Large projects need lots of help. As is always the case, my principal helper on this book has been my spouse of a short 54 years, Barbara Marie Collier Cook. My Arst line editor and sometime coauthor, she reads my screed with patience and even with enthusiasm. This tome is a more readable and better book because of her attention and suggestions. My editor at Facts On File, Jeff Soloway, has steadied me throughout the process of bringing a book this size to fruition. So has my agent, Jodie Rhodes, who in the course of representing me professionally has also become my friend. I c annot praise enough the principal copy editor of this tome, Elin Woodger. Her attention to de tail and pursuit of excellence h as many times corrected matters of fact and excised authorial solipsisms. Once she has even corrected a long-cherished but mistaken conflation of Greek mythic Ägures.

Albion College has generously supported this effort with a congenial workspace and a dedicated printer. The w onderful s taff members of t he Stockwell-Mudd l ibraries ha ver egularly p roduced v irtually i nstant a nswers to m y ma ny questions a nd ha ve c heerfully f ulÂlled u nusual requests. I cannot express my gratitude en ough to John Kondelik, Peggy Vogt, Mike Van Houten, Alice Wiley Moore, Marion Meilaender, Carolyn Gaswick, Michelle Gerry, Cheryl Blackwell, Becky Markovich, J ennie Thomas, C laudia D iaz, Pa t Engleter, M ary Koch, B ev Br ankovich, Y vette Eddy, and Marilyn Kniburys for their enthusiastic cooperation and encouragement.

The Re verend D r. L eon W hite ga ve c areful consideration to the entries on the Bible and provided crucial feedback that signiAcantly improved them; any lingering deAciencies are mine. Professor Emeritus Robert G. Henricks of Dartmouth kindly pointed me in the direction of the best available sources for Alling in at least some of the gaps in my knowledge of ancient Chinese literature. He also led me to understand that, owing to archeologists' recent discoveries of early and hitherto l ost v ersions of C hinese t exts, this is t he golden age of the study of ancient Chinese literature. As always, too, I a m indebted to my blood brother, P. Lal, poet, translator, and publisher in Kolkata, I ndia, for i lluminating ancient I ndian letters f or m e, e specially w ith h is ma gniAcent verse t ranslations of t he Mahabharata and the Bhagavad Gita.

I w ish a lso to r emember bo th t he la te E mily Stern, who taught me Latin and with whom I read Cicero a nd Vi rgil, a nd t he u nflappably patient Mary E. McKinney, with whom I labored at Greek.

I am also deeply indebted to the hundreds of editors, translators, and writers whose books

and whose contributions to specialized reference volumes gave shape to my understanding of the underlying in terrelatedness of t he literature of the ancient Eurasian world. Though I have cited many suc h e ditors a nd a uthors b y na me i n entries where I ha ve speciĀcally included their ideas, for the others whose influence is of a more general nature, I gratefully acknowledge having consulted their work in the following reference volumes:

INTRODUCTION

It h as o ften s truck m e t hat, wh en E cclesiastes offers the opinion in the Hebrew Bible that there is no end to books and that much study is wearisome for the flesh, the author must have been trying to compile an encyclopedia of ancient literature. As far back into the mists of history as one can peer, there are at least allusions to prior books or to earlier poets. As soon as people perceived that they could invent systems of symbols t or epresent words, syllables, phonemes, or variations in pitch, they started to do it. Almost everywhere in the old world a nd i n s ome pl aces i n t he ne w, p eople invented such systems as long as 5,000 years agothe Chinese p erhaps a s long a s 7,000 y ears a go. Though at Arst t hey probably employed writing systems to keep rec ords for purposes of taxation, inventory, and the like, they soon began to employ such s ystems to record t heir n ational or tribal stories-their myths, their genealogies, and their histories. M any of t he s tories t hat e ntered t he record early and that still remain in it have to do with f amous men a nd women-often r ulers o r military leaders, but sometimes artists and poetswho ach ieved d ivine or quasi-divine status. Not much l ater, a rtists b egan, lik e Sappho, t o sing songs of themselves.

Most of t he e arliest su rviving w orks a re i n verse, and much was originally set to music. That

fact a lone s uggests a p rewriting tradition o f reciting a loud and singing the stories that have survived. So does the widespread appearance of similar stories explaining cosmology. One notes, for e xample, that the Ro man s ky g od, U ranus, had a precisely functional and linguistically cognate counterpart in the ancient South Indian sky god, Varuna. Their stories spring from a lost but clearly co mmon o ral so urce. Ex amples of s uch sources are to b e found in the *Nart Sagas*. These contain stories that have survived the ages in oral form and only recently been recorded in writing.

There are, of course, major differences between then and now. Modern readers think of literature as occupying the same territory as belles lettres novels, poems, short stories, and artsy memoirs. For t he a ncients, t he l iterary a rena w as m uch broader. Geography, physics, court cases, mathematics, the praise of athletes, history, cookbooks, philosophy, and war songs as well as drama and intensely emotional lyrics all were lumped under the rubric of literature. So were explanations of how the universe got started and books on farming and beekeeping. For a modern writer, trying to bring a s ense of such matters to a g eneral audience c omposed p rincipally of h igh s chool and college students and teachers, the problem becomes one of selection.

viii Encyclopedia of Ancient Literature

This work d eals mainly with p rimary te xts. Although teaching young people to write research papers requires that they have recourse to journals and scholarly commentary, the result of such papers is "commentary on commentary"-a useful phrase coined by Richard Brown of the Newberry L ibrary. This book, i nstead, is meant to acquaint learners with what they may expect to Ānd in broadly literary, ancient texts and to give the same learners an introductory overview about the people who wrote the works and the traditions in which t hose writers de veloped. F or readers wishing to pursue an interest into the secondary l iterature c oncerning i t, I ha ve t ried to include references in the bibliographies at the end of each entry to the most recent scholarly translations into English. When no English translation is available, I h ave selected a Sp anish, Italian, or French translation on the theory that, in polyglot contemporary A merica, many readers may have one of those European languages a s a Årst or second t ongue. S uch sc holarly e ditions of t he primary texts almost always survey the most useful secondary literature, and the Internet is also a f ruitful source of s upplemental bi bliography. Beyond t hat, h owever, for t hose r eaders w hose interests do lead them into the thicket of critical discussion concerning the languages and literatures of the ancient world, at the end of this encyclopedia, I have provided a b ibliography in two sections. The Arst section lists important secondary works add ressing t he l iteratures c overed i n this encyclopedia. The s econd s ection l ists a nd lightly a nnotates i ndispensable bi bliographic resources for c onducting b oth apprentice a nd advanced sch olarship i n m ost o f t he la nguages and literatures discussed in these pages.

In the entries themselves, I have tried to give a fair sample of as many ancient literary traditions as I could get a handle on in the time available to write this book. As a starting point, I have included a g enerous s ample of Gr eek and Ro man le tters from their beginnings well into the Christian era. I have tried both to c over and to go signiĀcantly beyond the classical canon suggested by scholars such a s Ha rold Bloom. Nonetheless, signiĀcant

coverage is devoted to all the writers and works commonly encountered in high school and college classes, such as \overline{A} e Iliad, \overline{A} e Odyssey, \overline{A} e Aeneid, the works of the great Greek dramatists, and m ore. N ote t hat s ome f amous w orks have been t ranslated under m ore t han one t itle. T o make t his bo ok as a ccessible as p ossible to s tudents, I have always tried to choose the title most familiar to modern readers—which in some cases is an English-language title and in s ome is t he original-language title or transliteration.

With r espect to t he a ncient te xts of H indu India, I have tried to hit the high spots. Indian letters c ontain a n i nexhaustible t rove of t reasure. The f ull a nd u nexpurgated te xt of t he *Maha bhanta*—India's national epic—is only now becoming *fully* available i n E nglish for the Ārst time. Bringing that work to fruition will require 16 v olumes, e ach almost 4 inches thick. Beyond Hindu writings, I have also included entries about Buddhist and Jain scriptures.

Scholarship i n a ncient C hinese s tudies ha s blossomed in the last two decades. A rchaeological d igs a t M a W ang Dui a nd el sewhere ha ve unearthed the earliest known versions of classic Chinese Confucian and Taoist texts. As a r esult, wonderful translations of many ancient Chinese texts are now available for the Ārst time, and more appear each year. As I s aid in the preface, this is the golden era of ancient Chinese studies, and of course a good d eal of l iterary cross- pollination occurred bet ween C hina a nd India—especially with respect to Buddhist texts.

Japa new literature st arts la te. The J apanese borrowed Ch inese characters and ad apted them to represent the Japanese tongue. The earliest surviving w ork of J apanese literature is the *Kojiki* (*Record of Anc ient Mat ters*), w hich a ppeared in 712 c.e.

Elsewhere, particularly in South America and Mesoamerica about the time of Socrates and Plato in Greece, writing was also flourishing. Though much of what was written has yet to be deciphered fully, it seems that the records of kings and gods and matters of a stronomy and cosmology o ccupied the thoughts of Zapotec and Mayan writers just as such matters interested the ancient Sumerians and B abylonians. The a neestors of I nean culture also devised a method for keeping track of all s orts of numerical matters—including t ax records—with a system of k notted s trings. Whether they also adapted this system to represent language is unclear, but an entry on quipu is included, just in case.

Although d ocuments r epresenting W estern Hemisphere t raditions e xist, t he o nes w e k now well date to shortly before the period of European contact. Technically, one could deAne ancient as describing the moment that a language ceases living exclusively in the mouths of its speakers and achieves symbolic repre sen tation. Such an operational deĀnition, however, is an impracticable basis for a one-volume reference work, so I have largely ignored the literature of languages whose written repre sen ta tion begins much later than the fall of the Western Roman Empire. The literature of sub-Saharan Africa represents a similar case. These literatures a re c overed i n t wo c ompanion vol umes published by Facts On File, Encyclopedia of Medieval Literature and Encyclopedia of Re naissance Literature.

Egypt, o f co urse, de veloped i ts h ieroglyphic system of writing very early. I have chosen to represent the literature of Egypt with a description of \overline{A} e Egyptian Book of the Dead. A discussion of the Hebrew Bible, of representative Apochrypha, and of the Dead Sea Scrolls represents my principal forays into ancient writing in Hebrew.

In addition to brief biographies of writers and sometimes-lengthy over views of representative works, I have tried to provide useful de Ānitions of 1 iterary ter ms. Re aders ma y t race crossreferences of interest by pursuing the words in small c apit all etters to other alphabetically listed entries where those terms occur and, by following the guide thus provided, may achieve a more comprehensive view of subjects of particular interest. I have also tried to present topical entries, such as the one deĀning *patristic exegesis* and others dealing with Greek stage conventions and like matters, to assist those readers who are trying to grasp the points of view of ancient writers.

Many of the works that deal with the origins of the universe and human beings and books that explore ethical matters occupy the status of Scripture in their cultures. Some of the books are so revered t hat t heir a dherents c onsider t hem to have b een w ithout a uthors and to have e xisted from e ternity. O thers a ssert the d ivine inspiration of human authors.

Despite my occasional moments of panic when it s eemed u nlikely t hat I c ould ac tually r ead enough a bout t he a spects of t hese subjects t hat were u nfamiliar to me, I ho pe t hat r eaders will perceive how much I have enjoyed bringing them these articles and synopses. I have had the opportunity both to return to texts more than half forgotten and to peruse new ones that I might never have read otherwise. Mostly, it has been great fun.

Academic sect of philosophy (Platonic Philosophy)

 \overline{A} e l abel *Academics* applied to t he followers of Pl at o and his successors. In the fourth century b.c.e., Plato had lived near Athens and founded a school at a public gymnasium named in honor of an Athenian hero, Academus. \overline{A} e school survived at that location until the first century b.c.e. \overline{A} ereafter it m oved el sewhere. A n o utpost su rvived at Byzantium until well into the Christian era.

Plato and h is immediate successors had subscribed to the view that the ultimate constituents of re ality were id eas. P hysical ob jects were t he reflections of an eternal and ideal form. Human perceptions of o bjects were reflections of re flections of those ideal forms. Plato and his immediate successors, therefore, are considered idealists.

Later Academics became identified with skepticism. \overline{A} e m ost r igorous A cademic ske ptics argued that knowledge itself was finally impossible a nd t hat t he p hilosopher m ust t herefore b e prepared to suspend judgment indefinitely. Later still, the A cademics softened that view, de ciding that whatever proved convincing, though perhaps impossible to p rove, was in a nd of itself a su fficient ground for drawing a philosophical conclusion and for taking action. In essence, this is the view espoused by one of the most notable Roman adherents of the later Academic school, Cice r o. See also Ari st ot l e.

Acharnians, The Aristophanes (425 B.C.E.) First produced at the Athenian festival of Lena ea, Ari st ophane s' comedy, \overline{A} e Acharnians, appeared under t he pl aywright's ps eudonym, C allistratus. \overline{A} ough the play's appearance may not have been its aut hor's first a ttempt a t w inning t he c omedy competition's top prize, \overline{A} e Acharnians is the first of h is c omedies to ha ve ac hieved that g oal. Dicaeopolis r epresents Aristophanes' n otion of the good Athenian citizen who, unlike many of his fellows, has come early to the assembly to do his duty. O thers who should be there are still in the marketplace, trying to e scape being marked by a vermilion-colored rope. Ā is device was used to i dentify t hose w ho t ried to sh irk t heir c ivic responsibilities.

In his o pening s oliloquy, D icaeopolis declares his intention to a ssure that the members of t he a ssembly spea k of nothing but a peaceful e nd t o the P eloponnesian W ar. \overline{A} is noble i ntention, ho wever, is t hwarted by the Herald of the assembly, who refuses to acknowledge speakers favoring peace and calls instead for a report from a d iplomatic party, recently returned from the court of the Athenians' former e nemies, t he P ersians. \overline{A} e a mbassadors report that the Persians have offered the Athenians gold to support their conflict with Sparta and the other cities of the Peloponnesians, but a Persian in their company makes it clear that the ambassadors are lying.

Seeing that peace for Athens is a foolish hope, Dicaeopolis gives m oney to a nother m ember of the peace party, A mphitheus, to s ecure a private peace bet ween Spa rta a nd t he m embers of h is family. W hile A mphitheus i s g one, a g roup of \overline{A} racian mercenaries are introduced as potential allies a gainst the S partans. \overline{A} ey see m c apable only of thievery, and they confirm this by stealing a sack of garlic from Dicaeopolis.

Amphitheus returns and reports that he was set upon by a group of old men, charcoal burners, from A charnae. Veterans of the battle of Marathon whose grapevines have been cut by the Spartans and t heir a llies, t hey had t ried to p revent Amphitheus fr om bringing t he t reaty. H e has nevertheless s ucceeded and b rings t hree b ottles of wine that stand for three potential treaties with the P eloponnesians. T asting t hem, D icaeopolis rejects the first two, but the third treaty is a 3 0year t ruce b oth on land and sea. Ā is o ne he accepts and ratifies by drinking the bottle's contents in a single gulp. He decides to celebrate the festival of the r ural D ionysia. St ill a fraid of t he pursuing Ac harnian c harcoal bu rners, t hough, Amphitheus flees.

 \overline{A} e ch or us en ters in the guise of the Acharnians, s earching for A mphitheus. \overline{A} ey m ake clear t hat they want revenge f or t heir r uined vineyards and th at they wish t o c ontinue t he war. Dicaeopolis reenters with his daughter and servants and begins the c eremony of t he r ural Dionysia. \overline{A} roughout the play and especially in this section, a good d eal of s exual h umor a nd punning contrasts with the play's serious political subject.

 \overline{A} e A charnians b egin p elting D icaeopolis with stones because he has concluded a separate peace. He tries to get them to listen to his reasons. \overline{A} ey refuse and a re a bout to s tone h im when he tells them that he has one of their fellow citizens hostage. He goes in and brings from his house a basket of Acharnian charcoal, which the Acharnians, whose stupidity is the butt of a good deal of joking, recognize as their fellow citizen.

Fearing t hat D icaeopolis w ill c arry o ut h is threat to disembowel the basket of charcoal, the Acharnians agree to throw down their stones and listen to him, particularly in view of his promise to speak with his head on an executioner's block so that they can behead him if he fails to convince them. B efore a ssuming th at p osition, ho wever, Dicaeopolis goes to the house of h is n eighbor, Euripides, who is composing a t ragedy. He begs Euripides for the rattiest, most miserable old costume in his collection, a beggar's staff, a little basket with a lighted lamp inside, a little pot with a sponge for a stopper, and some herbs for a basket. Having secured these items, he also asks for a little chervil, but the a nnoyed Eu ripides lo cks the door on him.

Ā en Dicaeopolis puts h is he ad on t he block and begins his speech. He traces the history of the quarrel t hat has a ll Greece i n a rms a nd a rgues that b ecause the conflict g rew f rom such p etty issues, history proves the parties to the quarrel to have no common sense. Half of the Acharnians are convinced by h is a rgument, b ut t he o thers consider i t i nsolent, a nd t he A charnians b egin quarreling among themselves. Dicaeopolis's allies seem to be winning, so his opponents c all the general, Lamachus, forth from his house to assist them. D icaeopolis a nd L amachus t rade i nsults, and Dicaeopolis accuses the general of enriching himself at the expense of the Athenian state by pressing for a continual state of war. A e general illustrates the point by arguing for perpetual war, and exits.

 \overline{A} e people now approve Dicaeopolis's actions. \overline{A} e c horus d irectly add resses t he a udience i n support of the b enefit t hat the satire of a c omic poet brings them when he exposes the ploys and plotting o f a c rooked p olitician l ike Cleon—a demagogue whom Aristophanes often denounced in his plays.

Having made h is p rivate t reaty a nd ha ving convinced the populace of the benefits of peace, Dicaeopolis ma rks o ut a l ittle s quare t hat he announces t o b e his m arketplace. All a re w elcome to trade there. Å e first to arrive is a Megarian. Å e c ity o f M egara a t t his e poch w as a mutinous A thenian de pen dency. Å e A thenians had ruthlessly suppressed a revolt there, and the Megarians s uffered ter rible p rivation. A ristophanes illustrates this by having the first trader to a rrive at D icaeopolis's little m arket o ffer h is two s tarving d aughters f or s ale b y d isguising them a s l ittle p igs. N ot de ceived, D icaeopolis saves the children, buying them for a quart of salt and a bunch of garlic.

As t he p lay p roceeds, A ristophanes se izes opportunities to lampoon other aspects of Athenian life of which h e d isapproves, p articularly informers. When a Boetian trader a rrives to do business at h is little m arket, D icaeopolis t rades an Athenian informer for his wares. Seeing that Dicaeopolis has acquired useful and edible goods, his neighbor, the general Lamachus, sends a slave to buy an eel.

Other A thenians, s eeing t he b enefits of t he private p eace t hat D icaeopolis has c oncluded, try to trade with him for some of it, but he refuses all offers. As the action of the play nears its end, Lamachus is called off to duty and Dicaeopolis to a D ionysian feast. In a m ock a rgument, both prepare for their respective duties, Lamachus b y a rming and D icaeopolis b y p reparing food a nd d rink. As t he p lay c oncludes, b oth return-Lamachus wounded in an accident on his way to battle, Dicaeopolis roaring drunk and accompanied by t wo a ttentive c ourtesans. A e representative of war endures torment, and the representative of p eace enjoys t he ple asures of the flesh. A e chorus celebrates his triumph, and the play ends.

Acontius and Kidippe Callimachus (third century B.C.E.)

Included in the *Aetia* (Origins) of Callimachus, *Acontius and Kidippe* is a story of young love and trickery.

Having fallen in love at first sight with the lovely y oung K idippe, a ma iden wh om ma ny y oung men have sought to wed, Acontius learns from the god of love, Eros, a t rick by which he m ight win her. As Kidippe walks with her nurse in the annual procession to the temple of Apollo on the island of Delos, Acontius writes on an apple the words: "I swear by Artemis to marry Acontius." He throws the apple in the path of the nurse, who picks it up and hands it to Kidippe. Kidippe reads the words

aloud, a nd, r ealizing t hat s he has p ronounced a binding oath, throws the apple away.

One after another, the mothers of eager suitors try to a rrange a ma rriage with K idippe for their sons. W hen, however, the days appointed for the weddings arrive, Kidippe becomes deathly ill, and the weddings are called off. After three such incidents, Kidippe's father consults the oracle of Apollo at Delphi. Ā ere he learns that the gods consider the apple oath binding.

Yielding to the divine will, the parents arrange the marriage, and the young people are wed. Callimachus closes his story by tying it to the theme of the v olume i n w hich it app ears. Addressing h is friend, C ean, C allimachus e xplains t hat Ce an's clan, the Acontiadae, sprang from the union whose story the poet has just told. As the story ends, the poet also alludes to a series of related incidents that also take their origins from the story he has just told.

Adelphi (The Brothers) Terence (ca. 160 B.C.E.)

Following a prologue in which Ter ence defends himself against an apparent charge of having stolen h is plot from Plautus and in which Terence cites as his source a different part of Diphil us's play *Synapothnescontes* than the one that Plautus used, the play proper begins.

Micio begins the play with a substantial soliloquy. In it we learn that his adoptive son—really his nephew—Aeschinus h as not re turned ho me all n ight. We also d iscover t hat M icio's b rother Demea has g iven h is son Aeschinus to M icio to rear. D emea has kept h is other son, Ctesipho, at home. Micio and Demea, however, disagree about child-rearing tech niques. Micio favors a n indulgent a nd p ermissive re gimen f or A eschinus, whereas Dem ea f avors a s tricter u pbringing for Ctesipho. D emea h as o ften c riticized M icio f or his laissez-faire attitude.

Demea n ow en ters, ho wever, a nd i n s cene 2 reveals that during the night Aeschinus has broken into a p rivate home, beaten m embers of the family, and c arried off a s lave girl—a m usician. Demea blames Micio, who staunchly defends both his p arenting a nd a y oung ma n's r ight to suc h high- pirited behavior. In s cene 3, though, w e learn that Micio truly is distressed by Aeschinus's actions and pretended otherwise for his brother's benefit. We also learn that Aeschinus has informed his adoptive father of his intention to marry.

Act 2 opens with the entry of A eschinus; his servant Parmeno; the music- girl he has kidnapped; and Sannio, a procurer who has paid 20 minae of silver for the girl and has been holding her as a thrall. After ha ving S annio s truck f or hi s p resumption i n buying a free woman, Aeschinus offers to restore Sannio's money and end the matter. Sannio thinks over the offer, but he is reluctant to accept it lest Aeschinus use the law to def raud Sannio of his money. Micio's slave, Syrus, enters and reveals that he knows enough about Sannio's shady b usiness to r uin him u nless he a ccepts Aeschinus's offer-indeed u nless he a ccepts h alf the offer. Ctesipho, who is in love with the musicgirl, enters praising h is brother for h is k indness. Aeschinus brushes off the praise, sends his brother in to his beloved, and goes to the market with Sannio to get his money.

In act 3, the plot takes an unexpected twist with the appearance of two women, Sostrata and Canthera. Ā ey are in urgent need of a midwife to help deliver a child whom Aeschinus has fathered with Sostrata's da ughter, Pa mphilia. H owever, a s ervant, G eta, en ters a nd, reporting that A eschinus has k idnapped a music-girl, a nd S ostrata c oncludes that he has a bandoned t he m other of h is child. S ostrata g oes t o see k assistance from an aged kinsman, Hegio.

Scenes 3 and 4 reveal Demea in search of Ctesipho. A e father has heard that his son was involved in t he music-girl in cident. D emea en counters Syrus. Syrus tries to throw Demea off the scent by telling him that his son is in the fields attending to his father's business. Convinced, Demea is just about to for get the whole affair when, in scene 6, he encounters Hegio, who is a member of his tribe and a lso P amphilia's k insman. Hegio t ells th e whole history of the relationship between Aeschinus and Pamphilia, and what a cad the young man is to desert her for the music-girl. (At this point, from offstage, we hear Pamphilia's cries of labor pain and her prayers to Juno-the patron goddess of c hildbirth.) D emea pr omises t o i ntervene o n Pamphilia's behalf with Micio, and Hegio reports the good news to Sostrata.

Act 4 finds D emea t rying to ob tain n ews of Ctesipho's whereabouts from Syrus. Ā ough Ctesipho is in fact hiding nearby, Syrus sends the lad's father on a wild goose chase in search of him. In scene 4, H egio a nd M icio have s traightened o ut the entire matter between them, and they go to tell Sostrata that Aeschinus is true to his promises to Pamphilia.

Aeschinus, however, is u naware of this happy outcome a nd ha s le arned ho w h is f eelings ha ve been m isrepresented to S ostrata and P amphilia. In s cene 5, he r ushes to Sostrata's house a nd pounds on the door so that he can straighten out the confusion. His father Micio, however, is there ahead of him. Deciding that his adoptive son will benefit from worrying a bit longer, Micio misleads the young man. Pamphilia must, he says, marry a near relative who has come to t ake her a way to Miletus. W ithout c onfessing t hat he argues f or himself, Aeschinus asks Micio to consider the feelings of the young man who has fathered Pamphilia's child. He weeps. H is te ars to uch h is father's heart, and the older man confesses that he knows everything, promising that A eschinus and Pamphilia will wed.

In the two scenes that follow, Demea and Micio encounter o ne a nother, a nd M icio e xplains t he outcome. D emea a sks i f M icio i s pleased w ith Aeschinus's m atch w ith a p enniless g irl. M icio admits t hat he i s n ot, b ut t hat o ne m ust ac cept what life brings and try by art to cure it. Demea has the impression that Aeschinus, the music-girl, and Pamphilia are all to live under the same roof in a ménage à trois. He is as yet unaware that Ctesipho loves the music-girl.

Act 5 opens with Demea's soliloquy in which he regrets having spent h is life worrying about money a nd w earing h imself o ut a bout t rifles while his cheerful brother has spent an easy life. Worst of a ll, Demea finds that both the boys he fathered n ow a void h im a nd s eek o ut M icio a s their confidant. Acting on this reflection, he immediately begins treating both sons and slaves with generosity a nd k indness. E ncountering A eschinus, w ho i s c haffing a t t he d elays i nvolved i n wedding preparations, D emea t ells h im to ha ve the wall between the neighboring houses thrown down a nd t he b ride b rought o ver. F or t he first time in h is life, h is s on c alls h im " charming." Demea likes the effect.

He next talks his initially resistant 65-yearold brother Micio into marrying Sostrata. $\bar{\mathrm{A}}\,$ at accomplished, Dem ea en lists A eschinus a s a n ally and talks Micio into freeing his slave, Syrus, and his wife as well. When an astonished Micio wonders at D emea's s udden cha nge, Dem ea confesses t hat h is b ehavior i s i ntended a s a n object lesson. A e reason that the two younger men love M icio m ost a rises from h is foolish indulgence. A lthough Demea co nsents t o a union between Ctesipho and the music-girl, he makes that his last concession to youthful folly. Demea offers to advise the young men in curbing their extravagant behavior in future so that they can live genuinely happy rather than merely self- indulgent l ives. T aking Dem ea's p oint, the young m en ac cept h is guidance, a nd t he play ends.

A S ophist p hilosopher a nd c elebrated o rator, Ælius Aristides was born at Hadrianapolis in the Roman province of Bithnia on the Bosphorus Sea to the family of Eudamon, a priest of Zeus. He moved to Smyrna (also called Myrrha, now Izmir in Turkey), where he established his reputation as a s cholar, a nd b ecame a p ublic hero f ollowing Smyrna's de struction b y a n e arthquake i n 178. Ælius w rote to t he em peror Ma rcus A urelius describing the devastation, and the emperor was so moved that he had the city rebuilt. A grateful citizenry erected a statue in Ælius's honor.

Fifty-four of \mathcal{E} lius's public speeches survive in full, t ogether with a few f ragmentary r emains. Å ey suggest that he was as accomplished an orator a s s ome of h is golden-age p redecessors. H e also wrote a two-scroll treatise on oratorical style that distinguished between the high style appropriate to political speeches and the ordinary style employed for other purposes.

Another example of h is writing a lso s urvives. Ælius was a fflicted by a serious and recurring illness, perhaps psychological in nature. Aeneid Virgil (30-19 B.C.E)

For most of the last decade of his life, Vir gil, who had withdrawn from the city of Rome i nto the congenial countryside of Campania near Naples, worked on his great Latin epic, *Aeneid*. Inspired by the for m and content of h is i ncomparable Greek pre deæs ør, Homer, Virgil ælf- ønsciously sought to create a national epic for the emergent Roman Empire under the rule of its first emperor, August us Caesar.

As one strategy among many to achieve that end, Virgil sought to link the dynasty of ancient Troy in the person of its surviving prince, Aeneas, with the newly created Roman imperium—and with the victorious heir of a man who, though perhaps em peror in fact, was never em peror in name, Jul ius Caesar. Ā us, in the English translation of A llen Mandelbaum—one u nparalleled in its poetic reflection of Virgil's original—Virgil begins with his statement of epic purpose: "I sing of a rms and of a man: his fate / had made h im fugitive...."

Ā en, after alluding to his hero's difficult voyage and his facing not only maritime dangers but also the unremitting wrath of Juno, the queen of the gods, Virgil tells how the Trojan prince came at last to the Lavinian shores of Italy, bringing his gods w ith h im. "From t his," s ays Vi rgil, " have come the Latin race, the lords / of Alba, and the ramparts of high Rome."

In the *Aeneid*, Virgil a ssumes on the part of his readers a close familiarity with the names, roles, and relationships of a large cast of characters familiar to his audience but not to a modern one. To assist a modern reader less familiar with such matters, therefore, before summarizing the epic's action, I provide a grid with the names and roles of the characters that appear in this précis of Virgil's poem.

Book 1

In keeping with epic convention, Virgil calls on the Muse to explain the root of Juno's enmity, and in response, the Muse begins speaking through the poet and explaining the wrath of the goddess. Juno favors Carthage, a city on the North African coast that has been her candidate for domination of the Me diterranean world. P rophecy has foretold, however, that Rome will eventually surpass Carthage. Knowing this prediction, Juno does all within her very considerable power to del ay that outcome, i ncluding h arassing a small band of Trojan W ar s urvivors a s their fleet a ttempts t o cross the Mediterranean Sea. (See muse s.)

Juno is also annoyed (for background on Trojan War, see entries on *Ili ad* and *Odyssey*.) that Athena (Minerva) c an s eemingly ac hieve m ore carnage at sea t han c an t he que en of t he g ods. Juno t herefore appeals to A eolus, the god of the winds, f or a h urricane, p romising h im a w ife from among her sea nymphs in recompense. Aeolus complies, and the Trojans instantly find themselves in shallow water off Sicily in the teeth of a tempest. A eneas watches a s sh ip a fter sh ip goes down. However, Neptune, the Roman god of the sea, reproves and calms the raging winds. Aeneas is then able to collect the remaining seven vessels of h is s quadron and b ring t hem to ha rbor off Libya on the North African coast.

Ashore there, Aeneas successfully hunts seven deer—one for each of his remaining ship's crews. As they feast, the scene shifts to H eaven, where Venus, the g oddess o fl ove, is a sking her f ather, Jupiter, why he has allowed such evil to befall her son a nd f avorite, A eneas. J upiter c omforts her and predicts the future for Aeneas and his descendants. A eneas will b ecome the k ing o f L atium. His descendant, Romulus, will found Rome, and Rome w ill ha ve " empire w ithout en d" a nd b e ruled by a Trojan emperor. Even Juno will then hold the Romans dear.

 \overline{A} e s cene t hen sh ifts back to N orth A frica, where A eneas a nd h is c ompanion A chates a re trying to find out where they have made landfall. Disguised as a \overline{A} racian huntress, Venus encounters t hem a nd sp eaks to t hem. \overline{A} ough Ae neas does not recognize his mother, her voice gives her away as a goddess. the domain of Dido, the widow of Sychaeus, and the object of the unlawful passion of Sychaeus's murderer, her b rother P ygmalion. Fle eing her brother's embraces, Dido and her followers have built the city of Carthage. Eventually Aeneas recognizes the goddess as h is mother and reproves her for her disguises.

Entering the city shrouded by a m ist, A eneas and A chates ma ke t heir w ay to D ido's tem ple honoring Juno. \overline{A} ere they find the history of the Trojan W ar movingly depicted in sculptures. As the refugees stare in wonder at their own history, the arrival of the beautiful Dido interrupts them. She sits in state dispensing legal decisions. \overline{A} en, through the throng at the foot of her throne, the Trojans a re a mazed to s ee a rrive ma ny of t he comrades wh om t hey h ad t hought l ost at s ea. Restraining their desire to g reet their comrades, Aeneas a nd Ac hates r emain c oncealed i n t heir supernatural mists to observe what welcome their countrymen may find with Dido.

 \overline{A} e eldest of the Trojans, Ilioneus, reports to Dido the objectives of their voyage and the disasters that they have suffered en r oute. He asks to be a llowed to repair the fleet a nd continue t he expedition. Dido willingly grants his request and wishes aloud that Aeneas, too, were present. \overline{A} e concealing f og d issipates a nd r eveals A eneas, godlike in his masculine beauty. He greets Dido. Startled, she r eturns his greeting, invites him to join her a t her pa lace, a nd s ends p rovisions for the other Trojans to the beaches. Aeneas instructs Achates to send gifts for Dido to the palace with Aeneas's son Ascanius.

Venus, however—always t rying to g ive Aeneas an advantage in case matters turn sour substitutes Cupid in the form of Ascanius. As a result of the arrival of the winged god, Dido falls hopelessly i n lo ve w ith A eneas. A s he r he art becomes e nsnared, a g reat ba nquet p rogresses, and f ollowing m uch d rinking a nd en tertainment, Dido asks Aeneas to recount the history of his wanderings from the beginning. Ā us, having begun in the epic fashion in the middle of the story, Virgil jumps back to its s tart as the second book begins.

Book 2

Aeneas tells how the desperate Greek invaders of Troy, advised by Minerva, hit upon the stratagem of a large wooden horse, supposedly an offering for their safe return home, but in fact a ruse to get some of their best men inside the gates of Troy. Ā e Trojans, thinking the Greek fleet has sailed, open t heir gat es a nd sig htsee o n t he battlefield. Ā e p rophet L aocoön adv ises de stroying t he horse, but the gods have determined otherwise. As the crowd admires the horse, a young Greek captive named Sinon is dragged in. Although in fact S inon is part of the conspiracy to get the horse inside Troy, he persuades the Trojans instead that he was supposed to be sacrificed to ensure the Greeks a fair passage home. He avoided that fate, he explains, by escaping his bonds and hiding in a muddy pond until the Greeks had sailed. Ā e Trojans believe and pity him.

Sinon convinces them that all along the Greeks' only hop e h ad l ain in t he favor of Pa llas A thena (Minerva), b ut t hat w hen they h ad vi olated he r shrine, t he Pa lladium, a t T roy, t he g oddess had switched s ides and the Greek c ause w as do omed. On t he adv ice of t he Greek p rophet C halcas, s ays Sinon, t he Gr eeks had c onstructed t he horse a s atonement for stealing the statue of the goddess. He convinces the Trojans that the horse had been constructed so i t co uld n ot be b rought w ithin T roy's gates. Should the Trojans harm the horse, the prophecy p redicts t heir d estruction. S hould t he horse somehow " climb t he wa lls," ho wever, t he T rojans would eventually rule the Greeks.

As if to confirm Sinon's false words, two great sea serpents slither a shore and encircle and kill the prophet L aocoön and h is two children. \overline{A} e Trojans take this horror as divine confirmation of what Sinon has told them, and they immediately set about breaching their own walls s o that the horse can be brought into the city. Late at night, Sinon opens a trapdoor in the horse to f ree the Greek warriors hiding within its hollow interior. \overline{A} ey in t urn open Troy's gates to the Grecian troops that have come up from their hiding places and from the returned ships.

Now Ae neas m ovingly d escribes t he sack of Troy and the Trojans' fruitless attempts at resistance. H e p ictures t he ca pture o f t he T rojan women and the death of King Priam at the hands of the Greek warrior, Pyrrhus. He explains how, at last, he encounters Venus, his mother, who tells him to see about preserving the surviving members of h is own family: h is father A nchises, h is wife C reüsa, and h is s on A scanius (also often called b y hi s a lternative na me, I ulus). A eneas finds them and persuades his father to ac company him. Carrying the old man on his back, holding his s on by t he hand, and with h is wife and other companions following, he sets out through the burning city. Everyone but Creüsa makes it. When he misses her, the frantic Aeneas runs back, searching ev erywhere u ntil h e e ncounters her ghost, who tells h im that h is fate has destined him for a n ew bride on the banks of the Italian river Tiber. Aeneas tries three times to emb race his wife's shade, but his circling arms encounter no substance. So, now at the head of band of refugees, Ae neas makes for the relative safety of the nearby mountains as the second book ends.

Book 3

 \overline{A} e third book finds the Trojan exiles building a fleet to carry them on a voyage across the Mediterranean S ea in search of a n ew home. A eneas attempts a landing in \overline{A} race, but when he offers sacrifices and tries to uproot a small tree, its roots bleed. A second attempt produces the same result. (In the M iddle A ges, Da nte w ill b orrow t his device wh en de scribing t he h ellish fa te of su icides.) A third attempt produces the voice of the dead Trojan prince Polydorus, who warns Aeneas that he must sail on as it was the \overline{A} racian king who murdered him. (See *Hec uba*.)

Another landing on the Mediterranean island of D elos a gain p roduces d isappointment a s t he island's tutelary deity, Apollo, advises them to sail on to Crete, the island from which the archetypal Trojan ancestor, Teucer, had sailed when he founded t he ci ty of Troy. W hen the Trojan wanderers obey, ho wever, t hey a re plague-stricken immediately on landing. Prepared to sail back to Delos in search of further prophecy, Aeneas is spared that necessity as the Phrygian household go ds that he has carried with him from Troy appear in a dream with a message from Apollo: Italy will be the Trojans' new home. \bar{A} ey will not win it easily, however. Storms and an inadvertent war with the Harpies (also c alled the Furies) a wait them on their jo urney. \bar{A} is last episode earns them the enmity of the Furies, who promise that the Trojans will not reach Italy b efore f amine h as m ade t hem g naw t heir tables.

Coasting Greece, the exiles winter on the Island of Leucadia, near the temple of Apollo, standing close by the promontory from which, much later, an unlikely legend reports that a lovelorn Sappho leapt to her de ath. With spring, the Trojan wanderers take to their ship once more. Making landfall i n Mysia n ear the city of Buthrotum on the river Xa nthus, A eneas and h is c rew en counter Andromache (see Andromache,) t he w idow of the Trojan hero Hector. Now the companion of Pergamus, founder of the city Pergamum, Andromache is making offerings to h er dead husband. Mutually s tartled a t t he en counter, t he T rojans and An dromache are e xchanging n ews w hen another Trojan survivor, prince Helenus, comes down from the city to welcome his countrymen.

In the following d iscussion, A eneas and h is voyagers le arn that Italy is still a long and difficult v oyage a way. I ts route, part r eal and part mythic, follows a portion of the one that O dysseus sailed in Homer's $\overline{A} \ e \ Odyssey$. More encouraging is the information H elenus shares with Aeneas a bout his ultimate de stination. A eneas will know he has arrived at his fated destination when h e finds a "huge white s ow" suckling 3 0 white piglets beside a secret stream and under the branches of a n i lex. He lenus a lso d iscounts the Harpies' warning about gnawing at the tables.

Continuing hi s p rophecy, H elenus i nstructs Aeneas to shun the eastern coasts of Italy, which are a lready o ccupied b y Gr eeks, a nd su ggests coasting Sicily on the south and not attempting the S traits of M essina. Ā en, w hen t he T rojan wanderers arrive at Cumae, a point near modern Naples, they must consult the sibyl who inhabits a cave at Avernus. She will tell Aeneas what he needs to know next.

After f urther leave-taking a nd r eceiving g ifts from his former countrymen and from Andromache, A eneas and h is band resume their journey. At long last they sight in the distance the hills of Italy and eventually Mt. Etna on Sicily. A ey camp nearby a nd e ncounter a m ember o f O dysseus's crew who was forgotten and left behind when they escaped the Cyclops's cave. A is castaway, Achaemenides, tells again the story of the Cyclops. $\ddot{\mathrm{A}}\,$ e Trojans accept A chaemenides as a passenger and, in the nick of time, e scape from the land of the Cyclops Polyphemus and his kin, for the one-eyed giants had become aware of the Trojans' presence. Aeneas reports the balance of the voyage up until the p oint th at th e h urricane d rove the T rojans ashore in Africa, and Book 3 ends.

Book 4

Book 4 o pens w ith r enewed f ocus o n D ido's obsessive passion for Aeneas—a feeling that she shares w ith her si ster a nd c onfidant, A nna. "I know too well the signs of t he ol d flame," she remarks prophe tically, but she a lso r epeats her resolve not to r emarry. A nna, however, counsels Dido o therwise a nd feeds her ho pe for a union with A eneas. A s s he s tudies t he sig ns of t he future in her sacrifice, Virgil inserts ominous references to fire a nd flame a s D ido's behavior increasingly reveals her a s one in the grip of a n irresistible and burning passion.

Juno, seeing an opportunity to avoid fate, proposes a truce with Venus. Let A eneas and D ido rule in Carthage; the Roman Empire may never happen. Venus, ho wever, s ees t hrough t he r use and suggests that Juno put her proposition before Jupiter. Ju no, who is goddess of marriage, then announces h er i ntention to i solate A eneas a nd Dido during the next day's planned hunt, and to see t hem u nited in marriage. Venus c unningly assents.

When a sudden t hunderstorm i nterrupts t he next day's hunt, Dido and Aeneas, separated from

their party, end up in the same cave. What occurs there, which with Roman golden-age taste Virgil does not report, Dido calls marriage. Rumor, however, is swift to fly to e very corner. It reaches the Moorish king, Iarbas, who had g ranted Dido the right to settle and is as enamored with her as she is with A eneas. Iarbas prays to J upiter for r edress, and Jupiter sends Mercury to remind Aeneas, who has d allied the w inter a way w ith D ido, that he must be on his way to Italy. Mercury's appearance terrifies Aeneas and has the desired effect.

Yet A eneas is t orn between what he knows to be his destiny and duty and his passion for Dido. He gives secret orders for the fleet to be readied, but Dido intuits his intention and rages at him. Aeneas d efends h imself, pleading t hat it i s not his o wn f ree w ill t hat re quires h im to s ail to Italy. S he r ejects h is ple as a nd d ismisses h im, promising to haunt him forever. She takes to her chamber, from which she can watch the frenzied preparations on the beach as Trojans ready themselves for their voyage. Sending Anna as her messenger, Dido pleads that Aeneas will at least come to see her once more, but he remains adamant in his purpose.

At last d riven mad by her obsession—a madness that Virgil depicts with great deftness, verisimilitude, and tact—Dido prepares to end her life. She d isguises her i ntention, ho wever, p retending that she is about to em ploy magic to w in Aeneas back. She has her sister build a funeral pyre in the inner c ourtyard of t he pa lace. On i t a re he aped Aeneas's a bandoned w eapons a nd c lothing, t he bed t he lo vers had sha red, a nd A eneas's e ffigy. Once she has performed the witchcraft associated with her design, a sorrowful Dido once more considers her options and rejects them all but suicide.

At just that moment, Mercury once again visits Aeneas to stiffen his resolve for sailing. Terrified at t he g od's app earance, A eneas g ives t he order, and the Trojans sail for Italy. S eeing h im sail, D ido i nvokes ter rible c urses on h im. Ā en, sending a servant to b ring her sister Anna, Dido mounts t he f uneral py re, s eizes A eneas's s word, and falls upon it. Her astonished servants spread the word, and Anna rushes to the spot, where she finds Dido still breathing but in agony. Juno takes pity on her and sends the goddess of the rainbow, Iris, to release Dido's spirit from her body.

Book 5

From t he d eparting sh ips, a s B ook 5 b egins, Aeneas s ees t he c onflagration of D ido's f uneral pyre without knowing what it means. Once again assailed by storms, the fleet is forced ashore on Sicily in t he friendly r ealm of A cestes, s on of a river god and a Trojan mother. Acestes welcomes the w anderers, a nd A eneas de clares a d ay o f feasting and c ompetitions in honor of the anniversary of the death of h is father A nchises, who had passed a way the previous time the fleet had harbored there.

Virgil honor st he a esthetic pr inciple of *varietas*—variety in composition—in Book V by departing f rom t he ma in l ine of t he s tory to detail a s ailing c ompetition a mong f our o f Aeneas's galleys. Virgil here shows himself to be an a ccomplished s porting c ommentator i n t he tradition of Pindar. To the delightful account of the race with its triumphs and disasters, he adds poetic lists of prizes, which he describes. He closes this section with a description of a galley, disabled i n t he r ace, a s i t l imps l ate i nto sho re. Footraces follow, with cheating and fouling, and then c omes b rutal b oxing followed by archery. Finally t he T rojans dem onstrate t heir s kill a s cavalry troops.

Juno, however, has not abandoned her en mity toward the Trojans. She sends Iris disguised as an aged T rojan w oman, Be roë, wh o a ppeals t o th e weariness of t he T rojan w omen, en couraging them to burn the ships so that they will not be able to venture further on the sea. Ā e women fire the ships, b ut i n a nswer to A eneas's p rayer, J upiter sends a deluge that extinguishes the fires, saving all but four vessels. Ā en, however, a senior member of the expedition, N autes, adv ises A eneas to allow those who a re w orn o ut with s eafaring to become colonists in Sicily and to proceed to Italy only with those whose hearts are eager for m ore war and for fame. During the night, the shade of Aeneas's father, Anchises, comes as Jupiter's messenger and seconds this counsel.

 \overline{A} ose Trojans who wish to do so remain in Sicily, and the rest repair the ships and once more set sail. Venus i nvokes Neptune's protection for the seafarers, and the sea god promises that they will reach the harbor of Averna safely with the loss of o nly o ne more Trojan. \overline{A} is prophecy is fulfilled when th e h elmsman, P alinurus, f alls asleep at t he s teering oar, f alls o verboard, a nd apparently d rowns while the fleet sweeps on its way and Book 5 ends.

Book 6

In Book 6, the Trojans arrive at the cave of the Avernan sibyl—a fear-inspiring p rophetess o f Apollo. Under her terrifying urging, they make their s acrifices and add ress their p rayers to the sun g od. A eneas p romises Apollo that he w ill build temples and shrines to the god and his sister Diana wh en the Trojans ha ve e stablished their kingdom.

Ā e sib yl b egins to p rophecy w ar, a f oreign wedding, and an unlikely path to safety via a Greek city. Wh en the prophetic e cstasy has de parted from the sibyl's breast, Aeneas asks permission to descend through her cave into the underworld so that he can once more consult the shade of his father, Anchises. Ā e sibyl warns Aeneas that few who make that descent return. Nonetheless, she instructs him to pluck the golden bough of Proserpina, which will protect h im a nd enable h im to return to the upper world. Before he undertakes the horrid descent, however, she instructs him to bury a dead friend. Surprised, the Trojans discover on the beach the body of their comrade Misenus, pounded to death by breakers. As they prepare his f uneral pyre, A eneas lo cates a nd pl ucks t he golden bough.

After t he f uneral r ites ha ve b een obs erved, Aeneas pre pares to de scend t hrough a widemouthed cavern whose vapors pour forth, killing birds t hat at tempt to fly o ver i t. A s t he sib yl guides A eneas th rough th e a irless c ave o n t he path to Hade s, Virgil sp eaks i n h is o wn v oice,

Virgil's Ha des i s a n even m ore f rightening place than Homer's. At the entrance to the underworld, Aeneas encounters the personifications of Grief, C ares, D iseases, Ol d A ge, F ear, H unger, Poverty, D eath, T rials, S leep, E vil P leasures, War, t he F uries, a nd St rife. H e a lso en counters many of t he mon sters of a ncient mythology— Gorgons, H arpies, C himaera, Ce ntaurs, a nd Geryon—and s ees the shades o f t he r ecently dead, all pleading to b e allowed into Hades. But those for whom the rites have not been performed must wait 100 years for entry.

In Hades, Aeneas encounters the shade of his helmsman, Palinurus, who reports that he did not in fact drown. He had twisted off the ship's rudder and managed to make landfall when barbarians discovered and killed him. Palinurus pleads that Aeneas will find his body and bury it or use his influence with the gods so t hat h is r estless spirit can find peace.

Next, C haron, t he hel msman o f t he r iver Styx, c hallenges A eneas a nd t he sib yl, b ut o n seeing the golden bough, he ferries them across. \overline{A} e three-headed guard dog of Hades, Cerberus, also th reatens them, b ut t he sib yl to sses h im a drugged honey cake, and he falls asleep. As they descend, they pass the souls of infants, the place where M inos pa sses j udgment o n t he n ewly arrived shades. \overline{A} en the pair arrives at the Fields of Mourning, where, among the shades of tragic women, Ae neas re cognizes and speaks to that of Dido. He o nce m ore assures her t hat he le ft against his will, but, unmoved, she m oves off to find the shade of her husband, Sychaeus.

Aeneas passes comrades and enemies from the Trojan W ar, i ncluding Dei phobus, t he Trojan who ma rried H elen o f T roy a fter t he de ath o f Paris. (In Virgil's version, Helen betrays Deiphobus to her first husband, the Greek king of Sparta, Menelaus, who kills the Trojan.) Urged on by the sibyl, Aeneas comes next to the place where those guilty of crimes against the gods are punished. Following d escriptions of s ome of t he s ufferers there, the pair passes on to the Groves of Blessedness. A mid t hose fortunate en ough to sp end eternity t here, A eneas finds h is father A nchises in a pleasant green valley. As he earlier had done with his wife's ghost, A eneas fruitlessly attempts to embrace his father's shade.

Among t he ma tters A nchises e xplains to Aeneas is the fact that reincarnation is possible for t hose who have had a ll t heir g uilt a bsolved over a very long time. Ā en Anchises prophecies what the future holds for Aeneas and his descendants. Aeneas will marry Lavinia. Ā ey will produce a r ace of k ings who w ill b uild a nd r ule cities-Romulus a mong them-and ev entually Rome will e xtend her b oundaries o ver a ll t he world under Caesar and his successor, Augustus, who w ill r einstitute a g olden a ge o n E arth. Anchises also previews for Aeneas the activities of the Rom ans during what was, for Virgil, its more re cent h istory. A en V irgil ha s A nchises utter t he word s t hat surely su mmarize t he author's own view of Rome's role in the history of the world: "Roman, these will be your arts: / to teach the ways of peace to those you conquer, / to spare defeated peoples, tame the proud." (Aeneid 6:1135-37).

Anchises tells Aeneas of the wars he has still to face and advises him on how to r espond to e ach circumstance. He then conducts Aeneas and the sibyl to t he ga te o f iv ory t hrough w hich f alse dreams enter the world above, and through it the mortals p ass b ack i nto the w orld o f t he l iving. Aeneas i mmediately b oards hi s sh ip a nd s ails north to Caieta—a spot on the coast south near Rome named for Aeneas's nurse, whom he buried there as Book 7 begins.

Book 7

Having c onducted C aieta's funeral, A eneas sails north to the mouth of the Tiber River. As the Trojans a rrive t here, Vi rgil o nce a gain i nvokes a muse, this time Erato the muse of lyric poetry. In Latium, where the Trojan adventurers have now arrived, La tinus ru les. H is o nly o ffspring i s a daughter, Lavinia, whom he had hoped to give in marriage to a p romising successor. When candidates came forward, however, and when Latinus consulted t he o racles, t he p ortents p roved u niformly unfavorable. A woice informed him instead that a stranger was coming as a son-in-law who would r aise t he names of h is descendants above the stars.

Having c ome a shore, t he T rojans u se w heat cakes as platters for a slender meal, and after eating the fruits from them, they eat the cakes. Aeneas's son Ascanius—now m ore us ually ca lled Iulus quips that they have eaten their tables after all.

 \overline{A} e next day, an embassy of 100 Trojans go to pay t heir r espects to K ing L atinus a nd r equest that they be permitted a peaceful set tlement in their chosen new home. Latinus welcomes them, and they r ecount t heir s tory a nd p resent t heir gifts. Latinus begins thinking about a husband for his daughter. He sends the emissaries back with rich gifts a fter tel ling t hem of h is de sire f or a son- n- law.

As t he T rojans settle i n and b egin b uilding houses, J uno obs erves t hem a nd g rows a ngry a t her own apparent weakness. She realizes that she cannot keep Aeneas and Lavinia apart since Jupiter and fate have decreed their union, but the goddess can delay the wedding and still exact a h igh price in human blood. Juno enlists the service of the Furies, and one of them, Allecto, stirs up trouble for Aeneas and Latinus. Latinus's wife, Amata, had favored one of Lavinia's former suitors, Turnus, whom V irgil pictures as the king of Artea and the Rutulian people. A mata does her b est to dissuade La tinus f rom m atching La vinia w ith Aeneas. When that fails, she pretends to be possessed by Bacchic madness and conceals Lavinia in the mountains to forestall the wedding. Her frenzy provokes a k ind o f ma ss h ysteria a mong the matrons of Latium, and they join their queen in her wild passion.

Having provoked t his f uror, A llecto a ssumes the form of an aged priestess and seeks to i ncite Turnus. H e i gnores her u ntil she app ears to h im in her own demonic form; t hen, d riven mad b y her provocation, he c alls h is people to a rms and sets o ut to d rive t he Trojans f rom I taly a nd to support his claim to Lavinia by force of arms.

Still i nciting t he lo cals, A llecto emb roils t he Trojans and the local shepherds in a bloody battle over a pet stag t hat A scanius had w ounded. She then reports to Juno, and Juno dismisses her, saying that she can handle what else needs doing herself. With her incitement, the war spreads through the region, a nd Virgil r ecites a leng thy litany of the names and accomplishments of those who join Turnus's cause against the Trojans. Others, however, flock to the standard of the Trojans.

Book 8

In Book 8, the god of the Tiber River, Tiberinus h imself, a ppears t o A eneas and a dvises him to form an alliance with King Evander of Pallanteum-the Greek city of the earlier prophecy. F ollowing t he i nstructions o f T iberinus, Aeneas sets out with two galleys, going upstream against the Tiber's current, and as they row, they come upon the promised sign, the white sow with her piglets. Arriving by river at Pallanteum, the Trojans i nterrupt a festival, receive a warm welcome, and find allies for their cause. In a lengthy digression, Virgil has King Evander tell the story of t he fire-breathing, cattle-thieving monster, Caucus, w hose de struction b y H ercules (see Her acles) was the occasion for the founding of the current festival. As it winds down, Evander takes Aeneas on a walking tour of the city as he recounts s omething of its h istory, a nd finally everyone retires for the night.

 \overline{A} e r eader, ho wever, finds Ae neas's mot her, Venus, wakeful and busy on his behalf. From her husband, Vulcan, she requests god-forged weapons and armor with which to arm her son and his followers. After a restful night in his wife's arms, Vulcan enters his workshop in the bowels of the Sicilian v olcano, M ount Et na, and g ives o rders for a massive shield for Aeneas. It is the first of a suite of a rmaments that Venus g ives her s on to prepare him for his coming battle. In addition to the shield, she p resents him with a hel met, a

sword, a b rass b reastplate a nd bac k a rmor, greaves to protect his lower legs, and a spear. \overline{A} e shield, ho wever, i s V ulcan's ma jor ac hievement. On it he has pictured the future of Italy and the coming victories of the Romans down to the time of Augustus. Aeneas, of course, does not discern their meaning as he slings the coming history of his descendants upon his shoulder.

Book 9

In the meantime, as Book 9 opens, Juno is pressing Turnus not to hesitate but to attack the Trojan camp. Turnus takes her advice, and from the battlements of their fortress, the Trojan garrison sees the dust cloud raised by the Rutulian troops. \overline{A} e Trojans m ount a defense, and the gods r ally to their a id, t urning th eir beached sh ips i nto s ea goddesses before the Rutulians' eyes. Turnus claims this as a good omen for them.

 $\bar{\mathrm{A}}\,$ e Trojans, for their part, send messengers to summon A eneas. A ese m essengers, a fter first slaughtering several of the enemy in their sleep and commandeering t heir a rms, g o off in s earch o f their commander. A squadron of Turnus's cavalry spots them, and one of them misses his way. His companion, however, gets away but then, missing his friend, turns back in time to see him captured. He attempts a rescue, and both are killed. When the Rutulians march against the Trojan camp the next mor ning, t he he ads of t he t wo em issaries adorn their pikestaffs. As Virgil describes the battle, he calls again upon Calliope, the muse of epic poetry, a nd all her si sters to i nspire h im to si ng nobly of carnage and mayhem. Ascanius makes his first kill, and Apollo himself congratulates the lad but warns him to make no further war.

 \overline{A} en V irgil f ollows T urnus's s uccesses a s h e cuts his way through the melee. Mars, the god of war, joins the fray, giving heart to Turnus and his allies. \overline{A} e ga tes to t he f ortress o pen b riefly to admit Trojans caught outside. Turnus enters with them. He and the giant Trojan Pandarus duel, and Turnusi sv ictorious. He t hen hacks h is w ay through m any Trojan e nemies. A t l ast t he c aptains of the garrison rally their Trojan troops, and, little by little, Turnus is beaten back toward the river Tiber. Finally, almost overwhelmed, Turnus leaps into the Tiber, which bears him back to his comrades.

Book 10

As Book 10 opens, the scene shifts to Jupiter's palace on Mount Oly mpus, where a council of the gods is taking place. A e father of the gods wants to k now why t his war is o ccurring a gainst h is will. Venus ple ads the case for the Trojans and asks t hat at le ast he r g randson, A scanius, be spared. Juno, for her part, thinks that the Trojans are unjustly enjoying the protection of Venus and Jupiter and complains that she is within her rights to su pport the en emies of t he T rojans. J upiter, annoyed that the Trojans and the Latins cannot settle their d ifferences p eaceably, w ithdraws h is special protection and says that the warring parties can fight out their differences and "the Fates will find their way."

In the meantime, Aeneas has traveled to Tuscany and a lso made an alliance with the Tuscans. Together, Trojan and Tuscan ships sail toward the Trojan e ncampment. V irgil n ames their leaders and describes their 30 ships. Aeneas's fleet encounters the s eag oddesses i nto w hom h is b eached ships were transformed, and one of the goddesses, Cymodoce, spea ks t o h im and g ives h im a f ull report, warning h im to p repare to fight Turnus's forces at dawn and defeat the Rutulians.

Both Trojans and Rutulians see Aeneas's fleet arrive, and Turnus leads his forces against them, hoping to slaughter Aeneas's forces as they disembark. Virgil follows the bloody progress of Aeneas through Turnus's troops. Next the poet turns his attention to the victories of Aeneas's Pallantean allies under the command of their general, Pallas. Eventually Pallas and Turnus face off with spears, and Turnus kills his enemy. Ā e report of Pallas's death reaches Aeneas, who, leaving a trail of devastation and carnage, goes seeking Turnus across the battlefield.

Jupiter and Juno now discuss Turnus's fate, and Juno pleads for her champion's life. Jupiter grants her ple a, b ut with c onditions. Not s atisfied with the outcome, the goddess once again takes matters into her own hands, fashioning a phantom in the shape of Aeneas. \overline{A} e phantom encounters Turnus and flees before him, and Turnus follows on. \overline{A} e phantom boards a ship, and Turnus follows. Once he is aboard, Juno cuts the anchor cable, and the wind blows the ship with its unwilling passenger out t o s ea. Turnus prays that Jupiter will return him to the battle, but Juno prevails, and the ship bears the frustrated warrior to safety.

Ashore, t he battle r ages o n, a nd Vi rgil o nce again follows the fortunes of the principal remaining heroes, and he en ds t he book with A eneas's twin victories over t he g iant L atin, L ausus, a nd Lausus's f ather, Mezentius—the l ast s ignificant threats to the Trojans.

Book 11

As Book 11 o pens, A eneas a nnounces h is i ntention to a ttack the citadel of Turnus, b ut first h e must bury his dead and send the body of the heroic Pallas back to h is father, King Evander. Along with the body, A eneas s ends a n e scort of 1,000 men and such of Pallas's arms as Turnus had not taken after killing Pallas. When Latin emissaries come to Aeneas seeking permission to collect their dead from the battlefield, A eneas g ives that permission and o ffers to ma ke peace—except w ith Turnush imself. \tilde{A} e em issaries v iew t he offer favorably, and they promise to carry it home.

Virgil shifts his scene to t he arrival of Pallas's funeral cortege at home and touchingly evokes the grief of his father, Evander. Next he describes the funeral pyres on which all the combatants burn their dead. In the meantime, the emissaries advise making peace, and K ing L atinus, who had be drawn in to enmity with the Trojans a gainst h is will, now offers them a generous realm where they can build their towns and enjoy friendly relations with their neighbors. One of his advisers, Drances, an e nemy of T urnus, r eminds t he k ing of h is earlier i ntention t obet roth h is d aughter L avinia to A eneus. D rances calls on Turnus to r enounce his intention to ma rry the girl. Turnus furiously refuses, announcing his willingness to face Aeneas in single combat.

 \overline{A} en news comes that the Trojans and their allies are marching on the city. \overline{A} e Latins again prepare t o d o b attle, an d Turnus w ill lead the defenders. A mong h is a llies a re the V olscians, who are led by a warrior maiden named Camilla. She volunteers to set a cavalry trap for the Trojan forces, but the goddess of the hunt, Diana, finds this distressing. Camilla is a votary of the goddess a nd de ar to h er. \overline{A} e goddess k nows that Camilla will fall in this fight, and she commands that an yone w ho w ounds Ca milla m ust s uffer Diana's vengeance.

Virgil follows Camilla's progress through the fight, describing the many who are felled by her weapons. At last, however, she falls victim to a sneak a ttack from the Trojan A rruns and dies. True to her word, the goddess Diana avenges her favorite by killing Arruns with an arrow. Now, as Book 11 closes, Turnus and A eneas catch sight of each other just at sundown, and the confrontation Virgil has been seeking must wait another day.

Book 12

Book 12, opens with Turnus's raging. He is a nxious to confront Aeneas and settle the matter of his marriage to Lavinia once and for all. King Latinus attempts, n ot for the first time, to d issuade Turnus. \overline{A} e king patiently explains that fate has a lready determined the outcome of the entire matter, that it is fruitless to offer further resistance to the Trojans, and L atinus b lames himself for letting Turnus and the queen dissuade him from a course of action upon which he had already embarked. Turnus, however, will not turn aside from his own fatal course and insists on a duel. Even Queen Amata tries to stop him, but to no av ail. Turnus sends his challenge to A eneas: Let the issue be decided by single combat.

Now, however, Juno intervenes once more. She counsels a m inor d eity, the I talian g oddess of fountains, Juturna—who is also Turnus's sister to save her brother. Ā is Juturna does by making a sig n app ear i n t he s kies. A L atin s oothsayer,

Tolumnius, i nterprets t he sign to me an that the Latins will defeat the Trojans, and he summons the Latins to battle, upsetting the preparations for the single combat. Virgil takes an authorial gamble i n onc e more deferring t he c limax of t he action. As the battle begins to r age, Aeneas tries to calm his Trojans by saying that the right of battle i s n ow h is a nd h is a lone. A t t hat m oment, however, an arrow pierces the Trojan commander. Aeneas quits the field to tend h is wound, and the b attle o nce more r ises to fe ver pit ch a mid scenes of mayhem and carnage. Turnus deals out death across the plain.

Distressed b y h er so n's w ound, V enus he als Aeneas magically. Totally restored to full strength, Aeneas a rms for battle a nd, seeking out Turnus, sends one Latin hero after another to the world of shadows. J uturna t ries to p rotect her b rother b y becoming h is cha rioteer and k eeping hi m a way from Aeneas, and many a Trojan and Latin fall as the heroic enemies, hindered by their divine protectors, try to find one another in the field.

Frustrated by the Latins' failure to observe any of their treaties, Aeneas orders the destruction of Latinus's city. Meanwhile, Turnus hears the panicked cries from the city. He tells his sister, still in the guise of his charioteer, that he has long since recognized her, and he insists that she stop interfering. Now news comes of Queen A mata's su icide. Turnus flees from his sister's protection and goes t o f ulfill h is p romise o f s ingle c ombat. Aeneas, too, finds his way to the field, and with all eyes upon them, in line 945 of the final book of the Aeneid, the adversaries first fling their spears at one another, and then, amid an epic simile that compares t hem t o two c harging b ulls, j oin in hand- to hand combat. Turnus's sword breaks, and A eneas p ursues h im a round t he field five times. A en Juturna supplies Turnus with another sword, and Aeneas recovers the spear that he had thrown at first. A ey turn to face each other in a final contest.

Watching from Olympus, Jupiter asks Juno what other tricks she has in store to p rolong the contest. Juno confesses that she has interfered and promises to stop if Jupiter will promise t hat the L atins c an k eep their own na me and not be called Trojans or Teucrians. Jupiter assents, a nd J uno g ives up he r long-fought rearguard action. Jupiter sends a Fury to call off the protection that Juturna has been offering her brother. Grieved, Juturna plunges into a river. Ā e final confrontation takes place, Aeneas vanquishes his foe, and just as he is about to let Turnus live, he sees that Turnus is wearing a belt that he had taken as a battle trophy from Aeneas's ally, Pallas. Infuriated, A eneas p lunges h is s word i nto Turnus's chest, and as much of the *Aeneid* as Virgil was able to finish before his death ends in line 1271.

When Virgil saw that the end of his own life was approaching, he gave orders for the destruction of h is never-finished e pic. H appily for t he subsequent history of Western letters, his instructions, perhaps on the Emperor Augustus's instruction, were i gnored, a nd h is poe tic ma sterpiece, the national epic of ancient Rome, lives to a ttest to his talent.

New translations of Virgil's Aeneid and critical commentary on it continue to appear as the bibliography below suggests.

Æschines (ca. 385–322 B.C.E.) *Greek prose* writer

One of three sons born to a s choolmaster and a priestess, \mathcal{E} schines early became, successively, a soldier, an actor in tragedies, and a clerk. He had distinguished himself for valor in military campaigns, a nd t hough h is f amily's c ircumstances were hu mble, t hey h ad c ome from g ood stock. His brothers had made na mes for themselves in diplomatic service, and later \mathcal{E} schines' fortunes also i mproved w hen h e too b ecame a d iplomat and subsequently an orator and politician.

 \overline{A} e central question for Athenian diplomacy during Æschines' time was whether to appease or oppose P hilip of Macedon's expansionist a mbitions. Æschines belonged to the party advocating appeasement, and this conviction p ut h im on a collision course with a much greater statesman and orator, Demost henes, who supported opposing M acedonian e xpansionist a mbitions. \overline{A} e ensuing d isagreement b etween t he t wo oratorstatesmen r ipened i nto a full- blown personal hatred.

Demosthenes accused \pounds schines of being Philip's paid agent. A lthough this seems not to have been the case, in the end \pounds schines became discredited and embittered, left Athens, and ended his life in exile.

 \overline{A} ree of \overline{A} schines' speeches have come down to u s: "Against Timarchus" (345 b.c.e.), "On the Embassy" (343 b.c.e.), a nd "Against C tesiphon" (330 b.c.e.). \overline{A} e first of these speeches was given in connection with a suit that \overline{A} schines had brought against D emosthenes' a lly T imarchus on t he grounds of leading an immoral life. \overline{A} e object of the suit was to de flect a nother that Demosthenes had b rought a gainst \overline{A} schines, ac cusing h im o f working for Philip. \overline{A} schines won his suit against Timarchus, thus denying Demosthenes a powerful ally in his campaign against \overline{A} schines.

"On the Embassy" is Æschines' defense against Demosthenes' further a ccusation that Æ schines

was guilty of treason when both he and Æschines had b een m embers o fan emba ssy to P hilip. Although Demosthenes failed to prove that contention and Æschines won the case, the proceedings n onetheless le ft Æschines a n object o f pop ular mistrust among the Athenians.

Æschines' last surviving speech, "Against Ctesiphon," had i ts genesis i n t he p rofound ha tred that the less-able Æschines felt for the more gifted De mosthenes. C tesiphon had p roposed t hat the Athenians honor Demosthenes with a golden crown in recognition of his long and meritorious ser vice to the city. Æ schines b rought a l awsuit alleging the illegality of Ctesiphon's mot ion. A s the case was n ot he ard for si x y ears, it had t he practical effect of blocking Demosthenes' honor. When the case did finally reach the docket, however, the court dismissed its technical correctness and found for Demosthenes on grounds of popular sympathy.

Disappointed a nd ex asperated, Æsc hines left Athens and died in exile. In the judgment of history, de spite g enuine a bilities a nd a n ac curate view o f long- range Greek a ffairs, Æ schines allowed his vanity and his ad miration for Philip and his son Alexander to cloud his judgment and render him ineffectual.

Aeschylus (525–455 B.C.E.) *Greek dramatist* Born to a distinguished Athenian family in an era before Athens ach ieved preeminence in the Grecian world, A eschylus, who flourished du ring the rise of A thens, performed notable military service at the battles of Salamis (480 b.c. e.) and Marathon (490 b.c. e.). What little we know

22 Aesop and the fable genre

of h is l ife is contained in a short biographical preface t o a manuscript of one of h is pl ays. Beyond the information included there, a small body of u nconfirmed tr adition also surrounds his personal history. He is thought, perhaps on the basis of the focus on religion and philosophy that one finds in his works, to have been a member of t he P ythagorean brotherhood—a g roup interested i n s cience, p hilosophy, a nd r eligion. He m ay h ave b een initiated in to the secrets of the Eleusinian mysteries in connection with the worship of the god Dionysus, and may also have been charged with i mpiety for having r evealed something ab out the na ture of t hose secrets to noninitiates.

In considering Aeschylus's dramatic career, we are on s urer g round. Dramatic per for mance in Athens was part of the civic worship of Dionysus and took place during the two festivals of the god celebrated in that city each year. For a d ramatist, having one's plays performed was the result of a n entry's surviving a competition. Each entry included three tragedies and a s atyr play. \overline{A} e plays selected further c ompeted a gainst one a nother i n p erformance at the festivals. Aeschylus began entering the contests in 499 b.c.e. His first victory in the contest c ame in 484 b.c.e., and h is last in 458 b.c.e. with th e th ree p lays c omprising h is *Orestei a*: *Agamemnon*, \overline{A} e *Choephori*, and \overline{A} e *Eumenides*. His entries won first place 13 times.

In a ll, A eschylus i s k nown to ha ve w ritten some 90 plays. Of these, only seven survive: the three n amed a bove and \overline{A} e Suppliants (also called \overline{A} e Suppliant Women, ca. 492 b.c.e.), \overline{A} e Persians (472 b.c.e.), \overline{A} e Sev en against Thebes (467 b.c.e.), a nd Prometheus Bo und (ca. 4 78 b.c.e.). \overline{A} ese surviving examples reveal the playwright's overwhelming interest in religious matters, which provide the focus of all his surviving work as he e xamines theological issues through the lens th at human b ehavior provides. E ugene O'Neill, J r., c onsiders t hat A eschylus's Oresteia presents "one of the greatest and m ost p urified conceptions of godhead . . . [of] Western European civilization."

As a dramatist, Aeschylus enjoys a reputation as a n inn ovator: He emphasizes the dramatic scenes a nd d ownplays t he importance of t he ch or us i n Gr eek t heat er. Ar istot le credits Aeschylus with introducing a second actor to the stage, and Aeschylus also emulated So phocles' introduction of a third, thereby heightening the verisimilitude of t he a ction an d l essening t he declamatory and choral aspects of Greek theater. All Greek dramatic performance was also poetic, and Aeschylus's mastery of the inherent musical qualities of his language and of apt imagery contributed significantly to his outstanding mastery of h is c raft and t o h is c ontinuing r eputation among lovers of theater. Together with the plays of Sophocles and Euri pides, the dramas of Aeschylus provide the only surviving examples of ancient Greek tragedy.

Aesop and the fable genre (fl. sixth

century B.C.E.) *Greek prose writer* Whether or not Ae sop w as a r eal p erson is a matter of debate. A large number of fables have clustered around his name nonetheless. A mong the ancients, some said he was a Phrygian slave, eventually set free because of his talent. Others thought him to have been a retainer and friend of Croesus, the king of Lydia. Ā e best probability is that once either a fact or a tradition associating him with the composition of animal fables emerged, s ubsequent fables—likely co llected from many sources—became associated with his name. W e k now t hat s ome of t he f ables were recounted earlier by other writers. Hes iod tells the f able of " \overline{A} e Ha wk a nd t he N ightengale." Aeschyl us recounts " \overline{A} e Eagle Wounded by an Arrow F letched w ith Its O wn F eathers" a nd mentions that it was already an old story. A portion of " \overline{A} e F ox A venging h is W rongs on t he Eagle" also appears in a fragment from the Greek poet Ar chi l ocu s.

 \overline{A} e Ro man p oet P hædrus, w riting i n t he first century c.e., retold some of the stories in a pop ular Latin edition of five books. So, at about the same time, did Babrius, telling 123 fables in Greek verse, using the scazon meter (see quantit ati ve verse). Since then, the stories associated with Ae sop have be en retold many times, and they remain available i n m any at tractive translations. \overline{A} e corpus of stories has continued to grow over the centuries.

William Caxton produced the first version of Aesop's stories in English in the late 15th century, and the Frenchman Jean de L a Fontaine's 17thcentury versions remain justly famous. An interesting recent translation of some of the tales has been taken from the New York Public Library's manuscript c atalogued a s "N YPL Sp enser 5 0." Å is is a manuscript version of Ae sop that once belonged to the Medici family of Florence.

"A e true fable," said George Fyler Townsend, the 19th-century translator (from the Greek) of almost 300 fables associated with Aesop's name, "aims at . . . the representation of human motive, and th e i mprovement o f h uman c onduct." I t seeks to a ccomplish these goals without giving unwelcome advice and by making the reader or hearer recognize virtue or vice in the behavior of animals with which partic uhr characteristics have become identified. Do nkeys, for e xample, are patient, foxes tricky and clever, rabbits timid, wolves c ruel, a nd b ulls s trong. A lthough b rief, fables a re c arefully c onstructed to ma ket heir moral p oint c learly, pa latably, a nd s ympathetically. A fable aims to teach morality by showing the consequences of particular patterns of behavior, to t each t he he arer to ad mire v irtue a nd

despise vice, and to r ecognize the symptoms of each in the reader's or hearer's own behavior.

Among t he s tories a ttributed to A esop a nd retold by many are fables familiar to most school children: " \overline{A} e Tortoise and the Hare," " \overline{A} e Lion and the Mouse," " \overline{A} e Wolf in Sheep's Clothing," " \overline{A} e Goose that Laid the Golden Eggs," " \overline{A} e Fox and the Grapes," " \overline{A} e Ant and the Grasshopper," " \overline{A} e Dog and the Wolf," " \overline{A} e Donkey in a Lion's Skin," " \overline{A} e Boy and the Wolf," and " \overline{A} e Country Mouse and the City Mouse." \overline{A} ree of these tales are described below.

"The Country Mouse and the City Mouse"

On a visit to his country friend, a city mouse finds life in the country too tame and not luxurious enough. On a r eturn visit to h is friend in town, the country mouse finds h imself faced with all sorts of tasty dishes to choose from. Just a she starts to snack, however, someone opens the cupboard d oor, forcing the mice to flee. A fter the same thing h appens again, the country mouse, still hungry, de cides to re turn to h is simple but safe life in the country.

"The Goose [sometimes Hen] that Laid the Golden Eggs"

A couple owns a fowl that lays a golden egg each day. Hoping to get rich quick, they kill the bird to get at the source. No gold, however, is found inside. \overline{A} ey have d estroyed the source of their good fortune.

"The Tortoise and the Hare"

A male hare makes fun of a female tortoise's short legs and slow progress. \overline{A} e tortoise a ssures the hare t hat she c an w in a r ace b etween t he t wo. Certain of victory, the hare take a nap w hile the tortoise ke eps m oving. \overline{A} e ha re o versleeps a nd finds that the tortoise has won the race by sticking to the goal.

Agamemnon Aeschylus (458 B.C.E.)

Agamemnon i s the first p lay in a tri logy, t he Or estei a, which won the first prize for trage dy at the Athenian City Festival of the god Dionysus in the year of the play's composition. Together with \overline{A} e Choephori and \overline{A} e Eumenides—the other plays of the trilogy—this work is regarded as A eschyl us's m asterpiece. I n t his se ries o f tragedies, A eschylus traces the u nfolding of a curse on the house of Atreus.

 \overline{A} e curse originated when, a fter winning his bride, H ippodamia, i n a c rooked c hariot r ace, Atreus's f ather, Pelops, w ithheld the r eward he had p romised h is ac complice, M yrtilus, a nd threw Myrtilus into the sea instead. \overline{A} is resulted in divine curse on the house of Pelops that manifested it self in the enmity that a rose between Pelops's two sons, Atreus and \overline{A} yestes.

As a r esult of t heir m utual ha tred, \overline{A} yestes seduced Atreus's wife, Aethra. In revenge, Atreus killed \overline{A} yestes' children and served their cooked flesh to their father at dinner. Horrified, \overline{A} yestes cursed A treus and his d escendants. \overline{A} e o peration of this curse across the subsequent generations provided grist for many a Greek playwright's mill.

After s educing h is sister-in-law, \overline{A} yestes involved him self in an incestuous entanglement with h is d aughter, P elopia. F rom th is union sprang Aegisthus, whom we meet as the lover of Clytemnestra i n *Agamemnon*. Later A egisthus and \overline{A} yestes conspired to slay Atreus.

Atreus left three children: Agamemnon, king of Mycenae; Menelaus, king of Sparta; and Anaxibia, the wife of Strophius, king of Phocis. Menelaus ma rried H elen, and A gamemnon ma rried her sister Clytemnestra. When Helen ran off with Paris, a prince of Troy, Menelaus gathered a force representing all the realms of Greece to get her back. Agamemnon was the supreme commander of the force.

 \overline{A} e Greek fleet gathered at Aulis, where they found themselves trapped by on-shore winds. A soothsayer ex plained t hat u nless Ag amemnon sacrificed h is o wn c hild, I phigenia, to app ease the gods, the invasion force would permanently languish.

Torn b etween civic d uty a nd f amilial a ffection, A gamemnon e ventually y ielded to p ublic pressure a nd s acrificed h is d aughter. \overline{A} e c urse on t he house of A treus, w hich had r eactivated with Helen's infidelity, was being fulfilled again. \overline{A} e s acrifice p roved e fficacious, however, and the Greek fleet sailed.

Outraged at her daughter's death at Agamemnon's hands, Clytemnestra quickly allowed herself to be seduced by Aegisthus, and she and her paramour held s way i n M ycenae during the 10 years of the Trojan c ampaign. It is i n the 10th year that the p lay, *Agamemnon*, o pens w ith a watchman's soliloquy.

Wearily w atching the n ight a way, the w atchman sudden ly s ees a sig nal fire flare in t he distance—a fire that means the Greek forces have overcome T roy a nd t hat the fleet w ill soo n be arriving home. \overline{A} e w atchman r ushes t o inform the queen.

 \overline{A} e ch or us r ehearses the events leading up to the Trojan War and then reflects upon the weakness of old age. \overline{A} at done, sections of the chorus undertake the dance-lke movements of s trophe and antistrophe as its members describe the auguries that accompanied the Greek fleet's departure for T roy. \overline{A} ey r ecount the c ircumstances s urrounding Agamemnon's sacrifice of Iphigenia and the flight (or kidnapping) of Helen. \overline{A} e members of the chorus also regret that their advanced age and weakness had disqualified them from participating as soldiers in the campaign.

 \overline{A} e chorus, representing the weight of public opinion, knows the resentment that Clytemnestra nourishes a gainst h er h usband f or s acrificing their c hild. \overline{A} ey a lso k now a bout t he queen's relationship with Aegisthus. \overline{A} ey then break up into s maller choral u nits to present a v ariety of viewpoints. \overline{A} ey consider Agamemnon's role i n the affair. \overline{A} ey look at the situation from Iphigenia's p erspective. \overline{A} ey p ass j udgment a s c ommentators, and they review once more the events leading up to the fleet's departure for Troy.

Clytemnestra a ppears, and the le ader of t he chorus ad dresses h er. She r eports T roy's o verthrow. When the chorus asks when this happened, she a mazes them by saying that Troy had fallen that very night. To satisfy their i ncredulity, she details the complex system of mountaintop signal fires that carried home news of the Greek victory so speedily.

For the chorus's benefit (and that of the audience) Clytemnestra i magines the circumstances within Troy's walls, both from the point of view of the defeated Trojans and from that of the victorious Greeks. Presciently, however, she hopes that the Greek s oldiers will "reverence well" Troy's gods. In the event, of course, they did not. Instead, they provoked the Trojan deities (who were also those of the Greeks). In retaliation, the gods sent a ferocious storm that sank many Greek ships and scattered the fleet all over the Mediterranean.

In the next scene, the fleet arrives at Mycenae. A herald comes to announce the army's imminent disembarkation and officially announce the victory. Clytemnestra masks her real feelings before the herald, p roclaiming her self to b e a f aithful spouse and overjoyed at her husband's safe return. \bar{A} e chorus, of course, knows that she is lying.

 \overline{A} e herald next reports on the ferocious storm that scattered the Greek fleet and destroyed many ships. H e n otes t he d isappearance o f M enelaus and h is ship on the return voyage. H is fate is a s yet u nknown. \overline{A} e c horus o nce m ore c onsiders the role of Helen as the agent of an adverse fate in implementing t he c urse a fflicting the house of Atreus.

Agamemnon enters, followed by his war prize and c oncubine, th e c aptive T rojan p riestess o f Athena a nd pr incess, C assandra. He g ives a n arrival speech in which he singles out O dysseus as his most loyal supporter in the field. A en he promises due recompense both to his men and to the gods and heads for home. Clytemnestra meets him on the way and fabricates the history of a lonely, long auffering, faithful soldier's wife, pining away in sometimes near-suicidal depression and solitude for a decade while her husband was at war. She explains that, fearing the possibility of civil insurrection, she has sent their son Orestes to h is u ncle St rophius, t he k ing of P hocis. St ill pretending, Clytemnestra declares her lo ve a nd invites Agamemnon to step down from his chariot a nd w alk up on a purple tapestry that the queen's women have prepared for the occasion. At first Agamemnon refuses, explaining that the gesture savors too much of an Eastern potentate rather than a Greek soldier. Clytemnestra, however, implores h is indulgence, and to h umor h is wife, A gamemnon s teps down f rom t he c hariot and, followed by his spouse, walks on the carpet into the palace.

The chorus sings a song of foreboding. Then Clytemnestra reappears and invites Cassandra into the palace. Possessed of the gift of second sight, however, Cassandra foresees danger and, distracted in a prophetic f it, h ints d arkly a t Clytemnestra's plot. As the chorus continues to comment, Cassandra chants to A pollo and then describes her v ision of Clytemnestra and A egisthus's u pcoming m urder of A gamemnon, w ho will be stabbed in his welcoming bath in the next phase of the curse on the house of Atreus.

Still i nteracting w ith t he c horus, C assandra beholds the specters of the slaughtered children of \overline{A} yestes s erving a s s pectators to t he e vents. She next grieves at her own approaching death at the hands of Clytemnestra. She n onetheless stoically enters the palace, and the voice of Agamemnon is heard f rom w ithin de scribing h is m urderers' attack upon him.

Ā e c horus he sitates i n c onfusion. A s t hey continue t o tem porize, the p alace doors s wing open, and a blood-smeared Clytemnestra emerges. A e corpses of Agamemnon and Cassandra lie side by si de within. Clytemnestra de scribes the details of her deed. A e chorus expresses shock at her callousness, but Clytemnestra defends her act as j ustifiable v engeance f or t he de ath o f her daughter at Aga memnon's hands. Clytemnestra and th e c horus enga ge i n a p rolonged deba te about whether or not her crime was justified. She identifies h erself a s the h elpless i nstrument of fate, fulfilling the curse on the house of Atreushelpless, and thus innocent. She predicts that the shades of Agamemnon and of his daughter Iphigenia will e mbrace by t he hel lish waters of t he underworld's river Acheron. Clytemnestra prays that with her deed, the curse on the house of Atreus will end. Her prayer, however, is doomed to fail.

Aegisthus a ppears and r ecounts a gain t he curse on the house of Atreus and its origins. \overline{A} e chorus disapproves of Aegisthus's role in the proceedings. He warns its members to accept him as the city's ruler or t hey will suffer p unishment. \overline{A} e chorus and the new king exchange i nsults and come to the brink of civil war before Clytemnestra intervenes. \overline{A} ey calm down, but the mutual snarling continues as the chorus expresses the hope that Orestes will soon appear and set matters right.

Aeschylus's play explores the inexorable operation of f ate and th e role s h uman b eings pl ay, willy-nilly, i n a chieving f ate's o utcomes. Agathias of Myrina (fl. sixth century C.E.) *Greek historian and poet*

A Christian jurist or lawyer who wrote in Greek at Constantinople late in the Helle nisti c Age, Agathias also was an author and editor. Perhaps his best- remembered work is a continuation of a his tory written by Procopius. In A gathias's continuation, h e u sefully de scribes o therwise unknown Sassanid Persian customs and institutions d uring the r eign of the Roman E mperor Justinian, which was the overarching subject of his work.

As a poet, Agathias achieved a considerable contemporary reputation as the author of e pigr a ms. He edited a collection of epigrams by others, and he also p enned a collection of historical biographies that enjoyed a considerable reputation.

Ajax Sophocles (ca. 440 B.C.E.)

Likely the earliest of Sophocl es' extant dramas, the tragedy of *Ajax* rests on a story drawn from uncertain e arly e pics ources. In \overline{A} e *Ili ad* of Homer, Ajax figures as a warrior second in prowess o nly to A chilles. \overline{A} e s ources f rom w hich Sophocles d raws the r aw ma terial f or h is pl ay, however, a ddress e vents that o ccurred b etween the times covered in \overline{A} e *Iliad* and those covered in Homer's \overline{A} e *Odysse y*.

Following the death of Achilles, Ajax competed for the hero's weapons and a rmor. \overline{A} e competition ended in a draw between Ajax and Odysseus, and the Greek generals chose to a ward O dysseus the prize. Feeling slighted, dishonored, and furious, Aj ax blames Agamemnon and Menelaus for his loss, and he i ntends to m urder them during the n ight. \overline{A} e g oddess A thena, ho wever, is d ispleased with Ajax; she finds him overly prideful, and s he objects to t he v iolence of h is i ntended vengeance. She therefore addles his wits so that in his madness he mistakes the animals on which the Greek forces r ely for fo od a s t he s oldiers t hemselves. Ajax attacks the beasts, killing some and taking others to his tent where, thinking they are his enemies, he tortures them.

As Sophocles' drama opens, Odysseus is cautiously combing the area near Ajax's encampment when he hears the voice of the goddess Athena invisible to O dysseus but n ot to t he audience who asks him what he is doing. He replies that he is tracking Ajax, whom Odysseus suspects of having slaughtered all the herds and flocks captured from th e T rojans. I n th e e nsuing e xchange between the two, we learn that Ajax had intended to murder the generals and their guards, but that the goddess had de ceived h is s enses s o t hat he thought the animals were the men.

Athena leads Odysseus to Ajax's tent and calls for him. In a humorous exchange in which Odysseus appears afraid of Ajax, Odysseus tries to persuade A thena n ot to d isturb t he mad man. \overline{A} e goddess cautions Odysseus against cowardice and promises t hat s he w ill ma ke h im i nvisible to Ajax's eyes.

Still w ildly d istracted, A jax em erges w ith a bloody whip in h is hand. He t hinks t hat he ha s killed both Agamemnon and Menelaus and that he hold s O dysseus pr isoner. A jax pl ans to flog him u nmercifully b efore he k ills h im. A thena objects, but A jax i nsists and w ithdraws to c arry out his plan.

Odysseus r eflects o n h uman weakness, a nd Athena warns him to consider Ajax's example of the consequences of uttering "proud words against the g ods." A thena d isappears, Od ysseus ex its, and the chorus, clad as Ajax's soldiers and subjects, sing of his misery. Ā en Ajax's wife, Tecmessa, whom Ajax had won in battle, enters and, from her own point of view, tells the story of Ajax's mad behavior the previous night. Ā e chorus responds sympathetically. As she finishes her tale, A jax i s heard lamenting offstage. He has returned to his right mind and feels ashamed and almost suicidally d epressed b ecause of hi s f olly a nd lo ss o f honor on the one hand, and, on the other, because his enemies have escaped him. He begins to court death. Tecmessa tries to dissuade him by making him think about what her fate will be if he is no longer alive to protect her. Her family is dead, and Ajax and their child are all she has.

Ajax a sks to see his son, Eurysaces, a nd tells Tecmessat hath is h alf brot her, Teucer—the Greeks' g reatest archer—will p rotect t he y outh. Ajax seems determined to take his own life. He makes T ecmessat ake t he c hild a nd le ave, a nd then he closes the doors. Å e c horus g rieves a t what they think is coming.

Armed with a sword, Ajax reenters, and so does Tecmessa. He announces his intention to seek absolution f rom At hena, bu ry his s word i n t he e arth, and become a pilgrim of sorts for a while. \overline{A} e chorus is much relieved at this speech and is happy that Ajax seems to have put aside his blood feud with the sons of Atreus, Agamemon and Menelaus. (For the curse o n the house of A treus, s ee *Agamemnon*). Ajax exits on his journey.

A messenger enters to announce Teucer's return. We learn that Teucer had instructed the messenger to see t hat A jax d id n ot le ave h is quarters b efore Teucer's arrival. Ā e prophet Calchas had predicted that if Ajax left his tents, Teucer would not again see him among the living. In the same speech, the messenger reports that Ajax had offended the gods by suggesting that he could win battles without their aid, r elying s olely on h is own s trength. A thena plans Ajax's death, though if he can make it through this one day, he stands a chance of survival.

Tecmessal earns of all this and sends everyone off in several directions to seek Ajax and bring him back. \overline{A} e scene shifts, and the audience finds him first. He is alone in prayer and contemplating suicide. A fter b idding d aylight

and earthly joys a final farewell, he falls on his sword and perishes.

Portraying a search party, the chorus takes the stage, looking here and there, but Tecmessa finds her husband's body and covers it with her cloak. \overline{A} e chorus mourns, while she considers what may become of her. Teucer enters, grieves for Ajax, and suddenly remembers the child Eurysaces, who has been left alone in the tents. He sends for him lest an enemy carry him off.

Teucer uncovers his brother's body and grieves over it. A e leader of the chorus finally interrupts the g rieving, adv ising T eucer to c onsider t he funeral. A t th is moment, t he k ing of S parta, Menelaus, son of Atreus, enters with his retinue. He orders Teucer not to bury Ajax, but to le ave him where he lies. Depriving a corpse of a proper burial is a crime against the gods. However much one h ates o ne's en emy, wh en t hat en emy d ies, enmity dies with him. A e spirit of an unburied person is doomed to wander between two worlds and cannot enter the underworld. Menelaus pridefully rehearses the crimes of the living Ajax and declares his intention to punish the dead man for them. He forbids Teucer to bury his brother on pain of de ath. A is theme is a frequent one in Greek d rama; w e s ee i ts o peration a gain, f or example, in Sophocles' Ant igone.

Teucer, h owever, i s u nruffled by Menelaus's order. He points out that Menelaus has no authority over him, nor over Ajax. Teucer will bury the body properly, and if Menelaus imagines he can do something about it, he can try.

 \overline{A} e chorus g rows n ervous a s the tem pers of the Greek c aptains r ise, ac companied b y threat and counterthreat, boast and counter- boast. With a final exchange of insults, Menelaus and his retinue e xit. \overline{A} e chorus p redicts a ba ttle w ill s oon follow.

Tecmessa a nd E urysaces enter and begin performing funeral rites. Teucer commands that the troops stand guard until he has dug his brother's grave. Å e chorus frets about the events to come.

Teucer a nd A gamemnon enter a lmost si multaneously, and Agamemnon berates Teucer with bitter sarcasm that makes the chorus shudder and wish both warriors would show better judgment. Teucer r eproves A gamemnon and reminds him of Ajax's ac complishments i n t he T rojan W ar. Teucer c autions A gamemnon against presuming to attack him.

Odysseus n ow en ters and c alms t he r uffled waters with wise counsel. He explains the sacrilegious folly of dishonoring a brave dead man whom one hated while alive. A fter further discussion of this issue, everyone accepts Odysseus's counsel though Agamemnon does so grudgingly—and the funeral proceeds with full honors.

Alcaeus (Alkaios) (ca. 630–ca.580 B.C.E.) Greek poet

Like his contemporary, the poet Sappho, Alcaeus was born in the city-state of Mytilene on the island of Lesbos in the Aegean Sea. Also like Sappho, A lcaeus c omposed v erses w ritten i n the local Aeolic dialect and intended to be sung and self-accompanied on a lyre. While Sappho's name is more widely re cognized t han that of Alcaeus, more of the latter's poetry has survived. Ā e fragmentary remains of Alcaeus's verse suggest that he did not principally celebrate the passion o f lo ve, a s d id h is m ore f amous f emale contemporary. Instead, in addition to the hymns that he addressed to Apollo, Hermes, Hephaestus, and the demi-gods Castor and Polydeuces, we find fragments of political verse written to oppose the despotic ruler Myrsilus. A is political s tand r esulted i n a p eriod o f e xile f or t he poet. A fter Myrsilus was overthrown, however, Alcaeus's friend Pittakos came to power. Criticizing his erstwhile comrade's exercise of authority resulted in two more periods of exile for the poet, though in the end Pittakos and Alcaeus apparently reconciled.

In addition to his political diatribes, some of the fragments of Alcaeus's verse c elebrate t he joys of wine and drinking. Wine, he su ggests, is an antidote to g rief. A s oldier's delight in weaponry also appears in descriptions contained in a fragment of verse called "Ā e Armory." In it Alcaeus describes "shining h elmets" with "horse-hair plumes." He details polished bronze armor designed to protect the chest and back and also that worn on the lower leg. Ā e armor is "strong to stop arrows and spears." He c atalogues br oad s words a nd s hields i n t he same fragment of verse (Z 34).

A c elebrated de scription of a sh ipwreck i n a storm survives in a pair of fragments preserving parts of t he s ame p oem: " \overline{A} e Sh ip: I a nd I I." Alcaeus invented a three-line stanza—the alcaic stanza. (See quant it at ive ver se.)

Alcaeus a lso pro duced m ythological n arratives drawn from the familiar material surrounding the Trojan War. An especially long (49-line) middle s ection of s uch a na rrative su rvives i n which the poet recounts the violation of the Trojan princess and priestess Cassandra by the Greek warrior Ajax.

 \overline{A} e f act t hat S appho a nd A leaeus were c ontemporaries gave rise to later suggestions that, as well as being fellow poets, they were lovers, or at least f riends. O thers h ave s uggested t hat t hey were professional rivals.

Alcestis Euripides (438 B.C.E.)

A tragicomedy, *Alcestis* was first presented as the fourth in the series of plays Eur ipides entered in the Gr eat D ionysia at Athens in 438. Ordinarily, an entry comprised three tragedies and a satyr play, but here Euripides varies the formula with a potentially tragic story that n onetheless has a happy ending.

An old tale lies behind the action of Alcestis. Ā e ruler of the gods, Zeus, became annoyed with his son, Apollo the sun god, for Apollo's revenge slaving of the Cyclops who had forged Zeus's thunderbolts. As a punishment, Apollo was sentenced to serve as a slave to a mortal. He performed this service in the house of A dmetus, the a dmirable king of Å essaly, who t reated A pollo with g reat kindness. As a reward, Apollo interceded with the Fates to renegotiate the appointed date for Admetus's premature death. Driving a hard bargain, the Fates agreed to an extension, providing someone could be found to d ie early in the king's place. Most of Admetus's friends and kinfolk, including his father and his mother, refused. His wife Alcestis, however, agreed, and the play opens on the day appointed for her death.

Apollo b egins by re counting the action summarized above, and as he ends his speech, Death enters with a drawn sword. \overline{A} e two confer, with Apollo u nsuccessfully trying to p ersuade D eath to delay taking Alcestis. \overline{A} ey exit, and the ch oru s and a servant from the palace take the stage. \overline{A} e s ervant r eports A lcestis's c alm a nd c ourageous behavior as she prays for her c hildren and

her husband and wishes them farewell. \overline{A} e s ervant p redicts that Ad metus would be better off dead than alive, having lost such a spouse. Admetus, the servant reports, is weeping while, stricken with her final illness, Alcestis hovers on the brink of death.

As the chorus prays for her r eprieve, A lcestis enters, su pported b y A dmetus. Sh e i s cha nting and r eporting her p remonitory v isions o f her death. She t hen ma kes a l ast r equest. She a sks Admetus no t to r emarry b ecause a s tepmother might be unkind to her children. Admetus promised to wear mourning for the rest of h is life, to give up partying, and to sleep with a carved image of Alcestis. She places her children's hands in her husband's, bids t hem a ll f arewell, a nd d ies. Admetus gives orders respecting her funeral, and the chorus grieves.

Heracles, i n t his p lay a c omic c haracter, n ow enters. He is en route to fulfilling the eighth of the labors that Eurystheus had imposed on him—taming the carnivorous horses of Diomedes. Although in m ourning, A dmetus w elcomes Heracles a s a guest, n ot a dmitting th at his w ife h as d ied. \overline{A} e chorus reproves the king for entertaining a visitor while in mourning.

Alcestis's body is carried in procession, and her ancient father- in hw, Pheres, arrives. He compliments Admetus on marrying a woman who would die for him. \overline{A} e egocentric Admetus tells Pheres he is unwelcome and that the old man should have made t he s acrifice ra ther than Al cestis. P heres explains t o A dmetus hi s o wn r esponsibility f or himself, a nd t he a rgument b etween t hem e scalates as the chorus tries to calm the two down. \overline{A} e exchange ends with Admetus cursing his father.

Meanwhile, b ack at t he p alace, H eracles is abusing Admetus's hospitality by getting roaring drunk. From a disapproving servant he learns that Alcestis h as d ied. Re alizing t he s train he ha s placed on his host's hospitality, Heracles instantly sobers up and resolves to ambush Death, descend into the underworld, and bring A lcestis back to the land of the living.

Admetus returns home, and he and the chorus grieve. Heracles enters, leading a v eiled woman.

He blames Admetus for not confessing the death of his wife. $\bar{\mathrm{A}}\,$ en he explains that he must continue on his quest but that he wishes to leave the woman for Admetus to take care of. Admetus recognizes a shape like t hat of A lcestis a nd a sks H eracles t o leave the woman with someone else. A fter much hemming a nd ha wing d uring w hich A dmetus fails to recognize h is restored A lcestis, H eracles unveils her, and the miracle is revealed. Heracles has overcome death. Admetus may not, however, hear his wife speak until the third dawn has risen and she has been purified from her consecration to t he g ods of t he u nderworld. P roclaiming h is happiness, Admetus leads Alcestis into the palace, and the chorus chants of the capacity of the gods to bring about the unexpected.

Alkman (Alcman) (fl. seventh century B.C.E.) *Greek Poet*

According to the literary historian Herbert Weir Smyth, the Spartan poet Alkman was the "chief cultivator" and perhaps the creator of "early choral poetry." Born at the Lydian city of Sardia in Asia Minor, Alkman migrated to Sparta—possibly as a prisoner of war who had b een en slaved. His poetic mastery led to his rising to become the official teacher of the state choruses of Sparta.

Six books (each book was a s croll) collecting Alkman's p oems c irculated t hrough the G reek world lon g a fter h is de ath. O rganized b y t ype, these included songs that display special respect for and gallantry toward women. Called *parthe*- *neia*, these songs were sung by choirs of boys or virgins. Next came a book of hymns in honor of the gods the S partans e specially r everenced: Zeus, Hera, A rtemis, and A phrodite. Two other books contained *hyporchemes* (songs a ssociated with r itual d ance a nd add ressed to g ods) a nd *paians* (songs in praise of the gods—especially Apollo). A fifth book contained songs called *erotika* (erotic s ongs), a subg enre of choral s ong that Alkman i nvented. F inally, t he w orks t hat su rvived am ong t he a ncients i ncluded a b ook t hat brought together his *hymeneia* (songs a ssociated with wedding processions).

Alkman w as r egarded a s an un precedented master of t he complexities of Gr eek m etrics. Later Greek grammarians at Alexandria in Egypt viewed h im a s the p remier e xemplar of Gr eek melic p oetry. H is c horal s ongs were s till p erformed at Athens as late as the time of Pericles, and Herbert Weir Smyth presents evidence of his works still being read in the second century of the Common Era. (See Per icl es and Fabius.)

Said to have lived to a ripe old a ge, A lkman was b uried in S parta n ear the tombs of t hose whose lives he had c elebrated in funeral poems. Only fragmentary remains of his works are now extant.

alphabet

Originally developed to represent the consonant sounds of a ncient H ebrew a nd r elated to ngues like P hoenician, M oabite, a nd A ramaic, t he alphabet, which first appeared around 1000 b.c.e., achieved a distinct advantage over other systems of writing such as cuneif or m and hier ogl yphs. Using a finite n umber of s ymbols to r epresent, first, the consonants and initial vowels of a language and later the interior and final vowels a s well, the a lphabet proved m uch more e fficient than systems of writing that represented ideas, as did many hieroglyphs and cuneiform markings; that u sed s ymbols that represented s yllables; or that combined all three systems. Instead of needing thousands of ideograms, as Chinese did and does, for instance, to represent words and phrases, the alphabet can infinitely recombine its relatively few s ymbols to r epresent all the possible sound combinations of a language.

From its place of origin in the vicinity of ancient Israel, the alphabet seems to have been carried by Phoenician t raders a nd others t hroughout t he Mediterranean wor ld, e ventually b ecoming t he accepted system for representing languages as disparate as Greek, Latin, Hungarian, Russian, Arabic, and Kore an. Over time, the forms of letters modified, and additions were introduced to represent sounds that occurred in some languages but had b een a bsent f rom t he to ngues e arlier r epresented. A us, though the a lphabet was i nvented once a nd onc e on ly, t hose w ho l ater ado pted i t made modifications. St. Cyril, for example, changed the form of some letters and introduced some new ones when he brought his Cyrillic alphabet to the speakers of Slavic languages, i ncluding Russian. Sometimes, to o, the for m of letters modified, or the sounds they represented shifted, a s was the case in the development of the runic alphabet to represent the Scandinavian languages of the Germanic heroic age.

Writing seems to have been twice introduced into the ancient Greek language. It appeared first as Lin ear B—a syllabary with 87 characters during the a scendancy of Minoan civilization. When that civilization fell victim to a devastating natural disaster—likely an earthquake with an accompanying series of tsunamis—the syllabary then used by the speakers of Greek disappeared. A true a lphabet app eared in the Greek literary world on the island of Lesbos at a bout the time that th e p oet S appho flourished. Ā e Greeks

32 Ambrose, St.

wrote their script to b e read back and forth "as the ox ploughs" and represented vowels as well as consonants with a lphabetic s ymbols. From t he Greeks, alphabetic writing spread throughout the rest of Western Europe.

 \overline{A} e efficiencies of a lphabetic script have not been lost on scholars and politicians looking for ways t o r epresent t heir l anguages. I n t he 1 5th century c .e., s cholars c ommissioned b y K ing Sejong of Korea adapted from Arabic an alphabet to represent the Korean language, and since the 19th century, Japan has had two systems for representing t he l anguage, t he a ncient o ne i deographic and the modern one alphabetic.

It was his pastoral eloquence rather than his original thinking that provided the insights into scripture that converted St. August ine of Hippo to Christianity.

Ammianus Marcellinus (fl. late fourth century c.E.) *Greek historian*

Born t o a G reek fa mily i n S yria a t An tioch, Ammianus Marcellinus pursued an adventurous military career as a young and middle- æd man both i n E urope a nd i n A sia M inor. Ā at c areer early included a stint as a member of the emperor Costantius II's p ersonal bodyguard. When the soldiering phase of his life ended and after a period of travel, he settled in Rome to work on what was to become the last major work in Latin about the history of the Roman Empire.

Beginning with the reign of the emperor Nerva (ruled 96–98 c .e.), in 31 books (papyrus scrolls) Ammianus followed the fortunes of the empire through the reign of the emperor Valens (ruled 364–78). Collected under the title *Rerum Gestarum*, ([A History] of deeds done), some 18 books of Ammianus's chronicle survive. Ā ese effectively c ontinue e arlier Ro man h istories w ritten b y Tacit us and by Sueto nius.

 \overline{A} ough some consider *Rerum Gestarum* stylistically inferior owing to the fact that Latin was Ammianus's s econd l anguage, and th ough i ts facts a re sometimes contradicted by better data, his digressions a re often a musing, and he i s a n instructive commentator on h istorical e vents. \overline{A} is observation especially applies the closer the historian's narrative comes to h is own time. H is colorful d escriptions of military a ction ar e action-packed a nd g ripping, and he do es n ot spare the rough edge of h to not spare the considers the behavior of Roman citizens, regardless of their rank, to be inappropriate.

Moreover, h e is evenhanded in treating religious m atters. W hile A mmianus w as l ikely a pagan, p osterity r emains u ncertain a bout t he historian's p rivate r eligious b eliefs. W e k now that while on the one hand he admired the pagan emperor Jul ia nus (Julian the Apostate), on the other, A mmianus d eplored t hat r uler's h arsh repression of t he C hristians. A dditionally, t he historian strongly favored religious toleration.

 \overline{A} e portion of Ammianus's work that survives examines cl osely t he emperors u nder wh ose reigns h e s erved ac tively. \overline{A} is pe riod i ncludes the overlapping reigns of Constantius II and his cousin J ulianus, mentioned a bove. \overline{A} ey se rved uneasily together as a major and a le sser Augustus (that is, as co-emperors) and seemed he aded toward civil war when Constantius died, leaving Julianus as uncontested emperor.

In his final major discussion, Ammianus treats in detail the invasion of the Roman Empire from beyond the Danube River by two separate contingents of G oths i n 376 c. e. A mmianus de scribes their eventual victory over the Romans at the Battle of H adrianople i n 378—the b attle i n w hich Valens f ell. D esultory no tes t hereafter pe rhaps suggest Ammianus's intention to continue the history. S ome of t he matters de scribed a re d atable as late as 390, but apparently the historian's energies could no longer sustain the labor necessary to a continuation of his task.

Ammianus's work was admired by and a major source f or t he c elebrated 1 8th-century Br itish historian, Edward Gibbon.

Amphitryon Titus Maccius Plautus (ca. second-third century B.C.E.)

Ā ough by Pl aut us's day the story of Amphitryon, the Ā eban general and foster father of Hercules (see *Heracles*,) had a lready b een lo ng familiar to the theatergoers of Greece and likely those of Rome as well, Plautus's version does not appear to d raw u pon a single theatrical s ource. Instead, in his *Amphitryon*, Plautus creates a new theatrical genre—a t ragicomedy. T ragedy o ften featured gods, and comedy featured slaves. Both figure importantly in *Amphitryon*.

Ā at this double-natured theatrical type had its genesis on a Roman stage is utterly appropriate, for as the play's recent translator, Constance Carrier, reminds us, "the idea of twins" fascinated Roman culture. In *Amphitryon*, do ubling is the o rder of t he d ay. B eyond t he c onceptual framework of the tragicomic action, the principal male characters appear as doubles. Ā e king of the gods, Jupiter, takes the shape of the general Amphitryon, so that the randy god may have his way w ith A mphitryon's already p regnant wife, Alcmena.

 \overline{A} e god Mercury, who speaks a leng thy prologue explaining the concept of tragicomedy to the a udience, do ubles a s A mphitryon's s lave, Sosia, b y ta king on the latter's a ppearance and house holdfunctions.

34 Amphitryon

Following Me rcury's p rologue, ac t 1 b egins with the r eal S osia's r eturn fr om the \overline{A} ebans' victorious battle against the Teleboans. Sosia has been sent by his master to tell Amphitryon's wife, Alcmena, o f th e v ictory a nd t hat she sho uld expect h er h usband's imm ediate return. S osia notices, ho wever, that the n ight sky's constellations have not moved for hours and that night is continuing much longer than usual. \overline{A} e audience soon d iscovers that J upiter has commanded t he stars to stand still while he i ndulges h is passion for Alcmena. To assure their privacy, Jupiter has stationed h is s on, M ercury, a t t he do or o f t he house in the shape of Sosia.

Invisible for the moment, Mercury listens as the real Sosia rehearses h is message for A lcmena. Sosia plans to spice up his report and its consequences w ith so me be lievable li es. Mercury listens to Sosia's rehearsal and then, in the slave's own shape, confronts h im. Mercury has all the advantages of omniscience and thus can pass all the tests that Sosia can imagine to prove that he is not confronting h imself. F inally the real Sosia becomes so rattled that he begins to do ubt h is own identity, and he runs away in fright. Mercury gloats at the prospect of Sosia's report to Amphitryon and the confusion that report will produce.

Mercury t hen e xplains to t he a udience t hat Alcmena is expecting two children. A mphitryon has fathered one of them, a 10-month baby. \overline{A} e other, a seven-month baby, is Jupiter's offspring. Jupiter has arranged matters so that Alcmena will bear both children at one lying-in and forestall any gossip about their mother's behavior.

Jupiter as Amphitryon and Alcmena take the stage. A lcmena pleads with her s upposed h usband not to rush away. Jupiter, however, explains that his place is with his troops and that he must leave. He releases the stars from their suspended state, a nd t he long n ight a nd t he first act en d together.

As t he se cond act o pens, S osia f ruitlessly attempts to explain his twin at home to A mphitryon. He thinks that Sosia is either drunk or mad. As the real master and slave approach Amphitryon's house, A lcmena e nters. She f eels s ad a bout her husband's sudden de parture. When she s ees him approaching, she wonders if he claimed to be leaving to te st her fidelity. She goes to meet him, and when he greets her as if he has been long away, she thinks he mocks her.

Amphitryon swears that he has not seen her for mont hs. A s A lcmena de tails t he w ay t hey spent their time together the day before, Amphitryon becomes convinced of her infidelity. She is able to give him details of his recent battle, however, and when he c hallenges her, she pro duces the golden bowl that Amphitryon had received as a trophy of victory. He u nseals the box that he thinks c ontains the b owl, a nd it has v anished. Finding t he b ox em pty, S osia is c onvinced t hat Amphitryon was in deed at home with his wife the previous day, and that he had left the bowl in her safekeeping.

Amphitryon now feels certain that his wife has betrayed him, and the virtuous Alcmena spiritedly defends her chastity. Amphitryon sends for her kinsman, Naucratis, who spent the previous day with him, to convince her of his absence. Ā e play seems destined for a tragic outcome.

Jupiter in the guise of A mphitryon takes the stage as act 3 o pens. He speaks a brief prologue and d eclares h is i ntention to rescue A lcmena from her husband's accusations. He also tells the audience that he means to arrange an easy delivery when Alcmena bears her half-brother twins.

Alcmena, in the meantime, has decided to leave her je alous h usband, pac ked u p her b elongings, and left the house with her maids. In the guise of Amphitryon, Jupiter tries to soothe her. She resists his blandishments. Jupiter- as Amphitryon claims that he meant everything as a little joke. Alcmena says h is joke h as wounded her he art. W hen her celestial lover calls on himself to curse Amphitryon, ho wever, she r elents, u rging h im to p ray instead to bless Amphitryon, and the two make up their quarrel.

 \overline{A} e real Sosia enters, and Jupiter-Amphitryon calls on the s lave to support the joke excuse. Momentarily confused, Sosia deems it in his best interest to s econd whatever h is a pparent master says. Jupiter s ends S osia to invite A mphitryon's colleague, B lepharo, t o dinner, and J upiter and Alcmena enter the house together.

Mercury as Sosia takes up his station to guard their privacy. \tilde{A} e real A mphitryon app roaches. Mercury- Sosia, feigning drunkenness, climbs on the roof and pretends not to recognize Amphitryon. \tilde{A} e two quarrel.

At t his p oint a 2 72-line h iatus o ccurs i n t he surviving ma nuscript. I n t he m issing s ection, it seems t hat A lcmena a nd J upiter come f rom t he house; t wo appa rent A mphitryons a re t herefore on stage. \overline{A} en Blepharo arrives and cannot decide which of t he t wo is t he real o ne. At s ome p oint Alcmena, on the point of delivery, goes i nside to give birth. \overline{A} e two Amphitryons quarrel over who is Alcmena's husband and who is her s educer. As the t ext r esumes, M ercury d umps a b ucket o f water o n t he real A mphitryon's head. B lepharo, confused a nd ex asperated, tells t he t wo A mphitryons to share the wife, and he exits.

Just as a thoroughly confused and despairing Amphitryon is about to take v iolent action and murder all concerned, a thunderclap causes him to faint on h is do orstep, and h is chambermaid Bromia r ushes o ut. She b ears the n ews that i t thundered in the house at the same instant that an apparently su pernatural v oice tol d A lcmena to have no fear.

Bromia n ow r eports f urther s trange o ccurrences. In the midst of the thunder, voices, and resultant c onfusion, A lcmena p ainlessly bo re her offsping. On e w as a n ormal ba by, b ut the other—as t he aud ience knows, t he d emigod Heracles—was so big that they couldn't swaddle him. Moreover, two great snakes came crawling from the pool in the atrium of the house in the direction of the children's cradle. Heracles leaped from the cradle, grabbed a snake in each hand and squeezed the monsters to death.

Immediately thereafter, Bromia reports, Jupiter admitted to having shared Alcmena's bed and claimed H eracles a s h is own. F inding t hat h is own son is the half-brother of a demigod, Amphitryon considers himself honored rather than illused. A nother c lap o f t hunder sig nals t he appearance of Jupiter on the roof. Jupiter addresses Amphitryon, clears Alcmena of blame, claims Heracles as his own, and promises that the halfgod will bring Amphitryon's house undying fame. Amphitryon assents gladly to the operation of the divine will. He calls on the audience for applause, and the play ends.

Anacreon (fl. ca. 536 B.C.E) *Greek poet* Anacreon was an early G reek ly ric p oet w hose very slender literary remnants (if a ny a re genuine) and long-standing reputation reveal that his specialties included love poetry and tender sentiments on the one hand and derisive satire on the other. In his own time, Anacreon shared the palm with Pindar as the two best lyric poets of the age and one of the best nine poets to have flourished in early Greek literature.

Like Sappho, among others, Anacreon probably wrote a class of erotic poems called Parthenia, or songs in praise of virgins. In addition to love, Anacreon's pleasure in the company of others and praise of wine form the subjects of the softer poe try i ncluded i n t he c orpus o f v erse called Anacreontic. A seemingly irresolvable problem of attribution, however, surrounds the poems associated with Anacreon's name as none of them can be attributed to his hand with certainty. His most expert editor, J. M. Edmonds, using a system of a nalysis to o complex to de tail here, has concluded that the poems numbered 18a, 18b, 21, 22, 26, 37, and 46 are the oldest in a collection of Anacreontic v erse, t he co mposition of w hose individual p ieces s pans at le ast six c enturies. Writers who lived long after Anacreon have been identified a s t he a uthors of s ome of t he l ater poems.

36 Analects

While simply being the ol dest does not a ssure that the above poems came from Anacreon's hand or e ven t hat they are better art than the younger examples, t heir a ge do es m ake t hem m ore l ikely candidates as surviving instances of the poet's own song. "Poem 18a" is a D ionysian poem in which a speaker, crowned with grape leaves, celebrates the beneficent effects of w ine on a passionate lover. "Poem 1 8b," i nstead, c elebrates t he b eauty o f a grove i n a r ural l andscape. "Poem 21," a f amous Greek d rinking s ong, r eturns to t he t heme o f imbibing. \overline{A} e e arth d rinks from the s tream, the tree from the earth; the sea drinks the river; the sun drinks the sea, and the moon the sun. Why, the poet asks his comrades, should they object if he too would be drinking?

"Poem 22" is a pretty compliment to a woman the poet admires. He begins with two examples of metamorphosis. \overline{A} e Titaness Niobe was changed to stone; in Greek versions, the betrayed wife of Tereus, P rocne, t urned a s she do es here i nto a swallow (in Latin versions, she became a nightingale). \overline{A} e p oet, to o, w ishes he c ould u ndergo a transformation. He would like to become a mirror so his love would gaze on him, her vest so she could wear him, a wave to bathe her cheek, a jar of her ha irdressing, her n ecklace, her b ustier to cover her bosom, or even her sandal so she could set her foot on him.

"Poem 26" compares the devastation wrought at the fall of Troy and the sack of \overline{A} ebes to the poet's destruction by arrows of the god of love, Eros, fired at the poet from his beloved's eyes. \overline{A} e last in this series, "Poem 27," a sserts that, just as a horse's brand or a Phrygian's hat make their owners recognizable, so the poet can identify a lover by an infallible, brand-like sign.

Despite t he u ncertainties su rrounding t he authorship of Anacreontic poems, they have exercised co nsiderable i nfluence i n t he subs equent history of Furo- American letters.

Analects Confucius (ca. 380 B.C.E.)

First compiled by Confucius's students as a collection of the master's sayings, Confucius's *Analects* probably d id not b egin to ac quire t heir modern for m until a century or more after the sage's death in 479 b.c.e. \overline{A} e *Analects* is the only document b earing C onfucius's na me t hat he actually had a hand in composing, though he did edit older classics. \overline{A} e notes t hat comprise t he *Analects* were drawn from his teaching. Essentially a collection of Confucian fragments, in its current form the *Analects* contains 20 chapters, which in turn contain 497 sections. If a principle of or **g** ni z ion underlies the current form of the work, however, it was only apparent to whoever or **g** nized it.

Ā e scholar Burton Watson has suggested that the most u seful a pproach to the Analects is to regard them as scripture rather than as history or as philosophy. A en, instead of looking for a unified and systematic approach to governing a society o r o ne's se lf, one c an r egard t he Analects' maxims as a set of precepts that might be invoked to guide one's decisions in day-to-day living. For the long period during which Confucianism was the state religion of China, the Analects did in fact occupy the place of scripture in Chinese society. Ā inkers in East Asia who have memorized the entire work and who have spent years contemplating its meaning suggest that the more one thinks about the Analects, the deeper the meaning becomes.

Central t o a na scent u nderstanding o f t he Analects is a grasp of what Confucius meant by two terms: the way and virtue. \overline{A} e way, suggests Confucius's translator, D. C. Lau, means something like the sum total of truth about human beings and their place in the universe. Understanding the way can be either an individual or a state accomplishment. When a state has a corporate u nderstanding of the w ay, t hat u nderstanding implies a humane and compassionate system o f governance. W hen a n i ndividual understands the w ay, following it p resupposes striving to 1 ead a n e xemplary l ife, p referring what is right to profit, and choosing death over dishonor.

For either an individual or a state to a rrive at such understandings, however, requires a rigorous program of conscious effort directed to that end. One knows when one arrives at *virtue* because one loves one's fellow human beings and treats them as one would treat oneself. At the same time, selfinterest is the most insidious of vices. On e must carefully guard against it. On e must also temper one's b enevolence w ith le arning, o therwise o ne risks b ecoming foolishly b enevolent and s erving the lesser rather than the greater good.

One must be intelligent, and one must be wise. Some a re b orn wise; o thers a cquire w isdom through experience, study, and e ffort. A bove all else, one must be honest with oneself if one wishes to acquire wisdom.

Beyond that, one who is virtuous is also courageous, and one must be reliable in both word and deed—but not to the degree such that hewing to the truth will bring o thers i nto ha rm's way. One might, for example, lie to s ave a child from being kidnapped and turned into a mercenary soldier. Ā e injunction to tel l the truth is thus tempered by the service of a higher good.

Another of the virtues promulgated by the *Analects* is reverence. Reverence can be displayed either to ward one's superiors in the social order or toward the gods. In both instances, one does well to display the attribute and wisely keep one's distance from those—human or divine—to whom reverence is due.

On the subject of the divine, Confucius twice in the *Analects* mentions a concept called *t'ien ming.* Lau gives the meaning of the phrase as "the decree of H eaven." A lthough C onfucius considered that de cree very d ifficult to understand, it does seem that he credited an overarching, rational standard to w hich all virtues were sub ordinate a nd b y w hich o ne m ust s trive to m easure one's t houghts a nd a ctions. L au uses the w ord *destiny* to describe that standard, but he also suggests that it is within human capacity to understand *why* destiny o perates a s it m ust, a nd he opines t hat h uman b eings need not b other t o fathom *ming* if that word o ccurs without the modifying *t'ien*. \overline{A} at would beliketrying to describe the physics of a parallel universe to which our instruments of observation and measurement have no access. To approach Confucius's analogy more closely, explaining *ming* would be like drawing a map of Heaven.

For C onfucius, t o a chieve a n in dividual understanding of *the way* is not enough. Once a person has mastered *the way*—and of course in Confucius's society it was always a male person that person must put his understanding to work for the good of the common people by p articipating in government. It is the participation of the i nitiates i n g overnment t hat pr ovides t he moral e xample by w hich t he common p eople can measure their own progress toward *the way*. Å us, a paternalistic government was the Confucian ideal.

Portions of the *Analects* address the r ightness of old er pr ecepts a nd est ablish t ests by which a student can accept or reject them. Confucius examines the utility of moral generalizations by considering the adequacy of the specific rules by which the generalizations are put into effect. \overline{A} e example can serve here of endangering a child by telling the truth when a lie would protect he r. \overline{A} e u niversality of apply ing t he generalization " always tel l t he t ruth" is o vercome by the situational consequence of putting the rule into effect.

Andocides (Andokides) (ca. 468–ca. 396 B.C.E.) *Greek Prose writer*

 \overline{A} e son of a prominent Athenian family, Andocides became a statesman and an orator. \overline{A} e four surviving examples of his orations are distinguished by their straightforward s tyle and lack of ornament and also by their clarity. He is positioned at a m oment of t ransition b etween e arly o rators who, like h im, were n ot p rofessionals and later ones who were. His speeches are also particularly valuable because of the light they shed on the history of h is e poch. On e of h is orations criticizes the unscrupulous Athenian statesman Alcibiades. \overline{A} e pl aywrights A eschylus, A risto phanes, and Euri pides shared Andocides' low opinion of Alcibiades.

Another surviving oration of Andocides is one that he delivered in 390 in support of concluding a peace with Sparta. Sparta and Athens had been fighting the Corinthian War for four years at the time of this speech.

Ā e other two surviving examples of Andocides' oratory a re s peeches t hat he made in his own defense. During the Peloponnesian War, just before Athenian troops were due to depart on a mission to Sicily, numerous phallic shrines bearing statues of the god Hermes (and thus called hermae) were desecrated. Ā is sa crilege d eeply o ffended t he Athenians, and in the subs equent i nvestigation, members of Andocides' family as well as the orator himself were implicated. A ndocides at first confessed but 1 ater r etracted h is c onfession a nd fled from im prisonment i n At hens. One oft het wo other surviving examples of his rhetoric is a speech he made in an unsuccessful bid to be allowed to return from this self-imposed exile. A e other is also an example of self-defense. When Andocides finally did return to A thens, he was barred from attending the ceremonies connected with the Eleusinian mysteries. When he nonetheless attended, he was charged with impiety, and in the last of his o rations, he defended h imself a gainst t hese charges.

A p ortion of A ndocides' def ense r ested o n revisiting and reinterpreting the events connected with the hermae affair. Another rested on his denying the fac tual basis of a ssertions made i n the accusation against him, and a third r ested on his argument that it was in the best interests of the Athenian state to find him innocent. His interesting speeches are now all available in good En gish translations.

Andria (The Woman of Andros, The Girl from Andros) Terence (166 B.C.E.)

To bring his first play, *Andria*, to the Roman stage, Ter ence combined elements of two plays by the Greek comic playwright M enander. Like other representatives of the Roman comedy, *Andria* was composed in verse, set to music and, in this case, scored for two accompanying flutes. Ā e music's composer, as we learn from a su rviving production notice, was a slave na med Flaccus, and the principal a ctors were Lucius A mbivius T urpio and Lucius Atilius Praenestinus. Ā e Megalensian Games, held at Rome in A pril in honor of the great goddess, Cybele, provided the occasion for the per for mance.

 \overline{A} e play introduces a device that was to become a signature in Terence's drama—the double plot. In this maiden e ffort, ho wever, c ritics generally concur that the doubling lacks the organic unity that Terence would soon achieve in handling it.

After a p rologue t hat a nnounces T erence's sources a nd t he na mes o f Ro man pl aywrights who ha ve p receded h im in min ing two G reek plays to achieve one Roman production, the play opens with a dialogue between the elderly Athenian Simo and his former slave, now a freedman, Sosia.

Simo has a lways been very proud of h is s on, Pamphilus, w ho ha s b ehaved w ell a ll h is l ife. Even a fter Chrysis—a w oman f rom Andros moved next door and eventually became a courtesan, Pa mphilus, w ho s ometimes ac companied her lovers to t he house, a lways behaved respectably as far as his father could a scertain. In due course, t herefore, S imo performed h is f atherly duty and decided to betroth Pamphilus to Philumena, the daughter of a respectable family headed by Chremes. He ne glected, h owever, to mention the matter either to his son or to the bride's family until the day of the wedding.

Before t hat da y a rrived, h owever, C hrysis died, an d a t her f uneral py re a w oman, w ho proved to be her sister Glycerium, almost jumped into the flames. Pamphilus prevented her, and the two c ollapsed i nto ea ch o ther's a rms, r evealing that th ey were l overs an d th at P amphilus h ad already engaged himself to wed her.

It turns out t hat a s lave, Da vus, i s p rivy to Pamphilus's a ffair with G lycerium. S imo s niffs this out and warns Davus not to i nterfere in his efforts to match Pamphilus with Philumena. Davus, however, k nows that Glycerium is a lready a bout to bear Pamphilus's child, so he opts to continue his support for Pamphilus.

In t he m eantime, G lycerium's ma id, M ysis, goes i n s earch of a m idwife wh ile p raying t hat Glycerium w ill ha ve a n easy d elivery. A s she leaves the house, Mysis overhears Pamphilus raging about h is father having just told h im that he must marry Philumena this very day. When Mysis challenges Pamphilus on the subject, however, he firmly a nnounces his resolve to ho nor h is c ommitment to G lycerium, a nd M ysis c ontinues o n her errand in search of a midwife.

 \overline{A} e parallel plot begins its development in the second a ct. \overline{A} ere w e find t hat a nother young gentleman, Charinus, a good friend of Pa mphilus, is in love with Philumena. We find Charinus's slave Byrria reporting to his master Philumena's proposed match with Pamphilus. A e two young men meet, and Charinus begs Pamphilus not to wed Philumena. Pamphilus assures his friend that he has no desire to do so and enlists him as an ally to spoil his father's plans.

Davus a rrives a nd r eports t hat n o w edding preparations are going forward at Chremes' house, so both young men take heart. Davus advises Pamphilus to agree to marry when his father next asks him. He can rest assured that Chremes will never agree to the match.

Simo encounters his son in act 2, scene 5, and announces his intention that his son marry. Pamphilus agrees to obey his father. \tilde{A} e slave Byrria, however, ha s s tationed h imself w here he c an overhear t he c onversation, a nd he t hinks t hat Pamphilus will wed Philumena.

As a ct 3 o pens, G lycerium goes i nto l abor, and, overhearing her cries and prayers, Simo is convinced that he is the victim of a plot hatched by Davus to prevent his marrying Pamphilus off to Philumena. In the following scene, the midwife Lesbia announces that "Pamphilus has... a b ouncing b oy." Si mo ac costs Davus with h is theory that the birth is a fake, and Davus encourages the old man in h is del usion, at the same time instructing him to prepare his house for a wedding feast and to spend some money on the preparations.

In a ct 3, s cene 3, Si mo a nd C hremes finally meet, and Chremes demands an explanation for all the rumors he has been hearing. Simo argues in favor of the marriage. Hesitant at first, Chremes grudgingly a grees. \overline{A} e pa ir en counters Da vus, who learns that all his arrangements have backfired. Scene 4 of the third act ends with Davus's despairing soliloquy on the failure of his plotting. \overline{A} e final scene of the act features Pamphilus and Davus. \overline{A} e former blames Davus for his mismanagement of the affair, and Davus promises to find a solution.

As act 4 opens, Charinus is blaming Pamphilus for ruining his hopes for a union with Philumena. \overline{A} e s lave Da vus c ontinues to s earch h is mind for an unraveling of the imbroglio that he has apparently caused. In the next scene, he has

the servant Mysis lay Pamphilus and Glycerium's child on the doorstep of Simo's house. Chremes, however, a rrives and discovers Mysis in the act. Davus feigns ignorance of the entire affair. Under Chremes' cross- questioning, Mysis a dmits t hat Pamphilus is the child's father. More confusion follows until Davus finally explains to a p uzzled Mysis that his odd behavior and conversation was the o nly way t o i nstruct Ch remes i n w hat t he plotters wanted him to know.

In scene 5 of A ct 4, a n heir of t he de ceased Chrysis, Crito, is introduced as just having arrived from Andros. Crito knows that Glycerium is not really the sister of Chrysis but that she is instead an Athenian citizen. \overline{A} is is significant because it means that, under Athenian law, the father of her child must marry her.

In act 5, the cross-examination of Crito reveals that Glycerium is in fact the long-lost daughter of Chremes himself, taken to Andros by his brother Phania in an attempt to avoid the wars. Pamphilus is a ble to c onvince C hremes t hat G lycerium i s truly h is d aughter b y tel ling h im t hat her b irth name w as Pa sibula. C ertain o f h is f atherhood, Chremes confers upon Pamphilus the dowry of 10 talents that he had reserved for his elder daughter.

In a secondary subplot, Simo has had his slave, Davus, clapped in i rons b ecause of h is i nterference in the matter of Pamphilus's wedding. Pamphilus goes to rescue his staunch supporter.

Free at l ast t o ma rry P hilumena, C harinus wins C hremes' a pproval a nd, w ith the y ounger daughter's hand, a dowry of six Athenian talents.

Andromache Euripides (ca. 425 B.C.E.)

In Andromache, Eu r ipides f ollows t he p ostwar lives o f s everal p ersons i nvolved i n t he T rojan War. \overline{A} et itle c haracter, A ndromache, i s t he widow of the Trojan hero H ector, whom A chilles had killed in single combat. She has been bestowed as a prize of honor upon Achilles' son, Neoptolemus, w hose m istress s he b ecomes. Wi th her, Neoptolemus fathers a son, who, though nameless in the play, is called Molossus elsewhere.

Neoptolemus, ho wever, a lso h as a n official family. H is w ife, H ermione, i s a Spa rtan p rincess, the daughter of Menelaus and Helen. Hermione plot s a gainst A ndromache and h er s on, planning with her father to m urder t hem w hile Neoptolemus is away on a religious pilgrimage to the temple of Ap ollo at D elphi. It is at this point that Euripides begins his play.

Andromache recounts her history, the death of her h usband, the m urder of her s on A styanax, h er o wn subs equent en slavement, t he birth of N eoptolemus's child, an d H ermione's unrelenting abuse. Learning of Hermione's plot to conspire with her father Menelaus to murder Andromache and her child, Andromache hides her son while she finds sanctuary at the altar of the g oddess \bar{A} etis. A ma idservant en ters to repeat the warning about the threat to Andromache's life and to tell her that Menelaus has discovered the son.

A ch or us o f women r ehearses A ndromache's woe, a nd He rmione e nters a nd ber ates A ndromache, ac cusing her o f g ross i mmorality a nd e vil intentions—including that of s upplanting He rmione as Neoptolemus's consort. A fter an exchange of bitter words, Hermione exits. Ā e chorus reviews the action and the history behind it, and Menelaus enters with Andromache's son. He threatens to kill the boy i f A ndromache doesn't le ave her s anctuary: One of them must die.

Andromache r emonstrates w ith M enelaus, suggesting that he consider the consequences if Neoptolemus re turns a nd finds h is s on de ad. Menelaus, however, is unmoved, and, after bewailing her fortune, Andromache leaves the altar and embraces her son. Menelaus captures and binds her, then tells her that it will be up to Hermione if the boy lives or dies. Menelaus takes perverse pride in having tricked Andromache and sets out for the palace with his two prisoners. Ā e chorus passes j udgment on t he b ehavior of Hermione and Menelaus, calling it "Godless, lawless, and graceless."

Now Menelaus reenters with his sword drawn. He is conducting both mother and s on to t heir place of execution. In a touching scene, the child pleads with Menelaus as his "dear friend" to spare his lif e. M enelaus i s merciless. A e e xecution, however, is interrupted by the arrival of the father of Achilles and grandfather of Neoptolemus, the aged Peleus. He and Menelaus engage in a boasting contest about who has more authority in the present circumstances. A ey cast aspersions upon each other's behavior and relations and threaten each other. A e chorus eventually has enough of this fruitless argument and advises them to stop it lest they kill each other. Peleus, however, outblusters M enelaus a nd suc ceeds i n r escuing t he captives.

A nurse now enters with the news that Hermione, distressed at her father's departure and fearful o f N eoptolemus's p ossible re action to he r attempt on t he lives o f h is s on a nd m istress, i s threatening to hang herself. Her s ervants try to dissuade her, and as they do, Orestes, the son of Agamemnon and Clytemnestra, arrives as a traveler. H is a rrival p rovides a p oint of c onnection between the now-finished first story and the second part of the play's double plot.

Orestes says that he has decided to see how his kinswoman, Hermione, is getting along. A e distraught Hermione embraces his knees in the traditional G reek g esture o fs upplication, an d Orestes r ecognizes h er. She t ells h im her s tory and regretfully suggests t hat t he a dvice of b ad women led her to persecute Andromache. Orestes reveals that Hermione had been promised to him as a wife in the first place. Since her situation is so threatening, he promises to take her home to her f ather. A s t hey g o to ma ke p reparations, Orestes reveals that he has already arranged for the death of Neoptolemus at the temple of Delphi. H e m akes this p lan m ore credible by reminding the audience that he has already slain his mother, C lytemnestra, in r evenge f or her murder o f A gamemnon. A e pa ir de parts o n their journey.

Peleus re enters a nd le arns t he whole s tory from th e c horus. A m essenger t hen en ters a nd recounts the story of Neoptolemus's death at the hands of a n a rmed s quadron of m en at Del phi. \overline{A} e messenger and his companions have returned the b ody of Neoptolemus to h is grandfather for burial.

Distraught by all his a fflictions, the old man laments his situation and throws his royal scepter to the ground. At this point, his wife, who is also the goddess A etis, appears above the stage as a dea ex machina (goddess from a machine). Her speech knits up many of the play's loose ends. She tells P eleus to take N eoptolemus's b ody b ack to Delphi and bury it there as a reproach to the Delphians. A ndromache, t he g oddess s ays, m ust migrate to the land of the Molossians to ma rry their ruler, Helenus. A ere, her son by Neoptolemus will found a lo ng a nd happy l ine of r ulers. As f or P eleus himself, A etis i ntends to ma ke him a god and her eternal consort. She gives him detailed i nstructions ab out what he m ust do i n this connection. Finally, she pronounces that all she has ordained is the will of Zeus.

 \bar{A} e chorus ends the play by making Euripides' favorite point: \bar{A} e gods often do things that people have not expected.

annalists and annals of Rome

Almost from Rome's b eginnings as a p olity, its citizens k ept w ritten records of not eworthy events. At first these tended to t ake the form of straightforward accounts of the facts. According to Cice ro in his work *De Oratore*, from the very founding of the city, the chief of the C ollege of Pontifices, or *pontifex maximus*, listed the notable events of each year on lead t ablets that he t hen posted in his house so that citizens could consult them. A list of the serving magistrates was a lso compiled a nnually, a nd le ss i mportant p ublic events were noted on linen and kept in the temple of Juno Moneta.

Ā e kings of early Rome promulgated laws some of them established on the model of Grecian laws imported by an embassy sent to Greece to learn about Greek governance. A lawyer named Papirus made a c ollection of t hese l aws d uring the reign of King Tarquin the Proud (ruled 534– 510 b.c.e.). Family j ournals and funeral orations also were collected, but as these were often edited to ele vate t he r eputations of f amily m embers, their historical accuracy was suspect.

Hardly any examples of such early records survive. When the Gauls sacked Rome in 385 b.c.e., most of the annals were lost in the general conflagration. A new group of a nnalists s oon em erged, however. S ometimes, t hese re corders, i ncluding a pair na med Cn eius Naevius (d. 201 or 204 b.c.e.) and Quintu s Ennius, preserved t heir a nnals i n verse. I n a ddition to such verse annalists, prose annalists also appeared. A mong t hese was Quintu s Fabius Pictor and Marcus Portius Cato, the elder. Cato's largely lost work Origenes, or De Origenes, which examined the early history of Rome, discussed the city's early kings, reported the beginnings of the states of Italy, and detailed the first and second Punic wars against Carthage and the Roman victory over the Lusitanians (today's Portuguese) in 152 b.c.e. Such fragments as do survive from these and other annalists are readily available.

More significant remnants have survived from historians and annalists of the first century before and the first a fter t he C ommon Era. M arcus Ter ent ius V arrow as t he m ost p roductive scholar of t he e poch. O ther s uch Rom ans, a s Quintus Pomponius At ticus, b egan trying t heir hands a t t he p roduction o f u niversal h istories. Still others began to set out the contributions that their own lives made to the events of their times. Principal examples of such autobiographical histories a re t he c ommentaries of J ul ius C a esar and the memoirs of August us Ca esar.

Historians in the modern sense of that term also e merged at about this time. S all ust a nd

Livy stand with Julius Caesar in the first rank of such figures. Following the death of Augustus in 14 c .e., m ajor w riters such a s T acit us, b oth Pli ny th e el der, Pliny the younger, and Sueto nius emerged among a growing cadre of respectable historians. Ā e emperor Claudius became a notable memoirist.

From about 160 c.e., however, after the halcyon d ays of t he e mpire under t he A ntonine emperors-a period of western European history thought by some to have been the happiest ever enjoyed by that fractious subcontinent-the writing of history became politicized to such a degree that an ything potentially unflattering to t he emperor i n p ower o r to h is ad herents e xposed historians to mortal danger. Nonetheless a hardy few, i ncluding t he fourth- entury historian Ammianus Marcellinus undertook the writing of respectable history, i gnoring t he at tendant perils. A mmianus is generally considered to have been the last of the great Roman historians. In the third and fourth centuries, however, a group of six writers serially authored the official h istory of t he em pire. A eir co llection detailed the lives of the emperors from Hadrian to Carus. In order of their appointment to the post, t hey were: A elius Sp artianus, V ulcatius Gallicanus, Julius Capitolinus, Trebellius Pollio, A elius La mpridius, a nd Fl avius V opiscus. As a group, they were known as Scriptores Historiae Augustae (writers of the imperial history). Ā eir work survives.

 \overline{A} e w riting of h istory with a d ifferent focus received c onsiderable impetus fr om the a scendancy of Christianity as the official religion of the late Roman Empire. Euse bius w rote a *Universal History* in Greek that St. Jer ome translated into Latin. Another Christian historian, Flavius Lucius Dexter, dedicated to St. Jerome a h istory setting forth a chronology of notable events beginning from th e b irth of C hrist and e nding with th e author's own times. An even more ambitious universal h istory was t hat co mposed b y Pr osper Aquitanus. His work, *Chronicon*, tracked events from the creation of the world to the capture and sack of Rome by the Vandals' most notable king, Gaiseric (sometimes Genseric), in 455 c.e.

Annals of Spring and Autumn (Chunqiu,

Ch'un Ch'iu) Confucius (ca. 500 B.C.E) One of the five canonical texts of early classic Confucianism, th e *Annals of S pring an d A utumn* contain a partial chronicle of principal happ enings in Confucius's native but ot herwise relatively minor Chinese state of Lu. In brief and unembellished entries, Confucius made note of matters of interest that occurred in Lu between 722 and 484 b.c.e. At the head of each entry, he recorded the year, month, day, and season of the noted event's occurrence. C onfucius i ncluded s ummer u nder spring and winter under autumn, thus giving rise to the common title of the work.

Listed in t he *Annals*' pages a re na tural p henomena such as meteor showers; political events such as raids by warriors from other states, victories a nd d efeats i n fe udal w arfare, o r tr eaties resolving d isagreements w ith other s tates; and such u nfortunate o ccurrences a s de aths f rom natural causes and from murders.

Modern r eaders may find it o dd t hat s uch a bald r ecitation of e vents wou ld a ssume g reat importance in the Confucian c anon, but C onfucius thought that the work would make his reputation. H is v iew of t he *Annals*' i mportance w as shared by his successor philos opher, Mencius, who opined that the work struck "rebellious ministers and bad s ons" with terror. For the Chinese, important commentary had a way of grafting itself onto t he e ssential ma terial o f a te xt, a nd t his occurred in the case of Confucius's annals just as it did with the *Boo k of Odes* that he compiled.

A disciple of Confucius named Zuo (Tso) took the sketchy vignettes of the Annals and filled them out by a dding mo re d etails a bout t he i ncidents and discussing their significance. Confucius's base composition, then, served as a road map to suc h consequential events in the history of the state of Lu a s w ould p rove e difying to t hose w illing to take t he t rouble to lo ok w here C onfucius h ad pointed. Known as the Zuo Zhuan (Tso Chuan), or Zuo's commentary on the Annals, this work's clarifying prose has long been considered the most important of three such explanatory addenda. Ā e two others, both composed in the fifth century b.c.e., do not enjoy the general acclaim that Zuo's work does. A e authors of those lesser commentaries were Ku- liang and Kung-Yang.

anthologies of Greek verse

From a s early a s the second century b.c.e., persons w ith literary i nterests be gan co mpiling anthologies of epigrams and short poems by earlier authors. We know the names of some of the earliest a nthologists, s uch a s P olemo P eriegetes and Melea ger of Gadara i n Syria (fl. ca. 100 b.c.e.). We also know the name and something of the contents of Meleager's anthology. It was entitled *Stephanos* (Å e Garland, or Å e Crown), and it included examples of the work of 46 poets. Later anthologists continued to follow Meleager's example. A mong t hose we find P hilippus of Å essalonica (fl. ca. 80 c.e.) and Diogenianus of Heraclea (fl. ca. 120 c. e.). None of their anthologies, however, survives.

Other anthologies did survive, though, in the late a ncient a nd e arly m edieval p eriods, a nd subsequent anthologists, such as Strato of Sardis (fl. second or third century c.e.), used their contents a s t he ba sis f or n ew c ollections o f t heir own. Others, such as Diog enes La er ti us (fl. ca. 220 c. e.), found n ew principles u pon w hich to base their collections. Diogenes collected poems that c elebrated f amous me n. A gat hias o f Myr ina, h imself a n e pigrammatist o f n ote, formed a collection called *Kuklos* ("cycle" or "collection") a nd o rganized i t i nto s even s ections according to subject.

Like the works of their predecessors, the collections of these men have d isappeared i nto the mists of l iterary h istory. F rom that epoch, h owever, and fr om th e 14th c entury, two representative collections survive: respectively, the collection of the otherwise unknown C onstantine Ce phalas and a sevenbook collection by a monk dwelling at Constantinople, M aximus P lanudes. Antigone Sophocles (ca. 422 B.C.E.)

Ā e story of A ntigone, t he d aughter of O edipus by his wife and mother, Jocasta, tells the final episode in a series of events also treated by Aeschylu s in A e Seven against Thebes. As the legend has it, the sons of O edipus by Jocasta, Ete ocles and Polynices, were reared by their uncle Creon and succeeded to his power while he was still living. A lthough they were supposed to rule by turns, the brothers fell out and ended up hating each other. When Eteocles became king, he exiled Polynices. Enraged, Polynices gathered a military force i n A rgos a nd b esieged h is na tive c ity. Aeschylus t ells t he s tory of t hat battle a nd how the warb etween the brothers fulfilled a curse upon t hem that they would d ie by e ach o ther's hands. As t hat play ends, the elders of Ā ebes have decreed that Polynices' body cannot be buried because he had invaded his native city. His sister, Antigone, disobeys their edict.

As Soph oc les handles the same material, after the battle in which the brothers die at each others' hands, Cr eon r eassumes t he c ity's t hrone. H e issues an edict granting a hero's funeral to Eteocles, but decrees that Polynices' body must remain unburied. Without the benefit of a proper funeral, the Greeks thought, a dead person's spirit could not find rest in the underworld but would be condemned to wander as a forlorn ghost for all eternity. Unswerving in her view of her sisterly duty, therefore, Antigone opposes her will against that of he r u ncle and k ing, c onfident i n t he godordained justice of her cause. Ā is situation is further complicated by Antigone's love for her cousin, Creon's son Haemon, and Haemon's for her.

Ā e pl ay o pens a s A ntigone a nd her si ster Ismene discuss their brother's announced funeral arrangements, and An tigone announces her determination to d isobey Cr eon. Ism ene va inly tries to dissuade An tigone a nd c onvince h er o f the folly of defying the state.

 \overline{A} e sisters exit, and the ch or us fills in the audience on t he bac kground of t he situation as they remind their hearers of the material that appeared in *Seven against* \overline{A} *ebes*. Creon then enters, fills in the material f rom *Oedipus Tyrannus* that the audience needs to follow the current play, and reasserts his decision vis-à-vis the burials.

A g uard r ushes o nstage a nd, a fter e xcusing himself as well as he can, reports that someone has disobeyed Creon's prohibition and performed the burial ritual by sprinkling dust on Polynices' corpse. Å e g uards have n o clue a s to w ho t he perpetrator might be.

 \overline{A} e credulous chorus suggests that a god may have done it. Creon scornfully rejects that theory and dismisses the guard with threats. \overline{A} e chorus gossips about the goings-on, and a guard reenters, dragging a long An tigone, w hom he ha s c aught attempting to bury the body after the guards had cleaned off the dust of her first effort. After a discussion of the apparent conflict b etween h uman and divine law in this case, Creon condemns Antigone to death. Ismene comes forward, and though she has n ot d isobeyed Cr eon's e dict, she a sks to die as well rather than be bereft of her sister.

As Creon and Ismene discuss Creon's sentence, Ismene a sks h im i f he w ill s lay h is o wn s on's betrothed. Creon is inflexible, and Antigone cries out t o H aemon t hat h is father w rongs h im i n depriving the young man of his bride.

Haemon en ters a nd r espectfully a ttempts to dissuade his father from executing Antigone, not on the grounds of the young man's love for her, but rather on the grounds of the dark rumors that have been circulating among the citizens. Ā e citizens are displeased with Creon's judgment, says Haemon, and wisdom should he ed that displeasure. Cr eon a sserts the a uthority of h igh office and disregards his son's good advice. He repeats his determination to e xecute A ntigone. Haemon responds t hat A ntigone's d eath w ill d estroy another, and Creon, interpreting his son's words as a t hreat, c alls f or A ntigone to b e e xecuted before Haemon's eyes. Haemon promises that his father will see him no more and exits.

Creon a nnounces h is i ntention to de al w ith Antigone by imprisoning her in a cave with only as much food "as piety prescribes." As Antigone is led away, the chorus weeps for her and tries to comfort her by reminding her that, as mistress of her own fate, h er de ath w ill b e glorious—even g odlike. Antigone perceives these well-intentioned but illconceived r emarks a s m ockery. She r eviews her own behavior and that of Creon and concludes that she has do ne t he p roper t hing. Cr eon o rders her led away, and the chorus draws analogies to similar fates s uffered by pre & œs ors from t he a nnals of Greek mythology.

 \overline{A} e blind prophet, Teiresias, now enters, led by a boy. He tells Creon that the city of \overline{A} ebes has been polluted by c arrion f rom the unburied corpse of P olynices. H e wa rns Creon t hat he stands on the edge of a fatal decision, and advises him to allow the burial. Creon pridefully refuses and insults Teiresias. \overline{A} e seer foretells the death of one of Creon's children as the exchange of a corpse for a corpse.

Teiresias exits, and the citizen chorus advises Creon to r elease A ntigone and bury Polynices. Finally he agrees to accept their advice, orders Polynices' burial, and rushes to release Antigone. \overline{A} e chorus prays to the gods, but a m essenger arrives bearing sad tidings. Creon's wife Eurydice appears, and the messenger makes his report.

 \bar{A} e b ody of Polynices was buried, but as the soldiers finished that task, they heard a loud voice wailing at the blocked entrance to Antigone's cavern prison. When the guards entered the prison, they found that Antigone had hanged herself and that Haemon was embracing her suspended body. Creon entered and called out to Haemon. Furious with h is f ather, H aemon drew hi s sword and rushed at Creon, who fled to avoid its stroke. Desperate, Haemon fell on his sword and committed suicide. As he d ied, he on ce again embraced the corpse of Antigone.

Haemon's mother, Eurydice, reenters the palace. \overline{A} e c horus i magines t hat she w ishes to

grieve in private, but they hear no keening and send the messenger to investigate.

Creon reenters, bemoaning his own folly. \overline{A} e messenger returns with the news that Eurydice has also committed suicide, and the palace doors swing open to reveal her corpse. Creon continues grieving and i s led a way. \overline{A} e c horus en ds t he play with advice: "Wisdom is the supreme part of happiness." \overline{A} e gods must be strictly reverenced, the boasts of prideful men are punished harshly, and in old a ge t hose w ho have b een c hastened like Creon may finally learn wisdom.

 \overline{A} e fates of Antigone, Haemon, Eurydice, and Creon must have instilled in the Athenian audience t he t ragic emotions of p ity and fear that *Ari st ot l e* described in his *Poet ic s*. Whether or not this play also takes the next step in the emotional progression that Aristotle attributes to successful tragedy—that is, catharsis, an emotional cleansing t hat d rains t he a udience of p ity a nd fear—the reader will have to decide.

Antiphon of Rhamnus (ca. 480 B.C.E.-ca.

411 B.C.E.) Greek prose writer

An orator and rhe torician, A ntiphon is thought to have composed an early essay on rhetoric. He was also reputed to have worked very profitably among the earliest political and legal ghostwriters. Some 15 of his speeches, delivered either by their author or by others, still survive. Of these, three were actually delivered during the trials of court cases. \bar{A} e others seem instead to be imaginary speeches, perhaps teaching examples. Both Thucydides and Cicer o discuss aspects of Antiphon's career. Antiphon commanded A thenian troops during the Peloponnesian Wars and was an influential member of the Council of 400 during the time of nær- olgarchic rule in stituted temporarily at Athens during those conflicts. He died by execution for treason against Athens.

Apocrypha, the

As Professor W. D. McHardy explains in his introduction to the second volume of the New English Bible, the meaning of the word *apocrypha*—the Greek word for *hidden*—has shifted over time as it applies to bi blical writings a llied with but no w excluded from the canonical writings included in the Hebr ew Bibl e and New Test a ment. I follow McHardy's explanation here.

Early in the Christian era, the works considered ap ocryphal were thought to o important to be shared with the public at large and were thus reserved for those who believed most strongly in the Christian faith. In this sense they were *hidden*

from public view. Later, however, the meaning of the word apocrypha shifted. It came to be applied to those books that, though they were candidates for inclusion in Scripture and indeed had sometimes b een in cluded, u ltimately were rejected because t hey m ight p romote he resy or b ecause their o rigins were d ubious. St . J er ome's fifthcentury translation of the Bible, k nown as the Vulgate, b ecame t he s tandard f or the an cient world a nd, i n t he v ersion a uthorized b y P ope Clement V II, r emains the a uthorized R oman Catholic text. Jerome used the term apocrypha to apply to books that early Christians venerated but had not been included in the Hebrew Scriptureseven i f t hey had b een w ritten i n t he H ebrew language.

Ā ough the form and the content of the Apocrypha have shifted from time to time, as set out in the New English Bible, they include 15 titles: the First a nd S econd B ooks of E sdr as (two titles); Tobit; Judit h; the rest of the chapters of the Book of E sther; the Wi sdom of S olomon; E cclesiasticus, or the Wisdom of Jesus son of Sirach; Baruch; A Letter of Jeremiah; the Song of the Ā ree; Daniel and Susanna; Daniel, Bel, and the Snake; the Prayer of M anasseh; a nd t he F irst a nd S econd Books of the Maccabees (two titles).

In M cHardy's v iew, k nowledge of t he A pocrypha is crucial for an understanding of the background of the New Testament. I have selected the first and s econd books of E sdras and Judith for closer attention elsewhere in this book. Å e first provides a n e xample of t he u neasy marriage of history a nd p rophecy, a nd t he s econd offers a wonderful s tory of ho w a hero ine r escues her people from certain destruction—a story that has inspired much great art through the centuries.

 \overline{A} e Book of Tobit describes the doings of Tobit and h is s on T obias a nd ho w t hey u nwittingly played host to the Archangel Raphael. \overline{A} e apocryphal chapters of the Book of E sther are taken from a Greek text that undergoes many changes in the Hebrew version. As told in the Apocrypha, the H ebrew woman E sther ma rries the P ersian ruler Ar taxerxes (ruled 464–425 b.c.e.). W hen the king's regent, Ha man, launches a g enocidal initiative a gainst t he J ews, E sther suc cessfully intercedes to save her people.

In the Wisdom of Solomon appears "Å e Promise of Immortality" for the godly. A is is followed by discussions of divine wisdom, the evils of idolatry, and an analysis of the pattern of divine justice. A efollowing book, E cclesiasticus ort he Wisdom of Je sus S on of Si rach, d iffers f rom i ts prose pre de œs sors. Following a brief prose preface, t he r est o f the 51-chapter w ork appears i n psalm-lke verse. It opens with a continuation of the p receding d iscussion o f wisdom an d th en turns to consider the role of divine providence in human affairs. Ā e voice of the poet is magisterial, and the verse is presented in the form of an address of a father to a s on. A is mode continues as the poet considers prudence and self-discipline. Ā en a personified, allegorical Wisdom speaks in praise of herself. (A is device was imitated in the Renaissance by D esiderius Er asmus in his s eriocomic work A e Praise of Folly.) Next appears "Counsels upon Social Behaviour." A is section of the poem opens w ith a l amentation: " Any w ound b ut a wound in the heart! / Any spite but a woman's!" Ā ere f ollows a m isogynistic a ttack o n w omen who a re i nsufficiently subservient to t heir h usbands. A en comes a series of examples of bad and good behavior, followed by a discussion of "True Piety and the Mercy of God" and an examination of "Man in Society." A series of portraits of "Heroes of I srael's Pa st" a nd a p rayerful e pilogue en d Ecclesiasticus.

A s eries of sho rt b ooks f ollows t he leng thy Ecclesiasticus. \overline{A} e first is Baruch, which is set in Babylon in the fifth year after the Chaldeans had captured and razed Jerusalem and taken its people captive. \overline{A} e prophet B aruch explains to t he people that their captivity is just punishment for their transgressions but that they have reason to hope. A M essiah, " the E verlasting," i s c oming, and Israel will benefit from his arrival.

A Letter of Jeremiah next discusses the folly of idolatry. Following that comes the Song of the \overline{A} ree—a prose and verse addition to the Book of Daniel, w hich, b y quo ting t he b eatitudes o f praise that the Hebrews s ang a mid the flames,

50 Apollonius of Rhodes

embellishes the miracle of the Hebrews' survival in the fiery furnace of their Chaldean captors.

Another episode follows that is famous in the annals of art history as a subject for paintings: Daniel a nd S usanna. \overline{A} is book r ecounts t he shameful episode of a g roup of elders who spy upon the naked Susanna at her bath. \overline{A} ey try to force her to yield to their lust by threatening to accuse her of being with a man. She refuses. \overline{A} e elders carry out their threat b efore the assembly. \overline{A} e judges believe the accusation and condemn Susanna to de ath. As she is being led to the place of execution, G od inspires Da niel to intervene. H e interviews the elders s eparately. \overline{A} ey g ive conflicting test imony t hat ex poses their lie, and, rather than Susanna, her accusers are put to death.

In D aniel, Be l, and th e Sna ke, t he H ebrew prophet Daniel exposes the fraud of the priests of the idol Bel. Cyrus, king of Persia, was convinced that the idol was a living god because all offerings of food and drink were consumed when left with the idol in a sealed ro om. Da niel sprinkled t he floor of the room with ashes before the door was sealed. On the next day, he sho wed the king the footprints of the priests and their families, who, of c ourse h ad b een the real d iners. Da niel n ext destroys a huge serpent that the king revered as a deity. \overline{A} e Babylonian people, however, force the king to hand Daniel over and try to feed h im to the lions, but G od s ends a ngels to p rotect h im, and he triumphs once again.

 \overline{A} e next book, entitled the Prayer of Manasseh, contains the verse petition of a r epentant sinner seeking ab solution. \overline{A} e final t wo b ooks of t he Apocrypha, the First Book and S econd Book of the Maccabees, trace the history of the hereditary high priests of the Jews from the time of Philip of Macedon and Alexander the Great (fourth century b.c.e.) and tell of the re is tance offered by Jewish i nsurgents t o their g entile overlord. S uch resisters included Mattathias, who refused to participate in heathen sacrifice or permit others to do so. \overline{A} e First B ook of Mac cabees c hronicles t he military campaigns of Judas Maccabeus and h is brother Jon athan, who, as the high priest of the temple at Jerusalem and an ally of Alexander, successfully led the Jewish forces against Apollonius, Alexander's enemy. Ā e Second Book of the Maccabees continues to recount such military exploits under the direction of later high priests such as Jonathan's successor, Simon. It also recounts the further successes of Judas Maccabeus against his enemies, particularly h is triumph over Nicanor, the commander of a gentile army's detachment of elephants.

 \overline{A} e books of the Maccabees end with a direct address by their author to h is readers. He hopes they will take pleasure in the variety of literary styles that he has offered them.

Apollonius of Rhodes (Apollonius Rhodius, Apollonios Rhodios) (b. ca. 305 b.c.e.) *Greek poet*

Å e ancient sources concerning the life of Apollonius of Rhodes give conflicting information about many aspects of his biography. Apollonius's most scholarly mo dern e ditor and tr anslator, P eter Green, however, has constructed from that ancient confusion what he considers to be a likely sequence of e vents, and here I f ollow Green's discussion though not his preferred Greek spellings.

 \overline{A} e first indigenous poet of Alexandria, Apollonius was born there between 305 and 290 b.c. e. probably nearer the earlier date. He was a student of the poet Callim achus while Callimachus was still an unknown schoolteacher in the Alexandrian suburb of Eleusis and perhaps became his assistant after Callimachus joined the staff of the library at Alexandria. Perhaps b etween h is 18th and 20th years, Ap ollonius gav e a pu blic re ading of h is juvenilia t hat was ill-received. Ha ving n onetheless decided to become a poet and having chosen the subject of the voyage of Jason and the Argonauts, Apollonius moved to the island of Rhodes, perhaps to become more expert in his knowledge of s eafaring and l end gr eater c redibility to h is epic. \overline{A} ere he c omposed p oems a bout R hodes and also about the islands of Kaunos and Nidos. After a sojourn on Rhodes that lasted between 13 and 20 years, he returned to Alexandria as tutor to the prince who would become Ptolemy III. He also o ccupied th e p ost o f c hief l ibrarian a t t he great library of Alexandria.

Continuing hi s literary c areer, A pollonius penned verses commemorating the founding of the c ities of Al exandria a nd N aukratis and a poem about origins entitled *Kanabos*. As a librarian, he was also responsible for promoting scholarship. H e fulfilled th at duty by w riting about Homer, Hesiod, and Ar ch il o c us.

A long-running literary debate concerns whether or not Callimachus and Apollonius participated in a vitriolic literary quarrel over the superiority of ly r ic poet r y versus e pic poetry. Green's careful consideration of the evidence le ads h im to c onclude that there is no reason to suppose that the two might not have disagreed about their preferred literary modes with some acerbity. A ough Callimachus did pen one brief epic, Heca le, he clearly prefers short, epigrammatic poems, densely packed with subtle allusion. Likewise, Apollonius clearly preferred the longer, more expansive mode of the epic. A c ommonplace b it o f w isdom c oncerning academic d isputes h olds t hat t heir b itterness i s inversely p roportional t o their c onsequentiality, and Green suggests that in the pampered, hothouse environment of the Alexandrian library, opportunities for such scholarly disagreement would have been rife. A e fact that Apollonius wrote a scathing critique of t he work of h is p redecessor l ibrarian, Zenodotus (fl. 285 b.c. e.) suggests that his temperament may have been quarrelsome.

Ancient s ources t ell us t hat, o n h is de ath, Apollonius w as bu ried ne xt to C allimachus. Green posits that this burial was in a private cemetery for library staff.

Apology of Socrates (Defense of Socrates) Plato (399 B.C.E.)

In one of the world's great miscarriages of justice, Soc r at es, in his 70th year, was accused of corrupting the youth of Athens and of impiety. \overline{A} e accusation a rose i n part from c onfusion i n t he minds of many people, a confusion that identified Socrates w ith t he So phist p hiloso phers, whose position S ocrates ab horred. I n p art the c harge arose from S ocrates' low opinion of p oets. \overline{A} at opinion had offended Meletus, the poet who was Socrates' chief accuser.

In a ny cas e, t he high-minded a nd r eligious Socrates w as b rought t o trial o n trumped-up charges before a panel of 501 judges of the Athenian heliastic court-a court whose judges were annually appointed from among the Anthenian male citizenry. A 30-vote majority convicted him. Ā ough no p enalty was specified for conviction on the charges that Socrates faced, a guilty verdict led to a s econd p roceeding i n w hich b oth t he accusers and the accused could propose a penalty. Ā e judges then decided between the two penalties p roposed; n o c ompromise w as admissible. Ā e ac cusers p roposed de ath. S ocrates at first proposed being maintained at the public expense by being allowed to take his meals at the prytaneum (the town hall where guests of state were

52 Apology of Socrates

entertained). Ā is penalty was essentially a reward for t he s ervices t hat S ocrates had p rovided f or Athens. Ā at proposal, however just it might have been, wa s a rhe torical plo y. S ocrates t hen r an through a l ist o f p otential a lternatives: e xile, imprisonment, paying a fine. As he had no money of his own, he suggested he could afford a fine of one *mina* of silver. His friends, however, suggested t hat he propose a fine of 30 silver *minae*—a sum they would guarantee.

 \overline{A} e court imposed the death penalty—probably thinking that Socrates would choose to escape into voluntary exile rather than be executed. \overline{A} e judges also probably never expected the sentence to be carried out. When it was, Pl at o w rote up the proceedings that had led to his teacher's execution. In the opinion of Howard North Fowler, a d istinguished classical s cholar a nd t ranslator of the *Apology*, both its form and its content, as well as what we know from other sources about Socrates' characteristic method of discourse, suggest that Plato fol lowed closely S ocrates' a ctual speeches in his own defense and with respect to his sentencing.

In his own defense, Socrates first refutes the truth of his accusers' assertions. He then apologizes if he fails to follow the expected forms for speaking to the court since it is the first time he has b een t here. H e p oints o ut t hat he ha s lo ng been the victim of false accusations. He objects that he has no opportunity to cross-examine his accusers. H e n onetheless i ntends to a nswer t he long-standing ac cusations of p ersons n ot b efore the court. Scoffing at Aristophanes' unflattering theatrical portrayal of his stage Socrates, the real one calls on the many members of the panel of judges who have spoken directly with him or who have heard him speak to dismiss the accusations of impiety on the basis of what they have actually heard h im s ay. M oreover, he p oints o ut t hat he does not undertake to educate people for money.

Ā ough S ocrates h imself a lways c laimed to know nothing, he does admit to being wiser than some and calls on Apollo's Pythian oracle at Delphi as a witness, for that oracle had said no living man was wiser than Socrates. He admits, however, that he has made en emies by showing people who thought themselves to be wise that they were not. A nd he do es consider h imself w iser t han others who t hink t hey k now s omething. So h e went in search of wisdom. He looked among the politicians and public men, among the poets, and the artisans, but he found precious little wisdom. His method of investigation, however, made his in for mants aware both of their own lack of wisdom and of Socrates' certainty of that deficiency. As a result, his inquiries brought him many enemies. A lso as a result of those same inquiries, however, he concluded that only the god is wise, and that human wisdom is of little or no account. Ā us, So crates c oncludes, the g od A pollo ha s called him wise because Socrates recognizes that he i s n ot s o. N onetheless, i n t he g od's s ervice, Socrates continues to search for wisdom, and in consequence h e survives in a continual state o f poverty. Also, the young men to whom he teaches his methods have also begun participating in his inquiry, and their search for wisdom has led to the charge that Socrates is corrupting the youth. Ā ose ma king su ch acc usations, h owever, h ave also prejudiced the minds of the jurors a gainst Socrates on similar grounds.

Now Socrates turns on his accusers, and in lieu of the prohibited cross-examination, he conducts a m ock d ialogue with them, s peaking b oth h is own and their parts. He excoriates Meletus for a lack of seriousness and for his carelessness in even bringing s uch a l aughable a ccusation b efore a n important tribunal. If, Socrates says, he c orrupts youth (which he does not) he does so involuntarily. As he has no criminal intent, he is guilty of no crime.

Socrates n ext a ddresses t he a ccusation o f impiety and, step-by-step, demonstrates that he is a b eliever i n t he g ods. A mong o ther p roofs, he cites his distinguished military service in defense of the state at the battles of Potidea, A mphipolis, and Delium, pointing out that he served his military commanders by remaining at his station just as he served the gods who had c alled him to t he practice of philosophy. It is therefore his divinely appointed task to continually call the attention of the citizens of Athens to their mistakes and follies. He is the gadfly of the gods. He will remain faithful to that assignment even if it costs him his life. He admonishes his judges to look to the perfection of their souls.

Socrates reminds h is judges of t he one o ccasion in which he himself had served in the senate. His was the only voice raised against the senate's admittedly i llegal condemnation of 10 g enerals who, owing to bad weather, had f ailed to ga ther up the bodies of drowned sailors after the battle of A rginusae (406 b. c.e.) d uring the P eloponnesian War. On that occasion, the senate threatened Socrates with impeachment and death, but he preferred death to voting for the senate's illegal action. He then proposes that the senate question the relatives of the youths he supposedly has corrupted to see if any of them agree with such an assessment of his conduct. He refuses to bring his children (two of whom were still minors) to court and plead for his life as their sole support. Such behavior, he says, would be disgraceful for such a person as himself with a reputation for both wisdom a nd courage. I n closing, S ocrates r easserts his belief in the gods and leaves it to God and the jurors to decide his fate.

After the jury has brought in a verdict of guilty, Socrates s uggests t hat so me v otes h ave bee n bought by his accusers to avoid having to pay a hefty fine if too few votes had b een c ast a gainst him. His suggestions concerning a penalty as they are outlined above follow the guilty verdict.

When the court condemns him, Socrates says that, while he has been condemned to de ath, his accusers ha ve b een c onvicted b y t ruth o f "v illainy and wrong." He also prophesies that a f ar more grievous punishment will come upon those who have condemned him than the death that he will suffer. He says he has already restrained men who will force those who have condemned him to account f or t heir ac tions. \overline{A} ough t hose who voted against him may have done so to avoid just such an outcome, their efforts to do so will prove unavailing.

Further, Socrates mentions a divine monitor a s ort o f sp irit t hat ha s a lways su pervised h is

Apostolic Fathers of the Christian Church, The 53

speech and behavior. \overline{A} at spirit has not censored anything h e h as s poken at t he pro ceedings. Socrates concludes from this that h is death as a result of this trial is a good thing. He next considers death itself. \overline{A} e dead either will have no consciousness of anything—in which case death will be "a wonderful gain"—or it will be a migration of the soul to another place where opportunities will a bound t o meet t he fa mous perso ns wh o have e arlier d ied, w ho ha ve b ecome i mmortal, and are happier than living people in this world.

No evil, Socrates concludes, can afflict a good person in this world or the next. He dies in the conviction that God will not neglect him. He asks his judges for a single favor. He requests that the jurors will correct Socrates' children in the same fashion that Socrates has tried to show the jurors their own failings. If the jurors grant that request, he s ays, b oth S ocrates a nd h is s ons w ill h ave received just treatment at the jurors' hands.

Socrates says that the jurors go to live and he to die. Only God knows which has the better lot.

In its current form, the Apostolic Fathers of th e Christian Church brings together a collection of 10 very early Christian writings, sometimes called \overline{A} e Sayings of the Father, that, after much debate, were finally excluded from the official canon of the New Test a ment. From t he p erspective of a ncient Ch ristians and from that of the European editors who first published t he do cuments as a collection in t he 17th c entury, t he w ritings t hat were f ormerly and are currently included in the collection were supposed to ha ve b een composed by authors who perso nally k new and were p erhaps t hemselves the companions or disciples of t he ap ostles of Jesus Christ. \overline{A} us, thought the editors, the documents had been composed shortly after the books of the New Testament. \overline{A} e historical accuracy of all these assumptions is very much open to question, and in some cases, such as those of Barnabas and 2 Clement, the credited authors demonstrably did not write the works.

Nonetheless, the documents originated early in Christian history, and at the very least they shed light on some of the matters that then concerned ordinary b elievers a nd p otential c onverts. Ā e works also presage what finally became Christian orthodoxy some centuries later when Christianity had become the state religion of Rome and a fter such church councils as that of Nicaea had done their winnowing respecting what was and was not to be regarded as Scriptural.

Apuleius (Lucius Apuleius) (b. ca. 125 c.e.) Afro-Roman Prose writer

Born in Roman Africa, likely in the city of Madauros, t o a well- to- do Greek- speaking family, Apuleius studied both at Carthage and in Athens, mastering colloquial rather than literary Latin as a s econd l anguage. A fter completing h is e ducation, Apuleius traveled widely through the Mediterranean world and established h is residence at Carthage. \overline{A} ere he undertook a career as a scholar, phi bs opher, and writer, composing his works both in Latin and in Greek. \overline{A} e genres in which he worked included songs for performance, works for t he s tage, s atires a nd r iddles, o rations, a nd philosophical dialogues.

Of t his considerable b ody of l iterature, Apuleius's works in Greek and his poems in both languages h ave all perished. On ly a r epresentative body of L atin p rose r emains. Ā ese r emnants include a work de scribing t he si dereal u niverse and the meteorological phenomena that occur in it—*De Mundo* (Concerning the world or the cosmos). His *Florida* contains examples of his oratory. Two other surviving works concern themselves with philosophy and religion, and one offers an amusing a pology f or t he a uthor i n ma rrying a wealthy widow.

 \overline{A} e philosophical work, *De Platone et eius dogmate* (About P lato a nd h is do ctrine), c ontains a biographical sketch of Pl at o and outlines Platonic e thics a nd me taphysics as they were taught in Apuleius's day. \overline{A} e religious work, *De Deo Socratis* (Concerning the God of Socrates) explains the nature a nd f unction of *daemones*, t he sp iritual beings that act as go- betweens for human beings in their in teractions with the d ivine. S ocr at es supposed that he en joyed the regular s ervices of one such being.

 \overline{A} e *Apology*, a w ork that many scholars consider autobiographical, defends Apuleius against a charge brought against h im by the relatives of his w ife, P rudentilla. H er f ormer hei rs, d isappointed in their expectations of an inheritance, accused Apuleius of having u sed black magic to win her hand.

Contemporary r eaders, h owever, p rincipally remember Apuleius for having penned what many deem to be t he o nly co mplete e xample of t he Roman n ovel still surviving. \overline{A} is work, entitled *Metamorphoses* by Apu leius but re named \overline{A} e *Gol den Ass* (or \overline{A} e *Golden Ass of Lucius Apuleius*) by its subsequent editors, is a first- person narrative that reports what happens to a Greek named Lucius when, while traveling, he arrives at a place full of witches. When he asks for a demonstration of w itchcraft, t he obl iging w itch ac cidentally turns him into a golden-colored donkey. After his transformation, t he r est of t he s tory de tails h is adventures during his travels and reports many of the stories that he hears along the way. Eventually the E gyptian g oddess, I sis, r estores his h uman shape, and Lucius becomes her devotee.

Other works have sometimes been ascribed to Apuleius, but most of t hese a re n ow definitively held to be s purious. D iscussion c ontinues a bout the authenticity of a philosophical work, *On Interpretation (Peri hermeneias)*.

Aratus of Soli (Aratos of Soli) (b. ca. 315 B.C.E.) *Greek poet*

À e subject of three u seful a ncient b iographies, Aratus was born in Cilicia to Athenodorus and Letophilia. An older c ontemporary of the p oet

56 Arbitration, The

Call imachus, A ratus s tudied w ith the g rammarian Menecrates of Ephesus, with the philosophers Timon and Menedemus, and later with the Stoic Z eno. L ikely through this last connection, Aratus w as in vited to the court of Mac edonia. \overline{A} ere the king of Mac edonia, A ntigonus (ruled 276–239 b.c.e.), commissioned A ratus to write a poem on the subject of a stronomy. A ratus not only did so, he also managed to preserve for posterity much of the ancient Greeks' knowledge of that science, even though the poet was not himself an astronomer.

As his so urces, A ratus e mployed t wo p rose treatises w ritten b y a s tudent o f P l at o, t he astronomer and mathematician Eudoxus of Cnidus (ca. 390–337 b.c.e.), relying marginally on his *Enoptron* (\overline{A} ings Visible) and principally on his *Phaenomena* (\overline{A} e Starry Sphere.). Aratus entitled the resulting poem *Phaenomena k ai Diosemaiai* (\overline{A} e Starry Sphere and the Signs of the Weather). Of this poem in turn, Cicer o translated over 730 lines as a youth into Latin verse, but, as the literary historian G. R. Mair tells us, only 670 lines of that poem remain. Other Latin translations, however, were later undertaken, and a full version by Festus Avienus survives. Commentaries by mathematicians on Aratus's work are also extant.

 \overline{A} e poem itself opens with an introductory section followed by a description of the a xis of t he stellar sp here. F ollowing t his, t he p oet de votes almost 300 lines to a discussion of the constellations observable in the northern sky. \overline{A} e next section of the poem addresses the constellations south of t he e cliptic and e nds with th e d iscussion of "fixed stars"—those b eyond w hich t he Gr eeks thought there were no more spheres. \overline{A} e poet, for reasons of piety, declines to discuss the planets that bore the name of the deities of the Greek pantheon: Cronus (Saturn), Zeus (Jupiter), Ares (Mars), Aphrodite (Venus), and Hermes (Mercury).

 \overline{A} e poet next turns his attention to the circles of the celestial sphere and a te chnical discussion of the ecliptic and the signs of the Zodiac. \overline{A} ere follows a n i ncreasingly technical d iscussion o f the risings and settings of stars and their relation to the setting of the sun. In the section entitled " \overline{A} e Signs of the Weather," a nother v ery te chnical d iscussion o f t he Metonic Cycle and the Metonic calendar appears together with a catalogue of the influence of various stars on terrestrial and on nautical activities. \overline{A} e M etonic c ycle, na med f or t he A thenian astronomer Meton (fl. fifth c entury b .c. e.), i s based on a period of about 19 years, or almost 235 lunar c ycles b etween th e times t he n ew m oon appears on t he s ame d ay a s it d id at the c ycle's beginning.

Excellent English translations of the poem are available.

Arbitration, The Menander (ca. early third century B.C.E.)

Hope still remains that further fragments of \overline{A} e Arbitration may come to light a mong papy ri dating t o t he H ell enist ic A ge a nd t he p eriod o f Roman rule over Egypt. What is currently known to survive of \overline{A} e Arbitration represents about half of one of the Greek playwright Mena nder's most skillfully crafted plays. Typical of the playwright's palette, \overline{A} e A rbitration features you ng love rs caught in the toils of a seemingly intractable problem; c onflicts a nd m isunderstandings bet ween generations; a nd s tock t hough none theless i ndividualized c haracters t hat in clude coo ks, p rostitutes, drunken and crafty slaves, confidence artists, flatterers, and braggart soldiers.

Ā ough only a fragment of the first act survives, on t he b asis o f w hat f ollows, o n w hat w e k now from o ther e xamples, a nd on t he Rom an pl aywright Pl aut us's later adaptations of Menander's plots, the first act was probably preceded by a prologue t hat b oth e stablished t he proble m t he pl ay will address and introduced the principal as well as some of the comic secondary characters.

 \overline{A} e p roblem i s t hat a bout 10 m onths b efore the action of play, a drunken man at an all-night Athenian fe stival sexually a ssaulted t he pl ay's heroine, Pamphila. Five months after her arranged marriage—during m ost of which t ime he r h usband had b een away—she bore a ba by conceived from that rape. She and her nurse have been trying to c onceal t hat fact f rom her r eturned h usband. \overline{A} ey a bandoned t he baby w ith s ome objects, leaving it where it would surely be found.

Among the other principal characters, there is Pamphila's husband, Charisius. Formerly a sedate and s omewhat p riggishly philosophical you ng man, the n ewly ma rried Charisius ha s sudden ly taken up with a harp-girl (a perfect entertainer & courtesan) named Habrotonon. At an extravagant rate, he rents her as a companion from a dealer in such commodities. Charisius has installed Habroton in a rented house that he also occupies, leaving his s pouse P amphila a nd her n urse a lone n ext door in his own house. Ā e rented house belongs to Chaerestratus, who also lives there.

Also uncharacteristically, Charisius has begun spending lavishly to h ire cooks. One of t hese, a lewd and foulmouthed cook, serves as interlocutor in the first act, commenting on the action and cross- questioning t he s ervant O nesimus a bout Charisius's st rangely u nusual b ehavior. M eanwhile, Charisius's new father- in-law, the shrewd and matter-of-fact businessman Smicrines, finds his son- in hw's unaccustomed profligacy de eply troubling. After c omplaining a bout C harisius's spendthrift ways, a curious Smicrines goes to visit his daughter to see if he can find out what is happening. Ā e cook advises Charisius of Smicrines' arrival.

Most of act 2 survives. As it begins, Smicrines is just about to enter his daughter's dwelling when he is i nterrupted by t he a rrival of the charcoal burner Syriscus; Syriscus's wife, who is carry ing a baby; and the truculent goatherd Davus. Ā e men ask Smicrines to adjudicate a case they have been arguing. A fter expressing h is wonder t hat slaves argue cases, Smicrines consents.

Davus tel ls Sm icrines t hat, a bout a m onth before, he had found a baby exposed in the scrubland n earby t ogether with a necklace and some other or naments. A t S yriscus's u rgent re quest, Davus turned the baby over to him and his wife, who had r ecently lo st a c hild of her o wn. N ow, however, S yriscus ha s l aid c laim to t he ob jects found with the child. Davus argues that although he has given up the child, he is under no compulsion to give up the objects. Syriscus counters that the objects may be the key to the child's identity and that if D avus sells them, a ny ho pe that the child may one day discover his parentage will be totally lost. Smicrines decides the case in favor of Syriscus.

Now i n p ossession of t he o bjects, S yriscus shows them to the servant Onesimus, who recognizes t hem as b elonging to C harisius; t hey had been lost while the young man was drinking.

As act 3 begins, we discover that Onesimus has revealed t he s ecret about t he ba by to C harisius and th at n ow t he s ervant is a fraid to sho w h is master the objects found with the exposed child. \overline{A} e harp-girl, Habrotonon, expresses her dismay at being kept at a distance by Charisius. She had thought he wanted to become her lover.

With e ach pa ssing m oment, t he a udience becomes s urer that C harisius is t he father of h is wife's c hild s ince e ach n ew c ircumstance ma kes clearer that it was he w ho had v iolated her a t the festival of T auropolia. Nonetheless, Me nander strings o ut t hat c ertainty w ith n ew r evelations about Charisius's fatherhood. Habrotonon remembers t he g irl ra vished a t t he f estival b ecause she was the friend of a f riend. She a grees to t ake the ring and the child in to Charisius and claim that he gave the r ing to her w hile she w as still a ma iden. \overline{A} e conspirators think there will at least be a generous r eward, a nd p erhaps, i f C harisius b elieves them, Habrotonon will receive her freedom as the mother of his child.

The rest of act 3 is missing. We know, however, t hat a n i ncreasingly a ngry Sm icrines returns, having collected detailed evidence of

58 Archestratus

his on-in- hw's spendthrift ways. We also know that, confronted with his own signet ring, Charisius a cknowledges paternity of the baby, and in the resultant hubbub the party that the cook was preparing for breaks up. Not having been paid, the cook tells all he has seen to Smicrines, but he embroiders his tale, alleging that Charisius intends to b uy Habrotonon's freedom and violate his marriage contract with Pamphila. A thoroughly outraged Smicrines resolves to see justice done, and the act ends.

Much of act 4 has also been lost, but we know its b eginning t o h ave p rincipally in volved an extended argument between father and daughter as Smicrines argued her unsuitability for a*ménage* \dot{a} trois. Smicrines also pointed out that Charisius could not a fford t o s ustain s uch an extended household. Pa mphila, ho wever, i s u nconvinced by all her father's arguments and refuses to abandon her husband.

As the fragmentary text resumes, Menander gives us an encounter between Habrotonon and Pamphila. Habrotonon recognizes Pamphila from the festival, a ssures her t hat she ha s Pa mphila's baby, and explains t hat its father is n one o ther than Charisius. Charisius overhears e verything and is torn by guilt and self-hatred, and On esimus overhears h is master's self-reproach. A fter further business in which Habrotonon convinces Charisius that he and his wife are indeed the parents of this child, act 4 concludes.

Act 5 is also fragmentary. We can guess that manumission from slavery awaits Habrotonon and p robably O nesimus. The Sm icrines sub plot, ho wever, c ontinues its de velopment as a now irrational Smicrines reenters, prepared to kidnap his daughter and too angry to listen to anyone. O nesimus, ho wever, e xplains t o h im that, being far too o ccupied otherwise to g ive attention to each person in the world, the gods have p ut i n e ach person n cha racter t hat c an either guard or ruin a person. Onesimus advises Smicrines to propitiate that genuine deity by doing n othing f oolish. Gr adually t he a rguments of t he o ther c haracters b egin to o vercome Smicrines' misunderstanding of the complex situation as the last surviving fragment of the play peters out.

Archilochus (Archilochos) (fl. ca. 680 B.C.E.) *Greek poet*

Born in Paros, perhaps to a slave woman, the poet Archilochus later moved to \overline{A} asos. For a time he followed t he calling o f a m ercenary s oldier. A story is told of him that when his beloved Neobule and h e wi shed t o marry, her father Lycambes refused p ermission. Fu rious w ith Lycambes f or refusing h is p ermission and wi th N eobule f or obeying her pa rent, A rchilochus s o e ffectively lampooned bo th o f t hem in s atiric verse that father and daughter committed suicide by hanging themselves. Among the fragments of his work remaining to u s, we find a p ortion of t he verse that produced this unfortunate result.

 \bar{A} e o ther f ragments o f A rchilochus's w ork include elegies, hymns, and iambic verses. As his recent bio grapher, F rederic Wi ll, su ggests, t he fragments r eveal a p oet finely at tuned t o h is senses. His terse word pictures evoke both visual and tactile responses. In English it is difficult to illustrate the way Archilochus matched the musicality of his verse to its images and to its function as, say, a marriage hymn or a lampoon. It is also difficult in Greek, for modern s cholars ar e n ot certain of the precise pronunciation of his dialect. Nonetheless, A rchilochus w as t hought b y h is successors to b e a master craftsman. Twentiethcentury c ritics a lso su ggest t hat he r emains particularly appealing because his surviving verse suggests an almost modern sensibility.

Archilochus's love poems catch the depth and the impact of his feeling and the way those effects surprise the poet. But he was not merely a pretty poet, he was also a soldier, and some of his surviving p oems d eal wi th w ar, c onveying th e excitement and joy of battle as well as its horrors. Frederic W ill c ites a b rief e xample f rom F ragment 5 9 of the poet's work: "Seven m en f allen dead, whom we hammered with feet, / a thousand killers we."

In his personal philosophy, Archilochus seems to anticipate the stoics. He faces the human condition steadily and sometimes scoffs at human foibles, satirizing the vice of miserliness, for example. Splendid English versions of the poetic remains of Archilochus ar e a vailable i n t he t ranslations o f Richmond Lattimore and Guy Davenport.

Archimedes (ca. 287–212 B.C.E.) Greek prose writer

 \overline{A} e ancient Greeks ascribed a broader purview to the field of literature than we moderns are accustomed to do, a nd writers on a stronomy, physics, and m athematics were n umbered a mong t hose whose works the ancients considered literary. A giant among the early practitioners of those sciences was Archimedes.

He w as b orn a t Sy racuse o n S icily, a nd h is genius s erved h is n ative city a nd po sterity i n practical as well as theoretical ways. On the theoretical sid e, A rchimedes d iscovered t he ma thematical relationship between the volumes of the cylinder and the sphere and the way to m easure the circle; he w rote about the spiral, about cones and s pheres, an d o n s tatics a nd h ydrostatics a s well. He also calculated the value of pi (π), working it out to many places.

To a ssist in the study of astronomy, A rchimedes invented and fabricated a pair of astronomical g lobes. On e w as appa rently s tationary; t he other app ears to have been m echanized and to have illustrated the movements of the he avens as Archimedes understood them. Ā is globe was taken as booty by the Roman general Marcellus after the sack of Syracuse in 212 b.c.e.

In a n ancient s hipwreck d iscovered off the Mediterranean I sland of Antikythera in 1971, a mechanism for a similar moving globe was found. Studied by Der ek De S olla P rice, t he "Antikythera mechanism," a s i t i s k nown, p roved to b e "an a rrangement of d ifferential gears i nscribed and configured to produce solar and lunar positions in synchronization with the calendar year." Price connected t he device w ith a n a stronomer, Geminus of Rhodes, and placed its date of manufacture at 87 b.c.e. It may well be that Archimedes' mechanism was similar.

On the practical side, A rchimedes contributed many u seful i nventions a nd i deas to t he w orld. Among these was a device for raising water from a lower source to irrigate higher fields—an invention still used in places such as rural India and Egypt, where electric power sources are in short supply. A famous story about Archimedes relates that, while taking hi s b ath, h e c ried o ut "Eu reka!" (I ha ve found it!) when he realized that by mea sur ing the displacement of water h e co uld ac curately ga uge the specific g ravity of items immersed in it. Ā is made possible testing whether or not the crown of the tyrant of Syracuse, Hieron, was made o f pure gold or was an alloy containing base metal.

Archimedes interested himself in military science as well. He is credited with inventing siege engines and other apparatus that launched multiple weapons and that helped the Syracusans hold the Romans at bay for more than three years. One story t hat ma y b e ap ocryphal su ggests t hat h e invented a lens to focus the sun's rays intensely at

60 Argonautika, The

a distance and used it to set fire to a Roman fleet. While in t heory this may be possible, no one before Lucian of Samosata seems to have told the story.

Fond of m athematical jokes a nd p uzzles, Archimedes wrote (for Hieron's son, Gelo) a treatise proving that it was perfectly possible to work out the number of g rains of s and in the world. Using m aterial from H omer's *The O dys sey*, he also s howed that the number of A pollo's c attle must have amounted to many millions.

Archimedes' extant works survive in later editions and reconstructions produced over time by various hands.

Archimedes met his death during the Roman sack of S yracuse d espite t he Ro man g eneral Marcellus's orders to take him alive. Interrupted at his work by a Roman soldier, Archimedes expressed h is a nnoyance a t b eing d isturbed; not realizing who he w as, the soldier c ut h im down.

Long a fter A rchimedes' de ath, w hile t he Roman writer and statesman Cice r o was serving as an official in Sicily, he rediscovered A rchimedes' n eglected to mb i n 7 5 b.c.e. It was marked with a c olumn bearing the i mage of a sp here enclosed in a cylinder.

Argonautika, The (The Argonautica)

Apollonius of Rhodes (ca. 265 B.C.E.) Returning in both matter and manner to the sort of E pic t hat Hom er and the Homeridae had penned ce nturies e arlier, Ap ollonios R hodios (Apollo nius of R hodes) ignored i ntervening examples of rationalization, allegorizing, secularizing, and a contemporary poetic taste for arcane allusiveness. For his subject he takes the voyage of Jason and the Argonauts to the land of Kolchis in search of the mysterious and numinous Golden Fleece. A is archetypal Greek voyage of exploration in the Argo-the first vessel the Greeks ever sailed aboard-had ta ken pl ace a g eneration before the Trojan War and had provided a seemingly in exhaustible s upply of g rist for t he e pic mill. Apollonios adopts the same attitude toward his subject t hat c haracterized h is p redecessors: myth is history. (\bar{A} e origins of h is people were inextricably entangled with early events as the myths recorded them.) Apollonios also reverts to the attitude of the earlier poets toward the immortals. He takes the gods and other immortals at face va lue; as t he s cholar a nd translator Peter Green has suggested, he do es not, feel obliged to secularize the sacred.

Book 1

Inspired by his namesake, Phoebus Apollo, Apollonios begins his poem by recalling the circumstance t hat l ed Jason t o u ndertake th e v oyage. Fording the Anauros River, Jason lost a sandal in the m ud a nd a rrived half-shod at t he c ourt o f Pelias, t he son of t he sea g od Poseidon. Re cognizing i n J ason t he one- sandaled man whose arrival presaged Pelias's doom, Pelias invented a quest for Jason on the spur of the moment—a sea voyage to recover the golden fleece of the magic, winged ram that had c arried away Phrixos and Helle, the children of Athamas, King of Ā ebes.

Apollonios leaves it to h is readers to know the accounts of t he way t he sh ip was built by A rgo according to the instructions of Athena, goddess of wisdom, and calls on all the Muse s for further inspiration. H e c ontinues h is v ersion w ith a lengthy r ecital of t he na mes a nd g enealogies of Jason's n umerous c ompanions on t he voyage t o Kolchis. \overline{A} at done, the story leaps a head to t he moment of e mbarkation a nd t he g rief of Jason's inconsolable mother, Alkimédé, as her son leaves home to join his contingent of heroes.

At the ship, Jason instructs the crew to appoint a le ader. \overline{A} e m en su ggest t he hero H eracles (Hercules). H e, ho wever, d efers to Ja son. A ll approve the choice, and the men launch the ship and prepare the sacrifices needed for a propitious voyage. \overline{A} e n ext m orning, ac companied by t he music of the proto-musician and poet, Orpheus, the voyage proper begins.

After a f ew d ays' s ailing, rowing, and b eaching as n ecessary, the ship comes at n ightfall to the i sland of Lemnos. \overline{A} ere t he women had slaughtered all the men but one when their husbands, en ma sse, had p referred s leeping w ith captive women to sleeping with their wives. \overline{A} e one s urviving man—an elder—had b een sm uggled out to sea by his daughter, and all the women lived in constant fear that he would bring a military expedition against them.

When the *Argo* arrives, however, and its crew's intentions prove peaceful, an elderly woman counsels t he o thers to offer t he g overnment of t he island t o t he s hip's c rew and settle d own w ith them in familial amity. Jason receives the invitation of the women's leader, Hypsipyle, to come and hear t his p roposal. D ressed in h is finest clothes, which are lovingly described by Apollonios, Jason arrives. He listens to the offer Hypsipyle outlines and accepts a part of it. Given h is quest, settling down is out of the question, but repopulating the island with fresh inhabitants is not. Ā e seafarers therefore linger on Lemnos until Heracles reproves them for neglect of duty.

Under Heracles' urging, the *Argo*'s crew leave the women. Jason asks Hypsipyle, should she bear a male child to him, that when his son grows up, she will send him to comfort Jason's parents. Setting forth once more, the crew continue eastward, sometimes re ceiving a fair w elcome a nd s ometimes a hostile reception, as when the aborigines of an island near Phrygia attempt unsuccessfully to s eal off the ship's p assage from h arbor w ith stones. On ce, driven back by adverse winds, the Argonauts h ave t o fight t he f ormerly f riendly Doliones w ho, in t he d ark, have m istaken t heir friends for pirates.

During their next passage, the *Argo* is becalmed for 12 d ays u ntil, u rged by a g oddess, t he m en propitiate the earth goddess Rhea with a sacrifice. \overline{A} en, as they approach Mysia, Heracles breaks an oar. When they arrive, he g oes to r eplace it, and his beloved page Hylas drowns because of a wood nymph's passionate kiss while trying to fill a water pitcher at a spring. Disconsolate, Heracles leaves the ship's company to m ourn, and the author is spared trying to make the epic's challenges interesting when one member of the crew is an invincible demigod.

After setting sail, Heracles is missed, and a fight breaks out among the crew over whether or not to go after him. However, a sea god, Glaucus, appears and explains that Heracles has another fate to fulfill. Reconciled, the crew sails and rows on.

Book 2

As the sun rises and Book 2 begins, the Argonauts land at t he k ingdom of t he B ebrykians. \overline{A} eir king, A mykos, is in the habit of challenging all seafarers to a boxing match. Polydeukes, son of Tyndareus, king of Sparta, accepts the challenge. After an exchange of blows, Polydeukes' superior skill results in a blow that kills Amykos. His seconds r ush in to club Polydeukes, but the A rgonauts draw their swords, killing some and driving the others off. \overline{A} e Bebrykians discover that while they were w atching boxing, th eir en emy L ykos has le d h is sp earmen a gainst t heir u nguarded orchards and villages.

The Ar gonauts s ail o n a nd a t t heir n ext landfall visit Phineas, a blind prophet. Phineas is hounded by Harpies, who have been eating all of h is food. W hen the A rgonauts b efriend him, though, the messenger of the gods, I ris, swears that the Harpies will not trouble the old man f urther, a nd t he s tarving p rophet f easts with the seafarers. In recompense, he prophesies a s m uch as they are permitted t o k now about the balance of their voyage, and the reader ga ins a g uide to t he rest of t he p oem. A n interesting fac et o f t his part of the p oem involves the fact that, since the early tellings of the A rgonauts' s tory, the m ap t hat had c ontained u nknown, m ythic, a nd f abled bl ank spots d uring H omer's d ay had b een f illed i n with actual places—partly as a r esult of A lexander the Great's conquests. Apollonios therefore adjusts the details of the story to account for more ac curate contemporary geographical knowledge.

After further feasting and sacrifices, and following subordinate stories concerning local residents and myths of origin of the favorable Etesian winds. Ā e A rgonauts a gain emba rk, he eding Phineas's advice to carry with them a dove whose flight w ill l ead them b etween c lashing r ocks through the narrow and dangerous passage that marks the entrance to the Black Sea. A is tactic proves successful, and the dove shows the voyagers how to pa ss between rocks that open and close. As t hey r each the h alfway p oint t hrough t he clashing rocks, however, a w hirlpool s tops t heir forward pr ogress. $\bar{A}~$ ere t he v oyage w ould have ended had n ot t he goddess of w isdom, A thena, pushed the ship forward and free of the rocksthough the tip of the ship's poop is sheared off by the rocks' final clashing together. Athena's action has fixed the rocks in their open position so that the strait will be navigable thereafter. At least this is how A pollonios re conciles a ncient myth a nd geo graph cal fact.

 \overline{A} e crew congratulate Jason on having brought them th rough and r ejoice that the worst seems over. Ja son, h owever, fe els t he re sponsibility of command weighing heavily on him and confesses his concern that he will not be up to the task of bringing h is c rew s afely home. H e t akes he art, however, and the crew rows on through the night. At dawn the next morning, they enter the harbor at \overline{A} ynias, and there they catch sight of the enormous sun god Apollo, striding home from Lykia. Awestruck, t he m ariners build a ltars a nd o ffer sacrifices to "Dawntime Apollo," worshipping the god w ith s inging a nd d ancing. On t he t hird morning, they resume their journey.

Ā eir n ext l andfall i s a mong t he M yriandyni, the people who had raided the villages and orchards of the slain Bebrykian boxing king, Amykos. Ā e mariners are viewed as heroes and allies and welcomed accordingly. Ā e Myriandyni king, Lykos, sends h is s on, Da skylos, w ith t he s eafarers to assure their welcome a mong h is a llies further to the east. $\bar{\mathrm{A}}$ ough the Argonauts gain a companion, however, they lose two others. Idmon is killed by the c harge of a w ild b oar, a nd t he hel msman, Tiphys, succumbs to a sudden illness. Others take their p laces, ho wever, a nd t he s ailors o vercome their grief and sail on. Ap ollonios catalogues the places they pass and mentions the associated historical and mythic events. A ey pause to pay their respects and make a s acrifice, for instance, at the tomb of Sthenelos, the sacker of A ebes. A ey pass the delta of the Halys River in Assyria and the land of the Amazons, whose activities Apollonios briefly describes.

Ā e voyagers come at length to the island of Ares-a p lace p opulated by fierce b irds t hat launch their wing feathers like arrows at passersby. Ā e p rophet P hineas had tol d t hem t hat, despite the danger the birds pose, the Argonauts must put in here if their journey is to succeed. Accordingly, the men lock their shields together over their heads and, so protected, row for land. Apollonios rhetorically asks why Phineas wanted them to s top on Ares' Island and proceeds to answer the question. By chance, the two sons of that same Phrixos whom the winged, golden ram had b orne a way to K olchis ha ve b een s ailing westward w ith the intention of c laiming their inheritance at Å ebes. In order to bring them and the Argonauts together, the gods have arranged for Phrixos's ship to be wrecked near Ares' island. Ā ere the Argonauts encounter the four survivors of t he wreck-Phrixos's t wo s ons, A rgos a nd Melas, and two others.

All wonder at the divinely appointed meeting, and the Argonauts explain their mission, asking Argos and Melas to s erve as their guides to K olchis. A rgos and Melas are struck with horror at the p rospect of taking the Golden Fle ece. Bu t seeing the fearlessness and determination of the Argonauts, Argos and Melas agree to help them. \overline{A} ey set sail and at the end of Book 2 a rrive at the furthest verge of the Black Sea and the land of Kolchis.

Book 3

At the beginning of Book 3, Apollonios invokes the muse of the lyre, Erato, to inspire him, for he is a bout to s peak of love, and he is favored by Aphrodite. H e finds t he m use's na me " erotic," despite the false etymology. While the Argonauts remain in hiding among the reeds, the goddesses Hera and Athena conspire in a plan to assist them. Ā ey decide that Aphrodite (here known by her alternate name of Kypris) can help by making the princess Me deia fall i n l ove w ith Ja son. I n a delightfully humorous scene, the goddesses prevail on Kypris to have her son, Eros, shoot one of his love- engendering arrows into the bosom of Medeia. Kypris br ibes her s on to do i t with the promise of a splendid ball to play with. Eros goes off to accomplish his task.

In the meantime, the Argonauts hold a council to de termine how t hey may b est g o a bout t heir task. \overline{A} ey decide to s end a n e mbassy, i ncluding Jason, t he sons of P hrixos, and th eir K olchian companions to see if they can ga in the fleece by peaceful means. C oncealed from t he eyes of t he citizens by a fog sent by Hera, they march to t he palace of the king, Aiëtés. \overline{A} ere the sons of Phrixos en counter t heir m other, M edeia's si ster Chalkíope, and others, including the king and his daughter Medeia, soon join them.

Eros also sneaks into the assembly and, crouching at Jason's feet, sho ots a n a rrow d irectly i nto Medeia's he art. She i s i nstantly c onsumed w ith passion for t he hero. A rgos, t he s on o f P hrixos, introduces hi s companions and e xplains th eir mission, putting it in the best possible light. A iëtés, h owever, flies i nto a r age a nd ac cuses t he Argonauts o f h aving c ome to s eize h is t hrone. Jason assures him that is not his intention. A iëtés suggests that if Jason can prove himself by yoking Aiëtés' brazen- footed, fire-breathing bu ll o xen and by spending the day, as Aiëtés does—ploughing with them, sowing dragon's teeth in the furrows, and then fighting and overcoming the fully armed warriors who spring forth from the teeth then an d o nly th en will Aiëtés give Jason the Golden Fleece.

As J ason a nd h is c ompanions r eturn to t he ship, Argos, son of Phrixos, advises Jason to s eek magic help from Argos's young a unt, Medeia. In the meantime, Aiëtés holds a council of his own at which he promises death and destruction for the Argonauts, b lithely i gnoring Ap ollo's pre diction that h is o wn de struction w ould c ome f rom t he scheming of his offspring.

Apollonios ne xt t urns to describing the troubled dr eams of t he s leeping Medeia. I n them she foresees that she will cast her lot with the s trangers a nd g o ho me w ith J ason a s h is wife. W hen she a wakens, she ma kes s everal attempts to go see her sister to offer the strangers a id, b ut her c ourage f ails her e ach t ime. Finally a servant observes her irresolute behavior a nd i nforms her si ster, C halkíope, w ho comes to Medeia and enlists her on the side of the Argonauts. A pollonios do es a p articularly craftsman-like job in conveying Medeia's internal c onflict a s she si des a gainst her o wn k in with total strangers—even considering suicide as a means to end her anguish.

In the morning, however, Medeia prepares a potion to protect Jason from the bulls he m ust yoke and an elaborate plan for delivering it and deceiving her ma ids a nd c ompanions. F inally she and Jason meet and speak in private. Jason asks for the promised drugs, and she gives them along with detailed instructions for taming the bulls a nd ma king t he d ragon's-teeth w arriors kill e ach o ther. Ā us defeated, a dejected King A iëtés s links b ack t o h is palace, b rooding about how he might defeat the Argonauts.

Book 4

Apollonios begins Book 4—the final book of his epic—by i nvoking the d aughter of Z eus a s h is muse. \overline{A} is presents a bit of a problem since all the Muses as well as all the goddesses mentioned above thus far are the daughters of Zeus. Perhaps he means to invoke the aid of whichever of them can best resolve his difficulties as he undertakes to u nravel Me deia's mot ives i n ac companying Jason back to Greece.

Aiëtés feels sure that Medeia is mixed up in Jason's victory. Medeia feels very frightened, but the goddess Hera "stirs her to flee." She escapes to the shore, where she a ttracts the attention of the Argonauts, and they send a boat for her. After boarding, sh e c ounsels i mmediate flight a nd throws herself on Jason's mercy. He promises to marry her, and she u ndertakes to g et the Argonauts the Golden Fleece by putting its guardian serpent to sleep.

 \overline{A} e crew row as near as they can to the shrine where the fleece is kept; then Jason and Medeia go after it together. \overline{A} e serpent hears them coming and hisses so loudly that people all over the region a re frightened. Medeia's magic, however, hypnotizes the beast. J ason takes possession of the fleece, and the two retrace their steps to the ship, where Jason installs Medeia on the fleece as on a seat of honor. He arms the Argonauts and encourages them to weigh anchor and flee. In the meantime the Kolchians have answered Aiëtés' call to arms, and in a ma ssed force they speed along the riverbank in search of their enemies. When they become aware that the *Argo* has sailed, they make haste to launch their own ships in pursuit. Many hopelessly pursue the *Argo* by the same route the Argonauts had c hosen. O thers, ho wever, le d b y M edeia's b rother A psyrtos, cut off the fugitives and force them to pa rley. In this desperate strait, Medeia and Jason conspire to trick and kill Apsyrtos rather than risk having Medeia returned to her father. Apollonios interjects an address to the god of love, blaming him for all the grief to follow.

Medeia and her brother meet, ostensibly in private. However, just as she pretends to agree with her brother to de ceive the A rgonauts, Jason steps from h is hiding p lace and c uts d own A psyrtos while Medeia looks away. A torch signals the Argonauts, who bring their ship alongside the Kolchian ambassadors' s hip an d s laughter i ts oc cupants. \overline{A} ey then flee under cover of darkness. \overline{A} eir pursuit by the Kolchian fleet is hindered by Hera, who sends storms.

Ā e Argonauts' treachery, however, cannot go unpunished. Ze us d ecrees t hat they m ust b e cleansed by the witch Kirke (Circe) before they can get ho me. A pollonios u ses s everal d ifferent sources to construct a ro undabout route for the seafarers to follow home: A ey sail up the Danube R iver (here, the Ister) to Is tria, and thence south to the mouth of the Po (the Erídanós)—a river they follow into the territory oc cupied by the Celts. In reality, there is no confluence of the Po and the Rhone (the Rhódanos)-the river that the Argonauts follow back to the Mediterranean before coa sting western Italy a nd t hen c rossing to sail along the Egyptian coast. A ere is no reason to imagine, however, that A pollonios h ad a detailed knowledge of the geography of the Alps, or no logical reason to prevent his thinking that a confluence of rivers that seemed to come together might not have existed.

When the Argonauts do finally reach Kirke's home, M edeia a nd J ason p resent t hemselves a s wretched suppliants. But Kirke is utterly unsym-

pathetic a nd, t hough s he c omplies with Z eus's behest to purify them, soon sends them packing. Under the protection of various immortals, they now must follow the route that O dysseus would later na vigate o n h is r oundabout r eturn v oyage from Troy (see $\overline{A} e Odysse y$). Eventually they end up, as Odysseus also did, among the Phaiakians. Ā e K olchians ha ve a lso a rrived t here, a nd to avert f urther b loodshed, th e P haiakian k ing, Alkinoos, undertakes to decide the fate of Medeia. Since she is still a virgin, it looks as if he will return her to her f ather. To avoid that outcome, Medeia a nd Ja son get Queen A rete's advice a nd determine that the time has come for their wedding. With gods and nymphs in attendance, they plight their troth in a cave and consummate their union on a great marriage bed spread over with the Golden Fleece. Alkinoos finds in the newlyweds' favor and refuses to r eturn Medeia to her father. A fraid to report that o utcome to their king, t he K olchians suc cessfully ple ad to b e allowed to remain in Alkinoos's island kingdom of Phaiakia.

Ā e A rgonauts o nce m ore r esume t heir v oyage, but they are not yet fated to r eturn directly home. R ather, t hey a re d riven b y s torms to t he Libyan coast, where a flood tide beaches them so far i nland t hat t hey c annot ge t b ack to t he s ea. Just as they despair of ever seeing their homeland again, three local goddesses advise them that they must bodily pick their ship up and carry it inland until t hey e ncounter a bay. A ey f ollow t hese instructions, and for 12 days they march with the ship on their shoulders. Finally, exhausted and parched, they pray to the local goddesses to show them a source of drinking water. A e three again appear and advise them that a nother traveler-Heracles, as it turns out-has preceded them and found water. A e goddesses direct the Argonauts to the spring.

 \overline{A} eir jo urney ac ross the L ibyan s ands c osts the Argonauts a pair of comrades: On e dies by snakebite a nd a nother at the hand of a ho stile shepherd. Aristophanes (ca. 448–ca. 380 B.C.E.) Greek dramatist

 \overline{A} e most celebrated playwright of the Greek Old Comedy, Ari stophanes was b orn i n A thens b ut moved with his mother and his father Philippos to the island of Aegina during his childhood. By 427 b.c.e., however, he was back in Athens pursuing the vocation of playwright under an assumed name. A lthough his first comedy, *Daitaleis* (\overline{A} e Banqueters) ha s n ot su rvived, w e k now t hat i t won the second prize in the comic competitions that year and t hat it s atirized c itified ed ucation and its products.

In the Old Comedy, playwrights felt licensed even compelled—to include topical material and to attack contemporary politicians and their policies. \overline{A} is A ristophanes d id in his s econd pl ay, which is a lso l ost, e ntitled " \overline{A} e B abylonians." He apparently took issue with the repressive policies of the Athenian leader Cleon (d. 4 22 b.c. e.), particularly as they a pplied to C leon's threat to slaughter or enslave the inhabitants of the city of Mytilene on the island of Lesbos when it revolted against its Athenian overlords. Cleon was briefly a pop uhr figure among the Athenians for his resolution in pursuing the Peloponnesian War.

66 Aristophanes

Cleon was not amused at Aristophanes' satiric portrayal, and in 426 b.c.e., it seems he brought charges of high treason against the playwright, whom h e a lso fa lsely ac cused of h aving b een born a f oreigner. A ristophanes, ho wever, w as apparently untroubled by the demagogue's enmity as, in 425 b.c.e., still using an assumed identity, he brought to the stage the first of his surviving comedies, \overline{A} e A charnians. \overline{A} is w ork, wh ich argued for a peaceful resolution of the issues that had produced the long war, won first prize in that year's comis contest, suggesting that at least some influential A thenians had c ome over to A ristophanes' view of matters.

Perhaps enc ouraged by t his s uccess, A ristophanes dropped his pen name and under his own produced a v iolent i nvective a gainst C leon, against the faults of democratic government, and against the war—another first prize winner, $\overline{A} \ e$ *Knights* (424 b.c.e.). Aristophanes' most recent editor a nd t ranslator, J effrey H enderson, s ays that th e p laywright r egularly " promoted th e views" of the " conservative right"—landowners and old, wealthy families.

 \overline{A} e following year saw the production of \overline{A} e Clo uds, a nd i n t he y ear 4 22 b .c.e. c ame \overline{A} e Wasps. N ext, i n 4 21 b .c.e., t he c omedy Peace came to the stage, but no peace came to Athens. Here a six-year hiatus occurs in the record, though Aristophanes almost certainly continued writing and p roducing t hroughout t he p eriod. O ur knowledge resumes, however, in 414 b.c.e. with his p roduction of \overline{A} e Birds—a second-prize winner—ando ft he now-lost Amphiarus. \overline{A} e Birds is especially important in the playwright's development a s i t i ntroduces h is thereafter-continuing emphasis on the theme of a po Iti al utopia.

As the Peloponnesian War dragged on, and as polti al invective a nd s atire p roduced l ittle impact upon the decisions of a series of Athenian politicians with respect to the war, Aristophanes perhaps lost faith in the capacity of that sort of drama t o s way p olitical e vents. H is n ext pl ay, *Lysist r at a* (411 b.c.e.), represents a flight into utopian fantasy. At the same time, the play is an early d ocument in t he li terature o f w omen's liberation.

About the same time appeared $\overline{A} e \overline{A}$ esmophoriazusae (Women at the Thesmophoria)-a play departing from politics altogether and ridiculing the tragic playwright Eu ripides and his portrayal of wicked wives. About six years later (405 b.c.e.) c ame a play much beloved by 20thcentury a udiences, pe rhaps b ecause i t i s s et i n Hades: Ā e Frogs, in which Euripides' ghost figures prominently. After another gap in the record, this time of 13 years, there appeared another fantasy a bout the A thenian women s eizing p ower from the men: Women at the A esmophoria (also called \overline{A} e Assembly Women or \overline{A} e Parliament of Women). I n 3 88 b.c.e. a ppeared the last of the plays of A ristophanes s till i n e xistence: Plutus (Wealth).

We k now t hat A ristophanes w rote f urther comedies. Papyrus fragments of lost plays—almost 1,000 lines of them—survive, leading to a l ist in Henderson's edition of some 39 or 40 titles, including the plays we have and those whose names, at least, we know. We also know that the aging playwright continued to develop and change. We have direct evidence and critical accounts suggesting that toward the end of his career, A ristophanes introduced to the Athenian stage the sorts of plays that in the aggregate would become known as the New C omedy. I n Plutus, f or e xample, A ristophanes i nnovatively d ispenses with t he c horus, and in the lost play Cocalus, which was produced by h is s on A raros, he i s s aid to have introduced many devices in addition to those of rape and recognition (earlier u sed i n E uripides' Ion) t hat became standard in the New Comedy.

In his *Symposium*, Plato de picts Aristophanes a s a mong h is work's ba nqueters. Plato characterizes t he playwright a s g enial, u rbane, and intelligent.

Aristotle (385–322 B.C.E.) *Greek prose writer* A te acher, p hilosopher, and p olymath, A ristotle was among the deepest thinking and most influential of all philosophers through the ages.

A Macedonian by birth, Aristotle was the son of a physician who ministered to King Amyntas II of Macedonia—a connection that would later benefit the philosopher. When he was 22 y ears old, A ristotle mo ved to A thens to s tudy with Pl at o, whose pupil he remained until he was 42. On Plato's death, Aristotle moved to the Troadian community of Assos for three years, then on to Mytilene on the i sland of L esbos, where he remained until 344 b.c.e. In that year King Philip of M acedonia, the son of A ristotle's father's former e mployer, i nvited A ristotle t o b ecome th e tutor to h is s on A lexander. A ccepting, A ristotle occupied that office until 335 b.c.e., when Alexander, en route to b ecoming surnamed "the Great," set out on his conquest of Asia.

Returning to A thens, A ristotle f ounded a school of ph ilosophy i n a garden s acred to Apollo—the L yceum. O wing to h is practice of strolling about in deep discussion with his students, his school and its adherents became known as the Peripat etic school of philosophy. At the L yceum, A ristotle c ollected a subs tantial library of scrolls, founded a museum of natural history, a nd sha red h is t hinking w ith h is students.

Ā at thinking covered the entire field of human knowledge as it was then constituted. Over time, he came to disagree fundamentally with his former teacher, Plato. Whereas Plato had conceived of the nature of reality as understood by people to be the perception of a reflection of a reality that was constituted by i mmutable i deas, A ristotle came to think of the physical world as material, and he preferred methods that were more empirical t han P lato's. U nderstanding the n ature of reality required experiment, not merely reflection and d ebate. \bar{A} us, A ristotle w as r esponsible f or moving ph ilosophy i n t he d irection of n atural science.

Some of what survives of Aristotle's work was probably re constituted i n ancient tim es o n t he basis of the notes that his students took during his lectures a nd h is d iscussions with t hem. To t his class of his work belong his treatises on ethics (see Nichomachean Ethics, The) and on politics works probably collected and e dited, in the first instance, by his son Nicomachus and, in the second, by his student Eudemas.

 \overline{A} e w ork of A ristotlet hat m ost d irectly addresses the literary arena includes his *Poet ic s* and his *Rhetoric*. \overline{A} e *Rhetoric* reflects the de ep and abiding interest of the Greek world, especially at A thens, in the arts of public speaking and persuasion—skills crucial to exercising influence in a democracy. I treat the *Poetics* in greater detail elsewhere in this volume.

Beyond his forays into the literary realm, however, A ristotle's su rviving d iscussions add ress a daunting array of topics. In his Organon (six treatises on the science of reasoning), he establishes a series o f c ategories o r p redicates p urporting t o exhaust t he a nalytical s tatements t hat c an b e offered about a subject. Moving on to a theory of interpretation, he offers his views on the relation of l anguage t o t hought, a ccompanying t hose views with a discussion of grammar and an analysis of philosophical discourse. In the section of the Organon entitled "Prior Analytics," he makes what is probably his most important contribution to philosophy, his invention of the syllogism as a method for the e xamination of ph ilosophical questions. In the section entitled "Posterior Analytics," A ristotle p ropounds a t heory of k nowledge, addressing its definition, its acquisition, the way one can be certain of its truth, and the way knowledge can be expanded and systematically arranged. À e Organon also contains Aristotle's discussions entitled "On Sophistical Refutations," "On Coming to Be and Passing Away," and "On the Cosmos."

From the point of view of the modern discipline of p hysics, A ristotle's title *Physics*, as his

translators Philip H. Wicksteed and Francis M. Cornford suggest, is misleading. In *Physics*, Aristotle's principal interest is the realm of nature and natural p hilosophy. E verything t hat m oves o r undergoes change concerns him here. In his discussion, h e ra ises s uch q uestions a s "What i s motion?" "What i s t ime?" or "What does o ne mean by 'becoming'?" He c onsiders t he d ifferences between mind and matter and the nature of the f our G reek elem ents: e arth, a ir, fire, and water. He also examines the issues of whether or not change is purposeful, and, if it is purposeful, does t hat i mply t he n ecessity f or a t heology to explain the physical world and its processes? He thought it did.

In his work *On the Heavens*, Aristotle begins his description o f a t heory o f t he u niverse t hat remained ge nerally c redited, a t le ast f or l iterary purposes, until the 17th century c.e. (He completes the description in his *Metaphysics.*) He describes a finite, spherical universe with the earth at its center a nd b ounded b y t he fixed s tars. B eyond t he universe, only the incorporeal—probably divine—can exist. Moving inward from the fixed stars, we find a series of n ine c rystalline spheres that turn like a system of gears, impelled by a force called (in Latin) the *primum mobile*—an u nmoved o r first mover. I mbedded i n e ach sphere a re st ars, o r a planet, or the sun, or the moon.

Little esca ped b ecoming an object of Aristotle's close consideration. Å e weather and phenomena that he considered related to it received his attention in h is *Meteorologica*, in which he examined topics studied in modern meteorology, such as snow, rain, storms, rainbows, and the aurora borealis. Beyond this, his work addressed some of t he co ncerns of mo dern a stronomy: shooting stars, comets, and the Milky Way. Elements of geology also piqued his interest, and in *Meteorologica* he w rote a bout e arthquakes, coastal erosion, and the origin and s altiness of the sea.

Aristotle considered questions connected with the e xistence, n ature, a nd su rvivability of t he individual h uman s pirit in hi s e ssay " On t he Soul." H e a lso lectured on " Sense a nd S ensible Objects," " Memory a nd Re collection," " Sleep and Waking," and "Dreams," and he c oncerned himself with the topic of "Prophecy in Sleep," in addition to considering "Ā e Length and Shortness of L ife," " Youth a nd O ld A ge," "L ife a nd Death," a nd "Re spiration." H e de voted f urther attention to the last-named subject i n h is e ssay "On Breath."

Animals attracted A ristotle's en during attention, and his studies of and reflections on them, their history, their parts, their movements, their progression, a nd t heir g eneration o ccupy five bilingual books in a 23-volume modern e dition of his work.

Partly b ecause o f A ristotle's p roductivity, some works have become traditionally associated with his name even though they were actually written by anonymous members of the peripatetic school of ph ilosophy that he had founded. Such w ritings include m ost o f the 3 8 b ooks (scrolls) included in the collection entitled *Problems*. Among many other matters, these address such to pics a s " chills a nd sh ivering," " sexual intercourse," "harmony," and the physical effects of eating fruit.

In the 14 books of his *Metaphysics*, A ristotle undertakes to apply his extraordinary logical and analytical abilities to developing a theology that underpins physical reality. As one of Aristotle's modern e ditors, Hugh T redennick, obs erves, i n this attempt, Aristotle ironically ends up with a position that closely approximates the thought of his teacher, Plato—a p osition t hat A ristotle had long since rejected. In essence, he r efutes a c entral principle of his entire philosophic p osition. As a materialist, A ristotle was committed to t he precept t hat no for m c an e xist w ithout matter. But i n t he final a nalysis, h is c onception of t he supreme a nd u nderlying m etaphysical r eality turns out to exist in immaterial form.

A series of ethical works appears among those traditionally assigned to A ristotle. Two of these, \bar{A} *e Nicomachean Ethics* and \bar{A} *e Eudemian Ethics*, are generally accepted as genuinely A ristotelian. H is son N icomachus edited the first f rom Aristotle's notes. \bar{A} e second was probably writ-

ten from lecture notes taken by Aristotle's student Eudemus of Rhodes, a c elebrated philosopher in his o wn r ight. M odern s cholarship at tributes other ethical writings associated with A ristotle's name, such as the *Great Ethics*, the *Tract on V irtues and Vices*, and several other minor works, to anonymous members of the Peripatetic school.

While A ristotle's Nichomachean E thics explores the nature of human character, his Politics examines the science of human welfare and happiness and the role of the state in securing those b enefits. \overline{A} e s tate is d ifferent f rom the family, but it nonetheless springs from aggregations of families. Various constitutional arrangements characterize d ifferent states—principally monarchy, oligarchy, and democracy—but in all of t hem, c itizenship i mplies a w illingness to participate i n the s tate's decision-making a nd judicial pro cedures. L astly, A ristotle t urns h is attention to describing ideal politics, imagining the best sort of constitution and prescribing the characteristics of education for citizenship.

Like m any a nother a ncient v olume, a w ork of Aristotle's that had been lost for millennia surfaced at Oxyr h ynchus in 1890. \overline{A} is work, " \overline{A} e Polity of the Athenians," once belonged to Aristotle's otherwise lost private collection of 158 constitutions of ancient city- states. Among his other lost records is a list of dramatic performances acted at Athens.

Arrian (Flavius Arianus) (ca. 86–160 c.e.) Greek prose writer

A provincial Greek from Bithynian Nicomedia, Arrian studied philosophy with the Stoic Epictetus (see Stoicism) and later became an officer in the Roman army. He attracted the favorable attention of the Roman emperor Hadrian, was promoted to the senatorial aristocracy of the empire, and eventually rose to b ecome consul and legate in the province of Cappadoccia.

As a literary figure, A rrian is credited with having published the lectures of Epictetus, which he had apparently memorized as Epictetus delivered them, and summaries of the same lectures or ganized into a little guide to Stoic philosophy. Beyond that, on the model of X enophon of Athen's *Anabasis*, he published a memoir of Alexander the Great. Still in the manner of Xenophon, Arrian prepared a treatise on the subject of hunting that purported to take account of new methods and technology and to bring Xenophon's similar discussion up to date.

Also interested in geography, Arrian prepared a guide (*Periplous*) to the region around the Euxine Sea as well as a commentary on India, *Indika*, of which a portion survives.

Art of Love, The (Ars Amatoria) Ovid (ca. 1 c.E.)

In \overline{A} e Art of Love, Ovid undertakes to instruct both the male and female libertine population of Augustan Rome in the intricacies of finding and winning beloveds and lovers. \overline{A} e poet ad monishes r espectable p ersons a gainst p erusing h is pages; n onetheless, the e mperor, A ugust us

70 Art of Love, The

Ca esar, apparently did so with disapprobation. \overline{A} e emperor's displeasure with this work, however, was not the cause of Ovid's imperial exile to Tomi on the Black Sea.

First O vid i nstructs would-be lovers a bout what v enues t of requent i n t heir que st f or beloveds. \overline{A} eaters a re es pecially l ikely p laces and are fatal to c hastity. He establishes the long Roman t radition of s eeking b eloveds a t en tertainments by recounting the rape of the Sabine women i n t he time of Ro mulus. Horse races i n the Circus Maximus p rovide m any l ikely oc casions for the sort of gallantry that leads to amatory dalliance.

For a time, O vid explores the forbidden passions of women for near kin and for such bestiality as the unnatural passion of the Cretan que en Pasiphae for a bull. Ā en he returns to more ordinary circumstances.

Ovid a dvises a would-be lo ver to b ecome acquainted with the handmaiden of the object of his affections and to sub orn the servant's loyalty without making the maid the object of the lover's quest at t he s ame t ime. B egin, he adv ises, with the mistress. Ā en, if one is also interested in the maid, p ursue her l ater. H e c ompares t he lover's quest with hunting and fishing.

À e p oet warns would-be lovers a gainst g old diggers. Rather than sending presents, Ovid recommends, love rs s hould s end le tters w ritten on wax tablets. He also advises men to a void being too well-groomed, but rather to s eem clean and casually h andsome. H e also g ives advice f or seduction a t co nvivial parties—principally to seem d runk wh ile s taying s ober, to p raise t he beloved, and to promise her anything since Jupiter, himself a n otable philanderer, "smiles at the perjuries o fl overs." O vid finds re ligious b elief "expedient" for would-be lovers. He sprinkles his advice w ith ma ny e xamples d rawn f rom t he annals of mythology.

Controversially, O vid a dvises the use of force as a tool of seduction—again supporting his arguments w ith app eals to suc h s tories a s t hat o f Achilles' forcing himself upon Deidamia and thus obtaining her lasting affection. Beginning the second book of his *Artis Amatoriae* with accounts of his own success, Ovid shifts to r ecounting t he s tory of Dae dalus a nd Icarus and their escape from Crete on the wings of Daedalus's invention. \overline{A} e poet also details the way t hat, he edless of h is f ather's adv ice, I carus flew too near the sun, melted the wax that glued on his wings, and plunged to his death. \overline{A} e moral of t he s tory for love rs e merges: M inos, k ing of Crete, despite his power over land and sea, could not keep a winged man like Daedalus from escaping through the air. \overline{A} e poet, however, means to keep the winged god, Cupid, under his control.

Avoiding a nger, says O vid, is a p rincipal means of m aintaining a love relationship s ince mistresses g et e nough of quarreling at home. Love i s none theless a k ind of warfare, says the poet, and a lover must employ similar tactics and strategies. Continuing his advice, Ovid discusses such sub jects a s h ow to ach ieve r econciliation when a lover h as pr ovoked h is m istress's a nger and jealousy.

Above a ll, O vid c ounsels s ecrecy. A l over should neither tattle nor brag. After praising the joys of m utual fulfillment, Ovid a nnounces that his task is finished, and that lovers ought to award him p alm leaves and myrtle crowns for his services t o them. \overline{A} e p oet t hen p romises w omen similar favors.

As he begins the third book of his work, Ovid once more e mphasizes t hat he a ddresses on ly "wanton lo vers," a nd t hat r espectable w omen, like Ulysses' wife P enelope, a re n ot m embers of his intended audience. But those women who do belong to the class of the dem imonde must bear in mind the doctrines of the philosophy of seizing the day (carpe diem). Too soon, old age will rob them of their charms.

Ovid offers advice on the care and preservation of beauty. He suggests that certain hairdos go best with certain shapes of face, and he advises those who are graying to use hair dye. Keeping one's teeth their whitest is also essential.

Short women show themselves to b est advantage when they lie or recline. \overline{A} in women should wear full, heavy- textured garments. Pale women should wear colorful clothes that show their complexions to advantage. Narrow bosoms should be padded. O vid offers adv ice o n w alking a nd o n draping g arments s o t hat a little skin shows alluringly. He a dvises women to le arn to si ng and to play suitable ga mes. A s he h ad done for the men, he suggests venues appropriate for seeking lovers.

Ovid is fair-minded as he advises women about a matory matters. He i nstructs t hem to avoid the very men for whom the first two books of \overline{A} e Art of L ove proffers advice. If, however, a woman h as taken a lo ver, O vid c ounsels her to address h im as "she." Women should a lso avoid appearing melancholy; lo vers do n ot fancy melancholy mistresses.

Changing subjects, Ovid declares that, just as a lawyer's business is the law, a poet's business is love. \overline{A} erefore, women should be kind to poets. \overline{A} ey s hould a lso e ncourage t heir lo vers' a rdor by a ssuring t hem t hat r ivals for t heir a ffections exist.

 \overline{A} e p oet a lso i nstructs w omen i n t he a rt o f deceiving a ny w atchers t heir h usbands ma y s et over t hem. L etters w ritten i n i nvisible i nk made from milk exemplify such a tactic. Others include messages composed in the bath and concealed in one's bosom. Watchers, moreover, can be drugged, Ovid suggests.

Ovid interrupts his advice to women to recount the m onitory e pisode of Pr ocris, w ho became jealous of the breeze when she heard her husband call upon it by its name, Aura. \tilde{A} inking the cooling w ind h er r ival, the jealous P rocris followed her husband Cephalus on the hunt and surprised him in the bush. \tilde{A} inking her an animal, Cephalus a ccidentally s lew her. A void je alousy, O vid implies.

Returning to his task, Ovid advises women to delay g ranting t heir lo vers t heir f avors. W hen delay is past, however, he offers advice concerning t he p ositions t hat w omen o f d ifferent si zes and shapes m ight m ost e ffectively ch oose f or lovemaking. He concludes by advising his female pupils t o a cknowledge h im b y h is name— "Naso"—as their master.

Art of Poetry, The (Epistles 2.3) Horace (ca. 19–18 B.C.E.)

Written a st he G olden A ge of L atin p oetry was ending a nd add ressed a s a v erse le tter to h is friends, the Pisones, Hor ace's \overline{A} e Art of Poetry contains his advice to a rising generation of poets. \overline{A} at a dvice, a s w ell a s s ome of Hor ace's o wn poetic practice, does not seem to have been entirely original with the author. A lthough H orace i s universally recognized to have been Rome's premier poet, both his satiric method and his critical advice were modeled on the example of the earlier Roman poet, Lucil ius.

 \overline{A} e centerpiece of book 2 of his Epist l es, \overline{A} e Art of Poetry is Horace's longest poem. He begins by drawing a comparison between poetry, painting, and s culpture. All r equire unity of subject matter, simplicity of treatment, and the harmonious subordination of the parts to the whole. Horace grants that artists have license to embroider nature, but they must nonetheless give unity and credibility to their creations. Helists a series of pitfalls t hat e ndanger hi s own p oetic practice: Brevity can lead to obscurity; grandiloquence can become bombast; caution can produce too modest a result. Writers should also write about what they know a nd a ddress t opics t hat are within their capacity to handle. Language changes, so young poets sh ould n ot a lways em ulate t he s tyle a nd vocabulary of old er one s but s hould a dopt ne w terminology as their own. It is also important to select a poet ic f orm o r meter t hat su its t he subject.

As regards dramatic poetry, tragedy requires a higher style than comedy—though even comedy can rise to a nger, a nd tragedy can descend to the expression of grief in prose. "E ither follow tradition," H orace adv ises, " or i nvent w hat i s self-consistent."

Modern diction is important. Od- fashioned language will provoke la ughter where none is intended. Stay focused on the story so that the beginning, middle, and end all work together. Moreover, i f p oets a re p enning d rama, t hey must b e c areful to a ssign at tributes to t heir characters t hat are suitable to the characters' ages and situations in life. He advises dramatists to develop their plots through action rather than having characters report offstage developments. Taste, ho wever, a ssigns l imits t o w hat the dramatist should portray. Medea's murder of her own children (see Medea), metamorphoses from human to a nimal or serpentine form, or Atreus's preparing human flesh as a banquet (see Agamemnon) a re ma tters b est m erely described. A el anguage, to o, should su it t he subject, and verse forms must be appropriately selected.

Horace suggests that his contemporary Roman playwrights m odel t heir w ork o n t hat o f t he Greeks rather than such a Roman author as Pl a utu s. Ca reful d iscrimination, h owever, b etween "coarseness and wit" and close attention to suiting the meter to the matter are more important than imitating models. Tasteful innovation is desirable. Wisdom is the fountainhead of art.

Contrasting t he Gr eeks a nd t he Ro mans, Horace s uggests that while th e G reeks s ought glory, the Romans are too concerned with t he acquisition of wealth. He r eminds the P isones that the object of poetry is both "to please and to instruct." If anything in a poem falls short of excellence, the entire effort fails. \overline{A} at being the case, Horace advises h is friends to s eek expert criticism and to revise *before* allowing publication of their verse. On e cannot call back what has once been published.

Horace t races t he d istinguished hi story of poetry from the civilizing effects of the verse of the archetypal bard, Or pheus, through Tyr t a eus a nd Homer, to P indar, Simonides of ce os, and Bacchilides, to its connection with religious festivals. He s ays that poets have no call to be ashamed of their craft.

Horace states t hat an honest critic who carefully c orrects a p oet's w ork i s a m uch b etter friend to the artist than someone who prefers not to offend by finding trifling errors or infelicities. At t he s ame t ime, he c ompares bad p oets w ho insist o n r eading in p ublic t o blood-sucking leeches.

Atellane fables or farces (Ludi Osci)

A mode of drama indigenous to the Oscan city of Atella in the vicinity of Naples, the Atellane plays may at first have been ex temporaneous p erformances. \overline{A} ey continued to be played in the Oscan language until they migrated to the city of Rome. \overline{A} ere t hey c ommanded a w ide a udience lo ng after L ivius A ndronicus i ntroduced re gular drama to Rome and Roman playwrights began to emulate the classical drama of Greece.

Standard Latin soon replaced Oscan in these little plays, and a c ustom a rose that p ermitted respectable you ng Rom ans, e ven t hose of t he patrician class, to participate as players. Like the later Italian commedia dell'arte, (the comedy of the gu ild) A tellane f arces see m to have had a stock set of cha racters that a ppeared in t raditional costumes. On e such stock character was Mappus. H e w as p resented a s ha ving a l arge head, a long nose, and a humped back. Another was called Pappus. Ā e classicist J. J. Eschenburg speculates that Pappus may have been borrowed from a Greek stock character, the old man called Silenus. \overline{A} e p opularity o f A tellane f arces a nd t he financial opportunities that writing them re presented e ncouraged p laywrights wh o were s uccessful in other genres—like the poet Memmius (d. 4 6 b.c.e.) and the fabulist Sylla—to try their hands at composing the farces. \overline{A} ose who seem to have enjoyed the most success with the genre and who raised A tellane farces to l iterary status are Q uintus N ovius a nd L. Athanasius, St. (ca. 295–373 c.e.) Roman-Eqyptian writer

Probably b rought up i n an E gyptian C hristian family a nd ed ucated i n both classics a nd S cripture with a priestly c areer i n m ind, A thanasius was ordained as a deacon around 318 by the patriarch of Alexandria, St. Alexander. \overline{A} is patriarch was t he o rthodox c lergyman w ho o pposed t he Arian heresy contesting the dogma that Christ the Son and God the Father were of the same divine substance. A lexander i n fact ex communicated Arius himself.

In 325, Athanasius accompanied Alexander to the Council of Nicaea, where the orthodox view held by A lexander p revailed. A lexander na med Athanasius his successor, and despite some opposition, the Egyptian bishops confirmed the choice. However, c aught in a b acklash led by A rian bishops, Athanasius found himself exiled by the emperor C onstantine to n orthern G aul. On assuming the imperial throne, Constantine II recalled A thanasius a nd re stored h im to h is episcopal dignities, but h is enemies again prevailed and deposed him. Athanasius complained, but, despite exoneration from the charges his enemies brought against him at the Council of Tyre, the A rians w ould n ot a llow h is r estoration a t Alexandria. As a result, he remained in the West for a considerable period.

In Gaul and Italy, A thanasius encouraged the institution of the church and spread of monasticism. \overline{A} e de ath o f h is p rincipal adv ersary i n Alexandria, the usurping bishop Gregory of Cappadocia, and the support of the Roman emperor of the West, Constantius II, enabled A thanasius to r esume h is e piscopal s ee i n 3 46, a nd f or a decade he was able to work productively, relatively free from dissension. He used the time he had for writing to c ompose d iscussions of the issues in the theological dispute about which he felt so strongly; *On the Decrees of the Nicene Synod* and *On the Opinion of Dionysius of Al exandria* were produced during this period.

When the emperor C onstantius d ied i n 3 61, however, Athanasius's enemies began once more to plot against him. Ā eir agitations over the next few ye ars c ulminated i n A thanasius's forcible removal from his church by a squad of soldiers. Eluding their vigilance, he escaped to the desert, where, aided by loyal supporters, he ma naged to continue his ministry while a fugitive. From a literary perspective, this was also a productive time for Athanasius. He penned a s eries of *Discourses against the A rians* and a h istory of their m ovement. H e also w rote h is famous *Life of Saint Ant hony* and a pair of epistles, *Letter to Serapion* and *Letter to Epictetus*.

As a staunch traditionalist who believed in the orthodoxies of the Western Church, A thanasius found ludicrous the proliferation of creeds under the general r ubric of C hristianity. I n h is w ork *De Synodis* (About synods), he derided this still-continuing tendency of churches to splinter. After more vicissitudes in his status that varied as the rulers did or did not favor his point of view, and after further exiles, Athanasius resumed his epis-copal throne for the final time in 364 and successfully passed it along to his designated successor, his brother Peter.

Given this history of hardships and his unwavering devotion to t he orthodoxy e stablished by

74 Atharva-Veda

the C ouncil of N icaea, it c omes a s n o su rprise that the b ulk of A thanasius's wr itings a ddress related issues. In *Discourses against the Arians*, he argues the issues involved in the orthodoxy dispute. Central among these was the question noted above c oncerning t he id entity of C hrist's s ubstance with that of G od the Father. A thanasius also wrote a discourse entitled *Two Books against the Pagans*. Another work discusses the question of the divinity of Christ and the Holy Spirit: On *the Incarnation and against the Arians*.

Other w orks c oncerning C hristian dog ma appear in a series of letters that Athanasius wrote. Interested readers will find some of these in the bibliography below. As an author, however, Athanasius i s b est r emembered f or f ounding a n ew genre. In his Life of Saint Anthony, he established the model of C hristian b iography as a n a scetic journey t hrough l ife i n t he s teps o f C hrist a nd helped to spread the monastic ideal. To that new genre-one t hat b ecame the model f or a flood of subsequent works-Athanasius himself added two similar works that he c alled letters, writing one to "the Monk Amun" and a nother to "D racontius." Other less-biographical works a re a lso called letters and are of a m ore usual epistolary nature. One such letter is of special importance because it contains an early list of the canonical works of the entire Christian Bible. Beyond that, Athanasius penned such scriptural exegesis as his interpretation o ft he P salms i n h is Letter t o Marcellinus.

A si zable b ody of work purporting to be by Athanasius h as yet to b e a uthenticated. Am ong the a uthentic w orks, s ome of those that argue quite a bstruse t heological p rinciples may s eem circular i n t heir log ic to p ersons w ho do n ot already share Athanasius's convictions. His work lent special impetus to monasticism and to many Christians' deciding to live lives of c hastity a nd asceticism.

Atharva-Veda (original form ca. 1000 B.C.E.; current form ca. 200 B.C.E.)

Ā e Atharva-Veda is a c ollection of very ancient hymns of India whose singing seems often to have been the special responsibility of a subcategory of Hindu soothsayers—usually those em ployed a s court ma gicians. Ma terials c ontained i n t he Athara- Veda often also appear elsewhere in Hindu religious texts. Priests of the Atharvan sect made extravagant claims for the place that the Athara-Veda o ccupies i n the Hindu c anon; t hey s ometimes c all i t the B hrama-Veda, o r t he H ymn of God. A ough the composition of the work is traditionally a ssigned to V ya sa, t he le gendary author of the Mahabhar at a, the Atharva-Veda is clearly the product of a long process of literary accretion, and while a h istorical Vyāsa may be responsible for s ome of it, other-likely many other-voices produced its songs over centuries.

 \bar{A} e first g roup o f h ymns i n t he do cument includes medicinal charms against fever, jaundice, coughing, constipation, and numerous other indispositions the flesh is heir to. Some of the charms are s upposed t o be cha nted o r s ung a long w ith administration of medicinal herbs to restore health. \bar{A} ere a re a lso s ongs to b e su ng to p rotect c attle from b ovine di seases and c harms to be r ecited against snakebite a nd p oisonous i nsects. In addition, there are charms meant to en hance personal appearance and allure. Among these we find a pair intended t o p romote h air g rowth, a nd a nother charm to promote virility. Charms against psychological afflictions like mania and all those attributed to demonic possession are also included. Incantations designed to achieve longevity and health appear in the Atharva-Veda's s econd s ection, and another round of curses against demons occupies the third. \overline{A} e fourth s ection c ontains charms for acquiring a wife or a h usband a nd charms to promote conception, assure male progeny, ma ke w omen ster ile, p revent m iscarriage, and promote a n easy childbirth. Several charms address finding one's b eloved a nd a ssuring passionate lovemaking.

 \overline{A} e fifth section of the Atharva-Veda contains a series of ch arms specifically p ertaining to r oyalty. \overline{A} e sixth addresses obtaining harmony and avoiding conflict. A fter that, the fairly long seventh section contains charms aimed at assuring prosperity and avoiding thieves, loss by fire, and loss by accident. A specific charm is designed to p rotect shepherds and their flocks from thieves and wild beasts.

In t he eighth s ection w e find i ncantations designed to a ssure f orgiveness f or si ns a nd to cleanse t hose w ho ha ve b een r itually de filed. \overline{A} en there a re charms to w ard off birds of evil omen a nd to avert bad o r i nauspicious d reams. \overline{A} e ninth section provides a series of prayers and curses designed to benefit Brahmans—the priestly class of Hinduism.

While each of the foregoing sections is of great so cological, historical, and religious interest, one might argue that the 10th section of the Atharva-Veda is r eally the most gripping of all. Here the hymns deal with the creation of the universe and with the e florts of t he Br ahmans t o est ablish direct contact with the divine through revelation, contemplation, and prayer.

 \bar{A} e hymns are accompanied by books of ritual and by commentary.

"Attis" (Poem 63) Catullus (ca. third century B.C.E.)

Considered b y the l iterary h istorian Q uincy Howe, Jr., to be one of the most "technically brilliant poems" in the Latin language, "Attis" d isplays the serious, most moving side of Cat ull us's art, r ecounting a t ouching s tory of s exuality, madness, and regret.

Based on the myth of At tis, the 99-line poem (the 6 3rd of the poet's surviving works) is connected with the worship of the Asiatic fertility goddess Cybele, also known as Agdistis, who was the earth mother or great mother. A ccording to her myth, Cybele/Agdistis had b een b orn physically bisexual. Intervening, the gods removed her male appendage, leaving her female. From the severed male organ grew a lovely almond tree.

Nana, the d aughter of a P hrygian r iver g od, the S angarios, admired t he blo oming t ree a nd pressed a blossom in her bosom. It vanished, and Nana found herself pregnant. \overline{A} e manner of his conception led to Nana's infant child, Attis, being abandoned t o d ie. Cy bele/Agdistis, ho wever, loved the boy and inspired a male goat to supervise the baby's survival.

When he grew to manhood, Attis fell in love with a wood nymph and provoked the jealousy of the goddess who had mysteriously protected him. Cybele drove him mad so that he became one of her p riestesses b y c astrating h imself. It i s j ust before t his that C atullus t akes u p t he ma tter, focusing on the behavior, emotions, and thought processes of the principal characters.

As the poem opens, a reader finds Attis in his madness sailing on a sh ip to the sacred grove of Cybele. Ā ere in h is frenzy he c astrates h imself and b ecomes a p riestess of C ybele's c ult. F rom that moment for ward, the pronouns a lluding to Attis become feminine.

Adopting the role of the priestess of A gdistis Cybele, Attis calls the worshippers together and,

chanting, l eads t he w ild c eremony o f w orship. She continues her frenzied behavior until she and the o ther w orshippers si nk i nto e xhausted slumber.

Attis aw akens i n her r ight m ind a nd r egrets the r ashness of her ac t. She m isses her pa rents and th e ho meland f rom w hich she s ailed a nd finds her current situation "wretched." She recalls her former manly athletic ac complishments a nd sweet leisure. Now she finds herself the hopeless, unwilling, e masculated slave o f h er pa rent goddess.

Cybele, however, o verhears he rl ament. Angered, the g oddess u nleashes the l ions that draw her chariot—lions of her retribution. One of them charges the brooding Attis, whose madness returns as she flees into the forest where, Catullus says, Attis remained a slave until the day she died.

Ending t he poe m with h is own p rayer to Cybele, Catullus, who was sometimes the victim of h is own passions, prays that the goddess will "drive others to such frenzy," leave his heart free, and stay far away from his home.

Augustine, St., bishop of Hippo (354-

430 C.E.) Roman-African prose writer, Christian theologian

Augustine, who was destined to become ancient Christendom's most distinguished and influential literary figure, was born in \overline{A} agaste, a highland town i n t he N orth A frican Ro man p rovince of Numidia (our c ontemporary Souk A hras, A lgeria). A ugustine's pagan father, Patricius, worked hard and sacrificed much to give his son the classical education required to r ise above his father's station. Despite the constant sacrifices that Patricius made, h is death in 372 required Augustine to interrupt h is university education for a period before a w ealthy lo cal d ignitary, Ro manianus, came to h is assistance.

Augustine's a utobiography, Confess ions, reveals that his mother Monica principally influenced his development. Also a saint of the Roman Catholic Church, Monica was a traditional Christian of a very conservative, A frican s tripe. She believed, for example, that her d reams concerning Augustine's future were prophetic. Augustine did n ot a lways a ppreciate M onica's ma nner o f mothering. When he was 28 years old, for instance, he sneaked off to Rome without telling her rather than face her disappointment at his desertion. In addition to b eing t he do minant figure i n h er household, Monica was both long-suffering and patient. She p ut u p w ith her h usband's i nfidelities, paganism, and folly until at last he became a good husband and a C hristian who appreciated her.

Augustine completed his university education at C arthage, where he b ecame a d evotee of t he most r adical of the h eretical o ffshoots of t he Christian r eligion, t he Ma nichaeans (see M a nichaean w r iti ngs). He would profess that allegiance for s ome years, u ntil a bout t he t ime he moved to Rome.

Augustine taught for a time in Å agaste, then returned to Carthage, where he taught r hetoric until 383 c.e. While living in Carthage earlier, in the year his father died, Augustine had formed a relationship with a woman. A ere were degrees of wedlock in ancient Rome, and the second-degree marriage t hat A ugustine co ntracted w ith h is spouse was effectively a form of concubinage-a relationship that, though it had legal status, could easily be d issolved. A e w oman, w hose na me Augustine never mentioned in Confessions, bore him a much beloved son, Adeodatus (a name that means "God's g ift"). A ugustine l ived w ith t he woman u ntil the year 385. A en, as the Roman law allowed, he sent her a way to free himself to contract a n ad vantageous first- degree marriage with the daughter of a wealthy family. A at marriage never took place, however.

After moving to Rome in 383, Augustine made friends wi th Q uintus A urelius Symmachus, another immigrant to the city, and in 385 Monica joined her son there. Symmachus, then prefect of Rome, appointed his friend Augustine to become the p rofessor o f rhe toric a t t he u niversity i n Milan—a role that also involved operating as an imperial press agent, for Augustine was expected to spread official propaganda. Symmachus needed a non-Catholic for the position. He had t ried and failed to convince the e mperor to a cknowledge the old religion as well as the Christian religion, an d t he u sual i ll f eelings t hat a rise f rom arguments about religion were dividing the citizens of Milan.

As a professor, Augustine had expected secular success. He had n ot a nticipated that h is position would bring h im into contact both with the philosophy of Neoplatonism and also with the second most i nfluential p erson i n h is l ife, t he Ro man Catholic bishop of Milan, St. Ambrose.

Under t he i nfluence o f P l at o's f ollowers, Augustine rejected the Manichaeans. Ā en, convinced by the cogency of A mbrose's sermons, he converted to ma instream Ch ristianity i n la te August 3 86. S hortly t hereafter, A ugustine le ft Milan for a while, returning the following March, and in April 387 he was baptized. He had already begun a n a mbitious pr ogram o f w riting t hat would occupy him for much of the rest of his life.

Many of Augustine's writings, of course, concerned r eligion, a nd he w rote a gainst N eoplatonism. \overline{A} e life of the blessed, divine providence and the soul's immortality were among the subjects that occupied his mind and his pen in 386–7. In t he l atter y ear, he a lso b egan w riting a bout music. \overline{A} at same year, his mother died in Ostia and w as i nitially i nterred t here. C anonized a s Saint Monica, her relics now rest both in Rome in the church of San Augostino, and in an Augustinian monastery near Arras, France.

In 388, Augustine turned his attention to subjects t hat i ncluded t he s oul's g reatness a nd t he problem of re conciling f reedom o f the h uman will with the d octrine of d ivine omniscience especially divine foreknowledge with differences in Christian and Manichaean views of life and death. \tilde{A} at year, too, he returned to Africa, going first to Carthage and then to \tilde{A} agaste.

In 3 89, A ugustine w rote a bout te aching a nd about the true religion. \overline{A} e following year, 390, brought twin disasters: the deaths of Augustine's close f riend, N ebridius, w hom he had k nown from c hildhood, and o f his much-beloved s on, Adeodatus.

In 391, Augustine moved to the North African seaport city of H ippo R egius, where he m eant to establish a monastery. While that work was beginning, he still found time to write. \overline{A} e advantages of religious belief occupied him for a while. \overline{A} en in 391–92 he turned his attention again to his continuing examination of t he p roblem of f ree w ill and t o t aking up t he c udgels a gainst t he Ma nichaeans once again. \overline{A} e year 392 saw Augustine's debate a gainst the Ma nichaean ap ologist, F ortunatus, and he completed his commentaries on the first 32 Psalms. Commenting on the others would take him until the year 420.

A sermon that Augustine gave at the Council of Hippo in 393 addressed the subjects of faith and the Christian creed. Ā e next year saw his commentary on a nd e xplanation of C hrist's S ermon on t he Mount a s well as a series of lectures at C arthage explaining P aul's letters to t he Ro mans a nd t he Galatians as well as examining the subject of lying.

If A ugustine was still entertaining the notion of a retired monastic life, his appointment as bishop of Hippo in 395 ended that ambition. It did not, however, seem to interfere with his ambitious program of c omposition. S everal re ligious t reatises that included the first part of his famous *On Christian Doctrine* (completed in 426) were written in 396, a nd 397 s aw t he b eginning of A ugustine's remarkable a utobiography a nd p erhaps h is most celebrated work—his *Confessions*.

Further w orks i n 3 98–99 o pposed t he Ma nichaeans, while another commented on the Book of Job. Augustine also wrote an educational treatise on how one could give basic Christian instruction t o un educated pe rsons. H e began a nother great work, *On the Trinity*, in 399, though it was not finished until 20 years later.

78 Augustine, St., bishop of Hippo

 \overline{A} e subjects of the good of marriage and the blessedness of virginity held his attention in 401, as did the issue of the Donatist heresy and the literality of the stories in the Book of Genesis. \overline{A} e Donatists were a deeply fundamentalist group of African Christians who rejected the authority of Rome. Augustine authored the edict against them issued by the Council of Carthage in 405.

In 4 06, A ugustine w rote a bout i dentifying demons, a nd i n 4 07–8 he b egan a s tudy of St. John the Evangelist. Later in the same period, he listed ar guments u seful in c ountering t hose o f pagans a nd w rote a bout t he u tility of fasting in the Christian life. \overline{A} e subjects of bapt ism, f urther diatribes against heretics, and continuing an ongoing stream of letters occupied much of 410–12. In the latter year, he addressed the subjects of the grace of the New Test a ment a nd the issue of the spirit and the letter in Scripture.

Ā e a rmies of the G oths, however, had g iven the w orld m ore to t hink a bout t han t he finer points of theological debate. In 408 and 409, the Gothic l eader A laric h ad t wice b esieged Rome , cutting off the city and—as the great biographer of S t. A ugustine, Peter B rown, p uts it—starved "its c itizens i nto c annibalism." On A ugust, 2 4 410, A laric's h ordes b roke t hrough t he c ity's defenses. Ā ey spent the next three days plundering, raping, and burning. For a time, however, life in Hippo did not seem much affected.

Augustine's g reatest w ork, *Concer ning t he Cit y of God against the Paga ns*, began appearing in serial form in 413. Books 1–3 were published, and Augustine began drafting books 4 and 5.

 \overline{A} e year 414 at last saw the appearance of On the Trinity and also a series of Homilies on the Gospel According to St. John. \overline{A} e following year produced a further series of tracts, including one about the perfection of human justice. Books 6– 10 of \overline{A} e City of God came out as well.

In 417, \overline{A} e City of God, books 11–13, and anti-Pelagian and anti-Donatist w orks a ppeared among other less-important works by Augustine. He clearly took very seriously not only his leadership role in the church but also his role as the pastor of h is flock. A mong the w orks that h e wrote a ddressing c ongregants' c oncerns were considerations o f ma rriage, sex ual des ire, a nd adulterous marriage. A ugustine wrote about the soul and its origins and penned a spate of biblical commentary. He reconsidered the subject of lying and c riticized th e c ritics o f S cripture i n suc h tracts as his *Against the Adversaries of th e L aws and th e P rophets*. At the c enter o f h is i nterests during these years, however was $\overline{A} \ e \ City \ of \ God$, book 17, which appeared in 420 after books 14–16, which he had also finished in the interim.

Among such other antiheretical tracts as *Against Julian* and further blasts against the Donatist heretics, the year 421 saw the production of one of St. Augustine's most charming and readable works, his *Enchiridion to L aurentius*. In t his work, i n si mple and s traightforward s tyle, A ugustine te lls th e addressee how to lead a Christian life and avoid the pitfalls of s ecular c ontroversy a nd w orldly a ttractions. He also wrote a tract about what a good Christian does to care for the mortal remains of the dead.

 \overline{A} e final books of \overline{A} e Cit y of G od appeared over the next five years: book 18 in 425, and books 19–22 in 427. \overline{A} ese were followed by further arguments a gainst v arious g roups o f her etics a nd against the Jews, which continued to appear as late as 4 30. Im portant a mong t he l ater do cuments were Au gustine's *Retractions* (427), in which he acknowledged mistakes and commented on matters about which he had changed his mind.

 \overline{A} e events that attended on the dissolution of the Western Roman Empire now reached the province of Numidia. \overline{A} e Vandals—like the Goths, another set of Germanic tribesmen—began ravaging the s eacoast of Numidia, and in August 430 they besieged Hippo. Augustine fell victim to their attack and was buried on August 28.

Both A ugustine a nd h is u nofficial literary executor, Possidius, made heroic efforts to catalogue A ugustine's works in c hronological order with explanatory commentary. A ugustine, however, felt that his work as a Christian controversialist to ok precedence over a p rivate p roject to cata bgue and comment on h is own letters a nd sermons. As a r esult, h e d ied b efore t hat wor k was finished. Possidius wrote a life of A ugustine that contained a definitive list of the saint's formal works of theology.

Between the fifth and the 20th centuries, certainly most and perhaps all of Augustine's original ma nuscripts perished. C opyists p reserved his w ritings u ntil t he advent of t he p rinting press, and thereafter the task passed to editors, translators, and publishers. In his letters, however, much became foreign, strange, and perhaps incomprehensible to the medieval copyists. As a result, a s Peter Bro wn tel ls u s, t he c opyists abbreviated or a ltogether neglected certain letters a nd s ermons u ntil ma ny o f t hem d isappeared. Almost miraculously, however, some of Augustine's l ater writings—works t hought to have been lost-surfaced quite recently. In 1975, the Viennese scholar Johannes Divjak discovered 27 previously u nknown letters of A ugustine i n a mid-15th c entury m anuscript p reserved a t M arseilles. In 1990, the Parisian researcher François Dolbeau made a si milar find at the M unicipal Library i n M ainz: 2 6 s ermons t hat were e ither unknown or known only through extracts. Some of t hese d ate f rom t he beginning of Augustine's bishopric in 397. Others can be traced to the winter of 403-4-a moment when the African Church chose to a ssert its aut hority a gainst the Do natist heresy and against persistent paganism.

Augustus Caesar (Octavian, Gaius Julius Caesar Octavianus) (63 B.C.E.–14 C.E.) *Roman emperor, prose writer*

 \bar{A} e son of a so-called new man (*novus homo*) that is, of a first-generation senator whose family had just risen from the commonality—Augustus Caesar, b orn O ctavian, e njoyed t he adv antage that his mother, Atia, was Jul ius Caesar's niece.

Octavian was a 17-year-old pursuing his studies at Ap ollonia i n I llyricum w hen h is g randuncle Julius Caesar was assassinated at the Roman Senate on M arch 1 5, 4 4 b.c.e. L earning that in his will Caesar h ad n amed h im a s h is ado ptive s on a nd heir, Octavian hurried to I taly to p rotect his interests. Julius Caesar's subordinate a nd friend, Mark Antony, (Marcus A ntonius), p roved r eluctant to acknowledge Octavian's rights, but the young man moved decisively t o command the loyalty of Caesar's t roops. Wi th t heir hel p, he o utmaneuvered Mark Antony, successfully resisting Antony's attack on the walled city of Mutina (modern Modena) and subsequently s eizing t he Ro man c onsulship (the headship of state) by force. Once in office, Octavian put the provisions of Caesar's will into effect.

In v iew of that success, Mark Antony and another aspirant to power, Marcus Aemilius Lepidus, joined forces with the young Octavian, and the th ree s hared t he r ule of t he Ro man w orld. Octavian t ook over t he Ro man p ossessions i n Africa and a lso governed Sic ily and Sardinia in the M editerranean. A ntony r uled i n G aul, a nd Lepidus g overned i n S pain. Elsewhere in t he Roman world, the three defeated their opponents Brutus a nd C assius in t he E ast; S extus P ompey, son of the great Pompey, whom Julius Caesar had driven into Egypt; and also any who dared oppose them on the Italian peninsula itself. In 40 b.c.e., Octavian assumed the title Imperator.

Gradually, Octavian consolidated his power. He forced L epidus i nto re tirement a nd m isstated t he facts concerning A ntony's actions in Egypt. \overline{A} is led the credulous Roman Senate to de clare war on Antony and his mistress, Queen Cleopatra of Egypt. Rome's n avy d estroyed Antony and C leopatra's flotilla at t he b attle of A ctium i n 31 b.c.e., a nd Alexandria was captured the following year. After mopping-up operations were completed, Octavian returned to the city of Rome in 29. For the first time in many years, the Roman world was at peace.

Almost an other 10 years were to pass before Octavian felt the time to be right for officially acknowledging that he was the first of a new series of he reditary e mperors of R ome. He s pent that decade putting in place the institutions that made rule of the Mediterranean world a practical possibility, in the process turning Rome from a sprawling brick town into an imperial city of gleaming marble. He extended the rule of Rome over vast tracts of land by military action, and astute massaging of the diplomatic relationships that Rome maintained with friendly n ations m ade possible the somewhat fictive claim that Rome r uled the known world. Octavian received the title Augustus (esteemed or revered) in 27 b.c.e.

Historians variously date the moment at which Augustus's i mperium became hereditary r ule to 31 or to 14 b.c.e.—the defeat of Marc Antony in the first i nstance and the official accession to power of Octavian's adoptive son Tiberius in the second. T iberius ex ercised a ctual power well before Augustus Caesar's death.

From a l iterary perspec tive, A ugustus is best remembered as a patron of letters. Both Vir gil and Hor ace, for example, benefited from his patronage and his largesse, and literature flourished under his reign. \overline{A} e period of his rule is remembered as the golden a ge of R oman l etters. H e a lso a ffected the output of Ovid, exiling the poet to Tomi on the B lack S ea, where O vid bo th finished his *Met amorphoses* and composed his *Tristia*.

Also an author himself, Augustus wrote a nowlost autobio graphy. \overline{A} ere su rvives, ho wever, t he record of his public accomplishments that he himself penned to serve as his epitaph. \overline{A} at record was originally engraved on pillars of bronze that stood before h is t omb in R ome. \overline{A} e i nscriptions were often c opied a nd t ranslated. W e s till ha ve t hem both in Latin and in Greek as *Res gestae divi Augusti* (Deeds accomplished by the divine Augustus). Imperial a nd k ingly d eification w as a s tandard practice among many ancient Asian, Middle Eastern, Egyptian, and, later, Roman, societies.

Ausonius, Decimus Magnus (fl. fourth

century C.E.) *Roman Poet* Born to the family of a physician resident in Bordeaux in the Roman province of Transalpine Gaul, Decimus Ma gnus Ausonius r eceived a t ypically Roman e ducation in rhe toric and then b ecame a professor of t hat s ubject h imself. A fter te aching for almost 30 years, he became tutor to the Roman emperor of the West, Gratian. When Gratian succeeded to the throne, he appointed Ausonius to be the prefect of his Praetorian Guard.

Quite apart from his twin careers as teacher and public official, Ausonius was also a prolific poet of the academic variety. \bar{A} e standard English edition of his principally didactic works runs to almost 800 pages. A glib and easy versifier, he made any subject grist for h is p oetic m ill. H is pa rticular f orte w as writing verse catalogues of events, people, and places. \bar{A} ese treated such subjects as h is relatives, the consuls of Rome, renowned cities of the world, professors who taught in Bordeaux, and many others. \bar{A} ough h is p oetic i nspiration w as p edestrian, h is formal e xpertise was ma sterly, and he s eemingly delighted in overcoming challenges by accomplishing difficult technical feats in verse metrics.

At least two of Ausonius's poems have engaged the interest of subs equent generations of r eaders. \overline{A} e first of these, his *Mosella*, traces his path on a journey to a nd a long t he M oselle R iver. H is descriptions of the things he encounters are genuinely charming. He describes the journey to reach the river, and on a rriving, he add resses the river. He then describes the fish that live in it; reflections in the water; scenery, vineyards, and dwellings along the riverbanks; the river's tributaries; and, finally, the r iver's c onfluence w ith t he R hine, w here he bids the charming watercourse farewell.

 \overline{A} e second poem by Ausonius that has attracted scholarly interest, *Ephemeris*, is one in which he follows his own schedule of activities through a typical day. Historians, however, find more of interest in it than do literary critics.

Ausonius a lso w rote v erse l etters a nd e pigr a ms. He was a careful and reliable teacher and public servant, grateful for the honors and offices that his pupil, Gratian, heaped upon him late in his life. He did produce creditable prose—as in a paean of thanks to his imperial patron for making Ausonius a consul of Rome. As a poet, however, he mainly proved to be a skillful hobbyist.

Avianus, Postumius Rufus Fes (fl. ca.

fourth century C.E.) *Roman poet* A translator, poetic geographer, and fabulist, Avianus is best known for rendering into late Latin the astronomical w ork *Phaenomena k ai D iosemaiai* (Ā e Starry Sphere and the Signs of the Weather) by the Greek poet Ar at us of S ol i. Avianus's version is sometimes entitled *Carmen de Astris* (Song of the stars). He also c omposed a very l ong n avigational p oem designed to lead its reader along the northern coast of the Mediterranean from Cádiz in Spain to t he Black Sea. Only 700 lines of this poem survive.

