qe7 11.d3 Bb6 12.Qd2

**Be6 13.Rfe1 Bxc4 14.bxc4 Na7 15.Nc3
c6 16.a4 g5 17.Ba3 Bc5 18.Bxc5 dxc5**

All of that bit made sense to me.

19.Rab1 Rfd8 20.Rb2 Rd7 21.Reb1 Rb8

I might have got this move order wrong.

**22.Ne2 Qd8 23.Nxe5 Re7 24.Qc3 Qc7
25.Nf3**

You were playing here with bags of patience and care, which I like.

25...Kg7 26.Kh1 Kg6

27.d4

Takes a defender away from Pe4.

[27.Ng3]

**27...Nxe4 28.Qa3 Nxf2+ 29.Kg1 Rxe2
30.Kf1**

[30.Rf1]

30...Rbe8 31.Ne5+

Cracker!

**31...R8xe5 32.dxe5 Qxe5 33.c3 Rxb2
34.Qxb2 Nd3 35.Qc2 Qf4+ 36.Kg1 Qe3+
37.Kh1**

You were last to finish by a long way...
Good! There were lots who rushed and lost.

37...Kf6 38.Rf1+ Ke5 39.Rxf7

Black is suddenly faced with lots of threats.

39...Ne1

Overlooking one of them...

40.Qd1

[40.Qf5+ Kd6 41.Rd7#]

40...Qxc3 41.Re7+ Kf5 42.Qxe1

[42.Qd7+ actually forces mate, but you'd need a computer to find it.]

**42...Qxe1+ 43.Rxe1 Nc8 44.Rf1+ Kg6
45.g3 Nd6 46.Rc1**

Rooks aren't such good defenders, although you do want to keep Pawns on, as a rule.

[46.Rb1]

**46...Ne4 47.g4 Nf2+ 48.Kg2 Nd3 49.Rb1
Nf4+ 50.Kg3 Ne2+ 51.Kf2 Nc3 52.Rxb7
Nxa4 53.Ra7 Nb2 54.Rxa5 Nxc4
55.Rxc5 Nb6?? 56.Rxc6+ Kf7 57.Rxb6
Ke7 58.Rxh6 Kf7 59.Ra6 Ke7 60.Ke3**

I liked that you went for mate here, some players waste time collecting extra Queens.

**60...Kd7 61.Kd4 Kc7 62.Kc5 Kb7
63.Rh6 Kc7 1-0**

(36) Devon - Glamorgan,C [B20] U14
 sophie Chepstow (3.8), 31.01.2004

Most players when faced with the Sicilian got into a worse mess than you did!
 Although you missed a couple of Black tactics, you had quite a good position throughout and even towards the end had good drawing chances.

1.e4 c5

Not seen it before? Have a think about what to do next time.

2.c4 d6 3.Nf3 e5 4.g3 Nc6 5.Bg2 Bg4
6.0-0 Nd4 7.d3 Qf6 8.Nbd2 Nxf3+
9.Nxf3

[9.Bxf3 escapes the pin, and invites Black to swap off White's bad Bishop]

9...h6 10.Bd2 Ne7 11.Bc3

[11.Be3]

11...Nc6 12.Re1 Nd4 13.Bxd4 cxd4
14.Rc1 Rc8 15.b4 Be7 16.Rb1 0-0
17.Qe2 a6 18.Rec1 Rc7 19.Qd1 Rfc8
20.b5 axb5 21.Rxb5 Bd7

22.Rb3? Ba4

This is not good for White, but not a disaster.

23.Rcb1 Bxb3 24.axb3 Qg6 25.b4 Bg5
26.b5 f5 27.Bh3 Qh5 28.Bxf5 Rf8
29.Nxg5 Qxg5

White has good compensation for the exchange. **30.Be6+**

[30.h4 Qf6 31.Qd2]

30...Kh8 31.b6 Re7 32.Bf5

[32.Bd5 and White's Bishop is worth more than either of the two Black Rooks.]

32...g6 33.Bg4 h5 34.Be2

[34.Bh3]

34...Qf6 35.Qe1 Ref7 36.Bf3??

[36.f3 is still a game]

36...Qxf3 37.Rb2 Qxd3 38.Qe2

[38.Qc1 Qxe4 39.Qh6+ Kg8]

38...Qxe2 39.Rxe2 0-1

9. Karl

I'm sorry I didn't get to see more of your games: it's hard to suggest many things you could improve on in the game you won, but I liked your attacking attitude there. I expect you to do well with that opening in the future. If you have other games written down, I could look at two or three of those for you.

(22) Glamorgan,C - Devon [B00] U14
 karl Chepstow (1.9), 31.01.2004

You seemed to lose a Pawn early on, but then played sensibly enough. I missed why you lost in the end.

1.e4 [...Some moves unrecorded...]

1-0

(23) Devon - Somerset,B [C34] U14 karl
 Chepstow (2.9), 31.01.2004

You played with a lot of energy in the opening and deserved to win: you should dig a little deeper to find the very best moves when you play a gambit opening.

1.e4 e5 2.f4

I was pleased to see this opening.

2...exf4 3.Nf3 Nc6

A natural move but without a lot of point.
 [3...Be7 is a good defence.]

4.d4 d5 5.Nc3 dxe4 6.Nxe4 Bg4 7.Bxf4 Nf6

I guess I got the move order wrong?

8.Be2 Bxf3

[8...Nxe4]

9.Bxf3 Nxd4 10.0-0 Nxf3+ 11.Qxf3

[FIRST DIAGRAM]

11...Nxe4

Each exchange has made White's position better.

12.Qxe4+ Be7

[SECOND DIAGRAM]

13.Qxb7

This is a good move, but

[13.Rad1 is even better 13...Qc8 14.Rfe1 Qe6 15.Qxb7 Qb6+]

13...Bc5+ 14.Kh1 Rb8

Forces White to play a good move.

15.Qc6+ Qd7 16.Qxd7+

[16.Qxc5 seems a better move...]

16...Kxd7 17.Be5 Rhe8 18.Bxg7 Rxb2?? 19.Bxb2

Pieces can move backwards too

19...h5 20.Rxf7+ Kc8 21.Rf5 Bb6 22.Rxh5 a5 23.h3 Rf8 24.Rd5 c6 25.Rd3 Kb7 26.Rb1 Bc7 27.Bg7+ Kc8 28.Bxf8 1-0

(24) Glamorgan,C - Devon [C41] U14
 karl Chepstow (3.9), 31.01.2004

By the time I arrived at the board, I was already mystified by an opening where White's Knights seemed to have got in a right muddle.

Later, Black seemed to have more space, but the next time I looked at it you were a Rook and Bishop behind.

1.e4 e5 2.Nf3 d6

[...Some moves unrecorded...]

1-0

10. Alex

I didn't see a lot of your win, but the first-round loss showed a lot of good attitude. The second-round game, well, I keep mentioning these clockwork attacks, I guess now you know about this one you might be able to dodge next time.

Devon - Somerset,B [B12]

U14 alex Chepstow (1.10), 31.01.2004

You played with a lot of energy, which was good to see... a shame you got overstretched.

1.e4 c6 2.d4 d5 3.e5 Bf5 4.g4

Do you know the Caro-Kann defence, Alex? This is a sharp and recently popular line against it!

4...Be4 5.f3 Bg6 6.f4

[6.h4 is more consistent

6...h6 7.h5 Bh7 8.Bd3 Bxd3 9.Qxd3

but really, I was so pleased with this: when most players faced an unfamiliar opening they just played normal-looking moves that mostly got them into trouble. But you looked at the position properly, had a think about what you could see, and tried to set your opponent some problems. That attitude will get you a long way in chess.]

6...h6 7.Nf3 e6 8.Nc3 Nd7 9.Bh3 f5 10.gxf5

[10.exf6 would allow you to take aim at the e-Pawn.]

10...Bxf5 11.Bxf5 exf5

12.e6

A bit of a swipe in the dark, this Pawn cannot co-ordinate with your other pieces for an attack.

[12.Be3 Qb6 13.Qd3 g6 14.0-0-0#;

12.Rg1]

12...Qe7 13.Qe2 Nb6 14.b4

Vigorous but really doesn't help.

[14.Qe5]

14...Qxb4 15.Bd2 Qb2 16.Rc1 Bb4 17.Qd3 Bxc3 18.Qxc3 Qxa2 19.Ra1 Qc4 20.Qxc4 Nxc4

21.Ne5 Don't seek exchanges.

[21.Rb1;

21.Rg1]

21...Nxe5 22.fxe5 Ke7 23.Rg1 g5 24.Rb1 Rb8 25.Ra1

[25.Bb4+ Kxe6 26.Bd6 Ra8 27.Rxb7 is very awkward for Black, e.g. 27...g4 28.Kd2 h5 29.Ke3 Nh6 30.Re7#]

25...a6 26.Bb4+

Right idea, wrong timing.

26...Kxe6 27.Bd6 Rd8 28.Kd2 Nf6 29.Rge1 Ne4+ 30.Kd3 Nxd6 31.exd6+ Kxd6 32.Rab1 Kc7 33.Re7+ Rd7 34.Rxd7+ Kxd7 35.Rxb7+ Kd6 36.Ra7 Re8 37.Rxa6 Re1

After a long series of natural moves, White is unfortunate to emerge into a lost endgame.

38.Ra7 Rh1 39.Rf7 Rxb2

[...Some moves unrecorded...]

And the next time I looked, White was a Rook down... **0-1**

(2) Somerset,B - Devon [A40] U14 alex
Chepstow (2.10), 31.01.2004

You didn't really get a chance to get going in this game, having walked into an attack.

1.d4 e6

Probably not the best move order unless you are fishing for a Classical Dutch.

[Just 1...d5 is best, whatever you want to follow it up with.]

2.e3 d5 3.Bd3

This is the disadvantage of 1...e6;
this can be anticipated by 2...Bf5.

3...Nf6 4.Nd2 Nc6

This is not normally good;

you need a Pawn break to open a file for your Rooks, and c7-c5 is easiest.

5.f4 Bd6 6.Ng3

6...0-0 Castling into it...

[6...Nb4 7.Be2 c5 allows you to repair your omission.]

7.0-0 Nh5 8.Ng5 f6

Well, I see your point with this idea, but it just invites the Queen to attack your King.

9.Qxh5 fxe5

10.Qxh7+

White missed mate in two here.

[10.Bxh7+ Kh8 11.Bg6+ Kg8 12.Qh7#]

10...Kf7 11.fxe5+

[11.Bg6+ is still mate, this time in four moves]

11...Ke8 12.Bg6+ Kd7 13.Qxg7+ Qe7

Black has escaped the mate but has a lost endgame.

**14.Qxe7+ Kxe7 15.Rxf8 Kxf8 16.b3 Nb4
17.Rb1 Kg7 18.Bd3 Nxd3 19.cxd3 e5
20.Bb2 exd4 21.Bxd4+ Kg6 22.h4 Bf5
23.e4 dxe4 24.dxe4 Bd7 25.e5 Bb4
26.Nf3 c5 27.Rd1**

A clever idea

27...Re8 ...1-0 1-0

(3) Devon - Somerset,B [C42] U14 alex
Chepstow (3.10), 31.01.2004

I don't have much of this one, but when surprised in the opening, you needed something more aggressive - like your first game.

1.e4 e5 2.Nf3 Nf6

3.d3

Did I get this right? White cannot hope to set problems with this move, and if you don't set problems, you are less likely to see your opponent make a mistake.

**3...Bc5 4.Be3 Bxe3 5.fxe3 d5 6.exd5
Nxd5 7.Nc3 Nc6**

[7...Nxe3 8.Qe2 Nxf1 9.Qxe5+ Qe7
10.Qxe7+ Kxe7 11.Rxf1 when White has a small advantage in the endgame]

**8.Nxd5 Qxd5 9.e4 Qa5+ 10.Qd2 Qxd2+
11.Nxd2**

[...Some moves unrecorded...]

White is probably slightly worse because of the bad Bishop, but that clearly didn't matter in the long run... 1-0 **1-0**

11. Joseph

In general, I was pleased with your chess: there are things about the openings you don't know (same for me) and you made a few mistakes (so do I) but I think the main thing that's wrong with your game is lack of practice, and that is easy to fix.

(19) Somerset,B - Devon [D02] U14
 joseph Chepstow (1.11), 31.01.2004

You did most things right here and didn't deserve to lose... I'm sure you won't let this happen again.

1.d4 d5 2.Nf3 Bf5 3.Bf4 e6 4.e3 Nc6

As ever, the Knight should go behind the c-Pawn in d-Pawn opening.

5.Bb5

normally White tries to get this piece to d3 but there is no point here.

5...Bd6 6.Bxd6 Qxd6 7.0-0 Nf6 8.Bxc6+ Qxc6 9.Ne5 Qd6 10.Nc3 0-0 11.Nb5 Qb6 12.a4 c6 13.Nd6 Rad8 14.Nxf5 exf5 15.c4 Nd7 16.a5 Qc7 17.f4 Nxe5

understandable, that Black Knight is very short of space.

[17...f6 exposes the weak e-Pawn on the half-open file.]

18.fxe5 Qd7 19.a6

19...bxa6

[19...b6]

20.Rxa6

Suddenly White has been handed a plan: attacking the weak a-Pawn.

20...Qb7 21.Qa4 Rc8 22.cxd5 cxd5 23.Rxa7 Qxb2 24.e6

[...Some moves unrecorded...]

Later, Black was winning but short of time, so you should have taken the draw if only you realised it was available....

[See the main notes above.]

1-0

(20) Devon - Glamorgan,C [C02] U14
 joseph Chepstow (2.11), 31.01.2004

The opening couldn't have gone worse really, but you kept going well and took most of your chances.

1.e4 e6 2.d4 d5 3.e5 c5 4.c3 Nc6 5.Nf3 Bd7 6.Bf4

It's not the e-Pawn that needs support.

6...Qb6 7.Qc2 Nge7

[Taking the d-Pawn is perfectly safe.

7...cxd4 8.cxd4 Nxd4 9.Nxd4 Qxd4 10.Qc7 Qb4+ 11.Nc3 Rc8]

8.Bd3 Nf5 9.Nbd2

It's interesting how often Black wins the d-Pawn in the French Defence.

9...cxd4 10.cxd4 Ncxd4 11.Nxd4 Nxd4 12.Qc3 Bc5 13.0-0

13...0-0-0??

Oh, Black needs a better danger detector! Putting the King on an open file is risky enough, but one where there is already a White major piece... bound to lead to trouble.

14.Rac1 Bc6 15.Qxc5 Qxc5 16.Rxc5 Kb8 17.Bg5 Rc8 18.Be3 Nf5 19.Bxf5 exf5 20.Ra5 b6 21.Ra3 Rhd8

22.Rc3?? d4 23.Rxc6

Good reaction! I don't expect you never to get into trouble, but I do expect you to react properly to it... well done.

23...Rxc6 24.Bg5 Re8 25.Nf3 d3 26.Nd4 Rc4 27.Nf3 Rc2 28.Rb1 h6 29.Be3 g5 30.g3 g4

31.Nd4

[31.Ne1 rounds up the d-Pawn]

31...Rc4 32.Rd1 Rxe5 33.Rxd3 Rb4?? 34.Nc6+

ouch

34...Kb7 35.Nxb4 a5 36.Nc2 Re4 37.Rd7+ Ka6 38.Bf4 Re2 39.Rc7 Re6 40.Nd4 1-0

(21) Somerset,B - Devon [C55] U14 joseph Chepstow (3.11), 31.01.2004

Not a lot to say, but do look out for that fourth move.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Nc3

[4...Nxe4!]

4...Bc5

[...Some moves unrecorded...]

was as much as I saw of the moves: it seemed fairly orthodox, then you were an exchange up, and then you won.

0-1

12. Ryan

I don't have a lot of your moves to comment on, but I would like to see you give up playing Old Stodge.

If you have other games written down, I could look at two or three of those for you.

(31) Devon - Glamorgan,C [C50] U14
 ryan Chepstow (1.12), 31.01.2004

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.Nc3 Nf6 5.d3

Don't castle first in this line.

5...0-0 6.0-0 d6 7.Re1 Ng4 8.Be3 Nd4 9.Rc1 Nxe3

[9...Nxf3+ 10.Qxf3 Qh4 11.h3 Nxe3 12.fxe3 Be6]

Too mysterious.

13...Qf6 14.Na4

You were playing nicely slowly and carefully, but

14...Ba5

[14...Bxd4+ 15.Nxd4 Qxd4+ 16.Qxd4 Nxd4]

15.Re2 a6 16.Bd5

16...Nxd4?

Black falls apart here.

17.Nxd4 b5?? 18.Bxa8 bxa4 19.Rf2 Qe5 20.Nc6 Qc5 21.Nxa5 Qxa5 22.b3 axb3 23.axb3 Qc5 24.b4 Qe3 25.Qd2 Qa7 1-0

(32) Somerset,B - Devon [C55] U14
 ryan Chepstow (2.12), 31.01.2004

1.e4 e5 2.Nf3 Nc6 3.Nc3 Nf6 4.Bc4 Bc5

[4...Nxe4]

5.Ng5

White doesn't have enough of an advantage to make this work.

5...0-0 6.0-0 d6 7.Nd5 Be6 8.Nxf6+ Qxf6 9.Bxe6 fxe6 10.Qh5

I think I got this far with the move order correct... if so, you had here

10...Bxf2+

Later you were in a double-Rook endgame, and then you won... I'm sorry I didn't notice more than this.

[...Some moves unrecorded...]

0-1

(33) Devon - Glamorgan,C [C50] U14
 ryan Chepstow (3.12), 31.01.2004

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6

4.Nc3 Bc5

[4...Nxe4 as usual, this is the best move.]

5.d3 0-0

Castling is too early here

6.0-0 d6

White needs a plan here

7.Qe1

[...Some moves unrecorded...]

Next time I looked you were a Queen down...

[7.Bg5 fits in nicely, with ideas of Nd5 and c2-c3]

0-1

Games of the round

One game each round that stuck in my mind:

Round One: Harry's clearance combination in the middle of a dangerous attack leaving a winning endgame

Round Two: Karl's brisk King's Gambit. I'd like to see every junior play this way... (Honourable Mention: Sophie's determined effort)

Round Three: David's win as Black against a good Somerset player, where he had all the punchy ideas and his opponent wobbled all over the place.

Postscript

Well, I hope some of that is useful, and like I say, do read the notes on other people's games – you could be in the same position next game!

West Of England & South Wales Team Tournament

Stoke sub Hamdon, Saturday 29th January 2005

Introduction

- I've given each of the games a quick run-through, and made some overall comments.
- 3 games is not a lot to go on, so if you think I have got things wrong, you may know better than me.
- Do read the comments on other player's games
- If you want me to explain any more about what I've said, please feel free to ring on 01392 431 785 or e-mail me at chessnut@blueyonder.co.uk
- If you want to know what books or other materials might help you, I can suggest a few things (but I'd hate it to feel like homework!)
- I've got a bunch of stuff for young people on the Internet at <http://www.ex.ac.uk/sheu/DR/juniors.html>. If you don't have access to the Internet, or have trouble using it, then get in touch with me directly and I can print it out or recommend some other study material.
- In fact, a lot of last year's comments apply to this year's games, so I have tried to say different things this year. If you didn't see the document from 2004, you can read it at http://www.ex.ac.uk/sheu/DR/Praxis/u14_20043.pdf. Again, if you don't have access to the Internet, get in touch and I'll sort out a paper copy.

Dave Regis, 6th February 2005

General

Well, it was great to be associated with a team so clearly on winning form, even if I couldn't claim any credit for your performance. Well done to you all, it was a really terrific performance. I know how hard some of the games were, and you all contributed a win to the total. Excellent.

Last year I was a bit disappointed by some of the blunders (especially to pawn forks) and some of the dismal openings played. What a transformation! Very few of those openings this year, and the only pawn forks I saw were made by Devon players (Ben and Rhys I remember).

Games of the round

One game each round that stuck in my mind:

Round One: Callum's game, a careful exploitation of superior development then material advantage in a long endgame.

Round Two: Robert's long build-up to a successful central breakthrough, despite being behind in material.

Round Three: Matthew's long siege of f2, having had some discomfort against his own f7 square in the opening. A game with a real "theme".

Openings

This is what you played:

| Game | Player | Colour | Winner | ECO code | Opening | Variation |

ECO = Encyclopedia of Chess Openings

General comments on the openings:

I don't need to tell you anything new here. The things you did wrong, for the most part, were things I think you've known about for a long while: not finishing your development, making too many pawn moves, breaking open the centre when you have no advantage, and so on. I have pointed all these things out but you know why you should do these things.

Other than that, I'd just have a think about how well you understand the plans for both sides in your favourite openings. How far down the main line of your openings can you play from memory? When you get to that position, do you know the most common plans, and the most common moves, that happen in those sorts of positions? If not, find a book or a player who does.

The most common openings were:

Two Knights' Defence
(5 games)

I really like people to play this line. Although I think people didn't play it ever so well, results were very good!

I like it because Black counterattacks and White's most natural move (4.Nc3) is no good at all.

(If you don't know why, the secret is explained in this year's notes below.)

If you set your opponent problems, they will go wrong.

French Defence
(5 games)

I think this is another fine line for juniors to play. Normally I say, play open games because they are easy to understand.

But the French is a very safe, solid defence which is also easy to understand

We normally get a blocked position where Black has a clear plan to follow. It's a defence that also produces mistakes from White, so it's also a good opening to use when you want to play for a win.

Scotch Game/
Scotch Four Knights
(4 games)

Again, I think this is just the way young people ought to play – fast and open. White gets open lines and easy development with an advantage in the centre.

Black also has good chances because the position is exciting and because Black is a little ahead in development after the next move, usually either ...Nf6 or ...Bc5.

Queen's Gambit Declined,
Exchange Variation
(3 games)

Just three games here, all from the top boards.

This is not an easy line to play for either side. The basic idea is usually that White will play a 'minority attack' with b2-b4, but in recent years White plays more often in the centre with f3 and e2-e4.

In all double-d-pawn games, Black really shouldn't put the Nc8 on c6. This is because:

1. You need to open a file for your rooks at some point, and often that's the c-file, because it's harder to defend e5 often enough to play . . .e7-e5
2. If the pawns have been swapped and the e-file is open, then you support the d-pawn with a pawn on c6 and use the Ra8 on the e-file.

Ruy Lopez (3 games),
Steinitz' Defence (2 games)

The Ruy Lopez is a proper grown-up opening and it's hard to say anything realistic about it in a short time, but I think the Steinitz Defence is a nice straightforward line to use with lots of chances to play for a win, although you often have to put up with a bit of cramp.

There is an evil trap to avoid:

<http://www.ex.ac.uk/sheu/DR/Canon/canon315.html>

and some information about the Ruy Lopez in general at:

<http://www.ex.ac.uk/sheu/DR/Openings/ruylopez.html>

Sicilian Defence (3 games),
Dragon Variation (2 games)

All three games in this line were contributed by Ben.

The Bishop goes to its best diagonal at g7 and usually leads to a sharp game with good chances for Black.

There's a little description of this line at

http://www.ex.ac.uk/sheu/DR/Openings/sicilian_ToC.html

Old Stodge (3 games)

I wrote about this last year, and haven't got anything really to add. I don't think that it's an easy line to play at all. So, please:

No more Old Stodge!

<http://www.ex.ac.uk/sheu/DR/Openings/nomoregp.html>

Middlegame

Again, a lot of the things you were doing wrong I'm sure you knew you were doing wrong: making blunders, not thinking for your opponent (which is more or less the same thing), being too anxious, playing aimlessly, weakening your King...

It's hard to blunder-proof your game entirely, but (1) look at least once at every check and every capture (Michael's second game), (2) do tactics puzzles from books, (3) play games against computers.

It was good when I saw you setting your opponents problems and forcing mistakes. It was also nice when I saw a player pick a plan and stick to it: didn't happen so often, given the uneven course of many games, but good to see.

Endgames

By the endgame, lots of the games were decided already, or we had lost track of the moves, but a couple of things can be seen:

- ♦ don't make weaknesses (see Michael's second game and Sophie's first)
- ♦ in Rook endgames, make sure your Rook doesn't become passive -- Rooks are rubbish defenders (Ben's second game)
- ♦ in Queen endings, don't let your opponent in near your King (Sophie's first game again)

The Games

Some comments are made with punctuation:

- ! Good move !? Tricky or interesting move
 ? Poor move ?! Dodgy or risky move

Harry Mann

Nice little set of games, I think – if I had more moves to go on I could say more, but what I saw was fine.

The sacrifice in your first game was optimistic but you played all your pieces to strong squares and had a good game in that and the second game.

The third game was revealing I think – you're playing the Queen's Pawn game without knowing some of the rules. Do you have a good book on this opening? Why do you want to play the d-pawn openings as White?

(Round 1, Board 1) [A85] [White: Harry Mann]

White developed well and played a speculative sacrifice but sadly missed a discovered attack.

1. **d4 e6**
 2. **c4**

2. Nf3 is reckoned to be more accurate, because Black might want to get rid of the Bf8 on b4.

2. ... **f5**
 3. **Nc3 Nf6**
 4. **Bg5 Be7**
 5. **e3 O-O**
 6. **Bd3 Nc6**

The next two moves suggest to me that neither player knows what to do here. White can play a3 (idea b4) and Black can play a6 (idea ...Qe8), but neither of you followed it up correctly.

7. **a3**
 [7.Nf3;
 7.d5]

7. ... **a6**

8. **Nge2**

Not sure why not Nf3.

8. ... **Nh5**

9. **Bf4 d6**

10. **Bg3 e5**

Black has equalised.

11. **f3 h6**

12. Bf2

I might have got the move order wrong around here.

- 12 ... Nf6
- 13. Qc2 exd4
- 14. exd4 d5
- 15. O-O-O dxc4
- 16. Bxc4+ Kh8
- 17. Nf4 Kh7

18. Be6

[18.d5]

- 18 ... g6
- 19. Nxc6

This sacrifice is enterprising but not justified.

- 19 ... Kxc6
- 20. Qxf5+ Kg7
- 21. g4 Qd6

At some point soon after this, the black N jumped from f6 discovering an attack from the Rf8 which took the queen. . . was this forced?

[. . . moves omitted. . .]

...White resigns.

**(Round 2, Board 1) [D50]
White: Harry Mann]**

Good sensible active moves produced a strong position and you seemed to follow through well.

- 1. d4 d5
- 2. c4 e6
- 3. Nc3 Nf6
- 4. Bg5 h6
- 5. Bh4

5. Bxf6 is probably the best move in this move order.

- 5 ... Bb4
- 6. a3?!

Forces Black to make a move he might want to do anyway.

- 6 ... Be7
- 7. e3 O-O
- 8. Bd3 Nc6?!

There's a general rule that you shouldn't put your Knight in front of your c-pawn in double d-pawn positions, because you need at some point to open a file, and you can open up the c-file easier than the e-file.

- 9. Nge2 a6
- 10. Bxf6 Bxf6
- 11. cxd5 Ne7
- 12. dxe6 Bxe6
- 13. e4

That's as much of your score as I could fathom: a shame, because it looked like a really attractive game: you dominated the board with a big pawn wedge.

[. . . moves omitted. . .]

...Black resigns.

**(Round 3, Board 1) [D30]
[Black: Harry Mann]**

An error in the opening meant you struggled to get free throughout this game.

- 1. d4 d5
- 2. c4 e6
- 3. Nf3

3. Nc3 is always right, while you might want to put the Ng1 on e2.

- 3 ... Nf6
- 4. Bg5 Be7
- 5. cxd5 exd5
- 6. Nc3 Nc6?

See above.

- 7. Qc2?!

Makes a point of Black's knight's position.

- 7 ... h6

Not accurate

- 8. Bf4
- [8.Bxf6 Bxf6 9.e3]

- 8 ... a6
- 9. e3 Bd6
- 10. Bxd6 Qxd6
- 11. Qb3 O-O
- 12. Bd3 Rb8
- 13. O-O Bd7
- 14. a3 Na5
- 15. Qa2 Be6
- 16. Ne5 Nc6
- 17. f4

Weakening e4 but a nice attacking idea.

- 17 ... Ng4?
- 18. f5

[18.Nxc6 Bxc6 19.Qxd5]

- 18 ... Ngxe5
- 19. dxe5 Qxe5?!

This is a very hairy position, and there are all sorts of tricks.

20. Rae1

[20.fxe6 Qxe3+ 21.Kh1 fxe6! when Black has three pawns for the piece and White can't easily defend against all Black's threats. (21. . . Qxd3 22.exf7+ actually gives white the advantage) 22.Bc2 Nd4 23.Rfe1 Qf2 24.Bd3]

- 20 ... Bc8
- 21. Qxd5 Qxd5
- 22. Nxd5 Rd8

23. Bc4 b5

Too loosening.

24. Ba2 Rb7

25. Rc1 Bd7

26. f6! Be6!?

27. e4

[27.Rfd1! and Black is falling apart]

27 ... Nd4

[... moves omitted. . .]

...Black resigns.

Callum Picken

I complained a bit last year about you drawing; this year you were still drawing but I have no complaints. You took each game down to the wire and really tried to wrestle the games off your opponents. I thought your attitude was great and I'm just sorry you didn't go home with more points – you deserved better.

Your French Defence is clearly working well; the gambit line you walked into as White is worth looking at again. I'm not totally convinced about you playing 1.d4 but if it usually works, then fine.

(Round 1, Board 2) [D30] [Black: Callum Picken]

You played too loosely in the opening but White didn't take advantage; you did very well to keep pressing and deserved a win which never looked easy.

1. d4 e6

2. c4 d5

3. Nf3 Nf6

4. Bg5 Be7

5. cxd5 exd5

6. Nc3 O-O

7. e3

7 ... c5?

This is a bit too loose. Don't open up the game unless you are ahead in development.

[7...c6 8.Bd3 when Black can exchange the Bc8 by ...Re8, ...Nbd7, ...Nf8, ...g6, ...Ng7 and ...Bf5.

Also, ...Nb5 and ...Ne4 are plans.;

7...Bf5 is desirable but 8.Bxf6 Bxf6 9.Qb3]

8. Bd3?

[8.dxc5 e.g. 8...Qa5 9.Rb1 wins a Pawn.]

8 ... Bg4

9. O-O Nc6

10. dxc5 Bxc5

11. Bxf6 Qxf6

12. Nxd5 Qxb2

One last trick should keep White a pawn ahead:

13. Nf4

[13.Bxb7+ Kxb7 14.Ng5+ Kg8 15.Qxg4]

13 ... Rad8

14. Qe2 Qxe2

15. Bxe2

Black has a small advantage, with the two Bishops. Also, Black's majority is easier to make use of in the ending.

15 ... Bf5

[15...Rfe8± to finish development, is best]

16. Rac1 Bb6

17. Nh4 Be4

18. f3?? Bxe3+

19. Kh1 Bxc1

[19...Bxf4 is more accurate, but your move can't be bad!]

20. Rxc1 Bd5

21. Nf5 Bxa2

22. h3 h6

I got the move order wrong around here I think.

23. Ba6 bxa6

24. Rxc6 Ra8

25. Nh5 g6

26. Nf6+ Kh8

27. Nh4 Bb1

28. f4 Bd3

29. Rc7 Kg7

30. Nd7 Rfd8

... and Black started to get his pieces going, and won a nice endgame.

[... moves omitted. . .]

...White resigns.

**(Round 2, Board 2) [C02]
[Black: Callum Picken]**

A nice long game, not without mistakes but with good effort throughout by both players.

- 1. e4 e6
- 2. d4 d5
- 3. e5 c5
- 4. c3 Nc6
- 5. Nf3 Qb6
- 6. Be2 Bd7

[6. . . Nb6 or playing . . . cxd4 first, is more usual.]

7. O-O

7 ... a6

Not sure what your idea was here. . . if you want to play . . . b5, don't play . . . Qb6.

- 8. Nbd2 cxd4
- 9. Nxd4 Nxd4
- 10. cxd4 Qxd4

A classic junior French game: (1) White plays lots of normal looking moves but drops a pawn, but (2) White has a little lead in development to make up for it. . .

- 11. Nf3 Qxd1
- 12. Rxd1 Bc5
- 13. Bd2 Ne7
- 14. Rac1 Bb6
- 15. Bb4 Bd8

[15. . . Nc6]

16. Bd6 O-O?!

White's activity is now enough to pinch a pawn back.

[16. . . Rc8!]

- 17. Bxe7 Bxe7
- 18. Rc7 Rfd8
- 19. Rxb7 Rab8
- 20. Rxb8 Rxb8
- 21. Nd4

[21. b3]

21 ... Bb5?

Usually the right idea.

[21. . . Rxb2!]

22. Bxb5 axb5

23. b3 g6

[23. . . Ra8]

24. Rc1

[24. Nc6! Rb7 25. Nxe7+ Rxe7 26. a4!]

24 ... Rb6

White's Knight is a monster.

- 25. Rc6 Rxc6
- 26. Nxc6 Bg5
- 27. g3 Kf8
- 28. f4 Be7
- 29. Nxe7

[29. a4]

- 29 ... Kxe7
- 30. Kf2 h5

[30. . . Kd7]

- 31. Ke3 Kd7
- 32. Kd4 Kc6
- 33. b4 Kb6
- 34. h3 Kc6

[... moves omitted. . .]

Draw Agreed

**(Round 3, Board 2) [D32]
[White: Callum Picken]**

You tripped over a few things here but brought it right around -- a terrific effort.

- 1. d4 d5
- 2. c4 e6
- 3. Nc3 c5
- 4. cxd5 cxd4

This is an evil gambit....

5. dxe6

[5. Qxd4 is quite OK, if you don't mind having more

pawns and less development than your opponent.]

- 5 ... fxe6
 6. Ne4 Nf6
 7. Nxf6+ Qxf6
 8. Nf3 e5
 9. Bg5 Qf5
 10. e3 Bb4+

[10...e4! wins a piece]

11. Nd2 Bxd2+
 12. Qxd2 Qxg5

Black has still picked up the piece, and I felt a bit gloomy about your prospects...

13. Bb5+ Nc6
 14. O-O Bh3
 15. f4 exf4

16. Bxc6+ bxc6
 17. exf4 Qg4
[17...Qg6]
 18. Rae1+ Kf7
 19. Re2 Rae8
 20. Ref2 Re4
 21. Kh1 Rhe8
 22. gxh3 Qxh3
 23. Qc2

Black still has a huge initiative. . . you did well to hold it together after this.

[... moves omitted. . .]

Draw Agreed

Michael Fisher

Another nice set of games, quite long ones as well. You took your chances well, played very sensibly and apart from slipping on a banana in the first game there's not a lot to improve on. We could all dig a little deeper in our games and I guess that's my advice: your play is sound but not very pushy. Look at every game you play and look for ways to get the most out of your position and make more problems for your opponents,.

(Round 1, Board 3) [C47] **[Black: Michael Fisher]**

A pity -- you equalised easily and were looking for more before you missed the pin.

1. e4 e5
 2. Nf3 Nc6
 3. d4 exd4
 4. Nxd4 Nf6
 5. Nc3 Bb4
 6. Nxc6 bxc6

I like this opening for White, but not the next move!

7. Bd2?

Too quiet.

[7.Bd3 is best]

- 7 ... Qe7
 8. Bd3

[8.f3 is necessary to save a pawn.]

- 8 ... Bxc3
 9. Bxc3 Nxe4
 10. Qe2 Nxc3
 11. Qxe7+ Kxe7
 12. bxc3 Re8
 13. O-O Kf8

Unnecessary, and possibly in the wrong direction.

[13...b6]

14. h3

[14.Bxb7 g6]

- 14 ... Rb8
 15. Rab1 Bb7

You must follow this up with ...c5.

16. Bf5 a6

[16...d6]

17. Bxd7

- 17 ... Re2??

Ordinarily the right move, but there's a big pin on the b-file.

18. Bxc6 Rxc2

[18...Bxc6! keeps another piece on.]

19. Rxb7 Rxb7
 20. Bxb7

and that's all there is to it, I'm afraid.

- 20 ... Rxc3
 21. Re1 Rc2

- 22. Bd5 c6
- 23. Bb3 Rd2
- 24. Ba4 Rxa2
- 25. Bxc6 g6
- 26. Re8+ Kg7
- 27. Re7 Ra5
- 28. Rd7 Rc5
- 29. Rd6

[29.Bd5 wins more efficiently]

- 29. . . . a5
- 30. Bf3 a4
- 31. Ra6 Rc1+
- 32. Kh2 Ra1
- 33. Ra7 a3
- 34. Bd5 Kh6
- 35. Bxf7 Kh5
- 36. Bg8 Kg5
- 37. Bxh7 Kf5
- 38. Ra6 Ke5
- 39. Bxg6 Kd5
- 40. Rb6 Kc4
- 41. Bf7+ Kc3
- 42. h4 Kc2
- 43. h5 Kc1
- 44. Ra6 Kb2
- 45. h6 a2
- 46. Rxa2+ Rxa2
- 47. Bxa2 Kxa2
- 48. h7 Ka3
- 49. h8Q Ka4
- 50. Qb8 Ka3
- 51. Kg3 Ka4
- 52. Kf3 Ka5
- 53. Ke3 Ka4
- 54. Kd3 Ka5
- 55. Kc4 Ka6
- 56. Kc5 Ka5
- 57. Qa8#

Black is checkmated

**(Round 2, Board 3) [C48]
[Black: Michael Fisher]**

Sensible play led to a level ending, which White played far from sensibly.

- 1. e4 e5
- 2. Nf3 Nc6
- 3. Nc3 Nf6
- 4. Bb5 d6?!

[Black does well with 4. . .Bb4= or 4. . .Nd4!]

- 5. d3

[5.d4 is the Ruy Lopez, Steinitz Defence]

- 5. . . . Bd7
- 6. Bg5 h6

[6. . .Be7]

- 7. Bxf6 Qxf6
- 8. Nd5 Qd8
- 9. O-O a6

Hmm, another pawn move.

- 10. Bxc6 Bxc6
- 11. d4 Bxd5

[11. . .exd4]

- 12. exd5 Qf6
- 13. Re1 O-O-O
- 14. dxe5 dxe5
- 15. Nxe5 Bd6?

Gives White a chance of an evil check.

- 16. Ng4

[16.Qg4+! wins the exchange.]

- 16. . . . Qxb2
- 17. Qd3 Qb4
- 18. Qf5+ Kb8

- 19. a3 Qa4
- 20. h3 Qf4
- 21. Qxf4 Bxf4
- 22. g3 Bd6
- 23. Ne5 Bxe5
- 24. Rxe5 Rhe8
- 25. Rxe8 Rxe8

A roughly level ending, which White makes a complete mess of. If anyone has a plus, it's Black, because his pawns are neater and so harder to attack.

- 26. f4 Re2

[26. . .Re3 27.Kg2 Rc3]

- 27. c4 Rc2
- 28. g4

All these pawn moves create weaknesses: White should get his rook into play.

- 28. . . . Rxc4
- 29. Ra2 Rxf4
- 30. a4 Rd4
- 31. a5 Rxd5
- 32. h4 Rd4
- 33. Rg2 Ra4
- 34. g5 Rxa5
- 35. gxh6 gxh6
- 36. Rg8+ Ka7
- 37. Rg7 c6
- 38. Rxf7 Rh5
- 39. Rf4 b5
- 40. Kh2 Kb6
- 41. Kh3 a5
- 42. Kg4 Rd5
- 43. Rf6 Rd4+

- 44. Kh5 a4
 - 45. Rxh6 a3
 - 46. Re6 a2
 - 47. Re1 Ra4
 - 48. Ra1 b4
 - 49. Kg6 b3
 - 50. h5 b2
 - 51. Rd1 b1Q+
 - 52. Rxb1+ axb1Q+
 - 53. Kf7 Qh7+
 - 54. Ke8 Ra8#
- White is checkmated.

- 10. Bxe7 Ndx7
- Fine.
- 11. Ng5 Ng6
- 12. Qh5 h6
- 13. Nh3 Bxh3
- 14. Qxh3 Nf4
- 15. Qf3 Nd4
- 16. Qg4 b5
- 17. c3 Nde2+
- 18. Kh1 bxa4
- 19. g3 Nxd3
- 20. Qxe2 Nc5

- 36. a3 Kg6
- 37. Kd3

- 37 ... f4

[37...c4+ is the clearest: walk your king to d5, put your knight on d3 and push your e-pawn.]

**(Round 3, Board 3) [C62]
[White: Michael Fisher]**

Once handed the piece early on you never looked like losing; maybe you could have won more quickly.

- 1. e4 e5
- 2. Nf3 Nc6
- 3. Bb5 d6
- 4. Nc3

[4.d4]

- 4 ... Bd7
- 5. d3 Nf6
- 6. Bg5 a6
- 7. Ba4 Be7
- 8. O-O O-O

- 9. Nd5? Nxd5

Black is clearly winning, and duly tidied up. . .

- 21. Qc4 Qb8
- 22. Qe2 Qb5
- 23. Qxb5 axb5
- 24. f3 Rad8
- 25. Rad1 Rd7
- 26. Kg2 Rfd8
- 27. Kf2 d5

- 31. Rd1 Rxd1
- 32. Kxd1 Kf7
- 33. Ke2 g5
- 34. h3 Ne6
- 35. Ke3 c5

- 38. gxf4 Nxf4+
- 39. Ke4 Nxb3
- 40. Kxe5 Nf4
- 41. Kd6 Nd3
- 42. Kc6 b4
- 43. axb4 cxb4
- 44. cxb4 Nxb4+
- 45. Kb5 Nd3
- 46. Kxa4 Nxb2+
- 47. Kb3 Nd3
- 48. Kc3 Ne5
- 49. Kd4 Nxf3+
- 50. Ke4 g4
- 51. Ke3 Kf5
- 52. Kf2 Kf4
- 53. Kg2 Nd4
- 54. Kf2 g3+
- 55. Kg2 h5
- 56. Kh1 Kf3
- 57. Kg1 Ne2+
- 58. Kh1 g2+
- 59. Kh2 g1Q+

White resigns.

Robert Thompson

Great set of games – with some obvious mistakes, sure, but I thought your fighting spirit was excellent as you kept going forward even when you were behind on material. If you get a bit tidier with spotting chances for your opponent you'll see a leap in your results.

(Round 1, Board 4) [C00] [Black: Robert Thompson]

Tartakower once said: "the winner of a game is the player who makes the next-to-last mistake"

1. e4 e6
2. d4 d5
3. f3

A pawn sacrifice!

- 3 ... c5

[3. . . .dxe4! 4.fxe4?? (4.Be3 Nf6 is an obscure but existing gambit line)
4. . . .Qh4+ wins]

4. Bb5+ Nc6

[4. . . .Bd7 : don't lose a chance to get rid of that bad French bishop.]

5. Ne2 Bd7
6. Nbc3 cxd4

[6. . . .dxe4]

7. Nxd4 Nxd4
8. Bxd7+ Qxd7
9. Qxd4

This position is equal.

- 9 ... Bd6??

[9...Rc8 idea 10.O-O Bc5!]

10. Qxg7 O-O-O
11. Qxh8 f6
12. Bh6 Nxh6
13. Qxf6 Nf7
14. Qd4 b6

Which side should White castle?

15. O-O?? Bc5

That helps!

16. Qxc5+ bxc5
17. exd5 exd5
18. Rad1 d4
19. Ne4 Qb5
20. b3 c4
21. Rfe1

. . .and Black won, as he should.

[. . . moves omitted. . .]

...White resigns.

(Round 2, Board 4) [A57] [White: Robert Thompson]

Despite dropping an exchange you kept on with completely the right plan for this pawn structure: attack down the middle. It brought you a deserved comeback victory.

1. d4 Nf6
2. c4 c5
3. d5

[3.Nf3]

- 3 ... b5
4. b3 b4
5. Bg5 g6
6. Nd2 d6
7. e4 Nbd7
8. Ngf3 Bg7

9. Bd3 Ng4
10. Rb1 Nge5
11. Bc2 Qa5
12. Nxe5 Nxe5
13. Ra1?!

Remember, you moved that rook out of the way for a reason!

13. ... O-O
14. O-O f5

15. Re1 Nf7
 16. Be3? Bxa1
 17. Qxa1 Ne5
 18. Bh6 Re8

[I may have got the move order wrong before now, and lost the thread around here. You were always sat too far away for me to see!]

[LATER...]

Here, we can see that Black has done nothing with the extra material while White has tried to get something going in the centre -- and succeeded!

- 1 d6! Qc6
 2 Nf6+!?

A very smart idea.

[2.Rxe7+! Kd8 3.Qg7! actually wins a little faster]

- 2 ... Kd8
 [2...Kf7 3.dxe7 Rfe8 4.Nd5]
 3. dxe7+ Kc7
 4. exf8Q Rxf8
 5. Nd5+ Kd8
 6. Qd1 Qd6
 7. Ne3!

Good: swap pieces when you're winning.

- 7 ... Qxd1+
 8. Nxd1 Kc7
 9. Rxc5+ Kb6
 10. Rb5+ Kc6
 11. Rxb4 Re8

 14. Nd5 Nxd5
 15. exd5 Rd8
 16. Bc4 b5
 17. Bb3 g6

18. O-O

[18.b3 threatens to net the Bb5]

- 18 ... Bg7
 19. Rc6 Ra8
 20. Rfc1

[20.Rc7!]

- 20 ... O-O
 21. f3 h6
 22. g4

[22.Bxe7]

- 22 ... Bxg4
 23. Bxe7 Rfe8
 24. fxg4 Rxe7
 25. Rc8+

[25.d6 Rxe5 26.Rc8+ Rxc8 27.Rxc8+ Kb7 28.d7]

- 25 ... Re8
 26. Rxa8 Rxa8
 27. e6 fxe6
 28. dxe6 Kh8
 29. Rc2 Bf6
 30. Bd5 Kg8

Is this the right position?

31. Rg2

[31.Bxa8!]

- 31 ... Rd8
 32. Be4

[... moves omitted. . .]

and White won, as he should.

...Black resigns.

Ben Kingsley-Smith

I began to feel sorry for you, having to face the Sicilian all the time, until I realised you play it yourself! The Sicilian is a good counter-attacking defence and you have the right style for it. You could do with getting some more tactical sharpness: playing against computers is good for this.

(Round 1, Board 5) [B70] [White: Ben Kingsley-Smith]

Not quite tight enough, and a good advert for the Sicilian. Full marks for keeping going, and you pulled off an amazing save.

1. e4 c5

2. Nf3

[2.Bc4]

2 ... d6

3. d4 cxd4

4. Nxd4 Nf6

5. Nc3 g6

6. Bc4 Bg7

There are some move order issues in this line. As played, White allows Black to play ...Ng4 (threatening to swap off the Be3) and ...Nxe4 (with a fork after ...d6-d5).

7. Be3 O-O

8. Qd2 Nc6

[8...Ng4]

9. O-O-O Nxd4

10. Qxd4 Ng4

11. Qd2 Nxe3

12. Qxe3 Bd7

13. f4 Bh6

14. Qe2

[14.g3]

14 ... Bxf4+

15. Kb1 Qc8

16. Qf2?

A little bit too fancy.

[16.Nd5 Bg5 17.b4 Bf6

18.Nxf6+ exf6 19.Rxd6±]

16 ... Be5

17. Qe2 Bg4

18. Qd3 Bxd1

19. Nd5

Allows Black to pick up yet more material.

19 ... Bxc2+

20. Kxc2 Qd7

21. Bb5 Rac8+

22. Kb1 Qd8

[I may have got the move order wrong here.]

23. h4 h5

24. g4

I like your attitude here: keep attacking!

24 ... e6

25. Ne3 Qf6

26. Nc4

[26.gxb5]

26 ... a6

27. Nxe5

You don't really want to be swapping off.

27 ... Qxe5

28. Bc4 Rxc4

A curious decision.

29. Qxc4 b5

30. Qe2 d5

31. gxh5 Qxh5

32. Qxh5 gxh5

33. Rg1+ Kh7

34. exd5 exd5

35. Rg5

Excellent: you're nearly back in this one.

35 ... Kh6

36. Rxd5 Ra8

37. Rf5 Kg6

38. Rg5+ Kh6

39. Kc2

[39.Rf5 is still OK: keep active and make Black defend, then it's up to Black to show an idea.]

39 ... Rd8

40. Rc5 Rd4

41. b3

[41.Rc6+ was your last chance, I thought.]

41 ... Rxh4

42. Kc3 b4+

43. Kc2 Kg6

44. Ra5 f5

45. Rxa6+ Kg5

46. a3 bxa3

47. Rxa3 f4

48. b4 Kg4

49. b5 f3

50. Rxf3 Kxf3

51. b6 Ke4

6. Be3 b5

7. Bd5 Nf6?

8. Bxc6 dxc6

9. Bxc5

White has a pawn already.

9 ... Bd7

10. Qd2 b4

11. Na4

I lost track of moves here... I remember seeing you get a stomping pawn wave and going a couple of pawns ahead, but then allowing your opponent to make a big break on the Queen's-side, getting to a position a bit like this one:

You quite rightly abandoned the a-pawn in favour of getting some activity -- Rooks in defence always suffer -- and won the endgame.

[... moves omitted. . .]

...Black resigns.

2. Nf3 d6

3. d4 cxd4

4. Nxd4 Nf6

5. Nc3 g6

6. Bc4 Bg7

7. Bf4 O-O

8. O-O Nc6

9. h3?

9 ... Nxd4!

10. Qxd4 e5

Excellent: last year everyone was missing these.

11. Bxe5 dxe5

12. Qxe5 Re8

13. Rad1 Qxd1

[13...Qb6]

14. Qxe8+ Nxe8

15. Rxd1 Be6

16. Nd5 Bxb2

17. Rb1 Nd6

18. Rxb2 Nxc4

19. Rxb7 Kf8

20. Ne7 Nd6

21. Rc7 Bxa2

22. e5 Nb5+

23. Rb7 Re8

24. Nxc6+ hxg6

25. Rxb5 Be6

26. Rb7

Is this position correct? White has created counterplay and even won after promoting!

[... moves omitted. . .]

...Black resigns.

(Round 2, Board 5) [B30] [White: Ben Kingsley-Smith]

A reasonable opening and you took your chance when it appeared. Great.

1. e4 c5

2. Nf3 Nc6

3. Nc3 g6

4. Bc4 Bg7

5. d3 a6

(Round 3, Board 5) [B70] [Black: Ben Kingsley-Smith]

1. e4 c5

26 ... Rc8?!

[26. . .Ra8 Hang on to your pawns when you're winning.]

27. Rxa7 Rxc2

28. Ra4 g5

29. Kf1 Rc5

30. Re4 Bf5

31. Re3 Ke7

32. g4 Bg6

33. Ke2 Ke6

34. f3 Rxe5

35. Rxe5+ Kxe5

[. . . moves omitted. . .]

and Black won, as he should.

...White resigns.

Rhys Williams

Three out of three is hard to improve on! Your French Defence is working well but you need to play more directly and actively than you did in your first game as White, and learn more about when to play what sort of pawn moves in the French.

(Round 1, Board 6) [C55]

[White: Rhys Williams]

You got an advantage but didn't follow up actively enough; however, your opponent continued to make mistakes and you defended coolly.

1. e4 Nf6

2. Nc3 e5

not bad but odd.

[2. . .d5 is the one most Alekhine's Defence players go for: if they wanted to play . . .e5 they can do it on move one!]

3. Nf3 Nc6

4. Bc4?!

[4.Bb5;

4.d4]

4 ... d6?

[4. . .Nxe4! gives Black a very easy game.]

5. Ng5!

Excellent! This simple attack gives White the advantage.

5 ... Qd7

6. Bxf7+ Kd8

7. Be6 Qe7

8. Bxc8 Rxc8

9. d3 Nd4

10. O-O Qd7

11. Nd5

Finish your development!

[11.Be3!]

11 ... c6

12. Nxf6 gxf6

13. Nh3

White has managed to go backwards for a few moves.

13 ... Rg8

14. Kh1 d5

15. c3 Nc2

Nice idea but there's a big hole in it.

16. Qxc2 Qg4

17. f3 Qg6

18. f4 dxe4

19. Rd1

[19.dxe4 is OK, maybe better]

19 ... e3

20. Bxe3 exf4

21. Nxf4 Qg4

22. d4 b5

23. d5 c5

24. Ne6+ Ke7

25. Bxc5+

Excellent.

25 ... Kf7

26. Bxf8 Rxf8

27. Nxf8 Kxf8

28. Rg1

Over-anxious: no need to send the rook back to bed.

[28.Rf1; 28.d6; 28.a4]

- 28 ... b4
 29. Rae1 Kf7
 30. Qe2 Qf4

[I may have got the move order wrong here.]

31. Qe7+ Kg6

This is just a slaughter. . .

32. Qe4+ Kg5
 33. Qxf4+ Kxf4
 34. Rgf1+ Kg4
 35. Rf3 h5
 36. Rg3+ Kf4
 37. Rxc8 a5
 38. d6 a4
 39. cxb4 f5
 40. d7 h4
 41. d8Q h3
 42. Qd4#

Black is checkmated.

**(Round 2, Board 6) [C00]
 [Black: Rhys Williams]**

In an irregular opening, you soon won a piece. I was just admiring your mopping-up style when you threw in a Queen... and then White overlooked a back-rank mate! Exciting stuff.

1. e4 e6
 2. Nf3 Nf6
 3. Nc3 Bc5
 4. Bd3?! Ng4
 5. O-O O-O
 6. h3 Nf6
 7. b3 d5
 8. exd5 exd5
 9. Bb2 Nc6
 10. Na4

A fairly sensible opening by both sides.

- 10 ... Be7
 11. c4 Be6
 12. Ne5 Nxe5
 13. Bxe5 dxc4
 14. Bxc4 Bd7
 15. Bxf6 Bxf6

16. Rb1 b5!
 17. Nc5 bxc4
 18. Nb7 Qe7
 19. bxc4 a5
 20. Qf3 c6
 21. Rfe1

Black now had a sudden rush of blood to the head, I think...

- 22 ... Qb4

22. Rxb4 axb4
 23. Qb3 Bc8
 24. Nc5 Rb8
 25. Ne4 Bd8
 26. c5 Bc7
 27. Rc1 Re8
 28. Ng5 Be6
 29. Nxe6 Rxe6
 30. Rc4

- 30 ... Re1#

White is checkmated.

**(Round 3, Board 6) [C02]
 [Black: Rhys Williams]**

Some right ideas at the wrong moments led to some anxious times in the opening, but White followed a sacrifice by swapping queens and then you were fine.

1. e4 e6
 2. d4 d5
 3. e5 c5
 4. c3

- 4 ... f6

[4. . .Nc6 is normal;

4. . .Qb6 idea . . .Bd7 and . . .Bb5 is also good.]

- 5. Nf3 Nc6
- 6. Bb5 Bd7
- 7. Bxc6 Bxc6
- 8. O-O g6
- 9. Bf4

- 9 ... g5

Ooh. . . very risky without some more development.

- 10. Nxg5!?

Enterprising but not enough.

- 10 ... fxg5

- 11. Qh5+ Kd7

- 12. Qf7+ Qe7

- 13. Qxe7+ Bxe7

Now Black is simply winning.

- 14. Be3 b6

- 15. f4 Rf8

- 16. Nd2 Nh6

- 17. fxg5

- 17 ... Ng4!?

Risks the piece getting stuck.

[17. . . .Nf5!]

- 18. Bf4 Bb5

- 19. Rf3 Be2

- 20. Rff1 Bxf1

- 21. Rxf1 cxd4

- 22. cxd4 h6

- 23. g6 Rhg8

- 24. h3

- 24 ... Bb4

[24. . . .Rxf4! 25. Rxf4 Ne3]

- 25. Nb3 Ne3

- 26. Bxe3 Rxf1+

- 27. Kxf1 Rxc6

- 28. a3 Be7

- 29. Nd2 Bg5!

- 30. Bxc6 Rxc6

- 31. Nf3 Rf5

- 32. Kf2 Rf8

- 33. g4 b5

- 34. b3 a5

- 35. h4

Lots of pawn moves by White have meant lots of pawn weaknesses.

- 35 ... Rf4

- 36. g5 hxg5

- 37. hxg5 Rg4

- 38. Kf1 Kc6

- 39. a4 bxa4

- 40. bxa4 Kd7

- 41. Kf2 Ke7

- 42. Kf1 Kf7

- 43. Kf2 Kg6

- 44. Ke3 Kf5

- 45. g6 Kxc6

- 46. Kf2 Kf5

- 47. Ke3 Rf4

- 48. Ke2 Ke4

- 49. Ng5+ Kf5

- 50. Nf3 Kg4

- 51. Nh2+ Kh3

- 52. Nf3 Kg3

White resigns.

Matthew Ash

Although you came away with just one point, your win was one of the best I saw. There are some basic tactical ideas which will improve your play as either colour in the Two Knights' Defence. [I'm not sure what you had in mind as Black in the first game but it's dangerous to make things up as you go along!]

**(Round 1, Board 8) [B07]
[Black: Matthew Ash]**

Having dropped a pawn, you played nicely actively and soon won a piece, then finished off well.

1. e4 d6
2. Nf3 Nc6!
3. Nc3 e5?!

Black's got this defence in a bit of a muddle.

4. Bc4 Nf6?
5. Ng5!

Odd coincidence! (Rhys was playing this next door)

- 5 ... Be6
6. Bxe6 fxe6
7. Nxe6 Qd7
8. Nxf8 Rxf8
9. O-O O-O-O
10. Qe2

[10.d3]

- 10 ... d5

Black is hitting back as fast as he can.

11. Qe3?

[11.exd5]

- 11 ... d4!

winning

12. Qd3 dxc3
13. Qxc3 Nxe4
14. Qc4 Nd6
15. Qa4 b5?

Risky, as a rule, although White has so little developed that you are fine here.

16. Qa6+ Kb8
17. a4 bxa4
18. Rxa4 Rf4
19. Ra3 Nc4
20. Rb3+ Nb6
21. d3 Ra4
22. Qb5

and Black won, as he should.

[... moves omitted. . .]

...White resigns.

**(Round 2, Board 7) [C57]
[Black: Matthew Ash]**

White missed his chance in the opening and I thought you showed great determination in attacking

your chosen target on f2. A game with real "flow", which is unusual in junior games.

1. e4 e5
2. Nf3 Nc6
3. Bc4 Nf6
4. Ng5 d5
5. exd5 Nxd5?

Not good; do you know why? [I'll tell you next game.]

6. d3? h6
7. Qh5 g6
8. Qf3 Be6
9. Nxe6 fxe6
10. Qe4 g5
11. Qg6+ Kd7

[11...Qe7 forces a decision from White.]

12. Qf7+ Be7
13. Nc3 Rf8
14. Qg6 Rf6
15. Qg7 Nxc3
16. bxc3 Qf8
17. Qxf8 Raxf8

Black has survived the attack and now has the f2 pawn in view.

- 18. O-O Bc5
- 19. Be3 Kd6
- 20. Rad1 g4
- 21. Bxc5+ Kxc5
- 22. Bb3 b5
- 23. c4 Nb4
- 24. cxb5 Kxb5
- 25. d4 e4
- 26. c3 Nd3

Focussed!

- 27. Rd2 e3?!

Should lose but shows good attitude!

- 28. Rxd3 e2
- 29. Re1 Rxf2
- 30. a4+ Ka5

31. h3?

It was a lot to expect for White to play 31. Rf3!+=

- 32 ... Rf1+
- 32. Rxf1 exf1Q+
- 33. Kh2 Qxd3
- 34. Bxe6 g3+
- 35. Kg1 Qf1#

White is checkmated.

(Round 3, Board 7) [C57]
[White: Matthew Ash]

A really rocky opening by both sides led to an old-fashioned hunt of White's King.

- 1. e4 e5
- 2. Nf3 Nc6
- 3. Bc4 Nf6
- 4. Ng5 d5
- 5. exd5 Nxd5?

Still not good.

6. Qf3!?

[6.Nxf7!? Kxf7 7.Qf3+ Ke6
8.Nc3 Ncb4 is fun;

6.d4 is best, when you might get a chance to play the same Nxf7 idea under better circumstances]

6 ... Qxg5

Had you seen this move?

7. Bxd5 Be6?

[7...Qg6 =]

- 8. Bxc6+ bxc6
- 9. Qxc6+ Bd7
- 10. Qxa8+ Ke7

- 11. d4? Qxc1+
- 12. Ke2 Qxh1
- 13. h3 Bb5+
- 14. Kd2 Qf1
- 15. Qxa7 Qe2+
- 16. Kc3 Kd7
- 17. a4 Qe1+
- 18. Kb3 Qb4+
- 19. Ka2 Qc4+
- 20. b3 Qxc2#

White is checkmated.

Ryan Chung

Without more moves to look at I can't say a lot. I think you're not making the best use of your talents by playing Old Stodge, but you could also play that with some extra ideas (see last year's notes). I liked your determination in the game you won.

(Round 1, Board 7) [C50] [Black: Ryan Chung]

It's always sad to go behind so early in the game; although I don't have all of the moves I remember thinking you should have tried harder to keep your pieces on and not swap them.

1. e4 e5
2. Nf3 Nc6
3. Bc4 Bc5
4. O-O Nf6
5. Ng5 d5

[5...0-0 is perfectly OK: White is very welcome to use up two developed pieces in grabbing your pawn and rook.]

6. exd5 Nxd5?!
7. Qh5 g6
8. Qh6

Now you have to keep the Queen out!

- 8 ... Be7?

[8...Bf8]

9. Bxd5?

[9.Qg7 wins for White.]

- 9 ... Qxd5

10. d3

[10.Qg7 still wins]

- 10 ... f6

11. Qg7

Black lost the exchange here, but in fact has cobbled together enough of a defence to make life very tricky for White!

- 11 ... Rg8

12. Nc3

[... moves omitted. . .]

...Black resigns.

(Round 2, Board 8) [C50] [Black: Ryan Chung]

I hate this opening but what a game! You were two pieces up but had lost a lot of pawns, and later I thought Black's pawn wave was enough to win the game. But you stuck to it, refused a draw and turned it back around in your favour. A great fighting game.

1. e4 e5
2. Nf3 Nc6
3. Bc4 Bc5
4. Nc3 Nf6
5. O-O d6
6. d3 O-O

[... moves omitted. . .]

...Black resigns.

(Round 3, Board 8) [C50] [White: Ryan Chung]

With a closed centre (no pawn breaks) it's always very awkward to get your pieces back to defend your king. Once the attack got started, you were lost, but you could have stopped it happening at a couple of points.

1. e4 e5
2. Nf3 Nc6
3. Bc4 Bc5

4. Nc3 Nf6

Old Stodge again. Please don't play this!

5. O-O O-O
6. d3 d6
7. h3

Old Stodge is an odd sort of system, when it can be wrong to castle too early. If such a natural move as castling is tricky, whatever sort of position is this to play?!

I like Black's attitude in this game but the moves he chooses have a few holes in them.

- 7 ... Nh5?
8. a3

[8.Nxe5! Nxe5 9.Qxb5]

You must be able to find better ideas in the openings you play than h3 and a3.

- 8 ... Qf6?
9. Qe2

[9.Nd5! Qg6 10.Nb4!]

9 ... Qg6

10. Be3?

One natural move too many. Black has been signalling his intention to attack your king for a while!

10 ... Bxh3

11. Bg5 Ng3

[11...Nf4! is even stronger.]

12. Qe1 Nxf1

13. Qxf1 Bg4

14. b4 Bd4

[14...Bxf3]

15. Qe1 Bxf3

16. gxf3 Qxg5+

17. Kh2 Qh4+

18. Kg2 d5

19. Bxd5 Ne7

20. Rb1 Rad8

21. Bc4 Rd6

22. Nb5 Rg6+

[... moves omitted. . .]

and Black won, as he should.

...White resigns.

Karl Beasant

Again, I don't have all your moves, but you played tidily enough -- your second win looked nicely in control -- and I was pleased to see the King's Gambit make another appearance.

(Round 1, Board 9) [A06]
[Black: Karl Beasant]

White seemed not sure what to do but you had no doubts: a good win to start with.

1. Nf3 d5

2. Nc3 Nf6

3. e4 dxe4

4. Nxe4 Nxe4

Good start!

5. Bc4 Bg4

6. O-O e5

7. d3

7 ... Ng5?

Generous in return!

8. Bxg5 f6

9. Be3 Nc6

10. c3 Bd6

11. Qa4 Bxf3

12. Bb3?

Of course, White should recapture.

12 ... Be2

13. Qc4 Rf8

14. Qe6+ Qe7

15. Qd5 Bxf1

16. Rxf1

White has managed to part with a whole rook.

16 ... g6

17. Qf3 Bc5

18. d4 Bb6

19. Qd5 Qd6

20. Qc4 Na5

21. Qa4+ Qc6

22. Qa3 Nxb3

23. Bh6 Rg8

24. dxe5 O-O-O

25. Qxb3 fxe5

26. Qf7 Qd6

27. h3 Qd7

28. Qf6 c6

29. c4 Bc7

30. f4 exf4

31. Rxf4 Bxf4

32. Bxf4 Qd4+

33. Qxd4 Rxd4

34. Be3 Rxc4

35. b3

[... moves omitted. . .]

and Black won, as he should.

...White resigns.

**(Round 2, Board 9) [C62]
[Black: Karl Beasant]**

A nice solid opening which you followed up by a really good-looking queen's-side attack down the open b-file: a game where you picked a plan and stuck to it.

1. e4 e5
2. Nf3 Nc6
3. Bb5 d6
4. Bxc6+ bxc6
5. O-O Nf6
6. d3 Bg4
7. Nc3 d5
8. Bg5 Bc5
9. Na4 Bd6

10. Qe2 O-O

[... moves omitted. . .]

...White resigns.

**(Round 3, Board 9) [C30]
[White: Karl Beasant]**

I didn't see what went wrong here; Black was more passive and stood worse for a long time, while you had all the ideas, I thought.

1. e4 e5

2. f4 d6?!

That's unkind to the Bf8.

3. Nf3 Nc6
4. Nc3 Nf6
5. Bc4 Bg4

[... moves omitted. . .]

...White resigns.

Sarah Stegink

First, you need a better fourth move as White than 4.a3. Other than that, there's not a lot wrong with your approach to chess: keep practising and you'll do well I believe.

**(Round 1, Board 10) [C47]
[Black: Sarah Stegink]**

I thought your idea to win a piece was very clever, but you need to take the game to your opponent earlier -- force them to make mistakes!

1. e4 e5
2. Nf3 Nc6
3. Nc3 Nf6

4. a3

You have to set your opponent problems, else they won't make a mistake.

[4.Bb5 If the threat of . . .Bb4 is so bad, why not play this move yourself?

4. d4 is the Scotch and is fine;

The only sensible-looking move to avoid is 4.Bc4?! Nxe4!]

4. . . . d6
5. Bc4 h6
6. h3 Nd4
7. d3 c6
8. Nxd4 exd4
9. Ne2 d5
10. exd5 cxd5
11. Bb3 Bc5
12. O-O O-O
13. Nf4 b6
14. Re1 Qd6

15. Ba2

15. . . . Ba6?

16. b4!

Excellent! Clearly I was wrong to say that Black won't make mistakes without you putting pressure on. . . but believe me, they will make a lot more if you do give them problems!

16. . . . Bxb4
17. axb4 Qxb4
18. Bxd5 Rae8

19. Bd2 Rxe1+

20. Qxe1 Qb5

21. c4

[21. Bc4 is more accurate.]

21 ... Qe8

[21. ... dxc3 en passant! Did you spot this?]

22. Qxe8 Rxe8

23. Rxa6 Nxd5

24. cxd5 Ra8

25. d6 g5

26. Nd5 Kf8

27. Bb4

I couldn't make sense of the score past this point...

[... moves omitted. . .]

...Black resigns.

(Round 2, Board 10) [C47]
[White: Sarah Stegink]

You lost a pawn but played actively and got into a good scrap. You were unlucky to lose a queen to a rook pin against your king, I think, but castling would have solved that.

1. e4 e5
2. Nf3 Nc6
3. Nc3 Nf6
4. a3 d6
5. Bc4 h6
6. Nd5 Nxe4

7. d3 Nc5

8. Be3 Na4

9. Rb1 Ne7

10. Nxe7 Bxe7

11. Bb5+ Bd7

12. Bxa4 Bxa4

13. b3 Bc6

14. c4 a5

15. b4 d5

16. Bd2 O-O

I couldn't make sense of the score past this point...

[... moves omitted. . .]

...White resigns.

(Round 3, Board 10) [C60]
[Black: Sarah Stegink]

You missed one chance but took enough of the others!

1. e4 e5
2. Nf3 Nc6
3. Bb5 a6
4. Ba4 Bc5

Black's opening is very fashionable among grandmasters, did you know?

5. Nc3 Nf6

6. Ng5 O-O

7. Qf3 h6

8. Nd5 hxg5

9. Nxf6+ Qxf6

10. Qd3 Qxf2+

11. Kd1 Qxg2

12. Rf1 Qg4+

13. Ke1 Qh4+

14. Kd1 Qh5+

15. Qf3 Qxf3+

16. Rxf3 d6

17. d3? g4?

[17. ... Bg4]

18. Rg3 Bf2

19. Rg2 Bd4

20. h3 gxh3

[... moves omitted. . .]

and Black won, as she should.

...White resigns.

William Norton

Two short games and one that was decided quickly... Not a lot for me to say here, but you clearly know your way around the board and if you make sure your buttons are done up then you will get better results.

**(Round 1, Board 11) [C01]
[Black: William Norton]**

I thought you were unlucky here as the early part of the game you played perfectly soundly and for the most part a little better than your opponent.

1. e4 e6
2. Nf3 d5

3. exd5 exd5

Solves Black's problem of developing the Bc8.

4. d4 Nc6
5. Bb5 Bd7
6. O-O Nf6
7. Re1+ Be7
8. Bg5 O-O
9. Bxf6 Bxf6
10. Nc3 a6
11. Bxc6 Bxc6
12. Qd3 b5
13. g3 b4
14. Ne2 Re8
15. h4 Bb5
16. Qd2 Qd6

Black is getting the better of this position.

17. Nf4 Rxe1+
18. Rxe1

- 18 ... c5

This is the right sort of move to think about, but too loose right now (your d-pawn is in need of protection). Get your last piece into play insread.

19. dxc5 Qxc5
20. Nxd5

- 20 ... Rd8??
21. Nxf6+

A wicked discovery.

- 21 ... Kh8
22. Qxd8+ Be8
23. Qxe8+ Qf8
24. Qxf8#

Black is checkmated.

**(Round 2, Board 11) [C44]
[White: William Norton]**

It was nice to be handed a piece so early but don't forget to complete your development just as quickly as if you were equal.

1. e4 e5
2. Nf3 Nc6
3. d4 Bb4+
4. Bd2 Qg5

Good start...

5. Nxc5 exd4
6. Bxb4 Nxb4
7. Qd2 c5
8. c3 a5
9. cxb4 axb4
10. a3 Ra4

19. Qd3

I couldn't make sense of the score past this point...

[... moves omitted. . .]

...Black resigns.

11. Qc2 b5
12. Qxc5 Ba6
13. Qxd4 Nf6
14. Qa7 O-O
15. Qb6 h6

I would have been happier to see you get all your other pieces out, than play all these Queen moves.

16. Bxb5 Bxb5
17. Qxb5 Raa8
18. O-O Rab8

(Round 3, Board 11) [C44]
[White: William Norton]

Rather one-sided! A nice one to go home with.

1. e4 e5
2. Nf3 Nc6
3. d4 Bb4+
4. Bd2

[4.c3 supports your centre.]

- 4 ... d5
5. c3 Nf6?
6. dxe5 Nxe4
7. cxb4

Black has fallen apart amazingly quickly.

- 7 ... O-O
8. b5 Ne7
9. Bb4 Ng6
10. Bxf8 Kxf8
11. Bc4!?

Tricky!

- 11 ... dxc4
12. Qxd8#

Black is checkmated.

Sophie Nofal

Three pretty solid efforts for an excellent 3/3. I do urge you not to fall in love with the fianchetto: it's difficult to handle and often a waste of time.

You are missing a few tactics on the radar; perhaps practice against a computer would help, and there are a bunch of good freeware programmes around if you can get hold of a PC.

(Round 1, Board 12) [C44]
[White: Sophie Nofal]

Despite mistakes in tactics and planning, you kept everything together and kept trying to win -- well done.

1. e4 e5
2. Nf3 Nc6

There are a few good moves here, but this one, while OK, is one of the trickiest to handle.

3. g3

[3.Bb5;

3.Bc4;

3.d4]

- 3 ... Nf6

4. Nc3

[OK. ... if you're going to play King Fianchetto systems, which are as I say tricky to handle, you must follow up correctly. 4.d3 Bc5 5.Bg2 0-0 6.0-0 d6 7.Nbd2 Bg4 8.h3 Bh5 9.a4 a6 10.c3

ANALYSIS DIAGRAM

This is the sort of set-up you are aiming at. White can then expand on the Queen's-side (b4) the centre (d4) or the King's-side (f4).]

- 4 ... Bc5
5. Bg2 O-O
6. O-O d6
7. d3 Bg4

8. a3 a6
9. b4 Bd4
10. Bb2 a5

11. Rb1?

[11.b5]

11. ... axb4
12. axb4 Nxb4
13. Re1 Na2
14. Nd5 Bxb2

15. Nxf6+?

drags Black's Queen into the game

15. ... Qxf6
16. Rxb2 Nc3
17. Qd2

17. ... Ra2?
18. Qxc3 Rxb2
19. Qxb2 Bxf3

20. Qxb7 Bxg2
21. Kxg2 Qe7

With a small plus for White, after all the chaos.

22. Ra1 d5
23. Qxd5 Qe6
24. Qb7 Qe7
25. h3 f6

I think doodling on the King's-side is wasteful at best and dangerous at worst.

26. g4
[26.Ra7 Rf7 27.Qc8+ Qf8
28.Qe6]
26. ... Qf7
27. f3

White's pawn structure is strong but full of holes. Imagine if Black got a queen to e3! Even after queens are

swapped off, the Black king can use the same squares to make trouble for you.

In the event, Black stayed pretty passive until they were lost, and then they correctly tried to open up the King's-side...

27. ... h6
28. h4 h5
29. Kg3 hxg4
30. fxg4 c5
31. Qc6 Qe7
32. Qd5+ Rf7
33. Ra5 g6
34. Rxc5 f5
35. gxf5 gxf5
36. exf5 Kf8
37. Qxe5 Rg7+

38. Kh2??

Oh dear

38. ... Kf7??

Whew!

[38. ... Qxb4#! mate]

39. Rc7! Qxc7
40. Qxc7+ Kg8
41. Qc6

[... moves omitted. . .]

...Black resigns.

(Round 2, Board 12)
[C55] [Black: Sophie Nofal]

A real fighting game with lots of mistakes by both players but lots of good attitude at the board.

1. e4 e5

2. Nf3 Nc6
3. Bc4 Nf6
4. Nc3 g6?!

Not suitable in this position, as you found out straight away.

5. Ng5! d5
6. exd5 Na5!
7. Bb5+ c6
8. dxc6 bxc6
9. Ba4 Bg7
10. b4 Nb7
11. Bxc6+ Nd7
12. Qf3!?

There is a good scrap now with both sides making mistakes but both sides kept going well.

- 12 ... Qxg5
13. Bxb7 Rb8
14. Bd5 O-O
15. b5 Nc5
16. d4 Qe7?
17. dxc5 Qxc5
18. a4 e4
19. Qf4? Bxc3+
20. Kd1 Qxd5+
21. Ke2 Bg4+
22. f3 exf3+
23. gxf3 Bxf3+
24. Qxf3 Qxf3+
25. Kxf3 Bxa1
26. Ba3 Rfc8
27. Bd6 Rb6
28. Rxa1 Rxd6

[... moves omitted. . .]

...White resigns.

(Round 3, Board 12)
[C45] [Black: Sophie Nofal]

You took a long while to get going (I think mostly because of the double fianchetto) but once your pieces were out you played well.

1. e4 e5
2. Nf3 Nc6
3. d4 exd4
4. Nxd4 Nge7
5. Nxc6 Nxc6
6. Bb5

- 6 ... g6

These fianchettoes are hard to handle and in this very open position it's more important to get your pieces out as fast as you can. You can already develop your Bf8 without making any more pawn moves, so you should have done just that.

[6. . . Bc5]

7. Ba4 Bg7
8. Bb3 b6
9. O-O O-O
10. Qf3 Bb7
11. Qh3 Re8
12. Qf3

- 12 ... Rf8

[12. . . Qf6;

12. . . Qe7]

13. Rd1 Nd4
14. Rxd4? Bxd4
15. c3 Bg7
16. Be3 Qe7
17. Bd4 Bxe4
18. Qe3 d5
19. Bxd5 Rae8
20. Nd2? Bxd5
21. Qxe7 Rxe7
22. Bxg7 Kxg7
23. b3 Rfe8
24. Kf1 Be4
25. Nxe4 Rxe4
26. g3

[... moves omitted. . .]

and Black won, as she should.

...White resigns.

West Of England & South Wales Team Tournament

Tiverton, Saturday 28th January 2005

Introduction

- I've given each of the games a quick run-through, and made some overall comments.
- 3 games is not a lot to go on, so if you think I have got things wrong, you may know better than me. Also I missed a few games: if you send them in, I'll have a look and add them to the list.
- Do read the comments on other player's games.
- If you want me to explain any more about what I've said, please feel free to ring on 01392 431 785 or e-mail me at chessnut@blueyonder.co.uk
- If you want to know what books or other materials might help you, I can suggest a few things (but I'd hate it to feel like homework!)
- I've got a bunch of stuff for young people on the Internet at <http://www.exeterchessclub.org.uk/juniors.html>
If you don't have access to the Internet, or have trouble using it, then get in touch with me directly and I can print it out or recommend some other study material.

Dave Regis, February 2006

A magnificent final round let us leapfrog Somerset and take first again – excellent.

Games of the round

Three games that stuck in my mind:

1 Robert's clockwork attack on the Black side of the French in Round 2, keeping going despite some anxious moments on the other side of the board. Just what the doctor ordered: know what the plans are from the openings you play.

2 Thomas' win in Round 3 was a really gritty endgame an exchange down: he kept going, took his chances and eventually forced through a passed pawn, a whole rook down! Not just good technique, but also great attitude.

3 Harry's round 3 win was another good endgame, a model of how to win with Black. Although he got a bit squashed in the opening, he kept playing sensible moves, didn't lose heart and kept waiting for his moment – which came when he took over the c-file. After that, Black was in the driving seat.

ECO = Encyclopaedia of Chess Openings

General comments on the openings:

There was a LOT of time-wasting this year. Remember, the opening is a race to do three tasks as fast as you can:

1. Get your pieces out
2. Get at least a stake in the centre (and take it over if you can)
3. Get castled

So, if your move doesn't help you do any of those three things, you must have a really good reason to play it.

There were two sorts of time-wasting:

1. Being too eager to attack with moves like Ng5.

In the opening, this spends time moving a piece that has already been developed. There aren't many positions where the attack works against good defence, and you are usually better off making a move to help you with one of the opening tasks.

In this position, Black goes ahead in development with ...Nh6. White's attack is going nowhere.

Try Ng5 and similar moves only if you can see that you have a forced win or if you have already connected your rooks and haven't anything better to do.

2. Little moves with the rook's pawns.

These can be useful if a bishop or a knight coming to the "knight four" square would be awkward, or if you want to move up your knight's pawn. But most of the time when I saw these moves played, it really meant, "I don't know what to do".

I've just explained that Ng5 is not usually a problem, and you can usually kick away a bishop after it moves to g5 – that way, you don't lose time.

Lastly, do you know what to do when the opening race is over?

When you get to a position where both sides have most of their pieces out and have castled, do you know the most common plans, and the most common moves, that happen in those positions?

If not, find a book or a player who does!

(Here, for either side, you should complete development and then open a file for the rooks with either a move of the f-pawn or, better, the d-pawn.)

The most common openings were:

Italian Game
(King's Pawn opening with Bc4)
(5 games)

The big question for White in this opening is: what are you going to put on c3?

- If you put your PAWN there, you get a point
- If you put your KNIGHT there, you lose a point

Positions where the knights are all square tend to be very dull and difficult – even if you don't allow Black the easy equaliser with ...Nxe4

The easy equaliser

Lots and lots of games featured this type of position where Black can play ...Nxe4!

Whatever White plays now, Black gets easy development and at least equality.

Whether you play Black or White in these positions, you must know this idea.

Old Stodge

Playing the Knight to c3 often leads this position. It's officially known as the Giuoco Pianissimo but I know it as "Old Stodge".

This is actually a rotten variation to play. The position is blocked and difficult, and it is easy to get into trouble.

For example, castling king's side, which is normally so important, can lead to problems for either side in this position! No more Old Stodge!

Open Giuoco Piano

Instead, play...

4. c3

Brilliant!

The idea is to follow this with d2-d4, to take over the centre. Taking over the centre is an important threat, so Black must react quickly and with the right moves. Straight away, Black has problems to solve!

You'll win a lot more games if you play like this.

I've written a lot in previous years about Old Stodge and how to play the Italian Game for White, so you can look at that one day.

French
Defence
(5 games)

I like the French for Black: it's safe and I don't usually hear people moan "I don't know what to do now".

In every game I saw with the French, White followed up with f2-f4. This is a logical and actually quite a dangerous move. White really doesn't have time for it but, given time, White will just develop normally and squash Black completely.

So, Black must not give White any time! Every Black move from now on must be thinking about an attack. But most people chose ...Bd7. Now, ...Bd7 is good when it allows Black to threaten the d-pawn, but otherwise I'd sooner see you play something else.

John Watson gives the example line:

5...Qb6 6.Nf3 Nh6 7.b3 cxd4 8.cxd4 Bb4+ 9.Kf2 Ng4+ 10.Kg3 h5 11.h3 h4+ 12.Nxh4 Rxh4 13.Kxh4 Nf2 14.Qh5 Qxd4 +-

If you must play ...Bd7, here is a model game:

McConnell,J-Morphy,P [C02] New Orleans, 1850

1.e4 e6 2.d4 d5 3.e5 c5 4.c3 Nc6 5.f4 Qb6 6.Nf3 Bd7 7.a3 Nh6 8.b4 cxd4 9.cxd4 Rc8 10.Bb2 Nf5 11.Qd3 Bxb4+ 12.axb4 Nxb4 13.Qd2 Rc2 14.Qd1 Ne3 0-1 (White's queen is lost)

You have to play with that sort of energy in this line as Black!

Queen's
Gambit
Declined

The problem we seemed to have in playing these positions was planning what to do once you had got your pieces out.

It's a bit less thud-and-blunder than the open King's-pawn games, but you should always be looking for piece activity and attacking chances.

But if you get into a position where there is no attack, and not much difference in piece activity, what do you do then?

The answer to this question might take you the rest of your chess life to answer, but it starts with looking at the pawns. You can usually read off a plan from the pawns, for example:

- If there are open lines → put your rooks on them
- If there are no open lines → open one! There is usually a pawn break that you can play somewhere.

So, White might have two good plans here:

- put rooks on b1 and c1 and attack the Black pawns
- put rooks on d1 and e1 and advance the e-pawn, perhaps after f3

Black doesn't look so good in this position because White has better control of the centre.

Middlegame

Strategy

I've made the point a couple of times that you should know what to do after the opening, and it was disappointing to watch people shift bits around without much purpose.

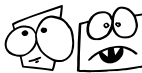

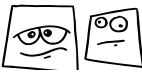

You need a better plan than "wait for my opponent to make a mistake"!

You need to do things, set the opponent problems, do something so that if your opponent does nothing you get a big advantage!

If you really can't think of anything to do, play **Anderssen's plan**:

Improve the position of your worst-placed piece

Here is one scheme to help you think of a plan:

- Ready ①**  **Look** at the position (especially your opponent's threats) 
- ...Aim... ②**  **Think** about what you should be trying to do 
- Fire! ③**  **Play** a move that helps you to it 

Tactics

The other thing that I don't think I've mentioned before when writing up notes is: look at every check and every capture, maybe just once, even if they look daft at first. Have a look, and maybe a second look, at each of these positions (the little   signs tell you who is to move):

An easy one? White has only two pieces out, but one can deal a deadly blow!

It looks as though White must take one of the bishops, but Black can save both!

Black has everything well-placed... now what?

Black can strike from behind the lines

They all have a capture or a check that should have won the game – but the chances were missed!

So, before you make a move: look at **every** check and **every** capture for **both sides**. [If it's any consolation, the last one was from a game I played the week before your match...]

Endgames

By the endgame, lots of the games were decided already, or we had lost track of the moves. And the long endgames that I saw, the Devon player won! So, I'm not going to offer much advice today, but if you want some general endgame advice, there's some on the website. Harry's last-round win is worth playing over if you want to see how it's done.

The Games

Some comments are made with punctuation:

- ! Good move !? Tricky or interesting move
? Poor move ?! Dodgy or risky move

1 Harry Mann

General: Nice to see you back, and I can see you've improved all round since I saw you last year. Your first win was steady and your second was a textbook example of 'how to win with Black', which is, don't give anything away, put your pieces on good squares and wait for your moment to take over.

Let's have a think about that draw. Last year I asked you "Why do you want to play the d-pawn openings as White?", which perhaps was rude of me. But after your games with White, I was all set to ask the same question again! I think there's a level of thinking about **making plans** that would help your game; try looking at the material on planning on the Exeter website (e.g. <http://www.exeterchessclub.org.uk/pawnform.html>) or I'll send you some stuff in the post.

(1) Mann, H-Glamorgan

1 d4 d5
2 c4 e6
3 Nc3 c5

In this position, Black is likely to end up with an isolated queen's pawn. Do you know how to play these positions? Everyone should, especially people who play 1.d4!

4 e3

This slow approach is not very popular: Black wasn't really threatening to keep your c-pawn.

[4.Nf3 Nc6 5.cxd5 exd5 6.g3]

4 ... cxd4
5 exd4

Now, it's White who might end up with an isolated queen's pawn

5 ... Nc6
6 cxd5

[6.Nf3 leaves it up to Black to solve the problem of a home for his light-squared bishop.]

6 ... exd5

With symmetrical pawns, you might find it hard to make problems for your opponent.

7 Bb5

[7.Bd3 is better: Black still needs to find a home for the Bc8, and this move takes away its best diagonal.]

7 ... a6

8 Ba4

Inconsistent.

[8.Bxc6+]

8 ... Bb4
9 Nge2 Be6
10 0-0 Qh4

[10...Nf6 is more logical and as it happens safer.]

11 Bxc6+ bxc6
12 Qa4

Very good.

12 ... Bd6
13 Qxc6+ Ke7

14 f4

This is unkind to your bishop.

[14.Ng3 is a safe defence;
14.Qb7+ is a safe attack!
e.g. 14...Bd7 15.Nxd5+]

14 ... Nf6
15 Qb7+

Not quite as good now.

15 ... Bd7
16 Nxd5+ Nxd5
17 Qxd5 Rhc8
18 Nc3 Bc6
19 Qg5+ Qxg5
20 fxg5 Kf8
21 Bf4 Bxf4
22 Rxf4 Re8
23 Raf1 Re7
24 d5 Bb7

[24...Bb5 Activity is
everything!]

25 Rh4 Kg8
26 Rhf4 Rd8
27 Rc4 Re5

28 h4

[28.Rc7 Bxd5 puts the
bishop in a pin! 29.Rd1 h6
30.Rc5]

28 ... Bxd5
29 Rc5 Bxg2?

Too co-operative, although
the Bishop is lost.

30 Rxe5 Bxf1
31 Kxf1 1-0

(15) Mann,H-Glamorgan

This was a normal-looking
Queen's Gambit Declined
with Black putting a Bishop
on b7. You then got into a
position with White having
extra central pawns and

open lines on the queen's
side (where the Black pawns
were).

Then you agreed a draw,
saying there wasn't much to
do. I don't agree.

If you have extra central
pawns, you can advance
them!

If you have open lines on the
queen's-side, you can put
your rooks on them!

You should be starting to
learn how to read plans off
the arrangement of pawns
and pieces.

(27) Somerset-Mann,H

1 c4 e6
2 d4 d5
3 Nc3 Nf6
4 Bg5 Nbd7
5 e3 Be7
6 Nf3 0-0
7 Be2 h6
8 Bh4

8 ... b6

Black is mixing systems. If
you want to fianchetto, leave
the Knight on b8 to help
look after the white squares
on the queen's side.

9 0-0 Bb7
10 Bg3

10 ... a6

11 a3

Two little moves that usually
say, "I've run out of ideas..."

11 ... Nh5

[11...dxc4 12.Bxc4 b5
13.Bd3 c5 is an idea that
makes use of the ...a6 move
and brings your position to
life.]

12 b4

Now I'm worried about the
pawn on c7 becoming weak.

[12.cxd5 exd5 means that
Black's Bishop on b7 will
find it hard to get into the
game.]

12 ... Nxg3

13 fxg3

"Every Russian pupil knows
that you should recapture
towards the centre." This
move splits the White pawns
up, and makes the pawn on
e3 weak.

13 ... dxc4

This does your Bishop a lot
of good.

14 Bxc4 b5

15 Bb3

[15.Bd3 looks after the tender e4 square. If White manages to play e3-e4, he will stand very well.]

15 ... Nf6
16 Rc1 Rc8
17 Ne2

Not bad, but it needs to be on a circuit to take it to c5.

17 ... Bd5
18 Nf4

Good. Now Ne3 and Nc5, perhaps?

18 ... c6
19 Ne5 Qd6
20 Bxd5 cxd5

Black's pawns are mended now, but not White's.

21 Rc5 Nd7
22 Nxd7 Qxd7
23 Rxc8 Rxc8

24 Qd2 Qc6

The sun is coming out for Black now he has control of the c-file. White has a useful knight on f4, but Black can swap it if not chase it away.

25 Rd1 Bg5
26 Ne2

c5 is still a good square for the Knight.

26 ... Qc2

27 Qxc2 Bxe3+

An excellent *zwischenzug* (in-between move).

28 Kf1 Rxc2
29 h4 h5
30 Nf4 Bxf4
31 gxf4 Rc3
32 Ke2 Rxa3
33 Rb1 Rc3
34 Rb2 Rc4
35 Kd3 Kh7

36 Ra2 Rxb4
37 Rxa6 Rb2
38 Ra7 Kg6
39 Rb7

Black has complete control of the game.

39 ... Rxc2

[39...f6]

40 Rxb5 Rg4
41 Ke3 Rxh4
42 Kf3 Kf5
43 Rb7 Rxf4+
44 Ke3 Re4+
45 Kf3 Kf6
46 Rb4 g5
47 Kg3 h4+
48 Kh3 Kf5
49 Rb7 Re3+
50 Kh2 Kf6
51 Rb2 g4
52 Rf2+ Rf3
53 Rg2 Kf5
54 Re2 f6
55 Kg2 h3+
56 Kh2 e5
57 dxe5 fxe5
58 Rd2 d4
59 Re2 e4
60 Rd2 1-0

2 Robert Thompson

General: You play actively and set your opponent problems, which is just the ideal style. You've still got to get some kinks out of your opening repertoire, but I think it was a good performance.

The French I think you can play a bit more actively – if you attack the centre straight away, you won't let your opponent do just what he wants in the opening.

The Tromp didn't really impress – I used to play it when I was your age but I don't understand the modern style of opening up the game – I just used to keep everything solid and badger away at the weak pawns. [Do you have a book on this line? I've got a some articles on it somewhere if you're interested.]

(2) Somerset-Thompson,R

- 1 c4 c5
- 2 g3 g6
- 3 Bg2 Bg7
- 4 e3

The Drawing Variation...

- 4 ... e6

[4...e5 is less balanced, perhaps more fun!]

- 5 Ne2 Ne7
- 6 Nbc3 Nbc6
- 7 d4 cxd4
- 8 Nxd4 d5
- 9 c5 b6
- 10 cxb6 axb6
- 11 0-0 0-0

- 12 a3

A move that usually means "I have already run out of ideas". Black is already slightly better. I really don't think young people should play this opening.

- 12 ... Ba6
- 13 Re1 Nxd4

This releases the other white bishop-let it suffer!

[13...Rc8]

- 14 exd4 Nc6

[14...Nf5 leaves the c-file open.]

- 15 Be3 Na5

[15...Qf6 is logical, pounding the isolated queen's pawn.]

- 16 b3 Rc8
- 17 Rc1 b5
- 18 Bf1

- 18 ... Qd6

[18...Qb6]

- 19 Bxb5 Rxc3
- 20 Rxc3 Bxb5

This exchange gives Black the better chances again.

- 21 a4 Ba6
- 22 Rc5 Nb7

[22...Qb6]

- 23 Rc3 Qb6
- 24 Qd2 Nd6
- 25 f3 Nf5
- 26 Rd1 Nxe3

[26...Qb4]

- 27 Qxe3

- 27 ... Be2

Very frisky! But getting your rook into play was simpler

[27...Rb8]

- 28 Rd2

[28.Qxe2 Bxd4+ 29.Rxd4 Qxd4+ in fact looks easier for White: the a-pawn may suddenly sprint!]

- 28 ... Bxf3
- 29 Qxf3 Bxd4+
- 30 Rxd4 Qxd4+
- 31 Qe3 Qxe3+
- 32 Rxe3 Rb8
- 33 Kf2 Kf8
- 34 Ke2 Ke7
- 35 Kd2 f5
- 36 Kc2 Kf6

With the central pawns supported by the king, black I think is better, but these are never easy to win when the opponent has so much counterplay.

[...] ½-½

(16) Somerset-Thompson,R

- 1 e4 e6
- 2 d4 d5
- 3 e5 c5
- 4 c3 Nc6
- 5 Nf3 Bd7
- 6 Be2

6 ... c4

Not bad, but I'd prefer to maintain the tension and the pressure against d4.

[6...f6 is John Watson's recommendation.]

- 7 0-0 Nge7
- 8 Nbd2 Ng6
- 9 b3 b5
- 10 Re1 Be7
- 11 b4 0-0
- 12 Nf1 Qb6
- 13 Ng3 a5

14 bxa5

Co-operative!

- 14 ... Rxa5
- 15 Nh5

White realises what he's supposed to be doing on the other side, but I thought it was all too slow.

- 15 ... Rfa8
- 16 Be3 Rxa2
- 17 Rxa2 Rxa2
- 18 Qc1 b4

19 Bh6!

Very clever.

- 19 ... Bf8
- 20 Ng5

White has suddenly arrived! I got a bit worried here but really it's just three against three on the King's side.

20 ... bxc3

White has got to the top of the hill, and starts rolling down. As his next move is clearly losing, he should have tried Bxg7 or Nf6+

- 21 Nf4 gxf6
- 22 Ngh3 Qb2
- 23 Qe3 Ra8
- 24 Bd1 c2
- 25 Bxc2 0-1

16.Nd5 Nd7 17.Ne7 1-0
Vaganian-Botterill, Hastings
1974]

3 Bxf6 gxf6

4 e4

I like the old-fashioned way of playing the Tromp – going for a grind against the weakened Black position, rather than open lines that might backfire.

[4.e3]

- 4 ... Nc6
- 5 c3 d6
- 6 Nd2

6 ... f5

Very good: Black tidies up her pawns. White would like to reply with e4-e5, shutting out the Black dark-squared Bishop, but this just loses a pawn.

- 7 Bd3 fxe4
- 8 Nxe4 Bd7
- 9 Nf3 e6
- 10 0-0 Qe7
- 11 b4

[11.h4 f5 12.Ng3 h5 13.Ne2]

- 11 ... f5
- 12 Ng3 h5

Black has a clockwork attack against White's king'-side: she already has an open file. The opening has gone badly wrong for White.

13 Ne2 h4
14 h3 Bh6

This is often a good post for Black's dark-squared Bishop in the Tromp.

15 Re1 0-0-0
16 Nc1

[16.b5 leaves the Black Knight without a satisfactory square.]

16 ... Qf6
17 b5 Nb8

[17...Ne7 made more sense to me.]

18 Nb3 Rhg8
19 a4 Rg6
20 c4 Rdg8
21 Bf1

21 ... Bg5

Black wants to play ...Qg7 without losing the h-pawn.

22 c5 Qg7
23 Nxc5 Rxc5
24 Qf3

Black ought to be winning this, but needs a plan to bring the queen's-side pieces into play.

24 ... Nc6!?

Very clever, but not as good as the simple:

[24...e5 is natural and good, maybe winning for Black.]

25 cxd6 Nxd4
26 Nxd4 Qxd4

27 dxc7

Slow! This game shouldn't be decided by material...

[27.Red1 and Rac1 wins for White.]

27 ... Qg7

28 Rad1 e5
29 Bc4 Rxc2+
30 Kh1 e4

Black is firmly back in the driving seat.

44 Kxe1

[44.Kxe1 Rh2 45.Rd4 Rh4 46.Kd2 Kb6]

[...] 1/2-1/2

3 Callum Picken

General: You're still a good player and you do good business with your French Defence.

Your first-round game was a bit of a disappointment. If you are going to play these d-pawn openings, then you need to have a decent plan against each of the defences that you might meet. And also, if you get into a position that you haven't seen before, you could do with having a bit more idea about planning, but I've moaned about this a lot above...

(3) *Picken, C-Somerset*

- 1 d4 Nf6
- 2 c4 e6
- 3 Nc3 Bb4

4 Bg5

[4.a3 Bxc3+ 5.bxc3 c5 6.e3 Nc6 7.Bd3 0-0 8.Ne2 d6 9.e4 Ne8 10.0-0 b6 11.f4 Ba6 12.f5 e5 13.f6 Kh8 14.d5 Na5 15.Ng3 gxf6 16.Nf5 Bc8 17.Qh5 Bxf5 18.exf5 Rg8 19.Rf3 Rg7 20.Bh6 Rg8 21.Rh3 1-0 Bronstein-Najdorf 1950]

4 ... Bxc3+

Unnecessary

- 5 bxc3 b6
- 6 e3 Bb7
- 7 Nf3 h6
- 8 Bh4 0-0
- 9 Bd3 d6
- 10 0-0 Nbd7

There's not a lot in this. The one thing you can do is try and squash Black with your big centre.

11 Re1

[So, next time maybe try 11.Nd2 c5 12.e4... or try one of the plans in the games I gave above.]

- 11 ... c5
- 12 Rb1 Qc7
- 13 Bg3 Qc6

It might be time to transfer to a standard Nimzo pawn structure:

14 Be2

[14.e4 Normally the White dark-squared bishop is safe from capture.]

- 14 ... Ne4
- 15 Qc2 Nxc3
- 16 hxg3 Rfd8
- 17 Red1 Rac8
- 18 Ne1 Ra8
- 19 Bf3

White has nothing to show from the opening but messy pawns: if anything Black is better at the moment. You need a better plan against this defence.

(17) *Glamorgan-Picken, C*

- 1 e4 e6
- 2 d4 d5
- 3 Nf3 c5

You usually wait to play this until White has sealed the centre.

[3...Nf6 would have encouraged him to do just that.; 3...dxe4 If you can take a free central pawn, do so!]

- 4 Be3 dxe4
- 5 Ne5 Nf6
- 6 c3 Bd7

[6...cxd4 looks most awkward for White.]

- 7 dxc5 Nc6
- 8 Nxd7 Nxd7
- 9 Nd2

[Now 9.b4 makes it awkward for Black on the Queen's-side.]

- 9 ... Bxc5
- 10 Nxe4 Bxe3
- 11 fxe3 0-0
- 12 Bd3

12 ... Nf6

[12...Nde5 looked more active, I thought, but I hadn't

seen your idea. But would your move still be the best if he saw what you had in mind?]

13 Qe2? Nxe4
14 Bxe4 Qh4+

Very good.

15 g3 Qxe4

[36.Qxe5 Rxe5 37.Nf7+]

1-0

(18) Stegink, L-Somerset

- 1 e4 e6
- 2 d4 d5
- 3 e5 c5
- 4 c3 Nc6
- 5 f4 Qb6
- 6 Nf3

6 ... Bd7

A bit slow, given how greedy White is being with the centre.

7 b3 f6

8 Be3

8 ... Qa5

Move a new piece instead

[8...Be7; 8...Nh6]

9 Be2 cxd4

10 Nxd4

Helpful! This loses control of the centre.

[10...cxd4]

10 ... fxe5

11 fxe5 Nxe5

12 Bf4 Ng6

13 Bg3 Bc5

14 b4

Black is lucky that this doesn't win!

14 ... Bxb4

15 cxb4 Qxb4+

16 Qd2 Qc5

[16...Qxd2+ Black's pawns are worth more in an endgame.]

17 Bf2 Qd6

18 0-0 Nf6

19 Bg3

Just tempts Black to make a move he should make!

[19.Nb5]

19 ... e5

20 Nf5 Bxf5

21 Rxf5 Qe6

22 Rf1 0-0

23 Nc3 Rac8

24 Rad1 Rfd8

25 Bf3

25 ... Rc5

[25...e4 26.Be2 d4 squashes White properly – Black is better here.]

26 Bf2 d4

27 Ne4

Ah, now White has blockaded the pawns, he's not too bad here, but will find it hard to win. Perhaps the best plan is to move the Rooks to the queen's side.

27 ... Rc7

28 Rfe1 Re7

½–½

Three pawns I guess are worth the same as a Bishop, but normally these positions are so unbalanced that someone is winning!

(30) *Stegink, L-Somerset*

Not sure what happened here: your King ended up on f2, which didn't look right, then Black had control of the centre and better development – which is not the idea when you're White!

When I came back, you were a Bishop down, and I guess that was enough.

5 William Norton

General: I think you have a good idea of the game but need to be a bit more buttoned up: playing more actively and consistently. I saw some good aggression, especially in the game that I don't have the score of, but you need to keep going once you've started.

(5) Norton, W-Somerset

1 e4 e5
2 Nf3 Nc6
3 Bb5 d6

4 h3

Ooh, very slow. How does this help your game? Not the right plan in this position

[4.d4]

4 ... Bd7
5 0-0 Nf6
6 Re1 g6
7 d4

Now this might let Black out of the box

7 ... a6

[7...Nxd4 8.Bxd7+ Qxd7 9.Nxd4 exd4 10.Qxd4 Bg7 and White will have to play accurately to show up the weaknesses in Black's position.]

8 Ba4

8 ... Be7

[8...Bg7 is more consistent.]

9 Bh6

[9.d5 is a good squashing move, leaving Black with a rotten bishop.]

9 ... Nh5

10 d5 Na7

11 Bxd7+

[11.c4]

11 ... Qxd7

12 Nc3 0-0-0

13 Be3 Kb8

14 b4 good!

14 ... Nf4

15 Ne2

15 ... Nxh3+

16 Kh2

[16.gxh3 Qxh3 is risky but best.]

16 ... Nf4

17 Bxf4 exf4

18 Nxf4 Qg4

19 Nh3 Qh5

20 Rb1 g5

21 Kg1 g4

This was as far as I saw: you lost a knight I think but could have saved it using a pin:

22 Nd4 Qe5

23 f4 0-1

(19) Norton, W-Somerset

1 e4 c6

2 d4 d5

3 Nc3 dxe4

4 Nxe4 Bf5

5 Nc3

[5.Ng3 gains time on the bishop]

5 ... e6

6 Nf3 Bb4

7 Bd2 Nf6

8 a3 Ba5

9 Be2

White has placed his bishops very quietly: one like this may be ok, but both lacks energy

9 ... 0-0

10 b4 Bb6

11 0-0

Sleepy!

11 ... Bxd4
 12 Nxd4 Qxd4
 13 Ra2

Curious

13 ... Ne4
 14 Nb1 Rd8
 15 Bc3 Qxd1
 16 Bxd1 Nxc3

With Queens off, Black can look forward to playing an endgame with an extra pawn.

17 Nxc3 Nd7
 18 Bf3 Nf6
 19 h3 Nd5
 20 Nxd5 cxd5
 21 c3 Rac8
 22 Rc1 Be4

Mistaken I think: Black's bishop is a great piece and this swap just messes up the pawns, giving White a passed pawn. That's what Black wants!

23 Bxe4 dx4
 24 Rac2 f5
 [24...b5]
 25 c4 b5
 26 c5

Now White is completely back in the game.

26 ... Rd5
 27 Ra1 Rd4
 28 Kh2 Rd3
 29 Re1? Rxa3

30 Re3 Rxe3
 31 fxe3 Rd8

We then got into an endgame where both sides had an advanced passed pawn on the Queen's side. These both disappeared, after which Black was winning all over the king's side. So, if you could have kept your counterplay on the queen's-side, perhaps that's what you should have done – but I didn't see this part of the game.

[...] 0-1

(31) Glamorgan-Norton, W

I'm sorry I don't have this one... In a French Defence you looked a bit slow to get going and got your king stuck in the middle. Later on both kings became very exposed – in fact, I was sure both sides couldn't possibly escape losing...

6 Sam Richardson-Velmans

General: Really I do not have a lot of advice for you – I thought you played some great chess and showed great character in your endless second round game. If the first game is the best you know how to do in the opening, then I'd have a bit of a think about the plan for your first six moves. I've written a lot in previous years about how to play the Italian Game for White, so you can look at that one day.

[4.Bb5 or 4.d4 are better]

It's all over, although there were some more moves ...

[...] 1-0

9 Alex Billings

General: I was sorry to get back and realise I didn't have any of your game scores – send them in! I saw you play a whole bunch of good moves and show some real determination over the board – that was all great stuff and I'm sure you have a lot of potential as a player.

(9) Glamorgan-Billings, A

Early on you were the exchange ahead, but White had a terribly strong centralised Bishop.

There was a period where you were swapping random checks without a lot of forethought – there were lots of chances for both sides.

Then you got your Queen behind White's defences, and then you were winning. In fact, you had a chance to win the White Queen...

...but it didn't happen, although you did win a rook.

After that, White had the attack, won a rook back and then could even have won, but seemed more interested in drawing. You quite properly refused a draw while you had a think – good stuff.

[...] ½-½

(23) Glamorgan-Billings, A

A splendid messy game. White managed to land a big fork on c7, and there was a point where you could have won back a piece...

Do you remember a position with the pieces arranged like this?

You played the rook back to f8, but of course you could have played ...Ra7 hitting both pieces at once.

There was then a bit more thud-and-blunder – every time I came to the board there was a different material imbalance – so I guess both sides were both fighting hard but overlooking things as well.

(35) Billings, A-Somerset

A more sober sort of game... You soon seemed to have an extra Bishop but were rather passive and Black got a good

deal of counterplay. In fact, at one point, I was sure he

was going to force perpetual check, but no...

10 Adam Speake

General: You know what you're supposed to be doing, it's just a matter of being a bit more careful and a bit more efficient. Don't be so ready to play Ng5 (see above) and perhaps do something to get your eye in for tactics – either books of puzzles, or playing against a computer, or just practice!

(13) Speake, A-Somerset

9 Qe2 d4
10 Na4 Bg4
11 Nf3 Bxf3
12 gxf3

White's extra pawn doesn't look at all important.

One of the games saw you going a knight up using a discovery, then losing a rook to become the exchange down...

Now, rooks need open lines, and your opponent didn't have any, so you held the

line pretty well... until you had an accident on the back rank.

[...] 1-0

(36) Glamorgan-Speake,A

This was a steady game in which you looked more active... Then a rook and a knight were gone . . .

11 Sarah Stegink

General: Not bad, several good ideas and a nice win. I think you need a few better ideas in the opening, but as you play more you will start to dig a bit deeper throughout the game. And that will mean that you don't move your rook's pawns when you can't see what to do straight away!

(10) Somerset-Stegink,S

- 1 e4 e5
- 2 Nf3 Nc6
- 3 Bc4 h6

I hate to see this move: even when it's the right move, it usually still means the wrong attitude.

- 4 Nc3

[4.0-0 Nf6 5.d4 is the right attitude from White: fast development and open lines.]

Contents

Here's a selection of basic attacking ideas for attacking the King castled king's-side; the Queen's-side stuff at the end needs attention. These are the building blocks from which winning attacks are made; examples from actual play are given below. Unless you are playing a particularly unalert opponent, one idea alone will not be forceful enough to win: rather, each decisive idea is usually accompanied by a "supporting cast" of other features of the position.

Rook on eighth rank

Example: Nielsen - Bohm, Hans [C52] cr, 1979

**1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Ba5 6.d4 d6 7.Qb3 Qd7 8.
dxe5 dxe5 9.0-0 9...Bb6 10.Rd1 Qe7 11.a4 a6 12.Ba3 Qf6 13.a5 Ba7 14.
Bd5 Nge7 15.Ra2 0-0 16.Bxc6 bxc6 17.Rad2 Rb8**

Supporting cast: Bishop on a3-f8

18.Rd8 Bg4 19.Qxb8 1-0

Perhaps its most common setting is in the late middle-game or ending:

Example: Regis-Springall, Paignton 1996

Supporting cast: Queen with access to e8

26...b6?? 27 Qe8+

Rook on seventh rank

Example: Bastian,Herbert - Eng,Holger [C54] Bad Neuenahr ch-DE (10), 1984

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Bd2 Bxd2 + 8.Nbxd2 d5 9.exd5 Nxd5 10.Qb3 Nce7 11.O-O O-O 12.Rfe1 Nb6 13.Bd3 Bf5 14.Rxe7 Bxd3 15.Rae1 Bg6 16.Nh4 Nc8 17.Nxg6 hxg6 18.R7e5 Qxd4 19.Nf3 Qd7 20.Ng5 Nd6 21. Qb4

Supporting cast: Knight on g5

21...f6 22.Re7 Qb5 23.Rxg7+ Kxg7 24.Re7+ Rf7 [24...Kg8 25. Qh4+-] 25.Rxf7+ Nxf7 26.Ne6+ 1-0

Italian diagonal

This is surely the most basic attacking theme and is present throughout the examples below. I give two more direct examples:

Example: Schiffers - Harmonist [C55] Frankfurt, 1887

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Bd2 Bxd2 + 8.Nbxd2 d5 9.exd5 Nxd5 10.Qb3 Nce7 11.O-O O-O 12.Rfe1 c6 13.a4 Qc7 14.Rac1 Nf4 [14...Qf4] 15.Ng5 Neg6

Supporting cast: Knight on g5, Rook on eighth rank(!)

16.Re8 Rxe8 17.Bxf7+ Kh8 18.Bxe8 Ne2+ 19.Kh1 Nxc1 20.Nf7+ Kg8 21.Nh6+ Kf8 22.Qg8+ Ke7 23.Bxg6 hxg6 [23...gxh6 24.Qf7+ Kd6 25.Ne4#] 24.Qxg7+ Kd8 25.Qf8+ Kd7 26.Ne4 Qd8 27.Qd6+ Ke8 28.Nf6+ 1-0

Example: euwe - thomas [D69] (EUWE), 1934

1.d4 d5 2.c4 e6 3.Nc3 Nf6 4.Bg5 Be7 5.e3 0-0 6.Nf3 Nbd7 7.Rc1 c6 8.Bd3 dxc4 9.Bxc4 Nd5 10.Bxe7 Qxe7 11.0-0 Nxc3 12.Rxc3 Black now plays the final part of Capablanca's freeing manoeuvre. 12...e5 13.dxe5 Nxe5 14.Nxe5 Qxe5 15.f4 Qe7 White has a temporary advantage in development, which is particularly clear in the positions of the Bishops. If White does not seize the moment, the advantage will vanish, and Black's last move gives White the chance he needs.

Supporting cast: Rooks on f- and c-files

16.f5 b5 17.Bb3 b4 18.f6 gxf6 19.Rxc6 Qxe3+ 20.Kh1

Now White can count up several advantages - good Bb3, good Rooks, exposed enemy King. Black may still organise a defence, given time. 20...Bb7 Now each Bishop looks good, but the other advantages have yet to be neutralised. [20...Be6

costs a pawn: 21.Bxe6 fxe6 22.Qg4+ Qg5 (22...Kh8 23.Rc7) 23.Qxe6+ Kh8 24.Rxf6 Rg8 (24...Rfe8 25.Qf7) 25.Rf2; 20...f5 21.Qh5] 21.Rcxf6 Qe4 22.Qd2 Kh8 [22...Rad8 23.Qg5+ Kh8 24.Rxf7] **23.Bxf7 Rac8** [23...Rad8 with good drawing chances 24.Qg5 (24.Qf2 Qe7 25.Bb3 Rxf6 26.Qxf6+ Qxf6 27.Rxf6 Bd5) 24...Rg8 25.Bxg8 Rxg8 26.Rf8 Qxg2+ =] **24.R6f2 Rcd8** [24...Qg4] **25.Qg5 25...Rd6** [25...Qd4 26.Bd5 Qg7 (26...Rxf2 27.Qxd8+ Kg7 28.Qg5+ Kf8 29.Qg8+ Ke7 30.Re1+ Kd6 31.Bxb7) 27.Rxf8+ Rxf8 28.Rxf8+ Qxf8 29.Qe5+ Qg7 30.Qe8+] **26.Bd5 1-0 26...Rxf2 27.Qg8# 1-0**

Long diagonal

Example: Fischer,Robert J - Andersson,Ulf [A01] Siegen Exhibition Game, 1970

1.b3 e5 2.Bb2 Nc6 3.c4 Nf6 4.e3 Be7 5.a3 0-0 6.Qc2 Re8 7.d3 Bf8 8.Nf3 a5 9.Be2 d5 10.cxd5 Nxd5 11.Nbd2 f6 12.0-0 Be6 13.Kh1 Qd7 14.Rg1 Rad8 15.Ne4 Qf7 16.g4 g6 17.Rg3 Bg7 18.Rag1 Nb6 19.Nc5 Bc8 20.Nh4 Nd7 21.Ne4 Nf8 22.Nf5 Be6 23.Nc5 Ne7 24.Nxg7 Kxg7

Open h-file

Example: Alekhine - Van Mindeno, NLD [C62], 1938

1.e4 e5 2.Nf3 Nc6 3.Bb5 d6 4.d4 exd4 5.Qxd4 Bd7 6.Bxc6 Bxc6 7.Nc3 Nf6 8.Bg5 Be7 9.O-O-O O-O 10.h4 h6 White has an advantage in space. The following Bishop offer is well known, sacrificing a piece to open the h-file against the King. 11.Nd5 hxg5 12.Nxe7 + but that's the mark of the master: exchanging a defender of the King's-side, when the recapture hxg5 will remove the other 12...Qxe7 13.hxg5 Nxe4 14.Rh5 Qe6 15.Rdh1 Threatening mate. 15...f5

Supporting cast: Knight on e5, Pawn on g5

how does White finish? The three pieces that can hit the f7 square and threaten mate all seem stymied (g5-g6, Nf3-e5, Qd4-c4)... 16.Ne5 [16.g6 Qxg6 17.Qc4+ d5] 16...dxe5 17.g6 A marvelously energetic display.[17.g6 Qxg6 18.Qc4+] 1-0

Knight on e5

Example: Pillsbury,H - Winawer,S Budapest, 1896

1.d4 d5 2.c4 e6 3.Nc3 c6 4.e3 Nf6 5.Nf3 Nbd7 6.Bd3 Bd6 7.0-0 0-0 8.e4
dxe4 9.Nxe4 Nxe4 10.Bxe4 Nf6 11.Bc2 h6 12.Be3 Re8 13.Qd3 Qc7 14.c5
Bf8 15.Ne5

Supporting cast: Queen and Bishops on diagonals

15...Bxc5 16.Bxh6 Bxd4 17.Qxd4 gxh6 18.Qf4 Nd5 19.Qxh6 f6 20.f4 Re7
21.Ng6 1-0

"The master places a Knight on e5; mate follows by itself" - TARTAKOWER

Knight on f5

Example: yates - rubinstein, budapest [C77] 1926

1.e4 e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.Qe2 b5 6.Bb3 Bc5 7.c3 O-O 8.O-O d6 I don't know this line, but the active ...Bc5 looks inconsistent with this solid defensive move 9. Rd1 Qe7 [9...Bg4] 10.d4 Bb6 11.Bg5 Nd8 12.Nh4 So often the f5 square is the forward post for a King's-side attack in the open games with e4/e5. 12...Ne6

Supporting cast: Bishop on Italian diagonal, Queen

13.Nf5 Qe8 14.Bxf6 gxf6 15.Bxe6 resigns 15...fxe6 16.Qg4+ Qg6 17.Ne7+ 1-0

Knight on g5

Example: littlewood(blindfold) - paish [C54] 1993

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Bd2 Bxd2 + 8.Nbxd2 d5 9.exd5 Nxd5 10.Qb3 Nce7 11.O-O O-O 12.Rfe1 c6 13.a4 Fritz

knows about several alternatives here: h6, Qb6, Qb7, Rb8, b6 and so on Littlewood's opponent found a new one, but the decentralising ...Qa5 does little towards getting Black's position sorted **13...Qa5 14. Ne4 Rd8 15.Ne5 Nf5 16.Qd3 Be6 17.Ng5 g6**

Supporting cast: Queen on h-file

18.Qh3 Nd6 19.Qxh7+ Kf8 20.Nxe6+ fxe6 21.Bxd5 and Nxc6+ 1-0

Explosion on e6

Example: (45) stean,m - browne,w [B94] sacrifice on e6 by knight in Sicilian, 1974

1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 a6 6.Bg5 Nbd7 7.Bc4 e6 8.O-O h6 9.Bxf6 Nxf6 10.Bb3 b6 11.f4 Bb7 12.Qd3 Be7

Supporting cast: Bishop on Italian diagonal

13.Nxe6 a common theme in these Paulsen/Scheveningen Sicilian positions **13...fxe6 14.Bxe6 b5 15.e5 Qb6+ 16.Kh1 dxe5 17.Qg6+ Kd8 18.Qf7 Qc5 19.fxe5 Bxg2+ 20.Kxg2 Rf8 21.Rad1+ Kc7 22.Qxg7 Rg8 23.exf6 Rxg7+ 24.fxg7 Bd6 25.Rf7+ Kc6 26.Bd5+ Kb6 27.Bxa8 Qg5+ 28.Kh1 Be5 29.b4 a5 30.Rb7+ Kc6 31.g8Q Qxg8 32.Rb8+** Stean won the brilliancy prize for this game **1-0**

Explosion on f6

Perhaps the commonest is the sacrifice **Rf1xNf6** to eliminate the key defender of h7. But there is another that should be in every player's repertoire:

Example: Karpov,An (2700) - Kortschnoj,V (14) (2695) [C80] Wch30-Merano, 1981

1.e4 e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.0-0 Nxe4 6.d4 b5 7.Bb3 d5 8.dxe5 Be6 9.Nbd2 Nc5 10.c3 d4 11.Bxe6 Nxe6 12.cxd4 Ncxd4 13.Ne4 Be7 14.Be3 Nxf3+ 15.Qxf3 0-0 16.Rfd1 Qe8

Supporting cast: Pawn on e5

17.Nf6+ Bxf6 18.exf6 Qc8 19.fxg7 Rd8 20.h4 c5 21.Rac1 Qc7 22.h5 Qe5
 23.h6 Qxb2 24.Rd7 Rxd7 25.Qxa8+ Rd8 26.Qxa6 Qe2 27.Rf1 Rd1 28.Qa8+
 Rd8 29.Qc6 b4 30.Qa4 Qd3 31.Rc1 Qd5 32.Qb3 Qe4 33.Qc2 Qxc2 34.Rxc2
 f5 35.f4 Kf7 36.g4 Rd5 37.gxf5 Rxf5 38.Rd2 Rf6 39.Rd7+ Kg8 40.f5 Rxf5
 41.Re7 Nxg7 42.Rxg7+ Kh8 43.Rc7 Kg8 44.Bxc5 Rg5+ 45.Kf2 Rg6 46.Be3
 1-0

Explosion on g6

Example: (48) marshall - burn [D55] 1900

1.d4 d5 2.c4 e6 3.Nc3 Nf6 4.Bg5 Be7 5.e3 0-0 6.Nf3 b6 7.Bd3 Bb7 8.cxd5
 exd5 9.Bxf6 Bxf6 10.h4 the Bxh7 theme looms - Black adopts radical therapy 10...g6 11.
 h5 Re8 12.hxg6 hxg6 13.Qc2 Nd7

Supporting cast: Rook on h-file, Queen on classic diagonal

Marshall must have thought for SECONDS over this next one... **14.Bxg6 fxc6 15.Qxg6+ Bg7 16.Ng5 Qf6 17.Rh8+ Kxh8 18.Qh7# 1-0**

Explosion on h6

Example:(50) blackburne - blanchard (london) [C30] sacrifice on h6 by B, 1891

1.e4 e5 2.f4 Bc5 3.Nc3 Nc6 4.Nf3 exf4 ? 5.d4 Bb4 6.Bxf4 d5 7.e5 Bxc3+ 8.bxc3 Be6 9.Bd3 h6 10.0-0 Nge7 11.Rb1 a rook's first duty is to sieze the open files (or half-open ones) **11...b6 12.Qd2 0-0 optimistic**

Supporting cast: Bishop on classic diagonal, Knight with access to g5

13.Bxh6 sacrifices like this don't take much thought... **13...gxh6 14.Qxh6 Ng6 15.Ng5 Re8 16.Rxf7** [16.Qh7+ or 16.Bxg6 both win] **16...Bxf7 17.Qh7+ Kf8 18.Qxf7# 1-0**

Explosion on f7

Example:(46) botvinnik - vidmar (nottingham) [D60] 1936

1.c4 e6 2.Nf3 d5 3.d4 Nf6 4.Nc3 Be7 5.Bg5 0-0 6.e3 Nbd7 7.Bd3 c5 8.0-0 cxd4 9.exd4 dxc4 10.Bxc4 Nb6 11.Bb3 Bd7 12.Qd3 Nbd5 13.Ne5 Bc6 14.Rad1 Nb4 15.Qh3 Bd5 16.Nxd5 Nbxid5 17.f4 Rc8 18.f5 exf5 19.Rxf5 Qd6

Supporting cast: Bishop on Italian diagonal, Rook on f-file

20.Nxf7 Rxf7 21.Bxf6 Bxf6 22.Rxd5 Qc6 23.Rd6 Qe8 24.Rd7 1-0

Explosion on g7

Example: (49) nn - nn (lombardy) [B18] sacrifice on g7 by N, 1994

1.e4 c6 2.d4 d5 3.Nc3 dxe4 4.Nxe4 Bf5 5.Ng3 Bg6 6.Bc4 e6 7.N1e2 Nf6 8.O-O Bd6 9.f4 Qc7 [9...Nh5] 10.f5 exf5 11.Nxf5 Bxh2+ 12.Kh1 O-O [12...Bxf5] 13.Qe1 Bd6

Supporting cast: Bishop on Italian diagonal, Rook on f-file

14.Nxg7 Kxg7 15.Rxf6 Nd7 [15...Kxf6 16.Qh4+ Kg7 17.Bh6+ Kg8 18.Qf6] 16.Qh4 Rfe8 17.Bh6+ Kh8 18.Raf1 Qd8 19.Bg5 Be7 20.Rxg6 1-0

20...fxg6 21.Rf7 Nf8 22.Nf4 mates in 5 I think, e.g. **22...h5 [22...Bxg5 23.Nxg6 + Kg8 24.Rxf8+ Kg7 25.Rf7+ Kxg6 26.Qxh7#] 23.Nxg6+ Kg8 24.Nxe7+ Rxe7 25.Rg7+ Kxg7 26.Bf6+ Kh7 27.Qxh5# 1-0**

Explosion on h7

Example: nn - nn [B22] sacrifice on h7 by B, 1875

1.e4 c5 2.c3 Nf6 3.e5 Nd5 4.d4 cxd4 5.cxd4 d6 6.Nf3 Nc6 7.Nc3 Nxc3 8.bxc3 e6 9.exd6 Bxd6 10.Bd3 Qa5 11.0-0 !? 11...Qxc3 12.Rb1 0-0 ? 13.Rb3 Qa5

Supporting cast: Rook on h-file

(i) bN missing from f6 (ii) wN can go to g5 without losing the attack (iii) wQ can get to g4/h5 (iv) other pieces can support the attack **14.Bxh7+ Kxh7 15.Ng5+ Kg6 16.Rh3 Bd7 17.Ne4 f6 18.Nxd6 f5 19.Qh5+ Kf6 20.Bg5# 1-0**

Creating weaknesses

Example: nn [D46] sacrifice on h6 by B, 1993

1.d4 Nf6 2.c4 e6 3.Nc3 d5 4.Nf3 c6 5.e3 Nbd7 6.Bd3 Bd6 7.e4 dxe4 8. Nxe4 Nxe4 9.Bxe4 Nf6 10.Bc2 0-0 11.0-0 c5 12.Bg5 cxd4 13.Qxd4 !

13...Be7 14.Qh4 ! 14...h6 15.Bxh6 gxh6 16.Qxh6 Qa5 17.Ng5 e5 18.Bh7+ Kh8 19.Be4+ Kg8 20.Rfe1 Bg4 21.Re3 Rad8 22.Rg3 Rd4 23.Ne6 fxe6 24. Rxg4+ [24.Rxg4+ Kf7 25.Qg6#] 1-0

Castling Queen's-side

This is both more aggressive and more risky than castling King's-side. With O-O-O, the Rook is immediately placed for action in the centre, but the King is one square closer to danger. The defensive front a2-b2-c2-d2 is one square longer. The move Kc1-b1 may be necessary to secure the a-Pawn after a move or exchange of the Nc3.

Much else is similar: for every Rf1xNf6 sacrifice White makes on the King's-side there is a ...Rc8xNc3 on the Queen's-side.

Differences are due mostly to (a) prior movements of the c-pawn - where we might expect the f-Pawn to be still on f2, the c-Pawn often is out of line; and (b) Pawn storms where there is opposite-side castling - when Pawns may more freely be used to open lines away from your own King. [You can of course use Pawn storms when both sides have castled King's-side if the centre is closed or only semi-open, as in many Sicilian positions]. These differences have the consequence that play is much sharper and (because of the slowness of Pawns) careful timing is

needed.

Below I give an example of the consequence of moving the c-Pawn (Bodens's mate) and a typical situation with mutual mating attacks with opposite-side castling.

Example: Opposite-side castling [B75] 1993

1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 g6 6.Be3 Bg7 7.f3 Nc6 8.Qd2 a6 9.0-0-0 Bd7 10.g4 Rc8 11.Be2 0-0 12.h4 Opposite-side castling and asymmetric pawns/files usually adds up to a race to mate the opponent's King. Both sides may throw pawns forward to open up lines for the attack. Black in these situations has a head start in that the c-file is already open, but can always have another file with ...b7-b5-b4 **12...Nxd4 13.Bxd4 Qa5 14.Kb1 e5 ! 15. Be3 Be6 16.a3 Rfd8 17.Bg5 Rd7 18.h5 Rdc7**

Supporting cast: Rook on h-file

19.h6 Rxc3 !? 20.hxg7 R8c6 21.Bxf6 Rb6 ! exciting stuff! 22.Bb5 !! 22...Rxb5 23.Qxd6 Rc8 24.Qf8+ Rxf8 25.gxf8Q+ Kxf8 26.Rxh7 1-0

Boden's mate by two Bishops

Example: Schulder - Boden, London, 1853

1.e4 e5 2.Nf3 d6 3.c3 f5 4.Bc4 Nf6 5.d4 fxe4 6.dxe5 exf3 7.exf6 Qxf6 8.gxf3 Nc6 9.f4 Bd7 10.Be3 O-O-O 11.Nd2 Re8 12.Qf3 Bf5 13.O-O-O d5 14.Bxd5

Supporting cast: Queen with access to c3

14...Qxc3+ 15.bxc3 Ba3# This is Boden delivering "Boden's Mate". Vukovic gives as canonical a position from MacDonnell-Boden, London 1869, a game also cited by Golombek's encyclopedia. Neither give a score, so here's an earlier complete game from Hooper and Whyld's "Chess Companion".

[Dr. Dave](#)

Exeter Chess Club:

Lessons from Paul Morphy

Morphy is probably the best player for the beginning player to study. Alas there are precious few games to go on, for he lived before the growth in international tournaments and was denied a match by Staunton.

Morphy more or less perfected the art of winning in open games: smooth, fast development, opening up lines for the attack, dynamic piece play throughout the game, ruthless cashing in of advantages, wonderfully imaginative combination play. Even against inferior opposition he plays with great energy and balance.

(249) morphy - duke/count [C41]

Model game 3.1: paris Model game 3.1: paris, 1858

1.e4 e5 2.Nf3 d6 3.d4 Bg4 4.dxe5 Bxf3 5.Qxf3 dxe5

Morphy had many contemporaries who could attack as well as he, but more than anyone Morphy knew how to create an attack out of the opening through accurate play. Here he already has a development advantage and the two bishops.

6.Bc4 Nf6 7.Qb3 keeping the initiative going **7...Qe7 8.Nc3 c6 9.Bg5**

White needs only two more moves to complete his development - breathtakingly efficient work.

9...b5 just the wrong sort of move **10.Nxb5 cxb5 11.Bxb5+ Nbd7 12.O-O-O**

Black's pieces are treading on each other's toes.

12...Rd8 13.Rxd7 Rxd7 14.Rd1

a nicely-coordinated crossfire of pins

14...Qe6 15.Bxd7+ Nxd7 16.Qb8+ apparently dramatic...

16...Nxb8 17.Rd8#

this masterpiece of economic development and slashing attack has become rightly famous; the final position is very neat **1-0**

(250) morphy - meek [A43]

Model game 3.2: new orleans Model game 3.2: new orleans, 1857

1.e4 e6 2.d4 c5 3.d5 e5 4.f4 d6 5.Nf3 Bg4 6.fxe5 Bxf3 7.Qxf3 dxe5

White has a development advantage and a passed d-pawn, all in seven moves!

8.Bb5+ Nd7 9.Nc3 Ngf6 10.Bg5 Be7 11.d6

a decoy

11...Bxd6 12.0-0-0 1-0

Very deft.

(251) morphy - medley [C39]

Model game 3.3: london Model game 3.3: london, 1858

1.e4 e5 2.f4 exf4 3.Nf3 g5 4.h4 g4 5.Ne5 Nf6 6.Bc4 d5 7.exd5 Bd6 8.d4 Nh5 9.Nc3 Bf5 10.Ne2 Qf6 11.Nxf4 Ng3

a confused picture, where White's central hold is perhaps more secure

12.Nh5 Nxh5 13.Bg5 Bb4+ [13...Qg7] 14.c3 Qd6

White is offered material...

15.0-0 ...but completing development is more important

15...Ng7 16.Rxf5 Nxf5 17.Qxg4 Ne7 18.Re1

the last White piece enters the fight, and Black faces early defeat

18...h5 19.Qf3 Rh7

Well, White's pieces are well-placed, but how to push Black over the edge?

20.Bb5+ c6 21.dxc6 bxc6 22.Nxc6 Nbxc6 23.Bxc6+

the White force is perfectly coordinated and Black is helpless to defend all his pieces **1-0**

(252) bird - morphy [C41]

Model game 3.4: london Model game 3.4: london, 1858

1.e4 e5 2.Nf3 d6 3.d4 f5 4.Nc3 fxe4 5.Nxe4 d5 6.Ng3 e4 7.Ne5 Nf6 8.Bg5 Bd6 9.Nh5 0-0 10.Qd2 Qe8 11.g4

White is pushing his luck

11...Nxg4 12.Nxg4 Qxh5 13.Ne5 Nc6

Black is achieving his usual brisk development

14.Be2 Qh3 15.Nxc6 bxc6 16.Be3 Rb8 17.0-0-0

not an easy decision

17...Rxf2 bold but probably too optimistic

18.Bxf2 Qa3 the point 19.c3 Qxa2 20.b4 Qa1+ 21.Kc2 Qa4+ 22.Kb2 Bxb4
23.cxb4 Rxb4+ 24.Qxb4 Qxb4+ 25.Kc2

Black has some material back, and his initiative persists

25...e3 a clearance sacrifice

26.Bxe3 Bf5+ 27.Rd3 Qc4+ 28.Kd2 Qa2+ 29.Kd1 Qb1+ White is in an insoluble muddle **0-1**

Exeter Chess Club: Book Reviews

I have just been sent a splendid appreciation of [David Bronstein's Book of the Zurich 1953 Candidates' Tournament](#) by Russell Gooding.

There are some helpful book reviews at the [Electronic Chess Library](#) at Pittsburgh, from [Tim Harding](#), from Bertrand Weegenaar at *New in Chess*, John Elburg's reviews at [ChessMail](#) from [Kevin O'Connell's Review Index](#), from [Ignacio Marin](#) and from the [Chess Cafe](#), and the terse Jeremy [Silman's Book Reviews](#). Manus Fealy has a [Reading List](#). See also the [Chess Widower](#) site, and check out [Randy Bauer's Revealing Reviews](#).

Any of these sites may have links to other review sites which I don;'t know about yet.

My reviews below have appeared in various places, like the [Devon Chess Record](#), in [Westward Ho!](#) and in [KingPin](#); others are unpublished outside this WWW site.

- [Attack with Mikhail Tal](#) [TAL/DAMSKY]
- [Danger in Chess](#) [AVNI]
- [The Blackmar-Diemer Gambit](#) [LANE]
- [The Sorcerer's Apprentice](#) [BRONSTEIN/FURSTENBURG]
- [An Opening Repertoire for the Attacking Player](#) [GUFELD]
- [Winning with the Nimzo-Indian](#) [KEENE]
- [Modern Chess Miniatures](#) [MACDONALD]
- [The Modern Chess Self-Tutor](#) [BRONSTEIN]
- [Taimanov's Selected Games](#) [TAIMANOV]
- [Tal-Botvinnik 1960: Match for the world chess championship](#) [TAL]
- [Timman's Selected Games](#) [TIMMAN]

[Dr. Dave](#)

David Bronstein. His classic book *Zurich International Chess Tournament 1953*, and the average club player.

In 1953 David Bronstein was already a proven world class chess player. Only two years previously - following a candidate's playoff against his lifelong friend Isaac Boleslavski - he had drawn a most dramatic match for the world title.

Bronstein's result against Mikhail Botvinnik (having been a point ahead with two games to play) proved beyond doubt that the new dynamism of the younger generation of Soviet players was at least the equal of the scientific and precision methods typified by the play of the then world champion.

Throughout his career Bronstein has graced the game with many magnificent ideas and innumerable wonderful games. If you have yet to see the 1955 Gothenburg Interzonal game against the eternal Candidates runner up (Paul Keres) you have truly missed an opportunity to expand your chess horizons. That game was played near to the peak of David's creative talent. Some 20 years later aged over 50 he was still capable of producing a beautiful finale against the then world junior champion Kaplan at Hastings 1975/6 (seek this game out also *).

* Incidentally both marvellous games are given in Bronstein's hugely entertaining biography 'The Sorcerer's Apprentice'.

Notwithstanding the above though. The greatest debt owed by the chess community to this most remarkable and imaginative of competitors will probably be reserved for his incredible annotations following the 1953 double round robin Candidates tournament. Bronstein himself played and shared second play in the event tied with Keres and Reshevski behind Vassily Smyslov - who went on to challenge Botvinnik for the world title.

Though the event produced many brilliant games. It is most memorable for the revolutionary style Bronstein chose to adopt in his tournament book of the event.

David made a conscious decision to 'explain' chess to the average player. Certainly his annotations contain variations, alternatives and even much tactical depth. Most important of all though it was clear that he set out to ensure that a raft of high quality Grandmaster games became at least partly comprehensible to all standards of players. His efforts have been rightly acknowledged as equally applicable for club players right up to the GM level. Boris Spassky once commented 'The author is present in its pages'. This is clearly apparent in the warmth, generosity and wonder at the creative achievements of his peers.

This period (1950's) was a rich one in terms of chess development. The new wave of players post war had begun a revolution in the way the game was played. Indeed this style was to evolve onward and be further refined some years later by messrs M Tal, R Fischer and G Kasparov. It was however to Bronstein and his ilk that initial credit must justly be attributed.