Bacchae, **The** Euripides (ca. 407–406 B.C.E.) Composed shortly before the playwright's death while Euripides was away from Athens and the guest of King Archelaus of Macedonia, \overline{A} e Bacchae probably was not quite finished by the time Euripides d ied. \overline{A} e pl ay f ocuses on t he pre-Christian mystery religion that celebrated the god Dionysus.

Dionysus was the offspring of the king of the gods, Z eus, a nd a h uman m other, Z eus's pa ramour, the \overline{A} eban p rincess S emele. T ricked by Zeus's jealous s pouse, t he g oddess H era, S emele asked Z eus to prove h is love for her by showing himself to her in h is proper form. B ound by h is own oath to do so, Zeus revealed himself as a flash of lightning t hat incinerated S emele. B efore t his happened, h owever, h e r escued from h er w omb the demigod he and Semele had conceived together, a nd he en closed t he i nfant i n h is o wn flesh. Later the child was mysteriously reborn from Zeus himself and became the god Dionysus.

A cult grew up around this twice-born deity. Its adherents drank wine, sacrificed the god, and were purified by the bull's shed blood. Believers who participated in this ritual were thought to be cleansed of their sins and, like the god himself, to undergo a mysterious r ebirth. C elebrants p racticed their r ites i n s ecret, a nd n oninitiates who dared to observe the Dionysian mysteries ran the risk of having the frenzied worshippers tear them to pieces. Such had been the fate of the archetypal musician-poet Or pheus.

A long-standing tradition holds that Euripides himself either became an adherent of the cult or had somehow been able to obs erve its rituals. In any case, the Dionysian cult and the excesses of some of its devotees, called Bacchae, provide the material for this, the last of the playwright's tragedies. It was performed in Athens in 405 b.c.e.

As t he p lay o pens, the g od D ionysus ha s assumed human form and is visiting his mother's home in \overline{A} ebes, " \overline{A} e Tomb of t he L ightning's Bride." He has come to Greece to do what he has already done in Asia, to teach his dances and his rituals to new worshippers so that men may see god manifest in the flesh. Dionysus is angry with the \overline{A} ebans f or s corning h is n ew r eligion. T o punish \overline{A} ebes, he has made converts of many of their women, including the queen mother, Agave. Her son, Pentheus, the city's ruler, is a chief persecutor of the new faith, and Dionysus intends to teach him a cruel lesson.

Having ac quainted t he audience w ith th is background, D ionysus de parts, a nd 1 5 w omen dressed a s hi s w orshippers c autiously t ake t he stage. W hen they are sure no one is about, they begin to perform the Dionysian rites. \overline{A} ey sing a series of g enuinely l ovely l yrics that i nvite th e god to join them. Instead, clad like the singers in the fawn skins that identify Dionysus's worshippers, t he bl ind a nd a ncient p rophet T eiresias enters. He dema nds t hat s omeone su mmon t he even more ancient and now-retired king of \overline{A} ebes, C admus, P entheus's g randfather. C admus appears, a lso clad as a w orshipper. \overline{A} e t wo old men i nform the audience t hat t hey are the only male \overline{A} eban worshippers of the god, and they set off together toward the mountains where the rites will be celebrated. \overline{A} ey see K ing Pentheus a nd his b odyguard app roaching, a nd c onceal t hemselves to eavesdrop.

Pentheus vents his annoyance that this new cult has swept through the women of the town, and he promises to shackle and imprison all he finds participating. H e h as a lso h eard of t he a rrival of a stranger claiming to be the god himself. He intends to capture the stranger and execute h im for blasphemy. His annoyance redoubles when he d iscovers h is own grandfather, C admus, lurking nearby with Teiresias, dressed in fawn skins and crowned with ivy. Pentheus chides Teiresias. Ā e a udience hears the chorus accuse Pentheus of sacrilege.

Teiresias tries to convert Pentheus to his point of view, and the chorus and Cadmus second his appeal. C admus p oints o ut the p olitical adv antage of the association of the god with the Ā eban royal house, and he a ttempts to c rown Pentheus with an ivy wreath. Pentheus refuses, and he exits after s ending ha lf h is g uard to d ishonor Teiresias's shrine to the god and the other half to seek out and arrest the stranger calling himself Dionysus. In another round of lovely hymns, the maidens of the ch or us celebrate the god.

 \overline{A} e s oldiers r eenter w ith D ionysus a mong them, and Pentheus returns. \overline{A} e soldiers marvel that D ionysus has come willingly and l aughing, and the god's captors announce that the maidens whom the king had already imprisoned have been set free by miraculous means.

Pentheus cross- examines D ionysus. Ā e g od poses as a Lydian to whom the Dionysian mysteries ha ve a ll b een d ivinely r evealed. H e r efuses Pentheus's demand that he recount those mysteries. On ly the faithful, he i nsists, can k now such matters. Out of patience, Pentheus orders Dionysus's hair to b e cut, takes away his wand of religious o ffice, a nd ha s h im c ruelly b ound a nd imprisoned. D ionysus w arns P entheus that i n imprisoning him, he i s i mprisoning a g od, b ut Pentheus stands firm.

Now the chorus sings songs of worship, rehearsing E uripides' ve rsion of t he D ionysian r ites. A s they finish their song, they throw themselves to the earth, and D ionysus, a lone a nd u nbound, en ters from the castle. He greets his worshippers and bids them rise. He tells them that Pentheus never bound or imprisoned h im. Rather, the god has confused Pentheus with an illusion, and the king bound and imprisoned a bull. Ā e god has worked other miracles as well, but Pentheus has not been impressed, and he enters demanding to know how his prisoner escaped.

After m ore v erbal spa rring b etween t he g od and the king, a messenger arrives from the region of Cithaeron, but he fears to del iver h is message until the king assures him of h is safety, whatever news he br ings. P entheus ag rees, and the m essenger reports that he ha s seen the B acchae, led by the king's mother and her sisters, who engage in the mysteries, perform miracles, and overcome villagers who attempt to interrupt them in their celebrations. \overline{A} e messenger adv ises t he king to relent and accept the new god. Pentheus resolves to take up arms against the worshippers, and Dionysus warns him not to. Pentheus cannot, however, be dissuaded. At last the god gives up on him and readies Pentheus himself as a sacrifice.

Pentheus s uddenly b ecomes i rresolute a nd experiences d ifficulty in making de cisions a s the god leads him on. After more choral hymns, Pentheus, n ow disguised as a female Bacchante, begins to see Dionysus's shape shift into that of a sacrificial bull. His manner of speaking shifts as well. Dionysus sends the king to his approaching, terrible fate.

 \bar{A} e chorus of Bacchae begins singing a hymn presaging the death of uninitiated spies on their mysteries.

84 Bacchides

A m essenger f rom t he m ountain w here P entheus has gone now confirms that during the song, the B acchae have k illed t he k ing. \overline{A} e m essenger reports the details: \overline{A} e god himself pointed out the interloper to t he w omen. H is a unts, A utonoe a nd Ino, and his own m other, A gave, n ot r ecognizing their nephew and son and totally overcome by religious delusion, tore Pentheus a part. \overline{A} is the messenger describes in gory and graphic detail. Agave, the a udience l earns, is r eturning with P entheus's still- unrecognized head impaled upon her wand.

Agave enters, proud of her conquest and thinking that she displays the head of a young lion. She calls for her s on Pentheus so that he c an mount the lion's head on the palace wall. She shows it to her father Cadmus. Slowly the old man leads her from her religious frenzy and has her lo ok upon the h ead. A t l ast she r ecognizes her s on a nd repents her deed.

Just at this point in the play, a page is missing from the manuscript upon which all later editions of \overline{A} *e Bacchae* are based. Editors speculate that the missing page c ontained a spech by A gave and a deus ex machina appearance of D ionysus in which he probably passed judgment on the city of \overline{A} ebes for n ot ac cepting h is d ivinity. A s the text resumes, the g od do es s ay that if e veryone had acknowledged his divinity in time, all would have been well. C admus, A gave, and her si sters all go into voluntary exile. \overline{A} e chorus reminds the audience of the gods' unpredictability.

 \overline{A} e unfeeling cruelty of gods in their dealings with men is a theme that emerges more than once in Euripides' later plays. One sees another instance of it, for example, at the end of *Helen*, where Zeus rewards his daughter, Helen of Troy, for her cruelty i n s tarting the Trojan War and c ausing the deaths of so many troublesome mor tals, thereby reducing their n umbers. It m ay b e that the old playwright had concluded that human beings were merely the playthings of the gods.

Bacchides (Two Sisters Named Bacchis) Titus Maccius Plautus (ca. late second century B.C.E.)

Based on Men and er's play \overline{A} e Double Deceiver, of which on ly traces exist, Pl aut us's Bacchides concerns a pair of twin sisters who have the same name, one living in Athens (Bacchis A) and one dwelling on the island of Samos (Bacchis B). Both are c ourtesans, and b oth a re c onsumed with a passion for money. Two young and foolish men, both Athenians, love the women ardently. Pistoclerus lo ves B acchis A, and M nesilochus lo ves Bacchis B.

As t he p lay o pens, Ba cchis B a rrives f rom Samos at h er sister's house i n A thens. We le arn that B acchis B ha s b een em ployed b y a s oldier named Cleomachus to serve him exclusively for a year. We also discover that Mnesilochus, who has been away at Ephesus but will soon return, lives next door to Bacchis A. Mnesilochus has written to his friend Pistoclerus asking his help in prying Bacchis B lo ose f rom her a rrangement w ith Cleomachus.

 \overline{A} e sisters also think that Bacchis B would stand to gain more from involvement with M nesilochus than with the soldier, so in the first scene they also try to recruit Pistoclerus in scheming against Cleomachus. \overline{A} e s cene i nvolves m uch a morous p unning as B acchis A b ends P istoclerus to her w ill while keeping his ardor within bounds. He ends up paying for a welcoming banquet for Bacchis B.

 \overline{A} e s econd s cene f eatures a deba te b etween Pistoclerus a nd t he sla ve L ydus, w ho ha s a lso been Pist oclerus's teach er. Striking a series o f tragic poses, Lydus reproves his former pupil for his in terest i n a c ourtesan a nd f or w asting h is father's money. Pistoclerus, of course, ignores the older man's advice.

As act 2 opens, Chrysalus, the slave of Mnesilochus's father, a rrives from Ephesus with M nesilochus. E ncountering P istoclerus, Ch rysalus learns that Bacchis B still prefers Mnesilochus to her soldier, and that both sisters are living right next do or to Mnesilochus and h is father N icobolus. Pist oclerus ex plains t hat Ch rysalus m ust find the money to buy Bacchis B's contract from the soldier Cleomachus. Chrysalus i mmediately begins t o sch eme to p ry t he m oney o ut of t he father for the son's benefit. He will convince Nicobolus that money actually in Mnesilochus's p ossession has been banked for safe-keeping.

Much of the attraction of this and other scenes depends upon witty wordplay and on the double takes t hat P lautus a llows h is c haracters a s t he playwright has them step out of character to comment, for instance, on the acting of the others or on t he pl aywright's t alent. Pl autus's u se of do ubling e xtends b eyond r eduplicating t he role s of his characters to using actors both as participants and as observers.

As the third scene opens, Nicobolus steps out his f ront do or. C hrysalus g reets h im w ith t he intention of fleecing him of the above-mationed money M nesilochus n eeds. \overline{A} e s lave i nvents a complex cock-and-bull story to convince the old man that the money his son had r eally collected had been deposited with a rich man in Ephesus to protect the cash from pirates. Chrysalus goes to tell M nesilochus t hat he c an u se t he c ash. \overline{A} e slave does worry, however, about what will happen when Nicobolus learns of the trick.

Act 3 opens with the lines that the Florentine poet Dante Alighieri borrowed as the motto posted above the gates of Hell in his *Inferno*: "Abandon all hope all who enter here." \overline{A} e moralistic teacher-slave Lydus sp eaks the lines, comparing the door of B acchis A's b rothel to t he ga tes o f Hades and saying that all who enter there have already a bandoned a ll ho pe. Lydus, add ressing the audience, threatens for the second time to tell Pistoclerus's father what his son is up to.

In the second scene, the returning Mnesilochus mouths a series of dull aphorisms in praise of friendship and then encounters Lydus together with his master, Philoxenus, the father of Pistoclerus. L ydus i s c arrying o ut h is t hreat a nd informing on the son. Philoxenus is much more philosophical a bout h is s on's m oral l apse t han the straitlaced Lydus expected. Lydus r esponds with a d iatribe about t he s orry c ondition o f morality and blames the father for approving the son's se nsuality. S eeing M nesilochus, L ydus makes self-deluding a nd u nflattering co mparisons between Pistoclerus and his friend. M nesilochus, Lydus thinks, tends strictly to business.

Lydus t ells M nesilochus a bout t he w ay t hat Pistoclerus has behaved in the brothel with Bacchis A, a nd M nesilochus m istakenly c oncludes that his friend has b een fondling B acchis B. He resolves to return the filched money to his father (which h e d oes) and t o in tercede o n beha lf o f Chrysalus. I n t he n ext s cene, h owever, wh en Mnesilochus confronts Pistoclerus, the matter is cleared up. Both Bacchides are in their house.

As a ct 4 o pens, w e m eet a s tock figure o f Roman and Greek comedy, the parasite. He introduces himself as the parasite of the soldier Cleomachus. \overline{A} e parasite is searching for B acchis B to d iscover w hether she w ill r epay C leomachus or leave with him. \overline{A} e parasite bangs on a do or; Pistoclerus a nswers, a nd the parasite states h is business. P istoclerus tel ls h im t hat B acchis B will not be returning home and threatens the parasite w ith a b eating. N ow, P istoclerus r eflects, Mnesilochus needs money again.

Scene 3 opens with a song sung by Mnesilochus. Ancient drama had many of the characteristics of opera or musical comedy, and Plautus often employs cantica (songs). In his aria, Mnesilochus e xpresses r egret a t h is b ehavior a nd i ts consequences. He really is upset because he does not have the money to buy Bacchis B's contract. Pistoclerus e nters a nd t ries u nsuccessfully to cheer up his friend. In scene 4, Chrysalus enters, comparing himself favorably with the slave characters who inhabit Greek (as opposed to Roman) comedies. A ey o nly m anage to p rovide t heir masters w ith small su ms, w hereas C hrysalus manages large ones. He is flabbergasted to learn that M nesilochus has returned all the money to his father and kept none for himself. Nonetheless, Chrysalus a grees to b ilk h is ma ster o f en ough money to accomplish Mnesilochus's purposes.

86 "Ballad of Sawseruquo, The"

Chrysalus has M nesilochus w rite h is father a letter in which he tel ls the exact truth a bout the way in which his son and his slave are plotting to relieve the old man of large sums of cash. Chrysalus instructs Mnesilochus to remind the master of his promise not to beat his slave. Rather, as part of his plot, Chrysalus wants Nicobolus to tie him up.

In scene 6, Chrysalus, who has been wondering how to ma ke h is master a ngry, finds Ni cobolus already in that condition. Chrysalus hands over the letter of confession and waits while Nicobolus rushes off to bring assistance and ropes to bind Chrysalus. When he returns with servants from the house, Chrysalus insults Nicobolus and tells h im that he will soon be voluntarily giving money away to save his son from danger.

When Nicobolus wants to know the sort of danger t hat threatens h is s on, Chrysalus leads h im next door. \tilde{A} ey open the door a c rack, and Nicobolus observes the drunken orgy that is in progress with h is son a s a p rime pa rticipant. C hrysalus assures him that the girl is no courtesan and promises that Nicobolus will soon learn who she is.

Now in search of Mnesilochus, the boasting soldier Cleomachus appears and he brags to the audience a bout h is ma rtial p rowess. C hrysalus tel ls Nicobolus that the soldier is B acchis B's h usband. \overline{A} e slave manages matters so that Nicobolus promises to buy out the contract for 200 pieces of gold.

In a ct 4, s cene 9, C hrysalus en ters sp outing verse in epic style. He switches to a dirge for King Priam of Troy and then begins declaiming Greek mythology l ike a n or ator or lecturer—at onc e illustrating his own and Plautus's mastery of several l iterary s tyles. C hrysalus d raws a s eries o f parallels b etween the fall of Troy and the situation that is beginning to resolve itself under h is creative hand. After reading another letter ostensibly from his son, Nicobolus coughs up a second 200 gold coins.

In the meantime, Pistoclerus's father, Philoxenus, enters, reflecting on his own misspent youth and on his reformation. Now Nicobolus enters in a rage. He has learned the truth from Cleomachus and i s th oroughly di sgusted w ith h imself, h is slave, and his son. \overline{A} e two old men decide to demand the money from the two sisters. \overline{A} ey create an uproar at the Bacchides' d oor, a nd w hen t he si sters a nswer, they perceive an opportunity for further profit and b ehave seductively. P hiloxenus s uccumbs first, ad mitting t hat he h as f allen in love with Bacchis B. Bacchis A exerts her charm on Nicobolus, and after holding out against it for a time, he also succumbs. \overline{A} e Bacchides lead the fathers inside to share a couch with the women and with their sons.

 \overline{A} e comedy ends with the entire company of players assuring the audience that, if the old men had not been worthless since boyhood, they would never have fallen victim to the sisters' charms.

"Ballad of Sawseruquo, The" (possibly ca. 3000 B.C.E.)

A representative of a n a ncient b ody of folklore, the Nart Sagas, the first fragment of " \overline{A} e Ballad of Sawseruquo" tells of how the Nart hero Sawseruquo stole a firebrand from and then overcame and destroyed a seemingly invincible giant. As it now e xists, t he s tory i s tol d i n t he Ci rcassian language.

 \overline{A} e Narts, a group of legendary protohumans, are freezing and need fire, so Sawseruquo steals a firebrand from a sleeping giant. On a wakening and m issing the firebrand, the giant, who is a shape- shifter, stretches himself in all directions until h e overtakes S awseruquo on h is w inged steed, but the giant does not know him. \overline{A} e giant threatens to eat the man he finds if he will not tell him what sort of man Sawseruquo is.

Sawseruquo, who has much in common with tricksters i n ma ny f olk t raditions, p romises to teach t he g iant a bout h is qu arry's ga mes a nd amusements. A ese g ames i nvolve a s eries o f attempts to d estroy t he g iant; b ut t he t rickster insists that he is merely showing the giant ways to have fun. First Sawseruquo throws an iron meteorite at the giant's head, but the giant easily butts it away and thinks this iron sphere- butting game is fun. A en Sawseruquo shoots white- hot arrows into the giant's mouth; the giant chews them up and spits them out, not only finding the game to be jolly, but also claiming that it has cured his sore throat. Next the giant swallows red-hot plowshares a nd v omits t hem up with no harm a nd much a musement. At h is wits' end, Sawseruquo explains a g ame t hat i nvolves s tanding i n t he deepest spot in "seven turbulent seas" where the giant cannot touch bottom. A e giant must stand there f or s even d ays a nd n ights, a llowing t he water to freeze around him. He does, and then he heaves and sets himself free.

Sawseruquo explains t hat t he g iant ha s n ot waited long enough, and that if he allows the ice to set m ore firmly, it will increase h is strength. \overline{A} e giant, who seems to be a mental dwarf, agrees. \overline{A} is time he cannot free h imself. Sawseruquo m ounts his w inged horse a nd flies off to g et t he g iant's sword. At last, too late, the giant recognizes both his own folly and the identity of Sawseruquo.

Returning with the s word, S awseruquo lops off the giant's head. He then takes the stolen firebrand t o t hose of t he N arts w ho ha ve su rvived both cold and heat while he has been away.

 \overline{A} e recent translator of many Caucasian Nart Sagas, John Colarusso, has pointed out the similarities between this story and Prometheus's theft of fire in Greek myth (see *Promet he us Bo und*). \overline{A} e confrontation between Sawseruquo and the giant is also reminiscent of Gilgamesh and Enkidu's conquest of the giant Humbaba in the Hittite *Epic of Gilga mesh*.

Basil, St. (ca. 329–370 c.E.)

Born to an upper- dass Christian family at Pontus in Asia Minor, Basil received a Roman patrician's ed ucation at C onstantinople and A thens. Employed as a n i mperial a dministrator u ntil about 358, Basil gave up his career to jo in other members of his family at A mnesi i n P ontus. \overline{A} ere the family all dwelled together as Christian ascetics in a community led by Eustathius of Sebaste. A strong supporter of the Nicene Creed, Basil was o rdained a p riest i n 3 65. F ive y ears later, h e be came a b ishop, a nd t hroughout t he rest of h is life he at tempted to r epair certain of the d octrinal d ivisions t hat s eemed to pl ague every religious community at that time.

From a l iterary perspec tive, Ba sil, wh o f ollowed the teachings of Or igen, first compiled an anthology of the latter's works—the *Philocalia of Origen*. He next drew from the New Test a ment a collection of 1,533 verses addressing the subject of mor als a nd prop er behavior—his *Moralia*. Over time, he prefaced that compilation with two essays: "On the Judgment" and "On the Faith."

To y oung p eople s till v ery much u nder t he sway of H ellenistic po lytheism, h e addressed a celebrated work *Ad adolescentes*, *de legendis libris Gentilium* (To y oung m en o n [the sub ject o f] reading the books of the Gentiles). Ā is work discussed the utility of the Pagan classics to a Christian education and remained influential well into the Europe an Re nais sance.

Basil next turned his attention to the exposition of orthodox dogma, writing against the Arian heresy in three t reatises c ontradicting the position taken by their apologist, Eunomius of C onstantinople. Ā is was followed by a work on the Holy Spirit (*De S piritu Sa ncto*). B asil's most n otable work—one that became a model f or many that

followed—is entitled *On the Hexameron*. Concerning the six days of creation as reported in the Bible, and incorporating into that explanation the views of Greek science, Basil attempted to account for the creation and processes of the universe. Over 300 of Basil's letters also su rvive, as d o a n umber of h is sermons and works of dubious attribution.

Bhagavad GitaVyāsa (ca. 1500 B.C.E.; current form ca. 150 C.E.)

 \overline{A} e Bha gavad Gi ta i s a 7 01-line p ortion of t he fifth b ook o f t he i mmense I ndian e pic, t he *Mahabhar at a*. Its attribution to Vyā sa i s traditional and p robably re flects t he c ustomary s ubmergence of t he i ndividual id entities of a ncient Indian poets in a Vyāsan persona. Ā ere is no way to b e su re, b ut i t s eems l ikely t hat t he p oem, a t least in the form we have it, was composed around the second century c.e.

 \overline{A} e Bha gavad Gi ta, i n a ny c ase, i s s ometimes called \overline{A} e Song of God, though its theological ramifications need not concern us here. It is nonetheless one of the most popular of all Indian liturgical passages and nurtures the spiritual lives of millions of people in India and elsewhere, in addition to supporting their devotion to high standards of t ruth and fairness. From a Hindu perspective, the verses of the B hagavad Gita a re c anonical and have the authority of Scripture. Others find in it a work that calls for a mystical or an ascetic interpretation. Still others examine it for its philosophical and dialectical implications. Here we focus on the narrative.

 \overline{A} e poem is organized as a series of questions and answers. \overline{A} e first exchange occurs between the questioner, the blind king Dhritarashtra, and Sanjaya, one of the three narrators of the *Mahabharata*. I n a nswer to D hritarashtra, S anjaya i s describing the events taking place on the sacred battlefield of Kurukshetra. \overline{A} ere two en ormous armies are drawn up and awaiting the command to commence hostilities.

Sanjaya names the heroes of the opposing force and then the commanders of his own forces. \overline{A} en the order is given for the troops to f orm ranks, and as they do, trumpets blow and kettledrums sound. As in such Western medieval battle epics as \overline{A} e Song of Roland, the trumpets, here made of conch shell, have names: Endless Victory, Honey Tone, a nd J ewel Blo ssom. \overline{A} e en ormous n oise heartens the troops, and as the battle is about to begin, the reader meets two of the poem's principal heroes: Krishna (the Hindu deity) and Arjuna. Getting A rjuna to fight is t he m ain n arrative object of the poem.

Arjuna has Krishna drive him out in Arjuna's chariot to r econnoiter so that Arjuna can know his enemy before fighting. Arjuna finds his kinsmen facing each other in the ranks of both armies. Disheartened by this discovery, Arjuna refuses to fight, saying that he will not kill his kinsmen lest he de stroy h is o wn happ iness. H e u nderstands that h is kinsmen's m inds a re clouded b y g reed, but, unlike them, Arjuna and Krishna recognize the immorality of the contest. Arjuna prefers to die at their h ands rather than participate in h is kinsmen's sinful folly. He flings away his bow and quiver and refuses to fight.

Krishna reproves Arjuna's decision as "unmanly and disgraceful." Moreover, it is at odds with heavenly will. Arjuna implores the divine Krishna for grace and illumination. Arjuna wants what is best, but he is determined not to fight.

Krishna p reaches A rjuna a leng thy s ermon about the temporality of the physical person and the i ndestructibility of the a tman (soul) t hat vivifies the body. Ā e true self, Krishna insists, can neither slay nor be slain. "As a person throws away [old] c lothes a nd p uts on [new]," s o t he "embodied Self throws away this lifetime's body and enters a nother that is new." If A rjuna persists i n h is c owardly b ehavior, he w ill lo se h is dignity and le ave h is fate u nfulfilled. He m ust fight. His mind must achieve poise, and he must be calm, steady, and free from desire. When he brings himself under appropriate control, he will achieve t ranquility a nd o vercome s orrow. H e will find eternal unity with Bhraman.

Arjuna, however, finds Krishna's sermon confusing, s o Kr ishna a ttempts c larification. H e explains that each person must follow either the contemplative Yoga of knowledge, or the Yoga of action and work. Arjuna's path is that of action. He m ust wor k, but wor k s elflessly to avoid t he traps set b y selfish action. H e m ust c rush b oth hope and ego, and he must fight.

Arjuna h as n ow b ecome i nterested i n t he moral i mplications of Krishna's d iscourse a nd asks what d rives pe ople to do e vil d espite w hat they truly wish. Krishna replies t hat g reed a nd anger d estroy j udgment, dw elling i n t he s enses and the intellect. Krishna describes the following ascending hi erarchy: flesh, s enses, m ind, i ntellect, and atman.

Krishna now r eveals to A rjuna t hat, t hough both of them have lived through many incarnations, Krishna, because he is divine, can remember all h is. A rjuna c annot. K rishna i s a t o nce man and the god who comes in every age to "protect t he good and de stroy t he wicked." K rishna now explores a series of seeming contradictions, explaining how all of them are resolved if a person overcomes h is senses; u nderstands t he t rue nature of work; avoids ignorance, disrespect, and disbelief; and finds strength in discipline.

Still n ot c lear a bout t he b est way to f ollow, Arjuna asks Krishna if renunciation or activity is the better course. Krishna says that b oth a re good, bu t w ork i s be tter. E ither pa th f ollowed selflessly leads to tranquility. Greed spoils both. Ā ose who selflessly focus on the atman recognize Krishna as "the giver of ritual and religious discipline, the c reator of the three worlds, and the refuge of all beings" will find peace, escaping the continual cycle of rebirth.

In the next section of the poem, Krishna focuses on the benefits of meditation. \overline{A} en he turns to the benefits t hat a ccrue f rom worshipping K rishna and the kinds of persons who can successfully do so. \overline{A} ese i nclude t hose w ho s orrow, t hose w ho seek truth, those who seek bliss, and those who are wise. Few people a chieve wisdom. \overline{A} ose who do achieve it recognize that all things come into being during t he eons- bng "day of Br ahman," a nd a ll things cease to be during the eons-long "night of Brahman."

Now Krishna reveals to Arjuna his true nature, at once immanent and transcendent. He describes himself as "the ritual...the sacred gift...the holy food...the sacred fire...and offering... the father and mother of the world...the goal of knowledge...Om...the supporter...the refuge...the lord...the silent witness...the origin...the dissolution...the storehouse and the seed...death and salvation...what is and what is not."

All who worship, K rishna s ays, e ven t hough they m ay not k now it, wo rship him. \tilde{A} erefore Arjuna s hould imm erse him self in t houghts o f Krishna.

Convinced by what Krishna has taught him, Arjuna confesses his faith. Yeth es till wishes to know more and asks Krishna to explain his divine powers. Krishna agrees to explain them "in o rderly f orm." \overline{A} ese po wers are m any, involving numerous manifestations in the form of go ds, s criptures, s uch human f aculties a s intelligence, and such an imal faculties as consciousness. Krishna is priest and worshipper, the sun and the ocean, the Himalayas, the fig tree, the best of horses, the strongest of elephants, the thunderbolt, the crocodile, the Ganges, the first principle, and so forth. It is sufficient for Arjuna, however, simply to know that Krishna exists and that he sustains the world.

Converted n ow, A rjuna p rays t hat K rishna will reveal himself in his supreme form. Krishna

In the lengthy pa ssage t hat f ollows, A rjuna de scribes what h e sees, and th e a wesome na ture o f h is vision destroys the inner peace he had ac hieved, for he h as seen K rishna n ot o nly as the creative but a lso a s t he d estructive p rinciple i n t he u niverse. Arjuna calls for pity.

Krishna n ow c ommands A rjuna, tel ling h im that, even if he refuses to fight, none of the enemy soldiers he pities will survive. Krishna tells Arjuna to destroy them and enjoy their kingdom. Arjuna falls down before Krishna and worships him, begging h im n ow to sho w h im h is p eaceful f orm. Again Krishna complies, and Arjuna regains h is composure.

Before h e fights, h owever, Arj una c raves f urther i nstruction. Kr ishna w illingly p rovides i t, explaining the nature of knowledge and the knowable. He grants the knowledge that makes achieving perfection possible. He continues, explaining divine an d d emonic na tures as t hey appear i n people. He a lso e xplains t he u tility of t he s criptures and the three devotions.

When Krishna finally explains the way of salvation, Arjuna has learned all he n eeds to k now and a t l ast a grees t o f ollow K rishna's i nstructions. He will fight.

biography, Greek and Roman

Several sorts of works with varying degrees of biographical focus app eared i n a ncient G reece a nd Rome. Pa rticularly n otable a mong t he GrecoRoman works was Plutarch's *Par allel Lives*, in which the Greek historian paired a biographical sketch of a notable Roman with one about a famous Greek. A s the classicist C.B. R. Pelling points out, however, biographical writing appeared in many genres among both Greeks and Romans.

Such genres i ncluded e pic s like H omer's \overline{A} e Odyssey, in which a largely fictive and mythological narrative centers on the partly true events in the l ife o f an h istorical i ndividual. P elling a lso points to funeral orations and dirges as forms of biographical writing t hat celebrated t he a ccomplishments of t he deceased. Included in Pelling's list are Ion of Chios (ca. 480-421 b.c.e.) and Stesimbrotus of Athens (fl. fifth c entury b.c.e.). I on reports h is conversations with such famous persons as Aesch yl us and Sophocl es in his Visits. Stesimbrotus's surviving fragments give particulars about the Athenian politicians Ā emistocles and P ericles. A e b iographer r eputedly w rote about Thucydides as well, but no example of that work has survived.

Xenophon of Athens's Cyropædia and his Memorabilia, w hich de alt r espectively w ith t he education of the Persian ruler Cyrus and with the death o f S ocr at es, p roved i mportant i n t heir own right and also as examples for later writers to follow. N umerous quasi-polti al biographies dealing with such figures as Alexander the Great looked to Xenophon as a model, mixing the writing of biography with praise. Pl at o's accounts of Socrates' l ife a nd c onversations i n several d ialogues a lso c ontributed a s tring to b iography's lyre. Pelling credits Ar istot le with contributing cultural a nd e thical h istory to t he c oncerns o f biographers. In picturing Socrates as notoriously ill- empered and Plato as a plagiarist, the celebrated musician and musical theorist Aristoxenus of Tarentum (fl. fourth c entury b.c.e.) c ontributed the maliciously s candalous story t o t he b iographer's arsenal.

À e s ort o f b iographies a bout w riters t hat, when little is actually known about their subjects, draw un supported inferences f rom t he w riters' works may be traceable to a w riter on the lives of poets, Chamaeleon of Heraclea (fl. sixth-fifth

vive, but the work itself is lost. Once the Hell enist ic A ge got underway in Alexandria, E gypt, s cholars at t he P tolemaic library there introduced a mode of biographical writing in which brief notes about a famous person's life, acquaintances, associates, and so forth introduced scholarly commentaries on t he subject's works. A particularly interesting example of later Greek biography is The Life of Apollonius of Tyana by L. Flavius Philostratus (Philostratus the Athenian). A e book tel ls of a pa gan Greek wise man whose career in many ways parallels that of Jesus Christ-most notably describing Apollonius's resurrection from the dead. An early Platonist critic of Christianity, Celsus (fl. late second century c.e.), accused the Christians of b orrowing for t he em ergent C hristian s criptures' accounts of Apollonius's raising the dead, of his having himself been resurrected, and of his having a scended bod ily i nto he aven. A e w ork also d isplays c haracteristics o f hagiographybiographies of t he l ives of s aints, w hich w ould become standard Christian fare. Philostratus also composed a series of Lives of the Sophists that included p ortraits o f r hetoricians and o rators from the time of Protagoras in the fifth century b.c.e. until the early third century c.e.

Diog en es L a er ti us's discussion of the lives and writings of 82 Greek philosophers and other notable persons has been transmitted to us in 10 books (manuscript scrolls). Among these, Book 3 deals e xclusively with Pl at o a nd Book 10 with Epic ur us.

Differences in the practices and emphases of national biography arose from the divergent histories and customs of the Greeks and the Romans. In terms of genre, h owever, one n aturally finds many o verlaps. Fu neral o rations, f or e xample, extolled the departed. A utobiography f eaturing political spin appears in works such as Julius Caesar's *Comment ary on the G alli c Wars* (*De bello Gallico*).

Roman emperors also often wrote a species of autobiography. Numbered among such imperial authors we find August us Caesar, his successor Tiberius, Claudius, Hadrian, and Marcus Aureliu s Antoninus. Writing in Greek, the lastnamed emperor most closely approximated the modern autobio graphy of self-exploration and discovery in h is *To H imself (Medit at ions)*. A succession of civil servants, the "writers of imperial history," found employment penning the lives of Roman emperors from Hadrian to Carinus.

Competing p oliticians o r t heir su rrogates wrote quasi-biographical ske tches f ocusing o n the failings of their opponents or on their own or their constituents' virtues. A fiery exchange of such political biography appeared after the death of Marcus Porcius Cato, the staunchest defender of the Roman Republic and its constitution. Cato had c ommitted su icide r ather t han ac cept C aesar's pardon for opposing him. Cice r o and Iunius Brutus w rote pa negyrics (poems of praise) honoring the great republican. \overline{A} ese were answered by Caesar himself and by his aide- &- amp, Hirtius, who had also written the eighth book of Caesar's *Gallic Wars*.

Among other Roman biographers we find the name o f M arcus Terentius Varr o—ancient Rome's m ost important and productive scholar. Varro p enned s ome 7 00 bio graphical s ketches (*Imagines*) of famous Greeks and Romans, appending an a ppropriate e pigra mt o e ach. H e a lso compiled the lives of many famous poets.

St. Jer ome—himself n o m ean b iographer, a s his *On I llustrious Men* demonstrates—named Cornelius Nepos (ca. 110–24 b.c. e.) and Sueto nius a mong others a s Roman biographers worthy of not e. \overline{A} ough t he s urviving w orks of N epos are fr agmentary, we k now t hat t hey o riginally included about 400 lives of illustrious men, many of whom were military and not all of whom were Roman. Suetonius also wrote about famous men. He sorted his subjects into categories that included h istorians, o rators, phi los o phes, grammarians, and rhetoricians. \overline{A} ough this work does not entirely su rvive, St. J erome b orrowed from i t some of his own examples of poets, or ators, and historians.

men such as the tyrant emperor Nero, gave rise to another subcategory of biography-works focusing on the fortitude of the martyred as they died. Often, as in the case of Christian martyrs, these works e xpanded to i nclude d iscussion o ft he exemplary lives the faithful led before being crucified, torn by wild beasts, burned, or sacrificed in un equal contests against professional gladiators. Not all martyrs, however, were by any means Christian. Dea th w as a r egular part of Roman spectacle, and philosophical pagan martyrs had also died during the pre-Christian era. Accounts of s uch he roic p assings b ecame p opular, a nd when the arenas did not fulfill the public appetite for stories of martyrdom, the genre moved from biography to fictive romance.

Bion of Smyrna (fl. ca. 100 B.C.E.) Greek poet

A lesser pastoral poet often named with—but never thought to equal—Theocritus, Bion of Smyrna is more often considered a peer of a nother bucolic poet, M oschus of S yr acuse. Bi on's su rviving work includes a substantial fragment of a pastoral poem in the Doric dialect of ancient Greek. In it, a shepherd responds to the request of his colleague by singing about the love of the hero A chilles for Deidameia, the daughter of Lycomedes.

One complete poem also survives. \overline{A} is work laments the death of the beautiful youth Adonis, who was cherished both by the goddess of love, Aphrodite, and by the queen of the underworld, Persephone. Zeus decrees that the deified Adonis (known in Syria as \overline{A} amuz) should be annually resurrected, spending part of the year on Earth and part in Hades. Adonis is one of many pre-Christian, resurrected de ities of the Mediterranean world . A n anonymous G reek h and l ater imitated Bion's poem.

Bion died by poisoning, and his death inspired an an onymous lament for the poet. \overline{A} at poem became the model for the 17th-century English poet J ohn M ilton's more p owerful t hrenody, *Lycidas*.

Birds, The Aristophanes (414 B.C.E.)

 \overline{A} e m ost c elebrated of A r isto phanes' u topian comedies, \overline{A} e Birds won the second prize at the Great D ionysia in the year of its first per formance. In this inventive d rama, Eu ripides i magines that two Athenians, Euelpides and Pithetaerus, have become so frustrated with Athens that they have de cided to i nitiate a m ovement to p ut the birds in charge of the universe. To that end, each man has acquired a b ird as a g uide to hel p them find Tereus, a human being who was changed into a bird, usually called a hoopoe. In this play, however, Tereus has become the character Epops—from the ho opoe's Gre ek or nithological n ame upupa epops. Euelpides has a jay and Pithetaerus a crow.

 \overline{A} e play opens with the two Athenians trudging a long, guided by the birds perched on their shoulders. C omplaining t hat t hey ar e l ost an d cannot now find t heir way h ome, b oth m en become a ware t hat their birds a re t rying to g et their a ttention. H earing birds i n t he v icinity, Euelpides sho uts, "Ep ops!" A h uge b ird na med Trochilus a ppears from a thicket, inquiring who is calling his master. \overline{A} e men are so startled that their bowels evacuate. \overline{A} ey learn that Trochilus, too, has o nce b een a ma n, t he s lave o f T ereus. When Tereus changed i nto a ho opoe, T rochilus became a "slave bird" s o he c ould c ontinue to serve Tereus. In the confusion, the birds that have guided the A thenians t o th eir de stination ha ve flown away, and the travellers find themselves in the presence of Epops/Tereus.

Euclpides a nd P ithetaerus e xplain t hat t hey want Tereus to advise t hem where to s ettle, a nd they describe the sort of society they seek. Ā ey want a place where ho spitality is s o w idespread that they seldom need to purchase food or prepare m eals, a pl ace w here pa rents a re offended when their friends *do not* take amorous liberties with their children,

Epops ma kes a pa ir of suggestions, but the Athenians r eject t hem. A ey wonder what l ife among the birds might be like. Epops makes it sound attractive, and Pithetaerus suggests that the birds found a city in the sky and require tribute from human beings for allowing the smoke of t heir s acrifices t o a scend t hrough t he a ir. Epops likes the idea and suggests calling a parliament of the birds, who, he says, he has taught to speak since becoming one of them. He speaks to Procne, who was changed from a woman into a nightingale, and she warbles a beautiful song. Epops h imself t hen si ngs a n i nvitation to t he birds of the air to gather. Members of the ch orus i n c ostumes r epresenting d ifferent b irds come flocking in.

When t he b irds d iscover t hat h ated h uman beings are present, they decide to peck them to pieces a nd d eal with Tereus/Epops later. \overline{A} e Athenians are terrified, but Epops persuades the birds t o l isten to t he m en's proposal. \overline{A} e b irds agree, a nd the A thenians b egin t heir sp eeches. \overline{A} e b irds, t hey s ay, e xisted b efore t he g ods o r even before the earth, and they cite Aesop as their authority. W ith example after far-fetched example a nd a uthority a fter i rrelevant authority, t he two c onvince th eir f eathered l isteners t hat t he primeval a nd n atural m asters of t he u niverse were birds. By degrees, however, the birds' primacy h as b een so far f orgotten t hat n ow t hey a re

prey for humans and disregarded except as a food source or a nuisance.

 \overline{A} e Athenians' far-fetched yarn and their flattery e arn t he c onfidence of t he b irds, a nd t he birds ask how they can regain their earlier ascendancy. (\overline{A} roughout this section, Aristophanes is clearly satirizing people who uncritically accept what ever myths and authorities fit in with their belief s ystem.) \overline{A} e A thenians advise t hat, first, the b irds m ust b uild a b rick w all a round t he entire region of space that separates the heavens from the earth and demand that the gods restore their empire. \overline{A} ey a re a lso to require that no man c an sacrifice to a god without at t he same time making an appropriate sacrifice to a bird—a sacrifice like that of a male gnat to a wren.

What will happen, the birds ask, if men refuse to recognize their deity? Sparrows, the Athenians reply, must then eat up all the human beings' seed corn. Ā e goddess Demeter's failure to r eplace it should co nvince people of t he b irds' d ivinity. Other convincers include having birds p eck the eyes o ut of fa rmyard a nimals a nd fowls. W hen the gods cannot restore sight, people will realize the truth.

 \overline{A} e Athenians further propose, however, that the birds not merely punish people for failing to recognize their divinity, but rather that the birds also win h uman a llegiance b y r ewarding t heir beliefs. \overline{A} e birds will identify the richest mines, predict the weather before sea voyages, and reveal the location of hidden treasures. \overline{A} ese prospects so excite Euelpides that he announces his intention to buy a trading vessel and a spade to d ig trea sure.

Pithetaerus a lso r ecommends t hat the b irds promise to add 300 years to the human life span. Euelpides is now utterly persuaded that birds will be better gods and kings than the Olympian pantheon. Pithetaerus also describes the benefits that will accrue from not having to build temples and from n eeding t o s acrifice o nly a few ker nels o f grain. A ll a gree to m ake t heir dema nds o f t he gods and to explain to human beings the benefits of recognizing the birds as their gods. Pithetaerus and Euelpides have le ft the stage during the chorus's demanding and explaining, and the twon owr eturn to the stage, having grown wings in the interim. Āey decide on a name for the new city that the birds are building in the air. It is to be called Nephelococcygia (Cloud-Cuckoo City), and its patron goddess will be Athena Polias (senile Athena)—satiric barbs at Aristophanes' fellow Athenian citizens.

No sooner has the city been established, however, than members of what A ristophanes considered to be the parasitic classes begin to arrive and ply their trades. First a p riest c omes, then a poet. N ext, a s eller of o racles a rrives on t he scene, closely followed by a real estate developer who wishes to survey the plains of the a ir and parcel them out into lots. An in spector c omes and then a de aler in de crees. Pithetaerus b eats them off. \overline{A} en a messenger comes to report that the city's wall has been b uilt. He de scribes the ingenious c onstruction me thods that v arious breeds of birds have invented to make the wall a reality.

Lowered from a machine, I ris, the Olympian goddess of the rainbow and the gods' messenger to mankind, passes through Nephelococcygia on her way to i nstruct p eople w hat s acrifices t hey must offer the Olympians. \overline{A} e birds ac cost her, explaining that they have taken over as gods. Iris warns the birds n ot to a rouse t he w rath of t he Olympians, and the machine flies her away.

A her ald a nnounces t hat b ird ma nia ha s seized t he h uman p opulation, w hose m embers are n ow i mitating birds i n e verything. H e tel ls the birds that they can expect an immigration of 10,000 people. Pithetaerus, who is the city's leader, instructs that wings be prepared for the new immigrants.

 \overline{A} e first to arrive is a parricide who wants to kill his father and take his wealth. Pithetaerus dissuades him, gives him black wings, and sends him off to be a soldier in \overline{A} race. Next, the poet Cinesias a rrives a nd, over P ithetaerus's s trenuous objections, insists on reciting his dull verse. He is not qualified for wings. An informer arrives who wants wings to help him gather fodder for lawsuits and denunciations. Pithetaerus whips him away.

 \bar{A} e Titan Prometheus (see Tit a ns), masked to conceal h is i dentity f rom a v engeful Z eus, n ext arrives. P rometheus, who was a lways a f riend of mankind, has now decided to b efriend the birds, and he warns Pithetaerus that both the Olympian gods a nd t he ba rbarian g ods, w hom he l umps under the term *Triballi*, are sending emissaries to sue for peace with the birds because people have ceased sa crificing to the old deities. P rometheus advises refusal until the gods give the symbol of their office, the scepter, to the birds and until they give a w oman na med B asilea to P ithetaerus i n marriage. \bar{A} en, borrowing an umbrella to shield him from the gaze of Zeus, Prometheus departs.

Now the emissaries of the gods arrive: Poseidon, H eracles, a nd T riballus. A fter s ome mock disagreement, the emissaries agree to the conditions that Prometheus counseled. Equipped with the scepter of Z eus and clad in a splen did robe, Pithetaerus marries Basilea and becomes the new king of the gods—who are now the birds.

Boethius, Anicius Manlius Severinus

(St. Severinus) (480–526 c.e.) *Roman prose writer, poet*

Also known in the Roman Catholic hagiology as Saint Severinus, Boet hius, the vastly i nfluential polymath a nd st atesman of t he la te R oman Empire, was the scion of a Roman patrician family, the A nicia. When h is father d ied during h is boyhood, Boet hius was r eared in the family of another influential Roman, the prefect and senator Q uintus A urelius M emmius S ymmachus. Symmachus s aw to B oethius's careful e ducation in the fields of language, literature, mathematics, and p hilosophy. B oethius e ventually m arried Symmachus's d aughter, Rusticiana. Possibly also through the influence of S ymmachus, B oethius early c ame t o t he a ttention of t he O strogothic conqueror a nd k ing o f Italy, \overline{A} eoderic, wh o employed B oethius i n a s eries o f i ncreasingly responsible public offices.

In t he y ear 5 10, at t he a ge of 30, Boet hius served a s so le consul—Rome's m ost p restigious but by this time mainly ceremonial office. \overline{A} ereafter, however, he headed the civil service of Rome and became the chief of the officials who served \overline{A} eoderic's court. In 522, \overline{A} eoderic further honored Boethius by appointing his two sons to serve together as the consuls of Rome.

Ā e c ontinual b ickering o f sixth-century Christians over the abstruse question of whether or not Christ was or was not of one substance with God the Father seems to have initiated the series of events that eventually led to Boethius's downfall. A eoderic was a n A rian C hristian, a position deemed heretical by Western Christianity, but o ne t hat had b een su pported i n t he l ate fifth century by the Byzantine patriarch Acacius. Ā e eastern and western branches of the church split on the issue in 484, and Boethius's desire to see the empire unified again seems to have given his enemies an opening to undermine A eoderic's confidence in his chief official. Perhaps A eoderic suspected him of sympathizing with the persecution of Arians. In a ny case, B oethius's en emies accused him of corruption in office and perhaps of treason. Boethius claimed that their evidence was falsified, but he was nonetheless found guilty and sentenced to death.

Boethius exercised h is r ight of a ppeal to the Roman Senate, and while that appeal was pending and he was in prison, he wrote his most celebrated work, \overline{A} e Consolation of Phil oso phy. In that work, in whose pages Boethius conducts a dialogue with Lady Philosophy, he not only comforts himself as he faces his own mortality, but in a series of ly rics he a lso r eveals h imself to b e a gifted poet. In due course, the Senate found, not surprisingly, f or t he k ing's v iew of B oethius's guilt, and B oethius was first t ortured and t hen clubbed to death in the city of Pavia.

96 Book of Changes

Mastery of t he Gr eek l anguage had b ecome unusual am ong sixth- æntury Romans, but Boethius h ad l earned t he l anguage t horoughly. Fearing t hat a ncient G reek p hilosophy was a n endangered species, Boethius u ndertook to rescue it by setting h imself t he a mbitious g oal of translating all of P l at o a nd all of A ristot l e. \overline{A} ough he failed to achieve that objective fully, he nonetheless did translate and comment on the scholar and phi l ∞ o phe Por phyry's *Introduction to the Categories of A ristotle*. He also completed t ranslations of A ristotle's t reatises o n logic, including *Analytics*, both *Prior* and *Posterior, On Interpretation*, and *Topics*. He also commented on Cic er o's *Topics*.

Boethius's interests extended as well to music and mathematics, and he prepared textbooks on both these subjects. Å e one on music was still in use as late as the 18th century, and those on mathematics and number theory served for 1,000 years as important s chool t exts. B eyond t hat, he m ay also have written on astronomy.

It would be difficult to exaggerate Boet hius's intellectual importance to the Middle Ages and to the Renaissance. His Consolation of Philosophy attracted such distinguished translators as King Alfred the G reat, who r endered it i nto Anglo-Saxon, a nd Geo ffrey C haucer, w ho p rovided a similar service for the readers of Middle English. More importantly, in addition to his own contributions to the field of logic, Boethius's translations a nd c ommentaries o n A ristotle a nd Porphyry were the principal vehicles that preserved any knowledge of Aristotle for the European Middle Ages. Medieval debates concerning the nature o f r eality were g rounded i n B oethius's remarks about Porphyry. A much-quoted description of uncertain origin fixes the place of Boethius in the intellectual edifice of the Western world. Ā e quo tation p roposes t hat he w as "the last of the Romans" and "the first of the scholastics."

Book of Changes (*Yijing, I ching*) (ca. 800 B.C.E)

Originally thought to have been composed by the

founder of the Chou dynasty, King Wen, and at first a work s eparate f rom C onfucian do ctrine, over time the *Yijing—Book of Changes*—became incorporated into the Confucian canon as one of its five classic d ocuments. Ā e *Book of Changes* fulfills a function not performed by the other four Confucian foundational documents.

As it n ow e xists, t he he art of t he w ork is a handbook for foretelling the future directions of the universe. Ā e handbook contains brief, cryptic p redictions o rganized u nder a s eries of 6 4 hexagrams c omposed of b roken a nd u nbroken lines. B y cas ting a s eries of n umbered ob jects called *divining stalks*, whose odd numbers stood for br oken a nd e ven f or u nbroken l ines i n t he hexagrams, d iviners s elected a p articular he xagram, found t he p rediction l isted u nder it, a nd then o ffered t heir i nterpretations a bout n ot s o much the course of coming events but, rather, of general tendencies in the universe.

 \overline{A} e balance of the *Book of Changes* is made up of commentaries called *the ten wings*. \overline{A} ese treat questions c oncerning t he na ture of t he c osmos and attempt to add ress such metaphysical issues as the nature of being and reality. \overline{A} ey also sometimes explain the metaphors involved in the interpretations of the hexagrams. \overline{A} e *Book of Changes* is the only one of the five central texts of Confucianism that directly addresses such issues.

Book of Lord Shang (Shangjun shu, Shang-chün schu) (ca. 400 B.C.E.)

Principally in essay form, the *Book of Lord Shang* represents a prose, legalist subcategory of ancient Chinese l iterature. A n imperial a dvisor, W ei Yang, whom the Ch'in (Qin) emperor en nobled as lord of the region of Shang in the Huang Ho basin, probably wrote the book's 24 brief essays. All of these essays address the subject of practical politics and the courses of action that rulers must implement to c reate a s trong and he althy s tate. \overline{A} e c entral m essage r equires, first, the encouragement of agriculture to provide the economic basis for a strong government. Second, it advises a program of a ggressive w arfare t o e nhance s tate power and further contribute to the treasury.

With respect to relationships between the ruler and the ruled, the ruler must put in place a system of carrots and sticks. He must generously reward compliance with his programs and brutally punish n oncompliance. On e wonders w hether the 20th- century Chinese Cultural Revolution under Mao Zedong might have drawn inspiration from the *Book of Lord Shang*.

À e literary h istorian Bu rton W atson quo tes Lord S hang as as suring h is r eader t hat "mercy and benevolence are the mother[s] of error." Lord Shang promulgates an active program of cruelty and repression.

Book of Odes (Shi jing, Shih Ching) (ca. 700–600 B.C.E.)

One of the five foundational documents of Chinese Confucianism, in its current form the *Book of Odes* contains 305 rhymed songs. Some of the individual s ongs ma y w ell b e ol der t han t he dates given above for the collected version. One of the songs alludes to a datable solar eclipse that occurred on A ugust 2 9, 77 5 b.c.e. Five o thers reportedly date to the Shang dynasty (ca. 1600–ca. 1028 b.c.e.).

Said to have been selected by Confucius himself from a collection containing some 3,000 ballads, the poems are organized according to four principal topics. First appears a group of ballads that r eflect t he l ives a nd c ustoms o f c ommon people from around the feudal states comprising the Chinese Empire. Ā e literary historian Herbert A. Giles tells us that local nobles would periodically forward examples of these ballads to the imperial court. A ere the chief musicians of the realm would examine the songs carefully and, on the basis of their analysis, report, first, what customs prevailed in the states and how the people comported themselves. Second, the royal musicians would report their opinions concerning whether or not the emperor's sub ordinate officials in the various states were ruling well or wickedly.

 \bar{A} e s econd g roup o f o des i n t he c ollection included those composed for performance at ordinary entertainments in the subordinate states. \bar{A} e third group contained special odes written for performance at c onventions o f t he f eudal n obility. \bar{A} e fourth group contained poems of praise and

98 Book of Odes

poems intended to ac company sacrifices on religious occasions.

A number of the poems are love verses on the sorts of s ubjects that o ccupied couples e verywhere in the days before the intervention of technology in the natural consequences of lovemaking. Maidens e xpressed c oncern a bout t heir v irtue and their parents' attitudes toward their behavior. \overline{A} ey encouraged or reproved their lovers. Wives repined a bout t he high ho pes t hey o nce en tertained f or t heir ma rried l ives b efore t heir h usbands strayed. Good marriages are celebrated.

Warfare is another subject treated in the *Book of Odes*. So are the passage of the seasons, agricultural pursuits of various sorts, and hunting. Grievances against p ublic o fficials and too-frequent m ilitary conscription a lso appear a mong t he to pics r epresented. Lovely nature poems appear frequently.

A significant strain of misogyny reveals itself in t he w ay w omen a nd g irls a re d rawn i n t he poems. \overline{A} e d ifferent t reatment o f g irl a nd b oy babies in the imperial household makes clear, for example, that the boys are destined for r ule and the g irls f or household t asks. M oreover, c lever women are considered dangers to the state since, despite t heir i ntelligence, t he a ncient C hinese considered them to be untrainable.

 \overline{A} e representation of those who tilled the soil was s ympathetic, and the p ublic p rovision f or widows by leaving some grain standing or sheaves unbound or handfuls uncollected is reminiscent of p assages b oth in the Babylonian Code of Hammur ab i and in the Hebrew scriptures.

 \overline{A} e ancient Chinese view of God also becomes manifest in the odes. \overline{A} at view is not incompatible with many ot her a ncient views. \overline{A} e Chinese thought of God—or the ruler of the pantheon of gods—as human and masculine and at least sometimes corporeal. He was considered kind and loving and thought to be a friend to the downtrodden. He disapproved of bad behavior, and he found the odor of burnt offerings pleasing.

Confucius had a very high opinion of the odes and e neouraged all who a spired to p ublic office, including his own son, to commit them to memory. He saw in their implications the foundations of statecraft and thought that initiates who both knew the odes by heart and understood the subtleties of their implications should conduct diplomacy. After Confucius, in f act, s uch k nowledge a nd u nderstanding became requisite for public officials, and for a long time the language of the odes was also the language of diplomacy as officials communicated their negotiating positions and expectations by means of quoting relevant passages.

Given the centrality of these poems to the conduct of government, it should be no surprise that commentators so on burdened the odes' primary texts with a heavy weight of allegorical and symbolic interpretation. Mastery of that commentary, too, became an expectation for those who aspired to public office.

After the ruler of the state of Ch'in (Qin) brought all of China u nder h is a bsolute do minion i n 221 b.c.e., the old ways of doing business seemed inappropriate, especially since criticism of state policy was one of the functions of the odes. Ā erefore, in 213 b.c.e., t he Ha n em peror app roved a pl an to burn all the ancient books so they could not serve as a platform for political dissidents. Ā at plan was carried out with significant effect. Fortunately for literary posterity, however, the suppression of older literature was not altogether successful, and much, including the *Book of Odes*, survives for the edification of contemporary readers and scholars.

Book of Rites (Chou Li, 1 Li, Li Chi)

(ca. 100 b.c.e.)

One of the five classics of the Chinese Confucian canon, the *Book of Rites* is an idealized behavioral guide. Its first section, *Chou Li*, gives a romanticized a ccount o f C hou (Zhou) d ynasty bureaucracy. (See a ncient Chinese dynast ies and periods.) \overline{A} is section has often proved useful to later statesmen in s earch of a uthoritative precedent for their policies.

ILi, the book's second section, prescribes detailed rules for all facets of the public behavior of aristocrats. If one is in doubt about how to comport oneself at weddings, a rchery contests, f unerals, ba nquets, s acrifices, a nd t he like, one need only consult the *I Li*. Suppose, for example, that one is an official escort for a corpse whose eternal resting place is more than a d ay's jo urney a way. E veryone k nows, o f course, that the cortege must proceed only during the daylight hours and never travel at night. What, however, must it do in the event of a solar eclipse? The ILi provides unembellished but detailed, straightforward, factual guidance: The funeral procession must stop on the left side of t he road a nd wait u ntil t he sun reappears before proceeding.

 \tilde{A} e principal section of the *Book of Rites* is the *Li Chi*. Longer and more varied in content than the other sections, it sometimes resembles the *I Li* in providing careful guidance for such matters as house hold management or naming a n ewborn. Beyond that, however, the *Li chi* also contains formal considerations of topics like education, music, or the pl ace of r itual in the scheme of h uman existence.

Two o ther i ncluded e ssays, r espectively e ntitled "Ā e Great Learning" and "Do ctrine of the Mean," h ave been i nfluential i n t he subs equent history of C hinese t hinking. An other c onsiders the principles by which a t rue Confucian should live: "Behavior of a Confucian."

 \overline{A} e literary historian Burton Watson calls partic ular attention to the *Li Chi*'s r egular e ffort to reconcile a ncient, pre-Confucian f uneral r itual

with the work's contemporary Confucian belief concerning death. A ough the old rituals incorporated t he b urial o f f uneral g oods w ith t he deceased, then-contemporary C onfucian b elief did not suppose that such items as musical instruments or dishes would be of any comfort to t he departed, n or d id t hey c redit a su rviving sp irit. Rather, such rituals expressed the wishes of survivors that such o bjects could still benefit t heir dead loved one. Confucian belief held that human wishes should n ot be suppressed b ut, in stead, directed in a positive way. A e inclusion of grave goods in burials gives comfort to the living. At the same time, grave goods should not be items that l iving p ersons w ould find u seful. S o t he goods might consist of items that are either worn out or unfinished.

Many passages of the Li Chi take the form of anecdotes attributed to or concerning Confucius and his disciples, but these appear to be parables a nd n ot to b e t aken l iterally. I n i ts current form, le gend ha s it t hat t wo c ousins named Tai the Elder and Tai the Younger prepared the Li Chi. It purports to be a compilation dr awn fr om the work of Confucius and his disciples. Tai the Elder reduced his source materials to 8 5 s ections. T ai t he Y ounger, rejecting m aterial t hat had a lready app eared elsewhere, winnowed the work further to 4 6 sections. L ater s cholars t hen had t heir w ay with the t ext, s o th at the w ork a s w e h ave received it a cquired it s c urrent for m a round 200 c .e. Its m ost r ecent E nglish tr anslator, James Legge, terms the work an "encyclopedia of ancient ceremonial usages."

Book of the Dead (Reu Nu Pert Em Hru, Chapters of Coming Forth by

Day) (before 2350 B.C.E.)

Apparently already ancient as a traditional body of or al f unerary m aterial e ven bef ore h ier ogl yphs had b een i nvented, at le ast s ome of t he texts collected in the Book of the Dead seem to have o riginated o utside E gypt, s omewhere i n Asia. P hysical ev idence of t he b urial p ractices described in the collection of scrolled papyri and monumental i nscriptions t hat c onstitutes t he book does not exist among the aboriginal inhabitants of Egypt. Rather, that evidence begins to appear contemporaneously with the arrival from the east of unknown Asian conquerors who, following their conquest, eventually established the pharaonic dynasties that ruled Egypt for millennia (ca. 3 100/3000 b.c.e.–ca. 5 50 c.e.). A t l east parts of the book seem to have been already widely known—perhaps in oral form—before the first of those dynasties.

 ${\rm \ddot{A}}\,$ e E gyptologist E . A . W allis Bud ge a rgues that over time, the Book of the Dead came to reflect the beliefs not only of the conquerors but also of the conquered and of the various other peoples who came to c ompose Egyptian society in the dynastic period. Central to that system of beliefs is faith in the resurrection of the human dead in the afterlife. the Book of the Dead reflects the belief that King Osiris-at once a god and a man-had s uffered de ath a nd p erhaps t he d ismemberment (in early versions) but certainly (in later ones) the mutilation of his body, which had been e mbalmed. H is si sters, Isi s a nd N ephthys, had, ho wever, g iven O siris ma gical ob jects t hat warded off all harms in the afterworld. Å e sisters also recited a series of incantations that conferred everlasting life upon Osiris. His followers believed that, like Osiris, who had conquered death, they would live forever, perfectly happy in perfect bodies. Bud ge quo tes w ords add ressed b y t he g od Ā oth to Osiris, who "makes men and women to be born again."

Within t he f ramework o f a ncient E gyptian religion, people considered the Book of the Dead

to be of divine origin and to have been written down by the god \overline{A} oth, who was the scribe of the Egyptian pantheon. Like the sacred writings of all major religions, however, the text of the Book of the Dead endured many human emendations, additions, and dele tions over i ts long h istory. Papyria nd i nscriptions r epresenting v arious stages in the d evelopment of the book r eveal many changes, some intentional and some apparently owing to scribal error.

As the major text of Egyptian religion, however, t he B ook of t he De ad a lways r etained i ts central purpose: the protection of the dead in the next l ife. À ere, a fter b eing j udged a nd f ound worthy, and after being reborn in a perfect body, the d ead w ould a gain s ee t heir pa rents, en joy material comforts akin to those of this world, be free from onerous labor, and participate in many of the same pleasures they had enjoyed while living. To help achieve those ends, the book or portions o f i t were re cited on a person's d eath. Reciting sp ecific cha pters co nferred spe cific benefits on the departed. Reciting chapter 53, for example, p rotected t he de ceased f rom t ripping and falling in the other world and assured access to heavenly food rather than to offal. Chapter 99 named all the parts of a magic boat. A ese names the deceased needed to know to qualify as a master ma riner a nd ena ble h im or her to s ail i n a magic boat across the heavens as the sun god Ra did each day. Reciting chapter 25 restored a dead person's memory. A is made poss ible re calling one's o wn name-a c entral r equirement f or immortality. It also called to the deceased's mind the names of the gods he might encounter in the afterlife. Reciting other chapters conferred upon the deceased the power to transform oneself into the shapes of other creatures: birds, serpents, or crocodiles, f or ex ample. A ough c onsiderations of space here prohibit more than a tiny representative sampling of the whole, at least one compelling example deserves a fuller treatment.

 \overline{A} e e ternal su rvival of a f ully self-conscious individual in the afterlife was contingent upon a last judgment. \overline{A} is was n ot so mething that occurred at the end of time, but rather came soon after a corpse's entombment. A e deceased is represented as entering the presence of an enthroned Osiris and other deities, including $\bar{\mathrm{A}}\,$ oth and the dog-headed god, Anubis. Anubis weighs the heart of the deceased on a scale in which the heart is counterbalanced by a feather. A oth records the result of the weigh-in. If the heart is light enough, the justified deceased is admitted to the presence of t he e nthroned Osiris-sometimes p ortrayed wrapped as a mummy since Osiris also died and was reborn-and into the company of immortals. If the heart fails the test, a tripartite monster with the head of a crocodile or other carnivore, the forepart of a hyena, and the rear quarters of a dog eats t he c andidate, a nd t he fa iled so ul s imply passes from existence.

To assure access to the text in the next world, copies of the book or portions of it were sometimes b uried in the c offins of dead pers ons, sometimes inscribed upon the walls of a to mb, sometimes written on the inside of the coffin, or sometimes placed within a hollow wooden statue of the g od O siris. A s E gypt's f ortunes waned—especially in the face of Roman expansion and the introduction of C hristianity, and finally after the A rab conquest of Egypt in 642 c.e.—deceased persons increasingly had to make do with less and less of the text. Toward the end of the survival of the old religion the book had detailed, j ust sn ippets of the text were buried with the departed.

As it is known today, the Book of the Dead survives in three major versions or recensions. \overline{A} e oldest of these is the Heliopolitan Recension, whose text is to be found in hieroglyphic inscriptions at the Pyramids at Saqqara. \overline{A} ese date from the fifth and sixth dy nasties (ended c a. 23 50 b.c.e.). One finds these texts occurring as cursive hieroglyphics on c offins as late as the 1 1th and 12th dynasties (2081–1756 b.c.e.). \overline{A} e fullest version of the Book of the Dead appears in the \overline{A} eban Recension. \overline{A} is text occurs both written on papyrus and pa inted on c offins in hieroglyphs from the Eighteenth to the Twenty-second Dynasties (ca. 16th–10th centuries b.c.e.), and written in hieratic script on papy rus in the Twenty-first and Twenty-second Dynasties. \overline{A} e final version of the text is that of the Saïte Re cension, which appeared in various scripts on tombs, coffins, and papyri from the Twenty-sixth Dynasty until the demise of the ancient Egyptian religion. \overline{A} is version was widely employed after the Greek Ptolemy family, to which Cleopatra belonged, assumed the role of pharaohs in Egypt.

Books from the Foundation of the City [of Rome] (*Ab urbe condita libri*) Livy (28-ca. 9 B.C.E.)

Livy began the composition of his 142-book history of Rome s ometime s hortly b efore 27 b. c.e. and, a s th e c lassicist J ohn B riscoe t ells u s, had completed the first five books by 25 b.c.e. S urviving portions of Livy's history include books 1–10 and books 21–45, though 41 and 43–45 have suffered lo sses. From time to time, more fragments continue t o s urface. A formerly u nknown f ragment, for example, was discovered as late as 1986.

In a ddition to w hat rema ins of L ivy's t ext, there are also ancient summaries of parts of h is work. Ā ese abridgments include the "Oxyr hynch us Ep itome," written on papyrus and summarizing books 37–40 and 48–55. Additionally, there are ancient summaries called *Periochae* that date to around the early third century c.e. Ā ough not necessarily always accurate, comparative readings

of the surviving text and the summaries suggest that we can place a g ood de al of c onfidence i n them. I rely heavily on them for the précis of the extant books below.

Stylistically, Livy is the most elegant and effective of the historians of Rome. In the early sections, a s h e traces Rome from the legendary arrival of A eneas, a p rince of T roy, L ivy r elies heavily on legendary and mythic materials. \overline{A} e closer he comes to h is own times, the fuller h is accounts become. I t is v ery c lear t hat Livy is interested in i dentifying w hat q ualities h ave determined both t he Roman character and t he Roman p olitical s ystem. H is s ympathies a re drawn to the Roman Republic, though he seems to think that the imperial sovereignty of Augustus i s an ecessary e xpedient f or L ivy's o wn epoch.

Ā e first book of Livy's history begins, then, with the arrival of Aeneas and recapitulates Virgil's ac counts of A eneas's ac complishments (see Aeneid). Livy follows the reign of Aeneas's son, Ascanius, and h is de scendants i n t he r egion o f Alba. H e r ecounts t he b irth o f R omulus and Remus and Romulus's construction of the city of Rome, h is e stablishment of t he Ro man S enate, his warfare against the Sabines, his reverence for Jupiter, h is ad ministrative a rrangements for t he Roman people, and his erection of a temple to the two-faced god J anus. A is tem ple was a lways open when Rome was at war and closed when she was at peace. Romulus was able to close the temple and enjoy a peaceful reign. Livy traces innovations through several generations, telling about conquests, t he i ncorporation o f d efeated t ribes into the populace of Rome, the creation of new senators and aristocrats, and the construction of a city wall and sewers.

In Book 2, Livy recounts the rape of the virtuous Roman heroine Lucretia by Sextus Tarquin one of the most famous of Roman stories. \overline{A} e Tarquin lin e, whose members had made themselves kings, were dethroned and the Roman republic established as a result of the public outrage at Lucretia's rape and suicide. \overline{A} e author recounts the way in which Lucius Iunius Brutus thwarted the several attempts of the Tarquin line to restore the monarchy by guile and by force of arms. Livy tells of the creation of the institution of the t ribunes of the people and of the burial alive of the u nchaste v estal virgin, O ppia. Ā e rest of book 2 gives accounts of a series of wars.

Book 3 tracks such internal difficulties of the Roman s tate a s r iots a bout a grarian l aws a nd rebellion by exiles and slaves. It also covers external wars. A e b ook t races t he n ew i nstitutions established for governing Rome more effectively, including the introduction of a code of laws in 10 tables. A e De cimvirs (a committee of 10 m en), who were charged with this responsibility, thereafter be came t he ad ministrators of justice. Livy tells howt hey d idt his fairly at first but la ter became corrupt. When one of them, Appius, tried to c orrupt Vi rginia, t he d aughter o f Vi rginius, the c ommon p eople f orced t he De cimvirs to resign, ja iling the two worst o nes, A ppius a nd Oppius, who subsequently committed suicide. (In the 14th century, Geoffrey Chaucer told the story of Vi rginia's abduction i n " A e Ma n o f L aw's Tale" [$\overline{A} \ e \ C$ anterbury T ales].) A fter f urther description of warfare, Livy recounts the unfair decision of t he Romans when, a sked to j udge a land d ispute, t hey f ound f or n either pa rty b ut temporarily took the land themselves.

Books 4 and 5 c onsider the establishment of new civic offices, such as that of censor, and the operations of the t emporary office of dictator under Quintius Cincinnatus. At this time, a rebellion of s laves t ook p lace, and the R oman a rmy was first p ut u pon a professional footing. M ilitary i nnovations were a lso i ntroduced, such a s erecting winter quarters and having cavalrymen ride t heir o wn horses (as o pposed t o army mounts).

Called upon to mediate in a war between the Clusians and the Gauls, the Romans were found to be partial to the Clusians. As a result, the Gauls attacked and occupied Rome; the Romans capitulated a nd a greed to r ansom t hemselves. A s t he gold w as b eing w eighed, t he d ictator C amillus arrived w ith an ar my, drove t he G auls o ut o f Rome, and exterminated their army. Book 6 examines one of a recurrent series of executions, which took place whenever someone was suspected of attempting to gain royal power. \overline{A} e victim in Book 6 is Marcus Manlius, who was executed b y bei ng t hrown fr om the T arpeian Rock—a r egular m ethod o f le gal e xecution i n archaic Rome. \overline{A} e s ame b ook r ecords t he successful c ampaign by t he Ro man c ommoners to gain the right to elect the consuls rather than have them appointed by the senate and patricians.

Livy first makes use of extended scenic descriptions in Book 7. I n a ddition to describing single combat, the h istorian r ecounts s uch m emorable events as leaping on horseback i nto a n a rtificial lake. H e a lso d iscusses the e nlargement of t he Roman population and the or gan iza ton d expedients developed to de al e fficiently with th e increase. \overline{A} e history of the army, the near revolt of the garrison at Capua, and its return to d uty and patriotism also interest Livy in this book. So do successful military operations against several tribal peoples.

Rebellion a nd suc cessful n egotiation a re major themes of Book 8, which documents how the rebellious Campanians obtained a consul to represent their interests at Rome. Livy revisits the theme of a vestal virgin p ut to de ath for corruption—this time for in cest. For the first time, a Roman official, Quintus Publilius, occupied a n office for a period of time beyond h is term. Rome fought against the de scendants of the S abines, th e S amnites; a nd t he d ictator, Lucius Pap irius, w ished t o punish Quintus Fabius, the victor, for d isobeying orders. Re ason prevailed.

In Bo ok 9, Livy d escribes c ontinued battles with the Samnites and the Roman expansion of power by fighting against o ther na tive t ribes o f Italy, including the Apulians, Etruscans, Umbrians, Marsians, Pelignians, and Aequans. Alexander t he Gr eat w as c onducting h is c onquests during t he t ime that book 9 c overs, s o L ivy digresses t o assess t he c omparative s trength o f the R omans and Al exander's army. L ivy c oncludes that Alexander did well to c arry his campaign of world conquest eastward to Asia instead of westward to Italy. $\bar{\mathrm{A}}\,$ e Romans could well have been his match.

Book 10 continues the discussion of the wars. Eventual v ictory fell to Ro me, w hich n ow had mastery of most of the Italian peninsula. A c ensus of the population found 262,322 Roman citizens in 291 b.c.e.—the 461st year of the history of the Roman people.

Highlights from the summarized accounts of the lost books (11–20) include the founding of the temple of the deity of medicine, Aesculapius, on the island of the Tiber River following a ter rible plague. W hen t he Ro mans i mported t he g od's image from Epidaurus, a gigantic serpent that the Romans b elieved to b e t he g od h imself c ame along and took up residence in the temple (Book 11). Å e year 281 b.c.e. saw the first athletic games staged in Rome.

Books 12-14 trace the attempts by the Molossian king, Pyrrhus of Epirus, to a ssist the Grecian inhabitants of the southern Italian city of Tarentum in their military challenge to Roman supremacy on the Italian pennisula. Essentially a mercenary leader, Pyrrhus brought both troops and eight ele phants i nto I taly. A s t he Ro man soldiers ha d n ot s een ele phants b efore, t he beasts' appearance threw the Romans into disarray, and they were defeated. Nonetheless, Pyrrhus re marked t hat t he de ad Rom an s oldiers had all fallen facing the enemy. Eventually, however, the elephants were slain, and after years of hard effort, Pyrrhus was forced to leave Italy in 273 b. c.e. Two years later, as Book 15 reports, the T arentines were finally d efeated. Rome granted them both peace and freedom.

Books 16–18 detail the Roman conduct of the first Punic War against the North African city of Carthage. Book 20 traces the incursion of transalpine Gauls into Italy and their defeat in 236 b. c.e. For the first time, Roman troops advanced north of the River Po, and the Roman army numbered more than 300,000 men.

As earlier noted, the closer Livy gets to his own time, the longer and more circumstantial his discussion of events becomes. When we again arrive, then, at the books s till extant, we find

Picking u p at Book 37, a fter a h iatus in the extant version, the summaries recount the slaughter of Romans in Spain. \overline{A} en the Romans gained victory in Lusitania (modern Portugal) and founded a colony there. In Book 38, Livy tells the story of how a high-ranking female prisoner, the queen of G alatia, k illed a Roman c enturion w ho had assaulted her. On being set free, the queen carried the centurion's head home to her husband.

Book 39 mentions the abolition of the rites of the cult of Bacchus in Rome. \overline{A} e Romans continued mopping up in Spain.

A break in the summaries occurs at this point, and they resume with book 46, which records the Roman population as 337,022, according to a census. Ā e book reports a throne usurped in Egypt and the various campaigns of the Roman army in Europe and in the Middle East. A notable achievement of the years 167–160 b.c.e. was the draining of the Pontine marshes and their reclamation as farmland.

Book 4 7 d escribes t he lead-up to t he t hird Punic War. While they denied their hostile intentions, t he Carthaginians n onetheless hoa rded timber for ship building and fielded an army.

Among t he i nteresting h istorical de tails t hat Livy pauses to describe in this book are the funeral instructions left by Marcus Aemilius Lepidus, the chief of the Roman senate. He limited the money his sons could spend on the occasion, remarking that the dignity of the funerals of the great had its origin not in e xpenditure b ut in t he p arade o f ancestral p ortraits th at p receded th e b ier of th e deceased. Livy also remarks on the unusual number of R oman w omen w ho were p oisoning t heir husbands.

Despite Carthaginian claims to the contrary, the Romans b ecame c onvinced of t heir i ntention to

make war. A e Romans sent an army to Carthage, where they made such exorbitant demands that the Carthaginians were forced to take up arms.

Military history occupies most of the next several books. Å e Numantine W ar succeeded the third Punic War, and a former shepherd turned military commander s taged a successful r evolt against the Romans in Lusitania. Livy's vivid narrative makes clear the increasingly international focus of Roman affairs as the once lo cal and regional power came to dominate the affairs of the Mediterranean world.

After de scribing the r igorous m ilitary d iscipline of the great Roman general S cipio A fricanus i n B ook 57, L ivy turns hi s a ttention for a while to the political situation in Rome, describing the ambitions of the Gracchus family and the illegalities th ey a ttempted to ac hieve t hem. S o incensed did members of the upper class become at the Gracchi's assault on their prerogatives that they i ncited a r iot i n w hich G aius S empronius Gracchus w as m urdered a nd t hrown i nto t he Tiber. Further wars and the subsequent careers of members of the Gracchus family o ccupy several further books.

Book 61 records the founding of the colony of Aquae S extae (contemporary Aix- en Provence, France), named for the six waters of its hot and cold springs. In the next several books, accounts of military actions in Africa and against the tribal peoples of northern Europe grow more frequent, while the population of the city of Rome approached 400,000. In Book 68, the name of Gaius Marius, one of the greatest h eroes of Rom an a rms, is m entioned i n connection with his being made consul (the Roman head of state and its military commander in chief) for the fifth time.

Book 70 emphasizes politi al events at Rome, diplomatic m issions a broad, a nd a lso c ontains reports of m ilitary a ctions i n Syria. With B ook 73, re aders find t hemselves b eing dr awn i nto accounts of the run-up to the Roman civil wars that culminated with the election of Jul ius Ca esa r a s dictator for life. Book 78, however, concentrates on the revolt of M ithradates V I Eu pator, king of Pontus, in Asia and tells of the arrangements he made to have every Roman citizen in Asia slaughtered on the same day.

Back in the city of Rome, says Book 79, the consul Lucius Cinna was using violence and force of a rms t o force "ruinous legislation" through the S enate. Livy interpolates t he s ad s tory of a soldier wh o k illed h is b rother, n ot r ecognizing him until he stripped the body of its armor. \overline{A} en he built a py re to c remate h is brother and committed suicide, h is b ody bu rning together with his sibling's.

All the p eoples of I taly were g ranted Ro man citizenship i n 8 9 b .c.e.—a f act L ivy belatedly reports in Book 80. Cinna and Marius had become consular a llies, and t ogether the t wo c onducted unpre ædented military operations within the city against t heir p olitical en emies, t hen app ointed themselves consuls. Marius died on January 15, 87 b.c.e. Livy considers the question of whether the good or ill Marius did for Rome weighs most heavily i n th e ba lance o f Ma rius's l ife ac complishments. A s a general, he had saved the state from foreign enemies. As a politician, he had ruined the state with his untrustworthiness, even devastating the R oman s tate w ith w arfare w ithin t he c ity walls.

Books 8 1–90, st ill set ting t he s tage f or t he Roman civil wars, follow the remarkable career of Lucius C ornelius Su lla. Sulla s uccessfully c ommanded Ro man a rmies, r esisted t he p olitical opposition of Marius by threatening Rome with his troops, and waged successful war against dissident peoples of Italy. Having overcome all opposition, Su lla had h imself made d ictator. I n t hat capacity, h e forcibly s ettled h is veterans o n t he confiscated lands of communities that had proved hostile to Rome. As dictator, he also restored control of the government to the Roman senate and reformed t he c riminal c ourts. A inking h e h ad saved the republic, he retired from public life in 79 b.c.e. Sulla likely shortened his life by a retirement spent i n u nbridled d issipation. H e d ied in 80 b. c.e.; his reforms survived him by about a decade.

In Bo ok 90, Li vy turns hi s a ttention t o the career of Gnaeus Pompeius—Pompey—the sometime father- in hw and c olleague a nd l ater t he enemy of Julius C aesar. With P ompey's a rrival on the scene, Livy begins to describe the Roman civil wa rs i n ea rnest. A s hi s s ource, h e used Lucan's unfinished *Civil W ar* (*Pharsalia*); the content of that epic can be read in the entry for the w ork. (See a lso J ulius C aesar's \overline{A} e Civil Wars.) \overline{A} e su mmaries en d w ith b ook 142, i n which we find d escribed t he pa rticipation o f Rome's first emperor, August us C aesar, in the funeral of the Roman general Nero Claudius Drusus, who died in the field in 9 b .c.e. of injuries sustained when his horse threw him.

In the books that survive intact, Livy makes much u se of d irect di scourse, with descriptions that are apt and c olorful. He is the u nanimous choice a mong modern h istorians for b est prose writer of Roman history.

To whet h is a udience's appetite for more of the self- admiring character, P lautus def ers the pl ay's prologue in favor of a dialogue between Pyrgopolynices and his overtly fawning but covertly contemptuous s lave, Artotrogus—another cha racter t ype, the parasite who in this case is paid to be an admirer. especially a ttractive t o Roman a udiences si nce almost all the men had b een soldiers, and c ustom required modest silence from veterans concerning their m ilitary e xploits. A b raggart s oldier, t herefore, was a universal object of scornful satire.

As the play opens, Pyrgopolynices, in contrast with Roman expectations, is a dmiring his shield and s word a nd f eeling s orry f or t he w eapons because t hey te mporarily lack t he sort of h eroic action that he alone can give them. To his master's face, A rtotrogus flatters t he s oldier's e go b y describing impossible deeds, like punching out an elephant, while sniggering about them in asides to the audience. He also keeps track of the impossible numbers of foes that Pyrgopolynices either killed or would have killed had the circumstances been right. B eyond t hat, Ar totrogus p raises t he c onceited so Idier's g ood l ooks a nd h is app eal to women.

Ā e t wo g o off to en list n ew r ecruits f or t he army, an d t he sp eaker of t he b elated p rologue, Palaestrio, t akes t he s tage. Pa laestrio, w ho i s another of Pyrgopolynices' servants, explains that the play is drawn from Greek models that featured the alazon-a braggart who is a fraud, a lecher, and a c heat a s w ell. Pa laestrio a lso e xplains t hat t he play is set in Ephesus, a c ity to w hich h is master has forcibly abducted a young woman, Philocomasium. She had b een the concubine of Pa laestrio's former master, P leusicles, i n A thens bef ore h er abduction. W hen t he b raggart t ook the g irl, Palaestrio set out by s hip t o i nform his former master. Pirates, however, attacked Palaestrio's vessel, and he himself was captured. By chance, which always plays a major role in such mannered comedies, those same pirate-kidnappers gave Palaestrio to Pyrgopolynices as a slave.

Knowing P hilocomasium's wh ereabouts, Palaestrio was able to sm uggle a letter to P leusicles, who immediately came to Ephesus and now is lodging right next door at the home of an elderly f riend, P eriplectomenus. Pa laestrio ha s b een able to tunnel through the shared wall of the two houses to t he b edroom of P hilocomasium, w ho can crawl back and forth and, eventually, pretend to be her own twin. As the play begins, Periplectomenus reports to Palaestrio t hat s omeone from the b raggart s oldier's household ha s sp otted P hilocomasium through the s kylight while she w as v isiting t he adjoining r esidence a nd k issing P leusicles. \overline{A} e old ma n app oints Pa laestrio to de vise a plo t to outfox t he n eighbors. P alaestrio cogitates histrionically a nd for mulates a s cheme. H e i nvents a newly arrived twin sister for Philocomasium—the sister that she herself will represent to the confusion of her captor and his household.

Palaestrio's next task is to discover *which* of his master's servants saw the girl. Å e slave Sceledrus immediately r esolves t hat proble m by s haring with Palaestrio that it was he. Palaestrio artfully convinces Sceledrus that he did not see the girl, first by going inside and reporting Philocomasium's presence at home, and then, while Sceledrus guards the next door, by bringing the girl from her abductor's house.

Despite t he f act t hat S celedrus k nows o f n o possible p assage bet ween the houses, h e insists that he believes the evidence of his eyes and will not b e d issuaded, u ntil P hilocomasium ha s a thought. She says she remembers dreaming that her twin sister had arrived from Athens and was staying n ext d oor in E phesus and th at, j ust a s Sceledrus had done, a slave who confused the sisters ac cused her o f i nfidelity. P hilocomasium goes i nto t he br aggart's house, a nd Sce ledrus, now b eginning to do ubt h is eyes, moves over to guard that door.

 \overline{A} e girl soon appears at the door of the other house, and, when accosted by Sceledrus, pretends not to know him or Palaestrio, explaining that her name is Dicea. Still unconvinced, Sceledrus grabs the girl and tries to d rag her i nto the braggart's house. She s wears that she will go inside if Sceledrus will release her. He does, and she s kips into the house next door. Palaestrio sends Sceledrus to bring a s word s o t hey c an f orce her o ut. W hen Sceledrus goes to bring it, he finds Philocomasium within, relaxing on her couch. At last the story of twin sisters convinces him.

Periplectomenus n ow a ppears, h owever, t o avenge t he i nsult to his guest. He t hreatens to

have S celedrus w hipped for h is d iscourtesy a nd false acc usations. S celedrus e xplains h is c onfusion a nd a bjectly begs forgiveness. When Periplectomenus grants it, Sceledrus thinks he won it too easily and decides to make himself scarce for a few d ays to le t t he i ncident blow o ver le st h is master sell him.

Now the would-be rescuers of Philocomasium get t ogether t o c onfer about t heir n ext m oves. Her l over, Pl eusicles, a pologizes to t he 5 4-yearold Periplectomenus for i nvolving a n ol der p erson i n a j uvenile love a ffair. P eriplectomenus replies that he still has a goodly portion of youthful e nergy, sp irit, a nd app etite f or lo ve. H e explains that he has never married so that he can preserve t he f reedom to p ursue h is app etities without responsibilities. He has no need of children since he has plenty of relatives to inherit his estate. In t hat expectation, a ll his k insmen a re attentive and compete in entertaining him. As a result, his h opeful r elatives e ffectively s upport Periplectomenus.

Periplectomenus wou ld c ontinue d iscussing this sort of matter, but Palaestrio interrupts him and returns the discussion to t he issue at hand. He has a plan for rescuing Philocomasium and duping the braggart Pyrgopolynices into the bargain. \overline{A} ey will recruit a courtesan and her maid. Periplectomenus will pretend the courtesan is his wife. \overline{A} e wife will feign an ardent attraction for the braggart soldier—who can never say "no" to a woman. \overline{A} e maid and Palaestrio will act as gobetweens, and, to g ive the entire matter greater plausibility, he w ill t ake P eriplectomenus's r ing to the braggart soldier as a token o f the courtesan's affection.

Some s tage b usiness b etween P alaestrio an d another of the soldier's slaves, Lurcio, follows. Ā en the courtesan, Acroteleutium, and her maid, Milphiddipa, enter. Acroteleutium holds forth on the subject of her ma stery of t he a rts of w ickedness and expresses her w illingness to d upe t he soldier and s eparate h im f rom a he althy sha re of h is money. She and Palaestrio, for the audience's benefit, run through the plan once more. Acroteleutium shows that she has utterly mastered the deception. Palaestrio sets out with the ring in search of Pyrgopolynices to set the plot in motion.

Pyrgopolynices e nters with Pa laestrio. W hen the latter has h is master's attention, he tel ls h im of Acroteleutium's passion, describing her as both wife and widow—a young woman married to a n old ma n. H is le chery a roused, P yrgopolynices agrees to get rid of Philocomasium and to en tice her to leave h is house by allowing her to keep all the gold, jewels, and finery that he has given her.

Ā e maid, Milphidippa, appears and, knowing that the men are listening but pretending not to notice them, praises Pyrgopolynices' looks extravagantly. Flattered, the soldier starts to fall for the maid, but Palaestrio warns him off, saying that he gets the maid when his master gets the mistress. Palaestrio then privately instructs Milphidippa to feign, on behalf of her mistress, an overwhelming love for Pyrgopolynices.

Palaestrio encourages Pyrgopolynices to stand at s tud, bu t o nly for a subs tantial fee. H is c hildren, says Palaestrio, live for 8 00 years. Pyrgopolynices corrects him; they live for a millennium. Feigning shock, Milphidippa wants to know Pyrgopolynices' age. He tells her that Jove was born of t he e arth on the day of creation. Pyrgopolynices was born the next day. Milphidippa exits to bring he r m istress, a nd Pa laestrio o nce m ore advises h is master in the art of gently disposing of Philocomasium by allowing her to go with her sister and mother and to t ake along all the presents he showered on her.

Pyrgopolynices i s le cherously d istracted b y thoughts o f th e twi n an d t he m other. H e a lso expresses i nterest i n t he sh ip's c aptain w ho brought the women to Ephesus.

Acroteleutium now e nters, a nd Pa laestrio instructs her in her role. She is to say that, in her ardor for P yrgopolynices, she ha s d ivorced her current h usband s o t hey can marry. Moreover, she i s to s ay t hat she o wns P eriplectomenus's house si nce i t w as a part of her do wry a nd t he divorce settlement. H aving coached t he woman, Palaestrio turns to Philocomasium's lover, Pleusicles, t elling h im to d isguise h imself a s a sh ip's captain. Pleusicles has already done so. He must

now call for Philocomasium and say he is taking her to her mother. Palaestrio will carry luggage to the harbor, and the entire company will be off for Athens and out of Pyrgopolynices' control.

Pyrgopolynices reenters, delighted at his success in enticing Philocomasium to leave without a fuss. He says he e ven had to g ive Palaestrio to her to s eal t he ba rgain. \overline{A} e s lave f eigns sho ck and disappointment.

Now the maid and her mistress enter and, pretending not to see Pyrgopolynices, flatter his ego by praising him. He, of course, thinks their praise is o nly h is just re ward. He s tarts t o go to the women, but Palaestrio convinces him not to be so easily won. When Palaestrio remarks that every woman loves the soldier at first sight, Pyrgopolynices shares t he t idbit t hat t he g oddess of lo ve, Venus, was his grandmother.

 \overline{A} e women now dupe the soldier into believing that the house is part of the divorce settlement. Before h e u nderstands t his, h owever, he re veals his cowardice by expressing his concern that the husband might catch him with Acroteleutium.

Now Pl eusicles, d ressed a s the s ea c aptain and with a patch over one eye, comes to collect Philocomasium and her baggage. Philocomasium pretends to be reluctant to leave, but ob eys her mother. Palaestrio in the meantime carries a t runk f ull o ft reasure f rom t he s oldier's house.

More stage business follows as Philocomasium pretends to faint with grief at parting. Palaestrio bids farewell to the household gods and his fellow slaves as lackeys continue to carry out trunks of treasure. Palaestrio feigns inconsolable sorrow at leaving Pyrgopolynices, and a fter extended farewells, he races away.

Now, encouraged by a boy from the house next door, Pyrgopolynices enters in the expectation of enjoying a love tryst with Acroteleutium. Instead he en counters t he m en oft he household, w ho overcome him, carry him out, and beat him. His cowardice ex posed, P yrgopolynices b egs to b e released, and after a few more blows and a bribe of 100 d rachmas, t he m en of P eriplectomenus's household release the braggart soldier. Sceledrus r eturns f rom t he h arbor w ith the news t hat P hilocomasium's s hip h as s ailed an d that she was the sweetheart of the man with the eye p atch. P yrgopolynices re alizes th at he h as been "bamboozled" by Palaestrio, but he accepts the o utcome p hilosophically, c oncluding t hat "there w ould be less le chery" s hould le chers learn f rom h is example. Buddha and Buddhism

A major religion of A sia and beyond, Buddhism was founded by Siddhartha Gautama (ca. 563–ca 483 b.c.e.). \tilde{A} e s on o f Sudd hodana a nd Ma ya Gautama, Siddhartha was born at Lumbini in the Nepal valley. His titles, Buddha (the enlightened one) a nd S akyamuni (sage o f t he S akya c lan), were bestowed on him by public proclamation.

When he reached the age of 29, Buddha left his wife and son to spend five ye ars in meditation and in trying to achieve enlightenment. Following a strict a scetic r egimen, he f ound w hat he sought, coming to understand how to overcome pain, how to become a vessel for truth, and how to achieve rebirth.

Knowledge, he b elieved, a nd t he p ractice o f four truths could overcome pain, which he identi-

fied with human existence. \overline{A} e identity of existence and pain was the first truth. \overline{A} e second was that d esire c auses p ain. If one c an o vercome desire, one will no longer suffer—the third truth. To overcome desire—the fourth—one m ust follow t he eig htfold pa th w hose elem ents were these:

- 1 One must gain right knowledge of the four truths above.
- 2 One must rightly resolve to restrain malice.
- ³ One must cultivate right speech, which will be both true and kindly.
- 4 One must behave rightly and respect life, property, and decency.
- 5 One must labor at the right occupation.
- 6 One must strive to rid the mind of evil qualities and habits and keep and cherish the good ones.
- 7 One must exercise right control of one's sensations and thoughts.
- 8 One must learn right contemplation in four stages.
 - a Isolation that leads to joy.
 - b Meditation that leads to inner peace.
 - c Concentration that leads to bodily happiness.
 - d Contemplation that produces indifference to both happiness and misery.

Buddha's teaching first attracted a following of men and then, at the request of his foster mother, Mahaprajapati, a group of women who, as monks and nuns, were willing to commit themselves to a monastic life. In their monasteries, they practiced abstinence from sexual intercourse, theft, causing harm to living creatures, and boasting of human accomplishments o r per fection. B uddha a lso founded a third order for the laity. Ā e i nitiates agreed to b e kind, speak p urely, b e generous i n almsgiving, eschew drugs and intoxicants, and be faithful t o t heir sp ouses. \overline{A} ey a lso were to b e instructed in the eightfold way. Bud dha d id n ot promulgate any theories concerning the nature of deity, n or d id he den y a ny c onceptions of dei ty that other religions already espoused.

As Buddhism developed, it s ent m issionaries in all directions. Some went to western Asia and even into Macedonia in the Grecian archipelago. Others went to Ceylon, where the faith proved triumphant. A s the B uddhists e ncountered t he adherents o f o ther f aiths o ver t he n ext s everal centuries, a good d eal of mutual exchange of ideas and doctrines occurred. As a result, we see Buddhist e lements i n Z oroastrianism. Gno sticism, and elsewhere. At least by the first century c.e., a nd a lmost c ertainly e arlier, Budd hism found a congenial r eception i n China, where i t developed a regional variant by melding with traditional Chinese ancestor worship. We also see in Buddhism a n a ccretion of elements of several religions a nd o f t he p olytheistic b eliefs o f t he Indian subcontinent.

Just before the beginning of the Common Era, warfare a nd p olitical d islocations c aused t he adherents of Buddhism to fear that the doctrinal splintering that was already well advanced in the Buddhist faith would gain impetus. A e monks of several monasteries perceived, moreover, that the centuries-long p ractice o f e ntrusting B uddha's teachings to memory and or al preservation subjected Buddhist doctrine to unintentional corruption. Moreover, or al transmission ran the risk of losing all the teachings in the event of warfare. Accordingly, some 500 monks from several monasteries met to confer. A ey undertook to record, in t he P ali l anguage o f n orthern India, w hat became the Buddhist canon: the \bar{A} eravāda (\bar{A} e elder's tradition). It contained the three essential texts o f Budd hism: t he Abhidhamma P itaka (Treatises); the Sutta Pitaka (A e sermons of Buddha); and the the Tripitaka (A ree Baskets). (See Buddhistt exts.)

Just a s i n the parallel case of the Christians, writing d own th ese m atters p rovoked f urther controversy, e specially a bout t he Budd hists' monastic rules. It seems that, unbeknownst to the

110 Buddhist texts

authors of the canonical texts, S anscrit versions of some of the material may have existed already, and that these varied from the canon. Even in the absence of alternate texts, monastic practice varied en ough to p rovoke disagreement. In the late third century c.e., therefore, a group of schismatics adopted another text, the *Vaipulya P itaka*, as the a uthoritative s tatement of Budd hist b elief. Å e regional monarch, however, found the work heretical and burned it.

A further period of text making followed in the early fifth c entury c. e., w hen a Budd hist m onk and s cholar n amed Bud dhaghosha w rote t he *Visuddhimagga* (way of purification), which incorporated the teaching of the conservative Burmese school of Buddhism.

Buddhist texts

Although not an official part of the Buddhist canon, t he o ldest s urviving B uddhist d ocuments are \overline{A} e Edicts of Asoka. Asoka of Maurya (ruled ca. 273–232 b.c. e.) became the most celebrated Bud dhist mon arch of a ncient I ndia. Shortly a fter h is c onquest of t he ter ritory of Kalinga on India's east coast, A soka began his career as a Buddhist.

Enormous carnage had attended his conquest. Literally hundreds of thousands of persons perished either in military engagements or as a result of captivity and starvation. Sickened at that outcome, Asoka issued edicts and had them engraved on stone; many are still extant. As his objective in issuing his edicts, A soka said that he wanted his sons and grandsons to avoid the error of undertaking wars of conquest. He observed: "All a nimate bei ngs sh ould ha ve s ecurity, self-control, peace of mind, and joyousness."

Asoka's e dicts are e xclusively et hical documents. Ā eological considerations—apart from a reverential attitude—are absent from them. Anxious to h ave his e thical c oncerns sha red b y a s many as p ossible, and concerned about the c ure of bodies as well as souls, Asoka dispatched medical missionaries to Ceylon, to regions el sewhere in India, and to Syria, Egypt, Cyrene, Macedonia, and Epirus.

With re spect to a ncient Budd hist canonical texts, the earliest and most complete collection to survive is one preserved in the Pali language: the *Tripitaka* (\overline{A} ree B askets). It c ontains three s ystematic bodies of Buddhist doctrine. First it contains the *Vinaya pitaka*—the five books, or basket, of mon astic d iscipline. \overline{A} e s econd w ork is the *Sutta pitaka*—the five c ollections, or b asket, of Bhuddha's popular d iscourses or ser mons. Four of t hese are single-volume works, a nd t he fifth contains 15 subordinate works. \overline{A} e third body of doctrine—the *Abhidhamma pitaka*—contains seven books of p sychological ethics and r arefied philosophy.

Numerous s uch early n oncanonical w orks a s handbooks and commentaries also survive in various languages. Perhaps the most important among these is the Pali encyclopedic *Visuddhimagga* (Å e way of purification) of Buddhaghosha.

Noncanonical e arly Budd hist l iterature a lso contained five a ncient bio graphies of the Budd ha and short stories whose object was to explain good and bad k arma a nd t he e ffects of ea ch. A v erse manual, the *Dhammapada*, organizes 423 v erses into 26 c hapters. \overline{A} is w ork is a d evotional a nd instructional p amphlet that y oung persons i n monasteries me morized a nd chanted as a w ay of internalizing the Buddhist monastic discipline. Its central message is: "Abstain from all evil; accumulate what is good; purify your mind." \overline{A} e *Dhammapada* holds that ignorance is the highest form of impurity; that suffering will c ease only when the

desire for things does; and that greed, ill-will, and delusion will make a happy life impossible.

As Buddhism spread throughout Asia, translation became a flourishing industry. Ā e literary historian P. V. Bapat counts 4,566 translations not all of them ancient—into Tibetan, and about the same number—again, n ot all ancient—into Chinese. Recent finds in Tibet of Sanskrit manuscripts dating to the fifth or sixth century c.e. and earlier have shed new light on the nature of the transmission of Bhuddhist texts to that region.

Like other major world religions, Budd hism has split and fragmented over time. Sometimes it has incorporated into its creed aspects of older religions practiced in the regions into which it has sp read. A s i t ha s do ne s o, te xts r eflecting such i deological melding have app eared. Many of t hese, ho wever, s uch a s t he texts of T antric Buddhism, a reb eyond t he p urview o f t his discussion.

Caesar, Julius (Gaius, Iulius Caesar)

(ca. 100–44 B.C.E.) Roman general, writer, statesman

 \overline{A} e s cion o f t he m ost d istinguished o f Ro man patrician families, Julius Caesar traced his lineage through A scanius (also called Iulus, t he fou nder of Rome's pre de ces sor city, A lba L onga) to t he Trojan prince A eneas, legendary originator of the Roman state. \overline{A} rough A eneas, Caesar could also claim d escent f rom A eneas's m other V enus, t he goddess of l ove, a nd her pa ramour A nchises, a prince of Troy. \overline{A} is distinguished if partly fanciful ancestry became one of Caesar's principal tools of prop aganda a s he sought to make of himself what he eventually, if briefly, b ecame: the master of Rome, p ermanently app ointed d ictator of t he city and its dominions.

Caesar's work as a military historian, memoirist, a nd c ommentator c onstitute h is m ost important and virtually only surviving contributions to the literature of his epoch. His *Commenta ry o n t he Gallic Wars* (*De bello Gallico*) comprises seven books to which an eighth was added, probably by his lieutenant, Aulus Hirtius. A similar work describes Rome's *Civil Wars* (*De bello civili*). Beyond these military works, Caesar authored ot her books t hat a re n ow lo st. Ā ese included a p air o f tr eatises o n p redicting t he future t hrough s igns a nd a uguries: *Auguralia* and *De Auspiciis*. A lo st work on a si milar subject, *De m otu side rum*, i nvestigated f oretelling the future by observing the motions of heavenly bodies. Another volume collected speeches given before judges, and still another answered a legal work of Cicero. Caesar is reported to have published his letters, now almost all lost except for a few that Cicero preserved.

A c ollection o f C aesarean e phemera i s a lso credited to this remarkable Roman, though some suspect t hat t hose w ritings were i dentical w ith his military commentaries. Caesar is also said to have composed a t r agedy, *Oedipus*, whose publication Rome's first emperor, Augus t us Caesar, refused to license.

Caesar's family provided a signal example of heroic leadership for him to em ulate. His uncle by m arriage, t he ge neral M arius, sa ved t he Roman s tate f rom de struction at t he ha nds o f barbarian hordes within two years' time twice, first i n 1 02 b .c.e. a t A quae S extae (Aix-en-Province, France) and then in the following year just s outh of t he Br enner Pa ss on t he road to Verona.

Concerning Caesar's early education, we know that he was tutored at home by a clever and welleducated man named Marcus Antonius Gnipho, but beyond that we have principally the testimony of Caesar's own intellect and accomplishment to a ssure us that he became very well educated indeed. H e spent h is l ate adole scence a nd acquired his first political experience during the period of the Roman Civil Wars (89–82 b.c.e.) With r espect to h is political e ducation, C aesar learned early to a ssociate himself with powerful people, as he did when, rejecting the match that his f amily had a rranged f or h im, he ma rried Cornelia, t he d aughter of t he m ost p owerful Roman of t he er a, t he c onsul (head of s tate) Lucius Cornelius Cinna.

Ā e vicissitudes of the political situation, however, soon cost Cinna his power and his life when the troops he led against his rival, the soon-to-be dictator S ulla, m utinied and m urdered C inna. Sulla i nitiated a p rogram o f r eprisals a gainst members of the Marian party that Cinna had represented-a p arty with dem ocratic pro clivities. Cinna's son-in-law was then only 20, and his name was not on the list of those whom Sulla had put to death. A e dictator did demand, however, that Caesar divorce his wife. A is Caesar refused to do, remaining married to her until her untimely death nine years later. In reprisal, Sulla stripped Caesar of a priesthood of Jupiter to which he had been appointed and confiscated both the dowry that C ornelia h ad b rought h im a nd h is o wn property. A rough h is c onnections, p erhaps principally through the college of the Vestal Virgins, Caesar was able to procure Sulla's grudging pardon.

Concluding that the moment was propitious to perform his obligatory military duty to Rome, in 80 b.c.e. Caesar sailed off to Asia Minor to serve with d istinction a s aide- &- @mp to Minucius Å ermus, Sulla's legate in the area, against Sulla's old en emy, Mithradates VI Eupator, the Persiannamed but Hellenistic king of Pontus. Caesar continued serving in the East until Sulla's death in 78 b.c.e. He then returned to Rome, where, attempting t o b egin a le gal c areer, he u nsuccessfully argued two cases before the Roman Senate. Backto-back failures convinced him that he needed to hone his oratorical skills, so, perhaps on Cice r o's advice, he sailed for Rhodes to study with a master named Molo. On the way, pirates captured Caesar and held him for 38 days until his ransom arrived. His s ubsequent study w ith Molo app arently proved fruitful, for thereafter Caesar came to be regarded a s a mong t he f oremost o rators o f h is day.

When Caesar returned to Rome, probably in the winter of 74–73 b.c.e., he threw in his lot with the p arties a gitating for t he o verthrow of t he Roman constitution that Sulla had imposed. A at document simply did not provide adequate mechanisms for the successful government of a f raca p erennially d issatisfied tious dty-state or Italian peninsula, nor did it offer a superstructure supporting the governance of a far-flung empire. External pressures were also building on the constitution. S pain was i n a rmed r ebellion a gainst Roman rule, and a slave leader named Spartacus and h is a rmy t hreatened to u ndermine Ro man authority on the Italian peninsula itself. One of a pair of joint consuls, Marcus Licinius Crassus, ended t he Spa nish t hreat a nd jo ined h is f orces with those of h is co-consul, Gnaeu s P ompeius (Pompey), to defeat Spartacus.

With their a rmies c amped just out side the walls of R ome, C rassus a nd Pompey—between whom no love was lost—collaborated in 70 b.c.e. to overthrow the Sullan constitution and with it oligarchic r ule in Rome. Ā e following year, the Roman Senate named Julius Caesar quaestor for Spain—a role i n w hich t he y oung ma n w ould learn t he day-to-day de tails o f p rovincial a nd civic finance a nd ma nagement, n ot to m ention having the opportunity to hone the skills of military leadership.

On C aesar's r eturn to Rome, he was soon drawn into close association with Pompey, who, though o stensibly in r etirement, was still in a position to pull the strings that controlled Rome. \overline{A} ough the S enate sat and debated, in reality it was the popularly elected tribunes of Rome who held the reins of popular power, and Pompey controlled the tribunes. Pompey was appointed and given adequate resources to clear the Mediterranean of pirates—a job he successfully performed with great dispatch. Ā at done, he renewed hostilities a gainst t he tr oublesome M ithradates, extending Roman i nfluence to t he Eu phrates River. A sia M inor b ecame entirely sub ject to Rome, as did Syria and Judea.

Having completed his responsibilities in Spain, in 6 5 b.c.e. C aesart ook the next step in the Roman hierarchy of public offices: He became an *aedile curule*. \overline{A} is office carried with it membership in the Roman Senate and responsibility for the oversight and maintenance of various civic necessities in the city—enforcing certain laws and imposing certain fines. Two years later, he rose to the p osition of pontifex ma ximus—the leading member of the college of priests responsible for the observance of r eligious pr actices i n Ro me. His friend Cicero at that time served as consul the Roman head of state.

Caesar's political career now continued to follow one of t he paths t hat t ypically led to c ivic positions of the highest authority and responsibility. Ā e year 62 b.c.e. saw his elevation to t he post of praetor-an official post second in rank only to that of consul and involving b oth c ivil and military leadership responsibilities. Ā e following y ear s aw h is a scension to t he r ank o f propraetor-a c apacity i n w hich he b ecame t he governor of a province, in his case of Further Spain. Before leaving Rome, he e stablished himself in the good graces of the two most powerful men of t he er a: P ompey a nd t he f abulously wealthy Crassus, who lent Caesar the equivalent of a lmost a million dollars to s ettle h is debts so that he could depart Rome for Spain. A ere he was obliged to further hone his military skills as he ma rshaled b oth l and a nd s ea f orces a gainst barbarian uprisings.

 \overline{A} e n ext y ear, C aesar r eturned to Ro me to stand for election to the consulship. As a returning s uccessful g eneral, he w as en titled to a triumph—a v ictory parade—but he c ould n ot stand for election to office without giving up both his military command and the celebration he had earned. H e co nfounded his e nemies w ho had arranged the dilemma by resigning h is military offices unhesitatingly and a bandoning th e tr iumph. D espite t he mac hinations of t he Ro man senators who hated his resis ance to government by oligarchy, Caesar became consul in 59 b.c.e. In that role, he cemented alliances with both Crassus and Pompey, and the three men became the leaders of the Roman world, supported in this period by t he i nfluence of ci ce ro. W hen t he s enate resisted such ne cessary mea sures as buying private la nds to r eward r eturning veterans, C aesar went over their heads directly to the Roman people, w ho obl iged t he s enators to p erform t heir consul's will. A is method became Caesar's standard practice.

It was also standard practice to reward a consul with the governorship of a p rovince following his year of service. \overline{A} e senate was anxious to trim Caesar's sails and had passed a bill limiting the current consuls to service in Italy. Caesar turned this limitation to advantage by becoming the governor of a province that was on the Italian peninsula, but not under the authority of the senate: Cisalpine Gaul, the area between the Po R iver and the Alps. Military considerations also prompted the senate to t ack onto Caesar's responsibilities the Gallic provinces beyond the Alps—Transalpine Gaul.

From the moment that Caesar a ssumed h is Gallic proconsulship, we have in his own voice a detailed account of his activities and their significance in his Commentary on the Gallic Wars, which covers the period from 59 to 49 b.c.e. Ā e same period includes his invasions of Germany and Britain. A e sequence of military engagements t hat o ccupied t hese ye ars s eems a ll t he more impressive when one realizes that in addition to his role as general, he also had to preside as the chief judge of the provinces whose oversight he e xercised. A t le ast o ne h istorian, E. Badian, however, is at pains to point out that more than 1 million of Caesar's Gallic and Germanic enemies were slain during his proconsular c ampaigns. Another m illion were for ced into bondage and displaced. Badian also compares the damage Caesar's forces did to both the social fabric and the environment of northern Eu rope with the damage wrought by the European invasion and conquest of the Americas 15 centuries later.

Pompey, C rassus, and C aesar e xercised de facto power throughout the Roman world during this entire period, and in spring 56 b.c.e., the three met at the Cisalpine city of Lucca with many of t heir s enatorial and ma gisterial su pporters in attendance. \overline{A} e agreements reached at this conference confirmed Caesar in his proconsulship of C isalpine and T ransalpine G aul for a nother five ye ars and added to h is subject domains the province of I llyria that lay to t he north and east of the Adriatic Sea. \overline{A} e rest of Rome's foreign dominions became subject to the military r ule of P ompey and Cr assus. \overline{A} e triumvirate continued to exercise executive power in the Roman world.

While the preeminent rulers of Rome were all off in the provinces, the city of Rome descended into n ear an archy. When Crassus was k illed i n military action in the East, elevating Pompey to dictator became a compelling option. It was a decision that C aesar subscribed to since he had the rebellion of the splendid Gallic leader Vercingetorix to contend with.

Now, however, a breach opened between Caesar and Pompey as each pursued h is own interests and Pompey, in par tc uhr, sought to nullify Caesar's a ctions. A s long as Caesar held public office, he was p roof a gainst a ny trumped-up charges t hat m ight b e b rought a gainst h im. I f, however, a h iatus occurred in h is public service, Caesar would be at the absolute mercy of Pompey, who could arrange to pass whatever laws he wished. Ā is i ncluded ex post facto la ws that made crimes of formerly noncriminal acts.

As the situation de veloped, P ompey held t he reins of p olitical p ower a gainst a p olitically defenseless C aesar, b ut C aesar c ommanded a n army of seasoned veterans likely to prove invincible a gainst a ny o pposing p ower. C aesar attempted to a meliorate t his seemingly irresolvable impasse by offering to dismiss several legions of his troops and retain proconsulships in Cisalpine G aul a nd I llyria u ntil he had b een ele cted consul in Rome again. À e senate firmly rejected that o ffer, a nd f rom t hat i nstant, t he si tuation descended into the internecine hostilities in Italy and Spain that Caesar describes in his commentary \overline{A} e Civil Wars.

In that commentary, we learn of Caesar's decision to cross the Rubicon River with the legions that m arched with him-a d ecision that m ade him guilty of high t reason ag ainst t he Ro man state since it was forbidden for a general to bring his troops onto Roman soil. We learn, too, of his subsequent victories over Pompey in Spain, Africa, and at P harsalus in Greece. P ompey fled to Egypt, and Caesar followed, arriving to the horrid spectacle of his adversary's severed head, presented to him as a mark of loyalty on the part of a group of Alexandrian assassins. Ā e same people, however, s oon b esieged Caesar, w ho, though in grave danger, was eventually relieved by Mithradates of Pergamum and a force of Syrians a nd Jews. A e Romans' combined forces then turned against the forces of the Egyptian boy king, Ptolemy. A e Egyptians lost, and their king drowned in the Nile.

Caesar tarried in Egypt (though not for long) with that country's queen of Greek—not African ancestry, Cleopatra Ptolemy. He then took a circuitous route to I taly, putting down rebellion a long the way. In Italy, his alliance with Cicero and his presence calmed an explosive situation. Ā at done, he led a f orce to A frica to p ut down rebellion in the Roman provinces there.

Ā roughout this period, Rome named Caesar dictator f our ti mes. I n Fe bruary 45 b.c.e., the Roman senate took an unprecedented step, conferring that title on Caesar for life. A final battle remained to be waged—the Battle of Munda in Spain. On March 17, 45 b.c.e., Caesar commanded a vastly outnumbered force against a n a rmy led by P ompey's son. Caesar won and is said to have considered the battle the most dangerous in which he participated.

Although, a s p ermanent d ictator, C aesar adopted the d ress of the ancient kings of Rome, he refused to a ssume their titles. Some, however, have suggested that he had something even greater in mind. \overline{A} e descendant of a goddess, he aspired

116 Callimachus

to deification—an h onor n ot w ithout p recedent among the m onarchs of A sia. He a lso b egan to yearn for a nother foreign c ampaign. Faced with the prospect of a still-young dictator for life, Caesar's enemies began to coalesce about him. Some of them were disappointed in their own expectations; others were suspicious of having an absentee g od a s su preme r uler; a f ew c lung to t he ancient principles of a Roman republic. As every high school student knows, on the ides of March (the 1 5th) 4 4 b .c.e., a c oterie o f c onspirators struck Caesar down.

Some t hink that C aesar w as forewarned. H is second w ife, C alpurnia, whom h e ha d b een c onstrained to divorce to seal his alliance with Pompey by marrying Pompey's daughter, sent him a monitory n ote. E ither u ninformed o r o verconfident i n his power, however, he chose to ignore both warning n otes a nd p remonitions. A rguably t he m ost remarkable individual that western Europe has ever known, Caesar fell to the knives of his assassins.

Callimachus (ca. 310–ca. 235 B.C.E.) *Greek poet*

Born in the Greek colony of C yrene in Egyptian Libya to a couple na med B attus a nd M egatima, Callimachus studied grammar and philosophy in his native city and at some juncture migrated to Alexandria, the intellectual center of the Greek-Egyptian w orld u nder the P tolemaic p haraohs. Å e Ptolemies were of Greek origin. After an apparent period of poverty, Callimachus became a schoolteacher in Eleusis, an Alexandrian suburb, but he a spired to be recognized as a poet and critic. Ā ereafter he somehow came to t he a ttention of P tolemy I I, who had e stablished the ancient world's finest library at A lexandria. P tolemy em ployed C allimachus a s a functionary in the library—probably a s a c ataloguer of manuscripts. C allimachus's su rviving work i ncludes a n example of his work in the library, *Pinakes* (tables). Lost, however, are many of his prose works—catalogues about foreign cultures, language, geography, the origins of cities, and natural wonders that Callimachus seems to have written for the benefit of the library's users.

Callimachus's p oetic r eputation re sts mo st securely on his Epigrams, 64 examples of which survive. H e wa s pa rticularly f ond of s horter forms, and conducted a notable literary feud with his pupil, Apollo nius of Rhodes, who preferred longer ones. Callimachus pithily remarked: "Ā e bigger t he b ook, t he g reater t he n uisance." I n keeping with his preference, he wrote hymns and elegiac verse add ressed to v arious deities of t he Greek pantheon, and several of these survive. He also wrote about local religious traditions, as we know from the fragmentary remains of his elegiac Aetia (causes or origins). A is piece was long but composed of linked short pieces with some traces of direct descent from Callimachus. Ā ese include the love elegy Acont ius and Kidippe and a translation of *Ā* e Lock of Bereníkê by the Roman poet Catullus that makes possible a reasonably confident reconstruction of the original.

It was to the love elegies of Callimachus that the Roman p oet O vid lo oked w hen s eeking a model for his *Met amorphoses*. Notable, too, are the poet's "Hymns to Zeus, Apollo, Artemis, and Others." Callimachus did try h is hand at the epic, and we have fragmentary remains of his *Heca le*, which treats legendary material associated with Ā eseus, the king of Athens.

Although C allimachus's l iterary r emains a re often in a very fragmentary state, a trio of synopses a nd c ommentaries on h is work a lso su rvive that convey further important information. One of t hem, fo r e xample, i s t he s ource o f w hat i s known about h is *Artemis of Leucas*, only a sn ippet of which has survived.

Above a ll else, C allimachus pa rticipated b y example i n a n on going d ebate between t hose who p referred p oems i n t he t raditional m ode and those who preferred shorter, more carefully polished w ork. H e a ppeared a t a n h istorical moment when the epic tradition h ad little that was innovative to offer, and the great Athenian tradition of t r ag edy h ad l ikewise en joyed i ts heyday. B ookish, p recise, sub tle, c areful o f nuance, and un erringly tasteful, C allimachus's lyrics—though they may not have proved widely popular-reinvigorated the poetic production of Greece b y t heir grace, m ultilayered a llusions, and musicality. If his poetry seemed snobbish or overly erudite to some-and it did-it none theless provided models for poetic innovators in the Western tradition from Catullus and Ovid to Ben Ionson, T. S. Eliot, and Ezra Pound.

Calpurnius, Titus Siculus (fl. first century C.E.) *Roman poet*

A minor Roman poet who was very likely a contemporary of t he E mperor N ero, C alpurnius composed p ast or al po et ry i n i mitation of Vir gil a nd Th eocr it us. S even of h is p oems survive. \overline{A} ree of them, *Eclogues 1, 5*, and 7, are concerned with events during the reign of Nero, the d eath of h is p redecessor C laudius, a nd Nero's accession to the throne. \overline{A} e last of these describes the wonderment that strikes a she pherd named Corydon, who, while visiting Rome, attends ga mes sp onsored by N ero at a n ewly constructed a mphitheater. \overline{A} e a ttractions of life in the capital city estrange Corydon from his former rural existence.

Although *Eclogues 1* and 7 above rely heavily on the observations of a single speaker, *Eclogues 2*, 3, 4, 5, and 6 are presented in dialogue and treat the sorts of subjects that more usually appear in pastoral poetry. In the second eclogue, shepherds sing of their love for the same c ountry ma iden. \overline{A} e third d raws a r ather farfetched comparison between a stubborn w oman a nd a n o rnery c ow and contains a plea for forgiveness by Lycidas, who has b eaten h is b eloved P hyllis i n a pa roxysm of jealousy. \overline{A} e fourth combines rural themes with extravagant praise of the benefits that Nero's rule has b rought to c ountry l ife. I t a lso c ontains a request that the shepherd Meliboeus bring to the attention of Ne ro t he ve rse of C orydon a nd h is colleague A myntas. S ome ha ve spec ulated t hat Meliboeus stands for the emperor's tutor, Seneca. \overline{A} e fifth pastoral gives advice about tending sheep and goats, and the sixth c ontains a s taple of the pastoral mode, a singing contest. \overline{A} e ill temper of the contestants and judges and their resultant dispute, however, causes the contest to abort.

A p rincipal b enefit o f C alpurnius's p astoral work derives simply from its survival. It was published in Venice during the early days of printing (1472) and h elped t ransmit the pastoral genre to the Re mis ance.

Another poem, *De laude Pisonis* (In praise of Piso), which seems to celebrate the actions of the person who led the conspiracy that brought Nero down, ha s a lso s ometimes b een a ttributed to Calpurnius.

Cato the Elder See Origines .

Catullus, Caius Valerius (84–54 B.C.E.)

Roman poet

Catullus was the scion of a n a ristocratic fa mily from Verona, in the Roman province of Cisalpine Gaul, w ho, o n r eaching h is ma jority, sp ent a n extended period i n the city of Rome. Ā ere he soon became involved in the city's society, pleasures, and vices. A gifted poet, he at once associated himself with a group of writers known as the *new po ets.* \overline{A} e g roup's m embers d iffered f rom their pre de cs sors in that, i nstead o f looking backward to e arlier Ro man a nd Gr eek hero ic models or to public affairs for their subjects, they looked p rincipally to t heir own c olorful biographies. \overline{A} e l iterary h istorian Q uincy H owe, J r., also finds evidence of the influence and learned allusion of the epigrammatic Alexandrian Greek poet Ca l l imachus—a pre deces sor whose work Catullus certainly knew. Others find evidence of the influence o f Ro man e pigram a s p racticed about a half century before Catullus. A language rich in c olloquial u sage a lso m arks t he p oet's work, as does a mastery of many subjects—some quite scholarly.

Although C atullus's p rivate b ehavior w as undoubtedly li bertine, h e w as nonetheless a romantic idealist who regarded love as the highest and most ennobling of human emotions. He also thought of fidelity to one's beloved as a high calling. Regrettably, but interestingly, the older, aristocratic, and un principled w oman w ith whom he fell in love, Clodia Metelli, the wife of a distinguished provincial administrator, took a more pragmatic and sensualist view of extramarital l iaisons. T o the i dealistic p oet's e xtreme chagrin, Clodia—called Lesbia in C atullus's verse—entertained a t l east five ot her l overs besides Catullus. Cicer o considered her a notorious slut.

À ose of C atullus's poem s t hat add ress t his relationship (including p oems 2, 3, 5, 7, 51, 72, and an d 76) c hronicle h is g rowing d istrust, h is disappointment, and his manful efforts to continue loving his mistress and maintain his ennobling view of love in t he face of i ncontrovertible e vidence of her infidelities. His poems also evidence the disappointment and nervous exhaustion that accompanied the effort.

His own extracurricular activities, also reflected in his verse, included the employment of both female and male prostitutes (poem 32). To one of t he latter, a y outh na med J uventus, C atullus appears to have temporarily transferred his affections from Clodia (poem 48). Unwisely, however, Catullus introduced Juventus to a friend named Aurelius, with whom Juventus had an affair before moving on to a nother a cquaintance, o ne Fu rius (see poems 15 and 24).

Catullus left Rome for about a year in 57 b.c.e. He t raveled as a c ivic o fficial to the Black S ea province of Bit hnyia, doubtless hopi ng to improve h is already enviable financial situation. Poems 10 and 28 make clear that this hope, too, was d oomed t o d isappointment. B eyond t hat, word re ached h im i n Bit hnyia t hat h is br other had d ied i n t he nearby re gion of t he T road. Poems 68 and 101 reveal h is feelings a bout this tragedy and his journey to mourn at his brother's tomb.

Although service in Bithnyia did not improve Catullus's financial p osition, he n evertheless could a fford to h ave a private ship built to t ake him back to Italy. Once there, he returned to his familial v illa, wh ose s ubstantial ruins—now a tourist attraction—still g race t he p eninsula o f Sirmione on the western shore of Lake Garda not far from the city of Verona.

Catullus's s urviving work r eveals t hat, f or a time at l east, h is p olitical o pinions favored t he party o pposed to J ul ius C a esar. A s a n a ristocrat, Catullus objected to Caesar's preferment of sycophantic commoners to responsible posts and found offensive the outrageous manner in which such p ersons b ehaved (see p oems 29, 41, 43, 57, 94, 114, and 115). In the final a nalysis, however, Catullus seems to have changed h is m ind about Caesar.

Catullus died at about the age of 30. K nown at least b y r eputation a nd b y t he o ccasional c omments of persons who had read his poems since he flourished, his complete poems have come down to us in a unique manuscript discovered in the Capitoline library of Verona in the 14th century. He was the most influential lyric poet of his epoch.

Cento—an E nglish word—has t wo m eanings. First, it c an b e a c ollection of t ranslations b y many hands of t he works of a n a uthor. In the 19th century, for example, the Bohn Cento was the o nly c omplete t ranslation av ailable i n En glish of the 366 poems comprising Petrarch's *Canzoniere*.

 \bar{A} e second meaning alludes to a poem or collection of poems that an author has constructed by b orrowing l ines f rom one or more ot her authors a nd a rranging t hem to e xpress t he arranger's thoughts and emotions. \bar{A} e Roman aristocrat Falt onia Betiti a Pr oba, who was one of only two women poets noted among the ancient Romans, became a renowned author of centos. (For t he o ther k nown Roman f emale poet, see Sulpicia.) Proba borrowed lines from Virgil to construct poems on biblical subjects.

Employing t he c ento te chnique a sserts a n author's familiarity with the work of others and invites comparison—an invitation that implies an author d eserves to b e c onsidered in t he s ame league as the poet who originally wrote the lines.

Chinese classical literary commentary

 \overline{A} e h istory of C hinese l iterature i s lo ng. \overline{A} e nature of Chinese writing is often b oth a mbiguous and allusive. Language changes, and meaning becomes slippery. Readers frequently need clarification t o h elp t hem u nderstand what o ld tex ts mean, and ancient scholars were often able to earn their livings supplying that need. For all those reasons, writings that explained, clarified, or a mplified basic texts soon became necessary adjuncts to the t exts th emselves, and t he l iterary h istorian Haun Saussy has traced a long and rich tradition of such Chinese explanatory or exegetical writing for us.

120 Chinese ethical and historical literature in verse and prose

Saussy points to the *Book of Changes* as the Chinese classic that has benefited most from successive la yers of ex planatory w riting. As ea ch successive g eneration of r eaders f ound e arlier versions difficult, new explanatory material clarified the older text and the former glosses.

Confucius's Annals of Spring and Autumn (Chunqiu, or Ch'un Ch'iu) provided as keletal framework upon which abody of helpful commentary could be and needed to be erected so that readers would k now why C onfucius had selected the original entries in the book. Among the most important and fundamental examples of that s ort of am plifying commentary a re those that appear both in the fifth century b.c.e.'s Zuo zhuan (Tso chuan; C ommentary of Z uo) and, almost 700 years later, in Luxuriant Dew of th e Springs an d A utumns (Chunqiu F anlu [Ch'unch'iu fan-lu]) by Dong Zhongshu (Tung Chungshu; ca. 125 c.e.).

A third sort of commentary that one encounters is lexical analysis that offers familiar, contemporary synonyms for words t hat h ave fallen i nto disuse or that have changed their meanings over time. Examples of such works include those of the first-second century c.e. lexicographer Xu (Hsü) Shen's *Erya (Ehr- ya*; A pproaching ele gance) a nd his *Shouwen jiezi (Shou- wen Chieh- tzu* Explication of characters simple and complex).

Eventually, of c ourse, the she er mass of such commentary threatened to overwhelm the primary documents the comment was supposed to clarify, so that scholars since the ancient period have spent much time and effort winnowing the commentators' output—sometimes e ven s uggesting that their work h ad once and for all a rrived at definitive i nterpretations of the m eanings of f ancient texts. \bar{A} e nature of linguistic and s ocial change, however, suggests that such self-confidence is misplaced.

Chinese ethical and historical literature in verse and prose (ca. 1766 B.C.E.–ca. 200 C.E.)

 $m {\tilde A}~every~ol~dest~su~rviving~examples~of~C~hinese~writing appear on bronze containers and on "oracle bo nes" t hat were u sed for predicting t he future. Tens of thousands of ancient examples of writing on w ood and b amboo st rips ha ve a lso been d iscovered periodically. Later a ncient Ch inese w riting on less-durable pap er (invented i n China ca. 100 c. e.), has for m illennia b een preserved i n Ch ina, h owever, b y a l aborious a nd error-prone process of recopying and editing earlier m anuscripts. We k now, for i nstance, t hat Conf ucius e dited t he now-lost texts of e arlier masters. Many other early versions of important documents h ave lo ng b een thought to be irretrievably lost.$

In 1 973, h owever, C hinese ar chaeologists exploring a si te at Ma wangdui (Ma-wang-tui) uncovered a treasure trove of 50 of the earliest Chinese ma nuscripts k nown to e xist. W ritten on s ilk, t he re discovered m anuscripts m ake possible correcting many errors that had crept into l ater v ersions of t he do cuments o ver t he course of centuries. Perhaps ironically, that find has made the late 20th and early 21st centuries the g reat a ge of t he s tudy of a ncient C hinese literature.

Among the manuscripts discovered at Mawangdui (Ma-wang-tui) were two copies of the verse *Daodejing (Tao Te Ching)*—the foundational text of Daoism and what one of the manuscript's translators, the scholar Victor Mair, considers to be the document c entral to a ll C hinese r eligious a nd philosophical t hought. Received o pinion a ttributes t he a uthorship of t he *Daodejing* to L aozi (Lao Tzu), but Mair believes the document to have coalesced from a preliterate oral tradition.

Also am ong th e ma nuscripts u nearthed a t Mawangdui (Ma-wang-tui) was the earliest known version of the *Book of Changes*, or *Yijing (I Ching)*. \overline{A} is work was apparently originally a collection of brief oracular sayings arranged under a series of interpretative hexagrams. \overline{A} ose initiated into its proper use employed it to ascertain the direction of change in the ongoing processes of the universe. Later t he followers of C onfucius adde d commentaries to the oracles and co-opted the work as one of the five documents central to Confucian thought.

Another work whose origins disappear in the mists of preliterate history is the *Book of Odes*, or *Shijing (Shih Chi)*. In its current form, it contains 305 songs, selected, according to tradition, by C onfucius h imself from a n e arlier c ollection of more t han 3, 000 l yrics, p erhaps c ompiled around 600 b.c.e. Confucius is also credited with having edited the odes' musical settings, but these are now apparently lost irretrievably. Also among the five documents central to Confucianism, the book contains songs critical of government policy, c orrupt o fficials, and military c onscription. \overline{A} ough it was suppressed both in ancient times and in Maoist China, the work has n onetheless survived.

We find a third ancient book crucial to the edifice of Confucian doctrine in the Book of Historythe Shiji. A e earliest sections of this work date to late in the Zhou (Chou) dynasty, a dynasty begun in ca. 1100 b.c.e. As a compilation of documents with commentary, and perhaps beginning around the eighth century b.c. e., the work expanded over time. Again, tradition has it that Confucius himself ed ited t his w ork b y a ssembling a nd co mmenting on the d ocuments t hat c omprise i t. While this may well be true, it is also the case that later hands have added or substituted their own emendations. Autocratic leaders over the course of h istory h ave often t ried to su ppress points of view critical of their agendas. A is was the case with the Book of History when, after the unification of China under the first Qin emperor (221 b.c.e.), he commanded that all copies of the writings s upporting Confucianism be destroyed. Ā ough much in the Book of History escaped this edict, chapters 28-32 of its later sections disappeared. L ater f orgers a ttempted to r emedy t he defect.

 $\bar{\rm A}\,$ e fourth document in the ancient corpus of essential C onfucian t hought is a h istorical text

chronicling important events that occurred in the feudal fiefdoms of China b etween the years 722 and 481 b.c.e. Å is work suffered the same fate at the hands of the first Qin emperor as did the *Book* of History. Portions survived, however. Å e principle su rviving s ection i s en titled Spring and Autumn Annals (Chunqiu). Other portions of the original do cument a re preserved i n the s ixth chapter of Grand Records of the Historian, or Shiji. A h istorian, Si ma Q ia n (Ssu-ma C h'ien), c ompiled t hese r ecords a bout 100 b.c.e. Bits of t his document have also been recovered from tombs and elsewhere as inscriptions on bamboo strips.

Apart from Confucius, the most respected of the ancient Chinese ethical thinkers is Mencius (Mengzi o r M eng Tzu). M encius differed f rom Confucius in that the former thought that human nature was fundamentally good while Confucius thought it b ad b ut r emediable. L ike C onfucius, Mencius t raveled a bout looking u nsuccessfully for a ruler willing to i mplement h is social programs. Also like Confucius, Mencius's followers compiled a posthumous anthology of his sayings, Ā e Mencius (Mengzi), and recorded his conversations with rulers. Not highly regarded at first, Mencius came to be ranked second only to Confucius among the ancient sages, and the record of h is life and sayings came to be viewed as a n ancient Chinese classic. H is life overlapped t hat of Plato in the West for a period of some two de cades.

 \overline{A} e na mes of s ome o ther a ncient C hinese writers a nd t he subjects t hey wrote a bout ha ve survived. \overline{A} ese i nclude Su nZi, K uanZi, W uZi, and WenZi—writers on war, political philosophy, and related subjects. A lthough the extant do cuments b earing t he na mes of t hese a uthors ha ve been sh own t o be f orgeries w ritten l ong a fter their o stensible a uthors had d ied, t he f orgeries prove instructive nonetheless.

In addition to the classical philosophical and behavioral canon outlined here and commentaries on it, the literary historian Christopher Leigh Connery li sts t he f ollowing l iterary g enres a s being recognized by the ancient Chinese: ci (t s'u) poems (sung poetry) and fu poems (verse recited

Included in the received canon we do find the work of the fourth-third century b.c.e. moralist Dan Gong (Tan Kung), some of whose reflections appear in the *Book of Rites*. Surviving as well from the th ird c entury b.c.e. is the work of Xunzi, whose views were diametrically opposed to those of Me ncius. Xu nzi c onsidered t he fundamental nature of h uman b eings to b e i rremediably e vil and deserving of harsh governmental restraint.

Another work, much revered for reasons that have more to do with its title than its content, has been a scribed to the h ands of C onfucius and a collaborator. \overline{A} e work is entitled the *Cl as sic o f Fil ial Piet y* (*Xiao jing*).

Ā e te xts i ncluded i n t he C hinese c lassical canon had above all a moral focus that eventually did what Confucius had hoped they would: A ey became the or ganizing principles of Chinese government. A fter the emperors had e xtended their sovereignty ove r l esser k ings a nd w arlords, a s Connery tells u s, t he em perors s at l ike qu iet fountains of power whose principal duty was the appointment of c apable officials. Confucius e xpressed t he o pinion t hat a nyone who had not mastered the Book of Odes would have nothing to say.

Connery makes t his ma jor point—one t hat anyone interested in ancient Chinese letters must bear in mind: In the generations following Confucius's death, the ancient Chinese literary canon became a regulatory corpus of material governing e very a spect of C hinese p ublic a nd ma ny facets of C hinese private life. \overline{A} e c anon t aught people r ight a nd m oral t hinking a nd b ehavior. Choephori, The Aeschylus (458 B.C.E.)

 \overline{A} es econd t ragedy i n A eschylus's trilogy Or est eia, the first-prize winner in the last year Aeschylus competed in the Athenian City Festival of the g od D ionysus, the Gr eat D ionysia, \overline{A} e Choephori takes up the examination of the continuing effects of the curse on the house of Atreus where its pre de cessor play, Agamemnon, leaves off. (For a detailed account of the curse, see the entry for Agamemnon.)

When A gamemnon's wife Clytemnestra a nd her paramour, Aegisthus, murdered Agamemnon on h is v ictorious return f rom t he Trojan W ar, Agamemnon's s on, Or estes, was i n ex ile at t he court of h is u ncle, St rophis, t he k ing of Phocis. $\overline{A} \ e \ C \ hoephori$ opens with a r eturned O restes praying at the tomb of his father and laying a lock of h is o wn h air as a sa crifice on t he grave. H is friend Pylades accompanies him, and the two are interrupted by the arrival of Orestes' sister Electra, a ccompanied by the c hor us. \overline{A} e c horus reflects upon the sorry state of affairs in the city of Mycenae since the murder of its king and on the portents of disaster yet to come that reflect the anger of the dead in the underworld and bode ill for the city. \overline{A} e members of the chorus instruct Electra in the proper form of a prayer for vengeance, for t he r estoration of t he c hildren of Agamemnon to the throne of Mycenae, and for the prompt return of he r brot her O restes, who has momentarily hidden himself away.

Electra notices Or estes' hair and identifies it as his. She imagines that he has sent it in honor of his father, but she ho pes that he has laid it there himself. She also sees and identifies his footprint, but when he himself reappears, she n evertheless doubts his identity until he offers proofs. A e siblings s peak of t heir u nhappy s tate a nd of t heir hope for vengeance and restoration to power. $\bar{\mathrm{A}}\,$ e leader of the chorus cautions them against spies who will report their words, but Orestes tells how Apollo's own oracle has foretold that to avoid an adverse fate, he must slay his father's murderers. Otherwise he will die slowly, friendless, cursed, and horrified. A e children thirst for vengeance, and the chorus thirsts for the deaths of the murderers of Ag amemnon. Or estes v ows t hat i f he can kill his mother, he will "dare to die."

Electra laments the curse on the house of her grandfather Atreus—a curse u nder w hich her generation continues to suffer. O restes promises that together they will end the curse. Ā e chorus reports that Clytemnestra had dreamed of nursing a fatal serpent at her breast—a foreshadowing of her death at the hands of her own son.

Orestes plans to arrive at the palace in disguise with Pylades and to strike down Aegisthus at the first opportunity. Ā e chorus draws comparisons with events from legend and mythology, and the scene shifts from Agamemnon's tomb to the palace gate. Orestes s eeks ad mission. Clytemnestra greets him and offers hospitality. Orestes identifies himself as a merchant from Phocis who bears a message from its king, St rophius. In that d isguise, he tells Clytemnestra that Orestes is dead and that Strophius wants to know whether or not to send home Orestes' remains. Appearing deeply moved, Clytemnestra offers shelter to her visitors and s ends a n urse to find Ae gisthus. \overline{A} e n urse reports to the c horus t hat Clytemnestra is o nly pretending to grieve. In her heart, she is glad her son has d ied. M oreover, she ha s i nstructed t he nurse to tell Aegisthus to bring with him a speararmed b odyguard. Clytemnestra is less gullible than her son imagines.

 \tilde{A} e c horus, ho wever, adv ises t he n urse to change Clytemnestra's instructions and tell Aegisthus to come alone. She goes, and the chorus prays to Zeus for the success of Orestes' enterprise and the restoration of the commonwealth.

Aegisthus e nters a lone a nd g oes to m eet h is guests. Ā e chorus rejoices as Aegisthus's cries for help are heard offstage. (Å e Greeks disapproved of d eath on stage.) Cl ytemnestra enters a nd i s confronted by Orestes bearing a sword dripping with Aegisthus's blood. Clytemnestra grieves, and Orestes threatens her. She pleads her motherhood and the care she ga ve him as a n i nfant. M oved, Orestes seeks advice from Pylades: Can he spa re his mother? Pylades says no, and Orestes leads the pleading Clytemnestra to d ie at A egisthus's side. Her pleading turns to threats and curses. Orestes remains firm in his intention and thrusts her into the palace. W hile he i s k illing her offstage, t he chorus ce lebrates t he re storation of M ycenae's freedom.

Holding his sword in one hand and in the other displaying t he r obe that h ad i mmobilized Agamemnon and kept him from defending himself, Orestes stands over the bodies of Aegisthus and C lytemnestra. \overline{A} e c horus c elebrates t he return of freedom to the city of Mycenae.

Now t hat the deed is done, however, O restes begins to have second thoughts that prey upon his sanity. He begins to suffer f rom ha llucinations, seeing serpents, and despite t he c horus's a ssurances that he has done the right thing, his sense of guilt drives him to and over the brink of madness. chorus in Greek theater

In connection with the theater of the Greek world and its center at Athens, the chorus was usually a group of men—rarely, apparently, women—who sang and danced. As Greek theater had its origins in religious liturgy, the chorus also sprang from associated ri tual o ccasions a nd pa rticipated i n both tragic and comic perfor mances.

Greek theater had much of the flavor of opera about it, a nd t he c horal parts of t he pl ay were usually c hanted, o ften ac companied by dancelike movements either of the entire chorus or of halves of the chorus moving and singing together as they participated in the plots, explained matters to the audience, and represented public reaction to events.

 \overline{A} e chorus had a le ader, and in the earliest surviving Greek dramas, the parts that were spoken or sung were shared by a single actor, the leader of the chorus, the whole chorus in unison, or halves of the chorus o perating s eparately to si ng a nd d ance a strophe and an antistrophe. \overline{A} ese might be thought of as the verses of a song alternately performed by halves of a larger group of singers. As they sang the strophe, the choristers danced to the right of stage for t wo verses, a s they s ang the antistrophe, they danced back to their customary location.

As the number of a ctors on the Greek stage increased from one to t wo to t hree, the importance of t he c horus d iminished. W hereas b oth early Greek c omedy and t r agedy prominently featured t he c horus, c omedy e ventually di spensed with the chorus altogether, as in the plays of Mena nder. In later tragedy, the choral songs often represented the responses of public opinion to a drama's major action or served to underline the central message of a play in a final song.

Athenian citizens vied to be selected as members of the choruses. Eminent citizens considered it a matter of honor to pay the wages of the chorus members, and the playwrights in whose productions the choruses sang and danced also trained them to perform. A fringe benefit of this system for Greek theater arose from its contribution to a knowledgeable aud ience who thoroughly understood the fine points and the conventions of the per for mance.

Both comedy and especially tragedy remained closely connected to t her eligious roots f rom which they had sprung. \overline{A} us, serving as a chorus member f ulfilled a s piritual as w ell as a civic obligation.

Chrysostom, St. John (ca. 354–407 c.E.)

Greek prose writer

Under t he t utelage of t he p olytheistic S ophist Libani us of Ant ioch and early identified as a literary prodigy and a g enius, John was e ducated at Antioch. Called to Constantinople as its patriarch in 398, John reluctantly accepted the assignment. Once recalled, he was banished a second time in 404. He retired to Armenia, where he spent the last three years of his life.

John's s urviving wor ks a re n umerous, w ith more than 300 discourses and orations and more than 6 00 h omilies. In a ddition, a subs tantial selection of his letters a nd t reatises su rvive. I f they are sometimes too flowery for our contemporary taste, they are nonetheless distinguished by their thoughtfulness, rich imagery, and clarity of style. He was perhaps the most prolific writer of the Eastern Church Fathers.

Among the subjects J ohn a ddressed we find the nature of God, repenting of wrongdoing and its connection with the care of the poor, explanations of passages of Scripture, warnings against pride, c autions against a ttempts to turn C hristians into Jews, and justifications of the Christian religion. A generous selection of his work is available in English translation.

Cicero, Marcus Tullius (106–43 B.C.E.)

Roman prose writer and poet

Cicero was the el dest son of a well-to-do l andowning family of Roman citizens of the knightly class at Arpinum in Volscia. Nevertheless, he did not b elong to the class of her editary a ristocrats, the *optimates*, from which members of the Roman Senate were customarily drawn. Following a firstrate education in philosophy and rhetoric at Rome and in Greece, and following a period of military service, Cicero entered first the Roman court system and then s enatorial p olitics. He d id so as a "new man"—someone p rincipally s upported b y his merits rather than by his lineage. He subsequently rose to become respected and revered as a lawyer, a leader, and a politician.

In the latter r ole, he s erved s uccessively a s a quaestor (a financial official) in Sicily (75 b.c.e.), as an aedile in charge of the grain supply for the Roman metropolis (69 b.c.e.), as praetor (magistrate of justice) in the city of Rome (66 b.c.e.), and finally a s consul (64–63 b.c.e.). When he served as consul, Cicero became the legal head of the Roman Republic. In that capacity, he s taved off an attempt by Catiline (Lucius Sergius Catilina) to overthrow the state.

As the Roman Republic disintegrated owing to an antiquated system of administration unsuited to the task of managing a world empire, Cicero remained a staunch republican as long as he reasonably could, serving as the conscience of the Roman senate. When it became clear the republic could not continue, however, and after the wars occasioned by the assassination of the dictator Julius C aesar in 44 b.c.e., for a short time Cicero became a political mentor and adviser to Caesar's grandnephew, the young Octavian (who would later become August us Caesar, the first emperor of Rome [27 b.c.e.]).

Eventually, h owever, l argely b ecause of h is outspoken criticism of Mark Antony's ambitions in a series of addresses called *Philippics*, Cicero became a political liability to the ambitious Octavian. When Octavian found it expedient to jo in forces with Marcus Aemilius Lepidus and Mark Antony, a s p art of t heir d eal, h e a greed t o t he judicial murder of Cicero. Agents of Mark Antony implemented the a greement, killing Cicero near one of his country estates in 43 b.c.e.

Beyond t he b usy political life i mplied i n t he brief s ummary a bove, Ci cero a lso u ndertook a formidable pro gram of w riting a nd pu blishing. Apart from inconsequential juvenilia, he polished and published the orations he had g iven defending o r p rosecuting p ersons a ccused i n l egal proceedings-often perfecting his arguments after the fact. He wrote about the art of rhetoric, about po Iti al science, about philosophy, and about theology. He was also a poet of respectable talent and accomplishment, and much of what we know of his life is preserved in a series of letters to h is friend Titus Pomponius Atticus. A at series began in 68 b.c.e. and continued with occasional interruptions almost until Cicero's death. A e famous Italian p oet a nd h umanist P etrarch r ecovered most of these uncatalogued letters in the Capitoline Library of Verona du ring the 14th c entury. Petrarch considered that the revelation in the letters of the personal details of Cicero's private life tarnished the statesman's public image.

Perhaps Cicero's most lasting contribution to Eu ro pan an d Euro-American E nglish l etters appears i n h is c arefully c rafted a nd b alanced prose s tyle. \overline{A} at s tyle e merged a s t he m odel toward which prose writers aspired—whether or not they knew its origin—in Europe and in America as late as the mid-20th century.

As time permitted in his busy schedule, Cicero wrote important works throughout his majority. His *De inventione* (Topics for speeches) appeared before 81 b.c.e. *De oratore* (Concerning the orator) followed in 55. He spent four years preparing *De re publica* (On the State, 51 b.c.e.). He devoted

another nine years to writing *De legibus* (On the law, 43 b.c.e.)

A h iatus i n p ublic s ervice c ombined w ith a series o f pe rsonal cr ises to spur Cicero to an unparalleled period of literary production. In 46 b.c.e., he divorced his wife of more than 30 years, Terentia, and hastily married his younger second wife, P ublilia. I n 4 5 b .c.e., T ullia, t he ado red daughter of his first marriage, died of complications ari sing fr om c hildbirth. W hen P ublilia seemed relieved at losing a rival in Tullia, Cicero immediately divorced his second wife.

As therapy, perhaps, for the stress occasioned by both public and private turmoil, Cicero embarked on a maniacally a mbitious writing program. \overline{A} e years 45 and 44 b.c.e. saw the drafting of *Horten*sius; A cademica (Academic T reatises), D e å nibus bonorum et malorum (On Supreme Good and Evil), Tusculanaed isputationes (Tuscul an Disputati ons), De natura deorum (On the Nature of the Gods), De divinatione (On Divination), D e f ato (Destiny), and De officiis (About duties).

 \bar{A} e second president of the United States, John Adams, said of Cicero: "All ages of the world have not pro duced a g reater st atesman a nd p hilosopher combined."

ci (ts'u) poems or songs

Because the *ci* verse form originated as song lyrics, in t he b eginning of t he genre, at first, i n ancient times, the line length was determined by the tune to which the song was performed. Over time, however, the tunes of the songs disappeared, and the uneven line lengths of the original songs became t he p attern o n w hich n ew poems intended to be spoken or read silently—evolved. As a result, small subgenres of *ci* poems might be grouped t ogether under t he t itle o f a longforgotten s ong, b ut t he p oems' sub ject ma tter would have no thing to do with that title. It had simply become a versifying label.

Once separated from song, ci lyrics soon generated c onventions of t heir o wn. \overline{A} ey of ten c oncerned love—a s ubject d eemed u nworthy o fclassical verse. Often, women spoke words of the lyric, even though there was every likelihood that the verse had been written by a man. \overline{A} e language employed i n ci verse a lso a pproximated more closely the common parlance of the Chinese person i n t he s treet. W hereas t he more formal sh iverse might contain lofty intertextual allusions to earlier verse that would be recognized by educated cognoscenti who had c ommitted large b odies of classical verse to memory, ci was likely to be relatively free from such intellectual freight.

Civil War (*Pharsalia*) Lucan (ca. 65 c.E.) Using Livy's now-lost books on Rome's civil wars as his source, Lucan undertook the writing of an

epic poem on that subject. Before he could complete t he p roject, ho wever, t he em peror N ero, jealous o f Luc an's ac complishment, f orbade t he poet to read his poem in public or even to share it with friends. Lucan joined a conspiracy a gainst Nero, and, despite the poet's cooperation with the authorities when the plot was discovered, he was compelled to commit suicide. Ā us, we have nine complete books and part of a 10th.

A recent translator of Lucan's poem, P. F. Widdows, suggests t hat t wo tenable v iews e xist with respect to Lucan's design for completing his epic. Ā e more probable of these views holds that the poem would have concluded with the suicide of Cato. Lucan admired Cato as the representative of the r epublican i deal th at p erished wi th th e appointment of Julius Caesar as dictator for life and wi th th e s ubsequent a scent o f A ugust us Caesar to the imperial throne. Cato had committed suicide rather than accept Julius Caesar's pardon f or r esisting h is a genda. I n a le ss l ikely scenario, t hinks W iddows, L ucan mi ght h ave planned to e xtend t he ac tion t hrough C aesar's assassination. Others have argued for a still grander design that would have traced the conflict to the Battle of Actium and Augustus Caesar's victory over Marc Antony and Cleopatra in 31 b.c.e.

As it stands, the poem is a masterpiece of pessimism that traces the decline of a great republic and the de struction of i ts hero es a nd hero ines. $\overline{A} e v$ illain of t he p iece i s J ulius C aesar, w ho attracts Lucan's passionate contempt.

Book 1

Book 1 begins with a statement of epic purpose, but instead of invoking the muses, Lucan alludes to the failure of the a greement of Julius C aesar, Pompey (Gnaeus Pompeius), and Marcus Licinius Crassus to share the government of Rome and its dominions a nd the u niversal g uilt b orne b y a ll parties to the c onflict. I n the h ighly or atorical style t hat cha racterizes the entire poem, L ucan blames the citizens for allowing themselves to b e led into fratricidal conflict, and he calls upon them to look upon the consequent and still visible ruin of c ities a nd f armland. At line 33, h owever, t he poet interrupts himself to suggest, perhaps unconvincingly, that all the horror and cost of the war was worthwhile given that the conflict ultimately resulted in the rule of Emperor Nero. Under Nero, Lucan ho pes a nd p rays t hat p eace ma y sp read through the world. In that hope, N ero b ecomes the singer's muse and his inspiration. (Line numbers allude to the Widdows translation.)

Lines 67-80 suggest that the underlying first cause of t he c ivil w ar w as u niversal d isorder. All things came apart. A e more immediate and local causes, however, were the formation of the first triumvirate of Caesar, Pompey, and Crassus (ll. 81-97), Crassus's death in battle (53 b.c.e.); the death in the year following of Julia, who was both Caesar's daughter and Pompey's wife; and the resultant and growing discord and mistrust between t he t wo le aders (ll. 98 -192). B eyond that p ersonal r ivalry, h owever, Lucan bl ames the wealth of Rome, its concentration in the hands o f a r elative f ew, a nd i ts c onsequent undermining of Roman morality as the governing classes and the electorate sold their influence and votes. Meanwhile, the poor suffered all sorts of indignities.

His i ntroduction finished, L ucan tel ls ho w Caesar, r eturning with his ar my f rom Transalpine Gaul, paused at the boundary of the Roman state proper, the River Rubicon. Ā e poet reports that there Caesar encountered the allegorical figure of Roma, weeping and disheveled. She tried to dissuade Caesar from breaking the law by illegally leading armed troops into her territory. Caesar, however, insisted on the purity of his motives. In the first act of warfare, he crossed the Rubicon. At this point, Lucan pictures Caesar as a marauding lion.

Lines 252–286 describe Caesar's occupation of Rimini (Arminium) and the reaction of the town's citizens. Ā ere C aesar's a llies, t he Ro man t ribunes, a nd t he g overnor of Si cily, Cu rio, c ome and encourage Caesar to proceed despite the fact that P ompey m eans to re sist h is e fforts (ll. 287–324). Lucan's p reference f or t he o ratorical m ode now appears as Caesar addresses and encourages his troops and then hears an answering speech by a centurion, Laelius, who expresses the soldiers' v iewpoint (ll. 3 25–433). E ncouraged b y his t roops' app roval, C aesar c alls h is le gions, both native and foreign, from as far away as the Rhine River, leaving the b orders of the em pire unprotected.

 \overline{A} e p oet n ext de scribes t he f earful r umors that led the senate and the citizens of Rome to panic a nd a bandon t he c ity, t hen t urns to a digression in which he recounts the fearful portents of impending disaster. New stars and meteors appeared. Lunar and solar eclipses occurred. Wild a nimals entered the city. C attle talked. A supernatural b eing, a Fu ry, app eared, a nd Rome's g reat m ilitary he ro M arius raised h is head from his ruined tomb.

Priest a nd see rs a re su mmoned, c onsult t he omens, and pronounce dire predictions. As *Book I* ends, a Roman woman runs in a trance through the city, darkly predicting events that will occur in the coming warfare.

Book 2

As book 2 opens, Lucan tells the god Jupiter that human foreknowledge of coming disaster is a bad thing and that people would be better off without it. \overline{A} e entire city of Rome go es into mourning. First the women and then the men lament the coming disaster. \overline{A} e men can think of n othing worse than civil war. \overline{A} e d igression b egun i n book 1 continues with an old man who recalls in lengthy detail the former civil war between Marius and Sulla. \overline{A} e old man has been an eyewitness to the blo ody ho rrors that Ro mans c an n ow expect to see again: executions and suicides, massacres of prisoners, and the Tiber River filled with the corpses of the slain.

When the long digression ends, Lucan returns to contemporary action. A f earless Br utus visits his kinsman, the stoic defender of republican values, Cato. Br utus seeks Cato's advice concerning whom to support in the coming strife. Cato, after predicting that his own death will atone for the sins of t he Ro mans, o pts to su pport P ompey against Caesar, and h is words excite in Br utus's heart "an excessive and ominous passion."

Lucan now expands his audience's view of the character of C ato. F irst t he p oet r ecounts ho w Cato had passed his former wife Marcia along to his f riend H ortensius s o that H ortensius c ould sire offspring. Marcia arrives directly from Hortensius's funeral to ple ad that Cato remarry her. He d oes s o, though in h is c urrent s tate of s toic renunciation, c onsummating t he r emarriage i s out of the question. Lucan chooses this occasion to underscore Cato's unwavering virtue and selfmastery. For Lucan, Cato personifies the ideals of the Roman republic.

Beginning a n a ccount of the military maneuvers of the combatants—first those of Pompey— Lucan interrupts himself with a mytho-geographic discussion of Italy's Apennine Mountains and the rivers t hat s pring f rom t hem. \overline{A} at done, he recounts C aesar's s uccesses i n n orthern I taly against Pompey's generals. \overline{A} e poet next describes the fruitless resistance of Pompey's loyal Domitius, whose soldiers deserted and whom Caesar embarrassed by releasing Domitius after his defeat.

Returning t he a ction to P ompey's c amp, Lucan indulges in a further oratorical interlude as he has Pompey address his troops. P ompey emphasizes Caesar's criminality. He justly boasts of his own military prowess, including his major triumph of ridding the R oman M editerranean of pirates in only two months—a fraction of the anticipated time. His strength now, however, is depleted. H e i s out manned a nd i n d anger o f being o utmaneuvered. \bar{A} erefore h e w ithdraws to Br undisium (Brindisi), w hich i s de fensible and which is also a seaport from which, if necessary, he can escape.

An h istorical d escription of Br undisium a nd then another address by Pompey follows. He sends representatives, his son Gnaeus and the consuls of Rome, Lentulus and Marcellus, to enlist allies in Asia Minor, Scythia, and in Greece. Ā en Lu can de scribes C aesar's a ttempts to block the harbor at Brundisium and cut off Pompey's escape route. Pompey, however, was no mean military tactician, and he successfully countered this action. All but two ships of his fleet broke free of the harbor. No sooner was he a t sea than the city's citizens threw open their gates to w elcome Caesar's forces. Book 2 ends with a dark foreshadowing of Pompey's eventual death in Egypt.

Book 3

As book 3 opens and the fleet sails eastward, Pompey watches Italy recede. Overwhelmed with weariness, he falls asleep, and a frightful vision of his deceased but still jealous spouse, Caesar's daughter Julia, visits him. She tells him that she has special permission to dog his footsteps wherever they may lead until he r ejoins her i n the underworld, leaving behind his current wife, Cornelia.

Having s afely c rossed t he A driatic, P ompey reaches Epirus—a c ountry to t he n orthwest o f ancient Greece. Lucan now turns his attention to Caesar. First C aesar s ends a fleet with infantry and cavalry to pacify Sicily, for Rome's supply of grain d epended o n S icilian p roduction. \overline{A} en Caesar m arches his f orces t oward t he almost deserted city of Rome. Such senators as are still in residence a ssemble to he ar a " private c itizen's" demands. Lucan sneeringly reports their cowardice. \overline{A} ey a re willing t o make Caesar a king o r a god a nd to subs cribe to a ny c ruelty he m ight inflict. Lucan, who hates Caesar, notably remarks that C aesar i s a shamed t o i mpose th ings th at Rome would have assented to.

Metellus t he t ribune, however, do es t ry to stop Caesar's raiding the Temple of Saturn and confiscating its treasure. Lucan, sneering again, notes t hat no d egree of honor c ould ro use t he Romans to resist, but money has found a defender. C aesar r efuses to ha ve M etellus k illed, a nd the consul Cotta finally dissuades Metellus from continuing his futile efforts. Caesar then pillages the temple of the accumulated Roman wealth of centuries.

130 Civil War

Now Lucan lists the allies who have rallied to Pompey's cause throughout the eastern Mediterranean, As ia, a nd N orth A frica, s alting h is account with ethnographic and geographic details about the peoples in his catalogue. He credits the Phoenicians, in passing, for the invention of the al phabet. News of the Civil War has spread as far as India. Once again, however, the poet sounds the note of foreboding. All the kings a ssembled under Pompey's standard are fated " to share in [his]...disaster" a nd to ma rch in h is f uneral train.

Turning o nce m oret o Caesar, L ucan follows his m arch f rom Ro me, ac ross t he A lps, to ward Spain. At the city of Massilia (Marseilles), the citizens attempt to declare their neutrality and offer their t own a s a pl ace f or n egotiation. A ngered, Caesar a ttacks, only t o find t hat the Massilians have made spe eches o nly t o buy t ime and th at their city is strongly fortified against him.

Caesar makes preparations for a siege, cutting down as acred wood in the process. Some think that this will anger the gods, but, if it does, the gods give no sign. Weighing his options, Caesar decides to le ave the siege of Massilia to h is lieutenant, Trebonius, and Caesar himself continues toward Spa in. Luc an de scribes, as Caesar h ad done in his own version of \overline{A} e Civil W ars, the stout defense of the Massilians and their destruction of the Roman siege-engines and en trenchments. C onsequentially, D ecimus J unius Brutus builds a fleet to launch a successful attack.

Lucan de votes t he ba lance o f b ook 3 to a description of the battle that focuses both on its most horrifying and lurid details and on the courage of the combatants. As the Roman fleet wins total victory, this section of the poem recalls the great battle scenes in such earlier epics as Virgil's *Aeneid* and Homer's $\overline{A} \ e \ Ili \ ad$.

Book 4

Book 4 f ollows C aesar's f ortunes i n Spain. I t details the difficulties Caesar faces i n besieging the city of L lerda (today's Lleida), first be cause of t he terrain, a nd s econd b ecause of t orrential

rains and flooding. Lucan decides that Fortune is only pretending to have deserted Caesar, for the rains soon cease, and Caesar's customary success in battle returns.

Ā e poet details the story, also told by Caesar, of t he w ay t hat t he Ro man s oldiers of t he t wo opposing armies, many of whom are friends and townsmen, f raternize i n t he c amp o f P ompey's supporters u ntil, r eminded o f t heir d uty, P ompey's troops massacre their visitors. In response, Caesar cu ts o ff the P ompeian s upporters f rom their supplies of both food and water. Starvation and thirst force Pompey's general, A franius, to surrender to Caesar, who raises his blockade; the men soon recover. Lucan intervenes with an apostrophe (oratorical address) to gluttony. Its folly is illustrated by how little food and water the soldiers require to return to health. Caesar disbands Afranius's troops and sends them home, and Lucan considers them lucky. For them, the fratricidal war is finished.

On t he i sland of Cu ricta (now Krk) in the Adriatic S ea, h owever, matters were n ot g oing equally w ell f or C aesar's commander there, Gaius A ntonius, t he b rother o f C aesar's f riend, Marcus A ntonius (Mark A ntony). A P ompeian fleet h as c ut off his g rain su pply b y blo ckading his island. Lucan details Antonius's countermeasures, but a n attempt to r un t he blo ckade fails. Vulteius, the commander of a trapped raft full of Caesar's soldiers, advises them to commit suicide rather than surrender, which gives Lucan another chance to indulge his oratorical impulse in Vulteius's stoic speech. Heeding h is words, t he s oldiers resist Pompey's forces as long as they can. When they see that further resistance is futile and that they will be taken prisoner, Caesar's men kill o ne a nother a nd t hemselves, to t he g reat admiration of the Pompeian commanders.

Now Lucan turns his attention to another theater of w ar, the North A frican c oast a nd Libya, where C aesar's g overnor of Sic ily, Curio, h as arrived to secure the area. Ā e reader is treated to a digression about local mythology, for it w as nearby that Hercules fought against the son of the earth goddess Gaia and defeated him by hold ing him a loft. Cu rio a lso finds h imself ne ar the site where t he g reat Ro man g eneral, S cipio A fricanus, pitched his first camp as he led his troops to victory a gainst C arthage. Curio t akes t his a s a fortunate omen, and he p itches h is camp on the same site. At first his campaign enjoys some success ag ainst the t roops of P ompey's g eneral in Libya, V arus. A king of n eighboring N umidia, Juba, h owever, i s V arus's a lly. J uba ha s a ssembled an enormous international army in support of P ompey. J uba also p roves t o b e t he su perior tactician. He ambushes Curio and routs his forces, and Curio commits suicide in shame.

Lucan en ds b ook 4 w ith a c onsideration o f Curio's life a nd c areer. He finds m uch that was worthy of praise in the unfortunate general. He had been a ma n of g reat a bility a nd s ometimes had championed justice and right. His rectitude, however, had been overcome by greed, and Curio sold himself and Rome to Caesar's party for great wealth. Ā us Lucan finally judges Curio a traitor to the cause of Rome—one greater than the cause of Caesar.

Book 5

Book 5 shifts the scene to Epirus in northwestern Greece, where Luc an i magines that the consuls of Rome call together the Roman senate in exile. One of the consuls, L entulus, a nticipates the speech that the late Re naissance British poet, John M ilton, has S atan make in *Paradise L ost* when Sa tan a ssures the fallen a ngels that "the mind is its own place" and that it can "make of Hell a Heaven." Where the senate convenes, Lentulus assures his hearers, there Rome will be. All Caesar has in I taly a re buildings and ter ritory. Flattering their sense of self-importance, Lentulus calls on the senators to make P ompey their commander in chief. Like most overawed senators, they heed the head of state's advice.

At l ine 59, L ucan de tails t he ho nors t hat t he Senate in exile doles out to P ompey's allies. On e that L ucan d isapproves o f i s t heir c onferring Egypt on the boy king Ptolemy, thus helping him to thwart his father's intention that he should be coruler with Cleopatra. Ā is decision also contributes to Pompey's murder on landing in Egypt.

At the end of the meeting, one of the senators, Appius C laudius P ulcher, s eeks n ews o ft he future from the oracle of Apollo at Delphi. Again Lucan digresses to provide a bit of mythological history. He explains how, at the time of the great flood, o nly one p eak of P arnassus p oked a b it above the waters. A e poet then reports the way in which Apollo had established the shrine, and Lucan speculates about the mode of operation of the prophecies that emanate from Delphi. As the reports from Delphi are trustworthy and fixed by fate, p rayer i s f ruitless, a nd n one i s a llowed. Moreover, i nhaling t he e ssence o f d ivine t ruth that emanates from the ga seous depths beneath Delphi (and, a s Luc an p osits, u ltimately f rom heaven) i s d angerous. A e c onsequent ec stasy that s hakes the p riestesses w ho s erve a s o racle shortens their lives.

Appius c oerces the p riestess t o co nsult the oracle d espite he r d esire not t o do so a nd her attempt to deceive him. In the grip of a genuine divine ecstasy, the priestess Phemonoe knows not only all the future, but all the past as well. Finally, she focuses in on Appius's personal future and lets h im k now t hat he w ill n ot participate i n Rome's crisis but will "rest a lone" in a v alley on the coast of Euboea.

Lucan interrupts to inquire why the god Apollo would not assent to reveal the future of Rome, and to p ropose a nswers to h is o wn que stion. Maybe the gods have not yet decided Rome's fate. Appius, meanwhile, re mains bl issfully u naware th at h e has just received forewarning of his own death.

Lucan n ow r eturns to C aesar, w ho, a s o ther sources tell us, has led his army back to n orthern Italy, where he faces a mutiny a mong h is troops. \overline{A} ey a ir t heir c omplaints a s Luc an o nce m ore waxes o ratorical. A s the p oet has C aesar p repare his r esponse, he j udges t hat Caesar w ould h ave approved of any atrocity that his soldiers wished to commit to ke ep their allegiance. Caesar offers his unarmored breast to the swords of his troops and talks t hem o ut of t heir m utiny; t hey e xecute t he ringleaders of the abortive rebellion themselves.

132 Civil War

Lucan n ow r eports C aesar's t rip to Ro me, where, i n ad dition t o t he d ictatorship t hat h as already been conferred, he also becomes consul the head of state. Caesar pretends to be reluctant to accept but bows to public pressure.

Tracing C aesar's j ourney to Br indisi a nd h is voyage from there to Greece, Lucan reports how Caesar and Pompey pitch their camps near one another not far from Dyrrhachium (now Durazzo). Anxious to press his enemy, Caesar is delayed by the failure of Marc Antony to a rrive with his army. Ever moved to demoniac activity in Lucan's pages, Caesar sneaks away alone and hires a fisherman, Amyclas, to take him back to Brindisi so he can encourage Antony. A hurricane-force gale, however, n early s cuttles t he sh ip, s trips it of its sails, a nd forces it b ack again to the shores of Greece. Lucan's power as a poet appears in sharp relief i n h is wonderful d escription of t he s torm and its effects on men and ships. Caesar makes a speech into the teeth of the gale, and a huge wave deposits the ship safely ashore at the only possible spot for such a landing.

On C aesar's r eturn, h is officers r eprove h im for taking such a risk and tempting the gods. Ā e storm, h owever, e ventually blows it self out a nd Antony is able to bring reinforcements across the Adriatic.

In the meantime, Pompey has been growing concerned about the safety of h is wife Cornelia in the present do ubtful c ircumstances, and h e tells her that he is going to send her to the island of Lesbos to assure her safety. Shocked, Cornelia makes a speech describing the situations that this decision will imply for her. She a grees to i t, but makes Pompey promise not to c ome to her i f he loses. W here she i s, h is en emies will s eek h im. Oppressed by foreboding, she unhappily sets sail, and book 5 en ds with Luc an's dark prophecy of the gods' cruel plans for the couple.

Book 6

Book 6 beg ins w ith d escriptions of C aesar's attempts to force the issue and bring Pompey to a decisive battle. When t hat strategy fails, C aesar

marches sudden ly on the Greek coastal city of Dyrrhachium. Pompey manages to relieve the city, and Caesar constructs massive earthworks surrounding both Pompey's forces and the landward approaches to the city. \overline{A} is feat of military engineering, says Lucan, outdoes the walls of Troy or Babylon. \overline{A} e poet regrets that such an enormous labor was dedicated to destructive purposes when the same effort might have produced a causeway across the Hellespont or a sh ipping canal across the Grecian peninsula.

Once P ompey's sco uts detect C aesar's w ork, which he had successfully begun in secret, Pompey beg ins constructing a countering s eries of fortifications. Y et d espite occ asional individual encounters, n o g eneral a ction fo llows. P ompey, however, cannot bring in enough fodder for h is starving horses. He is cut off from l and s upply, and the weather keeps his grain ships from arriving. \tilde{A} e a nimals' ro tting c arcasses sp read d isease among the hungry troops. Finally, however, the wind shifts, and the grain ships relieve Pompey's men and their surviving animals.

A failed harvest now begins to starve Caesar's army. P ompey c hooses t his m oment a nd t he weakest p oint in C aesar's en circling d efenses to attack. At first, success seems at hand. Ā e outnumbered defenders are on the point of deserting their posts when a centurion, Scaeva, rallies them so that they hold on until Caesar sends reinforcements. Luc an l avishes a g ory de scription o n Scaeva's single-handed heroism as he fights until, gutted with sword thrusts and pin- aushioned with spears, he begs to be taken in his dying condition before Pompey. A soldier na med A ulus t ries to do so, and Scaeva, boasting of his prowess, cuts Aulus's t hroat. A t t his m oment, C aesar's f orces arrive. Lucan praises Scaeva's courage but denies him glory because he has displayed all that heroism in defense of the tyrant, Caesar.

Now P ompey s ucceeds in b reaking t hrough Caesar's lines at another spot and is on the point of d efeating C aesar d ecisively, b ut, a pparently not recognizing h is advantage, he f ails to f ollow through. Lucan blames Pompey's forbearance for the ultimate dem ise of t he Ro man republic a nd for the slaughter in the battles yet to come before the end of the Roman civil wars. As it is, Caesar retreats into \bar{A} essaly, and, ignoring the advice of his officers, Pompey pursues him.

Lucan follows with an epic digression that, in a virtuoso poetic performance, details the geography and the mythical history of the region of Å essaly. Å ere both armies encamp, and another digression ensues. A is one describes the remarkable powers of A essaly's witches, who can "dislocate the orderly workings of nature" with their magic arts. One in particular, the witch Erictho, is the most despicable of the lot. Living a mong tombstones, she has compelled the ghosts to leave their graves. She can hear the conversations that take place in the underworld. A every gods fear the g hastly s acrifices s he ma kes t hem. She i s a cannibal who feeds on the dead in whatever state of decomposition she finds them. If she requires fresh blood for her potions and incantations, she will commit murder to get it.

When P ompey's f orces encounter E rictho, Pompey's s on, S extus, a sks h er t o f oretell t he war's result. Flattered by Sextus's manner and by his praise of her powers, Erichtho willingly complies. Choosing a corpse from among the piles of fallen soldiers, she drags it to t he cave in which she lives-one t hat Luc an su ggests i s o n t he boundary bet ween t he upper worl d a nd t he underworld. A is portion of the poem is Lucan's equivalent of t he m ore u sual e pic f eature of a descent into the underworld. A e Pompeians who have come to hear the prophecy tremble with fear. Erichtho reassures them of their own safety and then b egins t o work on the corpse. Having restored it to a zombie-like life, she i nvokes the powers of darkness to restore the body's spirit so it c an s peak. S he t hreatens t hose powers-the Furies—saying that she c an punish them if they refuse. A e Fu ries ac quiesce, a nd t he c orpse returns to life, passing backward through the process of death.

Erichtho demands that the corpse clearly predict t he f uture c ourse of t he w ar. Ā e c orpse responds that the shades of famous persons from the R oman r epublic a re s addened b ecause t hey know the outcome of the war. Ā e shade of Scipio Africanus an ticipates the de ath of h is k insman, Mettelus Scipio. Likewise, Marcius Porcius Cato, the censor, foreknows the su icide of h is de scendant of the same n ame. Ā ose a mong the de ad who conspired against the republic, however, are pleased since they know that empire will replace the r epublic. P luto h imself i s b usy p reparing implements o f to rture i n p reparation f or t he arrival of Julius Caesar, who will be the victor in the war. Pompey, on the other hand, will have a place in the Elysian Fields—the most pleasant of Hell's neighborhoods.

Having uttered his prophecy, the soldier waits while Erichtho performs the necessary rites. She builds a funeral pyre. He mounts it. She lights the fire and leaves him to burn. For the protection of her guests, Erichtho has lengthened the night so they can safely return to their camp.

Book 7

Book 7 opens with evil portents for the Pompeian cause. \overline{A} e sun god s adly d rives h is chariot into the heavens, and Pompey has dreamed of the time that h e entered R ome in t riumph. \overline{A} is d ream, however, forecasts an opposite outcome. Pompey, who once triumphed in Rome, is destined to b e denied the grief of her citizens on his death.

Pompey's s oldiers grow r estive. \overline{A} ey w ant action, s o do h is a llies. Ci cero adv ises h im to fight Caesar's forces. Pompey explains his strategy of delay and war by attrition, but he grudgingly yields to the pressure of his subordinates and advisers. Lucan suggests that Pompey has a bandoned his post in taking this position.

At once, portents of disaster begin appearing: meteors, pillars of flame, waterspouts, and fireballs app ear. Weapons dissolve. \overline{A} e battle standards g row i mpossibly h eavy. A s acrificial b ull knocks over the altar and e scapes. A l ake grows bloody. Ghosts appear. Even in Italy, signs appear that presage the tyrant Caesar's victory.

Now Lucan devotes 20 lines to a description of the organi zaton of Pompey's m assed forces a s they a dvance t o th e field o f P harsalia. S eeing

134 Civil War

them coming, Caesar experiences a m oment of fear, but i ron re solution qu ickly re places h is qualms, and he (and Lucan) seize that moment for h im to ma ke a n eloquent address to his troops. He disparages the prowess of his enemies. He a lso counsels his troops to press the attack against fellow R omans o nly as long they stand and fight. If they flee, they are to b e allowed to escape. Wh en h e finishes, Ca esar o rders t he destruction of a defensive earthwork and a general advance.

Seeing Caesar's forces on the march, Pompey speaks to h is soldiers. He emphasizes that they have the advantage of numbers, and he appeals to them that they will not let him be enslaved in his old age. Heartened by his address, his troops take the field.

Lucan interrupts with a prediction of the consequences of the battle. He eloquently explains its future effects and then turns his attention to the ways in which the battle has undone the work of the past, en couraging the conquered peoples on the fringes of the Roman empire to continue their resistance to Roman power. He interrupts this reflection with a statement of his heartfelt credo: "Ā ere a re n o g ods g overning mankind.... We are swept along by chance... to say that Juppiter [sic] reigns is a lie."

Lucan curses the Caesarian soldier Crastinus for h urling t he first spea r, and th e ba ttle i s underway. Lucan describes infantry and cavalry engagements. P ompey's foreign a llies flee t he battle. Ā eir flight st rikes f ear i nto P ompey's Roman forces, but they stand and fight. Ā e poet cannot bear to describe the horror of the internecine fray.

Lucan praises Caesar's generalship grudgingly, but he bemoans the criminality of h is objective. Caesar has instructed his troops to leave the commoners a lone a nd s eek o ut t he s enators. \overline{A} ey obey, a nd ma ny a n oble Ro man f alls v ictim to their swords.

Brutus, d isguised as a c ommon soldier, goes seeking C aesar, h oping t o k ill h im. L ucan explains that he is not yet fated to suc ceed. \overline{A} e flower of Roman n obility falls i nstead. Bro ther fights brother, and father kills son. Lucan regrets that his generation does not have the chance to fight for the preservation of the republic.

At last, finding the situation hopeless and horrified at t he bloodshed, P ompey flees, p raying that his flight will end the carnage. Lucan interrupts the progress of the poem to address Pompey, m ourning h is r eversal of f ortune and consoling him with the observation that his fall has been the choice of the gods. \overline{A} e poet advises the fleeing leader to "choose a country to die in" from among his former conquests.

Arriving at the town of Larisa, Pompey advises the townspeople, who encourage him to mount further resistance, that he has been beaten and that they should transfer their loyalty to Caesar. At the same time, Pompey finds the affection of the people gratifying.

Caesar's victory gives Lucan another opportunity for oratory. H is victory speech finished, Caesar e ncourages h is m en to loot the e nemy camp. But night brings guilty dreams to the victors, and Caesar especially suffers from pangs of conscience, alleviated only by the thought that Pompey h ad s urvived t he battle. Caesar le aves the vi ctims oft he battle u nburied a nd sits regarding t he e vidence t hat the g ods h ave favored h is cause. Lucan provides posthumous comfort for the fallen of Pharsalia. À ough Caesar has den ied them a f uneral py re, they have taken permanent possession of the earth of the battlefield until the day that the earth itself perishes in the universal conflagration that will also be a pyre for those dead soldiers. A e same mood informs Lucan's reflections on the scavenging of birds and beasts of prey among the fallen.

Lucan closes t he s eventh b ook with a r effection on \overline{A} essaly as he considers how long it will take for evidence of this massacre to cease affecting t he ac tivities of f armers a nd her dsmen. H e observes that the gods have ordained equal guilt for Munda, Sicily, Mutina, and Actium. (\overline{A} e lastnamed battle, which A ntony and Cleopatra lost, left Augustus C aesar t he u nchallenged ruler of the Roman world.)

Book 8

Book 8 beg ins b y t racing P ompey's c ircuitous route to t he s eacoast. H is effort t o m aintain h is anonymity is foredoomed, for he is famous, and along the way he meets many persons who know him. L ucan reflects on t he bitterness of f ormer fame.

Taking ship, P ompey s ails to C ornelia at Lesbos, a nd o n h is a rrival she f aints. P ompey reproaches her with the suggestion that what she misses a nd w eeps over i s her former g reatness. Cornelia, h owever, s uggests that the j ealousy of Pompey's first w ife, C aesar's de ceased d aughter Julia, is the root cause of the civil war.

 \overline{A} e citizens of L esbos welcome P ompey and pledge t heir su pport. P ompey add resses a l ast prayer t o t he go ds who s eem to have deserted him. H e p rays f or m ore welcomes l ike t hat o f Lesbos and also asks that, having welcomed him, people will allow him to leave.

Pompey and Cornelia set forth upon the Mediterranean, and in an effort to alleviate his mental distress, Pompey questions the ship's captain concerning st ellar na vigation. \overline{A} e c aptain e xplains the rudiments and asks for a destination. O ther than a voiding \overline{A} essaly a nd I taly, P ompey instructs the captain to g o where the winds will take the ship.

Å en P ompey, who has b egun formulating a plan for his future, sends his ally, King Deiotarus, to a sk a nother f riend, t he k ing o f Pa rthia, to secure an Asian country for him to retire to. Pompey is convinced t hat C aesar w ill gr ant such a request. Pompey continues his voyage upon a sea that he himself had made safe from the depredations of pirates. As he sails, something of his old self- confidence r eturns. H e beg ins t o consider saving Rome and which of his allies is equal to the task of helping him. He asks his retinue for advice on c hoosing a mong L ibya, P arthia (northeast modern Iran), or Egypt. Lucan puts in Pompey's own mouth the pros and cons of the assessment he has requested. Pompey opts for Parthia.

His a dvisers d emur, h owever, a nd in a long speech raising objections to a Parthian exile, one

of t hem, L entulus, s uggests t hat P ompey see k refuge w ith the b oy k ing o f Egypt, P tolemy. Among his objections is the notorious lust of the king of Parthia and the danger into which Cornelia's virtue would fall there.

Lentulus's arguments c arry t he d ay, a nd t he ship p roceeds toward P tolemy's e ncampment. Informed of Pompey's impending arrival, P tolemy assembles his advisers. One, Acoreus, advises Ptolemy to welcome Pompey. Ā e other adviser, Pothinus, however, argues for assassination. Both arguments give further opportunities for oratory. Pothinus's arguments prevail, and the Egyptians lay their plot against Pompey's life.

Pretending t o w elcome P ompey, t he E gyptians bring a small craft to his vessel and invite him to join them. Cornelia smells a plot and asks to b e i ncluded, b ut t he u nsuspecting P ompey goes alone. \overline{A} e craft has hardly pulled away from the larger vessel when, in the full view of Cornelia and of his son, two Roman mercenaries serving with Ptolemy cut him down. He dies manfully, and as he dies, Lucan imagines the general's final thoughts.

Cornelia blames herself for interrupting Pompey's intended voyage toward Parthia. She faints; her c ompanions c atch her, a nd her sh ip w eighs anchor.

Meanwhile, t he a ssassin S eptimius s aws o ff the still-conscious P ompey's head a nd pit ches his body overboard. Lucan makes the details of the assassination as gory as possible, including a description of the mummification of Pompey's head.

Pompey's body washes ashore, and one of his former soldiers, Cordus, who had w itnessed the assassination, h unts f or t he b ody, finds it, c remates it as well as he can, and buries the remnants. An outraged Lucan cites Pompey's glories and, cursing the land of Egypt, complains at the inglorious funeral accorded him.

Book 9

As the ninth book begins, Pompey's spirit ascends to the lunar circle, the sphere in which the souls

of heroes abide. \bar{A} ere the spirit adjusts to its new and marvelous circumstances for a w hile before revisiting Pharsalia's field.

Marcus P orcius C ato, a c onfirmed S toic a nd the s taunchest o f R oman r epublicans, h ad s uspended j udgment bet ween the c auses of C aesar and P ompey. On P ompey's de ath, h owever, h e concludes that Pompey's had been the better cause. Cato takes it upon himself to rally Pompey's scattered forces and continue the war against Caesar. Cato m anages to a ssemble 1 ,000 s hiploads of Pompey's forces. By chance, his flotilla encounters the r eturning s quadron carr ying Co rnelia a nd Pompey's s on S extus, but he do es not k now they are aboard.

Lucan r etrospectively r ecounts C ornelia's lament against Fortune for having denied her the opportunity to lament her husband and bury him with due solemnity. She a ssigns her s on S extus the m ission of c ontinuing h is f ather's s truggle. She tel ls h im t hat if C ato t akes up t he c udgels, Sextus may learn by following him. \overline{A} eir sh ips continue t o A frica, wh ere C ato i s by t hen encamped. Wi th h im t hey find S extus's e lder brother, G naeus. Sextus t ells G naeus a bout t he manner of Pompey's death. In his grief and anger, Gnaeus en visions t he e xtirpation o f a ll E gyptians, living and dead.

Burning her husband's gear and mourning in a traditional fashion, Cornelia conducts a memorial s ervice for Pompey at which C ato eulogizes the departed general. Ā ough Pompey may have fallen short of the high republican ideal that Cato set, he was nonetheless the best Rome had to offer and was never motivated by personal gain.

Now a band of Cilicians whom Pompey had converted from the practice of piracy threatens to r esume t heir ol d t rade. \overline{A} is occ asions a n exchange o f oratory b etween them an d C ato. Cato's eloquence wins the day, calming the Cilicians, and they remain with the Pompeian loyalists as L ucan develops an extended epic simile comparing t heir deba rkation to a s warm o f honeybees.

Lucan n ext de scribes a v ictory for C ato a nd, subsequently, t he u nfriendly shoa ls o f a n a rea

called the Syrtes. \overline{A} ere a storm destroys some of Cato's fleet. \overline{A} e balance makes it safely to L ake Triton, whose mythical history Luc an recounts. From there they pass on to Libya. Once in harbor, C ato challenges the soldiers to a grueling overland m arch through the desert, p ersuading them with his inspiring oratory that they should welcome the challenges that "snakes, thirst, and the heat of the desert" will present.

 \overline{A} e expedition sets out. \overline{A} e men are tormented by thirst and by sandstorm, but Cato's model of endurance encourages them. Lucan then takes poetic license with the location of the temple of "Juppiter [sic] Ha mmon." H e m oves it i nto the expedition's line of march so as to give Cato the chance to refuse to consult its oracle and to bear witness t o h is Sto ic f aith. E ncouraged b y h is adjutant L abienus to c onsult the o racle, C ato replies that nothing men do is done without the gods' d irection. All men from their birth k now as much about the gods' wills as men are meant to—nothing. G od p ermeates e verything a nd resides in human virtue. \overline{A} e only certainty men possess is the certainty of death.

On the grueling march, Cato sets the standard for endurance. When water is found, he is always the last to drink. One exception to this rule occurs when the expedition encounters a sp ring full of poisonous serpents. Cato assures the men that the poison will hurt them only if the snakes bite them and that the water the snakes swim in is utterly harmless. He illustrates his point by, for the first and only time, being the first to take a drink on the long, dry march.

Ā ere f ollows a leng thy d igression on t he snakes of L ibya, on t heir v aried kinds, a nd on their m ythic g enesis fr om t he blo od s cattered from the G orgon's head after P erseus c ut it off. Among them are fearsome flying dragons and the flying Jaculus—the javelin snake. A nother v ariety is the parias, which only to uches the ground with its tail.

At every step on the march, Lucan assures his readers, a soldier dies from snakebite whose poison instantly and utterly dehydrates him—or, in one p articularly hor rifying i nstance, l iquefies him. Grisly examples proliferate. Not surprisingly, the soldiers begin to lo se he art and long for the comparative safety of the battlefield at Pharsalia.

Cato heartens the troops by his example, taking no heed of the danger, and encouraging the dying to endure their suffering in silence. Finally, the healers of t he indigenous P sylli a re a ble to offer a ntidotes and expertise to t he a rmy. \bar{A} ey accompany the troops with their knowledge and their e quipment. \bar{A} e troops a rrive safely at the city of Leptis and spend the winter there.

Shifting his a ttention to C aesar, Luc an finds him, sometime earlier, trying to follow Pompey through the Mediterranean. Caesar plays tourist and visits the site of Troy. Ā ere he offers sacrifice, prays that the gods will crown his ventures with success, and promises to rebuild a "Ro man Troy."

Caesar t racks P ompey t o E gypt, where h e is presented with P ompey's preserved he ad. R ather ungraciously, Lucan assures his reader that Caesar feigns g rief o ver P ompey's de ath w hile s ecretly rejoicing. \overline{A} e poet puts in Caesar's mouth a "sham speech." He complains that Egyptian presumption has de prived h im o f t he o ne p rivilege o f c ivil war—that o f spa ring t he d efeated g eneral. H e mutters t hat i f P tolemy lo ved C leopatra, C aesar would reply in kind and send the king his sister's severed head.

Caesar gives orders for a proper funeral and a tomb for Pompey's head and ashes. No one, says Lucan, believes that Caesar's grief is genuine.

Book 10

 \overline{A} e incomplete 10th book of Lucan's *Civil Wars* follows Caesar's progress to a hostile Alexandria, where C aesar v isits the tomb of Alexander the Great. Lucan, however, is no admirer of Alexander, whom he considered a mad adventurer insatiable in his pursuit of power.

Ptolemy comes to Alexandria and is taken into protective c ustody b y C aesar. C leopatra a lso manages to gain access to him. She now becomes the t arget o f L ucan's o ratorical i nvective. Ā e poet r ather i ronically blames her for d istracting Caesar from the war he was fighting. Using both her beauty and her i ntelligence, she b egs Caesar for his protection, and he confers it.

Now L ucan d igresses t o d escribe the b eauty and l uxury of C leopatra's p alace, the m agnificence of her personal beauty and at tire, and the opulence of the banquet she prepares in Caesar's honor. Ā ere follows the now obligatory sequence in which Caesar and the wise Egyptian A coreus discuss E gyptian e thnography, g eography, a nd religion. A coreus discourses learnedly about theories concerning the source of the Nile River. Its actual s ource s till li es s hrouded i n m ystery, a s A coreus explains.

Meanwhile, t he Egyptian boyk ing's adviser, the wily Pothinus who had arranged for Pompey's murder, n ow ha tches plots a gainst the lives of both Caesar and Cleopatra. By means of a love potion, as Pothinus thinks, she has become Caesar's mistress. She has a lso married her b rother, whom she and Caesar have in protective custody. (Marriage between siblings was a common matter a mong the r ulers of s ome a ncient na tions.) Pothinus decides to mount an attack on Cleopatra's palace, kill both her a nd Caesar, and rescue Ptolemy.

Rather than attack at night, the Egyptians wait for morning. Caesar sees the army gathering in the di stance an d o rganizes hi s p ersonal b odyguard to d efend the p alace. Kn owing t hat the Egyptians will t ry t o l iberate Ptolemy, C aesar sends an emissary to explain that if he dies, Ptolemy d ies. $\bar{A}~~e\,E$ gyptians s lay t he m essenger. C aesar b urns t he E gyptian sh ips, though he preserves one of them and escapes on it to the island of Pharos, whose possession blockades the Egyptian ships. He then takes the treacherous Pothinus prisoner and gives him the same death he had administered to Pompey.

Cleopatra's younger sister, Arsinoe, now raises troops of her own, and her general, Ganymede,

Civil Wars, The Julius Caesar (ca. 45 B.C.E.) Ā e governmental structures of republican Rome had l ong p roved i nadequate to co pe with th e responsibilities t hat r uling t he M editerranean world imposed. As a result, during the first century b.c.e., de facto power tended to m igrate away from the senate and consuls (heads of state) of Rome toward the hands of the wealthy, the militarily ca pable, a nd t he m ost p olitically a stute. Ā ree such men were the incomparably wealthy and militarily able Marcus Licinius Crassus; the superb g eneral Gnaeu s P ompeius, k nown a s Pompey; a nd t he a stute m ilitary a nd p olitical strategist a nd t actician, J ul ius C a esar. A ese three formed an alliance known to history as the First Triumvirate. Ā ey were bound together by mutual interests, by Crassus's money-a loan from which had enabled Caesar to leave Rome to assume command of Spain—and by kinship ties. Caesar w as a lso father- in- hw to Pompey, w ho was married to his daughter Julia.

As m atters de veloped, Cr assus w ent to le ad the Roman forces in the East; Caesar became the

proconsul (civil a nd m ilitary g overnor) of t he Gallic p rovinces bo th south a nd n orth o f t he Alps, and Pompey became both the governor of Spain a nd t he he ad o f s tate i n Ro me i tself. Although th e th ree l eaders were a ble to work cooperatively for a considerable time, their a lliance eventually frayed and then unraveled. In 53 b.c.e., Crassus died in military action in the East. He had been effective in averting disagreements between h is t wo c olleagues. Fu rther d istancing Pompey from Caesar, Pompey's wife Julia—Caesar's daughter—had died in 54 b.c.e.

By ma nipulating ma tters a t R ome, P ompey sought to strip Caesar of all polti al office and, simultaneously, of h is m ilitary c ommand. \bar{A} is would h ave l eft Caesar e xposed to p rosecution under e x p ost f acto l egislation t hat c ould h ave resulted in his exile or execution. In an effort to avoid a rmed confrontation, Caesar wrote to t he Roman s enate offering to d isband h is le gions i f Pompey would do the same. Pompey controlled the s enate, w hich pa ssed a m easure r equiring Caesar to disband his army, then encamped just outside Rome's Italian territory on the banks of the little Rubicon River. Caesar's supporters, the tribunes of the people, vetoed the senate's action. Ā e s enate o verrode t he p eople b y de claring a state of emergency-legislation that concentrated all power in Pompey's hands. Caesar's allies, the tribunes, escaped to join him, and Caesar broke Roman law by leading his forces across the Rubicon to begin the civil wars that eventually led to the e stablishment o f i mperial g overnment i n Rome.

It is t he s tory of t hat s eries of c onflicts t hat Caesar t ells in \overline{A} e Civ il W ars. Less car efully crafted t han h is Comment ary on the Galli c Wars, \overline{A} e Civil Wars achieves an attractive sense of i mmediacy a nd, s ometimes, of u rgency by being reported in the present tense.

Book 1

Caesar begins hisnarrative by reporting the political maneuvering outlined above, He then details the m ilitary s kirmishes, t he l evying o f troops, and the occupying of towns. He reports the way in which he had dealt generously with the senators of Rome and their children, all of whom he had brought before him. He complains of the way they had cooperated with Pompey a gainst him, and then he had released them all.

Pompey i n t he m eantime had drafted t roops and was moving south through the Italian Peninsula. Some of h is troops, however, de serted h im and j oined C aesar's forces. P ompey's a rmy fled to t he p ort o f Br undisium (modern Br indisi). Pursuing him, Caesar sent a letter suggesting that the tw o pa rley a t Br undisium. W hen C aesar arrived t here, h e p repared t o bes iege t he c ity, though he tried again t o a rrange a c onference. Pompey r esponded t hat, i n t he a bsence of t he consuls, no negotiation could take place, so Caesar d ecided he m ust a ttack. P ompey, ho wever, hastily withdrew his forces during the night, losing two shiploads of soldiers that Caesar's forces captured.

Considering t he e ntire strategic s ituation i n the Mediterranean, Caesar decided not to pursue Pompey and instead dispatched forces to Sardinia and Sicily, where they found that the forces of Pompey had left. Caesar also sent forces to Africa a nd S pain. A fter le vying f urther t roops, he returned to the city of Rome. Ā ere he found the senate paralyzed by its fears both of him and of Pompey. Caesar withdrew to Gaul.

After detailing the divided allegiances of Gallic tri besmen, C aesar r ecounts h is p reparations for a major offensive a gainst P ompey's forces i n Spain—the province that Pompey still governed and toward which, Caesar knew, Pompey himself was marching. He reports engagements between his troops and Pompey's in the vicinity of Llerda (today's L leida) i n S pain, a nd ho w t he g uerrilla tactics of Pompey's troops—learned while fighting against Lusitanian (Portuguese) irregulars initially threw Caesar's troops into a pa nic. H is forces r allied ho wever, and s oon f ound t hemselves i n a m ore favorable m ilitary p osition, though hard-pressed to find enough rations.

Caesar interrupts his narrative about the battle of L lerda to de scribe a na val enga gement off

Marseilles (then c alled Massilia)—one f ought between t he s quadron o f C aesar's s ubordinate, Decimus Brutus, and an ally of Pompey's, Domitius. In a pitched battle, the unseasoned forces of Decimus Junius Brutus finally managed to gain the u pper ha nd a gainst Do mitius a nd i nflict heavy losses on his forces.

In the meantime, Caesar's situation at Llerda was i mproving. His f ortifications were ne arly complete, and local tribes submitted to his authority a nd su pplied h im w ith bad ly n eeded g rain. Caesar describes his eventually successful efforts in getting both cavalry and infantry across a dangerously swollen Ebro River and the race between his f orces and h is e nemy's t o o ccupy e asily defended narrow passes in mountainous country. Caesar's military successes the next day led numbers of his opponents, many of whom had friends or re latives a mong C aesar's f orces, to c onsider honorable surrender. W hen t he troops began to fraternize, however, Pompey's commander Afranius put a stop to it, killed those of the enemy who had accepted invitations to visit friends in Pompey's soldiers' c amp, and demanded a n oa th o f allegiance. Caesar, on the other hand, dealt kindly with the strangers in his camp and accepted the allegiance of those who did not wish to return to Pompey's forces.

In the ensuing confrontation, Caesar totally outmaneuvered A franius, isolating his forces so effectively from supplies that for four days A franius could not feed his animals. Desperate, A franius a tl ast threw h imself on C aesar's m ercy. After t horoughly r eproving A franius f or h is obstinacy in not accepting Caesar's earlier overtures for peace and for his outrageous behavior in killing the invited g uests of h is soldiers, Caesar told him that his only objective was to have Afranius d isband his a rmy a nd g o ho me. A rrangements were m ade to achieve this, and it was so ordered.

Book 2

As the se cond book of \overline{A} e Civ il W ars opens, Caesar r eturns t o the siege o f Marseilles—a responsibility that he had entrusted to his deputy commander, Gaius Trebonius. A r eader may be p articularly i mpressed b y C aesar's de scriptions of the military technology possessed on both sides. Catapults were capable of t hrowing 12- foot- bng, iron- pointed poles that could penetrate wooden defenses several inches thick. To protect infantry from missiles and arrows fired from above, a mobile, 60-foot- long shed with a roof a foot thick was constructed. It could also provide l evel fo oting ove r u neven g round. I n addition to arrangements for an infantry siege of Marseilles, preparations were made for another naval engagement. Caesar's fleet was again under the c ommand o f h is sub ordinate, De cimus Junius Brutus, who again enjoyed the victory.

Perceiving t hemselves on t he brink of being overcome by C aesar's t echnical s uperiority, t he citizens rushed out and begged him to spare them. Caesar h ad not wished to s ack Marseilles, so he agreed, and h is soldiers relaxed. Two days later, however, the citizens suddenly flooded out of the city's g ates and a ttacked C aesar's un armed s oldiers. \overline{A} eir p rincipal t argets, however, were Caesar's o ffensive a nd def ensive te chnology: sheds, sie ge to wers, a nd t he like, to w hich t hey set fire, destroying some of them. \overline{A} e next d ay, the citizens attempted to repeat this success but encountered a prepared soldiery who killed many of t hem a nd d rove t he o thers bac k w ithin t he city's walls.

À e citizens thought it would take the Romans a long while to repair the damage they had done. Within a few days, however, despite a shortage of materials that required i nvention a nd i ngenuity to o vercome, n ew a nd b etter Ro man def ensive measures were in place; therefore the citizens of Marseilles o nce a gain su rrendered, t his t ime i n reality. D espite t heir t reachery, C aesar accep ted their s urrender o n t he s ame g enerous ter ms he had earlier offered.

In t he m eantime, s ome of t he c itizens of Spain who had prospered under Caesar's earlier proconsulship of the region began to expel Pompey's f orces f rom the c ities i n which ci tizens loyal to C aesar were i n c ontrol. On see ing h is forces d ecimated b y t heir d ivided a llegiances, the leader of P ompey's s oldiers, V arro, s imply surrendered h is r emaining t roops to C aesar. Caesar a ppointed r epresentatives to govern western Spa in. Ā en n ews r eached h im t hat, back in Rome, Marcus Lepidus had n ominated Caesar t o b ecome dictator. Caesar returned at once to the capital city.

At the same time that the above events were taking p lace, a nother of C aesar's s ubordinate commanders, Curio, the governor of Sicily, had led a r elatively small b ut n onetheless p owerful force f rom S icily to A frica. A lthough a de tachment of 10 ships had b een s tationed to o ppose him, their commander saw the futility of engagement, beached his small armada, and fled. Curio marched i nland to w ithin sight of the camp of Pompey's s ubordinate, a n o fficer named V arus. Ā ere, de spite m inor def ections a mong Cu rio's troops t o P ompey's s ide, C urio a chieved st unning s uccesses against N umidian cavalry a nd infantry. Concern n onetheless i ncreased a mong Curio's soldiers that they should be fighting for Pompey i nstead o f C aesar. C urio quel led t his emergent d issatisfaction with a s tirring add ress to the troops in which he assured them that they were indeed fighting for the right cause and on the winning side. Caesar reproduces the speech in detail and reports that it had the desired effect. Å e heartened soldiers routed the enemy in battle the next day until Varus's forces heard that Pompey's A frican a lly, K ing J uba, w as ma rching toward him with reinforcements.

Also learning of Juba's a pproach, Cu rio s ent cavalry to harass Juba's forces during the night. Catching them unaware, Curio's cavalry was able to reduce the numbers of Juba's Numidians significantly. Learning of that attack, Juba responded by sending reinforcements that included 2,000 cavalry, hi s b est inf antry, a nd 6 0 a rmored elephants—the ancient precursors of tanks.

Underestimating both the size and the fortitude of Juba's reinforcements, Curio led his men on a forc ed m arch a gainst J uba's a rmy. I n t he ensuing d isaster, Cu rio's forces were de stroyed and C urio h imself c hose to d ie fighting r ather than face Caesar a fter h is defeat. \overline{A} e su rvivors surrendered to V arus, b ut o ver V arus's ob jections, J uba c laimed m any of t hem as spoils of war, putting some to death and enslaving others.

Book 3

Back in Rome during 49 b.c.e., Caesar exercised his dictatorial powers by bringing order to I taly, taking steps to curb inflation and calm fears of a general debt amnesty, and supervising elections. Having restored order and bolstered public confidence, he resigned the dictatorship. He then went to Br indisi, m eaning to le ad h is f orces a gainst Pompey's in I llyrium on the northeastern shore of the Adriatic. Pompey himself at this time was with his troops in Macedonia.

In B rindisi, h owever, a shortage of s hipping dictated that Caesar proceed with an army much reduced in numbers. He could embark only 15,000 legionaries and 500 cavalry to face a superior force that Pompey had assembled during Caesar's first Roman dictatorship.

Caesar began marching southward, sometimes encountering r esistance a nd s ometimes b eing welcomed. H is swift p rogress in the d irection of the city of Durazzo spurred Pompey to move northward by forc ed m arches i n a n a ttempt to fortify D urazzo a gainst C aesar. A s t he a rmies approached o ne a nother, C aesar s ent a m essage offering a cessation of hostilities and an opportunity f or b oth Pompey a nd h im to sub mit t heir rival claims to the judgment of the Roman senate.

Ā ough C aesar's s ituation on l and w as tenable, P ompey's na val s quadron u nder t he c ommand of Bibulus had succeeded in blockading the coast a nd den ying C aesar r einforcements. Attempts at a ne gotiated settlement fa iled, and the opposing a rmies seemed on the brink of a decisive enga gement. On e o f P ompey's c ommanders, L abienus, de clared t hat o nly C aesar's beheading could bring peace.

At this crucial moment, Caesar interrupts his war na rrative to de scribe i n t he t hird c hapter of book 3 t he mac hinations o f Ma rcus C aelius Rufus, who was a praetor—the official immediately s ubordinate to t he c onsuls. C aelius p roposed t o c ancel o r r educe debts—a p roposal entirely u nacceptable to p owerful creditors. In response, he was stripped of h is praetorship. He made an unsuccessful attempt to s eize p ower by force of arms and was killed during the fighting.

Meanwhile, in Illyrium, Pompey's ad miral in the s outhern A driatic, L ibo, had suc cessfully blockaded the harbor at Brindisi and boasted that he c ould p revent r einforcements f rom j oining Caesar's forces on the Balkan Peninsula. Mark Antony, C aesar's c ommander a t Br indisi, suc cessfully routed Libo and put an end to the blockade. But s till no r einforcements r eached Caesar. At C aesar's u rgent r equest, M ark A ntony a nd others sent the necessary troops, and the weather seemed to coo perate with them. \overline{A} e wind n ot only prevented Pompey's ships from intercepting them b ut d rove 1 6 of h is ve ssels a shore a nd wrecked them. Antony's reinforcements arrived, forcing P ompey t o w ithdraw t o a m ore s ecure defensive position to avoid being caught between two armies.

Pompey now called on the Roman commander in A sia, Scipio, t o s end forc es t o M acedonia against Ca esar and h is a llies. S cipio r esponded so rapidly that news of his coming coincided with his a rrival. Ca esar's forces, h owever, dealt su ccessfully with the threat that Scipio posed.

Pompey's s on, G naeus, who c ommanded the Egyptian fleet, n ow sa iled i n force t o Illyrium and h arassed Caesar's forces t here u ntil, fa iling to take the port city of Lissus, he was forced to withdraw his fleet to the Mediterranean.

Caesar, in the meantime, successfully implemented a s trategy t o s urround and blockade Pompey's forces near the city of Durazzo. Ā ough he m aneuvered i n w ays t hat he hop ed wou ld tempt h is opponent to fight, Pompey refused to do so. Caesar chose to make Pompey's reluctance to do battle a propaganda tool that would diminish P ompey's st atus i n t he eyes of h is f oreign allies. However, Pompey would neither fight nor withdraw from Durazzo, where all his war matériel a nd s upplies were stored. A s t he s talemate continued, punctuated by skirmishing, both sides

142 Civil Wars, The

adopted def ensive s trategies a nd lo oked to improve t heir protective for tifications. Warfare by a process of attrition developed—a sort of warfare that Caesar considered innovative.

Caesar now interjects the story of two Gallic brothers, Raucillus and Egus, whose extortionate behavior t oward t heir own s ubordinates m ade them s o u npopular that they decided t o desert Caesar a nd defect t o P ompey. A s t he b rothers had e arlier en joyed C aesar's c onfidence, t hey knew all his plans, and they shared them with Pompey. A s a result, Pompey was able to m ount successful a ttacks o n C aesar's w eakest po ints. \overline{A} is was a very dangerous engagement for Caesar's c ause, and only the timely arrival of Mark Antony and his forces kept this engagement from escalating into a disaster.

Caesar then quickly assessed Pompey's new situation a nd d evised a pl an to m ount a su rprise attack. \overline{A} is plan m iscarried, and Caesar a lmost lost everything. He was saved, however, by Pompey's delay in pressing his advantage. Nonetheless, Caesar suffered a signal defeat, and Pompey's success l ed h is t roops to ho nor h im w ith t he t itle imperator.

Caesar determined t hat a t actical r etreat was in o rder an d c onducted i t s o suc cessfully t hat Pompey's pursuing army could not catch up with his main column and suffered significant losses at the hands of Caesar's rearguard cavalry.

Caesar's a lly Domitius i nadvertently learned from s ome of t he G auls w ho had de serted to Pompey t hat Po mpey w as s ecretly m arching against him. Spurred by that intelligence, Domitius hastened to join forces with Caesar, and in their combined strength the two marched on the fortified town of Gomphi. A ecitizens of Gomphi, h aving he ard e xaggerated re ports of P ompey's successes, refused to admit Caesar's forces and sent to Pompey for help. Caesar quickly took the town, a llowed h is troops to pl under i t, a nd resolved at one stroke the supply shortage from which his army had been suffering. Having taken the c itizens p risoner, C aesar m oved on to t he town o f M etropolis. M etropolis a t first o ffered resistance, but when they heard from the captive citizens of Gomphi what had resulted from their refusal to s ubmit, t he p eople of Me tropolis opened their gates to Caesar. It was in the vicinity of this town that Caesar chose to take his stand against Pompey.

Meanwhile, P ompey and h is a lly S cipio had joined forces in \overline{A} essaly. So certain were Pompey's supporters of their coming military success that they began arguing about who would receive what po lti al office as a reward for their good services t o th eir le ader. \overline{A} is d iscussion i mpeded laying practical plans for c onducting the battle looming b efore t hem. W hen t hey d id finally address that issue, their overconfidence led them to make foolish strategic and tactical decisions.

Caesar describes the disposition and order of battle of both armies as they massed for the decisive c onfrontation of the Illyrian c ampaign. He then criticizes Pompey's tactics in having his soldiers stand firm to await the charge of Caesar's troops rather than themselves charging to me et the enemy. In any case, Caesar's superior generalship and the dedicated courage and skill of his troops w on the d ay, a nd P ompey's forces were driven inside their camp.

As Ca esar's forces beg an mopping-up o perations, Pompey stripped himself of all insignia of his rank and, with an escort of 30 cavalry, fled to the coast, boarded a grain ship, and set sail. \overline{A} e next day, Caesar accepted the surrender of Pompey's forces and o rdered t hat n one of t hem b e mistreated n or any of th eir p ossessions pl undered. C aesar reports that h is losses n umbered 200 men, 30 of whom were seasoned centurions. Pompey's l osses nu mbered 1 5,000 k illed a nd 24,000 who surrendered.

Caesar b riefly de scribes P ompey's v oyage from island to island in the Mediterranean and how, after abandoning a plan to flee to Parthia, Pompey sailed instead to Egypt, landing at Pelusium, a c ity on t he M editerranean S ea at t he easternmost m outh of t he N ile R iver. Ā ere Pompey found an army belonging to Egypt's boy king Ptolemy engaged in civil conflict with the forces of his sister, Cleopatra. He sought the protection of Ptolemy's advisers, who controlled the young king and pretended to welcome Pompey. When P ompey b oarded a small sh ip w ith a bodyguard t hey sent h im, h owever, a R oman officer in Ptolemy's service and the chief of the king's bodyguard, Achillas, murdered him. Ā ey also a pprehended a nd la ter k illed P ompey's adjutant, Lucius Lentulus.

Arriving at Alexandria in Egypt, Caesar found himself u nwelcome. H e nonetheless s ought t o mediate i n the d ispute b etween P tolemy a nd Cleopatra. As it happened, Ptolemy was himself in Alexandria, and Caesar took h im into protective custody. V ery so on t hereafter, h e r eceived word that th e a rmy p reviously stationed a t P elusium was marching on Alexandria. Efforts to negotiate ended i n the de aths of the Ro man a mbassadors. Caesar occupied the Island of Pharos, which controlled the approach to Alexandria from the Mediterranean, thereby insuring his grain supply, and ends h is ac count of t he Ro man Civ il W ars b y describing the events leading up to the Alexandrian War.

Classic of Filial Piety (Xiao Jing, Hsiao

Ching) Confucius (?) and Zengzi [Tseng Tzu] (?) (ca. 210 B.C.E.?)

Unlikely to have been authored by either Confuci us or Zengzi (Tseng Tzu) *Classic of Fili al Piety* is a n u nprepossessing l ittle h andbook of rules that govern relationships. Just as the father whose word is law is the head of the family, so the Chinese emperor is the head of the larger empire, and his w ord i s l aw for the extended f amily of his subjects.

Either i n the s maller or th e l arger of th ese spheres, the greatest sin or crime conceivable for a child or a subject to c ommit was that of being unfilial. In both circumstances, failing to observe one's filial obedience could be punished by death. Failing to observe the r ules of filial piety in the larger st ate was seen a s p lanting the s eeds of anarachy. Of course, there were degrees of unfilial behavior, and according to the handbook these could be subdivided into 3,000 separate offences, for e ach of w hich on e of five pu nishments was prescribed.

Claudian (Claudius Claudianus) (ca. 370– ca. 404 c.E.) *Roman poet*

Almost certainly born in Egypt, perhaps at Alexandria, Claudian had Greek as his first language. At s ome p oint, h owever, he m astered L atin a s well, and it was in his second tongue that, during the last decade of his life, he wrote the works that earned h im u niversal r ecognition a s t he final major poet of the Western Roman Empire and of polytheistic religion.

Claudian m igrated to R ome around 395 c. e. He w as we ll c onnected w ith the n oble a ncient Roman family of the Anicii—the family to which Boet hiu s w ould later bel ong. T wo b rothers o f that family, P robinus and Oly brius, b ecame the joint c ivic heads—the consuls—of t he Ro man state in that same year. In their honor, Claudian composed a panegyric (a poem of praise). Probably also through their influence, he soon moved to Milan as an official at the court of Stilicho. As regent during the minority of the Western Roman Emperor Honorius, Stilicho—a Germanic Vandal by heritage—was the West's de facto ruler.

Claudian became the court poet who celebrated the achievements both of the young Western emperor H onorius a nd, e specially, of t he p oet's hero, Stilicho. For them he wrote a series of panegyrics t hat i llustrate one p ole of Claudian's poetic range. We find examples of the other pole in C laudian's in vectives a gainst Rufinus-the official whom Emperor A eodosius had appointed as protector of Honorius's elder brother, Arcadius, n amed b y h is f ather a s em peror o f t he Eastern Roman Empire. Doubtless perceiving in Rufinus a challenge to h is own a mbitions, Stilicho had him killed in the presence of A rcadius. Claudian's two invectives vilifying Rufinus were published in 396-7, after his murder—a form of po Iti al whitewash for Stilicho's action.

Until around 400, S tilicho m aneuvered to unify the East and the West under Honorius's sole rule. As a part of that strategy, Honorius married first one and then the other of Stilicho's daughters, but neither union produced an heir. Claudian wrote five p oems c elebrating H onorius's first marriage to Maria.

Another t arget o f C laudian's p oisoned p en was A rcadius's chief m inister i n t he E astern Roman E mpire, t he eu nuch Eu tropius, a gainst whom Claudian wrote two books. By all accounts other than Claudian's, Eutropius was a w ise and effective r uler i n t he E ast, beco ming co nsul i n 399. By allying the Eastern Roman Empire with Alaric the Goth, Eutropius contrived to maintain the E ast's i ndependence a gainst St ilicho's plots. In the year of Eutropius's consulship, however, a conspiracy a gainst h im succeeded, a nd he w as deposed a nd e xecuted o ver the objections of St. John Chrysost om. Claudian's invective against Eutropius appeared the same year.

Poems c ommemorating t he v ictories of t he arms of Stilicho and h is generals a lso o ccupied Claudian's pen. Only the first book of the earlier of t hem, $\overline{A} \ e \ War \ again \ st \ Gil \ do$, survives. \overline{A} at unfinished work in epic style tells the story of the

rebellious P rince G ildo of M auretania. H e had also b een c ommander of th e Ro man f orces i n Africa. When he rebelled, Gildo successfully cut off the supply ships that carried grain bound for Rome. E mploying Gi ldo's o wn b rother a gainst him, S tilicho was a ble to b reak t he emba rgo starving the city. Ā e classicist Maurice Platnauer sp eculates t hat C laudian h imself ma y ha ve suppressed the second book of this poem rather than risk offending Stilicho with praises of Gildo's brother Macezel, who saved Rome.

In a k ind of p ocket epic r unning o nly 6 47 lines, Claudian celebrates Stilicho's personal victories over the Goths. Ā e poem's introduction is memorable, for i n it C laudian b oasts none t oo modestly about a brass statue of him that the senate a nd emperor had de dicated at Rome. O therwise the poem praises Stilicho's military prowess and superior tactics i n overcoming the Getae, as Claudian denominated the Goths. Ā e poem particularly c elebrates S tilicho's v ictory ove r t he Gothic leader Alaric at the Battle of Pollentia (402 c.e.). Ā e celebration proved premature. Ā e same Alaric beleaguered the city of Rome i n 408 a nd 409, and conquered and sacked the city in 410.

Incomplete p oems on m ythological s ubjects also survive from Claudian's pen. One of these, $\overline{A} \ e \ R \ ape \ of \ Proserpine$, was a gain in the e pic mode. Claudian's p oem follows the action from Pluto's preparations to seize the daughter of the harvest g oddess, C eres, through P roserpine's actual k idnapping and her w edding to P luto in Hades, and well into the distraught Ceres' search for her daughter and the responses of the other gods to the situation.

Among C laudian's s horter poems, o ne i s addressed to C hrist the S avior. W hether or n ot Claudian was a C hristian, ho wever, i s a matter that has been much debated with no clear resolution. Such fathers of the church as St. August ine and Orosius thought not.

Claudian's models seem to be poems by such writers a s L ucan a nd S tatius. H is m ethods reflect t hose of s chools o f rhe toric i n t he l ate Roman manner and feature formal add resses of some length. His mastery of Latin idiom attains the h ighest le vel. I f h is su rviving w orks s eem marred by their propagandistic flavor, they also provide g limpses of h is c ontemporaries and of important events.

Among Claudian's shorter works we find genuinely charming poems about animals and people. A poem describing the porcupine exemplifies the former category. Ā e latter appears in a p ortrait of an old citizen of Verona who has blessedly spent his entire life on his native plot of land.

We k now t hat Claudian m arried a nother client of the imperial family. A verse letter to Stilicho's wife S erena, a lso the ado ptive d aughter of the emperor \overline{A} eodosius, essentially thanks h er for having a rranged h is marriage. In that letter, too, Claudian invokes fair winds to prosper what is presumably h is wedding voyage. If such classicists as Vollmer and Maurice Platnauer are right in d ating the poem to 4 04, however, Claudian's voice f alls si lent i mmediately t hereafter. \overline{A} is leads Vollmer to suggest that the poet died on his honeymoon.

Clouds, The Aristophanes (423 B.C.E.)

In a three-entry contest at the Gr eat D ionysia in Athens in the year of its composition, Ar ist o-

phanes' \overline{A} *e Cl ouds* disappointed the expectations of i ts pl aywright b y t aking t hird pl ace. Because of a s cornful allusion in the pl ay's surviving t ext t o th is u nexpectedly d isapproving reaction of the Athenian citizenry to his comedy, we know that Aristophanes modified the version we now have after the play's first per for mance.

 \overline{A} e play is set in an Athenian street before the houses of t wo ne ighbors. O ne of t he houses belongs to S trepsiades, who is a lmost bankrupt with gambling debt. S o is his s on, Phidippides. \overline{A} e o ther house b elongs to t he g reat A thenian thinker Socr at es. His house is jocularly labeled "the \overline{A} oughtery." \overline{A} ere the Sophists t hink great thoughts.

 \bar{A} e pl ay o pens w ith a w akeful St repsiades lying abed worrying about his debts. His sleeping son t alks i n h is s leep a bout h is d reams of t he horse a nd c hariot r aces t hat a re i mpoverishing him and his father. Waking Phidippides, Strepsiades advises his son to go next door to learn from the Sophists how to w in lawsuits justly or otherwise. Fearing t hat suc h k nowledge w ould i nterfere with his love ofhorses and racing, Phidippides refuses. H is furious father th rows h im out. \bar{A} e son blithely announces that he will go to live with his more sympathetic uncle, Megacles.

Phidippides e xits, and S trepsiades de cides to educate himself with the Sophists. He knocks and declares his intention to become a pupil. Ā e disciple who admits him praises Socrates for solving such a problem as "how many times the length of its legs can a flea jump?" or as "does a g nat buzz through its proboscis or anus?"

Impressed w ith s uch wonders, S trepsiades pleads to b e ad mitted. \overline{A} e do or to t he \overline{A} oughtery opens, revealing wan and emaciated men in various a ttitudes o f c ontemplation a nd m editation. \overline{A} e disciple shows Strepsiades such devices a s ce lestial globes an d m aps an d e xplains their u tility. A naive r ealist, St repsiades i s n ot impressed. H e finds S ocrates s uspended i n a basket, " traversing t he a ir a nd c ontemplating the sun."

On le arning w ho S ocrates i s, St repsiades explains h is problems a nd h is er rand, s wearing

146 Clouds, The

by the go ds to pay a ny fee S ocrates may na me. Socrates reveals that the gods are not much reverenced in the \overline{A} oughtery. I nstead the initiates converse with the clouds, which they regard as spirits or guardian deities.

 \bar{A} ere follows a long and rather tedious discussion between Socrates and Strepsiades, punctuated by scatological humor. Socrates sees and hears goddesses and thunder in the clouds. Strepsiades instead sees mist and hears flatulence. Nonetheless, ho ping to le arn to def raud h is c reditors, Strepsiades enrolls as Socrates' student.

Here the action is interrupted by the leader of the chorus, who berates the Athenians for their judging t his pl ay, a f avorite o f A ristophanes', unworthy of a first or second prize. \overline{A} en, in the character o f t he c louds themselves, t he c horus explains to the audience that it owes the clouds divine r everence, re minding the Athenians that the clouds had thundered their disapproval when the Athenians had elected as their general Cleon, Aristophanes' deadly enemy and a chief supporter o f t he P eloponnesian War—a w ar t he pl aywright despised.

Following t he c horal i nterlude, S ocrates a nd Strepsiades re enter. \overline{A} e le ssons a re n ot g oing well. Strepsiades wishes only to learn how to bilk his creditors, and Socrates is attempting to teach his unwilling pupil the complexities of q uant itat ive verse.

Finally S ocrates d ecides t hat St repsiades i s too old to learn and retain new material. Strepsiades de cides to t ry a gain to p ersuade P hidippides to study with the Sophists. A is time he succeeds, and after teacher and pupil get off to a bad s tart, S ocrates c alls u pon t wo qu arreling allegorical characters, Just Discourse and Unjust Discourse, to take over the instruction of h is reluctant pupi l. A et wo D iscourses e xchange insults un til t he c horus ha s had en ough. A e chorus leader a sks that each state h is position without interruption. Ā ey agree, and Just Discourse speaks first. He praises the good old days, careful e ducation, c hildren w ho k new h ow t o behave, a nd h igh s tandards o f s exual c onduct for young people.

When his turn comes, Unjust Discourse makes the c ase f or w asting t ime, f or i mmodest a nd unchaste behavior, and for becoming the sort of citizens t hat co mprise t he au dience w itnessing the play. Looking out over the audience, Just Discourse sees t hat U njust Disco urse is r ight, a nd concedes the argument to him. He decides to join the ranks of the debauchees.

Strepsiades t urns P hidippides o ver to U njust Discourse as the young man's tutor.

As the day of financial reckoning approaches for S trepsiades, he goes to the \overline{A} oughtery to reclaim h is s on. S ocrates a ssures the father t hat the son has mastered Sophistry and that the two can now win as many cases as they choose.

When the two are alone, Phidippides confuses his father with a rguments far from t he p oint under di scussion. St repsiades i s i mpressed a nd thinks that now no one can best him in a lawsuit. His cr editors b egin to a rrive, a nd St repsiades refuses to pay them, confident that he will win when they bring suit. When the creditors have gone, Strepsiades confidently enters his house. In a few moments, however, he comes rushing out, followed by P hidippides, w ho i s b eating h is father. It seems that the father asked for the son to sing, the son refused, they argued about songs and poems, and their disagreement over literary matters first grew heated and then led to blows. Phidippides u ses h is n ewly le arned deba ting skills to assert his right to beat his father.

Disillusioned, S trepsiades c omplains b itterly to the clouds, from which he t hinks all his troubles have come. A nswering for them, the chorus assures the old man that he is the source of all his own troubles. Strepsiades resumes his faith in the old g ods. P hidippides, ho wever, den ies Z eus, claiming that Whirlwind is the ruler of the world.

Code of Hammurabi, King of Babylon,

(ca. 2250 B.C.E.)

Jewish a nd C hristian r eaders of t he H ebr ew Bibl e ma y a ssociate t he C ode of Ha mmurabi with the summary phrase "An e ye for a n e ye; a tooth for a tooth." Ā at association does not much miss the mark, for the 21st through the 23rd chapters of the Book of Exodus, in which Moses details the laws that God dictated to him, share much in common w ith the s tatutes th at the B abylonian King Hammurabi promulgated.

Just as Moses credited God with having presented the leader of Israel with a legal code that included 10 commandments inscribed in stone, so Hammurabi credited the Babylonian sun god, Shamash or Shamshu, with ha ving given the king t he s tone t ablet o n w hich t he C ode i s inscribed. Unlike the tablet of Mo ses, that of Hammurabi has been found: A French archaeological e xpedition u nearthed i t i n D ecember 1901 and January 1902 on the acropolis of the ancient city of Susa on the Tigris R iver, where the three broken pieces of the tablet had apparently b een b rought f rom B abylon a s pl under around the year 1100 b.c.e. A e Code's translator, Robert Francis Harper, believes that corroborating e vidence p oints to t he e xistence o f several copies of the Code at crucial locations. Ā e original now reposes in the Louvre Museum in Paris.

In addition to a bas-relief picturing Hammurabi receiving the Code from Shamash, the tablets contain a p rologue, 2 82 l aws g overning a w ide variety of interactions, and an epilogue filled with curses invoked against anyone who in the future may c hange, e fface, o r sub vert Ha mmurabi's divinely ordained legislation. \overline{A} e first of Hammurabi's laws prescribes the death penalty for false ac cusation and the third exacts t he sa me penalty for false witness. \overline{A} e second law a ddresses t he crime of sorcery. I t requires the same test that applied to witches in Europe as late as the 18th century c. e.: A person accused of sorcery must throw himself into a river. If he drowns, he is held to have been a sorcerer, and h is ac cuser inherits h is e state. If he floats or s wims, he is innocent; h is ac cuser is then put to death, and the ac cused inherits the accuser's estate.

Judges who alter their judgments are in danger of h aving to pay 12 times the original fine and losing their jobs. Stealing is divided i nto a number of s ubcategories. S tealing a s lave i s a capital o ffense, b ut r eturning a f ugitive s lave earns a reward of "two shekels of silver."

If a person is robbed and the robber escapes, a sworn a ffidavit i temizing t he loss r equires t hat the state r eimburse t he v ictim. Ste aling f rom a burning house while pretending to help earns the perpetrator the penalty of burning with the house. Soldiers whose p roperty is oc cupied b y o thers while t he s oldiers a re a way m ust r ecover t he property on their return. Officers of government are e specially p rotected f rom at tempts to s eize their property, but they are also prohibited from transferring p ublic prop erty i n t heir c harge to their wives and daughters. Fines imposed on persons for breaches of trust range from five to 12 times the value of the property entrusted.

Some of the laws governing concubinage and marriage seem quite enlightened and even modern. If a man leaves a concubine who has borne him children, he is required to support the children. E ither party to a marriage could i nitiate divorce, and the payments that ac company the separation are specified. If, for instance, a woman grows to hate her husband and an inquiry into the matter de termines that she has performed her part of the marriage contract, the husband must return h er d owry and the wife m ust g o to her father's house. When widows choose to remarry, Hammurabi's C ode protects the interests of the children of the first marriage. If h usbands g ive their wives p roperty o utright, t hen c hildren o f those marriages can make no claims on that property against their mother.

 \overline{A} e property rights of u nmarried priestesses are also carefully stipulated. Should they predecease brothers, however, the brothers inherit. \overline{A} e responsibilities of adoptive fathers are also carefully specified.

Other laws reflect a rigidly hierarchical social structure. Husbands of barren wives can take concubines, or the wives can present their husbands with the wives' own maidservants. If the maidservant bears children, she gains status equal to that of the wife. If she also proves barren, however, the wife can sell her. Several laws stipulate the rights of m asters o ver t heir s laves. P unishments t hat masters can take against slaves for denying their condition of servitude, for example, include mutilation by cutting off an ear.

 \overline{A} e "eye- for- an-eye" a nd "t ooth-for-a-tooth" portion of Hammurabi's Code also exists. It begins with the 196th injunction and r uns through the 201st. What an eye or a tooth was worth, however, depended on t he r elative social ranks of those concerned. Only when persons of equal rank were involved were the penalties the same.

Hammurabi's Code also governs the practice of ph ysicians a nd ve terinarians, p roviding rewards fo r suc cessful a nd p unishments f or unsuccessful surgeries. If a p hysician succeeds in saving a man's life or eye, he receives as his fee 10 shekels of silver if the man is upper class, five if he is a former slave, and two if the patient is currently a slave. A si milar set of judgments applies to unsuccessful operations. If an upperclass person dies or is blinded by an operation, the physician's fingers are cut off. If the deceased patient ha s b een a s lave, t he p hysician ha s to provide a replacement slave.

Laws governing t rade, p asturage, a nd t enant farming also appear in the Code.

 \overline{A} e magnificent edition of Hammurabi's Code prepared by Robert Fr ancis Ha rper s hould b e consulted b y a nyone w ith a n i nterest i n t his ancient document. Not only do es it c ontain t he cu neif or moriginal of the text, it also provides a transliteration and a t ranslation as well as other fascinating editorial material.

comedy in Greece and Rome

Ā e first en tire G reek c omedy to su rvive i nto modern times is Ā e Acharnians by Aristophanes (performed 425 b.c.e.) Ā e play typifies the comedy of this early period in that its essential thrust is political. It names such contemporary p oliticians as Cl eon, a nd, like o ther representatives of what critics call Greek old comedy, it pillories them. Ā e Acharnians also exposes the addictive effect that politics in the form of sitting on juries produces in old men. As the literary historian Peter Wilson suggests, this sort of comedy was rooted in making fun of or in roughly satirizing representatives of the male citizens of Athens w ho e xercised u nprecedented p ower a s members of the mass assembly of Athenian citizens (the ecclesia), ort he council of 500 who referred matters to that assembly, or the system of citizen courts frequented by the old men of $\overline{A} e$ Acharnians that sometimes brought together as many as 2,001 judges to hear cases.

 \overline{A} e o ngoing w arfare b etween A thens a nd Sparta or other city-states during the exhausting Peloponnesian W ars a lso drew comedic scorn from Aristophanes in his *Lysist r at a*. In this play, in an effort t o make the m en stop fighting, the women withhold their sexual favors and occupy the treasury to force an end to the seemingly perpetual conflict. Such c omedies were a ssociated with city festivals, particularly the Athenian festival o f L ena ea, w here t wo o f A ristophanes' plays, \overline{A} e A charnians and \overline{A} e Knights won back- to back first prizes in 425 and 424 b.c.e.

À e period of the Greek Old Comedy came to a sudden c lose with Sparta's d efeat of Athens i n 404 b.c.e. Athens was no longer the democratic ruler of a far-flung empire, and politi al theater gave way to the battle of the sexes or to class warfare. We see this shift in the late dramas of the long-lived A ristophanes with h is *Ecclesiazusae* (*Women at the Thesmomor phia*, \overline{A} e Assembly *Women*) and *Plutus* (*Wealth*)—plays that are now counted among examples of early Middle Comedy. On ly f ragmentary r emains o f o ther Gr eek middle comedies survive, but the observations of historical c ritics s uggest that pe rhaps the pl ays became l ess b awdy i n c ostume a nd language. Similar sources suggest that, in the Middle Comedy, phi bs ophers became a favorite butt of stage sarcasm. Mythology, too, seems to have become a subject of burlesque.

Stock characters—a feature that became a staple of Gr eek N ew Comedy—also made t heir appearance at this juncture, though the seeds of types like the *miles gloriosus* (see $\overline{A} \ e \ Br \ aggart$ Sold ier are also observable in such a figure as Lamachus in Aristophanes' $\overline{A} \ e \ Acharnians$.

For millennia, literary historians had to r ely on s urviving l ists o f a ncient Gr eek s tage p rops and on the imitations of Greek New Comedy by the Roman playwrights Pl aut us and Ter ence to guide their speculations about the characteristics of Ne w C omedy. N o e xample o f t he t ype a nd only tiny fragments had su rvived. A en, in the 20th century, archeologists and others discovered more a nd more f ragments. A e c apstone o f a series of finds was achieved with the appearance of a virtually complete text of Mena nder's comic play Dyskolos. A at text confirmed the conclusions that literary historians had a lready drawn. Ā e plots of the plays often involved stock situations in which more or less clueless young people fell in love but faced difficulties posed by members of t he older g eneration. M inor c haracters were drawn from a reservoir of such stock characters as cooks, slaves, parasites, and difficult old persons. A good deal of slapstick like that in the final act of Dyskolos was also featured in the plays. All difficulties were always resolved by a happy ending.

 $\bar{\mathrm{A}}$ e r ediscovery o f o ther f ragments o f n ew comedy o ffer h ope t hat other, more c omplete

representatives will b e d iscovered. We a lso find evidence of a tradition of private performance of comedies o r of c omic s cenes at b anquets a nd other e ntertainments in Greece, b ut n o specific examples of these have as yet appeared.

In I taly, where o ne m ust r emember t hat t he Greeks h ad e stablished c olonies w ell b efore t he foundation of Rome, a mode of comedy appeared as early as the second century b.c.e. It displayed Greek influence but was indigenous to the Oscan city of A tella in the vicinity of Naples; thus, it became k nown a s the A tell a ne f abl es o r fa r ces. \overline{A} ese may first have begun as extemporaneous per for mances, and they continued to be played in the Oscan language at Atella until they migrated t o the city of Rome. \overline{A} ere t hey commanded a w ide a udience l ong a fter L ivius Andronicus had introduced the regular drama to Rome, and Roman playwrights had b egun to emulate the classical drama of Greece.

Standard L atin s oon r eplaced O scan i n t hese little plays, a nd a c ustom a rose t hat p ermitted respectable you ng Rom ans, e ven t hose of t he patrician c lass, to pa rticipate a s p layers. L ike Greek New Comedy and the later Italian *commedia d ell'arte*, A tellane f arces s eem to ha ve h ad a stock set of characters that appeared in traditional costumes. One such stock character was Mappus. He w as pr esented a s having a l arge he ad, a lo ng nose, a nd a h umped bac k. A nother w as c alled Pappus. Ā e classicist J. J. E schenburg speculates that P appus m ay ha ve b een b orrowed f rom a Greek stock character, the old man called Silenus.

 \overline{A} e p opularity o f A tellane f arces a nd t he financial o pportunities fr om writing them encouraged pl aywrights who were suc cessful i n other genres—such as the poet Memmius (d. 46 b.c.e.) and the fabulist Sylla—to try their hands at composing the f arces. \overline{A} ose who s eem to ha ve enjoyed the most success with the genre and who raised Atellane farces to literary status are Quintus Novius and L. Pomponius of B ononia, w ho cooperated in writing such farces in the first century b.c.e. O nly f ragmentary r emains o f t heir works remain—about 7 0 and a bout 2 00 l ines respectively.

A c ustom a rose of having y oung Ro mans of respectable f amilies p erform i n s hort, f arcical pieces at the end of the Atellane plays. Ā ese afterpieces were called *exordia*.

Livius A ndronicus, m entioned a bove as t he father of the regular Roman d rama, w rote b oth tr agedy a nd c omedy. N o c omedy su rvives i n any but fragmentary condition, but the fragments suggest that he borrowed heavily though not slavishly from Greek New Comedy.

It would be hard to exaggerate the importance of Plautus in the annals of Roman comedy. His plays, of which there were many-possibly more than 50-are th e e arliest e xamples o f m ainstream Roman theater to survive. Plautus initiated m odern m usical co medy. H e b orrowed h is plots and h is character types f rom Greek N ew Comedy, but he often treated them innovatively, heightening aspects of plot ting. For example, he emphasized d oubling h is situations so t hat not just one but two couples of you ng lovers would complicate his comic situations. Moreover, Plautus also either borrowed from Greek Old Comedy or in dependently reintroduced a strain of risqué humor. He also drew recognizable, satiric portraits of his contemporary Romans.

Only six plays survive to represent the work of the o ther m ost f amous o f Ro man c omic pl aywrights, Terence. Like Plautus, Terence modeled his plays on Greek originals. Stock situations also typified h is plays: sh ipwrecks, m istaken identities, kidnapping by pirates, disguises, separations and r eunions, a nd y oung lo vers ke pt apa rt b y venal e lders all figured prominently. Characters were also a predictable lot: old misers, lickspittles, blusterers, f oolish y oungsters, a nd h ypocrites peopled Terence's stage. A part of the playwright's charm, however, arises from h is ability to make his characters fresh and engaging within the confines of their predictability.

Silent m imes a nd pa ntomime w ith sp oken lines also became pop uhr in Rome. Ā ese comic types became immensely popu hr. Such a notable Roman p olitician a s J ul ius C a esar su bsidized their p ublic p erformances g enerously, a nd t he various branches of comedy continued to be performed in Rome until the city's fall in 410 c.e.

After the fall of the city of Rome, such performances continued despite a general ban on theatrical p erformance. Ā ey s pread, moreover, through the provinces. A eir bawdy humor provoked at le ast t hree s orts o f r esponses f rom Christians. A e first was ineffectual disapproval. Ā e second was to create a comedy based on the legends of the church or on incidents in the Bible. A e ma jor i mpetus f or t he c ontinued development of this kind of comedy came from Constantinople and the Eastern Roman Empire. For example, the Christian bishop, Apollinaris of Laodicea, took the model of the comedy of Menander a nd a dapted to i t s everal do mestic stories from the Bible, creating a kind of scriptural comedy.

 \overline{A} e third sort of Christian response occurred in the monasteries. \overline{A} ere, a r acy monastic farce developed that a mused the monks by exploiting potential double meanings in liturgical language. \overline{A} ey might, for instance, take a p hrase like *cor meum eructavit* (my heart lifts up) and apply it to a resounding belch.

 \overline{A} e first r ecorded i nstance of s uch fa rcical material ac tually b eing p erformed i n c hurches proper, ho wever, d oes no t o ccur u ntil t he 1 0th century, w hen a p atriarch o f C onstantinople, \overline{A} eophylact, i ntroduced fa rces, co mplete w ith singing a nd d ancing, to houses o f w orship. I t seems likely that similar instances had o ccurred earlier.

 \overline{A} e i nfluence of Greek and Roman comedy has survived, informing the theater of both the Middle A ges and the Europe an Renaissance. It remains alive and well today, as one can observe in tele vision's situational comedy and, on Broadway, in such productions as A Funny \overline{A} ing Happened on the Way to the Forum.

Commentary on the Gallic Wars Julius

Caesar (ca. 50 B.C.E)

Julius Caesar's own account of his campaigns against the Celtic tribes of Gaul, apart from being of inestimable value from the viewpoint of subsequent generations of historians and readers, had important politi al and propagandistic value for Caesar's o wn g eneration a nd for h is politi al career. Ā e text gives evidence of a level of editing and thoughtful composition more careful than Caesar lavished on h is ot her e xtant work. The Civil Wars.

Book 1

Ā e first chapter of Commentary on the Gallic Wars describes t he g eography of t he c ountry

denominated Gaul, its three parts, and the inhabitants of each. A ese peoples include the Belgae, whom Caesar judges to be the toughest soldiers; the Aquitani; and the Gauls themselves, who are further subdivided into tribes. Among the Gallic tribes, Caesar deems the Helvetii to be the bravest. A e superior valor of the Belgae and the Helvetii s tems f rom si milar c auses. A ey a re t he most distant from merchants, whose wares tend to make people effeminate, and they are nearest the Germans, whom the Belgae and Helvetii constantly fight.

Caesar next traces the circumstances that led to a confrontation between the Gauls and his legions. Considering that the 38,590 square miles of their territory was too confining a space for a people of their valor and accomplishments, the Helvetii had decided to undertake a mass migration. Of the two routes a vailable to t hem, o ne w as m ountainous and m ilitarily too d angerous, a nd t he o ther l ay through lands occupied by the Romans and their allies. A e H elvetii sent a mbassadors t o C aesar, requesting permission to march through the latter territory. Su spicious of t heir motives a nd fearing that they would ravage any countryside they passed through, Caesar first dela yed g iving t hem a n answer while he made defensive preparations, and then he refused his permission.

Anticipating t hat t he H elvetii would t ry to force their way through, Caesar hurried to Italy to raise additional troops. By the time he r eturned with them to Transalpine Gaul, the Helvetii were already on the move and pillaging the territory of the Romans' allies, the Aedui, the Ambarri, and the Allobroges.

Caesar's forces pursued the Helvetii, catching up with them at night after the main body of their forces had crossed the Saone River, a tributary of t he R hone. Ca esar s urprised t he r ear guard—a c lan c alled th e Tigurini—and d ecimated them. He derived par tc uar satisfaction from this action since the Tigurini had killed Caesar's father- in- hw's grandfather three generations b efore. In a single day, Caesar bridged the Saone and came up on the main force. A e

Helvetii parlayed, and the adversaries exchanged threats an d c ounterthreats. C aesar d emanded hostages to a ssure the Helvetii's good behavior. \bar{A} ey refused.

À e s econd c hapter e xplains ho w C aesar's forces shadowed t he H elvetii a s t hey ma rched through the domain of the A edui. It a lso notes the failure of t he A edui to su pply t he Ro mans with grain as they had promised and the way that Caesar uncovered a plot to block the supply. Eventually, a ccidentally m isled i nto imagining t hat the R omans were afr aid of t hem, t he H elvetii attacked t he Rom an forc es. Ca esar details t he subsequent ba ttles, w hose u pshot w as t he u tter rout of the Helvetii.

 \overline{A} e survivors among them, whom Caesar numbers at 130,000, were ordered to retrace their steps to their original lands and were obliged to repair or rebuild a nything they had damaged or destroyed on the way. As the Helvetii were absolutely destitute of supplies, Caesar arranged for grain to sustain them on their journey home. He explains that he did not wish their former lands to remain vacant since they formed a b uffer a gainst the even more warlike G ermans. A ccording to a c ensus C aesar had taken, 110,000 Helvetii made it home.

Chapter 3 details the way in which the leaders of several tribes of Caesar's Gallic subjects came in secret to complain of their treatment at the hands of a G ermanic king, A riovistus, who was occupying their lands and ensuring their compliance with his orders by taking their children hostage. Ca esar e xchanged l etters with A riovistus, who r efused to pa rley a nd w ho b oasted of t he unparalleled p rowess of his Ge rman warriors. About t hen, C aesar r eceived c omplaints t hat Ariovistus was forcibly settling another group of Germans, the Harudes, in Gallic territory. Caesar decided that the time had come to de al with Ariovistus. By forced marches, he raced the Germanic f orces to t he s tronghold o f B esançon, which the Romans occupied. As they regrouped, the Roman soldiers began to he ar and believe stories abo ut t he i nvincibility o f t he G erman forces. Ā e officers beg an i nventing reasons for needing to take leave, and finally Caesar rallied

them with examples of previous Roman successes against Germanic troops. He also shamed them by a nnouncing h is willingness to face the Germans with only h is reliable 10th Legion. Taking heart, the Romans resumed their march and, six days l ater, en camped 22 m iles f rom t he ma in body of the German forces.

Now Caesar reports the parlays, the proposals and counterproposals, and the eventual tactical ruses of t he G ermans t hat p receded a g eneral engagement of the two armies. Caesar describes the battle and its vicissitudes. He reports that the defeated G ermans fled 1 5 m iles t o the R hine. Ariovistus escaped by boat, lo sing family me mbers i n the m elee and ro ut. \bar{A} e Sueb i, a nother Germanic tribe who were waiting on the eastern shore of the Rhine to be resettled in Gaul by Ariovistus, tried to return east to their original homelands, b ut their former sp onsors i n t he v icinity turned on them and killed ma ny of their fellow Germans.

Book 2

Having f ought t wo ma jor w ars i n o ne s eason, Caesar quartered h is troops for the winter and crossed the Alps to Cisalpine Gaul to perform his duties as judge and magistrate. A ere, as Book 2 opens, Caesar began to he ar disturbing reports that the Belgae were in arms and restless. Accordingly, Caesar raised two new legions and in early summer s ent t hem n orth a cross th e Al ps. A s soon as he could, Caesar set out for the Belgian frontier, where he a rrived u nannounced a bout two weeks later. A ere he discovered that a B elgian ar my of more t han 3 00,000 m en were already marching against him and were not far off. A s eries of def ensive ma neuvers s oon p ut Caesar in command of the situation, and the vast army that faced him withdrew. A ough its rear guard behaved as a disciplined unit, the vast bulk of the troops straggled as an undisciplined mob making its way home as quickly as it could. Ā e Roman c avalry, o nce i t had o vercome t he r ear guard's re is tance, harried the mob and killed thousands. T otal vi ctory f or C aesar's f orces required only a few more tactical successes and a demonstration of t he Ro mans' su periority i n military technology. \overline{A} e ho stile forces su rrendered. Caesar ensured their compliance with the terms of surrender by demanding and receiving 600 hostages.

Now, among the Belgians, only the tribe of the Nervii re sisted C aesar's d ominion. \overline{A} e s econd chapter of B ook 2 de scribes the R omans' c ampaign against them. \overline{A} is time Caesar's opponents succeeded in catching his forces at a disadvantage as they engaged in preparing defensive positions. So desperate, i ndeed, d id the Romans' situation become t hat a n a ccompanying d etachment o f Roman A frican Numidians decamped for home. On arriving there, they reported the defeat of the Roman forces and the loss of all their baggage.

Caesar reports that he seized a shield and personally ra llied h is t roops, f orming a s quare to defend against attacks from any direction. As his soldiers were losing heart and were in danger of being overwhelmed, C aesar's d oughty 1 0th Legion arrived to reinforce them. Ā eir presence, Caesar sa ys, " changed ev erything." H eartened, even the wounded rose from the ground to c ontinue the fight. When the battle finally ended, of a f orce o f 6 0,000 N ervii, C aesar r eports t hat barely 500 survived. Caesar treated the survivors with consideration and mercy, allowing them to keep their territory.

 \hat{A} e third chapter deals with the false surrender of the A duatuci tribe. A fter s eeing C aesar's siege eng ines, they b egged f or len iency, which Caesar g ranted. \hat{A} e A datuci su rrendered l arge quantities of arms, but during the night they sallied forth from their town and attacked the Roman positions. Caesar had prepared for that eventuality, e asily d efeated the A duatuci, a nd s old t he entire p opulation of their c ity, 5 3,000 p ersons, into slavery as punishment for their duplicity.

Shortly thereafter, Caesar received word from his s ubordinate c ommander, P ublius Cr assus, that the several tribes of Gallic people who occupied t he At lantic coast ha d a lso sub mitted to Roman authority so that all of Transalpine Gaul was at peace.

Book 3

In the high Alps themselves, however, indigenous Gauls were h arassing R oman t rade ro utes, w e learn as Book 3 o pens. Caesar describes the way he s ent forces u nder G alba to pac ify t he r egion and how the Gauls again feigned a p eaceful alliance and then mounted a ferocious attack. When the Roman defensive position seemed desperate, Galba's troops broke out in a surprise attack that routed their G allic en emies, the S eduni and the Veragri.

Book 3's second chapter reports the "impulsive decision" of the Atlantic coastal Gauls under the influence of the powerful Veneti to abrogate their t reaty with R ome and e ven t o im prison Rome's envoys-ambassadors who were's upposed t o e njoy d iplomatic i mmunity. C aesar details the difficulties he faced in pacifying the coastal peoples who used tides to their advantage, abandoned towns by sea, and moved their forces along the coast, a nd w hose sh ips were superior to the Roman craft. Caesar's commanders, however, finally discovered a weakness in the Gauls' vessels: Ā ey were difficult to row. Destroying their rigging left them vulnerable to Rom an attack. By this means, the coastal Gauls were once more pacified. Caesar then reports the successes of his subordinate commander, Sabinus, who pretended cowardice to lure another set of rebellious Gallic tribes into attacking him-a mistake that led to their decimation.

In the meantime, as Caesar tells us in chapter 3, he s ent Publius Crassus to p acify Aquitania about a third of the Gallic land area. Crassus succeeded in this commission after fighting pitched battles a gainst n ot o nly t he G auls r esident i n Acquitaine but also reinforcements the Gauls had recruited from Spain. In the course of this discussion, Caesar describes an institution among Gallic fighting men called *soldurii* (a c ognate of the Old French source word for English *soldier*). *Soldurii* swore an oath not only to share all the good things in life but also to die together either in battle o r b y s uicide. C aesar ob serves t hat he h as never heard of anyone who broke his vow.

154 Commentary on the Gallic Wars

Ā e success of Crassus in subduing the Aquitanian Gauls who took the field against him encouraged o thers to sub mit v oluntarily. S ome tr ibes, distant from the action, refused to submit, thinking that the arrival of winter would protect them from Roman incursions. In this hope many were disappointed, for Caesar himself led mopping- up operations a gainst t hem a nd had sub dued m ost before the onset of winter obliged him to suspend operations against the few remaining holdouts.

Book 4

In 55 b.c.e., as we learn in Book 4, two Germanic tribes, the U sipetes and the Tenchtheri—under military p ressure from a third, more warlike tribe, the Suebi—crossed the R hine w ith the intention o f o ccupying G allic ter ritory. A fter describing the characteristics of the Suebi and other Germanic peoples, Caesar reverts to a f requent theme: the mercurial nature of the Gallic decision-making pro æsses. Å eir p enchant f or jumping t o c onclusions, C aesar thinks, leads them to act—particularly in military matters—in ways that they often regret immediately after taking action. Caesar frequently turns this perceived weakness to Roman advantage.

Next C aesar re counts his d ealings with the Germans. Se eking t o d elay t he Ro mans w hile they awaited their own cavalry, the Germans held the R omans i n p arlay. After a greeing to de fer action, t he G ermans t reacherously a ttacked a Roman c avalry u nit. Ā e n ext d ay, t he G erman ambassadors returned, apologizing for the "mistake." Caesar, who had mistrusted them from the beginning, was not to be de ceived twice. He imprisoned the ambassadors, whose ranks included the principal German leaders, and mounted a surprise attack on the main body of their forces, slaughtering many. Ā e rest, trapped on a promontory, tried to e scape by swimming the R hine, and most drowned. \overline{A} e loss of a lmost 4 30,000 men ended the Germanic threat for the moment. Ā eir captive leaders chose to jo in Caesar rather than risk their lives among the Gauls whom they had invaded.

Given the warlike disposition of the Germanic tribes, Caesar considered it expedient to cross the Rhine with a show of force. More over, s ome of the G ermans, th e U bii, had r equested Ro man protection against the Suebi. Caesar declined an offer to have his troops transported over the river in German boats. Instead, he and h is engineers designed a nd, in 10 d ays, built a b ridge c apable of withstanding the R hine's c urrent. Ab ove t he bridge, he also had bulwarks built to impede any logs and tree trunks that the Germans might float down i n an effort t o d estroy t he b ridge, w hose clever design Caesar reports in detail.

 \overline{A} e Ro man i ncursion, w hich l asted o nly 1 8 days, a chieved all its objectives. \overline{A} e U bii were no lon ger threatened. \overline{A} e Suebi a nd t heir a llies the Sigambri, thinking the Ro mans i ntended to attack them, a bandoned their towns a nd moved deep i nto t he f orests, w here t hey ma ssed i n expectation of a Ro man attack. I nstead, C aesar destroyed their towns and crops. \overline{A} en his forces returned to Gaul, de stroying the bridge a s they withdrew.

On the understanding that h is enemies had received help from their allies in Britain, Caesar next formulated a plan to send an expeditionary force t o that i sland. K nowing n ext to nothing about it, he set about finding out what he c ould from traders who went there. Ā e traders reported his plans in Britain, and, while he prepared 80 transports f or a c hannel c rossing, de putations began arriving, offering hostages to secure Caesar's friendship.

When the Roman infantry actually arrived off the coast of Britain, however, a ho stile defensive force was waiting for them. Caesar's cavalry had missed the tide for sailing and had not yet arrived. Caesar describes the difficulties of the infantry's landing, t heir co urage, the d efensive t actics o f the B ritons, an d t he e ventual suc cess o f t he Roman i nfantry. W hen t he defenders had b een defeated, they sent emissaries to Caesar. Although the Britons had en chained Caesar's a mbassador, Caesar displayed his usual forbearance, accepted their apologies and excuses, and looked forward to the Britons' peaceful submission.

Weather, however, proved to be a more formidable foe than had the island's defenders. A storm forced most of Caesar's late- arriving cavalry to return to the Continent, and very high tides made him s uspect h is t ransports were n ot s eaworthy. When the Britons realized that his expeditionary force was effectively cut off, they began to hatch plots a gainst t he Ro mans on t he theory that a Roman f ailure w ould i nsure t heir i sland f rom further i neursions. After a f ew o ther enga gements against the Britons, all occasioned by their treachery, C aesar decided to t ake t he r isk o f crossing the channel on doubtful transport before winter weather closed t hat o ption to him. A e Romans made the crossing without incident, but when the first ships reached the Continent, local Gauls harried the disembarking legionaries until the Roman c avalry was a shore. $\tilde{A}\ ent he\ G$ auls took flight with much loss of life.

At the end of B ook 4, Ca esar, as he often does, reminds h is readers of h is unparalleled services to the Roman state by reporting the senate's de crees of public thanksgiving on receipt of his reports.

Book 5

As Bo ok 5 b egins, C aesar det ails th e p reparations he ordered for his second invasion of Britain. N ow t hat he k new a bout t he c hannel a nd what to expect on the other side, in addition to repairing his small fleet, he designed a new kind of cargo transport and ordered 600 of these and 28 new warships to be built for a c hannel crossing from Boulogne, where the distance to Britain was only 28 miles.

He interrupts the narrative concerning Britain to r ecount h is ac tivities to pac ify t he everfractious Gauls and his decision to take along the most untrustworthy among them on the second invasion of B ritain. H e was c hiefly c oncerned about an old enemy, Dumnorix. Dumnorix tried everything to avoid going to Britain. When Caesar remained firm, Dumnorix tried to sneak away; Caesar s ent ca valry a fter h im a nd had h im killed. Leaving hi s ad jutant, L abienus, w ith t hree legions a nd 2,000 c avalry to f ortify t he G allic dominions on the Continent, Caesar and a fleet of almost 800 warships sailed to Britain. Ā ough Celtic fighters had massed to confront the invaders, the sight of so large a flotilla frightened them, and Caesar met no opposition to his initial landing. Skirmishing soon began, however, and Caesar d escribes t hese enga gements. H e a lso describes t he geography of t he e astern si de o f Britain a nd s ome of t he c ustoms of t he people, like wife sharing.

Ā e Br itons a greed on t he app ointment of a warlike chieftain, C assivellaunus, a s t he o verall commander of t heir forces, and he suc cessfully harried t he Roman a rmy with lightning chariot raids. Not all the Celtic tribes, however, universally admired Cassivellaunus, and several defected, placing themselves under Roman protection. Disheartened by these desertions and by Roman victories, C assivellaunus himself as ked f or t he terms of surrender and accepted them.

After the British Celts a greed to s end a nnual tributes to Rome, C aesar and h is entire expeditionary force withdrew to the Continent. \overline{A} ere a drought had produced a poor harvest, and Caesar found it necessary to d isperse h is troops around the occupied territory. Many Gauls were discontented with the occupation of their territory, and with th e R omans dispersed a st hey were, the Gauls ag reed t o a ttack all th e Ro man w inter camps at the same time so that one could not be summoned to the others' aid.

One G allic le ader, A mbiorix, jo ined i n t he general upr ising, but, a s he e xplained, he was grateful to C aesar for past k indness a nd su pport. H e therefore w arned th e R oman c ommander S abinus that a g reat a rmy of G ermans had crossed the Rhine and were moving to attack within th e n ext few d ays. A fter a p rolonged council of war and much disagreement, Sabinus determined to lead the greater part of the garrison to a better fortified position. As he was doing so, it was necessary for the entire army to march through a long, deep ravine. As soon as all the Romans were w ithin it, A mbiorix h ad h is

warriors attack the Romans at both entrances to the ravine. Finding his situation desperate, Sabinus r equested a c onference w ith A mbriorix. When he arrived at the meeting place, however, Sabinus was k illed. On ly a f ew of h is soldiers escaped to tell the story of the destruction of a Roman army.

Ambriorix's s uccess h eartened ot her G auls, who j oined h im i n m ounting a n attack on t he winter camp of those Roman troops commanded by Cicer o's brot her, Q uintus Tullius Cicero. A s Ambriorix had done with Sabinus, they attempted t o l ure Q. Cicero out of camp by guile, but Cicero did not rise to the bait. \overline{A} e Gauls attacked the Roman camp, using tactics they had le arned from the Romans. \overline{A} e Ro mans, ho wever, hel d out, a nd C aesar re counts the story of t wo r ival centurions, Vorenus and P ullo. Forever a rguing about who was the better soldier, the two sallied out a lone a gainst t he en emy, s aved e ach o ther's lives, and returned safely to camp.

By promising his freedom and riches to a Gallic slave, a Ro man lo yalist G aul na med Vertico sent h is se rvant u nnoticed t hrough t he G allic lines with a message to C aesar w rapped a round the s ervant's sp ear sha ft. C aesar i mmediately marched to Cicero's rescue with a relatively small band of Romans. Ā rough deception and superior tactics, he was able to d raw off the Gauls attacking C icero an d def eat t hem de cisively. Si milar tactics and determination by Labienus led to t he defeat of a nother dangerous Gallic force and the death of their leader, Indutiomarus.

Book 6

 \overline{A} e Roman yoke, however, still lay heavy on the necks of the subjugated Gauls, and revolutionary violence was far from over. Book 6 r eports the steps that Caesar took to suppress the revolutionaries or to dissuade them from taking up arms. H aving d ealt with the G auls, h owever, Caesar learned that the German Suebi were once more in arms. \overline{A} e Ubii, another Germanic tribe, did n ot w ant C aesar to t hink they were n ot observing the agreements they had made w ith the Romans, so they became the Romans' eyes and ears, keeping Caesar apprised of the Suebi's movements.

Ā e second chapter begins with a discussion of the customs and characteristics of the Gauls and the Germans. Ā e priestly classes, called the Druids, and the military classes, the knights, ruled the Gauls. Polytheists, whose gods Caesar calls by Roman na mes, t he p riestly c lasses en joyed a ll sorts of privileges, including freedom from taxation, and they taught the doctrine of transmigration of t he s oul. A e k nights b rought to ba ttle with them contingents of arm ed w arriors, a nd knightly prestige and status rested on the number of followers who accompanied the knights to battle. A e G auls c onsidered t hemselves to b e t he descendants of D is, t he g od of t he u nderworld. Ā e ma gistrates su ppressed a ny n ews t hat t hey considered might not be good for their people to learn.

 \overline{A} e G ermans, o n t he o ther ha nd, had n o priestly c lass. Caesar t ells us they worshipped objects and phenomena like the sun and the moon and fire. \overline{A} ey derived prestige from controlling vast t racts of wa steland a nd f rom f orcing t heir neighbors off land t hat they c oveted for t heir own. Caesar describes a vast forest whose extent is unknown except that it stretches east for more than 60 days journey. He describes some of the fauna o f t his f orest, s uch a s e lk a nd t he now-extinct giant aurochs.

In the third chapter, Caesar turns his attention to describing his tactics in pursuing and punishing Ambiorix. Leaving Q. Cicero in charge of the Roman army's baggage and a small garrison and promising to return on afixed day, Caesar warned Cicero n ot to s end a ny t roops o utside t he f ort walls. Cicero, h owever, began to d oubt t he w isdom o f C aesar's i nstructions. H e finally s ent troops out to gather grain. As it happened, a force of m arauding G ermans of the S igambri tribe, seeking boo ty at t he s uggestion of so me Ga uls, arrived a t C icero's c amp t hat ve ry d ay. I n t he ensuing a ttack, t he dimin ished g arrison h eld firm. Veterans among the foraging party, caught outside by t he G erman attack, o pted to f orm a flying wedge and fight their way back to c amp. \overline{A} ey achieved this with no losses. New recruits instead chose first t o def end t he h igh g round. \overline{A} ey were forced off it and also tried to cut their way through to the fort, but they were hampered by their adversaries, and only a few reached safety. O nly C aesar's arrival the n ext d ay ke pt t he garrison from total panic.

In his search for Ambiorix, Caesar once again had recourse to a scorched earth policy, devastating t he l and o f t he G allic E burones. A mbiorix and a b odyguard o f f our t rusted c ompanions, however, s till ma naged to el ude t he Ro man dragnet.

In the winter of 53-52 b.c. e., while Caesar was south of the Alps and h is Transalpine troops all in winter quarters, the Gauls decided on an allout effort to r id themselves of the Roman yoke. \overline{A} eir c hoice f or le adership f ell u pon a y oung Gaul of t he A rvernian t ribe, V ercingetorix. H e was t o become t he m ost c elebrated w arrior h is people had ever known.

A s avagely no-nonsense r uler, V ercingetorix used fear of h is ruthlessness to instill iron discipline in the Gallic tribes under his sway. With his troops s hoveling t heir w ay t hrough blo cked Alpine passes, however, Caesar was able to s urprise the Gauls and throw their expectations into disarray. V ercingetorix re sponded to C aesar's remarkable t actics by c hanging h is strategy and instructing h is allies to make every effort to cut off the Roman g rain su pply. H e a lso i nstructed the Gauls to burn down those of their own cities that would be impossible to d effend. Ā ese expedients proved so successful that the Romans were sometimes hard put to keep from starving.

Despite suc h d ifficulties, Ca esar s howed his usual mi litary a cumen b y successfully l aying siege to the city of Bourges, most of whose inhabitants perished in the Roman victory. Moreover, the city was a bundantly supplied with grain—a circumstance that solved the Roman food crisis. In addition to describing the tactical and strategic s ituations a s t he w ar a gainst V ercingetorix and h is supporters de veloped, C aesar i s a lways careful to keep readers informed about the political s ituation a mong t he G auls, s o t hat r eaders understand t he currents a nd c rosscurrents of public opinion and the truths and falsehoods that shape it.

Caesar next describes the battle for the walled city of Gergovia—a battle t hat en ded in t he Romans' tactical withdrawal and with the Gauls still in possession of the town. By forced marches, then, Caesar led his legions to a place where they could still ford the meltwater-swollen Loire River a crossing the Gauls had thought impossible.

Book 7

In the first three chapters of B ook 7, the G auls secretly plan a rebellion under the leadership of the C arnutes. \overline{A} ey see k C enabum and k ill its Roman population. In the fourth chapter of Book 7, C aesar turns his a ttention t o d escribing the campaigns of hi s c olleague L abienus, w hose troops were conducting simultaneous, i maginative, and suc cessful o perations a long t he R iver Seine. \overline{A} e revolt of the Aedui against the Romans, however, heartened those Gauls whose allegiance still wa vered, and th e Ro man p osition b ecame less and less tenable.