Bronstein (along with others such as Taimanov, Boleslavski and Najdorf) was largely responsibly for a re-evaluation of various set-ups (most notable the Kings Indian, Nimzo-Indian and Sicilian) during this time. The transformation in these systems from opening to middle game had previously been underestimated.

It was during and just after this tournament that these ideas were to be shaped into the formidable systems they have become. Do not however assume that Bronstein was simply a super openings analyst. It is for his clarity of thought and creative handling of the intricacies of the next phase of the game (the middle game) that this book has become justly famed for.

Favourite Games/Annotations Taimanov-Najdorf, Keres-Reshevski and Averbakh-Kotov - sensational stand outs amongst tens of great games.

In conclusion.

The average player who reads and digests the comments in this book and in doing so learns naught would do well to give up chess and try another game say *Mah Jong - with sincere apologies to C.S Howell and his comments on the classic game Reti-Alekhine Baden Baden 1924.*

Available in English translation from Dover books at #10.95.

Russell Gooding.

[Dr. Dave](#)

Devon County Chess Association Home Page

Welcome to the Web pages of the Devon County Chess Association! They have been composed by Bob Jones and Ivor Annetts, and translated into Web format by Dave Regis.

LATEST CHANGES:

- [Centenary Internet Match](#) Dec 2001
- NEW [DCCA web site](#) c/o Bob Jones, has information not found here (and vice versa).

[Devon Correspondence Chess](#) Results updated 24th July 2000
[Latest tournament reports](#); [LATEST Press release](#) ([Other columns](#))

A Bird's eye view of DCCA

DCCA was formed in 1901 to promote the interests of chess in Devon, and has been active continuously ever since then.

It has three main meetings per year; Autumn and Spring Council Meetings and an A.G.M. in June, all currently held at the Exeter Community Centre.

It organises the following activities: -

1. Team competitions in six sections, as follows: -
 1. Division I - (Bremridge Cup).
 2. Division II - (Mamhead Cup)
 3. Division III - (Schofield Cup)
 4. Division IV - (Moyle Cup)
 5. Rapidplay Division - (Newman Cup)
 6. Junior Division - (Bloodworth Shield)
2. Inter-area graded jamboree.
3. Paignton Congress each September.
4. 1st & 2nd Teams in the West of England Chess Union Championship.
5. 1st & 2nd Teams in the National Postal Chess competitions.

6. President's v Match Captain's match each September.
7. Individual County Championships at different levels.

You can find more information about the Association: [News](#) and [Officers](#) and [Clubs](#), our journal, the [Devon Chess Record](#), the [Latest Competition Results](#), [Forthcoming Congresses](#) and some results from [Paignton](#) and [Torbay](#), and up-to-date [County Results](#). Devon County Chess Association

Centenary Internet Match

To mark the 100th anniversary of the founding of the DCCA in 1901, we had an Internet chess match against our old friends from Hafnarfjardur, Iceland.

A six-board team assembled on Saturday 8th December, and despite the occasional technical hitch, a good time was had by all. A thoroughly outclassed Devon team were surprised to find themselves drawing 3-3 at the finish. You might think that if Pete Langdon had the bottle to play Bxg6 at the end, Devon might even have won, but then again, Audbergur Magnusson was kicking Dave Regis all over the board [despite giving away 300 rating points], so we had better not dwell too long on what might have been.

The Players

Hafnarfjardur:

Agust Sindri Karlsson c. 2315 [ask]
Sigurbjorn Bjornsson c. 2310 [czentovic]
Bjorn Fr. Bjornsson c. 2200 [freyr]
Thorvardur Olafsson c. 2000 [crocus]
Sverrir Orn Bjornsson c. 2000 [sverrir]
Audbergur Magnusson c. 1500. [skuggi]

Devon:

Steve Homer c. 2100
Alan Brusey c. 2000
Brian Hewson c. 2000
Pete Langdon c. 1900
Simon Waters c. 1900
Dave Regis c. 1800

All but Thorvardur Olafsson played against an Exeter team in 1995 when Agust was studying at the University.

The Quickplay

After the main event, a quickplay round-robin tournament was held, the details of which are omitted to spare the blushes of the Devon players: needlessly to say, class will out, and Hafnarfjordur ran out winners by an outrageous margin.

GNU CHESS Public licence, Free Software Foundation

Although the Free Software Foundation and I have nothing to do with each other, I like their attitude, which is the spirit in which I would like to offer the chess pages. Basically, do what you like with it, but don't forget it's mine!

In practical terms:

- if you quote directly, please attribute it properly.
- if you base your work partly on mine, please say so. [Just a mention in the "references" will do, and listing the URL would be nice.]
- if you got some stuff free from me, please let others know they can get it free from me too.

If you catch me not obeying these rules myself, please let me know!

A recent correspondent summed up the idea nicely:

"I must admit that I have grown rather cynical over the years. The internet has been the one shining light in a world that, for me, has grown overcast with the fallout of the "me" generation's myopia. Through the internet I have come to believe that there are people all over the world [...] that are contributing to the "[Stone Soup](#)" for purely altruistic reasons. I am delighted and amazed and thankful to all that are helping slow down the Third Law of Thermodynamics (entropy, non?). I will make efforts to contribute too."

Nicely put. It's my way of giving something back when [folk](#) have been kind to me. What goes around, comes around, if you'll pardon the corn. There are many reasons to like the internet, and [chess](#) is one of them.

[\[#\]](#) \$ + **GNU CHESS GENERAL PUBLIC LICENSE**

Copyright (C) 1986,1987 Free Software Foundation, Inc. Everyone is permitted to copy and distribute verbatim copies of this license, but changing it is not allowed.

The license agreements of most software companies keep you at the mercy of

those companies. By contrast, our general public license is intended to give everyone the right to share GNU Chess. To make sure that you get the rights we want you to have, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. Hence this license agreement.

Specifically, we want to make sure that you have the right to give away copies of GNU Chess, that you receive source code or else can get it if you want it, that you can change GNU Chess or use pieces of it in new free programs, and that you know you can do these things.

To make sure that everyone has such rights, we have to forbid you to deprive anyone else of these rights. For example, if you distribute copies of GNU Chess, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must tell them their rights.

Also, for our own protection, we must make certain that everyone finds out that there is no warranty for GNU Chess. If GNU Chess is modified by someone else and passed on, we want its recipients to know that what they have is not what we distributed, so that any problems introduced by others will not reflect on our reputation.

Therefore the Free Software Foundation, Inc. makes the following terms which say what you must do to be allowed to distribute or change GNU Chess.

COPYING POLICIES

1. You may copy and distribute verbatim copies of GNU Chess source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each file a valid copyright notice "Copyright (C) 1986,1987 Free Software Foundation, Inc.", containing the year of last change for the file in question; keep intact the notices on all files that refer to this License Agreement and to the absence of any warranty; and give any other recipients of the GNU Chess program a copy of this License Agreement along with the program.

2. You may modify your copy or copies of GNU Chess source code or any portion of it, and copy and distribute such modifications under the terms of Paragraph 1 above, provided that you also do the following:

a) cause the modified files to carry prominent notices stating who last changed such files and the date of any change; and

b) cause the whole of any work that you distribute or publish, that in whole or in

part contains or is a derivative of GNU Chess or any part thereof, to be freely distributed and licensed to all third parties on terms identical to those contained in this License Agreement (except that you may choose to grant more extensive warranty protection to third parties, at your option).

c) if the modified program serves as a text editor, cause it when started running in the simplest and usual way, to print an announcement including a valid copyright notice ("Copyright (C)", the year of authorship, and all copyright owners' names), saying that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License Agreement.

3. You may copy and distribute GNU Chess or any portion of it in compiled, executable or object code form under the terms of Paragraphs 1 and 2 above provided that you do the following:

a) cause each such copy of GNU Chess to be accompanied by the corresponding machine-readable source code; or

b) cause each such copy of GNU Chess to be accompanied by a written offer, with no time limit, to give any third party free (except for a nominal shipping charge) machine readable copy of the corresponding source code; or

c) in the case of a recipient of GNU Chess in compiled, executable or object code form (without the corresponding source code) you shall cause copies you distribute to be accompanied by a copy of the written offer of source code which you received along with the copy of GNU Chess.

4. You may not copy, sublicense, distribute or transfer GNU Chess except as expressly provided under this License Agreement. Any attempt otherwise to copy, sublicense, distribute or transfer GNU Chess is void and your rights to use GNU Chess under this License agreement shall be automatically terminated. However, parties who have received computer software programs from you with this License Agreement will not have their licenses terminated so long as such parties remain in full compliance.

Your comments and suggestions about our licensing policies and our software are welcome! Please contact the Free Software Foundation, Inc., 1000 Mass Ave, Cambridge, MA 02138, or call (617) 876-3296.

NO WARRANTY

BECAUSE GNU CHESS IS LICENSED FREE OF CHARGE, WE PROVIDE ABSOLUTELY NO WARRANTY, TO THE EXTENT PERMITTED BY APPLICABLE STATE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING, FREE SOFTWARE FOUNDATION, INC, AND/OR OTHER PARTIES PROVIDE GNU CHESS "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE GNU CHESS PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW WILL FREE SOFTWARE FOUNDATION, INC., AND/OR ANY OTHER PARTY WHO MAY MODIFY AND REDISTRIBUTE GNU CHESS AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY LOST PROFITS, LOST MONIES, OR OTHER SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH PROGRAMS NOT DISTRIBUTED BY FREE SOFTWARE FOUNDATION, INC.) THE PROGRAM, EVEN IF YOU HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, OR FOR ANY CLAIM BY ANY OTHER PARTY.

Exeter Chess Club: Stone Soup

From the FRACTINT documentation

Appendix B Stone Soup With Pixels: The Authors

THE STONE SOUP STORY

Once upon a time, somewhere in Eastern Europe, there was a great famine. People jealously hoarded whatever food they could find, hiding it even from their friends and neighbors. One day a peddler drove his wagon into a village, sold a few of his wares, and began asking questions as if he planned to stay for the night.

[No! No! It was three Russian Soldiers! - Lee Crocker]
[Wait! I heard it was a Wandering Confessor! - Doug Quinn]
[Well *my* kids have a book that uses Russian Soldiers! - Bert]
[Look, who's writing this documentation, anyway? - Monte]
[Ah, but who gets it *last* and gets to upload it? - Bert]

"There's not a bite to eat in the whole province," he was told. "Better keep moving on."

"Oh, I have everything I need," he said. "In fact, I was thinking of making some stone soup to share with all of you." He pulled an iron cauldron from his wagon, filled it with water, and built a fire under it. Then, with great ceremony, he drew an ordinary-looking stone from a velvet bag and dropped it into the water.

By now, hearing the rumor of food, most of the villagers had come to the square or watched from their windows. As the peddler sniffed the "broth" and licked his lips in anticipation, hunger began to overcome their skepticism.

"Ahh," the peddler said to himself rather loudly, "I do like a tasty stone soup. Of course, stone soup with CABBAGE -- that's hard to beat."

Soon a villager approached hesitantly, holding a cabbage he'd retrieved from its hiding place, and added it to the pot. "Capital!" cried the peddler. "You know, I once had stone soup with cabbage and a bit of salt beef as well, and it was fit for a king."

The village butcher managed to find some salt beef...and so it went, through potatoes, onions, carrots, mushrooms, and so on, until there was indeed a delicious meal for all. The villagers offered the peddler a great deal of money for the magic stone, but he refused to sell and traveled on the next day. And from that time on, long after the famine had ended, they reminisced about the finest soup they'd ever had.

Subject: HELP PLEASE: Unusual castlings

Message-ID: <E4rs46.A2p@exeter.ac.uk>

Organization: University of Exeter, UK.

Date: Wed, 29 Jan 1997 12:31:18 GMT

I'm compiling a piece about castling and found a couple of nice examples in a book by Pflieger and Treppner. They gave only positions and I wondered if anyone has a genuine whole game scores for a game where we see an example of the trap e.g.

- 1 ... Rb8xb2?
2. Qd1xd8+! Ke8xd8
3. O-O-O+! winning the Rook.

(I've seen it done, but don't have a complete score.)

I would be very grateful if someone could post or forward a score for this.

--

May your pieces harmonise with your Pawn structure and your sacrifices be sound in all variations

Message-ID: <mattg.270.0849275E@indirect.com>

NNTP-Posting-Host: phx-ts8-28.goodnet.com

X-Newsreader: Trumpet for Windows [Version 1.0 Rev B final beta #1]

Most Americans are probably unaware that Exeter, the home of frequent r.g.c.m contributor Dave Regis, is in Devon, the next county over from Cornwall, whence sprang GM Michael Adams. Clearly a conversation such as the following must have taken place at some West Country pub in the last few weeks:

Dave: Mikey, I'm putting together a collection of games where one player castles long and attacks a rook on b2. Do you know of any?

Michael: I can't think of any, but I'm off to Linares next week, so I'll see what I can do for you.

Dave: Much obliged, old chap. I've asked on the internet, but haven't got too much response. Have another pint?

Michael: Don't mind if I do.

As luck would have it, GM Adams did not have to wait long to fulfill his promise. In the very first round he was paired against GM Alexey Dreev, a man with a reputation of never having met a b-pawn he didn't like...

[Event "Linares 1997"]

[Site "Linares, Spain"]

[Date "1997.02.04"]

[Round "1"]

[White "Adams"]

[Black "Dreev"]

[Result "1-0"]

1. e4 c5 2. Nf3 Nc6 3. d4 cxd4 4. Nxd4 Nf6 5. Nc3 d6 6. g3 g6 7. Bg2 Bg7 8. Nxc6 bxc6 9. e5 dxe5 10. Qxd8+ Kxd8 11. Bxc6 Rb8 12. Be3 Rxb2 13. O-O-O+ Kc7 14. Bb5 Rb4 15. a3 Rxb5 16. Nxb5+ Kb7 17. Nxa7 Bf5 18. Kb2 Ng4 19. Nb5 Rc8 20. Rd2 Ka6 21. a4 e4+ 22. Bd4 Bh6 23. Re2 e5 24. Ba7 Rc4 25. h3 Nf6 26. Nd6 Rxa4 27. Be3 Bf8 28. Nxf5 Rb4+ 29. Kc1 gxf5 30. c3 Ra4 31. Kb2 Kb5 32. Rd2 Be7 33. Bg5 e3 34. Bxe3 Kc4 35. Ra1 Rxa1 36. Kxa1 Nd5 37. Kb2 Bd8 38. Kc2 Ba5 39. Rd1 h5 40. Bd2 Bb6 41. Be1 f4 42. Ra1 f3 43. Ra4+ Kc5 44. c4 Nf6 45. Ba5 Nd7 46. Kd3 f5 47. Bxb6+ Kxb6 48. Ke3 e4 49. Rb4+ Kc6 50. Rb5 Nc5 51. Rb8 Nd7 52. Rh8 Ne5

53. Kd4 Nd3 54. Rxh5
{Black resigned} 1-0

So: Did Dreev simply overlook White's 13th? Or did he decide that pitching the exchange to shatter Adams' Q-side pawns was his best drawing chance?

Clearly for many months Dave Regis has been hiding from us all his major influence on the chess world. He has but to ask, and world-class GMs leap to do his bidding! Dave, can you please ask Kasparov to take up the King's Gambit? Miles to use the Birmingham again? Fischer to... nah, never mind, not even you have that much influence.

Matt Guthrie

Hark, now hear the sailors cry
Smell the sea and feel the sky
Let your soul and spirit fly into the mystic. (Thanks, Van)

Exeter Chess Club: BCF-ELO chess grade conversion

- [BCF-ELO chess grade conversion](#)
- [Calculation of grades and ratings](#)
- [Different classes and titles of player](#)
- [A course of study tailored to different levels of player](#)

BCF-ELO chess grade conversion: revised

ELO = (BCF * 5) + 1250: 1 BCF point = 5 ELO points

N.B. USCF and ELO have the same form but I believe USCF ratings run a little higher than ELO: say, about 100 points on average. The data in the third to fifth columns is from Prof. Elo's book on **The Ratings of chessplayers, past and present.**, although comparability between national systems is both difficult and occasionally controversial. See [below](#) for my attempt.

The tables below are a bit of bodge numerically and in terms of HTML; they should be readable by text-only browsers like LYNX and graphical ones like Netscape; I try to avoid "enhancements" but Tables is good standard HTML.

| BCF | ELO |
|-----|------|
| 80 | 1650 |
| 90 | 1700 |
| 100 | 1750 |
| 110 | 1800 |
| 120 | 1850 |
| 130 | 1900 |
| 140 | 1950 |
| 150 | 2000 |
| 160 | 2050 |
| 170 | 2100 |

| | |
|--|---|
| 180 | 2150 |
| 190 | 2200 |
| 200 | 2250 |
| 210 | 2300 |
| 220 | 2350 |
| 230 | 2400 |
| 240 | 2450 |
| 250 | 2500 |
| 260 | 2550 |
|  | generated by
A Cool Blue Cat Perl programme |

Calculation of grades and ratings

BCF grades are pretty easy to calculate: you score for each graded game the current grade of your opponent if you draw, that grade +50 if you win, -50 if you lose (unless the grade difference is so great you might lose points for winning, in which case you assume the grades are 40 points apart and you score +10).

ELO ratings are more sophisticated, and are based on statisticians' [Normal Curve](#). Assume that the "class interval" (bottom of category A to bottom of category B) is 200 rating points. The distribution of scores of a player against someone their own strength is expected to fit the normal curve (upper [graph](#)) and the expected result against a player different to their rating by "x" class intervals follows the normal distribution function (lower [graph](#)).

Working out exact ELO scores from statistics tables (or using computers) is possible but not very practical. Fortunately the middle part of the function ± 1.5 class intervals is more or less straight and so you can pretend that it is straight for most purposes (a.k.a 'linear approximation').

So, to work out your rating performance in the ELO system, you can take the average rating of your opposition, work out your expected score, look at your actual score, and see how your rating should be adjusted. [There are some fiddles to cope with new players, but that's the gist of it.]

I was going to launch into the rest but both Arpad Elo and [Joe Brooks](#) have put it better than I could (but note that Joe's account has in mind the US context), and of course it is covered in the wonderful [FAQ](#).

[Glicko](#) Ratings as implemented on the [Free Internet Chess Servers](#) (FICS) contain the fiddles for new players built in to the formulae used, so the same formula can be used by the computer for all players. This is a superb refinement to the ELO system but not readily implemented for pencil-and-paper tournaments.

Player classes and titles

Most GMs and IMs come in the 'class' ELO 2400-2600. When Elo wrote, he regarded 2600 as 'World Championship Contenders', although now the term Super-GM is used in magazines (at least in the UK); to be a WC contender these days seems to require 2700.

The figure that Elo took as the top of "strong amateurs" was 2000 (BCF 175), although clearly many strong amateurs are better than that. The 'magic figure' in this country always seems to me to be 200 BCF (2200 ELO), as you will discover by talking to any UK player whose highest-ever grade is 199. It's the chess four-minute mile here, although you don't get called a master by reaching it.

To locate yourself in the scale of chess achievement there is a helpful guide in the [FAQ](#) to USCF classes and titles:

| title | range | number | (Percentile) |
|---------------|-------------|--------|----------------------|
| ----- | ----- | ----- | ----- |
| Senior Master | 2400 and up | 252 | 100 |
| Master | 2200 - 2399 | 855 | 99 |
| Expert | 2000 - 2199 | 2,263 | 95 |
| Class A | 1800 - 1999 | 3,579 | 88 |
| Class B | 1600 - 1799 | 4,714 | 78 |
| Class C | 1400 - 1599 | 5,183 | 66 |
| Class D | 1200 - 1399 | 5,226 | 54 |
| Class E | below 1200 | 19,872 | the rest of the pack |

This is hard to match up to the rest of the world since USCF ratings are not the same as ELO. I drew up the table below to help myself; I'd love to be told how to improve it.

| LEVEL/ | BCF grades/ | ELO/ | USCF class/ | Eastern European category / |
|-----------------------|--------------------|-----------------|---------------------|------------------------------------|
| {D} Minor/ | BCF 75-100/ | ELO 1625-1750/ | Class D or C | category 4 / |
| {C} Intermediate/ | BCF 100-125/ | ELO 1750-1875/ | Class C or B/ | category 3 / |
| {B} Major/ | BCF 125-150/ | ELO 1875-2000/ | Class B or A/ | category 2 / |
| {A} County/ | BCF 150-175/ | ELO 2000-2125/ | Class A or Expert/ | category 1 / |
| Top county players/ | BCF 175-200/ | ELO 2125-2250/ | Expert or NM/ | Candidate Master / |
| / | / | ELO 2200-2300/ | US NM or SM/ | National Master / |
| / | / | ELO 2300-2400/ | US SM (USCF 2400+)/ | National Master / |
| International Master/ | BCF 220-240/ | ELO 2360-2520/ | / | / |
| Grandmaster/ | BCF 240-250/ | ELO 2520-2600/ | / | / |
| Super-GM/ | BCF 250-270/ | ELO 2600-2700+/ | / | / |

[Dr. Dave](#)

Chess Ratings Explained

One of the more frequently asked questions I receive concerning chess is "What is a chess rating, and how do you get one?" This file will attempt to answer that question in a clear and concise manner.

A chess rating is a guideline for measuring a player's performance in tournaments, and ranking him/her against other players. While most people will tell you it is a measure of a player's knowledge of chess or chess ability, this is not exactly true, as there are people who perform better or worse under tournament conditions, just as there are people who perform poorly on tests even though they know the material. Many other psychological factors come into play in tournaments, such as competitive spirit, that are reflected in tournament results, and therefore also in a person's rating. So chess ratings measure performance, not ability.

Having said that, chess ratings are computed on a scale of 0 to 3000, 1500 being the theoretical average, and it is supposed to be just as difficult to get a zero rating as it is to get a 3000 rating. For the mathematically inclined, that means that the theoretical model of the rating scale follows a standard bell distribution curve, with the mean rating being 1500. There are many arbitrary subdivisions of this scale, called classes, that give names to certain ranges of ratings. Here is the rating scale and its subdivision into classes as used by the United States Chess Federation (USCF), with stats from the January 1995 rating list:

| Class Name | Rating | # of active players in 100 pt. range | Percentile range for 100 pt level |
|------------|-----------|--------------------------------------|-----------------------------------|
| | 2900-2999 | 0 | 100 |
| | 2800-2899 | 0 | 100 |
| | 2700-2799 | 5 | 100 |
| Senior - | 2600-2699 | 57 | 100 |
| Master | 2500-2599 | 58 | 100 |
| | 2400-2499 | 132 | 100 |

| | | | |
|-----------|------------------|-------|----|
| | /~~~~~ 2300-2399 | 251 | 99 |
| Master - | _____ 2200-2299 | 604 | 99 |
| | /~~~~~ 2100-2199 | 976 | 97 |
| Expert - | _____ 2000-2099 | 1,287 | 95 |
| | /~~~~~ 1900-1999 | 1,640 | 92 |
| Class A - | _____ 1800-1899 | 1,939 | 88 |
| | /~~~~~ 1700-1799 | 2,251 | 83 |
| Class B - | _____ 1600-1699 | 2,463 | 78 |
| | /~~~~~ 1500-1599 | 2,623 | 72 |
| Class C - | _____ 1400-1499 | 2,560 | 66 |
| | /~~~~~ 1300-1399 | 2,538 | 60 |
| Class D - | _____ 1200-1299 | 2,688 | 54 |
| | /~~~~~ 1100-1199 | 2,848 | 47 |
| Class E - | _____ 1000-1099 | 2,874 | 41 |
| | 0900-0999 | 3,107 | 34 |
| | 0800-0899 | 3,101 | 26 |
| | 0700-0799 | 2,751 | 19 |
| | 0600-0699 | 2,232 | 12 |
| | Under 600 | 2,959 | 7 |

Total # of Active Players 41,944

Average rating of players on 1995 annual ratings list: 1271

There are also titles that can be earned, such as National Master,

International Master, and Grand Master. These are not based solely on rating, and once earned they cannot be taken away - it is a title for life, no matter what happens to your rating afterward. Also, simply achieving a particular rating does not earn you the title - there are other requirements. A National Master (NM) is recognized by his nation's chess federation as a Master, and _typically_ has a rating of 2200-2399. An International Master (IM) is recognized by FIDE as being a master of world-class caliber, and _typically_ has a rating of 2400-2599. Grand Master (GM) is the highest title that can be earned, and GM's _typically_ sport ratings of 2600+. The ones that are truly amongst the best, the contenders for the World Championship, usually have ratings near or over 2700. Becoming a contender for the World Championship is determined by qualifying first in strong tournaments, then competing in one-on-one knock-out matches against other qualifiers - like a playoffs tree). World Champions usually have a rating in the high 2700's, and only the very best of those ever exceed 2800.

There is a common misconception that ratings are absolute, but they are not. Because of the many factors involved, the difference between two players' ratings (for the vast majority under 2100) is not considered statistically significant unless the difference is 50 points or more. Also, ratings have a tendency to undergo both inflation and deflation, like the value of currency. Because of this, significant differences can creep in when looking back over long periods of time, so one has to be careful when, say, comparing masters of the distant past to those of the present, just as one has to be careful when comparing a baseball player with a .325 batting average in 1933 to one with a .325 batting average in 1993.

The rating system currently in use both nationally and around the world was invented by a man named Arpad Elo, and is called the Elo rating system. Even the World Chess Federation (Federation Internationale de Eschecs, or FIDE) uses this system to give players international ratings. Ratings in one federation are not necessarily comparable to another. For example, since the pool of players that form the United States Chess Federation (USCF), or _any_ national chess organization, includes many amateurs and is thus weaker than the pool of international players (chess professionals), you may have to subtract between 150 and 200 points from a USCF rating to get a comparable FIDE rating.

This will also apply to comparing ratings amongst different national federations. The Russians have the strongest chess-playing population, for example, and the average Russian player will be stronger than the average player from any other country. Continuing the baseball analogy, this would be like trying to compare a .325 hitter from Japan to one in the US. The stats

are kept the same, but conditions vary, such as the relative strength of the opposition and the rules the game is played under, so the exact meaning of the stats vary.

You get a chess rating by first joining your national chess federation (for those in the US that would be the USCF), and then playing in a rated tournament. The ratings of the opponents you play, combined with your results against those opponents, determines your rating. Your results from your first tournament will give you a provisional rating. After you have played in 20 or more rated games (usually spanning about five tournaments), your rating is considered an established rating, and can then reasonably be compared with other established ratings.

For those who are mathematically inclined and interested, the formula for a provisional chess rating is:

$$R_p = R_c + \frac{400(W-L)}{N}$$

where:

R_p = the player's provisional or performance rating

R_c = the average rating of the player's opponents

W = the number of wins

L = the number of losses

N = the total number of games played ($N \leq 20$ for a provisional rating)

A draw counts as half a win and half a loss.

When a provisional rating is calculated, all the players rated games to date (up to the first 20 played) are used.

The same formula is also used to calculate someone's performance rating for a particular event or tournament, to gauge how strong a player played in any one event. When this is done, only the games for that event are used in the calculations.

Notice that for one game, your performance rating is your opponent's rating plus or minus 400 points, depending on whether you won or lost. If you drew, your performance rating is your opponent's rating. These performance ratings are then averaged to determine your provisional rating.

For an example, suppose you play five games in your first rated event. Your results for this tournament are:

| | Opponent's Rating | Result | Performance rating |
|----------|-------------------|--------|--------------------|
| Round 1: | 1350 | Won | 1750 |
| Round 2: | 1700 | Lost | 1300 |
| Round 3: | 1400 | Lost | 1000 |
| Round 4: | 1600 | Drew | 1600 |
| Round 5: | 1450 | Lost | 1050 |
| | | | ---- |
| Total | | | 6700 |

6700/5 = 1340

Or using the equation:

$$R_p = 1500 + \frac{400(1.5-3.5)}{5} = 1500 + -160 = 1340$$

This would be your provisional rating (and also your performance rating for this event - they are always the same for your first tournament).

Now suppose you play three games in your second rated tournament, as follows:

| | Opponent's Rating | Result | Performance rating |
|----------|-------------------|--------|--------------------|
| Round 1: | 1400 | Won | 1800 |
| Round 2: | 1580 | Lost | 1180 |
| Round 3: | 1200 | Drew | 1200 |
| | | | ---- |
| Total | | | 4180 |

Again, there are two ways to calculate this. First, take your old rating and multiply it by 5 to give it a proper weighting for the five games you played previously. Then add in the new performances.

$$R_p = \frac{(1340 \times 5) + 4180}{8} = 10880/8 = 1360$$

Or using the formula, remembering Rc is the average of all 8 opponents'

ratings, and wins and losses are the total wins and losses of both events, we have:

$$R_p = 1460 + \frac{400(3-5)}{8} = 1460 + -100 = 1360$$

The formula for an established rating is a bit more complex. It is:

$$R_n = R_o + K(W - W_e)$$

where:

R_n = the player's new established rating

R_o = the player's old established rating

K = a constant (32 for players rated 0-2099, 24 for 2100-2399, and 16 for 2400-3000)

W = the number of wins the player had in the event

W_e = the number of wins the player was expected to have (win expectancy), which is calculated by the following formula:

$$W_e = \frac{1}{10 + \frac{dR}{400} + 1}$$

where dR (delta R) = the difference in ratings between the player and his opponent (the player's rating minus the opponent's rating).

Suppose you've got an established rating of 1500, and you play in six-round event, with the following results:

| | Opponent's Rating | Result | Difference in rating | Win Expectancy |
|----------|-------------------|--------|----------------------|----------------|
| Round 1 | 1700 | Drew | -200 | .240 |
| Round 2 | 1600 | Won | -100 | .360 |
| Round 3 | 1850 | Lost | -350 | .118 |
| Round 4 | 1900 | Drew | -400 | .091 |
| Round 5 | 1800 | Lost | -300 | .151 |
| Round 6 | 1550 | Won | -50 | .429 |
| Total We | | | ----- | 1.389 |

Your score in the event is $.5 + 1 + 0 + .5 + 0 + 1 = 3$, so $W = 3$

Plugging these values into the equation, we have:

$$R_n = 1500 + 32(3 - 1.389) = 1500 + 51.552 = 1552$$

Some other rules apply to ratings:

Ratings floors: Once a player has an established rating, a floor 100 points below his highest rating prevents his rating from falling any lower than this. In our example, if the player's highest rating were 1552, then his floor would be 1452, and his rating could not fall below this.

Unrated players' ratings are calculated first.

Once an established rating goes over 1000, it does not go below that number.

A player may become a Master only by achieving that rating in tournament competition against Masters or Experts. Similarly, a player may become a Senior Master only by achieving that rating in tournament competition against Masters and Senior Masters.

Also, there are currently 3 types of ratings in the USCF.

There is the regular "over-the-board" or OTB rating, for games played at a time control of no less than 30 minutes per player. This is the most common type of rating, and usually the one referred to when a player asks another what his rating is. There is the Quick Chess rating, for games played at time controls of less than 30 minutes per player. There is also a Correspondence Chess rating, for games played under Correspondence Chess rules.

This is because each type of chess measures different skills or the same skills in different proportions, and some players are good at one type of chess and not at others. Each type of rating uses the same formulae and the same classifications, the only difference being the rules each type of game is played under.

Internet e-mail address - joe.brooks@newhor.uu.holonet.net.

Other freely available chess tutorial files by me to look for are:

GUIDELN2.TXT - Guidelines to playing better chess for beginners & amateurs.

NOTATN2.TXT - A tutorial on the three common forms of chess notation - algebraic, coordinate, and descriptive.

ENPASNT2.TXT - An explanation of the chess move known as "en passant".

Chess ratings serve two purposes: (a) they tell you your relative ability, and (b) are useful means for identifying and playing opponents of roughly your same ability.

This server utilizes the Glicko rating system developed by Mark E. Glickman (with assistance and corrections by Dmitry Dakhnovsky and server implementation by Vek and Hawk). The full explanation of this system is given in the "glicko" help file.

In general, your rating will be adjusted by several factors: (a) the result of your game (win, loss, draw), (b) your opponent's rating, (c) the stability of your rating, and (d) the stability of your opponent's rating. If you want to determine how your rating might change after a match with a given player, use the "assess" command.

At present, there are separate ratings for these kinds of chess: Blitz, Bughouse, Lightning, Standard, Suicide Chess and Wild. Odds games and nonstandard games are unrated by default. Your current rating is available on your "finger" file. Ratings are given in "games", "history" and "journal" displays. Once you have an established rating (RD <80) in a given type, your highest established rating to date will also be displayed. Players with established ratings will also have their ratings listed on several ranking lists (see the "best", "hbest", "rank" and "hrank" help files).

By default, the "who" command lists logged on users in order of their blitz ratings. This way, you can identify and match players of certain ratings. Ratings can be used in (a) your "formula" for filtering out match requests from other players, (b) "availmax" and "availmin" settings in order to modify which players you will be notified about, and (c) the "kiblevel" variable in order to filter out kibitzes and whispers. The "provshow" variable can be used to display a player's rating type (such as provisional or established); read "help v_provshow" for details.

TRANSFERRING RATINGS FROM ANOTHER CHESS SERVER

It is possible to transfer your rating from another chess server to this server. Contact an admin concerning which admin should process your request since different admins are on different chess servers. In general, you will need to email your request to that admin. Please use the subject line "Request for ratings transfer" and in the body of the email tell the admin your handle(s) on both chess servers. Also be sure to "message" the admin on the other server so the admin can verify that you are the person you claim to be.

SPECIAL NOTES:

(a) In the case of adjourned games that are resumed, ratings are adjusted by the users' ratings at the time the match is concluded rather than the ratings they had when the match was started.

(b) Users who abuse the ratings system in one way or another will be penalized. Penalties may include being placed on the abuser list (see "help abuser"), being prevented from playing rated chess games, and/or being banned from the server.

fics% help glicko

```
+-----+
| Vek-splanation of the Glicko Ratings System |
+-----+
```

As you may have noticed, each FICS player now has a rating and an RD.

RD stands for "ratings deviation".

Why a new system

The new system with the RD improves upon the binary categorization that was used before on fics and elsewhere, where players with fewer than 20 games were labeled "provisional" and others were labeled "established". Instead of two separate ratings formulas for the two categories, there is now a single formula incorporating the two ratings and the two RD's to find the ratings changes for you and your opponent after a game.

What RD represents

The Ratings Deviation is used to measure how much a player's current rating should be trusted. A high RD indicates that the player may not be competing

frequently or that the player has not played very many games yet at the current rating level. A low RD indicates that the player's rating is fairly well established. This is described in more detail below under "RD Interpretation".

How RD Affects Ratings Changes

In general, if your RD is high, then your rating will change a lot each time you play. As it gets smaller, the ratings change per game will go down. However, your opponent's RD will have the opposite effect, to a smaller extent: if his RD is high, then your ratings change will be somewhat smaller than it would be otherwise.

A further use of RD's:

Vek asked Mark Glickman the following:

- > Given player one with rating r_1 , error s_1 ,
- > and player two with r_2 and s_2 , do you have a formula for the probability
- > that player 1's "true" rating is greater than player 2's ?

Mark said:

Yes - it's:

$$1/(1 + 10^{-(r_1-r_2)f(\sqrt{s_1^2 + s_2^2})/400})$$

where $f(s)$ is [the function applied to RD in Step 2 below].

How RD is Updated

In this system, the RD will decrease somewhat each time you play a game, because when you play more games there is a stronger basis for concluding what your rating should be. However, if you go for a long time without playing any games, your RD will increase to reflect the increased uncertainty in your rating due to the passage of time. Also, your RD will decrease more if your opponent's rating is similar to yours, and decrease less if your opponent's rating is much different.

Why Ratings Changes Aren't Balanced

In the other system, except for provisional games, the ratings changes for the two players in a game would balance each other out - if A wins 16 points, B loses 16 points. That is not the case with this system. Here is the explanation I received from Mark Glickman:

The system does not conserve rating points - and with good reason! Suppose two players both have ratings of 1700, except one has not played in awhile and the other playing constantly. In the former case, the player's rating is not a reliable measure while in the latter case the rating is a fairly reliable measure. Let's say the player with the uncertain rating defeats the player with the precisely measured rating. Then I would claim that the player with the imprecisely measured rating should have his rating increase a fair amount (because we have learned something informative from defeating a player with a precisely measured ability) and the player with the precise rating should have his rating decrease by a very small amount (because losing to a player with an imprecise rating contains little information). That's the intuitive gist of my extension to the Elo system.

On average, the system will stay roughly constant (by the law of large numbers). In other words, the above scenario in the long run should occur just as often with the imprecisely rated player losing.

Mathematical Interpretation of RD

Direct from Mark Glickman:

Each player can be characterized as having a true (but unknown) rating that may be thought of as the player's average ability. We never get to know that value, partly because we only observe a finite number of games, but also because that true rating changes over time as a player's ability changes. But we can *estimate* the unknown rating. Rather than restrict oneself to a single estimate of the true rating, we can describe our estimate as an *interval* of plausible values. The interval is wider if we are less sure about the player's unknown true rating, and the interval is narrower if we are more sure about the unknown rating. The RD quantifies the uncertainty in terms of probability:

The interval formed by Current rating +/- RD contains your true rating with probability of about 0.67.

The interval formed by Current rating +/- 2 * RD contains your true rating with probability of about 0.95.

The interval formed by Current rating +/- 3 * RD contains your true rating
Type [next] to see next page.

tics%

tics% n

with probability of about 0.997.

For those of you who know something about statistics, these are not confidence intervals, but are called "central posterior intervals" because the derivation came from a "Bayesian" analysis of the problem.

These numbers are found from the cumulative distribution function of the normal distribution with mean = current rating, and standard deviation = RD. For example, $CDF[N[1600,50], 1550] = .159$ approximately (that's shorthand Mathematica notation.)

The Formulas

Algorithm to calculate ratings change for a game against a given opponent:

Step 1. Before a game, calculate initial rating and RD for each player.

a) If no games yet, initial rating assumed to be 1720.

Otherwise, use existing rating.

(The 1720 is not printed out, however.)

b) If no RD yet, initial RD assumed to be 350 if you have no games, or 70 if your rating is carried over from ICC.

Otherwise, calculate new RD, based on the RD that was obtained after the most recent game played, and on the amount of time (t) that has passed since that game, as follows:

$$RD' = \text{Sqrt}(RD^2 + ct)$$

where c is a numerical constant chosen so that predictions made according to the ratings from this system will be approximately

optimal.

Step 2. Calculate the "attenuating factor" for use in later steps.

For normal chess, this is given by

$$f = 1/\text{Sqrt}(1 + p \text{RD}^2)$$

Here, RD is your opponent's RD, and p is the constant

$$p = \frac{3 (\ln 10)^2}{\text{Pi}^2 400^2}$$

For bughouse, we use

$$f = 1/\text{Sqrt}(1 + p (\text{RD1}^2 + \text{RD2}^2 + \text{RD3}^2))$$

where RD1, RD2 and RD3 are the RD's of the other three players involved in the game, and p is given by

$$p = \frac{3 (\ln 10)^2}{\text{Pi}^2 800^2}$$

Note that this is between 0 and 1 - if RD is very big, then f will be closer to 0.

Step 3. r1 <- your rating,

r2 <- opponent's rating,

(in bughouse, r1 is the average of your rating and your partner's rating, and r2 is the average of your opponents' ratings)

$$E <- \frac{1 - (r1-r2)*f/400}{1 + 10f}$$

<- it has f(RD) in it!

This quantity E seems to be treated kind of like a probability.

Step 4. K = q*f

$$1/(RD)^2 + q^2 * f^2 * E * (1-E)$$

where q is a mathematical constant:

$$q = (\ln 10)/400 \text{ (normal chess),}$$

$$q = (\ln 10)/800 \text{ (bughouse).}$$

NOTE: if K is less than 16, we use 16 instead.

Step 5. This is the K factor for the game, so

$$\text{Your new rating} = (\text{pregame rating}) + K * (w - E)$$

where w is 1 for a win, 0.5 for a draw, and 0 for a loss.

Step 6. Your new RD is calculated as

$$RD' = 1$$

$$\text{-----}$$
$$\text{Sqrt}(1/(RD)^2 + q^2 * f^2 * E * (1-E)).$$

The same steps are done for your opponent.

Further information

A PostScript file containing Mark Glickman's paper discussing this ratings system may be obtained via ftp. The ftp site is hustat.harvard.edu, the directory is `/pub/glickman`, and the file is called "glicko.ps". It is available at <http://hustat.harvard.edu/pub/glickman/glicko.ps>.

Credits

The Glicko Ratings System was invented by Mark Glickman, Ph.D. who is currently at Boston University.

Vek and Hawk programmed and debugged the new ratings calculations (we may still be debugging it). Helpful assistance was given by Surf, and Shane fixed a heinous bug that Vek invented.

Vek wrote this helpfile and Mark Glickman made some essential corrections and additions.

A LIST OF RECOMMENDED BOOKS (from the British Chess Federation)

I've not read many of these myself, but these recommendations will have been made carefully by the BCF. I'd welcome opinions of yours. All the books in the "collections of games" section are in Descriptive notation; the Fischer book is for advanced players only.

Verbatim... (DrD)

A STARTER BOOK FOR ABSOLUTE BEGINNERS

- PURNELL'S CHESS FOR CHILDREN by MJ Richardson (Pergamon)
Some editions have the title PERGAMON'S CHESS FOR CHILDREN
- The alternative is STARTING CHESS by AJ GILLAM

A CO-ORDINATED COURSE FOR BEGINNERS

- MOVE ONE by R James (Faber)
- The alternative recommendation is THE BATSFORD CHESS COURSE by MJ Basman

(Batsford), followed by THE SECOND BATSFORD CHESS COURSE by the same author

ADDITIONAL BOOKS FOR ESSENTIAL DAILY PRACTICE

- HOW TO PLAY THE OPENING LIKE A MASTER by MJ Basman
- SIMPLE CHECKMATES by AJ Gillam (Batsford), also SIMPLE CHESS TACTICS
- CHESS SKILLS pamphlets (BCF)

USEFUL BOOKS FOR THE IMPROVING PLAYER

- CHESS TRAPS FOR YOUR UNWARY OPPONENT by MJ Basman
- SPIKE'S CHESS PRIMER by DG Ellison (Crowood)
- CHESS FOR TIGERS by S Webb
- FIND THE MATE by MJ Basman

PLAYING IN SERIOUS COMPETITIONS

The young tournament player should select from the following list:-

- PLAY BETTER CHESS by LW Barden (Octopus)
- CHESSERCIZES by B Pandolfini (Octopus)
- CHESS OPENINGS FOR JUNIORS by JN Walker (OUP)
- ATTACKING THE KING by JN Walker (OUP)
- CHESS ENDINGS - ESSENTIAL KNOWLEDGE by Y Averbach (Pergamon)
- WINNING ENDGAMES by A Kosten (Crowood)
- NIGEL SHORT'S CHESS SKILLS by ND Short (Hamlyn)
- BLUNDERS AND BRILLIANCIES by I Mullen and M Moss (Pergamon)

COLLECTIONS OF GAMES

- WINNING CHESS by I Chernev and F Reinfeld (Faber) **(N.B. Not a game collection but a collection of tactical ideas from actual play - DR)**
- LOGICAL CHESS MOVE BY MOVE by I Chernev (Faber)

FOR PARENTS

- THE COMPLETE CHESS ADDICT by M Fox and R James (Faber)
- THE OXFORD COMPANION TO CHESS by Hooper & Whyld (OUP)

Dr.Dave's recommended books

A word about descriptive notation:

learn it! (actually, that's two words - but you get the point. There is a host of really cracking chess literature in English which is often too cheap to pass up [second-hand or, like the Dover editions, not in need of re-setting]. Can you really wait for Batsford to commission a "Twentieth Century Edition" of Reti's **Modern Ideas in Chess**, on sale at £12.99 when you can pick it up for a fraction of that price, brand new from Dover? Of course not. It's worth becoming bilingual.)

Pricing: as accurate as I could get June 1993. Look around for bargains - I nearly fell for a John Walker classic for £9.99 then saw it brand new for £3.95 elsewhere!

5.4.1 Seven steps that cover the lot (prices Summer 1993):

- I grew up on *Raymond Bott and Stanley Morrison: Chess for Children, More Chess for Children*, and *The Chess Apprentice*. (Descriptive, £ 0p)
Straightforward and engaging treatment for junior school ages, although rather old now and sadly only in Descriptive. For a more contemporary Algebraic treatment, John Walker's **First Steps in Chess** is good.
- *Irving Chernev and Fred Reinfeld. Winning Chess*. Faber, 1956 (Descriptive, £3.95/Algebraic, £6.99).
isbn 0 571 09231 4
Well-illustrated training programme in chess tactics.
- *John Walker. Chess: Attacking the King*. Stephens, 1989. (Algebraic, £3.99)
isbn 1 85260 220 1
The basics of attacking play, clearly explained. Good examples.
- *John Walker. Chess Openings for Juniors*. Stephens, 1989. (Algebraic, £3.99/9.99)
isbn 1 85260 219 8
The basics of opening play, clearly and entertainingly explained.
- *Irving Chernev. Logical Chess, Move by Move*. Faber, 1962 (Descriptive, £5.99)
isbn 0 571 09039 7
Light-hearted and thorough exploration of chess ideas through detailed commentary of master games. Covers material to take beginners to next level.
- *Michael Stean. Simple Chess*. Faber, 1978. (Descriptive, £3.99) isbn 0 571 11257 9
Wonderfully clear discussion of some difficult strategical themes in the middlegame. A little gem.
- *Simon Webb. Chess for Tigers*. Maxwell Macmillan, 1991 (Algebraic, £5.95)
isbn 1 85744 021 8
Practical guide to making the most of your chess style.

5.4.2 Good further reading:

"I'm still confused, but now I'm confused on a much higher level"

-- ANON.

- **Reuben Fine. The ideas behind the chess openings.** (algebraic edition) Batsford, 1989. (Algebraic, £11.99).
isbn 0 7134 5788 0
A real classic - occasionally hard work but the best single volume on the openings around. Made so much clear to me; rather dated, but because it does not concern itself with variations, not as much as you might fear.
- **Kasparov, G and Keene, R. Batsford Chess Openings 2.** Batsford 1992 (Algebraic, £19.99).
isbn 0 7134 6099 7 or **Korn, W (Ed.) Modern Chess Openings 13th edn.** (Descriptive)
Do get one of these for reference and study of your chosen lines.
- **Richard Reti. Modern Ideas in Chess and Masters of the Chess Board.** Dover, 19. (Descriptive, £)
Rich and clear exposition of the development of chess strategy and then-current opening theory, explained through a review of the masters of the day. Charmingly written in a rather old-world English - for good readers only, but some of the best advice for any player. Perhaps juniors could look at the games with an older partner.
- **Pachman, L. Modern Chess Tactics, Attack and Defence in Modern Chess Tactics, and Complete Chess Strategy.** (Descriptive) Dover.
Slightly old-fashioned style (fewer diagrams) but as clear and comprehensive a treatment of the game of chess as you could wish. His books on the openings (**Open games, Semi-Open Games, Indian Defences and The Queen's Gambit** from Chess: Sutton Coldfield) are also comprehensive for their day, but now rather dated - which means of course, that they are a good second string if you have a modern book which neglects unfashionable lines.
- **Tartakower, S and Du Mont, J 500 Master Games of Chess.** (Descriptive) Batsford. The idea of explaining openings and their characteristic middlegame ideas through complete games is nothing new - here's the grandparent of them all, a really good read, games from every opening with commentary and diagrams. Naturally dated but the basic chess sense is as good now as ever. My guess is they tried to find games that illustrated every idea in chess they could think of, because the attention to the range of strategical themes and tactical ideas is meticulous.
- **Mednis, E and Crouch, C. Rate your endgame.** Algebraic: Maxwell Macmillan, 1992.
isbn 1 85744 020 X
Nice collection of practical advice and endgames, with test-yourself sections.
- **Fine, R: Basic Chess Endings** (Descriptive) /**Speelman et al.: Batsford Chess Endings** (Algebraic)/**Keres: Practical Chess Endings** (Either). Do get one of these for reference and basic study of the key endings (K and P, K+R, K+B, K+N, K+Q).

For entertainment and browsing:

- **Chernev, I. The Chess Companion.** Faber. (Descriptive)
A charming collection of chess writing and short stories, together with classic games, problems

and oddities.

- *Hooper, D and Whyld, K. The Oxford Companion to Chess.* (Algebraic) Oxford.
A marvellously thorough reference book, but also great fun to browse in.
- *James, M and Fox, D. The Even More Complete Chess Addict.* (Algebraic) Faber.
A vigorous and cheerful collection by two real enthusiasts - some games, but at its best with a glorious set of stories and gossip.

5.4.3 Good advanced reading:

"Chess is a game of understanding and not of memory"

-- ZNOSKO-BOROVSKY.

- *Alexander Kotov. Think like a grandmaster* (isbn 0 7134 3160 1), and *Play like a grandmaster.* Batsford (Algebraic, £12.99 ea.).
Influential and comprehensive texts on every aspect of chess; there is overlap between the two volumes. Nice to see self-assessment exercises. A companion volume **Train like a grandmaster** is a potboiler - avoid.
- *Max Euwe and Hans Kramer. The Middle Game,* Vols I and II. Bell, 19. (Descriptive, £ and Descriptive, £).
A complete handbook of middle game themes and structures. A host of basic instruction for budding masters that haven't budded.
- *Aaron Nimzovitch. My system.* Bell, 1950. (Descriptive/Algebraic, £)
Now classic, a brisk re-assessment of chess strategy, although needs a pinch or two of salt. His pungent style has made this one of the most widely-quoted chess books. See also his **Chess Praxis**, a games collection with his commentary. Keene has written a good book on Nimzovitch.
- *Michail Botvinnik. Selected games 1947-70.* Batsford. (Descriptive, £).
The dominant figure of post-war chess describes his games. Botvinnik makes it all sound so simple.
- *Alexander Alekhine. My best games of chess 1923-35.* Bell, 19. (Descriptive, £)
[New (Algebraic) edition, Batsford 1996] The greatest games of the greatest player, with his own notes. Brilliant, precise, dynamic.
- *Mark Dvoretsky. Secrets of Chess Tactics and Secrets of Chess Training.* (Algebraic) Batsford.
The Soviet Union's premier trainer reveals his best methods and positions. For budding masters who fancy something chewy.

COOL TIP: It's always a good idea to borrow these before spending money on them: they will all repay study over time but all could do with balancing ideas from other authors.

5.4.4 Otherwise Good Books with a Confidence-Sapping Error in the Very First Diagram:

Gerzadowicz, S **Thinker's Chess** (Thinker's Press)

MacDonald, N **Defence in Chess** (Master Class)

5.4.5 Otherwise Good Books with a Confidence-Sapping Cover (before you ever get to a Diagram)

My current favourite is **Play Anti-Indian Systems** by Egon Varnusz, cover by **Pintail Design** for Maxwell Macmillan Chess (published in 1991). The board depicted on the cover is quite OK (position after 1. d4 Nf6 2. Nf3 e6 3. Bg5), but the design is dominated by two chess knights, one done up like a Native American Indian with a feather head-dress, and one done up like the 7th Cavalry. Of course, the WHITE Knight is the Indian, and the BLACK Knight is the 7th Cavalry...

Any more? Or similar? For example, *Otherwise OK Books with a Confidence-Sapping Error on the contents page*: No.1: **The London System** by Andrew Soltis advertises a line of the Advance French on the contents page!

About the WECU

The **West of England Chess Union** (WECU) was formed in June 1947 and is thus currently celebrating its 50th Year. Its primary function is to promote chess in the 7 counties of the South West, namely Cornwall, Devon, Somerset, Dorset, Hampshire, Wiltshire & Gloucestershire with the [Bristol & District Chess League](#) as affiliated members.

To this end its officers organise the following activities:-

- The annual programme of Inter-County matches.
- The annual Senior and Graded Inter-County Jamboree, held at Taunton each September.
- The West of England Championships and Congress held each Easter weekend at different seaside venues around the region.
- The WECU Junior Individual and Team Championships.
- The grading of many of the games in the above competitions.
- The publication of its magazine, **Westward Ho!**, which contains news of all the above activities. This is published as an independent venture by the Union's General Secretary, Bob Jones. It is published 3 times per year and consists of 30 x A4 pages at a cost of £2 + 35p p&p.

Surfers are invited to download, print out and complete the [subscription form](#) in order to ensure a regular supply of future editions on your breakfast table.

[Dr. Dave](#)

Two Golden Games from the Wild West

As a small commemoration of WECU's 50 years existence, the Editor has retrieved two significant Wild West games from what records are to hand. The first game is from the first West of England Championship to be played under the auspices of the new Union exactly 50 years ago, and the second is from the 25th Championship.

This first game is taken from a tiny booklet which contains all 28 games played by the eight players involved in the 1947 Championship. All the games were annotated by Capt. P. D. Bolland the then Somerset Champion. The competition does not appear to have been part of a larger congress, as it is these days, nor does the booklet make mention of the actual venue. Can any reader with a long memory elaborate on these bare facts?

The Championship that year was won in a canter by Andrew Thomas of Tiverton with two Exeter players, Kitto and Mallison, among the three tying for 2nd and Ron Bruce of Plymouth a point behind.

| | | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | |
|---|--------------|-----|-----|-----|-----|-----|-----|-----|-----|-------|
| 1 | A. R. Thomas | x | 1 | 1/2 | 1 | 1/2 | 1/2 | 1 | 1 | 5 1/2 |
| 2 | F. E. Kitto | 0 | x | 1/2 | 1 | 0 | 1 | 1/2 | 1 | 4 |
| 3 | H. Mallison | 1/2 | 1/2 | x | 1/2 | 1 | 0 | 1/2 | 1 | 4 |
| 4 | H. Trevenen | 0 | 0 | 1/2 | x | 1 | 1 | 1 | 1/2 | 4 |
| 5 | R. M. Bruce | 1/2 | 1 | 0 | 0 | x | 1 | 0 | 1/2 | 3 |
| 6 | C. Sullivan | 1/2 | 0 | 1 | 0 | 0 | x | 1/2 | 1 | 3 |
| 7 | R. A. Slade | 0 | 1/2 | 1/2 | 0 | 1 | 1/2 | x | 0 | 2 1/2 |
| 8 | D. V. Hooper | 0 | 0 | 0 | 1/2 | 1/2 | 0 | 1 | x | 2 |

Thomas had been picked to play for England around this time, but his Headmaster at Blundell's School would not permit him the time off, a fact that caused him much regret for the rest of his life. Thomas had a weakness for unconventional openings as exemplified here by his choice of the Evans Gambit in a competition like this where there are no easy opponents.

White: A. R. B. Thomas (Tiverton)

Black: F. E. A. Kitto (Exeter)

WECU Championship 1947

Evans Gambit

1. e4 e5 2. Nf3 Nc6 3. Bc4 Bc5 4. b4 Bxb4 5. c3 Ba5 6. d4 d6 7. Qb3 Qd7 8. dxe5 Bb6 9. Bb5 a6 10. Ba4 Nge7 11. Ba3 0-0 12. exd6 Ng6 13. 0-0

Asking for trouble and getting it. Nbd2 is the move.

13.Qg4 14. Bxc6 Nf4 15. Ne1 Nh3+ 16. Kh1 Qe2 17. Nd2 Qxd2

...bxc6 is correct, leaving White with the awkward threats of Qxd2 and Nxf2+ to meet as best he can. Now the game goes in White's favour.

18. Bd5 Nxf2+ 19. Rxf2 Qxf2 20. Nd3 Qe3 21. dxc7 Bh3 22. Qc2 Bxc7 23. Re1 Bxg2+ 24. Kxg2 Qg5 + 25. Kh1 Rfd8 26. Qg2 Qh5 27. Rf1 Rxd5 28. exd5 Bxh2 29. Qf3 Qxf3+ 30. Rxf3 Bc7 31. d6 Ba5 32. c4 f6 33. Re3 Bd8 34. Re8+ Kf7 35. d7 resigns

A thrilling game worthy of both players.

The second game comes from the West of England Championship of 1970. This time the Championship was played as a Swiss and in the last round Peter Clarke met David Le Moir and needed to win in order to guarantee at least a share of first place. A win for Le Moir would give him a chance of shared 1st place hence his choice of an uncompromising opening. Notes by Dr. J. M. Aitken, former Scottish Champion, who finished joint 2nd in this competition.

White: David Le Moir

Black: Peter Clarke

1. e4 e5 2. Nf3 Nc6 3. d4 exd4 4. c3

The Goring Gambit. Le Moir might have played this in any case, as it is currently quite popular - Levy played it several times, not without some success, at Hastings - but his choice may also have been largely dictated by the score. Before the last round when this game was played scores were:- Clarke, Ellis and myself 3 1/2; Hutchings, Le Moir & G. W. Wheeler 3. The other leading pairings were Aitken-Ellis; Wheeler-Hutchings. It was clear only a win was of any use to Le Moir and he might as well lose as draw. For Clarke, too, a win was almost as essential as only this result would secure for certain at least a tie for 1st place. These considerations may help to explain the play on both sides. **4.dxc3 5. Bc4 Bc5** A more active than 4....P-Q3 played by Thomas v Merrett last year (1969 Rd 2)

6. Bxf7+ Kxf7 7. Qd5+ Kf8 8. Qxc5+ Qe7 9. Qxc3

9. QxQ+ followed by 10. Nxc3 may well be objectively better - but who would win such a position, particularly v Clarke? The practical chances of a gamble are more attractive.

9.Qxe4+ 10. Be3 d6 11. Nbd2 Qb4 12. Qd3

Finally burning his boats, but 12. Qc2 Kge2 13. 0-0 Bf4 drives the queen to a defensive position. White must attack at all costs - but the attack is not quite strong enough.

12.Nge7 13. a3 Qxb2 14. 0-0 Bf5 15. Qc4 h6 16. Rfe1 Qf6 17. Nd4 Qf7 18. Qb5 Rb8 19. N2f3 Kg8 20. Nh4 Bd7 21. Rac1 g5 22. Nhf3 Nxd4

A combination that simplifies out to Black's advantage.

23. Qxd7 Nxf3+ 24. gxf3 Nc6 25. Qxf7+ Forced. 25. Q-N4 N-K4 wins. White is now reduced to a last desperate throw.

25.Kxf7 26. Bxa7 Nxa7 27. Rxc7+ Kf6 28. Ree7 Nc6 29. Rh7 Ne5 30. Rxh8 Rxh8 31. Rxb7 Nxf3+ 32. Kg2 Ne5 33. Resigns

final position.

This game secured Clarke's victory in the Championship - though he had to wait for some hours, until my game with Ellis ended in a draw, before the tie was finally ruled out.

50th WECU Congress

The Tropicana :: Weston-Super-Mare :: Easter Weekend 1997

At least as far as weather was concerned, there can scarcely have been a better weekend for any of the preceding forty nine congresses than this WECU Golden Anniversary. The sun shone brilliantly throughout as temperatures on the sea-front threatened to reach 20 degrees C at times - in March!

Under the glass of the Tropicana, play was pretty warm too as Gavin Wall set a hot pace in the early rounds of the Open, forcing those in his wake to play for wins wherever possible.

- [Congress 97 Round 1](#)
- [Congress 97 Round 2](#)
- [Congress 97 Round 3](#)
- [Congress 97 Round 4](#)
- [Congress 97 Round 5](#)
- [Congress 97 Round 6](#)
- [Congress 97 Round 7](#)

In the end Wall took the money, Baker the WECU trophy and Thompson the British Championship entry!

Cole, Rudd and Beaumont finished 4th= on 4 1/2

Round 1

| | | | |
|----|-------------|-----------|------------|
| 1 | Humphries | 0 - 1 | Baker |
| 2 | Wall | 1 - 0 | Lesniowski |
| 3 | Chaplin | 1/2 - 1/2 | Cole |
| 4 | Thompson | 1 - 0 | Horner |
| 5 | Lane | 1/2 - 1/2 | Beaumont |
| 6 | Rudd | 1 - 0 | Boyce |
| 7 | Buckley, ST | 0 - 1 | Haydon |
| 8 | Headlong | 1/2 - 1/2 | Borkowski |
| 9 | Hill | 1/2 - 1/2 | Sharp |
| 10 | Phillips | 1 - 0 | Taylor |
| 11 | Brierley | 0 - 1 | Dilleigh |
| 12 | George | 1 - 0 | Buckley M |
| 13 | Wright | 1/2 - 1/2 | Sage |
| 14 | Littlejohns | 1/2 | |
| 15 | Butterworth | 1 | |

The first round is when serious contenders set out their stalls early as they take on the 10 Games at this stage can be rather short and bloody, and it is certainly no time to concede a careless draw that might cost dear in the end. Of the leading contenders, Chris Baker of Keynsham and G. Wall both drew early blood, and Ian Thompson and Jack Rudd soon followed up with wins of their own, but Roland Cole and Chris Beaumont both conceded draws.

White: J. G. Humphries.

Black: C. W. Baker.

Scotch Game

1. e4 e5 2. Nf3 Nc6 3. d4 exd4 4. Nxd4 Qh4 5. Nb5 Bb4+ 6. N1c3 Ba5 7. Bd3 a6 8. Na3 b5 9. g3 Qh3 10. Bd2 Nf6

Black has threatened to fork the knights, but to press ahead would probably rebound. [10...b4 11.Nd5 bxa3 12.Bxa5 Nxa5 13.Nxc7+] **11. Nd5 Nxd5 12. exd5**

Black now offers his first piece; others follow.

12.0-0 13. dxc6 Re8+ 14. Be2 d5

A second piece is offered, but this time white declines.

15. Rf1 Bg4 16. f3 Qxh2

A third black piece is left to its fate, and white cannot resist longer.

17. Bxa5 Qxg3+ 18. Kd2 Qf4+

19. Ke1 Bxf3 20. Bxc7 Qh4+ 21. Kd2 Bxe2 22. Rf4 Qe7 23. Resigns

Meanwhile, Wall benefited from a blunder and

White: G. Wall

Black: Lesniowski

Sicilian - Closed

1. e4 c5

2. Nf3 e6 3. d3 Nc6 4. g3 g6 5. Bg2 Bg7 6. 0-0 Nge7 7. c3 d5 8. Qe2 0-0 9. e5 Qc7 10. Bf4 h6 11. h4 Kh7 12. Nbd2 b5 13. Rfe1 Rb8 14. Nf1 b4 15. N1h2 bxc3 16. bxc3 Qa5 17. Rac1 f5? It's difficult to see what Black was thinking about here, allowing white to take e.p. and attack 3 pieces simultaneously.

Developing the queen's bishop seems logical.

18. exf6 Rxf6 19. Bxb8 Nxb8 20. Ng4 Rf8 21. Nge5 Nbc6 22. Bh3 Nxe5 23. Nxe5 Bxe5 24. Qxe5

Black's central defences are so threadbare it is folly to go snaffling the odd rooks pawn. **24.....Qxa2 25. Re2 Qa6 26. Bxe6 Qxd3 27. Qc7 Re8 28. Rce1 Ba6 29. Bf7 Resigns**

Final position.

Black's knight suddenly has two extras attackers and its only defender routed.

Another contender, Jack Rudd, had a scare. Playing at the speed of light, as is his way, he found himself a piece down on move 20 having used just 10 minutes on his clock. However, he made good use of what compensation he had forcing his opponent into a blunder.

White: Jack Rudd (200)

Black: Jim Boyce (163)

1. d4 d5 2. c4 e6 3. Nc3 Nf6 4. cxd5 exd5 5. Bg5 c6 6. e3 Bf5 7. Nf3 Nbd7 8. Bd3 Bxd3 9. Qxd3 Be7 10. 0-0 0-0 11. Rab1 Ne4 12. Bf4 Ndf6 13. b4 a6 14. a4 Re8 15. b5 axb5 16. axb5 Ra3 Threatening to

win the knight.

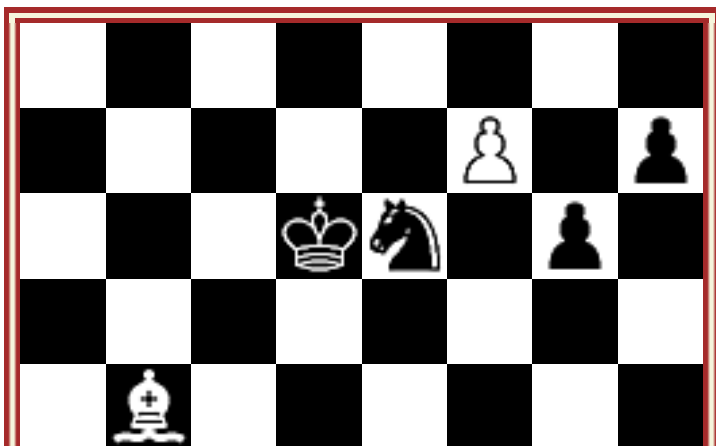

17. Rfc1 Qa5 18. bxc6 bxc6 19. Ne5 Rxc3 20. Nxc6 Rxc1+ 21. Rxc1

White has lost a piece, whose only compensation is taking black's backward c pawn leaving the d pawn vulnerable. Not much perhaps, but White plays on it....

21. ...Qd2 22. Qxd2 Nxd2 23. f3 Kf8 24. e4 Nc4 25. Bg3 Rc8 26. exd5 Nd6 27. Re1 Nf5 28. Nxe7 Nxe7 29. d6 Nf5 30. Be5 Rd8 31. Rb1 Nxd6 32. Rb8! Rxb8? [32...Nc8 33.Bxf6 gxf6 would have kept the piece intact.]

33. Bxd6+ Ke8 34. Bxb8 Kd7 35. Be5 Ne8 36. Kf2 Ke6 37. Ke3 Kd5 38. g4 f6 39. Bg3 g6 40. g5 Ng7 41. gxf6 Nf5+ 42. Kf4 Nxd4 43. f7 Ne6+ 44. Ke3 Kc6 45. Be1 Kc5 46. Bc3 Kd6 47. Bb4+ Resigns

Roland Cole and Chris Beaumont both drew against opponents graded 30 - 40 points below them.

[Dr. Dave](#)

Round 2

| | | | |
|---|-----------------|----------|----------------|
| 1 | Baker (1) | 1 - 0 | George (1) |
| 2 | Haydon (1) | 0 - 1 | Wall (1) |
| 3 | Dilleigh (1) | 1 - 0 | Thompson (1) |
| 4 | Butterworth(1) | 0 - 1 | Rudd (1) |
| 5 | Cole (1/2) | 1/2- 1/2 | Phillips (1) |
| 6 | Beaumont (1/2) | 1 - 0 | Chaplin (1/2) |

Stiffer opposition for most of the contenders and Ian Thompson had a set-back by losing to Dilleigh. Cole and Phillipps drew, but Baker and Wall set the pace by beating former champion Ian George and Haydon respectively.

White: R. Haydon

Black: G. Wall

Sicilian Defence

1. Nf3 g6 2. e4 c5 3. d4 Bg7 4. Nc3 cxd4 5. Nxd4 Nc6 6. Nb3 Nf6 7. Be2 0-0 8. 0-0 d6 9. Be3 a5 10. a4 Nb4 11. f4 Bd7 12. Bf3 Bc6 13. Nd5 Nfxd5 14. exd5 Bd7 15. c3 Na6 16. Qd2 b6 17. Nd4 Nc5 18. Qd1 Qc7 19. c4 Rae8 20. Ra2 e5 21. dxe6 fxe6 22. b3

The White queen and black square bishop are both overloaded, a fact that Black exploits to win a crucial pawn. **22...Bxd4 23. Bxd4 Rxf4 24. Rd2 Bc6 25. Be3 Bxf3 26. gxf3 Rh4 27. Rxd6 Rf8 28. Rf2 Rh3 29. Bg5 Ne4**

A suicidal knight, hitting most of white's forces in one blow - a sacrifice that can hardly be ignored. **30. fxe4** White had little choice. **30...Qc5** the point. The black queen hits both rooks.

31. Qf1 [31.Qd2 Rxf2 32.Rd8+ Rf8+ 33.Kg2 Rhf3 34.Rxf8+ Rxf8 this line also leaves White the exchange down.]

31...Rxf2

Round 3

| | | | |
|---|-------------------|-------|------------------|
| 1 | Rudd (2) | 0 - 1 | Baker (2) |
| 2 | Wall (2) | 1 - 0 | Dilleigh (2) |
| 3 | Phillips (1 1/2) | 1 - 0 | Beaumont (1 1/2) |
| 4 | Borkowski (1 1/2) | 0 - 1 | Sharp (1 1/2) |
| 5 | Thompson (1) | 1 - 0 | Sage (1 1/2) |
| 6 | Boyce (1) | 0 - 1 | Cole (1) |

Baker and Wall now pulled ahead by beating Rudd and Dilleigh respectively and Thompson kept in touch by beating Sage. Chris Beaumont, however, fell back to a blunder that lost a piece in the following short game.

White: R. Phillips.

Black: C. Beaumont

1. Nf3 g6 2. g3 Bg7 3. d4 c5 4. c3 Nf6 5. Bg2 0-0 6. 0-0 d5 7. dxc5 a5 8. h3 Na6 9. Be3 Qc7 10. Bd4 Nxc5 11. Na3 Rd8 12. Nb5 Qc6 13. a4 Bf5 14. Kh2 h5 15. Be5 Qc8 16. Nc7 Ncd7 17. Bxf6 Nxf6 18. Nxa8 Qxa8 19. Qb3 Ne4 20. Rad1 e6

Leaving Black's white-square Bishop with little room to move.

21. Nd4 Nd6 22. Nb5 Nc4? 23. e4 Resigns

winning a piece

Round 4

| | | | |
|---|------------------|-----------|--------------|
| 1 | Baker (3) | 1/2 - 1/2 | Wall (3) |
| 2 | Sharp (2 1/2) | 0 - 1 | Phillips (2) |
| 3 | Cole (2) | 1 - 0 | George (2) |
| 4 | Haydon (2) | 1 - 0 | Thompson |
| 5 | Dilliegh (2) | 1/2 - 1/2 | Rudd (2) |
| 6 | Beaumont (1 1/2) | 1 - 0 | Headlong (2) |

Baker was drawn against Wall and their mutual respect led to a 16 move draw, allowing Phillips to draw level on 3 1/2 after beating Sharp. Cole and Thompson, who were last year's 1st = with Gavin Wall, both won to keep in touch with the leaders. Cole's win came in the following All-Cornish affair.

White: R. Cole (Truro)

Black: I. M. George (Camborne)

**1. d4 Nf6 2. c4 e6 3. Nc3 Bb4 4. g3 Bxc3+ 5. bxc3 d6 6. Bg2 0-0 7. Nf3 Nbd7 8. 0-0 Re8 9. Nd2 e5 10. e4 c6 11. d5 cxd5 12. cxd5 Nc5 13. Qc2 b6 14. Nb3 Ba6 15. Rd1 Rc8 16. Nxc5 Rxc5 17. Be3 Rc7 18. h3 Qc8 19. Rac1 g6 20. Qd2 Nh5 21. Kh2 f5 22. exf5 gxf5 23. f4 Rg7 24. fxe5 Rxe5 25. Bf3 Rxc3
Black starts to look aggressive with the possibility to follow of f4 threatening mate, but White's pieces have the manoeuvrability not only to cope with the threats but also hit back. **26. Rg1 f4 27. Rxc3+ fxg3 + 28. Kg2 Qf5 29. Qd4 Nf6 30. Qf4 Nxd5 31. Qxc3+****

White gets the check in first, otherwise it might have been different. **31...Kf7 32. Bd4**

Suddenly the bishop pair comes into its own. If the rook moves the white queen will invade on g7.

32.Nf4+

[32...Re6 33.Qg7+ Ke8 34.Qg8+]

33. Kh2 Be2 34. Bxe5 dxe5 35. Rg1 Bxf3 36. Qxf3 Qc2+

A last desperado check before White's queen and rook chase the Black king round the board.

37. Kh1 Qxa2 38. Qb7+ Ke6

[38...Kf6 39.Qg7+ Kf5 40.Qxh7+ Kf6 41.Qh8+ Kf5 42.Qh7+ Kf6 43.Qh6+ Kf5 44.Rg5+ Ke4 45.Qh7+ Kf3]

[Dr. Dave](#)

Round 5

| | | | |
|---|-------------------|-----------|------------------|
| 1 | Phillips (3 1/2) | 0 - 1 | Baker (3 1/2) |
| 2 | Wall (3 1/2) | 1 - 0 | Cole (3) |
| 3 | Thompson (3) | 1 - 0 | Beaumont (2 1/2) |
| 4 | Rudd (2 1/2) | 1 - 0 | Sharp (2 1/2) |
| 5 | Borkowski (1/2) | 1/2 - 1/2 | Dilliegh (2 1/2) |
| 6 | Humphries (2 1/2) | 1 - 0 | Haydon (2) |

Having hauled themselves back in touch with wins in the previous round, Phillips and Cole couldn't maintain the momentum and lost to Baker and Wall respectively, who thereby continued to force the pace. Thompson, too, kept his challenge alive by beating Beaumont.

White: G. Wall.

Black: R. Cole.

1. e4 c5

2. Nf3 d6 3. Bb5+ Bd7 4. a4 Nc6 5. d3 g6 6. 0-0 Bg7 7. Re1 Nf6 8. Nbd2 0-0 9. Nc4 Nd4 10. Bxd7 Nxd7 11. Ng5 Nb6 12. Ne3 e5 13. Nh3 Qh4 14. a5 Nd7 15. Nd5 f5 16. c3 Ne6 17. Qb3 Rf7 Black offers the b pawn..

18. Qxb7which white accepts.

18...Raf8 19. exf5 Nb8 20. Qb3

The queen naturally beats a hasty retreat to b3 from where it soon comes to wield great influence on the white square a2-g8 diagonal, whereas the knight on b8 plays no further part in the game.

20. ...gxf5 21. Ne3 Nf4 22. Nxf4 exf4 23. Nxf5 Qg4 24. Ne7+ Kh8 25. h3 Qh4 26. Nd5 f3 27. Ra4 Bd4! 28. Rxd4 White is forced to give up the exchange to avoid a king side annihilation. [28.cxd4 f3 and white's defences are burst asunder.]

28. ...cxd4 29. Re4 Qh5 30. Qc4 f3 31. Qxd4+ Rg7 32. Rg4 Rfg8 33. Nf4 Qe5 34. Be3 R3g4 35. hxg4 R3g4? [35...Nc6 36.Qa4 Rc8 holds things together for Black much better than the text.]

36. Qxa7 Nc6 [36...Qe8 37.Bd4+ Kg8 38.Qg7+]

37. Qa8+ Rg8 38. Qxc6 Rg7 39. Qc8+ Rg8 40. Qh3 Rg7

Final position.

Time control reached and Black calls it a day in view of the threat of 41.Ng6+ R3g6 42.Bd4 Kg8 43.

Bxe5 dxe5 44.Qxg2 Rxg2+ 45.Kxg2 Kf7 46.a6

White: I. D. Thompson

Black C. Beaumont.

English Opening

**1. c4 g6 2. Nc3 Bg7 3. g3 c5 4. Bg2 Nc6 5. e4 Nf6 6. Nge2 0-0 7. 0-0 d6 8. d3 a6 9. h3 Rb8 10. a4 Ne8
11. Be3 Nc7 12. d4 cxd4 13. Nxd4 Nxd4 14. Bxd4 Bxd4 15. Qxd4 b5 16. cxb5 axb5 17. a5 b4 18.
Nd5 Nxd5 19. exd5 Bb7 20. h4 Qd7 21. Kh2 Qb5 22. Rfe1 Rfe8 23. h5 Ra8 24. h6 f6 25. a6 Rxa6 26.

[Dr. Dave](#)

Round 6

| | | | |
|---|-------------------|-----------|------------------|
| 1 | Baker (4 1/2) | 1/2 - 1/2 | Thompson (4) |
| 2 | Rudd (3 1/2) | 0 - 1 | Wall (4 1/2) |
| 3 | Humphries (3 1/2) | 0 - 1 | Phillips (3 1/2) |
| 4 | Cole (3) | 1 - 0 | Borkowski (3) |
| 5 | Dilleigh (3) | 1 - 0 | Lane (3) |
| 6 | Beaumont (2 1/2) | 1 - 0 | George (3) |

The penultimate round saw joint-leader Baker meeting Thompson, and Wall, floating down a full point, playing the rather more unpredictable Rudd. Baker was right on course for a win, having won the exchange but blew his chances with an uncharacteristic oversight letting Thompson right off the hook.

White: C. W. Baker.

Black: I. D. Thompson

French Defence

1. e4 e6 2. Nf3 d5 3. Nc3 Nf6 4. e5 Nfd7 5. d4 c5 6. dxc5 Nc6 7. Bf4 Bxc5 8. Bd3 f6 9. exf6 Nxf6 10. 0-0 0-0 11. Ne5 Bd7 12. Qe2 Nxe5 13. Bxe5 Qb6 14. Kh1 Rae8 15. f4 Bc6 16. Rab1 Bd4 17. b4 a6 18. b5 axb5 19. Nxb5 Bxb5

The bishop pair put great pressure on the black rooks **20. Bxb5 Re7 21. Bd3**

The Black queen is overloaded trying to protect bishop and the c file. **21...Qa7** [21...Qc6 22.Bb5 Qxb5 (22...Qc5)]

22. Bd6 Rfe8 23. Bxe7 Rxe7 24. c4 Qc5 25. Rb5 Qd6 26. Qd1

setting up an easily spotted trap.

26.Bc5 27. cxd5 Nxd5 28. Bxh7+

If Kxh7 29. Qc2+ winning the bishop back.

28.....Kf8 29. Be4? The threatened fork on c3 is no great threat as it allows white to exchange queens, but to include the bishop as well lets black off the hook.

29.Nc3 This oversight lets black off the hook.

30. Qxd6 Bxd6 31. Re5 Bxe5 32. fxe5+ Rf7 33. Bf3 Nxa2 34. Ra1 Nb4 35. Ra8+ Ke7 36. Rb8 Nd3 37. Rxb7+ Kf8 38. Rb5 Rf5 39. Rb8+ Kf7 40. Rb7+ Kf8 41. Rb8+

Draw by perpetual check. The king cannot escape to h7 or g6 because of the Be4 pin.

White: J. Rudd.

Black: G. Wall

Dutch Defence

1. d4 f5 2. g3 Nf6 3. Bg2 g6 4. Nf3 Bg7 5. 0-0 0-0 6. c4 d6 7. Nc3 Qe8 8. Re1 Qf7 9. b3 Ne4 10. Ng5

Clearly 10. Nxe4 isn't on, but the text loses a vital central pawn.

10.Nxc3 11. Qd3 Qf6 12. Qxc3 Qxd4 13. Bd5+ Kh8 14. Qxd4 Bxd4 15. Rb1 c6 16. Be6 Na6 17. e4 fxe4 18. Rxe4 Bf6 19. Bxc8 Raxc8 20. Ne6 Rf7 21. Be3 c5 22. Rd1 White intends to utilise the open lines caused by his missing central pawns.

22.Nc7 23. Nf4 a6 24. Bd2 Bd4 25. Ba5 e5 26. Bxc7 Rxc7 27. Nd5 Bxf2+ Another pawn dropped.

28. Kg2 Rcd7 29. Nb6 Rd8 30. Rxe5 and one recovered.

final position

Back to [West of England Chess Union](#) home page, or the [Exeter Chess Home Page](#)
[Dr. Dave](#)

Final Round

| | | | |
|---|--------------------|---------|-------------------|
| 1 | Wall (5 1/2) | 1 - 0 | Phillips (4 1/2) |
| 2 | Dilleigh (4) | 0 - 1 | Baker (5) |
| 3 | Thompson (4 1/2) | 1/2 1/2 | Cole (4) |
| 4 | Beaumont (3 1/2) | 1 - 0 | Humphries (3 1/2) |
| 5 | Lesniowski (3 1/2) | 0 - 1 | Rudd (3 1/2) |
| 6 | Haydon (3) | 1 - 0 | Sharp (3 1/2) |

Wall's win against Rudd put him in the driving seat, playing white in the last round, but knowing that Baker would be seeking to make amends for his slip and trying hard to win and possibly share 1st place. A win would give Phillips himself the chance of a shared 1st place, so Wall still had everything to play for and needed a win to be sure.

White: G. Wall

Black: R. Phillips

1. d4 Nf6

2. Nf3 g6 3. c4 Bg7 4. Nc3 0-0 5. Bg5 d6 6. e3 Nbd7 7. Be2 e5 8. Qc2 Re8 9. 0-0 c6 10. Rfd1 Qc7 11. b4 h6 12. Bh4 Nh7 13. c5 dxc5 14. dxc5 Ndf8 15. Bg3 f5 16. Rd6

White comes to dominate the d file to winning effect.

16.Qf7 17. h3 f4 18. Bh2 Be6 19. Rad1 Bc4 20. Nd2 Bxe2 21. Nxe2 g5 22. a4 Ne6 23. Ne4 Re7 24. b5 Rc8 25. bxc6 Rxc6 26. N2c3 Rec7 27. Nb5 The c7 rook is stuck for a move; Re7 would seem a better alternative as the text loses the exchange. **27.....Bf8 28. Nxc7 Rxc7**

[28...Bxd6 29.Rxd6 Rxc7]

29. R6d3 Nxc5 30. Nxc5 Bxc5 31. Qb3 Nf8 32. Qxf7+ Kxf7 33. Kf1 Ke6 34. Rc1 b6 35. e4 Nd7 36. f3 Rb7 37. Bg1 Bxg1 38. Kxg1 Nc5 39. Rd5 Nxa4 40. Rc6+ Kf7

41.Re7 42. Rh7+ Kf6 43. Rxe7 Kxe7 44. Rxe5+ Kf6 45. Rf5+ Resigns

Meanwhile, Baker needed to press on in case of any slip by Wall ahead of him

White: S. Dilleigh.

Black: C. W. Baker

Nimzo-Indian

1. d4 Nf6

2. c4 e6 3. Nc3 Bb4 4. e3 Nc6 5. Nge2 d5 6. a3 Bf8 A retreat of unusual totality - which is repeated later in the game.

7. cxd5 exd5 8. Nf4 Ne7 9. Be2 c6 10. b4 a6 11. Bd2 Nf5 12. 0-0 Bd6 13. Nd3 0-0 14. a4 Re8 15. Rb1 Ne4 16. Nxe4 dxe4 17. Ne1 Re6

Black builds up a King-side attack, where the advanced pawn cramps white's position.

18. g3 Rh6 19. Ng2 Ne7 20. f4 Bh3

21. Rf2 The rook is hopelessly blocked on f2 and becomes trapped. **21...Nd5 22. Qb3 b5 23. a5 Qd7 24. Qd1 Nf6 25. Bc3 Re8 26. Qd2 Bf8 27. Ne1 Qd5 28. Ng2 Bg4 29. Bf1 Bf3 30. Ne1 Ng4 31. h3 Nxf2 32. Qxf2 g5 33. g4 gxf4 34. exf4 Bg7 35. Qe3 Rd8 36. Nc2 Rhd6 37. Kf2 h5 38. g5 f6 39. h4 Qf5 40. Ne1 fxg5 41. hxg5 Rf8**

Final position.

The time control is reached and white takes stock before resigning. Black's queen and h-pawn are ready to invade the king's position where the bishop is already entrenched.

Having started the final round in joint 3rd (4 1/2) Thompson settled for an early draw in the hope that this would guarantee clear 3rd place, which subsequently it did.

Thus Wall took the money, Baker the WECU trophy and Thompson the British Championship entry.

Cole, Rudd and Beaumont finished 4th= on 4 1/2

Exeter Chess Club: Book Reviews : TAL/DAMSKY

[*This review first appeared in Westward Ho!*]

Book review: Attack with Mikhail Tal (179pp+index) Cadogan Press: London.

Mikhail Tal and Iakov Damsky. [[sterling]]11.99.

Mikhail Tal needs no introduction; the wizard who emerged in the late 1950s as a force to complement the science of Botvinnik. This is Mikhail Tal's last word to the chess world, some of which was transcribed from tapes made within days of his death in 1994, and which he did not live to complete. Damsky tells us the planned title was *Everything about attack*, and rues the omission of a planned chapter on the Queen's-side attack. The nine chapters completed are listed below.

Each chapter contains a number of examples, for instance, the chapter on the eighth rank contains 16 examples from games - some rather familiar (like Levitsky-Marshall) - with four test positions and an example complete game with the same back rank theme. I have another book - *Test your Chess IQ* by Livshits - which contains 32 such examples. What extra do you get from the Tal/Damsky book?

Livshits' positions all have a concrete short-term solution (say, White to play and win in 5 moves), whereas the examples in this book are nearly all of the sort that Spielmann calls 'real' sacrifices - being genuinely unclear or at least requiring more judgement than calculation. The first example does resolve inside 7 moves, but the second only clears up only after 17 moves. This sort of thing is real chess drama, and is great fun to watch in action. Tal and Damsky also give some chatty annotation which is mostly illuminating and engaging. Lastly, the themes are strategic more than tactical - the back rank chapter is the only one with an explicitly tactical theme. But all the common sacrificial motifs are present:

| Chapter | typical sacrifices |
|---------|--|
| 1. | The Main Indicator - the King in the Centre : Ng5xf7, Ng5 or Bc4xe6 |
| 2. | Breakthrough in the centre: breaks e5 and d5 |
| 3. | The assault ratio (ie. development advantage): "launching" in e.g. Nf3-g5 Ng3-h5 |
| 4. | Invasion trajectories (ie. lines of approach): diagonals a1-h8 and b1-h7/a2-f7 |
| 5. | Lines of communication (ie. interference): obstructive sacrifice e5-e6 |
| 6. | Outposts: e.g. N on e5 |
| 7. | Eliminating defenders: Rd1xNd7 |
| 8. | At the Royal Court (ie. 7th and 8th ranks): |
| 9. | Destroying the Fortress walls: Be3xh6, Bc3xg7, Bd3xh7+ |

Let me say immediately: the book is warm and witty, and the examples are hugely enjoyable. So, if the

material and ideas listed above are unfamiliar to you, then I'd grab it. Criticisms? It's churlish to carp about such an enjoyable book, and since Tal's death, a moving one, but I'll mention one or two.

It was never going to be *everything about attack*. It is missing the concrete examples (for which see Livshits), and also the rather slow attacks with a closed centre that need not require a sacrificial outburst. It also lacks any reference to the various 'natural histories' of attack that have gone before (for example, the works of Vukovic), and so the examples may be hard to integrate in your mind. But alongside these works, AWMT has a place as a modern handbook of examples.

These are perhaps things that the authors would freely concede, because they never claimed more for their book. But they did say their "*aim... of suggesting: where and on which paths in the dense forest of variations are concealed those ...indicators ... that will allow you ... to switch ... to an attack*". This is an enticing prospect: to accompany these master physicians in their diagnoses. How far is this aim realised? My view is that the book fails here. I got an early impression that these *indicators* include, firstly, a lead in development, and secondly, open lines or the capacity to open them, but after this, it is all rather *post hoc*. We meet often comments like:

"it turns out that now this is possible" (p.12)

"The correct evaluation of the position is only established by the typical attacking device carried out by the ex-world champion" (p.19)

So, although the examples are rich, the explanations are not very crisp. Tal says at one point (p.8) "*we are talking here rather abstractly, rather in the spirit of Mikhail Moiseyevich*" (Botvinnik), and while this book is full of Tal's charm, it lacks Botvinnik's science.

Lastly, the test positions I often found at once too hard and too easy. Let me give you an example:

This is the first test position from the first chapter. It may take you half a second to spot the only sacrificial idea, namely Nxf7, it may take you forever to judge it properly. The game is actually from Tal-Simagin (given below), and clearly his Grandmaster opponent misjudged the sacrifice. I don't know if he missed Tal's fifteenth move, but the game was not decided until move 45.

Almost all the examples are, like this one, *successful* examples - a sacrificial opportunity arises and is discovered to be sound. Only by comparing cases where sacrifices succeed and where they fail will we start to develop the judgement, and start to identify the *indicators*, for ourselves.

The whole game shows at once the strength and weaknesses of the book: a wonderfully dramatic attack, but could the reader emulate it?

Tal - Simagin 1956: 1. e4 c6 2. d4 d6 3. Nc3 Nf6 4. f4 Qb6 5. Nf3 Bg4 6. Be2 Nbd7 7. e5 Nd5 8. O-O Nxc3 9. bxc3 e6 10. Ng5 Bxe2 11. Qxe2 h6 (DIAGRAM) 12. Nxf7 Kxf7 13. f5 dxe5 14. fxe6+ Kxe6 15. Rb1 (This cheeky move regains some material) 15... Qxb1 16. Qc4+ Kd6 17. Ba3+ Kc7 18. Rxb1 Bxa3 19. Qb3 Be7 20. Qxb7+ Kd6 21. dxe5+ Nxe5 22. Rd1+ Ke6 23. Qb3+ Kf5 24. Rf1+ Ke4 25. Re1+ Kf5 26. g4+ Kf6 27. Rf1+ (White's harassment picks up a piece. Now Black must mobilise his rooks before White picks up all the pawns; sadly, he's too late.) 27... Kg6 28. Qe6+ Kh7 29. Qxe5 Rhe8 30. Rf7 Bf8 31. Qf5+ Kg8 32. Kf2 Bc5+ 33. Kg3 Re3+ 34. Kh4 Rae8 35. Rxg7+ Kxg7 36. Qxc5 R8e6 37. Qxa7+ Kg6 38. Qa8 Kf6 39. a4 Ke5 40. a5 Kd5 41. Qd8+ Ke4 42. a6 Kf3 43. a7 Re2 44. Qd3+ R6e3 45. Qxe3+ 1-0 Superb: Tal kept the pot boiling throughout.

Exeter Chess Club: Book Reviews : AVNI

[This review first appeared in *KingPin*]

Danger in Chess: How to avoid making blunders

Amatzia Avni (121pp, Cadogan Chess, 1994) [[sterling]]9.99

ISBN 1-85744-057-9

This is a great little book, from an Israeli psychologist and chess-player, on a subject that must be on every chess-player's list of New Year Resolutions: *I will not overlook pieces en prise, I will not miss a mate in two...* Avni takes a brisk look around at blunders and other 'failures in the sensing of danger', that is, sins of omission as well as commission.

Forgive me if you've seen this particular sin of omission before, but it was a perfect recent illustration of Avni's themes:

Kasparov - Karpov, Linares, 1994. 1. e4 c6 2. d4 d5 3. Nd2 dxe4 4. Nxe4 Nd7 5. Bc4 Ngf6 6. Ng5 e6 7. Qe2 Nb6 8. Bb3 h6 9. N5f3 a5 10. c3 c5 11. a3 Qc7 12. Ne5 cxd4 13. cxd4

Now Black played 13... a4 missing 13... Bxa3 winning a pawn. If 14. bxa3 Black wins the exchange by 14...Qc3+; and if 14. Rxa3 Black recovers the piece by 14...Qxc1+.

These two ideas are very simple, and if we are alerted to the possibility of a tactical blow here, I imagine most of us can look for and find it. But without suspecting danger, the two strongest players in the world missed it!

As well as welcoming its subject matter (not another *Solve all your opening problems forever* title from Batsogan Digest), I also welcomed its *approach*, its use of *examples* and exercises, and his *recommendations* which attempt to remedy the ills it diagnoses.

Avni has a determinedly common-sense approach to his topic and avoids psychological jargon (for example, Krogus' book talks about "*failures of selective attention*", not a form of words I found easy to get on with). He has collected together dozens of examples of chess blunder and oversights and has assigned them to three main classes according to the suspected cause of error: the opponent (e.g. *when the opponent plays incomprehensibly*), the position (e.g. *when the situation looks familiar*) and more general failures of thinking (e.g. *neglecting defence while attacking*). He also talks interestingly of *integrating* cues from different sources. This catalogue may sound like Abrahams' 'varieties of error', but Avni is much more clear and robust, less anecdotal, than Abrahams' tour.

Each category of error, and each point he makes throughout, is illustrated with two or three examples from actual games, each with a diagram. This makes much of the book possible to read without a board. Moreover, Avni does not intend to allow you to read passively, but continually presses you to apply yourself to problems and exercises.

Avni has done his homework very well: he has clearly trawled the chess press for good examples but has also read widely among the various books and papers that have been published on chess psychology. The book is packed with titbits from journals and books, as well as Avni's own chatty but pointed observations. From his collation I was interested in de Groot's notion of *discrepancy*, which was new to me: de Groot wondered '*when does a chessplayer look for an improvement to his intended move?*' and concluded that it is when the result of analysis is at odds with the player's expectations - "the *discrepancy* being a *signal* that something is probably amiss" [\[1\]](#) (author's italics).

[I don't know how far this explains the K-K incident: was there no discrepancy for the players? Or, for a GM Caro-Kann player, was a3 just the sort of move that White shouldn't be allowed to get away with? Nonetheless, this idea of discrepancy has given me food for thought in looking at my games.]

The book concludes with a series of about a dozen recommendations for players and coaches which I found very helpful. It is so easy to recognise a chess disaster, so hard to prevent the next one. For example, to Avni and his colleagues we owe the discovery that strong, experienced chess players score higher for paranoia on the MMPI[\[2\]](#) than do weaker players and non-players. His recommendation: *adopt a paranoid approach* (at least at the chessboard). An example of how this might be done: rather than comfort yourself with the thought that you cannot possibly lose, think instead *how could I possibly lose this game?* Search for a possible catastrophe.

This advice is, as ever, illustrated with examples: the one which made me wince was from Nigel Short, whose paranoia must have been running particularly low against Belyavsky at Linares in 1992:

1 Nd5 f6+, 2 Ke6?? Bc8 mate...

A couple of stray thoughts:

1. His evidence for his suggestion that (amongst other habits) we should cultivate paranoia this is essentially *negative*: he gives further examples of *failures* of suspicion which led to instant losses by strong players. Perhaps, since disease is so often the route by which we can gain insight into normal functioning of the body, this is quite right, but I am dogged by the suspicion that these are actually examples of unusual and unsuccessful chess thinking, and we know little of the usual kind. I know of a few examples of normal or more successful chess thinking: I remember some old articles by Simon Webb in the *Chess* magazine of the late 1970s under the title '*How do chessplayers think?*' which tried to capture (live) some chess thinking, the fascinating (if retrospective) comments that were the appeal of the BBC *Master Game* series, and a couple of odd comments by annotators (like Fischer's "... *Trifunovich seemed too quiet all of a sudden*" [3]). Perhaps readers know more. But my judgement is that, even in chess, which seems to me an ideal arena for research, we know little about how we go about chess decisions, what makes a difference between weak and strong players, and how to improve. This, really, is what makes a book like Avni's so interesting.

2. A technique that Avni uses more than once is to give you similar positions and ask you to puzzle out which one has the catch. This is very different to the usual type of calculative exercise that I have seen (as in the *Winning Combinative Play* or *Find the Winning Continuation* columns of magazines). Knowing there is a problem which has a solution, I can sit and puzzle out the answers to most of these up to, say, *five* moves deep [4]. And yet, like many club players, my games are pocked with oversights *two* moves deep. Even some of the games I survive can be busted in short order by my modest computer.

Now, if books on tactics had half their positions with only tempting but bogus tries, or a third of positions which were promising but which had no tactical solution yet available, this would be a much sterner and more realistic test. Does any publisher wish to take this on?

I had only a couple of minor quibbles, but the conscientious reviewer feels obliged to note them:

1. There are of course many different things to consider when choosing a move, and unless you find yourself with time to spare in each game (not true for me, I'm afraid) you may have to do something else less often or more quickly if you are to become more self-critical or more chessically paranoid. At the moment I fear that after reading Avni I will only make judgements more accurately while calculating less deeply, unless I can find a way to analyse faster. Avni does not try to address this issue, but rather treats the topic of developing a sense danger as a separate add-on to whatever you do normally.

2. I did wonder if the number of pages per pound is good value. As chess publishing has become more computerised, with great benefits in speed and accuracy, I had hoped that some savings might trickle down to the purchaser. I think that chess books have been getting worse value rather than better, but perhaps this is merely my chessplayer's paranoia!

3. There were some recommendations I expected to see and didn't! They are: write your move down first and check it (which I owe to Simon Webb), and when analysing, always look one move further for at your opponent's possibilities at the 'end' of a combination (Dvoretsky).

[1] Thought and Choice in Chess, 1965.

[2] One jargon term Avni slips in without explanation: the Minnesota Multiphasic Personality Inventory.

[3] *My Sixty Memorable Games*. Faber. (p.203).

[4] I can even survive some of the examples from the section on 'Traps' in Livshits' *Test your Chess IQ: Grandmaster Challenge* (Cadogan, 1993), an otherwise excellent book, because firstly, the fact that they are in a section on "traps" turns the paranoia dial up to 11, and secondly, he offers give-away comments like "*White was hoping for 1...Bxf4, on which he had prepared a counter-blow. What was it?*".

Blackmar-Diemer Gambit by Gary Lane (Batsford 1995)

I've just posted a follow-up to Ryan Ripley's collection of variations on the BDG, mostly by comparing his variations to those given in Gary Lane's (GL) book on the Gambit published by Batsford.

Throughout I gave only the alternative, rather than trying to suggest a preference. I found it absolutely maddening to try and decide whether any of the GL alternatives were better than the ones given in Ryan's books. Simply, it was too difficult to see what GL thinks are the best defences or attacking strategies. Instead the reader often learns only which are "fashionable" or "rare".

The book is supposed to be (back cover) the first survey by a player of international class "who can look at the opening objectively" but I really don't think that's what has happened.

I got interested in the BDG when our local gambiteer John Walker of Teignmouth beat my colleague Mark Abbott with it, a game which found its way into the national press (Guardian). I since learn from the GL book that the BDG has a venerable collection of master scalps, but the key issue is: why did the masters lose? Are the positions you get out of the BDG really so strong, or is the art of defence really so difficult to master, or did they all choose plausible-but-dubious

defences, or what? Sadly, after buying and studying the GL book for a while, I don't think I can answer that at all.

The key flaw in the book is the fact that it is bung-full of White wins. There are hundreds of games cited, nearly all 20-30 moves long, nearly all White wins. In no other opening book have I ever seen anything like this. Is the BDG a forced win? [Has GL adjusted his opening repertoire so he never has to face the BDG?] Rather than comment on this dramatic feature GL just reports them blandly as relevant experience.

What on earth am I supposed to do with these games? They are very often uncommented, apart from a closing 1-0 or +- assessment at move 26 (*1). Only rarely does GL flag a Black move with a "?" but even then he usually doesn't give any alternatives, or an assessment of the position before the error. Instead of "19...a5?" I need "19...a5? (19...Re8 =)". What I have is hardly any use at all. I wish GL had cut out at least half the games in the book, and stopped the rest at move 19 with a quantitative and verbal assessment like:

"+= White has compensation for the pawn in pressure against the light squares, but the outcome should be a draw".

"-/+ White still enjoys a lead in development, but after an eventual ...c5 the game will turn in Black's favour"

That I can use.(*2)

Obviously there is some analysis of critical positions in the book, some of which is both original and important (*3), but mostly it's in the stamp-collecting mould. The difference between a book and a database is the difference between science and stamp-collecting. The former should have analysis, theory, judgements, criticism. The latter is just a collection any monkey like me can put together with a pile of old magazines and a photocopier, requiring work but not skill.

Now, given that I read in another thread that Tim Sawyer has a 700-game "keybook" out, the stamp collection has clearly already been assembled. What we need is the master touch: masterly judgements, practical advice for both sides, promising untested alternatives (the joy of John Watson's books) and so on (**).

Instead, the GL book too often reads like a giant "Trends" pamphlet, giving you a cheerful collection of the latest news and gossip, but expecting most of the analytical notes and integration to be done by the reader.

For example, on one page (*4) he criticises 8. Qe2 as probably time-wasting

(as Qe2-f2 may follow), but gives three White wins as examples. In the main line (where White gains a tempo) he gives a critical game which turned out well for Black. And that's it! Is this eighth move position some bizarre zugzwang, so that by triangulating White wins? Of course not, but the work needed here is all left to you. If 8. Qe2 is time wasting it should have been noted as such and the three games left out. If these games have important or original attacking ideas then we should be given them, but also be told what to look for.

In another key line (*5, recommended by Euwe and Brinckmann) he gives a game with an uncommon move, 12. Ne2. He then gives the whole main game (a win for White in about 30 moves I think) without any better moves being suggested for Black. Do we assume 12. Ne2 is a forced win? No. But beyond noting it as an alternative, that I might have come across without any annotation in a database or magazine, I am hardly better off.

Part of the excuse may be that this is such untrodden ground that none of the questions I have can be answered. But if we look at the end of the book, we learn that after 1. d4 d5 2. e4 dxe4 3. Nc3 Nc6 leads to a well-known line of the Nimzovitch Defence. Now, this is a critical line of this defence and is far from untrodden, but even here we only get a 20-odd move White win or two, and the only positional assessment is at the end by which time White is clearly winning (*6).

I think the real problem with this book is that there are so few games by IM Gary Lane in it. If he had practiced the BDG for a year or two against other IMs, we would I'm sure have a run-down on attacking themes, when to adjust your usual piece placements, warning signs for duff combinations, the best Black defensive set-ups, whether Black should go for a central break with ...c5 or keep it closed, and so on.

It's not impossible that the amateurs have got it right all along, that the BDG really is an important winning attempt which gives excellent practical chances, even against an expert or master who knows how to defend. [I am reminded of the Morra Gambit, where there was some grudging acceptance of its soundness when Murray Chandler had a go with it at GM level.] But I don't feel much nearer a conclusion on this issue.

(**) Re: the master touch - My apologies to Tim if that's what he is and what he's done!

Exeter Chess Club: Book Reviews : BRONSTEIN/ FURSTENBURG

[This review first appeared in Westward Ho!]

Book review: The Sorcerer's Apprentice

by David Bronstein and Tom Furstenburg (1995) Cadogan 1995
([[sterling]]?..??) 304pp.

This compilation is subtitled

*40 Recommendations for the Novice; 40 Combinations with Explanations; 50 Games with Comments;
60 Games with Diagrams; 70 Picturesque Games*

There are also reminiscences and celebrations of Bronstein and his chess by his wife, by Smyslov (written when DB was 50), by the editors of *64* and by Boris Vainstein (at 60), and by the 'apprentice' Tom Furstenburg (at 70).

I'll skip over the recommendations for the novice, which are hard to quibble with but hard to see the use of. ("*38. Only when a position with a mating finish can clearly be seen should you pluck up courage and fearlessly sacrifice a rook or even your queen.*").

The combinations are given one on a page annotated with a diagram and commentary explaining how it arose, with occasional reflections on the art of combining by DB. Some were familiar, but most not, and all, of course, were a delight.

The meat in this multilayered sandwich is the set of 50 annotated games, 120 pages of the book. Each game has comments and variations as you might expect, but often also engaging reminiscences about the opponent, or the tournament and the encounter. For example, the eleventh of the fifty was against Tartakower, and bears a splendid tribute to the man in introduction, and a wry anecdote in reflection.

Among the reminiscences are embedded occasional reflections on chess and computers, and clocks, and Botvinnik, and the 1951 Botvinnik match, and Soviet chess politics. The politics may intrude into the chess in this book as far as the enthusiast is concerned, but it should not be forgotten how far politics intruded into Bronstein's chess. His father was imprisoned for eight years, and while he was released and

attended his son's match with Botvinnik, he attended without permission to be in Moscow, and David "*glanced regularly into the audience in order to reassure himself that his father was still there.*"

Bronstein also gives a couple of examples of his suggestion to record and reflect the time taken over each move, and muses on chess at faster limits for which he has been an advocate for some time.

The book is a celebration and however partisan some of the commentary I was given to be indulgent.

The 60 games with diagrams can be followed without too frequent recourse to a board, but I haven't yet bothered with a lot of the 70 'Picturesque' games given as bare scores. Perhaps a sentence or two of introduction might whetted my appetite - say, '*A back and forth positional struggle in the last round, decided when White errs with 43...O-O*'. Still, too late for editing now, and I came to them gorged on the earlier feasts, and this apparently dry dessert may tempt me later.

As an example, I picked this one, which I first saw in Barry Wood's *CHESS* in 1976 (along with a 19-move suckering of Smyslov). This is Bronstein the artist and wizard, and even if you don't know how he does it, it's easy to admire and enjoy.

Exeter Chess Club: Book Reviews : GUFELD

[*This review first appeared in Westward Ho!*]

An Opening Repertoire for the Attacking Player by Edward Gufeld, trans. Ken Neat. Pub. Cadogan 1996. 160pp. Index of variations and of complete games. [[sterling]][[sterling]] [[sterling]]? ISBN 1 85744 196 6

A good old-fashioned opening repertoire book, with thoroughly modern lines. I think this book would be very useful for a strongish player with an attacking bent who struggles to get the sort of position they like - you may recall Spielmann's lament that "*I can see the combinations as well as Alekhine, but I cannot get into the same positions*".

The central planks of this repertoire are the Vienna Game with White, and the Sicilian Dragon and Leningrad Dutch for Black. Against the Caro-Kann and French you are offered the respective Advance variations, and against the Pirc and Sicilian systems with f4 are chosen - the Austrian Attack and the Grand Prix Attack. These are all unquestionably attacking lines, and each has a strong GM pedigree.

The variations given are dense - for example, at one critical juncture at move 16 of the Dragon (p.116) he analyses 10 (!) continuations for White - but are clearly laid-out and it was easy to find my way around. Explanatory comments are rather few but are concise and to the point, and there are a few illustrative games. The variations seem to me to be very thorough - I couldn't rumble them with **Batsford Chess Openings 2**, which is perhaps only to be expected, but I couldn't find a hole at all quickly with my specialist openings books (e.g. **The Complete Pirc**) either.

Side-lines are mostly given proper attention: there are three pages on Owen's Defence, two on the St. George, and two on the Nimzovitch - rather more than comparable books might have bothered with.

So far, so good, but I wonder just who will find this volume useful, and how. Gufeld talks about "*mixed tournaments*" i.e. ones not composed wholly of Grandmasters(!), and suggests (p.79) that 90% of **1. e4** players reply to the Sicilian with **2. Nf3**. Maybe in GM Gufeld's world they do, but Exeter Club boasts a motley crew of Morra Gambiteers and Close Variationers, which has been enough to put some folk off the Sicilian entirely.

Moreover, a player strong enough to handle these heavyweight variations but with too few opening books to support their own opening repertoire is probably less likely a species than a player with more

books but less talent. I do wonder how the average player with an grade of, say, 125 will cope with the 17 pages of notes designed to unlock the secrets of the Dragon - for example, the standard exchange sacrifice ...Rxc3 is mentioned but not illustrated. Perhaps none of us will stick rigidly to a book's repertoire, or have the time to learn them all, but we may take up one or two of its recommended lines, and we will all find it interesting to check out our favourite lines against the ones in this book.

Although, if you do check, cracks may appear around the edges. This is probably inevitable, but does put into question the usefulness of such a book as a stand-alone solution to the problems of deciding on a repertoire. For example, after **1. e4 c5 2. f4 g6 3. Nf3 Bg7 4. c3 Nc6 5. d4** Gufeld gives a game (p.10) Sveshnikov-Ree 1992 which continued **5...d5**. But as any Modernist knows, after **5...cxd4 6. cxd4 Qb6** we are in a position considered favourable to Black by Hort and by Botterill and Keene. Moreover, I wasn't convinced by the assumption that the repertoire avoided the Gurgenzidze variation, as recommended by Norwood and Soltis. In fact, almost every line recommended by Gufeld is dismissed in some other repertoire book, and lines he gives as favourable to, say, White, form the basis of someone else's Black repertoire. Maybe these are nitpicks, but I couldn't use this book without also having several others to check against .

The title naturally prompts comparison with Batsford's **An Opening Repertoire for the Attacking Club Player** by Keene and Levy (1976), recently completely rewritten and re-issued under the same title as the Gufeld book (1996).

The revised Batsford title offers a similar selection of active lines, but concentrates more on relatively obscure, recently developed and fashionable lines, and illustrates them with fewer variations and more verbal descriptions and complete games. It looks suitable for weaker players with less time to absorb variations, and may be a better buy for the majority of players; on the downside, it gives only one page on the Nimzo and other odd defences, no indices, and is inclined to quote the whole games when just a few moves of an alternative line would have been adequate.

The two books cross theoretical swords at a couple of points: they both give as crucial a game **Lanka-Hauchard** which Gufeld gives as +/- after White's 10th move (p.42), and which Keene and Levy give (p.94) as offering Black good compensation for the Pawn after 10...O-O-O...

The shelf-life of both books may be short - antidotes to the new lines in the Batsford book may be found rather soon, while the more mainstream Gufeld repertoire is at a cutting edge which is constantly on the move.

Lanka Z F - Hauchard A/It open, Torcy 1991 [B01] 1.e4 d5 2.exd5 Nf6 3.d4 Bg4 4.f3 Bf5 5.Bb5+ Nbd7 6.c4 a6 7.Bxd7+ Qxd7 8.Ne2 e6 9.dxe6 Qxe6 10.b3

Exeter Chess Club: Book Reviews : KEENE

Book review: *Winning with the Nimzo-Indian* by Raymond Keene. Batsford. 1991, 79+xv.

I think I've bought my last book by Keene. The title that has prompted this decision is the subject of this review. It exemplified perfectly Phil Crocker's criticism of chess publishing in **Kingpin** No.22, to which Batsford, for some reason, felt the need to respond in No.23. As I remember, Phil's main gripes were:

(a) **shallowness:** books are full of glib, vague or uncommittal commentary (e.g. "*with compensation*", no need to mention if it is adequate!) - only general and strategic comments, none cashed out in terms of variations

(b) **padding:** complete games are included for no good reason at the expense of extra commentary or additional detail. I do get annoyed by large sections of games being quoted in 'double-column' format without notes viz.

1. **d4 Nf6**

2. **c4 e6**

3. **Nc3 Bb4**

This uses three lines when only one is required. If you look at older Batsford books there are many part games and games in block text, squeezing the most chess and instruction on the page. No longer.

(c) **question-begging:** books allow important questions about particular variations to be ignored, and only light notes are added to games

(d) **lack of originality/ no value added:** analysis and comments by others are quoted freely, games are cited without their significance being explained.

These were humorously put in the article, but clearly felt keenly - my guess being that PC has more than once spent the best part of [[sterling]]15 on various selections from the Batsford list. Let us look closely at Keene's book and see how it fares on these points.

The book, of course, does not claim to be complete. The author says it is a 'companion volume' to another title, **How To Play The Nimzo-Indian** that he co-authored with Shaun Taulbut in 1978, although the relationship between the two (one introductory/one advanced? one historical/one recent?) is

nowhere explained. None of the games in the earlier volume are given in this book, and there are no cross-references, nor even an index.

I'll take one chapter for particular commentary - say, the one on the closed Samisch variation. I shall try to give enough detail to be fair to the coverage offered. I shall also give my reactions. This chapter should show Keene at his best - after all, he has made a special study of it for a previous publication cited in the bibliography, **An Opening Repertoire For White** [1]. Also, it is a 'fashionable' variation (Karpov, p.71) with, I would have thought, some considerable contemporary material available.

The chapter contains half a page of general description with four complete games as its backbone, and seven additional games are mentioned in the notes. Eleven games in 11 pages is pretty light in my judgement, but quality and insight may compensate for this. Of the four games - Keene-Vella 1985, Polgar-Remlinger 1986, Johner-Capablanca 1929, and Yusupov-Karpov 1989 - the notes for two are 'based on' notes by others (Tartakower and Karpov). It may take a GM to find and reproduce the latter games, but my view is that any club player with a library and a photocopier (or a database) could do as much. So perhaps point (d), **lack of originality**, may be conceded. The half-page of description is nearly all general, and the basic variations and piece placements are not described here or later. A suspicion of **shallowness** may arise here, but let us look at the meat of the chapter - the quality of the two games which appear first and which bear Keene's own annotations.

During **Keene-Vella**, after 1. d4 Nf6 2. c4 e6 3. Nc3 Bb4 4. e3 c5 5. Bd3 Nc6 6. a3 Bxc3 7. bxc3 Vella continued 7...d6. Keene cites here a Plaskett game which continued instead 7...e5 8. Ne2 e4!?. In fact Keene quotes the whole of Psakhis-Plaskett 1985, which thus becomes the first game in the chapter, *without a single real comment*. (The !? mark is actually Keene's, and two further moves during the game are annotated ?! and !, but no support is offered for these judgements.)

I think this is disgraceful, and exemplifies **question-begging** - point (c) above. What is the reader to make of Plaskett's line? Are there any precedents[2], and if so how does this game relate to them? Does Keene regard the line as important? ...interesting? ...frivolous? Even a 'first impression' statement from our GM author would help. Is the line risky? ...dubious? ...playable? What are the plans for either side in this variation? How do these relate to the general Nimzo-Indian themes? Why is Keene-Vella the main game with Psakhis-Plaskett as the note, instead of the other way round? How can we see the general ideas given earlier shown or modified in this game? I am no wiser for seeing this game than if I had stumbled over it in a magazine.

The Vella game is given some commentary, which I paraphrase below. **1. d4 Nf6 2. c4 e6 3. Nc3 Bb4 4. e3 c5 5. Bd3 Nc6 6. a3 Bxc3 7. bxc3 d6 8. Ne2 e5 9. Ng3**. "A theoretical novelty" says Keene, but the main line is not suggested. He adds that the move offers "a pawn for open lines", which is a **shallow** comment in the 'with compensation' class - point(a). **9...g6** ("to prevent Nf5...") **10. d5 Ne7 11. e4 h6** ("prophylaxis... against Bg5") **12. a4 Qc7** ("stronger is ...a5 followed by ...Kd7-c7") **13. a5 Kf8** ("? Black's king is exposed - here he should strive for ...O-O-O"). Keene wins with a nice K-side attack, and later comments that the doubled c-pawns offered a solid centre from which to launch the attack. Really

the only lesson spelt out for players of either colour is that the Black King is safer on the Q-side. Now, I could accept this as a worthwhile lesson, except that in all four main games quoted Black's King is lodged on the K-side. Why did white's K-side attack work in these two games and fail in the other two, which Black won? Just what is the reader expected to learn from this game?

I would suggest that Phil's point (c), about only light notes being given, is further exemplified here. What seem to me to be other key issues (when should White close the centre with d5? are Black's pawn moves g6/h6 OK with the King on the Q-side? was the a4-a5 manoeuvre important, given the K on f8?) are given no attention.

The rest of the game after move 13 is given with two notes and two diagrams. It is not said in these two notes whether the attack was typical or not, nor whether Black made the most of the opportunities for counterplay, nor what alternative attacking or defending plans each side had available, if any. I believe all the latter part of this game (with the two diagrams) could have been omitted with no loss of understanding, and if it is to be included could certainly be set in a more condensed form than the 'double column' style.

We are then given **Polgar-Remlinger**. After **1. d4 Nf6 2. c4 e6 3. Nc3 Bb4 4. a3 Bxc3 5. bxc3 d6** we are told that in three recent games Lombardy played 5...c5, Korchnoi tried 5...b6 (which transposes into the next chapter, although the reader is not so warned) and "*also possible*", as in Polgar-Stigar, is 5...O-O. The Korchnoi game is quoted to move 10 with the assessment "*good for Black*" and all 24 moves of a game Polgar-Stigar are given, which White won. Again, not a word of advice.

There are **many questions begged** here. Why is the Polgar-Stigar game given in its entirety at all (see **padding**, (b) above) - was it particularly thematic, or is it interesting for other reasons? Is it worth playing over, and if so, why? Which of the four fifth moves is best, or do they all tend to transpose? What is the point of giving these alternatives if their importance, their different motivations and their worth is nowhere assessed? Why on earth was the transposition not spotted?

The main Polgar game ran **6. e3 e5 7. Bd3 c5 8. Ne2 b6 9. O-O Nc6 10. e4 O-O 11. d5 Na5 12. Ng3**. Now Black played **12...Ne8** which is marked ?! - another game is quoted with Ljubojevic using *12...Ba6* which still gave White "*a fine position*", so we still don't know what Black should have played. Polgar replied **13. Ra2** and Keene adds *13. f4* is "*also possible*". There are in fact over 20 legal moves 'also possible'. Black succumbed to a K-side attack, and though after move 29 it is only "*a matter of technique*" we are treated to the other 20 moves of this game in double-column format, yet no aspect of the technique is explained. Just **padding** again, I fear.

In short, all these games have been merely collected rather than annotated - there is no value added and little interpretation given.

Collecting and even organising recent (or ancient) games is easy for club players. What we can't do is sift the games, and discover what is going on in them. It's the difference between dictation and teaching,

this illumination of the collected information. This is also the hard bit, requiring scholarship and effort, and on the basis of these two games in this chapter Keene has done none of the work required. The chapter, frankly, is a mere compilation with a bit of window-dressing. The chess public, and Batsford's, are poorly served by this sort of thing. When, for about the same price, you can have Nunn's depth of insight and detailed commentary, it is hard to know why mugs like me keep shelling out for Keene's potboilers.

[1] Again, none of the games from this book are offered here, which, given the lack of cross-reference and the fact that the earlier one is out of print, is a positive disadvantage. (Indeed all the 5 books mentioned in the bibliography were Keene's, perhaps overlooking books by Taimanov and Gligoric, which are doubtless inferior or out of date...)

[2] It took me just 5 minutes to find a Spassky-Tal game quoted in three other books and an InterNet games archive.

Exeter Chess Club: Book Reviews : MacDONALD

[This review first appeared in]

Modern Chess Miniatures by Neil MacDonald

ISBN 1 85744-166-4 Cadogan ?[[sterling]]9.99. 150pp inc. openings index

This is a most enjoyable little book. Miniatures are the most tempting of chess fare, tasty without being too rich, and MacDonald's collection includes a splendid variety. I imagine, in this database age, it's quite easy to collect and scan through umpteen miniatures, the added value coming only in the selection and commentary. Here MacDonald shines: he is keen to enthuse about what he likes and to explain what he understands. The games are arranged by themes, like play with rooks and typical mistakes. We are thus offered both entertainment and instruction, which (despite the evidence of our grades) many club players seek in a new book.

There is more: Neil MacDonald is clearly a busy and interested young man, and throughout the book shares with the reader his anxiety about things that bother him, and his views on issues that engage him. So we have MacDonald's views on game annotations as moral fables, his discovery of Rubinstein, why "!!" moves don't always win, and a disputation with Plaskett on chess as a sport.

I suppose inevitably there are flaws: the inclusion of two games from the 1890 Steinitz-Gunsberg match in a book called 'Modern', the abundance of Kings in the diagram on p.106 (not the only typo.), and the use of one too many chestnuts without checking the details. For example, the authenticity of the Gibaud-Lazard game ("Paris, 1924": **1.d4 Nf6 2.Nd2 e5 3.dxe5 Ng4 4.h3 Ne3 0-1**) is at least open to question. Also, one of Steinitz' losses to Gunsberg is called a "blunder" in the book, when, according to the account in **The Middle Game** by Euwe and Kramer, Steinitz was actually the victim of gamesmanship. Perhaps I'm doing here what MacDonald did, in relying on a secondary source I think authoritative. But other reviewers have had their own little lists of nitpicks, and it doesn't reassure the reader.

I found more difficult to accept absence of a player index and the inclusion of so many part-games (e.g. giving a diagram and only moves 22-29). The book is attractively laid-out but to have so many without an opening in a book on miniatures is a definite loss, particularly when the complete games are set out

with one move to a line, and so the space could have been made available.

The two Gunsberg match games are in a section headed "*a counterblast in favour of greed*". All four games in this section are quick White wins in gambit lines, which go some way to weigh against everything he has just said about siezing material! I actually forgave him this: I remember reading Bronstein's **200 Open Games**, in which he described the Italian Game as being "*for players with fantasy, imagination, a thirst for adventure and a love of the unknown*", then trotted out four games in the Giuoco Pianissimo, boring enough, as my grandmother would have said, to give your arse the toothache. You forgive this in Bronstein, because he is a pleasure to read, and to indulge him his views is no chore. And in the end, I decided, MacDonald's opinions are also worth it.

A game that MacDonald might include in favour of his 'counterblast' in a second edition: Ackerman-King, Bern 1992. **1.e4 c5 2.d4 cxd4 3.c3 dxc3 Greedy? 4.Nxc3 Nc6 5.Nf3 d6 6.Bc4 a6 7.0-0 Nf6 8.Qe2 Bg4! 9.Rd1 e6 10.Bf4 Qb8! 11.h3 Bxf3 12.Qxf3 Be7 13.Rac1 0-0 14.Bb3 Rc8 15.Qe3 b5 16.Bg5 Na5** White is tempted to an over-aggressive line in order to justify the Pawn sacrifice. **17.f4?! h6! 18.Bh4 Ng4! 19.hxg4 Bxh4 20.g5 hxg5 21.f5 Nxb3 22.axb3 g4 23.fxe6 fxe6 24.Qf4 Bf6! 25.Qxg4 [25.Qxd6 Qxd6 26.Rxd6 b4] 25...Re8 26.e5 Bxe5 27.Ne4 Qb6+ 28.Kh1 Qe3 29.Rc7 Qh6+ 30.Kg1 d5 0-1**

Exeter Chess Club: Book Reviews : BRONSTEIN

[*This review first appeared in Westward Ho!*]

The Modern Chess Self-Tutor

David Bronstein, tr. Ken Neat

ISBN 1-85744-136-2 Cadogan, 1995

I buy chess books for instruction, for reference and for entertainment. This book I judge falls most neatly into the last category.

Readers will recognise the usual Bronstein style - unconventional, entertaining, chatty; if you enjoyed the **200 Open Games** anthology this will also suit you. However, I doubt if the author had a very clear idea about who he was writing this book for, since the topics and examples range from the trite to the magnificent.

The blurb on the back says that this book "*is not a self-tutor in the conventional sense, where the basics of the opening, middlegame and endgame play are drily explained. Instead the author engages in a frank conversation with the reader...*"

It's all very interesting but can appear loose and self-indulgent. For example, Bronstein takes a page (17) to muse about why, after **1. e4 e5**, it is most common to play **2. Nf3**, without really answering his own question to my satisfaction. There are even places where Bronstein just wanders off into anecdotes about, say, buying second-hand books with Spassky in South America (p.108).

Obviously, most of the text is a bit more focussed than that - Bronstein is usually both eloquent and engaging - but although the Chapter headings are enticing (*The Strengths And Weaknesses Of The Position, Coordination Of The Pieces*, etc.) they are not given a lot of analytic bite. The many examples given are all nice, but occasionally fit the text poorly, in my view.

For example, on page 51 Bronstein offers: "*Everyone knows which piece so frightens the Black King - the White Queen's Rook, awaiting its hour in the corner.*" This is a pleasing aphorism. However, the next example given was:

1...Rxa1! 2. Rxa1 Bxd4 3. Rxd4 Nxb3 4. Rxd6 Qxf2! since 5. Qxb3 allows a choice of either 5... Qxg3/6...Qxd6 or 5...hxg3+ mating.

It's a fine achievement from the youthful Bronstein but does it really clarify the point about attacking with Rooks? Recently I showed this game down at the club:

Whiteley - Agnos [A52] 1994

1. d4 Nf6 2. c4 e5 3. dxe5 Ng4 4. Nf3 Bc5 5. e3 Nc6 6. Be2 O-O 7. O-O Ncxe5 8. Nxe5 Nxe5 9. Nc3 Re8 10. b3 a5 11. Bb2 Ra6

"A hacker's paradise" - CHESS magazine

12. Ne4 Ba7 13. Qd5 Rae6 The Rook pauses to support the Knight on the half-open e-file 14. Qxa5 Bb6 15. Qc3 Qh4 16. f4 Rh6

We all knew that's where it really wanted to go.

17. h3 d5 18. Ng5 Qg3 19. c5 Bxh3 20. Nxb3 Rxb3 21. Qe1 Qh2+ 22. Kf2 Bxc5 Resigns 0-1 23. Bd4 Qxf4+ 24. exf4 Bxd4# 1-0

It's a poorer-quality game but in my view better instructional material.

In short, there is no sense that the book has been edited with sufficient vigour. You can probably get better instruction for your money from other books, whatever your standard, but if you fancy an interesting chat over some striking combinations with your favourite uncle, this is fine.

[Dr. Dave](#)

Exeter Chess Club: Book Reviews : TAIMANOV

[This review first appeared in Westward Ho!]

Book review: Taimanov's Selected Games

by Mark Taimanov (tr. Ken Neat) Cadogan 1995 ([[sterling]]??.??) viii+198pp.

Among the cream of chess literature have always been game collections: those of Alekhine, Fischer and our own John Nunn are among my (and surely others') favourites. There can be few more pleasurable experiences than reading well-annotated GM games. Mark Taimanov has recently added his contribution in this nicely produced book from Cadogan. How does it sit in the canon?

Taimanov, like many other Russian authors, enjoys verbal exposition more than the interesting variations given by Fischer, and he has not been so immodest as to exclude draws, mistakes or losses, (and in this respect scores over Alekhine), although he shows off his finest achievements with justifiable pride.

This collection stretches from a games played in 1938 (at 12 years of age) to 1993, and includes games from the arenas of the USSR Championship and the World Candidates' tournaments. Unusually for a collection of this type, the games are not arranged chronologically but by theme, as follows:

1. **Games won... at Home** (opening preparation)
2. **Strategical concepts in opposition** (KID, Sicilian, NID)
3. **Storming the Royal Fortress** (uncastled, castled, opposite castling, attack with small army, counterattack)
4. **By Technique Alone**

This thematic organisation makes the book more than usually instructive, but there is colour too. There are illuminating personal glimpses, for example in his long battle against a 17-year-old Bobby Fischer at Portoroz 1958(*), and in the account of his other Fischer near-miss in the 1971 Candidate's match, where after 2 pages of dense analysis he concludes endearingly:

"Perhaps the position also harbours other secrets, but, to be honest, after all the endless analyses it

provokes in me feelings of anguish".

On the instructional side, there is much to be gained in the understanding of openings. As a lifelong 1. d4 player Taimanov has brought many new ideas to the Indian Defences, e.g. 9.b4 and 9.Nd2 in the Classical King's Indian, 4...Nc6 for Black in the Nimzo, 4.Bg5 for White in the Grunfeld, and of course there is his system with ...Nge7 in the Sicilian. The opening preparation is interesting for an insight into GM homework, but even better are the sections of the second chapter, which are actually little monographs on the strategy of each defence.

Among the games less dominated by opening themes there is quality, drama and depth. The quality is seen in several brilliancy and best game prizes, including his victory over Petrosian at Zurich 1953.

Here a bit of drama:

Can you find Taimanov's win as Black in this position against World Champion Karpov in 1977? Champions play so much these days that many GMs have a win against one in their lives, but this must have been quite special.

And depth? I have often read elsewhere what Taimanov says in his notes to his game with Averbach in 1949:

"In positional play the accumulation of advantages usually proceeds via their transformation".

But Taimanov gives the whole thing a nice crisp analysis, and shows the sort of subtlety needed to beat GMs. He makes this comment after the moves:

1. d2-d4 Ng8-f6 2. c2-c4 e7-e6 3. Nb1-c3 Bf8-b4 4. e2-e3 O-O 5. Bf1-d3 d7-d5 6. Ng1-f3 b7-b6 7. O-

O Bc8-b7 8. Bc1-d2 d5xc4 9. Bd3xc4 Nb8-d7 10. Qd1-e2 c7-c5 11. a2-a3 Bb4xc3 12. Bd2xc3 Nf6-e4 13. Ra1-c1, and adds:

"Thus here White is immediately prepared to part with one of his bishops in order to activate his forces along the half-open c-file. From this point of view 13. Rfc1 was a more cunning move, in order to 'frighten' the opponent with the possibility of Be1 and urge him to make the exchange, which would have allowed White to save a tempo on doubling rooks"

His play in this game reminded me of Capablanca, the finish also being similar to a famous win of Capa over Nimzovitch.

I enjoyed this book a great deal; I don't think in terms of the games or annotations it is outstanding, but I was offered entertainment and illumination throughout.

Dr.Dave

Tal-Botvinnik 1960: Match For The World Chess Championship

by Mikhail Tal, trans. Hanon Russell. pub. Russell Enterprises 1996

iv+214 pp.

What do you mean, you haven't read Tal's book of the first match with Botvinnik? I admit I hadn't before, although I knew it is a common choice for the top ten chess books ever written. The book itself starts with a confession:

"I must confess to the readers that my spirits, right up until the beginning of the match, were not too high" (Game 1)

Just 21 games, and many draws, but this book was every bit as good as I had heard. The joy of this book is the feeling that Tal is genuinely revealing to you his preparation for and thinking during a game, warts and all.

I have a view that if a picture is worth a thousand words, then a paragraph of explanation of a position is worth a thousand moves in analysis. Some of the merits of this book are apparent on opening a page at random: the ratio of chess moves to words is weighted strongly in favour of the latter. While Tal does not ignore analytical complexities it is not these that he has been concerned to record - it is a much more human record of hopes, fears and frustrations. Each game begins with his reflections on the match situation and choice of opening, which decades later still retains a sense of excitement. He is rather sparing with his "!" "?" and "+/-", reflecting this same stylistic bias, but the search for crucial moments and oversights seems no less self-critical and rigorous for all that.

"...I was terrified to notice that the intended defense (...) does "not quite" work in view of ... mate in one!" (Game 16)

In this era of PR and soundbites, where Kasparov's relationship to historical truth seems less than intimate, Tal's openness and self-criticism are both engaging and illuminating.

Tal's writing style is also hugely enjoyable, being breezy and conversational - there are many uses of quotation marks (as above) where he is speaking metaphorically or colloquially, and which I assume are true to the original.

The moves are recorded in long algebraic, together with the times of moves which is often revealing. This edition has a distinctive and attractive layout, and is enhanced by the inclusion of several contemporary photos.

Nitpicks: there are a few minor spelling errors which can mostly be ignored, but I was amused to see Botvinnik's choice as Black in Game 7: the Cann-Kann Defence (Offenbach-Orpheus, Paris 1900). Emanuel Sztein contributes a colourful but rather disjointed introduction which says as much about politics as Tal. One might look forward to the day when biographies of Western players include summaries of their various stances on the excesses of capitalism.

Dave Regis

P.S. If the editor fancies more reviews which lay into new books, he'd better find fewer publications like this one. Where is Ray Keene when you need him?

TIMMAN'S SELECTED GAMES - CHESS THE ADVENTUROUS WAY

by Jan Timman

248pp.+index Cadogan Press, 1995

"It is not always the games with the best chess that leave behind the strongest memories (...) This selection of 80 games gives a picture of the fighting chess I have always championed."

This is simply a collection of annotated games, some of which are very well-known and many of which have been annotated elsewhere. If you have not met Timman's annotations before (as I hadn't), you may be tempted to regard this volume as warmed-up leftovers, but this is to do the author an injustice. The games are mostly from top tournaments and the World Championship cycle, and Timman is a top Grandmaster writing for a professional audience. His annotations are quite modestly put, but are deep and precise. If you have ever sat through games annotated glibly by GMs[*], you will appreciate Timman as a commentator who comments only when necessary, and at an appropriate level.

His play features crisp openings, enterprising middlegame play and endings rich in detail. The search for the crucial inaccuracy in a master game is often a challenging piece of detective work, and while I am in no position to judge how well he has done this, I enjoyed accompanying Timman on his journeys. I was particularly struck by a number of critical endgames, in particular a fascinating KBB vs. KandN ending against Speelman, and a really thorough study of the fourth game of the 1990 Karpov-Timman Candidates' Match. Timman has a point to prove here and takes the stand with great assurance - it reminded me of Fischer's *tour de force* of analysis in his annotations of the Botvinnik-Fischer endgame. The other striking feature for me was the number of games where there was a difficult material imbalance that required technical resolution - Queen against Rook and Bishop, for example.

But what Timman relishes above all these is the human struggle: there are great set-pieces, superb escapes, desperate time scrambles, enterprising pawn sacrifices and some glorious messes... like the fifth match-game Ivanchuk-Timman, 1990 - which Timman dryly introduces with "*The game annotated below does not really come within the confines of what is commonly understood to be top chess.*" As you can tell from this, Timman is also a fluent and entertaining writer of English: I also enjoyed a remark

from a Candidates' Match game where after **1. d4 f5** he offers: "*A very surprising opening for Speelman, but I must say I had expected him to do something unexpected.*"

The range of openings on show is impressive: he opens with 1. e4, 1. d4 and 1. c4, and plays as Black the French, the Sicilian, the Pirc/Modern and defends the Ruy Lopez and Petroff, while against the QP he plays as Black the Modern, King's Indian, Grunfeld, Queen's and Nimzo-Indian. He is a true modern - there is hardly a classical, merely 'equalising' defence in the book - and a real fighter. For example, the fifth game of his 1989 match against Portisch he went for victory by playing very riskily as Black - but won. His play attracted a lot of criticism at the time, and this itself roused Timman's fighting spirit - so in his annotations he takes on a 'simultaneous display' against his critics. I was also struck by the number of games where time trouble played a part. I wonder if Timman also makes note of clock times against his moves (a practice which I believe was first recommended by Bronstein), as even here he is precise, often citing (e.g.) 15 minutes for 17 moves.

Compared to Nunn's recent book, it lacks the anecdotes and personal glimpses - this reflects the origin of the annotations. He does permit himself the occasional splendid piece of prejudice or spleen - for example "*I still don't regard [the King's Indian] as a fully-fledged opening*", or "*It is hard to believe what Russian commentators sometimes try to foist on the public*". [You will recall from the paragraph above that Timman plays the King's Indian as Black!] But, like Nunn, the depth and quality of the analysis is consistently high. If you are looking for study material this is a good source.

I didn't much welcome the use of the NICbase opening classification - **RL**, **SI**, and **FR** for Ruy Lopez, Sicilian and French. This is very natural for English speakers at first look but soon lapses into an impenetrable **RL 26.2.1** and **FR 4.4.4** and lacks the universality of the ECO [A00-E99] system. It also has some obvious anomalies - for example, the opening to the game Kasparov-Timman is given as **QI 1.6** and confidently labelled **Queen's Indian** - but it began **1. d4 Nf6 2. c4 e6 3. Nf3 Bb4+** (the Bogo-Indian), and as can be seen from the diagram, on move 16 the Black b-pawn is still at home on b7. By all means Cadogan should go along with the author's framework, but could have supplemented the classification with ECO.

If I have another reproach, it is that what Timman regards as an 'appropriate level' to comment often left me struggling to follow him. This is, I suppose, the cream of chess, and in quantity may be too rich for many club players. In particular, the whole opening phase of the game is often left up to the reader as common knowledge. Common knowledge amongst GMs, may be, but I would have been glad of a few landmarks being pointed out before we headed off into the middlegame. I still was glad to read this book - when I travelled with Timman, he showed me many sights on the journey that I would never have noticed on my own.

[*] I will always remember "*prevents Nf5*" as the complete annotation to ...g6, followed by "*prevents*

Bg5" after ...h6 - any guesses as to the author?

Not another 'how to play chess' page, surely? Well, all the ones I looked at I didn't like, for some reason: some had no chess symbols, and some only had the moves, and... well, here's another not to like.

Why play chess?

Chess one of the oldest known games, played for more than a thousand years in India, Arab countries, Spain and Russia, and is the one with the most books written about it. If you like logical puzzles, if you like neat patterns, if you like thinking up interesting ideas, or if you just like exciting games against your friends, you might well like chess.

The game of chess

Chess is a battle game for two people, who each control an army of pieces. The armies are White and Black; White moves first, then Black, and then the players take turns.

There are six types of chess piece, including the King, each with a different move.

Here they are:

The King (K)

The Queen (Q)

The Bishop (B)

The Knight (N)

The Rook (R)

The Pawn (P)

The idea of the game is to catch the opponent's King.

Here the White pieces have crashed through and caught the Black King. Can you spot him? White wins!

The chessboard

The chess board is an 8x8 square, made of 64 little squares, coloured dark and light. You sit at one side and your opponent the other.

You always start with a light square on the right-hand corner nearest you.

The rows of squares are called *rank*s , and the columns, *files* . The diagonals of light and dark squares are just called *diagonals*

The squares each have a label, according to the algebraic system of letters and numbers. The squares are numbered from White's side of the board.

The light square bottom right is called h1.

White's left half of the board is the Queen's-side, and the right side is the King's-side. The Queen's-side is the side that the two Queens start on.

The Queens start on a square of the own colour: White Queen on a light square, Black Queen on a dark square.

The moves of the pieces

The Kings can move just one square in any direction. Not very far - which means they can be caught!

The Rooks can move as many squares as they can see, either up and down the files or along the ranks.

Only as far as they can see, though - Rooks cannot jump over other pieces. In fact, only one piece can jump - the Knight.

The Bishops move as far as they can see along the diagonals.

The Queen is the most powerful piece on the board. The Queen combines the moves of Rook and Bishop - as many squares as they can see in any direction.

You can see easily how strong the Queen is from the diagram - it has a great reach on an open board.

The Knight has a move which is easy to understand but hard to describe in words! So let's look at it first.

You can say it's like the shape of a letter 'L':

The L can be twisted any way round to reach the eight squares we see in the diagram.

Or it's a jump from one corner to the opposite corner of a 3x2 rectangle:

Or it's one square like a Rook and one square like a Bishop:

It's the same move, however you think of it! Notice that the Knight hops from dark to light squares, or light to dark, each move.

Now, one more thing: the Knight can jump, so even if it's surrounded by opponent's pieces, it can still jump out to its squares.

Lastly, there are the Pawns. Look where they are at the start of the game:

The Knights can hop over the Pawns (to the marked squares). But the Pawns will have to move out of the way to let the other pieces out.

Pawns move forwards in a straight line, one square at a time.

On their first move only, they can move two squares forward instead of one.

The Pawn on e2 can move to e3 or e4, but the Pawn on g4 can move only to g5.

What happens when a Pawn moves forward seven squares, and reaches the other side of the board?

As a reward, you turn it into a piece of higher value, usually a Queen. This is called *promotion*

You can have two Queens, one you started with, and another which is a promoted Pawn. In fact, I suppose you could have nine Queens! Any new Queens have the same moves and value as the old one.

The Pawns are the least powerful of all the chessmen, and we often think of the other pieces as being worth a number of Pawns:

The Queen  = 9

The Bishop  = 3

The Knight  = 3

The Rook  = 5

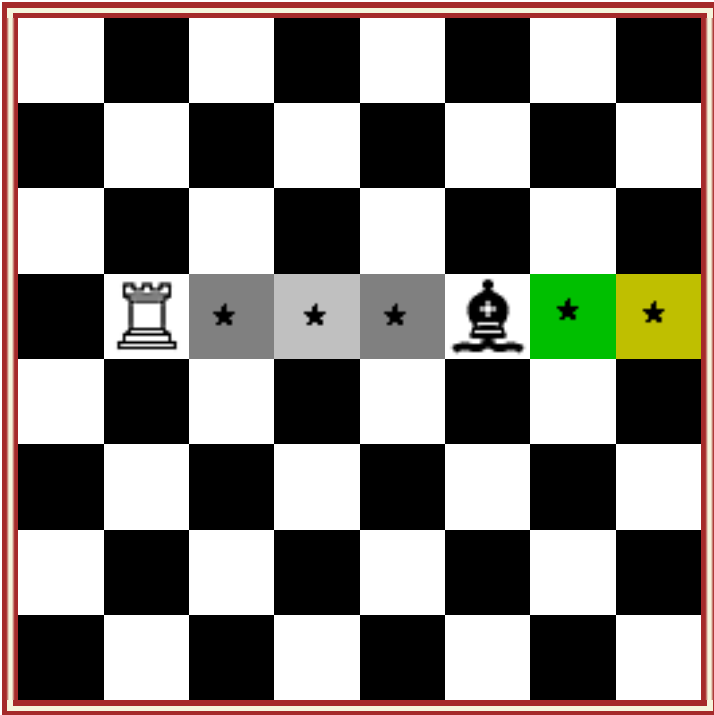

The Pawn  = 1

The King is priceless!

Attacking, capturing and defending.

The aim of the game is to take your opponent's King. But you will find it easier if you take off some of your opponent's pieces first!

Taking a piece in chess works like this:

The White Rook can move to c5, d5 or e5 (). It cannot move to g5 or h5 (). But it can *capture* the Black Bishop on f5. The Bishop is removed from the board and the Rook stands in its place.

The White Rook in the next diagram can also take a Bishop on f5, but might not want to!

The Knight defends the Bishop.

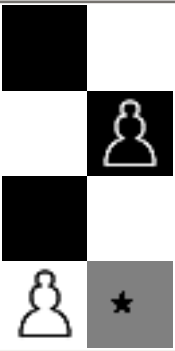

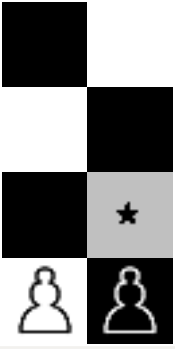

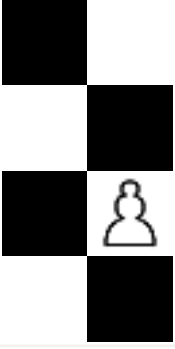

If White captured the Bishop, the Black Knight would capture the White Rook on f5. White would have swapped a Rook for a Bishop. The chess term for swapping is *exchanging*. Is it a good swap? Well, a Rook is worth 5 Pawns, and a Bishop only 3, so White would lose the equivalent of 2 Pawns.

All the pieces capture the same way that they move except Pawns. Pawns move one square forwards, but capture diagonally.

The White Pawn on b3 can move to b4 [], but it can capture on a4 or c4 [].

The fact that Pawns can move two squares on their first move might mean you miss out on a chance to take an opponent's Pawn. The White Pawn on d5 might be hoping to take the Black Pawn on e7. But if it moves to e5, then the White Pawn will miss out! To give your brave advanced Pawns a chance of taking opponent's Pawns, there is a special rule invented. If an opponent's Pawn, which has not yet moved, tries to dodge past an advanced Pawn on the fifth rank by moving two squares, the advanced Pawn is allowed to pretend that the opponent's Pawn moved just one square. Let's see this in pictures:

| | |
|--|--|
|  | <p>Black to move. The Black Pawn on e7 jumps past the White Pawn on d5 to reach e5 [].</p> |
|  | <p>If the Black Pawn had only moved one square, to e6 [], White could have taken it.</p> |
|  | <p>White says, "I'll take that in passing!"
The Black Pawn vanishes from the board.</p> |

We actually use the French phrase, *en passant*

You can do this only on the move after an opponent's Pawn has by-passed one of yours by moving two squares. Leave it a move, and you lose the chance!

Castling.

There's one more special move to learn, called *castling*. This is well worth using in your games. The idea is to get the King into safety and get the Rook into play quickly, and speeds up the game a lot.

You move the King two squares towards the Rook, and hop the Rook over the King to land beside it. This counts as only one move.

The King is safely tucked away, and the Rook can join in the fight. Great! And you can do this on either side:

You are allowed to do this if:

1. Neither the King nor the Rook has moved
2. The King is not in check, does not move into check, and does not hop over checked square.

Chess used to be quite a slow game, and was speeded up by new rules which allowed Pawn promotion, a two-square jump by Pawns on their first move, and castling.

Winning, losing and drawing.

What's going on here? The Black King can be taken by the White Rook. Because the game will end if the King is taken, Black must on the next move, get out of this attack. If a piece attacks a King, the King is said to be in *check* , and you must get out of check, if you can. You must not move into check.

This poor Black King is in check and cannot get out of check. The King will be taken next move, and we say this is *checkmate* , and White wins the game. The King is never actually taken: checkmate is the end of the game.

If you attack the opponent's King directly with a piece, it is polite to say "check", just in case they

haven't noticed.

If it was White's move here, White would play the Queen into g7 and cry, "checkmate!".

And if it was Black's move... but Black has no move! Only the Black King can move, and all the squares that the King could move to are attacked. So, Black cannot move into check, although it is Black's turn. We call this *stalemate*, and it is the end of the game, and it is a draw.

You can also have a draw in chess:

1. if neither side has enough material to force checkmate, the game is drawn (bare King vs. bare King, bare K vs. K+N or K+B or K+N+N)
2. if the same position is reached in the game three times (with the same side to move, and with the same moves available), the game is drawn
3. if there are 50 moves played (50 by White and 50 by Black) without a capture being made and without a Pawn being moved, the game is drawn

Sometimes you get a position where one side is giving a whole string of checks, which the opponent cannot get out of. This is sometimes called a draw by 'perpetual check', but it is really a draw by agreement, as you know that soon you will wither have a draw by three-fold repetition or by the 5-move rule.

If you have lost lots of pieces, and you know your opponent will checkmate you in the end, you are

allowed to give up. In chess, we say *resign* . It is sometimes good manners to resign rather than waste time watching your opponent plonk through another 30 moves where you cannot do anything.

Chess manners

If you touch a piece, you *must* move it. If you move it and let go of it, the move *cannot* be taken back.

Resigning and "touch-move" are in the rules, but there are other bits of good manners that I advise you to practise.

Because of the touch-move rule, some players pick up a piece, and wave it around, still thinking where to put it. Even worse, when they put it down, they may hang on to it, having one last look around before letting go. This is dreadful, really - neither you nor your opponent will be able to see the board properly, and it can be off-putting. *Always pick up a piece only when you know where you are going to put it down, and just move it there, and let go*

Always try to put pieces in the middle of the squares . If you really want to touch a piece but don't want to move it, you should say " *I adjust* " before you touch it. Again, chessplayers use the French, " *j'adoube* "

Shake hands before you start, and after the game. *Don't talk to your opponent during the game* , except to say "check" or "checkmate" or "I resign" (or "good move"). Remain quiet and still when seated at the board.

Don't talk to other people during the game - even if it's about the weather, it might look like you are getting advice!

The phases of the game

We call the first few moves, when each player is getting their pieces off the back row and into play, the *opening* . In the opening, you should get all your pieces out quickly, and try to control the centre.

The next phase of the battle is the *middlegame* , where the pieces are out and fighting. Keep control of the centre, try and win your opponent's pieces (for nothing or for good exchanges), and try and checkmate the King by attacking it.

The last phase is the *endgame* . The endgame is when many pieces have been exchanged, and neither side can hope to force checkmate with their pieces. Instead, the players try to promote their Pawns, so that they can again start an attack on the opponent's King.

Next steps

You will get better at chess if you practise.

Practise playing against your friends , and try to play as many different players as you can - especially ones better than you. Also, you can practise playing against a computer. These days you can also play against players on the Internet.

As well as playing whole games, also

practise parts of games

. Try finishing your opponent off with 2 Queens and a King against their King. How many moves did they survive? Right, now swap, and see if you can last longer! When you both get the hang of this, try just one Queen, then two Rooks, then just one Rook.

One of the most important things is to

get your eye in

for all the captures and tricks and traps, which chessplayers call *tactics* . You will pick this up through playing, but you can improve your chess vision by

looking at books of chess puzzles

Introduction

I once read a comment in an old book that Samisch was the only master who had more than one opening system named after him (variations in the Nimzo- and King's Indian). I think that wasn't strictly true even then, but now there are many masters with opening namesakes. Pianist and Grandmaster Mark Taimanov has given to the chess world two prominent variations: in the Nimzo-Indian, the line **1. d4 Nf6 2. c4 e6 3. Nc3 Bb4 4. e3 Nc6!?** beloved of English master Michael Franklin, and in the Sicilian, the line **1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nc6 5. Nc3 a6** , usually followed by Taimanov's trademark **...Nge7**

I thought both variations very odd when I first came across them: unnatural and awkward. But of course GM Taimanov sees a little deeper behind these moves than folks like me, so I've been following in his footsteps and trying to find out a bit more about what he saw in his line of the Sicilian.

My motive to do so now was curiosity, piqued by a few prompts in the last couple of years:

1. Having a privileged trawl through some of Bob Lee's games, in which the Taimanov Sicilian featured strongly. (Bob approached 200 grade strength playing for Exeter in the 1970s, but his real forte was correspondence chess: read all about it!).
2. Buying a copy of *Nunn's Chess Openings*, and, along with a thumbs-up to several other variations which I had always thought a bit duff theoretically, like the Stonewall Dutch, one line of the Sicilian that was doing well was the Taimanov Sicilian.
3.

Looking for an answer to the Grand Prix Attack as Black in the Sicilian, I came across a try which seemed to leave White nothing better than to transpose into a line of the Taimanov. Black equalised with some exotic-looking manoeuvres in Lein - Ivanovic [B23] Lone Pine, 1980

1.e4 c5 2.Nc3 Nc6 3.f4 e6 4.Nf3 Nge7 5.d4 cxd4 6.Nxd4 Nxd4 7.Qxd4 a6 8.Qf2 b5 9.Bd3 Ng6 10.Be3 Bb7 11.Bd4 Qc7 12.O-O f6 13.Bb6 Qc6 14.Be3 Rc8 15.a4 b4 16.Ne2 Bc5 ...0-1 (72)

4. A growing dissatisfaction with the way I've been playing the Sicilian after 2. Nf3. I've played the Hyper-Accelerated Fianchetto for a lot of years (mixed in with some other stuff) but I think my interpretation of the variation has been a bit straightforward and it often leads to positions I find hard to play. So, I'd like to try something else, and I have devoted a bit of the summer break to researching the Taimanov.

Anyhow, here's some general thoughts on the Taimanov line.

What's in a name?

Taimanov himself generally refers to lines with an early ...Qc7 as the "(Improved) Paulsen" (*Sicilian Paulsen*, Batsford 1984; *Sicilian Defence Taimanov System*, Batsford 1989, and *Winning with the Sicilian*, Batsford 1991), and this has been the most important at master level. So, Plaskett's introductory book on the line for Chess Press includes mostly games with ...Qc7. The strategy which is most characteristic of the line, and of which Taimanov was most keen to claim under his name, are the lines with ...Nge7.

Black can play his moves in many different orders, and, as so often in Modern openings, slide out into other variations entirely.

It's generally agreed that the Taimanov starts with

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 e6 or

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nc6

Nunn and co. include under Taimanov the lines

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 e6 5.Nc3 a6 and **6...Qc7**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 e6 5.Nc3 a6 and **6...Nge7**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 e6 5.Nb5 d6 6. c4

The related Kan Sicilian (without ...Nc6) is the move order:

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 e6 , followed often by **5.Nc3 Qc7**

The position reached after the first four moves of this move order is printed on a Chess Digest booklet entitled " *Sicilian: Kann/Paulsen-Taimanov*

So... the Kan is e6 and Qc7 without Nc6, Taimanov is e6/Nc6 without Qc7, and e6/Nc6/Qc7 is what Taimanov calls Improved Paulsen and almost everyone else calls Taimanov. (Nf6 and d6 at any stage will get you into a Scheveningen.)

What's the big idea?

If its possible to put this modern GM opening in a nutshell, it's that Black intends to develop the Queen's-side quickly, with moves like ...b5, ...Bb7, ... Rc8, ...Qc7 and so on. You sometimes see the complete mobilisation of the Black Queen's-side forces before a single King's-side piece is touched (Leko's favourite).

The Black d-Pawn is kept back on d7. This enables Black to make a more aggressive posting of the King's Bishop, on c5 or b4, for example, and can also allow the Black Queen on c7 more scope.

Black hopes that the hole on d6 will take too much time and effort for White to occupy with any effect. While Black is staking out some space on the Queen's-side, he does not want to make a target of the King's-side.

The King's Knight is kept away from f6 for the early moves, not encouraging Pawn prods like e4-e5 or g4-g5, and may even go to e7. From there, it may go on to g6, covering the King's-side, but the other cunning plan is for Black to 'unload' a Knight with ...Nc6xd4, and then ...Ne7-c6, gaining time to unravel. With such an exchange of pieces, Black's typical Sicilian cramp is less, and White has fewer prospects of attack.

Plaskett comments:

"This is almost exactly what Black aims for in this system: a standard Sicilian middle-game but where the reduction in material lessens the danger of White commencing a successful attack. (...) In this very standard position Black can face the future with total confidence."

This of course could have arisen from the Grand Prix line above.

(Wittmann, W - Klinger, J AUT-ch (3), 1993 (0-1, 57))

Taimanov's line has been played for decades and remains important, having been

played in its various forms by many top players, including champions Tal, Fischer and Karpov, occasionally Kasparov, and a host of others like Andersson, Benjamin, Bronstein, Christiansen, Larsen, Portisch, Ribli, Sokolov, Suetin and Timman. The old Paulsen formation has been played by just about everybody!

After what I'm calling the Paulsen/Taimanov move order:

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 e6 5.Nc3 a6

White has a big choice: **6. Be2**, **6. Be3**, **6. Nxc6** , and **6. g3** are most often played, but you get **6. f4** **6. Bf4** and **6. Bc4** occasionally.

Taimanov's system

6. Be2 Nge7

According to Plaskett, Bill Hartston once wrote, *'all true Taimanov players should be aiming to be playing ...Nge7'* , although Soapy Jim in his own practice seems to prefer the Paulsen method with an early ...Qc7. In fact, most people do – the lines with ...Nge7 get only three rows in NCO, while ...Qc7 gets three pages!

It's still a rich position, not yet exhausted. White's main tries are: Nb3, O-O, Be3, f4 and Bf4, most of which are dismissed in NCO with the assessment "=". It's only "=" if you know what you're doing, though!

Let's see the Taimanov method in action. This is a game from his 1989 book for Batsford on the system, and the notes are based on his:

Unzicker,W - Taimanov,M [B46] Wijk aan Zee, 1981

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 e6 5.Nc3 a6 6.Be2 Nge7 7.Be3 Nxd4 8.Qxd4 b5 9.O-O[DIAGRAM]

9.O-O-O and 9. a4 are alternatives

9...Nc6 10.Qd2

The White Queen must sometimes find a more awkward square, if Black 'unloads' before White has moved the Bc1

10...Be7

NCO gives here 11.Rad1 0-0 12.Bf4 f6 13.a4 bxa4 14.Nxa4 Ne5 15.Be3 Rb8 16.f4 Nf7 = Khalifman-Taimanov 1996

11.f4 Bb7 12.e5!? [12.Rad1] 12... Na5!? 13.Bd3 Rc8 14.Ne2 Nc4 15. Bxc4 Rxc4 16.Rad1 Qc8

[DIAGRAM] And still Black is not castled - in fact, castling here drops the d-Pawn. For all the pressure White has gathered against d7, Black's attack on c2 is the more important.

17.c3?! b4!

threat ...bxc3 18.Nxc3 Bb4

18.Rc1

[18.cxb4 Bxb4 19.Qd3 Be4]

18...0-0 19.b3 bxc3 20.Nxc3 Rc6 21.Na4 Ba3 22.Rxc6 Qxc6 23.Nb6 d6!? 24.exd6

[24.Nc4 Bb4]

**24...Bxd6 25.Rc1 Qe4 26.Rc4 Qb1 +
27.Rc1 Qg6 28.Qc2 Be4 29.Qf2
Rd8!? 30.Rd1 Bc7 31.Rxd8+ Bxd8
32.Nc4 Bd5**

[DIAGRAM] Black's Bishops rule.

**33.Nd2 h6 34.h3 a5 35.Nf3 Bc7 36.
Nd4 Qb1+ 37.Kh2 g5!? 38.Nb5 Bxf4
+ 39.Bxf4 gxf4 40.Nc3 Qf5 41.Nxd5
exd5 42.Qd4 Qe4 43.Qf6 d4! 44.
Qxh6 Qe5! 45.Qh4**

[DIAGRAM] Black seems to have more Pawns! The thing is, more *passed* Pawns.

**45...d3 46.Qd8+ Kg7 47.Qxd3 f3+ 48.Kg1 Qe1+ 49.Kh2 f2 50.Qg3+ Kf8 51.
Qb8+ Ke7 52.Qc7+ Ke6 53.Qc4+ Ke5 0-1**

See also the game with Mnatsakian below, with similar themes. Taimanov has

shown the flexibility and resilience of this defence over decades of master play.

NCO gives the current verdict on alternative lines as:

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nc6 5.Nc3 a6 6.Be2 Nge7

7.f4 Nxd4 8.Qxd4 Nc6 9.Qf2 d6 10.Be3 b5 11.0-0 Be7 12.Rad1 Qc7 =;

7.0-0 Nxd4 8.Qxd4 Nc6 9.Qd3 Qc7 (9...Nb4? 10.Qg3! Nxc2 11.Bg5 f6 12.Bf4±) 10.Bg5 Bd6 11.Kh1 f6 12.Be3 (12.Bh4 Ne5 13.Qd2 Ng6 14.Bg3 Bxg3 15.hxg3 b5 =) 12...b5 13.f4 Be7 14.e5 0-0 =

I don't know how often you'll get to play these Classical lines: neither club nor master players currently prefer these slow Karpovian systems with 6.Be2 against the Sicilian.

Avoiding the unload

If Black has made the unnatural move ...Nge7 planning ...Ncxd4/...Nec6, can White take advantage of this? Perhaps by dodging the exchange with **7.Nb3** or **7.Nf3**. Black must not sit by and get squashed, but must keep White off-balance.

Orlov - Taimanov,M [B46] St Petersburg, 1995

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nc6 5.Nc3 a6 6.Be2 Nge7 7.Nb3 b5! 8.0-0 Ng6 9.f4 Be7 10.Be3 0-0 11.Bd3 Nb4! 12.Qh5 Nxd3 13.cxd3 f5! 14.Nd5 Bb7! 15.Nxe7+ Nxe7 16.Nc5 Bc6 17.Bd4 Qe8! 18.Qg5 Qf7

Going for the jugular

i.e. the weak spot on d6. This can be strong plan and may give a pretty prospectless game for Black (White's statistics in this line are impressive), but Taimanov doesn't usually have much trouble holding the position, e.g.

**Kupreichik,V - Taimanov,M [B46]

...but goes on to say that he would avoid the whole line by sticking in 7...Nxd4.

The squeeze

6. g3

This is a good Grandmaster move, flexible and keeping the edge (5. g3 can be met by 5...d5!=). Taimanov gives a fine game in his Batsford books:

Mnatsakanian,E - Taimanov,M [B46] Erevan, 1986

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 e6 5.Nc3 a6 6.g3 Nge7

White has a lot of choice here: Nde2, f4, Be3, Nb3 and the simple Bg2.

7.Bg2 Nxd4 8.Qxd4 Nc6 9.Qd1 Be7 10.O-O O-O 11.Be3 b5 12.f4 Bb7 13.Qe2

Despite White's undynamic start the first impression is that White is doing well (more space, better development, pressure down the d-file and prospects on the King's-side). But Black is solid and has his own chances on the Queen's-side - chances he makes full use of! Black's play is typical and exemplary:

13...Rc8 14.Qf2?! Na5!? 15.Nd1

[15.Bb6 Qxb6!? (15...Qe8!) 16.Qxb6 Bc5+]

15...Nc4 16.Bd4 f6!

[DIAGRAM]

Black is playing a careful game, adeptly combining attack and defence.

17.c3 e5 18.Ba7 Qc7 19.Kh1 Bc6!?

[DIAGRAM]

20.Be3 Qb7!? 21.Qc2 d5!

[DIAGRAM]

The Sicilian player's delight is a central break.

Qg2 Rfd8**

[DIAGRAM]

Black is on top.

25.fxe5? Qxg2+ 26.Kxg2 Rxd1 0-1

Not all your games with the Taimanov will be so smooth!

More typical is restraint with Nb3 and a4, which, if Black doesn't organise any counterplay, can be very effective:

**Topalov,V - Illescas Cordoba,M [B46]
Alcobendas (3), 1994**

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.
Nxd4 e6 5.Nc3 a6 6.g3 Nge7 7.Nb3
d6 8.a4 Bd7 9.Bg2 Nc8 10.O-O Be7
11.Qe2 O-O 12.Be3 Qc7 13.f4 Rb8?!**

[DIAGRAM] Black is already on the slide.

14.g4! Re8 15.g5 Nb4 16.Qf2 b5 17.axb5 axb5 18.f5 Nxc2 19.Qxc2 b4 20.g6 e5 21.Nc5 bxc3 22.Na6 Rxb2 23.Nxc7 Rxc2 24.Nxe8 Bxe8 25.f6 Rxg2+ 26.Kxg2 Bxf6 27.Ra8 Bd7 28.Rc1 1-0

Brutal. The GMs specialising in this line have often gone for Illescas' system, but 'chasing' the White Knight with ...Na5.

De Firmian,N - Zapata,A [B46] Tunis (12), 1985

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nc6 5.Nc3 a6 6.g3 Nge7 7.Nb3! d6 (7...Na5!?) 8.Bg2 (8.a4!?) 8...Bd7 9.O-O Nc8 10.a4 Be7 11.Qe2 O-O 12.Be3 Na5 13.Nxa5 Qxa5 14.Bd4 Bd8 15.Rfd1 Bc6

[DIAGRAM] (1-0, 58)

Taimanov gives this as "equal" (1989) or "comfortable" (1991), but gives the whole game in the back of the 1989 book, making it look like an absolute crush for White, Black being unable to organise any counterplay with his awkwardly placed pieces. Whatever the real verdict here, it's still a pretty passive line for Black, and I'd like to find an idea to brighten it up a little. Perhaps Black cannot really hope to equalise with ...Nge7 and must play the Paulsen move ...Qc7.

Leko,P (2605) - Lautier,J (2635)

The English attack

Our Government is always going on about traditional British values, which I have always thought of as class prejudice and self-loathing. In chess terms, perhaps the distinctive British value is an aptitude for deceptively simple attacking opening systems.

I can think of several recent examples of home-grown openings that have gained a wide currency – the Penrose Benoni, the DERLD, the Grand Prix Attack, the Trompovsky, the 150 Attack in the Pirc, and the English Attack in the main line Sicilians. This was pioneered by top GMs Nunn and Short, and involves playing an attack with Be3 and Qd2, usually with f3. If you know the Yugoslav Attack against the Dragon, you'll know the White moves.

This is a bit of a theoretical minefield at the moment. You can play into one of the current main lines of the Scheveningen/ Najdorf, which Kasparov is currently handling comfortably as Black:

Anand,V (2769) - Kasparov,G (2851) [B90] Chess@iceland Blitz Final Kopavogur ISL (4), 02.04.2000

1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 a6 6.f3 e6 7.Be3 b5 8.Qd2 Nbd7 9.g4 Nb6 10.a4 Nc4 11.Bxc4 bxc4 12.O-O Bb7 13.g5 Nd7 14.f4 Nc5 15.Qg2 g6 16.Rad1 Qc7 17.Qg4 h6 18.f5

[DIAGRAM]

Black has held back on the King's-side, and avoided committing the King, so is well-placed to absorb this thematic break.

18...gxf5 19.exf5 e5 20.Ne6 fxe6 21.Qh5+ Kd8 22.f6 Qc6 23.Rd2 Kc7 24.g6 Rg8 25.g7 Bxg7 26.Qf7 + Qd7 27.Qxd7+ Nxd7 28.fxg7 Rxd7+ 29.Kf2 d5 0-1

But if you prefer something a little less topical? A strictly Taimanov interpretation allows plenty of extra scope for ideas. Let's see:

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nc6 5.Nc3 a6 6.Be3 Qc7 7.Qd2 Nf6 8.f3

[DIAGRAM] Plaskett notes *8...Ne5!?*, *8...Bb4!?*, *8...d5!?*, *8...Nxd4* and even Fernand Gobet's *7...Nxd4* as workable replies making various uses of the Taimanov move-order. A more orthodox Taimanov strategy (with an early ...b5) is also playable:

Diaz,J - Sion Castro,M [B48] Capablanca mem B (6), 1991

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nc6 5.Nc3 Qc7 6.Be3 a6 7.Qd2 Nf6 8.f3 b5 9.g4 Bb7 10.O-O Nxd4 11.Bxd4 Bd6 12.g5 Bf4 13.Be3 Nh5 14.Ne2 Bxe3 15.Qxe3 Rc8 16.Rd2 Qc5 17.Nd4 Qe5 18.Ne2 Qc5

Leconte,J - Appleberry,M [B46] Paris Apsap Sept (4), 1993

Whose afraid of the big bad Maroczy Bind?

The Maroczy bind, with White Pawns on e4 and c4, is a key test of any Sicilian line in which it can be applied. The immediate 5.c4 is a bit slow, and players in the days of Nimzovitch and Tarrasch showed that Black is well-placed to react to it with ...Nf6 and ...Bb4. But a preliminary 5.Nb5 is a significant strengthening of the strategy, forcing ...d6, stopping ...Bb4 and avoiding exchanges. It has been an occasional weapon of Karpov against a line he's played himself, and Karpov, as always, makes the line look like a smooth White win. He maintains the spatial edge, gradually pushing Black back and finally striking hard on the Queen's-side, after which Black's counterattack looks desperate.

Karpov,A - Van der Wiel,J [B44] Tilburg (7), 1983

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nc6 5.Nb5 d6 6.c4 Nf6 7.N1c3 a6 8.Na3 Be7 9.Be2 0-0 10.0-0 b6 11.Be3 Re8 12.Rc1 Bf8 13.Qb3 Nd7 14.Rfd1 Nc5 15.Qc2 Bb7 16.Qd2 Rc8 17.Nc2 Ne5 18.f3 Rc7

[DIAGRAM]

Karpov has made a good living out of such small advantages.

19.Bf2 Qb8 20.Nd4 Rec8 21.b3 Be7 22.Bf1 Kh8 23.Be3 Rg8 24.Bg5 Bf8 25.Nce2 h6 26.Be3 Qd8 27.Ng3 Qh4 28.Be2 g6 29.b4 Ncd7 30.Bf2 Qe7 31.f4 Nc6 32.Nf3 Nf6 33.Bxb6 Rd7 34.b5 Nb8 35.Bd3 Bg7 36.Qe2 Rc8 37.a4 Ba8 38.a5 Ne8 39.Qe3 Kh7 40.Be2 Nf6 41.h3 d5 42.cxd5 Rxc1 43.Qxc1 exd5 44.e5 Ne4 45.Nf1 Qb4 46.Qc8 Nc3 47.Rd2 Nxe2+ 48.Rxe2 d4 49.Qxb8 Bxf3 50.gxf3 d3 51.Rd2 Qxf4 52.Be3 Qxf3 53.bxa6 Rd5 54.Qb7 Bxe5 55.Rf2 Qe4 56.Rxf7+ Kg8 57.Qe7 1-0

Current thinking on the line is that it's not that good for White. The offside Knight on a3 is a significant cost and Black should be able to equalise in true Hedgehog style – White doesn't have that many obvious plans and Black should be able to keep them under control. Gallagher in *Beating the Sicilian 3* tells a sad tale; after:

Gallagher, J - Cramling, P [B44] Bern (3), 1991

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nc6 5.Nb5 d6 6.c4 Nf6 7.N1c3 a6 8.Na3 Be7 9.Be2 b6 10.Be3 Ne5! 11.f4 Ned7 12.Bf3 Bb7 13.O-O O-O 14.Qe2

[DIAGRAM] White has a good plan here of playing his g-Pawn up from g2 to g4 and g5, squeezing the bind and getting some heat off the e-Pawn. But:

14...h6! Now g4 is met by ...Nh7! and ...g5! when White must relinquish control of e5. 15.Rfd1 Qc7 16.Rac1 Rac8 17.Bf2 Rfe8 18.Rc2 Bf8 1/2-1/2

This is the idea Nunn, Gallagher and their collaborators recommend for Black in *Nunn's Chess Openings*. Now, better players than me are still playing this line for a win as White, but White is as likely to lose the plot as Black here, typically by over-reaching on the King's-side and getting blown up in the middle:

Meladze, F - Yudin, V [B44] corr Tch10-SU, 1994

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 e6 5.Nb5 d6 6.c4 Nf6 7.N1c3 a6 8.Na3 b6 9.Be2 Bb7 10.f4 Be7 11.O-O O-O 12.Be3 Nb8 13.Bf3 Nbd7 14.Qe2 Re8 15.g4 h6 16.Qg2 Nh7 17.Rac1 Rc8 18.Ne2 Nh8 19.g5 hxg5 20.fxg5 Ne5 21.h4 Nfd7 22.Ng3 [DIAGRAM]

All finished over there? Right, now, as far as I remember, an attack on the wing is best met by play in the centre...

22...d5! 23.exd5 Bxa3 24.bxa3 Rxc4 25.Rxc4 Nxc4 26.dxe6 Rxe6 27.Bd4 Nde5 28.Bxe5 Bxf3 29.Qxf3 Nxe5 30.Qf4 Qe7 31.Qb4 Qc7 32.Nf5 Nc4 33.Qc3 Re5 – 34.Qf3?? Nd2 0-1

Lastly, the system with Nb5 and Bf4 is still played and may suffice for a typical White edge (NCO again). A twist noted by NCO is White's attempt to lean on the d-Pawn, but Black can let it go and seems to have sufficient compensation:

Berg,K - Eingorn,V [B44] London, 1989

The non-Sicilian Sicilian

The line that Nunn and Gallagher actually recommended for White in *Beating the Sicilian 3* was a formation which neither Black nor White will find familiar from elsewhere in the Sicilian, but which French players might find to their taste.

The idea is for White to play $Nxc6$, and after $\dots bxc6$, play against Black's less flexible Pawn structure and maybe get in an attack on the King's-side. Black often plays $\dots d5$, hence the link with the French. Fischer had a couple of important games with this structure: beating Petrosian with White in 1971, a classic BvN endgame, and holding the draw against Spassky in the decisive game of the 1972 match.

I don't see many White endgames in this line these days in this line, what you get is an abundance of hacks:

Klimov,S (2432) - Lindberg,B (2307)
[B46] IM Salongernas Stockholm
SWE (5), 09.06.1999

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nc6 5.Nc3 a6 6.Nxc6 bxc6 7.Bd3 d5 8.0-0 Bd6 9.Re1 Ne7 10.Qh5

[10.Qg4 0-0 11.e5 f5 12.Qh4 Bc5 = Siero-Lebredo, 1983; 10.e5 Bc7 11.Qg4 Ng6]

10...e5 11.f4 d4 12.fxe5 Qa5 13.Rf1 Ng6 14.Nb5 Bb8[DIAGRAM]

15.e6 axb5 16.exf7+ Kf8 17.e5

**Nxe5 18.Bh6 Qc7 19.Bxg7+ Kxg7
20.Qxh7+ 1-0**

This line is one of the reasons Black players like to play $5...Qc7$, on, so they can recapture on c6 with the Queen ($6. Ndb5!? Qb8!$ and $...a6$ is not a problem for Black). But if you want to play $6...Nge7$, you've got to play $5...a6$, and if you waste another move with a Pawn by playing $5...a6$, White might decide to play $6. Nxc6$. (Plaskett says Kamsky once jumped the gun with $5.Nxc6$, and won.)

Now, this system is undoubtedly dangerous and has a very high percentage of White wins. But the theoretical verdict from NCO is quite consoling for Black, and the evergreen Taimanov shows us the way:

**Yemelin,V - Taimanov,M [B46] St
Petersburg ch (6), 1997**

**1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4
Nc6 5.Nc3 a6 6.Nxc6 bxc6 7.Bd3
d5 8.O-O Nf6 9.Re1 (9. Qe2!?) 9...
Be7 (9...Bb7!?, 9...Rb8!?) 10.e5 Nd7
11.Qg4 g6 12.Bh6 Rb8 13.Nd1!?
Rb4 14.Qe2 Bg5 15.c3 Rb6=**

[DIAGRAM] (1/2-1/2, 80)

White is well-developed but Black has it all under control. Gambiting the b-Pawn at move 13 is only unclear: it's not obvious that White has compensation.

Overall, this is not a great line to play for a win with as Black but generally you should look forward to grinding points in the endgame as Black (in this, like so many other lines of the Sicilian).

Sundries

Taimanov is pretty dismissive of other systems tried against the Taimanov, but I would not be confident about refuting them if I had not seen them before: we examine **6. Bc4**, **6. Bf4**, and **6. f4**.

Petursson,M - Cramling,P [B46] Reykjavik (5), 1984

[DIAGRAM]

White has made a heavy commitment to attack d6, but it has got nowhere: meanwhile, Black has good Queen's-side play.

13.Ne2 Nxe4 14.Qe3 d5 15.Nfd4 Nxd4 16.Nxd4 Bd6 17.Bxd6 Nxd6 18.Nxe6 fxe6 19.Qxe6+ Kd8 20.Rxd5 Qxd5 21.Qxd5 Nb5 22.Qf3 Bb7 23.Qg4 Bxh1 24.Bh3 Bc6 25.a3 bxa3 26.Qf4 Rb7 27.bxa3 Nc3+ 0-1

Chandler Murray - Andersson Ulf [B46] Naestved, 1985

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 e6 5.Nc3 a6 6.f4

This is quite an important line, but if Andersson's approach given below is adequate, then it may become less so! Having deprived the dark-squared Bishop of its best square on f4, White can no longer plan to rearrange with Bf4 and Qd2 if Black unloads. However, there is another rearrangement, of retreating the Queen to f2, out of the way of the Bishop – which is the Wittman-Klinger example used in

the introduction. Also, this line is where we arrive from Lein-Ivanovic, having come across from the Grand Prix Attack.

6...Nxd4!? 7.Qxd4 b5 8.Bd3 Bb7 9.a3 Rc8 10.Bd2 Nf6

[DIAGRAM]

Typical Sicilian: Black looks horribly underdeveloped, but White has no obvious way through.

**11.b4 d5 12.e5 Ne4 13.Bxe4 dxe4
14.Qxd8+ Kxd8 15.0-0-0 Rc4 16.
Be3+ Kc8 17.Kb2 Be7 18.a4 1/2-
1/2**

Move orders (1): how to get to move four

After **1. e4 c5 2. Nf3 Nc6** or **1. e4 c5 2. Nf3 e6** there is no requirement for White to play **3. d4**. There are several alternatives against each move, including **3. c4** and **3. c3**; **2...e6** often prompts **3. d3** and **3.b3**. There are arguments which suggest that, say, **3. b3** is better against **2...e6** than other second moves, although Joe Gallagher in *Beating the Anti-Sicilians* once played **2...e6** hoping to tempt the reply **3. b3...!**

Bhend,E - Gallagher,J [B40] 1992

1.e4 c5 2.Nf3 e6 3.b3 b6 4.Bb2
Bb7 5.d3 d6 6.Be2 Nf6 7.O-O Be7 8.
Nbd2 Nc6 9.Re1 O-O 10.Bf1 Rc8 11.
a3 a6 12.Rb1 Re8 13.b4 cxb4 14.
axb4 d5! -/+ [DIAGRAM]

15.e5 Nd7 16.d4 Nxb4 17.c3 Nc6
18.Bd3 Na5 19.Ra1 Nf8 20.Nf1 b5
21.Re2 Nc4 22.Bc1 a5 23.N3d2 b4
24.cxb4 axb4 25.Nb3 Qb6

26.Ne3 Ba6 27.Nc2 Ra8 28.Rb1 Re8 29.f4 Na3 30.Rb2 Bxd3 31.Qxd3 Rc8
32.Be3 Rc3 33.Qd1 Nxc2 0-1

The Bb5 system against 2...Nc6 is a serious attempt to get positive play against the Sicilian, which must be treated with respect. A "Taimanov" solution might involve ...e6 and ...Nge7, as favoured by Krasenkow.

Ricardi,P (2555) - Granda Zuniga,J (2600) [B30] Buenos Aires Najdorf (9), 1996

1.e4 c5 2.Nf3 Nc6 3.Bb5 e6 4.O-O Nge7 5.c3 a6 6.Bxc6 Nxc6 7.d4 d5 8.
exd5 Qxd5 9.Be3 c4

10.b3 Be7 11.bxc4 Qxc4 12.Nbd2 Qd3 13.c4 O-O 14.Rc1 b5 15.cxb5 Qxb5 16.Nc4 Bb7 17.Nb6 Rad8 18. Rb1 Nb4 19.a3 Qxb6 20.axb4 Be4 21.Rb3 Qb7 22.Qe2 Rd5 23.Rc1 Rb5 24.Nd2 Bd5 25.Rbc3 Bd6 26. Nb3 Bxg2 27.Nc5 Qa8 28.Qg4 Bf3 29.Qh3 Bd5 30.Bd2 Rxb4 31.Qh4 Bxc5 32.Rh3 Be4 33.dxc5 Rb1 34. Rxb1 Bxb1 35.Rg3 O-1

Also, there are "Anti-Sicilian" systems, some of which can be used to switch back into the main line Sicilian. So, the "Chamaeleon" system with **1. e4 c5 2. Nc3** and **3. Nge2** can always be used to switch back with **4. d4**, and a lot of people use **2. Nc3** to put Black players off **2...d6** (after which they will play the f5 gambit from the Grand Prix Attack), while after **2...Nc6** will play **3. Nf3** and **4. d4**. I don't have very strong opinions about all this yet: Joe Gallagher was the key reference a while ago but is dating on the c3 Sicilian.

Move orders (2): just passing through?

Some folks have been using the Taimanov move-order to get to other Sicilians. Lev Polugaevsky is all over my database of Taimanov Sicilians, but always switched out early on. What's the point? Well, the most common reason is to play the Scheveningen without having to face the Keres Attack: so,

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nf6 5. Nc3 d6 risks 6. g4!?

but

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 e6 5.Nc3 a6 6. Be2 d6 7. O-O Nf6

avoids all that. (Or it did until Karpov got fed up with Kasparov dodging the Keres, and played **1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nc6 5.Nc3 d6 6.g4!?** (Wch32-KK2

Moscow (14), 1985))

Black can even use it to get to positions of a Pelikan/Sveshnikov type:

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 e6 5.Nc3 Nf6 6.Nb5 d6 7. Bf4 e5 8. Bg5

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 Nc6 5.Nb5 d6 6.Bf4 e5 7.Be3 Nf6 8. N1c3 a6 9.Na3 b5

[The latter move order loses a tempo for White over the modern main Pelikan lines, although it was quite common at one point. Taimanov had it in his 1971 match with Fischer, but that was before Sveshnikov taught us all to play a quick ... a6 and ...b5.]

So this is the Taimanov: flexible, modern, not too fiercely theoretical, looking comfortable in most lines of NCO. I fancy giving it a try this season; I'll let you know how I get on.

Lessons from Larsen

The best advice you can give a young player is for them to play like Morphy and Tarrasch, and to play the openings they played. But, once your play has reached a certain standard, you need to appreciate more the complex and sometimes contradictory nature of **chess**. Then you are ready to look at **Larsen's** games.

He was clearly the one of the strongest players in the world in the 'sixties and 'seventies, and captained the Rest of the World team against the Soviet Union in 1970. And he also has a bold spirit, excellent fighting qualities, superb technique and a fresh approach to the openings. You can learn a lot from a man like that.

Larsen is also a wonderful annotator, and worth reading for his notes alone: for example, his book of the 1978 Karpov-Korchnoi match is excellent reading, and a far cry from the hurried hackwork that usually follows a championship match. His games collection is a joy from start to finish - frank, witty, thorough and the games are full of delights.

Opening

Larsen,B - Lengyel,L [C28] Amsterdam (9), 1964

1.e4 e5 2.Bc4 Nf6 3.Nc3

Not a move to play against everybody: 3...Nxe4! 4. Qh5! may be required.

3...Nc6 4.d3 Bb4 5.Nf3 d6 6.O-O Bxc3 7.bxc3 Na5 8.Bb3 Nxb3 9.axb3 O-O 10.c4

I remember Michael Stean showing this position and claiming White could play for a win with it, using the extra central Pawn. **Larsen** had played this before and got just a draw, but wanted to show it was worth a win. But it takes a steady hand...

10...Qe7 11.Nd2 Nd7 12.Qh5 Nc5 13.f4 exf4 14.Rxf4 Qe5 15.Qxe5 dxe5 16. Rf2 Ne6 17.Nf3 f6 18.Be3 a6

Flohr,S - Larsen,B [A56] Copenhagen, 1966

1.d4 Nf6 2.c4 c5 3.d5 e5

"If (Black) forgets to do something active, then he will be slowly strangled. Playing this system means that I force myself to play aggressively!"

4.Nc3 d6 5.e4 g6 6.Bd3 Bg7 7.Nge2 Nbd7 8.h3 a6

Black waits for the Bc1 to move before playing Nh5.

9.Be3 Nh5 10.Qd2 [10.g4 Nf4 11.Nxf4 exf4 12.Bxf4 Ne5] 10...0-0 11.g4 Nf4 12.Nxf4 exf4 13.Bxf4 Ne5 14.Be2 b5 15.cxb5 axb5 16.Nxb5 Ra4 17.Nc3 Rd4 18.Qe3 Re8 19.Qg3 g5 20.Be3 Ng6 21.Bb5 Rxe4 22.Nxe4 Rxe4

White gets nervous and flees the centre, but this is out of the frying pan and into the fire.

23.O-O? Rb4 24.Bd3 Be5 25.Qf3 Nh4 26.Qd1 Qf6 27.a3 Nf3+ 28.Kg2 Bxg4 29.axb4 Nh4+ 30.Kg1 Bxd1 31.Rfxd1 cxb4 32.Be4 Bxb2 33.Ra8+ Kg7 34.Rb8 Bc3 35.Rxb4 Nf3+ 36.Bxf3 Qxf3 37.Rd3 Be5 38.Rg4 h6 39.Rd2 Qxh3 40.Rg2 f6 0-1

Middlegame

Bronstein,D - Larsen,B [E75] Amsterdam izt, 1964

1.d4 Nf6 2.c4 g6

"A move full of fighting spirit and self-confidence. As a matter of fact I believe that Bronstein knows more about the King's Indian than I do but -- come out and fight!"

3.Nc3 Bg7 4.e4 d6 5.Be2 0-0 6.Bg5 c5 7.d5 e6 8.Nf3 h6 9.Bf4 exd5 10.exd5 Re8 11.Nd2 Nh5 12.Bg3 Bg4 13.0-0 Nxc3 14.hxc3 Bxe2 15.Nxe2 Bxb2 16.Rb1 Bg7 17.Rxb7 Nd7

The next few moves should be showered with annotation marks, but which ones?

18.Nf4 Nb6 19.Re1 Bc3 20.Ne4 Bxe1 21.Ne6 Bxf2+

22.Kxf2 fxe6 23.Qg4 Rf8+ 24.Kg1 Rf6

25.Qh3?? [25.dxe6 Nxc4! (25...Qf8 26.e7 Rf1+ 27.Kh2 Qf5 28.Qxf5 Rxf5 29. Rxa7! Rb8=; 25...h5 draws 26.e7 Rf1+ 27.Kxf1 Ne3+ 28.Ke2 Nxg4 29.exd8Q+ Rxd8-+)] 25...Qf8 26.Ng5 Rf1+ 27.Kh2 Rf5 28.Nxe6 Rh5 29.Qxh5 gxh5 30. Nxf8 Rxf8 0-1

A fabulous ding-dong of a game. Donner annotated this game twice in two days, once giving 22.Kxf2? then again with 22.Kxf2! But if he knew about 25...Nxc4, maybe he would have annotated it a third time, and found a third typographical symbol. **Larsen** thought that Donner had a lot of courage to correct his first analysis so quickly; I agree.

Larsen, B - Petrosian, T [B39] Santa Monica, 1966

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 g6

"I used to have Black in this position!"

5.Be3 Bg7 6.c4 Nf6 7.Nc3 Ng4 8.Qxg4 Nxd4 9.Qd1 Ne6 10.Qd2 d6 11.Be2 Bd7 12.O-O O-O 13.Rad1 Bc6 14.Nd5 Re8 15.f4 Nc7 16.f5 Na6 17.Bg4 Nc5 18.fxg6 hxg6 19.Qf2 Rf8

"I have several times used this position to illustrate how the right move is sometime found through elimination."

20.e5! [20.Bxc5?! dxc5 21.Nf6+ (21.Qxc5 Bxd5 22.Rxd5 Qb6 23.b4 Qxc5+ 24.bxc5 "is drawn" ; 21.Qh4 Bxd5 22.Rxd5 e6 is bad, but inspires the game continuation 21...Bxf6 22.Rxd8 Raxd8 with compensation] **20...Bxe5 21.Qh4 Bxd5 22.Rxd5 Ne6?** [22...e6 is still worth trying] **23.Rf3 Bf6?** [23...f5] **24.Qh6 Bg7**

25.Qxg6 The exclamation mark should not be attached to this move, but rather to Rf3; of course it is the current move that makes the previous one possible. **25... Nf4 [25...fxg6 26.Bxe6+ Kh7 27.Rh3+] 26.Rxf4 fxxg6 27.Be6+ Rf7 28.Rxf7 Kh8 29.Rg5 b5 30.Rg3 1-0**

Endgame

Eliskases,E - **Larsen**,B [A96] Mar del Plata, 1958

Larsen tells us that one of the most popular **chess** excuses is "a cold". Yet this game was played when he had a terrible cold, so what can he say next time? [Actually **Larsen's** comments on this game are much more lengthy and amusing, but I would be a cad to reproduce them here and spoil his punchline.]

Lessons from Petrosian

The williest, boringest, most elusive, most modern of world champions, **Petrosian** remains a difficult and contradictory figure. His play combines deft tactical awareness with an acute sense of *prophylaxis*, so that opponents have the greatest difficulty in laying a finger on him. And for his own part, he often seems content holding the margin of the draw than undertaking any heroics in pursuit of a win. In the analysis room, and in blitz games, **Petrosian's** abundant tactical skills were apparent to everyone, but to the spectator of his tournament games, these were far from obvious, and he was regarded as dull and perhaps relatively weak.

You don't get to be world champion without having something going for you, and I have included one game below designed to dispel the idea that **Petrosian** cannot attack. But like Ulf Andersson, his youthful attacking phase matured into a highly sophisticated positional style, where a web of small moves can bind and hold the opposing pieces, and his tactical skills were used to anticipate and avoid the attacking ideas of his opponent. He has embraced the hypermodern style, perhaps taking to another level Nimzovitch's ideas about prophylaxis and the centre. With this style, his tactical skills are always subservient to strategy.

A club player who is trying to decide what is going on in lots of **Petrosian's** games could well do themselves a mischief. But in his most accessible games, the play contains as much tension and drama as one could hope for. And also, for my purposes, as much instruction. By all means go to masters like Morphy and Capablanca to understand simple **chess**. But I don't think you will find clearer examples of how an apparently strong Pawn front can in fact turn out to be a hollow sham than in **Petrosian's** games against Korchnoi and Spassky, Also notable were his games with campaigns based on colour-complexes; he more than once reduced a strong GM like Mecking to useless shuffling.

Opening

What can a club player learn from a man who once opened as Black: 1.e4 e6 2. d4 d5 3.Nc3 Bb4 4.e5 b6 5.Qg4 Bf8 6.Nf3 Qd7 7.Nb5 Nc6 and won? (Joppen,E - **Petrosian,T [C16] Belgrade (11), 1954: 0-1, 56?)**

(1.e4 e6 2.d4 d5 3.Nc3 Bb4 4.e5 b6 5.Qg4 Bf8 6.Nf3 Qd7 7.Nb5 Nc6 8.c3 a6 9. Na3 f5 10.Qg3 Bxa3 11.bxa3 Bb7 12.Ng5 0-0-0 13.h4 Nh6 14.Bd3 Kb8 15.Qf3 Nf7

16.Nh3 g6 17.Qe2 Ka7 18.Bg5 Nxf5 19.Nxf5 h6 20.Nh3 Qe7! 21.Nf4 g5 22.Nh3 [22.Ng6 Qxa3 23.Nxh8 Qxc3+ 24.Qd2 Qxa1+; 22.hxg5 hxg5 23.Rxh8 Rxh8 24.Nh3 g4 25.Ng1 Rh1 26.Kf1 Qh4-+] 22...Qxa3 23.Qd2 Qe7 24.0-0-0 Rdg8 25.Kb1 Na5 26.hxg5 hxg5 27.f4 g4 28.Ng5 Bc6 29.Qb2 Nc4 30.Qb4 Qd7 31.Bxc4 a5 32.Qb2 dxc4! 33.Qd2 Bd5 34.Rdg1 Qc6 35.Rxh8 Rxh8 36.g3 Qe8 37.Kb2 Qh5 38.Kc2 Qh2 39.Qxh2 Rxh2+ 40.Kb1 Ka6 0-1)

Petrosian is at his best in highly technical, flexible openings, which most of us should avoid like the plague, but there is one important opening where his mastery is well worth studying.

Petrosian,T - Rossetto,H [D35] Portoroz (11), 1958

1.d4 Nf6 2.Nf3 d5 3.c4 e6 4.Nc3 Be7 5.cxd5 exd5

O'Kelly describes the Exchange Variation as one of **Petrosian's** main 'sources of income'. The Pawn structure suggests a minority attack for White.

6.Bf4 c6 7.Qc2 Na6 (idea Pc7-e6) 8.a3 0-0 9.e3 Nc7 10.Bd3 Ne6 11.Be5 g6 12.0-0 Ng7 13.b4 a6 14.Bxf6 Bxf6 15.a4 Bf5 16.Bxf5 Nxf5 17.b5 axb5 [17...c5!? 18.dxc5 Rc8 Gligoric, Matanovic] 18.axb5 Qd6 19.bxc6 bxc6 20.Na4 +/- Rfb8 21.Nc5 Qe7 (idea Pd6-c4) 22.Nd3 Qb7 23.Nfe5! Bxe5 24.Nxe5 Rxa1 25.Rxa1 Ne7 26.g3

White's attack yields a weakness.

Middlegame

Petrosian, T - Mecking, H [B07] Palma, 1969

1.d4 g6 2.e4 Bg7 3.Nf3 d6 4.c3 Nf6 5.Nbd2 0-0 6.Be2 c5 7.dxc5 dxc5 8.0-0 Nc6 9. Qc2 b6 10.Nc4 Bb7 11.a4 Qc7 12.Re1 Na5 13.Bf1 Nxc4 14.Bxc4 Ng4 15.a5 Bc6 16. Qe2 Ne5 17.Nxe5 Bxe5 18.g3 Bg7 19.Bf4

19...e5 20.Bc1

What has White achieved with his last two moves? Black has gained a move, but it is a move which does his light squares no favours. There is a second point, a psychological one: the complete retreat to c1 may lead Black to assume his opponent is not really trying to win, and can be attacked with impunity. The lunge of the e-Pawn perhaps suggests Black is losing patience, and might be tempted to further errors...

20...Kh8 21.Bd5 Bxd5 22.exd5 f5 23.c4 Rae8 24.Rd1 f4

Natural to an attacking player like Mecking, but **Petrosian** must have smiled quietly inside. White can now achieve a complete blockade of the light squares, after which the famous **Petrosian** grip never relaxes.

25.axb6 axb6 26.Qe4 Qd7 27.Re1 Qf7 28.Re2 g5 29.g4 Qd7 30.f3 Ra8 31. Rxa8 Rxa8 32.Bd2 Re8 33.Bc3 Qd6 34.Re1 h6 35.Ra1 Rf8 36.Ra7 Re8

Now it is Black who returns a piece to its original square, but not from choice, rather from lack of choice.

37.Qf5 b5 38.Rd7 Qf8 39.Qxf8+ Rxf8 40.cxb5 Rb8 41.Rxg7 1-0

Petrosian,T - Mecking,H [D03] Wijk aan Zee, 1971

I often think of **Petrosian's** style as conquering one square of the board at a time, taking perhaps 64 moves to win.

1.d4 Nf6 2.Nf3 e6 3.Bg5

Petrosian always had a fondness for these apparently toothless Bishop moves in the opening.

3...c5 4.e3 d5 5.c3 Nc6 6.Nbd2 cxd4 7.exd4 Be7 8.Bd3 h6 9.Bf4 Nh5 10. Be3 Nf6 11.Ne5 Nxe5 12.dxe5 Nd7 13.Bd4 Nc5 14.Bc2 a5 15.Qg4 g6

The outlines of the game are clearer: we have a blocked Pawn chain, like a French Defence, with White having the basis for a dark-square campaign.

16.0-0 Bd7 17.Rfe1 Qc7 18.a4 Na6 19.Qe2 Kf8 20.Nf3 Kg7 21.Be3 Nc5 22. Nd4 Ra6 23.Bc1 Raa8 24.g3 b6 25.h4 h5 26.Qf3 Qd8 27.Bd2 Qe8 28.Bg5 Qd8 29.Qf4 Rc8 30.Re3 Bxg5 31.hxg5 Ra8

Petrosian shifts tack.

32.Qf6+ Qxf6 33.exf6+ Kh7 34.Kg2 Rae8 35.f4 Rb8 36.Ree1 Nb7 37.Rh1 Kg8 38.Nf3 Nd6 39.Ne5 Be8 40.Bd3 Rc8 41.Kf3

KUFTE, we say, King Up For The Endgame.

41...Bc6 42.Rh2 Be8 43.Ke3 Rc7 44.Kd4 Nb7 45.b4 Nd8 46.Rh4 Nb7 47. Ra2 Nd6 48.Rh1 Nb7 49.b5 Nc5 50.Bc2 Nd7 51.Ra3 Nc5

Petrosian has climbed to the top of the hill, and now charges down abruptly on his opponent's forces.

52.c4 Nd7 53.Rc3 Nxe5 54.Kxe5 dxc4 55.Be4 Rc8 56.Kd6 Rc5 57.Rhc1 h4 1-0

Petrosian - Korchnoi [A20] Moscow, 1971

1.c4 e5 2.g3 c6 3.b3 d5 4.Bb2 d4

Black makes a stake in the centre.

5.Nf3 Bd6 6.d3 c5 7.Bg2 Ne7 8.O-O Nec6 9.e3 O-O 10.Nbd2 Be6 11.e4 Nd7
 12.Nh4 g6 13.Bf3 Bc7 14.a3 Ba5 15.Bc1 Qe7 16.Bg4 f5 17.exf5 gxf5 18.
 Bf3 Nf6 19.Bg2 Rad8 20.Ra2 Bc8 21.Re1 Kh8

At first glance, Black has the advantage because of the extra space. **Petrosian** goes on to show that White has much opportunity for play around the shell of Black's armour, while Black is overstretched.

22.b4 cxb4 23.Nb3 Bb6 24.Bxc6 bxc6 25.axb4 a6 26.Nf3 e4 27.c5 Bc7 28.

11.b3? [11.a3 b6 12.b4 Nb7 13.Rb1 «] **11...Ng4 12.e4** [12.Bb2 f5 13.Rae1!?!] **12...f5 13.exf5 gxf5 14.Nd1!?** [14.Bb2! Bd7 15.Rae1 b5 16.Nd1=+] **14...b5**

I remember someone describing Spassky, the challenger, "mounting lordly attacks on both wings", playing as a future champion should.

15.f3? [15.Bb2 Rb8 16.f3 Nf6 17.Bc3 Bh6 18.Re1] **15...e4!** **16.Bb2 exf3** **17.Bxf3 Bxb2** **18.Qxb2 Ne5** **19.Be2 f4!** [19...Ra7!?] **20.gxf4** [20.Rxf4 Rxf4 21.gxf4 Ng6 22.Ne4 Nxf4 23.Ndf2 Ra7] **20...Bh3?**

[20...Rxf4 21.Ne3 Qg5+ 22.Kh1 Rxf1+ 23.Ndxf1 Ra7÷]

21.Ne3! No **Petrosian** game is really complete without an exchange sac. **21...Bxf1** [21...Rxf4? 22.Rxf4 Qg5+ 23.Rg4! (23.Kh1 Qxf4 24.Rg1+μ) 23...Nxg4 24.Nxg4 Bxg4 25.Bxg4 Qxg4+ 26.Kh1 Qd4™ 27.Rg1+ Kh8 28.Qxd4+ cxd4 29.Rg4± -] **22.Rxf1 Ng6** ¹ [22...Nd7 23.Bg4 Qf6] **23.Bg4 Nxf4?**

[23...Rxf4? 24.Be6+ Kf8 25.Rxf4+ Nxf4 26.Qh8++-; 23...Qf6!™ 24.Be6+ Kh8 25.Qxf6+ Rxf6 26.f5 Ne5 27.Ne4!±] **24.Rxf4!** And again! But this is a position for centralised minor pieces. **24...Rxf4 25.Be6+ Rf7 26.Ne4 Qh4** [26...Raa7 27.Nf5 Qf8 28.Qf6+-] **27.Nxd6 Qg5+** [27...Qe1+ 28.Kg2 Qxe3 29.Bxf7+ Kf8 30.Qh8+ Ke7 31.Nf5+ Kxf7 32.Qg7+ and 33.♣xe3 +-] **28.Kh1 Raa7** [28...Qxe3 29.Bxf7+ Kf8 30.Qh8+ Ke7 31.Nf5+ Kxf7 32.Qg7+ and 33.♣xe3] **29.Bxf7+ Rxf7**

30.Qh8+! A splendid finish. **Petrosian** hadn't read the script, and went on to hold his title in this match. **1-0**

Petrosian,T - Botvinnik,M [A46] USSR ch (9), 1951

An encounter with the World Champion! Not only of historical significance, but also shows the tenacity of the young Tigran. **Petrosian** has always been a wonderful defender; here's how it's done:

1.d4 Nf6 2.Nf3 e6 3.Bg5 h6 4.Bh4 g5 5.Bg3 Ne4 6.Nbd2 Nxg3 7.hxg3 Bg7 8.c3 d6 9.e3 Nc6 [9...c5 10.dxc5 dxc5 11.Ne4 Qc7 12.Qd6 Qxd6 13.Nxd6+ Ke7 14.0-0-0=] **10.Bd3 Bd7 11.Qc2 Qe7 12.0-0-0 a5!** White really has been too

slow here. **13.e4 a4 14.a3 Na5 15.Rde1 0-0-0 16.Kb1 Kb8 17.e5 d5! 18.g4 Rc8 19.Qd1 c5 20.Bc2 Qe8 21.dxc5 Rxc5 [21...Bf8 22.Nxg5] 22.g3 Nc6! 23.Re3 [23.Bxa4 Nxe5 24.Bxd7 Nxd7] 23...Ra5 24.Rhe1 Bf8**

White now seeks some active play. **25.c4 Bc5 26.R3e2 Ne7 27.Ka1 Qd8 28.Rh1 [idea Nxg5] 28...Ba7 29.Qb1 Rc5 30.cxd5 exd5! 31.Bf5 Nxf5 32.gxf5 Bb5 33.Ree1 Rc7 34.Rh2 g4 35.Nh4 Qg5**

White's position is critical, so he jettisons a Pawn for counterplay. **36.f4! gxf3 37.Nhxf3 Qxg3 38.e6 fxe6 39.fxe6 Rhc8** Returning the Pawn for the attack. [39... Bf2 40.Reh1 Be3 +=] **40.Rxh6 Bf2 41.Reh1 Qg4 42.Rg6 Qf4 43.Rg5 Qd6 44.**

Qf5 Be3

White's position still looks precarious: the Bishops are firing in all directions.

45.Qxd5! Qxd5! 46.Rxd5 Bc6 47.Rhh5 Bxd5 48.Rxd5 Re7 49.Re5 Bh6 50. Re4 Rc6 51.Rxa4 Rxe6 52.Re4 Rf6

White must still work for the draw.

53.Ka2 Kc7 54.Re7+ Kc8 55.Re2 Rc2 56.Kb1 Rcc6 57.Nd4 Rcd6 58.N2b3 Bg7 59.Ka2 Rf1 60.Nc2 Rf5 61.Rg2 Bf6 62.Nb4 Kd7 63.Rh2 Kc7 64.Nc2

Rg5 65.Nd2 Re6 66.Nb4 Bg7 67.Kb3 Re3+ 68.Ka2 Re6 69.Kb3 Re3+ 70.
Ka2 Re8 71.Kb3 Kb8 72.Nb1 Re3+ 73.Nc3 Reg3 74.Rd2 Rg2 75.Rxg2 Rxg2
76.Nd3 Rh2 77.Kc4 Rd2 78.a4 Ka7 79.Nb5+ Kb6 80.b4 Rc2+ 81.Kb3 Rg2
82.Nc3 Rg3 83.Kc4 Rg4+ 84.Kb3 Rg3 85.Kc4 Bxc3 86.a5+ Kc7 87.Kxc3 Kc6

Still no chance to relax.

88.Kc4 Rg4+ 89.Kc3 Kb5 90.Nc5 Rc4+ 91.Kd3 Rxb4 92.Nxb7 Kc6 93.a6
Kd5 94.Nd8 Rd4+ 95.Ke3 Re4+ 96.Kd3 Rf4 97.a7 Ra4 98.Nf7 Rxa7 99.Ng5
Ra3+ 100.Ke2 1/2-1/2

A thrilling draw.

Endgame

Petrosian,T - Chistiakov,A [A80] Riga, 1954

1.d4 e6 2.Nf3 f5 3.Bf4 Nf6 4.e3 Be7 5.Bd3 0-0 6.Nbd2 d6 7.c3 Nc6 8.Qc2 Qe8 9.
h3 Bd7 10.Bh2 g6 11.e4 fxe4 12.Nxe4 Nxe4 13.Bxe4 d5 14.Bd3 Bd6 15.Qe2 Qe7
16.0-0 Bxh2+ 17.Kxh2 Rf4 18.Bb5 Qd6 19.g3 Rf5 20.Bxc6 Bxc6

Peter Clark picks this one out as a typical **Petrosian** game, featuring a good Knight against bad Bishop. "Purposeful yet unhurried".

21.Ne5 Raf8 22.f3 Be8 23.h4 c5 24.Rfe1 cxd4 25.cxd4 Qb4 26.Qf2 g5 27. hxg5 Rxc5 28.a3 Qe7 29.Rac1 Rg7 30.Qe3 Bh5 31.Kh3 Qf6 32.g4 Be8 33. Kg3 Qd8 34.Rh1 Qb6 35.Rh2 Qd8 36.Rh6 Qd6 37.Kg2 Bg6 38.Rc5 Qb6 39. Qc3 Qd8 40.Qc1 Qf6

Very gradually, **Petrosian's** pieces have attained their ideal squares. We now have another protracted manoeuvring phase, where White tries out several arrangements of pieces until he finds one he likes. This sort of cat-and-mouse play is frustrating to watch, torture to play against, and very effective.

41.Rc8 Qe7 42.Rxf8+ Qxf8 43.Rh1 Qd8 44.Qh6 Qd6 45.Qf4 Qb6 46.Rc1 Qd8 47.Kg3 Be8 48.Qh6 Bg6 49.Rc3 Qf8 50.Qc1 Be8

The final push begins.

51.Rc8 Re7 52.Qg5+ Kh8 53.Nd3 Qg7 54.Qh5 Qf8 55.Qe5+ Qg7 56.Qb8 Qf8 57.Qxa7 h5 58.Qb8 hxg4 59.fxg4 Kh7 60.Rc7 b5 61.Nf4 Kg8 62.Rxe7 Qxe7 63.Qe5 Kf7 64.g5 Bd7 65.g6+ 1-0

Kalantar,A - **Petrosian**,T [E11] Erevan, 1948

1.d4 Nf6 2.c4 e6 3.Nf3 Bb4+ 4.Bd2 Qe7 5.g3 Nc6 6.Bg2 Bxd2+ 7.Nbxd2 0-0 8.0-0 d6 9.e4 a5 10.Qc2

The wily **Petrosian** tempts White forward, by retreating!

10...Nd7 11.d5 Ncb8 12.Nd4 Nc5 13.Qc3 e5 14.N4b3 b6 15.Nxc5 bxc5

White's position has gone nowhere over the last few moves, while Black has fixed the Queen's-side, and hampered the view of the Bg2. White decides on a pre-emptive strike.

16.f4 Nd7 17.Bh3 Re8 18.Rae1 Qf6 19.Bxd7 Bxd7 20.fxe5 Qxe5 21.Qxe5 Rxe5 22.Nf3 Re7 23.e5 Rae8 24.exd6 Rxe1 25.Rxe1 Rxe1+ 26.Nxe1 cxd6

White has weathered the storm, but there is more to come. Black can count several advantages: (1) active majority, (2) entry route for the King, and (3) targets for the Bishop on the Queen's-side.

27.Kf2 f5 28.Ke3 Kf7 29.Nd3 Bc8 30.b3 g5 31.Kf3 Kf6 32.Ke3 Bd7 33.Kf3 Be8 34.Ke3 h6 35.Kf3 Bh5+ 36.Ke3 Bd1 37.Kd2 Bf3 38.Ke3 Be4 39.Kd2

Black now switches to a simple King ending. Clarke comments that Black is virtually a Pawn ahead, the a2 and b3 Pawns able to do nothing. [39.Nc1 Ke5 idea ...f4+]

39...Bxd3 40.Kxd3 Ke5 41.Ke3 f4+ 42.gxf4+ gxf4+ 43.Kf3 Kf5 44.Kf2 Ke4 45.Ke2 f3+ 46.Kf2 Kf4 47.h4 h5 48.a3 Ke4 0-1

Bondarevsky,I - Petrosian,T [E71] 1951

1.d4 Nf6 2.c4 d6 3.Nc3 g6 4.e4 Bg7 5.h3 0-0 6.Be3 c5 7.d5 e6 8.Bd3 exd5 9.exd5 Na6 10.Nf3 Nc7 11.0-0 b5 12.Qd2 bxc4 13.Bxc4 Qd7 14.Bh6 Bb7 15.Bxg7 Kxg7

16.Rad1 Rfe8 17.Qf4 h6 18.Rfe1 Rxe1+ 19.Nxe1 Re8 20.Nc2 Re5 21.Ne3 Qe7 22.
a3 a5 23.Ba2 h5 24.Kh2 Ne4 25.Nxe4 Rxe4 26.Qf3 Ba6 27.g3 Qe5 28.Rd2 Ne8 29.
Bb1 Rd4 30.Rxd4 Qxd4?

[30...cxd4! rounds up the Pd5. 31.Ng2 Nf6 32.Nf4 Bc4 Clarke]

31.Qe4 Nf6 32.Qxd4 cxd4 33.Ng2 Nxd5 34.Ne1

Black has a material and 'optical' advantage (more space and mobility, even with two pairs of pieces remaining). But to turn this into a win is no simple matter.

**34...Kf6 35.Kg2 Nb6 36.Bd3 Bc8 37.h4 a4 38.Kf1 Ke5 39.Ke2 Kd5 40.Kd2
Kc5 41.Bc2 Nc4+ 42.Kc1 Bd7 43.Nd3+ Kb6 44.Nf4 Bc6 45.Bb1 Ne5 46.Kd2
Bb5 47.Bc2 Kc5**

Black tries a re-grouping, although he will come back to this arrangement.

48.Be4 Bc4 49.Bc2 Kb5 50.Be4 Bb3 51.Bb1 Ng4 52.Ke1 Kb6 53.Be4 Bc4
54.Bc2 Ka5 55.Be4 Kb5 56.Bc2 Ne5 57.Kd2 Ka5 58.Be4 Kb6 59.Bb1 Bb5
60.Bc2 Kc5 61.Be4

Knowing that he can squeeze no more out of the position with other tries, **Petrosian** grasps the nettle.

61...Ng4! 62.Ke1 d3! Opening a route for the King. 63.Bxd3 Bxd3 64.Nxd3+ Kc4 65.Nc1 d5 66.Ke2 d4 67.Nd3 f6 68.Kd2 Ne5 69.Nf4 Kb3 70.Kc1 g5? [70...d3!] 71.hxg5? [71.Nxh5!] 71...fxg5 72.Nxh5 Nd3+ (time control) 73.Kb1 Nxb2 74.Nf6 Nc4 75.Ne4 g4 76.Nc5+ Kxa3 77.Kc2 Ne5 78.Na6 d3+ 79.Kc3 Ka2 80.Nc5 a3 81.Ne4 Kb1 82.Kb3 Kc1 0-1

Olafsson,F - **Petrosian**,T [C16] Bled (11), 1961

A famous game of manoeuvre won from another master of the art. In fact, although it is reproduced in full in all the collections (O'Kelly, Clarke) it seems to me **Petrosian** achieves a winning game before move 20. The later stages show

Petrosian crisply defending against White's desperate attack.

1.e4 e6 2.d4 d5 3.Nc3 Bb4 4.e5 Qd7 5.Qg4 f5 6.Qg3 [6.exf6 Nxf6] 6...b6 7. h4 Bb7!? [7...Ba6 8.Bxa6 Nxa6 9.Nh3 0-0-0 10.Nf4 Kb7 11.a3?! (11.Bd2) 11... Bxc3+ 12.bxc3 (12.Qxc3 c5) 12...Nb8 Zatulovskaya-Javanovic/Vrnjacka Banja/1965/] 8.Bd3!? [8.Bd2 Nc6 9.Nf3 0-0-0 10.0-0-0 idea Nc3-e2-f4 += Clarke] 8...Nc6 9.Nge2 [9.Nf3 0-0-0 10.Bd2] 9...0-0-0 10.Bd2 Nh6!

One of those clogged positions that make most club players go weak at the knees.

11.a3?! A sign of losing the plot. [11.0-0-0!?!; or 11.Bxh6! gxh6 12.Qe3 idea g3, Nf4 Keres] 11...Be7! 12.Bb5 [12.Qxg7? Ng4] 12...Rdg8 [12...Kb8?! 13.Bxc6 Bxc6 14.Qxg7 Ng4 15.Bg5!; 12...a6?! 13.Bxc6 Bxc6 14.Qxg7 Ng4 15.Bg5± Clarke] 13.Qd3 Nf7 14.0-0-0 Kb8!

Clarke gives an instructive note here, explaining that before having chocks away on the King's-side, **Petrosian** improves his position as much as possible on the other side. **15.Nf4 Qc8! 16.Nce2 Ncd8!** with the initiative **17.Qb3?** Losing a pawn [17.c3 c5 18.Kb1 is still -/+ [Clarke]: White faces pressure on both wings.] **17...c6!** Driving away the Bishop, to a square that perhaps a Knight would like to occupy. **18.Bd3 c5 19.dxc5 Bxc5 -/+** [19...bxc5?! 20.c4] **20.Nh3 Nxe5 21.Bf4 Ndf7 22.Bb5** a restless Bishop... [22.Ng5 Bd6; 22.Qc3 Bd6] **22...Ka8 23.Nd4 Ng6 24.Qa4 Bxd4 25.Bd7 Qf8**

Black has had to endure some congestion, but it's all under control. **26.Rxd4** doesn't help, but what else? [26.Bxe6!? Be5! 27.Bxd5 (27.Rxd5 Bxf4+ 28.Nxf4 Nxf4 29.Qxf4 Qe7! -+) 27...Bxd5 28.Rxd5 Qb8! 29.Qc6+ (29.Rd7 Bxf4+ 30.Kb1 Rc8) 29...Qb7 30.Qxb7+ Kxb7 31.Rd7+ Kc6 32.Rxf7 Bxf4+ -+ Clarke] **26...e5!** Winning, **27.Rb4** [27.Rxd5 Nxf4!; 27.Bc6 Qc8] **27...exf4 28.Rxb6 Nfe5 29.Rxb7 Kxb7 30.h5 Qd6 31.hxg6 Qxd7 32.Qxf4 Nxg6 0-1**

Postscript

Petrosian, T - Guimard, C [D37] Goteborg (14), 1955

This is **Petrosian's** favourite game -- in a style different to all those we have seen so far! In a tense position, Tigran lets rip with a series of attacking thrusts which leave his opponent's King spinning from pillar to post.

1.c4 Nf6 2.Nc3 e6 3.d4 d5 4.Nf3 Be7 5.e3 O-O 6.Bd3 dxc4 7.Bxc4 c5 8.O-O a6 9.a4 Nc6 10.b3 cxd4 11.exd4 Nb4 12.Ne5 Bd7 13.Bb2 Bc6 14.Qd2 Nbd5 15.Nxc6 bxc6 16.Na2 Qb8 17.Nc1 Bb4 18.Qc2 Bd6 19.g3 Rd8 20.Qe2 Nb4 21.Rd1 Nfd5 22.Qe4 Be7 23.Ne2 Bf6 24.Kg2 a5 25.Ng1 Qb7 26.Nf3 Rab8 27.Rac1 h6 28.Kg1 Nb6 29.Be2 N6d5 30.Nd2 Bg5

Lessons from Tartakower

Savielly Tartakower was the wittiest of masters, and, it was said, "too in love with **chess** to ever become world champion". According to his translator, Golombek, he would reject a simple advantageous line in the hope of creating something more worthwhile with a more complex line. This is undoubtedly an expression of Tartakower's taste: less for him could mean only less, and Capablanca's trademark efficiency and elegance had no personal appeal for SGT.

He was regarded as world champion journalist, and his best games collections from Bell (published as a single volume by Dover, superb value as long as you speak descriptively) are peppered with anecdotes, *bon mots*, and provocative observations. For example, he throws away in a footnote one of the best definitions I have seen of a game that would qualify for a beauty prize. His epigrams, or Tartakowerisms, as they were called, are a splendid source of entertainment for the armchair player.

The chessplayer's proof of existence: " Erro ergo sum " (I err, therefore I am).

"Some part of a mistake is always correct."

"The blunders are all there on the board, waiting to be made."

"An isolated Pawn spreads gloom over the whole chessboard"

*"A **chess** game is divided into three stages: the first, when you hope you have the advantage, the second when you believe you have an advantage, and the third... when you know you're going to lose!"*

"A draw can be obtained normally by repeating three moves, but also by one bad move."

"The winner of the game is the player who makes the next-to-last mistake."

The Dover book also records some of his favourite quips: he was once scolded by Capablanca: " *You have no solidity That is my saving grace* ," he replied.

In these volumes, and his famous annotated collection of games edited with duMont, he emphasises the didactic qualities of each game, pointing out which **chess** concepts the games exemplify.

But the **chess** is superb too. He was a tireless experimenter in the openings, a true hypermodern, a fearless attacker and a man regarded by Nimzovitch as one of the top endgame players in the world at the time (in the rather teasing statement "the third best endgame artist of all the living masters"). His style matured, from early heroics and later love of complexity ('a system consisting in the lack of system'), into a player who could really play any sort of position well - a hallmark of all the great masters.

Opening

Tartakower Saviely - Miseses Jacques [A82], Baden-Baden, 1925

SGT titles this game, "The miniature blockade". Before this game had drawn five games in a row, and his opponent teased him: "Have you had sufficient preparation for obtaining your 6th draw?".

1.d4 f5 2.e4 fxe4 3.Nc3 Nf6 4.g4 A hypermodern touch, considered by modern theory as over-doing things a bit. **4...d5 5.g5 Ng8 6.f3 exf3 7.Qxf3 e6 8.Bd3 g6**

After just eight moves, Black is riddled with dark-square holes. **9.Nge2 Qe7 10. Bf4 c6 11.Be5 Bg7 12.Qg3 Na6 13.O-O Bd7** A gesture towards development. **14.Bd6 Qd8 15.Qf4**

A fine example of a weak colour-complex. 1-0

Tartakower Saviely - Przepiorka Dawid [B12] Budapest (Hungary), 1929

"Blitzkrieg"

1.e4 c6 2.d4 d5 3.f3 "New and good", claimed SGT; this offshoot is enjoying a current fashion among English GMs. **3...dxe4 4.fxe4 e5 5.Nf3** "Stimulates the game to fresh activity" SGT **5...exd4 6.Bc4 Be6**

Offering an exchange, of which GM Tartakower is not too shy. **7.Bxe6 fxe6 8.O-O Be7 9.Nxd4 Qd7 10.Qh5+ Kd8 11.Be3 c5 12.Rd1!** A sacrifice! **12...cxd4 13.Rxd4 Bd6 14.e5 Nf6 15.exf6 gxf6 16.Nc3** This game, says SGT, with its varied motifs, gives him the most pleasure of all his creations. **1-0**

Middlegame

Maroczy,G - Tartakower,S Teplitz-Schonau, 1922

1.d4 e6 2.c4 f5

This is an important bit of move-order: the option of ...Bb4(+) gives Black several nice ways of avoiding the main lines of the Dutch. **3.Nc3 Nf6 4.a3 Be7 5.e3 O-O 6.Bd3 d5 7.Nf3 c6 8.O-O Ne4 9.Qc2 Bd6 10.b3 Nd7 11.Bb2 Rf6 12.Rfe1 Rh6 13.g3 Qf6 14.Bf1 g5 15.Rad1 g4 16.Nxe4 fxe4 17.Nd2**

17...Rhx2

Spielmann remarked that when you see a player make a sacrifice of a Rook, you can also see the immediate concrete threats that motivated it. The only exception to this he knew was this extraordinary sacrifice of Tartakower, where tactical threats manifest themselves only later.

18.Kxh2 Qxf2+ 19.Kh1 Nf6 20.Re2 Qxg3 21.Nb1 Nh5 22.Qd2 Bd7 23.Rf2 Qh4+ 24.Kg1 Bg3 25.Bc3 Bxf2+ 26.Qxf2 g3 27.Qg2 Rf8 28.Be1 Rxf1+ 29.Kxf1 e5 30.Kg1 Bg4 31.Bxg3 Nxc3 32.Re1 Nh5 33.Qf2 Qg5 34.dxe5 Bf3+ 35.Kf1 Ng3+

If this sacrifice looks more routine now - like one of Tal's - it is a tribute to the influence this game has had on sacrificial technique. Once SGT had shown that this sort of thing can work, other players felt brave enough to have a go. But you can search the games of earlier masters of attack like Morphy and Andersson and find nothing like it. Fabulous. **0-1**

Tartakower Saviely - Tarrasch Siegbert [A52] It, Semmering , 1926

"My Best Game".

1.d4 Nf6 2.c4 e5 3.dxe5 Ng4

A curiosity: the austere Tarrasch ventures this gambit of the hypermoderns Breyer and Abonyi, while Tartakower replies in the style of... Dr.Tarrasch. Critics of Tartakower often dismissed his style as trappy, and suggested he won only games that his opponents contrived to lose; but Tartakower says of his opponent's play in this game that it is remarkably free from errors.

4.e4 Nxe5 5.Nc3 Bb4 6.Nf3 Bxc3+ 7.bxc3 Qe7 8.Be2 0-0 9.Nd4 d6 10.0-0 Na6 11.f4 Nc6 12.Re1 Nxd4 13.cxd4

White offers a Pawn, which there is no point in declining.

13...Qxe4 [13...Bd7 14.Bd3 Nb4 15.Bb1 Rad8 16.a3± SGT] 14.Bf3 Qg6 15.Ba3 Qf6 16.Qd2 c6 17.d5 c5 18.Bb2 Qd8 19.Qc3 f6 20.Re3 Bd7 21.Rae1 Rf7 22.g4 Nc7 23.g5

Tartakower's strategy is all straight lines and moral rectitude, lofty ideals that triumph over the material Pawn deficit.

23...Ne8 24.f5 fxe5 25.Bh5 Nf6 26.Bxf7+ Kxf7 27.Qd2 Ng8 28.Qe2 Bxf5 29.Rf3 Nh6 30.Rxf5+ Nxf5 31.Qe6+ Kf8 32.Qxf5+ Kg8 33.Qe6+ Kh8 34.Rf1 1-0

"You really have confidence in your pieces", commented Tarrasch. "Rather, my pieces have confidence in me", replied SGT.

Tartakower, S - Colle, E [A00] Bartfeld, 1926

1.b4

"The ultimate truth in **chess**?" SGT

1...e5 2.Bb2 f6 3.e4 Bxb4 4.Bc4 Ne7 5.f4

A hearteningly fresh angle on this opening, although again, by modern standards, again over-doing things a bit. Why Capablanca was whingeing that **chess** openings had been played out is a mystery, though...

5...d5 6.exd5 exf4 7.Qf3 Bd6 8.Ne2 Ng6 9.d4 Qe7 10.Bc1 Bf5 11.Bd3 Bxd3 12.Qxd3 0-0 13.0-0 Re8 14.Nxf4 Nxf4 15.Bxf4 Bxf4 16.Rxf4

Tartakower reflects here that his opening has not been much of a success.

16...Na6 17.Nd2 Qe3+ 18.Qxe3 Rxe3

19.Rb1 Rc3 20.Rb2 b6 21.Rf3 Rxf3 22.gxf3

Now White is better placed to make use of his advantages. He will create a passed d-Pawn.

22...Rd8 23.c4 Nb8 24.Kf2 Kf7 25.a4 c6

A sign of distress: Black helps White with his main plan, for fear of making more concessions trying to do something to stop it.

26.dxc6 Nxc6 27.d5 Na5 28.Ke3 Nb7 29.Kd4 Rc8 30.Ne4 h6

31.a5!

The Black knight is tied to d6.

31...f5 32.axb6 fxe4 33.bxa7 1-0

Lowcki,N - Tartakower,S [C41] Jurata, 1937

"A bizarre ending".

1.e4 e5 2.Nf3 d6 3.Bc4 Be6 4.Bxe6 fxe6 5.c3 Nc6 6.Qb3 Qc8 7.Ng5 Nd8

A curiously cramped system to adopt. **8.O-O [8.d4] 8...Be7 9.d4 Bxg5 10.Bxg5 Nf7 11.Bh4 c6 12.Nd2 Qd7 13.Rad1 exd4 14.cxd4 Ne7 15.f4 O-O 16.Bxe7 Qxe7 17.f5**

White is determined to make something stick.

17...Nd8 18.Rde1 Kh8 19.d5 cxd5 20.exd5 e5 21.Ne4 Nf7 22.Qe3

22...Qh4 Finally, counterplay is sought. 23.Rf3 Rac8 24.Rh3 Qf4 25.Qxa7 Rc1
26.Qe3 Rxe1+ 27.Qxe1 Ng5 28.Rh4 Qxf5

Among SGT's craftier traps: "devilish", he claims.

29.Nxd6 Qg6 30.Rg4 Qxd6 31.Rxg5

White has a Pawn, Black the initiative.

31...Qb6+ 32.Kh1 Qb5 33.Kg1 Qc5+ 34.Kh1 Qc4 35.Kg1 Qd4+ 36.Kh1 Qe4
37.Qc1 Qd3 38.Kg1 Qd4+ 39.Kh1 Qd2

A piquant finish to exploit the back rank, reminiscent both of the composed game Adams-Torre, and the genuine brilliancy Bernstein-Capablanca. **0-1**

Endgame

Capablanca,J - Tartakower,S [B42] Vienna (2), 1914

1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 a6 5.Bd3 Nf6 6.0-0 d5 7.exd5 Nxd5 8.c3 Bc5 9.Nf3 Nd7 10.Nbd2 N7f6 11.Ne4 Nxe4 12.Bxe4 Nf6 13.Qxd8+ Kxd8 14.Bc2 Ke7 15.Ng5 h6 16.Ne4 Nxe4 17.Bxe4

"What a really great virtuoso of the game of **chess** Senior Capablanca must have been, to have been able to inflict on his adversary - by means so simple and with such reduced material - these development troubles! A miniature type of art, but _art_ all the same."

SGT grabs some space on the King's-side, refusing the White Bishops space, and when White tries the same on the Queen's-side, he takes the chance to swap off Pawns and pieces.

17...f5 18.Bc2 g5 19.Re1 Kf6 20.b4 Bb6 21.Bb2 Rd8 22.Re2 a5 23.Rae1 axb4 24.Bb3 bxc3 25.Bxc3+ Bd4 26.Bxd4+ Rxd4 27.Bxe6

The White Rooks cannot be denied an entry to e7, but after that?

27...Rd6 28.Bb3 Bd7 29.Re7 Kg6 30.h3 Rf8 31.R1e2 h5 32.Bc2 g4 33.Kh2 Rc8 34.Bb3 Rf8 35.Bc2 Rc8 36.Bb3 Rf8 37.Bc2 1/2-1/2

Sergeant,E - **Tartakower**,S [B02] Hastings (6), 1945

"Once demobilised and returned to civilian life, what could a chessmaster of more than fifty-eight years of age do except... continue. "

"I tried to create for myself a new style which I may term 'neo-pragmatic', trying to obtain maximum effects from the reasoned co-ordination of all the four factors in **chess**: time, space, material and force." SGT

Tartakower was proud to win this tournament, the first to be held after the war.

1.e4 Nf6 2.e5 Nd5 3.c4 Nb6 4.c5 Nd5 5.Bc4 e6 6.Nc3 Nxc3 7.bxc3 d5 8.cxd6 cxd6 9.exd6 Bxd6 10.d4 0-0 11.Nf3 Qc7 12.Qd3 Nd7 13.0-0 b6 14.Bb3 Bb7 15.h3 e5 16.Ng5 Nf6 17.dxe5 Bxe5 18.Ba3 Rad8 19.Qc4 Bh2+ 20.Kh1 Qxc4 21.Bxc4 Bd6 22.Bxd6 Rxd6 23.Rad1

"...the endings procured for me many an additional half-point". White has weaknesses on the Queen's-side.

23...Rc6 24.Bb3 Rxc3 25.Rfe1 Rc7 26.Nxf7 Rxf7 27.Re7 Bd5 28.Bxd5 Nxd5 29.Rxf7 Rxf7 30.Rxd5 Rxf2 31.Rd8+ Rf8 32.Rd7 a5 33.Rb7 Rf6 34.Kh2 h5 35.Kg3 Kh7 36.Kh4 Kh6 37.g4 g5+ 38.Kg3 h4+ 39.Kg2 Kg6 40.a4 Re6 41.Kf2 Kf6 42.Kf3 Kg6 43.Kf2 Rc6 44.Ke3 Rc3+ 45.Kd4 Rxh3 46.Rxb6 + Kf7 47.Rb5 Rf3 48.Rxa5 Rf4+ 49.Ke5 h3 50.Ra7+ Kg6 51.Ra6+ Kg7 52.Rb6 Rxc4 53.Rb1 Rxa4 0-1

Thomas,G - **Tartakower**,S [C11] Hastings (2), 1945

1.e4 e6 2.d4 d5 3.Nc3 dxe4 4.Nxe4 Nf6 5.Bg5 Be7 6.Nxf6+ Bxf6 7.Bxf6 Qxf6 8.c3

0-0 9.Bd3 Nc6 10.Nf3 e5 11.dxe5 Nxe5 12.Nxe5 Qxe5+ 13.Qe2 Qxe2+ 14.Bxe2

Another "... additional half-point" is in the offing. I can imagine this game being given up as a draw here at our club, and in loftier arenas too.

14...Be6

Here is the first clue: White is not yet free to develop as he wishes.

15.O-O Rfd8 16.Rfd1 Rxd1+ 17.Bxd1 Rd8 18.Bf3! Kf8 19.b3 b6 20.Rd1 Rxd1+ 21.Bxd1 Ke7 22.Bc2 a5 23.a4?

Weakening. Leave your Pawns alone! [23.Kf1; 23.Bxh7?? g6]

23...Kd6 24.f3 Kc5 25.Kf2

White still looks solid enough, but Black can break through on the Queen's-side.

25...c6 26.Ke3 b5 27.axb5 cxb5 28.g4 Now the Ph7 is vulnerable.

28...h6 29.h4 Bd7 30.g5 hxg5 31.hxg5 a4 32.Kf4 a3 33.Bb1 b4

"Such victories, achieved by imperceptible means, show no surface brilliance, but are all the same rich in instruction". SGT **0-1**

Gruenfeld,E - Tartakower,S [D21] Semmering, 1926

1.d4 d5 2.c4 dxc4 3.Nf3 Bg4 4.Ne5 Bh5 5.Nxc4 e6 6.Qb3 Nc6 7.e3 Rb8 8.Nc3 Nf6 9.Be2 Bxe2 10.Nxe2 Bb4+ 11.Nc3 0-0 12.0-0 Nd5 13.Nxd5 Qxd5 14.Qc2 e5 15.Nxe5 Nxe5 16.dxe5 Qxe5 17.Bd2 Bxd2 18.Qxd2 Rfd8 19.Qc2 Rd5 20.Rad1 Rbd8 21.Rxd5 Rxd5 22.Rd1 g6 23.Rxd5 Qxd5

A delicate Queen ending has arisen. Black can count three advantages: the distant majority, the open file, and more active (centralised) Queen.

24.a3 c5 25.h3 b5 26.Qc3 c4 27.f4?! [27.f3! f5!] 27...Qe4! 28.Kf2

Black's manoeuvres are succeeding; White attempts a blockade.

28...a5!

The delicacy goes out of the position, and a more forceful phase supersedes.

**29.g4 [29.Qxa5 Qc2+ 30.Kf3 Qxb2-+] 29...h6 30.h4 Qh1 31.Kg3 Qg1+ 32.
Kf3 Qh2 33.g5 h5 34.Ke4 Qxh4 35.Qxa5 Qh1+ 36.Ke5 Qc6 37.Qa7 h4 38.
f5 gxf5 39.Kxf5 Qf3+ 40.Ke5 h3 41.Kd4 Qg4+ 0-1**

?

To:

| | |
|------|-----------------------------------|
| For: | Fri. 31 st March. 2000 |
|------|-----------------------------------|

The draw for the Quarter-finals of the English Counties championship is as follows: -

Open: Cornwall v Leicestershire.

Under-175: Devon v Sussex.

Under-150: Devon v Leicestershire or Herts.

Under-100: Devon v Cleveland or Warwickshire.

Matches will take place on Saturday 13th May, when Devon will have 3 teams playing at the Sea Mills Community Centre in Bristol.

Devon's Junior Championships were held in Exeter last weekend, sponsored by Exeter City Council.

Under 18s. 1st Sam Wingrove (Isca Juniors & Westexe Community College).

Under 15s. 1st Barnaby Stannard (Torquay Boys' G.S.)

Girls' Under 18s: 1st Sarah Al-Turki (Isca Juniors & Torbay Community College)

Under 11s: 1st Tom Marsden (Isca Juniors & Ipplepen Primary)

Under 9s: 1st = Amber Balkwill (Isca Juniors & Countess Wear Middle School)

Richard Marsden (Isca Juniors & Ipplepen Primary)

Jake Mendrik (Exmouth Juniors & St. Peter's School).

The event was organised by the Devon Junior Secretary, Dave Scott.

The Teignmouth Rapidplay takes place on 8th April at Trinity School. Contact Ray Chubb on 01626-888245 for details. Torbay-born International Master, Gary Lane,

To:

will be giving coaching sessions and a simultaneous display, the previous evening. This event is followed by the West of England Open Congress & Championships at the Royal Beacon Hotel, Exmouth, starting on Good Friday. For details, contact me on 01395-223340.

In last week's position, the Black rook on g7 was "overloaded", trying to defend two vital pawns. Therefore, White's rook can proceed to play Rxf7 with impunity, because of the threat of Qxh5+ and mate to follow. This week's problem is a Sam Loyd special from 1859. In spite of the material inequality, White can mate in 2, given the right 1st move.

|------|-----------------------------------|
| For: | Fri. 24 th March. 2000 |
|------|-----------------------------------|

The Evans Gambit, developed in 1827 by the doughty seaman, Capt. W. D. Evans, is a bold attempt by White to seize the initiative early at the cost of a pawn. It leads to very lively play, and 173 years later, we are no nearer a conclusion as to its basic soundness. The following example was played recently by the Scottish Junior International James Parkin in Devon's match against Hants.

White: J. Parkin. (Devon)

Black: W. Purkiss (Hants) [C52]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Ba5 6.d4 d6 7.Qb3 Qd7 8.0-0 Bb6 9. Bb5 Nf6 10.d5 Nxe4 11.Qc2 Nf6 12.dxc6 bxc6 13.Bd3 h6 14.Nbd2 0-0 15.Nc4 Qe6 16.Nxb6 axb6 17.Re1 c5 18.Nd2 d5 19.c4 e4 20.Bf1 Bb7 21.cxd5 Bxd5 22. Bb2 Rfe8 23.Bc4 c6 24.Qc3 Qg4 25.Re3 Re6 26.Rae1 Rae8 27.a4 Nh5 28.Be2 The black queen is now overloaded, trying to protect the knight *and* fend off mate on g7. The knight must fall leaving Black two pieces down. **1-0**

Devon's Under-11 team, under the leadership of Team Manager Tim Onions, started their annual bid for the National Championship recently with a small tournament for West of England teams. 1st were Somerset (45 1/2 pts) 2nd Devon (36 pts) 3rd Wiltshire (28 1/2 pts) 4th Glamorgan (10 pts). This was

followed by the EPSCA Zonal Tournament at Swindon, where Wiltshire did well, winning it with 41 pts., just half a point ahead of Hants. 3rd were Somerset (36 1/2 pts); 4th Bucks (32 1/2 pts) 5th Devon (27 pts) 6th Cornwall (20 pts).

Devon's Junior Championships start tomorrow at the John Stocker School, Exeter, sponsored by Exeter City Council. Late enquiries to the organiser, Dave Scott on 01392-437968

The solution to last week's problem was 1. Qb3! This week's position is from Chigorin - Caro 1898. Black has just played Rh7 to defend his g-pawn, but White's reply forces his immediate resignation anyway. What was that winning move?

|------|-----------------------------------|
| For: | Fri. 17 th March. 2000 |
|------|-----------------------------------|

It was a cracking weekend for county chess as both Devon and Cornwall won their final matches in the West of England stages of the Counties Competition. Cornwall even defaulted one board yet still managed to beat Somerset

101/2 - 51/2. Cornish winners were R. J. Grime, R. Sefton, N. Clifford, R. Woods, G. Lakeland, T. Manton, D. Lucas, A. Barkhuysen, and D. J. Cooke. This means Cornwall have won 3 of their 5 matches this season, their best performance in living memory. They now go on to meet Leicestershire in the Quarter-Finals of the National Stages.

Meanwhile, Devon were playing an unpredictable Hampshire side at Wincanton, but in the end they proved much too strong, the 1st team winning 9 - 6, with one game to be adjudicated, and the 2nd team registering an emphatic 13 - 3 scoreline. Devon's 1st Team winners were J. M. Parkin, J. F. Wheeler, P. Brooks, C. J. Bellers and D. Regis. Winners in the 2nd Team were I. S. Annetts,

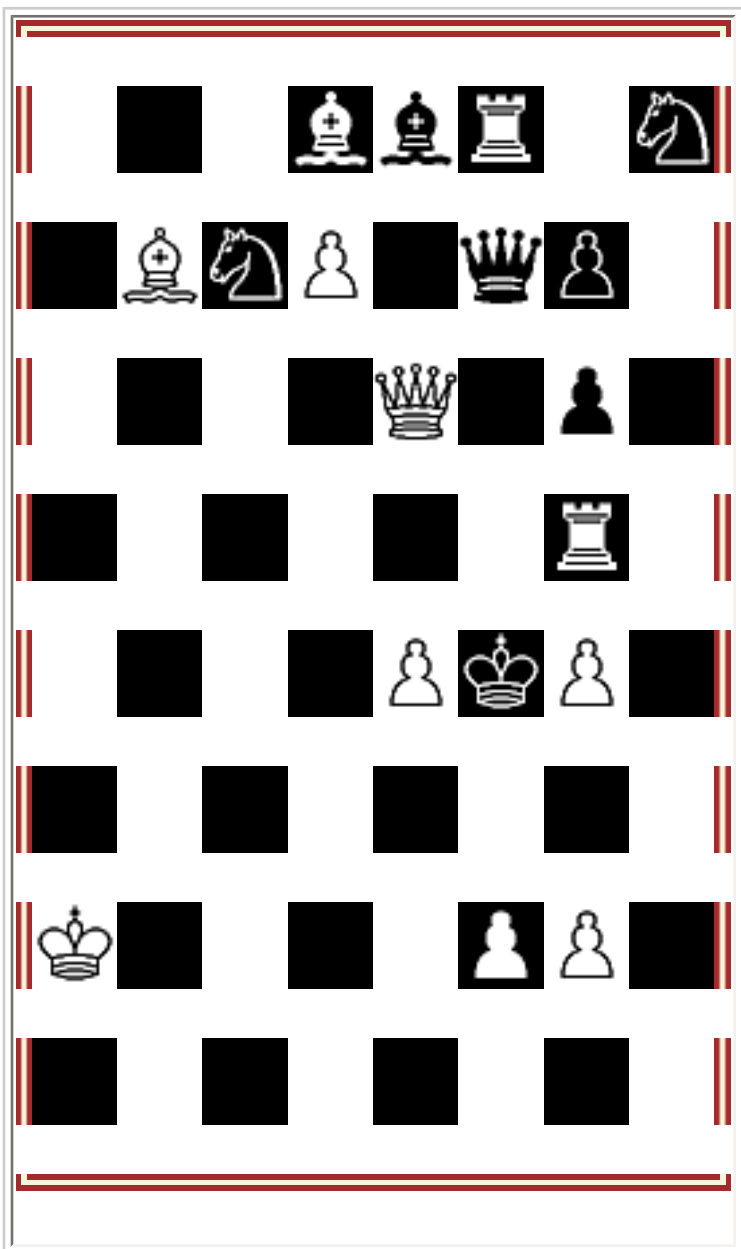

P. M. Rogers, W. J. Moffatt,

S. Pope, S. R. Boniface,

R. H. Jones, A. George, D. R. Rogers, D. J. Adams, K. Atkins, M. Stinton, W. A. Frost, & T. Stephenson. This means Devon have won all five of their matches, just as they did last season. For the Quarter-Finals they have entered 3 teams; an Under-175, an Under-150 and an Under-100 team. All 3 teams will play together at Bristol next month.

Devon's Junior Championships take place next weekend at John Stocker School, Exeter, the home of the Isca Junior Chess Club, when the Under-18, Under-15, Under-11 and Under-9 titles are all up for grabs. Brochures are out, but for more information contact the organiser Dave Scott, on 01392-437968. The event has been generously sponsored by Exeter City Council.

This week's problem is a 2-mover by the American R. E. Burger.

East Devon Chess Congress complete prize list

Bob Jones.

Premier Section

1st J. M. Parkin (Exeter Uni.) 5 pts.

2nd = C. V. Murray (Heywood) 4 1/2

R. A. James (Rugby)

Grading prize: (U165)

A.

B. W. Brusey (Teignmouth)

Major Section

1st M. Armitage (Bristol) 4 1/2 pts

2nd = M. W. Sapiecha (Paignton Palace)

D. M. Norman (Guildford)

Grading prize (U-135)

R. Eadie (Street) & G. Shepherd (Church Stretton)

Intermediate Section

1st T. J. Chapman (Guildford) 4 1/2

2nd = W. J. Kelly (Weymouth)

R. Turner (Bunham)

Grading prize (U-110)

J. Farrell (Metropolitan) & R. Morris-Weston (B.T. Reading)

Minor Section

1st N. Mills (Yeovil) 5 pts

2nd I. S. Mason (Teignmouth)

3rd T. Wonnacott (Exmouth)

Grading prize (U-85)

N. Went (Upminster) & Marian Warner (Ashtead).

Team prize : (highest combined score by 4 nominated players from same club)

1st Isca Juniors.

|------|----------------------------------|
| For: | Fri. 3 rd March. 2000 |
|------|----------------------------------|

Tonight sees the start of the 25th East Devon Congress at St. George's Hall in Exeter. It is a feature of the event that even in the top section, the Premier, there is an upper grade limit of 205. This eliminates the possibility of a lone, predatory Grandmaster coming in at the last minute to pick up the top prize of £200, and ensures that almost any of the top 20 players stands a chance of winning, and all the games are competitive. Last year, the event was set alight in Rd. 1 when one of the favourites lost to a relatively unknown newcomer. It was no fluke either, as Bruce Baer went on to take the 1st prize.

White: David Hodge.

Black: Bruce Baer. [B06]

Exeter Premier (1), 1999

1.e4 g6 2.d4 Bg7 3.Nc3 d6 4.Be3 c6 5.Qd2 Nd7 6.a4 Ngf6 7.Bc4 0-0 8.f3 d5 9.exd5 Nb6 10.Bb3 Nfxd5 11.Nxd5 cxd5 12.Ne2 Re8 13.0-0 a5 14.Rfd1 Bf5 15.Bf4 Rc8 16.g4 weakening the King's position. 16...Bd7 17.Qxa5 e6 18.Qd2 Nc4 19.Bxc4 dxc4 20.Nc3 Bc6 21.Ne4 Allowing White's pawns to be further weakened. 21...Bxe4 22.fxe4 c3 23.bxc3 Qh4 24.Rf1 Qxg4+ 25.Kh1 e5 26.dxe5 Bxe5 27.Qd1 Qxd1 28.Raxd1 Bxf4 29.Rxf4 Rxc3 A materially level double rook & pawn ending is

reached, the difference being that White's pawns are all isolated and easily picked off. 30.Rf2 Re7 31.Rd4 Re3 32.Rf4 Re2 33.c4 Ra2 34.c5 Rc7 35.Rd5 Rxa4 36.Kg2 Rc4 37.Rf2 Rxe4 38.Rb2 Kg7 39.Kf3 Rc4 40.Rb5 f5 41.Rb6 R4xc5 42.Rxc5 Rxc5 43.Rxb7+ Kh6 44.h4 Rc3+ 45.Kg2 Rc8 46.Rf7 Rg8 47.Kg3 Rg7 48.Rf6 Kh5 49.Ra6 Rc7 50.Ra4 Rc3+ 51.Kg2 Re3 52.Ra7 h6 53.Ra6 Re4 54.Ra5 Rxh4 Winning White's final pawn. White resigned 10 moves later.

Late entries or enquiries to Alan Maynard on 01363-773313

The solution to last week's problem was Ne6!

The great US master, Harry Pillsbury played at the very first congress ever held in Exeter - in 1902. Shortly before his visit to Exeter, he played at Monte Carlo and had the following position against Gunsberg. Materially level, so how did he force Black's resignation 3 moves later?

| | |
|------|---------------------------------|
| For: | Fri. 25 th Feb. 2000 |
|------|---------------------------------|

Cornish chess is certainly on a high this season, with the county team providing a stiff challenge for all their opponents in the WECU Championships. After wins against Hants and Wilts, they must fancy their chances in their last match, against Somerset at Exminster on 11th March.

The domestic activity is reflecting this bullish mood, with an increased entry in the annual CCA Championship Congress, held recently at Truro College. The Championship itself, the Emigrant Cup, was won by Andrew Greet, (St. Austell), although David Saqui had it within his grasp - he only had to win his last round game against Malcolm Pridmore to win the title on tie break, but it was not to be. The Falmouth Cup, (U-125) was won in super fashion by Christopher Reeves.

Cornwall runs 2 leagues. Div I is currently headed by Truro A (19 pts from 11 matches) ahead of Camborne A (15 pts from 11) while perhaps Penwith A (14 from 9) pose the greater threat.

Penwith B lead Div II with 16 pts from 10 matches, with Camborne B in 2nd place with 14 pts and two matches in hand.

The East Devon Congress starts next weekend. Late entries or enquiries to Alan Maynard on 01363-773313

White's sharpest continuation in last week's position was to sacrifice his rook by Rxf7, allowing the Queen to check decisively on e6.

This week's position is a traditional, though tricky, 2-mover.

|------|---------------------------------|
| For: | Fri. 18 th Feb. 2000 |
|------|---------------------------------|

The 15th South Hams Championship resulted in a 4-way tie between Bill Ingham (Teignmouth), Chris Collins (Paignton), Bill Moffat (Plymouth) and Ivor Annetts (Tiverton), all on 3/4 pts. The Grading Prize was won by the junior Daniel Spurling.

The first of Devon's local league championships was decided on Monday when Exmouth beat Isca Juniors, to win the Exeter & District League Div I with a 100% record, the first time they have done this for a number of years.

The next big event in the area is the 25th East Devon Congress to be held at St. George's Hall, Exeter, starting a fortnight today. Entry forms have been around for some time, but in case of difficulty, contact the Congress Secretary, Alan Maynard on 01363-773313.

The publishers, Gambit, have brought out 3 more titles to add to their already impressive list. They are Play The Open Games As Black by John Emms (224pp £15.99); The Botwinnik Semi-Slav by Steffan Pederson (224pp £14.99) and 101 Attacking Ideas In Chess by Joe Gallagher 128pp £12.99). In the latter, the writer devotes one page to each of his "ideas", each page having 3 diagrams on the left side and analysis on the right. The ideas don't seem to follow any logical

sequence, so a page on Tal's attacks might be followed by a page on the theme "Be Flexible" or "Sacrifices in the Sicilian". This makes it ideal for anyone wanting to pick up a book at odd moments, and yet still derive value from it.

The solution to last week's problem was 1. Qe7! This week's position is from actual play, and the challenge is to work out the 3-move combination that will destroy Black's position. Kolorov - Peev Plovdiv

|------|---------------------------------|
| For: | Fri. 11 th Feb. 2000 |
|------|---------------------------------|

Devon made few mistakes in their annual match against Cornwall at Saltash on Saturday, and won 10 - 6, to maintain their 100% record. Both teams were without certain key players, but Devon were able to

call on strong replacements, especially University students, Nick Lee and Jim Parkin. It was far from easy however, as 4 Cornishmen scored wins over much stronger opposition, and at the end, they were only two wins short of parity.

Full details (Devon names first)

- 1.
2. D. Hodge 1/2 - 1/2 J. Menadue;
- 3.
4. J. Parkin 1 - 0 D. Saqui;
- 5.
6. N. Frost 1 - 0 R. Grime.
- 7.

8. N. Lee 1/2 - 1/2 P. Williams;
9.

10. B. Hewson 0 - 1 R. Sefton;
11.

12. M. Cox 1 - 0 G. Trudeau;
13.

14. A. Brusey 1 - 0 S. Bartlett;
15.

16. J. Morrison 0 - 1 N. Clifford;
17.

18. P. Brooks 1/2 - 1/2 J. Hooker;
19.

20. P. Trussler 0 - 1 R. Woods;
21. J. Walker 1 - 0 G. Lakeland;

12. C. Bellers 1 - 0 C. Sellwood;

13. W. Ingham 0 - 1 D. Lucas;

14. M. Abbott 1 - 0 K. Brewer;

15. J. Gorodi 1 - 0 S. Lever;

16. A. Roderick 1/2 - 1/2 D. Cooke.

Jim Parkin has recently moved down to Exeter from Aberdeen, where he represented Scotland in the Glorney Cup. The quality of his play showed through in his game on Bd. 2

|------|--------------------------------|
| For: | Fri. 4 th Feb. 2000 |
|------|--------------------------------|

The message of Cornwall's excellent start to the season, in beating Hampshire and Wiltshire, was clearly not lost on Chris Ambrose, the Dorset captain, who assembled a strong team for their encounter at Exeter recently. A wise precaution too, as it turned out, for Cornwall were only just headed 9 - 7. However, this was another valiant Cornish performance, considering they were outgraded by between 20 - 30 points on every board, and their next opponents next Saturday, Devon, can take nothing for granted.

Cornish winners were D. Saqui, G. Lakeland, C. Sellwood and D. Lucas, while draws were secured by Messrs Grime, Trudeau, Bartlett, Hooker, Brewer and Manton (jr.)

David Lucas certainly wasn't overawed by the prospect of playing a West of England veteran, and played with great bravura.

White: David Lucas. (121)

Black: Frank Kingdon (151)

[A65]

1.d4 e6 2.c4 c5 3.d5 exd5 4.cxd5 d6 5.e4 Nf6 6.Nc3 Be7 7.Bd3 Nbd7 8.f4 a6 9.a4 Qc7 10.Nf3 0–0 11.0–0 Re8 12.b3 Bf8 13.Ra2 g6 14.Re2 Bg7 15.Qc2 Nb6 16.Nd1 Bg4 17.h3 Bxf3 18.Rxf3 Rac8 19.a5 Nbd7 20.Bd2 Re7 21.g4 Rce8 22.Nf2 Nxd5 23.g5 Qc8 24.Qc4 Nc7 25.Bc3 Bxc3 26.Qxc3 Nb5 27.Bxb5 axb5 28.Ng4 White leaves his e-pawn, knowing it shouldn't be taken - but Black overlooks the danger. **28... Rxe4?? 29.Nh6+** and Black resigned as everything has collapsed. Play might have continued 29...Kf8 30.Qh8+ Ke7 31.Rxe4+ Kd8 [31...Ne5 32.Qxh7 Kd8 33.fxe5 dxe5 34.Nxf7+] 32.Rxe8+ Kc7 33.Rxc8#

The solution to last week's position was R1c7, leaving the Black Knight on d4 helpless, in spite of its great mobility. Richard Nash, Barnstaple, was another correct solver of the Christmas problem.

This week's position is a 2-mover by W. L. Barclay (1960)

|------|---------------------------------|
| For: | Fri. 28 th Jan. 2000 |
|------|---------------------------------|

Devon's annual Inter-Area Jamboree was held on Saturday in Barnstaple. The home side, North Devon, responded by fielding a strong side that took the trophy by a clear point from the West team, based on the Plymouth Club. Faulty lines of communication in the south of the county meant that some important club games were arranged on the same day, and the East team was under par, while the South couldn't raise a side at all.

However, the club match that was played was a significant one - in the Bremridge Cup, Teignmouth bounced back from their loss to Exmouth to beat Tiverton. This breaks the 1st division wide open again, with Teignmouth and Tiverton each having won 2 of their 3 matches, while Exeter and Exmouth have both won 1 out of 3. Any of the 4 can still win Devon's top club trophy.

Sunday sees the 1st part of the South Hams Championship. Entry fee £5.50. Contact C. Peach on 01548-854485 or 856680.

In the Torbay League Div I Palace are the only club on 100% with 4 wins.

Vladimir Nabakov's creative solution to last week's problem was the device of "underpromotion". That is, White's b-pawn moves to the 8th rank, where instead of Queening, it becomes a Knight and poses slightly different threats. Very occasionally, this can arise in actual play, usually where the resulting Knight gives a check that keeps the initiative.

This week's position, by G. Heathcote, is an example of the "Knight Wheel", where the Black Knight can move to its maximum number of 8 squares to counter White threats, but the right key move will still mate on the 2nd move.

|------|---------------------------------|
| For: | Fri. 21 st Jan. 2000 |
|------|---------------------------------|

The annual county match between neighbours Devon and Somerset took place at Wellington School on Saturday, resulting in clear wins for Devon in both the 1st and 2nd team matches. Over the top 11 boards, the honours were shared 6 - 5 in Devon's favour, with only a Somerset default separating the sides, but from thereon down, Devon's greater strength-in-depth told, and they ran out winners 10- 6 in the 1st team and 11 1/2 - 4 1/2 in the 2nd

First to finish was Chris Bellers, whose game illustrated both the potency of the English Opening, and the dangers of allowing pieces to become trapped in a crowded centre when enemy pawns are shuffling forward.

White: C. J. Bellers.

Black J. N. Jepps [A24]

1.c4 Nf6 2.g3 g6 3.Bg2 Bg7 4.Nc3 0-0 5.e4 d6 6.Nge2 e5 7.0-0 c6 8.h3 Nbd7 9. d3 a5 10.Be3 Nc5 11.Qd2 Be6 12.f4 Qd7 Black is eyeing up the weak pawn on h3, but in doing so is leaving his bishop on e6 dangerously hemmed in. **13.fxe5 Ne8 14.Kh2 b6?** Losing the bishop. One way of countering the threat would have been 14...Rd8 and then after

15.d4 dx e the White Queen itself is vulnerable. **15.d4 Resigns** The bishop will indeed become trapped after d5 cxd cxd.

At least Somerset spoiled the unbeaten record of Michael Cox, who after 12 consecutive wins, had to concede a draw in his 13th game for his county.

Last week's "2-move" problem was even more complex than I led you to expect - it was a 3-mover! (Sorry) The key move, however, was

1. Qf7! This week's position (definitely a 2-mover) was composed by Vladimir Nabokov, author of Lolita and other celebrated novels. So be prepared for a creative solution.

|------|---------------------------------|
| For: | Fri. 14 th Jan. 2000 |
|------|---------------------------------|

The attention of the chess world in early January is usually drawn to Hastings, the oldest established chess event in the world. First held in 1895, when the winner of a super-strong tournament was the rank outsider, the American Harry Nelson Pillsbury, Hastings has now taken place in 3 different centuries.

Running alongside the Premier Section has been the World Amateur Championship - "amateur" in this context meaning no players with a FIDE title or rating. The main local interest here was the achievement of Tiverton schoolboy, Nick Frost, in coming 1st =, level on 7/9 pts with Sven Muhlenhaus (Germany) and V. Kachatkov (Belarus). Unfortunately for Nick, the title went to the German on tie-break, while he was presented with a bronze medal and the Harry Baines Trophy for the highest score by a UK player. However, he is hoping that the world chess ruling body will award him the title of FIDE Master, in recognition of his achievement.

Nick, just 16, is a member of the Tiverton Chess Club and a pupil at Exeter School, where he is studying 4 A levels in the hope of going on to university to read Law.

Bremridge Cup Rd. 3 results:

Tiverton 3 1/2 Exeter 2 1/2

Teignmouth 1 Exmouth 5

The solution to the two Christmas problems were 1. Qf3, while the Pike/Howard composition was solved by 1. Nb5

Among those who correctly solved both problems were Ken Bloodworth, our former columnist, and John Dunleavy of Kingsbridge, who receives the book prize put up by Keveler Chess Books.

The solution to last week's problem was 1. Be4! Several readers sent in the correct solution to that as well, though this was not part of the competition. These included

R. I. Greenfield (Penzance) and

A. G. Pike (Tiverton).

This week's position is a complex

2-mover by C. Sammelius (1955)

|------|--------------------------------|
| For: | Fri. 7 th Jan. 2000 |
|------|--------------------------------|

The attention of the chess world in the 1st week of January is usually drawn to Hastings, the oldest established chess event in the world. First held in 1895, when the winner of a super-strong tournament was the rank outsider, the American Harry Nelson Pillsbury, Hastings has now taken place in 3 different centuries.

Soon after his victory, Pillsbury developed strong contacts with Devon, and attended the new DCCA's first two AGMs in 1902 & 03, where he was the star attraction, giving several simultaneous displays, mostly blindfold. But more of him another time.

The line-up in this year's Hastings, the 75th, is not quite so exotic, but still extremely strong. The Premier, a 10 man all-play-all, consists of Dreev (Russia), Sokolov (Bosnia), Sutovsky (Israel), Bischoff, (Germany), Irina Krush (US) and the 'Anglos' Jon Speelman, John Emms, Bogdan Lalic, Murray Chandler and Luke McShane, with the school pupils Krush and McShane looking for GM norms.

Even the Challengers Section has 8 GMs vying for 1st place and an automatic place in next year's Premier. These include Plaskett, Hebden, Arkell and McDonald. So even the Challengers will be no place for the feint-hearted - competition will be fierce indeed.

The solutions to the 2 Christmas problems will be given next week. There is still time to send solutions in to the paper marked "f.a.o. Julie Chapman". Closing date Tues. 11th Jan.

Meanwhile, here is an early Mansfield position from 1917, when he was still a lad in Witheridge.

White to mate in two.

|------|---------------------------------|
| For: | Fri. 31 st Dec. 1999 |
|------|---------------------------------|

On this last day of the 2nd Millennium, it is difficult to know whether to look back and reflect or look forward and anticipate - this is why the two-faced Roman god Janus could do both at the same time.

100 years ago today, the good folk of Devon were busy planning the creation of a new association to foster the development of chess within the county. This came about the following year, and it is gratifying to know that the DCCA has survived the whole of the 20th century unscathed and is preparing to enter the 21st, trying to adapt to inevitable changes in life style that affect playing habits. Chess folk, by and large, both players and organisers, have embraced the computer age with open arms. The computer and its access to the internet, for example, makes world-wide chess immediately available to anyone from the comfort of their fireside laptop. Hence it's becoming increasingly difficult to get people to attend their local club, let alone drive 200 miles on a Saturday afternoon to represent their county. This is one of the issues the Devon & Cornwall Associations need to address if they are to meet the challenges the new millennium will inevitably bring.

The 20th century has seen Britain's strongest-ever player, Michael Adams, emerge from Truro School, and after honing his skills on the local westcountry congress circuit, come so close to becoming World Champion finalist. Next, we are looking for him to get the chance for another tilt at the ultimate title. And after that, who will be the westcountry's next Michael Adams? Is he or she already playing in some rural primary school team?

Results to hand from the Devon Leagues are as follows:

Div 2 (Mamhead)

Teignmouth 2 Tiverton 2

Div 3 (Schofield)

Tiverton 2 1/2 Exeter 1 1/2

Div 4 (Moyle)

Teignmouth 1 1/2 Isca Juniors 2 1/2

Rapidplay (Newman)

Exchange 4 1/2 Tiverton 3 1/2: Exeter 2 1/2 Exchange 5 1/2.

What better to keep the brain ticking over during that lull between the strains of Christmas and the mother of all New Years, than to have a go at solving these two problems. Both involve WMN readers.

The first is taken from Stage 2 of the British Problem Solving Championship, in which reader Jon Lawrence of Paignton has just heard that he has again reached the Final, to be held at Oakham School in February. This is one of the eight that he, and others, had to solve correctly. White to move and mate in 2.

We wish him well in the Finals.

The second position is a joint composition by readers Arthur Pike of Tiverton and David Howard of Somerset, composed especially for today's column - a world first! Again, White has to mate on his 2nd move.

Anyone submitting both correct solutions will get an honourable mention, and the

1st one opened will receive an appropriate book prize donated by Keverel Chess Books.

The solution to last week's problem, much admired by Mansfield, was

1. Rd7!

|------|---------------------------------|
| For: | Fri. 17 th Dec. 1999 |
|------|---------------------------------|

The end of the year usually generates a look-back at what good chess books have been published during the previous 12 months. The BCF decided that "Secrets of Modern Chess Strategy - Advances Since Nimzowitsch" by John Watson was their Book of the Year: (Gambit 272pp £19.99). The author looks at Nimzowitch's My System, surely one of the Chess Books of the Century, and refines and develops some of his ideas on middle game play, in the light of the 70+ years experience since its original publication.

Game collections are always popular, and the indefatigable John Nunn brought out 101 Brilliant Chess Miniatures (Gambit 176pp £13.99). A common enough theme in chess publishing, but this book has an unusual format with well-placed diagrams that permit the reader to follow the game without necessarily having to set up a board and pieces, making it easy to dip into for a few minutes at a time.

In the Devon Knockout Cup, the Rooke Memorial, Tiverton squeezed past Exmouth 5 - 3, with 6 draws and wins to S. Thorpe-Tracey and J. Reardon.

In last week's position, Qxf7 is met by 2. Qg3+ Kf6 (forced) 3. Bg5+ Ke6 4. Qb3+ and the Black Queen drops. To an optimist, 2 pieces for a Queen is not necessarily a resigning matter, but the resulting position is such that mate is almost inevitable.

This week's problem was described by Mansfield himself as "perhaps the most beautiful 2-mover", with a truly elegant solution. A. Ellerman 1925

I wrote last week of the inestimable value of a good county captain, and Cornwall's Anton Barkhuysen is undoubtedly one of this increasingly rare breed. His team pulled off an unexpected win against Wiltshire in Rd 1 of the WECU Championships, perhaps giving out a warning to their next opponents, Hampshire, that Cornwall should not be taken too lightly this year. It went unheeded, however, as Hampshire turned out a team no stronger on paper than Cornwall, and defaulted the bottom two boards to boot. The Cornish need no further encouragement these days, and routed them 10 - 6, with wins from R. S. Sefton, Craig Fearn, Gary Trudeau, Richard Woods and Colin Sellwood. If any reader can recall when Cornwall last won their first two matches of the season, please let myself or Ian George know the year, as it's probably before our time.

Simon Bartlett (Bodmin) won the Kingsbridge Rapidplay tournament on Sunday.

Devon's 1st Division, the Bremridge Cup, is a 4 team, double-round affair between Tiverton, Teignmouth, Exeter and Exmouth. This is the latter's first venture into this exalted company, and it is proving difficult for them. On Saturday, they outgraded Exeter on every board, took a 1 1/2 - 1/2 lead with promising positions in three other games. For example, they had the option of going two pieces up in this position. Should Black take the proffered Knight, and what may happen if he does? Play it through - feel the pain!

White: Exeter Black: Exmouth (to play)

The moment this decision was made, fatally incorrectly, the whole match was turned on its head and Exeter won 4 - 2.

In last week's position Norwood lost to 1. d6+! Kh8 2. Ne7! whereupon he resigned.

Devon County Chess Association: Press Release

Western Morning News

Fri. 26th Nov. 1999

Correspondent: Bob Jones

The local weekend congress scene is supported by a core of grass-roots regulars, whose names and faces are familiar to the organisers. Occasionally, however, an unexpected visitor appears, like an exotic migrant bird, blown off-course. This happened at the Torbay Congress, recently, when the US Master, James T. Sherwin, played in the Open. In his heyday, 40 years ago, he played all the legendary names of US chess, Bobby Fischer, Sammy Reshevsky, Larry Evans, Benko, Rossolimo and the Byrne brothers, to name but a few. Because he was active at a time when the young Fischer stole all the headlines, he is an underrated, almost forgotten figure. Yet his record of coming 3rd four times and fourth three times in the US Championships in such company, speaks for itself.

A confirmed Anglophile and recently retired to a westcountry village, after a career in international finance, he is getting back to active play, but not finding it easy. At Torquay, he found it a struggle to find winning ways, and by Round 5, facing David Saqui of Penwith, was just hoping for a respectable score.

White: David Saqui

Black: James T. Sherwin [A48]

Introduction

The repertoires below offer you three ways of playing against most of the semi-open defences, and also tell you what to do against some of the less common lines after 1. e4 e5 2. Nf3.

The three approaches are:

- **Fast attacking game with pieces**
- **Slower attacking game with f4**
- **King's Indian Attack with g3**

Which you choose will depend on what sort of player you are. It may also depend on what you hope to play after 1. e4 e5.

Fast attacking game with pieces

- Giuoco Piano (my main recommendation for junior players) or
- Scotch Game

Slower attacking game with f4

- Vienna Gambit or
- King's Gambit)

King's Indian Attack with g3

- KIA with 1. e4 e5 2. Nf3 Nc6 3. g3 or
- in the Vienna 1. e4 e5 2. Nc3 Nc6 3. g3

Sadly, the KIA lines have no real force and are not good lines to adopt against 1...e5. But the point is, how well does your chosen repertoire fit together? Once I used to play the following lines, together with the King's Gambit:

Alekhine

Chase variation

1. e4 Nf6

1. e4 Nf6 2. e5 Nd5 3. c4 Nb6 4. c5 Nd5 5. Bc4 e6 6. Nc3

Caro-Kann

Panov-Botvinnik Attack

1. e4 c6

1. e4 c6 2. d4 d5 3. exd5 cxd5 4. c4

French

Advance Variation

1. e4 e6

1. e4 e6 2. d4 d5 3. e5

Pirc/Modern

King's Indian Attack

1. e4 ...d6/...g6

1. e4 d6 2. d4 Nf6 3. Nc3 g6 4. Nge2 and 5. g3, 6. Bg2

Sicilian

Chamaeleon Variation

1. e4 c5

1. e4 c5 2. Nc3 ... 3. Nge2

This was an awful lot to keep track of, but more importantly, it didn't really combine well. Against the Alekhine I played fast, against the Caro I played medium, against the French and Pirc I played slow; the Panov line is main-line established theory with lots to learn and keep track of, the Chamaeleon is a new and obscure line where you have to think at the board.

Now, I'm sure a better idea, and the right idea, is to play similarly against each opening. For example, if you like gambits and play the Danish Gambit against 1...e5, try and find a gambit against the lot....

Alekhine 1. e4 Nf6

1. e4 Nf6 2. Bc4 Nxe4 3. Bxf7+ Kxf7 4. Qh5+ g6 5. Qd5+

Caro-Kann 1. e4 c6

Fantasie Variation

1. e4 c6 2. d4 d5 3. f3 e5 4. Nf3 exd4 5. Bc4

French 1. e4 e6

Advance Variation, Milner Barry Gambit

1. e4 e6 2. d4 d5 3. e5 c5 4. c3 Nc6 5. Nf3 Qb6 6. Bd3

Pirc/Modern

I don't know any gambits for White in the Pirc but against the Modern you can try... the Monkey's Bum!

1. e4 ...d6/...g6

1. e4 g6 2. Bc4 d6 3. Qf3 Nf6 4. d4 e5 5. Nh3

Sicilian 1. e4 c5

Morra Gambit: 1. e4 c5 2. d4 cxd4 3. c3 dxc3 4. Nxc3 or 3. ... Nf6 4. e5 Nd5
5. Bc4 Qc7 6. Qe2

I think neither the Alekhine line nor the Monkey's Bum are really any good, but at least we're thinking along the right lines, even if this isn't the repertoire we settle on.

Here's a repertoire based on pawn advances and space advantages:

Alekhine 1. e4 Nf6

Four pawns variation 1. e4 Nf6 2. e5 Nd5 3. c4 Nb6 4. d4 d6 5. f4

Caro-Kann 1. e4 c6

Advance Variation 1. e4 c6 2. d4 d5 3. e5

French 1. e4 e6

Advance Variation 1. e4 e6 2. d4 d5 3. e5

Pirc/Modern

Three Pawns Attack 1. e4 d6 2. d4 Nf6 3. c3 g6 4. f4

1. e4 ...d6/...g6

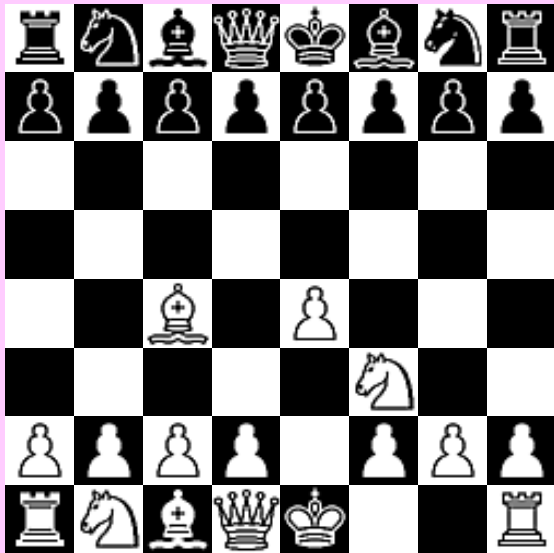

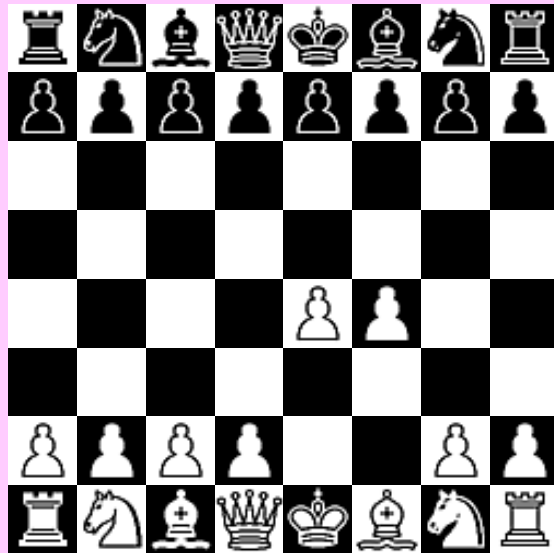

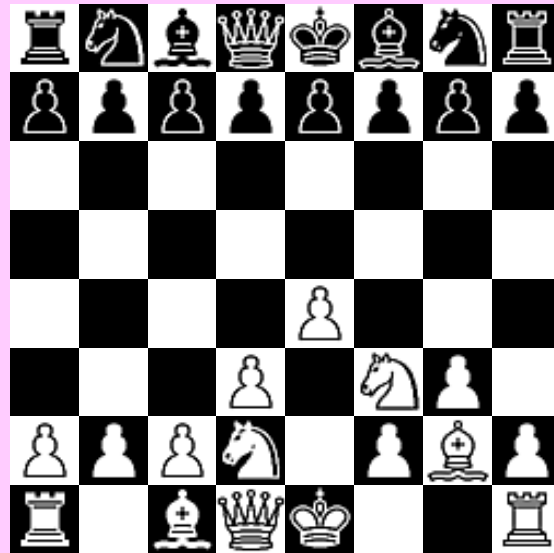

Sicilian 1. e4 c5

Big Clamp Variation 1. e4 c5 2. d3 (...) 3. f4

Now, what sort of player are you? Whether you like lively piece attacks, slow pawn advances that you can use to force open lines or more flexible systems, there is a repertoire here for you.

Let's have a look at some variations that fit together.

| | | | |
|---------|--------------|---------------------|----------------------|
| Defence | Piece attack | Slow attack with f4 | King's Indian Attack |
|---------|--------------|---------------------|----------------------|

| | | | |
|----------------------------------|---|--|--|
| |  |  |  |
| <p>Alekhine</p> <p>1. e4 Nf6</p> | <p>1. e4 Nf6 2. Nc3 d5 3. exd5 Nxd5 4. Bc4</p> | <p>1. e4 Nf6 2. d3 and 3. f4 (sadly, this line has no real force and is not a very good line to adopt)</p> | <p>1. e4 Nf6 2. d3 and 3. g3/Bg2 (sadly, this line has no real force and is not a very good line to adopt)</p> |
| <p>Caro-Kann</p> <p>1. e4 c6</p> | <p>1. e4 c6 2. d4 d5 3. Nc3 dxe4 4. Nxe4 Bf5 5. Ng3 Bg6 6. h4 h6 7. Nh3 (Main line with 7. Nh3)</p> | <p>1. e4 c6 2. Nc3 d5 3. f4 (a line of the Dunst opening, 1. Nc3)</p> | <p>1. e4 c6 2. d3 d5 3. Nd2 (KIA vs. Alekhine)</p> |

Variation) | 1. e4 c5 2. f4 (Grand Prix Attack) or

1. e4 c5 2. Nc3 Nc6 3. g3 with 4.
Bg2, 5. d3, 6. f4 (Closed Variation) | 1. e4 c5 2. Nf3 and 3.g3 (KIA vs.
Sicilian) |

I simply haven't the courage to take on a repertoire which includes the Open Sicilian, and my experience of playing the Black side of the Sicilian is that not many White club players have either! So I'll leave those lines to you and any time you have to do your own research. I have a feeling it's something you come to study as your chess improves. Analysis and Games

I'll go through each approach in turn, looking at a system to play against each defence.

I'll concentrate more on the example games than the theory, and more on the 'piece attack' lines than the others, because I think that's what you should be playing.

A. Piece attacks against the common half-open defences

In each of these lines White has a straightforward plan of campaign:

- rapid development
- keep Black passive
- keep lines open if you can

- keep an eye out for lightning raids

A1. Piece attacks vs. Alekhine 1. e4 Nf6: 1. e4 Nf6 2. Nc3 d5 3. exd5 Nxd5 4. Bc4

This is not a particularly well-regarded line for White - that is, it is not considered to be a good way to try for advantage at GM level. But it gives you game where you don't have to learn much sharp theory and you are playing the sort of game you like. It has also been responsible for some amusing miniatures:

Ourmet,J - Cierniak,P (1) Paris, 1989

1. e4 d5 2. exd5 Nf6 3. Nc3 Nxd5 4. Bc4 Nxc3 5. Qf3 e6 6. Qxc3 Nc6 7. Nf3 b6

8. Bb5 1-0

and

Iskov,G - Woge Nielsen,J, it, Kobenhavn, 1989

1. e4 Nf6 2. Nc3 d5 3. e5 d4 4. Nce2 Ne4 5. c3 c5 6. d3 1-0

You must be prepared, after 1. e4 Nf6 2. Nc3, to play the Vienna or other opening after 2...e5.