 \overline{A} e Aedui contested the supremacy of Vercingetorix, but w hen a ll t he G allic r epresentatives voted on t he i ssue, V ercingetorix em erged a s supreme commander. \overline{A} en began preparations for a final c onfrontation b etween t he c ombined strength o f the G allic t ribes and th eir Ro man adversaries. \overline{A} e Romans were not entirely without allies; p erhaps i ronically, t he G ermanic t ribes whom they had overcome h onored t heir t reaties. \overline{A} e Ro mans a nd t heir G ermanic a llies ro undly defeated the best hope of the Gauls, their massed cavalry.

Vercingetorix n ow r etreated to t he c itadel of Alesia. From there he sent representatives to all the Gallic t ribes, ca lling on them to send r einforcements and explaining how dire his own supply situation had become. He collected all the available grain and began to dole it out in small increments, explaining that by that expedient he m ight make his supplies last for 30 days or a bit longer.

158 Commentary on the Gallic Wars

In the meantime, Caesar began to use superior Roman technology to c onstruct t renches, r amparts, ba ttlements, to wers, a nd b reastworks to impede any attack that his enemies might initiate. Caesar's mi litary i nnovations in cluded st akes embedded in the ground in such a way that enemy attackers would necessarily impale themselves on them. V arious i nventive b ooby t raps were a lso put in place. \overline{A} e net result was that the Roman forces could not be surrounded.

All the G auls, e ven t hose w hom C aesar had found absolutely reliable in his campaigns against the Britons, responded to Vercingetorix's call for Gallic unanimity in his support. Ā ough they did not re spond a s g enerously a s h e had a sked, t he sheer numbers of Gallic enemies massed against Caesar were nonetheless daunting—8,000 cavalry a nd 250,000 infantry. But t hey were slow i n coming, and this resulted in the defenders of Alesia e xpelling f rom t he c ity a ll w ho were ei ther too old or too young to fight. Ā e Romans, however, would not receive them.

Caesar r ecounts t he ferocious b attle t hat followed. Although the issue was often in doubt, the Romans e ventually won the d ay. V ercingetorix instructed his s ubordinates t o e ither p ut him t o death or turn him over to the Romans. Å e Gauls chose the latter course, Caesar made arrangements for governing the subdued Gallic tribes, and Book 7 ends. We learn from other sources that Vercingetorix was forced to march as an enslaved captive in Caesar's victory parade and later put to death.

Book 8

Book 8, which tells the end of the story, comes to us not from Caesar's pen but from that of his subordinate, Aulus Hirtius. In a charming and modest p refatory le tter to t he eig hth b ook, H irtius reveals that he re luctantly wrote the b ook a fter acceding to t he r epeated requests of Caesar's friend, L ucius C ornelius B albus. H irtius a lso says that, fully acknowledging his own incapacity compared to Caesar's ability, a s substitute author he continues the story only until the moment of Caesar's death. Hirtius d etails the mopping- up operations against a Gallic tribe, the Bellovaci, who had the ingenuity to cover their withdrawal with a conflagration that disguised their movements. However, as the Bellovaci under their leader, Correus, attempted to rout the Romans in a surprise attack, the t ide o f b attle t urned a gainst t hem a s t he Romans overwhelmed the surprise attackers.

In the second chapter, Hirtius tells of Caesar's scorched earth policy against the adherents of the still- fugitive Ambiorix. He a lso r eports the way in which the squadrons of Caesar's subordinate commander, Gaius Fabius, intercepted the forces of a nother f ugitive G allic le ader, D umnacus, a s he at tempted to flee across the Loire river. Fabius's f orces r outed a nd d estroyed m ost o f t he Gauls. Du mnacus h imself, however, e scaped to plot further mischief against the Romans.

Hirtius n ext r eports t he Ro man suc cesses a t Uxellodunum, where a force under the command of the Roman general Caninius killed or captured all his Gallic enemies who faced him in the field. Nonetheless, the R omans c ould n ot b ring t he town i tself to su rrender u ntil t hey ma naged to divert i ts w ater su pply. A fter n umerous to wnspeople had died of thirst, the city finally submitted. C aesar de cided to make an example of Uxellodunum t o d iscourage ot hers f rom d etermined re sis tance. He had t he ha nds c ut off all who had b orne a rms and then r eleased them s o that o thers c ould l earn f rom t heir e xample. Despite this, further examples follow of Caesar's capacity for the exercise of mercy.

Ā en Hirtius follows Caesar's progress though the Cisalpine provinces as he makes his way toward a Rome in which, as his second term as Cisalpine and Transalpine proconsul drew to a close, Caesar's p olitical e nemies were b usily at tempting to strip him of power.

Concerning the City of God against the Pagans St. Augustine, bishop of Hippo (413–425 C.E.)

As a C hristian spo kesman, St. A ugust ine, bishop of Hippo, had written against many of the opponents of W estern C hristian orthodoxy, both those Christian splinter groups that he considered he retics and those old er faiths that represented pagan idolatry. In Augustine's view, however, no group presented a greater danger t o C hristian b elief t han di d highminded a nd v irtuous Roman i ntellectuals. These men were often Neoplatonists who were also devoted to the austerely virtuous life that they found modeled both in the writings of revered t hinkers and by citizens in the early days of the Roman Republic. These men were the very kind of intellectuals who had weaned Augustine himself a way from the absurdities of Manichaeanism (see Manichaean wri tings) b etween t he t ime w hen he a rrived i n Milan and the moment that St. Ambrose made Augustine a Christian convert.

Augustine's classical e ducation had e quipped him with a comprehensive mastery b oth of t he texts u pon which t he N eoplatonists based t heir arguments an d of t heir p referred rhe torical approaches to conducting their arguments. Moreover, as his most notable biographer Peter Brown has demonstrated, Augustine understood that the strongly held v iewpoints of t hese conservative, pagan thinkers were grounded in an antiquated literature. Of t hat literature, A ugustine h imself was also a perfect master. To the bishop, it seemed that his adversaries took an essentially romantic view of an cient R oman e thical p ractice. Ā e practice t hey admired had n ever r eally e xisted. Nonetheless, like the Christians, the salvation of souls was the ultimate objective of these virtuous pagans in the waning days of the Western Roman Empire.

To a nticipate and c ounter t he a rguments of such erudite opponents, Augustine undertook what he described as "a giant of a book." In Concerning t he Cit y of G od again st th e P agans, he adopted a plan that rested on his mastery of classical texts. Ignoring the then-contemporary mystery cults that shared with Christianity many such features as raising the dead, Augustine takes aim at the ancient traditions on which the thought of his o pponents w as ba sed. H e ma kes point-bypoint comparisons between such classics of Rome as V ir gil's Aeneid and C hristian S cripture. Always he compares the utility of pagan answers with the h elpfulness of t hose p roposed in t he Bible. Using this method, the first 10 books of the City of God effectively but respectfully demolish the intellectual basis of his opponents' paganism. Particularly, Augustine pays tribute to the Neoplatonist aut hor P or phyry's f ailed at tempt to find a path by which the human soul could be set free.

Whereas A ugustine's o pponents c onceived o f their Roman a neestors' virtues as divinely privileged, Augustine instead saw those same Romans as laboring like all other human beings under the burden of original sin. His opponents had i dealized t he un doubted virtues of t he e arly Roman state bec ause t hey were what they had to work with.

 \overline{A} e s aint is n ot a bove a b it of s arcastic criticism when he considers those virtues exaggerated, as is the case when he d iscusses the famous chastity of the Roman matron Lucretia. Nonetheless, A ugustine g rants t hat Ro man v irtues had made the Roman Empire, with all its faults, better than any of its predecessors. He argues, however, that the Romans had an ulterior motive for their o bsession with virtue: \overline{A} ey l usted a fter glory. \overline{A} ey s uffered, i n o ther w ords, f rom t he archetypal sin of Satan.

 \bar{A} ough he doesn't put it just that way, Augustine does p ursue t he subject of e xcessive a nd d iabolic

pride. In their obsession with the pursuit of ancestral pagan virtues, the Neoplatonist intellectuals of Rome were continuing to draw on the same sources that motivated t he old Ro mans' obs ession w ith glory. Ā ose sources, as Augustine firmly believed, were t he d emons, fa llen f rom heaven, w ho t ried continually to drag human souls with them to Hell when the last judgment came.

In m arshalling h is a rguments, A ugustine, a s Peter Bro wn c onvincingly dem onstrates, m oves the seat of glory from the human imperium—from Rome as a concept—to the heavenly City of God.

Confessions St. Augustine, bishop of Hippo (written ca. 397–401 C.E.)

Often called the world's first modern autobiography, St. Augus t in e's *Confessions* tracks the moral, spiritual, emotional, intellectual, and psychological development of one of the most imposing figures w ho e ver gr aced Christendom. F rom a religious viewpoint, the work is also an extended address to God—and thus a p rayer, a p rofession of faith, a reflection on the op eration of D ivine Providence, and a hymn of praise.

Book 1

Following a leng thy i nvocation i n w hich h is ecstatic a doration of D eity manifests i tself, Augustine arrives at his birth in the sixth chapter of the first book. He k new, he says, only how to suckle, b e s atisfied with pleasant things, and to cry when he was hurt. Later he learned to sm ile and to make his wants k nown by crying. When adults did not fulfill his whims, he became angry and punished them by crying more. À inking b ack o n matters t hat h e c annot remember—the desires that he felt in infancy— Augustine t hinks t hat e ven a s a bab y he m ust have been both manipulative and sinful. In Book 1, c hapter 9, h e recalls the circumstances of h is early sch ooling a nd ho w he w as w hipped i f he was slow to learn. He recalls being punished for preferring play to school, and says that adults are not punished for analogous preferences.

In chapter 10, Augustine remembers his childhood sins, and in the following chapter he tells his readers that soon after birth he became a catechumen in the Roman Catholic church—one marked out for Christian instruction although his baptism was deferred. Here too we find the first substantial passage a bout h is m other, M onica, a de voutly Christian woman who headed a household unanimous i n it s f aith e xcept for A ugustine's fa ther, who at this stage still believed in the old Roman religion.

In c hapters 1 2 a nd 1 3, A ugustine c onfesses that h e "d etested" h is s choolwork, pa rticularly the study of the Greek language, though he liked Latin. He excoriates the grammar schools for filling children's heads with poetic fictions—fictions he had liked as a child. He did not, however, enjoy translating them from a tongue in which he was not already reasonably fluent, and Latin was his native to ngue. H e p rays for for giveness for t he vanity o f st udying l iterary fictions, a nd t hat theme carries through the end of Book 1, chapter 17. Ā ere h e w ishes that h e h ad b een s tudying Scripture i nstead of t he a ncient p oets, a nd he remarks that there is more than one way to "sacrifice to . . . offending angels."

Given the sorry state of his boyish soul, Augustine cannot imagine a condition that God would have found more offensive. \overline{A} e symptoms of that state were to be found in his love of games, in a love of food and wine that prompted him to steal from his parents, and a desire for winning that led him to cheat.

On the positive side, as A ugustine reports in chapter 20, he found delight in truth, developed a good memory, learned to speak well, found friendship consoling, and avoided "suffering, dejection, and ignorance." He thanks God for these freely given gifts and prays that he may yet perfect them to the degree that he may be with God.

Book 2

As the second book begins, Augustine avers that he wants to r ecall h is f ailings, n ot b ecause he loves them, but because he wants to love God. He confesses that as a youth he ran wild through various "shady lo ves." H e ad mits to l ustful a nd shameful ac tions i n h is b oyhood. Ma trimony might h ave saved h im, but h is pa rents were focused on h is education, not on the state of h is soul's well-being and t he realities of p ostpubescent adolescence. His 16th year—a year the family could not afford to send him to school—proved especially difficult for the young Augustine.

His mother tried to redirect his course, but he despised her advice, favoring the approval of his wicked companions. If he could not match them in vice, he pretended to t hat sin rather than be laughed at for chastity.

 \tilde{A} e f ourth c hapter o f B ook 2 c ontains t he famous episode of the pear tree, in which Augustine and his companions stole a neighbor's pears not b ecause they were h ungry, b ut for t he she er thrill of stealing and wasting food. \tilde{A} ey took pleasure in their crime. In chapter 5, still in the context of t he pe ar episode, A ugustine t races t he origin of s in to the h uman de sire for such lesser goods a s " tactual tactile s ensations," d efense of honor, a nd f riendship. I n s earch o f t hem, t he human creature deserts the higher goods of God's eternal love and companionship.

In the following chapter, Augustine discourses on the operation of pride, lust, and covetousness as a failed effort to emulate the power that belongs t o God alone—the a rchetypal s in o f Satan. Chapter 7 gives thanks that, despite such failings, God cured him. Nonetheless, Augustine still suffers a nguish at the thought of h is sinful folly i n h aving p articipated i n the th eft of t he pears. He is still a shamed, though h e ha s long been forgiven a nd, at the moment of c omposition, is serving as the bishop of Hippo. He closes the book by confessing that, in his youth, he wandered into the desert of selfishness and became estranged from God.

Book 3

Book 3 o pens w ith A ugustine's a rrival i n Carthage—ostensibly to continue his studies. He confesses that he immediately plunged into love affairs. He also cherished the theatrical depiction of love a ffairs (chapter 2), in which he i maginatively participated. A ugustine confesses that he even managed to conduct an affair in church, for which, along with his other lapses, God punished him—though not as much as he felt he deserved. Moreover, he and his fellow students of or atory and rhetoric conspired to behave demonically.

 \bar{A} et hird c hapter r eports A ugustine's first acquaintance with the doctrines of Manichaeanism and the attractions those teachings held for him. \bar{A} e reader also comes to u nderstand more deeply Monica's concern for her son, and Augustine reports a dream that predicted his conversion to Christianity.

In c hapter 4, w e l earn t hat it w as C icer o's *Hortensius*, rather than Scripture, that converted Augustine into a true seeker after wisdom. A nd yet, the s aint c onfesses, the na me of Christ was absent f rom h is search. Augustine t ried to r ead the Scriptures but found that they failed to meet Cicero's test for truth. He found the Bible's style off- puting, and he had n ot y et le arned to s ee beyond its surface. Ā is theme occupies the following s everal cha pters, a fter w hich A ugustine turns his attention to the issue of evil habits. Ā is issue occupies a significant portion of his thought here and elsewhere. If one can successfully form good habits, one makes considerable headway in protecting oneself from temptations.

Book 4

 \overline{A} e 16 chapters of Book 4 detail Augustine's last years in Carthage as a student of Manichaeanism and as a young teacher of rhetoric. With respect to the latter activity, he c haracterizes himself as

162 Confessions

"conquered by cupidity" and as "a vendor of victorious verbosity." It is in this book, to o, where the reader first learns of the woman with whom Augustine lived for some years. A ough he characterizes the union as an unlawful one, that characterization is from a Christian perspective rather than that of Roman law. Certain arrangements of concubinage, of which this apparently was one, were sanctioned by a degree of legality. Roman custom acknowledged as legal the sort of arrangement t hat A ugustine h ad w ith this u nnamed woman, who bore him his only and much beloved son, A deodatus. A ugustine's b iographer, Peter Brown, calls the couple's relationship a "secondclass m arriage." A ugustine w as f aithful to t he woman, and she remained with him until near the time of his final reconversion to the Christianity of his early boyhood in Milan. Such a degree of relationship was very easy to terminate, and had Augustine not converted, his social standing makes it improbable that he would have married the unnamed woman. Rather, as finally did happen, a suitable match would have been arranged for him.

Also in Book 4, Augustine confesses his interest i n n umerology a nd a ll s orts o f ma gic a rts, including as trology. W hen a young friend died, Augustine w as de eply a ffected a nd de pressed a t the passing of a young person of such promise.

In the following chapter, Augustine reports his return to his birthplace, Tagaste, where he again established himself as a teacher of rhetoric. As he formed ne w f riendships, h is d epression p assed. He takes the opportunity to point out in the ninth chapter t hat o ne's f riendship with G od c an l ast forever. \overline{A} e next three chapters trace the transitory nature of material things, t reat G od as t he source of all beauty, and explain that things a re lovable on ly b ecause of t he pre sence i n them of their Creator.

In the 13th chapter, Augustine speaks of some books he wrote on the subject of "the beautiful and the fitting," but what, beyond their subject, may have been in them, he says, has slipped from his memory. He do es re call that he addressed those books to a person n amed Hierus—a m an Augustine admired. As Augustine continues confessing h is m isapprehensions, i t b ecomes c lear that he remembers perfectly well what he wrote in the books, but he ha s b ecome a shamed of t heir contents. He insists, however, that in his error he was striving toward God, who was not yet ready to accept him until he had b een punished for his sinful life in some measure. God e ventually did administer t his punishment, t hough A ugustine thinks it was too mild.

Book 5

In Book 5, A ugustine says that all thet ime he sought God, God was right before him. Yet Augustine was still immersed in Manichaean thinking. Eventually he came in contact with a Manichaean thinker named Faustus-a man he had b een very anxious to meet. A ugustine remained impressed with F austus a s long a s he he ard h im pre ach. When he at last had the opportunity to question Faustus privately, though, he discovered that Faustus was a slick public speaker with only superficial learning to support his public utterances, and he began t o f eel doubts a bout t he Ma nichaeans. When he discovered that Faustus was aware of his own ignorance and willing to admit it, Augustine found Faustus once again attractive and gave him the benefit of the doubt as a man, but the doctrines upon w hich A ugustine ha d p inned suc h ho pes began to lose their appeal.

Chapter 8 o f B ook 5 r ecounts A ugustine's decision to g o to Ro me to te ach. H is mot her tried to dissuade him from going; failing that, Monica tried to persuade Augustine to take her along. To e scape her en treaties, A ugustine lied and s lipped a way, b oarding a sh ip a nd s ailing off. A lthough M onica bl amed her s on f or t he deception, she n onetheless prayed f or h is c ontinued well-being. I n chapter 9, A ugustine reports that he fell dangerously ill in Rome. He considers that he was in peril of hellfire, since he had n ot y et b een bapt ized. H e c ontinued c onsorting with the Manichaeans in Rome after his

recovery, but he had become disenchanted with their doctrines, and at this stage found himself attracted to t he p hilosophical de scendants o f Pl at o, t he A cademic philos o phes. Ā en h is thinking turned once again to Catholicism. His religious t hinking, ho wever, w as i n a s tate o f confusion a s h e conflated do ctrines f rom t he several philosophies and religions that he knew. He h ad r eservations b oth a bout M ary's p resumptive virginity and about the truth of many biblical passages.

 \overline{A} e hope of finding a better-behaved class of students had b een a mong Augustine's objectives in going to Rome. What he found there, however, were students who broke their word, who did not pay their fees, and who often simply disappeared. At just about that time, Symmachus, the prefect of Rome, required a master of rhetoric in Milan, and Augustine enlisted his friends to help him get the j ob. H e s ucceeded and w ent o ff to M ilan, where he met St. Ambr ose, the Christian bishop of M ilan. U nder t he i nfluence o f A mbrose, Augustine r esumed t he C hristian s tatus o f catechumen—the r oad u pon w hich h is pa rents had initially started him.

Book 6

In the meantime, as we learn in Book 6, Monica had c ome to jo in A ugustine. She c ame to re vere Ambrose and unquestioningly accepted his authority when he instructed her to abandon the African custom of revering the saints by bringing offerings of food to their shrines. In this book, too, we learn that A ugustine c onsidered St. A mbrose's habit of silent reading to b e a n ovelty. Reading a loud was the more common practice in the ancient world.

During this period, Augustine began to understand Catholic doctrine correctly, and his doubts started e vaporating. N onetheless, a C hristian vocation had not yet occurred to him. He longed, he reports, for "honors, wealth, and [an advantageously a rranged] m arriage." But l ittle by l ittle Augustine became infused with an obsession for God t hat ev entually overcame s uch c ompeting

notions-but not quite yet. In the 13th chapter of Book 6, A ugustine r eports t hat, l argely t hrough his mother's efforts, a suitable girl had at last been found for him, and although he was still involved with h is A frican c oncubine, a m arriage w as i n prospect. A e girl, however, was still two years shy of the Roman marriageable age of 12, so no immediate arrangements were on the horizon, and in the event, no marriage ever took place. Nonetheless, w hen t he b etrothal o ccurred, t he A frican woman, says Augustine, "was torn from my side," leaving him with a "wounded heart." On her part, she vowed to G od n ever to k now a nother man, and she left Augustine and his son. Despite this painful s eparation, a nd de spite h is b etrothal, Augustine's oon found h imself a nother w oman. He characterizes himself as "a slave of lust."

Book 7

Book 7 traces Augustine's philosophical and religious development, beginning from about the age of 3 0. I n t his boo k, A ugustine c onsiders suc h questions as whether or not a G od who is totally good can be the source of evil. Since this is a logical i mpossibility, A ugustine n ext wonders w hy God permits evil to exist. Yet amid his questioning, h e is also aware of a growing f aith i n t he teachings of the Catholic church.

As Augustine's faith grew, so did his contempt for astrologers and numerologists. In the seventh chapter of B ook 7, h e ad mits t hat t he principal barrier to his total conversion was the deadliest of all th e si ns, h is p ride. Y et l ittle b y l ittle, G od administered the healing ointment of faith, and Augustine's p ride diminished. A s it did s o, hi s understanding of God matured, and with fuller understanding came a deeper faith. A at faith did not reach its full maturity, however, until Augustine came to see that Christ was the mediator between the human and the divine. A is was a step t hat A ugustine w as s till n ot a ble to t ake. While he was ready to acknowledge Christ as the greatest person in the history of the world, and even a ccepted t he v irgin birth a sl iteral t ruth, Augustine d id not yet g rasp the meaning of the phrase "the Word made flesh."

Book 8

When A ugustine r ead t he w ritings of St. Pa ul, however, this too began to clarify, and, as Book 8 reports, he began to consider entering the priesthood. But as he was still enthralled by women, he sought h elp from S implicianus, a m entor of St. Ambrose. Simplicianus congratulated Augustine on h aving re ad t he P latonist p hilosophers a nd having a voided t he er ror of t he o thers. H e tol d Augustine about Victorinus, an even wiser Christian who had converted when he r ead the Scriptures w ith the i ntention of re butting t hem. Y et Augustine remained torn between the attractions of the flesh and those of the spirit.

It w as a t t his moment t hat A ugustine first learned f rom a C hristian na med P onticianus about the existence of St. At hanasius's \overline{A} e Life of Saint Anthony and its miraculous effect in leading t wo y oung m en i nto t he m onastic l ife. Under t he i nfluence o f t hat s tory, A ugustine famously p rayed: "Give m e c hastity a nd selfrestraint, but no t j ust y et." (Book 7, chap. 7) A deeply troubled Augustine concluded that he was weighed down by habit and original sin.

Seeking a sign of providential will, A ugustine opened the Scripture at random and chanced upon Paul's letter to the Romans, 13.13: "Not in revelry and drunkenness, not in debauchery and wantonness, not in strife and jealousy; but put on the Lord Jesus Christ, and as for the flesh, take no thoughts for its lusts." Convinced now of his Christian vocation, A ugustine w ent d irectly to h is m other a nd told her o f h is de cision to en ter the church. Å at decision, s ays A ugustine, pleased he r more t han further grandchildren would have done.

Book 9

Book 9 reports how Augustine gave up teaching rhetoric and how he continually excoriated himself for his former misdeeds and credulous acceptance of Manichaean doctrine. He sought counsel from Ambrose a bout what he sho uld re ad next, and Ambrose adv ised h im to read "Is aias the Prophet." A ugustine, h owever, did not then understand the book and decided to try it later when he had improved his understanding of the language of S cripture. Hes ubmitted his own name as well as that of his son, Adeodatus, then 15 y ears old, among those who would s oon be baptized.

We also learn of the discovery of the preserved bodies of t wo Ch ristians, Pr otasius and G ervasius, who had been martyred in the time of Nero. \overline{A} e bapt ism of A ugustine and A deodatus occurred, and together with Monica they set out for Africa. At the port of Ostia near Rome, however, M onica d ied. A ugustine d igresses to tel 1 something about h is m other's life. H e r ecounts the way in which she f ell into the habit, first, of taking a sip of wine each day. Little by little, the amount increased until she was drinking two full cups. Wh en a maid c alled t he young Monica a "wine-biber," Monica was so stung by the truth of the c haracterization t hat she n ever to uched another drop.

In the ni nth c hapter, A ugustine g oes o n to report how by her patience and care, she was able to ma nage a d ifficult and irascible h usband s o that, unlike the husbands of her friends, he never beat h er. E ventually, ra ther, s he made h im n ot only a model husband but also a Christian.

In the 10th chapter, A ugustine r ecounts h is final conversation with his mother. In the course of the conversation, the minds of the two joined in a sort of Platonic ascent from the material to the spiritual worlds until they contemplated the realm of Heaven itself. Monica finally confessed to Augustine that, since his conversion to Catholic Christianity, she felt that her mission in this world h ad b een ac complished a nd she e agerly looked forward to the next. She instructed him to bury her body anywhere and to remember her at the Lord's altar, wherever Augustine might be. She died five days later at the age of 56. Augustine buried her at Ostia, where a fragment of an inscription from her tomb was discovered within the past century. Monica is a saint of the Roman Catholic Church. Some of he r bones were eventually m oved t o a n A ugustinian m onastery i n France; ot her r elics r epose i n a s arcophagus i n the Church of San Augostino in Rome.

 \overline{A} e rest of Book 9 is an encomium to Monica, to her l ife, and to t he meaning t hat her l ife and that of her husband, Patricius, c ame to have for Augustine a sh is u nderstanding of h is f aith matured.

Book 10

Having dw elt at leng th u pon t he h istory of h is sins and mistakes during the first 39 years of his life, Augustine turns h is attention in Book 10 to exploring the sort of person he has become in the hope that interested readers may find something in the story of h is internal life that will encourage them in their search for spiritual health.

First, Augustine conducts a 19-chapter inquiry into t he n ature o f m emory a nd it s w onderful capacities. He next considers the role of memory in living " the h appy lif e." On t he q uestion of t he happy l ife, A ugustine i s n ot su re t hat e veryone wishes to be happy, for the truly happy life is to be found only in God. At last, however, he makes clear that, somehow, God now dwells in and throughout Augustine's life and has always dwelled in Augustine's memory.

 \overline{A} e 27th chapter of book 10 bursts forth as a paean of joy and gratitude that the G od whom Augustine s ought s ol ong el sewhere had b een within him always.

Augustine's i mpassioned s tatement o f h is faith occupies the next two chapters of the 10th book. Å en, with chapter 30, Augustine turns his attention to G od's expectations for h im. Å ese include t he s aint's c ontinued r ejection of " the concupiscence of the flesh," a si ncere e ffort t o heal t he sp iritual diseases within him, eating a modest diet just sufficient to sustain life, and the rejection of all things that might present temptations. He considers these from the point of view of each of the senses to which temptations appeal. He is convinced that his own speech is a s ource of temptation since, unless he is careful, he may stray f rom G od's t ruth a nd a llow i ntellectual pride to creep in. Augustine concludes that overcoming such temptations requires the mediation of Christ.

Book 11

In Book 11, Augustine first assures God that the writer of the Confessions is well aware that God foreknows e verything A ugustine w ill sa y. I ti s Augustine who benefits from his book's extended meditation, for all that he says increases his love of his creator. A e balance of the book contains an extended consideration of creation and of the nature of time. Among the conclusions Augustine reaches, we find that God simply brought heaven and earth into being from nothing with a creative word-though t hat word is not of t he n ature of human s peech. A ere was not ime before that creative word since time, too, is God's ar tifact. Augustine struggles manfully to understand the nature of time, wondering if human perception of time's passage is a function of the mind's operation r ather than an e xternal d atum. F inally, however, A ugustine m ust r est content with t he mysteries that time and eternity pose, and he prays that he may rise above time to be with God in eternity.

Book 12

Opening Bo ok 1 2, A ugustine obs erves t hat t he "poverty of human u nderstanding" o ften finds expression i n " rich t alk," s ince " inquiry t alks more than discovery." Ā en he considers the biblical story of creation in the context of a tripartite discrimination that he borrows from the Sept uagint Ol d Test a ment. He discriminates a mong earth, the observable heavens, and the extratemporal H eaven o f God. He notes that he has believed G od's boo ks, b ut h e finds t heir w ords "exceedingly mysterious."

As he considers those mysteries, Augustine's rhetorical posture shifts from that of the penitent in the confessional to that of the Christian controversialist. H e i magines contradictors,

puts arguments—not a lways s eemingly apposite—in their mouths, and with seemingly sophistic and in creasingly m eta phorical arguments, sustained principally by h is faith, calls on God to judge between his point of view and that of his hypothetical objectors. At the end of Book 12, Augustine seems well a ware that h is hypothetical a rguments re ally h ave f ailed to clarify the issues he has addressed. As a transition t o t he n ext section, he prays that, f rom among th e p ossible points of view he has attempted to e xplicate, he m ay be d ivinely inspired to select the right one.

Book 13

In Book 13, then, A ugustine turns a way from controversy and back to p rayer. He conducts a partly m ystical, partly a llegorical, a nd pa rtly analytical discussion of the account of creation as it appears in the book of Genesis. A at discussion e mploys t he m ethodology o f p at r ist ic ex egesis in an effort to clarify the multiple layers of meaning that the initiated can tease from Scripture. A is final book of Augustine's Confessions lays bare the saint's faith in the mysteries implicit in the Scriptures. He views the words of Genesis not as he did as an uninitiated admirer of Cicero in the lecture halls of Carthage, but as a fully mature devotee of his faith as versed as was his mentor, Saint A mbrose, in the explication of S cripture for t he b enefit of t hose w ho believe. As Augustine says in the 34th chapter, he has looked at the biblical text concerning the creation of the world with "a view to its figurative meaning."

With c hapters 3 5–38, A ugustine r eaches t he seventh day—the Sabbath—in h is d iscussion o f the s even d ays o f t he Cr eation. H e o pens t his final s ection w ith a p rayer f or G od's p eace. H e explains that, figuratively speaking, t he s eventh day is the paradigm for eternity and has no end. Neither man nor angel, Augustine concludes, can finally g ive o r r eceive t he ac tual u nderstanding of t he my steries o f S cripture. On ly t he Cr eator can open the door to divine wisdom.

Confucius (K'ung Fu-tzu, Kongfuzi, Master Kong [K'ung]) (551–479 B.C.E.)

 \overline{A} e son of a poor but aristocratic family dwelling in the ancient Chinese state of Lu (now part of S handong [Shantung] province), C onfucius early i mpressed h is c ontemporaries w ith h is precocious learning and wisdom. A teacher who prepared you ng C hinese m en f or g overnment service, he came to advise the rulers of his native state.

A master of ritual, music, and statecraft, Confucius rose through a succession of increasingly responsible p ositions i n state g overnment a nd also founded a s chool t hat a ccepted prom ising children even if they could not pay tuition. Civil strife i n L u prompted Confucius to seek more peaceable circumstances in the state of Qi (Chi) (517 b.c.e.). Ā ere he sometimes taught and sometimes consulted with the local grandee. Lack of regular e mployment, h owever, c onstrained h im to wander with his disciples in search of p atronage for a p eriod of 14 years. He traveled to the states of Wei, Chen, Cai, Chu, and Song. Confucius h ad h oped t o find a noble man s omewhere who would be willing to implement Confucian theories of s tatecraft, but i n t hat hop e he w as disappointed.

Finally, in 484 b.c.e, Confucius was recalled to Lu. Å ere to o, ho wever, h is ho pes to find a government willing to follow h is precepts were disappointed. He spent the rest of h is life teaching and perhaps editing older writings, though it is not altogether clear whether or not he himself wrote down his own teachings. After his death, certainly, his students collected his precepts and reminiscences about his actions in what became known as the *Analects* of Confucius.

Confucius's personal life during his last few years was tragic. Both his wife and his only child, a son named Li, predeceased him, in 485 and 483 b.c.e., respectively, as did two of his closest disciples, Yan Hui and Zi-lu. Li's son Zi-si, however, survived h is f ather, a nd t hrough h im u ntil a t least the year 1997, the direct line of Confucius survived t hrough 7 7 g enerations. I t ma y s till survive.

Consolation of Philosophy, The Anicius

Manlius Severinus Boethius (ca. 525 C.E.) Written in prison in the city of Pavia, Italy, while its author, Boet hius, was under sentence of death and awaiting the outcome of an appeal pending before the Roman senate, \overline{A} e Consolation of Philosophy is a r emarkable do cument f rom e very point of view. It is not least remarkable si nce it was in all likelihood written without recourse to any book o ther t han that of B oethius's o wn memory.

As the l iterary h istorian a nd t ranslator V. E. Watts tells us, the work belonged to an ancient literary subspecies, the *consolatio*. \tilde{A} is was a quasimedical treatise whose authors sought to produce a sort of literary cure for the psychological or spiritual m alaise from which t hey were s uffering. A t the same time, the book belongs to the kind of dialogue practiced by Pl at o a nd to t he s acred d ialogue in which a h uman being discusses an issue with a spirit in order to gain new insight. \tilde{A} *e Consolation of Philosophy* also displays certain characteristics of Menippean sa tir *e*—particularly in its alternation of verse and prose passages and those passages i n wh ich B oethius d escribes him self ironically.

Much critical discussion has been devoted to the question of why, in the extremity of his condemnation, Boethius-who was almost certainly a professing Christian, whose family had been Christian for 200 years before him, and who, as St. Severinus, has been canonized by the Roman Catholic Church-appeals to philosophy rather than to faith for comfort. As a modest addition to t hat d iscussion, I su ggest t hat B oethius had been a lifelong student of philosophy, not of theology. It strikes me a s a ltogether probable that, faced with his own rapidly approaching mortality, he found a g reater probability of comfort in proceeding f rom w hat he *knew* seasoned w ith what he *believed* rather than vice versa. He may also have found more solace in the ancient philoso phers' careful thinking on great issues than in the p etty qu arrels o f fifth- a nd sixth-century theologians about such hair-splitting and finally

unknowable i ssues a s t he esse ntial n ature o f Christ's substance—the i ssue o ver w hich t housands, possibly including Boethius himself, died at t he h ands of t heir fellow Christians. Finally, the pragmatic if slender possibility of a senatorial exoneration still lingered while Boethius worked on h is t reatise. A ny ho pe of a p ossible r eprieve might very well have foundered on the too-direct expression of a Christian sentiment that could be construed as critical of King Ā eoderic's A rian convictions.

Book 1

Book 1 of \overline{A} e Consolation of P hilosophy begins with a poem in which Boethius bewails his treatment at the hands of fickle F ortune, who early lifted h im high a nd t hen, i n a n instant, t ook everything away from him. As he is ruminating on that issue, an awe-inspiring woman appears to him in his prison. Her size varies from that of a normal human being to that of a goddess whose head sometimes reaches the heavens.

Finding Boethius in the company of the Muses who have been inspiring his poems, Lady Philosophy a ngrily asks w hy "t hese h ysterical sl uts" have been a llowed n ear Boet hius's bed side. S he drives them away and recites her own poem about the unhealthy condition of B oethius's mind a nd spirit. She then wipes his eyes, and his grief at his situation instantly evaporates.

Nonetheless, B oethius blames L ady P hilosophy for h is c urrent situation. He to ok s eriously, he s ays, t he r esponsibility o f p hilosophers to become the governors of men, a s Plato r equired in \overline{A} e Republic. Boethius proclaims his honesty in r estraining t he greed of h is fe llow civil se rvants. \overline{A} eir thirst for vengeance has landed him in t his j ail where he awaits his e xecution. H e rehearses t he h istory of h is imprisonment, p roclaiming his innocence all the while.

A fifth poem follows this discussion. \overline{A} e verse takes the form of a que stioning prayer. Why is it that God orders the heavens and the earth in predictable c ycles, it a sks, b ut le aves g overning the affairs of people to unpredictable Fortune?

Lady P hilosophy t ells Boethius t hat i n h is present d iseased state of m ind, he has lo st t he capacity to be calmly rational but is undergoing all s orts o f c onflicting e motions f rom one moment to t he next. P hilosophy prom ises relief through h er ad ministration of g entle r emedies. She reminds h im that the world is subject to t he governance of d ivine reason a nd not h appenstance. In the final poem of Book 1, Lady Philosophy u rges B oethius t o r id h imself of jo y, fear, hope, and grief, so that he may clear h is mind.

Book 2

As book 2 opens, L ady Philosophy explains to Boethius that Fortune is responsible for having lulled Boethius into regarding her as his friend. When F ortune s uddenly t hen t urned a gainst him, his mind became unsettled. Now, however, he must look s quarely at For tune and un derstand t hat she has f ully d isplayed her n ormal behavior, wh ich is to be constantly changing. Since t hat i s t he c ase, n either her d isappointments nor her f avors should hold any terror or happiness for B oethius. Sp eaking i n F ortune's voice, L ady P hilosophy re views with B oethius the role that she has played in his life since birth. Everything he had really belonged to Fortune, so he has no cause to complain when she takes it all away.

Asked to reply, Bo ethius confesses that while Lady Philosophy speaks, he feels better. As soon as she stops, however, he falls again into a deep melancholy. L ady P hilosophy reviews the extraordinary favors that Fortune has bestowed on Boethius throughout h is life. H ad she s till remained with him, his d eath w ould e ventually have en ded h is relationship with Fortune.

Now L ady Ph ilosophy summarizes the blessings t hat B oethius s till e njoys: t he he alth a nd well-being of h is father- in- kw Symmachus, the devotion of h is wife, and the good characters of his s ons. L ady P hilosophy tel ls B oethius to d ry his tears, for he is still a happy and fortunate man. Besides, she reminds Boethius, misery and happiness are all relative, not absolutes. Beyond that, she continues, true happiness is to be found within, n ot in t he external gifts of F ortune. Happ iness, she explains, "is the highest good of rational nature," and it c annot be taken away. Moreover, she reminds Boethius, he believes in the immortality of the human mind.

Lady Philosophy next rehearses a litany of the many things that B oethius m ight c ount a mong his blessings—not only such things as wealth and possessions, but a lso b eautiful views and en joyments. P hilosophy a ssures h im t hat e ven had Boethius not owned such things, they would still have ple ased h im, a nd i t w as b ecause t hey d id that he wished to possess them. She p raises the gifts of God and nature that cannot be taken away, and she blames lusting after wealth and mastery things that can pass in an instant.

She next considers high office and power. She suggests that these rarely find themselves in the possession of h onest a nd v irtuous persons, b ut when they do, the honor associated with holding office arises from the v irtue of the holder, n ot from the office held. \bar{A} us, when u nworthy persons occupy high office, the office does not make them worthier, it merely makes evident their failings and incapacities. A poem about the failings of the mad Roman emperor Nero illustrates Lady Philosophy's point.

She n ext tries to p ut h uman a ffairs in their proper perspective by comparing the size of the spherical E arth wi th th e h eavenly s phere an d then noting that the habitable part of the earth is smaller still, so that the affairs of men are hardly considerable wh en compared w ith a u niversal scale. E ven the fame of the Roman E mpire has not yet penetrated the Caucasus Mountains. She then applies a similar comparison to time, making the point that any period of time is inconsiderable when compared with eternity. A n eternal mind, freed from its temporal, earthly prison will rejoice in its liberty.

Lady Philosophy ends Book 2 with the discussion of a paradox. Bad fortune is better for people than good fortune. Bad fortune instructs people in the fragility of happiness and teaches them to bear adv ersity, wh ereas good for tune m isleads people into foolish confidence and opens them to just t he s ort of s piritual m alaise t hat a fflicts Boethius. L ady P hilosophy then sings of a u niversal order bound together and r uled by divine love. True h uman happ iness would r esult if t he hearts of h uman beings were subject to the same rule of love.

Book 3

As Book 3 opens, Boet hius confesses that he is feeling b etter. L ady P hilosophy's r emedies h ave begun to take effect. He begs for m ore, and she promises to help him dispel the shadows of happiness that cloud his sight so that he may directly observe the pattern of true happiness. Her argument here p artially re casts t hat of Plato i n his famous a llegory of the cave in b ook 7 of \overline{A} e *Republic* and in his di alogue \overline{A} e *T* imaeus. In part, it su pplements t hat a rgument b y d rawing upon the religious aspects of the Neoplatonism of such t hinkers a s P l ot inus a nd P rocl us o f Byz ant ium.

In essence, Lady Philosophy leads Boethius to perceive that the earthly things that make people happy a re m erely t he shado ws of t ruly e ternal things th at h uman b eings d imly r ecall fr om a preexistent s tate. P hilosophy r eminds B oethius that in \overline{A} e Timaeus, Plato recommended prayer invoking divine aid even in small matters. Boethius agrees, and in a hymn Lady Philosophy invokes the Creator who is the divine archetype of—and whose m ind contains—the u niverse. T o t he sources listed ab ove, L ady Philosophy no w a dds language a nd r hetorical co nstructions r eminiscent of the *Gloria* from Christian liturgy and of the Gospel according to St. John. \overline{A} e prayer solicits the privilege of a direct vision of godhead.

Lady Philosophy leads Boethius to agree that goodness a nd h appiness are i dentical a nd a n essential a ttribute of G od a nd t hat g oodness i s the means by which G od r ules the u niverse. A s Book 3 e nds, h owever, she i ntroduces the problem of evil and raises the question of whether or not an omnipotent God whose nature is goodness can do evil. B oethius i s su re G od c annot, si nce

170 Consolation of Philosophy, The

evil is foreign to G od's nature. With that issue still hanging, Lady Philosophy sings a s ong that recounts the story of Or pheus's descent into Hell to recover his beloved wife Eurydice.

Book 4

Book 4 a ddresses t he proble m of e vil he ad-on. Despite G od's g oodness, e vil s till e xists i n t he world and often goes unpunished—or at least so it seems to Boethius. Lady Philosophy, however, denies the truth of his analysis. Goodness is what makes a p erson h uman. W hen p eople p ursue wickedness, th ey d ehumanize th emselves an d destroy their capacity for rising toward godhead, so that wicked behavior instantly involves its own punishment. Her next poem recalls the way that, in Homer's A e Odyssey, the witch-goddess Circe turns Odysseus's crewmen into animals-a passage often treated as an allegory of what happens when human beings allow their passions to overcome their reasons. A ough such lapses may not hurt the body, says Lady Philosophy, they "cruelly wound the mind."

When the wicked are punished for their wickedness, that punishment is good and relieves their suffering. L ady P hilosophy also a cknowledges punishments after death—some with "penal severity" and some with "purifying mercy." But the discussion of s uch matters i s n ot o n her c urrent agenda. In stead, she w ants to s eet he w icked brought t o ju stice i n t he s ame w ay t hat p ersons who are ill are brought to physicians. \overline{A} e object of correction being to cure rather than punish their wickedness, the w icked de serve s ympathy r ather than hatred.

Boethius r emains u nsatisfied o n one p oint. Given that G od seems sometimes to r eward the wicked and ignore the good and vice versa, how does one distinguish between Divine Providence and chance occurrences?

Lady Philosophy's r eply is o ne of t he to uchstones of thinking about the difference between an eternal and a temporal point of view. In God's mind, there is an eternal and immutable plan for everything. Ā ought of a s G od's e xtratemporal intention f or the u niverse, t his p lan is c alled Providence. Ā ought of as outcomes of events for individual objects and sentient creatures in time, the plan is Fate. Fate itself, since it occurs within time, is subject to Providence.

Book 5

As Bo ok 5 gets u nderway, B oethius a sks a bout chance and has Lady Philosophy resolve an issue that forever troubles the minds of faithful believers. How can a God who is all good and all powerful allow awful things, like the death that awaits Boethius, to happen to good people, one of whom Boethius knows himself to be?

With r espect to c hance, L ady P hilosophy denies that there is any such thing as a causeless event. At the same time, she defines *chance* as an unexpected event arising as a result of a c oincidence of u nrelated causes. She a lso defends the notion of freedom of the human will, which, if it chooses to follow the path established for it by Divine Providence, paradoxically achieves greater freedom. If, however, it pursues a lesser good its o wn w ill f or itself—it pa radoxically lo ses freedom.

Boethius t hen turns t o a v exing p erplexity. How can one reconcile the freedom of the human will an d G od's u niversal f oreknowledge? Ā e answer, a gain, h as t o dow ith the difference between the perceptions of the creature, living in time, and the Creator, extant in an extratemporal and changeless now. For the creature, existence has a beginning and an end, and the events of life proceed serially. For the Creator, existence is and simultaneously w as a nd w ill a lways b e. A us, events pass before the mind of the creature as film passes through a camera, one frame at a time, so to speak. For the Creator, instead, all events are always there, and because of the Creator's goodness, a ll app arent e vil and in justice a re a lways and continually reconciled into the good and justice of a perfect creation. Ā e c oncept of foreknowledge, therefore, is a function of the creature's perception of the passage of time. A e Creator's knowledge is at the same time perfect, timeless, and immediate. Evil, finally, is nothing—a shadow, an appearance.

Ā us, Lady Philosophy has consoled Boethius. However horrible the end that awaits him at Pavia among his torturers and executioners, in the mind of the Creator, Boethius's apparently undeserved punishment is part of a perfect fabric that always has made, is now making, and always will make its contribution to the goodness of God's perfect plan for God's creation.

conventions of Greek drama

Unlike t oday's theater, Gr eek d rama w as p erformed as part of a noncommercial, public, religious c elebration. I n A thens, state-sponsored dramatic per for mances appeared twice annually at festivals in connection with the worship of the god D ionysus, the god of w ine and the harvest. Å e first, t he f estival of L ena ea, occurred i n midwinter and in vited the g od's a nnual r esurrection to assure the regreening of the earth. Å e second, sometimes called the City Dionysia and sometimes the Gr eat D ionysia, roughly corresponded to C hristian E aster and c elebrated the return of spring in March and April.

In p reparation for t hese c eremonies, pl aywrights c ompeted by s ubmitting m anuscripts of works they hoped to perform. A randomly chosen Athenian official considered the submissions and chose from among them three examples of t r agedy and a sat yr pl ay by a single dramatist for performance on each day of the festival. Ā e dramatists whose works were so chosen for performance then competed a gainst one a nother for three prizes first, seco nd, a nd third—awarded b y g roup o f judges s elected by a c omplex pro cess d esigned to prevent the possibility of fraud or threat.

Ā e Athenian state hired three actors per set of plays to present the principal characters, and such prominent Athenian citizens as Pericles (ca. 490-429 b.c.e.) underwrote the training and expenses of the choruses, which numbered from as few as 12 to as many as 500. (See chorus in Greek theat er.) A ese c horuses, o ften ac companied b y instruments, s ang, d anced, i nteracted w ith t he actors, and recited on-stage commentaries on the action, providing the points of view of ordinary people on the action, or filling in background that an audience might need to u nderstand the play. Sometimes the chorus might present a particular po Iti al or religious point of view. Above all, perhaps, the chorus helped e stablish a nd track the play's mood and its sometimes-subtle variations.

Occasionally too, t he c horus's p oint o f v iew influences b oth that of the principal characters and the action of the play. A choral innovation practiced by a pl aywright na med Agathon-a younger c ontemporary o f Euripides-met w ith the disapproval of A ristot 1 e. Ag athon a pparently u sed t he c horus i n a n a ttempt to ac hieve variety by introducing material that had nothing to do with the action of the play. Aristotle found that such a practice d estroyed t he effect of the play. A e literary historian Philip Whaley Harsh suggests another important function of the chorus. B ecause of the numbers of p eople a nd t he training involved, preparing the chorus also prepared a pa ssionately interested and k nowledgeable a udience t hat w as s ensitive to t heatrical subtleties.

Despite the religious purpose of the festivals, the plays' material was by n o means limited to pious subjects. Some plays, such as So phocles' *Oedipus Tyrannus* or E uripides' \overline{A} e *Trojan Women*, drew their sources from ancient legend and history. Less frequently, recent or nearly contemporary h istory p rovided the subject, a sin Aeschylus's \overline{A} e *Persians*. A gain u nlike later commercial drama, the plays—even the winners of the first prize—did not enjoy long runs on the Athenian stage. Although many of them were later staged repeatedly in the provinces throughout the Mediterranean s phere of G recian i nfluence, at

172 Cosmas Indicopleustes

Athens they were performed once and once only for the festival competition.

 \overline{A} ough both legendary and historical material was considered to be factual, Greek dramatists exercised considerable license in their presen tation of subjects so that the motivation of character and the selection or invention of supporting incident m ight v ary w idely w ithin t he g eneral outlines of a story, and such t reatments s ometimes responded to or commented on contemporary political circumstances. Such was the c ase for b oth t ragedy and c omedy. A r isto phanes' *Lysist r at a*, for i nstance, m ocked t he p redilection of Athenian men for making war and neglecting their women.

Per for mance conventions in the Greek theater included the wearing of masks by the actors, who typically presented more than one role. \overline{A} e masks were l arge a nd pa inted to r epresent the g eneral character of the person being portrayed. By around 300 b .c.e., a k nowledgeable aud ience me mber might recognize as many as 28 separate masks. It is possible, as well, that the masks were designed to serve a s m egaphones, m aking the v oices of th e actors more audible to persons at considerable distances from the stage.

Beyond these conventions, and certain others that I discuss in connection with Aristotle's Poetics, Greek d rama was i nvariably p erformed i n verse, much of which was sung or chanted. Greek and Latin meters a re defined by a rbitrary rules of syllable length. Unlike En gish prosody, which is determined by accent-the degree of emphasis given to a syllable—Greek and Latin prosody is said to bequantitative. (See quantitative verse.) Ā e basic structure of the verse line was iambic a short syllable followed by a long one. In drama, two iambs were said to constitute a metric foot. Å ree such double iambic feet made up the base mea sure of the Greek d ramatic l ine, t hough o f course considerable variation was possible, desirable, and frequent. In the hands of skillful dramatists, the character of the verse reinforced the emotional effects of the text and action. Regrettably, the effect cannot be accurately approximated in English. Suffice it to say that the general effect

of this line, though decidedly poetic, is nonetheless conversational.

Another convention of Greek theater that has been the subject of much good-natured theatrical spoofing i n suc ceeding c enturies em ployed a piece of stage machinery to su spend a cha racter representing a god above the stage—the famous deus e x mach ina, o r g od from a m achine. A e time-honored spoof p resupposes t hat a pl aywright, l ike E uripides i n his Orestes, has s o complicated the play's situations that no human agency can unravel those situations and bring the play to a close. Divine intervention thus becomes necessary. W hile t his circumstance d id so metimes o ccur, more u sually G reek p laywrights employed a god's descent from Olympus in more sophisticated ways. A god m ight, f or i nstance, predict the future or lend his or her dignity to a statement of the significance of the action. Finally, a g od's app earance f rom a bove ma kes f or a spectacular conclusion.

Crito Plato (399 B.C.E.)

In this dialogue by Pl at o, Soc r at es awakens in prison a few days before h is de ath s entence (see *Apology of Socrates*) is to be carried out, and is surprised to find his lifelong friend Crito sitting with him. Crito has come to persuade Socrates to allow his friends to hire bodyguards to spirit him away f rom p rison a nd from A thens. A c ertain ship will be arriving from Delos in a day or two, and Socrates is condemned to die on the day after that ship arrives.

Socrates reports a dream of a woman in white. Quoting H omer, the w oman adv ises S ocrates that he will "come to fertile Phthia"—that is, he will die—on the third day.

Crito begins presenting his arguments. His own reputation is suffering b ecause p eople a re saying that he and his associates are unwilling to spend the m oney t hat w ould a ssure S ocrates' e scape. Moreover, Crito argues, Socrates is not doing the right t hing in b etraying himself w hen he c ould save himself, and he will be abandoning his family just when his children need him to supervise their educations. Crito urges that Socrates should allow his friends to arrange his escape that very evening. No delay is possible.

Socrates, however, has already thought through his c ircumstances and is p roof a gainst Cr ito's importunities. H e ar gues that w hat t he many have to s ay is of n o consequence and t hat w hat Crito and Socrates must decide is whether or not it is right for Socrates to escape. Crito concurs. Socrates then leads Crito to s ee that, even if the law has c ondemned t he p hilos opher in error, since he has a greed to a bide by the judgment of the law, it is still a wrong to evade the law's force.

Socrates ass umes t he j ustice o f t he l aws o f Athens, a nd p oints o ut t hat, i f t he n ow c ondemned man find the laws of Athens onerous, he has had 70 years to pull up stakes and look for a more congenial dwelling. Since he has not, indeed since he p refers death to e xile, he ha s supported the Athenian law and must perforce obey it. If he fails to do so, Socrates thinks, by his example he will make himself guilty of just what he has been charged with—corrupting the youth.

Having finished hi s a rguments, So crates invites Crito to speak if he has anything further to say in objection to w hat the philosopher has said. Crito can offer no argument. Socrates advises that they continue along the way that God has led them.

Ctesias of Cnidos (fl. ca 400 B.C.E.) *Greek historian*

Born in Asia Minor, the Greek physician Ctesias practiced for an extended period at the Persian court at Susa. He also undertook to write a history of Assyria and Persia and another of India, all in the Ionian dialect of Greek. \overline{A} ough fragments of his single- croll *Indica* and his 23-scroll *Persica* survive, we know his work principally from an abstract prepared in the late ninth century c .e. by t he pa triarch o f C onstantinople, Photius.

With respect to Persian and Assyrian history, Ctesias's a ccounts do not a lways ac cord w ith those of Herodotus and X enophon Of A thens, and critical opinion is divided on the comparative reliability of the historians. While Persica

In the Near East, city-states as a form of political entity emerged about 5,000 years ago. With that emergence came an accompanying need for keeping records and for using propaganda to achieve po lti al cohesion a nd bring the ruled i nto line with the rulers' agendas. As the American scholar Denise Schmandt-Besserat has discovered, before actual w riting s ystems de veloped, ob jects u sed for on e p urpose were s ometimes em ployed to communicate something else. A ough we are not sure w hat ob jects c arried w hat m essages, t he historian I. M. Diakonoff, whose discussion I abridge here, suggests t hat a b undle of a rrows might conceivably h ave b een u sed t o convey a declaration of war. Schmandt-Besserat also discovered three-dimensional objects enclosed in clay containers. A eir shapes seem to anticipate several of the pictorial signs used in Mesopotamia t hat d eveloped bet ween a bout 3 000 a nd 2400 b.c.e. into the cuneiform (wedge-shaped) writing s ystem that s peakers of t he S umerian language em ployed to m ark on s oft clay. A at clay t hen ha rdened a nd w as s ometimes i ntentionally or in advertently fired s o t hat re markably well-preserved representations of early Sumerian do cuments s urvived. A e c uneiform signs seem on the one hand to represent syllables and half syllables and on the other to e stablish conceptual categories within which the linguistic in formation i so rganized. Ā e Su merian tongue do es n ot s eem to ha ve a ny su rviving descendants.

Ā ree ve ry e arly a rchives c ontaining c lay tablets—two from the ancient city of Uruk (con-

temporary Warka) and a third from an area currently called Jemdet-Nasr-have been uncovered. ${\rm \ddot{A}}$ ese a rchives da te t o the p eriod 2900–2750 b.c.e-the so-called pr otoliterate p eriod. F rom these documents, we learn that both the speakers of Sumerian and the genetically related but linguistically separate speakers of a nother to ngue, Akk ad ian, b oth ca lled t hemselves t he blackheaded people. A ey worshipped several local deities who all seem to have been subordinate to a chief god, Enlil-a deity whose worship was centered in the city of Nippur. A ere priests, whose leader was titled en, seemed to be in charge of civic as well as ritual affairs in a society whose worship and activity was directed toward maintaining the fertility of the l and a nd c ontrolling the society's food supply, crafts, and commerce. As yet, the emergent ability to write does not seem to have been applied to self-consciously literary production.

Å at distinction belongs to the second stage of the next period of Sumerian history, the socalled Ea rly D ynastic Period, ca. 2 750-2400 b.c.e. Before, that self-conscious literary activity emerged, however, a k ind of proto-history first appeared in the form of a Sumerian "king list," which purported to list all the rulers of the blackheaded people since the beginning of the world. Ā e list divides into two segments-those priests and warlords who ruled before the flood (probably not the same as Noah's flood, about which more later) and those who ruled after the flood. Ā e a ntediluvian p art o f th e l ist i s c ertainly mythical. Ā e postdiluvian part contains both rulers who were probably mythical and real ones verifiable from other sources. Moreover, the later king l ist e numerates b oth w arrior ki ngs a nd priest rulers and treat persons who ruled simultaneously over different parts of the country-Uruk, Ur, a nd Kish—as ha ving r uled s erially. Included in the list is a verifiable ruler of K ish named Aka.

Aka and his conqueror, Gilgamesh, the latter of whom the king list names as belonging to the first dynasty of Uruk, figure as characters in the first sef- consciously literary work that we know existed and that continues to exist, $\overline{A} \ e \ Gilg \ amesh$ *Epic*. $\overline{A} \ e \ version \ k \ nown to u \ s to day was c om$ posed in the A kkadian l anguage a bout 1,000years later, but the historical Sumerian Gilgameshwas deified shortly after his death, and his accomplishments became the subjects of many Sumerian songs as well of the Akkadian epic still widelytranslated into many languages and studied regularly. Both literature and history, then, can be saidto begin in Sumer.

Curtius, Quintus Rufus (fl. first century

C.E.) Roman historian

Until recently, various scholars argued that the biographer Quintus C urtius R ufus flourished under one or the other of several Roman emperors from the time of August us Caesar (d. 14 b.c.e.) to that of \overline{A} eodosius (d. 395 c. e.), but some consensus has recently emerged. As the historians B arbara M . L evick a nd Ro nald S yme explain, most now agree that Curtius is the same person as a proconsul of Africa, Curtius Rufus, who d ied i n office a nd who had first co me to power in Rome as praetor with the support of the emperor T iberius (42 b.c.e-37 c. e.). B oth Tacit us a nd P liny t he Y ounger m ention Curtius Rufus.

As an author, Curtius penned a ro manticized biography of Alexander the Great in 10 books. \overline{A} e first two of these and portions of others have perished. Without inventing detail, Curtius exaggerates f acts g leaned f rom earlier h istorians t o invigorate the narrative. He follows the method of m any of h is predecessors by a nalyzing events rather than tracing a si ngle t hread f rom b eginning to end. He also adopts the strategy of many ancient h istorians of put ting likely-sounding speeches in the mouths of his characters. As in the rest of his work, these speeches seem to stem from the work of previous writers, some of whom scholars h ave i dentified, t hough h e ra rely n ames h is sources. Curtius's admiration of Alexander is evident throughout.

Cyclops Euripides (ca. fifth century B.C.E.)

 \vec{A} e on ly whole s urviving e xample of a s at yr pl ay—an often bawdy, farcical drama that accompanied three tragedies to complete an entry in the annual Athenian dramatic festivals—Euri pides' *Cyclops* draws its plot from Homer's \vec{A} e Odyssey. T o de pict H omer's s tory o f O dysseus's encounter with the one-eyed giant goatherd Polyphemus, Euripides simplifies the plot somewhat. He also makes tactical changes in the landscape that will adjust Homer's story to the realities of staging the tale in Athens—notably by not having Polyphemus's c ave s ealed with a stone a nd b y providing it with a second entrance.

Beyond that, as we learn from the editor and translator of *Cyclops*, Da vid K ovacs, t he pl aywright assimilates Polyphemus's contempt for the gods to the views espoused by Sophists s such as Callicles in Plato's *Gorgias* (see G orgias of Leontium). In E uripides' ve rsion of the s tory, Polyphemus has no respect for any god.

Finally, Euripides supplies a full chorus of the half-human, half-goat satyrs, absent from Homer's version, which fit the play to the genre that it represents. Si lenus, a satyr who opens the play with a prayer to the g od D ionysius, le ads t he members of the ch or us. In this prayer, we learn that a shipload of s atyrs, while a ttempting t o rescue the young Dionysus from Tuscan pirates,

176 Cynicism

wrecked near Mt. Etna on Sicily. We also learn that P olyphemus h as p ressed t he s atyrs i nto slavery as house servants and shepherds.

As the younger satyrs drive the sheep home, their father Silenus sees that a Greek ship has beached and that their crew, led by Odysseus, is coming in search of food and water. Silenus tells Odysseus that P olyphemus is a cannibal, and Odysseus barters for food. Silenus has meat and cheese and asks for gold. Odysseus, however, has only wine—a superior trade good, in the opinion of the satyrs.

Seeing the Cyclops coming and no way for the Greeks to e scape, Si lenus tel ls t hem to h ide i n Polyphemus's cave. \overline{A} ey do so, but Silenus at once betrays t hem t o P olyphemus, w ho i mmediately begins preparations to eat them. Re appearing on stage, Odysseus objects to Polyphemus that Silenus is lying by saying the Greeks were trying to steal Polyphemus's property, and he appeals to the laws of hospitality. \overline{A} e traveler is under Zeus's special protection, and those who receive strangers inhospitably are subject to divine punishment.

Polyphemus m akes c lear t hat he sha res t he views of the Sophists when they say that laws are made by t he weak to r estrain t he s trong. A s Polyphemus i s o ne o f t he l atter, he t akes n o account of the laws of men or of gods. He drives Odysseus and his men into the cave again. After an interval, Odysseus emerges to report the carnage he ha s w itnessed w ithin a s P olyphemus killed and ate h is t wo fattest c rewmen. Odysseus tries to enlist some satyrs to assist in the attack on Polyphemus, but the satyrs are too cowardly to participate—a congenital characteristic of satyrs. Odysseus and his men, therefore, do the deed alone. \overline{A} e chorus cheers them on, and Polyphemus, bloody and blinded, emerges from the cave. Cynicism

Now more of an attitude and a way of life than a formal ph ilosophy, C ynicism a s a s chool of thought looks particularly to Di ogenes of Sinope (ca. 4 10–ca. 3 20 b.c.e.) a s it s fo und **e**. Diogenes preached and practiced a life of severe asceticism. His chief principle was to live a natural life. He is remembered for dwelling in a tub and for carrying around a lantern during daylight hours trying to find an honest man. *Cynos* is the Greek word for dog, a nd, a s Diogenes was thought to live like a canine, the word *cynic* was applied to him and to those who subscribed to h is principles over time. \overline{A} e historian Diogenes Laertius attributes the honor of founding both Cynicism and Stoicism to Diogenes of Sinope's teacher, Antisthenes.

Not on ly d id C ynics r eject a c omfortable style o f l ife a nd l uxuries, t hey a lso r ejected observing social conventions—particularly those that i nvolved distinctions in r ank. Ā us, t he story is famously told of a visit to Diogenes from the M acedonian ruler an d w orld c onqueror, Alexander th e Gr eat. W hen A lexander a sked Diogenes if there were anything the king could do for the Cynic, Diogenes replied that Alexander could move a little so that his shadow would not block Diogenes' sunlight. Ā e classicist John L. M oles su ggests t hat D iogenes' v iewpoint rejected all conventional b ehavior but s tressed individual freedom, happiness, self-sufficiency, and living in harmony with nature.

Cynicism r emained influential t hroughout ancient tim es, th ough i ts p ractitioners d id n ot always go to Diogenes' extremes. \overline{A} e movement waned in the two centuries before the Common Era, but it revived soon afterward and attracted a large following. Some have claimed that Jesus of Nazareth s ubscribed t o the C ynics' p rogram, though that view may have originated in mixing up Christian and non-Christian a scetics. Nonetheless, the principles of pre- Christian cynicism proved pr ofoundly influential i n e arly Christian ascetic a nd m onastic move ments a nd s eem to have i nfluenced St . Pa ul's t hinking a bout t he behavior of C hristians t oward e ach other and toward non- Christians.

 \overline{A} e Cynical viewpoint also deeply influenced ancient literature. Diogenes himself composed a lost work , *Politeia* (Republic) t hat D iogenes Laertius summarized. \overline{A} e philosophical position of Stoicism derived the ethical part of its structure from Cynical thinking, arriving at the position that only virtue is good and that virtue is all one requires for happiness.

Ā e attitudes of the Cynics did not only appear in philosophical tracts. We find elements of their program in Pl at o's Socratic dialogues and Xenophon o f A thens's *Memorabilia*. F or e xample, Socrates' famed physical hardihood and his rejection of the opportunity to avoid execution b oth recall the Cynic program.

Menippean s at ir e was a kind of verse satire in Greek written by the early Cynic philosopher Menippus of Gadara (fl. t hird c entury b.c.e.). \overline{A} ough only the titles of a few examples survive, the an cients g enerally th ought th at M enippus's work exercised influence on that of the Romans Hor ace, S eneca, and Varro. Roman c omedy, too, benefited from the expression of Cynical attitudes in the plays of Pl aut us and Ter ence.

We find further evidence of the Cynics' disenchantment with conventional norms in the writings of Lucian of Samosata and Plutarch, and in \overline{A} e Golden Ass by Apuleius.

Cyropædia Xenophon of Athens (after 394 B.C.E.)

A mixed-genre, largely imaginary story about the education and c areer of Cyrus the Gr eat (ruled 559–529 b.c.e.), the s on of King Cambyses I of Persia, X enophon of Athens's *Cyropædia* (Å e Lessons of Cyrus—both those h e l earned and those taught) displays elements of history, philosophy, bio graphy, l ove s tories, and other l iterary types a s w ell. Ab ove a ll, it c ombines historical romance with educational fiction.

178 Cyropædia

Ā ough, for example, Cyropædia purports to picture P ersian i nstitutions a nd c haracters, i n drawing an i dealized c onstitutional m onarchy, Xenophon h as i n f act c hosen to t ransplant t he government, the e ducational p ractices, a nd t he military management and tactics of Sparta into Asia. He has also introduced certain Greek characters under thin Persian disguises. Xen ophon's revered t eacher, t he ph ilos opher Socr at es, for example, app ears l ightly v eiled a s t he P ersian, Tigranes. Also transplanted into an Asian setting are the Greek i deals of the equality of citizens' rights before the law and respect for freedom of speech. Xen ophon u ndertakes to p icture w hat has n ever e xisted i n f act: a n " ideal m onarchy" ruled by "an ideal monarch" and governed according to "Socratic principles."

Cyropædia also contains, much important factual matter, however. Contemporary scholars are grateful f or X enophon's u nique a nd a ccurate descriptions of the A rmenians and Chaldeans people X enophon h ad come to k now well when, as a y outh, h e s uccessfully l ed 1 0,000 S partan mercenaries home a fter s erving i n a d isastrous Persian military adventure.

Book 1

In his first chapter, after asserting that it is easier to rule any animals than it is to rule people, Xenophon enumerates the peoples of Asia who became Cyrus's subjects, either through voluntary assent or through conquest. A fter Xen ophon e xplains why h e has c hosen C yrus as a sub ject, he n ext discusses t he e ducational a rrangements a nd orderly life of you ng male a ristocrats. \bar{A} ey live communally for 10 years, learning the skills necessary to the successful conduct of warfare. \bar{A} en they g raduate i nto th e ranks of t he m ilitary, where t hey se rve a s r equired u ntil t hey are 55 years of age. \bar{A} ereafter, they become the elders who administer society and who settle questions of law and punishment.

In the s econd and third chapters, Xenophon turns his attention to the affectionate and precocious child Cyrus, who, with his mother Mandane, is living at the court of his maternal grandfather, Astyages, the king of the Medes. Mandane warns her son that the lessons he may learn at court will smack of tyranny rather than kingship.

Ā e apple o f h is g randfather's e ye, C yrus gains e arly e xperience i n h unting a nd r iding, displays a willingness to be treated as a full equal of his playfellows, and gives early evidence of his leadership qu alities a nd b ravery i n a su rprise cavalry skirmish with enemy Assyrian troops. Upon Cyrus's completion of his 10 years among the boys, and a fter he piously consults the oracles of the gods, he immediately assumes command of an army of 31,000 men. Of these, the first 200 are noblemen whom Cyrus has handpicked for their virtue and military proficiency. Ā en C yrus a nd h is f ather, K ing C ambyses I, discuss t he i mportance a nd e fficacy o f p rayer and the tendency of the gods to favor people who are both industrious and careful.

Cyrus and Cambyses then consider issues concerned with military leadership. Foremost among them, they address providing for the he alth and well-being of the soldiers and assuring their adequate provisioning and armament. An important part of good military leadership, says Cambyses, requires first t hat the leader a void r aising f alse hopes, and next that he avoid saying things about which he is not perfectly certain. A e discussions of the father and the son range widely over the differences in the ways one behaves toward friends and toward enemies. Friends deserve respect and orderly behavior, whereas a good commander regularly seeks opportunities to o utwit and deceive the enemy. Cambyses analyzes the ways in which the lessons that Cyrus learned as a boy hunter can be a pplied i n wa rfare. A bove a ll else, t he k ing counsels his son to continue consulting the will of the gods through the interpretation of omens.

Book 2

In the second book of *Cyropædia*, Cyrus leads his army of Persian peers and commoners to Media to a ssist the Medes in their struggle against an enormous a lliance of e nemies. Ā at a lliance includes the Lydians, the Phrygians, the Cappadocians, the Arabians, the Assyrians, and others. On learning that the combined forces of Persians and Medes will b e g reatly i nferior i n n umbers, Cyrus rules out the strategy of a war of attrition to b e f ought at long distance with slings and arrows. Rather—although no mention is made of Spartan tactics—Cyrus opts for arming the common soldiers in the manner of the Spartan Hoplites. Ea ch man w ill be eq uipped w ith b ody armor, a helmet, a small shield for the left arm, and a short sword or scimitar for fighting in close quarters w ith a l argely u narmored en emy w ho depends, in close encounters, upon the weight of its numbers to overcome its foes.

Cyrus then organizes his army with a chain of command. Every five men will be led by a corporal, every 10 a sergeant, and every 50 a lieutenant. Captains will each be in charge of 100, col o nls of 1,000, and generals of 10,000. Cyrus provides ladders of p romotion f or t hose w ho dem onstrate their competence and valor, as well as monetary prizes t o e ncourage t he v ictorious. H e t hen arranges t he o rder o f ba ttle a nd p rovides f or training, drill, and plentiful fo od. T of urther achieve cohesiveness, loyalty, and morale, Cyrus himself regularly invites representatives of every rank to dine with him in his tent. He recognizes, however, t hat every a rmy contains soldiers who are vicious and lazy. He is at pains to see such persons identified and weeded out from a mong h is soldiery.

Other topics addressed in this section involve the constituents of valor and the way that male children from a very early age seem to display an instinctual preference for playing with weapons. If a reader is acquainted with Xenophon's p ersonal h istory a s the y outhful le ader of 1 0,000 Greek m ercenaries, such a r eader will b e hardpressed not to see the vestiges of Xenophon's own generalship in Cyrus's arrangements.

 \overline{A} e second book ends with a description of the stratagem that Cyrus employed to force the king of Armenia t o s end his a ccustomed t ribute t o t he Medes. Covering his intention to invade the Armenians with a hunting party near their border, Cyrus

manages to ha ve a g roup of h is soldiers secretly infiltrate nearby wooded uplands during the night. \tilde{A} en, from just over the horizon, he calls up cavalry in support of his ostensible h unters and t raps the Armenian king between two jaws of the resultant pincer.

Book 3

Book 3 beg ins with a description of the A rmenian king's alarm when he discovers himself surrounded and with no option but to ob ey Cyrus's demand t hat he p resent h imself a t t he P ersian camp f or t rial. C yrus a cts as j udge, the k ing promises to tell the truth, and by h is testimony about h is practices i n si milar c ircumstances, he admits that he deserves a death sentence.

Before Cyrus pronounces that sentence, however, Tigranes, the crown prince of Armenia and the Socratic figure in Xenophon's fiction, intercedes on his father's behalf. He argues that Cyrus, having o utwitted h is f ather a t e very t urn, ha s taught the Armenian king discretion with respect to the Persian and that his fear of Cyrus has converted him from disloyalty to loyalty and friendship. He further argues that all of this makes the Armenians stronger and more trustworthy allies than they were previously.

Convinced by Tigranes' arguments and by the king's conciliatory offer to let Cyrus take as much of h is army and h is treasure as he w ishes, Cyrus reinstates the king into h is favor, taking half the army on h is campaign and leaving half to defend Armenia. Cyrus in sists that the king pay do uble tribute to make up for being in arrears, and asks that the king loan Cyrus 100 talents to c over the current expenses of h is army. A at concluded, all have dinner.

In a veiled allusion to the death of Socrates at the hands of the Athenians, Cyrus asks Tigranes about a man who used to h unt with them when they were boys together. Tigranes replies that his father had that noble and good man put to death, accusing h im o f c orrupting T igranes. T igranes reports that the man had excused the king for acting from ignorance, doing wrong against his will.

180 Cyropædia

Tigranes becomes the general of the Armenian force a llied with C yrus's a rmy, and C yrus c ommands his army to seize the Chaldean mountains that lie along the border of Armenia and build a fort. From it the Persians and the allies can keep an eye on their friends, the Armenians, and on the Chaldean foe.

Defeating the Chaldean defenders of the mountains in a brief skirmish, Cyrus treats his prisoners hospitably, s ending t hem ho me to d iscuss w ith their countrymen whether they would prefer to be the Persians' friends or foes. A ey accept the offer of friendship. A en C yrus n egotiates a mutualassistance p act b etween t he A rmenians a nd t he Chaldeans. A eformer get to r ent pa sturage for their flocks in the Chaldean highlands, and the latter a re a llowed to r ent l and f or f arming o n t he Armenian plain. He a ssures the peaceful observance of the pact by keeping control himself of the mountain for tress that c ommands th e p astures and the fields. A e A rmenians a nd C haldeans agree to a treaty of mutual defense and grant each other t he r ight o f i ntermarriage. F inally, Cy rus asks that the Chaldeans and the Armenians accompany h is a mbassador to t he k ing o f I ndia, fr om whom Cyrus hopes to secure a donation in support of his defense of Asia (today's Middle East). Many Armenians voluntarily present money to Cyrus in support of h is objectives, and C yrus s ends t he money with his significantly larger army to the Median k ing, Cyaxares-Cyrus's un cle a nd h is superior officer i n t his c ampaign. Fo llowing a break for s ome r ecreational hunting, C yrus d istributes a portion of the money to his captains for sharing a mong t hose of t heir m en t hey f ound deserving.

Now p erceiving t hat h is t roops a re r eady for battle, C yrus s ets t he a rguments for i mmediate action before Cyaxares, who agrees that the time is ripe for action.

Book 4

As Book 4 b egins, Cy rus's a rmy takes the field and encamps partly out of sight of the Assyrian host. Xen ophon de scribes the way in which the rival commanders encourage their troops. In the midst of a discussion of tactics, C yaxares s ends an order to a ttack. Cy rus, though he considers the time unripe, nonetheless obeys, charging the enemy with paeans and shouted encouragement. After a suc cessful first en counter with those of the e nemy who app eared o utside t he def ensive perimeter of t he A ssyrian breastworks, C yrus's troops retreat out of the range of such missiles as stones a nd arrows. Ā ere C yrus p raises a nd rewards t heir b ravery b efore s etting s entries, dining, and retiring for the night.

 \overline{A} e n ext d ay, C yrus p ersuades h is u ncle to allow h im to p ursue t he fleeing e nemy w ith a contingent composed entirely of volunteers. \overline{A} e Assyrians have left the cavalry of a subject people, t he H yrcanians, a s t he r ear g uard to c over their retreat. \overline{A} e Hyrcanians, however, are in the field with t heir en tire families, ac cording to t he custom of t he A sians. \overline{A} ey d ecide i t w ould b e prudent to s witch side s a nd jo in f orces w ith Cyrus. Cyrus accepts the offer.

Practically everyone among the Medes and the Persians v olunteer t o accompany Cyrus—some because t hey a dmire h im, and some in hope of gain. \overline{A} e host marches off in pursuit of the enemy, and Xenophon details a report of a heavenly light that shines through the night on Cyrus and h is army.

Cyrus gives his orders to his host, now enlarged by the Hyrcanians, and he c autions his men not to turn aside from the battle to plunder-a mistake that has resulted in many a defeat. He cautions e veryone to re turn b efore n ightfall. Frightened by the advance of Cyrus's host, all the enemy who can flee before it do so. A ose caught in the tents of the encampment prove to be mostly quartermasters, servants, and cooks. Cyrus, who had taken the field without provisions, is glad to gain control of a supply of food good for a month or more. He ord ers t he prisoners t o prepare a meal to feed whoever returns victorious from the fray, friend or foe. He again a dvises h is m en to avoid plundering, even though much in terms of money, objects, and slaves might be theirs for the taking.

Cyrus now becomes convinced of the advantage of cavalry—an advantage that, until now, the Persians h ave not e njoyed. Ā ey r ely on t he horsemen of subject peoples, but Cyrus considers this a defect in need of remedy. He proposes that his m en b ecome v irtual centaurs—half horse, half man—with t he adde d adv antage o f b eing able to s eparate t he h alves at w ill. He offers h is prisoners the opportunity to resume their accustomed l ives a nd dw ell a t p eace u nder t he P ersians' protection. Ā ey accept.

In t he m eantime, b ack a t t he c amp o f t he Medes, C yaxares, w ho had b een d rinking a nd carousing with his boon companions, discovers that the vast majority of his forces have volunteered to ac company Cy rus. In his anger, h e recalls both them and Cyrus and his men. When this message reaches Cyrus, he has no intention of humoring his uncle's foolish and wrathful petulance. I nstead, h e wr ites Cyaxares a l etter i n which h e pa tiently explains ho w all h is ac tions have been in his uncle's interests. A en the tone of the letter shifts as Cyrus makes clear that he has at his disposal the means to respond forcibly to any threats his uncle might consider. He closes by a ssuring C yaxares t hat he and h is m en w ill return as soon as they have completed the task they set o ut t o accomplish-one t hat b enefits Cyaxares as much as anyone.

With this pointed message, on the advice of Cyaxares' soldiers, Cy rus s ends h is u ncle s ome captured women as a g ift. Having do ne t his, he gives his allies among the Medes and the Hyrcanians first choice of the spoils of battle, and the Persians content themselves with what is left. He then frees those of the prisoners whom the Assyrians had forced into slavery, and assigns them as squires to his newly mounted cavalry officers.

 \overline{A} ere now arrives an Assyrian suppliant—an old man na med Gobryas. He explains that his friend, the Assyrian king, has fallen in the battle and been succeeded by his son. \overline{A} e new king is the murderer of the old man's son, and the old fellow's s worn e nemy. Gobryas b egs Cyrus t o accept him into his service so that he can hope to avenge his son's death. \overline{A} is story is touchingly tol d, with t he s entence s tructure r eflecting the old man's sobs as they interrupt his narrative. Cyrus accepts Gobryas's offer of assistance, and the fourth book ends with an account of the division of t he s poils. A mong t hem a re t he women captured in the camp. Ā e second loveliest is sent to Cyaxares. Ā e loveliest, however— Panthea, the wife of Abradatas of Susa—is kept for Cyrus.

Book 5

As Book 5 opens, however, Cyrus refuses to accept Panthea, or for that matter even to look at her. He explains that he is a fraid her beauty might keep him from his duties. Ā en he and his friend Araspas ha ve a d iscussion a bout w hether lo ve is a n irresistible p assion or a matter of w ill. A raspas argues the latter position, but Cyrus considers love an irrational form of bondage. A raspas, however, thinks he can "put his hand in the fire," and not be burned. He proves to be wrong in this.

In the meantime, Cyrus offers his Median volunteers t he o pportunity to r eturn to C yaxares. All of them opt to remain in the field with Cyrus. So do the Hyrcanians, and on the following morning, all set out for the castle of Gobryas. Arriving there, th ey find t hat G obryas is as good as his word, putting all his vast wealth and possessions at t heir d isposal a nd o ffering h is d aughter a s a bride for r Cyrus—an offer C yrus de clines f or himself but ac cepts for some worthy member of his retinue.

Gobryas l earns that, th ough h e o wns m ore than C yrus a ppears to, C yrus a nd h is P ersians are the better men in their valor and simplicity of life. At a council of war, Cyrus first explores with Gobryas t he p ossibility o f ga ining o ther a llies among those whom the current Assyrian king has injured. Finding that such persons do exist, Cyrus proposes m arching s traight to B abylon a nd attacking i t. Å ere t he g reatest n umber o f t he enemy w ill b e c oncentrated, a nd t here a d isciplined a ttacking f orce w ill ha ve t he g reatest opportunity to strike fear into the hearts of the defenders.

182 Cyropædia

In preparation, Cyrus sends Gobryas to recruit an ally, Gadatas, from among the Assyrian king's enemies. By trickery, Gadatas occupies an Assyrian bo rder fortress a nd turns it o ver to C yrus. Cyrus in turn presents the fortress to the Hyrcanians, whose a llies, the Sa cians and C adusians, in turn swell Cyrus's ranks.

 \overline{A} e A ssyrians, ho wever, d iscover G adatas's duplicity and mobilize an army to invade his territory. Cyrus postpones his plan to march straight to B abylon a nd i nstead ma rshals h is f orces to support G adatas. Xenophon ne xt d escribes i n detail C yrus's o rganization of a n ight ma rch a s the allies move to defend Gadatas's land from the Assyrians. In p assing, t he r eader learns of the pains that Cyrus takes to remember the names of anyone to whom he gives directions.

On e o f G adatas's c avalry officers, the commander of a fortress in Gadatas's territory, thinks he can win Gadatas's place and fortune by advising the Assyrian king where and how he might capture G adatas a nd o vercome t he small force a ccompanying h im i n adv ance o f C yrus's larger army. \overline{A} e Assyrian king takes possession of G adatas's for tress and pre pares a trap to capture him. As Gadatas flees the pursuing A ssyrians, he is on the point of being captured when he encounters Cyrus and the main body of his forces. Harried by pursuing Persians, several Assyrians fall, including the traitor.

Cyrus's Cadusian allies, marching in the rear, have missed the fight. Chagrined, they set forth on their own, without informing Cyrus, to pillage the countryside. \overline{A} ey encounter a superior force of A ssyrians, ho wever, w ho k ill many of t hem and c apture the spoils they were carry ing. \overline{A} e surviving C adusians fleet o Cy rus, w ho w elcomes them, attends to the wounded, and, blaming no one, turns the entire incident into a useful object lesson.

Cyrus t hen p roposes t o the A ssyrian king a treaty un der w hich t he s oldiers of b oth s ides agree to leave the farmers in peace to ten d their fields a nd to confine t heir w arfare to m en a t

Now accompanied by Gadatas, Cyrus marches his army not to Babylon but, rather, to a planning session with his uncle, Cyaxares. When, the two meet with their retinues, however, the grandeur of Cyrus's cavalry puts Cyaxares to shame. Cyrus u ndertakes t o p lacate h is u ncle b y c onvincing him that all Cyrus has done has been in Cyaxares' interest, reviewing everything he has done since he a ssumed command. A fter de tailing his activities, Cyrus draws from Cyaxares an admission t hat h is n ephew ha s do ne n othing blameworthy. N onetheless, t he u ncle c onfesses that it is Cyrus's very successes that cause him chagrin, for Cyrus is performing the offices that he himself had r ather do. Nonetheless, the two are reconciled and, to everyone's relief, exchange the customary kiss between relatives in full view of the army. A en, while Cyaxares goes to d ine and rest, Cyrus begins laying h is plans for h is next campaign.

Book 6

Ā e next day, Cyaxares also joins the planning and assumes t he c hair. A ll a gree t hat c ontinuing t he war is in the allies' best interests, and preparations include plans for building new fortresses and siege engines. C yrus r edesigns c hariots to t urn t hem into k illing m achines. H aving set t he p lans in motion, C yrus s eeks a spy. H is c hoice falls u pon Araspas t he man w ith w hom he had d iscussed whether or n ot l ove i s i rrational. By t his t ime, Araspas is ardently in love with Panthea, but she repulses his advances, for she is devoted to her husband. W hen A raspas t hreatens to f orce her, she complains to Cy rus, who reproves A raspas. $\bar{A}\;$ is becomes w idely known t hroughout t he c amp. Cyrus see s a n o pportunity to u se A raspas, w ho will pretend to flee his general's wrath and desert to the enemy.

Among those taken in by this ruse is Panthea herself. She g oes to C yrus a nd adv ises h im to send for h er h usband, A bradatas, w hose loyalty to t he c urrent A ssyrian k ing ha s b een u ndermined b y t he k ing's e ffort t o s eparate P anthea from her husband. Cyrus follows her advice, and Abradatas soon arrives at the head of 1,000 cavalrymen. A new d esign for A bradatas's c hariot suggests to Cyrus a plan for manned siege engines pulled by eight oxen yoked together.

At this juncture, ambassadors arrive from the Indian king, bringing a contribution of money to Cyrus's c ause. \overline{A} e I ndian k ing also p romises more, s hould C yrus n eed it. R eturning s pies report that, on the Assyrian side, King Croesus of Lydia h as b een app ointed field ma rshal f or t he Assyrians and th eir a llies. \overline{A} ese i nclude \overline{A} racians, Egyptians, Cyprians, Cilicians, Phrygians, Lycaonians, P aphlagonians, C appadocians, A rabians, P hoenicians, an d, un der d uress, G reek islanders from Ionia and Aeolia.

Faced with s uch a foe, C yrus's soldiers begin showing signs of panic, and Cyrus undertakes to calm them. \overline{A} e m en attribute their r estlessness not to fear but to the work that still lies ahead. In preparation for the long overland march that his army m ust un dertake, C yrus a dvises t hat o nly water should be drunk with dinner, no wine. \overline{A} en, though wi ne m ay be consumed a fter d inner, i t must be in ever diminishing amounts until everyone has become a te etotaler for the remainder of the campaign.

Preparations m ade, t he a rmy ma rches f orth along with its supply wagons, camp followers, and equipment. A fter several days of ma rching, they begin to see signs that the enemy is in the vicinity, and news comes that Croesus is in the field with his host. At this moment as well, the spy Araspas returns with information about the numbers of the enemy and the enemy's battle order, strategy, and t actics. B ased on t he e xtent of t he front— 24,000 feet—and the depth of the formation—30 men—the opp osing a rmy is est imated a t abo ut 360,000 men.

Facing t his a rmy, C yrus s tations h is he avily armed inf antry in t he vanguard, h is sp earmen behind them, his archers third, and veteran infantrymen in the rear so that the most doughty fighters a re s tationed f ront a nd r ear, a nd p rojectiles may b e t hrown a nd fired over t he he ads of t he front r ank. H e a lso de ploys t he c amp f ollowers and baggage trains in the rear to give the impression of g reater n umbers, and h e s tations troops mounted on horses and camels in the rear of the baggage trains. Abradatas claims the privilege of leading the charioteers, but the Persians grumble. \overline{A} ey cast lots for the honor, and Abradatas wins. Panthea brings h im a rmor for h is b ody a nd h is arms, a plumed hel met, a nd a t unic, a nd a s she arrays h im in t hem, she w eeps, c alling h im her "best jewel." \overline{A} reading this love story through his account of the war is one of the marks of Xenophon's talent as a writer of historical fiction.

Book 7

In Book 7, the opposing armies draw near one another. C roesus b egins a flanking m ovement, designed to box in the Persians on three sides. He has not, however, taken into account Abradatas's chariots with t heir a rmed a nd s lashing w heels. Neither i s C roesus a ware t hat a de tachment o f camels w ill be faci ng h is c avalry. Eventually, Cyrus's tactics overcome e ven the s uperbly disciplined Egyptian forces, who, even after they can no longer strike a blow, remain in defensive formation behind their shields. Cyrus gives them the opportunity to join him and take up residence in Persia as subjects and landholders. When the Egyptians discover they can do so with honor and that Cyrus will meet the condition that they not have to fight against Croesus, t o whom they h ad s worn a llegiance, the Egyptians accept his proposition.

 \overline{A} e remainder of Croesus's defeated army flee toward Sardis during the night, and the next day Cyrus leads his forces against the city. and plunder. Cyrus agrees, then asks Croesus to clarify his relationship with the god Apollo, who had p ronounced or acles d eemed f avorable to Croesus. Croesus admits that he has offended the god by putting his oracle to a test before reposing trust in Apollo, and that thereby he has incurred the god's en mity. A fter f urther pa rlay, Cr oesus becomes Cy rus's f riend, a nd t hereafter Cy rus takes hi s f ormer en emy w ith h im w herever he travels.

Missing Abradatas, Cyrus inquires about him. He i s i nformed o f h is d eath a nd tol d t hat h is funeral is even now underway. A touching interview b etween C yrus an d Pa nthea f ollows i n which sh e bl ames her self f or en couraging her husband to join Cyrus. As soon as he is g one, h owever, Panthea pl unges a k nife i nto her heart and expires on her husband's corpse.

Xenophon now recounts the wisdom of one of Cyrus's generals, Adusius, in settling a civil war among the Carians without bloodshed. Impressed by Adu sius's s tatesmanship, the Carians request that Cyrus appoint him as their satrap (regent or governor). A nother commander, Hystaspes, subdues a p ortion of Phrygia. Å en those A ssyrian allies who had r esisted Cyrus b egin falling like dominoes. Gr eater P hrygia, C appadocia, a nd Arabia submit to the force of his arms, and their warriors sw ell Cyrus's r anks a s h e marches toward Babylon. As us ual when discussing warfare, strategy, and tactics, Xen ophon deserts fiction and romance for h istory, and the following account is accurate.

Arriving a t B abylon, t he P ersians a nd t heir allies surround the city to survey the walls. \overline{A} e Babylonians conspire to attack the resultant thin line of troops as soon as Cyrus begins to withdraw beyond missile range. A deserter, however, brings C yrus ne ws of t his p lan. Cy rus h as h is men maneuver to provide continual cover against such an attack as they withdraw by stages beyond the range of enemy arrows and stones.

Babylon is a n e normous city—more than 60 miles in c ircumference. It is walled with brick

cemented w ith bitumen, and a h undred b rass gates p rovide ac cess. M oreover, t he v ery b road and deep Euphrates River flows through it. Convinced that the walls are impregnable, Cyrus sets about building watchtowers and earthworks. \overline{A} e Babylonians find his efforts entertaining, for they feel secure protected by their walls and their river. Out of their sight, however, Cyrus sets the majority of his men to digging an enormous trench that will enable him to divert the river's course. When the trench is ready, Cyrus waits until the Babylonians are celebrating a f estival at which most of the city's inhabitants carouse and become drunk.

On that night, Cyrus has h is men breach the restraining levee. \overline{A} e Eu phrates flows i nto the trench, and Cyrus's army enters the city along its bed. \overline{A} ose who recognize them as Persians fall to their swords. In the darkness, however, many of the revelers think the Persian troops to be their fellow citizens and call out greetings, which the Persians return as they make their way straight to the royal palace. \overline{A} ere they find the king of the Babylonians, B elshazzar, p reparing to def end himself with his dagger.

Cyrus l eaves k illing th e k ing to G obryas, whose son Belshazzar had killed, and to Gadatas, whom Belshazzar had castrated. After the palace falls, t he P ersian c avalry r ides a bout t he c ity warning the inhabitants to stay indoors, for anyone found outside will be cut down. Not until the next d ay do m any c itizens Bab ylon r ealize t hat their supposedly impregnable city has fallen.

Ever pious, Cyrus calls on the magi—the priests of Babylon—to select the first fruits of the booty for the gods. \overline{A} en he distributes houses and official quarters among those he thinks most deserving an d ma kes a rrangements f or t ribute a nd governance.

Having sub dued m uch o f A sia, C yrus n ow thinks that he is entitled to become its king. Yet even in this he manages matters in such a wa y that the suggestion seems to come from his loyal followers. So C yrus moves i nto the royal palace of Babylon and, having taken up residence there, sets about organizing his court. Realizing that he is likely to be the object of the citizens' hatred, he decides u pon a p ersonal b odyguard o f eu nuchs and those whose fidelity to him he can most confidently ensure with the promise of riches. For a household ga rrison, he s elects 1 0,000 P ersian spearmen, whose generous salaries are to be paid by the Babylonians, whom Cyrus intends to keep poor to make them more submissive and docile.

Calling his Persian peerage together, he encourages them to continue to pursue the moral imperatives w hose practice h as m ade them g reat. H e also a dvises that they n ot s hare with o thers th e military practices that have m ade them virtually invincible in the field.

Book 8

As t he l ast book o f Xen ophon's ma sterpiece opens, one of Cyrus's companions, Chrysantas, rises to speak, concurring in Cyrus's view and emphasizing the role of discipline and the need for c ontinued ob edience to C yrus. Chrysantas also underscores the duty of the peers to attend Cyrus at his court.

Xenophon now details Cyrus's administrative arrangements for governing his vast empire. His success a s a m ilitary c ommander le ads h im to model h is c ivil s ervice o n t he a rmy. A fter d iscussing the policy with which Cyrus manages his retinue, X enophon notes that the king becomes even more pious, virtuous, temperate, considerate, and self-disciplined than he had been previously. He a dopts the costume p referred by t he Medes a nd has h is a ssociates do t he s ame. H e tries to assure his personal safety by making his powerful associates better friends to him than to each other. He entertains them, feeds them lavishly, and employs them as his eyes and ears in intelligence gathering. A em odel of k ingship that he chooses is that of the good shepherd who, while der iving ben efit f rom h is flocks, keeps them happy and contented.

Cyrus demonstrates to Croesus, who was often accounted the richest king of antiquity, that treasures in the hands of Cyrus's friends and allies are like money in his own bank account. If he e ver needs it, he c an call on them and they will willingly give more than he needs. \overline{A} is contrasts with Croesus's p ractice of s toring h is w ealth i n a trea sury.

Xenophon c ontinues t o describe Cy rus's arrangements as t hose of an ideal ruler of an ideal state—including hi s e stablishment of a board of public health and a public medical dispensary, all of whose ser vices are available to any citizen free on demand.

Cyrus's first s tate p ublic app earance i n Babylon—designed to inspire a we and wonder and also to provide maximum security for the monarch—draws f rom t he a uthor a de tailed and l oving d escription. So d o t he s ubsequent descriptions of Cyrus's receipt of petitions; the sacrifices made to Zeus, the Sun, the Earth, and the tutelary heroes of Syria; and the games and races that follow.

Next comes the story of a former farmer, Pheraulas, whom Cyrus has made a r ich man in consideration of h is lo yal s ervice. Bu rdened b y h is unaccustomed wealth, Pheraulas gives it all away to a S acian ac quaintance in exchange for b eing maintained as a guest. Ā us b oth d well happ ily together.

Xenophon next turns his attention to illustrating Cyrus's preference for good deeds over warfare. He tells how the king honors his friends and how he establishes a matchmaking service to see that h is loyal officers marry appropriately a nd well. He a lso a ccounts to a ll h is friends for t he possessions that he has i n store a nd e xplains to them that his wealth is there for his friends when they have need of some of it.

In due course, Cyrus decides that he wishes to return to Persia. He organizes a grand caravan for that purpose, giving detailed instructions for pitching t ents a nd a rranging f or s ecurity, m eal preparation, and so forth.

On the way home, Cyrus t urns a side to v isit his uncle, Cyaxares, and to p resent h im with a state residence of his own in the city of Babylon. Cyaxares proposes that Cyrus marry his daughter and accept the Median kingdom with her as a dowry. P ending t he app roval of h is f ather a nd mother, C yrus accepts h is first co usin a s h is

bride—a degree of relationship still highly valued for spouses a mong some societies in the Middle East.

After v isiting h is fa ther C ambyses, a greeing that C ambyses s hould r ule for l ife a nd t hen b e succeeded b y C yrus a s k ing o f P ersia, a nd a fter obtaining h is pa rents' p ermission to ma rry h is cousin, Cy rus departs, picking h is new b ride u p along the way to B abylon. Here Xen ophon y ields to the temptation to i nsert a little authorial joke. Some his torians, h e says, claim t hat C yrus ma rried his mother's sister. Xenophon quips: "But that maid must certainly have been a very old maid."

Once back in Babylon, Cyrus sets his hand to or g niz ng his far-flung e mpire f or s tability, assigning authority for c ivil matters to a s atrap but leaving military garrisons in charge of defense and establishing a system of inspections to assure that e ach element of his g overnment f ulfills its duties. Å at done, Cyrus establishes the archetypal pony express—one so organized that the mail throughout his far-flung empire moves both day and night. Xenophon calls it "the fastest overland traveling on earth."

Further c onquests, sa ys X enophon, e xtend Cyrus's empire from Syria to t he Indian O cean. Xenophon also credits him with the subjugation of Egypt, though in fact it was his son Cambyses that accomplished that feat. At its greatest extent, Cyrus's empire stretches from the Indian O cean in the east, to the Black Sea in the north, to Cyprus and Egypt on the west, and south to Ethiopia.

Cyrus a rranges his own life so that he dw ells all year in a part of his empire where, at the season of h is r esidency, t he w eather i s sp ringlike. Late in his long life, he c omes to P ersia for t he seventh time. Ā ere a phantom appears to him in a dream and predicts his coming death. Accordingly, Xenophon reports, Cyrus makes the appropriate sacrifices and prays. After a couple of days, during which his appetite fails h im, Cyrus calls his relatives and friends to h is bedside, and with them he reviews his life and the motives for h is various actions. He names his firstborn son, Cambyses, h is successor. Cyrus then asserts his belief in the immortality of the soul and enjoins upon his s urvivors t he d uty to b e r everent. H e t hen gives directions for h is burial. He wants no state funeral b ut m erely i nstructs t hat h is u nclothed body should be committed to the earth.

Cyrus then laments the sad state of morals in his old age, for he thinks that people have become less t rustworthy a nd m ore d ishonest i n t heir financial de alings. \overline{A} eir p hysical fitness h as declined. Male behavior has become more effeminate; the display of wealth is shameful; and they have neglected useful weapons and military tactics t hat C yrus in vented, suc h a s t he s cythed chariot a nd close c ombat. N ow, C yrus laments, Asian w ars m ust be conducted w ith th e a ssistance of Greek mercenaries if they are to succeed. When Cyrus has pronounced his views on these subjects, Xenophon's book ends.

 \bar{A} e historical Cyrus died in 529 b.c.e. following a military campaign in central Asia. His son, Cambyses II, b uried hi m at C yrus's royal r esidence at Pasargadae, a location to the northeast of Persepolis in modern Iran. His tomb can still be seen there.

Daoism (Taoism)

A C hinese p hilosophy ba sed o n t he a ttempt o f human beings to conduct their lives in a manner consonant with the "natural, eternal, spo ntaneous, nameless and indescribable" original principle of t he u niverse. The word dao (tao) m eans "the way." It is the way that individuals and nations must follow if they are to live in consonance with nature-or, perhaps better, to emulate the natural processes that are native to the universe. Thus, while Daoism is sometimes thought to imply inactivity, in fact it implies natural activity. That activity is characterized by doing what is simple, by a cting spontaneously, by tranquil living, b y b ehaving meekly, a nd b y o nly t aking actions that a re consonant with essential nature itself. As is the case with many Chinese printed and spoken words, many overlapping meanings are implied by a single character or utterance. Thus, Daoism presents an alternative to the busy program of beneficent social action that Confucius espoused.

188 Daphnis and Chloe

The central tenets of Daoism are contained in a little book called the *Laozi* (also *Daode Jing, Tao Te c hing*). The b ook itself is s lender, its roughly 5,250 words deployed in 81 sections and running to 105 pages, including illustrations and generoussized typeface in o ne of its most recent English translations. Nonetheless, it has spawned as many as 700 learned commentaries in China alone, and it is the Chinese book t hat has been most often translated into other languages.

Dead Sea Scrolls, The (ca. 375 B.C.E.–ca. 70 C.E.)

The De ad S ea S crolls a re a c ollection o f eight groups of an cient papyrus, leather, and (in one case) m etal ma nuscripts first d iscovered a nd excavated clandestinely by some Bedouin tribesmen. Later, often in competition with the Bedouin, professional archeologists were authorized to investigate k nown a nd l ikely si tes. The do cuments d escribed by the c atchphrase Dead Sea Scrolls began coming to light in 1947 and continued emerging from underground as late as 1977. It is conceivable that more will be found someday. Here I principally follow the discussions of the theologian Florentino García Martínez and of t he h istorian, t ranslator, a nd l inguist G eza Vermes, who are among the most balanced, scientifically r eliable, a nd a uthoritative o ft he scrolls' editors.

The following c ollections e ach c ontributed a share to t he wide variety of materials somewhat inaccurately lumped together under the designation Dead Sea Scrolls:

- 1 Papyri recovered from Wâdi Daliyeh, also called the Samaria Papyri. Mainly legal documents, these manuscripts are written in the Aramaic language and bear dates between 375 and 335 b.c.e. They were discovered together with human remains and a variety of possessions that suggest the papyri belonged to a band of refugees fleeing the destruction of Samaria by the conquering troops of Alexander the Great. It seems that the refugees were trapped in the cave by pursuing Macedonian soldiers who set a fire at the cave's entrance, exhausted the cave's oxygen, and suffocated its inhabitants.
- 2 The Qumran Papyri: Papyri in the Aramaic, Hebrew, and Greek languages found in 11 caves near Khirbet Qumran. These manuscripts were partly recovered by the Bedouin and partly by the archeologists. They are of extraordinary interest to students of religion and the focus of discussion here.
- 3 The Masada Manuscripts: Discovered while excavating the fortress at Masada destroyed by the Romans in (73/74 c. e.). These manuscripts are in the Hebrew, Aramaic, Greek, and Latin languages. Some of them contain biblical texts. One of them is a copy of "Songs of the Sabbath Sacrifice," a work also found in several copies at Qumran.
- 4 The Manuscripts of Murabba'at: These documents include contracts and letters signed by the Hebrew revolutionary Bar Kokhba, who fought against Rome from 132 to 135 c.e. Most of the other documents also originate early in the first century c.e. and appear in Aramaic,

- 5 The Manuscripts of Nahal Hever: Originating in two caves dubbed the Cave of the Letters and the Cave of Horror, this collection also contains a significant trove of documents relevant to Bar Kokhba, the leader of the second Jewish revolt against Rome (132-135 c.e.). The collection also contains an archive belonging to the family Babata. These two sets of documents are written in Aramaic, Greek, Hebrew, and Nabataen (an offshoot of the Aramaic tongue and an ancestor of Arabic). Beyond this, fragmentary biblical remains were discovered with bits of text from Numbers 20:7-8, and from Psalms 15 and 16. Investigators also found a partial Greek manuscript of a text called The Twelve Prophets. The 12 prophets were traditionally Hosea, Joel, Amos, Obadiah, Jonah, Micah, Nahum, Habbakuk, Zephaniah, Haggai, Zechariah, & Malachi.
- 6 The Manuscripts from Wâdi Seiyâl: This group includes documents of dubious or clandestine provenance.
- 7 The Manuscripts from Nahal Mishmar: Though investigators found much earlier handicraft on this site, they recovered only two or three papyrus sheets.
- 8 The Manuscripts from Khirbet Mird: The contents of this site differ markedly from those above. The items found on this site were a part of the collection of a Christian monastery of Castellion. Its documents, written in Greek, Christian Palestinian Aramaic, and Arabic, date to the Byzantine and Arab periods of Palestinian history—significantly later, in other words, than the documents from the other sites.

The documents described above have all been submitted to a r igorous s cientific r egimen o f radiocarbon analysis and, later, to the even more precise dating method of accelerator mass spectrometry, which also has the advantage of being less harmful to the manuscript. The results produced by these laboratory tests have been further cross-checked by paleographers—experts in dating the handwriting that app ears on the manuscripts. The t hree s orts o f a nalysis c onverge exactly, determining the period beyond which no manuscript from Qumran or Masada could have been co pied. N o d ocument post dates 6 8 c .e., according to Martínez, or around 70 c.e., according to Vermes.

The significance of that date arises, Martínez argues, from its exclusion of Jewish- Christian or Zealot origins for the documents in the treasure troves. Readers can expect to learn little, if a nything, new about the activities of early Christians during the years between the crucifixion of Christ and the app earance of the earliest of the Christian gospels, ca. 70 c.e.

With respect to the documents from the Qumran ca ves, M artínez c onvincingly argues—and Vermes agrees—that they all come from the religious li brary of a J ewish s ect o f b elievers w ho dwelt and worshipped together, who avoided contact with other branches of Judaism, and who followed a u nique c alendar a nd a s et o f r ules o f behavior peculiar to themselves, called *halakhah*. The sect seems to have followed the precepts that had evolved from those of an early Zadokite priest of t he t emple, On ias I II (served 1 87–175 b.c.e.). Onias had resisted the introduction into Judea of Greek religion and institutions under the rule of the Syrian successors of Alexander the Great.

To illustrate that premise, Martínez has undertaken t o c onstruct a c omposite o f t he s everal copies of documents typifying the collection. He advises his reader that the copies show the effects of hundreds of years of editing and revision.

First among the documents Martínez includes is what h e c alls "The R ule of t he C ommunity." This d etails the s pecifics of r equired be havior during worship and guidelines for leading a good life in g eneral. It a lso p rovides speci fics a bout the group's or gan a ton, about discipline within the s ect, a nd a bout app ropriate c onduct w hen interaction with persons outside the sect proves necessary. A lso included here are essays on theology, re flections on bi blical h istory, e xplanations o f b iblical p assages, m oral a dvice, and discussions o f liturgy. The l iterary form of t he rule, says Martínez, is unprecedented in a ncient Judaism but one that continued to develop among a wide spectrum of early Christians and in later monastic c ommunities. That s pectrum in cluded the Gnostics as well as other communions eventually d eemed h eretical. Parts of t he do cument are in prose and parts in verse.

Some of the rules of the community are reminiscent of t hose p racticed b y t he f ollowers o f Epic ur us in ancient Athens. Community members were expected to correct one a nother, but their reproaches were to be delivered meekly and compassionately; no anger, muttering, or "spiteful intent" w as a llowed. E xclusion f rom " the p ure food" of the community—whether an actual or a metaphorical communion—for short or long periods, depending on the seriousness of the offence, were apparently frequent. E xcommunication and even death were a lso a pa rt of t he s ystem. On e could be punished for falling asleep in the general meeting of the society or for "giggling inanely."

Following t he "R ule" c omes w hat Ma rtínez labels "The Damascus Document." (For the belief system it represents, others label this document a "Zadokite text.") The text presents a picture of a deity m uch offended b y t he b ehavior a nd a ttitudes of his creation—a God of wrath who punishes t he ma nifold t ransgressions o f h uman beings. People are encouraged in those transgressions b y t he H ebrew G od's dem onic adv ersary, Belial. This document also outlines the manner in w hich t he c ommunity en forces d iscipline among its members and the consequences of failing to submit to that discipline.

As see ms us ual i n s uch r eligious c ommunities, those i n t he s eats of l eadership i nterpreted and explained the will of God to t heir followers. The do cument a lso s eems to c ontain p rescriptions for diagnosing and treating conditions such as leprosy and gonorrhea.

Beyond t he r ules a lready de scribed, t here i s another set of rules from the *halakhah*. These are important because they distinguish the community at Qumran from mainstream Judaism. These are rules governing even the minutiae of day-today living.

Still a nother set of manuscripts add resses the subject of eschatology—that br anch of t heology that concerns itself with the end of the world. In a section t hat Martínez labels "The W ar S croll," the final battle b etween "the s ons of l ight" a nd "the sons of darkness" b ecomes the subject of a detailed prophecy that results, predictably, in the victory of the former. For the righteous survivors of t he final battle, "The R ule of t he C ongregation" emerges. Am ong the subjects addressed is convocation for planning the conduct of further warfare. Another is the breaking of bread and the drinking of wine.

Then a N ew J erusalem is de scribed i n s ome detail, and other texts contain further prophecies concerning t he question of final t hings as t he world winds down. One should note that many if not most of the manuscripts above existed in several co pies a nd sh owed evidence o f e ditorial emendation over time.

Another broad category addressed by the Dead Sea Scrolls is literature that interprets and explains the m eaning o f S cripture: e xegetical li terature. Chief among these ancient texts we find the Temple S croll. This e normous d ocument me asures some eight meters (over 26 feet) long. Perhaps predictably, t he e xplanation o f difficult p assages results in the promulgation and refinement of ever more r ules of c onduct in a ll d epartments of life. These include such matters as purifying a house in which someone has died, rules governing the sacrifice of animals, and rules prohibiting the ingestion of blood when dining on flesh.

Notable a mong t he T emple S croll's i nstructions to YHWH's (the Hebrew name of god—the Old Testament na me f or t he su preme a nd o nly true deity) faithful are those relating to the consequences of straying from the faith a nd worshipping ot her go ds. P rophets o r i nterpreters o f dreams who propose the worship of o ther gods must b e p ut to d eath. If the people of a n e ntire city have revered a nother dei ty, the faithful a re instructed "to put to the sword all the inhabitants of that city." Their animals must also be destroyed and the city and its contents burned.

Among other matters addressed in the scroll, we find instructions for the elevation and behavior of kings. We also learn of the offerings that are required from hunters, fishermen, and farmers, and the form of encouragement that priests must g ive s oldiers adva ncing t o battle. Other examples of exegetical literature appear in commentaries on such books of the Bible as Isaiah, Hosea, and M icah, and u pon such ap ocryphal scriptures as Nahum.

Still o ther i mportant c lasses o f do cuments appear among the Dead Sea Scrolls. One of these is what Martínez labels "para-biblical literature." This class contains quite disparate materials. First we find "Pa raphrases of the Pentateuch," which interweaves direct quotations from what has come to be regarded as received Scripture with formerly unknown material, both more and less connected with S cripture. O ther s ubclasses o ft he parabiblical material, including the "Genesis Apocryphon" and the "Book of Jubilees" embroider basic stories from the Bible with extra-biblical detail. At a more distant remove from what has subsequently b een de fined a s re ceived Scripture, w e find pseudepigrapha-writing t hat i s f alsely a scribed to bi blical c haracters. E xamples of t his c lass of material take now-received Scripture as a starting point b ut tel l n onbiblical s tories a bout b iblical characters. These stories may be older than, contemporary with, or more recent t han re ceived Scripture, but no one can be sure.

Of par tc ular interest to biblical scholars a nxious to trace the development of Scripture during the proto- Christian per iod a re manuscripts like that l abeled "Pseudo-Ezekiel," w hich p reserves hints of connections with the development of very early Christianity. Other manuscripts in this category include the "Aramaic Testament of Levi," the "Books of E noch," a nd t he "B ook of J ubilees" named a bove. B eyond t his, we find e xamples of other apocrypha, such as "Pseudo- Samuel," "Pseudo- Jeremiah," "Pseudo-Daniel," a nd " Tobit" i n both Aramaic and Hebrew.

Further classes of literary texts represented in the Dead Sea treasure trove include poems such as a series of "Apocryphal Psalms," a number of quite lovely hymns of praise, and some less lovely hymns designed to be sung as a protection against demons. There are also several "Wisdom Poems." These include one warning against the "Wiles of a Wicked Woman" and one predicting the arrival and nature of the "Messianic Apocalypse." Beyond these poetic texts, one also finds a series of liturgical texts and a group of texts relating to astronomy, c alendars, and th e c asting of ho roscopes and physiognomy.

A final s croll c ontains a m ystery. This o ne consisted of two sheets of totally oxidized copper rolled up together. To d ecipher the Hebrew writing—from a pparently pre- 200 c.e.—on the sheets, it was necessary to cut them very carefully into parallel strips. While the translation is often difficult, and while experts wonder whether the scroll's contents are true or fictitious, the s croll seems to contain detailed directions for finding an enormous quantity of hidden Z adokite t reasure. A g roup of inscriptions on ceramic shards and on a wooden tablet completes the finds.

Among o ther c onclusions a bout t he s crolls' scholarly, literary, historical, biblical, and religious significance, Geza Vermes d raws the following ones: The scrolls' discovery initiated a new scholarly discipline, Hebrew codicology-the study of Hebrew m anuscripts. The finds h ave shed n ew light on both the text and the canon of the Bible. Though the central message of the Hebr ew Bi bl e is unaffected, the discoveries have fundamentally altered scholarly thinking about the history of the text. Most importantly, given the variety of texts discovered-several pre viously unknown-the concept of a definitive Bible s eems to h ave s till been in process of formation, and the books that eventually w ould be i ncluded i n t he bibl ical canon-including the Hebrew Bible-had not yet been finally identified (although all the books of

192 Deipnosophists, The

the H ebrew B ible e xcept E sther a re r epresented among th e s crolls a t Q umran). These fa cts, o f course, point conclusively toward the subsequent role that both Jewish and Christian communities played i n w innowing t hrough t he ma terial t hat for many adherents of both faiths would come to constitute the infallible word of God.

It appears that the community of whose library the scrolls are the remnant was either the main or a spl inter g roup o ft hes eparatist s ociety o f Essenes—Jews devoted to a rigorously strict religious discipline. A s none of those persons who deposited the materials ever r eturned to co llect them at the place where, 2,000 years later, they were found, theories that posit a Roman massacre of the Essenes seem viable.

As r egards the r elationship of the D ead S ea Scrolls and the New Test ament, Vermes notes the following. First, there are basic similarities of language (as a single instance, both use the phrase "sons of light.") Next, both the Essenes and Jewish Christians thought of themselves as "the true Israel," and both expected the arrival of the Kingdom of G od at any moment. B oth c ommunities a lso saw t heir r ecent h istory a s t he f ulfillment o f Hebrew Bible prophecy. Similarities in the structure and governance of the communities lead Vermes to speculate that the early Jewish Christians modeled their institutions on those of the Essenes. The two communities also shared a b elief in the healing o f a ll deb ilitating c onditions, i ncluding death, for the faithful at the world's end.

Finally, V ermes is st ruck by the d iversity and originality that characterized what the Indian poet P. Lalhas called scribal *transcreations* of older texts at the E ssene c ommunity of Qumran. That f reedom of scriptural expression leads Vermes to speculate that the utter subjugation of the Jewish state to the Ro mans a fter the g eneral (later em peror) Titus d estroyed the tem ple at Jerusalem (70 c. e.) led the rabbis to h unker down and en force a nononsense orthodoxy that included mandatory allegiance to a received Scripture. This point of view seemingly passed along to the Christian Church in its various manifestations in Europe and Asia. The ecclesiastical h istorian K aren L . K ing, h owever, points to the survival and proliferation of a more diverse early Christian literature such as Gnost ic aprochrypha and pseudepigrapha before the official definition of a New Testament canon.

Owing to many complexities, including scholarly ineptitude and rivalries, translation and publication of a ll the D ead S ea S crolls ha s b een a scandalously drawn- out affair.

Deipnosophists, The (Sophists at

Dinner) Athenaeus of Naucratis (early third century c.e.) *Greek prose writer*

Most of what we know about Athenaeus of Naucratis must be ferreted out or inferred from the pages of h is r ambling, s ometimes c omic, pa rtly lost cookbook in the Greek language, *The Deipnosophists* (Sophists at Dinner). It is the oldest book on t he s ubject of c ooking t hat su rvives l argely intact in a Western Europe an language. From its pages, we learn that Athenaeus was an Egyptian of Greek extraction born late in the second century c.e., in the city of Naucratis. Later he moved to Rome d uring a p eriod i n w hich i ntellectually fashionable Ro mans ad mired a ll t hings Gr eek, learned the Greek language fluently, and preferred their reading material in that language.

The pa ges of *The D eipnosohists* reveal t heir author as an omnivorous reader and an indefatigable c ollector of a necdotes t hat he w eaves together into an invaluable if d isorganized t reasure t rove of ot herwise u navailable i nformation about t he a ncient w orld. A ll of t hese d ata a re loosely arranged about the central topic of food. The s tandard, b ilingual e dition of t his a ncient work runs to seven substantial volumes.

Oddly, recipes rarely appear in the work, but the practices of Greek, Persian, Roman, and especially Sicilian cooks—and many others too—appear frequently. W e le arn a s w ell a bout t heir sp ecialties, and w e ar e t reated to de scriptions o f el aborate, expensive f easts and th e en tertainments t hat accompanied them. We hear about the music and the instruments on which it was played. Athenaeus also describes the furnishings of the dining rooms and the menu cards that the guests were given. He discusses good and bad wines, gluttony and fastidiousness, and he considers the medical treatments available to cope with ailments arising from excess eating and drinking or from over-dieting.

In planning his work, A thenaeus had b efore him the models of Pl at o's *Symposium* and the *symposium* of X enophon of A thens. B oth of those works, however, focus the r eaders' a ttention on the d rinking party that follows d inner, the *symposium*: from Greek *potos* (drink) and *sym* (together). P lato's is t ightly w oven, fo cusing on the content of the c onversation and on the personalities of t he g uests. Xen ophon re ports c onversations c ollected f rom s everal b anquets i n different times and places.

Athenaeus seems at first to want to adopt Plato's pl an, b ut A thenaeus's c ompulsion to ward inclusiveness stretches his description of both the main c ourse a nd the d rinking party of h is first banquet at Rome, taking 10 of the 15 manuscript scrolls that contain the version of the work transmitted to us. A s econd banquet r uns from book 11 t o book 14, a nd A thenaeus s queezes a t hird banquet into book 15.

Among the attendees at Athenaeus's banqueting we find, of c ourse, t he ho st, L arensios. H e, like s everal o thers p resent, i s n amed for a r eal person, the Roman pontifex minor (whose function was a priestly one), Publius Livius Larensis. Also present at the gathering was one of the most famous physicians of the ancient world, Gal en of Pergamum, w hose m edical w ritings formed a standard part of the curriculum for physicians at least until the end of the 18th century. The principal speaker in the discussions is a politician and jurist, U lpian of Tyre, w ho w rote v oluminously on legal subjects and who died at the hands of soldiers in the imperial palace in 228 c. e.—a detail that Athenaeus spares his readers.

Against Ulpian, Athenaeus sets up a foil, the cynic (see cynicism) phi los o phe Cynulcus, who opposes Ulpian with u ncouth, i ronic mo ckery. Affecting t o l oathe w idely le arned p ersons, Cynulcus n onetheless re veals that he is o ne o f them. Joining him in his attacks, but also turning on Cynulcus from time to time, we find Myrtilus o f Thessaly, wh o o utdoes C ynulcus b y loathing all phi los o phes.

One must understand that although Athenaeus assigns the names of real persons to s ome of his banqueters, their performances are not based on a ctual o ccurrences. They merely provide a n extended o pportunity f or A thenaeus to p ursue his encyclopedic interests. The fact, for example, that Cynulcus and Myrtilus are paired invokes a literary commonplace also evident in the Menippean s atir e of the New Comedy in Greece (see co medy i n Gr eece and R ome). This beco mes self- evident when one discovers that Myrtilus is the son of a sho emaker. Cynics and sho emakers are o ften pa ired b y t heir p overty a nd h umble origins as in *The Ferryboat* of Lu cian. Ma ny other diners are also present.

The i nteraction a mong t he c haracters, o ne must f airly s ay, is n ot the p rincipal f ocus o f interest in *The Deipnosohists*. The conversation principally consists of the p edantic citation and

194 Demosthenes

recitation of stories and incidents from a seemingly inexhaustible store of miscellaneous erudition. Sometimes, however, the stories the diners tell a re g enuinely a musing, a s w hen i n b ook 2 Athenaeus has o ne o f h is sp eakers tel l a s tory attributed to Timaeus of Tauromenium. A group of you ng men got so d runk that they i magined themselves at sea on a sinking ship, though they were really in town in a house. They nonetheless threw out all the furniture and crockery to lighten the load. In the morning, when the town constabulary a nswered n eighbors' c omplaints, t he officers took pity on the still i nebriated you ng fellows a nd told t hem to ma ke s acrifices at the local altars as soon as they had s obered up. The lads promised to do so if they ever made port. Moreover, t hey l ooked upon t he c onstables a s their saviors and as sea deities and promised to construct altars to them.

Apart from descriptions of cooks and cookery and the r ecognition of t he c onnection b etween civilization and fine dining, then, and aside from the occasional retellable vignette, the main value of *The Deipnosophists* arises from its contribution to our knowledge of matters that would have been forgotten without it. It makes important contributions to what we know about both Middle and New Comedy in Greece and broadens our knowledge of Greek life both during the classical ages and 1 ater, w hen Ro me r uled t he H ellenistic world.

Demosthenes (ca. 384–322 B.C.E.) *Greek prose writer*

The greatest orator and one of the greatest statesmen of democratic Athens, Demosthenes was the son of a manufacturer of furniture and s words. His father died in Demosthenes' early childhood, leaving the boy a si zable fortune and appointing three gu ardians t o oversee it . The g uardians wasted much of the lad's inheritance. Early perceiving t heir b reach of t rust and determined to have j ustice, a v ery y oung Dem osthenes b egan practicing or atory and rh etoric, st udying under Isaeus, an expert on inheritance law.

Whether or not a s tory is true respecting h is practicing oratory with stones in his mouth, he is known to have overcome a speech defect. By the time he was 20, he felt ready and sued his guardians. He won, a nd a fter f urther su its, he r ecovered a l ittle of h is m oney f rom A phobus a nd Onetor, t wo of t he g uardians. H is sp eeches o n these occasions survive.

Owing to a fast-growing reputation for legal oratory, D emosthenes b ecame a profe ssional writer o f o rations f or s everal p rivate c lients engaged i n l itigation, a nd he a lso i nstructed others in litigation and oratory. App arently his personality was waspish and dour, perhaps influenced by the unfriendly litigiousness among politicians that characterized the legislators and city leaders of his time. In his professional capacity, he helped the statesmen of his era in their public disagreements with o ne a nother, a nd s ome of t he speeches he wrote for such persons drip with vitriol. The o rations of t he foregoing s ort d ivide themselves into those addressing private matters and th ose add ressing s emipublic ma tters. A theme emerges from them that became the center of Demosthenes' political stand once he began in 354 to speak for himself—as he did in that year's oration "O n t he N avy Boards"-on ma tters important to the Athenian state. Athens, as the historian J. H. V ince describes Dem osthenes' stand, m ust r emain " committed t o a policy o f honor and high ideals."

Athens in the mid-fourth century b.c.e. found itself i n a c omplex a nd del icate m ilitary a nd po lti al situation. Though the Athenians depended o n a ci tizen so ldiery, t hey had suc cessfully confounded Theban a mbitions o n t he Gr ecian peninsula, but subsequently Athens had lost her most i mportant possessions. Though we akened, the Persian Empire remained a continuing threat, as did bands of marauding mercenaries.

Most dangerous of all, the expansionary ambitions of Philip of Macedon and his son Alexander the Great, though still not entirely clear, loomed on t he hor izon a nd e xcited Dem osthenes' p rescient a larm. P hilip w as b uilding a v irtually invincible profe ssional army—one t hat h is s uccessor Alexander would forge into the most formidable pre- Roman military force of the ancient world. To a probably fore doomed effort to counter that force, sometimes with skillful diplomacy and alliance building and sometimes with m ilitary a ction, D emosthenes dedicated t he r est of his public life, a nd the balance of h is surviving oratory at tests to h is e fforts t o c ontain a nd restrain Macedonian ambitions.

Sixty of D emosthenes' or ations s urvive. I n addition, w e p ossess a n ero tic e ssay t hat he penned, several letters, and 56 paragraphs called *Exordia*. These a re t he o pening pa ragraphs o f speeches. S ome o f t hese app ear i n t he o rator's surviving speeches, and some of these introduced works now lost. In this reference work, it is possible to d escribe on ly t he mo st c elebrated of Demosthenes' orations to give a sense of his subjects a nd method. B ecause of h is long-standing feud with Æschines and universal admiration of the speech, I ha ve s elected for t his p urpose h is oration *On the Cr own*, which provides an outstanding example of his art.

Eventually Demosthenes was accused of misappropriation of public f unds. The Greek h istorical b iographer P lut ar ch s uggests t hat Demosthenes to ok a b ribe i n exchange for h is silence. The matter is vexed, and the statesman's intentions may well have be en h onorable, but the Athenians found h im g uilty. He was fined two an d ha lft imes t he a llegedly m isused amount an d, l ike h is enemy Æ schines, w ent into e xile. E ventually the c itizens of At hens recalled him and found a way to remit the fine they had imposed.

The p olitical s cenario, ho wever, t hat Dem osthenes most feared for Athens had c ome to pass. Alexander of M acedonia (Alexander t he Gr eat) had made h imself the master of all Greece. As a result, D emosthenes a nd all t he m embers of h is party w ho had o pposed Mac edonian a mbitions were sentenced to death. According t o Plut arch, Dem osthenes s ought refuge i n t he t emple of Poseidon i n C alauria. There a search party sent by Alexander's general, Antipater, discovered him. Rather than be t aken and subjected to whatever punishments might be in store for h im, D emosthenes to ok p oison a nd died before the sea god's altar.

De Rerum Natura (On the Nature of

Things) Lucretius (ca. first century C.E.) A poem in six books explaining the materialistic views that Lucr et ius and Epic ur us shared about the nature of the universe, *On the Nature of Things* excoriates religion as the principal blight responsible for clouding the human intellect. That view of the m isguidance offered by religion does not prevent Luc retius f rom i nvoking m ythology or from addressing Venus, the goddess of love, as the muse of his poem. Love, as he t hinks, is after all the f orce th at d rives th e a nimal a nd v egetable kingdoms, making the earth productive with life. From a n a llegorical p oint o f v iew, m oreover, Venus is the goddess that brings peace.

Book 1

Lucretius p romises to e xplain how na ture b rings into b eing an d at l ast di ssolves i nto their a tomic constituents all living creatures. He credits Epicurus with being the first to expose the disadvantages that religion entails for people and the first to put down re ligion by suggesting t hat i ts de ceptions, because they prevent people from recognizing the truth of natural processes, are in fact impious. He cites human sacrifice as an example of such impiety. Such sacrifice destroys something brought into being b y t he natural p rocesses t he g ods h ave established.

196 De Rerum Natura

Lucretius e xhorts p eople not to fe art errors after death. Body and soul die together, and there exists no afterlife, no judging, no rewards, and no punishments. On the contrary, h is first principle holds that no *thing* is produced by divine power from nothing. All things require specific seeds for their g eneration, a nd a ll t hings d ie o r d issolve, returning t heir e lements to t he c ommon p ool. Those elements eventually recombine to form new things, living or inanimate, sentient or insentient.

Lucretius is not an atheist. He believes (or says he b elieves) in t he g ods. H e m erely a grees with Epicurus t hat a s i mmortal a nd p erfect b eings, gods must be perfectly happy and totally unconcerned with human affairs.

The poet continues to discuss the composition of w ind, water, and s olids, concluding t hat a ll things are composed of a mixture of atoms and void—an a ssertion t hat in a sense presages t he experimental k nowledge of mo dern s cience. Lucretius's pre deæs ør, Epicurus, grants that some so rts of matter may be e verlasting a nd recombinable into n ew o bjects w hen t heir ol d objects wither away. He also asserts that the survival of anything after the countless ages that the universe has existed proves that something must be indestructible.

The notion of the persistence of species interests Lucretius, but of course evolutionary change does not occur to him.

Space, he a rgues, must be infinite in all directions and must contain an infinite store of matter.

Book 2

In the second book, Luc retius a rgues that, of all the things that men value, only reason is genuinely profitable, for only reason can overcome human appetites a nd su perstition. A s f or matter, i t i s always in motion, always being tossed about in infinite space, and all things accessible to human perception are formed from it, though its motion is not always apparent to people.

Lucretius a rgues a gainst t hose w ho b elieve that the gods made the world with the benefit of people in mind, citing the many faults that, from a h uman p erspective, e xist i n t he u niverse. H e cites the multiplicity of forms within the species of t hings a s evidence of the unpredictable v ariability of the universe, and he argues for a similar variety i n t he shap es of t heir e ssential a toms. Moreover, Lucretius attributes the plea sure or displeasure that human beings take in different substances to the conformity or nonconformity of the substances' constituent atoms to h uman sensory apparatus.

Lucretius at tributes qu alities s uch a s h ardness and softness to the relative degree to which atoms a re "hooked" tog ether. The harder substances a re c omposed of closely hooked a toms and the s ofter of m ore l oosely ho oked a toms. Nonetheless, he argues, there is a limited number of shapes that atoms can come in since the things that a re c omposed of them a re in fact limited in their variability. Though he does not use this example, absolute zero sets the limit for the possibility of cold, and at the other extreme, Lucretius would argue for a limit beyond which temperature cannot rise.

Within those limits, Lucretius argues for the variability of speciation and acknowledges that, like in dividuals, s pecies c ome in to b eing an d pass away. As for extant species, the earth—which Lucretius recognizes as round—is properly venerated a st heir s ource and mother, not s ome extraterrestrial deity. Similarly, Lucretius denies the possibility of the k inds of shape-shifting of one t hing i nto a nother or of double-natured things such as the M inotaur or other monsters that Ovid traces in his *Met amorphoses*.

Lucretius a rgues at s ome le ngth t hat atom s must be c olorless, and he a ssociates the perception of color with the sense of touch rather than sight. He also posits that atoms are without temperature, so und, moisture, o dor, o r s ensibility. Sensation, h e s uggests, is a qu ality t hat a rises only in l iving c reatures composed of the in sensate a toms. The p hysical heavens—that i s, t he sidereal universe—and E arth a re the pa rents of the human species. No intervening deity is necessary t o a ccomplish t he r equisite n atural p rocesses. Upon the deaths of Earth-born creatures, their atoms are eventually dispersed and become available for recombination into other forms.

Given the infinitude of space, Lucretius argues, other worlds beyond our own must exist. In making that assertion, Lucretius anticipates the multiplicity of universes suggested by modern physics and string theory.

As he ends Book 2, Lucretius emphasizes that nature does not require gods to operate creatively. Natural processes and infinite time are enough to account f or a ll e xistence. Si milarly, ho wever, a ll things and all natural processes also wear out and decay. The human race and animals and plants are all subject to this same fate. All sentient—and, for that matter, insentient—nature is destined for the tomb.

Book 3

The third book begins with an encomium to Epicurus as Lucretius's intellectual forebear who has driven away the terrors of superstition by assuring the world of the self-satisfaction and happiness of the immortal gods and their utter disinterest in the affairs of human beings. Lucretius next examines the nature of mind and spirit, finding both to be natural functions of the body and coexistent with it. He locates the mind in the breast because of the changes in feeling that occur there in moments of terror or ecstasy, and he concludes that the spirit is associated with the mind, and that both directly influence t he s tate o f t he b ody. H e b elieves t he mind to be composed of very small, round, weightless particles. Lucretius affirms that mind is composed of four substances: b reath, he at, a ir, a nd a fourth nameless and extremely tenuous substance that disperses the effects of mind through the body. The blending of these four substances is critical to sensation. Moreover, their a dmixture varies from species to species and individual to individual and the relative proportions accounts for differences in temperaments. Lions have more of heat, stags of cold breath, and so forth. Human predispositions are traceable to similar causes.

If, however, these predispositions lead to faults in h uman b eings, r eason c an ove rcome t hose faults. S oul an d b ody must d well t ogether f or either to l ive. S eparated, b oth di e. Lucretius points t o t he fa ilure o f th e m ental faculties a s well as the physical during the aging process to illustrate the c odependency o f b ody, m ind, a nd soul. The influence of a lcohol a nd the results of epilepsy a lso r eveal cod ependency. Thus, w hen the b ody d ies b y degrees, losing capacity after capacity, the s oul d oes l ikewise an d does not remain intact to leave the body at death.

After listing examples of the death of the soul in b odies di smembered o n t he field o f ba ttle, Lucretius a rgues a gainst t he i mmortality o f t he soul on the grounds that it re tains no memories from a state prior to an individual's physical birth. Moreover, the similarity of physical and character traits from one generation of animals to the next fierceness in lions, for example—demonstrates that m ind an d body a re coex istent. L ike t he soul, the mind cannot survive outside the b ody. From time to time, Lucretius rejects mythical stories, like that of a crowd of immortal souls awaiting mortal bodies to transmigrate into.

Having made h is c ase, Luc retius a sserts t hat, given t he t ruth of a ll he ha s s aid, de ath m eans nothing to human beings. They experience nothing memorable before birth, and they will experience n othing a fter de ath. That w hich do es not exist can feel nothing. If all ends in sleep and rest, the poet asks, where is the bitterness in that?

As for the punishments myth ascribes to hell, they exist rather in life. Some are torn by passion; others have their ambitions disappointed. Others still a re discontented no matter what they have or achieve. Those punished by guilty consciences suffer their pangs on earth. A scribing such torments to some eternal place of punishment is no more t han fe arful projection of what for many are their just deserts. The wise go gently into the good night of death. Those who suffer from the consequences of t heir appetites or b ehavior would do well to seek the consolations of philosophy, w hich wou ld te ach t hem to l ighten a nd bear their burdens. The net effect of book 3 is to reconcile p eople to t he re alities of t he h uman condition.

198 De Rerum Natura

Book 4

Lucretius begins Book 4 with a none-too-modest encomium on the power of his verse and its benefit for those of his readers who allow themselves to become enlightened by it.

Having clarified mind and soul for his readers, Lucretius now turns his attention to the phenomenon of vision. He explains that very thin, colored films are continually thrown from the surfaces of things. When they encounter the organs of human vision, p eople s eet hem. W hen they e ncounter reflectors such as mirrors or the still surface of a pool, they are reproduced almost unchanged. The poet l ingers o ver t he n ecessary fineness of t he component atoms of such images and the speed at which they travel, and he ma rvels at how quickly such images reach our eyes. By si milar means we hear, touch, taste, and smell.

Lucretius explains that distortions in human perception of distant images arise from the corners of the images being rubbed off by their passage through the air. He accounts more accurately for the reasons that our shadows move with us. A substantial discussion addresses optical illusions and w hat w e t oday u nderstand as p henomena arising from the refraction of light. He also discusses our seeming perceptions while dreaming.

Lucretius argues that logical reasoning finally depends on the senses. (If he were writing today, he would do ubtless i nclude a s s ensory e xtensions the microscopes, telescopes, other scientific instruments, an d p erhaps s ophisticated m athematical computations that allow us to understand better the micro and macro components of physical reality.)

Next he t reats t he ot her s enses, e xplaining sound—by which he principally means the voice and hearing. He explains the phenomenon of echo and attributes myths relating to nymphs as nonscientific attempts to account for echo. Then Lucretius passes on to taste, explaining it as the result of food particles being squeezed through the pores of the palate. S mooth particles, he t hinks, g ive r ise t o pleasant and rough particles to u npleasant tastes, but the pleasure one derives from flavor ends at the palate. H e a lso ac counts f or d ifferences i n f ood preferences among various species and from individual to individual and for the way that health or illness affects one's perceptions of flavor.

Treating s mell, L ucretius e xplains t hat o dors are made of larger particles than sights or sounds, and therefore a re harder to p erceive and do n ot travel as far. Different c reatures react differently to different odors, such as vultures to carrion and bees to honey.

Next, Lucretius accounts for mental images composed of even finer particles than the physical ones. Mental i mages often a rise from recombining p hysical o nes that have entered the mind. These combinations, Lucretius thinks, account for the notions of ghosts, centaurs, three-headed dogs like Cerberus, and other double-natured creatures such as Scylla (see Ovid's *Met amorphoses*). Such combinations also account for dreams.

The p oet t hen c onsiders c onscious t hought and the ability of the mind to conjure up instantly that which it wishes to address. He concludes that all th e i mages (representing t he i nput of e very sense) in t he m ind a re i nstantly a ccessible, b ut that the mind must voluntarily attend to them to call them up in useful sequences. An inattentive mind may find itself considering irrelevant images and unintentionally draw false conclusions.

Digestion and motion now occupy Lucretius's attention. Fo od re places the body's waste p roducts and fuels the body the way coal fuels a furnace. Drink extinguishes the heat that the stomach generates i n d igestion. Mot ion re sults f rom ou r willfully emulating the images of motion that we have per ceived. W hen o ne w ishes to m ove, t he image strikes the mind, the mind strikes the spirit, and the spirit strikes the body, which moves.

There follows a discussion of sleep and dreaming. Sleep occurs when a part of the spirit withdraws from the body and another part, necessary to continued life, sinks deeper into the body. The mind dreams of the interests of the day, says the poet. Likewise, horses dream about racing, dogs about h unting or g uarding, b irds a bout flying, and h uman b eings a bout t hat w hich m ost c oncerns them. In youth, this is likely to be sex. The s ame "seed" that causes young people to dream about passion is responsible for the onset of waking physical desire and for the mind being wounded with the pangs of love. There follows a discourse on lovesickness and its ill effects. Even when de sire is s atisfied, it soon returns. Lo vesickness wastes life, strength, and wealth. It leads to c onsuming je alousy a nd a g uilty c onscience. Given the del usions t hat ac company f alling i n love, Luc retius c ounsels t hat o ne a void it a ltogether. Love deludes the lover into thinking that his beloved is t he most b eautiful of a ll w omen. Lucretius t hinks t hat o ne w oman i s m uch l ike another. Moreover, he thinks that women know it and are at pains to conceal the fact.

Nonetheless, women as well as men, he finally grants, are subject to passion. So are the members of t he a nimal kingdom. He n ext d iscusses the r easons t hat s ome c hildren t ake after t heir fathers and some their mothers and some resemble both parents. This depends on the proportion of seed received from each parent.

Barrenness results from the seed of one parent or the ot her being ei ther to ot hick or to ot hin. This situation may change in the course of a marriage, or it may be resolved by changing one's spouse. The sort of food one eats can also influence fertility, as can the position assumed when copulating.

True love, Lucretius concludes, arises from the habit of loving.

Book 5

Book 5 beg ins with an other encomium on the benefit that human beings derive from the thought of Epicurus, who freed them from the chains of theocratic superstition and modeled a way of life free from d ebauchery and excess. Then follows Lucretius's de claration that he follows in Epicurus's footsteps and expands his work by teaching nature's laws.

The p oet c ontinues b y a nnouncing h is i ntention of showing that the universe, too, had a beginning a nd w ill h ave a n e nd. (For L ucretius t he universe, t hough infinite, w as n onetheless ge ocentric.) H e a nnounces h is i ntention to ac count for t he e xistence o f ma tter a nd i ts a rrangement into earth, sky, sea, stars, the sun, and the moon. He promises to account for the variety of human languages a nd for t he origins of t he fear of t he gods in human hearts.

Lucretius also means to explain planetary and stellar m otions a nd t o disprove a ny not ion t hat they are in any way volitional or divinely arranged for human convenience. He argues that the universe and e verything in it will be destroyed. He pronounces it impossible that the gods can exist in t he un iverse. R ather, he s ays, t hey l ive i n a kind of h yperspace b etween u niverse a nd u niverse and do n ot intervene in natural processes. As they have no interest whatever in human creatures, t he g ods d id n ot c reate t he u niverse f or people. Do ing s o c ould b ring t hem n o p ossible benefit.

Rather, the world is the accidental product of the m ovement of at oms. O r, i f it is not, some other autom atic m echanism e xplains i ts e xistence, for the gods would derive no benefit from having created the world or the people in it. Moreover, the world is far too imperfect to have been the product of divine c reation. Luc retius cites a series o f s uch i mperfections, including di sease and n atural di sasters. M ost s ignificantly, t he world i s it self mortal, a s one c an s ee f rom t he ongoing process of the destruction of parts of it.

Lucretius says that if one believes the legends about the prior destruction of the earth by flood and fire, that destruction proves its mortality and susceptibility to disaster. As for the earth's beginning, he as cribes it to an accidental assemblage of atoms and matter that eventually compressed into the universe as we have it. The details here are not crucial, since the processes of planetary formation are better understood now than then. The central issue for Lucretius is that no divine fiat brought the world into being.

Recalling that for Lucretius Earth was the center of the universe, a reader observes him struggle with various possibilities to explain the apparent celestial motions caused by Earth's rotation. Air currents, tides of ether, or even the quest for food are am ong t he p ossibilities t he p oet offers. H is estimates of t he si zes of c elestial bodies—all of which he thinks are about the size we perceive are totally inaccurate, but he admits that he is not sure about these matters. Instead, he offers a variety of a lternatives t hat o ccur to h im to e xplain the o bservable p henomenon of the s ky's v isible motion.

The variable lengths of days and nights equally mystify the poet, but again he offers theories to account for them. Perhaps the sun r uns slightly different routes, some longer, some shorter. Perhaps air is thicker in some places than in others and makes the sun slower or faster. He does better with the moon, for the reflection of sunlight as the source of the moon's illumination does occur to him. As he is not sure, however, he also theorizes the possibility that the moon is darkened by the shadow of a passing satellite—not a bad guess for a lunar eclipse—and he suggests that a part of the moon e mits light a nd a part do es not. H is wildest s urmise s uggests the p roduction of a brand new moon each day, each one emitting a different a mount of l ight. N ow Luc retius t urns his attention to solar and lunar eclipses, and this time t he possibilities he e ntertains i nclude t he right ones in both instances.

Next L ucretius at tempts to ac count f or t he emergence o fl ife o n a hitherto lifeless e arth. Grasses came first, he says. Then came trees, and then b irds an d a nimals, a rising i n d ifferent unspecified places by means of unspecified processes. H e g uesses w rong wh en h e o pines t hat animals could n ot have a risen out of s alt pools but right when he asserts that they could not have fallen from the sky. While much uncertainty surrounds his account of the origins of animal life, of one thing Lucretius is certain. All the metamorphoses that mythology reports in its discussion of centaurs and other monsters made from the combination of two or more species such as S cylla, who is a girl- dogsfish creature, never existed and could not exist.

Likewise, there are no rivers of gold, flowers that bloom with jewels, and other such wonders.

On the other hand, he de clares, early men were hardier, lived longer, and lived naked in unheated caves. They were more likely than in Lucretius's day to be eaten by wild beasts, but less likely to die in b attle a gainst other p eople. Then c ivilization began to grow. Dwellings and clothing appeared. Social c ontracts were informally o r formally drawn t hat let n eighbors dw ell i n p eace a nd mutual amity.

Lucretius next speculates on the origin of language, which he believes arose from a codification of the sorts of sounds that animals and birds use to express their emotional states. He locates the origin of fire in lightning or in the accidental rubbing together of dry sticks or branches—dispelling the myth of the Titan Prometheus (see *Promet he us Bound*). Pe ople le arned to c ook f rom w atching things soften in the heat of the sun.

Next, h ighly c apable m en b egan to o rganize societies, and kings built cities to house and protect groups of neighbors and their animals and to store their crops. They also established systems of redistribution of go ods a mong t heir sub jects. Then gold was discovered, and the desire to accumulate wealth followed. This in turn led to d issension, warfare, assassination, and crime. People responded with laws and magistrates for the general well-being.

Next, says Lucretius, men created gods, fabricated idols, and attributed human characteristics to their creations. They imagined them to be both alive and immortal. Then, however, people attributed t o go ds their o wn p redisposition to ward wrathfulness, and th ereafter r eligion became a bane to t he human race. True piety that ho nors real go ds, says Lucretius, a rises from s urveying all things "with mind at peace" and from understanding and accepting the natural processes of the u niverse. N onetheless, he u nderstands ho w natural disaster and bad c onscience both terrorize h uman b eings a nd le ad t hem to a ttempt to curry f avor w ith the g ods th rough p rayer an d sacrifice.

Continuing his natural history of the development of h uman s ociety i n t he w orld, Luc retius

suggests that people accidentally discovered metals a nd t heir p roperties o f b eing f orged a nd shaped i nto u seful a nd de corative ob jects. H e speculates t hat bron ze a nd c opper were more valuable than gold, and then iron replaced bronze. Animals were domesticated, and people discovered which ones could and could not be tamed. Lucretius imagines in detail a s cenario in which lions and boars throw friend and foe a like into confusion a s t hey f righten horses a nd d raught oxen a nd i ndiscriminately a ttack a nyone. H e talks of the development of weaving and the art of cultivating fields. Both clothing and diet improved as a result of such innovations. Lucretius i magines that singing developed from human i mitation of the birds, and then that people learned to make and play various musical instruments.

The scenarios that Lucretius ascribes to human history in troduce a n ovel c oncept, t he i dea o f technological p rogress. The Gr eek a nd Ro man religious view of things imagined that an idyllic golden age came first and that it was followed by ages of silver, bronze, and iron—each one worse than th ose p rior. L ucretius s ees th ings g etting better and better.

Book 6

As Book 6 begins, Lucretius credits Athens with introducing and disseminating the cultivation of grain crops and with promulgating laws for governing t he s tate. H e t hen returns t o hi s praise of E picurus as the g reat d iscoverer o f truth. His philosophy encouraged people to live modestly i n a mity with their n eighbors a nd freed his followers from the burden of religious superstition. Errors such as attributing natural disasters to the will of the gods keep people in a state of continual fear, says Lucretius. Moreover, such su perstitious cla ptrap de grades the t rue gods. Fortunately, in their omnipotence, the true gods are not susceptible to insult, and they are neither w rathful nor ve ngeful. H uman bei ngs should therefore approach their altars with their minds at peace.

Many of t he p henomena t hat ha ve c aused human beings to ascribe vindictiveness and wrath to d ivine tem peraments a rise f rom p henomena observable i n t he s ky. Thunder an d l ightening, windstorms and hurricanes occur, and since people do not understand their causes, they attribute them to divine wrath. Lucretius therefore undertakes to offer natural explanations for them.

Thunder results, he says, from clouds' clashing together or when a w ind shatters a c loud like a popped balloon. Lightning has the same source if the c lashing clouds co ntain t he "seeds" of fire. The c louds' c ollision s trikes o ut l ightning a s a flint s trikes spa rks f rom m etal. W hen a c loud bursts, the same phenomenon results.

Lucretius also considers the source and effects of thunderbolts—phenomena that the religion of the Greeks and Romans ascribed to the wrath of Zeus and h is Roman counterpart, J upiter. Thunderbolts emanate from thick and piled-up clouds, which a re e specially full of the seeds of fire. The winds whirling inside the clouds collect the seeds until the thunderbolt is formed and then d rive it forth. After further speculations of this sort, Lucretius firmly as serts t hat thunderbolts a re u tterly natural, not supernatural, phenomena. He bolsters his a rgument by asking why, if the gods cast the thunderbolts, they do not strike the guilty.

The p oet c ontinues b y d iscussing t he s ource and n ature o f w aterspouts, r ainfall, r ainbows, snow, wind, hail, frost, and ice. He also offers natural explanations for earthquakes, which he attributes t o s ubterranean wa tercourses a nd w inds. Lucretius do es n ot n eglect v olcanic er uptions, attributing t hem to s uperheated sub terranean wind th at e ventually m elts basalt a nd blows it together with unmelted rock i nto the air. When enough matter has been ejected, the sea rushes in to quen ch the fires within, a nd the c ycle b egins anew.

Lucretius next offers suggestions to e xplain the an nual flooding of t he N ile, a nd o ne o f them—rainfall n ear th e r iver's source—has since proved correct. He also considers places, such a s t he r egion of t he A vernan l ake n ear Cumae outside Naples, where the concentration of i nvisible volc anic ga ses st ill p roves f atal to birds. Though t he s uperstitious c onsider s uch places en trances to t he u nderworld a nd t he realm of the spirits of the dead, Lucretius asserts that the phenomenon is utterly natural, pointing out that many natural elements prove poisonous to life. In support of that argument, he provides many examples.

After discussing possible reasons for daily variations in t he t emperatures of c ertain b odies of water, Lucretius turns h is attention to t he nature of the magnet, whose force he attributes to invisible particles—an explanation not really too far off the mark. When he t ries to e xplain the details of magnetic attraction, h owever, L ucretius is forced to exercise excessive and not very convincing ingenuity. He d oes r eport that the force of m agnets can sometimes attract and sometimes repel.

Addressing t he causes of d iseases, L ucretius considers the seeds of illness to be airborne and capable of s ettling on w ater and o n c rops. H e gives a graphic description of a pl ague in Egypt that appears to have been smallpox. It rivals the famous description that Giovanni Boccaccio gave in his Decameron of the bubonic plague at Florence during the 14th century. According to Lucretius, so devastating was the plague he de scribes that ordinary arrangements for dealing with the dead were rendered useless. Temples and sanctuaries were so overwhelmed with corpses that, even in devout Egypt, both the power of the gods and th eir w orship were d isregarded. Wi th t his somber d escription, Lucretius en ds De Re rum Natura.

Dialogues of the Dead Lucian of

Samosata (ca. 150 C.E.) In his *Dialogues of the Dead*, Luci an of Samosata's c haracteristic m ethod s trips t he shade s o f people i n t he u nderworld o f a ll t he p retences, wealth, and differences i n s tatus and reputation that distinguished one person from another. Even differences in physical beauty and intelligence are gone when nothing survives but skull and bones and mindlessness.

In the 1 3th d ialogue of the c ollection, the shade of Di ogenes the Cy nic (see c ynicism) encounters that of Alexander the Great. The two had been acquainted in life. Diogenes expresses some s urprise that Al exander has d ied l ike everyone else, since, as a matter of policy—as he elsewhere tel ls h is fa ther, Philip of Macedon— Alexander had encouraged the story that he was the son of the Egyptian god Ammon, a counterpart of Zeus.

It a ppears t hat A lexander h imself had ha lf believed t he st ories o f d ivine pa ternity, b ut h is death has convinced him that all such rubbish is "moonshine." He tells Diogenes, however, that his corpse is currently lying in Babylon but will soon be m oved t o E gypt, where h e w ill be co unted among the gods.

Diogenes acc uses A lexander of s till n ursing vain h opes of d eveloping into an O siris or an Anubis—that is, into Eg yptian deities who were resurrected f rom the d ead. The p hiloso pher reminds A lexander of t he r iches a nd v eneration that were his while he lived, and Alexander weeps. Diogenes ex presses s urprise t hat A lexander's teacher, A r istot l e, d id n ot be tter i nstruct t he king c oncerning t he i mpermanence of f ortune's favors. Alexander proclaims Aristotle "the craftiest of all flatterers" and an "imposter."

Diogenes prescribes deep and repeated drinks of the waters of forgetfulness from the river Lethe to r elieve A lexander's m elancholy n ostalgia f or the trappings of his earthly life and to protect him from those in the underworld that still bear him grudges.

In the dialogue that precedes the one above, two famous generals d ispute over t he o rder o f pre ædence t hat e ach sh ould b e a ccorded i n Hades. On e is, a gain, A lexander; t he s econd is Hannibal, the Carthaginian general who threatened Rome. Also participating in the discussion are t he Ro man g eneral, S cipio A fricanus, w ho eventually defeated Ha nnibal, a nd o ne o f t he judges of Hades, Minos. Hannibal is able to participate in t he debate si nce, h e says, h e h as improved his time in the underworld by learning Greek. The two r ivals p resent their cases, citing their a ccomplishments. As Mi nos is about to judge, Scipio interrupts, presents his credentials, and ranks A lexander first, h imself second, a nd Hannibal third. The e quanimity with which a judge of t he de ad i n Hade s c oncurs i n S cipio's ranking u nderscores it s u tter m eaninglessness under the circumstances.

Even the highly respected Socr at es occasionally suffers the edge of Lucian's wit in the Dialogues o f t he Dead . I n t he 2 1st d ialogue, t he three-headed gu ard d og o f Hade s, C erberus, expresses t he v iew t hat the e quanimity wi th which S ocrates faced de ath was merely a sha m act put on for effect. Once the philos o phe found himself a mong t he de ad, h is dem eanor w as entirely different as he wailed, wept, and gnashed his t eeth. In t he 2 0th d ialogue, t he shade o f Socrates encounters that of the Cynic Menippusa favorite character of Lucian's and one who figures prominently in many of his works. Socrates inquires what the Athenians think of him. Menippus replies that it is Socrates' good fortune to be considered remarkable and omniscient-though in tru th M enippus t hinks t hat S ocrates k new absolutely n othing. S ocrates re sponds t hat he kept telling the Athenians precisely that, but that they thought he intended his disclaimer of knowledge as irony.

The *Dialogues of the Dead* make abundantly clear t hat Lucian's skep ticism allows no exceptions to death, the common fate of all humanity.

Dialogues of the Gods Lucian of

Samosata (ca. 150 c.e.)

In choosing the dialogue as the vehicle for his sat ir e, Lucian of Samosat a selected a particularly effective form. He took the dialogue, which Pl at o had developed as a means of enlivening philosophical discourse, and interwove within it the spirit of comedic discourse fr om the s tage of t he Gr eek New Comedy (see comedy in Greece and Rome). This combination resulted in a flexible sa tiric instrument with a broad register of effect. His dialogues c an e licit a n a mused a nd s ympathetic smile—as is the case with many of his Dialogues of the Gods. Lucian's dialogues can also engage both the intellect and a reader's sense of irony, as they do in "Zeus the Tragedian." B eyond t hat, s ome of Lucian's other dialogues can.ne in on moral issues in ways that evoke a deeply sardonic response from thoughtful readers, as is the case with the satirist's "Voyage to the Underworld."

In Dialogues of the Gods, Lucian elaborates on stories f rom m ythology, s etting t he Ol ympian gods of the Greeks in circumstances that deflate their awe- inspiring qualities and expose their alltoo-human f oibles. I n p icturing t hem, Luc ian draws on Homer and Hesiod for their attributes and attitudes, and for their appearance, he draws on on famous statues of them that were fabricated 500-600 years before h is time. For example, i n the s eventh d ialogue of t he c ollection, Luc ian uses satire to imagine a conversation that occurs between the blacksmith of the gods, Hephaestus, and the sun god, Apollo, on the occasion of the birth of H ermes, son of M aia. H ermes would become both the messenger of the gods and the patron deity of thieves.

As Hephaestus exclaims like a bachelor uncle over t he s weet ba by, A pollo t akes a n a ltogether more jaundiced view of the infant. Hardly able to stand, bab y H ermes h as a lready s tolen t he s ea

god Poseidon's trident and the sword of the war god Ares. Hephaestus remains unconvinced until he n otices t hat h is o wn bl acksmith's to ngs a re missing. Hermes, moreover, has thrown the god of l ove, E ros, i n a w restling ma tch, a nd ha s invented a tortoiseshell lyre.

With w ings on h is f eet, ba by H ermes c an transport himself anywhere in a twinkling, and his mother says he will not spend a night at home but instead goes off to herd the dead around the underworld. Convinced at last, Hephaestus sets about finding his tongs in the infant's crib. One is a mused at the surprising i neptitude of th e Olympians and at the enterprising energy of the baby god.

We find much more elaborate satire in "Zeus the Tragedian," or, as the translator Lionel Casson has rendered it, "Zeus the Opera Star." Here the nub of the piece a rises from the conflicting viewpoints of the Stoic and the Epicurean philosophers concerning the authority or even the existence of g ods in the u niverse. The s tyle of the piece arises in part from Lucian's tongue- in- cheek parody of the conventions of Greek drama, with i ts s ometimes ove rblown rhe toric a nd declamatory bluster combined with such in consequential and homey activity as talking to oneself and pacing back and forth. In part, too, the style derives from Lucian's picturing the gods as famous statues representing them and from h is portraying them as living on the smoke from human beings' burnt offerings.

As the d ialogue b egins, Z eus a nd A thena exchange high-flown, worried rhetoric until Zeus's wife Hera reproves them for posturing when she knows that Z eus is m erely in l ove a gain. For once, ho wever, s he i s w rong. Z eus is w orried that h uman b eings may s top w orshipping t he gods. That f ateful d ecision h angs on t he out come of a n ongoing d ebate b etween the Sto ic phi los o phe Timocles and D amis the Epicurean. Hera admits the justification for the tragic style of speech.

Zeus calls for a general meeting of divinities. Hermes calls them together. H is first attempt is regarded a s to o simple, given the gravity of the situation. He tries again, this time in the Homeric style, though he has to hum through some of the requisite metrical feet.

The gods—or r ather t heir g old, si lver, iv ory, bronze, and stone images—gather and take their places ac cording to t he v alue of t heir materials. Apollo, w ho c omes i n h is re presentation a s t he Colossus of R hodes, presents a problem. The statue is too large for the auditorium, so Zeus advises him to just stoop and listen. The hall is crowded with G reek, R oman, C eltic, E gyptian, S cythian, Persian, a nd Thracian d eities. Since t hey do n't share a c ommon language, Zeus sig nals with h is hand for silence.

After o utlining t he p roblem, Z eus c alls f or responses f rom the assembly. The first to r ise is Momus, w ho s ays that he cannot blame men, since the only concern that the gods have for them is whether or not they are offering the burnt sacrifices whose aromas sustain the gods. Zeus pronounces Momus a malcontent and cedes the floor to the sea god, Poseidon. Po seidon r ecommends striking Damis with a thunderbolt. Zeus says that such a solution rests in the hands of the fates and that the gods lack the power.

Apollo h as a b etter i dea. Though t he Sto ic Timocles is very bright, he makes poor speeches. He needs a mouthpiece, someone he can whisper to w ho w ill t hen p resent h is i deas c learly a nd forcefully. Momus finds that idea ludicrous.

Apollo responds with one of his famously perplexing or acular statements that M omus i nterprets: Apollo is a quack and the assembly of gods brainless crickets, mules, and asses for believing him. H ermes n ow arrives to let the gods k now that the debate is resuming. Zeus commands the hours to rol l back the clouds and open he aven's gates so the gods can listen in.

Damis i nsists that chance, not the gods, is in charge of everything. Timocles calls on the crowd to stone him, and Damis asks why the gods do not act for themselves if h is o pinion is so offensive. He suggests that if the gods were real, they would visit a horrible death on a sinner like Timocles.

Timocles a ppeals to t he orderly processes of the u niverse, a nd Da mis ad mits t he order b ut

rejects t he n ecessity f or d ivine i ntervention to achieve i t. T imocles app eals to t he a uthority o f Homer. Damis admits his poetic superiority but rejects his credentials as an expert on the matter under debate. He then points out the skepticism of Eu r ipides, to whose a uthority Ti mocles next appeals. Finally Damis points to the multitude of gods, o bjects, a nimals, n ature s pirits, s kulls, cups, and bowls that various people worship.

Beaten on t hat s core, Ti mocles turns to oracles, a nd T imocles dem onstrates t heir doublesided na ture. W hatever hap pens, t he o racle c an be construed to have predicted it.

Among the gods, panic at the pending proof of their i nconsequentiality becomes w idespread, and Timocles begins grasping at straws. The satire ends with Timocles reduced to a l aughingstock and the gods themselves convinced of their insignificance.

Dialogues of the Sea Gods Lucian of

Samosata (ca. 150 c.E.)

In his *Dialogues of the S ea G ods*, Lucian of Samosata o ften i nvigorates m yths t hat were already a ncient i n h is time with n ew de tails o r with new points of view that ancient poets such as Homer, H esiod, and o thers had n eglected to supply. Though the s at ir e of these dialogues is sometimes le ss p ointed a nd le ss d iverting t han that in *Dialog ues of t he Gods*, Lucian's readers nonetheless b enefited f rom t he a mplification of familiar stories.

Such a mplification a ppears in Lucian's treatment of the familiar encounter of Homer's Odysseus w ith the C yclops P olyphemus, w hom Odysseus blinds (see *The Odyssey*). I n H omer, Polyphemus prays to his father, the sea god Poseidon, t hat O dysseus b e p unished, a nd P oseidon becomes Od ysseus's i mplacable e nemy a s a result. Luc ian e xpands t he C yclops's p rayer f or revenge into a conversation between Polyphemus and Poseidon.

In L ucian's v ersion, P olyphemus co mplains like a whimpering child to his father about Odysseus's (who at first s aid h is na me w as N oman) getting t he C yclops d runk a nd bl inding h im. After all, Polyphemus had not done anything but kill and eat a few of Odysseus's crew.

Poseidon's responses to his son's complaints, though sympathetic, also reveal that he knows that Polyphemus is not very bright. When Polyphemus re ports that O dysseus finally taunted by s aying t hat "Not e ven Pap a c an put t his right," t he s ea g od r eplies t hat, w hile c uring blindness i s no t w ithin h is p ower, t hose w ho sail the seas a re. Od ysseus " is not home ye t," Poseidon concludes.

Polyphemus figures p rominently i n a nother dialogue featuring minor deities. Famous in the annals o f c lassical an d postclassical l iterature well into the Renaissance is the unrequited passion t hat one-eyed P olyphemus f elt f or t he s ea nymph G alatea. The s tory ha s b een tol d a nd retold many times, but Lucian's take on the relationship seems unique. He imagines that Galatea has accepted Polyphemus as a lo ver and defends her choice when her sister Doris upbraids her.

Against Doris's complaints that Polyphemus is ug ly, one-eyed, wild, and shaggy, Galatea replies that, though she does not love Polyphemus, he is a god's son, after all. She also notes that wildness and shagginess are not altogether unbecoming in a man, and that he sees as well with his one eye—attractively placed in the middle of his forehead—as most people do with two. Galatea suggests that Doris is just jealous.

At this point, the sisters' claws start showing in earnest. Doris says that Polyphemus, who is a goatherd, admires Galatea only because her white skin r eminds h im o f m ilk a nd c heese. G alatea

206 diatribes

responds t hat s he, at le ast, h as a lo ver w hereas her sisters do not. Moreover, Polyphemus is musically talented.

Doris then plays music critic, comparing Polyphemus's singing to the braying of an ass. She also mocks h is homemade, tuneless instrument made from a stag's skull, and says that even Echo would not re peat the s ong. M oreover, P olyphemus ha s foolishly given Galatea a bear cub as a pet.

Galatea ag ain r eminds her si ster o f Do ris's loneliness. Doris closes the contest by suggesting the worst thing she could wish her sister would be that she fall in love with her lover.

A final example to p rovide the flavor of *Dialogues o f the S eagods* reveals Luc ian's f amous skepticism. In Homer's *Odyssey*, O dysseus m ust hold down the sea god P roteus, who is a shape-shifter, u ntil P roteus ha s g one t hrough a ll t he transformations of which he is capable—transformations that include changing from h is original form a s a seal to a l ion to w ater to fire. O nly when h e has ex hausted h is en tire bag o f t ricks does P roteus yield to O dysseus's demand that he foretell the f uture a nd t hat he reveal the fate of Menelaus, the king of Sparta.

In Lucian's fourth dialogue in the collection, the speakers a re P roteus a nd M enelaus. A s t he encounter b egins, M enelaus f eels p uzzled. H e can u nderstand, he s ays, P roteus, a s a s eagod, being a ble to c hange into w ater. H e c an e ven accept the idea of Proteus's shifting into a tree or a lion. The god's capacity to become fire, however, exceeds the Spartan's capacity for belief.

Proteus suggests that he can become fire again, and Menelaus can try to confirm the evidence of his e yes by testing whether or n ot h is flesh will burn in Proteus's fire. Menelaus rejects that course of action as too rash an experiment. Nonetheless, despite the earlier visual evidence, he still doubts the capacity of a single sea god to b ecome *both* fire and water.

Didache: The Teaching of the Twelve

Apostles Anonymous (ca. late first–early second century c.E.)

The ma nuscript c ontaining t he Didache (MS Hierosolymianus, preserved i n t he L ibrary o f the Holy Sepulcher in Constantinople/Istanbul) is a lso a mong the source documents for t hree other s ections of The A postolic Fathers of the Chr istian Church: the First L etter of Clement to t he Corint hians, Se cond Let ter of Clement tot he Corint hians, and Epistl e of Barnabas. Nonetheless, the Didache's association with the writings contained in The Apostolic F athers remained u ndiscovered a nd unrecognized until 1873, when a Greek scholar, Philotheos Bryennios, recognized the text as a very early Christian document-one of the earliest n ow i ncluded a mong t he w ritings of t he Apostolic Fathers. As the scholar of early Christianity, B art D. E hrman, s uggests, th is m eans that the Didache antedates some of the books of t he Ne w T est a ment. More over, E hrman points o ut, the work likely achieved nearcanonical status among early Christians before disappearing from the record sometime following the fourth century.

The *Didache*'s t wo t itles a ttest t o t he i mportance of the book's contents for early churches. The first translates as above: "The Teaching of the Twelve A postles." The second title is more specific: "The Teaching of the Lord through the Twelve Apostles to t he Gentiles." I ts contents I ead Ehrman to think that the work is the earliest surviving manual for churches.

The work begins by contrasting two opposing paths t hat a p erson m ight f ollow t hrough l ife. One is the path of life, the other of death. Those who would tread the first must follow God's commandments, pa rticularly those e nunciated by Jesus to love God, to love one's neighbor as oneself, and to avoid treating others as one would not wish to be treated. It also repeats without attribution J esus' in junctions in t he S ermon on t he Mount.

The s econd c hapter of t he w ork r epeats t he prohibitions of the Ten Commandments together with some other specific injunctions against pederasty, magic, and abortion, and against duplicity of word a nd thought, s pitefulness, a nd p ride. It requires parents to teach children the reverential fear of G od. One must hate hypocrisy. It also instructs the faithful to c onfess s o t hat t hey do not c ome t o pr ayer w ith " an e vil conscience." This is the path of life.

The pa th o f de ath i ncludes p ursuing e very manner of sinfulness prohibited in the Ten Commandments. B eyond t hat, t hose w ho t read death's path include "corrupters of what God has fashioned wh o t urn t heir backs on t he n eedy," those who "oppress the afflicted," and those who "support the wealthy." It also s eems to i nvolve eating f oodstuffs t hat ha ve been sa crificed t o false gods.

Beyond discriminating between the two paths, the *Didache* is the earliest surviving ma nual describing t he p roper pr ocedures for b aptism. Running w ater i s p referred, b ut a ny wa ter w ill do. A dult recipients of the sacrament of baptism should f ast f or a d ay or t wo i n adv ance of t he ceremony.

The eighth section advises fasting on Wednesday and Friday but not on Monday and Thursday, which a re t he d ays t he "hypocrites" f ast. This section also mandates praying the Lord's Prayer three times each day. Similarly, the ninth section prescribes t he form of the Eucharist a nd limits communion to the baptized.

The faithful are next advised to welcome those who teach the truth but to turn away from others. It also suggests that itinerant apostles should be welcomed but should be turned away if they stay as long as three days. Itinerant apostles who are unwilling to work should be shunned. Prophets and the poor, however, deserve community support. Bef ore cel ebrating t he Euc harist o n t he Lord's D ay, all quarrels among members of the community must be settled. Bishops and deacons are to be elected by the congregations. Finally, the *Didache* describes the last days of the world: The sky will split or stretch, a trumpet will sound, and the saved will be resurrected. In essence, the document gives to early churches and Christians all they need to lead holy and responsible lives. Interestingly, at this early moment, no mention is made of a church hierarchy that parallels the Roman imperium. Neither is any mention made of a C hristian na tion i n t his world. That distinction is reserved for believers in the world to come.

didactic poetry

In the ancient Greek and Roman worlds, didactic poetry—that wh ich u ndertakes to t each le ssons of some sort—was understood to include poems of all sorts. The classical object of poetry was both to please and to instruct. Thus, for example, one can regard Homer as a didactic poet since from his p ages o ne c and raw le ssons c oncerning t he consequences of overweening pride, learn the history of the Trojan War, learn something of seamanship, and le arn of t he f oibles of t he g ods. Homer's principal object, however, was probably to entertain his listeners.

Among b oth G reeks an d Ro mans, ho wever, there were many w riters wh o i ntentionally emphasized the instructive element of their verse. Hesiod i n his *Works a nd D ays* teaches a n approach to c onflict resolution, provides a picture of an ancient farming community that continues to interest historical anthropologists, and instructs his readers in the proper seasons for planting a nd ha rvesting. F rom H esiod's T heogo ny a reader learns the genealogy of the Greek gods.

In Rome, Virgil and Lucre tius both undertook to instruct the readers of their verse in ethics and morality as well as in, in Virgil's case, rural economy. I n four books of Dactylic H exameter verse (see q uant itat ive verse), Virgil follows Hesiod's e xample. Virgil's *Georgics* teach p redicting the weather, planting crops, cultivating grapes and olives, animal husbandry and the care of cattle, and beekeeping. In the six books of hexameters that constitute h is *De R erum Nat ur a*, Lucretius instructs his readers in the philosophical p osition of E picur us a nd a bout the o perations of the n atural world. He teaches a bout a world t hat op erates w ithout the intervention of gods.

While one could give many examples, suffice it to say that didactic poetry in the ancient world, and f or t hat matter in a ll per iods, emphasizes instructing its r eaders while providing t hem a s well with the pleasure of reading verse.

didactic satires (silloi, lampoons)

Only slender fragments remain to illustrate this distinctively Greek sort of ancient satiric verse, and the names of only two writers are associated with it: Xenophanes of Colophon, of whose work not hing re mains, and T imon of P hlius, who was both a skeptic philosopher and a playwright. The su rviving f ragments of l ampoons are his work.

As the commentators describe the genre, *silloi* satirized i gnorant p ersons w ho pre tended to knowledge or capacities that they did not p ossess. Such poems taught by modeling and poking fun at behavior to be avoided. It seems that the author of such verse would select an appropriate section f rom a distinguished p oet a nd apply i t laughably to the person being satirized. Timon of Phlius (fl. ca. 320–230 b.c.e.) seems to have been highly accomplished at doing this, and his work reportedly at tracted favorable notice from early commentators.

Born in C orinth, Dinarchus m oved a s a youth to Athens. Though we k now t he t itles of 87 or ations purporting to be his, Dinarchus really authored perhaps a round 60 of t hem, and of t hese only three survive. On the strength of these, historians of oratory judge h is work to have been of inferior q uality. Dio Cocceianus Chrysostomus

(ca. 150–230 C.E.) *Greek prose writer* The "Chrysostomus" following Dio Cocceianus's name is a nickname meaning "the golden- tongued." This soubriquet arose from the Stoic philos o phe and rhetorician's reputation for flowery and effective writing and speaking.

Bithynia, Dio traveled to Rome, where he enjoyed the favor of the emperor Vespasian. When Domitian became emperor, however, Dio's open criticism led to his exile from Rome and also to his banishment f rom t he co mforts of h is e xtensive property in Bithynia. Reduced to extreme poverty, he journeyed from place to place, earning a bare living by whatever means came to hand as he wandered far and wide in the ancient world. We know h e journeyed a s far a way from Rome a s Borysthenes, to the north of the Black S ea and near modern Odessa in Russia. He also lived for a while in Thrace, so utheast of the C arpathian Mountains along the lower Danube River. There he became interested in the Getae, the technologically primitive people among whom he resided, and wrote their history.

Following D omitian's d eath i n 96 c.e., D io's banishment ended. The emperor Nerva welcomed him back to Rome, and after Nerva's short reign, Dio bec ame cl ose f riends w ith h is suc cessor, Trajan.

As a thinker, Dio was at first a sophist, rejecting the views of all philosophical schools. By the time he returned from exile, however, he had come to believe in a composite philosophy that merged Platonism, St oic ism, a nd C ynicism. Ab ove a ll those schools, however, he had come to value eloquence r ather than a rgument a s th e v ehicle through w hich p eople m ight ac hieve m oral improvement. He took up on himself, therefore, the character of an exhortatory moralist, preaching the good life to all who would listen and doing his best to connect moral conduct with nationalism a nd t he g reat ac hievements o f t he Gr eeks throughout h istory. H is m odel o f c onnecting patriotic a nd m oralistic fervor has been p opular with many preachers and politicians ever since.

About 80 of Dio's Greek essays and speeches on a variety of topics survive, though a pair of those once ascribed to him has been reassigned to his student, Favorinus. Dio's principal modern editor and English translator, J. W. Cohoon, classifies Di o's s urviving w orks a sf ollows: of a literary character—both fiction and literary criticism. To the first category—sophistic—belong such tongue-in-cheek e ssays a s "Eu logy of Ha ir" (as opposed to baldness); "Eulogy of a Parrot"; and "In P raise of a Gna t." A lso in this category we place D io's 1 1th d iscourse i n w hich he u ndertakes t o prove by s ophistic argument that th e Greeks never captured Troy. This instance clearly illustrates, as Dio i ntended it should, the i nappropriateness of t rying to r esolve que stions o f empirical fact, such as whether the earth is flat or round, by debate, syllogism, and appeals to Scrip-

tural authority. In the category of political works, one finds, for instance, at least seven substantial discourses on the subject of kingship and several on the benefits of peace between warring factions. Portions of other discourses that exhort the citizens of various places to moral probity also discuss the political dimensions o f moral a ction. " On L aw" (discourse 75) and "On Freedom" (discourse 80) fall into this category.

Also exemplifying Dio's moral works, a reader finds essays such as the 69th discourse, "On Virtue." In discourses 14 and 15, Dio considers slavery and freedom. The 23rd asserts as its title "The Wise Man is Happy." Discourse 17 treats the topic of c ovetousness, a nd n umber 25 d iscusses "The Guiding Spirit." Dio's 12th discourse, also called his "Olympic Discourse" is subtitled "On Ma n's First Conception of G od." Early Christian commentators s ometimes p erceived c onnections between Di o's m oral p rogram a nd t hat o f t he New Test a ment.

In at least one instance, early readers discovered a s torytelling b ent i n D io's w ork, a nd t he ancients split his seventh discourse, the "Euboean Discourse," into two parts. Having done so, they published t he first pa rt a s a pa storal ro mance, "The H unters of Eub oea," a nd i t ha s e ver si nce continued in its separate status as a representative of that genre.

210 Diodorus Siculus

Under the heading of literary and artistic criticism, we also find in Dio's 52nd discourse a comparison of three plays on the same subject: the *Phil octe tes* of A eschylus, Sophocles, a nd Euripides. As only Sophocles' play has survived, this essay is valuable for what we learn of the two lost plays as well as for its insights when comparing the playwrights' work.

Dio's reputation may have suffered because of the loss of works of h is own. H is *History of the Getae* has not come down to us, nor has another historical work, "On Alexander's Virtues." Lost as well are some philosophical writings, including a consideration of "Whether the Universe is Perishable," a "D efense of H omer" add ressed to P lato, and several other works as well.

Diodorus Siculus (Diodorus of Agyrium) (fl. ca. 40 B.C.E.) *Greek historian*

The author of an enormous (40 books) assemblage of historical information in the Greek language, Diodorus S iculus a nnounced h is i ntention to present in his work, entitled *Library*, a synopsis of all kn own history. Though he failed to ac hieve that object, he gave very full accounts of his native island, S icily, a nd o f a ncient Gr eece u p u ntil around the mid-third century. Also included in the early books are important and useful discussions of Egypt, India, and Abdera near the Hellespont. Based on internal evidence, it seems that the c omposition of t his e xtended c ompendium required about 30 years.

From a round t he t ime of Rome's c onfrontation with Carthage d uring the first P unic W ar (ended 2 41 b .c.e.), D iodorus f ound m ore a nd more reliable source material about Roman history a nd s hifted h is p rincipal f ocus t hereafter to Rome. He attempted, n ot a lways successfully, to synchronize ev ents i n the R oman a rena w ith those in Greece. He carried his account down to the year 60 b.c.e.

Of the 40 books (manuscript scrolls), the contents of 15 su rvive i ntact. These i nclude B ooks 1-5 and 11-20. Fragments of some of the others also exist. In terms of length, the surviving portions of Diodorus's Library of history exceeds any other a ncient h istorian's w ork. The s tandard Greek-English e dition r uns to 1 1 v olumes. The first book deals with Egypt and its rulers and ethnography. The second book details the history of Assyria a nd f urnishes de scriptions o fI ndia, Scythia, A rabia, a nd t he k nown i slands of t he ocean. In Book 3, Diodorus turns his attention to Ethiopia, A frican A mazons, A tlantis a nd i ts inhabitants, and t he o rigins of t he g ods. The fourth book concerns itself with the mythical history o f Gr eece a nd i ncludes d iscussions o f t he principal Greek deities, of Theseus of Athens, and of Aeschylus's The Sev en against Thebes. Book 5 looks at p eoples in t he w estern M editerranean and at the ethnography of the islands of Crete and Rhodes.

The fragmentary remains of the sixth through the 10th books indicate that in them Diodorus traced events from the time of the Trojan War down to 4 80 b.c.e. The sixth book is e specially interesting a s it contains most of our record of *Sacred Scriptures*, a utopian novel by Euhemerus. Although the novel describes a fictive voyage to an island in the Indian Ocean, Diodorus apparently thought the work ar eport of a nac tual expedition.

In the 11th through the 20th books Diodorus examines Greco- Roman events, principally from 480 through 301 b.c.e. The fragmentary remains that survive of the 21st through the 40th books indicated that the historian pursued these interests down through 60 b.c.e.

In t he e xtant s ections of t he work, b eyond merely cataloguing events, Diodorus assesses the characters of ch ief figures i n h is n arrative. H e also r eveals h is m oral b ias t hat hi story s hould instruct people in how to live virtuously and displays his belief in a "great-man theory" of history. As a historiographer, however, D iodorus s trikes some of his critics as not very discriminating in weighing the authority or reliability of his sources. His translator and editor, C. H. Oldfather, dissents from t hat view, s uggesting that D iodorus chose his sources carefully but picked a confusing method of pre sen to ton. A good deal of scholarly debate c ontinues a bout t he i dentity of s ome of those sources. Translations of the most interesting s ections of D Diodorus's w ork continue t o appear regularly as independent volumes.

Diogenes Laertius (fl. ca. 200–250 c.E.)

Greek prose writer

Little is K nown of D iogenes L aertius's p ersonal life. O ne ac count su ggests t hat t he form of h is name is bac kwards. A nother has it t hat he w as born at the town of Laerte in the Roman province of Lycia in A sia Minor and later became a f oreign resident in Athens. Though the story may be apocryphal, at some p oint in h is A thenian residency, Di ogenes ap pears to ha ve lac ked t he means to pay the tax imposed on nonnative residents. The penalty for nonpayment required that the delinquent p erson be sold into slavery. The historian J. J. Eschenburg reports that this actually hap pened to Di ogenes b ut t hat t he deb t was redeemed and he regained his freedom.

Diogenes interested himself in the history and development of Greek thought and in the lives of Greek t hinkers. H e c ollected a nd su mmarized biographical m aterial a nd e xamples i llustrating the thought of 82 Greek phi los ophers and statesmen from the time of the early Greek philoso pher Thales of Miletus (b. ca. 624 b.c. e.) through that of Diogenes' probable contemporary, the phi los o pher Epic ur us (d. 270 b.c. e.).

Dionysius of Halicarnassus (fl. first

century B.C.E.) Greek historian

In 30 b.c.e., the literary critic and historian Dionysius of H alicarnassus migrated from his G recian h omeland to jo in a small but i nfluential colony of Greek intellectuals living in Rome under its first em peror, A ugust us C aesar. The i nfluence t hat D ionysius a nd h is Gr ecian c omrades enjoyed s temmed from the h igh r egard of t heir Roman c onquerors f or t he l anguage, l iterature,

and intellectual accomplishments of the Greeks. Well-bred young Roman boys devoted time to the mastery of the Greek language—often before undertaking the formal study of their own.

Dionysius clearly earned a portion of his living b y t eaching, b ut t he b road r ange of t he issues and interests addressed in h is surviving works s uggests t hat he a lso enjoyed g enerous, though an onymous, p atronage t o s upport h is work in the Greek language. His translator, Stephen U sher, s uggests t hat the emperor h imself would have had political reasons for anonymously en couraging D ionysius's w ork. The em peror, perhaps, d id n ot w ant h is p ropagandistic p urposes w ith r espect to t he c onquered Gr eeks to become evident.

However that may be, the breadth of subjects treated by D ionysius is i mpressive. P erhaps the most influential of these is his essay *On Liter ary Compositi on*. I n add ition to adv ising a spiring writers to study the best authors of the past and to discussing how to achieve a unified, pleasing, and sonorous effect, Dionysius generously illustrates his a rgument with e xamples f rom t he past. To this practice we owe the preservation of the one complete surviving ode of Sa ppho, her *Hymn t o Aphrodit e*.

Posterity a lso r emembers D ionysius f or h is Antiquities of Rome. This work of history, written in Greek, may have been penned to help reconcile conquered Greece to Roman mastery. Dionysius add itionally w rote p enetrating a ssessments of the style and practice of several of his predecessors, including the orators Demost henes, Lysia s, Isocr at es, Is æus; a nd t he h istorian T hucydide s. Fragmentary remains exist of his Memoirs of the Attic Authors. Finally, several of his letters, in which he comments on various authors, have come down to us.

Diphilus (ca. 355–ca. 290 B.C.E.) *Greek dramatist*

Though t he pl aywright D iphilus i s re presented only by fragmentary re mains, we k now h im to have been a prolific writer during the period when the Greek New Comedy flourished (see c omedy in Greece and Rome). He is said to have written about 100 comedies; of these, we know the titles of about 60. Diphilus's plays have suffered the fate of the entire Greek New Comedy except for some of the plays of Menander; all others have disappeared. Some of the titles survive, however, and they suggest that D iphilus sometimes d rew on mythical s ources for h is plots, a s w as t he c ase with h is Theseus. He seems also to have been among the playwrights who to ok bawdy license with the biography of Sappho, improbably giving her lovers such as her c ontemporary, the elegist and satirist Archil ochus or the natural phi bs o pher H ipponax, who l ived a c entury l ater t han she did.

We c an a cquire a general sense of the shapes of some of Diphilus's plays by looking at those by the Roman playwrights Terence and Plautus, who modeled some of their still-extant work on plays t hat D iphilus had w ritten. Such plays include P lautus's *Mostellaria* (*The H aunted House*), *Rudens* (*The Rope*), and his *Casina* (*A Funny Thing Happened on th e Way to th e Wedding*). Terence's *Adelphoe* (*The Brothers*) also preserves echoes of Diphilus's work.

Beyond t his, a f ew s craps o f i ambic v erse attributed to Diphilus are quoted in ancient references to h im, t hough t here is s ome c ontroversy over w hether o r n ot t hese a re t he w ork o f t he same Diphilus.

Discourses of the States (Guo yu, Kuo

yü) Anonymous (ca. 350 B.C.E.)

Or ga nized according to the state to which the included material pertains, the *Discourses of the States* contain a good deal of such legendary and mythic material as the "Kung-kung flood myth," in which a god of t hat na me c auses a flood. In its original form, this tale is a version of t he w idespread m yth of the w orld's to tal inundation. In the *Discourses of the States*, however, the f amiliar story—like t hat of Noah becomes less mythic, more humanized, and set in a historical period.

Proverbial material, too, abounds: "To follow goodness is to ascend; to follow evil is to plummet." A necdotes re gularly le ad to el aborate speeches, sometimes boring but more often lively. The speeches offer predictable a dvice: Ru lers who heed good ministers succeed, those who do not fail. States rise and fall on this pattern. Demonstrating this point is the central and often too evident didactic purpose of the work, and in its pages history tends toward moralizing fable.

While the work add resses events in the three states of Qi (Chi), Zhou (Chou), and Lu, matters in a fourth state—Chin—receive the lion's share of the a nonymous author's attention. He follows at le ngth the difficulties of Jin's (Chin's) foolish Duke Xian (Hsien). Among other difficulties that he faces, the duke becomes besotted with an evil mistress, La dy Li, w ho w ishes to d isplace t he duke's heir, Shen-sheng. Eventually Lady Li succeeds in her plot by making it appear that the son had planned to poison his father. Mortified to be thought gu ilty of s uch a n o ffense, Shen-sheng hangs himself. Donatus, Ælius (fl. fourth century c.E.)

Roman prose writer

Literary history remembers Æius Donatus as the teacher of St. Jer ome, as an influential grammarian, and as a commentator on the works of Terence and Virgil. Only fragmentary remains of these commentaries survive, though later editors included portions of Donatus's commentaries in their own work, so that some idea may be gained of the shape of p ortions (but not t he whole) of both commentaries. A section of the commentary on Virgil, for example, survives in the manuscript of Virgil that once b elonged to the Renais sance poet Petrarch.

Because Donatus's grammatical compositions were used as school texts as late as the 12th century h owever, t hey s urvive m ore or less i ntact. One of these was a primary school grammar text entitled *Ars minor* (The lesser treatise). It i ntroduces s tudents to t he eight parts of s peech by means of a series of questions and their answers. Dyskolos (*The Bad Tempered Man, The Man Who Didn't Like People*) Menander (ca. 316 B.C.E.)

For s tudents of a ncient Greek t heater, t he 20th century might be considered the age of Menander, for it was during that century, beginning in 1905, that significant portions of the lost plays of the early Greek comic playwright began to su rface. Then in 1957, an almost complete, 10-page manuscript of Menander's Dyskolos was found in Geneva. The manuscript of the verse play, which as late as 1969 belonged to the classicist Martin Bodner, was ed ited, and a Greek version was printed in 1959. In 1960, W. G. Arnott prepared an English translation of t hat e dition for s tage production. Though Arnott was obliged to supply some missing lines here and there, what he p roduced may be as close to Menander's original as we shall ever come.

As *Dyskolos* opens, t he go d Pan sp eaks t he prologue outside the front door of his shrine. The audience learns of t he people-hater named K nemon, who married a widow with a baby boy. The wife, M yrrhine, s ubsequently b ore Knemon a daughter, b ut K nemon a nd h is w ife n ever g ot along. So when her son, Gorgias, came of age and moved t o his n atural f ather's estate, t he w ife deserted Knemon, leaving him with the daughter. The u nnamed d aughter i s a del ightful y oung woman, and the care she lavishes on Pan's shrine has earned her t he god's favor as well as t hat of the nymphs who share his dwelling with him. Pan tells the audience that he has expressed that favor by put ting a w ealthy young fellow u nder a sp ell and that, e ven a s Pa n sp eaks, t he y oung f ellow and his parasite (a stock comic character named Chaireas) are approaching.

As the first s cene o pens, we learn t hat t he wealthy y oung ma n, S ostratos, has j ust to ld Chaireas that he has fallen in love at his first sight of t he d aughter. S ostratos ad mits t hat he s ent another servant, Pyrrhias, to n egotiate with the girl's father about a wedding.

At that moment, Pyrrhias appears, running for his life a way f rom K nemon, w ho is not ye t o n stage. K nemon has driven Pyrrhias off before he can even s tate h is b usiness. U ttering a ntisocial sentiments, Knemon arrives on stage and expresses his displeasure when he finds Sostratus loitering about his property.

Now the daughter enters with a pitcher, searching for somewhere she can draw water to heat for her f ather's ba th. O verwhelmed b y her b eauty, Sostratus offers his help, and she accepts it. As he gets t he w ater, her ha lf b rother's s ervant, Dao s, who suspects Sostratus of dishonorable intentions, observes him. The act ends with the arrival onstage of a drunken chorus of Pan's votaries, who entertain the audience with their revels.

As act 2 begins, Daos warns the half brother, Gorgias, that Sostratus is lurking about and is up to no good. Just at that moment, Sostratus returns with the intention of speaking to Knemon himself wh en G orgias i nterrupts S ostratus w ith a mystifying lecture about being n either prideful because of h is wealth n or d isdainful of p oor folks. W hen S ostratus a sks G orgias t o e xplain his purpose, Gorgias says that he suspects Sostratus of evil intentions with respect to his half sister a nd, t herefore, o f ma king G orgias h is enemy. In reply, Sostratus declares that his intentions are honorable. He has fallen in love with the girl, is willing to ma rry her without dowry, and promises to cherish her for life. He is perturbed a tG orgias's m isconstruction o fh is intentions.

His opinion of Sostratus totally changed, Gorgias explains the difficulties posed by Knemon's misanthropy. A lthough the old man is wealthy, he has no servants except one old woman, Simike. He on ly s peaks v oluntarily t o her a nd to h is daughter, and he is resolved to marry her only to someone with a d isposition l ike h is o wn. This, Gorgias t hinks, m eans th e g irl w ill ma rry n o one. Nonetheless, if Sostratus is resolved to persist i n h is at tempt, h e m ust first sh ed his fine clothes and pose as a common laborer. This is his only hope of not being driven off as soon as Knemon sees him.

Once clothed as a labo rer in a le ather jerk in, Sostratus warms to h is task. Moreover, he i magines that, having been reared by such a father as Knemon, the girl will be free of the sort of prejudices that an aunt or a nurse might have nourished in her. The young men exit.

After a brief interval, a nother stock character of Greek New Comedy app ears. A c ook na med Sikon takes the stage, dragging a long a she ep he clearly intends to b utcher a s a s acrifice at P an's altar. A nother s tock figure, G etas, the s lave o f Sostratus's f ather Ka llippides, a lso enters be aring a load of pots, pans, rugs, cushions, and mattresses in p reparation for a s acrifice a t P an's temple. The women of t he household will be i n attendance at the ceremony.

Getas r eports to Sikon t hat he t hinks he h as seen the god Pan p ut c hains on S ostratus's legs, dress him in a leather jerkin, give him a spade, and make him start digging. Sikon thinks the upcoming sacrifice will make all this turn out well and promises Getas a good meal at the sacrifice. Getas mutters that, although Sikon is a wonderful cook, Getas d oes n ot t rust h im. A p erformance b y a choir ends the act.

Act 3 begins with Knemon's appearance from his door, speaking over his shoulder to s omeone inside the house. As he speaks, a great crowd of participants in t he s acrifice e ngulfs h im. This group includes Sostratus's sister and his mother; her friends, relations, and slaves; and a flute- girl named Parthenia, who is playing a do uble flute. Knemon c urses th e c rowd a s G etas a nd Si kon appear, complaining about the group's late arrival and sniping at one another.

Annoyed at all the hubbub, K nemon grouses that the only part of the sacrifice that the gods

will get are the incense, the sacrificial cakes, the end of the she ep's backbone, and the guts. The worshippers will eat and drink everything else. He goes back inside his house.

Discovering t hat the arriving servants have forgotten a boiling pot, Getas tries to borrow one from Knemon, who snarlingly tells h im that he does n ot ha ve o ne. G etas i nsults K nemon a nd leaves, a s K nemon threatens h im a nd slams the door. Si kon t hinks he c an do b etter a nd t ries a second t ime t o borrow a pot. Knemon whips Sikon for bothering him, and Getas pokes fun at the cook for his empty bravado. Sikon decides to roast the mutton rather than boil it.

Sostratos e nters. H e i s s ore a nd w eary f rom his unaccustomed physical exertion, and he complains t hat n either K nemon n or t he g irl ha s appeared. He will have to try again tomorrow. He also wonders about the mysterious way he seems drawn to the vicinity. Sostratos then en counters Getas, who explains the preparations for the sacrifice and tells Sostratus that his mother is there and that his father is expected. Sostratos decides that it would be good policy to invite Gorgias and Daos to share the sacrificial meal.

Knemon's elderly servant Simike now appears. She has accidentally dropped both a pitcher and a pitchfork down the well, and she knows that Knemon will soon want the pitchfork. Getas suggests that she jump in too. Knemon appears and tells Simike that he is going to lower her into the well using the same rotten rope that cost her the pitcher in the first place. This is an idle threat. K nemon pre pares to descend i nto the well h imself. He articulates his feelings of loneliness, but when Getas offers a b ucket and rope, K nemon c urses Getas for speaking to him.

Sostratus and Gorgias end the act as Gorgias says h e m ust n ot co me to t he f east b ecause he must attend to his mother, and Sostratus understands. A nother ch oral interlude f ollows t he action.

Act 4 opens with a sh rieking Simike calling for help. Knemon has fallen down the well trying to retrieve his lost objects. Sikon su ggests that she drop a heavy stone down on top of him.

216 Dyskolos

Simike cries out for Gorgias, who comes, calling on Sostratus for assistance. K nemon's predicament convinces Sikon that the gods really exist.

Knemon's d aughter i s h eard off stage, first lamenting her father's predicament and then joyously exclaiming at his rescue. Sikon calls on the women at the sacrifice to pray that Knemon has a broken leg and will have a permanent limp.

In a l engthy s oliloquy, S ostratus de scribes the w ay t hat G orgias r escued h is s tepfather Knemon from the w ell w hile S ostratus s tayed ineffectually above, trying to comfort the nameless daughter.

Gorgias a nd t he d aughter w heel a spl inted and b andaged K nemon o nto t he s tage o n a couch. K nemon's o rdeal has so mewhat s weetened h is d isposition, t hough wh en S ostratos tries to assist, K nemon addresses him as a "nincompoop." G orgias le ctures K nemon, p ointing out that living alone has almost done him in. He needs help.

Knemon confesses that he is difficult and asks Gorgias to bring K nemon's estranged wife, Myrrhine, w ho n ever sp eaks. Wi th e veryone a ssembled, Knemon makes a lengthy speech. He explains that he thought he could be the one person in the world w ho w as i ndependent, b ut h is near-fatal accident has demonstrated that he needs someone standing by. He observes that he adopted his mode of life out of d isgust for " the p etty c alculations" that people made to "assure a petty profit." Out of gratitude for G orgias's s elfless r isk i n rescuing him, he names Gorgias heir to half his estate. The other h alf he re serves a s his da ughter's d owry, charging Gorgias with the responsibility of arranging a suitable match for her.

Then, r emarking t hat p eople sho uld n ot s ay more t han ne cessary, h e g ives h is d aughter advice: I f p eople were a ll k ind to o ne a nother, there would b e n o n eed for l aw c ourts a nd w ar would cease. Everyone would have enough to get by and be content.

Gorgias agrees to Knemon's requests and, over Knemon's o bjections, i ntroduces S ostratus a s someone who helped rescue him. Mollified, Knemon notes that Sostratus is sunburnt and asks if he's a f armer. Sostratus, who has had o ne d ay's experience on the farm, is able to a nswer truthfully that he is. Satisfied that Sostratus is not an idle, wealthy nobleman (which, of c ourse, he i s), Knemon puts his seal of approval on the marriage that Gorgias suggests. Gorgias pushes K nemon's couch back inside.

When Sostratus assures Gorgias that his father will confirm his choice of bride, Gorgias performs the ceremony of betrothal between the two young people. No sooner is he finished than Sostratus's father, K allippides, app ears. Gorgias k nows the wealthy old fellow and is amazed. Sostratus praises Ka llippides a s a n hone st farmer. H e thinks, however, that it will be a good idea if his father eats lunch before the young people break the news of the betrothal. The stage empties, and another choral interlude ends the act.

In a ct 5, Ka llippides h as w illingly given his consent to Sostratus's wedding. W hen, ho wever, Sostratus proposes a second union between Gorgias and Kallippides' d aughter, the father balks. He does not want both of his children marrying paupers. But after Sostratus lectures his father on generosity, s omewhat i mprobably, K allippides drops his objections. Gorgias then surprises Sostratus by refusing on the grounds that he should not take so much when he and his father have "so little." Both Sostratus and Kallippides argue with Gorgias, who soon agrees to the union.

Now pleased, Kallippides announces a do wry of 15,000 pounds for his daughter, but when Gorgias wishes to confer 5,000 on Sostratus with his sister, Kallippides and Sostratus refuse it, preferring that Gorgias keep his estate together.

Sostratus proposes a grand party for the evening. Knemon will be invited, though his acceptance is dubious. Simike, on the other hand, goes willingly. As everyone else prepares for the party, the cook Sikon and the slave G etas c onspire to annoy Knemon by begging to borrow things. Then they pester him about going to the party, keeping him awake and forcing him to d ance with them. Finally K nemon y ields i n self-defense. S everal servants c arry h im i nto the s hrine, and S ikon speaks t he e pilogue, c alling o n t he a udience to applaud.

Dyskolos is the only virtually complete example of Greek New Comedy to survive. It confirms scholary conclusions already reached on the basis of surviving lists of stage props and on surviving imitations of G reek c omedies by such R oman comic w riters as Pla utu s a nd T er ence. The plots of t he pl ays often involved more- σ - bess clueless young people in love but faced with difficulties often posed by members of the older generation. They a nd t he m inor c haracters were drawn from a reservoir of such stock characters as cooks, slaves, parasites, and difficult old persons. A g ood de al of s lapstick, like t hat in the

final act of *Dyskolos*, was a loo f eatured in the plays. All d ifficulties were always resolved by a happy ending. The frequent rediscovery of fragments of new comedy offer hope that other, more complete examples will be discovered.

Eclogues Virgil (37 B.C.E)

A collection of 10 dactylic hexameter (see quantit ati ve verse) poems in the pastor al mode, most of Virgil's *Eclogues* celebrate the attractions of a stylized, poetic, and largely mythical rural life. The first and the ninth of them, by contrast, are autobiographical in their content. Following Jul ius C a esar's a ssassination, the Roman conspirators against him, Brutus and C assius, were defeated at Philippi. To pay the victorious troops, lands were allotted to veterans. Virgil's a ncestral estates near Mantua were among the lands seized as a part of that distribution.

In the first ecl ogue, we meet of the go atherd Tityrus—probably Virgil himself–who conducts a dialogue w ith an other di spossessed g oatherd, Meliboeus. As "Eclogue I" opens, Meliboeus mentions that the two shepherds are outcast from their country a nd i ts " sweet fields," b ut t hat T ityrus nonetheless wo os " the wo odland M use" a nd teaches the woods to e cho the name of the shepherdess, Amaryllis. She is also silently present.

Tityrus a nswers t hat a god ha s won h im h is peace. This passage probably pays a compliment to O ctavian (August us C aesar), who ei ther restored the confiscated lands or who g ranted Virgil ot hers. Me liboeus, ho wever, app arently has not experienced the same good fortune, and he bemoans the fate that denies him the sight of his native place.

"Eclogue I I" f eatures t he she pherd C orydon singing h is grief at t he failure of a b eloved b oy, Alexis, to return his passion. The e clogue lo oks for its inspiration to Theocr it us's third and 11th *Idyl ls*, which deal with similar laments. Following m any p romises of delights if Alexis would only re turn Co rydon's f eelings, a nother she pherd, unnamed, reproves Corydon for his folly in suffering as he do es and in neglecting h is work while h e suffers. C orydon w ill find a nother Alexis, so he should stop moping about and get busy at his necessary chores.

^{'E}Clogue III" is modeled on the fourth and fifth *Idylls* of Theocritus. It features a singing contest between t wo shepherds—in t his c ase, M enalcas and Damoetas. The e clogue begins with the t wo chiding one another for various misdemeanors—destroying n ewly p lanted v ines a nd s tealing a goat, for i nstance. Da moetas, ho wever, e xplains that he won the goat fairly i n a si nging contest. Menalcas doubts this assertion and makes fun of Damoetas's singing ability. This exchange leads to a w ager i n w hich Da moetas s takes a c ow a nd Menalcas a p air of e ngraved c ups made f rom beech wood. They invite a passing neighbor, Palae-

mon, to judge their s ong. He ac cepts the invitation, and, turn and turn about, the shepherds sing their l ines c elebrating c ountry ac tivities, ple asures, ill fortune, and their passions. Having heard their s ongs, P alaemon d eclares the contest a t ie and suggests that they both leave off singing.

The opening of the "Eclogue IV" addresses the Sicilian Muses—that is, the Greek pastoral poets of Sicily, including Theocritus—and declares the eclogue's intention to address a loftier subject. A new age has begun. The goddess of justice, Lucina, has r eturned to e arth, and a g olden age has begun u nder t he ae gis of A pollo t he su n g od. Though the heightened rhetoric of these passages were likely addressed to Augustus Caesar, whom Virgil a dmired unabashedly, s ome C hristians have perceived unintended foreshadowing of the coming of Ch rist and the Virgin Mary in these lines.

"Eclogue V" contains another singing contest, this time b etween the shepherds M enalcas a nd Mopsus. Mopsus b egins, singing of the death of Daphnis, a character in Theocritus's first *Idyll*. In Theocritus's version, the archetypal Sicilian shepherd, Dap hnis, r efused to lo ve. The g oddess of love, Aphrodite, therefore punished him by making hi m t he v ictim of u nrequited lo ve. W hen Daphnis d ies of h is ho peless a rdor, A phrodite tries un successfully t o revive h im. Virgil h as Mopsas s ing of D aphnis's d eath, funeral, t omb, and epitaph.

Menalcas a dmires M opsas's s ong a nd thinks his own si nging may n ot measure up. Menalcas sings i nstead o f Dap hnis's t ransfiguration an d deification when he arrives in heaven. Menalcas also c elebrates th e a nnual s acrifices o f milk, olive oil, and wine that shepherds make to Daphnis's memory. He further suggests that shepherds can now use Daphnis's name as they do those of other go ds to s wear b y wh en t hey m ake v ows. The she pherds en d t he e clogue b y e xchanging gifts in honor of one another's songs.

The si xth e clogue, which Vi rgil add resses to his friend, the critic Quintilius Varus, admonishes Varus that Virgil is not yet re ady to si ng "of kings a nd battles,"—that i s, to w rite a n e pic. Nonetheless, Virgil assures his friend that Apollo will find no poem more welcome than one dedicated to Varus. Then, calling on the Muses, Virgil writes of twolads, Chromis and Mnasyllos, who catch the drunken satyr Silenus asleep in a cave, b ind him w ith his o wn B acchic ga rlands, and demand a song as the price of his release. The water n ymph A egle jo ins t hem a nd pa ints t he satyr's f ace w ith cr imson m ulberries. A mused, Silenus p romises t he b oys t heir s ong a nd t he nymph "a nother kind of reward." Silenus begins his song, singing of the beginning of the universe; the making of the earth; the origins of the forms of mountains and landscape features; the appearance of the sun, clouds, and showers; and the arrival of living things-the woodlands and the animals.

Next, S ilenus b riefly su mmarizes m ythical history, a lluding t o b ut not t elling s tories like those of the rule of Saturn, of Prometheus's theft of fire from the gods, of Pasiphae and the bull. Continuing with a catalogue of myths, Silenus alludes to Virgil's friend Gallus, who established the elegiac poem in the Latin tongue (see el egy and elegaic poetry), and to the Greek poet, Hesiod, whose Theogony and Works and Days provided t he mo dels w hose c ontents Vi rgil's report of Silenus's song briefly summarized. (Virgil assumed that his audience would know these works by heart and that the briefest of allusions to them would be enough to evoke the full texts of the stories in his readers' minds). Silenus continues singing the old mythical songs until the end of the day, when the shepherds had to t ake their flocks to the fold.

The she pherd M eliboeus o pens t he s eventh eclogue, t elling ho w Dap hnis a nd he happ ened upon a s inging ma tch b etween C orydon a nd Thyrsis. A fter a 2 0-line i ntroduction, C orydon and Thyrsis alternately recite o r cha nt four-line verses. Corydon calls on the nymphs of Libethra to inspire his song. Thyrsis calls on the shepherds of Arcadia to crown him and rise above Codrus, a poet wh om C orydon had na med a s h is m odel. Corydon n ext a ddresses a s ong a nd a s eries o f gifts, i ncluding a ma rble s tatue, to t he Gr ecian

nymph Delia. Thyrsis outdoes him by making an offering of milk and cakes, to the Roman god of masculinity, Priapus, and the promise of a golden statue if the flock flourishes.

Corydon calls on the nymph Galatea to come to him when her bulls are in their stalls. Thyrsis hopes t hat h is s teers w ill g o ho me a nd t hat Galatea will find h im bit ter, rough, a nd worthless. C orydon p rays for a ple asant su mmer a nd protection from the heat. Thyrsis prays for a good fire within to ward off the winter's chill.

Corydon c rafts a p retty c ompliment to t he handsome boy, Alexis, saying that in his absence the r ivers w ould d ry u p. Thyrsis s ays th at th e parched fields and brown grass would all recover and be green a gain a s, when h is Phyllis a rrives, Jupiter will rain down showers.

Linking his stanza to Thyrsis's, Corydon pays his c ompliment t o P hyllis, w ho l oves h azels; therefore, A pollo's o wn f avorite pl ants, m yrtle and laurel, will not compete with hazels. Thrysis abandons t he direct reflection of t he p receding verse in his final effort, suggesting that a visit by the h andsome y oung L ycidas w ould ma ke t he loveliness of t he t rees i n t he w oods, h ills, a nd plains pale in comparison with his beauty.

As judge, Meliboeus decides that Corydon is the clear winner of the singing contest.

Virgil de dicates "E clogue V III" to h is friend Cneius A sinus Pollio, the governor of Ci salpine Gaul, w ho had j ust def eated t he t roops of t he Parthini in the Roman province of Illyricum (39 b.c.e.). Once again Virgil presents the reader with a singing contest—this time between Damon and Alphesiboeus. Throughout these eclogues, which are among the most finely crafted of all Roman lyrics, Virgil takes the greatest c are to ma intain his r eaders' interest w ith v ariety of s tyle a nd content.

Early in the morning, the she pherd Da mon begins his song with an address to the morning star. In that ad dress, we learn that his beloved Nysa has spurned him and that, resolved to d ie, he calls on the gods to he ar him. As each of the stanzas of Da mon's s ong ends, he r epeats a refrain: "Begin with me, my flute, a song of Maenalus!" (Mt. Maena lus i n A rcadia w as a v enue sacred to the Muses.) Nysa, the reader learns, has been married to Mopsus. Damon thinks the wedding a mismatch and compares it to the mating of griffons a nd ma res o r to ho unds d rinking with the deer they hunt.

Damon rehearses the history of his love, how from h is 1 1th y ear h e loved N ysa. N ow he ha s discovered love's essential i nhumanity. He compares love's r uthlessness to t hat of Me dea when she m urdered her c hildren (see *Medea*). The world h as b een t urned u pside do wn: O ak t rees bear golden apples; owls vie with swans. Damon wishes that the world would all b ecome ocean. He will p lunge f rom a mountain peak into the waves. He ends his song, varying the refrain to close t he p oem, t hen c alls o n A lphesiboeus to begin.

Begin he does, calling for water and wool to wreathe the shrines and try his magic at warming up t he mo od. On ly s ongs t hat c an do s o a re lacking. Alphesiboeus mimics the device of using a r efrain, and h is s tanza length—stanza f or stanza—matches that o f Damon. S ongs, h e insists, have magical powers; they c an d raw the moon from the heavens, change men into swine, or bu rst a sna ke i n t he m eadow. A s he si ngs, Alphesiboeus, following "Idyll II" of Theocritus, tells how a g irl weaves a ma gic sp ell to c all her lover, Daphnis, home to he r. The refrain invokes the spell to c all the lover home from town until that of the final s tanza n otes t he suc cess of her effort by announcing that Daphnis is on his way.

In "Eclogue I X", V irgil a ssumes the persona of Me nalcas, a nd t he sub ject sh ifts f rom t he mythic and the amatory to the seizure of his own lands discussed above. The shepherds are lamenting t heir e xpulsion f rom t heir a ncestral l ands, and L ycidas e xpresses su rprise. H e had he ard that M enalcas (Virgil) h ad s aved s ome of t he farms with h is app eals. In the ensuing disputes, the s hepherd M oeris s uggests, b oth he a nd Menalcas were lucky to escape with their lives.

Moeris sings an old song recalling the ancient pastoral tradition, but Lycidas changes the tune. There is n o point, he implies, i n lo oking to t he heavens for the old constellations. The comet that appeared on the death of Julius Caesar and that was thought to be his soul on its way to its deification s ymbolizes a n ew o rder of t hings. Y et there is h ope that n ew generations w ill i nherit their ancestral lands.

Moeris feels less hopeful but also philosophic in the face of a dversity. Ti me r obs us of e verything, he says, memory included. He has now forgotten the old songs—though Menalcas can still repeat them. The she pherds a nd f armers w ho work the l and t ake s olace i n the thought t hat a new master will still need them.

In "Eclogue X", Virgil do es a f riend a f avor. He composes a love poem that his friend and fellow p oet, G. C ornelius G allus, c an s end to w in back t he he art o f a w oman, L ycoris, w ho had been h is m istress but h ad de serted h im. I n t he poem, Virgil as the shepherd Menalcas has G allus complain that military duty has kept him away from his love. He will, he promises, return to the poet's imaginary Arcadian life—one he wishes to share with Lycoris. Yet the singer recognizes that it is t he go d, Love, not h uman lovers, who c onquers all. He hopes that Lycoris will yield to Love and once more love Gallus.

Electra Sophocles (ca. 410 B.C.E.?)

In *Electra*, S ophocl es de velops a pl ay from the same material treated by Aesch yl us in *The Cho-ephori* and b y E uri pides i n his *Electra*. The death o f O restes' f ather, A gamemnon, a t t he hands of his mother, Clytemnestra, and her pa r-amour, Aegisthus, must be avenged. In Sophocles' version, Orestes, who lives because his sister Electra s aved h im b y s ending h im to h is a unt a nd uncle, and his companion, Pylades, arrive in the

city of M ycenae a ccompanied b y a t utor c alled Paedagogus, w ho u rges t he y ouths to l ay t heir plans for vengeance quickly. Orestes reveals that his p lans a re a lready l aid a nd t hat A pollo ha s revealed to h im the necessary c ourse of ac tion. Paedagogus is to gain entry to the house with an urn o stensibly c ontaining O restes' a shes a nd gather intelligence. In the meantime, Pylades and Orestes will visit A gamemnon's tomb and sacrifice locks of their hair as a funeral tribute.

Electra is heard lamenting and chanting within. She is recalling her father Agamemnon's murder. Members of the ch or us come to comfort her in her constant grieving. They remind her t hat Orestes lives to seek vengeance—a vengeance on which E lectra's i magination i s u nswervingly fixed.F romt hec horus we learn that Aegisthus is away and t hat, t hough O restes has often p romised to come, he never has.

Electra's sister, Chrysothemis, enters and tries to dissuade herfrom angry and vengeful thoughts. Electra tells her that her i naction and her lack of wrath betray their father. Chrysothemis informs her sister that Clytemnestra and A egisthus have determined to i mprison E lectra i n e xile i f she does not cease her vengeful chanting. The sisters exchange po ints o f v iew abo ut t he r espective paths they have chosen to follow in the wake of their father's murder.

Then C hrysothemis tel ls E lectra a bout C lytemnestra's d ream. C lytemnestra d reamed t hat Agamemnon took his royal scepter and planted it near the hearth. From it sprang a fruitful tree that overshadowed all Mycenae. The dream has made Clytemnestra fearful. Electra tells Chrysothemis to pray for Orestes' arrival; the chorus encourages her to do so, and she a grees. The chorus then remarks upon the vengeful Furies who lie in wait for Clytemnestra and upon the multigenerational history of cur ses on t he p rogeny of P elops a nd Atreus.

Clytemnestra now enters and attempts to justify her murder of A gamemnon to Electra, saying that her doing so was just vengeance for his sacrificing Electra's sister Iphigenia to gain a fair wind for the Greek fleet assembled at Aulis to sail against Troy. E lectra rejects t hat a rgument a nd accuses her m other of b eing m otivated b y her lust for Aegisthus. Following a further exchange of i nsult a nd i mpatience bet ween mother a nd daughter, Clytemnestra p rays to Ap ollo t hat he will uphold her in prosperity and do the same for those of her children who bear her no ill will.

Paedagogus arrives and inquires if the palace is that of Aegisthus. On learning that he is in the presence of the queen, he reports that Orestes is dead. H e follows t his n ews with a c onvincingly circumstantial account of an accident in a chariot race i n w hich O restes o stensibly d ied. C lytemnestra is, on the one hand, moved at the report of the death of her son, and, on the other, relieved that his desire for vengeance no longer threatens her. E lectra is downcast at the disappointment of a ll he r ho pes. A s she l aments, her si ster Chrysothemis brings news that Orestes lives and is p resent. S he reports that w hile visiting h er father's tomb, she found evidence of fresh funeral s acrifice a nd a lo ck of t heir b rother's ha ir. Electra, h owever, recounts P aedogogus's sto ry, and Chrysothemis is convinced of her error. She joins E lectra i n plo tting r evenge a gainst t heir father's m urderers. Aga in t he ch orus adv ises restraint, and while Electra remains firm in her resolve, Chrysothemis vacillates, then decides not to participate after all.

Orestes and Pylades now enter, in disguise and carry ing a funeral urn. Orestes tells Electra that what remains of Orestes is in it. She requests the urn and grieves over it. Orestes surprises Electra by being stirred to pity. Eventually he confesses that the ashes in the urn are not Orestes' own but a "fiction" bearing his name. He reveals himself as her brother. He then counsels her to re strain her joy and to p retend to b e grieving his de ath. Paedogogus enters and cautions them not to give the plot away with their rejoicing. Electra remains outside while the men go in and kill Clytemnestra. O restes e merges w ith blo ody ha nds, a nd Aegisthus i s o bserved approaching in t he di stance. Orestes reenters the palace.

Aegisthus a rrives a nd a sks f or t he P hocian strangers who have reported Orestes' death. Elec-

tra, each of her utterances bristling with double meaning, says they await him within. The palace doors o pen, r evealing a sh rouded c orpse n ear which Or estes a nd P ylades s tand. A egisthus assumes it t o b e that of Orestes, but when he removes the face cloth from the body, he realizes into w hose p ower he ha s f allen. O restes a nd Pylades force Aegisthus into the house to kill him on t he s pot where Ag amemnon had d ied. The chorus ends the play with a r eference to t he end of the curse that for generations had plagued the house of Atreus. (See *Agamemnon*.)

Sophocles' version of the story contains virtually no weighing in the balance of justice Agamemnon's sacrifice of Iphigenia against his murder by Aegisthus a nd Clytemnestra. Nor do es a v iewer find evidence that Orestes feels any guilt or regret at the pro spect of b ecoming the instrument of justice in slaying his mother. There is none of the disagreement b etween th e v engeful Fu ries a nd the Olympian g oddess of w isdom, A thena, that one finds in Aeschylus's version of the story, and finally, there is no need for balloting by an Athenian j ury t hat c omes w ithin a single vote of consigning O restes t o t he ha nds o f v engeance. Sophocles ends the curse on the house of Atreus definitively with the deeds of Orestes.

elegy and elegiac poetry

Applying the terms *elegy* and *elegiac* principally to poems of mourning and lament represents a late development in the history of the elegiac genre. Among t he e arliest Gr eek p ractitioners of t he genre, *elegiac* applied to the meter of the verse in which the poem was composed rather than to its subject matter. The elegiac verse was composed of two dactylic lines, the first of hexameter and the second of pe ntameter. The ele gy s eems to ha ve been a development from the epic genre. On the one hand, it came to be used for poetry sung or recited during the drinking party, or symposium, that followed the main course of a banquet. Typical poems treated such subjects as the pleasures of wine, of love, and of abundant living. On t he other h and, t he ele giac s tanza r eflected i ts e pic roots by serving as the meter for war songs and songs recited together by troops as they marched into battle.

The earliest Greek elegists are customarily dated to the seventh century b.c. e. Included among them we find such poets as Callinus of Ephesus and Tyrtaeus. The poems of both C allinus a nd Tyrtaeus—an Athenian schoolteacher who became a Spartan general—were wars ongs that inspired troops to acts of courage. A bout a century later, Theognis used the meter to offer advice to young aristocrats and introduces the note of lamentation by bewailing the injustice of the lower classes having r eplaced the a ristocrats in i mportant offices and depriving them of their hereditary privileges and wealth. Among Roman elegists Al bius Tibullu s was the form's foremost practitioner.

Otherwise, the elegiac verse was also used in more extended poems to report historical action. We see at least a fragmentary example of this sort in the remains of Simonides of Ceos's elegy on the Battle of Plataea.

Empedocles (fl. ca. 440 B.C.E.) *Greek poet* Empedocles was a d istinguished Greek-Sicilian phi los o phe, naturalist, and poet who is remembered best for the probably apocryphal story that, in an effort to discover if he had become a god, he committed s uicide by jumping into the Sicilian volcano, Mt. Etna. While Empedocles had in fact boasted of his divinity, that boast may well have been a form of literary hyperbole or simple egoism. O n t he o ther ha nd, h is h ubris may have stemmed from a genuine conviction that he was actually a n i mmortal w ho, in p unishment for some O lympian t ransgression, h ad bee n co ndemned to s ojourn for a t ime o n e arth b efore being welcomed back among his peers. As for his demise, it seems more likely that he d ied from altogether less romantic causes while traveling in the Peloponnesian peninsula of Greece.

Approximately 5 00 l ines r epresenting t wo of his poems—*Physics* and *Purifications*—have come down to u s in such fragmentary c ondition that one c annot a lways b e s ure w hich l ines g o w ith which poem. Empedocles belonged to the school of ph ilosophy that h ad b een propounded by Pyt hag or as of Sa mos—one that believed in the reincarnation of souls—and he asserted his recollection of previous lives as a young man, a maiden, a bush, a bird, and a fish.

In *Lives o f Em inent Ph il os o phers*, t he third- œntury b.c.e. historian of philosophy Dioge nes La ert ius credits Ar istot l e with naming Empedocles as the inventor of rhetoric and attributing to him an unfinished poem on Xerxes' invasion of Greece, a hymn to A pollo, tragedies, and po lti al discourses. Diogenes also reports assertions c ontemporary w ith Empedocles that he could perform magic and was also a physician.

Encountering Sorrow (Li sao) Qu Yuan (ca. 300 B.C.E.)

A lengthy dramatic narrative poem, *Encountering Sorrow* is the principal surviving example of the

224 Encountering Sorrow

work of Q u Y uan (Ch'ü Y üan) and th e m ost famous poem in the history of Chinese literature. Qu is the earliest Ch inese poet whose na me w e know. Many commentators think that *Encountering Sorrow* traces the poet's response to having lost the confidence of his ruler and employer as a result of slander.

After introducing the poet and tracing his genealogy, the poem reports Qu's efforts to follow the "right way"—that is, the way of the Confucian gentleman. Qu employs the i magery and symbolism of gathering flowers associated with several virtues to u nderscore h is o wn r ighteousness. The p oet frets about the influence that his slanderers, Chieh and Chou, enjoy with the king. Qu worries not so much about his own situation as about the dangers to the king that will follow from heeding the advice of d epraved c ounselors. In his d epression, h is thoughts turn to exile and to su icide. It would be best, he thinks, to die in the cause of virtue.

A long section follows in which Qu Yuan compares his situation with those of historical persons who p rovide e xamples a nd c ounterexamples o f following the sort of path he ha s marked out for himself. Then he traces his route into exile and the physical and spiritual preparations that he made for t he jo urney. H e i magines h imself t raveling through th e sky i n a dragon- drawn chariot. Although he is turned away from Heaven's gate, he e xperiences mome nts of jo y. Then h e l ooks down and sees his old home in the distance. The fleeting moment of happiness passes, and despite the earlier efforts of a person named Ni Xi to cheer up the poet, depression claims him.

A four- lne *luan*—a concluding section that in some ways resembles the last lines of a Re naissance I talian ode—ends the s ong. I nstead, o f addressing the poem in his last lines, however, Qu Yuan r eaches a firm conclusion. His life is finished. He is alone and unknown. He longs for his own home. As no ruler will employ him to hel p administer a j ust r egime, h is p urpose i n life i s doomed to remain unfulfilled. He resolves to seek out a certain P'eng Hsien, who had earlier ended his life by drowning. Although one of the poem's translators, Burton Watson, m uch a dmires the work, he is put off by Qu's sdf- igh tousness and melodramatic sense of injured merit. Other sorts of works also appear in Qu's verses. One finds ritual songs; a series of verse riddles on the subjects of Chinese history, cosmology, and myth; and a poetic dialogue between Qu and a fisherman in which the latter encourages Qu to remain among the living and continue to do his job. S everal of t he p oems de al w ith the r itual activities of a priest or a shaman.

The l iterary h istorian Vi ctor Ma ir e xplains that the verse riddles make up a particularly perplexing s et of p oems f rom Qu Yuan's pen, the *T'ien wen*. That title can be rendered into English as "Heavenly Q uestions" o r " Divine C onundrums." The work poses a s eries of unanswered questions about cosmology, myth, the rise of civilization, a nd t he f ounding o f s ocieties b y demigods.

For s tudents o f a ncient l iterature, t angled critical issues a rise from this text. Some light has been shed, however, by applying the methods of comparative mythology to the work. The riddle poems of Heavenly Questions findp arallels in such other mythical traditions as those of the ancient Indo-European and even of North African p eoples. S uch verses m ay h ave b een connected with induction into cults and with sacrifices. Typical of the questions the work asks are queries like these: W ho measured he aven? How many miles does the sun travel? How did the h usbandless goddess of fe rtility c onceive nine sons? Is the distance greater from north to south, or from east to west? Mair translates a generous sample of the poem in his work listed in the bibliography below.

Ennius, Quintus (239–169 B.C.E.) Roman playwright

A trilingual poet and playwright, Quintus Ennius was the most important figure in the archaic period of L atin literature—the p eriod, that is, when the Latin language was still in its formative stages. Though h is literary remains are fragmentary and th ough we h ave th ose f ragments l argely a t second h and, h is c elebrity a nd ac complishment made h is w ork t he ob ject o f i mitation a nd o f scholarly study well into the Common Era. As a single example, in his *Aeneid*, Virgil b orrowed freely from Ennius's *Annals*.

Ennius was born on the Sallentine Peninsula of southeastern Italy—then called Calabria—at Rudiae (modern Rugge). H is parents sp oke the I talic language called Oscan. Beyond his native tongue, Ennius also mastered Greek and archaic Latin during his childhood. This trilingualism caused him to describe himself as having "three hearts."

We learn from the editor and translator E. H. Warmington that Ennius joined the Roman army after finishing hi s e ducation. A s a s oldier, he achieved t he r ank o f c enturion (one w ho c ommanded 100 m en) and c ame to t he attention of Marcus Porcius Cato, the elder. Then a qu aestor (a j udicial o fficial) of the Re public, Cato rose to become the chief of the Roman State, its consul. According t o t radition, E nnius t utored C ato i n Greek l iterature and p erhaps i n t he Gr eek l anguage as well.

In any case, for a considerable period, Ennius continued t o e njoy t he pa tronage o f C ato, w ho took the younger man with h im to Ro me. There Ennius s upported h imself, a ccording t o S t. Jerom e, by maintaining the precinct sacred to the goddess Tutilina—also called the "guardian goddess." He also gave lessons in the Greek language,

began p ublishing his o wn v erse, a nd b ecame a playwright. I n t hat c apacity, he s eems to h ave written a few e xamples of c omedy a nd s ome 2 0 tragedies, all based on Greek models that he freely translated. The fragmentary remains of several of the tragedies also suggest that Ennius particularly revered Eur ipides.

The known tragedies of Ennius listed by the classicist H. D. Jocelyn included: Achilles, Ajax, Alcmaeon, Alexander (here the alternate name of the Trojan prince, Paris), Andromache, Andromeda, A thamas, C resphontes, Er ectheus, E umenides, Hectoris Lustra, Hecuba, Iphigenia, Medea, Melanippe, Nemea, Phoenix, Telamon, Telephus, and Thyestes. (I have normalized Jocelyn and Ennius's O ld L atin s pellings.) H e ma y ha ve written a comic Telestis in addition to his two authoritatively at tributed c omedies, Cupuncula and Pancratiastes. Beyond those works, Jocelyn reports t hat E nnius a lso t ried h is ha nd a t historico- tragedy in a play about the notable rape of the Sabine women (Sabinae) and another concerning t he Ro man sie ge a nd c onquest o f t he Greek city of Ambracia, whose name is also the title of Ennius's play.

Poetry in archaic Latin had been composed in accentual v erse, r elying o n t he s ort o f s tressed and un stressed s yllables t hat E nglish t ypically uses (see Satu r nian verse). Ennius was responsible f or i nitiating t he i mportation i nto L atin from G reek o f a m etrical s ystem ba sed o n t he length of syllables. Syllable length was determined either by the actual duration of a syllable's sound or by an arbitrary system for determining vowel length. (See quantit ati ve verse.)

Among his contemporaries and several generations of his successors, Ennius's reputation rested ch iefly on a qu antitative d actylic he xameter epic, his *Annals*. In t his ma sterwork, E nnius traced the history of Roman military successes from R ome's b eginnings down to the Roman campaign against the Istri (178/77 b.c.e.). We are not certain that the 18-book poem was finished when Ennius died. B eing of a b ibulous d isposition, E nnius i s said t o h ave r emarked t hat h e

226 Entrepreneur, The

never work ed on that poem unless he had b een drinking heavily—a h abit that k illed h im in the end when he died of gout.

During his career, Ennius became friends with and wr ote a bout s ome of t he m ost c elebrated Romans of his day. These i ncluded Scipio A fricanus, the conqueror of the Carthaginian general Hannibal, and Marcus Fulvius Nobilior, the conqueror of Ambracia and the hero of Ennius's play of the same name. Partly as a reward for celebrating hi s f ather, N obilior's s on Q uintus hel ped Ennius to become a Roman citizen in 184 b.c.e. and to obtain a grant of land.

E. H. Warmington speculates that in some of Ennius's other works, the poet showed too great an admiration for the freethinking of Epicurus and his followers. As a result, the poet may have lost t he su pport o f h is e arliest pa tron, C ato. Warmington's uggests C ato came to think that Ennius's admiration for the Epicurean position, which held t hat the gods were uninterested in human a ffairs, an d t he p oet's p resentation o f such i deas i n h is Epicharmus and Euhemerus (Holy History), constituted a d anger to the religious values of the Roman Republic. *Epicharmus* was a dream vision in which the poet imagined that he had died and awakened in heaven, where mysteries were revealed to him. Euhemerus proposed the view that the pantheon of deities wor-shipped t hroughout t he Me diterranean w orld had once all been remarkable human beings to whom their successors had ascribed supernatural powers.

In a ddition t o the w orks o utlined above, Ennius wrote at least four scroll-length works of sat ir e; a n umber of e pigr a ms; a nd a w ork o n gastronomy, *Hedyphagetica*, a volume that A pule ius read which borrowed much of its content from th e *Hedupathe ia* of A r chest r at us of Gela (fl. fourth century b.c.e.).

epic

The epic style of poetry has deep roots in the past of m any cultures. Apparently epics a rose in the ancient world f rom oral re citations of stories many ol der t han w riting i tself. These st ories recount the de eds of hero es and gods, and they report facts and myths of central importance to the c ultures th at p roduced th em. The e pics of Homer, *The Ili ad* and *The Odyssey*, established the characteristics of t he m odel for t he a ncient Mediterranean world, a nd Vir gil imitated and polished their form for his Roman national epic, *Aeneid*.

In ancient Greece, epics remained popular well into the Hell enisti c Age. In the third century b.c.e., for instance, Apoll onius of R hodies, in his *Argonaut ika*, returned to the characteristic genre of Homer, putting aside such developments as a tendency to a llegorize the contents of e pics that post-Homeric practitioners of the genre had developed.

As polished by Virgil in his Aeneid, the form of t he e pic became la rgely fixed. The ac tion begins in the middle of things, and later in the poem, flashbacks transport the reader to what had ha ppened e arlier. The p oet i nvokes t he muse, a sking her to si ng t hrough h im. P oets also state their epic purposes early in the song. Other features characterize the form. A reader usually finds a de scent i nto t he u nderworld; gods or other supernatural beings play significant r oles. The ac tion r egularly i ncludes m ilitary and amorous encounters, but beyond that it is of great importance in the development of a national or supranational mythos. These attributes continued to characterize the work of epic poets t hroughout the an cient M editerranean world and, in western Europe, right through the Middle A ges a nd w ell i nto t he e arly m odern period.

The M iddle E astern p rototype i s *The Gil*ga mesh ep ic of a ncient Sumer—the oldest written epic known (before 3000 b.c. e.) and the source of some of the plot for the story of Noah in the Hebr ew Bible . In ancient India, the *Ramayana* and the *Mahabhar at a* arose as national epics of high r eligious s ignificance. The *Mahabharata* enjoys the distinction of being the world's longest known e pic p oem. I n I ndia, a s eries of sho rter works, the *Puranas*, also appeared.

Epicharmus of Cos (Epicharmus of

Sicily) (fl. ca. late sixth or early fifth century B.C.E.) *Greek dramatist*

A very early writer of c omedy, Epicharmus is credited by some with being the founder of the genre. Several Mediterranean islands, including Cos in the eastern Aegean group called the Sporades, claim to be the birthplace of Epicharmus. The most a uthoritative view presumes Si cilian origin—a possibility that gains credence from the f act th at th e e xceedingly fr agmentary remains of his work are in the Sicilian dialect of Doric Greek. J. J. Eschenberg calls Epicharmus "a professor of . . . Pythagorean philosophy" at the court of the t yrant H iero i n Si cily a bout 470 b.c.e., a d ate t hat c onflicts w ith o ther estimates.

It s eems t hat E picharmus's c omedies were known at Athens and that his work gave impetus to t he de velopment o f A thenian c omedy. The number of k nown f ragments of E picharmus's work has recently grown owing to their discovery among the Oxyrynch us papyri. As a result of t hese finds, i t h as b ecome possible to s ay something about the subjects and nature of his lost comedy. The classicist Kenneth James Dover suggests that "mythological bu rlesque" was a feature of t he p laywright's c omedy, and th at Heracles and Odysseus figured among his comic heroes. On other issues, such as the number of actors he employed in each play and whether or not t here may have b een a c horus, d iscussion still continues. Do ver considers the chorus a likelihood.

Epicurus (341–271 B.C.E.) *Greek prose writer* Epicurus w as t he s on o f a n A thenian c ouple, Neocles a nd h is w ife C haerestrate, w ho had moved to the island of Samos. On Samos, Epicurus studied p hilosophy a nd o ther subjects f rom age 14 through 18 with a P latonist t utor na med Pamphilius. H e t hen t raveled to A thens t o perform a m andatory two-year p eriod of m ilitary ser vice.

While Epicurus fulfilled that duty, his parents suffered political oppression on Samos. To escape it, they migrated to Colophon, a city in Asia Minor. There, in 321, Epicurus joined them, and for the next d ecade he continued h is studies both independently and under the tutelage of Nausiphanes. That t eacher b elieved i n the p recepts o f th e atomists—a school of philosophers who held that the u niverse i s c omposed of t iny, i ndivisible, indestructible particles. Epicurus may have bene-fited from other instruction as well, perhaps, that of P raxiphanes, w ho fol lowed t he t eachings o f Ari st ot l e (384–22 b.c.e.)

In 331 b.c.e., Epicurus moved to Mytilene on the island of Lesbos, where he began to propound his own philosophical system. His ideas, however, did not receive a favorable hearing, and after only a year he moved to the city of Lampsacus, located not far from the Hellespont in Asia Minor. In Lampsacus, h is views en joyed a m uch m ore encouraging response, and with his earnings and a retinue of followers, he w as able to m igrate to Athens in 306. There Epicurus purchased a si zable house with a w alled garden and founded a private school of ph ilosophy called "the garden" that was also a community of like-minded individuals of both sexes. His was the first philosophical academy in Greece to welcome women as well as men.

Contrary to the accusations of his detractorsof whom there have been many—and contrary to the pop udr a ssociation of Epicurus's name with the aphorism "Eat, drink, and be merry, for tomorrow you may die," the goal of Epicurus's communal s ociety w as, a s h is b iographer G eorge A . Panichas assures us, "the moral perfection of the individual." The r egimen o f Ep icurus's g roup savored more of monastic a sceticism than of the sybaritic license attributed to its founder and its members by Epicurus's detractors and by posterity. Meals were sparse, alcoholic beverages were in short supply, a nd water was the principal liquid refreshment. Though the community was hierarchically or ga rized, apparently anyone was free to correct a nyone else i f one me mber perceived a fault in another. Such correction was offered firmly but, as Panichas says, with "gentleness, persuasion, s ympathy, [and] c ompassion." Ep icurus's regimen proposed as a principal object the avoidance of pain and suffering. This included physical, mental, emotional, and ethical pain. Living a good life that strove in all its departments to achieve a

concerned ba lance t oward o neself a nd to ward others w as the g oal of E picurean w isdom. The society h e f ounded en dured a s a f ellowship f or some 700 y ears and gained numerous a dherents throughout ancient Greece and Rome.

Epicurus's w ritings ap parently en compassed some 30 0 " books." F rom the e arly Gr eek p erspective, a book was a manuscript scroll, usually papyrus, of a m ore or less standardized length. Only a f ew of h is c ompositions, ho wever, ha ve survived to come down to us directly; these writings are preserved in the 10th book of Diogenes Lae rt ius's biography of Epicurus. They include his 40 *Principal Doctrines* as well as a letter on the subject of natural philosophy addressed to a contemporary named Herodotus, another on meteorology add ressed to a c ertain P ythocles, a nd a third on theoretical ethics addressed to a c orrespondent named Menoeceus.

In the first of these letters, Epicurus sums up his conclusions about the physical nature of the material universe and points out the benefits that arise for human beings from understanding physical science. Among these he includes a reduction in b oth s uperstition and s kepticism a bout t he existence of an essentially indescribable deity. In his "Letter to P ythocles," Epicurus offers explanations f or obs ervable c elestial e vents, l ike t he orbits of pl anets, e clipses, falling s tars, and t he formation of clouds. He again endorses an empirical rather than a magical or superstitious approach to understanding the natural world.

In "Letter to Menoeceus," Epicurus discusses theology a nd e thics. H e ma kes c lear t hat he believes i n an "immortal and blessed G od" but suggests that believers should believe about that God only such things as support both immortality and blessedness. E picurus a lso suggests t hat believers should avoid at tributing to G od t heir own partisan preferences. Here, too, he famously remarks, "D eath is nothing to us," a nd h e s ummarizes his views about the virtuous life.

Good English translations of these documents and of E picurus's other writings and surviving fragments are accessible through the website listed in the bibliography below.

Beyond t he few s urviving te xts, o ur k nowledge of t he w ritings and t hinking of E picurus comes principally from the celebrated materialistic poem De Rerum Natura (On the Nature of Things) w ritten b y h is subs equent ad mirer, t he Roman Titus Lucr et ius Carus (ca. 95-55 b.c.e.). Other r emnants a ppear elsewhere a mong la ter Roman and medieval writers. From these sources we learn at least the titles of some of Epicurus's estimated 300 books (varying from 1 to 37 scrolls in length) and with them something of the range of his thought. A sampling of those titles includes: On Atoms and Void, On Benefits and Gratitude, On Ch oice a nd Avoidance, O n Diseases a nd Death, On the End, On Fate, On the Gods, On Gratitude, On Human Life, On Images, On Just Dealing, On Justice and O ther V irtues, O n Kings hip, O n Music, On Piety, On Touch, and On Vision.

Although E picurus does not appear to have acknowledged h is indebtedness to earlier thinkers, he nonetheless occupies an important place in a line of Greek atomistic and materialist philosophers. That line stretches from Thales (ca. 625-546 b.c.e.) through Anaximander (ca. 611-546 b.c.e.), Anaximenes of Miletus (fl. si xth c entury b.c.e.), Heraclitus (ca. 544-484 b.c.e.), the versifying philosopher Parmenides (ca. 540-470 b.c.e.), Empedocles (fl. ca. 440), and Anaxagoras (500-428 b.c.e.). The line culminates in the work of Leucippus (fl. ca. 430 b.c.e.) and his friend Democritus (fl. ca. 400-357 b.c.e.). All these thinkers, like Epicurus, shared the essential premise that the world and all in it arose from natural and material origins. Though some were deists, they denied mythical theories of divine origins, and they developed their ethical viewpoints from the mutual benefit of good behavior for members of the community rather than from divine commandments. Perhaps inevitably, t he ad herents o f suc cessive pre- a nd post-Christian r eligions, a long w ith a strologers, magicians, and spiritualists, vilified the views of these Greek materialist phi bs ophers.

For 2 1st-century r eaders, E picurus r aises numerous r elevant i ssues. F or e xample, he defends the concept of the soul's mortality—body and s oul di e tog ether. F or h im de ath holds n o threat, since it means only the end of sensation. He perceives happiness as the highest good, and not far behind happiness comes friendship. The known precepts of Epicurus have sparked interest, admiration, and heartfelt criticism ever since their author enunciated them. His views address issues still controversial after almost 2,500 years.

Never ve ry s trong, E picurus d ied a fter t wo painful weeks of su ffering excretory d ifficulties. He met h is own death with equanimity, firm in the conviction that he had nothing to fear.

Her odotu s and by the Byzantine lexicographers Suidas and Photius as the inventor of the tragedy, he was thought to have flourished on the island of Sicyon. According to a rhe torician of Constantinople, Themistius (fl. fourth century c .e.), E pigenes developed a s ort of operatic proto-tragedy on the island of Sicyon. epigram, Greek and Latin

Originally meaning a brief inscription on buildings, t ombstones, or v otive offerings, t he v erse epigram bec ame a favorite mode of expression for numerous ancient authors. Some of the early authors n amed a s w riters of e pigrams i nclude Aesop, Anacre on, Simonides of Ceos, and the playwrights Aeschyl us and Euripides.

In the Helle nisti c Age, the epigram's brevity gave opportunities for skillful poets, such as the Greek Callimachus, to indulge their preference for short, pithy, emotionally intense, highly allusive, s triking v erses a s o pposed to t he m ore extended a nd, pe rhaps, le ss e ffective epic. That ancient g enre, in C allimachus's o pinion, h ad largely run its course. (See *Epigr ams*.)

Among others who wrote Greek epigrams in the H ellenist ic A ge, we find L eonidas of Tarent um A round 100 of L eonidas's widely admired e pigrams a re e xtant. A st he e pigram gained in popularity, the numbers of those who opted to c ompose in t he g enre m ushroomed correspondingly. A particularly talented practitioner a round th e mid-first c entury b .c.e., Melea ger of Gadara, gathered together a collection. He included a s election of h is own epigrams together with those of 45 others. Entitled *Stephanos* (The Garland), it became a m odel for later similar collections throughout the ancient and early modern worlds. The subject matter of many of t he p oems w as a morous, s ometimes steamily so.

In the Latin language, the history of early epigrammatic in scription on to mbstones and el sewhere parallels t hat of t he Greek. I n i ts e arliest recorded stages, Latin versification was based, like modern E nglish, o n ac cent r ather t han, on t he arbitrary definition of the length of syllables, as in ancient Greek. That accentual system plus a preference for alliteration characterized Latin Sat ur nian ver se, as the ancient system is known.

Around the beginning of the second century b.c.e., the Roman poet and playwright Quint us Ennius introduced a version of the Greek system into Latin prosody. He also composed a series of dignified ep igrams t hat ex horted p eople to observe high-minded c ivic v alues. U nder t he influence of a g rowing Roman popular taste for all things Greek, epigrams in the Greek manner steadily gained in popularity among both writers and r eaders. C atu ll us c omposed m emorable examples on s ubjects t hat i ncluded l ove. M a r ti al's work in the idiom (see Epigrams) made it broadly pop uar. Moreover, among the Roman upper classes there was a vogue for the composition of the epigram that contributed to its becoming the principal genre of the time. Over time, too, t he sub ject ma tter de emed app ropriate f or epigrams broadened so that everything from the noblest to t he most obscene topics became grist for their mill.

The e pigram r etained i ts p opularity w ell i nto the Christian er a and e ven i nto the 21st c entury. Numerous Christian epigrams appear in both the Latin a nd t he Gr eek l anguages o n t he na tive peninsulas a nd t hroughout t he two c ultures' diaspora—particularly a t B yzantium (Constantinople), where the genre endured and where anthologies of work in both languages were compiled.

Epigrams Callimachus (third century B.C.E.) In his o wn e poch, C allimachus w as m ost famous, though not universally admired, for his epigr a ms. Of these brief, pithy, often humorous, and a lways p olished p oems, 6 4 e xamples s urvive. These treat a broad array of subjects in an equally b road sp ectrum of e motional registers always perfectly suited to b oth the subject and the way the poet handles it, as we see in examples of brief epitaphs. The first of these, epigram 1, e vokes t he p oet's sa dness a s he re calls h is friend and brother poet, Herakleitos of Halikarnassos, w hose p oems a re de athless " nightingales" that a re beyond the grasp of the king of the u nderworld. The f ourth o f C allimachus's epigrams briefly reports the pious act of Leontikos, who found an anonymous body washed up on the beach and, in an act of piety, buried it. The tears Leontikos shed, however, were for his own mortality.

Among the epitaphs in C allimachus's collection of funereal epigrams we find number 16—an epitaph for the common grave of the poet's father and son. It evokes sympathy for the poet's ironic double loss through its understatement. The following e pitaph, e pigram 1 7, i s C allimachus's own. I n i t, h e reports: "... his l ine / w as v erse, his diversion wine." It is a nonsentimental, minimalist, a nd a musing a utobiographical v erse epitaph.

Some of the epigrams contain quite elaborate jokes. I n e pigram 2 4, f or i nstance, a pa sserby calls on the de ad Charidas to answer questions about the underworld. The questioner learns the bad n ews: The u nderworld i s d ark, t here i s n o way out, and its king, Pluto, is a myth. The good news, however, is the low cost of living.

A series of epigrams seem designed to accompany votive offerings presented on t he a ltars of

the gods. A mong t hese, s ome seem de signed to accompany real gifts, and others, like the portrait and in timate a pparel of a s treetwalker na med Simone offered to Aphrodite, seem fictive.

Epigrams 4 5–57 de al self-mockingly y et touchingly with C allimachus's v arious i nfatuations with beautiful young men and his remedies against the god of love, Eros. Epigram 58 b rings that theme together with an assertion of the poet's refined tastes in the literary and personal realms. A r eader finds t hat he " hates t he p oems" t hat comprise the ancient Greek c ycle of epics. Si milarly, the poet dislikes heavily trodden highways, drinking from public fountains, and promiscuous lovers. H e t herefore r ejects a ha ndsome ma n named Lysanias.

The 59th through the 63rd epigrams continue to chronicle Callimachus's literary tastes and his preferences for the new, brief, and pithy polished over the extensive, familiar, and careless. In the 62nd e pigram, the poet praises A ratos of S oloi, who writes "terse, subtle tokens of long effort at night."

The 6 4th o f t he su rviving e pigrams i s a n admonitory p oem based on t he experience of a certain Pi ttakos o f M ytilene. I t adv ises a gainst overreaching in seeking a wealthy mate and also, presumably, against trying a nything unsuited to one's situation and capacities.

Epigrams Martial (ca. 86–ca. 98 c.e.)

Martial's 14 books of *Epigrams* were i nstant successes f rom t he m oment t he first book appeared. A part of t heir p opularity, of c ourse, stemmed f rom t he f act t hat t he e pigr a m was already b y f ar t he m ost p opular l iterary g enre among Romans. The poet Cat ul l us had brought the verse genre into vogue in Rome, and a s eries of ot her p oets, w hose works a re a lmost to tally

232 Epistle of Barnabas, The

lost, followed h im i n t he p ractice of t he g enre. Some of their names survive principally because Martial points to them as sources of his inspiration: Lentulus Gaetulicus, Domitius Marsus, and Albinovanus Pedo. Moreover, the composition of epigrams was a popular pastime among the social elite of Rome.

Martial, ho wever, ga ve t he g enre a f orm t hat would characterize the epigram for centuries. First of all, his subjects were regularly drawn from the real life of the city. An epigram might describe one of the great public spectacles-the "circuses" that the powerful afforded to keep the common people entertained. I t m ight b e a p ersonally de signed verset hat h e had w ritten o n commission-in effect, a g reeting card b y M artial. A n ep igram might contain a recognizable caricature of a person, b ut i t w ould m ore l ikely c ontain a s tylized character type. Martial moved the stock theatrical characters of the Roman comedies into his verses and added types to the cluster: to misers and parasites, to the vainglorious and the con artists, Martial a dded self-important p oets, pl agiarists w ho borrowed Martial's work without crediting it, and fading beauties who found lovers only with increasing difficulty. In this epigrammatic pre en ta tion of character flaws made funny through exaggeration, Martial gave the Renaissance a model for a favorite prose form: the character.

A technique that Martial perfected involves his concluding an epigram with a witticism that gave a brilliant final point to t he whole performance. Such a tag appears in *Epigrams* 8:13, addressed to his friend Priscus, who had apparently asked why Martial d id n ot w ish to marry a wealthy wife. Martial's reply: "I don't want to be my wife's wife." Then, with amusing double entendre, Martial continues: "The ma tron sho uld be under her husband," followed by the tag: "That's the only way a man and a woman can be equal."

The l iterary h istorian Gi an Bi aggio C onte summarizes r eceived o pinion c oncerning M artial's typical epigrammatic pattern: He describes the s ubject o f h is p oem, h uman o r o therwise, establishing an expectation—often unconscious in his reader. Then, in the end of the p oem, he surprises h is r eader w ith a h umorous pa radox. Beyond t his, Martial u sed t he r eal l anguage o f real people. Some of that language is humorously obscene, and his subject matter never shies away from th e e arthier p ractices o f the R oman population.

While all those aspects of Martial's verse made him a popular poet, it was his mastery of deploying the evocative power of language to to uch not only h is readers' sense of h umor but a lso t heir heartstrings that sets him among the great poets of the Western tradition. He can e voke s adness, he can be polished, or he can be solemn and funny at the same time.

Sometimes he w as a lso p olitical. W hile t hat tendency contributed to his popularity for a time, it a lso ne cessitated h is r ewriting t he 10th b ook when the Emperor Domitian's successors repudiated Domitian's memory after his death. Martial scrambled to excise from the 10th book certain passages t hat p raised Do mitian i mmoderately. The book was reissued, but the damage had been done. Martial found it expedient and he althy to retire from the Rome he loved to his native Spain. There he languished unhappy for a while until he died.

Epistle of Barnabas, The Anonymous (ca. 70–135 c.e.)

Though some scholars have argued for a narrower time frame within which the Epistle of Barnabas

can be dated, internal evidence suggests that the document must have been written between the destruction in 70 c.e. of the temple built by Herod in Jerusalem and the construction on its site of a new one in 135. The attribution both of the letter and its embedded tract to Barnabas, the associate of the apostle Paul, seems to have occurred retrospectively. Euse bius, the third-century bishop of Caesarea, c onsidered t he a ttribution w rong, and the document's militant anti-Jewish content seems inconsistent, according to the church historian B art D. Ehrman, with what we k now of Barnabas's views. O ther evidence p oints to t he possibility that the epistle was composed in Alexandria, Egypt, though some commentators have offered Asia Minor and Syro-Palestine as alternatives. In Egypt, the letter of Barnabas was included as Scripture in a New Test a ment ma nuscript (Codex Sinaiticus).

Whatever the o ccasion for the epistle's composition, from t he po int of v iew of s ubsequent Judeo- Christian relations, it is just as well that the work was finally excluded from t he text of the N ew T estament, f or t he w ork a rgues t hat, inspired by an evil angel, the Jewish religion has always erred by misunderstanding its own scriptures and that it continues to do so. In the fourth chapter, for e xample, t he e pistle a rgues a gainst persons who cla im t hat the c ovenant b etween God and God's people belongs both to Jews and to Christians. In support of such views, the author argues that though God inscribed the Ten Commandments on a stone tablet with his own finger, when t he J ewish people er red b y w orshipping idols, the tablet was smashed and, with it, so was the J ews' c ovenant w ith t he L ord. This ev ent, says the epistle, prepared the way for the new covenant between God's "beloved, Jesus" and the Christian people.

Having presented a series of arguments along these lines, the epistle's author reminds his readers of the t wo paths of light and darkness—the first ma intained by " the light-bearing an gels of God," and t he o ther by " the a ngels of S atan." From t hat p oint, the e pistle e ssentially r epeats the views a bout t he w ay of l ife and t he w ay of death proposed in the *Didach e: The Teach ing* of the Twelve Apostles. Then, after admonishing his readers that judgment day is near at hand, the Epistle of Barnabas's author salutes his readers lovingly and ends his letter.

Epistles Horace (ca. 20–15 B.C.E.)

F or H orace, the e pistolary poem was not only a departure from his previous practice in his *Odes* and in his often- satiric *Epodes*, it was also likely a n ew genre altogether. To be sure there had been earlier verse letters, but to make a s ystematic co llection o f t hem seems unpre œdented.

Two sets of Horatian *Epistles* appeared. In the first set, the poet adopted the philosophical perspective of a n aging person who has advice and encouragement to offer on the conduct of life. He also wishes to recall portions of his personal history. Taken as a group, the letters of the first collection offer their add ressees an overview of the benefits of a life conducted at a distance from Rome's u rban confusion and i n a ple asant a nd withdrawn place, b oth geo graph ially and psychologically. They are the work of a Horace more serene than the poet of his *Sati r es*.

In Epistle I.1, Horace asserts his in depen derce from a ll f ormal p hilosophical s chools a nd h is capacity e ither f or e ngagement i n or for w ithdrawal from civic a ffairs. At the same time, he seems u neasy w ith a l ife t hat w avers b etween restraint a nd d amaging self-indulgence. A s i n Epistle I.8, he also yearns for Rome when he is at Tivoli a nd vice versa. He gives an impression of

wanting to be both teacher and exemplar, but at the s ame t ime, he s eems a ware t hat h is o wn imperfections may disqualify him for the task.

In t he l etters of t he s econd b ook, H orace directs his attention to artistic and especially literary ma tters. "Epistle to Diognetus, The" (ca. 150–190 c.e.)

Not incorporated into the body of material comprising the writings of the *Apos to li c Fat hers of the Christ ian Church* until the 18th century, the 12-chapter epistle to the pagan Diognetus includes 1 0 c hapters of a l etter a nswering t he inquiries of i ts o therwise u nknown add ressee. Diognetus wanted to know more about the Christians and their God. He queried their reasons for rejecting the religious o bservances of both the Jews a nd the G reeks. H e w ondered why, if t he beliefs of t he C hristians were t rue, t hey had appeared s o c omparatively l ate in hi story. The polished answer to many of his questions is one of the d istinguished l iterary d ocuments of la te second- century Christianity.

Chapters 11 and 12, however, were clearly written by a d ifferent though also uncertain author. As historian of Christianity Bart D. Ehrman tells us, they appear to derive from a homily rather than from a letter. As compared with the epistle's earlier sections, chapters 11 and 12 take a m ore generous view of the Jewish religion as a precursor of Christianity, especially as regards the validity of Jewish law and the prophets.

After g reeting D iognetus a nd en couraging him to prepare his mind to r eceive information that will make him a new p erson, t he a uthor points o ut t hat the g ods D iognetus c urrently worships h ave b een fab ricated b y artisans an d are deaf, blind, dumb, and decaying. Those made of s tone a nd c eramics, m oreover, get n eglected while t hose m ade f rom precious me tals a re safeguarded.

The letter's a uthor n ext p oints o ut w here he thinks the Jews go astray in such matters as "their anxiety over food," superstitions concerning the Sabbath, and the practice of circumcision.

In the fifth chapter, the author enumerates the excellences of t he Ch ristians, who may dw ell anywhere, speak any language, work at any trade or profession, and marry and have children like everyone else, and though they observe the laws of t heir home lands, t hey a re everywhere p ersecuted and repay the evils they suffer with good. Wherever they live, however, they are the citizens of heaven.

Christians, says the author in the sixth chapter, are to the world as the soul is to the body, and he explains that analogy in some detail, concluding t hat this is the r ole t hat G od has a ssigned them and they cannot rightfully abandon it. The author then addresses the means by which God chose to convey Christian truth to the world and explains Christ's role and identity as "the craftsman and maker of all things." Chapter 8 be gins b y a sking t his q uestion: Before C hrist c ame, " what person... had any idea w hat G od was l ike?" The c hapter a nd t he one fol lowing c ontinue by expostulating on t he ways in which God revealed his nature to human beings through Christ, and how Christ's sacrifice brought p eople the promise of immortality. The 10th chapter instructs Diognetus in what he must do i f he de sires to ac quire C hristian f aith a nd escape the fires of eternal condemnation.

The 11th chapter differs markedly in style and vocabulary and changes the subject, discoursing, first, on the role of the author as "a teacher of the nations." Next, the writer considers the embodiment of the logos—God's word—in Christ as he worked among his disciples and as he offers grace to those who will ac cept it. In the 12th chapter, the wr iter co ncludes b y co unseling t he ac ceptance of the "true, comprehensible word" and its accompanying salvation.

Born on the island of Cyrene, Eratosthenes studied w ith C all imachus, sp ent s everal y ears i n Athens as a student, and then, at the invitation of the Greek pharaoh, P tolemy III, m oved to A lexandria as royal tutor. Eratosthenes is known for his *Chronology*—a work that tried to a scertain the important dates of l iterary a nd p olitical h istory a nd p rehistory. He wrote learnedly about mathematics, particularly p rime n umbers. A r ch imedes r egarded Eratosthenes as his mathematical peer. He a lso wrote two philosophical works, one about Pl at o and an other a bout the philos opher Ariston. Beyond those subjects, he turned his attention to geography. In this field, he was the first to arrive mathematically at an accurate estimate of the circumference of t he e arth, which he k new to b e round.

The first book of E sdras be gins by tracing the history of the Je wish p eople's B abylonian e xile and, at the order of the Persian king Cyrus the Great, their eventual return to Israel. First Esdras describes the ho nored s tatus the J ews en joyed under the rule of the Persian Empire, beginning with King Cyrus (ruled ca. 548–529 b.c.e.), who, in keeping with his policy of religious conciliation with his subject peoples, authorized rebuilding the Temple of S olomon that the Babylonians had razed.

An interesting a spect of First E sdras a ppears in its fr equent recourse to a nd quotation f rom documents c ontained in v arious ro yal r epositories in Persian territory. T hese i nclude le tters to a nd from the Persian r ulers Da rius, C yrus, and A rtaxerxes. If t he documents—quoted i n detail w ith cross-references to t heir a rchival repositories— are authentic, they affirm the historicity of t he ac tivities d escribed. If t he documents a re f abricated, t heir c itation n onetheless lends a n a ir o f a uthenticity to t he e vents a s narrated.

The First Book of Esdras concludes, first, with the emergence of the prophet E zra as the chief

conserver a nd i nterpreter of G od's l aw f or t he repatriated J ewish p eople and, s econd, w ith a considerable xen ophobic d iatribe a bout t he necessity for t hose J ewish m en w ho had t aken foreign wives to send the women away.

The Second Book of Esdras opens with a 19generation, p atrilineal genealogy of the prophet Ezra, t racing h is l ine to A aron of t he t ribe of Levi. This is followed by Ezra, speaking in his own voice and describing the way that the Lord called him to preach while Ezra was a prisoner in Media du ring the r eign of A rtaxerxes (d. 242 c.e.). E zra p reaches that the Lord is displeased with the J ews an d is t ransferring h is f avor to another people—the Gentiles—who have accepted a new prophet, the Son of God.

Ezra next prophesies concerning the mystery of human destiny. His recital contains a report of a conversation with the a ngel Uriel and revelations by the a rchangel Jeremiel. Jeremiel g rants Ezra v isions a nd d escribes so me o f the a wful events that will presage the end: Persia will have become a trackless desert, the sun will shine at night, "trees will drip blood," "nations will be in confusion," and the very courses of the stars will change. W aking from the dream in which he envisioned all this, the prophet is very naturally upset, but more and worse is to come. In a series of dream visions, the balance of the book describes the trials to be visited on humanity during the last d ays. A mong t hese i s a n a llegorical v ision whose m eaning a n a ngel i nterprets f or E zra. Finally, the angel utters a series of prophecies of doom b ut p romises t he s alvation of t he c hosen people. Though t hey a re ne ver n amed, Ezra unmistakably t hinks th e C hristians t o be t he chosen ones.

Euclid (fl. 300 B.C.E.) *Greek prose writer*

Though no information concerning the details of Euclid's life survives, he is credited with having written one of the most popular books of all time. It seems fairly certain that Euclid incorporated the work of his pre deæs ærs into his *Elements* (of mathematics) a nd t hat h is successors em ended his w ork. F or t wo m illennia, n onetheless, s tudents of both plane and solid geometry and of the theory of n umbers h ave studied f rom v olumes bearing his name.

Beyond this best known of h is w ritings, t wo other work s b y Euc lid a lso su rvive, *Optics* and *Phaenomena*. The title of the first work indicates its content, ex cept that the science of optics among Euclid's contemporaries dealt primarily with theories of vision rather than also with the properties of light. The second work applies spherical geometry to the study of astronomy. Other works dealing with music whose authorship remains in dispute have also sometimes been attributed to Euclid.

Euhemerus (fl. fourth century B.C.E.) *Greek prose writer*

Perhaps a native of Messene, Euhemerus ranks among th e e arly Gr eek m ythographers a nd utopian novelists. Though the texts and most commentary on them h ave b een l ost, e xtant fragments s uggest t he shap e o f a f ascinating novel. On the island, he finds a golden column containing inscriptions recording the deeds of Uranus, the Greek deity personifying the heavens, of Cronus, who personifies time, and of Zeus, the king of the Greek pantheon of gods. Through the record on the column, Euhemerus discovers that each of the three gods had once lived as men and ruled as kings. Their divinity had been bestowed on them by their admiring subjects who had ele vated their leaders to the status of gods-as the credulous often did and do.

Eumenides, The Aeschylus (458 B.C.E.)

The final t ragedy in A eschylus's Or est eia, the only surviving complete trilogy from the theater of a ncient Greece, *The Eume nides* takes its name f rom a eu phemism applied to t he Greek mythical b eings, t he Fu ries, w hen add ressing them in prayer. One did not want to offend these avenging deities, born from the blood of the mutilated pre- Oympian god U ranus, b y add ressing them with a name they might find u nflattering. Thus, o ne p rayed i nstead to " the k indly o nes," which is what *eumenides* means.

The first t wo plays in *Oresteia*, which won first prize at the Gr eat Dionysda—the A thenian City Festival of the god Dionysus—in the year of their composition are Aga memnon a nd The C hoephori. The entire s equence of plays centers on the effects of a curse on A treus and his d escendants o ver a s eries of g enerations (detailed in *Agamemnon*). In *Agamemnon*, the curse manifested itself when, during, the Trojan War, the Greek general Agamemnon had to sacrifice h is d aughter I phigenia to s ecure a f avorable wind for the fleet to sail east, leading to h is wife Clytemnestra's subsequent hatred and infidelity and her murder him upon his return from the war.

In *The C oephori*, A gamemnon a nd C lytemnestra's son, Orestes, is forced by oracular prophecy t o a venge h is f ather's de ath b y k illing h is mother and her paramour, Aegisthus. The fact of his having become a matricide, ho wever, b egins to d rive h im mad, a nd a s *The C oephori* ends, Orestes undertakes a pilgrimage to the temple of Apollo at Delphi to seek counsel from the prophet Loxias, and, he hopes, to ga in absolution and an end to the curse, which has been afflicting generation after g eneration o ft he de scendants o f Atreus.

The Eumenides opens with the Pythian priestess of Apollo praying at the temple to the Olympian g ods and t o th ose who p receded t hem. S he goes to the central altar and immediately returns shaking with fear, for on the altar the Furies are sleeping in the fearsome shapes of Harpies, and a man, Orestes, is also there. She characterizes him as "one abhorred by heaven."

The p riestess e xits, a nd t he c entral o pening doors of the inner stage reveal Orestes embracing the altar and the Furies sleeping nearby. The sun god Ap ollo a nd the gods' m essenger, He rmes, appear. Ap ollo c omforts O restes, prom ises h im his protection, instructs him to make a pilgrimage to A thens a nd emb race t he a ltar of A thena there, and s ends H ermes with him as a guard. They exit, and the ghost of Clytemnestra enters to try to awaken the sleeping Furies by pleading the cause of a mother murdered by her s on's hand. The drowsy Furies-represented by the chorusslowly awaken and lament that Orestes has escaped them. They blame Apollo, and in the ensuing discussion, the immortals discuss the merits of the case: Who is worse, a wife who kills a husband or a son who kills a mother to settle the score? The outcome is a draw. The Furies refuse to relinquish their quest and set out on Orestes' trail.

The scene shifts to A thens, where O restes is clinging t o A thena's altar a nd p raying. The Furies enter, having t racked h im down by following the smell of blo od like hounds. A thena, the g oddess o f w isdom, e nters, ha ving co me from her altars at Troy to hear the arguments of the adversaries. The Furies plead their case and ask Athena to serve as judge. She asks if they will be content with her judgment, and they assent. The goddess then turns to Orestes, commanding him to identify himself, give his genealogy, and make h is def ense. H e c omplies, b ut A thena avoids making judgment, characterizing the dispute a s t oo weighty e ven f or her w isdom. She exits to empanel a jury of 12 Athenian citizens, and th e a rguments b egin a fresh. A eschylus momentarily digresses into the science of etiology or origins. The j ury, w e s oon le arn, i s t he original of the *Areopagus*—the revered court of wise j udges w ho c onvened o n A res Hill i n Athens.

Apollo testifies in support of Orestes. It was Apollo's will that Orestes carried out, and that should absolve h im of bloodguilt. Q uestioned by the leader of the chorus, Orestes admits that he s lew C lytemnestra, t hat he c ut he r t hroat, and that he was impelled to do so by the oracles of Ap ollo. Ap ollo, i n h is t urn, a sserts t hat he was performing the will of Zeus. The question is difficult and the a rguments of b oth si des weighty.

Eventually, however, the j urors cast their ballots, and as they do s o, A pollo and the leader of the c horus of F uries c ontinue t he a rgument. Athena c asts the final v ote in f avor of O restes. When the votes are counted, perhaps predictably, they t ie: s ix for a nd si x a gainst O restes. This means that Orestes has won. He is absolved of his guilt, and the c urse on the house of A treus has ended.

The Furies are very displeased. They feel that the younger gods, the Olympians, have disdained them, and they threaten vengeance on the city of Athens. Athena, however, in her wisdom, offers the older deities a new role in the Olympian order of t hings. They will no lon ger b e the F uries, wreaking vengeance on malefactors; rather, they will become "the kindly ones"—the Eumenides in keeping with what people had formerly called them to keep their fury at bay. Happy with that solution, the former Fu ries a gree, a nd the pl ay ends i n a t riumphant pa rade a nd a pae an o f praise for the city of Athens.

Euripides (484 or 480–406 B.C.E.) *Greek dramatist*

According t o t he Library of C ongress's on line cata bgue, between the turn of the 21st c entury and the moment of this writing, some 49 separate translations in to m odern languages have been done of plays by Euripides. He exemplifies a writer w hose w ork w as p erhaps u ndervalued i n h is own time, b ut w hose r eputation a nd p opularity have been on the rise ever since.

We know little about Euripides' life, however, that is demonstrably factual. A pparently b orn at S alamis, h is exact b irth date is a matter of conjecture. H is first tragedies (perhaps including the lost *Daughters of Pelias*) were performed at Athens at the Great Dionysia in 455 b.c.e. Between that competition and t he t ime of h is death, he probably wrote 88 plays, of which 19 or 20 are extant. The authorship of one of them, *Rhesus*, remains in dispute, and that play has not been included in the Loeb Classical Library's bilingual edition of his complete works.

Though four groups of his plays-three examples of tragedy and a sat yr play-were regularly s elected to c ompete with t hose of t wo o ther tragedians at the a nnual A thenian fe stival (perhaps 22 t imes), Euripides' entries won first place only four times. In 408 b.c.e., he moved to the court of King Archelaus of Macedonia, where he remained u ntil h is de ath. On e o f h is Englishlanguage t ranslators, R ichmond L attimore, sug gests that the foregoing is all that can confidently be sa id abo ut E uripides' l ife. L attimore r egards other assertions about Euripides as "fanciful gossip." On e such r epeatedly made a ssertion, ho wever, sa ys t hat Euripides i nitially a bandoned painting for playwriting. An other holds t hat he died as a result of being torn to pieces by Archelaus's hunting dogs.

240 Eusebius of Caesarea

Nevertheless, Lattimore suggests that the frequency, v ehemence, a nd d iscrimination w ith which the comic poets of Athens, including Ar isto phanes, r idiculed a nd pa rodied Eu ripides means that the playwright's work made a m ore lasting impression on them than the work of his more successful competitors.

Euripides' surviving works include: Al cest is, Andromache, The Bacchae, Children of Heracles, Cy clo ps, El ectra, Hecuba, He len, He racl es, H ippolyt us, I on, I phige nia i n A ul is, Iphigenia among the taurians, Medea, Orest es, The Phoenecian Women, The Sup pliant Women, and The Trojan Women. Additionally, in 1905 a fragment of papyrus, with a portion of Euripides' play Hypsipyle was discovered at the world's most important literary trash heap at the Egyptian site of the ancient city of Oxyrhynchus.

As the titles of his works suggest, Euripides mined the rich vein of Greek legend, as did many another writer before and after him. The Greeks accepted this body of legendary material as historical, and to a c onsiderable degree it prob ably was. E uripides, ho wever, t reated t hat ma terial differently from other playwrights. He highlighted the stressful effects of their internal conflicts on his characters. He tended to raise uncomfortable questions about the received views on religion and morality and conduct a concomitant social criticism. He was especially successful at portraying women as both heroines and villains. He o ften m odified h is l egendary material-as others a lso did-to accommodate t he r equirements of his stagecraft. The quality of his verse was a lso widely ad mired a mong h is contemporaries and his successors.

Sophoc les is said famously to have remarked that he himself portrayed men as they ought to be whereas Euripides showed them as they are. Literary history e choes that judgment concerning E uripides' re alism. A t t he s ame t ime, h is plays d isplay c ompositional f aults. B ecause he overloads his plots and sometimes his characters, his connections do n ot a lways w ork. He s ometimes gets c arried a way with the b eauty of h is verse and fails to integrate it into the play at hand. As a mole on the cheek of a great beauty sets off her loveliness, however, so Euripides' flaws principally serve to highlight the dramatic genius of a poet playwright who originated the proble m play, was a master of character portrayal, and, in the context of t ragedy, p ointed the way to ward romantic comedy.

Eusebius of Caesarea (ca. 264–340 c.E.) *Greek prose writer*

Although he became the bishop of Caesarea in Palestine, Eusebius did not believe in the physical resurrection of Christ. Rather, he subscribed to t he b elief o f t he Arians-eventually c ondemned as heretical-that Christ was the best of all c reated t hings, t he L ogos o r G od's w ord incarnate, but not the same substance as the Creator. He further argued that Christianity was not a new idea. The central idea of Christianityrighteous living-had been i mplicit i n t he Hebrew Bible all a long, and the Logos had inspired and appeared to prophets before. What was new about Christians was their organization into a church, their pious behavior, and their expanding influence. After the council of Nicaea produced what must have seemed to Eu sebius a confrontationally r adical c reed, h is p ronouncements on the central disagreement between the official and the Arian views of doctrine became more ambiguous and restrained. It does not seem that h e e ver fully s ubscribed to t he N icene Creed.

As a writer and Christian apologist and historian, nonetheless, Eusebius was virtually without p eer i n e arly e astern Christianity. Though no complete list of Eusebius's writings survives, the church historian J. Stevenson categorizes his known Greek writings under three headings: (1) writings about Holy Scripture, including efforts to e stablish a nd i mprove t he te xt of S cripture (textual c riticism), w ritings that e xplain S cripture (exegesis), and efforts to describe the physical details of t he pl aces d iscussed i n S cripture (biblical t opography); (2) w ritings t hat u ndertake to prove and defend the truth of the Christian religion (apologetics); and (3) works about church history and works in praise of the emperor C onstantine and his o wn pl ace a nd t hat of the Roman Empire in promoting the spread of Christianity.

In the first category, we find, first, Eusebius's *Gospel Questions and Solutions* (before 312 c. e.). In this work, he compares differences in the text of editions of the Bible. Of 10 books that he wrote providing a full indoctrination into the Christian faith, four survive with the title *Eclogae propheticae* (Prophetic eclogues). He also wrote a surviving b ut u neven g uide to t he geography of t he Bible, *Onomasticon*. Several more of his works on the same subject have not survived.

Eusebius made h is principal contributions to the second category, the field of Christian apologetics. B efore 3 03, he wrote 25 books defending Christianity a gainst the a ttacks of t he N eoplatonist Porphyry. He likewise defended the Christian faith against the comparisons that an official named Hierocles had drawn between Christ and Apollonius of Tyana (see Phil ost r a ius, L. Fl aviu s a nd l ife of a pol l onius of t yana). The titles of these works are, respectively, *Against Porphyry* and *Against Hierocles*. In a similar vein, he argued o n b ehalf of h is pre decess sor, Or igen, defending him from the attacks of another Christian apologist, Methodius.

Still in his role of Christian apologist, Eusebius authored his *Praeparatio* (Preparation), a 15-book attack on the mythic beliefs of the pagans and on their faith in o racles and a strology. In the same book, Eusebius ex plains Jewish scripture, d rawing examples from non-Jews and non-Christians in s upport of t heir ac curacy. B eyond t hat, he authored *Demonstratio* (Demonstration), a work in 20 books (of wh ich 10 s urvive) t hat explains Christ's fulfillment of Hebrew prophecy and discusses t he i ncarnation of G odhead i n C hrist's person.

In the third category of Eusebius's literary output, we find h is *Chronicle* of the h istory of the world down to the year 303. Having dealt in that book with the history of several nations, he next applied a similar method to a 10-book history of the church in which he traced the succession of Roman emperors and the succession of bishops at Alexandria, A ntioch, Jerusalem, and R ome through the year 324. The last two sections of the book—those d ealing w ith the p ersecution a nd martyrdom of Ch ristians a fter 303—strike Stevenson, w hose a rgument I f ollow here, a s add itions by another hand.

According to the ecclesiastical historian K irsopp Lake, Eusebius may well have served as the chief theological adviser to the emperor Constantine, though assertions that he took an active role in g overnment as a m ember of Constantine's council are probably not true. In any case, Eusebius saw the operation of Providence in the rule of Constantine and in the spread of Christianity as a result of the emperor's adoption of the creed as the Roman state religion. It was therefore in a spirit of ad miration t hat, p robably b etween 3 37 and 339, Eusebius undertook his *Life of Constantine*, a w ork f ull of p raise a nd appl ause f or t he emperor.

fables of Greece and Rome (apologues of Greece and Rome)

Brief didactic stories or poems, often about a nimals, fables or apologues that convey a m oral or predict t he c onsequences o f h uman b ehavior seem to have been a feature of the storytellers' art since telling stories began. The long line of practitioners of t he f able g enre s tretches back to t he ancients, particularly to the Greek fabulist Aesop (ca. 700 b.c.e.) as well as Ar chilo chu s, Stesichorus, an d H esiod; t o a ncient I ndia b efore t hose archaic Greeks; and finally into the mists of preliterate, oral storytelling.

The Greek teacher and principal figure in Pl ato 's dialogues, Socr at es, is known to have translated some of Aesop's fables into verse. Thereafter, Demetrius P halereus c ollected a b ody of f ables together, a nd si nce h is t ime, n ewly w ritten o r newly d iscovered f ables f rom v arious s ources tended to gravitate toward Aesop's name whether or not he had actually written them. Such add itions ar e known as *Aesopian* or *Aesopic fa bles*. Other c ollections were a lso c irculated or r ead aloud in Greece in elegiac verse (see el egy and el eg a ic poet ry).

In R ome b efore 50 c .e., a f reedman n amed Phaedrus (sometimes G aius I ulius Phaeder) issued fives book of fables in iambic verse. Largely drawn from Aesop, this collection also included fables from other later Alexandrian Greek sources a nd so me d rawn f rom t he a uthor's p ersonal experience. W hereas t he f able had e arlier b een used principally for such illustrative purposes as pointing up a moral or making a s atirical point, Phaedrus's contribution raised the fable into a literary category in its own right.

Around 1 00 c .e., a Ro man s cholar na med Valerius B abrius c ollected 123 A esopic fables many f rom P haedrus's versions—and re told them in Greek choliambic or Scazon meter (see quantitative ve r se). B abrius a nd P haedrus are the principal sources for the central Aesopic fables that have come down to us from ancient times, t hough l ater s cholars a nd s torytellers throughout the Middle Ages added to the fable genre, often assigning their additions to Aesop's authorship.

Fasti Ovid (ca. 7–8 c.E.)

An in complete c alendrical p oem (a p oem t hat uses t he ca lendar f or its f ramework), O vid's *Fasti* traces R oman festivals and o ther an nual events that took place in the capital city. Interested in the city's culture and the development of its ye arly celebrations—many d eriving f rom the otherwise largely defunct indigenous religion of pre-Roman Italy—the poet attempts to account for the origins of each event and the history of the mode of observance peculiar to each celebration or festival. He also offers an explanation of specific terminology associated with each event.

From the models available to him for such an enterprise, Ovid chose Callimachus's now-lost poem concerned with the origins of things, Aetia. In addition to the popularity of antiquarian topics, O vid m ay a lso h ave sought to defuse the imperial disapproval that at last drove him into exile. The emperor A ugust us C a esar's blo od uncle an d ado ptive f ather, J ul ius C a esar, had been responsible for reforming and regularizing the Roman calendar. Augustus himself was both the head of the Roman Empire and the chief priest of the state religion. A poem, therefore, that dealt with the origins and development of native religious festivals during each of the calendar's 12 months and one whose first draft was dedicated to Augustus may well have been aimed at improving Ovid's standing with his ruler. Unfortunately, the emperor s ent t he p oet i nto e xile b efore t he poem was ready for publication, and even a fter rededicating Fasti to Augustus and Tiberius's successor, Germanicus (better known as Caligula), Ovid proved to be too near the end of his life for the poem to help end his exile.

Fasti, by universal consent, is not among Ovid's most successful works. Only six of the original 12 books survive, and while it would be tedious for readers to fol low summaries of e ach of the s ix, what follows will convey an idea of what goes on.

Though March had been the first month of the original archaic Roman year, January came first in the current calendar. Obligingly, the two-faced god Janus, go d of do orways, for whom t he m onth is named, appears to the poet. The god carries a key that signifies h is r esponsibility as t he d eity w ho begins all things, so that one of his faces looks forward to what will be and the other backward to what was. There follows a series of que stions and answers. Ovid wants to k now, for instance, why the first day of the New Year was not a holiday for the Romans. Janus replies that not working on the year's first day would set a bad e xample. A fter a further series of questions and answers, Ovid asks Janus why the door to the temple sacred to him is always left open du ring w artime. Ja nus's a nswer suggests that the temple doors remain open to welcome h ome t he t roops fighting a broad. D uring peacetime, they are closed to protect the citizens within the city's walls, keeping them safely within.

Six other days of the month of January get special attention from O vid. A mong t hese was the January 11, on which Rome celebrated the feast of the Agonalia. As an aid to understanding the purpose of this holiday, O vid considers the various etymologies that might underlie the name. Did a priest ask if he should strike the sacrificial animal by saying "Agone"? Did it, rather, a llude to the sacrifice of lambs? Is it associated with the anticipatory suffering of the victim? Or did it allude to the G reek ter m f or t he ga mes t hat u sed to b e played as a part of the festival in bygone days? Ovid settles on the explanation that the name of the holiday is associated with an antiquated word for sacrificial animals, agonia. With that theme in mind, Ovid moves into a consideration of the history of sacrifice itself.

Passing on to January 13—a day that Augustus had s elected to p rovide en tertainments f or t he

people of Rome—Ovid rehearses a story also told in V ir gil's *Aeneid*, the s tory of t he a lliance formed b etween the Trojans u nder A eneas a nd the G reek A rcadian e xile, K ing E vander. O vid tells of E vander's a rrival i n I taly a nd ha s h im prophesy the g reatness of the E mperor T iberius and his mother Livia.

We a lso find a ssociated with the festival of January 13 a tale of H ercules and Cacus. People liked stories about the popular Greek superhero, so Ovid gave them one that he set near Evander's city on the Tiber River. In it Hercules overcomes Cacus, a huge son of Vulcan.

Ovid associates February with *februa*, a word connected with purification rituals. March is the month of Mars, father of Romulus, the legendary founder of the city. O vid fancifully develops a false etymology for April, associating it with the word *aperit* (it opens). So April is a time for beginnings. Venus is its tutelary deity, so it is also the month for love.

Waxing i nventive o nce more, O vid associates May with *majestas* (majesty)—a p ersonification of which the Romans considered as a god. June, of course, is the m onth of t he que en of t he g ods, Juno. Into each of the six months whose texts are still extant, Ovid weaves real and mythical history, old Roman legend, and his own invention.

Fasti underlies a part of the conception of such later w orks a s E dmund Spenser's 1 6th-century poem *The Shepherd's Calendar*.

Fayan (Fa yen) Yang Xiong (ca. 1 c.E.)

Yang Xiong's *Fayan* (Exemplary Words, or Discourses on Method) is a dialogue between Yang and an unnamed questioner. Yang organized his work i nto 1 3 sections and paid homage to the *Anal ects* of Confucius by using that work as his model. Yang's deference to the *Analects*, however, extended be yond me rely e mulating the w ork's

rambling o rder a nd i ts c onversational to ne. H e also adopted Confucius's style and reproduced the great s age's di ction. A s a r esult, Y ang's w ork seemed stilted and archaic even in its own time.

Considering differences between the fu poems that appear in the foundational Confucian document, the *Boo k of Odes*, and those that he himself had written, Yang c oncluded that the beauty of the poems in the *Book of Odes* led readers to appreciate and emulate the rules for the conduct of life that the verses espoused by criticizing vice. The *fu* verse of his own epoch, on the other hand, was beautiful, but the object of that beauty was to lead people away from a consensus view of goodness and toward indulgence in private, sometimes depraved, codes of ethics. He considered contemporary *fu* "in effective as a form of persuasion."

Nonetheless, a s C hristopher L eigh C onnery tells us, Yang made at least two more attempts to bring fu up to its former standards. Before giving up the form altogether, he w rote a p oem, "*Chieh ch'ao*" (Dissolving ridicule). Though similar to fu, the work founded a new genre: the "essay of rejection." A final try joined together that novel mode with a verbally spare, morally serious, philosophically i nstructive p oem i n c lassical te trameter, "Chu p'in fu" (Rhapsody on expelling Poverty).

Korinna tells us that the Muse of t he dance, Terpsichore, i nspired h er to sing to t he "whiterobed women of Tanagra," that the city "delighted in [her] voice," and that she sang "the excellence" of both male and female heroes. She is known to have composed l ong na rratives i n t he B oetian dialect of Greek. Her poems sometimes fo cused on heroes and heroines from her own locale and sometimes retold the ancient myths, or "fathersongs" as she called them, often placing them in a new c ontext. A t radition su ggests t hat she instructed Pindar in composition.

Of the work of Korinna's elder contemporary, Myrtis, no example and only a single paraphrase survives. Myrtis was said to have instructed both Korinna and Pindar.

Represented by few surviving samples, Praxilla was born at Sicyon. She wrote hymns, drinking songs, a nd ch oral l yrics. A mong her su rviving lines ar e a f ew t hat s eem to pl ace t he e arthly things that death will cost her in order of preference: su nlight; " shining s tars"; t he m oon; " ripe cucumbers, apples, and pears."

Telesilla c ame f rom the G reek r egion o f Argos. Only nine fragments survive to a ttest to her work in choral lyrics—songs that she c omposed for performance by choirs of girls. A poetic me ter t hat s he p erhaps o riginated b ears her name—the telesilleion. The f ragments su ggest that p erhaps th e p raise of th e d eities A rtemis and Apollo figured prominently in her verse.

Erinna's place of birth is uncertain and is variously g iven a s L esbos, R hodes, Teos, a nd Telos. Erinna (fl. mid-fourth century b.c.e.) is known to have written a p oem in a d ialectical blending of Doric and Aolic forms of Greek. Entitled *The Distaff*, the work contained 300 epic hexameter lines and represented its author at age 19, spinning and weaving at her mother's behest. Some fragments of Erinna's poem survive. The poets and critics of the Hell enisti c Age warmly regarded her work. They considered her to be on a par with Sappho, whose w ork Er inna consciously e mulated, and with Homer.

The work of the early third century b.c.e. lyricist A nyte of Tegea is represented by a f ew (18) surviving f unerary e pigr a ms, s ome o f w hich remember a nimals. She is reputed to have been among the originators of pastoral repre æn ta tion of undomesticated landscape.

Dating f rom app roximately t he s ame p eriod, the Greek colonial poet from southern Italy, Nossis, t hought her self to b e a n hei ress of S appho. Among o ther v erse, she w rote lo ve p oetry, a nd what survives of her work is to be found in about a dozen anthologized epigrams, some of which seem written to accompany offerings for the altars of the gods. A number of the epigrams comment on the repre æn a tional qualities of p ortraits. I n one of these, she addresses a stranger sailing to the island of Mitylene, Sappho's home. Nossis names herself as a friend both to Sappho and to the Muses.

Moiro of B yzantium a lso lived in the third century b.c.e. Her s parse literary r emains c onfirm t hat s he at le ast, w rote e pigrams a nd a lso composed v erse i n h exameters. On e h exameter poem ex plains how t he e agle b ecame t he g od Zeus's symbol and how doves became the harbingers both of summer and of winter.

Dwelling at Athens, Hedyla was Moiro's approximate c ontemporary. The o ne su rviving e xample of her work concerns the wooing of the sea nymph Scylla, who elsewhere, though not in Hedyla's fragment, me tamorphoses i nto a mon ster. S cylla's wooer is a merman na med G laucus. The p oem's meter and form is that of the elegiac couplet.

Mellino, a œcond- œntury poet, though writing in Doric Greek, celebrated the power of Rome in five Sapphic stanzas. Melino presents the earthly goddess Roma as an Amazon-like figure who subordinates the p eople of t he w orld to Ro me's martial power.

female poets of ancient Japan (Lady

Kasa [fl. 8th C., C.E.], Princess Nukata [fl. 7th C. C.E.], Yosami [fl. 7th C., C.E.]) Literacy came late to Japan. Not until the eighth century c.e. were poems written down in a c ollection, though some of the individual works in that c ollection antedate it. N onetheless, p oetry was a live a nd well a nd being sung a nd remembered long before it achieved written form. At the court of the Japanese emperor and also at gubernatorial c ourts in the p rovinces, there seems to have been a class of women—court poets—whose function it w as t o c ompose p oems to b e per formed at state occasions.

Posterity owes the survival of 29 of Lady Kasa's poems in the pages of Japan's first and best poetry anthology, the Man'yōshū, to a popular genre of ancient J apanese verse c alled p oems o f m utual inquiry. These were poems ex changed b etween lovers, and Lady Kasa was one a mong many of the paramours of the poet oto mono Yakamoch i. Whereas the lady was in love with the poet, the poet was in love with love. At some point in their r elationship, L ady K asa r ealized t his a nd wrote a wonderful little poem tel ling h im j ust what it felt like to realize that, though she loved him, he did not love her. She expected that their love would feed b oth t heir sp irits. I nstead, she found him to be a s tarveling with no emotional nourishment to offer her.

On the other hand, the love between the poet Princess N ukata a nd h er f ormer h usband, t he crown prince who became Emperor Temmu, survived her second marriage to another husband. A pair of poems of mutual inquiry which appear in the $Man'y\bar{o}sh\bar{u}$, represents their exchanges. On a royal hunt, the prince waves a s leeve at her. She fears that her chaperone will notice and reproves his audacity, but the prince's r esponse acknowledges his continuing adoration. Yosami was the wife of the poet Kakinomoto no Hit omaro, who died while far away from her. Her poem tells how she a waits h im in vain and learns that he has been buried "in the Ravine of the Stone River." She invokes the clouds, a sking them to hover above his resting place so that she can see t hem and r emember her h usband. This poem is also preserved in the *Man'yōshū*.

Ferryboat, The (*The Tyrant*) Lucian (ca. 150 c.E.)

A c omedy in t he manner of A risto phanes, Lucian's little drama has a longer title in Greek one that means "The arrival of the ferryboat." Its principal s ubject concerns r ole reversal in t he underworld, where the rich and powerful and the poor and powerless each get their just desserts.

As the play opens, Charon, the ferryman of the dead, is complaining to C lotho, one of the fates who determine the course and end of each human life. Hermes, the messenger of the gods who conducts the shades of the newly dead to the shores of the River Styx for transport to the underworld, is v ery la te with the c urrent passengers, a nd Charon s uspects the god of n egligence. C lotho defends H ermes, w hom she t hen sp ies her ding the ghosts of the dead toward the river. The god is perspiring a nd a gitated. H ermes e xplains t hat one of the convoy ran away and it has been necessary to chase him down and bring him in chains. The en tire c onsignment of t he de ad, 1,004 of them, is now ready for embarkation.

Clotho and Charon board them by cohort: 300 exposed infants; 398 "unwept dead"—those over 60 years old; 84 killed in battle; eight lovelorn suicides;

several who died attempting coups d'état; one murdered by his wife and her lover; 16 victims of pirates; women and those drowned at sea; victims of fever; and Kyniskus, a cynic philosopher who is the only shade w ho s eems ple ased to be there. The shade who had to be dragged along in chains proves to be a n onhistorical t yrant na med M egapenthes, w ho continues to plead for a reprieve from his fate, even offering Clotho a bribe.

Megapenthes, whose n ame suggests the h igh esteem in which he holds himself, imagines that he will prove to be above being judged in h ell. Clotho reminds him that death is no respecter of persons.

A c obbler na med M ikyllus n ow p ushes f orward a nd co mplains of b eing made to w ait to board la st. H e i s a f oil for M egapenthes. B eing without p ossessions of any k ind, M ikyllus ha s nothing to regret leaving behind. In fact, he ha s been la ughing a t the g rief of M egapenthes a nd other r ich people in the assembly of ghosts who grieve at leaving their belongings.

Clotho t ells M ikyllus t o b oard, b ut Charon countermands her, saying the boat is already full. Mikyllus jumps into the Styx, proposing to swim, but Clotho prevents him, and the ferryman perforce d rags t he c obbler a board. A s t here i s n o seat for him, they put him a stride Megapenthes' neck.

The phi los opher K yniskus c onfesses t hat h e doesn't have the fare—a penny (an obole) usually buried w ith the dead. C haron lets h im e arn h is passage by rowing. W hile t he o ther de ad r egret the people and possessions left behind, Mikyllus seems t o be enjoying h imself. Hermes s uggests that he groan and lament about something for the sake o f conformity. O bliging, M ikyllus r egrets that he will never again go hungry or half-naked and cold. On arrival, he also has no way to pay his fare. Charon accepts his loss philosophically and returns to ferry across all the day's dead animals.

The off-loaded p assengers no wt rudge o ff toward t he pl ace o f j udgment. K yniskus a nd Mikyllus lin k a rms a nd are c onfronted b y t he Fury Ti siphone, w ho br ings t hem before t he judge of the dead, Rhadamanthys. Kyniskus asks to be examined first so that he may credibly bear witness a gainst so meone else. N o o ne b rings accusations a gainst h im, a nd w hen t he j udge examines his skin for marks of former sins, none can be found, though t here are some traces of former marks. Kyniskus explains that the study of philosophy by degrees cleansed his soul of the marks of his former sins. Rhadamanthys adjudges him worthy of the Elysian Fields in the islands of the blessed—the best situation one can hope for in the underworld. He can go there as soon as he has t estified. M ikyllus r eceives t he s ame judgment.

Now, however, Megapenthes comes before the bar of judgment. Kyniskus accuses him of overthrowing the state and seizing power, of 10,000 murders (confirmed by the appearance of a multitude of ghosts shrieking against Megapenthes), of innumerable rapes and sodomies, of treachery, and of overweening pride. Megapenthes ad mits the murders but denies the other accusations.

Kyniskus has Hermes call Megapenthes' couch and l amp t o t estify a gainst h im. These o bjects confirm K yniskus's a ccusations. R hadamanthys considers a fit p unishment, b ut K yniskus has a suggestion. W hereas m ost of t he de ad d rink of the waters of forgetfulness from the River Lethe, Megapenthes i nstead w ill be condemned t o remember h is m isdeeds and to r ecall the p ower and delight he o nce en joyed, all the while being chained a longside Tantalus from whose l ips t he water of a sp ring f orever r ecedes, a nd b eyond whose reach a bunch of grapes forever dangles.

fiction as epistle, romance, and erotic prose

At some very early stage in the development of imaginative literature, u sing correspondence to tell stories became widespread. Thus, the boundaries, if there ever were a ny, between reportage and fiction blurred. This proved to be especially true in the period from the mid-second century b.c.e. until the early fourth century c.e. During that s pan of time, wri ters u sed t he e pistolary method i n a v ariety of im aginative w ays. One such was a series of letters home from an imaginary v oyage " beyond Thule"—that i s, f rom a point beyond the northernmost boundary of the known w orld. This was a uthored by t he Greek Antonius Diogenes (fl. second century c. e.). N o longer extant, it seems to have contained reports of a series of wildly imaginative happenings on a voyage to places where no one had g one before. Quotations from the work survive in the pages of St. Phot ius.

Antonius Diogenes' work apparently inspired both imitators and satirists. One finds an example of the latter in Luci a n's work, *True Histories* (second c entury c .e.). That w ork c leverly p arodies both the literary heirs of Diogenes and the miracles reported in the Christian Scriptures.

Related to t hese de velopments, the writers of romance fiction were quick to perceive the suitability of ex changes of letters between lovers as a way to sp in a g ood s tory. The result was t he epistolary novel. Practitioners of this form in the ancient world included the perhaps fictive Aristaenetus of Nicaea, who was credited with a series of erotic letters.

The Gr eek P art henius in the first century b.c.e. prepared a prose collection of melancholy erotic stories. He did this work at Rome, to which he had been taken as a military prisoner.

Iambichlus of S yria (d. c a. 3 30 c. e.) may b e considered the founding author of a for m s till very much with us—the prose, erotic, adventure romance. His novel was entitled *The Loves of Rho-dane and Sinonis* in 39 books. A few fragments and a summary survive.

Fully surviving examples of the ancient genre were penned by Heliodorus of Emesa (d. c a. 400 c. e.) and Longus (fl. ca. fourth–fifth century c. e.). Their w orks i nclude, r espectively, the *Ethiopian Story of Theagenes and Chariclea* in 10 books and Past or als of Daphnis and Chloe. As Heliodorus was a Christian bishop, the erotic elements of h is s tory are much repressed as h is hero a nd heroine resist the attractions of the flesh and wait for their formal union.

Another ancient writer of romance was Xenophon of E phesus (dates u nknown), who p repared a five-book romance entitled *The Story of Anthia and Abrocomas*. Chariton of Aphrodisia, about whom nothing else is known, prepared the extant *Love Story of Chaeras and Callirrhoe*. Finally, Eu mathius of E gypt p enned the tale of *Hysmine and Hysminias*.

First Letter of Clement to the

Corinthians, The (ca. first-second C.E.) Included as the first selection in the current form of the *Apost ol ic Fathers of the Chr ist ian Church*, and unlikely to have been written by Clement, this long and diffuse letter in the Greek language was written by someone in a uthority (though not yet papal authority) in the church at Rome to the church in Corinth, Greece. A group of u surpers h ave ove rthrown t he e stablished authorities of the C orinthian c hurch, and t he Roman author of the letter reproves the rebels for their disorderly behavior, urging them to restore the church to its former order and the former officials to their posts.

The letter's author gives examples of the orderly behavior of Hebr ew Bibl e's priests and prophets, of the natural order of the universe, and even of

the orderly and periodic rebirth of the mythical phoenix (perhaps here a symbol of the resurrected Christ) to e neourage the dissident Christians of Corinth t o c onform to d ivine e xpectations f or orderly, C hristian b ehavior b ased on "brotherly love," r ather than on personal adva ntage a nd ambition.

In his discussion of the letter, its most recent and a uthoritative E nglish t ranslator, B art D . Ehrman, s uggests that the m issive's d igressiveness c onforms t o a rhe torical for m c ommonly employed b y o rators i n Gr eece a nd Ro me to counsel "peace and harmony" in disorderly citystates. Ehrman s uggests that the letter, whoever wrote it—and C lement h imself do es r emain a n undemonstrated possibility—is notable on s everal counts. It demonstrates, first, close familiarity with J ewish S cripture b ut do es n ot y et ha ve a canonical New Test a ment to r ely on. It n onetheless q uotes J esus' w ords on t he ba sis o f o ral tradition and specifically cites chapter 47 of Paul's first letter to the Corinthians.

Next, the letter provides an early instance of an attempt to a ssert the authority of the c hurch at Rome over a c ongregation el sewhere when a s yet no hierarchical orga ri za ton had been established.

Finally, the epistle anticipates what would later become the orthodox view of the apostolic succession: J esus app ointed t he ap ostles, w ho na med their s uccessors. The u surpers o f C orinth had deposed those persons, called presbyters, and had thus e rred by intervening in t he orderly succession of authority traceable to Christ himself.

Fragments of Papias and Quadratus

(ca. 60–130 c.e.)

Included a mong the writings of *The Apostolic Fathers of the Christian Church* we find the fragmentary r emains of the writings of Papias and Quadratus, two early second-century Christians. Later Christian writers, including Eusebius of C a esar ea, t hought t hat P apias h ad been important. The adjective chosen by the scholar of early Ch ristian h istory, Ba rt D. E hrman, to describe b oth Pap ias a nd Q uadratus i s *protoorthodox*—that i s, b oth t hese e arly C hristians took positions that later came to characterize the orthodox views of a better- α ganized Christian church.

Sometime b etween 1 10 a nd 1 40, Pap ias, t he bishop of Hieropolis in A sia Minor, aut hored a five-volume work entitled Expositions of the Sayings of th e L ord. On ly fragments of it, ho wever, have survived-principally as quotations in the works of such other writers as Eusebius and Ireneus. S ome a ncients he ld the view that P apias had been personally acquainted with Jesus' disciple, John the son of Zebedee, but Papias himself denied t his. R ather, he c ollected t he s ayings o f the a postles from o thers who had heard them, preferring the testimony of eyewitnesses of apostolic p reaching to t he w ritten w ord. A lmost a ll commentators a gree that Papias was a c ompanion of Polycarp (see Letter of Polycarptothe Philip peans).

Papias played a role in the foundation of millenarian thinking—the notion that after the second coming, Christ would literally reign on earth for 1,000 y ears an d e stablish a n e arthly pa radise. Eusebius seems to ha ve thought this a si lly idea and f ound Pap ias e xceedingly u nintelligent. Nonetheless, Eusebius quotes him.

Among the fragments surviving is a tale that Judas I scariot s urvived hanging a nd t hereafter suffered h orribly from di sgusting physical a ilments. Papi as f urther recorded that the apostle John a nd h is b rother J ames were k illed b y t he Jews, and he de tailed later miracles, including a resurrection from the dead and the use of Jesus' name as an antidote against a deadly poison.

The single fragment from Q uadratus is a lso preserved by Eusebius in his *Ecclesiastical History*, 4.3. According to Eusebius, the fragment came from a defense of the Christian religion that Quadratus sent to the Roman emperor Aelius Hadri-

Frogs, The Aristophanes (405 B.C.E.)

Though mo dern c ritics ge nerally re gard *The Frogs* as one of Ar ist oph a nes' weaker plays, it nevertheless won the first p rize for c omedy a t the festival of Lena ea in the year of its production. M oreover, i n re sponse t o u nprecedented public demand, the play enjoyed a second performance the following week.

The play posits that the god Dionysus missed the tragedies p roduced in the god's honor by the recently deceased p laywright, E ur ipides at the Athenian festival of the Gr eat D ionysia. Dionysus therefore decided to descend into Hades and bring Euripides back to the land of the living. The play begins after Dionysus has reached this decision. Since the god do es n ot know the way to Hades, he and his slave Xanthias seek the advice of the Greek hero and immortal, H eracles (Hercules). H eracles had e arlier journeyed to t he u nderworld (see Eu ripides' *Her acles*).

Costuming makes a major contribution to the play's f un a nd to i ts si lliness. A s D ionysus a nd Xanthias appear on stage, D ionysus has donned the l ion s kin of He racles over t he g od's o wn saffron-colored silk robe. Dionysus also carries a huge club and is wearing a pa ir of high boots of the sort tragic actors wore to increase their stature on s tage. H is a ppearance i s utterly b izarre. His slave, Xanthias, enters mounted on a donkey. Xanthias is burdened with a n en ormous load of baggage for the journey, and a significant portion of the early stage business concerns his efforts to gain relief from this cargo. Thus costumed, the pair arrive at the door of the house of Heracles, who collapses with laughter at the sight of Dionysus. The god explains his longing f or Eu ripides a nd i nquires the w ay to Hell. Before giving directions, Heracles suggests a number of living poets as substitutes, but Dionysus i s firm. N ext H eracles of ffers s everal qu ick roads to Hade s. These include hanging, death by drinking hemlock as Socr at es did, and leaping from a h igh t ower. F inally, h owever, D ionysus asks Heracles to point the way that the hero had earlier followed.

Heracles explains that the way is long and that Dionysus w ill n eed t wo obols (coins) to pa y a f eryman. Now k nowing the route, the god and his slave set out. Xanthias complains again about the weight of h is b urden and su ggests hiring a porter. A f uneral passes, and D ionysus asks the deceased to help bear the burden. The corpse sits up and bargains over the fee. Dionysus finds the requested two drachmas—much higher than the ferry fare—too expensive, so Xanthias must again shoulder the entire load.

The pair soon arrives at the shore of the Stygian l ake an d h ails the f erryman of t he de ad, Charon. Charon accepts Dionysus as a passenger but re fuses to t ake a s lave, s o X anthias ha s to carry the luggage the long w ay ro und the l ake. Charon also makes a reluctant Dionysus row.

As they cross the lake, they first hear from offstage and then encounter the chorus of frogs from which the play takes its name. The frogs accompany the crossing by singing a ditty whose refrain, "Co-äx, co-äx, co-äx; / B rekekekek co-äx," ha s been adopted as a cheer for the athletic teams of a famous Ivy League university.

Dionysus joins the frogs in their song, and a contest e nsues to see whether the god or the amphibians can sing louder. Dionysus wins, the boat arrives at the far shore, and Xanthias trudges in from offstage.

Having arrived in Hell, the two travelers look about in search of father beaters and perjurers. Looking in the direction of the audience, they think they see many. They next see a phantom, Empusa, who de vours travelers at the behest of

252 Frogs, The

Hecate, g oddess of t he n ight. D ionysus i s v ery frightened, but the apparition disappears.

The pair next encounter a group of Dionysian revelers celebrating the Eleusinian Mysteries, and the travelers jo in t heir d ance. W hen t he d ance ends, the two enquire the way to t he dwelling of Dis, g od of t he underworld, and they discover themselves to b e a t i ts ga te. Their k nock i s answered b y A eacus, f ormerly k ing of Ae gina but now the judge of the dead.

Dionysus introduces himself as Heracles, and Aeacus flies i nto a r age. Heracles, i n h is e arlier trip, h ad c hoked C erberus, t he three-headed guard d og o f H ell. A eacus, w ho w as t he dog 's caretaker, bore the blame and su ffered the p unishment. A eacus t herefore t hreatens D ionysus with h orrible t ortures an d d eparts t o a rrange them. Dionysus, who by this time has emerged as a t horoughly c owardly dei ty, qu ickly doffs h is lion skin, giving it and h is club to X anthias, s o that master and slave exchange roles.

Just then a maid who serves the queen of the underworld, Persephone, enters. She invites Xanthias/Heracles to join her mistress at a feast in his honor. He is reluctant until she mentions dancing girls, a t w hich p oint h e accepts the i nvitation. Dionysus, however, insists that master and slave exchange costumes once again.

As soon as the god resumes the aspect of Heracles, however, a landlady enters. Heracles still owes her money for food and lodging during his journey years e arlier. D ionysus wants to s witch costumes again. As soon as he does, Aeacus predictably reappears with two muscular slaves. Undoubtedly recognizing that the costume exchanges are growing tedious, Aristophanes introduces a twist.

Athenian law on ly a ccepted as true the testimony of slaves if it h ad b een elicited u nder torture. Thus a master's willingness to allow his slave to be tortured was often construed as a mark of the master's innocence. Xanthias/Heracles quickwittedly offers D ionysus as a v ictim a nd l ists a number of horrible torments that he is willing to have h is o stensible slave endure. A eacus accepts his offer, promising to pa y d amages if the treatment disables Dionysus. Dionysus o bjects, wa rns everyone t hat he i s immortal, and reveals his true identity. Xanthias encourages A eacus to p roceed with the torture since, if Dionysus truly is immortal, he will not feel pain. Dionysus counters that Heracles is also immortal. A eacus decides to b eat e ach o ne i n turn. Both feel the blows but pretend not to. They disguise their cries by quoting verses that begin with: "Oh, Lord!" and "It hurts!" and "Oh!" Finally, u nable to de cide a bout t hem, A eacus t akes them before Dis, leaving the decision to the lord of t he u nderworld. The ch or us c loses t his section of the play with a song that blends satire of contemporary po litical a ffairs in A thens w ith appeals to Athenian patriotism.

As the action resumes, Aeacus and Xanthias discover they have much in common and embrace as friends. A clamor offstage, however, interrupts their affectionate exchanges. The noise proves to be an argument between the shades of A eschylus and Euripides. They are disputing the question of which one had b een a g reater tragedian. The greatest one is allowed to occupy a throne in Hell until one even greater arrives.

Xanthias asks why Sophocles does not enjoy the privilege. A eacus explains that S ophocles is satisfied to d efer to A eschylus, b ut t hat, sho uld Euripides c arry t he d ay, S ophocles w ill d ispute his victory. Thus, in a play that is a contest within a contest a nd t hat contains a s eries of contests between Di onysus and the frogs, D ionysus a nd Xanthias, and a potential contest between Euripides and Sophocles, a final contest now plays out. It b egins a s a r ancorous a rgument b etween t he two playwrights, but under Dionysus's direction, it becomes a contest in which the two compare their skills by discussing their works, exchanging insulting judgments, and by quoting from their own v erse. W ith a dmirable c ritical jud gment, Aristophanes finds lines from the work of each poet t hat, at least out of c ontext, s eem i nept or pompous.

The contest begins with Aeschylus's praying to Demeter w hile Eu ripides, w hom A ristophanes more t han once a ccuses of atheism, prays to the ether, t o h is v ocal c hords, t o r eason, and t o h is nostrils that "scent and sneer." While the cognoscenti of A thens may have found del ight in the extended exchange between the two poets, a le ss involved reader from a later age may find it rather wearing.

As the contest continues, Dionysus is unable to decide which of the two poets deserves the prize. Finally, the god decides to weigh the verse in a balance, as one might weigh cheese. This procedure produces an invariable result. Aeschylus's verse is always weightier and thus more meritorious. Yet still the god cannot make up his mind.

Pluto t ells D ionysus t hat he must d ecide o r return to the land of the living empty-handed. Dionysus, forced to judge, says that he will choose the poet h is so ul d esires. Eu ripides r eminds t he g od that h e h ad c ome to re scue h im, but D ionysus chooses Aeschylus. Pluto invites the travelers for a farewell dinner, the chorus sings them on their way, and the play ends with a typical dig at Aristophanes' enemy, the Athenian demagogue Cleophon.

Modern c ritics of the p lay h ave o ften b een hard-pressed not to s ee the literary judgment of Aristophanes him self in Dionysus's p reference for the work of Aeschylus.

Frontinus, Sextus Julius (Sextus Iulius Frontinus) (d. 103/104 c.e.) Roman historian

A Roman military governor, politician, and public official, Sextus Julius Frontinus first served as consul in the city of Rome around 72 or 73 c.e. He filled that office twice more in the years 98 and 100. I mmediately following h is first consulship, he became the governor of Britain, where he suppressed lo cal r esistance to Roman r ule. I n 8 6, Frontinus s erved a s pr oconsul of A sia. I n 97, under the emperor N erva, he b ecame the c ivil servant in charge of the construction and maintenance of the s ystem of aque ducts that su pplied the city of Rome with water.

A partly surviving monument to Roman ingenuity a nd eng ineering, t he aque ducts b rought water from as far away as 60 miles via a system of conduits that sometimes ran along structures 100 feet high. Frontinus wrote a surviving discussion of the history, workings, problems, maintenance, administration, a nd p olitical i nitiatives o f t he Roman w ater su pply. The w ork, *De A quis urb is Romae* (Concerning the water system of the city of Rome), richly d ocuments the w orkings o f Rome's civil administration.

fu poems

The ancient Chinese genre of fu verse was the earliest that provided opportunities for poets to display at once their lyricism, their talents at painting word pic tures, a ndt heir na rrative c apacities. Variously translated a s *descriptive po ems*, *prose poems*, *rhyme prose*, or *rhapsody*, *fu* poems made up approximately a fourth of the material included in the *Boo k of Odes* (*Shīing*). That work identifies the mode of the *fu* poem as "descriptive." Moreover, it identifies the poet So ng Yu, (Sung Yu) (290–223 b.c.e) as one of the two originators of the form.

254 fu poems

Several of So ng's *fu*—or at least p ortions of them—have often been anthologized in English: *The Summons of the Soul (Zhao Hun* [Chao Hun]) the authorship of this poem is sometimes assigned to S ong Y u's u ncle); *The N ine C hanges* or *Nine Arguments (Jiu Bian [Chiu pien])*; and a rhapsody entitled *The Wind*.

Virtually a ny de scribable sub ject i s g rist f or the *fu* poet's mill. Song Yu's uncle, Qu Yuan, the author of China's most c elebrated p oem, *Li s ao* (*Enc ou nt er ing S or r ow*), also a nticipated such aspects of the *fu* mode as the tone of lament that characterized early examples.

Other famous *fu* appeared in the second and third centuries b.c.e. The first one that has a firm date assigned to it is a poem on the evil omens that accompany the appearance of an owl. It was written by Jia Yi (Chia Yi) in 174 b.c.e. The same poet lamented the loss of Qu Yuan in his *fu* entitiled "*Grieving for Qu Yuan*."

Fu expanded its e xpressive c apacities in t he hands of Mei Sheng (?-140 b.c.). Mei abandoned the mournful cast that his predeces s σ s had lent the genre, making his *fu* at once more lighthearted and more lyrical.

A court poet of the Han dynasty, Sima X iangr u (Ssu-ma Hsiang-ju) rose to n ew heights of lyricism and introduced a new theme in a pair of fu celebrating imperial hunts. The subject matter of the genre expanded further as the poet Ban Gu (Pan Ku); (32–92 c.e.) u sed t he fu poem t o describe t he c apital c ities of t he Ha n dy nasty. That experiment spawned a practice that continues to this day—writing fu that describe and celebrate places.

Fu continued to b e written and anthologized throughout the period treated in these pages—a period ending roughly at the eighth century c. e. Authors since have never stopped penning examples of the genre throughout the subsequent history of Chinese letters.

Gallus, Gaius Cornelius (69–26 B.C.E.)

Roman poet

Except for nine lines re covered in 1978 in a papyrus fragment (papyrus Qasr Ibrîm), none of Gallus's works has survived. Posterity nonetheless remembers h im a s the poet who pop ular zed the el egy and el egia c poet ry in Latin, as he composed four books of verses in elegiac meter. These works told of his love for a n a ctress, Volumnia Cytheris, whom Gallus called by the pseudonym Lycoris in his verses. In these poems, he is thought to have begun the practice of c elebrating the subservience of a love r dominated by the will of his mistress.

Gallus w as a f riend o f V ir gil, w ho i n h is *Ecl ogues* praised Gallus's poetic accomplishment. We a lso le arn from V irgil that Volumnia Cytheris tired of Gallus and deserted him.

Gāthās Zoroaster (ca. 600 B.C.E.)

The entire surviving c orpus of l iterary work of the f ounder of a ma jor r eligion, t he P ersian prophet Z or oast er, is fo und in a group of 17 poems containing 900 lines in total. The *Gāthās*, as they are called, are the most sacred part of the Avesta, or Zoroastrian scripture. The poems have traditionally b een a rranged ac cording to t heir meter. Most of the poems invoke the Zoroastrian god of light, Ahura Mazda, calling for the divinity's help. The help required includes the acquisition and p rotection of c attle and l and with its attendant pro sperity. A ssertions of praise a lso accompany the expectation of the achievement of bliss.

The poet-prophet p rays to u nderstand t he mind, intentions, and requirements of the deity. He asserts that all his actions are undertaken with the will of the deity in mind. In other verses, he praises t he dei ty f or t he g oodness o f c reation. Zoroaster expects that good will eventually conquer evil and that human beings have an important role to play in achieving that outcome. They must choose between serving the forces of light and s erving t he f orces o f d arkness, a nd t hat choice has e ternal and u niversal consequences. The final o utcome r emains i n do ubt, a nd t he believer must strive to serve the forces of light. In the event t hat l ight a nd g oodness finally t riumph, the believer can look forward to rebirth and immortality.

Not numbered among those religions in which one is required to love one's enemies, Zoroaster's verse a sks when the deity will strike down the malicious and give victory to the devout and the righ tous. The verses suggest t hat s acrifice h as been r eplaced w ith w orship and p raise of t he divinity.

The Z oroastrian u niverse revealed in the verses is a place of a positive, divinely burning fire. Yet the Zoroastrians also envision a hell—a place of darkness inherited by the unrighteous.

The prayers of the prophet are not limited to requests for the souls of human beings. The souls of " the mot her c ow" and of t he ox are proper objects of the deity's concern and protection.

In a series of 20 questions with multiple parts, Zoroaster raises the issues that have always concerned peo ple: W ho o rdered t he s tars i n t heir courses? Who keeps the earth in its place? Who established t he w inds a nd t he w aters? On w hat grounds d o arm ies g ain victories? H ave f alse gods ever been good masters?

In the same section, Zoroaster also raises some questions that may imply a p eriod of exile in his own lifetime. He complains of being cast out and prays for f riends a nd suc cor. H e p rays t hat h is enemies' ho stility ma y r ecoil u pon t hem. H e excoriates false gods, blaming them for defrauding mankind of happiness and immortality.

The prophet also includes some private prayers, invoking the deity in the hope that his daughter and her husband will achieve happiness in their marriage.

Geography (*Geographika*) Strabo (ca. 7 c.E.)

Destined to b ecome one of the premier geographers of the ancient world, Strabo (ca. 64 b.c. e.ca. 24 c.e.) was born to a p rominent family of Roman citizens in the town of Amasia in Pontus. He studied at Rome and traveled in Egypt, Italy, Greece, and Asia, noting as he traveled some the material that he would organize into his valuable Greek- hnguage *Geographika*, or *Geography*.

Preserved in 17 books, with a short section missing from the seventh volume, St rabo's work first occupies two of them with anticipatory matter. In his first book, Strabo argues that geography is a science worthy of inclusion under the general heading of philosophy in that word's etymological sense of "the love of wisdom." This, he maintains, i s t rue de spite t he f aults o f e arlier writers on the subject who took no pains to give accurate and scientific ac counts of their subject rather than mythic ones. He goes on to review such geographical information as is contained in Homer a nd o thers who p receded h im. S trabo includes astronomy under geography and credits Homer with founding both sciences in his discussions of Odysseus's voyages around the Mediterranean (see The O dyssey). S trabo a lso i ncludes natural history as a subfield under geography, and so proposes to give accounts of the flora and fauna that h e e ncountered o n h is t ravels. H e m erged this material with similar accounts from his prede æs sors' work.

In r eviewing t he ac complishments o f suc h earlier geographers as Er at ost henes, Strabo is careful to point out their errors. A Stoic philosopher himself (see St oicism), Strabo is especially hard o n t hose w ho i ntermingle " romancing" with observation. He devotes most of the first two books t o d ebunking his predecessorsthough h e al so p raises th em w hen h e th inks they merit praise. Then, in the fifth a nd last chapter of the second book, he at last turns his attention to his own conclusions. He points out that, although a traveler across a s ea or over plains may t hink t hat w hat su rrounds h im i s flat, in fact the earth is spherical. He also makes clear, h owever, t hat f or h im the u niverse i s geocentric.

Nevertheless, since Strabo's principal objective in this section of his work is to describe the imaginary tr ansfer of p ortions of t he s urface of a sphere to a pl ane su rface, h is s cientific w eaknesses do l ittle d amage. Those fa ilings apart, however, he is a fine geopolitical observer.

258 Geography

Central to Strabo's thinking is the political fact that the city of Rome holds sway over much of the known world. Thus, a major geopolitical theme runs through the whole of h is work. He is a n imperial apologist who lived under the reigns of August us C aesar and T iberius. Moreover, the audience that Strabo envisioned for his work was one c omposed pr incipally of civil servants with administrative r esponsibilities f or t he a reas he discussed.

He a dmits t he limitations un der w hich he labors. Though he says he has traveled further to the east than any of his predecessor geographers, he confesses that some had been further west. He has not traveled in Italy very far north of Rome, and he has seen neither northern Europe nor Britain. He n eglects, m oreover, mo st re liable, firsthand Roman accounts of the places he discusses, though he did look at Juliu s Ca esa r's work and at a few others. His firsthand acquaintance with Greece is likewise very limited.

Strabo c oncludes h is s econd b ook b y b riefly noting nations, seas, and countries and by making remarks on their climates. In the third book, beginning in the west with Iberia, Strabo undertakes his account of Europe—an account that will occupy h im through the 10th volume. He relies chiefly o n s ources e xternal to h imself. I n t he fourth book, he turns his attention to G aul. The Roman ad ministrative d ivisions o f i ts G allic empire organize h is discussion. He also looks at Britain, Thule, and the Alps. J ulius C aesar a nd Pol ybius are his principal guides.

Italy and its outlying islands are the subjects of Strabo's fifth and sixth books. He ends this section with a description of the magnitude of the Roman Empire. One of Strabo's modern translators, W. F alconer, obs erves t hat the section on Italy is marred by his failure to c onsult the best authorities available to him.

In his seventh book, Strabo turns his attention to the tribes whose ho melands b order the Da nube. A portion of this book is lost, though efforts have been made to restore its content by consulting later summaries. In this discussion, ethnography e merges a s a p rincipal c oncern a s St rabo discusses s ome of t he customs of the p eoples dwelling in the region.

Books 8, 9, and 10 c oncern t hemselves with Greece and the su rrounding i slands, i ncluding Crete and other islands in the Aegean Sea. These books are characterized by a principle of organization s omewhat different from that of the former seven. In part, this is owing to the reverence that S trabo f elt f or Homer. W hen Hom er h as described t he p hysical f eatures o f a lo cation, Strabo puts the poet's description above both his own e yewitness account and t he ac counts t hat others had provided to the geographer.

With the 11th book, Strabo turns his attention to the countries lying east of the Don R iver. He follows E ratosthenes in dividing A sia, first i nto the regions lying north and south of the Taurus River's east- west flow and then subdividing northern Asia into four sections. The geographer treats the northern three of those sections in the 11th book. He discusses such matters as the lay of the land, the occupations of the people, and the distances in *stadia* between one location and another (one *stadion* equaled 600 feet, though the length of a foot was somewhat variable). Strabo gives the distance from Ephesus to Smyna, for example, as 320 stadia.

Books 1 2–14 c oncern t hemselves o nly w ith Anatolia—still in the part of Asia lying north of the Taurus. St rabo's a uthorities for t hese b ooks are principally such h istorians a s Pa trocles a nd Aristobulus, who traced the Asiatic campaigns of Alexander the Great.

With the 15th and 16th books, Strabo moves south of the Taurus River and into regions of Asia that he never personally visited. He covers both India and Persia in book 15, falling victim occasionally to the very propensity for "romancing" that he had blamed in others, as when he identifies an Indian people, the Sydracae, as the descendants of B acchus because grapevines proliferate in their country. He also recalls the perhaps otherwise u nnoted military campaigns of Hercules (see *Her acles*) in the region. Strabo's accounts of Indian ag riculture, local c ustoms, and e lephant training are both informative and entertaining. Similarities in climate lead Strabo into a digression concerning Egypt and Ethiopia in which he concludes t hat the s un i n t hese w arm r egions does n ot app roach t he e arth m ore c losely th an elsewhere. Rather, he suggests it shines more perpendicularly. H e a lso s uggests t hat the d usky complexions of t he i nhabitants of t hese r egions are not the result of sunlight, for sunlight cannot reach children in the womb.

After concluding the 16th book with accounts of A rabia, the I ndian O cean, and the Red S ea, Strabo turns his full attention in the 17th book to Egypt, E thiopia, and the north coast of Africa. These were regions in which Strabo had traveled extensively, so in addition to the d iscussions of previous aut hors, he pre sents m uch e yewitness material here. St rabo c oncludes h is g reat w ork with another brief consideration of the extent of the Roman Empire.

geography and geographers, Greek and Roman

Greek a nd Ro man k nowledge of g eography, a t first undoubtedly local and very limited, expanded with seafaring and with increasingly far-flung military and trading expeditions. One can draw a useful es timate of t he a ncient, well-informed, Mediterranean dwellers' assessment of the extent and character of the world they lived in by considering a map of the world drawn by the Egyptian geographer and astronomer Pt ol emy in the second century c.e.

On P tolemy's w orld ma p, t he w esternmost landmarks a re t he F ortunate Is les (the C anary Islands). In the northwest, Thule is mentioned perhaps i dentical w ith t he She tland Is lands, though some have argued for Iceland. Much of the Scandinavian peninsula is absent from Ptolemy's map, as a replace names to the north of Scythia (now R ussia and former S oviet dependencies), a region Ptolemy thought to be inhabited by a people called the Hyperboreans, whom Virgil mentions in his Georgics. Amber traders from what is today's Lithuania had traveled south at least as far as the edges of Greek and Roman spheres of influence by P tolemy's time, but p erhaps the s cholar was u naware o ft hose m erchants o r o ft heir origins.

As one might expect, the European and African areas ar ound t he s hores o f t he M editerranean, including A sia Min or, E urope as f ar n orth an d west a s military expeditions had p enetrated, a nd Asia as far east as Persia (Iran), are fairly accurately depicted on Ptolemy's map. East from that point, however, matters become a good deal more speculative. Ptolemy at least has a notion of the locations of pl aces a s far d istant to t he N orth a nd E ast a s Kashgar (now t he C hinese c ity o f Sh ufu) a nd beyond that to the n orthwestern corner of Ch ina near t he terminus o f t he Gr eat W all. The m ost easterly point on Ptolemy's map is also the southernmost point in Cambodia. Ptolemy had n o idea what ever of the existence of the Pacific Ocean.

Moving back west at a southerly latitude about 10 d egrees b elow t he e quator, P tolemy's n otions remain e ssentially f anciful u ntil h e reaches t he southern tributaries of the Nile River. About then, his map becomes reasonably accurate. Then, moving west, it once more grows blank until it reaches the Atlantic Ocean, where it represents the Atlantic c oastline t oward t he n orth qu ite ac curately. Ptolemy's map a ttempted to i nclude l and en circled by water beyond the known land masses. He succeeded i n r epresenting a bout a t hird of t he earth's land area with variable accuracy.

260 geography and geographers, Greek and Roman

Despite its flaws, P tolemy's map t ried with some s'uccess t o depict ac tual geographic fe atures. The ancients also invented other sorts of maps, though it is not always possible to ascribe them to the hands that drew them. One sort was a "T in O" map. Imagine a circle with the horizontal bar of a T touching the circle's circumference on two sides and the vertical bar touching the horizontal bar at the top and the circle's circumference at the bottom. The circle's circumference r epresented t he r iver o f o cean t hat w as thought to flow all the way a round the earth's continents. The T r epresented t he w aters t hat separated the three continents known to Europeans, Asians, and North Africans from one another. The top of the map-above Jerusalemwas east, the direction where Heaven was thought to lie.

Most pe- Christian Greek, Roman, and Egyptian astronomers and geographers knew the earth was a sp here. N ot u ntil C hristian g eographers tried to reconcile actual geography with biblical descriptions of geography did some, such as Cosmas Indic opl eust es, seriously come to imagine that the earth had to be flat.

Pre- Rolemaic Greek geographers inhabited a quasi-lterary t wilight z one. They constructed coastal itineraries, some real and some fanciful, describing ha rbors a nd wa ter so urces, la ndmarks, and encounters with people and animals. Called *peripluses*, these navigation guides were written by such authors as Hanno (fl. ca. 500 b. c. e.). Hanno claimed to have translated a do cument or iginally written in the P unic tongue of Carthage. This work described the places encountered by voyagers southbound from the Mediterranean along the Atlantic coast of Africa. Some of its points of interest were real, but others seem to be fanciful.

Hecatæus of M iletus, a lso w riting a bout 500 b.c.e., introduced a degree of scientific rigor into the *periplus*. Starting at t he St raits of Gib ralter and s ailing a round t he M editerranean i nto a nd around the Black Sea and then back again a long the s outhern s hore of t he Me diterranean, H ecatæus's work sometimes wanders from its course to i nvestigate t he i nhabitants of M editerranean islands a nd i nland p eoples a s well. S ome of t he work pr obably re sts o n the a uthor's p ersonal experience and some on information from other sources. The fragmentary nature of what survives obscures the matter.

A third very ancient *periplus*, that of Scylax of Caryanda (fl. sixth century b.c.e.), is said to have been commissioned by Darius I of Persia. Only descriptions of the work survive, but apparently Darius d irected Scylax to sail d own the Indus River to its m outh a nd report what he le arned. The later writers noted above referred to the work, as did others, including Ar istot 1 e.

Xenophon of At hens's *Anabasis* contributes to geographic information as it recounts the story of the way Xenophon led 10,000 Greek mercenaries home from Persia via overland routes. Pytheas of Massilia (ca. 380–ca. 310 b.c.e.), who authored both a *periplus* and a de scription of t he o cean, composed o ther early geo graph ical works, now lost.

The earliest Greek, however, to move geography f rom t he r ealm o f obs ervational na rrative and r eportage t o t he le vel o f s cience, w as t he Alexandrian scholar, l ibrarian, a nd ma thematician, Er at osthen es. Eratosthenes not only knew that the earth was a sp here, he a lso made a v ery accurate c alculation o f i ts c ircumference. H e divided his work into three parts: physical geography, m athematical g eography, a nd p olitical geography.

Roman g eography g enerally w as m ore advanced t han t hat o f i ts Gr eek f orebears. The most not able ge ographical w ork o f the an cient Western world, in fact, appeared from the pen of Strabo, who, though born in Amaseia in Pontus, migrated t o R ome. A 1 7-book w ork en titled *Geographika* (*Geog r aph y*) survives almost entirely intact (chapter 7 i s partly lost). It is a treasure trove of information about the k nown world as it was in the first century c.e.

About the same time, the first century Persian Dionysius of Charax was commissioned by Rome's first e mperor, A ugus t us C aesar, to prepare a description of the East as a text for the education of h is s tepson, Tiberius. D ionysius composed the most consciously literary (in the modern s ense) of all the ancient geographies, his *Description of the Habitable World*, in dactyl ic h exameter v erse (see q uant it at ive verse).

Both geography a nd e thnography a re r epresented in Tacitu s's *Germania*, a de scription o f Germany t hat was m uch ad mired b y t he 18thcentury historian Edward Gibbon.

Georgics Virgil (30 B.C.E.)

Vir gil grew up in the Italian countryside between Cremona and Mantua in the Roman province of Cisalpine G aul. There he ac quired a lo ve of t he land, of r ural o ccupations, a nd of r ustic l iving that remained with him throughout his life. Given that bent and g iven t hat s uch e arlier i mportant Greek a nd Roman a uthors a s H esiod, A r at us, and Lucre t ius had p rovided useful poetic models for discussions of farming, animal husbandry, meteorology, astronomy, and other aspects of the natural world i n b oth re al a nd m ythologized states, it was perhaps inevitable that Rome's most accomplished poet should address his talent and his individual vision to the production of a similar work.

The *Georgics* comprise four books of dactylic hexameter verse (see quant itat ive verse) dedicated t o V irgil's f riend, G aius Mae cenas, w ho was a great patron of poets and the close friend, adviser, and deputy of Octavian, who became the first Roman emperor, August us C a esar. At the outset of t he first book, V irgil announces w hat the subjects of each book w ill be. F irst he w ill discuss the right time for plowing the soil so that the c rops will be " happy." S econd, h e will d iscuss t ending v ines, olives, a nd t rees. Third, h e will address the issue of a nimal husbandry—the care and breeding of cattle. Finally, he announces, he will consider the subject of beekeeping.

Having e stablished h is sub jects, Vi rgil n ext piously invokes the sun, moon, and stars and the tutelary d eities u nder w hose c are t he w eather favors farming and the earth produces abundantly. F inally, b efore b eginning h is d iscussion o f tilling the soil, Virgil addresses Augustus, who is infallibly d estined f or d eification a nd s tellification, asking that the emperor make Virgil's course

smooth so that he may teach not only farming to the country folk but also proper religious respect for b oth their e mperor a nd t heir g ods. I n t he Georgics, a r eader finds b oth Vi rgil's p ersonal piety and, beginning here and leavening the poem throughout, his belief that the gods incline favorably t oward t hose wh o respect a nd propitiate them.

Virgil te aches t hat n ew fields sh ould be plowed in the early spring in each of two years, but not before the careful farmer has studied the land to see what sorts of plants-trees or grasses or f ruiting plants-spring n aturally from th e land. Thereafter, t he fields sh ould l ie f allow i n alternate s easons a fter r eaping. H e tel ls wha t crops enrich the land and which ones exhaust it. He speaks of enriching the soil with manure and with a shes and of o ccasionally firing the fields. He advises turning the soil and breaking up clods, and he counsels farmers to pray for moist summers a nd s unny w inters. H e sp eaks o f so wing and of i rrigating, and he n otes t he b enefit t hat derives from the fact that Jupiter made husbandry a difficult occupation.

During the G olden Age, when S aturn r uled, men did not till the fields and the earth gave freely of its bounty. When Jupiter took over, however, the Age of I ron began, and " toil c onquered the world." But the g oddess C eres t aught p eople to plow, hoe, weed, and drive away the birds. Virgil advises f armers c oncerning the e quipment t hey will need to do the job and makes useful suggestions like that of training an elm tree to grow into the shape necessary for the stock of a plow.

Virgil s ets for th the proper times of year for performing ea ch t ask f or ea ch cr op. H e n ext explains the signs of the weather and how a farmer c an i nterpret t hem. H e advises t hat certain tasks, such as sharpening s takes a nd p itchforks or making ropes and baskets, be undertaken during rainy periods.

Virgil emulates Hesiod's *Works and Days* in explaining what days are lucky or unlucky for particular tasks. He enumerates the meteorological misfortunes that can afflict the farmer, such as windstorms, floods, and lightning strikes. Farmers must be ever vigilant for signs that help them predict foul weather, so Virgil provides a list that includes bird calls, the direction of the wind, sea signs, different sorts of clouds, the apparent moods of cattle, and the color of the moon. The appearance of the sun at morning and evening, too, will predict the coming weather.

The poet also takes up supernatural signs and their a pparent c onnection with e arthly e vents. Particularly, he l ists a ll t he u nusual signs t hat appeared in connection with the murder of Julius Ca esar: volcanic eruption and earthquake; mysterious voices and specters; interruptions in the flow of rivers; floods; lightning from a cloudless sky; and, especially, "fearful comets," which the ancients regularly viewed as portents of disaster.

Virgil en ds t he first b ook w ith a p rayer addressed to t he g ods a nd hero es of Ro me. H e lists the manifold wars a nd woes t hat a fflict h is nation and prays that the gods will not hinder the young prince, Augustus Caesar, in h is efforts to set matters right and end the "unholy strife" raging through the world.

As Bo ok 2 o pens, V irgil i nvokes Bacchus a s god of the vine and add resses the forest saplings and the ol ive t rees since these will c oncern the poet here. He speaks of the v arious ways that farmers can encourage trees to grow. He discusses lopping off and planting suckers and grafting fruiting b ranches o nto non-fruiting trees. This last Virgil illustrates by saying that apple boughs have be en su ccessfully g rafted t o p lane t rees, walnuts to arbutus, and pears to a sh trees. Then he gives instructions for doing the grafting.

Virgil n ext d iscusses t he v arieties o f g rapes and other f ruits t hat one finds in v arying locations around the known world. He mentions that not a ll s oils a re su itable f or a ll f ruits. Ha ving looked around the world at the wonderful variety of fruits and trees that different regions produce, he concludes that nowhere can one find such various r iches a s in Italy, where the climate ma kes possible two harvests a year and the land is rich in minerals and in vigorous people.

Virgil now turns his attention to the variety of soils that one encounters in Italy and the advan-

tages of each for different sorts of farming. He tells prospective farmers how to judge each sort and what will be most profitable to pl ant in it. Once a so il is se lected for growing grapevines, Virgil explains how to design the arbors, trench the soil, and plant the vines. He celebrates spring as the time for planting, and he adv ises fertilizing, p rotecting the n ew pl antings w ith p orous stone or rough shells, and periodic hoeing. Above all, the leaves of the new vines must be protected against t he de predation o f b rowsing a nimals. Virgil suggests t hat go ats a re s acrificed to Bacchus and that goats' connection to the origins of tragedy stem from the tendency of the animals to destroy g rapevines. (See T r agedy i n Gr eece and Rome.) In addition to hoeing, pruning is a necessity. Growing grapes requires constant vigilance. V irgil s uggests that a c arefully t ended small farm is more profitable than an ill ended large one.

Olives, on the other hand, require virtually no attention once e stablished. This is a lso the c ase with numerous trees that yield wood for various enterprises, including shipbuilding and the manufacture of spear shafts.

Following a paean of praise for the lives of the hard-working husbandmen, Virgil now addresses the muse s of h is inspiration, calling on them to grant him the happiness not merely of describing the farmer's life, but to live it as well. Not for him is the l ife of k ings w ho w ar, amass wealth, are swayed b y flattery, a nd often find t hemselves exiled f rom t heir ho melands. That s aid, Virgil returns to a final de scription of t he jo ys of t he husbandman's life—the last survival, as he thinks, of the ple asures, if n ot the e ase, of life as it was lived during the Golden Age.

Virgil b egins B ook 3 b y i nvoking, first, t he rustic I talian female d eity, Pa les, w hom he rdsmen a nd u rbanites a like had a lready a nciently celebrated. In the s ame i nvocation, V irgil addresses the sun god, Apollo, as the shepherd of Amphrysus, in voking the legend t hat Zeus h ad once required Ap ollo to serve for a time on the banks of t he r iver A mphrysus a s t he s lave a nd shepherd of King Admetus of Pherae in Thessaly. Then the poet announces his intention to erect a temple (that i s, c ompose a p oem) i n which h is emperor will reign as its deity. He predicts something of the shape of the poem—enough to indicate that it will be an epic—and then he returns to the poem at hand.

If one aspires to breed horses or bullocks, that person should attend most carefully to the characteristics of the breeding females. The best cows will be fierce-looking with ugly heads, thick necks, large dewla ps, l ong flanks, c rooked h orns, an d shaggy e ars. They will be bet ween f our and 10 years old. A mong s uch bre eders, Vi rgil adv ises, set loose the males.

With r espect to male horses, Vi rgil g ives a series of be havioral and b odily characteristics that a b reeder should look for. Above all, the breeder should take care that the animal be spirited and not too old.

Virgil a llows h imself to digress here to discuss the history of chariot racing and horse racing. Then he returns to giving advice about the care of potential dams and of pregnant females. As the latter near the time of their delivery, they should not be a llowed to p ull he avy load s, le ap, run fast, or swim in or ford swift streams.

Next Virgil details the c are of calves, which should be divided early into those to be kept for breeding, t hose that will b ecome working an imals, and those that are to be kept sacred for sacrifice. He discourses on the steps to be t aken in accustoming bullocks to the yoke for plowing.

Offering advice for training horses occupies Virgil next. He spends particular care in discussing the distractions that mares present for stallions and cows for bulls. All nature, the poet announces, is subject to the torments of love. After a leng thy digression on this subject, the poet r eminds h imself to re turn to h is theme, and h e turns his a ttention t o s heep a nd g oat herding.

Give t he a nimals s oft herbage u ntil t he pastures can sustain them. Then let them graze near water and find them shade in the midday heat. Be sure that they drink enough water. In this section, Virgil ac hieves v ariety b y d iscoursing o n t he

herding p ractices of t he she pherds of L ibya i n Africa and S cythia (part of present-day R ussia) on the cold and snowy Eurasian steppes.

If one is raising sheep for wool, Virgil warns against sires and dams with even a spot of black on them anywhere, even the tongue. Here he does not miss an opportunity to mythologize by recalling that Pan wooed and won the Moon (Selene) with a downy fleece.

Next he advises shepherds on the proper feeding and care of animals whose principal function is giving milk. He also offers counsel on breeding and caring for dogs and on the advantages to be reaped from that activity.

Snakes a re a pl ague f or t he her dsman, a nd Virgil offers adv ice on a voiding t hem a nd o n killing them. Following h is discussion of de aling with serpents, Virgil deals with the diagnosis and treatment of various animal diseases. In one of t he p oem's m ost lurid pa ssages, he p ictures t he s ymptoms a nd o utcomes of pl agues that c an decimate her ds a nd flocks and b ankrupt their owners. He cautions against attempting t o u se ei ther the flesh o r the h ides o f plague- &ricken animals lest the disease jump to human beings.

The final and most charming book of the *Georgics* considers beekeeping—"the w ondrous p ageant of a tiny world," as H. Rushton Fairclough's translation has it.

Bees need a shady spot near good water, one protected f rom winds, pr edatory birds, and lizards. L ikewise, t he flowers w here t hey ga ther nectar must be fenced off from browsing goats. The p oet tel ls w hat flowers o ne may s et o ut to attract a s warm of ho neybees. H e de scribes a warring swarm, though he misinterprets some of his own observations. To keep a swarm in a hive, the b eekeeper m ust te ar t he w ings f rom t he "monarch." Then the swarm will stay near home. He advises planting *laurustinus* to attract bees.

Virgil digresses to tell a story about the archetypal beekeeper in Tarentum in southern I taly. He t hen enumerates t he qualities of bees. They have c hildren i n c ommon a nd o wn c ommunal property—both house a nd f ood. They h ave a fixedd ivisiono fl abor: gathering honey, hive and comb building, care of the young, and so forth. Some are sentries and soldiers who, when necessary, also drive the drones from the community. Membership in the various subcommunities is in part determined by age, with the young bearing the burden of hunting food and the old the home tasks. Be es do n ot enga ge, he s ays, i n c onjugal embraces. (Vi rgil do es n ot s eem a ware that the queen bee—whom he c alls the "king"—lays a ll the eggs of the hive or that she mates with the drones.)

Virgil explains the use of smoke in gathering honey and how the bees will redouble their efforts to make more to sustain themselves through the winter. L ike pe ople, ho wever, b ees c an s uffer disease. V irgil explains how to i dentify a h ive with sickly bees and what to do to restore them to health. If a n en tire s warm of b ees falls ill, then there is a remedy that involves the putrid blood of a s lain b ullock, w hich c an, a s t he p oet t hinks, engender bees.

Apparently running short of material directly relevant to his announced subject, Virgil chooses to fill out most of the rest of Book 4 with the bullock- blood story, much of it mythical, and to trace it back to its Egyptian and perhaps Indian origins. The tale i nvolves t ransformations, t rips to the underworld, and the story of Orpheus and Eurydice. Amid all this, Virgil follows the tale of a she pherd, A ristaeus, s on of a n ymph, C yrene. Aristaeus's b ees were stricken a nd dying, a nd Aristaeus un dertook the journey outlined a bove in an effort to get at the root of the problem. After many adventures, i ncluding trying to ma ket he sea god Proteus reveal the secret, the young man's mother, Cyrene, who has known the source of the problem a ll a long, r eveals t hat A ristaeus's o wn heart's sorrow is the cause of his bees' illness. If he will lay his sorrow aside and make appropriate sacrifices, his bees will recover. He does, and they do, breeding as promised in the blood of a sacrificed bullock.

In t he l ast l ines of the l ast book, V irgil announces his own name, saying that in youth's boldness, he sang of Tityrus, thereby connecting the last eclogue to the first and bringing his composition full circle.

Gilgamesh Epic, The (Sumerian language: ca. 2300 B.C.E.; Akkadian language: ca. 1300 B.C.E.)

Among the remarkably diverse cuneif or m literary remnants of an cient Sumer, b oth k ing lists and fr agments of stories a ttest t o the h istoric existence of Gilgamesh, a k ing of the Sumerian city of Uruk. The state of development of t hose fragmentary t ales su ggests t hat, e ven a s e arly 2300 b.c.e., verse accounts of the historic activities of Gilgamesh and mythical stories about h is superhuman accomplishments were beginning to coalesce into a kind of proto-epic. Of this Sumerian v ersion, 1 75 l ines su rvive. A m illennium later, the process of development begun in Sumer had r esulted in a full-blown e pic w ritten in the Akk a dian tongue. Episodes also appear in Hittite poems.

The c redit f or p reservation of The Gilgame sh Epic belongs in large part to Assurbanipal, the last great ruler of the Assyrian Empire. A formidable military leader who subdued Egypt, he also was intensely in terested i n antiquities-particularly literary ones. He therefore dispatched scholars to search the long-reglected and sometimes buried libraries of Babylon, Nippur, and Uruk. Assurbanipal commissioned his scholars to translate what they discovered into the language he spoke, Akkadian. Among the works thus preserved, of course, was Gilgamesh. E xcept f or t he em endations o f modern s cholars, w ho re discovered t he te xts a t Nineveh in the 19th century and who continue to work at correcting and enlarging them with newly discovered f ragments ol der t han t he A kkadian version, Assurbanipal's version gives us the poem essentially in the form we know it.

The first sentence of t he ep ic a ddresses G ilgamesh, i dentifies h im a s the "lord of K ullab," and r ecalls h is p raiseworthiness. Then, sh ifting to the past tense, the opening recalls his virtually omniscient mastery of geography, secret mysteries, and the state of things before the flood. We learn t hat he t raveled f ar, le arned m uch, a nd engraved h is h istory on a s tone. We a lso le arn that he was two-thirds god and "one-third man." A paragraph of praise is devoted to h is building walls and the temple of E anna, dedicated to t he Sumerian g od of t he firmament, A nu, a nd to Ishtar, the goddess of love.

As the epic proper opens, we find that the people of Uruk are worn out with Gilgamesh's warlike energy, dispirited because his military levies deprive t hem of t heir s ons, a nd a ngry t hat h is sexual appetites require all the women to s acrifice t heir v irginity to h im b efore t hey ma rry. Responding to t he people's prayers, the goddess of creation shapes a wild man named Enkidu who will be able to tame Gilgamesh.

Enkidu lives with the beasts of the fields and the f orests u ntil o ne d ay at rapper s ees h im. Frightened, the trapper reports the wild man to his f ather, c omplaining t hat E nkidu r uins h is traps and helps the beasts escape. The father suggests that the trapper ask Gilgamesh for a temple courtesan to sed uce En kidu. If she suc ceeds, he says, the b easts will reject h im. The pl an suc ceeds, a nd En kidu finds h imself m uch diminished i n st rength a nd u nwelcome a mong t he beasts. At the c ourtesan's u rging, he ac companies her to Uruk, where he i ntends both to challenge Gilgamesh and become his companion. The courtesan p redicts t hat Gilgamesh w ill le arn from his dreams that Enkidu is coming.

Gilgamesh first dreams that a meteor falls. He tries to lift it but cannot at first. All the people and he himself find themselves drawn to the meteor with feelings of love. With help, Gilgamesh finally manages to bring the meteor to h is mother Ninsun. (Later we will discover that Gilgamesh is her son by his tutelary god, Lugulbanda.) Gilgamesh

dreams a second dream of an axe for which he feels a p owerful a ttraction. N insun i nterprets both dreams. She tells Gilgamesh that the meteor is his brother—a comrade who will rescue him in necessity.

For a while, Enkidu lives with the she pherds, where h e learns to e at b read a nd d rink w ine. Eventually hearing of the way Gilgamesh offends his p eople by d emanding to be first with their women, however, Enkidu goes off to Uruk to challenge the king. Enkidu confronts the king as he is coming to a bride's home to claim his right. The two s upermen fight, an d G ilgamesh p revails. Enkidu acknowledges the king's superior strength. The two heroes embrace and become best friends.

The chief god of the Sumerian pantheon, Enlil, decreed Gilgamesh's mortality and his authority over his people, and Enkidu, interpreting a dream for h is f riend, e xplains to Gi lgamesh b oth t he extent and the limits of his power.

Gilgamesh decides to go the forest, raise monuments to himself and to the gods, and de stroy the e vil g iant who lurks there—a g iant na med Humbaba, who m ay stand for the military enemies of Uruk. Enkidu tries to dissuade his friend, but G ilgamesh fearlessly i nsists. H e i nvokes the sun god Shamash, praying for his aid and approval in his undertaking, and then begins his preparations f or the d angerous en terprise. N insun, Gilgamesh's mother, also prays that the sun god will protect both Gilgamesh and her adoptive son Enkidu a s w ell. T o En kidu s he e ntrusts G ilgamesh's safety.

After m uch adv ice f rom Uruk's c ounselors, the two set out. They cover immense distances in a very short time and eventually come to the forest of Humbaba. Enkidu counsels immediate attack before Humbaba can don all seven layers of his armor, but Humbaba sees them coming and withdraws into the forest. In due course, nonetheless, Gilgamesh fells a to wering c edar t ree. This provokes Humbaba, who is the guardian of the forest, a nd E nkidu g rows f earful. H e de scribes the horrors of Humbaba to Gilgamesh, confesses that he himself is frightened to death, and suggests they go home. Gilgamesh restores Enkidu's courage, however, and the two confront Humbaba, cutting down seven cedars at his dwelling.

It seems that some episodes of this portion of the tale are lost, for in the next scene we find Humbaba pleading that Gilgamesh will spare his life. E nkidu counsels hi sfriend a gainst this. Nonetheless, both strike Humbaba, who dies, and they offer the giant's head to the god Enlil as a sacrifice. Enlil, however, is furious. The god reproves the two killers and distributes Humbaba's former glory am ong wild creatures. The e pisode with Humbaba in the forest may belong elsewhere in the epic. Its exact place in the story is unclear, and segments seem missing.

In the next section of the epic, the goddess of love, Ish tar, offers her self to Gi lgamesh a s h is wife. G ilgamesh r eplies do ubtfully. H e c annot offer her appropriate presents and recalls that she has made the same offer to others. Each time, he reminds her, she tired of her lovers and punished them i n u npleasant w ays. W hy, he a sks, w ould she not treat him in the same fashion?

Angered, s he p rays t hat h er f ather A nu w ill create the Bull of Heaven to destroy Gilgamesh. Anu replies that, if he does so, there will be seven years of famine and drought. I shtar replies that she has enough grain and fodder stored to preserve the people and the cattle through the famine, an d h er f ather c omplies w ith h er r equest. Once created, the Bull of Heaven falls to e arth. There its very snorts slay hundreds. Enkidu confronts the Bull, grabbing it by the horns. Holding the Bull, he tells Gilgamesh to kill it with a sword thrust between the nape of its neck and its horns. Gilgamesh does, and the two sacrifice the Bull's heart to Sha mash, the sun god. Ishtar is furious, but Enkidu cuts off the Bull's thigh and throws it at her.

That night, Enkidu dreams that the gods sit in council. Despite the fact that the sun god instructed t he t wo comrades to cut the cedar and kill Humbaba, the gods decide that Enkidu must die as a punishment. He falls sick and curses the gate of the forest and the courtesan who first led him to Uruk. The sun g od, Sha mash, r eproves h im, and he calls back his curse on the woman. In his final illness, Enkidu has a vision of the afterworld. Its inhabitants are like birds, covered with f eathers. They s it i n darkness. The k ings who a re t here had b een t reated a s i f t hey were gods while they lived. They and the priests, who also ruled in ancient Sumerian society, are now the servants in the underworld and perform the menial labor. After lying sick for 12 days, Enkidu addresses his last words to Gilgamesh. Gilgamesh gives a eu logy b efore t he a ssembled c ounselors of U ruk. Then, to uching h is f riend's he art a nd finding it s tilled, G ilgamesh s hrouds E nkidu's body and gives vent to h is grief. The king orders a statue of Enkidu made from precious materials and presents it as a votive offering to the gods.

Driven now by his fear of death, Gilgamesh undertakes a pilgrimage in search of Utnapishtim, a human being reputed to have "entered the assembly of the gods." Reaching the entrance to the u nderworld, G ilgamesh c onfronts halfhuman, half- dragon creatures called the Scorpions, wh o r ecognize t he k ing's partly h uman, partly divine nature. They interrogate Gilgamesh, who explains his reasons for coming. The Scorpions admit him to the underworld—a descent into which has ever a fterward characterized all epics and raises the p robability t hat t he pre-Homeric Greeks k new a v ersion of *Gilgamesh* at le ast i n oral form.

For 11 le agues, Gilgamesh presses on in utter darkness. Finally, light appears, and after the 12th league, he arrives at the garden of the gods. There he en counters t he su n g od, Sha mash h imself. Shamash a ssures t he t raveler t hat he w ill n ever find the eternal life he seeks. Gilgamesh begs to be allowed to see light of t he su n, t hough i n o ther ways he may not differ from other dead men.

An a typically sudden t ransition, su ggesting the loss of intervening text, takes the reader to a description of the woman of the vine, Siduri, who sits with her g olden bowl and vats at the edge of the garden of the gods. Fearing the appearance of Gilgamesh whose face is drawn with despair and who, l ike t he Greek hero H ercules (see *Her acl es*), is dressed in animal skins, the woman bars her do or a gainst h im. Threatening to break it down, Gilgamesh identifies himself, explains that he is in mourning, and prays that the woman will give h im e ternal l ife. She r ationally e xplains to him his duties as a human being: stay clean, well fed, and h appy; please your wife; and del ight in your children. At his request, she tells him where to find Urshanabi, the ferryman of Utnapishtim. Utnapishtim is the literary prototype of the biblical N oah, a nd U rshanabi i s p erhaps a l iterary ancestor of the ferryman of the dead, Charon, in Greco-Roman myth as well. S iduri tells Gilgamesh that he will find Urshanabi b uilding a n ocean- going ship.

Seeing G ilgamesh c oming, U rshanabi g reets him and asks about his wild and forlorn appearance. Gilgamesh requests that the ferryman carry him over the river of death. Urshanabi tells him that when G ilgamesh d estroyed " the t hings o f stone" (perhaps ballast?), he a lso de stroyed t he safety of the ship. None theless, Urshanabi gives Gilgamesh instructions for preparing the lumber with which to make 1 20 p oles. W hen t hese a re finished, they carry them aboard ship and sail to the edge of the waters of death. Now Gilgamesh must take a pole, and without touching the water push himself as far as he can. When he has used the 120th pole, he strips, holds his arms out, and drapes his clothing so the ship will sail. In this fashion, he comes at last to the dwelling of Utnapishtim, the only mortal to whom the gods have granted eternal life.

There f ollows t he u sual r itual c hallenge i n which U tnapishtim finds it d ifficult to believe that as disheveled and dispirited a person as he has before him could possibly be Gilgamesh. Gilgamesh r epeats h is e xplanation of h is m ission and a sks U tnapishtim h ow he qu alified for t he gods' unique favor.

In reply, Utnapishtim tells Gilgamesh the story of the flood. Disturbed by the constant uproar of humankind, the gods decided to de stroy people. The g od E a, ho wever, p itied U tnapishtim a nd instructed him to tear down his reed house and build a boat with the materials. A squarish sort of boat, its length and beam were to be equivalent— 120 cubits on a side—and the deck ro ofed over. Ea charged Utnapishtim to take aboard the seed of all living creatures.

Utnapishtim expressed concern about how he will explain h is b ehavior to h is f ellow c itizens, and Ea gave him a cover story in which the boat builder was the one whom the gods de cided to punish, a nd h is fellow c itizens were t hose w ho will be spared. Then, a ssisted by many helpers whom he wined and dined, Utnapishtim finished in seven days, loade dup his seven-decked ship with nine compartments per deck, and battened down t he ha tches. Then h eaven u nleashed i ts fury, and the storm came. For six days and nights it howled. Then on the seventh day, the weather calmed, and Utnapishtim looked out on a water world. In the distance, he spotted the mountain of Nisir, where the boat grounded and held fast for another seven days. Then he released a dove that found no p erch a nd r eturned. A swallow came back as well. But when the next day he released a raven, it found food a nd a p erch. U tnapishtim ordered a general disembarkation and ordered a sacrifice. From the aroma of the cooking meat of the sacrifice, however, the instigator of the flood, the g od E nlil, w as e xcluded. H e n onetheless arrived and, finding himself shunned, complained that he had ordered the destruction of all people. Ea g ently r eproved E nlil a nd e xplained t hat a dream had revealed the coming flood to Utnapishtim. In an act of contrition, Enlil granted Utnapishtim and his wife the privilege of eternal life.

Gilgamesh's next adventure anticipates that of Odysseus in Homer's *The Odysse y* when the poet has the hero t ry to s tay awake for n ine d ays and nights rather than let anyone else handle the ship. Utnapishtim suggests that if Gilgamesh can avoid sleeping f or six d ays a nd n ights, t he g ods ma y assemble and entertain his request. Almost immediately, Gilgamesh falls asleep and remains so for seven days. Anticipating this outcome, Utnapishtim has his wife bake a loa f of bread each day so that when he wakes Gilgamesh on the seventh day, he will be able to convince the hero by the bread's condition that he really slept that long.

That a ccomplished, U tnapishtim r eproves Urshanabi a nd ba nishes h im f or b ringing Gi l-

gamesh. The immortal orders Urshanabi to bathe Gilgamesh, g ive h im n ew ga rments t hat w ill always remain f resh, a nd t ake h im ho me. A s a consolation p rize, U tnapishtim t ells Gi lgamesh of a flower that, when eaten, will restore youthful vigor t o old m en. Thorny a nd g rowing u nderwater, the flower i s d ifficult and dangerous to pick. Gilgamesh nonetheless tries, and though his hands are painfully pricked, he obtains the flower. Then Urshanabi bathes h im, a nd the flower's fragrance attracts a serpent that steals and eats it and immediately sheds its skin.

Gilgamesh's que st ha s p roved u nsuccessful. Urshanabi t akes t he k ing ho me. On ce t here, he engraves the story of his adventures on a stone.

In the epic's final chapter, Gilgamesh dies, and the people grieve for him in an eight-line threnody. Each line ends with either "he will not rise again," or "he will not come again." His funeral complete, and his praises once more sung, his epic ends.

Gilgamesh has been said to be the world's first tragic hero. Almost but not quite a g od, de spite heroic efforts, and against insurmountable odds, he aspired to godhead, but in the final analysis he was h uman. In the end he su ffered h umanity's common d estiny. On ly h is s tory has a chieved a measure of immortality.

gnomic poetry and prose

From very early in Greek literary history—at least from the fifth c entury b .c.e., p ithy ma xims

(gnomes) came to be expressed in verse and in prose. These sayings, f requently o nly o nel ine, were memorable and quotable, and they tried to formulate i mportant t ruths in ways that would make t hem e asy to call to mind. Thus, t heir authors seem to have thought of them as broadly instructive, and readers and hearers valued the gnomic verse or prose lines both for their aptness and for their educative value.

From Aesop we draw such examples as: "Familiarity breeds contempt" (from "The Fox and the Lion"); "The gods help them that help themselves" (from "Hercules and the Wagoner"). From Theog nis: "No man takes with him to Hades all his exceeding wealth" (*Elegies* 1.725). From Ari st ophanes: "Y ou c annot te ach a Cr ab to w alk straight" (*Peace* 1.1083.) From Thucydides: "We secure our friends not by accepting favors but by doing them" (*The Pelo ponnesian War* 2.40).

Roman writers also made t heir contributions to the genre. Livy gives us "better late than never" (from *History* 4.23), and Seneca loaned Shakespeare the often-quoted "What fools these mortals be" (from *Epistles* 1.1.3).

Gnostic apocrypha and pseudepigrapha (Nag Hammadi manuscripts)

The d iscovery of t he first- century *Dead Se a Scrolls* electrified st udents of first- century Judeo- Christian developments. Likewise, for students of religious developments during the n ext two centuries, the discovery in 1945 of fourthcentury Christian manuscripts at Nag Hammadi in Egypt shed new light on the variety of Christian belief and the wealth of religious literature that had been excluded from received Scripture after the fourth-century institutionalization of an official form of Christianity as the state religion of the Roman Empire.

Without becoming embroiled in the technicalities of the argument, suffice it to say that the Nag Hammadi Gospel of Thomas seems to contain previously unknown historical utterances of Jesus Christ. F urther e vidence of p rimitive s tages of traditions s urrounding Je sus em erges f rom *The*

Dialogue of the Savior, Apochryphal James, and a manuscript preserved in Berlin, The Gospel of Mary. The ecclesiastical historian Karen L. King studies these texts and related ones with a view to establishing a more accurate interpretation of the relationship between early Christianity, early Gnosticism, and other communities subsequently deemed her etical by t he Roman c hurch a nd i ts authorities. King lists and revisits 44 such works in an effort to place them and the communities of belief that produced them in a more historically accurate context-one that sees the works as the product of alternate communities of faith rather than the work of heretics who were excluded from Christianity a ltogether and p erhaps a lso f rom Judaism.

The c ontents of t he N ag Ha mmadi ma nuscripts deserve an important place in the literary history of the an cient w orld. They continue t o occasion much discussion and controversy among the learned and the faithful alike.

Golden Ass, The (Metamorphoses)

Apuleius (second century C.E.)

Often called the only Roman novel to survive in its entirety, A pul eius's colloquial Latin, framework tale of a Greek named Lucius who accidentally g ets turned in to a golden- oated donkey when h e beco mest oo i nterested i n ma gic has continued t o d elight r eaders f or a lmost 2,000 years. In the form that Apuleius gave his book to the world, the text apparently looks back to earlier Greek progenitors for inspiration and some of

its material. The careful and comic way in which Apuleius has woven together borrowed material with his own sense of the amusing and the bizarre, however, g ives t he w orld a p rototype of w hat would b ecome t he p icaresque n ovel d uring t he Eu rcpe an Renais sance.

Book 1

Borrowing a device from epic poetry, *The Golden Ass* begins in the middle of things with the conjunction *but*. The effect suggests that the speaker is continuing a conversation a bout the literary device of tying tales together by embedding them in a framework, as did Aristides of Miletus, who wrote a n umber of now-lost r acy st ories. The putative aut hor of Apu leius's s tory, the G reek traveler L ucius, speaks in the first person a nd provides the reader with something of his history. Then, c autioning the r eader to pa y attention s o that delight in the story can follow, Lucius begins the tale proper.

On a business trip to Thessaly, Lucius encounters two other travelers who are passing the time with storytelling. He asks to join them and does so just in time to hear one of the companions pooh- poding the notion of the efficacy of magical in cantations. Lucius reproves the sp eaker with a rot-alogether-relevant account of a sword swallower whom he has just seen perform. Then he promises to credit the stories of his new companions and invites them to dine at the next inn at his expense.

One of Luc ius's traveling c ompanions, A ristomenes, passes the time by recounting an earlier experience. In the c ourse of b uying a nd s elling cheese, A ristomenes h ad en countered h is m issing friend Socrates—not the famous phi bs opher of t he s ame n ame. Fi lthy, a lmost naked, a nd penniless, S ocrates ex plained t hat h e had b een enchanted by and become the love slave of a powerful w itch na med M eroe. M eroe had t urned a competing innkeeper into a frog and, by witchcraft, extended a rival's pregnancy for eight years and p erformed o ther w icked w onders. She had also d eprived S ocrates o f ev erything h e h ad. Aristomenes got S ocrates c leaned up, a nd t he two checked i nto a n i nn for the n ight. A round midnight, t he do ors to t heir ro om b urst o pen, and M eroe an d a c onfederate w itch, Pa nthea, appeared. They p lunged a s word i nto S ocrates' neck, collected the blood in a sponge, and pulled his heart out through the wound. Then they healed the w ound w ith a sp onge, w hich, w ith ma gical incantations, they instructed to return to the sea via a river. The two witches then urinated all over Aristomenes and departed.

Fearing that he would be crucified for having murdered Socrates, Aristomenes tried to leave the inn. The innkeeper, ho wever, would n ot u nlock the gate. The next morning, to his amazement, an apparently unscathed Socrates rose and reported that he had d reamed exactly what A ristomenes had witnessed. The two then set out on their journey together. When, however, they encountered a river and stopped to e at, Socrates grew pale. He stooped to drink from the river, the wound in his throat opened, the sponge fell into the river, and Socrates fell dead.

Bidding h is t raveling c ompanions f arewell after hearing the story, Lucius spends the night in the town of Hypata at the home of a n otorious miser named Milo. After reporting his doings at Hypata, Lucius goes to bed hungry, fed on nothing but Milo's incessant chatter.

Book 2

As L ucius a wakens, Bo ok 2 b egins. H e recalls that he is in Thessaly, the epicenter of magic arts, and he is obsessed with a d esire to le arn m ore about t hem. H e r eports t hat he t hought e verything he e ncountered to ha ve be en c hanged b y witchcraft from something else; he expected statues a nd pictures to sp eak a nd a nimals to u tter prophecies. Sud denly, h e en counters a c ouple whom he fails to recognize but who call him by name. They p rove t o b e h is au nt B yrrhena a nd her husband, a nd he ac companies t hem to t heir sumptuous r esidence. By rrhena w arns Luc ius against the love charms of Milo's wife, Pamphile, whose name suggests that she falls for every man she m eets. The a unt c autions her n ephew t hat Pamphile changes those who reject her into some sort of animal.

This warning only inflames Lucius's desire to learn m ore of w itchcraft. H e de cides to w oo Milo's m aid, P hotis, a nd to e vade a ny a morous connection w ith Pamphile. The w ooing o pens with an exchange of clever sexual double entendre in which the metaphor of cooking applies to amorous a ctivity. P hotis a nd Luc ius a gree to become lovers; the aunt Byrrhena sends food and wine for a small banquet, which Lucius reserves for Photis and himself.

As the household gathers for the usual evening conversation in lieu of dinner, Lucius reveals that before he left Corinth, a Chaldean prophet had predicted that on this journey, Lucius would gain reputation and b ecome a long and unbelievable story recorded in several books (scrolls of papyrus). Milo asks the name of the Chaldean, whom he recognizes. Milo tells a s tory about him, and Lucius, b ored a nd a nnoyed, e xcuses h imself, retiring to h is b anquet a nd a morous en counter with Photis. That encounter Lucius de scribes in detail, explaining that it is the first of many.

Lucius next reports the events of a banquet at his aunt's home and a macabre story of witchcraft practiced on the bodies of the dead and told by one of the banquet's guests. The guest, who wears bandages, s ays t hat he had v olunteered a s a watchman to assure that witches did not mutilate a c orpse a waiting b urial. A lthough a s trangely behaving weasel appeared in the room briefly, in the morning the corpse remained unmarked. The watchman was so well paid that he unthinkingly offered h is s ervices w henever t hey m ight b e required. The r elatives of t he b ereaved w idow beat the watchman so undly for uttering such a bad omen.

As the corpse was carried to its funeral, an old man accused the widow of having murdered the husband and produced an Egyptian seer capable of restoring life to the corpse so that it could testify in the matter. This was done, and the corpse confirmed the a ccusation a gainst h is w idow. I t continued, r eporting th at w hile i ts w atchman slept, the witches had indeed tried to mutilate the corpse. Because, however, the watchman had the same name, the incantations worked on him rather than on the corpse. The witches had sliced off the watchman's nose and ears and replaced them with w ax ones. The w atchman c onfirmed t he truth of this story, and ever since, he has worn bandages to conceal the shame of his mutilation.

Returning t o Mi lo's house, L ucius d iscovers three s tout f ellows b eating a t t he do or. Luc ius draws a concealed s word and fights them, e ventually killing all three. Photis admits h im to t he house, and the second book ends.

Book 3

The opening of Book 3 finds Lucius arrested and conducted through the streets by the magistrates to the place of tribunal. All a long h is route, he passes crowds of people who roar with laughter. The chief of the watch, who was an eyewitness to the deaths, ac cuses Lucius of murder b efore the magistrates. The onlookers keep laughing.

Lucius explains that he was trying to protect the household of his host, but the widows of the slaughtered men demand justice. The authorities doubt t hat o ne p erson c ould ha ve k illed t hree such ha rdy y ouths, a nd t hey p repare to to r ture Lucius to e xtract the names of h is confederates. The widows dema nd t hat the corpses b e u ncovered to inflame the crowd's desire for justice. The laughter grows.

When Lucius pulls the covering cloth off the corpses, h e d iscovers three blown- up wineskins covered with gashes. The magistrates explain that Lucius has been used in a ceremony honoring the god of Laughter—an annual holiday. They make it up to him by granting him special honors, naming him the patron of the holiday, and making a bronze image of him. Lucius thanks them for the honor b ut m odestly r ejects ha ving h is s tatue erected.

Milo a ctually f eeds Lucius s omething a fter this day's events. When Photis appears in Milo's chamber, she confesses that she was the cause of Milo's e mbarrassment a nd i nvites h im to b eat her. He refuses, but he wants to know the reasons for he r b ehavior. I n r eply, P hotis r eveals t he secrets of the house and confirms Lucius's aunt's assessment o f the wi tchcraft of h is ho stess, Pamphilia.

Photis explains that she was trying to c ollect some hair of Pamphilia's current love at the barbershop, but that the barber prevented her f rom doing so. Rather than ad mit her f ailure, she had collected some blond hair f rom some wineskins and given it to Pamphilia. When Pamphilia tried to use the hair to su mmon her lover, she i nstead brought t he wineskins to l ife, a nd i t w as t heir human a pparitions t hat Luc ius had s lain. H e became, she tells him, a "bag slayer."

Lucius begs Photis to help him observe Pamphilia at he r i ncantations. P hotis d oes so, a nd Lucius watches Pamphilia change herself into an owl. Lucius now wants a jar of Pamphilia's magic ointment that will let him change into a bird. This Pamphilia secures for him, assuring him that she knows the formula for c hanging h im bac k i nto himself. L ucius da ubs hi mself g enerously w ith the o intment and forthwith t ransmutes i nto an ass. P amphilia b lames h erself f or b ringing t he wrong ointment, but she a ssures Lucius that, a s soon as he eats some roses, he will become himself once more.

Assured that Photis will bring the flowers in the morning, Lucius goes off to stable himself with his horse and Milo's donkey. Both animals attack him, and he retires to a f ar corner, contemplating t he re venge he will take when he resumes h is p roper f orm. H e n otices ro ses o n the al tar o f a household dei ty, b ut j ust a s he stretches h is n eck to e at t hem, h is o wn s lave beats him off, and then a band of robbers attacks the house. They find so much booty that they require t he t hree a nimals to c arry it off, a nd Lucius no w finds h imself h ustled off to t he mountains c arrying a he avy load . C hancing upon a garden with roses, Lucius is about to eat when it occurs to him that, should he resume his proper shape, t he o utlaws w ould k ill h im. H e decides to b ear his misfortune awhile longer as Book 3 ends.

Book 4

After several attempts at escape in early Book 4, and after s eeing h is c ompanion do nkey k illed when he feigned death, Lucius decides to become a m odel jac kass. S oon he finds h imself at t he headquarters of the band of brigands.

As the evening meal wears on, another troop of robbers arrives. These tell the tale of how they lost their leader. Lamachus, who committed suicide after his own men cut off his right arm in an effort to rescue him. Among their other exploits, the s econd g roup of robb ers r eports how t hey acquired a bear's skin and disguised one of their number as an animal. Putting him in a cage, they delivered h im to a n earby a ristocrat, Dem ochares. The thieves claimed the bear was a gift from a friend. Demochares put the man in bear's clothing under guard in his house. In the middle of the night, that man, Thrasaleon, left his cage, killed his guards and the gatekeeper, and let the rest of the robbers into the house. After they had stolen a load of treasure and were returning for a second, a servant in the house discovered that the bear was loose, roused h is many comrades, s et t he dogs on Thrasaleon, and destroyed him.

On their n ext v enture, the robb ers c apture a maiden whom they hold for ransom. Finally dissuaded from bewailing her fate by an old woman assigned to her, the girl tells the tale of how she was k idnapped f rom her w edding a nd had a vision of the death of her pursuing groom at the hands of the brigands. The old woman advises the girl not to credit dreams, and then tells a tale of her own, perhaps the most famous in *The Golden Ass*—the story of Cupid and Psyche.

Once u pon a t ime t here w as a g irl na med Psyche, so beautiful that the adherents of the goddess Venus began to transfer their worship to the lovely h uman b eing. This e nraged the r eal goddess, w ho c onvinced her s on Cu pid to ma ke Psyche fall in love with the meanest, most miserable man on earth.

Psyche, in the meantime, pined for a husband and p rayed t o m arry. An o racle, however, instructed her father the king to expose the girl on a mountain crag to be carried off by a snaky monster in a funeral-wedding. Everyone except Psyche g rieved at her f ate, b ut t he g irl her self, though shaken, faced it bravely. She w as bound on the crag and abandoned, but as Book 4 ends, Zephyr, the west wind, wafts her gently to the valley b elow a nd l ays her ten derly u pon a flowery bank.

Book 5

Awakening in a ma gnificent park crowned by a royal pa lace, P syche r ealizes, a s B ook 5 o pens, that she is in the private precinct of some god. As she marvels at the splen dors of the place and its many t reasures, a d isembodied v oice tel ls her that everything she sees belongs to her. The voice advises her to rest and bathe, and then her invisible s ervants will d ish up a ro yal feast. They d o this and al so entertain her with m usic from a n equally invisible source. Late at night, a husband whom she never sees comes to bed with her, and her wedding is consummated. This routine goes on for a long time.

In the meantime, her parents who know nothing of P syche's fate, w ear t hemselves o ut w ith grief, and her sisters leave t heir h usbands in a n effort to console their parents. They set out to try to find traces of their sister.

One night, Psyche's invisible husband tells her that her sisters are nearing the cliff. He warns her neither to answer their calls nor even to lo ok in their direction if she he ars them. Should she do so, the husband will be bitterly pained, and Psyche will cause her own destruction.

Psyche, however, f eels r esentful, p referring freedom of action to the benefits of her luxurious prison. K nowing t his, her i nvisible h usband, whom she can feel as well as hear, tells her to do whatever she wishes, but to r emember his heartfelt warning when she belatedly regrets her de cision. Psyche pleads and wheedles, and finally her husband r elents, s aying that s he c an c onverse with h er s isters, c omfort t hem, a nd g ive t hem valuable presents. However, she must not, under any c ircumstances, t ake her si sters' r uinous counsel to try to discover what her husband looks like. Ot herwise bo th h er g ood f ortune a nd her husband would be lost to her.

When the sisters arrive and Psyche hears their lamentations, she has Zephyr bring them to her. Psyche evades the sisters' inquisition, loads them with rich gifts, and has Zephyr take them home. There t he si sters b egin to en vy P syche's g ood fortune a nd to c omplain b itterly a bout it. They connive to keep their sister's existence and good fortune a deep secret, and conspire to find a way to punish what they are pleased to call her pride.

Psyche's h usband w arns her oft he plot a nd orders her not to speak to her sisters if they come again. By this time Psyche is pregnant, and her husband warns her again, this time most urgently, not even to answer her sisters when they call, or disaster w ill c ertainly f ollow. P syche, ho wever, thinks she can handle the situation and implores her husband to permit another visit from her sisters. They congratulate h er on he r pre gnancy, saying that the baby will be an absolute "Cupid." They inquire further about her husband, and, forgetting t he de tails o f her f ormer s tory, P syche fabricates a new one. Catching her in the lie, the sisters conclude that she must be married to a god and e nvy h er t he o pportunity to b ear a g od's child.

On their next visit, the sisters tell Psyche that they now know the truth about her husband. He is a "monstrous snake" that will eat her as soon as she ha s b orne t he c hild. The a rtless P syche believes t hem, a nd t he si sters en courage her to bring a lamp to her hitherto pitch-dark bedroom and to cut off the snake's head by its light. Following their instructions, Psyche illuminates her husband, t he g od Cu pid h imself, b eautiful i n slumber. Handling his bow and arrows, she pricks herself with one of them and is at once consumed by a fiery passion. The oil lamp sputtered a drop of hot oil onto Cupid's shoulder. The god awakes, and, finding himself betrayed, instantly flies off. Psyche grabs a leg and holds on until her strength fails, then drops to the ground.

Cupid explains that in loving her, he h as disobeyed the edict of his mother, Venus, wounding

himself with one of his own arrows so he would love Ps yche f aithfully. He promises to avenge himself u pon the sisters, but a s for P syche herself, h e is leaving her. She a ttempts su icide b y drowning, but the river will not receive her a nd sets her a shore. There the god Pan finds her. He counsels her to cease mourning, to a ttempt suicide no more, and instead to pray to Cupid and to worship and flatter him, for Cupid is a "pleasureloving and soft-hærted youth."

Psyche go es to the house of one of her si sters and tells her what has happened, but she adds the lie that Cupid had announced he would now wed this sister. The si ster i mmediately travels to t he crag where P syche h ad b een e xposed, le aps off, and dismembers herself on the rocks—no gentle Zephyr for her. Psyche re peats the process with the second sister with the same outcome.

A s eabird, m eanwhile, g oes to V enus a nd complains that the entire household of the goddess is getting a bad reputation since Cupid has a girlfriend. Venus demands a na me, and the bird names Psyche.

Furious, V enus c onfronts Cu pid a nd u tters numerous t hreats. She s wears t o p unish C upid, and she t hen en lists C eres a nd J uno to hel p her find Psyche and vent her fury upon her. The other two goddesses try to dissuade Venus, but succeed only in offending her as Book 5 ends.

Book 6

The o pening o f B ook 6 finds Ps yche traveling about the world, making sacrifices at the altar of every g od a nd g oddess i n her de speration to regain her husband. Ceres discovers Psyche tending her a ltar a nd w arns P syche to c onsider her safety. P syche prays for s anctuary, b ut C eres denies it and sends her packing.

Psyche ne xt pr ays to J uno a st he pa tron of pregnant women, but the immortal blood (called *ichor*) that flows in the veins of the gods proves thicker than Juno's pity for Psyche, and that goddess a lso r ejects P syche's supplications. P syche resolves to surrender and throw herself on Venus's mercy.

In the meantime, Venus borrows the services of t he me ssenger of t he g ods, M ercury, f rom Jupiter. The goddess gives Mercury a poster with Psyche's n ame a nd d escription and s ends h im around the world in search of someone who can reveal her whereabouts. Eight kisses from Venus herself is the reward offered for information leading to Psyche's apprehension.

Psyche, however, i s a lready a t V enus's do or, where V enus's s ervant, Habit, re cognizes her . Habit d rags P syche i nside by t he ha ir a nd t akes her to V enus, who turns her o ver to T rouble and Sadness for torture. The goddess also cites Roman law t o decl are t he offspring of P syche's union illegitimate.

Then Venus gave Psyche a g reat pile of mixed seeds and orders her to s ort them all by evening. A h umble a nt, p itying t he g irl her i mpossible task, calls squadrons of his fellows, and the ants quickly ac complish the job f or her. Venus attributes the miracle to Cupid, tosses Psyche a crust of bre ad, and stomps off. Cupid, also in solitary confinement, is in Venus's house.

Venus next sets Psyche the task of procuring a hank of wool from a flock of nearby wild, golden sheep. This t ime a r eed, st irred b y the wind, instructs Psyche how to p rocure what she s eeks. Not a t a ll m ollified, Venus sets P syche another task. S he m ust b ring a p hial o f f reezing w ater from the source of two rivers of Hell, the Styx and the C ocytus. W hen P syche comes t o t he pl ace, she d iscovers sna kes e verywhere, a nd the w ater itself speaks and warns her off.

This time the eagle of Jupiter himself comes to Psyche's aid and fills the vial for her. Still unsatisfied, V enus s ends P syche to hel 1 f or a jar of Proserpine's beauty. Psyche decides on suicide as the q uickest r oute t o the u nderworld, but t he tower f rom w hich she i s a bout to j ump sp eaks and tells her of an alternate route to take and the price of a dmission to hell—two barley c akes soaked in mead and two coins in her mouth. The tower a lso tells her of t he sna rest hat she w ill encounter and of attempts that will be made to delay her jo urney and to r elieve her of the coins and the cakes. She must not fall for any of them. One cake she must feed to Cerberus. Then, when she c omes i nto P roserpine's p resence, P syche must resist her invitation to dine as a guest but must sit on the floor and eat only bread, make her request, and feed Cerberus the other cake as she leaves. With the two coins, she must pay her passage to the boatman of the Styx—one coming and one going.

Finally, Psyche must not look into the jar she is carrying or think curiously about the treasure of d ivine b eauty. Ps yche heeds a ll t he to wer's counsel ex cept t he l ast t wo. She y ields to t he temptation to open the jar. There is nothing in it but d eathlike s leep, w hich i nstantly o vercomes her.

Cupid, ho wever, n ow c ured of h is burn from Psyche's oill amp, e scapes and finds Psyche. H e carefully wipes the sleep off her and awakens her with a little prick of his arrow, then sends her off to fulfill Venus's orders, promising to take care of everything else himself. He rushes off to Jupiter and app eals to the king of the gods. De spite the fact that Jupiter had often been wounded by Cupid's a rrows in the chief god's i nterminable series of a mours, Jupiter grants Cupid's request for a ssistance on t wo c onditions: C upid m ust know how to take precautions a gainst h is competitors, and he must give Jupiter an outstandingly beautiful human girl in repayment.

Jupiter c alls a m eeting o f a ll t he g ods a nd announces that Cupid is to keep Psyche fore ver. He reconciles Venus to his decision, makes Psyche an im mortal, and a w edding ba nquet en sues among the gods.

At the robbers' headquarters, Lucius in asinine form h as over heard t his tale, and j ust t hen t he robbers re turn. They mistreat Lucius and, as he has gone lame, decide to doaway with him. Lucius resolves on flight and b reaks l oose. The ol d woman t ries to r estrain h im, b ut t he c aptive maiden tears the strap from her hand and jumps on Lucius's back, and the two gallop off.

The girl promises her mount many rewards if he carries her safely home. The robbers, however, intercept t he pa ir a nd r esolve u pon a ho rrible death for the two of them as the sixth book ends.

Book 7

As Book 7 o pens, Lucius o verhears t he robb ers discussing the robbery at the house of h is host, Milo. L ucius learns t hat t he a uthorities ha ve decided to prosecute him for the crime, and that his slave had been tortured though he knew nothing. Lucius concludes that fortune truly favors the wicked an d th e u ndeserving. H e w ould l ike to testify in h is own defense, but he c an only bray. Moreover, a s t he r obbers i ntend to k ill h im, h e has a more pressing problem.

As h e c onsiders i t, a n ew r ecruit app ears among th e r obbers. H e i ntroduces h imself a s Haemus of Thrace, son of Theron, and launches into telling the n ext s tory i n t he book. It concerns the history of his former robber band, the way the emperor ended it by edict, and his subsequent escape to t he camp of his new comrades. He r ips open the r ags he is wearing, and 2,000 gold pieces pour out. He gives them to the band and offers h is own services as t heir le ader. The robbers welcome him in that role, but when they outline t heir pl ans f or k illing t he a ss a nd t he maiden, Haemus suggests that a m ore profitable course w ould i nvolve s elling t he ma iden i nto prostitution.

Haemus p roceeds to g et h is n ew c omrades thoroughly drunk, smuggles food to the maiden, and kisses her on the sly. Lucius prudishly disapproves of t his b ehavior u ntil h e d iscovers t hat Haemus is in reality Tlepolemus, the young woman's bridegroom. When the robbers are all dead drunk, h e b inds them, sets t he g irl o n Luc ius's back, and leads the pair home. Once the rescued girl and ass are safely there, Tlepolemus leads a posse of t ownspeople back to the c amp, where they kill all the robbers. He and his in-laws next determine to r eward Lucius. They decide to set him free so that he can roam about performing stud ser vice, and they entrust a her dsman with the task. The her dsman and h is w ife, ho wever, yoke Lucius to a g rinding m ill a nd s et h im to crushing grain—including t he b arley t hat h is grateful would- be benefactors ha d m eant f or Lucius's feed.

276 Golden Ass, The

When Lucius is utterly worn out from overwork, the herdsman at last sets him free. Just as he is about to begin his career as a stud, however, the resident stallions object and attack him. Then he is forced to carry wood down the mountain, directed by an uncaring boy who overloads him, beats him bloody, and ties a knot of thorns to his tail so that his suffering is constant. Then the boy sets Lucius on fire, and only a p uddle of muddy water saves him.

Finally, the b oy accuses Lucius of attempting to rape human beings, and the herdsman instructs the boy to destroy the ass. As the boy sharpens the sacrificial axe, a more parsimonious country fellow recommends castration instead. As the boy is about t o per form t his o ffice, a she-bear a ttacks him, and Lucius breaks away. A stranger finds him and rides him straight into the midst of the herdsmen w ho had o rdained h is ema sculation. They accuse the rider of thievery and, finding the boy dismembered b y the b ear, a lso o f m urder. The boy's parents schedule Lucius for death on the day following, and du ring the night the m other tortures him. Lucius saves himself by befouling her, and Book 7 ends.

Book 8

The next morning, a groom arrives to announce the u ntimely d eath of C harite, the m aiden Lucius had t ried to r escue. The groom tells the sad tale of how a r ival and brother of Charite's husband, feigning friendship, had murdered the husband on a boar hunt. On learning the news of her husband's death, Charite went mad. The murderer, Thrasyllus, however, unable to contain hi s i mpatience, p roposed ma rriage to Charite before her time of grieving had passed. Charite p ut h im off, a nd her h usband's g host paid her a n octurnal v isit, w arning her t hat Thrasyllus had killed him.

Pretending to accept Thrasyllus's impious proposal, Charite lured him to her chamber. There a trusted maid gave him a soporific in wine. Charite first blinded him and then seized his sword. With sword in hand, she ran to her husband's tomb and committed suicide. Chastened at last, the blinded Thrasyllus locked h imself in the same tomb to starve himself to death.

As their e mployers have d ied, the her dsmen are suddenly without wages. They load up their goods and trek off. They need Lucius for a pack animal, and he is reprieved. As they march off, news of fe rocious wolves in the n eighborhood makes them huddle together and move fast, with Lucius r ight in the m iddle. Though no wolves attack, the workers on an estate mistake them for bandits and set the dogs on them. Then the neighboring farmers assault them with rocks. Matters get sorted out, and the group travels on.

They pause, but a man- atting snake devours one of their number, and the herdsmen hasten on a gain. They finally find re fuge in a town where t hey l earn a bout a n otable c rime. T o avenge he rself on a n a dulterous h usband, t he accountant of a n e state, h is wife de stroyed h is rec ords, his baby, and herself. The owner of the estate p unished the h usband by s mearing h im with honey and tying him to a fig tree that harbored a nest of ants—with painful and predictable re sults. Luc ius's group d oes not l inger there.

In due course, they arrive at a city where they decide to settle. They rest the animals for three days and take them to the market to sell. A perverted wor shipper of a n otorious S yrian g oddess, A targatis, b uys Lucius a fter considerable tomfoolery. The chief of a bevy of catamites, the purchaser expects that Lucius will carry their goddess a bout while her w orshippers flagellate and mutilate themselves before taking up a collection a mong t he b ystanders. They l oad t he offerings on Lucius, who now discovers that he is both a temple and as torehouse. On their return home, they revel in forbidden pleasures. These are inopportunely discovered when Lucius attracts a party s earching f or a s tolen do nkey with his brays. His masters manage to flee, beating L ucius unm ercifully when t hey get the chance. They stop short of killing him, however, since they need him to c arry the image of their goddess.

Book 9

Book 8 e nds w ith Lucius in danger of being slaughtered so a cook can use his thigh to replace a stolen haunch of venison. He escapes this fate as Book 9 o pens, by i nterrupting a ba nquet a nd being locked away. Because his masters fear that he might contract rabies in the stables, they lock him in a b edroom, w here f or t he first t ime in years, he s leeps l ike a h uman b eing. The n ext morning, he passes their test for a sinine gentleness and once again bears the goddess forth. The group s pends the n ext n ight at an inn, w here Lucius overhears the next story he reports. It is an account of a n unfaithful wife who deceives her husband by h iding her lover i n a jar when t he husband u nexpectedly r eturns home and a bout the w ay w ife a nd lo ver c ontinue a suc cessful deception.

After ma king l ight o f t he p rophecies a nd soothsaying of his group of mountebank masters, Lucius tells how they are caught stealing a golden cup from a temple and imprisoned. Lucius is sold as a pack animal again, this time to a miller who is a lso a baker. He h arnesses Lucius t o a g rindstone and sets him again to hard labor.

Lucius reports the sorry condition of both the human and the animal slaves at the mill. Then he turns to a report about the wife of his master the baker-av icious d runkard, ad ulteress, s adist, and s hrew. L ucius's h ighly s ensitive a ss's e ars overhear much of her conversation with another woman, he r c onfidante, a nd h e reports a t ale within a tale. It concerns a jealous husband, Barbarus, a slave, Myrmex, a wife of easy virtue, and her ad mirer. B arbarus s ets M yrmex a s a g uard over his wife's virtue. The would-be lover. Philesitherus, overcomes the reluctance of both slave and mistress with gold. While the tryst is in progress, Barbarus unexpectedly returns home. Myrmex holds his master at bay with the excuse of a mislaid key while Philesitherus makes his escape through the bedroom window. In the confusion, however, the lover forgets his sandals, which Barbarus discovers the next morning. Guessing the truth, B arbarus ha uls t he s andals a nd M yrmex off to t he a uthorities, but the shrewd Philesitherus intercepts them and beats Myrmex, accusing him of taking the shoes from the public bath. The ruse is successful, and the c onspirators de ceive Barbarus on all fronts.

The n ext t ale, c oncerning t he m iller's w ife, mirrors aspects of the one just told. The miller's wife, thinking her husband safely a way for the eve ning, entertains a young lover at a sumptuous banquet. When the miller returns unexpectedly, she hides her paramour under a wooden tub and asks h er h usband wh y he i s bac k s o s oon. The miller reports that his friend the fuller and he had discovered t he f uller's w ife i n similar c ircumstances. She had hidden her f riend in a w icker cage us ed t o fumigate c lothes with s ulfur. The young m an's sn eezes r evealed h is h iding pl ace. The fuller would have killed the youth had the miller n ot as sured h im t hat t he su lfur's f umes would a ccomplish t he s ame ob ject. The m iller reports that he smoothed matters over, advising the wife to stay for a while with a female friend until h er h usband's an ger h ad c ooled. Then h e had returned home immediately.

As the miller's wife reluctantly serves her husband a d inner she had p repared f or her lo ver, Lucius's keeper leads him past the tub where the young m an i s h iding. Luc ius s teps on t he l ad's exposed fingers, a nd t he lo ver c ries o ut. The miller d iscovers h im, b ut ke eps h is tem per. H e explains that he too is attracted to the young man, so h e a rranges a ménage à t rois. The three w ill share one bed. However, the miller locks the wife away elsewhere, and on the next morning he has the boy thrashed by his servants and divorces his wife. The w ife h ires a w itch to s often h er h usband's heart. When her charms fail, however, the witch t ries to c harm t he g host of a m urdered woman to destroy the miller.

One day, a s trange woman shows up and privately i nterviews t he m iller. A fter a lo ng t ime, his subordinates, needing supplies, discover him hanging dead from a rafter in a locked room with the woman n owhere to be found. When h is daughter comes to the miller's funeral, she reveals that her father had told her what happened

in a dream, and this is how Lucius learns the truth of the matter.

Auctioned o ff again, L ucius b ecomes t he property of a market gardener, and of course his meager c ircumstances lead once more to a new story. This time, when his new master is about to receive a reward from a wealthy landowner, portents of d isaster app ear. A c hicken l ays a n e gg from w hich a full-fledged ch ick e merges. The ground o pens, and a f ountain of blo od g ushes forth. Wine boils, and other strange signs appear. These predict the deaths of a t hieving rich man, his neighbor's three sons, and the suicide of their father.

As Lucius and the gardener leave the home of the landowner, a soldier unsuccessfully attempts to commandeer Lucius, beating the gardener into the bargain. Forced to defend himself, the gardener bests the soldier, takes his sword, and rides off. The soldier confides h is sha me to s ome fellows, and they plot revenge. They accuse the gardener of t hievery a nd d iscover b oth h im a nd Lucius h idden i n a f riend's house a s t he n inth book ends.

Book 10

As Book 10 b egins, L ucius, now l aden with the soldier's weaponry, arrives at the soldier's station and there overhears a tale that, as usual, he shares with h is readers. A stepmother conceives a violent passion for her s tepson and d isplays all the symptoms of lovesickness—considered a dangerous disease among the ancients. She propositions her stepson. Though he is shocked, he decides it is best to put her off rather than flatly refuse her. He tells her to wait until h is father is away, and then he seeks advice from a trusted teacher. The teacher counsels immediate flight.

In the meantime, the stepmother has managed to send the husband off. She tries to collect on the young m an's p romise, b ut he p uts her off with repeated e xcuses. When she realizes that his acquiescence w as i nsincere, her lovet urns to hatred. With a s lave, she plots the boy's murder. They prepare a p oisoned c up, but by chance the woman's own son by her first marriage drinks it. Far from caring, the wicked stepmother sends for her husband, accusing his son of murdering hers to punish her f or refusing to y ield to t he young man's lust.

Convinced, t he father a ppeals to t he ma gistrates for a judgment against h is own son. They duly summon the young man to appear. They also examine the slave who had prepared the poisoned cup. The s lave te stifies ag ainst t he s on. A lmost all the jurors think the son is guilty, but one keeps them from voting and invoking the sentence of being flogged, sewn into a sack, and thrown into the sea. The dissenting juror proves to be the doctor who had sold the slave the poison. He had suspected f oul p lay, had t he s lave s eal t he m oney paid for the p oison w ith h is r ing, a nd had p reserved t he m eans f or p roving h is a llegation i n court. The slave nevertheless maintains his innocence in spite of torture.

The doctor then admits that he gave the slave not poison but a coma-inducing drug, mandragora, and that the supposedly dead youth will soon come to. S uch proves to be the case. The stepmother is e xiled, the slave c rucified, the doctor permitted to keep the money, and the father has two fine sons.

Now Lucius experiences a bit of good fortune. Two slaves, brothers who are cooks, buy him, and he contrives to feed on the gor geous food they bring home from banquets until he is caught. At first they think an ass would not eat such fare, but, made suspicious by his increasing girth, they catch him eating human fare. This proves to be a source of a musement, not only to t he slaves but also to their master and his guests. Then it occurs to someone that Lucius might also enjoy a drink of w ine a nd mead. I ndeed he do es. The s laves' master pays them quadruple what they had paid for Lucius, and then has someone teach him a number of t ricks, i ncluding g esturing with h is head to indicate his likes and dislikes, wrestling, and dancing.

Lucius i nterrupts his story about himself to give details about his master and then returns to his own adventures, explaining that his master has profited f rom e xhibiting h im. A mong those w ho ad mire h im i s a l ady w ho, l ike Pasiphae, the que en of Crete who had y earned for a bull, conceived a n u nnatural passion for the golden ass—one that she consummates in a detailed en counter with Lucius. L earning of it from the slave, Lucius's master decides that there is m oney t o be m ade from h is j ackass's n ew trick, and a condemned woman is found for the occasion.

Lucius interrupts his story with an account of the w oman's c ondemnation. It is as tory t hat begins with the birth of a female child. Ordered to expose the child to its death, the mother instead gives it to neighbors to rear. When the girl nears marriageable a ge, its r eal m other tel ls her s on that the girl is his sister lest he commit incest with her. The brother, a noble youth, receives his sister into his own home and arranges a marriage for her. The brother's wife, however, thinks the sister might be a rival and begins to plan her death—a deed t he sister-in-law ac complishes i n a loa thsome manner.

The brother's wife, who is also an adulteress, now turns her venom on her husband, who has fallen ill after his sister's death. The wife hires a physician to poison her husband and contrives to get the physician to poison himself into the bargain. The physician, b efore dy ing, c onfesses t he entire affair to his wife. The brother of the murdered girl also dies from poison. The doctor's wife attempts to blackmail the guilty widow. Unfortunately by this time the wife has become a serial murderess. She wheedles poison from the doctor's wife and uses it to poison her and also a daughter who is the legal heir to her husband's fortune. The doctor's wife, however, lives long enough to confess the whole sordid story to the district governor. The governor sentences the woman to be torn by wild beasts.

It is this convicted murderess who is to become Lucius's unnatural bride. Lucius strives to t hink of a way to commit suicide instead. Although he cannot, he reminds himself that it is now the season for roses to bloom. Perhaps he can resume his natural form. Turning h is attention to a de scription of t he preliminary entertainments t hat have been prepared as a p relude to t he main event that would feature him a nd t he m urderess, Luc ius l ingers lovingly on t he s how's details—scantily c lad dancers r epresenting g oddesses a nd a ll s orts o f magnificent p ageantry. A ddressing h is r eaders as "cheap ciphers" and w orse, L ucius offers y et another a ssociative transition, a s he r ecalls t hat since the beginning of the world, juries have been subornable for a p rice. He gives a s eries of illustrations t hat i ncludes t he ju ry that g ranted th e armament of the slain Achilles to Ulysses instead of to Ajax.

Calling himself back to the main story, Lucius admits that he cannot bear the thought of participating in such a shameful display. Watching his chance, he bolts and runs six miles before finding his way to a de serted stretch of beach where he spends a night of restful sleep, watched over by a resplendent moon to end Book 10.

Book 11

As t he 1 1th an d l ast book beg ins, a r efreshed Lucius awakens with the premonition that his asinine troubles may be n early over. A fter bathing in the sea in a ritual purification, he prays to the queens of heaven and hell, whoever they may be. In response, a divine face emerges from the sea, followed by t he full form of a go ddess. L ucius lovingly describes her app earance and dress and the object that she carries. She i dentifies herself by the various n ames by which her w orshippers in different parts of t he world add ress her. H er true n ame, h owever, i s I sis, a nd t he E gyptians worship her with proper rites.

Isis explains to Lucius that the day of his salvation is at hand. He is to join a procession in her honor, re verently pl uck f rom t he h and of he r priest a garland of roses, and reassume his human form. He must remember and keep secret the fact that the rest of h is life is pledged to t he celibate service of I sis. A fter h is de ath, he will continue to serve her a mong the privileged souls inhabiting the Elysian Fields in the underworld.

280 Golden Ass, The

Now L ucius c arefully describes t he r eligious procession—one i n w hich t he g ods o f E gypt themselves participate. When the priest carrying the roses approaches, Lucius carefully edges forward. The priest, however, has been forewarned of Luc ius's c oming me tamorphosis a nd o ffers him t he ga rland. Luc ius t akes a nd e ats i t. H is transformation in to a naked ma n i mmediately takes place i n t he m idst of a w ondering c rowd, who praise the power of the goddess.

After giving Lucius a garment, the priest lectures Lucius about the folly of his earlier human life and the price that blind Fortune had exacted for his foolishness. The priest recruits Lucius as a communicant of the religion of the goddess. A s her s lave, Lucius will, the p riest p romises, find true freedom.

The procession returns to the spot where Lucius had sp ent t he p revious n ight. The w orshippers load a ship with offerings to the goddess, and they set the ship adrift. The goddess having been thus propitiated and blessings pronounced in Latin and in Greek, the priests declares the season for navigation officially open.

Upon learning that Lucius has lived, his townspeople welcome h im ho me, and h is former s ervants, r eturning f rom H ypata, ma nage e ven to identify and recover h is horse that they had s old long before.

In the meantime, the requisite vows of chastity have deterred Lucius from joining Isis's order as a full-fledged priest. Now, however, he seeks to do so. H is priestly mentor counsels patience as the requirements for such consecration are complex and as the act of initiation involves voluntary death and salvation.

Lucius waits patiently, and eventually the goddess makes clear to him that the day has arrived. After 1 0 d ays of f asting a nd f ulfilling other requirements, Luc ius i s admitted to t he p riesthood of Isis. He regrets being unable to share the mysteries of h is i nitiation with h is readers. The full initiation and Lucius's ritual death and rebirth require three days. Luc ius adores the goddess in prayer and in the sort of liturgical language familiar to Christians. He then boards a ship for Rome, where Isis is worshipped under the name Campensis, owing to the location of her temple on the Campus Martius. There, a fter a y ear, Luc ius d reams that, although he is an initiate of the cult of the goddess, he has not yet been admitted to the mysteries of her husband, the supreme god Osiris. Such initiation is expensive, but Lucius scrapes together the required sums by selling his ragged clothing, and he is also admitted to the cult of Osiris. Thereafter, Lucius supports himself by practicing law in the Latin language.

The Golden Ass, or Metamorphoses, of Apuleius ends with Lucius's being divinely prompted to u ndergo y et a nother i nitiation i n w hich he becomes a m ember of t he c hief i nitiates of t he bearers of Osiris's shrine.

As Apuleius's distinguished translator, J. Arthur Hanson, e xplains, c ritical e stimates of t he n ovel and of A puleius's p urposes in w riting i t r arely agree. One school considers the work a jumble of poorly or ganized and l argely i mmorals tories tossed i nto the framework of Lucius's adventures as a donkey. This view seems to ig nore both the parallels b etween t he a ssociative o rganization o f parts of Ovid's Metamorphoses and that of Apuleius and the care that Apuleius takes to suit the subordinate tales to the development of his overarching story. Another school of thought finds in the work an extended a llegory of t he s alvation of L ucius from the foolish er rors of the flesh through the gracious intervention of the goddess Isis. A careful reader c an t race pa rallels b etween A puleius a nd Cervantes' Don Qui xote o f L a Mancha. Various critics have taken other philosophical and literary views of the work as well. Perhaps the greatest tribute to the work is the frequency with which it is translated and read after 2,000 years.

Gorgias of Leontium (Gorgias of

Leontini, Gorgias of Sicily) (fl. ca. 485– ca. 380 B.C.E.) *Greek prose writer*

An extremely long-lved Sophist philos other, a Sicilian a mbassador to Athens, a nd a su perb rhetorician, Gorgias of Leontium is reported to have studied with Empedocl es. Serving as Leontium's ambassador to Athens in 427 b.c.e., Gorgias is credited with having introduced Sicilian oratorical conventions into Athenian rhetoric. He remained in Athens as a Sophist, teaching oratory and its application to politics. In his personal philosophy, G orgias p rofessed e xtreme s kepticism and n ihilism. H e b elieved t hat n othing r eally existed o r, i f s omething d id e xist, i t w ould b e unknowable. I fs omeone d id ma nage to le arn something ab out t he na ture o f e xistence, t hat person would find it impossible to communicate the knowledge to anyone else.

Various figures of speech are associated with Gorgias's rhetorical innovations. Called *Gorgian figures*, t hese i nclude ba lancing a ntithetical arguments o ne a gainst a nother (on t he o ne hand . . . and on the other . . .). He also strove to achieve euphony through the repetition of vowel sounds (assonance) an d r hyming. G orgias achieved a similar effect by using words with like endings in a series (weeping, wailing, and gnashing of teeth) a technique called *homoeoteleuton*. He also made effective use of carefully balancing similar grammatical arrangements within phrase structures (*parison*)—"servants of the undeservedly unfortunate, punishers of the undeservedly fortunate."

The classicist Donald A. F. M. Russell tells us that Agathon's speech praising the god of love in Pl at o' *Sympos ium* parodies the style of Gorgias. Also, in his dialogue entitled *Gorgias*, Plato has his c haracter na med G orgias u nsuccessfully defend t he a rt o f rhe toric a nd i ts u ses a gainst Socrates' relentless questioning.

Surviving examples of Gorgias's work, beyond a few m iscellaneous fragments, i nclude a eu logy praising Helen of Troy a nd a defense of Palamedes, the man who supposedly enlisted Odysseus in the Greek army against Troy by threatening to destroy O dysseus's s on Telemachus. Re grettably, neither of t hese w orks i s c urrently a vailable i n En glish, t hough r ecent t ranslations fr om th e Greek a re a vailable i n I talian. The f ragments appear i n Sp anish. Gorgias Plato (ca. fourth c., B.C.E.)

Usually considered a lesser Platonic dialogue, the *Gorgias* takes its title from the name of a Sophist phi los o phe of that name. The dialogue begins by examining the nature and the value of the art of rhetoric. It continues by expressing the hope that the eloquence of rhetoric and its persuasive power can become the handmaid of logic and morality as they are practiced in public and in private life. The Sophists generally valued rhetoric for its persuasive power and its ability to gain adherents for a c ause i rrespective o ft hat c ause's t ruth o r morality.

282 Gospel of Thomas, The

As a final caveat to sophistic expediency, Plato ends the dialogue by describing the eternal circumstances of both r ighteous a nd u nrighteous souls.

Gospel of Thomas, The (ca. first

century C.E.)

This n onbiblical g ospel was d iscovered l argely intact a mong the Coptic N ag Ha mmadi ma nuscripts in Egypt in 1945 (see Gnostic apocryphaa nd pseu depigrapha) a nd e arlier i n extremely f ragmentary c ondition i n Greek a t Oxyr hynchus. The Gospel of Thomas is thought to ha ve b een w ritten i n t he Gr eek l anguage i n Syria, perhaps at Edessa, where the bones of the Christian apostle Thomas were ve nerated. The work w as s ubsequently t ranslated in to C optic. The author of the gospel was thought to have been Didymos Judas Thomas, whom the Syrian church considered to be both the twin brother of Jesus and his apostle. While some scholars consider the work a Gnostic document, others are only willing to say that some influence of Gnostic theology is apparent in it.

The importance of this document stems in part from its containing otherwise unrecorded sayings attributable with some confidence to the historical Jesus. Clear parallels appear between many of the 114 sayings reported in the Gospel of Thomas and those in the synoptic gospels of the Christian New Test ament. A ccording, though, to the s cholar H elmut K oester of the Institute f or A ntiquity a nd C hristianity, t he forms of the parallel sayings suggest a g reater antiquity for J esus' r emarks a s t hey app ear i n Thomas than in the synoptic gospels. That antiquity may derive from the form of the remarks originating in an earlier, thus far undiscovered version of the Christian Gospels. The scholars who posit it label this version "Q." Alternatively, the earlier form of the remarks may result from their having been recorded by someone who had heard Jesus speak.

Beyond this, Thomas's importance also derives from its early date of composition at a time before Christianity bec ame t he state r eligion of Rome (fourth century c. e.), and before either Christian (or h eretical) d octrine or a n a pproved bi blical canon had achieved definitive status.

Little commentary surrounds the largely prophetic sayings of Jesus in the Gospel of Thomas. There is conversation between Jesus and several of his disciples and between Jesus and Mary, but Jesus is here pictured as a human teacher of wisdom and not as a su pernatural being-though he presents himself as someone of great authority. In and of itself, that fact is enough to occasion b itter c ontroversy a mong t hose w ho subscribe to a n orthodox view of Christianity and those who, instead, search in Scripture for spiritual wisdom instead of personal salvation. For those whose interest in all such early documents is principally literary and historical, the light that this document and similar ones shed on the development of first- and second- century codicology, on the history of religious texts, and on t he d evelopment a nd m ingling o f r eligious ideas i n t he Greco-Roman-Persian-Egyptian Mediterranean w orld p rovides e xcitement a nd fascination enough.

grammar and grammarians in Greece

The concept of *grammar* as it developed a mong the Greeks did n ot limit itself to t he parsing of words and phrases contained in a s entence. The broader Greek notion of grammar encompassed what contemporary students of language would address in the much broader study of philology. It included the skills of correct speaking and writing, usually divided into the principles or rules of language a nd t he i nterpretation of w ords a nd phrases. Grammar also addressed the composition of p oetry, the study of elo quence, and t he study of history and elementary philosophy.

As the discipline developed among the Greeks, grammarians devoted themselves to u seful tasks and s tudies of d ifferent s orts. S ome u ndertook revising classical authors in editions that accounted f or cha nges i n u sage a nd t he m eanings o f words i n a ncient t exts. Others c onducted c ommentaries on s uch texts or sought to resolve grammatical and philological conundrums. Still others c oncerned t hemselves w ith d ifferences among the several dialects spoken in the ancient Greek world, some commenting on differences in single w ords o r i n v ariant g rammatical f orms. Poetic meter was also among the subjects of interest to ancient Greek grammarians.

An early school of Greek grammarians flourished in Alexandria, Egypt, under the leadership of Zenodotus. He was succeeded in that role, first by Aristophanes of Byzantium and next by Aristophanes' h ighly r espected d isciple, A ristarchus of Samothrace. The latter's name became a common descriptor for any renowned literary critic of the e poch, s uch as C rates, Ph il emon, A rtemidorus, a nd S osibius. A nother e specially s evere critic of Homer, Zoilus, lent his name to a ny of the more judgmental s ort of literary commentators. Though we know the names of these grammarians and something of their reputations, only disconnected bits of their works survive.

After the Greek world became a part of the Roman Empire, the study of Greek grammar in the broad sense expanded exponentially. A few names of the most outstanding practitioners of the d iscipline m ust suffice as representative. Those who focused principally on lexicography included A pollonius th e S ophist, E rtianus, Timaeus (immortalized in Pla t o's dialogue that bears his name), and Julius Pollux (Polydeuces of Naucratis).

Julius Pollux (fl. second century c. e.) is especially r emembered f or a fine G reek d ictionary that not only treats the meanings of words but also, in its first volume, addresses such matters as gods and kings, commerce, mechanical matters, houses, w ar ma tériel, a nd a griculture. The s econd volume discusses the age of the human race and p arts of the h uman b ody, w hile t he t hird examines fa mily r elationships, f riends, t ravels, road, and rivers. The fourth book considers sciences, the fifth a nimals and hunting, the sixth (perhaps oddly) meals and crimes. A treatment of the trades practiced by people is the subject of the seventh book. The eighth volume considers the administration of justice, while the ninth looks at cities, buildings, money, and games, and the final book a ddresses suc h ma tters a s f urniture a nd household u tensils. Gr ammar i n J ulius's m ind was a broadly encompassing subject.

Among those who specialized in the study of dialects, Tryphon s on of A mmonius, Phrynicus the Arabian, and Ælius Mœris stand out from the crowd. A pollonius D yscolus a nd ot hers w rote on specific to pics of Greek s yntax. A pollonius's surviving w orks t reat p ronouns, c onjunctions, adverbs, and syntax in general. While it is possible to p rovide n umerous e xamples, I c lose t his entry w ith a n otice of t he g rammarian Su idas, who flourished about 1000 c .e., and with a word about an anonymous source.

Although Suidas is a late figure for inclusion in this volume, his *Lexicon* is the source of considerable o therwise u nknown i nformation a bout the literature of t he 1,700 y ears t hat p receded h im. Similarly, a glossary known as the *Etymologicum Magnum* (Great Etymology) of an anonymous author pre serves m any ot herwise lo st p assages from ancient authors and clarifies a large number of otherwise irresolvable mysteries from the pages of h istory a nd of m ythology. The g lossary a lso dates from about 1000.

grammarians of Rome

Like their Greek literary forebears, Roman grammarians were interested both in the literature and in the history and structure of the Latin language, and thus, *grammar* was a broader study than the word implies in our contemporary English. Both Roman a nd Gr eek g rammarians were p ersons with broad expertise in language and literature, and i t w as a Gr eek, Cr ates o f Ma llos, w ho i s credited with sparking Roman interest in the professional study of the Latin language when Crates came to Rome in 168 b.c.e.

The earliest professional Roman grammarians included A urelius O pilius, w ho w rote a ninebook commentary on early Latin authors. A ntonius G nipho, a te acher of Ci ce r o, c omposed a philological d iscourse on t he L atin l anguage. Neither of these works has survived.

Marcus T ere nt ius V arr o (116–27 b.c.e.), who was t he most not able s cholar t hat a ncient Rome ever produced, wrote a n important work in 25 books (papyrus scrolls) entitled *De Lingua Latina*, on Latin vocabulary and syntax. A significant portion of this work still exists. In the same epoch, the emperor Augus t us Caesar employed a grammarian, Valerius Flaccus, as a palace tutor. Flaccus wrote a g rammar of w hich a n a bridgement is left to us. The grammarians of this early period directed their attention chiefly to the history and development of the Latin language.

After the beginning of the first century c.e., the s ucceeding g enerations o f gr ammarians turned their attention to what we might call historical literary criticism. Quintus Asconius Pedianus (9 b.c.e.-76 c.e.) wrote commentaries on the works of Cicero, Sall ust, and Vir gil. Handwriting w as a lso a mong t he to pics t hat i nterested first- certury gr ammarians, a nd V elius L ongus wrote a surviving work on the subject. A w riter on the same topic and also on Hor ace's *The Art* of *Poet ry* was Terentius S caurus. Marcus C ornelius Fronto, on the other hand, interested himself in s ynonyms an d w rote a t reatise o n t he variations in their meanings.

The somewhat later grammarian Aulus Gellius, a student of Fronto, was temporarily a resident in Athens. There he entertained his children and whiled away the long winter nights by collecting a miscellany of o bservations on various matter of grammatical, antiquarian, and philological interest. Entitled *Noctes Atticae* (Greek n ights), more than 18 of his original 20 books survive.

Particularly prized for h is c itations of o therwise lost earlier authors is the third- æntury c.e. grammarian N onius M arcellus. H is fourthcentury s uccessor, A elius Donatus, o ne of t he teachers of St. Jer ome, proved u niquely i mportant f or the s ubsequent study of Latin. When taken together, his collected grammatical essays a compilation k nown as the *Ars Donati* (The art of Donatus)—form the first k nown s ystematic Latin gr ammar. D onatus's w orks p rovide t he foundation up on w hich all s ubsequent L atin grammars have been constructed. He was also an important e arly c ommentator o n t he d ramatic works of Ter ence.

Macrobius, who flourished early in the fifth century, left seven books called *Saturnalia* that contain m uch ph ilological material—both h is own work and much gleaned from other authors. He a lso w rote a de tailed ac count exploring t he likenesses and differences a mong Gr eek a nd Latin v erbs. Though t his work i s lo st, a la ter extract of it s urvives. H is m ost famous work— *Commentary on the Dream of Scipio Described in Book 2 of Cicero*—is a philosophical work.

The si xth c entury's m ost i mportant L atin grammarian was Priscianus (Priscian), who lived in Constantinople. His entire corpus of 18 books, *Grammatical Institution*, survives. Priscian's works make u p t he m ost e xtensive e xtant a ncient authority on the grammar of the Latin language.

The last great figure among the ancient grammarians of the L atin l anguage was St. Is idor e, the Roman Catholic bishop of Seville (d. 636 c.e.). His *Etymologiae*, or *Origines*, is an encyclopedic work in 20 books. The last 10 of them are devoted other t reatises o n g rammatical to pics, Isi dore wrote about history and about religious subjects.

Great Dionysia (Athenian Dionysia, Urban Dionysia)

The A thenians c elebrated t his m ost l avish a nd spectacular of their civic religious observances in honor of the god Dionysus in the spring, contemporaneous w ith the an nual r egreening of th e earth around March. It is the festival of the pre-Christian G reek y ear t hat m ost cl osely co rresponds w ith C hristian E aster, w ith t he H indu Holi, or with the Iranian New Year.

During the festival, a statue of the god was carried in procession, and the high point of the observance for the crowds in a ttendance were three successive days of dramatic performances, each of which included three examples of tragedy and a sat yr play. Dramatists such as Aeschylus, S opho cles, and E ur ipides s trove to have their plays selected for production in the competition and then, if possible, to w in the competition with their four-play entries.

Greek prose romance

Although elements that came to characterize the novelistic Greek prose romance had app eared in the works of many early writers, those elements did not come together to produce a separate literary g enre with sha red c haracteristics u ntil t he second and third centuries c.e. The stories that belong to the romance genre sometimes contain licentious represen a tons of love and s ex. They also feature im probable a ccounts of s hipwrecks and survival, narrow escapes from horrible dangers, the separation and unlikely reunion of lovers, u nsympathetic pa rents, a bductions, p irates, and an invariably happy ending.

Examples of t he t ype i nclude Leucippe a nd Cleitophon by Achilles Tatius of Alexandria, Egypt, who probably flourished in the second century c.e. A better writer who spe cialized in stories of re pressed e roticism wast he Sophist called Longus (fl. fourth or fifth c entury c .e.). Though his name is uncertain, the four-book Pasto rals of Daphnis and Ch lo e recalls the love between t he Si cilian she pherd, Dap hnis, w hom Theocrit us named as the inventor of past or al poet ry, and Chloe, the shepherdess whom Daphnis adored. The only surviving exclusively pastoral prose romance, its story, which Longus sets on Lesbos, has inspired many artists over the centuries. P lays, o peras, m usical c ompositions, a nd ballets have resulted from that inspiration.

Generally speaking, not much is known about the writers who composed Greek prose romances. Those wh ose w ork has su rvived m ore or le ss intact include Chariton of Aphrodisias in what is n ow Anatolian Turkey, Eu mathius (or, m ore properly, Eustathius) of Egypt, Bishop Heliodorus of Emesa, and Xenophon of Ephesus.

Chariton (fl. late first or early second century c.e.) composed *The Story of Callirhoe*, but, except for h is city and that the author is the clerk of a lawyer na med A thenagoras, n othing further is

286 Gregory of Nazianzen, St.

known about him. The work of Heliodorus stands out a mong ot her representatives of the genre by being bo th bet ter p lotted t han m ost r omances and a lso un remittingly m oral. A Syrian, Heliodorus flourished late in the fourth c entury c .e. and s erved a s bishop at Tricca in Thessaly. The work for which he is best remembered is *An Ethiopian Romance*. Xenophon of Ephesus may have been the earliest among these writers, but no one knows. H is r omance w as called *The Stor y of Anthia and Abrocomas*.

Even b efore m any of t he G reek st ories, Romans also eagerly penned licentious examples of the romance genre. Perhaps the best known of the Roman stories is *Sat yrico n* by Petronius Arbit er.

The romance genre of the ancient world sparked renewed interest during the European Renais ance. Boccaccio's *Decameron* looks back to the literary type, as does the *Heptameron* of Marguerite of N avarre. The pastoral drama of Italy, too, takes its inspiration from the narratives of the ancient romancers. The Italian theater, in turn, influenced other European playwrights and composers, including Sha kespeare and Handel, and such a 20th-century Broadway hit as *The Fantasticks* looks back through multiple theatrical lenses to this ancient genre for its source.

A u seful o verview oft he en tire Greek genre appears in Gareth L. Schmeling's modestly entitled *Chariton*.

Gregory of Nazianzen, St. (329–389 C.E.) *Greek prose writer*

Born to a Christian family, Gregory was educated in Caesarea, Alexandria, and Athens. While traveling from Alexandria to Athens, Gregory narrowly e scaped de ath i n a sh ipwreck. This harrowing experience confirmed his already ardent faith, and he de voted h is l ife to G od a nd t he c hurch. L ike many of h is e poch, he f elt d rawn to a m onastic vocation, but t hat was a calling he f ollowed only intermittently.

The complexities of c hurch politics and internecine Christian rivalries embroiled Gregory for much of his career. A staunch defender of Nicene orthodoxy, Gregory o ften f ound h imself i n t he minority in t he Eas tern Ro man E mpire, a nd despite h is b est e fforts t o d iffuse d isagreements, he often found himself unwillingly at their center.

From a literary perspective, Gregory is principally remembered for the power of h is orations, of w hich more than 4 0 s urvive. Ch ief a mong these are five *Theological Orations* that he delivered at C onstantinople s tating the N icene p osition an d c ontributing t o t he development o f Trinitarian doctrine within the Roman Church.

Gregory w as a n u nflagging c orrespondent, and more than 2 40 of h is letters su rvive. A lso extant is a collection of his theological and historical ve rse t hat is o f g reater b iographical t han poetic interest. Particularly, the Song of His Life (Carmen de vita s ua) f alls i nto t his c ategory. Divided into three sections it considers first the present, then the past, and then the future. The section on the past considers Gregory's forebears, his birth, his disposition, his training and education, and his behavior and ac complishments. In recounting the difficulties he faced in the church, Gregory's to ne v acillates b etween s orrow a nd anger. In terms of its mode of composition and its focus, G regory's b iographical work provides an instructive contrast with the Confess ions of St. August ine.

In his final years, Gregory withdrew from the controversies that had often surrounded him and moved to his family estate at A rianzus. There he occupied h is r etirement w ith w riting a nd w ith acting as the spiritual adviser of a nearby monastic community.

That work, *Han Feizi*, shares much in common with the contemporaneous *Int r igues of t he Warring States*. Both are witty, civilized, and cynical, and both provide models for subsequent students of the rhetorical arts. *Han Feizi*, in fact, devotes an essay to a consideration of t he subject of the art of persuasion. B eyond that, it contains a stinging condemnation of traditional Confucian scholars and thinkers.

Moreover, the work is charming, using stories and memorable parables to clarify its arguments and delight its audience. In discussing the differences b etween C onfucian and M ohist t hinking, for e xample, *Han Fe izi* recalls a seller of p earls who made beautiful boxes. People bought them, but they kept the boxes and returned the pearls. *Han Fe izi* says that Mozi dispensed real pearls, but avoid ed p retentious rhe toric lest he obs cure the substance of what he had to say. Hebrew Bible

A u seful way to t hink of the Bible a s a *literary* document involves considering the text from the point of view of the genres that characterize the writing it c ontains. I n doi ng s o, I f ollow with some a dditions a nd m odifications t he g eneric scheme p roposed by Wi lliam O wen S ypherd. While many books of the Bible contain representatives o f s everal l iterary t ypes, c ertain g enres prevail in specific books.

The first books of the Hebrew Bible—Genesis, Exodus, Leviticus, Numbers, and Deuteronomy, which a reg rouped tog ether a st he T orah o r Pentateuch—can b et hought of a st he e arliest form of He brew S cripture. These books a ret he work of c omposite aut horship and ed iting, and they were likely in process of creation from about 900 to 400 b.c.e. Received opinion identifies five anonymous aut hors or s chools of a uthors who, working over half a millennium, brought the Pentateuch to its current form.

Among other genres, the Pentateuch contains foundation my ths. Two s eparate sto ries o f c re-

ation, for example, appear in the first chapter of Genesis. There t he r eader t races in the first through the n inth chapters the moment of c reation, the mythical beginnings of history, explanations of t he o rigin of de ath and of a f allen world, the beginnings of human language, and the sovereignty of the human race over earthly creation. The origin of the institution of marriage also a ppears there, a s does the institution of sobserving the seventh day as one of rest.

In a second major thrust, the Book of Genesis recounts t he l ives of t he f ounders of Israel— Abraham, Isaac, Jacob, and Esau—and the efforts of the Hebrews to establish themselves in a l and to which they had m igrated from somewhere in Mesopotamia. G enesis a ddresses a t hird ma jor topic as it recounts the story of J oseph in Egypt and the way that his success there established his people f or a w hile a mong t he Egyptians b efore the Hebrews were reduced to slavery.

Exodus follows the history of the Hebrew people from the death of Joseph to Moses' construction of a tabernacle for worship. C hapters 1–11 trace the steps leading to the decision of the Pharaoh to set the Israelites at liberty. A final plague reinforces that decision, and the Israelites depart and journey to Sinai in chapters 12–19.

The s tory o f ho w t he B abylonian su n g od, Shamash or Shamshu, gave a code of laws inscribed on stone to Hammurabi, king of Babylon (see Code of Hammur ab i—a story 600 years older than the Book of Deuteronomy—provides a direct analogue to a nd s ource for t he G enesis ac count of M oses' receiving t he T en C ommandments f rom G od. Moreover, many of t he le gal s tatutes t hat M oses promulgates b efore h is death i n Deu teronomy come directly from Hammurabi's compendium.

History, biography, and, to a degree, genealogy (so- and- so begat so-and-so t hrough n umerous generations), prominent in the Pentateuch, continue to predominate in Joshua, Judges, 1 a nd 2 Samuel, 1 and 2 Kings, 1 and 2 Chronicles, Ezra, and Nehemiah. Biography and short story combine to produce Ruth and Esther, and with a generous infusion of myth, those two genres coalesce to produce Jonah's story, with his resistance to his

sense of d ivine mission and h is s ojourn i n t he belly of a whale.

Such b ooks a s t he P salms a nd t he S ong o f Songs—a l ove poem—inspire re aders w ith t he beauties of lyric verse as well as with their contents. Poetry of this sort, of course, is also scattered t hrough o ther b ooks, a s w e s ee i n suc h examples as David's lament (2 Sam. 1:17 and 19– 37), Deborah's song (Judges 5)—a very early war poem d ating f rom abo ut 1 200 b .c.e. —and t he duet of Moses and Miriam (Ex. 15:1–21).

From a literary p erspective, t he s tory of J ob may well strike some as high drama. It contains a *psychomachia*—a s truggle of t he forc es of go od and evil for the soul of a human being. It could be considered a t ragicomedy, s ince G od a llows Satan to inflict terrible su fferings on J ob b efore Job's s teadfastness d efeats e vil's b est e fforts t o snare h im. Since literary genre sometimes resides in the eye of the b eholder r ather than e ssentially in a text, o ne m ight a lso g roup J ob a nd P roverbs together either as didact ic poet ry or as fables.

Elements of d ocumentable h istory a s well a s mythical h istory a re obs ervable i n t he P entateuch. There was, for instance, a h istoric J oseph who rose to h igh administrative r ank i n E gypt; the site of his tomb has been identified. Nonetheless, o ver v ery lo ng s tretches o f p reliterate o r early literate times, there is a tendency for mythical a nd f actual h istory to b ecome i ntertwined. While s uch g enealogies a s t hose i n p reliterate Polynesia have proved to be accurate for remarkably long per iods of time—sometimes spa nning several centuries—there i s s till a ten dency f or groups o f originally s eparate stories, per haps reporting actual happenings, to c oalesce a round heroic figures and take on mythical dimensions.

Such s eems to be t he c ase w ith J oshua and Judges, books that trace the history of Israel from

Moses' death to just before the establishment of a Hebrew m onarchy. I n Jo shua, w e r ead o f t he efforts of t he He brews to conquer P alestine, to occupy the land on a basis equitable to the needs of each of the 12 tribes of Israel. Included in this material we find the fall of Jericho, p erhaps the world's oldest city. This may well be largely actual h istory. We also find t he s un a nd t he m oon standing still, however, and the defeat of a race of giants. History and myth both seem represented.

Judges contains a wealth of pop uhr narrative too r ich to t reat i n de tail. Two p remier s tories, nonetheless, stand out from a mong the rest: the story of Samson and Delilah and that of Jephthah and his daughter. While in both stories the personages may well have been real, much that seems legendary has also coalesced around them. Delilah is an archetypal seductress. Samson's strength resides in his hair. He becomes weak when it is cut and regains his power as it grows back. While many a m odern p olitician ma y t ry to em ulate Sampson's feat of slaying armies with the jawbone of an ass, neither in Samson's day nor in ours has the expedient seemed destined for success. As in the story of Noah (Gen. 6:5-8:22), much of the mythical material in Samson finds a nalogues in The Gil gamesh Epic of ancient Sumer-an epic dating from about 2300 b.c.e. in the earliest form we have it.

A similar situation presents itself in the story of Jephthah and his daughter. From the stock situations of myth, that story contains an account of a ba nished hero's rise to power. It a lso records the hero's vow to sacrifice a first- born child to appease an angry God. (Compare with Euripides' *Iphigenia in Auli s.*) Other elements of stories conforming to this pattern appear in the account of Jepthah: the pre paration for the sacrifice, the complaint of Jephthah's daughter at her sacrificial death as a virgin, and the lamentation of the women of Israel about the death.

From a literary perspective, the Book of Ruth is among the crown jewels of biblical narrative. The s tory's u nity add s f orce to i ts e ffect. The characterization of Ruth is convincing and conveys h er d evotion a nd loy alty t o Na omi. Na omi's kindness and nobility of temperament and the depiction of t he k indness of B oaz to b oth women—all these are elements that contribute to an inspirational story concerning the capacity of the human character for true dignity.

When a reader of the Hebrew Bible as literature arri ves a tt he b ooks o fS amuel, K ings, Chronicles, Ezra, and Nehemiah, the reader has at last reached the more solid ground of mostly verifiable history. Yet the writers and the editors who recorded these histories must still be forgiven if they added a detail here and there to heighten the interest and consequence of the facts they reported.

Both Samuel and Kings were originally single books, but each was divided in the Sept uagint Ol d Test a ment v ersion of the Bible. Samuel follows the prophet Samuel's role in the selection of the king of Israel. Its two books begin with Samuel's birth and follow the history of and legends about Saul and David through the end of David's public career. Seemingly historic episodes appear in the accounts of David and Goliath, David and Jonathan, and David's military suc cesses. Saul's encounters with a n e vil spirit a nd the Witch of Endor may be less factual.

The books of Kings continue Hebrew history, first recounting David's na ming Solomon as h is successor, t hen de tailing S olomon's r eign a nd career. Short stories that s eem grounded in fact include t hose c oncerning S olomon's w ise j udgments, t he c onstruction of t he T emple at J erusalem, t he Qu een o f Sheba 's s tate v isit, a nd Solomon's apostasy as he reveres gods other than the Hebrew Yaweh. Kings also recounts the division of Israel into the southern kingdom of Judah, ruled by David's heirs, and the northern kingdom of I srael. The o ccurrences r ecounted i n K ings bring Hebrew history down to the year 562 b.c.e.

The n ext f our b ooks o f t he H ebrew Bible , 1 and 2 C hronicles, E zra, a nd N ehemiah, r etrace world a nd He brew h istory f rom Ad am t hrough the p rophet N ehemiah's s econd v isit to J erusalem, an event that occurred in 432 b.c.e. While a good deal of duplication appears, the authors and editors of these four books have also interpolated materials f rom s ources d ifferent f rom t hose o f the earlier books. They have also shifted the geographic and political focus to Judah in the southern part of Palestine.

The B ook of E sther has long p erplexed a nd sometimes even offended biblical scholars. Such early Christians as Melito, a second-century c. e. bishop of S ardis, e xcluded it f rom t he He brew Bible canon. St. At hanasius and other fathers of the Eastern Church excluded Esther as late as the fourth century. At the end of that century, however, at the Council of Carthage in 397, Esther was finally admitted among the canonical Scriptures of the Western church. Martin Luther wished the council had not done so, for he found in Esther's pages "many he athenish i mproprieties." A mong them, presumably, were the divorce between the Persian k ing A hasuerus, who d rank too m uch, and his wife Vashti for her d isobedience to t he king's o rders. Luther may a lso have found t he elevation of t he Hebrew E sther i nto t he idolworshipping Persian royal family objectionable.

As a short story, however, with its intrigues of state; its planned de struction of the Jews in the Persian k ingdom; E sther's intercession in t heir favor; the execution of the king's minister, Haman, who had proposed the Jew's destruction; and the joy of t he H ebrew p eople at t heir r eprieve, t he story is gripping. It a lso e xplains the origins of the Hebrew feast of Purim.

The d rama o f J ob f ollows E sther, a nd t hen come the Psalms—the loveliest extended collection o f d evotional p oetry i n t he H ebrew Bi ble. That collection carries over into Proverbs. There, however, t he e mphasis s hifts f rom de votion to instruction. B elonging t o the l iterary genre of didact ic poet ry or gnomic poet ry and prose, Proverbs instructs people in the right conduct of their daily lives.

Ecclesiastes presents the reader with an unorthodox and speculative essay on the meaning of life. The first verse of the book ascribes the authorship to Solomon, the wise king of Israel, but that assignment is altogether unlikely. The book begins in a reflective mood. All of human life is vanity. Therefore, finding as much pleasure as possible in life is the only sensible course to follow. The central message of the third through the sixth chapters advises t he r eader that G od has e stablished a fixed schedule for t he s equence of e vents i n p eople's lives: "For everything there is a season." G od has moreover, pre ordained w hat i s goi ng t o h appen, so that dwelling on apparent injustice in the world is a n ex ercise i n f utility. The to ne i n t he si xth chapter becomes cynical and foreboding.

A selection of wise proverbs opens chapter 7. The p reacher adv ises r eaders t hat w isdom d ictates moderation in all things. In contrast to the determinism of the sixth chapter, the eighth and ninth c hapters s eem to su ggest t hat e verything comes t o pass as a result of chance happenings and that trying to exercise wisdom is fruitless in such a world. A series of proverbs follows in chapters 9 and 10.

Chapter 11 and the first se veral verses of 12 admonish the reader that one must work what ever the outcomes may be. The youthful reader should also seize the day and make the most of whatever opportunities present themselves. Chapter 12 ends with a statement approving what the preacher has said. It also contains a warning that "the use of books is endless, and much study is wearisome." Ecclesiastes' final adv ice i s to f ear G od a nd to keep God's commandments; there will, the book warns, be an accounting.

The lovely Song of Songs—a verse duet between a b ride a nd a b ridegroom t hat i s o ccasionally punctuated by a chorus of their companions—was frequently r ead in J ewish c ircles a s a d ialogue between J ehovah a s b ridegroom a nd Is rael a s bride. C hristian interpreters have si milarly s een the book as an allegorical dialogue between Christ as bridegroom and his church as bride. Humanist readers s atisfy t hemselves w ith a m ore l iteral interpretation.

The g enre o f p rophecy i s g enerously r epresented i n t he H ebrew B ible. Re aders find it i n Amos, Daniel, Ezekiel, Habakkuk, Haggai, Hosea, Isaiah (which seems to conflate as many as three prophets of d ifferent per iods), J eremiah, J oel, Malachi, Micah, Nahum, Obadiah, and Zechariah (which may conflate t wo prophets). Probably the most confusing books of the Hebrew Bible, many of the prophetic books are firmly grounded in local history, and their writers a ssume that readers will share a writer's familiarity with that history. Suffice it to say that A mos, Hosea, and Isaiah seem to have lived in the eighth century b.c.e. The original texts of A mos, who was a shepherd of Tekoa, are extant and date to about 750 b.c.e. H e prophesies the fall of Israel and Judah a nd the restoration of Israel. Hosea concurs in the general dreariness of Amos's message, attributing I srael's troubles to i ts infidelity to Jehovah. None theless, A mos sees J ehovah as a god of forgiveness, and he foresees Israel's eventual restoration.

Isaiah enjoys a reputation as the greatest of the prophets. At the same time, it is clear that all the works assembled under his name do not belong to him and that their composition spans a period of about 500 years. It is possible, however, to separate out much that is confidently attributable to Isaiah. He was an intellectual living in the city of Jerusalem under the reigns of the Hebrew kings Jotham, Ahaz, an d H ezekiah. H e en visioned J ehovah a s characterized p rincipally by hol iness, a nd he wrote that the role of Israel was to fulfill G od's holy purposes in the world. Isaiah's writing is by far the most polished among the prophets.

The p rophets of t he s eventh c entury b.c.e. include Ze phaniah, N ahum, H abakkuk, a nd Jeremiah. Their writings concern events beginning in 626 b.c.e. and ending with the destruction of Jerusalem. Zephaniah contains a collection of brief or acles predicting the coming destruction of Judah and Jerusalem. The prophet then encourages the Ammonites, Assyrians, Ethiopians, Moabites, and Philistines to repent of their evil ways and avoid the coming destruction. On the o ther ha nd, Z ephaniah en courages t he faithful in Jerusalem to rejoice.

Nahum concerns itself exclusively and vividly with the impending fall of the Babylonian city of Nineveh. H abbakuk s plits into t wo p arts. F irst comes a series of oracles cast in the form of a dialogue b etween Ha bbakuk a nd J ehovah. These oracles fore cast t he e ventual j ustification o f Judah and the chastisement of its enemy. The second p art a sserts the teaching that the righteous will keep the faith. That part ends with a lyric of rejoicing.

The most notable and at the same time the most complex of the prophets of the seventh century b.c.e. is Jeremiah. Scholars believe that his secretary, Baruch, probably wrote the work that bears his name, which first details Jeremiah's call to become a prophet, then records his early prophetic ut terances. Such material continues with the addition of his assertion that a d rought is a mark of Jehovah's anger. He continues by making predictions concerning fore ign n ations a nd with the restoration of Israel. Jeremiah's personal history interrupts that discussion, which is thereafter resumed. Following a series of prophecies concerning foreign nations, a faithfully historical a ccount de scribes t he c apture o f J erusalem and the enslavement of i tsp opulation by the Babylonians.

The prophetic books of the sixth century b.c.e. include E zekiel, p ortions of Isaiah discussed above, Haggai, Micah, and a part of Zechariah.

Ezekiel opens by revisiting the issue of the sin of Judah and the coming fall of Jerusalem. Several chapters follow that inveigh against foreign nations, and several more predict the restoration of the Jews after the Babylonian captivity. A final section deals with the establishment and organiza ton of the state after that restoration. Ezekiel employs a broad spectrum of techniques in presenting this material: allegory, colorful i mages, impassioned s peech, pa rable, a nd r eports o f visions.

Daniel i s a b ifurcated book. F rom a literary perspective, part of it contains a series of short narratives. Da niel v isits K ings N ebuchadnezzar and Belshazzar of Babylon and Darius of Persia. Then w e en counter Da niel with o ther Israelite wise m en: Shadrach, M eschach, and A bednego. Daniel i nterprets d reams, and he a nd h is companions refuse to worship a golden idol. Here too we find the story of the magic prophecy written on B elshazzar's wall, that of Daniel in the lion's den, a nd w e he ar K ing Da rius p raise D aniel's God. The other part of Daniel contains a series of apocalyptic visions.

Haggai app eals to t he people of Israel, released from the Babylonian captivity, to rebuild the temple at Jerusalem. A portion of his prophecy describes the wonderful features of the new building, and a part ad monishes the people against the taint they will suffer until they undertake the work.

Micah first den ounces the sins of Judah and Samaria. Then, following a series of prophecies, the book envisions a coming er a of universal peace and the eventual victory and universal rule of Z ion. P robably the most compelling a nd thought-provoking feature of Micah is its definition of what the God of Israel requires of his worshippers: "Only to act justly, to love loyalty, to walk wisely before your God."

The first part of the Book of Zechariah contains the prophet's own report of his visions. One of t hese i magines t he L ord Go d J ehovah i n a copse of myrtle trees, getting news from a round the world. In another vision, the prophet observes four me tal horns being de stroyed by four blacksmiths. In still another, a surveyor traces out the footprint of a city. Zechariah also envisions the high priest of Israel as the defendant in an action brought against him by Satan as chief prosecutor before the high court of Jehovah, who acquits the high p riest. Ot her le ss s traightforward v isions also a ppear: The r eader finds one v ision of a golden lamp stand or another of winged women flying off with a large container holding inside it the son of Judah, metamorphosed into a woman. The s econd pa rt o f Z echariah w as c omposed some time later by a different hand and contains prophecies about protecting the temple and reconciling Israel with God.

Malachi c ondemns i nsincere w orship a nd divorce, encourages payment of tithes and offerings, and p redicts that the faithful will prosper. Joel, too, calls the people to repentance, envisions the final judgment in the Valley of Jehosaphat, and predicts t he p ermanent e stablishment of J udah and Jerusalem.

Perhaps b elonging to t he fifth c entury b.c.e., Obadiah p redicts Isr ael's destruction of E dom

294 Hecale

when J ehovah makes h is final j udgment. The book principally contains a group of oracles and thus belongs to the prophetic genre.

Hecale Callimachus (third century B.C.E.) Callimachus, who preferred penning the shorter g enres of poetry, may have u ndertaken the composition of *Hecale* to prove to his critics that he could write an epic poem. In its original form, *Hecale* was probably around 1,000 lines long. Its fragmentary remains comprise 326 lines.

We k now t hat Callimachus d rew h is plot for the poem from a chronicle of the h istory of the Greek region of Attica that had also served Pl uta r ch as a source for his *Life of Theseus*. As usual, however, Callimachus adapted his material to his own e nds. A su rviving su mmary of t he plot a s Callimachus handled it appears in an ancient *diegesis*, or digest of the story.

Fulfilling h is de stiny to b ecome t he k ing of Athens, Theseus travels to that city from Troezen. On h is a rrival, M edea, w ho had s ought r efuge with Theseus's father Aegeus, attempts to poison Theseus. His fa ther, w ho a t first d id n ot k now him, recognizes his son belatedly but in time to save him from Medea's plot. Thereafter, Theseus learns that a w ild and ferocious bull is terrorizing the inhabitants of the region a round Marathon. Theseus wishes to resolve the problem.

Aegeus, h owever, h as b ecome overzealous about h is s on's s afety, s o Theseus h as to sn eak away. He s eeks refuge from a sudden do wnpour in the hut of a n old woman na med Hecale. She courteously entertains him, and at dawn he continues on h is way to Ma rathon, lo cates the bull, and overcomes it. That done, he returns to Hecale's, only to find that she had died while he w as gone. Grief-stricken, Theseus honors his hostess's memory by e stablishing a sub urb on t he s urrounding l and a nd f ounding t here a s anctuary named Zeus Hecaleios in honor both of his patron deity and his hostess.

Apparently Callimachus de enphasized Theseus's heroism and emphasized the interactions between Theseus and Hecale while he was her guest. This was in keeping with the conventions of A lexandrian p oets, who liked to h umanize the great mythical heroes of the past by setting them in ordinary circumstances and handling their folksy interactions with humor and realism. L ater poet s, i ncluding Ov id a nd Virgil, imitated t he way C allimachus ha ndled t he story.

Hecuba Euripides (ca. 425 B.C.E.)

Famed for his portrayals of remarkable women in such plays as *Medea*, *Ele ctr a*, and *Iphigenia in Aul is*, Eu r ipides t wice p ortrayed H ecuba, t he deposed queen of a def eated Troy. She p rovided the playwright with his protagonist b oth in *The Trojan Women* and in *Hecuba*. *Hecuba* has a double plot. It focuses first on the anger, gr ief, and fru stration H ecuba feels when the vi ctorious G reeks decide to s acrifice h er daughter Polyxena at the tomb of their fallen hero Achilles. The s econd plot c oncerns the r evenge that Hecuba takes for the treacherous murder of her son Polydorus. Hecuba's husband, Priam the king of T roy, h ad s ent P olydorus, t he c ouple's youngest son into the protection of the Thracian king, Polynester. With the lad Priam also sent an enormous t reasure. W hen t he Gr eeks def eated Troy, P olynester had P olydorus k illed to ga in control of that treasure.

As the play opens, however, Hecuba is as yet unaware of the fact of her s on's de ath. R ather, Polydorus's ghost, hovering above the stage, opens the play with a prologue that acquaints the audience with the background to the play and with the fact that Polynester had not buried his body as Greek custom required. Instead, the murderer had the corpse thrown in the sea, where it is about to wash up on the shores of Troy.

While the Greeks consider sacrificing Polyxena, Hecuba enters, chanting prayers for the preservation of her d aughter's life. A s she do es so, a ch or us o f T rojan w omen en ters si nging. Their song acquaints Hecuba with the Greeks' decision to sacrifice Polyxena at Achilles' tomb as a mark of the soldiers' gratitude for his heroism. Despairing, H ecuba t ells P olyxena t he a rmy's decision, and the girl quakes with fright.

The Gr eek g eneral O dysseus en ters b earing the sentence. Hecuba reminds him that he o wes her his life. During the Trojan War, when he had visited Helen in disguise, Helen told Hecuba, and she kept his presence to herself. Odysseus agrees that he owes Hecuba her own life, but not Polyxena's. He advises the old queen to make the best of a bad situation.

Polyxena, however, joins the ranks of Euripides' extraordinary women by explaining that she would rather die than live as a slave—the fate of the other surviving Trojan women. Hecuba proposes that she die in her d aughter's place. When Odysseus refuses, she asks to die with her c hild. That option is also denied her, and she e xclaims miserably: "Not one of my 50 children left." Polyxena is led away to the slaughter. (One other child, Cassandra, still lives in fact, but she has become the p ersonal s lave a nd u nwilling c oncubine o f Agamemnon.)

The chorus of captive Trojan women joins the general g rieving by b ewailing t heir o wn f ates and wondering where, in their slavery to the victorious Greeks, their destinies will lead them. As the c horal k eening e nds, t he G reek m essenger Talthybius enters and asks for Hecuba. The leader of the c horus p oints to her. She i s lying on t he ground w eeping, an d T althybius i s s hocked a t her c ondition. He tells t he que en t hat she m ust come with him to bury Polyxena's corpse. Hecuba asks him to describe the manner of her daughter's death.

Talthybius's a nswering s peech achieves one of the great moments in the monologues of Grecian theater. He describes the way that Polyxena, led to Achilles' tomb and immobilized by the hands of he r c aptors, demanded to be set free so she could voluntarily expose her throat and breast to the sacrificial blade. Her bravery as she suffered the f atal s troke s o i mpressed t he Gr eek t roops that, even as Talthybius speaks, they are building a funeral pyre in Polyxena's honor.

Grieving, Hecuba reflects on her former glory and her present misery, concluding that the happiest person is the one who encounters no sorrow as he goes about his daily tasks. She then retires into a tent. Marking the passage from the first to the second part of the play, the chorus chants of the evils that have b efallen Troy b ecause of the Trojan prince Paris's illicit passion for Helen, the wife of King M enelaus of Sparta and a fterward Helen of Troy.

Now a group enters bearing the body of Polydorus. Hecuba learns by sorcery that the Thracian king, P olynester, ha s m urdered h im. A lthough she is now only a s lave of the victorious Greeks, she pleads with A gamemnon to b ecome her a lly as s he s eeks v engeance a gainst P olynester, w ho has offended the gods by ignoring the laws of hospitality a nd k illing h er s on f rom a m otive o f greed.

296 Hedupatheia

Sympathetic, A gamemnon e xplains t hat a ny assistance he provides must be secret. The Greek army perceives Polynester as an ally and would, Agamemnon f ears, sla ughter t heir o wn g eneral should they learn that Agamemnon assisted Hecuba against Polynester. In the meantime, the burial of Polyxena's body is delayed so that she and her brother may be cremated and their a shes buried together.

Agamemnon summons Polynester to Troy. He comes, bringing his children with him. Claiming that s he has m ore g old f or P olydorus t hat she wishes to entrust to Polynester's keeping, Hecuba entices her enemy and his children into a tent full of Trojan women. Pretending to admire the children, the women separate them from their father and kill them. After Polynester has seen h is offspring dead, the women turn on him with the pins of their brooches, and they blind him.

Polynester d emands r edress fr om A gamemnon and pleads his cause. Hecuba, however, convinces Agamemnon that Polynester is as false a friend to the Greeks as he was to the royal house of t he T rojans. She p oints o ut t hat he d id n ot bring them the gold that was their due as the victors' sp oils. C onvinced b y H ecuba's a rguments, Agamemnon condemns Polynester to death.

Hopeless, Polynester becomes inspired by the prophecies of the Thracian god Dionysus. Polynester tells Hecuba that she will die on the voyage to Greece, throwing herself into the sea from the masthead after having first been transformed into a dog with bloodshot eyes. He also predicts the death of Hecuba's only still-lving child, Cassandra, along with Agamemnon at the hands of Agamemnon's wife Clytemnestra.

Agamemnon sentences the blind Polynester to a slow death by stranding him on a desert island where ex posure to t he elem ents, h unger, a nd thirst will e xtend h is su ffering. The pl ay en ds with th e c horus o f T rojan wome n onc e more anticipating their future lives as slaves.

Hedupatheia (*Hedupathia*) Archestratus (ca. mid-fourth century B.C.E.)

Though clearly not the Western world's original writer on the subjects of cuisine and nourishment, Archestratus (fl. fourth century b.c. e.) did pen a work on that subject. A significant portion of it survives (about 330 of perhaps 1,200 dactylic hexameter lines), largely owing to the interest of Callimachus when that more famous poet was a librarian and copyist at the library of Alexandria. The works of h is predecessors a re a lmost totally lost except for a line here and there and an occasional reference.

A na tive o f Gr eek Si cily, A rchestratus w as likely b orn a t Gela—hence t he o ther na me b y which h e is k nown, A rchestratos o f Gela—but perhaps moved to Syracuse when the Carthaginians occupied h is birthplace. He traveled widely through the Greek Mediterranean world during the H el l enisti c A ge, co llecting i nformation about food and its preparation and consumption, and a bout d ining c ustoms. H e p ublished t he results of those investigations in his lengthy poem *Hedupatheia* (Well- being). The w ork i s a lso known as "Life of Pleasure," "Gastrology," "Art of Cookery," "Inquiry into the Belly," a nd other more a nd le ss s atirical ti tles s upplied b y l ater readers.

It seems, however, that although Archestratus sometimes t reated h is subject lightheartedly, he found it genuinely interesting and thought others would a lso find it s o. C asting his p oem as a n epistle to his friend Moschus, Archestratus gives instructions for pleasant dining. He recommends a company limited to four or five persons. He discusses g rains a nd t heir s ources a nd ma nner o f preparation i nto v arious b reads a nd c akes a nd suggests that Lydians and Phonicians are the best bread makers.

Archestratus lavishes a good deal of attention on seafoods and where to obtain the best examples. He recommends Ainos for mussels, Abydos for oysters, and Mitylene on Lesbos for scallops. He discusses the advantages of eels. Fish in general seem a mong h is favorite foods. He e specially recommends a s ort of m ixed s eafood d ish fried up with "fragrant green herbs and olive oil." The underbelly portions of the thresher shark sp rinkled with cumin, roasted with a pinch of salt and greyish olive oil, then served with a dipping sauce earns the author's approbation. He also approves lobsters acquired in the Lipari islands or near the Hellespont.

Most of t he s urviving p ortions of t he poem have to d o with seafood, including among many other species red mullet and cuttlefish. When he does turn his attention to meat and fowl, Archestratus mentions such delicacies as a sausage or a "stewed s ow's w omb" do ne i n c umin, v inegar, and silphium, together with whatever birds happen t o be i n season. E lsewhere, h e a pproves " a grain- £d gosling."

Helen Euripides (412 B.C.E.)

In this tragedy with a happy ending, Euripides borrows a version of the story of Helen of Troy that H erodot us r ecounts in his Hi stories (2.112–20), where H erodot us r escues H elen's reputation.

By way of background, in the world's a rchetypal beauty contest, the Trojan Prince Paris (also known a s A lexandros) h ad c hosen A phrodite, goddess of love, as the most beautiful among the female immortals. He had selected Aphrodite over Hera, goddess of power, and over Athena, goddess of w isdom. H is d ecision was to a de gree i nfluenced by the bribe the goddess had offered—the love of t he world's m ost b eautiful w oman. (The other go ddesses h ad r espectively offered po wer and wisdom, but Paris was young and tired of his girlfriend, the nymph Oenone.) The difficulty with this a rrangement, h owever, a rose f rom t he f act that H elen, th e w orld's most b eautiful wom an, was, p redictably, a lready married. She w as the queen of Sparta, wife of its king, Menelaus.

In t he v ersion of t he s tory tol d b y H omer, Aphrodite fulfilled her promise, and Helen fell in love with Paris, willingly ac companying him to Troy. I n H erodotus's v ersion, ho wever, t he voy age from Sparta to Troy, though still made willingly, was interrupted with a stop in Egypt. There King P roteus d iscovered t hat P aris had robb ed Menelaus of his wife and his fortune, and Proteus confiscated both. For d ramatic effect, E uripides further embroiders the tale by inventing a phantom H elen, f urnished by Hera—a s ore lo ser i n the contest. Zeus snatches his blameless daughter, the real Helen, into the sky from Sparta, hides her in the clouds, and eventually sets her down at Proteus's palace in Egypt. The phantom, meanwhile, accompanies Paris to Troy. It is the phantom for whom the Greeks fight the war and the phantom w hom Me nelaus e ventually re covers. For the 10 years of the war, the real Helen remains in Egypt, fending off the advances of the Egyptian successor of Proteus, his son Theoclymenus.

Euripides' play opens with a long monologue in which H elen r ecounts Euripides' v ersion of events. She laments the bad r eputation she su ffers in the world and explains that the god Hermes has predicted that, so long as she remains chaste, she will one day be restored to Sparta. Now, however, Theoclymenus is pressing her to marry him, and H elen, t o p reserve h er v irtue, ha s t hrown herself a s a su ppliant u pon t he to mb o f her deceased protector, Proteus.

The Gr eek w arrior T eucer, b rother of A jax, enters and thinks he sees the Helen he had b een acquainted w ith in Troy. The r eal H elen le arns from Teucer about the outcome of the Trojan War and about the suicide of her mother, Leda, shamed to de ath by H elen's b ehavior at Troy. Helen a lso learns of t he d eification of h er b rothers, C astor and Pollux, as the so-called Dioscuri; they have

298 Helen

been stellified as the constellation Gemini. That is one version of their s tory. The other is that they, too, committed suicide for the same reason as their mother. Helen warns Teucer that Theoclymenus is killing all Greek males rather than run the risk of H elen's rescue. A dditionally, Teucer reports the storm that separated the ships of the Greek fleet on their return from Troy and says that her husband, Menelaus, is missing and presumed dead. He exits and she grieves.

A ch or us o f Gr eek w omen, s laves to t he Egyptians, enters, and they and Helen commiserate about the leng thening roll of misfortunes. Helen is principally concerned about her u ndeservedly scandalous reputation. She decides that since Menelaus is lost, she will die, but the chorus reminds her t hat reports a re often u ntrue. They advise her to consult Theoclymenus's sister, the p rophetess Theonoe. H elen ag rees, a nd a ll exit.

Menelaus, c lad i n s ailcloth, n ow enters. H e complains that he has been at sea ever since he left Troy a nd t hat every time he nears Sp arta, the winds drive him back out to open water. Now he is among the several survivors of a shipwreck on the Egyptian shore. He c omes to t he palace and learns that its owner kills Greeks and that Helen is within and has been there since before the war. Menelaus is surprised, as he had left the phantom Helen in a cave on the seashore.

In the meantime, Helen has learned from Theonoe t hat Me nelaus l ives a nd w ill e ventually reach home. H elen s ees M enelaus b ut do es n ot immediately recognize him. Soon, however, they discover e ach ot her's i dentity, b ut, k nowing o f the Helen in the cave, Menelaus is confused and finally s eems r eady to r eject h is r eal w ife. J ust then, a servant comes to Menelaus to report that the phantom Helen has flown up into the sky. As she rose, she c onfessed t hat t he r eal H elen i s blameless. The reunited husband and wife embrace. Then f ollows d iscussion w ith o ther c haracters that essentially repeats the details of the story as Euripides w ished t he m embers h is a udience to remember it so it would displace Homer's version in their minds.

Menelaus t hen br iefly r ecounts f or H elen h is adventures u pon r eaching Egypt, beg inning hi s recitation with the formula "Why should I recount," and then recounting. After this, the reunited couple c onfronts t he proble m that o ccupies the b alance of Euripides' play: Theoclymenus is not about to let Helen go. The couple might be able to t rick the king if only his sister, Theonoe, were not effectively o mniscient. H elen de cides to t ry to en list Theonoe as an ally. Convinced that it is their only recourse, Helen and Menelaus swear to risk it and to commit suicide together if they fail.

Theonoe enters, and the two suppliants state their c ase, b egging t hat she w ill n ot a ssist her brother i n a n u njust and un holy c ourse. Their arguments prevail, and Theonoe resolves to keep their secret and n ot to a ssist her b rother i n h is misguided course of action. That problem out of the way, the couple now has to de vise an escape plan. Menelaus's ship has been destroyed. Though Menelaus h as pu rpose, strength, a nd r esolve, Helen thinks better than he does. She devises the plan.

Menelaus will become a messenger reporting the death of M enelaus. H elen will tell Theoclymenus that she will marry him as soon as she has performed the funeral rites for her h usband. To do that, she will need a ship and treasures to offer as propitiation to her husband's spirit. The chorus restates the central problems of the play in a song that reveals their antiwar sentiment.

Theoclymenus now enters to pay h is respects at h is f ather's to mb a nd to s ee i f H elen i s s till seeking sa nctuary t here. F inding her g one, he first imagines that she has fled. He has also heard of a G reek sk ulking about. The k ing r esolves to kill h im i f h e can ca tch hi m. J ust t hen, H elen enters clad i n bl ack, weeping a nd having cut off her hair. Pointing to M enelaus as the messenger, she tells Theoclymenus the story they have concocted a nd, wh en he i s d ubious, d irects h im to ask hi s si ster. F inally, H elen a grees to ma rry Theoclymenus. First, though, she must follow the Grecian funeral customs for those dead at sea.

Menelaus, pre tending t o be t he m essenger, explains the customs, at the same time provision-

ing him self at Theoclymenus's expense for a s ea voyage a nd a p otential battle. A s eries of t reasures, b edding, armor, live animals for sacrifice, and foodstuffs must be rowed out to the horizon and dumped overboard for the use of the deceased in the underworld. Only the next of kin can perform these rites, so Helen must go along.

As t he p rincipal c haracters p repare f or t he mock f uneral, t he c horus performs a beautiful song in honor of Cybele (Rhea) the goddess of the harvest and the earth's fecundity, recounting her grief at the loss of her daughter, Persephone.

Helen, Menelaus, and Theoclymenus return to the stage. Menelaus is in full armor and ready for battle. Theoclymenus gives the ostensible mourners a ship and instructs his sailors to obey Menelaus's orders. He makes one attempt to keep Helen ashore, but relents when she promises not to throw herself o verboard in her g rief for her first h usband. The f uneral pa rty de parts, a nd Theoclymenus begins wedding preparations.

After another lovely choral interlude, however, a messenger enters to tell Theoclymenus that Helen h as left the country. A s Theoclymenus's men were re adying t heir sh ip f or t he v oyage, Menelaus's surviving crew appeared, and Menelaus t ook t hem aboard as passengers. Though suspicious, t he E gyptian c rew f elt b ound b y Theoclymenus's orders.

Once at sea, the messenger reports, Menelaus sacrificed a bull, praying not for the dead but for a safe passage to Spa rta. His men and the Egyptian crew then fought a pitched battle on the ship's deck, and the Egyptians who were not killed leaped overboard and swam for shore. The ship sailed off with a fair wind for Greece.

Stymied in his desire for Helen, Theoclymenus declares h is i ntention to ob tain v engeance b y killing his sister. As he goes to do so, he is stopped by a servant, who explains that the king's position only g ives h im t he r ight to c ommand i n matters of piety, not matters of wrong. Theoclymenus is on the point of killing the servant when Helen's deified twin brothers, Castor and Pollux, appear a s go ds f rom a machine. They ex plain that what has happened was fated to happen and that Theoclymenus should just let it go. Realizing that further resistance to the operation of fate is pointless, Theoclymenus graciously accedes to the demands of the Dioscuri. The chorus closes the play with a lesson that Euripides frequently sought to teach: Expect the unexpected from the gods.

Following the lead of Thucydides, Xenophon of Athens picks up the history of the Peloponnesian Wars where his pre deæs or historian left off—411 b.c.e.

In seven books, Xenophon chronicles the government of Athens by a council of 30 aristocrats, their overthrow as a result of Spartan intervention, and t he r esultant r estoration of A thenian democracy in 403 b.c.e. He then recounts the history of Sparta's war a gainst P ersia and t he P ersians' victory in 387 b.c.e. Xe nophon next flashes back to r ecount t he war t hat a le ague of G reek states, led by Corinth, fought against Sparta in an effort t o re in in S parta's growing p ower on the Grecian p eninsula. That s egment of X enophon's story ends with the treaty of peace that the Spartan envoy A ntacidas negotiated with the Persian king Artaxerxes II—a treaty the Persians imposed on the warring Greeks, also in 387 b.c.e.

Xenophon t hen t urns h is a ttention to t he growing influence of the city of Thebes and the

developing r ivalry b etween Thebes a nd Spa rta. This enmity soon developed i nto open wa rfare. Thebes em erged a s t he v ictors a t t he B attle o f Leuctra, where they mortally wounded the Spartan King Cleombrotus.

Hellenistic Age (Alexandrine Age)

(ca. 300 B.C.E-600 C.E.)

In 331 b.c.e., Alexander the Great founded a city near t he w estern m outh o f t he N ile R iver i n Egypt. N amed for its founder, A lexandria s oon rose to b ecome one of the principal cultural and intellectual m etropolises of t he greater Gr ecian world. B efore Ro me out grew it, in fact, A lexandria was for a time the largest city on the planet.

On t he de ath o f A lexander, h is g eneral i n charge of Egypt, Soter the son of Lagos, became Pharaoh Ptolemy I of Egypt—a country over which he and h is descendents exercised virtually absolute control for 500 years. Under his rule and that of his son and grandson, Ptolemy II, called Philadelphus, a nd P tolemy III, A lexandria flourished intellectually, materially, and militarily.

Ptolemy I interested himself in matters of history as well as in the exercise of statecraft, and he himself penned a history of the campaigns of Alexander the Great. He also founded and Ptolemy I I e xpanded what was p robably t he ma jor intellectual center of the ancient world, the great library a t A lexandria. There t he ac cumulated learning of the preceding ages was deposited and catalogued by a succession of capable and devoted librarians that included Zenodotus (fl. ca. 285 b.c.e.), Eratosthenes (ca. 285-194 b.c.e.); and Aristarchus o f Samothrace, w ho headed t he library b etween c a. 1 80 a nd c a. 1 45 b .c.e., a nd who was an important editor, literary critic, and grammarian. The poet Callimachus also seems to have been employed in the library in some capacity, but probably not, as some have suggested, as chief librarian. Also sometimes mentioned as chief librarian is Callimachus's literary opponent, the epicist Apollonius of R hodes. A good deal of la ter Greek l iterature c ame f rom Eg ypt during the Hellenistic period.

The Greeks continued to r ule Egypt until 30 b.c.e., when the last P tolemy to r ule, C leopatra VII, took her own life after bearing Julius Caesar a child and subsequently becoming the mistress of the son- to-te defeated Mark Antony. Both the name and the lineage of Cleopatra are exclusively Greek. Although she was the last of the pharaohs and had been born and bred in Egypt, no drop of pre-Ptolemaic E gyptian ro yal blo od r an i n he r veins. He r t raceable ge netic he ritage w as t hus European and Near Eastern rather than African.

Greek culture flourished elsewhere during the Hellenistic Age a s w ell. A lexander's suc cesses had unified Greece and Macedonia, and the previously in & pendent dty-states of Greece slowly lost t heir i ndependence, b ecoming pa rt o f a broader national and international culture under the G recian dy nasty o f t he A ttalids, w ho, a s Roman a llies, e xpanded t heir p ower f rom t heir base i n A sia M inor to i nclude l ands to t he e ast and Macedonia on the Grecian peninsula itself.

After Alexander's death, the jewel in his crown, Asia (today's Middle East), came u ndert he dominion of a nother of A lexander's o fficers, Seleucus, who became the governor of conquered Babylonia on the death of A lexander. By m eans of adroit alliances and successful warfare, Seleucus I began the hellenization of much of the Asian continent. His heirs fought successfully with the Ptolemies over the control of Phoenicia and Palestine u ntil An tiochus III brought them firmly under his control in 200 b.c. e. Ten years later, the Romans d isplaced h im t here. Throughout A sia, however, t he Gr ecian S eleucids were suc cessful in spreading Greek culture for decades, largely by means of founding dozens of cities.

The c ultural a nd, pa rticularly, l iterary i nfluence of this period of hellenization of most of the ancient Mediterranean and Asian world outlasted the d efeat of the S eleucids by the l egions of Rome. The Roman conquest of the ancient world is one among many instances of a cultural inferior's overwhelming a cultural superior by force of arms. G reek l iterary c ulture, h appily, s urvived the shock of Roman arms and finally became the definitive literary foundation of the Roman intellectual edifice.

Under the conditions that prevailed after Alexander's c onquest had i mposed t he i ntellectual heritage of his homeland upon the known world, literary quality rarely rose to the high standard of pre-Alexandrian times. Nevertheless, literature still accomplished much. Education and literacy grew by leaps and bounds. Whereas Homer a nd Sappho had enjoyed virtually no readership and had relied on trained memories and performance to sp read t heir p oetic f ame, b ook (manuscript scroll) production became an increasingly lucrative e nterprise d uring t he H ellenistic p eriod. Libraries a nd t heaters flourished. P rofessional organizations grew up that included writers, all sorts of theatrical a rtists, and m usicians. The Attalid, Ptolemaic, a nd S eleucid r ulers ple ased their citizens with many celebrations and festivals that featured opportunities for literary competition an d f or a uthors like Me nander a nd Theocrit us to display their talents. Epic poetry enjoyed a resurgence as exemplified by the Argonaut ika of Apollonius of Rhodes. Such Philosophers a s t he m oralist E picurus, a nd t he Sto ic Zeno (see S toicism) a ttracted t heir disciples, taught them, and through them exercised a formative i nfluence o f t he i deas o f a fledgling Christianity.

In other intellectual spheres, the sciences and the repre sen to tonal arts also flourished during the Hellenistic Age. The astronomer Aristarchus of Samos (b. ca. 330 b.c. e.) developed the heliocentric view of the operation of the solar system, and the a natomists Herophilus and Erasistratus (fl. c a. f ourth-third c entury b.c. e.) r espectively discovered the nervous system and distinguished between the motor and the sensory nerves. Much outstanding s culpture a lso s urvives f rom t he period.

The a scendancy of the Roman Empire throughout much of the known world ended the politi al phase of the Hellenistic domination of the M editerranean shores and A sia. C ertainly, cultural influence was a two-way street, and the subject p eoples under P tolemies, S eleucids, and Attalids contributed much from their indigenous civilizations to the Hellenistic literary and intellectual climate. Nonetheless, outside the religious sphere, the intellectual ascendancy of Hellenistic Greek literary culture lasted until the fall of the Western Roman Empire.

Hephæstion of Alexandria (fl. ca. 150 c.E.) Greek prose writer

Hephæstion, about whom little else is known, was the author of a manual, *About Meter*, describing the basic varieties of quant itat ive ver se. Some subsequent commentators abridged Hephæstion's work from its original 48 books down, eventually, to one. Other commentators, however, preserved various parts of the manual. As a result, we know

a considerable a mount a bout t he s tructure a nd content of the original work.

Essentially, we learn that Hephæstion's a nalysis was relatively mechanical and simplistic and that he i gnored c omplex meters not within h is purview. H is work remains valuable, none theless, because it contains fragments of poems that would otherwise have been totally lost.

Heracles Euripides (ca. 420 B.C.E.)

Assigning a d ate to *Heracles* involves considerable guesswork. Some argue that Euri pides' positive view of Athens in this play points to a d ate around 420 b.c.e.—before the playwright lost his faith in Athenian democracy. Others feel that the chorus of e lders' d iscussion of old age in lines 637–700 o f t he pl ay su ggests t he pl aywright i s projecting h is own experience of adv ancing a ge into the work, and so it is a late one.

In any case, the play's hero, Heracles (Hercules), a dem igod f athered b y Z eus with h is pa ramour Al cmene a nd t he m ost c elebrated o f a ll Greek heroes, is away from the city of Thebes as the play opens. He is, as a matter of fact, in the underworld c apturing the free-headed guard dog of Hades, Cerberus. This is the last and most difficult of the 12 labors assigned him by Eurystheus, ruler of Argolis.

Heracles' m other's m ortal h usband, A mphitryon, begins the play with a prologue that seeks to unravel the genealogical, political, and mythological c omplexities of H eracles' sit uation. Having s ummarized the b ackground, A mphitryon reveals t hat i n H eracles' abse nce f rom Thebes, where h is f amily a waits h im, a s tranger, L ycus, has killed Creon, the king of Thebes and father of Megara, He racles' w ife. I t i s L ycus's i ntention, moreover, to settle a blood feud by destroying all the members of Heracles' family, which includes Megara, He racles' t hree s ons, a nd A mphitryon himself. F earing for t heir l ives, t he f amily ha s sought sanctuary at the altar of Zeus.

Megara ple ads w ith A mphitryon t o d evise some m eans f or t heir s afe e scape. Their be st hope, however, rests in Heracles' possible return from H ades. The ch or us en courages t hem i n their hope.

Lycus e nters a nd dema nds to k now how long the family will seek to prolong their lives under the protection offered by Zeus's altar. He explains that their d estruction is not hing personal—merely a matter of political policy s o t hat H eracles' ch ildren w ill n ot s eek to a venge t heir g randfather, Creon, by killing Lycus when they grow up.

Amphitryon an swers boldly. Lycus, stung by his words, o rders wood to be brought and set afire to bu rn the family a live a t Zeus's a ltar. Megara pleads with Amphitryon that they all face a m ore m erciful de ath tog ether. H e, ho wever, says h e m eans to sa ve H eracles' c hildren i f h e can. Megara, who a rgues that there will b e n o return f rom H ades for He racles, pleads to b e allowed to return to the palace and clothe herself and h er c hildren i n f uneral a ttire s o they ma y properly meet their deaths. Lycus agrees. Amphitryon p rays to Z eus, bl aming t he g od f or n ot intervening.

In a long choral interlude, the chorus sings of Heracles' success in accomplishing the first 11 of the seemingly impossible 12 labors assigned him. They then call the attention of the audience to the return of his family, whose members now all are shrouded for b urial. Gr ieving, M egara r ecounts the c areful a rrangements she a nd H eracles had made f or t he c hildren's future—the ma rriages they h ad a rranged and th e p rincipalities t hey would govern: Athens, Thebes, and Sparta.

Just as they have abandoned hope and are bidding farewell to their friends, they spy H eracles approaching. A rriving, he asks for a n e xplanation. Me gara re counts the whole s tory. H eracles prepares to take action against Lycus, but Amphitryon counsels caution owing to the tyrant's many allies.

Then the elder man asks for an account of Heracles' adventures in Hades. He learns that Heracles bested the hellhound Cerberus in a fair fight and brought h im to t he l and of t he l iving, a nd t hat Cerberus is kenneled in the city of Hermione. We also learn that Heracles has brought Theseus, king of Athens, back from Hades. Then, together with Heracles, the family reenters the palace.

Following a nother ch oral i nterlude t hat c elebrates He racles' t riumphs and h is r eturn, L ycus and h is r etinue en ter j ust a s A mphitryon r eappears. Lycus asks where the others are and scorns Amphitryon w hen he a nswers t hat t hey a re a t their household altars. With h is followers, Lycus enters the house, and Amphitryon follows. Knowing that the tyrant and his followers are doomed, the c horus c elebrates, and th e a udience he ars from within the anguished cries of the slain.

The chorus celebrates Lycus's fall, but in the midst of t heir r ejoicing, t wo sp ectral figures appear above the house. One is Iris, the rainbow and a messenger of the gods. The other, more frighteningly, is Madness, whom Iris introduces to the chorus and the audience. Iris reports that Hera, her jealousy aroused by Zeus's infidelity, has de termined t hat H eracles, w hose f ate had been suspended while he was engaged on his 12 tasks, must now be made to suffer. Iris reports that M adness will i nfect H eracles a nd ca use him t o d estroy t he v ery c hildren he ha s j ust been at s uch pa ins t o s ave. The gods dema nd this sacrifice lest human power grow at the gods' expense.

Madness, i ronically, i s more c ompassionate than her companion and seeks to d issuade I ris. Failing, she calls on Apollo to witness that she is obeying a gainst her w ill. That done, s he i nfects Heracles, w ho u nwittingly de stroys e verything he had set out to save as the chorus describes his deeds. A m essenger t hen en ters a nd i n g reat detail r eports w hat ha s transpired within th e house. He tells how Heracles imagined himself to be sla ying the s ons o f E urystheus, a nd ho w, despite the pleas of his own sons, he m ercilessly slew them and their mother.

The mad ness having r un its course, H eracles falls into slumber and is bound to a stone column. Amphitryon enters and r epeats the n ews of the events w ithin. F inally, H eracles a wakes i n h is right mind. A grieving Amphitryon explains what has happened. When the truth of his mad behavior dawns on Heracles, he resolves to kill himself.

Theseus now enters, and Heracles explains that throughout his life, the jealous goddess Hera has been h is enemy and that she is the cause of the current horror. Theseus tries to persuade Heracles to come to A thens and accept half of all Theseus owns. He racles, ho wever, r efuses a t first and grieves p iteously, finding h imself u nworthy to participate in the funeral rites of h is family. He assigns A mphitryon t hat task, b ut p romises to fulfill his filial duty by returning to bury Amphitryon. At last he accepts help from Theseus, and the play ends as Heracles is led a way w hile t he chorus of old men laments.

Herodotus (Herodotos) (ca. 480–ca. 425 B.C.E.) *Greek historian*

B.C.E.) Greek mistorium

The earliest historian (in the modern sense of that term) whose writings have survived largely intact, Herodotus was born at Halicarnassus in the province of Doria on the southwestern coast of A sia Minor. We k now h is f ather's name, L yxes, a nd that of h is uncle, Panyasis, a p oet who w rote a n epic about H eracles (Hercules). The city's r uler, Lygdamis, executed Panyasis.

Though trying to draw an itinerary of all his travels from the pages of his *The Hist or ies* is probably an exercise in futility, and though it remains unclear just when he undertook some of the journeys he did make, at the time of his exile or later, he certainly spent some time on the island of S amos. He also roamed Egypt, Athens, other parts of t he Gr eek w orld, and p erhaps s ome of Persia as well. He was acquainted with the Athenian sta tesman P ericles, and h e is r eported t o have given a public reading of a portion of his history at Athens in 446 b.c.e.—a reading for which he was very well paid.

Though Herodotus, like many of his contemporaries, r espected the r eligious c ustoms of h is country and also those of others, like many of his contemporaries her eceived with skep ticism the myths that some of his pre de cs sors t reated a s factual. At the same time, however, the priests of various cults, gods, and goddesses, in the places where Herodotus conducted h is research, ma intained many of the records that were open to his consultation. Thus, p ortions of his book have a decidedly religious cast.

Nonetheless, Herodotus was no religious propagandist, and he assiduously sought to discover truth an d to w eigh p robabilities c arefully. H e departed from the practice of most of his predecessor ep ic poet s a nd elegists—the s ources o f popular history—by co mposing i n p rose. The pre æn ta tion of his text seems to suggest that he was writing it to app eal b oth to p rivate r eaders and t o l isteners w ho m ight he ar h im r ead h is work aloud.

In his unprecedented work, Herodotus focuses principally on the c onfrontation b etween t he Grecian and A siatic worlds from about the time of the last king of Lydia, Croesus (ruled ca. 560– 546 b.c.e.) through the c onquests of L ydia a nd Egypt with accounts of the rise to power of the Persian k ing Darius. A fter r ecounting P ersia's incursions in to L ibya and S cythia, he t urns h is attention to t he s truggle b etween t he A siatic Greek w orld a nd P ersia's e xpansionary a mbitions. He traces that struggle through the famous battles of Marathon, Thermopylae, A rtemesium, and Salamis to the decisive battle at Platea, which forced the Persians to withdraw.

It is likely that H erodotus c omposed o ther works. He h imself me ntions one of them, h is "Assyrian L ogoi," and Ar istot le seems to have known the book.

The exact dates of Herodotus's death and the composition of the *Histories* remain a matter of scholarly debate. The historian of literature Oliver T aplin s peculates t hat t he work may ha ve been composed orally over a long period of time and later written down. Taplin also argues convincingly that Herodotus had been preceded by a group of e pic p oets wh o had c hosen h istory a s their s ubject a nd c omposed v erse na rratives o n subjects si milar to s ome of t hose of Herodotus. Herodotus himself alludes to o ne of them, Hecat æus (Hekataios) of Mile tu s, who wrote genealogies o f m ythical f amilies wi th th e s tories surrounding t hem. M ore to t he p oint, he a lso seems to have written the same sort of material with which Herodotus fills out sections of h is narrative—geography, e thnography, i tinerary, local t ales a nd f ables, a nd de scriptions of r are animals. L ike H erodotus, m oreover, t he p oets who preceded him in some approximation to the historical enterprise he undertook wrote in Ionic. Perhaps si gnificantly, t his was H erodotus's second dialect—a f act t hat s erves at s ome le vel to identify Herodotus with a school of writers in the Ionic language.

In a n e ffort t o id entify He rodotus's u nique contribution to the enterprise of writing history, Taplin cites the assessment of the *Histories* made by Dion ysi us of Hal icarn assus. The pre deæssor historians tended to focus narrowly on subjects r elating to si ngle na tions o r c ities. They collected st ories in a single fr ame o f r eference and reported what they collected without addition, s ubtraction, o r p assing j udgment o n t he credibility of the stories they recounted.

Herodotus's u nique contribution arises, first, from the synthesis he ac hieved w ithin a g lobal framework that in terlinked t he stories of ma ny European a nd A siatic p eoples. S econd, h is d iscriminating judgment about the credibility of his material sets him apart. For the modern reader, a principal value of H erodotus's work s tems from its being compelling and entertaining reading.

Heroides Ovid (ca. 20 B.C.E.)

A series of 21 verse letters that the Roman poet Ovid composed as if heroines of myth and legend had written them to their husbands and lovers, the *Heroides* belong to Ovid's earliest period of composition. It was the period during which the young poet found h imself pre occupied with the subject of love.

First a mong t he le tters i s t hat w ritten b y Penelope t o her long-absent h usband, U lysses. She i nstructs h im n ot to a nswer her le tter b ut rather t o return in p erson. S he ha s he ard t he account of t he Trojan War t hat t he a ged Greek general, Ne stor, r ecounted to her s on T elemachus, but in t he absence of Ulysses, n ews of t he Greek v ictory t here b rings her n o c omfort. She reports that her father I carius is pressuring her to remarry, and she urges Ulysses to hurry home for the sakes of h is a ged father L aertes, h is s on Telemachus, and Penelope herself. She to uchingly complains that she was only a girl when he left her, but that she will seem an aged woman upon his return.

The s econd letter i s t hat of t he s educed a nd deserted Thracian girl, Phyllis, to the son of Theseus, De mophon, w ho suc ceeded h is f ather a s ruler of A thens. P hyllis c omplains of Dem ophon's failure to honor his promise to return. Her disappointed expectations have driven her mad, and, after reproving Demophon for his faithlessness, she ends her letter b y quoting t he e pitaph that will appear on her tomb when she dies by her own hand.

A letter from Briseis to Achilles stands third in the collection. Briseis was Achilles' captive and lover in Homer's *The Ili ad*. The Greek general Agamemnon dema nded her from A chilles, a nd rather than fight to keep her, Achilles gave her up, though in his anger he withheld his military services from the Greek cause with nearly disastrous results. Br iseis wants to return to A chilles, a nd her letter encourages him to dema nd that she be restored to him.

The fourth letter is one of seduction. Written from Phaedra to her stepson Hippolytus, this letter encourages Hippolytus to o vercome both his filial piety and his prudery. Even the gods give the e xample of lo ving and w edding n ear k in. Love, she explains, is all that matters. She b egs him to yield to her impassioned entreaties.

306 Heroides

The jilted nymph Oenone authors the fifth letter, addressed to Paris, who had left her to claim Helen of Troy as his prize for judging Venus to be the most beautiful goddess in the world's archetypal beauty contest. O enone reproves Paris for having deserted her, quoting to him the words of promise he emblazoned on a tree with his sword when the nymph married him. Oenone prays that Helen may live to endure the same loss that the nymph experienced, and the nymph affirms that she will remain true to Paris, come what may.

Hypsipyle a ddresses Jason, the Argonaut (see The Argonaut ika) in the sixth missive. On their voyage in search of the Golden Fleece, the Argonauts had tarried for a time on the island of Lemnos, from which the women had expelled all the men. The Argonauts lingered with the Lemnian women, and their leader, Hypsipyle, was Jason's beloved. Though in some versions of the story, the pair part on good terms with no regrets on either si de, here H ypsipyle ha s le arned f rom a traveler that Jason has married Medea, and Hypsipyle i s b oth f urious a nd b rokenhearted. She advises Jason that she has borne him twins, and she curses h is union with M edea, who will k ill her children by Jason and end her life a wanderer through the world, dependent on the largesse of strangers.

The seventh letter comes from Dido, the unhappy queen of Carthage, and is addressed to Aeneas, the T rojan p rince w ho first ma rried a nd t hen deserted h er to f ulfill h is f ate an d b ecome t he founder of Rome. The forlorn D ido tel ls A eneas that her fate will be to end her own life with h is forgotten s word a nd t hat her e pitaph w ill b ear only the name of her first husband, Sychaeus.

Hermione p ens the eighth l etter to Or estes. Here O vid fo llows t he v ersion o f t he s tory i n which H ermione was first bet rothed to O restes, then abducted by and forced to wed t he s on o f Achilles, Neoptolemus (see *Or estes* by Euripides). H er letter be gs Or estes to co me a nd r escue her. In Euripides' play, he does so.

Ninth in the sequence is a letter from Deianira to her deceased husband Hercules. In it, she complains t hat he h ad re placed he r i n h is a ffection with an O echalian c oncubine, I ole. H oping to regain his love, Deianira sent him a robe sprinkled with the blood of the centaur, Nessus, which she believed would act as a love potion. Hercules had killed Nessus when the centaur attempted to ravish D eianira. R ather than a cting as a l ove potion, however, the centaur's blood was in fact a raging poison whose effects were so painful that Hercules chose to be burned to death rather than endure it. The accusatory to ne of Deianira's letter shifts to one of self-reproach for having inadvertently caused her husband's death. She resolves to die, and her le tter becomes one of farewell to her family, one of self-reproach, and her su icide note. Her performance is one of the most moving of the collection.

The 10th letter contains the deserted Ariadne's complaint against Theseus, who us ed h er to escape the Cretan la byrinth when he killed the half-bull, half-man M inotaur, b ut who le ft her stranded on the island of Naxos when he sailed for his home in Athens. Ariadne's guilt at having betrayed her father and her love for the faithless Theseus emerge in moving counterpoint.

Canace c omplains o f the c onsequences o f incest in the 11th letter—one that she addresses to her brother and lover, Macareus, who is also the father of her child. Learning of the child's birth and its pa rentage, C anace's father A eolus t akes the child to be exposed in the wilderness, and he sends Canace a sword with instructions to use it as b efits h er c rimes. She r esolves to do s o. She begs Macareus, however, to collect the scattered remnants of their infant and to enclose them with her own remains in the same sepulcher.

Returning to t he s tory of M edea a nd J ason, Ovid next imagines a letter from Medea in which she rehearses the story of the G olden Fle ece a nd her role in Jason's securing it as she participated in the murder of her brother and fled Colchis for the city of Corinth in Greece. Now Medea finds that Jason i s b etraying her a nd her t wo c hildren b y marrying t he d aughter o f Cr eon, t he t yrant o f Corinth. M edea's children c all their mother to come and see a procession being led by their father, who is a ll a rrayed i n g old. M edea s wears v engeance in her letter to Ja son, though the form it will take is as yet unclear, even to her. As every reader of O vid k nows, Me dea will kill her children. The omission of that detail in her letter is more effective than a statement would have been.

Letter 1 3 is o ne w ritten by L aodamia to her soldier h usband P rotesilaus, who, u nknown to her, had b een the first Greek ashore at Troy and the first to fall in battle. The letter is filled with tender expressions of her lo ve, with forebodings of her h usband's death, and with wishful thinking as she tries to reassure herself of Protesilaus's well- being.

The 14th letter is one written by Hypermnestra the only one of Danaus's 50 daughters to disobey when their father ordered them to slay their husbands on the common wedding n ight of a ll 50. (See suppliants, the) In the letter, Hypermnestra pleads with her husband Lynceus to rescue her from the vengeance of her father, Danaus. When Hypermnestra h ad disobeyed her father's directive b ecause s he lo ved L ynceus, Da naus had accused her of filial disobedience and demanded the courts impose a death sentence. In the event she is saved.

Letter 15 is a letter from the poet Sa ppho. It is addressed to Phaon whom legend identifies as the lost lo ver f or w hom she c ommitted su icide. I t expresses her feelings of loss and longing.

The remaining six letters are pairs exchanged by lovers. The 16th is a letter from the Trojan prince Paris add ressed to t he wife of t he Spa rtan k ing Menelaus. I n it Paris tries to p ersuade H elen to abandon Menelaus and sail with Paris to Troy. In the 17th letter, Helen agrees to do so. The 18th and 19th letters are exchanged between

The 18th and 19th letters are exchanged between the lovers Leander and Hero. To be with Hero, Leander n ightly s wam t he H ellespont u ntil he drowned in a storm. In the two letters the lovers mutually d eclare their a ffection and longing for one another.

Another pair of lovers send the 20th and 21st letters—Acontius a nd C ydippe [See, *Acontius and Kidippe* and Callimachus]. In the first letter, Acontius declares his love for Cydippe and he anticipates the day they will marry as a result of

his having tricked her into swearing to do s o. In the second letter of the pair, also the final letter of the c ollection, C ydippe c onsents to a bide b y her involuntary bargain and marry Acontius.

A s he was among the earliest of k nown Greek didactic poets, H esiod ha s o ften b een b racketed w ith Homer, though Hesiod probably wrote a de cade or two later. Like Homer, Hesiod composed in the Ionic dialect of ancient Greek, though with some admixture of the Boeotian dialect that was spoken in the vicinity of the city of Thebes near the poet's home.

Hesiod's is the earliest Greek poetry that illustrates an in terest in subject matter outside the epic t radition. H is *Works a nd D ays* instead examines two subjects. On the one hand, it lauds the honesty of farmers who make their living by the sweat of their brow while at the same time censuring corrupt judges and their injustices. On the other hand, Hesiod's poem is a kind of farmer's almanac, suggesting which days might prove most propitious for certain kinds of farm labor. In the course of the work, Hesiod paints a fascinating picture of an eighth-century b.c.e. Greek farming community.

His second notable work, *Theogony*, concerns itself with the origins of the universe and of the gods. I t p articularly i nterests t hose w ho s tudy early Greek myth with a view to tracing its development. S ome t hink he a lso c omposed a *Catalogue of Women*. phrases *like her*... or *like her who*... This practice has given rise to the Greek title that translates the phrase *like her*—*Eoeae*. Critical opinion varies about whether this work is really Hesiod's, but it i s s ometimes i ncluded in c ollections of his work. A b etter t hough n ot u niversally ac cepted case has been made for Hesiod's authorship of an often-appended s ection en titled " The Sh ield o f Heracles." "The Sh ield" begins with "Or like her who."

According to not a ltogether re liable re ports, Hesiod is said to have been murdered by the relatives of a woman whom he ei ther s educed or i n whose seduction he somehow cooperated.

hieroglyphs

Used f or r epresenting t he a ncient Eg yptian language—Old, M iddle, a nd L ate Egyptian from a s e arly a s c a. 3 100 b .c.e., h ieroglyphic writing e mployed p ictorial s ymbols to c onvey several c ategories o f1 inguistic information. Some of the symbols represented sounds. Called *phonograms*, such symbols stood for one, two, or three consonants. No symbols representing vowels were employed. A second category of symbol, the *logogram* represented an entire word. Logograms were accompanied by a stroke c alled a n *orthogram*, w hich i ndicated a n ad jacent log ogram. Another sort of symbol, a *taxogram*, was sometimes used to indicate the category to which a w ord b elonged. A ma n's na me, for i nstance, might be accompanied by a symbol that determined t he c ategory *male* for t he p receding word.

Both bec ause of their p ictorial qu ality a nd because they could be written horizontally from right to left or from left to right, or vertically, hieroglyphs were a esthetically s atisfying an d, together with pictures, made for pleasing decoration upon any flat surface, including walls, c offins, or pa pyrus s crolls. They could be carved, painted, or written with a p en. For t he sake of scribal speed and con ve rience, a cursive form of hieroglyphs developed as time went on. This form of h ieroglyphic w riting, c alled hieratic sc ript, soon developed abbreviations and modified forms that replaced the aesthetically satisfying but more cumbersome ancient system, in many cases rendering the older texts virtually indecipherable to later scribes, who wrote exclusively from right to left. Hieratic script remained the standard manner of re presenting M iddle E gyptian from c a. 2160 to ca. 1780 b.c.e.

Throughout this long stretch of time, not only was t he s ystem o f r epresenting t he l anguage changing, the language itself changed as well, and around 1370 b.c.e.-the end of the 18th dynastya new standard of usage as well as a changed mode of hieratic script came into widespread use. With respect both to language and to script, this process repeated itself about 500 b.c.e. Then, shortly after the beginning of the Christian era, the Egyptian language underwent a further, more fundamental c hange, d eveloping i nto C optic. Ab out this time, too, a modified form of the more efficient Greek a l phabet re placed t he more c umbersome h ieroglyphic s ystem, a nd, ex cept f or antiquarians, everyone who was literate adopted the new style.

Hippolytus Euripides (428 B.C.E.)

Apparently a revision of Eur ipides' earlier unpopular play on the same subject, *Hippolytus* enjoys the reputation of being Euripides' finest play, in the view of many critics.

The play is set at Troezen, a city ruled by Theseus, k ing of A thens. There a n a ging Theseus lives with his son Hippolytus. The young man is the product of Theseus's youthful liaison with Hippolyta, queen of the Amazons, whose forces Theseus had overcome in battle. Theseus's new, much y ounger w ife, Ph aedra, a lso d wells a t Troezen.

Hippolytus's p urity of heart a nd h is u tter devotion to t he v irgin g oddess A rtemis ha ve angered Aphrodite, goddess of love. As the play opens, we find the goddess r uminating over the way she r ewards her w orshippers a nd p unishes those who resist her. Hippolytus, it seems, regards her a s " the v ilest of go ddesses." The g oddess expresses her intention to punish the young man for his disregard.

The instrument of her vengeance, she explains, will be Phaedra, his stepmother, and the goddess has long been preparing to spring her trap. Before ever coming to Troezen, Phaedra saw Hippolytus and fell violently in love with him. Phaedra even built a tem ple to A phrodite to hel p her ac hieve the object of her de sire. A phrodite o utlines her plan—and the skeleton of the play. She w ill tel l Theseus a bout P haedra's love f or h is s on. Theseus will then curse Hippolytus. Theseus's patron god, P oseidon, h as granted three curses to Theseus, a nd w hat he p rays for w ill be p erformed. Phaedra's death, too, a lbeit a n honored one, is a part of Aphrodite's plan. She disappears.

Hippolytus and members of his hunting party enter, singing the praises of Artemis. The leader

of h is p arty r eproves t he l ad f or h is n eglect o f Aphrodite.

Phaedra, nearly hysterical and pale and gaunt from love sickness, is led out and lies down on a couch. Her nurse and the ch or us exchange sentiments of concern over her illness and its unknown cause. In the course of their discussion, we learn that Theseus is away from home.

Phaedra's nurse cross-questions her and at last wrings from her the confession that she is in love with Hippolytus. She is, however, determined to die rather than disgrace Theseus and b reak her marriage vows. A nxious to pl ay go-between, the nurse advises that the best way to c ure lovesickness is t o act on i mpulse and g et i t o ver w ith. Phaedra is appalled at the advice.

The nurse nevertheless goes to Hippolytus with the news of her mistress's passion. It is now Hippolytus's turn to be appalled, and he b erates the nurse loudly enough that Phaedra can hear him from outside the house. The œlf- iigh toous Hippolytus is i ntent on b roadcasting t hen urse's treachery to all who will listen. He seizes the occasion to pronounce a d iatribe against women i n general. At this point, Euripides portrays Hippolytus as an excessively self-righteous woman hater.

Phaedra, in the meantime, despairing of keeping her feelings a secret from her husband, resolves to die rather than dishonor him, and she hangs herself. Theseus returns at this moment to be greeted with news of his wife's suicide but no explanation. Then he spies a suicide note in her hand. On reading it, he concludes that Hippolytus has violated his honor and invokes Poseidon's curse on him.

Hippolytus denies his guilt, swearing his innocence i n bo th d eed a nd t hought. Unconvinced, Theseus p ronounces h is son's b anishment, and Hippolytus leaves.

Now a m essenger app ears, b earing n ews of Hippolytus's d eath. As Hi ppolytus d rove his chariot a long t he sho re, P oseidon s ent a t idal wave containing a monstrous bull. The bull's bellowing pa nicked t he horses, a nd t hey d ragged Hippolytus to his death. All this is described in bloody and graphic detail. Hippolytus may have a breath left in him, but he is certainly doomed.

Histories, The Herodotus (ca. mid-fifth century B.C.E.)

Her odotu s of Halicarnassus undertook researching an d w riting *The H istories* so that "men's actions" a nd t he "great a nd w onderful ac complishments" b oth " of Gr eeks a nd B arbarians" would not in time be forgotten. He especially set out t o e xamine t he c auses o f w ar b etween t he Greeks and the "Barbarians" (by whom he meant persons who did not speak the Greek language).

As Herodotus's work has come down to u s, it has b een sub divided b y l ater e ditors i nto n ine books, ea ch o f which t hose s ame ed itors h ave provided with a chapter title bearing the name of one of the nine Muses. The divisions of the chapters do n ot always follow the organization of the book's subject matter and may have been predicated on how much text the editor or scribe could fit on a single papyrus scroll.

Book 1

In the book named for the Muse of History, Clio, Herodotus's first inquiry addresses the sources of the ongoing en mity between the Greeks and the Asians. He concludes the desire for women was at the root of the hostility. Making it clear that he has little confidence in the historicity of the mythical accounts preserved in the epic poems of his predeces sors and the folklore of places, he none theless reports the k ernel s tories of t hose my ths. He chooses, however, to give Persian and Phoenician versions of the stories as a corrective to the Greek spin imparted to them by his countrymen.

Herodotus t ells the P ersian v ersion o f t he kidnapping of Io, a princess of Argos, by Phoenician sailors and her subsequent appearance in Egypt. He then tells the Phoenician version, in which Io, pregnant by the Phoenician captain, goes with him willingly to avoid the scandal on Argos. Herodotus pointedly leaves out the part of the story in which Io is beloved by the god Zeus, who changes her i nto a hei fer to a void Hera's w rath (see Prometheus Bo und). H e reports that Jason's taking Medea from Colchis was a kidnapping in retaliation for Io's (see The Argonaut ika). H et reats t he story of Pa ris's (here called by his alternative name, Alexander) running off with Helen of Troy as another reprisal for I o's r ape. A ccording to f olk t raditions around the Mediterranean Sea, from this series of i ncidents a rose t he en mity b etween Gr eeks and Asians. Having recounted them, Herodotus turns hi s a ttention to p olitical h istory a s he thinks it to be true.

As he personally believes, the historic enmity between E ast a nd W est had i ts o rigins in t he conquest of Lydia and supplanting the rule of the descendants of Heracles (Hercules) with that of the family of King Croesus of Lydia—the first of the Asian barbarians to impose the payment of t ribute on the Greeks. Unable, ho wever, to resist a good related story, Herodotus interrupts this part of the account with the wonderful story of the singer A rion of Me thymna's ride on the back of a dolphin across miles of open sea to the safety of the Grecian mainland.

Returning t o pre-Croesan L ydia, H erodotus recounts t he t ale of H eracles' 2 3rd-generation descendant, C andaules, a L ydian k ing s o b esotted b y t he b eauty of h is u nnamed w ife t hat he encouraged his c onfidant, G yges, to s ee her naked. G yges dem urred, b ut h is k ing i nsisted, hiding him in the royal bedchamber. Having seen the wife, G yges quickly de parted. She, ho wever, observed him leaving. Furious with her husband for so dishonoring her, she gave Gyges the choice of k illing C andaules a nd ma rrying her, t hus becoming king, or of being killed himself. Accepting t he first a lternative, G yges b ecame king, received the approval of the oracle of Apollo, and gave offerings of thanks to the temple at Delphi offerings that Herodotus describes.

Next He rodotus t races the d escendants o f Gyges and their various wars against the Greeks until he arrives at the accession of Croesus to the throne of Lydia in about 560 b.c.e. It was the military prowess of Croesus that succeeded in bringing all the Greek colonists in Asia under his sway. The tribute they paid h im made h im fabulously wealthy, and meeting him became a goal of Grecian philosophers. Herodotus then launches into a s tory a bout a v isit to Cro esus's c ourt b y t he Athenian statesman and poet Sol on.

Fishing for a compliment, Croesus asked Solon to name the person he considered to be the happiest of men. To the king's surprise, Solon did not name h im. A sked for s econd a nd t hird c hoices, Solon still did not name Croesus. Finally the king asked w hy S olon d id n ot i nclude h im. S olon replied that, given the vicissitudes of fortune, no living man could confidently b e c ounted happy. Only after his death could that judgment be valid.

Though Croesus was displeased, time bore out Solon's assessment. First Croesus lost his son in a hunting a ccident. Then, a fter a leng thy de scription of Croesus's campaigns, a reader learns that the k ing came to venerate Apollo's or acle. This resulted from the Pythian oracle's having passed Croesus's te st o f i ts p owers. L ater o n, t he k ing himself w as def eated i n ba ttle, t aken p risoner, and ordered to be burnt on a funeral pyre, only to be sa ved b y a c loudburst a ttributed to d ivine intervention. Croesus's conqueror was Cyrus the Great, king of the Persians (d. 529 b.c. e.). Herodotus reports that Croesus then remembered Solon and wished that he had rewarded him for his wisdom. No one knows Croesus's date or manner of death, t hough H erodotus l ater r eports h im a s being a mong both Cyrus's military advisors and those of Cyrus's s on, C ambyses. It s eems l ikely that Croesus died in battle as a Persian ally.

Herodotus r eports t hat C yrus w as p ositively impressed by Croesus's behavior and granted him any favor he chose. Croesus asked that his chains and shackles be borne to the Temple of Apollo at Delphi and the oracle que stioned a bout the r easons for his defeat, since, because of the prediction that he would put an end to a great empire, he had a nticipated suc cess. The a nswer c ame back that he had misinterpreted the prediction and that his defeat was the gods' retribution for his ancestor Gyges' having slain Candaules.

In the rest of the first book of The Histories, Herodotus o bserves t hat the Lydians were t he first to use coins and that they prostituted their female c hildren u ntil t hey found h usbands, b ut that o therwise their customs a remuch like the Greeks'. He then shifts his attention briefly to the Assyrians, but principally to t he Medes and the Persians. H et ells h ow a g ood j udge, D ioces, became the first king of the Medes, how he built and f ortified t he ci ty of A gbatana (E cbatana), and the manner in which her uled h is people. Dioces' so n, P hraortes, subjugated t he P ersians to h is r ule a nd a fterward s everal o ther A sian peoples u ntil he a ttacked t he A ssyrians, w ho defeated his forces and killed him. His son, Cyaxares, s ucceeded h im, b ut a fter i nitial successes with a highly organized a rmy with specialized units, Cyaxares was overcome by the Scythians, who then ruled over all of Asia. They did not rule well, however, and eventually fell victim to Cyaxares' plotting. He then reestablished the power of the Medes and married his daughter Mandane to the Persian Cambyses.

Warned in a dream that the child of that union would d epose h im, C ambyses t ried t o have h is son Cyrus killed in infancy. However, the servant to w hom C ambyses en trusted t his t ask, Ha rpagus, considered his master mad and gave the baby to a her dsman to e xpose i n t he mountains. Instead, the herdsman exchanged h is wife's stillborn son for the baby and took the royal child as

312 Histories, The

his own. That child would eventually become the Persian king, Cyrus.

Later, d iscovering t hat h is s on was a live a nd learning f rom Harpagus w hat h ad really h appened, C ambyses took Harpagus's s on a nd had the lad killed, cooked, and served to h is father as a punishment. When Cyrus grew up and became king of the Persians, Harpagus conspired to help him overthrow C ambyses, a nd s o t he M edes together with the rest of Asia became subject to the Persians.

Herodotus n ext d escribes t he Persian E mpire together with its religion and its customs, including the Persians' willingness to adopt the customs of foreigners in matters of dress and of adding foreign deities to the pantheon of those they worship. The historian then devotes his attention to describing the Greek cities of Asia, and then to discussing the way in which Cyrus and his general and ally, Harpagus, led the Persians to bring Asia Minor as well as Ionia and several Greek islands under their sway. Herodotus also recounts the siege and capture o f B abylon. B efore doing s o, ho wever, he details the wonderful manner in which the city's former female rulers, Semiramis and Nitocris, had engineered flood control and improved the city's defenses. Modern scholarship has not confirmed the existence of Nitocris, and some think that the works He rodotus attributes to her were those of Nebuchadnezzar.

Nonetheless, a fter de scribing Nitocris's tomb, Herodotus returns to the conquests of Cyrus and his defeat of Nitocris's s on, L abynetus. The historian then turns to c ataloguing examples of the Babylonians' wealth and power, pointing out that fully a third of all the tribute paid to the Persian empire f rom A sia c ame from th e c ountry of Assyria, whose capital w as B abylon. H e p raises the pre- Persian conquest marriage customs of the region and also their provision for the universal treatment of the sick.

The Persian's campaign a gainst the Massagetae, who lived east of the Caspian Sea, the death of C yrus i n b attle a gainst th em, a nd a b rief account of the customs of the Massagetae ends the first book.

Book 2

Named for Euterpe, the Muse of flute playing, the second book of Herodotus's history uses the decision of Cyrus's son, Cambyses, to invade Egypt, which he conquered, as a transition to a consideration of Egypt, its people, and its customs. He reports the e xperiment o f the E gyptian rul er Psammetichus t hat w as d esigned to d etermine which h uman na tion w as t he ol dest. Thinking that th e o riginal l anguage o f m ankind would spring a utomatically to t he lips of a c hild t hat never heard language, he arranged for a shepherd to r ear t win c hildren a mong h is flocks and for them to n ever h ear a word s poken b y a nother human being. When the children began to speak, their first discernible word was bekos. On discovering that this was the Phrygian word for bread, Psammetichus c oncluded t hat P hrygian m ust have b een t he o riginal h uman l anguage a nd i ts speakers the most ancient of peoples. Herodotus considers foolish an elaboration of the story that he at tributes to the Greeks. As a n experimental control, sa id some G reeks, P sammetichus h ad had the tongues cut out of all who came in contact with the children.

The h istorian n ext t urns to a d iscussion o f Egyptian religion and geography. He has clearly been an eyewitness to much that he describes. He speculates, however, about the source of the Nile without reaching a firm conclusion. He then discusses dining and toilet habits, the Egyptian custom o f c ircumcision, t he Eg yptian r eligion, i ts priesthood, and its manner of sacrifice. He digresses to consider the Egyptian god Heracles, whom he concludes has to be a different figure from the heroic and also deified Greek Heracles—a conclusion he re ached a fter t raveling to t he tem ple o f Heracles at Tyre in Phoenicia and discovering it to be over 2,000 years old.

Herodotus a ttributes certain G reek c eremonies honoring the god Dionysus to Egyptian origin and a lso c onsiders E gypt t he s ource of t he other G reek gods, er roneously thinking the d ifferences in n ames a matter of language only. He then describes v arious c eremonies, i ncluding a festival of 1 ights h onoring t he E gyptian g od Osiris, who was k illed a nd rose f rom t he de ad. Herodotus identifies A res, t he G recian g od o f war, with the Egyptian deity Set—the monarch of evil who was responsible for the death of Osiris.

Next the reader learns of the Egyptians' reverence for animals and their practice of embalming cats. One d iscovers t hat t he cr ocodile l ives i n peace with a bird—the *trochilus*—that pecks the leeches o ut o f t he cr ocodile's m outh. W e a lso learn of flying serpents, the ibis that eats them, and other birds and animals.

Turning to Egyptian funeral customs, Herodotus gives a detailed description of the various processes of mummification practiced on the bodies of i mportant persons, persons of the middling sort, and poor persons. Persons killed by crocodiles or through the agency of the River Nile can only have their bodies handled by priests of the Nile deity, for the deceased is regarded as more than human.

Always c areful t o i nform t he r eader o f t he manner in which he formed his views, Herodotus turns f rom hi s p ersonal experience a nd crossquestioning to matters of hearsay. What he learns and r eports i s a s ort o f h istory a s f olk le gend. Among the unlikely matters reported in this section are the doings of an Egyptian queen with the same n ame a s t he s uspect B abylonian, Nitocris, and a p utative a nd o therwise u nsubstantiated Egyptian invasion of Europe.

He gives the report of Helen of Troy that is the f oundation for Eu ripides' version of h er story in *Helen*. H erodotus r emarks t hat he thinks Homer k new this version of the story, but found the one in *The Ili ad* and *The Odyssey* more suitable for his artistic purposes. Herodotus himself credits the Egyptian version as more likely. If the Trojans had had Helen in their city, he thinks, they would have given her up rather than s uffer a 1 0-year sie ge a nd t heir c itadel's destruction.

Herodotus attributes to the Egyptians the origin of the belief in the transmigration of souls. A soul comes into being with a human's birth. On that person's death, it moves on into the body of another creature coming into being. After making the rounds of the living things on land, in the sea, and in the air over a period of 3,000 years, it comes again into a human body. (For what happens after that, see Egypti a n Book of the Dead.)

Herodotus next describes the manner of building the pyramids, which he had v isited. Turning to a story of special interest to h is Grecian hearers and listeners, Herodotus recounts the story of Charaxus, the brother of Sa ppho, who brought home to Mytilene a courtesan from the Egyptian city of Naucratis, one Rhodopis. Sappho reproved her brother's infatuation with the courtesan, also called Doricha or Dika, in a poem now lost. Fragment 5 of the Sappho canon addresses Dika.

An interesting choice for an aside appears in the answer of the priests at Thebes to the boast of the Greek writer Hecataeus that, at a r emove of 16 g enerations, he was de scended f rom a g od. The priests showed him—and also Herodotus— 345 statues, the likenesses of that many generations of h igh priests. These, t hey pointed o ut instructively, descended from a good and honorable man.

As h e cus tomarily d oes, H erodotus e quates the Egyptian pantheon to the the Greek gods. He identifies t he Eg yptian god H orus with Apollo and the Greek Dionysus with the Egyptian Osiris. The l atter g ods have being t wice b orn in c ommon, and Osiris was believed to have risen from the d ead. H erodotus t hinks t hat t he m ysteries and w orship o f D ionysius have t heir ro ots i n Egypt, and he is careful to omit from his account both t he n ame of Osiris and the n ature of the mysteries surrounding his worship. Other identifications in clude Dem eter as Isis and A rtemis as Bubastis.

Herodotus discusses the dynasties of Egypt and recounts h is t ravels to v iew so me architectural wonders, both standing and ruined. Among those standing i n h is day was the artificial la ke c alled Moeris, which had two enormous pyramids topped with seated statues in its center. Among the Egyptian ru lers he d iscusses i s P samtik I (whom Herodotus c alls Ps ammetichus; h e r eigned f rom 663 to 609 b.c.e.). On e of 1 2 c ontemporaneously ruling k ings, P samtik I c onsolidated h is s ole power with the aid of Ionian and Carian pirates who wore bronze armor, thus fulfilling a prophecy that "bronze men" would aid him in gaining the throne.

Another ar chitectural achievement t hat Herodotus d escribes is the canal r unning from the N ile R iver to t he A rabian Gu lf, first dug around 1 300 b.c.e. and r econstructed by N ecos (Egyptian: Ne co). A p ortion of its rout e pa ralleled that of the present Suez Canal.

Herodotus tells of the reign of A pries (Egyptian: H ophra, r eigned 58 8–569 b .c.e.) a nd h is overthrow by Amasis (Egyptian: Ahmose, reigned 569–529 b.c.e.). Amasis was friendly to the Greeks and married a woman from the Greek colony of Cyrene i n L ibya. He also conquered Cyprus though he was not, a s H erodotus s ays, t he first Egyptian to do so.

Book 3

Book 3 of Herodotus's history (which some might say is misnamed for Thalia, the Muse of comedy) begins with a description from both Persian and Egyptian points of view of the Persian king Cambyses' invasion of Egypt about 525 b.c.e. Responding to Cambyses' offer of a royal marriage linking Egypt and Persia, the Egyptian king Amasis substituted a d aughter of t he pre deæs or he had deposed. I nfuriated, s aid t he P ersian ac count, Cambyses i nvaded. The E gyptians, ho wever, claimed (falsely, ac cording to H erodotus) t hat Cambyses was the son of Cyrus by the substituted Egyptian w oman. The h istorian n ext c ompares stories about the way Cambyses provided his soldiers with water by making a treaty with the Arabians so the army could cross the desert. Herodotus goes on to report that with his own eyes he had viewed the skeletons of the warriors slain in the final ba ttle t hat gave Persia sovereignty ove r Egypt.

Shifting his focus, Herodotus next catalogues the d istinguishing c ustoms of t he Et hiopians, whose u sual a ge at de ath he r eports to b e 1 20 years. Upon dying, Ethiopians were enclosed in transparent, alabaster coffins, kept in their homes for a year, and then set up around their cities as monuments. Famine in the Persian army dissuaded the Persians from undertaking the conquest of Ethiopia.

Taking a closer look at Cambyses, Herodotus reports several of the emperor's mad acts, including arranging the murder of h is b rother. W hen Cambyses asked the supreme judges of Persia if, contrary to custom, he could marry his sister, the judges fou nd a n answer " both j ust a nd safe." There w as n o l aw, t hey o pined, t hat p ermitted siblings to marry, but there was one allowing the king of Persia to do whatever he wanted. Accordingly, C ambyses m arried two of his s isters b ut killed one of them.

Following a re hearsal of m ore in sane r oyal acts, Herodotus segues into a d iscussion of the continual good fortune of Polycrates, the tyrant (ruler) of the island of Samos, and of the way in which he rid himself of his political enemies by sending them on a mission in support of Cambyses together with a secret request that Cambyses n ot send his a mbassadors b ack. This l eads Herodotus i nto a consideration of t he politi al alliances and notable crimes and activities among the i nhabitants of t he Gr eek i slands a nd citystates and the role Polycrates of Samos played in their affairs. H erodotus j ustifies h is lengthy digression on this subject by praising the Samians for a series of notable feats of engineering: a system of aqueducts, a harbor enclosure, and a temple complex.

Cambyses died, Herodotus explains, when an accidentally *œ*lf- inflicted wound became gangrenous. A M ede, a Ma gian na med Sm erdis, w ho impersonated C ambyses' murdered b rother of the s ame n ame, s ucceeded h im o n t he t hrone. Then H erodotus r ecounts t he u nmasking a nd death of the imposter and the Persian recovery of the imperial throne. With the throne vacated and no clear successor at hand, the Persians considered whether or not to modify their form of government. A committee of seven of their foremost male citizens compared the advantages and disadvantages of a dem ocracy, an oligarchy, and an

absolute m onarchy. They concluded that, when the best-qualified person sits on the throne, a monarchy is the best form of government. Otanes, the chief supporter of democracy, fearing that the others m ight s elect h im a s mon arch, fore closed that eventuality by refusing in advance. As a condition of his w ithdrawal, ho wever, he r equired that h e and his d escendants b e e xempted f rom allegiance to whomever might become king. The others agreed to the condition.

With that decided, the six remaining members of the committee agreed that the one whose horse first neighed at sunrise would become king. Darius was one of the six, and just before sunrise his c lever g room st ationed a f avorite ma re o f Darius's s tallion a t a sp ot w here t he s tallion would w hinny in greeting. A thunderclap confirmed this sign, and Darius became Persia's new king.

Herodotus next describes the way that Darius or ga nized the government of A sia, for ged loyalties through marrying multiple wives, and set up a monument to his horse and its groom. The historian t hen c atalogues t he t ribute t hat Da rius imposed on each of the 20 administrative regions (called satrapies) into which he had divided Asia, portions of A frica, and, later on, the Mediterranean islands of Asia Minor and Thessaly.

Turning h is attention to a geography that, in all d irections, beco mes i ncreasingly f anciful with distance, Herodotus describes Asia and the wonders he has he ard of A rabia and India. He feels least confident about his store of reported information when he discusses Europe and the North-though s ome of h is r eports fr om th at quarter do prove accurate. He points to the North as the source both of tin and of amber. The ancient Celts of Britain both mined tin and recovered it from streambeds, trading it south with the Veneti who passed it along to the Mediterranean world. The L ithuanian h istorian A rnolds Sp ekke ha s traced the ancient routes by which a mber made its w ay f rom t he B altic to t he M editerranean areas.

Herodotus next turns his attention to the story of the Greek physician Democedes and how, by healing K ing Darius's foot, he ga ined the k ing's confidence. H e a lso tel ls ho w Dem ocedes c ontrives t o r eturn to h is ho meland by i ndirectly encouraging Darius to add Hellas (greater Greece including G reek p ossessions in A sia Min or) t o his dominions. Sent as a part of an intelligencegathering m ission, Dem ocedes e scaped P ersian control.

Nonetheless, e ncouraged by t he ph ysician's accounts of Greek wealth, Da rius b egan a c ampaign of c onquest a gainst t he e asternmost H ellenic i slands b y c apturing t heir p rincipal p rize, the island of Samos. A fter telling a complex tale of plot, c ounterplot, a nd t he e ventual P ersian decimation of the population of Samos, Herodotus shifts to recounting the revolution of Babylon (521 b.c.e.) a gainst P ersian r ule. Having thrown off the P ersian y oke, t he B abylonians b oasted that Darius would retake their city "when mules bear offspring." In the 20th month of the resultant Persian siege, that very event occurred when a female mule foaled.

Herodotus ends the third book of his history by recounting the stratagems of the Persian general Z opyrus, who, by m utilating h imself and conspiring with Darius to sacrifice a part of the Persian a rmy, was a ble to p ose as a d isaffected deserter a nd ga in c ommand of t he B abylonian forces. His sacrifice of his nose and ears and the lives of 5,000 P ersian troops made pos sible a deception that resulted in the second Persian conquest of B abylon. A s a r eward, Da rius made Zopyrus Babylon's governor for life.

Book 4

In Book 4—more aptly named by early editors for Melpomene, t he M use of Tragedy—Herodotus turns his attention to Da rius's campaign against the S cythians. This peo ple's homeland w as i n a section of what is now Russia. For 28 years, they had r uled o ver t he h ighlands i n t he w estern portion o f the P ersian E mpire. The S cythians considered t hemselves to be the most recently created ra ce o f human b eings s ince t hey could only re count 1,000 y ears o f history. They a lso

316 Histories, The

thought that the land to their north was not habitable because of a continual fall of white feathers. (Herodotus felt sure this must be snow.)

The hero a nd dem igod H eracles, r eports Herodotus, fathered three boys with a half-woman, half- ærpent. The youngest, Scythes, became the first king and sire of the entire Scythian people. Following this account of Scythian origins comes a lengthy account of the peoples to their east and to their north. As usual, the proportion of mythical to ethnographic detail rises with distance, but interesting ad mixtures o f po tentially fac tual information in trigue a r eader. A s a n e xample, Herodotus details reports of a funeral custom of the Issodones-a known people. They eat the flesh of their deceased fathers, he says, and gild and preserve their heads. The latter custom was sometimes more recently observed a mong some eastern Eu 10 pean Christians to preserve the relics of popularly canonized saints.

Herodotus a lso tells s tories c oncerning t he Hyperboreans—people dwelling beyond the north wind. This likely alludes to t hose a ncient B altic peoples who shipped their amber south.

The historian then attempts to de scribe what he thinks a map of the world should look like: two great, intersecting peninsulas. One of them contains Libya (by which at this point Herodotus seems to mean the African continent) and Asia. The second peninsula is that of Europe, which he thinks is larger. Though he has no clear idea of Europe's extent, he presents a credible account of one f ailed a nd o ne suc cessful c ircumnavigation of Libya.

Herodotus next undertakes a catalogue of the rivers of Scythia and a nother of the gods of the Scythian p antheon. As is h is us ual p ractice, Herodotus normalizes the Scythian deities on the Greek m odel. H e a lso d iscusses the S cythians' treatment of their enemies in warfare, a treatment that i ncludes s calping. He r eports the p ractices surrounding royal sickness and burial, and details the fu neral c ustoms p racticed on t he de ath o f commoners. Among these is the custom of carrying a corpse to the homes of friends for 40 days. The friends entertain the deceased for this period and th en b ury th e r emains. H erodotus a lso remarks on a Scythian steam bath that gives the bathers much pleasure. Having thus detailed what he k nows of S cythia a nd i ts p eople, H erodotus returns to the Persian king Darius and his preparations for war against them.

Herodotus r eports t hat Da rius m oved a gainst the S cythians with a na vy of 6 00 sh ips a nd a n army of 700,000 men drawn from all the nations under Persian sway. The army marched across the Bosporus over a 2 0-mile-long br idge of s hips. Herodotus follows the march of the army and catalogues the people it overcame in its march toward Scythia. He also tells of the provisions that Darius made for h is return. Then t he h istorian t urns to the S cythians a nd en umerates t he a llies t hey recruited to resist the Persian onslaught.

At this point, Herodotus interjects the story of a group of A mazons whom the Greeks had c aptured. Having overcome and killed their c aptors aboard ship, the Amazons drifted ashore in Scythia. There they stole horses and began raiding the Scythian c ountryside. The h istorian de tails t he fashion i n wh ich t he A mazons e ventually to ok young Scythian men as mates and established the separate society of the Sauromatae.

Unable to corner the nomadic Scythians for a decisive enga gement, Da rius e ventually de cided to give up his Scythian ambitions and withdrew toward t he b ridgehead he a nd h is I onian a llies had established across the Ister (Danube) River. As the Persian army retreated in that direction, a Scythian v anguard a ttempted t o p ersuade t he Ionian rearguard contingent to destroy the bridge and wi thdraw in k eeping wi th the orders that Darius had given them. Outnumbered, the Ionians pretended to agree, destroying as much of the bridge as they could quickly rebuild. Their leaders knew that they owed their offices and emoluments to Darius, and that if he were defeated at the hands of the Scythians, as the Greek rulers of Persian outposts in the Aegean, the Ionian leaders would soon be supplanted. The loyalty of the Ionians coupled with the mistakes of the Scythians e nabled Da rius a nd h is ho st to na rrowly escape destruction at Scythian hands.

In one of his associative digressions, Herodotus n ext r ecounts the t ale of th e M inyae, t he descendants of J ason a nd t he A rgonauts by t he women of the island of Lemnos (see *The Argonaut ika*). W ishing t o m igrate to Sp arta, the Minyae were first welcomed as settlers, then condemned to death for presumption, and finally fled from Sparta. The historian leaves it to the reader to draw the parallels between this story, its predeces so, and the story that follows.

In the following episode, Herodotus recounts the establishment of a Greek colony in Libya, the colony's s ubsequent growth, the c onflict t hat expansion provoked with Libyan neighbors, their expulsion of the Greeks, and the appeal of their deposed queen Pheretime, to A ryandes, the Persian v iceroy o f E gypt, f or m ilitary a ssistance against the Libyans. Using that appeal as a p retext, H erodotus t hinks, A ryandes s eized t he opportunity to add Libya to t he Persian Empire, planning to return Pheretime to Libya's throne as a Persian vassal. At the height of its power, that empire e xtended f rom L ibya i n t he s outh a nd west, t hrough E gypt, Pa lestine, a nd M esopotamia, across the northern edge of the Arabian desert (whose dwellers were Persian allies), and east as far as the Indus River in the south and east. From there, the empire turned north through portions of what is now Afghanistan, then back east along the course of the A raxes R iver (the A ras River in Armenia), around the southern half of the Caspian Sea, and across the Balkans to the approximate c enter o f t he Gr ecian p eninsula, including Macedonia.

Next Herodotus catalogues the lands and ethnography of Libya. Among those lands, he alludes to the land of the Gindanes, where, as in Homer's *Odyssey*, the inhabitants eat the fruit of the lotus. Among the ot her p eoples he d escribes, we find the E thiopian c ave dw ellers w hose sp eech Herodotus c ompares to "the s queaking of bats." He also locates among the Libyans a tribe of dogheaded men, the *kynokepheloi*. By a complex process of myth making, they were later to be come the s ource of legends su rrounding the nowdisavowed St. Christopher. Herodotus also locates there a he adless p eople w hose e yes a re i n t heir breasts. H erodotus's re marks, ho wever, i ndicate that he recognizes such folk as the product of Libyan fables.

Having de voted s ome 3 3 chapters to h is discussion of Li byan e thnography, g eography, a nd natural h istory, H erodotus r esumes the s tory of the Persians' alliance with the exiled Pheretime. ("At Herodotean length" became a Greek epithet used to characterize bng- windedness.) After a n unsuccessful, nine-month sie ge of the c ity of Barce, the Persians tricked the citizens by breaking a truce and restored Pheretime to the throne, enslaving a llt hose w ho had o verthrown her . Herodotus ends Book 4 with a description of the awful d eath of P heretime, a n e xpression, a s he thought, of th e g ods' anger a th er e xcessive revenge against the revolutionaries of her city.

Throughout his *Histories*, Herodotus organizes his material in a highly associative and sometimes digressive fashion. This proves particularly to be the case in the fifth and sixth books of the historian's gr eat w ork. Here a s w ell, ho wever, a n attentive r eader n ot o nly ga ins i nsight i nto t he European a mbitions a nd c ampaigns of t he P ersians a nd t he s ources of t he de veloping en mity between Persians and Greeks, but also comes to understand Herodotus's own views on such matters a s c omparative s ystems of g overnment a nd the way those systems compare and contrast with modern ones.

Book 5

Herodotus begins Book 5 (editorially named for Terpsichore, t he Muse of t he d ance) by c ataloguing t he P ersian g eneral M egabyzus's c ampaign a gainst t he Eu ropean Pae onians. N ext follows an account of the misbehavior of Persian emissaries with t he w omen of t he Mac edonian court a nd of t he r evenge t hat t he Mac edonian prince, A lexander t he s on of A myntas, to ok for the insult by slaughtering the emissaries and successfully hushing up the matter.

After H erodotus de tails a r evolt a gainst P ersian p ower le d b y A ristagoras o f t he i sland o f

318 Histories, The

Miletus, he d igresses to d etail an i ronic an d unsuccessful a ttempt b y the S partan p rince Dorieus to e stablish a c olony, first in Libya a nd then in Sicily. Had Dorieus remained in Sparta, he would have soon become its king.

Returning to the main thrust of his discussion, Herodotus recounts the mission to Sparta of the tyrant of Miletus, Aristagoras, who brought with him to S parta a b ronze t ablet eng raved w ith a map of t he k nown w orld. H e u nsuccessfully encouraged the Spartans to overcome the Persians and conquer it.

Herodotus then describes the royal road leading from Sardis in Ionian Asia Minor to the Persian c apital a t Su sa. H e e xplains t hat t raveling the r oad i nvolved t hree mont hs' j ourney pl us three extra days to reach Sardis from the seaport at Ephesus.

At Athens, Herodotus interjects here, Phoenician r efugees l ed b y C admus a nd a rriving 6 0 years a fter t he fall of Troy, first i ntroduced t he al phabet to the Greeks.

Herodotus then recounts the story of the way the A thenians r id t hemselves o f de spots a nd became a d emocracy. A fter t racing t he A thenians' s ubsequent g rowth in power, Herodotus concludes that equality of the citizenry is a more effective ci vic arrangement t han d espotism because of the impetus that democracy lends to individual achievement.

Next c ome re ports of the e stablishment of despots i n s everal c ities; o f o racles a nd t heir interpretation; o ft he c old g host o fM elissa, whose burial garment was stolen, and the ghost's advice to her husband; and, eventually, of the way in which Hippias, a tyrant of Athens deposed in 510 b.c.e., encouraged the Persians to make war on the Athenians. At about the same time, after failing to interest the Spartans, A ristagoras the Milesian encouraged the Athenians to intervene against t he P ersians i n I onia i n A sia M inor, where Athenian settlers had colonized the country. Persuaded, the Athenians sent 20 warships to the region. Those ships, Herodotus darkly declares, "were t he b eginning of t rouble f or Gr eeks a nd foreigners," for, e ncouraged by At henian n aval support, the I onians b egan a g eneral r evolution against t he P ersians. C ombined A thenian a nd Ionian forc es b egan t hat uprising by attacking and destroying the Persian stronghold at Sardis. That destruction hardened the Persian king Darius's resolve to punish the Athenians.

Assisted b y t he P hoenicians, wh o were t he Persians' usual naval allies, Darius's troops set off to regain control. They met forces of the Ionians and the Cyprians at sea and on land. The Ionians, encouraged b y the c ourageous e xample of t he men of the Island of Samos, defeated the Phoenician navy at sea. Despite the death of A rtybius, the Persian commander, however the land forces did not fare s o well, and after a y ear's freedom, the r ebellious i sland o f Cy prus fe ll onc e a gain under P ersian c ontrol. P ersian l and f orces a lso prevailed i n Ion ia a nd i n n earby A eolia. A t t he end of this book, Herodotus reports the death of Aristagoras of Miletus, the principal organiz e of Athenian support of the Ionian revolutionaries.

Book 6

Later e ditors c hose t he na me o f E rato, M use o f the lyre, to adorn the section of Herodotus's history they assigned to Book 6. Using the death of Aristagoras as a transition, Herodotus turns to a discussion of Histiaeus, the tyrant of Miletus who had ac tually b een t he ma stermind b ehind t he revolt of the Ionians against their Persian overlords. Though Histiaeus had successfully deceived Darius concerning h is complicity in the revolution, h e f ailed to f ool t he P ersian g overnor o f Sardis, Artaphernes, who directly accused Histiaeus. Discovered in his treachery, Histiaeus fled to Miletus. There, however, the citizens repulsed him, wounding him in the thigh. He had be tter luck on the island of Lesbos, where the citizens of Mytilene g ave h im eig ht wa rships that h e took with h im to Byzantium. There h e e stablished a base of operations.

In the meantime, the Ionians on the islands of Asia Minor a massed a fleet of more than 200 vessels with which to face an enemy fleet of 600. The Ionians, though, were the better seamen, and the Persians feared their tactical advantage. Their commander, Di onysius o f P hocaea, so ught t o improve t hat a dvantage by f urther t raining h is Ionian seamen in the skills requisite to naval warfare, b ut t heir l ack o f d iscipline f rustrated h is efforts, and some of the revolutionaries began to think it best to return to Persian rule. When the sea battle was finally joined, despite heroic deeds by the Ionians, the Persians overcame them and took and sacked Militus.

The Persians spared the city of Samos because the c ommanders of it s s hips had de serted t he Ionian navy. Those Sa mians w ho w ished to b e free of Persian domination migrated to Sicily. On all the o ther i slands w hose p eoples had s tood against them, the Persians implemented a p olicy of destroying the cities and mutilating the young men, selling both them and the women into slavery el sewhere. They removed t he en tire p opulations of the i slands and s ettled them with lo yal Persian subjects.

The P ersians t hen s ent a l and a nd s ea f orce under their commander, Mardonius, against the remaining cities of Ionia a nd f rom t here ac ross the H ellespont i nto E urope. I t w as t his f orce under Mardonius that subdued the northern shore of the Ae gean S ea and conquered Eu rope as f ar as Macedonia, which he a lso s ubdued. I n doing so, he did something that Herodotus accounts as a wonder. Instead of co-opting or installing new tyrants i n the cities he overcame, M ardonius established dem ocratic governments. A s a r esult of his efforts, Persian rule in southeastern Europe endured for half a century.

Heartened by Mardonius's success, Darius sent ambassadors to the c ities of t he Gr ecian ma inland t o p ropose that they b uy p eace b y paying him t ribute. Here H erodotus d igresses to c ompare co nflicting a ccounts of t he or igin of t he Spartans' custom of having two kings, who were regularly at odds with one another. The historian continues t his d igression by discussing royal privileges, the or gari za ton of the Spartan state, some n otable d isagreements a mong her k ings, and the doings of the king Cleomenes. Then the focus of the history s hifts to a d iscussion of a n armed di sagreement bet ween Athens and the island of Aegina. That done, Herodotus resumes his a ccount of K ing Da rius's a ttempt to sub due Athens and make all Greece a part of his empire.

Having taken Eretria and other cities on the large island of Euboea just off the Grecian mainland, the Persians sailed to Attica and the plain of Marathon, a place most suitable for their cavalry o perations. C ontrary t o P ersian e xpectations, in stead of a waiting an o nslaught in side their city's walls, the Athenians marched toward Marathon to m eet the Persians. The A thenians sent a runner, Phidippides, to call the Spartans to arms against the Persians. A ccosted by the god Pan on the way, Phidippides nonetheless covered the 150 miles in less than 24 hours and called the Spartans to arms. The Spartans replied that they could not u ndertake a c ampaign u ntil the next full moon.

Herodotus then continues the story of one of the most notable and memorable feats of A thenian a rms. Whi le a de posed t yrant o f A thens, Hippias t he s on o f P isistratus, w as g uiding t he Persians t o M arathon, the o utnumbered A thenians, whose leaders voted 6-5 in favor of battle, arrayed themselves under the command of Miltiades for the contest at a rms. Making their line strongest on the left and right, with the center only a few ranks deep, the Athenians, reinforced by men from the city of Platea, charged the Persians at a r un. The Persians successfully pushed back the center, but the two flanks of the Greek army drove the Persians back and in a pincers movement closed in on those in the center. Overwhelmed, the Persians fled, and the Greeks pursued t hem to their ships, of which the G reeks captured seven.

Thinking that, if they could get to Athens first, they m ight find it u nprotected, t he P ersians sailed t here. The A thenian t roops, ho wever, rushed h ome an d g ot t here first. The P ersians sailed f or ho me. The adv enture had c ost t hem 6,400 men; the Athenians lost 192. Some critics have faulted the usually expansive Herodotus for cutting so short h is ac count of one of the m ost important b attles i n t he h istory o f a ncient

320 Histories, The

Greece. Arriving too late for the action, the tardy Spartans praised the Athenians for their splen did per for mance.

At this point, Herodotus digresses to discuss the wooing and winning of A gariste, the greatgrandmother of H erodotus's g ood f riend, t he famous A thenian statesman Pericles. A fter t racing P ericles' subs equent g enealogy, H erodotus returns to the story at hand.

A hero o f Ma rathon, t he g eneral M iltiades, persuaded the Athenians to give him command of a fleet to begin the recapture of Athenian islands the P ersians h ad t aken. H is m ilitary v enture proved u nsuccessful, ho wever, a nd t he fickle Athenians tried him for his failure. He forestalled their judgment by dying of gangrene contracted from a wound he had suffered. Herodotus ends the sixth book by telling how Miltiades had won the island of Lemnos for them.