After 2...d5 3. exd5 Nxd5 4. Bc4 Black has a choice of moving the knight (4...Nb6, 4...Nxc3) or finding some way to defend it (4...c6, 4...e6):

Avoiding with 4...Nb6

White's next is easy to find.

5. Bb3 c5

[5... Nc6 6. Qf3 e6 7. Nge2 Be7 8. d3 O-O 9. Bf4 Na5 10. Qg3 Bd6 11. Ne4 Nxb3 12. axb3 Bxf4 13. Nxf4

+ = Tietze-Neumann, corr; the Knights are nicely placed]

6. Qh5 e6 7. d3 Nc6 8. Bg5 +=

[This is the best move, but an example with 8. Nf3 went 8...Be7 9. Ng5 g6 10. Qh6 Bf8 11. Qh3 Bg7 12. Nge4 Nd5 13. Bh6 e5

White plays a likely-looking Queen sacrifice.

14. Bxg7 Bxh3 15. Nxd5 Qa5+ 16. Kf1 O-O-O 17. Bxh8 Rxh8 18. gxh3

Visser-Spanjaard 1948; White is better, as the Black pieces can't get going]

]

Avoiding with 4... Nxc3

White has a cunning reply to this move.

5. Qf3 e6 6. Qxc3

6... Qg5 7. Nf3

[7. Kf1 +=]

7... Qxg2 8. Rg1 Qh3

]

White has compensation for the sacrificed pawn.

Defending with 4... c6

Again, the Qf3 move is strong; Black is obliged to lock in the Bc8.

5. Qf3 Be6 6. Nge2 Nc7 7. Bxe6 Nxe6 8. d4

[8. d3 += is good enough]

8... Nxd4 9. Nxd4 Qxd4 10. Be3 Qb4 11. O-O-O e5 ?

[11... e6]

12. Qf5 f6 13. Ne4 Be7 14. Qe6

+ - Potengowski-Kerckhoff, 1930; White has a clear advantage]

Defending with 4... e6

White places his pieces as actively as possible.

5. Qf3 Nb4 ?! 6. Bb3 N8c6 7. Nge2 Be7 8. a3 Ne5 9. Qg3 Nbc6 10. d4

+/- Bellon-Alburt 1978]

White is better placed.

Example games A1

Karaklajic,N - Marjanovic,Z (3) Pula, 1990 [B02]

1. e4 Nf6 2. Nc3 d5 3. exd5 Nxd5 4. Bc4 Nb6 5. Bb3 c5 6. Qh5

Again, White tries to get Black to play ...e6; Black resists.

6... c4 7. Bxc4 Nxc4 8. Qb5+ Nc6 9. Qxc4 Qd4 10. Qxd4 Nxd4 11. Kd1

White is a pawn up and just needs to survive the next few moves to reach a winning endgame.

11... Bf5 12. d3 O-O-O 13. Be3 e5 14. Nge2 Bc5 15. Re1 Nxe2 16. Kxe2 Bxe3 17. Kxe3 Rhe8 18. f3 h5 19. a4 g5 20. h3 g4 21. hxg4 hxg4 22. f4 Rd4 23. fxe5 Rxe5+ 24. Kd2 1-0

Lendwai - Neckar,L, Nova-Park/SW,2,21, 1989 [B02]

1. e4 Nf6 2. Nc3 d5 3. exd5 Nxd5 4. Bc4 e6 5. Nf3 Be7 6. O-O O-O 7. Re1 Nb6 8. Bb3 c5 9. d3 Nc6 10. a3 Nd5 11. Ne4 b6 12. Qe2 Qc7

Neat Knights!

13. Bd2 Nf4 14. Qe3 Nd5 15. Qe2 h6 16. Ng3 Nf6 17. Bc3 Bb7 18. h4

An adventurous pawn

18...Rad8 19. Ng5 hxg5 20. hxg5 Nd5 21. g6 Nf4 22. gxf7+ Rxf7 23. Qg4 Nd4 24. Bxd4 Rxd4

Now an enterprising sacrifice to expose the Black King. White can regain the exchange with Bb3xe6 xf7 but hopes for more.

25. Rxe6 Nxe6 26. Qxe6 Qf4 27. Nf5 c4 28. Nxe7+ Kh7 29. Qg6+ Kh8 30. Qh5+ Qh6 31. Qxf7 Rd8 32. Bxc4 1-0

Madl,I - Guadalpi,D (1) Val-Thorens, 1989 [B02]

1. e4 d5 2. exd5 Nf6 3. Nc3 Nxd5 4. Bc4 Nxc3 5. bxc3 g6 6. Qf3 e6 7. Ne2 Bg7 8. Ba3 Nc6 9. d4 Ne7 10. O-O O-O 11. Ng3 Re8 12. Rfe1 Rb8

White has good chances for an attack.

13. Ne4 Nf5 14. Rad1 b5 15. Bd3 a5 16. Bc1 Bb7 17. Qe2 Bxe4 18. Bxe4 Qe7 19. Bxf5 gxf5 20. Rd3 b4 21. Rg3 Kh8 22. Qh5 Qf8 23. Bf4 Rb7

Black undoubtedly missed White's idea when considering his last few moves.

24. Rxd7 1-0

Weiss,M - Shields,P (5), Chicago, 1989 [B02]

1. e4 Nf6 2. Nc3 d5 3. exd5 Nxd5 4. Bc4 e6 5. Qf3 Nxc3 6. Qxc3 Nc6 7. Nf3 Qd6 8. a3 Bd7 9. O-O O-O-O

Black skips to the Queen's-side

10. d4 Be7 11. Be3 Bf6 12. Rad1 Ne7 13. Ne5 Be8 14. Bf4 Nf5 15. Ng6 e5

This central break is the right sort of idea for Black, but goes very wrong here.

16. dxe5 Qxd1 17. exf6 Bc6 18. Qe5 Rd7 19. Rxd1 Rxd1+ 20. Bf1 Nd6 21. Nxh8 Bb5 22. Qxb5 Nxb5 23. fxg7 1-0

I have spent quite a while on the Alekhine's, not because it's a very common line but

- you won't find much on the Bc4 plan in the books

- the White plan is exactly what you should be doing in all the recommended lines below.

A2. Piece attacks vs. Caro-Kann Defence

All the main lines in the books continue:

1. e4 c6 2. d4 d5

and now

3. Nc3 dxe4 4. Nxe4

You may find players who will try and gum the whole position up with 3...g6. tempting 4. e5. You can play 4. h3 but the resulting positions are rather dull If you don't like that idea, try instead

3. Nd2

when 3...g6 can be met by 4. c3, keeping the tension in the centre, and

3...dxe4 4. Nxe4

gives us the starting position from the books.

Black has tried 3...Nf6 e.g.

Tal-Campomanes, Leipzig Olympiad 1960 [B15]

1. e4 c6 2. d4 d5 3. Nc3 Nf6 4. e5 Nfd7 5. e6 fxe6 6. Bd3 Nf6 7. Nf3 g6 8. h4 c5 9. dxc5 Nc6 10. Qe2 Bg7 11. Bd2 Qc7 12. O-O-O e5 13. Bg5 Be6 14. Nb5 Qb8 15. h5 gxh5 16. Nfd4 Bg4 17. f3 e4 18. fxxg4 Nxd4 19. Nxd4 exd3 20. Rxd3 Ne4 21. Nf5 Qe5 22. Nxxg7+ Qxxg7 23. Rxd5 Nxxg5 24. Qb5+ Kf7 25. Rf1+ Kg6 26. Qd3+ Kh6 27. Rh1 1-0

A2.1 Solid line with 4... Nd7

White places his pieces actively in the hope of forcing ...e6 before the Bc8 escapes.

5. Bc4 Ngf6 6. Ng5 e6 7. Qe2 Nb6

[7... h6 8. Nxf7 Kxf7 9. Qxe6+ Kg6 10. Bd3+ Kh5 11. Qh3#]

8. Bd3 h6

[8... Qxd4 is too dangerous:

9. N1f3

idea Ne5,Ng5xf7

9... Bb4+ 10. c3 Bxc3+ 11. Kf1 Qc5 12. bxc3 Qxc3 13. Bb2 Qa5

White has great play for the pawn]

9. N5f3 c5 10. dxc5 Bxc5 11. Ne5 Nbd7 12. Ng3 O-O 13. Bd2 Nxe5 14. Nxe5 Bd4

[14... Qd5 15. O-O-O Qxa2 16. c3]

15. O-O-O Qd5 16. f4 Qxa2 17. c3 Bc5 18. g4 Nd5 19. g5 Qa1+ 20. Bb1 g6 21. gxh6 b5 22. Qd3 Ba3 23. Qc2 Bb7 24. Rhg1 Rfc8

Ripe for picking, I'd say.

25. Rxc6+ Kf8 26. h7 Ke7 27. Rg7 b4

[27... Rf8 28. Ng6+ Kf6 29. Nxf8 Kxc7 30. h8=Q+ Kxh8 31. Qh7#]

28. Rxf7+ Kd6 29. Rd7+ Kc5 30. Rxb7 1-0

Kirpichnikov-Lein, 1974]

A2.2. Lines with 4... Nf6

5. Nxf6+

...and Black has a choice of captures.

A2.2.1 Tartakower Variation, 5... exf6

This is a dull line for Black. The most straightforward attacking line against it is

6. c3 Bd6 7. Bd3 O-O 8. Ne2 Re8 9. Qc2 g6 10. h4

See example games.

A2.2.2 Bronstein-Larsen line, 5...gxf6

This is the more dynamic line; Black hopes to make good use of the half-open files.

6. Nf3 Bg4

[6... Bf5

is the normal-looking move, but it isn't very good here e.g.

7. Bd3 Bg6 8. O-O Qc7 9. c4 Nd7 10. d5 O-O-O 11. Be3 e5 12. Be2 Kb8

[12... c5 13. Nh4]

13. Rc1 f5 14. c5

14... cxd5 15. c6 bxc6 16. Bb5]

7. Be2 Qc7 8. h3 Bh5 9. O-O Nd7

[9... e6 is better, but White should still get a good attacking game after 10. c4 Nd7 11. d5 O-O-O]

10. d5 Rd8 11. c4 Nb6 12. Be3 Bxf3

[12... cxd5 13. cxd5 Nxd5

[13... Rxd5 14. Bxb6 Rxd1 15. Bxc7]

14. Bb5+]

13. Bxb6 axb6 14. Bxf3 cxd5 15. cxd5 Bh6 16. Qa4+ Kf8 +/- Smyslov-Pachman 1964]

A2.3 Classical Variation with 4...Bf5

Now play:

5. Ng3 Bg6 6. h4 h6 7. Nh3

This is the most exciting line. The main line goes something like:

7. Nf3 Nd7 8. h5 Bh7 9. Bd3 Bxd3 10. Qxd3 Qc7 11. Bd2 e6 12. O-O-O Ngf6 13. Qe2 O-O-O 14. Ne5

...when White has a small advantage which is difficult to make any use of.

7... Nf6 8. Nf4 Bh7 9. Bc4 e6 10. O-O Bd6

Now we see the point of the Nf4 move:

11. Nxe6 fxe6 12. Bxe6

White has good chances for attack, although if the attack fails, the missing piece will lose the game.

12... Qc7 13. Re1

[13. Nh5 may be better]

13... Nbd7 14. Bg8+ Kf8 15. Bxh7 Rxh7

and Black is holding on.

Example games A2

Kavalek-Andersson 1978

1. e4 c6 2. d4 d5 3. Nd2

Kavalek actually played 3. Nc3

3...dxe4 4. Nxe4 Nf6 5. Nxf6+ exf6 6.c3 Bd6 7. Bd3 O-O 8. Ne2 Re8 9. Qc2 g6 10. h4 Nd7 11. h5 Nf8 12. Bh6 Qc7 13. O-O-O Be6

[13... b5 14. Rh4]

14. c4 Rad8 15. hxg6 fxg6 16. c5 Be7 17. Nf4 Bf7 18. Bc4

The Bf7 must be exchanged.

18... Rd5

[18... Bxc4 19. Qxc4+ Kh8 20. Qf7 Bd6 21. Bg7#]

19. Rde1 Red8 20. Bxd5 cxd5 21. Re3 Rd7 22. Rhe1 g5

else Qe2 and Re8+

23. Bxf8 Bxf8 24. Rh1 h6 25. Ng6 Bxc5 26. Rc3 Bd6 27. Rxh6 Kg7 28. Nf8 Kxf8

[28... Bg8 29. Nxd7]

29. Rh8+ Ke7 30. Qe2+ Be6 31. Rh7+

White, who has conducted the attack with great accuracy, finds an equally crisp finish.

1-0

[31... Kf8 32. Rxc7 Bxc7 33. Qxe6 Rxh7 34. Qc8+]

[31... Kd8 32. Qxe6 Rxh7 33. Qg8+]

De Armas,A - Jensen,C (7) Novi, 1990 [B18]

1. e4 c6 2. d4 d5 3. Nd2 dxe4 4. Nxe4 Bf5 5. Ng3 Bg6 6. h4 h5 7. N1e2 e6 8. Nf4 Ne7 9. c3 Nd7 10. Nxg6 Nxg6 11. Nxh5 Nxh4 12. g3

The open h-file looks dangerous for both sides, but Black must retreat.

12... Ng6 13. Bd3 Rh7 14. Qc2

Suddenly, White looks much the better.

14... f5 15. Qb3 Ne7 16. Qxe6 g6 17. Bg5 Qa5 18. O-O-O

White is looking very good!

18... Rxh5

[18... gxh5 19. Rde1 O-O-O 20. Re5 Qa4 21. Bxf5 Rg7

19. Bxe7 Qd5 20. Qxg6+ Kxe7 21. Rxh5

Enough! 1-0

Haas,C - Trachsel, Arosa, 1990 [B18]

1. e4 c6 2. d4 d5 3. Nc3 dxe4 4. Nxe4 Bf5 5. Ng3 Bg6 6. h4 h6 7. Nh3 Nf6 8. Nf4 Bh7 9. c3 e6 10. Bc4 Nd5 11. Qg4

Black now exchanges one his two developed pieces, bringing another White piece into play.

11... Nxf4 12. Bxf4 Qf6 13. Kf1 Nd7 14. Re1 O-O-O 15. Rh3 Bf5

Winning the exchange? This was actually a cunning trap for Black to fall into.

16. Qf3 Bxh3 17. Qxc6+ 1-0

Rodriguez,Danie - Ruxton,K (6) WchJ, 1989 [B18]

1. e4 c6 2. d4 d5 3. Nc3 dxe4 4. Nxe4 Bf5 5. Ng3 Bg6

Here White adopts a slightly different move order to the recommended line above.

6. N1e2 e6 7. Nf4 Bd6 8. h4

Again, Black is prompted to exchange on f4.

8... Bxf4 9. Bxf4 h6 10. h5 Bh7 11. c3 Nf6 12. Qb3 Qe7 13. Be5 b6 14. O-O-O O-O 15. Bd3 Bxd3 16. Rxd3 Nbd7 17. Kb1 Ng4 18. Re1

White simply plays to dominate the d-file after the exchange on e5.

18... Ngxe5 19. dxe5 Nc5 20. Qa3 Qg5 21. Rd4 Rfd8 22. Red1 Rd5 23. b4 Nd7 24. c4 Rxd4 25. Rxd4 Qe7 26. f4 c5 27. b5 f6 28. exf6 Nxf6 29. Rd2 e5 30. fxe5 Qxe5 31. Qd3

Black's position is loose and he must be very careful...

31... Rf8 32. Re2 Qf4 33. Nf5 Re8

34. Ne7+ Kf7 35. Qg6+ Kf8

36. Qxe8+ Kxe8 37. Nd5+ 1-0

...More careful than that, anyway

Schindwein,R - Hugger,M (1) Badenweiler, 1990 [B18]

1. e4 c6 2. d4 d5 3. Nc3 dxe4 4. Nxe4 Bf5 5. Ng3 Bg6 6. N1e2 h6 7. Nf4 Bh7 8. Bc4 e6 9. O-O Nf6 10. Re1 Nd5

The pin on the e-file can be exploited.

11. Bxd5 cxd5 12. Qh5 Qg5

[12... g6 13. Qxd5 Nc6]

13. Rxe6+ Kd8 14. Qxf7 Nc6 15. Re8# 1-0

A3. Piece attacks vs. French 1. e4 e6: 1. e4 e6 2. d4 d5 3. Nc3 Nf6 4. Bg5 Be7 5. e5 Nfd7 6. h4 (Albin-Alekhine-Chatard Attack)

Well, you won't get the Alekhine line in every game. The French starts:

1. e4 e6

Now play the natural sequence

2. d4 d5 3. Nc3

Black now has an important choice: safe or brave?

A3.1. Rubinstein Variation 3...dxe4 4. Nxe4

This is a solid line but Black lacks counterplay.

A3.1.1 Rubinstein Variation with 4...Nf6

Liublinsky-Ufimsev 1945.

A3.1.2 Rubinstein Variation with 4...Bd7

1. e4 e6 2. d4 d5 3. Nc3 dxe4 4. Nxe4 Bd7

This

Stonewall

variation recently had some recommendations with the idea of getting a line for the Bishop with Bc6, but White shouldn't be short of play:

5. Nf3 Bc6 6. Bd3

6...Nf6

(6...Nd7 may be better)

7. Nxf6+ gxf6 8. Qe2

+/- Levy.

A3.1.3 Rubinstein Variation with 4...Nd7

1. e4 e6 2. d4 d5 3. Nc3 dxe4 4. Nxe4 Nd7

The main line, which, however, promises Black little. There have been many lines explored here but as an example you could play over:

5. Nf3 Nf6 6. Nxf6+ Nxf6 7. Ne5

White has a small advantage with easy development. Tarrasch showed us several times how to play these positions: see EG.

A3.2. Guimard Variation 3. ... Nc6

In this line, Black cannot play the natural counterattck ...c5, and the other break with ...f6 is riskier. Now

4. e5

4...Nge7 5. Nce2 Nf5 6. Nf3 b6 7. Nf4+/-

leaves Black without scope, so Black should prefer

4...f6

when, after

5. exf6 Nxf6 6. Nf6 Bd6 7. Bg5 O-O 8. Bd3 Bd7 9. Qd2 Qe8 10. O-O-O Qh5 11.Rde1

White has pressure along the e-file and is in any event more actively placed.

A3. 3. Classical Variation, 3...Nf6

This is met by:

4. Bg5

The natural reply here is the balancing ...Be7 but Black has two alternatives: ...Bb4 and ...dxe4.

A3.3.1. The Burn Variation, 4... dxe4

This has obvious links with the Rubinstein line.

5. Nxe4 Be7 6. Bxf6

And Black has tried both recaptures:

6...Bxf6 (Variation 1)

Black has the two bishops and is solid; White can claim only a small advantage.

7. Nf3 Nd7 8. Qd2 O-O 9.O-O-O b6 10. d5 Ne5 11. Qf4 Ng6 12. Nxf6+ Qxf6 13. Qxf6 gxf6

...when White hopes that the greater harmony of the pawns will give the advantage.

6... gxf6 (Variation 2)

A more risky and more dynamic try.

After 7. Nf3 Black hopes the two bishops and open d- and g-files will give active play. White should develop properly and aim for d5, breaking open the position.

A3.3.2. The MacCutcheon Variation, 4... Bb4

This line still offers Black some prospects of a counterattacking game, but is not as good as the Winawer.

5. e5 h6 6. Bd2 Bxc3 7. bxc3 Ne4 8. Qg4 g6 9. Bd3 Nxd2 10. Kxd2 c5 11. Qf4 Nc6 12. Nf3

White has the idea of dxc5 and Nd4, with advantage.

A3.3.3. The Classical Variation 4... Be7 (and Alekhine Chatard attack with 6. h4)

Again White's move is easy to remember:

5. e5 Nfd7

6. h4

This is, at last, the Alekhine-Chatard Attack. White offers a pawn for chances of attack. Just how good this line can be is shown by the following miniature:

Zuber, M - Halmkin, P (Exeter Vs Teignmouth, 1995)

1. e4 e6 2. d4 d5 3. Nc3 Nf6 4. Bg5 Be7 5. e5 Nfd7 6. h4 Bxg5 7. hxg5 Qxg5 8. Nh3 Qe7 9. Qg4 g6 10. Bd3 b6 11. Nf4 Ba6 12. Bxg6 fxg6 13. Nxe6 Nf8 14. Nxd5 Nxe6 15. Nxe7 1-0

Good, isn't it?

Black has various ways of declining the gambit, but none are very promising (analysis from BCO2 and elsewhere):

Declining with 6... f6

7. Qh5+ Kf8

[or 7... g6 8. exf6 gxh5 9. fxe7 Qxe7 10. Bxe7 Kxe7

Declining with 6... c5

7. Bxe7 Qxe7 8. Nb5 +=

Declining with 6... h6

7. Be3 c5 8. Qg4 g6 9. Nf3 +=

Hellers-Barayev 1986

Declining with 6... a6

7. Qg4 Bxg5 8. hxg5 c5 9. g6 f5 10. Qg3 h6 11. Nf3 O-O 12. O-O-O Nc6 13. Ne2

+ = / unclear BCO2

Declining with 6... O-O

7. Qg4 f5 8. exf6 Nxf6 9. Qg3 c5 10. dxc5 Nbd7 11. O-O-O Nxc5 12. Bd3 b5

unclear: Kupreichik-Moskalenko 1986

The Gambit accepted: 6...Bxg5

7. hxg5 Qxg5 8. Nh3 Qe7 9. Nf4 Nc6

The N goes to h3 instead of f3 to allow Q to move to g4 when White has good prospects of attack.

Black has a couple of alternatives to 9...Nc6:

[9... f5 10. Qh5+ Qf7 11. Nxe6 g6 12. Nxc7+ Kd8 13. Qf3

+ - BCO2

13... Kxc7 14. Nxd5+ Kd8 15. Bc4]

With compensation, according to BCO2

A3.4. The Winawer variation, 3... Bb4 and Alekhine Gambit 4. Nge2

Black takes a risky decision - to attack White's Knight but with the important dark-squared bishop. White has the main try 4. e5 but also some ways of avoiding these critical lines, including the gambit lines 4. Nge2 and 4. a3, and the Winawer Exchange 4. exd5.

4. Nge2

Another Alekhine Gambit

Black is advised not to hang on to the pawn, but to concentrate on good development instead.

4... dxe4 5. a3 Be7 6. Nxe4 Nf6

An open game with about equal chances has resulted.

Example games A3

A3.3.3 Examples of the Alekhine-Chatard Attack

Alekhine - Fahrni, Mannheim, 1914

This is an early game that showed us all the way.

1. e4 e6 2. d4 d5 3. Nc3 Nf6 4. Bg5 Be7 5. e5 Nfd7 6. h4 Bxg5 7. hxg5 Qxg5 8. Nh3

The key move in the Gambit Accepted.

Again, the position needs opening up with d5.

17. d5 Rxd5 18. Rxd5 exd5 19. Bc5

winning the exchange

19... Qf7 20. Bxf8 dxe4 21. Qxe4 Bd7 22. Bc5 Qa2

a hopeful lunge

23. Bd4 Nxd4 24. Qxd4 Qa1+ 25. Kd2 Qa2 26. Re7 Bc6 27. c4 b6 28. Rxh7 Bxg2

1-0

Castillo,O - Segovia,J [C15], WchJ

1. e4 e6 2. d4 d5 3. Nc3 Bb4 4. Nge2 dxe4 5. a3 Be7 6. Nxe4 Nc6 7. Qd3 Nf6 8. Nxf6+ Bxf6 9. Be3 O-O 10. O-O-O

Black now tries a break. Because White is not much better developed, he keeps it closed. We then have an opposite-side castling situation, where both sides must attack quickly.

10... e5 11. d5 Ne7 12. Ng3 Ng6 13. Qe4 Bg5 14. Nf5 Bxe3+ 15. fxe3 Ne7 16. g4

You can make this sort of move if your king is on the other side.

16... Bxf5 17. gxf5 f6 18. Rg1 Kh8 19. Rg3 Qd7 20. Bd3 Rad8 21. Rdg1 Rg8 22. Qh4 h6

Black's attack hasn't even started.

23. Rxg7 Nxf5 24. Rxg8+ Rxg8 25. Qxf6+ 1-0

De Eccher,S - Schneiders,A [C15], Lugano

1. e4 e6 2. d4 d5 3. Nc3 Bb4 4. Nge2 dxe4 5. a3 Be7 6. Nxe4 Nf6 7. Qd3 b6 8. Bf4 Bb7 9. Nxf6+ Bxf6 10. O-O-O

Black is fairly well placed, though behind in development, but now blunders.

10... Bg5 11. Qb5+ 1-0

A3. Example of other French variations

Tarrasch - Mieses[C30], Berlin Match (3) , 1916

1. e4 e6 2. d4 d5 3. Nc3 dxe4 4. Nxe4 Nd7 5. Nf3 Ngf6 6. Bd3 Be7 7. O-O Nxe4 8. Bxe4 Nf6 9. Bd3 b6

Black has conceded a small space advantage and plays his last move to get the blocked Bc8 out. Tarrasch prevents even that.

10. Ne5 O-O

Else Bb5+

11. Nc6 Qd6 12. Qf3 Bd7 13. Nxe7+ Qxe7 14. Bg5 Rac8 15. Rfe1 Rfe8

Black knows enough not to move his King's-side pawn unless he is forced to. So Tarrasch forces him to!

16. Qh3

Threatening 17. Bxf6 and 18. Qxh7

16... Qd6 17. Bxf6 gxf6 18. Qh6 f5

In just a few moves, Tarrasch has got into the heart of the King's defences.

19. Re3 Qxd4 20. c3!

A pretty final move: Black resigns, unable to stop Rg3.

A4. Piece attacks vs. Pirc/Modern 1. e4 ...d6/...g6: 1. e4 d6 2. d4 Nf6 3. Nc3 g6 4. Be3

The trouble with the Pirc is that Black will just lurk behind his pawns, and your pieces won't find much to attack. I play the Pirc/Modern as Black, and am always more impressed by systems which threaten to open lines with pawn breaks than any of the piece play lines. But that's not to say they aren't all dangerous; the player with a plan will always beat the player without one.

There are two principal 'piece play' lines available:

1. e4 d6 2. d4 Nf6 3. Nf3 g6 4. Bc4 Bg7 5. Qe2

White concentrates on rapid development and aims at a timely e5.

The other line I have in mind is:

1. e4 d6 2. d4 Nf6 3. Nc3 g6 4. Be3 Bg7 5. Qd2

Now the simple idea is to play the standard attack with O-O-O, f3, g4, h4, Nge2-g3 and h5. Let's see this in action:

Hort, V - Rota [B07], Aachen/SW, 16, 18

1. e4 d6 2. d4 Nf6 3. Nc3 g6 4. Be3 Bg7 5. Qd2 O-O 6. O-O-O

6... c6 7. Bh6 b5 8. f3 a5 9. h4 b4 10. Na4 Bd7 11. h5

11... Nxh5 12. Rxh5 Bxh6

[12... gxh5 13. Qg5 b3 14. Qxg7#]

13. Rxh6 c5 14. Rh2 1-0

This plan depends a little on Black castling King's side, although it will not have guaranteed safety on the other side, nor in the centre. See the example games.

Example Games A4

Firstly, let's look at a few games in the Bc4 lines .

A4.1. Examples with Bc4

Christ,R - Kljako,D [B07], it, Biel

1. e4 d6 2. d4 g6 3. Nc3 Bg7 4. Bc4 Nf6 5. Qe2 c6 6. e5 dxe5 7. dxe5 Nd5 8. Bd2

Simple development is the trademark of the White system

8... Nxc3 9. Bxc3 O-O 10. f4 a5 11. a4 b6 12. Nf3 Ba6 13. Rd1 Qc7 14. O-O Bxc4 15. Qxc4 Na6

White has a simple advantage in space.

16. Ng5 h6 17. Ne4 Qc8 18. Rd3 Rb8 19. Rh3 b5 20. Qe2 b4 21. Bd2 f5

Black was cramped, but this bid for freedom looks very loose.

22. exf6 exf6 23. f5 g5 24. Qc4+ Kh7 25. Bxg5 fxg5 26. f6 Bh8 27. Nxc5+ Kg6

Black's King is being knocked about all over the place, while the Black pieces watch glumly from the wings.

28. Rxh6+ Kxh6 29. Qh4+ Kg6 30. Qh7+ Kxg5 31. h4+ Kg4 32. Qg6+ 1-0

Knippel,M - Stratmann,B [B08], NRW

1. d4 Nf6 2. Nc3 g6 3. e4 d6 4. Bc4 Bg7 5. Nf3 O-O 6. Qe2 Nc6 7. e5

This is the key break in the Bc4 systems.

7... Ng4 8. h3 Nh6 9. g4 Na5 10. Bd3 b6 11. Bf4 Kh8 12. O-O-O

Black's next move seals the centre, but White's King's side attack can now proceed without worrying about the central tension.

12... d5 13. Qe3 Ng8 14. Rdg1 h6 15. h4 Nc4 16. Bxc4 dxc4 17. h5 Bb7 18. g5

It looks grim for the Black King.

18... Bxf3 19. Qxf3 Qxd4 20. Rd1 Qc5 21. Rd5 Qc6 22. gxh6 Nxh6 23. hxg6 Qxg6

Recapturing with the pawn wasn't pretty, but this fails to:

24. Rdd1 1-0

25. Rdg1 is killing.

See also the games under the *Gurgenidze System*

A4.2. Examples with Be3

Adams, M - Wolff, P [B07], London

1. e4 d6 2. d4 g6 3. Nc3 Bg7 4. Be3 c6 5. Qd2 b5 6. h4 Nf6 7. f3 Qc7 8. Bh6 Bxh6 9. Qxh6 Be6 10. Nh3 Bxh3 11. Rxh3 Nbd7 12. O-O-O

White's K-side initiative persuades Black to castle Queen's side.

12... Nb6 13. Kb1 O-O-O 14. Qe3 e5 15. a3 d5 16. dxe5 Qxe5 17. f4 Qe7 18. e5 Nfd7

White opens up the Q-side; he can skip the Rh3 across easily.

19. a4 a6

Taking on a4 will allow Ba6+.

20. a5 Na8 21. Nxd5 cxd5

The entry of the Queen is decisive.

22. Qa7 Nc7 23. Rc3 Nb8 24. g3 1-0

Lane,G - Saucey,M [B07], Royan

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Be3 Nf6 5. Qd2 O-O 6. f3 e5 7. Nge2 c6 8. O-O-O Nbd7 9. g4 b5 10. Nb1 Nb6 11. Ng3 Be6 12. b3

Black now takes on d4, and the game starts to look rather like the Yugoslav Attack in the Sicilian Dragon.

12... exd4 13. Bxd4 d5 14. g5 Nfd7 15. Bxg7 Kxg7 16. f4 f6 17. h4 Bg4 18. Be2 Bxe2 19. Qxe2 Qe7 20. Rdg1

Again, White's attack has proceeded faster than Black's.

20... f5 21. exf5 Qxe2 22. f6+ 1-0

Black will have no prospects in the endgame with White's secure pawn on f6.

Chacon,E - Blazquez,J. L [B07], Alicante

1. e4 g6 2. d4 Bg7 3. Nc3 d6 4. Be3 Nf6 5. f3 c6 6. Qd2 O-O 7. Bh6 Bxh6 8. Qxh6 Qb6 9. O-O-O Nbd7 10. h4

A typical thrust.

10... c5 11. d5

Often, if the situation in the centre is clear, the attack is easier.

11...Ne5 12. h5 Bd7 13. Be2 c4 14. Nh3

White threatens Ng5 after which hxg6 and f4 look very strong.

14... Bxh3 15. Rxh3 g5 16. Qxg5+ Kh8 17. g4 Rg8 18. Qd2 Qa5 19. g5 Ne8 20. f4 Nd7 21. Qd4+ f6 22. Bg4 Nc5 23. Bf5 Qb6 24. Kb1 h6 25. Bg6 Nd7

White's King's-side initiative will persist into an endgame.

26. Qxb6 Nxb6 27. gxh6 1-0

After 27... Nc7 28. h7 Rg7

[28... Rgf8 29. Bf5 Na6 30. Rg3 Nc5 31. Rdg1 Rfe8 32. Rg7 Nbd7]

29. Rg3 e5 30. h6

the endgame is hopeless for Black.

A5. Piece attacks vs. Sicilian: lines with piece play

A5.1. Ideas with Be2

It would be wrong to say there is much theory on these lines.

The basic idea is to develop the King's side pieces quickly, and play c3 and d4 (very much the same plan as the normal 1. e4 e5 openings).

1. e4 e5 2. Nf3

Now Black has a basic choice between 2...d6, 2...Nc6 and 2...e6. Alternatives are less strong, e.g. 2...a6 3. c4 or 2...Nf6 3. e5. These should not be scorned - GMs have played each line - but are less good for Black than normal lines.

2...d6

[after 2... e6 White can play an interesting gambit, borrowed from a variation of the English Opening: 3. Be2 Nc6 4. b4 Nxb4

[4... cxb4 5. d4]

5. c3 Nc6 6. d4;

(compare the line 1. c4 e5 2. Nc3 Nf6 3. Nf3 e4 4. Ng5 b5)]

3. Be2 Nf6

[3... e6 4. c3 Nc6 5. d4 Nf6 6. Nbd2]

4. c3 Nc6 5. d4 cxd4 6. cxd4 Qa5+ 7. Nc3 Nxe4 8. d5

...with interesting gambit play in each line.

A5.2. Ideas with Bb5

Rossolimo Variation with 2... Nc6

3. Bb5

Now the most common line is

3...g6

Alternatives:

[3... Nf6 e.g. 4. e5 Nd5 5. Nc3 Nc7 6. a4 Nxb5 7. axb5]

[3... e6 e.g. 4. O-O Nge7 5. c3 d5 6. exd5]

4. O-O Bg7 5. c3 Qb6 6. Na3 Nf6 7. Re1

[or 7. e5 Nd5 8. Bc4 Nc7 9. d4]

...when White has good play.

Rossolimo Variation with 2...d6

3. Bb5+

This is a complex line. After 3...Bd7 White will often play 4. Bxd7+ and 5.c4, placing the pawns on light squares to complement the dark-squared bishop.

One example in another line:

3... Nd7 4. d4 cxd4 5. Qxd4 Ngf6 6. Bg5 e6 7. Nc3 Be7 8. O-O a6 9. Bxd7+ Bxd7 10. Rad1 Bc6 11. Rfe1 O-O 12. Bxf6 gxf6

Again, White has good piece play, although the bishops may be dangerous

Example games A5

A5.1. Examples with Be2

Basman-Stean, Hastings 1974

This is a famous game in this line.

1. e4 c5 2. Nf3 d6 3. Be2 Nf6 4. c3 Nc6 5. d4 cxd4 6. cxd4 Nxe4 7. d5 Qa5+ 8. Nc3 Nxc3 9. bxc3

9...Ne5

[9... Nd8 may be better]

10. Nxe5 Qxc3+ 11. Bd2 Qxe5 12. O-O Qxd5

[The main alternative is 12... a6

Nikolenko-Obukhov 1991

13. Rb1 g6 14. Rxb7 Bg7

[14... Bxb7 15. Qa4+ Kd8 16. Ba5+ Kc8 17. Qe8#]

15. Qa4+ Kf8 16. Rc7 Bf5

[16... Qxe2 17. Qc6 Bb7 18. Qxb7 Re8 19. Rc8 Qb5 20. Rxe8+ Qxe8 21. Rc1]

17. Qc6 Rd8 18. Bxa6

idea Re1 - Gallagher]

The game as it goes is a rout.

13. Rb1 e6 14. Bb5+ Bd7 15. Bxd7+ Kxd7 16. Qa4+ Kd8 17. Rb5 Qc6 18. Rc1 Qa6 19. Ra5 Qd3 20. Be3 d5 21. Rxa7 Rxa7 22. Qxa7 Ba3 23. Qb8+ Ke7 24. Bg5+ f6 25. Qxb7+ Kd6 26. Qc7#

A5.2. Examples with Bb5

Georgiev,Kr - Feher,G [B30], Cappelle

1. e4 c5 2. Nf3 Nc6 3. Bb5 e6 4. O-O Nge7 5. b3 Qb6 6. Na3 Ng6 7. Bb2 a6 8. Nc4 Qc7 9. Bxc6 Qxc6

White is miles ahead in development, so breaks with d4.

10. d4 cxd4 11. Nxd4

Black now grabs a hot pawn while behind in development. (Kids! Don't try this at home!)

11... Qxe4 12. Re1 Qf4 13. Nb6 Rb8 14. Nd5

Almost inevitable

14... f6 1-0

Smirin,I - Nun, Ji [B30], Polanica

1. e4 c5 2. Nf3 Nc6 3. Bb5 e6 4. O-O Nge7 5. b3 Ng6 6. Bb2 Be7 7. Bxg7 Rg8 8. Bb2 h5 9. Nc3 Qc7 10. Re1

10... h4 11. Nd5

A very typical Sicilian sacrifice.

11...exd5 12. exd5 Nd4 13. Nxd4 cxd4 14. Ba3 Qa5 15. Bxe7 Nxe7 16. Qe2 Qa3

White threatens Qe5 and d6, winning the knight. Black keeps the Knight, but loses the King.

17. Qe5 Kf8 18. d6 Ng6 19. Qf6 Qa5 20. Bc4 Rg7 21. Re7 1-0

Bogumil - Sarosi [B30], Budapest

1. e4 c5 2. Nf3 Nc6 3. Bb5 e6 4. O-O Nge7 5. c3 d5 6. exd5 Qxd5 7. d4 cxd4 8. c4 Qd8 9. Nxd4 Bd7 10. Nf3 Nf5 11. Nc3 Be7 12. Ba4 O-O 13. Bc2 Nh4 14. Nxh4 Bxh4 15. b3 Bf6 16. Ba3

A neat move making use of the extra space and mobility.

16... Re8

[If 16...Bxc3, 17. Qd3!]

17. Qd3 g6 18. Rad1 Ne5 19. Qg3 Qa5 20. Ne4 Bg7 21. b4 Qc7 22. Nd6 Red8 23. Bb2 Nc6

White is obviously winning. He finds a neat unmasking (Nf5)

24. Bxg7 1-0

B. Slow attacks with f4 against the common half-open defences

The move f4 is often a strong idea against the Sicilian and Pirc, and to some extent the French; less good against other lines. The ideas are similar:

- develop rapidly
- use the extra space given by the extra central pawn
- use the f4 pawn to break open lines against the King

B1. Playing f4 vs. Alekhine 1. e4 Nf6: 1. e4 Nf6 2. d3 and 3. f4

Sadly, this line has no real force and is not a good line to adopt.

If you insist on consistency, you can try it, but otherwise I would look at a different line.

Example games B1

Lazarevic,M - Maric,D (6) Pula, 1990[B02]

1. e4 Nf6 2. d3 d5 3. e5 Nfd7 4. f4 Nb6

With the N on b6 it is harder to organise the obvious 'French' break with f6.

5. c3 c5 6. Nf3 Bg4 7. Be2 e6 8. Na3 Be7 9. O-O O-O 10. Nc2 Nc6 11. Ne3 Bxf3 12. Bxf3

Black has done everything right so far, but gets careless.

12... d4 13. Ng4 dxc3 14. bxc3 c4 15. d4 Nd5 16. Bxd5 Qxd5 17. Ne3 Qb5 18. Qe2 Rac8 19. f5 Bg5 20. f6 gxf6 21. Ng4 Ne7 22. Bxg5 fxg5 23. Nf6+

White should never have been allowed to reach this easy attacking position.

23... Kg7 24. Qh5 h6 25. Ng4 Ng8 26. Nxh6 Nxh6 27. Qxg5+ Kh7 28. Rf6 Nf5 29. Rf1 Rg8 30. Qh5+ 1-0

B2. Playing f4 vs. Caro-Kann 1. e4 c6: 1. e4 c6 2. Nc3 d5 3. f4 (a line of the Dunst opening, 1.Nc3)

I couldn't find a single example of this with f4. This is probably because it's not a very good line!

Example games B2

Van der Vaeren - Savva, Haifa, 1989[A00]

1. e4 d5 2. Nc3 dxe4 3. Nxe4 c6 4. Bc4 Nf6

This could have arisen from the Caro-Kann

5. Nxf6+ exf6 6. Ne2 Be6 7. Bxe6 fxe6 8. Nf4

Hitting at the weak White squares. Black now prompts an elementary combination.

8... e5 9. Qh5+ Ke7 10. Ng6+ hxg6 11. Qxh8 Kf7 12. Qh3 Qd7 13. Qb3+ Ke7 14. O-O b6 15. d3 Qd5

An interesting moment: I would have swapped off here to try and win on material.

16. c4 Qd6 17. Be3 c5 18. a4 Nc6 19. a5 Nb4 20. axb6 Qxb6 21. f4 exf4 22. Bxf4 Kf7 23. d4 Nd5 24. Qf3

Black is very wobbly here.

24... Nxf4 25. Qxa8 Ne2+ 26. Kh1 Nxd4 27. Rxa7+ Kg8 28. Qd5+ Qe6 29. Qxe6+ Nxe6 30. Re1 1-0

B3. Playing f4 vs. French 1. e4 e6: 1. e4 e6 2. Nc3 d5 3. f4 (a line of the Dunst opening, 1.Nc3)

Now, I have found a few of these. With the P on e6, Black is necessarily a little more passive than the Caro lines above. I don't think White can claim much advantage (indeed, John Watson reckons that the Pf4 may be in the way of the Bc1), but it's an easy line to understand.

Example games B3

Hill,S - Wright,A , ch-AUS/SW,5,18, 1989[B21]

1. e4 c5 2. f4 e6 3. Nf3 d5 4. Nc3 dxe4 5. Nxe4 Nc6 6. Bc4

White has nicely centralised pieces.

6... Nf6 7. Nxf6+ Qxf6 8. O-O Bd6 9. d3 Bxf4 10. Ng5 Qxg5 11. Bxf4 Qe7 12. Qg4 O-O 13. Rae1 Kh8 14. Qg3 Rd8 15. c3 b6 16. Re3 Re8

Every White piece is well-placed.

17. Bd5 Bb7 18. Be4 Nd8 19. Bg5 f6

White now plays a sacrifice which is easy to think of but hard to analyse!

20. Bxh7 Kxh7 21. Qh4+ Kg8 22. Bxf6 gxf6 23. Rg3+ 1-0

Campora, D. H - Shirazi, A , Ch New York (open), 1989[B21]

1. e4 c5 2. f4 e6 3. Nf3 Nc6 4. Bb5 Nge7 5. O-O a6 6. Be2 g6 7. d3 Bg7 8. c3 d5 9. Nbd2 O-O 10. Qe1 b5 11. Qf2 Qb6

A position that could have arisen from either the French or the Sicilian.

12. e5 f6 13. d4 cxd4 14. cxd4 fxe5 15. fxe5 g5 16. g4 h5 17. gxh5 g4 18. h6 Bxh6 19. Nc4 dxc4 20. Bxh6 Nf5

Rather a sign of distress; White is winning.

21. Bxf8 Kxf8 22. Nh4 Ncxd4 23. Bxg4 Bb7 24. h3 Qc5 25. Rae1 Kg8 26. Kh2 1-0

B4. Playing f4 vs. Pirc/Modern 1. e4 ...d6/...g6: 1. e4 d6 2. d4 Nf6 3. Nc3 g6 4. f4 (Austrian Attack)

Against the Pirc, f4 is not a particularly slow line!

1. e4 d6 2. d4 Nf6 3. Nc3 g6 4. f4 Bg7 5. Nf3 O-O

[5... c5 is probably a better way to equalise, or so the books say in 1990]

6. Bd3 Nc6 7. O-O

The White attack is easy to understand; White will complete development and then break with e5 or f5 - or both!

Example games B4

Ekebjærg, Ove (2580) - Van Manen, Gerben (2580) cr Blass-mem, 1990[B07]

1. Nc3 Nf6 2. e4 d6 3. f4 g6 4. Nf3 Bg7 5. d4 O-O 6. Bd3 Nc6 7. O-O Bg4 8. e5 Nd7 9. Be3

A set-up for White which is easy to understand. I have watched relatively weak (170-grade) players carve up 200-strength players in this line.

9... dxe5 10. dxe5 f6 11. exf6 Bxf6 12. h3 Be6 13. Qe2 Bf7 14. Rad1 Qe8 15. f5

The classic break.

15... Kh8 16. fxe6 Bxe6 17. Bxe6 hxe6 18. Nd5 Rc8 19. Bh6 Rf7

Black is busted.

20. Ng5 Bxg5 21. Bxg5 Nb6 22. Nxb6 cxb6 23. Qe6 Rf5 24. Rxf5 gxf5 25. Rd7 Rd8 26. Bxe7 1-0

Mednis-Vadasz 1978

Another typical White win in this line

1. d4 d6 2. e4 Nf6 3. Nc3 g6 4. f4 Bg7 5. Nf3 O-O 6. Bd3 Nc6 7. O-O Bg4 8. e5 dxe5 9. dxe5 Nh5 10. Be3 f6 11. exf6 Bxf6 12. h3 Bxf3 13. Qxf3

threat f5

13... Bd4 14. Ne2 e5 15. Nxd4 Nxd4

[15... exd4 16. Bd2 Ne5 17. Qxb7 Rb8 18. Qe4 Nxd3 19. Qxd3 Rxb2]

16. Qe4 Nxf4 17. Bc4+

1-0

[17... Nfe6 18. Qxe5]

Bareev - Norwood, Marseilles, 1990[B09]

Norwood, in his book ***Winning with the Modern*** , offers this game as a reason for Black to avoid the Austrian at all costs.

1. d4 d6 2. e4 Nf6 3. Nc3 g6 4. f4 Bg7 5. Nf3 c5 6. e5

[Book is 6. dxc5 or 6. Bb5+]

6...Ng4

[6... Nfd7! was essential]

7. dxc5 dxc5 8. Qxd8+ Kxd8 9. h3 Nh6 10. Be3 b6 11. O-O-O+ Bd7 12. g4 Kc8 13. Ng5 f6

Yeuch

14. Rxd7 Kxd7 15. Bb5+ Kc8 16. Ne6 Bf8 17. Nd5 Nf7 18. Ndc7 Nd8 19. Rd1 Nxe6 20. Nxe6 fxe5 21. Rd8+ Kb7 22. Bd3

1-0

Black never got going.

B5. Playing f4 vs. Sicilian (a) 1. e4 c5 Grand Prix attack

This is another system where the White side is easy to understand, and where Black has struggled to find a clear equaliser. 2. f4 can lead to the slow Sicilian with g3 and Bg2, but several English players have adopted the more aggressive system with Bc4. We will look at both systems.

A second idea is to play Bb5xNc6 and then play a slow Dutch-style attack with Qe1 and Qh4.

1. e4 c5 2. f4 g6

There are alternatives:

[2... d5 can be met by 3. Nc3 (EG)

[The point of 2...d5 is the wicked gambit line 3. exd5 Nf6 4. c4 e6 5. dxe6 Bxe6 devised by Mikhail Tal]

]

[2... e6 3. Nc3 d5

[3... Nc6 4. Nf3 Nge7 5. Bb5 d5 6. Qe2 d4 7. Nd1]

4. Nf3]

3. Nf3 Bg7 4. Nc3 Nc6 5. Bc4

[The other idea in this line is 5. Bb5 to exchange off the Nc6, and then play a standard Dutch-style attack with Qe1 and Qh4 (EG)]

Black can play ...d6 (EG) but more often goes:

5... e6

6. f5

This is the sharpest line, although White does not have to gambit

[e.g. 6. O-O Nge7]

Now the complications that follow...

6... exf5 7. d3 Nge7 8. O-O O-O? (EG)

or

6... gxf5 7. d3

...must be known in a little detail to be played safely. There is also plenty of scope for original analysis - for example, what should happen after

6... d5

The gambit is probably best declined with

6... Nge7 7. fxe6 dxe6

[7... fxe6 may be better

when Black's King is in danger but the central pawn mass is dangerous and may trap the White Q-side pieces]

There are also many lines with f4 in the open Sicilian i.e.. 1. e4 c5 2. Nf3 (...) 3. d4 cxd4 4. Nxd4 Nf6 5. Nc3 (...) 6. f4.

Example games B5a

First, a straightforward quick attack down the King's side

Hodgson - Ady, Streatham Vs Ymca, London, 1981[B23]

1. e4 c5 2. f4 g6 3. Nf3 Bg7 4. Nc3 Nc6 5. Bc4 e6 6. f5 exf5 7. d3 Nge7 8. O-O O-O?

This natural-looking move is probably a decisive mistake. Black has no effective counter to White's simple mating attack.

9. Qe1 Nd4 10. Qh4 Nxf3+ 11. Rxf3 fxe4 12. Rh3 h6 13. Bg5 Re8 14. Rf1 d5 15. Nxd5 hxg5 16. Nf6+ Black resigns

[16. Nf6+ Kf8

[or 16... Bxf6 17. Qh7+ Kf8 18. Qxf7#]

17. Nh7+ Kg8 18. Bxf7+ Kh8 19. Nxg5+ Bh6 20. Qxh6#]

1-0

Next, a slower attack with the Bb5 idea

Hebden - Large, British Ch'p, 1982[B21]

1. e4 c5 2. f4 Nc6 3. Nf3 g6 4. Bb5 Bg7 5. Bxc6 dxc6 6. d3 Nf6 7. Nc3 O-O 8. O-O b6

White has an obvious plan. And the player with a plan will always beat the player without one.

9. Qe1 Ne8 10. Qh4 Nd6 11. f5 gxf5 12. e5 Ne8 13. Bh6 f6 14. Kh1 Bxh6 15. Qxh6 Ng7 16. Rae1 Be6 17. Ne2 c4 18. Nf4 cxd3 19. cxd3 Bxa2

Black might as well snatch a pawn, he has achieved nothing to counter White's simple attack.

20. e6 Qc8 21. Re3 Nxe6 22. Nxe6 Bxe6 23. Rxe6 Rf7

[23... Qxe6 24. Ng5 Qf7 25. Nxf7 Rxf7]

24. Rfe1 1-0

And what if Black throws a spanner in the works with 2...d5?

Plaskett - Howell, British Ch'p, 1983[B21]

1. e4 c5 2. f4 d5 3. Nc3 dxe4 4. Nxe4 e6 5. Nf3 Be7 6. Bc4 Nf6 7. Qe2 Nc6 8. c3 O-O 9. O-O b6 10. d3 Bb7 11. Ng3 Bd6 12. Bd2 Qc7 13. Ng5

Black's pieces are nicely placed but going nowhere. White, as usual, knows where he is going!

13... Ne7 14. N5e4

forcing an exchange he had earlier avoided

14... Nxe4 15. dxe4 Ng6 16. Nh5 Kh8 17. Rae1 Rad8 18. Bc1 Rd7 19. e5 Be7 20. f5 exf5 21. Rxf5 Bd5 22. Bxd5 Rxd5 23. Qg4 Qd7 24. Ref1 Kg8

25. Nxg7 Kxg7 26. Qh5 Kg8 27. Bh6 Qe6 28. Bxf8 Nxf8 29. c4

[29. Rxf7 Rxe5]

29... Rd4 30. Rxf7 Qg6 31. Qf3 Ne6 32. Rxe7 Rf4 33. Rxe6 1-0

Ekebjaerg,Ove - Danner,Georg, cr Nielsen-mem, 1987

[B23/07]

1. Nc3 c5 2. e4 d6 3. f4 g6 4. Nf3 Bg7 5. Bc4 e6 6. f5 Ne7 7. O-O O-O

A typical sort of position in this line, although an odd move order (no ...Nc6)

8. fxe6 fxe6 9. Ng5 d5 10. Rxf8+ Qxf8 11. exd5 b5 12. Bxb5 exd5 13. Qf3 Qxf3 14. Nxf3

White is simply a pawn up and needs only consolidate to win the ending.

14... Ba6 15. Ba4 Bb7 16. d3 Nbc6 17. Bg5 h6 18. Bxe7 Nxe7 19. Re1 Nf5 20. Bd7 Nd4 21. Be6+ Nxe6 22. Rxe6

White has given up both bishops, which would make me anxious, but he seems to know what he is doing.

22... g5 23. Na4 Rc8 24. Ne5 Rc7 25. Re8+ Kh7 26. Nc3 a6 27. Nd1 d4 28. b3 h5 29. Nb2 g4 30. Nbc4 Kh6 31. Nd6 Bd5 32. Nec4 Kg6 33. Nb6 Bf7

34. Nxf7 1-0

Without the light-squared bishop Black is in trouble, but it might have been worth struggling on over the board (this was postal).

Hodgson - Nunn, Aaronson Open, 1978[B23]

1. e4 c5 2. f4 g6 3. Nf3 Bg7 4. Nc3 Nc6 5. Bc4 d6

[5... e6 and now 6. f5, 6.e5, 6.O-O, 6. d3, and 6.a3 have been tried. Since Grandmaster Nunn lost this dashing game to the young Hodgson, hardly anyone has tried this line!]

6. O-O Nf6 7. d3 O-O 8. f5 gxf5 9. Qe1 fxe4 10. dxe4 Bg4 11. Qh4 Bxf3

[11... Bh5 idea ...Bg6]

12. Rxf3 Ne5 13. Rh3 Ng6

[13... Nxc4 14. Nd5 Re8 15. Nxf6+

[15. Bh6 Bxh6 16. Qxh6 Ne5 17. Rf1]

15... exf6 16. Qxh7+ Kf8 17. Rg3 Bh8]

14. Qg3 Qd7 15. Nd5 Nxd5 16. Bxd5 e6 17. Bb3 d5 18. Qf3 c4 19. Ba4 Qxa4 20. Qh5 Rfd8 21. Qxh7+ Kf8 22. Bh6 Bxh6 23. Rxh6 Rd7

[23... c3 =+ Nunn]

24. Rf1 Ke8 25. Qg8+ Nf8 26. Rxe6+ Kd8 27. Qxf8+ Kc7 28. Qc5+ Kd8 29. Rh6 1-0

B5. Playing f4 vs. Sicilian (b)Traditional Closed Sicilian

This line has been adopted by three World champions at one time or another: the young Karpov, the mature Spassky, and by Smyslov throughout his chess career. And as we shall see, Kasparov knows about the line.

1. e4 c5 2. Nc3 Nc6 3. g3 g6 4. Bg2 Bg7 5. d3 d6 6. f4

[6. Be3 e5 7. Qd2 is another popular line; Black gets into trouble after 6...e6 7. Qd2 Nge7?! 8. Bh6 e.g. 8...O-O? 9. h4! or 8...Bxh6 9. Qxh6 Nd4 10. O-O-O]

6... e6 7. Nf3 Nge7 8. O-O O-O 9. Be3 Nd4

is the main line, although Spassky has tried 9. Bd2. After 6...e5 Spassky has experimented with more active 7. Nh3 Nge7 8. O-O Nd4 9. f5!?

Theory is not so critical in the Closed Sicilian because of the non-forcing nature of the line.

Example games B5b

Spassky - Geller, Candidates, 1968

1. e4 c5 2. Nc3 d6 3. g3 Nc6 4. Bg2 g6 5. d3 Bg7 6. f4 Nf6 7. Nf3 O-O 8. O-O Rb8 9. h3 b5 10. a3 a5 11. Be3 b4 12. axb4 axb4 13. Ne2 Bb7 14. b3

Another defensive move! Is White just going to stand and get punched apart?

14... Ra8 15. Rc1 Ra2 16. g4

At last an attacking gesture

16... Qa8 17. Qe1 Qa6 18. Qf2 Na7 19. f5

The characteristic break

19... Nb5 20. fxg6

Opening the f-file (so what? see move 23!)

20... hxg6

[20... fxg6 21. Nf4 Bc8 22. Ng5 Nc7]

21. Ng5 Na3 22. Qh4 Rc8

the Q-side is about to give, but...

23. Rxf6 exf6 24. Qh7+ Kf8 25. Nxf7 Rxc2

[25... Kxf7 26. Bh6 Rg8 27. Nf4 Rxc2 28. Rf1 Kf8 29. Nxc6+ Kf7 30. Nf4

or Nh8+

30... Kf8 31. Nh5 Bxh6 32. Qxh6+ Ke7 33. Qh7+ Kd8 34. Nxf6

is just terrible]

26. Bh6 Rxc1+ 27. Nxc1 Kxf7 28. Qxg7+ Ke8 29. g5

[29. e5 Bxg2 30. e6]

29... f5 30. Qxg6+ Kd7 31. Qf7+ Kc6 32. exf5+

1-0

32... Kb6 33. Qxb7+ Qxb7 34. Bxb7 Kxb7 35. f6 1-0

Psakhis - Kasparov, La Manga, 1990 [compare B23]

Oddly, one of the best example games I have on file for the Closed Sicilian is this one, from quite a different opening

1. c4 g6 2. Nc3 Bg7 3. g3 Nc6 4. Bg2 d6 5. Nf3 e5 6. d3 f5 7. O-O Nf6

8. Rb1 h6 9. b4 O-O 10. b5 Ne7 11. a4 Be6 12. Ba3 Rc8

Black does not rush but secures the Q-side.

13. Nd2 b6 14. e3 g5 15. d4 exd4 16. exd4 f4

17. Re1 Bg4 18. Nf3 Qd7 19. c5 Rce8 20. Rc1 Nf5 21. Qd3 Kh8 22. cxd6 cxd6 23. Rxe8 Qxe8 24. Rf1 Qh5

The Black pieces hover like vultures

25. Ne4 Nxe4 26. Qxe4 Bh3 27. Ne5 Bxg2 28. Kxg2 g4 29. Bxd6 Rf6 30. Bb8 Qh3+

0-1

Smyslov - Romanishin, Moscow, 1976 [B23]

1. e4 c5 2. Nc3 Nc6 3. g3 g6 4. Bg2 Bg7 5. d3 d6 6. Nh3 h5

The sixth moves on each side are unusual.

7. f4 Bg4 8. Qd2 Nd4 9. Ng1 Qd7 10. h3 Be6 11. Nce2 h4 12. g4 f5 13. exf5 gxf5 14. g5

Black can find no refuge on the King's-side, it is clear.

14... O-O-O 15. Nxd4 cxd4 16. Ne2 Bf7 17. c3 dxc3 18. bxc3 Kb8 19. Rb1 d5 20. O-O e5 21. fxe5 Bxe5 22. d4 Bc7 23. c4 Ne7 24. c5 Rdg8 25. Qb4 Bd8 26. Rf3 Nc6 27. Qb5 Bh5 28. Rfb3

White's tripling is very threatening.

28... Rg7 29. Nf4 Bxg5 30. Nxh5 Rxh5 31. Qe2 Bxc1

"Club players and home enthusiasts often ask me to recommend an openings system for White which is safe, yet aggressive and does not require a superb memory and months of intense learning. In such cases I invariably recommend the King's Indian Attack" - Keene

The joy of the KIA is flexibility:

Looking to expand on the King's-side

Example follow-up

Looking to expand on Queen's-side or in the centre

Example follow-up

To understand the KIA it is important to understand the standard King's Indian Defence ideas, which you will play as White. Here is an early King's Indian Defence game, which alerted the chess world to a new way of handling the Black pieces.

Belavanets - Bronstein 13th USSR semi-final, 1941

1. d4 Nf6 2. c4 d6 3. Nc3 e5 4. Nf3 Nbd7 5. g3 g6 6. Bg2 Bg7 7. O-O O-O 8. b3 Re8 9. e3 c6 10. Qc2 Qa5 11. a4 Nf8 12. Ba3 Bf5 13. Qb2 Rad8 14. Rfd1 e4 15. Nd2 Ne6

The Qa5 is not typical, but we can see several themes here:

- fianchetto of the King's bishop
- use of the e-pawn to gain an initiative on the K-side
- over-protection of the advanced e4-pawn
- move all the pieces to the K-side in a committal attack

16. b4 Qc7 17. Rdb1 Qd7 18. c5 Ng5

More over-protection

19. cxd6 Bh3 20. Bh1 Qf5 21. Ne2 Nd5 22. b5 Bg4

23. Kf1

Two sword-swipes with the Knights decide the game.

23...Nxe3+ 24. Ke1 Nf3+ 0-1

Now, wouldn't that all be better with an extra move? Let's see now...

Petrosian - Pachman, Bled, 1961

1. Nf3 c5 2. g3 Nc6 3. Bg2 g6 4. O-O Bg7 5. d3 e6 6. e4 Nge7 7. Re1 O-O 8. e5 d6 9. exd6 Qxd6

Black seems to have good chances

10. Nbd2 Qc7 11. Nb3 Nd4 12. Bf4 Qb6 13. Ne5 Nxb3

Now a very cute intermezzo

14. Nc4 Qb5 15. axb3 a5 16. Bd6 Bf6 17. Qf3 Kg7 18. Re4

[18. Qxf6+ Kxf6 19. Be5+ Kf5 20. Bg7 is already decisive]

18... Rd8

[18... Ng8 19. Bxf8+]

Now the blow that made this game famous - not so much for the first move:

19. Qxf6+ Kxf6 20. Be5+ Kg5 21. Bg7 1-0

..but this last one - quiet but deadly.

21... Nf5 22. f4+ Kg4 23. Ne5+ Kh5 24. Bf3# mates

or even easier:

21... e5 22. h4+ Kf5

[22... Kh5 23. Bf3+ Bg4 24. Bxg4#] || 3. Bh3 ||

If you've got the idea, we can look at some concrete variations.

C1. KIA vs. Alekhine 1. e4 Nf6: 1. e4 Nf6 2. d3 and 3. g3/Bg2

Sadly, this line has no real force and is not a good line to adopt. Black can transpose into other openings but can also just go 2... e5.

Example games C1

Kaufuss,H - Diaz,Joa.C (4) Hessen-ch, 1989[B02]

1. e4 Nf6 2. d3 d5 3. Nd2 dxe4 4. dxe4 e5 5. Ngf3 Bc5 6. Bc4 Bg4

Black overlooks a little combination.

7. Bxf7+ Ke7 8. Bb3 Nc6 9. c3 Qe8 10. Qe2 Qh5 11. O-O Rhf8

Black has some compensation for the pawn.

12. h3 Bd7 13. Bd1 Bb6 14. Nc4 h6

But White's next shatters any hopes

15. Nfxe5 Nxe5 16. Qxh5 Nxh5 17. Nxb6 axb6 18. Bxh5 Bb5 19. Rd1 Bc4 20. f4 1-0

Fischer, Robert J - Fauber, Richard Milwaukee Northwestern, 1957

1. Nf3 Nf6 2. g3 g6 3. Bg2 Bg7 4. O-O O-O 5. d3 d6 6. e4 e5

This could have arisen from an Alekhine Defence

7. Nbd2 Nbd7 8. a4 Re8 9. Nc4 h6 10. Ne1 Nf8

Now the characteristic King's Indian attack starts:

11. f4 d5 12. fxe5 dxc4 13. exf6 Bxf6 14. Bxh6 Bxb2 15. Rb1 Bg7 16. Bxg7 Kxg7

Of course, dxc4 is an awful move.

17. Qf3 Qe7 18. d4 Ne6 19. Qc3 Ng5 20. Qxc4 Bh3 21. Rxb7 Bxg2 22. Nxb7 Qxe4 23. Rxc7 Qe2 24. Qxe2 Rxe2

The exchanges have left White's pieces dominant

25. h4 Nh3+ 26. Kh2 Nf2 27. Nf4 Rd2 28. Kg1 Ng4 29. Ne6+ Kh8 30. Rxf7

1-0

C2. KIA vs. Caro-Kann 1. e4 c6 2. d3 d5 3. Nd2

Black has an unusual amount of choice here, because of the non-forcing nature of White's opening. Black has tried:

C2.1. Caro-Kann with 3... dxe4

4. dxe4 e5 5. Ngf3 Bc5

Now for a long while Whites have been playing

6. Bc4

[But what about 6. Nxe5 Bxf2+ 7. Kxf2 Qd4+ 8. Ke1 Qxe5 9. Nc4 Qxe4+ 10. Be2 Qe6

[10... Qxg2 11. Nd6+ Kf8 12. Rf1 Be6 13. Nxf7 Bxf7 14. Qd8#]

11. Nd6+ Ke7 12. Nxc8+ Qxc8 13. Qd4

with a great position for White +-]

After the normal 6. Bc4:

6... Nf6 7. O-O Qc7 8. a4

and c3 with a quiet game

C2.2. Caro-Kann with 3... Nd7

Now logical is

4. Ngf3

[4. f4 is worth considering]

4... Qc7 5. g3 dxe4 6. dxe4 e5 7. Bg2 Bc5

[7... Ngf6 8. O-O g6 9. b3]

8. O-O Ne7

[8... Ngf6 9. Nh4 g6 10. Nb3]

9. b3 Ng6 10. Bb2 O-O 11. a3 a5 12. Ne1 b6 13. Nd3 Ba6 14. Nf3 Bd6 15. h4

with initiative, Olafsson-Eliskases 1960

C2.3. Caro-Kann with 3... Nf6

Straightforward development

4. Ngf3 Bg4 5. h3 Bxf3

[5... Bh5 6. g4 Bg6 7. Ne5 Nbd7 8. Nxd7 Nxd7 9. f4 e6 10. Qe2 Qh4+ 11. Qf2 Qxf2+ 12. Kxf2 Bc5+ 13. Kg3

when White's game is easier, Gufeld-Birbrager 1963]

6. Qxf3 e6 7. g3 Na6 8. Bg2 Be7 9. O-O O-O 10. Qe2 Nc7

and now

11. f4 (Evans) puts White on top.

C2.4. Caro-Kann with 3... e5

This is the most aggressive, but also the most committal. It has been viewed with suspicion since the following:

4. Ngf3 Bd6 5. g3 Ne7 6. Bg2 O-O 7. O-O f5 8. c4!

The Black centre suddenly looks hollow.

8... dxe4 9. dxe4 Na6 10. a3 f4 11. b4 c5 12. b5 Nc7 13. Bb2

C2.5. Caro-Kann with 3...g6

This has the best reputation.

4. g3 Bg7 5. Bg2 e5 6. Ngf3 Ne7 7. O-O O-O

Now White has tried all sorts of moves here, including:

[8. Re1] [8. b4] [8. a4] [8. b3] [8. Qe2]

Try the natural:

8. c3

8... Nd7 9. Qc2 h6 10. a4

With a normal slight White advantage,

10... a5 11. b3 b6 12. Ba3 Ba6 13. Rfe1 Re8 14. Rad1

Threat d4

14...c5 15. exd5 Nxd5 16. Nc4 Nxc3!?

17. Qxc3 e4 18. d4 exf3

Evans-Donner 1971

Now Evans gives

19. Qxf3 Rxe1+ 20. Rxe1 Rb8 21. d5

with advantage.

Example games C2

Fischer - Ibrahimoglu, Siegen, 1970

1. e4 c6 2. d3 d5 3. Nd2 g6 4. Ngf3 Bg7 5. g3 Nf6 6. Bg2 O-O 7. O-O Bg4 8. h3 Bxf3 9. Qxf3 Nbd7 10. Qe2 dxe4 11. dxe4 Qc7 12. a4 Rad8 13. Nb3 b6 14. Be3 c5 15. a5 e5

Black often plays ...e5 in the KIA Caro-Kann line, but here the light squares are very weak

16. Nd2 Ne8 17. axb6 axb6

18. Nb1 Qb7 19. Nc3 Nc7 20. Nb5 Qc6 21. Nxc7 Qxc7 22. Qb5 Ra8 23. c3 Rxa1 24. Rxa1 Rb8 25. Ra6 Bf8 26. Bf1 Kg7 27. Qa4 Rb7 28. Bb5

White's domination of the Q-side is complete

28... Nb8 29. Ra8 Bd6 30. Qd1 Nc6 31. Qd2 h5 32. Bh6+ Kh7 33. Bg5 Rb8 34. Rxb8 Nxb8 35. Bf6 Nc6 36. Qd5 Na7 37. Be8 Kg8 38. Bxf7+ Qxf7 39. Qxd6 1-0

Hennigan - Hastings, Dundee, 1993

1. e4 c6 2. d3 d5 3. Nd2 g6 4. Ngf3 Bg7 5. Be2 Nd7 6. O-O Qc7 7. Re1 Ngf6 8. Bf1 Nb6 9. a4 a5 10. c3 O-O

If Black omits ...e5, White can proceed with the usual attack.

11. e5 Ng4 12. d4 h5 13. Nb3 Nh6 14. Bf4 Bg4 15. h3 Bxf3 16. Qxf3 e6 17. g4 hxg4 18. hxg4 Qe7 19. Nc5 Nc8 20. Qh3 g5 21. Bg3 b6 22. Nd3 c5

23. f4 f5 24. exf6 Qxf6 25. Ne5 Ra7 26. Bd3 cxd4 27. Qh5

1-0

C3. KIA vs. French 1. e4 e6: 1. e4 e6 2. d3 d5 3. Nd2

The lines mostly start with

2. d3 d5

2...c5 is also good; it can transpose to French lines considered below or stray into the Sicilian section.

3. Nd2 Nf6 4. Ngf3

Now after 4...c5 we enter the 'long variation' with

1. e4 e6 2. d3 d5 3. Nd2 c5 4. Ngf3 Nc6 5. g3 Nf6 6. Bg2 Be7 7. O-O O-O 8. Re1

or

1. e4 c5 2. Nf3 e6 3. d3 Nc6 4. g3 d5 5. Nbd2 Bd6 6. Bg2 Nge7 7. O-O O-O

See below for examples: all the same ideas and sacrifices crop up over and over again in your own games. The attack is good fun to play for White, and many Black players have come unstuck against it.

The important theory you must know about is, what if Black tries to avoid the long variation? This can be awkward. I recommend you play 4. Ngf3, waiting for ...c5 until you play g3. Let's see why:

C3.1 Variations with 4. g3

Black, having seen you commit yourself to g3, can try and mess you up with either ...dxe4 or ...b6.

C3.1.1 French with 4... dxe4

5. dxe4 e5 6. Ngf3 Bc5 7. Bg2 Nc6

8. O-O O-O 9. Qe2 a5 10. Nc4 Qe7

now c3 or Ne3, with only a small White advantage.

C3.1.2 French with 4...b6

5. Bg2 Bb7

[The sneaky 5... Be7 should be met by 6. e5

[7. Qe2 Ba6]

7... Ne4 with an easy game]

nor

5. Qe2 Be7 6. g3 c5 7. Bg2 Nc6 8. O-O O-O 9. e5 Ne8 10. Re1 f5 11. exf6 Bxf6

about equal =]

but by

5. e5 Nfd7 6. d4 c5 7. c3

with a normal-looking French

C3.2.1 French with 4... Nc6

Black plans simple development. You can play the very sensible

5. Be2

[5. g3 is also played, but is not necessarily the best square for the bishop e.g. 5... dxe4 6. dxe4 Bc5 7. Bb5 Bd7 8. O-O O-O 9. Qe2 Qe7 10. e5 Nd5 11. Ne4 Bb6 12. a3 f6]

5... dxe4 6. dxe4 Bc5 7. O-O O-O 8. c3 e5 9. b4

[9. Qc2 a5 = Radulov-Mednis1970]

9... Bb6 10. Qc2 Re8 =

Example games C3

Ciocaltea - Kozma, Sochi, 1963

1. e4 e6 2. d3 d5 3. Nd2 c5 4. Ngf3 Nc6 5. g3 Nf6 6. Bg2 Be7 7. O-O O-O 8. Re1

[8. e5 Ng4 9. Re1 f6 10. exf6 Bxf6 11. Nf1 += Evans-Bisguier 1955]

8... Qc7 9. e5 Nd7 10. Qe2 b5 11. Nf1 a5 12. h4 b4 13. Bf4 Ba6 14. Ne3 Ra7 15. h5 Rc8 16. h6 g6

17. Nxd5

Always this same sacrifice with the Q on c7 and the B on f4

Fischer - Ivkov, Santa Monica, 1967

1. e4 c5 2. Nf3 e6 3. d3 Nc6 4. g3 d5 5. Nbd2 Bd6 6. Bg2 Nge7 7. O-O O-O

Black's reaction looks logical and solid. But Fischer's reaction is so sharp and convincing that it put people off repeating it for years!

8. Nh4 b6 9. f4 dxe4 10. dxe4 Ba6 11. Re1 c4 12. c3 Na5 13. e5 Bc5+ 14. Kh1 Nd5 15. Ne4

The familiar White: King's-side/ Black: Queen's-side split has appeared.

15... Bb7 16. Qh5 Ne7 17. g4

Ready or not, here we come! Black decide to exchange the dangerous Ne4, but the recapture forces him to weaken the K-side.

17... Bxe4 18. Bxe4 g6 19. Qh6 Nd5 20. f5 Re8 21. fxg6 fxg6

The position is ripe for sacrifice.

22. Nxg6 Qd7 23. Nf4 Rad8 24. Nh5 Kh8 25. Nf6 Nxf6 26. exf6 Rg8 27. Bf4 Rxf4 28. Rad1 Rdg8 29. f7 1-0

C4. KIA vs. Pirc/Modern 1. e4 ...d6/...g6: 1. e4 d6 2. d4 Nf6 3. Nc3 g6 4. Nge2 and 5. g3, 6. Bg2

Black has a lot of choice, as usual. In this system with 2. d4 instead of 2. d3, White means to play in the centre and hold on to the space by restraining Black's pawn breaks. When everything is secure and development is complete, you can think about where to expand yourself.

Example games C4

Short - Donner, Amsterdam, 1982 [B07]

1. e4 d6 2. d4 Nf6 3. Nc3 g6 4. Nge2 Bg7 5. g3 O-O 6. Bg2 e5 7. O-O

[7. h3 is better]

7... exd4

[7... Nc6 is much better]

8. Nxd4 Nc6 9. Nde2

Avoiding exchanges

9... Re8 10. h3 Nd7 11. Kh2 Nb6 12. a4 a5 13. b3

Black has little counterplay, and can just wait for White to decide how and when to break. Short is a genius in these positions.

13... Nb4 14. Be3 Nd7 15. Qd2 Nc5 16. Rad1 Qe7 17. Rfe1 Nca6 ?! 18. Nf4 Bd7 19. Nfd5 Qd8 20. Bg5 f6 21. Be3 Bc6

22. Bd4 Bd7 23. Be3 Nxd5 24. Nxd5 b6?

Thous shalt not open lines for your opponent's fianchettoed bishop

25. e5 Rxe5 26. Nxb6 cxb6 27. Qxd6

27... Rxe3 28. Rxe3 Ra7 29. Re7 Nb8 30. Qe6+ 1-0

C5. KIA vs. Sicilian

The KIA can be played against all lines of the Sicilian, and in fact many French variations start off in the Sicilian (e.g. 1.e4 c5 2. Nf3 e6 3.d3).

Again, we won't bother too much about variations and get straight into the games. A few you do need to know about:

C5.1 KIA Sicilian with 2...d6

3. g3 Nc6 4. Bg2

C5.1.1 Sicilian with 4... g6

The best way to develop the Bf8.

5. O-O Bg7 6. c3 e5 7. d3 Nge7 8. Nbd2 O-O 9. a4 h6 10. Nc4 Be6 11. Qe2 Qc7

Now either 12. Nfd2 or 12. Bd2 with only a small edge.

C5.1.2 Sicilian with 4... Nf6

Forces d3 and avoids c3/d4 lines.

5. d3 g6 6. O-O Bg7 7. Nbd2 O-O 8. a4

As in a couple of Bobby Fischer games from the early part of his career.

C5.2 KIA Sicilian with ...e6 and ...g6

If Black plays the Bf8 to e7 or d6 we have French lines. But Nc6 and Ng7 is the best set-up for Black against the Closed Sicilian, and many will play it against the KIA.

After

1. e4 c5 2. Nf3 e6 3. d3 Nc6 4. g3 d5 5. Nbd2 g6 6. Bg2 Bg7 7. O-O Nge7

you can play the traditional

8. Re1 (Yudasin-Jukic, 1989)

or the new and exciting line

8. exd5 (Dvoretsky - Vulfsson, 1986)

Both are given below.

You can also play g3 lines in most variations of the Open Sicilian: 1. e4 c5 2. Nf3 (...) 3. d4 cxd4 4. Nxd4 Nf6 5. Nc3 (...) 6. g3.

Example games C5

Fischer, Robert J - Sherwin, James T, New Jersey, 1957

1. e4 c5 2. Nf3 e6 3. d3 Nc6 4. g3 Nf6 5. Bg2 Be7 6. O-O O-O 7. Nbd2 Rb8 8. Re1 d6 9. c3 b6 10. d4 Qc7 11. e5 Nd5 12. exd6 Bxd6 13. Ne4 c4

Characteristically, Fischer selects the simple and clear theme of winning the bishop pair.

14. Nxd6 Qxd6 15. Ng5 Nce7 16. Qc2 Ng6 17. h4 Nf6

"Tactics flow from a superior position" - Fischer

18. Nxh7 Nxh7 19. h5 Nh4 20. Bf4 Qd8 21. gxh4 Rb7 22. h6 Qxh4 23. hxg7 Kxg7 24. Re4 Qh5 25. Re3 f5 26. Rh3 Qe8 27. Be5+ Nf6 28. Qd2 Kf7 29. Qg5 Qe7 30. Bxf6 Qxf6

31. Rh7+ Ke8 32. Qxf6 Rxh7 33. Bc6+ 1-0

Smyslov - Botvinnik, USSR Ch, 1955

1. Nf3 Nf6 2. g3 g6 3. Bg2 Bg7 4. O-O O-O 5. d3 c5 6. e4 Nc6 7. Nbd2 d6 8. a4

A standard flexible set-up for White

8... Ne8 9. Nc4 e5 10. c3 f5

White has prepared a strong positional pawn sacrifice

11. b4 cxb4 12. cxb4 fxe4 13. dxe4 Be6 14. Ne3 Nxb4 15. Rb1 a5 16. Ba3 Nc7 17. Bxb4 axb4 18. Rxb4 Bh6 19. Rb6 Bxe3 20. fxe3 Bc4

The Black game is teetering

21. Rxd6 Qe8 22. Re1 Rf7 23. Ng5 Re7 24. Bf1 Bxf1 25. Rxf1 Qxa4 26. Rd8+ Re8 27. Qf3 Qc4 28. Rd7 1-0

Yudasin-Jukic, Bern 1989

1. e4 c5 2. Nf3 e6 3. d3 Nc6 4. g3 d5 5. Nbd2 g6 6. Bg2 Bg7 7. O-O Nge7 8. Re1 b6 9. h4 h6 10. c3 a5 11. a4 Ra7

All as in Ljubojevic-Kasparov, Niksic 1983. Now best is

12. exd5 exd5 13. Nb3 d4 14. cxd4 cxd4 15. Bf4

...with White's pieces being better placed in the more open position.

15... O-O 16. Ne5 Nxe5 17. Bxe5 Bxe5 18. Rxe5 Qd6 19. Qe2 Be6 20. Nd2 Nc6

Now a great exchange sacrifice

21. Rxe6 fxe6 22. Nc4 Qd7

Black has no counterplay

23. Nxb6 Qe8 24. Rc1 Ne7 25. Qxe6+ Qf7 26. Qe2 Qb3 27. Nc4 Qxa4 28. Qe6+ Kg7 29. Qb6 Rd7 30. Ne5 Rdd8

[30... Rf6 31. Qc5]

31. Rc7 Qe8 32. Qe6 1-0

Dvoretsky - Vulfsson, USSR, 1986

1. e4 c5 2. Nf3 e6 3. d3 Nc6 4. g3 d5 5. Nbd2 g6 6. Bg2 Bg7 7. O-O Nge7 8. exd5

Black has a choice

8... exd5

[8... Nxd5 9. Nb3 b6 10. c4 Nde7 11. d4

with advantage]

9. d4 cxd4

[not 9... c4 releasing the tension:

10. c3 Bf5 11. Re1 O-O 12. Nf1 Re8 13. Bf4 h6 14. h4 f6 15. Ne3 Be4 16. Bh3 Kh7 17. b4 a6 18. a4 Ng8 19. g4 g5 20. Bg3 Qd7 21. Nd2 Bg6 22. Bg2 Nge7 23. f4 gxh4 24. Bxh4

with advantage]

[Nor 9... Nxd4 10. Nxd4 Bxd4 11. Nb3]

10. Nb3 Qb6 11. Bg5

[Even better was 11. Bf4!]

e.g. 11...Bf5

[or 11... d3 12. c3 Bf5 13. Re1 O-O 14. Nh4 Be6 15. Qxd3

with play against the IQP]

[or 11... O-O 12. Bd6 d3 13. c3 Rd8 14. Bc5 Qc7 15. Qxd3 Nf5 16. Rfe1 Na5 17. Qb5 Nc6 18. Rad1 Nd6 19. Qe2 Ne4 20. Be3 h6 21. c4 dxc4 22. Qxc4 Rxd1 23. Rxd1 Qe7 24. Nh4

with advantage]

12. Bd6 O-O 13. Re1 Rfe8 14. Bc5 Qc7 15. Bxd4 Nxd4 16. Nfxd4

11... Nf5

[11... O-O 12. Nfxd4 Nf5 may have been better than what was played]

12. Re1+ Be6 13. g4 Nd6

14. Nfxd4!!

This gives White a prolonged initiative

14...Bxd4

[14... Nxd4 15. Be3 N6b5 16. a4]

15. Nxd4 Qxd4

[15... Nxd4 16. Bf6]

16. Bxd5 O-O 17. Bxc6 Qc5

The best defence.

[17... Qxg4+ 18. Qxg4 Bxg4 19. Bg2]

[17... Qxd1 18. Raxd1 bxc6 19. Rxd6 Bxg4 20. Rxc6]

18. Bf3 Qxg5 19. Qxd6 Rac8 20. c3 Qb5 21. Rad1 Bxa2 22. Rd2 Rfd8 23. Qxd8+ Rxd8 24. Rxd8+ Kg7 25. Rd2 h5 26. h3 Be6 27. Re4 a5 28. Red4 hxg4 29. hxg4 Qg5 30. Kg2 b6 31. Re2 Qc5 32. Kg3 Qb5 33. Rdd2 Qg5 34. Re3 Qc5

[34... f5 35. Rd4]

Time trouble I think affects both players, and the game rolls to a halt

35. Be2 Qc6 ? 36. f3 ?

[36. f4! with good winning chances]

36... g5 37. Rd4 Qc7+ 38. Kg2 Kf6 39. Bd3 Qc5 40. Be4 Qb5 41. Rd2 Qe5 42. Ree2 Qb5 43. Bb7 Qc5 44. Rd4 b5 45. Red2

idea Bd5

45... Ke5 1/2

If this is all too hair-raising, you can always play more quietly at move 8.

Karlsson - George, Torbay, 1994[B40]

1. e4 c5 2. Nf3 e6 3. d3 d5 4. Nbd2 Nc6 5. g3 b6 6. Bg2 Bb7 7. O-O Bd6 8. Re1 Nge7

9. Ng5 O-O 10. Qh5 h6 11. Ndf3 Nd4 12. e5 Bc7 13. Nxd4 cxd4 14. Nf3 Nf5 15. g4 Ne7

16. Bxh6 Ng6

17. Bd2 Qb8 18. Ng5 Rd8 19. Bb4

19... Nf8 20. Qxf7+ Kh8 21. Bxf8 1-0

D. A single repertoire for attacking the unusual semi-open defences

D1. Center Counter (Scandinavian) 1...d5

In recent years several GMs have experimented with this move, and for some it is a regular part of their repertoire. Someone once described this as a line for "Black players who want to suck all the life out of the position".

After 2. exd5 Qxd5 Black will be behind in development for a long time, but will also be very solid. I have been frustrated by trying to beat this annoying defence even with a useful space advantage.

I advise you to make an immediate deviation from theory, with

1. e4 d5 2. Nc3

Black has a choice: advance, exchange, or defend. In practice Black does not usually defend the pawn, and any defence will transpose to lines considered above.

There is precious little published theory on this line and a lot of scope to improvise.

D1.1. Advance with 2...d4

White retreats with

3. Nce2

and plans to play Bc4 with ideas of attacking on the K-side.

Black should probably continue

3...e5 4. Ng3

when there is a lot of choice.

4...g6

is logical, hoping to cramp the Ng3, but the best move here is not known. The Ng3 need not stay cramped...

Van Geet - Guyt [A00] Paramaribo, 1967

1. Nc3 d5 2. e4 d4 3. Nce2 e5 4. Ng3 g6 5. Bc4 Bg7 6. d3 c5 7. Nf3 Nc6 8. c3 Nge7 9. Ng5 O-O

10. Nh5 Bh8 ? 11. Qf3 Qe8 12. Nf6+ Bxf6 13. Qxf6 dxc3?

13...Na5 was essential

14. Nxf7 Rxf7 15. Bh6 1-0

D1.2. Exchange with 2...dxe4

White recaptures with

3. Nxe4

and (guess what?) plans to play 4. Bc4 with ideas of attacking on the K-side.

Now 3...c6 and 3...e6 will transpose to lines considered above.

3...Bf5 4. Ng3 Ng6 5. Bc4 e6 can also transpose to the Caro-Kann, or if you want to be independent you can go 6. Bc4 Nd7 7. d3

The best-looking move in reply is of course

3...e5

when we follow up with

4. Bc4

after which at least three correspondence(!) games have continued

4...Be7 5. Qh5 Nh6 6. d3 1-0

More careful is

4...Nc6

[The natural 4...Nf6 is bad after 5. Ng5!]

after which

5. d3 Be7 6. Nf3

6. Ng5 is to be considered; 6...Bxg5 7. Qh5

with the two bishops

6...h6

White now aims to exchange the light-squared bishop

11. Bc4 Qe7 12. Bxe6 Qxe6 13. a4 O-O-O 14. a5 f5 15. Ng5 Qe7 16. exf5 gxf5 17. a6 b6 18. Qf3 e4 19. Nxf5 Nxf5 20. Nxe4 Rdf8 21. Bg5 Qe6 22. Nc3 Bf6

23. Qa8+ Nb8 24. Qb7+ Kd8 25. Bxf6+ Rxf6 26. Ne4 Rg6 27. Qxb8+ Qc8 28. Qxa7 Ne7 29. Rfe1 Nd5 30. Qb7 Rxc2+ 31. Kxc2 1-0

Ekebjærg, Ove - Strand, Torger cr Nielsen-mem, 1987

1. Nc3 d5 2. e4 d4 3. Nce2 e5 4. Ng3 Be6 5. Nf3 Nd7 6. c3 c5 7. cxd4 cxd4 8. Be2 Bd6 9. O-O h5 10. d3

This doesn't look to me very promising for White.

10... h4 11. Nf5 Bxf5 12. exf5 Qb6 13. Nd2 Bc7 14. Bf3 Ne7 15. Be4 Nc5 16. Qf3 f6 17. b3 Nxe4 18. Nxe4

It is considered rude to start chanting '*weak Willie WhiteSquares*' in such positions

18... Kf7 19. Ba3 Rag8 20. Bc5 Qa6 21. Rfc1 Bb8 22. Rc2 g5 23. h3 b5 24. Bxe7 Kxe7

With the exchange of the Knight, Black's position falls apart.

25. Nxf6 Kxf6 26. Rc6+ Qxc6 27. Qxc6+ Kxf5 28. g4+ hxg3 29. fxg3 1-0

Leeners - Simon, Netherlands, 1979

1. Nc3 d5 2. e4 d4 3. Nce2 e5 4. Ng3 Be6 5. Nf3 Nd7 6. c3 c5 7. Bb5 Bd6 8. O-O f6 9. Nh4 g6 10. d3 a6 11. Ba4 b5 12. Bb3 Nf8 13. cxd4 cxd4 14. f4

With the obvious threat of f5

14... Bxb3 15. Qxb3 exf4 16. Bxf4 Bxf4 17. Rxf4 Qc7 18. Rff1 Rc8 19. Rac1 Qd7 20. Rxc8+ Qxc8 21. e5 f5

22. Nhx f5 gxf5 23. Nxf5 Kd8 24. Nd6 1-0

Van Geet, Dick - Van der Zijpp, B, Haarlem, 1991

1. Nc3 d5 2. e4 d4 3. Nce2 c5 4. Ng3 Nc6 5. Bc4 g6 6. f4

A familiar plan.

6... e6 7. Nf3 Bg7 8. a4 Nge7 9. d3 O-O 10. h4 e5 11. f5 gxf5 12. Ng5 Qd6 13. exf5 Bxf5 14. Nxf5 Nxf5 15. Ne4 Qg6 16. g4

1-0

16... Ne3 17. Bxe3 dxe3 18. h5 e2 19. Qxe2 Qh6 20. g5 1-0

Now a few in the exchange lines

Suba,M - Bellon, Bucharest, 1978[A00]

1. Nc3 d5 2. e4 dxe4 3. Nxe4 Nf6 4. Nxf6+ gxf6 5. Bc4 Nc6 6. Qh5

White is trying to get Black to play ...e6, locking in the Bc8

6... Ne5 7. Bb3 Qd6 8. f4 Ng6 9. Ne2 f5 10. d4 Be6 11. g4

Well, the bishop is out on e6, but White now embarks on a long and unclear attacking sequence that eventually nets him material.

11... Bxb3 12. axb3 Qd5 13. Rf1 e6 14. c4 Qe4 15. gxf5 exf5 16. Bd2 Qc2 17. Rc1 Qxb3 18. Qxf5 Be7 19. Qg4 Bh4+ 20. Ng3

It's hard to say whose king is more in danger!

20... Kf8 21. Rf2 Re8+ 22. Kf1 Qd3+ 23. Kg1 Qxd4 24. Bc3 Qe3

25. Re1 Qxe1+ 26. Bxe1 Rxe1+ 27. Rf1 Bxg3 28. hxg3 Re3 29. f5 Ne5 30. Qd4 1-0

Ratsch - Schwarz, DDR tt, 1969 [A00]

1. Nc3 d5 2. e4 dxe4 3. Nxe4 Nc6 4. Bc4 e6

This could have arisen from the French Defence.

5. Nf3 Be7 6. O-O Nf6 7. Ng3 O-O 8. d4 a6 9. c3

White is simply a little better all round.

9... b5 10. Bb3 Bb7 11. Re1 Na5 12. Bc2 Nc4 13. Qd3 Bxf3 14. Qxf3 Qd5 15. Ne4 Nd6 16. Nxf6+ Bxf6 17. Qh3 g6 18. Bh6 Rfe8

White's more active pieces are nagging away at the Black position

19. Bb3 Nc4 20. Bf4 Qc6 21. Bc2 Rad8 22. Be4 Qb6 23. Qf3 e5 24. dxe5 Bxe5 25. Bg5 f6 26. Bh6 Kh8 27. Bc6 Re6 28. Rad1

Black's back rank is in danger

28... Red6 29. Rxd6 Rxd6 30. Bxb5 1-0

Told you!

Schlenker,Rainer - Zimmermann,G, Heidelberg, 1985[A00]

1. Nc3 e6 2. Nf3 d5 3. e4 c5 4. exd5 exd5 5. d4

This could have arisen from the French Defence.

Black has been tempted to occupy the centre, but this move show it up as a target (6.dxc5, exposing the d-pawn, is one threat). So Black decides to seal off the centre on the ninth move.

5... Nc6 6. Bb5 a6 7. Bxc6+ bxc6 8. O-O Bd6 9. Be3 c4 10. Ne5 Qc7 11. Qh5 Be6 12. f4 g6 13. Qh4

Black's centre is more of a liability than an asset.

13... Be7 14. Qg3 f6 15. f5 fxe5 16. fxe6 Bd6 17. Rf7 Ne7 18. Qh4

18... Nf5 19. Rxc7 Nxe4 20. Rxc6 Nf5 21. Nxd5 exd4 22. Bg5 1-0

Staples, M - Lee, G, England, 1976[A00]

1. Nc3 d5 2. e4 dxe4 3. Nxe4 e6 4. Bc4 Be7 5. Qg4 g6 6. Qe2 Nc6 7. Nf3

This could have arisen from a French Defence.

7... e5 8. Bb5 f5

Black has been tempted to lash out before completing his development. Punishment is swift.

9. Nxe5 fxe4 10. Qc4 Nh6 11. d3 Bd7 12. Bxc6 Bxc6 13. Nxc6 bxc6 14. Bxh6

Black is busted.

14... Qd5 15. Qxe4 Qxe4+ 16. dxe4 Bf6 17. O-O-O Rb8 18. e5 1-0

Van Geet, Dick - Lee, Wijk aan Zee III, 1979[A00]

1. Nc3 d5 2. e4 dxe4 3. Nxe4 e6 4. Nf3 Nd7 5. Bc4 Ngf6 6. d3 Be7 7. Qe2 a6 8. O-O

White has nicely centralised development, against another French-style line.

8... b5 9. Bb3 Bb7 10. c3 O-O

White siezes on the d6 square.

11. Bf4 c5 12. Nd6 Bxf3 13. Qxf3 e5

White's next move must have been a shock. If ...exf4, Re1 with advantage.

14. Nf5 c4 15. Bh6 cxb3 16. Bxg7 Ne8 17. Qg3 Bg5 18. Bh6 Kh8 19. Bxg5 f6 20. Be3 bxa2 21. Rxa2 Qc7 22. Qf3 Nd6 23. Raa1 Nxf5 24. Qxf5 Rg8 25. Qf3 a5 26. d4

Black's game falls apart after this line-opening strike.

26... a4 27. dxe5 fxe5 28. Qd5 Rab8 29. Rad1 Nf6 30. Qe6 Rg6 31. Rfe1 Qb7 32. g3 Ng4 33. Qf5 Rbg8 34. Rd7 Qc8 35. Red1 a3 36. bxa3 Qxc3 37. Bg5 Qxa3 38. Qxg4 Rxg5 39. Qh4 h5 40. Qe4 R8g7 41. Rd8+ Rg8 42. R1d7 Qa1+ 43. Kg2 R5g7 1-0

D2. Gurgenidze Defence ...c6/...d5/...g6

Black plans to gum everything up by encouraging e5, then developing around it.

I assume you don't want this to happen, and want to avoid it. You can if you are careful with move order.

1. e4 c6 2. d4 d5 3. Nd2!

1. e4 g6 2. d4 Bg7 3. Nc3 c6 4. Bc4!

1. e4 g6 2. d4 c6 3. c4!

Example games D2

Tong, Y - Webster, A [B08], Ch World Cadet's (under 18), Singapore

1. e4 g6 2. d4 Bg7 3. Nc3 c6

Black intends ...d5.

4. Bc4 d6 5. Nf3 Nf6 6. O-O d5 7. Bd3 dxe4 8. Nxe4 Nxe4 9. Bxe4 Nd7 10. Re1 O-O 11. c3

This position reminds me rather of the Colle.

11... c5 12. Bg5 Nf6 13. Bc2 cxd4 14. Nxd4 Re8 15. Bb3 Qa5 16. Bh4 Bg4 17. Qd3 Rad8 18. Qc4 Nd5 19. h3 Bc8

White continues to improve his position, and has more space.

20. Bxe7 Rd7 21. Bh4 Rf8 22. Rad1 a6 23. Nf3 Nf6 24. Rxd7 Bxd7 25. Ng5 Bc6 26. Qd3 h6

Time for the harvest.

27. Nxf7 Bd5 28. Bxf6 Bxb3 29. Qxg6 1-0

Bousum,J - Forbis,R [B08], It (open), Chicago

1. e4 g6 2. d4 Bg7 3. Nc3 c6 4. Bc4 d6

Again, the ...d5 idea is discouraged.

5. Nf3 Nf6 6. Bb3 O-O 7. O-O Na6 8. Qe2 Qa5 9. Bd2 Qh5 10. e5

10... dxe5 11. dxe5 Ng4 12. Rfe1 Nc7 13. h3 Nh6 14. Ne4 Be6

15. Ng3 1-0

D3. Nimzovitch Defence

Surprising numbers of master games in the 1.e4 e5 2. Nf3 Nc6 openings actually start 1. e4 Nc6 2. Nf3 e5. Not what I recommend...

1. e4 Nc6 2. d4 d5 3. Nc3 dxe4

[3... e6 4. e5 is The Guimard Variation, a poor line of the French where Black can hit at the centre only by losing time with the Knight to play ...c5, or risk exposing the King with ...f6]

4. d5

4...Ne5

[4... Nb8 5. f3 exf3 6. Qxf3 Nf6 7. Bf4 a6 8. h3

+ -]

5. Qd4

[5. f3 and 5. Bf4 are alternatives]

After 5. Qd4 White has a nice game.

Example games D3

Goring - NN, Berlin, 1890[B00]

1. Nc3 Nc6 2. d4 d5 3. e4 dxe4 4. d5 Ne5

After an unusual start we arrive at the usual Nimzovitch line

5. Bf4 Bg4

Black provokes a great combination

6. Bxe5 Bxd1 7. Bb5+ c6 8. dxc6

8... Bg4 9. cxb7+ Bd7 10. Bxd7+ Kxd7 11. O-O-O+ Ke6 12. Rxd8 Rxd8 13. b8=Q 1-0

Schlenker, Rainer - Fuchs, D, Germany, 1985 [B00]

1. Nc3 Nc6 2. d4 d5 3. e4 dxe4 4. d5 Ne5 5. Qd4 Ng6

Again the Nimzovitch arises by transposition.

6. h4 e5 7. Qxe4 Nf6 8. Bb5+ c6 9. dxc6

Another Queen sacrifice!

9... Nxe4 10. c7+ Qd7 11. Bxd7+ Bxd7 12. Nxe4 Rc8 13. h5

Which way should the knight jump?

13... Ne7 14. Nd6# 1-0

Not that way!

D4. Other defences

Rarer continuations include

D4(a) 1...b6 (*Owen's Defence*

which can be met with by

2. d4 Bb7 3. Bd3

Black can probably develop each piece but will have trouble finding a middle-game plan. If the centre is blocked with ...d5, then the Bb7 will suffer, and if the centre is left flexible, Black's cramped pieces may be overrun by White's pawns belting down the centre.

It was discovered that

3...

f5

4. exf5 Bxg7 5. Qh5+ g6 6. fxg6 Bg7 7. gxh7+ Kf8 8. Nf3!

(8. hxg8+ is actually better for Black because White must now lose a move: 9. Qg4 Bxh1, 10. h4 Bd5! 11. h5 Be6-, but 8. Ne2 may also be a strong move)

8...Nf6 9. Qg6! is probably a win for White (9...Bxh1 10. Bh6! or 9...Bxf3 10. Rg1).

So 3. Bd3 is more likely to be met with by

3...e6,

when

4. c4!

is a good reply - 4...f5 doesn't obviously lose but is still currently uncomfortable for Black.

1. e4 b6 2. d4 Bb7 3. Bd3

Nc6

may be best for Black, although White is still better (

D4(b) St.George's Defence 1...a6,

The idea of this move, popularised by Mike Basman, is that in the Owen's lines, the ...f5 sacrificial line is awful and others may lead to your Nf6 getting squashed by e5 Nd5 and c4.

So ...a6 and ...b5 hopefully gives more chances to fight back in the gambit lines, and gives an outpost on d5 if White plays e5. It all looks a bit loose to me, and some of the middle-game awkwardness of the Owen's Defence still holds.

I have always thought

1...a6

deserves to be met with a straight

2. c4 when the gambit 2...b5 3. Bxb5 Bb7 looks easily contained after 4. d3!

More natural is:

2. d4 e6

Now 3. Nc3 or 3. Bd3 lead to normal positions.

But you might fancy 3. Be3 (to slow up ...c5) 3...Bb7 4. f3 when Black is short of obvious counterplay and White may start to fancy 5. c4!. If you grab the c5 pawn, remember, the best way to treat a gambit is to be prepared to return the material to mess up your opponent's position.

1... e6 2. d4 a6 3. Bd3

Basman has often played

3...b5 4. Nf3 Bb7 5. O-O c5 6. c3 Nf6 7. Re1

...which he calls the Main Line. Now he has tried

7... h6

Why on earth should he do this? Well, after

7... Qb6

[7... Nc6? 8. d5 exd5 9. exd5+ Ne7 10. d6]

8. a4 cxd4 9. cxd4 Nc6 10. axb5

10... Nb4 11. Nc3 Nxd3 12. Qxd3 axb5 13. Rxa8+ Bxa8 14. Bf4

[14. Bg5 b4]

14...Bb4 15. Bg5!

Black was under a lot of pressure in Nicholson-Basman 1980. Black recovered but I can't fancy Black's position]

Alternatively

[7... Be7 8. Nbd2 Nc6 9. e5 Nd5 10. dxc5 Bxc5 11. Ne4 Be7 12. a4 Qb8 13. Bg5 f6

[13... Nxe5 14. Nxe5 Qxe5 15. Nf6+]

14. exf6 gxf6 15. Bh4

and Black is very loose, as in Lewis-Basman 1980]

In each line Bg5 was a big headache, so Basman, never deterred, tried 7...h6

8. Nbd2 Be7 9. e5 Nd5 10. dxc5 Bxc5 11. Ne4 Be7 12. a4

Often an awkward move to meet

12... bxa4 13. Rxa4 Qc7 14. Bb1 Nb6 15. Nd6+ Bxd6 16. exd6 Qd8 17. Rg4

Hennigan-Basman 1991; White won quickly.

D4(c) the *Borg Defence* 1. e4 g5

(Borg=Grob reversed) which can be met by

2. d4 h6 3.

Bd3

d6

[or 3... Bg7 4. Ne2 c5 5. c3 Nc6 6. Be3

Keene

6... cxd4 7. cxd4 Qb6 8. Nbc3 Nxd4 9. Nd5!]

4. Ne2

e.g.

4...c5

Now

5. dxc5 dxc5 6. Ng3 Nc6 7. O-O Nf6 8. Re1 +/-

or

5. c3 Nc6 6. O-O Nf6 7. Nd2 Qc7 8. b4

Nunn-Basman 1980; ...1-0

An alternative treatment is

[3. h4 g4

[3... gxh4 4. Nf3]

4. Qxg4 d5 5. Qf3 dxe4 6. Qxe4 Nf6 7. Qd3 Nc6 8. Be3 Qd5 9. Nc3

Example games D4

|He   iga  Acca  do,  oma, 199

1. e4 a6 2. d4 b5 3. Nf3 Bb7 4. Bd3 Nf6 5. Qe2 e6 6. a4 c5 7. dxc5 Bxc5 8. Nbd2 b4 9. e5 Ng4 10. O-O d5 11. Nb3 Ba7 12. h3 h5

A hasty sacrifice

13. Bg5! Qc7 14. hxg4 hxg4 15. Nfd4 g3 16. Rae1 gxf2+ 17. Rxf2 Nd7 18. Nxe6 Qb6 19. Ned4 Nc5 20. Qf3 Qc7 21. Nxc5 Bxc5 22. c3 Kf8 23. Ne6+ 1-0

A dismal game for Black.

Regis, D - Dansey, P, 1993

Please forgive this one of mine but it's the only 'belt down the centre' example I have.

1. e4 e6 2. d4 a6 3. Nf3 b5 4. Bd3 c5 5. c3 Bb7 6. O-O Nf6 7. Re1

[7. Qe2 c4]

7... Be7

[7... h6 Basman]

8. Nbd2 Nc6 9. a4 b4 10. e5 ?!

[better 10. dxc5 first, or maybe 10. Nb3 !?]

10... Nd5 11. Ne4 cxd4 12. cxd4 =+

[12. c4 Nb6 13. b3 was an interesting sacrifice that I didn't have the courage for]

12... Qb6 13. Bc4 Na5 14. b3 Rc8 15. Qd3 Qc6 16. Bg5

[16 ... Nxc4 probably wins a safe pawn! - 16. Bxd5 Qxd5 was the only way to hang on to it]

16... f5

[16... Nxc4 17. Bxe7 Kxe7 18. bxc4 Qxc4 19. Qd2 Qc7 20. Nd6 Rb8 21. Qg5+ with probably not enough compensation]

17. exf6 Nxf6 18. Bxf6 gxf6 19.d5

with the lines opening against the Black King, the rest is a rout.

19...Qc7 20. dxe6 Bxe4 21. exd7+ Qxd7 22. Qxe4 Nxc4 23. bxc4 Kf7 24. Rad1 Qc7 25. Qe6+ Ke8 26. Qxf6 Rf8 27. Qe6 b3 28. Ne5 1-0

[28. Ne5 Rf6 29. Qg8+ Rf8 30. Qxh7 b2 31. Qg6+]

Caillet - Paul, Paris, 1989

1. e4 e6 2. d4 b6 3. Bd3 Bb7 4. Nc3 Bb4 5. Nf3 Nf6 6. Qe2 h6

Black will regret this move...

7. O-O Bxc3 8. bxc3 d6 9. e5 Nd5 10. Bd2 Ne7 11. Rae1 d5 12. Nh4 Nd7

A model position for White; the advance of the f-pawn decides because of the weakness on g6.

13. f4 c5 14. f5 c4 15. fxe6 cxd3 16. Qh5 g6 17. exf7+ 1-0

17... Kf8 18. Bxh6+ Rxh6 19. Qxh6# 1-0

Erben - Foerster, 1989

1. e4 g5 2. d4 Bg7 3. Bxg5 c5 4. Be3 cxd4 5. Bxd4 e5 6. Be3 Ne7 7. Nc3 O-O 8. Nf3 f5 9. Bc4+ Kh8 10. Ng5 Qe8 11. Nb5 Qg6 12. Nd6 Bf6 13. Ngf7+

1-0

E. A repertoire for attacking the unusual 1...e5 defences

I assume you will aim for the

Giuoco Piano

, an opening I expect you won't tire of for a year or two.

1. e4 e5 2. Nf3

This is the natural follow-up, developing the Knight to its best square and attacking the Black e-pawn. Good alternatives include 2. f4 (

King's Gambit

) and 2. Bc4 (

Bishop's Opening

), although the

Vienna Opening

2. Nc3 has rather fallen from favour.

Black has all sorts of alternatives in reply to 2. Nf3, most of which needn't delay us for long. The

Queen's Pawn Counter-Gambit

(or

Elephant Gambit

) 1. e4 e5 2. Nf3

d5

can be met by 3. exd4 e4 4. Qe2 and 5. d3. The

Damiano Defence

1. e4 e5 2. Nf3

f6

is refuted by 3. Nxe5! Qe7! 4. Nf3 and now both 4...

Qxe4

+ 5. Be2 and 4...

d5

5. d3 dxe4 6. dxe4 Qxe4+ 7. Be2 leave White about to go further ahead in development with Nc3.

The most important deviations are:

Hungarian Defence with 3...Be7

Petroff's Defence 2...Nf6

This is my current recommendation for junior players against the 1. e4 player; please refer to the separate booklet.

Philidor's Defence 2...d6

This is probably the strongest of the non-standard defences, and is practiced by many strong county players.

Latvian Gambit 2...f5

It is claimed by Levy and Keene that this defence can be defeated by learning the lines that follow 3. Bc4

E1. Hungarian Defence

1. e4 e5 2. Nf3 Nc6 3. Bc4 Be7

This is a solid but passive defence with links to

Philidor's Defence

. It is quite in order to play

4. d4 d6

and now the books say play

5. h3,

though Spassky (an attacking player) recommends

5. Nc3

and Mednis (an endgame specialist) recommends

5. dxe5.

I think this is the easiest.

Now 5...Nxe5? 6. Nxe5 dxe5 7. Qh5!

!wins a pawn so the line goes

5...dxe5 6. Qxd8+ Bxd8 7. Nc3.

White can complete development with Be3 and O-O, and should aim to keep pieces on with a3 and/or h3. White can then try to open lines to exploit the space advantage and get the rooks into play.

Another line quoted by Mednis is 5. exd5 exd5 6. Bd5!? Bd6 7. Ng5! Nh6 8. c3!

E2. Philidor Defence

1. e4 e5 2. Nf3 d6

Now play

3. d4

when Black has a choice between 3...Nd7, 3...Nf6 and 3...dxe4. 3...f5 is occasionally played, too.

E2.1 Philidor Defence with 3...Nd7

1. e4 e5 2. Nf3 d6 3. d4 Nd7

4. Bc4

This line gives Black all sorts of headaches:

E2.1.1 Philidor Defence with 4...Be7

1. e4 e5 2. Nf3 d6 3. d4 Nd7 4. Bc4 Be7

You can now win a pawn with

5. dxe5 Nxe5

(not 5...dxe5?? 6. Qd5!)

6. Nxe5 dxe5 7. Qh5!

E2.1.2 Philidor Defence with 4...h6

1. e4 e5 2. Nf3 d6 3. d4 Nd7 4. Bc4 h6

Now

5. dxe5 Nxe5 6. Nxe5 dxe5 7. Bxf7+!

wins a pawn

Or

5. dxe5 dxe5 6. Bxf7+! Kxf7 7. Nxe5+ Kf6 8. Qd4

with a deadly attack.

E2.1.3 Philidor Defence with 4...Ngf6

1. e4 e5 2. Nf3 d6 3. d4 Nd7 4. Bc4 Ngf6

Now

5. dxe5 Nxe5

(not 5...dxe5 6. Ng5!)

6. Nxe5 dxe5 7. Bxf7+

wins a pawn:

7...Kxf7 8. Qxd8 Bb4+ 9. Qd2 Bxd2+ 10. Nxd2

E2.1.4 Philidor Defence with 4...c6

1. e4 e5 2. Nf3 d6 3. d4 Nd7 4. Bc4 c6

This is the only way to survive, but White can still press hard with 5. Nc3. After 5...h6 6. a4! is the way to keep the edge. A well-known line goes:

5. Nc3 Be7 6. dxe5 dxe5 7. Ng5 Bxg5

(7...Nh6 8. Ne6! wins)

8. Qh5 g6

(or 8...Qf6 9. Bxg5 Qg6 10. Qh4 +-)

Schlechter-Alekhine 1910)

9. Qxg5 Qxg5 10. Bxg5.

This position is much easier to play for White, and when it has been reached White players have a huge plus score from here. White will play O-O-O and double rooks on the d-file. There is no way for White to penetrate further than playing Rd6 just yet, but b2-b4-b5 should either win the c6 pawn or produce the exchange ...cxb5, Nxb5 with huge pressure.

E2.2 Philidor Defence with 3...Nf6

The counterattack on the e-pawn gives Black a moment to get organised.

After

4. Nc3 Nbd7 5. Bc4 Be7

and now

6.

dxe5

(BCO gives 6.Ng5!?),

then

6...

dxe5

? seems to be a mistake because of 7. Ng5 O-O 8. Bxf7+ Rxf7 9. Ne6 Qe8 10. Nc7 Qd8 11. Nxa8. Now after 11...b5 12. Nd5! should win. Instead

6...

Nxe5

7. Nxe5 dxe5 7. Qxd8+

or 7. Qe2

gives White the edge. Moves like Rd1 or O-O and f4 will keep Black sweating for some time to come.

E2.3 Philidor Defence with 3...exd4

Generally this gives Black a long-term space problem, and White can play 4. Nxd4, 5. Bc4, 6. O-O, 7. Re1 and so on without difficulty.

The line 4. Nxd4 g6 imitates the sharp Dragon Variation of the Sicilian but while White can still execute the standard attack on the Black King's-side (f3, Be3, Qd2, O-O-O, h4-h5, Bh6, etc.), the absence of a half-open c-file for Black makes the counterattack more difficult to get going.

Another way to play for White (as in the famous game Adams-Torre) is 4. Qxd4 Nc6 5. Bb5 Bd2 6. Bxc6 Bxc6 7. Nc3 Nf6 8. Bg5 Be7 9. O-O-O O-O 10. Rhe1

with attacking chances.

4. Nxd4 g6 5. Nc3 Bg7 6. Be3 Nf6 7. Qd2 O-O 8. O-O-O Re8

or 8...Nc6 9. f3 Nxd4 10. Bxd4 Be6 11. g4 +/- BCO2

9. f3 Nc6

[now 10. g4 is given in BCO2, e.g. 10...Ne5 11. Be2 a6 12. Bh6 Bh8 13. h4 b5 13. h4 b5 14. Bg5 c5 15. Nf5! gxf5 16. gxf5 Bb7 17. Bh6 +/-, Owen-Wrinn corr. 1985]

10. h4 !?

10... Ne5

[10... h5 should also lead to a speedy attack against the black king after, say, Bg5 and a later g4. If you aren't sure about this, play 10. g4]

11. h5 Nxh5

[11... c5

[what else?]

now 12. Nb3 intending 13.Qxd6 or 13.Nxc5]

E2.4 Philidor counter-gambit 3...f5

1. e4 e5 2. Nf3 d6 3. d4 f5

BCO2 denies all knowledge of this option. I discover Tony Kosten covered it in " **Winning with the Philidor** ." He calls it " *Mestel's Variation* " after JM's use of it at the European Junior Championships in the 1970s.

Kosten gives a couple of lines like:

[4. exf5 e4 5. Ng5 Bxf5 6. Nc3 d5 7. f3 e3 8. Bxe3 h6 9. Nh3 Bxh3 10. gxh3 Be7 11. Bf2 Bf6 12. Qd2 Ne7 13. O-O-O Nbc6 "... reasonable play for the pawn" KOSTEN]

[or 4. dxe5 fxe4 5. Ng5 d5 6. e6 Nh6 7. Nc3 c6 8. Ngxe4 dxe4 9. Qh5+ g6 10.Qe5 Rg8 11. Bg5 Bg7 12. e7 Qd5 !

Murey's move, which again Kosten reckons is OK for Black.]

But Fritz dismisses the whole thing with

4. Nc3 fxe4 5. Nxe4 d5 6. Nxe5! dxe4 7. Qh5

e.g. 7...g6 8. Nxc6 hxg6 9. Qxc6!? Kd7! 10. Qf5+ Ke8 11. Qe5, getting the rook AND the pawn, with enduring discomfort for the Black King]

E3 Latvian Gambit 2... f5

3. Nxe5

This is the simplest way to gain the advantage

[Keene and Levy claim a win for White after 3. Bc4 fxe4 4. Nxe5 Qg5, but there is much to study here and Black players are

likely to be better rehearsed in the traps]

3... Qf6 4. d4 d6 5. Nc4 fxe4 6. Nc3

White has a simple advantage

Example Games E

Darned if I could find any recent games in any of these lines. When they occur White GMs tend to avoid any theory (in case of improvements) and just play solid, hoping the inferior moves chosen by Black will prove disadvantageous in any line.

Alekhine - Marco, Stockholm, 1912

1. e4 e5 2. Nf3 d6 3. d4 Nf6 4. Nc3 Nbd7 5. Bc4 Be7 6. O-O O-O 7. Qe2

[7. h3 is better we now think]

7... c6 8. a4

White is not so much concerned for promoting his own position as restricting his opponent's. This is not a totally easy thing to

do, and you may see good Black players adopt the Philidor to keep the pieces on and the game closed.

8... h6 9. Bb3 Qc7 10. h3 Kh7 11. Be3 g6 12. Rad1 Kg7

all that to get the Rf8 into play

13. Nh2 Ng8 14. f4 f6 15. Qg4 exd4 16. Bxd4 Nc5 17. f5 Nxb3 18. Qxg6+ Kh8 19. cxb3 Bd7 20. Qg3 Rf7 21. Ng4

With the threat of e5

21... Qd8 22. Ne2

Aiming at e6

22... Rg7 23. Nf4 Qe8 24. Qh4 Qf7 25. Rd3

Going for mate, rather than winning the pawn at h6

25... Kh7 26. Ng6

With the striking idea Rf4 and Nxh6, Nxh6; Qxh6+ Kxh6; Rh4+ Kg5 and mate follows

26... Rxc6 27. fxc6+ Qxc6 28. Bxf6 Bxc6 29. Bxe7 Re8 30.Rxd6

The White pieces close in for the kill

30... Qg7 31. Bf6 Nxf6 32. Rxf6

1-0

I. Introduction

The two general opening rules are:

Rule 1: Develop as fast and as actively as you can

Rule 2: Get a stake in the centre, and try to stop your opponent

What does this mean in the e-pawn openings?

Plan A for White:

try and build a big centre with c3,d4 etc.

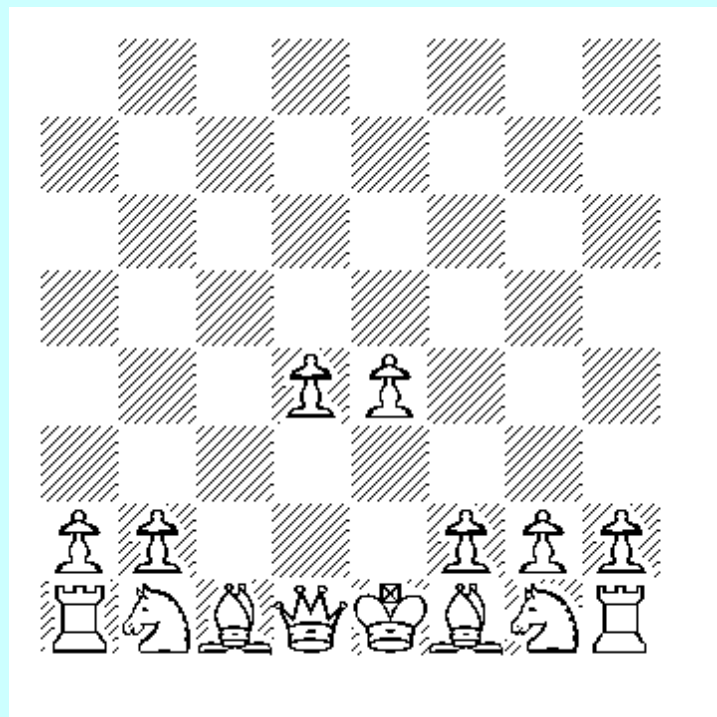

try and destroy Black's hold in the centre with f4 or d4

You can see that the move d4 may do both: after ...exd4, cxd4 Black's centre pawn has disappeared and White has the perfect pawn centre. This is the worst case for Black

White's pawn centre plan

White's perfect centre

Plan A for Black:

Rule 1: develop as fast as you can

Rule 2: try to hang on to your own stake in the centre, or at least make sure you destroy White's as well.

Both sides may be able to maintain the e-pawn centre with pawns on e4/e5, or these may disappear and both sides have a central d-pawn (d4/d5). Lastly, all four central pawns may vanish. In each case Black should have equal play.

if White doesn't do much, grab as much of the centre as you can

Again, the move ...d5 often forms part of Black's plans. If Black can play this in safety, you will usually have

equalised at least.

e-pawn centre

d-pawn centre

vanished centre

With or without the d-pawns the natural break is f4/...f5, and either side can hope to plant a Knight on f4/f5.

The open e-file usually means exchanges of the heavy pieces, as neither side can afford to abandon control of the file. The right square to plonk a Knight is e4/e5

With both files open exchanges are likely, and unless one side can seize the centre by force, or has the two bishops, play is drawish.

So, let's have a look at some variations.

I.A.

II. Analysis

1. e4 e5 2. Nf3

The commonest and probably the best move here, but there are alternatives. We divide this booklet into:

White plays 2. Nf3

Less usual tries for White

III. Less usual tries for White

III.A. *The Vienna Opening, 2. Nc3*

This old move is not bad: it threatens nothing but holds up Black's ...d5, and leaves open the possibility of 3. f4. How should Black reply?

2... Nf6

This is Rule 1: develop as fast and as actively as you can

White has several choices here: 3. f4, 3. Bc4 and 3. g3 are common

III.A.1. **Vienna Gambit, 3. f4**

3... d5

And this is Rule 2: keep hold of your share of the centre, or hit back with ...d5. [The move 3...d6 looks half-right, but blocks in the Bf8 and gives up on playing ...d5. 3...d5 is all right.]

Now you should get an equal game, although, as always, you must be careful.

4. fxe5

[4. exd5 exf4 5. d4 Bd6 6. Qe2+ Kf8! Inkirov-Pinter, 1982. BCO2 give this as a slight edge to Black]

4... Nxe4

5. d3

[Natural development by 5. Nf3 Be7 6. d4 O-O 7. Bd3 f5 8. exf6 Bxf6 9. O-O Nc6 10. Ne2 Bf5 11. c3 Qd7 12. Bf4 Rae8 leads to a level d-pawn type of centre

Now after 5. d3 Black can simplify carefully and gain equality:

5... Nxc3 6. bxc3 d4

6...Be7 is more solid-looking, perhaps

7. Nf3 Nc6 8. cxd4 Nxd4

[Instead 8... Bb4+ 9. Bd2 Bxd2+ 10. Qxd2 Nxd4 11. c3 Nxf3+ 12. gxf3 Qh4+ 13. Qf2 Qxf2+ 14. Kxf2 f6 is level:

]

9. c3 Nxf3+ 10. Qxf3 c6 11. d4 Qh4+ 12. g3 Qg4 13. Bg2 Qxf3 14. Bxf3 Be6

with a level endgame; not much chance for Black to win in this line I'm afraid.

III.A.2.

Vienna Game with 3. g3

This line was fashionable amongst masters a few years ago. White isn't doing much, so just follow rules one and two: first develop:

3... Bc5 4. Bg2 O-O 5. d3 Re8

Then hit back with ...d5.

6. Nge2 c6 7. O-O d5 8. exd5 Nxd5 9. Kh1 Bg4 =

with a level game, as in Portisch-Toran 1961.

III.A.3. Vienna Game with 3. Bc4

If White plays this I recommend you reply

3... Nc6

[There is an exciting line 3... Nxe4 4. Qh5 Nd6 5. Bb3

when Black can survive with ... Be7, but I don't think you should let White get into this line]

4. d3 Bb4 5. Nf3 d6 6. O-O Bxc3 7. bxc3 Na5

[Fritz reckons you should play 7... h6]

8. Bb3 Nxb3 9. cxb3

When play is level.

III.B. *Bishop's opening, 2. Bc4*

This became fashionable as a way of avoiding the Petroff. The right move is:

2... Nf6

Now White's most common move is:

3. d3

[The line 3. d4 exd4 4. Nf3 is the dangerous Urusoff Gambit 4...Nxe4 when 5. Qxd4 Nf6 6. Bg5 Be7 7. Nc3 c6 8. O-O-O d5 9. Rhe1 Be6 leads to a strong attacking game for White

Simply 4... Nc6 5. O-O transposes to the Two Knights' lines below]

3... Nc6 4. Nf3

This transposes to a quiet line of the Italian (*Giuoco Piano/Two Knights'*) group of openings

[4. f4 is the only attempt to be original, but is a poor version of the King's Gambit where White has been committed to d2-d3. One line might go:

4...exf4 5. e5 d5 6. exf6 dxc4 7. fxg7 Bxg7 8. Bxf4 cxd3 9. cxd3 Qe7+ 10. Ne2 Bxb2, when White is in all sorts of trouble]

4... Be7 5. O-O O-O 6. Bb3

Having developed quickly, you are now ready for:

6...d5 7. exd5 Nxd5 8. Re1 Bg4 9. h3

Now, the book line goes:

9... Bh5 10. g4 Bg6 11. Nxe5 Nxe5 12. Rxe5,

when BCO2 gives:

12...Nb6!=

Dolmatov-Chekhov, 1981.

This is a move Gary Lane ignores in his popular book.

But Lane does suggest the magnificent mess starting:

9... Bxf3

e.g.

10. Qxf3 Nd4 11. Qxd5

Qxd5 12. Bxd5 Nxc2

If you prefer this sort of game, this is a nice try.

III.C. *The King's Gambit, 2. f4*

Emanuel Lasker, world champion after Steinitz, said that gambit pawns should always be taken if you haven't

broken any opening rules. He adds, you take them, not to hang on to them, but to make your opponent waste time and energy getting the pawn back. Meanwhile, you can develop and prepare to hit back.

This is good advice, but just as in the Vienna Gambit, we will also look quickly at a line with ...d5.

2... d5 3. exd5

Now you can try the relatively unanalysed 3...c6

3...c6

The Nimzovitch counter-gambit; 3...e4 is the old Falkbeer counter-gambit. Either way you get a good gambit line of your own against the King's Gambit. But Lasker would undoubtedly play:

2... exf4

Now White has two main ways of continuing:

(a) King's Bishop's Gambit, 3. Bc4

(b) King's Knight's Gambit, 3. Nf3

III.C.1. King's Bishop's Gambit, 3. Bc4

Black can play simply

3... Nf6 (Rule 1)

4. Nc3 c6 (Rule 2)

with good chances.

III.C.2. King's Knight's Gambit, 3. Nf3

I have always liked

3... Be7

This Cunningham Variation reinforces the ancient weakness on the e1-h4 diagonal, and covers the e-file.

4. Bc4

Now 4...Bh4+ is a fair try, but it's easier to go

4...Nf6 5. e5

Alternatives include

[5. Nc3 c6]

[5. O-O d5]

but these should cause you no trouble. After 5. e5

5... Ng4 6. O-O d6

Black has an equal game.

III.D. Centre Game & Danish Gambit, 2. d4

Don't mess around, just play

2... exd4

Now White has a choice:

(a) Centre Game, 3. Qxd4

(b) Danish Gambit, 3. c3

or White can try to transpose into the Scotch with 3. Nf3.

III.D.1. Centre Game, 3. Qxd4

This exposes the Q to attack, when it is hard to find a good retreat.

3... Nc6 4. Qe3 Nf6 5. Nc3 Be7

[or 5... Bb4 6. Bd2 O-O 7. O-O-O Re8 8. Bc4 d6 9. f3 Na5 10. Bb3 Be6 =+]

with slight advantage to Black, according to BCO2]

6. Bd2 d5 7. exd5 Nxd5 8. Nxd5 Qxd5

Black is ahead in development, which makes the opposite-side castling difficult to play for White. The game is equal.

III.D.2. Danish Gambit, 3. c3

3... dxc3 (Lasker!)

[Although 3... Qe7 is an interesting way of declining]

Now 4. Nxc3 is a sort of 'half-Danish', and is likely to transpose to the Goring Gambit, dealt with under the Scotch Game section below. The Danish proper is:

4. Bc4 cxb2 5. Bxb2

When White has a genuinely dangerous lead in development. Correct technique here is to return some of the material to get your own development back on track.

5... d5 6. Bxd5 Bb4+

[or 6... Nf6 7. Bxf7+ Kxf7 8. Qxd8 Bb4+ 9. Qd2 Bxd2+ 10. Nxd2

is a level ending with rival majorities, and is as good try to win as any for Black.]

7. Nc3 Nf6

when Black has good chances of an advantage - either securing the two bishops in an open position, or developing quickly and then keeping the pawn. If you find yourself as Black thinking about odd or cramped moves just to try and hang on to the pawn, my advice is: let it go.

IV. White plays 2. Nf3

The best reply, is, of course:

IV.A. .. Nc6

White has a few different tries here, the main ones being

3. Bb5, the Ruy Lopez

3. d4, the Scotch Game

3. Bc4, the Italian game which can lead to the Giuoco Piano. Here I recommend the Two Knights' Defence.

IV.B. Ruy Lopez, 3. Bb5

This is the most important move at master level. The 'Spanish torture' (Ruy Lopez was a Spanish priest) is the main winning weapon for White and has held centre stage for hundreds of years. At junior level, though, there are a few ways to play it, depending on how much you trust your opponent to play lines you like. John Walker recommends the exciting Open Morphy Defence with 5...Nxe4, but White can veer off into some really dull lines on moves 4 and 5, and if anything your two moves tempt White to play a dull line. The Open Morphy is very well known and hard to play for both sides, so I'll throw in one more alternative: the Archangel Variation. See what you think for yourself.

My own recommendation is the old Cordel Defence with

3... Bc5

Bobby Fischer played this a few times in the 'sixties, and never had any trouble reaching a level game. It avoids any trouble you may have with the Exchange Variation and Lopez Four Knights' lines below. Let's look at how you can try and get into the Open Morphy lines, and perhaps then you can will see why I started looking at the Cordel line.

To get into the Open Morphy line you play

3... a6

hoping for

4. Ba4

White has an important alternative here, which might be played just out of nerves.

IV.B.1. The Exchange variation 4. Bxc6

After

4. Bxc6 dxc6

White can play either the old main line

(a) 5. d4

or the Barendregt line

(b) 5. O-O

The move 5.Nxe5 is met by 5...Qd4, regaining the pawn.

IV.B.1.a) Old main line 5. d4

White is going for the better ending with this move; the hope is that all the pieces will come off, when White can create a passed pawn on the K-side with f4-f5 and e4-e5-e6 while your Q-side majority is crippled. So Black should avoid too many exchanges and play very actively, using the two bishops and open lines.

5... exd4 6. Qxd4 Qxd4 7. Nxd4 c5 8. Nf3 Bg4

with equal chances.

IV.B.1.b) Barendregt line 5. O-O

Bobby Fischer revived this in the 'seventies, and it is still being tried.

What should you do? The book line is roughly equal after

5... f6 6. d4 exd4 7. Nxd4 c5 8. Nb3 Qxd1 9. Rxd1 Bg4 10. f3 Be6 11. Bf4 c4 12. Nd4 O-O-O 13. Nc3 Bf7 14. Nf5 Rxd1+ 15. Rxd1 Ne7 16. Ne3 Ng6 17. Bg3 Bc5 18. Kf2 Rd8 =/+ =

(Vitolins-Romanishin 84) with at most a small advantage for White.

But I reckon at junior level the line

5...Bg4

is worth a punt:

6. h3 h5!

Now

7. hxg4 hxg4 8. Nxe5 Qh4 9. f4 g3

leads to mate.

So White should play either

7. c3

with a probable draw after

7...Qd3 8. Re1

[8. hxg4 hxg4 9. Nxe5 Bd6 10. Nxd3 Bh2+ 11. Kh1 Bg3+ 12. Kg1 Bh2+ drawn

8... Bxf3 9. Qxf3 Qxf3 10. gxf3 O-O-O 11. Kf1 Be7 12. Ke2 Bg5 13. Na3 Ne7 14. Rg1 Bh6 15. Nc4 f6 16. h4 c5 17. d3

Or, the best line,

7. d3

White can get a small advantage here I think, but has to play lots of good moves.

7... Qf6 8. Nbd2 Ne7 9. Re1 Ng6 10. d4 Bd6 11. hxg4 hxg4 12. Nh2 Rxh2 13. Qxg4 Qh4 14. Qxh4

Rxh4 15. Nf3 Rh5 16. dxe5

[16. c3 f6 17. Be3 += bco2]

16... Nxe5 17. Nxe5 Bxe5 18. c3 g5 19. Be3 g4

]

If White plays the main line with 4. Ba4,

we continue to steer for the Open Morphy with

4... Nf6

hoping for

5. O-O

Sadly, White has several alternatives here, and if all your opponent knows about the Ruy Lopez ends after the third move, you may well startle White into playing one of these lines:

5. Nc3 Lopez Four Knights

5. d3 Andersson-Steinitz

There is also

[5. Qe2

which is no problem, but it does stop you playing your intended 5...Nxe4. Instead 5...Be7 6. Bxc6 dxc6 7. b3 Bd6 8. Bb2 Qe7 9. d3 =

9... Bg4 10. Nbd2 O-O-O is simply level]

IV.B.2. Lopez Four Knights' Variation, 5. Nc3

5. Nc3

Now ...d5 is difficult, but White has little chance of advantage.

5...b5 6. Bb3 Be7 7. d3

[7. a4 is more risky: 7...b4 8. Nd5 Nxe4

when Black may have the edge.]

7... d6 8. Nd5 Na5 =

with equality: BCO2.

IV.B.3. The Andersson-Steinitz line, 5. d3

White intend to play slowly. There's not much you can do but trot out the usual recipe: develop and play ...d5. This should lead to level play.

5. d3 d6 6. c3 Be7 7. Nbd2 O-O 8. Nf1 b5 9. Bc2

[9. Bb3 d5 10. Qe2 Be6]

9... d5 10. Qe2 Re8

with equality.

After 5. O-O we can at last enter the

IV.B.4. Open Morphy Variation with 5... Nxe4

The main line of the Open Morphy variation goes:

6. d4 b5 7. Bb3 d5 8. dxe5 Be6 9. c3 Bc5

When Black has superb development, although may look a little loose. The Open variation has been a great favourite of fighting players like Euwe and Korchnoi.

10. Nbd2 O-O 11. Bc2

Now you might even consider the Dilworth line:

11... Nxf2 12. Rxf2 f6 13. exf6 Bxf2+ 14. Kxf2 Qxf6

Botvinnik has tried this, although it is clearly risky to give up a piece in such an apparently equal position.

There are many alternatives in the Open Morphy at each point for both players, so I have only indicated some of the outlines above. Look in books like BCO2 for more information. Or, if the number of variations you see in the books frightens you, please consider the Archangel Variation

5... b5 6. Bb3 Bb7

which I discuss below.

But I have a feeling that most White junior players won't let you play these lines, and instead will veer off with the natural-looking Exchange or Four Knights' lines.

IV.B.5. Cordel Defence 3...Bc5

Having seen the number of ways White can shoot off into odd lines, you can see why I would like to recommend the Cordel variation. After

3...Bc5

White's best try is

4. c3

[or 4. O-O Nge7 5. c3 Bb6 6. d4 exd4 7. cxd4 d5 8. exd5 Nxd5 9. Re1+ Be6 = Evans-Fischer 1960]

Now the only lines I could find in BCO2 started

4... f5

...with White getting the advantage after

5. d4 fxe4 and

5. exf5 e4.

But Fischer's treatment was more simple: e.g.

4... Nge7 5. d4 exd4 6. cxd4 Bb4+ 7. Bd2 Bxd2+ 8. Qxd2 a6 9. Ba4 d5 10. exd5 Qxd5 11. Nc3 Qe6+ 12. Kf1 Qc4+ 13. Kg1 O-O 14. d5 Na7 15. Re1

15... Nf5

[or 15... Ng6]

which was soon drawn: Tal-Fischer, 1960.

Fischer also had several games with the bolder line

4... Nf6

For example

5. d4 exd4

[5... Bb6 6. O-O O-O 7. Re1 exd4 8. cxd4 d5 9. e5 Ne4

drawn shortly, Unzicker-Fischer 60]

6. e5 Ne4 7. O-O

[7. cxd4 Bb4+ 8. Bd2 Nxd2 9. Nbx d2 O-O 10. O-O a6 11. Ba4 d6 = Jimenez-Fischer 60]

7... d5 8. Nxd4 O-O 9. f3 Ng5 10. Bxc6 bxc6

drawn Gligoric-Fischer 60.

So on this evidence, the Cordel Defence is a simple way to get your pieces out against players who you don't trust to enter the main lines.

IV.B.6. An alternative to the Open Morphy: Archangel Variation with 5...b5

5... b5 6. Bb3 Bb7

Now the best line is (c) 7. Re1, but White has been tempted to go for a quick break with either

(a) 7. d4 or

(b) 7. c3 and 8. d4

IV.B.6.a) Archangel with 7. d4

7. d4

This is nothing to be scared of.

7... Nxd4 8. Nxd4 exd4 9. e5 Ne4 10. c3 dxc3 11. Qf3

This looks awkward, but Black can survive happily.

11...d5 12. exd6 Qf6 13. d7+ Kd8!

14. Qxf6+ Nxf6 15. Nxc3 Kxd7 16. Bf4 =

With equality, according to Vlastimil Hort.

IV.B.6.b) Archangel with 7. c3

This is more patient but not stronger.

7. c3

Black can now make a mess with

7...Nxe4 8. d4 Na5 9. Bc2 exd4 10. b4 Nc4 11. Bxe4 Bxe4 12. Re1 d5 13. Nxd4 Bd6

14. f3 Qh4 15. h3 Qg3 16. Nf5 Qh2+ 17. Kf2 O-O-O 18. fxe4 dxe4 19. Qg4 Kb8 20. Qxe4 Rhe8

Black is doing fine here.