Book 7

Book 7, bearing the name of Polymnia, the Muse of s acred m usic, opens with an account of t he way Da rius drafted troops for a much-enlarged army fr om a ll of h is A sian de pendencies. A s Darius himself prepared to lead the next military adventure against the Greeks and also against a rebellious Egypt, his sons insisted that he name a successor bef ore set ting o ut. Da rius se lected Xerxes, t he el dest s on of h is s econd ma rriage, since the children of the first marriage had been born before Da rius bec ame king. This provision for t he s uccession pr oved for tunate, for D arius died within the year—in 486 b.c.e.—and Xerxes mounted the Persian throne.

Xerxes put down the rebellion in Egypt. Then, encouraged both by dissident Greeks and by his general, M ardonius, h e t urned h is a ttention to punishing At hens. A t a g eneral c ouncil of t he principal Persians, he announced his intention to bridge t he He llespont, r aze the c ity of Athens, and subdue all of Europe. Herodotus reports that other a dvice and a s eries of p rophetic d reams caused Xerxes to doubt the w isdom of h is de cision and waver between peace and war. Finally, the prophetic dreams convinced him that war was the better option. After four years of preparation, in 481 b.c.e., Xerxes led a great host as f ar as S ardis. H erodotus d escribes s ome o f Xerxes' p reparations, i ncluding d igging sh ip canals a nd b ridging t he H ellespont. H e t hen recounts the march of the army from Sardis to the Hellespont and reports the forebodings of disaster delivered to Xerxes by his uncle Artabanus forebodings that Xerxes ignored.

It tooks even d ays a nd s even n ights, r eports Herodotus, for the Persian host of 170,000 to march across the bridge from A sia in Europe. Then the Persian a rmy and the fleet began their march by land and voyage by sea toward Greece. Herodotus describes the dress and equipment of the soldiers of t he various nations comprising t he multitude, naming t he commanders of each a s well a s the commanders in chief of the whole. After telling of the horses and camels that accompanied the army, he turns h is a ttention to t he navy, c omprised o f 1,207 triremes—armored warships p ropelled b y three ranks of oars as well as sail. The historian continues b y na ming t he na tions t hat had f urnished ships, the dress and equipment of the sailors, a nd t he c atalogue of t heir c ommanders. H e gives special attention to the sole woman a mong their number, Artemisia, the tyrant of Herodotus's own city of Halicarnassus.

Herodotus next reports Xerxes' questioning a Greek e xile, Dema rtus, a bout the Greeks' willingness to fight. Demartus praised the Greeks, particularly the Spa rtans, a s fighting men and assured Xerxes that they would do battle.

Now t he s tory follows Xer xes' l ine of ma rch as, at city after city, he d rafted soldiers, increasing the size of his army all along his route. At last the Persian host came in sight of the mountains of Thessaly, where Xerxes reconnoitered the outflow of the River Peneus. Then he sent heralds throughout Greece, promising to spare those who accepted h is r ule b y sending him gifts of e arth a nd water. Several Grecian cities did this. Xerxes sent no heralds to A thens or to Sp arta, because heralds from Darius had been t hrown into a p it at Athens and a well at Sparta and told to get earth and water there. Herodotus then d igresses concerning the subject of the immunity of her alds from s uch treatment and the propensity of the gods t o pu nish those who d isregarded her alds' diplomatic status.

At this point, Herodotus expresses his opinion that Athens deserves most of the credit for saving Greece f rom P ersian do mination. A s u sual, t he Athenians sought advice from the oracle of Apollo at Delphi to guide them in their response to the Persian t hreat. A lso a s u sual, t he adv ice of t he oracle s eemed a mbiguous. I ts c entral m essages involved wooden forts and the island of Salamis.

The A thenian le ader, Themistocles, le d t he contingent w ho t hought t hat t he w ooden f orts alluded t o s hips (which he h ad b een p rovident enough to i nsist on bu ilding i n a d ispute w ith Aegina three years earlier) and that the island of Salamis might be an appropriate venue for a naval battle.

Herodotus t ells o f t he e fforts of e missaries from Athens and Sparta to enlist Gelo, a tyrant of Sicily, a s a n a lly. H e r eports t he failure o f t hat effort a nd G elo's d uplicity i n p reparing f or t he victory of either the Persian or the Greek side. In similar fashion, Herodotus reports other attempts by the Greeks to enlist allies and the outcomes of those missions. A mong the matters he de tails is the capitulation of the Thessalians to the Persians. B efore t hat c apitulation, however, it w as they who told the Athenians of the narrow pass that the Persians would have to u se through the mountains at Thermopylae.

Herodotus next details the numbers of Persian ships and troops that landed near Thermopylae. Herodotus's modern e ditors doubt the accuracy of the numbers he gives and estimate an invasion force of 300,000 men and about 750 ships. Only a f ew of t hose sh ips made l andfall, ho wever, before a three- day blow from the north wrecked the majority of the s hips of t he Persian fleet. Herodotus describes the fate of several ships that escaped the storm, and little by little, he approaches h is d escription of t he battle. H e r eports t he way that the Spartans held against the r epeated waves of P ersian attacks, and how t he P ersians were a t a d isadvantage b ecause of t he narrow pass and the greater length of the Greeks' spears. Then, however, Epialtes of Malis showed the Persians another route to the other side of the pass.

Learning that the Persians had found another way over the mountain and would soon be attacking, Le onidas, t he le ader o f t he Spa rtan t roops, released the other allies and prepared to resist the Persians w ith j ust h is own followers-men h e could count on to fight to the death. All the allies left, except the 700 Thespians and Thebans, who stayed t o fight b eside t he 3 00 Spartans-1,000 against the 3 00,000 Persians. The def enders a t Thermopylae fought to the last man. Xerxes was so incensed at having so few men seriously interfere with his plan of conquest that he uncharacteristically had the fallen body of Leonidas mutilated. Herodotus, in an afterthought, recounts the way that the news of Xerxes' plans for Europe had been smuggled into Sparta, and the seventh book ends.

Book 8

Named for Urania, the Muse of astronomy, Book 8 sh ifts its opening focus to t he war at sea that occurred simultaneously with the battles at Thermopylae. H erodotus en umerates t he a llies w ho furnished 378 ships to the Athenian fleet at Artemisium in Euboea, of which the Spartan, Eurybiades, w as su preme c ommander. Br ibes to t he Athenian Themistocles a nd to Eu rybiades overcame t he c ommanders' i nitial r eaction to flee when they saw the size of the fleet that the Persians were bringing against them.

A Persian t actic whose p urpose was to s eize the G reek fleet i n a p incers move ment f ailed when a storm wrecked the ships constituting one of the pi ncers' jaws. I n the m eantime, su perior Greek t actics whittled a way at the Persian ships comprising the other jaw. When the main battle was joined, the fleets were approximately equal in size.

The Persians and their allies had the worst of the battle, but the Greek losses were also numerous. L earning of the out come at Thermopylae, the G reeks had a g roup of she pherds l ight

322 Histories, The

numerous fires to deceive the Persians, and then they launched their remaining ships by night and withdrew to safer waters.

Herodotus next relates the skirmishes between the loyal Greeks of Phocis and the Greek allies of the Persians. He also recounts the Persian advance toward Athens and the army's pillaging. He then reports the apparently supernatural events that took place as the Persians were about to pl under the temple of Ap ollo at D elphi. Weapons stored inside unaccountably moved themselves outside, and two p eaks of Mt. Oly mpus de tached t hemselves amid lightning and thunder, burying many Persians i n t he r esultant l andslide a nd c ausing the remnant to withdraw.

Meanwhile, t he At henians and th eir a llies continued m ustering t heir fleet a t Sa lamis. Simultaneously, in the city of Athens itself, news came t hat the Peloponnesians (Supporters a nd neighbors of Sparta on the Peloponnese peninsula) had de cided n ot to t ry to def end A thens but rather to resist the Persians at the isthmus of Corinth. This caused most citizens to leave the city, save t heir f amilies, a nd have able-bodied men joi n the fleet. That fleet, when a ssembled, was formidable.

A few Athenians remained behind and, as long as they were able, defended the Acropolis. Eventually, however, some Persians succeeded in scaling the rocks, killed the defenders, robbed the temple of Athena, and set everything afire.

Turning a gain to t he fleet at Sa lamis, H erodotus r eports t he a rguments of Themistocles of Athens that did not quite persuade the commanders of t he s quadrons of o ther c ities to r emain together and enjoy the advantage that fighting in the narrows gave the Greeks.

A similar council was taking place among the Persians, all of whom favored fighting the Greeks at s ea e xcept for He rodotus's c ountrywoman, Artemisia, who counseled against a s ea fight. At this point, Herodotus whets the reader's anticipation for the outcome of the Battle of Salamis by digressing at some length to consider the preparations of the Peloponnesians to resist the Persian ground forces. Finally, t o fo rce t he Gr eek c ommanders to implement h is pl an, Themistocles s ent a spy to the P ersians with a f alse m essage: The Gr eeks planned to d isperse. B elieving t he spy, t he P ersians moved their ships to blo ck the Greek fleet, thus denying free passage to a ny who would sail away. This forced the Greeks to adopt Themistocles' plan.

The battle was long a nd bloody, and Herodotus lingers over the details-including one about the extraordinary bravery of his favorite Persian ally, Artemisia, in ways that suggest his greater interest in military action by seat han by land. Suffice it to say here that the Greeks won a signal victory. That t riumph c onvinced X erxes that retreat was in order lest his bridge over the Hellespont be destroyed and his forces stranded on the Eu no pean side. He set about deceiving the Greeks a bout t his i ntention, ho wever, a nd s ent messages by the Persian equivalent of the Pony Express-the most rapid message system of the ancient world-to the capital at Susa, informing citizens there of his misfortune. (A fo otnote of interest: Herodotus is the source of the motto of the United States Postal Service. "Neither snow nor rain," the historian says, nor "heat nor darkness" kept the Persian riders from getting through at full speed.)

When the news was dispatched to Susa, the general M ardonius who had adv ised Xer xes to undertake the European campaign feared that he might shoulder the blame. He therefore counseled Xerxes to go home and let him, Mardonius, take over i n E urope, promising to subdue the Greeks. A sked f or her o pinion on the matter, Artemisia supported M ardonius, saying that i f he failed, it would be no great matter. By destroying A thens, Xer xes had ac complished w hat he said he would.

Now He rodotus r eports ho w Themistocles, playing b oth en ds a gainst t he m iddle, ac cepted his subordinates' a dvice not t o d estroy t he P ersians' bridge ac ross t he H ellespont, lest the P ersians, denied a road home, resume their ambitions. At the same time, Themistocles sent an embassy to Xer xes, explaining that he had p ersuaded the Athenians not to destroy the bridge. Thereby the Athenian leader built a r eservoir of gratitude in Xerxes that would later prove useful.

The Persians marched away to Thessaly, where Mardonius selected the men who would stay with him, and Themistocles led the navy a round the Greek i slands, dema nding m oney f rom t heir inhabitants t o f orestall i nvasion and e nriching himself thereby.

On its 45-day forced march back to the Hellespont, fa mine, pl ague, a nd dy sentery b eset t he Persian forces returning with Xerxes. Those who arrived su ffering f rom s tarvation f ound t hat a storm ha d b roken t he b ridge, a nd t hey had to cross by ship. Once on the A siatic side and provided with food, many ate immoderately and died when their systems could not stand the shock.

A detachment of Persians under the command of A rtabazus returned to Eu rope to s trengthen Mardonius's f orces. Ma rching to ward Thessaly, they besieged the cities of Olynthus and Potidea. What must have been a tidal wave wiped out the majority of t he P ersian b esiegers, b ut i n sp ring 479 b.c.e., a stalemate was reached. The Persians remained to the east of the island of Samos, and the Greeks remained west of the island of Delos. "Between t hem," s ays H erodotus, "w as a spac e guarded by fear."

Herodotus's eighth book ends with an account of the Persian Mardonius's failed attempt to made a s eparate t reaty w ith t he Athenians—a t reaty that would have imperiled the whole of Greece.

Book 9

Perhaps t he e ditor w ho na med H erodotus's ninth book for Calliope, the Muse of epic poetry, had in mind setting the historian's work on a par with the great epics of Homer. In any case, the final book in *The Histories* details the reoccupation of t he A thenian r egion of Attica and the second destruction of A thens at P ersian hands only 10 months after the first—a second destruction in part assured by the tardy response of the Spartans to A thenian ple as for a ssistance. S eeing that resistance was pointless without Spartan h elp, t he A thenian p opulace o nce m ore withdrew to Salamis, leaving a n e mpty city to Persian wrath.

Herodotus also reports a banquet at which the citizens of the Greek city of Thebes entertained the officers of the Persian a rmy. He describes a conversation in which one of the officers predicts disaster for the Persian army based on prophecies of which he and his fellow officers are aware, but to which Ma rdonius will n ot listen. "The m ost hateful of men's troubles," remarked the Persian, "is to have the wit but not the power."

Eventually the Spartans decided the time was ripe to face the Persian power once again, so with allies f rom th e P eleponnesus a nd o thers, t hey marched into the region of Boetia. After feints and counterfeints, initial successes by Persian cavalry, the Persian interruption of the Spartan supply line, and the steadfastness of the Spartans in preventing a general Greek withdrawal, the battle of Plataea began in earnest. Herodotus now gives to a land battle t he s ort of loving attention he had e arlier lavished on the sea battle at Salamis. He describes the order of battle of the armies, digresses to detail earlier battles in which various groups of combatants had participated, relates the oracles of each side a nd t heir i nterpretations, a nd r ehearses t he discussions held in the tents of the generals.

At Pl ataea, G reek t actics pr oved su perior to Persian p ower. As is often t he c ase with selfconfident military powers, the Persians underestimated the skill, courage, and resolution of their enemies. F ighting f rom horseback, t he P ersian general Mardonius was killed. His loss threw the Persians i nto a panic. Moreover, a s t he Persians fought without armor, they were no match for the heavily armored Spartans, despite their superior numbers. The Persians fled, and the Greeks pursued them, hewing them down as they ran. The carnage was immense, and the Persian dead lay in heaps u pon t he battlefield. Of 300,000 Persians, 40,000 led by Artabazus e scaped. Of the others who engaged in battle, fewer than 3,000 survived. Only 159 Greeks fell at the battle of Plataea.

Then H erodotus r eports t he de eds of s everal notable i ndividuals, t he d isappearance of t he

body of Mardonius—apparently secretly buried and the richness of the plunder that fell into the hands of the Greeks. He recounts as well the punishment of Thebes, w hose s oldiers had f ought with the Persians, and the escape of the Persian general A rtabazus to As ia with the remnant of the soldiers he led.

The historian turns his attention once more to the fortunes of the Greeks at sea, among the Ionian islands, and in Asia Minor, where the Greeks won another great battle on land and sea at Mycale near E phesus on the same day of the victory at Platea (479 b.c.e.). There the Greeks de stroyed both the Persian fleet and the Persian army.

Turning from warfare to a tale of love, betrayal, intrigue, and revenge, Herodotus details a love affair b etween Xerxes and his daughter- m- hw, Artaynte, the wife of Darius, and the bloody result of the liaison as Xer xes' wife a venged the insult on a wom an she k new to ha ve b een t he gobetween in the affair.

Herodotus concludes the final book of his history by describing the Greek mopping-up op erations in A sia M inor, d igressing occasionally to speak of r elevant ma tters f rom t he d istant pa st. Or g rized principally around the central theme of the enmity between the Asians and the Europeans, Herodotus's work weaves a vast tapestry of historical e vents, t he del iberations a nd de ceptions of powerful perso ns, g eography, et hnography, t ales told in the expansive manner, myths that Herodotus recognizes as such, comparative reports of the same incidents from t wo or more points of view, portents a nd p rophecies, a nd c harming d igressions that, in the mind of the author at least, seem always relevant to his themes and interests.

History of the Former Han Dynasty

(Hanshu, Han Shu) Ban Gu, Ban Biao, and Ban Zhao (ca. 50 C.E.)

To a considerable degree, History of the Former Han Dynasty is modeled on the Shihji (Shi- hi) (Records of th e Grand Historian) of Sima Qian (Ssŭ- ma Ch'ien). Just as Sima had continued his father's history, Ban Gu's (Pan Ku's) book continues work begun by Ban Gu's father, Ban Biao (Pan Piao). From Sima, Ban Gu b orrowed his general plan o f o rganization, i ncluding a nnals, b iographies, chronological tables, and treatises, punctuated occasionally with songs and poems. Although almost half of Ban Gu's history simply reproduces the Records of the Grand Historian, it nonetheless contains cer tain in novative f eatures. I t is, for instance, the earliest Chinese work of history to focus exclusively on a n a ccount of a single dynasty.

Beyond that focus, in the sections that he originated, Ban Gu m ore carefully followed h is primary s ource ma terial t han h is p redecessor historian had done. As the literary historian William Nienhauser, Jr., suggests, this care app ears especially i n Ba n Gu 's b iographical p ortraits, where he is at pains to achieve accuracy. His organi zation of that bio graphical material, however, attempts to i llustrate overarching p oints a bout the moral characters of the figures he memorializes. F or e xample, he g roups together h is p ortraits of persons who used trickery and deception to accomplish their political ends and who were later discovered and punished. He then contrasts those figures with others who achieved their ends by more admirable means and prospered. As an historian, Ban Gu strives for greater realism than did Sima Qian, but in the process he lacks some of Sima's power to use biography for illustrating general historical trends.

Probably because of the virtual identity of long sections of Ban Gu's work with parts of the *Rec*-

ords of the Grand Historian, as of this writing the entire History of the Former Han Dynasty has not been translated into English or any other Western European language. Important sections of it have been, however, and in these partial translations the interested English speaker can learn of such matters as the early political role of China in Central Asia or about the circumstances surrounding the r ise t o p ower of t he u surping r uler W ang Mang (ruled 9-23 c.e.). One can see an example of Ban Gu's biographical style in a translation of a section on Yang Xiong (Yang Hsi ang). On e can also d iscover i nformation c oncerning t he d iet and the coinage in the former Han dy nasty, as well a s t he s ocial distinctions between t he el ite and the common people

Songs, too, sometimes appear in Ban Gu's history. On e c harming o ne is a ho mesick s ong o f lament by a young bride who has b een married off to t he k ing o f Wu-sun—a yurt-dwelling nomad whose language she cannot speak. Another is a song of mourning sung by the parents and townspeople of a group of young men whose bad behavior had r esulted in their being rounded up by the lo cal authorities and cast into a s ealed pit to die.

Ban G u h imself m et w ith a l amentable f ate. Suspected of b eing i mplicated in the treasonous activities of a g eneral, he w as i mprisoned f or "investigation"—presumably b y torture. H e di d not survive his ordeal, and sections of the "Treatises" and "Chronological Tables" of h is h istory remained u nfinished. The em peror s olved t his problem by s ending f or B an Gu's sister—Ban Zhao (Pan Chao). A typically for a w oman of the period, she was a c ompetent s cholar in her o wn right. The emperor ordered that Ban Zhao finish the work and in struct other Han s cholars in its meaning and u tility, which sh e d id. B an Z hao survived until about 116 c. e.

Homer (fl. eighth or ninth century B.C.E.) *Greek epic poet*

Several l ocations f or H omer's b irthplace ha ve been proposed. These include Smyrna, Ioma, Asia Minor, and elsewhere, but n o certainty attaches to any of these possibilities. Scholars have generally rejected the suggestion that Homer was blind. More likely are claims that he resided for a lo ng time in Chios and that he d ied on the island of Got. Certainty on any of these matters may never emerge.

Though s ome h ave argued a gainst h is e xistence and others against h is authorship, Homer is traditionally cr edited with having composed two epic poems on subjects connected with the

326 Homer

Trojan W ar (ca. 1 200 b.c.e.) and its a ftermath. *The Ili ad* derives its title from Troy's other name, Ilium or Ilion, in honor of the city's found e, Ilus. *The Iliad* is set during the last year of the 10-year war and f ocuses on t he c onsequences a rising from the anger of the Greek warrior hero, Achilles. The p oem a lso i nterweaves a m oving d iscourse t hat r ecounts t he c onditions w ithin th e besieged city, the state of mind of many of Troy's inhabitants, an d a ccounts of e pisodes d rawn from the war itself.

The Odyssey recounts the adventures of one of the Greek generals, Odysseus, king of Ithaca, as h e n avigates t he M editerranean S ea in an extended, thrill- packed, a nd d angerous v oyage home. The p oem a lso e xamines t he pa ssage o f the hero's son Telemachus from boyhood to manhood a nd de tails t he s trategies a nd t actics o f Odysseus's faithful wife, Penelope, as she holds at bay a pack of suitors who want her to ac knowledge that her husband must be dead and to marry one of them.

The oldest extant poems in any Western Europe an language, Homer's works establish the model for all subsequent epics in the Western tradition. Like Homer's, the succeeding epics begin in the middle of the action, are populated with gods and heroes, make use of flashbacks, involve a journey to t he u nderworld, a nd co nsider ma tters o n a grand scale-matters of national, international, or even universal importance. Their language is elevated, and the style of their versification is dignified. Homer chose dactylic hexameter as the meter that approximated the cadences of ordinary language and also imparted to h is verse an underlying structure t hat e stablished a r eader's m etrical expectation (see quantit at ive verse). A reader or listener grew to an ticipate a certain metrical pattern, and, by subtly varying h is style, H omer could satisfy his reader's expectations or achieve a pleasing surprise.

Homer worked at a moment that either coincided w ith o r sl ightly a nticipated t he Gr eeks' adoption of t he a l phabet to re cord their l anguage. In the texts as they have been transmitted

to u s, s cholars h ave d iscovered e vidence of a n or al - for mul aic tradition. In the formation of both Western and non-Western epic poems, it appears t hat ol der, sho rter s tories a nd le gends coalesced into lengthier ones. The episodes that comprise The Gilga mesh Epic seem to have come together b y a si milar p rocess. S ometimes t his collecting of stories was done by country poets and s ometimes by profe ssional e ntertainers. Many speculate that Homer was one of the entertainers who, while accompanying themselves on a stringed i nstrument, a mused t he a ristocratic classes by reciting or singing lengthy retellings of the a ccomplishments of t he he arers' f orebears. The poems' length posed no impediment to their memorization a s t his fe at w as rout inely a ccomplished by s chool c hildren for more t han 1,000 years.

Once the texts of such performances had been written down, they became largely fixed, and the surviving versions passed from generation to generation, usually without major revision. The evidence of a preceding oral tradition, however, can be observed in often- repeated phrases that a performer could have used to fill out the verse expectations of lines or as aids to memory. In Homer, such epithets as "rosy-fingered dawn" or "Odysseus, son of Laertes" occur with some frequency and suggest oral per for mance.

Over the centuries, Homer's readers, perhaps yielding t o th e t emptation o f r eading th e author's biography into his work, have occasionally identified the poet with the blind entertainer Dem odocus, w ho si ngs a tt he c ourt o f Alcinous. That identification has sometimes led to the assertion that Homer was himself blind. However, du ring t he p eriod 1 870-81, w hen Heinrich S chliemann u ndertook to find a nd excavate the ruins of Troy and the subsequent communities t hat had o ccupied i ts si te, t he descriptions of la ndmarks i n h is copy of The Iliad helped him identify the mound of the citadel. Perhaps a sig hted Homer, too, had v isited the famous battlefield some 400 years after the war and some 2,200 before Schliemann.

It s eems t hat the early Greek p oet H esiod, working shortly after Homer, knew the Homeric poems and attributed them to Homer's hand. A number of e mulators of Homer's manner, c ollectively k nown a st he H omeridae, a lleged their descent from Homer and worked as entertainers. Skeptics about the existence of a single poet named Homer sometimes at tribute to the Homeridae t he a uthorship of t he Home ric epics.

Homeridae (Sons of Homer)

The word *Homeridae* refers to a group of kinsmen living on the island of Chios off the coast of Asia Minor. The na tives of C hios i nsisted t hat t he island was the b irthplace of Homer, and the Homeridae c laimed de scent f rom t he a ncient poet. Horace (Quintus Horatius Flaccus) (65 B.C.E.–8 C.E.)

Born Quintus Horatius Flaccus on December 8, 65 b.c.e., to the family of a manumitted slave in the community of Venusia, s outh I taly, H orace must have been a child of unusual promise. His father collected payments at t ax auc tions, w as probably p aid on c ommission, a nd a pparently accumulated a substantial estate. It was enough that h e could afford t o g ive Horace a first- nate education, sending him first to Rome, where he studied with the teacher Orbilius Pupillus. Horace reports that Orbilius did not spare the rod in supervising the boy's education.

Horace next traveled to Athens to continue his studies. The Roman Civil Wars began while Horace was there, and he joined the army of Marcus Iunius B rutus, r eceiving a c ommission a s a tribune—a post that made him a commander of a cohort of cavalry. When the forces of Mark Antony a nd O ctavian (later to be come Rome's first emperor, August us Ca esar) defeated Brutus at Philippi in 42, Horace fled and, on his return to Italy, formally submitted to the victors' authority. He d id n ot e scape p unishment f or ha ving su pported the losing side and was stripped of all his Venusian property.

Perhaps through his Roman connections, Horace ma naged to s ecure a p ost a s a c lerk i n t he

office of t he quaestor—a c ivic ma gistrate. H e began to s upplement a slender i ncome b y p ublishing verses. His success as a poet brought him to t he attention of Virgil a nd of t he t ragedian and epic poet Varius Rufus. They in turn brought Horace into the circle of poets generously patronized b y A ugustus Caesar's p rincipal m inister, confidante, and counselor, Gaius Maecenas.

Maecenas was an enlightened literary patron who understood that gifted authors need time and leisure to w rite. C ertain of H orace's g ifts after t he a ppearance of t he first book of t he poet's Satires (35 b.c.e.), around 33 b.c.e. Maecenas conferred on the young man an i dyllic property known as the Sabine Farm in the valley of the Licenza River. Relieved of financial necessity by the farm's produce, and inspired by the property's b eauty to w rite s ome of h is mo st charming v erse, H orace passed a p roductive bachelorhood on the estate. He became a friend of A ugustus C aesar and the semi-official poet laureate of his court, but he declined the emperor's suggestion that he become his confidential secretary.

Horace's s econd book of *Satires* appeared around 30–31 b.c.e., as did a collection of epodes in which he brought together both newer works and s ome of his e arlier w riting. I n 2 4 b .c.e. appeared the first three books of Horace's famous *Odes*, w hich t reated t he p oet's r eflections o n contemporary R oman h istory. The l ast of t he *Odes*, t he 3 0th of b ook 3, r eveals t hat H orace knew exactly how to v alue h imself as a p oet. "I have," h e w rote, "completed a m onument m ore enduring than bronze."

The next year, Horace announced that he was retiring from active participation in the Roman literary s cene to s tudy p hilosophy. P erhaps h is military service had deprived h im of an opportunity to do so at Athens. It is, however, unclear that the s tudy of p hilosophy b rought h im t he sorts of benefits that he expected. When he emerged from h is self-imposed e xile f rom t he r ealm of poetry, he became essentially what he was before: a "spokesman... for education, culture, and sanity," to borrow the words of Horace's biographer, Kenneth J. Reckford.

Horace r eturned to his tasks as a writer, and the year 20 b.c.e. saw the appearance of the first book his *Epistl es*. That year was a lso the most likely da te for the appearance of the work that posterity has dubbed his *Ars Poetica* (*The Art of Poet ry*). In 17 b.c.e., Horace composed a series of secular songs (*Carmen Saeculare*) to be performed at the s ecular ga mes of the city of Ro me. In 1 3 b.c.e., the fourth book of his *Odes* appeared, a s did *Epistles*, book 2, part 1.

Horace died on November 27, 8 b.c. e. Posterity is fortunate that Horace was among the subjects treated somewhat over a century after h is de ath by the Roman biographer Sueto nius. According to Suetonius, Horace was short, portly, and, after a y outh d uring w hich h is c urling bl ack lo cks moved m any a y oung w oman's he art, he w ent prematurely gray.

One can hardly overstate the influence of Horace's t aste, g ood se nse, a nd poet ic ma stery, n ot only on the expansion of the capacities of Roman verse for subtlety of expression, but a lso on the subsequent course of E uropean and Am erican letters. H is work b ecame the model for a nd the standard t oward w hich s uch E nglish p oets as Alexander Pope and John Milton strove. They, in turn, were models for later practitioners of the art of poetry in the English language.

"How a Man May Become Aware of His Progress in Virtue" Plutarch (first century C.E.)

In this essay from h is *Mor al ia*, add ressed to h is Roman friend, Quintus Sosius Senecio, Pl ut a r ch attacks t wo principles t aught by Stoic philosophy (see St oicism). The Stoics argued, first, that only a wise person could be virtuous and that both wisdom and virtue were acquired instantly and simultaneously in a sudden transformation of a person's life. Second, they maintained that any small imperfection in either wisdom or virtue ruined the entire edifice of a person's goodness and right thinking. Dissenting f rom t hat v iewpoint, P lutarch m aintains that acquiring both wisdom and virtue proceeds b y st ages, a nd t hat p eople c an r ecognize marks of their own progress.

Successful vigilance against vice in its various seductive forms is o ne mark of progress on the road to v irtue, s ays P lutarch. A m ore s erious demeanor and greater de dication to the task at hand in a course of study together with a greater compulsion to pursue it provides a sure indicator of the acquisition of wisdom. So does a calm and equable disposition—one s low to a nger a nd patient in pursuit of virtuous goals and the acquisition of knowledge and good judgment.

The c apacity, to o, to hol d de pression a t ba y when progress is slow and d ifficult is a mark of wisdom. So is a gentle and reliable manner of dealing with others, particularly when one d isagrees with them. Plutarch also counsels tracking one's words a nd a ctions t o b e s ure t hat "usefulness" rather than "ostentation" characterizes t hem. Also, a person should have no need of the opinions or praises of others to take pride in his good deeds. The deed itself is the good and wise person's adequate reward. The more advanced one becomes in wisdom and in virtue, the less will be their conceit and the lower their opinions of themselves.

The wise and the good also do not shrink from the c riticism a nd r eproof o f o thers w hen t hey have b een foolish or v icious. Rather, t hey ad mit their mistakes and seek such help as may be necessary to rectify them. Wise persons listen to the accusations of their revilers as if their best friends were praying for their success.

Plutarch a lso c onsiders the d ream life of t he wise and virtuous to be a mark of progress on the road to perfection when the dreams become free of v icious a nd f oolish matter. S atisfaction w ith one's lot in life is another mark of wisdom and virtue. So is acting on one's judgments about what needs doing rather than simply talking about it.

Imitating persons one admires for wisdom and virtue provides another indicator that a person in on the right road. So is the ability to approach an admired person without fear and to seek that person's advice—or, in the person's absence, to a sk the question: "What would P lato, L ycurgus, o r whoever else one admires for wisdom and goodness have done?" If answering that question keeps one on the path to wisdom and virtue, Plutarch considers it a sure sign of progress.

Finally, a person who seeks to be both wise and good will consider all faults, great or small, as e qually worthy of at tention and will s trive first to diminish them and at last to obliterate them altogether.

"How to Profit by One's Enemies"

Plutarch (ca. 96 c.E.)

Originally g iven as a s peech, t his essa y (from *Mor al ia*), a ddressed t o P lutarch's R oman friend, Cornelius P ulcher (a civil ad ministrator),

330 Huainanzi

takes i ts t itle f rom a r emark o f X enophon o f At hens on the same subject. An enemy, says Pl uta r ch, is ever alert to find some flaw in one's life that th e e nemy c an s eize u pon to do a p erson harm. Recognizing this, it behooves one to lead as flawless a life a s possible so that the enemy may not t ake a dvantage of on e's m istakes, v ices, a nd failures.

Second, Plutarch advises people to t reat their enemies k indly. At t he s ame t ime, o ne sho uld become a cquainted with an e nemy's flaws a nd vices and then compare oneself with the enemy to see if some of the same flaws and vices persist within oneself. If so, o ne sho uld be at pains to root t hem out. S ome h ave a rgued, for example, that during World War II, the Allies lost a good deal of moral authority when they emulated the Nazi pr actice of firebombing c ivilian p opulations. A similar loss of virtue might be thought to attach to the practice of torture.

Moreover, says Plutarch, when an enemy reviles a person, it can have the effect of turning that person from error if what the enemy says is true. If what the enemy says is false, Plutarch nevertheless advises a t horough self-examination o f o ne's behavior to see what might have given rise to the calumny. The b est t hing to do w hen a n en emy reviles on e is to r emain si lent. Thus, o ne gains practice in patient forbearance and profits from the enemy's hostile behavior.

Responding to an enemy's hostility with kindness may sometimes negate the enmity and produce an advantage for everyone. Moreover, if one deals k indly w ith o ne's en emy, o ne r einforces benevolent behavior in oneself in general, reducing quarrels and thus benefiting all.

Finally, Plut arch a dvises h is r eaders to s tudy an enemy's successes as well as his failures. Thus, one may improve oneself by imitating the former and avoiding the latter.

Early Christians approved very highly of this essay, and it was among the reasons that some of them prayed that the soul of Plutarch might be excepted f rom t he u niversal ex clusion f rom Heaven thought to be the fate of non-Christian people.

Huainanzi (Huai-nan Tzu) Liu An

(139 b.c.e.)

The Ha n dy nasty of t he s econd c entury b.c.e. encouraged scholars to engage in the intellectual enterprise of attempting to c onstruct a t heory of the fundamental na ture of the universe-a cosmology-that would be consonant with the principles of Daoism. The lo cal k ing of Huainan, Liu An, undertook meeting this challenge by having his scholars bring together a series of treatises a ddressing the s ubject. The r esult o f their e ffort, t he Huainanzi, contains a t hird chapter en titled Tianwenxun "(Tien wen h sün; Treatise on t he p atterns of h eaven). At first, a s the literary historian Michael Pruett explains the chapter's content, all was formless. From archetypal f ormlessness, t he u niverse shap ed i tself into qi (ch'i)—a substance c omposed o f pa rts with varying compositions. The subtler constituents of *qi* drifted u pward a nd became h eaven. The he avier bits settled downward and became earth. The essences of heaven and earth emerged and became yang and yin-the archetypal masculine and feminine principles of t he u niverse. These principles then interacted, producing fire, water, the seasons of the year, and the other characteristics t hat g ive t he u niverse i ts f orm a nd content. All of this occurred spontaneously without the necessity of supernatural intervention of any sort.

Moreover, a ll p arts of the r esultant u niverse are linked. A stimulus in one sector will stimulate a response elsewhere—a principle eerily supported b y t he d iscoveries of mo dern science. As human beings are a part of this universal mix and also take part in its essential nature, a truly wise person will seek to act spontaneously and in consonance with cosmic harmony. Elsewhere in the work, Liu An's scholars caution t heir r eaders a bout t he m istakes a nd t he superstition t hat had c rept i nto C onfucian do ctrine over time. Using careful principles of textual criticism, for instance, they demonstrated that the supernatural behavior of pigs in a widely circulated Co nfucian s tory had o riginated w ith a misreading of a Chinese graph that named a day but was similar to a c haracter used for the word *pig.* The scholars ad monish t he C onfucian t rue believers t hat v enerating ancient t exts i s a le ss reliable guide for human affairs than examining matters in the light of log ic. This is particularly true for the art of ruling a nation—the topic that most centrally concerns the *Huainanzi*.

hubris

Overweening human p ride, o r hubris, was the characteristic that the gods in ancient Eu rope an literature f ound m ost ob jectionable. H ubris invariably led those who displayed it into difficulty. Homer's Odysseus, for instance, after having been given a favorable wind to s end him home to I thaca, attempted to e xceed t he c apacities o f human beings by refusing to allow any but himself t o h andle t he sh ip's t iller w hile he s tayed awake nine days and nights. He also kept to himself the knowledge that a bag he had b rought on board contained all the unfavorable winds. Finally and inevitably, within sight of his goal, Odysseus dropped, exhausted. His crew, thinking that Odysseus meant to keep a t reasure concealed in the bag for himself, opened it. All the imprisoned winds rushed out at once, producing a hurricane

that blew the ship back to its starting point on the island of Aeolia.

Because Homer's *Odyssey* is essentially comic, that e pisode is o nly one of a series of setbacks Odysseus experiences be fore r eaching h is h ome in Ithaca and recovering his former kingdom and his family. Such, however, is not the case for those who display hubris with tragic outcomes.

We find such a figure in Sophocl es' tragedy *Oedipus T yr annus*. There O edipus i magines that he can identify the killer of the former king of At hens and free the city from the curse of a plague that is afflicting its citizens. Although the prophet T eiresias warns O edipus n ot to p ursue the matter, h is confidence in h is own capacities eventually destroys h is happ iness when he d iscovers that he himself is the cause of the plague. He learns that he is the murderer of his father and is also the incestuous husband of his mother by whom h e ha s fa thered ch ildren. H is w ife a nd mother I ocasta commits su icide, a nd O edipus blinds himself and goes into exile.

As many a tragic hero in the Greco-Roman world discovered, the gods will punish hubris.

hymns to Zeus, Apollo, Artemis, and

others Callimachus (ca. 285 B.C.E.) In the first of h is hymns, "To Z eus," Callimach us b egins by a sking ho w o ne c an p raise t he king of the gods. The poet then rehearses the god's sometimes-disputed history: Was Zeus born on Crete or in Arcadia? "Cretans are always liars," Callimachus decides and opts for Arcadia, upon whose then-waterless wasteland t he T itaness Rheia (the earth) bore her son by Chronos (time). (See also Tit ans.) In the instant of Zeus's birth, the parched plain brought forth water to wash the mother and her n ewborn. From A rcadia, Callimachus traces Zeus's journey to Crete, where he was hidden from his father, who had e aten all his p revious offspring. The p oet r ecalls Z eus's upbringing a nd the w ay th e d emigods c alled Kuretes beat up on their shields so that Chronos would not hear the baby crying.

332 hymns to Zeus, Apollo, Artemis, and others

Commenting on the beauty of the god in childhood, Callimachus passes quickly on to consider the question of Zeus's victory over Chronos and his leadership of the other Olympian gods. That leadership was owing to strength and power, Callimachus concludes, and for that reason Zeus is the exclusive p atron of k ings a nd t he r ulers of cities.

Having e stablished t hat p atronage, C allimachus points out that Zeus has not equally honored and e nriched a ll k ings, a nd he c hooses t his moment to slip into his hymn to the king of the gods a compliment to the poet's own ruler, P tolemy I I. A lso c alled P tolemy P hiladelphos, t hat king h ad h onored t he p oet w ith a r esponsible position i n the library Ptolemy bu ilt at A lexandria. His own earthly king, Callimachus assures us, is b y f ar p reeminent i n p ower a nd w ealth among the rulers of the earth, and his projects are accomplished immediately. Callimachus ends his hymn with a double salute to Zeus and a p rayer for both goodness and wealth since wealth alone is worthless and goodness "needs substance."

Callimachus's second hymn, "To Apollo," celebrates the patron deity of archers and poets, the deity who draws his power from the right hand of Zeus. Among the aspects of Apollo that Callimachus praises are some that later appear as characteristics of Christ. In addition to carrying out the will of Z eus, A pollo i s c alled "pastor," a she pherd, and he is the god of light. Callimachus also celebrates Apollo's role as a founder of cities. He links that detail to his own ancestor Battus-a general with the same name a sC allimachus's father. The el der B attus f ounded C yrene i n Libya-the city of Callimachus's birth. The poet further links his own profession as a cataloguer of books to Ap ollo, mentioning that the god is indexed under Boëdrómios, Klários, and Karneîos. Libyans l ike hi mself especia lly, C allimachus asserts, honor the god.

Callimachus's t ranslator, S tanley L ombardo, suggests that the hymn's final stanza enlists Apollo as the poet's ally in support of short, pithy, and allusive poems instead of long epic ones. The allegorical figure Envy whispers in Apollo's ear that Envy is "charmed by the poet who swells like the sea." Lombardo glosses this line as implying that those w ho a re je alous o f C allimachus's p oetic skill suggest to Apollo that they prefer poets like Homer, w hose work is as copious as the ocean. But A pollo r eproves this p oint of v iew. The g od suggests t hat t he flow o f t he r iver Eu phrates, though a bundant, a lso c arries m ud a nd r efuse. The poets, who are like bees, the makers of honey and wax, are responsible for producing the honey's sweetness and light from beeswax candles, though their p roduction be a s sl ender a s " the t rickling dew" from the height of a holy spring.

Callimachus's c harming "Hymn to A rtemis" opens by reminding the reader that poets do well not to neglect the goddess of the hunt and recalls that beyond hunting, she enjoys dancing. Then the scene shifts, and we find a preteen goddess, sitting on t he k nee of her f ather Z eus and b egging for privileges and gifts. She wants to stay a virgin forever a nd be k nown b y a s m any names a s h er brother Apollo. She wants a bow and arrows—not too fancy a set. She describes the clothes she wants to wear a nd r equests c ertain c ompanions. These include 60 nine-year-old sea nymphs, daughters of Ocean, as dancing girls, and 20 wood nymphs as maids and dog tenders after the hunt.

Artemis wants all the mountains in the world and one town. She promises to fulfill her destiny to relieve the pangs of women in childbirth since she herself caused her mother no pain.

Zeus is so pleased with his little daughter that he grants her all she asks and gives her 30 cities, not just one, for her self alone, and several other cities and islands to share with other deities. He also makes her the patron deity of harbors and roads.

Artemis n ext g oes tr aveling to c ollect her father's gifts. She gathers her retinue and goes off to Mt. Et na to w atch the three Sicilian Cyclopes fashion her weapons. She n ext s tops at A rcadia, where Pan presents her with hunting hounds. She then c atches four of five golden-horned de er to pull her chariot.

Once he has her fully equipped, Callimachus sings briefly of each of the major episodes associ-

ated with the myths featuring Artemis. He ends his poem with a greeting and a p rayer that she will hear his song and receive it graciously.

Other e xtant h ymns of Callimachus i nclude one a ddressed to t he i sland of Delos—the birthplace of Apollo, another entitled "The Bath of Pallas [Athena]," a nd a t hird add ressed to Dem eter, the goddess of corn and patron of agriculture.

Aware t hat few modern English readers have the qualifications to read Sappho in her original

dialectical Greek, Margaret Reynolds, in her discussion of t he p oet, ha s p rovided f or c onsideration not on ly S appho's Aolic G reek d ialect but also several English renderings of Sappho's song. Among those Reynolds offers, the translations of Mary Barnard (1958) and Suzy Q. Groden (1964) strike me as coming closest to catching the music of Sappho's verse.

The poet begins her song by invoking the goddess A phrodite and inviting her to c ome in her sparrow-drawn chariot from the throne of Z eus to S appho's aid. The goddess app ears and, sm iling, asks Sappho what her heart (called "mad" by one t ranslator and " distracted" by t he other) wants now.

The goddess, of course, already knows the answer to that question and promises that the woman who currently flees Sappho's love will soon become the pursuer and that, if the goal of Sappho's quest now rejects Sappho's proffered gifts, she soon will offer gifts of her o wn. The goddess promises that if the object o f Sappho's a ffection d oes n ot c urrently return Sappho's love, she w ill do s o s oon, e ven i f that occurs against the beloved's will.

In the poem's final stanza, the poet again asks the goddess to be her ally in pursuit of the object of her affection.

Idylls Theocritus (mid-third century B.C.E.) Though more than 30 poems have traditionally been i ncluded i n T heoc r it us's Idylls, 2 0thcentury scholarship has reduced the number for confident attribution to the 22 cited in this entry. These poems fall into a variety of subcategories: pastorals, encomia, laments, hetero- and homoerotic love songs, myths, and so on. Some editors and translators group them by type or theme in their e ditions. I n t he f ollowing de scriptions, however, to obs erve the ancient poetic value of variety as an effect that poets actively sought, I shall follow the translator Robert Wells's example, using traditional order and enumeration for the 22 poems now thought to b e from Theocritus's pen.

"Idyll 1: The Passion of Daphnis" is set in the countryside of Sicily. The she pherd Thyrsis and his companion, a goatherd, have been involved in a f riendly c ontest of c omposition. The p oem opens with Thyrsis speaking and suggesting that the goatherd, inspired by the god Pan, has already won t he p rize. The go atherd ob jects, ho wever, saying that on the contrary, Thyrsis, inspired by the Muse s, has won for a song he just sang in an earlier match with a Libyan named Chromis, and he must take the prize for his song, "The Passion of Daphnis." If Thyrsis will sing the song again, the goatherd will give him a g ood milking goat and a beautiful carved wooden cup. The goatherd describes the carved wonders of the cup at length in language that reflects its extraordinary beauty. Then, reminding Thyrsis that "Hades and forgetfulness are the same," the goatherd asks the shepherd to sing.

Calling on the Muses for inspiration, Thyrsis complies w ith a lovely e legy c ommemorating the d eath of Daphnis—a shepherd whom Theocritus credits w ith the invention of past or al poet ry. The poem imagines the dying Daphnis's farewells, d isjointed b ut lovely g oodbyes, a nd quasi-delirious observations to the mourners present at his death. After each stanza of two to six lines each, the singer invokes the Muses in a refrain calling on them to sing for the departed poet-herdsman.

At length, Daphnis dies and falls silent. Aphrodite, t he g oddess of love, a ttempts to r evive him, but to no avail, and after the third of a series

of t hree re frains t hat bid t he her dsman, t he Muses, a nd the song farewell, Thyrsis e nds h is song a nd cla ims his p rizes. The g oatherd en ds the i dyll b y qu ieting t he she-goats w hom t he elegy has aroused.

"Idyll 2: Pharmaceutria." A poem that inspired the Remais ance poet-phywright-singer Isabella Andreini to pen a si milar monologue, "Pharmaceutria" r ecounts t he efforts of a ji lted you ng woman, Simaetha, to win back her absent lover Delphis's affections by witchcraft. As the reader learns, Delphis has not put in an appearance for 12 long d ays, a nd t he sp eaker of t he p oem i s busily preparing charms to w in h im back and punish him. She prays he will be scattered "bone by b one," t hat h is he art w ill sh rivel a nd h is veins burn. She blames him for loving himself. She wants him to twist in pain, to be crushed as she crushes ashes. But each five-line verse in the poem's first part ends with a refrain addressed to a "magic w heel," a sking t hat i t f orce her lo ver home.

She then turns to r ecalling the history of her affair, and e ach r efrain she c alls on t he "L ady Moon" t o h elp her r emember t he de tails: ho w they met, how she fell in love, how she su ffered, how she arranged to meet the man by sending her slave girl as an intermediary. As she recalls their conversations, the reader sees that Delphis was a lying o pportunist, p retending t hat Si maetha barely approached him before he sought her out.

Having used her, however, Delphis's affections have now turned elsewhere, and Simaetha is prepared for either of t wo e ventualities. E ither her magic will restore him to her, or she will poison him. The poem's l ast four l ines r eveal, t hough, that she really expects neither of those outcomes. She knows that having vented her sense of betrayal and h er a nger, she m ust n ow de al w ith her longing and her loss.

"Idyll 3: The Lovesongs" begins with a goatherd asking a friend, Tityrus, to tend his flock while he goes o ff to s erenade h is b eloved A maryllis. H e warns Tityrus to watch out for a butting goat. Then the goatherd sings a series of fruitless songs outside Amaryllis's cave. She either isn't there, or she takes no notice. He tries to comfort himself. More songs follow. First he promises to die to please her. Then he a cknowledges t hat s he do es not c are, but he thinks that persis tance may pay off. In that regard, he thinks of a series of successful lovers but finally convinces himself he is not one of them. He decides to s top si nging a nd lie a round t ill the wolves e at him. That, he hopes, will satisfy cruel Amaryllis.

"Idyll 4 : The H erdsmen" r ecounts t he v erse conversation of two cowherds, Battus and Corydon, whose employer, A egon, h imself a n a mateur boxer, has gone to Olympia to see the games. The herdsmen not e t hat t he c ows m iss their master, and they predict that A egon's interest in athletics will be the ruin of him. Their wandering conversation turns first to piping and then to the beauties of Amaryllis, then back to the cows that are growing stubborn.

Battus steps on a thorn that pierces h is foot, and Corydon draws it out. Then they discuss the sexual m isbehavior of t heir ma ster w ith a g irl, and the poem ends.

In t he r isqué " Idyll 5: G oatherd a nd She pherd," a g oatherd, C omatas, a nd a she pherd, Lacon, who have been sex partners in the past, accuse each other of theft. They mutually deny their guilt and discuss having a singing contest. They also discuss their former relationship, and it becomes clear that while Comatas still has a preference for boys, Lacon has moved on to women. With not so-veiled references to t his st ate o f affairs, they decide to have a singing contest, but in their mutual mistrust, they need an unbiased judge. They settle on Morson, a woodsman, and continue their acrimonious but now subliminal debate in alternating two-line stanzas that rhyme in the Robert Wells translation. Finally Morson stops them and announces that Comatas has won the prize-alamb. The poem ends with Comatas's warning to his billy goat to leave the nannies alone.

In "Idyll 6: Damoetas and Daphnis," we have another s inging contest be tween two y outhful shepherds, Dap hnis a nd Da moetas. This i dyll presents an exchange between the Cyclops Polyphemus and his beloved nymph, Galatea. Daphnis

336 Idylls

begins by a ddressing Polyphemus and s peaking as an observer who watches Galatea throw apples to tease the one-eyed giant and his sheepdog.

Damoetas replies in the voice of Polyphemus, explaining that he too can play a teasing game of love, ke eping G alatea a way f rom h is c ave u ntil she promises to become his lover again. Polyphemus h as ad mired h is o wn lo oks i n a p ool a nd decided t hat h e i s n ot su ch a n u gly fellow a fter all. W hen th e s ongs ha ve en ded, t he she pherds exchange a kiss, and each gives the other a p rize for having sung equally well.

In "Idyll 7: The Harvest F estival," at rio of young men—Eurcritas, Amyntas, and the speaker, Simichidas—encounter a nother t raveler, the goatherd Lycidas, while on their way to a harvest festival. They g reet o ne a nother w ith goodnatured insults, and Simichidas challenges Lycidas to a singing c ontest. B oth m en a re m odest about t heir t alents, a nd L ycidas p romises h is shepherd's crook to Simichidas for his modesty.

Lycidas begins the contest, reciting a poem that he has written in the hills. It begins as a prayer for a calm sea passage to the port of Mytilene on Lesbos for Lycidas's beloved friend Ageanax. The poet imagines the joyous reunion that he and Ageanax will share a nd i magines the s ong t hat A geanax will sing. He closes his song with an address to a poet of a former age, Comatas.

Simichidas next performs his song, dedicated to Lycidas as "the Muses' friend." First Simichidas confesses his passion for Myrto, but he a lso knows how his friend A ratus is consumed with passion f or a b oy na med P hilinus. The si nger prays that Pan, the goat-footed god, may assure a happy o utcome f or h is friend's passion. Failing that, Simichidas calls for Pan's punishment with insect bites, nettle scratches "from head to hoof," and other discomforts appropriate to a she pherd god. The si nger t hen r eturns to t he sub ject o f Philenus a nd a dvises his ena mored friend, A ratus, to give up on the boy and live a peaceful life.

Lycidas finds t he s ong a musing a nd wellstructured, presents the promised crook to Simicidas, and takes a different fork in the road. The other you ng men continue to t he farm of Phrasidamus, whose attractions the poem delightfully describes. I t a lso de scribes t he ha rvest plen ty, breaking the seals of four-year- dd wine jars. The poem praises the wine by comparing it with vintages celebrated in myth, and the verse ends with a p rayer to t he g oddess Dem eter t hat t he p oet may be ble ssed by su rviving a nother y ear to s et his w innowing fan i n t he f all ha rvest's he ap o f grain.

In "Idyll 10: The Reapers," two reapers, Milon and B ucaeus, are w orking side b y side i n t he grain field, bringing in the harvest. Milon notices that Bucaeus is lagging and te ases h im a bout it. Bucaeus c onfesses t hat he i s su ffering f rom loveickness for Bombyca, a girl at a nearby farm. Milon teases him, and tells him to do h is job and vent h is feelings in song. Bucaeus complies with a s omewhat a wkward 1 4-line e ffort t hat Milon sarcastically characterizes as "masterly."

Milon then quotes 14 better- a fted lines from the p oet L ityerses as a n e xample f or Buc aeus. Milon advises his friend to keep his love-longing as a secret between Bucaeus and his mother.

In "Idyll 11: The Cyclops," Theocritus begins by telling his friend, Nicias, that the poet has learned love has no remedy. He illustrates this with a song about the love-longing that the Cyclops Polyphemus felt for his beloved sea nymph Galatea. Polyphemus traces the history of his love from the pair's first meeting. Knowing that his one-eyed visage is unlikely to please Galatea, he speaks of his skill as a shepherd and of the wealth of milk and cheeses that his careful tending of his flock of 1,000 beasts produces. He speaks of his feelings and wishes that he had been born with gills so he could seek Galatea in her watery home. He blames his mother for not proposing a match. Finally, he r ecalls h imself to the realities of h is life and the tasks at hand. He comforts h imself w ith t he t hought t hat he w ill eventually find a new love. The Cyclops's voice falls silent, and the poet speaks a gain, saying that the giant shepherd found more relief from h is lovesickness by singing than he would have found by paying a physician for treatment.

"Idyll 1 2: The Touchstone" or "The B eloved" opens with the poet's a ddress to a b eloved b oy

who has a rrived a fter a three-day a bsence. The poet o bserves t hat ev en a si ngle d ay's a bsence "makes a lover old." A fter s eeking to de fine h is feelings through a series of comparisons, the poet hopes that the god Love will "breathe equally" on him and his beloved. That would become a matter for a f uture s ong. H e t hen p rays t hat a fter 2 00 generations, a shade newly arrived in Hades will tell his ghost that the story of his and his beloved's mutual a ffection w ill be o n ev eryone's lips especially on the young men's.

In the poem's fourth and last stanza, the poet returns to the title issue of the poem. The poet introduces an address to the oarsmen of the island of Me gara who honor the he ro D iocles with a competition to determine which of the local boys has the sweetest kiss. That decision may baffle the judge who must decide, but, the poet implies, the kiss of the addressee of the poem would resolve the judge's dilemma as easily as a legendary touchstone in Lydia could identify "true gold."

"Idyll 1 3: H ylas" b elongs to t he c ategory o f Theocritus's work called half- or semi- epc. Hylas was the pageboy and the beloved of the hero Heracles (Hercules). The two had embarked together with the A rgonauts w ho ac companied J ason i n search of the G olden Fleece (see *The Argonautik a*). When their ship anchored at the island of Chios to replace a broken oar, Hylas went to find fresh water. The nymphs in the pool he found so admired his beauty that they dragged him into the water, wh ere h e d rowned. Heracles i n his g rief deserted the expedition to search for the boy.

Theocritus a ddresses h is p oem to h is o wn beloved, Nicias. He says that when the two first fell in love, they thought love existed for them alone, but this was wrong. They are neither the first nor the last to love. The poet then makes a transition to the love of Heracles for Hylas, and how in Heracles the lad had the example of the hero on whom to model the man he would become. But then the poet tells the story of Hylas's loss.

The poem's te chnique is masterful as it looks aside from its central incident, instead focusing first u pon the d angers of the v oyage. Then the poem d escribes the w ay the A rgonauts made camp. H ylas went for water; he f ound a pool one lov ingly described. A s he dips his vessel in the water, the nymphs in their desire for him grab him and pull him in. His passing is like a sho oting star.

As the sailors prepare to leave, Heracles, maddened b y lo ve, s earches f or H ylas. The s ailors blame Heracles for deserting, but the poet explains that he came on foot at last to their destination. In using spare but imagistic and musical language to focus on the feelings of a grief-stricken Heracles, the poem implies m uch m ore about the feelings of t he p oet for Nic ias t han it could ha ve sa id directly.

"Idyll 14: A eschines a nd Thyonichus" is c ast as a dialogue between two friends who r un into each other. The first part of the poem focuses on Aeschines' breakup with his girlfriend, Cynisca. An innocent toast at a party grows into a quarrel as it becomes clear that Cynisca has two lovers at the table. Aeschines strikes her, she flees, and her other admirer, the son of Labas—nicknamed the wolf—becomes her steady lover.

Aeschines is thinking of enlisting for foreign ser vice as a soldier. Thyonichus advises that King Ptolemy of E gypt offers good wages and opportunities at A lexandria. Aeschines, however, h ad better hurry. H is ha ir is beginning to g ray, and little time may be left for fresh starts.

"Idyll 15: The Festival of A donis" opens in a suburb of Alexandria in Egypt. In a pre- Christian, Easter-like c elebration, t he sp ring f estival o f Adonis was celebrated each year to welcome the demigod back to e arth a fter h is a nnual rebirth and death in celebration of the earth's seemingly inexhaustible, *clf*-renewing fertility.

Gorgo h as called to collect her friend, P raxinoa, so that the two women can travel into central Alexandria and the royal palace there to pa rticipate in the festival. After a bit of a chat about husbands a nd ba bies, P raxinoa d resses i n her b est with the h elp of h er slave, E unoa, and the t wo women set o ff for t he f estival. The s treets a re crowded with people and horses, but t he friends manage to jostle their way to the palace gate, where a mob of would-be worshippers are pushing and

338 Idylls

shoving to get in. The women are swept up in the crowd, and Pra xinoa's d ress gets torn, but with the help of a man who gives them a friendly push, the two friends make it into the precincts of the palace. There they find themselves overawed by the robes, tapestries, and lovely a rtworks. They also have a sharp exchange with a man who objects to their chatter. The h igh p oint of t he f estival, however, i s a bout to b egin. A t alented si nger appears who invokes the goddess Aphrodite, praying that she will once more conduct her b eloved Adonis back from Hades to earthly life.

The s ong c elebrates t he p reparations f or t he feast to be held in honor of the occasion and the succulent foodstuffs t hat ha ve b een p repared. These include desserts formed to depict incidents in A donis's s tory. The s ong a lso c elebrates a rtworks, particularly tapestries whose scenes depict the an nual lovemaking b etween A phrodite a nd the al ways 1 8-year-old A donis. Bu t t he h ymn penultimately introduces a sad note. At dawn of the following day, Adonis must float down to the sea a nd d ie f or a nother y ear. N onetheless, h is annual d ay a bove g round is a triumph that no other demigod or hero has ever achieved.

When the song ends, Gorgo admires its artistry and envies the singer's gifts. But now she must rush home to prepare her husband's dinner. She bids f arewell to Adonis and h opes that h e will find her healthy and happy and with her friend at the following year's festival.

"Idyll 16: The Graces" is add ressed to H iero, the tyrant of Syracuse in Sicily, and is an appeal for the king's patronage for the poet. Just as the proper role of the Muses is to celebrate the gods, so that of poets is to celebrate the ac complishments of living men and to preserve the memory of t hose a ccomplishments t hroughout the a ges, so t hat r ecollection of t he m en's e xistence w ill not pass into oblivion. Performing such a service for p eople i s worthy o f g enerous recompense, and miserly people will sooner be forgotten than will th ose w ho pa tronize p oets. I f n ot f or t he poets, sings Theocritus, the d eeds of t he hero es of the Trojan War would long since have vanished from human memory. Heroes s till dw ell a mong m en, ho wever, a nd among them stands Hiero of Syracuse, the scourge of t he A frican Phoenicians. The t actful p oem concludes with a p rayer to Z eus, g od o f p ower, and A thena, g oddess o f w isdom, to w atch o ver and p rotect t he p eople a nd le aders o f S yracuse. At the very end, Theocritus says that he is one of many poets who stand ready to s erve if called to laud the name of Hiero a nd the Sicilians. He will not "jostle for notice." Nonetheless, his lovely poem has provided his potential patron with an extraordinary example of the poetic power of the wares Theocritus has to offer.

"Idyll 1 7: E ncomium to P tolemy" mo ves to Egypt f or its t heme. P tolemy I I (Philadelphus) ruled as the pharaoh of Egypt from his capital at Alexandria-a city named for its founder, Alexander t he Gr eat. I dentifying P tolemy's p ower o n earth wi th th at o f Z eus i n h eaven, Theocritus begins and ends his poem with Zeus's name. Having ann ounced h is sub ject, Theocritus t urns t o Ptolemy's g enealogy, b eginning w ith hi s f ather, Ptolemy I-a general of Alexander the Great before he ruled Egypt. The Ptolemy line traces its origins back to t he dem igod a nd hero H eracles, a nd through him to Zeus himself. In the guise of Heracles's father, Amphitryon, Zeus sired Heracles with Alcmene. Theocritus follows the genealogy all the way down to Ptolemy I and his wife Berenice, also the product of a noble and distinguished line.

Next the poet lauds the places that are fortunate to b e connected with P tolemy II: his birthplace, Cos, in Egypt and Egypt's 33,333 cities. In addition, Theocritus lists the lands and the peoples t hat ac knowledge P tolemy's s way: S yria, Phoenicia, Libya, Lycia, Pamphylia, Caria, Sicily, and the Cylcades. The poet c elebrates P tolemy's sea power and h is prowess as a general. He also details Ptolemy's wealth and some of its sources, his piety, the loyalty that he inspires in his subjects, and his fame. He praises Ptolemy for having elevated his parents to the status of gods, and he celebrates t he d ouble lo ve t he k ing feels to ward his consort, who is both his sister and his wife-a relationship t hat a lso characterizes t he b onds between Zeus and Hera.

The p oet en ds h is en comium to h is k ing b y bidding h im farewell. He also praises the p ower of h is own song to r ank P tolemy's name a mong the g ods and he roes, t hough he a cknowledges that virtue comes only from Zeus.

In "Idyll 18: Helen's E pithalamium," though an epithalamium is a wedding hymn, the poem begins a fter t he c eremony. T welve y oung g irls sing o utside the bridal chamber, and their song echoes through the house. It chides the bridegroom f or s leeping, p erhaps b ecause he d rank too much, when he sho uld be busy begetting an heir. The singers confess that none of them is as beautiful as Helen, or so clever at weaving, or so accomplished a musician.

They take their leave of Helen as a companion and a playmate, b ut they p romise to de dicate a tree in h er honor. A s they le ave, they e xpress their good wishes, promise to come again to greet the b ridal c ouple i n th e m orning, a nd p ray to Hymen, the god of marriage, to bless the couple's marriage vows—an irony in view of Helen's infidelity with the Trojan prince Paris.

"Idyll 22: The Dioscuri" is a nother of t hose categorized as half- or semi-epic. The Dioscuri were the t win s ons of Leda. N amed C astor a nd Polydeuces (Pollux in Latin), the boys were conceived when their mother coupled with Z eus in the shape of a swan. They became the patron deities of seamen, appearing to sailors as St. Elmo's fire. L ater they a lso became identified with the constellation G emini. The first part of Theocritus's poem celebrates the twins' role as the protector of seafarers.

The s econd s tanza r ecalls, g enerally, t he role that the brothers played as Argonauts and, particularly, a b oxing match b etween P olydeuces a nd the giant s on of P oseidon, A mycus. Theocritus's vivid description of the fight suggests that sports fans everywhere might be better served if television n etworks h ired p oets i nstead of r epetitious ex- athletes as commentators.

Having given P olydeuces h is d ue, Theocritus now turns his attention to C astor. The twins had kidnapped the fiancées of Lynceas and I das, the sons of A phareus. W hen the two a ttempted to recover their brides by reasonable argument, Castor told them either to reconcile themselves to the current situation or be prepared to fight. Rather than engage in a general melee, the rivals agree that the firstborn son of each fa mily will duel. Lynceas and C astor take the field. At the first sally, their s pears st ick in e ach o ther's sh ields. They d raw their swords and c ontinue the fight. Eventually C astor e merges v ictorious, h aving slain h is o pponent. I das a ttempts to a venge h is brother, but Zeus fore stalls the attempt, striking him down with a thunderbolt.

Ending the poem, Theocritus bids his subjects farewell and reminds his readers that Castor and Pollydeuces c herish p oets. S o, the p oet s ays, do the gods who value p oems above all other gifts. Essentially "The Dioscuri" seems to be an advertisement of the poet's abilities as he seeks potential commissions.

"Idyll 2 4: The C hildhood of H eracles" is s till another idyll in the semi-epic mode. In this poem, Theocritus first recounts the incident in which the baby Heracles chokes the life out of two enormous serpents sent by Hera—the jealous spouse of h is Olympian father, Zeus—to kill him and h is baby brother, Iphicles. Deft distribution of the elements of the story manages to create interest in an episode well known to ancient Greek audiences.

The second section of the idyll details the way that H eracles' mother, A lcmene, c alls on t he blind prophet Teiresias to foretell her son's future. This, T eiresias d oes, a fter a ssuring t he w oman that she too will long be remembered among the women of G reece. H eracles is d estined t o be a hero, to accomplish 12 labors, to be burned on a pyre in Tracis, to live with the gods on Olympus, and t o marry a d aughter of H era. The p rophet tells the mother to burn the bodies of the snakes, purify the house, and sacrifice a boar to Zeus.

The end of the poem is regrettably lost, but the surviving next sections recount the heroic education of Heracles and his learning to master such battle crafts as chariot driving, warding off sword strokes, commanding m en, and est imating t he strength of enemies. The poem breaks off as it describes the hero's diet and his dress. In "Idyll 2 6: The B acchae," Theocritus recounts a portion of the same story that Eurpides t ells in h is t ragedy *The Bacchae*. P entheus, the king of Thebes, resists the spread of the cult of the g od D ionysus, but his mother, Agave, is a sister of the g od's c onsort, S emele, and has embraced the religion. With her two sisters, I no and A utonoa, A gave has g one to p repare a s acred g rove f or t he c elebration of t he Dionysian mysteries. Pentheus has been secretly observing the preparations, but the women discover h im. A lready frenzied by their d rinking in honor of the god, the women tear Penthus to pieces, with his mother administering the coup de grace by tearing off his head.

Theocritus, a pparently a lso a d evotee of t he god, approves the women's actions, calling them "an act of god."

"Idyll 28: The Distaff" addresses an ivory distaff that Theocritus has purchased as a present for Theugenis, the wife of his friend Nicias, whom the poet is about to visit in M iletus in Ionia. Though the poet considers the d istaff a small gift, that it comes from a friend makes it precious.

In "Idyll 29: Drinking Song," the speaker is an a ging m an d rinking w ith a f ormer ma le lover. W hile t he sp eaker s till f eels s trongly about their former affection, the other man dismisses it as "slight acquaintance." The speaker advises h is c ompanion to d rop t he p ose a nd cherish the memory and the emotion that survives the physical capacity for its expression. If the hearer cannot accomplish that, the speaker will not bother to cross the street to speak if the two should meet.

"Idyll 3 0: The F ever" g ives a n a ging ma n's soliloquy on the subject of having fallen hopelessly in love again with an attractive boy. Though he adv ises himself against this unwelcome passion, and though he anticipates the hurtful consequences that are sure to follow from it, he is caught in the toils of a passion over which he has no control. He is, he says, "a leaf that has lived its day/His li ghtest b reeze catches and w hirls m e away."

Iliad, The Homer (ca. eighth–ninth century B.C.E.)

One of two epic poems attributed to the early poetminstrel H omer, The I liad, l ike i ts c ompanion piece, The Odyssey, focuses on events that, according to tradition, had o ccurred during the Trojan Wars ome 3 00–400 years before the composition of t he Home ric p oems. Whereas The O dyssey focuses principally on the long and difficult homecoming of its hero O dysseus and on e vents t hat involved members of his family on and near his home island of Ithaca, The Iliad examines events that occurred during the 10-year-long Greek siege of the city of Troy, or Ilium as it was so metimes called in honor of Ilus, the city's legendary founder. Like The O dyssey, The I liad interweaves t wo principal series of events. (Throughout The Iliad, the G reeks a re a lso c alled Da naans a nd Achaeans.)

The first p rincipal s eries su rrounds t he warrior- hero Achilles and th e t ragic c onsequences t hat f ollow f rom h is a nger a t b eing slighted b y t he Gr eek c ommander i n c hief, Agamemnon, a t the siege of T roy. The s econd series more succinctly explores the situation of the besieged city and i ts i nhabitants. Book 1

A priest of Apollo, Chryses, attempts to ransom his captive daughter, Chryseis, from the Greeks, but, i gnoring t he p ositive c onsensus of h is troops, A gamemnon ro ughly r efuses. C hryses prays t o t he g od f or v engeance. H earing h is prayer, an angry Apollo shoots arrows of pestilence u pon t he Greek a rmy for n ine d ays, a nd smoke from the consequent funeral pyres darkens the sky. At a c ouncil h eld t o consider t he si tuation, Achilles advises breaking off the siege and heading for home. The prophet Calchas, having first secured Achilles' promise of protection, explains the cause of Apollo's anger. Infuriated, Agamemnon nevertheless agrees to restore Chryseis to her father if one of the other Greeks, perhaps Achilles himself, w ill r eplace her w ith a nother w oman. Harsh w ords en sue b etween t he t wo, a nd Agamemnon threatens to c ome to A chilles' tent and take his beloved Briseis.

344 Iliad, The

Furious, Achilles nearly draws his sword to kill Agamemnon. H e is prevented, however, by the arrival of A thena, g oddess of w isdom, w ho tel ls him to rail at Agamemnon all he wants to, but not to kill him. In retaliation for Agamemnon's contempt, A chilles promises to a bsent h imself from the battle when the Greeks need him most.

The wise and aged king of Pylos, Nestor, tries to pour oil on troubled waters. Finally, Achilles agrees to give Briseis to Agamemnon. When heralds come for her, however, Achilles repeats his vow to withhold h is military services. He en lists h is mother, the immortal sea nymph Thetis, in the quarrel. He asks her to intercede with Zeus so that the Greeks will fall victim to the swords of the Trojans. Meanwhile, Chryseis is restored to her father, and Apollo ends the pestilence among the Greeks.

Twelve d ays later, Thetis asks Zeus to confer victory on the Trojans until the A chaeans (the Greeks) t reat A chilles with r espect and en rich him. Despite fearing a domestic quarrel with his wife, the g oddess H era, o ver the issue, Z eus grants Thetis's request with an irrevocable nod. Hera indeed surmises his plot and reproves her husband, the two deities snipe at each other like crotchety human spouses, but Zeus at last silences Hera with the threat of a thrashing.

Books 2–4

To fulfill his promise to Thetis, Zeus sends a false dream t o A gamemnon a nd en courages h im to begin the final sie ge of Troy at o nce. A fter p retending to w ithdraw, A gamemnon he artens h is army for the coming attack. At this point, Homer interrupts t he na rrative w ith a c atalogue of t he captains of t he Greek host—a list t hat occ upies the rest of the second book. (At a date much later than i ts c omposition, *The I liad* was ed itorially divided into 24 books.)

The third book provides an interlude in which the armies observe a truce while Menelaus and a reluctant Pa ris a gree to s ettle b y si ngle c ombat the issue of w ho g ets H elen of T roy. H elen ha s grown tir ed of Pa ris a nd ha s o nce m ore b egun hankering a fter h er former h usband, M enelaus. By far the better fighter, Menelaus is on the verge of a n e asy victory when the goddess Aphrodite intervenes, spiriting her favorite Paris away from the fight and b ack to Helen. For Helen's roving eye, the goddess reproves her as a hussy. Everyone knows that, Paris's disappearance notwithstanding, Menelaus has won the duel, and the Greeks demand their prize.

In book 4, like rival but friendly fans at a sporting event, Zeus and Hera have been watching the duel. Z eus f avors t he T rojans, while H era roots for t he Gr eeks. B oth a gree, ho wever, t hat Pa ris has lo st, and Zeus a grees to t he sacking of Troy provided that Hera will not object if, in the future, he wishes to have one of her favorite cities sacked. Hera n ames A rgos, S parta, and M ycenae a s her favorites and agrees that Zeus can destroy them at his pleasure without her intervention. She then flashes d own f rom O lympus a nd en courages a foolish T rojan, Pa ndarus, to b reak t he t ruce b y wounding Menelaus with an arrow.

As a p hysician t reats t he m inor w ound, Agamemnon urges the commanders of the Greek forces into battle. The Greek army moves forward in s ilence, w hile th e T rojans en courage t hemselves with shouting and banging together their shields and weapons. As the battle is joined, gods preferring one side or the other encourage favored warriors. A pollo, f or i nstance, tel ls t he T rojan prince He ctor that he should charge the Gre eks and th at A chilles is n ursing h is w rath a nd n ot fighting. A thena ur ges o n the G reeks. H omer's descriptions o f t he c arnage a re i ndividualized, detailed, bloody, and gripping.

Books 5–6

The gods do not merely encourage their champions; several immortals actually engage in battle. Athena, fo r i nstance, g uides t he sp ear of t he Greek hero D iomedes s o t hat it k ills t he t ruce breaker, Pa ndarus. Aph rodite p rotects h er s on Aeneas, who will later lead the expedition to people Rome (see A eneid). S eeing he r c arrying Aeneas a nd c overing h im with her c loak, D iomedes, k nowing Aphrodite to be weak in battle, wounds her in her hand so that she bleeds ichor the i mmortal fluid t hat flows in t he veins of gods—and drops Aeneas. Diomedes drives Aphrodite from the field, but Apollo takes over caring for Aeneas, who rejoins the battle. A res, the god of war, also intervenes on behalf of the Trojans. The Trojan forces beat back the Greeks and are on the verge of winning the d ay when A thena a nd Hera decide to do battle together.

Donning a hel met of i nvisibility, A thena, with Diomedes at her side, mounts an attack directly on the god of war Ares, who has been killing Greeks. With her help, Diomedes grievously wounds Ares, who, t hough h e cannot d ie ca n n onetheless fe el pain. The wounded god retreats to Olympus, where Zeus has the physician of the gods, Paeeon, instantly heal him, and the fifth book ends.

In the sixth book, the Trojan princes Hector and Aeneas rally their troops, and Homer breaks from recounting instances of carnage to chronicle a pause in the battle for an individual combat between the Greek hero D iomedes and the Trojan Glaucus. From formal, detailed, and respectful introductions that include relevant genealogies and summaries of the accomplishments of ancestors, the two learn each other's backgrounds. The antagonists r ealize t hat b onds of f riendship between their families preclude their fighting.

During this interval, Hector goes back to the city to i nform h is w ife, A ndromache, a nd h is mother, Q ueen H ecuba, of the war's p rogress. Hector blames Paris for all the Trojans' suffering and wi shes his b rother de ad. H e adv ises h is mother to make sacrifices to Athena, and as she and her women comply, Hector goes to encourage Paris to jo in the battle. He finds him still lolling about at home w here Aphrodite had left him. Helen shares with Hector her disenchantment with Paris. Having delivered his message, Hector g oes h ome i n s earch o f A ndromache. There her w eeping ma ids r eport t hat she a nd Hector's s on A styonax a re on t he c ity's w alls watching t he ba ttle. H ector finds t hem t here, and in a moving scene that sets the plight of the women of T roy in b old r elief, An dromache pleads with her h usband to f orego the war and remain with her. He tries unsuccessfully to comfort her, but he must return to battle. On his way, he encounters Paris, now clad in full armor, and together they go to fight.

Books 7–9

The brothers fighting as a team prove so successful that Athena and Apollo decide to intervene on the Greeks' behalf. They arrange to have Hector challenge a Gr eek to si ngle c ombat, a nd t he fighting pauses as the Greeks seek out a champion willing to face him. When no Greek comes forward, Menelaus accep ts the c hallenge h imself. The Gr eeks, however, restrain him, assuring him that he is no match for the Trojan champion. The Greeks decide to choose a duelist by lot, and all put their names in a helmet. The name of the fiercest warrior present, Ajax, is drawn. The two duel fiercely with spears and then with stones, and though blood is shed on both sides, neither can overcome the other. As daylight fades, heralds from both sides intercede. The two w arriors agree t o s uspend t heir fight, t o exchange p resents of f riendship, and t o r esume their contest whenever the chance of battle brings them face- to- face.

The two sides withdraw to eat, rest, and confer. The Greeks decide to burn their dead and build a wall a long t he sho re to p rotect t heir ships. The Trojans u rge P aris to return Helen and the treasures he took from Sparta. Paris agrees to return the treasure with interest, but he means to keep Helen. The Trojans send heralds to offer the financial settlement and to request a truce to burn their dead. The Greeks grant the truce but refuse the money. The war will continue.

As the eighth book opens, with threats of dire consequences, Z eus warns the gods not to i ntervene further in the battle. Athena replies that they will h enceforward o nly o ffer co unsel. Zeus s lyly confesses that he did not mean it anyway—a fact that he instantly demonstrates by goi ng do wn to influence t he ba ttle h imself. Wi th Z eus's f avor, Hector single-handedly drives the Greeks back to the staging area near their ships. Then, in response to the Greeks' prayers, Zeus changes sides, and the

346 Iliad, The

Greeks begin gaining ground. The battle continues to be a seesaw affair. Athena and Hera try to intervene, but on Zeus's orders they desist, and nightfall ends t he d ay's ho stilities w ith t he Gr eeks o nce more driven back to the staging area immediately around their ships, and the watch fires of the Trojan defenders burning all across the plains of Troy.

In book 9, faced with the Greeks' imminent defeat, Nestor of P ylos advises A gamemnon to restore Br iseis to A chilles, pay h im d amages, and entreat him to rejoin the battle. Confessing his error, Agamemnon agrees, swearing that he has not coupled with the girl. When the offer is taken to A chilles, however, the hero r efuses it. Nothing the messengers say can persuade h im, and they return to Agamemnon with the news of their failure.

Books 10–12

In the 10th book, the mission to Achilles having failed, Nestor, who thinks that a Greek disaster is imminent, awakens a coterie of clever Greeks who are also able warriors. They hold a council, decide they need reliable intelligence, and send Diomedes and Odysseus to reconnoiter behind enemy lines. The Trojans are as sleepless as the Greeks, for Hector wants to know if the Greeks, having been bested in the previous day's battle, are planning to sail. A warrior, Dolon, volunteers to find out. Diomedes and Odysseus, however, detect and capture him. In an effort to save his life, Dolon provides them with everything they want to know. The Greeks kill him nonetheless and, u sing w hat t hey h ave t old h im, kill the king of the Thracians along with 12 of his companions and steal his horses before returning to their own camp near the Greek ships.

Book 11 beg ins t he n ext d ay, and the battle resumes more fiercely than before, with no quarter given on either side. The Greeks have the best of it until Agamemnon himself is wounded; then, counseled by Zeus, Hector rallies the Trojan forces, and the tide of battle turns for a time against the Greeks. Back and forth the battle continues to rage, and Homer turns his poetic gaze first on one and then on an other he ro, first on T rojan and then on G reek, giving a n account of t he battle better t han that of an eyewitness—an account that speaks either to the detail of Homer's sources or, more likely, to the richness of his imagination. In t he c ourse of the b attle, A chilles, w atching from h is e ncampment, s ees s omeone wo unded and taken to t he tents of N estor. A chilles s ends his beloved friend, Patroclus, to find out the name of t he wou nded ma n. W hile Pa troclus is t here, Nestor convinces h im t hat he s hould he lp p ersuade Achilles to aid the Greeks.

In the 12th book, Homer describes the assault that the Trojans mounted on a wall and trench the Greeks had constructed to protect their ships. The poet i nterrupts h is ac count to de scribe t he gods' u nfavorable v iew of t his for tification a nd their subsequent means of destroying it. The reader may here be particularly struck by the details Homer chooses to heig hten the realism and pictographic quality of t his de scription. A particularly tel ling i nstance o ccurs w hen t he p oet pictures the warhorses' fear of trying to jump so broad and deep a trench and the way the animals balk w hen u rged to t he a ttempt. A s a r esult, almost all the Trojans dismount and assault the entrenched bulwark in five infantry companies.

Homer masterfully describes the Trojan assault on the wall. He catches the tumult and the desperation of the fight an d f right o f t he def ending Greeks at the onslaught of Hector and his Trojans. Encouraged b y Z eus, t he a ttackers finally b reak through an d d rive t he def enders to ward t heir ships in headlong flight. Once the wall is breached, however, and the Greeks routed, Zeus loses interest in the fight and turns his attention elsewhere, confident that no other god will intervene.

Books 13–14

Poseidon, the god of the sea and of earthquake, however, a ssumes the form of the prophet C alchas and heartens the Greek defenders, renewing their strength and their resolve. Poseidon's anger against the Trojans increases when they kill his grandson, Amphimachus, in the melee. With his encouragement, the Greeks begin to turn the tide of the battle under the very sterns of their beached vessels. A fter u nderlining t he in tentions of t he two gods' interventions in the fight, Homer returns to his description of the carnage, evoking in his verse not only the sights, vicissitudes, and confusion of t he ba ttle, b ut s ometimes i ts o dors a nd often its noise of shouting and the ringing of the bronze and iron weapons as well.

The Trojan Polydamus perceives t hat de spite Trojan successes, the Greeks are beginning to roll up the Trojan left flank. Polydamus therefore recommends a council to consider whether to press the attack or beat a tactical retreat. Hector agrees, saying that he will continue the fight until Polydamus has rounded up the commanders. The 13th book ends with another surge in the fighting.

As the 14th book opens, Homer has shifted the scene to the tent of the ancient king Nestor, where the o ld ma n i s t aking a b reak f or w ine. The increasing noise of the battle makes the old king cut s hort h is r espite, a rm, a nd g o i n s earch o f Agamemnon. Nestor finds the king and the two confer with Odysseus and Diomedes about how to save an increasingly dangerous situation. Diomedes, the you ngest man present, suggests that, even though all four are wounded, they can still urge the others on, and all four go to do so. In the guise of an old man, Poseidon reminds Agamemnon about Achilles and then the god r ushes into the fray with a great battle cry. The Greeks once more take heart and redouble their efforts.

The goddess Hera, in the meantime, approves Poseidon's action on the Greeks' behalf and thinks of a way she c an keep Zeus occupied. She ba thes and coifs and dresses, decking herself with jewels, and borrows from Aphrodite an embroidered belt into which all the love magic that Aphrodite possesses h as be en w oven. Thus b eautified a nd equipped w ith a po werful love me dicine, He ra goes i n s earch of h er h usband Z eus, w hom she means to c harm i nto ma king l ove w ith h er. O n her way, she recruits the god of sleep to make Zeus slumber after she has had her way with him. Sleep is reluctant, for Zeus had earlier punished him for making the chief god fall asleep when he d id not want to, b ut H era p romises t hat she w ill ma rry Sleep off to t he yo ungest o f the th ree G races, Pasithea. Sleep, who loves Pasithea, readily agrees, and they set off for Mou nt I da, where Z eus was stopping at the moment.

As soon as Zeus catches sight of Hera, he feels inflamed by a passion for her such as he has not known since their first prenuptial encounter. She pretends to be on another errand, but Zeus wants to dispense with all other matters and make love. He says that he has not felt such a passion in any of his love affairs with mortal women—affairs that he enumerates. The two fulfill Hera's plan and Zeus's passion, while Sleep goes off to tell Poseidon that Zeus is not watching the battle for the moment. So informed, Poseidon himself marches at the head of the G reek s oldiers. A jax w ounds H ector, w ho i s carried from the fray, and the Greeks beat the Trojans back toward their own walls.

Books 15-16

As book 15 begins, Zeus awakens, sees Poseidon leading the Greeks, and ac cuses Hera of having tricked him. He reminds her of an earlier punishment that he had inflicted on her. Frightened, she swears that she is not responsible for Poseidon's actions. Zeus says she can prove it by rounding up Iris, goddess of the rainbow and a messenger of the gods, and Apollo, one of whose functions is to be the patron deity of physicians. Iris is to b ear Zeus's message to Poseidon to get off the battlefield and go home. A pollo is to he al Hector and make h im f orget h is su fferings s o t hat he c an drive the Greeks into confusion once more.

Zeus then outlines for Hera the events that he knows are coming. When the Trojans drive the Greeks back among the ships and reach those of Achilles, Ac hilles will send his best friend and companion, P atroclus, to fight. Hector will kill Patroclus and others, including Sarpedon, Zeus's son by a human mother—Laodamia. Achilles will return to the battle to kill Hector in revenge for

348 Iliad, The

the death of Patroclus, and Zeus will finally permit the Greeks to fulfill Athena's predictions and conquer Troy.

Those gods who favor the Trojans obey Zeus's orders rather than have a test of wills and strength. Though mo st a cknowledge Z eus's su premacy, Poseidon does not fear Zeus's strength—only his se riority.

Now, with A pollo a nd a r estored H ector a t their head, the Trojans swarm once more toward the G reek sh ips. The flower of t he Gr eek w arriors stand against them, while the rest fall back again to the ships. Another Homeric description of c arnage e nsues, a nd a s u sual H omer de tails the g enealogies a nd ac complishments of t hose who prevail and those who fall.

Homer often whets h is listeners' and readers' appetites with p reviews of action to f ollow, and he chooses this moment to convey the news that Zeus intends to allow the Trojans to prevail until the moment t hat t hey succeed i n set ting fire to one of t he Gr ecian sh ips. At t hat moment, t he chief g od will consider h is p romise to A chilles' mother Thetis f ulfilled, and t he T rojans w ill inexorably suffer their fate.

As book 16 opens, Patroclus has come weeping to the tent of Achilles. Patroclus begs Achilles to allow h im to w ear h is f riend's a rmor a nd le ad Achilles' c rack t roops, t he M yrmidons, to t he Greeks' assistance. Not k nowing t hat he i s signing Patroclus's death warrant, Achilles agrees. He does, however, counsel Patroclus merely to relieve the Greek ships and not to p ursue the retreating Trojans toward the city.

Homer i nvokes t he Muses—both C aliope of epic poetry and Clio of history—to tell how fire came to the Greek ships. Ajax had b een defending against firing a ship, but he was driven back, fire thrown aboard, and his ship was immediately engulfed in flame.

While the ship was being set ablaze, A chilles, who has brought 50 ships of his own, encourages his men to arm and follow Patroclus to the rescue of the fleet. Then Achilles prays to Zeus that Patroclus m ay save the ships and r eturn u nharmed. Zeus grants the first half of the prayer.

Seeing the armor of A chilles, the Trojans a re thrown into confusion and beat a panicked retreat. Having cleared the area of Trojans, Patroclus puts out the fire at the half-burned ship. Then he turns to fight the Trojans, who, though r etreating, a t first yield each foot of ground stubbornly. Finally, their r etreat t urns i nto a ro ut. Z eus c onsiders where best t o ha ve He ctor k ill Patroclus a nd decides t hat i t sh ould hap pen u nder t he ba ttlements of Troy. Patroclus, in the heat of battle, forgets or neglects Achilles' sage advice not to pursue the r etreating Trojans. He ve ry ne arly ove rruns the battlements until Apollo himself warns Patroclus that he is not fated to b ecome the sacker of Troy. That s aid, t he g od a ssumes t he g uise of a mortal a nd a dvises H ector to d rive s traight a t Patroclus and kill him.

First P atroclus k ills H ector's c harioteer, a nd then 36 other Trojans, but Phoebus Apollo himself becomes P atroclus's invisible a dversary. The god b eats the helmet from the hero's he ad a nd dazes P atroclus so that he is at the mercy of h is enemies. A sp earman w ounds h im, a nd w hen Hector finally finds him, P atroclus is in no condition to fight. Hector gives him his deathblow. The dying P atroclus prophesies Hector's demise at the hand of Achilles.

Books 17–18

The Spartan king, Menelaus, having seen Patroclus fall, bestrides his body and kills the first man to come—Euphorbus, who had w ounded Patroclus. When, however, Menelaus sees Hector coming with others, he deserts the fallen hero like "a lion . . . chased by dogs." H ector s trips the b ody of Ac hilles' a rmor, but Ajax s uccessfully re covers Pa troclus's b ody b efore t he T rojans c an behead it and fling it to the dogs. In the meantime, Hector exchanges his own armor for that of Achilles. Z eus d isapproves this action and vows that Hector will not return to Andromache.

The battle rages again as each side tries to gain and maintain control of Patroclus's corpse. In a touching detail of the battle, when the immortal horses of A chilles learn of Patroclus's death, they weep, refuse to move, and bow down their heads in mourning so that Zeus pities them, and in his pity he mome ntarily f avors the G reeks. F inally, through th eir p rayers the G reeks c ommand enough of the god's compassion that they are able to s end n ews of Pat roclus's d eath to Ac hilles while M enelaus and the w arrior M eriones b ear the body from the field.

As book 18 opens, the messenger A ntilochus, Nestor's son, brings the news of Patroclus's death to A chilles. Achilles m ourns and, h earing his cries, h is m other Thetis co mes to comfort h im. He vows to kill Hector, and Thetis reminds her son t hat h is o wn de ath i s f ated to f ollow s oon upon Hector's. Achilles stoically accepts h is fortune. Thetis t hen promises t o bring n ew a rmor tomorrow—armor f orged by t he s mithy of t he gods, Hephaestus. The goddess Hera, meanwhile, sends Iris to tell Achilles to help the Greeks bring Patroclus's b ody a way f rom t he ba ttle. Wi th Athena's help, A chilles' sho uting f rightens t he Trojans enough to permit the Greeks to move the body beyond their enemies' reach.

In the meantime, Thetis goes to Hephaestus and s ummarizes for him—and f or H omer's audience—the events a t T roy. S he t hen r equests that Hephaestus craft new a rmor for her s on. I n her deb t f or a n e arlier k indness she had sho wn him, Hephaestus immediately sets to work, crafting n ew a rmor b oth e ffective i n d efending it s wearer a nd wond rously b eautiful, w rought w ith complex allegories of peace and war. He presents it to Thetis who instantly bears it away to Achilles.

Books 19-21

In book 19, n ow a rmed, A chilles m eets with the other G reeks i n ge neral c ouncil. There, h e a nd Agamemnon settle their quarrel, and Agamemnon restores Briseis and pays a generous settlement for the injuries and insult that his pride had inflicted upon Achilles. Achilles and Briseis mourn Patroclus, and Achilles vows to spend the day in mourning and fasting. Athena, however, sees to it that he is secretly fed on divine nectar so that his strength will not fail him in the coming fight. As he readies his chariot a nd i ts i mmortal te am f or ba ttle, he addresses his horse, Xanthus, urging him to bring his next passenger back a live. Granted the power of speech by Hera, Xanthus reminds Achilles that, though the team can save him this time, the hour of his death is fast approaching. Both Greeks and Trojans now prepare for the battle.

In book 20, Zeus countermands his order that the g ods n ot p articipate, t elling th em th at, although h e h imself will no longer intervene, they c an n ow a ll do a s t hey w ish. A ccordingly, the immortals choose sides. Hera, Athena, Poseidon, H ermes, a nd H ephaestus jo in t he Gr eek cause. Ares, Apollo, Aphrodite, Artemis, and the Tit a n L eto a ll go with the Trojans. So does the personified Trojan r iver that the gods call X anthus and that men call the Scamander.

The gods, however, spend a good deal of time in planning while the men take the field. As the two armies form up to face one another, the Trojan p rince A eneas c hallenges A chilles t o s ingle combat. The two follow a formal pattern of insult and boasting. A chilles insults A eneas. This gives Aeneas the opportunity to declare his lineage and credentials as a warrior worthy to o ppose such a hero as A chilles. The two begin the fight, but the gods re cognize t hat Ae neas will fall if the d uel continues, a nd P oseidon spirits A eneas away s o that he can live to fulfill his destiny.

The armies engage, and Achilles wreaks havoc among the Trojans. Apollo warns Hector not to seek s ingle co mbat ag ainst A chilles, b ut w hen Achilles slays Hector's brother, Polydorus, Hector disregards t he g od's warning. A thena, ho wever, intervenes to protect Achilles from Hector's spear. With the two gods protecting their favorites, neither can do the other harm on their first encounter, so they go in search of other opponents.

As book 2 1 beg ins, A chilles' f ury spl its t he massed f orces of t he T rojans i nto t wo s eparate bodies as he hews his way to the banks of the river Scamander (Xanthus). The r iver g rows a ngry because of t he burden of blo od a nd b odies with which A chilles is loading it. The r iver s ends a champion a gainst A chilles, who t riumphs. Then the river speaks to Achilles, asking him to do h is

killing on dry land. When Achilles does not comply, the r iver a ttempts to o verwhelm h im with a flood. Achilles flees to land, and the river pursues him w ith w ater. Now, in book 22, Achilles encounters Apollo and reproves the god for thwarting his intentions. He then goes searching for Hector across the plain. From t he b attlements of T roy, t he a ged T rojan king Priam sees Achilles coming and warns Hector to en ter t he c ity's ga tes. H ector's m other, Hecuba, seconds her husband's plea. Fearing the scorn of his comrades more than he fears Achilles, ho wever, H ector r emains o utside t he ga tes until h e s ees A chilles c oming. A t the s ight o f Achilles, Hector's courage fails him, and he r uns away with his foe in hot pursuit. Apollo, however, perceives that he can no longer keep Hector from the jaws of Hades and ceases to protect him.

Athena assumes the form of Deiphobus, Hector's brother, and proposes that the two together stand and face Achilles. Hector falls for the goddess's c unning and c onfronts h is p ursuer. A fter the exchange of ritual insults, the two hurl their spears at each other. Neither is effective. Hector turns to ask Deiphobus for another, finds himself alone, and knows the gods have played him false. He falls in the ensuing swordplay. Before he dies, he a sks that Achilles return h is b ody for de cent burial. Ac hilles refuses. The dogs , he s ays, w ill eat H ector's flesh a nd g naw h is b ones. H ector dies, and Achilles strips him of the armor Hector had taken from Patroclus.

As A chilles dr ags H ector's b ody b ehind hi s chariot back to the Greek lines, Priam and Hecuba le arn o f t heir s on's de ath a nd m ourn h im. Andromache hears their grief, rushes to the wall, sees Hector's corpse bouncing behind the chariot, and f aints. C oming to her self, she g rieves f or Hector, for herself, and for their son Astyanax.

Book 23 begins, and back at the Grecian ships, while t he b ody o f H ector li es s corned b eside Patroclus's b ier, t he p reparations b egin f or t he Greek hero's funeral feast. A chilles falls a sleep, and the ghost of Patroclus pays him a visit, telling him to get on with burying him so that he can get to Hades and rest. He also asks that he and Achilles be buried together in a common urn. The next morning, a long funeral procession bears Patroclus to the bier that had been erected for his burning. A fter s acrificing a n umber of Pat roclus's pets and domestic a nimals and a doz en Trojan captives t o be b urned w ith h im, t hey a lso la y these b odies u pon t he f uneral py re a nd t ry to ignite it. At first it refuses to b urn, but a p rayer carried by Iris to the winds Boreas and Zephyrus bring them to fan the flames of the pyre, and soon it burns brightly.

After the bodies have burned, the Greeks carefully gather Patroclus's bones from the center of the ashes and store them in a golden urn where those of Achilles will soon join them. The dogs, however, will not touch the nearby body of Hector, for the goddess Aphrodite preserves it from them and from decay. Then chariot races are held in h onor of P atroclus. Homer d escribes t hese with r elish, a nd h is a udience ga ins a n i nsight into the strategy and tactics of the sport. One also learns that chariot racers can be sore losers when M enelaus complains a bout the foolhardy tactics employed by Antilochus. By the time the prizes a re a warded, h owever, several o f t hose who won pass their prizes over to others who did not, and good fellowship gets restored all around. A s eries of b oxing a nd w restling ma tches a nd foot r aces fol low t he horse r acing. Then c ome discus throwing and archery contests. The funeral games of Patroclus anticipate the activities of later Olympiads.

In book 24, Achilles, still burning with rage at the dead Hector for the death of his beloved Patroclus, dishonors the body of Hector by dragging it three times around Patroclus's tomb. The gods are offended by this behavior. Dishonoring the dead is a major sin, as the dead belong to them and are no longer a n appropriate object of h uman en mity. Zeus therefore su mmons Thetis a nd d ispatches her to t ell A chilles to g ive up He ctor's b ody f or decent burial. A chilles obeys, and King Priam of Troy ransoms his son's body from Achilles.

The final e pisodes of b ook 2 4 r ecount ho w Hermes, the messenger of the gods, escorts Priam, with the ransom on a mule wagon, within the Greek encampment. Priam kneels before Achilles and appeals to h is human nature to le t him take the body of his son Hector—one of 50 he has sired with H ecuba an d o ther w omen o f h is ro yal household. Most of those sons now lie dead as a result of the war. Moved by pity and the memory of his own father, Achilles releases Hector's body to Priam. The hero t hen insists that the old king accept h is ho spitality o vernight. P riam i s r eluctant, but failing to ac cept would insult A chilles and might provoke his wrath. Then Priam negotiates an 11-day truce with Achilles to give time for the proper p er fr mance of the r ites c onnected with Hector's burial. After that, the fight, if necessary, can commence once more. Achilles agrees.

The focus of Homer's attention follows the old king and the body of his son back to Troy, where the grief of Hector's family and the hero's funeral occupy the end of *The Iliad*.

"I more than envy him . . . " Sappho

What r emains of this poem—the 27th i n P aul Roche's translation and one of the most famous of Sa ppho's works—the ancient critic Longinus preserved in a celebrated essay *Longinus*, On the *Sublime*. (Longinus's a uthorship is s ometimes questioned.) There we find four complete stanzas of Sappho's poem and the first line of a fifth verse.

In the first st anza, the speaker—presumably Sappho herself—addresses a w oman w ho is the object of her affection. The speaker confesses that she c onsiders the w oman's male companion—a lover or husband—a g od b ecause he en joys the privilege of sitting close to the woman whom Sappho admires. Sappho also covets h is opportunity to hear the sweet sound of his partner's intimately spoken words. Her laughter makes Sappho's heart beat faster and, as Sappho shifts the focus to her internal responses, leaves the poet speechless.

Moreover, as the third stanza makes clear, the woman's pre sence makes S appho f eel f everish, strikes her blind, and leaves her deaf. In the fourth stanza, the poet breaks into a sweat, she shudders, and she finds herself on the point of death.

The si ngle su rviving l ine of t he fifth s tanza explains that the poet must bear all these unpleasant effects, as she has become a beggar—and the poem breaks off.

The Ro man p oet C at ullus b orrowed t he poem's ideas and i mages in a four-stanza complaint, "He seems the equal of the gods," addressed to h is m istress, C lodia M etelli, w hom he c alled Lesbia. She had a h usband and took other lovers, which drove Catullus nearly mad.

developed quite rapidly. One of the early fruits of this d evelopment was *Intrigues o f the W arring States*, or *The Book of the Warring States*.

The oldest copy that has survived contains 33 volumes and was edited in the first century b.c.e. by the H an dy nasty s cholar L iu X iang (Hsiang). Dealing with events that occurred as early as 475 b.c.e. and proceeding in a roughly chronological order, a mong ot her matters, the Intrigues of the Warring States reports the eloquence with which the warring- states diplomats s ought to c onvince their opposite numbers to withdraw from a situation in which the strongest of the states, Jin (Chin), will or will not be able to annex all the other states concerned. The principal states involved included the Z hou (Chou) i mperial c ourt a nd t he s even rival states principally involved in the war: Zhao (Chao), Jin (Chin), Qi (Chi), Chu, Han, Wen, and Yan (Yen). A few other weaker states were absorbed by their neighbors early in the process that finally ended when Chin emerged victorious.

The task of the diplomats was to convince their colleagues that unless the weaker six states banded t ogether to re sist C hin's expansionist a mbitions, they would certainly all fall separately. The author or authors of *Int rigues of t he Warring States* capture the eloquence and the subtlety with which t he diplomats—particularly Su Chin—negotiated an anti- Chin alliance.

An even more brilliant master of the art of persuasion, ho wever, w as Z hang (Chang) Yi, t he negotiator from the state of Jin who convinced the alliance to split; the result was that Jin was able to do exactly what Zhang Yi had hoped and bring all the states u nder its i mperial c ontrol. B efore t hat happened however, *Warring States* traces the untiring efforts of the diplomats to create alliances that will not only hold the dominant state of Chin at bay, b ut a lso w ill s erve t he ma ny a nd sh ifting interests of the parties to the negotiations.

Friendly p ersuasion, ho wever, is not t he only diplomatic art t hat the *Intrigues* celebrates. The fine arts of insult and posturing also play roles, as does the relative sumptuousness of the funerals of the politically important in helping diplomats decide which side to support. Both the way that events are depicted in their narration a nd the u se of d ialogue to r eflect the cleverness of the d iplomats a ren ew a spects of Chinese prose writing. The appearance of personality in the speech of the personages drawn is also a new aspect of early Chinese prose. Moreover, the speeches that the diplomats make, as Burton Watson tells us, became the models for rhetoric as it was later studied in Chinese schools. This rhetoric is summary and allusive in character and relies on all p arties ha ving s tudied the basic do cuments from which the rhetoric is drawn so that they can perceive n ot only what is said, b ut a lso w hat is hinted at and, beyond that, what is intended.

lon Euripides (before 406 B.C.E)

Thought to be a late work by Eur ipides, the plot of *Ion* treats matters that no other surviving Greek drama handles. Moreover, Euripides develops that material i n a n u ncharacteristic wa y. The pl ay addresses the story of its title character, Ion, in a manner that is potentially tragic but that in fact proves to be comic. Thus the play both presages the subsequent Greek New Comedy (see comedy in Greece and Rome) in the resolution of its plot and relies on the conventions of the older t r age-dy in establishing the audience's expectations.

Hermes, the messenger of the gods, speaks the prologue f rom t he t emple of Ap ollo at D elphi. Hermes r eports t hat A pollo r aped Cr eusa, t he daughter of a le gendary k ing of A thens, E rechtheus. As all unions of gods and human b eings were f ruitful, C reusa c onceived and e ventually bore a son, Ion, in secret. To hide her shame, she left the child to die in a circular vase within a willow basket, but she carefully clothed him and left with him an ornament that she wore. Apollo sent Hermes to c arry the baby to A pollo's temple at Delphi. There the priestess of the temple discovered t he ba by a nd t hought s ome n ymph had borne it and left it there. The priestess chose to keep the child, and she reared him in the vicinity of the temple.

In the meantime, Creusa married the Euboean demigod X uthus. Although th e c ouple w anted children, none came. Eventually, accompanied by trains of servants portrayed by the chorus, Creusa and Xuthus traveled separately to Apollo's temple to p ray f or t he g od's i ntercession i n t heir plight. H ermes a nnounces to t he a udience t hat the temple oracle will tell the couple that the child Ion is the offspring of Xuthus.

Ion enters, chanting while he cleans and decorates the tem ple, reverently singing all the while and celebrating his intention always to serve Apollo. B ehaving like sightseers, the chorus enters as the servants of Creusa. When she arrives, she and Ion discuss her ancestry and the stories connected with her lineage. They then turn to Ion's history, and he explains that the priestess of the temple has reared him. The conversation now turns to Creusa's errand, and in the course of the d iscussion Creusa, tel ls her o wn s tory, p retending it to b e another's.

Xuthus no w enters. H e has a rrived f rom t he cave o f T rophonius, a nother o racle. There h e learned that he and Creusa would not depart childless from Delphi. Xuthus goes to c onsult the Delphic oracle. Ion reflects on the injustice sometimes done b y t he g od he s erves in conceiving mortal children to satisfy his lust, and then deserting his offspring. The chorus sings, instead, of the happy outcome of the coupling of gods with humankind.

Xuthus reenters and salutes Ion as his son. Ion thinks th e m an h as l ost his w its. I on crossquestions X uthus a nd d iscovers t hat t he ol der man did indeed have an affair in the vicinity at about t he t ime of t he l ad's c onception. F inally convinced, Ion greets Xuthus as his father. In their mutual rejoicing, the pair is mindful that, th ough X uthus h as a pparently b een re united with his son, Creusa remains childless and may well be past childbearing. They do not want t o u pset h er b y suddenly a nnouncing Xuthus's go od fortune. They agree to bring Ion to A thens as a visitor. They will then choose an opportune moment to inform Creusa. The women of the chorus, however, have been witnesses to the entire p roceeding, a nd a lthough X uthus w arns them to help keep the secret, the women conclude among th emselves th at they o we their p rimary allegiance to Creusa.

Now Creusa enters. Her aged tutor accompanies her. They ask the women to share news of the o racle's answer. The women he sitate, but then report the bad news. Creusa will not conceive a child. P ressed for more, however, they report that Xuthus has discovered his son. Creusa is not pleased. She calls Xuthus a "wretch of a husband."

The tutor supports her in this view, fabricating a fanciful history of Xuthus that presupposes him to have k nown all a long about I on a nd to have intentionally d eceived C reusa throughout he r marriage. H e adv ises Cr eusa to k ill Ion-an undertaking in which the tutor will happily cooperate. Cr eusa r esponds t o this with a l engthy lament in which she blames Apollo for g iving a child to her husband while withholding the child born to her union with the god. She then confesses all to her tutor, and in a leng thy dialogue the two determine to poison Ion at the party celebrating the reunion of the putative father and son. She gives the old tutor a b ox containing the poison, but warns him that her husband must not drink from the wine with which it is mixed.

Offstage, however, the plot fails. An attendant enters to report the events. The god has provided ill omens that Ion easily reads. He has all the celebrants pour out their wine cups on the ground. A flock of doves descends, and they drink from the spilled w ine. The o nly do ve to d ie d rinks f rom Ion's spillage. As everyone knows that the cup was Creusa's gift, the attendant p redicts that she w ill be executed for her attempt upon a sacred life.

354 Iphigenia in Aulis

Creusa rushes in, confirming that the Pythian council has sentenced her to de ath. The leader of the chorus a dvises her to s eek sanctuary at the altar, where none c an k ill he r. Ion a nd o thers enter to c arry out the sentence. He a nd Creusa rancorously debate until he is about to tear her from the altar and take her life.

At t hat mome nt, ho wever, t he p riestess o f Apollo who had reared Ion intervenes. She carries with her the vase and basket in which she found the infant boy. Ion realizes that he now h as the means ne cessary to i dentify h is mother. S eeing the vase and basket, Creusa belatedly realizes that Ion is her son. She tel ls him so, but he m istrusts her. He asks her to name the other contents of the basket and vase. She describes them in detail, and Ion embraces her as his mother. She explains that Apollo is his father and that Apollo has now conferred upon Ion a human father, Xuthus.

Ion is dubious and announces his intention to consult the oracle. At that moment, A thena, the goddess of w isdom, app ears an d e xplains a ll, including the care that Apollo has a lways taken of Ion . The g oddess p redicts subs equent g ood fortune for a ll. C reusa is at last reconciled with Apollo, and the members of the chorus end the drama with a paean in praise of piety.

The identification of a lost child through the recognition of a token became a standard device of later Greek comedy. The device has been resurrected in literary works many times through the intervening m illennia to r esolve o therwise irresolvable questions of identity.

Iphigenia in Aulis Euripides (staged 406 B.C.E.)

Completed by Eur ipides' son and na mesake following his father's death, *Iphigenia in Aulis* elaborates on a situation that occurred at the beginning of the Trojan War. The invading Greek fleet has gathered at the port of Aulis on its way to the invasion of Troy. There, however, the fleet finds it self becalmed, and the prophet Calchas has informed the leader of the Grecian forces, King Agamemnon of M ycenae, that i n ord er to secure a n offshore sailing w ind f rom the go ds, A gamemnon m ust sacrifice his daughter Iphigenia to them. Pretending that he has a rranged a ma rriage between the hero Achilles and Iphigenia, Agamemnon has summoned his wife Clytemnestra and his daughter to Aulis, where the sacrifice will occur.

As the play opens, a distraught Agamemnon is commiserating with an old servant. The general tells h is old retainer that he is fortunate to b e a humble person. The old man objects that leaders get the g lory, b ut A gamemnon r eplies that the gods' wrath can shatter that glory in an instant. Repenting his decision to kill his child, Agamemnon has written a letter instructing Clytemnestra not to send the girl to Aulis. He gives it to the servant, instructing him to deliver the message and to t urn back the chariot c arrying the girl if the old man should encounter it.

The old man leaves, but he is intercepted by the king of Sparta, Menelaus, Agamemnon's brother, who has been suspiciously watchful and has taken the letter and read it. The brothers quarrel. A messenger i nterrupts to r eport that h e h as b rought Iphigenia a nd Clytemnestra to t he Greek c amp. Agamemnon thanks the messenger but privately bewails this misfortune. Moved, Menelaus undergoes a change of he art and sp eaks on b ehalf of sparing I phigenia. Now, however, her unlookedfor a rrival has convinced Agamemnon that he is in the hands of the fates and must go through with the s acrifice. M oreover, A gamemnon f eels su re that O dysseus and the army would force him to follow t hrough s hould he try t o a void h is f ate. Agamemnon merely hopes now that he c an keep word of the impending sacrifice from Clytemnestra. With her he dissembles, pretending that the wedding is to take place, describing the genealogy of t he g room A chilles, a nd d iscussing t he w edding arrangements.

Agamemnon p roposes t hat C lytemnestra g o home and not stay for the wedding—a suggestion she s trongly r ejects. C lytemnestra e xits, a nd a ch or us of women who have been on stage since the end of the first scene chant predictions about the p rogress of th e T rojan W ar a nd e ventual Greek victory.

Achilles, anxious for martial action, accidentally e ncounters C lytemnestra. H e ha s had n o news of the impending wedding. Clytemnestra speaks o f i t, A chilles i s b affled, and b oth ar e thoroughly e mbarrassed. A chilles m eans to as k Agamemnon f or a n e xplanation. B efore he c an leave, however, the old servant enters and explains Agamemnon's true purpose to the mother and the purported br idegroom. He a lso e xplains t hat Agamemnon made a n attempt t o s top the sacrifice. But Achilles is angry that he has been made a pawn in the business. He swears to assist Clytemnestra by intervening with Agamemnon.

She, ho wever, t hinks t hat her h usband is a coward a fraid o f the a rmy, a nd t hat A chilles' pleas will prove fruitless. Clytemnestra goes to Iphigenia, and when the two present themselves before Ag amemnon, h e p retends that th e w edding preparations are going forward. Clytemnestra flings the lie in h is face and c onfronts h im with her own s eries of t ruths. S he n ever lo ved him, she says. He killed her first husband, Tantalus, and a cquired her by force. Nonetheless, she was a true and faithful wife who kept his house and bore his children, and now he would sacrifice the life of her firstborn to recover Helen, a strumpet who fled his brother's palace with her lover. Clytemnestra darkly hints, moreover, at the welcome he will receive when he returns home from the war-his murder. To her mother's complaint, Iphigenia adds her own pleas. But Agamemnon is firm in his own resolve and has recourse to t he tyrant's usual plea, public interest and patriotism. The chorus sympathizes with Iphigenia's plight.

Now Achilles enters leading a small company of a rmed s oldiers. H e r eports t hat t he a rmy i s clamoring for Iphigenia's sacrifice, and that they tried to stone him when he spoke in her defense. Nonetheless, with his few soldiers, he is prepared to confront the entire host of the Greeks in defense of Iphigenia.

She, ho wever, ha s de cided t hat dy ing i n t he Greek c ause i s t he r ight t hing f or her to do remarking at one point: "A thousand women are not worth one man!" She counsels that the Greeks should t ake her l ife a nd c onquer T roy. A chilles admires her courage and regrets losing her as his bride.

Firm now in the rectitude of her sacrifice, Iphigenia c omforts he r mot her, w ho a t l ast ac cepts her daughter's death as inevitable. Iphigenia bids farewell to her baby brother, Orestes, and counsels her mother not to ha te Agamemnon, who is acting against his own will. Clytemnestra rejects those arguments.

In triumphant certainty, Iphigenia voluntarily goes forth to meet her fate as the members of the chorus celebrate her as the "conqueror of Troy."

Jain texts

The Jains of India belong to one of the world's oldest religious communities. The number of believers is currently estimated to r un between 3 and 4 million p ersons d ivided i nto t wo ma in l ines o f religious pr actice a ssociated with tw o sets o f teachers of divergent doctrines involving cosmography, i conography, and the h istory of the u niverse. These lines of practice are respectively called Digambaras (whose m onks r emain u nclothed, though their nuns wear robes) and Shvetambaras (whose monks and nuns both wear white robes).

As the historian of religion Paul Dundas tells us, the Jains do n ot, like Christians or Muslims, regard a si ngle prophet as their founder, and the texts that they revere do not occupy a place comparable to that of the Bible or of the Koran. On the contrary, the Jains actively discourage individual reading of their venerated texts. They think that doing so not only confers no benefit but also can be pos itively dangerous. Their texts n eed to b e studied under the guidance of a qualified teacher. The principal teachers of Jain history are classed as *fordmakers*. The *fords* that they construct a re the Jain c ommunities t he ma kers e stablish t hat create fords or crossings over the ocean of rebirth directly to the eternal state of bliss.

Jain t exts b egin from a p reliterate o ral t radition. A f ordmaker d irectly p erceived e ternal, uncreated truths and preached them. His disciples each i nterpreted h is u tterances a nd st ructured those interpretations into what Dundas's translation calls "a twelve-limbed basket of the disciples." Thus, a long h istory of or alt ransmission and interpretation precedes the eventual written preservation of the truths that have been handed down over the millennia. As one can imagine, the contents of such a tradition shifts continually. Around 150 c.e., worried that the accumulated wisdom of Jainism m ight d isappear, a D iagambara m onk named Dharasena finally wrote down his recollections of Jain teachings. This work underwent further development and has been preserved as "The Scripture of Six Parts." To this was later added a "Treatise on the Passions." These works were preserved in increasingly fragile manuscripts until their eventual (and at first unauthorized) publication in the 19th and 20th centuries.

The Shvetambaras principally venerate a work that continues to be presented orally during their annual eight-day September celebration of a festival c alled Paryushan. This w ork is c alled t he *Kalpasutra*. It is annually recited in Prakrit, a dialect t hat h ardly anyone in the audience c an understand. The two branches of Jainism concur that texts important to both of them have utterly perished. These, called the Purvas, seem to have disappeared around 500 c.e. The Purvas also seem to have contained the most difficult portions of the Jain creed, since, unlike the surviving texts that both branches agree were originally promulgated for women, the P urvas were a ddressed t o t he m ore rob ust intellects—as the Jains imagine—of the men.

Beyond these the Shvetambaras venerate some 45 other texts as canonical. A full listing of them appears in the Dundas reference in the bibliography. The D igambaras o ddly r eject m uch of t he Shvetambaras' canon, though they share a veneration for m uch that it c ontains a nd for the socalled F ive H omages t hat e xpress re spect for those who occupy the "highest stage": those who are (1) omniscient, (2) liberated, (3) teachers, (4) preceptors, and (5) monks.

Jain S cripture in both branches is thought to be authorless and without beginning. It has simply a lways b een. The c entral b ehavioral obs ervances o f bo th b ranches i nclude n onviolence, pacificism, and a strictly observed respect for the lives of all creatures—a respect that extends, for example, to c overing the mouth with a cloth lest an insect inadvertently enter and die.

Japanese literature, ancient

The word *ancient*, when applied to literature, can mean different things in different circumstances. If one limits the notion of literature to that which has been written r ather t han a lso meaning t hat which was sung or spoken before writing developed, then *ancient* alludes not t o a n arbitrarily defined time period but rather to that culturally relative moment when speech or song has been preserved in symbols. That moment occurred in Japan toward the end of the ancient and the start of the medieval period in Europe. The oldest surviving Japanese book is the *Kojiki* (Record of a ncient matters, 712 c.e.). The second oldest is the *Niho n Shok i* (Chronicles of Japan, 720 c.e.). B oth books, a s t he h istorian and translator of Japa nese letters, Donald Keene, tells us, a llude to e arlier do cuments in the Japanese l anguage, but a ll suc h do cuments were destroyed in a conflagration that occurred in 645.

In a ny cas e, t he J apanese d id n ot de velop a native system of writing to r epresent a l anguage that had evidently lived exclusively in the mouths of it s s peakers. Then, a round t he si xth c entury c.e., Buddhism arrived in Japan, bringing with it an already well-established textual tradition (see Buddhaa nd Bu ddh ism; B uddh ist t exts). Rather than develop an al phabet ---as the Kore-ans would do eight centuries later-or start from scratch with a n i dea of t heir own, the Japanese adapted Chinese characters to their own purposes in two ways. They first took so me of the many characters (over 5,000) that stood for whole words in Chinese, ignored their Chinese meanings, and assigned phonological value to each of the characters they selected. Second, still ignoring the Chinese me anings, t he Jap anese a ssigned whole concepts to some of the Chinese characters. Thus, a single ideogram might stand for a number like 1,000 without reference to pronunciation. Though this system surely must sometimes have proved awkward, it m ade p ossible t he l iterary p reservation o f im portant J apanese te xts. B ecause t he representation of the language was so cumbersome, h owever, modernizers of e arly Jap anese books rarely agree on the details of what the texts say.

They do, however, agree on the general lineaments of the contents. Included in this volume, then, readers will find ancient Japanese literature represented by brief descriptions of the two documents named above and also by the first and most celebrated co llection of Japa new poetry, t he *Man'yōshū* (*Collection for a Myriad Ages*). That collection contains poems composed as early as the fifth century c. e. The *Man'yōshū* appeared in its

first collected version around the end of the eighth century c.e.

Jerome, St. (Eusebius Hieronymus Stridonensis) (ca. 347–420 c.E.) *Roman prose writer*

Born to a Christian family at Stridon in the northeastern Adriatic sector of Italy, Jerome proved to be an intellectually precocious child. At age 12, he went to Rome to study with the influential grammarian Donat us. Following Jerome's baptism at age 19, he traveled in Gaul and, being attracted by the monastic life, he became an ascetic for a period of about two years. For reasons unknown, he then left the community he had joined in Aquileia and wandered through A sia M inor for a w hile. Then he briefly dwelled with a friend, Paulinus, in Antioch. Called again to the ascetic life, he isolated himself in the desert near Aleppo. There he fell ill and had a dream in which a voice reproved him for being not a real Christian but instead a follower of the thought of Cice r o. On recovering, he set himself t o p erfect h is k nowledge o f Gr eek a nd began the study of Hebrew.

In 379, J erome was ordained a priest of the Church of Rome. He conferred with several of the principal Christian intellectuals of h is time and then undertook a n a mbitious literary career i n earnest. He beg an by translating i nto L atin the Greek *World Chronicle* of Euse bius a nd a s election of the homilies of Or igen.

Jerome a nd P aulinus m oved t o R ome i n 3 82. Pope Damasus I welcomed him there by appointing Jerome his secretary. Jerome continued to practice a sceticism, a nd he a lso b ecame t he sp iritual adviser to a group of wealthy and devout women.

By collating Origen's *Hexepla* (concerning the six d ays of c reation a nd t he a ttendant H ebr ew Bibl e ma tter) with t he then-current v ersion of

the H ebrew Bible, J erome w as a ble to provide Pope D amasus w ith c orrected v ersions of t he Gospels and the Psalms. As a C hristian controversialist, h e w rote i n d efense of the perpetual virginity of Mary the Mother of Jesus, and i n a dialogue against Lucifer, he discussed the efficacy of baptism into communities of Christians deemed heretical, as well as the authority of the bishops of such communities.

To recruit for the monastic life, Jerome penned quasi-authentic b iographies o f H ilarion a nd a monk n amed M alchus. H e also defended the Christian ideal of virginity in two books entitled *Against Jovinian*.

Perhaps Jerome's most important work of this period (393–5) was his *Lives of Illustrious Men*—a work that listed 135 authors, both Christian writers and influential heretics. The first work of criticism to consider such authors seriously as men of letters, it began with St. Peter and ended with himself.

As a C hristian controversialist, J erome conducted a n on going a nd i ncreasingly bitter a rgument about Origen with his former friend Rufinus. When t he a rgument ended on R ufinus's d eath, Jerome expressed his satisfaction with the departure of "the scorpion." That he was an indefatigable correspondent is indicated by the survival of 117 of his letters.

All the while that he w as penning the works listed above, Jerome was also engaged in his most monumental work—a new version of the Bible in Latin that would be based on sound principles of textual c riticism. M oreover, with h is c ommand of b oth He brew and Greek and h is unparalleled learning, he was the person in his time most qualified t o a ccomplish the d aunting t ask. B etween 382 and 385, he r evised the old L atin version of the New T est a ment b y consulting the original texts of the Greek gospels. He u sed the Hebrew Sept uagint Ol d Test a ment a s the source of his new translation of the Psalms.

Then, f rom 3 91 to 4 06, J erome t urned h is attention to the Hebrew Bible, publishing a n ew translation of all the books it contained. While all this w ent f orward, h e a lso produced a s teady stream of commentary on the texts, on his methods of translations, and explanations of problems of Scripture posed by his friends.

In his last 15 years, Jerome turned his attention to the explanation of Scripture, employing the fourfold method of interpretation favored by the church fathers a nd e xplaining b iblical te xts i n ter ms o f their literal meanings, their implications for a moral life, the allegorical interpretations they would support, a nd t heir a nagogical import—that i s, w hat Scripture passages taught devout Christians about future glory. In so doing, he drew upon the exegetical methods that had found favor in Antioch, Alexandria, and the rabbinical traditions.

The Roman Catholic Church considers Jerome to have been its greatest ap ologist in explaining sacred Scripture. His version of the Bible remained officially accepted in the Western church until well i nto the E uro pe an Renais sance. Although recent editions of Jerome's complete extant works are a vailable in Sp anish a nd in F rench t ranslation, none seems to have appeared in English. The bibliography b elow, t herefore, i s i llustrative o f work available.

Jewish War Flavius Josephus (ca. 75–79 C.E.) In 67 c.e., Josephus had c ommanded the Jewish forces i n Pa lestine in t heir b attle a gainst t he Romans at Jotapata. There t he Ro man g eneral, Titus Flavius Vespasian, who later became emperor, disastrously routed Josephus's army. Josephus's detractors maintain that he betrayed his army to the Romans, su rrendering h imself o n adv antageous terms while leaving his for ces le aderless to suffer decimation. Others, including Josephus himself, suggest that from a very early date, he perceived that the only hope for his countrymen lay in cooperation with rather than antagonism toward t he Ro mans. H e p robably p erceived h is action as serving the interests of a greater goodpeace bet ween Ro me a nd Pa lestine. B oth o pinions a bout h im may b e t rue. Subs equent e vents supported h is v iew of t he matter, for w hen t he Jews c ontinued t heir r esistance, t he Ro mans sacked and leveled Jerusalem.

Josephus, in the meantime, went to Rome as a trusted and r espected client of V espasian. As a sign of that affiliation, Josephus took the Roman name Flavius. Then h e u ndertook to f ulfill th e imperial request for a h istory, written from the Roman perspective, that would present the conquerors as de stiny's f avorites a nd r econcile the conquered Jews to their at least temporarily subordinate pl ace i n the p rovidential s cheme o f things. In a word, Josephus became Rome's minister of propaganda for Palestine.

That c haracterization, ho wever, do es not undermine Josephus's credentials as an historian. He not only had at his disposal his personal experience as a ca mpaigner in t he war h e would chronicle, h e a lso had a t ha nd t he de tailed r ecords of t he Je wish W ar t hat had b een ke pt b y Roman field commanders, as well as a l arge and competent st aff of re search a ssistants quartered with him in Vespasian's private palace in Rome. Before him, too, he had the model of such predecessors as Juliu s Caesar and Thucydides.

Josephus's history of the war, then, recites the events largely as they happened, but he recounts them from the perspective of conquerors wishing t o p acify a subject p eople. First, J osephus penned a p reliminary w ork in t he S emitic tongue. This version of the history has perished. Then he amplified that version into the extant Greek work.

One of a circle of poets who achieved fame as the Sev en Sage s of t he Bamboo Gr ove, the 7'7" tall Ji Kang was an in-law of the imperial family of t he W ei dy nasty (see a ncient Ch inese dy nast ies a nd periods). H en onetheless he ld government service in contempt, as is clear in 18 poems addressed to Ji's brother on the occasion of the latter's induction into the army. The same disdain for officialdom also appears in a letter he wrote to another of the seven sages, Shan (Dao Tao). Ji broke off his friendship with Shan because Shan had joined the government.

As a p oet, J i b ecame t he m ost c elebrated member of his group. He preferred to write in an archaic s tyle, p enning li nes fou r s yllables i n length. He chose this form for about half of his 60 surviving poems. Ji was an accomplished performer on the lute or zither, and one of his poetic essays carefully details the origin of the instrument, its construction, and the method of playing it. The w ork si multaneously b emoans h ow hard it is to find a friend who "understands one's music." The phrase implies the difficulty of finding someone who can properly value the unusual constellation of attributes t hat m ake up Ji 's character.

In addition to composing poems, Ji occupied his time in various ways. He is also credited with having translated certain Indian Budd hist do cuments i nto Chinese. He was an am ateur blacksmith who tried to achieve immortality through a series of mystical breathing exercises, and he conducted a lchemical e xperiments w ith a view to prolonging life.

Two stories are told concerning Ji's unfortunate end. One has it that one day an important official came to call on him while Ji was working at his blacksmith's forge. Ji made the official wait while h e finished h is task. The offended official charged him with insubordination, and Ji was condemned to death. The other story says that Ji came to the defense of a friend, Lu A n, whose b rother had b rought c apital c harges against him. Wh en J i helped Lu, he to o w as arrested, and both friends were condemned to death.

The stories agree that thousands of Ji's disciples offered to take his place, but all to no avail. The stories also agree that before Ji met his end with e quanimity, his r equest to pl ay the z ither one last time was granted.

Josephus, Flavius (Josephus, Joseph ben Matthias) (37–ca. 101 c.E.) Jewish historian

The son of a Jewish priestly family with royalty on his mother's side, the precociously erudite Joseph ben Matthias found himself consulted for advice by rabbis when he was just 14. Wishing to learn all that he could about his Jewish faith, at age 16 Josephus undertook a program in which he proposed to spend a p eriod of time as a m ember of each of the principal factions of Judaism: the Essenes, the Pharisees, and the Sadducees. From 16 to 19, he lived the life of an ascetic Essene. At age 19, he affiliated with the Pharisees, and he spent the rest of his life as an adherent of that sect. If he also mastered the doctrine of the Sadducees, he did so without joining them. His writings suggest that he fulfilled his intentions vis-à-vis the Sadducees through a program of reading rather than through direct experience.

In 64 c.e., Josephus went from Jerusalem on a diplomatic mission to Ro me in an effort to convince the emperor Nero to r elease Jewish priests who had b een s ent to s tand t rial a s d issidents. Assisted by the emperor's wife, Poppea, and by a pop ular Jewish actor in Rome, Jo sephus accomplished h is m ission. D uring t his v isit, he a lso became convinced t hat Rome w as i nvincible. It was better to join the Romans than fight them.

That conviction was shaken by an unexpected Jewish victory over the Romans' Twelfth Legion in 66 c.e., and Josephus changed si des, le ading Jewish forces against the Romans in 67. The outcome s upported h is o riginal view, for J osephus surrendered to the forces of Vespasian in July of that year. After his defeat, Josephus predicted that Vespasian w ould one d ay b ecome emperor—an unlikely prospect in view of the fact that all the emperors thus far, ei ther by birth or adoption, were the heirs of Jul ius C a esa r's line. Nonetheless, the prediction gained for Josephus both Vespasian's favor and a place among the members of his staff.

The continued resistance of the Jews resulted in t he o utcome t hat Jo sephus had o riginally feared, the utter destruction of Jerusalem. Though after t he w ar V espasian g ranted J osephus a n estate n ot fa r f rom t he r uined c ity, J osephus instead opted to accompany Vespasian's son Titus back to Rome. There he adopted Vespasian's family name, Flavius, to indicate his status as a trusted client of the royal family. He also undertook a literary career that would last the rest of his life, becoming both a historian and a propagandist. In the l atter role , he s ought to p resent t he J ewish people in the favorable light to which their distinguished history entitled them.

Josephus composed his first work, *Wars of the Jews* (ca. 75–79 c.e.), in Aramaic but issued it in the Greek language. Using Julius Caesar's *Comment ar y on t he Gallic Wars* as his model, he slanted h is ac count to d issuade o ther Ro man dependencies from making the same mistake the Jews had in rebelling against Roman authority.

The work for which posterity best remembers Josephus is one that he entitled Judaic Archeology, now known as Antiquities of the Jews (published 93-94 c .e.). I n a ddition to b eing t he s ource o f most of the biographical information we possess about i ts a uthor, t his w ork ha s a s i ts ob jective ennobling the Jewish people in the estimation of learned Greeks and Romans. For his models in constructing this work, Josephus used, first, the Greek Septuagint version of the Hebrew Old Testament. This work shares much in common with the versions of the Hebrew Bible current in Western co untries. A dded to t hose ma terials, however, are others that were composed either in Greek or in Hebrew during the Hell enist ic Age. As his se cond model for h is ma sterwork, J osephus employed the Romaic or Roman Antiquities of Dion ysi us of H al ica r nass us.

For most of the first two millennia of Christianity, devout Christians pointed to Josephus's references to J esus Christ, John the Baptist, James the brother of Je sus, and ot her app arent c orrespondences with Christian New Test a ment e vents as in & pendent confirmation of biblical accounts and of the truth of Christianity. Antiquarian scholars, however, n ow l argely a greet hat the pa ssages

Jia Yi (Chia Yi), (201–169 B.C.E.) Chinese poet Born i n t he ci ty of Luoy ang (L o-yang), Jia Yi (Chia Yi) was already famed for his erudition by the time he was 18 years old. In particular, he had acquired a reputation for his ability to recite the entire Book of Odes and to compose literature. Learning of the youth's precocity, the governor of Honan, Lord Wu, invited him to become one of his retinue, and he became Jia's close friend and mentor. When Wu, in turn, was summoned to the imperial court as the commandant of justice, he recommended Jia Yi as a court scholar. Emperor Wen acted on the recommendation, and Jia joined the ranks of the imperial "erudites" as their youngest me mber. He soon distinguished himself as their premier thinker and rapidly advanced to the post of palace counselor.

Thinking that the Han dynasty should distance itself from it s pre decessors by i naugurating ne w ritual practices, Jia Yi made a series of recommendations on that s core. When Emperor Wen c onsulted h is o ther adv isors a bout t he su ggestions, however, t hey o pposed C hia's adv ice, a nd w hen the emperor suggested that the young man be elevated t o t he to p r ank o f i mperial adv isers, t hey slandered h im so t hat the emperor's c onfidence was shaken. Wen therefore sent Jia Yi a way from court to become tutor to the young king of Changsha (Ch'ang-sha) in the Yangtze valley.

Aware t hat h e had f allen f rom f avor a nd concerned ab out w hat he fe ared w ould be a n unhealthful climate, Jia Yi traveled south. When he reached the Xiang (Hsiang) River, he remembered that the watercourse was called the River Miluo further down. He also recalled that in that very river the great poet Qu Yuan (Ch'ü Yüan) had drowned himself after his overlord had similarly demoted him. Identifying with Qu, Chia Yi composed a fu poem entitled A L ament for Q uYuan. The verse pa id t ribute to h is p redecessor poet and simultaneously complained of Jia's similar circumstances.

After three years in the uncongenial climate of Changsha, J ia Yi became convinced that he would not live long. In the midst of h is depression, a bird of ill omen, an owl, appeared, and Jia Yi composed another mournful fu poem, "On the Owl," which reflects a good deal of early Han Daoist thinking.

About a year later, Emperor Wen recalled Jia Yi to the capital and took the opportunity to discuss with him the nature of spiritual beings. Jia's explanations so fascinated the emperor that he lingered listening late into the night and concluded that he had erred in sending the scholar away. The emperor reassigned Jia as the tutor to h is youngest and favorite son, Liu Chi, who was King Huai of Liang. Wen, h owever, s till w ould not entertain strategic po lti al advice from Jia. When a riding accident took the life of King Huai of Liang, Jia Yi blamed himself for not taking proper care of h is charge, fell into a deep depression, and died a y ear or so later at the age of 33.

Judith, Book of (ca. second-third century B.C.E.)

The B ook of J udith, f rom t he A pocrypha, recounts a story whose central episode—a famous subject for many works of art—is Judith's beheading of Holofernes.

Holofernes is the principal general of the armies of the Assyrian king Nebuchadnezzar. The general has besieged the Hebrew community of Bethulia and plans to bring the hitherto impregnable mountain town to its knees by the simple expedient of denying its people access to the spring upon which they depend for drinking and cooking water. The townspeople are on the point of surrendering and letting the Assyrian troops sack the city and reduce the population to slavery.

A b eautiful a nd w ealthy B ethulian w idow, Judith, c alls the town's elders together, however, and reports that the Lord has sent her a pl an to raise the siege. Casting off her widow's mourning, Judith d resses a nd makes her self up to lo ok her best. She then has the townsmen let her out and confronts the A ssyrian gu ards, s aying t hat she can show Holofernes a w ay to t ake Bethulia and other such hill towns without losing a man.

Judith t ells H olofernes, w ho re ceives he r courteously, t hat the B ethulians h ave s acrilegiously determined to e at u nclean a nimals and consume God's portion of their food supply. As a r eligious woman, she s ays, she c an p ray t hat God support the cause of Holofernes against the sacrilegious Jews, and he can conquer the entire region and win over the Jews with the support she can offer.

Convinced, Holofernes gives her three successive days of safe passage from his camp so she can go to the spring, bathe, and ritually purify herself. On the fourth night, she ac cepts an invitation to dine with the Assyrians. Overwhelmed by Judith's beauty and charm, Holofernes drinks more than he has ever done before and collapses in a drunken stupor. Following J udith's i nstructions, t he men of Bethulia attack the Assyrians, who had reported to Holophernes' tent and found him dead. The loss of their general has thrown them into such consternation that they become easy p rey for the I sraelite t roops, w ho ro ut t hem a nd t hen spend a month looting their camp. Judith takes the loot to Jerusalem and gives it to the temple. Then she r eturns ho me, w here she r emains a widow until her de ath at age 105. Julianus (Flavius Claudius Julianus, Julian the Apostate) (ca. 331–363 c.E.) *Roman prose writer*

The emperor of Rome after the death of his uncle Constantius (361 c .e.), Julian m ade v igorous efforts to disestablish Christianity as the state religion of Rome—hence h is s oubriquet *the apostate*. His efforts in that direction were largely fruitless, perhaps in part bec ause he r eigned only briefly, dying in battle against Persia at the age of 32. Nonetheless, Julian was an intellectual and s omething of a phi los opher. He p enned a

lost treatise against Christianity and also wrote a surviving, Greek- language encomium to the sun as a deity, entitled "To the Monarch the Sun." Another of his works add ressed the goddess Cybele: "To the Mother of the Gods."

A n umber of J ulian's l etters a lso su rvive. I n one notable one, "Against the Galileans," he advises a pagan priest on the best way to su pport the belief of his worshippers against the proselytizing of the C hristians. B eyond t his s ort of r eligious writing, he was also the author of sat ir es. One of the most celebrated was his *Symposion*, also entitled *The Caesars*.

Julian w as a g enerous pa tron of t he Gr eek schools of philosophy, and he intended to restore the temple at Jerusalem in contradiction of biblical prediction. In the latter project, however, as J. J. Eschenburg tells us, his intentions were thwarted by a series of disasters.

Juvenal (Decimus Junius Juvenalis?) (fl. ca. first–second century c.E.) *Roman Poet*

Attempts to construct a biography for Juvenal from the literary remains of his *Sati r es* and from scarce or long-lost fragmentary evidence elsewhere h ave always c ome to n othing. A s a r esult, w e c annot even say with certainty that the tripartite Roman name usually assigned to Juvenal is correct. We d o k now that the Roman poet Martial addressed three epigr a ms to Juvenal in which he alludes to the furious pace of Juvenal's life and to h is ac complishments a s a n o rator. Juvenal's recent translator, Su sanna Morton Braund, follows c ustom b y sp eculating t hat J uvenal ma y have be en a pers on of c onsiderable wealth a nd social status since patronage did not seem to concern him.

Like the satirist Pers ius before him, Juvenal's poetic voice was an angry one-at least at first. In fact, the aggressive invective of Roman satire is often cited as one of its distinguishing characteristics. The rhetorical style of Juvenal's satires and their declamatory subjects, such as recommending a specific set of actions or addresses of farewell, welcome, or comfort in adversity, also point to a rhe torical b ias. A s t ime pa ssed, ho wever, Juvenal's satiric art grew more subtle and began including double views of the objects of his satire. To a d egree, i rony r eplaced i nvective, a nd t he stance of t he a uthor b ecame more re flective a s Juvenal tried to emulate the peace of mind characteristic of the Greek philosopher and polymath Democritus, w ho w as k nown a s " the l aughing philosopher." A particularly at tractive a spect of Juvenal's mature satiric approach arises from the double edge of h is wit. The satirist is willing to satirize himself along with or as one of the objects of his disapproval.

Beyond ec hoes of e arlier s atire, J uvenal's works also reveal a broad acquaintance with the principal literary modes of the Greek and Roman world: epic, t r agedy, co medy, el eg y a nd el ega ic p oet r y, a nd e pigram. B eyond h is s atires' rhetorical to ne, t he e pic ma nner o f J uvenal's work c onstitutes a n ovelty i n t he s atiric g enre. His e xpansiveness c ontrasts sha rply with th e terse economy of Persius's few lines.

It is f air to suggest that the h istory of t he satiric mode in Western letters comprises a long series of footnotes to t he genre as P ersius a nd Juvenal m olded it. The vehicles for s atire have expanded far bey ond the Roman d actylic he xameters of Juvenal. Nonetheless, the techniques by w hich s atire at tempts t o a chieve m oral improvement in its readers by exposing and ridiculing v ice re main l argely t hose t hat J uvenal developed.

The names of his literary descendants in Western letters a re legion, but na ming some of them will suffice to suggest Juvenal's influence. Boccaccio, Geo ffrey C haucer, E rasmus, J ohn D onne, John D ryden, B en J onson, M olière, a nd S amuel Johnson are a few of those who learned a sig nificant p ortion of their s atiric a rt f rom J uvenal's example.

K

Kakinomoto no Hitomaro (fl. seventh

century C.E.) Japanese poet

We k now l ittle a bout the l ife of a ncient J apan's best-known poet, Kakinomoto no Hitomaro. We do know that he served the widowed empress Jitō (ruled 686–697, regent until 702) as her principal court poet and that all of his poems with known dates of composition appear in the second section of the e arliest a nd g reatest of a ll c ollections of Japa new poetry, the *Man'yōshū*.

Hitomaro's poetry reflects his devotion to his sovereign and to the imperial family. He apparently believed ardently in the hereditary divinity of the family's members, and he frequently spoke of the empress as a goddess—one whom the tutelary deities of rivers and streams obey.

It fell to H itomaro to c ompose eu logies f or members of the royal family. H is e l egy on t he death of Prince Takechi is the longest poem in the entire collection and lauds the young man's bravery and p rowess i n ba ttle. H itomaro's em press had lost her husband, Emperor Temmu, and as a devout and pious woman, she undertook religious pilgrimages that Hitomaro also regularly memorialized in his verse. It seems to have been the poet's task to assure that the members of the royal family and t heir de eds b e r emembered t hrough all time. Hitomaro's work was not entirely governed by his official responsibilities, ho wever. On e of h is most deeply felt and moving elegies commemorates the death of a stranger whose body lay abandoned on a b each. The p oet t hinks a bout t he man's absent wife, waiting at home for the husband who will n ever return and whose fate will remain forever unknown.

Knights, The (Hippes, Equites)

Aristophanes (423 B.C.E.)

The most directly political and perhaps the least theatrical of Ar ist ophanes' 11 surviving comedies, *The Knights* mounts a relentlessly rancorous attack on the Athenian politician Cleon—a demagogue w hom A ristophanes a bhorred. De spite the low opinion of the play voiced by such 20thcentury c ritics a s W hitney J ennings O ates a nd Eugene O'Neill, J r., t he j udges a t t he A thenian festival of Lena ea awarded the play the first prize in the festival's comedy contest.

An actor portraying the great Athenian leader Demost henes o pens t he d rama. H e c omplains about a nd c urses C leon, t he Pap hlagonian, w ho had p ressed t he A thenians to c ontinue t he P eloponnesian War and had secured the high regard of many Athenians by leading their forces to v ictory over 420 Spartan hoplites (soldiers) on the island of Sphacteria. Nicias, a leader of the peace party, seconds t he c urse b y w ishing t he pl ague o n C leon, and the two commiserate, seeking a way to undermine Cleon. Neither can think of anything, so they agree to share their troubles with the spectators.

Demosthenes su mmarizes t he si tuation. H e and N icias h ave, h e s ays, a v ery b rutal ma ster named Demos. In this play, the character Demos stands for the Athenian populace at large. Demos, says D emosthenes, bo ught a slave—a Pap hlagonian tanner. The slave, who of c ourse represents Cleon, has pulled the wool over the eyes of Demos and is bleeding him and everyone else dry. He has managed to gather all de facto power into his own hands.

Demosthenes has Nicias steal some wine for him. With the wine, Demosthenes lubricates his wits and has Nicias steal the oracle of the Paphlagonian, w hol ies' i ndoor d runk, sn oring, a nd flatulent. R eading the o racle's p redictions, th e two discover that a sausage seller is destined to overthrow Cleon and rule the city. Happily, a sausage seller enters immediately, and Demosthenes sets about convincing him of his great good fortune. He will become the ruler of A thens. The sausage se ller p leads i gnorance, l ack o f e ducation, and dishonesty. Demosthenes explains that precisely these traits best qualify him to lead the state. He then reads the oracle and interprets it for the sausage seller. The sausage seller continues to p rotest, b ut Dem osthenes has a n a nswer for every objection. When the sausage seller asks

who will be allied with him—given that rich people fear the Paphlagonian—Demosthenes assures him that 1,000 brave knights will stand with the sausage seller against Cleon.

Cleon enters, uttering threats, and the sausage seller tries to run away. Dem osthenes restrains him, however, and calls the knights to the rescue. The ch or us r ushes on s tage attired as k nights. They begin beating Cleon, who calls for help. The leader of the chorus explains that he deserves the beatings a nd e numerates s ome of h is c rimes against the people.

Seeing his candidacy supported by the knights, the sausage seller begins to out-shout Cleon. Occasionally punctuated by Demosthenes' comments, a screaming match follows between the two. The argument focuses, first, on which of the two candidates for public office is the bigger crook. Then it shifts to a s eries of t hreats a bout how e ach will harm or kill the other. The disagreement reaches a climax when the sausage seller beats Cleon with a sausage, and Cleon departs to denounce the sausage seller to the senate on grounds of his conspiring against the Athenian state. The sausage seller follows, and Demosthenes also leaves the stage.

There follows a fascinating interlude in which the chorus explains to the audience Aristophanes' reasons for not having produced a comedy under his own name until this present play. They explain that, fearing the censure and the fickle nature of the audience, A ristophanes' prior comedies were trial balloons, floated to ascertain the drift of the audience's taste and preferences. Feeling that he now h as t aken t he m easure of t heir t aste, a nd confident of his victory in the competition, Aristophanes has a llowed h is na me to b e a ssociated with his work.

This announcement is followed by two invocations to the deities Poseidon and Athena. A paean of praise follows each invocation, first in honor of the Athenians of old who would have found Cleon beneath o fficial notice, a nd s econd i n ho nor o f Athenian horses—the s teeds w ho c arried t he knights who have been Athens' hereditary protectors. The song thinly disguises a call for the overthrow of the real Cleon.

370 Knights, The

Now the c horus welcomes b ack t o the stage the new hero of the Athenian people, the sausage seller, who reports that he has beaten the senate. In a mockery of bribing public officials, Cleon and the sausage seller have appealed to the senators' appetites for anchovies, coriander seed, and leeks. The sausage seller wins the bribery contest.

Cleon n ow r eenters, a nd t he c ompetition o f threats resumes where it earlier left off. Having lost before the senate, Cleon n ow challenges the sausage seller to a direct appeal to Demos—the allegorical figure w ho s tands for t he A thenian people.

The candidates for Demos's favor swear their love for Demos, but the sausage seller's gifts of a cushion for the old man's stone seat and some cushion-soled shoes incline Demos to ward him. Eventually the sausage seller seems about to prevail, when Cleon appeals to prophecy, and Demos demands to hear the predictions for each.

The two contenders rush off and return bearing reams of prophecies. The prophecies contain gibberish, a nd t he c ontestants, l ike i gnorant preachers, interpret t hese da rk p rophecies self-interestedly.

The chorus warns Demos that he is easily flattered, f ooled, a nd le d b y p oliticians with o nly their o wn elf-interest to offer. Dem os r eplies that he only pretends to be foolish; really he is using the politicians as his pawns. Demos's behavior, however, undermines this argument.

At last Cleon and the sausage seller compete in offering Demos things to e at. Cleon seems on the verge of winning, for he has brought a stewed hare. Before he c an present it, however, the sausage seller distracts Cleon, snatches the hare, and gives it to Demos. Pressed to a de cision between the r ivals, ho wever, Dem os s till he sitates. The sausage seller now suggests that Demos examine the b askets of t he c ontenders. Dem os w ill d iscover t hat the sausage s eller's i s em pty; he ha s given his all. In Cleon's basket, however, Demos finds t hat C leon ha s ke pt f or h imself t he l ion's share of everything he has offered Demos.

Forced to h is final st ratagem, C leon s ays h e knows the name of h is successor, for the oracle

has revealed it to him. He asks the sausage seller a series of questions: Where were you schooled? What did you learn? What trade did you follow? Where did you sell your sausages? The sausage seller's a nswers to t hese que stions a re t he o nes that th e o racle h ad p redicted, a nd a de jected Cleon knows at last that his days of demagoguery are finished. He withdraws in the face of the sausage seller's victory.

Demosthenes congratulates the victor and, as a r eward for h is s ervices, a sks for a m inor b ut potentially lucrative appointment as secretary to a law court. Demos asks the name of h is (that is, the city's) new steward. The sausage seller reveals that h is n ame i s A goracritus b ecause he ha s always lived in the marketplace (the *agora*) amidst lawsuits.

After yet another choral interlude, Agoracritus returns t o t he s tage a ccompanied b y a f reshly robed, golden-crowned, rejuvenated Demos. Agoracritus explains that he has freshened up Demos on his stove. Demos shows himself now possessed of b etter j udgment t han h is past t oleration of Cleon d isplayed. Ag oracritus i s a ble to pre sent Demos w ith a b eautiful y oung g irl, g orgeously dressed, w ho a llegorically r epresents a 3 0-year truce between Athens and Sparta and its Peloponnesian allies—a truce that A ristophanes urgently hoped would eventuate.

Agoracritus pronounces a n appropriate punishment for Cleon: He will be forced to become a sausage seller, exchange foul language with prostitutes, be perpetually drunk, and otherwise only be allowed to drink dirty water from the public baths. Dem os a pproves this s entence, a nd t he play ends.

This d rama was t he t hird i n w hich A ristophanes pursued his enmity for Cleon. After the firsto ft hem, the playwright's now-lost *The Babylonians*, Cleon brought charges of high treason against Aristophanes. Wealthy and aristocratic, however, Aristophanes remained contemptuous of the Paphlagonian- tanner- bcome- demæogue whose hawkish war policies, as the playwright accurately f oresaw, w ould b e t he r uin o f Athens.

Kojiki (*Records of Ancient Matters*) (712 c.e.)

The oldest surviving example of ancient Ja panese liter ature, the *Kojiki* came into being when the emperor T emmu (r. 672–686), p erusing e arlier texts s oon a fterward de stroyed, found in them many er rors. He c ommanded a c ourtier na med Hieda no Are to memorize the prop er versions and to write them down. The real p urpose w as political—to establish on record the divine status of the imperial family. The *Kojiki* is essentially a genealogy.

Many preliterate societies had specialists who were t rained i n memorization to s erve a s t he repositories o f t he f oundational p oems, s ongs, myths, a nd g enealogies o f th eir c ultures, a nd Hieda no Are seems to have been such a person. The l iterary h istorian Do nald Ke ene, w hose account I summarize here, tells us that Heida no Are memorized a nything he (or, a s s ome argue, she) read or he ard on the first en counter. Hieda no Are's work came to fruition in 712, when the collection was presented at the emperor's court. The *Kojiki* transmitted the foundational myths of the Japanese tradition to the ages that followed.

Following a flowery i ntroduction by a nother person, Õ no Yasumaro, who was the scribe who wrote down what Hieda no Are dictated, the first book of the three-book work begins on the High Plain of Heaven, where three gods pop into existence. The e arth b elow i s n ot s olid a nd d rifts about. It shows some signs of plant life.

Other gods come into being. Among them we find I zanagi a nd h is w ife, I zanami. They a re charged with solidifying the fluid land below and with c reating m ore s olid e arth. Wi th a je weled spear, Izanagi stirs the mess below until it solidifies into a place where he and Izanami can copulate. They do this, and Izanami immediately gives birth t o m onstrously m isshapen offspring. The pair keeps trying until they get it right, and now Izanami gives birth to the principal islands of the Japanese a rchipelago a nd t hen to a n umber o f lesser islands.

Izanagi and I zanami ke ep at t heir t ask, a nd she now bears the gods responsible for overseeing such natural p henomena as winds, fire, the sea, and so forth. When she b ears the fire god, however, Izanami is horribly burned. In the throes of the consequent illness, she excretes and vomits, and from the solid and fluid results, more deities come i nto being—35 i n a ll. Then I zanami d ies. Angered, I zanagi b eheads a nd d ismembers t he newborn fire god. From his blood and body parts, another 16 deities spring into being.

In a story r eminiscent of t hose of Or pheus and E uridice and th at of Proserpina in Greco-Roman mythology, Izanami seeks out his wife in the land of the dead. She cannot return as she has eaten there. Other parallels between the Japanese myths and those of Europe and the Middle East suggest a c ommon a neestry lost in the mists of prehistory.

Keene p oints o ut a n u nparalleled d atum i n the Japanese creation story, however. An unusual effect derives from the peculiar circumstance of the procreation and birth both of the land and of the nature gods. One of them, the sun god, is the ancestor of the Japanese emperor. This makes the e mperor a blo od r elative of t he l and he rules.

The *Kojiki* contains stories of such hero-gods as Susano-o, who functions both in he aven and on earth. Susano-o is c redited with having written the earliest-ever surviving Japanese poem to mark his construction of a palace for his bride.

The *Kojiki* also features fables a nd fol k t ales. One of t hese c oncerns a n en counter b etween a clever rabbit and some slow-witted crocodiles. The rabbit tricks the c rocs i nto forming a b ridge for him. He almost makes it across the water on their backs, but the last crocodile skins him. As a trickster tricked, the rabbit suffers at the hands of several gods. Eventually a nother deity, Ōkuninushi, relieves the rabbit's pain. To repay the k indness,

372 Kojiki

the r abbit f oretells th e w edding o f Ō kuninushi and Princess Yagami.

Stories a bout Ō kuninushi—including t wo i n which he serially dies and is resurrected-occupy the next extended portion of the narrative. In the course of his story he defeats his 80 wicked brothers. I n a s eeming r ecapitulation of t he e arlier story regarding the birth of the land, Ōkuninushi and h is w ife p roduce t he c ountry o f I zumo. Ōkuninushi i s a lso a b ard, a nd he a nd a nother princess e xchange s ome e rotic s ongs. H is w ife grows jealous, and more singing exchanges result. On condition that he be revered and worshipped in Izumo, Ōkuninushi cedes control of his land to the goddess A materasu. She, in turn, calls upon her grandson to come down from heaven to rule, and she presents him with the imperial insignia: beads, a mirror, and a sword.

Having a rrived on e arth, the g randson marries a human being, but he offends her f ather by insisting on wedding the more beautiful younger rather than the plainer elder daughter. The father curses the new emperor and his descendants with mortality. This brings to a close both Book 1 and the mythical age of the gods.

Book 2 traces the careers of mortal but nonetheless superhuman descendants of the emperor. His grandson, Jimmu, enlarges the domain over which h e r ules. H is c onquests a nd en counters continue to derive from the world of myth, and he lives to be 137 y ears old. A g enealogical s ection follows until we arrive at the 10th emperor, Sujin. With him, the *Kojiki*'s account apparently becomes more h istorical a s t he d ates o f i mperial de aths begin appearing. These dates are n ot a lways certain, but it seems that Sujin died either in 258 or 318 c.e.

Book 2 a lso i ntroduces the s econd principal character of the *Kojiki*, the angry and bloodthirsty fratricide, Yamato-takeru. He is the son of Emperor Keiko, who fathered 80 c hildren a nd i n old a ge married his own great- great-great granddaughter. Yamato-takeru slices people on the slightest provocation. This f erocity w ith po tential r ivals makes p ossible a c onsiderable e xtension of h is father's realm. Keiko, however, does not want his violent son a round the court and keeps sending him off into dangerous situations. Happ ily, the young man's a unt, Yamato-hime, p repares her nephew for dangerous situations with a gift of a magic s word and a bag to be opened in c ase of dire emergency. His charmed gifts, his unusual strength, and his luck holds out for a long time, but eventually old age catches up with him and he dies. Just as the funeral is about to start, Yamatotakeru m etamorphoses i nto a large, white b ird and flies a way. B efore hed ies, Yamato-takeru yields t o p oetic impulse and c omposes se veral poems, including one celebrating the beauties of his birthplace.

In the balance of book 2, we learn of the 14th emperor, Chuai, who raided Korea—a fact seemingly confirmed by a Korean account of such an expedition in 364 c.e. The 15th emperor, Ōjin, may have sent ambassadors to China in 421 and 425. During his reign, as well, Chinese emissaries arrived bringing 10 volumes of the *Anal ect s* of C onfucius a nd ot her C hinese w orks. This event m arked t he i ntroduction o fl iteracy to Japan.

Book 3 beg ins by re counting the r eign of a Confucian e mperor, N intoku. This w ise k ing implemented s ocial pro grams, r emitted taxes, and suspended military conscription for a time.

A tale of incestuous love between a prince and a princess, both named Karu, follows. It becomes the archetype for an often- recurring subcategory of Japa nse tale—the love suicide story. Prince Karu is e xiled f or h is f orbidden lo ve. P rincess Karu follows him to his place of exile. There, after he composes two love songs, they commit joint suicide.

Tales of palace intrigues and murder alternate with stories of love. O ne of t he latter r ecounts how the emperor, on seeing a lovely girl, tells her not to marry till he sends for her. After 80 years of waiting, she seeks him out. (The emperor lives to be 1 24.) Though her fidelity m oves Y ūryaku t o mull o ver marrying h er, he i nstead g ives her a pair of songs. In one of them, he regrets their not having slept together in their youth. Now, he says, *she* is too old. (Emphasis mine.)

Apart f rom t his touc hing t ale, Y ūryaku i s pictured as a monster whok illed most of h is own children. One who escaped that fate, Seinei (ruled 4 80–84 c.e.), su cceeded h im. W ith increasingly s ketchy a ccounts o f i ndividual reigns, the *Kojiki* traces the imperial succession down to the 33rd ruler of Japan, Empress Suiko (r. 593–628).

Laozi (Lao Tzu, Daode jing, Tao Te Ching) (ca. 300 B.C.E.)

The ol dest of t he t hree m ost p rominent T aoist texts, the *Laozi (Lao Tzu)* was formerly attributed to a her mit named Laozi (Lao Tze) or Lao Tan, a contemporary of C onf ucius. N ow, ho wever, the work as we have it is thought to be more recent, though considerable older material may be included in it. A formerly unknown silk manuscript that antedated a ny o ther v ersion b y a bout 5 00 y ears has r ecently (1973) b een d iscovered a mong t he trove of manuscripts (see Ch inese et hical a nd hist or ical liter atu re in ve rse and p rose). The work's alternative title, *Daode jing*, translates as: [*the*] Way [and] integrity classic.

In its current form, the *Laozi tzu* contains 81 short stanzas. These are in part old adages and in part commentary on or interpretations of the sayings. The text seems to c ontain the key to g reat though sometimes illusive wisdom. Partly this is

owing to the inaccessibility of the *Dao* (*Tao*)—the absolute or primal principle of the universe that precedes a ll else—to t he o peration o f h uman intelligence. Many metaphors purporting to suggest t he n ature of t hat principle are included in the *Lao Tzu*.

Accompanying t hese m etaphors a re a s eries of su ggestions concerning what people should do and the mind-sets they should adopt to bring themselves i nto a ha rmonious relationship with the Dao. Principally, these suggestions propose a program of s implicity, na tural ac tion, a nd passivity—of going with the universal flow.

"The sage," in Victor H. Mair's translation of the d ocument, " knows w ithout jo urneying / understands w ithout lo oking / ac complishes without acting."

Striking metaphors abound in the document. Since people are soft and flexible when they are alive and rigid when dead, the sage suggests, rigid people are ad herents of de ath and flexible one s are "lovers of life." People who seek an "excess of praise" u ltimately have n one. To d ie b ut to b e nonetheless re membered d efines lon gevity. A ll being is grounded in nonbeing.

The wise person treats everyone well—both people who are good and those who are not. The

way that one treats individuals applies as well to the way that families treat families, villages treat villages, and governments of whatever sizes treat one another. Thus, the *Lao Tzu* implies a political as well as a personal program. That program requires existing in harmony with the universe. The book recommends humility, modesty, nonassertiveness a nd t he p eaceful c oexistence o f nations.

In an inventory compiled by the scholar Wing-Tsit C han, t he p rincipal c oncepts c ontained i n the work include being and nonbeing, desires, the quality of being female and that of water, government, h umanity a nd r ighteousness, k nowledge, name, t he na tural, lack of s trife, t he c oncept of oneness, re lativity, go od and e vil, c ertain pa radoxes, r eversal, si mplicity, T ao, t ranquility, v irtue, weakness, and refraining from action.

Victor H. Mair's discussion of the state of current scholarship concerning the Lao Tzu (which in Mair's translation is entitled Tao Te Ching) is fascinating. He brings to bear linguistic scholarship that establishes cognates between the ancient Chinese language and the Indo- Eu to pe anlanguages of Europe and Asia. English, of course, belongs to the Germanic subbranch of the Western development of these languages. The languages of contemporary n orthern I ndia a nd R ussia b elong to families within the Eastern b ranch. Mair gives several instances of cognate words and phrases, showing t hat t he a ncient C hinese l anguage d id not develop in a c ultural vacuum but must have had considerable contact with languages spoken by people living to the west of China. Mair argues convincingly for a long period of oral circulation of the concepts described in the book before they came to be or even could be written down.

Beyond d emonstrable re lationships a mong words found in several languages, Mair also discusses t he co rrespondence in concepts to be found among several of the world's religions. He particularly traces parallels between Daoism and the Yogic tradition of India and points as well to r elationships between Dao ism a nd P ersian Sufism. H e a lso finds more ge neric c orrespondences among several religions for such concepts as "vital breath," which has both verbal and ideological correspondences with the idea of *spirit* as well as with the late historian of religion Mircea Eliade's notion of "the myth of eternal return" of such spirit to its cosmic source.

Leonidas of Tarentum (fl. ca. 294–ca. 281

B.C.E.) Greek poet

An author of epigr a ms in the Doric dialect of the Greek language, Leonidas enjoyed a reputation as a poet in the genre second only to that of his contemporary, C all imachus. H is literary remains include about 100 fine examples of epigram. The literary historian Alan Douglas Edward Cameron explains that the epigrams of L eonidas differed from those of Callimachus. Whereas Callimachus wrote about love, Leonidas was a poet of the people. H is highly wrought verse and long, or nate sentences a ddress m atters of e veryday life. H is poems contain epitaphs for rural folk, mariners, and fisherman, and some of his verse is dedicated to such people.

Leonidas's v erse a lso s uggests t hat he le d a wandering life, visiting many places on the shores of the Aegean Sea and on the Grecian archipelago. Cameron proposes that Leonidas followed the philosophical doctrines of the cynic philos ophers (see c ynicism). This conclusion rests on autobiographical poems in the body of Leonidas's work that recount the poet's poverty, and on the fact that Leonidas wrote a n e pitaph for D iogenes of Sinope—one of the icons of the cynics' position.

Letter of Polycarp to the Philippians

(ca. early second century B.C.E.)

The scholar of Christian antiquity and most recent En glish translator of The *Apostli c Fathers of the Chr ist ian Church*, Bart D. Ehrman, su ggests that we know more about Polycarp, the bishop of Smyrna, than about any other Christian of his era. In the collection of seven texts written by the Apostolic Fathers, one text is a letter that Polycarp wrote, another is a letter add ressed to h im, and a third is a letter written on the subject of his martyrdom.

Polycarp's L etter to t he P hilippians, s ays Ehrman, is essentially a "cover letter" written to convey a collection of the Letters of Ignatius to the Philippians in answer to their request that Polycarp forward them. A dditionally, P olycarp lets the Philippians know that he plans to honor both their request and that of the martyred Ignatius that Polycarp send on a letter from the Philippians t o An tioch. B eyond t hat, P olycarp expresses his concern about the apparent financial chicanery of Valens, a member of the Philippian c ongregation. He a lso o ffers adv ice f or dealing with the problem.

Finally, striking a chord that seems to resonate with the worries of many early Christians, Polycarp warns against those heretical teachings that doubt the reality of a f uture resurrection and a final j udgment. Ab ove a ll, P olycarp c ounsels right li ving a nd m oral b ehavior, quo ting b oth from scriptural and nonscriptural sources to lend weight to his advice.

Letters Pliny the Younger (ca. 62–ca. 114 c.E.) We do not know exactly when Pl iny t he Younger decided to ma ke as election from h is letters and publish them. It must, however, have been a relatively early decision, for all the surviving letters a re c arefully, e ven a rtfully, c omposed a nd bear w itness t o t he s uperb o ratorical e ducation that P liny r eceived u nder t he i nstruction o f Quint il ian.

The first n ine of P liny's 10 books of l etters contain m issives add ressed to m ore t han 100 persons. A s P liny has organized t hem, the first nine books are chronological, though the order of le tters w ithin the books is n ot. P liny's objective—admirably fulfilled—seems to have been to prepare an epistolary history of his life and times and of matters that he found important and interesting. The 10th book contains his official correspondence with the emperor Trajan—both Pliny's letters asking the emperor's advice and the emperor's responses.

A c haracterization o f t he a uthor h imself emerges f rom t he y ounger P liny's c orrespondence. He was a reliable friend and a loving husband. L ike o ther w ealthy Ro mans, he o wned slaves. H e u nderstood, ho wever, t hat t hey to o were hu man b eings, a nd he t reated t hem w ith kindness a nd consideration. He was also impatient with others who did not. He carefully performed the duties of every office that he occupied and was a person of unimpeachable character. He was natural and unaffected and ruefully aware of his own eccentricities.

Rather than try to give a full overview of the contents of such an extensive collection of letters, what follows represents a selection of some of t he more c elebrated e xamples of P liny's correspondence.

In book 3, letter 5, addressed to Baebius Macer, Pliny d escribes in a bsorbing d etail hi s u ncle Pli ny th e El der's literary work and provides a list of his compositions.

Book 6, letter 16: Addressed to Cornelius Tacit us, this famous letter describes the eruption of Mount Vesuvius in 79 c.e., to which the younger Pliny was an eyewitness, and the death of Pl iny the Eld er d uring that disaster. The elder Pliny was in command of a naval squadron stationed at Misenum in the northern sector of the Bay of Naples. H is family a ccompanied him, including his nephew and adoptive son, Pliny the Younger. His mother was first to notice the unusual cloud over the mountains to the southeast. It seemed shaped like a tree—sometimes white and sometimes blotchy with its burden of "soil and ashes."

The el der P liny m eant to p ut out to s ea i n a warship for a closer look and invited his nephew along. He, however, h ad h omework to do a nd so demurred. As a squadron of ships was readied for sea, a m essage c ame f rom Re ctina, w ife of Tascus. Her house was at the foot of Vesuvius, and her only possible e scape was by boat. The commander i mmediately sailed to the rescue, planning to pick up as many people as possible with his warships. They sailed through a fall of a shes that grew thicker and hotter the nearer they came to Vesuvius. A s they ap proached their destination, however, they found their way blocked by debris from the explosion. He therefore changed course for Stabiae, four miles south of Pompeii, where his friend Pomponianus had a villa and an anchorage. There he greeted his friend and asked to ba the and nap s o that h is composure m ight calm his friend's anxieties.

As Admiral Pliny slept, the eruption became increasingly a ctive, a nd t he f allout o f a sh a nd pumice s tone h ad a lmost blocked h is c hamber door. He awoke to v iolent e arthquakes. He a nd his c ompanions decided to r econnoiter, t ying pillows on their heads to protect themselves from falling p umice st ones. A rriving at t he harbor under a night-black s ky, he f ound t he s ea i n a fury. By now the atmosphere had g rown so sulphurous that it was no longer breathable. Overcome, t he el der P liny c ollapsed a nd d ied. Two days later, his body was found uninjured.

Letter 24 of book 6, add ressed to C alpurnius Macer, reports the heroism of Arria, the wife of a neighbor at Lake Como, who discovered that her husband was suffering from a painful and incurable cancer. When she saw there was no hope, she encouraged him to c ommit suicide by drowning in the lake. When he did so, she roped herself to him and also drowned.

Letter 27 of book 7, addressed to Licinius Sura, reports that P liny i s predisposed t o believe i n ghosts because of an experience reported by Quintu s Rufu s Curt ius, who apparently encountered a woman of superhuman size. Saying that she was the spirit of Africa, she accurately predicted that he would b ecome gove rnor of Africa and die there. Pliny also repeats the story of a chain-rattling specter that inhabited a mansion in Athens. This visible ghost seemed to be a fettered and manacled, emaciated o ld m an w ith a lo ng b eard a nd ha ir t hat stood u p st raight. A nyone who d ared live in the

378 Letters

house would infallibly grow ill from lack of sleep and die.

To test the veracity of the story, the Greek philosopher A thenodorus sp ent t he n ight i n t he house taking notes, the ghost appeared, beckoned Athenodorus to follow it, led him into the courtyard, a nd t hen v anished. A thenodorus ma rked the spot. The next day, he had the city magistrates give o rders t o have t he c ourtyard d ug u p. On doing so, they discovered a chained and manacled skeleton. They g ave it a pu blic bu rial, a nd t he ghost appeared no more.

Pliny appeals to p ersonal experience for h is final example of supernatural activity. On t wo occasions, m embers o f Pliny's household h ad dreams that someone was cutting their hair. On awakening, each found that the dream was true and that the cuttings were on the floor. Pliny interpreted these occurrences as warnings that, at the time of the murder of the emperor Domitian, t he em peror had b een pl anning to t ake action against Pliny for his support of the senate against Domitian. Pliny a rrived at this conclusion because it was customary for accused persons to let their hair grow. He interpreted the haircuts to m ean th at D omitian's d eath h ad averted t he d anger of P liny's i ndictment. This view f ound s upport i n p apers discovered i n Domitian's death.

Perhaps the most notable exchange in the official correspondence contained in the 10th book of the Letters is that between Pliny, who was governor of t he prov ince of Bit hnia a nd t he emperor Trajan on the subject of persecution of Christians-letters 96 and 97. In the first letter of this pair, Pliny asks Trajan for advice concerning his handling of accused Christians. Their crime was membership in a foreign, and therefore subversive, cult. Pliny, however, is not sure whether or not si mple membership is adequate grounds for t he r equisite de ath p enalty. S o he a sks t he emperor's advice-though n ot u ntil he ha s already sentenced several Christians. Pliny wants to k now if h e s hould sentence y oung an d ol d alike, i f a nyone disavowing C hristian b eliefs

should b e spa red, a nd i f m erely b eing c alled Christian demands the sentence or if some other crime must be connected with the name before the death sentence is necessary.

Pliny explains that he has already condemned some because "their stubbornness and unshakeable obstinacy ought not to g o unpunished." He has, however, sent any who are Roman citizens to stand in trial in Rome. Pliny further informs the emperor that, after he began arresting Christians, an an onymous p amphlet a ppeared with lists o f the names of persons the pamphleteer accused of being Christians.

Pliny further informs the emperor that he has spared those who denied Christ, prayed to the Roman gods, and made offerings to a statue of the emperor. He also spared those who confessed to having formerly been Christians. From them he le arned t hat t heir g uilt r esulted fr om th eir having m et a t d awn o n c ertain d ays; c hanted verses honoring Christ as a deity; and taken an oath of allegiance to Christ in which they promised not to steal or commit adultery, to be trustworthy in all things, and to r estore any money they held in trust when so called upon. Later on the same day, they reassembled for a c ommon meal. The former Christians reported that they had given up these practices when Pliny issued an edict banning "all political societies." Pliny tested the truth of these allegations by torturing two female slaves that the Christians called deaconesses. Ba sed on their forced testimony, he found nothing more than "a degenerate sort of cult carried to extravagant lengths." Pliny opined that, g iven t he o pportunity to r epent, a g reat many Christians could be reformed.

In Trajan's answer to Pliny's letter, the emperor approve s of P liny's c ourse of a ction. He instructs P liny n ot to s eek C hristians o ut. I f, however, i ndividuals a re b rought for j udgment and the charges proved, they must be punished unless they recant. In that case, they are to be spared. No mass charges may be brought, nor may any an onymous pamphlets be u sed as grounds for laying charges. Letters of Ignatius, The (ca. late first or early second century C.E.)

It seems that Ignatius was either the second or the third Christian bishop of Antioch in Syria. If he was second, as Or igen suggests, he followed St. Peter in that capacity. If, as Euse bius of C a esa r ea reports, Ignatius was the third bishop, he followed Peter's successor, Euodius.

In a ny cas e, d uring t he r eign of t he Ro man emperor Trajan, Ignatius and other Syrian Christians were taken into the custody of a company of Roman s oldiers a nd s ent overland t hrough A sia Minor before sailing to Rome, where the Christians were destined to face martyrdom among the wild beasts of the Coliseum. Word of Ignatius's arrest an d im pending e xecution p receded h im along his route, and Christians in the cities where he stopped received permission to v isit him a nd offer him solace. Ignatius did not want h is wellwishers to try to avert his martyrdom. He looked forward to a heavenly reward.

Opportunities presented themselves for Ignatius to write to the members of the congregations of various cities. He seized those occasions to exercise pastoral care for the communities by advising them on issues close to his heart. Seven of t hese le tters were subs equently collected perhaps by St. Polycarp, the bishop of Smyrnaand s urvived a s collection f or their e ventual inclusion in *The Apos to li c F athers o f the Chr ist ian Ch ur ch*. The su rviving le tters include o ne to P olycarp h imself, a nother to Polycarp's church at Smyrna, a letter to the Magnesians, a le tter to t he Ep hesians, o ne to t he Trallians, another to the Romans, and one to the Philadelphians.

In general, Ignatius's letters address matters of great consequence to early Christians. He is concerned with the authority of bishops and the preservation of the apostolic succession that traces that authority directly to Christ's a postles and to Jesus himself. Ignatius wants the church to speak with a single voice on matters of do ctrine and theology and not to splinter on issues deemed heretical, such as the proposed n onhumanity of Je sus or, e ven among Christians, the then still-unsettled question of Christ's resurrection. Ignatius seems to see both the Gnostic Christians and those who, though believing Christ to be the Messiah, would nonetheless follow the old Jewish law as threats to the doctrinal Christianity of the true church. He is at first concerned about his home church in Antioch, which was undergoing some sort of upheaval at the time of his arrest. On later learning that this matter had b een r esolved, Ig natius en courages o ther churches to send representatives to participate in the celebrations marking the end of internal conflict. It was in his letter to the church at Rome that Ignatius requested there be no attempt to avert his martyrdom. Rather, he explains, he will coax the wild beasts to devour him.

In another letter included in the collection of the *Apostolic F athers*, the l et t er o f P ol ycar p to t he Phil ippians, we find a reference to Ignatius's martyrdom, but no de tails about the manner of his death. Later accounts of it are apparently fictitious.

A S ophist w ho w rote a bout, t aught, a nd p racticed the art of public speaking, Libanius was the most d istinguished p ractitioner o f his ca lling among his contemporaries at Constantinople. His preeminence aroused the envy of his competitors, and they connived to have him banished from the city in 346 c. e. A fter a p eriod during which he practiced first in Nicaea and then in Nicomedia, Libanius w as ca lled b ack t o Constantinople, where he practiced until he r etired to h is native city of Antioch.

In Co nstantinople, L ibanius b enefited f rom the p atronage o f t he Ro man em peror J ul ia n. Libanius shared w ith t he em peror h is de sire to unseat Christianity as the Roman s tate r eligion and restore polytheism.

As a writer, Libanius bequeathed to poster ity an autobiography that appears in his Greek *Declamations*, or *Harangues* (*Meletai*). More than 60 of them survive, and they are renowned for their purity of style. He also left a 13-section work of *Rhetorical E xamples*. A c omposition t hat s eems to ha ve p rovided mo dels for d rafting p ractice debates is his *Arguments [responding] to the Orations of Demosthenes*.

Libanius's letters have also been collected, and they are of unusual interest. A mong some 2,000 epistles, we find letters to two of the Fathers of the Christian Church: St. Ba sil a nd St. John Chrysosto m. Both of these renowned figures had been Libanius's students.

Liezi (*Lieh Tzu*) (ca. 300 B.C.E.–300 C.E.) A prose text of Daoism doubtfully attributed to Lie Y ukou (Lieh Yü-k'o)—an a uthor w ho ma y have lived a c entury before the version in which the d ocument has su rvived w as written—*Lieh Tzu* is reputed to be the easiest of all classical Taoist texts to understand.

In its eight parts, divided into 150 sections, the book explains such matters as the differences between what is real and what is illusory. It offers theories about the origins of dreams. It is something of a geography text when it discusses strange f oreign c ountries, a nd i t i s o ne o f numerous t exts t hat m ake s te reo typical jokes about foolish farmers from the region of Sung. The work also contains popular fables that convey a m oral. These vary in the level of t heir sophistication fr om v ery s traightforward t o quite complex.

The translator A. C. Graham has provided an example of the s impler sort—one w hose t itle Graham g ives a s " The St upid Ol d Ma n W ho Moved a Mountain." In it, an old man proposes to level two mountains that are 700 miles square and 7 00,000 f eet tall. H e m eans t o c arry a way their m ass i n baskets a nd d ump t he e arth a nd stones in a gulf. After working for months on the project with his son, his grandson, and a neighbor child, the old man, whose name was Mister Simple, s tarts f or ho me. H e en counters a n eighbor named Old Wi seacre, who r eproves h im for h is folly. S imple, ho wever, explains t hat the mountain w ill n ever g row a ny l arger, w hereas h is progeny will increase forever through the generations and eventually accomplish the project.

Overhearing this, the mountain spirits become concerned that Simple might really succeed in his project, a nd t hey c omplain t o G od. Impressed with Simple's sincerity and follow-through, G od has su pernatural b eings c arry a way t he m ountains a nd pl ant t hem el sewhere, with the result that wi thin h is o wn l ifetime S imple can t ravel across level ground for the first time.

A more sophisticated narrative from the 48th chapter concerns the master of the zither, Po-ya, and his most faithful and understanding listener, Chung Tzu-chi. W hatever is in Po-ya's m ind o r however he i s fe eling when he i mprovises up on his instrument, his music instantly conveys into the mind of Chung Tzu-chi. The story is a lesson in the benefits of trying to understand and appreciate the thought and accomplishment of others. It also suggests that such immediate sympathy is a quality missing from then-contemporary life and th at a chieving such s ympathy sho uld b e a goal for everyone.

Less complex and quite touching is the third chapter's story of a t raveler who returns late in life to the region of his birth. A traveling companion decides to play a joke on him and identifies a s h is n ative p lace a m uch more h umble village, which has a local shrine, dwellings, and a graveyard-all p laces a ssociated w ith th e o ld man's a ncestors. At e ach i dentification, the old man is deeply moved, and the sight of his purportedly a neestral graves touch h im s o t hat he weeps. Then h is companion confesses t he joke, and the old fellow feels ashamed. Worse, when he comes t o t he r eal si te o f h is a ncestors' f ormer dwellings and their burial places, he is not nearly so deeply moved as when he was deceived. The moral: S ome i nnocently i ntended jok es prove cruel.

Life of Apollonius of Tyana, The

L. Flavius Philostratus (ca. 210 c.E.)

Att her equest oft hele arned em press, J ulia Domna, w ife oft he Roman em peror S eptimus Severus, the scholar L. Fl avius P hil ost r at us undertook the composition of a greek biography of a second-century philoso pher and sage, Apollonius of Tyana. The em press gave P hilostratus certain d ocuments p urporting to b e a ro ugh memoir prepared by Damis, a disciple of Apollonius. In addition to that source, Philostratus also had access to letters written by Apollonius, some of which survive, either in their originals or in copies. Beyond that, having accepted the empress's commission, P hilostratus traveled to Tyana, where a tem ple of t he sect t hat t he p hilosopher had founded still venerated his memory. Philostratus journeyed elsewhere, too, in an effort to amass as many recollections and reports concerning the sage as he could find. He read a book written b y Ma ximus o f A egae a bout t he w ork o f Apollonius in that place, and he saw Apollonius's will. Finally, Philostratus read four books about Apollonius c omposed by one M oeragenes. P hilostratus, however, rejected what Moeragenes had to say as spurious since it was not confirmed by the more reliable documents and reports that he had gathered.

Apollonius is of p articular i nterest i n a n e ra like ours in which such documents as the *Dead Sea Scr olls* and the Nag Hammadi Manuscripts (see G nost ic A pocrypha a nd P seudepigrapha) are reforming scholars' thinking about the shape of first- and second-century Christian communities a nd t he w ritings t hey p roduced. This interest arises in part from a book written by Hierocles, a provincial governor who served the Roman

382 Life of Apollonius of Tyana, The

emperor D iocletian. H ierocles obs erved t hat Apollonius had displayed the same degree of wisdom and performed the same range of miracles as were i mputed t o Jesus C hrist. U nderstandably, early Ch ristian zealots and m issionaries t ook great offence at t his su ggestion, a nd Euse bius of Caesarea—the Christian b ishop of t hat community—undertook a refutation of Hierocles. That refutation stands as the church's official position on Apollonius despite the fact that Eusebius was not himself a believer in the physical resurrection of Christ. Subscribing to that particular article o f f aith b ecame re quisite on ly a fter t he Nicene Creed required it in 325 c.e.

A summary of the biography follows.

In a passage r eminiscent of the C hristian Annunciation, b efore the b irth of h er b aby, Apollonius's mother receives a v isit from the god Proteus in the guise of an Egyptian demon. When she asks what sort of child she will bear, the a pparition an swered, "Myself... Proteus the god of Egypt." The baby is born in a meadow where the mother has fallen asleep. Swans dance around h er a s she s leeps, a nd w hen they a ll trumpet at once, she awakes and bears her child. At that instant a bolt of lightning shoots from the sky and bounces back into heaven—a sig n that l ocal p eople i nterpret to mean that the child will transcend earthly things a nd c ome near the gods.

As a child of 14, Apollonius begins a systematic study of the Greek phi los ophers and their systems of thought; he finds that of P ythagoras of Samos (see Italic school of philosophy) particularly congenial. At the conclusion of his formal e ducation, A pollonius forswears w ine a nd becomes a vegetarian. He goes ba refoot, wears only white linen, will not wear any animal's skin, grows his hair and beard long, and takes up residence in the temple at Aegae in Cilicia.

There f ollows a s eries o f e xamples o f t he young Ap ollonius's wisdom and virtues. A mong these, Philostratus tells the story of how Apollonius r eforms his wild o lder b rother b y p ositive reinforcement and his own good example. Then Apollonius announces his intention to lead a celibate life, and Philostratus comments on the young man's mastery of h is passions. M oreover, A pollonius c ultivates h is me mory. (Though he m ay have l ived b eyond 1 00 y ears, h is m emory remained prodigious.) He also chooses to remain silent f or a p eriod of five ye ars, c onfining hi s communication to gestures, nods, the movement of h is h ands, a nd s o forth. D uring th is time of silence, Apollonius begins to travel about widely. When h e b reaks his s ilence, h e r eproves a nd chastises corn m erchants w ho a re s tarving t he people of A spendus by withholding the h arvest for export and a higher profit.

Traveling to A ntioch, A pollonius attracts disciples with h is u naffected manner a nd h is w isdom, and seven choose to attend him at all times. They leave him, however, when he announces his intention to travel first to N ineveh a nd B abylon and then on to India. It is on this journey that his first b iographer, Da mis, jo ins A pollonius a s a disciple. Damis explains that h is mastery of languages will prove u seful. A pollonius, h owever, assures hi m t hat he a lready u nderstands a ll human tongues. He has to le arn the language of the birds, h owever, from the Arabs as he passes through their territory.

Arriving a t B abylon, Apollonius re fuses to honor the king by kissing his image on arrival. Being cross- examined about this refusal, he so impresses the king's officers that they bring Apollonius b efore t he r uler. The k ing is on t he point of sacrificing a horse, and as Apollonius is much opposed to blo od s acrifice, h e m erely throws frankincense into the flames and leaves until the ceremony has ended. A sked to be the king's guest in Babylon, Apollonius accepts, provided that he might be lodged with a person of circumstances similar to his own. This done, the king o ffers h im 10 g ifts o f h is o wn c hoosing. Apollonius asks that a colony of for merly Greek Eretrians be permitted to remain in possession of the land they occupy, and that he be given a meal of bread and dried fruits. When the king asks why he does not accept the other gifts, Apollonius replies that it was because he has not yet made other friends.

Among his other accomplishments, Apollonius, who believes in the transmigration of souls, says he remembers his former life. He also has the gift of seeing the future. Apollonius advises the king that no cause is worth going to w ar over. A fter giving the king of Babylon much good advice, Apollonius is r eady t o m ove on t o I ndia. B efore leaving, he asks the king to bestow his favor on the Magi, who are the priests of Babylon, and on the host who had housed h im d uring h is s ojourn in B abylon. The king is pleased to do this and also insists on giving Apollonius c amels a nd camel dri vers f or h is onward journey, provisioning him with water and the necessities of desert travel and advising him on the best route to follow.

As A pollonius a nd Da mis f ollow t he road through the C aucasus to I ndia, A pollonius c onducts an ongoing dialogue with Damis in the manner of S ocr at es. A long t he road, t hey pass b y many places of interest, visiting some and missing others. They a lso e ncounter va rious peo ple a nd animals, including a boy riding an elephant. Apollonius uses t he i ncident to e xplain t hat t he ele phant's instinctive obedience, not the boy's power, is responsible for the great beast's willing subordination to the youngster. A leng thy and often misinformed discourse on elephants follows.

Among the t actics t hat Ap ollonius e mploys in instructing Damis is rewriting a line of Euripides. In its original form, the line asserts that the life of all men lies in their children. Apollonius revises the truism by substituting the word *animals* for men, t hereby a ssigning m en to t heir proper category.

Upon r eaching t he I ndus R iver, they discover that a P ersian s atrap (governor) had a nticipated their need for a boat and guide, and owing to h is foresight, they are ferried across and arrive at last in I ndia p roper. A pollonius is d elighted t o di scover t hat the I ndian k ing, P hraotes, l ives a nd behaves according to a code of conduct that would do credit to a philosopher. He is also surprised to discover that Phraotes, like h is Babylonian hosts, speaks Greek—a u seful accomplishment t hat avoids put ting Ap ollonius's u niversal mastery of language to the test. Having concluded that Phraotes is also a philosopher, Ap ollonius eagerly debates assorted topics with him, including the issue of whether teetotalers sleep better than those who drink wine moderately. (Both a gree t hat d runkards do n ot sleep well.) A mong t he a rguments t hat A pollonius advances in favor of drinking only water, we find one t hat hold s that d reams dreamed un der t he influence of alcohol are useless for the purposes of interpreting them as guides to future events. Apollonius is adept at divination of dreams' meaning.

After assisting the king in judging difficult legal cases, Apollonius decides to leave India, where the law per mits o nly a three-day s ojourn. The k ing inquires a bout the c ondition of the c amels that have carried them from Babylon—a matter totally outside Ap ollonius's not ice. D amis tells the k ing that the c amels a re i n s uch p oor c ondition t hat they ought themselves to be carried. King Phraotes therefore provides new camels, a guide, and a letter of introduction to his father, Iarchus. He also tries to he ap t reasures on t hem. Ap ollonius a ccepts some l inen r obes a nd s ome g emstones t hat he intends as gifts to the gods on his return. He refuses, h owever, t o a ccept a ny g old o r trea sures for himself.

Following the route of A lexander the Great, the travelers reach the furthest point of A lexander's penetration into India on the banks of the river H yphasis. A s they journey on, they comment on the flora and fauna they encounter and on the topography of the G angetic Plain. There follows a mythic d iscussion of t he v arieties of dragons indigenous to the area and how some of them p rey on elephants. En countering I ndian monks ruled by Iarchas, known as "the masters" or " the s ages," Ap ollonius a nd D amis ob serve them levitating.

Iarchas i mpresses A pollonius b y r ecounting the phi bs opher's p ersonal h istory from c hildhood to illustrate the monks' knowledge of events past and present. Iarchas promises to teach Apollonius all the lore he ne eds to b e able to do l ikewise. I n th eir en suing d iscussions, A pollonius and th e s ages c onsider self-knowledge a nd t he transmigration of souls.

384 Life of Apollonius of Tyana, The

Turning to e thnography, Iarchas tells Apollonius that the Ethiopians had formerly been Indians but had been expelled. Then he returns to the subject of r eincarnation, a nd, o n finding that Apollonius a lso re calls a for mer e xistence, Ia rchas asks him to tell the sage about it. We d iscover that, in his former life, Apollonius had been the pilot of an Egyptian vessel. Apollonius recalls a ba rgain that he had s truck with s ome p irates during that time. In the event, however, h e o utwitted them and sailed away from the pirates and their bribes.

Iarchas r eproves A pollonius f or c onfusing abstention f rom i njustice with justice—a failing the I ndian a ttributes t o all G reeks. F rom the sages, Apollonius learns that the universe is a living creature formed by God, and Iarchas promulgates t he b elief t hat na tural d isasters o ccur a s punishments for the transgressions of people.

In a series of the episodes that would later lead to the Roman governor Hieron's seeing in Apollonius a prototype of Jesus Christ, Apollonius first heals an I ndian b oy p ossessed b y a dem on. H e then restores a lame man to health, a blind man to sight, and returns movement to the paralyzed hand of a third person.

Philostratus turns his a ttention to r eporting Apollonius's work on a strology and the proper method of s acrifice. The a uthor a lso d iscourses on his subject's foretelling the future and the connection between knowing what the future holds and the successful practice of medicine. Apollonius and I archus d iscuss magnets and the difficulty of finding stones with magnetic properties. Iarchas attests to the actual existence of Pygmies, but ot her f anciful p oetic p eoples, s uch a s dogheaded or shadow- boted men, he treats as poetic fancies. the firebird (phoenix) he treats as a living c reature t hat v isits E gypt e very 5 00 y ears. Following d iscussions of t his s ort, A pollonius and Damis set sail for home in a ship provided by Iarchus.

As h e j ourneys toward home, Ap ollonius teaches along the way, discoursing at Ephesus on the advantages of communal responsibility. Also at E phesus, he pre dicts and p revents a c oming plague by forestalling the demon who would have caused it. When Apollonius arrives in Ionia, Philostratus thinks, he predicts the earthquakes that the Ionians and the surrounding territories will soon s uffer. These k indnesses a nd p rophecies later cause Apollonius trouble.

Continuing his voyage toward Greece, Apollonius often stops to pay his respects at the tombs and altars of Greeks of past ages, including those of the a rchetypal musician, Or pheus, and the clever P alamedes, wh o had t ricked O dysseus into serving in the Trojan War. Apollonius then reports to his disciples, whose number increases as he travels home, that while he had been in India he had interviewed Achilles. The ghostly Achilles reported to him that the Thessalians had neglected his tomb and the worship of his cult. Achilles permitted Apollonius to a sk five questions about the Trojan War. When as ked a bout whether or not Helen was really in Troy, Achilles replied that for a long time the Greeks thought so, but in fact Helen was, as Eur ipides' play about her had indicated, in Egypt throughout the war.

Arriving a t A thens, A pollonius le ctures t he Athenians on the subject of religion—particularly on their rites and ceremonies, which, through the ignorance of the priesthood, have become lax and blasphemous. A lso while in A thens, he c asts out another d emon f rom a y outh a nd r ebukes t he Athenians for the effeminacy of their dancing at the Dionysian rites.

Now A pollonius u ndertakes a r eligious a nd patriotic p ilgrimage a round Gr eece, v isiting famous sh rines a nd le cturing m ultitudes a t t he places he stops. From Greece, he sails to Crete and thence t o Rome, where t he em peror N ero hol ds sway a nd is i mprisoning p eople w ho r epresent themselves a s s ages, p hilosophers, a nd re ligious leaders. Ster nly w arned a gainst g oing to Ro me with his followers, Apollonius nonetheless chooses to do so, and most of his disciples desert him in fear of the consequences of following him.

Once in Rome, by a happy c hance, Apollonius makes the acquaintance of a certain Telesinus—an officer in charge of the temples of Rome. Impressed by the prophet's wisdom, Telesinus equips Apollo-

nius with letters to t he priests of t he tem ples to reform t heir r ites a nd s acrifices i n a ccordance with his teaching and to allow Apollonius to live within the temples. His presence there soon spearheads a religious revival in Rome.

Before long, Apollonius at tracts t he at tention of Ne ro's he nchman, Ti gellinus, who s ets a c onstant watch on him, hoping to find cause to punish h im. I nstead, T igellinus beco mes a fraid o f Apollonius's unusual powers. Nonetheless, Nero's agents k eep c lose ta bs on Apollonius u ntil t hey finally t hink t hey ha ve c ause to a rrest h im. Bu t Apollonius c ows t hem w ith h is fe arlessness a nd wisdom, so that Tigellinus finally decides he must be dealing with a god.

Apollonius also raises up a young woman who is bei ng bo rne t o her f uneral, b ut P hilostratus suggests o ther, more n aturalistic p ossibilities without ruling out the possibility of her ha ving been resurrected from the dead. Nero eventually issues a p roclamation b anning t he te aching o f philosophy at Rome, a nd A pollonius t urns h is steps toward Spain.

Philostratus himself had b een to Spa in and, as had A pollonius b efore h im, had obs erved t he advance and retreat of o ceanic tides. Philostratus relies on Ap ollonius's explanation—one t hat involves the advance and retreat of spirits breathed in and out by the earth. He offers in support of that notion the assertion that the souls of the dying do not quit their bodies at high tide; he also mentions a c onnection w ith the p hases of t he m oon. That said, Philostratus traces the course that Apollonius takes i n S pain a nd t he v arious a ltars a nd Gr eek culture that he encountered there.

In book 5, A pollonius d iscourses w ith h is apostle Da mis c oncerning the pathological e gocentrism o f N ero i n ha ving r escheduled t he Olympic games so that he himself could compete in them and so that the celebrants could sacrifice to him rather than to Zeus. Apollonius pre dicts that the emperor will win in the singing contests since no one will dare compete against him. The phi los o phe scoffs, however, at an emperor who neglects making laws so that he can stroll about singing like a s treet entertainer. S oon a m essenger comes to Spain demanding that people sacrifice in h onor of Nero's h aving taken three first prizes. The p eople p erformed t he s acrifices a s ordered, but they have no idea why they did so.

Philostratus reports that Apollonius conspired against N ero w ith V index, t he g overnor of a Spanish province. Vindex apparently led a r evolution, i n w hich he w as k illed, b ut N ero fled nonetheless, and Apollonius accurately predicted that the reigns of those succeeding Nero or hoping to s ucceed h im, Vitellius, G alba, a nd O tho, would b e s hort. D efending A pollonius against the charge of wizardry, Philostratus suggests that his knowledge was based instead on divine revelation. Det ailed k nowledge of t he si tuation a nd clear t hinking might a lso b e candidates f or explaining his accuracy.

Apollonius travels to Sicily, and in a discussion of the relative merits of mythology as treated by poets and the *fa bl es* of Aesop, Apollonius favors Aesop. The content of the stories of poets involves immorality, s landers t he g ods b y a ttributing human failings to them, and encourages people to behave in similarly per verse fa shions. A esop, on the other hand, used "humble incidents to te ach great truths" and used pleasing tales to make animals "interesting to mankind."

Arriving in the vicinity of Mount Etna, Apollonius n ext t urns h is a ttention to a ttempting a nonmythological e xplanation of t he a ctivity of volcanoes. The explanation is not very ac curate, but f rom it Ap ollonius draws a u seful m oral. Even during and after volcanic eruption, there is plenty of u naffected earth available for holy persons to do good works.

Sailing for Greece, Apollonius has a p resentiment of shipwreck and d isembarks to take p assage on a nother v essel. The o ne he a bandoned does sink. Arriving at Athens, the philosopher is initiated into the Eleusinian mysteries of the cult of Dionysus.

Taking s hip f or E gypt, Apollonius re bukes a trader who is carrying images of the gods to s ell in market places. He also reproves a young man who, though uneducated, has amassed wealth and spent it on a sumptuous dwelling. A glutton also

feels the sharp edge of the philosopher's tongue. On h is a rrival i n E gypt, A pollonius s aves a n innocent young man condemned by his own false admission of guilt because he p referred death to torture. The c itizens of A lexandria, w ho had been expecting him, are delighted to have Apollonius in their midst.

Horse racing is all the rage in Alexandria, and the fans have, like those of some of our contemporary soccer teams, become violent to the point of murder in their devotion to their favorites. Apollonius rebukes them for their bloody-mindedness.

Vespasian (ruled 6 9-79 b .c.e.) de sires to become the Roman emperor. On entering the city of Alexandria, he seeks out Apollonius where he is residing in a temple and prays that Apollonius will make Vespasian a king. Ap ollonius re plies that he has already done so as he has prayed for a wise, just, noble, temperate "father of legitimate sons"-in o ther w ords, j ust s uch a p erson as Vespasian-to become emperor and replace Vitellius. A pollonius c onsiders Vi tellius w orse t han Nero, though the historical record suggests otherwise. (Vitellius ended up being dragged through the streets of Rome and killed, so the opinion of Vitellius that Philostratus attributes to Apollonius may be the result of a uthorial h indsight.) I n any case, the issue of politics remains prominent through the rest of the fifth b ook. On e of t he speakers, Eu phrates, c hampions t he r estoration of the Roman republic. Vespasian is present and a bit disconcerted at the prospect that his absolute authority might be undermined.

Apollonius, however, suggests that restoration of the republic is not an a chievable goal, and he argues in favor of a b eneficent monarchy. Vespasian is pleased, but Euphrates becomes Apollonius's implacable e nemy. Then A pollonius le ctures Vespasian on the internal checks that he must put in p lace t o r estrain an y ten dency to a buse h is authority. Euphrates in general approves of Apollonius's remarks, but he autions Vespasian against any p hilosophical p osition that claims a specia l understanding of the purposes of deity. Such philosophies falsely ascribe their own priorities to the divinity. Philostratus fairly reveals that even Apollonius could mistake his man. When Vespasian became emperor, he repressed the freedoms that Nero had uncharacteristically granted to t he Greeks. Philostratus quotes a series of three brief letters from Apollonius to t he emperor i n which A pollonius accuses t he monarch of having fallen below t he level of Nero by enslaving the Greeks.

Otherwise, while he is still in Egypt Apollonius r ecognizes t he s oul o f t he f ormer E gyptian king Amasis in the body of a tame lion. Then he sets out for Ethiopia and, as he hopes, the source of t he Ni le River. A fter a s eries o f adventures that include purifying a man who had committed an in voluntary h omicide, A pollonius c omes to the l ands o f t he " naked s ages" o f Et hiopia. A n enemy, Thrasybulus of Naucratis, a henchman for Euphrates, has arrived before him and prejudiced the E thiopian phi bs ophers a gainst A pollonius, so his reception is cool.

The leader of the Ethiopian sages, Thespesion, harangues A pollonius a bout t he su periority o f Egyptian wisdom to that of India and to Apollonius's own. In reply, Apollonius schools the Ethiopians in the Indo-Brahman origins of their own wisdom, an d i ndeed o f t heir o wn p eoples, f or they were bred from the E thiopian e xiles from India. He plays his trump card on behalf of the superiority of the Indian philosophers by pointing out that they alone among men have mastered the art of levitation to soar aloft with the sun god. Eventually A pollonius p erceives t hat Thrasybulus and Euphrates have prejudiced the Ethiopian sages ag ainst h im by c laiming t hat Ap ollonius had disparaged them. One of the youngest Ethiopians, Ni lus, ho wever, re cognizes Ap ollonius's innate goodness and wisdom and prevails on him to recount his Indian experiences in detail. Moreover, Nilus switches his allegiance to Apollonius, who, advises him to be circumspect and not to annoy the Ethiopians.

Apollonius a nd Thespesion m eet again, a nd this time their conversation turns on the comparative repre æn a ton of gods by the Greeks and the Ethiopians. Apollonius complains that the Ethiopians fashion their gods to resemble animals. This argument, insofar as it is, from our contemporary point of view, over an issue that is absolutely culturally determined, she ds little light on the subject. The conversation soon turns to Greek culture and in stitutions, and here Ap ollonius is a ble to correct some of Thespesion's impressions and conclusions. H e a rgues, for e xample, t hat the r uler Lycurgus had pure motives for denying strangers permission to settle in Sparta.

The philosophers next turn their attention to the problem of justice in the context of Greek history. After that they agree about the immortality of the soul and about nature, essentially agreeing with Pl at o in his *Timaeus*.

Having concluded those discussions, Apollonius, joined by his new disciple Nilus and with a man na med T imasion a s a g uide, de parts i n search of t he so urce of t he N ile. P hilostratus repeats the ancient notion that the sound of the Nile's c ataract (waterfall) is literally de afening. The sojourners make their way as far as the third of t he Ni le's seven c ataracts, and th en turn aside.

In t he 2 9th c hapter o f boo k 6, P hilostratus abruptly changes the subject to the success of the Roman general and later emperor, Titus, in capturing Jerusalem in 70 c. e., and to a conversation between Titus and A pollonius. In that discourse, Apollonius offers to the young emperor one of his disciples, Demetrius, who will become a watchdog over t he i mperial c haracter. T itus a grees to le t Demetrius "bark" and even "bite" to keep him on the path of virtue and justice. The Greek contains a familiar play on words. Greek *cynos* (a cognate of En glish *canine*) means *dog*, and Demetrius was a Cynic philoso pher (see Cynicism).

Apollonius w arns Tit us t hat a s long a s h is father, Vespasian, lives, the young man must be on h is g uard a gainst h is father's en emies. A fter Vespasian d ies, Titus's near kinsmen will present the greatest danger. When Titus asks how he will die, A pollonius a nswers that the sea will be t he agent of his death. The prophecy is fulfilled when Titus dies from eating bad fish.

Concerned that he is becoming long- winded, Philostratus leaves off detailing the journeys of Apollonius a nd b egins i nstead t o tel l st ories about h is m iraculous i ntercessions i n peo ple's lives to their benefit. He finds a fortune for one man and d issuades a nother from h is u nnatural passion for a statue of the goddess Aphrodite. He exposes charlatans and heals a young man bitten by a mad dog. He also heals the dog.

Next Philostratus considers Ap ollonius as a n incomparable d efender of l iberty by setting h is story in the context of philosophers who died for their beliefs. After several examples of these, Philostratus tells how Apollonius opposed the tyranny n ot on ly of Ne ro but also of the em perors Domitian and Nerva.

Domitian trumps up a charge against Apollonius and has him summoned to Rome. Apollonius, however, has mysterious foreknowledge of the summons and anticipates it by sailing immediately from Asia Minor for Italy. In Italy, Apollonius's friend, the philosopher Demetrius, advises him to take ship again, since Domitian certainly means to see him tried, convicted, and killed. Apollonius, however, replies that "it is the duty of the wise" to die for their principles. He compares the cruelty of tyrants and decides that the crueler sort includes those who color their murders with the trappings of le gality. He remarks t hat a s age w ho k nows himself will not be frightened by that which most people fear, and that he will obey his conscience wherever it leads him.

Having come to court and offered himself to the emperor's justice, he discovers that a longtime admirer and acquaintance, Aelian, is the emperor's chief officer. Aelian warns Ap ollonius t hat the emperor means to condemn him and that his indictment c ontains m any s erious a ccusations that r ange fr om i nappropriate dr ess t o having allowed himself to be worshipped to having predicted the future to having slandered the emperor to having performed a human sacrifice by cutting up an Arcadian boy.

As he waits a mong t he o ther defendants for the emperor's c ourt to b egin, A pollonius he ars their stories, cheers them up, and offers advice for t heir d efense. He a lso d eals a droitly with informers who are sent to t ry to g et him to s ay

388 Life of Apollonius of Tyana, The

something incriminating. When he finally comes before t he emperor at a s ession p reliminary to his t rial, A pollonius le arns t hat D omitian h as indeed prejudged him. The emperor i nsults the phi los o phe by cutting off his beard and his long hair.

The emperor sends him in chains to await the formal trial. In the first clear evidence of Apollonius's s uperhuman n ature, h e mi raculously removes a metal fetter from his leg and then puts it on again. Then, through the influence of Aelian, the emperor a llows Ap ollonius to w ait w ithout bonds in a more comfortable prison.

Finally brought before the emperor, Apollonius a nswers the c harges a gainst h im, a nd t he emperor ac quits h im of t hem b ut de clares h is intention to hold him for a private interview. Perceiving t hat the e mperor i ntends to hol d h im indefinitely, Apollonius quotes from Homer's *The Ili ad*, 22.13: "For thou shalt not slay me, since I tell thee I am not mortal." Having said that, Apollonius vanishes into thin air.

Despite t his a pparent miracle, P hilostratus quotes for the record the oration that Apollonius had composed to defend himself against Domitian's anticipated accusations. He disproves the charge of wizardry. Rather, he portrays himself as a master of the liberating arts of poetry, music, astronomy, p hilosophy, oratory, a nd vol untary poverty. He explains that he is a vegetarian and dresses without e mploying the skin of a nimals since he i s a gainst blo od s acrifice. He ex plains the reasons that he wears (or used to wear) long hair.

The p hilosopher n ext de tails h is r eligious belief: God has brought all things into being and sustains t hem, a nd G od's m otives a re g ood. Human beings partake of some of the good qualities of the creator. Many human beings, however, allow their baser natures to overcome their higher impulses. To g uide t hem away f rom their own follies, God sometimes sends a god to le ad them in t he ri ght pa th. The c lear i mplication i s t hat Apollonius is such a being—though he do es not say so. He admits, however, that he did save the city of E phesus f rom t he pl ague. A ccused a gain o f wizardry because of h is fore knowledge, Ap ollonius explains that h is light diet makes it possible for him to see things—including future things as if in a mirr or in his min d. I t w as t hrough prayer to H er a cl es, s ays Ap ollonius, t hat t he plague w as a verted. A s f or t he c harge t hat he killed a c hild a s a s acrifice, A pollonius u tterly disproves it and names witnesses who can vouch for h is ha ving b een w ith a dy ing f riend a t t he time. H e n ext di sproves a c harge o f s editious utterances, i mplicating h is Eg yptian en emy, Euphrates, a s t he ma n w ho ha s b rought f alse accusations against him.

Meanwhile, Ap ollonius's disciple, Damis, has obeyed h is master's instruction to go to D icaerchia. It is to that destination that Ap ollonius is miraculously transported and encounters Damis and another disciple. At this point in the narrative, for the first time as I think, certain incidents occur that bear a truly striking similarity to the New Test a ment's account of the risen Christ's appearing to h is ap ostles. B oth d isciples t hink that A pollonius m ust be a g host. Apollonius instructs them to take hold of him and convince themselves that he is alive and has not abandoned his body. Asked about how he came so quickly to them, Apollonius attributes it to divine intervention. At this late point in Philostratus's narrative, Apollonius's disciples b egin to r egard him as a divinity.

The trio board a sh ip for Sicily, where multitudes from ar ound the Me diterranean come to see A pollonius. A mong the other wonders that Philostratus r eports, we find one that suggests that, while he is in Ephesus in Asia Minor, Apollonius mysteriously witnesses the assassination of the emperor Domitian at Rome and reports it to his followers.

Having attained an advanced age—80s, 90s, or beyond 100—Apollonius dies, and wondrous circumstances s urround his p assing. H e post humously speaks through a d isciple concerning the immortality of the soul. He also, however, reproves the disciple for being concerned about the soul's immortality while he is alive and responsible for the world he l ives i n, n ot t he o ne h is s oul will inhabit.

In addition to Philostratus's biography of the philosopher, some 97 letters attributed to Apollonius also survive. His historicity, in other words, is well established. Aside from the incidental parallels mentioned above and the credulity of their respective fol lowers, one would be hard-pressed to find much other than humanity, piety, a healthy mistrust of temporal authority, and wisdom that Apollonius of Tyana and Jesus Christ of Nazareth share i n common. (For a c lose comparison, s ee Andy M. Reimer's Miracle and Magic in the bibliography below.) To imagine, as the anti-Christian Hieron apparently did, that the writers of certain books of t he N ew Testament u sed t he s tory of Apollonius a s a mo del suggests Hieron's lack of literary knowledge about the myth-making of the ancient Mediterranean world. Resurrected deities abounded in those myths, and stories of miraculous happenings were very common.

There is one passage in Philostratus that criticizes t he J ews f or ha rdheadedly r ejecting t he polytheism p racticed b y most of the ancient world, but one m ust re member t hat i n J udea after Alexander's conquest of the Persian Empire, an official policy of h ellenizing Jewish institutions r emained in p lace f or c enturies. V iewed from an exclusively literary rather than from a theological or philosophical perspective, in such circumstances it would be surprising if, around the beginning of the Common Era, elements of Greek myths associated with miraculous births, precocious ch ildhoods, a nd r esurrections d id not i nfiltrate p op uar Jewish th inking to s ome degree.

Life of Saint Anthony, The (The Life and Affairs of Our Holy Father Anthony) Athanasius (ca. 360 c.e.)

The historical Saint Anthony died in 356 c. e. He was certainly not the first solitary monk, but in no small measure due to St. At hanasius, Anthony became the model for the tradition of Christian anchorites-monks who chose to spend long devotional p eriods i n i solation. Sho rtly a fter Anthony's death, Athanasius, who was the patriarch or bishop of Alexandria and who had known Anthony well, responded to requests from monks who wished to know more about the famous holy man and penned the saint's biography. It became an instant classic and the prototype for many subsequent spiritual biographies of real and of fictive Christians who, in their lives, actions, and commitments-and in their deaths and often their martyrdoms-emulated C hrist's pa ttern f or l iving, o vercoming temptation, dy ing, a nd subs equent elevation to immortality. Beyond the ancient works t hat e mulate i t, A thanasius's b ook a nticipates such comparatively modern descendants as John Foxe's continually updated Book of Martyrs, John B unyan's Pilgrim's Progress, and the 15thcentury. F lorentine p laywright An tonia P ulci's plays of St. Francis, St. Theodora, St. Guglielma, and St. Anthony the Abbot. The last-named work retells Anthony's story with Florentine local color.

Reared with a y ounger si ster i n a C hristian, Egyptian family, the devout Anthony lost his parents w hen he w as a bout 2 0 y ears ol d. De eply moved by the concern of the early church for the care of the poor, he established his sister in a community of religious women, sold all he had, and distributed the money to the needy. He then modeled h is life on t hat of a v irtuous a nchorite a nd other holy persons in the vicinity, working with

his h ands to e arn h is f ood a nd c ommitting t he Scriptures to a capacious memory.

As Athanasius tells the story, Anthony's reputation for goodness soon attracted the attention of the Devil, who began to tempt Anthony with guilt for abandoning his sister and with fond recollections of the m ore c omfortable l ife he h ad le d before following the Lord's assigned path for his life. Satan sent lascivious thoughts that Anthony overcame w ith the h elp of c onstant v igilance, Christ, the Scriptures, prayer, and fasting.

The De vil a nd h is m inions d id n ot, ho wever, cease t heir a ssaults o n A nthony, e ven after h e isolated h imself in a tomb where he p rayed a nd fasted. The forces of evil assaulted Anthony physically, but Anthony, now 35, resisted so heroically that h is L ord appeared to h im a nd p romised to sustain him forever.

Overcoming the temptations of silver and gold that Satan placed in his way, Anthony barricaded himself inside a deserted fortress with just enough bread to sustain life for six months. He arranged to have this simple diet replenished twice yearly, and for y ears he subsi sted on b read and w ater. Demons continued to t ry to a ssault him, but, as promised, Anthony was now invulnerable to their attempts. For 20 years, he continued in this fashion, his isolation broken only by occasional visits from fr iends. F inally, h owever, h is fr iends t ore the door from h is dwelling, and A nthony c ame forth looking as fit and well as he had 2 0 years before. Many chose to emulate him, and the desert was filled both with monasteries and with the cells of anchorites.

Anthony ill ustrated the efficacy of prayer by wading u ntouched acr oss a crocodile-filled stream w ith a g roup of his f riends. He b egan preaching to ot hers who had chosen to live the monastic life, e ncouraging t hem to contemplate the life everlasting in stead of t he short span of human existence. He exhorted the monks to persevere in their discipline and not to relax even for a moment. Virtuous living was all that mattered. He explained that everything God created began as g ood. The dem ons t hat a ssail h uman b eings *chose* to become bad. A lengthy sermon follows. It encourages Anthony's l isteners to believe in the sufficiency of the Scriptures a nd r evealed truth f or e very h uman need. O ther e ducation i s su perfluous si nce t he Scriptures are all one requires to stand firm against the infinitude of temptations with which legions of demons continually try to mislead human beings. He also exposes the deceptions practiced by false prophets who wish to make money by impressing the credulous with fakery.

Anthony identifies t he o racles o f H ellenistic religion w ith d emons. Even w hen, he s ays, demons come in the guise of angels, they can be driven off by prayer. G ood s pirits, on the other hand, can be recognized by the calm that accompanies t heir presence. He t hen de tails s ome of his own experiences in his struggles against the temptations of demons.

When Athanasius has finished describing the success of these struggles, he t urns his attention to the benefit that members of Anthony's congregation der ived f rom t he s aint's s ermon. They loved virtue more, put away conceit, and became more careful in identifying and resisting temptation. W hen his s ermon was finished, Anthony resumed and intensified his monastic discipline, but he nevertheless frequently shared the company of other anchorites.

Athanasius ne xt r eports A nthony's r esponse to the persecution of the Christians of Alexandria under t he pa gan g overnor o f S yria a nd E gypt, Gaius Galerius Valerius Maximianus, who championed re surgent p aganism, m artyring a f ew Christians but more often enslaving or mutilating them. Athanasius says that Anthony sought martyrdom, but that the Lord protected him for the benefit of others. Back in his cell, Anthony daily suffered the pangs of martyrdom as he struggled with h is conscience and his sense of u nworthiness. He practiced an ever more rigorous asceticism, wearing a hair shirt and never bathing so that he was tormented by vermin nesting next to and within his skin. He also moved to a more isolated dwelling place on a mountain near an oasis on a caravan route, and there he ten ded a small garden whose produce sustained him and relieved the hunger of the travelers that passed his way. As he grew older, passersby also brought him gifts of edibles.

Next Athanasius attributes a series of wonders to Anthony. He tamed wild beasts that harassed him at the b ehest of dem ons. He s aved h imself and a company of parched monks from dying of thirst by c ausing w ater to m iraculously sp ring forth in the desert. Returning with those monks to their cloister, A nthony en countered the sister from whom he s eparated s o ma ny y ears b efore and found that she had b ecome the leader of a community of nuns.

Accounts of the wonders that Anthony accomplished continue. He healed the sick; he knew the details of fa raway e vents a st hey were hap pening; he cast out demons. All the while, he resisted the unflagging efforts of the Devil and his minions to distract him from his holy work. Anthony eventually achieved both inner and outer peace, and he punctiliously observed the mandates and orthodoxies t o w hich A thanasius himself s ubscribed. Except for exhorting such heretics as the Meletian s chismatics, the A rians, and the Ma nichaeans to reform their beliefs, he had no business with them.

During h is r are a ppearances i n po pulated communities, many came to see or touch Anthony, a nd he c ast out dem ons a nd c ured ma ny of their physical and spiritual disabilities. He c onfounded a pair of Greek philosophers who came to te st h im w ith h is w isdom, adv ising t hem to become Christian.

Speaking to two Greeks through an interpreter, Anthony conducted a scathing critique of classical Gr eek m yth a nd i ts i rrationality. H e a lso defended fa ith a s a more reliable t est of k nowledge t han dialectic—that is, more reliable t han arguing according to formal systems of logic and syllogism. H e a lso po inted t o the s uccess of Christianity i n gaining c onverts a s o pposed to the dying, polytheistic religions. He underscored his point by casting out demons from several sufferers brought to him for that purpose.

Sometimes when Anthony was speaking with visitors, he would sudden ly fall si lent and seem

to b e d istracted. W hen t his hap pened, h e en visioned things either occurring elsewhere or things that would happen in the future. He predicted, for instance, t he c oming tem porary a scendancy o f the Arian heresy over orthodox Christianity.

After recounting more of Anthony's healings and predictions, Athanasius turns to the manner of h is de ath, which the author also de ems remarkable. At age 105, as he felt the approach of death, Anthony imparted his final advice to h is visitors: Keep your soul from foul thoughts and avoid falling victim to any of the heresies afflicting o rthodox C hristianity. Co ncerned l est h is body be m ummified or o therwise t reated i n a manner that he considered i rreverent, he commanded h is followers to b ury h im secretly and tell no one where, since at the day of judgment he expected to re sume his flesh. He gave one of his sheepskins and a worn-out cloak to Bi shop Athanasius.

To the monks for whom he had written this life of An thony, A thanasius addresses a final exhortation to share what he has written, not only among themselves and with other Christians, but also with pagans who may profit from learning of Anthony's life and be converted.

Linear B

The oldest script known to represent the Mycenean d ialect of the an cient Gr eek l anguage, Linear B survives incised or impressed on clay tablets and other objects. The script was written on the island of Crete and on the southern

portion of the Grecian Pennisula from around 1500–1200 b.c.e.

Linear B uses a somewhat mixed system to represent the sounds of language. Principally, it is a syllabary; t hat is, m ost of its s ymbols re present whole syllables. Additionally, some of it s symbols represent entire words, Called logograms. Beyond that, L inear B u ses l inear s trokes to r epresent breaks in words. One reads the script as one does En glish, f rom l eft to r ight. This d iffers f rom t he system of writing the Greeks later used after they had adopted a n a l pha bet to r epresent t he i ndividual sounds of their language. Then they began to write as the ox plows-back and forth, one line reading right to left and the next left to right. The technical w ord t hat de scribes t his s ystem, t aken from the G reek f or t he pattern t he o x plo ws, i s boustrophedon.

Although the Linear B script was discovered early in the 20th c entury, it was not de ciphered until 1953, when a pa ir of r esearchers, M ichael Ventris and John Chadwick, figured it out. Based on examples thus far uncovered, Linear B seems to have been used for keeping records rather than for literary purposes. Agamemnon, king of Mycenae and principal Greek commander in the Trojan War, conceivably could have known it.

Because one finds syllables absent from Greek represented in the s cript and in Greek finds sounds that are not represented by the syllabary, it appears that the Greeks had borrowed the script from people speaking a d ifferent language—one without descendants in the modern world.

Apparently t he s cript fe ll i nto d isuse a s a result of s ome uncertain c ataclysmic ev ent. When w riting r esurfaced i n Gr eek a fter about 400 years, the system for representing language was the alphabet.

Lives of Eminent Philosophers Diogenes Laertius (ca. 250 C.E.)

Diog en es La er ti us's discussion of the lives and writings o f 8 2 G reek p hi bs ophers a nd o ther notable persons has been transmitted to us in 10 books (manuscript scrolls). Among these, book 3 deals e xclusively with Pl at o a nd b ook 10 with Epicurus.

One o f Di ogenes L aertius's 2 0th-century translators, R. D. Hicks, suggests that both Diogenes' research method—mining the secondary discussions o f hi s p redeces sor compilers—and the pop uar taste of his contemporary readership for "p ersonal de tails, a necdotes, a nd w itty s ayings" shaped t he f orm that th e *Lives* finally assumed. So did Diogenes' intention to develop a sort of history of the development of Greek philosophical thought and to some degree also political thought. If it is not the best such document to have been attempted during the several hundred years during which his pre deæs ørs wrote, it does enjoy t he d istinction of b eing t he e arliest of its kind to have survived intact.

Thus, whatever warts and moles the composition m ay di splay, it also constitutes a u nique repository of much information that would certainly have been lost otherwise. Whatever it lacks in scholarly authority, the book makes up for in its pre ference for a g ood s tory a nd su rprising details. The work, though not always sequenced chronologically, b egins it s prolo gue by p eering into the mists of p hilosophical p rehistory. P hilosophy may have had its roots among non-Greek speakers: The Magi were the philosophers of Persia, the Chaldeans of the Babylonians and Assyrians; t he G ymnosophists (ancient, u nclothed ascetics) were the original philosophers of India, the Druids of the Gauls and the Celts. The Egyptians credit Hephaestus-who lived, according to Diogenes' so urces, ex actly 4 8,863 y ears b efore Alexander th e Great-with o riginating p hilosophical thought in their realm. To substantiate the extreme antiquity of the last assertion, Diogenes i nforms u s t hat 373 s olar a nd 832 l unar eclipses occurred between Hephaestus's time and Alexander's. National pride, however, now asserts itself. Diogenes reveals that the Greeks were not only the true originators of philosophy but also the original human b eings, de scending, a s d id the most an cient of the race, directly from the gods.

Diogenes t hen c atalogues th e g enealogy o f more re cent ph ilosophy, b eginning w ith e arly Greek p oets suc h a s H omer a nd H esiod, a nd then naming "sages," including Thales of Miletus, Solo n, and others. There follows an overview of the development and subdivisions of philosophy, the succession of philosophers, their schools, the places of their origin, their founders, and finally the philosophical sects.

In the opening of his first chapter proper, Diogenes turns first to Thales (ca. 625–ca. 547 b. c. e.)—both a politician and a "student of nature." From a plethora of sources, Diogenes cites a host of details about Thales and about his certain and disputed contributions to all the fields that interested h im. These fields r anged f rom politics t o astronomy and poetry. Diogenes reports Thales' birth, e ducation, b eliefs, and d eath, and q uotes his e xtant l etters i n f ull. The c ompiler a lso includes sayings and lines of Thales' poems that still enjoyed currency during Diogenes' lifetime.

A letter from Thales to Solon provides the transition to a si milar s ort of compendium about Solon's career and contributions to Greek political and intellectual history. Diogenes devotes the rest of his chapter to those that his predeces sors included among the early Greek "sages." Discussions follow o f C hilon, P ittacus, Bi as, C leobulus, a nd Periander—all G reeks of t he s ixth and s eventh centuries b.c.e. Diogenes continues his first book with a discussion of Anacharsis the Scythian, who was the son of a Greek mother and the brother of a king of Scythia. Anacharsis wrote a poem that compared Greek and Scythian institutions.

Discussions of Myson, Epimenides, and Pherecydes round out Diogenes' overview of the sages, and with the second book, he turns his attention to philosophers proper. He deals first with Anaximander, about whom he k nows little—some of it w rong. Then A naximenes, A naxagoras, a nd Archelaus come under review.

Next, Diogenes discusses Socr at es, asserting that the famous teacher helped Eur ipides master the playwright's c raft. H e r eports t hat S ocrates was a "formidable" public speaker—so much s o that the A thenian governing council of 30 m en forbade him to teach rhetoric, the subject he had introduced at Athens. Socrates was also, says Diogenes, the first phi bs opher to be put to death.

Diogenes reports that Socrates saved the life of Xenophon of Athens att he battle of D elium. He also says that Socrates' orderly life protected him from catching the diseases that periodically swept through A thens, de cimating the p opulation. The b iographer p raises S ocrates' si mple manner of life and reports h is a nswers to que stions that several persons put to h im. Asked, for instance, if a young person should marry or not, Socrates r eportedly r eplied: "W hichever you do you will repent it." On being told that he had been condemned t o d ie b y t he A thenians, S ocrates reportedly replied: "So are they, by nature."

Diogenes tells stories of the shrewish behavior of S ocrates' wife X anthippe and of the way that Socrates said he b enefited from her u npleasantness a nd v alued her n ot o nly in spite of it, b ut because of it. In the society of Xanthippe, Socrates said that he learned to adapt himself to the rest of the world.

Diogenes a lso r eports the details concerning the accusations brought against Socrates, his trial, the p enalties he i ronically prop osed w hen c onvicted of introducing gods other than those recognized, for refusing to ac knowledge the official

gods, a nd f or c orrupting t he y outh o f A thens. Diogenes refers the reader to Pl at o's *Phaedo* for an a ccount of S ocrates' d iscourse on the d ay of his execution. He also reports the remorse t hat swept t hrough t he A thenian p opulace f or t heir rash a ction i n executing o ne of t he best a mong them.

Then D iogenes t urns h is a ttention to t he 1 0 schools of moral philosophers that took their origin fr om S ocrates. These *Socratics* principally included Plato, Xenophon, Antisthenes, Æschines, Phaedo, E uclides, a nd A ristippus. Bi ographical entries on e ach of t hem and on a g roup of t heir successors b rings D iogenes' second c hapter to a close.

The third book devotes itself entirely to Plato. The fourth begins with a consideration of Plato's successor as head of the Platonic Academy at Athens, Sp eusippus (d. 339 b.c.e.). Sp eusippus p roduced a r emarkable n umber o f m emoirs a nd dialogues, an d D iogenes c atalogues a g enerous portion of them before turning his attention to Plato's s econd s uccessor at the a cademy, Xen ocrates; we learn that his collected works to taled 224,239 lines. Then t he su ccession of he ads of the Platonic Academy continues: Crates, Crantor, and Arcesilaus. A discussion of the Sophist p hilosopher Bion interrupts the catalogue and ends the list of the heads of the original Platonic Academy. S ucceeding Arcesilaus ar ound 2 42 b.c.e., Lacydes of C yrene founded a s chool k nown a s the New Academy. The fourth book closes with a consideration of the headship of the Stoic philosopher Carneades (d. 129 b.c.e.), and with a b rief entry on his successor Clitomachus the Cathaginian, who was well versed in the precepts of three major schools of philosophy: the Academics, the Per ipate ti cs, and the Stoics (see St oicism).

Having treated the principal Academic philoso phers, in t he fifth b ook, D iogenes t urns h is attention to the Peripatetics and to their founder, Ari st ot l e, who withdrew from both the institution and t he t hought of t he P latonic A cademy during t he l ifetime of A ristotle's te acher P lato. Aristotle f ounded h is o wn s chool, na med, a s some think, for his habit of walking up and down as h e d iscoursed with h is s tudents i n h is o wn school. A fter q uoting a n umber o f A ristotle's pithier sayings, Diogenes Laertius catalogues the entire corpus of the phi los o phe's works—a corpus r unning t o ju st u nder 4 50,000 l ines. D iogenes u ndertakes t o s ummarize the c ontent o f these lines i n about four pages. A s he had do ne with th e followers o f P lato, D iogenes n ow l ists the disciples and successors of Aristotle.

First c omes Theophr ast us of E r esus, who succeeded A ristotle in 3 23 b.c.e. A f amous le cturer, Theophrastus's lectures were said to draw a crowd o f 2 ,000 a uditors. H is dy ing adv ice encouraged h is students to c ontinue h is i nquiry into right conduct. There follows a c atalogue of writings and the usual line count—almost a quarter million—and h is quo ted l ast w ill a nd te stament, in which he emancipated his slaves.

Strato of Lampsacus, a p hysicist a nd he ad of Aristotle's s chool, en joys a si milar t hough le ss elaborate t reatment. S o, e xcept f or quo tation o f the will, do es h is suc cessor L yco o f T roas, a nd the next head, Demetrius, who later became the chief politician of the city of Athens. Overthrown by e nvious d issidents, h e fled t o Eg ypt, wh ere, after advising the Greek pharaoh, Ptolemy Soter, Demetrius fell i nto d isfavor w ith t he p haraoh's successors and died, like Cleopatra, from the bite of a n a sp. Following the r ecitation of S trato's works, Diogenes adds, as he often does, a list of persons of accomplishment who have the same name as his subject. These lists are largely irrelevant to h is philosophical purposes, but the s cience of naming-onomastics-and the possibility that like names might lead to like achievements seems t o h ave interested D iogenes. H is o wn namesake, Diogenes of Sinope (see Cynicism), is the s ubject of t he s econd c hapter of t he si xth book. The fifth, however, ends with a summary of the life and career of Heraclides, who had first been a member of Plato's Academy, had attended the lectures of the Pythagoreans, and had finally become a student of Aristotle.

With the opening of the sixth book, Diogenes Laertius, whose work is very carefully sequenced and formally organized, recurs to the time of

Socrates to consider that great teacher's contemporary, A ntisthenes (ca. 4 45-ca. 3 65 b .c.e.). Antisthenes had studied with Gorgias of Leontium, the rhetorician. After coming into contact with Socrates, however, Antisthenes so admired his teacher's physical courage and disregard of pain t hat A ntisthenes "inaugurated th e Cynic way of life." He advised enduring both physical and p sychological d iscomfort a nd c onsidered luxury a bad thing: "May the sons of your enemies," he said, "live in luxury." He believed that virtue, which he defined as the sum total of one's actions, ensured happiness; words and learning did not. The law of virtue, rather than enacted statutes, should be the wise man's guide in his public a ctions. He was considered a mong t he fathers of both the Cynic and the Stoic schools of thought.

Next, turning his attention to the person for whom h e had be en na med, Di ogenes L aertius details the life and career of Diogenes of Sinope. That worthy, after a youthful brush with the law, wore out A ntisthenes' re sistance to a ccepting students, became his disciple, and devoted himself to a life of poverty and simplicity. He slept in his cloak and lived for a while in a tub. A public gadfly, D iogenes o f Sinope r ailed a gainst v ice and in difference to v ice with an un attractive self- igh tousness. No respecter of persons or common co urtesy, h e d escribed h imself a s " a Socrates gone mad." Despite his cantankerousness, Diogenes of Sinope enjoyed great respect among the Athenians and was described by the poet C ercidas as "a true born son of Zeus, a hound of heaven." The biographer Diogenes provides a substantial list of works attributed to his namesake b ut w arns t he r eader t hat s ome thought he wrote nothing and others attribute just a few works to him.

Fourth-century b.c.e. Cynic successors to Diogenes of Sinope included Monimus, Onesicritus, Crates of Thebes, Crates' wife Hipparchia, Metrocles, Menippus, and Menedemus. Most of those named emulated Diogenes' simple life.

Book 7 devotes a very long first chapter to the career and thought of Zeno of Citium, the found-

er of the Stoic school of philosophy, about whom Diogenes Laertius reports many interesting anecdotes. It becomes clear, moreover, that the biographer a dmires h is subject's si mplicity of l iving and the good example that h is life and teaching set for the Athenians. Once the biographical section of t he chapter is finished, D iogenes n ext turns h is a ttention to l isting t he d isciples of Zeno and then to detailing the positions that the Stoics take in their physical, ethical, and logical doctrines. H e d iscusses t he sub divisions a nd methodology of t he v arious br anches of S toic thought an d a lso ma kes c lear d ifferences between Stoic and Peripatetic views of such matters as virtue and vice.

The Stoics, Diogenes L aertius explains, think that virtue and vice are opposite categories that preclude any middle ground, whereas the Peripatetics think that "moral improvement" occupies a position bet ween t he t wo. A fter de tailing t he physical do ctrines of t he Stoics, i ncluding t heir view th at the w orld itself is a nimate, Di ogenes ends the first chapter of book 8 and passes on in the s econd c hapter to a c onsideration of t hose Stoics w ho d iffered i n c ertain particulars f rom the views presented in the first.

Having t raced t he de velopment o f I onian philosophy to h is s atisfaction, i n b ook 8, D iogenes turns his attention to the development of philosophy in Italy. There t he de velopment o f the discipline began with a n immigrant from Phoenicia and Sa mos, P ythagoras (ca. 580-500 b.c.e.). Returning t o S amos f rom a n e xtended sojourn in Egypt, Pythagoras discovered the tyrant Polycrates in charge of the island that had become his home. Rather than submit to an uncongenial rule, Py thagoras emigrated with 300 followers to Croton in Italy and established an aristocratic constitution for Greeks in Italy. He also founded the Ita lic School of Philosophy. Music and astronomy were a mong h is c hief i nterests. D iogenes reports that the school Pythagoras founded in Italy attracted 600 auditors to his evening lectures. After recounting a lternate v ersions o ft he de ath o f Pythagoras, who may have been murdered or may have st arved h imself to de ath, Di ogenes a sserts that Py thagoras's s chool s urvived h im f or n ine generations.

The balance of book 8 de votes itself to a d iscussion of n otable P ythagoreans. A mong t hem we find the famous Empedocl es, who, according to legend, ended his life by leaping or falling into the Sicilian volcano, Mount Etna. Diogenes duly reports variants on this tale. Other successors of Pythagoras include Epicharmas of Cos; Archytas of T arentum; the p hysician A lcmaeon; and Eudoxus o f Cn idos, w ho ma stered a stronomy, geometry, medicine and law, and others.

In book 9, Diogenes turns his attention to those phi los o phes who espoused no par tic ular school, the so-called sporadic phi bs ophers. First among them a ppears H era clit us of E phesus, w ho, Diogenes reports, became a misanthrope. Following him come notices of Xenophanes; Parmenides of Elea; Melissus of Samos; and then Zeno and his pupil Leucippus, both of Elea. These phi bs ophers subscribed to t he v iew t hat t he h uman s oul i s material i n its e ssence. L eucippus subs cribed to and perfected the view that the u niverse is composed of atoms.

Diogenes attributes extraordinary longevity to Democritus of Ab dera (ca. 5 th–4th c b .c. e.) following Hipparchus in asserting that the philosopher, a contemporary of Plato at Athens, died in his 109th year. Democritus subscribed to Leucippus's atomic theory and believed that in their elemental whirl, atoms brought all things into being and destroyed all things in an infinitude of necessary change. Diogenes follows his pre deæs ør compiler, Thrasylus, i n e numerating t he ma ny works ascribed to Democritus.

Turning h is attention to Protagoras (ca. 485– 410 b.c.e.), Diogenes reports that he was the first to maintain that every question has two opposing sides. Diogenes also credits Protagoras with originating the d ialectic m ethod o f d iscussion popularly attributed to Socrates. The biographer next turns his attention to yet a nother na mesake, Diogenes of Apollonia. Modern editors register su rprise a t t he i nclusion o f t his e arly phi los o phe at this point in the n arrative a nd also a t th e o mission of ot hers more re levant. Entries on Anaxarchus, a companion of Alexander the Great, on Anaxarchus's student, Pyrrho, and on Timon, a o netime s tage d ancer t urned phi los o phe, conclude book 9.

Book 10 is exclusively devoted to the life and thought of p erhaps o ur c ontemporary w orld's most m isrepresented G reek ph ilosopher, the admirable E picurus. That s ame m isrepresentation seems to have been r ife during E picurus's own l ifetime, a s D iogenes r eports s currilous attacks on his character, the circulation of scandalous books falsely attributed to Epicurus, and, finally, accusations of false attacks on other philos o phes. Diogenes cites abundant evidence that people c irculating such m isrepresentations "are stark mad." In fact, Diogenes avers, Epicurus displayed "unsurpassed goodwill to all men."

With 40 of the most important articles of Epicurus's philosophical position—Diogenes brings his collection to a close. In doing so, he s ays, he makes the end of his notable work "coincide with the b eginning of happ iness." The first of them provides a good antidote for those who presume to speak on behalf of deity with respect to persons and activities deserving punishment: "A b lessed and e ternal b eing ha s n o t rouble h imself a nd brings no trouble on any other being; hence he is exempt from movements of anger and partiality, for every such movement implies weakness."

Livius Andronicus (Lucius Livius Andronicus) (fl. ca. 230 B.C.E.) *Roman dramatist*

Livius Andronicus came to Rome in 272 b.c.e., at the end of the city's war against Tarentum, a southern Italian city that had initially been colonized by Sparta. Bi lingual i n L atin a nd Gr eek, L ivius Andronicus e arned h is living b y t eaching t hose languages, by writing tragic plays about the Trojan War a nd Gr eek m yths, b y w riting i mitations o f Greek New Comedy (see co medy in Gr eece a nd Rome), and by acting in some of his own dramas.

According to the Italian literary historian Gian Biaggio C onte, a round 20 fragments c ontaining 40 verses from Livius Andronicus's plays survive largely as a result of their having been quoted by later authors. On the basis of these survivals, we know the titles of five examples of his war tragedies: Achilles, Ae gisthus, Ai ax Ma stigophorus (Ajax with the whip), Equos Troianus (The Trojan horse), and Hermiona. We also have the names of three t ragedies d rawn f rom m yth: Andromeda, Danaë, and Tereus. Of Livius Andronicus's comedies, o nly six v erses su rvive, a nd w e k now o nly one certain title: Gladiolus (a short sword). He also was the first translator of Hom er's The Odysse y into Latin Satur nian verse.

On the basis of what Cice ro and Livy report about him, we know that Livius Andronicus was Rome's first i mportant p laywright a nd l iterary translator. In 240 b.c.e., one of his works became the first drama ever staged in Rome. Later, in 207 b.c.e., he composed a song in honor of Juno that was performed publicly by a choir of girls as part of a citywide religious festival. For the first time in the city's history, a literary en deavor e arned official recognition. The c ity g ranted L ivius Andronicus public honors and acknowledged as official the playwrights' a ssociation (collegium scribarum histrionumque), to which he belonged. Its title was posted in the temple of Minerva on the Aventine Way. This is all that has come down to us about Livius Andronicus.

On the basis of h is study of the fragmentary remains of L ivius A ndronicus's work, ho wever, Gian Bi aggio C onte ha s p rovided a pl ausible assessment of hi s s ignificance. In t ranslating Homer's *Odyssey*, L ivius made a f undamental Greek te xt a vailable to R oman r eaders. L ivius's version, *Odusia*, though it is accurate and clear, is not a word-for-wordplod through the Greek. It is, rather, an artistic translation that renders Homer more p alatable to Rom ant aste t han a l iteral translation would have. Heroes, for example, are demoted f rom go dlike status—a not ion t hat would have offended Romans. Moreover, in keeping with a Roman taste for pathos, Livius heightens t he pa thetic m ood i n c ertain H omeric passages that give him the opportunity.

Comparing t he s cattered f ragments o f t he plays with the Greek originals from which Livius Andronicus drew them, Conte follows the analysis of the scholar Scevola Mariotti, who finds further e vidence o f em otional heig htening a nd adaptation rather than slavish fidelity both to the language a nd t o the mood of the original. This was a tendency also observable in the comedies of Pl autu s a nd T er ence—all d rawn f rom Gr eek originals.

Although the plays of Livius Andronicus soon fell out of favor with Roman audiences, his method o f d ealing w ith h is G reek o riginals pa ssed along to his successors and established the essential parameters within which Roman writers subsequently adapted Greek works.

Livy (Titus Livius) (59 B.C.E.–17 C.E.) Roman historian

The s on o f a w ealthy a nd p ossibly s enatorial family of Padua, Livy received the usual Roman

upper- dass education. He m oved t o Rome at about a ge 3 0 a nd b ecame a c ourtier of t he emperor A ugustus. There, t hough he ne ver seems to have occupied public office, he played the role of a gadfly, openly expressing his preference for republicanism over imperial Rome. The emperor apparently appreciated Livy's honesty, for t he t wo r emained f riends t hroughout t he emperor's life.

Livy d evoted hi mself en tirely to literature principally the writing of history. Doing so may well have been his object in moving to Rome, for it was there that he began his enormous project of tracing R ome's history from h er mythical an d historical b eginnings down to t he de ath a nd burial in 9 b.c.e. of Nero Claudius Drusus, a hero of the wars against the Germanic tribes and the stepson o f A ugust us Caesar. L ivy advised Augustus's grandnephew, Claudius, to become a writer of history, and Claudius did so.

Livy's history was an enormous undertaking, one that runs to 142 books, most of which survive. In addition, summaries of the work were discovered at Ox yr hynchus, making it possible to fill out the content of some of Livy's books that are in fragmentary condition.

Completing his great work occupied the writer for a bout 4 0 y ears. He s urvived Augustus b y about three y ears, and at s ome p oint he m oved back to Padua. There, at about 76 years old, his life work completed, he d ied. Inscriptions on a Pa duan sa rcophagus i ndicate the p ossible re sting place of the old scholar.

Lock of Bereníkê, The Callimachus (ca. 246 B.C.E.)

The historical Bereníkê, or Berenice, was the wife of King Ptolemy III. In 246 b.c.e., Ptolemy led a military expedition to Syria to restore his sister's children t o t he throne of th at country. A t h is departure, Bereníkê sacrificed a lock of her o wn hair on a tem ple a ltar to i nfluence t he g ods to bring her husband back safely. The king did return home u ninjured, b ut t he s acrificed lock of h air mysteriously disappeared from the altar.

To solve the mystery and at the same time pay an elaborate compliment to his employers, a court astronomer n amed Co non as serted t hat he h ad discovered a new constellation of stars, and that the lock of hair had been taken to he aven by the gods and turned into a constellation, which was known afterward as Coma Berenices (Bereníkê's lock of hair).

Cat ull us translated Callim achus's poem on the subject into Latin. It is from this source and from an ancient *diegesis*, or summary, of the story that we know the plot of Callimachus's work, for t he r emains of t he poem i tself a re extremely fragmentary.

The s tory c ontinued to i nfluence Eu rope an poets at least until the 18th century c.e., when the British poet Alexander Pope made u se of a si milar device in his poem *The Rape of the Lock*. There, a lock of hair stolen by an ardent suitor from the coiffeur of the poem's heroine, Belinda, is taken to heaven and turned into a hitherto unobserved star. This process of stellification is one that the ancients described when the souls of such important persons as emperors left their bodies. Sometimes b efore and s ometimes a fter t heir de aths, their living admirers deified the emperors, and, as those s ubjects b elieved, their r ulers' transfigured souls were turned into new stars in the sky.

Lokāyata (*Carvaka*) (ca. 600 B.C.E.) *ancient Indic antireligious texts*

Also known as *Carvaka*, *Lokāyata*'s texts have all perished and are known only through quotations cited i n a rguments a gainst t hem by Hindu and spiritualist Buddhist controversialists. The Hindu sage, Brihaspati, wrote the earliest of the movement's texts, the *Brihaspati Sutra*. Buddhism and Jainism may both have originally been systems of either agnostic or atheistic ethics that developed from the thinking of Brihaspati.

Sharing certain viewpoints with ancient Greek and Roman St oicism, *Lokāyata* was atheistic and anticlerical and did not believe in human reincarnation. It was de eply critical of t he priesthood, holding that the priests' true gods were their bellies, a nd t hat t heir sp irituality w as a do dge designed to help them make a living and acquire power over their flocks.

Lokāyata seems to have died out as an independent system of Indian thought around 1400 c.e. a moment in time coincident with a resurgence of the spiritual Bhakti movement. °Longinus, On the Sublime Anonymous

(ca. first or second century C.E.) The question of the real authorship of the famous but f ragmentary t reatise, *On t he S ublime*, i s a vexed one. Until the 19th century, the author was universally held to be Cassius Longinus, a thirdcentury author who had also written on the subject of the toric. F or t hat r eason, t he na me Longinus remains associated with the document. Objections to t he t raditional a ttribution o f authorship, ho wever, h avel argely r endered i t untenable, a nd a rguments for o ther c andidates, including D ionysius of Hal icar nassus, seem even l ess tenable. The d ating of t he e ssay a lso offers p roblems. U ndisputed, ho wever, i s t he influence that this piece of aesthetic criticism has exercised over writing for many centuries.

Apparently w ritten at the r equest of t he author's friend and former fellow student, Postumius Terentianus, the essay undertakes a systematic analysis of the quality that distinguishes great poetry (and great literature in general) from that of a lesser standard. That quality is sublimity. The sublime in literary works is to be found in a combination of "consummate e xcellence" a nd " distinction of language" that has the power to amaze and inspire wonder-not merely to convince and please. A re ader or l istener r ecognizes t he sub lime when it occurs because that person will feel as if a bolt of lightning has struck. W riters or reciters who p roduce suc h m oments f or t heir audiences a re often gifted with a natural genius that h as b een schooled a nd d isciplined b y a n acquired mastery of their art.

After a hiatus occasioned by lost text, the essay resumes with a tactic of definition by explaining what the sublime is not. It is not turgid bluster or bombast. It is not childish simplicity. It is not to be found in outbursts of authorial emotion or in its opp osite, a uthorial frigidity—faults t hat d isplay to a n audience the triviality of an author's mind. So does a constant striving for novelty and exaggeration.

What is truly sublime in literature elevates and exalts and fills the reader with joy and pride, as if the reader had penned the passage. Those feelings arise from trains of thoughts, from strong e motions well expressed, from certain moving figures of speech such as apt metaphors or similes, from "noble diction" and the dignified arrangement of words.

To i llustrate g reatness of thought, *On the Sublime* discusses Homer and the opening of the Book

400 Longus

of Genesis from the Hebr ew Bibl e. As an example of sublimity a rising from the selection and ac cumulation of detail, the author chooses the poem of Sappho t hat b egins "To m e t hat man eq uals a god..." The discussion of a mplification (proliferating apt detail), of which the last example is a part, continues w ith i llustrations d rawn f rom Ci ce r o and from Demost henes' oration *On the Crown*. Pl at o's work furnishes a further instance.

The discussion of Plato leads to t he introduction of the topic of imitation as a device for achieving sublimity. The essayist advises h is readers to try to think like great writers of the past.

Continuing to consider the means by which writers may achieve sublimity, the essay treats the role of imagination or visualization in the process and how that role d iffers with the genre in which one works. It then turns to a consideration of figures speech and, in that context, to a detailed analysis of a portion of On the Crown. Here the essayist advises the writer to try to conceal ingenuity. There follows a de tailed c onsideration of t he u tility of highly technical rhetorical devices and a consideration of t he u se o f m etaphor. N ext t he a uthor announces a digression in which he i ncludes the most important and best-written part of his essay with this essential advice: Prefer flawed genius to flawless mediocrity. The former will rise more frequently and predictably to the level of sublimity.

The ba lance of w hat w e ha ve of t he e ssay returns to a consideration of simile, hyperbole, word arrangement, and rhythm. The last two the author considers to be of crucial importance in achieving sublimity.

The essay then focuses on the devices that will undermine the sublime and result in pedestrian style and failure. Then, as the writer promises a close consideration of emotion, the essay breaks off abruptly.

Lucan (Marcus Annaeus Lucanus) (39–65 c.e.)

Lucan w as b orn Ma rcus A nnaeus Luc anus i n Cordova, Spain, to a wealthy family. H is father, Marcus A nnaeus M ela, a nd h is m other, A cilia, moved their household to Rome just seven months after Lucan's birth. There he not only enjoyed the advantages that his father's wealth made possible, but he was a lso appa rently m uch lo ved b y h is uncle, L ucius Ann aeus Se neca. S eneca had been the childhood tutor of the emperor N ero, and he later became both Nero's close advisor and the chief administrator of Rome, its consul. His connection with the emperor and his literary success made Seneca both the most famous Roman of his day and the wealthiest. As Seneca had lost his own son, it seems that he t ransferred much paternal affection to his nephew.

Lucan t herefore r eceived t he b est e ducation possible, and Roman education always had a s its prime objects the mastery of literature, rhetoric, and philosophy. Lucan's philosophy professor was the S toic philos opher Cornutus (see St oicism), and the young man was early identified as one of the leading speakers of his time. Though his juvenilia h ave n ot su rvived, he b egan w riting a t a remarkably tender age and published works both in prose and verse.

Lucan's f amily a rranged a splen did ma rriage for h im with a b eautiful, r ich, h ighly i ntelligent, and vi rtuous y oung w oman, P olla A rgenteria. After Lucan's untimely death, Polla, who lived into old age, celebrated his birthday annually. The seventh poem in the second chapter of St at ius's *Silvae* was written for one of those celebrations.

Seneca i ntroduced hi s n ephew t o E mperor Nero, who was only two years Lucan's senior and who ad mired a nd l iked Luc an. The em peror's favor made Lucan a n official of the c ity, a quaestor, b efore he r eached t he m inimum a ge required to hold t hat office. N ero al so r ecommended the youth for membership in one of the four colleges of Roman priests—that of the augurs, who ruled on matters of doctrine and interpreted the meanings of signs and omens. If they declared omens u nfavorable, t hey could f orbid certain assemblies. Lucan, who by this time had become an un paralleled master oft her hetorical a rt, acclaimed Nero's virtues and accomplishments in an address to the crowd assembled at the Neronia, a festival in the emperor's honor.

This mutual admiration society, however, did not lon g e ndure. N ot s atisfied w ith r uling t he world, Nero also aspired to g reat artistic accomplishment. W hen he s aw Luc an ac tually achieving it, the emperor grew envious. He prohibited Lucan, not o nly from publishing his works, but also f rom r eading h is v erses to h is c ircle o f acquaintances and friends.

The em peror's p ettiness s o d isaffected L ucan that he joined a conspiracy to overthrow Nero and kill him. Nero's spies, h owever, were everywhere, and they discovered t he plot. Trying t o s ave h is own life, Luc an told everything. He even na med his mother a s a m ember of t he c onspiracy. I n appreciation, Nero granted Lucan the privilege of choosing the way he would die. He made a c ommon choice: His veins were opened while he sat in a warm bath. As he bled to death, he recited lines from h is own e pic t hat described a soldier w ho also d ied from ble eding. Luc an was 26. H is fall brought down other m embers of h is family with him. His father and two uncles, one of whom was Seneca, were also required to commit suicide.

Of all h is works, o nly the poem from which the dying Lucan quoted has survived into our era. Earlier often mislabeled as *Pharsalia*, but properly titled *Civil War*, the work is an epic in 10 books. Although the poem is written in Latin dact yl ic hex a mete r (see quantit at ive verse), it otherwise departs from the norms of both Greek and Roman e pics i n s everal w ays. It do es, ho wever, reveal Lucan's superiority as a rhetorician. While the famous rhetorician Quint il ian admired the poem as an example of the art in which he h imself ex celled a nd a lso p raised its en ergy, he f elt dubious a bout t he w ork's v alue a s a p oem. I n another in novative move , Lucan de prives t he gods of their c ustomary central role i n national epics. S uch a cr itic a s Luc an's t ranslator, J. D . Duff, finds t he p oem f ull o f " exaggeration a nd repulsive detail." Lucan considered the civil wars of Rome to have been unmitigated horrors, and his v iews on the c entral figures in the w ars a re often at odds with the judgments of history.

Lucian of Samosata (ca. 120–ca. 180 c.E.) Syrian-Greek Poet

Born i n t he S yrian vill age of S amosata on t he banks of the Euphrates River, Lucian came from a relatively poor family. H is parents apprenticed him at an early age to a n uncle who carved marble, b ut a b roken piece of marble and a b eating ended t he app renticeship at t he end of t he first day. So Lucian tells us.

What we k now a bout h is l ife, i n f act, c omes exclusively from what L ucian reports a bout h imself. As L ucian reports it i n his allegorical e ssay, "Vision," his mistress was to become Learning, not Statuary. Before he could woo her effectively, however, he first had to p olish whatever Greek he had picked up from the Greek troops stationed in the vicinity an d i n the d ealings o f the S yrian m erchants with their Greek masters. Having succeeded at that e ffort a nd having ma stered t he Gr eek both of his own and of former times, he worked at being a rhetorician—as a w riter of speeches or a pleader of cases, perhaps. His success made it possible for him to travel in Greece and eventually in Italy and also to work in Gaul. There he proved to be a successful rhetorician and made a good living until approximately 160 c.e.

Around 1 60, L ucian r eturned t o S yria f or a period. A surviving poem celebrating the charms of t he m istress of Luc ius Verus puts Lucian in Antioch during 162–3. In 165, Lucian set out with his father for Athens, narrowly missing becoming the victim of a vendetta when he impulsively (and characteristically) bit the hand of a mountebank named Alexander. In retaliation for being bitten, Alexander t ried to h ire t he c aptain o f Luc ian's ship to t hrow h im overboard. Happily, the c aptain did not oblige.

Not long thereafter, Lucian decided to abandon his lucrative profession of rhetorician for the greater uncertainties associated with the composition of dialogue. As a skeptic and a w it with a c reative imagination—and also as a person who had, as he thought, m ade enough m oney to s ecure h is future—Lucian felt the need to put into play more of the t alents with which he had b een en dowed. We have reason to be glad he did so, for he became perhaps the wittiest writer of the ancient world.

Although wit and s atire surely p roved more congenial than rhetoric, it apparently did not pay as well. A fter a bout 1 75 c. e., Luc ian r etired to Athens. Lack of funds, however, soon forced him to r esume w orking a s a rhe torician. E ventually the R oman em peror C ommodus (ruled 1 80–92 c. e.) relieved Lucian's poverty by appointing him to a legal sinecure in Egypt.

Lucian was evenhandedly skeptical and irreverent respecting religious points of view: He equally lampooned all b elief s ystems t hat cr edited t he supernatural. S ome later writers found it s afer to express their own satirical doubts about Christianity u nder Lucian's na me. On e such spurious d iatribe led to the assertion by the 10th-century Greek encyclopedist Su idas t hat G od had p unished Lucian for h is apostasy by having a mad dog b ite him so that Lucian died of hydrophobia. Lucian's own late play about the infirmities of old age, particularly the gout from which he suffered, suggests a different final scenario, but we cannot be sure.

Lucian's surviving output is very substantial. It runs to 65 titles in four volumes in the standard edition. S ome oft hese works a ddress literarycritical, b iographical, or , l ike "Vi sion," n oted above, aut obiographical topic s. H is e ssay " Prometheus" discusses the way in which he combines elements of the Old Comedy of Aristophanes with dialogue to produce satire. In an essay named for his t eacher, the phi bs opher Demonax, L ucian sketches the character of the man. His epistolary essay "The Way to Write History" surveys the literary quirks of his contemporary historians and proposes a list of desirable qualities that ought to characterize h istorians and h istory. In h is e ssay "True History," he p arodies the incredible assertions of ancient writers. For example, on an imaginary journey, he describes vines growing from the ground that turn into women from the groin upward. The vine-women kiss the travelers, and their kiss produces a drunken state.

The works, however, for which Lucian is both best remembered and most highly valued are his sat ir es—works that puncture people's credulity, false piety, vanities, and pretenses. To represent them in this volume, I have chosen examples from Dialog ues of the Gods, Dialog ues of the Sea Gods, Dialog ues of the De ad, and The Fer ry Boat, (The Tyrant).

Other c haracteristic w orks b elonging e ssentially t o t he s ame s atirical c ategory a s t hose chosen ab ove for f uller d iscussion i nclude "Menippus," the story of a Cynic philosopher (see Cynicism) who becomes so perplexed by the selfcontradictory complexities of h is d iscipline that he travels to the underworld to consult the prophet Tiresias—the only mortal w hose wisdom the gods p ermitted t o remain intact a fter de ath. What, Menippus wants to know, is the best life to lead o n e arth? T iresias sm iles k nowingly a nd advises that the best life involves doing the task at hand as well as one can.

As one might expect, philosophers are a regular butt of Lucian's humor, and Menippus reap-

pears on eagle's wings, flying to O lympus in "Icaromenippus," with a brief stop at the Moon. On arriving at his destination, Menippus's question about philos o phes results in a divine decision to destroy all of them as useless.

In the essay "Gods in Council," Lucian mocks the human ten dency to e xpand pantheons with the addition of newly created deities. Before the assembled gods of the Greek pantheon, Momus pictured in Hesiod as the son of primeval night and characterized as always criticizing and finding fault—complains about the continual admission of new and foreign deities such as Dionyisius, the Egyptian Anubis, and Apis.

Against the allegations of Suidas that Lucian was anti- Christian, one c an o ppose the d atum that o nly one u ncomplimentary r eference to early Christians appears in Lucian's works. One finds it in "Peregrine," a tongue- in- deek narrative that reports the actual career of a Cynic philosopher of t hat na me w ho had h imself b urnt alive in his p ursuit of fame. Peregrine plays on Christian credulity to c onvince the faithful that he to o is a g od. In h is characterizations of t he Christians, Lucian suggests that the "misguided creatures" consider themselves "immortal for all time." Under that and similar *œ*lf- delisions, they are easy prey for "adroit and unscrupulous' persons like Peregrine.

As the narrator in the piece, Lucian reports the voluntary i mmolation of Peregrine on a funeral pyre. As a joke, Lucian says, he reported to others that at the moment of Peregrine's death, Lucian had seen a vulture fly from the midst of the flames toward Oly mpus. "E ast o r w est?" h is a uditors immediately a sked. Within a day's time, s tories reached Lucian of a resurrected Peregrine, c lad entirely i n white, with Lucian's vulture perched on h is s houlder. Lucian i mplies that this is a n instructive example of the myth-making process in action.

Lucilius, Gaius (ca. 180–102 B.C.E.) Roman poet

Lucilius was a n e arly Roman a uthor of sa t ir es and a wealthy and aristocratic member of the literary c ircle t hat su rrounded P ublius C ornelius Scipio Aemilianus, known as the Scipionic circle. Lucilius is k nown to ha ve produced 30 books of satires i n around 1,400 v erses. On ly f ragments survive, b ut t heir n umber i s u nusually l arge because of the great interest that Lucilius's unusual a nd a rchaic v ocabulary e xcited i n la ter l exicographers a nd grammarians. That i nterest le d them to quote his works, and the surviving texts come from such quotations.

Consequently, we know that Lucilius or, more probably, his later editors or ga nized his works by the sorts of meters in which he composed. Books 1-21 included his poems in dactylic hexameters (see q uantitat ive ve r se); b ooks 2 2-25, l ess certainly, are thought likely to have contained elegiac couplets (see el egy a nd el egaic poet ry). Books 26-30 contained some poems in hexameters b ut p rincipally i n i ambic a nd t rochaic mea sures. These were the m easures r egularly employed by Roman comedy at the beginning of Lucilius's career. Therefore, such literary historians as Gian Biaggio Conte consider that books 26-30 were the earliest written. Within each set of books, the poems seem to have been organized chronologically.

Conte also makes clear that the Roman notion of s atire was different f rom w hat t he Gr eeks meant or w hat c ontemporary A mericans and Europeans mean. For the Romans, *satura* evoked the idea of what we mean by *miscellany*, or poems

404 Lucretius

brought t ogether f rom s everal v arying s ources. Lucilius h imself c alled h is w orks *sermones* informal l argely a utobiographical a nd l iterary discourses.

A partial r econstruction of Luc ilius's work suggests that the first book contained a parody on councils of the gods that were a standard feature of e pic. This p arody d eveloped a d isparaging attack on a foe of the Scipionic circle, L entulus Lupus.

Gastronomy and travelogue provided the focus of book 3. Book 16, by contrast, contained verses addressed to a woman in which Lucilius recalled their time together in a singularly unrepressed fashion. Elsewhere, he became a literary critic of the bngue- in- cheek, cuttingly humorous sort. He attacked t ragedy, d efended pe rsonal a ttacks i n satire, and had m uch to s ay on the subject of effective style and word choice—sometimes poking f un a trhe toricians. O ften, he w as a lso a n ironist and a political polemicist.

Lucretius (Titus Lucretius Carus)

(ca. 99-55 B.C.E.) Roman poet

A Ro man ma terialist p hilosopher a nd a p oet, Lucretius is c hiefly remembered for h is d actylic hexameter poem (see q uant itat ive ver se) in six books, *De R er um Nat ur a* (*On the Nature of Things*). Lucretius felt convinced of the falsity of all religious belief with its accompanying notions that what ever one believes and does is God's will and that whatever contradicts one's cherished faith is evil. That kind of credulity, he thought, is the source of most human misery. The poet hoped that his monumental poem would popularize a thoroughgoing philosophical materialism in the place of such superstition.

Though most Renaissance Eu rope ans did not agree with Lucretius a bout religion, they nevertheless considered his poem a reliable source of scientific k nowledge. They mined it for wonders that L ucretius d escribed a s natural facts—for instance, a m agnetic r ock that sank ships by drawing the nails from their timbers so that their hulls d isintegrated, o r h is a ssertion t hat people living near the source cataract of the Nile River were deafened by the roar of its falling water. Both Petrarch a nd L orenzo d e' Medici, for i nstance, used Lucretius in this way.

Virtually nothing is k nown a bout Luc retius's life. St. J er ome f ollows Su eto nius i n c laiming that Lucretius wrote during brief periods of sanity a fter b eing d riven mad b y a n ap hrodisiac. Given the scope of Lucretius's poem and his antireligious p oint of view, there is reason to do ubt this account.

Lun Heng (Critical Essays, Balanced

Discussions) Wang Chong (ca. 75 C.E.) A r ationalist c ritic of su perstitious b eliefs t hat had i nfiltrated C onfucian teachings by the first century c.e., Wang Chung (Ch'ung) wrote a critique in 85 sections in which he tried to deb unk pop ular nonscientific belief. In a t ypical section (Lun Heng, 17, Shiying), Wang describes a wondrous ming plant that grew at the emperor's front door and miraculously kept track of the passage of the days of the month. In a lengthy, harsh, naturalistic critique of t he a ssertions of t he s tory, Wang d emonstrates, first, t hat t he ming plant does no such thing-not even at the behest of gods wishing to honor a n emperor. S econd, he discusses the natural cycle that all ming plants follow du ring t he c ourse of t he y ear. Third, h e points out the inconsistencies that the story would still contain were it true. He concludes that the emperor would still have had to c onsult a c alendar because of the schedule on which the plant shed its pods. Only early in the month could the monarch have ascertained the date by consulting the plant.

In section 28, Wang conducts a similar analysis of a story drawn from the Shihji (Rec ords of the Grand Historian). In this section, Wang critiques a "Taoist untruth" that tells how a certain Huang Ti, together with his entourage of over 70 people, mounted a dragon and flew away-except for t hose f ollowers w ho g rabbed t he d ragon's beard and pulled it out. In his critique of the story, Wang examines the etymology of Huang's name, concluding that Huang might have been someone who gained credit for pacifying a people, but that he was not an immortal who flew to heaven on a dragon's back. Besides, Wang notes, dragons do not go t o heaven. They o nly l eave t heir p onds when it st orms, fly a round f or a b it, a nd t hen reenter their p onds when the r ain s tops. Therefore, had Huang ridden the beast, he would have drowned in its pond.

In the same section, Wang applies his naturalistic critique to other Taoist a ssertions that he finds to b e p atently i ncredible. Me n, he c oncludes, do not rise to he aven. Men are creatures. If they were creatures capable of rising to heaven, they would have come equipped with feathers.

Wang c onducts his c ritique in lively, c olloquial language. He recommended that others do likewise. Vested interests, however, resist change. For a long time after Wang wrote, Chinese literature continued to b e written in a n artificially archaic li terary language—as d id L atin i n t he West. H owever, people a re tenac ious i n t heir habits (literary style, religion, and so on) however absurd they may be. Thus, Wang fell i nto disrepute, an d hi s w orks were n ot m uch r ead until t he 19th c entury, w hen h is adv ice a bout the use of the natural vernacular was once more taken seriously.

Lycophron (fl. early third century B.C.E.) *Greek dramatist*

The name Lycophron is apparently associated with two different Greek writers of t r agedy. Both of them flourished in Egypt during the Helle nisti c Age. The earlier of t he t wo, w hose l iterary work is represented by extremely f ragmentary remains, is usually included in lists of those outstanding A lexandrian t ragic poets who were known as the Pl eiad of Al ex andr ia-the stars of t he lo cal p oetic co smos. This Lycophron was born i n Cha lchis a nd s ubsequently move d t o Alexandria. I n a ddition to 19t ragedies w hose titles are known, he is thought to have written about 40 others and also a comedic satyr play on t he s ubject of a ba nquet of t he p hilosopher Menedemus. He worked, too, as a g rammarian and w as a ssociated w ith t he g reat P tolemaic library a t A lexandria. A mong t he f ragments thought to be from his hand are glosses on some Greek comic poets.

406 lyric poetry

Scholars d isagree a bout whether or n ot m ore than o ne L ycophron w rote t ragedy. Those who argue for two suggest that an apparently later person, who is often conflated with the first and who seems to have assumed the name of Lycophron as a pen name, is the author of a leng thy, extant tragic monologue, *Alexandra*.