IV.B.6.c) Main line Archangel with 7. Re1

7. Re1 Bc5

White now plays his Plan A

8. c3 d6 9. d4 Bb6

Black is solid and well-developed, as in many lines of the Lopez, but here has posted the bishops on much more active squares, pointing at the White King. Black can play very actively now, castling Queen's side and hammering down the other wing.

10. Bg5 h6 11. Bh4 Qd7 12. a4 O-O-O 13. axb5 axb5

14. Bxf6

This is the strongest line:

[14. Na3 g5 15. Bg3 h5 16. dxe5

[16. h4 was essential: 16...gxh4 17. Bxh4 Rh6 18. Nxb5 Rg8 19. Qd3 exd4 20. cxd4 Nb4 and Black is still spuddling away well]

16... h4 17. exf6 hxg3 18. hxg3 g4 19. Nd4 Rh7 20. Bd5 Rdh8=+

with an edge for Black, according to BCO2]

14... gxf6

Now White does best to try and keep things under wraps with

15. Bd5

But Black can give White some nervous moments with:

15...Rhg8 16. Kh1 Qg4 17. Rg1 exd4 18. cxd4 f5 19. Nc3 fxe4 20. Nxe4 Qf5 21. Nc3 Nb4 22. Bxb7+ Kxb7=

Klovans-Shirov 87: equal, accoring to BCO2

IV.C. 3. *d4 Scotch Game and gambits*

The old (1826) Scotch Game is

3... exd4 4. Nxd4

People have recently found some new ideas in lines that had been abandoned, but I think interest is waning again as these ideas become better known. The natural move is

4...Bc5

when White has two natural moves: 5. Nb3 and 5. Be3, although you must also consider 5. Nxc6 (and I have even seen 5. Nf5!?)

[If 5. Nxc6 bxc6 6. Bd3 Ne7 7. O-O d5 should hold, but more accurate 5...Qf6! 6. Qe2 bxc6 7. Nc3 Ne7=]

IV.C.1. Scotch Game with 5. Be3**5. Be3 Qf6 6. c3 Nge7 7. Bc4**

White has tried many moves in this position, but this Icelandic line is the most current.

[One alternative being 7. g3 d5 8. Bg2 dxe4 9. Nb5

[or 9. Nd2 Bb6 10. Nxe4 Qg6 11. O-O Bg4 12. Qa4 O-O 13. Nc5 Ne5 14. Bf4 Bxc5 15. Bxe5 c6+=

with only a small advantage to White, according to Gary Lane]

9... Bxe3 10. Nxc7+ Kf8 11. fxe3 Rb8 12. Nd5 Qg5 13. Nf4 Qc5 14. O-O g5 15. Nh5 Be6

Klovan-Romanishin 74, with complications avouring black (Lane)

After 7. Bc4 the equaliser used to be 7...Ne5 8. Be2 and 8...d6/8...Qg6 (see BCO2), but that has started to creak.

Will Black succeed in reinforcing the line? Karpov has still happily played 8...Qg6 9. O-O d6 10. f3! O-O 11. Nd2 d5!? and perhaps that is OK.

7... O-O 8. O-O Bb6 9. Nc2

[or 9. Na3 Nxd4 10. cxd4 d5 11. exd5 Rd8 12. Qh5 h6 13.

Rfe1 Bf5 14. Qf3 Rd7 15. Nb5 Rad8

unclear/equal, Chandler-Short 91]

[White could also try 9. Bb3 Na5 10. Bc2 Nc4 11. Bc1 d5 12. exd5 Bxd4 13. cxd4 Bf5 14. Nc3 Bxc2 15. Qxc2 Nb6 16. Qe4 Qd6 17. Bf4 Qd7 18. d6 cxd6 19. a4 Rfe8 20. Qf3 Nc6 21. Rfd1 Rad8 =/+ =

Polgar-Zuniga 92

9. Nc2 d6 10. Bxb6 axb6 11. f4

Now

11...Be6 12. Nd2 Bxc4 13. Nxc4 Qe6

leaves White with a small space advantage. In the game Kasparov-Short (Linares 1991) Black tried

11...g5!? 12. f5 Ne5 13. Be2 Bd7 14. c4

when

14...Ba4! 15. b3 Bc6

would have been the best line.

IV.C.2. Scotch Game with 5. Nb3

You must retreat with

5... Bb6

Now White usually chases the Bishop with

6. a4 a6

Gary Lane reckons this gives White good chances, but one move order he doesn't consider is

7. Nc3 Nge7 8. Bg5 f6!

Now

9. Bh4 O-O

and now

10. Bc4+ Kh8 11. Qd2 d6 12. f4 Ng6 13. Bg3 Na5 =+ Rodriguez-Unzicker, 1970

or

10. Qd2 d6 11. a5 Ba7 12. O-O-O Be6 13. Nd5 Bxd5! (an improvement on an old Hort-Portisch game) 14. exd5 Ne5 15. Nd4 Bxd4 16. Qxd4 Nf5 17. Qe4 Nxh4 18. Qxh4 f5=

and according to **ChessBase** , Black has achieved a pleasant equality.

IV.C.3. Scotch And Goring Gambits

After 1. e4 e5 2. Nf3 Nc6 3. d4 exd4 White may try

4. c3

[4. Bc4 leads to lines of the Italian Game, below]

Black can equalise with

4... d5

[The old recommendation 4... d3 5. Bxd3 d6

is OK after 6. h3 g6 7. Bg5 Nf6 8. Nbd2 Bg7 9. Nd4 O-O 10. Nxc6 bxc6 11. f4 Rb8 12. O-O Qe8 = Raaste-Westerinen, 1979, but leads to a less east time after

6. Bf4 Be7 7. h3 Nf6 8. Nbd2 Bd7 9. Qc2 += BCO2]

5. exd5 Qxd5 6. cxd4 Bg4 7. Be2 Bb4+ 8. Nc3 Bxf3 9. Bxf3 Qc4

10. Qb3

Neither [10. Bxc6+ bxc6 11. Qe2+ Qxe2+ 12. Kxe2 O-O-O 13. Be3 Ne7=]

[Nor 10. Be3 Bxc3+ 11. bxc3 Qxc3+ 12. Kf1 Qc4+ 13. Kg1 Nge7 14. Rc1 Qxa2 15. Ra1 Qc4 16. Rc1 (drawn here marshall-capablanca, 1926) 16... Qa2 17. Ra1 Qc4 18. Rc1 Qb4

-+ Bryson-Flear, Edinburgh 1985, are any good for White]

10... Qxb3 11. axb3 Nge7 12. O-O a6 =

with equality, Ljubojevic-Ree, 72.

Lastly, but most importantly, we must consider how you should reply to:

IV.D. 3. Bc4

You can defend the Giuoco Piano, which is OK, except you cannot rely on White to play an interesting open game. The best way to get a good game going is:

IV.E. *Two Knight's Defence, 3... Nf6*

White has several tries here:

- (a) Max Lange Attack with 4. d4
- (b) Main line Two Knights' with 4. Ng5
- (c) Closed line with 4. d3
- (d) Variation with 4. Nc3

IV.E.1. **The Max Lange Attack 4. d4**

After 4. d4 Black must reply:

4... exd4

The alternatives are unattractive:

[4... Nxe4 5. dxe5 Nc5 else Qd5 6. O-O Be7 7. Nc3+-

]

[4... Nxd4 5. Bxf7+ Kxf7 6. Nxe5+ Ke8 7. Qxd4+-]

[4... d6 5. Ng5 Nxe4

[not 5... Be6 6. d5]

6. Bxf7+ Ke7 7. Bb3 +-]

Now

5. O-O

[5. e5 is no worry

5... d5 6. Bb5 Ne4 7. Nxd4 Bd7 8. Bxc6 bxc6 9. O-O Be7 10. f3 Nc5 11. f4 Ne4 12. f5 Bc5 13. e6 fxe6 14. fxe6 Bxe6 15. Qh5+ Kd7 16. Be3 Qe7

when Black is quite OK]

Black now has a choice:

- (a) Max Lange with 5... Nxe4
- (b) Max Lange with 5... Bc5

I include analysis of both lines in case you fancy playing this as White.

IV.E.1.a) Max Lange with 5... Nxe4

This is the most complex line.

6. Re1 d5

Now White has two important attacking alternatives:

Sacrificial 7. Nc3

or

Tricky 7. Bxd5

Although, both lines are tricky *and* sacrificial!

IV.E.1.a)(1) *Sacrificial 7. Nc3*

7. Nc3 dxc3

[or 7... dxc4 8. Rxe4+ Be7 9. Nxd4 f5 10. Rf4 O-O 11. Nxc6 Qxd1+ 12. Nxd1 bxc6 13. Rxc4 Bd6 14. Nc3 =

Botvinnik]

8. Bxd5 Be6

[8... Bf5 9. Bxe4 Bxe4 10. Rxe4+ Be7 = BCO]

9. Bxe4 Bb4 10. b3 Qxd1 11. Rxd1

11... Rd8 12. Be3 a6

Black has an extra pawn which is hard to keep and harder to make use of. The storm has blown itself out.

So let's look at the alternative

IV.E.1.a)(2) *Tricky* 7. Bxd5

7. Bxd5 Qxd5 8. Nc3

Another surprising Knight move. This is a terribly well-analysed position, so whoever knows most about it should win. One line goes:

8... Qa5

[8... Qh5 9. Nxe4 Be6 10. Bg5]

9. Nxe4 Be6 10. Neg5 O-O-O 11. Nxe6 fxe6 12. Rxe6 Bd6

[or 12... Qf5 13. Qe2 h6 14. Bd2 Qxc2 = Bogolyubov]

13. Qe2 Qh5 14. h3 Rde8 15. Bd2 Ne5

And again White's attack has blown out.

IV.E.1.b) Max Lange with 5... Bc5

5...Bc5

6. e5

Black has only one good move here:

6...d5

To see why:

[6... Ng4 7. Bf4 O-O 8. h3 Nh6 9. Bxh6 gxh6 10. c3 +-]

+-]

[6... Ne4 7. Bd5 f5 8. exf6 Nxf6 9. Bg5 +-]

+-]

Now the main line of analysis goes:

7. exf6 dxc4 8. Re1+ Be6 9. Ng5 Qd5 10. Nc3 Qf5 11. Nce4 O-O-O

This is exciting stuff! White has a strong K-side attack and control of the e-file. But Black has an extra pawn, good central hold and has sent the King off into safer territory. Black can even think about a K-side counter-attack. For example:

12. Nxe6 fxe6 13. fxe6 Rhg8 14. Bg5 Rd7 15. Nf6 Qxg5 16. Nxd7 Rxe7

and White has run out of steam...

Now, you can research this lot for yourselves, but there's a lot to it. For example, if you check this line in the Levy/Keene book, they give 12. g4!

They also say Black's 8...Be6 is " *more or less forced, since on 8...Kh8 comes 9. Bg5 cxb2 10. Bh6+ Kg8 11. Nc3! with a tremendous game for the pawn... e.g. ... 11...Bf8 12. Bxf8 Kxf8 13. Ne4 followed by 14. Qd2 with clear advantage to White.*" Whereas, if you look in BCO2, you find " *8...Kh8 9. Bg5 cxb2 10. Bh6+ Kg8 11. Nc3 f8 12. Bxf8 Kxf8 13. Ne4 f5 =+ "* - that is, advantage to Black, and instead White can only hope for equality after 12. Nxd4 Bxh6!. So I don't know how many recent books you need, although Andrew Soltis (who seems to be going for the world record of chess books published) has written a repertoire book from White's point of view about the Moller and the Max Lange.

IV.E.2. Main line Two Knights' with 4. Ng5

The main line, which I recommend, goes:

4... d5

But there is an alternative: the Wilkes-Barre variation or Traxler Counterattack.

[4... Bc5

This is wild and exciting chess, although I have a nasty suspicion that White can just play safe with

5. Bxf7+ Ke7 6. Bb3 Rf8 7. O-O d6 8. Nc3

when I don't see how Black can justify both the pawn deficit and poor King position.

But it's worth a look, and I include some examples in the games section. Even if you don't ever play the variation, you might learn from some of the tactical ideas.]

After 4. Ng5 d5, White should try

5. exd5

Now the only right move here is

5... Na5

Although 5...Nb4, 5...Nd4 and 5...Nxd5 have been tried.

[5... Nxd5 can lead to the famous Fried Liver Attack

6. Nxf7

This is the famous Fried Liver Attack (or Fegatello) After 6... Kxf7 7. Qf3+ Ke6 8. Nc3 Nce7 9. d4 c6

We can only say the position is unclear!

But White can actually play the simple 6. d4

with the better game, and when Nxf7 is a real threat]

After 5...Na5, play usually goes

6. Bb5+ c6 7. dxc6 bxc6

When there are two well-known gambit lines

(a) 8. Be2 h6 9. Nf3 e4 10. Ne5 Bd6 11. f4 exf3 12. Nxf3 O-O

and

(b) 8. Qf3 Rb8 9. Bxc6+ Nxc6 10. Qxc6+ Nd7

I enclose a game in each line below.

IV.E.3. Closed variation with 4. d3

4... d5 5. exd5 Nxd5 6. O-O f6 is one time when the Rule 2 should perhaps be broken, as Re1 to follow is uncomfortable, although I don't know if Black is in any great danger.

4...Bc5 of course returns you to the Giuoco Pianissimo (spit).

And another safe line is 4... Be7.

But the alternative

4... h6

is quite OK. The idea is: in the slow Closed Morphy Variation (5...Be7) of the Ruy Lopez, Black often re-organises with ...O-O, ...Rfe8, ...Bf8, ...g6 and ...Bg7. Now with 4. d3, White has said that they plan to play it slow, so you might as well put the B on g7 straight away. 4...g6 loses to 5. Ng5, so you play 4...h6 first. The only way to take advantage of this apparent waste of time is to break open the centre with d3-d4, but this is also a loss of time (d2-d3 then d3-d4), and Black can adjust.

5. O-O

[or 5. Nc3 d6 6. a3 g6 7. h3 Bg7 8. Be3 O-O 9. Qd2 Kh7 10. g4 Nd7 11. Rg1 Nb6

= Spassky-Belyavsky 82 12. g5 Nxc4 13. dxc4 h5]

5... d6 6. c3 g6 7. d4 Qe7 8. Nbd2 Bg7 9. Re1 O-O 10. h3 Bd7 11. Nf1 Rae8 =

Nunn-Spassky 82

with equality, BCO2

IV.E.4. Two Knights' with 4. Nc3

4... Nxe4 5. Nxe4

[5. Bxf7+ Kxf7 6. Nxe4 d5 7. Neg5+ Kg8, when Black has the advantage in the centre]

[5. O-O

Boden-Kieseritsky Gambit 5... Nxc3 6. dxc3 Be7, when you have no weaknesses but must defend solidly for a while. If you don't fancy this you can always try the plan 4...Be7, 5...O-O and 6...Na5]

5... d5 6. Bd3 dxe4 7.

Bxe4 Bd6

with equality.

V. Example Games

V.A. *Max Lange Attack*

Introduction

The repertoires below offer you solid and aggressive ways of playing against most of the Queen's side openings, and also tells you what to do against some of the less common lines where only one line need be learned.

Playing solidly against the Queen's-side and flank openings

Black's basic solid set-up

When I say solid, I mean, solid and going forward, not solid and standing still.

So, you must plan where your counterplay is coming from:

- play ...e5 to get your Bc8 out and working
- play ...Bd6 and ...Qc7
- play ...Bb4 and ...Qa5
- play ...dxc4 and ...b5

Of course you can combine these plans.

play ...e5 to get your Bc8 out

play ...Bd6 and ...Qc7

play ...Bb4 and ...Qa5

...dxc4 & ...b5: keep the P/ hit a Bc4

Playing aggressively against the Queen's-side and flank openings

play ...Qe8 and ...Qh4

play ...Kh8, ...Rg8 and ...g5

play ...Ne4 and ...Ndf6

re-organise bishops ...Bd6 / ...Bd7-e8-h4

Under the **Section A, Queen Pawn Openings** you can see both these lines at work. You can see straight away that it may be possible to head towards one then choose the other.

I'll also show you how to play against some of the more off-beat approaches to playing White in sections B-F. Analysis and Games

I'll go through each approach in turn, looking at a system to play against each White opening.

A. Queen's pawn openings

As your chess improves you will meet more and more players who prefer the slower Queen's-side openings, which although slow, are dangerous because they are also trying to take over the centre, and it is harder to stop this than after 1. e4. The reason for this is worth thinking about:

In the e4 openings, you can often easily play ...d5, but in the 1. d4 openings, ...e5 takes a lot longer to arrange. You may prefer to give up on the idea for a while, and concentrate on active development.

There are several systems below which combine solidity and winning chances in varying proportions:

The Cambridge Springs Defence to the Queen's Gambit Declined

The Semi-Slav Defence: the Tchigorin, Romih and Abrahams variations

The Stonewall Dutch

A1 Playing solidly against 1. d4

I assume that White will follow 1...d5 with 2. c4. Sometimes White will play 2. Nf3 and later 3. c4, but basically White usually needs the c2-c4 move to put Black's centre under pressure, or Black will be able to use the c7 and e7 pawns to hit out at the d4 pawn. There are a few White systems that don't involve c2-c4:

*

The Stonewall System

1. d4 2. e3 3. Bd3 and 4. f4

*

The London System

1. d4 2. Nf3 3. Bf4

*

The Colle System

: 1. d4 2. Nf3 3. e3 4. Bd3 (*see the booklet devoted to this opening*

A(a) The Stonewall System

(Notes from Fine, 1943)

1. d4 d5 2. e3 Nf6 3. Bd3

[3. f4 is sometimes played to avoid the 3...Nc6 line. Black can always play ...Bf5]

3... c5

[Another good system is 3... Nc6 4. f4

[4. c3 e5]

4... Nb4 5. Nf3 Nxd3+ 6. cxd3 g6 7. Nc3 Bg7 8. O-O O-O=]

4. c3 Nc6 5. f4

5... e6

blocks the Bc8; probably not best.

[5... Bg4 6. Nf3 e6 7. Nbd2 Bd6 8. h3 Bh5 9. b3 cxd4 10. cxd4 Rc8

Black is comfortable]

The dangers in this line can be seen in this line, given by Fine:

6. Nf3 Bd6 7. O-O O-O 8. Ne5 Qc7

Ne5 needs some response; Black could also try to occupy e4

9. Nd2 Re8 10. g4

with a crushing attack

A(b) London System

This can be a dangerous system: e.g.

Pribyl - Penrose (Nice) 1974

1. d4 d5 2. Nf3 Nf6 3. Bf4 c5 4. c3 e6 5. e3 Be7 6. Nbd2 O-O 7. Bd3 b6 8. Ne5

[8. O-O Bb7 9. a4

[9. Ne5]]

8... Bb7 9. Qf3 Nc6 10. Qh3 g6 11. Bh6 Re8 12. f4 Nd7

[12... Nxe5 13. fxe5 Ne4 14. Bxe4 dxe4 15. O-O with a strong attack: White can contemplate Rxf7!]

13. O-O f5 14. Ndf3 Ncxe5 15. fxe5 Bf8 16. Ng5 Bxh6 17. Qxh6 Nf8

[17... Qe7 18. g4 Qg7 19. Qxg7+ Kxg7 20. Bb5 Rad8 21. gxf5 gxf5 22. Nh3 with an endgame plus]

18. Rf3 Re7 19. g4 Rg7 20. Raf1 Qd7 21. Kh1 Oe7 22. h4 Bc8 23. Rg3 a5 24. Rfg1 Ra7

Black fiddles while the King's side burns... White won an endgame in about 40 moves.

Let's try again from the top:

1. d4 d5 2. Nf3 Nf6 3. Bf4 c5 4. c3 e6 5. e3 Be7 6. Nbd2

Now 6... Nc6

Black should be prepared to snap off a Knight coming to e5, and can also think about ...Nh5 to exchange the Bishop.

7. h3

[or 7. Bd3 Nh5 8. Be5 f6 9. Bg3 g6 10. Qe2 O-O

Esilon-Cramling, 1984. BCO confidently gives this as an edge to Black. The Black pawns look odd but cover a lot of key squares. If White castles King's-side Black will play ...Nxc3; if O-O-O Black should not open a file but ...a6.]

7... O-O 8. Bd3 b6 9. O-O Bb7 10. Ne5 Nxe5 11. Bxe5 c4 12. Bc2 b5 13. a3 Nd7

= Remon-Agzamov 1984

The only other system which may cause concern is the Colle System; early development of the Bc8 to f5 or g4 is the antidote (see booklet).

White has other non-standard plans eg...

[3. g3 c5 4. Bg2 e6 5. O-O Nc6 6. c3 Qb6 7. e3 Bd6

= *Ardiansyah-Farago 1983.*]

...but these should not cause you sleepless nights. The strongest move is c2-c4, so let us look at these variations.

A1.1 The Cambridge Springs Defence against the Queen's Gambit

The Queen's Gambit is a strong and solid approach for White.

1. d4 d5 2. c4 e6 3. Nc3 Nf6 4. Bg5

The main line is 4...Be7 but the line I recommend starts:

4... Nbd7

Can White win a pawn here?

[5. cxd5 exd5 6. Nxd5 Nxd5 7. Bxd8

[7. Bd2 N7f6]

7... Bb4+ 8. Qd2 Bxd2+ 9. Kxd2 Kxd8 and Black has an extra piece!]

No, so White usually continues:

5. e3 c6 6. Nf3 Qa5

This is the Cambridge Springs Defence, a counter-attacking line where Black aims to put the White Queen's-side under pressure. White has ways of heading off to other variations on moves 4,5 and 6 and we will look at those later. First, let us look at an example game:

Marshall, F - Tarrasch, S, Nuremberg, 1895

1. d4 d5 2. c4 e6 3. Nc3 Nf6 4. Bg5 Nbd7 5. e3 c6 6. Qc2 Qa5

7. cxd5 Nxd5 8. Nf3 ? 8... Bb4 9. Kd2

Black's attack on c3 has given White a real headache.

9... c5 10. a3 Bxc3+ 11. bxc3 cxd4 12. exd4 N7b6 13. Bd3 Bd7 14. Rhc1 Rc8 15. Qb3 O-O

16. Ke2

[16. Rc2 Ba4]

16... Rxc3 17. Rxc3 Qxc3 18. Qb1 h6 19. Bd2 Qc7 20. Kf1 Nc4 21. Bc1 Ba4 22. Qa2 Rc8 23. Qe2 Nc3 24. Qe1 Na5 25. Bxh6 Nb3 26. Bd2

Nxa1 27. Qxa1

27... Bb5 28. Bxb5 Nxb5 29. g3 Qc6 30. Kg2

30... Rd8 31. Be3 Qe4 32. Qb2 Rd5 33. a4 Nd6 34. Bf4 Nf5 35. Be3 Nxe3+ 36. fxe3 Qxe3 37. g4 f5 38. g5 Qe4 39. Qc3 f4 40. Qc8+ Kh7 41. Qc3

41... e5 42. h4 Rxd4 43. g6+ Kh6 44. Kh2 Qe2+ 0-1

Quite a long haul, but not difficult to understand. I predict you will win a few games like this to White players who do not really see the attack coming. All the theory below is designed to give you enough ideas to see you through games where your opponents do know what they are doing.

From the main line position:

White has several different moves here, but the same ideas are present in each line: White hopes to safeguard the bishop on g5 and/or to minimise the attack on c3. We will look at:

- a. 7. Nd2, stopping ...Ne4
- b. 7. Bxf6, removing the target
- c. 7. Bd3 - a poor move (...dxc4!)
- d. 7. cxd5 - stopping ...dxc4

The first and last of these are the most important and most common amongst masters.

A1.1a Cambridge Springs with 7. Nd2

Black has got two ways to try and equalise here I recommend 7. Nd2 Bb4 but Black has also tried

7.Nd2 dxc4

e.g.

8. Bxf6 Nxf6 9. Nxc4 Qc7 10. Rc1

which may be about equal but I don't fancy it as well. Let's try instead

7. Nd2 Bb4

8. Qc2 O-O

[8... e5 also equalises according to Polugaevsky]

9. Be2

White has also tried:

[9. a3 Ne4]

[9. Bh4 e5]

always this blow! But Black can also try

[9... c5 10. Nb3 Qa4 11. Bxf6 Nxf6 12. dxc5 Qc6 13. cxd5 exd5=]

10. *dxe5*

[10. *Nb3 Qc7 11. Be2 [or 11. Bg3 Ne4] 11... dxc4 12. Bxc4 exd4 13. Nxd4 Ne5 = Straat-Spielmann, Scheveningen 1923]*

10... *Ne4 11. Ndx e4 dxe4 12. e6 Ne5 13. exf7+*

[13. *e7 Re8 14. O-O-O Ng6 15. Rd8 Bf5]*

13... *Rxf7 14. O-O-O Bf5 15. a3 Nd3+*

16. *Bxd3*

[16. *Kb1 Bxc3 17. Qxc3 Qxc3 18. bxc3 Re8 with good compensation for the piece]*

16... *exd3 17. Qd2 c5 18. axb4 ? 18... cxb4 19. Nb1 Rc8 20. b3 b5 with a strong attack for the piece]*

9... *e5*

10. O-O

Again White has tried other moves:

[10. dxe5 Ne4 11. Ndx e4 dxe4 12. O-O Bxc3 13. bxc3 Nxe5

[13... f6 14. Bh4 Qxe5 =]

14. Qxe4 Ng6 15. Bf4 Nxf4 16. Qxf4 Qxc3

is OK for Black]

[10. Bxf6 Nxf6 11. dxe5 Ne4 12. Ndx e4

[12. cxd5! Nxc3 13. bxc3 Bxc3 14. Rc1 Bxe5 15. dxc6 Rd8 16. Bd3 bxc6 17. O-O Ba6 18. Nc4 Bxc4 19. Bxc4 += bukc-nikolac, yugoslavia 1976]

12... dxe4 13. O-O Bxc3 14. Qxc3 Qxc3

15. bxc3 Re8 16. Rad1 Kf8

]

10... Bd6

[10... exd4 11. Nb3 Qc7 12. Nxd4 dxc4 13. Bxc4 Ne5 14. Be2 Neg4 15. Bf4 Qe7 16. h3 Ne5 17. Rad1 Ng6 18. Bg3 Rd8 = Spraggett-Saed, Taxco 1985]

11. Nb3

[11. cxd5 exd4 12. dxc6 dxc3 13. cxd7 cxd2 14. dxc8=Q Raxc8]

[11. c5 Be7 12. b4 Qc7

with chances for both sides; White has more space but while Black maintains the tension in the centre it will not be easy for either side

(...e4, though, would be a mistake) 13. b5]

11... Qc7 =

A1.1b Cambridge Springs with 7. Bxf6

7...Nxf6 8. Bd3 Bb4 9. Qc2

[There is an old line 9. Qb3 dxc4 10. Bxc4 O-O 11. O-O Bxc3 12. bxc3 b6 13. Ne5 Bb7 14. Be2 c5 15. Nc4 Qa6 16. Qb2 Bd5 17. Ne5 Qc8 18. a4 Nd7 19. c4 Be4

= Capablanca, Lasker, Ed. NY 1924]

9... c5

Black has a simple equalising plan: exchange centre pawns, castle, then develop your Bc8.

10. Nd2 [or 10. O-O] 10... cxd4 11. exd4 Bxc3 12. Qxc3 Qxc3 13. bxc3 dxc4 14. Nxc4 Ke7 15. Kd2 Bd7

= Knoch-Vajda, Kecsemet 1927

A1.1c Cambridge Springs with 7. Bd3

This is a feeble move, although it looks natural.

7... Ne4 8. Nd2

[8. Bf4 Nxc3 9. bxc3 Qxc3+ 10. Kf1 dxc4]

[8. Bxe4 dxe4 9. Ne5 Bb4]

8... Nxd2 9. Qxd2 dxc4

And Black has won a piece.

A1.1d Main line Cambridge with 7. cxd5

7...Nxd5

Now White usually plays Qd2 but first we will need to examine an alternative in 8. Qb3.

A1.1d(a) White deviates from main line: 8. Qb3

8. Qb3 Bb4

Others can be confidently tried:

[8... h6 9. Bh4 Bb4 10. Rc1 c5 11. a3 Bxc3+ 12. bxc3 cxd4 13. exd4 O-O = Euwe-Capablanca 1931]

[8... Bd6 9. e4 Nxc3 10. bxc3 e5 11. Bd2 O-O 12. Bd3 Qc7 = Peev-Atanasov, Varna 1974]

9. Rc1 e5

!? Tartakower

10. Bc4 !

Best. Alternatives include:

(a) [10. dxe5 Nc5 11. Qc2 Na4

[11... Qxa2]

]

(b) [10. Nxe5 Nxe5 11. dxe5 Be6 12. a3 Nxc3 13. Qxb4

[13. axb4 Qxe5 14. Bf4 Bxb3 15. Bxe5 Na2]

13... Qxb4 14. axb4 Na2 15. Rd1 Nxb4]

(c) [10. Bd3 h6 11. Bh4 exd4 12. exd4 Nf4]

...with Black comfortable in each case.

10... N7b6

[10... exd4 is more solid 11. Bxd5 Bxc3+ 12. bxc3 cxd5 13. exd4 O-O 14. O-O Nb6 =]

11. Bxd5 Nxd5 12. Nxe5 Be6 13. Nc4

[13. a3 Nxc3]

13... Nxc3 14. Nxa5 Nxa2+ 15. Qxb4 Nxb4 16. Kd2 f6

=/= + As in a consultation game Euwe & Weenink - Alekhine & Van Den Bosch, Amsterdam 1931

A1.1d(b) Back to the main line with 8. Qd2

8. Qd2

Black now has the sharp

8... N7b6

and the solid

8...Bb4

A1.1d-1 Main line with 8... N7b6

Now White has a choice:

- (1) 9. Bd3
- (2) 9. Nxd5
- (3) 9. a3
- (4) 9. Rc1

Only the last of these is dangerous.

d-1(1) Main line with 8...N7b6 9. Bd3

9. Bd3 (?)

This move anticipates transposing to the Rc1 system after

9... Nxc3

but Black can dodge with

9... Na4 !

with no problems after

10. Nxd5

[or 10. Nxa4 Bb4]

[or 10. O-O Nxb2 11. Qxb2 Qxc3 -+]

10... Qxd2+ 11. Kxd2 exd5 drawn: Adorjan-Ivkov 1980

This is worth knowing about, because it is not in all the books.

d-1(2) Main line with 8...N7b6 9. Nxd5

An attempt to avoid any theoretical novelties, but abandoning any pretence at keeping the White advantage.

9... Qxd2+ 10. Nxd2 exd5 11. Bd3 a5

= Karpov-Kasparov 1984/85 #47

d-1(3) Main line with 8...N7b6 9. a3

9... Nxc3

the pawn grab with ...Bb4 is rather risky

10. Qxc3

[10. bxc3 Nd5 11. e4

[11. c4 Bb4]

11... Qxc3]

10... Qxc3+ 11. bxc3 f6 12. Bh4 c5

= Euwe

d-1(4) Main line with 8...N7b6 9. Rc1

9... Nxc3 10. bxc3 Nd5 11. Bc4

[11. Bd3 Nxc3 12. O-O Bb4 13. a3 Qxa3 transposes above]

11... Nxc3

[11... Ba3 12. Rb1 Nxc3 13. Rb3 b5 14. Bd3 b4 Black can win a pawn but the Ba3 is dead for a long while]

12. O-O b5

[12... Bb4 is risky 13. a3]

13. d5

This is the only threatening continuation

[13. Qxc3 Qxc3 14. Rxc3 bxc4 15. Rb1 Ba6 16. Nd2 c5]

with better chances for Black]

13... exd5 14. Bxd5 cxd5 15. Rxc3 Bb4 16. Qxd5 O-O 17. Qxa8 Bg4

Black's chances are no worse

A1.1d-2 Main line with 8... Bb4

this more straightforward move leads to quieter play

9. Rc1 O-O

10. e4

[10. Bd3 e5 11. dxe5

[11. O-O exd4 12. exd4 f6 13. Bh4 Rd8 14. a3 Bxc3 15. bxc3 Nf8 16. Bg3 Be6 17. Rfe1 Bf7 18. c4

with a pull for White: Kasparov-Smyslov, 1984]

11... Nxc3 12. bxc3 Ba3 13. Rd1 Nxe5]

10... Nxc3 11. bxc3 Bd6

[11... Ba3 12. Rb1 e5

Walker 13. Bd3 Re8

[13... exd4 14. cxd4 Qxd2+ 15. Nxd2 Nb6 16. O-O Be6 17. Nb3 += Polu]

14. O-O b6 15. Qe2 Bb7 16. Rfd1 += Euwe]

This is all the theory you will ever need if White allows the Cambridge Springs. Play over each line, not to learn the moves by heart but to see all the different ideas. Once you know the ideas the moves will come naturally to you - perhaps better moves than are given in the notes!

A1.1e White avoids the Cambridge Springs

A1.1e-1 White avoids the Cambridge Springs after 5. Nf3

5... c6

White has tried

A. 6. Qc2

B. 6. Qb3

c. 6. e4

e-1(1) 6. Qc2

Now the usual attack can be easily met by

[6... Qa5 7. cxd5 Nxd5 8. e4 Nxc3 9. Bd2]

An active try is:

6... dxc4

[6... h6 is safer 7. Bxf6 Nxf6 8. e3 Be7 9. Bd3 O-O 10. O-O c5 11. dxc5 dxc4 12. Bxc4 Bxc5]

~ = Kotov-Panov 1938]

7. e4 b5 8. e5 h6 9. Bh4 g5 10. Nxg5 hxg5 11. Bxg5 Bb7

Compared to the normal Anti-Meran system (see below), White has played the inferior move Qc2 not g3. Black will get a good game with ...Qb6 and ...O-O-O. See the section on the Semi-Slav below.

e-1(2) 6. Qb3

Clearly the usual attack is not possible.

6...Be7 7. e3 O-O 8. Be2 b6 9. O-O Bb7 10. Rad1 h6 11. Bh4

Samikhovsky-Kasparian 1931. Now

11... Ne4

with good play for Black

e-1(3) 6. e4

Black cannot allow this pawn to remain.

6...dxe4 7. Nxe4 h6 8. Nxf6+

[8. Bh4 g5 9. Nxf6+ Nxf6 10. Bg3 Bb4+ with advantage: not

11. Nd2 ? 11... Ne4]

8... Nxf6 9. Bd2 c5 10. Bc3 Ne4

= **Subarev-Ryumin 1931**

A1.1e-2 White avoids the Cambridge Springs after 5. e3

5. e3

Again you play

5... c6

Now:

(1) A. 6. Bd3

(2) B. 6. a3

(3) C. 6. Qc2

6. Nf3 would transpose to normal lines.

e-2(1) 6. Bd3

6...Qa5

is still OK here but see note after move 7

7. Bh4 dxc4

[not 7... Bb4 8. Nge2 +=]

8. Bxc4 b5 9. Bd3

[9. Bb3 would be met the same way]

9... b4 10. Nce2 c5 11. Nf3 Bb7 12. O-O Rc8

= Ornstein-Sveshnikov 1977]

e-2(2) 6. a3

Plain enough!

6...Be7 7. Nf3 Ne4 8. Bxe7 Qxe7 9. Qc2

[or 9. Nxe4 dxe4 10. Nd2 f5 11. c5 O-O 12. Nc4 b6 13. b4 Ba6 14. Be2 Bxc4 15. Bxc4 a5 16. Qb3 Rfe8 17. O-O b5 18. Be2 a4

>/< Euwe-Bogolyubov 1941]

9... Nxc3 10. Qxc3 O-O 11. Be2 dxc4 12. Bxc4 b6 13. O-O Bb7 14. Rfd1 c5 15. dxc5 Nxc5

= Pirc-Rabar 1946]

e-2(3) 6. Qc2

An important idea as played at the highest level, but Black can equalise.

6...Qa5 7. cxd5 Nxd5 8. e4 Nxc3 9. Bd2 Qa4 ! 10. Qxc3 a5 11. Nf3 Bb4 12. Qc1

~ = Capablanca-Alekhine 1927

12... O-O

[12... Bxd2+ 13. Qxd2 Qb4 14. Bd3 Qxd2+ 15. Kxd2 Ke7 Neishtadt]

13. a3 Bxd2+ 14. Qxd2 e5 15. Rc1 exd4 16. Rc4 Qb5 17. Rxd4 Qc5

now not 18. Rxd7 Bxd7 19. Qxd7 Qc1+ 20. Qd1 Qxb2]

A1.1e-3 White avoids the whole QGD by playing the Catalan

The what? The Catalan is an opening which involves c2-c4 but not e2-e3. White holds back the e-pawn and instead plays the light-squared Bishop out to the long diagonal on g2. So how can White capture the c-pawn if Black takes it? Quite!

1. d4 Nf6 2. c4 e6 3. g3 d5 4. Bg2 dxc4 5. Nf3 b5!?

"Boy, did I underestimate this one!"

SCHILLER, Play the Catalan

This is a sneaky way of grabbing a pawn. White can play 5. Qa4+, but otherwise play is like the Abrahams' Variation game Seirawan-Korchnoi on page . Both Korchnoi and Karpov have tried this line, which is probably not totally sound but White will have to walk a tightrope to find the way to advantage.

If you don't fancy this line then uncoiling slowly with usual Slav-style moves will probably equalise. The game is too unforcing to give much detailed analysis.

I'll show you a game by Korchnoi and one by Karpov, and look at the latest theory.

6. a4

[The Karpov game went instead 6. Ne5 and White never broke up the Queen's-side pawn mass]

6... c6

The Korchnoi game went 7. O-O

The latest theory goes:

7. Ne5 Nd5 8. O-O

[Schiller recommends 8. axb5 cxb5 9. Nc3 Bb4

[or 9... Bb7]

10. O-O Bxc3 11. e4

which is splendidly messy

11... Bxb2 12. exd5

[12. Bxb2 Ne7 13. d5 O-O 14. Ba3 f6 15. d6 Nec6 16. Nxc6 Nxc6 17. d7 b4

[Not 17... Bxd7 18. Bxf8 Kxf8 19. e5 +/-]

18. dxc8=Q Rxc8

"unclear" OLL/NARVA]

12... Bxa1 13. Ba3 a5 unclear (!) BCO2 14. Qg4 Qf6 15. Rxa1 Ra6 16. Bc5 Nd7 17. Nxd7 Bxd7 18. Qe4

CHERNIN awaits tests...]

After 7. Ne5 Nd5 8. O-O:

8... Bb7 9. b3 cxb3 10. axb5 cxb5 11. Qxb3 a6 12. e4 Nf6 13. d5 Bc5 !

but still += BCO2

A1.2 The Semi-Slav

Why not a whole one? The ordinary line Slav goes

1. d4 d5 2. c4 c6 3. Nf3 Nf6 4. Nc3 dxc4 5. a4

and Black has tried the quiet 5...Na6, the active 5...Bg4 and the main line 5...Bf5. This last is a well known and popular line and is worth a look.

I have gone for the Semi-Slav because it seems easier to play into from other openings: if 1. c4 c6 2. e4 you have to play either a Caro-Kann with 2...d5 or a funny Indian system with 2...e5. But after 1. c4 e6 2. e4 d5 White has transposed into a lousy version of the French.

The Semi-Slav has two very popular main lines, (a) the Meran System and (b) the Anti-Meran Gambit. I'll show you an example of each but they are very fashionable systems with an awful lot of sharp theory to learn.

A1.2(a) The Meran System

6... dxc4 7. Bxc4 b5

The Meran system is characterised by this move.

8. Bd3 a6 9. e4 c5

10. e5

[The alternative is Reynolds' Variation 10. d5 c4 11. dxe6 fxe6 12. Bc2 Qc7 13. O-O Bc5 14. e5 Nxe5 15. Bf4 Bd6 16. Ng5 Bb7 17. Nxe6 Qc6 18. f3 Bc5+ 19. Nxc5 Qxc5+ 20. Kh1 O-O

a sharp position with good chances for Black]

10... cxd4 11. Nxb5 axb5 12. exf6 Qb6 13. fxg7 Bxg7 14. O-O Bb7 15. Bf4 O-O 16. Re1 Bd5 17. Ne5 Nxe5 18. Bxe5 Bxe5 19. Bxh7+ Kxh7 20. Qh5+ Kg7

and White recovers the piece with advantage.

A1.2(b) The Anti-Meran Gambit

1. d4 d5 2. c4 e6 3. Nc3 c6 4. Nf3 Nf6 5. Bg5 h6

This avoids the Gambit.

[The main line goes 5... dxc4 6. e4 b5 7. e5 h6 8. Bh4 g5 9. Nxc4 hxc4 10. Bxc4 Nbd7

White has a choice:

(a) 11. g3 Qa5 12. exf6 b4 13. Ne4 Ba6

and in this chaotic position White has favoured 14. Be3

or (b) 11. exf6 Bb7 12. g3

6. Bh4

[6. Bxf6 is the right move: the game might go 6...Qxf6 7. e4 dxe4 8. Nxe4 Bb4+ 9. Ned2 c5 10. a3 Bxd2+ 11. Qxd2 O-O 12. dxc5 Rd8 13. Qc2 Na6 14. Be2 Nxc5 15. O-O Bd7

which looks about equal but White's game is better for the moment: the Bd7 is not well-placed yet and the Queen's-side majority might roll]

6... dxc4 7. e4 g5 8. e5

[8. Bg3 b5]

We have now transposed into the main line of the Gambit.

8... Nd5

But this is new. This is Alatortsev's Variation, an even messier alternative to the main line of the Gambit.

9. Bg3 Bb4 10. Rc1 Qa5 11. Bxc4 Nxc3 12. bxc3 Bxc3+

13. Kf1 Bb4 14. h4 g4 15. Nh2 h5 16. f3 Nd7 17. fxg4 Nb6 18. gxh5 Nxc4 19. Rxc4 b6 20. Kf2 Ba6 21. Rxc6 Rd8 22. Ng4 Bc3 23. Rxc3 Qxc3 24. Qa4+ Kf8 25. Qxa6 Rg8 26. Bf4 Rxc4 27. Be3 Qc2+ 28. Qe2 Rxc2+ 0-1

These are great fun, and are superb counter-attacking systems for people with time to study, but the amount of theory really is too much to try as your first defence to 1.d4. I recommend some slower lines of the Semi-Slav, which are not so dynamic, but quite safe and should give you a good game.

Semi-slav theory

1. d4 d5 2. c4 e6 3. Nc3 Nf6

3...c6 keeps open the option of the Stonewall Dutch e.g. 3...c6 4. e3 f5, but in this section I'll also show you Abraham's Variation 3...c6 4. Nf3 dxc4

4. Nf3 c6

Most of your games will end up in this position. White can play the opening moves in a different order, e.g. 1. c4 2. Nf3 3. Nc3 4. d4

A1.2a Main-line Semi-Slav with 5. Bg5

5. Bg5

5... Nbd7

is an attempt to steer into the Cambridge Springs. After

6. e3 Qa5

we have got there.

A1.2b Main-line Semi-Slav with 5. e3

5. e3

As Black you should play

5... Nbd7

Now White usually continues:

6. Bd3

This is of course not forced and you may meet 6. Qc2 or 6. Be2. See Example games for 6. Qc2.

After 6. Bd3 Black has a choice between:

6...dxc4, The Meran System that we saw in action above, or

b-1 6... Bd6, the Tchigorin Variation, or

b-2 6...Bb4, the Romih Variation.

I'll show you these last two.

A1.2b-1 Semi-Slav with 6...Bd6

White now has a choice:

- (1) 7. e4, which is sharp
- (2) 7. c5, which is not dangerous
- (3) 7. O-O, probably best

b-1(1) Semi-Slav with 6...Bd6 7. e4

Still a critical line

7. e4 dxe4 8. Nxe4 Nxe4 9. Bxe4 O-O !

(Harding's "!")

10. O-O c5

[Black players have often tried 10... h6 e.g. 11. Bc2 e5 12. Re1 exd4 13. Qxd4 Bc5 14. Qc3

[or 14. Qf4]

14... Re8

[or 14... a5]

11. Bc2 Qc7 12. Qd3

White also has a choice:

[12. Re1]

[or 12. h3 cxd4 13. Qxd4 e5

[or 13... Ne5]]

[or 12. b3]

12... f5 ! 13. b4

[or 13. Rd1 cxd4 14. Qxd4 Bc5 15. Qh4 Nf6

Grinfeld-Bogolyubow 1926: with a fair game for black]

13... b6 14. dxc5 bxc5 15. Rd1 Be7 16. b5 Bf6 17. Rb1 Ne5 18. Qe2 = Portisch

b-1(2) Semi-Slav with 6...Bd6 7. c5

7. c5

An opportunity? But it takes all the pressure off d5 and Black can soon get ine5

7...Bc7 8. b4 e5 9. dxe5 Nxe5 10. Nxe5 Bxe5 11. Bb2 Qe7 12. Be2 O-O 13. Qc2 Bd7 14. O-O Rae8

Burn-Teichmann Hastings 1895

For the conclusion, see Example Games.

b-1(3) Semi-Slav with 6...Bd6 7. O-O

7. O-O

Probably the best preparation for e4.

7... O-O 8. e4 dxc4 9. Bxc4 e5 10. Bg5 Qe7

11. Re1

[11. d5 Rd8 ! (Euwe) and ...h6, ...Nd7-f8-g6]

10... Qe7 11. Ne2

= Tolush-Alatortsev 1947]

A1.2c White avoids Nc3

1. d4 d5 2. c4 c6 3. Nf3

[If White plays 3. Nc3 straight away just go 3...e6

[but White must be prepared to face 3... e5 !?]]

3... e6

A1.2c-1 White deviates with 4. Qc2

4...Nf6 5. Bg5

The outline of the Cambridge Springs can already be seen

[5. g3 Ne4 6. Bg2 Bd6 7. O-O O-O 8. b3 Nd7 9. Ba3 Bxa3 10. Nxa3 Qe7

Ilvitsky-Botvinnik 1952]

5... Nbd7 6. Nc3

See above

A1.2c-2 White deviates with 4/5. Nbd2

4. e3

[My computer always plays 4...Bd6 here, thinking perhaps that White can't organise e2-e4 as well as if Nc3 had been played. If White is so determined to play slowly I wonder if 4... f5 is worth a punt: White should certainly not chase the Bishop with 5. c5 Bc7 when ...e5 is bound to come quickly]

4... Nf6 5. Nbd2

The best strategy against these Nbd2 systems is to take advantage of the lack of pressure on d5 by playing ...c5(!). This of course loses a tempo, but it hopes to show that White has misplaced the Knight on d2 and will not be able to defend the d4 point so easily.

[White often continues 5. Bd3 Nbd7 6. Nbd2

[White can also play 6. O-O when one possible strategy is 6...Ne4 7. Nc3 f5 - see the Stonewall below]

6... c5! Our key move

7. b3

[or 7. O-O Be7 8. cxd5 exd5 9. b3 cxd4 10. exd4 O-O 11. Bb2 Re8 12. Ne5 Bb4 13. a3 Bxd2 14. Qxd2 Ne4 15. Qc2 Qb6 16. a4 Nxe5 17. dxe5

Alekhine-Soultanbieff 1933

Now 17... Bd7! 18. Bxe4

[Not 18. a5 Qb4 (no Ra4)]

18... dxe4 = Alekhine:

the opposite-coloured Bishops reduce the excitement of the extra pawn which at the moment blocks the line of the Bishop on b2]

7... cxd4 8. exd4 b6 9. O-O Bb7 10. Qe2 Be7 11. Bb2 O-O

= Harding]

5... c5!

Here we go again

6. Be2

[6. Bd3 Nc6!?!]

6... Nc6 7. O-O cxd4 8. exd4 Be7 9. a3 O-O 10. c5 Ne4 11. Qc2 Bf6

"unclear" Keres-Nei Tallinn 1973]

A1.2d Main line Abrahams variation [D31]

One more Semi-Slav option you should know about:

1. d4 d5 2. c4 e6 3. Nf3 c6 4. Nc3 dxc4

This odd move order looks a bit like a Meran, but Black means to create more trouble with those Queen's-side pawns. It's less well-known, not perhaps as sound, but easy to learn.

Let's look at a quick game from Erik Teichmann:

Arkell-Teichmann 1985

1. d4 d5 2. c4 e6 3. Nf3 c6 4. Nc3 dxc4 5. a4 Bb4 6. e4

Natural but as we shall see, possibly over-optimistic.

6... b5 7. Bd2 a5 8. axb5 Bxc3 9. Bxc3?! cxb5 10. b3 Bb7 11. d5

In another game White tried

[11. bxc4 b4 12. Qb1 f5

Lupano-Korylov 1954 which continued:

|| 3. Bd3 ♘f6 14. ♘g5 ♙e7 15. ♖xa5 ♖xa5 16. Bxb4 ♖a1 ||

with a complicated game in which Black has the better chances]

11... Nf6

We will examine

d-1 5. e4

d-2 5. e3

d-3 5. a4

Other moves are possible, for example:

5. g3 (see Catalan),

5. Ne5!? (see Djuurhuus-Volzhin in d-3 below) or

5. Bg5 upon which Black can try

[5. Bg5 Qc7 6. a4 Bb4 7. e4 b5 8. Be2 Bb7 9. axb5 Bxc3+ 10. bxc3 cxb5

Black is not worse]

A1.2d-1 Abrahams' Variation with 5. e4

This is a critical line.

5. e4 b5

[6. e5!?

6. a4 Bb4 7. Bd2 a5 8. axb5 Bxc3 9. bxc3!

Better than Arkell's Bishop move.

9...cxb5

White must make something of the central mass or the Queen's-side pawn will win for Black.

10. Rb1 Bd7 11. Qc2 Nf6 12. e5 Nd5 13. Ng5

This old analysis shows Black to be at least equal here

A1.2d-2 Abrahams' Variation with 5. e3

5. e3 b5 6. a4

This move-order may avoid the ...Bb4 manoeuvre but invites other trouble

6...b4 7. Ne4 Ba6 8. Qc2 Qd5 9. Ned2 c3

10. bxc3 bxc3 11. Qxc3 Bxf1 12. Nxf1 a5 13. Ba3 Bxa3 14. Qxa3 Na6 15. Ng3 Nb4 16. Rc1

with good chances for Black in an unclear position.

A1.2d-3 Main line Abrahams' Variation with 5. a4

This is the main line.

5. a4 Bb4

White usually plays here 6. e3 but can also try:

[6. g3 a5 7. Ne5 Nf6 8. Bg2 Nd5 9. Bd2 Nb6 10. e3 N8d7

Seirawan -Korchnoi 1981 with better chances to Black]

or

[6. Bd2 a5 7. Qb1 Nd7! 8. e4 Nb6! 9. Be2 f5!

Piket, again with better chances to Black]

After 5. a4 Bb4:

6. e3 b5 7. Bd2

[7. Ne5 Qb6 8. Qg4 Kf8 9. g3 Nf6 10. Qf3 Bb7 -+ Speelman-Flear 1986]

7... Bxc3 8. Bxc3

8... a5!

The key move. You can also play

7...a5

when

8. axb5 Bxc3! 9. Bxc3

leads to the same position.

Novel play arises in this line on

[9. bxc3!? cxb5 10. Qb1 Ba6 11. Be2 Nc6 12. O-O Nf6 13. e4 Boleslavsky-Randvjir 1955

Now 13... O-O ,...Qc7,...Rfb8 intending ...b5-b4 is about equal]

or earlier after 7...a5:

[8. Qc2 Nf6 9. Ne5 O-O 10. Be2 Bb7 11. O-O Qb6 12. f4 Nbd7

Djurhuus-Volzhin 1992: Black returned the pawn with ...b4, and played ...c5]

9. axb5 cxb5

10. b3

[10. d5 should be met by 10...Nf6 11. dxe6 Qxd1+ 12. Kxd1 Ne4 -+ as in Donner-Pliester]

10... Bb7

Now 11. d5!? Nf6 12. bxc4 b4! 13. Bxf6 Qxf6

(As in Gavrikov-Keraser 1982)

14. Qa4+ Nd7 15. Nd4 Unclear! See example games

Instead after the better

11. **bxc4 b4**

White now has two tries:

(a) 12. *Bd2*

(b) 12. *Bb2*

(a) 12. *Bd2 Nf6* 13. *Bd3 Nbd7* 14. *O-O O-O* 15. *Qc2 Qc7* 16. *e4 e5*

in this important position experience has shown Black to have fully equal practical chances after:

(a-i) 17. *Nxe5 Nxe5* 18. *dxe5 Ng4*

(a-ii) 17. *Rfe1 Rfe8* 18. *c5*

and here Black has done all right with

[18... *exd4* Neverov-Kramnik 1991]

or [18... *Ba6* Flear]

or [18... *h6* Soltis]

(a-iii) 17. *d5 Nc5*

(b) 12. *Bb2 Nf6* 13. *Bd3 Be4*

[13... Nbd7 14. Qc2 O-O 15. O-O += Saeed-Pliester 1982]

14. Qc2 ? 14... Bxd3 15. Qxd3 a4 Polugaevsky]

Example games in the Semi-Slav:

Burn - Teichmann (Hastings) [D46] 1895

1. d4 d5 2. c4 e6 3. Nc3 Nf6 4. Nf3 c6 5. e3 Bd6 6. Bd3 Nbd7 7. c5 Bc7 8. b4 e5 9. dxe5 Nxe5 10. Nxe5 Bxe5 11. Bb2 Qe7 12. Be2 O-O 13. Qc2 Bd7 14. O-O Rae8 15. Rad1 Bb8 16. Nb1 Ne4 17. Nd2 f5 18. Bd4 Ng5 19. Bd3 f4 20. Kh1 Qf7 21. Nf3

The White pawn on d7 shelters the Black King, While the useless White pieces can only sit around and watch their own King get mated.

0-1

A1.3 The Exchange Variation

1. d4 d5 2. c4 e6 3. Nc3 Nf6 4. cxd5 exd5

White's approach in this line has many advantages: the position is simplified, White has a permanent structural advantage and a clear plan to follow, and Black's counterplay is limited. White can now adopt two plans:

A1.3a The minority attack with b4 and b5

White plans to play b4-b5xc6 when your c-pawn will be backward on an open file. If nothing else happens, this can be enough to lose the game.

- King's-side action using the semi-open e-file and particularly the outpost at e4. (see several games below)
- Temporary delay and permanent simplification with ...a5, forcing White to adopt a3 and b4 or make other concessions (Smagin and Ekstroem games)
- The creation of a passed a-pawn with ...a6, when b5 is met by ...c6xb5 (white axb5) and ...a5 (I have no example of this plan).
- Meet b5 with ...c5
- Prevent b5 by playing ...b5 and using the strong c4 point (see the Van der Sterren game below)

5. Bg5 Be7 6. e3 c6 7. Bd3 Nbd7

8. Qc2

[8. Nf3 loses the initiative straightaway: 8...Ne4 9. Bxe7 Qxe7=]

8... O-O 9. Nf3 Re8 10. O-O Nf8 11. Rab1 Ne4

12. Bxe7 Qxe7 13. Ne5 Bf5 14. Nxe4 Bxe4 15. Bxe4 dxe4 16. b4

[16. Qxe4 f6]

A1.3b Central break with f3 and e4

White's other plan is less popular but more dynamic. The King's Knight come to e2, and then f2-f3 will prepare e2-e4. Black's best plan is to hit back. We may see a bit more of this plan since the following advertisement for it:

Kasparov - Short (10) [D35] WCh, 1994

1. d4 d5 2. c4 e6 3. Nc3 Nf6 4. cxd5 exd5 5. Bg5 Be7 6. e3 O-O 7. Bd3 Nbd7 8. Nge2 Re8 9. O-O Nf8

Normal is 9...c6

10. b4!

10... a6

[10... Bxb4? leads to trouble after 11. Bxf6]

11. a3 c6 12. Qc2 g6 13. f3 Ne6 14. Bh4 Nh5 15. Bxe7 Rxe7

[15... Qxe7!?!]

16. Qd2 b6? 17. Rad1 Bb7 18. Bb1 Nhg7 19. e4

White has his cake and is eating it too: he has succeeded in playing both b2-b4 and e2-e4, and Black has no counterplay. Black soon collapsed.

Below you can see some ways of fighting against this idea, particularly if White risks castling Queen's-side.

Example Games in the Exchange Variation

Black plays solidly

Steinbacher, M - van der Sterren, P (5) [D36] Ostend, 1989

1. d4 Nf6 2. c4 e6 3. Nf3 d5 4. Nc3 c6 5. cxd5 exd5 6. Bg5 Be7 7. Qc2 g6 8. e3 Bf5 9. Bd3 Bxd3 10. Qxd3 Nbd7 11. O-O O-O 12. Bxf6 Nxf6 13. Rab1 Bd6 14. b4 b5

Black defends his Queen's-side solidly. White tries a Knight advance.

15. Ne5 Bxe5 16. dxe5 Nd7 17. f4 a5 18. a3 Nb6 19. Ne2 axb4

20. axb4 Nc4 21. Nd4 Qb6 22. Ra1 Ra4 23. Rxa4 bxa4 24. Ra1 Ra8 25. Nc2 a3 26. Ra2 Ra7 27. Qd4 Qxd4 28. exd4 f6 29. exf6 Kf7 30. Kf2 Kxf6

Black now wins methodically.

31. Ne3 Nxe3 32. Kxe3 Kf5 33. Kf3 h5 34. h3 h4 35. Ke3 Ra4 36. Kd3 Kxf4 37. Kc3 Ke3 38. Kb3 Ra8 39. Kc3 Ra7 0-1

Black wins with a King's-side attack:

??-?? [D34]

1. d4 Nf6 2. c4 e6 3. Nc3 d5 4. cxd5 exd5 5. Bg5 Be7 6. Qc2 O-O 7. e3 Re8 8. Bd3 Nbd7 9. Nf3 Nf8 10. O-O c6 11. Rab1 Ng6 12. b4 a6 13. a4 Bd6 14. b5 axb5 15. axb5 h6 16. Bxf6 Qxf6 17. bxc6 bxc6 18. Rb6 Bg4 19. Nd2 Re6

This neat move is useful for attack and defence: if Rxc6, then Bxh2+ wins the exchange. GM Nigel Davies in an article praises this type of rook manoeuvre for Black: the Rook can move to (say) the g-file and cause problems for the White King. As it happens White soon digs a pit into which he or she falls!

20. Na4 Nh4 21. g3 Nf3+ 22. Nxf3 Qxf3 23. Re1 Bh3 24. Bf1 Bf5 25. e4 Rxe4 26. Qxc6 Rxe1 27. Qxa8+ Kh7 28. Nc3 Bh3 0-1

Davidovic,A - Smagin,S (4) [D36] It-open, Dortmund, 1989

1. Nf3 d5 2. d4 Nf6 3. c4 e6 4. Nc3 c6 5. cxd5 exd5 6. Qc2 Be7 7. Bg5 g6

This plan is unusual.

8. e3 Bf5 9. Bd3 Bxd3 10. Qxd3 Nbd7 11. O-O O-O 12. Rab1 a5 13. a3 Re8 14. Rfc1 a4 15. Qc2 Qa5 16. Re1 Bd6 17. Bh4 Ne4

This plan is very familiar!

18. Nxe4 dxe4 19. Nd2 Qh5

Black is well-placed for a quick King's-side attack; White's intended Queen's-side initiative is nowhere to be seen.

20. Bg3 Bxg3 21. hxg3 Nf6 22. b3 Ra5 23. bxa4 Ng4 24. Nf1 Rf5 25. Rxb7 c5 26. Re2 Qh6 27. Qb3 Re6 28. f3 Rh5 29. fxg4 Rh1+ 30. Kf2 Rxf1+ 0-1

Von Gleich,A - Ekstroem,R (1) [D36] Lugano, 1989

1. d4 d5 2. c4 e6 3. Nc3 Be7 4. Nf3 Nf6 5. cxd5 exd5 6. Bg5 c6 7. Qc2 h6 8. Bxf6 Bxf6 9. e3 O-O 10. Bd3 Re8 11. h3 Nd7 12. O-O Be7 13. a3 Bd6 14. b4 Nf6 15. Rfc1 Qe7 16. Ra2 a5 17. bxa5 Rxa5 18. a4 Ne4 19. Bxe4 dxe4

The familiar ...Ne4 move leads to a quick King's-side kill.

20. Nd2 Be6 21. Raa1 Bxh3 22. Qxe4 Qd7 23. Qh4 Rg5 24. g3 Bg4 25. Qh1 Bxg3 26. Nce4 Rh5 27. Qg2 Bh2+ 28. Kf1 Kh8 29. Ke1 Bc7 0-1

Yermolinsky - Shipman,W (3) [D36] MCC, 1989

1. d4 Nf6 2. c4 e6 3. Nf3 d5 4. Nc3 c6 5. Bg5 Nbd7 6. cxd5 exd5 7. e3 Be7 8. Qc2 O-O 9. Bd3 Re8 10. O-O Nf8 11. h3 Nh5 12. Bxe7 Qxe7 13. a3 g6 14. b4 Ne6 15. b5 Ng5 16. Nxc6 Qxc6 17. Kh2 f5 18. bxc6 bxc6 19. Na4 Re6

White has created a weak pawn on c6 but Black doesn't care too much!

20. Nc5 Rf6 21. Be2 f4 22. Bxh5 Qxh5 23. f3 fxe3 24. Qd3 Bxh3 25. gxf3 Re8 26. Nd7 Rf4 27. Rae1 Re7 28. Qa6 Qf5 29. Ne5 Rxe5 30. dxe5 Rh4 0-1

White wants to play in the centre:

Deze,A - Tadic,K (1) [D35] Novi, 1989

1. d4 Nf6 2. c4 e6 3. Nc3 d5 4. cxd5 exd5 5. Bg5 Be7 6. e3 O-O 7. Bd3 c6 8. Qc2 h6 9. Bh4 Re8 10. Nge2 Nbd7 11. f3 c5

A change of emphasis: White wants to advance in the centre with e2-e4, so Black immediately hits at the d-pawn with ...c7-c5.

12. O-O b6 13. Rad1 Bb7 14. Bf2 cxd4 15. exd4 a6 16. Qb3 b5 17. a4 b4 18. Na2 Qb6 19. Rc1 Bd6

White's plan has come to nothing.

20. Qd1 Nf8 21. Bg3 Ne6 22. Bxd6 Qxd6 23. Qd2 a5 24. Bb5 Re7 25. Ng3 Qb6 26. Nf5 Rc7 27. Rfe1 Kf8 28. Rxc7 Qxc7 29. Nc1 Bc6 30. Bxc6 Qxc6 31. Nd3 Re8 32. b3 Qc3 33. Qxc3 bxc3 34. Rc1 Rc8 35. Nd6 Rc6 36. Nb5 c2 37. Ne5 Nf4 0-1

White castles Queen's-side:

Paduch,A - Ghafour,Y (8) [D35] A.Kotov memorial, Singapore, 1990

1. d4 d5 2. c4 e6 3. Nc3 Nf6 4. Nf3 Nbd7 5. cxd5 exd5 6. Bf4 Be7 7. e3 c6 8. h3 O-O 9. Bd3 Re8 10. Qc2 a5 11. g4 Nf8 12. O-O-O a4

Black was all ready to meet White's King on the Queen's-side.

13. a3 Qa5 14. Ne5 Be6 15. Bf5 c5 16. Kb1 Rec8 17. Qe2 c4 18. e4 dxe4 19. Bxe4 Bd5

Tisdall,J - Inkirov,V (5) [D36] Gausdal, 1990

1. d4 Nf6 2. c4 e6 3. Nc3 d5 4. cxd5 exd5 5. Bg5 Be7 6. Qc2 c6 7. e3 Nbd7 8. Bd3 O-O 9. Nge2 Re8 10. h3 Nf8 11. g4 b5 12. O-O-O a5 13. Ng3 a4 14. Kb1 Qa5 15. Nce2 Bd7 16. Nf5 Bxf5 17. gxf5 Rac8 18. Rhg1 Kh8 19. Bxf6 Bxf6

An exciting opposite-side castling position has arisen.

20. Nf4 Nd7 21. Rc1 a3 22. b3 c5 23. Nxd5 c4 24. Nxf6 Nxf6 25. bxc4 bxc4 26. Bxc4 Ne4 27. Ka1 Nd2 28. f6 Rxc4 O-1

A2 Playing actively against 1. D4

The Stonewall Attack

I will follow some lines from Fine in his 1943 book *The Ideas behind the Chess Openings*. You will soon see the connection with this section.

Start: 1. d4 d5 2. e3 Nf6 3. Bd3

[3. f4 is sometimes played to avoid the 3...Nc6 line]

3... c5

[More to the point is 3... Nc6 4. f4 [

or 4. c3 e5

] 4... Nb4 5. Nf3 Nxd3+ 6. cxd3 g6 7. Nc3 Bg7 8. O-O O-O]

4. c3 Nc6 5. f4

Now play might go:

5... e6 (which doesn't look quite right, as it blocks the Bc8)

6. Nf3 Bd6 7. O-O O-O 8. Ne5 Qc7

White's threatening Ne5 needed some response; Black could also try to occupy e4

9. Nd2 Re8 10. g4 (DIAGRAM)

with a crushing attack.

This is the ideal Stonewall position.

Let's go back to the first diagram.

Instead, we might try for Black 5... Bg4,

and play then might go 6. Nf3 e6 7. Nbd2 Bd6 8. h3 Bh5 9. b3 cxd4 10. cxd4 Rc8 (DIAGRAM)

Black is comfortable

Because Black can see what White is up to, Black can arrange the development to counter it. White's opening plan is not camouflaged enough to stop Black from seeing what is going on and opposing it, and the opening moves are not flexible enough to try any other plan. This is why you don't see the Stonewall very often among stronger players.

One place where the Stonewall formation will not go away is *Black* playing it in the Dutch Defence. Why is this more common?

- White, starting first, is usually trying to get an advantage and won't play just to equalise with moves like Bf4, Bxd6, Ne5 and f4.
- Instead, White will often adopt an attacking formation on the Queen's side to start with and so there is a tendency for each side to attack on opposite sides.
- White often plays g3 and Bg2, creating a slow game with a slightly weakened King's side. Black can hope to get the ...f4 break in at some point.

This may help explain why you see the Stonewall is a better idea played a move behind in the Dutch Defence than played straight away as White. Perhaps the real reason is that World Champion Mikhail Botvinnik kept playing and winning with it for decades. Take a look at these games:

A2.1 The Dutch Defence, Stonewall Variation

Rabinovitch - Botvinnik (Ussr Ch'p, 1927)

1. d4 e6 2. c4 f5 3. g3 Nf6 4. Bg2 Be7 5. Nc3 O-O 6. Nf3 d5 7. O-O c6 8. Qc2 Qe8 9. Bf4 Qh5 10. Rad1 Nbd7 11. b3 Ne4 12. Ne5 Ng5

[12... Bf6 is better, says MB]

13. h4

[13. f3 Nh3+ 14. Bxh3 Qxh3 15. e4 += MB]

13... Ne4 14. Bf3 Qe8 15. Nxd7 Bxd7 16. Kg2 Bb4

White seems to have defended more than got on with his own plans. He now makes a mistake:

17. Bxe4 ? 17... fxe4 18. Rh1 Qh5 19. f3 Qg6 20. Kf1 e5 21. dxe5 Rxf4 22. gxf4

Black has some clear achievements: the open g-file, the two bishops, the upset White King.

22... Qg3

threats ...Bc5/...e3

23. Nxe4 dxe4 24. Rxd7 Bc5 25. e3 Qxf3+ 26. Qf2 Qxh1+ 27. Ke2 Qh3 28. f5 Qg4+ 29. Kd2 Rf8 30. e6 Qxf5 31. Qxf5 Rxf5 32. Rxb7 Rf2+ 33. Ke1 Rf6 34. b4 Bxe3 0-1

Another decisive King's side attack:

Steiner - Botvinnik, Groningen, 1946

1. d4 e6 2. c4 f5 3. g3 Nf6 4. Bg2 Bb4+ 5. Bd2 Be7 6. Nf3 d5 7. Nc3 c6 8. O-O O-O 9. Bf4 Qe8 10. Qc2 Qh5 11. Rae1 Nbd7 12. Nd2

Aiming at e4, but too slowly. Another plan is to attack c6 with the b-pawn.

12... g5 13. Bc7 Ne8 14. Be5 Nxe5 15. dxe5 f4

Black's plans are well-advanced; e4 will now be answered by ..f3

16. gxf4 gxf4 17. Nf3 Kh8 18. Kh1 Ng7 19. Qc1 Bd7 20. a3 Rf7 21. b4 Rg8

Making use of the open g-file

22. Rg1 Nf5 23. Nd1 Rfg7

Black has a winning position

24. Qxf4 Rg4 25. Qd2 Nh4 26. Ne3 Nxf3 27. exf3 Rh4 28. Nf1 Bg5 0-1

if the Q moves, ...Bf4 forces mate.

Here's an important game against a powerful rival.

Flohr - Botvinnik (10) Match, 1933

1. d4 e6 2. c4 f5 3. g3 Nf6 4. Bg2 Be7 5. Nc3 d5 6. Nf3 c6 7. O-O O-O 8. b3

[8. Bf4 is better, says Botvinnik, or 8. Qc2 Qe8 9. Bg5 with Bxf6]

8... Qe8 9. Bb2 Nbd7 10. Qd3

[10. Ng5 Bd6 11. f4 Botvinnik]

10... Qh5 11. cxd5

[11. Bc1 Botvinnik]

11... exd5 12. Nd2

[12. Ne1 and f4]

12... Ne4 13. f3

[13. f4 is now met by 13... Nxd2 14. Qxd2 Nf6 when White cannot really hope to get the N to e5]

13... Nxc3 14. Bxc3 f4 ! 15. Rfe1 Bd6 16. Nf1 Rf7 17. e3 fxg3 18. Nxg3 Qh4 19.Nf1 Nf6 20. Re2 Bd7 21. Be1 Qg5 22. Bg3 Bxg3 23. Nxg3 h5!

the final phase

24. f4 Qg4 25. Rf2 h4 26. Bf3

[26. h3 Qe6 27. Nf1 Ne4 is still -+]

26... hxg3 27. Bxg4 gxf2+ 28. Kg2 Nxg4 29. h3 Nf6 30. Kxf2 Ne4+ 0-1

And lastly, a more complicated game from an early tournament:

Yudovitch - Botvinnik, 1934

1. c4 f5 2. d4 Nf6 3. g3 e6 4. Bg2 Be7 5. Nf3 d5 6. O-O O-O 7. Nc3 c6 8. Qc2 Qe8 9. Bf4

[9. Bg5 Chekhover]

9... Qh5 10. b3 Nbd7 11. Rad1 Kh8 12. Kh1

a loss of tempo, and perhaps not even a better square

12... Rg8 13. e3 g5 14. Bc7 Ne8 15. Be5+ Nxe5 16. Nxe5 Nf6 17. f3

the right plan for White

17... Bd6 18. e4 Nd7 19. g4

[19. Nxd7 Bxg3]

19... Qe8 20. Nxd7 Bxd7 21. e5 Bb4 22. gxf5 exf5 23. cxd5

23... Bxc3 24. dxc6 risky 24... Bxc6 25. Qxc3 Qe6 26. Qd2 Bd5 27. Rc1 Rg7 28. Rc2 f4 29. Qc1 Rag8 30. h3 h5 31. Kg1 g4 32. hxg4 hxg4 33. Kf2 Rh7 34. Rh1 g3+ 35. Ke1 Rxh1+ 36. Bxh1 Qh6 37. Bg2

the last move before the time-check

37... Bc6

[37... Be6]

38. a4 Bd7

going for complications instead

[38... Bd5]

39. d5 Bf5 40. Rc7 Qh2 41. Qb2 Qg1+ 42. Bf1 Qe3+ 43. Be2 Be6 44. Qc2 Rg7

45. dxe6

[45. Rc8+ Bg8 46. Qf5 and Rxc8+, getting perpetual]

45... Qf2+ 46. Kd2 Qd4+

controlling d8

47. Ke1 Rxc7 0-1

Since Nigel Short has ventured the Stonewall on occasion interest in the opening has grown again.

Martin - Troger [A94] 1995

1. Nf3 f5 2. d4 Nf6 3. g3 e6 4. Bg2 Be7 5. O-O O-O 6. c4 d5 7. b3 c6 8. Ba3 Bd7 9. Bxe7 Qxe7

Black has played it the old-fashioned way: more interest recently has been in the idea of parking the Queen's Bishop on b7. White has responded with another traditional recipe - exchange off Black's good bishop and milk the dark squares.

10. Nc3 (?)

Martin was unhappy about this natural move afterwards. Either

[10. Nbd2 Be8 11. Ne5 Nbd7 12. Ndf3 Bh5]

or

[10. Qc1 Be8 11. Qa3 Qxa3 12. Nxa3 Nbd7]

could have been tried, but Black is by no means losing either game.

10... Be8 11. Qc2 Nbd7 12. cxd5 cxd5!

[Not 12... exd5 13. Qxf5 Ne4 14. Nxd5 cxd5 15. Qxd5+ Bf7 16. Qxb7]

13. e3 Bh5 14. Rfc1 Bxf3 15. Bxf3

= + Martin

15... Rac8 16. Qb2 Nb6

[16... Nb8]

17. a4 g5 18. a5 Nbd7 19. a6 b6 20. Be2 Nb8

Right idea but too late: White is now better.

21. Nb5 Nc6 22. Rc2 Nd7

[22... Nb4 23. Rxc8 Rxc8 24. Qa3]

23. Rxc6

else ...Nd7-b8 and Black is ready to attack the King

23... Rxc6 24. Nxa7 Rc7 25. Nb5 Rcc8 26. a7 Nf6 27. Qa2

27... Kg7 28. Qa6 Qd8 29. Qb7+ Kg6 30. Ra6 Ra8 31. Nc7 Qe7 32. Qxb6 Qd8 33. Nxa8 Qxa8 34. Qxe6 Rf7 35. Bd3 1-0

A2.2 White avoids the Stonewall

There is no Exchange Variation against the Dutch but there are some annoying ways for White to avoid the Stonewall. You can avoid all these by playing first ...d5, ...e6, ...c6 and ...f5, but you must then face the Exchange QGD.

1. d4 f5

A2.2a Modern System with Bg5xf6

2. Nc3 Nf6 3. Bg5 d5 4. Bxf6 exf6 5. e3 Be6 6. Bd3 g6

This is currently very popular. I offer you a selection of games in the examples section.

A2.2b Staunton Gambit with e4

2. e4 fxe4 3. Nc3 Nf6

Now White can play:

(a) 4. Bg5 Nc6 5. d5 Ne5 6. Qd4 Nf7 7. Bh4

[7. Bxf6 exf6 8. Nxe4 f5 9. Ng3 g6 10. O-O-O Bh6+ 11. f4 O-O 12. Nf3 Bg7 13. Qd2 b5 14. Nd4 Nd6

= BCO2]

7... g5 8. Bg3 Bg7 9. O-O-O

[9. Nxe4 O-O]

9... c6 =+ BCO2

(b) 4. f3

4... Nc6

[4... d5 5. fxe4 dxe4 6. Bg5 Bf5 7. Bc4 e6

[7... Nbd7 8. Nge2 Nb6 9. Bb3 Qd7 = BCO2]

8. Nge2 Bb4 9. O-O c6 =]

5. fxe4 e5 6. dxe5 Nxe5 7. Nf3 d6 8. Bf4 Ng6]]

A2.2c Korchnoi Gambit with g4

Korchnoi has offered a number of gambits with g2-g4, making use of the target on f5.

See the example game Menadue-Pert.

A2.2d Others

These shouldn't be any problem

BCO2 gives:

2. Qd3 d5 3. Bf4 e6 4. Qg3 Na6 5. e3 c6 = +

Ivkov

Examples of White avoiding the Dutch

Karayannis-Bellin 1993

1. d4 e6 2. c4 f5 3. e4

This almost forgotten gambit is not much worse than the others which surface sporadically. Even though dubious, all such gambits require precise defence from Black. -- BELLIN

3... fxe4 4. Nc3 Nf6 5. g4 h6 6. h4 d5 7. Nh3 Nc6 8. Nf4 e5 9. Ng6

[9. dxe5 Nxe5 x f3]

[9. Nfxd5 exd4 10. Nxf6+ Qxf6 11. Nd5 Bb4+ is also fine]

9... Bxg4 10. Qa4

White insists on being shown, but 10. Be2 was better

10... exd4 11. Nxb8

[11. Nxd5 Nxd5 12. cxd5 Bb4+ 13. Bd2 Bxd2+ 14. Kxd2 Qxd5 and the White King will not survive ...e3+]

11... dxc3 12. bxc3 d4 13. Rb1

[13. Ng6 dxc3 14. Ne5 Bb4 15. Nxc6 Qd2+ 16. Bxd2 cxd2#]

[13. Bh3 Bxh3 14. Rxh3 Qd7 15. Rg3 Bd6 is very good for Black]

13... dxc3 14. Rxb7

[14. Bh3 Qd3]

[14. Ng6 Qd7 and White is all but paralysed]

14... Qd7 15. f3

[15. Rb5 Bb4 16. Rxb4 Nxb4 17. Qxd7+ Kxd7]

[15. Bh3 Bxh3 16. Rxh3 Bb4 17. Rxb4 Nxb4 18. Qxb4 Qxh3 19. Ba3 O-O-O]

15... exf3 16. Be3 Bc5 17. Rxc7 Qd2+ 18. Bxd2 f2#

A triumph for the spear-carriers

Menadue - Pert 1995

1. d4 e6 2. Nf3 f5 3. h3 Nf6 4. g4 b6

Normally White would try to blot this out by d5 but there is no Pc4

5. gxf5 exf5 6. Bg2 Bb7 7. Bg5 Be7 8. Nc3 O-O 9. h4

White is wasting too much time on attacking-looking moves but has no real plan.

[9. d5!?]

9... Qe8 10. Qd3 Nc6 11. O-O-O

[11. Qxf5 Nb4 12. O-O-O Ne4 -+]

B. English opening

This subtle system is out to stop you playing ...d5, and then taking over the centre or Queen's-side later.

B1 Playing solidly against 1. c4

The ...e6 system is a nice counter to the English; ...c6 is OK as a system as long as White does not transpose into something unfamiliar to you.

1. c4

1... e6

[1... c6

Now

(a) 2. Nf3 is OK

2... d5 3. b3 Nf6 4. Bb2 Bg4

[or 4... Bf5]

BUT

(b) 2. e4 d5 3. exd5 cxd5 4. d4 Nf6 5. Nc3 e6 6. Nf3 Bb4 is a Caro-Kann or Nimzo-Indian line which is OK for Black but is outside the scope of the repertoire I recommend]

2. Nf3 d5 3. b3 c6 4. g3 Nf6

An alternative system is:

Kurajica [A13] Agincourt Defence (French-English), 1995

1. c4 e6 2. Nf3 d5 3. g3 c6

offering to transpose into standard QP lines

4. b3

insisting on independent lines

[4. d4]

[4. Bg2 dxc4 5. Qc2 b5 6. a4 Bb7 -/+ Carls-Nimzovitch 1925]

[4. Qc2 Nf6 5. Bg2 a5 6. O-O Na6 7. a3 Be7 8. d4

[8. b3]

8... O-O 9. Nbd2 b6 Naranja-Larsen 1973]

4... b5

Black intends to bite the c-pawn until it screams in pain " Benjamin/Schiller

5. Bg2 Ba6

6. cxd5

[6. d3 Qb6 != Kurajica]

6... cxd5 7. O-O Nf6 8. Bb2 Be7 9. d3 O-O

10. e4

White could also try:

[10. Nbd2 Nc6 11. a3

[11. Rc1 Qb6 =+ Masic-Kurajica 1972]

11... b4 12. axb4 Nxb4 13. Ne5 Qb6 = Romanishin-Kurajica 1977]

[10. Ne5!?! is a suggestion of Watson]

10... dxe4 11. dxe4 b4 =+ Hartoch-Kurajica 1974 =

B2 Playing actively against 1. c4

Your Dutch-style system is a fine counter to the English. The first time I ever tried it I beat a 140-grade player in about 30 moves.

Theory of the Anglo-Dutch

1. c4 e5 2. Nc3

This is the Sicilian Reversed line of the English Opening, sometimes called the King's English. Black can play two lines with a Dutch feel, playing on the second move either 2...d6 or 2...Nc6. The first risks being met by 3. d4 (if that is a risk), the second may not be quite the right square for the Knight. If you play the Closed Sicilian as White, this must be the best choice for you.

Example lines go:

After 2... d6:

(a) 3. d4 as in Hubner-Kasparov m1 1979

(b) 3. Nf3 f5

[or 3... Bg4 idea 4. g3 Bxf3 5. exf3 Nc6]

4. g3 Nf6 5. Bg2 Nc6 6. O-O Be7

[or 6... g6]

(c) 3. g3 f5

[or 3... Be6 4. Bg2 c6]

After 2...Nc6:

3. Nf3 f5

4. d4 e4

Now White has a number of moves:

(a) 5. Bg5

e.g. 5... Be7 6. Bxe7 Ngxe7 7. Nd2 Nxd4 8. Ndx e4 Nec6 9. Nd2 O-O 10. g3 d6 11. Bg2 f4 12. O-O fxg3 13. hxg3 Bg4

(b) 5. Ng5 h6

[or 5... Be7 6. Nh3]

[or 5... Nf6 6. e3 and now

6... h6

[6...g6]

7. Nh3 g5

after 5...h6 White can retreat with

6. Nh3

[6...g5!??]

or spuddle with

6. Nd5

(c) 5. Nd2

as in Miles-Chaves

Instead of the immediate 3...f5 Black can play more slowly e.g.

3... g6 4. Bg2 Bg7 5. e3 d6 6. Nge2

and now Black has tried:

6...f5

6...h5

Play in these hypermodern openings is more flexible and less forcing, so both sides have a lot of choice about their early move orders. I've tried to give

an example of each line cited in the games below.

Example games in the Anglo-Dutch

System with 2...d6

Hubner - Kasparov (1, Hamburg) [A21] 1985

1. c4 e5 2. Nc3 d6 3. d4

Most folk used to think this was good for White... until this game!

3...exd4 4. Qxd4 Nf6 5. g3 Nc6 6. Qd2 Be6 7. Nd5 Ne5

Creating trouble on c4

8. b3 Ne4 9. Qe3 Nc5 10. Bb2 c6 11. Nf4 Ng4

The pesky Knights keep hopping around, not letting Black settle.

12. Qd4 Ne4

Very alert

13. Bh3

[13. Nxe6 fxe6 14. Qxe4 Qa5+ 15. Kd1 Nxf2+]

13... Qa5+ 14. Kf1 Ngxf2 15. Bxe6 fxe6 16. Nxe6 Kd7 17. Nh3 Nxh3 18. Qxe4

Black's initiative persists.

18... Re8 19. Nc5+ Qxc5 20. Qg4+ Kc7 21. Qxh3

21... Be7 22. Bxg7 Rhf8+ 23. Bxf8 Rxf8+ 24. Ke1 Qf2+ 25. Kd1 Qd4+ 26. Kc2 Qe4+ 27. Kd2 Bg5+ 28. Kc3 Qe5+

0-1

Gonzalez-Rossolimo 1952.

1. c4 e5 2. Nc3 d6 3. g3 f5 4. Bg2 Nf6 5. e3 Be7 6. Nge2 c6 7. d4 O-O 8. b3 Nbd7 9. O-O h5 10. h4 Ng4 11. f3 Nh6 12. Ba3 Qe8 13. dxe5 dxe5 14. Bxe7 Qxe7 15. Qd2 Nc5

Black has more space.]

Korchnoi-German 1962.

1. c4 e5 2. Nc3 d6 3. g3 f5 4. Bg2 Nf6 5. b4 c6 6. b5 c5 !

Now White can't open a file on the Q-side.

7. Bb2 Nbd7 8. d3 g6 9. a4 a5 10. bxa6 Rxa6 11. Nf3 Bg7 12. Nd2 O-O 13. Nb5 Rf7 14. Bc3 Nf8 15. e3 Ne6 16. O-O g5 17. Qe2 Re7 18. Rfe1 g4 19. f4 gxf3 20. Nxf3 Nf8 21. Nd2 Ng6 22. Nb3 Bh6 23. a5 Ng4 24. Bd5+ Kh8 25. Qd2 Rg7 26. Kh1

Black has his open lines and could create more with

26... f4 27. exf4 Nxf4

Zlotnikov-Minasian 1993

1. c4 e5 2. Nc3 d6 3. g3 f5 4. Bg2 Nf6 5. d3 Be7 6. Nf3 O-O 7. O-O Kh8 8. b4

[After 8. Bd2 the ever-inventive Speelman did once try ...Na6 but 8...Qe8 is still Black's best]

8... Qe8 9. Bb2 Qh5 10. e3 Nc6 11. a3 Bd7 12. Nd2 Qh6

Black is well-placed to build up on the K-side.

...0-1

Hallerod-Hearst 1960

1. c4 e5 2. Nc3 d6 3. g3 f5 4. Bg2 Nf6 5. d3 Be7

5... g6 is a Closed Sicilian position: see below

6. Nf3 O-O 7. O-O Qe8

8. c5 c6 9. cxd6 Bxd6 10. b4 Kh8 11. Rb1 Nd5 12. Qb3 Be6

= 13. Ng5 Nxc3 14. Qxc3 Bxa2 15. Ra1 Bg8 16. Bb2 Qe7 17. Nf3 Nd7 18. Ba3 a6 19. Nd2 Nb6 20. Rfb1 Nd5 21. Qb2 Nc7 22. Nc4 Nb5 23. Rc1 Bxc4 24. Rxc4 a5

0-1 : a Queen's-side decision!

System with 2...Nc6

Miles-Chaves 1977

1. c4 e5 2. Nc3 Nc6 3. Nf3 f5 4. d4 e4 5. Nd2 Nf6 6. e3 g6 7. Be2 Bg7 8. Rb1 a5 9. a3 O-O 10. b4 axb4 11. axb4 Ne7 12. Qb3 d6 13. b5 Kh8 14. Ba3 f4 15. Ncxe4 fxe3 16. fxe3 Nxe4 17. Nxe4 Bf5 18. Bd3

One of the best example games I have on file for the Reversed Closed Sicilian is this one

1. c4 g6 2. Nc3 Bg7 3. g3 Nc6 4. Bg2 d6 5. Nf3 e5 6. d3 f5 7. O-O Nf6

8. Rb1 h6 9. b4 O-O 10. b5 Ne7 11. a4 Be6 12. Ba3 Rc8

Black does not rush but secures the Q-side.

13. Nd2 b6 14. e3 g5 15. d4 exd4 16. exd4 f4

17. Re1 Bg4 18. Nf3 Qd7 19. c5 Rce8 20. Rc1 Nf5 21. Qd3 Kh8 22. cxd6 cxd6 23. Rxe8 Qxe8 24. Rf1 Qh5

The Black pieces hover like vultures

25. Ne4 Nxe4 26. Qxe4 Bh3 27. Ne5 Bxg2 28. Kxg2 g4 29. Bxd6 Rf6 30. Bb8 Qh3+

0-1

C Reti Opening and King's Indian Attack

Again, White doesn't want to rush into the centre without preparation, and plays Nf3 first to stop you playing ...e5.

C1 Playing solidly against 1. Nf3

David Norwood, who is a specialist in the King's Indian Attack, reckons that Black equalises easily in this line which:

"...offers excellent chances of equality. Black's plan is extremely logical - to limit the scope of the fianchetto bishop with ...d5 & ...c6, then develops the B to g4 where it can either exchange or retreat. I predict it will remain difficult for KIA players to prove any advantage in this system.

1. Nf3 d5 2. g3 c6 3. Bg2 Bg4

4. O-O

[4. d3 Nd7 5. O-O Ngf6 6. c4 dxc4 7. dxc4 e5

8. Nc3 Be7 9. b3 O-O 10. Bb2 Re8 11. Qc2 Bf8 12. h3 Bh5 13. Nh4 Nc5 14. Rad1 Qc7 15. g4 Bg6 16. Nxf6 hxg6 17. e3 a5

Todorovic-Rodriguez, Salamanca 1990 ...Drawn (47)]

4... Nd7 5. d3 Ngf6 6. Qe1

[6. Nbd2 e5 7. e4 Bd6 8. Re1 O-O 9. Nf1 Bh5 10. Ne3 Re8 11. Nf5 Bf8 12. c3 dxe4 13. dxe4 Nc5

14. Qxd8 Raxd8 Fahrner-Luther, Graz 1991 ...0-1]

6... e5

7. e4 dxe4 8. dxe4 Bc5 9. b4

[9. Nbd2 Qc7 10. Nc4 Be6 11. Qe2 b5 12. Ncd2

Dizdarevic-Huss, Swiss 1990 12... O-O = Norwood]

9... Bd6 10. Na3 Qe7 11. c3 b5 12. Nc2 a5 13. bxa5 O-O 14. c4 Be6 15. cxb5 cxb5 16. Nh4 Bc5 17. Nf5 Qd8 18. Qd2 Qxa5 19. Qg5

|D ♖aw ♘: Vaga ♘ia ♘ Do ♖fma ♘, Moscow 199||

You may be interested in this excellent game, which features our system with colours reversed.

Smyslov,V (2565) - Nunn,J (2565) [A48] (Tilburg 34/91), 1982

1. d4 Nf6 2. Nf3 g6 3. Bg5 Bg7 4. Nbd2 O-O

[4... c5 5. Bxf6 Bxf6 6. Ne4 Bxd4 7. Nxd4 cxd4 8. Qxd4 O-O 9. c4 Nc6 10. Qd2 d6 11. Nc3 += Smyslov-Ernst, London 1988]

5. e4 d6 6. c3 h6 7. Bh4

Does driving the bishop back have any effect in this formation? Yes - it does further weaken the kingside fortress.

7...c6 8. Bb5 Bd7 9. O-O a6 10. Bc4 e5 11. dxe5 dxe5 12. Re1

Overprotection of e4 frees up the minor pieces for more useful tasks.

12... Qe8

[12... b5 13. Bf1 followed by an eventual a2-a4 would put strong pressure on the queenside.]

13. a4 Nh5 14. Nb3 g5 15. Bg3 Rd8 16. Nfd2

White's pieces have been quickly transferred to the queenside. Black's pieces, especially the offside knight, cannot get there so quickly.

6...  xg3 17.  h8 18.  e2  e7 19.  f1

The exchange of the Black knight for the Bg3 has created new opportunities on the kingside. Smyslov is the master of harmonic play - his pieces are often ready to switch to new targets quickly.

19... Qf6 20. Nc5 Bc8 21. Ne3 Ne7 22. a5 Qg6

Black has chosen to sue the Bc8 to defend the queenside, but the heavy guns are all on the kingside, and White controls a bit more of the center. But before foraging on the queenside, Smyslov squashes the counterplay.

23. g4! b6?!

Black is paralyzed on the kingside, unable to transfer the knight to f4 due to the placement of the queen at g6. But this sacrifice of a queenside pawn leads to disaster. There is nothing more rueful than a lost pawn formation. Black could resign without remorse

24. Nf5! Nxf5

[24... bxc5 25. Nxe7 Qd6 26. Nxc8 Rxc8 27. Bxa6+/-]

25. gxf5 Qc6 26. Nxa6 Bxa6 27. Bxa6 bxa5 28. Rxa5

Now White has an extra pawn and better bishop. The rest is easy for a player of Smyslov's caliber.

28... Ra8 29. Rea1 Rfd8 30. Bc4 Rxa5 31. Rxa5 Kg8 32. Ra6 Qd7 33. Bd5 Qe7 34. Qh5 Rd6 35. Rxd6 cxd6 36. b4 1-0

Resigns; a tale of two bishops...

C2 Playing actively against 1. Nf3

There is a slight problem here:

1. Nf3 f5

can be met by the awkward gambit

2. d3 Nf6 3. e4 fxe4 4. Ng5

So you may prefer to play into your line with

1. Nf3 d5 2. c4 c6 3. g3 e6.

The other way to play into the Dutch allows some transpositions:

1. Nf3 e6

2. g3

[2. e4 d5 is a French Defence which is OK for Black]

[2... c5 is a Sicilian: White can play the King's Indian Attack with 3. d3 or play it open with 3. d4 e.g. 3...cxd4 4. Nxd4 Nf6 5. Nc3 Nc6 6. a3 Be7 7. Be2 O-O 8. O-O d5 9. exd5 Nxd5]

[2. b3 Be7]

2... f5 3. Bg2 Nf6 4. O-O Be7

Both sides are quietly getting on with their own systems. The trouble with meeting White's flexible setup with the Dutch is that Black may be denied the outpost on e4 and White can even try to blow up the pawn structure by playing e2-e4.

5. d3

[5. b3 c5 6. Bb2 O-O 7. c4 Nc6 8. Nc3 e5 9. e3 d6 10. d4 e4 11. Ne1 Qe8 12. Nd5 Bd8 13. dxc5 dxc5]

This is better for White]

5... O-O 6. Nbd2 d6 7. e4 fxe4 8. dxe4 e5 9. c3 Qe8 10. Nh4 Nc6 11. Nc4 Qh5 12. Qxh5 Nxf5 13. Nf5 Bd8

With about equal chances.

D Sokolsky opening (Polish)

This is an oddly effective line; White stops active play with ...c5 and prepares to bring the Bb2 onto the long diagonal.

D1 Playing solidly against 1. b4

I think the most solid system is

1. b4 e5 2. Bb2 Bxb4 3. Bxe5 Nf6

when I know of no way for White to secure the advantage.

White can try

1. b4 e5 2. a3

but this is fairly harmless:

2...d5 3. Bb2 f6

should be fine for Black

D2 Playing actively against 1. b4

Of course you can play

1. b4 f5

but the theory on this line is hardly explored.

White may play d3 at some point which may rob you of some of your best ideas.

E Nimzo-Larsen Opening

This is a flexible line, aiming at first to post the Bc1 on b2, pointing at the e5 point and beyond at the Black King's-side.

The Bb2 needs watching but you should be OK in this opening.

E1 Playing solidly against 1. b3

1. b3 d5 2. Bb2 Nf6

is fine for Black

E2 Playing actively against 1. b3

Go for it...

1. b3 f5

...and Black should not be without play.

1. b3 f5 2. Bb2 Nf6 3. d3 d6 4. e4 e5 5. exf5 Bxf5 6. Ne2 Nc6 7. d4 Be7 8. Ng3 Bg6 9. dxe5 dxe5 10. Qxd8+ Rxd8 11. Bb5 O-O

Black has active play and won in 23 moves! -- KEENE]

F Various other openings

This obviously can transpose to other openings, and it is probably best to try to do just that.

F1. Benko's Opening, 1.g3

1...d5

and

1...f5

both look playable. White may well transpose into lines considered above.

F2. Bird's opening, 1. f4

The obvious snag is, you can't play the Dutch against this:

1. f4 f5 2. e4

is awkward.

But why not play the most awkward lines for White: the From Gambit.

1. f4 e5

Now

2. fxe4 d6 3. exd6 Bxd6

gives you a development lead and free play for your pieces. Instead:

2. e4

transposes into the King's Gambit, which I think most Bird players will do. See the booklet on *Playing Black in e4 openings*

F3. The Dunst, 1. Nc3

A while ago I wouldn't have bothered with this odd-looking opening, but it has become a bit of a secret weapon among those in the know. What to play against it depends on what else you play; it's probably the best of the unusual lines.

1...f5 walks into 2. e4.

1...c5 offers a Sicilian, and after 1...d5 2. e4 you can with 2...d5 offer a Caro-Kann or with 2...e6, a French. Perhaps 2...dxe4 3. Nxe4 and ...c6 may appeal.

1...d5 2. e4 d4 3. Nce2

is a well-known sequence, after which

3...e5 4. Ng3 Be6

Else 5. Bc4 will follow. This looks like Black's best idea to me.

Example game in the Dunst:

Ekebjærg, Ove - Strand, Torger cr Nielsen-mem, 1987

1. Nc3 d5 2. e4 d4 3. Nce2 e5 4. Ng3 Be6 5. Nf3 Nd7 6. c3 c5 7. cxd4 cxd4 8. Be2 Bd6 9. O-O h5 10. d3

This doesn't look to me very promising for White, although White did win.

F4. Grob's opening, 1. g4

The idea of this odd-looking move is...

1. g4 d5 2. Bg2 Bxg4 3. c4!

...when the pin on the b7 point may be embarrassing.

The two best-known players of this line, Henri Grob and Claude Bloodgood, agree that one of the most awkward lines for White is

1. g4 e5

with the idea 2. Bg2 h5! when the pawn cannot advance to g5.

Grob himself played this against 1. g4. So Bloodgood reckons White's best try is

2. d3

To be honest, many Grob players have no idea that this is a known line, all they know about is the ...Bxg4 variation. So they may be out-tricked in their own opening!

Some sample lines in this rare opening:

Ott - Grob, Corr

1. g4 e5 2. Bg2 h5 3. gxh5 Rxh5 4. e3 Rh8 5. c4 f5 6. Qc2 g6 7. Nc3 c6 8. Nge2 Nf6 9. d4 d6 =

Hug - Grob, Corr

1. g4 e5 2. Bg2 h5 3. gxh5 Rxh5 4. e3 Nf6 5. c4 c6 6. Nc3 d5 7. cxd5 Rg5 8. Bf3 cxd5 9. Qa4+ Nc6 10. d3 Rg6 11. e4 d4 12. Nd5 Be6 13. Qb5 Qd7 14. Bd2 Bxd5 15. exd5 Nb4 16. Qxd7+ Kxd7 17. Bxb4 Bxb4+ 18. Kd1 Kd6 = [or 18... Bd6]

Grob - Aebi (corr) & Analysis

1. g4 e5 2. d3! d5 3. Bg2

[3. g5 Be7 4. h4 h6 =+]

3... Bxg4 4. c4

Now this gambit is not as good for White as in the lines without d3 and ...e5.

4...Bb4+ 5. Nd2 c6 6. cxd5 Ne7

[6... cxd5 7. Qb3 Nc6 8. Bxd5 Qe7 9. h3 Bh5 dr]

7. dxc6 Nbxc6 8. a3 =

Grob - Stingelin+ Analysis, 1993

1. g4 e5 2. d3! d5 3. Bg2 c6 4. h3 Ne7 5. Nf3 Ng6 6. Nc3 f5 =/+

[6... h6 was the game: 7. e4 !]

If this sly system doesn't appeal you might fancy the emerging main line approach:

Basman - Keene, Benedictine, 1981

1. g4 d5 2. h3 e5 3. Bg2 c6 4. d4 e4 5. c4 Bd6 6. Nc3 Ne7 7. g5

Basman has also tried:

[7. Qb3 O-O 8. Bg5 f6 9. cxd5 cxd5 10. Nxd5 Be6 11. Nxe7+ Qxe7 12. d5 Bf7 13. Be3 Na6

-+ Keene]

[7. Bg5 f6 8. Bd2 unclear, (Basman - Kudrin, Benedictine, 1981)]

7... Be6 8. h4 Nf5 9. Bh3 O-O 10. cxd5 cxd5 11. Nxd5

11... Ng3 12. Nf6+ gxf6 13. fxf3 Bxf3+ 14. Kf1 Nc6 15. Be3 Nb4 16. Kg2 Nd5 17. Kxf3 Nxe3 18. Qd2 Qd6+ 19. Kf2 Qf4+ 20. Nf3 exf3

O-1

21. Qxe3 Qxh4+ 22. Kxf3 Bd5+

Also ran: 1. e3, 1. a3, 1. a4, 1. h4, 1. f3

I can't imagine these giving you any trouble: You can certainly play your usual Colle or Dutch, and various 1. e4 lines can be played with colours reversed.

1. e3 Van T'Kruy's Opening hopes for a reversed French. 1...d5 is OK for Black.

1. a3 has some idea of playing b2-b4; just 1...d5 and 2...c6 in reply is a good start for playing fast or slow. You can also blow up the Queen's-side with ...a5 if White does play b4.

1. a4 might tempt you to 1...e5 if that's what you usually play.

1. h4 e5 must be all right too.

1. f3 is a bit of a joker; 1...d5 or 1...e5 should give you an easy game.

[Dr. Dave](#)

Exeter Chess Club: What's wrong with club players? A club player's M.O.T.

Overprotection and prophylaxis are all very well, Dave, but what about ordinary players, what do they need? I believe that we don't really know a lot about the chess thinking of ordinary players. There are some things that have been done on amateur games over the years (by de Groot, Euwe/Meiden, Webb, Heisman, Silman, Rubin/Emms and Davies) and there are a set of common beliefs about amateur play, but I think that amateurs are a lot more complex than is often suggested.

Amateurs are more diverse than is given credit for - they often have marked strengths and weaknesses, but these weakness and stylistic preferences may be very different between players. I was interested to look at this book which focuses on one particular amateur chess player, and offers some Grandmaster comments upon a game. [Steve Davis Plays Chess (Norwood/Davis), also published as Grandmaster meets Chess Amateur]

Norwood,D (2500) - Davis,S (1605) [C90], 1994

This was the first time I had played Steve. During the course of the game I made several observations about his chess ability:

Reasonable grasp of strategy - understood the importance of the centre and the need to have active pieces

Positional understanding less adequate - did not appreciate the full importance of Pawns and Pawn structure.

Planning patchy - good at short-term planning, but found it difficult to formulate a long-term plan.

Calculates well but prone to tactical errors - poor sense of danger.

Little opening knowledge - did not know the general strategy behind one of the main line openings.

Good at assessing positions - main weakness here was a tendency to be over-pessimistic.

...These are among the most typical failings of the club/occasional chess player who wants to improve their game

-- NORWOOD in NORWOOD/DAVIS, ***Steve Davis plays Chess (a.k.a. Grandmaster Meets Chess Amateur)***

Now, assuming that at least some of these might apply to at least some of us, let us review these comments one by one, and suggest some therapy.

I've recommended some books. This is the easy bit. There are lots of good books which will give you the ideas you need, rather fewer that will allow you to check your understanding and help you incorporate the ideas into your own play.

The best ways to improve in all respects are to study games, your own and others', and check out your conclusions. We don't do a lot of this in group coaching sessions, but that's what you should be doing.

Get hold of collected annotated games, or get some recommended to you. Pick games which illustrate the theme you are working on, pick openings which feature the theme, and pick games by players who are noted for their facility with your theme. Play through the games three times: once quickly to get a feel for the game and its phases/turning points, once slowly, making your own notes, and once comparing your notes to the annotator's. Games by the old masters like Tarrasch, Lasker and Capablanca, are all pretty useful, perhaps also some by the moderns like Alekhine, Botvinnik, Fischer and Nunn, but these are more complex. The older guys are useful for all points of study below, in my view - you can look to Lasker for his endgames, his tactical alertness, his preferred classical openings, and his swindles and general fighting spirit.

Reasonable grasp of strategy - understood the importance of the centre and the need to have active pieces

Comment (DR): I wonder if DN would say that after playing more games with SD. My scan through the openings in the Minor section at WECU suggest to me that at least some club players don't have a good understanding of the centre, in particular how to defend when your opponent has closed the centre (as in this game). Moreover, when asked to come up with some plans in a minority attack position (A), participants at a session recently came up with some rather passive plans (B) rather than more active ones (C).

(A)

(B)

(C)

What you can do to get better : We can play and study openings where the

centre and activity are important (say, like the Scotch Game), we can study games by other players in our chosen openings (Lautier and Kasparov have been important in the recent theory of the Scotch, and earlier Penrose played the Gambit line), and study players whose style is marked by central control and/or piece activity (Tarrasch, Capa, Lasker, Alekhine, Tal).

Good further reading : Logical Chess (Chernev), The Middle Game (Vol. II, Euwe/Kramer).

Little opening knowledge - did not know the general strategy behind one of the main line openings.

Comment (DR): You would have thought with all those openings books out there, we'd be better than this, but we aren't.

What you can do to get better : DN's next step was to advise SD to play the Modern Defence, which I think is wholly mistaken. It is important to become an expert in your openings systems, but there is too much to the Modern to get a hold of for Minor players. What else, then? Pick something more straightforward, less flexible, more classical, more clearly characterised. You must also learn to combat the common 'no-theory' systems like the Stonewall.

This is potentially a huge topic, but Tony D's repertoire might run: Scotch, French or Petroff as Black, QGD Swiss as Black, with against the half-open defences: Tarrasch French, Panov Caro-Kann, Alapin Sicilian (three systems with overlapping Pawn structures), Exchange Alekhine, Be3 Pirc. I (DR) recommend: Italian Game (Giuoco Piano and related openings) as White, with against the half-open defences either the King's Indian Attack and/or a selection from Classical French, Classical Caro-Kann, Bb5 Sicilian, Exchange Alekhine, Be3 Pirc. As Black, as well as approving Tony's ideas, I would also look at the Semi-Slav or Stonewall Dutch.

The real point is to find a repertoire which suits you, which you believe in, and which has some consistency of style about it.

Good further reading : The Ideas Behind The Chess Openings (Fine), Chess Openings for Juniors (Walker), The Chessplayer's Battle Manual (Davies)

Calculates well but prone to tactical errors - poor sense of danger.

Comment (DR): This apparent contradiction is commonly found. We see tactics once they start happening, but can blunder terribly if the danger light is off

What you can do to get better : Tactics really is something you can get your eye in for. Euwe says: study, learn and revise all the basic ideas, then rehearse examples (in your mind or at the board). I came up with the mnemonic: **J**ust **M**ight **F**ind a **N**eat **P**owerful **T**actic for **J**umps **M**ates **F**orks **N**ets **P**ins and **T**ies. What we also need is a book of tactics with a realistic proportion of false leads and positions with no tactical solutions. No such book exists, but there are lots of straightforward tactics books. On developing a sense of danger: I've just done two sessions and looked at 111 games on this recently, so a quick run through the positions given there might give you a better sense of when the trap detector should be turned up a level.

Also, Steve didn't recognise real and apparent dangers - he was afraid of a measly check by a lone Knight, but didn't appreciate the concessions he was making on the king's-side.

Good further reading : Winning Chess (Chernev/Reinfeld), Test Your Chess IQ (Livshitz), Danger in Chess (Avni), Chess for Tigers (Webb). Games by Tarrasch, Lasker.

Good at assessing positions - main weakness here was a tendency to be over-pessimistic.

Comment (DR): Again, I wonder whether DN would still say this after playing many games with minor players. Club players seem to me to have a fine capacity for missing the positional point just as much as the tactical point. It's not that we are thinking about nothing, we are making some sense and noticing some features of the position, but we are often missing much more important features.

What you can do to get better : We need to review and refresh our stock of ideas, and check them out. I came up with the mnemonic **To Know What Plan to Follow Look Carefully**, for **T**actics, **K**ing safety, **W**eak squares & weak Pawns, **P**iece position, **F**orcing moves (initiative, breakthroughs), **L**ine control, **C**entre and space. Many books review the positional elements, but in terms of books for self-assessment we have a market of about one. So, we are back studying master games. On pessimism: this is again mostly attitude, but you might work on it by finding more resources in your old games, perhaps by playing over master games whose players might have shown a more forward-going attitude in similar positions.

Good further reading : The Most Instructive Games of Chess Ever Played (Chernev), The Strategy of Chess (Cafferty), My System (Nimzovitch), Think/Plan Like A Grandmaster (Kotov), How to Reassess Your Chess (Silman), Test Your

Positional Play (Bellin/Ponzetto). Games by Capa and Botvinnik.

Positional understanding less adequate - did not appreciate the full importance of Pawns and Pawn structure.

Comment (DR): I think Pawns and Pawn Structures are the easiest thing in chess to learn about (what's hard is linking the understanding to piece play).

What you can do to get better : Choose openings for study and play which have characteristic Pawn formations: Scotch Four Knights, French Defence, Caro-Kann Panov, Ruy Lopez Exchange all have these features. (I'll do a session on it if you like.)

Good further reading : The Middle Game Vol. 1 (Euwe & Kramer), Pawn Structures (Baburin), Test Your Positional Play (Bellin/Ponzetto). Games by Capa, Botvinnik.

Planning patchy - good at short-term planning, but found it difficult to formulate a long-term plan.

Comment (DR): Not all positions require long-term planning - watch for priorities. There are some positions which have marked long-term features which can be easily understood. In this game Black had a long-term headache on the Queen's-side and with the dark-squared Bishop, which he sort of recognised but did nothing positive about. When I showed this game without identifying the combatants a disdainful howl went up when White provoked the exchange of Queens - "White's just playing for a draw". No - this was part of White's winning plan! Exchanges are like other moves, they make a difference. In this case, White would like to get to an endgame, so the exchange improves White's chances.

What you can do to get better : Play and study some games with 'long-term' features - things like weak Pawns or Bad Bishops, in openings like the French Tarrasch, QGD or Exchange Ruy - and see how these features are reflected or superceded in the following play. Planning comes down to: Ready, Aim, Fire!
Ready - Notice and assess the positional elements (see below), **Aim** - form a realistic plan based on an appraisal of the chances for each side, then **Fire!** - pick the moves which best meet your needs.

Good further reading : Think/Plan Like A Grandmaster (Kotov), The Chess Struggle in Practice (Bronstein - some of the best bits are quoted by Kotov), How to Reassess Your Chess (Silman). Botvinnik games again.

Also:

The endgame

Comment (DR): It didn't arise in the Davis game, but club players are widely regarded as being poor at endgames, and everything I've observed at the club reinforces this!

What you can do to get better : (1) know your onions - get to grips with the theory of basic endings and general endgame principles, (2) study the play and writings of endgame specialists like Capa, Smyslov, Mednis, Karpov, (3) play "endgame openings" with an early exchange of Queens - Ruy Lopez Exchange, and French Tarrasch for example.

Good further reading : Winning Endgames (Kosten), Capablanca's 60 Best Chess Endings (Chernev), Rate Your Endgame (Mednis/Crouch).

Panic and Collapse

Comment (DR): You notice in the game SD panicked when he was attacked and lashed out with the horrible **20...g5** , instead of looking for defensive improvements like centralising Rooks or finding Queen's-side counterplay, and later he allowed mate in one. By the time it came to cutting his losses it was already over. Quite often in club chess games are won by the more determined as often as by the stronger player.

What you can do to get better : Again, the blunders sessions hold some clues - so often I was writing "from the frying pan into the fire", and "panic" or "bluff". This is a change of attitude as much as theory. Try looking at the games of the great swindlers - Marshall, Lasker, Webb - and the great defensive players - Steinitz, Petrosian, Karpov - and the counter-punchers like Korchnoi.

Good further reading : Chess for Tigers (Webb), The Chess Amateur (Silman).

Inconsistency: know all the words, but there is no consistency or rigour.

Comment (DR): It takes a bit of time to spot this, but listen out for it. DN didn't particularly emphasise this in his notes, but SD was in two minds about whether to get shot of his dark-squared Bishop. Undoubtedly he should have done - he did talk about it more than once, but never got around to it. I think this lack of clarity is more characteristic of club players than lack of knowledge. Chess positions are complex and often pretty balanced, so it is often possible to talk for a long time

about a chess game without saying anything wrong, but without really getting to grips with it.

What you can do to get better : This goes back to the first point about studying games and checking out your conclusions, and the study of guys like Botvinnik who have a well-marked analytical prowess.

Good further reading : How to Reassess Your Chess (Silman), The Amateur's Mind (Silman) Test Your Positional Play (Bellin/Ponzetto).

Exchanging to win

I was struck recently when discussing this position with the coaching group:

White's next move, **15. Nh4**, was regarded with scorn by some - "*he's just playing for a draw*". On the contrary, provoking the exchange of Queens looked like a reasonable winning attempt to me! In fact, Black did swap with **15...Qxg4** without much thought about alternatives, when **15...Qe6** might have been worth a look.

Some players seek exchanges and some avoid them; I get the impression that juniors exchange without much hesitation.

Exchanges are just moves, says Stephen Gerzadowicz. They have good and bad effects, and are better for one side or another. Weight these up, then decide whether to exchange or not. Fortunately, there are some general guidelines to help us.

Rules for exchanging

- If you are ahead in material, exchange pieces (but not Pawns)
- If you are behind in material, exchange Pawns (but not pieces)
- Avoid the exchange of your most active piece (especially if you are defending)
- If you have more space, are attacking the King, or have Pawn weaknesses, avoid exchanges (especially of Queens).
- If you have less space, are defending the King, or have better Pawn

structure, seek exchanges (especially of Queens).

- If you have the advantage of the two Bishops, avoid the exchange of your opponent's remaining Bishop for one of your Bishops.
- If you have two Rooks and your opponent only one, seek the exchange of your opponent's remaining Rook for one of your Rooks.
- Avoid being left with a permanently poor piece, like a Bad Bishop
- Last but not least, look at the effect of the exchange on the position. Have you improved the opponent's Pawn structure? Have you brought into play an opposing piece?

Having looked at all these ideas, we can perhaps understand the position given more clearly. The Black Bishop is poor but not yet Bad; Black has the worse Pawn structure, and the Queen is one of his most active pieces. The exchange draws the h-Pawn in to become a g-Pawn, so White can play g3 and f4 without fearing that ... exf4 will split his Pawns. Also, White is GM David Norwood, who might have thought that a technical endgame might expose his amateur opponent's deficiencies.

Okay, let's look at these guidelines in examples.

If you are ahead in material, exchange pieces (but not Pawns)

If you are behind in material, exchange Pawns (but not pieces)

Right

Regis,D - Walker,J [C33] Exeter vs. Teignmouth, 1994

34.b6 ! 34...axb6 35.Rxb6+ Kg5 36.Rb5+ Kg6 37.Rc5 h6 38.Rb5 f6 39.Rc5 Re3 40.Rc7 Re5 41.Kg3 h5 42.Rc3 hxg4 ? 43.hxg4 Kg5 44.Ra3 g6 45.Rb3 Re4 46.Rb5+ f5 ? [46...Re5 47.Rb4] 47.gxf5 gxf5 48.Rb8 Re3+ 49.Kf2 Ra3 50.Rb4 f4 51.Rb8 1/2../strong>

the basic draw: Philidor's position White has been steering for this since move 33!

Wrong

Hecht,H - Spassky B V [B31] Dortmund, 1973

Black should retain the Rook by 50...Rc5.

50...Rxe1 51.Kxe1 Ke7 52.Kd2 Kd6 53.Kd3 Ke5 54.a5 a6 55.b4 Kd5 56.Kc3 gxh4 57.gxh4 Ke5 58.Kc4 Kd6 59.b5 axb5+ 60.Nxb5+ Ke5 61.Kc5 Bc8 62. Kb6 Bstrong 63.a6 Bg2 64.f4+ Kxf4 65.Nd6 f5 66.Nb7 Kg3 67.a7 f4 68. a8Q f3 69.Qb8+ 1-0

Avoid the exchange of your most active pieces (especially if you are defending)

Wrong

van Scheltinga - de Groot [E94] errors: eagerness to exchange, 1936

1.d4 Nf6 2.c4 g6 3.Nc3 Bg7 4.e4 d6 5.Nf3 0-0 6.Be2 e5 7.0-0 Nfd7 8.Be3 Nc6 9.Qd2

9...exd4 10.Nxd4 Nxd4 11.Bxd4 Bxd4 12.Qxd4 Qf6 13.Qd2

The exchanges have left White dominating the board.

13...Qe5 14.f4 Qc5+ 15.Kh1 Nf6 16.b4 Qxb4 17.Qd4 Kg7 18.Nd5 Qc5 19. Qxf6+ 1-0

I couldn't find another example of this from the point of view of exchanges, but if you think about retreating as having the same effect:

Nimzowitsch,A - Capablanca,J [C62] St Petersburg (1), 1914

1.e4 e5 2.Nf3 Nc6 3.Nc3 Nf6 4.Bb5 d6 5.d4 Bd7 6.Bxc6 Bxc6 7.Qd3 exd4 8. Nxd4 g6 9.Nxc6 bxc6 10.Qa6 Qd7 11.Qb7 Rc8 12.Qxa7 Bg7 13.0-0 0-0 14. Qa6

White has grabbed a Pawn on the Queen's-side. It is striking how quickly White's game deteriorates:

14...Rfe8 15.Qd3 Qe6 16.f3 Nd7 17.Bd2 Ne5 18.Qe2 Nc4 19.Rab1 Ra8 20. a4 Nxd2 21.Qxd2 Qc4 22.Rfd1 Reb8 23.Qe3 Rb4 24.Qg5 Bd4+ 25.Kh1 Rab8 26.Rxd4 Qxd4 27.Rd1 Qc4 28.h4 Rxb2 29.Qd2 Qc5 30.Re1 Qh5 31. Ra1 Qxh4+ 32.Kg1 Qh5 33.a5 Ra8 34.a6 Qc5+ 35.Kh1 Qc4 36.a7 Qc5 37. e5 Qxe5 38.Ra4 Qh5+ 39.Kg1 Qc5+ 40.Kh2 d5 41.Rh4 Rxa7 0-1

Znosko-Borovsky says, " *A player who is at disadvantage in time should keep up any available threat*". That is, the Queen was better on a6, restricting the freedom of action of Black's pieces.

If you have more space, are attacking the King, or have Pawn weaknesses, avoid exchanges (especially of Queens).

Right

Timman,J - Petrosian,T, Las Palmas izt (2), 1982

1.d4 d5 2.c4 dxc4 3.Nf3 Nf6 4.Nc3 c6 5.a4 Bg4 6.Ne5 Bh5 7.f3 Nfd7 8.
Nxc4 e5 9.Nxe5 Nxe5 10.dxe5 Nd7 11.f4 Bb4 12.Qc2 Qe7 13.e4 g5 14.Be2
gxf4 15.e6 Qh4+ 16.Kf1 Bxe2+ 17.Qxe2 fxe6 18.Qf2

18...Qe7 19.e5?! Nxe5 20.Bxf4 Rf8 21.Rd1 Bc5 0-1

White's elaborate Bishop manoeuvres in the main line Ruy Lopez are at least in part designed to keep Black burdened with a full complement of minor pieces.

Kasparov,G (2800) - Karpov,A (2730) [C92](W (20), 1990

1.e4 e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.0-0 Be7 6.Re1 b5 7.Bb3 d6 8.c3 0-0
9.strong Bb7 10.d4 Re8 11.Nbd2 Bf8 12.a4 h6 13.Bc2 1-0

This was crowned by a famous attack.

14.cxd4 Nb4 15.Bb1 c5 16.d5 Nd7 17.Ra3 f5 18.Rae3 Nf6 19.Nh2 Kh8 20.
b3 bxa4 21.bxa4 c4 22.Bb2 fxe4 23.Nxe4 Nfxd5 24.Rg3 Re6 25.Ng4 Qe8
26.Nxh6 c3 27.Nf5 cxb2 28.Qg4 Bc8 29.Qh4+ Rh6 30.Nxh6 gxh6 31.Kh2
Qe5 32.Ng5 Qf6 33.Re8 Bf5 34.Qxh6+

*[34.Nf7+ Matt/Mate in 6! 34...Qxf7 35.Qxh6+ Bh7 36.Rxa8 Ne7 37.Rxf8+
Ng8 38.Rgxg8+ Qxg8 39.Qxh7#]*

34...Qxh6 35.Nf7+ Kh7 36.Bxf5+ Qg6 37.Bxg6+ Kg7 38.Rxa8 Be7 39.Rb8
a5 40.Be4+ Kxf7 41.Bxd5+ 1-0

Wrong

Kortchnoi,V (2695) - Karpov,A (2700) [D31], 1981 [Wcstrong0-Merano (9)]

16. Ne4?

Undoubtedly a mistake, freeing Black's game. As we can see from the sequel, though, White was trying to win, not merely play the best moves.

16...Nxe4 17.Qxe4 Bc6 18.Nxc6 Rxc6 19.Rc3?!

[19.Rxc6 Nxc6 20.d5 exchanges the IQP leaving nothing much left to play for.]

Black won the endgame.

If you have less space, are defending the King, or have better Pawn structure, seek exchanges (especially of Queens).

Right

1.d4 d5 2.c4 e6 3.Nc3 Nf6 4.Bg5 Be7 5.e3 0-0 6.Nf3 Nbd7 7.Rc1 c6 8.Bd3

Capablanca's freeing manoeuvre took most of the sting out of the QGD:

8...dxc4 9.Bxc4 Nd5 10.Bxe7 Qxe7 11.0-0 Nxc3 12.Rxc3 e5 13.dxe5 Nxe5 14.Nxe5 Qxe5 =

You will see Capa play like this in many games.

Wrong

Littlewood,P - Mestel,J [E61] Hastings (9), 1981

1.d4 Nf6 2.Nf3 g6 3.c4 Bg7 4.Nc3 0-0 5.e4 c6 6.e5 Ne8 7.Bf4 d6 8.strong Nd7 9.exd6 Nxd6 10.Be2 Re8 11.Qd2 Nf5 12.Rd1 c5 13.Nb5 Nf8

The simple 14. dxc5 wins a Pawn and seeks exchanges. Instead White wins an exchange, but allows counterplay.

14.Nc7 Nxd4 15.Nxe8 Qxe8 16.Ne5 f6 17.Nd3 b6 18.0-0 Bb7 19.Be3 e5 20. Rfe1 Rd8 21.Bxd4 Rxd4 22.Bf1 Ne6 23.f3 h5 24.b4 cxb4 25.Qxb4 Bf8 26. Qc3 Qd7 27.Kh1 Kh7 28.Qc2 Bc6 29.Qb1 Ba4 30.Rd2 Bh6 31.Rb2 Bf8 32. Nf2 Ba3 33.Ne4 Kg7 34.Rf2 Bc6 35.Nc3 Bc5 36.Nb5 Rh4 37.Rd1 Nd4 38. Nxd4 Rxd4 39.Re1 Rh4 40.Rd1 Rd4 41.Re1 h4 42.Rb2 Qd6 43.Rb3 e4 44. fxe4 Qe5 45.Rbe3 Bd6 46.g3 Rxe4 47.Qxe4 Bxe4+ 48.Rxe4 Qxg3 49.R4e2

Bb4 50.Rd1 Qf3+ 51.Kh2 Bd6+ 52.Kg1 Bc5+ 53.Kh2 Qg3+ 54.Kh1 Qg1# 0-1

If you have the advantage of the two Bishops, avoid the exchange of your opponent's remaining Bishop for one of your Bishops.

Right

Wrong

If you have two Rooks and your opponent only one, seek the exchange of your opponent's remaining Rook for one of your Rooks.

Right

Wrong

Avoid being left with a permanently poor piece, like a Bad Bishop

Right

Bryson, D - Williams, C [C12] BCCC, 1984 [TDH]

18...Bb5

The classic French manoeuvre to offload the bad Bishop.

Wrong

Booth, C (1800) - Regis, D (1825) [A42] Exeter vs. Harrogate, National Major Plate Final, 1996

Black has been left with classic KID bad Bishop.

22.b4 b6 23.a4 a5 [23...Bh4 24.a5] 24.Rxg8 Kxg8 25.bxa5 bxa5 26.Rb1 h5 27.Ke3 Bh4 28.Rb5 Rf4 29.Rxa5 Bxf2+ 30.Nxf2 Rxc4 31.Ne4 h4 32.Nd2 Rc3+ 33.Ke4 Kf7 34.Ra7 Kf6 35.a5 c6 [35...] 36.dxc6 Ke6 37.Rd7 Rxc6 38.Rd8 Rc3 39.Re8+ Kf7 40.Rh8 Ra3 [40...] 41.Nc4 Ra4 42.Kd5 Ra1 43.Rxh4 Rd1+ 44.Kc6 e4 45.Nxd6+ 1-0

Last but not least, look at the effect of the exchange on the position. Have you improved the opponent's Pawn structure? Have you brought into play an opposing piece?

Right

Forintos,G - Gligoric,S [E77] Ljubljana, 1969

1.d4 Nf6 2.c4 g6 3.Nc3 Bg7 4.e4 d6 5.f4 0-0 6.Be2 c5 7.d5 e6 8.Nf3 exd5 9.exd5

9...Nh5 (Spassky) 10.0-0 Bxc3 11.bxc3 f5 12.Ng5 Ng7

A wonderful transformation, despite the loss of the Bg7 which is so often the salvation of Black's game. White's Pawns are blockaded across the board, and Black's weak e6 square is comfortably under observation.

13.Bf3 Nd7 14.Re1 Nf6 15.Rb1 Re8 16.Rxe8+ Qxe8 17.Rb2 Bd7 18.Rxb7 Rb8 19.Rxb8 Qxb8 20.Qc2 h6 21.Nstrong Qe8 22.Bd2 Ba4 23.Qc1 Ng4 24.Nf2 Nxf2 25.Kxf2 Qe7 26.Kg1 Ne8 27.Qb1 1/2../strong>

Wrong

How often do we see in club play, ...Bg4, ... Bxf3, then Qxf3 or Nxf3 when the net effect is that Black has lost the Bishop pair and brought out a White piece. Here's a more complex example:

Peters, J - Andersson,U [B15] defence: mending weaknesses, 1978

1.e4 c6 2.d4 d5 3.Nc3 dxe4 4.Nxe4 Nf6 5.Nxf6+ exf6 6.Bc4

White's Queen's-side majority is a big engage plus, so White was startled by...

6...Qe7+ 7.Qe2 Be6

Black will only enter an endgame on certain conditions!

8.Bxe6

[8.Bb3 is the only testing continuation]

8...Qxe6 9.Bf4 Na6

The threat of ...Nb4 eventually prompts the exchange on e6

10.0-0-0 0-0-0 11.Qxe6+ fxe6

White has drifted into a dull position.

12.h4 c5 13.Be3 cxd4 14.Bxd4 Bc5 15.Ne2 e5 16.Bxc5 Nxc5

Black has no problems and even won.

Exeter Chess Club: Minor opening mistakes

Here's another trawl of typical mistakes, this time from the first 20 moves of each game of the WECU Minor Championship at Exmouth in Easter 1999.

The games are appended with notes mostly from DR: "out of book" is Fritz' comment, and Fritz has also blunderchecked the games. Let's first have a look at which openings were played:

The most common openings were: (1) Hypermodern, (2) Indian, (3) Sicilian, (4) French, (5) Open games, and (6) Stonewall/Colle. I think, for Minor players, these are (1) dubious, (2) difficult, (3) tricky, (4) good, (5) good and (6) dubious. Which is to say, over half the openings played probably aren't very suitable. I'll have more to say about this!

1. *Not following basic opening advice:*

King in the middle 10 86 97 103 — Incomplete development 55 70 71 — Time-wasting 24 43 58 103 — Pawn moves 8 46 49 53 60 67 72 84 85 86 96 — Neglect centre 60

It is notable that the single most common fault is in making too many duff Pawn moves. Develop your pieces! (These problems are not unique to Minor players: Tony remarked that the young Nigel Short used to blow away 170-strength opposition by an approach heavily reliant on fast development.)

2. *Planning poor, muddled or absent:*

Inconsistent or muddled 16 19 22 23 31 37 59 62 64 84 — Routine moves 4 11 12 18 47 68 69 — Planless 17 33 35 45 55 101 102 — Passive 39 65 79 89 90 93 97

This is also a serious problem for Minor players - either planless or routine moves. This may be because the openings are not the best choices.

3. *Blocked in:*

Bishops 21 34 41 93 — Rooks 9 25 28 32 49 51 82

Some of this is in the opening choices, again,

4. *No counterplay:*

in closed position 50 85 96 — shifting attack with Pawn chains 27 102 96

I think this is both important and easy to cure. See below for specific comments on the Colle and Stonewall. I think these two openings are not greatly to be recommended for White, but when they result in easy victories because Black doesn't have a clue, they will continue to be played!

5. Others:

Looseness 15 91 — Subtleties 16 78 — Out of book 5 42 47 48 56 — Notice what your opponent has just done 6 49 54 — Creating Holes 32 38 44 79 104 — Unjustified exchange 20 — Exposed Queen 52 73 — Exposed Bishop 71 99

See below for specific comments.

There are many types of mistake listed. I have given examples of all of them, and highlighted the most important.

The whole 20 moves of each game are given: worth playing over are games 12, 32, 42, 55, 64, 90, 96 and 104.

Apologies to all players to whom I have been ungenerous, but the point was to find mistakes!

1. Not following basic opening advice:

King in the middle 10 86 97 103

White plays 11.d5!

Incomplete development 55 70 71

Black has got one hope here, being a piece down - that White will distract himself and not do what he should do - complete development, seize key squares, and swap off Black's remaining pieces.

Time-wasting 24 43 58 103

White played 8.Qxb4, making an exchange Black was clearly seeking. Just develop, 8.Nc3

Pawn moves 8 46 49 53 60 67 72 84 85 86 96

8.h3 here would complete the set! The most common sort of unprovoked Pawn move was:

White's next move, 4.c3, is unnecessary. Compare with this approach:

Pillsbury - Amateur, Toronto, 1899 1. d4 d5 2. Nf3 e6 3. e3 Nf6 4. Bd3 Nbd7 5. O-O b6 6. Nbd2 Bd6 7.e4

Colle played 4.c3 only in reply to ...c5, or to stop ...Nb4.

Neglect centre 60

7...a6 is a bit off the main arena.

2. Planning poor, muddled or absent:

Inconsistent or muddled 16 19 22 23 31 37 59 62 64 84

7.Nxd4 was played instead of 7.cxd4. What was c3 played for if not to recapture on d4?

Routine moves 4 11 12 18 47 68 69

White has risked nothing but gained nothing.

Planless 17 33 35 45 55 101 102

Black plays 8...b6, when ...b5 is where I would expect to find counterplay

Passive 39 65 79 89 90 93 97

Neither side is doing much active. We did see a lot of e2-e3 in the QP openings.

3. Blocked in:

Bishops 21 34 41 93

White would have quite a nice position if only he could get his c1 Bishop into play.

Rooks 9 25 28 32 49 51 82

Woah. Black has not asked himself the question, how am I going to develop my Rooks? Black must play ...c5 or ...e5 at some point, and having played ...Nc6, ...Bg4 is now desirable.

4. No counterplay:

in closed position 12 50 85 96

Black is also playing routinely, but with no sense of a plan. White is following a plan, and Black allows him to execute it.

Fine gives the contrasting lines after 1. d4 d5 2. e3 Nf6 3. Bd3 c5 4. c3 Nc6 5. f4

Now play might go:

5... e6 (which doesn't look quite right, as it blocks the Bc8) 6. Nf3 Bd6 7. O-O O-O 8. Ne5 Qc7 White's threatening Ne5 needed some response; Black could also try to occupy e4 9. Nd2 Re8 10. g4 with a crushing attack.

This is the ideal Stonewall position.

Instead, we might try for Black 5... Bg4,

and play then might go 6. Nf3 e6 7. Nbd2 Bd6 8. h3 Bh5 9. b3 cxd4 10. cxd4 Rc8 when Black is comfortable

Because Black can see what White is up to, Black can arrange the development to counter it. White's opening plan is not camouflaged enough to stop Black from seeing what is going on and opposing it, and the opening moves are not flexible enough to try any other plan. This is why you don't see the Stonewall very often among stronger players.

shifting attack with Pawn chains 27 102 96

6...c4 is a typical mistake, relieving the pressure.

5. Others:

Looseness 15 91

Black is playing actively but is getting overstretched. 11.g4! should have been played

Subtleties 16 78

In this RL Steinitz, 6. Bxc6 bxc6 is theory. But after 6. Nxc6, Bxc6 exchanges off another pair of pieces, useful if you have no centre and therefore no space.

Out of book 5 42 47 48 56

In this standard French position, neither 7.Bc2 nor its reply, 7...g6, are really to the point.

Notice what your opponent has just done 6 49 54

4...Nxe4 must not be allowed by White, and must be played by Black if possible.

Creating Holes 32 38 44 79 104

Black has already lost the plot, and now creates some dark-square weaknesses with 4...g6(?). This is why you should stay away from closed games, folks.

Unjustified exchange 20

15.Bxb6 is pretty random.

Exposed Queen 52 73

After 9...Qc7 10.Rc1! Black admitted his mistake with 10...Qd8.

Exposed Bishop 71 99

out of book: this Bishop proves more of a problem than anything - it should support the b4-b5 advance, but this never happens (planless, then, also)

Introduction: Tabi'at

The old game of chess

Modern (Western) chess originated from the Persian game of *shatranj* , itself a derivation of the very similar Hindu game of *chaturanga* . The rules of *shatranj* (no double Pawn moves or castling, weaker Queen (*firzan*) and Bishop (*fil*)

made it a slow game with a deferred clash of forces. This encouraged the development of *tabi'a* (starting formations), a recognised arrangement of forces which could be aimed for almost regardless of the opponent's play. You will find written *tabi'a tabia* and *tabiya* , the plural is *tabi'at*.

Hooper and Whyld in their excellent *Oxford Companion to Chess* give a selection of *tabi'at*.

mujannah (= "flank opening")

N.B. the pieces on c1 and f1 are *fils* , the piece on d1 a *firzan*

sayyal (= "torrent")

A King's-side attacking formation.

Muwashshah (= "richly girdled")

In practice, say H&W, the opponent would never allow the completion of this strong attacking formation.

Some players have tried to interpret old *tabi'at* in modern chess, for example the *mujannah* can arise from Bird's opening. This is unnecessary, for modern chess has its own *tabi'at*. The Soviet literature is quite rich in uses of the term in modern chess.

Modern Tabi'at

Old Stodge

I am uncomfortably aware that for some players, especially juniors, this is a *tabi'a*. I wouldn't mind so much if I thought they had the slightest idea what to do when they got this far.

King's Indian

There are strong arguments for supposing this to be a modern *tabi'a* . Both sides set up their formations without any great account being taken of the moves of their opponent, and from here a great many alternative plans are available to each player.

Sicilian Taimanov

The veteran Russian GM Mark Taimanov is just one author who uses the term in his writings.

*"This is one of the typical tabias (**sic**) of the Taimanov system. As in many similar variations, this position is assessed as favourable for White.*

"White has an advantage in the centre, harmonious development, pressure along the d-file and a wide choice of plans to gain the initiative. Black is slightly restricted (at least in the centre), and he has to spend time (at least three tempi)

on development.

"Nevertheless, many practical examples show that Black's position is quite viable. What is the secret?"

"First of all, Black's position is invulnerable as yet, because his pieces control the whole defensive region, so it is difficult to approach his position (the only worrying aspect is the weakened d6 square). Besides, Black has good opportunities of his own in prospect. For instance, if he manages to arrange his pieces freely according to the scheme ...Qc7, ...Rfd8, ...Bb7, ...Rac8, then he can count on promising counterplay on the Queen's-side connected with ...Nc6-a5-c4, and, in some cases, on pressure along the a8-h1 diagonal. That is why the theoretical debate concerned with this variation has already been going on for several decades, deepening the understanding of the position for both sides, but not coming to a final conclusion.

"Obviously, White's attempts to gain the initiative can be linked either to the weak d6 square (12. Bf4), or to active play in the centre and King's-side (11.f4 or 11.Rad1, etc.)."

The book gives two games:

11.Rad1 [or 11.f4 Bb7 12.e5!? Na5!? 13.Bd3 Rc8 14.Ne2 Nc4 15.Bxc4 Rxc4 16. Rad1 Qc8 (Black is better) 17.c3 b4!? 18.Rc1 0-0 19.b3 bxc3 20.Nxc3 Rc6 21.Na4 Ba3 22.Rxc6 Qxc6 23.Nb6 d6!? 24.exd6 Bxd6 25.Rc1 Qe4 26.Rc4 Qb1+ 27.Rc1 Qg6 28.Qc2 Be4 29.Qf2 Rd8!? 30.Rd1 Bc7 31.Rxd8+ Bxd8 32.Nc4 Bd5 33.Nd2 h6 34.h3 a5 35.Nf3 Bc7 36.Nd4 Qb1+ 37.Kh2 g5!? 38.Nb5 Bxf4+ 39.Bxf4 gxf4 40. Nc3 Qf5... Unzicker,W-Taimanov,M/Wijk aan Zee 1981/0-1 (53)] **11...0-0 12.Bf4 Qa5!? 13.a3 Rd8 14.Bd6 Bb7 15.Bxe7 Nxe7 16.Qg5!? f6 17.Qc5 Nc6 18. Rh8+ Kf7 30.Bc4 Ke7 31.Bxd5 Bxd5 32.Rxd8 Nc6 33.Re8+! 1-0 Sznapik,A - Donchev,D [or B46] Prague (11), 1985**

French Tarrasch

There are two parallel but over-lapping variations of the main line **3...Nf6** French Tarrasch.

1.e4 e6 2.d4 d5 3.Nd2 Nf6 4.e5 Nfd7 5.Bd3 c5 6.c3 Nc6 7.Ne2 cxd4 8.

cx d4 f6 9. exf6 Nxf6 10. Nf3 Bd6

1. e4 e6 2. d4 d5 3. Nd2 Nf6 4. e5 Nfd7 5. Bd3 c5 6. c3 Nc6 7. Ne2 cxd4 8. cxd4 Qb6 9. Nf3 f6 10. exf6 Nxf6 11. O-O Bd6

Tony D strongly recommends having this type of position in your repertoire, and being able to play it for both sides. The point is, there are some very common Pawn formations to be mastered here, and you can read a lot of the plans right off the Pawn structure. However, the Pawn structure is not fixed.

A French root and some branches

The classic French structure arises after the Pawn moves:

e4 d4 e5

...e6 ...d5

As both sides contest the centre, this fundamental structure is altered.

The basic French centre

There are some themes here that re-appear in many variations below.

Black has a poor light-squared Bishop, at least for the moment. Black would like to exchange light-squared Bishops, White would like to exchange dark-squared Bishops.

White has more space and a potential King's-side attacking position.

Black, who has the move, will attempt to attack the chain with Pawn moves like:

...c5 ...f6 ...cxd4 ...fxe5 ...f5

Black will continue to put pressure on d4 and can extend the scope of the attack to c3 by advancing the b-Pawn. Nimzovitch, who studied the Advance Variation, always recommended the attack on the base of the Pawn chain. Since Nimzo, and since the development of the Tarrasch variation, we see much more virtue in attacking the head. In fact, we see a lot more ...f6s in the Advance these days.

White will defend or change the centre with Pawn moves like:

c3 f4 dxc4 exf6

White must try to make the space or the attack tell without allowing Black to destroy the centre and without getting in a tangle. Black will use obvious piece moves like ...Nc6 and ...Qb6 to put pressure on the Pawn centre. The immediate Pawn attack, around which Black's development in this line revolves, is:

...c5

[or Black can try and do without this move in other lines of the French (Guimard).]

c3

French tension centre

White usually tries to hold the centre initially with c2-c3.

After an exchange of Pawns:

...cxd4, cxd4

French centre with open c-file

The exchange relieves a certain amount of central pressure, but brings the base of White's Pawn chain a little nearer Black's pieces.

The open c-file allows a variety of new possibilities for Black, most notably use of the b4 square (...Bb4+, ...Nb4).

...f6, exf6 Nxf6

Two weaknesses

This is the key formation we will discuss in more detail below. The two Pawn weaknesses alluded to are Pe6 and Pd4; the Pe6 is weaker, being exposed on a half-open file, and White has the advantage of being able to play on e5 as well as e6. However, Black can attack d4 just as easily as White can attack e6, and can even hope to get in the dynamic ...e6-e5:

After an exchange of Pawns (White naturally does not want to allow ...e5-e4) we develop the:

IQP centre

Isolated *passed* Queen Pawn.

White should behave the same as in an IQP centre, blockading the Pawn and holding Black to its defence, looking for second weaknesses; Black should look for attacking chances on the open lines, and chances to advance the passed Pawn.

***dx*c5**

French strongpoint centre.

White gives up d4, the better to hang on to the single point e5. Also, this exchange may wrong-foot Black by requiring a recapture on c5.

Black will typically try to destroy this centre with

...f6

With the head of the White Pawn chain so close to hand and under such pressure, it is hard for White to defend it and we normally see an exchange.

This leads to the next central formation:

Isolated Pawn couple

This is quite a stable formation which can dominate planning in the early middle game. Black has a concrete weakness on e6 and a weak square on e5. This is why White is so happy to exchange: a lot of the cramp exerted by the previous structure still persists and White now has open lines against plain targets.

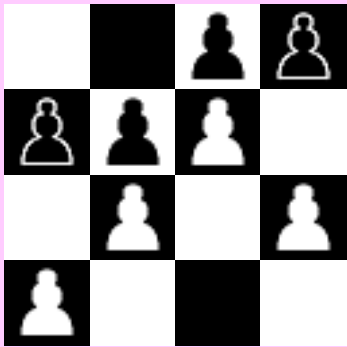

Black would ideally like to achieve ...e6-e5, dominating the centre. White, not unnaturally, would prefer to restrain this, and so moves like Re1, Ne5, Bf4 and so on are all key. White would perhaps also like to achieve f2-f4, but may need to move the Nf3 to do so.

You very often get a similar centre with f4 from the main line of the Classical Variation:

French very tense centre.

From the Tarrasch with 5.f4:

This centre could resolve into almost any other formation! In fact the tension may be enhanced by a Black ...g7-g5.

Some specifics

We'll look in detail at the "Two weaknesses" formation as seen in the ...Nf6 French Tarrasch.

The ideas and the moves

This French Tarrasch *tabi'a* is a complex formation with a nearly full complement of pieces and Pawns and a wide variety of plans available to each side. We can see in each of the games below a rich interplay of desirable strategic ideas tempered by tactical realities. It is even impossible to generalise on which wing each player will attack: Black has several King's-side attacking ideas like ...Ng4, ...Bxh2 and ...Rxf3

To look at specifics, I'll choose the less common ...Qb6 line.

This is because:

1. The more common Qc7 line is a jungle (although we can transpose)
2. The more common line Qc7 can be avoided by the murky 8.Nf4 variation, winning the exchange.
3. This less common Qb6 line has a superb how-to-play guide in John Watson's book.

MacDonald and Harley note that the Qb6 often comes back to Qc7, helping protect the King. But this is no waste of time because typically White has had to spend time coping with the attacks on b2 and d4, and may have settled for the passive Be3. They also note that Farago always plays ...Qb6 and is never in any trouble!

This is the position after Black's move 11, with White to move.

The Black Queen attacks Pawns on b2 and d4, restricting White's development. If the Bc1 moves, the b2 Pawn is hanging. If either Knight moves, the d4 Pawn isn't really hanging, because after ...Nxd4; Nxd4 Qxd4, the Bd3 can play away with check, winning the Qd4. But the Ne2 really will move one day, and the Black King may not always be on a checkable square. In fact, one common idea is for Black to play ...Kh8, threatening the d-Pawn. After castling, Black's Rook has occupied the half-open f-file, with new ideas like ...Rf8xf3 or xf2. Black's pieces are all quite active and White has yet to untangle; White is no position yet to exploit the static weakness of the Pe6 and the temporarily poor Bc8. Black has some unobvious moves like ...Nb4 (hitting d3/c2) and ...Ng4 (hitting ../e5), or manoeuvring either Knight to f5 (...Nc6-e7-f5/ ...Nf6-g4-h6-f5) to keep White from settling into a sound attacking position, and some enterprising ideas like ...Bc8-d7-e8-h5 to activate the Bishop.

What are White's choices here? Almost every legal move has been played!

- a. 12.Rb1 - idea: protect the b-Pawn and play Bf4
- b. 12.Ng3 - idea: control ../h5, block ...Bd6xh2
- c. 12.Bg5?! - ideas: gambit b-Pawn, play Bg5-h4-g3 to swap dark-squared Bishops
- d. 12.a3 - ideas: advance b-Pawn to b4, harass Nc6, occupy c5; prevent ...Nb4 (maybe organise Bc2/Qd3) (development lagging though)
- e. 12.Re1 - idea: pressure on e5/Pe6/Ke8, but weakens f2; often transposes below
- f. 12.Qd2 - idea: Qg5
- g. 12.Bf4 - ideas: exchange Bd6, gambit Pb2; there is sometimes the trick ... Bxf4; Nxf4, Nxd4!; Nxd4, e5!
- h. 12.b3 - ideas: protect b-Pawn, move Bc1 to f4 (or b2)
- i. 12.Nf4 - idea: hit e6. A critical try although Black can gambit the Pe6
- j. 12.Bd2 - idea: to c3 securing b2 and d4; slow
- k. 12.Nc3 - the flexible main line, committing White to nothing (although giving up Bf4). It adds some new ideas like Nc3-b5, or, after ...a6, Nc3-a4-b6

This actually doesn't exhaust the ideas, just the moves! One more idea is Ra1-c1xc6, undermining e5.

How might the game go after 12. Nc3?

Tseitlin, M-Beake, B/Hastings Challengers 1990/EXP 21/1-0 (57)

This key game was given in John Watson's book, although he safeguards the Black pieces to a B Becke. This continues a fine tradition of mis-attributing key games by Exeter players, after BCO gave a critical Petroff variation played by HV Mallison (against Hugh Alexander) as being essayed by Mattison, the Latvian problemist.

[We spent some time looking at the variations in Watson's book]

I find all this detail daunting, but Tony D says the detail is not so important as the ideas - there are a lot of games, but not so much theory! The idea being that Black can solve problems over the board. On the other hand, Watson says "Theory has exploded!". Perhaps the real answer is, ideas first, theory second. There are lots of ideas in "non-theoretical" openings which are not widely known, and players get by in blissful ignorance because their opponents don't know the theory either! For examples, look at the [Beating the Anti-Indians](#) document.

Your comments and experiences are welcome!

P.S. Other French centres

If White avoids e4-e5 we get other centres; while the Pawn is on e4 either White or Black can exchange, which lead to very different types of game.

A. Colle System

1. d4 Nf6 2. Nf3 and 3. e3

White will play slowly for the e2-e4 break, opening up the game.

There is a club booklet on the [Colle](#).

Black plays ...g6 against the Colle

This is well-known as a good system: the Bd3 bites on granite and e3-e4 results in a Pirc-style game satisfactory for Black.

The Colle proper is a system which follows 1. d4 d5, which is not the Indian move-order, but you may end up in the line below:

4. c3

4... g6 5. Nbd2 Nbd7 6. Bd3 Bg7 7. O-O O-O

Now Fine says White is best advised to play

8. b4=

Since

[8. e4 dxe4 9. Nxe4 cxd4 10. Nxd4 Ne5 11. Nxf6+ Bxf6 12. Be2 Bd7 is =+]

Colle system vs. King's Indian

1. d4 Nf6 2. Nf3 g6 3. e3

Now e2-e4 just loses a tempo on the Pirc, if that's in your repertoire (which it should be! White has more than one way to try and transpose...). Otherwise White can try to get into a main line as below:

Belavanets - Bronstein 13th USSR semi-final, 1941

1. d4 Nf6 2. c4 d6 3. Nc3 e5 4. Nf3 Nbd7 5. g3 g6 6. Bg2 Bg7 7. O-O O-O 8. b3 Re8 9. e3 c6 10. Qc2 Qa5 11. a4 Nf8 12. Ba3 Bf5 13. Qb2 Rad8 14. Rfd1 e4 15. Nd2 Ne6

The Qa5 is not typical, but we can see several themes here:

fianchetto of the King's bishop

use of the e-pawn to gain an initiative on the K-side

over-protection of the advanced e4-pawn

move all the pieces to the K-side in a committal attack

16. b4 Qc7 17. Rdb1 Qd7 18. c5 Ng5

More over-protection

19. cxd6 Bh3 20. Bh1 Qf5 21. Ne2 Nd5 22. b5 Bg4

23. Kf1

Two sword-swipes with the Knights decide the game.

23...Nxe3+ 24. Ke1 Nf3+ 0-1

Black plays ...e6 against the Colle

3. e3

Of course 3...e6 gives Black a problem developing the Bc8. It can hold back and wait for ...e6-e5, but it is more natural to develop it either on the long diagonal or immediately (after ...d5 and before ...e6).

3... Bg4 4. Nbd2 Nbd7 5. h3 Bh5 6. c4 e6 7. Qb3 Rb8

about equal: Kovacevic-Timman 1984]

Colle with ...b6

2... b6 3. e3 Bb7

"The Queen's Indian formation against the Colle-Zukertort has a reputation for reliability; Black indeed had a good plus score in the games examined." TRENDS

4. Bd3 e6 5. O-O c5

6. Nbd2

[6. c3 is the traditional recipe]

6... Be7

is the main line but others are known:

[6... cxd4 7. exd4 Be7 8. Re1 O-O 9. a4 a6 10. Nf1 d6= Kovacevic-Hulak, 1985 (BCO)]

[6... d6 is known to theory]

[6... Nc6!? 7. b3

[7. a3 Be7 8. Re1 O-O 9. b3 d6 10. Bb2 Re8 11. c4 Nb8 Yusupov-Sax, 1988 (1/2-1/2, 63)]

7... cxd4 8. exd4 Nb4 9. Be2 Rc8 10. c4 d5 Yusupov-Chernin, 1987 (1/2-1/2, 18)]

Example Game:

Colle,Edgar - Capablanca,Jose (18) [A47] *Karlsbad, 1929

1. d4 Nf6 2. Nf3 b6 3. e3

3... Bb7 4. Nbd2 e6 5. Bd3 c5 6. O-O Nc6 7. c3 Be7 8. e4 cxd4 9. Nxd4 O-O 10. Qe2

10... Ne5 11. Bc2 Qc8 12. f4 Ba6 13. Qd1 Nc6 14. Rf3

14... g6 15. N2b3 Nxd4 16. Nxd4 Bb7 17. Qe2 Bc5 18. Rh3 Qc6 19. e5 Nd5 20. Qf2

20... Bxd4 21. cxd4 Rac8 22. Bd1 f6 23. Qh4 Rf7

24. Bf3 Qc4 25. Be3 Nxe3 26. Bxb7 Nf5 27. Qe1 Rc7 28. Be4 Qxd4+ 29. Kh1 fxe5 30. Bxf5 exf5 31. fxe5 Re7 32. Re3 Qxb2 33. e6 dxe6 34. Rxe6 Kf7

White is two pawns down with still the worse position, so:

0-1

B. London System

1. d4 Nf6 2. Nf3 and 3. Bf4

White holds the centre and develops quickly, attacking on either side as the opportunity arises.

Black plays ...g6 against the London System

The Bishop rather invites ...d6 and ...e5.

3... Bg7 4. e3 d6

[4... d5 is recommended by Varnusz, but may not sit easily in the repertoire of a KID player. Also anecdotal evidence suggests that ...d5 may suit a London player's style]

5. h3

To preserve the Bf4, but it has at the moment little scope and its position even invites ...e5. We will look at an example game:

Polugaevsky-Gufeld, 1979

5... O-O 6. Be2 c5 7. Nbd2 cxd4 8. exd4 Nc6 9. O-O Bf5 10. c3 Rc8=

The Bf5 is awkward while it stays and awkward to remove.

11. Bh2 a6 12. a4 Re8 13. Nc4 d5 14. Nce5 Qb6 15. Ra2 Ne4 16. Nxc6?!

[16. g4!?!]

16... bxc6 17. a5 Qb7 18. g4 Bd7 19. Ne5

19... Bxe5

An unusual exchange!

20. Bxe5

[20. dxe5 e6 ^ ...c5]

20... f6 21. Bh2 c5 22. f3 Ng5 23. h4 Nf7 24. Re1 Bb5 25. b3 cxd4 26. cxd4 Rc3 27. Kg2 e5 28. Bxb5 Qxb5 29. Rae2 Rd3

30. Rd2 Rxd2+ 31. Qxd2 Qxb3 32. Re3 Qb5 33. g5 Nd6 34. Re1 Nc4 35. Qf2 exd4 36. Rxe8+ Qxe8 37. gxf6 Ne3+ 38. Kg1 Qb5 39. Be5 Qb1+ 40. Kh2 Qf5 41. Bg3 Qc2 42. Qxc2 Nxc2 43. Be5 Kf7 44. Kg2 d3 45. Kf2 d2 46. Ke2 Ne3

0-1

White's poor Bishop could do nothing about the Black attack, and finally dies on what should be its best square!

Hills-Webb 1995

5... Nbd7

for 5...O-O see below

6. Be2

[6. Bd3 is deterred by the Pawn on g6]

6... O-O 7. c4

[7. c3 and Nbd2 is a slower way to play the system; Black can play the Bc8 to b7 as in the game.]

[7. O-O Qe8 is recommended in the book (Varnusz), planning ...e5]

or

[7... c5 8. c3 b6 9. a4 Bb7 10. Bh2 a6! Varnusz]

7... c5

Thematic, playing to pressurise the long diagonal.

8. Nc3 cxd4 9. exd4 b6 10. O-O Bb7 11. Qc2 Rc8 12. b3

Defends the c4 Pawn but weakens the dark squares.

12... a6

∧ ...b5

13. a4 Re8 14. Rfd1 Nb8

∧ ...Nb8-c6-b4

15. d5 Nxd5

draw agreed (!)

[15... Nxd5 16. Bd2 Nb4-+]

One last one with a slightly different move order.

Short, N-Kasparov, Gary/Skelleftea (4) 1989

2... c6 3. Bf4 d6 4. h3 Qb6 5. b3 c5 6. dxc5 Qxc5 7. c4 g6 8. Nc3 Bg7 9. Rc1 Bf5

Black is fine here: both Bishops are better than White's, Black has control of e4 and can enjoy the discomfort of White's King, which is at least three moves from castling.

10. Be3 Qa5 11. Bd2 Qd8 12. Nd4 Be4 13. e3 Nc6 14. Nde2 Bd3 15. Nf4 Bxf1 16. Kxf1 O-O 17. g3 e6 18. Kg2 d5 19. cxd5 exd5 20. Qf3 d4 21. Ncd5 Nxd5 22. Qxd5 Qe7 23. Rhe1 Rad8 24. Qc5 Qd7 25. e4 Ne5 26. Red1 b6 27. Qc7

27. Qc7 Qb5 28. Qxa7 g5 29. Qa4

Sacrificing the Knight for some play

5... Be7 6. h3 O-O 7. Nbd2 c5 8. c3 d5 9. O-O Qc8 10. Re1 Ba6 11. Bc2 Rd8 12. Ne5 Nc6 13. Bg5 h6 14. Bh4 Qc7 15. f4 Rac8 16. Qf3 Ne4

1/2-1/2 Gulko-Browne, 1988 (Given in *The London System* by Soltis)

C. Torre Attack/Torre System vs. King Fianchetto

1. d4 Nf6 2. Nf3 and 3. Bg5

The founder of this system scored a famous victory over Lasker with a 'windmill' combination. It has similar ideas to the London System, and chooses perhaps a better square for the Bishop. It also tempts Black to chase the bishop.

Black plays ...g6 against the Bg5 system

3. Bg5

3... Bg7

White can try and fiddle c2-c4 or Nb1-c3 with 4. e3, but this forgoes e2-e4.

4. Nbd2 c5

White can now try

5. Bxf6 or

5. c3:

we'll look at a game with each.

5. Bxf6 e.g. Spiridonov,N-Kasparov,Gary/Skara (4) 1980

5. Bxf6 Bxf6 6. Ne4 Bxd4! 7. Nxd4 cxd4 8. Qxd4 O-O 9. c4

Although Black lacks the dark-squared Bishop, his position is fine.

9... Nc6 10. Qd2 d6 11. Nc3 Be6 12. e4 Qb6 13. Rd1?!

Over-ambitious: Black spies the traditional weakness on f2

13... Ne5 14. b3 f5! 15. Be2 f4!-+

Cementing the post on e5.

16. Nd5 Bxd5 17. Qxd5+ Kg7 18. O-O Rac8 19. b4 Qxb4 20. Rb1 Qa3 21. Rxb7

White seems to have developed some uncomfortable threats...

21... Kf6!!

...but they are all one-move deep, and this stops the lot!

22. h4 h6

[22... Qxa2? 23. Bg4]

23. Rd1 Rb8

[23... Qxa2?? 24. Qxd6+ exd6 25. Rxd6#]

24. Rc7 Rfc8 25. Rxc8 Rxc8 26. Qb7 Qc5 27. Qb2 Qb6 28. Qc1 g5 29. Rd5 e6 30. hxg5+ hxg5

31. Rd1 Ke7 32. Qc2 Rb8 33. Qa4 g4 34. Qa3 Qc5 35. Qc3 g3 36. Rf1 gxf2+ 37. Rxf2 Rb1+ 38. Bf1 Qe3 39. Qxe3 fxe3 40. Rc2 Nxc4 0-1

5. c3 Bisguier,Arthur-Fischer,Robert/New York ch-US Rd: 5 1965

5... cxd4

This capture is best and common in these systems after Nbd2, since White cannot play Nb1-c3

6. cxd4 Nc6 7. e3 O-O 8. a3 h6 9. Bh4 d6 10. Bc4 Bf5 11. h3 Rc8 12. O-O e5 13. e4 Bd7 14. dxe5 dxe5 15. Ba2 g5

with the e-pawn fixed, the light-squared Bishop lacks access to f5 and related squares, so this is quite safe here.

16. Bg3 Qe7 17. Re1 Rcd8

Black's position is harmonious with central control; White's pieces lack scope by contrast. White would like to sink a Knight into f5 but it's going to have to be the one on f3, which is going to give Black the d4 point.

18. Nh2 Be6 19. Bxe6 Qxe6 20. Nhf1 Rd3! 21. Re3

takes e3 away from the Nf1.

21... Rd7 22. Qb3 Qe7 23. Nf3 Rfd8 24. Rae1 Nh5 25. Rc3 Qf6 26. Ne3 Nd4

A nice example of over-protection, the Knight cannot be left, and the exchange will give Black's pieces extra scope.

27. Nxd4 exd4 28. Ng4 Qg6 29. Rd3 Nxd3

White faces an uncomfortable choice

30. fxg3 Rc7 31. Nf2 Rdc8 32. Re2 Rc1+ 33. Kh2 h5 34. Qxb7 Be5 35. Qd5 R1c5 36. Qd7 h4 37. Nh1 Rc1 38. Rf3 g4

Mate is threatened

39. Qxg4 Qxg4 40. hxg4 Kg7 41. Rf5

41... Rxh1+!

0-1

Another recent game featuring ...g6 was this encounter:

Short Nigel D-Kasparov Gary/Cup World, Reykjavik (Iceland) 1989

2... c6 3. Bf4 d6 4. h3 Qb6 5. b3 c5

An interesting tempo-loss

6. dxc5 Qxc5 7. c4 g6 8. Nc3 Bg7 9. Rc1 Bf5

Black is fine here: his dark-squared Bishop is better than White's, has control of e4 and can enjoy the discomfort of White's King, which is at least three moves from castling.

10. Be3 Qa5 11. Bd2 Qd8 12. Nd4 Be4 13. e3 Nc6 14. Nde2 Bd3 15. Nf4 Bxf1 16. Kxf1 O-O 17. g3 e6 18. Kg2 d5 19. cxd5 exd5 20. Qf3 d4 21. Ncd5 Nxd5 22. Qxd5 Qe7 23. Rhe1 Rad8 24. Qc5 Qd7 25. e4 Ne5 26. Red1 b6 27. Qc7

27...Qc7 Qb5 28. Qxa7 g5 29. Qa4

Sacrificing the Knight for some play

29... Qxa4 30. bxa4 gxf4 31. gxf4 Nd3 32. Rc6 Nb2 33. Rdc1 Nxa4 34. f5 Rfe8 35. f3 Ra8 36. Kh1 Nc5 37. Rg1 Kh8 38. Rc7 Rf8 39. Bf4 Rac8 40. Re7 Rce8 41. Rc7 Nd3 42. Bd6 Rg8 43. Rxf7 Be5 44. Rxc8+ Rxc8 45. Rd7 Nf2# 0-1

Torre Attack (Bg5 against ...e6)

3. Bg5

3. ... c5

...b6 systems tend to be upset by d4-d5

4. e3

There are two alternatives:

[4. e4 Wagner Gambit, a sharp line 4... cxd4 5. e5 h6 6. Bh4 g5 7. Bg3 Nh5 8. Qxd4 Nc6 9. Qe4 Bg7 Marshall-Nimzovitch, Berlin 1928. ^ ...Nxc3 and x e5]

[4. c3 4... cxd4 5. cxd4 Qb6 6. Qc2 Nc6 7. Nc3?

[7. Bxf6 gxf6 8. e3 d5 9. Nc3 Bd7 10. Be2 Be7 11. O-O O-O 12. Na4 Qc7 13. Nc5 Rfc8 14. Nxd7 Qxd7 15. Qa4 Ne5 16. Qxd7 Nxd7 17. Rfc1 Nb6=/+ "Black's Knight is more powerful" - BELLIN Larsen-Portisch, Tilburg 1980]

7... Bb4

[7... Nxd4]

8. e3 d5 9. Bd3 Bd7 10. O-O Be7

"By now you should realise that this game lacks quality" - Daniel 11. a3 h6 12. Bxf6 gxf6 13. b4 Rc8 14. Rfc1 f5 15. Qe2 O-O

and now White blundered with

16. Na4?

[16. Nd2+/= x c5]

16... Nxd4! *Stenhouse-Hill, Portsmouth 1996*]

After the main line with 4. e3, Black has two alternatives:

Risky 4...Qb6

Positional 4... cxd4

One rare alternative:

4... Be7 5. Nbd2 Nc6 6. c3 cxd4 7. exd4 O-O 8. Bd3 b6 9. O-O Bb7 10. Re1 h6 11. Bxf6 Bxf6 12. Ne4 Be7 13. Bb1 d5 14. Ng3 Bc8= R Ye-J Ye, Jakarta 1994

Risky 4...Qb6

4... Qb6

"This is undoubtedly the most critical variation of the Torre Attack" - BELLIN.

White must now decide whether to sacrifice the b2 pawn,

5. Nbd2,

or to defend it with the passive-looking

5. Qc1.

Passive 5. Qc1

5. Qc1 Ne4

[5... Nc6 6. c3

[6. Bxf6 gxf6 7. c3 d5 8. Nbd2 Bd7 9. Be2 Rc8 10. O-O cxd4 11. exd4 Bh6= Holmov-Anikayev, Tbilisi 1976]

6... Ne4 7. Bf4 d5 8. Bd3 Be7 9. Nbd2 f5

and Black's position is fine: Petrosian-Cherepkov, USSR 1961.]

6. Bf4 d5 7. c3 Nd7

[7... Nc6]

8. Nbd2 Ndf6 9. h3 Bd6 10. Ne5 c4?!

(This type of move often leaves White free to ignore the centre and attack elsewhere)

11. g4 Nxd2 12. Qxd2 Ne4 13. Qc2 Bxe5 14. Bxe5

and now I played the weakening

14... f./strong>

Aggressive 5. Nbd2

5. Nbd2

5... d5

*[5... Qxb2 This looks unwise. 6. Bd3 cxd4 7. exd4 Qc3 8. O-O d5 9. Re1 Be7 10. Re3 Qc7 11. Ne5=/
and with a nice position for the sacrificed pawn.]*

6. Bxf6 gxf6 7. c4 cxd4 8. exd4 dxc4 9. Bxc4 Nc6 10. O-O Bd7 11. d5

Although Black has played a safer line I would say that this position is good for White. The problem for Black after 5. Nbd2 the Knight on f6 can no longer go to e4, and therefore Black is likely to end up with doubled pawns.

Positional 4... cxd4

4... cxd4

Bronstein-Ward, Maidstone 1994 /0-1

5. exd4 Be7 6. c3 b6 7. a4 O-O 8. Na3!? Nc6 9. Bd3 Bb7 10. O-O Nd5 11. Bd2 Rc8 12. Re1 Qc7=

This position is equal, although the first thing that struck me was that White's position looks a little easier to play. Perhaps Black can leer at the Knight on a3 and work in a raid based on ...Bd6 and ...Nf4. I don't know how the game went, but Black won.

Summary

If you think that your opponent will defend the pawn with 5. Qc1 then 4...Qb6 is clearly worth a try. However, after 5. Nbd2, White is likely to achieve a better position because no time has been

wasted. This is not to say that you can't take the b-pawn, if you are looking for a sharp game. For those who prefer a more positional type of game, then 4...cxd4 is ideal.

D. Trompovsky

1. d4 Nf6 2. Bg5

An even earlier Bishop move, and now only 2...e6 and 2...Ne4 can stop White from kicking a hole in the Black pawn formation. In the 'seventies Hort and Jansa often adopted it with a positional approach, but a more brawling style has been characteristic of Hodgson's revival of the line in the 'nineties.

Black plays ...g6 against the Trompovsky

Ah, now - this booklet has got a big hole in it - you can hardly play ...g6 against the Trompovsky.

2...g6 3. Bxf6 exf6

and I think Black already has some problems getting organised.

2... c5

is the sort of move that might appeal to a KID player, particularly if you have a quick look at

3. d5?! Ne4 4. Bf4 Qa5+

A better idea for White is

3. Bxf6! e.g.

3... gxf6 4. d5 Qb6 5. Qc1

which is probably the funny sort of position that White may feel more comfortable than you, although I don't think White can claim a plus here, e.g. 5... f5

[5... d6]

6. c3

[6. e3]

[6. g3]

6... Bg7 7. e3 e6 8. Nh3

Hort says this is unclear. I believe him.

I recommend

2... Ne4

Now I think the best for White is

3. Bf4

Alternatives:

[3. Bh4 g5 4. f3 gxh4 5. fxe4 is the old theory on this line: White will struggle to hold the dark squares]

[3. h4 is Hodgson's favourite]

3... c5

[3... d5 4. f3 Nf6 5. e4 dxe4 6. Nc3 is a Blackmar-Diemer Gambit a tempo ahead for White!]

[Another idea for Black is 3... Nc6!? ^ 4. f3

[4. d5 e5!]

[4. Nf3!]

4... e5! 5. dxe5 g5! 6. Bc1 Nc5

^ ...Bg7]

After 3...c5:

4. f3 Qa5+ 5. c3 Nf6

when

6. d5

transposes above.

Black plays ...e6 against the Trompovsky

2. Bg5 e6

3. e4

[3. Nf3 is the Torre]

Now

3... h6

is the most common move, but not the only one:

[3... c5

is almost entirely untested. One known example went

4. e5

[4. Nf3 is the Wagner Gambit]

4... h6 5. Bc1 Nd5 6. c4 Nb6 7. dxc5 Bxc5 8. Nf3 d5 9. exd6 Qxd6

[9... Bxd6!?!]

10. Qxd6 Bxd6 11. Nc3 Nc6 12. Bd2 Nd7 13. O-O-O Ke7 14. Nb5

1/2-1/2 Soffer-Yudasin, Israel 1994.

Black could have played on with

14... Bc5]

After 3...h6:

4. Bxf6 Qxf6

5. Nc3

White can try the Knight on d2:

[5. Nf3 b6 6. Bd3 Bb7 7. Nbd2 a6

[7... c5 8. e5 Qd8 9. Be4 Qc7 10. O-O Be7 11. Re1 O-O 12. dxc5 bxc5 13. Bxb7 Qxb7 14. Nc4

Levenfish-Rabinovitch, Petrosgrad 1921]

8. Qe2 d6 9. O-O-O Nd7 10. Kb1 e5

Lots of pawn moves, but he must have thought White couldn't rush the centre.

11. c3 Be7 += Korchnoi-Karpov, Hastings 1971/72]

5... Bb4 6. Nf3

*[6. Qd2 c5 7. a3 Bxc3 8. bxc3 d6 9. f4 O-O 10. Nf3 Nc6 11. Bb5 Na5 12. Bd3 b6 13. O-O Bb7
Hodgson-Yudasin, ??]*

6... d6 7. Qd2 Nd7 8. a3 Ba5 9. Bd3 O-O 10. O-O c6 11. b4 Bc7 12. Ne2 e5 =

Bezold-Bischoff, Altensteig 1994

Summary

I believe 3...c5!? is well worth a try, in order to try and transpose into the Torre. Of course, White can go for a Torre immediately with 3. Nf3, and it will be interesting to see how many White players opt for this. 3...h6 is also OK, although Karpov sank rather against Korchnoi in the game given in the *Custer's Last Stand* handout.

[\[Footnote from Frederick Prost: is 3...c5 really so easy?\]](#)

E. Systems with g3

1. d4 Nf6 2. g3

Transpositional except against the King's Indian where the double fianchetto system is known (with b2-b3).

Against the ...e6 systems it usually transposes into the Catalan, where Black may have problems whether the centre is closed (Botvinnik) or open (Keene).

Black plays ...g6 against g3

The system with g3 and b3 (without c4) is one to know about:

3. b3 Bg7 4. Bb2 d6 5. g3 O-O 6. Bg2

6... e5

Black has an important alternative here:

[6... Nbd7 7. O-O e5 8. dxe5 Ng4

9. Qd2

[9. Nc3 Pirc 9... Ngxe5!

[9... dxe5 10. Nd2+/= Pirc]

]

[9. c4 Re8 10. h3 Nh6 11. Nc3 dxe5 12. e4 c6 13. Qc2 f6 Holmov-Gufeld, about equal]

9... Ngxe5?!

[9... Re8! 10. h3 Nh6 11. Na3 dxe5 12. Nc4 f6 which is probably OK for Black]

10. Nxe5 dxe5 11. Nc3 c6 12. Rad1..em>

[12. Ba3+/=]

]

7. dxe5 Nfd7 8. O-O

8... dxe5

[8... Nc6 9. Qd2 Miles-Ristic, 1988 9... Ndx5 Marovic]

9. e4 Nc6 10. Nbd2 b6 11. Qe2

Now Polugaevsky-Medina, 1972, continued:

11... Qe7

[11... a5 Marovic]

12. Rfd1 Nc5 13. Nf1 Ba..

1-0, 39

[13... Be6 was better, according to Marovic]

Of course, White might sidle over into the main line with g3:

Arkell-Nunn/London 1992

3. g3 Bg7 4. Bg2 O-O 5. O-O

[5. c4 d6 was the game move order]

5... d6

6. c4

[6. c3]

6... Nbd7 7. Nc3 e5 8. Qc2 Re8 9. b3 c6 10. e3 exd4 11. Nxd4 h5

Intending ...h5-h4xg3, when White will be reluctant to play f2-f4 to dislodge a Knight on e5.

12. Ba3 Qe7 13. Rad1 Nc5 14. b4 Nce4 15. Nxe4 Nxe4 16. b5 c5

(forced, but the Ba3 needs another post now)

17. Ne2

x d5: Black needs play on the King's-side

17... Bf5 18. Qb3 h4 19. Nf4 Qe5 to prevent Bb2 20. Rd5 Qf6 21. g4 Bxg4 22. f3 h3

23. Bh1

[23. Nxh3]

[23. Bxh3]

23... Nc3 24. f3g4 Qh4 25. Rd3 Qxg4+ 26. Kf2 Bd4 27. Rxc3 Qxf4+ 28. Ke2 Qxh2+ 29. Kd1 Bxc3 30. Qxc3 Re5 31. Bb2 Rae8 32. Bd5 R8e7 33. Qd2 Qxd2+ 34. Kxd2 Rf5

[34... Rxe3 35. Bf6<-/->]

35. Rxf5 gxf5 36. Ke2 h2 37. Kf2 Re6 38. Bc1

[38. Bxe6 h1=Q]

38... Rg6 39. Bg2 Rg4 40. Bd2 Rxc4 0-1

Black plays ...e6 against the g3 system

2. g3 e6

This system with c2-c4 is well known: it is called the Neo-Catalan.

2. g3 e6

3. Nf3

3... c5

[We looked at 4. dxc4 in the Custer booklet: the only other independent line is]

4. c4 cxd4 5. Nxd4 Nc6

which is the English Opening: g3 systems have become fashionable against the Nimzo and so they are another one to slot into your repertoire

6. Bg2 and now 6... d5 is the Tarrasch Defence to the Queen's Gambit

One complex line which offers chances to both sides is

6. Nc3 Qb6!?

[6... Bb4 is safe, 6...Bc5 is uncommon]

7. Nb3

[7. Nc2 d5!? is an approved gambit]

7... Ne5

[7... Bb4!? and 7...d5?! have also been tried]

8. e4 Bb4 9. Qe2

with a complex position that is given in few Nimzo books! DR has played either side with pleasure, and some lines he recalls go:

9... a5 10. f4

[10. Be3]

10... a4!? Nunn 11. fxe5 axb3 12. exf6 Rxa2

Pick the bones out of that!

F. Systems with a delayed c4

Even if White has c2-c4 lines in their repertoire, it may reduce Black's options to delay this, e.g. in the Catalan.

This is a transpositional device and your main openings books should help you here.

G. Stonewall Opening

1. d4 2. e3 3. Bd3 4. f4

White locks up the centre and rolls down the King's-side

1. d4 d5 2. e3 Nf6 3. Bd3

[3. f4 is sometimes played to avoid the 3...Nc6 line, but then Black can always play ...Bf5]

Black plays ...g6 against the Stonewall

The Stonewall is not pointless, particularly after ...d5/...e6. But an early ...g6 deadens the attack from d3, and Black can try ...d6 and ...e5 to blow up the centre, e.g.

1... g6 2. e3 Bg7 3. Bd3 d6 4. c3 Nd7 5. f4 e5 6. Nf3 Ngf6 7. fxe5 dxe5 8. dxe5 Ng4 9. e6 fxe6 10. Nd4 Nde5 11. O-O

[11. Be2 O-O 12. Bxg4 Qh4+ 13. g3 Qxg4 14. Qxg4 Nxc4=/+ ...1/2-1/2 Jordan,D-Regis,D/Devon vs. Glos 1995]

11... Rf8 12. Rxf8+ Kxf8 13. Qf1+ Kg8 14. Bc2 c5 =+

Black plays ...e6 against the Stonewall

2. e3 d5

[2... e6 immediately has no special virtues, unless you really want to play a ...b6 system]

3. Bd3 c5

[There is also the system with 3... Nc6 e.g.

4. f4

[4. c3 e5!]

4... Nb4! 5. Nf3 Nxd3+ 6. cxd3 g6 7. Nc3 Bg7 8. O-O O-O=]

4. c3 Nc6

[4... e6 5. f4]

5. f4

5... e6

blocks the Bc8 better is:

5... Bg4 6. Nf3 e6 7. Nbd2 Bd6 8. h3 Bh5 9. b3 cxd4 10. cxd4 Rc8

when Black is comfortable

H. The Richter-Veresov system

1. d4 Nf6 2. Nc3 d5 (Other moves transpose into e.g. the Pirc or French)

This is another system emphasising piece play - again with the threat of doubling the f-pawns, or reserving King's-side chances.

Against the Veresov itself:

3...Nbd7

3...Bf5 and

3...c5

are independent lines with some little theory attached.

e.g.

[3... Bf5 4. f3

[4. e3]

[4. Bxf6]

4... Nbd7 5. Nxd5 Nxd5 6. e4 h6 7. Bh4 N7b6 8. exf5 Ne3 9. Qd2 Nxf1 10. Kxf1=/+]

[2... c5 is another idea again, which might appeal to the KID/Benoni player]

Black plays ...g6 against the Veresov

2... g6

Black offers a Pirc. If White declines we probably get a Torre where the move Nc3 forgoes some of White's best ideas, like Nbd2 and moves of the c-pawn.

Black plays ...e6 against the Veresov

1. d4 Nf6 2. Nc3 e6

3. Bg5 d5

3...c5

You will find White players who head for the French here, as pure Veresov ideas like 4. e3 and 4. Nf3 look insipid. These are all playable, particularly at club level (what isn't!).

 5. [Black can equalise by developing the Queen's Bishop](#)
 6. [Black can try to blunt the power of the Bd3 by ...g6](#)
 7. [But even if Black adopts the ...g6 idea, the game need not be easy](#)
6. [Eliskases - Rosetto, Mar del Plata, 1950](#)
7. [Pillsbury, Harry N - Winawer, S \(Budapest, 1896\)](#)

The Colle opening proper goes 1. d4 d5 and now 2. Nf3 3. e3 4. Bd3 with Nbd2, O-O, Re1 and e4 to follow. If Black hits the d-pawn with ...c5, White should reply c3 to shore up the centre. The formation c3-d4-e3 is the famous *Colle triangle*.

Although White takes two moves to achieve e4, it should lead either to an open game after ...dxe4 or, if Black avoids the exchange, the strong advance e5.

Black should keep up the pressure on d4, holding up White's e4 break and threatening to isolate the d-pawn.

Here's a game to get us started:

Landau - Book, Kemerli, 1937

1. d4 d5 2. Nf3 Nf6 3. e3 e6 4. Bd3 c5 5. c3 Nbd7 6. Nbd2 Bd6 7. O-O O-O

8. Re1 Diagram

An accurate and important move.

[8. e4 cxd4 9. cxd4 dxe4 10. Nxe4 Nxe4 11. Bxe4 Qb6 and, if anything, Black has better prospects]

8... Qc7 This is probably best:

[8... b6 is too slow]

[8... e5 too early: 9. e4! +=]

[8...c4 is a mistake: 9. Bc2 and 10. e4 will now come with greater force]

[8... Re8 9. e4 dxe4 10. Nxe4 Nxe4 11. Bxe4 cxd4? Diagram

12. Bxh7+ Kxh7 13. Ng5+ Kg6 14. h4 Rh8 15. Rxe6+ +- Fine]

Variation

9. e4 cxd4 10. cxd4 dxe4 11. Nxe4 Nxe4 12. Rxe4 Re8 13. Rh4 Nf8 14. Ng5 h6 15. Qh5 e5 16. Bd2
exd4 17. Rc1 Qe7 18. Ne4

18... Ng6 (else Bxh6)

19. Bg5 Qe5

[19... hxg5 20. Qh7+ Kf8 21. Qh8+ Nxf8 22. Rxh8#]

20. f4 Qd5

[20... Qa5 21. b4]

White now lands two good punches

21. Nf6+ gxf6 22. Bxg6

Black's pawn cover has suddenly disappeared.

22... Bf8

[22... fxg6 23. Qxg6+ Kf8 24. Qxf6+ Qf7 25. Bxh6+ Kg8 26. Qg5+ Kh8 27. Bg7+

Kg8 28. Rh8#]

[22... fxg5 23. Qxh6 gxh4 24. Bh7+ Kh8 25. Be4+ Kg8 26. Bxd5]

23. Rc7 Be6 24. Bxf6 Qxh5

Ordinarily, exchanging queens is an important achievement for the defence.

25. Bxh5 Rec8

Has Black held on long enough?

26. Bxf7+ and still they come!

26... Kh7

[26... Bxf7 27. Rg4+ Kh7 28. Rxf7+ Bg7 29. Rgxg7+ Kh8 30. Rg6#]

27. Rxc8 Bxc8 28. Bxd4

Cashing in

28... Bf5 29. Rh5 1-0

Here's another Colle game by that demon attacker, Harry Pillsbury.

Pillsbury - Amateur, Toronto, 1899

1. d4 d5 2. Nf3 e6 3. e3 Nf6 4. Bd3 Nbd7 5. O-O b6 6. Nbd2 Bd6

The Classic Colle start.

7. e4 dxe4 8. Nxe4 Bb7 9. Nxd6+ cxd6 10. Bf4 Bxf3 11. Qxf3 d5 12. Bd6 Rc8 13. Rfe1 Rc6 14. Ba3 a5 15. c4 Ne4

The game has developed differently to Landau's, but Pillsbury still has a fine attack based on his Bishops and the poor Black K position.

16. cxd5 Ng5 17. Qg3 Rc8 18. dxe6 Nxe6 19. Rxe6+ fxe6 20. Qg6+ hxg6 21. Bxg6+ 1-0

Here's the man himself, who perfected the modern approach to the opening.

This is well worth going through move by move.

Colle - Stoltz, Bled, 1931

1. d4 d5 2. Nf3 Nf6 3. e3 c5 4. c3 Nbd7 5. Nbd2 Qc7 6. Bd3 e5 7. e4 dxe4 8. Nxe4 Nxe4 9. Bxe4 Nf6 10. Bc2 cxd4

11. O-O (a pawn offer, which should not have been accepted) 11... dxc3 12. Nxe5 Bd6 13. Ba4+ Kf8

[13... Bd7 14. Nxd7 Nxd7 15. Re1+ Kf8 16. Bxd7 Qxd7 17. bxc3]

14. Bf4 Bg4 this attempt to mix it is understandable but ill-judged 15. Ng6+ Kg8

[15... hxg6 16. Bxd6+ Kg8 17. Bxc7 Bxd1 18. Raxd1]

16. Bxd6 Bxd1 17. Bxc7 Bxa4 18. Nxh8 Nd5 19. Ba5 c2 20. Bd2 Kxh8

White has a small advantage, which he exploits perfectly

21. Rfe1 Kg8 22. Rac1 Rc8 23. Re4 Bd7 24. Rd4 Be6 25. b3 b5 26. Ba5 g5 27. Rd2 Rc6 28. Rcxc2 Ra6 29. b4 Rd6 30. a3 h6 31. Rc5 a6 32. Bc7 Rd7 33. Be5 Kh7 34. h3 h5 35. Bb2 Kg6 36. Rc6 1-0

And Colle again. Take this one slowly if you play it through, there's a lot to enjoy!

Colle - O'Hanlon, Nice Ol, 1930

1. d4 d5 2. Nf3 Nf6 3. e3 c5 4. c3 e6 5. Bd3 Bd6 6. Nbd2 Nbd7 7. O-O O-O 8. Re1 Re8 9. e4 dxe4 10. Nxe4 Nxe4 11. Bxe4 cxd4

12. Bxh7+ Kxh7 13. Ng5+

13... Kg6

[13... Kg8 This is the only real alternative. Analysis by Euwe and Kramer suggests that White's attack is worth a draw but no more. The variations and ideas are very typical of the h7 sac in the Colle and are worth playing over.]

14. Qh5 DIAGRAM

Variation

16. h5+ Kh6

[16... Rxh5 17. Qd3+ Kh6 18. Qh7#]

17. Rxd6 Qa5 18. Nxf7+ Kh7 19. Ng5+ Kg8 20. Qb3+ 1-0

A superb game -- although Black could have held on in theory, he was blown away.

Some Colle theory

Let's start again, having got the idea of the opening, and look at some detail of move order.

Start as we have seen: 1. d4 d5 2. Nf3 Nf6 3. e3 c5

I will explain some of the ideas behind the moves in the games above.

Black gets into a little trouble with 4...e6.

4. c3

Now, we often see

4... e6

What next?

Black's Queen's Knight should go to d7, supporting c5,e5 and f6

The most logical development for both sides is probably

1. d4 d5 2. Nf3 Nf6 3. e3 e6 4. Bd3 c5 5. c3 Nbd7 6. Nbd2 Bd6 7. O-O O-O 8. Re1!

For this position, see Landau-Book (our first game above). It's probably about equal, but Black cannot relax for a moment.

Black's Queen's Knight should not go to c6 but to d7

1. d4 d5 2. Nf3 Nf6 3. e3 c5 4. c3 e6 5. Nbd2 Nc6

natural, but less accurate

6. Bd3 Bd6 7. O-O O-O 8. dxc5 Bxc5 9. e4 e5(!) 10. exd5 Nxd5 11. Qe2 Bg4 12. Ne4+ =

Black can just about equalise in this line:

[9... Qc7 10. Qe2 Bd6 11. Re1 Ng4 12. h3 Nge5 13. Nxe5 Nxe5 14. exd5 exd5 15. Nf3 Nxd3 16. Qxd3 Qc4 17. Rd1 Qxd3 18. Rxd3 Rd8

...and the two bishops compensate for the isolated pawn in the endgame

Black cannot develop fast enough to get in the ...e5 counter in one move

1. d4 d5 2. Nf3 Nf6 3. e3 c5 4. c3

4... Nbd7 5. Nbd2 Qc7

aiming at ...e5

6. Qa4 g6 7. c4 Bg7 8. cxd5 Nxd5 9. e4 N5b6 10. Qc2 +=]

Black can equalise by developing the Queen's Bishop

If White's Bd3 is threatening, and Black's ...e6 leads to difficulty if the Bc8 gets stuck, the natural move is ...Bf5.

In fact, this is recommended as leading to an equal game.

1. d4 d5 2. Nf3 Nf6 3. e3

3... Bf5 e.g. 4. Bd3 e6 5. Bxf5 exf5 6. Qd3 Qc8 7. b3 Na6 8. O-O Be7 9. c4 O-O
10. Nc3 c6 11. Bb2 Ne4

Black is comfortable

Also possible is 3...Bg4 and later ...e6, also equalising.

Black can try to blunt the power of the Bd3 by ...g6

1. d4 d5 2. Nf3 Nf6 3. e3 c5 4. c3

4... g6 5. Nbd2 Nbd7 6. Bd3 Bg7 7. O-O O-O DIAGRAM

Now Fine says only 8. b4, changing plan, is good enough for White because the main plan with e4 leads to a slightly worse game:

[8. e4 dxe4 9. Nxe4 cxd4 10. Nxd4 Ne5 11. Nxf6+ Bxf6 12. Be2 Bd7 =+]

But even if Black adopts the ...g6 idea, the game need not be easy

Eliskases - Rosetto, Mar del Plata, 1950

1. Nf3 d5 2. d4 c6 3. e3 g6 4. Bd3 Bg7 5. Nbd2 Nh6 6. c3 O-O 7. O-O Nd7 8. e4 dxe4 9. Nxe4 Nf5 10. Bf4 Nf6 (?) 11. Nxf6+ Bxf6

White has the advantage in the centre

12. Qd2 Qb6 13. Rfe1 c5

it would have been better to aim for the ...e5 break

14. Bxf5 Bxf5 15. Be5

15... Rfd8 naive

[15... Bxe5 16. Rxe5 White's small force is making very nasty threats]

[15... Kg7 best]

16. Qh6 Bxe5 17. Rxe5 cxd4 18. Ng5 Qf6

19. Rxe7 Qg7

[19... Rd7 20. Rae1]

20. Qh4

[20. Qxg7+ Kxg7 21. Rxf7+ Kg8 22. Rxb7 d3 with counterplay]

20... dxc3 21. Rxf7 cxb2 22. Rxg7+ Kxg7

23. Re1 Rd7

[23... b1=Q 24. Qxh7+ Kf6 25. Qe7#]

[23... h6 24. Re7+ Kg8 25. Qc4+ Kh8 26. Rh7#]

[23... Re8 24. Qd4+ Kg8 25. Qc4+ ! 25... Kg7 26. Qc3+ Kg8 27. Qb3+ Kh8 28. Qxb2+ winning]

24. Qb4 Re8 25. Qxb2+ Kh6 26. Nf7+ resigns 26... Kh5 27. g4+ Bxg4 28. Rxe8
1-0

You can actually apply the style of the Colle in many d-pawn openings.

NN-NN

1. d4 Nf6 2. c4 e6 3. Nc3 d5 4. Nf3 c6 5. e3 Nbd7 6. Bd3 Bd6

Here we go again...

7. e4 dxe4 8. Nxe4 Nxe4 9. Bxe4 Nf6 10. Bc2 O-O 11. O-O c5 12. Bg5 cxd4 13. Qxd4 !

13... Be7

[13... Bxh2+ 14. Kxh2 Ng4+]

14. Qh4 ! 14... h6 15. Bxh6 gxh6 16. Qxh6 Qa5 17. Ng5 e5 18. Bh7+ Kh8 19. Be4+ Kg8 20. Rfe1 Bg4 21. Re3 Rad8 22. Rg3 Rd4 23. Ne6 fxe6 24. Rxg4+ 1-0
[24. Rxg4+ Kf7 25. Qg6#]

Here's Harry Pillsbury again, on the White side of the Slav.

Pillsbury, Harry N - Winawer, S (Budapest, 1896)

1. d4 d5 2. c4 e6 3. Nc3 c6 4. e3 Nf6 5. Nf3 Nbd7 6. Bd3 Bd6 7. O-O O-O

Not the Colle opening, but we can see the approach at work:

8. e4 dx e4 9. Nxe4 Nxe4 10. Bxe4 Nf6 11. Bc2 h6 12. Be3 Re8 13. Qd3 Qc7 14. c5 Bf8 15. Ne5

Black starts to mix it, but White's better position suggests that only White can profit when tactics break out.

15...Bxc5 16. Bxh6 Bxd4 17. Qxd4 g6 18. Qf4 Nd5 19. Qxh6 f6 20. f4 Re7 21. Ng6 1-0

Back to [Chess Coaching Page](#)

This document (colle.html) was last modified on Feb 9 1996 by

[Dr. Dave](#)

Here is the game about the trompovsky variation.

[Event "USSR army championship"]

[Site "Minsk"]

[Date "1984"]

[White "Lputian"]

[Black "Cherechevsky"]

[Result "1/2"]

1. d4 Nf6 2. Bg5 e6 3. e4 c5 4. d5 h6 5. Bxf6 Qxf6 6. Nc3 a6 7. Nf3 e5 8.
a4 b6 9. Bd3 d6 10. Nd2 g6 11. O-O Bg7 12. Nc4 Nd7 13. Qb1 O-O 14. b4 Rb8
15. Qb2 Re8 16. Rab1 Bf8 17. bxc5 bxc5 18. Qa3 Rxb1 19. Rxb1 Qg5 20. a5 Nf6
21. Qc1 Qh4 22. Qe3 Nh5 23. Rb8 Qd8 24. Nb6 Qc7 25. Ra8 Rd8 26. Nxc8 Qb7
27. Ra6 Qb4 28 Nxd6 Rxd6 29 Rxd6 Bxd6
1/2

I did not give the last moves, from cherechevsky himself the Black position is very hard to defend almost losing around move 20. After, thanks to zeitnot he achieve to find enough counter play to drew the game. But he says that he never played again c5 being too much threaten by this game. I found this game in "Methode de perfectionnement aux echecs" from Mikhail Cherechevsky.

Exeter Chess Club: No more Old Stodge

This club is a GP-free zone

1.e4 e5 2.Nf3 Nc6 3.Be4 Bc5 4.Ne3 Nf6 5.d3 d6

Support the campaign for d2-d4 by playing 4. c3, 4. b4 or 3. d4!

Giuoco Pianissimo " is an old Italian phrase meaning "very quiet game"; if you can't remember that, you might prefer if we just use EM Forster's name for this line, " [Old Stodge](#) ". It's probably one of the most common ways for games to start, and I think it's one of the worst! What's the problem? It's totally the wrong sort of position for you, that's what!

"A knowledge of tactics is the foundation of positional play. This is a rule which has stood its test in chess history and one which we cannot impress forcibly enough upon the young chess player. A beginner should avoid the Queen's Gambit and French Defence and play open games instead! While he may not win as many games at first, he will in the long run be amply compensated by acquiring a thorough knowledge of the game." -- RICHARD RETI, Masters of the Chessboard

Beginners (and others) should play open games:

- **open games are more lively and more fun** because of all the tactics
- **open games are easier to get ideas in** because of all the tactics
- **open games are better for learning about the game** because of all the tactics

Open games, with open lines, require the exchange (or sacrifice) of Pawns. White can play for d2-d4 (the easiest and best break) in a variety of ways and this is generally the best plan in the King Pawn openings. Also, with open lines, you have play for the Rooks.

v./9EFJM

Whatever is happening in Old Stodge, it is most unlikely that lines are going to be opened very soon. Both sides clamp down on the opponent's Queen's Pawn, preventing the opening of the game. The position is blocked, the sides are equal and it's hard to get things going. None of the pieces get any scope, the Rooks lack open lines, the whole position gets bogged down in sticky toffee and both players are often bored and confused by the positions that come about. It can take a long time to beat worse players because things are so solid. Also, it may be that almost every game you play ends up something like this, and perhaps you would like some variety.

It's enough to put you off chess!

This document is about how to try and get an open game, with Pawn exchanges, with either colour, and a bit about what's going on in the Old Stodge in case you are tricked into it.

We'll look at Old Stodge first.

Playing Old Stodge positions

Giuoco Piano

Giuoco Piano means 'quiet game', most popular in the 1800s, and is indeed quieter than the bloodthirsty openings like the King's Gambit and other lines that were being played then.

The *Giuoco Piano* is defined by the following sequence:

1 e4, e5; 2 Nf3, Nc6; 3 Bc4, Bc5.

The idea is to develop naturally and quickly, attacking the important weak point on f7.

This is a fine opening for juniors to play.

But after

4. d3 Nf6 5. Nc3 d6

we have:

Old Stodge

This is a rotten variation for juniors to play! - stodgy and difficult. But just in case you get tricked into it, there are some ideas for White and Black that you should know:

- (1) The plan with Be3
- (2) The plan with O-O
- (3) The attack with Bg5/Nd5

(4) The Canal variation

(1) The plan with Be3

One idea here is to tempt Black to exchange, $6...Bxe3$. After $7.fxe3$ White has a half-open f-file and can think about moves like O-O and Nf3-h4-f5. The square f5 is still good for White, since Black will be cautious about playing $...g7-g6$.

Black should not exchange but instead quietly play **6...Bb6**.

After this White can continue with **Qd2** and **0-0-0**.

(2) The plan with O-O

This is actually a risky move! If you are not careful, you will face a $...Bg4$ move from Black, when you cannot chase the Bishop in the way you would like with h3 and g4, because of the sacrifice $...Nxg4!$

This is very dangerous for White. Black threatens all sorts of things like ...Nd4 and ...Qf6 although you might be able to survive with Be3 and Kg2.

Some players have even experimented with

6. O-O Bg4, 7. h3 h5!?

Probably White can survive this too, but if a natural move like castling is so risky for White here, this can't be a good line to get into! Let's see a dramatic example of this:

Knorre-Tchogorin, 1874

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0-0 Nf6 5.d3 d6 6.Bg5

White has castled early and is trying the Bg5 plan. They do not mix well. Black, who has not castled, chases the Bishop with his King's-side Pawns:

6...h6 7.Bh4 g5 8.Bg3 h5 9.Nxg5 h4! 10.Nxf7 hxg3!

Black ignores White's attack on the Queen because he can see a way to get to the King!

11.Nxd8 Bg4 12.Qd2 Nd4 13.Nc3 Nf3+ 14.gxf3 Bxf3 15.hxg3 Rh1# 0-1

But perhaps this line gives us a clue to the best plan for White at move six:

(3) The attack with Bg5/Nd5

[Of course, Black can play the same plan with ...Bg4/...Nd4]

Play might go:

6. Bg5 O-O 7. Bd5 h6

v.,/9EFJM

Black is in trouble here. After:

8. Nxf6+ gxf6

Black's King position has been opened up.

9. Bh6

Now White has big threats, like Nh4-f5, Qg4/h5.

So, after 6.Bg5, Black should play **6...h6** straight away.

White might retreat **with 7. Bh4** but then Black can break the pin forever with **7...g5**.

Forever? Well, again, not if White is brave and plays

8. Nxg5!? hxg5 9. Bxg5.

This would be even stronger if Black had already castled, because White would have an attack against the Black King.

Usually White does not play like this if Black hasn't castled, because Black can survive the threats. So, if Black hasn't castled, after

6. Bg5 h6

White should probably play

7. Bxf6

Instead, after **6. Bg5** Black can remove White's proud Bishop on c4 with

6...Na5

or block the Bishop attack with

6..Be6.

(4) The Canal variation

In fact, probably the best plan in the standard Old Stodge position is to aim for d3-d4 after a sequence like:

1. e4 e5 2. Nf3 Nc6 3. Bc4 Bc5 4. Nc3 Nf6 5. d3 d6 6. Bg5! h6! 7. Bxf6! Qxf6 8. Nd5 Qd8 9. c3! So, if you are going to play d3-d4 eventually, why not go for a more open game from the start?

Old Stodge is a difficult and unpleasant variation for both sides, where the Rooks are hard to develop

and natural moves sometimes turn out badly. In fact, it's nothing like as safe for either side as you might have thought! You should aim to play a much more open game where it's easier to understand what is going on.

Securing an open game as White

Play the modern main line Giuoco Piano with 4.c3

After **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5** play **4. c2-c3**

This is an easy way to get an open game with White.

This move has the immediate threat to take over the centre with **5. d2-d4** . Black must react quickly and with the right moves - or else get into big trouble early on here.

4. c3 Nf6

must be right.

5. d4 exd4 6. cxd4

Now if Black retreats:

6...Bb6 7. d5

and Black is being forced back.

Black should go forward:

6...Bb4+

Now

7. Bd2 Bxd2+ 8. Nbx d2 d5!

Is about equal, and

7. Nc3!?

is a risky gambit for White after

7...Nxe4! 8. d5! Bxc3+!

The modern Giuoco Piano sets Black problems from the first moves. You are bound to get an open game and perhaps chances to win quickly. All the variations of the Modern Giuoco Piano are open and exciting, and you should never get bored!

Play the Evans' Gambit

After **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5** play **4. b2-b4**

After **4...Bxb4** you can open up the game AND take over the centre with **5. c2-c3** and a later d2-d4. You pay for getting both at once with a Pawn.

Is this good value? Kasparov thinks so!

Kasparov,G - Anand,V [C51] Tal Memorial Tournament, Riga (4), 1995

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Be7 6.d4 Na5 7.Be2 exd4 8.Qxd4 Nf6 9.e5 Nc6 10.Qh4 Nd5 11.Qg3 g6 12.0-0 Nb6 13.c4 d6 14.Rd1 Nd7 15.Bh6

Black grabs a second Pawn.

15...Ncxe5 16.Nxe5 Nxe5 17.Nc3

(develop before attacking with a move like Bg7)

17...f6 18.c5 Nf7 19.cxd6 cxd6 20.Qe3 Nxe6 21.Qxe6 Bf8 22.Qe3+ Kf7 23.Nd5 Be6 24.Nf4 Qe7 25. Re1

an amazing destruction of the current world No.3 and his PCA championship challenger

[25.Re1 Qd7 (25...Re8 26.Nxe6 Qxe6 27.Qxe6+ Rxe6 28.Bc4; 25...Bh6 26.Bc4) 26.Bb5 Qxb5 27.Qxe6+ Kg7 28.Nd5 Qb2 29.Rab1] 1-0

Evans' Gambit is a sharp attacking line where White gives up a Pawn for a strong attack. The Pawn is important only in the endgame, and Black might not survive that long!

Play the Scotch Game

After 1.e4 e5 2.Nf3 Nc6 play simply 3. d2-d4

After **3...exd4** (forced) you can play a nice open game with **4. Nxd4** , or you can play one or two interesting gambits with **4. Bc4** [Scotch Gambit] or **4. c2-c3** [Goring Gambit].

The Scotch Game opens up the play straight away, and there are some exciting gambits as well as straightforward developing lines for White.

Securing an open game as Black

... is more difficult.

Two Knights' Defence

1. e4 e5 2. Nf3 Nc6 3. Bc4 Nf6

This is another nice way for Black to avoid White's intentions.

White may be surprised into playing

4. Nc3?

After

4...Nxe4! 5. Nxe4 d5!

Black gets the piece back and is assured of an open game and easy development. You must play this sort of trick if you get a chance.

4. d3 is pretty dull (4. d3 d5!? is the right attitude but maybe the wrong move)

The main line involves a gambit:

4. Ng5

White moves a piece twice, which is usually a waste of time, but White has some reason here.

Some players are scared to play the Two Knight's Defence because of this Ng5 move. It's not that strong, but it is tricky.

4...d5

Not forced: the risky 4...Bc5 is also played.

5. exd5

Now Black has four choices:

5...Nxd5?

5...Na5!

5...Nd4!?

5...b5!?

After:

5...Nxd5?

White can play the

Fried Liver Attack

6. Nxf7

This can be shocking if you haven't seen it before!

Lots of people know the name, but may not know exactly which variation it refers to. Even if you know the moves, you may not know that Black shouldn't allow it - and, if allowed, White shouldn't play it!

What's the idea?

6...Kxf7

White forks King and Knight with

7. Qf3+ Ke6 8. Nc3 Nce7

with an attack.

Why shouldn't White play it, though? Well, if Black can get this far, we might see ...c6, ...Kd7-c7 and Black will have a safe King and an extra piece!

So, why should Black not allow it? White has a better choice at move 6:

6. d4! (Lasker) threatening Nxf7 and opening up the game. White is better here.

So, at move 5, Black is forced to sacrifice.

5...Na5!

is the main line of the Two Knights' Defence:

6. Bb5+ c6 7. dxc6 bxc6 8. Be2 h6 9. Nf3 e4 10. Ne5 Bd6 11. f4 0-0 12. 0-0 Qc7

Black's development is worth a pawn, but the Knight on a5 is not well placed for a King's-side attack at the moment.

Instead:

5...Nd4!? and

5...b5!?

are less well-known moves which are just as good for juniors, I think. In fact, these lines all mean that White has to defend, so if you are ever faced with the Two Knight's Defence, I recommend that you play **4.d4!**

The Two Knight's Defence is a fine variation for Black. After 4.Ng5 White starts an attack, but soon it is Black who is doing the attacking! You should only play 4.Ng5 if you are the sort of player who likes to try to hang on to a Pawn hoping to survive an attack. If you like doing the attacking, you should hope your opponent plays 4.Ng5 against you!

Play the Petroff Defence

After 1. e4 e5 2. Nf3 play 2...Nf6!

The main lines with 3. Nxe5 d6! 4. Nf3 Nxe4 5. d4 d5 6. Bd3 Be7 and 3. d4 d5! are both much more open than the Old Stodge. Some people think the Petroff is a bit stodgy, but the fearsome Frank Marshall used to play the Petroff to win:

Janowski - Marshall 1912

1.e4 e5 2.Nf3 Nf6 3.Nxe5 d6 4.Nf3 Nxe4 5.d4 d5 6.Bd3 Bd6 7.c4 0-0 8.cxd5 Bb4+ 9.Kf1 Qxd5 10.Qc2 Re8 11.Nc3 Nxc3 12.bxc3 Qxf3

13.cxb4

[13.gxf3 Bh3+ 14.Kg1 Re1+ 15.Bf1 Rxf1#;

13.Bxh7+ Kh8= 14.cxb4 g6 (14...Bh3; 14...Nc6)]

13...Nc6 14.Bb2 Nxb4 15.Bxh7+ Kh8 16.gxf3 Bh3+ 17.Kg1 Nxc2 18.Bxc2 Re2 19.Rc1 Rae8 20.Bc3 R8e3 21.Bb4 Rxf3 22.Bd1 Rf6 0-1

There is a slight problem if White is frightened into **3. Nc3** because of course we are half-way towards Old Stodge again. Black won't mind if after the obvious **3...Nc6** White opens the game with **4. d4** . We have already seen that **4. Bc4** fails to the trick **4...Nxe4!** , so the only other try is **4. Bb5** , which of course makes it difficult for Black to play ...d5 because of the e-Pawn, and theory suggests that the lively **4...Bc5?!** is not very good for the same reason. One safe move for Black is **4...Bb4** , but to me that looks like another version of Old Stodge, so you might like to try **4...Nd4!?**

According to theory there is no way for White to punish Black for this unusual move, and it may be a way of mixing things up a little.

5. Ba4 Bc5! 6. Nxe4 O-O!

Greedy White may be punished here.

If all this seems a bit much the simple **3.Nc3 Bb4!?** is probably OK.

Petroff's Defence gets White thinking right away and the main lines are nice and open. Some people say the Petroff can be dull, but sometimes it is not as dull as White might hope!

Play the Centre Counter [Scandinavian] Defence

After **1. e4** play **1...d5!**

This used to be described as "sucking all the life out of the position", and it's absolutely true that I can't bear playing games with 2. *exd5 Qxd5* - White can gain a move by kicking the Queen about with 3. *Nc3 Qa5* but Black tends to play a solid set-up with ...c6 and ...e6, which can be tough to break down.

But recently Black players have had a few new ideas in the line with **1. e4 d5 2. exd5 Nf6!**

One idea is to play the "Icelandic Gambit" with **1. e4 d5 2. exd5 Nf6! 3. c4 e6!** The idea is that if White grabs a Pawn with **4. dxe6 Bxe6**, White will have a difficult game because of the backward d-Pawn (**5. Nf3 c5!**), unless White plays **5. d4 Bb4+ e.g. 6. Bd2 Qe7 7. Bxb4 Qxb4+ 8. Qd2 Nc6 9. Nc3 O-O-O**

when Black has raced to nearly complete development, while White has yet to get anywhere near it. [This is pretty fashionable at club level at the moment.]

Another idea, if White is not so greedy, is to play the Jadoul Variation with **1. e4 d5 2. exd5 Nf6! 3. d4 Bg4!** which can be another gambit with **4. f3 Bf5 5. c4 e6** or a better version of the 2...Qxd5 line after **4. Nf3 Qxd5 5. Nc3 Qf5** (or **5. Be2 Nc6 6. c4 Qd7**) because the Black Queen doesn't get in the way of developing the light-squared Bishop.

If your opponent is really determined to be stodgy, **1. e4 d5 2. exd5 Nf6! 3. d4 Bg4! 4. Be2 Bxe2 5. Qxe2 Qxd5 6. Nf3** is quiet enough, although you may be able to castle Queen's-side, and then throw your King's-side Pawns up to open lines against their King.

White can avoid these lines with **1. e4 d5 2. exd5 Nf6! 3. Bb5+**, or after **1. e4 d5 2. exd5 Nf6! 3. c4 e6** playing **4. d4**, but in both cases we have a more open game than Old Stodge.

The Scandinavian Defence forces the game open immediately. This is a trendy line at the moment, but if you like it why not give it a try? Again, there are quiet lines and gambit lines to choose from, but they are all more open and more natural than Old Stodge.

Summary

This document is about how to try and get an open game, with Pawn exchanges, with either colour, and a bit about what's going on in the Old Stodge in case you are tricked into it.

Old Stodge is a difficult and unpleasant variation for both sides, where the Rooks are hard to develop and natural moves sometimes turn out badly. In fact, it's nothing like as safe for either side as you might have thought! You should aim to play a much more open game where it's easier to understand what is going on.

The modern Giuoco Piano sets Black problems from the first moves. You are bound to get an open game and perhaps chances to win quickly. All the variations of the Modern Giuoco Piano are open and exciting, and you should never get bored!

Evans' Gambit is a sharp attacking line where White gives up a Pawn for a strong attack. The Pawn is important only in the endgame, and Black might not survive that long!

The Scotch Game opens up the play straight away, and there are some exciting gambits as well as straightforward developing lines for White.

The Two Knight's Defence is a fine variation for Black. After 4.Ng5 White starts an attack, but soon it is Black who is doing the attacking! You should only play 4.Ng5 if you are the sort of player who likes to try to hang on to a Pawn hoping to survive an attack. If you like doing the attacking, you should hope your opponent plays 4.Ng5 against you!

Petroff's Defence gets White thinking right away and the main lines are nice and open. Some people say the Petroff can be dull, but sometimes it is not as dull as White might hope!

The Scandinavian Defence forces the game open immediately. This is a trendy line at the moment, but if you like it why not give it a try? Again, there are quiet lines and gambit lines to choose from, but they are all more open and more natural than Old Stodge.

Chess and life: an essay prompted by David Linh

=====

[See also the quote bank, especially chess and life.]

Chess has appealed to philosophers over the decades. It was a favourite analogy of Ludwig Wittgenstein, and has also been used by Ryle and others. Given the depth and colourful symbolism of the game, it is probably not surprising that people have used and abused the name and image of chess in pursuit of various claims.

David Linh tells me that the philosopher Schopenhauer claimed, "Chess is like life,"

and Spanish playwright Arrabal replied, "Chess is not LIKE life... Chess IS life. Like the theatre."

[I am reminded of Niels Bohr's teasing observation that "The opposite of a great truth is also a great truth", although it is also possible to observe "It is possible to prove anything through selective quotation".]

It seems to me that Schopenhauer and Arrabal emphasise different sides of the same coin: the formal game of chess, which may lend itself to analogy, and its practical play by real people, where we would speak of chess as an arena in which many strands of life's rich tapestry can be seen.

Let us review some of the major outposts of chess philosophy.

Chess is life (common sense version)

Chess is not an entirely separate part of life. However special the game, it is played by large numbers of ordinary and not-so-ordinary people, and so the events and experiences of play at chess are probably similar to other areas of life which involve competition, struggle, analysis, confusion, error, success, failure, laziness or other aspects of human endeavour. If I understand him right, this is Arrabal's point.

Chess may even provide unusually clear examples of these various aspects of life, because chess is an arena in which the tasks are entirely mental, where complete information is available to both players, and their moves can be recorded accurately. In this sense, chess may even illuminate aspects of life.

EM Forster's amusing essay dwells on this feature of chess: because all moves are up to you, you soon find out your own limitations, and maybe not just your chess limitations.

See also below: Chess illuminates life (strong version)

Chess is life (strong version)

There is an element of obsessiveness in many top players, and many of them (Alekhine, Fischer, Karpov, Korchnoi) have stated in various ways the equation: "chess is life". This need not detain the student for long: a passionate claim without any evidence or argument can never support more than a statement of faith, but if too insistent may betray a doubt about the real value of the game.

Chess is like life (moral educational version)

Chess has a rich symbolism which the imaginative may develop, and it has often been turned to the purpose of authors of improving essays. Chess moralities of this sort were abundant in the medieval era, but one feels that people are by and large reading into chess the values they already possess. There's a nice ironic verse by Breton on the quotes page. These days I expect that capitalists see in chess a parable of competitive entrepreneurship, communists may see chess as a model of co-operative activity.

Benjamin Franklin once wrote an essay on the morals of chess; he said that chess is especially suitable for teaching a person the benefits of various virtues, like foresight, circumspection, caution and resilience (appended).

More recently, various educational claims have been made for chess, which of course can provide an arena to experience and learn about

various aspects of competitive mental endeavour, social behaviour and so on.

Chess is like life (high-minded version)

A slightly stronger claim is to say that chess is not just another part of life, but is a particularly worthy, rewarding or exemplary part. All chess players know its rewards, and its best players are more enthusiastic for them - like Tarrasch's famous quote:

"Chess is a form of intellectual productiveness, and intellectual productiveness is one of the greatest joys of human existence."

-- Siegbert Tarrasch.

Reti saw chess as an arena in which the principal cultural and intellectual trends and conflicts of the day were reflected ('Americanism in Chess').

Lasker once famously described Steinitz' theory as a sublime intellectual achievement, a theory applicable even for a game greater than chess. Lasker himself took this further [or at least more explicitly] than Steinitz, developing a philosophy of chess which became a philosophy of life, and who saw chess as a test of his philosophy of life as a struggle.

Life is like chess (=Chess illuminates life) (strong version)

Because chess presents complex but unambiguous problems, psychological researchers have been very interested in chess. Chess is a key field for research in psychology, although chessplayers have not yet felt the benefit of many insights. See my essay on psychology and chess. Psychoanalysts may claim that chess reveals more than any player would guess...

Life is chess

Lastly, and more simply than Lasker's view of chess as an arena for

philosophical research, we may learn from chess in another way.
Look at chess, and you may find there truths about life.

This is chess as analogous to life, and I guess is what was exercising Schopenhauer, although what a gloomy old sod like Schopenhauer saw in such an exciting and life-affirming game like chess I don't know.

The usefulness of chess as an analogy has been apparent to many writers. Huxley described Science as a chess game, and in the most famous of all chess analogies, Omar Khayyam describes not just Science, but life as a game.

A less dignified collection is being amassed by James and Fox, of the use of chess as a metaphor by sports commentators, under the heading IAGOCOT (It's A Game Of Chess Out There). The only one I remember is the unlikely description of snooker as "chess with balls".

Appendix: sources

=====

"O life, what art thou? Life seldom answers this question. But her silence is of little consequence, for schoolmasters and other men of good will are well-qualified to answer for her. She is, they inform us, a game. Which game? (...)

"Let us therefore turn to games of skill, and in the first place to Chess." (...)

"Oh, what have I been doing? The usual thing. My character has come out. If I go down to the depths of the sea it is there, if I seek the heart of the hills it is there also. Chess, which severely eliminates accident, is a forcing house where the fruits of character can ripen more fully than in life. In Life we can always blame the unknowable for our failures, wave the hand to some horizon, shake the fist at some star. But surely when we make the same mistakes in the Evans, Old Stodge, the choice of a tie, a row in the office and a love affair, the same defect must be to blame -- character; for which, the men of goodwill hasten to remind us, we are entirely and eternally responsible."

-- E.M.FORSTER, *Abinger Harvest*, a collection of essays.

The game of Chess is not merely an idle amusement. Several very valuable qualities of the mind, useful in the course of human life, are to be acquired or strengthened by it, so as to become habits, ready on all occasions.

1. Foresight, which looks a little into futurity, and considers the consequences that may attend an action; for it is continually occurring to the player, 'If I move this piece, what will be the advantages or disadvantages of my new situation? What use can my adversary make of it to annoy me? What other moves can I make to support it, and to defend myself from his attacks?

2. Circumspection, which surveys the whole chessboard, or scene of action; the relations of the several pieces and situations, the dangers they are respectively exposed to, the several possibilities of their aiding each other, the probabilities that the adversary may make this or that move, and attack this or the other piece, and what different means can be used to avoid his stroke, or turn its consequences against him.

3. Caution, not to make our moves too hastily. This habit is best acquired, by observing strictly the laws of the game; such as, If you touch a piece, you must move it somewhere; if you set it down, you must let it stand. And it is therefore best that these rules should be observed, as the game becomes thereby more the image of human life, and particularly of war . . .

And lastly, we learn by Chess the habit of not being discouraged by present appearances in the state of our affairs, the habit of hoping for a favourable change, and that of persevering in the search of resources. The game is so full of events, there is such a variety of turns in it, the fortune of it is so subject to sudden vicissitudes, and one so frequently, after long contemplation, discovers the means of extricating one's self from a supposed insurmountable difficulty, that one is encouraged to continue the contest to the last, in hopes of victory from our own skill, or at least of getting a stalemate from the negligence of our adversary...

If your adversary is long in playing, you ought not to hurry him, or express any uneasiness at his delay. You should not sing, nor whistle, nor look at your watch, not take up a book to read, nor make a tapping

with your feet on the floor, or with your fingers on the table, nor do anything that may disturb his attention. For all these things displease; and they do not show your skill in playing, but your craftiness or your rudeness.

You ought not to endeavour to amuse and deceive your adversary, by pretending to have made bad moves, and saying that you have now lost the game, in order to make him secure and careless, and inattentive to your schemes: for this is fraud and deceit, not skill in the game.

You must not, when you have gained a victory, use any triumphing or insulting expression, nor show too much pleasure; but endeavour to console your adversary, and make him less dissatisfied with himself, by every kind of civil expression that may be used with truth, such as 'you understand the game better than I, but you are a little inattentive;' or, 'you play too fast;' or, 'you had the best of the game, but something happened to divert your thoughts, and that turned it in my favour.'

If you are a spectator while others play, observe the most perfect silence. For, if you give advice, you offend both parties, him against whom you give it, because it may cause the loss of his game, him in whose favour you give it, because, though it be good, and he follows it, he loses the pleasure he might have had, if you had permitted him to think until it had occurred to himself. Even after a move or moves, you must not, by replacing the pieces, show how they might have been placed better; for that displeases, and may occasion disputes and doubts about their true situation. All talking to the players lessens or diverts their attention, and is therefore unpleasing.

Lastly, if the game is not to be played rigorously, according to the rules above mentioned, then moderate your desire of victory over your adversary, and be pleased with one over yourself. Snatch not eagerly at every advantage offered by his unskilfulness or inattention; but point out to him kindly, that by such a move he places or leaves a piece in danger and unsupported; that by another he will put his king in a perilous situation, etc. By this generous civility (so opposite to the unfairness above forbidden) you may, indeed, happen to lose the game to your opponent; but you will win what is better, his esteem, his respect, and his affection, together with the silent approbation and goodwill of impartial spectators."

-- Benjamin Franklin, ON THE MORALS OF CHESS

Americanism in Chess

"Today we see in chess the fight of aspiring Americanism against the old European intellectual life: a struggle between the technique of Capablanca, a virtuoso in whose play one can find nothing tangible to object to, and between great European masters, all of them artists, who have the qualities as well as the faults of artists in the treatment of the subject they devote themselves to: they experimentalise and in striving after what is deep down. they overlook what is near to hand.

"...If Americanism is victorious in chess, it will also be so in life. For the idea of chess and the development of the chess mind we have a picture of the intellectual struggle of mankind."

-- Reti, Masters of the Chessboard

"What is true of Chess must hold by analogy for other game. and games being, at least in intent, modelled on Life - simplified to be sure, but still resembling it in essential - there must be some analogy between them. Every activity, then, directed by rules and having a meaning and purpose, such as, for instance, a dispute between persons taking different sides of a question and applying logical rules in an argument, every such activity, without exception, has to follow the very same fundamental principle which Steinitz discovered as governing the game of chess. And if this principle can simplify our search for combinations, though their number be millions, it must have the power also of guiding our search for suitable and efficient action.

"This fundamental and universal principle may be briefly expressed as follows: The basis of a masterly plan is always a valuation."

-- Lasker, Manual of Chess. [Fourth book: Position Play: The Theory of Steinitz. See also the sections: Steinitz Advances his Theory beyond the Needs of Practical Chess and thus Enters the Domain of Science and Philosophy, and An Enquiry into the Logical Origin and the Domain of Application of Steinitz' Theory.]

"The chess-board is the world,
the pieces are the phenomena of the Universe,
the rules of the game are what we call the laws of Nature,
The player on the other side is hidden from us."
-- Thomas HUXLEY (1825-1895).

XLVIX.

"'Tis all a Chequer-board of Nights and Days
Where Destiny with Men for Pieces plays:
Hither and thither moves, and mates, and slays,
And one by one back in the Closet lays. "

[The Rubaiyat of Omar Khayyam, Rendered into English Verse by
Edward Fitzgerald, First Edition]

[In fact, the specific mention of chess is not Khayyam's but his
translator's. The original Arabic quatrain insists that it is meant as
no metaphor or parable, but as really the case.]

Ronald Tagra also collects chess quotes

Exeter Chess Club

We currently meet on Tuesdays at:
Exeter Community Centre
St. David's Hill
Exeter
Devon

Exeter Chess Club on the World-Wide Web:

<http://www.exeter.ac.uk/~dregis/DR/ECC/ecc.html>

Technical Notes:

An HTML version of a Word for Windows Book.

Typeset by Dave Regis, Cool Blue Cat Marketing.

Games were entered using a variety of software including Fritz 3, the ChessBase 1.0 Demo., and Don Fong's SLICS/CHESSBD. The database of games was exported to text format using Andy Duplain's wonderful CBASCII programme, and edited using Word for Windows.

The chess fonts used were from Steve Smith's Alpine font suites (Hastings and Linares).

Exeter Chess Club: 100years\100y_71.htm

@@ Introduction: a "sad waste of brains"?

Exeter Chess Club is now better than one hundred years old. That's four times my age. Likely as not, this institution is already older than I will ever live to be. This is an easy thing to shrug off, perhaps, but it astonishes me.

The existence of this club (and others like it), hangs on the barest thread of goodwill. It relies entirely on people to come in off the street and administrate and hustle and cajole and organise and generally sort things out, free of charge (and generally costing them a fortune in telephone calls), just so that they and others will have somewhere to go to play chess.

And this has been enough to sustain this club — a meeting ground for a group of individuals with widely differing playing strengths, styles, politics, backgrounds and haircuts — for a century.

What is it then about chess? Why has this, and so much else, been accomplished on behalf of this board game, this jumped-up draughts, this miniature war, this pastime described by Sir Walter Scott as "a sad waste of brains" (but then, what did he know, he couldn't even make it to the North Pole)?

Well, there's undoubtedly a simple and logical answer to that. But I don't know what it is. And neither does anyone else.

If you have no particular feeling for chess, then I suppose there is no reason for you to understand, or care, what we players get out of the game. For me, chess is mysterious and exhilarating and cruel and joyous, and I love it. I'm not particularly good, but one of the great things about a chess club is that it doesn't really matter. There's always someone around your level. I'm not qualified or inclined to go into the details of u7npronounceable openings or strategical niceties, I just love to play and that's all you need.

Exeter Chess Club has provided an arena for me to indulge this strange passion, and will continue to do so, and for this I am profoundly grateful. One hundred years, already? Here's to the next century!

Exeter Chess Club: 100years\100y_72.htm

@@ Editor's notes:

The writing of a formal history of the club is already well advanced in the hands of Richard Hitchcock and Alan Maynard, so this is more of an informal history. Our hundredth anniversary coincides with a moment in computing history when it is relatively easy for lay people to produce their own literature, so Bill Gates has a lot to answer for. I intend this book as a celebration of our club, its champions and its grassroots, its games and stories, as seen through the eyes of its "ordinary" members, who are all in their own ways as vivid and interesting to me as any yarns about the World Champions. Who cannot identify with the joy of a humble member who becomes giantkiller for a day, or recall with a smile the day the car carrying the Exeter team, travelling to play away against Teignmouth, passed the Teignmouth team car coming towards Exeter...

I have taken some liberties with the older material, converting to algebraic and making some minor stylistic changes to keep the book as a whole consistent. More abrupt editorial interruptions are marked by my initials (DR).

Many thanks are due to everyone that contributed a game or notes; thanks also to Chris Bellers, Mark Blackmore, Dan Hill, Peter Lane, Bob Lee, Alan Maynard and Tom Stephenson for editing and proofreading; and thanks to Bob Jones, Dave Beckwith and Alan Maynard for searching the local archives. I would particularly like to thank all those folk who have never been members of the club but who generously contributed and who helped in numerous ways: Ken Bloodworth, Rowena Bruce, Mike Conroy, Brian Denman, Stephen Jackson (who is writing a biography of Sir George Thomas), "jcl", Nick Pope, Chris Ravilious, John Saunders (custodian of "BritBase"), Trefor Thynne, Philip Trussler and Ken Whyld.

@@ Chess in Exeter before the Club

From *Westward Ho!* , journal of the **West of England Chess Union**:

Christopher Payne, the furniture expert of the **Antiques Roadshow** recently wrote an article in the **Daily Telegraph** on the subject of antique chess sets, and of interest to Devonians is the fact that one of the world's first recorded chess set & boards was held in Exeter in the late 1200s, owned, appropriately enough, by the Bishop... He writes:

I doubt that modern champions would describe chess as a game of chance, but that is how it was rated in medieval times. Dice and backgammon were the other two main games before the introduction of cards in the 15th century. One of the earliest records of a chessboard with men is in the inventory of Bishop Thomas Britten of Exeter, who died in 1307. "

[contributed by Bob Jones]

e-mail from jcl:

The April 1903 issue of BCM on annual page 149 discusses the chess career of a Mr. H.L. Bowles. It seems to indicate that he was a member of an Exeter Chess Club sometime between his arrival in Exeter in 1878 and his departure in 1881. It seems quite possible that this Exeter Chess Club existed even prior to Bowles' arrival to Exeter in 1878. The Exeter Chess Club in those days met at the Literary Society's Rooms in Bedford Circus and its other players included Messrs. Fox, Newman, Sheppard, Surrige, and Lambert.

Apparently Mr. Bowles' wife, Mrs. Rhoda A. Bowles, also made contributions on behalf of the game of chess. She wrote about chess in "Womanhood" magazine and interviewed the likes of Pillsbury in 1902.

Also, I did see a June 1898 BCM annual page 247 reference to the Exeter Chess Club being only 3 years old, which of course confirms this stated 1895 date of establishment. Perhaps an earlier Exeter Chess Club folded and a "newer" one (re)formed in 1895? Regardless, Exeter obviously has a long and distinguished place in chess history.

— Regards, JL

Exeter Chess Club: 100years\100y_74.htm

@@Game Exeter Literary Society - Cambridge Junior University Chess Club Correspondence Game, 1871

In the old style

Exeter Chess Club was founded in 1895 under the wing of Exeter Literary Society. Little record of chess in Exeter before 1900 exists in the club but we did come across the following game, disinterred by Nick Pope who has spent some considerable time and effort locating and translating to electronic media games from the 1800s.

Here we have the attentions of the then World Champion, Wilhelm Steinitz, as annotator, seen in his important column in **The Field** . Although the Exeter side lost this game, it has a real whiff of the old style, featuring that most enduring of nineteenth-century inventions, the gambit of Captain Evans — DR

(Dates: From 27 Feb-27 Nov 1871)

Evans' Gambit

1. e4 e5 2. Nf3 Nc6 3. Bc4 Bc5 4. b4 Bxb4 5. c3 Bc5 6. d4 exd4 7. O-O d6 8. cxd4 Bb6

[*Steinitz does not remark on White's next move, which some modern eyes might regard as over-eager. Morphy often preferred development by 9. Nc3 — DR*]

9. d5 Nce7 10. e5

10...Nh6

This defence was first tried by Steinitz against Neumann, at the Paris Congress of 1867, in a game which ended in a draw. In the Baden Congress, it was successfully adopted by Winawer against Anderssen, but it has never been sufficiently analysed to enable us to pronounce a decided opinion on its merits.

11. Nc3 O-O 12. Ne4

Anderssen, in the game referred to, played here 12. Bxh6, followed by 13. Qd2 and 14. Rae1.

12...dxe5 13. Bxh6 gxh6 14. Nxe5 Ng6 15. Nxg6 hxg6 16. Qd2 Qh4 17. Rfe1 Bf5 18. g3 Qe7 19. Bd3 Kh7

20. Nc3

20. Qc3 would have forced Black to take the Knight, in which case White must have come out with a fine attack, and with all the chances of drawing the game at least, on account of the hostile Bishops remaining of opposite colours.

20...Qf6 21. Bxf5 Qxf5 22. Na4

An injudicious move, made probably with the object of preventing Bishop to a5. 22. Rab1 would have answered that purpose better. At all events, White could have but little chance left after exchanging pieces.

22...Rfd8 23. Nxb6 axb6 24. Qc3 Qd7 25. Rac1 Rxa2 26. Qxc7 Qf5 27. Rf1 Rxd5 28. Qxb7

28...Rb2 0-1.

"Black's King is in perfect security, and his Rooks are well posted. White could not hope to counterbalance his inferiority in Pawns by an attack, and his game must have been lost slowly but surely, as Black would double the Rooks next move on the seventh file, harassing the opponent's position still more."

*[Notes by Wilhelm Steinitz from **The Field** , London, 29th November 1873.*

*Notes transcribed by Nick Pope, Historian of Michigan Chess Association, posted to the **rec.games.chess.analysis** newsgroup in 1997, and reproduced here with his permission.]*

An Exeter Problemist: J Paul Taylor

*J Paul Taylor's death was recorded by the **British Chess Magazine** in 1923. They explained that, while problem standards had since moved on, JPT had been at the forefront of developing the technique of the two-move problem in the late nineteenth century, and enjoyed a deserved reputation on the international stage.*

*The Club holds a notebook of Taylor's problem; not just a manuscript but a leather-bound custom-made book of diagrams, blocked on the spine as **J Paul Taylor - Problems** . The positions are hand-inked and their prizes duly noted.*

*He published two volumes in his life: in 1878 **Chess Chips** , a miscellany of games, essays and problems by himself and others, and in 1880 a collection of his own problems, **Elementary Chess Problems** . BCM reproduced three problems from these books. — DR*

(JPT-A) Mate in two: J. Paul Taylor, 1878 [BCM June 1923]

(JPT-B) Mate in two: J. Paul Taylor, 1880 [BCM June 1923]

(JPT-C) Mate in two: J. Paul Taylor, 1880 [BCM June 1923]

Solutions as printed in the BCM:

JPT-A: 1.Qg1 (This was a novelty at the time of first publication. It was awarded first prize in the British Chess Problem Association in 1878. J. Dobrusky afterwards showed that the construction was not all it should be.)

JPT-B: 1. c7 (A pretty piece of play as the Pawn promotion is unexpected and interesting.)

JPT-C: 1.Qb4 (This is one of the earliest of the six-flight-square two-movers. Here there are five mates. No doubt this position inspired composers to work in six mates.)

We are grateful to Stephen Jackson for calling our attention to the BCM item, from which the comments above are taken, and for finding the correction of the second problem in the September issue. He comments of this composition, "one more proof that chess in an art".

Exeter Chess Club: 100years\100y_75.htm

@@ From *Exeter Chess Club: 1895-1961* by Richard Hitchcock:

On the opening page of the Club's first minute book it is recorded, under the heading " *Chess Club* ", that " *a meeting was held at Gisson's Hotel on Saturday, October 26th, 1895. (...) At this meeting, it was decided to ask the Literary Society, then established at Barnfield House, whether and on what terms the Society would set apart a room for the Club* ". A week later, " *at Mr. Widgery's studio* ", it was decided to accept a tentative offer by the Society and to go ahead.

On 16th November, 1895, at Barnfield House, in what was already described as the Club room, a meeting of seven formed the Club. It was to be called Exeter Chess Club; (officers) were to be elected annually in October; members were to meet " *for practice and matches* " on three evenings a week, and the annual subscription was to be five shillings (half a crown for members of the Literary Society). The first President of the Club was C.J. Lambert. (...)

At the annual meeting of 1896 it was stated that the Club had 21 members, of whom 12 were members of the Literary Society. Matches had been played and won against the Exeter Working Men's Society and the YMCA. (...) Of the Club income of £3.15s.0d, £2.10s.6d had been paid for five sets of chessmen and three boards, " *an expensive but necessary outlay* ", and two more boards were required.

RJH

"This is the earliest reference to the Exeter Club I've found — Peachey's *Everybody's Guide to Chess and Draughts* (1896) refers to Exeter as having even at that date ' *an excellent chess club* "

— *Chris Ravillious*

Match: Exeter v Plymouth.

This match, the first played between these clubs, was contested on May 18th at the Literary Society's Rooms, Exeter. The meeting evoked considerable interest, and as the Plymouth Club has been established some years, and the Exeter Club is practically in its infancy, having seen three seasons only, the visitors were expected to prove the victors. These anticipations were not fulfilled, as after an exciting encounter Exeter won by 5 to 2

.— BCM June 1898

@Game Hockin,CS - Gundry,WH, Exeter Chess Club tourney, 1903

King's-side Attack

We are delighted to have in our archives a set of press cuttings from 1903-1908, which was compiled by WH Gundry, sometime Secretary and Treasurer of the Club, problem composer and columnist. The scrapbook also includes WHG's handwritten notes on what has become known as Nimzovitch's Defence (**1. P-K4 N-QB3** and some of his correspondence games. The latter are annotated only by dispensation of "!"s and "?"s, but leave you in no doubt about his views (e.g. " **1. P-K4 P-K4?** " — Gundry being an advocate of the Centre Counter or Scandinavian Defence).

*Gundry died at Burnham, Somerset on July 31st, 1914, which regretful occurrence is recorded in the **British Chess Magazine** for that year (p.324).*

Among all the cuttings only one features one of his own games, an affair where both sides become committed to play on the King's-side. -- DR

Bogo-Indian Defence *

1. d4 e6

To avoid the stereotyped form of the Queen's Gambit.

2. c4 b6

It is of importance to develop the Bishop.

3. Bf4 Bb4+ 4. Bd2 Bxd2+ 5. Qxd2 Bb7 6. Nc3 Nf6 7. e3 O-O 8. Nf3

8...Bxf3

Causing White to have a doubled Pawn, but also opening up a file for Rook to attack Black King.

9. gxf3 Nc6 10. a3

Perhaps it would have been better for White to begin at once to work up an attack on the Black King.

10...Ne7 11. e4 d6 12. Bd3 Nc6 13. Ne2 e5

The White King Pawn being thus blocked the Bishop is shut off.

14. d5 Na5

The Knight is rather shut off here, though the move has the effect of drawing off the White Queen from the threatened attack on the King's side.

15. Qc2 Nd7 16. b4 Nb7

17. f4

Disastrous.

17...exf4 18. e5

[18. Nxf4 Qf6 winning a piece.]

18...dxe5 19. Bxh7+ Kh8 20. O-O-O

[20. Qf5 followed by Qh3 seems preferable.]

20...Qf6 21. Be4 Nd6 22. Rdg1 Qh6 23. Kb2

[23. Kb1 is perhaps better, in view of the advance of the Black Knight.]

23...f5 24. Bg2 e4 25. f3 e3 26. Kb3

[26. Bf1 might be played.]

26...Ne5 27. Qc3 Ndxc4 28. Bf1 Nd2+ 29. Ka2 Ndx3 30. Rg2 Rac8

31. Ng1

Very good, though it sets the Black Queen free.

31...Nxg1

Better leave White to do the exchanging, as now the two Rooks get into line.

32. Rhxg1 Qd6 33. Kb1 Rf7 34. Rg5 Qxd5

**35. Qe1 Qb3+ 36. Ka1 Qxa3+ 37. Kb1 Qb3+ 38. Ka1 Nf3 39. Rh5+ Kg8
40. Qc1**

Intending to bring the Bishop to c4.

**40...Qa4+ 41. Kb1 Qxb4+ 42. Ka1 Nxg1 43. Bc4 e2 44. Bxf7+ Kxf7
45. Rxf5+ Kg8 46. Re5**

Obviously a slip.

46...Qd4+ 0-1

[Notes based on those by WH Gundry, Devon and Exeter Gazette, 27 October 1903.]

@@ Exeter Chess Club before the first war

At a certain club the rules as to silence in some of the rooms is perhaps carried to extremes. The other evening a new member hazarded a game of chess with one of the old stagers. After playing for twenty minutes without a word being spoken, he said, "Check!" At this the old stager left the table, exclaiming, "I can't play chess with a man who will talk!" The new member resigned.

(Unsources cutting in Club scrapbook, c.1905)

During the late days of September there is always a great awakening of chess life in the county of Devonshire...

British Chess Magazine, Vol.XXVI (1906), p.455

DEVON COUNTY CUP: FINAL Exeter vs. Plymouth

Plymouth and Exeter Chess Clubs met at Teignmouth yesterday in the Final for the Devon County Cup. Last year the same two teams had to meet in the deciding match for the trophy. Plymouth winning handsomely. Exeter won the toss and took the move at the odd boards, the openings being: 1: Giuoco Piano; 2: Queen's Gambit Declined, 3: Giuoco Piano, 4: Vienna, 5: Sicilian, 6: French Defence. Exeter did badly from the start. Nicole mistook his KP for a QP, and made a fatal blunder, Col. Bennett scoring first win for Plymouth. Bremridge was the next to lose. Rickeard got the better of Thompson in a hard game, and at this point Plymouth had won all three of the games finished, and had only to obtain another half to secure the match. Palmer and Taylor were engaged in a stiff fight, but the former having a Rook up seemed to have an assured victory *

At boards 5 and 6 very even games were in progress, and the issue was doubtful. As the time for ceasing hostilities approached, however, the prospects of the Exonians improved. Presently Palmer forced a win, while Bleby gave up his two R's for his opponent's Q and Kt. Gundry, too, was pressing Howard, and although White's advantage was not so obvious, yet he undoubtedly had the best of the argument. Presently Bleby carried out a successful coup, and scored a win for the citizens. Howard was now threatened with the loss of a piece, and although he struggled gamely his antagonist was not to be denied, and the fight continued well in favour of Gundry. The hour for ceasing play arriving, Messrs. Taylor and Palmer proceeded to adjudicate on the position. Exeter – a piece to the good, however – had an obviously won game, and the point was accordingly conceded to Exeter. This brought the scores three all, and another match will accordingly have to be played in order to decide which club shall hold the cup.

Scores:

Plymouth Exeter

T.W. Taylor 0 E. Palmer 1

C.F.Cooper 1 Rev. H. Bremridge 0

W.W. Rickeard 1 G.F. Thompson 0

Col. R.D. Bennett 1 R.S. Nicole 0

W. Howard 0 W.H. Gundry 1

H.G. Phillips 0 Rev. H. Bleby 1

3 3

Western Morning News , 24th May 1906

The members of the Exeter Club met in annual meeting on September 20th. Mr. Cecil E. Parry was elected president, and Mr. W.H. Gundry re-elected hon. Secretary and treasurer. Mr. A.L. Noake won the handicap tourney. The finances show a surplus of about £2.

British Chess Magazine , Vol.31 (1911)

William (?Wyndham) H. Gundry [1861-1914] picture from the *British Chess Magazine* , 1903

"Mr. Gundry, the chess editor of an Exeter paper, entitled the *Western Times* , which started its chess column April 1902, is well-known as both a solver and publisher of problems. He has published nearly 500 chess problems; and gained solving prizes in *Leeds Mercury* (weekly supplement) and *Western Morning News* . He gained first prize in the "topsy turvy" competition held by the *Reading Observer* , 1901. He is also a strong player, having gained first prize in the Exeter C.C. Tourney. He is a most able and obliging secretary, and one who may be trusted to give impetus to the progress of the noble game."

— BCM 1903

"We regret to announce the death of Mr. W.H. Gundry, hon. Secretary of the Exeter Chess club, who died at Burnham (Somerset) on July 31st . Mr. Gundry, who was a bachelor, and of a very reserved disposition, broke down in health last February."

@@Game Taylor,T - Dunstan,Dr.R, Plymouth vs. Exeter Bremridge Cup Final, Plymouth, 1922

A modern defence

Dr. R. Dunstan was medical officer of troops in Paignton and during his time in the South-West played for Paignton and Exeter. He made it to the final of the Devon Championship in 1917 and 1918, and won the title in 1921 and 1922 — then aged over 70! He also led Exeter to victory in the Bremridge Cup that year, winning the game below on top board.

On that high note he retired to Brighton, playing chess for the Christ Church Club, on one occasion against Geza Maroczy who had been asked to stand in for a Hastings team.

[We are indebted to Chris Ravillious and Brian Denman of Brighton for all this information. — DR]

Pirc Defence

1.d4 g6 2.Nf3 Bg7 3.e4 d6 4.Bf4 Nf6 5.Nbd2 0-0 6.c3 h6 7.Bd3 c6 8.Qc2 Nh5 9.Bg3 Nd7

Quite a modern-looking opening: it wasn't until after the second War that the defence of Vasja Pirc became widely practised. White now has a choice of where to park his King, but the possibility of ...N_xg3 will make it difficult for White fully to open a file if he castles long.

10.0-0-0 a5 11.h3 N_xg3 12.f_xg3 e5 13.Nf1 b5 14.b3 Qb6 15.Be2 c5 16.d_xe5 N_xe5

Black keeps open the long diagonal.

17.Qd2 Rd8 18.N_xe5 B_xe5 19.Bf3 a4 20.b4 c_xb4 21.c_xb4 Be6 22.Kb1 R_dc8 23.Bg4 Kg7 24.B_xe6 f_xe6 25.Ne3 Qc6

An ideal position for practitioners of the Pirc Defence: White's King's-side efforts have been crippled while Black's grasp of the centre and Queen's-side is merciless.

26.Ng4 Q_xe4+ 27.Qd3 Q_xb4+ 0-1

[Notes by DR; score from the Sussex Daily News of 7 June 1922]

@@

EXETER CHESS CLUB.

Affiliated to the Devon Chess Association.

BARNFIELD HOUSE, EXETER.

Open Daily from 9.30 a.m.
to 10 p.m. (except Sundays
and Bank Holidays).

TOURNEYS & MATCHES THROUGHOUT THE SEASON.

For Particulars apply to

Hon. Secretary, Barnfield House.

The advert opposite was unearthed by Devon Archivist Dave Beckwith, and appeared in the "Exeter Illustrated Official Guide to the City Of Exeter 1913" published by the Official Information Bureau for the City Council.

*Bob Jones cites the **Year Book of Chess 1913** which confirms the details; that is, the club was open 12 hours a day, 6 days a week!*

How to Compose a Problem by Mr. W.H. Gundry

Chess players who occasionally glance at problems have an idea that it is very easy to "knock off" a position fit for print. But should they ever attempt to compose one themselves they will find that innumerable difficulties and pitfalls will beset them. All the various defects such as "duals", "triples" redundancy of pieces, and the like, have still to be battled with, even when the composer has got his problem radically sound. In fact, it is not too much to say that years of patient endeavour are required before a man can make a good problem. Even long experience does not make it certain that a composer can, within a given time, produce an artistic work. As with poetry, so it is with chess composition. Sometimes the author can create rapidly and successfully; sometimes, on the other hand, he labours slowly and with difficulty. The pieces seem "possessed"; they appear to have a perverse faculty for thwarting the composer's best intentions.

So much for the inevitable toil which awaits anyone who tries to make problems. We now turn to the more interesting question, How to begin. What is the first step? The answer is simple enough. You must have an idea to work upon. By "idea" we mean a position exemplifying some neat point in chess play. For example, we are often struck by some position in a game, where, perhaps, mate is given by a piece itself en prise to one of the hostile forces. Something, however, prevents the mating pieces from being captured. In such a position as this we have the germ, the idea of the problem. Or it may be that the germ does not lie in the final position, but rather in the second move (especially if the problem is a three-mover). It may have occurred to us that a difficult problem could be made by devising an artful second move, and by allowing the key move to be comparatively commonplace. For instance, it would add to the difficulty of solving a problem if the second (White) move, instead of being, as usual, an attacking one, gave the Black King more liberty than it had before. Here then is another "germ". We construct a

position such that White's second move allows the Black King to get to some square which he could not previously reach.

It may be as well to point out that these ideas are seldom, if ever, original. How could they be? Check from a piece en prise, check by promoting a Pawn to a Knight, check by sacrificing a Queen — all these moves occur again and again. They are common property. Any composer can, without fear of being charged with plagiarism, use them as a basis for his work. In problem tournaments it has long been recognised that real originality must not be expected. The prize goes to him who most cleverly represents or reproduces some neat idea.

In each problem White is to play and mate in two moves in its own division.

King's Rook *Devon and Exeter Gazette*

Solutions p.

Tuesday 2 October 1906

The Royal Game of chess has many ardent supporters in the city. Financially, the Exeter Chess Club is in a very flourishing condition, and the membership is numerically very good. The annual meeting of the Club was held the other day at the Barnfield Hall, and officers were elected for the ensuing year. An excellent programme is in the course of preparation under the direction of Mr. W.H. Gundry, the hon. treasurer and secretary, and there is every prospect of a successful season .

Devon and Exeter Gazette , 29 Sept 1903.

Below will be found the players in the third Devon vs. Kent correspondence match (...) I am asked to call attention of Devonians to the necessity of not only using their best powder, but to keep it dry; this is necessary, for last year's match was lost by Devon, seemingly through the carelessness of four players, each of whom lost his game by sending an impossible move. This style is very much to be deprecated when the honour of the county is at stake. In the words of a schoolmaster I say, "Please see that it does not happen again. "

Queen's Knight" *Western Morning News* , 29 October 1903.

Mr.

Thomas Winter Wood died aged 87 in 1905; he was the father of Mrs. W.G. Baird, and the brothers Carslake and E.J. Winter Wood.

The Devon 'champion of club champions' Cup was donated by Thomas Winter Wood; the cup for the individual championship of Devon was donated by his son E.J. Winter Wood

Thomas Winter Wood Picture and biographical details from *British Chess Magazine* , June 1905, p.230.

The Exeter and Plymouth Clubs also met for the third time in the Devon County Cup competition. After a keenly-contested match, in which the play was far more even than the scores indicate, the Exonians scored a decisive victory. Scores:

Exeter Plymouth

Rev H. Bremridge 1 P. Motley 0

H. J. Stretton 1 N. A. Prettyjohn 0

G. F. Thompson 1/2 W. Howard 1/2

W. H. Gundry 1 Colonel Bennett 0

Rev. H. M. Bleby 1 Rev. J. J. Smith 0

A. L. Noake 1 E. B. Clarke 0

51/2 1/2

The Rev. H. Bremridge entertained the members to tea, which was supplied by Murch, Goff and Co. , of the Cathedral Yard.

Devon and Exeter Gazette, Monday 1 October 1906

Rev. H.

Bremridge Picture and biographical details from *British Chess Magazine* , August 1913, p.320.

Rev. Henry Bremridge was the founder and first hon. Secretary of the Devon County Chess Association. He died in 1913 aged 58.

Bremridge was born in Morchard Bishop, Devonshire. The BCM records that although he was a member of Oxford University Chess Club he did not take up the game seriously until 1896.

The Cup we play for in the first division of the Devon leagues bears the name of Rev. Bremridge.

From a reliable source, I hear that Mr. Blackburne expresses the opinion that taking "en passant" is doomed as a chess move. He believes that when the British Chess Federation has time to see to it, this particular move will be removed from the orthodox ones.

Western Morning News, 12th October 1904

HV Mallison

The dominant figure in Exeter chess between the wars was H.V. (Harold Vincent) Mallison, who bequeathed a generous sum and a lifetime's notes on chess to the club on his death in 1980.

Among Mallison's notes are his victory in the Cambridge University Chess Club Championship for 1919-20, winning his section ahead of J.H. Barnes and L.S. Penrose (which pair he notes "agreed to a draw without playing more than the first move") and defeating N.H. Smith in the final. These games, like all the rest in the archive, are hand-written onto plain paper with copious footnotes, and the pages for each season are sewn into signatures. He played in the Varsity match against Oxford in 1920, an account of which is to be found in the April British Chess Magazine,.

*The next set of notes are of his victory in the Exeter Club Championship for 1921-22, whence he went on to win the Thomas Winter Wood Trophy (a knockout championship of the club champions of Devon; the E.J. Winter Wood Cup is contested for the individual championship of Devon). This was the first time an Exeter player had won the trophy. His victory in the next year's club championship was again followed by victory in the Winter Wood trophy, beating Ron Bruce in the final. Mallison became captain (1927) and then secretary of the Devonshire County team; in July 1931 the **British Chess Magazine** noted that " Devonshire have an efficient and hard-working secretary in H.V. Mallison, a first-class top-board player in R.W. Bruce, a sturdy veteran in T. Taylor, and a loyal and enthusiastic team" (Thanks to Stephen Jackson for these cuttings.)*

He and Ron played many games in the top division of the Devon league (the Bremridge Cup). Other rivals (and colleagues in Devon matches) included Pitt-Fox of Paignton and Goodman of Plymouth. It seems Mallison first secured the individual championship of Devon in 1933, a year in which he played a match against D. Egginton of Teignmouth, giving his opponent a 3-point start towards a decisive score of six points, which he won 6-5.

We also have from the late nineteen-thirties some games of Mrs. G.L. Mallison, but whether she played at all after that we don't know.

There is not a complete record for the club championship in subsequent years, but Mallison won in every year for which we have his notes (1927, 1931-1939, 1941 and 1946 and 1947). He took the Devon championship in 1946 too, beating Ron Bruce in the second replay of the final; in 1947 he withdrew from the Winter Wood competition because of ill-health, and the second-placed player, Frank Kitto, went on to win it. One of the last Exeter games we have of Mallison's is yet another encounter in the Bremridge in 1957 with Ron Bruce.

Apart from the Devon games there are a few tournament records, and among the scores are games with many leading players of the day, including J.M. Aitken, Bowen, Gerald Abrahams, Hugh Alexander, Harry Golombek, Vera Menchik-Stephenson, Stuart Milner-Barry, Arthur Reynolds, E.G. Sergeant, George Thomas, T.H. Tylor, and whipper-snappers like Frank Parr and Barry Wood. He won the BCF Major Open Reserves Championship on three occasions. Perhaps Mallison's most widely-known game comes from the British Championship of 1938, though sadly because his loss to Alexander in a gambit line of the Petroff is still considered definitive. He also played in the Plymouth International Tournament in the same year (where he played Alekhine, and beat Vera Menchik on time).

We might repeat that all the scores of these hundreds of games also bear Mallison's footnotes; a similar quantity of games by contemporary players and masters of the nineteenth century have also been copied out, again with notes (which as far as we can tell are also largely Mallison's own, but certainly some were transcribed from magazines).

As if to complete the circle, the last games we have of H.V. Mallison are also playing at a University club, this time for the staff of Exeter University in 1963 against the students in one of the irregular manifestations of the University club.

Mallison Bridge, behind the Antiques Centre at Exeter's Quay. The smart building with white window surrounds is the Custom House.

HV Mallison was generous not just to the chess world.

Exeter Chess Club: 100years\100y_84.htm

@@[From **Exeter Chess Club: 1895-1961** by Richard Hitchcock]

"In 1923 the membership was 41. The Club " *received the great honour and pleasure of a visit from Sir G.A. Thomas, the British Chess Champion. In a display of 19 simultaneous games he won 13, drew 3, and lost 3. It is with great satisfaction that the Committee can report that Sir George expressed the hope of renewing acquaintance with members of the club on the occasion of his next visit to Exeter.*

"In 1938 the club moved to 35 Southernhay East. In 1939 the Club spent 18/— on an outside notice, " *Exeter Chess Club. Open Daily. Club night Wednesday* ". In 1940, at the request of the police, "Exeter" was deleted, but in spite of this precaution the building caught fire in the blitz of 4th May, 1942. Its upper parts were wrecked and much of the rest badly shaken. (...)

"The first formal Championship of the Club was awarded to W.H. Gundry in 1908 (although a handicap tournament was established in 1907). The County Association had been asked to supply a championship medal on the understanding that it would be " *suitably engraved at the expense of the Club* " but it does not appear that Mr. Gundry got more than the promised Guinea. As regards the tournaments, in 1901 " *your Committee are of opinion that unless these contests are decided more quickly they are almost useless. (...) If a similar competition is held this season it is to be hoped each competitor will make every effort to complete his games* ." This pious hope has often been repeated."

[RJH]

From the minute book:

"AN Other sends his apologies: unable to attend because of the blackout. "

Exeter Chess Club: 100years\100y_91.htm

@@ More from the chess columns

The Exeter Chess Club annual meeting is to be held on Saturday evening next at 7.0 p.m. at the club headquarters and I understand a very favourable report will be presented. Any chess player who is not already a member of the club will be well advised to seek membership, and it is readily agreed that the Club offers facilities second to none in the Kingdom for all classes of chess players.

Devon and Exeter Gazette, Thursday 2nd October 1924

Mr H.V. Mallison, President of the Exeter Chess Club, paid a visit to the Teignmouth Chess Club last Saturday. He had a large and appreciative audience for his lecture on the Ruy Lopez opening in which he demonstrated the fine attack and the difficulty Black has in meeting it. He analysed the various defences, particularly the Steinitz, the Steinitz Deferred, the Berlin and the counterattack by P-KKt4.

The members were keenly interested, as the Ruy Lopez is this year's tourney opening. No-one in the district is better qualified than Mr. Mallison to impart such instruction, and the thoroughness of his analysis is proved by the exactitude of his practical examples.

After tea Mr. Mallison gave a simultaneous exhibition, giving all eight opponents the odds of a "Knight". He won every game! The next Saturday Teignmouth receive Torquay in connection with the Moyle Cup.

Devon and Exeter Daily Gazette, Thursday 28th January 1932.

Exeter Chess Club Championship

The Club room bears two fine painted wooden boards bearing the names of the club champions since 1949. The first board also proclaims:

Prior to the institution of this record, the Championship was held for many years

by Mr. H.V. Mallison, a friend and benefactor of the Club.

This list extends the record to the start of the Championship.

Exeter Chess Club: 100years\100y_92.htm

Characters of the 1950s — a memoir by Brian Clapp

F E A Kitto

Frank Kitto was the leading player in the club in the 1950s. He was a stocky figure with a ruddy complexion and dark curly hair — everybody's idea of a typical Cornishman. He didn't feel the cold and rarely wore socks and never an overcoat. He had, it was said, been a bomber pilot in the war, and in peacetime he was a psychologist. He lived in a ruinous Georgian country house in Kennford; there were holes in the floorboards and an unkempt tramp squatted in the hall the only time I was there. Kitto took in and looked after disturbed children until questions were asked in Parliament about conditions there. He had done nothing wrong but shortly afterwards went back to his native Cornwall, and died not many years later.

As a chessplayer he was both a godsend and a nightmare to team captains. He had a casual attitude to time and would hitch a lift to matches, often arriving half an hour late, and having to play at a faster rate than ordinary mortals. He usually had to borrow a pencil to record his moves and never preserved his games, which is a pity. In 1948 he tied for first place with Euwe at Plymouth. I remember a drastic win he had against Dr JM Aitken of Cheltenham in a National Club match. He often played the Vienna Gambit and on this occasion demolished Aitken in a very few moves. On another occasion he was playing CHO'D Alexander, also of Cheltenham, in a Bishop's Opening. Kitto as Black got an overwhelming position but lost. His explanation was simple — Alexander was the better player.

ARB Thomas

Andrew Thomas for many years taught mathematics at Blundell's School and after retiring continued to live in Tiverton until his death at the age of eighty in 1985. Beneath a calm and humorous exterior lay a fierce determination and a deep love of chess. Indeed in 1973 he published a book called just that — ***Chess for the love of it***. It contains some of his best games, including wins against Penrose, Najdorf, and Unzicker, and a draw against Euwe.

He hated routine play and was always ready with way-out moves in the opening. I doubt if he modelled his play on any particular school or master, but 'The English Tartakower' sums him up as well as anything. He belonged to Tiverton and Exeter chess clubs and only played for Exeter in the National Club Championship on board two after Kitto. They made a formidable spearhead to the team, and we did rather well in the tournament in the 'fifties, sometimes getting beyond the regional rounds into the open competition, usually played by telephone at an agonisingly slow pace. Neither side could understand how it took so long to transmit the moves, and both harboured the unworthy thought that the other side was cheating.

HV Mallison

Harold Mallison fought and was badly wounded in the first World War, and spent the whole of his

subsequent career as a University lecturer in mathematics in Exeter. He was by far and away the strongest player in the club between the wars, and repeatedly won the club championship. He was for many years before the Second War the County team captain.

By the 1950s he was almost blind and only played in the National Club matches and for Devon. For Exeter he was board three after Kitto and Thomas, and he also played on a high board for the county.

RB Copleston

Copleston was distantly related to the distinguished Jesuit philosopher FC Copleston. He had lived abroad in Argentina, and was an apple grower in Sidmouth. Like Kitto, he was an unusually courteous opponent. He drove his car with great verve, travelling in weekly from his house in Offwell, beyond Honiton, when well into his 'seventies. He could swallow scalding hot cups of tea, but was much more careful in the less dangerous activity of chess. He was knowledgeable about the openings and well informed on all aspects of the game.

AGH Winterburn

Archie Winterburn was a character, a Yorkshireman with a degree in geography. In the Second World War he served in the Navy as an oceanographer. In the 1950s and after, he taught geography at a private school in Exeter. He reminded me of Eeyore, the donkey in the Winnie the Pooh stories; like Eeyore, he always had a half-humorous grievance. Unlike Copleston, he knew nothing about the openings, and it was hair-raising to watch him negotiate the dangers of the early stages of a game. He would play only the Sicilian to 1. e4 and achieved much success against the unprepared. If he survived those perils his natural talents, which were considerable, gave him good chances of winning. Before he came to the West Country, he had belonged to Wood Green Chess Club, in North London, where the rules seem to have been rather peculiar. He was fond of relying on the authority of this strong and well-known club, and tried to impose its ideas on Exeter. For example, Wood Green didn't allow newcomers to enter the club championship during their first year of membership. If, improbably, Botvinnik had defected and applied to join Wood Green, he would not have become champion until his second year! Winterburn did his best to make Exeter conform to the Wood Green model. He devised the most complex handicap tournament known to man, the rules of which only he understood.

LCA Lewis

Another Yorkshireman, a keen gardener, and a kindly manager of the Exeter Social Security Office at a time when managers were less suspicious of claimants than they are in these cheeseparing days. When he was 16, in the early 'thirties, he had played in a simultaneous display against Alekhine. At one time a whole Rook up, he refused a draw, as any spirited youngster would. But when Alekhine gave him his full attention, having disposed of his other opponents, Les came to grief. He was still kicking himself 25 years later. He kept up the time-honoured tradition which laid down that strong players won the Exeter Championship in their first season. As I remember, Winterburn, for all his principles, did the same.

@Game Thomas,ARB- Kitto,FEA,WECU Championship 1947

Tough at the top

This game is from the second West of England Chess Union Championship, played under the auspices of the new Union over 50 years ago. The notes are taken from a tiny booklet which contains all 28 games played by the eight players involved in the 1947 Championship. Thomas won with 5 1/2 points, ahead of Kitto and Mallison on 4. All the games were annotated by Capt. P.D. Bolland, the then Somerset Champion.

Thomas had been picked to play for England around this time, but his Headmaster at Blundell's School would not permit him the time off, a fact that caused him much regret for the rest of his life. Thomas had a weakness for unconventional openings, as exemplified here by his choice of the Evans Gambit in a competition like this where there are no easy opponents.

— Bob Jones, WECU Secretary, in **Westward Ho!**

Evans Gambit

1. e4 e5 2. Nf3 Nc6 3. Bc4 Bc5 4. b4 Bxb4 5. c3 Ba5 6. d4 d6 7. Qb3 Qd7 8. dxe5 Bb6 9. Bb5 a6 10. Ba4 Nge7 11. Ba3 0-0 12. exd6 Ng6 13. 0-0 XIIIIIIIIY 9r+l+-trk+0 9+pzpq+pzpp0 9pvlnzP-+n+0 9+—+—+—+ -0 9L+—+P+—+0 9vLQzP-+N+-0 9P+—+ -zPPzP0 9tRN+—+RmK-0 xiiiiiiiy

@@Game Clapp,BW - Bonner,DP, Devon vs. Somerset, 1955

The Bishop Pair

In a wild game on an open board two Bishops can be irresistible. Here, White's 10th move looks anti-positional, but clears the way for the Bishops. The move had recently been played in another variation of the Winawer by Smyslov or the like. It took my opponent, a former Exeter champion, by surprise, and was probably the turning point of the game. — BWC

Exeter Chess Club: 100years\100y_97.htm

@@ St. Luke's Chess Club: a new Exeter club and a new World record

In former times, St. Luke's College (now incorporated into Exeter University) was an independent, men-only, teacher-training college with a reputation for having the finest student rugby team in the country.

I arrived there in September 1960, never having played either rugby or a competitive game of chess. I discovered that friends of mine who had played rugby at county level couldn't get into any of the college's twelve(?) teams, which, added to my total ignorance of the game and low pain threshold, suggested little point in my pursuing that particular outlet for aggression. The college chess club was more promising, although I had only ever played friendly games with my father and a school friend during the previous couple of years.

At the first meeting the chess club appeared to have just five members, comprising myself, three other freshers and a sole second-year student, Philip Walker of Weston Super Mare. Philip, however, was steeped in chess and all its finer points. His father, I later discovered, was Ernie Walker, who was Secretary of the WECU Easter Congress for many years. At the time I had no yardstick to estimate Philip's true chess ability (as opposed to his obvious and abundant enthusiasm), as the present grading system did not exist. He was, in fact, shortly to become West of England Champion aged 20 (1962) ahead of A.R.B. Thomas, Dr. Aitken, Mardle, the Wheeler brothers *et al.*. Thus his ability and enthusiasm made him a formidable force and he was determined to whip this unlikely rabble into a team capable of participating in the Exeter & District League.

The other members of the club were Stewart Walker, from Astwood Bank in Warwickshire, who had played junior chess to county level, and John Simpson, who lived in Exeter. He had been to Exeter School and had invaluable local knowledge. The fifth member was Roger Betts, whose main allegiance was to the football team but would play for us if pushed.

We launched into the league matches, playing now-extinct teams like St. Loye's, led by their Principal, Frank Tregellas, who was unable to sit at the board, and Rex Willis. The Civil Service team met at the Black Horse in Heavitree and included Ray Shepherd and Eric Soper. The University had a strong team, while Exeter was led by Messers Clapp and Richards, both University lecturers.

Under Philip Walker's leadership, we were drilled in the finest points of match play; never to agree any result without his knowledge, when to offer or accept draws and so on, and somehow or other we won the 1st Division and Philip won the Exeter & District Individual Championship.

The following season, with Philip gone and no new members to replace him it looked impossible to retain the trophy. However, we dragooned a fifth unwilling player from the new first years, and not only did we win it again but did so for a third time in 1963. To this day, I have no idea how we managed this with only two experienced players, one novice and two pressed men. I could believe I dreamt it if the name St. Luke's wasn't engraved on the Div I cup for those three consecutive years.

Equally strange was the story of what happened in the early spring of 1961. At the beginning of March, knowledgeable second-years started to move among us, talking about the approaching Rag Week. Coming from a grimy pit village in the Midlands, this phenomenon was quite beyond my experience, but it seemed that during this particular week any whacky idea was legitimate by virtue of it being fund-raising for charity. At this particular moment in the history of education, it should be remembered that most of the second-year students were the last to have done National Service, had been all round the world and seemed very worldly-wise to we first-years who had mostly come straight from the sixth form. Simply, they were men, we were still boys. For example, at a Rag Week brainstorming session, one of these ex-National Service students volunteered, as a Rag stunt, to parachute into the middle of St. James' Park during an Exeter City match. It was given serious consideration by the Rag Committee but eventually rejected because of the danger, in the event of a crosswind, of the parachutist landing on the adjacent Exeter — Waterloo line!

Keen to keep our end up in the light of this level of thinking, we came up with the idea of playing chess in the High Street. The original idea was that Stewart Walker and I would set up a table, two chairs and a set and board somewhere on the pavement and just start playing, with a collecting tin to tempt, or, more likely, deter spectators. As the Monday morning approached, the weather was bitter, Stewart caught a cold, literally and metaphorically and cried off. Thinking on the hoof, our group of mates decided that I would be the sole player challenging all-comers, and they agreed to form a rota of friends to stay around so that I would have a guaranteed opponent at all times allowing continuity to be unbroken. We got a blackboard and easel from somewhere so that the score could be displayed, and an eye-catching poster was made.

That Monday morning we carted all the equipment down into the city centre. In view of the cold and the possibility of rain, we set up the table under the Burlington Arcade where it meets the High Street, and play commenced. Shoppers would cast a quizzical glance in our direction before hurrying on by with an expression of either amusement or, more likely, disdain. In those days, bus transport was used far more than today, and all buses passing through the city stopped right alongside where I was playing, frequently packed with passengers, upstairs and down, most of whom would spend a few minutes gazing incredulously at the street entertainment before them. All this helped to get the event noticed on that first day.

A couple of times Rag Committee officials stopped by to see how it was going, and were pleased with several features of the activity; it demanded nothing of them, was right before the public gaze and was ongoing. I can't recall exactly at what stage it was decided that the event should carry on beyond the one day, but as evening approached, there seemed no reason why it should stop necessarily, as long as I was prepared to carry on and the rota of friendly opponents was maintained. So continue we did. Evening turned to even chillier night but we kept at it.

Next morning, even the earliest commuters in the morning rush hour may have been surprised to see us still there. Busloads of workers and hordes of shoppers must have had a feeling of *déjà vu* as they tried to work out in their minds whether we had made a very early start or might possibly, just possibly, have been there all night. Rag Committee members were now delighted with the continuity and urged us to keep it going as long as possible. Friends brought food along and occasionally I allowed myself an occasional visit to the public toilets next to Dingles, when it was my opponent's move, of course.

Tuesday went much as Monday, with the difference that by now, members of the public were beginning to take notice to the extent that more people would actually take up our challenge to take on all-comers and would come up for a game. Tuesday night was unforgettable as more people would stop by for a game and now, starved of sleep for a second consecutive night, staying awake at the board was becoming a serious problem. Several times in the early hours, I felt my head drooping forwards and almost slumping off the chair onto the pavement. But somehow I came through that and got ready for a third day.

Commuters and early shoppers had now become used to seeing me there and looks of withering scorn were being replaced in the main by knowing amusement. The public were now in on the joke. The Rag Committee, delighted at the way this unlikely event had taken off, now concerned themselves as to how it should end. Should I be offered dubious stimulants in an attempt to press on further into the

week or should I quit now while ahead? Eventually it was decided that it should end at 3 p. m. on the Wednesday afternoon when the maximum number of people were still about. They organised an open-top Morris Minor to carry me, standing on the back seat, the length of the High Street, waving to the crowds like some returning hero. Alongside me on the back seat was the blackboard proclaiming 52 hours of non-stop playing.

Back at college I collapsed on my bed and slept for 18 hours. It was not until several days later, taking stock of what had happened and wondering whether we had inadvertently set some kind of record that a friend suggested we contact Ross and Norris McWhirter, the twins who were then establishing the Guinness Book of Records as an institution. I wrote and told them what we had done. They replied saying there was no such thing as a Marathon Chess Record, but they would be delighted to accept this as the first. It appeared in the next edition, the 10th, dated November 1962.

This was the history of the St. Luke's College Chess Club, its achievements matched only by its brevity. And thus it was that the inaugural World Marathon Chess Record was set in the middle of Exeter High Street. The record has of course been broken many times since, but I wouldn't be surprised if they had all been done indoors. Now I think about it, I possibly could still be the World

Outdoor

Marathon Chess Champion! I could be tempted to write to the Guinness Book of Records. . . but then again, perhaps not.

— *R.H. Jones.*

@@

Denis Gray writes:

I have little time for chess these days, life being pretty hectic at the moment — I have just been elected President of the Royal College of General Practitioners. I appreciate your interest, as I have been retired from active chess for so long.

I was a home-grown Exeter player, having played here long before settling here to work (I currently live in the house I was born in). I won the Devon Junior Championship four times, and the West of England Junior Championship three times. I also had a good run at the British Boys Championship (Under 18) in 1954, being joint lead going into the last round, but lost and came fourth behind K.D. Sales.

I first secured the Championship of the Exeter Club while still a pupil at Exeter School.

My most important result was an invitation under-21 played at Hastings in 1955 or 1956. I was unbeaten and finished third or fourth.

In later years I was pleased to recover the Exeter Club Championship in 1964. At about the same time I remember being in a quadruple(!) tie for the Senior West of England Championship, but on the application of a tie-break system had to concede the claim of one of the others.

[Denis was Knighted in the 1998 New Year Honours. — DR]

@Game Gray, DJP - Mutkin, HG, Cambridge vs. Oxford, 1962

Chess Notes

Exeter player leads Cambridge team in University Match.

DJP Gray, of Exeter School and St John's College Cambridge, has become one of the celebrated few who have had the honour of playing at board one in the annual Varsity match. This year's drawn contest was his third appearance and he made his total score 21/2 points with the following lively draw against the rival President, H.G. Mutkin, of Wadham, who played an unusual type of Sicilian Defence... — J.E. Jones

Sicilian Defence, Lowenthal Variation

1. e4 c5 2. Nf3 Nc6 3. d4 cxd4 4. Nxd4 e5 5. Nb5 a6

The Lowenthal Variation, still a good "secret weapon" despite — or perhaps because of — the rise of the Kalashnikov line with 5...d6.

6. Nd6+ Bxd6 7. Qxd6 Qf6

8. Qd1

This undeveloping retreat looks odd, but there is no obvious way to keep it in play with advantage.

8... Qg6 9. f3 Nge7 10. Nc3 O-O 11. Be3 d6 12. Qd2 f5 13. Bc4+ Kh8 14. O-O-O b5 15. exf5 Bxf5 16. Bd5

White has occupied the d5 square in textbook style but Black has some promising ideas on the wings. However, this apparently staid move also hides a threat to the d-Pawn. Black may have missed the threat or decided to let it go in favour of the

complications which now ensue.

**16... Rac8 17. g4 Bd7 18. Be4 Qf7 19. Qxd6 Be6 20. Bb6 b4 21. Nd5 Rfd8
22. Bxd8 Rxd8 23. Qc5 Bxd5 24. Bxd5 Rxd5 25. Rxd5 Qxd5 26. Qxd5 Nxd5**

Whew! After all the fireworks an unbalanced endgame has arisen with rough material equality. White must have felt encouraged by the fact that the minor pieces he was facing were a pair of Knights.

**27. Rd1 Nd4 28. Rd3 g6 29. c3 Ne2+ 30. Kc2 Nef4 31. Rd2 a5 32. cxb4
Nxb4+ 33. Kb3 Ne6 34. Ka4 Nc6 35. a3 Nc5+ 36. Kb5 Nb3 37. Rd5 Nbd4+
38. Kc5**

The Knights have got organised and have patched up a defence, and although White can now think about getting a Queen's-side passed Pawn Black can consider sacrificing one Knight for it and eating King's-side Pawns with the other.

1/2-1/2

@Game Richards,DJ - Gray,DJP, 1965

A novelty

Throughout the 'sixties Denis Gray and I enjoyed a very invigorating mixture of co-operation and competition, spending hours both discussing all manner of chess matters and playing numerous games. The following is one of my favourite wins against Denis — who I'd first met at Southern Counties Boys' Championship in 1948! (an event won by Peter Clarke). — DJR

King's Indian, Petrosian Variation

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7

I'd had many battles against Denis' King's Indian and was always looking for fresh twists in the opening. In this game it comes on move 11.

4. e4 d6 5. Be2 O-O 6. Nf3 e5 7. d5 Nbd7 8. Bg5 h6 9. Bh4 g5 10. Bg3 Nh5 11. h4! Nxc3 12. fxc3 g4 13. Nd2 h5 14. O-O

White has gained an open f-file and hopes to occupy e4 with a Knight if Black makes his usual break with ...f5. He can also push up on the Queen's-side.

14...Nc5? This doesn't look right. The Knight soon finds itself on its original square.

[Peter Lane suggests 14...Bh6, as in Keres-Matanovic, 1963]

15. b4 Na6 16. a3 f5 17. exf5 Bxf5 18. Nde4 Bh6 19. Bd3 Nb8 20. Qc2 Nd7 21. Ng5 Bxg5 22. Bxf5 Be3+ 23. Kh1 Bf4

White stands well, but has Black nothing better than this somewhat desperate ploy? But Denis hated defending!

24. Bxd7 Qxd7 25. Qg6+ Qg7 26. Qxg7+ Kxg7 27. gxf4 exf4 28. Ne4 It was nice to play the second Knight to that key square! **28...Kg6 29. Ng5 Rf5 30. Ne6 f3 31. gxf3 gxf3 32. Rg1+ Kf6 33. Raf1 c5 34. bxc5 dxc5 35. Rg5 1-0**

[Notes by David Richards]

Richard Hall writes:

I was at Exeter University, reading law, from 1964-1967, The University team was

very strong, with myself, B.D. Dabulawicus, M.B. Sage and D.E.Brown all in the same year.

I believe I joined the Exeter City Club for only one year, 1966-67. This was predominantly so that we could enter a strong Exeter team in the National Club Championship. Brian Dabulawicus, Martyn Sage and myself joined together; A.R. B. Thomas was also a member. That year I also won the Devon Championship, beating D.J. Richards in the final, having beaten Andrew Thomas in an earlier round.

Exeter had a very good run in that year, as follows:

1st Round bye

2nd Round 6-0 vs. Barnstaple

3rd Round 3-3 vs. Torbay (won on board count)

4th Round 3 1/2 — 2 1/2 vs. Islington and North London

1/4 Final 3-3 vs. Cambridge Univ. (won on board count)

1/2 Final 1-5 vs. Bradford

Bradford went on to win the final against Manchester.

I effectively gave up over-the-board chess in the 1970s and took up postal chess. I am currently the British Correspondence Champion, a correspondence IM elect, playing in a world Championship semi-final and playing on Board 3 for England in the correspondence chess Olympiad.

@@Game Winterburn,AGH - Jones,RH, Bremridge Cup, 1970

The Sicilian Landslide

The only game I took from Winterburn did not start auspiciously, when I faced a sharp position with my King exposed, Winterburn having sacrificed a piece for the attack. At about this point that Mrs. Winterburn came into the room and whispering urgently into her husband's ear, explained that she'd just set fire to their car on the sea-front by dropping a cigarette end in the upholstery, and it was now a burnt-out wreck. This did little for my opponent's concentration on the matter in hand, and he just lost heart and shortly resigned. Although I felt sorry for my opponent's plight, I was glad to win our third encounter after two severe maulings.