The name *Alexandra* is an alternative for that of the priestess of A thena, C assandra, who was the d aughter of the r ulers of T roy, P riam a nd Hecuba. I n d actylic h exameter (see q uant it at ive ve r se) and in mind-numbing detail, the play's si ngle s peaker, a slave, r eports to K ing Priam the dire prophecies of Alexandra concerning both the mythic and the historical doings of Greeks and Trojans and their progeny from the time of the Trojan War until the time of the play's writing.

Scholars w ho a rgue f or a single L ycophron exercise considerable ingenuity in resolving perplexing issues of chronology and have to explain away allusions in *Alexandra* to events that seemingly occurred after the probable lifetime of t he earlier Lycophron.

lyric poetry

In ancient Greece, early lyric poems such as those of Sappho were recited or sung to the accompaniment of a lyre by a si ngle si nger. S appho's own instrument w as c onstructed f rom to rtoiseshell. These l yrics co ntrasted w ith ch oric songs intended for singing by a choir or a chorus.

Lyrics continued to b e instrumentally accompanied t hroughout m ost of t he a ncient p eriod. Emperor N ero, for e xample, p erformed h is o wn works i n h is que st for p opular a rtistic f ame. A s publishing the texts of lyrics became a possibility, however, first in scrolls and later in boxed codices, the words of the poems and the tunes that accompanied them became separated so that eventually the word *lyric* came to apply to any poem—usually on subjective or emotional topics—that is strongly rhythmic in its patterns of versification and personal and imaginative in its content.

Lysias (458–379 B.C.E.) Greek prose writer

Born in Athens to the family of a wealthy shield manufacturer, Lysias studied rhe toric at Thurii in G reek c olonial I taly. A s a r esult of p olitical upheaval, h is f amily had h is p roperty i llegally seized b y t he state. Lysistrata Aristophanes (411 B.C.E.)

Produced i n la te winter 4 11 b .c.e., *Lysistrata* appeared at a moment when the P eloponnesian War was going particularly badly for Athens. As a member of the antiwar faction, Ar ist ophanes had u sed h is c omedies r egularly to s atirize t he leaders of t he w ar party a nd to p roselytize f or peace. In this brilliantly innovative play, A risto-

phanes tried a new tactic in his onstage campaign against the war. In doing so, he also invented the first comic heroine, the title character, Lysistrata.

Fed up w ith a bsent h usbands a nd warfare, Lysistrata a nd h er c onfederates ha ve o rganized the women of all Greece in a rebellion a gainst their husbands' p enchant for fighting and their extended absences f rom home. She has c alled a meeting at her home of women from the various sectors of Greece, and as the play opens, she and her f riend C alonice a wait the c oming of t heir late- arriving guests. A good deal of bawdy humor characterizes the conversation of all the women as some wait and others arrive.

When the party has assembled, Lysistrata asks if the women pine for their absent husbands. All agree that they do and that if Lysistrata can come up with a plan to bring their men home from war, they all will cooperate. Their u nanimity e vaporates, however, when Lysistrata explains that the plan involves giving up sexual intercourse during their husbands' i nfrequent v isits. I ntrigued, the women a sk f or a f uller e xplanation. L ysistrata convinces them that they can frustrate their husbands i nto g iving up warfare by denying them sexual gratification until they do.

The non-Athenian women doubt that the plan can succeed as long as the Athenians have a powerful fleet and as long as they own sufficient treasure to pursue the war. Lysistrata explains to her Spartan c ounterpart, L ampito, t hat t he ol der women of Athens are about to occupy the Parthenon, where t he city's t reasure is ke pt, a nd den y men access to it.

There follows a m erry s cene i n w hich L ysistrata has the women s wear to den y s ex to t heir husbands. If forced, they promise to remain unresponsive. The women all swear to cooperate with Lysistrata, a nd t hey d rink a d raught of w ine to seal the bargain.

A h ubbub o utside i ndicates t hat t he ol der women have occupied the Acropolis and the temple of Athena.

A chor us of elderly men enters. They bear logs for the purpose of building a g iant bonfire and roasting the women who have r ebelled. Wi th much e ffort a nd c omplaining, t hey g et t he fire started. The women i nside t he tem ple, ho wever, have f riends o utside, a nd a c horus o f w omen comes bearing water jugs to quench the fire.

The old men and the women exchange insults. A ma gistrate a nd a c rew of s laves en ter w ith crowbars, and a s eries of joke s en sues based on the pop udr p erception t hat b oth w omen a nd slaves d rink too m uch. The s laves a re a bout to use the crowbars when Lysistrata enters and stops them. A s th e m en try t o arr est Lysistrata, one woman after another comes to her a id. The men soon find that they are vastly outnumbered.

The men finally ask what the women hope to accomplish. They ex plain t hat they are keeping the money from the men so they cannot finance the war.

The women w ant to s ee s ome o ther c hanges too. They want the men to stop carrying arms to the marketplace. They explain that they will take over r unning t he c ountry a nd w ill do i t b etter than the men have. A sked how, Lysistrata develops a n e xtended c omparison bet ween r unning the state and the process of preparing yarn from wool a nd we aving it in to c loth. S he m akes her point of view sound feasible.

In the next scene, just when the women seem to be getting the best of the men, Lysistrata enters with the news that the women are proving incapable of obs erving t heir v ows of c elibacy. She assures them, though, that their tactic is working and counsels them to stand firm a bit longer.

An extended e ncounter f ollows b etween t he Athenian wom an M yrrhine a nd he r h usband Cinesias. Vi sibly lo nging f or h is w ife, Ci nesias begs her to break her oa th and lie with him. She agrees, but keeps putting him off with extended preparations and finally flees, leaving him unfulfilled. The costumes of the male actors now indicate that they are all in dire need of their wives' loving at tention, a nd m uch r ibald j oking a bout this state of affairs takes place.

The g eneral Pa nhellenic f rustration finally forces the warring parties to parley. In their need, they s ubmit all their d isputes t o L ysistrata f or arbitration. Lysistrata calls in a naked young girl,

408 Lysistrata

the allegorical Reconciliation. As Lysistrata helps them resolve their disputes, the men remark on aspects of her attractiveness.

Finally, e veryone is friendly again, and at a general p arty, S partans and A thenians de cide they really enjoy one another's company, and the prospect of warfare fades into memory. The play ends in a general dance and a hymn in praise of Athena, the goddess of wisdom.

Although the play is thoroughly bawdy, it is also thoroughly wise. It provides a telling if fictional instance of the power of determined women to defuse masculine disputes as men quibble over nonessentials to assert their predominance. One message of the play is the same as the one offered by t he so- alled flower c hildren of t he peace movement during the Vietnam War: "Make love, not war."

Macrobius (Macrobius Ambrosius Aurelius Theodosius) (fl. early fifth century C.E.) *Roman prose writer*

Of uncertain origin—perhaps Greek—Macrobius seems to have risen to consular rank and to have been w idely k nown. H e p reserved i mportant mythological and philosophical information in a Latin work that takes its cue from the dialogues of P lato, p articularly *Sympos ium*. E ntitled *The Saturnalia* aÅer the Roman holiday of that name, the work i magines a g roup of b anqueters gat hered a round t ables i n t he ho mes of t hree ho sts and having a serious discussion about philosophy and mythology.

The celebration takes place on December 17– 19, 384 c. e., during the feast of Saturnalia. The hosts i nclude h istorical p ersons: P raetextatus, an authority on religious matters, politician, and highly cultivated pagan; Flavianus, the praetorian prefect who was eventually made to c ommit suicide f or h is su pport of Eu genius, a pa gan usurper of the Roman throne; and Symmachus, a renowned orator and writer of b oth p ersonal and o fficial letters. S ymmachus o pposed St . Ambr ose by d emanding re ligious f reedom f or the pagans who were being oppressed by statesponsored Christianity.

The seven books of Macrobius's work are highly derivative, borrowing freely from such Roman gr a mma r ians a s G ellius a nd such biographers as Pl ut ar ch (see B iography Gr eek a nd Roman). History and religion are among the topics t hat interest Mac robius's ba nqueters. S o a re the works of ancient authors and Roman behavior and c ustoms. The ba nquet a nd t he d iscussions continue over a period of three days-a sort of intellectual conference. Mornings are devoted to serious d iscussion; t he w orks o f Vi rgil o ccupy two mornings. More diverting topics occupy the aÄernoons a nd e vening. Then t he d iscussion turns to such matters a seating, drinking, and joking. Though Macrobius has occasionally been ranked a mong C hristian a dherents, b oth the thrust of the conversations in Saturnalia and the identity of the guests suggest that instead he was an e nlightened an d in tellectual N eoplatonist pagan. A mong the guests is one named Euangelus. Both ignorant and rude, he s eems to b e the combative Ch ristian f oil for t he le arned a nd peaceable pagans. Macrobius does not place himself among the company, though he makes clear his authorial preferences.

A work i nfluential i n t he M iddle A ges a nd early Re mis sance was Macrobius's *Commentary* on the Dream of S cipio as Cicero discusses it at

length in his *De Republica*. Macrobius considers the ways in which Pl at o's *Republ ic* and that of Cicero d iffer. Mac robius d iscusses the s oul a nd concurs in Plato's view of it. Macrobius sees the *Dream* as having successfully combined the several subjects treated by philosophy. The principal philosophical t hrust of Macrobius's w ork i s Neoplatonist. Mad Hercules (Hercules furens) Seneca (before 54 c.E.)

Although Seneca borrows the plot of h is version of Hercules' madness from the Greek original of E uripides (see *Heracles*), the Roman tragedian is at pains to u nify the plot and to heighten the psychological realism of the story. Both p laywrights d eal with the s ame s et of occurrences, though Seneca's erudition suggests a broad mastery of the genre of tragedy and a loĀier aim than simple adaptation. Most of the characters of the play have the same names in both the Greek and the Roman versions. There are, however, a few differences. The Greeks call the play's hero Her acl es instead of the Roman form, He rcules. The Romans call the que en of the gods Juno, while the Greeks add ressed her Hera. Her husband, the king of the gods, is Zeus in Greek and Jupiter or Jove in Latin. Otherwise the characters' na mes are identical in b oth the Greek source and its Roman revision.

While Hercules is in Hell performing the last of h is 12 g reat labors—capturing C erberus t he three-headed watchdog of Hades—a u surper named Lycus k ills Thebes' rightful k ing, Creon, who is Hercules' father- in- law. Lycus a lso plans to kill Hercules' earthly father, Amphitryon, and his children by Hercules' wife, Megara.

In E uripides' ve rsion of the p lay, H eracles returns in time to save his relatives and kill Lycus. Once t hat ha s happ ened, ho wever, Eu ripides changes t he sub ject. N ursing her r esentment against Heracles because Zeus had fathered Heracles with a h uman w oman, A lcmene, the g oddess Hera, Zeus's wife, de cides to d rive Heracles mad. She do es s o, and in h is mad ness Heracles kills h is own c hildren. Thus, the G reek p lay divides in to two e ssentially u nrelated e pisodes, and the tragic part arises from the events of the second plot. The sudden ness with which Euripides i ntroduces this turn of events catches the audience by surprise and contributes to the effect of the play.

Seneca, h owever, p repares h is a udience f or Juno's vengeance by having the goddess open the Roman v ersion w ith a long soliloquy de tailing her grievances against Hercules and her plan for revenge. Now the effect a rises from the delayed fulfillment of the a udience's e xpectation of the play's u nhappy o utcome t hroughout H ercules' successes against Lycus.

Seneca heightens Hercules' grievances against Lycus b y i ntroducing a n elem ent o f je alousy. Lycus, who does not i magine t hat Hercules will ever r eturn, i s p lanning t o marry M egara. She makes it clear that she would rather die.

Seneca also slows the pace of his play a bit with an apostrophe, or address, to fortune. At the end

of the second scene of act 2, Amphitryon feels the earth quake and recognizes the approaching footfalls of H ercules a s h e r eturns f rom H ell. The entire third scene is devoted to a choral address to fortune a nd a s ynopsis of t he s tory of O rpheus and Eurydice.

Another possible d ifference b etween t he t wo plays is this. Euripides' version was unquestionably w ritten for public per formance. Seneca's may well have been intended as closet drama—a play to be read privately or by a group of readers who read the parts of the s everal c haracters to each other without an audience. Seneca's declamatory or or atorical mo de f avors lon g s peeches and balanced exchanges.

Hercules has brought the Athenian king Theseus with him back from Hell, and Amphitryon quizzes Theseus about the underworld. His questions evoke long, melodramatic answers.

The long-anticipated mad ness of H ercules begins to a ffect him in the first scene of act 4 shortly a Åer the hero has slain Lycus, but before he has performed the propitiary sacrifices his justifiable hom icide re quires. He m istakes h is own wife and c hildren for t hose of L ycus a nd s lays them. P erhaps S eneca s ought to h eighten t he credibility of t his action by h is e arlier i ntroduction of Lycus's attempt to seduce Megara. Hercules' homicidal spree ended, he falls asleep and his father, A mphitryon, has the servants disarm the hero lest he resume killing on awakening. The last scene of the act is given over to a choral dirge.

The final act begins with Hercules awakening in his right mind and recognizing his responsibility for the carnage in whose midst he finds himself. He is totally u naware that he ha s c aused it until he recognizes his own arrows. Amphitryon confirms that Hercules is h is fa mily's murderer, but A mphitryon declares that the fault rests not with Hercules but with Juno. Aided by Theseus, Hercules seeks a place of exile where he can hide until the time for h is final return to t he u nderworld is at hand.

The tragedies of S eneca became the principal models for the so-called tragedy of the blood of the early modern period in Europe. In the man-

ner of Seneca, such practitioners as John Dryden strewed the stage with corpses.

Mahabharata Vyāsa (ca. 1500 B.C.E.; current form ca. 300–150 C.E.)

Attributed to the ancient priest, poet, and sage, Krishna Dwaipāyana Vyā sa, and perhaps in part actually composed by him, the *Mahabharata* is the great epic of India. It clearly, however, grew over time by accretion. In keeping with ancient custom, the poet authors who composed the later sections found greater merit in submerging their individual identities in the persona of their great originator t han i n c rediting t hemselves w ith their own contributions. Though portions of the epic may very well survive from preliterate, early antiquity, much derives from later times.

In the form we now have it, the *Mahabharata* is w ritten in the Sanskrit tongue. The lo ngest national epic and longest poem extant, in its full form it contains some 200,000 lines deployed in *slokas*, or couplets, through 18 cantos. In its shortest version, it runs to 88,000 lines. Hindus believe that merely reading the poem is an act of religious devotion that gains every good and perfect reward for the reader.

From a h istorical perspective, the poem finds its origins in the ancient conflicts that occurred as the Aryan peoples from regions to the north and west of India swept down in waves of conquest that overcame or displaced the original inhabitants of the subcontinent—people who were mostly speakers o f D ravidian to ngues. I n t he p oem, t hese opposing forces are represented as being from different lineages of the family founded by Bharata the founding father of India, or by its native name, Bharat. The opposing first cousins include, on the one hand, the sons of Raja Pandu, the five Pandava brothers. On the other, we find the 100 s ons of a

412 Mahabharata

blind king, Raja Dhritarashtra. These brothers are collectively called the Kaurava. The epic's central event is the monumental b attle of K urukshetra between those opposing forces. Though the poem's 18 c antos e voke t hat conflict n umerologically by suggesting the poem's 18 armies fighting a war that lasted 18 d ays, only a bout 4,000 lines of t he epic concern themselves directly with this main plot.

From a generic perspective, the work is otherwise an e pisodic composite of h istory, l egend, philosophy, s aving t heology, m yth, lo ve a ffairs, vengeance, ethics, politics, warfare, government, and physical and spiritual cosmology. In brief, it takes this life, future lives, and the release from the necessity for continual rebirth as its deepest subjects. Some of its sections are oĀen published as f reestanding w orks in th eir o wn r ight. A n entry c oncerning t he p rincipal o ne o f t hese, Bh a gava d Git a, appears separately.

The opening s ection of the Mahabharata is called the Adi Parva. As it begins, a king, Pariksit, has wounded a deer. Trying to follow it in the forest, h e e ncounters a Br ahman w ho had t aken a vow of silence. The king asks about the deer. When the sage says nothing, the angry king hangs a dead snake around the holy man's neck and leaves. On the holy man's arrival home, the sight of the snake so angers the sage's son that he curses the king to die by the bite of the ruling serpent, Taksaka. That curse is fulfilled, and the king's son plots revenge against Taksaka by sacrificing a quantity of snakes. He does so but is stopped just before sacrificing Taksaka himself. Then the sage Vyāsa-the epic's legendary author-arrives, a nd t he n ew k ing, Janamejaya, re quests t hat Vyāsa t ell t he s tory o f the Kaurava-also called Kurus-and the Pandava, for Vyāsa was the real father of the kings Pandu and Dhritarashtra, and he had seen their conflict with his own eyes.

Vyāsa c omplies w ith the k ing's request, appointing t he first o f the g reat e pic's t hree narrators, V aisampayana, to r ecount t he s tory, and the *Mahabharata* gets underway in earnest. It first recounts the marriage of the wise king and bowman, Santanu, who marries in human form the g oddess G anga, t utelary dei ty o f t he R iver

Ganges. Before leaving him to return to her divine state, t he g oddess b ears t he k ing eig ht g odlike sons. S he d rowns t he first se ven s o t hey c an assume their heavenly identities. At the Santanu's request, she spares the last son, who is known by three names: Gangadatta, Gangeya, and Devavrata. The goddess takes that son and disappears. Later, the king encounters Devavrata as a young man with superhuman strength. He first disappears a nd t hen r eappears to t he k ing w ith h is mother i n a ll her d ivine b eauty. De vavrata remains with his father. When the father wishes to r emarry a nd h is p rospective father-in-law requires that the eldest son of the new marriage will succeed to the throne, Devavrata steps aside in hi s f ather's in terest, and h is ha lf b rother, Citrangada, succeeds Santanu on the throne.

Devavrata now acquires another name, Bhishma. This name reflects his vow never to marry or have children who will challenge the claim of his father's second fa mily to the throne. Like many another vow in the course of the epic, this one has ser ious consequences, for when he rejects a woman, A mba, b ecause of the vow, she i n t urn vows to kill him. None of the many vows in the epic proves inconsequential.

As matters e volve, Ci tragada's l ine d ies o ut, and h is w idows w ant c hildren. Si nce Bh ishma sticks to h is vow, he asks the poet-sage Vyāsa to substitute. V yāsa a grees, b ut a s a s olitary holy man, he mortifies his flesh. As a result, he is filthy and he stinks. The princesses are displeased. One closes h er eyes at the sight of h im, and an other grows pale at his touch. For these reasons, Vyāsa's son by the first princess is born blind and becomes King Dhritararastra. The son by the other is born light- kinned—King Pandu.

Pandu t akes t wo w ives, K unti a nd Mad ri. Before either becomes pregnant, however, Pandu is cursed to die on the day he has sex. He therefore re signs h is k ingdom a nd t akes h is w ives away. Kunti reveals that she has the power to call gods to her and bear their children. She do es so and first bears the son of the god Dharma. This son's name, Yudhishthira, means "truthful" and "virtuous." She n ext bears the child of the wind god, Vayu. This son, Bhima, will be the strongest of men—possessed of t he s trength of 1 0 e lephants. Fi nally s he g ives b irth to A rjuna, t he greatest of bowmen and a peerless warrior. He is the son of the god Indra. Kunti shares her power with h er co-wife, M adri. Madri p roduces t win boys: N akula and S ahadeva. A ll five P andava brothers are now on the scene.

If all this strikes one as improbable, more follows. The bl ind k ing D hritarashtra has ma rried Gandhari in the meantime. To share his infirmity, she permanently blindfolds herself. She becomes pregnant and remains in that condition for two years, finally bearing a ball of flesh. On Vyāsa's advice, she d ivides the ball i nto a h undred sections and puts each in a jar of butter. When they have r ipened t here, t hey c ome f orth, a nd t he omens surrounding their appearance make clear that the 100 Kaurava brothers are the offspring of demonic forces.

If the poet in question were Edmund Spenser instead of V yāsa a nd h is su rrogates, a r eader might see in the foregoing passages preparation for the assault of the many sub categories of the deadly sins upon the five s enses of the human creature. In the *Mahabharata*, however, the reader f ollows t hrough ma ny e pisodes the g rowing and in creasingly vi olent r ivalry b etween t he demigods and the demidemons as they grow to manhood.

When the mighty bowman and warrior, Arjuna, has grown to ma nhood, he wins the hand of the lovely D raupadi i n a n archery c ontest. The catch is that, not knowing the nature of the prize, his mother, Kunti, had instructed him to share it with his brothers, and he has promised to do s o. A vow is a vow, so all five Pandavas marry Draupadi, t hereby a nswering five pr ayers for a h usband that, in an earlier existence, she had addressed to the god Shiva.

The brothers agree to respect each other's privacy when t hey are with D raupadi, b ut A rjuna accidentally one day interrupts her with a brother. In penance, he exiles himself for a year. While he is gone, he cements alliances with other leaders by contracting three more marriages. One of these is with the sister of Krishna. Krishna is the incarnation of Vishnu—the pre server of the universe—come to earth to save it from the threat the K auravas r epresent. Chaos t hreatens o rder, and e vil th reatens g ood. D ivine i ntercession i s called for. The literary critic, L arry Brown, suggests that the divinity of Krishna may be a l ate addition to the poem since he is also represented as a mortal, human prince with human failings.

Tensions continue t o g row b etween t he t wo sets of cousins, and the Kauravas eventually engineer a crooked ga me of d ice i n which t hey w in control of a ll t he Pa ndavas a nd D raupadi. A s a result, the Pandavas spend 12 years in the wilderness and agree t herea Åer to l ive in disguise for a year. B ooks 3-5 of t he e pic follow t hem i n their exile. In the 14th year, however, the Kauravas fail to honor their agreement to restore the Pandavas, and w arfare b ecomes i nevitable. K rishna ma kes an effort to dissuade the Kauravas, even revealing himself to them in his divine form, but all to n o avail.

Before the battle is joined, however, the warrior Arjuna refuses to fight and slay so many of his k insman. Overcoming h is o bjections is the work of Krishna in the Bhagavad Gita, described in a separate entry. In the *Gita*, however, Krishna has revealed his divinity to A rjuna. At the same time, the blind king Dhritarashtra he ars K rishna's words repeated by one of the *Mahabharata*'s narrators, S anjaya. The en ormous armies ar e drawn up in battle array, and Dhritarashtra fears that with Krishna on their side, the Pandavas will be invincible.

The 18-day-long battle begins with the unconquerable A rjuna le ading t he Pa ndava forces. I n the K auravas' r anks, s ome, i ncluding Bh ishma and Drona, though they fight hard out of loyalty, really want the Pandavas to win and pray for their victory. Ironically, such persons all fall in battle, including Bhishma, who falls as a result of a subterfuge of t he w oman he had e arlier r ejected, Amba. Another vow is fulfilled.

Krishna h as lo st a s on i n t he battle, a nd he vows t o k ill the u nit commander of t he t roops who killed his son before sundown the following

day. To thwart the defenses of a formation Krishna knows to be otherwise impregnable, he causes an e clipse of the s un. The K auravan def enders think n ight ha s fallen, r endering K rishna's v ow null a nd void. They la y d own t heir def ensive weapons, and Krishna fulfills his vow.

Many scenes of individual combat and heroism and many reports of victory through successful d eceptions p unctuate t he s tory of t he epic battle. The overall commander of the Kauravas' forces has been the field marshal, Duryodhana. The Pandavan hero Bhima challenges him to single combat. Like Achilles in Homer's The Ili ad, Duryodhana has been rendered invincible by h is mot her's magic. A lso l ike A chilles, Duryodhana has a vulnerable spot—in this case, his thighs since he has worn a loincloth because his modesty prohibits his fighting naked before his mother. Bhima breaks the rules and strikes his legs; D uryodhana's f all en ds t he w ar. The parallels with H omer a ref requent a nd s ometimes suggest common sources from the or al for mul aic tradition of a preliterate age.

As Duryodhana dies, his fellow soldier, A shvatthama, reports that he had massacred all the Pandavan su pporters, i ncluding t he c hildren of the f amily, w hile t hey s lept t he n ight b efore. Everyone on both sides—except for Ashvatthama and the five P andava brothers—has d ied in the war or will soon die of their wounds. Some 6 million have fallen.

Recriminations, p rophetic v isions, a nd r eligious in struction f ollow t he w ar a nd o ccupy books 1 1–18 o f the e pic. A mong t hem i s t he assurance that in the fourth age of the world—of which o ur c urrent t imes a re a part—the w orld will be turned upside down, the forces o f g ood become evil, and vice versa.

Gandhari, the mother of the 100 deceased Kauravas, curses Krishna and predicts his death at the hands of a stranger. She also prophesies the fall of the Pandavas aÅer a period of 36 years. At the end of that period, the then- arrent king, Yudhishthira, dies and arrives at the gate of the Hindu heaven, *svarga*, carrying a dog. On b eing told that no dogs are allowed, Yudhishthira decides he will not enter. The dog, however, is really the god Dharma conducting a little test that Yudhishthira has passed. He faces one more test, in which all the other Pandavas and their common wife, Draupadi, seem to be suffering in one of the seven Hindu hells. Y udhishthira s ays h e prefers b eing w ith them to being in heaven. This is the right answer, and all are reunited in Paradise. Residence there, however, is not a permanent condition. Until one escapes t he c ycle of de ath a nd r ebirth t hrough extraordinary merit, all sojourns in he aven or in one of the hells are temporary.

Mani (216–ca. 276 c.e.) Babylonian-Syriac prose writer

The founder of a Gn ostic s ect, Ma nichaeanism, that shared some features with early Christianity, Mani was probably born in Mardinu in northern Babylonia. His fa ther a nd m other were b oth o f noble A rmenian d escent, but M ani's bi rthplace made h im a B abylonian. The y oung Ma ni g rew up i n a religious household w hose p ious obs ervances were those of a non-Christian, vegetarian, abstemious s ect t hat p racticed ba ptism a nd encouraged c elibacy. B abylon w as a r eligious melting p ot w here a ncient m ystery r eligions o f every d escription were pr acticed side b y side with emergent Christianity, Z oroastrianism, the several va rieties o f i dolatry, a nd t he m ultitudinous cults of local deities.

Twice in his youth, in 228–29 and in 240–41, when h e wa s 1 2 and 2 4, r espectively, Ma ni received personal visits from an angel named at-Taum. The k ing of t he Pa radise of Lights h ad sent the angel to reveal to Mani his vocation as the preacher of a gnosis. *The New Catholic Encyclopedia* defines *gnosis* as: "a definitive and ultimate divine revelation."

Mani assumed the role of a missionary, traveling first t o I ndia, where H indu t hought de eply influenced h is i nterpretation o f h is c alling. On his return trip, he toured the Middle East, always preaching h is n ew creed and b uilding a r eputation as a missionary. Recognizing in Mani a useful i nstrument f or h is p olitical a mbitions, t he Persian e mperor, Shapur I, su mmoned M ani t o join h is r etinue a s Sha rpur p ursued h is anti-Roman program. As a m ember of the emperor's party, Mani first came into contact with Christianity, many of whose doctrines and principles he found congenial to h is own way of thinking. He readily i ncorporated s uch v iews i nto h is o wn composite religious ideas.

Mani won many converts, a number of whom also b ecame m issionaries, sp reading h is g ospel into t he Roman world, c hiefly E gypt. A mong those who subscribed, at least for a t ime, to t he Manichaean f aith w as n o le ss a subs equently Christian luminary than St. August ine. Augustine, who had b een r eared as a C hristian, c onverted temporarily to Manichaeanism before his final r eturn to t he C hristian f old a Āer h earing the sermons of St. Ambr ose.

For more than 30 years, Mani enjoyed the protection of t he emperor and h is i mmediate successor. When, however, a P ersian devotee of t he old Z oroastrian f aith a ssumed t he t hrone, h is counselors judged Mani a her etic. He was jailed for 26 days and, at age 60, died in prison. His head was exposed on the gate of the city until his disciples collected his remains and buried them.

Like J udaism, C hristianity, and H induism, Manichaeanism was and is a religion of the book. To help promote and spread the word of the religious system he had de veloped to p reserve a nd share h is r evelation, Ma ni c omposed a s eries of works in the Syriac language as it was spoken at the c ity of E dessa (thus ca lled Edessan S yriac). He also developed a d istinctive s cript de veloped from Ar amaic c alled M anichaean S ogdian. H e used it for all but one of his works, some of which are considered canonical and some not.

The canonical works included *The Living* [or *Great*] *Gospel, The Treasure of L ife, P ragmateia, The Book of Mysteries, The Book of the Giants,* and Mani's *Letters.* A lso c anonical w as the single work tactfully, as its title reveals, written in Middle Persian, *Šāhburaghān* [Writings dedicated to his royal patron, Shapur I].

Manichaean writings (third century C.E.)

Seven works of Mani, the founder of the Manichaean religion, were considered canonical: *The Living* [or *Great*] *Gospel*, *The Treasure of L ife*, *Pragmateia*, *The Book of M ysteries*, *The Book of the Giants*, Mani's *Letters*; and his Šāhburaghān

416 Man'yōshū

[Writings d edicated to h is royal patron, Shapur I]. Most of these works have largely perished; scholars k now t hem through s urviving f ragments o r because of allusions in the works of other writers.

From the few surviving fragments of the *Living Gospel*, we learn that it had 22 chapters—one for each of t he 22 letters t hat composed t he Sy riac alphabet. We also know that, i n it s pages, Ma ni promoted h imself a st he Paraclete—the H oly Spirit—whose coming Christ had foretold. Beyond that, little is known except t hat Mani p robably had access only to a single Syriac Christian gospel that circulated during his lifetime.

The Treasure of L ife contained at least s even books d etailing Ma ni's thinking a bout a nthropology and p sychology. The work also set forth Mani's theories about human beings as the constituents of a microcosm and considered the circumstances of those whom he called "dwellers in the realm of light." An Arab writer, Abu Rayhan Al- Bruni, has preserved a portion of that consideration in his book about India. Other substantial extracts a ppear both in the work of St. A ugusti ne, *De Natura boni* (*On the Nature of the Good*), and in the work of the Christian controversialist Euodius, *On Faith: Against the Manichees*.

Nothing but the title remains of the *Pragmateia*, but judging from the title it is likely to ha ve been a work on practical ethics. A si milar informational void fac es st udents of Ma nichaeanism interested in *The B ook of M ysteries*. They k now something of its form; it had 1 8 chapters. They also know the headings of three chapters. These suggest that those sections de alt with a Gn ostic Christian splinter group in Edessa whose leader was named Bardesanes.

Matters take a turn for the better with respect to *The Book of the Giants*. Enough fragments have surfaced to make possible reconstructing most of the work. In this work, Mani combined an ancient Middle Eastern tale a bout the fall of the angels, retold in the H ebr ew B ibl e's B ook of E noch, with an Iranian account of a g iant na med Og ia who lived aÅer the great flood and who had killed a dragon. This, then, seems to be a work of mythohistory comparable to that of the Greek Hesiod. The s tudent of a ncient r eligions, G eo Wi dengren, s uggests t hat M ani's letters—again m ostly lost—were a conscious imitation of the letters of St. Paul in which Mani, as the leader and pastor of his flock, gave advice to his fledgling congregations.

All of the above canonical writings were in the Edessan Syriac language. The one canonical exception t o M ani's u se of t hat to ngue occurs in the writings that Mani addressed to Sharpur I. These were written in M iddle Persian—presumably the king's n ative t ongue. Re cently discovered f ragments s uggest t hat this w ork c ontained M ani's views on the c reation of the u niverse, the end of the world, and what would happen a Åer that. The work a lso c ontained bi ographical i nformation about Mani's birth and identified him as one in a succession of i ncarnations of a he avenly messenger. These i ncluded Buddh a, Z oro ast er, Je sus, and Mani.

A number of noncanonical Manichaean writings exist that were penned by Mani's successors. Among them is a life of Mani that bears the earmarks of the lives of other religious leaders and of s aints. I t c ombines a ctual biography w ith accounts of m iraculous w orks and h is martyrdom. These works, which were not directly written by Mani, need not concern us here.

Man'yōshū (Collection for a Myriad Ages) (ca. 795 c.E.)

The e arliest su rviving a nd generally regarded as the best collection of Japa new poetry extant, the $Man'y\bar{o}sh\bar{u}$'s 4,516 p oems in 20 books represent a fairly narrow spectrum of forms with widely varying subjects. The work's title has also been t ranslated a s *Collection of T en Thousand Leaves.* Among e arlier examples of p oetry, w e find those of male and female poets who represent several social and economic classes from the most humble to the highest. The later examples tend to come from court poets—again of both sexes. Particularly, the collection is prized for the intensity of the emotion that it expresses. Some 450 of the poets represented are either named in the collection's pages or are otherwise identifiable, but many of the ve rses i ncluded sp ring from an onymous origins.

The composition of some of the poems collected in the $Man'y\bar{o}sh\bar{u}$ predates Ja pan's e arliest book, the Kojiki, by a lmost a c entury. Many of the poems in the collection were probably sung a fact to which some of them doubtless owe their preservation. They a lso s how the influence of Chinese poet ic practice and thus testify to the cultural contacts that regularly increased between China a nd J apan in the s eventh c entury c. e. Nonetheless, it is clear that Japanese pronunciations are intended throughout the book except in the Buddhist poems of Book 16, and in two other minor instances.

Though more than one name has been offered as t he c ompiler of t he c ollection, t he m ost authoritative v iew hold st hat a p oet na med $\hat{O}t$ omo no Ya ka moch i performed the editorial work b etween 744–45 and 759 c. e. The en ding date is a lso that of the last dated poem in the book. At least six known prior but now lost collections s erved as one of Yakamochi's so urces: Yaman oue no Okur a's *Karin* (Forest of verses); the anonymously compiled *Kokashū* (Collection of a ncient poems); and four collections bearing the names of poets who either compiled them or whose w orks were i ncluded i n t hem. These a re the Ka kinomot o n o Hit omaro, Ka namura, Mushimaro, and Sakimaro collections.

From t he p erspective o f f orm, m ost o f t he $Man'y\bar{o}sh\bar{u}$'s p oems are tanka (in a ncient t imes called *waka*)—five- Ine poems with, first, a five-syllable l ine, t hen a seven-syllable l ine, t hen another line with five s yllables, and finally t wo lines with seven syllables each. The best poems in the collection, ho wever, a re considered to b e its 265 *chōka*—longer p oems o f 3 0–40 l ines t hat

alternately ha ve five or s even s yllables. These sometimes tell stories, sometimes express sorrow at parting or grief over death, or sometimes congratulate prominent persons on notable achievements. The $ch\bar{o}ka$ apparently r eached its ap ogee during the ancient period, and the examples contained in t he $Man'y\bar{o}sh\bar{u}$ have n ot si nce b een equaled. The l iterary h istorian Do nald Ke ene attributes t he e xcellence of t hese p oems to t he direct fashion in which the poets who composed the $ch\bar{o}ka$ of the $Man'y\bar{o}sh\bar{u}$ communicated their emotions to their readers.

Later Japanese poets strove for subtle implication of emotional quality with, as Keene thinks, a concomitant loss of directness. The ancient $ch\bar{o}ka$ succeed both in direct narration and in evoking strong feeling.

The poems of the first book appear in the order of their composition, beginning with a poem by Emperor Y ūraku; its c omposition dates to 645. The poem describes a chance encounter between the emperor and a pretty maiden. He asks her for her na me a nd add ress a nd i dentifies h imself a s her lord. The second poem is also from an imperial author, this time Emperor Jomei, who succeeded the last ruler named in the Kojiki. This was the Empress Suiko. Thus, the first two poems of the collection p rovide a t ransition from the Kojiki into the subsequent artistic endeavors of the Japanese. Many of the poems of the first book appear to have been written by female court poets who were responsible for c omposing the poetry that was performed on state occasions.

Many other poems are love poems, oĀen verse exchanges bet ween sometimes-ilicit lovers. The Japanese tactfully allude to this poetic category as *mutual in quiries*. E xemplifying this s ort o f exchange, we find a poem addressed to the crown prince from his former wife, Princess Nukata (see fe mal e p oets o f a ncient Japan)—a w oman now married to a nother man. She r eproves him for waving at her during a royal hunt and fears his continued a ffection f or h er w ill b e n oticed. H e replies w ith a c ourtly c ompliment i n w hich he confesses his love despite her allegiance to a n ew husband.

418 Man'yōshū

As the chronologically arranged poems of the book move into verses composed during the second of the $Man'y\bar{o}sh\bar{u}$'s f our p eriods, t he w ork appears of the m ost g iĀed poet i ncluded i n the collection, Kakinomoto no Hitomaro, who seems to have served as the principal court poet to t he widowed e mpress J itō. The c ollection's lo ngest poem is Hitomaro's e l egy on the death of Jitō's husband, Prince Takechi. The poem both mourns the prince and celebrates his courage on the field of valor. Other works mourn other deceased members of the royal family, and others still sing the praises of t he em press a nd t he d ivinity of t he royal family whom Hitomaro served.

Hitomaro's m ost ce lebrated el egies, h owever, do not concern the imperial family. One of them, instead, eulogizes a dead stranger whose corpse he observed on the island of Samine. The others are t wo ele gies of pa rting t hat t he p oet w rote when h e w ent on a journey, leaving h is w ife a t home, and two eulogies that the poet offered on learning that she had died in his absence.

A powerful court figure and the father- in- kw of two emperors, Fujiwara no Fuhito, strongly preferred Chinese to Japa rese poetry. That preference may e xplain t he tem porary n eglect o f na tive poems d uring t he doz en y ears of Fu hito's i nfluence at court. An exception to that generalization was a poet who specialized in travel poetry and scenic descriptions, Takechi no Kurohito. Another poet who ach ieved considerable re nown between 724 and 737 was Yamabe no A kahito, who combined nature poetry with courtly compliment.

The reputations of some of the poets featured in the $Man'y\bar{o}sh\bar{u}$ have waxed and waned at different periods over the centuries. On e whose stock rose sha rply in the 20th century was Yamanoue no Okura (ca. 660–733 c.e.). This revision of critical thinking arose from the 20th century's preference for the *chōka* form. Some of his poems deal with the conflicts that arise between one's official duty in serving the emperor and being a de votee of Daoism who has renounced the world. Others deal with Ok ura's de votion to h is children, with the b revity of h uman l ife a nd b riefer lo ve, a nd with the ills accompanying old age. He treats these universal themes with powerful expression. Okura wrote both in Chinese and in Japanese. His bestknown p oem i s his "Dialogue o n P overty," i n which a poor man complains of the cold and the miserable f are o n w hich he subsi sts. Bu t h is thoughts turn to those even poorer than he, and he wonders how they live. A second verse answers this question with a poignant description of utter destitution made c oncrete by p icturing a sp ider spinning its web in a cold and empty cooking pot and a growling tax collector insisting on payment. The poem itself speaks in its last three lines, passing judgment on the pain and shame in the world of men and lamenting the poem's inability to fly away as it lacks the wings of a bird.

The fourth and final period of the Man'yōshū (poems composed between 730 and 759 c.e.) centrally features the work of its compiler, Ōtomo no Yakamochi. At about the age of 14, Ōtomo began addressing a rdent lo ve p oems to h is 1 1- or 1 2year-old cousin-the g irl he m arried w hen s he was 19 or 20. Ōtomo belonged to that class of poets who always seem to be in love with love. Beyond poems addressed to his wife and his aunt, the collection i ncludes p oems add ressed to 1 4 na med women a nd ot hers u nnamed. I n at le ast one instance, Ōtomo includes the feminine responses in poems of mutual in quiry. A reader finds 29 poems by Ōtomo's literary paramour, Lady Kasa (see f emal e poet s o f a nci ent J a pa n), together with th e p oems he w rote t hat p rovoked her responses. At this remove, there is no way to know if their exchange was the product of an actual love affair or was a literary game. It may well have been both—an a ctual love for the lady and a literary game (perhaps with fringe benefits) for Ōtomo.

She c omplains t hat he do es n ot r eturn her affection, co mparing h er ar dor t o "bowing... behind the back of the famished devil." Ō tomo Yakamochi can't i magine what he w as thinking about when the pair originally got involved since there was no chance that the relationship could go anywhere.

Beyond the verse of notable poets whose names and reputations are well known, numerous anonymous poems also appear in the *Man'yōshū*. Some were written in dialect and composed by frontier guards. Others were written by shepherds and, in the fashion of the European pastor al, by nobles pretending t o b e shepherds. A pair of "beggar poems" seems to have been composed by professional improvisers who performed in town markets. Their ostensible authors are a deer and a crab that are about to be turned, respectively, into useful artifacts and dinner.

Additionally, one finds p oems expressing t he feelings of the farm-girl mistress of a young nobleman, a poem to comfort a child when it thunders, and an onymous p oems o f lo nging f or d istant loves.

Within a century a Åer i ts c ompilation, t he $Man'y\bar{o}sh\bar{u}$ fell out of favor because of the soaring popularity of Chinese poetry. As a result, copies perished or were s cattered, and whole s ections disappeared from view. When the rising spirit of Japanese nationalism eventually overcame popular ad miration for a ll t hings C hinese, e fforts began to recover the full text. This was an enterprise that took centuries, and it was not until the 20th century that the full text was recovered and published in scholarly editions with full academic appraisal. The work of understanding and interpreting the poems is ongoing.

Marcus Aurelius (Marcus Aurelius Antoninus, Marcus Annius Verus) (121–180 c.E.) *Roman prose writer*

Born in Rome to Annius Verus and Domita Calvilla, Ma rcus A urelius w as c hosen b y t he r eigning emperor, A ntonius Pius, to b ecome both his sonin- hw and heir to the Roman throne. Marcus was then 17 years old. He married the emperor's daughter, F austina, a nd b egan h is s ervice a s a Ro man consul at age 18 in the year 140 c.e., serving in that capacity u ntil h e s ucceeded a s em peror i n 1 61. During h is consulship, w hile he p erformed h is duties w ith c areful at tention to ju stice, h e a lso continued h is st udies. These principally i ncluded the Stoic philoso phers (see St oic ism) and law.

On succeeding to the throne, Marcus Aurelius invited his adoptive brother, Lucius Aurelius Verus, to sha re the re sponsibilities of empire with h im. Regrettably, he d id n ot p ossess h is brother's v irtues, but he nonetheless became a successful military commander in the East. The times, however, remained d ifficult. Such natural di sasters as plagues, earthquakes, and floods beleaguered Italy. Many of the subject peoples of the empire were in arms from Asia to Britain. Thus, the principal irony of Marcus Aurelius's life arose from the circumstance that a person of his peaceful disposition continually had to lead military campaigns.

Marcus Aurelius faced and decimated the Marcomanni in two engagements (168 a nd 173 c. e.) along the Da nube R iver. Verus had sha red command in the first engagement, but he died in 169. Marcus Aurelius was called to put down a re bellion in the Eastern Empire—a task e ased by the death of the chief rebel. He made a g rand tour of the trip h ome, s topping off in b oth E gypt an d Greece. In A thens, he e ndowed professorships in each of the principal schools of Greek philosophy the E picurean, th e P er ipat et ic (Neoplatonic), and the Stoic.

Late in 176, Marcus Aurelius was called again to Germany. There his always-fragile health broke down, and he died in the field. Fortunately, someone in h is party had t he foresight to p reserve the emperor's *Medit at ions*, or *Communings with Himself*—a work whose 12 books he had c hosen to compose in Greek.

Martial (Marcus Valerius Martialis)

(ca. 40-103/4 c.e.) Roman poet Born in Spain in the town of Bibilis to a mother named Flacilla and a father named Fronto, Martial acquired a good education before migrating to Rome, where he sp ent most of the rest of his life. There h e be came a ssociated w ith a nother family with S panish connections-that of t he poet Luca n and his powerful uncle, Seneca, first the tutor and then the close advisor to the emperor Ne ro. W hen the m ale members of Lucan's family were forced by Ne ro to commit suicide aÄer they conspired against the emperor, Martial continued to receive patronage from Polla Argenteria, Lucan's brilliant and accomplished widow. He a lso for ged connections with many of the principal literati o f h is day-such a uthors a s Frontinus, Juvenal, Quintili an, Pliny the Younger, and Statius.

As far as posterity knows, Martial composed only e pigr a ms: pit hy, o Åen witty, brief p oems on a wide variety of subjects (see his *Epigr a ms*). A g ood ma ny o f h is e pigrams were ce rtainly occasional poems t hat h e pe nned f or cl ients who em ployed h is s ervices to w rite v erses to grace anniversary celebrations, for example, or to accompany giÅs. In short, he worked to order as a versifier.

In 80 c.e., Martial published a work known to posterity as his *Book on Shows* or *On the Spectacles*. It c ommemorates a series of spectacular entertainments presented by the emperor Titus in the then recently built Colosseum. That Martial had been chosen to write this work suggests that his reputation as an epigrammatist was a lready firmly and profitably established. Only a part of this work survives.

The year 85 s aw two collections issued, *Xenia* and *Apophoreta*. These contain two-line v erses written to a ccompany, in the first c ase, g iÅs of

wine and food, and in the second, miscellaneous presents. Both sorts were exchanged at the Roman festival of S aturnalia, the Roman antecedent of Christmas, which t ook p lace on December 17. These co llections no w app ear i n t he c orpus o f Martial's work as books 13 and 14.

Martial's l audatory p oems i n c elebration o f the emperors Titus and Domitian earned him the financial advantages that equaled those of fathering three children for Rome. In later times, the annual premiums that rewarded siring and rearing a large brood of children-future soldiers in the case of the males-came to be disbursed as a mark of i mperial f avor f or a nything t he r uler found ple asing. At a ny r ate, t he em peror T itus awarded the "right of three children" to Martial, and Domitian renewed the grant. Martial's assiduous cultivation of royal personages also earned him the office of tribune for six months and, with it, aut omatic ele vation to e questrian r ank. (The free people of Rome were divided into plebeians, equestrians, and patricians, each rank enjoying progressively higher social status.)

Martial's co llections of epigrams a ppeared with r egularity b eginning i n t he y ear 8 6 c. e., when books 1 and 2 appeared. They were followed in 87 by book 3; by books 4–9 between 88 and 94; and by book 10, first in 96 and aÅerward in 98 in a revised e dition. The assassination of Domitian in September 96 required the excision of passages in praise of the now universally despised and discredited emperor. The revision, however, did not work for M artial. D omitian's successors, Nerva and Trajan, viewed the poet with suspicion, and Martial found it expedient to return to Bibilis in 100.

There, far from the urban attractions that he had s o c ome to r elish, Ma rtial l anguished, a nd there, th ree o r four y ears l ater, he d ied. W hen news of h is d eath re ached Ro me, s ome o f h is friends and admirers genuinely mourned. Among them was Pliny the Younger, who wrote on many topics and who collected and published h is own letters. In one of them, a letter to a f riend, Pliny wrote a touching tribute to Martial and the value of his work.

Martyrdom of Polycarp, The Marcion of

Smyrna (ca. early second century C.E.) Surely the best-documented Christian person of the second century, Polycarp was the author, the recipient, and the subject of three of the letters included in the collection of early Christian, noncanonical w ritings known as the *Apostolic Fathers of the Christian Church*.

Marcion's l etter de scribing P olycarp's ma rtyrdom was written on behalf of the church at Smyrna to the church of Philomelium in the Roman province of P hrygia. G iving an a ccount of P olycarp's death at the hands of the Romans, however, was not the letter's s ole p urpose. R ather, the m issive's p rimary object was to s et the whole subject of C hristian martyrdom in a proper doctrinal perspective.

If faced with martyrdom, a good Christian will die bravely, steadfast in one's loyalty to t he faith. The Christian martyr will not renounce the faith nor save himself by offering sacrifices to the deities of the Roman pantheon. The devout Christian will not, however, voluntarily seek to become a martyr.

To illustrate t hat point, Marcion recounts the story of a c ertain Q uintus, w ho v olunteered to become a martyr and counseled others to do likewise. Faced by the beasts in the a rena, ho wever, Quintus lost his nerve and recanted.

In the case of Polycarp, Marcion emphasizes the similarities between the passion of Christ and Polycarp's demise, saying that it was the martyr's special destiny to b e a partner with Christ. Like Jesus, P olycarp a nticipated t hat he w ould b e arrested and condemned and had warned his followers to expect it. The 86-year-old Polycarp did not, ho wever, vol untarily sub mit. L ike C hrist, persons close to him betrayed him—in Polycarp's case, members of h is own household who were compelled by torture to reveal the bishop's whereabouts. P olycarp wa ited until t he a uthorities apprehended him.

In other parallels with details of Christ's own martyrdom, Ma rcion r eports t hat t he c hief o f police who arrested him was called Herod, and a donkey carried Polycarp into the city. Repeatedly refusing to re cant and to acknowledge Caesar as his l ord, P olycarp r emained courageous i n t he face of threats about wild be asts and burning at the stake. His persecutors chose the latter option, and a great pyre was prepared. His executioners were about to nail him to the stake, but Polycarp assured them that he would be able to s tand on his own among the flames.

When the fire was lit, a miracle occurred. Instead of consuming him, the flames took the shape of a "vaulted ro om" a round the martyr's body, and he stood in the center, not burning. Instead, "like baking b read" or like gold refined, he d id not exude the stench of burning flesh b ut the s weet aroma of incense or other "precious perfume."

Despairing of d ispatching h im with fire, the authorities ord ered a n e xecutioner t o stab h im. When h e o beyed, a d ove flew f orth fr om th e wound. Moreover, Polycarp bled so profusely that the blood extinguished the fire.

Once Polycarp was dead, the Romans refused to hand his body over to the Christians, but rather burned it so that only bones remained. The Christians collected t hese r elics and p reserved t hem. Marcion reports that Polycarp was the 12th martyr f rom S myrna to d ie d uring t hat par tic uhr persecution. Marcion (or a later reviser) gives the date and time of Polycarp's martyrdom as "a great Sabbath," February 23, at 2:00 p.m. The year is not known.

422 Medea

Medea Euripides (431 B.C.E.)

Eur ipides' t ragic ma sterpiece d raws i ts sub ject from the ancient story of Jason and the Argonauts. At the behest of his uncle, Pelias, Jason and a crew of Greek heroes and demigods set off in the Argo, the first G reek sh ip, to s teal t he G olden Fle ece revered a nd s afeguarded in t he d istant l and o f Colchis—a l and r uled b y a k ing na med A eëtes. Pelias expected Jason to be killed on the voyage.

In the event, however, Ae ëtes' daughter, a s orceress n amed M edea, fell in love with Jason. He accomplished his mission with her a ssistance, but this involved betraying her father and murdering her b rother. W hen J ason, w ho w as t he r ightful ruler of Iolcos, su rprised h is u ncle b y r eturning, Medea he lped him overthrow P elias, w ho had usurped the throne in his nephew's absence. Pelias's supporters, however, prevailed against Jason, and together with Medea and their two little boys, he fled to Corinth. There Jason's wandering eye and his desire to secure both his own safety and that of Medea and their sons led him to contract a marriage with King Creon's daughter. Medea, however, failed to understand the benefit of this politically motivated union. She was exclusively motivated by her love for Jason, for whom she had become both a traitoress and a murderess. His infidelity transformed her fe elings i nto ha tred a nd a de sire f or revenge.

It is at this point in the story that Euripides' tr agedy begins. Medea's nurse appears on stage alone, bemoaning the situation in which Medea finds he rself. A n at tendant l eads M edea's b oys onto the stage. The attendant shares gossip with the nurse: Creon means to d rive Medea and her children f rom Corinth. The n urse adv ises t he attendant to k eep the children a way from their mother in "her evil hour." She says she ha s seen Medea eyeing the children "savagely."

The audience then meets Medea, chanting and cursing a ll t he f amily: J ason, t he c hildren, a nd herself. Medea prays t hat Z eus a nd t he T itaness Themis, probably in her c haracter as the mother of the Fates, will achieve the destruction of Jason and his bride. Next Me dea a ddresses t he m embers of t he ch or us in their role as citizens and airs her grievances b efore them. They sy mpathize with h er. Then Creon enters and banishes Medea, her children, and her "sullen looks and angry thoughts" from Corinth.

Medea ple ads t hat Cr eon ha s m isjudged her and that, though she i ndeed hates her h usband, she bears Creon and his daughter no ill will. She begs to be allowed to remain. Unconvinced of her sincerity, Cr eon refuses to y ield and bids her to be gone. She begs for a single day to p repare for her exile. Creon grants her request but threatens her death if the next sunrise finds her in the city. Dark foreshadowings of death and destruction lie buried in this exchange, for the reprieve has given Medea sufficient time to accomplish her ends, and she gloats about her triumph over Creon.

Jason enters and criticizes Medea for bringing about her own banishment through her threatening demeanor. He s ays he means to p rovide for her and her sons. She reminds him of everything she has s acrificed for h im, and b erates h im for deserting h er. H e r esponds with a s peech t hat condemns w omen for v aluing t heir ma rriages above all else and regrets that women are necessary to childbearing.

The chorus judges that he has spoken unwisely and h as b etrayed h is w ife. M edea's a rgument that, had he r eally been concerned about her, he would have sought her approval for his new match before making it, undermines any lingering credibility his sophistry might enjoy. He next tries to buy her off, but she refuses to accept his support.

Aegeus, the k ing of A thens, n ext en ters a nd greets M edea. S he t ells h im her si tuation a nd begs to be allowed to come in exile to his city. He agrees to receive her there provided she c an get there without his help. He does not wish to incur the enmity of the Thebans. She binds him with an oath by the earth, by Zeus, and by all the race of the gods that he will not give her u p nor throw her out if she can reach Athens safely.

Having thus guaranteed her own preservation with Aegeus's binding oath, she lays her plans for vengeance: S he w ill s end Ja son's new br ide a poisoned robe and headdress that, when she dons them, will kill her and anyone who to uches her. She will next murder her own children, and then escape. "Let no one," she says, "think me a poor, weak woman."

Medea sets h er s cheme i n m otion. F irst she summons J ason a nd ap ologizes f or her e arlier words, saying that she has seen the wisdom in his actions. She tel ls her c hildren to b id their father farewell. A s J ason tel ls h is s ons he ho pes to s ee them g rown u p and h appy, M edea b reaks i nto tears. W hen J ason a sks w hy, ho wever, she d issembles. She a sks h im to ple ad with Cr eon t hat the children may remain though she m ust leave. Jason agrees to ask.

Medea t hen g ives t he c hildren t he p oisoned giÃs to present to the new bride, and waits while they enter the palace with their father. An attendant brings back the children with the news that their exile has been remitted.

Medea w avers i n her r esolve to m urder her own children, but her a nger overcomes her compassion, and she sends the children into the house before h er. They r eturn, a nd she em braces a nd kisses them. This scene is one of the g reat portrayals of inner conflict in all the history of theater. She en ters the house with them again, and, a Åer a brief choral interlude, she returns alone.

A messenger runs on stage instructing her to flee. She asks why. Both the bride and Creon her father ha ve s uccumbed to t he p oisoned ga rments. The m essenger g raphically de tails t he scene of their horrible deaths, observing the convention t hat d eaths i n Greek t ragedy do n ot occur on stage.

Once more Medea enters the house. The voices of the children are heard from within as they try to escape their mother's murderous blows. Jason belatedly a rrives, h oping to save the children from their distraught mother. As he e nters the house, M edea with the c orpses of the c hildren appears a bove the house in a c hariot d rawn through the sky by dragons.

Jason and Medea end the play with a leng thy exchange of recriminations—each blaming the other for the appalling outcome. He tries to curse her, but she says that no god will listen to a breaker of oaths. Finally the dragon chariot flies away, leaving Jason wishing he had never sired the children. The chorus ends the tragedy with an observation on the god's power to d ispense variety of unanticipated fates.

Anyone who ever saw the great 20th-century Australian tragic actress Dame Judith Anderson depict Medea will have a visceral understanding of A rist ot le's c oncept of catharsis—an a udience's emotional cleansing as the result of viewing tragedy that s omehow le ads to t he viewers' moral edification.

Medea Seneca (before 53 C.E.)

In his version of *Medea*, Se neca follows quite closely Euripides' earlier Greek form of the play. Differences, ho wever, do em erge. F or e xample, Euripides g enerally en lists t he a udience's s ympathies on the side of Medea against an opportunistic and unfeeling Jason. Seneca instead makes modifications that shiĀ those sympathies in the direction of Jason.

In both plays, Medea has betrayed her f ather and murdered her brother to hel p J ason obtain the Golden Fleece that was the object of his voyage with the Argonauts (see *The Argonaut ika*). In both plays, she has married J ason and is the mother of his children, and in b oth J ason c asts her off to marry Creusa, the daughter of Creon, the ruler of Corinth. In both versions, too, Jason excuses h is action by explaining to M edea that he takes it to i nsure her w elfare and that of the children.

keeps them in Corinth, where Jason can at least exercise some fatherly responsibilities.

Seneca l ays h eavier e mphasis t han E uripides on Me dea's m astery o f witchcra \overline{A} —a sh i \overline{A} that tends to dehumanize the play's title character. In handling the choral commentaries on the events taking place, Euripides has the citizens of Corinth sympathize with Medea. S eneca has t hem favor Jason. O ne of t he E nglish t ranslators o f t he Senecan v ersion, Frank J ustus M iller, s uggests that S eneca's i nterest f ocuses l ess o n " human suffering" and more on the title character as representative of "criminal psychology."

In both plays, Medea's ve ngeance i s ter rible. Not only does she murder her own children, she also i nflicts p ainful d eaths by me ans of a p oisoned g arment u pon her r ival, Cr eusa, a nd o n Creusa's father, Cr eon. S eneca a lso s tresses t hat Medea does not believe the loss of her husband's new intended bride will be adequate punishment for the suffering Jason has caused Medea. Jason's love has been the center of her b eing. Given that his feelings for Medea have proved to be so slight, only the d eaths of h is children can compensate the pain that his infidelity has caused her.

As is the case with Seneca's other tragedies, we do not know whether or not they were ever publicly performed, or indeed if they were intended to be. They may instead have been meant only for private reading alone or in small groups.

Meditations Marcus Aurelius (ca. 177– 189 c.e.)

While t he Ro man emperor M arcus A urelius was leading his forces against Germanic tribes in the vicinity of the Danube River during the last 12 ye ars of his life, he s eized t he opportunities afforded by bre aks in hostilities to compose a work he intended to be a private reflection on his life. He wrote it in the Greek language and entitled it merely "To himself." He died in camp on the r eturn j ourney from t hose wars, and s ome member of his party had the good sense to p reserve t he em peror's ma nuscript. I t w as subs equently p ublished, b ecoming a n i nstant c lassic and remaining so through the ages.

The work reveals that, although Marcus Aurelius's private views, moderate behavior, and unwavering virtue were grounded in the Stoic tradition, he did not always hew to the rational empiricism that c haracterized th e th inking o f S toicism's mainstream thinkers. At Athens, Marcus Aurelius had b een ad mitted to the Eleusinian mysteries associated with the worship of the new god, Dionysus, and of the goddesses Demeter and K ore. Suggestions do appear in the *Meditations* that he believed in a personal god. Though the emperor was clearly not a Christian, Christians through the centuries have nevertheless found his work congenial and even inspirational.

Marcus Aurelius begins his *Meditations* with a cata bgue of his relatives and teachers and what he learned from each of them. From his grandfather, Verus, he learned good morals and how to control his temper. From the reputation of h is de ceased father a nd memories of h im, M arcus le arned "modesty a nd m anly character." From h is great-grandfather, he learned to value private education at home. He also learned from his private teacher to avoid such enthusiasms of the crowd as being a fan of a pa rticular te am of c hariot r acers. H e learned to do physical labor, to mind his own business, and not to listen to slander.

From h is t eacher D iognetus, Ma rcus learned to disbelieve reports of m iracles, e xorcisms, and the like, and to a void passionate attachments to games, contests, and gambling. He also learned to prefer simple living to luxury.

Marcus Aurelius devotes his kengthiest description to the things he learned from his true uncle and a doptive father, the Roman emperor Titus. Titus w as mo dest, c onsidering h imself si mply another citizen; he repressed lascivious appetites, was a ffable and c ourteous, and un derstood h is own limitations of intellect and learning. Despite the pressures of his position, he to ok the time to study issues before making decisions.

A s ection o f si milar leng th de tails Ma rcus Aurelius's indebtedness to the gods. He is grateful that circumstances never led him to offend them, that he deferred sexual activity until the time was proper, and that both his father and his uncle were models of modesty whom he could emulate. He is grateful that his mother, who died young, ne vertheless s pent her l ast y ears i n h is company. He is grateful for the character a nd behavior of his wife and happy that he has been fortunate in finding good schoolmasters for his children. Finally, he is glad that he avoided the pitfalls of the sorts of education most Romans had: studying at the hands of Sophists, reading history, constructing s yllogisms, a nd l earning astrology.

In Book 2, Marcus Aurelius gives himself 17 good pieces of a dvice for the conduct of what is le \overline{A} of h is life. He knows that every day he w ill face a ser ies of people w hom he wou ld r ather avoid: the busybodies, the arrogant, the ungrateful, the deceitful, and so forth. He advises himself to bear with them patiently since they can do him no harm and observes a point he frequently repeats: People are made for cooperation.

Marcus r eminds h imself t hat he i s ol d a nd need not let his time be wasted. W hat the gods send him is providential, and what chance sends is part of nature. He reminds himself to be grateful to the gods for what they have afforded him. The gods have afforded him a single opportunity his life—for cogent action. He must make the best use of it. Several of his personal maxims remind him of the brevity of life and, especially, the life remaining to him. He also considers the brevity, regarded from the point of view of eternity, of all things. He recalls that he is a part of nature and that, as such, he must consider the relation of the part to the whole.

Marcus concludes t hat offenses c ommitted from desire are worse than those committed from

anger. Each individual must seek the "daemon" the divine spark or spirit within each person and strive, as Socr at es did, to live according to its promptings. He considers that allowing o neself to feel vexed at anything that happens is a n aberration of nature. Every act of the soul, he says, must be directed to some worthy end. Otherwise a person wastes the power of reason. He also concludes that nothing natural is evil.

Marcus A urelius's t hird b ook o f m editations begins from that conclusion. He lists a number of such u npleasant t hings as overripe figs, a nimal saliva, a nd ill-favored ol d p eople. H e c oncludes that all should be considered n atural and therefore comely. A person's conversation should reveal a si mple a nd b enevolent c haracter. E veryone should remember that every "rational animal" every human being—is one's kinsman. All should therefore labor in the common interest.

Marcus i s c onvinced t hat t he dei ty i nfused into each person will reveal that "justice, tr uth, temperance, f ortitude, [and] r ight r eason" a re life's highest values. Nothing, he insists, is profitable i f it i nvolves breaking a promise. D oing so will c ost o ne one's œlf-rœpect. H owever lo ng posterity recalls a person, on the scale of eternity, that time is brief. Self-respect is the only important aspect of one's reputation.

Happiness results from performing the task at hand c onscientiously, f ollowing r ight r eason "seriously, d iligently, c almly," and wi thout d istraction, and ke eping o ne's " divine pa rt" p ure. Live, he advises, according to a fixed set of principles, for t hey have their or igin in intelligence, not in appetite.

Book 4 calls for purposeful action. It a dvises that one's own mind rather than, say, a s eashore villa, should be one's retreat. In that retreat, one should regard oneself as a n individual, a h uman being, a citizen, and a mortal. On e should a lso recall that "the universe is transformation, [and] life i s o pinion." O ver a nd o ver a gain, Ma rcus Aurelius reverts to the advice to follow reason and to live in tranquility whatever happens.

A particularly revealing bit of wisdom to those interested i n Ma rcus A urelius's cosm ological

426 Meditations

views occurs here. He counsels regarding the universe as "one living being" with a single substance and a single soul. As for the self, the emperor recommends: "Observe how worthless human things are." Today's mummy or urn of ashes was yesterday's speck of semen. Regard life as valueless.

The fiĀh book offers comfort to people of ordinary c apacities. A ll o f u s c an d isplay si ncerity, gravity, and endurance. We can be content in our circumstances, lead simple lives, and be benevolent and frank.

Marcus Aurelius suggests that the only appropriate pr ayer is a p rayer f or r ain. It sho uld b e addressed to Z eus, by whom the emperor means the universe itself. From remark aĀer remark, it is clear t hat the emperor c onsiders s eeking o ne's own pleasure both a snare and a delusion. He also enunciates a p rinciple t hat all politicians everywhere sh ould t ake t o h eart: "T o s eek what is impossible is madness."

Reverence is the proper attitude both toward the universe and toward what is best in oneself. As a ruler, Marcus Aurelius's guiding precept is this: What does the state no harm does not harm the citizen. If the state is harmed, repress anger and show the perpetrator h is er ror. This a dvice appears a gain in B ook 6 i n a nother form: "The best way of a venging y ourself is n ot to beco me like the wrongdoer." This precept appears a very hard one for polities to learn.

In Bo ok 6, too, app ears Ma rcus A urelius's affirmation of faith. He considers t hat t he u niverse must be one of two things. Either it is a disparate a nd i nvoluted confusion—in w hich c ase he would not choose to remain in it—or it is, as he believes, u nified, o rderly, a nd p rovident. That being t he c ase, Ma rcus A urelius c ommittedly worships a nd t rusts t he u niverse with its p rocesses of bringing into and ushering out of existence. The universe that both creates and destroys is God (and the gods). People should be content with its processes as they find them.

Book 7 list 75 principles for a nd examples of governing one's thoughts, d efining c ertain p recepts, a nd co nducting o ne's l ife. F or i nstance, Marcus A urelius defines t he p erfection of m oral character as living as if every day were one's last, remaining ca lmly in terested in t hings, and n ot being hypocritical. In an interesting development of t he id ea of P rovidence developed i n B ook 6, Marcus Aurelius points out that current affairs are the consequence of u nbreakable c hains of c ause and effect as the means by which the universe carries out that which it originally provided for.

For 23 years during the reign of his uncle Titus, while Marcus Aurelius was essentially in training to be emperor, Marcus studied philosophy at the same time that he occupied a series of important civic and imperial offices. He opens Book 7 with the reflection that the chains of cause and effect that he mentioned in Book 6 as the means by which Pr ovidence o perates sh ould c onsole h im for h is loss of the opportunity ever to b ecome a phi los o phe. He advises himself to a ccept t hat consolation and get on with the rest of his life. At the same time, he suggests that for every action a person contemplates taking, that person should consider whether or not taking the action would produce regrets. It is a person's duty, he reminds us, to live life well in every single act.

About w ealth a nd p rosperity, t he em peror says, receive it without arrogance, and do not be afraid to let it go. He repeats in Book 8 his oĀenrepeated opinion that striving a Āer posthumous fame is folly. M any a poet, both before him and since, has s o s triven. A s M arcus Aurelius e nds Book 8, he offers, not for the first time, a sage bit of advice: "Men exist for the sake of one another. Teach them . . . or bear with them."

Book 9 opens with a syllogistic argument proving t hat p eople a re g uilty of impiety if t hey li e knowingly or if they pursue plea sure as a good and avoid pain as an evil. At several points throughout the work and again here, Marcus A urelius develops the t heory of t he r uling faculty. Each p erson has o ne a nd it b ehooves e ach p erson to i dentify and develop it in socially beneficial ways. Here too, the e mperor em phasizes o nce more t he h uman responsibility for trying to reform rather than punish the aberrant behavior of fellow human beings. Marcus Aurelius addresses Book 10 to his soul. It r eviews mu ch that h as g one b efore, a dvising people to persist in behavior that is at once rational, t rue, g ood, m odest, e quable, a nd magnanimous. Though he himself has always had to b e a man b oth of action and contemplation, he finds the c ontemplative w ay the m ore m orally p rofitable of t he t wo. Y et t he r ational p erson w ill b e contemplative and active simultaneously and also will be reconciled to the inevitable operations of the natural world. We are all impelled by certain necessities. It is best to rest easy with them.

Book 11 contrasts the rational person's readiness to die with the Christian's desire for martyrdom. That desire, thinks the emperor, is mere obstinacy exercised against civic authority. Here too, Marcus Aurelius traces in brief the history of Greek theater with a view to revealing that, although much good was said and although the theater did please and, less o Āen, instruct, the theater d oes n ot ke ep i n mind t he p urposes for which h uman b eings e xist a s p hilosophy does. No art, he reminds the reader, is superior to nature. Every person will find in his or her own soul the resources necessary to live in the best way. He ends the book with another list of sayings useful to recall in the project of living a good life.

Book 12 presents a grand summary of all that has g one b efore, o nce m ore em phasizing t he emperor's advice to himself on the conduct of a good, e ven e xemplary, life. M arcus A urelius also raises a question that has concerned innumerable p ersons in a ll ti mes a nd pl aces. H e wonders how it can be that the gods have apparently a rranged ma tters s o ben evolently f or human beings and yet have made no provision for the best people to l ive again. He concludes that whichever way that may be, it is right that it is that way. The grammar of his sentences, however, couched in clauses de scribing conditions contrary to fact, suggests that reincarnation or the survival of any egocentric essence is not something that the emperor feels to be terribly likely. Following the emperor's advice and having no fear of the cessation of life seems to him by far the best road to follow.

Many consider t hat Ma rcus A urelius was t he best emperor Rome ever had. His modest and principled exercise of executive power could well serve as the standard against which to measure the success of decision makers in politics and business.

Meleager of Gadara (Meleagros) (fl. 100

B.C.E.) Greek-Syrian poet

Syrian by birth, Meleager was born in the city of Gadara. Later he lived both in Tyre and in Cos. He was a p hilosopher, a s atirist, a p oet, a nd a master of Greek and Phoenician as well as of his native Syrian.

Literature principally remembers Meleager for a work that inspired many imitators well into the modern e ra. H e collected ep igr a ms written b y pre de cs for poets of the previous two centuries. To e ach of the poets represented, Meleager gave the name of a different flower—hence the title of the collection: the *Garland*, or in Greek, *Anthologia* (*Anthology*). The subjects of the epigrams, and of Meleager's own poems a s well, included love, wine, death, and, sometimes, satirical characterization. For an example of the latter, one of Meleager's poems f eatures a love t riangle. On e of its members is a Jew. He becomes an object of satire because h is love do es n ot c ool down so he can properly observe the Sabbath.

Meleager a rtfully a rranges t he p oems i n h is anthology, linking them by theme into an attractive

verse b ouquet. H is i nnovation in p resenting a poetic collection in this fashion was widely imitated during the Euro pe an Renaissance and continues in vogue today, not only for verse but for many sorts of collections.

Meleager's own poetic works were largely autobiographical and principally included both heteroand homosexual love poems. These were marked by a giĀ for apt, colorful imagery, and innovative expression. He also penned now lost sat ir es i n the manner of Cynic phi los opher, Menippus.

Menander (ca. 342–292 B.C.E.) *Greek dramatist*

Famed and emulated as a comic playwright following his death, Menander's reputation did not fare a s well during h is lifetime. The m ost c elebrated w riter of t he Greek N ew C omedy (see comedy in Greece and Rome), he is thought to have composed a round 1 00 pl ays. Only o ne o f Menander's ve rse d ramas, Dyskolos (The B ad Tempered M an), survives in its entirety, having been discovered in Geneva in 1957. Beyond this, substantial sections of four plays were discovered at O xyr hynchus in a 1 328-line, f ragmentary Egyptian papyrus early in the 20th century. These fragments include portions of The woman fr om Samos and The A r bitr at ion—the most complete of the fragments; The Girl with Her Hair Cut Short; and The Hero.

A much greater selection of Menander's work survived, of course, in antiquity, and subsequent

playwrights ad mired and imitated his plays. The Roman essayist and rhetorician Quint il ia n considered Menander the most important playwright among th e Gr eek n ew c omedians a nd a lso admired his mastery of rhetoric. The Roman playwrights P l aut us a nd T er ence pa id h im t he highest of compliments by imitating and borrowing hi s w ork. Re naissance pl aywrights i n t urn borrowed t he R omans' w ork, s o t hat, a t o ne remove, the work of Menander remained influential in the early modern world.

Owing to later commentary and to the recycling of Menander's material by later writers, we know quite a lot about the sorts of plays he wrote. The literary historian T. B. L. Webster, who has reconstructed s everal of the p lays i n o utline, divides M enander's subjects i nto three s orts of plays: "plays of re conciliation," " plays of s ocial criticism," a nd " plays of adv enture a nd s atire." Menander's mo st re cent e ditor, W . G eoffrey Arnott, offers reconstructions of h is plays, b oth complete and fragmentary, filling three volumes.

Some of t he plot s Me nander pop ular ized remain t he s tandard f are of p opular e ntertainment to this day. Stock cha racters a lso po pulate M enander's plays: cross and interfering parents; tricky, grasping s ervants; go-betweens; a nd p rostitutes w ith hearts o f g old. Y et w hile t hey c onform to suc h types, M enander's c haracters n onetheless s eem more individualized than their descendants, the stock characters of the Roman and Re naissance stages. Mencius (Meng K'o, Meng-tzu) (ca. 371– ca. 289 B.C.E.)

Mencius was a native of the Chinese state of Tsau (now Shantung) and connected with a noble family of C onfucius's neighboring home state, Lu. As it has done with the name of Confucius, the West has considered Mencius important enough to L atinize h is C hinese na me, w hich si mply means "Master Meng."

Apparently Me ncius's f ather d ied when h is son was very young, and Mencius's mother was at pains to support him and secure him an education commensurate with h is evident capacities. Two or three stories purport to recount incidents from Mencius's childhood, but all have the ring of ap ocrypha about them. The tradition that he studied with Confucian scholars at a r emove of about 115-120 years a Āer the master's death, on the other hand, seems a ltogether p robable, and Mencius h imself reports t hat he studied with scholars i n t he l ine of C onfucius's d isciples. I t seems likely that Mencius became a professor of moral philosophy. At about the age of 45, Mencius bec ame a n o fficial of the state of Qi. But when i ts s overeign, P rince H suan, re fused t o implement M encius's p olicies, he r esigned h is post.

Then t here f ollowed a p eriod o f w andering from state to state in search of rulers willing to put h is h umanistic C onfucian i deals i nto p ractice. The time, however, was not ripe for the exercise of the gentler virtues, for military strife was everywhere. Eventually, around 319, he returned to Qi and resumed his former post. In 311 b.c.e., he retired. Though Mencius then disappears from the b iographical record, the l iterary historian Herbert A. Giles credibly speculates that the sage spent the rest of h is life teaching and, with the assistance of hi s s tudents, b eginning t he w ork that they completed—the one by which h istory remembers him, *The Mencius*—an elaboration of Confucian humanistic idealism.

Mencius did not acquire his stature as the last of the ancient sages until the rise of neo-Confucianism some centuries a Åer h is de ath. Mencius was d istinguished among Confucian philosophers by h is firm belief in the innate goodness of human beings and in a human instinct to do the right thing.

Merchant, The (The Entrepreneur,

Mercator) Plautus (second-third century B.C.E.)

In the prologue to the play, a young A thenian named Charinus shares with the audience that Plautus based his play on a Greek original, the now-lost *Emporous* by Philemon. That citation made, Charinus goes on to indicate that, to please his father, Charinus le \overline{A} his lecherous ways a t Athens and went off on a successful trading voyage to Rhodes. There, with money in his pocket and time on his hands, he went to a party, met and slept with a girl, and brought her home with him to Athens, where he has just arrived. Not yet

430 Merchant, The

ready for his father to know the truth, he has leĀ the girl aboard ship with his slave A canthio. As the prologue ends, Charinus sees A canthio running toward him from the harbor. A Āer much slapstick joking, Charinus reports that his father, Demipho, has boarded the ship and seen the girl. A canthio had reported that Charinus bought the girl to be his mother's maid, and, besotted with the girl's beauty, Demipho started making passes at her.

The second act begins with Demipho's soliloquy. He first reports a strange dream of goats and monkeys—symbols of lust—from the n ight before. Then he confesses that he has fallen head over heels in love with the girl his son has brought home.

In the next scene, Demipho reports his condition to his neighbor, Lysimachus. Then Demipho turns his attention to finding a way to c onvince his son to sell the girl to him. Demipho sees Charinus c oming and h ides. C harinus so liloquizes for the audience as he r acks h is brain for a w ay out of his dilemma.

As matters develop, father and son end up bidding against each other for the girl, whom they agree would not work out well as a maid for Charinus's mother. In the event, the father exercises parental authority to trump both Charinus's bids and his arguments, and plans to have his friend Lysimachus, buy the girl on his behalf.

Now C harinus's friend, E utychus the son of Lysimachus, shows up. He reminds Charinus that he already knows about the girl, and offers to go bid against Demipho for her. He promises to offer a h undred p ounds m ore t han Dem ipho's to p figure.

As act 3 opens, however, we discover that Lysimachus has already purchased the girl, Pasicompsa, f or Dem ipho a nd i s le ading her ho me. H e explains that he has bought her for her own master, a nd she a ssumes he m eans C harinus. She confesses t hat they have already been together for two years. Lysimachus thinks she is speaking of Demipho. Leaving the girl at h is house, Lysimachus encounters Demipho and convinces him he had b etter sp ruce u p before g oing to s ee t he girl. Lysimachus also tells Demipho that he must get the girl out of his house before Lysimachus's wife comes home from the country.

In t he f ourth s cene, E utychus c onfesses t o Charinus that the girl was auctioned off before he even got to the harbor. In desperation, Charinus decides to run away. Eutychus undertakes to find the girl.

Predictably, in act 4, Lysimachus's wife Dorippa and her s lave Syra return from the country a day e arly a nd d iscover t he g irl i n t he house. Dorippa jumps to t he ob vious c onclusion. Lysimachus cannot tell her the truth, and the spouses end the third scene in total misunderstanding. To add to the confusion, a cook whom Charinus and Lysimachus have hired to prepare a banquet now arrives with his entourage. Lysimachus tries to get rid of him, but the cook thinks that Dorippa is the new mistress. He quotes Lysimachus as having s aid t hat hi s w ife i s a s "mean a s a sna ke." Dorippa sends Syra to tell her father what a lecher Lysimachus has become. The father is not at home, a nd S yra en counters Eu tychus i nstead. She explains that his father has brought home a girlfriend.

As act 5 opens, Charinus is bidding a melodramatic farewell to Athens when Eutychus finds him and explains that all will be well. Much addled misunderstanding by an apparently frenzied Charinus f ollows, b ut finally h e settles d own a nd accompanies Eu tychus. I n a b rief t hird s cene between the fathers, Demipho promises to make peace between Lysimachus and Dorippa, who has already understood the imbroglio. In the fourth, Lysimachus discovers that his wife is pacified, and Eutychus lectures Demipho for pursuing his son's girlfriend. That relationship is news to Demipho. Lysimachus further i nstructs Demipho about the inappropriateness of youthful passion in "autumnal m en." Dem ipho g ives Pa sicompsa to h is s on and swears off lechery. Eu tychus speaks an e pilogue in which he p roposes that men past 60 be exposed to public ridicule if they resume wenching, and the play ends.

Plautus's amusing comedy provides an example of the playwright's fascination with doubling:

two young men, two old men, two wives, and two slaves, all nincompoops and all caught in a maelstrom o fla ughable i mprobabilities w hirling around one young woman.

Mesoamerican writing, ancient

Just h ow long t rue w riting e xisted a mong t he ancient c ultures o f M esoamerica is unclear. Nonetheless, what researchers have be en able to decipher about the Mesoamericans' astronomical observations s uggest t hat s ome for m of re cords keeping was practiced for millennia.

The oldest examples of true writing have been discovered on s tones, p ottery, a nd ba rk ma nuscripts in Oaxaca, on the Mexican gulf coast, and the Pacific Piedmont and highlands of Guatemala. These examples h ave been reliably dated to between 500 b.c.e. and 150 c.e. Though none of these an cient M esoamerican s cripts ha s b een completely de ciphered, t he p ortions that h ave been suggest that the written symbols sometimes stood f or en tire w ords (logographs) and s ometimes for syllables (syllabic script).

Insofar as the scripts have been read, it appears that, at a historic period contemporaneous with the flourishing of ancient G reek, R oman, an d Chinese literary culture, the peoples of M esoamerica had parallel manuscript cultures of their own. Metamorphoses Ovid (ca. 8 c.E.)

Finished a Åer t he em peror A ugust us C a esar had exiled Ovid from Rome to the city of Tomi on the Black Sea, the poet's Metamorphoses compose a work universally acknowledged to be h is masterpiece. B oth t he poem 's m eter, d actylic hexameter (see q uant it at ive ve r se), a nd i ts length, 15 books, suggest that he cast the work in the e pic mode-albeit t he ep ic r edefined, for Metamorphoses gave birth to an epic poem of a new sort. It takes a cue from Ovid's Greek predecessors oft he Hellen ist ic A ge b y b ringing together a collection of supernatural transformations of shape. Looking even further back to such models as Hesiod's Theogony, Ovid takes universal history and the changes that the gods have both wrought and undergone as his announced subject, a nd he e stablishes i n h is r eaders t he expectation that the poem will proceed chronologically from the Creation until the poet's own time. That expectation, ho wever, t he p oet s oon and delightfully disappoints by, without altogether deserting chronology, changing the organizational principle into one arising from thematic correspondence and emotional effect. The poem achieves t his b y t aking i ts r eaders t hrough a compendium of the central myths of Greece and Rome.

Prologue

Moved to sing of bodies transformed into new and wondrous forms, instead of the traditional invocation of the Muses, Ovid instead invokes the immortal g ods and s hiĀs i nto a v ision of p rimordial chaos—a su nless, formless, seet hing m ass. Then, says O vid, i n t he p rimal m etamorphosis, ei ther God or nature imposed order on the world, making it into a habitable and pleasant environment for creatures. That done, the stars spangled the heavens, and sentient life of all sorts was created. Then,

wondering whether human beings were created by the Unknown God from divine seed or whether, as Greek myth had it, Prometheus shaped them from the soil of the newly created world, O vid reports: "Shapeless clay put on the form of man."

Next O vid d escribes t he four a ges of h uman habitation of t he e arth. F irst c ame t he G olden Age, wh en justice r uled a nd w eaponry a nd w ar were u nknown, a nd w hen the e arth p roduced sustenance f or a ll w ithout t he i ntercession o f human labor—when s pring blo omed e ternally, when r ivers flowed w ith n ectar, a nd oa k t rees brought fo rth h oney. S aturn, th e e ldest of th e gods, ruled that age.

But h is suc cessor, J ove, ba nished h im a nd brought into being the Silver Age—one not quite so be nign as the Golden Age. Spring became a brief s eason, a nd f arming a nd h usbandry w ith their a ccompanying need for h uman l abor were introduced.

The Bronze Age followed. It saw the introduction of weaponry and warfare, but not of impious crimes. That development, says Ovid, was reserved for the Age of I ron, which also saw the development of pr ivate prop erty, the m ining of me tals, impious war, rapacity, disrespect of the expectation of hospitality for strangers, and brother quarreling with brother. Filial piety, too, fell victim to the greed of children, and the goddess Astrea—the goddess of justice—"vanished f rom the bloodstained ea rth." The Age of I ron a s the a ncients envisioned it continues into our times.

Giants inhabited the earth in the early days of the Age of Iron, and in their pride and ferocity, they made war on the Olympian gods, piling up mountains to gain access to the gods' dwelling place. Jove, h owever, ove rcame t he g iants with thunderbolts, destroying them. From their reeking blo od t he e arth b rought forth h uman beings.

One of t hese, Lycaeus, to test t he d ivinity of Jove, offers him human flesh to eat—a myth that Ovid first expects his reader to k now but that he nonetheless re peats a l ittle l ater. I ncensed, J ove convenes a council of the gods, who unanimously call for revenge. Now s uddenly, O vid's c omparisons b ecome anachronological. He compares the gods' call for vengeance a gainst L ycaeus to t he p enalties t hat Ovid's contemporary, the Roman emperor Augustus, e xacted for t he a ssassination o f h is u ncle, Jul ius Ca esa r. Jove reports that he has anticipated the gods' sentence, de stroyed t he dwelling o f Lycaeus, and turned the man himself into a wolf.

Ovid next reports how Jove, incensed with the impiety of human beings, determined to de stroy the world by flood. Amid the consequent universal c arnage, h owever, Jove s pots i n t he n ick of time a single man and a si ngle woman, p raying and worshipping the gods. He causes the waters to recede and gives humankind another chance.

The remaining pair, Deucalion and Pyrrha, a brother a nd si ster a s well a s h usband a nd wife, despair of repopulating the earth in the ordinary course of nature. They therefore undertake a pilgrimage to consult the female Tit an and goddess Themis. Themis tells them to throw "the bones of their g reat m other" b ehind th em a s th ey w alk along. The pair correctly interprets this to mean that they should throw rocks behind them as they walk. They do so, and the rocks Deucalion throws metamorphose into men; those thrown by Pyrrha transform into women, and so the breeding stock for the human repopulation of the world comes into being. The earth spontaneously repopulates itself with animals and insects and with a serpent so fearsome—a python—that the sun god, Phoebus Ap ollo, de stroys i t. I n c ommemoration o f that a ct, th e Py thian games-athletic c ontests and horse races-were established.

Book 1

The mention of A pollo leads O vid to a n associative transition into the next instance of metamorphosis. Shot by a vengeful Cupid's golden a rrow, the sun god, who, citing the python as an example, had b oasted of t he su perior p ower of h is a rrows over Cupid's, falls in love with a nymph, Daphne the daughter of a river god. To assure that Apollo suffers, Cupid then shoots Daphne with a leaden arrow—one that prevents her also falling in love. When A pollo encounters D aphne, he pursues her, but she flees. Just as the god is about to catch her, Daphne prays to her father for protection, and on the spot he turns her into a laurel tree. For love of he r, Ap ollo ord ains t hat he r i mmortal le aves become t he v ictor's cr own f or a thletes, m ilitary conquerors, Roman emperors, and artists in competition. S o h onored, the laurel t ree, s ays O vid, seems to nod to Apollo with answering love.

Ovid next recounts the story of Jove's love for another river god's daughter, the Naiad Io. When Io flees Jove's impassioned importunities, the god covers t he e arth with a c loud and r avishes I o. However, Juno (queen of the gods and Jove's sister and wife) surmises that such a cloud on an otherwise s unny day m eans t hat her h usband i s philandering-as he oĀen does-and tries to catch him in the act. But Jove is equipped with almost perfect foreknowledge, and he c hanges I o into a snowy-white heifer. Juno expresses suspicions and asks about the heifer. Jove claims it was spontaneously generated from the earth, and Juno asks to have it as a giĀ. Jove agrees. Juno gives the heifer to t he g od A rgos, w ho ha s a h undred e yes, to guard.

Io makes her identity known to her father, the river Inachus, by tracing her name on his banks with a hoof. Inachus understands and grieves at the disappointment of his hopes for Io's marriage and her children. Sympathetic to Io's plight, Jove sends Mercury to slay or deceive Argos.

Mercury e nchants Argos b y playing on reed pipes—a ne w a rt. E mbedding a m etamorphosis in the midst of another, Ovid has Mercury begin to r ecount t he s tory of a nother N aiad, S yrinx, whom Pan had attempted to ravish. Made drowsy by the music and Mercury's verse, all of A rgos's 100 e yes f all a sleep at o nce, a nd Mercury seizes the opportunity to slay him by lopping off his head. For t he b enefit of h is r eader, O vid finishes t he story t hat Mercury i nterrupted, explaining h ow Syrinx w as s aved f rom P an's e mbraces b y being changed into the very reeds from which panpipes are fashioned.

Juno t ransplants t he m urdered A rgos's e yes into the tails of the peacocks that draw her chari-

ot as jeweled decorations. Then, venting her rage on t he v ictim, s he a fflicts Io with a f ury t hat goads her to wander the shores of the Mediterranean Sea and to cross the Bosporus Straits, which are named for her: "cow narrows." Eventually Io arrives in Egypt on the banks of the Nile, where, as well as she is able, she pleads for release from her t ransformation. A s ympathetic J ove r econciles w ith J uno, w ho r estores I o to her h uman shape. Because unions between gods and human beings a re a lways fruitful, h owever, I o bears a son, t he d emigod Epap hus, a nd t he E gyptians regard both as deities and build temples to them.

Book 2

Another c oeval d emigod, Phaeton, t he s on o f Apollo t he s un go d, a lso inhabits E gypt a t t his time. I n b oasting o f his p arentage, P haeton attracts t he s corn of Epaphus, who needles Phaeton by requiring him to prove his paternity. Phaeton demands that his mother offer proofs of his lineage. She s wears that Phaeton is A pollo's s on and instructs him in the way to find his father. He immediately tr avels fr om his h ome in E thiopia and through the Indies until he reaches the Land of Dawn.

There, i n d azzling l ight, P haeton s tands i n the presence of Apollo, who is attended by Day, Month, Year, Ti me, the Hours a nd the S easons. Seeing his son, Phoebus Apollo addresses him as his "child b eloved." Wh en P haeton ple ads for a token of Apollo's parentage, with a m ighty oath, Phoebus g ives h is s on f ree c hoice. The f oolish youth asked to be the sun's charioteer for a day.

Phoebus Apollo immediately regrets his rashness a nd t ries to d issuade t he m ortal P haeton from undertaking a task suited only for immortals, explaining that Apollo alone of gods or men has t he c apacity to do w hat P haeton a spires to try. Apollo also explains the dangers that he daily faces. The god tries to convince his son that what he ha s w ished for, i f g ranted, w ill pl ace h im i n mortal danger of an unimaginable sort.

Like m any foolish y ouths, h owever, Phaeton will not be dissuaded, and he i nsists on d riving

the chariot of t he su n. The horses t hat d raw i t, moreover, i nstantly k now their master is not on board. They therefore take their own course, not the o ne o ver w hich A pollor egularly g uides them.

As a r esult, d isaster v isits t he e arth. Ci ties, forests, and mountains are incinerated. The skins of E thiopians d arken w ith t he he at. R ivers b oil and run dry. The ground bursts open, letting light into Tartarus, the underworld of Greek mythology. Even the oceans dry up. E arth her self p rays for relief from the devastation.

In response to the planet's prayer, Jove hurls one thunderbolt that incinerates P haeton, who falls burning to e arth like a c omet. J ove hurls another bolt that extinguishes the fires destroying the earth.

Phaeton's c harred a nd sm oking r emains f all into the Eridanus (Po) River of northern Italy. River nymphs collect them and bury them, marking his g rave with a to mbstone explaining who he was and what he tried to do. His mother Clymene and his sisters make a pilgrimage to the site of the tomb, and there as they mourn, Phaeton's sisters are metamorphosed into poplar trees.

Phaeton's father, too, is consumed by grief and almost decides to permanently deprive the world of light. The other gods, ho wever, dissuade h im with pleas, and in the case of Jove, with threats, from that course of action. The sun god vents his rage by beating his steeds into submission.

Jove, in the meantime, undertakes to assess and repair t he d amage that th e s un's excessive h eat caused in t he h eavens a nd o n t he e arth. I n t he course of that journey, the ruler of the gods encounters t he lo vely n ymph, C allisto, a de votee o f t he chaste goddess of the hunt, Diana. Finding Callisto asleep, Jove i s onc e a gain move d t o p assion, a nd, careless of Juno's jealousy, he a ssumes the form of Diana and begins kissing Callisto. Once she realizes that her admirer is not Diana but a male, Callisto unavailingly struggles to free herself.

Having accomplished his desire, Jove flies off, and th e r eal D iana c omes. C allisto f ollows i n Diana's t rain f or n ine m onths b efore her p regnancy is d iscovered. Then a n a ngry Diana, who only allows herself the company of virgins, sends Callisto away. She has her baby, a boy she na mes Arcas.

Juno, i n t he m eantime, has b ecome a ware of the situation and, true to form, vents her rage on Jove's v ictim, c hanging C allisto i nto a b ear. A t this point, Ovid lets his readers know that Callisto is a child of Lycaon, the wolf-man.

AĀer 15 years have passed, Arcas, now a hunter, en counters his mother as a b ear in the forest. Callisto r ecognizes h er son a nd stands q uietly while h e A rcas p repares to sp ear her. I n O vid's version of the myth, however, Jove will not permit this matricide, and the god transforms both Callisto a nd A rcas i nto stars. She b ecomes the c onstellation U rsa Ma jor, a nd h e beco mes Böo tes. Stellification was the most glorious of all possible metamorphoses, for t he s tars and c onstellations were themselves thought to be deities.

Juno, o f c ourse, g rows u tterly en raged. She asks the Tit a ns, Oceanus and his consort Tethys, who rule the sea, to deny the stellified Callisto the privilege of bathing in the sea. They grant Juno's request, with the re sult that Callisto and Ar cas never d ip b elow t he ho rizon i n t he n orthern hemi sphere.

With a nother a ssociational t ransition, O vid considers a comparison between the tails of Juno's peacocks, n ow decorated with the eyes of Argos, and an other metamorphosis t hat had t urned t he color of t he originally white r aven to bl ack. This transformation o ccurred as the result of a r aven, which had been Apollo's favored bird, becoming a tattletale.

In that story, the nymph Coronis of Larissa is the lover of A pollo and pregnant with h is child. Hearing that she has been unfaithful to the god, the raven flies off to tattle and on the way tells a crow its news. The crow tries to warn the raven of the consequences of tattling, telling the story of her own transformation from a princess, also named Coronis, into a crow, and how she temporarily enjoyed the special protection of the goddess of Wi sdom, M inerva, u ntil t hat g oddess replaced the c row with the owl—the m etamorphosed former woman, Nictimene. Not heeding the warning, the raven tells Apollo of C oronis's infidelity. Enraged, Apollo shoots Coronis with his b ow and a rrow. She c onfesses her f ault, b ut a sks why he c ould n ot w ait u ntil their child was b orn b efore k illing her. Re penting too late of h is r ashness, A pollo tries to s ave Coronis. F ailing, he s aves t he u nborn c hild a s Coronis lies upon her funeral pyre and gives the child, A esclepius, t o t he c entaur C hiron to b e brought up . A pollo t hen p unished t he t attling raven by turning its plumes to black.

Chiron rears Aesclepius together with his own daughter, O cyroë, a lo vely prophetess. She p redicts t hat A esclepius, t he a rchetypal physician, will bestow health upon the world and even have the power to r aise the dead until he offends the gods with that power. Then h e will b e s mitten into d ust b y a t hunderbolt b ut will h imself b e raised from the dead to become a god. Continuing her prophecy, she predicts that the immortal Chiron, in agony from an envenomed arrow, will plead for death and t hat the gods will grant h is prayer. Her p rophecies, however, de prive her o f human shape, and she becomes a mare.

In an associated instance of divine retribution, Ovid t ells how M ercury, t he m essenger of t he gods, spies Herse, a lovely, virginal devotee of the goddess of wisdom, Minerva. He approaches her co-worshipper, Aglauros, to help him win Herse's love. Aglauros agrees to help him for a substantial fee.

Minerva, however, is displeased at A glauros's bargain a nd c ommands t he a llegorical figure Envy t o i nstill her p oison i nto A glauros. E nvy obeys, and A glauros begins to suffer horribly at the thought of a happy liaison between her sister Herse and Mercury. When Mercury next comes to visit Herse, Aglauros attempts to renege on her bargain and bar his way. The angry god turns her into a statue—one black with envy's poison.

Book 3

Next fol lows the first in a series of tales organized around the house of the Phoenician Cadmus and the founding of the city of Thebes. Having changed himself into a bull for the purpose, Jupiter (Jove) k idnaps t he lo vely p rincess o f P hoenicia, Europa, and bears her on his back across the sea. Distraught, h er f ather, K ing A genor, c harges h is son Cadmus, on pain of death, to r ecover his lost sister. With a body o f armed men, C admus s ets forth, b ut he n ever i ntends to r eturn. P hoebus Apollo gives Cadmus a different set of orders. He must found a city in Boetia at the spot a heifer leads him to. At that place, however, the troops encounter a dreadful dragon that slays them all. Arriving last, Cadmus engages the dragon in battle. Under Minerva's p rotection, C admus p revails, and th e goddess orders him to take the dead dragon's teeth and seed the ground with them. He does so, and armed warriors grow from the teeth.

As they spring forth, the warriors turn on one another and fight un til only five re main a live. These beco me the c ompanions of C admus i n founding the city of Thebes. Cadmus rules happily u ntil, i n old a ge, he r etires a nd t hen t ragedy befalls his grandson, Acteon.

Acteon is a hunter, and one day in the forest he s urprises the vi rginal g oddess of t he h unt, Diana, bathing naked with her attendant maidens. The go ddess ave nges he r a ffronted mo desty by changing A cteon into a stag. I n t hat shap e, he encounters his own pack of hunting dogs. Not recognizing t heir ma ster, t he d ogs te ar t he m etamorphosed A cteon to sh reds i n sig ht of h is hunting companions, thus introducing a theme of dismemberment.

Juno, of course, ever angry with the victims of Jupiter's p hilandering a nd w ith t heir r elatives, rejoices i n t he death of Eu ropa's g randnephew. But Jupiter now turns his a morous attentions to Semele, a woman whom Ovid seems to have associated with the house of Cadmus, though why he did is uncertain.

Changing h erself i nto the s hape of S emele's nurse, B eroe, J uno co unsels Se mele to a sk Jove (interchangeably called Jupiter in Roman mythology) to assume his own shape and to caress her in his godly form. Jupiter had promised Semele that he w ould g rant her a ny r equest, a nd she f atally follows Juno's advice.

Jupiter sadly complies, revealing his true nature to her i n t he v ery m ildest f orm o f h is e ssential thunder and lightning. Semele is instantly incinerated. J upiter none theless manages to re scue h is baby that was forming in Semele's womb. The god implants the embryo in his own thigh, from which, in due c ourse, t he god Bacchus—child of J upiter and Semele—is born. The baby is hidden and nurtured by sea nymphs, including his aunt Ino, who had once been human but is now an immortal.

An in terlude f ollows t hat in troduces t he blind prophet Teiresias. Unique among human beings, T eiresias had first b een a ma n, t hen metamorphosed into a wom an, then b ecame a man o nce m ore. J upiter a nd J uno app eal to Teiresias to settle their argument about whether men or wome n e xperience g reater ple asure i n lovemaking. When Teiresias agrees with Jupiter that women do, a n i ncensed J uno bl inds h im. Jupiter, ho wever, compensates Teiresias for h is loss of ph ysical vision by letting him k now the future.

Following t hat t ransitional i nterlude, O vid returns to tracing the metamorphic fortunes of the house of C admus, r ecounting t he f amous story of Narcissus and the nymph Echo.

Juno punishes Echo when the goddess discovers t hat t he n ymph had oĀ en de tained J uno i n idle c onversation to a llow J upiter to ma ke h is getaway f rom ph ilandering am ong t he n ymphs. Juno d eprives E cho o f t he p ower o f speech except to repeat what another has said.

Later, Echo falls in love with the beautiful teenaged lad, N arcissus. In visible to h im, she has to wait until he speaks words that she can repeat that will express her fe elings and in form h im of h er passion. Thinking h e r eturns h er f eelings, s he embraces h im. N arcissus r ejects her, a nd i n her sorrow she dies. Her body wastes away to nothing, and her bones become stone, but her voice lives on among the hills, still echoing the words of others.

Narcissus continues to sp urn both enamored maidens and love-struck youths until one of the latter prays that, if Narcissus ever loves, h is love will be denied. The goddess N emesis he ars a nd grants the prayer. In one of the most famous passages in Ovid's *Metamorphoses*, Narcissus gazes into a forest pool and f alls i n lo ve w ith h is o wn r eflected i mage, which seems to r eturn h is h is a ffection u ntil h e attempts to kiss and embrace it. Unable to embrace his beloved, Narcissus pines away, and Echo, present at t he s cene, r epeats all h is laments. At last, destroyed by unrequited love, Narcissus dies and his body is transmuted in the flower that bears his name.

Still tracing the mythical history of the descendants of Ca dmus, O vid n ext r ecounts t he t ale, also told by Euripides in *The Bacchae*, of t he way that Pentheus—a descendant of Cadmus and of one of the five survivors of the dragon's teeth warriors—defied bo th the g ods and T eiresias's giĀ of prophecy.

Teiresias p redicts the a rrival of a new god— Bacchus. The prophet warns Pentheus that, if he fails t o er ect a tem ple ho noring t he n ew dei ty, Pentheus's mother and her sisters will tear him to pieces.

When B acchus a ppears a nd h is de votees undertake the r ites s acred to h is worship, P entheus tells h is fellow Thebans t hat t hey a re mad to b elieve such n onsense, and he o rders h is followers to a rrest Bacchus as a p relude to deb unking his divinity.

Unable to find t he go d, Pentheus's o fficers instead deliver a youth, Acoetes, who is a fisherman and a ma riner and was a mong the first to recognize B acchus a s a dei ty. A coetes tel ls how he took the youthful, half-intoxicated god aboard his ship. He also reports the way in which his doubting c rew attempted to de ceive B acchus by rowing a way from h is a nnounced destination of the Island of Naxos where he had been born. The mariners were a mazed when their ship made n o headway. Then Bacchus appeared to them in the glory of h is d eity, g arlanded, a rmed, a nd s urrounded b y t igers, ly nxes, a nd pa nthers. The deity changed the apostate sailors into sea creatures, and only Acoetes remained to take Bacchus ashore.

Unconvinced, Pentheus—aÅer ordering Acoetes' imprisonment and execution—goes forth to quell the excesses of the worshippers of Bacchus who are practicing their r ites in the woods and countryside. A s P entheus approaches the f renzied and intoxicated worshippers, his mother and his aunts (the first sisterly trio in a set) see him coming. To their sight, however, he appears to be a g iant a nd d angerous b oar, a nd, following the theme of dismemberment, they tear him to shreds and behead him.

Book 4

Ovid then continues h is examples of t he consequences of apostasy with the tale of how another trio of unbelievers—the daughters of King Mineus, women who worked while others worshipped were changed into bats. But the poet now achieves variety by nesting the stories that the three daughters tel l e ach o ther w ithin t hat o verarching account of the consequences of disbelief. The first daughter, unnamed in Ovid, recounts the famous story of P yramus and Thisbe—forbidden l overs who live in adjacent houses and foil their unsympathetic pa rents b y c ommunicating t hrough a chink in a wall.

Planning to elope, P yramus and Thisbe agree to meet by night at the tomb of Ninus. Arriving first, Thisbe n arrowly esc apes a l ioness w hose jaws are still blo ody a Āer a k ill. In fleeing, however, Thisbe loses her veil, and the lioness bloodies it with her ja ws. C oming on t he s cene s oon a Āer, P yramus finds the veil, assumes the worst, and s tabs h imself. F inding h im dy ing, Thisbe prays that their parents will entomb the pair in a single s epulcher, a nd, f alling on P yramus's sword, follows him in death.

The second daughter, Leuconoe, tells the story, also recounted by Homer in *The Odyssey*, of the way that Mars and Venus cheat Venus's husband, the l ame b lacksmith of the g ods, V ulcan, and how, with a c lever net, Vulcan catches the adulterous pair in bed.

Leuconoe then favors her sisters with a second tale t hat c oncerns L eucothea a nd Clytie—both beloved of A pollo, t hough L eucothea's b eauty quenches Apollo's ardor for Clytie. So enamored of Leucothea do es Apollo become that he d rives the sun's chariot too early into the sky and lingers there t oo lo ng, u psetting t he na tural o rder. A t last, ach ieving his d esire, Ap ollo c onsummates his p assion f or L eucothea, p rovoking C lytie's jealousy. She c auses a s candal t hat r eaches t he ears o f L eucothea's fa ther, w ho p unishes h is daughter b y b urying her a live. A pollo t ries b ut fails t o r esurrect h er, and s o in stead he t ransmutes her corpse so that it becomes the frankincense p lant. Apollo no w d isdains Cl ytie, w ho, always turning to view her beloved as he c rosses the sky, metamorphoses into the heliotrope—the sunflower.

Feeling challenged to offer a tale that will produce pleasant thoughts, the third sister, Alcithoe, recounts the story of Hermaphroditus, son of the god Hermes. This youth chances upon a lazy, selfworshipping nymph named Salmacis. Seeing the youth, the nymph falls passionately in love with him and, a Āer taking pains to look her best, proposes marriage to him. He rejects her. Salmacis hides and watches the boy bathe nude in the pool that she frequents. As he swims, she plunges in and embraces him. He resists, and she prays that he will never be allowed to escape her. Her prayer is granted, and the t wo a re t ransformed i nto a single, bisexual creature. Hermaphroditus prays that the same fate will befall any man who enters the fountain of Salmacis, and the gods also grant his prayer.

Ovid now returns to the overarching plot into which he has embedded the sisters' tales. As they continue working at their weaving and ignore the feast of Bacchus, they hear the music of the celebrants approaching. As it does so, the girls' looms change into flourishing grapevines, and, as evening approaches, they themselves are transformed into bats.

Juno, h owever, i s s till n ursing a g rudge against Bacchus and his worshippers—especially against Ino, who nurtured Bacchus as a child, and against Ino's husband, Athamas. Juno therefore descends into the underworld to en list the Furies a s her a gents of vengeance. The Fury of madness, T isiphone, ag rees to a fflict Ino a nd

Athamas. C razed, A thamas s eizes h is ba by Learchus from Ino's arms and dismembers him by throwing him against rocks. Maddened herself, I no t akes her i nfant d aughter, M elicerta, and leaps from a cliff into the sea. Pitying them however, Ino's grandmother, the goddess Venus, pleads with Neptune to i mmortalize them, and Neptune c hanges b oth into s ea n ymphs. I no becomes t he n ymph L eucothea, w ho r escued Odysseus from the waves, and Melicerta becomes the nymph Palaemon.

Still venting her anger against the Bacchantes, Juno c hanges s ome of I no's followers—all o f them the offspring of Cadmus—into s tone a nd others into seabirds.

Overwhelmed with the misfortunes his dynasty has endured, Cadmus goes into voluntary exile. As h e g rieves, h e wonders if the d ragon he s lew long ago was sacred and the cause of all his troubles. If, he s ays, he i s e nduring the a nger of t he gods, then he prays he will himself be transformed into a serpent—a prayer the gods instantly grant. His wife prays for a si milar transformation, a nd her prayer too is granted. They become a pair of serpents friendly to mankind, for they recall their human past.

Ovid n ext recounts the story of Perseus and Atlas. Seeking ho spitality, the demigod Perseus, son of Jupiter, arrives at the dwelling of the giant Atlas a Āer Perseus has slain the Gorgon, Medusa, and lopped off her snaky head. Atlas, fearful of a prophe cy, disdains to w elcome Perseus and tries to drive him off. Perseus unwraps the head of Medusa, which has the power to turn whoever gazes u pon i t i nto s tone, a nd A tlas p romptly metamorphoses into the mountain that still bears his name.

The poet follows that story with an account of the d emigod P erseus's r escue o ft he ma iden Andromeda, who has been chained to a rock as a sacrifice to a sea monster while her helpless parents c ling to her a nd de spair. P erseus a sks to marry Andromeda, and when the parents assent, he s lays t he s ea m onster. Then, O vid e xplains, Perseus turns seaweed into stone with Me dusa's head. That original transformation explains why coral—beginning as, Ovid thought, a sea plant becomes stone when exposed to air.

At the nup tial cel ebrations between P erseus and Andromeda, Perseus tells the story of how he came to slay Medusa. He further explains how Minerva punished Medusa for being too proud of he r h air by turning h er b eautiful l ocks t o snakes.

Book 5

As Book 5 of the Metamorphoses begins, Andromeda's former fiancé, Phineas, interrupts the wedding feast, meaning to recover his intended bride by force of arms. A battle royal ensues that Ovid describes in the bloody manner of his predecessor epic poets. Eventually, Phineas and his allies corner Perseus. Until t hat moment, he h as d isdained to use his weapon of mass destruction, the Gorgon's head. To save himself, however, he does so n ow. A ll h is en emies t urn to s tone e xcept Phineas, who, true to form, looks away and begs for his life. Perseus, however, forces him to lo ok upon Me dusa's he ad, t urning P hineas i nto a statue-a la sting m onument t o h is co wardice. Ovid closes h is account of Perseus's adventures with th e m etamorphosis into s tone of K ing Polydectes-the p erson who, a nticipating P erseus's death, had sent Perseus on his dangerous mission in the first place.

Minerva, goddess of wisdom, had been looking a Åer her half-brother Perseus, but she n ow turns h er attention t o t he n ine M use s, f or t he goddess wishes t hem t o s how her a n ew ma gic fountain t hat h ad been created by the stamping hoof of the winged horse, Pegasus.

As they entertain the goddess, the Muses tell how t hey e scaped t he f orced a ttentions of t he tyrant Pyraneus by flying away. When he attempted to follow them by leaping from a tower, he was killed. Next the Muses entertain their Olympian guest by explaining that the chattering magpies she he ars were r ecently h uman women—the Emathian sisters—who had pridefully presumed to c hallenge t he M uses to a c ontest. A Åer t he women h ad all competed, the m uses n ominated Calliope, the Muse of epic poetry, to compete on their behalf.

Again nesting stories within stories, this time as part of a contest, Ovid has Calliope sing about the goddess of the harvest, Ceres, and her daughter, Proserpina, and the way that Pluto, the lord of the underworld, is struck by Cupid's arrow at Venus's b ehest, falls in love with Proserpina, and carries her off to the underworld. Venus wants to be sure that a third of the universe does not remain immune to the power of love.

The river nymph Cyane tries to persuade Pluto to ask Ceres for her Proserpina rather than ravish her, b ut P luto t urns C yane i nto w ater f or her pains. C eres s earches t he w orld o ver f or her daughter, a t la st finding he r b elt n ear t he p ool where Cya ne had b een t ransformed. Re alizing that h er d aughter ha s be en k idnapped, C eres decides to w ithhold g rain f rom t he w orld a nd especially f rom t he is land of Sic ily, w here her daughter had been seized. However, another water nymph, Arethusa, a native of Pisa, gliding watery beneath the earth, has spotted Proserpina in the underworld, where she r eigns a s P luto's que en consort. Arethusa reports her discovery to Ceres. She, in turn, complains to Jupiter. He objects that no injury has occurred since this was a deed of love. Nonetheless, he will release Proserpina from Hell if she has had nothing there to eat.

Proserpina, h owever, has e aten s even p omegranate seeds, observed by Ascalaphus, who tattles. She turns h im i nto a n owl. Z eus, trying to satisfy all parties, strikes a c ompromise. P roserpina will have to remain in Hades for six months of t he year. The o ther six she c an sp end a bove ground with her mother.

Continuing her part in the contest, Calliope picks up on the story of A rethusa that she had introduced near the end of Proserpina's tale. She relates the story of Arethusa and Alpheus and the way that Arethusa became a sacred stream.

As the nymph A rethusa is swimming in the river Alpheus, its tutelary deity of the same name conceives a passion for her. She flees h is forced embraces until, exhausted, she calls on Diana for help. Diana changes her into a stream, but Alpheus recognizes the waters as A rethusa and still seeks to encompass her waters with his own. The goddess has Arethusa sink into the ground and resurface as a stream on the island of Ortygia.

The focus shiĀs back now to C eres. Mollified by the bargain, she begins to share her giĀs with other parts of the world. She sends as her messenger T riptolemus, w ho, by traveling t hrough t he air, brings Ceres' giĀs to Europe and Asia. When he arrives at Scythia in the northeastern region of Asia, his host, Lyncus, t ries to m urder T riptolemus in bed. Ceres saves her m essenger by transmuting Lyncus into a lynx.

The n ymphs who a re ac ting a s j udges of t he storytelling co ntest accl aim t he M uses v ictors, and, a s th e c hallenging E mathian si sters c omplain, they are transformed into magpies.

Book 6

Continuing the theme of gods displeased by mortal presumption, Ovid opens Book 6 of the *Metamorphoses* with the story of the goddess Minerva's retribution a gainst t he p ride of A rachne, w ho challenged the goddess to a weaving contest.

Minerva weaves, a mong others, scenes of the transformation of human beings into nonhuman forms—mountains or bi rds o r e ven a tem ple. Arachne in stead w eaves sce nes of sex ual co ngress b etween g ods an d h uman b eings. W hen both co ntestants h ave finished t heir l abors, Minerva can find no fault in Arachne's weaving. Nonetheless, e ven though A rachne has a t le ast equaled M inerva i n w eaving, f or t he w oman's presumption i n c hallenging an imm ortal, the goddess turns A rachne into a sp ider destined to dangle forever from a cord.

Though the story of A rachne's fate spreads to Phrygia, there another prideful but accomplished mortal, Niob e, a representative of the lineage of Cadmus, fails to he ed the lesson and opposes the gods. Particularly, Niobe takes overweening pride in her children and in her own nobility and extraordinary be auty. S he i nsists t hat p eople worhip her instead of the goddess Latona, mother of Apollo.

Latona c omplains o f Niobe's i mpiety, a nd immediately N iobe's s ons begin t o fa ll d ead, stricken by supernatural arrows shot principally by Apollo. Horrified, Niobe's husband A mphion commits suicide. Niobe curses Latona for venting her sple en o n L atona's s ons, a nd i mmediately Niobe's d aughters a lso b egin f alling, u ntil o nly one i s leĀ. De spite t he now-chastened N iobe's pleas that her last child be spared, the little girl is also taken. The presumptuous queen finds herself transmuted into a marble fountain, weeping forever upon a mountaintop.

Hearing of these events, people begin to recall other and more ancient instances of Latona's vindictiveness. On one o ccasion, a Āer the g oddess had given birth to children and a group of rustic laborers denied her permission to drink at a pool, she changed them into frogs. A nother time, the people remember, the satyr Marsyas wagered his life in a lyre-playing c ontest a gainst the g od Apollo and lost. As a re sult, Marsyas was transformed into a river.

Now O vid fo cuses briefly on Niobe's brother, Pelops, w hom the g ods r eassembled a Āer h is father had dismembered him. Finding a shoulder missing, the gods had supplied a substitute made of ivory.

There follows the tale of Tereus, king of Thrace, to whom an Athenian princess, Procne, is married. That marriage, however, proves to be cursed. AÅer bearing her first child, Pr ocne requests t hat he r sister, Philomela, be permitted to visit her. Tereus accordingly sails to fetch his sister-in-law, but on first seeing her, he falls desperately in love.

Tereus's pleas on P rocne's b ehalf finally overcome the resistance of the women's father, Pandion, and the king at last grants permission for the visit. Tereus sails with Philomela for Thrace and, on a rriving t here, i mprisons her i n a n i solated dwelling and forces himself upon her. When she threatens to reveal her sha me and tell e veryone what has happened, Tereus cruelly cuts out her tongue. He t hen returns to P rocne with a false tale of Philomela's death.

Philomela, however, cleverly weaves a tapestry that conveys the real story of Tereus's crimes and

secretly sends it to her sister, who understands its message a nd r esolves to a venge her h usband's crimes. Wh en t he t ime c omes to c elebrate t he rites of Bacchus, Procne, dressed as a bacchante, makes her w ay to P hilomela's p rison, d isguises her sister as a c elebrant, and sets her f ree. Then, acting tog ether, t he si sters e xact a ter rible v engeance. They murder and dismembered Tereus's child by Procne and feed his flesh to Tereus. When the king has dined, the women fling the child's head at him.

As Tereus pursues them with murderous intent, all th ree m etamorphose i nto birds. P hilomela becomes a n ightingale, P rocne a s wallow, a nd Tereus a h oopoe. Learning of their fate, Pandion dies of grief at Athens. There, E recthus succeeds him.

Considering t hat lin eage, O vid r ecounts t he way that the North Wind, Boreas, fell in love with one of Erecthus's daughters, Orithyia. Despairing of winning her hand by diplomacy and entreaty, Boreas decides to gratify his desire by force since force is consonant with his nature. He therefore whisks Orithyia away to the far and frigid north, where she becomes the North Wind's bride and bears h im t wo w inged s ons, Z etes a nd C alais, who, feathered like eagles, will later ac company Jason a nd h is A rgonauts on t heir que st for t he Golden Fleece (see *Argonaut ika*).

Book 7

The A rgonaut a ssociation le ads O vid to t hink about Jason and Medea, and the poet opens book 7 with t heir s tory (see *Medea*). O vid tells ho w Medea first resolves not to hel p Jason but, overcome with love, finally b etrays her f ather a nd murders her brother to s ave Jason and r un away with h im t o G reece a s h is w ife. P rotected b y Medea's m agic, Jason ove rcomes bulls m ade o f brass and warriors from scattered dragons' teeth, sprinkles t he g uardian d ragon w ith s leeping potion, a nd s ails a way b oth with th e G olden Fleece and with Medea as his prizes.

Arriving home, t he pa ir finds Ja son's father, Aeson, depressed by the weight of his advancing years and the knowledge that he must soon die. Jason a sks Me dea to g ive h is f ather s ome o f Jason's own y ears t hrough her ma gic a rts. This she r efuses to do, b ut she do es a gree to r estore some of Aeson's lost years to h im. Invoking the goddess of the moon in a marvelous incantation, she a sks for transport to t ake her to t he pl aces where she can gather the herbs n ecessary to her magic. A dragon-drawn chariot takes her flying about t he M editerranean w orld a s she c ollects what she needs. Then, in a complex ritual involving both black and white magic, she prepares the old man for the rejuvenating climax of her labors. Cutting his throat, she le ts all his old blood run out a nd t hen r efills h is v eins w ith t he ma gical mixture she has prepared. When he awakes from his dr ugged s lumbers, he i s 4 0 y ears y ounger. Impressed with her witchcraÄ, the god Bacchus asks Medea to restore his nurses to their earlier vigor, and she does so.

The f ame o f t his r ejuvenation c onvinces t he daughters of Jason's enemy, the aged king Pelias, to allow her to treat their father in a similar fashion. Me dea en lists t he d aughters to sp ill t heir father's blood, a nd w hen he r ises i n p erplexity and tries to def end h imself, M edea ad ministers the coup de grâce, cutting Pelias's throat. He dies, and M edea's d ragon c hariot sp irits her a way to safety through the air.

As she flies, O vid g ives h is r eaders a n aer ial tour of the Mediterranean world, telling of mythical events that had earlier occurred in the locales below. E ventually she a rrives at Corinth, where the more familiar events of Jason's desertion for another wife and Medea's murder of her children occur. E scaping her husband's wrath by dragon chariot, she finds protection at Athens and marries King Aegeus there.

As the poet prepares the reader for the story of Medea's e fforts t o ove rcome Ae geus's s on, Theseus, a digression recounts the story of Hercules' victory over the three-headed guard dog of Hell, Cerberus.

Then, r eturning to h is c entral t heme, O vid tells how Aegeus recognizes his son by the ivory hilt on his sword just in time to prevent his being poisoned. As usual, Medea decamps by air just in time to escape retribution.

The p oet t hen r ehearses Theseus's m ajor t riumphs in a series of couplets, ending the sequence with a t ransition to t he p reparations f or w ar against A thens t hat K ing M inos of C rete is undertaking and h is f ailure to s ecure K ing Aeacus of Agina as an ally. Though Aeacus disappoints M inos, he w elcomes t he A thenians a nd tells t hem a he artrending s tory of a pl ague t hat had de populated h is k ingdom. In a nswer to h is prayers, however, he dreamed that the birds shook ants fr om th e tr ees, an d, a s th ey t ouched th e earth, the ants changed form and became human beings. Upon awakening, Aeacus discovered that his dream was coming true, and the ants became his followers, the Myrmidons.

Ovid ends the seventh book by recounting the story of C ephalus and Procris—a story the p oet also tells in *The Art of Love*. Procris, the sister of that O rithyia b eloved b y B oreas, i s ma rried to Cephalus but jealous because he oĀen calls upon the soothing breeze, Aura, and confides his secrets to the wind. In her suspicion, thinking Aura to be a rival, Procris follows her husband one day on the hunt. Hearing her crashing through the bush and thinking her to be a game animal, Cephalus throws his s pear a nd k ills h is b eloved w ife. A s tol d i n *Metamorphoses*, the story ga ins p oignancy, for Ovid puts the account in the mouth of Cephalus himself, and the husband describes his feelings.

Book 8

As Book 8 opens, Ovid returns to a consideration of the fortunes of King Minos of Greece, who is waging wa r a gainst K ing N isus o f M egara. Nisus's daughter, Scylla, conceives a v iolent passion for Minos and sets her mind to consider the circumstances i n which sh e m ight b ecome t he wife of her enemy. F inally determining that sh e will betray her city to the enemy, she clips a lock of Ni sus's h air, s teals f orth fr om th e c ity, a nd presents he rself and th e lock of ha ir to M inos, explaining t hat her f ather's l ife is m agically dependent on his hair.

Shocked a t her t reachery, M inos r ejects t he maiden, t hough he ac cepts t he o pportunity to overcome Megara. A Åer imposing his r ule upon the land, Minos leaves, abandoning Scylla to her fate. That fate Scylla bemoans in a lengthy soliloquy that ends with her casting her self into t he sea, i ntent on fol lowing M inos's sh ips t hrough the waves. Endowed with supernatural strength, she c atches a nd c lings to M inos's vessel. I n t he meantime, her father has been transformed into a hawk. Spying his daughter clinging to the ship, he swoops to tear her. Frightened, she lets go, and as she do es s o, she c hanges i nto a bird—a Ci ris, whose name means "cut the lock."

Following Minos to Crete, Ovid now presents the e pisode o f M inos a nd t he M inotaur. The Minotaur, a creature with a h uman to rso a nd a bull's he ad a nd lo wer b ody, is t he offspring o f Minos's wife, P asiphae, a nd o f a b ull for which she had conceived an unnatural passion. She had consummated her desire by concealing herself in a wooden cow.

To hide his shame, Minos has the architect and inventor, D aedalus, b uild a c omplex l abyrinth. There Minos imprisons the Minotaur, which feeds on h uman flesh. Ea ch y ear t hereaĀer, M inos requires that Athens send him young men as tribute, and he feeds them to the monster until, with the a id o f M inos's love-stricken d aughter, A riadne, Theseus comes and kills the Minotaur. On the return trip to Athens, Theseus abandons Ariadne on the island of Naxos. There Bacchus finds her a nd i mmortalizes her na me b y s etting her corona i n t he h eavens a s t he c onstellation A riadne's Crown.

Still c oncerning himself w ith C retan l egend, Ovid tells the story of Daedalus's and his son Icarus's escape from Crete, which Minos had forbidden Daedalus to le ave, via the air, flying on wings of D aedalus's invention. But Icarus, in one of the most celebrated stories of antiquity, flies too near the sun. Its he at m elts the w ax that a ttaches h is wings, and the boy plummets into the sea that now commemorates him—the Icarian sea. His grieving father finds h is son's b ody, and a s he b uries it, a partridge lands nearby and whistles merrily. That partridge proves to be a metamorphosed student of D aedalus, P erdix. D aedalus had t ried to k ill Perdix f or r ivaling h is ma ster's a rt, a nd P erdix had been saved from death by his transmutation into the bird.

AĀer b urying I carus, Dae dalus c ontinues to Sicily, where he seeks and gains the protection of King C ocalus of S icily, who r aises a n army t o protect D aedalus against the wrath of M inos a t losing Daedalus's inventive skill. Daedalus always thought that Minos misused the artisan's skill for evil purposes.

Ovid now returns to the theme of divine retribution a gainst h uman neglect, telling the story of Diana's punishing the land of Calydon by sending a giant b oar to r avage the c ountryside. The hero M eleager r aises a t roop of s turdy y ouths: Castor and Pollux, Jason, Theseus of Athens and his friend Perithous, and many others. The troop includes a then- young Nestor, who will b ecome the oldest of the Grecian generals at Troy during the Trojan War. Meleager includes in his company a sole woman, A talanta, a h untress famed for fleet- footedness. When Meleager met her, he promptly fell in love with her, but the quest to kill the giant boar takes precedence.

When the hunters flush the boar from its hiding place, Diana protects it from their spears, and the boar's tusks take a de adly toll as it destroys several of its hunters. Finally, however, A talanta's a rrow d raws first blood. N onetheless, t he boar continues to wreak havoc among its pursuers. At length, Meleager's spear proves mortal to the boar, and aÅer he skins it, he presents its head and pelt to A talanta. D ispleased, the r est of the company f orce At alanta t o g ive up t he p rize. Infuriated, M eleager k ills h is ma ternal u ncles, the brothers Plexippus and Toxeus.

Learning of her brothers' deaths at the hand of her son, Meleager's mother, Althea, takes from its hiding place a magic stick of firewood. At Meleager's birth, the Fates had predicted that he would die when the stick was burned, so Althea has kept it safe through the years. Now she determines to burn the stick in retribution for the deaths of her brothers by her son's hand. In a moving soliloquy, Ovid catches the emotional conflict that the mother suffers as her desire for revenge and her love of her offspring c ollide. S everal t imes she t ries to throw the stick on the fire, and several times she cannot bring herself to do it. Finally, however, she does. As the stick burns, Meleager's life expires in fiery to rment, a nd h is l ast w ord i s h is m other's name. Similarly suffering from the maelstrom of her emotions, Althea commits suicide. Meleager's sisters, wild with grief, embrace his ashes and collapse u pon his t omb. F inally r elinquishing her vendetta a gainst the p eople of C alydon, D iana transforms two of the four sisters into birds that fly off into the distance.

The poet next turns his attention to Theseus on his return to Athens. Delayed by the flooded river Achelous, Theseus and his companions accept the hospitality of t he r iver's t utelary dei ty u ntil t he flood has receded. The river god has his nymphs prepare a ba nquet f or h is g uests, a nd Theseus inquires a bout an i sland h e can see. The g od responds that because of the distance, Theseus is deceived. Not one but five islands, the Echinades, are there, and they are in fact metamorphosed river spirits or n aiads. Achelous explains that he transformed them into islands for neglecting him at their altars. Another island beyond them, however, is the transformed n ymph, P erimela. H er father Hippodamas discovered her pregnant with Achelous's child and threw her into the sea. Achelous saved her and called on Neptune to provide her with a place of safety. In response, the sea god changed her into a surpassingly lovely island.

Another guest do ubts the tale of transformation and casts doubt not only on such metamorphoses but also on the existence of gods. Rising in the gods' defense, an old hero, L elex, tells the story of Baucis and Philemon. This devoted couple had sp ent their lives together in perfect happiness. U nlike their wi cked c ountrymen an d despite their p overty, B aucis a nd Philemon had always m anaged to be charitable both to their neighbors and to strangers. In disguise, Jove and Mercury called at their humble dwelling, and the old c ouple en tertained the g ods to t he b est o f their abilities. The elderly pair became frightened and amazed, however, to see the wine bowl spontaneously replenish itself. As a r esult, t hey concluded that their guests must be deities.

They tried to kill the only goose they owned to prepare for the g ods, b ut the g ods w ould n ot accept t hat s acrifice. Inst ead, t hey l ed the old folks to a high place from which Baucis and Philemon witnessed the destruction of all the countryside e xcept f or t heir h umble hol dings. Their hut w as t ransformed i nto a ma gnificent t emple for the gods, and the gods ask them to name their fondest desire.

The pa ir d iscussed it a nd r equested t hat, a s they h ad " passed s o ma ny y ears i n ha rmony," they be allowed to depart this life together and neither h ave to suffer the loss of the other. The gods g ranted t heir w ish, a nd a Åer ma ny y ears spent together as keepers of the temple, the two transmuted together into intertwined oak trees, which the people of Tyana w orshipped a s g ods. The story is one of the m ost touching of all the *Metamorphoses*.

The river god affirms that such metamorphoses do occur, and reminds the company of beings who take on many forms, such as the god Proteus. Among t hese w as M estra, t he d aughter of t he unbeliever, Erysichthon. In his apostasy, Erysichthon cut down an oak sacred to t he nature goddess Ceres—a tree that was in fact a nymph in a tree's shape. As the nymph died, she p rophesied the miserable de ath of E rysichthon. C eres s ent another n ymph to su mmon F amine f rom t he northern wastes of frigid Scythia. Famine came and breathed her poison into the sleeping Erysichthon. A Āer that, no matter how much he ate, Erysichthon wasted away, ever starving until he had consumed the value of everything he owned, always wanting more and more and never satisfied. Finally, he even sold his daughter, Mestra, beloved of the sea god Neptune, to have money to buy more food.

Calling on Neptune for protection from forced slavery, Mestra received the power of transmutation and transformed her self i nto a fisherman. Her ow ner asked the fisherman where she had gone, but Mestra assured him that, herself excepted,

no woman had stood there. When her father discovered her newly gained power, he sold her frequently, and just as frequently she c hanged into various shapes. W hen he had co nsumed e verything he could get by selling his daughter, Erysichthon began to eat his own flesh, but still derived no benefit and continued to starve.

As the book ends, the river-god host confesses to his guests that even he possesses the power of transformation. He regrets, however, that one of his horns is missing.

Book 9

In a n u nprecedented t ransition, O vid m oves to book 9 in mid-conversation. Theseus asks the god how he came to break his horn.

Sighing, the god confesses that he was among those once enamoured of the lovely D eiaenira. When, however, he asked her father for her hand, Achelous d iscovered t hat He rcules (see *Her acl es*) was a r ival suitor. The two quarreled and fought. Bested by Hercules, Achelous sought refuge in a transformation and changed into a s erpent. Hercules, who as a baby had strangled more dangerous snakes, remained unimpressed. Again shiÂing his shape, the river god became a savage bull. Hercules b ested h im and, ad ding in sult to injury, broke off one of his horns.

A nymph enters bearing the horn, filled with apples to tem pt Theseus's a ppetite. O vid n ow recounts the story of Hercules and the centaur Nessus. R eturning h ome w ith his n ew b ride Deianeira, Hercules finds their route blocked by a swollen river. Nessus advises Hercules to swim, promising t hat he, N essus, will b ear Dei aneira safely a cross. Trusting Nessus's word, He rcules does as he is advised. Nessus in the meantime attempts to kidnap and rape Deianeira, who calls for her husband's aid. Hercules brings down the centaur with an arrow. Nessus's blood soaks his tunic, and the centaur gives it to Dei aneira as a charm against the day that her husband's love for her d iminishes. The blo od contains a n ad mixture oft hep oisoned blo od oft he Lernaean hydra.

Years later, Hercules brings home a concubine, Iole. Hoping to p reserve h is a ffection, Deianeira sends a servant, L ichas, to g ive t he t unic to her husband. When Hercules dons it, the poison from the robe melts into h is flesh, and h is body begins burning away. As it does so, he reviews h is many triumphs an d ru shes a bout m addened. I n t h is state, Hercules encounters L ichas and flings him into t he s ea, where L ichas ch anges in to a flint rock that seaman still encounter.

Finally, unable to bear his suffering, Hercules builds a f uneral py re a nd a sks h is f riend Philoctetes (see *Phil octe tes*) to set it a light. Although his mortal flesh is consumed, because Hercules is the son of Jupiter and the greatest of human heroes, he joins the gods and is stellified.

Now O vid i magines t hat Alcmena, Hercules' mother, and Iole-who, as Hercules' second wife, provoked Deianeira's jealousy-become close and that Alcmena recounts for Iole the tale of Hercules' birth and the role of her maid. Galanthis, in that event. Galanthis had guessed that Juno was interfering with A lcmena's del ivery of J upiter's son, Hercules. Arriving at the altar of Lucina, the goddess w ho p resided a t c hildbirth, G alanthis found L ucina t ightly holding he rself i n, a nd guessed that by that means, Juno was interfering with Alcmena's delivery. The quick-witted Galanthis an nounced that H ercules had al ready b een born, and as a surprised Lucina relaxed, Alcmena delivered t he c hild without fu rther d ifficulty. Lucina was not amused and transmuted Galanthis into a weasel.

Iole re sponds with t he t ale of he r h alf si ster, Dryope. Gone to enjoy a n outing with her yearold son, Dryope was transformed into a lotus tree. Her voice was the last human quality that she lost, and she gave i nstructions t hat her i nfant was to play a nd n urse i n t he shade o f t he t ree she had become. To her father and other relatives present, she bade f arewell a nd c ompleted her m etamorphosis into a tree.

There now appeared at Alcmena's door an old man, I olaus, whose y outh had b een r estored to him. Le arning of t his g iĀ, o ther g ods b egan to pester Jupiter to grant similar giĀs to their favorites. Jupiter, however, put them off by saying that Fate, not he, was responsible for Iolaus's rejuvenation. M oreover, J upiter h imself w as sub ject to Fate's operation.

Ovid now turns to the story of the twin children of t he n ymph C yane: B yblis a nd Caunus. Byblis c onceives a n incestuous passion for C aunus and dreams that her desire is fulfilled. Deeply torn between her ardor and her repulsion at the thought of i ncest, B yblis finally y ields to her desire and writes a letter i n which she c onfesses her feelings and rationalizes them.

When a servant delivers the letter, Caunus is so horrified that he almost kills the messenger, who reports the brother's rejection to C yane. By blis, however, again minimizes that response and seeks other means of fulfilling her forbidden desires. So obsessed does she become that she convinces herself t hat repeated overtures w ill ove rcome h er brother's horror. Finally Caunus flees and founds a new city elsewhere.

At his departure, Byblis loses her reason altogether. Shrieking and howling, she pursues Caunus through forests, over mountains, and across rivers un til she co llapses, ex hausted. H er s ad plight evokes the pity of neighboring nymphs as Biblis lays weeping. She weeps until she dissolves in her own tears and changes into a fountain.

Ovid next turns to the story of a p oor man of Crete, L igdus, who i nstructs h is w ife t hat if t heir soon-to-be born child is a daughter, she must be put to death. But the Egyptian goddess appears to t he wife, Telethusa, and instructs her to ignore her husband and to rear the daughter who will be born.

When a daughter is born in Ligdus's absence, Telethusa k eeps the child's s ex a s ecret f rom its father. Named Iphis, the child is reared as a b oy for 13 years. Then Ligdus arranges a marriage for his s upposed son t o a lo vely g irl, Ia nthe. B oth youths bu rn t o we d, bu t Ia nthe e xpects a ma le and Iphis desires afemale—though she is ashamed of a passion she thinks to be unnatural.

AĀer several delays add to the suspense of the situation, at t he very a ltar on t he wedding d ay, Iphis i s t ransformed i nto a ma n, w ith happy results for all concerned.

Book 10

Book 10 opens with an account of O rpheus and Eurydice—one of t he most celebrated stories of ancient Greek mythology. Shortly a Äer t he wedding of the archetypal poet-singer Or pheus to his bride E urydice, she i s bitten by a de adly s erpent and dies. The grief-stricken Orpheus descends into the underworld to share h is g rief with t he de ad and the gods below.

Making h is w ay to t he t hrone of P ersephone and Pluto, Orpheus sings sweetly and eloquently of his love a nd h is g rief, ple ading t hat Eu rydice b e allowed t o r eturn t o e arth. H is s ong m oves t he ghosts to weep and causes a suspension of the punishments being administered to t he wicked. Pluto grants Orpheus's request and tells him he may take Eurydice back to the world of the living. If, however, Orpheus should turn to look at his wife on the way, the favor will be revoked and the underworld will reclaim her.

Almost back in the world of the living, Orpheus yields to the temptation to glance at his beloved, and she immediately slips back into Hades. Though he t ries to f ollow, O rpheus i s den ied a s econd chance, a nd he sp ends t hree y ears sh unning a ll women and mourning his twice-dead love.

In the context of Or pheus's ly re pl aying a nd singing, O vid s ketches t he me tamorphoses of Attis i nto a bare-trunked p ine a nd C yparissus into a cypress tree. In the grove where both trees stand, the god A pollo had su ng h is grief for the loss of Cyparissus, and there Orpheus sings to an assembly of w ild beasts. As he sings, Orpheus's song and that of Ovid meld into one, and the subjects of *Metamorphoses* now b ecome boys wh o were f avored by t he g ods a nd ma ids w ho were punished for wrongdoing.

Ovid/Orpheus sings of Ganymede, beloved of Jove, who became the cupbearer of the gods. He writes of Hyacinthus—accidentally killed by the rebound of a discus thrown by Apollo. Unable to restore t he b oy to l ife, A pollo c hanges H yacinthus into the flower t hat bears his name, and as that flower he is annually reborn.

Ovid also sings of the way that Venus changes the guest- murdering Cerastes, who were horned men like the biblical Moses, into bulls. She also transforms the irreligious Propoetides, the first women t o pr ostitute t heir bod ies, i nto pa le stones since they have lost their power to bl ush for shame.

The poet next tells the story of Pygmalion, who falls in love with the statue of a woman that he has carved from ivory. Praying to V enus that he might h ave a w ife " like h is iv ory," P ygmalion receives t he f avor o f t he g oddess. H e r eturns home to find the ivory transformed to flesh, marries the girl, and fathers a daughter, Paphos, who is born nine months later.

Recurring n ow to h is s econd a nnounced theme-maids punished for wrongdoing-Ovid sings of an Arabian maiden, Myrrha. Myrrha is a woman who defies the customs against incest by falling in love with her father and, aided by the scheming and trickery of a rash and sympathetic nurse, becomes his mistress. When her father discovered M yrrha's i dentity, he t ries to k ill h is pregnant d aughter. She , ho wever, e scapes a nd flees. AÄer nine months of wandering and on the point of giving birth, Myrrha prays for transmutation, saying she is fit neither to remain among the living nor to pass among the dead. She changes into the tree that is the source of the precious ointment myrrh, and as she undergoes the transformation, a sympathetic goddess of childbirth, Lucina, del ivers t he ba by f rom her w omb. That child is Adonis, later the beloved of Venus, and his story follows that of his mother.

Venus w arns her b eloved A donis a gainst the dangers of hunting and her fear of wild animals. When he asks why, she tells a t ale within a t ale, regaling him with the story of the runner, Atalanta. W arned t o avoid m arrying, A talanta made every p otential su itor r ace against h er. Should she lo se, she w ould ma rry t he v ictor. But if t he suitor lost, his penalty was death.

A y oung ma n, H ippomenes, he ard o f t he harsh terms for wooing Atalanta and decided in advance that the risk was too great. When, however, he observed the maiden stripped for racing, he changed his mind, even though he obs erved Atalanta best a bevy of suitors, all of whom paid the stipulated penalty.

Declaring h is g enealogy, w hich o riginated with th e s ea g od N eptune, Hi ppomenes c hallenged A talanta to r ace. F or the first time, A talanta felt moved by the importunities of a young man, and she fell in love without realizing it.

Hippomenes prayed to Venus for a id, and she received h is prayer favorably. I nvisible, the go ddess provided the youth with three golden apples and whispered to h im how to u se them to w in. The race began, and Atalanta oĀen intentionally lagged, b ut s till she le d H ippomenes. Then h e threw one of the apples. Seeing it, A talanta fancied it and paused to pick it up while Hippomenes passed her. She caught him, and he repeated the ruse, but again she caught up.

With only one apple leĀ, Hippomenes prayed to Venus for help. This time he threw it far out of the course. Atalanta hesitated whether or not to chase it, but Venus made her do s o. Now, slowed by her detours a nd b y t he weight of t he g old, A talanta could not overtake Hippomenes, and he won.

Venus tells Adonis, however, that Hippomenes was ungrateful and did not reward her with the thanks of burning incense at her altar. Angered, she arranged to have both young people changed into li ons, but s he i s a fraid le st some v engeful lion or other wild beast might slay Adonis.

As so on as Venus has le Ā him, A donis goes boar h unting, a nd t he bo ar h e w ounds f atally gores t he h unter. H earing her b eloved's dy ing moans, Venus changes his blood into a perennial flower, the anemone.

Book 11

About such matters O vid reminds the reader as book 11 opens and the Thracian Orpheus sings to the assembled a nimals, with the very stones responding to his music. However, a band of bacchantes Ciconean women—think that the singer with h is l yre is mocking them, and they h url weapons at him. Orpheus's sweet music protects him from them until the horns, drums, howling, and pounding of the Bacchantes drown out h is lyre. Then the stones that formerly had d ropped at his feet begin to strike him. His avian and animal a udience a lso fall victim to t he bac chantes' fury.

Peasants w orking n earby flee i n terror, a nd the crazed women snatch up their hoes and mattocks and use them to dismember their farm animals. The bacchantes then turn on Orpheus and dismember him, flinging his head and lyre into the H ebrus River. There t he ly re pl ays, a nd Orpheus's "lifeless t ongue" m urmurs w hile t he riverbanks reply in k ind. At long last, Or pheus and Eurydice are reunited in the underworld.

Bacchus, h owever, p unishes t he women for murdering his favored poet, turning them all into oak trees, before turning his back on Phrygia and going t o L ydia, w here he r ewards K ing M idas with the golden touch.

This giā, of course, could prove fatal, as Midas can neither eat nor drink. He prays, therefore, to be restored to his former condition, confessing his greedy fault, and Bacchus grants his prayer. Midas bathes in the source of the Pactolus River near the Lydian c ity o f S ardis, and th e g olden to uch i s transferred to the river.

The p roximity o f t he m ountain T imolus (sometimes Tm olus) r eminds O vid of a m usic contest between Pan playing his pipes and Apollo his lyre. Timolus acts as judge and finds in favor of Ap ollo. M idas d isagrees w ith the judgment, and Apollo rewards Midas with the ears of an ass. These Midas disguises, but a slave tells his secret to a hole i n t he e arth. R eeds g rowing ne arby, however, whisper the secret abroad.

All the subject matter of Ovid's song is, in the annals of mythic history, roughly chronological, and with book 11 the reader arrives at what later became known as "the matter of Troy." Ovid sings of the way in which Apollo and Neptune assume human f orm a nd, for a stipulated f ee, h elp t he founder of Troy, Laomedon, build the walls of his newly founded city. The king reneges on payment, however, and in punishment, Neptune floods the countryside and d emands t he s acrifice of t he king's d aughter to a s ea m onster. Though she i s saved, the king reneges again, refusing to pay her rescuer, A lcides, who avenges h imself by becoming the first conqueror of the city of Troy.

Now a ssociatively, O vid reverts to an e arlier story of how P eleus, a m ortal, w ooed t he s ea nymph, Thetis. To a void J uno's jealousy, Thetis had r ebuffed J upiter's adva nces. I n r etaliation, Jupiter c ondemns her to w ed a m ortal. P eleus tries t o force h imself o n her, b ut she sh iÅs her shape until, when she b ecomes a t iger, he le t her go. Another shape- shiÅer, the god Proteus, counsels P eleus to h ang on regardless of w hat shape she t akes until she ha s e xhausted her r epertoire and resumed her own form. That done, Peleus has his w ay w ith Thetis, a nd t heir union conceives Achilles.

Ovid thinks that Peleus enjoyed a happy l ife except for having accidentally killed h is brother Phocus i n y outh. To escape h is father's wrath, Peleus fled with a few flocks and followers.

Arriving in the land of Trachin and concealing his crime, Peleus seeks and obtains the welcome of its k ing, C eyx. C eyx is feeling a b it d isheartened a nd e xplains h is m ood b y r ecounting t he story of t he ge nesis of t he c ruel b ird t he hawk, metamorphosed from h is brother D aedalion. In that story he embeds another, telling of the serial rape of h is ni ece, C hione, b y t wo go ds: Ap ollo and Mercury. Ceyx also reports the way in which Diana punished Chione with death for daring to criticize the goddess's beauty.

A h erdsman i nterrupts t his conversation to tell of a giant wolf that is ravaging the city's herds and also killing the cowherds. He summons the king and his warriors to de stroy the wolf while there are still animals and men leĀ to save. Ceyx immediately organizes a hunting party, joining it himself over the protestations of his wife, Alcyone. I nstead of h unting, ho wever, P eleus pr ays. Answering his prayer, Thetis transmutes the wolf into marble. AĀer this, Peleus moves on to Magnesia, where at last he obtains ab solution for his accidental fratricide.

Moved by a number of s trange o ccurrences, Ceyx n ow r esolves to u ndertake a t rip to s eek advice f rom t he Del phic o racle. A lcyone a rgues

against it and insists that, if he do es go, he must take her with him. Eventually, promising a quick return, Ceyx persuades her to let him sail, but she has a p remonition of d isaster. A s n ight falls o n the journey's first day, a storm blows up. O vid's description of the storm is magnificent.

At length a mighty wave plunges the doomed vessel to the bottom. Most of the sailors perish, but a few, including Ceyx, survive. He clings to a bit of flotsam as long as he could. Then he drowns with Alcyone's name on his lips and a prayer that she might find his corpse.

Alcyone in the meantime wearies Juno with her incessant prayers for her dead husband. Juno therefore sends her messenger, the rainbow Iris, to t ake A lcyone a v ision in Ceyx's shape to inform her of her husband's fate. Iris delivers the vision to the g od Sle ep. Sle ep has h is s on M orpheus a ssume C eyx's for m and deliver ne ws of his death to Alcyone.

Alcyone awakens convinced of her h usband's death. She g rieves a nd g oes down to t he sho re, where sh e d iscovers her h usband's b ody. Mad with misery, A lcyone flings herself from a nearby seawall, but in midair is transmuted into a sea bird. The gods sympathetically resurrect Ceyx as a male of t he s ame sp ecies, a nd O vid s ays t hat they c ontinue t o mate a nd r ear t heir y oung, brooding them in floating nests.

An o ld m an i dentifies a nother se a bird—a Mergus—as a nother t ransmutation a nd a lso o f royal birth. The Trojan prince Aesacus had p ursued a ma id w ho, w hile fleeing f rom him, w as bitten by a s erpent a nd d ied. Bl aming h imself, Aesacus at tempted s uicide by le aping i nto t he sea, but he too was turned into a bird—one that dives for fish.

Book 12

As book 12 opens, we find Troy's king, Priam, grieving for the death of his son Aesacus. At the same t ime, t he p rincipal c ause of t he T rojan War, P aris's k idnapping Helen of S parta, g ets underway (see *Helen*). Ovid reports the Greek fleet becalmed at Aulis. In his version of the sac-

rifice of Agamemnon's daughter I phigenia (see *Iphigenia in Auli s*), O vid suggests that Diana substituted a doe for the girl, obscuring the eyes of the onlookers with a mist. A Āer the sacrifice, of c ourse, favoring winds to ok the Greek ships to Troy.

Following a d escription o f t he house o f rumor—the clearing house for all news and situated just where earth and air and water meet at the center of the universe—Ovid begins his foreshortened account of the Trojan war itself. In the midst of that retelling, the p oet has t he a ncient king of Gerania, Nestor (who claims to be in his third century of life), interpolate a lengthy campfire account, also told by Virgil, of the transformation of the female Caenis into the invulnerable warrior C aeneus. The g od N eptune made t his change of sex at her request a Åer he had ravished her.

Still speaking, Nestor next recounts what happened at the wedding of Pirithous to Hippodame. Among t he g uests were s everal c entaurs. P rovoked both by the bride's beauty and by too much wine, the wildest of them, Eurytus, attempted to kidnap t he bride f rom t he w edding. A g eneral melee e nsued du ring w hich t he h uman b eings, led by Theseus of A thens, defeated the c entaurs with great difficulty. As is usually the case in epic battle s cenes, t he c arnage i s g raphically a nd minutely depicted. Clearly, Ovid could have chosen to become a major poet of warfare.

The poet lingers over a description of the most comely of t he ce ntaurs, C yllarus, a nd h is de ep love for his devoted mate, Hylonome. When Cyllarus was killed in the wedding melee, Hylonome threw herself upon the same spear that had felled him.

At last the centaurs all focused their attention on C aeneus, but he w as proof a gainst a ll their weapons. They hit upon the expedient of burying him under a forest of trees, and though Caeneus could n ot b e w ounded, he c ould b e o verborne with a whole forest on top of h im. He was finally pressed so deep that he had difficulty breathing. Ovid, h owever, a dmits uncertainty regarding Caeneus's end. S ome s ay he w as pressed a ll the way to Hades, and others say he was transmuted into a bird and e scaped. The remaining human warriors so manfully resisted the C entaurs that the surviving half-humans eventually fled.

One of N estor's a uditors, ho wever, is p ut o ut that the old king made no mention of Hercules' contributions to the fight. This prompts Nestor to admit that Hercules was his enemy and to rehearse the reasons. He ends his discourse, however, with a gesture of a mity toward the Herculean relative who had asked the question.

Ovid e nds book 1 2 b y d escribing, first, t he agreement between Neptune and Apollo that led to the death of Achilles when an apparently random arrow fired from Troy's battlements by Paris struck the otherwise invulnerable hero in his one vital spot, his heel, and killed him. Next he quickly g losses o ver t he f uneral, a nd finally he v ery briefly a lludes to t he d ispute o ver t he f allen hero's arms and armor.

Book 13

This d isagreement c arries o ver a nd b egins t he 13th book. As the principal Greek generals sit in judgment, the contenders for the arms state their cases. First comes A jax, who ple ads h is m ighty deeds, the duplicity of his rival Ulysses, and his superior genealogy as the great-grandson of Jupiter h imself a nd h is c onsanguinity a s A chilles' cousin. M oreover, h e a ccuses U lysses o f d esertion and cowardice and of lacking the strength and will to stand in the face of the Trojan enemy without the protection of Ajax. Ajax is a man of action; Ulysses is clever and stealthy. Moreover, Achilles' armament is so heavy that Ulysses cannot s ustain i ts w eight. H e en ds b y c hallenging Ulysses to vie with him in rescuing the arms from the midst of the enemy.

A cleverer orator, Ulysses first mourns Achilles and then reminds the Greeks that had it not been for Ulysses, the Greeks would never have enjoyed A chilles's ervices int he first place. Ulysses twits Aj ax for being "slow of wit," soĀening the barb by granting that each person must make the most of his own powers. As for genealogy, U lysses p oints o ut that h e is n o f urther removed from Jove than Ajax. Moreover, through his m other's lin e, Ul ysses is d escended f rom Mercury.

Ulysses reminds his listeners that it was he who saw t hrough A chilles' d isguise a s a g irl a nd recruited him against the Trojans. Then Ulysses enumerates his conquests. He persuaded Agamemnon to sacrifice Iphigenia to Diana. He had to fool the girl's mother into sending the girl to Aulis. It was Ulysses who served as the Grecian ambassador who denounced Paris and demanded Helen's return. It was he who, when all seemed lost, rallied the Greeks with his eloquence. It was he who acted as a spy, he who entered the enemy camp. He slew many a n en emy, a nd u nlike A jax, Ulysses bears the marks of several wounds.

Ulysses s uggests t hat A jax in h is boasting is claiming credit that belongs to all the Greeks. He refutes the claim that he is not strong enough to bear the weight of Achilles' arms and rejoins that Ajax does not understand their artistic value, not recognizing either the subject matter of the relief work or its fine quality.

AĀer enumerating other distinguished accomplishments, U lysses p oints o ut t hat a ll A jax's accomplishments a re those of the body, Ulysses' are t hose of the m ind an d, a ccordingly, are of greater value. His trump card, of course, is that he has taken the statue of Minerva from the city. As long a s t he i mage p rotected T roy, i t c ould n ot fall.

Ulysses' e loquence ca rries t he d ay, a nd t he generals a ward him t he a rms. A jax, i n a fit o f pique, commits suicide, and the hyacinth springs from his blood as it had from that of Hyacinthus.

Then Troy falls, and aĀer achieving a measure of vengeance, Hecuba, its queen, is changed into a dog a nd b egins to ba rk. Then O vid l ists t he consequences of Troy's fall for those, such as the women of Troy (see *The Tr ojan Wo men*), whose fates have been recorded in poems and plays. He lingers over especially poignant stories like that of the Trojan princess Polyxena, sacrificed at the tomb of Achilles to appease the fallen hero's ghost. He a lso t races the grief of her m other, H ecuba,

450 Metamorphoses

and her vengeance for her c hildren's deaths (see *Hecuba*).

AĀer recording the transformation of the rainbow g oddess A urora's so n, M emnon, i nto bi rds called Memnonides, Ovid reminds his readers that the fates did not allow Troy's hopes to die with the city, and he su mmarizes the story of A eneas, h is accompanying su rvivors, t heir d ifficulties, and their eventual arrival in Italy, where they became the ancestors of the Romans (see *Aeneid*).

In this section, Ovid also embeds the ostensibly self-told story of the nymph Galatea. She tells of the Cyclops Polyphemus's passion for her, of the manner of his wooing, and his vengeance when he discovers h is l ove in t he a rms of Ac is (see *Dialog ues of t he Se a Gods*). Polyphemus destroys Acis, but Galatea's lover is transmuted into a river bearing his name.

When Galatea has finished her discourse, her listeners di sperse. A mong t hem i s t he n ymph Scylla. As she leaves the gathering, she is observed by Glaucus, once a man but recently transformed into a s ea g od. G laucus c onceives a pa ssion for Scylla and pursues her. On reaching a place of refuge, Scylla examines her pursuer, and he explains that he is a merman and a sea god. He tells her the story of h is re cent t ransformation f rom h uman being to that state. Unimpressed, Scylla flees, and as book 13 ends, Glaucus rages off to sulk at the court of C irce, the witch w ho o nce c onverted Ulysses' crewmen into swine.

Book 14

Book 14 opens with a continuation of the story of Glaucus's passion for S cylla. He a sks Circe for a charm t o ma ke S cylla l ove h im. C irce c ounsels him t o s corn t he o ne w ho s corns h im a nd to accept Circe a s h is lo ve i nstead. H is r efusal, o f course, e nrages C irce, who m ixes u p a ma gic potion and skims over the sea in search of Scylla. Finding the pool in which the nymph habitually bathes, Circe poisons it. When Scylla next wades in waist deep, her torso changes into dogs' heads, and from the waist down she finds herself encircled with the forms of beasts. It was this transformation t hat, i n a n e ffort t o ave nge herself o n Circe, caused Scylla to snatch the companions of Ulysses as he sailed between Scylla and Charybdis (see *Odyssey*). Ovid explains that Aeneas and his companions esc aped a si milar fate only because Scylla in the meantime had been further transmuted into a rock.

That transition leads O vid back into summarizing the material of Virgil's *Aeneid*. O vid follows A eneus to C arthage and a lludes to h is marriage to D ido. Then the poet tracks the hero to the c ave of the Avernan sib yl at Cu mae and from there down into the underworld.

The sibyl tells Aeneas the story of her own situation. Wooed by Apollo, who offered any giĀ of her choosing, the sibyl asked for as many years of life as there were grains of sand in a nearby sand heap, but she f orgot to sp ecify t hat she r emain young. As a result she has aged for 700 years and knows t hat she s till ha s 3 00 m ore to g o. She knows that her body will waste away to virtually nothing, but that the f ates will leave her voic e intact.

Arriving at Caieta, a landfall that ever since has borne the name of his nurse, Aeneas finds a Greek survivor of Ulysses' voyage whom Aeneas had e arlier t aken a board a nd had le \overline{A} in Sicily. That sailor, Ac haemenides, tells the story of the blinded Cyclops's attempts at vengeance a gainst the Greeks who blinded him. The seafarer quotes Polyphemus a t l ength a s t he C yclops v ents h is despair at the loss of his single eye and his hatred of those who blinded him.

Then another member of the company, Macareus, t ells ho w U lysses' f olly i n t rying to s tay awake for nine days and nights cost his seafarers their homecoming. When their chief fell a sleep, the sailors opened a bag they thought contained gold only to discover that instead it had imprisoned a ll the w inds c ontrary to t heir voyage. I n the ensuing d iscussion, O vid has h is characters summarize a nother f amous e pisode of H omer's *Odyssey* that involves a metamorphosis—that of Circe's turning men into swine.

He also recounts a story told him by a woodpecker while he was in his swinish condition of the way in which the appetitive Circe fell in love with Picus, a youth who loved the nymph Canens. When C irce a ttempted t o s educe him, P icus rejected her, with the result that she turned him into the very woodpecker that told the tale. The angry Circe a lso c hanged P icus's h unting c ompanions i nto b easts. A s for t he n ymph C anens, when Pi cus fa iled t o r eturn, s he w ore a way to nothing and vanished into thin air.

Now t he p oet t urns to t racing t he a rrival of Aeneus a nd h is Trojan ba nd i n the region of t he Tiber and of their encounters with the native peoples, b oth f riendly and un friendly (see *Aeneid*). He dutifully records such transformations as occur along th e w ay, suc h a s t he m etamorphosis o f Acmon and others into swan-like birds when they offended the goddess Venus, or that of a she pherd transmuted to an olive tree for mocking d ancing nymphs, and the way that the Trojan ships changed into sea nymphs.

Ovid then summarizes the victory of Aeneas over Turnus and Venus's successful plea for the success of her s on A eneas a nd h is c omrades i n Italy so that they might become the forefathers of the Roman state and empire. He also records the deification of Aeneas as the god Indiges. He then traces the genealogy of the Roman state, pausing to detail the story of the love of the Etruscan god, Vertumnus, f or the wood nymph Pomona. Vertumnus takes excessive pains to disguise himself in various ways so that he can approach Pomona. At last he disguises himself as an old woman and comes to admire the fastidious manner in which Pomona tends the trees and vines she c ares for. Using the codependency of the trees and the vines as a parable for the mutual support of spouses, Vertumnus describes his own passion for Pomona and the benefits that will accrue for both if the nymph will only accept him. She will be his first and his last love.

To u nderscore t he evils that arise from rejection, Vertumnus as the old woman tells the sorrowful t ale of I phis, w ho ha nged h imself w hen his love, A naxarete, rejected him, and how she, when she tried to look away from his dead body, was turned into a marble statue in keeping with her s tony r efusal. Ha ving finished hi s tutorial, Vertumnus r eveals himself in his own form, and Pomona returns his love.

Returning to Rome and its history, Ovid outlines the Romans' war with the Sabines in the time of Romulus, and he ends the book with the deification of the Sabine, Quirinus, and his wife, Hersilla, who became the goddess Hora.

Book 15

Book 15 opens with the story of how Rome's second k ing, t he p erhaps le gendary P ompilius Numa, h ears the t ale of M yscelus. I n a d ream, Hercules tells Myscelus to leave his homeland of Argos an d m ove n ear t he r iver A esar. L eaving Argos is a c apital offense, a nd le arning of h is intention, his neighbors bring Myscelus to trial. When a vote is taken on his guilt, all his jurors put black stones in a jar to c ondemn him. Hercules, however, m iraculously c hanges a ll t he stones to white. (Myscelus was credited with having founded Cro ton [Crotona] i n I taly's to e i n 710 b.c.e.)

Now Ovid introduces a novel form. The influential Greek thinker Pythagoras migrated from Samos to Croton in 530 b.c. e. There he established an influential school of thought that persisted for several hundred years. Into the text of the Metamorphoses Ovid in serts a leng thy le cture b y Pythagoras, whom the poet credits with almost universal k nowledge. The o pening sub ject o f Ovid's Py thagorean di scourse is vegetarianism. Eating m eat i s h ateful because i t criminally requires the death of live creatures and because doing so makes the carnivore more savage. In the Golden Ag e, a rgues P ythagoras, p eople were vegetarians, consuming only the fruits of the field and n ot a nimal flesh. See Lives of Eminent Philosophers.

Pythagoras turns next to a critique of mythic punishment a Åer death. Bodies are burnt to a sh, and s ouls, s ays Py thagoras, a re i mmortal. H e argues for the transmigration of souls and their rebirths in various forms—another reason for not slaughtering animals.

452 Metamorphoses

Time is a continual round of seasons, following one another predictably. Our bodies undergo ceaseless m etamorphoses a s th ey a ge. E ven earth, air, fire, and water—the elements of Greek physics—are subject to change. Nature continually creates new forms from old. Once- fresh rivers b ecome b rackish. The s ea adv ances a nd retreats. Old l and si nks; n ew l and i s f ormed. Streams like the river Ammon, cold at midday, is warm at morning and evening.

Pythagoras argues for the spontaneous generation of insects from putrefying flesh, and he cites the Phoenix as the only example of self-renewing creature. Cities and civilizations, too, rise and fall. Troy, Mycenae, Thebes, have all perished, except that w hile R ome lives, s omething of T roy w ill remain.

The speaker then returns to his theme of vegetarianism, citing many reasons why people should not c onsume t he flesh o f o ther c reatures f or nourishment.

Returning to h is own poetic voice, O vid then tells how a c ertain Vi rbius a sserted t hat he w as none other than the divinely resurrected H ippolytus, w hose s tory t he p oet su mmarizes (see *Hippolytu s*).

He then touches briefly on a number of transmutations a ssociated w ith R oman h istory that have occurred since the founding of the city. Particularly, the poet calls upon the Muses to r ecall the story of the A esculapius, A pollo's s on, who, at the senate's invitation was miraculously waĀed by ship from the city of Epidaurus to Rome. There, having arrived transmuted into the form of a serpent, he founded on the island in the Tiber river a notable c ult of he aling that h as p ersisted in a series o f forms from its founding in 291 b.c.e. until the present moment. Rather than a cult, now, however t he t herapeutic t radition of t he i sland has transferred to the hospital of St. Bartholomew that occupies the site.

Aesculapius, h owever, on his first a rrival in Rome quelled a p estilence that plagued the city. Ovid l ovingly tr aces t he g od's p rogress b y s ea through the several stops a long h is route to t he temple prepared to re ceive him. Having told the story, Ovid makes a sudden associative transition to the subject of J ul ius Caesar — a g od i n h is own c ity. M oreover, h is p rincipal ac hievement was t o ha ve been the (adoptive) f ather of th e emperor, A ugust us Caesar. At t his point, the exiled Ovid shamelessly flatters the emperor who had banished him in the fond hope of having his exile repealed. He has Venus appeal to the gods to stay the assassination of J ulius Caesar. Even the gods, however, are subject to the fates, and they cannot c omply. B efore t he m urder, p ortents o f disaster a nd u nnatural o ccurrences to ok pl ace. But such forewarnings could not forestall Caesar's death. "Naked swords," says Ovid, "were brought into the sacred curia."

Though the gods themselves could not preserve Caesar's l ife, t hey c ould r eceive h im a s o ne o f themselves, and th is they promised Venus. They also p romised h er t hat C aesar's heir A ugustus would become the r uler of the known world and also be deified u pon h is death. Mollified, Venus took the soul of Julius Caesar as he died and bore it up to heaven. From the earth, it appeared as the comet that was observed on the night of Caesar's death. N ow, just a s J upiter r eigns i n h eaven, s o Augustus reigns on earth. Ovid ends the body of his m asterwork w ith a p rayer f or h is em peror's long life before he too is deified and stellified.

There follows an envoi—the poet's add ress to his p oem. I t a lso s erves a s a none-too-tactful reminder to the emperor that the poet's fame is also inextinguishable. W hen h is life has en ded, Ovid's better part, his poetry, will be read as long as t here a re r eaders. O vid's na me w ill live in fame forever—"immortal," a s he s ays, " beyond the loÃy stars."

Mimnermus of Colophon (fl. ca. 590 B.C.E.) Greek poet

A transitional figure in the development of Greek elegiac p oetry, M imnermus was the first poet to move e legy aw ay from its roots as a v erse form used in songs of war. In the earliest Greek elegiac poetry, like that of Callinus of Ephesus or of Tyrtaeus, the term *elegy* described a m eter in quantitative ver se that both poets u sed to inspire troops who sang the verses as they marched to battle.

Mimnermus employed t he f orm f or a nother purpose. The slender fragments of h is verse that still exist lament the swiĀ passage of youth, the afflictions of human l ife, a nd i ts b revity. A Āer Mimnermus, the *elegy* came to be felt as a sad poem, oĀen of considerable length, and regularly composed i n h exameter a nd pen tameter r ather than in the original form.

Moralia (*Ethical Essays*) Plutarch (ca. 100 c.e.)

Though Pl ut a r ch's plan for the essays that constitute his *Moralia* was evidently to present them as a series of letters, dialogues, and lectures, as his interest in his subject of the moment intensified, he tended to neglect the form chosen and simply develop an essay.

In its surviving form, this work is composed of 78 complete or a lmost complete essays and a few fragments of others. The collection holds special interest f or a nyone w ho i s o r w ho a spires to become an essayist, for it is the foundational document of this genre in the Western tradition. In their works, Re mais sance w riters such a st he French a nd E nglish essa yists M ichel E quem de Montaigne a nd Francis Bacon looked to Plutarch's example for mo dels, oĀen treating the same or s imilar topics to t hose of t heir Greek e xemplar. Plutarch also provided u seful examples for those who in the Renaissance specialized in writing essays describing the character traits of certain sorts of people.

The to pics t hat P lutarch add resses r ange broadly in the course of his work. He writes several essays on subjects concerned with learning. "On t he E ducation o f C hildren," "H ow t he Young Man should Study Poetry," and "On Listening to Lectures" exemplify essays addressing this topic.

Plutarch a lso o ffers adv ice f or p icking o ne's way through the pitfalls and vicissitudes of life. "How to P rofit by O ne's E nemies," "Advice about K eeping W ell," "How to Tell a F latterer from a Friend, and "How a M an May Be come Aware of H is Progress in Virt ue" typify Plutarch's friendly suggestions to his readers.

454 Moschus of Syracuse

Still another set of essays examines the national characters of Greeks, Romans, and o ccasionally Persians. Sometimes Plutarch examines the question at a general level, a she do es in "The Roman Questions" and "The Greek Questions." Sometimes hen arrows the topic, a she do es in "Were the Athenians More Famous in War or in Wisdom?" At other times, he approaches the issue through an examination of the sayings of an individual Greek, such a s A lexander, or a Persian, such as Cyrus.

Plutarch d iscusses r eligious, m oral, and p sychological que stions. H e s peaks of go ds a nd prophecy, moral virtue, anger, and tranquility of mind. Be yond, t hat he c oncerns h imself w ith such aspects of human personality as talking too much, b eing overly c urious, or b eing c onsumed with j ealousy. H e al so conducts d iscussions o f aspects of Plato's work and of the philosophy of the Stoic philosophers (see St oicism), and he propounds his disagreement with the manner of living proposed by Epicurus. Music, too, becomes a subject f or h is c onsideration. A nticipating c olumnists who advise the lovelorn, he even offers suggestions for conjugal happ iness to h usbands and wives, and more than one of his essays discusses the bravery of women.

Mozi (Modi, Moti, Mo Tzu, Master Mo) (ca. 480–390 B.C.E.)

Sometimes called literary history's "first true philosopher of C hina," Mozi (Master Mo) may have sprung f rom t he ancient class of a rtisans or of craĀsmen. Though he may have been a student of Confucianism at some point in his personal history, he b roke w ith t hat t radition a nd founded a countermovement of h is o wn, b ecoming t he leader of a n activist organization that was both antiaristocratic and opposed to wars whose purpose was the conquest of new territory.

Severely critical of the tenets of Confucianism, Mozi applied his own views to establishing a highly disciplined community of which he became the autocratic le ader. In h is view, a polity needed to share a common set of ideals, have a power structure that devolved from its leader, and be conducted i n a n o rderly ma nner. I n p lace of fa voring family relationships as Conf uc ius had, Mozi pursued u niversal b rotherhood. H e a lso t ook iss ue with C onfucius's v iews c oncerning t he c entral place of music in human life. Beyond that, he criticized a s ex cessive t he C onfucian em phasis o n funerals and mourning.

Whereas Confucianism centered both e thics and politics in the family, seeing the relationship of the citizen to the state as analogous to that of parent to c hild, M ozi s aw a c hain of c ommand that began with God, descended to the sovereign, and so on down to the lowest echelons of society. Whereas Confucianism sought to promote good will among men, Mozi promulgated instead what the h istorian o f p hilosophy, P hilip J. I vanhoe, calls " state c onsequentialism." That s ystem's objectives i ncluded ma ximizing the wealth of a community o r st ate, ma intaining st rict civ ic order, and increasing the state's population.

Mozi anticipated by more than two millennia the p sychological t heories of b ehaviorism. H e believed t hat h uman be havior could be sha ped quite easily by a s ystem of r ewards and p unishments, and he put h is theories to the test in the way he ran his community. Even the death penalty was not beyond his authority to impose.

Generally, M ozi be lieved t hat pe ople wou ld treat others in the way that others treated them and that they would, on the whole, try to ple ase their r ulers. F or t hose e xceptional p ersons o utside these norms, his system of rewards and punishments came into play. Again for most persons, this system worked best when supplemented with carefully formed, rational arguments.

For a leader with such pragmatic views, Mozi held s ome s urprising c onvictions. He b elieved, for instance, in ghosts and other sorts of spirits as well a s i n a literal he aven. Su pernature, he w as convinced, would enlist itself on the side of a polity's authority.

The antiaristocratic bias of Mozi's convictions led him to en list his organization as a pa ramilitary group who would fight on the side of states that were victimized by wars seeking to add ter ritory to aggressor states. This penchant for paramilitary activity, Ivanhoe believes, may have led to the dem ise of Mozi's community during the warring st ates per iod. (See a ncient Ch inese dy nast ies and peri ods.)

The book that records Mozi's teachings bears his name (Mo) and his honorific (zi) as its title, *The Moz i*.

Mozi, The (*The Mo Tzu*) Mozi (ca. fifth century B.C.E.)

Originally a work in 15 books organized into 71 chapters, *The Mozi* has come down to us in an incomplete state. Some 18 of the chapters a re missing altogether. Given the repetitive nature of the work—at least insofar as its central tenets are concerned—this l oss p robably do es n ot m uch affect o ur k nowledge of t he te xt. S ome of i ts chapters, however, are considered to be the work of others.

Cast in the form of a series of questions and answers or as a series of pronouncements by the phi los o phe and utopian s ect le ader M ozi, t he work pursues issues dear to his heart. The opening discussion addresses an issue of concern to Mozi. The state must be at pains to take care of its learned persons a nd f oster e ducation. Suc h p ersons a re less likely to t ry to ma nipulate t he s tate's leader with flattery and to give him farsighted and stern advice.

The s econd chapter su ggests t hat su perior people w ill b e " incorruptible i n p overty" a nd "righ tous when wealthy." The third chapter, "On Dyeing," is demonstrably a late addition, though Mozi might have been struck with the potency of dyes during h is lifetime. The chapter's advice is moral: one m ust be c areful what one b ecomes involved in.

The fourth chapter proposes that state governments put in place the same sort of standards or benchmarks t hat guide ar tisans in m aking t he goods they sell. The standard states must aim at, however, is one established by Heaven. Whatever universally b enefits m ankind is a n action t hat

456 Mozi, The

Heaven w ill a pprove. Mo zi was convinced that Heaven redressed wrongs and singled out malefactors for punishment. States that exercise care for the populace will be singled out for blessings. Several of the subsequent c hapters emb roider that theme. The virtuous will be exalted.

In Book 3, chapters 11 and 12, M ozi a rgues that m ost people re cognize t hat the w ar of all against all t hat prevails in a s tate of nature is a disorderly and unsustainable condition. Early on in human history, then, hierarchical forms of governance c ame into being, and in a well-ordered state, m ost peo ple will identify with their leaders. The sage-kings of old earned the approval of heaven with their concern for all the people whom they led. The identification of t he wills of the ruled with that of the ruler is the foundation of well- ordered government.

The exercise of the hierarchical system that he recommends will result, Mozi assures his readers in Book 4, in the eventuation of the universal love of h umankind, g iving "peace to the rulers and sustenance to the people." The effects of such universal love will be supranational. Therefore, offensive warfare will also cease. Just people will enlist in t he d efense o f na tions a ttacked b y selfaggrandizing enemies. Book 5 contains the Mohist condemnation of o ffensive warfare. At t he s ame time, Mozi was utterly realistic about the need of states for defense against expansionist neighbors, and to that end t he members of h is c ommunity became ex perts i n the s trategies and t actics of defensive warfare.

Like Pl at o, M ozi espo used a version of the philosopher-king—the ruler-sage, a le ader w ho would implement Mozi's program. Such a le ader would also economize on state expenditures—the subjects of chapters 20 and 21 of Book 6. Similar motives of economy and good sense lead Mozi to criticize t he el aborate f uneral c eremonies a nd prolonged p eriods o f m ourning t hat c haracterized Confucian doctrine.

In the pages that follow, having dealt with that matter toward the end of Book 6, Mozi explores the subject of the will of Heaven. He firmly holds that rewards will come to those who succeed in acting in accord with Heaven's will, and punishments will follow for those who do not. The sage is convinced that Heaven dearly loves human beings. However, human beings do not always succeed in performing or e ven in discerning Heaven's will because, as he says in chapter 28, pe ople understand trifles but not important matters.

In Book 8, chapter 21, Mozi takes up the subject of ghosts. To them and to spirits Mozi attributes the cause of confusion in the world. Seeking proof of their existence, Mozi prefers the authority of antiquity to the te stimony of the living multitude. In support of his argument, he cites a number of old g host st ories. Though these a re interesting, they would only convince those who already believed.

Mozi c ategorizes g hosts and o ther sp irits a s follows: he avenly s pirits, spirits of h ills and r ivers, and ghosts of deceased persons. It behooves "the gentlemen of the world" to believe in them.

Chapter 32 of Book 8 contains a famous condemnation of music—one again grounded in what Mozi thought to be ancient practice and one diametrically opp osed to Confucian t eaching. H e says flatly t hat "music i s w rong." A mong o ther things, it leads to dancing and lust.

In chapter 35, Mozi conducts a critique of the doctrines of fatalism. He does not believe that certain events h ave been fated to happen since the dawn of b eing. He thinks that careful planning and p urposeful a ction c an r esult in p redictable outcomes that fol low f rom the c ourse of a ction taken and not from an inescapable destiny.

Chapter 39 once again mounts a direct attack on the tenets of Confucianism. This time Mozi complains t hat family-oriented C onfucianism establishes a h ierarchy of a ffection t hat u ndermines the principle of universal love.

The r est of *The M ozi* divides in to two parts. The first essentially e laborates on many of the basic p remises o utlined above. I t d oes s o by presenting illustrative questions and an swers in dialogue form. The s econd d iscusses def ensive military tactics that can be used to dissuade selfaggrandizing s tates f rom a ttacking t heir n eighbors. The def enses r ecommended ei ther ma ke victory impossible or so expensive that no advantage would accrue to an aggressor from winning.

Musæus (1) (fl. sixth century B.C.E.)

Whether or not the early Museus was a real person is unclear. His name, which means "He of the M uses," is c losely a ssociated with t hat of Or pheus, and both were considered archetypal poets. Musaeus is pictured on an ancient piece of pottery as copying down the songs sung by the head of Orpheus a Āer it had been severed by the bacchantes when Orpheus was observed spy ing on their secret rites.

Reputedly b orn i n Thrace, M usæus w as a pupil of Orpheus in some versions of his story. A collection of o racles was a ttributed to M usæus in a ncient times, and a si xth-century A thenian scholar, Onomacritus, was employed by the Athenian leader P isistratus to edit Musæus's works. The e ditor w as c aught add ing a t le ast o ne f alse oracle t o t he c ollection; h is do ing s o ha s c ast doubt on the reliability of the body of work attributed to Musæus. Pl at o, however, speaks admiringly of M usæus's verse pre dictions c oncerning the world's final days.

Musæus (2) (fl. ca. 450–550 c.e.)

Possibly a Christian Greek poet, Musæus authored *Hero and Leander*, a tragic tale of Leander's wooing Hero by n ightly swimming the Hellespont to see her in the lonely to wer where she l ived. Hero set

out a light to guide her lover, but one stormy night Leander drowned. *Hero and Leander* is the source poem for the Renaissance British poet Christopher Marlowe's poem b y the s ame name. The 1 9thcentury British poet, George Gordon, Lord Byron, swam the Hellespont to prove it was possible.

Muses

The Gr eek p oet H esiod (eight c entury b.c.e.). fixed the number and function of the Muses—the Greek divinities who presided over the arts and inspired their practitioners. Hesiod's list included Calliope, the patron goddess of epic poetry and the p rincipal M use; C lio, t he M use of h istory; Erato, the Muse of love poetry and lyrics in general; Euterpe, the Muse of music; Melpomene, the Muse of t r agedy; Polymnia, the Muse of sacred poetry a nd m imicry; T erpsichore, t he M use o f dancing and choral singing (which on the Greek stage wa s acco mpanied by d ance move ment); Thalia, th e M use of c omedy, a nd U rania, t he Muse of astronomy.

From t he p erspective of l iterature, in k eeping with the view of the poet as *vates*, or as priest, the artist w as t hought t o a ct a s a m edium t hrough which the deities spoke. Just as poets might accompany t hemselves o n m usical i nstruments, s o t he Muses used the artists as *their* instruments. Homer and, following Homer, most e pic p oets e ver a Āer start t heir w orks b y i nvoking t he M use. H omer begins his *Odyssey* by praying, "Sing in me, Muse [presumably Calliope], and in me tell the story . . . ," and the adventures of the wandering king of Ithaca unfold.

In i conography o r m ythography th e M uses take traditional forms. Calliope is pictured with a writing tablet, Clio strumming on a lyre, Euterpe with a flute, Melpomene with the mask of tragedy, and Thalia with that of comedy. The thoughtful expression on Polymnia's face identifies her, while

Terpsichore is represented dancing and accompanying herself on a lyre. Urania is usually pictured holding either a terrestrial or a celestial globe. (See mythography in the ancient world.)

myth

Though the pop uar definition of *myth* identifies the term as one alluding to a fictitious story, perhaps a b roader c ultural de finition would be tter serve to clarify the word's meaning: Myths contain the foundational stories of cultures. They are oĀen co llected tog ether w ith h istory, poe try, moral w isdom, g enealogy, a nd t he l ike i n t he early literature of cultures or nations. OAen, too, myths address such subjects as the origins of the universe, the creation of the earth and its creatures, t he n umber a nd na ture of t he g ods, t he means t hrough w hich h uman b eings c an c ommunicate with or propitiate their deity or deities, and the moral and legal underpinnings of human society. They also tend to encompass the prehistoric and sometimes the historic figures of a cultural tradition, assigning them the status of gods or demigods. Such dei fication, for example, was frequently the c ase with the k ings of a ncient Sumer, with the emperors of Rome, and with the found ers of major religions.

Collections of myths have o Āen been elevated to the status of an official state religion. This was, for example, the situation in ancient Rome, Greece, Persia, B abylon, China, Eg ypt, Is rael, I ndia, a nd elsewhere. Even persons who do not literally credit the mythic stories of a culture o Āen r espect the restraints on antisocial human behavior imposed by believing in myths and behaving according to the moral codes they involve. Cice r o provides an instance of one such person in ancient Rome.

Myths r egularly ha ve a lso had t he o pposite effect o f e ncouraging a ntisocial be havior i n persons or societies that become convinced of the exclusive truth of their par tc udr set of myths. Beyond t hat, pe rsons a nd g roups p rincipally interested in the exercise of power or in the accumulation of wealth have regularly and c ynically appealed to the widespread belief in various systems of m ythology i n ord er to dom inate or to gain the support of those systems' adherents.

A b rief b ibliography follows of r epresentative ancient texts whose contents are in part mythical.

mythography in the ancient world

Collecting and commenting on myths and tracing their origins back until they are lost in the mists of prehistory is a n occu pation t hat h as f ascinated many a mythographer through the ages. Preserving, e xplaining, a nd r etelling t he m yths t hat formed part of the cultural heritage of every literate ancient people became a major literary enterprise very early aÅer writing came into being.

We see e xamples of such collections in, for instance, the Egypt ian Book of the Dead. It brought t ogether all the s tories n ecessary to assure the continued survival of human beings in the aÅerlife. Elsewhere in ancient Sumer, Assyria, and Babylonia, the invention of c uneifor m script, probably for the keeping of business records initially, soon gave rise to such collections of stories as those included in *The Gilga mesh Epic* that tell of god-kings and hero es and recount a version of the flood story. Myths of origin a lso appear in the Hebr ew Bibl e, including, among others, the two accounts of creation that app ear in the first chapter of Genesis.

In India, the great national epics, *Ramayana* and *Mahabharata* coalesced over time, aggregating the stories surrounding the Hindu pantheon into powerful theological and ethical systems.

In Greece and later in Rome, mythical elements concerning g ods a nd d emigods a nd the interactions of m ortals a nd i mmortals a re e verywhere apparent in the epics of Homer a nd of those whom Homer inspired, including the Roman Augustan poet Vir gil. The similarities a mong the myths of geo graph ially distant peoples from Greece to India suggest regular contacts among their ancestors in the mists of preliterate history.

One such contact—that between early Hebrew and Canaanite farmers—has been brought into a sharper focus than the Judeo-Christian Hebr ew Bibl e provides by the discovery of the Ras Shamra t exts. These fired clay tablets, i ncised with cuneiform writing in the Semitic language, shed light on the religious interactions and influences that occurred as the worshippers of Jehovah and of Baal became neighbors.

In China, we see the interaction of Buddhist myth (see Buddh ist t ext s) with native Chinese ancestor worship and efforts at c osmology and foretelling the future in the ongoing development of the *Daode jing* (see *Lao tz u*).

Such works as those mentioned above contain the m yths th emselves. S cholarly m ythography, however, involves an effort to collect and explain myths and to set them in a frame of reference that will preserve their meanings for later generations. Mythography of this sort began in earnest in the Greco-Roman world with the writings of Hesiod. Another v ery e arly G reek m ythographer w as Palæaphatus of Athens. He probably flourished in the fourth century b.c.e. and is remembered for a book, *Peri a piston* (On i ncredible matters), i n which he a rgued t han m ythological b eings h ad originally been mortals whose achievements had resulted in their deification. To present that argument, of course, he had to recount the myths.

Later during the Hell enist ic Age, scholars oĀen employed by the great library at Alexandria, took pains to collect and explain all the mythical material they could find. One great collection of this s ort h as o nly r ecently e merged f rom t he ongoing s tudy of papy rus fragments d iscovered in Egypt. Called the *mythographus Homericus*, it later bec ame p art of t hel ibrarians' e fforts t o recover a nd i nterpret all the stories t hey c ould, and as a result, ancient commentary on hundreds of myths have survived from the epoch of Alexandrian scholarship. Persons associated with such efforts i ncluded E r at ost henes a nd C all imach us, both of whom had w orked at the Alexandrian library.

The Romans, of course, largely borrowed their principal m ythology f rom t he Gre eks, t hough vestiges of a n ative I talic m ythology s ometimes appear. Although the Romans renamed many of the gods and demigods, the deities fulfill the same functions and occupy the same status as they did in Greek religion. Though h is works on the subject are now largely lost, the principal name associated w ith R oman m ythography i s t hat o f Marcus T ere nt ius V arr o. F abius P lanciades Fulgentius also wrote a three-book work dealing with the subject of myth. Later Roman mythographers borrowed from his work.

Nart Sagas

A large b ody of myth and folklore that has survived from very ancient, preliterate times in the mouths of speakers of such languages as Abkhaz, Circassian, Aba za, O ssetic, and K artvelian, the Nart Sagas have recently been the object of intense collection and st udy. U ntil the end of the 18th century, the speakers of these and of the other languages in which Nart Sagas principally occur occupied the C aucasus mountain re gion in a broad band between the Black Sea on the east and the Caspian Sea on the west.

Until the 20th century, the peoples who spoke the languages of the Nart Sagas included warlike pastoralists a nd t raders w ho l ived i n c lans a nd tribes with clearly defined class structures. These included, as the f olklorist an dl inguist J ohn Colarusso tells us, "princes, nobles, freemen, and serfs." Though the various clans remained largely in de pendent in peacetime, when war threatened, they banded together into a formidable force. Just how formidable the former Soviet Union was to discover when it forcibly enveloped the Caucasus region in the years between the two world wars. Each Caucasian family's stone house had a tower and was a small fortress. Their re is tance lasted for years.

The intensity of scholarly effort that has lately been ex pended i n co llecting t he st ories t hat comprise t he N art S agas gains i ts p rincipal impetus fr om t he r apid d isappearance o f t he native d ialects i n w hich t he s tories ha ve b een preserved—some a pparently for m illennia. A ll over t he w orld, to ngues w ith r elatively f ew speakers a re r apidly b ecoming e xtinct i n t he face of the electronic onslaught of such predominant world languages as Arabic, English, Spanish, Russian, and Chinese.

The s tories t hat c omprise t he N art S agas resemble the myths of the Norse Germanic peoples a nd o f t he a ncient Gr eeks a s w ell. S ome think them to be relics of cultures who spoke the Ol d Per sian languages-cultures like the Scythians, de scribed i nX enophon of A then's Cyropædia. O ne o ft he p rincipal e ditors o f the sagas, J ohn C olarusso, a lso s ees analogues between st ories in t he N art S agas and m yths found i n s everal o ther c ultures. Wi th Gr eek myth, C olarusso s ees a sp ecific l ink w ith th e story of the goddess of love, Aphrodite, and her shepherd lover, A nchises. C olarusso a lso n otes parallels with Greeks tories a bout P rometheus (see Promet heus Bound), Cyclops (see Cyclops) and the Amazons.

Beyond t hat, h owever, C olarusso finds l inks with the Rig-Veda of ancient India, particularly with its hero, Indra. Other links seem to exist with Norse myths involving Odin and those telling of the World Tree Yggrasil, which has a pa rallel in the Lady Tree saga of the Narts.

Less certain, but nonetheless attractive given Colarusso's convincing but highly te chnical linguistic arguments in their favor, are links between the Nart sagas, Hittite myth, and the unknown but a ssumed mythology of the ancient Indo-European linguistic ancestors of all the peoples mentioned above. If this is the case, then at least some elements of the Nart Sagas have persisted for more than 5,000 years. Links with Turkic and Mongol mythic traditions also seem possible.

To illustrate the character of the Nart Sagas, I have chosen to su mmarize t wo stories that suggest links to the myths of other cultures: "Tl epsh and Lad y Tr ee" and the first fragment of "The Ball a d of Sawse ruquo." The first contains one of the links Colarusso identifies with Norse legend; the second seems associated with the Greek Tit an P rometheus's theĀ of fire f rom the gods and a lso i s r eminiscent of t he Su merian *Gilga mesh Ep ic*, when Gilgamesh and his companion Enkidu destroy the giant Humbaba.

As for the Narts themselves, they appear to be the sorts of protohuman that occupy the mythical "dream time"—as the Australian aborigines put it—that fe atured in t he origin my ths of m any ancient peoples.

Nemesianus (Marcus Aurelius Olympius Nemesianus) (fl. late third century C.E.) An African by origin, likely from Carthage, Nemesianus moved to Italy and authored Latin works on fishing (now lo st), h unting, a nd na vigation (now lost). Despite his disclaimer in the introductory s ection of h is longest-surviving w ork, t he *Cynegetica* (on h unting), t hat t his was t he o nly sort of poetry he could write or, indeed, wanted to, we also have four eclogues (poems with shepherds' conversations) that he penned.

While the *Cynegetica* has instruction in the art of hunting as its object, it also presents opportunities for lovely d escriptions of t he c ountryside and lauds the sport as an opportunity for increasingly urbanized Romans to benefit from contact with wild nature.

The eclogues, which have Virgil's *Ecl ogues* as their example, used to be attributed to Tit us Sicul us Cal pur nius, but it has become clear that significant novelty of theme and treatment differentiate N emesianus's p oems f rom t hose o f Calpurnius.

New Testament

Considered as literature, the 27 books of the New Testament r epresent a narrower range of literary types than the more expansive H ebr ew Bi bl e. The Hebrew Bible traces the history and development of a people; of their trials, tribulations, and triumphs; of their leaders, he roes, and he roines; and of their e thical and r eligious de velopment and understanding. Major portions of the document are verse compositions, and one c an oĀen trace whole stories or elements of those stories to analogous tales in earlier cultures.

The Hebrew Bible arrived at its final form by a slow process of accretion over a lmost two millennia. The composition of the New Testament's

content, by contrast, was the work of less than two centuries. It had a much more specific goal in v iew t han di d th e H ebrew Bible . F irst i ts authors and editors wished to preserve information concerning the life and teachings of Jesus Christ and his apostles. Biography, therefore, is a primary literary genre in the New Testament. Second, t he c ompilers of t he N ew T estament wished to underscore the global importance of the new religion that had c oalesced around the figure of Jesus. Therefore instructional and persuasive material is incorporated into its pages.

Whether or not the official position of the young church would ad mit the account of Jesus' resurrection from the dead as doctrinal remained a matter of individual conviction until the Council of N icaea (modern I znik, Turkey). There, i n 325 c.e., the literal resurrection became a matter of o fficial doctrine whose essential features a re preserved in the Nicene Creed.

The third objective of the works that came to be included in the New Testament was to t race the work of Jesus' followers and their successors in spreading the nascent faith from its place of origin in Palestine throughout A sia Minor, the Grecian a rchipelago, a nd t he W estern Ro man Empire. At first, as new churches were established at various lo cations, letters written from figures of aut hority in the young c hurch were sent t o congregations in other places, read out in public, and oĀen preserved as part of a library of papyrus scrolls t reated a s de votional l iterature. (See, for example, the Letter of Polycarptot he Philip pians [ca. ea rly second c entury c .e.] or the Lett ers of Ignati us [ca. late first or early second c entury c .e.].) The i nclusion of a b ody of important letters in the New Testament's official text t hus ma kes e pistolary p rose a n i mportant scriptural genre.

The never-ending tendency of religious communities t o s plinter, h owever, s oon made i t alarmingly clear that Christian communicants needed a n o fficial body of s cripture. P rogress toward t his goal ga ined i mpetus w hen, u nder the emperor Constantine, Christianity became the official religion of the Roman state. Whereas it was all very well for the members of peripheral religions to bicker a mong themselves ab out such matters a swhether or n ot their founder had literally been resurrected, the official state religion of Rome could tolerate no s uch divisions. The Council of Nicaea had a lready pronounced on this crucial matter, and in his Easter letter of 3 67 c. e., the b ishop of A lexandria, At hanasius, listed the books now incorporated in the New Testament a so fficial scripture. The Council of T rent confirmed A thanasius's cata bg in 1546 c.e.

In a ddition to the literary genres mentioned above, the New Testament also contains history, legend, p arable, or atory, s ermons, s hort s tories, and, p articularly in the Book of Revelation, prophecy. From the perspective of those who follow the Christian ethos but who have reservations about such matters as the Virgin Birth or the Resurrection, the New Testament a lso c ontains the literary genre of mythology.

Gospel of Mark

The o rder o f c omposition o f t he f our g ospels (from *godspel*: the A nglo S axon w ord f or "good news") is a matter of general agreement. The Gospel of Mark was the first to be written. Its author may ha ve b een t he J ohn Ma rk w ho p ersonally knew the apostles Peter and Paul. Mark, like all the rest of the New Testament, was written in the Greek language. Unlike the other New Testament books, h owever, Ma rk may ha ve had s ources i n the A ramaic language—the na tive to ngue o f Jesus. Mark's date of composition seems to ha ve been a bit later than 70 c.e.

Mark's g ospel ma y ha ve b een w ritten at Rome, where early Christian sources (Euse bius of C aesarea, P apias, a nd A ristion) r eport Mark to have been Peter's interpreter, clerk, and secretary. These early s ources make c lear t hat Mark did not personally k now Jesus but wrote down e verything that he learned f rom P eter. Modern textual critics suggest that as many as four d istinct sources m ay u nderlie M ark's received text. Mark has n othing to s ay c oncerning J esus' birth an d c hildhood, b ut r ather b egins h is account with Jesus' baptism at the hands of John the Baptist. Mark proceeds to trace Jesus' ministry through Galilee and elsewhere until his final journey to Jericho and to Jerusalem. Mark reports miracles of healing that Jesus performed, including driving out devils and the miracle of feeding a multitude with seven loaves of bread and a few small fish. He also reports a divine voice from a cloud identifying Jesus as the son of God.

Embedded i n M ark's t ext w e find t he short story of the beheading of John the Baptist. Mark also recounts several parables that Jesus used to teach those who had n ot been ad mitted into the ranks of his close disciples. A mong others, these include the parable in which he proposes that any bodily suffering while one is a live is better than the risk of going to Hell. Another familiar parable from M ark is one suggesting t hat a c amel can pass through the eye of a needle more easily than a rich man can enter God's kingdom.

Mark r ecounts J esus' te aching a t J erusalem. There he g ives h is v ision of the final days when the sun and moon grow dark, the stars fall, and the second coming eventuates. Thus, Mark also contains the literary genre of apocalyptic vision.

Dark forebodings of the coming death of Jesus grow more frequent as we reach Mark's 14th chapter. From that point, there follows the arrest and trial of J esus and, in chapter 15, h is crucifixion and entombment. In chapter 16, Mark r ecounts the story of J esus' resurrection, h is app earances, and his ascension into heaven. The book ends with the dispersion of the apostles to spread the good news.

Gospel of Matthew

Scholars have a ssigned the composition of the Gospel of Matthew to a period between that of Mark and ca. 130 c. e. A ntioch has been proposed as its place of composition, but no one is sure. The Book of Mark, however, is certainly one of the major sources of the Gospel of Matthew, as about 500 of Matthew's verses rest on just over 600 of Mark's. Textual critics have proposed two other sources for another 550 of Matthew's verses.

Students of religion ascribe the utmost importance to the Gospel of Matthew, considering it to be the fundamental work of the Christian religion. The work begins with a genealogy of Jesus, tracing his d escent t hrough t he pa ternal line—from Joseph through 14 generations to King David, and through 14 more to Abraham.

Despite t hat pa ternal g enealogy, Ma tthew recounts t he stories of M ary's m iraculous c onception of a d ivine offspring, of t he a strologers from the east who came to Herod's court in search of a newborn king, of the child's birth at Bethlehem, of t he family's flight to E gypt when Herod sought to assassinate the child and had all recently firstborn male children slaughtered, and of the angel r ecalling t he family to J udea, w here t hey settled in Nazareth.

There follows Jesus' baptism by John and then the n ew s tory o f S atan's 4 0-day tem ptation o f Jesus in the wilderness. Then, a Åer the arrest of John the Baptist, Jesus begins his ministry, calling for repentance before the imminent arrival of the k ingdom of H eaven. Ma tthew t races J esus' career through the Sermon on the Mount (a model for the literary category of homily) and his ministry at Capernaum and elsewhere-a ministry in which he heals t he si ck, r aises t he de ad, he als lepers, casts out demons, and encourages his disciples to do l ikewise. I n M atthew, to o, C hrist teaches in parables. The parables, and indeed the style of the entire book, benefit from Matthew's preference for d irect qu otation. M atthew also recounts Christ's fa iled a ttempt to e scape f rom the crowd that thwarts his solitude follows him a Āer the death and burial of John the Baptist, and the reader once more learns of the miracle of the loaves and fishes. Therea Äer, with minor variations, Matthew repeats in his own words Mark's account of Christ's passion, crucifixion, and resurrection. Matthew ends his book with Christ's appearances to t he t wo Marys and to h is disciples. On the last occasion, he charges the disciples with the mission of spreading his gospel.

Gospel of Luke

The Gospel of Luke, whose authorship is attributed with somewhat less conviction to Luke the physician at a pl ace u nknown, p robably d ates f rom between 100 and 110 c.e. Luke, too, used Mark for a source, following some 320 of his verses. Another p rimitive source—one n ot e xtant, b ut p osited to ha ve e xisted a nd c alled Q among b iblical scholars—is thought to have provided material for 250 verses. The other half of the verses in Luke are thought to be uniquely his own.

Luke is the most self-consciously literary of the gospels. A full-blown biography with interspersed verse p assages a nd a n em phasis o n i ts f emale characters, it begins with an address to a certain Theophilus-addressed as "your Excellency." That form of address suggests that Luke is attempting to instruct either a noble student or a patron. AAer that, Luke picks up the Christian na rrative a t a point earlier than either of his prede æs ors had done. He begins by talking a bout the parents of John the Baptist, a priest, Zachariah, and his wife Elizabeth, a couple who are childless and advanced in years. While Zachariah is attending to priestly duties one day, he is surprised by the appearance of the angel Gabriel. Gabriel explains that Elizabeth is going to conceive and bear a son who will be a predecessor of an even greater person.

Gabriel next appears to Mary, tells her Elizabeth's news, and informs Mary of her own role in the operation of eternal Providence. Mary, who is Elizabeth's cousin, goes to visit Elizabeth, and the fetus i n Elizabeth's w omb le aps for jo y. A t this point Mary speaks poetry, a paean of rejoicing at h er s election a s G od's i nstrument. Lu ke puts a similar passage in the mouth of Zachariah on the occasion of the birth of his son, John.

The m ost f amiliar v ersion of t he C hristmas story follows in chapter 2. So does a brief account of Je sus' childhood—though no me ntion of an Egyptian sojourn—ending with an a ccount of Jesus debating with the learned at the temple in Jerusalem and his parents' amazement.

Now t he na rrative le aps a head to a m oment immediately before Jesus' baptism at the hands of

John the Baptist and the descent, at that moment, of t he Hol y S pirit up on C hrist. N ext f ollow accounts of Jesus' teaching, healing, and preaching, and Jesus' selection of his apostles. Included as well is the account of Jesus' i nitial en counter with Mary Magdelene, who anoints and kisses his feet and washes them with her hair.

Luke recounts Jesus' acquiring 72 adherents who joyously go about exorcizing evil spirits in his name. He t ells the p arable of t he ma n w ho f ell a mong thieves with its consequent definition of "neighbor" as one who assists a nother. A Åer n umerous other parables and a p rediction of the world's imminent end, Luke turns his attention to Jesus' betrayal by Judas Iscariot, Jesus' arrest, his denial by the apostle Peter, and his trial and initial exoneration by Pontius P ilate. Kin g Herod t hen m ocks C hrist, a nd Pilate y ields t o the c rowd's dema nds f or C hrist's crucifixion.

Luke's account of Christ's passion is the most graphic in the g ospels, em phasizing a t i t do es Christ's forgiving nature in the story of the thieves who were both crucified with h im and brought into hi s fold. The Ro man s oldiers c ast lo ts f or Christ's garment. Joseph of Arimathea provides a tomb, and Christ is buried.

Luke g oes o n to e xplain ho w t he s tone w as rolled a way f rom t he t omb a nd ho w a n a ngel reported the r esurrection t o Mary Ma gdalene, Mary t he m other o f J esus, a nd J oanna. Lu ke details J esus' o ther app earances. I n Lu ke's v ersion, Jesus simply bids his apostles farewell without the fanfare of rising into the sky.

Gospel of John

The three preceding gospels, taken together, a re called the synoptic Gospels. If one looks (optic) at the three side by side (syn = together), they a re very much alike. The Gospel of John is different: It is a religious treatise of a high order of sophistication. It b egins at the b eginning of t ime and alludes t o C hrist a sth e L ogos—that i s, a s th e Word of G od, the active creative principle in the universe without which nothing would have hap-

pened. In John a re articulated the doctrines of necessary and salvific rebirth and of the love of God for the human r ace and h is willingness to adopt humankind i nto g odhead t hrough t he death of h is son and human participation in the possibility of Christ's resurrection.

The gospel a lso c ontains the wonderful a necdote of the woman at the well whose personal history of five h usbands Je sus re counts to her, a nd how h is k nowledge of t hat h istory s o c onvinced many t hat he w as the p romised M essiah. J ohn emphasizes Jesus' controversy with the Pharisees and how the Pharisees plotted among themselves to de stroy him. As in the other gospels, he he als the sick and raises Lazarus from the dead. Here, in meta photic anticipation of h is death and b urial, Mary annoints Jesus' feet with a costly ointment, nard, and wipes them with her hair.

Jesus' entry into Jerusalem on a donkey that symbolizes his humility is reported. So is the Last Supper and the duplicity of Judas Iscariot in betraying him. The atmosphere in the gospel grows t enser a st he m oment of Je sus' a rrest approaches. That a rrest occurs in John's 18th chapter, in which Peter fulfills Christ's prophecy th at h e will th rice d eny J esus be fore cockcrow.

In chapters 19 and 20, the stories of the crucifixiona ndr esurrection are repeated in versions that a re m ore c ircumstantial th an th ose of th e other go spels. In the final c hapter, J esus ma kes three appearances aÅer the tomb has been found empty. F or C hristian b elievers, t hese a re t he greatest stories ever told.

Mythology and the Acts of the Apostles

For the majority of the ancient and the modern world's p opulations who d id and do n ot regard the s tories a s f actual, the ac counts reported in Scripture ar er eplete w ith representatives o f another literary type—the myth. Some Christian apologists have been disingenuous enough to suggest in print that the events reported in the gospels w ould n ot, in t he early first cen tury, h ave made any sense if they were not literally true.

In assessing that claim, it is well to remember that for some 200 years prior to the beginning of the Common Era, Palestine had been occupied, first by the military heirs of Alexander the Great and then, succeeding them, by the armies of the Roman Empire. Both the Greeks and the Romans were polytheists who considered the Jews' monotheism to be stiff- recked. Moreover, under the Greeks and their surrogates an active policy of hellenization h ad long b een i mplemented i n Palestine. W hile suc h e fforts m ay we ll h ave produced little effect on the priestly classes of the Jews, among the common folk who were the early adherents of Christianity, it seems hard to imagine that polytheism or superstitions rooted in p olytheism di d n ot ma ke a t le ast s ome inroads.

Ancient Greek religion is full of divine paternities, unusual births like that of Dionysus, and resurrections. A pollonius of Tyana, an historical figure, was credited with restoring life to the dead and was himself reported to have been resurrected. (See Life of Apollo nius of Tyana) Ancient Christian legend also shares numerous commonalities with th e r eligion of a ncient Egypt, a nd Egypt was the crucible of early Christianity. Osiris, for example, had b een raised from the dead, and both the g oddess Isi s a nd t he Gr eek D iana o f Ephesus displayed attributes that paralleled qualities later attributed to t he Virgin Mary. N onbelievers, in any case, are likely to treat at least some of the stories in the four gospels as mythical.

With The A cts of t he A postles, we move i nto new territory. I ts ma terial i s both na rrative a nd anecdotal. Some commentators have even found epic qualities in its pages. The Acts are thought to have been written by the same Luke who wrote the gospel and to have been written around 90 c.e.

Chapter 1 through the first several verses of chapter 6 reports the doings of the Christian faithful in the first year or two following Jesus' crucifixion. The n ext two-plus c hapters t race the n ascent r eligion's g rowth in P alestine. Christianity's sp read t hrough A sia M inor o ccupies the end of chapter 12 through the beginning of chapter 16. A reader then follows the career of Paul from the time of his conversion from Christian p ersecutor to C hristian ad herent through his missionary career in Macedonia and Greece. At chapter 20, Paul journeys to Jerusalem. There he is arrested, imprisoned, and, because he successfully pled h is Ro man c itizenship, sh ipped off to Rome for judgment. He and his shipmates encounter a terrible storm and driĀ for two weeks before fetching up on an Adriatic strand. There, seemingly m iraculously, he s urvives a v iper bite.

Arriving in Rome at last, Paul pleads his case before t he J ewish community t here. Though some Jews are convinced by his arguments, many are not, and Paul finally announces: "The Salvation of God has been sent to t he Gentiles." The last v erse r eports t hat he r emained in R ome preaching C hristianity unhindered for t wo years.

Letters and Revelation

The literary mode of the New Testament shiAs at this point to the epistolary. Some 21 books compose the New Testament's corpus of letters. Of these, 10 can confidently be attributed to P aul, and consensus has emerged about the probable dates of many. These include h is two letters to the Thessalonians (53 c. e.), t wo to t he C orinthians and one each to the Galatians and the Romans (57-58 c. e.), a nd h is le tters to t he Colossians the Ephesians (this last attribution is the s ubject o f c ontroversy) (62-63 c .e.). They also include a letter to P hilemon and two written from prison to the Philippians (62-63 c. e.). The Pauline letters, which make up the earliest extant d ocuments of t he C hristian r eligion, antedate t he g ospels. A mong t hem, 1 C orinthians is the first a uthoritative s tatement o f Christian doctrine on matters including immortality, charity or Christian love, and the earliest extant accounts of the Last Supper and the Resurrection.

Though s ome p assages i n t he t wo le tters to Timothy and one to Titus (all 65c.e.) may have been written by Paul, no agreement has emerged concerning the identity of their primary author. A si milar situation e xists with r espect to J ames (uncertain), Jude (ca. 100c.e.), 1 and 2 P eter (66and 150c.e., r espectively), and the three letters bearing the name John (ca. 100c.e.). Hebrews—a sermon in letter form—probably was written ca. 75c.e.. H ebrews is especia lly interesting as i t blends together aspects of Judaism and late Alexandrian Platonism.

These l etters fa ll i nto s everal subc ategories. Letters such as those of Philemon and the third letter of John are simply personal. Others are formal treatises in letter form. These include all the letters to the Thessalonians and the Corinthians, 1 John, James, and H ebrews. On e may b e su re that, a side from such letters as were exclusively personal, these communications became parts of the d evotional l ibraries of the c ongregations to which they are addressed.

The final book of the New Testament, Revelation, is a work sui generis. Unique in the Bible, it contains prophetic, foreboding dream visions of the end of the world and the final triumph of Christ over evil with the establishment of the New Je rusalem, the e arthly d welling of th ose who w ill occ upy heaven—those wh o t hrough their faith in the incredible qualified as brothers and sisters in Christ with the reward of direct participation in godhead.

Nicander of Colophon (fl. ca. 146

B.C.E.) Greek poet

A Greek physician, grammarian, and poet of the Helle nisti c Age, Nicander's work survives in a pair of d idactic, h exameter ep ics, the *Theriaka* (on p oisonous serpents and beasts and remedies for wounds received from them) and *Alexipharmaka* (on a ntidotes). N onetheless, the surviving titles of his otherwise lost works suggest that his poems may have been important sources for such later L atin poets a s O vid, V ir gil, a nd o thers. Nicander is known to have penned a mythological epic that Ovid used in his *Met amorp hoses*, a poem on farming later reflected in Virgil's *Geo rgics*, a poem concerning Aetolia (*Aetolika*), and a poem on beekeeping.

Nicomachean Ethics, The Aristotle (ca. 323 B.C.E.)

Ari st ot l e's son Nichomachus probably compiled The N icomachean Ethics-one of t hree e thical treatises deriving from the thought of Aristotleshortly a Aer t he p hilosopher's d eath. Though a specific date cannot be a scertained, Nicomachus himself is known to have died young in battle, and he must have done the work fairly soon a Aer his father died in 322. It seems that Nicomachus drew on lecture notes and on a t reatise, the Eudemian Ethics-compiled by Aristotle's pupil Eudemuswhich represented a n earlier stage in h is father's thought. A ristotle's th ird d iscussion o f e thics, entitled Magna Moralia (Great Ethics) is probably a compilation d rawn from the other two works by a suc cessor m ember of A ristotle's p eripatetic school of philosophy.

Aristotle de fines h uman b eings a s p olitical animals. F or h im, then, th e s cience o f e thical human behavior belongs to the realm of politics, and polities like the city-states of Greece are organized to promote h uman happ iness. To ac complish that, however, one first needs to k now what makes p eople happy. N ext, o ne n eeds to k now what so rts o f socia l a rrangements a nd i nstitutions maximize the probability of happiness.

In the first book of *The Nicomachean Ethics*, Aristotle proposes that happiness results from the exercise of the virtues in human nature. These are of two sorts, intellectual and moral virtues, both of which derive from the human soul. In addition to a nimating the processes that su stain h uman life, the soul contains the rational intellect, from which flow the intellectual virtues. The soul also contains the human appetites and passions; these determine the s econd part of t he s oul, h uman character. W hen f ree h uman w ill subo rdinates appetites a nd pa ssions to t he p ower of r eason, moral virtues result.

The second book examines moral virtue more closely; this Aristotle defines as habitually behaving with moderation—observing the golden mean. Those who legislate for the state assist individuals in achieving happiness by making laws that encourage m oderate a nd r ational b ehavior. Pa rents a ssist ch ildren i n achieving ha ppiness by training them to have good habits that are associated with p ositive mor al qu alities. "We b ecome temperate," s ays A ristotle, " by abst aining f rom pleasures." We c an, likewise, "best a bstain f rom pleasures when we become temperate." Moral virtue r esults f rom hab itually ma king tem perate choices. The virtue of courage is, for example, the mean b etween fe ar that leads to cowardice a nd rash overconfidence. Liberality or generosity, a virtue, falls halfway on a s cale between prodigality and meanness, both vices. The virtue of magnificence falls b etween the vice of excess and tastelessness and that of paltriness; the virtue gentleness between irascibility and lack of concern; truthfulness between boastfulness and self-depreciation; wittiness b etween b uffoonery a nd boo rishness; friendliness between flattery and surliness.

The third book opens with a consideration of free will and then, as the fourth book also does, examines in greater detail each of the virtues listed in the second book. In the fiĀh book, however, a s eparate e xamination of t he v irtue of j ustice occurs. This opens a three-book section of the Nichomachean E thics that has been taken from the e arlier Eudemian E thics. P erhaps b ecause actions can be just or unjust, but not oĀen halfjust, A ristotle elected to e xcept justice from h is general principle of d efining virtue as conforming to a mean between polar opposites. In a ny case, Aristotle considers dealing justly with others and with oneself as the chief virtue. One can also, Aristotle continues, be unjust in one of two ways: one can either behave unlawfully or unfairly. The best judges are those who, in thorny cases, can properly determine what is fair and equitable and sometimes a rrive at solutions to disagreements t hat b oth p arties c onsider j ust. I n s uch cases, t he v irtue o f j ustice can c onform t o a mean.

Aristotle's discussion of justice concludes h is consideration of the moral virtues or "the virtues of the character," and in the sixth book he focuses his a ttention on t he i ntellectual v irtues. These virtues h e a ttributes t o two s ubsections of the soul's rational capacity. He labels these divisions the "scientific f aculty" (that i s, t he f aculty o f knowing) and the "calculative" or the "deliberative faculty." The function of both is to ascertain the truth. Associated with these faculties are five qualities that help determine what is true: art or technical sk ill, s cientific k nowledge, p rudence, wisdom, an di ntelligence. The ba lance of t he sixth book looks closely at the role each of these qualities plays in making the good choices that in turn lead to human happiness. Most important among these qualities is prudence, since it proves most he lpful i n a scertaining t he m ean b etween the excessive and the insufficient.

The seventh book goes off on a bit of a tangent. It explores the weakness of human will as it relates to the question of moral virtue. When willpower fails, Aristotle thinks, it generally does so owing to a person's being tempted by pleasure. Yet pleasure is n ot, i n a nd of i tself, i ntrinsically bad—a view that Aristotle develops at some length.

Friendship is the topic treated at length in the eighth a nd n inth b ooks. The g ist of A ristotle's

argument involves the contribution that friendship makes to o ne's behaving in a virtuous fashion. Fr iends mo del v irtuous b ehavior, a nd friendship e ncourages th e m utual em ulation o f virtues observed in the friend. This chapter seems to b e o ne o f t he m ost c ongenial a nd a ttractive portions of the document.

The tenth and final book begins with another and closer consideration of pleasure as it relates to e thics. Then A ristotle t urns h is a ttention to speculative wisdom, in his view the highest virtue of all. Exercising this virtue leads to a direct contemplation of truth. Contemplating truth is the a ctivity th at p roduces th e h ighest h uman happiness. P eople c annot a lways a chieve t his virtue. Those wh o do c annot e xercise it at a ll times and i n a ll pl aces. W hen, ho wever, t hose with the capacity do sometimes achieve the contemplation of t ruth, t hey a chieve a c ondition almost godlike.

Horace R ackham, a notable translator of *The Nichomachean E thics*, obs erves t hat, t hough i t does not do so, at this point the document should return to the issue of politics and point out that the business of politics should be or ga riz ing the state in such a way that the greatest possible number of its citizens will attain the virtue of speculative wisdom and the capacity to use it.

Nihon Shoki (Chronicles of Japan) (720 c.E.)

The second oldest work in surviving ancient Japanese literature, *Nihon Shoki* takes a more scholarly approach to the presentation of Japanese history that d oes i ts p rede œs or text, *Kojiki*. U nlike *Kojiki*, which was the work of a single hand, *Nihon Shoki* was a compilation undertaken by a doz en noblemen, each of whom recorded episodes in the national h istory f rom s ources m ostly n ot n ow extant, though *Kojiki* was among them. Though the first version appeared in 720 c.e., the completed, official version d id n ot r each its final form until 40 years a Åer the project's inception. Moreover, the compilers of *Nihon Shoki* both wrote in Chinese and used Chinese source material. Only *Nihon Shoki*'s songs have recourse to the modified application of Chinese characters to represent Jap anese speech as described in the *Kojiki* entry. P rince T oneri, t hird s on o f t he em peror Temmu, s eemst o h ave h eaded u p t he e ditorial project.

When p resenting l egendary ma terial, *Kojiki* presents a single version of events. The literary historian Donald Keene reports that, by contrast, *Nihon Shoki* may give as many as 11 variant accounts of a myth. The *Nihon Shoki* also includes material from foreign sources—particularly from Paekche, o ne o f t hree kingdoms t hen o n t he Korean Peninsula.

From the perspective of historiography, *Nihon Shoki* is very precise. Whereas *Kojiki* approximated a nnual d ates by nor malizing t hem t o c orrespond with the 60-year cycles of Chinese history, *Nihon Shoki* oĀen g ives d ay, m onth, a nd y ear, beginning w ith the c oronation of t he emperor Jimmu in 660 b.c.e. The accuracy of these dates is oĀen dubious, however.

AĀer dealing with much of the same legendary material t hat app ears in t he first book of *Kojiki* during the age of the gods, *Nihon Shoki* considers historical personages. Among these we find Prince Shōtoku (574–622), w hose m other, ac cording to the account, bore him painlessly in a stable. He is revered as the founder of Japa nese culture and was worshipped a Åer h is death as o ne responsible for miracles. H e w as a lso t he first J apanese perso n about whom a biography was written. He is credited with having established a polity along the Confucian lines of the Chinese, with having devised a constitution with 17 articles to guide the state, and with having fostered the spread of Buddhism (see Buddh a a nd Bu ddh ism) in Japan. The constitution itself draws its articles both from the Buddhist system and from the *Analects* of Confucius.

Nihon Shoki relies heavily on Chinese historical documents to fill in early epochs when facts about Japanese history were scant. From the perspective of actual Japanese history, *Nihon Shoki*, despite its scholarly provenance, cannot be relied upon except for the hundred years leading up to its completion.

Octavia Seneca (ca. 65 C.E.)

Though posterity has preserved fragmentary evidence for a dozen Roman plays on native Roman subjects, only one such play survives in its entirety. That play, *Octavia*, has customarily been listed among the works of Seneca, though a scene that accurately de scribes t he de ath o f t he Ro man emperor Nero, whom Seneca predeceased, makes Seneca's authorship unlikely.

The history of the Roman imperial family has regularly provided grist for the mills of writers, and that of R ome's fourth and fiAh emperors, Claudius a nd his s tepson N ero, i s f raught with melodramatic material. Claudius reluctantly had his third wife, Messalina, put to death for treason when she took another husband during Claudius's a bsence from R ome. The f ollowing y ear, Claudius married the widow of Cneius Domitius Ahenobarbus. Her name was Agrippina, and as empress, she a tonce undertook a c ampaign to have her son by her first marriage succeed Claudius as emperor. Her efforts succeeded, and Claudius adopted Lucius Domitius, renaming him Nero. Agrippina bound Nero more tightly to the imperial family by arranging a marriage between him and Claudius's daughter, Octavia.

With t he s tage of h istory t hus c arefully s et, Agrippina poisoned her husband on October 12, 54 c.e. On October 13, the 17-year-old Nero succeeded to the world's most powerful throne, and Agrippina, with the help of Nero's tutor, Seneca, and that of the captain of the Praetorian Guard, Sextus Afranius Burrus, became for a time the de facto r egent of the Roman E mpire. W hen Nero fell in love with Poppaea—a lovely woman of bad reputation—and w ished t o divorce O ctavia, the imperious Agrippina objected. Annoyed with his mother's dom ineering ways, N ero a rranged her murder. Then O ctavia w as f alsely ac cused a nd convicted o f ad ultery. N ero d ivorced a nd ba nished her and subsequently arranged for her murder as well.

The tragedy of *Octavia* picks up the story at the point when Poppaea has a lready been installed as Nero's c oncubine. O ctavia en ters, l amenting her father Claudius's death by the hand of Agrippina, and s he b ewails O ctavia's o wn t reatment at t he hands of her h usband's mistress Poppaea. In long set speeches that sometimes have more in common with declamation than with dramatic performance, Octavia a nd her n urse c ommiserate a bout t heir woes. B eyond t hose a lready l isted, O ctavia a lso mourns t he m urder of he r brot her Br itannicus, who had been heir apparent before Nero's nomination. She lists Nero's crimes, including the murder of his own mother. The nurse does her best to comfort Octavia, citing historic and mythical examples of women who suffered and triumphed.

Then the chorus enters and reviews the sorry history of the women of the families of Claudius and Nero, particularly that of Agrippina. Then, abruptly, Seneca takes the stage. He thinks about his current unhappy state of affairs as a former power too near an unappreciative monarch, and regrets the loss of his former happiness while he was an exile on Corsica. He moves on to consider the history of the world and the way it moved from p eace an d justice i n the g olden a ge of Astrea—a maiden represented by the constellation Virgo and identified with justice.

Nero enters, and Seneca attempts to school the profligate r uler in a le ader's responsibilities. The old scholar's words fall on empty ears, however, as the p roud a nd i mpious r uler a sserts e xecutive authority in all matters. Their conversation then turns to love and wives, and while Seneca tries to convince Nero to found his hopes for a successor on O ctavia, Ne ro pr aises the pre gnant P oppaea. Wearied w ith S eneca's d ull c ounsel, Nero s uggests that the very next day would be a good one for his nuptials with Poppaea.

Now the ghost of Agrippina enters, bearing a flaming t orch. S he has c ome f rom t he u nderworld to c urse the union of Nero and Poppaea. She prophesies that the day will come when Nero will "give his throat to h is enemies, a bandoned and undone and stripped of all." On this quotation rest principally the arguments against Seneca's authorship of the play. It strikes me that the comment is entirely appropriate as it reflects the end of many deposed monarchs of ancient times. It may be that the naysayers protest too much in their objections to Seneca's authorship.

In a ny case, Ag rippina's g host r egrets t hat she ever bo re N ero. She w ishes t hat i nstead she had been t orn to p ieces by wild b easts a nd h e in t he womb w ith he r. T oo a shamed to r emain l onger above ground, she returns to her place in Tartarus the lowest depth of Hell.

The n urse i nterprets P oppaea's nightmare, trying to p ut a ro sy i nterpretation on everything. Unconvinced, Poppaea prepares to do s acrifice and to pray. A chorus of Roman women flutters about s aying n ice t hings about Poppaea's coming nuptials.

We then learn from a messenger that the majority of the citizens of Rome, utterly offended by Nero's behavior, are preparing to restore Octavia to her rightful place and role. Those citizens, however, a re put down by military might.

The prefect of Rome enters to r eport on the unrest in the city. Nero blames Octavia and, to his prefect's horror, demands her execution. The emperor o rders t hat she be ex iled and, o nce arrived, be slain.

Octavia is dragged off prophesying her o wn end. The chorus comments on her fate and on the way the women of her house seem to lie under a curse that passes from generation to generation. ode

Meaning simply a *song*, in ancient times the ode developed i nto a f orm of high poetic art, oÅen ornamental a nd c omplex. In a ncient verse, t his form took on regularity as it was composed of a strophe (a unified group of lines on a given subject), an antistrophe (a group of lines identical in form to the strophe but with a different message), and an e pode (a verse with a different structure whose co ntent m ediates b etween s trophe a nd antistrophe).

The Greek poet Pindar is at once regarded as the originator of the o de form in the Western world and as its most talented Greek practitioner. Pindar employed the form as described above to sing the praises and to celebrate the exploits of the winners of horse races and athletic contests (see vict ory o des). Pindar wrote h is most famous ode. "Olympian I," for the Si cilian r uler of the city of Syracuse, Hieron, on the occasion of Hieron's horse w inning the race att he Olympian games in 476 b.c.e. B oth S appho and Al caeus also employed the form, as d id ma ny o thers of lesser n ote. I n all the foregoing cases, the poets intended their odes to be sung and accompanied by stringed instruments.

The m ost g iĀed poet of ancient R ome, Ho rac e, composed four books of 103 odes under the Latin title *Carmina* (Songs). Although Horace did not intend his works to be instrumentally accompanied or sung, he nevertheless achieves in them a notable m usicality. That me lodic qu ality r esults from variation of meter—he uses 19 different ones, all b orrowed f rom t he Greeks—and h is hap py choice of language. He suits both h is vocabulary and his meters to the mood of each poem. Generally, too, his poems are addressed to a reader, a listener, a god, or even inanimate objects. His various subjects include moral advice, love, good food and fellowship, politics, regret at the brevity of human life, and many others. (See Horace's *Odes*.)

In ancient China, one of the foundational documents of Chinese Confucianism, the *Boo k o f Odes* (*Shi jing* or *Shih ching*) is a collection of 305 songs in four books dating to 700–600 b.c.e. At least five of t he s ongs i ncluded r eputedly were composed during the Shang Dynasty (ca. 1600ca. 1028 b.c.e.). Chinese odes, too, were originally composed for musical accompaniment. Reputedly s elected by C onfucius h imself f rom a mong 3,000 c andidates, t hese pre cious relics of a n age long gone s erved four main functions. Those in the first book made verse reports to the emperor about the lives and customs of common people from ar ound the feudal states and provided an index of how well the local nobility was ruling. The second and third book respectively contained odes used to entertain at ordinary occasions and at conventions of feudal nobility. The fourth contained o des t o be sung at religious sacrifices. Other topics of Chinese odes included love in all its m anifestations a nd co nsequences, w arfare, nature, an tifeminist di atribes, p olitics, l aw, an d the early Chinese view of the nature of deity.

Among t he r emnants o f ancient l ibraries unearthed in the M iddle E ast, si milar p oems address such members of the pantheon of Sumerian and Babylonian deities as the love go ddess Innin or Innanna.

Throughout the world, intentional imitations of a ncient o des or poems and songs resembling them have periodically enjoyed great popularity, as they d id d uring the Eu p pean Renaissance. Even i n p eriods when po pular t aste t urns i n other directions, odes continue to be composed sometimes by aut hors w ho a re u naware t hat a long tradition precedes them.

Odes Horace (Books 1–3, 23 B.C.E.; book 4, ca. 13 B.C.E.)

As H or a ce's r ecent t ranslator, N iall R udd, explains, H orace t ook pride i n b eing t he first Roman to write a significant body of lyric poetry, self- consciously modeling his *Odes* on Greek literary forebears. His exemplars included such early Greek lyricists as Al ca eus, A nacr eon, Sa ppho, and P indar, a nd t he m eters H orace em ployed echoed those his models had used.

Most of the poems in Horace's four books are deeply personal. He offers advice to friends, including in his counsel morsels of philosophy from such Greek thinkers as Epicur us or Pl at o. Some of them appear traditionally religious—as was Horace's own public religious stance, e ven though privately he seems to been a follower of Epicurus. An eighth of the poems in the first three of Horace's books of o des stem from the poet's nationalism, and in those 11 patriotic poems one particularly feels Pindar's influence. Other poems concern love—an emotion to ward which Horace displays a wistful and ironic humor. As in Anacreon, one can find relief from lovesickness in drinking and in the musical qualities of poetry itself.

Book 1

The first book of o des is de dicated to H orace's patron, Maecenas, whose generosity and giĀ of a famous Sabine farm had freed H orace to f ollow his poetic program without fear of want and without u nwelcome d istractions. The first od e (1.1) gracefully and gratefully a cknowledges that giĀ and promises that if his poems win his patron's approval, and if Maecenas ranks them with those of Hor ace's G recian for ebears, Hor ace will s oar aloĀ and bump against the stars.

The second ode (1.2) is addressed to August us Ca esa r, who had offered Horace the post of private secretary to the emperor—a post that Horace had declined. A Āer a l ist of the natural and civic disasters that have afflicted Rome, the poet addresses the leader who at last has put everything right the emperor, father, and first citizen, Augustus.

Ode 1.3 is addressed to the premier poet of the Roman state, Virgil, who is off on a journey to Greece. The poem opens with a prayer for Virgil's safety, a nd t hen r ecounts a l ist of na tural a nd mythical d isasters, m ost of them t raceable to human folly and to hubr is—overweening human pride—that will not let Jove set aside his punishing thunderbolts.

The three dedicatory poems finished, Horace turns to his c ollection p roper. The f ourth o de contrasts the welcome arrival of spring with the inevitability of death and the absence of springtime j oys thereaĀer. The fiĀh add resses a f alse girlfriend, Pyrhha, in the arms of a new lover. Its closing l ine s uggests t hat t he ji lted lover has resolved to drown himself. In the sixth ode, Horace de clines to si ng t he p raises of t he w arlike Roman general Marcus Vipsoricus Agrippa (63– 12 b.c.e.). The poet's talent, he insists, is too weak for that weighty subject. More suited to h is p en are "drinking b outs" and "fierce g irls" c lawing young men with their fingernails.

Ode 1.7 ostensibly will leave it to other poets to sing of far-off places famous in history and legend. Horace is the poet of Rome, wine will drown sorrow, and the Tibur is the river Horace loves. Teucer, the Trojan, now confounds the poet's opening remarks by app earing in the poem. H e is a lso drinking as he prepares to lead his followers to a new land on Cyprus.

In the eighth o de, H orace r eproves a g irl named Lydia because h is friend Sybaris's adulation of her has destroyed h is courage for martial exercise a nd r isk. The n inth o de su ggests t hat winter ma kes p eople m erry because it r eminds them to enjoy life while they can. The tenth is a hymn t o M ercury. Horace is the source of the phrase *carpe d iem*, a nd j ust a s h is f ourth o de implied that subject, Od e 1.11 m akes it ex plicit: Seize the day; tomorrow may not come.

Though Horace's principle of thematic organization (if there is one) is not always clear in his

474 *Odes*

odes, his hymn to Mercury in the 10th ode seems to a nticipate t he 1 2th, i n w hich he si ngs t he praises of go ds and heroes. He begins with an invocation of t he M use of h istory, C lio, w hich becomes the first of a series of rhetorical questions in w hich t he p oet s eeks a sub ject. H e decides that praising the gods is his first responsibility, and he does so. That done, the poet once more hesitates.

Horace's s ubject ha s sh iAed f rom mythic to Roman history, and he wonders where to begin. The alternatives he considers span Roman history from its beginnings to the elevation of Augustus Caesar. The poem ends as a prayer to Jupiter to en dorse A ugustus a s h is v iceroy t hroughout the world.

Ode 1.13 concerns jealousy, and 1.14 addresses a ship. Scholars and readers have variously interpreted what Ho race meant by the ship. Though that issue remains unresolved, the poem is clearly based on one by A lcaeus. The 15th o de g lances back at the Trojan War and at the sea god Nereus's prophecy concerning Troy's fall.

Ode 1.16 addresses a goddess lovelier than her lovely mother-perhaps one of the Muse s. He asks that she condemn his angry satires and help him achieve a sweeter poetic voice as he forswears his earlier invectives. The following poem-which is among Horace's most beautiful-is an invitation to join the poet at his country estate and enjoy its pleasures. By seeming association, the next poem initially c elebrates t he p leasures of w ine, but it ends by warning against wine's dangers. The 19th ode r ecords t he poet 's infatuation w ith a g irl named Glycera. The 20th invites Maecenas to join Horace at the Sabine farm, and the 21st encourages young people to si ng the praises of the deities Diana, Cynthius (Apollo), and Latona, and to pray to Ap ollo t hat he w ill protect A ugustus a nd t he Roman people from famine, warfare, and plague.

In the 22nd ode, Horace celebrates the salutary effect of h is love for a w oman na med L alage i n helping him lead a pure life and in protecting him from m any d angers. In the 2 3rd, ho wever, h is amorous attention has shiĀed to Chloe.

The m ood o f O de 1 .24 d arkens r adically a s Horace mourns the death of his good friend and Virgil's, t he c ritic Q uintilius V arus. The p oet advises that patience will alleviate the loss that no one can restore. Grief is replaced in the next ode by wistful melancholy as the poet reflects on the circumstances of an aging courtesan, Lydia. Less and less oĀen do impatient lovers accost her, and the day is not far off when her own lust will rage unsatisfied.

In 1.26, the sp eaker of the poem i mpatiently awaits the preparation of a garland for his beloved Lamia. O de 1.27 r ecounts a d rinking pa rty a t which the sp eaker entices a c ompanion to na me his beloved. When the friend does so, the speaker commiserates, telling the lover that he is caught in a whirl pool. The girl is a witch. The lover will not easily escape her toils.

Another funereal poem, Ode 1.28 is addressed to the drowned Archytas. AÅer the usual observations on the inescapability of death, the drowned person spea ks, a sking passersby to b ury h is washed-up bones. His spirit can then rest, and the benefactor w ill enjoy ble ssing. I f t he pa sserby neglects this kindness, ill luck will follow him. The deceased b egs f or " three handfuls of dust"—a symbolic burial that will release his spirit.

The n ext o de r eproves a p hilosopher w ho wants t o t rade h is l ibrary for a Spa nish b reastplate, a nd t he o ne t hat f ollows, O de 1.30, c alls upon the goddess Venus to come and pay tribute at the shrine of the poet's beloved Glycera. Horace asks Venus to bring with her Cupid, the Graces, and Mercury.

Ode 1.31 calls upon A pollo to g rant the poet not lands and riches but, instead, the blessing of enjoying what he has in good health and a dignified old age still filled with music, by which Horace a lso m eans p oetry. I n t he following p oem, Horace invokes his "Greek lyre"—his talent—calling for a Latin song. He alludes to his predecessor poet a nd m odel, the G reek p oet A lcaeus, a nd praises t he ly re t hat s ymbolizes h is o wn p oetic talent and achievement.

Horace steps down from the loĀy sentiment of the foregoing poem as he traces the complexities that embroil those lovers whose beloveds love others. He ends Ode 1.33 with the confession that he, too, had been smitten with the charms of a freedwoman when a "superior mistress" had shown an amorous interest in him.

Ode 1.34, reflects on Horace's transitions from religion to philosophy and back again to religion. He also considers the power of the gods to reverse or exchange the fortunes of the most and the least for tunate. This reflection leads the poet to invoke the goddess Fortuna herself in Ode 1.35. He o bserves t hat e veryone pr ays t o her-the lowly as well as those who wield power. "Ruthless Necessity," says H orace, a lways p recedes F ortune. H ope a nd L oyalty ac company her a nd remain with her regardless of Fortune's granting or denying ble ssings. H er h uman w orshippers, however, a re u nreliable. Following t hose r eflections, Horace addresses a prayer to the goddess. He prays that she will protect Augustus Caesar as he leads a military expedition to Britain, and that s he will g rant h er si milar ble ssing to t he young soldiers of the empire who are elsewhere engaged. Then the poet reflects on the shame that Rome ac cumulated in her r ecent civil wars. He hopes t hat the u nworthy s words wi th w hich brother k illed brot her w ill b e me lted do wn, forged anew, and used against more appropriate enemies.

The 36th ode of the first collection celebrates the h appy r eturn o fa traveler—probably a soldier—from S pain. The p oem i ntroduces t he next one, which begins by celebrating the victory of the Romans over Marc Antony and Cleopatra at the B attle of Actium (29 b.c.e.). Horace then recounts C leopatra's flight a nd her subs equent suicide. The poet admires the queen's courage in handling the venomous snakes that killed her and her p ride i n r esolving to d ie r ather t han " be stripped of her royalty."

The final ode of the first collection addresses a servant and asserts the poet's preference for plain living. It a lso implies his happ iness a s he si ts drinking in an arbor on his estate.

Book 2

The introductory ode of the second of Horace's collection is a reflection upon a work by Horace's fellow poet, the critic, tragedian, staunch repub-

lican, former soldier, and historian Gaius Asinius P ollio. H orace ha s b een r eading P ollio's history of the Roman Civil Wars, and the opening lines of the ode sound a w arning. Pollio is treading on hot ashes. His pointed commentary and republican viewpoint a re d angerous. N oting Pollio's triumphs as a defense attorney, a n orator, and a victorious leader, Horace suggests that the h istorian r eturn to w riting t heatrical tragedies.

A few l ines c onvey t he r ealistic i mages t hat Pollio's *History* calls up in Horace's mind. They in turn lead him first to consider the attitudes of the gods t oward re cent R oman h istory a nd t hen to mourn t he c arnage. H aving g rown to o s erious, Horace reproves his muse for making him sound more like Si monides of Ceos than like the love poet that Horace would prefer to be.

Ode 2.2 addresses the wealthy Sallustius Crispus, pr aising h im for understanding t he t rue value of money. Horace urges the reader to avoid greed. Virtue—by w hich H orace m eans ma nly and appropriate t hought a nd behavior—appears only in the person who can look at "heaps of treasure" and pass on without a qualm.

Seizing the day and making the most of joyful life is the theme of the following poem. AĀer that, Ode 2.4 encourages "Phocian Xanthia" not to feel ashamed for loving a slave girl. She m ight be the daughter of i llustrious pa rents, b ut i n a ny c ase her comportment testifies that she is of respectable birth.

Ode 2.5 begins with a reflection on the behavior of a young heifer not yet ready for breeding. It becomes clear that the poet really has in mind a woman he has mentioned before, Lalage. It seems she will soon marry. As the poem ends, however, Horace s hiĀs to c onsidering t he e ffeminate appearance of a young man, "Cnidian Gyges."

The poet confides his preference for a burial place to a friend, Septimius, in Ode 2.6. Horace hopes to b e bu ried i n l ovely Ti voli (ancient Tibur). A nother e pistolary O de 2.7, i nvites a n old c omrade i n a rms, o ne P ompeius, to v isit Horace on his estate. We learn that the friends had fought together i n Greece during the civil wars. The god Mercury, however, had conducted

476 Odes

Horace through the enemy ranks and out of the battle. The g od c oncealed t he p oet i n a den se cloud, a nd P ompeius r emained i n t he b attle. Horace i s jubilant at t he prospect of a reunion with his friend.

A heartbreaker, Barine, is the addressee of Ode 2.8. All the oaths that she makes to her ad mirers, she breaks. But the gods do not punish her. Rather, she grows more attractive and prospers. Generations of young men worship at Barine's feet. Mothers, young brides, and the old men worried about what their sons are doing with their money—all have reason to fear Barine's appeal.

The ninth ode of the second collection reproves a fellow poet, Valgius, for too long lamenting his lost love, Mystes. Nothing else in nature mourns forever. Hor ace a dvises him to dr op his s orrow and sing of the victories of Roman arms.

Ode 2 .10 adv ises H orace's f riend L icinius t o steer a middle course and make his life an example of the golden mean. Ill fortune does not last forever; neither does the good. Apollo sometimes grants his inspiration, sometimes withholds. Wisdom d ictates t hat c anny s eamen sho rten s ail before too favorable a breeze.

"Seize t he d ay" is o nce ag ain the subject of Ode 2.11, one that Horace addresses to "Hirpinian Quinctus." There is no point in making plans for infinity. Join me, Horace invites, in performing t he r ites of B acchus, d rinking a l ittle w ine mixed with water, and enjoying music played by Lyde, a local prostitute.

"Make l ove, n ot w ar" i s t he adv ice H orace offers i n the 1 2th o de o f h is s econd c ollection. The poem is addressed to H orace's patron, Maecenas. I t be gins b y s uggesting t hat p articular poetic f orms be st t reat d ifferent sub jects. On e does not choose lyrics to describe battles. Therefore, i f M aecenas wants t o write a bout Ro me's civil wars, Horace suggests that he do so in prose. Horace's ow n m use c alls h im to c elebrate t he "flashing eyes" and the singing of his sweet m istress, L icymnia. H e w onders w hat Maecenas would e xchange fo r a lo ck o f L icymnia's ha ir, stolen when she bends her neck to receive a proffered kiss. Ode 2.13 is a n address to a t ree t hat s truck Horace's h ead w hen i t f ell. I t g ives H orace a n occasion to c omment on t he f requency o f ac cidental death. He reflects on some of the mythical consequences had the tree struck him: He would have met h is predecessors, A lcaeus and S appho, in the underworld and seen the ghosts and Hell's monsters entranced by the poets' songs.

The n ext o de r eflects o nce m ore on d eath's inevitability d espite w hatever p recautions one may attempt against it. Earth, home, beloved wife, and a cellar full of expensive wine—all must be leĀ behind.

Conspicuous consumption, particularly t hat of a gricultural a creage by l uxurious d wellings, receives the brunt of the poet's criticism in O de 2.15. Moreover, the privatization of hitherto public streams and ponds and open, public fields will diminish e veryone's life. In the good old d ays, public temples were grand and private dwellings modest.

Ode 2.16 continues the theme. It praises the quiet and contented life that does not worry about the future beyond sensible provision for it. One cannot provide against any eventuality; one can be frugal.

Ode 2.17 a ssures H orace's pa tron, Mae cenas, that he is not likely to die before Horace. Should Maecenas d o s o, Horace i s r esolved t o end h is own life as well. Maecenas, however, has already proved that he is for tune's d arling, a nd t he t ree that struck Horace could easily have killed him. If Horace dies first, he hopes that Maecenas will offer a f uneral s acrifice a nd d edicate a v otive memorial. S hould Maecenas d ie first, H orace promises t o k ill a h umble l amb. H e a nticipates his own death.

Ode 2.18 once a gain stresses Horace's simple and contented mode of life. Then he rails against the foolishness of an old person who is still building mansions, still expanding the boundaries of his property in every direction, and still driving off his neighbors and trampling on their rights in his irrational pursuit of belongings and real estate. No amount of wealth will ward off Mercury, the escort of the souls of the dead to the underworld. Ode 2.19 is a hymn in honor of the new god, Bacchus, a nd f eatures t he shout o f praise— *Euhoe*—traditionally used by the god's adherents. He s ings of the miracles performed by the god (see *The Bac chae*), praises the god's unexpected prowess in battle, and recalls the way the guard dog of Hades, Cerberus, fawned on Bacchus and licked his feet when he descended into Hell.

The 20th and final o de of the second collection addresses Maecenas. The poem asserts Horace's expectation that he—or at le ast h is poetic reputation—will l ive fore ver. Eve n as he w rites, he is metamorphosing i nto a w hite s wan whose song will sound throughout the world. Given the immortality of h is verse, there is n o point i n a funeral, grieving, or even a tomb.

Horace or iginally i ntended h is t hird c ollection of o des to be the last. In response to an imperial r equest, h e l ater r ethought t hat de cision and added a fourth set. At the time he wrote the th ird c ollection, t hough, he i ntended it t o close an epoch in his mastery of differing kinds of verse.

Book 3

The first ode of the third collection (3.1) a sserts Horace's d istaste for the m ob, whose m embers are un initiated to the joys of poetry. He understands differences in the tastes and capacities of different people, and he r espects those, but he is free to choose his own manner of life and to avoid the annoyances that accompany others' choices. He thinks about the shrinking domain of fishes as contractors dump rubble into the sea to s erve as foundations for the seaside villas of the rich. He reasserts his contentment in living a retiring life on his Sabine farm.

The second ode of the third collection contains one of Hor ace's most f amous l ines: "D ulce e t decorum est pro patria mori" (It is sweet and fitting to die for o ne's c ountry). The 20th-century poet W ilfred O wen c alled that l ine an "age-old lie." Horace, however, did not share Owen's view. He t hought that m ilitary t raining a nd ser vice toughened young men, and that death sought out cowardly youths who were likely to be hamstrung running from the battle.

A person's true worth, however, says Horace, changing the subject, is not measured by success in elections. It does not respect the whim of the governed. It takes its own way and soars a bove the vulgar crowd. Horace implies that he enjoys the confidence of the emperor and that he can be trusted with state secrets. He believes that retribution is likely to overtake a criminal.

Ode 3.3 looks to Pindar for its formal inspiration and d ares to t read t he e dges of p olitical matters. Horace approves of an imperial policy that remains steadfast in the face of the crowd, a pop ular tyrant, a dangerous south wind, or the dis approval of Jove h imself. A ugustus h as th e determination t hat H orace a dmires, a nd t he poet is convinced that determination is the quality that will qualify the emperor to take his place among the immortal gods.

Horace now quotes a speech made by the goddess Juno aÅer the fall of Troy. In it, she promises that s he will wi thdraw h er e nmity fr om th e descendants o f T rojans, pa rticularly R omulus, son of the war god Mars and a T rojan priestess. As long as the former site of Troy remains a wilderness, Rome will prosper—although greed can undermine t hat p rosperity. I f, h owever, t he Romans should attempt to rebuild Troy as a new imperial capital—a plan that had been proposed— Juno h erself w ill lead t he host t hat w ill d estroy the city as oÅen as it is rebuilt. Reproving h imself and h is muse for straying into "momentous matters," H orace r eminds h imself to r eturn to "trivial ditties."

The time for that return has not yet come. Ode 3.4, i nvokes t he M use of epic poet ry, C alliope. She comes, and the poet recalls how as a child he could wander and sleep in the woodlands untroubled b y sna kes a nd b ears. The p oet r ededicates himself to the Muses, crediting his love for them with his preservation at the battle of Philippi and with h is e scape fr om d rowning a t Palinurus likely, as Niall Rudd tells u s, in a ba ttle a gainst Pompey's s on S extus i n 3 6 b.c.e. Horace also salutes the Muses as his protectresses against the

478 Odes

falling tree. Given his history, he considers himself immune to violence and is willing to face any danger.

The p oet c redits t he M uses w ith r efreshing Augustus in the midst of his military exploits. In a lengthy epic si mile, Horace compares A ugustus's victories t o th at of t he go ds over t he r ebellious Tit a ns. With that simile, the ode concludes.

"Momentous matters" continue to occupy the poet through the next two odes. Ode 3.5, Horace disparages Crassus's captured Roman soldiers for marrying Barbarian wives and remaining in Parthia while serving in the army there. He contrasts that recent Roman behavior with the former fortitude of Marcus Attilius Regulus, a soldier in the first Punic War. Captured in Carthage in 255 b. c.e., Regulus was released to r eturn to I taly and arrange an exchange of prisoners. Regulus appeared before the senate and advised them against bringing t he a rmy ho me. Ha ving p ut t he s enatorial speech in Regulus's mouth, Horace then reports how Regulus, f eeling u nworthy i n def eat, had refused to g reet h is w ife and c hildren. H e c oncludes by r eporting h ow Re gulus u nhesitatingly followed t hrough on h is d etermination t o s hare his comrades' f ates. The s enate to ok h is adv ice. Regulus returned to Carthage, where he was executed along with his fellows.

In O de 3.6, H orace c ontinues in the role of social cr itic. U ntil the p rofaned tem ples of the Roman g ods a re r estored a nd u ntil ad ultery n o longer u ndermines the sanctity of Roman marriage, R ome w ill d ecline. H is c ontemporaries compare unfavorably with their forefathers. Horace c alls them "an inferior breed," one that will produce "degenerate offspring."

Lightening t he mood a l ittle, H orace m oves from p ublic t o p rivate ma tters. O de 3 .7 finds Gyges' wife Asterie, weeping for him while he i s off on an extended business trip. Horace imagines the y oung ma n r esisting t he i mportunities o f those who attempt to seduce him, and then advises Asterie not to lo ok with to o favorable a n eye upon t he a complishments a nd v irility o f her neighbor, E nipeus. She i s to lo ck u p her house and resist his blandishments. Ode 3.8 celebrates the poet's bachelorhood. It is March 1—"Matron's day." Responding to Maecena's question, the poet explains why he is surrounded with the paraphernalia of sacrifice. He says that he celebrates this day with a sacrifice to the "God of Freedom," Bacchus. He gives the god a del icious m eal, i ncluding a w hite g oat, a nd opens a jar of rare old wine. He asks Maecenas to join him in drinking a hundred ladles in honor of his "escape." The poet cites several examples of how well matters are going on the Romans' military fronts, and he advises his friend to put aside his c ivic r esponsibilities, jo in t he c elebration, and neglect the serious matters that o ccupy his time.

Ode 3.9 reports a conversation between former lovers who rehearse the grievances they have with one another, for they have both strayed. The male speaker, p erhaps the p oet, then p roposes reconciliation. Lydia, the female, ac cepts h im de spite his flightiness a nd h is bad tem per. She w ould rather be with him than anyone else and would gladly die with him.

In Ode 3.10, a lover begs at his beloved Lyce's doorway to b e ad mitted. Lyce's h usband has a Muse for a mistress, but the lover is freezing on the rain-soaked doorstep with h is h and on the latch, begging to be admitted.

Ode 3.11 i nvokes the god Mercury and sings for the benefit of Lyde, a girl who, "like a threeyear-old filly," s hies a way f rom b eing to uched. Mercury, a god of g reat p ower, should tell Lyde the story of Hypermestra (see The *Suppliants*). One of the 50 daughters of Danaus, Hypermestra was the only sister to spare her husband when all were s upposed t o k ill the 50 s ons of A egyptus, their husbands, on their wedding n ight. Horace tells the rest of Hypermestra's story. Its moral is that vi rgin d aughters de ceive t he f athers w ho want to prevent their daughter's marrying.

Ode 3.12 pities Neobule, a girl whom Cupid has struck with love for the youth Hebrus of Lipara. His accomplishments at sport are many. He can, ride, box, sprint, and hunt. The last line, however, hints darkly at his having been injured or killed by a charging boar. The n ext p oem, the 1 3th of the third collection, a ddresses the f ountain of B andusia. The poet promises that, on the day following, a young goat whose horns are just budding will be sacrificed to the nymphs of the spring in gratitude for the cooling waters that spring from it.

Ode 3 .14 cel ebrates the r eturn of Emperor Augustus from Spain in 24 b.c.e. Horace anticipates the welcome that Empress Livia will offer her triumphant husband. He also knows that the emperor's a rrival will c alm H orace's o wn f ears about insurrection and violent death. In celebration, the p oet s ends h is servant to find a j ar of well- æed wine and t o h urry a long t he si nger Neaera.

In the next poem, the poet reproves an elderly woman who seeks many lovers. Following that, he turns once more to a weightier moral subject in Ode 3.16. It is a reflection on the power of money. He begins by recalling the story of Danae, whom Jupiter visited in the form of a sh ower of gold in her t ightly lo cked ro om. H orace i nterprets t he myth as the story of a b ribe. G old has a w ay of finding it s w ay a nywhere a nd r uining w hat i t touches. Moreover, its acquisition is habit-forming. Horace t hinks the g ods will favor t hose wh o remain destitute, desire nothing, and do not seek out the company of the rich. He once again congratulates himself on his congenial way of life.

Ode 3.17 addresses the scion of a distinguished family, A elius, a nd c ompresses h is g enealogy into a parenthetical interrupter. Continuing aÅer this rather grandiose interpolation, H orace predicts a storm the following day. The harbinger of that storm is an aged crow that Horace keeps an eye on. In the poem that follows, Horace addresses a prayer to the r ural deity Faunus, who b oth pursues ny mphs and protects y oung goats from hungry wolves. H is a nnual festival is celebrated on the fiÅh of December, when the wolf observes peace with the lambs, the forest sheds its leaves, and the country folk dance.

In Ode 3.19, an impatient Horace, bored by a pedantic conversation, is waiting for the drinking and the entertainment to b egin at a c elebration honoring a new month, a new day, and the

installation o f " Murena t he a ugur" in a n ew polti cd office. Scholars debate which of two possible M urenas H orace i ntended. H orace w ants the p arty t o g row noisy a nd w ild s o that th e next-door n eighbor, t he g rouchy L ycus, w ill b e disturbed. I n t he l ast li ne, t he p oet's t houghts turn to his smoldering passion for h is unnamed sweetheart. The organization of t he o de follows the poet's stream of consciousness.

Ode 3.20 alludes to a r ivalry between a man, Pyrrhus, and an unnamed wom an for the affection of a handsome young man. The poet predicts victory for the woman, whom he c ompares to a lioness protecting her cubs.

The \bar{f} ollowing p oem, O de 3 .21, p raises t he qualities of wine in repressing the inhibitions of reserved p ersons, br inging ho pe to t he w orried and courage to the faint of heart. The poet intends to enjoy wine's advantages until sunrise.

In O de 3.22, the p oet p resents the p ine t ree that shades his house to the goddess of the hunt, Diana, who is also Luna in heaven and Hecate in Hades. He makes the tree her altar so that he may annually sacrifice a young boar to her.

The 23rd poem of the third collection addresses a pea sant g irl, P hidyle. I n h is o de, t he p oet assures her t hat t he si mple offerings she c an afford will please her household gods as much as the more expensive g iÅs she c an n ot a fford. The gods will favor her crops and her animals.

Ode 3.24 is a diatribe a gainst the ac cumulation of wealth as the root cause of public immorality and lawlessness in Rome. Horace points to the nomadic S cythians and the G etae of Thrace as people who hold the basic necessities of life in common and live rigorously virtuous lives. Horace recommends that precious stones and the corrupting e lement, gold, e ither b e locked up i n temples or t hrown i nto the sea. He also th inks that citizens should be invigorated with military training and give up soĂ living. Wealth without virtue leaves a fortune incomplete.

Horace next invokes the god Bacchus in Ode 3.25, asking for the inspiration of divine madness so that the poet can adequately sing the glories of Augustus Caesar.

480 Odes

The following poem, Ode 3.26, complains that, while the p oet had f ormerly triumphed oĀen i n the ongoing battle of the sexes, overcoming girls' re sis tance with the tools of his poetic trade—here compared to crowbars, axes, and firebrands—his unaided s uccesses a re over. H aughty Chloe will require a flick of the whip of the goddess of love.

Ode 3.27 is a more c omplex and a mbitious poem in which Horace adopts the persona of a seer, or one who interprets prophetic signs. He begins by invoking omens of bad fortune for evil people who travel, but for Galatea, who is leaving and who, Horace hopes, will remember him, he has only go od wishes. The rest of the poem makes one wonder if Galatea is on her wedding journey.

Galatea is named for a sea nymph, and that association prompts what follows. The signs of the coming weather over the A driatic S ea a re unsettled, and Horace knows from experience what unpleasant consequences can follow in its waters bo th f rom an east wind and a south wind. Making a forced transition, he notes that the princess Europa had similar apprehensions when she rode across the sea on the back of the king of the gods, Jupiter, who had assumed the shape of a snow-white bull and made love to her. Horace imagines the qualms that Europa experienced as the bull carried her across the raging waters. He de scribes her second thoughts, her regrets, her father's i magined reproof, and her angry desire to punish or kill the bull. In her shame at her own folly, Europa prays to become "food for tigers."

The goddess of love, Venus, who with her s on Cupid had led the princess astray, reproves Europa, ho wever, The g oddess e xplains t hat she ha s become the bride of the king of the gods. Europa must g ive u p hysteria a nd t antrums a nd r esign herself to her f ated greatness; a c ontinent will be named for her. Also, though Horace does not state it, Europa will bear Jupiter three boys—demigods who will become kings and leaders. One will be Minos of Crete. Another will be the judge of the dead, R hadamanthys, w ho r ules Elysium—first called the islands of the blest and later thought of as the abode of the blessed in the underworld. In some versions of Europa's story, her third son is Sarpedon, one of the generals of the Lycians in the Trojan War.

Ode 3.28 sings Horace's celebration of the god Neptune's feast day with a jar of good old wine. The 29th poem of the collection add resses Maecenas, reminding him that he owes Horace a visit. The poet tells his wealthy patron to leave his luxury behind for a simple meal in a modest house. Horace d escribes t he p osition of t he s tars. It is midsummer a nd ho t, a nd t he she pherds s eek shade f or t heir flocks. H orace a lso i magines Maecenas's weighty c ares of s tate i n h is role a s Augustus's chief minister. He advises him to le t the gods worry about the plots being hatched in far- off places, since only their foreknowledge is accurate. Settle pressing problems calmly, is the poet's a dvice t o t he st atesman. H orace i terates his conviction that when, at the end of a d ay, a person k nows h e has f ully l ived, t hat d ay ha s been well spent. As for Horace himself, he returns the giAs of fortune, wraps himself in virtue, and seeks o ut ho nest p overty. H e en ds t he o de b y recounting h is s toic ac ceptance of adversity and his r ejection of b argaining with the g ods f or favor.

Ode 3.30 is the final ode of the third collection. It is the piece with which Horace intended to close out h is ode-writing career. Subsequent events would lead him to modify that intention. Nonetheless, the 30th poem contains Horace's evaluation of his own poetic worth. H is judgment of his own merit has proved accurate. H is poetry will outlast the py ramids. A s long a s he has readers, he cannot wholly die. H is reputation will be worldwide. H e h as ho nored h is m use, Melpomene (the Muse of tragedy), who deserves the credit for having inspired him. He hopes that she will crown him with bay le aves a s A pollo's poet laureate.

Book 4

Though Horace intended to turn his attention to other sorts of poetic projects, his patron Maecenas

and others hoped he would continue to write lyrics. He resisted their suggestions, but when Augustus himself officially requested a choral hymn for per for mance in 17 b.c.e. to celebrate the emperor's past ac complishments and the dawning of a n ew age in Rome, Horace was obliged to comply. That effort, h is " Hymn for a N ew A ge," i nvokes t he gods and goddesses of the Roman pantheon—particularly P hoebus a nd D iana. I t p raises Ro me's successes u nder A ugustus's r ule, a nd i t c alls for the gods' continued favor through a 110-year cycle of pro sperity. C omposing t hat hy mn a pparently stimulated the poet's lyric inspiration, and he produced a fourth book of 15 more odes.

The first od e o f b ook 4 c hides t he g oddess Venus f or i nflaming a m-lmger-young poet's heart with passion for a youthful Ligurinus. Ode 4.2 addresses the son of Mark Antony, Iulus, who wrote poems in the fashion o f P indar. Horace's poem is i tself a P indaric ode, and it ironically explains that, as a Pindaric poet, Iulus must write the ode that celebrates Augustus Caesar's anticipated r eturn f rom h is w ars i n G aul a nd Spa in. Horace will contribute his praise as he can. Iulus, however, will give a larger sacrifice, though Horace's sma ller o ne, t he p oet i mplies, w ill b e a t least as fitting.

Ode 4.3 addresses the poet's muse, Melpomene, crediting her with making Horace the poet of the Roman lyre. Horace follows that invocation with another P indaric o de, t his on e c elebrating t he successes of A ugustus Caesar's stepson, D rusus, as he led the Roman legions to victory against the warlike m ountain people, t he Vi ndelici, i n t he Rhaetian Alps. Horace attributes D rusus's bravery and his accomplishments both to nature and to nurture.

In a n ass ociative t ransition, t he p oet t hinks back to a time when Roman arms proved less fortunate a nd the a rmies of th e C arthaginians enjoyed temporary success in Italy. Horace puts a speech into the mouth of the Carthaginian general, H annibal. I n it, H annibal a cknowledges t he invincibility of Ro man a rms a s p roved b y t he defeat of t he a rmy of H annibal's brot her, H asdrubal, in 207 b.c.e. Hannibal utters his conviction that Jupiter protects Drusus and his brother Tiberius and that the god will keep them safe in war.

Still c elebrating t he b enefits b rought by Augustus's r ule, O de 4.5 add resses t he emperor as a descendant of the gods. Venus was the mother of A ugustus's s upposed ancestor, th e T rojan prince Ae neas. Horace w ants t he emperor to return quickly from the campaigns he is personally leading. Rome m isses h im just as a mother misses a son whom unfavorable winds have kept from s ailing ho me. The emperor's r eturn w ill assure the peace and safety of the motherland and the enforcement of her laws.

Augustus's presence a lso protects a gainst the presumption of fore ign enemies. H is sub jects offer p rayers i n t he em peror's b ehalf. H orace ends the ode by quoting the customary prayer for the r uler, s aying th at the p eople r epeat it b oth early and late.

Ode 4.6 add resses the g od A pollo, the tutelary god of artists, thanking him for the destruction of the hero Achilles at Troy. Had A chilles not fallen, Horace imagines, the warrior's cruel vengeance a mong the defeated Trojans w ould have averted the successful voyage of the Trojan founder of Rome, Aeneas. The final verses of the song address the noble young men and maidens who will perform his "Hymn for a New Age" at Augustus's 1 0th-anniversary f estival. H e p redicts that in years to c ome, they will recall that they performed his hymn for the gods' pleasure and that the priestly poet Horace taught them to sing it.

Ode 4.7 considers the cycle of nature and the lesson that it teaches. Like the year, like each day, life e nds, a nd p eople s hould not hope to be immortal. N oble b irth, elo quence, a nd p iety, Horace tells his friend, the consul Torquatus, are all equally incapable of restoring life.

Addressing a nother c onsul, C ensorinus, H orace s ends h im a g $i\bar{A}$ of a p oem, O de 4 .8. Suc h immortality as one can achieve results from being celebrated in long- hsting verse. The Muses immortalize a person worthy of verse. The s ame t heme continues in O de 4.9, where H orace po ints o ut

482 Odyssey, The

how many worthy persons lie forgotten for lack of a poet to celebrate their deeds. Such will not be the fate of Augustus's general, Lollius, whom the poem praises for good judgment, for honesty, for preferring death to disgrace, and for having the courage die in defense of friends and country.

The 10th ode of the fourth collection addresses the same person as does the first—the youth Ligurinus. It warns the young man of coming old age and a time when he will regret not having seized the d ay. H orace r egrets L igurinus's c ontinued absence.

Ode 4.11 invites a woman, Phyllis, to share a jar of nine-year-old wine with Horace and help him c elebrate t he b irthday of Mae cenas. The poet r eflects t hat t he ma n P hyllis lo ves, T elephus, is enamored of a wealthier and nobler mistress. If Phyllis aims so high, she is do omed to disappointment. Therefore, si nce P hyllis is t he last of Horace's loves, she should keep him company and, from him, learn some songs that she can sing to drive black thoughts away from both of them.

The n ext o de c elebrates t he r egreening of t he world in springtime. As the world comes alive once more, t he p oet i nvites t he p oet Virgil—already dead if the poem was not written at a d ate earlier than the rest—or p erhaps a nother p erson of t hat name to de sert h is s erious c oncerns f or a t ime, share a jar of wine and just be silly for a while.

Ode 4 .13 g loats r ather unattractively a bout Horace's b eing proved r ight. A w oman he had pursued e arlier, L yce (see Od e 3 .10) ha s g rown old, white-haired, a nd w rinkled. She t ries a nd fails to compete for the attention of men with the younger a nd m ore b eautiful C hia. H e a sks rhe torically w here V enus ha s fled—whither L yce's formerly blooming complexion, her graceful carriage? Now Lyce has become a laughing stock.

The collection's p enultimate p oem, O de 4.14, celebrates once again the military exploits of the emperor's s tepsons, D rusus a nd T iberius, i n Rome's w ars a gainst s everal en emies. The 1 5th and last poem of Horace's final collection of odes is a graceful compliment to the emperor Augustus for pac ifying b oth I taly a nd t he M editerra-

nean world and bringing the benefits of peace to all under his sway.

Odyssey, The Homer (ca. eighth century B.C.E.)

Written s ome 400 y ears aÅer t he e vents i t p urports to chronicle, Homer's The Odyssey and his other epic, The Ili ad, a re the earliest su rviving epic poe ms i n a ny western Eu rope an language. Together, these works e stablish t he expectations to which subs equent e pics in the Western tradition usually aspire. Typically, the poet calls on the Muses for inspiration. The hero, Odysseus, endures a journey into the underworld. The action begins in the middle of the story and includes numerous flashbacks. The p rincipal h uman c haracters a re drawn from the ruling and military classes, while gods a nd d emigods i nterest t hemselves i n t he activities of t he h uman b eings a nd sm ooth o r impede their progress. The events portrayed a re usually of national, international, or even universal importance. The language of Homer's presentation is loĀy, and the verse form of the poem is dignified.

The e vents in *The I liad* concern t hemselves with the anger of the Greek hero-warrior Achilles and its consequences, as well as with the situation of Troy and the Trojans as they endure the 10- year- bng siege that resulted in the destruction of their city and its civilization (The Trojan War). The events in *The O dyssey*, on the o ther hand, first concern the adventures of one of the Greek generals, O dysseus (Ulysses in Latin versions), as he en dures adventures and hardships, partly brought on by his own folly, while sailing the M editerranean S ea in a n e xtended v oyage home. Second, Homer recounts the passage from boyhood to manhood of Odysseus's son, Telemachus, and his search for his missing father. Third, *The Odyssey* relates the strategies and tactics of Odysseus's wife, P enelope, a s she deflects a nd evades t he u ninvited a ttentions of a c rowd o f suitors—once b y s aying she must first weave a shroud for her father-in-law, Laertes. She weaves by day but unravels by night and makes no progress. Her ad mirers, u ninvited guests in her pa lace at Ithaca, consume all her food and drink, try to convince her t hat her m issing h usband must be dead, and attempt to persuade her to return to her father s o t hat he ma y bestow her o n one of the suitors.