Here is Archie in better form. When the Sicilian Defence goes wrong, you get the impression of never having been in the game; that was my experience here! — RHJ

Exeter Chess Club: 100years\100y_110.htm

@@ Looking towards the 'seventies.

When I came to Exeter in the Autumn of 1966, I was immediately recruited by David Richards to play in a County Match at Taunton. This was my initiation into Devon chess, and I recall the quizzical look of Ron Bruce, the long-time Captain of the Devon team, and the gentle welcoming smile of his wife Rowena. Although I played intermittently for Devon for the succeeding fifteen or twenty years, Exeter Chess Club dominated my chess-playing activities for two decades. I have retained my membership, believing myself to be the longest continuous member, although my appearances have, of late, been limited to the annual Douglas Phillips Quickplay Tournament.

The Club met in the smoke-filled Upper Reading Room of the Devon and Exeter Institution. The membership consisted of individuals with their own memorable character traits, and Brian's pen-portraits of Copleston and Winterburn are instantly recognisable to me as they were still members when I joined.

As well as these players, Dr. R.G. Chaturvedi was also a regular attender, and a difficult opponent. Although his grade may not have got beyond the 140s, he was a regular in Exeter's first team, and always reliable. Mr. Holder was also 'ever-present' but was keener at draughts than chess! He may not have won any but a very small number of games throughout the entire time that he was a member.

Perhaps the most singular member of the members I recall was Miss Jane Passmore. Her sister Katie, reputedly a stronger player, had also been a member of the Club but that was before my time. Miss Passmore would walk from her home in St. Leonard's, was never without her floral hat which she wore indoors and out, and she was partial to Queen sacrifices. In her later years, she did not trouble experienced players, but she could be relied upon to catch out an unwary opponent.

An early memory of those days is the simultaneous display given by Lajos Portisch, then at the height of his considerable powers, and ranked seventh in the world at the time, I recall. He was an amiable and easy guest with a passion for football which seemed to match that for chess. I remember playing my favourite Reti against him, and gratefully accepting his offer of a draw at move 26 when neither a piece nor Pawn had yet left the board. This gesture was typical of his generous nature displayed throughout his visit.

The most awe-inspiring display given at the Club however, was the return visit of former student R.V.M. Hall who took on all-comers and disposed of them all with sparkling combinations that marked his style. *[Richard, once reminded of the event, suggested that this was 1973.]* Kevin O'Connell also played at the club, as a student; as did Simon Brown, who, when he arrived already had the highest grade in the county — 209, I believe.

For me, Exeter Chess Club is inextricably linked with the Upper Reading Room of the Devon and Exeter Institution. When it left these premises, via Cowick Street to St. David's Hill and palpably better times, it left part of its soul behind. Nostalgia remains for that era when games were played with Victorian chess-pieces and clocks, some of which may have been eighty years old, on mahogany tables that were probably there when Staunton was up to his tricks dodging Paul Morphy in London.

Unfortunately, my records of games from this earlier period are not to hand and I have to move to the nineteen-seventies for an annotated game.

Quickplay in this context means a 10-second 'buzzer' tournament; once practised widely, we come across buzzer tournaments more rarely these days. Foreign visitors in particular seem less likely to have played it before, although this has not hindered their success.

Douglas was a ex-Navy man, among whose accomplishments was a hair-curling repertoire of alternative lyrics to well-known tunes.

He became a market gardener, and secretary of the chess club. In his memory, his widow instituted a Cup for this form of chess which he so enjoyed.

The Cup is contested annually under the able stewardship of Richard Hitchcock.

@Game Lee,RA - Holmes,D, BCCC 1969-70

Looking ahead

In the latter part of the 'sixties I had qualified to play in the British Championship Candidates' section. In correspondence chess this takes some time, as it is first necessary to qualify via a postal chess club — in my case the BCCA. Having reached the British Championship Reserves section, you need a podium finish to qualify for the Candidates section. There are six of these and only the winners go forward into the Final, which is a group of eleven players, the bottom six each year being relegated.

When I played this particular game I was living in Devon, but my opponent was an old foe with whom I had crossed swords in the Yorkshire league. For this reason the crash through the centre was doubly satisfying! — RAL

King's Indian Defence, Sämisch Variation

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. f3 O-O 6. Be3 b6 7. Qd2 c5 8. d5 Na6 9. O-O-O Preparing the S ä misch bayonet attack. **9...Nc7 10. Bh6 a6 11. g4 b5 12. h4**

Both sides press their own attacks. **12...bxc4 13. Bxc4 Nb5 14. Nge2 Nxc3 15. Nxc3 Bd7 16. h5 Qe8 17. hxg6**

The QB has been at h6 for some time already. In the Sämisch Attack this exchange of Pawns and then Bishops is a release of tension which must be played only when the time is right. I now intended the break in the centre, but for this to work it was necessary to "see" moves 23 and 24 from here.

17...fxg6 18. Bxg7 Kxg7 19. Qh6+ Kh8 20. e5! dxe5 21. d6! exd6 22. Rxd6 Qe7

23. Rxf6! Rxf6

[23...Qxf6 24. Qxh7#]

24. Nd5 Qg7 25. Nxf6 1-0

I played at the Candidates' level three times, finishing 4th, 3rd and 3rd again.

@Game Vasil,P - Lee,RA, West Wales Open, 1971

Digging in

In January 1971 I stayed at Swansea in the same "digs" as Italian Sergei Mariotti, who was already an International Master and soon qualified as a Grandmaster.

Sergei had travelled from London where he had just given a simultaneous blindfold exhibition against 10 opponents.

One evening in the bar, Sergei played another competitor from the Midlands and myself simultaneously and blindfold. In one game he took White and spoke in English Descriptive notation(!), and in the other, Black and Algebraic; whilst we all stared distantly into our pints. He swept us both away effortlessly.

We met in the third round. I had White and resisted bitterly until the end of the session. I believed I had a draw but adjudicator Peter Clarke awarded the game to Mariotti. I won all my other games (although I had Black in 4 of the 5) and finished clear second, half a point ahead of Mariotti and George Botterill, who won the British Championship about that time. This was my last round game. — RAL

@@Game Boniface,S - Potter,A [B06] Woodbury vs. Exeter, 1975

En route

In the 1970's the Wanstead and Woodford Club used to up sets and travel down to Paignton for the annual DCCA Congress. On the way they would stop off at clubs and play a match. I believe Exeter were the hosts on several occasions. — SRB

[When soliciting games for this book, I didn't

particularly

seek defeats of Exeter players, but when an affable West Country organiser accompanied the enclosed game with a stack of splendid stories, I felt more indulgent. But my apologies are offered to Mr. Potter. — DR]

Sicilian, Grand Prix Attack

1.e4 g6 2.f4 Bg7 3.Nf3 d6 4.Bc4 Nf6 5.Nc3 0-0 6.d3 c5 7.h3 Nc6 8.Be3 a6 9.a3 b5 10.Ba2 Bd7 11.0-0 Rb8 12.Qd2 b4 13.axb4 Nxb4 14.Bc4 Qc7 15.f5 gxf5

Perhaps this is asking for trouble. Black had no weaknesses so would probably do better to sit tight on the king's side and plan to hit back in the centre.

16.Bh6 Bxh6

Black seems determined to attract the White pieces into his king's position.

17.Qxh6 Qc8 18.Ng5 Be6 19.e5

At last White does something for himself, clearing e4.

19...dxe5 20.Nce4

Not really a sacrifice as it clearly can't be taken.

20...Re8 21.Nxf6+ exf6 22.Nxh7 1-0

...and being unable to stop 23. Nxf6 Black resigned.

[Notes by Steve Boniface]

@@ Tales from a Devon Club

Big Mike

One of the definitely larger-than-life characters at Exeter Chess Club in the 1970's was Mike Boag. Not a very strong player, he loved the game, especially blitz play at which he was much better. He was certainly one of the most enthusiastic players I have met, and could be quite boisterous at times.

He owned a small boarding house in the city, and as this kept him at home most of the day, he would invite players round to his house to play quick chess most days during the week; he never seemed to tire of it.

Eventually his keenness led him to stand for Match Captain for the Exeter Club. Although not that strong, he had the novel idea of being 'team supremo', organising each division's players so that there would be no confusion as to which player turned out for which team. A captain for the night would be appointed to look after the administrative details.

As far as I know this worked very well until the notorious occasion when Teignmouth were the opposition. For some reason, both team captains got it into their heads that they were playing away for the night. Cars duly left Teignmouth and Exeter at around 7 p.m., presumably passed each other somewhere around Exminster, and arrived at the rival venue just before 7.30. After waiting a few minutes two pennies dropped almost simultaneously, and without phoning the other club both teams ran back to their cars and hurtled back to base, probably crossing at Exminster rather faster than before.

Now almost 8pm, a whole pile of copper coins fell, at least one call was made, and the horrible truth emerged. I believe the match was played at a much later date, presumably with one or more replacement team captains. One cannot imagine Mike being very amused.

Shortly afterwards Mike and family moved to Torquay, bought a small cafe, and converted it into a chess haven. He would hire sets out and serve sensible food. He used to take on all-corners at five-minute games, and got so proficient against

the locals that he offered a slap-up meal to anyone who could beat him.

Unfortunately a group of evil-minded Exeter players (probably those who suffered after the wrong-venue incident) decided to set Mike up. They arranged for the then Teignmouth champion (who Mike did not know) to call in for a cup of tea, and let himself be persuaded into a rapidplay game. Mike was duly taken to the cleaners, left Torquay, and was last heard of running a barge down the Grand Union Canal for tourists.

If you're still out there, Mike, I hope your latest scheme is working

The Eighth Man

One of the tragedies of life is when someone with everything apparently going for them is struck down in the prime of life. Such a man was Peter Rooke, a modest player, but who was elected Competitions Secretary for Devon and set about reorganising the various events in the county. His death at an early age prompted demands for a memorial, and this was done in the shape of a Cup to bear his name, to be competed for annually by all teams in Devon.

The rules of the competition were designed by a committee, and they came up with an ingenious formula of an eight-person team with a total maximum grading of 1000. The intention was to make the contest more even between the stronger clubs (like Exeter, who had several players over 150) and lesser teams who might not have any over 140.

The problem at Exeter was that most of the keen players (who later semi-deserted to form a breakaway team in the local league) were too strong to allow all of them to play at one time in this particular event. In fact, the 'Secret Seven' virtually broke the one-thousand limit alone. There seemed no way to keep the happy bunch together until late one night

"Caine!"

This cry came from one of the more devious elements. He had remembered that on most club nights, a civil-servant-type individual sat in the corner waiting desperately for someone to play. He was a pleasant enough fellow, but was so pitifully weak that he had never been known to draw, let alone win, a single game. Consequently he had never been picked for any representative match of any kind. However, here was a stroke of genius. With the Seven's grading points at the perilous level of 985, Caine's meagre 12 left them under the limit, all quite legal and — er — above board.

And so it was that Mr. Caine (I'm not sure anybody even bothered to ask his first name) was invited to play in the Peter Rooke Memorial Cup for Exeter. The initial shock must have been great, though it's not clear whether he ever realised he was being used almost literally as a pawn.

Mr. Caine no longer appears in the grading list (his name has been changed to protect him in this shameful episode) but he was duly driven all around Devon in order to fight for club and city. It is not known whether he actually broke his duck; I just hope that one day he realises that without him those notches on the Cup would never have been made.

[The Peter Rooke Cup is still fought for annually — DR]

The Ring of Bells

Have you ever wondered why Brian Hewson lives at Cheriton Fitzpaine? Is it his love of the countryside, or an old family tradition? Neither of these. Brian is trying to find the lost chess club of middle Devon...

In the 1970's, the Exeter and District League was dominated by Exeter University. They produced a string of good student players, and only Exeter itself seemed capable of denting their record. (Exmouth in their half-centenary year beat both the University AND Exeter, but that is a story for another day!) However, the format of the league (5 boards) and the ridiculous time limit (30 moves in 75 minutes then probably adjudication) meant that as a serious competition it left something to be desired.

Hence in the late 70's the more adventurous members of Exeter were looking for a more enjoyable way to spend an evening than churning out 30 moves in the Literary Society Library then trying to get to the pub before 10.30. At this time taverns outside the city had much longer opening hours, some official, some not. Let it be made plain that no member of the Exeter Club ever connived in drinking at illegal hours (sorry, that should read `was convicted!').

It was discovered that there was a very friendly hostelry in Cheriton whose landlord was a jolly Australian who had a healthy contempt for illiberal English Licensing Laws (it's even worse over there). One of the Exeter team was seeing a local girl, and as well as playing darts in the Bells, there seemed ample room for some chess boards. One by one, the keen members of Exeter were persuaded to pay a visit, until enough players attended regularly to form a team.

The Exeter and District League Committee accepted their entry, but insisted that, in spite of their strength, they should work their way through Division Two first. The relevant cup was won somewhat at a canter, at which point the Committee rather ambiguously berated the embarrassed team for being too strong!

This proved somewhat hollow when they failed to win the First Division in their second season, mainly by being somewhat cavalier in their play. Nevertheless, they won the League in due course, though by now they had changed names through 'The Abominable Snowmen' to 'The Wandering Minstrels'.

Sadly, by 1980, the team had started to break up, as marriage, divorce, job moves, and redundancy took its toll on this merry band of pirates. But the mysterious names are still on the cup.

— *Steve Boniface*

@Game Basman,MJ - Bellers,CJV, East Devon Open, 1982

The eleventh hour

This last-round game provided excellent entertainment for the many onlookers!

Sicilian Defence, Hyper-accelerated Fianchetto Variation

1. e4 c5 2. Nf3 g6 3. c3 Bg7 4. d4 cxd4 5. cxd4 d5 6. e5 Bg4 7. Be2 Bxf3 8. Bxf3 e6 9. h4

[Some sort of aggression is necessary, otherwise Black will set up a very solid defence. — PHC]

9...h5 10. Bg5 Qb6 11. Nc3

11...Nc6

[11...Qxb2 12. O-O Qxc3 13. Rc1 would give White too many possibilities. — PHC]

12. O-O Nge7

[Probably Black could have risked taking the QP. — PHC]

13. Bxe7 Nxe7 14. Na4 Qd8 15. Nc5 O-O 16. Nxb7 Qb6 17. Nc5 Qxb2
18. Rb1 Qxa2 19. Qd3 Bh6 20. Nd7 Rfc8 21. Nf6+ Kg7 22. Rb7 Nf5 23. Rfb1

23...Qc4

[Better was 23...Rc1+ reducing White's attacking force. — PHC]

24. Rxf7+!? Kxf7 25. Rb7+ Ne7 26. Rxe7+!?

[26. Qxg6+ Kxg6 27. Bxh5+ Kf5 28. Bg4+ led to a pretty draw, but Basman had higher hopes. — PHC]

26...Kxe7

I was in time trouble from move 27; the time control was at move 42.

27. Qxg6 Qc1+ 28. Kh2 Rf8 29. Nxd5+! exd5 30. Qd6+ Kf7 31. Qf6+ Kg8
32. Bxd5+ Kh7 33. Be4+ Kg8 34. Bd5+

[The game continuation was incorrectly recorded as 34. Qg6+ Bg7 35. Qh7+ Kf7]

36. Bd5+ Ke8 37. Qg6+ Kd8 38. Qd6+ Ke8? [38...Kc8!] 39. Bc6+ Kf7 [39...Qxc6
40. Qxc6+ Kf7 41. f4+-] 40. Qc7+ Ke6 41. Qd7# in the Sunday Times
magazine.]

**34...Kh7 35. Be4+ Kg8 36. Qg6+ Bg7 37. Qh7+ Kf7 38. Bd5+ Ke8 39. Qg6
+ Kd8 40. Qd6+ Ke8? 41. Bc6+ Kf7 42. Bd5+? Ke8 43. Qg6+**

Time control reached; Basman had a long think here and eventually he forced a repetition of position, which I thought was a prelude to a draw offer. Despite having a lot more time to think, I repeated the same mistake — I learned a lot about psychology from this game!

43...Kd8 44. Qd6+ Ke8? 45. Bc6+ Kf7 46. Qc7+ Ke6? 47. Qd7# 1-0

@@Game Hitchcock,RJ - Blewett,P Woolacombe, 10.10.1980

The spear-carriers

This game from the Golden Coast tournament (limited to players under 155) has a cheerful blend of sound with unsound ideas. This mixture characterises club chess in general, but it can pay surprising dividends. It also demonstrates both players' determination to press on with their own attacks, irrespective of what is happening elsewhere on the board. — RJH

King's Indian Attack

1.e4 c5 2.Nf3 d6 3.g3 g6 4.Bg2 Bg7 5.O–O Nc6 6.d3 e5

A fashionable move, leading to a formation much favoured by Mrs. Bruce, but it seems suspect here.

7.a4 Nge7 8.Nbd2 O–O 9.c3 Rb8 10.Re1 b5

Hardly the definitive breakthrough for Black. White is not interested, and signals his intentions elsewhere by his twelfth move:

11.axb5 Rxb5 12.h4 h6 13.Nf1 Be6 14.Ne3 Qb8 15.Nh2 Ra5 16.Rxa5 Nxa5 17.Nef1 Qb6 18.Ng4

Tempting Black into the following weakening move.

18...h5 19.Ngh2 Rb8 20.g4 hxg4 21.Nxg4 Kh7 22.Bg5 Bxg4 23.Qxg4 f6

Rather a desperate last-ditch defence, enabling the b2 Pawn to be defended again and weakening g6 into the bargain.

24.Bc1 Nac6 25.Be3 Qa6 26.Qd7 Rb7 27.Qg4 Qa2 28.h5

Launching the final assault, irrespective of the Queen's-side side-show.

28...Qxb2 29.hxg6+ Kg8 30.Qe6+ Kh8 31.Qf7 Na5 32.Bh6 Ng8 33.Bxg7#

@@ A press release

And yea, for there came a day

When the men of Exeter heard the trumpets sound

As Plymouth came forth to do battle in the Schofield Cup

And the Exeter captain, who was called Roberts, said unto his men:

"We're in it up to our necks here, lads, for Plymouth are undefeated so far, and they hath already spanked our B team, and lo! for they outgradeth us on every board, save one. "

And the men of Exeter were sore afraid, but their hearts were as oak, and they rode forth to do battle

And hark! for there commenced a bit of a turn up

And the men of Exeter —

who were called Kennedy, and Kennedy begat Blackmore, and Blackmore begat Rosseinsky, and Rosseinsky begat Roberts

But only in a chess sense, obviously —

Vanquished their foes on every board, save one

And even that was a draw

And Plymouth were chastened, for they knew that they had been wazzocked

And the men of Exeter stood proud yet meek, for they lived to fight another day.

Mark Blackmore

Steve Owen writes:

I joined Exeter Chess Club at the age of thirteen and remained a member until 1990, when I became a district councillor and found that I had not sufficient time for other interests. I can remember at 14 watching Denis Gray demolish a strong opponent in a dozen moves or so during a National Club Match played by telephone, when I acted as 'runner'. My own best years were from 1973, when I returned from university, until about 1985. During that time, I used to play board six (bottom board) for the Bremridge team and top board for the Mamhead.

I had quite good results for the Bremridge, as my opponents were often older players, perhaps past their best.

Top board in the Mamhead competition was often more difficult, as I faced young whizz-kids playing twenty or thirty points above their grading. Typically contrasting games were played in the Exeter-Plymouth matches of 1981...

Game Owen,SM - Bruce,R, Exeter-Plymouth (Bremridge), 1981

Early knockout

I especially enjoyed playing Rowena Bruce, who had actually been World Girls' Champion in the 'twenties, and British Ladies' Champion several times thereafter. So I can claim to have beaten a world champion! She was much stronger than I positionally, but sometimes crumbled against aggression. — SMO

Exeter Chess Club: 100years\100y_132.htm

@@Brian Hewson writes:

Before moving to the West country in 1978, I started playing seriously in 1966 and was in the School team in 1967 aged 14. Soon I was captain of both the School team and also Folkestone Chess Club; my first published grade was 176.

There was tremendous team spirit in the Kent county team; most of us had to travel a fair distance (in some cases over 100 miles) and often took over train carriages on the way. We won the English Counties Championship in 1975 and again in 1976, playing both finals against Lancashire.

The best moment in Devon for me was winning the National Club Major Plate and receiving the award with my arm in a sling.

I've enjoyed regular tussles over the years with George Wheeler of Plymouth, Alan Brusey of Teignmouth and my regular rival for the Exeter Championship, Richard Lingham. I've also enjoyed the company of the various foreign visitors we have had who have strengthened the team; Stefan Flesch from Germany, Mike van Wissen of the Netherlands, Dr. Emilio Pérez of Costa Rica — and from Iceland over the years we have received Jon Gunnar Ottoson, Hakon Halldor Oskarsson and Águst Karlsson. Hair-raising tales of the exploits of these giant Vikings live on in the Club's oral archives!

A couple of incidents stick in my mind:

In one round of the National Club, Chris Heath had a won position at the close of play against an illustrious opponent ; let us call him the Expert. The Expert was absolutely fuming about the game and paced the room grumbling; Chris enquired gently if he was going to resign. Instead, he started to write the position down. Chris, having received no answer, then asked if he wanted to send the game for adjudication. The Expert then started ranting about how badly Chris had played the opening, whereupon Chris replied, "I'm sorry, I'll try and do better next time"(!). Eventually he did resign.

Not the worst manners I've ever witnessed: I can remember vividly Ashford winning the Kent championship in 1977, outgraded by 30 points on every board

by Lewisham in the final. David Powell beat the Australian IM Max Fuller on top board; after the game a "colleague" of Fuller's decided he must have taken a bribe and floored him with a right hook!

Game Hewson,BWR - Flear,G (IM) Ward-Higgs CC, 1982

A scalp

White's centralised minor pieces wreak havoc among the disorganised Black Pawns. Brian's opponent is now a strong GM; at the time he was "only" a strong IM! — DR

Pirc Defence, "150 Attack"

Exeter Chess Club: 100years\100y_133.htm

Brian's Endgame Adventures

Like many strong players Brian's prowess is often most apparent in the endgame, and his ability both to calculate and to evaluate chances in technical positions is excellent. However, his style is far from dry, preferring direct piece play, which, when combined with a predilection for time trouble and a talent for escapism previously emulated only by Harry Houdini, means that Brian's endgames often draw a crowd. — DR

Boyce, JR - Hewson, BWR, Gloucestershire vs. Devon, 1987

With the time control approaching at move 42 I used up nearly all my remaining time calculating the resulting ending.

33...Rf5 34. Rxf5?? gxf5 35. Kf3 Kc6 36. Kf4 Kb5 37. axb6 axb6 38. Kxf5

The point is that when the b-Pawn Queens it will be check.

38...Kxb4 39. g4 Kc4 40. g5 b5 41. h4 b4 42. h5 b3 43. g6 hxg6+ 44. Kxg6

White keeps the h-Pawn hoping for a draw if it can reach the seventh.

44...b2 45. h6 b1=Q+ 46. Kg7 Qg1+ 47. Kh8 Qd4+ 48. Kg8 Qd5+ 49. Kh8 Qf7 50. h7 Qf8# 0-1

Hewson, BWR - Barker, E, Devon vs. Dorset, 1993

White has just played 38. Kg5: what result?

White's King manoeuvre was aimed at avoiding a situation where Black having lost or exchanged the Bishop, Black would have a series of sacrificial checks with the Rook, threatening stalemate if the Rook were captured. However, here White's flag fell! — but Black immediately showed great sporting spirit by offering a draw, being in virtual zugzwang.

1/2-1/2!

Hewson, BWR - Webb, RM (203), Devon vs. Hants., 1990

[A fine win against a strong opponent – DR]

@Game Hill,D - Lingham,RH, Exeter Chess Club Ch'p Playoff, 1991

Open warfare

I first joined Exeter Chess Club in 1977 — it felt like defecting, as for the previous three years I'd been playing for Exeter University and the Exeter Club were our main rivals in the Bremridge Cup. During the early 'eighties, club nights clashed with my other interests — my duties as ragtime pianist at the Crown and Sceptre. It was always a struggle for me to play my club championship games but I nearly always made it, even though I wouldn't be surprised if I held the record for being runner-up the most times. Eventually, my turn came and I won the club championship at the 14th attempt!

In 1991, I tied for first place with Daniel Hill and we had to contest a two-game playoff. Here is the first game, in which some slightly risky play effectively clinched the championship for me since the second game was a far less eventful draw. — RHL

Two Knights' Defence

1. e4 e5 2. Nf3 Nc6 3. Bc4 Nf6 4. d3 d5

[4... Be7 first is more solid, but I was determined to play as open a game as possible.]

5. exd5 Nxd5 6. O-O Be6!?

A move suggested by Purdy (according to Harding/Botterill "The Italian Game"). I thought I'd try it out because I've always quite fancied Joanna Lumley, and anything she suggests is OK by me. Her partner in the Avengers was Gambit, wasn't he? There you are, then!

7. Re1 Bd6 8. Ng5 O-O 9. Bxd5?

This seems dubious, White can still force the doubling of Black's e-Pawns after the next move, but it's not worth the weakening of White's own d4 square.

9... Bxd5 10. c4 Be6 11. Nxe6 fxe6 12. Be3 Bb4 13. Nc3 Qh4

14. Ne4

Superficially it appears that Black cannot take the Rook on e1 because of the threat to the Queen, but Daniel had overlooked Black's 16th move which forces a draw at least.

14... Bxe1 15. Bg5 Bxf2+ 16. Kh1 Be1! 17. Kg1!

The only move! I could now have forced a draw by repetition after ...Bf2+, so I also had an opportunity to spend some time analysing my next move with the luxury of having the draw to fall back on.

17... Rf1+!

Going for the win. Black will get three Pawns and attacking chances for the piece, and anyway White might take the Bishop with the wrong piece.

18. Kxf1 Qxh2 19. Qxe1

The wrong piece!

[19. Kxe1 must be played, when Black answers with 19... Nd4 White probably has to go in for 20. Kd2 Qxg2+ 21. Kc3 when the game is very much alive.

Unfortunately the game choice loses instantly.]

19... Rf8+ 20. Nf2

Of course not

[20. Ke2 Qxg2+ 21. Ke3 [21. Kd1 Rf1] 21... Rf3# but the only way to stave off mate is something like]

[20. Bf6 gxf6 21. Qf2 Qh1+ 22. Qg1 Qxg1+ 23. Kxg1 when Black emerges with Pawns enough for the ending.]

20... Nd4 0-1

Mate by ...Qh1 is unavoidable.

In 1995 I decided to take an extended break from chess to concentrate on my musical activities. Who knows, I might yet make a comeback!

@Game Karlsson,ÅS - George,IM, Torbay Open (1), 1994

Visited by Vikings

It may not be generally known that Iceland boasts more strong players per head of population than any other nation on earth. We certainly felt some of its force when Ågust Karlsson, currently President of the Icelandic Chess Federation, visited Exeter as a postgraduate law student in 1993-94. While here he contributed not only to the strength of the club but also was generous in giving of his time to our weekly coaching sessions, and arranged for a six-player team to make a flying friendly visit. We have since played a team consultation match against Ågust and his colleagues over the internet, courtesy of the facilities of the British Internet Chess Server and of Exeter University.

Here is Ågust powering his way to third place behind Nunn and Summerscale in the strong Torbay congress of 1994 — DR

[Notes by DR]

Puzzle page: Find the continuation for Dave Regis

Dave co-ordinates the weekly coaching sessions held at the club, where through mutual support and discussion we hope to lift our chess by our collective bootstraps. The notes to the sessions are published on the Internet where they have attracted favourable comment from around the world.

To give yourself some pointers as to how to improve, we wondered if readers would like to take on this set of three puzzles, taken from the files of our chief coach.

Puzzle 1

Jackson (Plymouth) — Regis (Exeter), 1993

Black seems further ahead with the Queen's-side attack than White is on the other side.

What would you play as Black here?

Puzzle 2

Regis (Exeter) — Walton (Teignmouth), 1996

White to play has levered open the Black King's-side by a piece sacrifice.

Can you find a decisive line for White here?

Puzzle 3

Bellers — Regis, Exeter Club Championship, 1996

While White's major pieces are at play on the Queen's-side, Black has an opportunity to make mischief on the other side of the board. But watch out, the Queen's *en prise*

Solutions:

Puzzle 1 : Black could have played here the stock mate **1...Qxa2+ 2. Kxa2 Ra6+ 3. Kb1 Ra8#** . Instead he played **1...b4** and eventually drew... poor captain Brian Hewson nearly yelped in dismay.

Puzzle 2 : White missed exploiting a pin with **1. Qh5+ Kg8 2. Qg4+** , and instead recovered the piece with **1. Qh5+ Kg8 2. Bxe6+** . I think everyone on the neighbouring boards had spotted the first line, but sadly the attack petered out... and Black even won.

Puzzle 3 : Black was distracted by the hanging Queen and actually sacrificed the Bishop on g3, which maybe should have won but Black went astray and lost... much to White's relief who was gloomily analysing the decisive **1...Re3** threatening mate in two.

Of course, **Puzzle 4** is: why does Dave bother?

@@Game Spiegel,J - Blackmore,M, East Devon Major (5), 1996

Opening the f-file

Mark has a vigorous and enjoyable style both with the pen and with the f-Pawn. We have used a press release or two from Mark elsewhere; here is the last-round game which brought him overall first place in our local Major tournament. — DR

Hungarian Defence

1. e4 e5 2. Bc4 Nc6 3. Nf3 Be7

[3...Nd4 Blackburne's Shilling Gambit was tempting, but with £150 at stake I felt it wasn't really the game.]

4. d3

[4. d4]

4...Nf6 5. Be3 O-O 6. c3 d6 7. Nbd2 Be6 8. O-O h6 9. Qe2 Bxc4 10. dxc4

Some people would say that this move is an intelligent attempt to induce strategic weaknesses in my position. I, however, would say that this move is a pile of pants.

10...Nh7 11. Rad1 f5

Hey, I never claimed to be subtle.

12. exf5 Rxf5 13. Ne4 Qc8 14. c5 Qe6 15. cxd6 cxd6 16. c4 Rf7

So I can play ...Nf6 without stranding my Rook.

17. Ne1

[Impertinent note from typesetter: White starts to drift. He should pick a plan and go for it hard. This is what Black did, and is why Black won.]

17...Nf6 18. Nc3 Raf8 19. Nd5 Ng4

Viking Chess!

20. Nxe7+ Rxe7

[20...Nxe7]

21. Nf3 Ref7

It's hard not to laugh at my transparency, but at the same time route one seems to be fairly effective. Spiegel, certainly, looked anxious at this point.

22. b3 Nxe3 23. Qxe3 Rf4

He offered me a draw at this move. I politely declined.

24. Rd5 Qg4 25. Ne1 e4

The final insult. White's whole plan has been based around winning my d-Pawn, and I don't even have the decency to defend it.

26. Qg3?

[Still, 26. Rxd6 is probably the best move! — DR]

26...Qe2! 27. Qc3 Rxf2 0-1

And that was that.

@Game Blackmore,M - Pittman, East Devon Major, 1996

Urgent measures

From the same tournament, Mark shows some of the fighting spirit that has seen him leap up the grading list these last three years. — DR

French Defence, Advance Variation

1. e4 e6 2. d4 d5 3. e5 c5 4. c3 Nc6 5. Nf3 Qb6 6. Bd3 Bd7 7. Bc2 h6

To prevent Ng5 after ...O-O-O.

8. O-O O-O-O 9. a3 g5 10. b4?

Oops. I spent ages working out why Pittman couldn't play ...Nxd4 after ...g4, Ne1, completely forgetting that he could play ...Qxd4 instead and my Rook is hanging. Desperate measures are now required.

10...cxd4 11. cxd4 g4 12. b5

[12. Ne1 Nxd4? [12...Qxd4!] 13. Be3]

12...Na5 13. Ne1 Bxb5 14. Bd3 Qxd4 15. Qc2+ Bc4

Letting me off the hook.

[15...Nc4 stops Bb2]

**16. Bb2 Qc5 17. Nd2 Kb8 18. Rc1 Rc8 19. Bxc4 Nxc4 20. Nd3 Qc7
21. Qa4?!**

21...Nxb2

[21...Nxd2 may have been better]

22. Nxb2 Qd8 23. Nd3 Rxc1 24. Rxc1 h5

Even with two extra Pawns, Black now looks distinctly unhealthy. Still, the choice was fairly stark: win it now, or get stuffed in the endgame.

25. Nb3 Ne7 26. Nbc5 Nc8

I could hardly sit still at this point. Cheapo ahoy!

27. Nd7+ Ka8 28. Rxc8+ Qxc8 29. Nb6+ Kb8 30. Nxc8 Kxc8 31. Qe8+ 1-0

More luck than judgement, admittedly.

[...but there were some grown-up decisions taken to throw the game out of a particular 'natural' continuation — DR]

@@Game Alexandrowicz,S - Hill,D, National Club Championships, Intermediate Cup Final, 1996

The Margin of the Draw

A nail-biting finish to our Intermediate National Club final. We had a great time travelling to away matches and on the way back drinking toasts to our victories. The night before the final was played we all went out to celebrate Devon's victory in the County U150 competition, which we had all played in. And just before the start of the Final game, Ian Taggart changed into his lucky chess socks... — DH

English/Catalan

1.c4 e6 2.g3 d5 3.d4 Nf6 4.Nf3 c5 5.e3 Nc6 6.Nc3 Be7 7.Bg2 0–0

[7...cxd4 8.exd4 0–0 9.0–0 b6=]

8.b3 Re8

[8...b6 is probably better.]

9.0–0 Bf8!? 10.Bb2 b6 11.cxd5 exd5 12.Re1 Bg4 13.h3 Bf5 14.Nh4 Be4 15.f3 Bg6 16.Nxg6 hxg6 17.Qd2 Rc8 18.Rad1 Na5?!

[18...Bd6]

19.dxc5 Bxc5 20.Na4 Bd6 21.f4 b5 22.Bc3 bxa4 23.Bxa5 Qd7 24.Bxd5 Nxd5 25.Qxd5 Qxh3 26.Kf2

[26.Qxd6 Qxg3+ — Draw by repetition.]

26...Bc5 27.Rd2 Bb6

Playing safe. Although I was tempted by Bxe3.

[27...Bxe3+ 28.Rxe3 Rxe3 29.Kxe3 Qxg3+ 30.Ke2 (30.Qf3? Re8+–+) 30...Rc1 31.

Rd3 (31.Rd1 Qg4+ 32.Ke1 Qg1+ 33.Ke2 Qg4+ 34.Ke1=) 31...Qh2+ 32.Ke3 Qg1+ 33.Ke4 Qg2+=]

28.Bxb6 axb6 29.Rh1 Qe6 30.Qxe6 Rxe6

At this stage the match was very much alive. Richard Towers had won, but Mark Abbott had lost. Iain Taggart's position looked dodgy, but Steve Webb was a Pawn up in his game.

31.Kf3 axb3 32.axb3 f6 33.Rd3 Rce8 34.Rc1 R8e7

At about this stage Iain Taggart lost, despite the socks. We were 2–1 down, but Steve Webb had the better position in his game. I offered a draw, knowing that on board count Rose Forgrove would lose if Steve won his game. My opponent probably also realised this, and so decided to play on.

35.Rc8+ Kf7 36.Rb8 f5 37.b4 g5 38.fxg5 Kg6 39.b5 Kxg5 40.Rc8?

[40.Rb3 must be played in order to avoid losing material.]

40...Re5 41.Rc6 Rxb5 42.Rdd6

My King looks vulnerable and I could see Richard and Mark grimacing at my position — but I felt I knew what I was doing...(well, kind of..)

42...Rb3 43.Rg6+ Kh5 44.Kf4

The best move..

44...Rb4+ 45.Kxf5 Rf7+ 46.Ke5 Re7+ 47.Rce6?!

White must endeavour to keep both Rooks on the board.

[47.Kd5 Rg4 48.Rxg4 Kxg4 49.Rxb6 Kxg3 50.Re6 Rxe6 51.Kxe6 Kf3 52.Kf5 leads to a draw.]

47...Rxe6+ 48.Rxe6 g5 49.Kf5 Rb5+ 50.Re5 Rxe5+ 51.Kxe5

Now it's won for Black, but there is still some playing to do...

51...Kg6! 52.g4 b5 53.Kd5 Kf6 54.e4 b4 55.Kd6 b3 56.e5+ Kf7 57.Kd7 b2 58.e6+ Kf6 59.e7 b1Q 60.e8N+

[60.e8Q Qb5+ 61.Kd8 Qxe8+ 62.Kxe8 Ke5 63.Ke7 Kf4 64.Kd6 Kxg4 65.Ke5 Kf3]

60...Ke5 61.Ke7 Qb7+ 62.Kf8 Kf4 63.Nf6 Qc6 64.Kg7 Qxf6+

[Notes by Dan Hill]

BCF Team Championships, 1996: Intermediate final

| | | |
|-----------------|-------------|------------------------|
| Exeter | vs. | Rose Forgrove, Leeds |
| D Hill (142) | 1-0 | S Aleksandrowicz (149) |
| I Taggart (145) | 0-1 | AG Williamson (147) |
| S Webb (146) | 1/2-
1/2 | M Round (145) |

| | | |
|----------------|-----|-------------------|
| R Towers (143) | 1-0 | IM Thackray (137) |
| M Abbott (139) | 0-1 | T Wheldon (129) |

Exeter won on board count, and Ian never wore his socks again.

@@

Just Another Year: The Exeter Chess Club Championship, 1996-1997

— *The self-effacing Mark Blackmore, in the **Express & Echo** , Summer 1997,*
with a nod to the events of the same season's football league.

"This year's club championship was an exceptionally tense, clenched affair with that remained in the balance right to the final round.

There were eight or nine players with a good chance of taking the title, so it was all to play for as they got under starter's orders and stepped into the ring for the kick-off.

Round ONE

Defending Champion Daniel Hill makes a shaky start, narrowly defeating dark horse Steve Homer, who misses a mate in four. Wins also for Chris Bellers and Peter Tart, while Dave Regis cruises home against Jim Rosseinsky. If Exeter's club championship was the Premiership, Dave would be Arsenal, all solid strategy and defensive know-how.

TABLE: Bellers 1; Hill 1; Tart 1; Regis 1

Round TWO

First win for Peter Lane, who hands out a sound thrashing to Mark Blackmore. Peter Lane is Liverpool, better than anybody on this day, but prone to something approaching disinterest. Meanwhile, Chris Bellers, Daniel Hill and Peter Tart, while Dave Regis slips up on Steve Homer. There is a second draw for Andrew Pickering who is yet to get into gear.

TABLE: Bellers 2; Hill 2; Tart 2; Lane 1 1/2.

Round THREE

Andrew Pickering puts his first win on the board, beating Miro Popavac with minimal effort. Two clashes of titans: Dave Regis survives Peter Tart's attack to put himself back into it, while Chris Bellers drops a tight endgame to bookies' favourite Daniel Hill. Chris is like Chelsea, erratic and unpredictable, playing a game with which the English are unfamiliar.

TABLE: Hill 3; Regis 2; Tart 2; Pickering 2; Lane 2; Bellers 2.

Round FOUR

The Dave Regis recovery continues with a good win over Peter Lane. Chris Bellers falls into a slump, while Peter Tart, who is Newcastle, potentially lethal in attack but needing a big defender, hands out a sound thrashing to Mark Blackmore. Daniel Hill and Andrew Pickering draw quickly in a Caro-Kann, not really testing each other and disappointing the crowd.

TABLE: Hill 3 1/2; Tart 3; Regis 3; Pickering 2 1/2.

Round FIVE

Sadly for Daniel Hill, his season now turns into that of Blackburn Rovers, slump following championship. His loss to Peter Tart in a Max Lange is the sensation of the round. Andrew Pickering creeps stealthily on with another win, while Chris Bellers and Peter Lane soldier on manfully. Dave Regis slips and is Bellers' victim after making progress as Black.

TABLE: Tart 4; Hill 3 1/2; Pickering 3 1/2; Lane 3, Bellers 3; Regis 3.

Round SIX

Dave Regis' defeat of Bob Lee comes just a fraction too late to matter. Too late also for Chris Bellers, who hands out a sound thrashing to Mark Blackmore. Once again, if this championship was the Premiership, Mark would be Exeter City. Peter Lane plays a lovely attacking game against Daniel Hill, who misses his chance to tie for the title. In the deciding game, Peter Tart needs only a draw to win the competition, but it proves one hurdle too many against Andrew Pickering. Andy, then, is Manchester United, edging away with it at the end of the season.

FINAL TABLE: Pickering 4 1/2; Bellers 4; Lane 4; Regis 4; Tart 4; Hill 3 1/2.

Andy's best game was possibly his Round 5 slugfest with Steve Homer: see below ."

@Game Lane,PCR - Heath,C, Exeter Club Championship (1), 1993

Research

I arrived in Exeter as a post-graduate student to do research towards a PhD. This was my first game in the club, and that against a one-time club champion. Luckily, I had seen Chris play the Modern Benoni in a county match, and so looked up the sharpest variation... — PCRL

Modern Benoni, Taimanov Variation

1. d4 Nf6 2. c4 c5 3. d5 e6 4. Nc3 exd5 5. cxd5 d6 6. e4 g6 7. f4 Bg7 8. Bb5+ Nfd7 9. a4 O-O 10. Nf3 Na6 11. O-O Nc7

[11...Nb4 also 12. Re1 a6 13. Bf1 with Be3-f2 and e5 is also good for White.]

12. Be2 b6

of course, 12... a6 13. a5 blocks the Q-side.

Now White needs a plan for forcing e5, perhaps Be3-f2 as in the line above. Instead, I play a move more relevant in a different position!

13. f5?! Ne5 14. Nxe5

[14. Bg5 is not possible, and so White has to struggle against e5.]

14...Bxe5 15. Bf4 Qe7 16. Qe1 Bd7 17. Qg3 Rfe8 18. h4 a6

Black can afford to wait.

19. Bg4

I try to swap the light-square Bishops

[19. h5? 19...Bxf4 20. Rxf4 g5 and ...f6, and White is losing]

19...Rad8 20. Rf3 Bxf4

White was planning Qf2-Raf1 and an attack down the f-file, hence Black must exchange some pieces.

21. Qxf4 Qe5 22. fxg6

22...Qxf4?

better is [22...fxg6 23. Qf7+ Kh8 24. Bxd7 and Black regains his piece by 24...Re7 25. Qf6+ Qxf6 26. Rxf6 Rexd7 with a good endgame. Play might continue: 27. e5 dxe5 28. Rxb6 a5 when White's Pawns are weaker]

23. gxh7+ Kxh7 24. Rxf4 Bxg4 25. Rxg4 Rg8 26. Rxg8 Rxg8

White has managed to gain a won endgame from Black's blunder. Black can play on the weak e-Pawn, and try for Q-side counterplay, but with few hopes of success against a careful White.

**27. Rf1 Kg6 28. h5+ Kg7 29. Rf4 Rh8 30. g4 Ne8 31. Nd1 f6 32. Kg2 b5
33. axb5 axb5 34. Nc3 Nc7 35. Kg3 b4 36. Nd1 Nb5 37. Ne3 Nd4 38. Rf2
Re8 39. Kf4 Rc8 40. Nc4 Nb5 41. Rf1 Ra8 42. Rh1 Ra7 43. h6+ Kg6 44. h7
Rxh7 45. Rxh7 Kxh7 46. Kf5 Kg7 47. Ke6 Kg6 48. Kd7! 1-0**

[48. Nxd6?? Nxd6 49. Kxd6 c4 and Black wins!]

@Game Lane,PCR - Einarssen,EK, Exeter vs. Hafnarfjörður, Friendly club match 1995

A direct attack

My Modern Benoni preparations came into use again 18 months later, when we played a match against a visiting side from Iceland. — PCRL

Modern Benoni, Taimanov Variation

1. d4 Nf6 2. c4 c5 3. d5 e6 4. Nc3 exd5 5. cxd5 d6 6. e4 g6 7. f4 Bg7 8. Bb5+ Nfd7 9. a4 O-O 10. Nf3 Re8

Not a good move. To capture the Pawn, Black would give up his Bg7 and seriously weaken his K-side, and so the Nd7 is needlessly pinned.

[Better is 10...Na6]

11. O-O Na6 12. f5!

without Ne5, Black will end up cramped. White's attack looks good.

12...Nb4 13. Bg5 Qc7

[13...f6 14. Bf4 a6 15. Bc4 Ne5 16. Nxe5 fxe5 17. Bg3! leaves White a promising game: the Bg7 is blocked in, the King's-side Pawns look loose, and ...b5 is not playable.]

14. f6 Bf8 15. Qd2 Qd8 16. Bh6 Qxf6

[16...Bxh6 17. Qxh6 Qxf6 18. Ng5 Qg7 19. Qxg7+ Kxg7 20. Rxf7+ Kh6 21. h4 and White threatens to win a piece on d7 and mate on h7.]

17. e5

17...Rxe5

[17...Bxh6 18. Qxh6 Qg7 19. Qxg7+ Kxg7 20. Ng5 also wins comfortably]

[17...dxe5 18. Ne4 Qb6 19. Bxf8 Rxf8 20. Bxd7 Bxd7 21. Nxe5 with Qh6 and Nf6 +]

18. Nxe5 Bxh6 19. Rxf6 Bxd2 20. Nxd7 a6 21. Nb6 1-0

Exeter Chess Club: 100years\100y_152.htm

@@Game Brusey,A - Lane,PCR, Teignmouth vs Exeter, 1996

French poetry

Although Exeter are **of course** the stronger side, we have had the embarrassing experience of being routed convincingly by Teignmouth in successive years in the first round of the National Club Championship (Major section), and can only point glumly to our better record in the Devon League.

Alan Brusey has led the irrepressible first team of Teignmouth Chess Club for several years. — DR

French Defence, Advance Variation

1. e4 e6 2. d4 d5 3. e5 c5 4. c3 Nc6 5. Nf3 Bd7 6. a3 c4 7. Nbd2 f6 8. Be2 fxe5 9. Nxe5 Nxe5 10. dxe5 Qc7 11. f4

White has mishandled the opening. White tends to exchange on f6 and c5 in this line, but if he allows Black to exchange on e5, it is better to retain the

Knights. White is playing for a space advantage, and wants Black's pieces to tread on each other's toes. The last move is poor, opening up the dark squares.

11...Bc5 12. Nf3 Ne7 13. Nd4 Qb6 14. Bg4 O-O 15. a4

White is totally tied up, and is virtually reduced to King moves if he wants to maintain his Pawns!

15...Bxd4 16. Qxd4 Qxd4 17. cxd4 Nc6 18. Be3 Nxd4

19. Bd1 The opening has led to an endgame with a Pawn plus for Black.

19...Nc6 20. O-O b6 21. Bf3 Nb4 22. Bd1 Nd3 23. Ra2 Rf7 24. g3 Raf8 25. a5 bxa5 26. Rxa5 Nxe5 27. Rxa7 Nc6

28. Rc7

The position has clarified, and White has a weak b-Pawn to add to his woes. Black's plan is simple, to advance the d-Pawn. It is notable that the Knight's mobility makes it the equal of at least one of the Bishops!

28...Rc8 29. Rxc8+ Bxc8 30. Ba4 Nb4 31. Bd4 Rb7 32. Re1 Nd3 33. Re2 Kf7 34. Bc6

A small mistake: 34. Bc2 would indirectly attack the Pawn on h7, and defend the Pawn on b2, e. g. 34...Nxb2 35. Bxb2 Rxb2 36. Bg6+

34...Rc7 35. Ba4 h6 36. Bb6 Rb7 37. Bd4

Around here, my opponent offered a draw. White has managed the best with his Bishops, but Black's preparations are now finished, and by withdrawing his Knight to c6, he will threaten the advance of the d- Pawn.

37...Bd7 38. Bc2 Nb4 39. Bb1 Nc6 40. Be5 Nxe5 41. fxe5 c3

A little tragic, but White's position was untenable. Black might further prepare the advance of his Pawns with Kf7-e7 and Be8-g6.

**42. Rf2+ Ke7 43. Bg6 Rxb2 44. Rxb2 cxb2 45. Kf2 Be8 46. Bc2 Ba4
47. Bb1 Kd7 48. Ke3 Kc6 49. Kd4 Kb5 50. Kc3 Kc5 51. Kxb2 Kd4 52. Bg6**

Every French-player's dream: the e6 and d5 Pawns with the light square Bishop carry the day!

**52...Kxe5 53. Kc3 Bd1 54. Kd3 Bg4 55. Bf7 Bf5+ 56. Kd2 Kd4 57. h4 e5
58. Bh5 e4 59. g4 e3+ 60. Ke1 Bd3 61. g5 Kc3 62. gxh6 gxh6 63. Be8 d4
64. h5 Bc4 65. Bc6 d3 66. Bf3 d2+ 0-1**

@Game Hewson,BWR (Tiverton) - Lane,PCR, 1996

Endgame battle

Brian was our esteemed President and Captain of the first team from the early 1980s until 1996, when he retired to take up membership of Tiverton Club (which was nearer his home). And so it came to pass that Peter found himself facing his former captain with the Black pieces... — DR

French Defence, Rubinstein Variation

1. d4 e6 2. e4 d5 3. Nc3 dxe4 4. Nxe4 Qd5 An on-the-spot decision to avoid any preparation of my opponent! **5. Nc3 Bb4 6. Qg4**

Black has some problems here. After the game I decided that Black could get a good position by

[6...Ne7 7. Qxg7 Rg8 8. Qe5 [8. Qxh7? Rxg2!] 8...Nc6 9. Qxd5 Nxd5 10. Bd2 Nxd4 11. O-O-O Nxc3]

But at the time I decided Black must play:

6...Kf8 7. Nf3

[7. Bd2 would force 7...Bxc3 8. Bxc3 and a superior position for White.]

7...Nf6 8. Qf4 Qe4+ 9. Qxe4 Nxe4 10. Bd2 Nxc3 11. Bxc3 Bxc3+ 12. bxc3 b6

13. Ne5 Nd7

Black has prospects of attacking the d4-c3-c2 cluster, for example, after ...c5: dxc5 leaves doubled Pawns, but if ...cxd4:cxd4 Black can use his Rooks on the c-file, jumping over to a2 as appropriate. White's attempt to gain play against f7 leaves e5 as a further weakness.

14. f4 Nxe5 15. fxe5 Ke7

[15...Bb7 restraining White's Bishop was possible, but I wanted the option of Ba6 if White should play c4.]

16. Bc4 Bb7 17. O-O c5 18. Rf2 Be4 19. Raf1 Rhf8

Black begins his counterplay. ...Bg6 was not playable, due to g4-h4- h5 making it a target. The Bishop's role is an aggressive one. Black's threat is ...Rac8...cxd4 and if Bb3/b5 the Bishop is lost or locked out of the game, hence White's next.

20. dxc5 Rac8 21. Rf4 Bxc2 22. cxb6 axb6

23. Rc1

[23. R1f2 Bg6 24. Rb2 Rc5 25. Rxb6 Rxe5 26. Rb7+ Kd6 is similar to the game, though White looks more active. Black's Pawns are safe, and his King active, which makes the a- and c-Pawns vulnerable.]

23...Bg6 24. Bf1 Rc5 25. Rb4 Rxe5

Probably a mistake, 25:...Rb8 was strong, if:

26. c4 [26. Rb5 Rxb5 27. Bxb5 Rd8 and ...Rd2 harasses the Pawns] 26...Rxe5 27. c5 Rc8 28. Rxb6 Rexc5 29. Rxc5 Rxc5 and ...Rc5-c1-a1 is winning for Black.

26. Rxb6 Ra8 27. Rb7+ Kf6 28. Bc4 Rc5 29. Bb3 Rac8 30. c4 R8c7 31. Rxc7 Rxc7

32. Re1 Ke7

White should now play his Rook to d1, and centralise his King. Instead he allows the enemy King into his Queen-side, which is fatal.

33. Kf2 Kd6 34. Rd1+ Kc5 35. Ke3 f6 36. Rd8 e5 37. Rd5+ Kb4 38. Kd2 Be8 39. Kc2 Bc6 40. Rd2 Be4+

Fortunately missing: 40...Bb5 "winning a Pawn": 41. a3+ Kxa3 42. Kc3 and 'mate!

41. Kb2 Bc6 42. g3 e4 43. Rf2 Rd7 44. a3+ Kc5 45. Re2 f5 46. Kc2 g5

47. Rf2 Rf7

Black is now clearly winning, but there was no easy way for White to stop the Pawns.

48. Kc3 f4 49. gxf4 gxf4 50. Bc2 e3 51. Re2 Bf3 52. Re1 Bh5 53. Bd3 Re7 54. Rb1 e2 55. Kd2 f3 56. Ke1 Kd4 57. c5 Ke3 58. Bxe2 f2+ 59. Kf1 Bxe2+ 60. Kg2 Rg7+ 61. Kh3 f1=Q+ 62. Rxf1 Bxf1+ 63. Kh4 Kf4 64. c6 Rc7 1-0

@Game Hill,D - Lane,PCR, Exeter Club Championship (6), 1997

Theme and variations

This was my best game of the season. It was a thematic game for the Black side in the Tarrasch system. White's premature Queen-side play was met by direct central action (16...e5!) leading to a King's-side demolition. The attack builds out of the co-ordination of Black's pieces, using the open f-file and new-found freedom of his (bad) Bishop (Bh3-g4), hounding the defenceless White King. — PCRL

French Defence, Tarrasch Variation with 3...Nf6

1. e4 e6 2. d4 d5 3. Nd2 Nf6 4. e5 Nfd7 5. Bd3 c5 6. c3 Nc6 7. Ne2 Qb6 8. Nf3 cxd4 9. cxd4 f6 10. exf6 Nxf6 11. O-O Bd6 12. Nc3 O-O

13. a3

Played after a long think. White decides to move away from established lines. (I was slightly surprised Dan hadn't prepared something here. He said he didn't want

to play the main line, 13.Bg5, which I had encountered the month before.)

13... Bd7 14. b4?!

Too early! This kind of Queen-side play is only possible after White has secured the centre, e.g.

[14. Be3 Be8 15. Ng5 Ne7 16. Kh1 Bc7 17. b4 Nf5]

14... Kh8 15. Na4 Qc7 16. Bb2

[16. Be3 e5 is still strong for Black. If]

[16. b5 Ne7 17. Bb2 Ne4 18. Rc1 Qa5 and White has many weaknesses.]

16... e5!

Black always gains at least equality with this move.

17. dxe5 Nxe5 18. Nxe5 Bxe5 19. Bxe5 Qxe5 20. Nc5?

The decisive mistake. Strange to say, but

[20. Ra2 covering f2 was perhaps best. when 20... Ng4 21. g3 Qh5 22. h4 the Nf3 and Bb2 22... Qf7 with Ne5-f3 etc is promising]

Looking at the position, we see that Black has won the fight for the e5 square, and exchanged off White's best pieces. The remaining White pieces are uncoordinated, and, in particular, his King looks naked.

20... Ng4

After 45 minutes thought! I felt White should be punished for abandoning the centre and King's-side, and indeed Black's attack now seems to win from here.

21. g3

21... Nxf2! 22. Rxf2

White could have tried:

[22. Nxd7 Qd4 23. Rxf2 Rxf2 24. Kh1 Qe3! as far as I saw: if 25. Nc5 [

25. Bc2 Qh6 26. h4 Qe6 27. Kg1 Qe3

] [

25. Bb1 Re8

] 25... b6 26. Nb3 [

26. Qh5 Qf3

+] 26... Raf8 27. Rc1 [

27. Bf1 Rxf1

+ with a won ending] 27... Rxh2+! 28. Kxh2 Rf2+ 29. Kh3 Qh6+ 30. Kg4 Qe6+ 31. Kh4 Rh2+ 32. Kg5 h6+ 'mate. . . By deflecting the White Knight, Black has time to construct a mating attack involving a further sacrifice. Note that none of White's pieces can help stave off the remaining Black Queen and Rook.]

22... Rxf2 23. Kxf2

[23. Nxd7 Qe3 24. Kh1 Rd2! which I also saw]

23... Bh3!

This 'quiet' move cost most of my 45 minutes. The Bishop covers the holes in the King's-side, and threatens two big checks. Neither alternative promises much:

[23... Qb2+ 24. Qe2 Qxa1 25. Nxd7]

[23... Rf8+ 24. Kg2]

24. Be2

[24. Kg1 then 24... Rf8 anyway]

[24. Ra2, to cover the second rank, is toughest. The trick again is for Black to upset the White Knight, and threaten both 'mate and to pick up material. In this line, though, immediate checkmate can be prevented by White:

e.g. 24... Rf8+ 25. Kg1 Qe3+ 26. Kh1 b6

[27. Na4 , then 32. ... Qd1+xa4] or if

[27. Nb7 Qe7 28. Ba6 Qe4+ 29. Kg1 Qe3+ 30. Kh1 Rf2 31. Rxf2 Qxf2 32. Qxd5

[32. Bf1 Bg4]

32... Qe1+ 33. Bf1 Qxf1#] This leaves:

27. Nb3!? I thought this might be a save, but 27... Rf2 28. Rxf2 Qxf2 29. Be4! Bg4! 30. Qg1 Bf3+ 31. Bxf3 Qxf3+ 32. Qg2 Qxb3 and Black wins the ending!]

24... Rf8+ 25. Kg1

Also losing are:

[25. Ke1 Qe3 and]

[25. Bf3 Bg4 (I calculated these and as far as 26. ... Qf2 before playing 20. ... Ng4.)]

25... Qe3+ 26. Kh1 Rf2 27. Qxd5 Qxe2 28. Rg1 Bg4! 0-1

@@Game Homer,S - Pickering,A Exeter Club Championship, 1997

On the edge of victory

"In the deciding game, Peter Tart needs only a draw to win the competition, but it proves one hurdle too many against Andrew Pickering. Andy, then, is Manchester United, edging away with it at the end of the season.

"Andy's best game was possibly his Round 5 slugfest with Steve Homer." — MB

Caro-Kann, Advance Variation

1.e4 c6 2.d4 d5 3.e5 Bf5 4.Nc3 e6 5.g4!?

A signal of intent, certainly, but perhaps a little over-zealous.

5...Bg6 6.Nge2 Ne7 7.h4 h6 8.Be3 Nd7 9.h5 Bh7 10.f4 c5

An attacking race, then, with neither side looking to have a good place to castle.

11.Qd2 Nc6 12.O–O–O c4 13.f5 Qa5 14.fxe6 fxe6 15.Nf4 Nb4

Now it hit the fan. Last chance to bottle it.

16.Nxe6 Bxc2 17.Nxd5 Qxa2

They did not chicken out! But Black's threats are more immediate.

18.Ndc7+ Kf7 19.Qf2+ Kg8 20.Bg2 Qb1+ 21.Kd2 Bxd1 22.Rxd1 Qd3+ 23. Ke1 Nc2+

White now has to give up his Queen.

24.Qxc2 Qxc2 25.Nf4 Bb4+ 26.Bd2 Bxd2+ 27.Rxd2 Qc1+ 28.Ke2 Nb6 29. e6 g5 30.hxg6 Kg7 31.d5 Raf8 32.Nh5+ Kxg6 33.e7

This looks dangerous, but Black now calmly deals with the problem, cool as the Fonz.

33...Rf2+ 34.Kxf2 Qxd2+ 35.Kg3 Qe3+ 36.Bf3 Qxe7 0-1

@Game Earle,S - Havill,E, Exeter School vs. Exeter Juniors, 1997

The Next Generation

Part of the more recent activities of the club has been the re-establishment of a junior wing. The juniors have yet to win anything, but we like to think that they have inherited some of the friendly spirit of the parent club.

Here is Esme Havill on the **qui vive** ; Esme often has to be physically restrained from sacrificing on f7, but there is no doubt that she has realised that the aim of the game of chess is to mate the opposing King. — DR

Ruy Lopez, Cordel Defence

1. e4 e5 2. Nf3 Nc6 3. Bb5 Bc5 4. O-O Nf6 5. Bxc6 dxc6

[5...bxc6 6. Nxe5 O-O]

6. b4 Bxb4 7. c3 Bc5 8. d4 exd4 9. cxd4 Bb6 10. Qd3 O-O 11. Ba3

11...c5

[11...Re8 might be preferred, leaving the c-6 Pawn restraining d4-d5; the text move while striking at the centre may be met by 11...c5 12. D5 when the Bishop is stuck behind the Pawn]

12. Nc3 Be6 13. Rfe1 c4

[now 13...Re8 is better met by 14. d5 c6 15. d6]

14. Qd2 c5

This just gets the Bishop stuck again.

[14...Re8]

15. d5 Bg4 16. e5 Bxf3 17. gxf3 Nh5

18. e6

The right idea but too early; youthful enthusiasm is hard to suppress.

[18. Rad1]

18...fxe6 19. Rxe6 Rxf3

Suddenly Black has some counterplay on the King's-side.

20. Rae1

20...Qd7

[20...Qh4 21. Ne4 [21. Qe2 Qg4+ 22. Kh1 Nf4] 21...Nf4]

21. Kg2 Qf7 22. R1e3

22...Nf4+!

[22...Rf8 23. Re2 Qf5]

23. Kxf3 Nxe6+ 24. Ke2 Nd4+ 25. Kf1

25...Qh5

[The perennial juniors' failing is to neglect to bring up the reserves, so I would have preferred to see 25...Rf8. Another idea is 25...Qf5 threatening the fork 26...Nc2 27. Re2 Nxa3]

26. d6 Nf3 27. Qe2?? Qh3#

0-1

@@

Postscript: The cultural politics of chess

Chess has an unfortunate social stigma that follows it around like a bad smell, under which we acolytes suffer. Oh, how we suffer! One of my friends leads a furtive double life, telling no-one of his secret chess activities. Another declares his chess proudly to anyone who will listen, daring them to object.

Defending chess as a hobby can be awkward. Claiming that we are just ordinary people, not sad single Woody-Allen lookalikes, has a desperately defensive air about it (" *No, wait, I like football and girls too!* "). And the actual game is nothing short of intellectual masturbation. As far as I am concerned anyone buying a book on opening theory should have it given to them in a brown paper bag, no two ways about it.

Chess is undoubtedly groovy, proof being that Casanova was a player , and he wouldn't have been half as successful with women if he hadn't learned the importance of getting your pieces out early. If you don't happen to think chess is groovy (and many may not), I'm no chess Imperialist — your Poland is under no threat from my Bishop.

The mistake is to assume that chess is a game played with 32 pieces and a board. If only it were that simple. There is your opponent, a complex person in his or her own right, members of other clubs, who are even more complex, and matches and tournaments and congresses and books and rivalries and comradeships and a great big *et cetera* . It's a huge interesting cultural world, is chess, the natural history of which would give David Attenborough enough material for a whole new series. For instance:

Retaining Perspective

It can hurt to lose a game. As you sit there, your opponent slowly crushing you despite your every effort, disappointment can turn to despair, to dislike, to hatred, to psychosis. You can be annihilated, mind, body and soul. All that you are, your self-esteem, your moral code, your intellect and finally your will to live can

crumble beneath the assault. Or you can shrug, shake hands, say "well played" and get on with your life. Up to you.

The Post Mortem:

Many players specialise in this. Many's the time I've swaggered into the congress room set aside for this sort of thing with a defeated opponent (obviously, I win constantly), only for said opponent to demonstrate conclusively how unbelievably jammy I was. How they missed fourteen wins in the first six moves alone, and how I managed to make a decent move on occasion only through a combination of blind luck and Faustian chicanery.

The Over-The-Shoulder Comment

You know who you are. These people pass by your Post Mortem, glance fleetingly at the board, and then say something like "Why didn't you do this? That wins the Queen", or "Oh, you missed a mate in five there". Aargh! Even if these suggestions are right, you are implying that in the past few seconds you have seen more deeply into the game than I have, despite sweating over it for four rotten hours, and unless your name begins with K and ends in V that is not the case! Now sod off before I brain you with your own shoes!

I have been known to overreact on these occasions.

New Laddism in Chess

Chess, which began in the drawing rooms of polite society, is now practised by all sorts, and while it is common for congresses to be non-smoking, the non-drinking chess congress is unheard-of. The drunken game of chess has a long, upstanding barely-standing history, as anyone who has seen Michael Adams prepare for a game knows. However, the demon drink has been responsible for some lesser performances. The Grandmaster, who noisily demanded late entry to a local congress on Friday night, only to lose the next morning round after some serious drinking and then withdraw, shall remain a nameless Bastard. Sadly this ungentlemanly conduct is not uncommon.

I know of one otherwise blameless member of the chess community who, having warmed up in the bar, staggered into the third round, wrote on his scoresheet "Me versus some prat", and then kept a record in the margin of how many beers he had downed. He lost at move thirty-eight, or pint seven. Shame on him. But at least it could be said that he Retained Perspective.

Gene Thompson's Search For Great Chess, Part V

[...]

"In Part V of his series Gene Thompson explores an interesting hypothesis on why amateurs 'Force The Issue'. It's one of his best articles which certainly rings true with me. Is there a moral? Well, perhaps it is: play for a positional advantage and the tactics will look after themselves. "

[Alex Bellinger](#).

Hello from sunny Seattle!

Things are going well here; the Sonics are cleaning up in the NBA playoffs, the Mariners have slipped a little, but are still doing great, and my chess is coming along slowly but surely! Yeah, it's a little cocky placing my talent along side their's, but what the heck, it's my article! :-)

Today's topic is ... "Forcing The Issue."

I am involved with an e-mail chess match with a gentleman who wrote me in response to these articles. Among the many things we have discussed (long chained monomers, Polymer chemistry, and chess sets), the most disheartening issue was our failure to play as well as we feel we should.

In his case, one of his regular opponents can beat him despite having not studied chess at all. This opponent is an intelligent individual, but so is my friend (he's the Polymer Chemist, not me!). My friend is studying the correct chess literature: Nimzovitch, Evan's and the like. But, he still finds it difficult to hold his own! What could be his problem?!?

My case is similar. I've been studying good(?) books: Yasser Seirawan's series, and Mike Basman's openings book. But, I find it difficult, actually impossible, to beat programs I once did. What is going on

here?

Well, a couple of nights ago, it came to me. I had just been beaten by CM3000 again, and was I in a nasty mood. My wife asked if it was doing any good whining about the loss. No, but I wanted to anyway. When I calmed down, I thought about how I played the game. I didn't. Once I got past the opening, I just started moving pieces more or less randomly! I was looking for a position that contained a tactical solution, but not really doing anything to create one. The computer wasn't forcing the issue, just beating me with my own moves. Hmmm.

Here is my hypothesis: My friend and I are both afflicted with the same problem, FTI - Forcing The Issue. We have spent so much effort learning tactics from setup positions, that once we are in a real game, we try to apply our lessons to positions that don't warrant it. Subconsciously, we believe that every position has some stunning combination in it that will allow us to win. When we look for it, if it's not there (most often the case), we try to force one, causing a lost game.

When I was in college, I loved to rockclimb. The school was perfect for it. All the buildings were of rough-cut stone, so I could practice anytime I wanted (well, almost). I got so used to blowing through a few technical moves and finishing a "route," that when I got on real rock I was totally lost. The basics just weren't a part of my climbing. I could always (according to MY memory) cruise through the crux (the hardest, most technical part of the climb) but would usually blow it navigating the main route. I think I'm seeing a connection here.

Studying tactics in setup positions is a VERY necessary part of learning chess, but, knowing when to apply tactical knowledge is, at this point in my education, to me even more important. My friend's opponent instinctively makes "better" moves because my friend is making weaker moves, and so am I. Given a setup position, he would most likely find the solution much faster than his opponent. In a general position, we would both likely find a combination that wasn't there.

So, after all of this babble, what is the solution? Play more chess, learn to read a position for tactical possibilities, and let them happen (hopefully to your opponent). Easier said than done, n'est-ce pas?

Have a good one & GO SONICS!!!!

Exeter Chess Club: Blunders at East Devon

Contents

- [Introduction](#)
- [Tactical errors](#)
- [Thinking errors](#)
- [Appendix: on working with a computer](#)

Introduction

This long collection is the result of computer-searching a database of games from the East Devon Congress this year (1999). I had 222 games to analyse, courtesy of Ian George who had the thankless task of bashing them all in: 111 from the Major section (U155), and 111 from the Premier (U205). Of these, exactly half were identified by Fritz 5 as having tactical blunders (see Appendix for notes on how this was done). The 111 blunders comprised 65 from the Major and 44 from the Premier.

If you would like to repeat the exercise for yourself, you can download the games from the Premier (CBH or PGN) and Major (CBH or PGN) and compare your computer's efforts to the results of my analysis (CBH or PGN).

Having had the games marked by Fritz, I then went through the games to decide which were real blunders and which were Fritz getting its wires crossed (see appendix). The resulting list of blunders I then inspected and tried to identify (a) what tactical device was at work, and (b) if there were typical errors of thinking going on. Here's an example:

(43) Boomsma B. H. - Knight S. [C07]

Major (Round 4) **1.e4 e6 2.d4 d5 3.Nd2 c5 4.exd5 Qxd5 5.Ngf3 cxd4 6.Bc4 Qd6 7.O-O Nc6 8.Re1 Nf6 9.Nb3 a6 10.Nbxd4 Nxd4 11.Nxd4 Qc7 12.Qe2 Bd6 13.h3 "Out of Book," says Fritz. 13...0-0 14.Bd3 h6 15.c3 b5 16.Bd2 Bb7 17.a4 e5 18.Nf5 Qc6 19.Qf1 bxa4**

20.Nxd6

Misses a trick.

[-0.28 Fritz 5.00: 20.Rxe5 Rad8 [not 20...Bxe5, 21. Ne7+] 21.Re7 Kh8 22.Nxd6 Qxd6 23.Re3]

Fritz assesses White's position at the end of the analysis variation as +??. When you dump the database out for printing, it unhelpfully strips all these assessments off, but they can be seen in the CBH database.

Psychologically, this is a missed opportunity. It is also a threat missed by Black, so both players made a mistake. Tactically, it's a decoy/overload combination, and two moves deep. I'm sure that Black overlooked the possibility of Rxe5, and missed it because it was a second effect of moving the White Queen from e2 to f1, defending against the mate on g2. My guess is that Brian also overlooked the possibility, rather than saw it and thought it a bad idea. Of course, I actually don't know enough about any of these games to be able to tell things like this for sure. Either player may have seen all this and more, although this begs the question why they didn't react to what they saw.

Three features dogged my research: these difficulties in *post hoc* interpretation, compounded by lack of context, and possible transcription errors. On context: some of the games I witnessed and was able to tell that one or other player was in time trouble, when some of the decisions taken might make a bit more sense. Or a player may have grabbed a draw against a higher-graded opponent. Also, I

assume that the scores are accurate. Ian did mighty battle with idiosyncratic handwriting and moves scribbled in time pressure, but there are a couple of games where I can only assume some other move was played than the one recorded. (I once found a score sheet which started: **1. e4 e5 2. Nc6 Nc6 3. Nf6 Nf6** - a player new to algebraic, I concluded.)

What I have done below is a preliminary description of the blunders - a natural history, if you like, trying to classify and count my way through the range of horrors on view. The richness of chess - even this sort of chess - really requires deeper consideration than I have been able to give it so far, so please forgive this as work in progress.

Tactical themes

Some tactics can be readily ascribed to more than one type, e.g. as above, overloading a piece defending against a fork. In these cases, I filed them under the earlier theme in the sequence.

The tactical themes found were as follows:

Left hanging:

Forks, double attacks:

Pins:

Overloading (decoys, ties):

Undermining (ties):

Unmasking (discovered attacks, jumps):

Nets (no retreat):

Mating patterns:

Queening combinations:

I suspect that these relative frequencies do not reflect their occurrence in normal play, that is, I think you are more likely to miss a fork or pin than to miss a piece hanging.

Let's see some examples, simple and more complex.

Left hanging:

(56) Dobber P. - Duckham J. [B00]

East Devon Major 1999 (5)

14.Nf3-g1

With two points: one to secure the h-Pawn...

14...Qe7 15.Qxh5

...the other of which Black missed. **1-0**

Forks, double attacks:

(6) Jukes S. - Belinfante N. [A20]

East Devon Major 1999 (1)

1. c4 e5 2.g3 Nc6 3.Bg2 Bc5 4.a3 "Out of Book," says Fritz. 4...a5 5.Nc3 Nf6 6.d3 0-0

7.Bg5 White sets himself up for a basic tactic (Knight fork 7...h6 Black didn't notice!

Pins:

(2) Durrant P. E. O. - Halmkin P. E. [B07]

East Devon Major 1999 (1)

21.Bh3

Black is in difficulty here but his next move makes things worse, adding a pin to the threatened discovery. In fact, White's Knight is currently pinned to the B3!

21...Nd7

[2.50 21...b4]

22.Nxg7

[1.66 22.Qf2]

22...Kxg7 23.Qf2 Qe8 24.Be6 Ndf8 25.Qf7+ Kh8

Suicide, as Black realises.

1-0

Skewer

(45) Halmkin P. E. - Wood J. Z. [C00]

East Devon Major 1999 (4)

Impeccable so far, says Fritz. Both sides overlook a standard skewer tactic. **48. Rg5+**

[-0.56 : 48.Kd2 Rf1 49.c7 Rf8 50.Ke3 Rf3+ 51.Ke4]

48...Kf3 49.c7

[-1.28 : 49.Kd2 Ra1 50.c7 Ra8 51.Rc5 Rc8]

49...Re1

[0.81 : 49...Rc1+ 50.Kd3 Rxc7 51.Rf5+ Kg4 52.Re5 Rf7 53.Ke4]

Overloading (decoys, ties):

See above, and also:

(54) Allen R. N. - Woodruff A. [C11]

East Devon Major 1999 (5)

1. e4 e6 2.d4 d5 3.Nc3 Nf6 4.e5 Nfd7 5.f4 c5 6.Nf3 Nc6 7.Be3 cxd4 8.Nxd4 Nxd4 9.Bxd4 Be7 "Out of Book," says F5.. 10.Bd3 Nc5 11.Be2 Qa5 12.O-O O-O 13.f5

13...exf5

[2.31 : 13...Bg5 14.a3]

14.b4! Qxb4

Black goes down the main line

[3.47 : 14...Qd8 15.bxc5 Be6 16.Rb1 Qc7 17.Nb5]

15.Nxd5 Qa5 16.Nxe7+

Undermining (ties):

(31) Grist P. - Sparkes D. A. [B01]

East Devon Major 1999 (3)

1. e4 d5 2.exd5 Nf6 3.Nf3 Nxd5 4.Bc4 "Out of Book," says Fritz. 4...c6 5.O-O Bg4 6.d4 e6

White makes an unguarded move - or rather, an apparently guarded one.

7.Bg5

[-2.78 : 7.Nbd2]

7...Bxf3 8.Qxf3 Qxg5

Unmasking (discovered attacks, jumps):

(47) Jones R. H. - Grist P. [A01]

East Devon Major 1999 (4)

18.Nc3 Overlooking a series of masked attacks.

[-0.88 : 18.Qd3]

18...Nxd4 19.Na4

[19.Nxd4 Bxg2 20.Kxg2 Qxb2]

Nets (no retreat):

(93) Baer B. L. - Spink B. M. [A04]

East Devon Premier 1999 (4)

32...Qb1 This is the real blunder: can Black guarantee to get the Queen out? **33. Kg2 Nf6 34.Bd3 Qc1 35.Rc2 Qd1 36.Ree2 Nh5 37.Rcd2 Qa1 38.Ra2 Qc1**

[6.63 : 38...d5 39.Qxd5 Nf4+ 40.gxf4 Qxc3 41.Rec2]

39.Qxf7 1-0

Mating patterns:

(71) Aston P. A. - Saqui D. A. J. [D00]

East Devon Premier 1999 (2)

White has at last worked up an attack. **30.Nh5** Allows Black an opportunity to chase away the Queen.

[-2.16 : 30.Rc3 Qd8 31.Nd3 Bg5]

30...Bf8 allows mate in three!

[#3 : 30...Rg6 31.Qe3 Qxb2 32.Nf4 Rg7 33.a3]

31.Nf6 Not only missing the mate, but walks into a defensive tactic.

[-5.13 : 31.Nxg7 surely the most natural move on the board! 31...Qxd4+ 32.Rxd4

Bxg7 33.Qxh7#]

31...Rxg2+ 32.Kxg2 Bxh6 33.Rxh6 Kg7 34.Rxh7+ Kxf6 35.h4 Qxb2+ 36.Kf3 Rb4 0-1

King safety more generally was a very common theme, sometimes in more complex situations than that. Here's one I may get into trouble for:

(101) Abbott M. - Page M. C. [D35]

East Devon Premier 1999 (5)

30.Rh1

Good move! Fritz scents mate coming up. **30...Rh6**

[1.91 : 30...b5 31.axb5 axb5 32.Rh3 b4 33.Ng3 f4 34.Nf5+ Kf8 35.Rh8+]

31.Ng3

[1.22 : 31.Rxh6 Kxh6 32.g4 is the way to pursue it: 32...Rf8 (32...Rh8 gives in meekly 33.gxf5 Qe8 34.Rh1+ Kg7 35.f6+) 33.Ng3 Qb6 34.Kg2 Qxd4 35.e6 fxg4 36.Rh1+ Kg7 37.Rh7+ Kg8 38.Qg6+ Qg7 39.Qxg7#]

The beginners' favourite of back rank mates made a single appearance in the register of blunders:

(76) Page M. C. - Jepps G. N. [A31]

East Devon Premier 1999 (2)

27...Re2

[4.59 : 27...Qd8 28.Qc4+ Kh8 29.Qe4 Qg8 30.Qxf4 Rxa2]

28.Qc4+

[-0.34 : 28.Rxe2 We're assuming the score is accurate, I suppose, but this looks a little better! 28...Qd8 29.Qc4+ Kh8 30.Re1 Qb8 31.Qxc6]

Queening combinations:

(102) Evans I. D. - Dunn A. M. [C41]

East Devon Premier 1999 (5)

And a final double blunder (time pressure notwithstanding):

60.Kxg5

[-4.56 : 60.Nd1 Ng6 61.Nf2 d2 62.Kf3 Nf4 63.Ke3]

60...Ne6+

[0.00 : 60...Nh3+ and White's poor Knight does the splits. 61.Nxh3 d2 62.Nf2 h3 63.Kf5 h2 64.Ke5 h1Q 65.Nxh1]

1/2-1/2

Intermezzo

(80) Dilleigh S. P. - Frost N. A. [E15]

East Devon Premier 1999 (3)

1. d4 e6 2.Nf3 b6 3.g3 Bb7 4.Bg2 Nf6 5.c4 c5 6.d5 b5 "Out of Book," says F5.. 7.dxe6 fxe6 8.cxb5 Qa5+ 9.Nc3 d5 10.O-O

10...d4 Not picked up by Fritz as an error. 11.Nxd4 Bxg2 12.Nb3

The intermezzo

12...Qc7 13.Kxg2

With another Pawn.

Attack and defence

Here, a failure to count:

(18) Herbert S. - Smith E. J. [C01]

East Devon Major 1999 (2)

1. e4 e6 2.d4 d5 3.exd5 exd5 4.Bf4 Nf6 5.Nf3 Bd6 "Out of Book," says F5.. 6. Bxd6 Qxd6 7.c3 O-O 8.Be2 Re8 9.O-O Bg4 10.Nbd2 Nbd7 11.h3 Bh5 12.Re1 Re7 13.Bd3

Black spurns an opportunity to get the advantage and instead gives up a Pawn.
13...Ne4

[0.88 : 13...Rxe1+ 14.Qxe1 Re8 15.Qf1 Qb6 16.Rb1 Qc6]

14.Nxe4 dxe4 15.Rxe4

Thinking errors

Missed threats

One-movers

Two-movers

Three-movers

Missed opportunities (i.e. missed threat, opportunity not taken)

One-movers:

Two-movers:

Three-movers:

Oversight/natural moves in normal positions

Failure of nerve/Bluffed

Failure of analysis

Bad moves in bad positions (the frying pan problem)

Slack moves in good positions (incisiveness)

Errors of judgement not analysis (Positional errors)

Time trouble

Missed threats

When our mind is on higher things, we can be laid low. Here's a few missed mates:

One-movers

Candidates for blunder of the tournament must include any one-move oversights. We had more than piece left hanging and more than one mate in one.

(53) Whelan G. - Rogers D. R. [D01]

East Devon Major 1999 (4)

50.Nf1 Suicide.

[-#1 : 50.Kf1 a5 51.Rb8 h4 52.Rf8+ Ke7 53.Rg8]

50...Re2# 0-1

(52) Steer G. - Neilsen J. H. [A45]

East Devon Major 1999 (4)

25... Qd7

[#1 : 25...Rxe1+ 26.Rxe1 Qg4 27.h3 Qg5 28.Nf3 Qf6]

26.Qg6# 1-0 Oops.**Two-movers**

In my youth such things were referred to as *cheapos* - a point gained through minimum effort. It's hard to describe these as two moves deep, more like two moves shallow!

(66) Dunn A. M. - Aston P. A. [A00]

East Devon Premier 1999 (1)

16.a3 Not best.

[-#3 : 16.e4 Nxd3+ 17.Bxd3 Bxa2 18.Rd1 Qe5 19.h4 Rd8 20.Qg5 Qxg5+]

16...Nxd3+ 17.exd3

[17.Kd1 Qe1#]

17...Qe1# 0-1

Three-movers

(98) Regis D. - Piper S. J. [B47]

East Devon Premier 1999 (4)

32.Rf3

Black is under the cosh, but loses instantly:

32...Qe4

[#3 : 32...Nf4 33.Qf5+ Ng6 34.Nxf7 Bf4 35.Qh5+ Kg8 36.Rg1 Rab8 37.Nh6+]

33.Nf5+ (threat Ne7+) 1-0

What produces these errors?

One obvious theme is a move of the opponent with two points, one of which you miss.

Another is mood: a player ahead on material or with a strong attack may overlook opportunities for the defending side. Or a player who is being attacked may panic and find it difficult to focus on simple threats of the opponent, or become gloomy

and stop looking.

Missed opportunities (i.e. missed threat, opportunity not taken)

White overlooks a tactic made possible by Black overlooking the threat - so every missed opportunity may also represent an error of the opponent, allowing you to carry out a threat that could have been prevented.

We can find examples of every depth, as above:

One-movers:

(11) Webley M. A. - Spiller P. [C21]

East Devon Major 1999 (1)

A curious double oversight follows. **29...Bf3** That Bishop is en prise!

30.Kf2

White misses it!

Most people's idea of a one-mover is more like this:

(29) Foulds A. - McFarlane P. [A69] East Devon Major 1999 (3)

18...f6 ? 19.Rab1 ?

[-3.31 : 19.Qd5 forward!]

Two-movers:

(5) Ingham W. - Pinder R. [A07]

East Devon Major 1999 (1)

12.b4 Fritz reckons this a blunder

[-0.91 : 12.Qe2]

12...Nc6 with double attack on b4 and e5 **13.a3 cxb4**

Three-movers:

(35) Rogers D. R. - Price C. R. [A15]

East Devon Major 1999 (3)

17.Bc3

Both sides get in a muddle here: Black need not shed a piece, and has a clever alternative. **17...Bxd4+**

[2.88 : 17...Qxc3 neat, eh? 18.Nxc3 Bxd4+ 19.Qxd4 cxd4 20.Nd5]

18.Qxd4 of course

This is sort of a three-mover:

(14) Belinfante N. - Wood J. Z. [C11] East Devon Major 1999 (2)

Black now plays a series of moves which make a poor position fatal. **14...f6**

[1.94 : 14...b4 15.Nb1 Qxc2 16.Bd3 Qc7 17.Nbd2]

15.exf6

Natural, but risking letting an opportunity slip.

[0.06 : 15.Nxd5 exd5 16.Qxd5+ Kh8 17.exf6 Bxf6 18.Qxa8 Bxb2]

15...Bxf6 ? Overlooking White's idea

[1.03 : 15...Nxf6 16.Bd3 Bd6 17.Ne5 Nd7 18.Nxd5 Bxe5 19.Nxc7 Bxd4 20.Nxa8]

16.Nxd5 back on track **16...exd5** ? Unnecessary! White must have some idea in mind, and there's no need here to fall for it.

[2.81 : 16...Qxc2 17.Nxf6+ Nxf6 18.Bd3 Qc7 19.Qe5 Nd5 20.Qxc7 Nxc7]

17.Qxd5+ Kh8 18.Qxa8

That opportunity was only taken because it was re-presented.

After this, I suspect we are at the limit of what many players can analyse accurately without mistakes. Given a favourable wind, we might follow a given sequence some ten moves deep, but not reliably identifying or analysing all the alternative branches. Still, see if you can do better than the tournament winner here:

(89) Saqui D. A. J. - Baer B. L. [E61] East Devon Premier 1999 (3)

27.g3 This weakening move sets Black up for a stock mate.

[-#5 : 27.R7a2 Bg5 28.h3 Qxh3+ 29.gxh3 Rxh3+ 30.Kg2 Nh4+ 31.Kg1 Nf3+]

27...Qh3 Sufficient but the game could have been decided simply:

[-7.66 : 27...Qxh2+ 28.Nxh2 Bxe3 29.Bf8+ Rcx f8 30.Kg2 Rxh2+ 31.Kf1 Rxf2#]

28.Ne2

[-#4 : 28.Qxd5 Bxd5 29.Rxc7 Bc4 30.Rxf7+ Kxf7 31.Nxe4 Bxf1]

28...Bxe3 29.Ng1 Qxh2+ 0-1

Oversight/natural moves in normal positions

We can see the fatal attraction of 'normal' moves in the games Dobber-Nielsen and particularly Belinfante-Wood. Here's another:

(21) Laurain F. - Whelan G. [B07]

East Devon Major 1999 (2)

13.Ba3

[-1.00 : 13.Rb1 Re8 14.Be3 Bc6 15.Rfd1 Qxd6 16.Rxd6]

13...Re8 Now White has chased the Rook to e8, he has pieces *en prise* on both e2 and a1!

Failure of nerve/Bluffed

(32) Jukes S. - Scott R. [A24]

East Devon Major 1999 (3)

1. c4 e5 2.Nc3 Nf6 3.g3 g6 4.Bg2 Bg7 5.b4 "Out of Book," says Fritz. 5...c6 6. Rb1 0-0 7.d3 d5 8.Bg5 Be6 9.cxd5 cxd5 10.Qd2 Re8 11.Nf3 Qd6 12.0-0 a6 13.Rfc1 Nbd7 14.Rc2 Nb6 15.h3 Rec8

16.Nxe5 enterprising but flawed?

[-1.81 : 16.Rbc1 d4 17.Bxf6 dxc3 18.Qg5 Bxf6 19.Qxf6]

16...d4 Black is bluffed!

[0.25 : 16...Qxe5 **A**) 17.Bf4 must have been White's idea: 17...Qh5 18.Bf3 (18.g4 Nxf4 19.hxf4 Bxf4 20.e3 Bf3 21.Bxf3 Qxf3) 18...Qxh3 19.Bg2 Qh5 20.Bf3 Bg4;

Hard to see to the end, but there's no concrete line to follow up.

[**B**) 17.Qe3 17...Nfd7 18.Qxe5 Nxe5 19.Rbc1 d4]

Failure of analysis

These are among the most interesting blunders, requiring a certain level of chess competence to achieve. Sometimes the failures are simple - like failing to count - and others are more involved.

(46) Herbert S. - Dobber P. [B07]

East Devon Major 1999 (4)

12.Nxe5 An attractive but flawed idea.

[-0.72 : 12.Bc4 b5 13.Be2 Nd7 14.Bh4 Nc5 15.Nxe5 Bb7 16.Bg3 Nxe4]

12...f6

Oops.

(3) Foulds A. - England M. C. [E76] East Devon Major 1999 (1)

White's next is a bright idea laid low by a miscalculation. **15.Nxd5**

[-3.09 : 15.Nf3 Bxc3 16.bxc3 Nc7 17.bxa6 Bxa6 18.Bxa6 Rxa6 19.a4]

15...Nxd5 16.Bc4 Nef6 17.Qf3 e6 18.Re1 Re8

(72) Bolt G. - Talbot A. R. [B86] East Devon Premier 1999 (2)

1. e4 c5 2.Nf3 d6 3.Bc4 Nf6 4.Nc3 e6 5.d4 cxd4 6.Nxd4 a6 7.a4 Be7 8.Bb3
 "Out of Book," says Fritz. 8...0-0 9.0-0 Nc6 10.f4 Qc7 11.Kh1 Bd7 12.f5 Nxd4
 13.Qxd4 e5 14.Qd3 Bc6 15.Bg5 Rad8 16.Rae1

A thematic break, but is it sound? **16...d5 17.Qg3** Bluffed!

[-0.47 : 17.Bxd5 h6 18.Be3 Ng4 19.Bd2 Bc5;

17.exd5 Nxd5 18.Bxe7 Nxe7 19.Qe2 also wins a Pawn;

17.Nxd5 is the most obvious line to analyse, and it is not bad for Black: 17...Nxd5
 18.exd5 Bxg5 19.Qg3 Bxd5 20.Qxg5]

I put this one under 'analysis' rather than the similar example above which was 'bluffed'; this one is a short line which I guess White failed to analyse, the one above was a long line which I'm sure Black looked at but feared ending badly.

Bad moves in bad positions (the frying pan problem)

The phrase 'bad moves in bad positions' is from Hugh Alexander. Partly this is statistical: when you stand worse, fewer of your moves will not lead to trouble. One can have sympathy. But it is also psychological: panic, depression or a general lowering of expectations can all cause decision-making and chosen moves to become poorer. I saw loads of these...

(9) Spiegel J. A. - Laurain F. [B26]

East Devon Major 1999 (1)

20.Rae1

20...Be7 Making a bad situation worse.

[2.09 : 20...Bc7 21.Rf6 h4 22.d6 hxg3+ 23.Kxg3 Bd8 24.Rxe5+ Kf8 25.Rf4]

21.Rxe5

21...f6 Not cutting his losses.

(5) Ingham W. - Pinder R. [A07] East Devon Major 1999 (1)

13...cxb4

14.Qb3 makes the worst of a bad job

[-2.56 : 14.Bb2]

Slack moves in good positions (incisiveness)

This was almost as common as the 'bad to worse' pattern: not really being in top gear when looking at a favourable position. There are many factors at play here: nerves, complacency, laziness and more.

(29) Foulds A. - McFarlane P. [A69]

East Devon Major 1999 (3)

When you see a good move, stop and think again... **22.Qxa8**

[-2.00 : 22.Bh6 ...There might be a better one! This move gets the Bishop off the hook with tempo 22...Re7 23.Qxa8 Bxh2 24.Rbd1 Qe5]

(5) Ingham W. - Pinder R. [A07] East Devon Major 1999 (1)

14.Qb3 makes the worst of a bad job

[-2.56 : 14.Bb2]

14...bxa3 Black does not exploit his advantage in the best way.

[-1.19 : 14...Nc5 15.Qa2 Nxd3 16.Rd1 Nxc1 17.Raxc1 bxa3 18.Nxd4 Nxe5]

(One game with three characteristic blunders!)

(64) Stanners M. J. - Price M. C. [D00]

East Devon Major 1999 (5)

16.a4

16...0-0-0 Into the fire.

[2.44 : 16...f5 17.axb5 fxe4 18.Nxe4 Qc7 19.bxc6]

17.axb5 Nxd4 18.Rxa7

Errors of judgement not analysis (Positional errors)

Fritz can occasionally identify a move as a blunder, as far as I can tell on positional grounds. Sometimes I agree with it!

Here's an example of what I mean:

(38) Spiegel J. A. - Kennedy P. J. [B26]

East Devon Major 1999 (3)

20.0-0 allows Black to seize the seventh

[-1.09 : 20.Rd2 Nc6 21.0-0 Ke7 22.Rfd1 Rhd8]

20...Rb2 21.Rfe1 Rxa2

More typical are positional errors Fritz ignores:

(1) Dobber P. - Nielsen J. H. [B01]

East Devon Major 1999 (1)

1. e4 d5 2.exd5 Qxd5 3.Nc3 Qa5 4.d4 c6 5.Nf3 Bf5 6.Be2 e6 7.0-0 Nf6 8. Re1 "Out of Book," says Fritz. 8...Nbd7 9.h3 Be7 10.Bf1 0-0 11.Nh4

Black mistakenly allows White to secure the two Bishops and a Queen's-side majority. **11...Rfe8 12.Nxf5 exf5**

Time trouble

Time control here was at move 40, so any game which degenerates around move 35 or even earlier could be due to clock pressure. Time trouble doesn't provide a complete explanation for out-and-out blunders, but it does produce them. We saw one I guess in Evans-Dunn.

Conclusions and recommendations

Well, what do you think?

Appendix: on working with a computer

I haven't done this sort of thing before and wondered if those attempting a similar exercise might find the following notes helpful.

Method

I analysed all the games using the 'blundercheck' feature of Fritz 5. I used the default settings of time 10, (seconds I think) and a criterion of 60 (a difference of more than half a Pawn [100]). Left to run overnight, Fritz identifies better lines and flags each game containing a blunder with a black spot, which it describes as a "medal". These settings seem to result in a depth of about depth of 10-ply (5 whole moves by White and Black).

I assume these defaults are generally OK, but I don't know if anyone has found a better combination of settings.

Horizon effect

Fritz takes the instruction to look for only ten seconds very seriously. That is, Fritz is capable of assessing a position after Black's fifth move as favourable to Black, even if White's sixth move delivers checkmate!

Proof: in this position...

(72) Bolt G. - Talbot A. R. [B86]

East Devon Premier 1999 (2)

...Black came up with a creative way to lose a piece, which Fritz assessed at +3.22 for White:

32...Qxh3 33.gxh3 Nf3 34.Qxe3 Nxe1 35.Qxe1

Fritz preferred the move:

32...Rge8 when it analysed: 33.Rhxe3 Rxe3 34.Qxe3 Nxb3 35.Qxb3 Rxd6 36.Re8 + Kh7 37.Qxb7, after which 10 ply it assessed the position as only 0.81 to White - how would you assess it?

When victory is in sight

Perhaps because of this, often the majority of Fritz' comments occur only towards the end of the game, when the result has been all but decided.

(25) Scott R. - Bloom P. [B46]

East Devon Major 1999 (2)

White has just played 47. b4 to reach this position:

The previous 46 moves by White and Black escaped calumny, but now Fritz got all interested:

47...Bb6

[17.81 Fritz 5.00: 47...Qe3 48.bxc5 Qxc5 49.Qg6 Qf8 50.a7 Qg8 51.Qf7 Rf8 52.Qxf8 +13.63]

48.c4

[10.78 Fritz 5.00: 48.Qg6 threat Be4 is better 48...Rxe6 49.Qxe6 Qe3 50.Qc8+ Kh7 51.Qf5+ Kg8 52.a7 Qe8 +19.41]

48...Bd8

[24.91 Fritz 5.00: 48...Qe3 49.c5 Qxe4 50.Bxe4 Bc7 51.a7 Be5 52.a8Q Rxa8 53.Bxa8 +12.22]

49.Qd4

[11.34 Fritz 5.00: 49.Qg6 idea Be4 is better 49...Qxf3 50.Qxe8+ Kh7 51.gxf3 Bb6 52.Qc6 Bd4 53.e7 Bf6 +27.88]

49...Qh4 50.Qxh4 Bxh4 51.a7 1-0

So, a "blunder" in Fritz' terms (a better move was available with an outcome a Pawn's worth different), but in practical terms, who cares? Incisiveness in critical positions is important, but this finale was hardly critical. Some of the 111 games with blunders were like this one. Meanwhile the phase of the game where Black failed to castle, got in a horrid pin and shed all his Queen's-side Pawns and a piece, is passed over in silence.

Materialism

Fritz, like many computers, likes the bird in the hand more than many players. Undoubtedly, if it did not have an opening book it would not accept for a moment any gambit, especially long-range ones like the Benko.

(82) Hodge D. - Hammond T. J. [A35]

East Devon Premier 1999 (3)

1. e4 c5 2.c3 g6 3.d4 cxd4 4.cxd4 d5 5.exd5 Nf6 6.Nf3

6...Bg7

Typically Fritz does not like to be without material, and prefers 6...Nxd5.

(3) Foulds A. - England M. C. [E76]

East Devon Major 1999 (1)

1. d4 Nf6 2.c4 g6 3.Nc3 Bg7 4.e4 d6 5.f4 O-O 6.Nf3 c5 7.d5 Nbd7 "Out of Book," says Fritz. 8.Be2 a6 9.O-O b5

Fritz doesn't like giving up Pawns, but this Benko-style idea looks perfectly legitimate.

[0.94 : 9...b6 10.Qc2 Bb7 11.Be3 Qc7 12.f5 gxf5 13.exf5]

Also, very practical attempts to open or muddle the position are nearly always criticised. [We need to understand the 'nearly'; it may be in these positions the compensation is obvious even to a stupid computer.]

(71) Aston P. A. - Saqui D. A. J. [D00] East Devon Premier 1999 (2)

1. d4 Nf6 2.Nc3 d5 3.e4 dxe4 4.f3 Bf5 5.fxe4 "Out of Book," says Fritz. 5... Nxe4 6.Qf3 Nd6 7.Bf4 Qc8 8.Bxd6 cxd6 9.Bb5+ Bd7 10.Nh3 a6 11.Bxd7+ Nxd7 12.Nd5 Qc6 13.O-O Nf6

14.c4 This perfectly reasonable attempt to pursue an initiative is queried by Fritz.

[-1.44 : 14.Nhf4 Rc8 15.c3 e6 16.Nxf6+ gxf6 17.d5]

A positive side of Fritz' materialism is a healthy scepticism about sacrifices; if it can't see a mate, it fancies the material.

(10) Stanners M. J. - Sellwood C. [D00]

East Devon Major 1999 (1)

1. d4 Nf6 2.e3 "Out of Book," says Fritz. 2...e6 3.Bd3 c5 4.f4 Nc6 5.c3 d5 6. Nd2 Qc7 7.Qf3 cxd4 8.exd4 Bd6 9.Nh3 O-O 10.O-O b6 11.Ng5 h6

12.h4

Computers can take the fun out of playing sacrifices. Fritz is unimpressed by White's intentions to deliver mate and fancies grabbing the material.

[-1.78 Fritz 5.00: 12.Nh3 -0.31]

12...Bb7

Bluffed!

[-0.41 Fritz 5.00: 12...hxg5 13.fxg5 (13.hxg5 Nh7 14.Qh5 g6 15.Qh6) 13...Nd7

14.Qh5 g6 15.Qf3 -1.53]

Positional sacrifices

Fritz, like many computers, cannot appreciate positional sacrifices. These are not easy for club players to contrive except in certain familiar situations but when they were offered Fritz poured scorn on nearly all of them.

(86) Pinkerton A. - Aston P. A. [A44]

East Devon Premier 1999 (3)

1. **d4 c5 2.d5 e5 3.g3** "Out of Book," says Fritz. **3...d6 4.Bg2 Be7 5.Nc3 a6 6. a4 h5 7.e4 h4 8.g4**

8...h3

[0.75 Fritz 5.00: 8...Bg5 -0.13]

As usual, positional Pawn sacrifices are not to Fritz' taste.

Again, the 'nearly all' is interesting: sometimes it must have recognised some of the compensation and did not jump on the move as an error.

(81) Hewson B. W. R. - Jaszkiwskyj P. [D53]

East Devon Premier 1999 (3)

1. c4 e6 2.Nc3 Nf6 3.d4 d5 4.Bg5 Be7 5.e3 O-O 6.Bxf6 "Out of Book," says Fritz. 6...Bxf6 7.cxd5 exd5 8.Bd3 c6 9.h4 Re8 10.Nge2 Bg4 11.Qc2 g6

12.h5 One Pawn sacrifice that even Fritz doesn't query!

Simplifying sacrifices

There is a particular class of move that Fritz always labels a blunder and with which calumny I cannot agree: the simplifying move or combination. This may reduce your attacking force, or even give up some of your material advantage, but still be an excellent idea.

(7) Price M. C. - Sparkes D. A. [C14]

East Devon Major 1999 (1)

62.Rxe6+ Just the sort of clarifying sacrifice a human likes and computers hate. In fact, both the Knight and King are perilously short of squares and can each be profitably harassed.

[#7 Fritz 5.00: 62.Qg3 Ng2 (62...Nd5 63.Rxe6+ Kc5 64.Qg1+) 63.Qxg2+ Kc5 64.Kc3 f4 65.Rxe6 f3 66.Qxf3]

Positional blunders by computers

We are used to positional mistakes being overlooked by computers, but we can also see positional errors being positively suggested by Fritz. Here's one:

(89) Saqui D. A. J. - Baer B. L. [E61]

East Devon Premier 1999 (3)

A standard reversed KIA position (Pe3 not Pe4) where Black will want to deliver mate soon.

21.Kh1

[-0.16 Fritz prefers 21.a6 which removes any shred of White counterplay!]

Crossed wires

There are occasions when I cannot fathom what is going on in Fritz' twisted little silicon mind.

(27) Woodruff A. - Jukes S. [E12]

East Devon Major 1999 (2)

29...Rdb7

I don't understand Fritz' querying this move, even though I see no very compelling reason for it.

[-0.88 Fritz 5.00: 29...Rd8 30.h5 Ke8 31.Kf1 Rd7 32.Ke2 a4 33.Rd2 Rdb7 34.Rd4]

Exeter Chess Club: Blunders at East Devon: a natural history

Blunders at East Devon: a natural history

The errors found by Fritz5 from the Premier and Major games at East Devon can be classified by tactical theme and perhaps also by psychological theme - what type of thinking was at fault?

I'm not ever so confident about the classification scheme - I have a feeling that it could be sharpened up a lot. In research, you would get a couple of other people to come up with their own classifications and then compare notes, and perhaps some of the vaguer categories like 'attack and defence' could be divided up into 'weakening moves', 'failure to use reserve pieces', and so on.

Here's the final tally. [Once you start counting, you can get away from mere 'natural history' towards a science of blunders.] There were 111 games with blunders, but some games had more than one important blunder. Please also remember that for every game with a blunder, there was a game free from blunder, and that even in the most flawed game more moves were sound than unsound.

| Errors by tactical theme | Errors by psychological theme |
|--------------------------|-------------------------------|
| Geometry = 55 | Blindness = 92 |
| King safety = 49 | Emotional errors = 42 |
| Phases = 30 | Thinking errors = 22 |
| Analysis = 11 | Material errors = 19 |
| Attack and defence = 11 | Attack and defence = 11 |
| Blindness = 9 | Phases = 1 |
| Strategy = 3 | |

Tactical themes.

Most common are the group of simple tactical themes, and tactics involving the King. I was surprised by the latter, since I thought most players were very careful of their Kings. Perhaps it has to do with the various ways in which a game can be compromised by a wobbly King, and the often sharper finishes which were missed by players who were already winning. Have a look at the examples under this heading (index below) and see what you think.

The simple geometrical motifs are readily absorbed, but we must make sure we know all the common ones. I was astonished a while ago to find that Dave Beckwith, comfortably 130 strength plus (1500+ ELO) without ever seeming to practice, had never seen the smothered mate known as Philidor's legacy, using Queen and Knight against a castled King.

The next most common group, 'phases', is dominated by endgame errors. However dismal computers are at endgames, and they are pretty ropy, we are worse.

Analytical errors - like move order - accounted for a few blunders, but hardly more often than real act of blindness, like leaving material hanging! Hopefully, awareness of both sorts of blunder can feed back to your habits of thought: try ideas in different orders to see if they work better, or check to see that your pieces really are still protected at the end of a sequence of moves.

Psychological themes

The most common types of blunder seem to have nothing interesting psychological about them - they are simply oversights, and all one need do to avoid them is look twice. However, because we are obviously thinking about something when it is our turn to move, why aren't we thinking about more important stuff? Presumably, we think what we are thinking about we regard as important, but while distracted by important higher-order things, we can overlook the basics.

There's really not a lot of research around on how ordinary chess players actually spend their time at the board when its their move, so your own notes and recollections are probably the best guide to your own errors - are you looking only for your own opportunities, or are you too worried about your weak a-Pawn to look for imminent threats?

The next big block are what I have rudely, but probably not inaccurately, called emotional errors. Neither hope nor despair are friends to the chessplayer. Remaining calm and effective throughout each move of a long game is a tough challenge, but is a goal to be sought. Perhaps you can at least 'turn down the volume' on any nerves while it's your turn to move - you have work to do which is not helped by feeling gloomy about the game.

What morals - or immorals - do you draw from these figures?

Classification of tactical themes

| Category | Theme | All | Games |
|---------------|----------------------|-----|---|
| Blindness = 9 | Hanging pieces/Pawns | 9 | 11 39 41 42 42 48 56 93 111 |

110) Wareing J. P. - Bolt G. [B45]

Exeter Premier (5) 1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e6 6.Ndb5 d6 7.g4 "Out of Book," says Fritz. 7...a6 8.Nd4

Black misses a chance to exploit the Pg4, but White pays a higher price later! **8... Be7**

[0.19 Fritz 5.00: 8...Nxc4 9.Be2 Qh4 10.Bxc4 Nxd4 11.Be3]

9.Be2 0-0 10.0-0 Bd7 11.Be3 Rc8 12.f4 Nb4

13.Bd3

[-0.50 Fritz 5.00: 13.g5 Ne8 14.a3 Nc6 15.Bc4 Qc7]

13...e5

14.Nf3 I guess this is a sacrifice to open up lines against the King. (But whose King?)

[-1.53 Fritz 5.00: 14.Nf5 Bxf5 15.gxf5 exf4 16.Rxf4 d5 17.e5 Nxd3 18.Qxd3]

14...Nxf3 15.Qd2 Nxe3 16.Qxe3

16...d5 This decision to open up the game is totally correct, as far as I can see.

[-3.44 Fritz 5.00: 16...f5 17.exf5 exf4 18.Qxf4 Nxd3 19.cxd3 Bxf5 20.d4]

17.Qd2 Nxd3 18.cxd3 dxe4

19.Nxe5

[-2.75 Fritz 5.00: 19.Nxe4 exf4 20.d4 keeps more central control against the power of the two Bishops. 20...Bh3 21.Rfe1 Bg4 22.Ne5 f5 23.Nf2 Bc5]

19...exd3 20.Qxd3 Be6 21.Qg3 Qb6+ 22.Kh1 Qxb2 23.Ne4 Bf5

White is losing horribly, but can try to minimise the damage. **24.Rab1**

[-11.19 Fritz 5.00: 24.Rae1 Qc2 25.Qf3 f6 26.Ng3 fxe5 27.Rxe5 Bh3 28.Rxe7 Bxf1]

24...Qa3

[-3.25 Fritz 5.00: 24...Bxe4+ is a rather straightforward improvement: 25.Nf3 Bxb1 26.Qe1 Bd3 27.Rg1 Rfe8 28.Qe5 Qxe5 29.fxe5]

25.Rxb7 Oops.

[-12.22 Fritz 5.00: 25.Nf6+ Kh8 26.Qxa3 Bxa3 27.Nfd7 f6 28.Nxf8 fxe5 29.Nd7 Bxd7]

25...Bxe4+ 0-1

Exeter Chess Club: Blunders at East Devon

This is, I repeat, "work in progress" so comments and criticisms are very much invited.

(1) Dobber P. - Nielsen J. H. [B01]

Major (1) 1.e4 d5 2.exd5 Qxd5 3.Nc3 Qa5 4.d4 c6 5.Nf3 Bf5 6.Be2 e6 7.0-0 Nf6 8.Re1 "Out of Book," says Fritz. 8...Nbd7 9.h3 Be7 10.Bf1 0-0 11.Nh4

Black mistakenly allows White to secure the two Bishops and a Queen's-side majority. 11...Rfe8 12.Nxf5 exf5 13.Bd3 Bd6 14.Bd2 Bb4 15.Qf3 g6 16.a3 Bxc3 17.Bxc3 Qd5 18.Qxd5 Nxd5 19.Bd2 Kg7 20.c4 N5f6 21.f3 Rad8 22.Bc3 Kg8 23.Rxe8+ Rxe8 24.Kf2 Nb6 25.b3 Nh5 26.Re1 Rxe1 27.Bxe1 Nf4 28.Bf1 f6 29.g3 Ne6 30.Bc3 Kf7 31.f4 Nc8 32.Bd3

This is the perfect endgame situation for White. **32...Ke7 33.b4 h6 34.Kf3 Nd6 35.a4 Nc7 36.b5 Kd7 37.c5 Nde8 38.Bc4 Ng7 39.Ba5 Nce6 40.Bc3 Nh5**

[0.75 Fritz 5.00: 40...Nc7]

41.a5 g5 42.Bxe6+ White hopes to distract Black from the Queen's-side.

[0.34 Fritz 5.00: 42.a6 1.00]

42...Kxe6 43.a6 bxa6

44.bxa6 This automatic recapture is less strong than the alternative.

[0.06 Fritz 5.00: 44.bxc6 Ke7 45.d5 g4+ 46.hxg4 fxg4+ 47.Kxg4 Ng7]

**44...Kd5 45.Ba5 Kxd4 46.Bb6 Kc4 47.Bxa7 Kb5 48.Bb6 Kxa6 49.Bd8 Kb5
50.Be7 Kc4**

[0.41 Fritz 5.00: 50...gxf4 51.g4 fxf4+ 52.hxf4 Ng7 53.Kxf4 h5 54.gxh5 Nxh5+
55.Kf5]

51.Bd6

[-0.66 Fritz 5.00: 51.Bf8 gxf4 52.g4 fxf4+ 53.hxf4 Ng3 54.Kxf4 Nf1 55.Be7 Nh2]

51...Kd5

[0.00 Fritz 5.00: 51...Ng7 52.Bf8 Ne6 53.Bxh6 Kd3 54.g4 fxf4+ 55.Kxg4 Nxf4 56.
Bg7]

52.Bf8 1/2-1/2

2) Durrant P. E. O. - Halmkin P. E. [B07]

Major (1) **1.e4 d6 2.d4 Nf6 3.Nc3 g6 4.f3 c6 5.Be3 Nbd7 6.Nge2 b5 7.a3
"Out of Book," says Fritz. 7...Qa5 8.g4 Bg7 9.Bg2 Rb8 10.Qd2 h5 11.g5 Nh7
12.O-O Qc7 13.f4 Nb6 14.b3 O-O 15.Rad1 a6 16.f5 Bb7 17.fxf6 fxf6 18.Nf4
c5 19.Ne6 Rxf1+ 20.Rxf1 Qc8 21.Bh3**

Black is in difficulty here but his next move makes things worse, adding a pin to the threatened discovery. In fact, White's Knight is currently pinned to the Bh3!

21...Nd7

[2.50 Fritz 5.00: 21...b4 22.axb4 cxb4 23.Na2 Bxe4 24.Qf2 Qe8 25.Nxb4 Bb7 26.Nxg7]

22.Nxg7

[1.66 Fritz 5.00: 22.Qf2 Qe8 23.Nc7 Qf8 24.Bxd7 Qxf2+ 25.Rxf2 cxd4 26.Be6+ Kh8]

22...Kxg7 23.Qf2 Qe8 24.Be6 Ndf8 25.Qf7+ Kh8 Suicide.

[#1 Fritz 5.00: 25...Qxf7 26.Rxf7+ Kh8 27.Rxe7 Nxe6 28.Rxe6 b4 29.axb4 cxb4 30.Nd5;

25...Kh8 26.Qg8#]

1-0

3) Foulds A. - England M. C. [E76]

Major (1) **1.d4 Nf6 2.c4 g6 3.Nc3 Bg7 4.e4 d6 5.f4 0-0 6.Nf3 c5 7.d5 Nbd7**
 "Out of Book," says Fritz. **8.Be2 a6 9.0-0 b5**

Fritz doesn't like giving up Pawns, but this Benko-style idea looks perfectly legitimate.

[0.94 Fritz 5.00: 9...b6 10.Qc2 Bb7 11.Be3 Qc7 12.f5 gxf5 13.exf5]

10.e5

[0.16 Fritz 5.00: 10.cxb5 Qb6 11.e5 Ng4 12.Na4 Qc7]

10...Ne8 11.e6 fxe6 12.Ng5

[-0.91 Fritz 5.00: 12.cxb5]

12...Nb6 13.cxb5 Bd4+ 14.Kh1 exd5

White's next is a miscalculation. **15.Nxd5**

[-3.09 Fritz 5.00: 15.Nf3 Bxc3 16.bxc3 Nc7 17.bxa6 Bxa6 18.Bxa6 Rxa6 19.a4]

15...Nxd5 16.Bc4 Nef6 17.Qf3 e6 18.Re1 Re8 19.bxa6 Qa5 20.Be3

[-3.66 Fritz 5.00: 20.Re2 Bxa6 21.Bxa6 Qxa6 22.Nxe6 Qc4 23.a3 Rxa3 24.Qxa3 Qxe2]

20...Bxb2 21.Rad1 Bxa6 22.Bd2 Qa3 23.Qxa3 Bxa3 24.Bxa6 Rxa6 25.Rxe6 Bb4 26.Bxb4 Nxb4

[-1.34 Fritz 5.00: 26...Rxe6 27.Nxe6 cxb4 28.Ra1 b3 29.a4 b2 30.Rb1]

0-1

4) Hibbitt A. - Duckham J. [B00]

Major (1) **1.e4 Nc6 2.g3 "Out of Book," says Fritz. 2...d5 3.Nc3 Nf6 4.Bg2 dxe4 5.Nxe4 Nxe4 6.Bxe4 g6 7.c3 e5 8.Ne2 Bh3 9.Ng1 Be6 10.d3 Bg7 11.f4 exf4 12.Bxf4 0-0 13.Qd2**

Black should seize the e-file. **13...Bd5**

[0.66 Fritz 5.00: 13...Re8 14.Ne2 (14.0-0-0 Bxa2) 14...Bg4 15.h3 f5 16.hxg4 fxe4 17.dxe4 Qxd2+]

14.0-0-0

[-0.78 Fritz 5.00: 14.Nf3 Re8]

14...Bxe4 The a-Pawn could have been taken with impunity - it contributes to Black's attack on that wing, and so is no waste of time.

[0.13 Fritz 5.00: 14...Bxa2 15.Bh6 Na5 16.Qf4 Nb3+ 17.Kc2 Bxh6 18.Qxh6]

15.dxe4 Qxd2+ 16.Rxd2 Ne5 17.Rd5 Rfe8 18.Bxe5 Rxe5 19.Rxe5 Bxe5 20.Nf3 Bd6 21.e5 Bc5 22.Rd1 Re8 23.Rd7 Re7 24.Rxe7 Bxe7 25.Kc2 Kf8 26.Kd3 Ke8 27.g4 h6 28.b4 Kd7 29.a4 a6 30.Kc4 c6 31.h4 b5+ 32.axb5 axb5 + 33.Kd4 Kc7 34.h5 g5 35.Ke4 Bf8 36.Nd4 Kd7 37.Kf5 Bg7 38.Nb3 Ke7 39.Nc5 Bh8 40.Ne4 Bg7 41.Nd6 Bh8 42.c4 bxc4 43.Nxc4 Bg7 44.Na5 Kd7 45.Nb3 Ke7 46.Nc5 Bh8 47.e6 Bc3 48.exf7 Kxf7 49.Nd7 Bxb4 50.Ne5+ Kg7 51.Nxc6 Bc3 52.Ke6 Bb2 53.Ne7 Bc3 54.Nf5+ Kh7 55.Kf7 Bb2 56.Nd6 Bc3 57.Ne4 Bb2 58.Nf6+ Kh8 59.Nd7 Kh7 60.Nf8+ Kh8 61.Kg6 Bc1 62.Kxh6 Bb2

 - [Annotated club games](#)
 - [Chess and its players](#)
-

Basic advice

To use this site you need to be able to read [chess notation](#) and sometimes to understand [chess symbols](#). The first port of call for any chess player ought to be the [rec.games.chess.* FAQs](#).

[A course of study](#) using some of these handouts for players of different levels ([guide to levels/ratings](#))

[Posters for a Junior Club](#) {D}

A selection of posters we have had up at Exeter.

[Essential checkmates](#) {D} (60k)

The basic mating patterns for beginners, and a few special ones from Vukovic.

[An ABC of chess](#) {D}

The basic mental toolkit of chessplayers.

General advice on the three phases of the game:

[General Opening advice](#) {D} {all?}

[General Middlegame advice](#) {D} {all?}

[General Endgame advice](#) {D} {all?}

Perhaps, if you don't play much, these three will be difficult to make full use of, but you might want to refer back to them from time to time.

[A Chess Glossary](#) {all}

For reference rather than study: comments and examples are particularly invited. There is another [glossary from SmartChess](#) and one from [London Chess Centre](#), one from [Steve Lopez](#) of ChessBase USA, and there's even an encyclopedia at [MECCA](#).

[Top 10 tips for Juniors](#) {D} {C}

A long press release, including notes on the *Giuoco Pianissimo*

[Mini Chess Games](#) {D}

for beginning chess players to use as training exercises

[Cool Tips](#) {all}

A trawl of advice from masters and others.

[Strategy and Tactics](#) {D/C}

Which should you study first or foremost? To be read alongside:

[Steinitz' theory](#) {all} 9 Jun 98

David Hooper's scholarly account, with some sketchy notes by yours truly.

Play [Chess with Attitude](#) {all}

Experienced NW Coach Phil Adams explains how to approach a game.

Attacking play

[General rules for the attack](#) {D}

From Steinitz and Vukovic

[Attacking the castled King](#) {D}

Examples of basic attacking themes and tactics

[The Very Slow King's-side attack](#) {C}

Examples of "clockwork" attacks with a closed centre.

[The Queen's-side attack](#) {C}

Attacking without a King as a target

[Contempt for Pawns](#) {all}

- We need more of it, says CJS Purdy

[Capablanca: the ultimate attacking player](#) {B/A}

Surprised? Not as much as his opponents, says Peter Lane

Chess Praxis: annotated games by club players

[Assess Your Chess](#) {all}

Some things to look for in your own games.

[How to lose at chess](#) {all}

Peter Lane explains all

[Books with annotated amateur games](#)

from the "Difference" handout

[Lessons from a Simul. \(1995\)](#) {all}

We has a centenary Simul. recently by IM Gary Lane: challengers had grades of BCF 70-160+ (1000-1900 ELO). [Differences at a Simul](#), 1996.

[What makes a difference?](#) {all} How 120-grade players beat 100s. (84k)

The master games found in the books (and in the Canon) are often clear but always deep. What actually makes a difference among club players?

[Differences at a Simul](#). See also Alex's [E-zine](#).

[Meat and potatoes: three phases of a tough game](#) {B}

A good club game annotated by one of the players AND one of the spectators!

[Swindle your way to success](#) {all}

An introduction to the ignoble art.

[Club games](#) {all}

An annotated selection from Exeter players

Bob Martin was kind enough to send me [Five Sicilians from Club Play](#) with notes describing his assessment and thinking during play.

[The Art of Analysis](#) {all}

An opportunity to exercise yourself and compare notes with other players.

[Assess Your Chess](#) {all}

Some things to look for in your own games.

[Simple Chess](#) {C}

The route from minor to major isn't all that hard, says Mark Blackmore.

[Dr. Dave](#)

Exeter Chess Club: A chess glossary

"The meaning is the use" - WITTGENSTEIN

More than most of these pages, this represents work in progress, and particularly your corrections, additions, and examples in PGN are invited!

I don't think it needs a search facility: it's not very long and you can use the one in your browser.

I'm gradually adding examples: [Example](#) means I've got one, [example?](#) means I'd like one. Games in [handouts](#) are usually also in the [Canon](#).

I started this a long time ago when browsing through Tartakower and du Mont's *500 Master games of chess*, mostly because they kept throwing in different terms for various sorts of sacrifices. If you know other good sources, please let me know!

An international glossary is to be found in Hooper and Whyld's *Companion*.

Caveats: There is little or nothing from the problem world, nor from Euwe and Kramer (e.g. their [classification of pawn structures](#)), nor from Kmoch.

Credits: the rec.games.chess.* FAQ, books above.

Glossary and Acronyms:

:

- Example:

accept:

to take e.g. an offered pawn - Example: **1. e4 e5 2. f4 exf4** is the King's Gambit Accepted. Antonym: *declined*.

accumulation of advantages (accumulation theory):

an approach to positional play, seen in Steinitz, where one advantage is

used to secure another, or at least is held while another is sought. Examples in the [Strategy/Themes](#) section of the Canon by Steinitz.

active defence:

defence involving some form of counterattacking method - either by attacking elsewhere, or by attacks against the opponents' attacking pieces. Example in the [Defence](#) section of the Canon.

advantage:

to have more of a chessboard asset - material or positional (time, space, mobility, Pawn skeleton) [Examples](#) all over the Canon.

AI =

Artificial Intelligence

amaurosis scachistica:

chess blindness (oversight), described ironically as a disease by Dr. Tarrasch. There is a superb example from Krogius in the [Errors](#) section of the Canon.

analysis:

usually an examination of variations Examples in the [Analysis](#) section of the Canon.

anti-positional:

against good strategical principles, as opposed to being a tactical oversight; Fischer famously described the [Winawer Variation](#) as "*anti-positional*", as it gives up the good Bishop and weakens the King's-side.

artificial castling, or castling by hand:

to exchange positions of king and rook by other means than normal castling e.g. by playing Ke1-f2, Rh1-e1, Kf2-g1 as in the main line of the [Benko Gambit](#).

artificial manoeuvre:

trying a bit too hard, or making an odd use of pieces. Simple examples might include blockading a pawn with a Q or developing the Rook by h2-h4 and Rh1-h3. Capablanca's [style](#) was the opposite of artificial - his games have a natural, graceful feel which is easy to recognise (but hard to do).

attack:

to move with a threat e.g. so that an opponent's piece may be taken; more generally, to move pieces towards e.g. the king's side in the hope of mate. Also used to describe some opening systems initiated by White, e.g. King's Indian Attack.

back rank:

the rank behind your Pawns. After castling the King's movement forward is often blocked by Pawns on the f,g and h files, and if the Rooks are played forwards you may fall into a *back rank mate*. In order to avoid this, players may create *Luft* (airhole) by a move like h2-h3. There are examples of back rank mates in the [Tactics](#) section of the Canon.

bad bishop:

a bishop hemmed in by its own pawns, on the same colour squares. Examples in the [Bishops](#) handout (and in the Canon).

BCE =

Basic Chess Endings

BCF =

British Chess Federation

BCO =

Batsford Chess Openings

bind:

a grip on the position, usually held by Pawns, [e.g. the Maroczy bind.](#)

black (white) square weaknesses:

having holes on the black squares. Examples include Bernstein-Mieses and Znosko-Borovsky vs. Mackenzie in the [Strategy/Themes](#) section of the Canon.

black square complex:

a network of black squares. Examples include Bernstein-Mieses and Znosko-Borovsky vs. Mackenzie in the [Strategy/Themes](#) section of the Canon.

blockade:

usually of pawns - a pawn may be blockaded by an enemy piece or pawn standing in front of it. The same effect may be achieved by good control of the square in front of it so that it would be taken without compensation if it advanced. example?

blockaded pawn:

a pawn where the square in front is occupied (or strongly controlled) by opposing pieces. An isolated pawn on c6 can be blockaded by Nc5; there are lots of examples in the [Pawn mobility](#) handout.

blunder:

an oversight; the [Tactics](#) section of the Canon is full of them.

break (pawn break):

a Pawn move with the hope or intention of opening lines, particularly files. In blocked positions like the [French Defence](#) it's important to organise your own pawn break.

break-up sacrifice:

a sacrifice to disrupt the defences e.g. Bxh6, gxh6, an example of which can be found in the [Attacking](#) section of the Canon.

breakthrough:

the breaching of an apparently secure formation, often with sacrifice of material, as in the Pillsbury-Lasker game in the [French Defence](#).

building a bridge:

Nimzovitch's description of how to win the Lucena position (*q.v.*) in a [Rook ending](#).

candidate move:

a move considered as a starting point in the analysis of variations. The term was made popular by Kotov's classic [Think Like a GM](#), the first chapter of which has been very influential; there are some examples in the [Analysis](#) section of the Canon.

candidate:

a Pawn that may be promoted; also, a player in competition to become the challenger for the world championship(s). See the game Marshall-Capablanca in the handout on [Pawn mobility](#).

CC =

correspondence chess (also known as postal chess, although e-mail chess is catching up!)

centralisation:

to move pieces towards the centre - a good idea if there is no obvious alternative plan. Example in the [Strategical Themes](#) section of the Canon.

centre:

the central four squares e4/d4/e5/d5 or the sixteen squares including these and those next to them.

clearance sacrifice:

see *vacating sacrifice*

close game or closed opening:

often slow, partly blocked positions, often arising from e.g. 1. d4 d5, with locked chains of pawns. There are several examples discussed in the [Pawn formations](#) handout.

combination:

a forcing sequence involving threats (of capture, check and/or mate), probably involving a sacrifice. There are examples in the [Tactics](#) and [Attacking](#) sections of the Canon.

complementary sacrifice:

a sacrifice which follows up a previous sacrifice - e.g. the *double bishop sacrifice* Bxh7/Bxg7, or two others like Rxf6/Nxh7 (See [Lasker-Bauer](#))

concentric:

towards the centre

conjugate squares (coordinate squares):

squares on which Kings have the relation of *distant opposition*, possibly complicated by intervening Pawns of either colour example?

connected pawn:

a Pawn with a Pawn on an adjacent file; a group of connected pawns form a pawn island. There is a nice example from Capa in the handout [On manoeuvres](#), and another from Karpov in the [style](#) section of the Canon.

consolidating manoeuvre:

to shore up a point e.g. Re8, Qe7, Nf6-d7 to protect e5.

control of centre:

the controlling influence of one side over the central squares. See the [rules for openings](#), and the opening section and under [centralisation](#) sections in the Canon. The [hypermoderns](#) pointed out that need not mean its occupation.

cooperation/coordination:

a general term used to describe the way pieces work together - for example, in an endgame, Q+N coordinate better than Q+B, a circumstance in which it is no disadvantage to have a Knight while the opponent has a Bishop (see *minor exchange*). There are some nice examples of coordination in the [Strategy/Themes](#) section of the Canon.

cramp:

lack of *mobility*. See the examples on Space in [Strategy/Themes](#) section of the Canon.

cross-check:

a check in reply to a check, typical of Queen endings (See the second Nimzo game in the handout [On Manoeuvres](#).)

decentralise:

to move away from the centre, often an anti-positional move. There are examples in the handouts on [Bishops Italian Game](#).

decisive:

a move which alters or makes certain the result of a game: a *decisive move* may make an advantageous position a winning one, a *decisive error* may lose the advantage, or the game. Examples are to be found in the handout on [Planning](#), and Kotov's [Think Like a GM](#).

decline:

to leave an offered pawn or piece, e.g. **1. e4 e5 2. f4 Bc5** is the King's Gambit Declined. Antonym: accept

decoy:

a diversion, as in the [model game](#) Morphy-Meek.

decoy sacrifice:

a sacrifice to remove a piece, e.g. to play Ba5 when ...Qc7xa5 means that the K will lack an important defender (see *decoy*)

defence:

to move to defend against an threat, e.g. to protect a piece that is attacked; more generally, a period of the game where the player is meeting and anticipating threats during an attack. Also used for opening systems chosen by Black, e.g. King's Indian Defence. There is a section in the Canon on [Defence](#).

deflection:

to distract a piece or pawn away from a task [example?]

deflecting sacrifice:

a sacrifice to deflect a defending piece e.g. to play Re1-e4 to deflect a Black Qb4 away from attacking b2. example?

denuding sacrifice:

a sacrifice to strip away defending pawn shield e.g. Bxh6 from the [Attack](#) section of the Canon.

development:

the bringing-out of pieces at the start of the game - one of the [aims of the opening](#) . Examples in the [Openings](#) Canon.

diagonal:

the chain of squares of the same colour running diagonally across the board: a1-h8 and a7-g1 are diagonals example?

diagonal mate:

mate where the decisive check is delivered along a diagonal, as in Fool's mate **1. g4 e5 2. f4 Qh4#**

discovered attack:

to attack by moving a piece or pawn out of the way of a line-piece such as rook, bishop or queen. 1.e4 discovers an attack on b5 and h5. There are examples in the [Tactics](#) section of the Canon.

discovered check:

to deliver check by moving a piece or pawn out of the way of a line-piece such as rook, bishop or queen. There are examples in the [Tactics](#) section of the Canon.

disjunction:

separation of pieces or pawns example?

dislodging manoeuvre:

a move to upset a defensive formation example?

disorganisation:

where pieces fail to protect key squares or each other, the opposite of *coordination*. See the booklet on [Italian Game](#).

distant opposition:

Kings separated by more than one rank (or file) but which still have the relation of opposition e.g. Kings on g1 and g5. See also the booklet on [King and pawn endings](#).

distant/outside passed Pawn:

a passed Pawn on the other side of the board from the defending King or other pieces - usually winning in a King and Pawn ending [example?]

diversionary sacrifice:

sacrifice in order to decoy [example?]

double (of Pawns):

to force enemy Pawns to become doubled, as in the booklet on [Pawn mobility](#).

doubled Pawns:

Pawns on the same file, often one obstructing the other, as in the booklet on [Pawn mobility](#).

double (of Rooks):

Rooks on the same file; if the Queen is also on that file the major pieces are *tripled*. We can see doubling in the handout on [Rooks](#), tripling in the one on [Pins](#).

double attack:

to attack two pieces at the same time with one move; 1.e4 attacks d5 and f5. Chernev and Reinfeld say that this is one of the two central themes of tactical play (the other being concentration of force). Lots of examples in the [Tactics](#) section of the Canon.

double Bishop sacrifice:

two complementary Bishop sacrifices, e.g. on g7 and h7, as in the famous game [Lasker-Bauer](#).

double check:

check from two pieces at once, always obliging a King move. Examples in the [Tactics](#) section of the Canon.

double fianchetto:

both Bishops developed in *fianchetto*, as the [Hypermodern](#) Reti was fond of doing.

double Rook sacrifice:

typically to allow a Queen to play ...Qxa1+, K moves, Qxh1, hoping to decoy the Queen away from defence. The *Immortal Game* features such a sacrifice, included in the [attacking](#) section of the Canon.

DT =

Deep Thought

DT II =

Deep Thought; next version

eccentric development:

moving a piece to an unusual square e.g. Ng1-h3.

ECO =

Encyclopedia of Chess Openings

elimination sacrifice:

a sacrifice to remove an important defender e.g. ...Rc8xNc3. Compare with examples of 'removing the guard' from the [Tactics](#) section of the Canon, which are without sacrifices.

ELO =

rating using Prof. Arpad Elo's rating system

en prise:

in a position to be taken

endgame:

a game where several pairs of pieces have been exchanged, probably

including the Queens, and where play is concerned not with checkmate or tactics as much as with gaining, and promoting, Pawns. See [Endgame Handouts](#).

equilibrium/balance of position:

an equal but not lifeless position is in balance or equilibrium; if this is not disturbed the correct result should be a draw. However, unduly slow or unduly rash moves may disturb the balance and give the opponent the advantage. See *latitude of the draw*.

error:

a mistake in analysis or assessment; a gross oversight is called a *blunder*. There is a section on [errors](#) in the Canon.

exchange:

exchange is used in two senses - to swap off for equal material, or unequal material. To *lose the exchange* usually means to lose rook for bishop. The *minor exchange* refers to the loss of bishop for knight, but this is not always a disadvantage. [example?]

extended fianchetto:

to *fianchetto* with e.g. b3 and Ba3. Also used for fianchetto with b4 and Bb2. [example?]

F-S II =

Fischer-Spassky match held Sept-Nov '92 (Fischer won 10-5)

fairy chess:

chess with newly invented pieces, usually seen in studies but can be played as a new game. [example?]

family check:

a check with other pieces attacked at the same time e.g. to play Nc7+ with Black Ke8, Ra8, Qd5. There is an example in Capablanca-Treybal in the handout [On manoeuvres](#) and in the Canon.

fianchetto:

to develop a bishop to the long diagonal by e.g. b3 and Bb2.

FIDE =

Federation Internationale des Echecs

file:

the columns of squares, e.g. a1-a8 is the a-file (Queen's Rook file)

fixed:

obstructed or restrained: see the [Pawn formations](#) handout.

flank opening:

slower openings aiming at control of the centre rather than its occupation - for White, this includes the English (1.c4), Reti (1.Nf3), and Catalan (1.d4, 2.c4, 3.g3) openings. See the handout on the [hypermoderns](#).

flight square:

a square available for a King to move to. If a King has no flight squares, a

check may give mate. See my game against Terry GRAY in the [Defence](#) section of the Canon.

FM =
FIDE Master

force (noun):

loosely, material. Chernev and Reinfeld see this as the other great defining theme of tactical play. See the [model game](#) by Kasparov in the Canon.

fork:

to attack two pieces, usually with a knight e.g. Nf7 attacking Qd8 and Rh8. Examples in the [Tactics](#) section of the Canon.

fortress:

a defensive blockade, keeping out the enemy forces, especially the King. One of the earliest known examples is the fortress White Kc1, Pd3, Re3 which can hold the draw against Black Kc8, Qd8. Try it!

gambit:

usually to sacrifice a pawn in the opening to gain development. Examples in the [Openings](#) section of the Canon.

GM =
Grandmaster

half-open file:

a file with pawns of only one colour. Look at the handouts on [Rooks](#) and, if you are brave, the Minority Attack section of the handout on [Pawn mobility](#).

half-passed pawn:

30 minutes after Pawn o'clock. [example?]

hedgehog:

a solid defensive arrangement with Pawns on the third rank e.g. Pb6,c5,d6, e6,g6, Bb7, Nbd7, Ngf6 and Be7 or Bg7. There is a [comment](#) on the *potential* of this formation under Nunn-Olafsson in the Planning section of the Canon, and an example game Webb-Hartston elsewhere in the Canon.

holes:

openings in the defensive front are called holes - usually holes cannot be defended by pawns. To play ...g6 creates a hole at h6. See Steinitz-Blackburne in the [Strategical Themes](#) section of the Canon.

hypermodern:

the treatment of the opening by the Hypermodern school, a description given them by Tartakower; I wrote a little [booklet](#) on their treatment of the opening.

ICS =
Internet Chess Server

IGM =
see GM

IM =

International Master

intermediary manoeuvre:

an in-between move or apparent diversion from the main line of events. I read the term in the Tartakower-duMont book, in an annotation to the Tartakower-Capablanca game I included in the [Tactics](#) section of the Canon.

intermezzo:

see *Zwischenzug*

IQP =

Isolated Queen's Pawn

irruptive sacrifice:

to break into the defences with a sacrifice e.g. Bxh7+, of which there are examples in the [Attacking](#) section of the Canon.

isolani:

Nimzovitch's term for an isolated pawn.

isolated pawn or isolani:

a pawn with no friendly pawns on the next-door files. There are always negative features, but may be compensating advantages - and these benefits are seen in the most positive light with an isolated Queen's Pawn. See the many examples in the [Planning](#) section of the Canon.

isolated Queen's Pawn:

an isolated pawn on d4 or d5 - here the compensating extra space and influence over the centre are at their maximum and can compensate for its weakness in the middle game. IQP positions often arise in the early middle-game from the QGD and Caro-Kann. See the many examples in the [Planning](#) section of the Canon.

Italian diagonal:

the diagonal a2-g8 dominated by Bc4 (or ...Bc5), the favoured development of the Italians of the Modenese school. See the booklet on [Italian Game](#).

IWM =

International Woman Master

KIA =

King's Indian Attack. There is some commentary on this opening in relation to the Sicilian Defence [here](#)..

kibitz:

to offer advice as a spectator - a dangerous pastime.

KID =

King's Indian Defense. I based a session on this system once, and the example games I used are filed under the [Planning](#) section of the Canon.

king hunt sacrifice:

a sacrifice which exposes the K in a way that it cannot retreat e.g. Qxh6+, Kxh6; Rh3+, Kg5 and the hunt is on!