Book 1

As t he e pic opens, t he p oet, i n his o wn v oice, addresses the Muse (see Muse s), presumably Calliope, the Muse of epic poetry, praying that she will tell Odysseus's story through him. That story next receives a brief overview in the context of the continuing invocation. If, as some have thought, Homer was himself a performer who entertained by reciting his verse to the accompaniment of his lyre, the summary would have served to a rouse listener interest. When Homer composed, there was a s yet no reading public. We learn that the enmity of t he g od of t he s ea a nd e arthquake, Poseidon, has been keeping Odysseus away from home. Bu t i n P oseidon's a bsence a mong h is human devotees, Zeus and the other gods reflect on Odysseus.

Zeus, the father and ruler of the gods, has been thinking a bout C lytemnestra a nd A igisthus's murder of A gamemnon (see *Agamemnon*), a nd the g od c oncludes t hat h uman b eings b ring destruction on themselves despite warnings that the gods issue. Athena, the goddess of wisdom, takes the opportunity to r emind Z eus of O dysseus. The hero is languishing on the island of the demigoddess Calypso, held there by her love for him and by the enmity of Poseidon. At Athena's suggestion, Zeus sends Hermes, the messenger of the gods, to tell Calypso to release Odysseus. Athena herself goes to Ithaca to instruct Telemachus to mount an expedition to search for news of his father. With her, readers fly to Ithaca, where she assumes the aspect of Mentes, a Taphian sea captain, a nd c alls a t O dysseus's pa lace. T elemachus spots Mentes/Athena at the gate and welcomes the goddess, telling her to eat now and share news later. Servants and suitors also arrive to lay and consume a splen did ba nquet i nvoluntarily p rovided b y Odysseus's estate. AÄer everyone is sated with food and dr ink, a m instrel, P hemios, b egins t he e vening's entertainment, and Telemachus quizzes his guest about the purpose of the visit and what information he/she might share.

Athena s peaks of T elemachus's g randfather, Laertes, and of Odysseus. She a ssures the boy that Odysseus c annot poss ibly be d ead. T elemachus complains of the suitors' presumption and discourtesy in helping themselves to his inheritance. Athena advises Telemachus to call a communal assembly and demand the suitors' de parture. She a lso su ggests that he get a boat, assemble a crew, and sail to Pylos, where Nestor rules—Nestor being the eldest of the Greek generals who fought at Troy. Spend a year, she counsels, looking for news of Odysseus. If he lives, de stroy the su itors. I f he d ies, c onduct a funeral a nd g ive P enelope to a nother h usband. Then, like a bird, Athena departs, and Telemachus realizes that a deity has visited him.

The minstrel Phemios has been singing about Troy and has saddened Penelope, who complains. Telemachus r eproves his mother. She, impressed by his suddenly adult demeanor, withdraws, and he turns his attention to the suitors. He announces his intention to hold an assembly in the morning, when he will tell them to le ave his house or face the fatal consequences of abusing his hospitality. The suitors variously threaten Telemachus or agree with his a nalysis. P resently they de part for t he n ight, a nd T elemachus, a ssisted b y h is nurse, Eurykleia, prepares for bed.

Book 2

The assembly is held on the following morning, and b efore the c itizenry of I thaca, T elemachus

484 Odyssey, The

states his case against the suitors. His charges are greeted w ith g eneral approv al until t he m ost despicable of t he s uitors, A ntinoos, re sponds. Penelope, he insists, is at fault for not choosing a husband. I f T elemachus wants t o p rotect h is patrimony, he must send his mother back to her father so that another marriage can be arranged for he r. T elemachus re fuses, a nnounces h is intention to voyage in search of news of his father, and asserts that Zeus will punish the suitors for abusing the necessary institution of hospitality.

In affirmation of that threat, Zeus sends a pair of e agles who claw and peck at members of the assembly. A n o ld ma n c orrectly i nterprets t he omen as foretelling the suitors' doom and Odysseus's return. The suitors, however, dismiss both the prophecy and Telemachus; they will continue their predatory ways until Penelope chooses one of them. Telemachus's elderly guardian, Mentor, reproves the suitors. In their presumption, however, they ignore all portents and warnings.

Athena, assuming the aspect of Mentor, advises Telemachus a bout p reparing f or a s ea v oyage to Pylos. The su itors r econvene a t h is house a nd advise him to forget his plan. When they are unsuccessful, they begin muttering that he may be lost at sea, a s h is fa ther p resumably ha s b een. S ecretly assisted by his nurse and Mentor, Telemachus borrows a sh ip, a ssembles a c rew, a nd s ets s ail f or Pylos. The difference between men and boys, some say, is that men a ct while b oys d ream. W hen we first met Telemachus, he was dreaming; now he is taking a ction. The v isits of t he g oddess c an b e interpreted as Telemachus's awakening maturity.

Telemachus s uccessfully sails to Pylos, where, finding Nestor at a ceremony, he quickly develops a diplomat's sense of decorum. He does the right things, says the right words, tells Nestor his mission, and secures the king's friendship and assistance. A t Telemachus's r equest N estor r ecounts the story of h is o wn r eturn f rom Troy. He a lso mentions Athena's special regard for Odysseus.

AĀer f urther d iscussion t hat i ncludes accounts of voyages home from Troy and continual references to the fate of Agamemnon and to Orestes' vengeance on his father's killers (see *Or es tes*)—references t hat r ing like a f uneral knell throughout this part of the poem—Nestor advises Telemachus to seek news of his father from M enelaus, k ing of Spa rta. Nestor i nvites Telemachus t o b e his g uest a nd offers h im a chariot and his son as a guide. Pleased with this outcome, Athena-Mentor turns into a sea hawk and flies off. All recognize that they have been in the presence of divinity and that Telemachus i s especially fa vored. A Āer s acrifice a nd feasting, Telemachus and his guide, Peisistratus, travel by chariot t o P herai, w here t hey sp end t he n ight. The n ext morning, they once more take to the road, and aĀer dark they arrive at Sparta and the palace of Menelaus.

Book 3

At S parta, a w edding f east i s i n p rogress, a nd in keeping with Greek traditions of ho spitality, King M enelaus w elcomes the s trangers, w ho admire his sumptuous court. The king reminisces with the strangers and, in doing so, shrewdly admits how much he misses O dysseus. Telemachus weeps at the mention of his father's name, and Menelaos knows he has guessed right. As he speaks, H elen en ters. We a re i ntroduced to t he cause of the Trojan War—the woman whose face, Tennyson w rote, " launched a t housand sh ips / and burnt the topless towers of Ilion" (Troy). She too recognizes Telemachus as Odysseus's son.

AĀer a good deal of reminiscing, Helen serves a mild sedative with the wine and begins to tell a story about Odysseus during the Trojan War. The careful reader at this point will bear in mind the difficult situation in which Helen finds herself. A wife w ho h as ru n a way with a nother ma n a nd who ha s b een d ragged ho me b y f orce, she ha s few options other than to put the best face she can on her behavior.

Helen r ecounts a n o ccasion on which O dysseus had entered the citadel of Troy disguised as a b eggar. She n onetheless r ecognized h im a nd confronted h im. E ventually, s he s aid, she c onvinced him to be her guest, bathed and anointed him, gave him fresh clothes, a nd s wore a n oa th not to reveal him as Odysseus to the Trojans until he was safely back in the Greek camp. A Āer that, she says, O dysseus told her t he Greek plans and killed many Trojans as he fought his way out of the city. Helen says she r epented "the mad d ay" that Aphrodite had made her forsake all she held dear, i ncluding a h usband w ithout p hysical o r mental defect.

Menelaus c ompliments H elen on hert ale and tells another. He recalls the way that, as the Greek detachment sat waiting in the Trojan horse for an opportunity to leap out and open the gates of the city to the attacking host, Helen walked around the horse t hree t imes, patting it and c alling out the names of the best Greek fighters while imitating the voices of their wives. He remembers how Odysseus had clamped his hands over the mouth of Diomedes to keep him from calling out in answer and how Odysseus saved the Greek cause by keeping everyone quiet until Athena finally led Helen away.

In view of the s ubtext r egarding H elen's t rue wishes that these stories imply, a reader can surmise t hat a c onsiderable d egree of t ension h ad arisen between the spouses. Telemachus gives evidence of his mature tact by suggesting that everyone retire, thereby diffusing a brewing argument.

Book 4

The next day, Telemachus asks Menelaus for news of Odysseus. Menelaus recounts the details of his passage home via Egypt. He reports an encounter with the shape- shiAing s ea g od P roteus, w hom Menelaus held down until the deity had exhausted his repertoire of shapes: seal, other beasts, water, and fire. Then Menelaus could question P roteus, and the g od had to a nswer t ruthfully. M enelaus asked about Odysseus, and P roteus reported that Calypso was keeping him on an island.

Having le arned t hat O dysseus l ives, Telemachus heads home to Ithaca. There the suitors have found out a bout h is voyage and plot to a mbush and k ill him on t he r eturn t rip. P enelope a lso finds out about her son's journey and, learning of the s uitors' i ntention, grieves f or h im. Pa llas Athena, however, comforts Penelope in a d ream, assuring h er t hat Telemachus i s under t he g oddess's protection.

Book 5

The fiĀh book of *The Odyssey* opens with a reference to A urora, the goddess Dawn, who is married to a former mortal, Tithonus. When she fell in love with him, she asked Zeus to make Tithonus immortal so he could forever remain her husband. She neglected, ho wever, to a sk for e ternal youth for h im a s well. A s a r esult, Tithonus g rew e ver older. The implication, of course, is that marriages bet ween m ortals a nd i mmortals v iolate t he nature of things.

Athena then reminds Zeus that Calypso is still holding O dysseus prisoner. Zeus sends Hermes, the messenger of the gods, to tel l Calypso to le t Odysseus go. He does so, and despite her r eluctance, she obeys, going to inform Odysseus of his liberation.

At last the reader directly encounters the hero, and our first view of him finds him sitting idly on the b each, weeping. C alypso te lls h im t he t ime for h is de parture has c ome a nd t hat he m ust fashion a raĀ to cross the open sea. Odysseus is suspicious, b ut C alypso a ssures h im t hat her intentions ar e g ood a nd h er heart i s k ind. She does make a final effort to have him remain with her voluntarily, asking what is so attractive about Penelope. Odysseus assures the immortal that her beauty a nd ag elessness leave n o ro om for c omparisons, b ut he n onetheless longs for h is home. The pair enjoys a last night together.

The next day, Odysseus sets about building his raĀ—one that will be driven by both sail and oar. Its construction requires four days. Calypso provides food, drink, and a sea cloak that will protect him; she also instructs him in stellar navigation. He then sets forth and sails for 17 days and nights until the shoreline of the island of Skheria comes into view.

Just at that moment, returning home to Olympus, Odysseus's nemesis, the god Poseidon, spots him and realizes that the gods have released him from his bondage. Displeased, the god chooses to

486 Odyssey, The

make things as unpleasant for Odysseus as possible and sends a fearful hurricane that destroys his rigging and plunges both raÅ and seaman under the waves. At t hat moment, ho wever, t he s ea n ymph Ino—previously a mortal girl named Leukothea comes to his rescue. She adv ises him to a bandon ship, cast off Calypso's sea cloak, and substitute for it her own immortal veil, which will protect him from drowning. Reluctant to abandon ship, Odysseus hangs on until his raÅ splinters; then he takes Ino/Leukothea's adv ice a nd t rusts h imself to t he sea.

AĀer swimming for two days and nights, on the third day Odysseus comes in sight of Skheria, and aĀer na rrowly a voiding being sh redded by the sharp coastal rocks, he at last finds a river mouth into which he can swim. Exhausted, swollen, and c overed with brine, he finally reaches land, where he makes a nest of fallen leaves and instantly falls asleep. This section of the epic has sometimes been read as an allegory of rebirth in which Od ysseus is likened to a newborn c hild who has just passed through the birth trauma.

Book 6

As Odysseus sleeps, exhausted, on the riverbank, Athena brings a dream to Nausikaa, daughter of Alkinoos, the king of the Phaiakians who inhabit Skheria. The d ream r eminds N ausikaa to w ash her clothes at the river so she will have fresh linen in the event of her betrothal and marriage. Going with her girl friends and maids to the river to do laundry, the p rincess stumbles u pon t he na ked and terrifying Odysseus. She n onetheless retains her composure, speaks with him, and eventually advises h im to s eek her f ather a t h is pa lace, where, she s ays, t he wanderer may be su re of a friendly welcome and assistance in reaching h is homeland. He must, however, address his plea to the queen, Arete.

Book 7

Assuming the form of a child, Athena encounters Odysseus a s he fol lows Nausikaa's c ounsel. The goddess shows him the way to the palace. Arriving a t the c ourt, O dysseus f ollows N ausikaa's advice. He kneels before the queen, embraces her knees in the manner of a suppliant, and begs passage to his homeland. He further abases himself by sitting among the ashes of the fireplace. Greek hospitality rituals immediately take over, and his hosts treat him as an honored guest, making sure that he is fed and comfortable before asking him any questions.

When the questions do come, however, Odysseus does not yet reveal h is identity. Rather, he says he is a man of sorrows and begins the story of h is a dventures with a brief su mmary of h is trials since leaving C alypso. H is host s uggests that Odysseus might perhaps be a su itable husband for Princess Nausikaa. If not, however, he promises h is as-yet-unidentified g uest p assage home.

Book 8

The next day, a r eception is a rranged in honor of the stranger, and a blind bard, Demodocus, entertains a Åer a su mptuous banquet. First he sings of the way the lame god Hephaistos caught his wife Aphrodite with her lover Ares in a clever net. Next he begins to sing about events in the Trojan War. Deeply m oved, O dysseus w eeps t wice m ore, though he covers his head to disguise that fact. But the k ing, o bserving t hat O dysseus is sa ddened, suggests t hat Dem odocus en d h is p erformance. The a lert r eader will notice t hat t he o utcomes of infidelity a mong t he g ods a re i nconsequential; among people, the outcome can be as awful as the Trojan War. It is the fact of mortality, Homer seems to imply, that makes human action meaningful.

Following the entertainment, the entire party moves outdoors to watch or to participate in athletic competitions. Odysseus watches until Prince Leodamas issues a ritual challenge to the unnamed guest. H is s ubordinate, Seareach, t hen i nsults Odysseus—again ritually—to a ssure his participation in the contest. Affronted, Odysseus seizes a discus and flings it a c ountry mile—far b eyond the best of any other athlete at the gathering. He then boasts a bit, but he does not y et r eveal h is identity. So, having offered unstinting hospitality, the k ing d irectly q uestions O dysseus a bout h is name a nd l ineage, a bout h is w anderings, a nd about the reason that tales of Troy m ove h im s o deeply.

Book 9

Odysseus first compliments the minstrel's performance a nd t hen c onsiders h is o wn. H e r eveals himself as Odysseus, son of Laertes. It is as if the sequence o f events t hat he ha s en dured si nce leaving Calypso has at last brought him into full possession of his human identity. Passing quickly over h is i nterlude w ith t he n ymph, O dysseus flashes back to the beginning of his voyage home as he sailed from Troy.

He r ecalls how he pl ayed p irate a mong t he Kikones and how g reed held him and his mariners there too long, so that he lost six benches of oarsmen in every ship of his fleet to the Kikones' revenge. He re counts the way a nine-day s torm drove his fleet ashore at the land of the Lotus Eaters, where his crew became addicted to the local narcotic a nd m ired i n i naction u ntil he f orced them back to the ships.

Next he reports on the episode that earned him the enmity of the god of sea and earthquake, Poseidon. The ma riners b eached on t he l and of t he Cyclops, or Kyklopes—Poseidon's one-eyed volcanic offspring. There the men hunted goats and ate their fill. Odysseus then took a small body of men to reconnoiter. That group discovered the cave of a Cyclops who had d riven h is mature she ep and goats t o p asture. H owever, t he g iant had le \bar{A} behind both lambs and kids and a number of curing cheeses. The m en adv ised O dysseus to s teal them an d run t o t he sh ips. O dysseus, ho wever, wanted a close look at the giant.

When the Cyclops, Polyphemus, returned, he blocked h is c ave's e ntrance w ith a n enormous boulder and then noticed the sailors in his cave. Odysseus a sked that Polyphemus share some of the c heese, a s t he l aws o f ho spitality r equire. Zeus, Odysseus reminded the giant, will punish those who m istreat g uests that give n o offence. The Cyclops responded that he and his kind have no use for Zeus's laws, and he b egan to k ill and eat Odysseus's men. Odysseus was just about to kill Polyphemus when he remembered that if he did so, he and his remaining men would be unable to move the rock and escape the cave.

AĀer P olyphemus en joyed a nother meal of crewmembers, Od ysseus o ffered h im a l arge bowl of w ine to wash them down. AĀer t hree bowls, P olyphemus g rew quite d runk. A nswering the giant's earlier question, O dysseus asserted that he was called Nohbody. Promising to e at Nohbody n ext, the giant collapsed in a d runken slumber.

Odysseus a nd his r emaining men s eized a green wooden sp ike t hey had e arlier sha rpened and laid in the fire to harden; then they ground it deep i nto P olyphemus's s ingle eye. The C yclops howled f or hel p, b ut w hen h is n eighbors a sked what ha ppened, h e r eplied t hat N ohbody had tricked or ruined him. Assuming that he w as ill and h aving n o s kill i n m edicine, t he n eighbors ignored his shouts.

Knowing that the blinded giant would have to move the stone to let his animals pasture, the wily Odysseus slung his men and himself under their bellies, and rode to freedom the next morning, despite P olyphemus's e fforts t o d iscover them. Once back at their boats, Odysseus shouted taunts at the g iant, who re sponded by he aving great boulders at the sound and nearly swamping the ships. Rowing out of r ange, O dysseus made the mistake of b oasting a nd u sing h is o wn na me. Names were magic: If someone knew your name, they could use it to curse you. Polyphemus prayed to h is father, Poseidon, to p unish O dysseus, and the subsequent difficulties that have beset Odysseus all stem from that curse.

Book 10

In Odysseus's story, the adventures continue thick and f ast. A Åer t he c rew l eaves the l and of th e Cyclops, the next landfall comes at the Island of Aiolia, the do minion of A iolus H ippotades, t he

488 Odyssey, The

king of the winds. He gives Odysseus a bag containing a ll t he adv erse w inds, a nd a f ollowing wind to take him home to Ithaca. Foolishly, Odysseus w ill a llow no one else t o steer a nd s tays awake f or n ine d ays a nd n ights. I nevitably he sleeps, and his crew, thinking he is keeping treasure from them in the bag, opens it. The resulting hurricane blows them all the way back to A iolus, who concludes they must be cursed by the gods and refuses further help.

They n ext m oor their ships n ear the cliffs of the i sland of g iant c annibals, the L ystraigones. One mariner gets eaten, and many of the others are destroyed by boulders the islanders rain down on the anchored ships. Only Odysseus's own vessel escapes the carnage.

Next they reach the Island of Aiaia, where the demigoddess Ci rce, or K irke, t urns all t he m en but t he c autious Eu rylokhus a nd O dysseus into swine. Od ysseus is p roof a gainst t his ma gic b y dint of h aving e aten a n herb c alled moly at t he behest of the god Hermes. Odysseus ma kes love to K irke a nd ma sters her, a nd she r estores t he men to their former shapes, with one exception, Grillus. He has discovered that he prefers being a swine.

Kirke's a ttractions, n onetheless, deter Ody sseus from his quest, and he lingers with her f or over a year. Stirred by his mariners' complaints, however, he finally r esumes h is jo urney. B efore he le aves, K irke r eveals to t he s eafarer's ho rror that b efore g oing home, he m ust first de scend into the land of the dead and interview the shade of the prophet Teiresias (see *Oed ipus Tyr annus*). Teiresias is the only shade among the dead to be allowed to have his intelligence intact.

Book 11

Leaving the Mediterranean and sailing north in the Atlantic, the mariners come at last to the land of the dead. There they first encounter a seaman, Elpenor, who had died of a broken neck on Aiaia. Other shades c rowd a round. The shade s t hat Odysseus allows to drink from a blood-filled pit temporarily regain the p ower of sp eech. N ext, Odysseus sees the shade of his mother, Antikleia, who wishes to speak with him, but he hold s her off until he talks to Teiresias. When Teiresias has drunk of the blood, he promises a rough voyage home. How rough will be determined by whether or not Odysseus is able to restrain his men from killing and eating the cattle of the sun god Helios when the ship lands on the island of Threnakia. If h e ca n, most will ge t ho me; if he c annot, he alone will.

Once home, Teiresias continues, Odysseus will slay the suitors. Then he must resume his travels, take an oar, and walk inland till he comes to a country whose inhabitants do not know about the sea and think the oar is a w innowing fan. There he m ust pl ant t he f an a nd ma ke as a crifice t o Poseidon to defuse the god's enmity once and for all. Then, Teiresias a ssures h im, he w ill enjoy a ripe old age until a "gentle, seaborne death" will claim him at last.

That talk at an end, Odysseus allows his mother's shade to d rink. From her he le arns the situation at home and how, longing for him, she herself had pined away and died. He tries to embrace her, but she is only shadow. There follows a long catalogue o f w omen's g hosts f rom t he a nnals o f Greek history and myth.

Odysseus's r ecitation of t he n ames of t he shades he en countered is interrupted by conversation with h is hosts at the palace of A lkinoos. They ask if he met the shades of any of his former comrades at Troy. He reports his encounter with Agamemnon, who reported the circumstances of his d eath. O dysseus's di scussion, h owever, w ith the shade of Achilles is among the most informative of the epic. As a hero, A chilles enjoyed royal status a mong the dead, and O dysseus congratulated h im b ecause de ath n eed n ot pa in h im a s much. But A chilles set h im straight: "Better," he says, "to break sod as a p oor farm hand" and to live on "iron rations" than "to lord it over all the exhausted dead."

Odysseus t hen reports h is o ther e xperiences in t he un derworld, u ntil, finally o vercome b y horror, he flees to the ship and entrusts himself to the sea once more.

Book 12

Returning by the route they had t raveled, O dysseus and his crew land once more on Circe's island. A Āer seeing the mariners well fed, she warns them of trials still to c ome. They must avoid the fatal attraction of the Sirens' song and steer clear of the dri Āing rocks. They must steer a course between Scylla a nd Charybdis—a m onster a nd a w hirlpool. Sc ylla w ill s urely take s ix m en f rom t he ship, and if Od ysseus tries to p revent it, he w ill lose m ore. Steer clear of the island of Thrinakia, Circe counsels, w here the c attle of t he su n g od Helios a re pastured, but if they must stop there, leave the c attle a lone or de struction w ill follow, and Odysseus will arrive home old and alone.

Odysseus has his men tie him to the mast and stuff their ears with wax so that he can hear the Sirens' song with impunity. They barely negotiate the wandering rocks, and Odysseus drives on past Scylla, who, as Circe had predicted, snatches and eats six men a st hey pass. But when the nowhungry mariners hear the lowing of Helios's cattle, they threaten mutiny if their captain refuses to drop anchor. Having yielded to greed, curiosity, sexual appetite, and hubr is earlier in the epic, Odysseus now experiences a failure of leadership and capitulates. They land; the mariners go ashore, and they are stranded without food as the offshore winds die and for weeks refuse to blow. Eventually, the starving mariners can no longer resist t he tem ptation to eat t he c attle, a nd t hey convince themselves that sacrificing to Helios the sun g od w ill r ender t he c urse i neffectual. They butcher and e at the cattle, and a b reeze springs up. They set sail for the open sea, but Helios calls on Zeus for redress, and Zeus destroys the ship and all its crew except Odysseus. He clings to the mast and is blown back to the strait between Scylla and Charybdis, where this time he and his mast are caught in the whirlpool. He narrowly escapes by leaping for an overhanging branch and holding on till the whirlpool coughs up his mast. He clings to the mast for nine days, finally beaching on Ogygia, where we readers first met him.

Books 13–14

AĀer the account of Odysseus's voyage, the Phaekians keep their promise. They shower him with precious giĀs and take him home to Ithaca, where they deposit him and his treasure on the beach while he sleeps. On awakening, Odysseus is disoriented, but, in Book 14, he eventually reconnoiters, and gains an ally in his faithful swineherd, Eumaeus.

Books 15–16

In Book 15, Telemachus has r eturned to I thaca, successfully avoiding a death trap that the suitors had s et f or h im on t he h igh s eas. A t a bout t he same time, the swinherd Eumaeus tells Odysseus that the hero's aged father, Laertes, still lives. Book 16 sees the reunion of Odysseus and Telemachus. Disguised as a beggar, O dysseus shows up at his own palace gates in Book 18. There, in a scene filled with p athos, O dysseus e ncounters h is ol d dog, Argos, which had been leĀ on the trash heap to die. Though the dog had only been a pup when Odysseus leĀ, A rgos r ecognizes h is master a nd expires in a paroxysm of canine ecstasy. Book 18 also recounts Odysseus's powerful muscles as he strips for a fistfight with the formerly boastful but increasingly frightened Irus—a hanger-on of the suitors. Books 19–20

Book 19 focuses on a scar that Odysseus carries from a childhood hunting accident when he had been almost fatally wounded by a boar's tusk. In

addition to being an emblem of O dysseus's mortality, the scar becomes the token by which both his old nurse, Eurykleia, and his wife, Penelope, recognize him.

Storm clouds gather over the suitors' cause in Book 20. O dysseus r ecruits as a llies his swineherd, his son, his father, and his nurse Euykleia. The Ithacan seer Theoclymenus predicts the suitors' destruction.

Books 21–22

In Book 21, Odysseus strings a bow that he alone can both string and draw and reveals his identity to all by making a trick shot that is his trademark. His a rrow p asses t hrough t he hole s i n 1 2 a xe handles without to uching a ny. This is the signal for general carnage to begin. Eurykleia locks the women of the household in their quarters; Odysseus's confederates se ize w eapons f rom t he armory; the goddess Athena joins the fray in support of her favorite Odysseus; and the suitors are wiped out in Book 22.

As *The Odyssey* ends in the 24th and final book, Odysseus settles the blood feuds that the deaths of the suitors have provoked with their families.

Taught for 3,000 years as an allegory of human life, and sometimes n ow app roached as a n existentialist novel, *The O dyssey* remains on e of t he principal literary glories of the Western tradition.

Oedipus Seneca (first century C.E.)

Based on So phocl es' Oedipus Tyrannus, a nd closely following the plot of his predecessor playwright, Seneca has different interests in telling the familiar story: As a child, O edipus is exposed to die because of a p rediction that he would kill his father and become his mother's husband. Rescued, he grows up a st he ado ptive s on oft he king of Corinth. Whi le on a journey, O edipus b ecomes involved in a disagreement over right of way with a party of travelers, and in a fit of road rage he kills all of them but one. Among the slain but unknown to Oedipus is his real father, King Laius of Thebes. Oedipus j ourneys t o Thebes, wh ere h e u nravels the Sphinx's riddle, b ecomes k ing, a nd ma rries the widowed queen Jocasta-his mother. In due course, she bears him children. Therea Aer, a horrible plague afflicts Thebes. Oedipus insists on finding the reason, despite advice to the contrary from the blind prophet, Teiresias, who knows that Oedipus is a patricide, living in incest, and himself the reason that the gods have sent the plague. Sophocles dwells on the slow dawning of that truth on Oedipus and focuses on the horrible consequences of his discovery: the suicide of Jocasta and Oedipus blinding himself before going into exile.

Seneca, too, follows this sequence of events, but he was much more interested in magic, s orcery, and foretelling the future than was Sophocles. To accommodate that interest, Seneca dwells on such material a t m uch g reater l ength t han S ophocles does, p utting on s tage n ot o nly t he p rophecy o f Teiresias b ut a lso add ing a lo ng s peech by t he prophet's d aughter Manto, who de tails the sacrifice. That speech reveals another Senecan interest that d id n ot m uch c oncern Sophocles—oratory itself. Seneca rarely misses an opportunity to give a character a good and oĀen lengthy speech.

To a ccommodate h is i nterests i n ma gic a nd oratory, a nd t o app eal to t he Ro man t aste f or musical i nterludes, l ove s cenes, a nd sh orter drama, Seneca had to compress Sophocles' material substantially. Seneca therefore loses much of the effect produced in Sophocles' Greek original by Oedipus's slow recognition of his guilt, and his characterization suffers.

On the positive side, however, Seneca's version is more thrillingly horrible. His heightened use of foreshadowing produces credibility, and he a chieves a d egree of p sychological a nalysis that is a hallmark of his drama.

Oedipus at Colonus Sophocles (ca. 406 B.C.E.)

Sophoc les ' last t reatment of t he material in t he Oedipus cycle and likely his final play as well, *Oedipus at Colonus* was staged by the playwright's son, Sophocles the younger, aÅer his father's death.

Following t he e vents chronicled i n *Oed ipus Tyr annus*, the blinded and ill-starred O edipus continued to live in Thebes as the subject of his brother-in-law, King Creon. With time, however, Creon and other influential citizens decided that Oedipus, whose u nwitting pa tricide a nd i ncest had brought catastrophe upon his native city, still constituted a danger to t he state and should be exiled. E teocles a nd P olynices, his t wo s ons b y his in cestuous marriage to h is mother J ocasta, though d estined t o r ule in M ycenae s omeday, made no effort to prevent their father's exile.

Therefore, ac companied only by h is d aughter, Antigone (see *Ant ig one*), t he sightless old man set out for the suburb of Colonus, just outside Athens in Attica and about a mile from the Acropolis the place, a s it happens, of Sophocles' birth. At that place i s a g rove s acred to t he Fu ries, o r Erinyes, who have become the Eumenides—the bearers of blessing, as recounted in A esch ylus's play of the same name (see *The Eumenides*). It is at this g rove that Antigone and Oedipus have arrived as the play opens.

Antigone seats the weary O edipus on a s tone and is about to go find someone to tell her where they a re, when a pe asant en ters. H e i nterrupts Oedipus's i nitial que stion b y w arning h im to move, that his presence is polluting ground sacred to the Eumenides, to Poseidon (the god of sea and earthquake), and to t he Tit a n P rometheus (see *Promet he us Unbound*). O edipus t akes t his a s an omen and declares himself a suppliant. He discovers that he is at Colonus and that Theseus, the ruler of A thens, r ules at C olonus a s w ell. The peasant tel ls h im to r emain t here while he a sks the inhabitants if Oedipus can stay or if he must resume his wanderings.

Oedipus prays to the Eumenides, and the audience learns that an oracle predicted that he should find h is final shel ter i n t he l and s acred to t he "dread goddesses."

In the guise of citizens of Colonus, the chor us comes seeking Oedipus, who first hides and then reveals himself. The chorus and A ntigone cooperate i n leading O edipus a way from the forbidden ground to a s eat n earby, promising that he will find shelter among them as long as he wishes to remain.

At first Oed ipus tries to c onceal h is i dentity, but w hen pre ssed, he ad mits i t. The c horus i s overcome by fe ar and t ells h im to le ave. H e reminds them of their promises, and a discussion follows in which the old man points out the distinction b etween s omeone w ho si ns w ith f oreknowledge and one whose fate has overcome him through no fault of his own. The citizens leave it up to Theseus to decide and inform Oedipus that a messenger has already gone to bring the king.

As t hey a wait his a rrival, A ntigone s ees a woman a pproaching a nd r ecognizes her a s her sister Ism ene. I n t heir en suing e xchange a bout the reason for Ismene's coming, O edipus makes the play's first reference to his disapproval of the behavior of his sons who have no feeling for their

492 Oedipus at Colonus

father and display no filial piety. One is tempted to p erceive a n a utobiographical subte xt i n t his emphasis within the play, as Sophocles' sons had attempted to have him declared incompetent. The old pl aywright, t hen a round 9 0, c onvinced t he jury of his competence by reading aloud for them a dra \bar{A} of this play.

Asked for the reason she has sought her father out, Ismene first reports the events that comprise the substance of Aeschylus's play Seven against Thebes. H er b rothers ha ve qu arreled; Ete ocles has taken over the rule of Thebes and exiled Polynices, who in turn has gone to Argos and raised an army to assault his native city. Next, however, Ismene brings her father word of favorable Apollonian or acles c oncerning O edipus h imself. When he dies, the place where he is buried will be especially blessed. In order to gain control of Oedipus, Ismene warns, Eteocles has sent Creon to take Oedipus back closer to Thebes so that on his death his native city, not Athens, will profit from h is p assing. O edipus v ows n ot to r eturn and inquires from the chorus what rites he needs to p erform to ap ologize to t he Eu menides f or violating their g rove a nd to p ut h imself u nder their protection.

The citizens of C olonus recount in detail the steps he must take to achieve ritual purification and become an initiate of the E umenides' cult. Ismene undertakes to p erform the ritual on her father's behalf. While she is so engaged, the chorus prevails upon a reluctant Oedipus to recount for them the events that have led him to his current state. As that dialogue ends, Theseus arrives from A thens, an ticipates O edipus's n eed, a nd promises him shelter and protection in the Attic countryside. The chorus sings, praising the pleasures and the beauties of the region surrounding Athens and especially its olives.

Creon now a rrives with a n armed escort and attempts to p ersuade O edipus to go home with him. O edipus r efuses a nd c riticizes Cr eon's motives. Giving up on Oedipus, Creon orders his escort to seize Antigone and Ismene. The citizens of C olonus re sist, a nd Cr eon a ttempts to s eize Oedipus by force as well, but Theseus and his retinue arrive at this juncture. A Åer much posturing and threatening by all concerned, it appears that the k idnappers are m aking o ff with O edipus's daughters while Theseus and the citizens debate with Creon. Theseus places him under arrest.

The chorus reports a chase scene as Theseus's troops overtake Creon's escort, liberate the girls, and bring them back. They enter with Theseus. A Āer a joyful reunion with his daughters, Oedipus learns from Theseus that another man is requesting an audience with him. Oedipus concludes that it must be his "hateful son." He is right.

Polynices enters and complains that the younger Ete ocles has usurped the power due Polynices and exiled him from the city. Ete ocles attributes this m isfortune t o th e o peration of th e F uries, whose en mity was p rovoked by Oed ipus's c urse on his son. Polynices essentially asks his father to revoke h is c urse and g ive h im a ble ssing s o that the gods will favor h is cause against h is brother. Oedipus reminds Polynices that he e xercised the city's power when Oedipus was exiled. He spits on his son and sends h im off with h is curses. Polynices ta ke h is le ave of h is si sters, a nd A ntigone begs him to save himself and h is city by abandoning h is pl ans to i nvade Thebes. H e r efuses a nd departs.

Oedipus now hears thunder and recognizes it as a sign from Z eus that death is drawing near. He sends for Theseus so that he can tell the king about the benefit that Athens will gain by allowing O edipus's b ody to be buried t here. He tells Theseus that Athens will enjoy eternal protection if Theseus k eeps s ecret t he sp ot w here O edipus dies an d i s b uried. Oed ipus, Theseus, and the women depart, and the chorus prays for the spirit of Oedipus in the underworld.

A m essenger en ters to a nnounce O edipus's death and detail the manner of his passing. He tells how he shed his filthy travel garments, how his daughters ritually bathed him, and how the three e mbraced e ach o ther, t he g irls w eeping and the father c omforting them. Then a g od's voice called out that it was time to go and that Oedipus was waiting too long. With that, Oedipus bade Theseus fa rewell a nd en trusted h is children to the king. He urged his daughters to bear up courageously, and those who were in attendance e scorted his daughters a way. Then, observed only by Theseus, Oedipus disappeared, and no one else e verk new the manner of his death. Theseus saluted the earth and the sky. The messenger reports that Oedipus was taken by a miracle.

Antigone expresses a desire to go home. Ismene is doubtful as their dialogue dimly foreshadows the fate that awaits them in Thebes. They beg Theseus to take them to their father's tomb so they may p erform d uer ites, b ut Theseus r efuses, explaining t hat he p romised O edipus n ever to reveal his resting place.

The chorus ends the play, advising that there is no changing the past.

Oedipus Tyrannus (Oedipus Rex,

Oedipus the King) Sophocles (fifth century B.C.E.)

Generally considered to be Sophocl es' best play, *Oedipus Tyrannus* opens in the midst of a series of terrible misfortunes for the citizens of the city of Thebes. The crops are dying in the fields, the herds are expiring in the pastures, the children of the women of Thebes are stillborn, and plague is decimating the population. A priest—a member of the chor us—and the city's king, Oedipus, are discussing this situation, and the priest implores Oedipus to do something about it.

Oedipus reports that he has sent his brotherin-law, Creon, to the temple of Phoebus Apollo in Athens to learn the cause and the remedy for the city's s uffering. Cr eon r eturns w ith t he g od's answer. T o r elieve t he c ity's m isery, i t w ill b e necessary to banish a man who is under the gods' curse and is defiling the city.

Under O edipus's c lose que stioning, Cr eon reports that the city's former king, Laius, and all his retinue, except for one man, were murdered on a visit to Del phi. That man could only report that a band of robbers had done the deed. A subsequent i nvestigation le d n owhere, a nd Thebes lies under the curse, in part, because King Laius's death is s till u navenged. The Sp hinx has d arkly suggested that the fault lies closer home.

Oedipus vows to begin again at the beginning of the matter to s olve the mystery and free h is people from the curse. The chorus, representing the people of Thebes, sings the woes of the city and prays to the gods for relief.

Oedipus makes a public de claration in which he promises amnesty to anyone who has information about the murder of Laius and will report it. At the same time, he orders the populace to shun the murderer, neither to speak to nor shelter him, nor to admit him to the religious rites of the city. He prays that anyone disobeying will be destroyed by the a fflictions that the city suffers. The leader of the chorus speaks for all, denying k nowledge of t he t ruth, but t hey adv ise O edipus to sp eak with th e b lind p rophet Teiresias—the w isest o f living mortals.

A boy leads Teiresias onto the stage. Teiresias begs to be allowed to leave. The ensuing exchange between t he p rophet a nd O edipus ma kes c lear that Teiresias knows something but wishes to be excused f rom sha ring wh at he k nows. Oe dipus grows an gry and t hreatens Teiresias, su ggesting that if he were not blind, Oedipus would suspect him o f b eing t he c ulprit. That a ccusation s o offends t he p rophet t hat he d eclares w hat he knows: Oedipus himself is "the accursed defiler" of Thebes. I ncredulous, O edipus p ushes for f urther information. Teiresias declares that Oedipus is the killer of Laius, that he lives in "unguessed shame" with his nearest kin, and that greater woe awaits him.

Oedipus thinks that his brother-in-law, Creon, has put Teiresias up to repeating these lies in an effort t o u surp t he t hrone. Teiresias den ies t he

accusation and predicts that Oedipus will discover he i s t he f oe o f h is o wn k in a nd w ill su ffer under both his mother's and his father's curse. He foretells that the murderer will be found in Thebes: seemingly a stranger, but in fact a native who will become an e xile; sighted n ow b ut s oon to become blind; both brother and father of his children; s on a nd h usband o f h is m other; a nd t he murderer of his father.

Following the chorus's reflection on this turn of e vents, a n angry C reon a ppears t o answer Oedipus's charges a gainst h im. O edipus i s i rrationally upset, but Creon rationally defends himself ag ainst t he c harges, a nd O edipus sh iĀs to investigating the murder of Laius. O edipus concludes that Teiresias would not have named h im as t he m urderer of L aius had t he s eer n ot first conferred with Creon. Oedipus a nd Creon c ontinue s quabbling un til J ocasta, O edipus's wife and m other, e nters and reproves t hem for fol ly. The chorus joins her until Oedipus withdraws his accusations.

In a n e ffort t o pu t O edipus's m ind a t r est, Jocasta t ells how L aius m et h is de ath a t a pl ace where three roads meet. She also recounts how, in an effort to avert his predicted fate of being slain by h is own child, Laius took their firstborn, had h is feet p inned t ogether, a nd had h im e xposed upon a mountainside for the wild b easts to e at. On he aring t h is s tory, O edipus i s appa lled. H e asks Jocasta for further de tails and begins to b e convinced that he is indeed the murderer whose presence in Thebes has provoked the wrath of the gods.

The g enius of S ophocles' p resentation of t his material, familiar in all its details to his audience, lies first in the interaction between Oedipus's state of mind and the emergent details of the story. The psychological realism that Sophocles achieves is a remarkable accomplishment. At least as striking is the moral credibility that Sophocles achieves as he presents a public-spirited l eader, a ttempting to resolve a realm-wide c risis, w ho finds h imself ironically condemned by his own proclamations.

At this point, however, Oedipus still hopes that what he fears may not be true. He wishes to crossexamine t he si ngle w itness to L aius's m urder. Jocasta re ports th at when the man r eturned to Thebes and found O edipus r uling, he a sked for assignment as a s hepherd outside the city—a request she willingly granted.

Oedipus now reveals that the oracle of Phoebus Apollo at Delphi had predicted that he would slay his father, marry his mother, and produce a brood of o ffspring i n i ncest. O edipus t hought, however, that h is father was Polybus of C orinth and h is mother was M erope of Do ria. To a void the curse, he had leĀ Corinth, and on the road he met a nd k illed a nother wayfarer a nd h is en tourage in a dispute over right of way.

Oedipus and Jocasta begin looking for flaws in the evidence that will prove once and for all that he did not kill Laius. Moreover, she remarks that since her c hild perished as an infant, there is no way t hat she co uld beco me i ncestuously l inked with him.

A messenger now arrives from Corinth, where King P olybus has d ied. The C orinthians w ant Oedipus t o co me and rule them. B oth h e an d Jocasta take this as evidence that the predictions of the oracle are false. Yet Oedipus is still nervous about t he p rediction of i ncest. The m essenger, trying to set h is m ind at ease, ex plains that h e himself, o nce a s hepherd on M t. Cithaeron, received Oedipus as an infant from the hands of another s hepherd w ho had b een c harged w ith exposing h im a s prey for t he w ild b easts. The messenger, in turn, presented the infant to K ing Polybus. The chorus identifies the other shepherd as the very m an for whom O edipus has a lready sent.

Jocasta turns pale and tries to dissuade Oedipus from further investigations. She declares herself m iserable, t ells Oed ipus i t i s her last word, and ru shes from the stage. Oed ipus thinks that his humble birth has upset her.

Now the aged shepherd arrives, and he and the Corinthian messenger recognize one a nother a s fellow shepherds in the time of their youth. Under duress, the Theban shepherd ad mits that he had given Oedipus to the Corinthian messenger and that the child he gave away was Laius's own. The Theban shepherd confesses that he had pitied the child and spared its life.

Now O edipus realizes that the prophecy has been fulfilled—that he is indeed the incestuous patricide it had foretold and the reason that Thebes lies under the curse. He cries out that he has looked h is l ast o n l ight a nd r ushes i nto t he palace.

A m essenger en ters a nd r eports t hat J ocasta has taken her own life. She had lo cked herself in her c hamber. O edipus, f rantic, had f orced t he doors and found her hanging, cut her body down, and then, with the pins of her gold en bro aches, blinded himself.

A second messenger obeys the blind Oedipus's command to show the people the cause of their affliction. The pa lace ga te s wings o pen, a nd a bloody, blinded Oedipus comes forth, attesting to the ironic operation of unavoidable fate.

Creon n ow a ssumes t he le adership of Thebes. Oedipus begs to be sent from the city into exile. He asks Creon to rear Oedipus's two sons by Jocasta as his own. Then he sends for his daughters, Antigone and Ismene, and parts with them reluctantly when Creon reminds him that Oedipus no longer rules in Thebes.

The chorus ends the play with a bit of wisdom, already a ncient when S ophocles b orrowed it as his cur tain l ine: C ount n o p ersons happy u ntil they leave this life, free from pain.

"Olympian 1" Pindar (476 B.C.E.)

Among the ancients and probably still today, the best remembered among Pindar's vict or y od es is one entitled "Olympian I." Pindar wrote it for the Sicilian ruler of the city of Syracuse, Hieron, on t he o ccasion of Hieron's horse winning t he single-horse r ace at the Olympian ga mes in 476 b.c.e.

Water, gold, and fire, in that order, sings Pindar, a re t he b est t hings i n t he w orld, b ut i n athletics t he Oly mpian ga mes a re p reeminent, and th e v ictor's s ong a mong t hose w ho ho nor Zeus at t hose g ames m ust b e s ung to c elebrate Hieron and his horse, Pherenikos (the b earer of victory). By association, the poet then shiĀs the scene to an earlier time when the mythical hero Pelops, son of Tantalus, won a chariot race competing f or the h and o f H ippodamia. Pi ndar leaves u ntold the u npleasant o utcome o f t he story, which i nvolves a c urse on the succeeding generations of P elops's descendants, b ut t he superiority of Hieron is nonetheless implicit.

Rather than t ell th at t ale, P indar's s trategy moves the poem b ackward in time to a moment when Poseidon, the sea god, first kidnapped Pelops to be his lover and then whisked him to the abode of t he go ds on "golden s teeds." Then t he p oet explicitly denies the part of Pelops's myth that says

496 On Literary Composition

he was dismembered, cooked, eaten, and miraculously restored to life. Again by a process of association, Pindar shiĀs back in time to speak of Pelops's father, T antalus, who was punished for g reed i n Hades by never being able to quench his thirst or satisfy his hunger.

Next Pindar moves forward again to Pelops and to h is i nvoking P oseidon's g ratitude f or f ormer favors i n P elops's a ttempt t o w in H ippodamia. Poseidon grants the prayer with the giĀ of a golden chariot and tireless, winged horses. Once the bride is won, Pindar speeds forward in time to Pelops's fathering six children, then to Pelops's tomb beside the altar of Olympian Z eus, and on to t he games and his patron Hieron's victory. The poet hopes for a future victory in the chariot race. (In the year of "Olympian 1," Pindar's other patron, Theron, won the c hariot race—a v ictory P indar c elebrates i n "Olympian 2" and "Olympian 3.")

Pindar's poem at once celebrates his patron and reverences h is go ds. B y i mplication, it a cknowledges the dark side in human affairs—particularly mortality—but it principally celebrates the accomplishment t hat i s p ossible even w ithin the short span of one human life.

On Literary Composition Dionysius of Halicarnassus (after 30 B.C.E.)

Written as a gi \overline{A} for t he s on of D ionysius of Hal icar nass us's Roman friend, Rufus Metilius, On L iterary Composition seems to address t his subject for t he v ery first t ime in t he a nnals of Greek discourse. A \overline{A} er promising to deal in a sep-

arate treatise with the question of the selection of vocabulary, D ionysius out lines the subjects that his composition will address. What is the nature of composition in its principal varieties? What is the d istinguishing c haracteristic of e ach k ind? Which s orts a re m ost e ffective? W hat are the qualities of effective prose and poetry?

Dionysius t hen u ndertakes to i llustrate t he principles of effective composition using passages taken f rom fine aut hors. Hi s first ex ample i s drawn fr om Homer's *The Odyssey* and quotes the passage in which Odysseus arrives at the rustic h ut o f h is s wineherd, Eu maeus. I ts g enius, asserts D ionysius, li es in t he p assage's c areful metrical arrangement of commonplace language that catalogues everyday events, and its beauty is the style with which Homer deploys his language. The critic turns next to a passage from Her odotu s to illustrate the same principle with a passage of prose.

Dionysius n ext i llustrates t he i mportance of selecting a verse form appropriate to t he effect a poet wishes to achieve. To illustrate this point, he quotes a passage from Homer in dactylic hexameter (see q uant it at ive verse). Then Di onysius revises t he passage s everal t imes i n a lternative meters, leaving it to the reader's judgment to see that n one of t he alternatives w ork as w ell as Homer's original.

Turningh is a ttention to g rammar and t he order of j oining t ogether clauses to construct sentences—or, a s h e labe ls t hem "periods"— Dionysius follows a similar method to illustrate the beauties that can arise from sentence construction. H e a lso concerns h imself w ith t he melody of l anguage, with r hythm and th e cadences of emphasis, and with the variety arising from the combination of v arying le vels of pitch and length of pauses that characterize language but that become the raw materials of style in the hands of a skillful author. Lest his reader be confused, however, Dionysius carefully discriminates bet ween t he m elodic qu alities o f speech and those of music.

Also c areful t o allow f or t he p references o f individual tastes, Dionysius i nstructs the would-

be writer to vary his style tor elieve monotony. Good style, Dionysius insists, "resembles a finelywoven net"; it "avoids everything rash and hazardous," as Stephen Usher translates the Greek.

Sappho, D ionysius finds, b est i llustrates t he lyric style of poetic composition, which he proves by quot ing i n f ull her lovely *Hymn t o A phro-dit e*. As it is the only complete example of an ode of Sappho's le Ā to us, history is indebted to Dionysius for rescuing it through his work.

Among h istorians, Di onysius a dmires the "rugged and austere" prose of Thucydides as the best w ork of a g roup w ho s tand i n t he s econd rank of w riters, though he a lso has k ind word s for E phorus a nd Theopompus, of whose work only fragments remain. A mong e pic p oets, Dionysius admires the style of Hesiod; among tragedians, only that of Eur ipides; and among orators, only the prose of Isocr at es.

Persons a spiring t o b ecome g ood o r bet ter writers, e ven tod ay, c an p rofit f rom a c areful reading of Dionysius's treatise.

On the Crown (De corona; In Defense of *Ctesiphon*) Demosthenes (330 B.C.E.)

In 336 b.c.e., Demost henes' admirer and partisan, C tesiphon, prop osed a warding a golden crown t o D emosthenes i n c onsideration of t he famous orator- statesman's singular s ervices to Athenian interests. Demosthenes had p reviously enjoyed si milar re cognition. O n t his o ccasion, however, h is p olitical o pponent a nd p ersonal enemy, Æsch ines, immediately filed suit against Ctesiphon, charging that his proposal was unconstitutional. F or reasons t hat are n ot a ltogether clear, this case was not heard for six years. When at length it did come to trial, it was argued before a jury of 500 Athenian citizens. Æschines a lleged u nconstitutionality o n t he grounds that Demosthenes' accounts had n ot yet been p roperly a udited, t hat t he pro clamation of the award at the great festival of the god Dionysus (see Gr eat Dionysia) would amount to sacrilege, and th at th e g rounds pr oposed for t he r eward contained errors of fact about Demosthenes' merits. In support of his charges, Æschines presented arguments based on Demosthenes' actions during four p eriods of h is po lti cal life. The suit a gainst Ctesiphon thus became a thinly disguised personal attack on Demosthenes—one calculated to assassinate the statesman's character.

Demosthenes' brilliant oration *On the Crown* destroyed Æschines' arguments, as much by emotional appeal as by factual argument, and resulted in the accuser's opting for voluntary exile.

In his speech, Demosthenes demonstrates that he h ad a lways s upported A thenian i nterests against those of Philip and Alexander of Mac edon. This, he convincingly demonstrates, was not the case with his opponent, who always supported Macedonian interests. Demosthenes traces the clever wa ys i n which t he Mace donians had manipulated Athenian embassies, deceiving them with fr iendly words w hile a ctively wor king against Athenian interests through military action and diplomacy.

Demosthenes a lso ac cuses Æ schines of b eing an agent of the Macedonians. Responding to each charge made by Æschines, a city functionary reads aloud public do cuments several times at Demosthenes' b ehest. These d ocuments, wh ich i nclude diplomatic le tters f rom P hilip of M acedon, s ubstantiate the claims of the defense.

To the d etriment of Æ schines' ac cusations, Demosthenes r ecalls the c omparative e ffectiveness of his and Æschines' public service—a strategy that puts the accuser at a distinct disadvantage. Essentially, Demosthenes shows that Æschines is probably guilty of both deception and treachery. By having the law read, Demosthenes also demonstrates that no sacrilege is involved in presenting a crown at the Great Dionysia.

To f urther u ndermine Æ schines' c redibility, Demosthenes m ounts a v itriolic p ersonal a ttack against him and his parents—even ac cusing his mother, who was a priestess, of performing weddings in a public latrine. He also ac cuses Æschines of being personally responsible for the chain of events that had led to the Macedonians taking u parms a gainst the A thenians and, by implication, for the A thenians' defeat. The content of this considerable portion of the speech traces a detailed history of the demise of At henian democracy.

The result of the oration was an overwhelming vote in f avor of D emosthenes. Æ schines got s o few votes that h is failure triggered an automatic penalty against those guilty of bringing frivolous lawsuits. Nonetheless, the outcome was ironic in a sense. The policy of appeasing Macedonia that Æschines espoused might have benefited Athens more in the long run than the policy of opposition to Macedonia that Demosthenes favored.

On the Nature of the Gods Cicero

(ca. 45 B.C.E.)

Written during Cicero's most productive literary period, 44-45 b.c.e., On the Nature of the Gods (De natura deorum) takes the form of a conversation am ong t hree c ompanions w hose p oints o f view represent those of the prevailing belief systems in vogue among the practitioners of ancient Greco-Roman philosophy. These systems included that of the followers of Epicur us-the Epicureans. The first spea ker, Gaius V elleius, p resents their views. The host of the company, Gaius Aurelius Cotta, acts as the champion of the Academicsthose who followed the religious precepts that had developed from the philosophy of Plato (see Academic [Platonic] s ect of P hilosophy). The third position argued is that of the Stoics (see St oic ism). Representing their point of view is Lucilius Balbus. Cicero himself is also effectively present, and his personal views on theological matters not entirely represented in his pages—is peculiarly complex and pragmatic.

Philosophically a nd i ntellectually, Ci cero felt most comfortable and most closely a ligned with the religious skepticism of the Academics. As a young man visiting Greece, however, he had been initiated into the Elusinian mysteries, and he considered that initiation one of the most enlightening an d de eply m oving e vents o f h is l ife. H e subsequently en joyed a l ifetime app ointment a s the chief augur (a priest in charge of prophecy) of Rome. In that office, it was his responsibility to interpret t he en trails of s acrificial a nimals and announce what the condition and appearance of the i ntestines in dicated a bout t he f uture a nd about the relative auspiciousness of various courses of action under consideration. He was utterly skeptical ab out t he e ffectiveness o f s uch p rocedures, but a s a political pragmatist, he t hought that the preservation and observation of a s tate religion was an absolute necessity in keeping the masses u nder c ontrol a nd en couraging t he p rivate observation of morality. Moreover, following the untimely death of his beloved daughter, Tullia, C icero b egan to b elieve t hat, u pon t heir deaths, p ersons l ike T ullia, w hose s ouls were unspotted, went directly to join the gods. Thus, he announced his intention to build a shrine to a deified Tullia on one of his estates-a place where he could go to c ommunicate with h is goddessdaughter. He was writing about the gods, therefore, from a complex and personal point of view.

In p refatory r emarks b efore t he d ialogue proper, Cicero observes that no subject provokes so m any d ifferences of o pinion a s t heology. H e also remarks that, while all those opinions could be wrong, only one of them can possibly be right. He announces that, as an Academic philosopher, he believes that while certainty seems unachievable regarding such questions, probability of truth is enough to lead a wise person to treat a precept as true.

Within the dialogue, Cicero characterizes the first speaker, Gaius Velleius, as a know- t- all Epi-

curean f or w hom c ertainty do es e xist. V elleius takes the company on a brief tour of the history of Greek philosophy, pausing along the way to scoff at each of the various conceptions of godhead—at least a s he u nderstands them—proposed by t he various philos ophers. All their opinions, Velleius thinks, are almost as absurd as those proposed by the "envenomed honey" of Egyptians, magicians, and poets' mythmaking.

Having scorned all views but his own, Velleius follows Epicurus in suggesting that the best proof of the existence of a god arises from the innate idea of blessed immortals that all human beings seem t o h ave. He then quotes Epicurus on the nature of such a dei ty: "What ever is blessed and eternal must... be free from trouble... cause others no trouble..." and remain "untouched by anger or affection."

Cicero h imself considered s uch a v iew t o amount simply to crypto-atheism. Besides, such a disengaged d eity a s E picurus posited—one w ho not only did not punish human lapses but who also took no interest in them—would be of no practical use to the political managers of a state.

Velleius c ontinues a t s ome le ngth to e xplain the corollaries that arise from Epicurus's view of the gods. There must be as many of them as there are mortal human beings; gods live the happiest of all imaginable lives, rejoicing in their wisdom and holiness and the certainty of e ternal happiness. Moreover, the gods must have human form.

Throughout Velleius's diatribe, Cotta has waited patiently, a nd he s peaks ne xt. A Åer p raising Velleius as an incomparable exponent of the Epicurean p oint of view, h e r egrets t hat such a n admirable person should hold opinions both irresponsible and ridiculous. AÅer Cotta admits that he himself holds a religious office and has lingering doubts about the existence of gods, he undertakes a critique of Velleius's arguments. How can he claim that all people have an innate idea of god when he doesn't even k now who all people a re? How a bout p eople w ho den y t he e xistence o f gods? To agree with Epicurus, one must assent to his t heories c oncerning all th ings a rising from primordial atoms—theories that Cotta denies. He accuses V elleius o f p resenting a s self-evident matters that in fact are totally improbable. Particularly and vehemently, Cotta objects to the notion that gods must have human form; with apparent pleasure, he tears that notion to bits. He is equally hard on the ideas that the gods must be happy and that they live existences of continual enjoyment. Finally, Cotta declares that he has no use for gods to whom the doings of human beings are of n o consequence, and he promulgates Cicero's point of view that Epicurus has paid lip service to the notion of the existence of gods while his characterization of them has, in fact, destroyed them.

As the se cond book begins, Velleius passes a favorable judgment on the form of Cotta's argument but a n unfavorable one on its content, and he calls on Balbus to offer his viewpoint. Balbus first wants Cotta, who has attacked the false represen **t** ion of the gods, to favor the company with a true depiction. Cotta reminds the company that he finds it much e asier to s ay what he do es not believe than what he does.

Balbus t herefore p roceeds. H e sa ys that th e Stoic philosophers divide theology into four parts: They teach the existence of the gods, they explain the nature of the gods, they describe the way gods govern t he world, and they show how the gods care for h uman b eings. O wing, ho wever, to t he limitations of time, Balbus intends to speak only to the first two points. Cotta objects, saying that the discussants have plenty of time for the entire explanation.

Balbus's ev idence f or t he e xistence o f g ods rests on reports of some of them having been seen in battle, fighting on the Roman side or bearing messages. H e cites t he f ulfillment o f p riestly prophecies a nd pre dictions a s e vidence o f t he gods' e xistence. H e is guilty of a *post ho c e rgo propter ho c* (aÅer this, therefore because of this) error of logic in attributing the loss of a sea battle to a commander's disregard for prophecies when he drowned the sacred chickens.

Balbus next turns to the blessings that human beings derive from the fecundity of the earth as evidence of the gods' existence and concern for humanity. He also cites the orderly processes of

the sidereal universe and argues that only human egocentrism w ould i magine n othing g reater, more r ational, or more intelligent than human beings—that human intellective powers must be derivative f rom d ivine i ntelligence. This l ine of argument leads him to a ssert that "the universe and the divine are one." All the parts of the world have sense and reason, he argues, and he adduces many authorities in support of that view.

As Balbus discusses each part of the world, the earth, the stars, and the planets, he includes them among the gods. As he discusses the Roman pantheon, he explains how the names of the gods contribute to the revelation of their divinity. For the rest of B ook 2, Balbus multiplies examples from the natural world demonstrating to his satisfaction that all parts of the universe are divine and that they reveal a concern with the well-being principally, but not only—of human beings.

The third and final book of *On the Nature of the Gods* reveals signs, especially near its end, that the work probably had not reached the degree of editorial po lish that C icero had i ntended f or i t before he found it necessary to abandon his project. As this book opens, Cotta expresses the view that, as a Roman priest, the traditional religion of h is forefathers, r ight or w rong, s atisfies h im, and the sophisticated arguments of the philosophers do not sway his belief in the benefits of the system that he practices. Nonetheless, Cotta challenges Balbus to produce reasons for believing in the gods.

When B albus is unsure what Cotta is aÅer, Cotta cites all Balbus's credulous examples about the appearance of deities in battle and so on. Item by item, C otta none- too-gently undermines the arguments that Balbus has offered, scoffing at one point that if one follows his arguments about the universe to its logical conclusion, one will have a universe p roficient a t r eading books. H e a lso objects to t he p redictability of th e b ehavior of natural p henomena b eing c ited a s g rounds f or positing their divinity. If the universe is a living creature, Cotta objects, then it cannot be immortal; like other living creatures, it will die, and thus it cannot be an immortal god. Generally speaking, alluding to such natural phenomena as wine or grain as if they were gods is merely a figure of speech, not a serious attribution of divinity.

With mordant irony, Cicero has Cotta continue with a devastating critique of the entire Roman pantheon. In doing so, he r eveals vast er udition concerning their folkloristic and mythic origins. This critique continues until the end of the book. There, Ci cero b rings h is work to a ha sty c lose, reporting that, while Velleius thought that Cotta had w on t he a rgument, Ci cero h imself t hought Balbus c ame cl oser to s eeing t he t ruth of t he matter.

Oppian of Corycus (Oppian of Corycus, Oppian of Apamea, Syria) (fl. ca. 170 c.e., fl. after 211 c.e.)

Oppian p resents a p erhaps i nsoluble proble m. There are two poems, one on hunting and one on fishing, attributed to Oppian, but no one is sure if the poems are the work of one Oppian or of two. I shall mention both poems here, but I c an offer no clarification on the subject of whether or not they were composed by the same h and. A c omparative vocabulary index has already been done. A computerized textual a nalysis of g rammatical structures might help.

In any case, both works are extant. The poem on fishing—a Greek didactic poem in five books of hexameters—is entitled *Halieutica*. The one on hunting, also a Greek didactic poem in the same meter and in four books of hexameters, is entitled *Cynegetica*. While the poems both offer instruction in the sports they celebrate, they also praise the b enefits f or p eople of b eing in a n atural environment.

oral formulaic tradition

Self- evidently, h uman language is far ol der than writing, an d s torytelling and s inging m ust b e almost as old as language itself. Language, in turn, is the p rincipal i dentifying mark of the h uman species, so telling stories must be a very old practice in deed. P reliterate s ocieties survived—and still survive—in odd corners of the world as late as the 20th and 21st centuries. This has given anthropologists, st udents of folklore, and o thers with a professional interest in such matters the opportunity to study at first hand what oral literary traditions were like before they became written.

One ex ample of s uch a n or al p oetic c ulture survived a mong Yugoslavian she pherds i nto the mid- Dth century, and the students of the poems those shepherds passed down through the generations discovered that their traditional works had much i n c ommon with th e H omeric e pic of ancient Greece. Their oral poems displayed a high degree of m etrical regularity, and they used set phrases for mulas to fill out lines where the singer's or the reciter's invention might momentarily fail. P hrases such a s " rosy-fingered d awn" o r "Atreus, k ing of men" both provided memnonic filler and met the metrical expectations of a l ine of verse. Verse, of c ourse, is easier to memorize than prose, and nonliterate cultures oĀen develop specialists whose job it is to r emember word for word the old stories that contain the cultural heritage of their people.

The same and other common literary characteristics typify such early Indian heroic epics as the Mahabhar at a and the Ramayana and the Sumerian Gilgamesh E pic. Si milar lo cutions and p arallel s tories c haracterize o ther na tional epics of ancient Eurasia, many of which seem to spring from a common ocean of story shared by the hdo- Aryan peoples long b efore their migrations took them as far east as Chinese Turkestan and as far west as the British Isles and, eventually, Iceland. There is evidence that their oral storytelling culture spread even further into the eastern part of Asia and at least to the Mediterranean coast of Africa. The cosmography of the two creation s tories i n G enesis i n t he Judeo-Christian Hebrew Bible and the story of Noah and the flood, a mong others, all have a nalogues in epics in other tongues spoken in regions far removed from the lands in which the stories were first recorded in writing.

The st udents of such matters have concluded that, with respect to the Homeric poems and the national epics of Middle Eastern and Indian origin, such poems p reserve e vidence of a t ransitional period in the development of literature as it moved from the mouths of storytellers and singers (including p oets) o nto t he pa ges of ma nuscripts m ade of p apyrus or pa lm le aves. Those early epics b ear ma ny of t he characteristics of preliterate p oetic pr actice over i nto t he w ritten literature of the cultures they represent.

Similar t raditions em erged el sewhere i n t he world (or are descended at a great distance from very early common cultures). The peoples of Polynesian O ceania, for i nstance, d eveloped a r ich and c omplex o ral l iterature t hat w as p reserved from generation to generation by remarkable feats of rapid memorization. In Polynesia in historical times, proof of identity and origin could be established by reciting o ne's genealogy through h undreds o f g enerations an d t hrough n umerous

degrees of relationship. If the reason for the recitation w as t o p rove l and o wnership, a m istake could be punishable by death.

Examples of A frican oral e pic, though clearly infiltrated with e lements of foreign culture, still survive, as do e xamples of folktales in India and among the indigenous peoples of North America.

orators and oratory

In the ancient world, literature comprised a much more inclusive category than it does in modern times. W hereas we n ow categorize works like novels, plays, and poems as literature, the ancients were i nclined to consider a ny extended piece of writing as oratory, regardless of whether it was intended for private reading, for public performance, or for purposes of instruction.

Oratory, t herefore, i s i ncluded here as a branch of literature, and discussion of examples of the category appears under the names of the figures or works that significantly represent that branch. Oresteia Aeschylus (458 B.C.E.)

The group title of t he o nly c omplete t rilogy of tragic plays to have survived from ancient Greek theater, Aeschylus's *Oresteia* won the first prize for t r agedy at the Athenian city festival of the god Dionysus—the Great Dionysia—in the year of its composition. The trilogy includes *Ag amemNON*, *The Choephor i*, and *The Eumenides*.

OĀen considered as three acts of a single long tragedy, the Oresteia takes as its theme the operation of a c urse on t he house of A treus (see Agamemnon) ac ross s everal g enerations. The plays treat the role t hat the curse played in the Trojan W ar and its a Āermath; in the de ath of King Agamemnon of Mycenae; in the vengeance that his son, Orestes, takes by killing his mother, Clytemnestra, and her paramour Aegisthus; and Orestes' o wn i nvolvement i n t he c urse a s a matricide. In the context of the chilling consequences of t he c urse on t he i nnocent a nd t he guilty al ike, A eschylus examines t he r elationship b etween h uman b eings a nd d ivine p ower and between people and fate and the avenging Greek Furies.

Universally regarded as the crowning achievement of Aeschylus's surviving drama, the trilogy evidences the command that a pl aywright at the height of his powers could exercise over the convent ions of Greek d rama, o ver t he p oetic resources of the language in which he wrote, and over t he t heological a nd p hilosophical i ssues implicit in the situations his plays examine.

Orestes Euripides (408 B.C.E)

Eur ipides' version of t he final chapters on t he effects of the curse on the house of Atreus, father of b oth A gamemnon a nd M enelaus, i ncludes plays about both Electra and her brother Orestes. These t wo c ooperated i n k illing t heir m other, Clytemnestra, wh o w ith her pa ramour A egisthus h ad i n t urn m urdered t he sibl ings' f ather, Agamemnon.

The action of Orestes picks up six days aAer the burial of Clytemnestra. Orestes lies sleeping on a mat near the palace gate. His sister Electra speaks a s oliloquy, c ommenting o n t he c apacity o f human b eings to su ffer. She r eviews t he s alient features of t he c urse on the house of A treus, bringing it down through the matricide of Clytemnestra to t he suffering of Orestes in the toils of the Furies-goddesses whom Electra is afraid to na me. The siblings have been adjudged outcasts, and this is the day on which the manner of their deaths is to be decided. Their only remaining hope lies in the fact that their father's brother, Menelaus, and the Spartan fleet have arrived at the n earby an chorage of Naupl ia, br inging Helen of T roy. They intend to pick up their daughter, Hermione, leA with Clytemnestra for safekeeping.

Helen e nters a nd sp eaks. She ac cepts n o responsibility for her infidelity but blames the god Apollo. A Āer she e stablishes that, she a lso mentions that she is bereaved by the loss of her sister

Clytemnestra. Disregarding Electra's troubles and ambiguous f eelings f or her m other, H elen a sks her niece to take the sacrifices she has brought to Clytemnestra's tomb. Asked why she does not do it herself, Helen confesses that she is an object of scorn a mong t he Gr eeks. E lectra su ggests t hat Hermione r un t he e rrand, a nd H elen a grees. AĀer m other a nd d aughter e xit, E lectra le ts the audience know that Helen's "sacrifices" to her sister were halfhearted.

The ch or us enters, making noise. Electra tries to shush them s o they will not disturb the stillsleeping Or estes, b ut they loudly d eny they a re making any racket—a comic moment in a mournful play. Electra and the chorus review the situation, an d O restes a wakens. A Āer a f ew c ogent moments, his guilt surfaces and he is plagued by the F uries. A Āer a f ew m oments o f r aving, he recovers his senses. Electra departs, and he c ontinues to waver between sanity and madness.

Menelaus enters in search of Orestes. The young man embraces his uncle's knees in the manner of a su ppliant. M enelaus t hinks hi s n ephew lo oks like a corpse. AÅer further discussion of h is tortured state of mind, Orestes reveals that Phoebus Apollo ord ered h im to kill h is mother. U nder Menelaus's qu estioning, O restes e xplains t he hopelessness of h is sit uation, t he re alities of t he city's po litics, and h is e nemies' control of t he unfolding events that will culminate in his being stoned to death. Menelaus is the young man's only hope.

Now the elderly Tyndareus enters. The father of both Helen and Clytemnestra, Tyndareus expresses his displea sure at finding Menelaus talking with Orestes. He counsels his son- n- law to withhold help.

Orestes r esponds t o T ydareus's a rguments, suggesting that he is the one at fault for conceiving a w icked d aughter. That at titude f uels t he flames of the old ma n's w rath, a nd he u pbraids Orestes as before. O restes h urls a n i nsult at t he old ma n's retreating back a nd then finds Me nelaus is faced with a dilemma. Orestes pleads for his in tercession, b ut Menelaus e xplains t hat h e has long wandered over the sea and that he do es not have the men necessary to rescue Orestes by armed intervention. Resolved, apparently, only to do nothing, Menelaus walks out on his nephew. Orestes judges his uncle a coward.

Orestes' f riend P ylades n ow a rrives. P ylades was Orestes' confederate in making preparations for t he m urders o f C lytemnestra a nd her pa ramour, A egisthus. The t wo y oung m en d iscuss the situation. They agree that matters look grim, but P ylades nonetheless promises to t ake care of Orestes. The c ontrast b etween t he c ourageous Pylades and the cowardly Menelaus is abundantly e vident. The y ouths a gree t hat c omrades a re more desirable than blood kin, and they set off for the citizens' assembly.

The chorus reviews the events that have led to O restes' confused s tate of mind, and E lectra returns. A messenger b rings the news that the assembly h as s entenced O restes and E lectra to death. The messenger then de tails the sp eeches against and for the siblings. The former carried the day, and the death sentence passed. The messenger concludes that A pollo has de stroyed the pair in ordering their mother's execution.

First E lectra a nd t hen t he c horus l aments. Orestes en ters and t ells her to b ehave b ravely. Electra resolves to die by her own hand. Brother and sister emb race in farewell, and O restes a lso decides o n su icide. P ylades jo ins t he pa ir a nd resolves to die with them. He suggests, however, that they first punish the pusillanimous Menelaus by killing Helen, who is hiding in the palace. Since all the Greeks hate her as the cause of the Trojan War, P ylades t hinks, k illing her may prove to b e the salvation of Orestes and Electra. Orestes is not so sure about that, but he thinks killing Helen will be a service to the world. Electra suggests that the three of them take Hermione, who is off making Helen's sacrifices at Clytemnestra's tomb, as a hostage to be bartered for their su rvival. All a gree. They offer prayers to t he dead Aga memnon, and the men leave the stage to E lectra, who waits for Hermione with the women of the chorus.

Helen is heard screaming within the house, and Electra sends Hermione in to her captors. A Phrygian slave comes from the palace and reports the events that have transpired within. In brief, Pylades dealt with the palace guards, and Orestes was on the point of k illing H elen when the k illers were distracted for a moment and she disappeared.

Menelaus now app ears and is a bout to s torm the p alace when O restes, Pylades, Electra, and Hermione appear on the palace roof. Orestes has a blade at Hermione's throat, and he orders Menelaus t o desist. O restes c onfirms t he di sappearance of Helen. Orestes threatens to kill Hermione and burn the palace. Menelaus calls the citizens out t o l ay sie ge to O restes a nd h is c onfederates and then carry out the citizens' sentence. Matters have reached a seemingly irresolvable crisis.

At that moment, from a machine above, Helen and the god Apollo appear. Apollo orders everyone to do nothing and listen. On the orders of her father Zeus, Helen, like her brothers Castor and Pollux, will be deified as a protectress of seafarers. This is a reward for her being instrumental in the deaths of so many troublesome mor tals. Orestes is ordered to go to Athens to be judged. There he will be found innocent and will eventually marry Hermione. Her current fiancé, Neoptolemus, will not live to marry her. Electra is destined to w ed Pylades, and their union will be blessed.

The god instructs Menelaus to support Orestes as A gamemnon's successor. Menelaus is also to return to rule Sparta, regarding it henceforth as a dowry from Helen. Finally, Apollo confesses that he told Orestes to slay his mother. All the former enemies appear reconciled on stage, and the play ends.

Origen (ca. 184–255 c.E.)

Destined t o beco me a n i nfluential C hristian scholar and te acher, O rigen was born the eldest of seven children to a C hristian family in A lexandria, E gypt. H is f ather, L eonidas, su pervised his earliest studies, and Origen later attended the Catechetical School in his native city; he eventually became the school's devout headmaster. For reasons unknown, he reportedly took the advice of Matthew 19:12 literally and castrated himself. Later, he turned his attention to the study of philosophy, the better to defend Christianity against the a rguments of t he le arned pa gans. H e fled Alexandria, however, d uring t he persecution of Alexandrian C hristians on t he orders of t he Roman em peror C aracalla (215 c. e.) O Åen a n object o f c ontroversy, O rigen was o rdained a priest by Bishop Theoctistus while on a journey through Palestine, though Bishop Dem etrius of Alexandria contested that ordination.

Origen's remarkable intellect and his capacity for h ard work led h im to aspire to furnish the Christians of his time with a reliable version of Scripture. H e d eveloped a nd appl ied n ew te chniques for textual criticism. In his Hexapla, for example, he arranged in two columns the Hebrew and Greek texts of the Hebrew Bible. To these he added four more columns containing versions of the same Scripture by Aquila, Symmachus, and Theodotion. He also added the Sept uagint Ol d Test a ment version. Origen then identified variations in the texts with diacritical notations so that readers c ould r eadily c ompare v ersions. On ly fragments of this prodigious labor survive. Examples do exist, however, of his textual commentaries and homilies on the Gospels of Matthew and John, t he S ong o f S ongs, Pa ul's Ep istle to t he Romans, and others.

Origen was the originator of a kind of Christian mysticism that involved the use of the interpretative techniques of patristic exegesis to understand Scripture. His allegorical method of reading Scripture for its spiritual essence led h im to part company with such believers as those who would subsequently subscribe to the Nicene Creed. Origen did not believe in the physical resurrection of Christ. R ather, h e bel ieved that at a C hristian's baptism, Christ was born again in the recipient's spirit a nd w ould flourish there as the n ewly baptized person grew in faith and in the development of the s piritual s enses, of wh ich the five physical senses are the counterparts. Modern R oman C atholic t heologians h andle Origen's spec ulative theology g ingerly. They acknowledge that he was the most effective Christian apologist of his era, defending the faith in his *Contra Celsum*—an enormous, step-by-step rebuttal of *The True Doctrine*. The latter work, written by the Platonist philosopher Celsus late in the second c entury, criticizes Christianity—although i t includes among the targets of that criticism much non- Christian, Gnostic thinking.

At the same time, the subsequent adoption of the Nicene Creed has banished much of Origen's mystical thinking and its methods to the realm of heresy. He would not have ac cepted the Nicene Creed's s tipulation of b elief i n C hrist's de scent into Hell, his physical resurrection, and his ascension i nto H eaven. O ther l ater de velopments i n doctrinal thinking have contributed to the same effect. Nonetheless, the Roman Catholic Church trea ares such works by Origen as *Commentary on John, On the Resurrection*, and *Treatise on First Principles*.

Despite the ex post facto judgments concerning Origen's orthodoxy, he died, as he had lived, as a defender of the Christian faith. When the Roman emperor Decius (ruled 249–51 c. e.) concluded that preserving the ancient cults of Rome was e ssential to t he preservation of t he em pire against the onslaught of new creeds, Decius initiated a short-lived bu t b rutal r epression of t he Christians. Origen was arrested at Tyre. Repeated sessions of torture undermined his health, and he died in his 69th year. The Catholic Church numbers him among its pre-Nicene Fathers.

Origines Cato the Elder (ca. 149 B.C.E.)

Dissatisfied w ith ea rlier h istorians' pr actice of writing R oman h istory in t he Gr eek l anguage, Marcus Porcius Cato (Cato the Censor, Cato the Elder; 234–149 b.c.e.) became the first Roman to undertake writing the history of h is native land in his native tongue. He wrote the work, *Origines*, in his waning years.

Despite the title of his book, Cato devotes less attention i n it to e arly R oman matters than h e does to chronicling events nearer to and contemporary w ith h is l ifetime. The first boo k, for instance, di scusses the f ounding of Ro me. The next two record the establishment of the cities of Italy. In the fourth and fiÅh books, Cato respectively tr aces the h istory of the First and S econd Punic Wars—the wars against the African city of Carthage. The final two books, 6 and 7, detail the fortunes of Rome until the year 152 b.c.e. A s the author d iscusses m ore recent h istory, e ach chapter g rows l onger a nd lo nger. C ato was s till occupied with the composition of his history at the time of his death.

Cato w as hi mself w hat t he Ro mans c alled a "new m an." To emphasize the broadly democratic nature of the founding an d g rowth of the i nstitutions t hat h ad contributed to the greatness of the Roman republic, Cato rarely names great leaders and aristocratic p ersons. R ather, he identifies them by naming the office they occupy. The people he do es name usually come from modest circumstances and are named because for Cato they symbolize the gallantry of the broader Roman population. He also concerns h imself w ith the c ustoms of p eoples from Africa and Spain, and he suggests that his own ethnic forebears, the Sabines, had contributed both high standards of moral conduct and frugality to t he e ssential Ro man c haracter. C ato's history survives in a highly fragmentary state.

Orpheus (fl. ca. 1250 B.C.E.) Greek poet

Although s o m any m ythical e lements h ave attached themselves to the story of Orpheus that siĀing the facts, if any, from the fiction is virtually impossible, the a ncient Greeks remembered Orpheus as a pre-Homeric poet and musician. He is thought to have been a native of the region of Thrace i n t he Ea stern B alkan P eninsula and a devotee of the god Dionysus.

If O rpheus d id c ompose p oems a nd s ongs, nothing at tributable to him survives. His legend, however, ha s i nspired l ater p oets a nd m usicians down through the ages. So sweetly did he sing that animals were enamored of his song, and the very plants fanned their leaves in time with his music.

Orpheus is a lso r emembered f or h is passion for h is wife, the d ryad or t ree nymph Eurydice, and th eir s tory ha s i nspired n ot o nly l iterary retellings but a lso b allets and o peras. Fle eing Aristaeus, a potential ravisher, Eurydice stepped on a venomous serpent and died of its bite. Inconsolable at the loss of his wife, Orpheus descended into the underworld. There his music so charmed the king of the underworld, Hades, that the god shed a n i ron tear and released Eurydice from death—with one proviso. Eurydice would follow Orpheus back u p f rom the u nderworld, but Orpheus must not look back at her. Nearing the world of the living, however, Orpheus could not resist glancing back at his wife, and she slid back into the land of the dead.

Ötomo no Yakamochi (ca. 718–785 c.E.)

Japanese poet

A poet, \overline{O} tomo no Yakamochi was the first and possibly the only editor of the *Man'yōshū*, Japan's earliest and best collection of poetry. That work's last four books principally feature Yakamochi's poetry.

Yakamochi w as the only son of a nother poet, Ōtomo no Tabito. As Tabito's wife had b orne no sons, Yakamochi's mother w as a c oncubine, b ut his stepmother, the legal wife, reared the youngster until her death in 728. The Ōtomo clan served

as t he h ereditary bodyguards—called *quiver bearers*—of the imperial family.

In 745, Yakamochi assumed the governorship of the province of Etchū on the seacoast of Japan. About the same year, he began his editorial work on t he *Man'yōshū*—a w ork that o ccupied h is attention until 759. His five years as governor of Etchū w ould a lso p rove to b e h is o wn b est a nd most productive poetic period.

Yakamochi w as p roud o f h is f amily's c lose connection w ith the i mperial f amily, a nd he warned his kinsmen against the slanders of courtiers w ho had a roused t he em peror's su spicions against a relative, the governor of a nother province. Yakamochi's warnings were well- founded. An influential en emy, Fu jiwara n o N akamaro, took draconian measures against the clan, having its leaders rounded up, arrested, and executed.

Yakamochi managed to avoid this fate, but he did not escape suspicion. In 758, he was assigned to serve as the governor of a d istant and unruly province, Inaba. He completed his editorial work there, but his poetic voice fell silent. Perhaps he was overburdened by the re sponsibilities of h is office, or perhaps he de emed i t w iser to ke ep silent. His composed his last dated poem on New Year's Day, 759.

In 785, Yakamochi died. Death did not, however, p rotect h im f rom t he i mplacable ha tred t he Ōtomo clan's enemies felt for all its members, and he w as p osthumously stripped of h is offices and honors. Eventually, however, his name was cleared, and the honors and offices were later restored.

Ovid (Publius Ovidius Naso) (43 B.C.E.– 17/18 C.E.) *Roman poet*

The s on o f a f amily o f t he Ro man k nightly o r equestrian cla ss, O vid was bo rn a t Sulmo i n Abbruzzi. H is f ather ho ped t hat O vid a nd h is brother wo uld b ecome i nfluential p ublic figures and sent the boys first to Rome and then to Athens for an education centered on the study of rhetoric. Ovid, however, was so passionately d rawn to t he study of literature and so intensely driven by poetic impulse that, as the poet himself admits, anything he wrote automatically took the form of verse. Perhaps in deference to his father's wishes, Ovid briefly occupied minor public office, but his passion for literary endeavor soon led him to a bandon public affairs and pursue the usually hand-to-mouth existence of a p oet. Wi th the su pport, ho wever, of a powerful literary patron, Marcus Valerius Messalla Corvinus, Ov id s oon di stinguished him self an d eventually emerged as the leading poet of Rome.

Ovid married three times. The first two of his unions were brief and ended in divorce; the third lasted until his death and is thought to have produced a daughter, Perilla. Ovid's extramarital life was a pparently sometimes c olorful, and in the year 8 c .e., a su pposed l iaison w ith t he g randdaughter of the first Roman emperor, August us Ca esa r, may have led to Ovid's banishment from Rome to the town of Tomi, far away on the shores of the Black Sea. There Ovid remained, poetically productive but c ut off from the s ociety and t he pleasures of his beloved Rome, until his death.

From a bout the a ge of 2 0 u ntil h is de ath, Ovid's li terary c areer f alls ro ughly i nto t hree periods. Du ring t he first per iod, he p roduced most of h is a morous verse, a ll of it w ritten i n elegiac couplets. One representative of this body of material, his *Amores* (Loves), includes a series of pu rportedly aut obiographical, n ot ter ribly serious, sometimes racy encounters with a possibly fictive mi stress, C orinna. The de gree to which these early poems rely on the conventions of e arlier G reek a matory verse s uggests on ly a tenuous connection between the poems and the details of the poet's actual life.

Also belonging to t his first per iod of O vid's production is his *Heroides*. Still in elegiac couplets, the *Heroides* purport to be a collection of 21 letters w ritten f rom m ythical h eroines su ch a s Medea and H elen of T roy to t heir lo ves. In the cases o f n umbers 1 6–21, t he hero ines' le tters

answer epistles from their lovers, so that Helen's letter, f or i nstance, r esponds to o ne f rom her lover, Paris.

Still representing Ovid's first or amatory period, we find the surviving 100 lines of an originally longer poem, *On Painting* (or, *Cosmetics for*) *the F emale F ace* (*Medicamina f aciei f emineae*). This p iece ce lebrates co ntemporary fashion a s compared with older styles and cleverly versifies the formulae for the preparation of cosmetics.

Two further excursions into the subject of love conclude the body of Ovid's work dating from his initial period. He wrote the first, The Art of Love (Ars Am atoria), a round t he b eginning o f t he Common Era. This work is a manual of instruction for would-be lovers. The first book gives lovers i nstructions a bout where to s eek m istresses and how to win them, the second makes suggestions a bout k eeping a m istress's love, w hile t he third gives the same sorts of advice to women that men re ceive i n t he first t wo. The A rt of L ove reveals Ovid's growing interest in mythology and also, to a degree, parodies the didact ic poet ry of such pre de œs sor poet as Virgil in his Georgics. A c ompanion p iece, Remedies for L ove (Remedia A moris), turns t he t ables o n O vid's readers by offering advice about ways to withdraw from a no-longer-congenial love affair.

AĀer his exile to Tomi, Ovid turned his attention to a new sort of work, producing what many would agree to be his masterpiece, his *Met amorphoses*. In this work, Ovid undertakes to reconstitute t he e pic m ode. H is c hoice o f d actylic hexameter (see quant it at ive ver se) as the verse medium of this work immediately establishes its connection w ith ep ic poet ry. I nstead o f a s ustained narrative however, on a heroic subject such as the wrath of Achilles, Ovid follows the lead of some of h is A lexandrian Greek pre deœs sors of the Hell enisti c Age. The poet chooses to bring together a s eries of m yths, all of w hich i nvolve supernatural shape- shiAing.

The f orm a nd c ontent o f t his b rilliant w ork reflect o ne a nother c losely. A Åer su ggesting, f or example, that the work w ill chronologically trace instances of metamorphoses—such as girls changing into trees or fountains—from the beginning of time to h is own e poch, O vid c auses t he p oem's plan itself to undergo a metamorphosis. Chronology a nd l inearity a re d isplaced b y pa irings o f metamorphoses, by t hematic re levance, a nd by the complex ways in which his text and that of his pre de ces cors speak to and interact with one another across time. As the classicist Stephen E. Hinds suggests, Ovid's poem both captures and redefines the traditions within which it purports to work.

Ovid's next work, albeit an unfinished one, is *Fast i* (Calendar). Ovid's plan had been to devote one book of his work to each month of the Roman year. Only six of the books remain—if more were ever finished. These a re e nough, ho wever, t o reveal the work's conceptual roots in the astronomy of Ar at us of Sol i and in Varr o's now- bst discussion of the antiquities of Rome, and to suggest t o 21st- œntury r eaders pa rallels b etween certain o f t heir o wn p olitical figures and t he emperor A ugustus, who app ropriated, a s H inds puts it "Roman religious discourse." Ovid himself is a significant character in the poem. His exile to Tomi a pparently interrupted the composition of this poem.

To that period of exile belong the poet's *Tris*tia (Sorrows), a series of books to various persons i n R ome i n w hich t he poet bewa ils h is isolation i n the i ntellectually, c ulturally, a nd climatically i nhospitable v icinity of t he B lack Sea, a nd his h opes f or r epeal of t he s entence that has isolated him there. Similar to *Tristia* in tone and intent, but differing from it in that the addressees are named, we find Ovid's *Epistulae ex Ponto* (Letters from Pontus, or Letters from the Black Sea).

Also s urviving i s O vid's *Ibis*, a n i ntricately craĀed poem that catalogs and curses the poet's sufferings in exile.

Oxyrhynchus

The name of the ancient Egyptian city Oxyrhynchus is now Behnasa. In the late 19th c entury, archeological e xcavations i n a n a ncient t rash heap i n O xyrhynchus u nearthed an e normous treasure trove of p apyrus fragments—many of them a pparently torn into strips for mummy wrappings—dating from the second to the fiĀh centuries c.e. The site continued to y ield truckloads of f ragmentary papy ri i n t he 1 9th a nd early 20 th centuries, a nd e ven now it re mains productive of a ncient materials l ong t hought utterly lost.

During the early years following the discovery, to ns o f documents were t ransported to En gland, and much of the material—including documents like receipts and deeds—is of greater interest to social than to literary historians. Students of ancient astronomy have been delighted by the discovery of papyri treating that subject. At the same time, remarkable literary finds have

oĀen t urned u p. A h itherto lo st p oem o f S a ppho, for example, has come to light. Lines by Sappho's contemporary and f ellow citizen o f Mytilene, Alcaeus, have also been found, a s have poems by Pindar and documents concerning t he s cheduling o f t he Oly mpic, P ythian, Isthmian, and Nemean athletic contests held in Greece during the fiÅh century b.c.e. Knowing the dates of the games has made possible fixing the dates of some of Pindar's odes addressed to winners and sp onsors of w inners of e vents i n those games (see Victory Odes). They have also confirmed t hat the longest of t he guesses-80 years-for P indar's lifetime is closest to being right. As a final example, a lost work of the poet Callimachus, his Book of Iambi, has also come to light.

More than 60 volumes publishing the discoveries at Oxyrhynchus have now appeared. No end is in sight as yet, and we may confidently look forward to further additions to our knowledge of ancient texts.

Pacuvius, Marcus (ca. 130–220 c.E.) *Roman dramatist*

Born at Brundisium (modern Brindisi), Pacuvius w as t he n ephew of t he c elebrated a rchaic Roman poet and playwright, Quint us Ennius. He was also a tragic playwright and the first really renowned Roman painter. Some 19 tragedies are attributed to h im. M ost of t hese were b orrowed f rom Gr eek o riginals, b ut s ome were Roman in subject-the first such tragedies of the Roman world. Principal among them was Pacuvius's Paulus. Only five lines from it are known to survive, but it seems to have concerned an episode or episodes in the career of the Roman general P aulus A emilianus M acedonicus, w ho brought Greece under Roman control by defeating the Epirotes after that Grecian tribe had succeeded A lexander as the rulers of the G reeks. Paulus had destroyed 70 of the Epirotes' cities.

Celebrated a mong P acuvius's t ragedies using Greek material was *Antiope*. He was also renowned for a scene in h is *Iliona* in which the g host of Polydorus appears to his sister Iliona, a princess of Troy. Pacuvius composed eight of the tragedies whose names survive on subjects connected with the Trojan War. The names of four other tragedies on Greek themes survive. These seem to have been translations of the tragedies written i n Gr eece d uring t he p eriod f ollowing Euripides.

Pacuvius seems also to have tried his hand at comedy, though the literary historian, Gian Biaggio Conte, regards the references to h is satire as "vague." The late fifth- æntury Christian w riter Fulgentius alludes to a Pacuvian comedy entitled *Pseudo*. In the late 1960s, the Italian playwright Pietro Magno made an effort to reconstruct one of t he T rojan plays—*Teucer*—from its e xtant ancient fragments.

The definitive grammarian of classical Sanskrit, Pāniņi c omposed what is conceivably the most complete grammatical analysis that has ever been made of a ny l anguage. B efore Pā niņi's de scription of Sanskrit, that language had existed principally in the mouths of its speakers and, like every language, had been in a continual state of flux.

The earliest document to survive in Sanskrit's pre de ces sor language and near relative, the Vedic tongue, is the Rig-Veda. As the Vedic language developed into Sanskrit, and as the hymns comprising the Rig-Veda were compiled and arranged into a li turgy, p ressures i ncreased a mong t he Brahmins—the pr iestly class—to st ablilize S anskrit in a fixed liturgical form. Parallel Lives (The Lives of the Noble Grecians and Romans, Plutarch's Lives) Plutarch (ca. 100 c.E.) Greek biographer and essayist

Owing to losses, additions, and possible authorial incompletion, *Plutarch's Lives*—more p roperly known as *Parallel Lives*—survives in a form substantially d ifferent f rom its original pl an. N onetheless, the biographies presented in it capture the spirit of the most genial of ancient biographers.

Pl ut a r ch's plan had been to present a s eries of t wo c omparable biographies—one of a celebrated Greek and the other of a celebrated Roman. Following the pair, he would present a c omparison of the t wo that focused principally on their moral c haracters r ather t han o n t he sub jects' deeds. The do cument that survives is composed of 23 paired lives, each pair followed by a comparison. F our si ngle l ives follow—possibly n ot from P lutarch's p en b ut adde d l ater si mply because t hey were b iographies. For i llustrative purposes in this volume, I have chosen Plutarch's first pa ir o f l ives, "Theseus" a nd "R omul us"; and his 10th pair, "Per icl es" and "Fabius."

The first pairing in the collection presents the lives of the founders of two cities: Theseus, founder o f A thens, a nd Ro mulus, f ounder o f Ro me. Plutarch's working method starts with a survey of the variant versions of his stories available to him. Though he s ometimes weighs t he credibility of the version he presents on the grounds of historical p robability, h e f eels obl iged to b e b roadly inclusive. H e r arely d istinguishes b etween t he credible and the farfetched unless the story he is reporting offends the bounds of nature. Then, as with stories about heroes and heroines (including Romulus) w hose de ad b odies d isappear a nd whose f riends s ubsequently s ee t hem a live, h e objects that such accounts are the work of fabulists who wish to claim divinity for their subjects. According to Plut arch, others whose surviving associates elevated them to the status of gods after their decease included Aristeas the Proconnesian and Cleomed the Astypalaean. Countering such claims, Plutarch suggests: "To m ix he aven with

earth is ridiculous." He quotes the poet Pindar on the subject: "All human bodies yield to Death's decree, / the soul survives to all eternity"—a view that Plutarch endorses.

The o ther e xtant pa rallel l ives t hat P lutarch treats include those of the Athenian general and politician Alcibiades (450-404 b.c.e.) paired with the l egendary Roman hero C oriolanus w hom Shakespeare t reats i n h is t ragedy o f t he s ame name. We also find the fifth century b.c.e. Greek statesman Aristides paired with the Roman patriot Cato the Elder (234–149 b.c.e.), the Athenian general Nicias (d. 423 b.c.e.) and the Roman triumvir and general Crassus (115-53 b.c.e.). Paired as well a re the Greek statesman Demetrius and the Roman general and triumvir Marcus Antonius (83-30 b.c.e.); the Greek orator and statesman Demosthenes (384-322 b.c.e.) a nd h is Ro man counterpart Ci cer o (106-43 b.c.e.); the G reek patriot D ion and the Roman republican Marcus Junius Brutus (85-42 b.c.e.). Beyond these, other extant p aired b iographies i nclude t hose of t he wealthy Roman consul Lucullus (ca. 110-ca. 57 b.c.e.) with a Gr eek c ounterpart, t he A thenian general a nd s tatesman Ci mon (502-449 b.c.e.); the second king of Rome, Numa Pompilius (715-872 b. c.e.), with the Spartan lawgiver Lycurgus (ca. 820 b.c.e.).

Plutarch c ompares t he Spartan c onqueror o f Athens in 404 b.c.e., Lysander, with the Roman general a nd d ictator Su lla (138–78 b.c.e.). The author considers together the careers of the Theban general Pelopidas (d. 364 b.c.e.), who defeated the Spartans, together with that of the Roman hero Ma rcellus (266-208 b.c.e.) w ho w as five times consul and the conqueror of Syracuse. Plutarch continues with a comparison of the Greek patriot and chief of the Achaean League, Philopoeman (ca. 252-183 b.c.e.), c omparing h im with the Roman general and censor Caius Flamininus (d. 217 b.c. e.). Also extant we find Plutarch's treatments of the Roman general and statesman Cneius Pompeius (Pompey the Great, 106-48 b.c.e.) paired w ith t he Spa rtan k ing a nd c onqueror, Agesilaus (ca. 444-360 b.c.e.); the Greek statesman Solon (638-558 b.c.e.) and the Roman Poplicola (d. 503 b.c.e.); the discussion of the Roman proconsul and general Sertorius (ca. 121–72 b.c.e. compared w ith h is G reek co unterpart, k ing Eumenes I of Cardia (ca. 362–316 b.c.e.); and the Greek l iberator o f Si cily, T imoleon (400–337 b.c.e.), p aired with the Roman leader A emilius Paulus.

Plutarch also varies his pattern of comparison by considering together two representatives of the powerful R oman G racchus family Tiberius and Gaius Gracchus in tandem with the Spartan king Cleomenes (died 220 b.c.e.) and the Spartan king Agis I V (fl. c a. 2 62–291 b.c.e.). The biographer also i ncludes f our un paired li ves, t hose of t he Greek g overnor A ratus o f Si cyon, t he P ersian king Artaxerxes, the Roman emperor Galba (3 b. c.e.–69 c.e.), and the Roman emperor Otho (32– 69 c.e.).

Known to have also existed but now lost a re Plutarch's paired lives of Julius Caesar and Alexander the Great; of the Greek general Phocion (ca. 402–317 b.c.e.) and the Roman patriot and philosopher C ato t he Younger (95–46 b.c.e.); of t he Athenian s tatesman a nd a rchitect of t he c ity's naval p olicy, Themistocles (ca. 5 14–449 b.c.e.); and of the king of Epirus, Pyrrhus (d. 272 b.c.e.); and th ose of t he Ro man g eneral a nd five- time consul, Gaius Marius (157–86 b.c.e.).

Parthenius of Nicaea (fl. first century C.E.)

Greco-Roman poet

Brought to Rome as a prisoner of war in 73–74 c. e., Parthenius achieved h is freedom and entered Roman literary circles. He tutored Vir gil in Greek and r ecommended t he u se o f Gr eek m odels to

514 pastoral poetry

Roman p oets. Of t he ma ny ele giac v erses he i s thought to have written, only fragments of some survive. The m ost complete s urvival a mong h is elegies is a work in praise of his wife, Arete.

Parthenius summarized Greek love stories in prose for the benefit of Roman poets, particularly Gaius Cor nel ius Gallus, to whom Parthenius dedicated his work. These summaries, *De amatoris affectibus*—or, in Greek, *Erotika path emata* (Feelings of love)—were designed to provide grist for the mills of the Roman poets. In fact, the presence in Rome of a Greek poet like Parthenius lent impetus to Roman poet ic ex perimentation already underway in the Roman poetic movement called the n eoteric school—poets w ho a dapted the conventions of poets of the Greek Hell enisti c Age to Roman verse.

pastoral poetry (bucolic poetry)

About 2 80 b.c.e., the Sicilian-Greek p oet Theocritus took the simple songs of shepherds and developed from them three s orts of p oems that were t o pr ove i nfluential throughout the a ges. Some 22 poems are now confidently included in Theocritus's *Idyl ls*.

The first and most influential sort of pastoral poem later be came the el egy of la ment. Or iginally a sort of meter employed for military songs, the p astoral elegy b ecame a p oem of g rief a nd reconciliation, u nder Theocritus's i nfluence, s o that the word *elegy* shifted in meaning to describe a mood instead of a meter. One finds an example of such a poem in Bion of Smyr na's lament for the death of the handsome youth Adonis, Bion's only complete surviving poem.

Another often-emulated m ode of Theocritan pastoral involved a si nging contest b etween t wo shepherds. They sang original verses on a set subject before a t hird person who would judge their per for mances and declare one the winner of whatever goods had been staked as the prize. One also finds an example of this sort of pastoral in Bion of Smyrna's poems.

The third kind of Theocritan pastoral involved a poem, ostensibly written by a shepherd or other rural dweller, that celebrated country pleasures or a boy's or a mistresses's charms, or that bemoaned their unjustifiable neglect. Such a poem by Theocritus is his first *Idyll*, "The Passion of Daphnis." In the country-pleasures subcategory of this sort of pastoral, Theocritus may have to share honors as an originator with a third- œntury b.c.e. female lyricist, Anyte of Tegea, whose work is attested by only 18 su rviving lines (see fe male Gr eek ly r icist s).

Another p oet roughly c ontemporary w ith Theocritus is Moschus of Syr a cuse. Though his one fully surviving work is not pastoral in theme, his fine descriptive passages sometimes have led critics to include him among the pastoral poets.

The pastoral manner expanded from such verses into the Gr eek proser omance or novel. Only one entire example of the mode survives in Greek: Longus's *Past or al s of Daphnis and Ch lo e*.

In R ome, Virgil's *Ecl ogues* belong to the pastoral mode, as do h is *Georgics* and many of the *Odes* of Hor ace. A poet contemporary with the emperor Nero, Tit us Si cul us C al pur nius, penned eclogues in imitation of both Theocritus and Virgil. C alpurnius also modified the genre in some of his poems to give it a more rhetorical cast. He may have thinly disguised actual persons under the c haracters i n h is p oems. S ome ha ve suggested t hat h is she pherd, M eliboeus, subs titutes for the Roman tragedian Seneca.

The third century c.e. Afro-Roman Nemesia nus a uthored works on hunting, fishing (now lost), and four surviving eclogues that illustrate the pastoral mode. Pastorals of Daphnis and Chloe Longus The only surviving Greek proseromance whose subject matter is exclusively pastoral (see pastoral ral poetry, this novel by Longus (fl. ca. secondthird century c.e.) recounts in four episodes the story of the many difficulties besetting a pair of would-be lovers. In the first book, Lamo, a goatherd living near Mytilene on the island of Lesbos, finds an infant boy abandoned in the countryside together with v aluable ob jects. L amo t akes t he baby ho me and names him Daphnis. Two years later a shepherd, Dryas, finds a baby girl in similar ci rcumstances, takes her home to r ear, a nd names her Chloe.

Dreams forewarn the herdsmen about letting the growing children be seen much in public, so the adoptive fathers send the children to herd their flocks. Delighting in each other's company, the children play happily tog ether a st hey tend the animals. One day, Daphnis falls into a muddy pit that had been dug to trap a wolf. He is rescued unhurt but filthy, and a s he s trips and washes himself, Chloe sees him and admires his good looks. Chloe is growing into a beautiful young woman herself, and an a dmiring s hepherd, D aphnis's r escuer Dorco, g ives her g ifts a nd b ecomes Dap hnis's rival for her affections. She, however, is entirely in love's clutches, though as yet she does not understand her feelings for Daphnis

Daphnis r eturns her love, and the two kiss innocently as, despite their duties with the animals, they remain unaware of other methods for expressing their mutual ardor. When Dorco asks Dryas tog ive him C hloe in marriage, D ryas refuses. D isappointed and angry, D orco formulates a plan to disguise himself in a wolf skin and kidnap C hloe, but the g uard dogs a ttack him. Daphnis and Chloe, thinking Dorco was merely playing a prank, rescue him.

In the meantime, the foundlings' mutual, innocent affection and admiration of each other's bodies continue to increase.

One d ay, Tyrian p irates enter the fields; help themselves to a n umber of a nimals belonging to Daphnis, Chloe, and Dorco; and kidnap Daphnis. The pirates wound Dorco mortally. Before he dies, however, he gives Chloe his panpipes, tells her to play them so his a nimals will all r un toward the sound, and begs for a kiss. This she grants him, and Dorco dies happy. As she plays the pipes, the animals all run to the shore side of the pirate ship and upset it. The ship sinks and the heavily armed pirates d rown, but t he lightly clad a nd sho eless Daphnis and the animals swim easily ashore. The first book en ds with Daphnis su ffering m ightily from his æ-yet- unfulfilled passion for Chloe.

The second book is set in late autumn when the grapes are harvested and taken to the wine presses and when the feast of Bacchus is celebrated along with the birth of the new v intage. A n old ma n, Philetas, c omes a nd r eports a n en counter w ith Eros, the god of love. Philetas informs the young people that the god predicts that they will love one another. He also instructs them briefly in the skill of i nnocent l ovemaking: kissing, h ugging, a nd

A g roup o f s eagoing pa rtiers n ow arrives young men from Methymna who want to join in the fun o f the g rape ha rvest a nd do s ome b ird hunting. The young vo yagers blame t he g oatherd, Dap hnis, beat him soundly, and then go off on their hunting expedition. The wind shifts, the ship is blown back, and on their return, the youths beat Daphnis again, but this time his friends turn up to help him.

W hen Daphnis i s acq uitted, the M ythynians d epart angrily and return with a military squadron of 10 ships under the command of Bryaxis. They attack without w arning a nd c arry off everything i n sight, including Chloe.

Now, h owever, t he g od Pa n i ntervenes o n behalf of Daphnis and Chloe. Pan sends a series of spectacles throughout the night to frighten the Mythynians at their nearby anchorage. Then, a fter a n e vening sp ent i n s torytelling a nd i n o ther c ountry ple asures, Daphnis and Chloe at last formally promise their love to each other in a ceremony where they swear their mutual affection before Pan. That, however, is not good enough for Chloe, who considers Pan a fickle god. She requires Daphnis to swear by his flock of goats that he will never desert his Chloe.

The t hird b ook is filled with m ore m ilitary adventures a nd w ith t he adv ent of w inter. The coming of winter means that Daphnis and Chloe must t ake t heir flocks t o t heir se parate f olds. The lovers are disconsolate at their parting. While they are separated, many wealthy suitors seek to contract a marriage with Chloe. Her foster father, Dryas, n early co nsents. Dap hnis, b emoaning his poverty, gets help from the nymphs of the field, who lead him to a treasure of silver, which Daphnis gives to Dryas. Dryas in turn approves the match. Daphnis's foster father, Lamo, however, decides to wait for the approval of his master, D ionysophanes, before c onsenting to t he engagement.

The t hird b ook en ds w ith Dap hnis's reminding Chloe of Paris's awarding a g olden apple to Aphrodite as the prize for her beauty in a contest against H era and A thena. H e t hen p resents h is beloved with an extraordinary apple he has picked for her.

patristic exegesis

The fourfold system of explanation by which the early fathers of the church interpreted Scripture is called *patristic exegesis*. According to this system, the Bible can be read, understood, and interpreted on four d ifferent le vels. The first is the literal l evel, wh ich si mply r equires a n u nderstanding of what happens. The second, the moral level, s eeks to u nderstand t he i mplications t hat biblical events hold for human behavior. Third is the allegorical le vel, which seeks to d iscover the multiple a pplications t hat S cripture may ha ve for the c onduct of h uman a ffairs and what the passages u nder c onsideration may r eveal a bout

divine expectations for people. The fourth level, the anagogical level, seeks to explain the mystical implications o f S cripture f or t he s tate o f t he human soul in a condition of future glory.

St. August ine learned to read and understand the Bible in this fashion from St. A mbr ose, the Bishop of Milan, opening him to scriptural riches that, as a younger man, he had failed to perceive.

Pausanias (fl. second c. c.E.)

A Greek born in Asia Minor, Pausanius traveled widely i n P alestine, E gypt, G reece, a nd I taly. From a literary perspective, he is famous for his guidebook f or to urists, It inerary o f G reece (Guide to Greece, Helladios Periegesis). Each of its 10 sections deals with a region or with two adjacent regions of Greece. Pausanias describes temples, to mbs, n otable p ictures, s tatuary, a nd t he legends concerning them. He also assists the traveler by describing roads, rivers, and communities that the tourist will encounter on a journey to the various l ocations di scussed. S ometimes P ausanias describes local del icacies, fauna, flora, a nd scenery. His reports largely draw on his own travels, and his accounts therefore are those of an eyewitness. He is often skeptical about tales of local marvels, even though he tells many of them for interest.

Peloponnesian War, The (The History of the Peloponnesian War) Thucydides (ca. 430–411 B.C.E.)

The most significant work of history composed in an ancient European language, Thucydides' eightbook ch ronicle of t he long (431–404 b.c.e.) a nd terrible war between Sparta and Athens and their respective a llies fo cuses pr incipally on m ilitary campaigns conducted in several theaters of operation during the second Peloponnesian War's first 21 years. The Peloponnesus-a region that lies at t he southernmost ex tremity of t he G recian archipelago-is connected to the rest of Greece by a narrow isthmus. This isthmus, in turn, is commanded on the west by the city of Corinth and bounded on the east by the regions of Boeotia and Attica. E arly o n, t he Spa rtans had e stablished their de facto sovereignty over the Peloponnesus with their military culture and professional army.

Before turning his a ttention to h is c hronicle proper, ho wever, Thucydides i ntroduces h imself (in the third person) and sets forth his reasons for undertaking the task to which he has set his hand. From the war's outset, he says, he recognized that it would be a great war—greater, perhaps, than a ny that the world had earlier seen in terms of both its scale and its consequences. He did not write his h istory, he says, "t o w in t he appl ause of t he moment." Rather, he intended it to be what it has become: "a possession for all time." Its lessons are so applicable to e very powerful nation in any age that any leader of any nation would benefit from a thorough knowledge of the book's content.

To orient his readers to his subject, Thucydides considers t he p rehistory of Attica—the re gion around Athens—and the way that its unsuitability for agriculture and the growth of its population l ed t o e migration, to t he de velopment of associated colonies, and to a f ederation of t heir inhabitants un der t he i nfluence of t he m other civilization. Then he turns his attention to greater Hellas (Greece and its colonies and p ossessions) and its history. He speaks of the development of differing m odes of government i n At hens a nd Sparta, a nd of t he ten dency to b uild c ities f ar

from the sea and the depredations of pirates. He considers the influence on the P eloponnesus of the arrival from A sia of the wealthy P elops and his followers among the impoverished indigenous population and notes the authority the Asian king acquired among his newly subordinate and needy subjects. The historian also traces the sources of the power of King Agamemnon.

Thucydides c onsiders i n h is p reamble t he preparations for t he centuries-past T rojan W ar (ca. 1194–1184 b.c.e.) from a purely logistical perspective. H e c oncludes t hat m inimal financial resources were available to t he Greeks and t hat their military expedition was limited to the minimum nu mber of men ne eded to t ransport t heir munitions and to no more than could be expected to live off the land.

In any case, following the Greek victory in the Trojan W ar c ame a period of adjustment for all concerned. Whole p opulations m igrated, a nd local c onflicts m ultiplied. W hen ma tters st abilized, t he Gr eeks c olonized I taly, Si cily, o ther Mediterranean islands, and, after confronting the Persians, the Asiatic shore of the Aegean Sea.

Thucydides t hen traces t he ac cumulation of wealth and the small but nonetheless growing sea power o f cer tain o f t he Gr eek c ities, suc h a s Corinth, which, Thucydides c laims, f ought t he earliest sea battle in history against their colonists in Corcyrea, an island off the northwestern shore of the Grecian Archipelago. The historian details further internecine struggles among the inhabitants of Greece, and then the lengthy and dangerous mo bilization o f Greek m ight a gainst t he threat p osed b y th e e xpansionary a mbitions o f the Persians.

With some cooperation from other Greek cities, the A thenians defeated the Persians (whom the Greeks generally called the Medes) in a series of d ecisive b attles a t Ma rathon, Thermopylae, Salamis, a nd Platea. A bandoning many of their conquests along the eastern Aegean, the Persians retreated toward home. Many of the liberated cities w illingly ac cepted A thenian he gemony a nd protection, w ith the r esult that A thens b ecame the head of a considerable sea empire—a thalassocracy. Thucydides also observes that the rulers (tyrants) of c ities on t he G recian mainland d id not attempt to extend their powers with the same vigor as did those in colonial Sicily.

Having reviewed the general anthropological situation leading up to the initiation of hostilities, Thucydides pa uses to ac knowledge h is deb t to legend and e pic story telling for his mastery of early history and to assure his readers that he has taken p ains to i nclude o nly t hat w hich s trikes him as most probable. Thucydides believed that human history was cyclical. Situations like those that led up to the Peloponnesian Warhad earlier existed and would exist again in the future. What was n ew i n t he w orld, he em phasized, w as t he duration of the war and the scale on which it was conducted. W hat was most regrettable was t hat the good advice of the cautious and the experienced was often neglected in favor of the enthusiasms of the moment.

Nonetheless, Thucydides c onsidered t he w ar inevitable. The established dominion of the city of Sparta over the Peloponnesians was threatened by the rise of Athenian sea power. Similarly, the expansionary ambitions of Sparta were thwarted by Athenian might. A crisis was building.

The flashpoint of that crisis occurred when a Corinthian colony, Corcyra, failed to respond to a plea for military assistance from a besieged subcolony, the city of Epidamnus. Desperate for help, the Epidamnians appealed to Corinth. Corinth was already annoyed with Corcyra for asserting its independence, so it agreed to assist by sending fr esh s upplies o f c olonists to E pidamnus. This angered the Corcyrans, who prepared their fleet to stop the immigration. Corinth responded by mobilizing its fleet with assistance from its allies in the region. Outnumbered, the Corcyrans appealed to the Athenians for naval support. Both sides, Corinthians and Corcyrans, sent envoys to Athens. The Athenians heard both presentations and decided in favor of the Corcyrans.

An attractive feature of Thucydides' history is his handling of the speeches made by envoys on various occasions. Some of these, he reports, he heard himself. O thers were reported to him. I n all i nstances, given t he d ifficulties involved i n word-for-word recollection, he puts in the mouths of the speakers the words that, in the historian's best judgment, the occasions demanded of them.

After listening to the envoys representing both sides, the Athenians voted in favor of supporting the Corcyrans and sent ships in support of their blockade of the harbor at Epidamnus. The Corinthians and their allies set sail with every intention of landing the new settlers. When the two fleets met in battle, they more or less lay side by side, and the fighting was done by the hoplites—heavily armed infantrymen—who o ccupied the d ecks. The Athenians, Thucydides reports, tried to avoid direct confrontation with the Corinthians, for a peace treaty between the two powers was in effect. Eventually, h owever, the heat of battle overcame prudence, and the two sides engaged each other in combat.

In t he i nitial en gagement, t he C orinthians routed the Athenians and butchered their defeated troops. On seeing 20 reinforcing Athenian vessels approaching, however, and in view of imminent nightfall, t he Co rinthians w ithdrew. The n ext day, the fleets stood off from one another and did not re sume fighting. The A thenians maintained that d espite th e b loodshed, th eir t reaty wi th Corinth was still in force as long the Corinthians left the Corcyrans unmolested.

Polti al intrigues involving the Macedonians, the Spartans, the Chalcidians, the Boetians, and the Potideans continued to s wirl, ho wever, and open ho stilities onc e more brok e out de spite a truce agreement. That fiction evaporated entirely when Athens mounted a sie ge against the city of Potidea on the northern Aegean Sea.

At t his c ritical m oment, Thucydides re ports the speech given by C orinthian ambassadors at Sparta bl aming t he Spa rtans f or t heir i naction. Doing n othing en couraged A thenian a ggression and expansionist ambitions. In S parta on ot her business, At henian a mbassadors r esponded to the C orinthian c omplaints, n oting t he role o f Athens in defeating the Persians just a few years earlier a nd su ggesting t hat, g iven t he p rovocations in the current circumstances, Athens had in fact been operating with restraint. The emissaries warned Sparta to act cautiously.

In r esponse, t he S partan a ssembly de clared that th e A thenians were a ggressors, a nd t he assembly's m embers re sisted t he adv ice o f t he Spartan k ing, A rchidamus, to ac t c autiously i n the face o f A thenian p ower. D espite t he k ing's good c ounsel, t he a ssembly v oted f or w ar, a nd over Sparta's objections, the Athenians strengthened t heir def ense b y b uilding a n ew c ity w all while her ambassadors delayed the Spartans.

Thucydides now digresses from his announced subject to t race t he h istory of A thens' r ise to power as well as her occasional military embarrassments d uring the 50 y ears following t heir defeat of the Persians. Near the end of this period, in 446 b.c.e., Athens and Sparta concluded a 30year peace treaty. The author explains this digression a s a rising f rom h is c onviction that other historians h ave n ot t reated i t adeq uately a nd accurately.

Returning to his principal subject, Thucydides continues his history by recounting further discussions a nd sa ber ra ttling be tween th e A thenians and the Spartans and their contribution to the fall from power of the Athenian leader, Themistocles. In a famous passage, set in the context of a comparative discussion of the Spartan leader, Pausanias, and Themistocles, the historian a nalyzes the character and capacities of that extraordinary statesman who, after his exile from Athens, managed, to b ecome the g overnor of a P ersian province under the emperor Xerxes by dint of his uncommon gift for statesmanship.

As Thucydides e nds h is first boo k, the t ies between Athens and Sparta have worn increasingly thin, and the Spartans at last s end an ultimatum. The A thenian s tatesman a nd s trategist, Pericles, gives a sp eech detailing his program for an Athenian victory over Spartan ambitions and advises Athens to go to war. Thucydides cata bgues the attempts by the propaganda m achines of all parties to c laim d ivine a uthority f or t heir o wn views and to discredit the leaders of their enemies. The Spa rtans, f or i nstance, k new o f P ericles' maternal co nnection w ith a fa mily c ursed f or having committed sacrilege, and they tried unsuccessfully to have him banished.

The Spa rtans e xperienced g reater suc cess i n implicating t he A thenian Themistocles in plotting w ith the S partan s tatesman Pa usanias to subject all of Greece to Persian rule. The Spartans punished P ausanias by s tarving him to death at the temple of the goddess of the Bronze House, where he had sought sanctuary from retaliation.

Having established his reasons for writing his history and having laid down his essential method, Thucydides f ollows itt hrough the n ext 2 0 years of the war. Year by year, he examines military events a nd relevant polti al action a nd public policy decisions in several grouped theaters of operation. Typically, these include: (1) Attica, Euboea, and Boeotia; (2) the Peloponnesus and its subregions; (3) western Hellas and its subregions; (4) Thrace a nd its s ubregions; a nd (5) o ther regions as relevant. Thucydides varies this plan, however, as events dictate. In the eighth book, for instance, h e treats the first three regions together.

In book 2, h ostilities be gin in e arnest. The Peloponnesians marched against Athens. Athens responded with a series of sea r aids that forced the withdrawal of the Spartans and their ships, and Thucydides reports Pericles' stirring funeral oration for the Athenian war dead. Then, in the summer of 4 30 b.c.e., a pl ague s truck Athens. Thucydides was himself a mong its v ictims, a nd he de scribes in detail both its symptoms and its moral consequences. People despaired and sought pleasure w ith no thought of law, honor, or religion.

After the plague and a series of military reverses, the Athenians rejected Pericles' leadership and sent peace envoys to Sparta. With difficulty, Pericles pe rsuaded h is f ellow c itizens to s tay t he course. Thucydides digresses to a nalyze Pericles' character, leadership, and ac complishments. The historian concludes that the Athenians ultimately lost the war by ignoring his good advice to wait, concentrate o n naval p reparations, a ttempt n o new c onquests, a nd sec ure t heir c ity. U nfortunately, Pericles died after two-and- ahalf years of warfare, but Thucydides r eports t he A thenian leader's requirements for a s tatesman: "To k now what must be done and to be able to explain it; to love one's country, and to be incorruptible."

In 428 b.c.e., the Peloponnesians encouraged the A thenian s ubject ci ty o f M ytilene o n t he island of Lesbos to rebel. The city did so, and its allies d eserted i t, l eaving t he c itizens to su ffer Athenian sacks and reprisals. A r ising Athenian hard-liner, Cleon, proposed killing all adult Mytilenian males and enslaving all the city's women and c hildren. This p roposal ea rned C leon the undying scorn of the playwright Ar isto phanes, who never missed an opportunity to ridicule the demagogue as an inept swine feeding at the public trough. A more moderate politician, Diodatus, argued that Cleon's hard line would make enemies l ess d isposed t oward m oderation if roles were reversed. D iodatus wont hed ay, but high drama followed. A sh ip had a lready s ailed f or Mitilene with Cleon's solution and orders to put it into action. A following ship arrived just in time to save most of the population. Nonetheless, 1,000 men—perhaps a 10 of the male city's population were executed without benefit of trial or appeal.

More moderate in his judgment than Aristophanes, Thucydides p ictures C leon a s t he m ost violent and at the same time the most influential of the Athenian politicians at this stage of the war. The h istorian w isely obs erves t hat m en o f lower i ntelligence, like Cleon, won out over the more i ntelligent by r ushing i nto ac tion. Their polti al opponents found the waste of lives and resources b oth unnecessary a nd c ontemptible, for they felt sure the same ends could be accomplished by br ainpower a nd w ise d iplomacy. Though A ristophanes c onsidered C leon i nept, Thucydides thought that, despite Cleon's bloodymindedness, he was a shrewd politician with genuine military skills. These skills he demonstrated by joining Demost henes in resolving a stalemate by le ading a n A thenian force t o t he s tunning defeat of a contingent of 420 heavily armed Spartan hoplites who were occupying a narrow spit of land at Sphacteria on the Bay of Navarino. The battle was particularly important since the 420 captured hoplites r epresented a bout a ten th o f Sparta's most redoubtable fighters. Cleon accomplished that feat in 20 days, as he had p romised the Athenian citizenry.

As the fortunes of war favored first one side and then the other, politics became increasingly contentious and th e c ombatants i ncreasingly inhumane. "Many and terrible things occurred," says Thucydides, "because of faction." He predicts that such things will continue to happen as long as human nature remains the same.

Commenting on the state of wartime politics throughout the Greek world, the historian Donald K agan re marks: "Pa rty me mbership a nd loyalty c ame to b er egarded a st he h ighest virtues... justifying the abandonment of all traditional m orality." K agan c ontinues b y s aying that plotting "the destruction of an enemy behind his back" seemed "admirable."

The y ear 4 27 b.c.e. a lso s aw t he first of two major A thenian e xpeditions to Si cily, where t he Athenians intervened in an e ffort t o i nterrupt grain exports to the Peloponnesians. Until about 424 b.c.e., de spite s ome i mportant r eversals i n Sicily and despite plague and rising taxes at home, Athens fared remarkably well. In that year, however, fortune's wheel turned against the Athenian military. Fortune's agent was the Spartan general Brasidas, whose first coup was h is c apture of a n Athenian d ependency, t he Thracian ci ty o f Amphipolis.

Thucydides himself was in charge of an Athenian n aval s quadron c harged w ith s upporting Amphipolis, b ut w hen t he Spa rtan's su rprise attack came, Thucydides and his ships were inexplicably 5 0 m iles d istant. Likely responding to signal fires, the squadron returned to base within 12 hours, but by then it was too late. This failure led to Thucydides' trial and 20-year-long exile. It also led to the leisure necessary for the composition of his history.

Partly as a result of the fall of Amphipolis, the Athenians at last became ready to consider cessation of hostilities and a formal peace treaty. The warring parties a greed to a y earlong t ruce to explore terms on which a lasting peace might be achieved. Despite the cities' agreement, the Spartan Brasidas ignored the truce, pursuing his own po lti al and military agendas in Thrace. His violations impeded any progress toward peace.

Eventually At henian patience wore thin, and Cleon himself led an Athenian contingent against Brasidas. In the ensuing engagement at Amphipolis, B rasidas outthought a nd outmaneuvered Cleon, who, with 600 o ther A thenians, d ied i n the battle. Only seven Spartans fell at the second battle of A mphipolis, but one of them was their general, Brasidas.

With the war's two strongest proponents gone, peace suddenly b ecame p ossible, and t he A thenians and Spartans signed an agreement to keep the peace for 50 years. Officially, this agreement held for eight years. Unofficially, it was abrogated on many occasions before that. Not only were the interests of t he t wo city-states to o conflicted to allow the peace to stand, internal divisions inside Sparta also threatened the agreement.

Moreover, the double-dealing of the duplicitous Athenian statesman Alcibiades on at least one occasion prevented a final settlement of Athenian-Spartan d ifferences. Y et a fterward, A lcibiades came very close to achieving a l asting p eace on Athenian terms. His failure to do s o contributed to A thens' e ventual r ejection o f h is m ilitary leadership.

The fortunes of the combatants continued to ebb and flow. The Spartans, despite the inept field leadership of their king, Aegis, won the Battle of Mantinea (418 b.c. e.), costing the Athenians valuable allies.

Despite d ivided le adership i n A thens, w here Nicias's and Alcibiades' disagreements threatened to ha mstring t he w ar e ffort e ntirely, t he A thenians c onquered t he i sland o f M elos i n t he Cyclades. In the meantime, the two Athenian political ri vals invented—or rediscovered—political spin, with Nicias playing up h is re ligious piety and Al cibiades f ollowing su it w ith g reater flair and public expenditure.

Disaster lurked in the wings, however, for in 415 b.c.e., Nicias misled the Athenians into mounting a major and probably foredoomed a ttack a gainst

522 Peloponnesian War, The

Sicily. M eanwhile, Alcibiades defected to Sparta. In Sicily, the Athenians suffered defeat at sea and on the land. In the final battle, led by Demosthenes and Nicias, the Syracusans routed the Athenians. The Athenian generals had ill-advisedly attacked the city without the necessary support of cavalry. Though the Syracusans' ally, the Spartan general Gylippus, wished to bring the losing commanders home in triumph, the Syracusans opted for a more direct approach and put both Nicias and Demosthenes to death.

Though Thucydides p raises N icias, h is fellow citizens omitted his name from the Athenian role of military honor because he had voluntarily surrendered. D emosthenes, ho wever, w as i ncluded on the role si nce he w as captured while attempting suicide after arranging a truce for his subordinates. Two other experienced A thenian generals, Lamachus and Eurymedon, had also fallen in the second Sicilian campaign.

To resolve the resultant crisis of leadership, the Athenians elected 10 citizens to serve as advisers on state matters and to p ropose necessary legislation. On ly two names su rvive of t hat g roup's membership—a former general named Ha gnon, and another man, then in his 80s, whose name is more familiar for poetry and drama than for his early military career: the tragedian Sophocl es.

Despite the near exhaustion of Athens's treasury, the loss of the bulk of her ground forces and a considerable portion of her navy, and notwithstanding further recurrences of the plague that had de cimated the civilian citizenry, the A thenians remained in a tenable position o wing to Sparta's weakness at sea. Into the near stalemate created by Sparta's land and A thens's sea superiority stepped Persia. The Persian ruler, Darius II, hoping to recover those portions of Persia's empire lost to t he A thenians o ver 50 y ears before, s ent emissaries to Spa rta p roposing a n a lliance. The traitorous Alcibiades also advised Sparta to offer support to such disaffected A thenian subject cities as Miletus in Ionia.

The Spartans' success at Miletus redoubled the Persians' e fforts t o s trike a ba rgain. A lcibiades advised the Spartans to cooperate with the Persians, and the two powers negotiated the Treaty of Chalideus in 412 b.c.e. A thens responded by sending a naval s quadron into the A egean. The force re established A thenian c ontrol o ver c ities whose disaffection had been e neouraged by the revolt at Miletus. That city became the squadron's next t arget, but a spirited defense w ith Spartan and Persian support turned back the attempt.

A s eries o f f eints a nd c ounterfeints, a ttacks and c ounterattacks, an d treaty r enegotiations between Persia and Sparta followed, but the situation changed most materially in 411 b.c.e. when a Peloponnesian fleet in the Aegean at last demonstrated that they could hold their own against an Athenian armada. As a result, Athens lost its precarious a dvantage, and p ublic di ssatisfaction at home intensified. The aristocratic classes of Athens, increasingly fed up with the rule of the untutored majority, sought a return to ol igarchy with themselves in charge. Into that situation stepped the ever- imaginative A lcibiades, w ho s aw a n opportunity to engineer his own return to A thens. He would come home, he said, bringing with him the support of the Persian governor Tissaphernes, w ho wou ld a bandon h is su pport o f Sparta—if t he A thenians would a gree to s crap democracy in favor of oligarchy. The success of Alcibiades' s uggestion, Thucydides p oints out, principally resulted from the fact that powerful and influential Athenians had a lready concluded that ending demo catic rule was the most intelligent course.

In his b id to r eturn to A thens, A lcibiades found a n unlikely ally i n an an tioligarchic moderate n amed Thrasybulus. This i nfluential Athenian d emocrat pr evailed o n A lcibiades t o moderate h is position and not move all the way toward upper-class rule. A counterplot led by the Athenian s tatesman Ph rynicus u ndermined Alcibiades' standing with the Persian n obleman Tissaphernes. (In a ddition to this, Tissaphernes' strategy a ll along h ad b een to pl ay both s ides against the middle and eventually wear out both Athens and Sparta.) With the collapse of Alcibiades' appa rent a bility to b ring Persia o ver to t he Athenians, his hopes for a restoration evaporated. So, for the moment, did the ambitions of the oligarchic party.

They soon resumed, however, and from fraud and p olitical m aneuvering, y oung m embers o f the aristocratic class began a campaign of assassination against the leaders of the democratic coterie. What they had failed to accomplish by guile, they soon achieved through fear. A council of 400 who g ained o ffice in a complex and mysterious manner had suc ceeded i n ac hieving d ictatorial power in Athens, literally driving the elected officials from their council house and assuming plenary powers on June 9, 411 b.c.e.

Elsewhere in the A thenian s phere of i nfluence, pa rallel a ttempts d id n ot m eet w ith such success. Democracy was preserved on the island of S amos in the threat of a similar oligarchic coup. Back on the mainland, oligarchs and democrats raised armies and faced off at Piraeus. The soldiers on both sides, however, favored the democrats, and after a mock battle, they joined forces to destroy the fortifications at Piraeus. In doing so, t hey u nwittingly t hwarted a co up b y a n attacking Spartan fleet in league with the 400. Despite the 400's usurpation of power in the city proper, the vigilance of ordinary democrats and a few moderate leaders saved Athens from falling to the Spartans. All this, of course, amounted to a failure of the policy of the 400, and the Athenians responded by formally deposing them and restoring the moderate council of the 5,000. In Thucydides' view, under the rule of this council, Athens e njoyed it s b est g overnment du ring t he historian's lifetime. A bout 10 m onths later, full democracy was restored in Athens, and a punitive reaction against aristocrats set in. A few were condemned and punished; others found it prudent to flee.

In the meantime, the focus of military operations h ad sh ifted t o t he H ellespont. There t he Peloponnesian fleet f omented r evolution i n Byzantium a nd o ther n eighboring lo cations, endangering Athens's food supply lines. Another Persian g overnor, Ph arnabazus, l ent e ncouragement to the Sp artans but failed to send ships in their support. A clever Spartan admiral, Mindarus, however, managed to elude his Athenian opposite number, Thrasyllus, and arrive safely in the Hellespont. In doing so, he shifted the principal location of hostilities. Despite Athenian naval successes (including t hat o f A lcibiades, now re instated a s a n Athenian ge neral) at C ynossema, A bydos, a nd Cyzicus, the war in the region of the Hellespont put t he A thenians on t he pa thway to u ltimate disaster.

It is shortly a fter the battle of Cynossema in 411 b.c.e. that Thucydides' history ends, leading some to conclude that he died around this time. However, there is conflicting evidence that he lived to around 400–401 b.c.e. and perhaps even later. The contemporary historian Donald Kagan carried \overline{A} e Peloponnesian War to its ultimate conclusion, and here I follow his account.

The w ar's pa thway s till had ma ny t wists to take, a nd t he first was t hat t he A thenian na val successes noted above caused the Spartans to violate their treaty with the Persians and unilaterally sue for peace with Athens. The Athenians, though, rejected t he Sp artan overtures for good re ason. The Spartans were not to be trusted; they wanted to keep conquered territory in the colonies, and if Athens relaxed its vigilance, the Spartans might very well take the opportunity to resume the war when the moment seemed favorable.

Now the tide of warfare turned in favor of the Spartans. A c ivil w ar o n t he i sland o f C orcyra resulted in the defeat of the A thenian p arty. The Spartans overwhelmed the small A thenian stronghold on the Bay of Navarino. Attempting to take Ephesus, the Athenian general Thrasyllus was defeated. Teamed with Alcibiades, however, he enjoyed better success in 409 b.c.e. at Lampsacus a nd Ab ydos, w here t hey def eated t he Persians. A lcibiades a nd his c onfederates a lso managed to r ecapture t he c ity of By zantium by deception. W hen, ho wever, t he A thenians attempted to upstage the Spartans by means of a treaty with Persia, their slow-moving ambassadors, then on their way to the imperial capital at Susa, met a Spartan diplomatic mission returning thence. In the Spartans' hands was a treaty signed

by D arius II himself, and in their company his son, Cyrus.

Alcibiades finally decided to return to A thens and did so at an unpropitious moment on the one day of t he y ear w hen t he hol iest i mage of t he city—the Athena Polias—was absent from public view and adoration owing to an annual cleaning. Many thought his arrival an ill omen. He recovered, however, by providing a military escort to a group of pilgrims walking on their way to Eleusis and m aking p ossible t heir p articipation i n th e ceremonies there for the first time in years. This success produced an outpouring of public a ffection so that the le aders confirmed the reformed Alcibiades in his role as a principal general.

While Alcibiades was thus engaged in polishing his public i mage, the Spartans in the Ionian and Aegean regions were reinforcing their military and coming to new agreements with the Persian prince Cyrus, who, though only 17 years old, was the n ew g overnor in the region formerly under the control of Tissaphernes, western A natolia. Cyrus was the younger son, but he had h is eye on the crown of the Persian Empire. Shrewd as well as ambitious, he searched for an eminent ally a mong the Spartans and found h im in the person of the new Spartan admiral, Lysander, the subject of one of Pl ut ar ch's *Par allel Lives*.

Common sailors who had deserted the Athenians for the better pay that Cyrus made possible reinforced L ysander's Spa rtan fleet, m oored a t Ephesus. Citing Plutarch, Donald K agan tells us that Lysander's command had grown to 90 ships. Perhaps in an effort to get Lysander to engage in a sea battle, A lcibiades, n ow the commander of an 80-ship Greek fleet, withdrew his troop ships to Phocaea. He left his triremes (fighting ships) under the command of a p etty officer who had served h im a lo ng t ime, p robably b ecause he thought he could be trusted to follow orders. He gave h is de puty commander, A ntiochus, a v ery important order not to attack Lysander's ships.

The opportunity, however, to strike a blow for Athens i n A lcibiades' absence overcame A ntiochus's obedience. He attacked with 10 ships, his own i n t he le ad. L ysander's i ntelligence s ystem was reliable. He k new the situation in the A thenian fleet a nd t hat he f aced a n i nexperienced commander, n ot the f ormidable A lcibiades. Lysander r ammed and s ank An tiochus's sh ip, killing its commander; the other nine ships fled. Other A thenians attempted to c ome to t he re scue, but their uncoordinated attack merely made them equally vulnerable. At the ensuing battle of Notium, the Spartans sank 22 Athenian ships and sailed back to the safety of the harbor at Ephesus before Alcibiades returned.

The Athenians properly blamed Alcibiades for the defeat that finally turned the tide of the Peloponnesian War in favor of the Spartans and their allies. He next incurred further blame by losing a land ba ttle a t Cy me. A nticipating t he fate t hat would await him at Athens, Alcibiades retired in self- imposed exile to a fortified villa he had prepared at Gallipoli against just such an eventuality. He would not return to Athens again.

The A thenians app ointed a n ew ad miral, Conon, to take Alcibiades' command. In keeping with S partan law, a n ew ad miral, C allicratidas, also r eplaced L ysander. C allicratidas d id n ot inspire the same regard in the Persian Cyrus, and Cyrus r efused to pa y t he Spa rtan s ailors. C allicratidas t hen moved h is he adquarters f rom Ephesus to Miletus and embarked on a policy and a p ublicity c ampaign t hat p romised f reedom to overseas Greeks.

Callicratidas p roved hi mself s uperior a s a naval tactician to the Athenian Conon. The Spartan admiral captured 30 ships of one of Conon's squadrons and blockaded another 40 in the harbor at Mytilene. In view of that success, Cyrus restored Persia's financial support. Athenian reinforcements, procured by an unprecedented flurry of shipbuilding and recruitment that finally utterly exhausted the Athenian treasury, arrived. But now it was the Spartans who had the experienced sailors a nd t he t actical adv antage. They f elt assured o f v ictory. N evertheless, a t th e n ext engagement, the Battle of Arginusae (406 b.c.e.), brilliant At henian planning produced a victory in which the Spartans lost 77 (well over half) of their ships to the Athenian's 25-about a sixth of their fleet. A thenian superiority at sea was reestablished, a nd t he y oung Spa rtan ad miral p erished in the fight. Because of stormy weather and the di stance fr om l and where t he ba ttle w as fought, both the living and the dead who were in the sea had to be abandoned. The Athenian public was so horrified by this decision that, their victory notwithstanding, the generals who returned to Athens were tried and executed.

As a result of their naval disaster, Sparta once again s ued for p eace, but t he A thenian dema gogue Cleophon, thinking that total victory was in sight, persuaded the Athenians to continue the war. The Spa rtans e vaded t heir o wn l aws b y appointing a figurehead admiral b ut ma king Lysander his secretary. It was he who would give the orders.

The decisive battle of the Peloponnesian War was at last at hand—though no one k new it i n advance. At the battle of Agospotami—not far from the r esidence i ne xile of Alcibiades— Lysander and his subordinates routed the Athenians b oth on l and a nd at sea, and th ose w ho were c aptured were put to de ath. On receiving that news, the citizenry of Athens—even though their r esources were u tterly e xhausted a nd t he war definitively lost—decided to try to hold out at all costs lest they suffer a fate similar to their captured countrymen.

On his return to Greece in autumn 405 b.c. e., Lysander f ound t he t wo k ings of Spa rta i n t he field with the entire army of the Peloponnesians encamped outside the walls of Athens. When the threat of th at force failed t o p roduce A thenian surrender, Lysander left some of his fleet to blockade Athens and starve the populace into submission w hile he sailed off to b esiege a thus-far staunch Athenian colony, the island of Samos.

Eventually starvation overcame Athenian resistance. That, c oupled w ith t he i nitiative o f a n Athenian moderate, Theramenes, who was able to persuade Lysander not to de stroy A thens utterly, led to t he city's eventual surrender. "Pericles" and "Fabius" (from Parallel

Lives) Plutarch (ca. 100 c.e.)

Pl ut a r ch's 10th set of biographies from his Pa r alle 1 Live s, together with the first, "Thes eus" and "Romul us," provide samples in this volume of the 23 surviving pairs of biographies and the comparison of the subjects' moral qualities that, together w ith f our i ndividual l ives, c onstitute Plutarch's biographical masterpiece.

The 10th s et c ompares t he Gr eek o rator a nd statesman Pericles (ca. 500–429 b.c.e.) with Fabius M aximus (ca. 2 75–203 b .c.e.), n icknamed *Cunctator* (the delayer), the Roman general, consul, a nd d ictator w ho f rom 2 17 to 2 09 b .c.e. opposed the Carthaginian invasion led by Hannibal. Fabius eventually defeated Hannibal through a lo ng s eries o f s trategic del ays a nd t actical retreats; u ltimately, Ha nnibal's su pply1 ines became so l ong t hat he c ould n ot su stain t he invasion.

Plutarch b egins h is l ife of Pericles with an introduction that details the b enefits of reading about ac ts of v irtue, a n a ctivity t hat s timulates the reader to imitate virtuous behavior. Next he

526 "Pericles" and "Fabius" (from Parallel Lives)

praises undertaking works of virtue and engaging in occupations of benefit to others, including writing the lives of famous people.

After reviewing Pericles' birth and education, Plutarch a ddresses t he p ublic i mage t hat t he statesman c ultivated. W hile P ericles fe lt h is wealth, lineage, and capacities might attract the unfavorable not ice of p ersons i n p ower a nd could lead to his exile as a potentially dangerous person, h e ke pt a lo w p rofile a nd c onfined h is public service to distinguishing himself in the military. La ter, wh en h e co nsidered t he t ime ripe, he entered politics but kept very much to himself and appeared only when important matters justified his direct, public participation. On those occasions, he took care to speak eloquently and to say nothing inappropriate. He cultivated t he f avor o f t he A thenian c itizenry b y finding pu blic e mployment f or ma ny o f t hem and by carefully gauging and responding to public opinion.

Clearly a n a dmirer of P ericles, P lutarch defends the statesman against the libels of other historians who, like Idomeneus, accused him of cruelty a nd d ishonor. P lutarch, r ather, finds i n Pericles o pposing tendencies to ward p opulism on the one h and and ar istocracy on the other. But as the parties of Athens displayed the same split, Pericles opted to side with the populists. He oversaw t he re distribution of Athenian wealth through public work projects that benefited the citizenry by putting money in their pockets and improved the city by making it both more beautiful and more livable. To Pericles' initiative, for example, b elonged t he bu ilding of t he Parthenon a nd i mprovements to t he en trances to t he Acropolis.

By such o penhandedness, Pericles was eventually able to triumph over his principal rival for power, Thucydides (not the f amous h istorian). After h is r ival's o stracism and e xile, s ays P lutarch, Pericles felt himself to be in unopposed control of A thens and thus free to in dulge h is aristocratic t endencies. H e b ecame a r egal and austere r uler, u tterly f ree f rom a ny ig noble motive.

Plutarch also admires Pericles' military strategy, which held in check those who were enthusiastic for war while at the same time displaying Athenian power and seeking alliances with those whose ambitions might make them potential enemies. H e t old t he A thenian c itizens w ho were sometimes eager for military adventures that he wanted them to live forever and not die needlessly in some foolish foreign or dome stic c ampaign. Nonetheless, when he thought the occasion warranted war, Pericles did not shrink from it, and Plutarch d escribes h is campaigns ag ainst the Samians and the A thenians' e ventual suc cess (440-438 b.c.e.). Pericles was also drawn into the immediately s ubsequent Peloponnesian W ars. Again, h owever, he p ursued h is o wn s trategies, sending a fleet t o h arass his e nemies' coastal towns while ke eping the Athenian foot soldiery within the city and leaving the countryside to invaders for a time.

Plutarch goes on to admire Pericles' demeanor in moments of adversity and at the time of h is death from a sickness that ad icted many in Athens. The b iographer r ecalls ho w, a s P ericles neared h is end, his friends and supporters gathered a round h is deathbed with many tokens of honor for his service to the city and stood recalling his triumphs as if he were already dead and could not hear him. Pericles, however, was conscious and finally r eproved t hem, s aying, "N o Athenian, through my means, ever wore mourning." Pericles' life, h is exercise of a uthority and his utter incorruptibility earns Plutarch's unwavering admiration.

Turning to the Roman, Fabius, Plutarch first traces his genealogy and then recalls his physical and b ehavioral c haracteristics in c hildhood. Thought to be backward and lacking energy as a child, Fabius instead proved himself to be a brilliant but stable, deliberate, constant, and prudent adult. With a severe regimen of exercise, he prepared his body for military service and his mind and tongue for leadership and public oratory.

Five times elected consul, and before the Carthaginian invasion, h e had a lready p roved h is capacity for military leadership by defeating the Ligurians of northwestern Italy. When Hannibal's Carthaginian army marched across the Alps and invaded t he I talian p eninsula f rom t he n orth, won a battle near the river Trebia, and desolated the T uscan c ountryside, Fabius w isely avoid ed the military confrontation that Hannibal wanted, choosing i nstead to ha rass t he C arthaginian's over-extended s upply l ines a nd s tarve h is a rmy into submission. Fabius's fellow consul, Flamine-us, on the other hand, resorted to an early trial by arms in a battle fought during an earthquake. The victorious C arthaginians k illed Flamineus a nd 15,000 R omans; an other 1 5,000 were t aken prisoner.

The urgency of this situation resulted in Fabius's b eing n amed d ictator. I n t hat capacity, he attended to public relations, m aking the people regard t hemselves as favored by the gods in the engagement with the Carthaginians. Then, with the remaining Roman forces at h is d isposal, he flanked the enemy, repeatedly raiding Hannibal's supply l ines, a nd s crupulously a voiding p itched battle—especially with Hannibal's cavalry, which included elephants.

Even a fter Flamineus's i nstructive defeat, n ot everyone a pproved of F abius's s trategy, and t he consul Minucius succeeded in having the people proclaim him codictator with Fabius. With great wisdom and forbearance, Fabius a llowed M inucius to assume command of half of the army and to fall i nto a t rap t hat Ha nnibal had s et for t he unwary. B ecause of Fabius's foresight, however, he was able to trap the trapper and relieve Minucius. M inucius l earned h is le sson, r esigned h is codictatorship, and thereafter regarded Fabius as his father and the savior of Rome.

Lessons concerning the futility of confronting Hannibal, however, did not last long. Fabius now felt that he could resign the office of dictator. No sooner had he done so, however, than another consul, Terentius Varro, en listed a n a rmy of 8 8,000 soldiers t o confront Ha nnibal. I n t he en suing melee near Cannae on the river Aufidus, as Fabius had feared and predicted, Hannibal decimated the flower of Roman youth. Varro and a "thin company" of his once-mighty army escaped.

"Pericles" and "Fabius" (from Parallel Lives) 527

The pa nicked c itizens o f Ro me t urned o nce more to F abius, w ho c almly c omforted t hem, assuaging t heir f ears. Ha nnibal hel ped, to o, b y not fol lowing u p o n h is v ictory a nd ma rching straight a gainst Ro me. H eartened, t he Ro mans appointed a nother g eneral, C laudius Ma rcellus, more skilled and judicious than any of his predecessors except for Fabius. While Fabius harassed the C arthaginians' r ear a nd flanks, C laudius boldly engaged them in a series of successful battles, until he to o at last fell victim to Hannibal's superior military tactics.

In Plutarch's view, F abius, a fter r etaking t he occupied town of Tarentum with a combination of force and guile, momentarily yielded to a mbition. As for Hannibal, after Tarentum fell, for the first time the Carthaginian general was overheard delivering the opinion that it was now impossible for h im to ma ster I taly with t he f orces a t h is command.

Rome n ow p roduced a n ew g eneral, S cipio, afterward su rnamed A fricanus, w ho a gainst Fabius's advice crossed the Mediterranean with a Roman force and took the war to Carthage. Scipio eventually forced Hannibal to leave Italy for the defense of h is o wn ho meland. F abius p redicted disaster b ut di ed b efore receiving ne ws that h e had at last been wrong. Scipio utterly decimated the Carthaginian forces under Hannibal.

Every Roman citizen contributed the smallest coin in his possession to defray Fabius's funeral expenses. F abius did n ot n eed t he money. The point wa s t hat b y c ontributing to h is f uneral expenses, each Roman citizen acknowledged him as his father.

In his comparison of the two leaders, Plutarch judges that Fabius had the harder job since he came to p ower at a pa rticularly difficult moment when the Roman commonwealth was in a "sinking and ruinous" c ondition. P ericles, on the other ha nd, took command when A thens was at the height of its p ower a nd p restige. The h istorian then c ompares Fabius's victory over Tarentum with that of Pericles over S amos a nd o ther c ampaigns w aged by the two statesmen or their subordinates. In this instance, the historian's opinion is mixed. Fabius's

528 Peripatetic school of philosophy

rescue of Minucius trumps any exploit of Pericles. Pericles, on the other hand, was never outsmarted by his enemies, as Fabius was on an occasion when Hannibal convinced him that a herd of oxen with fire between the horns of each animal was an army marching by night.

The palm for prophecy goes to Pericles, whom Plutarch c alls "a good prophet of bad suc cess." Fabius, on the other hand, was a bad p rophet of Scipio's success. The historian also suggests that, because of h is greater authority, Pericles had a n easier time of governing than did Fabius, whose power, especially when not in the role of dictator, was l imited. I n ter ms of public projects and adornment of his city, Pericles wins easily.

Plutarch's d iscussion of this pair of famous men i s m uch more fo cused a nd be tter c rafted than h is treatment of h is first duo, Theseus and Romulus. S o s triking i s the c ontrast t hat so me readers h ave c alled i nto question P lutarch's authorship of the first pair of parallel lives. While that issue is probably not resolvable, it m ay well be the case that, if "Theseus" and "Romulus" constituted P lutarch's first a ttempt a t b iographical comparison, the a uthor g rew into h is art and learned to c raft a more efficient and esthetically satisfying product.

Peripatetic school of philosophy

(Aristotelian philosophy)

When, in 335 b.c. e., the Greek philosopher Ar istot 1 E finished his responsibilities as the tutor of Alexander the Great, he returned to Athens. He had been absent from the city since the death of his teacher, Pl at o (347 b.c. e.). In Athens, Aristotle founded a school in a precinct sacred to Apollo, the Lyceum. This spot was available for public recreation and contained several walkways. Because of that and because of Aristotle's habit of strolling about a s h e d iscoursed w ith h is s tudents, t he school to ok i ts na me f rom t he Gr eek w ord f or walking a nd b ecame k nown a s t he P eripatetic school. On Aristotle's death, the leadership of the school passed to Theophr ast us of E r es us and then to a line of successors that included the eloquent b ut n ot very scholarly Lyco a nd the Stoic Ariston of Ceos.

The school took all knowledge as its province, and its first t wo he ads i nitiated a program of research into every intellectual field then recognized. When the Romans conquered Athens in 87 b.c.e., their general, Lucius Cornelius Sulla, had the school's library taken to Rome. A fter a brief interval, the philosopher Andronicus of Rhodes reopened t he school, and under him its focus became less specifically Aristotelian, becoming infused with elements of the Academic sect of phil osophy and that of the Stoic philosophers (see Stoicism).

In t he s econd century c .e., t he s cholarly Roman em peror M ar cus A ur el ius b ecame a benefactor not only of the Peripatetic school but also of the schools teaching the other branches of philosophy a s well: the P latonists (Academic school), the Stoics, and the Epicureans. Thereafter, ho wever, t he P eripatetic i nstitution f aded away a st he i ntellectual heritage of Aristotle passed into other hands.

Persians, The Aeschylus (472 B.C.E.)

The only extant Greek t r agedy to de al directly with contemporary historical events, \overline{A} e Persians commemorates t he A thenian v ictory over t he forces of P ersia at t he Battle of Sa lamis i n 480 b.c.e. There t he p owers of a far-flung P ersian empire mounted an attack by land and sea against Athens i n p articu ar and the Greeks i n g eneral. The k ing of P ersia (modern I ran), Xer xes, had spanned the Hellespont—the narrowest strait separating Asia from Europe—with a bridge of ships and a dvanced in to Gre ece. The Spa rtans' subs equent heroic stand at Thermopylae gave the other Greek states time to assemble their ships, and they destroyed the Persian naval force at Salamis, just south of Athens.

Aeschyl us himself had served with the Greek forces at Salamis and had witnessed the events. It is a tribute to t he playwright's innate humanity and h is sense of moving d ramaturgy, therefore, that he chose to set his play not in victorious Athens, nor at the scene of the battle itself, but rather in the royal Persian city of Su sa. There the play opens at a moment when the citizens of Susa are awaiting word of the outcome of the Persian campaign. The ch or us en umerates t he emba ttled powers of Asia who pass in poetic review in such a pictorial fashion that the audience gains a sense of a bird's eye view of a seemingly endless parade of kings, soldiers, animals, and weaponry marching off to overwhelm Athens.

Mixed in among the Persians' paeans of martial pride, however, the audience detects an undercurrent of concern. No word has come from the front. The P ersian c ities have b een em ptied o f their defenders and would be at the mercy of an attack should one come.

Atossa, t he P ersian que en, m other o f Xer xes and wi fe o f his d eceased f ather, Da rius, en ters, and her monologue reinforces the repressed sense of foreboding that the chorus has initiated. In her second speech, Atossa recounts her dream of the preceding night—a dream that seems to auger ill success f or t he P ersian v enture. She a sks her advisers for their interpretation of her vision, and they try to comfort her.

Feeling s omewhat re assured, s he a sks q uestions about A thens: W here is it? How rich is it? What is its form of gove rnment? W hat is t he nature of its military strategy? The a nswers she receives to her questions heighten her c oncern, and she exits to prepare to pray.

At that moment, a messenger arrives from the front and proclaims the annihilation of the Persian forces a nd t heir a llies. Xer xes has h imself survived, b ut a n en tire generation of t he y oung men of A sia has b een w iped o ut. The c horus laments X erxes' l oss o f prestige and p ower throughout Asia.

Atossa reenters and goes to pray at the tomb of her h usband, Da rius. The c horus ma kes u nflattering comparisons between the wise and peaceful ways of the f ather, Darius, a nd t he w arring folly of X erxes, the s on. Da rius "wasted n ot h is subjects' blood," they sing, in "realm un-peopling war."

The chorus calls up the ghost of Darius from the u nderworld. W hen t he g host app ears, t he chorus fears to recount to it the loss of the flower of P ersia's yout h, and this task falls to Atossa. Darius's g host attributes Xer xes' utter failure to youthful h ubr is a nd to the b ad c ounsel of h is youthful a dvisors. The ghost a lso faults the folly of the Hellespont strategy and the Persian attempt to tame the sea.

The g host of Da rius t hen foretells t he f uture and predicts still worse to come. The ghost foresees the Persians' further defeat at Grecian hands and the mounds of Persian de ad at the battle of Plataea (479 b. c.e.). D espite its harsh judgments of Xerxes' folly, the ghost counsels Atossa to array herself in her finest garb and greet her son with words of comfort rather than of blame. The chorus then catalogues Xerxes' successes, all fruitless in t he li ght of his f orces' to tal de struction a t Salamis.

Xerxes h imself n ow en ters, a nd a d ialogue ensues between him and the chorus in which the Persian losses a re once more recounted (and the Athenian successes tacitly implied). Xerxes wends

his woeful way ho me to l ament h is lo sses a nd utter humiliation.

In the final song, the chorus lauds the Grecian victory and b ewails the P ersian loss. The evenhanded humanity with which Aeschylus treats the entire si tuation b ears w itness to the good judgment and essential k indness of a playwright who had viewed at first hand the horror of Salamis.

Persius (Aulus Persius Flaccus) (34–62 с.е.) *Roman poet*

Like the poet Luca n, the Roman satirist Persius studied u nder the Stoic phi los opher Cornutus. According to a biography t hat Valerius Probus probably wrote and that Sueto nius passed down for posterity, Persius was a member of the equestrian, or knightly, class of Roman citizenry, and he traced h is a ncestry to t he a ncient Etruscans. He had moved to Rome from h is native town of Volaterrae in the district of Etruria.

The basis of the ideas and some of the vocabulary of Persius's *Sati res* can be traced to Horac e. Nonetheless, though a thorough mastery of every aspect of Horace's work appears in Persius's satire, and though Persius himself acknowledges a debt to t he Roman satirist Lucilius, Persius's work remains unmistakably distinctive.

That d istinction app ears first in the scornful stance P ersius ad opts with r espect to his a udience, to his contemporary society and its hypocrisy, to his contemporary poetic taste, and to his fellow writers. It also appears in the paucity of his output. H is six s atires were p ublished p osthumously, and their total length does not amount to 700 lines. His history as a student and ardent devotee of St oicism informs his text at every turn. Following Persius's early death, his satires were edited a nd p ublished b y the fr iend and f ellow poet to whom the sixth satire is addressed, Caesius Bassus. Persius's works have long been translated i nto the modern l anguages of Eu rope a nd the New World. Notable among his English translators wa s a n 1 8th-century f ellow s atirist an d poet, J ohn Dr yden. A n ew a nd a ttractive p rose translation of P ersius's work is that of S usanna Morton Braund.

Petronius Arbiter (Gaius Petronius[?],

Titus Petronius[?]) (ca. 27–66 c.E.) Roman prose writer and poet

A d egree of i rresolvable u ncertainty s urrounds the question of whether or not the author of what is n ow g enerally c alled the Satyrico n is t he same courtier who was compelled to commit suicide a t t he i mperial Roman c ourt u nder t he emperor Nero. If so, the Roman historian Tacitu s gives an account of him that describes him as a person who "idled into fame," asleep during the d ay a nd w akeful t hrough t he n ight a s he arranged and directed the extravagant and sensuous entertainments that o ccupied the emperor's n ights. P etronius's p opularity w ith Ne ro seemingly aroused the jealousy of the prefect of the Praetorian Guard, Ofonius Tigellinus. The upstaged Tigellinus vented his fury by contriving Petronius's d ownfall. I nfluenced b y T igellinus, Nero condemned Petronius to suicide. He sneeringly an ticipated the emperor's order, but to ok his time and lengthened the process of dying by having h is v eins o pened, t hen b ound, t hen reopened. As he died, he engaged in the sorts of pleasures that he most enjoyed, and in his will he wrote as cathing e xposé o ft he em peror's debauchery-debauchery that he had a ha nd in arranging but in which he probably did not participate himself.

If, as seems reasonably likely, the three men known to us as Petronius are one and the same, before coming to Nero's court, Petronius enjoyed a more active and distinguished career as an official of the Roman Empire. He served as the governor of the territory of Bithynia in Asia Minor in 60 c.e., and in the same year he became the interim commander of the Roman legions in Britain, holding t hat p osition t hrough February 61 c.e. Immediately thereafter, he became the master of the emperor's revels. In that capacity, Petronius is said to have earned the title "arbiter of elegance"whence the addition of Arbiter to his name. With Tigellinus's elevation in 62, however, the emperor withdrew his favor by degrees, with the eventual outcome described above.

Literary h istory remembers P etronius principally for the fragmentary remains of a work that originally r an t o a s m any as 400,000 words. Its usual title is an invention of literary history. No one is sure what Petronius called his work, but the Latin word from which *Satyricon* derives is *satura* (a medley). An earlier title assigned to the work was *Satyrica* (the adventures of satyrs). The word *satire* as currently understood, of course, was also implicit in the title.

As a medley, the work is composed both in prose and in verse, and one subject freely follows another without a break for transition. What now survives of the work are sections taken principally from its 15th and 16th books. Some fragments of poems also survive.

Phaedrus the fabulist (Gaius Iulius Phaeder) (ca. 15 B.C.E.–ca. 50 C.E.) *Roman poet*

Brought from his native Thrace as a slave to Rome, Phaedrus fortunately b ecame the servant of the emperor A ugust us C a esar, who set h im free. He au thored at le ast five books of f a bl est hat survive u nder h is na me; a n add itional 32 fables survive t hat a re a lso l ikely a ttributable to h im. Phaedrus r elied for h is stories principally u pon the fables told by h is predecessor, A esop, and on stories from other sources that people attributed to A esop. T o both so rts of f ables, ho wever, he added brief tales about such figures as Mena nder, Soc r at es, or Aesop himself.

Phaedrus also made none- bo- vailed references to current Roman politics. This practice brought Phaedrus to the unfavorable attention of the emperor Ti berius's pre fect of t he P raetorian G uard, Lucius A elius Sejanus—a ma n n ot to b e t rifled with. P haedrus m ay well ha ve b een i mprisoned for a time over h is r eal or f ancied c riticisms of imperial policy. It is likely they were real; though many of the fables are merely jocular, others seem to b e s traightforward s ocial a nd p olitical c riticism. A principal Phaedrus lesson was this: When the immoral or the ig norant are in p ower, ordinary persons need to le arn the virtue of resignation and wait out the storm. Resistance is futile.

If Phaedrus's versions of such stories as "The Fox and the Sour Grapes" or "The Wolf and the Lamb" do not reach the level of the Renaissance fabulist L a F ontaine, h is w ork is n onetheless a major vehicle for the transmission of the age-old plots. Phaedrus wrote in the verse style of archaic Latin. H e u sed ia mbic, a ccentual v erse rather than the Greek system of arbitrary syllabic length that the Golden Age writers of Rome had made common.

Philemon (fl. ca. 368–ca. 265 B.C.E.) *Greek dramatist*

A pl aywright o f t he Gr eek N ew C omedy (see co medy in Gr ee ce a nd Rome Philemon's plays are principally known to posterity through almost 200 f ragments o f h is w ork; t hrough su rviving lists of winning comedies in the Athenian January festival, the Lena ea; and through the comedies that the Roman pl aywright Pl a ut us ba sed on Philemon's then-extant works.

Active throughout most of a life that may have spanned a c entury, P hilemon is k nown to ha ve written 97 comedies, although only around twothirds of their titles survive. From the lists of winners, w e k now t hat P hilemon's p lays t ook first prize at the Lenaea on three occasions.

While the extant fragments tell us that Philemon's work sometimes tended toward wordiness and heavy-handed moralizing, Plautus's tighter, funnier, and better- crafted revisions of such plays as Philemon's *Emporos* (Plautus's $\overline{A} \ e \ Mer \ chant$), $\overline{A} \ esauros$ (Plautus's *Trea sure*), and p erhaps h is *Phasma* (Plautus's *Haunted House*) g ive u s a sense of the plots and out lines of P hilemon's comedies. A ccording t o the c lassicist W illiam Geoffrey Arnott, Philemon's plays enjoyed a brief Athenian revival after his death, and the citizens erected a statue of him. The absence of complete texts, however, suggests that his popularity soon dimmed.

Based on surviving lists of Greek New Comedy props, we can say something more about Philemon's characters, who represented types. The actors wore masks app ropriate to the type that they p ortrayed. Thus, t here were masks for old men a nd ma sks f or s laves, f or c ourtesans, f or cooks, and so forth. The plays, too, were typical in being designed to meet audience expectations for l ight en tertainment w ith an e difying m oral resulting from predictable and often vicious difficulties t hat r egularly i nvolved older p ersons interfering in the love interests of younger ones. Coincidence a nd f ate g enerally pl ayed ma jor roles.

Though Philemon's plays sometimes defeated those of an apparently better dramatist, Menander, the latter playwright s eems to have been in no doubt about whose plays were really superior. The essayist Ge llius (fl. s econd c entury c. e.) quo tes Menander as having asked Philemon if the latter were not ashamed that his play had been preferred to Menander's—suggesting t hat Philemon's play may ha ve w on o wing to t he su pport of a pa id claque.

Philetas of Cos (Philitas of Cos)

(ca. 330–270 B.C.E.) *Greek poet*

A native of the island of C os and the s on of a n islander n amed T elephus, P hiletas b ecame a learned poet and teacher. He tutored the second Greek ph araoh of E gypt, P tolemy I I (Ptolemy Philadelphus) and is also said to have taught other famous persons. Although only a few fragments of h is work s su rvive, h is ac hievements a re w ell attested to in the work of his successors. He provided a m odel for C allimachus and for o ther scholar-poets who rejected the epic as their preferred medium and chose instead to write shorter and more allusive poems that implied rather than stated m uch of t heir e motional me aning a nd achieved a high degree of verbal musicality.

Among the poetic works mentioned by successors and commentators, we find Demeter. This elegiac work told of the grief of the goddess of fertility when Pluto kidnapped Demeter's daughter Persephone (also called Kore) and made her queen o ft he u nderworld. P hiletas's Hermes recounts a n e pisode co nnected w ith H omer's $\overline{A} e Odyssey$. In it, O dysseus has a love a ffair with Polymele, the daughter of Aeolus, the king of the winds. Another work, Telephus, may have been named for the poet's father. Most of its content is unknown, though it may have alluded to the marriage of the Argonaut Jason and Medea (see Medea). P hiletas also b rought t ogether a collection of epigr a ms, and somewhere is said to have addressed a series of love poems to a woman named Bittis.

Among Philetas's lost prose works, we find references to a c ollection of g losses t hat c larify archaic forms used by Homer, explain dialectical variants, and define t echnical ter ms. This work was apparently treated as a benchmark reference by Philetas's successors.

Philoctetes Sophocles (409 B.C.E.)

Philoctetes appears briefly in \overline{A} *e Ili ad* of Homer as an archer and the leader of a squadron of seven of t he G reek s hips b ound f or T roy. P hiloctetes' story a s S ophocl es tel ls i t, ho wever, d raws o n legendary material about the Trojan War that had been recounted in a post-Homeric epic known as the *Little Iliad*.

Background: When the hero Heracles (Hercules) lay in a gony a bout to b e b urned at h is own request upon his funeral pyre (see \overline{A} e Tr achiniae), the hero asked that the pyre be set ablaze by a youth named Philoctetes. As a reward for that service, Philoctetes r eceived H eracles' b ow and h is arrows that had been poisoned with Hydra blood and were invariably fatal.

After some years passed, Philoctetes joined the Greek fleet bound for Troy. On the way, however, a prophetic forewarning required the Greeks to sacrifice to a local goddess, Chrysa, whose veneration was limited to a si ngle small island in the Aegean sea, and only Philoctetes knew its whereabouts. H e l ed t he Gr eeks t here. I ncautiously, however, a st he pa rty p repared t he s acrifice, Philoctetes t rod p rofanely o n ha llowed g round. In retribution, a serpent bit his foot. Philoctetes' cries of pain interrupted the ritual and made i t impossible to g o o n. Worse, h is wound b ecame gangrenous, a nd t he sm ell o vercame h is c omrades' concern for his welfare. The problem affected morale so severely that the matter came to the attention of the Greek generals Agamemnon and Menelaus. They o rdered Od ysseus t o s trand Philoctetes o n L emnos, a n u ninhabited i sland. There he r emained, su stained b y w ater f rom a spring, the flesh of game he shot with Heracles' bow and arrows, and such food as passing sailors would spare him throughout most of the 10 years of the Trojan War.

The Greeks, however, were not faring very well at Troy, and it looked as if the entire enterprise might fail. A p rophecy, though, foretold that if two conditions were met, the Greeks' fortunes would i mprove, and T roy would f all. F irst, Achilles' son Neoptolemus must come to T roy and b e ar med with h is f ather's w eapons a nd armor. Second, Philoctetes must be rescued and bring Heracles' weapons to Troy. The Greek generals therefore sent Odysseus to round up the two young men.

As Sophocles' play opens, Odysseus has already collected N eoptolemus, a nd t he t wo o f t hem, together with a n attendant a nd m embers of t he ch or us, appear before the entrance to Philoctetes' cave in a cliff on Lemnos. Odysseus tells Neoptolemus enough of the story to remind the audience where they are a nd why. Odysseus thinks that if Philoctetes sees him—the man who stranded the archer o n t he island—he w ill c ertainly sho ot Odysseus w ith h is i nvariably f atal a rrows. The wily leader th erefore i nstructs N eoptolemus on the strategy for re cruiting Ph iloctetes to r ejoin

534 Philoctetes

the Grecian adventure against Troy. The lad must trick the archer.

An i dealistic youth, Ne optolemus s ays he would prefer to use force or persuasion, but Odysseus finally convinces the youth that only trickery can prevail. Neoptolemus has discovered signs of Philoctetes' en campment, a nd O dysseus w ithdraws t o await t he o utcome o f t he en counter. After d iscussion with th e c horus th at fu rther clarifies the play's background for the audience, Neoptolemus hears Philoctetes coming.

Seeing the strangers, Philoctetes greets them in a friendly fashion and inquires a bout them. They i dentify t hemselves a s Gr eeks. P leased, Philoctetes a sks a bout their motives in coming. Neoptolemus id entifies h imself a nd den ies a ny knowledge o f P hiloctetes. P hiloctetes tel ls h is story, the circumstances of his life on the island, and he reveals his natural antipathy for the Greek captains w ho a bandoned h im. N eoptolemus i s sympathetic and says that he to o bears a grudge against the Greek captains—particularly the sons of At reus, A gamemnon a nd M enelaus, w ho denied him his father's arms. A fter further discussion in which they speak of those who have died at Troy and those who still survive, they conclude that the gods take the good men and let the evil flourish. O dysseus i s Ph iloctetes' p rincipal example of the latter.

Neoptolemus s ays he m ust b e goi ng, a nd Philoctetes begs him to take him along. He knows that the stench of his wound is a problem, but he is willing to ride anywhere, including in the bilge, and he is only a day's sail from home. Neoptolemus agrees to take him. The two are about to enter Philoctetes' dw elling to c ollect h is b elongings when they are interrupted by the arrival of a sailor and a merchant who supplies the Greek troops at T roy. The m erchant ha s he ard t he p rophecy concerning P hiloctetes, a nd h e f urther r eports that O dysseus m eans t o bring h im to T roy. Philoctetes says he would rather go to Hell.

As Philoctetes gathers his belongings and some medicine t hat e ases h is f oot, t he c horus si ngs sympathetically of his plight. He allows Neoptolemus to e xamine h is b ow a nd a rrows. Then Philoctetes su ddenly su ffers u nbearable pa in from his ad icted foot and begs Neoptolemus to cut off the offending h eel. A fter de scribing h is suffering, Philoctetes falls into a deep sleep.

When P hiloctetes w akens, N eoptolemus i s conscience- stricken about h is role i n de ceiving his n ewfound friend. The y outh c onfesses t hat Philoctetes must sail with him to Troy. Philoctetes begs the youth to give him back his weapons and leave him after all. Odysseus, however, enters, and reveals h imself to b e t he ma ster p lotter, b ut h e defends h imself b y s aying that h e is merely t he instrument of the will of Zeus.

Philoctetes threatens suicide and moves toward the edge of a precipice. Odysseus orders two sailors to restrain the man. Philoctetes calls O dysseus evil and curses him. Odysseus threatens to take the weapons and leave Philoctetes on Lemnos a fter a ll. N eoptolemus s ets a bout p reparing his ship for the journey and encourages Philoctetes to c hange h is mind a nd c ome willingly. The archer, however, has become totally distracted by finding himself in an impossible situation, and he speaks irrationally and at cross-purposes.

Neoptolemus no w s uffers a nother a ttack o f conscience and a nnounces to Od ysseus that he intends to r eturn P hiloctetes' b ow a nd a rrows. Odysseus threatens the youth with his own reprisal and that of the entire Greek army. Neoptolemus a gain a ppeals to Philoctetes to cha nge h is mind, but when he remains firm in his decision to remain on Lemnos, Neoptolemus offers him his weapons. Before Philoctetes can believe it, Odysseus enters and forbids it. Philoctetes seizes the weapons a nd a ims a n a rrow a t O dysseus, b ut Neoptolemus pre vents his shooting it, a nd i n a lengthy speech a gain a ttempts to p ersuade t he archer to come voluntarily to Troy. After exhausting e very a rgument, N eoptolemus de cides t hat, since he c annot p ersuade P hiloctetes to g o to Troy, the youth is honor bound to take him home as he had initially promised and to defend him against the anger of the Greek captains.

Having a rrived a tt his i mpasse on s tage, Sophocles h as r ecourse to one of the c onventions of Greek drama. The playwright has the hero Heracles appear as a dem igod ex machina. Following his death, Heracles was taken to M t. Olympus to dwell with the gods. Heracles informs Philoctetes that it is his destiny to go to Troy and to be cured of his disease by the divine physician, Aesclepius. Then Philoctetes will slay the Trojan prince Paris, be awarded the greatest prize in the army, and return in glory to his homeland. Heracles gives Neoptolemus similar advice. Both men accept H eracles' c ounsel, a nd a ll v enture f orth toward Troy.

Philostratus, L. Flavius (Philostratus

the Athenian) (fl. ca. 210 c.E.) *Greek* prose writer and poet

The s econd m ember of a l iterary family—all named Philostratus—whose production spanned four ge nerations, t he At henian P hilostratus i s best remembered as a biographer. He composed a series of *Lives of the S ophists* that included portraits of rhetoricians and orators from the time of Protagoras in t he fifth c entury b.c.e. u ntil t he early third century c.e.

Also a ttributed to P hilostratus a re: (1) t wo prose descriptions of pictures, entitled "Icons," an attribution t hat is sometimes disputed; (2) c onversations a mong the g hosts of w arriors k illed during the Trojan War, his *Heroicus*; (3) a collection of p hilosophical s tudies (some of do ubtful attribution) t hat i ncludes a G reek poe m upon which the Renaissance English p oet B en Jonson based his lovely poem "To Celia" ("Drink to m e only with thine eyes ...").

Beyond these, however, Philostratus deserves to be be tter remembered as the author of a fictionalized biography of a P ythagorean p hilosopher and mystic. Entitled \overline{A} eLife of Apol lonius of Tyana, the work contains stories about Apollonius that find a nalogues in the career of Jesus Christ in the Christian N ew T est ament. The parallels made an early Platonist critic of Christianity, Celsus, suspicious enough that in his work \overline{A} e True Doctrine, he accused the Christians of borrowing a ccounts of A pollonius's r aising the dead, of his having himself been resurrected, and of his having ascended bodily into heaven for the emergent Christian Scriptures. Not surprisingly, Celsus's work occasioned considerable consternation am ong the Christian c ommunity, and the Christian a pologist Or igen r esponded i n a n effort to refute Celsus's accusations.

Others, however, took up the cudgels. A critic of the claims of Christianity, Hierocles, d rew a point- by- point comparison between the miracles attributed to Christ and those attributed to Apollonius. O rigen's p upil a nd f riend, Euse bius o f Ca esar ea, also a Christian ap ologist, defended the Christian faith in his *Against Hierocles*, denying the c omparisons t hat H ierocles had d rawn between Christ and Apollonius of Tyana. Photius, St. (ca. 810–ca. 893 c.E.) *Greek Byzantine prose writer*

Photius was the son of a Christian family. His parents were exiled for a time from their native Constantinople owing to their devotion to the cult of images that temporarily was out of favor. Despite that transitory dislocation, Photius received a fine education, and h is er udition b rought h im to t he favorable attention of the authorities.

On her prime minister's recommendation, the Byzantine empress Theodora approved appointing Photius to b e professor of philosophy at the

In the usual atmosphere of disagreement t hat p revailed a mong a ncient Christians, the church could reach not agreement about who should become the patriarch of Constantinople a fter t he r esignation o f Ig natius. Finally, the bi shops compromised on a l ayman as th eir patriarch a nd c hose P hotius. P hotius hurriedly acquired the degrees necessary for him to take holy orders and was twice elevated to the office of patriarch.

Classicists r emember P hotius a s t he s cholar who compiled a commentary on 280 chapters of secular and sacred books that he had read. Though many of the books containing those chapters did not survive, the commentary did. Posterity owes to Photius what little it knows about 60 or so lost secular books by ancient authors. Among these are the *Narratives of Konon*, cited in the bibliography below. A glossary by Photius, his *Lexicon*, also survives, as do some 200 of his letters and a number of his homilies.

Phrynicos of Athens (fl. 512–476 B.C.E.)

Greek dramatist

Reputedly a disciple of the archetypal Greek playwright, Thespis of I karia, Phrynicos was the earliest A thenian a uthor mentioned (in a n inscription) as a tragic playwright. He is credited with having introduced the female mask to the Greek stage.

Phrynicos is known to have produced at least two plays—one a tr agedy and one a victory celebration. The latter, his *Phoenissae*, portrayed the Greeks' triumph o ver the P ersians a nd P hoenicians in 480–79 b. c.e. This play is a lso remembered f or t he w omen w ho p erformed i n t he ch or us: They were t he c aptured w ives of t he defeated Phoenician seafarers.

With r espect to t ragedy, the play or plays of Phrynicos made use of a single actor—who might portray more than one part by changing his costume a nd mask—and a c horus. P hrynicos's known tragedy, $\overline{A} \ e \ D$ estruction of M iletus, was based on the Persian conquest of the Ionian Greek city of Miletus and the enslavement of its entire population in 494. Magnificently produced at the expense of the Athenian statesman Themistocles, $\overline{A} \ e \ D$ estruction of M iletus won the prize for the best play presented that year, but reportedly it so moved the Athenian audience that Phrynicos was fined for saddening his fellow citizens and cutting too close to the bone with his portrayal of recent disheartening events.

Phrynicos is also remembered for preparing a word list that prescribed terms that playwrights should employ or avoid to b e considered in step with the times by Athenian audiences.

Pictor, Quintus Fabius (fl. 225–200 B.C.E.) Roman historian

An early Roman annalist, P ictor is so classified because he recorded historical events in prose on a year-by-year basis. His language of composition was G reek, though almost all of his writings in that language are lost. The few L atin fragments that remain are later translations of his work. Like other Roman historians, Pictor apparently began with the foundation myths of the city as they are recorded in Virgil and elsewhere. Having done so, he moved to the annual examination of more contemporary history. His work included discussion of the First and Second Punic Wars— Rome's first two wars with the North African city of Carthage. His annals were among the sources used by such later Roman historians as Livy and Pol ybius.

Pindar (ca. 518–ca. 438 B.C.E.) *Greek poet* How little we know about Pindar's life may seem surprising since posterity generally regards him as the greatest lyric poet of ancient Greece. It is certain that Pindar was a citizen of the city of Thebes. Less certain is an assertion that he was born near Thebes in a v illage na med Kynoskephalai (dogs' heads). There i s, ho wever, n o do ubt c oncerning the dates of the o des that he composed in honor of the victors in the Olympic games in the years ranging f rom 476 t o 4 52 b.c.e. A necdotes f rom various a ncient b iographies r eport the na mes of his t eachers in flute pl aying, l yric c omposition, and music—respectively, Sko pelinos, L asos o f Hermione, and either Agathokles or Apollodoros.

Because of the subjects of his o des and the fame of the figures they celebrate, Pindar's friendly relations with important and powerful contemporaries throughout the far-flung Grecian world are also a certainty. Less certain is whether or not he was personally present at all the events within the Greek sphere that his poems chronicle, but it seems sa fe t o a ssume t hat he t raveled f ar a nd wide. It is also likely the case that his cosmopolitanism and admiration of Athenian institutions did not a lways sit well with h is fellow Thebans, who had long been in rivalry with Athens.

As with the writings of so many ancient Greek writers, the transmission of Pindar's texts relied in the first place on the skill of editors working at t he l ibrary of P tolemy II at Alexandria in Egypt. B etween 194 a nd 1 80 b .c.e., a n e ditor named Aristophanes of Byzantium prepared 17 papyrus s crolls c ontaining t he k nown w ritings of Pindar. One of these contained hymns to various go ds. A nother c ontained paeans-hymns addressed e xclusively t o A pollo. D ionysian hymns occupied another two scrolls. Three more recorded parthenaia-hymns sung by young boys and vi rgins. The n ext t wo p reserved P indar's hyporchemes (songs associated with ritual dance and addressed to gods). Two more collected Pindar's m ore s ecular poems-songs de signed f or singing at banquets in praise of important men. A single volume included his threnodies-songs of grief for deceased men-and four others brought together the work for which he is most celebrated, his epinikia-songs or victory odes in praise of the winners at athletic events and sometimes of their cities. As may seem self-evident from this list, Pindar's works were designed for public performance rather than for private reading.

Of this substantial body of material, only the last-named seemed to have survived into the 20th century in its entirety. A r ubbish he ap at O xyrhyn chus in Egypt, however, was found to contain s ubstantial f ormerly lost portions of the paeans to Apollo.

Quite a part f rom t he c ontent o f h is w ork, Pindar's reputation as a poet rests first upon his mastery of t he s onority of h is language and of the m etrical c omplexities of its pro sody (see quant it at ive ver se). Second, it rests upon his capacity to combine the elements of its vocabulary i nto n ovel, a llusive, and s triking a rrangements. Finally, it rests upon his command of the flexibility of Greek word order. Whereas English word ord er o ften de termines t he g rammatical relationships a mong t he w ords o f a s entence, Greek grammatical relationships are signaled by

endings on the words. This gives a skillful poet much greater latitude for manipulating rhythm and sonority. Pindar was among the most skillful of such manipulators. At the same time, his dazzling virtuosity makes extraordinary demands on a re ader a nd m ust ha ve made e ven m ore extraordinary demands on his initial audiences, composed not of readers but of hearers. Plato (ca. 428–ca. 348 B.C.E.) Greek prose writer

Arguably t he p reeminently i nfluential phi los o pher of t he Western world, P lato w as b orn to a prominent but politically divided Athenian family. V arious m embers of t hat f amily had u rged opposing po lti al points of view during the years of the P eloponnesian War, which had p roved so disastrous for Athens. Some think that as a youth, Plato considered becoming a poet. Certainly the literary quality of his works suggests that he could have stood in the first rank. If his early ambitions were in fact poetic, however, he soon abandoned them w hen h e m et th e Athenian t hinker and teacher S ocr at es, w ho b ecame P lato's m entor and model. When, in a fit of foolish blood lust, the restored Athenian democracy condemned Socrates to death on a trumped-up charge of corrupting Athenian youth (399 b.c.e.), Plato and several other disciples of S ocrates fled A thens for a time, a t first finding shelter in the city of Megara with the philos opher Euclides. Then Plato undertook a grand tour of t he western M editerranean, t raveling i n Egypt, Italy, and Sicily. In the city of Syracuse, he found a good friend in Dion, the brother-in-law of the city's ruler, Dionysius I. Plato's later effort to turn the king's son, Dionysius II, into a philosopher failed utterly, however, and involved Plato in some personal danger.

On r eturning to A thens, P lato f ounded t he academy that bore his name for more than 1,000 years—first in Athens, where the Roman emperor Justinian closed the school in 529 c. e., and then in Alexandria, where the institution survived for nearly a c entury m ore. P lato n ever ma rried, investing his life in his students and in his thinking an d w riting r ather t han i n a f amily. I n h is written works, he resurrects his teacher, Socrates, as a c haracter w ho b ecomes P lato's v oice a nd argues his viewpoints. He also pays Socrates tribute i n three dialogues: *Apology o f Socrates*, *Crito*, a nd *Phaedo*. These co ntain ac counts o f Socrates' trial, last days, and death.

Plato never speaks in his own voice in his dialogues, h is p referred l iterary f orm; r ather, he usually—though not always—leaves the arguing to h is i magined S ocrates. So metimes t he di alogues follow the plan of narrative fiction, as does \overline{A} e Republic and all the dialogues from Plato's final period. Sometimes, instead, Plato writes his dialogues as if they were intended for stage performance, a s is t he c ase w ith *Timaeus*. A nother mode that Plato employs is having someone read a dialogue to listeners, as is the case in the \overline{A} eatetus. Sometimes Plato chooses, as in *Sympos ium*, to have someone r eport a na rrative t he sp eaker has overheard.

Early P latonic d ialogues o n m oral v irtues, such as *Charmides* (a work about the virtue of temperance), *Euthyphro* (a dialogue between Socrates and Euthyphro, a soothsayer who claims to be the world's greatest expert on religion and piety), *Ion* (a gentle satire of an entertainer who recites epic poems), *Lachis* (a work about the virtue of courage), and *Lysis* (a work about the virtue of friendship) establish the pattern of a n almost omniscient S ocrates (who often claims to k now nothing) tearing to pieces the ideas of h is que stioners. The ancients considered that these works contain accurate portraits of Socrates and the way he worked.

A m ore a ttractive S ocrates a nd p erhaps o ne more c losely a ssimilated t o P lato's thinking-a Socrates who puts forth h is own viewpointsappears i n P lato's m iddle w orks. A mong t hese works, we find Alcibiades (a d iscourse on t he necessity for a statesman to possess real and accurate knowledge), Cratylus (an e tymological treatise t hat s uggests w ords h ave a na tural a ffinity with the things or ideas they stand for), Euthydemus (a romping satire that pokes fun at the inability of t wo m inor s ophists to i dentify f allacies), Gorgias, Menexenus (a m ock f uneral o ration), and Meno (which a ddresses the q uestion of whether or not virtue is teachable). Parmenides is a rather odd work in which a y outhful Socrates loses a deba te a nd i s adv ised to s tudy d ialectic harder. He meets that advice with a py rotechnic display of his dialectical ability. The literary historian Herbert Jennings Rose has controversially suggested that in this essay Plato abandons one of his central teachings-the idea of forms.

Other w orks f rom P lato's m iddle p eriod include: *Phaedrus* (a pleasant dialogue illustrating the difference between rhetoric that is used to confuse and mislead and that which instead clarifies by arising from dialectic and truth); *Protagoras* (in w hich t he S ophist p hilosopher of t hat name is defeated in debate by an argument he cannot u nderstand); a nd \bar{A} *e Re public, S ymposium,* and \bar{A} *eatetus* (an incomplete exposition of Plato's theory of knowledge—his epistemology a subject that his *Sophist* further considers).

To P lato's third and final period belong such relatively s traightforward d ialogues a s *Sophist* and *Politicus*—titles t hat s uggest t he subjects of the works. In a cosmological setting and for the final t ime, *Timaeus* expounds Plato's theory of ideal forms as the ultimate reality and the intellectual substrate of the physical universe. *Timaeus* also begins the story of the lost continent of Atlantis. That story is continued in the unfinished *Critias*. From the last of all the dialogues, Plato's *Laws*, Socrates is entirely absent.

Socrates, in fact, appears less often as the interlocutor all through the last set of dialogues. We meet h im for the final time leading a c onsideration of pleasure in *Philebus*, which examines the relations among pleasure, wisdom, and the good.

The ancients attributed a series of 13 surviving letters to P lato. C ontemporary s cholarship views these epistles with varying degrees of confidence. Three are regarded as definitely not his. Three others seem to have certainly come from Plato's hand, and the rest are regarded as likely to be his. Those with the c learest claim to authenticity concern Plato's connections with the ruling family of Syracuse in Sicily. One of the genuine letters, usually dated t o a round 353 b. c.e., co ntains o therwise unknown b iographical d etails a bout Pl ato a nd expresses his sorrow at the murder of his Sicilian friend, Dion. It also defends his political ideas.

Plato's i nfluence c ontinues to r everberate through the corridors of history. His i deas contributed significantly to the theories adopted by early Ch ristians, with r espect n ot o nly to t heir politi al organization and ideas about Christian communism but also to their notions of good and evil, and e ven to t heir formulations c oncerning the n ature of the afterlife a nd t he s ystem o f rewards a nd p unishments to b e en countered there. Such an e arly Christian theorist a s Sa int August ine, b ishop o f Hippo, f ound h imself heavily indebted to Platonistic thinking.

Both in the ancient and in the modern worlds, Platonistic theology has exercised important influence. I n t he a ncient, beyond t heir i nfluence o n Christian thinking, Plato's theories informed such thinkers a s P l ot inus, Iamblichus, P or phyry, Hypatia, and Proclu s of Byzant ium, who formed the backbone of the Neoplatonist theological school of t hought i n A lexandria and B yzantium i n t he third th rough the sixth c enturies c. e. A s erious school of P latonic C hristianity a lso a ppeared i n 17th- œntury England at Cambridge University.

In the Europe an Re mis sance, Platonistic religious ideas were central to thinkers such as Jehudah b en Is aac Ab ravanel (Leone H ebreo, c a. 1460-ca. 1 521), w hose Dialoghi d i a more (Dialogues or conversations about love, 1535) develops the Platonic view that the true, the good, and the beautiful are the ground of being and that love, governed by reason, is the principle that makes these attributes perceptible to t he human m ind. But love is higher than reason, and, in the hierarchy of the real, beauty is the highest characteristic because it is the central quality of God from which all other qualities take their being. This elevated view e ventually b ecame secularized and d eveloped i nto a pl atonic l ove c ult w hose o bjects involved more corporeal and less spiritual a ims and led to p opular games of stylized lovemaking throughout the courts of Europe. The i deas a lso informed Eu pean lyric poetry from the time of the Italian poet Petrarch in the 14th century until that of the English poet John Donne in the 17th. As the early cinema of the 20th century unwittingly adapted a good deal of platonic love theory to the silver screen, and as the 21st continues to follow t hat theory's c onventions with a g reater degree of explicit i magery, one could a rgue that Renaissance platonic love theory, developed from passages in the phi los o phe's Symposium and elsewhere, continues to underlie not ions a bout the importance of romantic love in Western society.

On a m ore i ntellectual n ote, P lato's t hought also continues to underlie philosophical thinking grounded in i dealism. I dealistic p hilosophies argue the position that perceived phenomena are rooted, not in the external world, but in the thinking min d. Such p hilosophies a lso hol d t hat o ne cannot finally demonstrate the existence of a nything outside the perceptive intellect.

Plautus, Titus Maccius (254–184 B.C.E.) Roman dramatist

The earliest Roman literary figure of whose work any complete example remains, the comic playwright Plautus was probably born in the town of Sarsina in the region of Umbria. From there, if the hints he gives us in his comedies are accurate, he migrated to Rome, where he found work as a carpenter building t heatrical s cenery. H e s aved some money, left Rome, and invested his slender capital in his own business. When that enterprise failed, he returned to Rome, where this time he found work as a miller, grinding grain into flour for a baker. While engaged in that work, he began writing plays. Where (or whether) he acquired a formal education, we do not know. It is, however, certain that he was a master of poetic form-all his plays are in verse—and he proved wonderfully skillful i n deploying t he l inguistic r esources a t his command to amuse his audiences.

Although m ore th an 125 p lays ha ve b een attributed to Plautus at one time or another, most specialists think that a m ore accurate list is one prepared by the Roman phi los o plar and literary critic M arcus T erentius V arr o. That list includes the playwright's 20 complete surviving plays plus others, now largely lost, that Varro considered a uthentic. On e c onsiderable p iece a nd other e xceedingly f ragmentary r emains o f p erhaps 3 0 o f P lautus's o ther p roductions a lso survive.

Plautus s eems p rincipally to ha ve b orrowed the plots of plays from the Greek New Comedy, though also perhaps from Greek Middle Comedy (See comedy in Greece and Rome). The manner of his plays, however—especially his risqué humor and h is ten dency to s atirize recognizable fellow Romans—smacks m ore of t he Ol d C omedy of Greece. Bu t P lautus d id n ot m erely s lavishly recreate h is mo dels; r ather, he r eworked a nd revised them quite freely, sometimes omitting or adding material, changing characters' names, and achieving a poetic and verbal brilliance that was distinctively his own.

Not a ll pa ssages i n P lautine c omedy were exclusively spoken. Many were sung as well, and the l yrics of the s ongs s ometimes ac count f or some of the poet's most distinguished verse. In many w ays, P lautus s et t he s tage f or t he l ater development of the Renaissance Italian commedia dell'arte with its stock characters and situations. He also anticipated contemporary musical comedy. Pr oduction notices called didascaliae (instructions) exist for two of Plautus's plays: Stichus and Pseudolus. (Plautus drew both titles from the names of characters in the plays.) The notice for Stichus suggests that the Greek comic playwright Mena nder's now-lost play A e Brothers provided the framework of Plautus's piece. But Plautus has significantly heightened the musical elements of the production, moving it far along in the direction of comic opera or, indeed, of musical comedy. Regrettably, we have no way of knowing the tunes; only the poetry survives.

Plautus's works range across a wide spectrum of subject matter. Mythology provides the subject for his highly individualistic tragicomedy, Amphitr yon. In this play, Plautus treats the legend of the king of the gods, Jupiter, and his love for the admirable h uman w oman Alcmena, w hom h e visits in the form of her husband, A mphitryon. Called upon again on the same night by the real Amphitryon, Alcmena bears two sons. Jupiter has fathered one child, Herwles (see Her acles), and Amphitryon t he other t win, I phicles. P lautus, who had an especial fondness for situations that developed from misidentifying twins, introduces further fun into his play by having the god Mercury also have a human double in the slave Sosia. The play's near-tragic element arises, on the one hand, from Alcmena's innocence in not knowing that she has entertained Jupiter in the form of her husband. On the other, domestic amity founders on t he r ock of A mphitryon's s uspicions a bout Alcmena's fidelity. Jupiter, however, restores marital c oncord b etween t he sp ouses a nd a verts a tragic outcome.

Many of Plautus's surviving plays have inspired later imitators, and that is the case of his Aulularia ($\overline{A} e P ot of G old$), whose ma jor cha racter, Euclio, provided the basis for the central character Ha rpagon w hen t he 1 7th-century F rench playwright, M olière, p enned h is c omedy \overline{A} e Miser. Of equal or greater interest to la ter playwrights were such P lautine c omedies a s Miles Gloriosus (The Braggart Soldier). The character type that Plautus de veloped in that play, the braggart military man, became the stock character S caramuccia i n t he c ommedia del l'arte. The type also underlay such English theatrical characters as Nicholas Udall's Ralph Roister Doister and S hakespeare's F alstaff, a nd i t c ontinues to amuse modern audiences in such a c haracter as television's c artoon a ntihero, H omer Si mpson, and his more recent antecedent, Ralph, played by the late Jackie Gleason in television's early series Ā e Honeymooners.

Menaechmi ($\bar{A} e T$ win Br others) provides another example of Pl autus's fond ness for plot s arising from the confusion of twins, in addition to b eing a P lautine d rama t hat ha s i nfluenced later playwrights—in t his c ase W illiam Sha kespeare i n $\bar{A} e C$ omedy of Er rors and, l ater, t he American masters o f m usical c omedy, Ro dgers and Hart, in $\bar{A} e$ Boys from Syracuse.

A different sort of confusion a rises in *Mostellaria* (\overline{A} *e Haunted House*). In that play, a son tries to c onceal f rom h is f ather the f act th at i n th e father's absence, the son has purchased the woman he loves and installed her in the family home. The 17th- œntury E nglish p laywright, Thomas He ywood borrowed elements of this play as a subplot for his work \overline{A} *e English Traveler*.

Both *Pseu dol us* (a c haracter's na met hat roughly means "tricky") and *Rudens* ($\overline{A} e Rope$) belong to the boy-gets-girl subgenre of romantic comedy. In *Pseudolus*, a slave of that na me succeeds in saving his young master's beloved from a forced career of prostitution. In *Rudens*, Plautus rings changes on a similar basic plot but and pulls out all the stops. The star A rcturus is an important character in the play, presents the prologue, and causes a storm at sea. There are shipwrecks

542 Plautus, Titus Maccius

and lost and recovered id entities and treasures. The title's rope is responsible for hauling up from the seafloor both a lost treasure and tokens that establish the identity of the play's romantic heroine, Palaestra.

Not a ll o f P lautus's pl ays p rovide a udiences with such light fare, however. One of the surviving dramas among those usually considered his best, *Captivi* (\overline{A} e *Captives*), s tarkly i llustrates, in the words of Richard Moore, the play's most recent t ranslator, "man's i nhumanity to ma n." Moreover, the bawdy sort of humor that Plautus is f ond o f us ing e lsewhere is a bsent f rom t his play. Slavery in its various manifestations is the subject of this dark study, which can be classified as comedy only in terms of a more or less happy ending.

Tr inummus ($\overline{A} e \overline{A}$ ree- Renny Day—recently inflated w ith the t itle $\overline{A} e \overline{A}$ irty- Dollar Day) employs a t heme that appears in older literature in cultures as distant as China. Owing to a misplaced trust, a house containing a concealed treasure g ets s old. T o p rotect t he t reasure f or t he rightful owner, a friend buys the home, and further c omplications f ollow. E ventually, ho wever, all turns out well.

Formerly c onsidered to be of l esser i nterest was Plautus's play *Bac chide s*—a romantic comedy about two sisters with the same name, Bacchis. One, a courtesan, lives at Samos and the other at Athens. The play features a clever slave, Chrysalus, and a f usty p edagogue, Lydus. Chrysalus is central to helping you ng love along. A fter a c ertain a mount o f p redictable c onfusion a rising from the identity of the sisters' na mes a nd o ne lover's concern that his friend is trying to steal his girl, all ends very well for the two central young couples.

Heightened i nterest i n *Bacchides* has, as the play's re cent t ranslator Ja mes T atum t ells u s, resulted from the 1968 discovery of a substantial fragment of the p lay's lost Gre ek s ource, Menander's *Dis exapaton* (\overline{A} e *Double Deceiver*). H aving a 7 0-line s ample of this play has made p ossible t he su stained s tudy of t he w ay Plautus used his sources. Not altogether surpris-

ingly, P lautus tr anslated closely or f reely a s it suited h is d ramatic p urposes. The c omparison confirms t hat a chieving e ffective t heater, n ot slavish i mitation of h is s ources, w as P lautus's goal. *Bacchides* is also of interest as the ultimate source o f t he i nscription o ver H ell's ga te i n Dante's *Inferno*: "Abandon e very ho pe, a ll y ou who enter here." In Plautus, however, the source reference to hop e a bandoned app ears o n t he door of a brothel—a door characterized as a portal to Hades.

Sometimes also classed among the less important of Plautus's extant plays, we find Asinaria (Asses Galore) and Casina (the name of a slave girl who never appears on stage but who is loved by b oth a n elderly ma n a nd h is son-recently translated as "AF unny Thing Happened on the Way to the Wedding"). In a si milar category, we find Cistellaria (A e Little Box), another recognition play in which the contents of the box are crucial in the identification of a foundling as the daughter of a worthy citizen. Her improved status means she can marry her beloved. Curculio (Ā e Weevil)-named for the central character, a stock parasite who is the literary ancestor of the British playwright B en Jonson's sma rmy Mosca i n Volpone-tells a nother story of the triumph of true love over adversity and also revolves around hidden identities.

Also named for a major character, a slave, Epidicus once a gain exploits the stock situations of tricking an old man out of money to buy a young man's beloved-or in this case, two beloveds-out of s lavery a nd c aptivity, r espectively. H owever, the old man, Periphanes, forgives Epidicus when the second young woman proves to b e his longlost daughter, Telestis. Mercator (A e Merchant, or A e Ent repreneur) m ines a gain t he c omic potential of the situation that arises when both a father and a son fall in love with the same young woman. In Persa (A e Persian), a s tock parasite named S aturio, p osing a s a P ersian t rader, deceives a procurer of women, Dordalus, by pretending that Saturio's daughter, Virgo, is an Arabian captive. Virgo go es along with the swindle out of filial piety, though she is miffed that her father seems willing to sell her for the price of decent meal.

Regularly t ranslated i nto E nglish u nder t he title Å e Little Carthaginian, Plautus's Poenulus heaps on complications by reduplicating the stock situations of which the playwright was so fond. It features t wo s tolen d aughters, A delphasium a nd Anterastilis, in the clutches of a particularly loathsome pimp named Lycus. We also find their stolen but well- adopted male cousin, Agorastocles, who loves one of the girls, and we meet the girls' father, Hanno, who has been roaming the Mediterranean world in search of his daughters, whom he eventually recovers. Agorastocles discovers his true identity and m arries h is c ousin, A delphasium. The pimp, of course, gets a satisfactory comeuppance. Some of H anno's speeches are ostensibly in the Punic language of h is home city, Carthage. The play's r ecent t ranslator, J anet Bu rroway, ha s had wonderful fun rendering Plautus's probably phony Punic into delightful, quasi- En dish nonsense.

Plautus's r emaining t wo c omplete pl ays, *Stichus* and *Truculentus*, both take their names from characters who a re s laves. The w ord *stichus*, i n fact, was a g eneric le gal ter m often i nserted i n Roman contracts dealing with slaves in place of a person's ac tual n ame. The bad tempered and quarrelsome character of the slave Truculentus is, of course, implicit in his name.

Stichus tells t he s tory of t wo si sters, y oung wives whose husbands have been absent overlong on a t rading e xpedition. Their f ather, A ntipho, tries t o c onvince t he gi rls t hat, si nce t heir h usbands m ust b e de ad, t hey sho uld r emarry. The husbands, n ow w ealthy, r eappear, a nd g eneral rejoicing takes place.

The l iterary h istorian a nd t ranslator J ames Tatum considers *Truculentus* to be "the sharpest delineation in Roman comedy of specifically male folly." The play explores the way that Phronesium, the m adam of a house of p rostitution, s educes man a fter ma n, i ncluding t he o riginally w ary Truculentus, i n order t o i llustrate t he m oral o f the play, which holds that lovers can spend their lives learning—but never learn—"how many ways there are to die for love." Plautus's stock seems certain to rise again in the In gish-speaking world as the result of the excellent t ranslations now av ailable from the Johns Hop kins U niversity P ress. These i nclude the texts, not only of the plays for which full or almost full versions survive but also of Plautus's exceedingly f ragmentary $\overline{A} \ e \ T$ raveling B ag (Vidularia).

Given the nonexistence of c omplete examples of Roman literary works earlier than the plays of Plautus, all of his dramas—even the most formulaic of them—are exceedingly i mportant to our understanding of the d evelopment of Western letters.

Pleiad of Alexandria

This literary pleiad—a g roup of G reek p oets of the Hellenistic Age at Alexandria in Egypt took its na me f rom t he s even s tars in t he old Greek constellation the Pleiades, now incorporated into the constellation Taurus. Different sources mention different poets as belonging to the group, and th ere may w ell have b een m ore p oets w ho required recognition than there were stars in the constellation to accommodate them.

All the poets s o r ecognized w rote t r agedy. The list endorsed by the literary critic and editor of the Oxford Classical Dictionary, Simon Hornblower, includes the following Alexandrian tragedians: Al exander of A etolia (fl. c a. 2 80 b .c. e); Homerus of B yzantion; S ositheus of A lexandria Troas; L ycophron (fl. c a. 2 80 b .c. e); P hilicus; Dionysiades of Tarsus; and A eantiodes (fl. third century b.c.e). Most of their works have utterly perished. Fifteen hundred lines, however, of Lycophron's Alexandra have su rvived. The l iterary historian Jane Lightfoot finds it "quite the most repellent poem to su rvive from a ntiquity." The

passage contains a p rophecy of the doom of the Greeks homebound from Troy.

Knowledge of the Pleiad's existence as a stellar literary g roup p ersisted t hrough t he a ges lo ng after the honor of being so designated had disappeared. As a result, when the European Renaissance got under way in France, a similar group of outstanding literary figures was so named. Also, a small liberal arts institution, Albion College in Michigan, h as ado pted t he na me *Pleiad* for its weekly newspaper.

Pliny the Elder (Gaius Plinius Secundus) (23–79 c.E.) Roman historian

Born at Como to an equestrian (knightly) family, Pliny became a soldier, beginning a long and distinguished career of public service. Between the years 46 and 58 c. e., he fought in two long campaigns in Germany. It was there that his literary interests first found expression, for he composed a b rief t reatise, n o lo nger e xtant, en titled " The Art of Using a J avelin on Horseback." H e a lso wrote a now-lost biography of his friend and general, P omponius S econdus, i n t wo b ooks H is nephew and adoptive son, Plinyt he Younger, reported that the elder pliny had a lso formed a plan to write and publish a history of the German wars in which he served. He was encouraged in his determination to do so by the appearance of the p hantom of h is c ommander, D rusus N ero, who wanted the memory of h is conquests preserved. Pliny the Elder thus began his History of the German Wars (Bella Germaniae), and in due course, this work, also now lost, appeared in 20 volumes.

After the death of the emperor Claudius (54 c.e.), Pliny withdrew from public affairs owing to the hostility he ha rbored toward Claudius's successor, Nero. He probably occupied his time with the practice of law and with composing and delivering the associated orations. It may also be that during this time he wrote a handbook on oratory and rhetoric of which now only snippets remain, his Studiosus (The s tudents), i n three l engthy books. He also produced a grammatical or linguistic work, Dubius sermo (Linguistic theories). Because of numerous subsequent citations, several fragmentary passages from this work still exist. Another lost work was a one-book continuation of a 30-book h istory by A ufidius B assus. The younger Pliny remarked that his uncle's industry was enhanced by his ability to get along on little sleep—principally catnaps.

When the emperor Vespasian succeeded to the throne (70 c .e.), Pliny reentered public life and occupied a series of imperial posts. He also pursued a busy legal career, never wasting a moment. He had books read to him at mealtimes and read to himself o mnivorously whenever the occasion presented itself in his busy schedule. If he was not reading, he was dictating his own works to a writer of shorthand whom he kept constantly at his side.

The el der P liny's g reatest l iterary w ork, o ne still ex tant, w as h is 37-book en cyclopedic w ork, *Natural History*. O f i t P liny t he Y ounger s aid: "This is a work of g reat c ompass a nd le arning, and as full of variety as nature herself." The work was Pliny's attempt to bring all knowledge into a systematic framework by mining the best- known works and giving the reader a guide to the information in them.

The first book gives a t able of contents and a bibliography for each subsequent book. That bibliography alludes to 34,000 brief notices, to 2,000 books that Pliny had read, and to the 100 different authors who had composed them. It also includes references to 170 f olders filled with Pliny's own notes and outlines. Book 2 covers cosmology and the p hysical g eography of t he k nown w orld. Books 3–6 de al with political geography, 7 w ith

anthropology, and 8–11 with zoology. Books 12– 19 c oncern t hemselves with b otany, 20–32 with medicine, and 33–37 with mineralogy, metallurgy, and, perhaps idiosyncratically, with art history. The work was published in 77 or 78 c.e.

In one of his celebrated *Lette rs*, book 6, letter 16, a ddressed t o t he h istorian Tacit us, t he younger Pliny describes the manner of his uncle's death a t a ge 76 d uring t he er uption o f M ount Vesuvius in 79 c.e.

Pliny the Younger (Gaius Plinius Caecilius Secundus) (ca. 61–ca. 112 c.E.)

The nephew and adoptive son of the Pliny the Eld er (Gaius Plinius Secundus), Pliny the younger was born at C omum on the shores of L ake Como at the foot of the Italian Alps. A child of privilege, he was schooled in Rome both by Quintili an and by the Stoic philosopher Musonius.

Following Pliny's move to Rome, he remained deeply interested in and attached to his property on Lake Como as well as to the institutions and citizenry of the region. On e of h is best translators, the late Betty Radice, tells us of his benefactions t o t he to wn o f C omum. These i ncluded building and stocking a library, supporting a portion of a resident teacher's salary, the support of needy c hildren i n t he d istrict, a nd a b equest of more than 2 million sesterces to the town. A rising political star, the younger Pliny held a series of administrative offices under the emperors D omitian and Trajan. He b egan h is c areer with military service in Syria when he was about 20 years old. On his return to Ro me, he u ndertook t he p ractice of law and, with the help of influential f riends, w as ad mitted to t he Ro man senate. There he c onducted notable prosecutions of prov incial gove rnors a ccused of 1 ining t heir own pockets b y ex tortionate means. From that base, he rose to o ccupy i mportant c ivic offices, serving first as praetor and later as consul.

Under the e ffective b ut a rrogant em peror Domitian (ruled 81–96 c.e.), who had little use for Stoics (see Stoicism) and considered the senate an annoyance, Pliny was at some risk but managed to avoid imperial persecution. Domitian was murdered in 98, and after a two-year reign by the el derly emperor Nerva, the emperor Trajan succeeded to the throne.

Under T rajan's rule, P liny's a dministrative career advanced. He became a prefect of the treasury, an associate consul, and then an important administrator responsible for the works controlling the flow of the Tiber River to avert flooding. Next he became an augur—one of Rome's official diviners who had charge of foretelling the likely success of proposed courses of action. In 111 c. e., Trajan a ppointed Pliny to be the governor of the province of Bit hynia on the B osporus Strait i n contemporary Turkey. Pliny served in that office honestly a nd c ompetently, i f n ot a lways c onfidently, u ntil h is de ath. Though he w as ma rried three times, Pliny died without heirs.

The o nly example of P liny's o ratory t hat has survived is a speech in praise of Trajan on his succession to the throne—his *Panegyricus* (Panegyric). It expresses the senate's relief at being free of Domitian's oppression—an i mposition s o severe that the senate p assed a bill c ondemning his memory.

Pliny's principal and priceless literary legacy, rather, are the 10 books of his *Lette rs*—especially the first nine, in which he constructs in part an epistolary history of his times. He also uses the letters to tel li nteresting stories—even g host

546 Plotinus

stories—and to give his opinions on a wide variety of s ubjects ranging f rom t he pa rsimony of wealthy persons, through debates in the Roman Senate, to the moral attributes of his contemporaries. Especially notable is his description of the eruption of Mt. Vesuvius that buried Herculaneum and P ompey in 79 c.e. and also killed his uncle, P liny the E lder. The 1 0th b ook c ontains Pliny the younger's official correspondence with Trajan. A mong t he le tters of pa rticular i nterest there, th e 9 6th c ontains th e e arliest s urviving non- Christian description of Christian worship. It a lso d etails t he r easons w hy P liny t hought Christians should be put to death.

Plotinus (ca. 205–270 c.E.) *Greek-Egyptian prose writer*

Probably born in Upper Egypt, Plotinus migrated to A lexandria in 232 to s tudy philosophy. A fter rejecting a series of teachers, Plotinus settled on the then-pagan but for merly Christian Sophist, Ammonius Saccas, and studied with him for the next 11 years.

Plotinus was not the only one of Ammonius's students de stined f or fa me. A lso u nder t he Sophist's instruction at the time were the future Christian theologian, Or igen (ca 182–251 c. e.), and an other n otable O rigen of Al exandria (a contemporary) w ho, li ke Plotinus, became a pagan Neoplatonist.

Hoping to broaden his philosophical horizons by making contact with the thinkers of India and Persia, Plotinus attached himself to an eastwardbound m ilitary ex pedition le d by the R oman emperor Gordian III. In the vicinity of Ctesiphon on t he R iver T igris, G ordian d ied o f w ounds received in a disastrous military engagement, and Plotinus escaped, making his way to Antioch. His hope of a dding the mastery of Eastern thought to h is accomplishments r emained u nfulfilled. Instead, in 244 c.e. he w ent to Ro me, where he established h imself a s a te acher o f p hilosophy, writing a s eries o f n ine e xploratory d iscussions that illustrated the central issues of his thinking. After his death, his student Por phyry organized these writings into six groups, each of which contained ni ne d iscussions. Porphyry entitled his professor's work Plotinus's *Enneads*.

Some ce ntral p oints o f Plotinus's d octrine included his definition (which he borrowed from Pl at o's \overline{A} e Republic) of the ground of being, or the first principle—at once both the One and the Good a nd a lso Go d. This p rinciple is bey ond being. F rom it s prings intellect (nous), w hich contains a ll i deas a nd forms-the i mmaterial originals for everything in the material world. Intellect produces Soul, a part of which, in turn, becomes the World Soul. That a gency rules the material universe and is organized hierarchically so t hat i ts l ower e chelons b ecome N ature, to which belongs matter. When matter is formed, it is good. When it lacks form, it is deficient, and this deficiency is termed evil. Evil, ho wever, is not an active principle in Plotinus's view of the universe. Moral evil a rises when a s oul, instead of seeking to rise and become one with the One and the Good, identifies instead with the material world.

Plotinus's v iew of t he s oul is q uite co mplex. Each soul has three levels: the transcendent intellect, which is c apable in t he p urified st ate of t he true philosopher of contemplating the One and the Good; the intermediate soul; and the lower soul that a spect of s oul t hat gives life t o the h uman body. The h ighest de gree of u nity i nvolving t he human s oul and the On e and the G ood, though the phi bs other occasionally c an experience that unity in life, is not expressible in human language and is a state that can endure only after death.

The importance of Plotinus's thought for the ancient world from his time forward can hardly

be exaggerated. In addition to refining the ideas of pagan Neoplatonism, Plotinus's language provided e arly C hristians w ith the c oncepts th at eventuated in the Christian i dea of the Trinity. Whereas Plotinus saw the human, the spirit, and the O ne a nd t he G ood a s t hree h ierarchical conditions—a progression from flesh to spirit to God—the Christian concept of Trinity, instead, applied h is l anguage to t hree e qual a spects o f godhead. Christian mysticism also traces its roots to the thinking of Plotinus.

Plutarch (ca. 46 c.e.–ca. 120 c.e.) *Greek prose* writer

A native of the small community of Chaeronea in the Greek region of Boetia, Plutarch spent most of h is l ife in his n ative v illage, occu pying l ocal municipal o ffices and s ometimes s erving a s a priest of Ap ollo at D elphi. Interested i n Roman matters a s w ell a s Gr ecian o nes, he m ore t han once j ourneyed to I taly, w here he w as r eceived with h onor and r espect, a nd w here he ga ve le ctures in Rome. As a n a uthor, Plutarch is t oday remembered principally for t he work often c alled *Plutarch's Lives* or *Lives of the Noble Grecians and Romans.* More properly, its title is *Par allel Lives*. In its original for m, it contained 23 pa irs of extended biographical sketches—one portraying a Greek's life and one a Roman's. Their subjects, in Plutarch's judgment, merited pa iring b ecause of si milarities in t heir m oral characters, a nd e ach pa ir was followed by a b rief su mmary that d rew t he comparisons P lutarch h ad o bserved. B eyond those pairings, we also find four unpaired lives.

Plutarch a lso au thored an other collection of essays, his Mor alia. The subjects of these essays range w idely o ver P lutarch's va rious i nterests. They address issues of proper conduct, such as the way in which married couples should behave, and also include character writing, illustrating both major a nd m inor v ices such a s a nger a nd t alkativeness and the predispositions of members of occupational groups. Additionally, the collection contains discussions of religion and superstition as well as speculation on such scientific questions as accounting for the face of the moon. One also finds treatments of Greek (but not of Roman) literary figures. The Moralia served as an important model for Renaissance essayists, especially Michel de Montaigne i n France, a nd Francis Bacon i n En gand.

Plutarch lived a long and useful life. Though he once remarked that being born in a famous city was a prerequisite for happiness, he himself was content to sp end most of h is d ays in t he village of h is birth, not willing to diminish it by t he p ermanent r emoval of e ven o ne of its inhabitants.

Early Christians admired Plutarch and found in his eclectic brand of Platonism a pagan precursor of their faith. Some of them included Plutarch in their prayers, hoping that he might be included among the saved.

Poetics Aristotle (ca. 355 B.C.E.)

Ari st ot l e's teacher, Pl at o, famously considered poets u ntruthful and dangerous i nfluences i n a polity, and he ba nned t hem and t heir ac tivities from his work \overline{A} e Republic. Aware, however, of the importance of Athenian theater to the citystate's religious, civic, and artistic life, and perhaps le d b y h is d isagreement w ith t he el der phi los o phe's views in other i ntellectual ar enas, Aristotle turn ed t he f ull force of h is a nalytical intellect onto a consideration of t he h istory and characteristics of the verse theater of his time and of t he pr ivate a nd p ublic b enefits t hat a ccrued from public theatrical per formance.

Though not all of the resultant document survives, that which does is the oldest and the foundational literary-critical document in the Western Eu ro pan tradition. The considerable portion of the Poetics that we have begins with a statement of purpose. Aristotle means to examine the various genres of poetry, the requirements for constructing p lot t hat le ad to excellence, a nd t he components of poetry. All the varieties of poetry and most music with which Aristotle is familiar, he says, share in common the quality of mimesisthat is, they are arts that somehow imitate life in their rhythms, language, and melody. The characters that poets draw also imitate life. Like people, t hey a re ele vated a nd ad mirable, lo w a nd blameworthy, or just ordinary. These generalizations apply equally to a ll the performing arts of Aristotle's time. Tr agedy tends to imitate superior characters and comedy inferior ones. Characters, moreover, can act out their roles, be described as a cting t hem o ut, o r c an m erely ha ve t heir actions narrated.

Aristotle considers nature to b e the source of the human dramatic impulse and says that little children i mitate the a ctions of o thers b y t heir very nature. Melody and the rhythms of song and poetic meter, too, are natural. Having established these principles, Aristotle goes on to a discussion of several representative meters of Greek quant itat ive ver se and very briefly traces the beginnings of the comic and tragic modes a mong the Greeks. H e t hen ma kes c omparisons b etween tragedy and e pic. All the resources of epic are to be found in tragedy, but not vice versa.

Aristotle t hen gives h is f amous de finition o f tragedy: "Tragedy . . . is the imitation of an action that is elevated, complete, and of a certain magnitude." Distinct poetic forms em bellish t he la nguage of a t ragedy i n i ts v arious s ections. A tragedy employs action and spectacle, not narration. It evokes in the audience members pity for the tragic hero or heroine, and fear lest similar horrible circumstances should overtake the viewers. The resolution of the drama purges the audience of these emotions, leaving them emotionally cleansed a nd so mehow morally i mproved. For Aristotle, who arrived at his views as the result of seeing many tragedies and analyzing their common c haracteristics, a ny t ragedy w orthy of t he name would be characterized by "plot, character, diction, thought, spectacle, and lyric poetry." A tragedy's plot a nd i ts ob jective a re t he m ost important c onsiderations. The c haracters c ome next. They are important because they reveal the moral choices that lead to the events in the action. The thought i mplicit or explicit in making the choices is next most important, followed by the diction e xpressing t he t hought. L yric p oetry embellishes t he whole. Sp ectacle, t hough e ffective, is not a necessary component of tragedy.

A t ragedy is a lso n ot r equired to b e a m ere report of s omething that h as happened. That is the historian's job. Re sponding to P lato's ob jections t o p oets a s m isrepresenters of t he t ruth, Aristotle points out that a p oet's job is to r epresent the *kinds* of things that might occur, in keeping w ith p robability an d n ecessity. P oetry represents u niversals, w hile h istory re presents particulars.

Plots can be simple or complex. Complex plots are the better s ort as they r everse the expectations of a principle character. To illustrate this point, A ristotle alludes to S ophocles' Oedipus Tyr annus, in which the title character expects to discover the identity of a villain whose crime has brought a plague to Thebes. Instead, Oedipus discovers that he himself is the culprit. Thus, two characteristics of a good plot em erge: r eversal and recognition; a third necessary ingredient is suffering. Good tragic plots should be complex and involve a r easonably ad mirable c haracter's falling from prosperity to adversity, not through depravity b ut t hrough a flaw i n h is o r her character-a flaw often arising from an excess of some virtue.

Aristotle counsels judicious and sparing use of a g od from a mac hine (deus ex machina)—a device sometimes used to sort out complex plots by d ivine i ntervention. The philos other wants nothing irrational to intrude into the structure of a tragedy. He also rejects improbable recognitions and coincidences.

Aristotle continues by offering advice on planning and writing tragedies, each point illustrated by examples. He makes further relatively minor distinctions among the varieties of possible tragedies, as usual providing his readers with copious examples. He interrupts his discussion of literary types with a n extended d isquisition concerning grammar and linguistics that attests to his analytical powers. He offers definitions of such terms as *meta phor* and *neologism* and dr aws d istinctions among more and less effective word choices.

Following t hat d igression, he re turns t o his central theme with a thoroughgoing discussion of epic that parallels his earlier a nalysis of tragedy. That a nalysis c oncluded, A ristotle d iscusses t he relative me rits of e pic and tragedy. He d ecides that, in terms of the principle of mimesis and the impact that each sort of art has on its audiences, the tragedy is superior to the epic. In Remis sance Italy, Ludovico C astelvetro published an influential treatise based on Aristotle's p oetics. C astelvetro, ho wever, e mbroidered Aristotle's treatise with the Italian's own views on what came to be called the unities of time, place, and action. Renaissance pl aywrights and o thers confused Aristotle's work with Castelvetro's pronouncements, and the latter became virtual rules that g overned th e work of m any not able c ontinental tragedians, especially in France.

550 Polybius

Polybius (ca. 200-ca. 118 B.C.E.) *Greek-Roman historian*

Born in Megalopolis in Grecian Arcadia, Polybius distinguished himself both as a soldier and as a politician. For a long time, he lived at Rome, where, a lthough he had a rrived as a c aptive, he subsequently ga ined h is freedom and m oved i n notable circles. He was, for instance a friend and adviser of the Roman soldier, diplomat, explorer, and a dministrator, P ublius C ornelius S cipio Aemilianus. Polybius supervised Scipio's ed ucation and training as a public administrator and always remained a member of the distinguished group around S cipio that b ecame k nown as the Scipionic circle.

In t hat c onnection, P olybius t raveled w ith Scipio to Spain and Africa, and he was present at the Roman destruction of Carthage. Polybius also accompanied Scipio on an early voyage of exploration in t he A tlantic O cean a nd, with S cipio, crossed the Alps, tracing the route that the Carthaginian general Hannibal had followed to attack Rome in 218 b.c.e. Late in life, Polybius returned to Greece, spending his last six years in his homeland, helping to establish the Roman administration of Greece a fter i ts fa ll a s a n i ndependent entity.

In the literary world, Polybius distinguished himself as a historian-a writer of a then-new sort of historiography that he called *pragmatic* history. Rather than simply chronicling events, he attempted to explain the causes and origins of those events and to follow them through to their consequences. His objective in following this method was to prepare his readers' minds to apply similar analyses to the situations in which they found themselves. Such a process, Polybius thought, would prepare people for citizenship and for polti al office. Perceiving and predicting chains of cause and effect would help officials avoid flailing blindly at the problems they confronted. His m ethod o f r esearch i nvolved the close examination of primary documentsstate pa pers, d iplomatic c orrespondence, a nd the like.

Polybius also paid close attention to characterization in his history, and he is a nything but a disinterested historian. He passes judgment on the people and events that populate his pages. His history originally occupied 40 books. Of these, the first five survive as he issued them. We also have synopses of the first 18 books plus a few fragments or quotations from others. Several chapters are missing altogether.

Polybius a ttempted a c ompendious h istory that looked closely at the Mediterranean world for a period of 53 years, starting with the beginning of t he s econd Pu nic W ar (218-201 b.c.e.) that Rome fought against Carthage and continuing until both Carthage in Africa and Corinth in Greece suffered destruction (146 b.c.e.). In order to clarify the underlying unity of Roman activity in the Mediterranean world, Polybius de vised a novel mode of or ga ni zation. He developed a system of treating a four-year slice of time (olympiads, as he called them). Within each time frame, he first followed events in the western Mediterranean, i ncluding n orthwestern A frica, Spa in, Sicily, a nd I taly. H e t hen f ocused o n Gr eece, Macedonia, Asia, and finally, Egypt.

Before u ndertaking his h istory, P olybius had busied h imself w ith ot her s orts o f w riting. A ll those works are lost, but they included a celebratory biography of the Greek general and s tatesman Philopoemen, a fellow native of Megalopolis and a symbol of Grecian resistance a gainst the Romans. P olybius had c arried P hilopoemen's ashes in their funeral urn to their resting place. He also penned a history of the Numantine War, a work on military tactics, and a consideration of whether or not human beings could live at equatorial latitudes.

Polybius i s s aid to have died from injuries sustained when he fell from a horse in his 82nd year.

Porphyry (ca. 233–ca. 305 c.E.) *Syrian, Greek prose writer*

Born a nd b rought u p i n S yria a nd p ossibly a native of Tyre, the immensely learned Porphyry migrated t o A thens t o co ntinue his s tudies. From there, he m oved o n to Ro me, w here he studied w ith t he anti-Christian, N eoplatonist philosopher P l ot inus, w hose bio grapher a nd dis diple P orphyry would become. P orphyry expanded his work as a biographer to include a life of Pythagoras of Samos (see It al ic sch ool of phil osophy).

In addition to the work he d id in spreading Plotinus's doctrines, Porphyry was the author of an arti- Christian diatribe, parts of which have survived in fragmentary condition. A gifted philosopher in his own right, Porphyry also wrote commentaries on treatises of Pl at o and Ar istot le, as well as a *History of [or Introduction to]* Philosophy. The Roman polymath Boet hius was so i mpressed with P orphyry's Greek- anguage Introduction to the Categories (Organon) of Aristotle t hat B oethius t ranslated P orphyry's work into Latin. Some modern historians of philosophy consider P orphyry's i ntroduction t o be among the best examples of its genre ever written anywhere, a nd it has r emained i nfluential among Western i dealist p hilosophers i nto t he modern era.

In his p ersonal l ife, Porphyry w as b oth a n upstanding mo ralist a nd a v egetarian. These character traits appear in an explanation of the benefits of t he p hilosophical en terprise t hat he p repared for h is w ife, Ma rcella. I n i t, he explained how the philos other refines h is soul until, h aving transcended h is p hysical l imitations, t he p hilos other ascends to t he d ivine realm w here h is m ind d irectly p erceivers t he ground of being. As a vegetarian, Porphyry also prepared a t ract on t he sub ject of r efraining from killing animals and eating only a vegetarian diet, *De abstinentia*.

An allegorical, cosmological interpretation of a passage from H omer's $\overline{A} \ e \ Odyssey$ —On the Cave of the Nymphs—also su rvives, su pplying Porphyry with a dditional credentials as a philosophical literary critic.

Proba, Faltonia Betitia (fl. ca. 350 c.E.)

Roman poet

One of only two female Roman poets with substantial literary remains, Proba was an aristocrat and a Christian. She established an enviable literary reputation as a composer of cent os. The English word *cento*, in Proba's context, alludes to poems that she constructed on s ubjects taken from the Hebr ew Bibl e and the New Test a ment b y taking lines that Virgil o riginally w rote and c leverly r earranging them so that they addressed her subject.

The success a mong Christian readers of Proba's Virgilian centos was so great that Pope Gelasius named it on a list of works without authority as Christian text. For devout Christian Romans, however, the twin appeal of the authoritative poet of Rome's literary g olden a ge and s tories f rom Scripture seems to have been overwhelming.

Proclus of Byzantium (412–485 c.E.)

Greek prose writer

Born in Constantinople, Proclus was a devotee of the old gods who became a Neoplatonist philosopher. He studied at Xanthus in Lycia and at Alexandria, th en m oved t o At hens, w here he first studied a nd l ater t aught, following h is te acher, Syrianus, as principal of the Platonic academy in Athens, where he remained until his death.

Among Proclus's several surviving philosophical works, the one considered most important is his *Commentary on the Timaeus of Plato*. He commented as well on other dialogues of Pl at o; these include On the Alcibiades, On the Cratylus, On the P armenides, and On \overline{A} e Republic. O ther philosophical writings of P roclus include: Elements of P hysics, Elements of \overline{A} eology, On the Existence of E vils, On Fate, On P rovidence, and Platonic \overline{A} eology.

A synthesizing thinker, Proclus defended the old Greco-Roman religion against the onslaught of Christianity with an extensive and internally coherent body of thought, elements of which he largely inherited from h is teacher Syrianus and from Iambichlus of Syria. He wrote some Platonic hymns, which survive, and also, perhaps, a little handbook about literature, now lost, of which we have summaries. In addition, he penned scientific treatises that include a work commenting on the mathematician Eucl id's Elements, another o n P tol emy's Tetrabiblos, a nother a bout eclipses, and an Outline of Astronomical A eories. P roclus was the last g reat s ystematizer of classical, polytheistic thinking. Venerated as a Neoplatonic saint, he was the subject of a biography by his students.

Procopius (fl. sixth century c.E.) *Greek historian*

Born in the city of Caesarea in Palestine, Procopius migrated to Constantinople. There he became a lawyer and a n i mportant S ophist to ward the end of the period known as the Second Sophistic. Associated with the Byzantine general Belisarius as his private secretary and legal advisor from as early a s 5 27, Pr ocopius accompanied B elisarius on his Persian campaign in 530 c.e. and was present wh en t he By zantines defeated a n en ormous Persian army at Dara.

Literature be st r emembers P rocopius a s a n historian who wrote a dmirably clear a nd ac curate p rose. His best-known w ork i s the eightbook *History of the Wars*. Written in Greek, this work's first four books, together called the Persic half of the work, recount the wars of the Romans against the Persians in the east and against the Moors a nd t he V andals i n A frica. The s econd half includes the G othic part, which details the Romans' c ampaigns a gainst the G oths i n t hree books. The final b ook is a n overview of e vents throughout the empire. It takes the history up to about 554.

In his history, Procopius does not provide the sort of annualized account that ancient historians such as Thucydides gave of events. Rather, he follows one set of events through from beginning to end before discussing another. While this approach generates greater reader interest, it also necessitates b earing in mindt hat the military actions described often overlap in time, for Rome fought simultaneously on more than one front. This work was the authorized, official history of the military accomplishments during Justinian's reign (527-565 c.e.). It documents Justinian's energetic b ut f oredoomed e ffort t o re establish Rome's m ilitary c ontrol of t he ter ritory i t had ruled at the height of Roman power. Importantly, Procopius's history of these wars is often an eyewitness account by a talented writer close to the commanding g eneral. A s Pr ocopius h imself observes, no one was better qualified than he to pen these histories. As the official chronicler of great events, Procopius per ceived h imself to be the scholarly he ir of Thucydides and Herodotu s. Evidence of this fact is to be found in his frequent b orrowings of h is p redecessors' t urns of phrase.

Procopius penned two other surviving works. The first of these is a "*secret history*" called *Anec-dota* (Notes) that unofficially chronicles with bitter disapproval and perhaps exaggeration the s can-dalous events at the imperial court at Constantinople d uring the reign of E mperor J ustininian.

554 Prometheus Bound

Procopius privately considered the emperor to be two-faced and a lways willing to play both ends against the middle. Empress Theodora is the partic uhr butt of Procopius's venom, for h e d isapprovingly re counts in lurid detail the history of her youth as a courtesan before Justinian ennobled her as his empress. Even Belisarius does not escape unscathed. In the view of Procopius's translator, H. B. Dewing, some of the history that Procopius retails in the *Anecdota* may not be true. Procopius wisely did not allow the work to be published during J ustinian's l ifetime. The b ook ha s p rovided such modern authors of historical fiction as Robert Graves with much grist for their mills.

Procopius's o ther work, e ntitled *Buildings*, describes the various construction and restoration projects undertaken by the emperor Justinian. The work is essentially an attempt to secure the emperor's favor by flattery. Despite that fact, and despite the florid style—atypical for Procopius—that the effort to flatter o ccasions, the book is a n i mportant document for students of the period because of the details it contains about imperial administration in the sixth century.

Prometheus Bound Aeschylus (after 478 B.C.E.)

Perhaps the first play in a trilogy that may have included *Prometheus Unbound* and *Prometheus the Fire-Bearer, Prometheus Bound* probably initiated Ae schyl us's treatment of the secondgeneration Titan Prometheus who, after creating humankind f rom clay, st ole fire f rom he aven against Z eus's express command and g ave it t o human beings to alleviate their suffering. Prometheus belonged to a c ategory of mythic beings called the Tit a NS. They were the children of the pre-Olympian, primeval gods Uranus and Ge, who represented heaven and earth. The union of Uranus and Ge produced 12 offspring, immortal g iants. On e of t hese, Iap etus, f athered P rometheus, w hose n ame me ans "forethought." As we learn in Aeschylus's play, Prometheus was the ally of Zeus in establishing the reign of the Olympian gods. Once in power, however, Zeus decided to de stroy t he n oxious r ace of h umankind a nd forbade its access to fire. Prometheus resisted the destruction of his creatures.

Enraged by Prometheus's disobedience, a now almost omnipotent (though not omniscient) Zeus sentenced the Titan to be chained immobile to a mountainous promontory. Unrepentant and still rebellious, P rometheus was do omed to languish there, th ough h is d isdain f or Z eus c ontinually added n ew to rments to h is sentence. A v ulture, for example, eventually began daily visits to t he captive a nd to rmented h im b y e ating h is l iver. The destroyed organ regenerated each night, and Zeus intended the painful punishment to endure forever.

As A eschylus's version of the story opens in the wastelands of Scythia, Prometheus enters as the prisoner of the allegorical figures Power and Force. With them also comes H ephaestus, the blacksmith of t he g ods, w ho w ill f orge P rometheus's c hains and im mobilize hi m on t he promontory.

Addressing He phaestus, P ower e xplains t he object o f t heir jo urney. Hephaestus e xpresses reluctance to c arry out Z eus's harsh c ommands upon a fellow i mmortal, but t he sm ithy has n o choice in the matter. Prometheus must wear out the heat and frost of ceaseless eons alone, chained to t he ro ck. A s H ephaestus acco mplishes h is uncongenial task, Power, who feels no such compassion f or P rometheus, sp urs t he sm ithy to tighten the bonds to make them more painful.

The task done and his captors departed, Prometheus b ewails his fate b ut c omforts himself with his ability to foresee the future. Prometheus is possessed of the omniscience that Z eus lacks. The c hained T itan a rticulates a c entral i ssue of the play: Why does the universe or the deity permit a good person who performs a kind act from a noble motive to suffer evil?

As Prometheus ends this speech, his cousins, the daughters of the Titan Oceanus, who are the first of a succession of visitors, a rrive upon the scene in a winged c hariot. The ch or us r ecites their p art. In the interchange that follows, the audience learns that Prometheus has knowledge of future events, and the prisoner explains that it is h e wh o t aught human b eings a ll t hey k now. That k nowledge i ncludes the i nterpretation o f dreams, rituals of sacrifice and propitiation of the gods, me tallurgy, me dicine, h usbandry, a nd s o forth. The audience also learns that Prometheus knows things that Zeus does not. One day, the Titan promises, Zeus will have to ask Prometheus about the end of the Olympian deity's reign. We learn a sw ell t hat Z eus's p ower i s l imited b y Necessity. The Fates and the Furies in turn control N ecessity. Prometheus a ssures t he c horus that his bondage eventually will end.

Now t he T it an O ceanus c omes c alling, mounted on a four-legged bird that some believe to be t he winged horse Pegasus. O ceanus bears warnings from Zeus and encourages Prometheus to apologize.

Prometheus, however, k nows what Z eus does not—how Z eus w ill e ventually fall from p ower. Prometheus, t herefore, re jects O ceanus's advice, warning that he and Zeus should take care.

Prometheus's next visitor is Io, formerly a princess of Argos and a priestess of Hera. Zeus's love for Io, however, provoked his wife Hera's jealousy. Punishing I o, H era t urned her i nto a b inatured half woman, half heifer. The goddess condemned the hapless girl to wander the world, continually driven on by the sting of a gadfly.

Io r ehearses her s tory, a nd P rometheus p redicts t he pa th o f her w andering, in cluding t he naming in her honor of the Bosporus—the crossing of the heifer. From Io's ongoing conversation with P rometheus, we learn t hat Z eus's eventual downfall will result from his own folly in seeking an ill fated union w ith a nother m ortal f emale. The only way for Zeus to a void his fate is to free Prometheus from his bonds. Io also learns that a member of the 14th generation of her descendants will be the person to deliver Prometheus.

The Titan then gives Io a choice: She may know either the troubles in store for her or the identity of the person who will deliver Prometheus. The chorus i nterrupts, a sking Prometheus to tell i t one of the two predictions and Io the other. Prometheus a grees. I n high-flownl anguage, he describes Io's future weary wanderings and their eventual end in Egypt. There in C anobus at the mouth of the N ile, I o is fated to r eturn to her human shape and to b ear Z eus a c hild na med Epaphus. The member of the 14th generation of her d escendants who will free Prometheus will be a child of the 13th generation's Hypermnestra (see \overline{A} e Suppl iants). With that, Io's gadfly stings her, and she sets off on her wanderings.

The chorus reflects on the dangers inherent in matings between people and gods, and it describes the a dditional t ortures that P rometheus m ust endure for refusing to cooperate with Zeus. Zeus, in t he m eantime, h as o verheard t he f oregoing discourse. He sends the m essenger of t he g ods, Hermes, to demand the details of Zeus's eventual fall. Prometheus haughtily refuses.

Hermes predicts that Prometheus's only hope of deliverance rests on the unlikely circumstance that a god will appear who is willing to take Prometheus's place and voluntarily descend to Hades. As further punishment for his prideful resistance to Z eus's will, P rometheus si nks b eneath t he earth, and the play ends.

Early Christian commentators on the tr agedy a lmost a m illennium later per ceived i n Hermes' pr ediction a foreshadowing of Ch rist's coming. Nineteenth and early 20th-century literary critics, in stead, see in the character of P rometheus a bl ueprint f or t he c haracter of t he romantic hero—a p erson who opposes h is freedom o f w ill to t he dema nds of aut hority, t he operation of fate, and e ven the will of D ivinity. Others perceive an argument for human nobility and purposefulness in the face of the insurmountable odds posed by weakness and mortality.

Propertius, Sextus Aurelius (ca. 53–15

B.C.E.) Roman poet

Born i n t he I talian r egion o f Umbria, Sextus Aurelius Propertius appears to have been one of the unfortunate Romans whose land was confiscated in 48 b.c.e. for d istribution t o re turning Roman legionaries in lieu of retirement pensions. Landless, Propertius migrated to the city of Rome and, having a natural affinity for poetry, joined a coterie of poets whose membership included such famous R omans as Ovid ; A l bius T ibullus; Gaius C or nel ius Ga llus; Virgil; and O vid's patron, G aius Mae cenas, who became Propertius's patron as well.

From P ropertius's pen, four books of elegiac couplets survive. He used as his Greek models the poems of Callimachus and the now-lost works of P hil et as of C os. But P ropertius a lso had a Roman m odel i n C ornelius G allus, w ho p ictured himself as the love slave of a mistress named Lycoris.

Four books (originally five) of a lmost 1 00 poems by Pr opertius have survived. Many of them are love poems dedicated to a mistress of low status whom he c alls Cynthia—one of the names of the moon goddess and the female form of one the names of A pollo, patron of the arts (Cynthius). Cynthia dominates Propertius's life a total role reversal for the expectations of malefemale love re lationships in the Roman milieu. Yet d espite C ynthia's ill t reatment, P ropertius stands firm in his dogged devotion to her.

The l iterary h istorian L lewelyn M organ su ggests that Propertius's role reversals in these poems, in which a dominant, low-status female mistreats and masters a servile, high-status male—are *intended* to be shocking. Morgan thinks, moreover, that Propertius was w riting for a h ighly l iterate a udience w hose m embers w ould r ecognize t he e xaggerated situations that Propertius describes as the poet's b id f or a n i nnovative pl ace i n t he p oetic canon of his day.

Among the poet's strategies for achieving that aim is creating a kind of verse that will both shock and titillate—one that makes the poet an immoral voice in his own verse and one that gives a predominantly male audience a voyeuristic experience. Propertius is witty, ironic, and both amoral and immoral—elements that have been and sometimes have not been perceived by different audiences reading his works in more prim or notso-prim social environments over the millennia since he wrote.

Protagoras Plato (ca. 400 B.C.E.)

The dramatic situation in this early Platonic dialogue features the arrival in Athens of the famous Sophist Protagoras of Abdera and the excitement that h is p resence g enerates a mong Socrates' friends. One of these, Hippocrates, identifies himself as a Sophist, but when Socrates questions him closely, he admits that he does not know just what a Sophist is supposed to know.

Socrates e xplains that a Sophist is a person who sells knowledge—the food of the soul. The buyer must beware lest the knowledge he buys be poison. This said, Socrates and his companions go to visit Protagoras. They find him discoursing to a ba nd of listeners in the cloister of his residence. They introduce themselves, and Protagoras explains his role as a teacher of humankind.

Socrates flatters Protagoras by suggesting that others jo in t hem to b enefit f rom h is d iscourse, and w hen a ll t he pa rticipants a re a ssembled, Socrates as ks P rotagoras w hat Hi ppocrates ca n expect if he enrolls as the Sophist's student. Protagoras explains that Hippocrates will learn prudence in public and private matters.

Socrates as ks i f this m eans th at P rotagoras teaches politics and good citizenship. When Protagoras a nswers t hat it does, Socra tes ex presses his doubts that such matters can be t aught. In response, P rotagoras embarks o n a mythohistorical discourse that begins with the creation of men and animals, proceeds through the introduction of fire by the Tita n Prometheus, to the assembly of human beings in cities. At that point, Zeus endowed people with the qualities of reverence a nd j ustice. These a re u niversal g ifts, a nd people who fail to practice them are punished. Since some people do not display these qualities, Protagoras thinks, they can be taught in the same fashion t hat g ood people t each v irtue to t heir children. In adulthood, the laws themselves continue that education.

Now Socrates wants to know why the children of good men sometimes turn out to be bad. Protagoras suggests that parents teach virtue within their c apacities, s o t hat d ifferent p ersons le arn different degrees of virtue.

Socrates i nquires i f the various v irtues a re really simply different aspects of the same overarching quality. Protagoras thinks that they are, just as different features compose a face. Socrates continues to pursue this line of questioning until it b ecomes clear that he is backing P rotagoras into a logical corner—a method that S ocrates regularly follows. In exploring the nature of the good, he has first led Protagoras to concur in identifying t he e xpedient w ith t he g ood, b ut then h e t raps P rotagoras by a lso le ading t he Sophist to a dmit that some in expedient things are also good.

Seeing t hat h e h as b een trapped, P rotagoras attempts to c onfuse t he i ssue b y g iving a longwinded an swer that directs the discussion down irrelevant paths. Socrates complains that he has a bad m emory a nd c annot k eep t rack of lon g answers. Protagoras refuses to ac cede to Socrates' request fo r sho rt a nswers, a nd S ocrates t ries to leave. H is f riends r estrain h im a nd a ttempt to restore friendly relations between Protagoras and Socrates. One of the friends, Hippias, proposes to appoint a r eferee, but Socrates says that no better judge t han P rotagoras h imself c an b e found. S o, instead of remaining in his usual role of questioner, Socrates will let Protagoras ask the questions, and he will attempt to give short answers. Protagoras reluctantly agrees, and the discussion resumes.

Protagoras, in what is evidently one of his set pieces, cites an apparent ethical contradiction in the poetry of Simonides of Ceos. Socrates, however, b y d emonstrating the difference in the meanings of *be* and *become*, disproves Protagoras's analysis. A leng thy section follows in which the discussants offer analyses of the entire poem under discussion. When the analysis is complete, one of those present, Hippias, proposes to analyze another poem, but Alcibiades wants to go back to the main issue, and he shames Protagoras into resuming the discussion.

Protagoras now returns to a consideration of virtue. He argues that wisdom, temperance, justice, an d h oliness c an be considered a lternate names for the s ame quality, but t hat courage is different. A n i ntemperate, u nwise, u njust, a nd unholy person can nonetheless display courage in battle. Socrates proves him wrong by demonstrating t hat s uch c ourage i s o verconfidence a nd therefore madness. P rotagoras c omplains t hat Socrates misrepresents his views.

Changing t he s ubject, Socrates s uggests t he identity of good with pleasure and evil with pain. Protagoras o bjects to t hat i dentification but is unready to argue the matter. Socrates therefore shifts the focus of the discussion to k nowledge, and Protagoras agrees with him that wisdom and knowledge a re t he h ighest of h uman qu alities. Socrates then leads Protagoras to admit that both

pleasure a nd pa in c an i nterfere w ith w ise a nd knowledgeable behavior.

The argument goes on, and Socrates gradually gains the upper hand. As he do es so, however, he leads Protagoras to assent to Socrates' original position, wh ile S ocrates u ndertakes t o d emonstrate that of Protagoras. By the end of the discussion, t he o pponents have s witched si des on t he basic i ssues of t he d iscourse. The u pshot of t he entire argument is to undermine the sophistical enterprise.

The historical Protagoras was obliged to leave Athens for teaching atheism.

Prudentius, Aurelius (Clemens) (348-ca.

405 C.E.) *Roman poet and prose writer* A poet, hymnodist, and Christian apologist and controversialist, A urelius Pr udentius was born in Spain. Some authorities argue for the Roman town of C alagurris (modern Ca lahorra) as h is birthplace, and some for Caesarea Augusta (modern S aragossa). T rained in rhe toric, P rudentius first practiced law and became a f unctionary in civil government. He then became a soldier—an appointment that brought him to the attention of the Western Roman emperor.

After h is 5 0th b irthday, P rudentius r etired from active participation in worldly affairs and devoted the rest of h is life to p ious occupations that included the composition of religious poems meant for si nging a s h ymns. These s urvive i n two small collections. O ne of them contains 12 hymns, some of which are designed for celebrating par tċ dar feast d ays and s ome for ho urs of prayer during the day. This collection bears the mixed Greek and Latin title *Cathemerinon liber* (Book for everyday, or \overline{A} *e Daily Round.*) A second collection contains 14 hymns, each honoring a Christian martyr. This work bears both Greek and L atin ti tles *Peri S tephanon* (About t he crowns . . .) and *De coronis* (About the [martyrs'] crowns).

As a Christian apologist, Prudentius penned a poem, " \overline{A} e Origin of Sin" ("Hamartigenea"). He also wr ote "Psychomachia," a p oem de scribing the struggle between good and evil for a human soul.

As a C hristian co ntroversialist, Pr udentius contributed t o a r enowned d ispute b etween Roman C hristians, le d b y t he Ro man C atholic bishop of M ilan, St . A mbrose, a nd Ro man pagans, led by Symmachus, the pagan prefect of the city of Rome. The issue at stake involved an altar d edicated to t he Ro man g oddess Vi ctory. Ambrose, as the representative of what was now Rome's official state religion, w anted the al tar destroyed. S ymmachus, a le arned a nd g entlemanly worshipper of the old religion, wished the altar to be preserved in a spirit of religious toleration. Pseudolus Plautus (191 B.C.E.)

Considered by the author to be Pl aut us's masterpiece, *Pseudolus* displays all the characteristics for which the Plautine comedy has been celebrated through the ages. It is farcical, racy in language and action, and employs Plautus's innovations of using so ng and lyric rh ythms to emb ellish t he action, the gist of which he b orrows from Greek originals.

As in his Greek models and as in Roman comedy generally, Plautus's characters tend to be types rather than i ndividuals. They i nclude cl ueless young lovers, he artless procurers, cross parents, and such crafty slaves as the title character, Pseudolus, who provides the brain power lacking in the others, moves the plot along, and provides its resolution. Pseudolus is legally the slave of Simo, but he effectively serves Simo's son Callidorus.

Set in Athens, the play opens with Pseudolus doing his best to get his clearly depressed master, Callidorus, t o stop s ighing a nd w eeping lo ng enough to e xplain his predicament. A fter much cajoling, Ca llidorus s hows P seudolus a le tter from his beloved Phoenicium, a c ourtesan, begging f or C allidorus's financial hel p. Bu t C allidorus explains that he do es not have the means to help her.

Phoenicium's letter explains t hat a p imp has sold her to a Macedonian soldier, and she will be taken away as soon as the soldier's representative pays t he ba lance o f t he p urchase p rice. She explains that the representative will identify himself with a wax tablet bearing the likeness of the soldier and that the deadline is the following day. Pseudolus agrees to find Callidorus the money he needs a nd g et t he g irl f or h im. I f finding the money proves difficult Pseudolus intends to weasel it from the young man's father, Simo.

Now t he p imp, B allio, en ters, b eating h is slaves. The a udience le arns t hat t his d ay i s h is birthday. He sings a song and remembers that he also requires his courtesans and calls for them, in Richard B eacham's w onderful t ranslation, w ith the command, "Whores, out of doors!" The last to appear is Phoenicium. A lengthy interchange follows among Ballio, Pseudolus, and Callidorus, in which the latter two try to persuade Ballio to give them more time to raise money and buy Phoenicium's f reedom. Ballio t ells them s he ha s b een sold. Callidorus and Pseudolus compete in hurling in sults a t B allio, b ut he pa rries t hem w ith good- humored, amoral w it. He finally promises that if the Macedonian soldier fails in his bargain, Callidorus will have another opportunity to b uy Phoenicium's freedom. Ps eudolus b oasts t hat he will outwit Ballio, but after both Ballio and Callidorus e xit, he ad mits t hat he ha s n o pl an to accomplish his boast.

Now Callidorus's father, Simo, enters with his neighbor, C allipho. Si mo i s c omplaining a bout Callidorus's spendthrift ways, but Callipho argues that someone must be slandering the lad. Besides, in his youth, Simo was a notorious womanizer.

Simo has already heard about the plot to have him finance h is s on's love l ife. To h is surprise, Pseudolus confirms the rumor and assures Simo that before the day is over, the old man will give Pseudolus the necessary cash. Simo assures him he will not and makes a bet with Pseudolus. The two wager concerning that outcome. If Pseudolus wins and gets money from Simo, he will never be threatened with another beating; if he fails, he will be set to w ork at backbreaking l abor i n a mill. As the first act ends, Pseudolus addresses a song to the audience, and a musical interlude follows.

As the second act begins, Pseudolus observes the arrival of Harpax, the military aide of Phoenicium's b uyer. P seudolus p retends to b e t he pimp B allio's slave, Su rrus, and t ries to g et the money Harpax carries to pay the final installment for Phoenicium. Harpax mistrusts him Pseudolus with the money but is fooled into thinking that he can leave the letter and the identifying token for the pseudo- Surrus to pass along to his matter, the pimp Ballio. Pseudolus promises to find Harpax at his inn later on and to inform him when Ballio returns.

The lo velorn C allidorus n ow en ters with h is friend Charinus. Pseudolus explains t hat he ha s

the token that identifies the messenger, and Charinus promises to supply the n eeded m oney to redeem Phoenicium. They agree to employ Charinus's s lave, S imia, t o im personate Ha rpax a nd, equipped with both the necessary token a nd the money to get Phoenicium.

Now B allio enters with a cook that he has hired to prepare his birthday feast. Like slaves, cooks are regularly among the stock characters of G reek a nd Ro man c omedy, a nd t hey a re always rough and crooked pilferers. A good deal of s lapstick i nterchange ac companies ar rangements fort he party. Then Si mia en ters, d isguised as Harpax. He and Pseudolus exchange considerable banter on the subject of which of them is the greater scoundrel, and Simia, impersonating Harpax makes his attempt to deceive Ballio. The fact that Simia does not k now the name of the master he is representing almost undoes the scheme, but he cleverly gets Ballio to name Polymachaeroplagides-an ames uitable for a stock, braggart soldier. In the event, Simia gives Ballio the token a nd the money owed and makes off with the girl.

Certain that he has given Phoenicium to the right person and that Pseudolus has no hope of outwitting him, Ballio bags to Simo—who happens by—that he is safe from Pseudolus's tricks. So certain is he that he bets Simo 20 *minae* that Ballio has outwitted Pseudolus.

Harpax—Polymachaeroplagides's re al e missary—now reappears to carry out his commission, and Ballio thinks he is a customer in search of a prostitute. When it becomes clear that Harpax is after Phoenicium, Ballio thinks that Harpax is an imposter s ent b y Pseudolus. The s tage b usiness surrounding t his m isapprehension o ccupies s everal l ines, b ut when t he t ruth finally d awns o n Ballio, he realizes that he has not only been swindled out of Phoenicium but that—since the girl is gone—he owes Harpax the 20 silver *minae* already paid b y P olymachaeroplagides as a do wn pa yment. More over, Ballio now owes Si mo to w hom he has lost his wages.

As Ba llio goes off to g et t he money to pa y Harpax, Simo goes home to get the cash to pay off his wager with Pseudolus. Simo now believes his slave to be the most clever fellow living, though he means to prepare a surprise for him.

Pseudolus a rrives at t he do or d runk a nd crowned w ith a garland. He reports t hat the young lovers are entwined in one another's arms. Simo reluctantly pays him his money. Then Simo sets Pseudolus free, and Pseudolus restores Simo's cash. Pseudolus invites his former master to jo in him for a carouse, and the two exit arm in arm.

Ptolemy (Claudius Ptolemaeus) (ca. 90-

168 C.E.) *Greek-Egyptian prose writer* An E gyptian c artographer, g eographer, m usical theorist, a strologer, an d a stronomer, P tolemy worked i n A lexandria d uring the H el l en isti c Age. He is principally remembered for his astronomical work, *System o f M athematics*, b etter known by its Arabic title, *Almagest*. As an astronomer, P tolemy d erived h is s tudies f rom the lost observations of p redecessors, b ut a s h is w as the earliest work to survive, his name has attached to the s ystem th at h e p romulgated: th e P tolemaic system of the universe.

Ptolemy subscribed to a geocentric theory of the solar system. Earth was the fixed center of a series of eight rotating spheres. Around it circled the m oon, th e s un, a nd t he pl anets k nown to antiquity: Mercury, Venus, Mars, Jupiter, and Saturn. Beyond that was the sphere of the fixed stars, and beyond them the prime mover—the *primum mobile* that had started everything rotating. The mechanism for transferring the rotational power was a s eries of c rystalline sp heres t hat r ubbed together, transferring their motion like a s ystem of ge ars. The sound of their friction created the music of the spheres that could be heard, according to Neoplatonist phi bs ophers, by the spiritual beings that were intermediate between the gods and men. The desire for consonance between the workings of the sidereal universe and the affairs of human beings may have been the factor that made P tolemy a m usical theorist a s w ell a s an astronomer. He wrote about musical matters a s well in his *Harmonics*, and optics and the theory of vision also interested him.

Having the earth at the center of things created certain difficulties. It produced an apparently retrograde motion of certain stars, and Ptolemy and his pre deæs ors exercised remarkable ingenuity to a ccount for a p roblem t hat d isappears when the sun is recognized as the center of the solar system.

His accomplishments, however, we nt further. Although h is a stronomy was la rgely der ivative, his geography was original. His book on that subject, the *Geographike Huphegesis* (Geograph ical outline), l ists ma ny pl aces, g iving t heir c orrect longitudes a nd l atitudes, a nd p roviding g eneral descriptions of their features. He correctly calculates the size of a sp heroid e arth a nd provides a creditable world map.

Two w orks a re a scribed to P tolemy a s a n astrologer, his *Tetrabiblos syntaxis* (System of four books) and a work called *Karpos*, or *Centiloquium* (Hundred words).

"Pythian 3" Pindar (ca. 478 B.C.E)

One of t he c haracteristics t hat c ontributed to Pindar's r eputation a s t he m ost notable l yric poet of ancient Greece appears in the remarkable variety that distinguishes his work. This quality appears in his prosody; in his choice of subjects; and in his deployment of word order, the lexicon, and the grammatical capacities of the Greek language. It also appears in his choice of subject and in the tonal shifts that he achieves.

Pindar's ode entitled "Pythian 3" belongs to a category of Pindaric composition called victo ry ode s. Pindar wrote them to c elebrate the victories of his patrons or their horses in the major athletic c ontests of h is t ime. P indar c omposed "Pythian 3" for his longtime patron, Hieron, ruler of the city of Syracuse on the then-Grecian island of Sic ily. The v ictory of H ieron's en try i n t he single-horse r ace held at t he games i n ho nor o f Apollo at P ythia provides the nominal occasion for t he p oem's c omposition. The o de's c ontent, however, instead of directly celebrating that event, offers comfort and consolation to an ill and aging Hieron who has met the challenges of his life successfully a nd w ell. The l iterary h istorian a nd translator William H. Race calls Pindar's poem "one of t he g reatest consolatory poems in all of literature."

As is often Pindar's practice, he begins his poem by remembering a series of events from the mythic past. In the context of the race, he t hinks a bout the centaur—half horse and half man—Chiron, offspring of Chronos and Philyra, the daughter of the Titan O ceanus. Friendly to h uman b eings, Chiron had nurtured Aesclepius and taught him medicine. Pindar wishes Chiron were again alive;

562 "Pythian 3"

he implies but leaves unstated his patron's need for the centaur's medical expertise.

The p oet's a ssociative p rocesses t hen r egress further in time to consider the parents of Aesclepius: Apollo and Coronis. Pregnant with Aesclepius, Coronis had betrayed Apollo with a nother lover. A ngered, Ap ollo k illed her but pit ied h is child and rescued the baby from Coronis's burning funeral py re. The cautionary tale of C oronis establishes a theme of the consequences of foolish excess and dissatisfaction with what one has. It also ill ustrates d ivine compassion a s well a s anger.

Aesclepius learned to t reat the illnesses of all who sought his help, but he had also inherited his mother's folly. He overstepped his human limitations by yielding to the importunities of the goddess A rtemis, w ho b egged A esclepius to b ring back to l ife her h uman favorite, H ippolytus (see *Hippolytu s*). Infuriated at this breech of human limitation, Ze us d estroyed Ae sclepius w ith a thunderbolt. F rom th is tale, P indar draws a moral. Human beings must "seek what is proper from the gods." Then, t actfully add ressing h imself instead of his royal patron, Pindar continues: "Do not, my soul, strive for the life of the immortals, / b ut e xhaust t he p ractical m eans a t y our disposal."

Returning t o hi s o riginal wish th at C hiron were s till living, the poet s ays he w ould u se h is song to persuade the centaur to "provide a healer" for the maladies of "good men"—presumably like Hieron. Were that the case, the poet would bring his p atron two p rizes for h is horse's first-place finish, a "victory revel" and golden health.

Having proceeded until this point by indirection, P indar n ow dir ectly addresses h is pa tron. The poet reminds the king that the gods apportion to h uman b eings a pa ir of e vils for e very g ood. Fools, he continues, cannot handle this truth, but good men—as H ieron h as i mplicitly done—take the gods' gifts and share them with others.

Pindar draws from mythology further examples of the intermixture of good fortune and misfortune that the gods dispense. He concludes the poem's fifth antistrophe with the observation that people's h appiness, l ike "gusts o f high-flying winds," does not last long.

With great tact, Pindar offers Hieron disguised advice in the concluding stanza of the poem. The disguise amounts to a statement of Pindar's personal intention to "be small in small times" and "great ing reat ones" and to "honor with [his] mind" the fortune that is allotted to him. Pindar concludes by h oping for fame that "endures i n glorious songs," and he notes that few can easily become the subjects of poems. He seems to imply, however, that Hieron is among those whose fame has a lready b een p reserved i n long-enduring song. It is the best that mortals can hope for.

quantitative verse

To a nalyze t he metrical patterns of E nglish and most ot her mo dern Eu ropean verse, poet s a nd their r eaders u se a pattern of r elative s tress to determine a system of heavy and light emphasis on syllables: "The BOY/ stood ON/ the BURN/ing DECK" or "The AsSYR/ian came DOWN/ like a WOLF/ from the FOLD." In the first instance, the four g roups of a lternating l ighter a nd h eavier stresses creates a pattern called *iambic tetrameter*, and the second set of four three-syllable groupings of t wo light a nd o ne heavy s tress i s c alled *anapestic tetrameter*.

Though very ancient Latin verse employed such stress patterns (see S atur nian ve r se), in G reek and in the later L atin of C at ul l us, V ir gil, a nd Ovid, s tress p layed n o r ole i n d etermining t he chaining together of metrical measures. Theoretically, the relative length of a syllable was determined by the time a person took to utter it. In practice, a set of relatively complex rules determined a system according to which syllables were considered to b e long or short. It helps to think of quantitative verse as measures of music. For example, a single dactylic mea sure, called a *foot* can be illustrated as a whole note followed by two quarter notes.

Six f eet to gether c omprise h exameter. F or such s erious p oetry a s t he e pic a nd t r agedy, Greek and later Roman authors favored a hexameter l ine co mposed p rincipally o f d actyls. T o avoid t edium i n the l istener or reader, s killful artists varied their epic and tragic meters. Thus, the typical dactylic hexameter line ended with a spondee—two long syllables or two half notes in our musical analogy. Poets and playwrights often substituted a ny other metrical foot for a d actyl elsewhere i n a l ine. Ma king u se o f t he na tural pauses that occur in language, they also typically inserted a break called a *caesura* in each line to give readers and actors a chance to inhale.

As G reek d rama d eveloped, plays b egan to rely less on set speeches and more on dialogue. This development resulted in a sh ift away from the statelier dactylic hexameter mea sure in dialogue and toward a m ore rapid iambic trimeter measure that was perfected by the poet Archiloc us in the seventh century b.c.e. In quantitative verse, an iamb can be thought of as a quarter note followed by a half note. The Greek system of scansion considered two feet of ia mbic trimeter to be t he d urational equivalent o f o ne f oot o f dactylic hexameter. As a result, the iambic trimeter pattern doubled in each line of the discourse in which it appeared. This development enriched the variety of verbal pace in the performance of tragedies.

564 Quintilian

Though not a ll t he possible c ombinations of quantitative verse need be considered here, other frequently used patterns include the elegiac couplet (see el egy a nd el egaic poet ry), the sapphic stanza, the alcaic stanza, and scazon.

The elegiac couplet, a lso first observed in the seventh century and employed by such poets as Callimachus, was commonly used to lament or eulogize the dead. The first halfline of this unrhymed couplet begins with two and a half dactylic feet whose last beat is silence—a caesura. The second half of the line is composed of dactylic hexameters whose third and sixth feet also contain silence instead of syllables. Two of these lines together give an impression of sobbing or catching the breath as one might do in the throes of grief.

The i nvention of t he s apphic s tanza i s, of course, attributed to Sappho. Four lines of verse characterize it. The first three lines are each composed of two beginning and two ending trochees (long, short), with a dactyl (long, short, short) between the two trochees—a five-foot line. The fourth line, called an *adonic*, is formed from two feet, the first a dactyl and the second a trochee.

Taking its name from Sappho's fellow poet and contemporary, Al ca eus, the alcaic stanza begins with two lines id entical to t he first three of t he sapphic stanza, with these exceptions. The alcaic lines begin with a n anacrusis—an ex tra syllable outside the metrical pattern—and end with a single long syllable. The third line also c ontains a n anacrusis that is followed by four trochaic feet. The final line contains two dactyls followed by two trochees.

The s cazon o riginated i n Gr eek a nd t hen moved t o L atin, where M artial a nd C atullus employed it profitably. It is a six- foot line, the first five feet of which are iambic and the last of which is a trochee. The s cazon is a lso c alled a *limping iambic* since the last foot drags.

Quintilian (Marcus Fabius Quintilianus)

(ca. 40–ca. 96 C.E.) *Roman prose writer* The most famous Roman writer on the subjects of education, o ratory, a nd rhe toric, Q uintilian was born in Spain in the city of Calagurris. There were two t owns with th is n ame, but t the l arger a nd more likely of the two as Quintilian's birthplace was a Roman city on the Ebro River. The date of Quintilian's birth is uncertain, and, though it is often listed as 35 c. e., he was probably born a bit later. By 57 c. e., Quintilian was in Rome as a student of rhetoric, which suggests that he was then between ages 14 and 20. In 59, Quintilian returned to Spa in a nd r emained t here u ntil 6 8, when he returned to Rome.