King hunt:

a chase of the King across the board - which often arises after a sacrifice. [example?] Examples in the [Attacking](#) section of the Canon.

King's field combination:

a combination involving the squares directly attacked by the King directly e.g. involving Nxf7. Examples in the [Attacking](#) section of the Canon.

Knight defender:

the stalwart N on f3/f6 in front of the castled King.

knight wheel:

a five-move circling motion of the N to attack the square next to it, e.g. Nb1-a3-c4-e3-d1 to attack b2. A game Capablanca-Yates is an [example?].

latitude of the draw:

to retain enough access and control over all disputed areas of the board to avoid the risk of losing, assuming with fair play on both sides. It may be that commitment to an attack in one area risks losing the game because of loss of control elsewhere. This is an underlying theme of the Averbach-Keres game in the [Errors](#) section of the Canon.

line piece:

Rook or Bishop

line-clearance sacrifice:

a sacrifice to open up a line e.g. Nf4 when ...exf5 opens up a line for a B on b2 The move 11.d6 [model game](#) Morphy-Meek is both a decoy and a line-clearance sacrifice of a Pawn.

liquidating sacrifice:

a sacrifice, perhaps only temporary, to secure exchanges. The 45th game of the first Karpov-Kasparov match in the [Defence](#) section of the Canon is a superb example of this.

liquidation:

exchange of several pieces in succession, perhaps involving a forcing or temporary sacrifice. The examples given in the [Bishops](#) handout feature the Stahlberg/Capablanca manoeuvre, the aim of which is a defensive liquidation.

little centre:

the squares e4/d4/e5/d5. Also known as the *basic centre*.

long diagonal:

either of the diagonals a1-h8 or h1-a8. A Bishop developed in *fianchetto* (*q.v.*) sits on the long diagonal, and influences the *little centre* (*q.v.*).

long side:

for a passed pawn on d6, the long side is the files e-h, important in [Rook endings](#).

lose a tempo:

to use one more move than necessary in development or manoeuvre, thereby disadvantageously falling behind in development or in a Pawn race.

See the [rules](#) and examples from the [Canon](#). Contrast with *losing the move*.

lose the exchange:

to lose a rook for a bishop or a knight

lose the move:

to use more moves than necessary in development or manoeuvre, thereby advantageously gaining the *opposition* or creating *Zugzwang*. Contrast with *losing a tempo*.

Lucena position:

- an important winning position in a [Rook ending](#).

main line:

in *analysis*, particularly of the opening, the principal *variation* used or analysed. See the [Analysis](#) section of the Canon.

major pieces:

the Queen and Rooks

majority:

more pawn on one side than the opponent, e.g. four pawns on efg files against 3 pawns on fgh, with an open d-file

majority attack:

the attack with a majority of pawns, to create a passed pawn or break through to attack. See Marshall-Capablanca and Alekhine-Marshall in the [Pawn mobility](#) handout.

MCO =

Modern Chess Openings

middlegame:

the game after the players have wholly or mostly finished development.

mine:

a square which when occupied triggers a combination [example?]

minor exchange:

to lose bishop for knight (not always a disadvantage). See the [bishops](#) handout.

minor pieces:

Knights and Bishops

minority:

fewer pawns on one side than your opponent, e.g. 2 pawns on a+b-files against three pawns on abc.

minority attack:

to attack on a side where you have fewer pawns, to create a weakness in the majority. A difficult but important theme in the [Pawn mobility](#) handout.

mobility:

freedom to manoeuvre, often because of control of Space, an important [Strategical Theme](#).

mysterious Rook move:

a purposeful move of a Rook to a file which is not at present open (but may become so); one of Nimzovitch's colourful usages. [example?]

N =
Novelty (see TN)

NM =
National Master

obstruct:

when a piece moves in front of an enemy Pawn it obstructs its advance (see *blockade*) [example?]

occupation of centre:

to move pieces and pawns toward the centre e.g. to play Pc3,d4,e4, Nf3,d2, Bc4,e3. Several examples under "centralisation" in the [Strategical Themes](#) section of the Canon.

offside piece:

a piece on the side of the board, possibly distant from the main theatre of combat. A couple of examples in the [Strategical Themes](#) section of the Canon.

open game:

a position without locked pawn chains in the centre, often arising from **1. e4 e5**; see the [Pawn formations](#) handout, and material on example [openings](#).

opening trap:

a *trap* in the opening. The [Traps](#) section of the Canon is full of them.

opening:

the first moves of a game where the players are completing their development.

opposite coloured bishops:

having one bishop each which travel on different coloured squares; makes defence harder in the middle game, easier in the endgame. Examples, as always, in the [Canon](#), but there is also a handout on [Bishop endings](#).

opposition:

opposing Ks on e4 and e6 cannot pass without one giving way - but the one that gives way is the *first* to move, e.g. 1.Ke4-d4, Kf5; 2.Kd5, Kf4 and Black passes with gain of tempo. This is described briefly in [King and Pawn endings](#). See also *conjugate squares*.

OTB =
Over-the-board (as opposed to correspondence/postal chess)

outpost:

a square which cannot easily be attacked by pawns, suitable for occupation by a knight or other piece. **1. e4 e5** creates potential outposts on d5/f5 for White and d4/f4 for Black. **Nc3-d5** may be met with ...c6, but if White plays **Nd2-f1-e3-f5** Black may hesitate before playing ...g6 which may create holes in front of the king. See the [Knights handout](#).

outside the square:

when chasing a passed pawn, the K needs to be close enough to catch it - it will be close enough if it is inside a square drawn with the pawn at the corner and the 'home run' to the last rank as the side. So for a Pc5 the square is c5-g5-g8-c8, and if the Black K is outside (and cannot move in on the next move), the Pawn will queen.

overload:

a piece or Pawn with too many defensive tasks is overloaded. There are examples in the [Tactics](#) section of the Canon.

overloading sacrifice:

a sacrifice to overload a defender e.g. Nxf7 may overload a Nf6 which defends h7 and e8. There are examples in the [Tactics](#) section of the Canon.

overprotection:

to over-defend a point e.g. e4 is overprotected with Bc2, Nd2, Re1, Qe2, Ng3. The idea is that after e.g. Nf5 and an exchange ...Bd7xf5, the recapture e4xf5 will suddenly open up lines for the patient White pieces. Nimzovitch seemed to say that overprotection is an end in itself, but more plausible is that over-protection may make a strong move like Nf5 more decisive. There are examples in the [strategy/themes](#) section of the Canon.

passed pawn:

a pawn with no opposing pawns in front or to the sides, which can therefore advance without being exchanged by a pawn; often the only way to win once Queens are exchanged. See the [Endgame advice](#).

pawn chain:

connected pawns which protect each other e.g. c3-d4-e5. See the [Pawn formations](#) handout.

pawn islands:

Capablanca's term for groups of connected pawns, separated by (half-) open files. White with Pawns on a2, b2, d3, e4, f4 and h3 has three Pawn islands. There is an example in the handout [On manoeuvres](#).

pawn lever:

Kmoch's term for a pawn move that tries to open lines, especially a file. See *Pawn Break*

pawn majority:

a greater number of Pawns, usually on a wing e.g. White: Pa2, Pb2, Pc2
Black: Pa6, Pb5. See *majority attack*.

pawn race:

in an endgame where Pawns on each side race to promote - usually in a [King and Pawn endgame](#) where the Pawns cannot be captured or obstructed.

pawn sacrifice:

a sacrifice of a pawn, often called a gambit in the opening

penetrating sacrifice:

a sacrifice to get into the heart of the defences e.g. Ng5xf7 against a king castled behind a fianchetto. There are examples in the [Attacking](#) section of the Canon.

phalanx:

a triangle of pawns e.g. b3-c4-d5-e4-f3 in the KID and [Colle System](#).

Philidor position:

- usually, the important drawing position in a [Rook ending](#). Also, a winning position in the ending of Rook and Bishop against Rook.

pin:

a piece standing between an opponent's line-piece (N/R/Q) and a piece of your own of a higher value is pinned. After **1. e4 d6 2. Nf3 Bg4** the Nf3 is pinned. There's a handout on [Pins](#)

positional sacrifice:

a sacrifice played for long-term positional gain e.g. in the Sicilian defence ... Rc8xNc3 to double the White pawns and weaken d5/e4; a nice defensive positional sacrifice was made by Petrosian against Reshevsky, collected in the [Defence](#) section of the Canon.

preventive retreat:

a retreat made in anticipation of an attack (rather than reacting to it)
[example?]

prophylaxis:

prevention. Nimzovitch talked about this rather as an end in itself, which is misleading. [example?]

propitiating sacrifice:

a defensive sacrifice, hoping to slow up the attack long enough to organise a defence [example?]

QGA =

Queen's Gambit Accepted

QGD =

Queen's Gambit Declined

Queen hunt:

to chase and close down the space available to a Q, with the aim of winning it - see the handout on [Kings and Queens](#), and the Tactics section.

rank:

the rows of squares, e.g. a2-h2 is White's second rank, Black's seventh.

resign:

to give up a losing game before mate. It is polite to do so, and perhaps less painful for yourself, but some players play on in the hope of their opponent blundering.

restricted centre:

adopting a modest central formation with pawns on e.g. e6/d6. See the [Pawn formations](#) handout.

retrograde manoeuvre:

to move backwards - e.g. Nc3-d1 so as to play c3. There is an example of this by Botvinnik in the [style](#) section of the Canon.

sacrifice for draw:

a sacrifice which has a draw rather than a win as the aim, e.g. to sacrifice Nxc5 for one of two pawns in the ending, leaving a Bd3 unable to support a Ph4 against a K on g7/h8, or to achieve a perpetual check. See the [Defence](#) section of the Canon.

sacrifice for space:

to play e.g. the Cochrane Gambit in the [Petroff](#) **1. e4 e5 2. Nf3 Nf6 3. Nxe5 d6 4. Nxf7** which gains time to secure the advance of the central pawns.

sacrifice:

to give up material - if you can see how you can win back the material quickly, it is called a combination or sacrificial combination, if you are just hoping to get a lasting initiative and cash in later, it is sometimes called a *speculative* sacrifice or, following Spielmann, a *real* sacrifice. Spielmann referred to sacrificial combinations as 'sham' sacrifices. Tartakower and DuMont describe a dozen types of sacrifice, found elsewhere in this Glossary.

seventh:

short for the seventh rank (a2-h2 or a7-h7) - a good place for a rook.

seventh rank:

the rank a7-h7 (or a2-h2 from Black's side), which may be powerfully occupied by a R in the ending. A famous example Capablanca-Tartakower is given in the appropriate [handout](#).

Nimzovitch used the term *seventh rank absolute* for control of the seventh rank by a Rook, with the enemy King trapped on the back rank, as in that game.

short side:

for a passed P on d6, the files a-c are the short side - crucial in [Rook endings](#).

skewer (X-ray attack):

attack by a line piece on an enemy piece behind which is another enemy piece e.g. White Rd1, Black Bd5, Bd7. There are examples in the [Tactics](#) section of the Canon.

SM =

Senior Master

smothered mate:

a K mated usually by a N when all the escape squares are occupied by friendly men e.g. Nf7+ with Kh8, Rg8, Pg7/h7. See the handout on [Basic Mates](#).

stalemate:

no mate, but no possible (legal) moves for one side is stalemate - often occurs with a lone K when the attacking side overlooks the idea e.g. Kf6,Qd6 with K on e8 to move is stalemate. See the handout on [Basic Mates](#).

strong points:

squares where you dominate e.g. the square e5 is often a strong point for Black after playing Pe5, Re8, Nbd7 and Pd6 or Bd6. A hole for your opponent may be a strong point for you; this is mostly clearly seen with respect to [Knight outposts](#).

tabiya:

(*Arabic*) Originally one of the conventional starting formations for play, now used to describe key positions arising from the opening. The examples given under [transposition](#) in the Canon are good examples.

TD =

Tournament Director

tempo:

a move lost or gained, often used in discussing the opening. [example?]

tempo - fight for tempo:

for example, after **1. d4 d5 2. c4**, if Black plays ...dxc4 White will play e3 and Bf1xc4. If Black waits until White has already played e3 and Bd3, and then plays ...dxc4, White will of course play Bxc4 but will have lost a move (Bf1-d3xc4). So White will try to wait, and Black will also wait - hence the *Tempo Struggle Variation* **1. d4 d5 2. c4 e6 3. Nc3 Nf6 4. Bg5 Be7 5. e3 O-O 6. Nf3 Nbd7 7. Rc1 Re8 8. Qc2 c6 9. a3 a6 10. h3...** where White won't yet play Bd3 and Black won't yet exchange.

temporary sacrifice:

a sacrificial combination where the regain of material can be foreseen [example?]

TN =

Theoretical Novelty: A new idea in an opening line (usually used when a GM first tries it).

trap:

a plausible move that loses to a hidden or unexpected combination - e.g. **1. e4 e5 2. f4 Bc5** is a simple trap, since the obvious **3. fxe5** fails to **3...Qh4 +**. **2...Bc5** is also a well-motivated move in its own right, and is to be preferred to playing poor moves for the sake of setting a trap that the opponent may spot. The [Traps](#) section of the Canon is full of both sorts!

trebuchet:

a common *Zugzwang* position, e.g. White Ke5, Pd4; Black Kc4, Pd5.

triple:

to move all three major pieces onto a file, as in the Alekhine-Nimzo game in the handout on [Pins](#).

two bishops:

having both bishops where your opponent has only two knights or a bishop and a knight; normally an advantage. See the handout on [Bishops](#).

undermining sacrifice:

a sacrifice to remove a guard e.g. Nxd6 removing the defender of e5, or Ph5-h6 to undermine a Knight on f6 [example?].

unmasking:

to uncover an attack (or defence), e.g. Nf3-e5 may unmask the fianchettoed Bg2. In the [Tactics](#) section of the Canon there is an example of each, one under overloading, the other under unmasking defence.

USCF =

United States Chess Federation

vacating sacrifice:

to sacrifice a piece thus releasing a square for a more powerful piece e.g. Nh5xg7 allowing Qe2-h5. Pawns are the commonest sacrifice made for this reason. [example?]

vacation:

to leave a square so that another piece may occupy it, e.g. Rf1-e1 and Bb5-f1 is sometimes played. [example?]

variation:

an alternative line of play: see *analysis*

visualisation (sight of the board):

the ability to picture and assess a position, as might arise in *analysis* of a possible variation; a common source of *error*

weak pawn:

a Pawn that cannot easily be defended, e.g. a *backward pawn*. There are examples in the [Strategy/themes](#) section of the Canon.

weak pawns:

generally, a collection of pawns which have some of the features listed above: *doubled, isolated, backward...* There are examples in the [Strategy/themes](#) section of the Canon.

weak square:

a square that cannot easily be defended, and may become a *hole* or *outpost* for the opponent. There are examples in the [Strategy/themes](#) section of the Canon.

weakness:

a weak Pawn or weak square There are examples in the [Strategy/themes](#) section of the Canon.

WGM =

International Woman Grandmaster

windmill:

an alternation of checks and captures e.g. White Rg7, Bf6, Black Kh8 - the famous Torre-Lasker game is in the [Tactics](#) section of the Canon.

wrong bishop:

a Bishop which does not control the Queening square of a Pawn, e.g. White: Kg3, Bf3, Pg4, Ph4, Black Kg8, Nf6 - the move ...Nxg4 draws for Black despite the loss of the piece. See the [Bishop endings](#) handout.

Zeitnot:

(German) time trouble [example?]

Zugzwang:

(German) where a side is satisfactorily defended, but any move will upset the defence - and they must move! This is not unusual in [Rook endings](#) and other simplified positions - indeed, the *opposition* and *trebuchet* are examples of Zugzwang - but it is most unusual with more pieces on the board, although Nimzovitch famously managed it against Samisch, a game found in the [Pawn Mobility](#) handout.

Zwischenzug:

(German) literally, in-between move. When, for example, a re-capture is delayed for a move to make a capture, check or threat elsewhere.
[example?]

* indicates most common or important types

A. Symmetrical Centre Formations

A.1. Vanished centre

e.g. Scotch 1. e4 e5 2. Nf3 Nc6 3. d4 exd4 then ...d5 and exd5

The placing of the pieces and/or a development advantage will decide if the game has any real meat.

A.2. The QP centre

e.g. French 1. e4 e6 2. d4 d5 3. exd5 exd5

The open e-file and outpost at e5 (e4) may become crucial if pieces are allowed to settle there. The natural break c2-c4 does little to add tension, unless castling is performed on opposite sides; the Q-side is then risky with outpost at c5.

A.3. The KP centre

e.g. Philidor or Closed Lopez 1. e4 e5 2. Nf3 d6 3. d4 Nd7 4. dxe5 dxe5

Assuming King's-side castling, the break f2-f4 is much sharper

A.4. Symmetrical Four Pawns Centre: (i) KPs forward

e.g. Closed Giuoco Piano 1. e4 e5 2. Nf3 Nc6 3. Bc4 Bc5 4. d3 d6

White can prepare the advance d2-d4 with c2-c3, or go for f2-f4. Black may try to prevent this e.g. h7-h6 and g7-g5, or go for broke on the Queen's-side.

A.5. Symmetrical Four Pawns Centre: (ii) QPs forward

e.g. Queen's Pawn Game 1. d4 d5 2. Nf3 Nf6 3. e3

The advance e2-e4 is more difficult to achieve than d4 in **A.4**; the more common plan is c2-c4 and a shift of the struggle to the Queen's-side. If for some reason c2-c4 is impossible or undesirable, then e2-e4 must be sought.

B. Positional advantage in the centre

B.1. Advanced Fixed Single-pawn (i) KP forward

e.g. Alapin Sicilian 1. e4 c5 2. c3 Nf6 3. e5 Nd5 4. d4 d6 5. Nf3 dxe5 6. dxe5

White's chances lie in a direct attack on the King, with a B on d3

B.2. Advanced Fixed Single-pawn (ii) QP forward

e.g. Benoni/KID lines with late ...e6 1. d4 c5 2. d5 d6 or Franco-Benoni 1.e4 e6 2. d4 c5 3. d5 exd5 4. exd5

White has a space advantage which must be nurtured carefully.

B.3. Partially Fixed Centre (i) tension form

e.g. Philidor and Closed Lopez 1.e4 e5 2. Nf3 d6 3.d4 Nf6 4. Nc3 Nd7

White will try to maintain d4 with c2-c3 and use extra space and mobility, sometimes for K-side attack with outpost on f5

B.4. Partially Fixed Centre (ii) Benoni without ...e6

e.g. 1. d4 c5 2. d5 d6

White has a large space advantage and can play for direct attack on the King with f4-f5 or just roll down the middle with e4-e5

B.5. Partially fixed centre (iii) French with White d-pawn backward

e.g. Advance French with exchange on d3 1. e4 e6 2. d4 d5 3. e5 b6 4. Bd3 c5 5. f4 Ba6 6. Nf3 cxd4 7. Nxd4 Bxd3 8. cxd3

White has a post on d4 for a Knight. The major pieces may come off on the c-file, when White has a post on d4 for a King; without exchanges White can play for attack and break with f4-f5

B.6. Partially fixed centre (iv) French with Black d-pawn backward

e.g. Alapin Sicilian 1. e4 c5 2. c3 Nf6 3. e5 Nd5 4. d4 cxd4 5. cxd4 e6 6. Nf3 b6

Black has a post on d5, White can play for attack on the K with B on d3

B.7. Mobile Centre (i) King Pawn

e.g. Nimzo after exchanges of the d- and c-pawns, or other slow opening after d3, e4 and ...d5xe4

There will be a struggle for e5 e.g. White will sieze it with a N and play for attack. This can be resolved by the advance of either e-pawn, when we have structures considered above.

B.8. Mobile Centre (ii) Queen Pawn

e.g. Indian Defence with ...e5xd4, e3xd4, or Alekhine Exchange variation 1. e4 Nf6 2. e5 Nd5 3. c4 Nb6 4. d4 d6 5. exd6 exd6

White has a space advantage and is very likely to play c4 (else ...d5 will come quickly), when Black will be short of space. Black must put pressure on the White centre.

There will be a struggle for d5, which can be resolved by the advance of either d-pawn, when we have structures similar to those above, although White can go for a bind with c4-c5.

C. Extra Central Pawns

C.1. Absolute Centre

e.g. King's Gambit Declined 1. e4 e5 2. f4 Bc5 3. Nf3 d6 4. c3 or Nimzo after cxd5, ...exd5 and e4, ...dxe4 and fxe4

A substantial asset, but not decisive - the reason being the pressure that can be put on the pawns by the opponent's rooks (they are in fact a type of hanging pawns). If the centre can be kept intact, and perhaps advance, then the advantage will manifest itself.

C.2. Hanging Centre

e.g. French 1. e4 e5 2. d4 d5 3. Nd2 Nf6 4. e5 Nd7 5. Bd3 c5 and later dxc5, and ...f6, exf6, ...Nxf6

Another hanging formation, with a key square at e5. If White can occupy e5 or at least prevent ...e6-e5 then Black will be worse. Usually Black can keep White pestered with enough nuisances to keep in the fight, but often a single tempo will make the difference between a successful blockade and a successful advance.

C.3. Classic Centre

e.g. Giuoco Piano 1. e4 e5 2. Nf3 Nc6 3. Bc4 Bc5 4. c3 Nf6 5. d4 exd4 6. cxd4

One of the strongest formations - if White can keep it intact. In the Giuoco Piano line above Black can disrupt it with ...d5. But if Black retreats with 6...Bb6 the centre will either form the basis of a crushing attack, or simply roll forward.

C.4. Neo-Classic Centre *

e.g. Slav, Queen's Gambit Accepted, Grunfeld Defence, Queen's Indian 1. d4 d5 2. c4 c6 3. Nf3 Nf6 4. Nc3 dxc5 5. a4 Na6 6. e4 or 1. d4 Nf6 2. c4 g6 3. Nc3 d5 4. Nf3 Bg7 5. Qb3 dxc4 6. Qxc4

Again strong: Black's best hopes are to hit at it with ...e5 (risking d5) or ...c5. Sometimes in the Grunfeld ...f5 may play a part.

C.5. Neo-Classic Centre: with open file

e.g. Grunfeld 1. d4 Nf6 2. c4 g6 3. Nc3 d5 4. cxd5 Nxd5 5. e4 Nxc3 6. bxc3 c5 7. Bc4 Bg7 8. Ne2 cxd4 9. cxd4

Tactically this may still be dodgy for Black, but strategically is preferable to **C4**, as the cramp is less, the opportunities to hit at the centre (and directly at pieces) are better, and the Queen's-side majority is an endgame plus.

C.6. Unbalanced tension form

e.g. Slav 1. d4 d5 2. c4 c6 3. Nf3 Nf6 4. Nc3 e6 5. e3 Nbd7 6. Bd3 Bd6 7. O-O O-O 8. e4 dxc4 9. Bxc4 e5

A tense formation: White can exchange on e5 (rival majorities), Black can exchange on d4 (ditto), or White can push d5 (not strategically worrying for Black, but may be troublesome tactically).

C.7. Latent Central Majority (i) QP in reserve

e.g. Delayed Exchange Ruy Lopez 1. e4 e5 2. Nf3 Nc6 3. Bb5 a6 4. Ba4 Nf6 5. O-O Be7 6. Bxc6 dxc6 7. d3

Often in the RL Exchange White plays d4, and after ...exd4 has a free majority on the King's-side. Here Black would play ...c5 if White hinted at this, so White must either play more slowly for d4, or try f4, or leave things in the centre as they are and creep over to the King's-side for an attack on the Black King.

C.8. Latent Central Majority (ii) KP in reserve

e.g. Queen's Gambit and Caro-Kann Exchange. 1. d4 d5 2. c4 e6 3. cxd5 exd5 or 1. e4 c6 2. d4 d5 3. exd5 cxd5.

White has a choice of plans: to prepare the advance e2-e4 (usually by f3), or to play the minority attack.

The e4 advance is favoured by (a) the d4-pawn not being vulnerable, and (b) two bishops to fight in the resulting open position. So in the line 1. d4 Nf6 2. c4 e6 3. Nc3 Bb4 4. a3 Bxc3 5. bxc3 d5 6. cxd5 exd5 all the signals are there for the e4 plan to be favoured; in the QGD the minority attack is most common.

D. Closed Formations

D.1. Blocked oblique (i) QP forward *

*e.g. King's Indian 1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 O-O 5. Nf3 d6 6. Be2 e5 7. d5, or from Ruy Lopez with d4-d5 (cf. **B3**)*

White has only two ways to open a file: the breaks f4 and c5. The former may leave a weak backward pawn on e4 after ...e5xf4 (even if White can reply g3xf4), so the latter is preferred. Black will naturally counter with ...f5. White can also easily achieve b4, with a strong Queen's-side initiative, but Black's attack on the castled White King is dangerous.

D.2. Blocked oblique (ii) KP forward *

e.g. French advance 1. e4 e6 2. d4 d5 3. e5 (also Caro-Kann)

In practice ...c5 and ...cxd4, cxd4 is common, transferring the position to **F3**. Without ...c5 Black is crushed by the advance f2-f4-f5. So the only important position is if Black pushes past with ...c5-c4, as in the line 1. e4 e6 2. d4 d5 3. e5 c5 4. c3 Nc6 5. Nf3 Qb6 6. a3 c4. White will still aim for the attack, but Black can play for infiltration of b3 and to open lines with ...b5-b4. Black can castle Queen's-side, but this may make ...b5 more difficult.

D.3. Stonewall

e.g. most common is the Dutch 1.d4 f5 2. c4 e6 3. Nf3 Nf6 4. Nc3 d5, but also Semi-Slav and other QP openings.

Black plays for a King's-side attack, with an outpost on e4 and a pawn-break ...g5 and ...f4; White's easiest strategical plan involves assault of c6 with c4-c5 (usually) and b4-b5 (always). White can also try to get at e6 with f3 and e4.

More generally White must aim at restraint of ...e5, exchange of dark-squared bishops, and controlling key squares with Ns on f3 and d3. Usually c4xd5 is met by ...c6xd5, but if White is organised for b4 then ...e6xd5 may wrong-foot White's pieces.

D.4. Anti-Stonewall

e.g. Semi-Slav 1. d4 d5 2. c4 c6 3. Nc3 e6 4. e3 f5 5. f4!

If White has this option Black is advised to avoid the Stonewall; the King's-side attack is unlikely to get far and the assault on c6 is just as dangerous.

D.5. Pseudo-Stonewall (Botvinnik)

e.g. English Opening 1. c4 c5 2. Nc3 Nc6 3. g3 g6 4. Bg2 Bg7 5. e4

If Black can organise ...d5 White's formation will shatter; White must adopt a move-order whereby ...d5 is impossible or undesirable. Then the central bind can enable a King's-side initiative with f2-f4 and f4-f5. If both players adopt this formation, the advantage will go to the player who achieves f4 first.

D.6. Wyvill Formation

e.g. Nimzo-Indian 1. d4 Nf6 2. c4 e6 3. Nc3 Bb4 4. e3 b6 5. a3 Bxc3 6. bxc3 d6 7. e4 Nbd7 8. Bd3 O-O 9. O-O e5 10. d5

Marmaduke Wyvill, the nineteenth century MP, specialised in this formation; the details are important here.

Ideal for Black is an outpost on c5, and Queen's-side castling. Then the assault on the weak c-pawns can be carried out in safety, and Black can even think about opening a file with ...f5. But White should not volunteer for d4-d5, and usually Black can only induce this by playing ...c5; if in addition Black has castled King's-

side White has good chances.

Sometimes pressure with ...Re8 and ...Qe7 threatens a discovery with ...e5xd4, and this may be enough to provoke d4-d5; Euwe once played ...Na5, ...Ba6 and ...Qe6!

D.8 Winawer Formation

e.g. (and almost exclusively) 1. e4 e6 2. d4 d5 3. Nc3 Bb4 4. e5 c5 5. a3 Bxc3 6. bxc3.

White has prospects of a King's-side attack with f4-f5, but Black's attack on the c-pawns can be certain of opportunities. The big structural disadvantage for Black is the lack of the Bf8, creating possibilities of a dark-square campaign. Black should castle Queen's-side, if at all.

E. Open Formations

E.1. Ruy Lopez Formation

e.g. Philidor or Ruy Lopez Steinitz Variation with ...e5xd4.

White's superior mobility gives a lasting advantage. It can be milked for a direct attack on the King; White can post the Bc1 on b2. These days most players don't fancy this defensive task as Black and try to maintain the e5 pawn.

E.2. French/Caro formation *

e.g. 1. e4 e6 2. d4 d5 3. Nc3 dxe4 4. Nxe4, or 1. e4 c6 2. d4 d5 3. Nc3 dxe4 4. Nxe4

With the Bc8 stuck behind the Pe6, Black has a lasting problem. White can post a Knight on e5 and play sharply to restrict Black's pieces and attack the Black King.

It is natural to seek ...c5, but even after an exchange White has the Queen's-side majority. In the Caro version the Bc8 usually escapes, so Black's chances are better here, even if it takes two moves to play ...c5. Very often Queen's-side castling is an option for either side.

E.3. Sicilian Formation *

e.g. 1. e4 c5 2. Nf3 Nc6 3. d4 cxd4 4. Nxd4 Nf6 5. Nc3

A very delicate situation strategically; White has a deal more space, and prospects of a King's-side attack. But Black has an extra central pawn, a minority

attack and pressure down the c-file, and myriad tactical opportunities.

The development of the Bf8 is important; after ...e6 and ...Be7 Black has good central control but a slightly weak point on d6; the centrally sounder ...g6/...Bg7 adds so much to Black's Queen's-side play that Black would play it all the time, if it didn't also create new opportunities for White's King's-side attack after h4-h5.

White can achieve a powerful bind, and stop Black's counterplay, by playing c2-c4. Black may be able to equalise by good defensive play and achieve a freeing break with ...b5 or ...d5, but it is essentially a defensive task that misses out on the counter-attacking possibilities of the Sicilian.

E.4. Rival Majorities (i) with open file between

e.g. English Opening 1. c4 e5 2. Nc3 Nf6 3. g3 d5 4. cxd5 Nxd5 5. Bg2 Nb6 and later d4 and ...e5xd4; see also E3.

Simply, each side must advance their majority. With Queens on, advancing pawns on the King's-side cannot be done casually, but neither can their advance be ignored.

E.5. Rival Majorities (ii) with no open file between

This formation can be achieved by the centre pawns pushing past each other once their partners have been exchanged, but more often it will arise from **A2/A3** after an exchange on an outpost square.

The plans are clear for each side; the bishop's pawns must advance, with equal chances.

F. Half-open formations

F.1. Half-Open with an open file (i) symmetrical

e.g. Exchange Slav 1. d4 d5 2. c4 c6 3. cxd5 cxd5

This is plainly similar to other symmetrical formations, with tactical or dynamic features (lead in development, two bishops, concentration of force) being more important than the pawn formation. The structurally important thing here is on which side the dark-squared bishops are placed.

F.2. Half-Open with an open file (ii) focus formation

e.g. Ruy Lopez, Tchigorin Defence 1. e4 e5 2. Nf2 Nc6 3. Bb5 a6 4. Ba4 Nf6 5. O-O Be7 6. Re1 b5 7. Bb3 O-O 8. c3 d6 9. h3 Na5 10. Bc2 c5 11. dxe5 dxe5

This is strategically very much richer. Usually there are too many pieces around for invasion via the d-file to be possible, but it should not be overlooked. White has an outpost on d5, and after an exchange on d5, e4xd5 gives a passed pawn and the Bc2 and Nd2 can look forward to a bright future. White also has a plan of Nf5 and a King's-side attack, and may seek to control c4 after a2-a4.

Black has counterplay on the Queen's-side, and if c5-c4 proves possible, Black suddenly has avoided any nasties on c4 and has a goal on d3. So White's pursuit of King's-side goals cannot be careless.

F.3. Half-Open with an open file (iii) Blocked Oblique

e.g. King's Indian, Ruy Lopez or French; cf. D1/D2

The discussion in D1/D2 was all about how to open a file, but here such a file already exists. Four possibilities present themselves, combining each central pawn being forward with either bishop file being open. Care and exploitation of the open file affects markedly the plans described above; both players may switch to the side with the open file in order to keep an eye on it.

Exchanges of rooks down the open file reduce the chances of a successful mating attack, but do not much reduce the positional pawn advances.

F.4. Half-open with half-open files (i) French

e.g. French with dxc5/...c5xd4 e.g. 1. e4 e6 2. d4 d5 3. Nc3 Nf6 4. e5 Nd7 5. f4 c5 6. Nf3 cxd4 7. Nxd4 Bc5 8. Be3

Black has chances against the Queen's-side; c4 is an outpost that cannot easily be disturbed by b2-b3. White's chances come on the King's-side, and the attack must be swift and sure - f5 and h4 may figure in the attack. White should maintain a Knight at d4, although Black can exchange or otherwise badger it. If Black can force White to abandon d4, then the advance ...d5-d4 may decide the game in Black's favour.

F.5. Half-open with half-open files (ii) Caro-Kann / QGD Exchange

e.g. 1. d4 d5 2. c4 e6 3. cxd5 exd5 or 1. e4 c6 2. d4 d5 3. exd5 cxd5

We see this formation from White's point of view in the diagram, where we might expect White to be better developed than Black. The half-open e-file and outpost on e5 gives prospects of a King's-side attack, even if Black had the majority there, as the advance ...e5 will be difficult or impossible. Black must counter with a minority attack, and can think about spending a moment to exchange the bad Bc8.

F.6. Passed pawn, protected but blockaded

*e.g. This may arise from **D1** after an exchange on c5. or from **C4** after the advance of both the c- and e-pawns is combined with the advance of the d-pawn*

White has a difficult game: no way of opening a file recommends itself, and Black can roll down the Queen's-side. With the e-pawn replaced by a pawn on c4, Black's chances would naturally come with ...f5. The best blockader is always a Knight, who loses no squares to the pawns on c5, d5 or e5, and is handily placed to support pawn advances on either side.

F.7. Isolated Queen's Pawn *

e.g. Queen's Gambit Accepted 1. d4 d5 2. c4 dxc4 3. Nf3 Nf6 4. e3 c5 5. Bxc4 cxd5 6. exd4 or Caro-Kann Panov Attack, 1. e4 c6 2. d4 d5 3. exd5 cxd5 4. c4.

Isolated pawns are weak, but central pawns are strong. The critical and common case is the isolated Queen's pawn (IQP) where the strength and space is greatest. White can avoid exchanges and has hopes of a King's side attack based on a N on e5 and a B on the b1-h7 diagonal; Black can consolidate and pile up on the d4 pawn, seeking exchanges and an advantageous endgame.

F.8. Hanging Pawns *

Often derived from IQP after ...Nd5xc3 and bxc3, then c3-c4. Directly from e.g. Semi-Tarrasch 1. d4 d5 2. c4 e6 3. Nf3 Nf6 4. Nc3 c5 or Queen's Indian 1. d4 Nf6 2. c4 e6 3. Nf3 b6 4. e3

The pawns are strong and can be turned to attack because they control so many key squares, but if either pawn moves the weakness of the other will be sharply etched. Again, the defending side can seek exchanges and the endgame, but this is nothing like as straightforward a game as the IQP. There is a defensive idea based on the advance of the isolated a-pawn, hoping to disrupt the Black Queen's-side pawns.

Exeter Chess Club: You Know When You've been Benko'd

Steve Homer

- [Key ideas for Black:](#)
- [Outline of main lines and variations in the Benko Gambit](#)
 1. [Black's Queen's-side attack: White, RG - Homer, SJ: Surrey Individual #4, 1988](#)
 2. [White locks up the Queen's-side, Black has a central roller: Parker, C - Homer, S](#)
 3. [White plays actively in the centre: Jepps, G - Homer, S: Exeter Premier #?, 1996](#)
 4. [White plays actively in the centre, part 2: Jepps, G - Homer, S: Somerset vs. Devon, 1996](#)

In the Benoni Black often struggles to arrange ...b5 with moves like ...Na6-c7, ...b6, ...a6 and ...Rb8. Here in the Benko Black plays it at once, as a gambit.

Key ideas for Black:

For example, in the main line after

1.d4 Nf6 2.c4 c5 3.d5 b5 4.cxb5 a6 5.bxa6 g6 6.Nc3 Bxa6 7.e4 Bxf1 8.Kxf1 d6 9.Nf3 Bg7 10.g3 0-0 11.Kg2 Nbd7

- Control of long dark diagonal, especially the central dark squares e.g. ...Nfd7-e5
- Pressure against the d5 Pawn
- Queen's-side attack with e.g. ...Qb6, ...Rfb8, ...Nbd7-b6-c4. White's extra passed(!) Pawn usually remains frozen with terror on a3 or a4.
- Central attack with ...e6, ...d5

We can see all of these ideas below. White must counter on the King's-side or in the centre. Oddly for a gambit line, Black usually won't mind the exchange of Queens in the Benko, because the Queen's-side initiative persists, while White can no longer hope for mate on the other side.

However, in none of the games below did White play the main line, and in only one was the gambit Pawn accepted! This is not just to avoid theory, as, according to BCO, Black often emerges with enough pressure to draw in the main lines.

Outline of main lines and variations in the Benko Gambit

Good and bad bishops

good bishops: active bishop used for attack

Euwe - Thomas, 1934

1. d4 d5 2. c4 e6 3. Nc3 Nf6 4. Bg5 Be7 5. e3 O-O 6. Nf3 Nbd7 7. Rc1 c6 8.

Bd3 dxc4 9. Bxc4 Nd5 10. Bxe7 Qxe7 11. O-O Nxc3 12. Rxc3

This was the main continuation from this opening, although it is now considered pretty played out. Black has a bad bishop on c8, so...

12... e5 13. dxe5 Nxe5 14. Nxe5 Qxe5 15. f4

Black has a choice of several queen moves. In the first game we examine what happened after 15...Qe7 [next diagram]

White has the better bishop, currently pointed at Black's King's side, but this is only a temporary advantage. Left alone, Black can play ...Be6 or move the b-pawn and play ...Bb7. White's only hope of a win is to keep Black on the hop.

16. f5

Stops ...Be6 well enough, but Euwe has further plans for this pawn - namely, to run it to f6, disrupting the K-side and using the good bishop for attack.

16...b5 17. Bb3 b4 18. f6! gxf6 19. Rxc6 Qxe3+ 20. Kh1

20...Bb7 Euwe and Kramer give the alternatives:

[20... Be6 21. Bxe6 fxe6 22. Qg4+ Qg5 [22... Kh8 23. Rc7] 23. Qxe6+ Kh8 24. Rxf6 Rg8 [24... Rfe8 25. Qf7] 25. Rf2 winning a pawn]

[20... f5 21. Qh5 with strong attack]

21. Rcxf6 Qe4 22. Qd2 Kh8

[Or 22... Rad8 23. Qg5+ Kh8 24. Rxf7]

23. Bxf7 Rac8

[Much better was 23... Rad8 with good drawing chances, despite White's pressure e.g. 24. Qg5 [Rg8 25. Bxg8 Rxc8 26. Rf8 Qxg2+ =, or 24. Qf2 Qe7 25. Bb3 Rxf6 26. Qxf6+ Qxf6 27. Rxf6 Bd5 =]

24. R6f2 Rcd8 [24... Qg4]

25. Qg5 (NEXT DIAGRAM)

25... Rd6

[Not 25... Qd4 26. Bd5 Qg7 [or 26... Rxf2 27. Qxd8+ Kg7 28. Qg5+ Kf8 29. Qg8+ Ke7 30. Re1+ Kd6 31. Bxb7] 27. Rxf8+ Rxf8 28. Rxf8+ Qxf8 29. Qe5+ Qg7 30. Qe8+]

26. Bd5! 1-0

26... Rxf2 27. Qg8#

The QGD is not a win for White; here Black solves the problem of the Bc8.

Stahlberg-Trifunovich, 1951

1. d4 d5 2. c4 e6 3. Nc3 Nf6 4. Bg5 Be7 5. e3 O-O 6. Nf3 Nbd7 7. Rc1 c6 8. Bd3 dxc4 9. Bxc4 Nd5 10. Bxe7 Qxe7 11. O-O Nxc3 12. Rxc3 e5 13. dxe5 Nxe5 14. Nxe5 Qxe5 15. f4

Here Black tried an alternative Q move 15... Qf6, stopping the f5-f6 rush.

16. f5 a5 17. a4

[17. a3 b5 18. Ba2 b4 19. Rc5 Ba6 20. Re1 Bb5, with the Black bishop having good play]

17... Rb8 18. Qc2 Bd7

[Not 18... b5 19. axb5 cxb5 20. Bxb5 Rxb5 21. Rxc8]

19. Rd3 Rbd8 20. Qd2 b5

[Not 20... Bc8 21. Qxa5 Rxd3 22. Bxd3 Qxb2 23. f6]

21. axb5 Alternatives are no better:

[21. Rd6 Bc8]

[21. Bxb5 cxb5 22. Rxd7 Rxd7 23. Qxd7 Qxb2 24. Qxb5 Qxb5 25. axb5 Rb8 "with meagre chances for White" - Euwe]

21... cxb5 22. Bd5 Bc6

With the full entry of this piece into the game, Black has at least equal chances

23. e4

[23. Bxc6 Rxd3 24. Qxd3 Qxc6 may even be better for Black, since Black's Queen-side majority look like the most important feature of the game]

23... Bxd5 24. exd5 Qb6+ 25. Qf2 Qxf2+ 26. Kxf2 draw agreed

Bad bishops

Bs move on squares of only one colour. A bishop hemmed in by its own pawns on the same colour squares is called a *bad bishop*. It is sometimes tempting to put pawns on the same colour squares as

the bishop, particularly in the ending, with the hope that the bishop will defend them. Well, unfortunately, the bishop will probably be so blocked by the pawns that it can hardly defend itself. Depending on what other pieces there are on the board, the opponent's king will probably be able to slip in between the pawns, and the bishop won't be able to stop it. You want your pawns on one colour square, and the bishop on the other, in the middle game and in the ending. (And if you've got two bishops in the middle game, you generally want your pawns right out of the way.) So be careful where you put your pawns, and don't get your bishops stuck one side or the other of a chain of pawns.

[Event "bad bishops"][Site "-"][Date "1956.??.??"][Round "?"]
 [White "barden"][Black "rossolimo"][Result "1-0"]

1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 a6 6.f4 e6 7.Be2 Qc7 8.O-O

White's theoretically 'bad' bishop dominates the board and gives White a winning game. It is *Black's* bishop that is stuck behind White's pawns on white squares!

The two bishops

"Deux fous gagnent toujours, mais trois fous, non!"

-- Alexander ALEKHINE, on the advantage of the Two Bishops at amateur level

The bishop is a longer-range piece than the knight. This advantage is sometimes called the minor exchange, for, all else being equal, the bishop will be a better piece than the knight. Two bishops, provided they can make use of their better range and aren't blocked by pawns, are rather better than two knights or a knight and a bishop, particularly in fully open positions. (Think how easy it is to mate with the two bishops. Have you ever tried to mate with two knights?)

Capablanca advised rehearsing the mate with the two Bishops, not because it was particularly likely to occur in practice, but to experience directly the power of two Bishops cooperating in an open position.

So in OPEN positions, the two bishops are boss.

In CLOSED positions, the knights may be better.

In SEMI-OPEN positions. well...

The side with the two bishops must not let the knight(s) settle on any outposts, and can create trouble on both sides of the board at once when the poor knights will be hard-put to keep up. It's generally though that the two bishops are good enough to win. Paulsen made use of this in the middle 1800s, but the technique was perfected and publicised by Steinitz.

Let's have a look at these in turn.

bishops: two bishops in ending

This was my introduction to the power of the two bishops.

Ditmas,H - Regis,D (March, 1979)

1. e4 e6 2. d4 d5 3. Nd2 c5 4. exd5 Qxd5 5. Ngf3 cxd4 6. Bc4 Qd6 7. O-O Nc6 8. Nb3 Nf6 9. Nbx d4 Nxd4 10. Nxd4 a6 11. b3 Qc7 12. Bb2 Bd6 13. h3 O-O 14. Bd3 e5 15. Nf5 e4 16. Nxd6

White sensibly takes the two bishops.

16...Qxd6 17. Be2 Qe7 18. c4 Rd8 19. Qc1 Bf5 20. Qf4

Black must make a concession - in the event, I buried the bishop on g6. White's two bishops and queen's side majority win the game.

20... Bg6 21. Rfd1 Rxd1+ 22. Rxd1 Rd8 23. Qe5 Re8 24. Qxe7 Rxe7 25. b4 Rd7 26. Rxd7 Nxd7 27. c5 Kf8 28. c6 bxc6 29. Bxa6 f6 30. Bd4 Bf7 31. a4 Bb3 32. a5

1-0

It's worth dwelling on this for a moment. Material is equal, and Black can think about getting his own majority moving, but its all too late. The two bishops cover all the key squares, and Black can hardly stop the advance of the a-pawn.

bishops: two bishops in open middlegame

This is the other easy case: the bishops usually chop up the opposition.

Nunn - Tal (Wijk Ann Zee, 1982)

1. e4 c5 2. Nf3 e6 3. d4 cxd4 4. Nxd4 Nc6 5. Nc3 a6 6. g3 Qc7 7. Bg2 Nf6 8. O-O h6 9. Nb3 Be7 10. a4 d6 11. f4 O-O 12. g4 Bd7 13. h4 b5 14. g5 Nh7 15. Be3 b4 16. Ne2 d5 17. exd5 exd5 18. Qxd5 Rac8 19. a5 Nb8 20. Ned4 Bg4 21. Rae1 Rfd8 22. Qe4 Re8 23. Bf2 Bd7 24. Qd5 Qd6

Here is an instructive moment from the Nunn/Griffiths book. White has many advantages, including an extra pawn.

25. Nf5!

"White is still in no hurry to exchange queens: he permits his opponent the option of 25...Bxf5 26 Qxf5 instead of the game continuation. EITHER WAY HIS BISHOP-PAIR WILL DOMINATE THE BOARD. But he is also returning the extra pawn: possibly as instructive a piece of Grandmaster thinking as anything that has gone previously. The point is not that the variations are difficult to calculate, but that Nunn is thinking boldly; dynamically. Time and again we see how his thinking is the reverse of a weaker player. It is not, 'If I play Nf5 I shall lose a pawn; I will only do that as a last resort'; but rather, 'I can simplify the position by Nf5 and continue to generate powerful threats; it would be a miracle if Black could get away with ...Rxc2"

25...Qxd5 26. Nxe7+ Rxe7 27. Bxd5 Rxe1 28. Rxe1 Rxc2 29. Re7

It's all starting to clear up nicely.

29...Bc6 30. Bxf7+ Kf8 31. Rc7 hxg5 32. Bc5+ 1-0

bishops: two bishops in a semi-open or closed middlegame

This is not so easy. The side with the two bishops must open lines, but if it were easily possible, the Nimzo-Indian would not be a viable defence..

Here are two fine examples where the Bishops win, one more open, one more closed.

Bronstein D - Golombek H (Moscow) [E43] 1956

1. d4 Nf6 2. c4 e6 3. Nc3 Bb4 4. Nf3 b6 5. e3 Bb7 6. Bd3 Ne4 7. O-O Bxc3 8. bxc3 O-O 9. Ne1 f5 10. f3 Nf6 11. a4 Nc6 12. e4 fxe4 13. fxe4 e5 14. Bg5 Qe7 15. Nc2 Qd6

Black is doing his best to get White to play d4-d5, when as well gaining the square c5, Black would expect the blocked pawn formation to favour the Knights. White finds an interesting way of resisting the encouragement.

16. Bh4 Rae8 17. Bg3 Qe7 18. Ne3 d6 [18... exd4 19. Nf5] 19. Bh4 Nd8 20. Nd5

This leap into the (still) empty d5 point provokes Black into giving up the remaining Bishop. It should not be supposed that Golombek was unaware of the dangers in this, but considered it relatively best, given the pressure on f6. **20... Bxd5 21. cxd5 c6 22. Qb3 Kh8 23. Rae1 h6 24. Qa3 g5 25. Bg3 Nd7 26. dxc6 Nxc6 27. Bb5**

After the pins on the King's-side have finally been disposed of, White starts up in the same trade on the Queen's-side!

27... Rxf1+ 28. Rxf1 Ncb8

this decentralising move doesn't look right

29. Bc4 Rf8

Black's position now falls apart

30. Rxf8+ Qxf8 31. dxe5 Nc5 32. exd6 Nxe4

[Have the Knights finally secured a defence?]

33. d7 ! 33... Nc5

[33... Qxa3 34. d8=Q+ Kg7 35. Qg8+ Kf6 36. Qf7#]

34. Be5+ Kh7 35. Bd3+

Golombek comments that these weren't mere Bishops, but Archbishops! 1-0

Rubinstein - Nimzovitch (Berlin, 1928)

1. d4 Nf6 2. c4 e6 3. Nc3 Bb4 4. Qc2 d6 5. e3 c5 6. Bd3 Nc6 7. Nge2 e5 8. d5 Bxc3+

Normally in the Nimzo-Indian Defence, Black hopes to double the c-pawns to give a target for attack in the event that White disappears off to the King's side. Not here, so Black can only hope to gum up the game for his knights.

9. Qxc3 Ne7 10. Qc2 O-O 11. O-O Ng6 12. Ng3 Re8 13. f3 Bd7 14. Bd2 a6 15. h3 b5 16. b3 Qb6 17. Kh2 a5 18. Rab1 b4

White's bishops are well-placed for attack and defence. The knights don't seem to know where to go next to be useful.

White's next move forces open line for the bishops.

**19. f4 exf4 20. exf4 Nf8 21. Bc1 Qd8 22. Qf2 a4 23. Bb2 Ng6 24. Rbd1
axb3 25. axb3 Ra7 26. Rde1 Rxe1 27. Rxe1 Nf8**

White's next move may look odd, but the Nf6 is Black's best defensive piece. White can take it off, then bring his knight into play on e4. Black will be forced to make entry points for White.

**28. Bxf6 Qxf6 29. Ne4 Qh6 30. f5 Ra3 31. Rb1 Ra6 32. g4 f6 33. Kg3 Bc8
34. Re1 Bb7 35. Qe2 Nd7**

White's forces are ideally placed, and Black's are scattered. The following combinational finish should come as no surprise.

36. Nxd6 Rxd6 37. Qe8+ Nf8 38. Re7 g6 39. Qf7+ Kh8 40. Re8 Rd8 41. Qxf6+ Kg8 42. Qe6+ Kg7 43. f6+ 1-0

the two bishops in a semi-open endgame

And this is the hardest case, which Paulsen and Steinitz perfected. The side with the two bishops must deny the knights any stable outposts while advancing on both sides of the board.

[Dr. Dave](#)

Exeter Chess Club: Pawn mobility

Pawn Majorities, Pawn Rollers, blockade and restraint

I will give several illustrative games here - fairly straightforward games from Capablanca, Alekhine, Korchnoi and Karpov showing pawns mobile and dangerous, and the others (e.g. Nimzovitch's) showing them stuck and vulnerable.

*"The most important feature of the chess position is the activity of the pieces. This is absolutely fundamental in all phases of the game (opening, middlegame and **especially** endgame). The primary constraint on a piece's activity is the Pawn structure."*

-- Michael STEAN, in **Simple Chess**.

- [4.6.3.4 The minority attack \(Tough stuff-level 3/4 players only\).](#)

Pawn majorities

If you have a pawn majority - say, three pawns to your opponent's two on one side of the board - you should be able to create a passed pawn. By advancing the pawn, you should be able to create enough pressure to win. Steinitz was the first great exploiter of pawn majorities, particularly on the Queen's side where they can often advance without fear of exposing the king. Some people regard the Queen's side majority as an advantage in itself, but realistically it depends on where and what the other pieces are. Here's how it's done, by the man whose chess Lasker regarded as the perfect expression of Steinitz' theories. Capablanca makes it all look so smooth:

marshall-capablanca, 1909

1.d4 d5 2.c4 e6 3.Nc3 c5 4.cxd5 exd5 5.Nf3 Nc6 6.g3 Be6 7.Bg2 Be7 8.O-O Nf6 9.Bg5 Ne4 10.Bxe7 Qxe7 11.Ne5 Nxd4 12.Nxe4 dxe4 13.e3 Nf3+ 14.Nxf3 exf3 15.Qxf3 O-O 16.Rfc1

"He should have advanced his K-side pawns at once to counterbalance the advance of Black on the Q-side. White's inactivity on his stronger wing took away all the chances he had of drawing the game." CAPABLANCA

16...Rab8 17.Qe4 Qc7 18.Rc3 b5 19.a3 c4 20.Bf3 Rfd8 21.Rd1 Rxd1+ 22.Bxd1 Rd8 23.Bf3 g6 24.Qc6 Qe5 25.Qe4 Qxe4 26.Bxe4 Rd1+ {!} 27.Kg2 a5 28.Rc2 b4 29.axb4 axb4 30.Bf3 Rb1 31.Be2 b3 32.Rd2 Rc1 33.Bd1 c3 34.bxc3 b2 35.Rxb2

Rxd1 36.Rc2 Bf5 37.Rb2 Rc1 38.Rb3 Be4+ 39.Kh3 Rc2 40.f4 h5 41.g4 hxg4+ 42.

Pawn mobility

A group of pawns that isn't a majority but has the potential to advance is sometime called a **qualitative majority**, that is, is has the quality if not the substance of a majority. Some games seem to illustrate how the whole pawn front of one side can act as a majority.

[event "pawn mobility?"][site ""][date "1963.??.?"][round "?"]

[white "korchnoi"][black "szabo"][result "1-0"]

1.c4 e5 2.Nc3 Nf6 3.g3 Bc5 4.Bg2 O-O 5.e3 Re8 6.Nge2 Nc6 7.O-O d6 8.d4 Bb6 9.h3 Bf5 {?} 10.d5 Nb8 11.g4 Bd7 12.Ng3 h6 13.Kh2 a5 14.f4 exf4 15.exf4 Nh7

Here's Karpov in the driving seat of a mean set of pawns: this is the classic central pawn roller, often associated with Botvinnik.

[karpov-miles]

1.c4 b6 2.d4 Bb7 3.d5 e6 4.a3 Nf6 5.Nc3 Bd6 6.Nf3 exd5 7.cxd5 O-O 8.Bg5 Re8 9.e3 Be7 {!?!} 10.Bc4 {!} 10...h6 11.Bf4 Nh5 12.Be5 Bf6 13.Bd4 Ba6 14.Bxa6 Nxa6 15.O-O c5 16.Bxf6 Nxf6 17.Qd3 Qc8 18. Nd2 d6 19.Nc4 Rd8 20.e4 Nc7 21.b4 Na6 22.b5 Nc7 23.a4 Qd7 24.f4 Re8 25.Rad1 Rad8 26.h3 Qe7

The pawn formation is like a Benoni, without a shred of counterplay for Black. In the Benoni Black can usually get the Q-side majority going if there are no tactical chances on the K-side.

27.e5 dxe5 28.d6 Qf8 29.fxe5 Nh7 30.Qf3 Ne6 31.Qb7 Ra8 32.Nd5 g6 33.Ne7+ Kg7 34.Nc6 1-0

Immobile pawns

The Nimzo-Indian is named for its founder, Aaron Nimzovitch. His idea was to play the move ...Bb4, usually following up with ...Bxc3, bxc3 when White has doubled pawns. The front c-pawn may be attacked, and if White cannot generate some activity elsewhere risks having the whole position grind to a halt. Against unsuspecting opposition Nimzovitch made his 'defence' look more like an 'attack'!

[White "mattison"][Black "nimzovich"][Site "carlsbad"][Date "1929.??.??"][Result "0-1"]

1. d4 Nf6 2. c4 e6 3. Nc3 Bb4 4. Nf3 Bxc3+ 5. bxc3 d6 6. Qc2 Qe7 7. Ba3 c5 8. g3 b6 9. Bg2 Bb7 10. O-O O-O 11. Nh4 Bxg2 12. Kxg2 Qb7+ 13. Kg1 Qa6 14. Qb3 Nc6 15. Rfd1 Na5

16. Qb5 Qxb5 17. cxb5 The doubled pawn have gone but the weaknesses remain.

17...Nc4 18. Bc1 a6 19. bxa6 Rxa6 20. dxc5 bxc5 21. Ng2 Nd5 22. Rd3 Rfa8 23. e4 Ne5 0-1

Against more aware opponents you won't find it so easy. While you're busy winning the c-pawn White can create attacking chances with the two bishops on the other side.

[Event "?"][Site "budapest ct"][Date "1950.??.??"][Round "??"]

[White "bronstein, David"] [Black "najdorf, M."] [Result "1-0"]

Let's see these two plans in opposition, by two opponents who know each what they're doing, and more to the point, what the other is trying to do. Spassky-Fischer illustrates a popular modern line, popularised by Hubner. Black reverts to the original Nimzo formula, refraining from early castling but investing the tempo in ...Bxc3. White then strikes back with an advance of the e- and f-pawns. The game is decided strategically when Black immobilises the K-side pawns, making weak points of his own but in a position where White cannot attack them and can only sit tight. In the event, White blunders on #27.

[Event "?"] [Site "rekjavic world ch"] [Date "1972.?.?.?"] [Round "?"]

[White "spassky, b."] [Black "fischer, rj"] [Result "0-1"]

Another Black weakness but the last opportunity for White to develop any activity. 17. Rb1 Bd7 18. Rb2 Rb8 19. Rbf2 Qe7 20. Bc2 g5 21. Bd2 Qe8 22. Be1 Qg6 23. Qd3 Nh5 24. Rxf8+ Rxf8 25. Rxf8+ Kxf8 26. Bd1 Nf4

27. Qc2 Bxa4 0-1

In fact modern GM games often don't feature the classic doubled c-pawns, or White may quickly undouble them. The play in the main lines is rich and subtle - in fact, it is the Queen's-side equivalent of the Ruy Lopez in terms of its depth and variety of plans available to each side. Typical main lines are 1 d4 Nf6, 2 c4 e6, 3 Nc3 Bb4, 4 e3 c5, 5 Bd3 d5, 6 Nf3 O-O, 7 O-O Nc6, 8 a3 Bxc3, 9 bxc3 dxc4, 10 Bxc4 Qc7 when White's pawns are OK but ...e5 and ...Bd7-c6 leaves Black solid, or an even more solid approach 1 d4 Nf6, 2 c4 e6, 3 Nc3 Bb4, 4 e3 b6, 5 Bd3 Bb7, 6 Nf3 O-O, 7 O-O d5, 8 a3 Bd6. Here's a game illustrating modern trends.

The game shows White using a move order which avoids Nf3 to allow f3/e4, to which Black responds by making a run with the e-pawn to slow up White in the centre. The general tension around the mobility of White's pawns has thus given rise to vigorous plans from both sides. Black grabs the c-pawn, and in successfully defending against White's initiative returns the material with minor disadvantage. Determined play with White increasingly frustrated brings the game right round for a Black victory in the endgame.

Last two doubled pawn games: one from me, about a month after reading Nimzo's **My System**, the second a classic blockading game from that book by the man himself. Once I'd read about doubled pawns and outposts, I could suddenly beat 120+ grade players without doing more than applying the rules in positions that I understood and my opponents didn't.

[Event "march vs st.neots 'b',1978"] [White "pope, m. "] [Black "regis, d"]

1. c4 e5 2. Nc3 Nc6 3. e3 Bb4 4. a3?! Unnecessary, particularly since Black has a good central stake.

4...Bxc3 5. bxc3 d6 6. d4 Nf6 7. d5? A reflex move, but creates horrid weaknesses.

7...Nb8 8. f3 Nbd7 9. Bd3 b6 10. Qc2 Nc5 11. Ne2 Nxd3+ 12. Qxd3 Qe7 13. e4 Nd7 14. O-O Nc5 15. Qc2 Ba6 That's about it. Black will win a pawn and White hasn't any counterplay organised in the centre or K-side. In fact, ...f5 looks good for Black. 16. Be3 Bxc4 17. Bxc5 Bxe2 18. Qxe2 dxc5 19. Qb5+? Qd7 20. Qxd7+ Kxd7 21. c4 a6 22. a4 Rad8 23. f4? Another weakness appears on e4. 23...exf4 24. Rxf4 f6 25. Raf1 Rde8 26. h4 Re5 27. Kf2 Rhe8 28. Kf3 c6 {Clocks: 60,15} 29. Rd1 cxd5 30. [johner-nimzovich]

1.d4 Nf6 2.c4 e6 3.Nc3 Bb4 4.e3 O-O 5.Bd3 c5 6.Nf3 Nc6 7.O-O Bxc3 8.bxc3 d6 9.Nd2 b6 10.Nb3 e5 11.f4 e4 12.Be2 Qd7!?

Here's the tricky bit, a mysterious Queen move. White's natural plan is to play g4. White wouldn't dare if there was a Black rook on the h-file. There isn't, but Black moves his Queen(!) to h7, slowing up White's plan until Black takes the initiative on that wing for himself.

13.h3 Ne7 14.Qe1 h5 15.Bd 2 Qf5 16.Kh2 Qh7! Told you. 17.a4 Nf5 18.g3 a5 19.Rg1 Nh6 20.Bf1 Bd7 21.Bc1 Rac8 22.d5 Kh8 23.Nd2 Rg8 24.Bg2 g5 25.Nf1 Rg7 26.Ra2 Nf5 27.Bh1 Rcg8

White's #28

28.Qd1 gxf4 29.exf4 Bc8 30.Qb3 Ba6 31.Re2 Nh4 32.Re3 Bc8 33.Qc2 Bxh3 34.

Bxe4 Bf5 35.Bxf5 Nxf5 36.Re2 h4 37.Rgg2 hxg3+ 38.Kg1 Qh3 39.Ne3 Nh4 40.Kf1 Re8 0-1

Three opening themes that are all about pawns

1. Let's look at **majorities** first. Lasker and Fischer have both employed the apparently tame Exchange Variation of the Ruy Lopez. 1 e4 e5, 2 Nf3 Nc6, 3 Bb5 a6, 4 Bxc6. Black replies 4...dxc6 so as to be able to answer 5 Nxe5 with 5...Qd5! Instead White goes 5 d4 exd4, 6 Qxd4 Qxd4, 7 Nxd4. White has a clear Q-side pawn majority, but Black has no corresponding way to make a passed pawn on the other side. Black isn't lost in this position - it's not so much an ending as a queenless middle-game, and Black can put the bishop pair to active use. But White's advantages in the position are easy to understand and make use of. There is a comparable line of the Caro-Kann: 1 e4 c6, 2 d4 d5, 3 Nc3 dxe4, 4 Nxe4 Nf6, 5 Nxf6 exf6 (?!), where Black has only a defensive slog to look forward to.

2. Now let's look at a line where **mobility** is the theme. Here's a line of the King's Indian in the Four Pawns variation. 1 d4 Nf6, 2 c4 g6, 3 Nc3 Bg7, 4 e4 d6, 5 f4 O-O, 6 Nf3 c5, 7 d5 e6, 8 Be2 exd5, 9 exd5. Now here Spassky devised a plan to rob the White position of its potential. 9...Nh4! 10 O-O Bxc3! 11 bxc3 f5! 12 Ng5 Ng7. Black has effectively restrained White on both sides, at cost of the bishop pair, and a weakness on e6. In this blocked position the bishop pair is of no account and the last move adequately defends e6. Chances are equal.

3. There are many lines where the key pawn feature is the **isolated Queen's pawn** (IQP). For example:

QGA: 1 d4 d5, 2 c4 dxc4, 3 Nf3 Nf6, 4 e3 e6, 5 Bxc4 c5, 6 O-O cxd4 7 exd4 and White has the IQP

QGD Tarrasch: 1 d4 d5, 2 c4 e6, 3 Nc3 c5, 4 cxd5 exd5, 5 Nf3 Nf6 and a later dxc5, Bxc5 gives Black an IQP

French Tarrasch: 1 e4 e6, 2 d4 d5, 3 Nd2 c5, 4 exd5 exd5 and a later dxc5, Bxc5 again gives Black an IQP

Typical manoeuvring against the IQP involves posting a knight on the outpost in front of it; the side with the IQP will usually try to make use of any space or attacking chances rather than defend passively. Two examples, decades apart:

[Event "wch"][Site "USA"][Date "1886.?.?.?"][Round "9"]

[White "zukertort"][Black "steinitz (IQP)"][Result "0-1"]

1. d4 d5 2. c4 e6 3. Nc3 Nf6 4. Nf3 dxc4 5. e3 c5 6. Bxc4 cxd4 7. exd4 Be7 8. O-O O-O 9. Qe2 Nbd7 10. Bb3 Nb6 11. Bf4 Nbd5 ...etc., or

[Event "ct final"][Site "moscow "][Date "1974.?.?.?"][Round "16 (part - IQP)"]

[White "karpov"][Black "korchnoi "][Result "Q-Q"]

1. e4 e6 2. d4 d5 3. Nd2 c5 4. exd5 exd5 5. Ngf3 Nc6 6. Bb5 Bd6 7. O-O cxd4 8. Nb3 Nge7 9. Nbx d4 O-O 10. c3 Bg4 11. Qa4 Qd7 ...etc.

4.6.3.4 The minority attack (Tough stuff-level K players only).

BCF Certificate of Merit

Class 4 (Advanced)

BCF Certificate of Merit

Class 3 (Higher)

This, if you like, is the opposite of a majority attack. In positions with no open file separating the two sides of the board (for example after **1 d4, d5; 2 c4, e6; 3 cxd5, exd5**), the side with the majority on one side cannot advance the pawns to create a guaranteed passed pawn. The best that can be achieved may be some open files, but the single extra pawn may be left as a backward pawn on a half-open file. Now, if this is true, it may be possible for the side with the minority to advance their pawns with the hope of creating this very weakness, or some other weak point. This is the minority attack. So, in these positions with only half-open files, we often see each side attacking on the side where they are supposed to be

weaker - where they have the minority - and remaining passive on the majority side. Let's see this in action: play over the games fairly quickly to get a 'feel' for the flow of the games.

evans - opsahl (CHERNEV) [D51]

minority attack in the QGD exchange, 1950

1. d4 Nf6 2. c4 e6 3. Nc3 d5 4. Bg5 Nbd7 5. e3 Be7 6. Qc2 O-O 7. cxd5 exd5 8. Nf3 c6 9. Bd3 Re8 10. O-O Nf8 11. Rab1 Ne4 12. Bxe7 Qxe7

The classic setting for the minority attack. 13. b4 a6 14. a4 Nxc3 15. Qxc3 Bg4 16. Nd2 Qg5 17. Rfc1 Re6

Drumming up some King's-side counterplay. 18. b5 ! 18... axb5 19. axb5 Bh3 20. g3 Rae8 21. bxc6 bxc6 22. Bf1 ! 22... Bxf1 23. Nxf1 Ng6 24. Rb6

A critical moment - if Black has to go back now he is really up against the ropes. 24... Ne7 [24... Nh4 25. Rxc6 The Rook on c6 stops the Black Rook on e6 joining the attack. I think the White King is safe here. 25... Nf3+ 26. Kh1 h5 27. Qb3 [27. Qd3]] 25. Qb4 h5 26. Rb8 Rxb8 27. Qxb8+ Kh7 28. Qf4 ! 28... Kf6 44. Nh7+ Ke6 45. Ng5+ Kd6 46. Rb7

46... f6 ? [46... f5] 47. Nh7 Ke6 48. Nf8+ Very neat 48... Kf7 [48... Kd6 49. Rd7#] 49. Nxf6 Kxf6 50. Rxe7 White has a pawn and hopes of collecting more. 50... Kf5 51. Rc7

51... Rc1 52. Rc8 Kg6 53. Kg3 Rc2 54. h4 Kf5 55. Rh8 Kg6 56. f5+ Kxf5 57. Rxh5+ Now White has a passed pawn. 57... Kg6 58. Rh8 Kf5 59. Rg8 Rc1 60. Kg2 Ra1 61. h5 Ra7 62. Rg3 Rh7 63. Rh3 Kg5 64.

Kf3 Offering to trade the pawn for a winning King raid. 64... Rh6 65. Rh1 Kf5 66. Kg3 Kg5 67. Rh4 Kf5 68. Rf4+ Kg5

69. Rg4+ ! Again offering the pawn, but again Black dare not accept. 69... Kf5 [69... Kxh5 is rather like the game continuation: 70. Rh4+ Kg5 71. Rxh6 Kxh6 72. Kf4 Kg6 73. f3 Kg7 74. Kf5 Kf7 75. f4 Ke7 76. Kg6 Ke6 77. f5+ Ke7 78. Kg7] 70. Kh4 Rh8 71. Rg7 Ra8 72. h6 Ra1 73. Rg3 Rh1+ 74. Rh3 Rg1 75. Rf3+ Kg6 76. Rg3+

The winning clearance 76... Rxd3 77. Kxd3 Kxh6 78. Kg4 Kg6 79. Kf4 Kg7 80. Kf5 Kf7 81. f3 1-0

vogt - andersson (STEAN) [B84]

minority attack in the Sicilian, 1996

1. e4 c5 2. Nf3 d6 3. d4 cxd4 4. Nxd4 Nf6 This is nearly always Black's fourth move in the Sicilian, to force the N on b1 in front of the c-pawn. Left alone, White may play c2-c4, stopping counterplay with d7-d5 or b7-b5, and removing danger on the c-file. 5. Nc3 e6 6. Be2 a6 7. f4 Qc7 8. O-O Be7 9. Kh1 Nc6 10. Be3 Nxd4 11. Qxd4 O-O 12. Rad1 b5 Already making use of the minority. The move b7-b5 is sometimes a way of threatening the e-pawn, but more often keeps the c-pawn backward on an open file. 13. e5 !? 13... dxe5 14. Qxe5 Qb8 ! 15. Qxb8 Rxb8 16. Ba7 Ra8 17. Bb6 Bb7 18. a3 Rfc8

! Chess magazines are full of quick White kills against the Sicilian. Why do players bother with it, then? Because the longer games where the attack founders and Black wins the endgame are too long for magazines. Watch... 19. Ba5 g6 20. h3 ? 20... h5 21. Bf3 Bxf3 22. Rxf3 h4

Now White has a weakness on g2 as well as c2. 23. Rd2 Rc4 24. b3 Rc6 25. a4 b4 26. Ne2 Rac8 27. c4 bxc3 28. Rxc3 The weakness has been replaced by one on b3. 28... Nd5 29. Rxc6 Rxc6 30. Rb2 Bf6 31. Ra2 Rc8 32. Bd2 [32. b4 Rb8] 32... Rb8 33. Nc1 Nb4 34. Bxb4 Rxb4 35. Rf2 The risks of the h2-h3

move is now clear. 35... Be7 36. Rf3

36... Bd6 37. Ne2 Re4 38. Rd3 [38. Rf2 Bc5] 38... Bc5 39. Rc3 Bf2 40. Rc2 Kg7 41. Ng1 Rxf4 ...0-1
vogt-andersson 1978

In both games we saw that the end result of the minority attack was pawn weaknesses. Once these appear, you can carry on as we've already seen in section 4.3.2.1. This may go some way to explaining (a) why such an apparently helpful exchange is so often made by White in the Queen's Gambit, and (b) why the half-open defences such as the Sicilian are so popular.

Exeter Chess Club: On Manoeuvres

The Art Of Winning Slowly

Skip to [CONTENTS](#)

I'm still working on this one myself, but by the time I've read this, my word, I'll know a thing or two.

You know how to win endings - namely, slowly. This is an ending where you have the advantage - but not yet won, and so if you play your big guns first things may fizzle out. Instead, nothing too hasty, do all your preparation first, try a little play here, a little there, before trying to force the issue. Capablanca was the supreme craftsman with this sort of game, and is our first example, and there is another couple from Nimzo.

But if you have got the hang of that, you can try the same approach to the middlegame - that is, middlegames which are advantageous but not won. The key features for a position suitable for manoeuvre are:

- **an advantage in space, and therefore, mobility**
- **play on both sides of the board (or at least chances of a breakthrough)**
- **no clear winning plan for you on either side of the board**

The way to manoeuvre is:

- **keep control of the game, and keep the initiative - that is, keep the opponent passive and defensive, where all they can do is react to, or try to anticipate, your threats**
- **try different attacking ideas in sequence, probably switching from side to side, or at least trying several different ways of besieging the same front**
- **play with patience and don't miss opportunities to tempt small weaknesses in your opponent's game.**

After that, the play may be more or less forcing and tense depending on the position. Below several

games are given, in increasing order of tension, from Alekhine to Lasker. Lastly two examples are given where Black is in difficulty although the game is objectively equal, but in each case White demands that the opponent steer safely to port. Fischer just makes it against Petrosian, Cohn doesn't. These last two games also put the question: is manoeuvring done with an end in mind (if not in sight), or is it just woodpushing? There is a saying attributed to Tartakower, that tactics is what you do when there is something to do, strategy is what you do when there is nothing to do. Perhaps manoeuvring is what you do when there is no strategy to do! It is the key to winning games when all you have is a space advantage and your opponent is solid. Capa gives a textbook example of this against Treybal.

Lastly, I include a club game played with manoeuvre.

Examples from master play

Manoeuvring in the endgame

Manoeuvre: a classic endgame setting

Capablanca,Jose - Kupchik, Abraham [Havana] (07) [C49] 1913

1. e4 e5 2. Nf3 Nc6 3. Nc3 Nf6 4. Bb5 Bb4 5. O-O O-O 6. Bxc6 bxc6 7. Nxe5 Qe8

8. Nd3 Bxc3 9. dxc3 Qxe4

[9... Nxe4 10. Re1]

10. Re1 Qh4 11. Qf3 Ba6 12. Bf4 Rac8 13. Be5 (idea \wedge Nc5) 13... Bxd3 14. cxd3 Qg4 15. Bxf6 Qxf3 16. gxf3 gxf6

Assessment: +/-

better Pawns, fewer Pawn islands, more active pieces.

The weakest spot in the Black position is the isolated a-Pawn, and it is here that an attack should be directed.

17. Re4

First, Capablanca mobilises and centralises his pieces. There is not usually any sense of rush when Capa plays an ending.

17... Rfe8 18. Rae1 Re6 19. R1e3 Rce8 20. Kf1 Kf8 21. Ke2 Ke7

Now, White can attack the a-pawn.

22. Ra4 Ra8 23. Ra5

restrains the Pawns

23... d5!?

I can sympathise with the bid for space but this is not forced and has the disadvantage of leaving the c-Pawns without support.

24. c4! Kd6

[24... dxc4 leaves all Black's Pawns isolated and most of them doubled!]

[24... d4 25. Re4 Kd6 26. b4 Re5 27. Ra6 'hopeless', said Capa]

25. c5+ Kd7 26. d4

Black's pawns have become fixed, cutting off access to the Queen's-side. **26... f5**

Hoping to nip out to h6 with some play.

27. Rxe6! fxe6 28. f4 Kc8 29. Kd2 Kb7?!

Black has achieved a solid defence of the a-Pawn and White can achieve little else there. But White has access to both sides of the board via the third rank. *[29... Rb8!? 30. Kc3*

[30. b3 blocks the third rank]

[30. Kc2 Rb4 31. Kc3 Rc4+ 32. Kd3 Rb4]

30... Rb7 may have been better]

30. Ra3 Rg8 31. Rh3 Rg7

This defence from the side keeps the Black Rook more active than moving it to defend from h8, but I'm sure Black also considered ...Rg1!?, giving up a Pawn to get the Rook active. It looks a bit speculative here but is the right sort of idea to have in mind.

32. Ke2 Ka6 33. Rh6 Re7 34. Kd3 Kb7 35. h4 Kc8 36. Rh5 Kd7 37. Rg5 Rf7

Again, Black has achieved a solid, if passive, defence. White now returns his attention to the Queen's-side.

38. Kc3 Kc8 39. Kb4 Rf6 40. Ka5 Kb7 41. a4 a6 42. h5 Rh6

White can improve the position of his pieces no further. It is time to try and force the issue.

43. b4 Rf6 44. b5!?

[44. Rg7! Rh6 first would have been better, according to Capa: 45. b5 axb5 46. axb5 cxb5

[46... Rxh5 47. b6]

47. Kxb5 e.g. 47... Rxh5 48. c6+ Kb8 49. Ka6]

44... axb5 45. axb5 Rf8

Off to sieze the a-file!

46. Rg7 Ra8+ 47. Kb4 cxb5 48. Kxb5 Ra2

Black has gained some activity. Of course, White does not retreat and defend with Rg2.

49. c6+ Kb8 50. Rxh7 Rb2+ 51. Ka5 Ra2+ 52. Kb4 Rxf2 53. Re7 Rxf4?!

Natural, but not exact.

[53... Rh2? 54. Rxe6 Rxh5 55. Re5 Ka7 56. Kc5]

[53... Rb2+!? 54. Kc3 Rh2 55. Rxe6 Ka7 56. h6 Kb6 which isn't great but Black is also fighting with the King now]

54. h6 Rxd4+ 55. Kb5 Rd1 56. h7

A Pawn on the seventh seems worth three in the bush! Black can only hope to harass the King with checks, but these are soon exhausted.

56... Rb1+ 57. Kc5 Rc1+ 58. Kd4 Rd1+ 59. Ke5 Re1+ 60. Kf6 Rh1 61. Re8 + Ka7 62. h8=Q Rxh8 63. Rxh8 Kb6 64. Kxe6 Kxc6 65. Kxf5 Kc5 66. Ke5 c6 67. Rh6 Kb5 68. Kd4 1-0

That was a fairly simple example, falling as much into the realm of carrying out a strategical plan as manoeuvring without a clear object. The next example is less direct, even though Black has an extra Pawn to play with.

Manoeuvre in the endgame: against weaknesses on both wings

Holzhausen W - Nimzowitsch Aaron (Hannover) [B00] , 1926

1. e4 Nc6 2. Nf3 e6 3. d4 d5 4. exd5 exd5 5. Bg5 Be7 6. Bxe7 Qxe7+ 7. Qe2 Bf5 8. c3 Be4 9. Nbd2 O-O-O 10. O-O-O Nh6 11. Ne5 Nxe5 12. dxe5 Bg6

already planning a campaign against the e-pawn using the long light-squared diagonal, especially the point e4

The last type of ending in which we see manoeuvre as a strong theme is a Queen ending. Again, Nimzo has an extra Pawn but Queen endings are always difficult because of the number of candidate moves for each side, and the risk of allowing perpetual to the defending side.

Manoeuvre: in a Queen ending,

Nimzowitsch Aaron - Antze,O (Hannover) [E60] 1926

1. d4 Nf6 2. c4 g6 3. g3 Bg7 4. Bg2 O-O 5. f4 d6 6. Nf3 c6 7. O-O d5 8. cxd5 cxd5 9. Ne5 Qb6 10. Nc3 Rd8 11. b3 Na6 12. Ba3 Bf8 13. Na4 Qb5 14. Qd3 Qa5 15. Rfc1 Bf5 16. Qc3 Qb5 17. Bf1 Ne4 18. Having reminded ourselves of the ideas in endgame settings, let us see the same approach in the middlegame.

Manoeuvre in the middlegame: slowly, or dynamically and with threats

Manoeuvre: slow breakthrough in closed position with lots of space

Capablanca - Treybal (Karlsbad) [D30] 1929

1. d4 d5 2. c4 c6 3. Nf3 e6 4. Bg5 Be7 5. Bxe7 Qxe7 6. Nbd2 f5 7. e3 Nd7 8. Bd3 Nh6 9. O-O O-O 10. Qc2 g6 11. Rab1 Nf6 12. Ne5 Nf7 13. f4

the Anti-Stonewall formation: White has a Queen's-side initiative

13... Bd7 14. Ndf3 Rfd8 15. b4 Be8 16. Rfc1 a6 17. Qf2 Nxe5 18. Nxe5 Nd7

seeking exchanges...

19. Nf3

...but not finding them

19... Rdc8 20. c5 Nf6 21. a4 Ng4

a gesture only

22. Qe1 Nh6

Black is defending the Queen's-side quite well: White switches tack. This is the key to understanding space - although Black can theoretically defend any one point, White can make the Black pieces trip up in their rush to do so by moving from one point to another.

23. h3 Nf7 24. g4 Bd7 25. Rc2 Kh8 26. Rg2 Rg8 27. g5 Qd8 28. h4 Kg7 29. h5

White has the initiative on both sides of the board: Black's cramped and passive pieces will find it hard to cover everything

29... Rh8 30. Rh2 Qc7 31. Qc3 Qd8 32. Kf2 Qc7 33. Rbh1 Rag8 34. Qa1 Rb8 35. Qa3 Rbg8

Just when Black has had to cover the h-file...

36. b5

...White opens a file on the Q-side. Black's pieces have to rush back, but get in a tangle because they have so few squares. White gains complete control of the a-file, and seals the King's-side. Then, he arranges the final breakthrough on the Queen's-side, possible because of his enormous control of space there.

36... axb5

[36... cxb5 37. h6+ Kf8 38. c6+]

37. h6+ Kf8 38. axb5 Ke7 39. b6 Qb8

a sad decision: now Black won't be able to oppose rooks on the a-file. This is the concrete manifestation of what I described earlier: White switching the focus of activity from side to side until Black is wrong-footed.

40. Ra1 Rc8 41. Qb4 Rhd8 42. Ra7 Kf8 43. Rh1 Be8 44. Rha1 Kg8 45. R1a4 Kf8 46. Qa3 Kg8 47. Kg3 Bd7 48. Kh4

White spends a little time wondering where to put his King; he has the luxury of seeing how it looks on a few different squares before the final push. **48... Kh8 49. Qa1 Kg8 50. Kg3 Kf8 51. Kg2 Be8**

the last ingredient for the breakthrough is the Knight

52. Nd2 Bd7 53. Nb3 Re8 54. Na5 Nd8

Ready or not, here we come

55. Ba6 bxa6 56. Rxd7 Re7

else the a-pawn will simply go after Nb3

57. Rxd8+ Rxd8 58. Nxc6

this 'family' fork is decisive

1-0

This is just the same approach as in the Kupchik endgame. Next up is a game where Alekhine has an advantage not so much in space as mobility. How can you have an advantage in mobility without having one in space? You can if (1) your opponent is forced onto the defensive on the side of the board where you have more space, or

(2) the Pawn structure favours your pieces (especially Bishops), or

(3) if your pieces can get around more easily by using outposts.

In the game, Alekhine has all three going for him!

Manoeuvre: slow breakthrough in half-open position

Thomas,G - Alekhine,Alexander (Baden Baden) [B02] , 1925

1. e4 Nf6 2. d3 c5 3. f4 Nc6 4. Nf3 g6 5. Be2 Bg7 6. Nbd2 d5 7. O-O O-O 8. Kh1 b6 9. exd5 Qxd5 10. Qe1 Bb7 11. Nc4 Nd4 12. Ne3 Qc6 13. Bd1 Nd5

14. Nxd4 ?

exposes the c-pawn

14... cxd4 15. Nxd5 Qxd5 16. Bf3 Qd7 17. Bxb7 Qxb7 18. c4

[18. Rf2 Rac8 19. a4 Rc5 20. b3 Rfc8 21. Qd1 Qc7 22. Ra2]

[18. Bd2 Rac8 19. c4 dxc3 20. Bxc3 Bxc3 21. bxc3 with the same weak Pawns for White as in the game, but with Bishops off White has got rid of a passive piece and has chances against the Black King.]

18... dxc3 19. bxc3 Rac8 20. Bb2

[20. Bd2]

20... Rfd8 21. Rf3 Bf6 22. d4

[22. Qe2 Qa6 23. c4 again, White would have benefitted from the exchange of Bishops]

But there is no breakthrough yet, and so Alekhine begins a patient siege. Alekhine is usually thought of as a demon attacker, but there was nothing wrong with his technique...

22... Qd5 23. Qe3 Qb5 24. Qd2 Rd5

This is clearly better for Black, because of White's poor dark-squared Bishop and backward c-pawn. Also, because the weight of play moves over to the Queen's-side, the c3 Pawn prevents White's pieces from nipping about as easily as Black's. Black's fourth rank, and the light squares c4 and d5, form staging posts for Black's manoeuvres.

25. h3 e6 26. Re1 Qa4

Black seeks to force or tempt a2-a3

27. Ra1 b5 28. Qd1 Rc4 29. Qb3 Rd6 30. Kh2 Ra6 31. Rff1 Be7 32. Kh1 Rcc6 33. Rfe1 Bh4 !

Black makes use of both sides of the board.

34. Rf1

[34. Re2 Qxb3 35. axb3 Rxa1+ 36. Bxa1 Ra6 37. Bb2 Ra2

[37... Bg3 ! Fritz 38. Bc1 Ra1]

38. Kh2 a5]

34... Qc4

Black will recycle the Rooks to a4 and a6

35. Qxc4 Rxc4 36. a3

[else ...b4]

36... Be7 37. Rfb1 Bd6

[no rush: Black chivvies another White pawn onto a dark square]

38. g3 Kf8 39. Kg2 Ke7 40. Kf2 Kd7 41. Ke2 Kc6

[the Black King covers b5 and threatens ...Rca4]

42. Ra2 Rca4

The Rooks quietly take up their places.

43. R1a1 Kd5 44. Kd3 R6a5 45. Bc1 a6 46. Bb2

This is Black's ideal position: is there a win?

46... h5 !

[threat ...h4]

Yes, by playing in the centre and King's-side as well as the Queen's. **47. h4 f6**
48. Bc1

And now the break:

48... e5 49. fxe5 fxe5 50. Bb2

[50. dxe5 Bxe5 51. Bf4 Bxf4 52. gxf4 Kc5 is terminal]

50... exd4 51. cxd4 b4

[finally the a-pawn falls]

0-1

The next game also shows the infiltration theme, and changing front - not from side to side as much as from one way of pressuring a point to another.

Manoeuvre: gradual infiltration, changing tack,

Tylor, Theodore - Lasker, Emanuel (Nottingham) [C49] 1936

**1. e4 e5 2. Nf3 Nc6 3. Nc3 Nf6 4. Bb5 Bb4 5. O-O O-O 6. d3 d6 7. Bg5 Ne7
8. Nh4 c6 9. Bc4 Kh8 10. f4 exf4 11. Bxf6 gxf6 12. Rxf4 Ng6 13. Nxc6+

Examples from club play

Note from DrDave: I apologise for the huge quantity of me below. Apart from any egotism, there are some reasons for this:

- participants in the coaching sessions often complain about seeing nothing but master games, arguing *it's all very well for Capablanca to be able to do that, but is it relevant to us?*
- so, I'd like to include examples from club play wherever possible to show that club players can make use of ideas from master games
- I have lots of examples of my own games but not very many from other people
- Most of the examples I have from other people feature their brilliant King's-side attacks, not their games of manoeuvre.
- If you don't like this, you know what to do!

But I do feel embarrassed about blowing my own trumpet.

Manoeuvring in club play: patience and preparatory moves

Regis,D (2840) - O'Grady,J (1820) [C30] Spectrum #1 Torquay 1996

1. e4 e5 2. f4

Exeter Chess Club: The Hypermodern approach

how to handle newfangled openings

[There is a superb essay by Reti on the legacy of the hypermoderns which was published in *Virginia Chess* in 1993, archived at Palle Mathiasen's World Champions site at <http://www.chesschampions.com/reti.html>]

NIMZOVITCH founded the HYPERMODERN school, and wrote a very engaging text **My System** in which he expounded his views on the centre, *centralisation*, *prophylaxis*, and various pawn formations. The other Hypermoderns, of whom we may take RETI of Czechoslovakia as an example, proposed no really new theory of the middlegame but revolutionised the treatment of the opening.

You know that you should sieze the centre in the opening, and use it to dominate the game. Like this:

Boleslavsky - Scitov (Moscow, 1933). 1. e4 e5 2. Nf3 Nc6 3. Bc4 Bc5 4. c3 Nf6 5. d4 exd4 6. cxd4 Bb6?

This move gives White too much of a free hand. The "Plan A" pawn centre just rolls over the Black position.

7. e5 Ng4 8. h3 Nh6 9. d5 Ne7 10. d6 Ng6 11. Bg5 f6 12. exf6 gxf6 White can win a piece, but: **13. Qe2 + Kf8 14. Bxh6# 1-0**

The hypermoderns said (and showed) that there was no need to try to grab the centre immediately - and in fact, you could safely let your opponent rush into the centre with pawns in the opening, using them as a target for attack. The idea is not to ignore the centre but to control it, perhaps from a distance. If the opponent occupies the centre, you can hit fiercely at it; if not, your own occupation of the centre later will be more secure for being delayed. In fact, Reti said, to occupy the centre directly as White merely allowed Black either to blockade or blow up what White has established, whereas keeping things unfixed was the most awkward thing White could do. They would develop the Bishops in *fianchetto*, and use side-swipes like c4 to undermine the centre. As White they played *flank openings* like the *English* and the *Reti*; for Black *Alekhine's Defence* and the *Grunfeld Defence* are good examples of the hypermodern legacy. Other examples include the *Pirc* and *Modern Defences*, and the more rarely seen *English Defence*.

Whiteley - Keene. [A40] 1. d4 e6 2. c4 b6 3. e4 Bb7 4. Nc3 Bb4 5. Bd3 f5 6. d5

Barden recommended 6.d5 (without analysis) just before this game...

6... fxe4 7. Bxe4 Qh4 8. Qd3 exd5 9. cxd5 Nf6 10. Bf3 Ba6 11. Qe3+ Kf7 12. Qf4 Re8+ 13. Kd1 Qxf4 14. Bxf4 Bxc3 15. bxc3 d6 16. Nh3 h6 17. Kc2

17... Bc4 (not ...g5 allowing counterplay) 18. Rhd1 Nbd7 19. a4 ?

19... Nc5 20. Rd4 Be2 21. Bxe2 Rxe2+ 22. Kd1 Rae8 23. Ra3 Re1+ 24. Kc2 R8e2+ 25. Bd2 Rh1 26. c4 Rxh2 27. a5 Re7 28. axb6 axb6 29. g4 Re4 30. Rxe4 Ncxe4 31. Rf3 g5 32. Be3 Kg6 33. Kd3 Nc5+ 34. Bxc5 bxc5 35. Rg3 Nxc4 36. Ke2 Kh5 37. Ke1 Ne5 38. Kf1 Kh4 39. Ng1 g4 40. Rc3 Kg5 1-0

Cursoux-Letzelter, 1977 [B03] Alekhine's Defence

1. e4 Nf6 2. e5 Nd5 3. d4 d6 4. c4 Nb6 5. f4 dxe5 6. fxe5 c5 7. d5 e6

DIAGRAM

Alekhine's Defence takes a certain amount of courage to play. Black sacrifices tempi and space to get White to over-extend the centre.

8. Nc3 exd5 9. cxd5 c4 10. Nf3 Bg4 11. Bxc4 Nxc4

DIAGRAM White has an almost perfect centre to look at, but is about to lose his grip. The game enters a very messy phase.

12. Qa4+ Nd7 13. Qxc4 Bxf3 14. gxf3 Nxe5 15. Qe4 Qh4+ 16. Ke2 Qh5 17. Bf4 Kd7 18. Qa4+ Kd8 19. Rhf1 Rc8 20. Qa5+ b6 21. Qxa7 Bc5 22. Rac1 Re8 23. Ne4 Nxf3 24. Rxc5 Nd4+ 25. Kd3 Qe2+ 0-1

White still occupies the centre, and it is symbolic that the King dies there!

Lilienthal - Korchnoi [D86] Modern Grunfeld, 1954

1. d4 Nf6 2. c4 g6 3. Nc3 d5 4. cxd5 Nxd5 5. e4 Nxc3 6. bxc3 Bg7 7. Bc4 O-O 8. Ne2 Nc6 9. O-O Qd7 10. Ba3 [10. Be3] 10... Na5 11. Bd3 b6

Korchnoi has been an occasional devotee of the Grunfeld throughout his career, and I'm sure it suits his counter-punching style.

12. Nf4 ?

This lets Black get a move ahead, as well as loosening the dark squares in the centre.

12... Bb7 13. Qe2 Rfd8 14. Rad1 e6 15. e5 c5

A typical flank blow in a hypermodern opening: it always reminds me of judo.

16. dxc5 Qc7 17. cxb6 Qxe5 18. Qxe5 Bxe5 19. Ne2 axb6 20. Bc1 Bd5 -+

Black's pieces dominate the game, and Korchnoi went on to win. 21. Bg5 f6 22. f4 fxg5 23. fxe5 Nc4

24. Bxc4 Bxc4 25. Rxd8+ Rxd8 26. Re1 Rd2 27. Ng3 Rxa2 28. Ne4 Bd5 29. Nf6+ Kf7 30. Nxd5 exd5
 31. Rb1 Ra6 32. Rb5 Ke6 33. Kf2 Kxe5 34. Kf3 Ra3 35. Kg4 Rxc3 36. Rxb6 Rc2 37. Kg3 d4 38. Rb7
 d3 39. Rxh7 d2 40. Rd7 Ke4 41. Kg4 Rc4 42. Rxd2 Ke3+ 43. Kxg5 Kxd2 44. Kxg6 Ke3 45. h3 Kf4 46.
 g4 Rc5 47. Kh6 Rg5 0-1

This is the good side of the hypermodern approach: Black getting good winning chances in an unbalanced game, but it does have a shady side.

Firstly, if you hesitate for a moment in the attack on a big centre, it really will crush you. Norwood, in his book **Winning with the Modern**, offers this game as a reason for Black to avoid the Austrian Attack (f4) at all costs.

Bareev - Norwood, Marseilles, 1990[B09] 1. d4 d6 2. e4 Nf6 3. Nc3 g6 4. f4 Bg7 5. Nf3 c5 6. e5
[Book is 6. dxc5 or 6. Bb5+] 6...Ng4 [6... Nfd7! was essential] 7. dxc5 dxc5 8. Qxd8+ Kxd8 9. h3 Nh6
10. Be3 b6 11. O-O-O+ Bd7 12. g4 Kc8 13. Ng5 f6 Yeuch 14. Rxd7 Kxd7 15. Bb5+ Kc8 16. Ne6 Bf8
17. Nd5 Nf7 18. Ndc7 Nd8 19. Rd1 Nxe6 20. Nxe6 fxe5 21. Rd8+ Kb7 22. Bd3 DIAGRAM 1-0

A famous world-class encounter:

Larsen, B-Spassky, B, Belgrade USSR-World 1970

1.b3 e5 2.Bb2 Nc6 3.c4 Nf6 4.Nf3 e4 5.Nd4 Bc5 6.Nxc6 dxc6 7.e3 Bf5 8.Qc2 Qe7 9.Be2 O-O-O 10.f4
Ng4 11.g3 h5 White may already be lost.

12.h3 h4 **DIAGRAM**

13.hxg4 hxg3 14.Rg1 Rh1 15.Rxh1 g2 16.Rf1 Qh4+ 17.Kd1 gxf1=Q+ 0-1

So, if GMs like Norwood and Larsen can get it wrong, club players can too. I have often seen straightforward, even simple-minded, attacking play bring down hypermodern systems tried by players a class or two above the attacker. It may be that at club level the attack is easier than the defence.

Secondly, it may be easier for White to gain an advantage against hypermodern defences through more conservative play - rather than grabbing the whole centre, just taking on a better slice of it. Karpov has repeatedly shown the efficacy of this approach:

Karpov-Nunn 1983 1.e4 d6 2.d4 Nf6 3.Nc3 g6 The sharp Pirc defence, which Karpov meets modestly. 4.Nf3 Bg7 5.Be2 O-O 6.O-O Bg4 7.Be3 Nbd7 8.h3 Bxf3 9.Bxf3 e5 10.g3 c6 11.Bg2 Qa5 12.Qd2 Rfe8 13.Rad1 b5 14.a3 Nb6 15.b3 Nfd7 16.Ra1 Nf8 17.d5 {!} Black's pieces are slightly wrong-footed.

17...Rac8 18.Rfd1 c5 19.Bf1 c4 20.a4 {!} DIAGRAM

20...cxb3 21.Nxb5 Qxd2 22.Rxd2 Rxc2 23.Rxc2 bxc2 24.a5 Nc8 25.Rc1 Nd7 26.Rxc2 Nc5 27.Nxd6 Nxd6 28.Rxc5 Nxe4 29.Rc7 Bf8 30.a6 Rd8 31.Rxa7 1-0

Thirdly, it may be harder for White to gain an advantage with a hypermodern opening if Black is not tempted to take on more than can be easily chewed. Larry Evans in **The Chess Opening for You** complains about an opponent who replied to his King's Indian Attack (1.Nf3 2.g3 3.Bg2 4.d3 5.O-O 6.Nbd2) with 1...Nf6 2...g6 3...Bg7 4...d6 5...O-O 6...Nbd7, and Evans had nothing to shoot at.

Appendix

Here's two examples of the style from Reti - a hit and a miss.

Exchanging into a lost King ending

Jones - Bellers, 1975

What makes players do the following? White swaps off his active rook, failing to see just 2 or 3 moves ahead.

It is amazing how often this occurs.

1. Ra4+

[1. Rf6 or indeed almost anything else would have been better!]

1... Rd4 2. Rxd4+ exd4 3. Kg1 Kd3 4. Kf2 Kc2 0-1

Theory: Opposition, Triangulation, 1995

1. Kg5!

[1. Ke5 ? 1... Kd7 2. Kf6

[2. Kd5 h5 the bK is too near the a-pawn for White to win]

2... Kc6 Black can queen the pawn in seven moves]

[1. h4 Kf7 with the opposition 2. h5 h6]

1... Kf7 2. Kh6 Kg8 3. h4 Kh8 4. Kh5

[4. Kg5 Kg7 draws with the opposition]

[4. h5 Kg8 5. Kg5 Kf7

[5... Kg7 even this draws: 6. h6+ Kf7 7. Kf5 Ke7 8. Ke5 Kd7 9. Kf6 Kd6 10. Kg7 Ke7 11. Kxh7 Kf7]

6. Kf5 h6]

4... Kg8 5. Kg4

taking the distant opposition

5... Kf8 6. Kf4 Ke8 7. Kg5 !

[7. Ke4 Kd7 8. Kf5

[8. Kd5 h5]

8... Kc6 9. Kg5 Kb5]

7... Kf7 8. Kf5

again with the opposition but also with the pawn held back on h4

8... Ke7 9. Ke5 Kd7 10. Kf6 Kc6 11. h5 Kb5 12. Kg7 Kxa5 13. h6 b5 14. Kxh7 b4 15. Kg7 ! 15... b3 16. h7 b2 17. h8=Q b1=Q

[17... Kb4 King and Knight or centre pawn loses (Rook or Bishop pawns on the seventh draw) 18. Qb8+ Kc3 19. Kf6 Kc2 20. Qc7+ Kd1 21. Qb6 Kc2 22. Qc5+ Kd3 23. Qb4 Kc2 24. Qc4+ Kd2 25. Qb3 Kc1 26. Qc3+ Kb1 27. Ke5 Ka2 28. Qc2 Ka1 29. Qa4+ Kb1 30. Kd4 Kc1 31. Qc4+ Kb1 32. Kc3 Ka1 33. Qa4+ Kb1 34. Qc2 + Ka2 35. Qxb2#]

18. Qa8+ Kb4 19. Qb7+ Kc3 20. Qxb1 1-0

Hibbitt - Bellers , 1995

How do you assess this position? Black has a menacing array of Queen's-side pawns and threatens simply ...Kd6, ...c5 etc. White's only chance is to create diversions on the King's-side and hope that it compensates.

1. Re3 ? 1... d4 2. Rxe6+ Kxe6 3. Kf3 Kd5 4. Ke2 ?

[4. f5 gxf5 5. g5 Ke5 6. h4 f4 !

[6... c5 7. h5 c4 8. h6 wins for White]

7. Kg4 d3 8. Kf3 Kf5 -+]

4... Ke4

resigns.

Note how potent ...f4 can be at the right time. 0-1

Bellers - Pritchard 1995

White has been pressing throughout, but Black now threatens to equalise with ...Rc7.

32. f5 ! (that break again) 32... exf5 33. exf5 Rc7 34. fxc6 fxc6 35. Rxc7+ Kxc7 36. Kd4 Kd8 37. Ke4 Ke7 38. Kd5 Kd7 39. b4 Ke7 40. a5 Kd7 41. a6 Ke7 42. Kc6 d5 and resigns:

43. Kb7 d4 44. Kxa7 d3 45. Kxb6 d2 46. a7 d1=Q 47. a8=Q 1-0

Bellers - Hodgson , 1977

Against a youthful Julian Hodgson, White is paying the price of playing Grob's Attack!

25. Ne2 Bxe2 26. Kxe2 Kc6 27. f3 exf3+ 28. Kxf3 b5 29. cxb5+ Kxb5 30. Ke4 Kc4 resigns.

But is the position before 25.Ne2 totally lost? The Knight is tied down, but the Bishop has to stay on g4 to keep it there, and meanwhile the Knight is guarding all the entry squares

Exchanging to won King ending,

Sarajs - Bellers, 1995

Black is two pawns up with a passed d-pawn and control of the e-file. What is the best way forward? Double Rook endings can be difficult to win.

30... d3

completing the stranglehold

31. b4 b6 32. a4 Rxf2 33. Rxf2 Re2 34. Rxe2 dxe2+ 35. Kxe2 Kf6 36. Ke3 Ke5 37. a5 bxa5 38. bxa5 c5 0-1

Bellers - Evans, 1977

White swaps off into a won K+P ending, but it isn't as easy as White first thought. Simply 47.b2-b4 would have been stronger.

47. Rxe7+ Kxe7 48. Kf4 h5 49. b4 Kf6 50. b5 axb5 51. axb5 Ke6 52. c6 ?

[52. Kg5 wins easily]

52... bxc6 53. bxc6 Kd6 54. Kg5 Kxc6 55. Kxh5 Kb5 56. Kxg4 Kc4 57. Kxf3 Kxd4 58. Ke2 Kc3 59. Kd1 Kd3 60. g4 Ke4 61. g5 Kf5 62. f4 1-0

Thornley - Bellers, 1995

White is a pawn down but seems to have everything covered. Black must do something active to break through.

55... f4 (that move again) 56. Qxf4 Qxf4 57. gxf4

how do you assess this position?

57... Kg6 58. Kg2 Kf5 59. h5

[59. Kg3 h5]

59... Kxf4 60. Kf1 Kf3 61. Ke1 e3 62. fxe3 Kxe3 63. Kd1 Kf4 64. Kd2 Kg5
65. Kc3 Kxh5 66. Kc4 g5 67. Kc5 g4 68. Kb6 g3 69. Kxa6 g2 70. Kb7 g1=Q
71. a6 Kg5

resigns: advanced Rook pawns do draw against K+Q but not K+Q+P! 1-0

Furnewell - Frost , 1995

I'm not sure how to categorise this one: Black thought he was transposing into a won K+P ending because of the protected passed d-pawn, White presumably thought it was won. Who was right?

26... Rb5

White has the choice: leaving the rooks on may have been easier

27. Rxb5 cxb5 28. Rxc7+ Kxc7 29. Ke3 Kc6 30. Kd4 a5 31. a3 a4 32. h3 g6 33. g3 h5 34. g4 h4

35. f5

But

[35. Ke3 Kc5 36. f5 draws easily! 36... exf5 37. gxf5 gxf5 38. Kf4 d4 39. e6 Kd6 40. Kxf5 d3 41. Kf6 d2 42. e7 Kd7 43. Kf7 d1=Q 44. e8=Q+]

35... exf5 36. gxf5 gxf5 37. Ke3 Kd7 38. Kf3 Ke6 39. Kf4 d4

0-1

Bellers - Saqui, 1983

Finally, an ending to demonstrate the resources that may exist when all seems lost. The key to this ending is the greater mobility of the rook, and the ability of the wK to gain entry on the White squares.

44. Re1 Ke7 45. Rh1 f3+ 46. Kg3 Kf7 47. Kf4 Kf6 48. Ra1 Ke7 49. Ke5 Kf7 50. Kd6

two pawns now go, but it's still got to be won

50... Bf5 51. Kxc6 Bd3 52. Kd6 Kf6 53. Rh1 Kg5 54. Kxe6 Bc4 55. Ke5 Kg4
56. Rg1+ Kh3 57. Rg3+ Kh2 58. Rxf3 h4 59. Rf4 h3 60. Rg4 Be2 61. Rg7
Bf3 62. Kd6 Bg2 63. f4 Kg1 64. Rh7 h2 65. f5 Be4 66. Rxh2 Kxh2 67. f6
Bg6 68. Ke6 Kg3 69. f7 Bxf7+ 70. Kxf7 Kf4

Black has wriggled well but this K+P ending is won for White

71. Ke6 Ke4 72. Kd6 Kd3 73. Kxd5 Kxc3 74. Kc5 Kb3 75. d5 1-0

Exeter Chess Club: Rooks on ranks and files

Knights like outposts, bishops like clear diagonals: you could guess that rooks like clear ranks and files. The best rank to put your rook on is the seventh, particularly if the opponent's king is trapped behind it. A rook on the seventh rank (or 'on the seventh' as people sometimes say) can threaten unmoved pawns and with assistance can create mate threats. To get to the seventh the rook will have to move along a file. You can see Znosko-Borovsky doing just that with the c-file in the Illustrative Games. The other use of rooks on files is to attack: we have seen some examples of rooks attacking down the central d- and e-files in the section above on **Attacking the King**, and in the other Illustrative Game we can see Tarrasch making good use of the g-file to attack a king which has castled.

Rooks can be moved into action along the third rank; I include a brisk wins by Keene and Miles. Beginners often develop their rooks by going a4 and Ra3; this is a manoeuvre that you may rediscover as you get on - for example, Petrosian has often used that development against the Benoni, when he has already played a4 to slow up ...b5. This has good and bad points: for example, Miles-Clarke 1976 went **1. d4 d5 2. c4 dxc4 3. Nf3 Nf6 4. e3 c5 5. Bxc4 e6 6. Nc3 a6 7. a4 cxd4 8. exd4 Be7 9. O-O Nc6 10. Re1 Nb4 11. Bg5 O-O 12. Ne5 Re8 13. Re3** Now, after playing 13.Re3 Miles spotted 13...Nfd5 14.Nxd5 Nxd5 15.Rh3 Bxg5 16.Qh5 but wasn't convinced that it worked (16...Qf6!?) - Clarke also thought about it but avoided it. It does show clearly some of the risks and opportunities of the Re3-h3 idea.

Rs can also support knight outposts, so that - in a position like the diagram above in the section on outposts - if a knight on d5 is exchanged, a rook from d1 may recapture, still putting pressure on the pawn on d6.

van vliet-znosko-borovsky 1907

1.d4 d5 2.e3 c5 3.c3 e6 4.Bd3 Nc6 5.f4 Nf6 6.Nd2 Qc7 {!} 7.Ngf3 {?!} 7...cxd4! 8.cxd4 Nb4 9.Bb1 Bd7 10.a3 Rc8 11.O-O Bb5 12.Re1 Nc2 13.Bxc2 Qxc2 14.Qxc2 Rxc2 Lovely smooth stuff from Z-B.

Exeter Chess Club: Rook Endings

I dug out all the rook endings of mine I could find to show both typical positions and typical errors. Please note that these are not, therefore, models of technique, more like comedies of error!

1. [The club player at his worst...](#)

1. [regis,d \(1800\) - knox,stuart \(ian miles cup\) \(1950\) \[D32\] rook ending: club, horrible lack of everything, 1983](#)
2. [regis,d \(1800\) - pope,s \(club ch'p\) \[A36\] rook ending: club, lack of attention, 1992](#)
3. [woodruff,dg \(1725\) - regis,d \(somerset vs. devon\) \(1855\) \[A26\] rook ending: club level, black lost courage, 1995](#)
4. [lane,pc - regis,d rook ending: club play, managed a win, 1995](#)
5. [regis,d - walker,jn \(exeter vs. teignmouth\) \[C33\] rook ending: club, lack of theory, 1995](#)
6. [white,ir - regis,d \(East Devon #1\) \[B06\] rook ending: club, all rook endings are drawn, 1994](#)

The club player at his worst...

regis,d (1800) - knox,stuart (ian miles cup) (1950) [D32] rook ending: club, horrible lack of everything, 1983

Exeter Chess Club: Bishop Endings

Bishop endings: Bishop against pawns, bishop against bishop, bishop against knight

1. [General Advice for bishop endings](#)
2. [Key ideas in bishop endings](#)
3. [Studies](#)
4. [Example Bishop Endings](#)
 1. [Fischer - Taimanov #4 \[B47\] Bishop Ending: B/N, 1971](#)
 2. [Walther - Fischer \[B99\] Bishop Ending: OCB As Draw, 1960](#)
 3. [Capablanca,Jose - Janowsky,Dawid \(NY 03\) \[D15\] B ending: same colour, 1916](#)
 4. [Menchik,V - Capablanca,JR \(Hastings 1930/31\) \[A47\] bishop ending: same colour, 1996](#)

Bishop endings are generally easier to win than rook endings because there is no way for the defending side to exclude the attacking King, and neither is there a perpetual check. But perhaps because they are less common, they may be neglected in a player's study.

General Advice for bishop endings

(1) The easiest endings to draw are those with opposite coloured bishops.

(2) Do not place pawns on the colour of your bishop.

(3) BB vs. BN or NN are usually a real advantage.

In open positions the two bishops are murder: in most other positions they are a real advantage.

[See [Double Bishop Endings](#).] (4) In open or semi-open positions a lone bishop is usually superior to a lone knight.

The knight is superior to the bishop in blocked positions or when the bishop is hemmed in by pawns on the same colour squares as the bishop.

K+B vs. K+P

Normally the bishop can keep an eye on the P from far enough away to keep the draw in hand, even two Ps if the opposing K is not close

K+B+P vs. K

A simple win unless it's an a-/h-P when the lone K can blockade on the colour square opposite to the B. Similarly, K+B vs. K+B+gP+hP may be drawn for this reason if BxgP is allowed.

K+B vs. K+B+P

Often a draw unless the P is far advanced. The side with the P must try to drive the B from covering the path of the P. This can usually be done only if the Bs travel on the same colour squares - bishops of opposite colours usually can set up immovable blockades or threats of sacrifice - and even then, only if the Pawn is not a central one and the defending K is not close.

K+N vs. K+B+P

The bishop can try to create zugzwang positions when the N must move away, and although blockades are possible the ending is promising. K+N vs. K+B+gP+hP may be drawn for the reason noted above if NxgP is allowed.

K+B vs. K+N+P

The N+P have far more difficulty winning against the B, but again on the wing the B may run out of squares and the K may be distant.

Key ideas in bishop endings:

sacrifice to draw, running out of space at the edge, draw with a-/h-pawns, draw with opposite coloured bishops, controlling the diagonals leading to the queening square

space to dodge

The White King cannot control the bishop from here. 1 Bd8 Bf4, 2 Be7 Bc7, 3 Bd6! Ba4 holds.

With both Kings distant it's the same; with wKe8, Bke1 1.Bb4! wins (threat Be7) [thanks to Bart Robeyns for rescuing this example].

no space at the edge

1 Bb8 Bd4, 2 Bc7 Ba7, 3 Bb6! 1-0

draw with bishops of opposite colour

White cannot control the squares d5 or f5 and chase away the bishop at the same time:

1 Kd6 Bg8, 2 Ke7 and if later Kf6, ...Bh7! when d5 is no threat.

controlling diagonals

The short diagonal can be dominated by the White King.

1 Bf6 Kc2, 2 Be7 Be3 3 Bd6 Bg5, 4 Be5! and 5 Bf6

Studies

These comprise the selection given by John Littlewood in **Chess Coaching**. Littlewood also gives an ABC for Pawn, Knight, Rook and Queen endings.

128 BP

W to play wins

The bishop is poorly placed. 1 c6! Be5; 2 b6 winning

129 BP

W to play draws against best defence

Better bB position: 1 c6 Bd8! or 1 b6 Bd4! 2 b7 Be5

130 BP

W to play draws

The wK is just close enough to hold. 1 Kc2! f4; 2 Kd1 **f3**; 3 Ke1, f2+; 4 Kf1, Kf3; 5 Bd4, g3; 6 Bxf2, gxf2 stalemate or 2...g3; 3 Ke1, g2; 4 Bxf4+! draws

131 B

W to play wins

If Black can control e7 with the B, the pawn can never advance without ...Bxe7 drawing. White must drive off the B:

1 Bf6+ Kc8; 2 Be7, Bf2; 3 Bd6, Bh4; 4 Be5 (1...Kc7; 2 Be7, Bf2; 3 Bd6+!)

132 B

B to play draws

The bK is closer to the pawn, and can nip round to prevent 6 Bf6:

1...Kd5! 2 Bf6, Ke4! 3 Be7, Kf2; 4 Ba3, Bh4; 5 Bb2, Kf5!

133 B

W to play wins

(check)

1 Kg8! controlling the 'short side' and threatening 2 Bf8, Be3; 3 Ba3, Bh6; 4 Bb2 and 5 Bg7,

so 1...Kf5, but 2 Bf8, Be3; 3 Ba3, Bh6; 4 Bc1!

134 B

W to play wins

(Centurini)

Take a deep breath...

If White's bishop were on a7, 1 Bb8, Bg1; 2 Bg3, Ba7; 3 Bf2! wins

But 1 Bh4, Kb6! 2 Bf2+ Ka6 and wB can't get to a7.

If the bB was on g3, 1 Bh4! Bh2; 2 Bf2 and 3 Ba7, 4 Bb8 wins.

It's not quite *zugzwang*, since with Black to move 1...Bd6! 2 Be7, Bh2 holds (3 Bc5 isn't possible here)

So, *zugzwang* would be on if one of the squares h2 or d6 were taken away from the bB.

1 Bh4, Kb5; 2 Bf2, Ka6; 3 Bf5! Bg3; 4 Be7, Kb5; 5 Bd8, Kc6; and now 6 Bh4! Bh2 when 7 Bf2, Bf4; 8 Ba7, Bh2; 9 Bb8, Ba7; 10 Bg3, Ba7; 11 Bf2! bingo!

135 NB

W to play wins, B to play draws

1 Ke7, Nd8; 2 Be4, Nf7; 3 Bf3, Nd8; 4 Bd5! *zugzwang*

1... Nd6+; 2 Ke7, Nc8+! 3 Ke6, Nb6 draws

[This is a common drawing resource in Knight endings]

136 NB

W to play wins, B to play draws

1 Bb4+ Ke6; 2 Kc7, Kd5; 3 Ba3! *zugzwang*

1...Ne7+ 2 Kd8 Nc6+ 3 Ke8, Ke6 draws

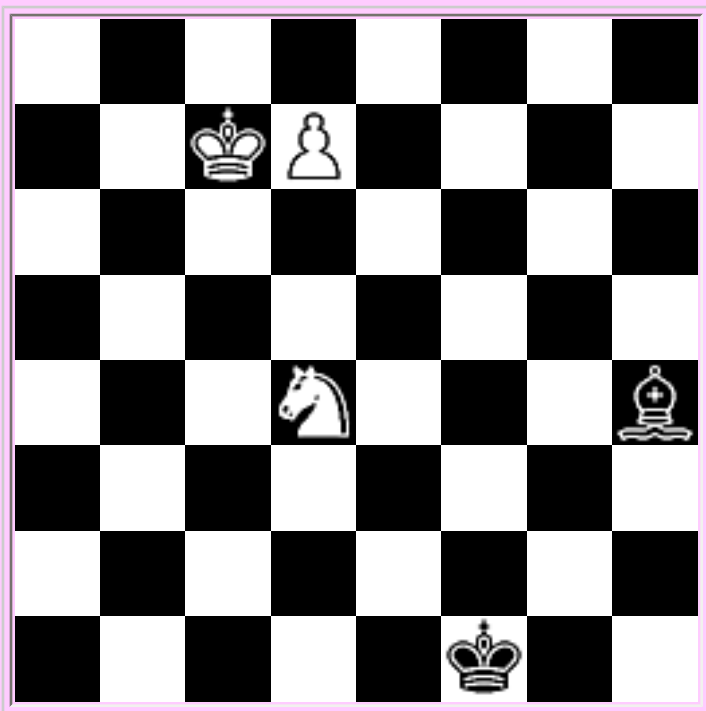

137 NB

W to play wins

If the bK were on b5, 1 Bd4 would be an immediate *zugzwang*, so

1 Bc3! Kb6! 2 Ba5+! Kb5! 3 Bd8! (guarding f6) 3...Kc5; 4 Bg5, Kb5! (4...Kd5; 5 Be7 or 4...Kb6; 5 Be3+ Kb5; 6 Bd4!) 5 Bh4! Kc5; 6 Bg3+ Kd5; 7 Bd4! Nd6; 8 c7 wins

138 NB

W to play wins

1 Nc6! Kf2; 2 Kd6 (threat 3 Ne7, Bg3+; 4 Kc6)

2...Bg3+! 3 Kc5! and now

3...Bc7? 4 Kb5! heading for b7

or 3...Bh4; 4 Kd5! with 5 Ke6 and 6 Ne7 winning

139 NB

W to play wins (Kosek)

1 Ng5! Bg8; 2 Nf7!! Kd2; 3 Kf8, Kh7; 4 Ng5 and now

4...Bg6; 5 Kg7, Be8; 6 Ne4+ Ke3; 7 Nd6, Kh5; 8 Kh6!

4...Bd3; 5 Ne6! Bg6 (5...Bf5 loses as above); 6 Nf4! Bb1; 7 Ke7, Ba2; 8 Ne6 winning

140 NB

W to play wins (Horwitz)

1 Nc7, Bh1; 2 Ne6+ Ke5; 3 Nd8, Ba8! 4 Kc7, Kd5! (idea 5 Kb8? Kd6! 6 Kxa8, Kc7! drawing)

5 Nb7! Ke6! (idea 6 Kb8, Kd7; 7 Kxa8, Kc8! drawing)

6 Na5! Ke7; 7 Kc8! Ke8; 8 Nc4! Ke7; 9 Kb8, Kd8; 10 Nd6, Kd7; 11 Nb7! Kc6; 12 Kxa8, Kc7; 13 Nd6! *zugzwang*

Example Bishop Endings

Fischer - Taimanov #4 [B47] Bishop Ending: B/N, 1971

1. e4 c5 2. Nf3 Nc6 3. d4 cxd4 4. Nxd4 Qc7 5. Nc3 e6 6. g3 a6 7. Bg2 Nf6 8. O-O Nxd4 9. Qxd4 Bc5 10. Bf4 d6 11. Qd2 h6 12. Rad1 e5 13. Be3 Bg4 14. Bxc5 dxc5 15. f3 Be6 16. f4 Rd8 17. Nd5 Bxd5 18. exd5 e4 19. Rfe1 Rxd5 20. Rxe4+ Kd8 21. Qe2 Rxd1+ 22. Qxd1+ Qd7 23. Qxd7+ Kxd7 24. Re5 b6 25. Bf1 a5 26. Bc4 Rf8 27. Kg2 Kd6 28. Kf3 Nd7 29. Re3 Nb8 30. Rd3+ Kc7 31. c3 Nc6 32. Re3 Kd6 33. a4 Ne7 34. h3 Nc6 35. h4 h5 36. Rd3+ Kc7 37. Rd5 f5 38. Rd2 Rf6 39. Re2 Kd7 40. Re3 g6 41. Bb5 Rd6 42. Ke2 Kd8 43. Rd3 Kc7 44. Rxd6 Kxd6

White has the classic advantage of Bishop against Knight with pawns on both sides of the board. Black also has the disadvantage of having his pawns advanced and fixed, with an entry point on the Queen's-side.

45. Kd3 Ne7 46. Be8 Kd5 47. Bf7+ Kd6 48. Kc4 Kc6 49. Be8+ Kb7 50. Kb5 Nc8

Black is being stretched.

51. Bc6+ Kc7 52. Bd5 Ne7 53. Bf7 Kb7 54. Bb3 Ka7 55. Bd1 Kb7 56. Bf3+ Kc7

Exeter Chess Club: Double Bishop Endgames

Chris Bellers

"Deux fous gagnent toujours, mais trois fous, non!"

-- Alexander ALEKHINE, on the advantage of the Two Bishops at amateur level

This session looks mainly at endings involving BB vs. BN or NN and no other pieces. They demonstrate that, even where pawns are evenly placed, the two bishops are often enough to force a win.

If you have the two bishops, be prepared for patient manoeuvring, and do not assume an automatic win. Game 3.1 is a particularly long encounter where White gradually builds up a winning position but slips at the end and should have only drawn.

- [1. Opposite coloured bishops](#)
 - [1.1 ?? - ?? \(cb\), 1995](#)
 - [1.2 Soesan - Bellars, Paignton, 1976](#)
- [2. Two bishops with an unbalanced pawn position](#)
 - [2.1 Leonhardt - Bernstein, Barmen, 1905](#)
 - [2.2 Perlis - Baird, Barmen, 1905](#)
 - [2.3 Soultanbieff-Flohr, Folkestone, 1933](#)
 - [2.4 Zagorovsky - Bryson, Corr, 1994](#)
 - [2.5 Rubinstein - Gajdos, Bremen, 1905](#)
 - [2.6 Kasenfuss - Fine, Kemerli, 1937](#)
 - [2.7 Van Scheltinga - Fine, Amsterdam, 1936](#)
 - [2.8 Bellars - James, Paignton, 1976](#)
- [3. Pawns blocked and/or balanced](#)
 - [3.1 Berger-Tchigorin, Carlsbad 1907](#)
 - [3.2 Tarrasch - Rubinstein, San Sebastian, 1912](#)
 - [3.3 Bellars-Goodman, Paignton 1977](#)
 - [3.4 ?? - ?? \(cb\), 1995](#)
 - [3.5 Euwe - Alekhine, 3rd Match Game, 1937](#)
- [4. Conclusion](#)

1. Opposite coloured bishops While many opposite coloured bishop endings do end in draws, it is a

mistake to think that all such endings are automatically drawn. It is true that an extra pawn often does not suffice, and sometimes not even an extra two or three. However, there are a couple of ideas in these endings that might be of interest.

Firstly, there is 'creeping round the edges'. In the following position, Black seems to have a successful blockade.

1.1 ?? - ?? (cb), 1995

(wKe4,Be6,Pb7,f5; bKf6,Bb8)

1. Kf3 Bc7 ?

Black must prevent Kg4, so ...Kg5 is necessary

[After 1... Kg5 the game is drawn: 2. Bc8 Bc7 3. Ke4 Kf6 4. Kd5 Bh2 5. Kc6 Ke7 6. Kb6 Bb8]

2. Kg4 Bb8

[2... Kg7 3. Kg5 Bd8+ 4. f6+ Bxf6+ 5. Kf5]

3. Kh5 Bf4 4. Bc8 Bc7

[4... Kg7 5. Kg4 Bc7 6. Kg5 Kf7 7. f6]

5. Kh6 Bb8 6. Kh7 Kf7 7. Be6+ Kf6 8. Kg8 Bd6 9. Bc8

Again, Black is in zugzwang, and must give way allowing the f-pawn to advance; once it reaches f7, the bK must go to f8, and the wK can go 'round to support the other pawn.

9... Ke7 10. Kg7 1-0

The other idea I learned the hard way. In the following position, Black had lost a [pawn in the opening, and is now forced to exchange rooks. However, I was not too unhappy about this as I assumed the position was drawn. What does it look like to you?

1.2 Soesan - Bellars, Paignton, 1976

(wKe3,Bd4,Rb2,Pa5,c4,f3,g3,h2; bKc6,Bg6,Rd7,Pa6,f6,g7,h7)

1... Rb7 2. Rxb7 Kxb7 3. Bc5 Bf7 4. Kd4 Kc6 5. Bf8 g6 6. Be7 f5 7. f4 Kd7 8. Bc5 Kc6 9. Bb6 Kd6 10. c5+ Kc6

?! Now the wK penetrates and the bishop is short of squares. The rest of the game is an object lesson in how difficult it is to defend with a bishop when the pawns are on the same colour.

[10... Ke6 11. c6 Be8 12. Kc5 also wins]

11. Ke5 Be8 12. Ke6 Kb5 13. Ke7 Bc6 14. Kf7 Kc4 15. Kg7 Kd5 16. Kxh7 Be8 17. Kg7 Ke6 18. h4 Kd5 19. Kf8 Bd7 20. Kf7 Bc6 21. Kxg6 Ke6 22. h5 Be8+ 23. Kg5 Bd7 24. Bc7 Kf7 25. Be5 Kg8 26. Kf6 1-0

2. Two bishops with an unbalanced pawn position

The two bishops are particularly powerful and this alone is often sufficient to win. The winning process consists of four steps:

place the pieces in the best possible positions (i.e. where they cramp the opponent's pieces)

set up an outside passed pawn (or a potential outside passed pawn) - this means advancing the pawns as far as you can

if the opponent's king goes to the threatened sector, go to the other wing - either to capture pawns with the bishops or force an entry for the king

If the opponent does not try to stop the pawns with his king, then advancing the passed pawn will cost him a piece

2.1 Leonhardt - Bernstein, Barmen, 1905

(wKd3,Be3,g2,Pa2,b3,d4,d5,f4,h3; bKf8,Ng3,Bg7,Pa7,b7,e7,f7,g6,h7)

1. d6 exd6

[1... b6 2. d7]

2. Bxb7 Nf5 3. Bf2 Bh6 4. Ke4 Ne7 5. d5!

! cramping the Black pieces

5... f5+ 6. Kf3 a6

[6... a5 7. Bb6]

7. a4

threatening b4-b5 and if ...axb, the a-pawn will not recapture but run to a8. So, if the pawn gets to a5, it cannot be stopped

7... Bg7 8. Ke2

[8. b4 Bc3 9. b5 axb5 10. axb5 Ke8 11. Ba7 Kd7 and if now 12. b6 ? 12... Bd4 and the win is not straightforward]

8... Bc3

the second step is over; now we have the fourth idea

9. Kd3 Bb4 10. Bxa6 h6

[10... Nxd5 11. Kc4 Nc7 12. Kxb4 Nxa6+ 13. Kb5 Nc7+ 14. Kb6 Nd5+ 15. Kb7 winning]

11. Bb7 g5 12. fxg5 hxg5 13. Kc4 Bd2 14. b4

and soon won

...1-0

2.2 Perlis - Baird, Barmen, 1905

(wKd2,Bb6,c2,Pa3,b4,e4,f3,g3,h2; bKe8,Nd8,Be6,Pb7,c6,e5,f6,g7,h7)

1. f4 exf4 2. gxf4 Ba2 3. Kc3 Ne6 4. Be3 Nf8 5. a4 Nd7 6. Bd3 Kd8 7. Kd4 Nf8 8. f5 ! 8... Nd7 9. Bf4 Ke7 10. h4 Bb3 11. a5 h6 12. Be2 Ba2 13. Bd1 Bf7 14. Bc7 ! 14... Ba2 15. Ba4 Bf7

White cannot improve his position any more, and breaks through with sacrifice to create a passed pawn

16. Bxc6 bxc6 17. a6 c5+ 18. Ke3

[18. bxc5 Nb8 19. Bxb8 Be8 20. Kd5 was simpler]

18... Nb6 19. Bxb6 Be8 20. Bxc5+ 1-0

Against a doubled pawn the two bishops will generally be able to force a gain of material, or an outside passed pawn.

2.3 Soultanbieff-Flohr, Folkestone, 1933

(wKg1,Nh1,Bd2,Pb2,b3,d4,e3,f4,h3; bKg7,Bc6,h4,Pa6,b7,e4,e6,f5,h6)

The key here is White's weak b pawns. The plan is to force b4, play the K to the Q-side, capture one of the b-pawns and create an outside passed pawn.

1... Kg6 2. Kg2 Bd5 3. b4 Kf7 4. Ng3 Ke8 5. Ne2 Kd7 6. Nc3 Kc6 7. Kh2 Bb3 8. Kg2 Bc4 9. Kg1 Bd3 10. Kg2 Bc4 11. Nb1 b6 12. Kg1 Bd3 13. Nc3 Be7 14. Kf2 Bxb4 15. Nxe4 Be7 16. Nc3 Bh4+ 17. Kg1 Bc4 18. Kg2 a5 19. Kg1 b5 20. Kg2 h5 21. Kg1 Bb3 22. Kg2 b4 23. Ne2 Bd5+ 24. Kf1 Bc4 25. Be1 Bxe1 26. Kxe1 Bxe2 27. Kxe2 a4 0-1

2.4 Zagorovsky - Bryson, Corr, 1994

(wKh1,Nd4,Bd2,Pa5,b2,f4,g3,h2; bKg8,Bd7,f8,Pa6,b4,e4,f7,g7,h7)

Here Black is a pawn up, but must play carefully because he is unable to cramp the knight

36... Bc5 37. Be3 b3 ! 38. Kg2 !! 38... Be6

[38... Ba4 39. Kf2 Bb4 40. Bc1 ! and Kf2-e3xe4]

[38... Bg4 39. Kf2 Bd1 40. Nc6 !]

39. Kf2

[39. Nxe6 Bxe3 40. Nc7 Bc5 41. Nxa6 Ba3 42. Kf2

[42. Kf1 Kf8 43. Ke2 Ke7 44. Kd2 Kd6 ! 45. bxa3 e3+ 46. Kxe3 b2]

 Kxc5 1-0

3. Pawns blocked and/or balanced

The defender drawing chances are greater, but still has a difficult game. The winning process consists of

5 steps:

1. weaken the opponent's pawns
2. cramp the opponent's pieces
3. clear a path for the king
4. after the king has penetrated as far as possible, force the exchange of the blocking piece
5. penetrate with the King and capture material

3.1 Berger-Tchigorin, Carlsbad 1907

(wKe1,Bf4,f5,Pa2,b3,c4,f2,g2,h3; bKe8,Nf6,Bc5,Pa7,b7,c6,f7,g7,h6)

Endings with the pawns all on one side are ALMOST ALWAYS drawn if the superior side has 3 pawns or less, USUALLY drawn if he has 4 pawns

4. Conclusion

The two bishops are better than two knights or bishop/knight partnership in most normal positions.

If the pawns are unbalanced, so that the side with the bishops can set up an outside passed pawn, it is virtually a forced win.

If the pawns are blocked, the slightest weakness in the pawn structure may be fatal.

The three ideas in all such endings are:

limit the opponent's mobility

stalemate the knight

exchange off pieces to transpose into favourable simpler endings (especially those where the opponent's pawns are on the same colour as their bishop)

Exeter Chess Club: Kings and Queens

1. [Kings and Queens vulnerable](#)
2. [Domination by the queen](#)
3. [Active king in the ending](#)

Now, each of the pieces we have considered so far - pawns, knights, bishops and rooks - have peculiarities which make certain positions more or less suitable for them to operate. Kings and Queens move in each direction with equal ease, and so have no such rules - although Queens do like a bit of space to get into their stride.

Their flexibility gives them value, and because they are so valuable they are often the subject of tricks and traps in the opening. Here's some illustrations: forgive me using my own but they don't put many cheapos in master game collections.

Kings and Queens vulnerable

[Event "the wandering queen"][Site "devon vs. glos."][Date "1993.???.?"][Round "?"]

[Dr. Dave](#)

Exeter Chess Club: The Theory of Steinitz

1. "
2. At the beginning of the game the forces stand in equilibrium.
3. Correct play on both sides maintains this equilibrium and leads to a drawn game.
4. Therefore a player can win only as a consequence of an error made by the opponent. (There is no such thing as a winning move.)
5. As long as the equilibrium is maintained, an attack, however skilful, cannot succeed against correct defence. Such a defence will eventually necessitate the withdrawal and regrouping of the attacking pieces and the attacker will then inevitably suffer disadvantage.
6. Therefore a player should not attack until he already has an advantage, caused by the opponent's error, that justifies the decision to attack.
7. At the beginning of the game a player should not at once seek to attack. Instead, a player should seek to disturb the equilibrium in his favour by inducing the opponent to make an error - a preliminary before attacking.
8. When a sufficient advantage has been obtained, a player must attack or the advantage will be dissipated."

From David HOOPER, *Steinitz' Theory*, **British Chess Magazine** Vol. 104, p.370 Sept 1984.

References:

- Steinitz' *International Chess Magazine*
- Steinitz' *Modern Chess Instructor*
- Lasker's *Manual of Chess*
- Euwe's *The Development of Chess Style*

Notes

1. The theory is the antithesis of the previously held view, that inspired play might *of itself* create a winning position; rather, (3) winning positions can come about only through errors by the opponent. Creativity and ingenuity still have a role, in the setting of problems for the opponent that they may fail to solve.
2. The point (4), that, if a defender played correctly, then any attack commencing from an equal position can be refuted, was first indicated by Louis Paulsen. He declared (unfashionably) that all gambits can be defended, and practised what he preached; in this way Paulsen was the progenitor of the fully formed theory of Steinitz. Defensive play has its own principles:
The defending side must be prepared to defend and make concessions, e.g making a weakening pawn move. However, the defender should avoid making concessions until forced, and then should make only the minimum concession necessary to meet the threats.

3. The last point (7) is attributed by Lasker to Steinitz; DH cautions that he was unable to find such a statement in Steinitz' works. Lasker's version goes on to say:

The right to attack belongs only to that side which has a positional advantage, and this is not only a right, but also a duty, otherwise there is the risk of losing the advantage. The attack is to be directed against the weakest spot in the opposing position.

4. DH was prompted to write this article after reading Purdy's "The Great Steinitz Hoax", *Chess Player's Quarterly*, 1978 [which is, according to BCM, reprinted in No.2 of *Lasker and his Contemporaries*], in which Purdy apparently argues that Lasker was more the author of the theory than Steinitz.

Purdy and Hooper disagree on what constitutes the theory.

5. Lasker certainly was the principal pedagogue and advocate of (his version of Steinitz' theory through his *Manual*. Lasker's presentation was coloured to some extent by the principles of his own general philosophy of *Struggle* (Work, Economy and Justice); Lasker also offered extensions to the Steinitz theory, viz. principles of Cooperation and of Justice (in the sphere of chess).
6. The influence of the theory is so substantial that instances need hardly be found, but a couple interested me recently:
 1. Jon Speelman's introduction to his *Best Games 1970-1980* collection, where he refers to the "story" style of annotation - where was the crucial error by the loser? This of course assumes that the loser must have made at least one [mistake](#), and Speelman quite explicitly signs up to the theory that there is Justice in chess, and that to lose you must have made a mistake - or two, really, and maybe three if you are White.
 2. An annotation in **Chess Monthly** where the GM reluctantly admitted that despite a series of brilliant moves by Black, White was at no disadvantage. This is the corollary of the same point; in a balanced position, even brilliant play, correctly met, will lead only to another balanced position.
7. What is the significance of Steinitz' theory for the club player? Different aspects have different importances.
 1. Defensive play may be so poor that an attack undertaken with insufficient means might well succeed in practice.
 2. So, defensive play, as modelled by Paulsen and Steinitz, must become a strength of yours.
 3. Moreover, while winning combinations may theoretically be available principally ([if not only](#)) in advantageous positions, in practice tactical opportunities and especially oversights can appear at any time, so at each move you should routinely check for combinational blows for each side.
 4. It may not be so important to decide who has the advantage as to decide what to do, and then do it well!

"The question that matters to you in actual play is simply, 'What is my best move?', and if you can decide without being sure who has the theoretical advantage, so much the better"

-- PURDY

Exeter Chess Club: Chess with Attitude

by

Phil Adams

"Games like this [[Penrose-Botvinnik](#)] (and there were plenty in this tournament) impressed on me that 'wanting to win' was perhaps more important than 'playing good moves'."

-- KEENE, '**Becoming a Grandmaster**'.

"At that age (ten), the odd piece here or there often makes little difference. Rather, ingenuity and the will to win may prove decisive."

-- ZAK, **Improve your chess results**.

1) Draw?