The em peror V espasian a ssumed t he ro yal purple in 69, and in 71 he appointed Quintilian to a s tate professorship—a p ost he hel d u ntil h is retirement around 90 c.e. In that capacity, Quintilian opened a school and became the first rhetorician t o r eceive a s alary f rom t he i mperial treasury. He numbered among his pupils the children of the most prestigious families of Rome.

The most important occupations a man could perform in a ncient Ro me were fighting in the legions and speaking in the law courts and the senate. The p reparation f or sp eaking i nvolved instruction in rhetoric and oratory, and it was in these subjects that Quintilian specialized. While still serving in his capacity of state professor, he published a now-lost t reatise, *On the Causes of Corrupted Eloquence*.

Quintilian was not only a teacher, however. He was also a practitioner of the art he professed and maintained an active legal practice. In his known publications, a lthough he made general mention of many cases, he specified only four. In one, he successfully defended Naevius of Arpinum against the charge of having thrown his wife to her death. Quintilian allowed his speech in defense of Naevius to be published. O ther more or le ss corrupt versions of his legal speeches were published, but he d id n ot a uthorize t heir circulation. A s econd case in which he is known to have served involved his s uccessfully d efending a w oman a gainst a charge of ha ving forged he r h usband's will. A third case—one th at underscores his fame involved his d efending t he p rincess B erenice of Judea, sister to King Agrippa II. In the fourth and least-known case, Quintilian dealt with an allegation that a certain young woman was the sister of his client. Presumably he won.

Two collections of declamations controversially purporting to have been Quintillian's survive. Conceivably, s ome of them m ight have be en schoolroom examples or exercises. There are 145 surviving *Minor Declamations*—about ha lf t he number known in antiquity—and 19 full- scale or *Major Declamations* on such issues as soothsayers and pirates. These do not seem in keeping with Quintilian's interests.

After his retirement, Quintilian published his masterwork: Or ato rical I nst it ut e (On t he Education o f the O rator, Institutio o ratoria) i n about 94 or 95. Dealing not only with the intricacies of oratory but a lso, a nd m ost importantly, with the system of e ducation ne cessary to the preparation of a good o rator, t he work p roved enormously i nfluential i n t he a ncient w orld. I n the aftermath of the dislocations that ac companied the fall of the Western Roman Empire, the work was known for centuries only in fragmentary c ondition. P etrarch re ad a p ortion of t he partial manuscript and as a result began to understand Q uintilian's d eserved fame a mong the ancients. Then, in 1416, the Italian humanist Gian Francesco Br acciolini P oggio f ound a c omplete manuscript in the library of San Gallo. As a result, Quintilian r esumed his importance f or g enerations of educators, students, and orators.

Shortly a fter t he p ublication o f *Oratorical Institute*, t he p residing c onsul o f Ro me f or t he first half of 95 c.e., Flavius Clemens, procured for Quintilian a signal h onor: H e w as granted t he right t o dr ess i n t he c lothing r eserved f or a nd exercise t he privileges of p ersons who had o nce served as consuls of Rome. This honor, called the *ornamenta con sularia* (consular i nsignia), a lso freed the r ecipient f rom t he u sual d uties a ttendant upon former consuls—serving in the Roman senate. This a cknowledgement of Q uintilian's accomplishment came in the nick of time, for it is likely that he died in the following year.

Quintus Smyrnaeus (Quintus Calaber)

(fl. ca. third century C.E.) Greek poet The a uthor of a l ate post-Homeric Greek e pic poem, Quintus lived in Smyrna in Ionia, a spot not f ar f rom H omer's r eputed b irthplace. H e undertook to fill in the gap in the events of the Trojan W ar t hat o ccurs between t he ma terial Homer covered in A e Ili ad and that detailed in Ā e Odyssey. Entitled Posthomerica, or Paraleipomena Homero (Matters omitted by Homer), the work relies on the verse of the Greek cyclic poets (see Homeridae) a sits source material and follows the siege of Troy from Hector's death at the hands of Achilles to the Greeks' departure from Troy. Not all the episodes included, however, were in fact o mitted from Homer. There is some overlap with \bar{A} e Odyssey, as in the episode of the wooden horse and Troy's capture.

In composing his poem, Quintus took pains to emulate the manner of Homer while at the same

time introducing a phraseology distinctively his own in an effort to avoid a style either to o high flown or too pedestrian.

Qu Yuan (Ch'ü Yüan) (ca. 340–ca. 278 B.C.E.) *Chinese poet*

The earliest Chinese poet whose name we know, Qu Yuan was a member of the royal house of Qu (Chu) and was a c ourtier in the retinue of King Huai (329-299 b.c.e.). While l ater hands may have written some of the poems ascribed to h im in the surviving collection, *Verses of Q u*, others seem genuine and even autobiographical.

As Tony Barnstone and Chou Ping tell Qu's story, a jealous colleague slandered Qu, and the king d ismissed h im f rom s ervice. N onetheless, Qu continued to warn the king against the State of Q in a nd its b elligerent i ntentions. F ailing to heed Qu's warnings, King Huai was taken captive and executed by the military forces of Qin. Huai's son succeeded to p ower, but he to o rejected Qu's ser vices, exiling the poet far to the south. Despondent there, Qu Yuan drowned himself in the River Miluo.

Qu Yuan wrote long, d ramatic n arratives a s exemplified by h is poem Encounter ing Sorrow (Li sao)—the most cel ebrated of C hinese poetic works and one thought to have been written in response to having fallen from the king's favor. Other sorts of w orks a lso appear in Qu's verses. One finds ritual songs and a series of verse riddles on the subjects of Chinese history, cosmology, a nd m yth. There is a p oetic d ialogue between Qu and a fisherman in which the latter encourages Qu to remain a mong the living and continue to do his job. Several of the poems deal with the ritual activities of a priest or shaman. Qu Yuan became a Confucian model for the selfsacrificial honest courtier who is willing to risk criticizing h is su periors. The a nnual C hinese Dragon B oat F estival commemorates h is de ath by drowning.

Ramayana Vālmīki (ca. fifth–third century B.C.E.)

The epic story of Rama has deeply and continually influenced Indian thought and letters throughout the ages. In its current form, the *Ramayana* is the earliest surviving p oem in a l anguage of India—Sanskrit. Co mmonly attributed to the poet Vālmīki (though also sometimes to Vyāsa), and sometimes called the Indian *Ili ad*, the poem seems to have a factual basis in the ancient wars of conquest that Aryan invaders fought in southern India and Sri Lanka. The *Ramayana* is a long, verse epic containing some 50,000 lines in 25,000 *slokas*, or couplets, organized into four principal sections.

Section 1

The first section recounts Rama's childhood and youth up to his wedding with his lovely bride Sita. Rama is the miraculous incarnation of the Hindu god Vishnu, the preserver of the universe. As the story begins, the elderly king of Kosala, Dasharata, has no children. While praying that he might still father some, a su pernatural being app ears to him in an annunciation scene, explaining that the king has pleased God and promising that the king's three wives will all conceive and bear children. Dasharata must first distribute among the women a bowl of supernatural rice pudding that the glorious being has provided. All three wives bear ch ildren; R ama is t he el dest o f t hem. H is mother is Kausalya, and his half siblings include three brothers—one by Dasharata's second wife, Kaikeyi, and twins by the third, Sumitra.

As R ama r eaches his mid- tens, his r emarkable capacities began to reveal themselves. A holy man, Vi swamitra, a rrives a nd begs K ing K osala to send the 15-year-old Rama to de stroy a group called the Rakshasas, a company of demons who are interfering with the holy man's fire sacrifices. Taking w ith h im h is ha lf b rother L aksmana, Rama s erially e ngages the g iantess T adaka, her son Maricha, and then all the other demons. He hurls M aricha m iles a way i nto the sea a nd k ills the rest.

Then R ama and h is brothers v isit the city of Mithila, r uled b y K ing Janaka, t o perform t he delayed fire s acrifice ceremony. V iswamitra h as an ul terior motive: He wants Rama to marry Janaka's daughter, the lovely Sita. Before the king will assent, however, Rama must pass a test. Just as Odysseus in Homer's \overline{A} e Odyssey must do to prove h imself, Rama m ust string a bow. This one—the we apon of t he god Siva—is s o he avy

that no mere mortal can even budge it, much less string it. Rama can do it so easily that he snaps the weapon in two as he bends the bow. Sita is pleased, and the king assents to the wedding. The brothers a lso a cquire b rides, and a ma gnificent wedding ensues.

Section 2

The s econd section, e ntitled " Ayodhyā"-the name of both Rama's capital city and its districtpicks up the story a fter R ama and Sita's honeymoon. R ama, n ot y et k ing, b ecomes r egent o f Ayodhyā, but jealous gods conspire to thwart his purposes. Q ueen K aikeyi, d eceived b y a c hambermaid who is the gods' em issary, p revails o n the king to suspend Rama's regency, appoint her son Bharat in Rama's place, and exile Rama as a religious hermit to the forest for 14 years. The king resists this advice, but on hearing the plan, Rama thinks it a good idea. A fter much discussion and the king's fainting several times when he considers l ife a t co urt w ithout R ama n earby, Rama takes Sita with him, and the two depart for the f orest. H is b rother L akshmana a lso g oes along, and Bharat follows them, becoming Rama's disciple for a w hile until he t hinks the time has come to take up his regency. In the forest, they take up residence in an Edenic grove where they live in utter contentment.

The group has not dwelt there long before they are called back to Ayodhyā. O vercome by grief, the k ing h as d ied, r epeatedly u ttering R ama's name with h is last b reaths. The t ime has n ow come for Bharat to assume the throne. He tries to defer to Rama, but Rama intends to fulfill his vow and spend 14 years in exile. In that case, Bharat says, he will only rule as Rama's regent until the latter's forest exile ends. He puts Rama's sandals on the throne to signify that Bharat rules in his name. The group's adventures on the journey to the forest, Rama's sympathy with the plight of the common people, and their recognition of Rama as the incarnation of the Lord occupy the rest of the second section. So does the theme of Rama's ascendancy over t he e ntire p antheon of le sser Hindu deities who fear his power and try to resist with magic and guile what is fated to occur.

Section 3

In the third section, "The Forest," a fter locating another lovely spot to live, Rama must overcome a formidable army of 14,000 demons. They cannot m atch h is s trength, a nd h is a rrows c ut t he demons' en tire h ost to p ieces. E ventually R ama makes each demon see the other as Rama's image. The demons fight among themselves and finally kill each other.

What t he d emons ca nnot a ccomplish by combat, t hey attempt to a chieve b y g uile. The 10- headed demon king, Ravan, kidnaps Sita—like Helen of T roy, t he w orld's m ost b eautiful woman—and, ove rcoming a r escue a ttempt b y the Vulture King, carries her off to Sri Lanka in the south. In Ravan's clutches, Sita is ravished in every imaginable way.

Section 4

The epic's next part "Kiskindhā," is followed by a final part often split into "The Beautiful," and "Lankā." Together they recount the famous story of the recovery of Sita by the joint efforts of Rama, his brother Laksmana, and their wonderful ally Hannuman, the magical field marshal of all monkeys. Ha nnuman's ma gical t alents a nd m illions of monkey subjects locate Sita on the island of Sri Lanka, a nd t hey rescue R ama's wife fr om th e demons, overcoming them both in battle and by trickery. Ram a's forces, for e xample, c ross t he expanse of ocean separating India from Sri Lanka on a bridge supported by nothing but water. Eventually, after many changes in the fortunes of the warring pa rties, the b attle's i ssue i s de cided i n single c ombat b etween R ama a nd R avan. The multiheaded demon ke eps g rowing n ew he ads each t ime R ama sev ers some. F inally, R ama remembers a magic arrow that Bhrama has given him, and with it he destroys the demon.

In Vālmīki's version of t he often r etold a nd sometimes b owdlerized e pic, t he p rudish R ama

then rejects the rescued Sita for suspected infidelity during her long captivity with the demon king. She objects that, despite her having been ravished, Rama never left her mind or her heart. Disconsolate, she has her f uneral py re built, meaning to burn to death rather than live rejected by Rama. When she mounts the burning pyre, however, the flames d o n ot faze her, and her e ssential i nnocence is apparent to all. Yet when adversity strikes the kingdom in the form of famine, tongues wag once more, at tributing t his d isaster to S ita's infidelity.

Rama's memory seems p eculiarly short for a deity's, a nd he s ends her u naccompanied i nto exile. P hysically a nd sp iritually e xhausted, S ita half c rawls to t he her mitage of t he p oet s age, Vālmīki. There she b ears t win s ons, L ava a nd Kuça, a nd t here she r ears t hem for t he n ext 20 years.

An elderly and irritable R ama, in the meantime, h as b egun to i magine t hat the g ods a re peeved with him for having killed Ravan because the demon was the son of a priest. To expiate his imagined guilt, Rama sends a valuable horse into the f orest, w here h is t win s ons c apture i t. I n Rama's effort to recover the horse, his unknown sons' resis tance first enrages their father. Finally, however, he is delighted to discover who they are.

This discovery prompts Rama to feel remorseful about his treatment of Sita. He finds out where she i s a nd su mmons her . Si ta, ho wever, r eally wants no more to do w ith him, and at first she refuses to go. Eventually, ho wever, Vālmīki a nd his wife convince her. She puts on her richest finery and stands before her er stwhile husband i n all her beauty. To justify herself, she calls on the earth to witness the fidelity of her mind and heart. In answer, the earth opens and the earth goddess appears enthroned. She seats Sita beside her, and the two are transported to everlasting happiness. Rama gets his just desserts and lives with his guilt and regrets until the death of his human form.

The *Ramayana* enjoys the status of sacred scripture in the Hindu religion, and, as is the case with the *Mahabhar at a*, merely reading or reciting t he work or p ortions of it c onfers sp iritual

benefits. New York University Press has prepared a bilingual, Sanskrit-English version in five volumes that splits the epic's fourth section in two.

Ras Shamra texts (ca. 1500–1100 B.C.E.)

A c ollection o f fired c lay t ablets covered w ith cu neif or m, t he works t hat c omprise t he R as Shamra texts, were r ecovered f rom t he to pmost layer of five ancient cities, one built atop another since sometime in the New Stone A ge, when the oldest of the cities was built. Once excavations of the site were begun, it quickly became clear that archaeologists had stumbled on the site of the city of U garit, w hose na me w as w ell k nown f rom other sources.

Linguists r ecognized t hat the c uneiform inscriptions r epresented a l anguage u nknown before their discovery. Informed guesswork, however, led to the thesis that the unknown language might b e Semitic—the immediate an cestor of Hebrew a nd Arabic. That t heory pr oved v alid, and it soon became possible to decipher the texts owing to the regularity of their divergences from Hebrew.

While some of the texts dealt with such business matters as the lading of ships and the like, by far the majority of them proved to ber eligious texts that bore directly on the ancient beliefs of Phoenicia and Canaan. Specifically, they are concerned with the annual death and resurrection of the fertility god Baal, as these events were celebrated in a n a utumn festival that featured weeping over his death and laughter over his resurrection and marriage.

Moreover, b ecause of the close proximity of Israelite and Canaanite farmers after the former's invasion of Canaan, and, in some instances the interactions of and similarities in their modes of worship, the R as S hamra texts have i mportant implications for Hebrew Bible scholarship as well as for the study of the history of religious practice. Principal a mong these are: (1) the question of the degree of influence that native fertility religions h ad on the c onquering H ebrews' u nderstanding of the nature of Yahweh; (2) the form that such influence to ok; and (3) the long-term impact, if a ny, of s uch mutual d evelopment of religious id eas as may have ta ken pl ace a mong Hebrew and Canaanite farmers.

What ever dse they do, the Ras Shamra texts make clear that the Hebr ew Bi bl e did not develop in a textual vacuum. The religion of the ancient Hebrews i nteracted with those of ot hers in the course of their travels and those of their neighboring peoples.

Republic, The Plato (ca. 411 or 410 B.C.E.)

Described b y t he 2 0th-century Br itish w riter Aldous Huxley as "a noble philosophical romance," the 10 books of Pl at o's \overline{A} *e Republic* cover education, e thics, p olitics, religion, and s ociology, among o ther subjects. about justice. In that context, the work provides a m odel f or t hinking a bout p olitical s ystems rather than, as has sometimes been proposed, a blueprint for an ideal state. While Plato seriously examines the subjects that \overline{A} e Republic covers, and while careful readers can derive much intellectual p rofit a s w ell as p leasure f rom its pages, those readers must always bear in mind that they have before them a work of sometimes playful a nd s atirical fiction. The d ate a scribed above gives that which is sometimes proposed for the fictive conversations that o ccur in \overline{A} e Republic. The ac tual d ate o f c omposition i s uncertain.

Book 1

The story opens as Socr at es and his companion, Glaucon, are about to leave a religious festival in the port city of Piraeus and return home to Athens. The servant of their friend Polemarchus asks them to wait for his master, who is coming along behind t hem. C atching u p, P olemarchus p ersuades his friends to jo in him for dinner and to see t he e vening f estivities. They a ccept, a nd a t Polemarchus's home they encounter the virtuous, aged, a nd w ise C ephalus, w ith w hom So crates discusses a variety of to pics. A mong t hese, we learn of Cephalus's relief at no longer feeling driven by sexual appetite. Cephalus says that old age is not as great a burden for persons of a temperate and cheerful disposition. He a lso pr aises l iving justly and piously with one's spouse and suggests that th e c hief b enefit o f c omfortable w ealth i s being able to d eal fairly with the gods and with other people.

Cephalus departs, and Socrates engages Polemarchus in a discussion of the concept of justice. Plato o ffers a s a s tarting p oint t he t raditional Greek v iew of j ustice: I t is t hat wh ich b enefits friends and h arms en emies. S ocrates, f ollowing his us ual (and often te dious) method of leading his companion to change his mind or broaden his viewpoint, makes a series of assertions with which his friend agrees, finally leading him into a logical trap. In this case, Socrates suggests that if one sticks to the above definition of justice, one must admit that justice so conceived amounts to a kind of s tealing. S tep by s tep, S ocrates l eads P olemarchus to ad mit: "In no c ase is it just to harm anyone." A s a n egative c haracteristic, h owever, that a ssertion will not s erve a s a de finition o f justice.

Blaming Socrates for his tactics, another character, Thrasymachus, defines ju stice as "t he advantage of the stronger." He is extremely belligerent and rude to Socrates, who nonetheless leads him to admit that holding public office is an onerous t ask s ince t he le aders a re w orking f or t he advantage of the led and are paid for their labor. Socrates finally drags the cantankerous and reluctant Thrasymachus to the conclusion that "justice is wisdom and virtue." Having soothed the savage Thrasymachus, So crates closes t he first book o f \overline{A} e Republic by observing that, since the subject changed i n mid-discussion, he r emains u nsure about wha t " the j ust" i s. M oreover, he finds it unclear whether or not "the just" is a virtue or its possessor happy.

Book 2

In Bo ok 2, Thrasymachus h as r etired fr om t he argument, but Glaucon, who is also present, seeks further d iscussion. H e w ants t o h ear Socrates praise justice unequivocally. To provoke the philosopher to do so, Glaucon is willing to try doing the same thing for injustice. After a leng thy discourse of the advantages of injustice to the unjust, Glaucon wonders what possible use anyone with "resources o f m ind, m oney, body, o r family" would have for justice. Socrates guides the discussion from the consideration of justice as an attribute of an individual to a quality associated with city-states so that the quality of justice may appear in a broader context.

The origin of cities arises from the insufficiency of the individual to provide for all needs, as the discussants all a gree. A c ertain n umber of p ersons with different but complementary skills are minimally required to c onstitute a city. Having achieved t he r equisite m inimum, w here i n o ur

hypothetical city, a sks Socrates, a re justice a nd injustice to be found? Deferring an answer to this question, the debaters consider that the city grows wealthier and enlarges, eventually needing a bigger agricultural base to feed its citizens and bringing it into competition for farmland with one or more neighboring cities. The resultant disagreements lead to the need for an army and, in turn, to the need for a rmament and training. For the entire city and army, a leader whom Plato calls a guardian is also needed-someone at once spirited, br ave, forc eful, k ind, f riendly, c onsiderate, and a lover of wisdom. This leads into a discussion of the sort of education that might produce such a leader. Socrates thinks that a good education will be largely devoid of the sort of myths that poets t ell about punitive d eities a nd t hat attribute such human qualities as anger and lust to the gods. Socrates would banish from the city poets who tell such tales; children should instead hear stories of virtue.

As for the qualities of God, they are all good, and God is the cause of good only. Socrates advises that we must look elsewhere for the wellsprings of evil, and he d ismisses the old story that Zeus has two jars—one of good fortune and one of ill beside his throne. On the human beings Zeus dislikes, he pours ill fortune; on those he favors, he pours half and half. Not so, argues Socrates. No poet must be allowed to impute to a god the origins of evil, nor any falsehood. As Book 2 en ds, the grounds for a definition of justice dimly begin to take shape in Socrates' discussion of the nature of deity.

Book 3

As we learn early in Book 3, poets' passages that characterize t he a fterlife of s ouls in t he u nderworld will also be deleted from the education of children in Socrates' hypothetical city. Free people must be more afraid of slavery than of death. Indeed, the genuinely good person will not consider death a terrible thing.

There follows a consideration of poets' methods of composition and Socrates' general disapproval of m imetic art—where the p oets sp eak their o wn w ords i n t he c haracter o f a p erson speaking—as opposed to descriptive art, where a poet reports what someone else has in fact said. If children imitate only proper and noble examples from an early age, the behaviors they practice will become habitual for them in later life.

A discussion of mimetic art ensues. While it is not limited to theatrical art, both theater and recited poetry of all sorts are implicit in the discourse. Only those poets who imitate exclusively good models will be admitted to the ideal city under discussion. The same restriction applies to musicians and musical instruments, though following t he a rguments i n d etail r equires a close a cquaintance with the metrics of G reek poetry a nd so ng. Su ffice i t to s ay t hat t he speakers distinguish between better and worse rhythms a nd ha rmonies. This co nsideration strikes Socrates and his friends as particularly important owing to the way in which rhythm and harmony s eize u pon t he l istener's i nmost soul.

The sub ject of t he d iscussion has shifted to questions of the education of boys. After music, the most i mportant s ubject is g ymnastics, f or practicing exercises in flexibility will better suit the youth for military training. Diet should also be moderate so t hat h ealth c an b e maintained without r ecourse t o p hysicians a nd t hel aws observed s o t hat t here will b e less n ecessity for judges and sleepy jury men. The discourse naturally progresses to a discussion of physicians and their training and then to judges and their qualifications. A good judge should be an old man who has learned to understand the nature of injustice late in life. While those who are essentially bad can never acquire a knowledge of virtue, the virtuous can come to understand badness as a quality foreign to themselves.

The c onversation d rifts bac k to m usic a nd gymnastics, and all agree that training in both is necessary. Music without gymnastics makes one softer than he should be, and gymnastics unleavened b y m usic ten ds to ma ke o ne b rutal a nd coarse.

574 Republic, The

Having s atisfied t hemselves on the s core of education and upbringing, Socrates and his companions turn their attention to the qualities of the rulers of the ideal city-state. They should be drawn from among the city's elders and have a long history of s erving t he p ublic i nterest. L ikely c andidates s hould be es elected in c hildhood a nd prepared for c ivic responsibility. The le ader should be selected from a mong those who meet the c riteria o utlined. They a lso s hould o wn n o private property and, like the young men of Sparta, must eat at a common mess.

Book 4

As Book 4 begins, one of the group, Adeimantus, objects that the ruling class being described does not s eem ve ry h appy a s t he l aws su ggested c ut them off from the common pleasures of p eople, such as owning lands, houses, and furnishings; giving to the gods and civic causes; entertaining guests; an d s o f orth. S ocrates r eplies th at th e objective is to p rovide for the maximum happiness of the city as a whole rather than for a single class of ci tizen. He t hen g ives a long s eries of examples of the benefits of the well- governed city for all its citizens. Interestingly, progress is not an ideal that he aspires to. (Socrates probably would have objected to labeling as progress the technological c hanges t hat o ur c entury s o ad mires.) Rather, he is interested in conserving the laws of and prescriptions for his ideal state. To this end, he resists innovations in the arrangements for the city's governance. He once again voices his particu ar concern about the insidious effects on character formation produced by innovations in music and poetry.

Once the city has been established in theory, Socrates is almost ready to return to the subject of justice. First, however, he proposes listing the qualities of the city that he and his companions have described. As the city's first quality, he suggests "well-advised." As its second, he p roposes "brave." By bravery, S ocrates m eans s ticking to the founding principles and conserving in the citizens the sense of the dangers that originally led to banning poetry, music, and certain ideas. The third quality Socrates enumerates is sobriety, and the fourth is the quality toward which the entire development of \overline{A} e Re public has b een m oving: justice. Sobriety consists in self-mastery, and all concurt hat the city as d escribed d isplays that quality.

Now, just as it seems the reader is at last on the point of arriving at Socrates' definition of the just, the phi bs other interposes another anterior question. Does the soul contain in itself the forms of well- advisedness, bravery, and sobriety? (Socrates successfully i ntroduces here t he notion of id eal forms with no objection from h is companions.) He leads his friends to ad mit three qualities that compose t he s tructure of t he s oul: t he r ational quality, the appetitive quality, and something he calls high spirit. This last attribute is subject to the rational quality and allied with it. Finally, then, we find t hat the just and honor able actionjustice— is the one that "preserves and helps to produce" a condition of the soul in which a person ha s ac hieved a "self-mastery" t hat le aves a person an integrated whole and that harmonizes the rational, the appetitive, and the high-spirited faculties within the soul. That harmony leads the just i ndividual to seek virtue rather than vice. Excellence is the quality of the truly integrated soul. The forms of evil, says Socrates, are infinite.

Book 5

As Book 5 begins, Socrates, thinking the subject of the city closed, is about to enumerate four general c ategories o f bad ness wh en P olemarchus interrupts h im a nd a sks i nstead t hat S ocrates speak concerning the procreation and rearing of children a nd t he c ommunity o f w omen i n a society.

Socrates holds that precisely the same education should be given to women and to m en. He points out that in terms of qualities of mind and moral capacities, women and men are equal. The central difference is that women bear while men beget. Beyond that, on average, men have greater and women lesser physical strength. Yet both are

equally capable of being, say, physicians or musicians. Just so, there a remembers of b oth s exes equally well suited to govern and fight for the city. So crates a lso r ecommends eugenics-the arranged mating of the best- suited partners, and the continuing attempt to i mprove the breed by also all owing some of the best to c ohabit with some of t he w orst. The n umbers of c hildren allowed will also be managed to keep the population of the city at approximately its original numbers. P arents will c all a ll c hildren b orn i n t he cohort of their own child either "son" or "daughter." The c hildren, l ikewise, w ill c onsider o ne another b rothers a nd sisters. The c ity i s " best ordered" in which the greatest number of citizens call the same things "mine" and "not mine." A signal advantage of t his system a rises from the reduction in the number of lawsuits.

The d iscussion n ext t urns to t he c onduct of war. B oth m en a nd w omen w ill fight, an d t he sturdiest children will be brought to observe the fighting from horse backso that they know what will be expected of them when the time comes. The b ook c oncludes b y de scribing o pinion a s a kind of mean between ignorance and knowledge and preferring knowledge to opinion.

Book 6

Book 6 effectively begins with a definition of the term phi bs o phrs as "those who are capable of apprehending t hose t hings t hat a re e ternal a nd unchanging." After de tailing t he c onstituent attributes of such apprehension, Socrates asks if his friends would not want persons with the qualities of phi los o phes to be the rulers of their hypothetical city. All a gree that they would, except that A deimantus notes t hat mo st persons who linger too long in the study of philosophy become, in the translation of Paul Shorey, "cranks [and] rascals." So crates r eplies with a pa rable w hose essential point is that the labels Adeimantus has applied to p hilosophers come from persons who are i gnorant of their pursuits, not to s ay their worth. The philosopher takes the opportunity to argue the degeneracy of the majority from whom such lo w o pinions o f p hilosophers t ake t heir origin. Philosophy-the lo ve of k nowledge or wisdom-is an i mpossibility fo r m ost people. Moreover, the bad opinion that many hold of philosophy a rises f rom t he p ronouncements a nd behavior of those-probably the majority-who practice the art of philosophy unworthily. Socrates insists that few if a ny have ever seen a v irtuous city ruled by a person "equilibrated" and "assimilated" perfectly to virtue. Granting that very few will meet his criteria, Socrates lists the qualifications for a philosopher who would govern a city: "facility in learning, memory, sagacity, quickness of appre hension, yout hful s pirit, m agnificence of soul . . . and a d isposition to l ive [an] orderly, quiet, ... stable [life]."

Socrates now turns to a consideration of the good-the concept underlying the positive attributes up on which he has constructed his model city- state. The good is p erceptible by r eason a s the vi sible i s p erceptible to v ision. F rom t his observation, Socrates moves on to describe a section of the visible world, its images. By images, Socrates m eans p henomena l ike shad ows a nd reflections. N ext h e d iscusses t he ob jects t hat produce such images: animals, plants, and manufactured th ings. Socrates suggests t hat t hose image-producing-objects, in cluding an imals, plants, and manufactured things as people per ceive them are not themselves realities. They are merely the shadows and reflections of the deeper reality that is imperceptible to human senses. The nature of that underlying reality is ideal. Social reality is perceptible to mathematical reasoning or dialectical analysis, but not its human senses. Socrates ends Book 6 by instructing his listeners to a ssume four c apacities or "affections" in the soul: i ntellection, o r r easoning; understanding; belief; and "picture thinking or conjecture."

Book 7

Book 7 of \overline{A} *e Republic* contains its most celebrated passage—the famous allegory of Plato's cave. "Picture men," Socrates begins, living in a subterranean cave. It has a lo ng entrance that ad mits

576 Republic, The

light. The men, however, wear leg and neck chains and can look only in one direction, away from the entrance of the cave. B ehind them and between the people and the cave's entrance a fire burns. Between the fire and the prisoners is a circular road a round w hich people carry i mages of a ll sorts of things: people, animals, and objects. The prisoners have never seen anything but the shadows of those objects, and when the carriers utter sounds, the prisoners think the shadows they see make the noises.

Socrates then imagines that one of the prisoners e scapes a nd lo oks to ward t he pa inful l ight behind him. Though he can dimly perceive the objects c arried, he p refers t he shado ws of t hem that h e h as k nown a ll h is l ife. F inally d ragged outside into the sunlight, he sees for the first time examples of t he or iginal p eople, a nimals, a nd objects. At first he has trouble believing what he sees, but by stages he comes to realize that his former companions had been looking upon nothing more t han shadows o f i mages of reality. The escapee might be an xious to share what he has learned about the nature of reality with his former c omrades, b ut S ocrates p redicts t hat t hey would not believe him and, indeed, would try to kill him for denying the evidence of their senses.

Socrates i nterprets hi s o wn a llegory. W hat human beings perceive in the physical universe is mediated by the operation of their sensory apparatus; t hus, they a re s eeing i mages r ather th an absolute reality. To clarify with a current example, when one, for instance, to uches a t abletop, the senses convey color, immobility, and solidity. At the atomic level, however, science tells us that the seeming solid is more emptiness than matter and its apparent immobility a swirl of atoms. So Socrates' prisoners see i mages of i mages of the real. R epresentatives of t hat re ality, S ocrates insists, exist beyond the range of human sensory perception as ideas. So reality in the allegory of the cave is trichotomous: the shadows on the wall are reflections of i mages a nalogous to the d ata that our sight, hearing, touch, taste, smell, and temperature perception convey to our brains. The images being carried a bout a relike the objects that give rise to our perceptions of them. Those objects, in turn, take their being from ideal forms of them that exist—and, for S ocrates and P lato, *really do exist*—as ideas on a plane accessible only to intellection.

True philosophers, Socrates goes on to argue, have m inds a ble to c ontemplate t he r ealm o f ideas—a realm much more gripping and exciting that the realm of ordinary affairs. This capacity, however, a lso qualifies philoso phers better t han ordinary men to rule the hypothetical city-state, for they understand the essential nature of truth. Thus, they owe it to their fellows to use their special capacities to improve everyone's lot.

There now follows a leng thy debate about the utility of s uch studies a s g eometry, a stronomy, harmony i n m usic, a nd, p rincipally, d ialectics. The ultimate benefit of such studies, says Socrates, is that they prepare their students for eventually understanding the true and the good, which, a s we shall learn, are both also one with the beautiful. The balance of B ook 7 t urns once a gain to the e ducation of c hildren a nd t he p reparation necessary to equip them as philosopher kings.

Book 8

Book 8 begins with a welcome recapitulation of the attributes of the ideal city- state thus far agreed upon. There must be a community of wives and children in the fashion described above, all education and all employments will be the same for both sexes, and the government will establish the living arrangements. Socrates now turns his attention to investigating the various sorts of social or ga nization that typify states. His friends agree with him that there must be as many forms of government a s t here a re pa tterns o f i ndividual souls. All agree that there are five such patterns. The first is government by aristocracy—by people who are both just and good. The next is government by t hose who a re contentious a nd de sire honor. The government of Sparta is an example of this sort, and Socrates dubs such a polity a timocracy. As the third form of government, Socrates names ol igarchy, w here a f ew w ealthy p ersons govern t he s tate. Then t here i s t he dem ocratic form of gove rnment w here t he majority of c itizens, w hatever their qualifications, r ule. Finally, there i s tyr anny, w here a si ngle ruler—often of dubious c haracter a nd ability—directs t he government.

There follows a detailed discussion of eugenics and the consequences for the rule of the state of certain combinations of ability and personality types that Socrates characterizes as golden, silver, bronze, and iron. He predicts that the more the citizens pursue wealth and the more the wealthy are honored, the less citizens will prize virtue, and oligarchy will surely arise. Tyranny will take no he ed of the r ational p rinciple a nd w ill n ot prize high- piritedness. Democracy and the democratic personality indulge in the pleasures and the interests of the moment, says Socrates, and meander on an essentially directionless course thinking that it constitutes an existence of "pleasure, freedom, and happiness." He considers that democracy is the root from which tyranny springs, and that most d emocracies b ecome d e f acto ol igarchies, since it is the moneyed class from which the rulers spring, and their followers tolerate no dissent. Socrates calls the capitalistic class "the pasture of the drones." In general, the accuracy with which Socrates p redicts t he d evelopment of oligarchy and t yranny f rom dem ocracies w ould s eem uncanny if he had not had a detailed and instructive model of such developments in the history of his own city of Athens. Moreover, he thinks, tragic poets are complicit in such developments since they put the spin on tyrants' activities that win public a pproval for tyrannical leaders. He compares tyrants to parricides who destroy the father that bred them.

Book 9

In Book 9, Socrates examines the character and development of the tyrannical man. He concludes that the tyrant has "the soul of madness for h is bodyguard" a nd considers h imself the r uler of both men and gods. The truth of the matter, however, is that tyrants are always either masters or slaves a nd n ever e xperience e ither fr eedom o r friendship. There is no city "more wretched" than one governed by a tyrant, and none happier than one governed by a "true king."

Socrates d ivides s uccessful peo ple i nto t hree categories: lovers of gain, lovers of wisdom, a nd lovers o f ho nor. A ll t hree s orts en joy ho nor because of their reputation, but only the lover of wisdom can taste the happiness that follows from the contemplation of "true being" and of "reality." Moreover, true philosophers let all the faculties of their s ouls b e g uided b y t he wisdom-loving part of it. In doing so, the philos opher experiences a g reater m easure of pleasure a nd of t rue happiness. The city ruled by such persons exists nowhere but is none theless an ideal worth striving toward.

Book 10

In Book 10, Socrates returns once more to a biting criticism of the mimetic a rts, pa rticularly d ramatic poetry and the dangers that poets present to the ideal state. He suggests that God made only a single original for everything that is in nature or of everything that people fabricate. The mimetic a rts, ho wever, l ike p ainting and p oetry, have the capacity to fashion i deas t hat do n ot correspond to the god-given originals but which boast powerful and attractive rhythms and music and thus have the capacity to mislead people. Socrates considers Homer a " creator of phantoms." Nothing Homer ever did contributed anything to the well- being of any city-state. The arts, in so far as they represent truth at a ll, do so at third and fourth hand. So poetry must be banished—with the caveat that if anyone can, by clear argument, prove that poetry provides not only pleasure but benefit, the door is open for poetry's return to the city.

There follows a d iscourse on the immortality of the soul and its susceptibility to mutilation by evil. On the other hand, justice itself is the best remedy for keeping the soul in good condition. The g ods, s ays S ocrates, w ill n ever n eglect the man who is both just and righteous. To illustrate

578 Rerum Gestarum

this point, the sage tells the story of Er, a Pa mphilian who was killed in battle, discovered undecayed after 10 days, and laid upon a funeral pyre on the 12th day after his death. There, however, he recovered h is life, and he r eported to h is fellow countrymen what had happened to him while he was dead. He was taken to a pl ace of judgment where righteous ones were told to turn right and journey u pward, w hile t he u nrighteous were made to turn left and descend. Both wore tokens of their earthly e xistences. W hen E r, ho wever, came to the place of judgment, he was appointed the messenger to mankind of what would happen after death.

Er saw squalid, dusty s ouls c oming u p from below a nd c lean, p ure s ouls de scending f rom above. They met their a rriving friends, the ones from below, with wailing and lamentation, saying they had just spent 1,000 years of torment. (The sentence is 1,000 years per offense.) The ones from above greeted their arriving friends with tales of the pleasures a nd wonders above. (It seems that Plato is not utterly opposed to playing the role of the poet.) Socrates details the p unishments a nd sentences endured by t he si nful souls. Tyrants, especially, su ffer h orrible tor ments b eing flayed and h aving th eir s kinned b odies " carded" o n thorns.

The ble ssed, on t he o ther hand, e xperience delights for a t ime and then must choose a n ew life—often o ne i nvolving suffering—into which to b e re born. Er r eports se eing t he s oul o f Or pheus choosing to be reborn as a swan because women had killed him, and he did not wish to be born from a woman. Beyond that, beasts become humans and humans beasts. Then all those to be reborn appear before the Fates, and when everyone's next life has been woven into the tapestry of inescapable destiny, the souls pass the Plain of Oblivion and, thirsty from its searing heat, drink from th e R iver of For getfulness. Er was not allowed to drink and s o c arried h is message to mankind.

From that tale, Socrates draws the final moral of \overline{A} *e Republic*. The soul is immortal and capable of undergoing every extreme of good and of evil.

It is therefore to people's benefit to p reserve the soul unsullied by the world so that both here and in the hereafter, all will be well.

rhapsodes (rhapsodists)

In a ncient G reece, a p rofessional en tertainer who r ecited e pic p oems o r p ortions o f e pics came to be known as a rhapsode, or song weaver. At first the word *rhapsode* applied to bards who recited work s o f t heir o wn c omposition. rhetoric

Pl at o and Socr at es shared the view that rhetoric made possible practicing the wisdom gained through philosophical activity. Rhetoric for them was a means to that end. For the Greek Sophists the purpose of rhe toric was political control of the state though the persuasion of the masses or was convincing j urors of the correctness of a speaker's point of view.

The Roman educator Quint il ia n put rhetoric at the c enter of h is instructional program as he examined the n exus b etween truth itself and its expression i n w ords. He i nterested h imself i n rhetoric as the means for preserving truth when speaking to audiences with differing intellectual capacities and educational backgrounds.

As r hetoric d eveloped in t he Greco- Roman world du ring t he p eriod k nown a s t he S econd Sophistic, a bout t he b eginning of t he C ommon Era, rhetoric's role became that of an adjunct to artistic creation, and its practitioners often a chieved t he c elebrity of o ur c ontemporary p opular actors a nd m usicians. The app eal of rhe toric might be based on *ethos*—that is, on the character of the speaker—on *logos*—logic or re ason or on *pathos*—on emotion.

Rig-Veda (Rig Veda) (ca. 1000 B.C.E.)

A collection of 1028 Vedic hymns in the Sanskrit language, the Rig-Veda—or at least some of it-probably dates to very ancient, preliterate times in India. It is acknowledged as the most ancient authority on Hindu social and religious matters. The subjects and themes of the hymns cover a wide spectrum of subjects and purposes. Some of them are addressed to such gods and goddesses of t he H indu pa ntheon a s A gni, Indra, and Vishnu, or to sun gods and weather gods. Others deal with cosmology; they sing of the creation. Some of them address the mysterious unknown god who preceded all the named gods of t he pantheon-the uncreated progenitor of being, or the golden embryo that, from nothing, c ame into b eing. O thers a ddress t he mysterious creation of lesser deities and provide sometimes-conflicting e xplanatory m yths for their genesis.

The hymns also sing of the origins of sacred or liturgical l anguage and o f i ts c onnection w ith worship, a lmsgiving, the c onsecration o f r ulers, and sacrifice. One such set of hymns concerns the preparation for and then the sacrifice of a horse. This set a lso contains a r equiem h ymn f or t he horse as sacrificial victim.

Within t he v ast c ollection, o ne a lso finds hymns that function as magic charms and spells. One finds hymns designed to protect the singer (in this case female) against rival wives. Hymns appear that are sung to assure a safe pregnancy, the well-being of an embryo, a nd suc cessful birth. O ther h ymns i nvoke o r p rotect a gainst demons, a ssure r estful s leep, a nd w ard off bad dreams.

Some of the Rig-Veda's hymns retell portions of f amiliar my ths t hat a lso app ear n ot o nly i n

such Hindu epics as the *Mahabhar at a* but also, in c ognate f orm, in p arallel myths i n ancient Greece a nd el sewhere. On e such s et o f h ymns involves the sky god Varuna, a god parallel with Uranus i n the Greco-Roman pa ntheon. I n t he Rig-Veda, hymns to Varuna picture him as concerned with the architecture of the universe and in his r ole a s t he m onitor o f h uman b ehavior. Some o f t he h ymns a re de signed to p ropitiate Varuna's w rath w hen h uman beings fail to m eet divine expectations.

Several h ymns s pecifically address-from a masculine viewpoint-the ac tivities o f w omen and matters of concern to them. Such hymns fall into two categories: conversation hymns and narrative hymns. In the former category, one member of a pair of lovers attempts to persuade the other to join him or her in some sort of sexual behavior. The lo vers a re r epresented a s b oth m ortal a nd immortal. Sometimes the attempts at persuasion succeed, and sometimes they fail, but there is a pattern to the successes and failures. Mortal men and w omen a nd i mmortal m en a nd h uman women always couple; mortal men and immortal females, however, never do. In the latter category, the narrative hymns, the subjects of marriage and rejection predominate.

The processing and effects of a certain hallucinogenic pl ant c alled Soma—treated i n t he R ig-Veda as a m ale deity—is a lso t he subject of a category of t he c ollection's h ymns. The h ymns describe how s tones are u sed as pestles to p ress the plant in wooden bowls and the resultant fiber filtered t hrough w ool to produce a n i ngestible substance. O ther h ymns de tail t he heig htened awareness, t rances, a ssurances o f i mmortality, and h allucinations that taking Soma produces. One hymn details the god Soma's arrival on earth from heaven.

A number of the hymns in the Rig-Veda concern themselves with death. As a principal translator of the Rig-Veda's hymns, W endy D oniger O'Flaherty, points out in her discussion of representative se lections, s uch h ymns ab out d eath provide glimpses into ancient Vedic customs and beliefs. Both cremation and burial, for instance, were pr acticed. A fter de ath, e xpectations f or what would happen next included reincarnation, going t o he aven, a sp irit's m oving i nto a n ew body, r esuscitation of the c urrent b ody, a nd a return of the body to its constituent elements.

As for the company that the disembodied spirit of a dead person might keep, it en compassed various gods, including Yama, god of the underworld; a ncestors a nd r elations; m other e arth; those who mourn; and death personified. Generally s peaking, a s depicted i n t he h ymns of the Rig- Veda, though death provokes grief, it is n ot fearsome and promises reunion with friends and family who have gone before.

Rosetta Stone

Until the very end of the 18th century, Egyptian hier og l yphs presented scholars with an undecipherable m ystery. The most recent d atable hieroglyphs had been carved in 394 c.e. A series of historical events that included conquest and foreign domination (Cleopatra was a Greek—not of African lineage); linguistic change; the development of i ncreasingly s tylized s horthand for noting the ever-changing Egyptian to ngue; the loss of the ability, even a mong scribes, to understand the hieroglyphs; and the notion that hieroglyphs were m ystic s igns r ather t han wr itten language had at last rendered hieroglyphs utterly incomprehensible.

Then, toward the end of Napoleon's Egyptian campaign in 1799, at the Egyptian town of Rosetta (Rashid) on one of the mouths of the Nile River, French s oldiers d iscovered a bl ack, ba salt t ablet into which were in scribed three t exts. The to pmost text—severely damaged—contained E gyptian h ieroglyphs. The i ntact c entral te xt w as inscribed in Egyptian demotic cursive. This was, as h as b een s ubsequently p roved, a k ind of shorthand for t he h ieroglyphs. The lo wer te xt gave a Greek translation of the Egyptian demotic inscriptions.

The texts slowly began to r eveal their secrets to a pa ir of talented linguists, Thomas Young of En gland (1773–1829), a nd Je an François Champollion of France (1790–1832). Significant among them was the fact, formerly u nrecognized, that some of the hieroglyphs had phonetic value. Such names as Cleopatra, Ptolemy, and Ramesses [sic] were among the first hieroglyphic words that the researchers read.

Young d ied i n 1829, a nd C hampollion d ied three years later without having unlocked all the secrets of t he s tone. Their suc cessors, ho wever, Richard Lepsius (1810–1884) and Edward Hincks, (1792–1866) r espectively discovered that the hieroglyphs could represent more than one consonant, a nd t hat t he h ieroglyphs, l ike e arly Hebrew writing, contained no vowels. The main secrets o f Eg yptian hieroglyphs were finally deciphered.

The text of the stone contains a de cree of the pharaoh Ptolemy V. The three scripts describe the repeal of c ertain t axes a nd give i nstructions for the installation of statues in various temples.

Rutilius, Claudius Numantianus (fl. fifth

century C.E.) *Roman-Gallic poet* Born i n Ga ul, p robably a t T oulouse, C laudius Numantianus R utilius enjoyed Ro man c itizenship and served in Rome as master of the offices and prefect of the city under the emperor Honorius. Rutilius's native estates in Gaul seem to have been d amaged b y t ribal u prisings, a nd ma tters there required his attention. He retired from public life, and as he voyaged home along the Mediterranean coast, Rutilius composed two books of elegiac verse. Later editors have entitled Rutilius's work *Itinerary (Itinerarium)* or *About His Homecoming (De reditu suo)*.

Much of R utilius's p oem i s l ost, b ut the parts that remain suggest that he was very accomplished as a poet. A master of the technicalities of his art, he also displayed verve and originality. The 18thcentury British historian Edward Gibbon approved

Rutilius, Claudius Numantianus 581

of Rutilius's unflattering depiction of a colony of Christian monks at Capraria and of the poet's evident attachment for the old paganism. If Rutilius was not himself a pa gan, at least he ad mired the old Roman gods as an intrinsic feature of a Rome whose i nstitutions and history he loved. In the surviving portions of the poem, there are invectives against Stilicho—the Western Roman emperor who had destroyed the books that preserved the prophetic ut terances of the Sibylline oracle—and against the Jews. The Romans sometimes did not discriminate between Jews and Christians, even as late as the fifth century.

S

Sallust (Caius Sallustius Crispus) (86–35 B.C.E.) *Roman historian*

Sallust wa s b orn a bout 5 5 m iles n ortheast o f Rome at Amiternum, probably to a plebian family, and acquired a good Roman education.

He e ntered R oman politics at a n e arly a ge. Indications are that became a *quaestor*, one of 20 m inor civil m agistrates w ho a utomatically became members of the Roman senate by virtue of their office. In 52 b.c.e. he certainly became tribune of the commons. In that office, he joined his two tribunal colleagues i n their opposition to Cicero and other adherents of the preservation of t he R oman r epublic. T wo y ears l ater, however, Sallust was expelled from the senate on partisan, trumped- up charges. In the days preceding the Roman civil wars, he aligned himself with the party of Jul ius Ca esar against that of Pompey.

In 4 9 b.c.e., Caesar r estored Sallust as a quaestor and senator and subsequently made him the commander of a legion. In his first two military ass ignments, S allust m et w ith i ll suc cess. Octavius and Libo defeated him in Illyricum, and when he was sent to quell a mutiny in Campania, he na rrowly escaped the mutineers with his life. In 48, nonetheless, having now risen to the office of praetor—a m ilitary office in Caesar's timeSallust s uccessfully commandeered the supplies that C aesar's opponent, Pompey, had s tored on the island of Circina. This action played a significant role in Caesar's ultimate success.

In r ecognition of h is s ervices, S allust w as appointed the military governor of the Roman province of Numidia and Africa. It seems likely that h e t ook th at o pportunity t o e nrich himself—a n ot u nusual ob jective f or Ro man provincial governors. On his return to Rome, he was t ried for e xtortion, b ut a s a n ad herent of Caesar, he was duly acquitted. He built a ma gnificent pleasure garden in Rome, the *Horti Sallustiani*. A fter his death, the land passed into imperial ownership.

Following Caesar's assassination, Sallust retired from public life. He is said to have married Terentia, C icero's di vorced w ife. App arently c hildless himself, he adopted his sister's grandson.

From the time of his retirement, Sallust devoted himself to writing historical monographs. He took as models for his historiography the examples of Thucydides and the *Or igines* of Cato the Elder. H e made a happy de parture f rom t heir annalistic mode of or ga ni za ton, however. Instead of plodding along year by year, he introduced sustained n arrative, f ollowing a c ourse o f e vents from beginning to end without interruption. Sallust's first subject was the war against Catiline, *Bellum Catilinae*. Catiline was a senator and frustrated p atrician w ho a spired to u surp t he republic. This monograph is apparently as much of a Caesarian propaganda piece as a history. Sallust prolongs the action by more than a year, and a concern for vividness and reader interest replace historical objectivity. As a literary production, however, Sallust's first effort was a great success. His depiction of c haracter a nd the sp eeches that he puts in the mouths of h is actors on the stage of history are especially compelling.

Sallust's se cond w ork, $\overline{A} \ e \ J$ ugurthine W ar, traces Rome's war against the N umidian r uler, Jugurtha. Sallust says that he selected it for its populist i mplications. The w ork i s c arefully researched, making use of both Latin and Punic language sources. Sallust's translator, J. C. Rol fe suggests that the book works better as a historical novel t han a s "sober h istory." For i nstance, S allust is willing to shift the actual sequence of events to tell a better tale.

Mostly l ost n ow is Sa llust's ma sterwork, h is *Historiae* (\overline{A} *e Histories*). Written in five books, it focuses on t he e vents t hat o ccurred i n R ome between 78 and 67 b.c.e. Ever loyal to his plebeian origins, S allust's principal propagandistic objectives in this work were, first, to show the ineptitude of t he noble classes for r uling t he Ro man republic, a nd, second, t o s how Pompey's u nfitness to serve as chief of state. Only disconnected fragments of this work remain.

As a stylist, Sallust imitates Thycydides' brevity of expression. In his manner of expression, he prefers archaic language—a preference that endeared him to linguistic antiquarians in his own time.

Beyond the works listed above, others of doubtful attribution have s ometimes b een a ssigned to Sallust. U nlikely to be his, for e xample, i s t he *Invective against Cicero*.

Sappho (Psappho) (b. ca 650 B.C.E.) *Greek lyric poet*

Probably the daughter of a woman named Cleis, Sappho was born on the Mediterranean island of Lesbos, perhaps in the town of Eresus. She almost certainly spent time in the island's principal town of M ytilene. S he had b rothers, o ne o f w hom, named C haraxus, she c hided f or b ecoming involved with an Egyptian courtesan. As an adult, she ma rried a nd b ore a d aughter na med Cleis. According t o s ome, S appho's h usband and the father of Cleis was a man na med Cercylas from Andros. A s the s cholar Ma rgaret Re ynolds tel ls us, h owever, t his name means "P rick from th e Island of Man," and so Cercylas may be the invention of later ribald tellers and dramatizers of the Sappho story.

It also seems that Sappho spent some time as an exile on the island of Sicily. This suggests that she played an actively subversive role in the politics of her homeland. It is likely, too, that she was a te acher a nd n umbered a mong her s tudents young women with literary aspirations. Several of their names and those of other female associates and of a rival are preserved in her verse: Andromeda (the r ival), A tthis, E rinna, C limene, D ica, Gorgo, Mi ka (g irls s he a dmired o r celebrated), and others. The names of contemporary male figures also appear.

Because a c onsiderable n umber of S appho's surviving love lyrics address women, literary tradition has appropriately conscripted her i nto the role of an archetypal lesbian—a name, of course,

584 Sappho

derived from that of the island of her birth. Stories about her death, though perhaps true, seem more consistent with the ongoing fictive embroidery that has for centuries been stitched onto the much simpler fabric of what c an c onfidently b e said a bout the historic S appho. She c ommitted suicide, s o t he s tory goes, when she c ast her self from the white cliffs of a n i sland in the Ionian Sea. Then called Leucadia or Leucas, the island is t oday labeled a s St . Ma ura. S appho's selfdestruction is s aid to have r esulted from h er despair at her u nrequited passion for Phaon-a name also applied to the demigod Adonis and to an ag ed f erryman w hose y outh Aph rodite restored. All this suggests at least a conflation of real and mythical stories.

As if t his high degree of uncertainty were insufficient, more follows. It is unclear that Sappho he rself could have written down a ny of her own works. Her composition stands on the very cusp of her native island's development of a script for representing her Ae olic dialect of the Greek language. F ragmentary r emains of s ome of he r verse, however, seem to suggest at least a nascent tradition of writing. Almost surely, like the preliterate poets and bards who preceded her, she sang her compositions while accompanying herself on a stringed instrument such as a lyre or harp. Probably her disciples then memorized her work, performed it, a ndt aught it to o thers. The s ame method of dissemination had c haracterized the epics of Homer composed 200 years before Sappho's time.

Nothing that Sappho wrote has come down to us d irectly. N onetheless, by 1 50 y ears a fter h er death, a n ac tive t rade had de veloped i n ma nuscripts, and much from Sappho was successfully transferred fr om the o r al f ormul aic t r aditi on to the written one. In ancient times, members of the A cademic sect of phil osophy are thought to have edited her then- surviving poems into nine volumes. Owing partly to a change in literary taste, partly to the marginalization of the Aeolic i n w hich s he c omposed, and p artly to Christian disapproval of Sappho's pagan, lesbian, and bisexual material, many of these works were lost. A s t astes shifted and her language became obsolete, fewer copies of her poems were made. Some old copies were torn into strips and recycled for the funeral trade as mummy wrappings. Others were destroyed-the victims of Christian zeal. Zealots were p robably responsible for bu rning Pharaoh P tolemy I's 600-year-old library of classical ma nuscripts a t A lexandria i n 3 91 c. e., a s Willis B arnstone tel ls u s. P ope Gr egory V II ordered S appho's works burned both in Rome and in Constantinople in 1073, with the result that many irreplaceable manuscripts were committed to the flames. What, if anything, was left in Constantinople probably fell victim to crusader pillaging in 1204 and Ottoman destruction in 1453.

Nonetheless, s ome f ragments o f Sa ppho's verse were pre served i n q uotations m ade f rom her works by ot her writers. That some of these fragments have survived to be transmitted to us at all we owe to the most improbable and fortuitous c ircumstances. I n t he la te 19th century, archeological e xcavations i n a n a ncient t rash heap near the Egyptian town anciently known as O xyrhyn chus a nd to day c alled B ehnasa unearthed an enormous treasure trove of papyrus fragments-many of them a pparently t orn into strips for mummy wrappings-dating from the second to the fifth c enturies c. e. A mid the tens of thousands of bits of rubbish, a previously unknown p oem b y S appho app eared a nd w as painstakingly p ieced t ogether. S ome 6 0-plus volumes of edited material later, the work of organiz ing and deciphering the still-daunting collection o fr emnants g oes f orward. Thus, the possibility of finding more S apphic d ocuments exists. At present, 213 fragments of her work are known.

Thanks to Dionysius of Halicarn assus, in what scholars c ategorize a s F ragment 1 o f S appho's work, we do seem to have a single ode to the goddess Aph rodite pre served in it s entirety (see *Hymn t o Aphrodit e*). Thanks to Longinus, who quoted S appho in his famous essay, *Conginus*, *On the Sublime*, a substantial remnant survives in Fragment 31 (see "I more t han envy h im"). Beyond that, we know Sappho's work as directly as we can principally from snippets of verse.

We a lso k now h er w ork, ho wever, f rom t he reputation t hat it e njoyed a mong t he a ncients who celebrated it, imitated it, and did homage to Sappho's memory. They regarded her, in Pl at o's phrase, as a 10th Muse, and statues were erected to her memory. Across 2,600 years, her voice calls out t o u s, a nd, often u nknowingly, we hear its echoes in the popu ar songs of love longing that continually sound in our ears. Sappho also feelingly explores such issues as the emotional consequences for the odd woman out in a love triangle involving two women and a ma n. Her great and continuing contribution to the vocabulary of lyric poetry is a language of desire.

That, however, is not her only contribution. In Greek, her poems are breathtakingly mellifluous. Her c raftsmanship in melding s ense and s ound knows few e quals in the Western tradition. The best translations of her work succeed in echoing something of her mastery. She also was an innovator of poetic form, developing, for instance, the sapphic stanza (see quantitative verse). Socrates and Pl at o a dmired her, and O vid, Cat ull us, and Horace i mitated her in Latin.

Some of Sa ppho's p oems are epistolary actual v erse l etters. M ost of he r lo ve l yrics a re addressed to women, though perhaps a f ew also address m en. O ther f ragmentary p oems i nvoke the g ods and th e M uses o r c ontain p rayers to Hera or Aph rodite. O thers vent S appho's spleen at the success of a rival, A ndromeda. Still others are epithalamia—wedding hymns—celebrating either the unions of her contemporaries, some of them g irls s he ad mired, o r i magined hi storical weddings s uch a s that of Fragment 68, which describes t he w edding of t he long-dead T rojan prince Hector with Andromache.

In a nother v erse (Fragment 1 02), a sp eaker complains t o h er m other t hat she c annot w ork her loom because the goddess of love has so smitten her with desire for "a slender boy." Still another rehearses a conversation begun by an apparently smitten young man, a p oet named Alkaios, who tries to disguise his desire for "violet-haired" Sappho, who smells to him like honey. Her straightforward re sponse makes c lear t hat she k nows what h e wa nts a nd t hat he w ould do b etter to speak directly.

The poet and translator Paul Roche is a mong the best at conveying the music and delicacy of Sappho's verse in English. In his slender volume entitled \overline{A} e L ove S ongs of S appho, he i ncludes verses, nu mbered 5 5 a nd 1 52, sna tched f rom almost certain oblivion.

Fragment 55 is an epistolary poem addressed "To a Soldier's Wife in Sardis: Anactoria." At one level, it pr aises the effects of military spectacles such as cavalry columns and flotillas of vessels. It contrasts t hat ma rtial d isplay, h owever, w ith a sight that Sappho prefers—the person one loves. Her p erspective is t hat of a w oman i n love, a s Helen w as w hen she de serted her h usband a nd children and home for love of the Trojan prince, Paris.

The po em's add ressee, A nactoria, i s p resumably the soldier's wife who would much rather see her lo ve t han a ll t he pa rades i maginable. Bu t Anactoria i s a lso beloved by S appho, a nd i n a graceful turn, the p oem m oves f rom i mplying Anactoria's feelings for her husband to a sserting Sappho's feeling for Anactoria. The poet imagines her f riend's w alk, her s tyle, t he v ivacity of her facial expression, all of which Sappho had r ather see than "Lydian horse / and glitter of mail."

In fragment 152, "Ah, if my breasts could still give suck," by contrast, the reader or listener perceives the voice of a woman past childbearing. She declares that, were she still capable of bearing a child, she would u nhesitatingly take a nother husband. In a touching ac œp tance of the facts of her sit uation, ho wever, she comments up on he r wrinkled appearance and on the way the god of love avoids her, no longer bringing her "His beautiful pain."

Today, S appho s tudies a re a t hriving industry. The slender remains of the body of her work invite ever- rew readings and interpretations. New images of h er, m oreover, c ontinually e merge a s e ach succeeding epoch reinterprets her sig nificance in a new context. She and her work remain objects of ardent critical attention. Consulting the works in the bibliography below will a fford readers a su ggestion of t he r ange a nd de gree of i nterest t hat Sappho in her various scholarly and popular reincarnations has generated.

satire in Greece and Rome

The Roman o rator and rhe torician Quint il ia n claimed Roman o rigin for the literary genre of satire. The truth in this statement a rises principally from the distinctive form that satire took in Rome. Though such a very early Roman poet as Quintu s Ennius wrote verse that commentators categorized as *saturae*, satire in the later Roman world and in our contemporary sense of that term played a m inor role. Ennius's work re flected the original me aning of the word *satura*—a medley or m ixture t hat might i nclude b oth v erse a nd prose and address a variety of subjects.

The great Roman satirists Hor ace, Per sius, and Juvenal, however, consciously looked back to Ga ius L ucilius a st heir o riginal m odel. Lucilius had written a collection of 30 books of works, no w a lmost totally lost, that he ter med *Sermones*. C omposed i n d actylic h exameter verse (see q uantit ative verse), these r eflections on his own life and the lives of his acquaintances also included passages of invective against the works of certain authors, against the machinations of politicians, and a gainst conspicuous consumption and gluttony.

Horace's *Sati r es* appeared early in his writing career—book 1 in the 35 b.c. e. and book 2 in 31 b.c.e. Among his models we find a Greek prototype, the somewhat elastic literary mode known as the d iatribe. Dia tribes were a ssociated w ith Bion of Scythia (d. 241 b.c.e.) and included written lectures and philosophical discourse, particularly th at o f th e C ynic p hilosophers (see Cynicism). One can also discern in Horace's satire echoes of passages from Greek comedy that poke sometimes- sdacious f un at the objects o f their humor.

Horace's satires, however, grow in their sense of h umanity a nd i n t heir u rbane s ense of p urpose. I f h is e arly s atires r idicule v ice, h is l ater ones r idicule v ice with the object of helping the vicious reform their morals in the light of generally a ccepted s ocial v alues. H is s atire b ecomes conversational, ironic, high- minded, and written in splendid verse. H is a ttitude a nd h is handling in verse of the issues that satire addresses become models for l ater s atirists from h is t ime to o urs, whether those later satirists composed in verse or in prose.

Persius wrote a bit later than Horace and emulated h im while claiming Lucilius as h is model. The angriest of the Roman satirists, Persius did not, as Horace did, make peace with the social norms of his times. He abhorred current taste and remained ut terly c onvinced t hat h is c ontemporary Rome was not just on its way to hell but had already arrived there. The reform of public morals, though it may have been Persius's hope, was not h is expectation. The best the moralist could do, het hought, was withdraw f rom t he u rban scene. Persius was also the most succinct of the Roman satirists and the least concerned with an audience. His total output was less than 700 lines, and he did not at all care whether or not anyone read them.

A c ontemporary u rban Eu ropean o r A merican reading Juvenal might well imagine that she was reading the op-ed pieces in her daily newspaper. Juvenal's early voice in his *Sati r es* approaches the vehemence of Persius but also moderates as time p asses. L icentiousness, g luttony, t he d icey relationships b etween p atrons a nd c lients, t he monstrosity of u nchaste women, t he i mmoral and relentless pursuit of money, and the decline into vicious notoriety of for merly venerated old families—all these are a mong the subjects upon which Juvenal casts his satirical gaze. In the process of doing so, an urbane and nihilistic sense of irony replaces the moral outrage with which the satirist began. Like Horace, however, Juvenal was a first-rate poet, and the manner of his verse is as attractive as its matter is interesting.

Conforming m ore c losely to t he o riginal notion of the medley, the *Sat yr ico n* of Pet r on ius A r bit er i s sometimes recounted in prose and sometimes i n ve rse. U sually, as the t ext r omps through a long menu of sexual misbehavior, gluttony, bad t aste, a nd t he i mplicit e xcoriation o f virtually all the characters of the piece and their vices, i ts a uthorial v oice do es n ot m oralize b ut leaves the readers to draw their own conclusions. From t ime to t ime, ho wever, a jud gment a bout degeneracy does emerge. When a principal character, E ncolpius, a sks the p oet Eu molpus a bout the decadence of the present age, the poet attributes it s de pravity to d rink, deba uchery, t he neglect of learning, and universal greed.

Martial chose still another set of forms for presenting his satires. Although he did not name people, h e d rew cha racter po rtraits o f perso ns who a lso i llustrated t ypes. A mong t he v icious persons and the pretenders pictured in his Epigr ams, we find such sorts as would-be poets, a variety of hypocrites, drunkards, those guilty of many species of sexual misbehavior, and gluttons. He balances such figures-the majority-against a m inority of v irtuous touc hstone c haracters: good judges of poetic worth, truly talented poets, faithful spo uses, a nd r eliable f riends. M ost of Martial's s atiric e pigr a ms a re v ery sho rt, a nd many of them were apparently first written at the request of clients. Martial made a living by writing verses to order.

In Greece, the satiric spirit certainly infused the older comedies of such playwrights as Ar is-

to phanes. Aristophanes would sometimes mount direct satirical attacks on contemporary persons, as he did in his comedy A e Knights. There Aristophanes s kewered t he A thenian p olitician an d demagogue Cleon, picturing him as an embezzler of pu blic funds. The pl aywright a lso ma kes Soc r at es a figure of ridicule in A e Clo uds, picturing the revered thinker and debater as a c orrupt an d in effectual m isleader of h is s tudents. Ridiculing a whole c ategory of p eople, i n \overline{A} e Wasps, Aristophanes p okes f un a t el derly m en who will go to a lmost a ny extreme to s erve on juries. Lysist r at a seriously satirizes the propensity of men to make war and lightheartedly pokes fun a t th e s exual app etites o f b oth m en a nd women. O ne c an p rovide n umerous e xamples from the Greek Old Comedy where satiric mockery was a standard part of the repertoire both of folk festival and dramatic competition (see comedy in Greece and Rome).

Though little in the way of evidence survives concerning the Greek Middle Comedy, such vestiges as do remain suggest that the sort of personal i nvective th at A ristophanes p racticed i n satirizing Socrates and Cleon disappeared from the public stage. Its place was taken by a generic sort of satire that depended on skewering identifiable types of c haracters. These, in turn, became the stock figures of the New Comedy with which we are principally familiar through Roman playwrights' p ractice of b orrowing i ts plo ts. (Greek versions are almost all lost.) Such figures as the braggart s oldier, t he d runken b ut r esourceful slave, the callow youth, the legacy hunter, and the credulous father became the butts of satirical but usually predictable stage business.

Menippean s atire was a k ind o f v erse s atire written by the early Cynic philosopher Menippus of G adara (fl. third century b.c.e.). Though on ly the titles of a few examples survive, the ancients generally thought that Menippus's work exercised influence on that of the Romans Horace, Seneca, and Varr o.

While the Romans, then, may have perfected the models that posterity has drawn on to inspire the later development of satire, we can see that

588 Satires

the roots of the genre are to be found at least as far back as the Greeks and, given the predisposition of h uman b eings both t o f olly and t o passing judgment, likely further back still.

Satires Horace (Book 1, 35 B.C.E.; Book 2, 31 B.C.E.)

Addressed as a friendly letter to Hor a ce's wealthy patron G aius Mae cenas, *Satires* opens with the famous question *qui fit* (how does it happen that?). First, why are people not satisfied with their situations in life? Why can t hey not make do w ith what they have? Horace praises those who work hard i n y outh a nd m iddle l ife to ac cumulate enough to see them through old age, but he points up in his first sati r e the folly of those who never cease trying to accumulate.

Adulterers a nd t he c onsequences o f t heir behavior become the focus of the second satire of Horace's first book. If one must dally with women, he thinks, prostitutes are a better choice than the seduction o f o thers' w ives. I n t he t hird s atire, Horace appeals for as tolerant an attitude toward the failings of one's friends as o ne t akes to ward one's own.

The f ourth s atire t akes s atire a s i ts sub ject, asserting that the archetype of Roman s atirists, Lucil ius, b orrowed f rom the Old C omedy o f the G reeks e verything but t he meter. H orace defends his own poetic practice and his conversational style. He notes that he does not recite his verses publicly but on ly a mong h is friends, a nd then only when a sked. M oreover, h e i nsists, h is satire is good-natured a nd f ree f rom ma lice; i t does not lurk as judgment in the guise of compliment. The poet confesses that he ha s faults, b ut they are minor, and he judges himself free from major vices. Nonetheless, his minor lapses sometimes become the butt of his humor.

In the succeeding piece, Horace reports on a journey t hat i ncluded a mule-drawn b oat t rip down a canal to visit friends and on the discomfiting and the amusing incidents that occurred along the way. He then announces that he is proud of his heritage as both the son of a manumitted slave (a freedman) and as a former Roman army officer. He is a lso grateful that Virgil and Varr o had both commended h im to Mae cenas as a w orthy object of literary patronage. He outlines the happy, productive, a nd u neventful life that Maecenas's patronage has made possible.

Sometimes H orace re ports quite t rivial i ncidents, suc h a s a qu arrel b etween t wo foultempered fellows in a c ourtroom. S ometimes he adopts the voice of an inanimate object, as when he speaks in the first person of the adventures of a carved idol. He reports a chance encounter with a bore who refuses to be put off.

In the finals atire of h is first book, H orace addresses his critics who apparently have blamed

him for writing satire that is not in the manner of Lucilius, the a rchetypal Ro man s atirist. H orace responds that Lucilius invented the satiric mode in Latin, h aving borrowed so mething from the Greeks b ut a lso having i nvented a n ew Ro man genre. I f Luc ilius were w riting n ow, H orace insists, he would revise what he had written and prune away its imperfections. Good editing is the essence of good writing, and a good writer is satisfied if his work gives pleasure to his readers.

The first satire of Book 2 is cast as a dialogue between H orace and h is c ompanion, the lawyer Trebatius. This satire considers the difficulties that a satirist must face. Horace begins by summarizing the opinions that people hold about his verses: His satire is too harsh, and his poetry lacks liveliness. H e a sks T rebatius what he should do, a nd Trebatius tells him to do n othing, that he should just stop writing. This, however, Horace cannot bring h imself to do . It is h is nature to w rite. In that c ase, T rebatius f ears, H orace w ill n ot l ive long. Trebatius advises Horace to be careful not to wander into difficulties with the law because the courts punish those who slander others. Horace asks if the courts will punish well-witten, true statements. T rebatius r eplies t hat i n suc h a c ircumstances, a court will dismiss the suit.

In the second satire of the second book, Horace gives a predinner lecture to a company of gentlemen on the virtues of the simple life. He begins by pointing out that simple fare is as healthful as delicacies and that chicken tastes the same as peacock. O verindulgence a nd g ourmandizing depress the mind and enervate the body.

A plain meal followed by a nap, on the other hand, le aves a p erson r efreshed a nd r eady f or work. An occasional holiday indulgence will not be harmful, but moderation protects he alth a nd vigor into old age. On ordinary days, Horace tells us, vegetables and "a hock of smoked pork" was his standard diet. On rainy days, when a f riend came by, the holiday meal might include a kid or a hen (but not fish from a city market) and a dessert of fruit and nuts. Horace praises the fruitful sustenance provided by his farm and anticipates the future when the farm will provide for others. He a dvises h is r eaders to l ive c ourageously a nd not be daunted by ill fortune.

Book 2, satire 3 begins as a jocular exchange between Damasippus—a bankrupt trader in properties t urned Sto ic philosopher—and H orace. Damasippus ch ides H orace f or se ldom w riting anything d espite h is g ood i ntentions. H orace thanks him for his worthless advice b ut, ad mitting that D amasippus is r ight, wonders how h is friend k nows him so well. Da masippus explains that ever since he lost everything, he has made it his practice to mind other people's business. He describes how, when he lost his business, he was about t o commit suicide. H is f riend Stertinius talked hi m o ut o f i t, ho wever, a nd en couraged him to become a Stoic philosopher instead.

Damasippus r ecounts t he c ontent of t he le cture that saved his life. It was a lecture whose thesis held t hat a ll t he world is mad-at le ast t hat portion of it g overned by folly and i gnorance. Some a re a fraid w hen t here is n othing to f ear. Others r ush headlong i nto hor rible d anger or bankrupt t hemselves p ursuing a pa ssion f or collecting cer tain o bjects. S till o thers p ursue unworthy am bitions, ar e s uperstitious, o r w ear themselves out chasing money. These last are the maddest o f a ll, a nd Da masippus g ives ma ny examples of that par tic uhr folly. A mong them is the sort of person who, nearing the end of his life and r ichly p rovided f or, l ives l ike a pa uper i n anticipation of a need that will never arise. Drawing examples from the pages of history and literature, Damasippus illustrates the madness of those who kill their parents and of those who sacrifice their children on the altars of the gods.

Horace finally wants to know who is not mad. "The man who is not a fool," Damasippus replies. Greedy m en a re fools a nd t herefore mad . S o i s anyone who believes in things untrue and whose beliefs are distorted by passion. The impious fall into this category, as do the extravagant. Being in love i s m adness. Those who seek to a void de ath through prayer are mad, as are those who imagine that prayer and sacrifice will cure illness.

When H orace a dmits that t o h imself he appears quite sane, Damasippus assures him that

590 Satires

many mad persons feel the same way. Horace asks Damasippus to p oint out symptoms of Horace's madness. Damasippus obliges by suggesting that Horace envies and imitates tall people, though he short. He also faults big people for being too large. As for Horace's poetry, it is fuel to the fire of Horace's madness and leads to "terrible ravings."

Horace interrupts at this point, but Damasippus continues, accusing Horace of living beyond his means and having insatiable sexual appetites. Horace cries for mercy, and the satire ends.

In the fourth satire of Book 2, Horace's friend Catius r epeats f or h im a long series of p recepts about food and a few about cleaning the house that he has learned f rom a lecture and t hat he finds more u seful t han the t eachings of such f amous philos o phes as Pythagoras and Socrat es. When Catius's s ummary s eems i nterminable, H orace interrupts to inquire the name of the lecturer so that he too may benefit from a d irect en counter with the sage.

Satire 5 in book 2 presents a dialogue between the homeward- bound Ulysses in the underworld and the shade of the blind prophet of Thebes, Tiresias, whose spirit Ulysses consulted in Hades. Horace ha s U lysses a sk t he s eer o ne non-Homeric question: How c an Ulysses repair h is r uined fortune? Tiresias advises Ulysses to become a legacy hunter and to cultivate and flatter wealthy old men. Beyond that, he must defend scoundrels in court. He must manage to be named as second in line for fortunes that have been bestowed on anonrelative and then see to it that he outlives the first in line.

To i mprove one's for tunes, T iresias suggests allying oneself with the caretakers of wealthy old persons without heirs. He also instructs Ulysses to share the virtuous Penelope with a failing dotard. The hopeful person should not talk too much or too little and should flatter the potential source of a for tune. A fter f urther su ch u seful adv ice, Ulysses' ghostly adviser explains that his time is up. He bids Ulysses farewell with the words: "Live long and prosper."

Horace's p atron, M aecenas, t he c lose adv iser and friend of August us Caesar and the wealthiest s ubject of t he em pire, had g iven t he p oet a farm, which became famous in the annals of literature as the Sabine Farm. The sixth satire of the second book details Horace's happiness there and his gratitude to the gods for his splendid possession. He contrasts the peaceful existence he leads on t he f arm with the bustle of Rome and the unremitting attempts of self-seekers to use Horace to curry favor with Maecenas.

Horace s ummarizes h is c ontentment i n t he country b y r ecounting t he u niversally f amiliar story of the c ountry mouse and the city mouse, and how the latter convinced the former that he would be h appier a mid the luxuries available i n the city. Convinced, the country mouse tried his friend's mode of life in the city, but as the t wo were sampling the remains of a sumptuous banquet, t he ba rking o f w atchdogs f rightened t he country mouse out of his wits, so that he r ushed home a nd t hereafter r emained content w ith h is rural manner of life.

In the seventh satire of book 2, Horace's slave, Davus, asks to say something, and Horace grants him "December privilege" to s ay what he l ikes. During the December festival of Saturnalia, masters and slaves customarily exchanged roles temporarily. Da vus a pproaches h is t rue subject obliquely, b ut when H orace ch ides him, D avus says that h e really wants to talk a bout H orace, who often says one thing but means another and who cannot wait to get to the country when he is in the city and vice versa.

When Horace seems offended, Davus reminds him of his license to speak and proposes a conundrum. If Horace lusts a fter a nother ma n's wife, and if Davus seeks a prostitute, whose lust most deserves punishment? Though Horace is free and Davus is a s lave, what person is truly free from obligation to some person or passion that controls him? It is only the wise person who fears neither poverty nor death, who resists the temptations of his p assions, w ho "scorns u nworthy a mbition," who is not divided within himself, and who is not Fortune's servant. Davus asks Horace to examine his conscience to see if, on any single count, he is worthy to be counted a mong the wise. Tiring of Davus's sermonizing, Horace sends him away. The final satire describes a sumptuous banquet hosted by the wealthy Nasidienus. A guest, Fundanius, tells Horace all about the occasion. Fundanius li sts the expensive del icacies t hat were served, t ells a bout a pa ir o fr ude guests w ho insisted upon larger drinking cups so they could get drunk faster, and de scribes the interruption of the banquet when a c eiling canopy fell, bringing with it a great cloud of dust.

The embarrassed host was comforted by trite remarks about the operation of fortune, and the banquet r esumed w ith c ourse a fter co urse o f delicacies. A je st, however, lies at the end of the description. F undanius and h is fr iends, w ho apparently f ound t he ho st's d iscussion o f t he food's pre paration u nappetizing, o ffended t heir host by running off without eating anything.

Satires Juvenal (ca. early second century C.E.) In his series of 16 verse sat ir es, Juvenal alludes to events datable to as early as 96 c.e. and as late, perhaps, as 127. At sometime within that window, or perhaps a little later, the satires were published.

Book 1

As the first of the satires opens, a reader encounters the voice of the satirist, who seems to be an audience member at a poetry reading. The satirist rhetorically asks himself why he m ust always be in the audience instead of being the poet. He certainly has the education to be a poet, for he has studied the classics of Greece and Rome. There are, however, so many poets that he is reluctant to add yet another voice to the yammer of versifiers but he m ust. He is thoroughly en raged by the sorry state of an enfeebled and effeminate Rome. Eunuchs t ake w ives, ba rbers ma ke f ortunes, wealthy old women hire lovers, conspicuous consumption t hrives, a nd c rooked p oliticians a nd civil servants on the take proliferate. The Roman world, i n br ief, is turned u pside down, a nd t he poet's persona, who is a conventional moralist if also a bit of a prig, quivers with rage at the state of Roman morality. His satiric voice must be heard. Yeth e m ust b e c areful. Attacking p owerful figures by name can be fatal to the attacker. He will be most secure if he vents his fury on famous (or infamous) figures al ready d ead. I f r eaders s ee parallels between them and the living, that is not the poet's fault.

As Satire 2 opens, the poet takes aim at those men who play the female role in homosexual relationships *and* who denounce others for doing the same thing. He waxes especially vehement when he r eports t hat a ma le m ember of t he f amous Roman p olitical f amily, t he Gr acchi, had b een given in m arriage as the b ride. Cowardice a nd sexual bo ndage a re r ife. Rel igion i s de ad, a nd Rome exports its contemporary vices to the ends of the earth—at least as far as Armenia.

In the third satire, Juvenal turns his invective against the city of Ro me itself. Her holy pl aces have been let as ten ements and her g reensward paved over. The authorial voice of Juvenal in the person of one Umbricius asserts that Ro me has become a n u ncongenial place f or ho nest m en. One can find a job as a hired assassin or a lookout for thieves. One can live by taking bribes or by becoming a yes-man.

Moreover, Rome has become overly fond of all things G reek. U mbricius c omplains a bout t he great influx of Greek and other immigrants. Also, the courts have become the p awns of t he r ich, and a poor man's oath counts for nothing. Prostitution is rampant among all classes. Only wealth counts, cl ass s tatus i s determined b y p roperty, and the cost of living is soaring so that everyone lives in "pretentious p overty." E veryone i gnores the necessities of the impoverished. The noise of traffic i s i ncessant, v enturing f orth a t night is tantamount t o t aking on e's l ife i n one 's hands,

and one is lucky to make it home having suffered only a b eating. H aving ended h is c omplaints, Umbricius bids Juvenal farewell.

Satire 4 o pens w ith a n i nvective a gainst a n Egyptian upstart, Crispinus, who was among the emperor Do mitian's c lose adv isors. A mong h is other v ices, C rispinus i s a sp endthrift who w ill pay a fortune for a red mullet.

Having v ented a part of h is sple en a gainst Crispinus, J uvenal opens a mock e pic with a n invocation of the Muse of epic poetry, Calliope. He then recites the history of an enormous Adriatic turbot. Once they had netted the fish, the fisherman, rather than have the emperor Domitian's spies claim it had escaped from the imperial ponds, brought the fish as a g ift to the emperor. He called a council meeting to determine what should be done with it. Seeing the fish, an imperial adviser, Fabricius Veiento, claimed that it was a harbinger of v ictory. H e prophesied that Domitian would take a royal prisoner.

The council determines that the fish should be prepared whole, and that a special platter should be ma de to hold it. The m eeting ad journs, a nd Juvenal e nds the s atire with a reference to t he emperor's murderous blood lust.

An ge- dd feature of Roman social organization w as the r elationship between a p erson of high status as a patron and a circle of clients who supported his interests and who, in turn, received the p atron's s upport a nd p rotection. I n e arlier times, both p atron a nd clients u nderstood their common humanity and their essential equality as Roman citizens. Juvenal's fifth satire bemoans the undermining of this ancient and formerly honorable institution by continuing his food metaphor.

In earlier days, both friends and clients used to enjoy the same menu at a patron's table. In Juvenal's satire, however, the patron Virro serves highquality food and wine to friends and inferior-quality fare t o clients. This i nequity p oints up the gulf that Rome's new order has opened b etween the fabulously w ealthy pa trons a nd t he c lients to whose s upport t he pa tron i s i ndebted. J uvenal assures t he c lient, T rebius, t hat h is pa tron ha s intentionally arranged the feast to h umiliate the client a nd r ub h is n ose i n h is utter de pendence upon the patron. Clients who endure such treatment, J uvenal t hinks, a re n ot m uch b etter t han their patrons.

Book 2

The first five satires comprise book 1 of Juvenal's collection. The poet devotes book 2, however, to a single satire. In length, Satire 6 e quals the entire poetic o utput of J uvenal's pre deces sor satirist, Pers ius. This sa tire is a long d iatribe a gainst women and the d isappearance of c hastity f rom the earth. Juvenal scornfully reproves a notorious womanizer, Posthumous, for his decision to take a wife. Not only will she be unfaithful, she is also likely to poison her husband. Juvenal then begins to recount the sins of a series of women whom he names a she de scribes their s exual a berrations. Among the most notorious was Valeria Messalina, the third wife of the emperor Claudius, who worked in a brothel to satisfy her appetites.

Juvenal's p icture of women is utterly m isogynistic a nd h is a nger a gainst t hem p athologically intense. The s atire's women p ractice e very v ice, remain constant irritants to their husbands' peace of mind, and make use of potions that will induce abortion. J uvenal t hen a llows h imself to r ant against the heroines of Greek epic and mythology. Despite a ll t hat, t he p ossibility r emains t hat t he narrative v oice of t he s atire is d istinct f rom t he voice of the poet. It may be that the satiric ranter who so excoriates all women based on the example of a fe w b ecomes h imself t he ob ject of J uvenal's satire and that the poet trusts the reader to recognize the double objects of his invective.

Book 3

Satire 7 begins book 3 with a consideration of the poor financial p rospects o f p oets, h istorians, advocates, a nd o ther i ntellectuals. On ly t he emperor h imself i s l ikely to b ecome a l iterary patron, a nd i n a t ime b efore ro yalty a rrangements, in de pendent m eans, or generous patronage p rovided p oets a nd scholars t heir p rincipal hope of income. Fine poets require peace of mind and freedom from want to create their best work. Yet R ome w allows i n we alth w hile the t alented starve. As for teachers of rhetoric and philosophy, they h ad b etter t ake u p te aching m usic to t he wealthy i f they expect to e arn a de cent l iving. Then as now, though parents expected their children's teachers to assume the role of parental surrogates, they were unwilling to pay them as much in a year as they would give a talented athlete for a single match.

As m any c ommentators have obs erved, t he angry Juvenal of the opening satires has gradually been replaced with a voice that Su sanna Morton Braund s ays b elongs to " a n ihilist with an acute sense of humour." In the eighth satire, the speaker assures his aristocratic auditor, Ponticus, that taking p ride i n o ne's a ncestry i s p ointless. J uvenal lists the attributes that would lead him to respect a Roman diplomat abroad—someone who performs his mission with no thought of enriching himself.

The poet directs the force of his satire against persons of noble ancestry who betrayed their heritage: the emperor Nero, who longed to be a popular entertainer and often cast himself in that role, or the orator and Roman governor of Africa, Catiline, who led a conspiracy against his native land and w as finally k illed i n r ebellion a gainst i t. Finally, Juvenal argues that anyone who traces his ancestry back far enough will eventually arrive at humble, even disreputable origins.

In the ninth satire, Juvenal revisits the issue of relations between a patron and a client. The poet's persona e ngages i n a d ialogue (unique a mong these satires) with a certain Naevolus. Naevolus explains that his patron, though a married man, wishes to play the female role in sexual encounters, and that Naevolus himself has cooperated in his p atron's a ccomplishing t hat a im. M oreover, Naevolus has performed the husband's office with his p atron's w ife and is th e r eal f ather of th e patron's t wo c hildren. The na me *Naevolus* suggests that the character may suffer from a syphilitic condition whose symptoms are evident in the eruptions on his skin. When Naevolus complains about his patron's treatment, Juvenal advises him to find another patron with similar tastes. As in the fourth satire, both patron and client become the objects of Juvenal's invective.

Book 4

Satire 10 beg ins book 4. In it, J uvenal r aises a series of questions a bout a nd ob jections to t he practice of prayer and its accompanying sacrifices, and he derides the irrational things that people pray for . A lthough h e c learly finds t he en tire notion of prayer laughable, he none theless offers sound and often-quoted advice about the sorts of things that, if one must pray, one ought to p ray for. Pray, he says in an endlessly quoted line, "for a sound mind in a sound body." Other appropriate gifts one might solicit through prayer include a c ourageous h eart, fearlessness in the face of death, and a s tout heart capable of "bearing any anguish"-one that does not know anger, that desires nothing beyond what it has, and that prefers toilsome virtue over easeful vice. These gifts, however, are already within the grasp of persons who live good and virtuous lives. Such gifts need not be begged from the gods that men create.

In the 11th satire, Juvenal returns to the image of gou rmandizing a s a m etaphor f or t he decadence of h is contemporary Rome. To show that he himself is immune from the excess that he a bhors, he i nvites a f riend to d inner at h is country home-his "Triburtine farm." There the friend will find e xcellent, ho megrown fare: a suckling kid, chicken, eggs, wild asparagus, fresh grapes, apples, and two varieties of pears. Such country fare, Juvenal continues, would have been considered s umptuous in the bygone days of Rome's v irtue. Bu t n ow t he whole w orld c an hardly supply the exotic dishes considered requisite to a l uxurious feast. Moreover, at J uvenal's farm, t he g uest w ill b e a ble to sp eak L atin to Juvenal's virtuous servants rather than Greek or Syrian t o a foreign s ervant sp oiled b y v ice. A guest at Juvenal's party should not expect lavish or l icentious e ntertainment ei ther. I nstead, h is guests may expect to hear readings from Homer or Virgil. Returning to a consideration of the

594 Satires

pleasures available only in the city—chariot racing and attendance at the public baths—Juvenal opines t hat a s teady d iet of s uch t hings s oon proves t edious a nd c oncludes: "Pleasures a re enhanced by rare indulgence."

Satire 12 ends the fourth book with a consideration of true versus false friendship. Juvenal opens by telling an auditor, Corvinus (whose name means crow), about an offering he is making to express his gratitude for t he su rvival o fJ uvenal's f riend, Cat ull us, when the ship in which he was traveling n early f oundered. J uvenal tel ls t he s tory o f Catullus's peril in a long, mock-epic passage. Then Juvenal explains to Corvinus that his attachment to C atullus s tems f rom true fr iendship an d n ot from the hope of becoming his friend's heir. The friend's name now becomes intertextually significant. For thousands of years, authors have chosen variants or translations of Corvinus as the name for v illains who have been l egacy seekers. S uch false friends whose motive is eventual profit become the targets of the remainder of the 12th satire.

Book 5

The 1 3th s atire pa rodies a s tandard rhe torical form: a consolation for p ersons who have b een bereaved. The satire arises from the source of the consolee's bereavement—the lo ss b y J uvenal's friend Calvinus of a paltry sum a s the result of false testimony in a lawsuit. Juvenal tries to restore Calvinus's g ood h umor by le tting him see t he perjurers' viewpoint and the silliness of their victims in hoping that some kind god will intervene on behalf of honesty.

This Juvenal follows with descriptions of similar lawsuits in which the perjuries were worse and the u njust verdicts costlier to the victims. Calvinus, h owever, is n ot m ollified by t hese comparisons. He thinks that the gods *ought* to punish perjurers. Juvenal re sponds by suggesting that guilt punishes itself and that an obsession w ith r evenge i s a f ar w orse a nd m ore ignoble t han perjury. N onetheless, h e a ssures Calvinus that the perjurer will eventually suffer punishment. Satire 14 addresses the way that the examples of p arents le ad their children i nto the paths of viciousness. G amblers t rain ga mblers, g luttons tutor gluttons, and philanderers coach philanderers. Bad examples at home corrupt with powerful authority. M asters wh o m istreat their s ervants will beget children who do the same. In passing, he also blames the Jewish faith for undermining Roman religion.

Parents pa ss m iserliness a long to c hildren. How foolish, thinks Juvenal, to live like a pauper and die rich. Equally foolish is incessant acquisition of property, and most foolish of all is the risk of life and limb in pursuing wealth, particularly by seafaring.

Addressing t he question of w hat c onstitutes adequacy, Juvenal responds that what thirst a nd hunger a nd c old require is e nough. He c ites t he notably frugal examples of Socr at es and Epicuru s as models for those who wonder how much is sufficient.

The s atirist's listener, however, seems u nwilling to as sent to such modest goals, and when Juvenal suggests greater and greater a mounts to answer the question, "How much is enough?"—he finally has to give up trying to reach agreement.

As the 15th satire opens, Juvenal asks Volusius of Bithynia if anyone exists who does not know how t he " crazy" E gyptians w orship m onsters. Moreover, though they worship cats and fish and dogs, and though eating leeks and onions is sinful, cannibalism is condoned among them. While exceptions concerning cannibalism are permissible in times of famine, generally it is a r eprehensible pr actice. There f ollows a n e xtended example of s uch r eprehensibility t hat f ollowed when a group of frenzied and drunken Egyptian worshipers got t o br awling. O ne g roup, t he Ombri, r outed t he o thers, t heir n eighbors t he Tentyra. A s the latter fled, one of them fell into the hands of the pursuing Ombri, who instantly tore him to pieces and ate him raw. The horror of the de tails r eveals t he de pths o f J uvenal's cynicism.

The apparent hard-heartedness of this discussion, ho wever, e vaporates w hen J uvenal i nsists that n o t rue worshipper of t he g oddess C eres/ Demeter (or for that matter of any other compassionate dei ty) " considers t he d istress o f o thers irrelevant to themselves." This and only this separates rational human beings from the rest of animal c reation. The g ods e xpect h uman beings to cooperate, n ot a lways make war. It is a mark of the degree to which h uman beings fall short o f fulfilling their destinies that " there is more harmony among snakes" than people, and that other species are kinder to t heir members than people are. W eapons are the products of anger. R akes and hoes would be the better products of human ingenuity.

The last satire, the 16th, is only partly extant. Its manner is once again conversational or epistolary. Juvenal asks his friend Gallus to consider with h im th e a dvantages of a m ilitary c areer. The first of t hese der ives f rom t he f ear a nd respect of civilians who k now that if they beat you up, swift and overwhelming retribution will follow at the hands of your comrades. The same deterrent r educes t he n umber of la wsuits filed against soldiers—and t he n umber t hat s oldiers find necessary to file since they have the means of taking the law into their own hands.

Other a dvantages of the military life include soldiers' ability to make wills while their fathers still live, a n adv antage den ied to o thers u nder Roman law. A fter mentioning that some fathers try to get their soldier sons to make them their heirs, the poem b reaks off unfinished. Neither ancient nor modern commentators had more of it. The reason that the poem stops is a matter of much critical debate.

Satires Persius (ca. 63 c.E.)

Written with utter contempt for the literary tastes of his contemporaries, Per sius's satires nonetheless claim a place in the mainstream of the Roman satiric t radition, first b y e verywhere e choing Hor ace b oth i n matter a nd ma nner. S econd, Persius himself claimed literary kinship with the much earlier Roman satirist Lucil ius (fl. second century b.c.e.), yet despite that kinship, Persius's satires are utterly distinctive both in their unflagging invective against readers with bad taste and the poets who pander to it and in their promotion of the ideals of St oicism in an especially undiluted form. Persius's satires are short and pithy. They were e dited and published after the poet's death by Caesius Bassus, the friend and poetic colleague to w hom t he si xth a nd l ast o f t he s atires i s addressed.

Persius precedes his satires proper with a brief prologue that presages a contrarian poetic performance. I nstead o fi nvoking t he M uses a nd drinking deep from the inspirational waters of the fountain of Hippocrene, Persius denies having wet his lips at "the nag's spring"—the fountain sprung from the hoof print of the winged horse P egasus. P ersius i mplies t hat t he M uses and their worshippers, the poets, only serve their bellies and are interested only in cash. Persius's poetic form in his prologue s upports his c ontrarian position as he chooses to begin his satires, not with the usual dactylic hexameters but with the scazon or limping iambic meter associated with invective. After the prologue, he reverts to t he m ore u sual m eter. (See Q uant it at ive Ver se)

In Sa tire 1, P ersius draws an extended and sometimes subtle comparison between the practice of sodomy and the relationship between poets and their readers in the Rome of his day. Gone, he implies, is the manly virtue of the early Romans. Instead, his male audience is composed of overfed sensualists. Poets are worse. They have added

596 Satires

"elegance and smoothness" to the "raw rhythms" of t he ol d p oetry t hat P ersius c learly p refers. Contemporary taste r uns to entertainments and games in public places and novels with incredible plots t hat rely on a standard p alette of i ncident and c oincidence to r esolve t heir facile and p redictable plots—novels l ike t hose of t he Gre ek writer Chariton of Aphrodisias (see Gr eek pr ose rom ance).

Persius's s econd s atire berates t he selfinterested prayers of persons who feign honoring the g ods an d i nstead p ray c ontinually f or t he increase of their fortunes and flocks. Its last three lines suggest the s ort of p rayer and offering the gods would find acceptable in place of gold a nd sacrificial a nimals: j ustice a nd r ighteousness properly blended in the human mind and spirit, purity of thought, and a noble heart. Given these, the gods will find "a handful of grits" an acceptable sacrifice.

Satire 3 sustains a dialogue between a hungover student and an unidentified speaker—perhaps his conscience—who reproves the student's excesses a nd t ries to g uide h im to a p roductive path. The u nidentified speaker ex coriates t he student (and a ll l ike h im) w ho r epent s uch ex cesses a s their h abitual d runkenness wh en t he ex cesses make them fall ill, but who, as soon as they feel recovered, re sume t heir b ad h abits u ntil, finally, they die from them.

In the fourth satire, Persius still employs the verse dialogue but sets it this time in the mouth of Socrates. The Greek philos opher reproves his student Alcibiades, ward of Pericles, for egocentrism and lack of self-knowledge. Persius's Socrates is a nill-tempered, foul-mouthed reviler of self-deception. Instead of kindly advice to "know thyself," the Socrates of the dialogue instructs h is student to "spit out what isn't you!"—a revision in the spirit of the extreme Stoic minimalism that Persius practiced.

Persius's fifth satire begins in the poet's own voice as he tells his old teacher, the Stoic philosopher Cornutus, first of the excesses of poets and then of the debt of gratitude and affection that Persius owes Cornutus for teaching him that one's own r hetorical voice c ould be as effective as or more effective than a 100-tongued poet in finding and uttering the truth. The poet also acknowledges C ornutus's contribution t o P ersius's clear thinking. He offers a c atechism for t hose w ho seek the truth: Do you have moderate desires? Is your household f rugal? A re you k ind to you r friends? Can you pass up a profit? When one can answer yes to those questions, one is on the road to living freely. Persius then sneers at those who believe that achieving freedom from greed relies on i magining there is a l ife beyond the grave, on g ratifying the senses, on flattery and a mbition, and on t he sig ns and p ortents t hat p riests interpret.

The poet casts Satire 6 as a letter to his friend, the lyric poet Caesius Bassus. Written from Persius's retreat on the Ligurian coast of Italy, where he ha s w ithdrawn f rom Ro me, t his s atire c elebrates t he f reedom f rom app rehension t hat h is isolation brings him. At the same time, he recognizes a responsibility to hel p a friend in need of money. App arently, doing so brought Persius (or the persona that the poem creates) a reproof from an heir who thought the poet should be hoarding his cash to pass on at the time of his death.

Annoyed, t he P ersius persona i ronically informs t he hei r t hat P ersius i s financing 1 00 pairs of g ladiators i n a n en tertainment to c elebrate the emperor Caligula's military successes in Gaul—a clearly ironic suggestion since Caligula's principal success du ring the campaign of 39–40 was avoiding death at the hands of assassins. The point, however, is that Persius can do whatever he wishes with his own funds, and he need not concern h imself w ith p reserving h is e state f or t he benefit o f a n hei r. A fter g rowing qu ite hottempered about this topic, Persius breaks off the last of his satires.

Saturnian verse

The p rosodic s ystem of c lassical L atin i mitated Greek in using an arbitrary system of quant it at ive ver se m eter. The na tive, p rimitive L atin system relied instead on patterns of stressed and unstressed s yllables t o give its p oetry c adence, very m uch a s modern E nglish does. P rimitive Latin verse also relied on the repetition of consonant sounds—alliteration—for its effect.

Saturnian verse was so called because it was thought to have survived from the first a ge of humankind—the a ge o f S aturn, o r t he G olden Age. Very few representatives of Saturnian verse proper survive. One of the survivors is the text of a hymn sung by the Arval brotherhood. This was a college of 12 priests whose function was to invite the favor of t he gods of t he harvest-gods t hat included the guardian spirits of Rome and Mars, the god of war in later times but an agricultural spirit early in Roman history. Remnants also survive of h ymns s ung i n Saturnian v erse b y t he Salian college of priests whose particu ar function is not altogether clear. It too was probably agrarian i n c haracter. P l aut us a nd T er ence used both accentual verse of the older Saturnian sort and quantitative meter of the Greek sort in their p lays, m any o f which i mitated G reek originals.

satyr plays

A satyr play was annually presented at the Great Dionysia in A thens in conjunction with three tragedies in a c ontest a mong pl aywrights. The satyr play was the last to be performed, featuring characters acted by performers wearing the same costumes they had worn in the tragedy. A satyr play was similar in form to the tragedies that preceded it except that it dealt with bizarre incidents and the members of its ch or us d ressed in goatskin breeches to affect the appearance of satyrs the half-human, half-goat sp irits or c reatures who were thought, like the god Pan, to i nhabit the lonely reaches of the countryside. Satyr plays were associated with Greek tragedy from a very early epoch, and some argue that the tragic form arose from earlier satyr plays that may have been performed in connection with the ritual sacrifice of a goat.

Only o ne s atyr pl ay su rvives i n i ts en tirety, Eur ipides' *Cyclo ps*. The classicist Richard A. S. Seaford tells us that satyr plays became separated from their accompanying tragedies in Greece and continued be ing p erformed in depen dertly after the mid-fourth c entury b.c.e. S eaford al so s uggests that the type appeared on the Roman stage as late as the second century c.e.

Satyricon Petronius Arbiter (ca. 61 c.E.)

Nowhere else in the annals of literature does anything quite like Petronius Arbiter's *Satyricon* exist. W ith ex quisite literary t aste and g ood humor, its fragmentary remnants mock the pretensions of rhetorical flourish that characterized Roman and Greek oratory under the continuing influence of the Greco-Sicilian rhetorician Gorgias of Leontium. *Satyricon* also mocks most other pre tensions, behavioral as well as literary, while it t reats scandalously sa lacious ma terial with unpretentious aplomb.

Often moving without transition from episode to e pisode, composed so metimes in p rose a nd sometimes in verse, *Satyricon* frequently parodies and s ometimes d irectly c riticizes t he literary claptrap of its time. What remains to us of a very much longer work begins, in fact, with the young protagonist Encolpius's critique of rhetoric as it is taught i n s chools, hold ing up t he e xamples of Pindar, Homer, Pl at o, Demost henes, Thucydides, and Hyperides as correctives to the sterile and artificial conventions of schoolroom rhetoric and style as taught in Petronius's time.

A te acher o f rhe toric na med A gamemnon, however, interrupts Encolpius's diatribe. He points out t hat, t hough he k nows w hat he te aches i s twaddle, w hat h e offers i s w hat h is pa ying s tudents expect. He blames the parents for establishing such expectations and offers a piece of advice in v erse t o would-be poets: st udy Homer, t hen logic, a nd t hen t he S ocratic p hilosophers. N ext, adopt as a rhetorical model the speeches of Demosthenes tem pered b y t he R oman p ractice o f Cice r o. Such a regimen will invite the epic muse to claim the would-be poet as her own.

While the narrator is still listening to Agamemnon, A scyltus, E ncolpius's roommate, slips a way unobserved. The narrator goes in search of him, and by c hance the r oommates en counter o ne another in a b rothel to w hich b oth have b een led—Encolpius by a female procurer and Ascyltus by an enamored pederast. Later, however, Encolpius finds t hat A scyltus h as b een as saulting the lad, G iton, who cooks for the pair, and a fter a n argument and reconciliation, Encolpius and Ascyltus d ecide t o p art company. E ncolpius a dmits that the separation is motivated by his own desire for Giton. The episode ends with a returned Ascyltus catching the pair in bed and beating his former roommate with a leather strap.

The next fragment deals with the now-reunited roommates' r ecovery of a s tolen ga rment with gold s ewn i nto i ts s eams. A m issing p ortion of text seems to have described the pair's interruption of a fashionable woman named Quartilla as she and her maid Psyche participated in the rites of the god of masculine s exuality, P riapus. The text r esumes with the a ppearance of the tw o women a nd a l ittle girl at the inn of the y oung men, s eeking a c ure for Quartilla's ma laria a nd assurance t hat the r ites the l ads obs erved w ill remain s ecret. The c ure i nvolves an e xtended though highly fragmentary orgy in which Encolpius, A scyltus, a nd Gi ton b ecome the p rinciple means for s atisfying Q uartilla a nd c ompany's insatiable a ppetites, b oth p articipatory an d voy eur is tic.

The next section of Satyricon ranks among the most famous banqueting scenes in all of literature, t he c elebrated " Dinner w ith T rimalchio." The dinner itself parodies other famous literary banquets and discussions from the annals of classical literature, such as Plato's Symposium or his Timaeus. The ho st o f P etronius's ba nquet, T rimalchio, i s a n ouveau r iche, egocentric m illionaire who throws a way silver serving dishes that happen to fa ll on the floor, ser ves wine r ather than water for washing in fingerbowls, and offers his guest 100-year-old vintages as table wine. Trimalchio a lso en joys a l ittle joke a t h is g uests' expense, ser ving t hem not-very-appetizing fa re as the top layer of a two-tiered serving trolley whose second layer contained a sumptuous feast of t he mo st e xpensive a nd app etizing f oods imaginable.

The reader also meets Trimalchio's wife, Fortunata, risen from near untouchability to become a sh rew whose likes and dislikes can make and break important persons. When a call of nature takes the ho st a way from the table, the guests seize the opportunity to speak of the matters on their minds. They bewail the loss of the good old days. They s peak of pe ople disinherited of for tunes and fortunes left to strangers. The conversation parodies that of people looking for their main chance and hoping to make some money.

On T rimalchio's r eturn, he r eveals h is u tter lack of taste by sharing with the guests the details of the s tate of h is i nnards a nd en couraging h is guests t o d eal with a ny s imilar n ecessities t hat may develop. Encolpius imagines that entertainment of some sort will follow the enormous quantity of food that has already been served. Instead, three live hogs of varying sizes are led in, and the guests are asked to s elect the one they want prepared for dinner. They do so, and in a remarkably short time a roa sted pig—seemingly larger than the largest of the three live ones—arrives from the kitchen. S omeone a nnounces, h owever, that t he cook forgot to gut the animal b efore cooking it. The cook is stripped, p reparatory to b eing p unished. The g uests i ntercede, a nd t he c ook i s ordered to gut the pig in everyone's presence. He hacks a way at t he c arcass, a nd i nstead o f i ntestines, fine s ausages a nd blo od pud dings t umble forth.

A ga me f ollows i n w hich g uests r eceive humorous presents depending on what message appears on p apers they draw from a jar. When Encolpius a nd h is f riends b ecome a mused b y something and break into laughter, a former slave takes d runken o ffense a nd b egins to t hreaten them. He perversely illustrates a kind of reverse snobbism as he t akes pride in his former condition of servitude and imagines slights where none are intended.

After professional entertainment and gift giving, Trimalchio in troduces h is house holl gods: Fat P rofit, Go od Luck, and Large I ncome. Then the host invites a g uest to tel l a s tory. The guest obliges w ith the t ale of a w erewolf. Trimalchio himself r esponds w ith a s tory a bout w itchcraft and a strong man killed by it.

Various d isplays o fb ad t aste en sue. A mong them, Trimalchio invites some of his slaves to join the guests at the table, where he announces to the assembled company his intention to free them all when he dies and to leave his money to Fortunata. He wants all his household to k now his plans so that they will love him as much while he lives as they will after h is de ath. H e t hen de scribes i n detail the sumptuous tomb that he plans for himself. Among other things, he specifies a statue of himself, another of his dog, a third of Fortunata, garlands of flowers, jars of perfume, and depictions of every fight that his favorite boxer has ever won. He also specifies his epitaph, shaped like a funeral urn and listing as chief among his accomplishments the fact that he never listened to philosophers. He then bursts into tears and mourns his own inevitable passing.

Recovering f rom h is p aroxysm of g rief, T rimalchio invites everyone to h is baths, where the water has be en heated. E ncolpius a nd A scyltus agree to sneak away from the party, but they fail and so must join the others. Following the bath, the guests are led to a second dining room where drinking until dawn is the order of the night. Discovering that h is slaves have not eaten a nything as y et, T rimalchio s ends t hem off to d ine as a relief crew arrives. One of these is a very attractive boy. The attentions that Trimalchio lavishes on h im i ncite For tunata to rail at her husband, who strikes her in the face with a heavy wine cup. She weeps while Trimalchio recalls his wife's previous life as a prostitute. In his anger, he c ancels his order for a statue of her in his tomb.

Utterly d runk, T rimalchio p reaches h is o wn eulogy, b ragging o f h is m ercantile ac complishments. Then he r everts to m ourning h is o wn death, orders his grave clothes brought in, anoints himself with spikenard—a perfume used to mask the odor of death—and orders the band to play a dirge. They d o, but t he n eighborhood firemen think that the noise is a fire a larm a nd r ush i n with buckets and axes. In the ensuing confusion, Encolpius and company make their getaway.

Because of Giton's foresight in using chalk to blaze their path from the inn in which they were lodged to the party, the trio eventually makes its way home. There, however, they find themselves locked out until one of Trimalchio's agents happens by and forces an entry.

Once in their quarters, A scyltus again snares Giton for h is o wn b ed a nd ple asure. This t ime, Encolpius insists that the roommates definitively part company. Ascyltus agrees, and the two share out t he b elongings t hey have h eld i n common. Then, drawing his sword, Ascyltus insists on having his half of Giton. The rivals are about to fight when Gi ton i ntervenes a nd c alms t hem. They agree to let Giton choose b etween them, and to Encolpius's chagrin, Giton chooses to le ave with Ascyltus.

After t hree d ays o f m elodramatic self-pity, Encolpius g rows a ngry o nce a gain, vows t o k ill them both, girds on his sword, and rushes off in search of the pair. A s oldier, ho wever, s teals h is sword, and when En colpius's a nger passes, he i s glad that he has not murdered anyone.

In the 83rd chapter of *Satyricon*, Encolpius, while ad miring the pictures in an art gallery,

600 Satyricon

meets the poet Eumolpus, who tells him a story of pederasty. Billeted in a house in A sia where there w as a ha ndsome y outh, Eu molpus p retended to be so offended at the very mention of pederasty that no one suspected his predilection for that activity. As a result, he was often entrusted with squiring the boy to school and supervising his activities. Eumolpus then details the way that he succeeded in s educing the lad, and the vengeance in k ind that the boy visited on h im when E umolpus fa iled to p roduce a p romised stallion.

When En colpius as ks the p oet about the decadence of the present age, Eumolpus attributes its depravity to drink, debauchery, the neglect of learning, a nd u niversal g reed. Then, obs erving Encolpius's i nterest i n a pa inting of t he f all o f Troy, E umolpus l aunches into hi s own p oem commenting on the events depicted in the painting. Other gallery patrons respond to Eumolpus's impromptu recitation with a volley of stones. He flees, En colpius follows, and the poet confesses that h is a udiences g enerally r espond t he s ame way when he recites in the theater.

The two visit the public baths, where Encolpius encounters a r epentant Gi ton. Gi ton b egs to b e restored to his former favor. He claims that when two armed men were about to c ommit mayhem over h im, h e did the reasonable t hing a nd went with the stronger, but his affections really lie with Encolpius. P leased, En colpius acce pts t he b oy back. Eu molpus, however, a rrives a nd, to E ncolpius's annoyance, finds Giton attractive.

A g rowing r ivalry f or t hel ad's a ffection estranges Encolpius from Eumolpus, who finally suffers a b eating at the hands of a d runken innkeeper a nd h is e qually d runken g uests, while a jealous E ncolpius r efuses Gi ton's en treaties to unlock their door and save Eumolpus. He is saved nonetheless by one of t he f ew ad mirers of h is poetry, Bargates the caretaker.

In t he m eantime, A scyltus h as o ffered a reward for information leading to his recovery of Giton. While A scyltus and a p oliceman begin a room-by-room search of the inn, Giton conceals himself in a mattress. The searchers fail to d iscover h im. E umolpus n ow enters and threatens to reveal all as his revenge for Encolpius's having allowed h im to b e b eaten. E ncolpius b egs h im not to accuse him and swears that Giton has run off. The l ad's sn eezes, ho wever, e xpose t hat l ie. Released f rom h is h iding place, Gi ton ma nages to smooth things over between the two men, and as t he 99 th c hapter e nds, th e th ree e mbark together upon a voyage.

Once the ship weighs a nchor, E ncolpius a nd Giton discover that the goddess Fate has delivered them into the hands of the very people they most wish to avoid—Lichas of Tarentum, the captain of the ship, and a woman, Tryphaena, who spends her life roaming about in search of pleasure. Both these p ersons ha ve s ome u nspecified sco re to settle with the two younger voyagers. After rejecting a series of su ggestions for c oncealment a nd altering their app earances, E ncolpius a nd Gi ton agree to be shorn and emblazoned with the marks of r unaway slaves. A s easick pa ssenger obs erves their s hearing and c urses t hem f or i nviting i ll luck by emulating their heads.

Both Lichas and Tryphaena have dreams that reveal the presence of those they seek, and the seasick passenger identifies those who were shorn. Encolpius and Giton are sentenced immediately to suffer 40 lashes each. Encolpius bears his stoically, but Giton cries out and Tryphaena recognizes his voice. One incredible situation follows another as pleas for punishment and for forgiveness are bandied about. The ship's crew and passengers take sides until everyone except the ship's pi lotis fighting. Finally, Tryphaena plays the role of peacemaker, and all resolve to become friends and observe certain conditions.

Wigs a nd f alse e yebrows r estore t heir g ood looks to Encolpius and Giton, and Eumolpus volunteers to tell a tale that will prove all women can be sed uced. H e tel ls o f an in consolable w idow who acco mpanied her h usband's b ody to t he tomb in the shadow of crosses upon which several thieves had be en crucified. A ssisted by the widow's maid, the soldier guarding the thieves' bodies laid siege to t he widow's affections, which on that very night and for two more nights thereafter he enjoyed in the privacy of her former husband's tomb. The parents of one of the crucified thieves, however, noticed that the watchman was missing, and they stole their s on's b ody. The watchman, fearing the horror of the punishment that would befall h im f or de serting h is p ost a nd lo sing a body, prepared to commit suicide, but his beloved offered her de ad husband's b ody a s a subs titute and resolved the problem. The next morning, the entire c ity was a stounded t hat a de ad ma n had managed to mount a cross.

While this tale is told, Tryphaena toys a morously with Giton, and Encolpius suffers from the flames of jealousy.

After a b rief l acuna i n t he te xt, t he s tory resumes with the description of a sea storm and shipwreck. As nearby fishermen struggle to s ave the passengers, Eumolpus makes his own rescue difficult by trying to immortalize the incident in verse.

The next day, the survivors discover the body of Lichas, which leads Encolpius to pronounce an *ubi sun t* (where are they?) epitaph. "Where are Lichas's a nger and gr eatness n ow?" E ncolpius wants to know.

The survivors make their way in the direction of an Italian city called Croton (Crotona), a place, as a wayfarer tells them, populated only by those who ma ke w ills an d t hose w ho p ursue w ill makers—that i s, b y t he r ich a nd b y t hose w ho would inherit wealth through trickery. This intelligence gives Eumolpus an idea about how he and his companions might turn this new situation to their advantage.

By pretending to be a rich Roman of A frica attended by h is s ervants, E umolpus hopes to become a p arasite s ucking a t t he f ortunes o f those who would become a rich man's heirs. He becomes, in other words, one of the originals of the Renaissance English playwright Ben Jonson's *Volpone*.

As the company makes its way toward Croton, Eumolpus discourses about his views concerning the composition of poetry, illustrating them with his own verses on the subject of the Roman civil wars. At this point, it is hard to reject the notion that Eumolpus's poetic assertions have become a thin veil for Petronius's own voice. Among many of E umolpus's c onclusions, h e s uggests t hat "degenerates inherit Rome." He accuses them of sumptuary g reed a nd ma kes r eference to t he building of lavish edifices whose foundations displace the bones of the honored dead. One thinks immediately of N ero's o wn p roclivities f or a n immodest style of life. Into the text of a salacious romp, Petronius has sudden ly inserted a s erious poem o n t he d ecline an d f all n ot o nly of t he Roman republic but also of the ancient and virtuous Roman moral order.

The plan to bilk the inheritance seekers of their wealth, however, works admirably as those who aspire t o in herit E umolpus's s upposed w ealth shower him with gifts, and all his associates gain weight. The f ragment breaks o ff as E ncolpius describes the fears he is beginning to experience, fears that the scam will fail.

The s tory r esumes w ith E ncolpius's ha ving unintentionally attracted the love of a lady named Circe. Her maid brings the two together, but at the crucial m oment, E ncolpius's ma nhood f ails him as his thoughts turn to Giton. Circe forgives him, and he tries again. But once more he fails, and in her frustration and rage, Circe has him flogged and her en tire household beaten as well. Utterly p ut o ut w ith h imself, E ncolpius ma kes several n ot v ery e ffective a ttempts at selfemasculation, but a little comic poem inserted in the text details h is failure to ac hieve t hat a im. Then, in a mercurial change of mood, Encolpius speaks in what sounds suspiciously like Petronius's own voice, asserting Epicurean philosophy and the realism of the matters he chooses to write about a nd t he p urity of t he s tyle i n w hich he writes of them.

Still a à icted by impotence, Encolpius prays to h is patron deity, Priapus, and seeks the services of a witch, Onothea, to restore h im to h is former v irility. This does not go well, though, and Encolpius has the misfortune to kill the god Priapus's petg oose. Bits and pieces of the attempted cure survive beyond that point, but

the whole episode ends with the witch and her confederate chasing Encolpius down the street and crying "thief!"

In the succeeding and final fragments, first, Chrysis, Circe's servant, conceives a violent passion f or E ncolpius. S econd, a f ortune h unter named Philomela entrusts her teenaged children to Eumolpus for instruction in some rather acrobatic amatory engagements, and finally Encolpius recovers from his ad iction. Beyond that, signs appear that Eumolpus's con game has about run its c ourse. Eu molpus t herefore ma kes h is w ill, requiring t hat a nyone w ishing to s hare i n h is inheritance must be willing to eat h is de ceased flesh, and the final fragment ends with a r ecitation of several instances of similar cannibalism.

Among the many good translations of *Satyricon*, that of William A rrowsmith is particularly enjoyable.

A s cholion (plural s cholia) i s a n ote a bout o r a commentary o n a pa ssage o f l iterature. W here ancient literature is concerned, sometimes all we know about an ancient writer or about an ancient work is the commentary that remains in passages penned by later scholars. At other times, scholia give us glimpses into the reception encountered by ancient works among their readership.

Similar in spelling but with an entirely different meaning is a similar word, *scolion* (plural *scolia*), d escribes a particular s ort of Gr eek ly ric poetry. Examples of scolia included songs written for par tc uhr social events such as banquets and festivals. Guests or participants at such occasions sang scolia to harp accompaniment. The literary type flourished in Greece from about the seventh through the fourth centuries b.c.e.

Second Letter of Clement to the Corinthians, The (ca. second century C.E.)

Included as the second entry in the c ollection $\overline{A} \ e$ Apostolic F athers of the Christian Church, this document is not a letter, nor was it written by the C lement who was supposed to have written its predecessor do cument. R ather, as its most r ecent and au thoritative t ranslator, Bart D. Ehrman, tells us, it seems to be a somewhat later, but still very early, Christian homily delivered a t a r egular s ervice of w orship. I t instructs the m embers of the c ongregation to regard with "awe, wonder, and gratitude" God's concern that has brought them, former pagans, into the fold of Christian believers.

The ho mily u ndertakes a n i nterpretation o f the Hebrew Bible text Isaiah 54:1, which exhorts the infertile and childless to rejoice aloud as they have m ore offspring t han fertile p arents. The preacher's interpretation is anagogical-that is, it strives to make an application of the text to the situation in which the early Christian congregation finds itself as it relates to future glory-to life in the world to come. The adherents of Christianity, s ays t he pr eacher, m ust a cknowledge t heir obligation to God, for they are the beneficiaries of Christ's sacrifice on their behalf. Christians must therefore renounce sinful ways and repent, focusing on their anagogical offspring, that is on their new lives in the next world, which will last forever, r ather t han o n t heir e xistence i n t his fallen, temporal one.

Notable a mong t he pre acher's e xhortations and s criptural c itations ar e some d rawn f rom such sources as the Gospel of Thomas-sources eventually excluded from received Scripture, but s ources n onetheless t hought o f a nd p reserved as Scripture among such ancient collections a s t he N ag Ha mmadi ma nuscripts (see Gnosti c a pocr ypha a nd pseu depigr a pha). Also c ompelling f or th ose i nterested i n t he development o fe arly C hristian t hought a nd ecclesiastical practice is the fact that, in addition to appealing to what is evidently an oral formulai c t r ad it ion about the life of Jesus, the preacher of the homily also appeals to scriptural authority, not only to that of the Hebr ew Bibl e but also to the writings of Paul and to an emergent tradition of compositions presumed to be those of the apostles-the nucleus of material from w hich th e app roved N ew T est a ment would eventually emerge.

All speculations about the author of the homily are so ten uous that nothing would be gained from reconsidering them here. Internal evidence leads Ehrman to guess that the homily has a midsecond- century provenance. This i n i tself lends the work the distinction of being the earliest noncanonical homily. It also illustrates the nature of early homiletic form and suggests that the interests of both preacher and congregation fo cused on e thical a ction a nd c harity r ather t han on abstruse questions of t heology. The ho mily a lso espouses a canon of Christian behavior that sets the members of the congregation apart from their pagan n eighbors, a mong w hom t he c ongregation's members still lived.

A Christian, de votional p oet, S edulius s eems to have been a p resbyter or an elder in the church. Possibly an Irishman, he is best remembered for *Carmen paschale*, an Easter song on the subject of divine miracles. Act 1 b egins with t he a rrival o nstage of Chremes. Finding Menedemus already there and hard at work, Chremes reproves him for working too hard at h is advanced a ge. M enedemus suggests that Chremes does not seem to have enough of h is o wn b usiness to m ind, and s ays t hat he *must* work as he is a self-tormentor.

When C hremes s natches Menedemus's r ake away, M enedemus tel ls h is s tory. H e ha s d riven away h is s on, C linia, b y being o verly harsh i n blaming the youth for his love affair with a young woman. Clinia has run off to work for the king of Persia. To p unish h imself, Me nedemus ha s s old off all h is slaves a nd b ought a f arm where, a s a form of p enance, he will do everything himself until his son returns.

Chremes returns to his own do or, for he has guests awaiting him. Just as he arrives, the do or creaks open. Chremes conceals himself and overhears h is s on, C litipho, t alking w ith t he v ery Clinia who was supposedly in A sia b ut has just returned. We l earn t hat C linia is afr aid of h is father's reaction. He also fears that in his absence, his mistress may have ceased loving him.

Act 2 o pens with a b rief s oliloquy i n which Clitipho rehearses his own troubles. He, too, has a mistress, but she is overbearing and disreputable, and C litipho i s a shamed to ad mit t hat he ha s nothing to give her. In the second scene, Clinia is awaiting the arrival of his mistress with presentiments of ill success. In the third scene of act 2, two slaves, Syrus and Dromo, enter. They have been escorting the women's sizable entourage, but as the slaves fell to gossiping, they out distanced their charges, who are nowhere to be seen now. In addition to being burdened do wn w ith je wels a nd cl othing a nd having a r etinue of ma idservants, Clinia's m istress does n ot k now her w ay to t he house, a nd Dromo goes to find the group.

Syrus p uts C linia's m ind at ease by assuring him that his beloved Antiphila is still chaste, poor, and devoted to Clinia. The other lady is Clitipho's beloved B acchis. S yrus a ssures C litipho t hat he may enjoy Bacchis's company in his father's house. Moreover, a s C litipho has p romised B acchis money, Syrus prom ises to get it. F or h is plan to succeed, however, everyone will have to pretend that Bacchis is Clinia's m istress while A ntiphila will be taken to stay with Clitipho's mother. Clitpho grudgingly assents to this plan.

In the fourth s cene, B acchis a nd A ntiphila arrive. B acchis p raises A ntiphila for le ading a chaste a nd so litary life and says that it is in Antiphila's interest to be good, just as it is in Bacchis's interest to be otherwise. The devoted married life is a surer path for a woman than is the life of a courtesan who bids farewell to her livelihood when sh e loses her lo oks. D espite S yrus's pl an, Clinia a nd A ntiphila s ee o ne a nother a nd r ush into e ach other's a rms. S yrus h urries them i nto the house le st M enedemus s ee h is s on with the girl.

As act 3 opens, the next morning has dawned, and it occurs to Chremes to tell Menedemus that his son Clinia has returned. Chremes encounters Menedemus, w ho i s s oliloquizing about how much h e m isses Clinia. Ch remes tells M enedemus t hat Clinia is in the former's house, but he advises his friend to wait and not appear to have given over his stern and critical ways.

That advice rests on Chremes' misapprehension that Bacchis is Antiphila. He believes that the formerly chaste young woman was driven by want to take up the life of a courtesan. Whereas in her former i mpoverished c ondition, Me nedemus m ight have acquired her a s a daughter-in-law with little expense, her price has now risen. In order to keep her price as low as possible, Menedemus must still seem to disapprove. At the very least, he must not be thought to be willingly generous with his money. Rather, he must appear to be deceived by the plots that the slaves are concocting—plots that Chremes has obs erved ha tching. T o do o therwise m eans that Menedemus will thereafter be sub ject to a ny whim of h is son—whims t hat M enedemus m ust satisfy or risk his son's running off again.

In t he n ext s cene, C hremes e nourages his slave Syrus to a rrange a s cheme to bilk Menedemus of some money. At the same time, the master challenges t he slave not to i magine he c an a lso pull the wool over Chremes' eyes.

In the third scene, Terence's plot grows even more complex. Syrus tells Chremes that Bacchis has b rought with her a y oung g irl, n ow with Chremes' wife. The girl was ple dged as security for a debt. Bacchis wants Clinia to pay Bacchis the money, and she will hand the girl over. Answering for Menedemus, Chremes says that Menedemus will n ot pay. To Chremes' confusion, Syrus approves of that answer.

Just then, as a ct 4 b egins, Chremes' wife Sostrata enters with a n urse. They are examining a ring that Sostrata believes was left with her infant daughter w hen, o wing to h is p overty, C hremes made her e xpose their infant daughter. (Leaving infants to die or be preserved by strangers was a not- uncommon practice in real life and a frequent one in fiction.) Sostrata tells Chremes that she did not herself expose the child; rather, she ga ve her to an elderly Corinthian woman. Chremes reproves his wife for not following through but, as u sual, forgives her. Then he wants to k now why she has brought up this issue.

Sostrata explains that Antiphila was wearing the r ing, a nd S yrus i s su rprised to t hink t hat Antiphila may be Chremes' daughter. Syrus, who had a role i n all this, begins to g row fearful, but Chremes, wh om n ecessity forced t o re luctantly expose his child, begins to grow hopeful.

In the next scene, Syrus racks his brain for a plan that will replace the one that the revelation about the ring destroyed. An idea comes to him.

In the third scene, Clinia enters. He is ecstatic over his coming marriage to Antiphila. Syrus says that if Clinia leaves with her, Chremes will know that B acchis i s C litipho's m istress. The s lave requires some delay in clarifying the situation if his plan to enrich himself at his master's expense is to succeed.

The courtesan Bacchis opens the next scene by saying that Syrus owes her 10 *minae*—a considerable sum—for her role in the slave's current plot. Syrus tells a fellow slave, Dromo, to move Bacchis and all her entourage and luggage into the house of Menedemus. This will lead to a ruse by which Syrus w ill c onvince C hremes to p art with 10 *minae*.

In the fifth s cene of act 4, S yrus explains to Chremes that Clinia has revealed to Menedemus that B acchis is r eally the m istress of C litipho. Syrus s ays t hat B acchis a nd her c ompanions moved t o k eep t hat k nowledge f rom Chremes. Syrus cleverly manages to convince Chremes that, to set h is daughter free, he m ust pay the money Bacchis demands. Chremes says that he will give her the money, but Syrus suggests that Clitipho deliver it instead, and they arrange the matter in this way. In the next scene, S yrus e xplains to Clitipho that the money is coming. In scene 7 of act 4, S yrus a nd C litipho t ake t he m oney i nto Menedemus's house, and Chremes contents himself by t hinking that the 10 m inae he ha s j ust spent have paid for his daughter's past board and lodging. He ponders the other expenses associated w ith a d aughter's w edding a nd do wry a nd makes it clear that he will spare no expense.

It is easy to imagine that the confusion attending the complexities of t his plot, beyond befuddling th e p lay's c haracters, al so m ystified a considerable portion of the audience.

Scene 8 of act 4 portrays a happy M enedemus announcing t o C hremes th at C linia w ishes to marry C hremes' n ewly r ediscovered d aughter. Chremes is convinced that this is the trick that will bilk Menedemus of his money—money that Clinia will then give to Bacchis. The two fathers agree to appear to be deceived and to apparently assent to a wedding.

606 Seneca, Lucius Annaeus

After f urther pa rental m isunderstandings, Clinia is finally betrothed to Antiphila, and the matter of her do wry is settled. As A ntiphila has proved to be Clitipho's long- lost sister, and as Clitipho's affair with the courtesan Bacchis has earned him his father's disapproval, Chremes decides that he will give all his money to Antiphila and make Clitipho her dependent. Clitipho avoids that indignity only by agreeing to take a wife-one h is father c hooses. Ch remes se lects the red-haired d aughter of his friend Phanocrates. Clitipho objects and names the daughter of a nother f amily f riend. This t ime a ll ag ree. Clitipho is r estored t o f avor a nd suc cessfully intercedes on b ehalf of t he s lave S yrus a s t he play ends.

The reappearance of characters from Terence's *Andria* and the similarities between the plots of the playwright's first and third efforts all suggest that T erence w as r iding a w ave o f a udience approval for the stock characters and situations that characterized his plays.

Seneca, Lucius Annaeus (ca. 4 B.C.E.–65

C.E.) Roman dramatist and prose writer Born to a notable father of the same name in Cordoba, Spain, Lucius Annaeus Seneca was the second of three brothers. His father was a historian and a writer on the art of public speaking. As a child, Seneca was sent in the company of an aunt to be educated in Rome. There he studied rhetoric and philosophy—a subject he particularly pursued so that, to distinguish him from his father, he earned the soubriquet *Seneca the Phi bs o phe* As a contributor to that subject, he was a member of the Stoic school (see St oicism).

Engaging in Roman politics, Seneca was elected to the office of quaestor. Originally an investigative officer who tracked criminals on the orders of the Roman consuls, by Seneca's time a quaestor had become an officer of the Roman trea sury. The office was elective and carried with it membership in the Roman senate. Seneca's abilities as a public speaker and legal advocate, however, provoked the jealousy of the demonic Roman emperor, Caligula, and he was obliged to go into exile, some say to save his life.

Recalled to c ourt u nder the r ule of Claudius, Seneca was accused, probably falsely, of having an affair with C laudius's n iece, J ulia Li villa. B oth were sent into exile, she to her death at the hands of a judicial murderer and he to the island of Corsica. There he s tayed, b ecoming f amous a s a writer. Then, in a r eversal of fortune eight years later, Claudius's wife Ag rippina called the nowcelebrated Se neca b ack to c ourt to t utor N ero, her s on b y a n e arlier ma rriage a nd t he b oy whom Claudius had a dopted to suc ceed h im a s emperor.

Being tutor to Nero was no easy task. Perhaps the œlf- indulgent, amoral emperor displayed his proclivities for wanton mayhem and irresponsibility f rom e arly y outh. I f s o, S eneca, with t he help of t he p refect of t he i mperial (praetorian) guard, S extus Afr anius B urrus, see ms to ha ve been able to c heck Nero's worst ten dencies early in his r eign, and a p eriod of g ood g overnment ensued. On the other hand, some believe that the taste that upper- dass Romans developed for consuming le ad ac etate a s a s weetener l ater d rove Nero insane. In any case, as the emperor became increasingly self-indulgent and c riminal in hi s behavior, Seneca and Burrus's influence with their ruler correspondingly waned.

When Nero wished to divorce his wife Octavia and m arry i nstead P oppaea S abina, h is m other Agrippina objected. Nero vented h is d ispleasure at Agrippina's interference by having h is mother murdered in 59 c.e. Burrus did h is best to stem the public furor the murder provoked, but as Nero spun further and further out of rational control, h is advisers' counsel had little impact. When Burrus died, S eneca t ried to r esign and g ive all h is enormous wealth to the emperor. The emperor refused t he r esignation and deferred ac cepting the wealth. Finally a nd i nevitably, ho wever, re sponsible Romans b egan to plo t a gainst t heir mad r uler, and Seneca seemed to Nero to be implicated in one of t he conspiracies. N ero t herefore o rdered his t eacher a nd m entor to c ommit j udicial su icide. An account of that occasion—one that Seneca w as at s ome p ains to model on t he d eath of Soc r at es—survives in the pages of Tacit us.

From a literary perspective, Seneca was a major figure. While some of h is works are only represented by fragments, we know that he wrote lost treatises on ethics, geography, and natural history. T welve d ialogues su rvive e ssentially i ntact; they t reat s ubjects that include p rovidence, t he constancy of wisdom, the blessed life, leisure, the tranquillity of the mind, and the brevity of life. Beyond those, three more are prose consolations. One i s add ressed to a m other g rieving a s on's death, a nother to a m other bewailing her s on's exile, and a third tried to flatter Nero in an effort to get back in his good graces.

As a phi bs opher, Seneca wrote a bout e thical subjects. A lthough he w as n ot a C hristian, he stood in the same tradition of Greek e thics that influenced early Christian thinking. As a r esult, his treatment of such subjects as death, wealth, the highest good, and happiness led Christians of the middle ages to consider Seneca a fellow communicant and even a correspondent of St. Paul's. Seneca also wrote about subjects of interest to the natural sciences. He did so, however, from a Stoic philosophical rather than from a scientific point of view. In addition, he was the author of several short poems, some of them autobiographical.

From the time of the Euro pe an Renais sance until o ur o wn, S eneca's l iterary r eputation ha s rested pr incipally up on his t ragedies. We have nine c omplete one s t hat have be en confidently ascribed to Seneca. These include four probably based o n pl ays b y Eu r ipides: *Hercules f urens* (*Mad Hercules*); *Medea*; *Phaedra*; and *Troades* (*Ā e Trojan Women*). One, *Agamemnon*, borrows its plot from Aeschyl us. Two more, *Oed ipus* and *Hercules Oetaeus* (*Hercules on Oeta*) rest substantially on the work of S opho cl es. A nother, *Hippolytus*, rests on Sophocles and a second unknown source. Where the inspiration came from for the ninth t ragedy, *Thyest es*, no one is certain. A fragment of S eneca's version of \overline{A} *e Phoenician Women* also survives. A 10th complete tragedy is s ometimes dou btfully a scribed to S eneca. Because, h owever, it is the only R oman tragedy about na tive R oman h istory t o s urvive i n i ts entirety, the pl ay, *Oct avia*, r emains i mportant whatever i ts a uthorship. A s Seneca's e ditor a nd translator, Frank Justus Miller, tells us, the main objection to Seneca's having written *Octavia* arises from the play's c ircumstantial account of the death of N ero, w hich of c ourse o ccurred a fter Seneca's suicide.

Although Seneca's plays do n ot a lways compare f avorably w ith t heir Gr eek c ounterparts, that d efect m ay arise m ore fr om p erformance expectations than from any lack of capacity on Seneca's p art. Se neca a pparently i ntended his tragedies for closet p erformance and for r ecitation among groups of friends or associates rather than for p erformance by trained ac tors on t he public stage. In e arly mo dern England, at le ast, Seneca's tragedies provided models for such playwrights as George G ascoigne, B en Jonson, a nd John Dryden.

Seven against Thebes, The Aeschylus (467 B.C.E.)

The third and only surviving t r agedy of a firstprize winning trilogy, \overline{A} e S even again st \overline{A} ebes recounts the fulfillment of Oedipus's curse upon his neglectful and a busive sons that each would die at the other's hands. The play was preceded by two o ther t ragedies g leaned f rom t he s tory o f Oedipus. The first, entitled Laius, recounted the story of his father, and the second, Oedipus, gave Aeschylus's version of the central episode of the legend. A sa tyr p l ay en titled \overline{A} e Sphin x followed the three tragedies. (See conventions of Greek Drama and Great Dionysia) \overline{A} e Seven against A ebes provides a particularly clear example of the manner in which a play that features the siege of a c ity in a d ramatic tradition t hat precluded onstage death could substitute declamatory verse description for action.

When the two sons of Oedipus, Eteocles and Polynices, succeeded to the throne of Thebes, they were supposed to share power by turns. Eteocles, however, refused to vacate the throne and exiled Polynices. Hein turn raised an army in Argos and with it attacked his native city. As the play begins, a frightened Theban citizenry is awaiting the attack. A chorus of Theban women expresses the general fear as they pray at the city's altars. King Eteocles reproves them for spreading panic and suggests that doing so could undermine the resolve of t he m en def ending t he c ity. H e a lso reassures the women by informing them how his spies have learned the enemy's strategy, and how he has already begun taking measures to counter it by defending the seven gates of the city against seven sq uadrons of t roops to b e le d b y s even heroes.

A spy enters and reports that the seven heroes have sworn a blood oath by the god of war, Ares, to overthrow Thebes. He reports the name of each hero and that of the gate his squadron will attack. As the spy does so, he a lso recounts the emblem that six of the heroes bear on their shields. One of the attackers, a soothsayer, has no device on his shield. A st he spy na mes e ach a ttacking hero, Eteocles re sponds by naming the leader of the defenders who will guard each gate and resist the invading force. The s eventh gate will b e u nder attack from a force led by Polynices, and Eteocles himself will lead the force against his brother.

(For our contemporary audiences, accustomed to graphic battle scenes, the list and counter-list, with th eir a ccompanying verse d escriptions o f the a rms of the leaders a nd t heir p rowess, c an grow a bit tedious. Athenian audiences, however, were accustomed to the way their theater handled such matters. Both Homer a nd Hesiod had earlier featured such detailed descriptions of heraldic devices as part of the color of battle scenes. If the Athenian au dience e xperienced any t edium, it did not affect the distribution of prizes.)

Shocked to le arn t hat t heir k ing w ill ha zard his own person in battle against his brother, the chorus a ttempts to d issuade Ete ocles si nce h is doing s o w ill p rovide a n o pportunity f or t he operation of O edipus's c urse. E teocles, however, scorns t heir advice, r eminding t hem t hat i f h is death by his brother's hand is fated, it will occur one way or another.

Some cr itics h ave s uggested t hat E teocles is the archetype of Ari st ot l e's flawed tragic hero. A c ompetent le ader, public-spirited, c oncerned about t he welfare of h is p eople, he n evertheless allows himself to be blinded by h is hatred of h is brother, and this sets in motion the train of events that leads to the hero's fall.

As the battle rages offstage, the chorus onstage revisits the stories of Laius and Oedipus, telling how the father had b een warned to d ie childless to avoid cursing his land, and how Oedipus, Laius's son, had fulfilled the curse and intensified its effect by adding unwitting parricide and incest to the list of crimes against the gods that his family had committed. The chorus darkly perceives the continuing o peration of t he c urse a gainst t he generations of Laius's progeny.

The spy reenters and reports both the successful defense of the city and the death at each other's hand o f E teocles a nd P olynices. The c horus responds to the news with appropriate prayers gratitude for their city's salvation and horror and grief at the death of the brothers and its manner.

Antigone and Ismene, the sisters of the fallen brothers, and a train of mourners now enter bearing the bodies, and all sing responsively concerning the tragedy. Then, in a scene that some have suggested may be a l ater addition to t he play, as the mourners move off to bury the bodies of the brothers, a herald arrives from the city fathers to forbid t he bu rial of Polynices' body. The politicians r eason t hat since P olynices a ttacked h is native city, he does not deserve decent burial and should simply be left for the vultures. A ntigone, however, will h ave none of it. E ven t hough s he may be punished, she will not leave her brother's corpse unburied. Should she do s o, according to Greek belief, his soul would not be able to c ross into the underworld and would be condemned to wander forever. The chorus decides she has chosen rightly and joins the sisters in their funeral rites for their brothers. The play ends with the citizens praising Zeus for their salvation from the attackers.

Seven Incitements (Wenzhuan) Mei

Sheng (ca. early second century B.C.E.) In this fu poem, Mei Sheng (d. 149 b.c.e.) imagines that a person from Wu visits a fictive prince of the state of Chu. The prince is ill, and the visitor offers to cure him.

The cure begins with the loving description of seven sensory pleasures in which the prince has a t endency to overindulge: (1) l istening to

lute mu sic; (2) e ating fine fo ods a nd d rinking fine wines; (3) riding about in a luxury carriage; (4) spending too much time with courtiers, ladiesin-waiting, m usicians an d p oets; (5) e xcessive hunting; (6) fighting in b attles a nd overcelebrating victories; and (7) spending too much time at the seashore. Only the discussion of hunting seems to bring the prince much relief. Otherwise, at the end of the recitation, the prince feels as miserable as ever.

The v isitor f rom W u, ho wever, r estores t he prince t o instant p erfect h ealth b y o ffering to arrange for some wise men to take over and manage his affairs. This very conventional ending was probably no more convincing then than it is now. What interests the poet are the descriptions of the excesses—not really their cure.

Shepherd, The Hermas (ca. 110–140 C.E.) One of the m ost widely disseminated Christian documents of t he s econd a nd t hird c enturies, Hermas's Greek- hnguage $\overline{A} \ e \ S \ hepherd$ was regarded as a part of the New Test a ment by such early Christian writers as Clement of Alexandria, but as noncanonical by such others as At han asius. Regardless of their points of view concerning $\overline{A} \ e \ S \ hepherd's \ s \ criptural \ s \ tatus, ho wever,$ numerous e arly C hristian c ommentators c ited the work. Beyond those already mentioned, these included s uch figures a s St. A ugust ine, St . Jerom e, Or ig en, Tertullian, and others. As it has been transmitted to us and as it is included in the modern c ollection, \bar{A} e Aposto lic Fathers of the Chr isti an Ch urch, \bar{A} e Shepherd consists of five "visions," 12 " commandments," a nd 10 "parables."

The Visions

From a literary point of view, the work begins as a sort of Christian romance. Ostensibly the author, Hermas, a former slave in Rome but now a freed man, ha ving a lways l oved h is f ormer o wner, Rhoda, as a sister, obs erves her ba thing in t he River Tiber some years after his manumission. He helps her ashore, admires her beauty, and reflects that he would be fortunate to marry such a wife.

Some time later, during a moment of religious reverie, H ermas f alls a sleep, a nd h is r eport o f what next occurs takes on the character of a series of dream visions. In the first, a spirit takes Hermas ac ross a r iver to a de serted place where he begins to pray. As he does so, the soul of the nowdeceased Rhoda addresses Hermas from Heaven. She s ays t hat she ha s " been t aken up to ac cuse [Hermas] b efore t he L ord." H ermas den ies a ny fault, b ut R hoda i nsists t hat h e has en tertained sinful t houghts a bout her. She c ounsels h im to repent and pray.

As Hermas reflects on the state of his soul and wonders how he can be saved, an elderly woman in radiant garments appears with a book in her hand, takes a seat in a chair made of snow-white wool, a nd que stions h im a bout h is u ncharacteristic sadness. The woman tells Hermas that even i f he u nconsciously e ntertained a n e vil thought about Rhoda, what God is really angry about stem s f rom H ermas's too-tolerant i ndulgence of his children's folly. She then offers to read from her book. Subsequently, Hermas, though he has f orgotten m ost o f w hat t he w oman r ead, nonetheless re members how he f elt a mazed. H e does r emember the w omar's last w ords to h im. They ce lebrate t he w onder o f G od's f oreknowledge, h is c reation, a nd t he ble ssings i n s tore for God's elect.

A year later, Hermas experiences a second such vision in the same location as earlier. This time, the s ame woman g ives H ermas a do cument to copy. The document reproves Hermas's wife and children f or t heir s inful behavior a nd c alls o n Hermas to lead them to repentance. Though Hermas i s a t f ault f or f ailing to c hastise t hem, he receives indications that all will yet be well.

Now a young man en ters H ermas's o ngoing vision an d i dentifies the elderly woman as the church for whose sake the world was created. She then r eappears with i nstructions for He rmas about what he must do with the information he has copied from her b ooks. H ermas must write two little books and send them to "Clement and to Grapte." Clement will disseminate his a mong the foreign cities, Grapte will use his to admonish widows and orphans, and Hermas must read his copy to the presbyters who lead the church of his own city (perhaps Alexandria?).

Hermas's third vision comes in answer to his prayer that the el der ly woman provide him with a revelation. She a grees to m eet him in a field that Hermas farms, and when he arrives there, he finds an ivory bench set up. The lady arrives with six young men whom she directs to go and build. Then she d irects H ermas to si t o n t he bench. He tries to defer to her, but she i nsists that he obey her instructions, and when he tries to sit on the right side of the bench, she makes him move to the left. Hermas takes offense, but the l ady e xplains t hat t he right-hand s ide i s reserved for those who have already pleased God and who for God's sake have suffered "floggings, imprisonments, gr eat ad ictions, crucifixions, and wild beasts."

Now, in a nswer to H ermas's plea for a r evelation, the lady shows him a vision of a tower rising from the surface of the water and being built of stone by the six young men. Stones are brought from land and sea. They are of several sizes and shapes. S ome a re used in the building, which is seamlessly crafted, and others are rejected. Hermas a sks, e ssentially, f or a n e xplanation of the

612 Shepherd, The

allegory, and the lady accedes to his request. The tower, she explains is herself—the church. The six young me n w ho a re b uilding a re G od's first-created holy angels. Those bringing the stones are lesser angels.

The squared stones that fit seamlessly into the tower a re t he " apostles, b ishops, te achers, a nd deacons who perform their functions harmoniously as God would have them do." Those drawn from the depths of the sea represent those who have suffered on God's account. Those who have sinned but who will repent are cast away, but not too far as repentance will turn them once again into worthy building materials. If t hey d o n ot repent, ho wever t hey w ill re main o utside t he church's ed ifice. Those c ast far a way from the tower are the lawless and the hypocritical, neither of w hom w ill e njoy s alvation. The l ady a lso explains t he s ignificance of e ach of t he ot her sorts of st ones. O ne s ort, with ro unded e dges, represents t he wealthy who p ut t heir b usiness affairs a head of their religious de votion. Their only hope lies in having their wealth cut off and squaring up their edges. A sort of hope exists for those who do n ot m easure u p, b ut i t i s f eeble when compared with the rewards to be expected for those who do.

The lady now points to seven women standing around the top of the tower. She tells Hermas that they are Faith, Self-restraint, Simplicity, K nowledge, Innocence, Reverence, and Love. Not altogether satisfied that he has fully understood the visions, Hermas prays for further elucidation, and the L ord, s omewhat te stily, a nswers h is p rayer, giving tropological interpretations to every detail of the visions that Hermas has been privileged to see.

In subsequent visions, Hermas escapes destruction by a sea monster—tropologically standing for Satan—owing t o t he p rotection o f an an gel o n account of Hermas's faith. All aspects of the beast, including the meaning of its colors, are explained to Hermas.

In the fifth of H ermas's v isions, a she pherd appears. The shepherd is identified as the "angel of repentance," the one to whom Hermas has been entrusted as a guide to salvation. A reader might have expected that the shepherd would have been identified as Jesus Christ, but rather mysteriously that name never occurs in the entire work. The shepherd n onetheless instructs H ermas to w rite down h is c ommandments and p arables, an d those sections then follow.

The Commandments

The shepherd first commands Hermas to believe "that God is one, [that he] created and completed all th ings," m aking e verything o ut of n othing, and that, though God contains all things, he alone is uncontained.

The second commandment enjoins Hermas to "hold on to simplicity and be innocent" and neither to slander not to listen to slander. He must be reverent, good, and generous.

The third commandment is: "Love the truth." If, i n t he c onduct o f b usiness a ffairs, H ermas knows that he has lied, the shepherd encourages him to behave so as to make that lie into a truth.

Fourth, th e s hepherd i nstructs H ermas t o "guard [his] h oliness" by e xcluding f rom h is thoughts any reflection on a woman other than his wife. A lso, a h usband should d ivorce a w ife who has an affair and does not repent. Thereafter, however, the h usband should live a celibate life, unless his wife repents, in which case he can take her bac k. H ealing a nd r eform ma ke t he si n o f adultery forgivable.

Hermas w ants t o k now, a fter o ne ha s b een baptized a nd r edeemed f rom o ne's f ormer si ns, whether o r not ot her o pportunities f or f orgiveness a re possible should someone backslide. The shepherd r eplies t hat o ne c an b e f orgiven o ne more t ime. I f, ho wever, one s ins a nd r epents repeatedly, on e has e xhausted o ne's r eservoir o f grace.

Hermas then asks if remarriage after the death of a spouse is a sin. The shepherd replies that it is not, but that "superior honor" attaches to life as a widow or widower. This, of course, is the Catholic Church's h istorically o rthodox vi ew o f th at matter. The she pherd's fifth c ommandment r equires patience a nd p rohibits i rascibility, w hose i ll effects h e d escribes at leng th. I n t he si xth, t he shepherd recurs to the first. He wants to d iscuss in more detail the benefits of faith, fear, and selfrestraint. St aying on the r ight pa th w ill a void temptation. Each person, the shepherd avers, has two an gels: o ne r ighteous a nd o ne w icked. The wicked o ne c an b e r ecognized i f a p erson feels angry or bitter, or feels extravagantly desirous of too much food or drink, lusts after sex, or easily grows haughty, proud, or angry.

The s eventh c ommandment r equires t hat a person " fear t he Lord ... and guard his commandments." It also suggests fearing the works of the dev il

The eighth commandment requires refraining from e vil, but no t f rom g ood. I f H ermas had been in a ny d oubt a bout w hat w as e vil, t he Shepherd g ives h im a l ist o f p rohibitions. H e must avoid: "a dultery and sexual immorality ... l avless drunkenness ... evil luxury ... over abundant food ... extravagant wealth ... boasting ... pride ... haughtiness ... lying, slander ... hypocrisy ... bearing g rudges, a nd speaking ... blasphemy." Other lesser wickedness is a lso to be avoided: "robbery, fraud, false witnessing, greed, e vil desire, d eception, v anity, arrogance," and other similar vices.

The shepherd encourages works and words that reveal "faith, fe ar of the L ord, love, harmony, ... righ tousness, truth, and endurance." Performing such w orks a nd s aying such w ords c arries t he promise of happiness in this life and the next.

The ninth commandment precludes doubtfulness a nd e ncourages br inging o ne's burdens to the Lord despite whatever sins one may have committed in the assurance that the L ord is a lways open to the sincere sorrow of the faithful and to their desire for forgiveness.

The 1 0th c ommandment r equires g iving u p grief and sorrow, as they are both related to irascibility, and always being of good cheer.

The 11th commandment requires discriminating between true and false prophets and joining one's petitions to those of the former. The shepherd g ives a n umber of te sts b y which o ne c an decide if a p rophet is reliable or not . Above a ll, one should trust in the Holy Spirit to render false prophets powerless.

The 12th commandment requires the extermination of e very e vil de sire a nd s teadfastness i n desiring t he g ood. Ha ving g iven t hat g eneral instruction, t he s hepherd repeats m any of t he examples of each that he had previously given. At Hermas's request, he also gives a general review of w hat h as gone b efore, t hereby obs erving t he threefold f orm of th e T rinity t hat h as c ome to characterize e verything f rom s ermons to threepoint student research paper.

Hermas o bjects t hat keeping t he c ommandments is h ard b ecause of the devil's power. The shepherd, in h is role a s the a ngel of repentance, assures Hermas that the devil is weak when faced with godly fortitude.

The Parables

Now the shepherd turns to the parables that he wishes Hermas to share. All the "slaves of God" must live as if they are residents in a foreign land, expect to be excluded from the accumulation of worldly r iches, and p ersecuted b ecause they do not revere the l aws of their pl aces of dw elling above those of God.

In the n ext p arable, the she pherd c ompares rich and poor believers to an elm tree and a grape vine. The elm tree bears no fruit, but if it supports a vine, the vine will flourish and bear much fruit. Similarly, the rich are distracted by their wealth and so not very fruitful from a spiritual point of view. If, however, they will support the poor who are ri ch in their p etitions a nd c onfessions, the rich will thereby play the role of the elm tree in making it possible for the vine to b ear a fruitful harvest and not simply bear a little fruit that rots on the ground as it would were it not for the elm's support. L ike the elm a nd the v ine, therefore, both r ich a nd poor w ill be nefit f rom m utual de pen deng.

The she pherd n ext sho ws H ermas ho w t rees that have no leaves are like the people of the second

century: One cannot tell by looking at them whether they are alive or dead—that is, whether they are upright or s inners. The pa rable t hat f ollows t his one c ontrasts t hat s ituation w ith the a ge t hat i s coming, when one can discern the living trees by their buds and the dead by their lack thereof. The upright, in other words, will be identifiable by their acts, and all others fit only to fuel fires.

In the fifth parable, the she pherd r eproves Hermas for fasting physically and instructs him to fast spiritually by avoiding evil desires. To further illustrate this parable, the shepherd incorporates another, telling the story of how a slave, by exceeding his master's expectations in caring for the vines in his field, became the joint heir of his master's estate together with his son.

Hermas i nsists on a n explanation, and the shepherd explains that the master is the creator of the world, the son is the Holy Spirit, and the slave is the Son of God. The vines represent the human race. The she pherd explains other details in the same way: Fence posts, for instance, are guardian angels. But Hermas has still not understood why God's Son was represented as a slave. The explanation i s a b it c onvoluted, b ut e ssentially t he shepherd explains that the Holy Spirit has donned human *flesh* as God's Son on earth. That flesh is the Spirit's "blameless slave" t hat will be sacrificed for human beings, but not the Spirit. The Son's flesh will be sa crificed for p eople s o t hat they too can participate in godhead by accepting the sacrifice and becoming coheirs of the kingdom of G od. The she pherd c ounsels H ermas to emulate the slave and keep both his flesh and his spirit pure.

As the sixth parable opens, Hermas is reflecting on all the good advice he has received and speculating that if he t akes it, he will be fortunate. The Lord, however, objects to that "if" and reproaches Hermas for do ublemindedness. The Lord shows Hermas a vision of a flock of frisky, well-fed sheep being ten ded by a yellow-clad shepherd. But the Lord explains that the shepherd is really a n evil angel intent on ruining people (the s heep) with "vain de ceits a nd l uxuries." Eventually, the misled sheep find themselves amid thorns and brambles being beaten by a she pherd who is in reality the good a ngel of punishment. After appropriate chastisement—a year for each day t hey li ved i n l uxury a nd deceit—if t hey repent, the L ord r eceives them a s h is own, a nd their suffering ends.

Hermas n ext c omplains t hat the p unishing angel is a dicting him a nd a sks t hat t he a ngel leave h is house. The L ord tells Hermas t hat he deserves punishing, not only because of h is own many sins, but also because h is household is sinful a nd l awless. S o Hermas r esolves to "endure every a diction" u ntil h is time of p unishment ends.

The eighth parable recounts a t ale of persons to whom an angel has given the green branches of a w illow t ree. De spite ha ving s o ma ny o f i ts branches pr uned, t he t ree r emains he althy a nd vigorous. Then t he p eople b egin r eturning t he sticks of willow they had taken away. They vary in condition f rom w ithered and moth- aten to green, budding, and bearing fruit. The shepherd and the angel are very pleased with the latter, and they c onfer c rowns o n t hose wh ose st icks a re green and fruitful and s end t hem to t he to wer. Those whose sticks are budding without fruit are also r ewarded, a s a re th ose wh ose st icks ha ve merely remained green.

The she pherd directs that the sticks returned in withered condition be planted in the ground and watered in the hope that many of them will live. He then explains that the willow tree stands for the law of the Son of God, and all whose sticks were either merely green or green and flourishing represent those who have observed the law with varying degrees of fortitude. The withered sticks, of course, represent those who have not observed the law. Yet m any oft hose, once pl anted a nd watered, r evive, a nd t he p ersons t hey r epresent have repented and been saved. The unrepentant, however, who both dissent and break the Son of God's law are condemned to spiritual death. The trope of this parable becomes tedious as it continues long after its point has been clearly made.

The n inth pa rable finds H ermas amid 1 2 mountains of varying degrees of pleasantness and

unpleasantness observing the construction of yet another stone tower. This one, unfinished but left in the care of a company of virgins, a waits the coming of the master of the tower to e xamine each of its stones. Some are found to be rotten and removed. The scenario described in the building of the tower is very similar to that summarized in Hermas's third vision above.

The shepherd leaves Hermas overnight in the care of the virgins and returns the next day to explain the allegory of all Hermas has seen. A n ancient rock stands for the Son of God who is older than all creation. A new gate in the rock is the passageway that the Son has provided into his kingdom for all those who enter in his name.

As he regularly does, Hermas asks for detailed explanations of the tropological meanings of a ll he has seen. He learns that the names of the virgins ar e Simplicity, Faith, Self-Restraint, Power, Patience, I nnocence, H oliness, C heerfulness, Truth, Understanding, Harmony, and Love. Having those qualities and taking the name of the Son of G od qu alifies a person f or entrance in to t he kingdom. C ontrasted with them, however, is a group of women clad in black in whose names are Disbelief, L ack o f Self-Control, Diso bedience, Deceit, Sorrow, Wickedness, Licentiousness, Short Temper, Lying, Foolishness, Slander, and Hatred. Every d etail r eceives c areful explanation-the meaning of the dwellers on the 12 mountains who represent b elievers a nd d isbelievers o f v arious temperaments and spiritual ac complishments or failings.

In the final parable, Hermas learns that he has qualified for the confidence of the shepherd and of the angel who sent him, and that the virgins will come to dwell in his house. The shepherd advises Hermas to carry out his ministry in a manful way, telling everyone to continually do good work s and p articipate i n bu ilding t he church and the kingdom. Many c andidates for authorship of *the shepherd* have been suggested. Least likely is a Hermas mentioned by St. Paul. Most likely is the brother of Pope Pius I, which would put t he c omposition of t he w ork a fter 140–155 c.e.

folk stories. As he turns his attention to Qin and Han times, however, the historian finds himself on much surer ground. His characters cease to be s imply types a nd b ecome i ndividualized portraits.

Like historians in all times and places, Sima is interested in drawing from history the lessons that it can teach the present. He concerns himself with the affairs of human beings and cares little f or a ccounts of supernatural b eings or occurrences—topics t hat h e approaches w ith skepticism.

Like t he E urope an historians of a ntiquity, Sima is not above supplying h is characters with the speeches they might have given if the ones they did give are absent from the record. In fact, his historical approach often tries to recreate the past in dramatic fashion rather than to give merely a running retrospective account. The result is a highly readable, often novelistic account of Chinese antiquity.

Written Chinese is a monosyllabic language. This does not mean that *all* words in Chinese have one syllable and one only. Indeed, in the spoken language, words may very well be polysyllabic. The monosyllabic classification does mean, however, that the great preponderance of Chinese written words have just one syllable. Chinese, however, is also a tonal language, so that the same syllable*wu*, for example—might me an one thing when spoken with a level pitch, a nother when spoken with a rising pitch, and yet another when spoken with a f alling pitch. Thus, t hree s eparate characters, or *sinographs*, would be r equired to render t he three possible c ombinations in t his hypothetical example.

sibyls and sacred verse

Sibyls were women thought to have the power of prophecy. Possibly the word *sibyl* originally designated a woman of that name. If so, however, the word soon came to apply to any of several priestesses who were inspired by gods—often the god Apollo—to utter or to write down predictions and hard-to-interpret solutions to thorny problems.

The Grecian sibyl (also called the *pythia*) who served as the D elphic or acle of Ap ollo a nswered questions put to her by those in need of predictions and advice. As she s at above a fissure in the earth from which, as modern investigations have proved, there issued toxic gases, her answers were generally incomprehensible. Priests of Apollo, however, were present and wrote down in verse their interpretations of her answers on oak leaves. These they presented t o the questioners. As the interpretations also r egularly r equired i nterpretation, h indsight was often r equired to de termine whether or n ot the prediction had been accurate.

Another p articularly f amous sibyl w as t he prophetess who occupied a cavern at Cumae near Lake Averna, not far from contemporary Naples. Again, the escape of volcanic gases probably had much to do with the prophetic and ecstatic utterances o f th e Cu maean sib yl. I t w as she w ho showed A eneas t he pa th le ading to t he u nderworld in Virgil's *Aeneid*.

Sibyls served as the mouthpieces of the gods they represented-most often but not exclusively Apollo. The Roman author Marcus Terentius Varroc ompiled a list of catalogues of sibylline utterances f rom I taly, s everal pl aces i n Gr eece, Asia Mi nor, P ersia, a nd el sewhere. Sibyls a lso prophesied in Egypt and in Palestine, where 200 years of Greek rule and an active program of hellenization had conflated Judaic monotheism and the trappings of Hellenic polytheism in the popular mind to a degree. Early Christians seem also to have been fascinated with sibyls and sought predictions of Christ's coming among their utterances. Later, ho wever, such a Christian Renaissance p oet as P etrarch adopted t he sib ylline prophecies written on leaves that fly away on the winds as a metaphor for untrue scatterings. Those scattered false prophecies contrast, the Christian poet t hought, w ith th e g athered t ruths b ound together in a codex whose prime example was the Bible.

In Rome from a very early date—at least the fifth c entury b .c.e.—texts c ontaining sib ylline prophecies were entrusted to the hands of priests who would consult and interpret them on orders from the senate. Such collections were also to be found in private hands, and these continued to be consulted well into the Christian era in Europe.

Before he retired to the poetic life, Silius enjoyed a d istinguished c areer a s a p ublic official a nd a jurist. He s erved as a consul of the Roman state under the emperor Nero. On N ero's death, Silius tried t o n egotiate b etween conflicting c laims to the i mperial th rone m ade by Nero's general in northern E urope, V itellius, a nd b y N ero's c ommander i n A sia, Vespasian. Though the ne gotiations succeeded and Vitellius agreed to abdicate in favor of Vespasian, the mass desertion of Vitellius by h is t roops le ft him at the mercy of a ho stile crowd of Romans who demeaned, mutilated, and murdered him.

The v ictorious V espasian adv anced Si lius's career. A lready a member of t he Roman senate, Silius rose to become the proconsul of Asia. Thereafter, he retired to his extensive estates and began his massive literary u ndertaking. F or h is poetic model, he c hose V ir gil's *Aeneid*, a lthough h is debts to Lucan also abound. For historical detail, he consulted Livy.

Silius b egins Punica from the p remise t hat Dido's dying curse a gainst a f aithless A eneas in the Aeneid was fulfilled by the second Punic War fought between Rome and Carthage. He restores to his epic the gods that Lucan had excised from his Civil War, and like many ancient and modern p oliticians a nd p oets w ho c laim d ivine authority for t heir ac tions or godly provenance for their inspiration, Silius drafts the victorious gods into the service of the Roman cause, leaving the arti-Roman g oddess J uno i n a c ontinuing state o f f rustration a bout t he suc cesses o f t he Roman de scendants o f V enus's s on, t he T rojan Aeneas. The g reat Ro man v ictor o ver t he C arthaginians, Scipio Africanus, is celebrated in Silius's lines.

Silius probably completed his work around 96 c. e. Not long thereafter, his health failed and he fell v ictim to a pa inful and i ncurable si ckness. Rather than suffer needlessly, Silius took his own life by ceasing to eat.

Long thought to be lost, the *Punica* resurfaced in 1417. New studies, some of them underway at

Sima Qian (Ssŭ-ma Ch'ien) (ca. 145–86 B.C.E.) Chinese historian

The first major Chinese historian, Sima Qian was a child prodigy. By the age of 10, he had a lready distinguished himself in scholarship, and by 20 he had u ndertaken a g rand to ur of the Chinese empire. S ima's fa ther, S ima T an, s erved a s t he empire's principal a strologer and "prefect g rand historian," and when he d ied in 110 b.c. e., Si ma inherited the p ost. I n ad dition t o completing a project started by his father to update the calendar, Sima also undertook the task of completing the h istory of C hina t hat t he ol d s cholar had begun. This became Sima's great life work.

So dedicated to his task was Sima that when he angered Emperor Wu and was punished with castration, he did not, as was usual in such circumstances, co mmit s uicide. A s t he h istorian explained in a letter to a friend, Jen An, though he w as sha med b y h is p unishment, he w ould have b een m ore g reatly sha med to t hink t hat posterity would not k now his writings. To preserve them, he declared, he would suffer a thousand mutilations.

Sima's magnum opus covers almost 3,000 years of Chinese history from the earliest known times down to h is o wn d ay. The work, en titled *Shihji* (*Shih- di*, *Historical Record*, *Records of the Grand Historian of China*) is massive: It contains 526,500 words—not quite twice as long as this present volume. It was an unprecedented undertaking that presented daunting physical and intellectual challenges. In the first place, paper had not yet been invented. Sima presumably had s cribes to a ssist him, but nonetheless he or they would have been constrained t o paint on expensive silk or, more likely, to scratch their words with ink and s tylus onto n arrow b amboo st rips t hat served a s t he common writing materials of the day.

From a n i ntellectual point of view, Sima had few models to follow. Though chronicles had been kept b efore h is t ime, ma ny of t hem had b een destroyed in a n otable book burning during the Qin (Ch'in) dy nasty (see a nci ent Ch inese dynasties and periods). Even with respect to surviving models he may have had, he organized his m aterials i nnovatively. I n 1 30 c hapters, he arranged his discussion under several major (capitals) a nd m inor (lower-case) ca tegories t hat included: a) annals of the emperors; b) ch ronological tables; c) rites; d) music; e) pitch-pipes; f) the calendar; g) astrology; h) imperial sacrifices; i) watercourses; j) political economy; k) annals of the feudal nobles; and l) many biographies of outstanding m en. This la st feature was particularly innovative.

Not s urprisingly, t his m onumental ac hievement b ecame the mo del for all subs equent Chinese historians. As the literary historian Herbert Giles tel ls u s, h istories i n i ts l ikeness were ke pt from S ima's tim e forward un til, in 1747, all 2 4 dynastic h istories of China were gathered i nto a uniform edition running to 219 large volumes.

Sima Xiangru (Ssŭ-ma Hsiang-ju)

(177–119 B.C.E) Chinese poet

A poet at the court of the former Han dynasty emperor Wu (reigned 141–87 b.c. e.), Sima Xiangru wrote fu poems that established the norms for the genre that poets thereafter followed. His most c elebrated work, entitled "Master V oid Rhapsody," or "Mr. F antasy" (Zixufu, or T zu hsü fu), is reported to have been the work that made him a member of the emperor's personal entourage.

The literary historian Lai Ming speculates that several a ttributes of S ima's fu appealed to the emperor. The poet combined the literary form of the "question and answer mode" with moralistic overtones in the context of lengthy, highly decorative verse.

The em peror first bec ame acq uainted with Sima's verse by reading a copy that someone had given him. The ruler assumed that the writer was dead. On being told that he was a living poet, the emperor immediately sent for Sima, making the poet a court official so that the emperor could enjoy his companionship.

Sima a ssured h imself of t he em peror's c ontinuing favor by writing a poem, *Shang Lin Fu* (The I mperial H unting P reserve), t hat, i n a t riumph of the poet's a rt, c elebrated the emperor's favorite pa stime a nd t he su mptuous v enue i n which t he em peror f ollowed t his pa ssion. The poem employs detailed, gorgeous descriptions of every p lant a nd e very a nimal, b oth r eal a nd mythic, associated with the art of hunting.

In his p rivate life, b efore becoming a c ourt official, Sima had the reputation of being a lady's man. Penniless himself, he pursued the widowed daughter of the wealthy Cho family and won her by playing and singing love songs. At first cut off from her family, the d aughter, W en C hun, a nd Sima contrived to support themselves by running a small inn and serving wine. This created a scandal from which Wen Chun's wealthy father finally extricated h is fa mily by presenting h is daughter with 100 servants, a n en ormous su m of m oney, and m any valuable p resents f or her do wry. She and Sima closed their inn and thereafter enjoyed the style of life appropriate to t he idle rich until the imperial summons to court.

As t ime w ent on , t he emperor d iscovered i n Sima a trusted diplomat who was able to enlist the leaders of i ndependent states u nder t he imperial standards. Beyond that, the story is told of the way in which t he empress C hen, w ho w as e stranged from the emperor b ecause of her je alousy, h ired Sima to w rite a p oem of fewer than 1,000 words, the *Chang M eng F u* (the Chang Meng palace poem). Sima ended his successful life as the Master of the Imperial Literary A cademy at the age of 61. Some six of the 29 fu poems that he reportedly wrote survive.

Sima Xiangru's fu poems

Six fu poems of the 29 that Sima Xia ngru wrote are k nown to su rvive. These i nclude "Zixufu" ("Tse H su Fu"; M r. Non-being, o r Si r F antasy) and "Shanglingfu" ("Shang Lin Fu"; The imperial hunting p reserve), w hich I de scribe b elow. The other s urvivors i nclude "Da renfu" " Ta J en Fu " (The i mmortals), C h " Chang M eng Fu " (The Chang Meng Palace poem), "Meirenfu" ("Mei Jen Fu"; The beauty), and "Ai Ershi" ("Ai Erh Shih"; Lamentations for Ershi).

The poet expanded the first poem named above to include the second when he was called to the imperial court. The two poems sometimes appear together and sometimes separately. Both of them concern the subject of hunting.

The first opens by explaining that Sir Fantasy, Master No-such, and Lord Not-real are discussing hunts in the states of Qi (Chi) and Chu. Sima tells how, in Qi, 1,000 carriages and 10,000 horsemen set off to catch every imaginable sort of game, and as they clear the land of its animals, the king of Qi asks Sir Fantasy if the state of Chu can offer such fine hunting.

Sir Fantasy obliges by describing a wondrous landscape filled with exotic flora and fauna whose names he lists and whose features he sometimes details. Then he describes the king of Chu and his companions. Next, Fantasy admires the beauties and the skill at archery of the maidens who also ride to the hunt. Then he explains how musical instruments give the signal to end the hunt, how everyone reassembles in proper order, and ho w the king of Chu ascends to his pavilion to dine in perfect co mfort. H e concludes h is description with an invidious comparison between the gentility of the king of Chu when compared with the less- dgnified hunting practices of Qi.

Offended, the king of Qi falls silent, and one of his retainers reproves Fantasy for his ill manners. The retainers then undertake to praise the superiority of C hu. L ord Not-real, ho wever, r ebukes both Sir Fantasy and the Qi retainer who should have u sed t he o ccasion to t ry to c larify for t he kings of Chu and Qi their responsibilities, and for their failure to r eprove their sovereigns for their lapses—in other words, for not doing the things that g ood C onfucian ministers a re su pposed to do for their kings.

Then Lord Not-real undertakes the description of t he e mperor's Shang-lin Pa rk (the s econd poem). In his description, in detail, gorgeousness, and m usicality of l anguage, L ord Not-real out does the wonders that the preceding speakers had detailed. When Lord Not-real describes the imperial b anquet, h owever, he ma kes t he em peror himself r emark on t he "wasteful e xtravagance" that has marked the occasion. The emperor worries that he has set a bad e xample for the r ulers who will follow him, and he sends everyone away. He g ives ord ers that th e h unting p reserve b e turned into farmland and that the lakes be stocked with fish to h elp feed t he c ommon people. The poor need to be fed. The emperor, in short, proposes a new order with new laws and regulations that will benefit the masses of the populace and not merely the wealthy.

The emperor h imself u ndertakes to ma ster a series of skills, virtues, and texts that characterize the l earning of a prop erly e ducated C onfucian gentleman: "etiquette, music, archery, charioteering, w riting... mathematics...," and the contents of the *Book of Odes, Book of Documents,* and *Book of Change s*.

Having given a n e xample of t he w ay a j udicious l ord p repares h is r uler's m ind to t ake instruction from h is o fficials, L ord Not-real explains to his predecessor speakers that it is their job to instruct their emperors and not waste their time in idle c omparisons of grandeur. He a lso observes that the kings of Qi and Chu both "merit pity," since they devote nine- tenths of the arable land i n t heir d omains to p rivate ple asure, a nd their people will certainly suffer.

Ashamed of their previous boastful performances, Sir Fantasy and Master No-such apologize for their uncouth ignorance and for talking too much. They thank Lord Not-real for his good instruction.

Simonides of Ceos (ca. 556–468 B.C.E.) *Greek poet*

Born on the island of Ceos to the family of a man named Leoprepes, Simonides became one of the most renowned poets of his epoch.

Poets in the Greek world fulfilled in part the function that press agents and spin doctors now perform. Sometimes poets c elebrated the victories of a thletes a nd wa rriors; s ometimes t hey wrote occasional poetry for weddings or funerals. G ood poets were ge nerously rewarded for their work, and their reputations spread throughout the Greek M editerranean world. M oreover, competitions frequently pitted poets against one another, and Simonides is said to have won 57 such contests.

Though on ly f ragments of S imonides' works survive, h is r eputation has en dured. H e w as a widely respected lyric poet who may have begun his ca reer in t he s ervice o f H ipparchus, t he younger son of an early ruler of Athens, Pisistratus. Thereafter, Si monides' p en w as f or h ire b y anyone who needed it. He apparently worked for individual a thletes, s inging t heir t riumphs a nd accomplishments. He also wrote to order for the princes of Thessaly. A f amous t hough su rely apocryphal story has su rvived c oncerning o ne such commission.

Contracted to write a poem in praise of the ruler, Scopas, Simonides did so. He also included in this work the customary praises of the gods, in this case of the Dioscuri, Castor and Pollux, the stellified sons of Zeus in the form of a swan and their human mother, Leda. Apparently offended at having to share the poem's spotlight with the twin immortals, Scopas only paid Simonides half of the sum agreed upon when the poet read his

622 Socrates

work at a banquet. Scopas told Simonides to collect t he o ther half of h is fee from t he D ioscuri, who had received half the poem's praise.

Shortly thereafter, so the story goes, Simonides was su mmoned t o the p alace g ate where t wo young men were asking for him. He left the dining h all, b ut f ound n o o ne a t t he ga te. I n h is absence, however, the roof of the hall fell in, killing Scopas and the other guests. Other such stories decorate the legend of Simonides.

More credible reports and a few fragments some discovered at Oxyr hynchus—give firmer evidence of the poet's ac complishment. In addition to athletes and rulers, he wrote for cities and for private individuals. His range of poetic varieties was broad. It included two sorts of choral lyric, hymns of praise, laments, and poems celebrating his p atrons' a ccomplishments. H e a lso w rote el eg y and el ega ic poet r y as well as historical poetry. Celebrated examples of the latter include his mw- bst poems abo ut the battles of P latea (479 b.c.e.) and Art emesium (480 b.c.e.). He is also credited with many epigra ms. He was capable of w riting p oems of the h ighest n obility a s well as highly erotic verse in his elegies.

The Roman p oet H or a cet ranslated at least two lines from Simonides and incorporated them into the second ode of Hor ace's third book of *Odes*. Simonides lived a long and famous life. He died on Sicily at the court of Hiero, the tyrant of Syracuse.

Socrates (469–399 B.C.E.) *Greek philosopher* A native of A thens, Socrates spent his whole life there, supporting himself as a cobbler. Socrates did not write books. A lthough he t aught i n h is own fashion, he established no educational institutions. Yet, a long with Pl at o and A r istot le, Socrates acquired a reputation as one of the three preeminent philos o pars of ancient Greece.

What we k now a bout S ocrates co mes f rom three sources written by people who knew him. One of t hese is X enophon of A thens, whose Memorials of Socrates (Memorabilia) sketches the character of Xen ophon's revered teacher at the ethical a nd p ractical r ather t han a t t he p hilosophical l evel. I n t his work, X enophon t reats Socrates' r eligious v iews, his m oderation in all things, and his willingness to discourse with anyone. Like Plato, Xenophon also wrote a Socratic Apology, in which he r eported Socrates' defense when the Athenians put him on trial for impiety. As Xenophon was off on an expedition with the Persian prince Cyrus at the time, he had to r ely on the descriptions reported by his friend Hermogenes. In Xenophon's version, though Socrates, as in P lato and e lsewhere, i s innocent of t he charges against him, he is nonetheless willing to die to avoid the ad ictions that accompany old age rather than, as Plato suggested, on principle.

Also notable among Xenophon's Socratic writings is his *Symposium* (Banquet). In this work, he reports the doings at a banquet held in 421 b.c. e. at the home of Callias. X enophon describes the entertainment and activities at the banquet and pictures Socrates as a relaxed, jovial, and genial companion. Socrates' more serious reported conversation centers on the inferiority of carnal love to spiritual love.

Like Xenophon, Socrates had also been a soldier, fighting for Athens in three notable military engagements. H ef ought at P otidea (432–29 b.c.e.), at Delium (424 b.c.e.), and at Amphipolis (422 b.c.e.). S ocrates d istinguished h imself b y his remarkable endurance on t hese c ampaigns. He was able to w alk b arefoot on frozen ground and stand lost in thought all night long without fatigue. The consumption of alcohol did not seem to affect him. In a work on household management (*Oeconomicus*) Xenophon has Socrates discussing agriculture, leadership, daily life among the Athenian wealthy, and the roles of women as wives and house holdmanagers.

The s econd s ource o f o ur k nowledge a bout Socrates is Plato. In his Socratic dialogues, Plato made Socrates into a l iterary hero. A lthough it may b e t he c ase t hat i n r eal l ife t he v iews o f Socrates and Plato were identical, it seems more likely t hat in P lato's w orks, Socrates b ecomes Plato's spokesman. It is also the case that, as far as w e k now, n one of P lato's c ontemporaries accused him of misrepresenting Socrates' views.

In P lato's first set o f S ocratic d ialogues, Socrates' views emerge by inference as he raises questions about others' convictions without presenting h is own. This set of d ialogues i nclude: Alcibiades, Apology of Socrates, Charmides, Cleitophon, Crito, Euth yphro, Hippias Major, Hippias Mi nor, L aches, L ysis, M enexenus, and Protagoras. Two other Socratic dialogues exist whose attribution to Plato has been questioned: Lovers and Hipparchus. I nt hese d ialogues, Socrates emerges as a not altogether sympathetic know-t- al and gadfly.

A second set, the so-called middle dialogues, are p receded b y t wo t ransitional o nes: *Gorgias* and *Meno*. I n t he m iddle d ialogues, S ocrates retreats from continually challenging the views of others, offering his own views instead. This group of d ialogues i ncludes *Phaedo, Ph aedrus, Ā e Republic*, and *Sympos ium*. In this group, Socrates emerges a s a n ad mirable a nd c ongenial figure with firm, consistent, a nd noble c onvictions. I n Plato's later dialogues, S ocrates takes a back seat and Plato speaks mainly for himself.

Although the views of Socrates presented by Plato and by Xenophon differ, they are not essentially incompatible. When we come to the third source of our information about Socrates, however, a very different perspective emerges.

The comic playwright A r isto phanes makes Socrates the object of vitriolic satire in his play $\overline{A} \ e \ Clo \ uds$. Here A ristophanes r epresents Socrates as a Sophist w ho runs a private school in hi s home—a tuition-accepting in stitution called " the Thoughtery." P upils t here le arn to address such problems as "How many times the length of its legs can a flea jump?" or "Does a gnat buzz through its proboscis or anus?"

Although the p lay w as not a g reat suc cess, given the popularity of Athenian theater, Aristophanes' mo ckery may well have e stablished t he popular per ception of Socrates—one t hat conceivably played a role in the decision of the Athenians to accuse Socrates of the crime of impiety and to sentence him to commit suicide by drinking hemlock in his 70th year.

History, in any case, rejects Aristophanes' portrait of S ocrates as a c onniving c harlatan a nd instead remembers him as a cobbler, a soldier, the husband of a sh rewish b ut n onetheless b eloved wife named Xantippe, and the patriotic father of Athenian children. H is appearance was odd. He seems to have been ugly and potbellied, but at the same t ime p eople fou nd h im u tterly c harming. He considered himself to have an interior "divine sign"—one that warned him from any action that would be wrong or unjust. He preferred the spoken to the written word lest reliance on the latter impair the memory.

Because Socra tes co mes to u s t hrough t he eyes of t hree v ery d ifferent w riters, t rying to discover the unvarnished views of the historical Socrates i n t heir pa ges may b e a n e xercise i n futility. With respect to his influence on philosophy, he fou nded a p hilosophical m ilieu i n which t hinkers co ncerned t hemselves p rincipally w ith que stions a bout t he o rigins of t he universe and the operations of natural phenomena. By t he t ime he d ied, h is c onversational teachings had played a major role in shifting the focus of ph ilosophical in quiry to que stions of ethics and to the investigation a nd a nalysis of concepts.

Solon (fl. ca. 594 B.C.E.) *Greek statesman, poet* Said t o be descended f rom C odrus, t he l ast o f Athens's legendary kings, Solon was born at Salamis on the island of Cyprus. Tradition has it that he spent time in his youth traveling to Egypt and other Mediterranean countries while engaging in trade. Perhaps his ventures succeeded, for he was able to retire to Athens while still relatively young and to spend his time there in literary and philosophical pursuits.

The state of Athenian politics, however, compelled Solon's attention. By m eans of a ma rtial poem, h e e ncouraged t he A thenians to ma ke war against the neighboring city-state of Megara. Taking a command himself, he overcame his native city of Salamis. H is success as a general led to h is appointment as a rchon of the citythat is, as head of t he A thenian state. In that capacity, S olon p romulgated l aws w hose e ffectiveness h as m ade h is na me a b yword f or wisdom. Naturally, as with any politi al reform, some were satisfied, but most were not. N onetheless, S olon's re formation of the Athenian legal code laid the foundation for A thens' subs equent a scendancy a s a successful democracy.

Song Yu (Sung Yü) (fl. ca. 290–223 B.C.E.) *Chinese official, poet*

The nephew of the poet Qu Yua n, Song Yu was an official at the Zhou (Chou) dynasty's court and an influential poet. Little else is k nown concerning his life. So ng Yu is historically c redited w ith a number of c ompositions. Some of those c redits, however, a re c ertainly m istaken, o thers a re i n doubt, a nd s till o thers a re p resumed to b e accurate.

A major work in the second category is a work in several sections that runs to almost 300 lines— \overline{A} e Nine Changes (Jiu Bian, Chiu Pien). This work is in an elegiac mood that seems to cha racterize Song's c omposition a nd lo oks to C hina's m ost famous poem, Li Sao (Encounter ing Sorrow), as i ts m odel. A ccording to Si ma Q ia n, w ho included a biography of the poet Qu Yuan in his monumental history the *Shiji*, Song Yu w rote a famous poem, \overline{A} e Summon s of the S oul (Zhao Hun, Chao Hun) that had mistakenly been attributed to Song's u ncle Qu Yuan. Sima a lso reprovingly includes Song Yu among a group of poets who lacked the c ourage to c orrect the C hou emperor's misjudgments. Partly as a r esult, says Sima, the Zhou (Chou) dynasty fell victim to the Qin (Ch'in) 30 years later.

Song Yu see ms to have been a ma ster of the genre of a ncient C hinese v erse k nown a s fu poems. Fu is va riously t ranslated a s rhapsody, rhymeprose, or prose poe m. Among the poems attributed to Song Yu is a "Rhapsody on the Lechery of Master Tengtu." He is also credited with a pair of rhapsodies celebrating a love goddess who had earlier app eared in Encountering Sorrow. In the first, "Rhapsody on Mount Gaotang," the goddess appears in a king's erotic dream. In the other, "Rhapsody o n t he G oddess," t he p oet h imself dreams of the goddess, but she eludes his embraces and, as the literary historian Anne Birrell points out, reverses the usual ancient Chinese literary presen a ton of male- female roles by b ecoming t he rhapsody's dominant figure.

Sophist

Though t he ter m *Sophist* originally denoted a wise or learned person, it later came to be applied

in the Greco-Roman sphere to teachers of mathematics, politics, and especially rhetoric. As those who taught rhetoric in ancient, democratic Athens came increasingly to f ocus on the form and manner of p resenting a spe ech or an a rgument and to de-emphasize c ontent to the p oint that arguments s ometimes b ecame non sensical, the word *Sophist* acquired a negative sense. Sophists came to be perceived as nitpicky hairsplitters who would argue any position regardless of how trivial or a bsurd it might b e. It was in that light that Soc r at es and Pl at o v iewed s uch S ophists of their time as Gorg ias of Leont ium and Protagoras (see *Prot agor as*).

Later, b y t he t ime t he Ro man E mpire had established its power through the Mediterranean world, the Sophists who taught rhetoric, mathematics, and politics had recovered their respectability a nd t heir r eputation f or w isdom. This period of the renewed importance of Sophists is called t he Se cond Sophistic—a term co ined i n *Lives of the Sophists* by L. Fl avius Phil ost r atu s, (fl. ca. 210 c.e.). He composed a series of biographical s ketches t hat included p ortraits o f rhetoricians and orators from the time of Protagoras i n t he fifth c entury b.c.e. u ntil t he e arly third century c.e.

During t he Se cond So phistic, So phists acquired great intellectual authority. The fourthcentury c.e. Sophist and Byzantine Themist ius Euphr a des, for e xample, established an important school at the capital of the Eastern Roman Empire, tutored the children of the imperial family, and served creditably in a number of important poltical and ad ministrative offices. O ther Sophists at Rome and at Athens offered rhetorical instruction t o s uch m en a s Ci ce r o —men w ho would be at the heart of the intellectual and political life of their times.

Many of those second-period Sophists who specialized in delivering orations acquired the same sort of fame and adulation accorded 21st- æntury celebrities. These Sophist orators would travel the Roman world with a n entourage of d isciples and followers, pre senting or atorical s et pi eces b efore enormous and enthusiastic audiences.

626 Sophocles

Although the p ersons c alled S ophists r ecovered t heir r eputation f or w isdom a nd ac quired fame through their public speaking abilities, the word *sophist* itself continued then and continues now t o c arry a p ejorative o vertone a nd is often applied, f or e xample, to t hose w ho f ormulate empty arguments designed to attract adherents to par **t**c uhr points of view.

Sophocles (496–406 B.C.E.) *Greek tragic playwright*

The son of a well-to-do manufacturer of armor, Sophocles was born just outside Athens at Colonus. He spent his long life in Athens at the height of the city's wealth and renown. Most of his professional effort went into playwriting.

His translator and e ditor, Hugh Lloyd-Jones, lists the titles of 1 24 of S ophocles' tragedies, of which se ven su rvive in their entirety. A sig nificant f ragment of an eighth en titled *Ichneutae* (The hunters) was discovered in an ancient trash heap in an Egyptian city called Oxyr hynch us in ancient times and Behnasa today. That fragmentary play concerns the theft of the cattle of Apollo, the s un g od, b y t he m essenger o f t he g ods, Hermes. L ess s izable f ragmentary r emains e xist for more t han 90 other pl ays. M ore h ave b een uncovered that are unassignable. Beyond Sophocles' tragedies, Iloyd- bnes l ists t he t itles of 24 lost s at yr pl ays at tributed t o S ophocles w ith varying degrees of confidence. The works surviving in t heir e ntirety in clude *Ajax*, *Ant igone*, *Ele ctr a*, *Oed ipus at Colo nus*, *Oed ipus Tyr annus*, *Phil octe tes*, and *Tr achiniae*.

In the Gr eat D ionysia, the annual Athenian competition h eld i n c onnection w ith the c ity's celebration of the great festival of the god Dionysius, S ophocles' en tries w on 18 t imes. H is first victory c ame i n 468 w hen his entry t riumphed over t hat of A eschylu s. Tob e a c ontender, a playwright's submission had first to survive a preliminary c ompetition. O nly t he to p t hree a spirants h ad t heir en tries s elected. E ach en try comprised a tetralogy—three examples of t r agedy and a satyr-play.

As a dramatist, Sophocles earned a reputation for innovation. Whereas the tetralogies of Aeschylus, for example, contained linked tragedies that functioned like the acts of a single long play (see Or estei a), S ophocles introduced the practice of letting e ach oft het hree t ragedies s tand on its own. A eschylus s eemed m ore i nterested i n t he religious i mplications of h is d rama t han d id Sophocles, who was principally interested in the operation of t he h uman w ill. W hen S ophocles' characters suffer, they suffer the consequences of actions t hat a rise f rom t heir o wn p sychological and moral makeup rather than from a general curse inflicted on the generations of a family, as in Aeschylus's treatment of the curse on the house of Atreus (see Agamemnon.)

The tragic flaws of Sophocles' heroes and heroines ari se, as Ari st otle said they d id in g ood tragedy, fr om an excess of a character's v irtue. His heroines and heroes are all rather idealized, noble p ersons. I n *Poet ics*, A ristotle quo tes Sophocles as r emarking that "he d rew m en a s they ought to be; Eur ipides as they are." No love was lost between the two dramatists, who apparently exchanged accusations of plagiarism. As a n A thenian c itizen, So phocles a chieved both r enown and ex traordinary p ersonal p opularity. He was handsome and approachable, and the citizens reposed confidence in h is capacities to deal competently with public affairs, including military ones. On two occasions, they elected him to the post of *strategus*. In this capacity, Sophocles served as one of 10 Athenian military commanders of a r egiment of t he he avily a rmed foot s oldiers called hoplites, and he w as a g eneral in a naval expedition against Samos in 440 b.c.e.

Sophocles lived an unusually long life, and he remained productive till its end. His *Oedipus at Colonus* was produced posthumously by his son, Sophocles the y ounger. L ate in life, Sophocles invited an Athenian courtesan to share his quarters. His children filed suit alleging his incompetence to manage his own affairs. To defend himself against the charge he read the jury a d raft of his *Oedipus at Colonus*. The court found S ophocles competent, a nd, perhaps a st he c hildren had feared, he left his money to his companion.

Spring and Autumn of Mr. Lü, The

(Lü shih ch'un-ch'iu, The Spring and Autumn Annals, The Annals of Lü Buwei) Lü Buwei (ca. 220 B.C.E.)

Purported to have been anonymously compiled at t he re quest of t he m erchant s tatesman Lü Buwei (Lü Pu-wei), the *Spring and Autumn of Mr.* $L\ddot{u}$ is an innovative document that bears the name of its sponsor rather than that of its compiler. A lthough it s c ontent c omes l argely f rom pre de ces sors, its form is the first Ch inese work designed to make the work's or gan za ton reflect the nature of the universe.

The book's three principal sections reflect the interdependence of h eaven, e arth, a nd h umankind. The first section, entitled "Prescriptions"the heavenly section-contains 12 c hapters, o ne for each mont h of t he year. Each chapter begins with a description of the month and of the initiatives of government t hat a re appropriate to t hat month. For the earthly section, entitled "Considerations," the numerological key is eight. To the ancient Chinese, the number eight symbolized earth, and each chapter in the section is further divided into eight smaller sections. The third section i s k eyed t o the n umber s ix, symbolizing humankind. Therefore the section, called "The Six Discussions," contains six chapters, e ach o ne o f which is further divided into six subdivisions. The literary h istorian Bu rton W atson su ggests t hat this careful formal structure is meant to imply that the work is a "compendium of k nowledge" about the "celestial, natural, and human worlds."

Polti al issues occupy most of the work's attention. Topics treated in its pages include agriculture, judging the capacities of men, avoid ing being fooled by flatterers, and appointing men to the offices for which they are best suited. Conversations between sages and questioners often serve to illustrate the points under discussion, so Confu cius might speak to a politician or a d isciple about the topic at hand.

Aside f rom i ts or gan za ton, not much new appears in \overline{A} e Spring and Autumn of Mr. Lü. It draws i ts c ontent p rincipally f rom such e arlier annals a s S ima Q ian's Shihji. Watson r eports that Lü Buwei's work does preserve a few legends not found elsewhere.

Statius (Publius Papinius Statius) (d. 96 C.E.) *Roman poet*

Born i n Naples to a f ather w ho l ater b ecame a teacher in the household of the Roman emperor Domitian, St atius d isplayed p oetic t alent a t a n early age. He was educated in Rome and thereafter b ecame a p rofessional poet—one f avored b y the Emperor Domitian, as it seems, since Statius three times took first place in dramatic competitions held at the games near the emperor's villa at modern Alba.

Imperial favor notwithstanding, Statius seems to have su ffered f rom poverty. He managed t o eke o ut a l iving b y s elling d ramatic p ieces to actors. In addition to what ever these pieces may have been, Statius also wrote t wo known e pics. The most c elebrated of t he pa ir, \overline{A} ebais, uses some of the same narrative material that informs Aeschyl us's \overline{A} e Sev en against Thebes, tracing t he c ompetition a nd w arfare b etween t he brothers Polynices and Eteocles for control of the city and its eventual capture by Theseus. Statius's other epic, Achilleis, follows the career of Achilles before the Trojan War. That poem survives in a very incomplete state.

Also e xtant fr om S tatius's p en w e ha ve five books o f m iscellaneous l yrics gr ouped tog ether under the title *Sylvae*. The quality of the pieces in this compilation is very uneven.

Perhaps the emperor made a grant of land to Statius to r elieve h is p overty, for w hile he w as still a young man, he retired to h is place in the country and died there at a comparatively early age.

Stoicism

The Stoic philosophy is named for the locale in Athens at which one of Stoicism's found ers, Zeno of Citium (333-264 b.c.e.), a native of the island of Cyprus, propounded his views. This was a colonnade or, in Greek, a stoa. The Stoics pursued three avenues of study as they sought to advance their p hilosophical p oint o f v iew: e thics, log ic, and physics. The last of these was crucial to the Stoic position, for Stoic philosophy regarded the essential ground of being in the universe as material rather than spiritual. This materiality, however, i n n o w ay d iminished b eing's c apacity f or creative activity. The Stoics perceived it as an eternal, living fire with the same creative i mpulses that Pl at o attributed to God and to the realm of spirit. Their viewpoint on the universe had something in common with that of the ancient Hindu thinkers in that the Stoics believed the eternal fire periodically created, destroyed, and then recreated the universe in a thoroughly de terministic and endless cycle of identical events.

For the Stoics, a h uman being's unique reflection of the universal creative fire was reason. Reason compelled those who followed the Stoic path to concentrate on matters that lay within their ability t o influence. These included their o wn actions and the operations of the social and political systems within which they functioned. At root, the Stoics were rational empiricists. They found it pointless to worry about what they could not do anything about: death, natural disaster, or the end of the world. They instead tried to l ive e thically and moderately and to avoid illicit sensual gratification, t he e xercise o f u nreasonable p ower, a nd the pursuit of fame. Civic virtue, they felt, had to be b ased o n the virtuous qualities of i ndividual citizens. Otherwise, civic virtue would be a sham.

In Greece, thinkers who advanced the Stoic position included such philos ophers as Ariston of Chios (fl. 250 b.c.e.), Herillus (fl. ca. 3rd c., b.c.e.), Cleanthes (ca. 330-ca. 2 30 b.c.e.), and the especially important Chrysippus of Soli (ca. 280-ca. 20 6 b .c.e.). C hrysippus s ystematized the Stoic viewpoint and marshaled its most convincing a rguments. L ater Sto ics i n t he Gr eek world s oftened t he Sto ic p osition s omewhat, incorporating into it some of the more spiritual views of Plato and the thinking of Aristotle. A similar trajectory seems to have been followed by the ancient Indian atheistic philosophy represented i n t he Lokāyata, w hich ma y ha ve given rise to the viewpoints both of Buddh a and of early Jain philosophers.

In Rome, it is perhaps fair to say that Stoicism became more of a personal and sometimes state et hical p rogram t han a p hilosophical movement. One sees its operation in such political and literary figures as Cato the Censor (see Or igines); Cice ro; Seneca; or St. August ine's friend, S ymmachus, t he i mperial prefect of Rome. Symmachus was a part of the rearguard action of Roman intellectuals who mounted a foredoomed effort to preserve the toleration of conflicting religious points of view in the face of the r eligious intolerance of state-sponsored Christianity.

For a time, Stoicism had a powerful spokesman in the person of the Roman emperor Marcus Aurelius Antoninus, whose *Medit at ions*, written in Greek, reveal the character of a man who resisted the tendency for absolute power to corrupt absolutely and who believed in the power of reason over credulity.

Suetonius is principally remembered, however, as the earliest biographer of the Roman emperors, with the exception of Cornelius Nepos. His book, *Lives of the 12 Emperors (Vitae XII. Suetonius had completed this work before his dismissal from imperial service denied him access to the authoritative documents upon which his discussion rests.

Presumably, S uetonius continued t o live in Rome and to write until the time of his death.

Sulpicia (fl. first century B.C.E.) *Roman poet* A member of the household and the niece of Marcus Valerius M essalla Corvinus—the p atron o f the poet Al bius Tibul l us—Sulpicia is thought to have authored the only poems by a pre-Christian Roman woman that have survived in their entirety. There are only six of them, each one an el egy, and in their su rviving form, t hey may be r evisions that Tibullus made of Sulpicia's originals.

The occasion for the composition of the poems was the ardor that Sulpicia felt for a young man whom she addresses as Cerinthus but who, as the translator H ubert C reekmore s peculates, m ay have been the man she eventually married, Cornutus. The c hronological a rrangement of t he poems in Creekmore's English translation is the translator's. Creekmore also intersperses poems by Tibullus so that the grouping tells the story of Sulpicia a nd C erinthus b oth f rom t he lo vers' points of view and from that of a well-wisher. Creekmore a ssigns t his g rouping t he t itle *No Harm to Lovers*

The first poem—one by Tibullus—celebrates Sulpicia's c areful d ress a nd ado rnment to c elebrate the *Matronalia*, a Ro man holiday in honor of Mars that was celebrated on March 1. She is so lovely i n her a ttire t hat, sho uld Ma rs h imself descend from he aven, the war god would fall in love with her and embarrass himself by letting his armor dr op. Su lpicia i s t he mo st wor thy of t he celebrants.

The s econd elegy—just eig ht l ines lo ng a nd Sulpicia's—is an epistolary poem addressed to Cerinthus and complaining that her uncle is insisting that she spend her b irthday in the c ountry a way from her beloved. Though she must go, her heart and soul, she says, will remain with her beloved. In the third poem, Sulpicia's, the birthday plans have changed, and she joyfully announces that she will spend it in Rome after all.

In the fourth poem, the birthday has arrived, and Tibullus's elegy, wr itten as t hough Su lpicia were s ometimes s peaking, t akes t he f orm of a prayer t o J uno. A lthough Sulpicia's mot her i s present and offers advice about the content of her prayer t o he r p atron g oddess, S ulpicia p rays silently in her heart for the fulfillment of her love as she makes her offerings to Juno.

Sulpicia lies i ll with fever i n the fifth poem (Sulpicia's) and hopes that Cerinthus is thinking tender thoughts of her. If not, then she fears she will be unable to overcome her illness if her lover proves indifferent. The sixth poem, by Tibullus, continues t his theme wi th an i nvocation o f Phoebus as the god of physicians to co me a nd heal Su lpicia. At t he s ame t ime, the g od w ill relieve Cerinthus from his worry over the girl's health.

The seventh poem (Sulpicia's) is an apology to Cerinthus because, feeling consumed by her love for him, she fled from his company. Tibullus a ssumes the r ole of Su lpicia i n t he eighth poem—one celebrating Cerinthus's birthday. H er v oice i n t he p oem p rays t hat she a nd Cerinthus w ill b urn f or e ach o ther w ith e qual passion.

Sulpicia sp eaks her self i n t he n inth p oem, thanking Cerinthus ironically for his care of her virtue. He has appa rently exceeded the bo unds of propriety. In the next poem, however, one by Tibullus in Sulpicia's voice, Cerinthus is forgiven for his lapse. The poem concerns a hunting party to which Cerinthus has been invited, and Sulpicia's v oice u rges h im to r eturn qu ickly to her arms.

The final poem in the little collection is Sulpicia's own. Her love for Cerinthus has been consummated with the urging of Venus, and Sulpica is glad but also guilty. In her excitement, she hates having to "calm her features" to ward off gossip. She suggests that instead she and Cerinthus simply tell what happened.

Creekmore's t ranslations a re c harming a nd his arrangement perfectly plausible and sensible.

Sumerian literature (ca. 3000–2500 B.C.E.) The historian of early Sumerian culture, V. K. Afanasieva, ha s r eported th at i n 1 991 w e k new o f more than 150 Sumerian literary works, many of them in fragmentary form. These works i nclude verse Myt hs and e pics. Love songs for the c elebration of marriages between living, deified kings and p riestesses a lso a ppear. S umerian h ymns include both funeral songs of mourning and songs about g rief o ccasioned b y disasters. There a re hymns in h onor of r ulers and literary embellishments of ro yal i nscriptions. W e a lso find a necdotes, collections of fables, and proverbs. Beyond these, various instructional texts also exist. The genre most widely represented is that of the hymn. Most of those surviving originated in the city of Nippur, and like many of the hymns of contemporary Hinduism, they often invoked the n ames of t he g ods to whom t hey were addressed and recited their deeds. Other hymns were a ddressed t o t hose r ulers w ho had b een deified during their reigns, but not all kings were so honored.

An an cient S umerian an alogue e xists f or a story sha red i n d ifferent f orms b y la ter fertility cults and mystery religions t hat i nclude, a mong others, Christianity. This comparable story appears in a s eries o f songs o r po ems t hat b egin b y recounting a myth about t he g oddess o f s exual love and animal fertility, Innin. Innin falls in love with the shepherd god or hero, Dumuzi, and marries him. She then descends into the underworld to challenge the power of its queen. For her rashness, she is killed there.

As soon as Innin dies, however, the animals on earth cease to procreate. The gods therefore restore Innin's life rather than have the world die. There is, however, a condition for her r eturn to e arth. She needs a volunteer to replace her in the world below. As the goddess of love and fertility, Innin (or Innanna, as she was known in the Akkadian tongue) ha s ma rried dei fied h usbands or t aken official lovers in all the cities of Sumer, but these god- men all beg off when a sked to replace her in the l and o f th e dead. On ly t he she pherd g od, Dumuzi, is willing to volunteer, but his sister Geshtinana r esists h is e ffort t o d ie a nd c alls o n Utu, god of the sun, to hide Dununzi. Utu cooperates, three times disguising Dumuzi by transforming hi m i nto a n a nimal. E ventually, ho wever, Dununzi carries out his promise. He is killed and taken to the underworld. Anticipating the Greco-Roman myth of Proserpina, Geshtinana makes a deal with the gods of the netherworld. By its terms, she a nd D umuzi e ach t ake t urns sp ending si x months in the land of the dead, so that they annually die and are annually reborn.

anticipate its written form by centuries and perhaps by millennia. Its Sumerian form also displays complications of plot that set it apart from Greco- Roman-Judeo- Christian versions.

A n umber o f Su merian m yths su rvive t hat explain ce rtain c reative a ctivities o f t he g ods. These are not stories about universal beginnings like those one finds in Hebrew or Greco-Roman myth; the cosmos is beyond their ken. Such myths do i nclude, ho wever, a n e xplanation of t he c reation of the world. They also concern the ordering of things. They discuss the creation of those gods whose responsibilities included overseeing earthly order. Among such gods one finds a pair named in Ā e Gilga mesh Epic, Enlil and Enki. Within the province of such deities fell such matters as populating the earth with creatures of all sorts, the invention of farming implements, and seeing that m atters o n e arth p roceeded m ore o r le ss according to plan. Many of these myths are preserved in dialogue form and are the product of schools established as early as the third millennium b.c.e.—schools called *e-dubba*. Most of t he literary texts that now survive seem to have been prepared by t eachers or by s tudents a t su ch schools. The point of such texts, however, was not to prepare clay tablets that would circulate among a reading public. Rather, the objective was to prepare didactic material that would serve as an aid in memorizing such texts in the same way that the l ater te xts o f H omer were m emorized i n Greek and Roman schools. One may feel certain that the oral literature of ancient Sumer was richer than the portion of it that survives incised on clay tablets.

We find t he a ccomplishments of hero-kings recounted in n ine surviving verse legends traceable, according to the king lists (see cuneif or m), to the First Dynasty of the city of Uruk—legends that include \overline{A} e Gilgamesh Epic and also stories concerning the kings Enmerkar and Lugalbanda.

Unlike \overline{A} e Gilgame sh Epic, most su rviving Sumerian s tories app ear to r epresent a s tage in the development of stories about heroes—a stage that precedes the formation of a n actual unified epic. C omposed of r ather heterogeneous g roups of s tories, t hey tend to concern h uman hero es. Occasionally, similar c ycles do f eature d ivine heroes o r hero ines. I ncluded i n t his g roup o ne finds a s tory i n w hich t he g oddess I nnin fights against a diabolical mountain—"Mount Ebekh." In another such example a deified ancestor-hero, Ninurta, fights against the demon Asak or Anzu.

Suppliants, The Aeschylus (ca. 492 B.C.E.) The s ole representative of a t rilogy of plays, \overline{A} e *Suppliants* is thought to be the earliest surviving drama in any Western Eu \overline{D} pean language. The text of \overline{A} e *Suppliants* is almost certainly very corrupted in the form we have it, but at least it exists. Aeschyl us took its subject from the myth of Io, a priestess of Hera and princess of Argos, whom the jealous goddess Hera t urned partly i nto a hei fer when Zeus's eye wandered in Io's direction. Distraught and terrified, Io fled to Egypt, where Zeus, in the form of a bull, made lo ve to her a nd then restored her to her proper shape.

All i ntercourse b etween g ods a nd h uman beings proved fruitful, and in due course Io bore a s on, t he dem igod Epap hus. Epap hus i n t urn fathered a d aughter, L ibya. She g ave birth t o a son, Belus, and he became the sire of Danaus and his brother, Aegyptus. The scions of the fifth generation o f t his f amily e ach p roved e xceedingly fruitful. In the sixth generation, Danaus fathered 50 d aughters a nd A egyptus 50 s ons. A egyptus, who wa s a k ing i n E gypt, i ntended h is s ons to marry h is b rother's d aughters, forcibly i f n ecessary. The girls and their father took exception to this proposal and, pursued by Aegyptus, fled back across t he sea to A rgos, where t hey i ntended to seek the protection of its king, Pelasgus.

It is at the point of the arrival of Danaus and the 50 girls on Argos that Aeschylus takes up the story in \overline{A} e Suppliants. The 50 girls are represented by a 50-woman ch or us w ho present most of the play's dialogue, always in verse and often in song. They offer varying viewpoints whose shifts are emphasized by the chorus's dancelike movements, called *strophes* and *antistrophes*, about the stage. Aside from the chorus, only two actors perform. A r ist ot l e s ays that u sing a s econd actor was Aeschylus's innovative contribution to Greek drama. Performing in masks, the two actors represent the three male characters of the play: Danaus, Pelasgus, and a herald of King Aegyptus.

Arriving on the island of A rgos, D anaus and his daughter seek out the temple of the votive gods of t he i sland a nd l ay w ands of su pplication o n their al tars, b egging t hat t he g ods w ill p reserve them from forced marriage to their first cousins. Finding a group of women dressed in foreign costume so employed, King Pelasgus challenges them to reveal their i dentities. In a s eries of que stions and an swers b etween a s keptical P elasgus a nd members of the chorus, Pelasgus has the women tell the m yth b y rehearsing their genealogy. By that means, they both inform the audience of the play's bac kground a nd e stablish t heir b ona fides and their hereditary right to claim his protection from forced, incestuous marriage.

Even after he becomes convinced of the strangers' i dentities, P elasgus r emains c autious a bout promising them s anctuary. Such a p olicy would be t antamount t o a d eclaration of w ar a gainst Egypt. The suppliants invoke justice, but the king pleads that he must consult the citizenry of Argos lest they complain that he has "slain the state" in support of strangers. Desperate, the girls threaten to c ommit su icide b y ha nging t hemselves f rom the images of the gods.

King P elasgus s ends D anaus to t he c ity's shrines to l ay the maidens' offerings before the gods of Argos and to a cquaint the citizens with the suppliants' plight. Pelasgus seems to be coming round to the suppliants' point of view. While Danaus is absent, the chorus revisits the myth of Io, fo cusing on her state of mind as a b inatured creature—half h uman, h alf cow—harassed b y Hera and desperate in a s trange land as a r eflection of the state of mind in which the daughters of Danaus find themselves.

Danaus returns with the news that the citizens of A rgos h ave vo ted i n f avor o f p rotecting t he women. They all offer grateful prayers for the success of their cause. These prayers have hardly been uttered, ho wever, b efore t he first o f a fleet of Egyptian pursuers sails into view. Danaus runs to rouse the Argives to the promised defense, while the chorus repeats the fears of t he maidens a nd their r esolve to d ie r ather t han b ecome f orced brides.

A frenzied dance on stage represents the efforts of the vanguard of the Egyptian forces to tear the maidens from the altars of the Argive gods, while the herald of Aegyptus speaks the parts of all the would- be ravishers who are trying to tear the girls from the altars. The Egyptians are on the point of success when Pelasgus reappears and announces the intention of the Argives to defend the women. Threats, counterthreats, and a de claration of war ensue, and the herald and his followers are forced to leave empty-handed.

Pelasgus invites the maidens to dwell in Argos as his guests in the manner of their own choosing, an d D anaus e xhorts h is d aughters to b e grateful. Then the chorus divides into halves that sing responsively of their gratitude and their fears for the future, knowing that Fate will determine the outcome of their situation, and the surviving and presumably first play of A eschylus's trilogy comes to a close.

The rest of the history of the descendants of Io is well known, making it possible to re construct the plots, as well as, perhaps, the titles of the other

634 Symposium

two plays in Aeschylus's trilogy. The literary historians Whitney J. Oates and Eugene O'Neill, Jr., suggest the titles \bar{A} e Egyptians and \bar{A} e Daughters of Danaus for the lost plays. If, like the first, the s ubsequent p lays fo llow the o utline of t he myth, the maidens are eventually forced to return to E gypt a nd g o t hrough w ith t he ma rriages. Although Danaus publicly finally a ssents to t he unions, privately he commands his daughters to kill their husbands on their wedding nights. Though 49 of the 50 daughters ob ey, one, a g irl named Hypermnestra, happens to love her husband, Lynceus, and lets him live. Tried for disobedience to her father, Hypermnestra is defended from that charge by the goddess of love, Aphrodite, who argues that love takes precedence over filial obedience.

Symposium (*The Banquet*) Plato (385 B.C.E.)

Among the most celebrated of Pl at o's dialogues, his *Symposium* recounts in dramatic fashion the speeches delivered on the subject of love and the accompanying co nversation a t a b anquet h eld some y ears ea rlier i n A thens a t t he house o f Agathon. Plato e stablishes a d ramatic si tuation in w hich A pollodorus de scribes t he ba nquet's events, w hich he had le arned a bout f rom A ristodemus, for the benefit of Glaucon and his nameless c ompanion, w ho had a lready he ard en ough about the occasion to be curious.

On his way to the banquet, Socr at es encounters Aristodemus and invites him to c ome along as a surprise guest. Agathon welcomes Aristodemus, b ut Socrates—as h e r egularly does—has been d istracted and h as d isappeared. H e s oon reappears, ho wever, a nd takes hi s pl ace a t t he table, reclining next to his host, Agathon.

After dinner, customarily followed by a drinking bout, the banqueters a gree to drink moderately and to d ismiss the u sual entertainment of flute girls. They choose instead to devote the allotted time to conversation, consenting to he ar a series of speeches on the subject of love and about the god whose name is Love (Eros).

The first speaker, Phaedrus, quotes Hesiod to suggest that Love is the oldest of the gods and also the source of the greatest benefits to people. These benefits a ccrue f rom t he h onorable lo ve of one person f or a nother. A l over a lways w ishes t o impress his beloved by following the most honorable course of action. Ideal states and ideal armies should be c omposed of p ersons who a re lo vers, for they would rather die than have their beloved observe them perform any but the most admirable and heroic deeds. Phaedrus offers the examples of Achilles and Patroclus from Homer's \overline{A} e *Ili ad* as proof of his assertions.

The next speech that Apollodorus recalls is that of Pausanias. Pausanias objects that Phaedrus has been insufficiently discriminating in his praise of love because there are in fact not one but two deities of love: the heavenly and the earthly Aphrodite. That of the earthly Aphrodite, says Pausanias, is the lower sort felt by "the meaner sort of men for women a nd y ouths." The h igher s ort of love, he argues, is inspired by the heavenly Aphrodite and is t he so metimes h omoerotic love of m an for man—a love that delights in a "valiant and intelligent n ature." (When this sort of love i ncluded a physical dimension, it was variously regarded by different city-states throughout Greece.)

Often, Pa usanias c ontinues, e arthly lo vers indulge in foolish behavior that in others would be considered blameworthy but that is toler ated and even approved in lovers. More over, even the gods a re not a ngry with lovers who break their oaths. N evertheless, true love is the u nshakable love of soul for soul, stable, and lifelong. Love that is rooted in material considerations is dishonorable. On ly lo ve t hat ma kes t he lo vers e ager f or their own improvement b elongs to t he he avenly sort.

As Pausanias ends his oration, the dramatist Arist ophanes is tos peak next. J ust at t hat moment, however, he is seized with an attack of the hiccoughs, so Aristophanes exchanges turns with the physician Erixymachus.

Erixymachus begins by prescribing a cure for Aristophanes' hi ccoughs and th en t urns t o th e subject at hand. Not surprisingly, he takes a medical view of the matter. In an extended and recondite P latonic doctor joke, E rixymachus de fines medicine a s " the k nowledge of t he lo ves a nd desires of t he b ody, and how to s atisfy t hem or not." The best physician is the one capable of discriminating h ealthy f rom u nhealthy lo ve. The humor arises from the age-old view that, in general, doctors are hard-pressed to discuss anything other than medicine.

Erixymachus suggests that love is the compelling p rinciple in a ll lif e f orms, n ot m erely in human beings but also in the orderly but perhaps nonsentient p rocesses o f t he u niverse a s w ell. Health-giving love re sults i n u niversal h armony and in health in men, an imals, and plants. The entire process of sacrifice and divination to which religion d evotes it self, says Er ixymachus, co ncerns itself with the preservation of the good love and c uring the c onditions p roduced by t he e vil love. The good love, both among men and gods, is the source of happiness.

Aristophanes, now re covered f rom his hi ccoughs as a result of sneezing as recommended by Erixymachus, jokes at the doctor's expense. The doctor warns the playwright that two can play the joking game.

Aristophanes explains that at the beginning of humanity, things were different from their current status. There were three, not just two, sexes. There was a male, a female, and an androgynous sex. M oreover, the or iginal human b eing w as a round creature with four hands, four feet, a single head with two identical faces on opposite sides, and two s ex organs. This creature's locomotion included the choice of walking u pright but a lso included d oing a s eries of rol ling somersaults when speed was e ssential i nstead o f r unning. These p rotohumans were s o f earsomely s trong that they attacked the gods. In punishment, the gods d ecided to spl it t he m ortals s o t hat t hey walked about on two legs only. Moreover, should people c ontinue t heir obs treperous w ays, Z eus threatened to split them again so that they would have to hop about on one leg only.

The newly divided creatures, however, instantly became so insecure that they sought out their former h alves and e mbraced t hem. I n t heir depression, t hey b egan dy ing off at a s tartling rate. Pitying that outcome, Zeus moved the organs of procreation a round to the front so that those who had originally been male-female and their descendants c ould tem porarily app roximate t he original c ondition of t he sp ecies a nd p rocreate. Likewise, those who were born with a predisposition toward same- sex c ounterparts c ould find love a nd f ulfillment i n th e n ew c ircumstances. This myth has the benefit of accounting-albeit at the level of f abl e-for the actuality of human circumstances without making sexual preference or pre disposition bl ameworthy. More over, t he myth accounts for humanity's yearnings for happiness through finding a life-completing partner to love.

At the same time, impiety may result in still further al ienation fr om humanity's o riginal nature, s o Ari stophanes e xhorts e veryone t o praise the god Love, who promises through love to restore pious people to their original state and make them blessed and happy. He also counsels Eryximachus to forego ridicule.

Now S ocrates, A gathon, a nd P haedrus b egin to chat. Socrates tries to lead Agathon into one of his f amous di alogues, b ut P haedrus i nterrupts, warning Ag athon a gainst f alling f or S ocrates' game. Instead, Phaedrus en courages Agathon to make his speech.

Acceding t o t he r equest, A gathon begins h is discourse. He objects that the previous speakers have discussed the benefits that the god of L ove confers upon mankind. Instead, Agathon objects,

636 Symposium

the god should be praised for his own attributes: youthfulness, tenderness, softness, the fairness of the g od's c omplexion, h is b eauty, h is g racefulness, his justice, and his temperance.

Agathon p raises L ove a s w ell for t he g od's accomplishments in poetry and the fine arts. The devotees of Love walk in the light and not in darkness. Love is responsible for the discovery of the healing arts, the musical arts, and even the industrial and the household arts. Love is, moreover, a peacemaker and the savior of mankind. The attributes of Love, as Agathon proclaims them, anticipate many of the attributes of Christ by s everal centuries.

At the c onclusion of Agathon's r emarks, a reader le arns that S ocrates h as been trying t o avoid participation in the debate, excusing himself on the grounds that he did n ot u nderstand the rules. Finally, however, he agrees to tell the truth about Love.

With c haracteristic sub tlety, S ocrates le ads Agathon to ad mit that Love is neither go od nor great, b ut r ather a spires to b ecome g ood a nd great. H aving e ssentially d estroyed A gathon's argument, Socrates now proposes to repeat the wisdom concerning Love that he learned from the wise woman Diotima of Mantineia. She had convinced Socrates that, just as a right opinion that cannot be proved represents a mean between ignorance and provable wisdom, so Love is neither fair and good nor foul and evil, but rather a mean between the two poles. Diotima explained that Love is a great spirit that mediates between the divine and the mortal. Love bears the prayers and sacrifices of human beings to t he gods, and their replies and commands to mortals.

Socrates reports the myth of the parentage of Love that Diotima shared. Love, she explained, is the c hild Poverty—Love's mother—and w as fathered b y P lenty. Di otima d escribed L ove a s always p oor b ut at the s ame t ime bold, st rong, and a lways plotting. L ove i s a p hilosopher, b ut also a Sophist; he is alive sometimes, and sometimes dead. Though love is not himself wise, he loves w isdom. L ove i s n ot b eautiful, b ut t hat which is truly beautiful, instead, is the person or thing beloved.

In discussing the nature of the beloved, Diotima explained that the beloved is at once the beautiful, the good, and, in consequence, the happy. Love is a process of c reation, of br inging i nto b eing. I ts expression in human lovemaking reflects the generative processes of the universe in bringing existence into being and thus also illustrates the quest for immortality.

All creative human activity, according to Diotima, is in essence a quest after immortality. Because the true, the good, and the beautiful are unified as a single entity that is also the ultimate ground of reality, the essential task of the human being must be to pursue those beautiful and virtuous objects and acts that will serve as stepping-stones to the eventual capacity to contemplate beauty directly with the active intellect. Achieving that end, said Diotima, will engender and nourish "true virtue," make the pers on so engaged " a friend of G od," and lead directly to whatever degree of immortality human beings can aspire to.

This, Socra tes t ells h is a uditors, i s w hat he learned f rom D iotima a nd i s w hat he b elieves about the nature of love.

Just then a hubbub at the door announces the arrival of the drunken A lcibiades, who takes a place near Socrates. Socrates asks for protection against A lcibiades' v iolent a flection f or h im. Alcibiades decides to entertain the company by demonstrating S ocrates' r emarkable a bility to drink v ast q uantities of w ine w ithout v isible effect. S ocrates o bediently d rains a two-quart wine cooler but remains perfectly sober.

Now A lcibiades c laims the p rivilege of p ronouncing a n e ncomium i n praise of S ocrates. Alcibiades compares the Athenian sage to busts of the satyr Silenus that conceal within them the images of the gods. His words have the power of music to charm the soul and evoke mysteries, and among o rators on ly S ocrates is pe rfect. E ven Alcibiades would be convinced by Socrates' oratory to i mprove his manner of life, if Alcibiades could always remain near Socrates. But whenever Socrates is absent, A lcibiades is overcome again by his love of popularity.

Alcibiades g oes on t o praise S ocrates' selfcontrol and h is firm and nonjudgmental resistance to the homoerotic advances of Alcibiades. He recalls S ocrates' self-mastery in other situations, such as in the battle of Potidea during the Peloponnesian W ars. There, S ocrates s eemed indifferent to such hardships as hunger, fatigue, and cold. He could, for instance, march barefoot on ic e w ithout seeming t o ex perience d iscomfort. His powers of concentration made it possible for him to s tand lost in thought throughout the night. Alcibiades recalls a n o ccasion when he himself lay wounded on the field and Socrates saved his life, rescuing both Alcibiades and his weapons.

Alcibiades concludes h is o ration in p raise of Socrates b y r epeating his c omparison b etween Socrates and the busts that conceal images of the gods. In reply, Socrates accuses Alcibiades of only feigning drunkenness to have the opportunity to try a new tactic in his ongoing attempt to seduce Socrates. He also thinks Alcibiades is attempting to s tir u p a qu arrel b etween S ocrates a nd h is friend Agathon. Just at that moment, a new band of revelers bursts in at the door, and the orderly speechifying at the banquet is irretrievably interrupted. Everyone f alls a sleep except Socra tes, A ristophanes, and A gathon. When a cock's crowing awakens A ristodemus, he d iscovers S ocrates discoursing to the other two about the essential identity of the geniuses of comedy and t r agedy. When h is last two listeners a lso fall a sleep toward daybreak, Socrates rises, goes to the public baths to ba the, passes the day as he u sually does, and goes home to rest at the day's end.

In *Symposium*, Plato provides us with a d ramatic performance that contains a philosophical clarification of his thinking about the subject of love in t he d ialogue r eported b etween S ocrates and Diotima. The drama also draws for us one of antiquity's m ost c ompelling p ortraits o f P lato's teacher, Socrates, who is also the central character of many Platonic dialogues.

Tacitus (Publius (?) Cornelius Tacitus)

(ca. 55–ca. 117 C.E.) *Roman historian* The birthplace of Cornelius Tacitus—universally respected as the premier historian of the Roman world—is uncertain, though somewhere in northern Italy seems likely. His marriage in 78 to the daughter of A gricola, a r espected g overnor of Britain, su ggests that Tacitus's family was wellto-do and well- connected. This is also indicated by the rhe torical e ducation t hat he apparently received.

Tacitus seems to have pursued first a military and then a political career. In the latter capacity, he served both the emperors Vespasian and Titus and subsequently, perhaps, became the governor of one of the empire's lesser provinces from 89 to 93 c.e. Upon his return, he became praetor under the reign of the emperor Domitian. After the consuls, who were the heads of the Roman republic, the praetor was the next most responsible official of the city of Rome. In addition to performing the offices of the consuls in their absence, a p raetor also could serve as the general of an army when the need arose.

In the office of praetor, Tacitus, whose attitude toward D omitian was influenced by the historian's affinity for the Roman Senate, had the opportunity t o o bserve at first hand the excesses of Domitian's a rrogance to ward the senate and the emperor's p ropensity for e xecuting former c onsuls. At least 12, and possibly more of them, died on Domitian's orders.

Tacitus a lso s erved as one of the 16 members of a c ollege o f Ro man p riests r esponsible f or guarding an d i nterpreting a ncient Gr eek b ooks of ritual texts that the priests consulted when the senate required a religious interpretation of unusual events. Tacitus himself tells us that each of the emperors Vespasian, Titus, and Domitian (whom he abhorred) all advanced his career.

Tacitus began his literary work with the publication of a biography of his father- in- hw, Iulius Agricola, in 98. In add ition to c hronicling t hat life, Tacitus asserted his opposition to Do mitian and offered a much-admired consolation on the demise of Agricola. Later in 98 app eared a work of g eography and e thnography, Germania, i n which Tacitus describes the peoples of Germany, their manner of life, and their government. The 18th- æntury B ritish h istorian E dward Gibb on praised the work for "accurate observation" and for the "diligent inquiries" Tacitus had made i n preparing to write it. Following that work came a dialogue treating the subject of the contemporary decline of the art of public speaking, Dialogus de oratoribus (A dialogue about oratory).

Tacitus b egan w orking n ext o n h is *Histories* and on *Annals*. When the *Histories* were finished (date u ncertain), they included as many as 12 or 14 books that dealt with events between the years 69 and 96 c.e. The *Annals* included as many as 14 or 16 books. In their original form, the *Histories* dealt with the period running from 69 to 96 c. e. Owing, h owever, to i mponderable ac cidents o f history, only four of the books and a bit of the fifth have su rvived. Even t hese a re k nown only from single manuscripts.

The Annals began with the death of Ro me's first emperor, August us Ca esar, in 14 c.e. a nd continued through the death of Nero in 68. The remaining portions of the Annals include all of books 1–4 and books 12–15. Most of book 6 and portions of books 5, 11, and 16 also exist.

Quite a part f rom b eing t he s ource f rom which stories a bout Ro me d uring the empire's early y ears ha ve b een r egularly u nearthed b y more mo dern l iterary figures s uch a s R obert Graves, T acitus's p ithy a nd o riginal s tyle i s much a dmired b y t hose w ho c omment o n h is Latin. Hadas translates the phrase: "They make a wilderness and call it peace." Tacitus is a historian for all ages.

Tao Qian (T'ao Ch'ien, Tao Yüan Ming) (365–427 c.E.) Chinese poet

Earlier known as Tao Yüan Ming, Tao Qian contrived to e arn appointment as a magistrate, but the expectation that he must behave deferentially to superior officers of the civil ser vice annoyed him. Therefore, after serving in office for only 83 days, T ao r etired to p rivate l ife. This d ecision earned h im e nduring a dmiration as a ma n o f principle.

In his private capacity, Tao cultivated flowers, particularly c hrysanthemums, a nd o ccupied h is time with music and with writing fu poems. One of these reflects on his decision to avoid a p ublic career and the pleasures that arise from his alternative pursuits. He delights in the company of his family, in reading, and in performing on his lute. The fact that Tao owned l and made p ossible h is retirement as a gentleman farmer, and he reflects on the way that his laborers willkeep him informed when his attention is required during the passage of the seasons. Terence (Publius Terentius Afer) (ca. 195– ca. 159 B.C.E.) *Roman dramatist*

The classicist Walter E. Forehand, a b iographer of t he Ro man p laywright T erence, c autions u s that th e an cient s ources o f b iographical a nd critical i nformation ab out T erence m ay n ot b e altogether t rustworthy. These so urces i nclude, first, a biography of the playwright by Sueto nius in his collection *On Poets*.

According to Suetonius, Terence's life spanned the years 185–159 b.c.e. Sue tonius a lso a sserts that Terence was a Carthaginian-an A frican (hence the name Afer) brought to Ro me as the slave of a senator, Terentius Lucanus. Later the senator a dopted Terence as his own son. Then, before h e turned 25, p erhaps with t he help of powerful Roman patrons and a master of co medy named Caecilius Statius, Terence brought to the Roman stage a series of six plays whose plots he had b orrowed f rom h is Gr ecian p redecessors: Andria (Ā e W oman of An dros), Ā e Sel f-Tormentor, Ā e Eunuch, Phormio, Ā e Motherin- Law, and Adelphi (Ā e Br others). These proved highly successful, and, armed with that success, Terence s et out for Greece, presumably in search of new material. There he w rote some new plays, but they were lost and the poet may also have drowned when he was shipwrecked on

the r eturn v oyage. F orehand p resents a lternatives that call almost all of Suetonius's facts into question, w ithout o pting s trongly for o ne v iew over another.

Forehand has a lso e xamined a nother s et o f ancient sources that purport to give us information a bout T erence's t heatrical c areer. This set includes ancient production notices for all of the plays except Andria, and another ancient source gives the p ertinent i nformation f or t hat pl ay. The central bone of s cholarly c ontention a bout the content of these notices arises from the uncertainty they introduce into establishing the order of some of Terence's work. Further evidence suggests that, on his return voyage from Greece, Terence may have been bringing with him not only whatever new plays he had written there, but also 108 texts of other Greek plays-enough to supply him with a lifetime of plots. Thus, if the poet did lose h is l ife a nd h is pl ays a t o nce, a n u nhappy accident de prived t he w orld o f a g ood de al o f amusement.

As is the case with the G reek originals on which T erence m odeled h is su rviving pl ays, Roman comedy as he helped to shape it was highly c onventional. The pl ays featured s tock si tuations: Shipwrecks (ironically), mistaken identities, kidnapping by pirates, disguises, separations and reunions, and young lo vers ke pt apa rt by v enal elders a ll figured p rominently. Characters were also predictable: Old misers, lickspittles, blusterers, f oolish y oungsters, a nd h ypocrites p eopled Terence's stage. A part of the playwright's charm, however, arises from his ability to make his characters fresh and engaging within the confines of their predictability.

Born in Paphlagonia near the Euxine Sea, Themistius Euphrades moved to Constantinople, where he earned a not able reputation as an orator, as a Sophist, and, in his own school, as a te acher of philosophy and rhetoric. He also spent some time in Rome, where he instructed St. August ine.

A pagan, Themistius enjoyed the confidence of the Roman emperor Julian the A postate. A lost or ation by T hemistius s eems t o h ave encouraged the emperor in h is suppression of the Christians, and it produced a surviving letter from Julian that outlined his plans for his anti- Christian campaign. Theocritus (ca. 310–ca. 270 B.C.E.) *Greek poet*

The first a nd m ost i mportant Gr eek b ucolic o r pastoral poet, Theocritus was born on Sicily, probably at Syracuse, a nd later m igrated, first t o the island of Cos near Asia Minor and then to Alexandria in Egypt. There he w as certainly acquainted with the v erse o f C all imachus and p robably knew the poet personally. Theocritus took Callimachus's si de i n a l iterary d ispute w ith a c ritic who fa vored t raditional e pic p oetry over s hort lyrics.

Some of Theocritus's extant verse is nonetheless semi-epic in its content. His most famous and characteristic p oetic p roductions, h owever, t he pastoral *Idyl ls*, focus on life in the countryside and were seminally influential in the later development of the mo de of past or al poet ry. H is work provided a model for the Roman poet Virgil's *Ecl ogues*. A lso m uch ad mired d uring the Eu ro pan Renaissance, Theocritus bec ame t he model for such p oets a s E dmund Sp enser a nd John Milton in England, for such playwrights as Torquato T assoi n Italy or L uis de G óngara y Argote in Spain, and such novelists as Honoré d' Urfé in France.

Often in h is *Idylls*, Theocritus adopts the fiction that shepherds, traditionally in the Sicilian countryside but also in that of Cos, are engaged in a poetic contest or are mourning a lost friend. The characterizations and the emotional tone that emerge are true to l ife, as a re Theocritus's treatments of animals and his descriptions of the rural landscape. Above all, his style is straightforward, unaffected, and beautiful.

Not a ll o f Theocritus's *Idylls* take p lace i n a rural landscape. Some, like "The Ladies of Syracuse," are set in a metropolitan landscape; some, like "Polyphemus and Galatea," treat mythological subjects; and some, like his poem in praise of the Greek pharaoh of Egypt, Ptolemy II Philadelphus, contain addresses to rulers.

About the details of Theocritus's personal life, virtually nothing—other than his parents' names: Praxagoras a nd Philinna—is c ertain. Some 2 2

surviving i dylls c an c onfidently b e a ssociated with his name.

Theognis (ca. mid-sixth century B.C.E.) *Greek poet*

Probably born in the mainland city of Me gara, Theognis composed elegiac verses that took among their principal subjects the benefits of hereditary oligarchy as opposed to the evils of democratic politics and majority rule. The works of Theognis survive in a unique manuscript of a lmost 1,400 lines, but it appears that the work of other poets also comprise a part of the collection. Some poems on the subject of love are attributed to Theognis, but that attribution is highly suspect.

In the political poems, Theognis chooses the elegiac f orm t hat a lternates l ines o f d actylic hexameter—the meter of Homer —with lines of dactylic pentameter (see quant it at ive ver se). An ari stocrat by bi rth, Theognis be lieved t hat humankind was sharply divided into two sorts: those w ho were b orn of noble p arentage a nd were therefore good, and those who were not so born and were therefore bad. Education brought no benefit in the reformation of the moral predispositions of the b ad o nes, s o that when the rule of cities fell into their hands, po lti cd corruption and t he r uin of a ristocrats i nevitably followed.

The v irtues of t he a ristocratic c lass i ncluded judgment, moderation, justice, restraint, and reverence. The lower classes were distinguished by a total absence of those virtues. Theognis thought it easier to "beget and rear a ma n" than it was "to put go od s ense i n h im." F ools d id n ot b ecome wise; neither did bad people suddenly turn good. Teaching did not lead to improvement of virtue.

Theognis complains of the role t hat the wicked, risen to important positions, were playing in debasing t he c itizenry of M egara, in r eplacing noble motives with the quest for power and profit, in approving injustice to achieve those goals, and in turning "gentlemen into nobodies." Apparently this was the fate that the poet himself had suffered, for he laments his former wealth and status in lines 667–682 of the collection.

In another subcategory of poems most confidently attributable to Theognis, his "Maxims," he gives high- minded advice to a youth named Kyrnus. The poet advises his friend to e xercise prudence and not to employ base or unjust means in seeking h onors, p restige, a nd fortune. Theognis held unwavering friendship in the highest esteem and considered it a refuge from the vagaries of fortune.

Theogony Hesiod ca. 8th c., B.C.E.

A dactylic hexameter poem of slightly over 1,000 lines (see quant it at ive verse), \overline{A} eogony traces the genealogy and history of the Greek gods. The poet Hesiod begins his song with a description of

the activities of the nine Muses in their mountain home on Mt. Helicon. He tells how they sing and celebrate t he g ods of t he Oly mpian pa ntheon; the Tit a ns who came before them; and the oldest of the gods—Chaos, Chronos (time), Gaia (the earth), U ranus (the h eavens), Ocea nus, N ight, and others.

The Muses, Hesiod tells us, spoke to him as he tended h is flocks on t he sl opes of M t. Helicon near h is home . I nto t he r ustic she pherd t hey breathed a p oetic voic e with the p ower to si ng about the future and the past. They instructed the poet that, when he sang, the Muses should begin and e nd h is s ong. H e t herefore ob eys, t racing their genealogy and recording their birth as the daughters of Zeus and Mnemosyne (memory). He speaks of their power to sing and to inspire poets and singers, and invokes their power to help him sing of t he o rigins of t he g ods; of t heir p ower, riches, and privileges; and of the universe and its phenomena.

The Muses inspire Hesiod, and he b egins his account of the gods' genealogy, in the order of their a ppearance: C haos; G aia; T artaros (the worst pit of the underworld), and Eros, the god of love, who overpowers intelligence and strength in gods and in men. Hesiod continues his account of the gods and of mythic b eings like the C yclops and th e hundred-armed K ottos, Br iareos, a nd Gyes—giants who hated their father Uranus and conspired with their mother Gaia to emasculate him. Uranus's seed nonetheless impregnated Gaia with the F uries, g iants, a nd w ood n ymphs. H is genitalia ended up in the sea, and from the resultant insemination, Aphrodite, the goddess of love, was born.

Having de alt a t s ome leng th w ith U ranus's progeny, He siod turns his attention to t he children of Night. Night required no consort, but in a series of births by parthenogenesis, she produced numerous offspring. Among others, these included Fate or Fortune; End; Death; Sleep; Dreams; the th ree F ates named K lotho, L achesis, a nd Atropos; Deception; the Furies (a second version of t heir or igin); D iscord; m alignant Ol d A ge; Hardship; Battles; Murders; Lawlessness; and, in

644 Theogony

short, m ost o f t he perso nifications o f h umankind's ad ictions.

Pontos, the g reat Sea, on the other hand, lay with G aia, and their p rogeny d isplayed their father's characteristics of gentleness, thoughtfulness, and t rustworthiness. Notable a mong the descendants of Pontos we find Oceanus, the great river that early Greek geographers thought encircled the earth, and Nereus, who always tells the truth. Nereus, in turn, produced 50 lovely daughters with his consort Doris.

After a lmost 500 lines de tailing t he genealogies of the pre-Olympian gods, nature spirits, and the personifications of aspects of creation, Hesiod turns his attention to t he origin of the Olympians. He tells how Uranus's son Cronus parented the infant Zeus with his consort Rheia, who represents the principle of fertility. At Z eus's birth, Cronus a sked t hat t he baby b e b rought to h im, but, fearing Cronus's motives, Rheia instead presented h im with a s tone w rapped i n s waddling clothes. Thinking the object to be the child who a prophecy had fore told would displace him, Cronus instantly swallowed the stone, swaddling and all. The i nfant Z eus g rew u p a nd r eplaced h is father as the chief of the gods, as the prophecy had foretold.

At l ine 5 09, Hesiod d igresses to d iscuss t he parentage of the Titan Prometheus, the benefactor of humankind. He details the strife between Zeus and the Titans as the two sets of immortals struggled f or su premacy, u ntil t he hundredarmed giants overcame the Titans in warfare. The poet remarks on the unkind treatment that both Prometheus, who had hel ped Z eus p revail, a nd his b rother A tlas en dured a t Z eus's ha nd, a nd how at long last Z eus i mprisoned t he r ebellious Titans in an exhaustively described "moldy place" under the earth forever. We also learn of Zeus's ill treatment of people.

Following t his section of \overline{A} eogony, H esiod treats h is r eaders to a de tailed le sson i n t he topography of t he w orld o f m yth a nd t hen to Zeus's struggle against the giant Typhoeus. This monster had a h undred serpents' heads, eyes of fire, and an eardrum shattering voice. Zeus was narrowly able to overcome Typhoeus with thunderbolts, set h im a flame, and c onfine h im i n Tartarus, the lowest pit of the underworld. Had Zeus lost, Typhoeus would have become master of the universe. Typhoeus is the sire of all winds that blow loudly and wetly, like hurricanes and tornadoes.

When the Olympian gods finished the battles against their predecessors, they forced the Titans to sha re t heir t itles a nd p rivileges, a nd o n t he advice of Gaia, the Earth, Zeus was appointed the chief god. Hesiod next details Zeus's relationships with a s eries of wi ves. First c ame Me tis, w ith whom he conceived Athene, goddess of wisdom. Metis e njoyed u nparalleled i ntelligence, a nd a brother for A thene w as prophesied—one w ho would e ventually s upplant Zeus. T o a void t hat outcome, Zeus hid the pregnant Metis away in his belly so that she could do his thinking.

Zeus's second wife, Themis, gave birth to the Seasons, Lawfulness, Justice, Peacetime and the Fates (for a second version of this origin, see above.). To these offspring fell the responsibility of supervising the actions of human beings. Others a mong Z eus's numerous liaisons mothered the three Graces, Persephone, the Muses, Apollo, and Artemis. Finally he married Hera, who gave birth to Hebe, A res, a nd the g oddess of c hildbirth, Eileithyia. With no help from Z eus, Hera also mothered the blacksmith of the gods, Hephaistos. At length, Zeus himself bore the child of the concealed thinker, Metis. That child, Athene, sprang fully armed from the right side of Zeus's head.

Through the 964th line of h is p oem, H esiod continues t o ch ronicle the g enealogies of t he Olympians and the offspring of their amours. He next turns h is attention to go ddesses who s lept with mortal men and catalogues their offspring for the next 70 lines. He brings h is account down to the time of the Trojan War, which h istorians believed to have ended around 1184 b.c.e. S ome of the details he recounts there suggest h is direct knowledge of Homer's $\overline{A} \ e \ Odyssey$, a w ork he was m ost l ikely to have known as an oral recitation.

As \overline{A} eogony ends, l ines o ccur t hat su ggest Hesiod next meant to turn his attention to mortal women a nd t heir p rogeny. These l ines prov ide grounds for thinking Hesiod to be the author of a work c alled *Catalogue o f W omen* (*Eoeae*). This attribution, however, is far from certain, and that fragmentary catalogue c ould w ell sp ring from a later author writing, as many did, in the manner of Hesiod.

Hesiod's example remained influential throughout the ancient world and into the Renaissance, when Boccaccio's *Genealogy of the Gods* revived a g enre t hat H esiod, a s f ar a s w e k now, had fathered. In his a dmirable translation of major works aut hored by or a ssociated with H esiod, Richmond Lattimore includes a very useful genealogical chart that summarizes in graphic form the familial relationships a mong t he g ods t hat Hesiod details in song.

Theophrastus of Eresus (ca. 371–ca. 287

B.C.E.) Greek prose writer

Born on the Island of Lesbos, Theophrastus succeeded h is teacher a nd friend, A r istot le, a s the p rincipal of the P er ipat et ic s chool o f phil osophy at Athens. A prolific author, Theophrastus w rote s cientific t reatises a bout suc h subjects a s botany, physiology, and meteorology. He also a uthored n umerous philosophical works that included one on metaphysics. Beyond that, Theophrastus interested himself in stylistics, writing a w ork, *On S tyle*, that Ci ce ro admired. Literature best remembers him, however, for a k ind o f w ork t hat w riters t hrough t he a ges would e mulate: c haracter wr iting. T o wr ite a character, Theophrastus would choose a trait or failing that someone d isplayed and then would give amusing examples of that characteristic as his subject displayed it. The characters tend to be stylized and are recognizable as the same sort of types that stock characters represented on Theophrastus's contemporary co mic A thenian st age. Like M enander's s tage t ypes, Theophrastus's characters co nvey a musing g limpses of a ncient Athenian foibles.

As a literary type, the character has en joyed periods of r enewed p opularity throughout the centuries. The 17th century in England, for example, w as such a t ime. E arlier, in 1 4th-century En gland, Geoffrey Chaucer alluded to the *Book of Wicked Wi ves* as a work consulted by Jankyn, Alice of Bath's fifth husband in G eoffrey Chaucer's $\overline{A} \ e$ *Wife of Bath's Tale.* Theophrastus's essay on marriage was among the sources for Jankyn's book.

From Theophrastus's own point of view, however, the characters he composed, while intended to a muse, were more importantly intended to instruct. He used them as examples in teaching rhetoric.

646 "Theseus" and "Romulus" (from Parallel Lives)

"Theseus" and "Romulus" (from

Parallel Lives) Plutarch (ca. 100 C.E.) Pl ut a r ch's first set of biographies from his *Par-allel Lives*, "Theseus" and "Romulus," together with his 10th set, "Per icles " and "Fabius," provide samples in this volume of the 23 surviving pairs of b iographies a nd the c omparison of t he subjects' moral qualities that, together with four individual lives, c onstitute Plutarch's bio graphical masterpiece.

In the collection's first pair, Plutarch traces the childhood of his subjects, Theseus, the ruler of At hens a nd Rom ulus, Rome's f ounder. H e recounts t he d angers t hrough w hich t hey pa ss and th e u nusual c ircumstances o f t heir e arly survival-as w hen Ro mulus a nd h is b rother Remus were suckled by a she-wolf and fed by a woodpecker. He recounts his heroes' bravery and ferocity i n b attle, a s when t he R omans, u nder Romulus's leadership, go in search of wives, overcome the Sabines, and kidnap some of their virgin d aughters, or wh en Theseus see ks o ut a nd destroys the Minotaur, a mythical half bull/half man w ho a nnually k ills a g roup o f A thenian youths sent to Crete as tribute. Revealing a naturalistic bent, Plutarch suggests that the Minotaur was in reality a fearsome gladiator who had regularly routed the Athenian young men in combat but whom Theseus successfully overcame.

In his method as a biographer, Plutarch sometimes tends to ward wordiness. He c annot re sist including a good and s ometimes a not-so-good story, even if it leads away from the main thrust of his narrative. At the same time, the encompassing quality of h is interest and h is willingness to suspend judgment give u s c lear i nsight i nto t he attractive qualities of m ind of the author. I ronically, very little of the external circumstances of Plutarch's own life is known to us.

In the process of the first set of paired biographies, a reader learns much about the founding of Athens and Rome. Theseus, who was the hereditary king of Troezen, traveled to Attica, where he gathered p eople f rom sm all, autonomou s citystates a nd b rought t hem tog ether a s o ne p olity under the umbrella of Athens. Moreover, in establishing the city, he ga ve up h is role a s k ing. He reserved to h imself the m ilitary role o f general, but representatives of the people would rule. Theseus fulfilled this promise. Arthur Hugh Clough, a modern editor of Plutarch, trusts this version of the story, pointing out that in Homer's \overline{A} e Ili ad, the name of the ship the Athenians send to join the invasion of Troy is simply *People*. Plutarch admits that he cannot always discriminate between history a nd m yth, a nd s o t his pa ir o f b iographies allows for both.

As in most of his other comparisons, when Plutarch comes to "The Comparison of Romulus with Theseus," t he author m ainly c oncerns h imself with the moral character of his subjects. Essentially, h e a wards Theseus t he p alm on the front of f public- spiritedness. Theseus v oluntarily g ave u p rule and s ought out pu blic d angers, d estroying them to improve c onditions, a s when he h unted down a nd k illed t he Cro mmyonian s ow, P haea. (Plutarch s uggests she ma y ha ve be en a f emale bandit rather than a dangerous wild pig.)

Romulus, on the other hand, was moved to his accomplishments by fear and out of the necessity for self-preservation. On another front, the biographer equates h is subjects: B oth were meant to be governors, and neither lived up to the expectations of a k ing. Theseus a voided t he job a nd sought pop ular approval. Ro mulus b ecame selfimportant and tyrannical. Both were rapists, but no advantage to Theseus's citizens accrued from his private behavior and his winning his wives by force. Romulus, on the other hand, needed wives for h imself a nd h is m en, a nd a fter c arrying off some 8 00 of the S abine women, he d istributed them among his men, keeping only one for himself. Those women eventually came to love their husbands and th e c hildren t hat r esulted f rom their unions. When the Sabines made a b elated effort to rescue their daughters, the women ran between the combatants and begged their kinsmen to reconcile themselves to the women's condition as Roman wives and mothers.

Carefully hedging his final judgment, Plutarch assesses the relative degree of approval each mem-

ber of h is pa ir r eceived f rom t he g ods. Here Romulus g ets t he pa lm si nce t he g ods to ok a n active role in preserving his life. On the contrary, Theseus w as c onceived w hen h is f ather A egeus directly disobeyed the gods' order to abstain from intercourse.

Thespis of Ikaria (fl. ca sixth century B.C.E.) *Greek dramatist*

Often c redited w ith ha ving i nvented tr agedy, Thespis's story contains some elements that many think are legendary. He is thought to have *invented* tragedy in the sense that he introduced an actor, or *answerer* (Greek: *hypokritos*), i nto w hat h ad earlier been exclusively choral performance. This had s everal e ffects. First, it provided a break for the singers of the ch or us. S econd, the resultant interchange heightened the dramatic possibilities of t he pre sen **a** ton. Thespis is a lso so metimes credited with having dignified dramatic presentation in A ttica and t oning do wn t he l icentious character of earlier performances.

According to some, Thespis—from whom the word \overline{A} espian comes—himself took the role of the actor in the plays he wrote (of which only dubious a nd f ragmentary a ttributions su rvive). The likelihood of his e xistence at At hens, ho wever, gains credence from a marble fragment that was brought to England in the 18th century by a representative of Thomas Howard, the earl of Arundel. This stone, now at Oxford University's Ashmolean Museum, b ears a c hronicle of e vents at A thens

and elsewhere in the Greek world from the city's legendary first king, Cecrops, down to 3 54 b.c.e. Among the events receiving notice on the marble is a tragedy (from the Greek *tragos*, "goat," and aeidein, "to sing") produced by Thespis and likely performed between 542 and 519 b.c.e.

The literary h istorian H erbert J ennings Rose also c onsiders it likely t hat, as his o wn ac tor, Thespis used makeup of white lead and a ma sk. Less v erifiable a res tories s uggesting t hat he toured the area with a kind of pageant wagon that served both as stage and transportation.

Thucydides (ca. 460–ca. 401 B.C.E.) *Greek historian*

As the historian Victor Davis Hansen points out, the few c ertainties t hat have come down to us concerning the life of the most famous historian of a ncient G reece a re all to be found in Thycydides' monumental history, A e Pel oponnesian War. From that source, we know that he authored the work and that he was an A thenian. In the course of h is book, we also learn that he was a military commander in Thrace and that his father was named Olorus-a name that further suggests a n oble a nd w ealthy Thracian h eritage. Thucydides confirms that suggestion by explaining that he owned the right to work gold mines in Thrace and consequently enjoyed great influence among the l ocal p opulation t here. I n h is na rrative, Thucydides also incidentally recalls that he caught and s urvived th e pl ague t hat r avaged A thens between 430 and 427 b.c.e.—a plague that killed the Athenian statesman Pericles.

648 Thyestes

During the Peloponnesian campaign, Thucydides was called to help the defenders of the Thracian city of A mphipolis near the mouth of the Strymon R iver on the Strymonian Gu lf at the northern extremity of the Aegean Sea. The Spartan general Brasidas had shrewdly attacked Athens's distant possession instead of its ho meland. The Spartans defeated the A thenians at A mphipolis, and the Athenian citizens blamed Thucydides for this. They expressed their displea sure by relieving h im of command and exiling h im. He remarked that spending the subsequent 20 years in exile among the Peloponnesians gave him "leisure to observe affairs more closely."

Other i nformation c oncerning Thucydides, though some of it may be accurate, is not subject to c onfirmation in d ocuments c ontemporary with him. One tradition holds that he was assassinated and buried outside the walls of A thens. The e vidence c oncerning h is de ath i s c onflicting, though, and some think he died later than 401 b.c.e.

Thyestes Seneca (first century C.E.)

Earlier playwrights both in Greece and Rome had penned tragedies a bout Thyestes, the brother of Atreus, the king of ancient Argos. In Greece, both Sophoc les and Euri pides had done so; in Rome, Ennius, Varius, and A ccius had e ach written a tr agedy on t he sub ject. Re grettably, a ll t hese previous versions have perished.

Seneca's version is a bloody repre æn a ton of one of the most horrifying of ancient stories. On the death of their father P elops, former k ing of Argos, Thyestes a nd At reus quarreled o ver t he succession to the throne. As a part of his plan to prevail, Thyestes s educed h is b rother's w ife a nd stole a w ondrous ram whose fleece was made of gold. Local wisdom had it that the owner of the ram was heir to the throne.

Although Thyestes' r use f ailed, a nd t hough Atreus exiled his brother for the attempt, Atreus's thirst f or r evenge rema ined u nquenched. H e therefore p retended to f orgive h is b rother a nd called him home, seized Thyestes' sons, and killed them. Atreus then invited Thyestes to a banquet where the main dish was his children's flesh. That horrid deed so offended the gods that they cursed the house of Atreus forever. The operation of the curse through successive generations—including, for i nstance, t hat o f Oedipus (see *Oedipus*) became a p rincipal sub ject o f Gr eek m yth a nd tragedy.

Seneca's usual dramatic practice provides clues about possible differences between his play and its lost sources. One of these appears in the dark foreshadowing that occurs in the first scene, in which appear the Fury Megaera, and the ghost of Thyestes' and Atreus's ancestor, Tantalus, who has been condemned to stand forever thirsty in a pool of water that recedes when he stoops to drink. Tantalus wonders why he has been called from Hell to the palace where he once ruled. The Fury orders him t o dri ve a ll o f h is de scendants mad a nd instructs him to urge on the deeds that took place before the play began and that will be enacted in the drama. The ghost objects that though it is right that he suffer, he ought not to be made an instrument for pu nishing hi s de scendants. M egaera, however, insists that he perform her will.

The play, in five short acts, then recounts the events o utlined above. S eneca e mphasizes t he sense of foreboding that seizes Thyestes. He also underscores t he hypocrisy of A treus, who m isleads Thyestes with promises of friendship at the very moment he is having his children murdered and planning the horrifying b anquet. The c onsummate e vil of A treus app ears in h is e xpectation that his people will not only put up with his criminality but praise him for it. Moreover, Atreus takes pride in his sadism. He boasts that death is a favor t hat p eople s eek e agerly a s a n e scape from his cruelty. Seneca g raphically i llustrates t hat cruelty i n the play's fifth act, when Thyestes, having wined and dined sumptuously, ironically wishes that his sons were t here to sha re h is en joyment. A treus assures Thyestes t hat the sons are indeed there, that they are in his embrace, and that no part of them will be lost to their father. Even after Atreus has revealed the deaths of the children, he tantalizes t he father b y withholding the truth about their bodies' whereabouts.

The maniacal cruelty of Atreus make one wonder w hether or n ot S eneca i s u sing t his pl ay to conduct a veiled critique of his former student, the emperor N ero, w hose adv isor S eneca had b een. Nero eventually forced Seneca to commit suicide.

Tibullus, Albius (ca. 56–ca. 19 B.C.E.) Roman Poet

A Roman elegiac poet of the Augustan Age (under the first R oman em peror, A ugust us C a esar), Tibullus, of e questrian (knightly) rank by birth, was a member of the circle of authors who enjoyed the patronage of Marcus Valerius Messalla Corvinus. Corvinus was the scion of an old Roman aristocratic family who had supported the Republican cause b ut w ho, u nder a n i mperial r eign, u ndertook t he su pport o f p oets i nstead. T ibullus had served with Messalla during several military campaigns and was his patron's lifelong companion.

Tibullus was counted among the two or three most distinguished Roman elegists of his epoch and was particularly valued for the ten der and natural qualities of his verse, his elegance, his eroticism, and the linguistic propriety of his diction. Many of the poems are addressed to Tibullus's mistress, Delia, though some also address a lad, Marathus. Apul eius claimed that Delia was a real woman named Plania. The tone of Tibullus's poems tends toward the melancholy. Quintili an considered T ibullus t o b e the foremost Roman elegist.

Four s urviving books containing 3 5 el egies and a poem p raising M essalla constitute t he works of Tibullus. While the first two of these books and the poem in praise of Mesalla near the beginning of the fourth are almost universally accounted to be Tibullus's work, the rest of books 3 and 4 are either certainly not his or are matters of dispute. Some critics properly ascribe several of them to the female Roman poet Sul picia. O ther poems, with less j ustification, a re attributed to other writers, including one named Lygdamus about whose existence some doubt lingers. S ome t hink "Lygdamus" to have been the nom de plume of the young Ovid.

Titans

According to Hesiod in *Theogony*, the Titans were a species of giant immortals that appeared and ruled before the establishment of the Olympian gods of the Greeks. The first Titans, six male and six female, were the sons and daughters of the archetypal deities Uranus (who stood for the heavens) and Gaia (who stood for the earth). The male Titans included: Oceanus, Hyperion, Iapetus, Coeus, Crius, and Cronus; the females were Mnemosyne, Phoebe, R hea, T ethys, Theia, a nd

Themis. Not all the Titans are equally important from a literary perspective.

Among those who do figure prominently in literature, o ne finds O ceanus a nd h is c onsort, Tethys. I ns omev ersions of my th, t hey were thought to have been the parents of the Olympian gods. Hyperion was the sun god and sometimes thought to be the sun itself; the Olympian deity Apollo d isplaced h im. I apetus a nd Themis pa rented the second generation Titan, Prometheus, whose story appears in Aeschylus's tragedy Promet heus Bound. P rometheus w as t hought to have fashioned human beings out of clay and to have taught them useful arts like husbandry and medicine. He was punished for bringing the gift of fire to humankind. His mother Themis served in Homer's work as a functionary in the court of Zeus. She was responsible for maintaining order and decorum at the banquets of the gods.

Cronus, the s on of Uranus, overthrew Uranus and fathered the principal Greek deity, Zeus, who in d ue c ourse s upplanted C ronus. M nemosyne (memory) was the mother of the Muses—the tutelary deities of the fine arts. In later mythology, the Titaness Phoebe became associated with the moon. Rhea became similarly connected with the earth and the mythology of its fertility and the harvest. In the most common versions of the myth, she was the mother of the Olympian gods by Cronus.

From the perspective of the history of religion, it m ay b e t hat t he Tit ans perso nified g ods wh o once h ad b een wor shipped in what eventually became Greek territory by the peoples whom the Greeks displaced, conquered, or absorbed early in their p eriod of e xpansion i n t he M editerranean area.

"Tlepsh and Lady Tree"

A representative of the Nart Sagas, an ancient body of folklore, "Tlepsh and Lady Tree" tells in the Circassian language the s tory of a n a rtisan, Tlepsh, who lacked the n ecessary k nowledge to fabricate t he t hings t hat h is p eople, t he N arts, needed for their lives. N arts were p rotohumans who lived in the distant, mythical past, making a living, as this story implies, by rustling cattle.

Recognizing his need of further skills, Tlepsh goes to Lady Setenaya, who seems to have been a matriarchal figure, and asks her to remember the mastery he n eeds. I nstead, she s ends h im o n a worldwide m ission to ac quire t he k nowledge he lacks.

Equipped with a pair of steel shoes of his own fabrication and with the confidence that strangers will not let him starve, Tlepsh sets out, traveling t hrough f orests, stepping over c liffs, a nd leaping across rivers until he reached the Taingyiz Sea (the Sea of Azov). *Taingyiz*, as the translator John Colarusso tells us, means *heaven* in the Turkicl anguage. On the shore, T lepsh b uilds a raft and sails it over the sea to a l and populated with lovely women. Though he tries to catch them, they elude him. Finally he begs them to tell him about themselves. They explain that they are disciples of Lady Tree.

The women lead T lepsh to t heir r uler. Partly human and partly deciduous, Lady Tree has roots reaching down into the depths of the earth. Her cloudlike hair reaches high into the sky, but she has two arms and a lovely human face. Lady Tree instantly falls in love with Tlepsh, feeds him, and invites him to rest. Late at night, however, Tlepsh remembers h is que st a nd a nnounces h is de parture. W hen La dy Tree o bjects, s aying h e is th e first human to have found her, Tlepsh replies that he is one of the gods and makes love to her. Then he explains h is mission: to travel to the edge of the earth to discover knowledge for the Narts.

Lady Tree begs him to stay. She can teach him all he needs to k now, she s ays. The world has no edge. She can give him everything.

But Tlepsh will not be dissuaded. He pursues his quest, and it is an utter catastrophe. Dejected, he re turns to La dy Tree a nd a dmits his failure. Lady Tree t ells him t hat t he N arts will p erish from pride and stubbornness, but she a lso p resents him with his child, whom she has borne in his absence. She has filled the baby boy with all the knowledge the Narts will need, and she tells Tlepsch to take the baby home and rear it.

One day the baby disappears. Thinking that he has r eturned to h is m other, T lepsh s eeks h im there. But Lady Tree d oes n ot know h is whereabouts. She suggests that some day the child may return, and Tlepsch returns home dejectedly.

The s tory sha res elem ents i n c ommon w ith that of Homer's *Odyssey*—particularly the section in which Odysseus finds himself a love captive on the island of Ogygia, home of the witch Calypso. Additionally, Colarusso has pointed out the parallel between Lady Tree and the great ash tree from N orse m ythology, Y ggdrasil, w hose roots and branches bind the universe together.

Trachiniae, The (*The Women of Trachis*) Sophocles (ca. 450 B.C.E.)

Because of a pparent i nfluences (such a s a p oisoned robe) from the younger playwright Eur ipides, $\overline{A} \ e \ T \ rachiniae$ is thought to be among Sophoc les ' later compositions. It draws its subject from the legendary material surrounding the mythical hero Heracles (Hercules).

As So phocles' a udience w ould h ave k nown, in Heracles' youth and following the tragic death of h is first w ife, M egara, and t heir c hildren a t his h ands during a fit of mad ness, h e ma rried Deianeira, w hom he w on i n a w restling ma tch with the r iver god A chelous. A s the n ewlywed couple journeyed to ward home, they had to r ely on a c entaur, Ne ssus, t o c arry t hem across t he flooded river Euenus. As Nessus carried Deianeira a cross, t he c entaur a ttempted to r ape her. Observing t he si tuation, H eracles sho t N essus with a poisoned arrow. As he died, the centaur instructed D eianeira t o preserve s ome of t he blood that had clotted around the wound. Should Heracles ever prove unfaithful to Deianeira, the dying N essus promised, she c ould apply i t to a garment. W hen H eracles do nned t he ga rment, his love for her would be restored.

Eventually Heracles, who possessed the strength of m any me n, had to endure Zeus's punishment because he had deceitfully murdered a ma n. Zeus sentenced the hero to a period of slavery performing woman's work in the household of O mphale, the queen of Lydia. As Nessus had surmised, Heracles d id i ndeed fall in love a gain, t his time with Iole, a p rincess of O echalia in Eub oea, whom he eventually carried off by force.

When D eianeira learned t hat H eracles loved another, to regain h is a ffection she sent h im a robe smeared with Nessus's blood. The poisoned blood, however, burned into the hero's flesh and caused unendurable suffering. To end h is agony, Heracles h ad h imself c arried to t he su mmit o f Mt. Oeta and immolated on a funeral pyre.

Sophocles' version of the later portion of these events begins 15 months after Heracles has left his home i n Trachis to p erform a y ear's s ervice to Queen Omphale. Deianeira has had no word from her husband. In fact, she has no idea where he has gone. A nurse, Dei aneira's c ompanion, su ggests that s he s end h er s on H yllus i n s earch of h is father. Hyllus enters, and in the ensuing conversation we learn that he has more idea of his father's whereabouts than Deianeira does. Heracles, Hyllus t hinks, i s ei ther w aging or c ontemplating waging war on Euboea.

Learning t his, D eianeira b ecomes a gitated. Oracles have p redicted t hat t his is t he turning point in Heracles' life. He will either die or ever afterward have rest from his labors. At his mother's urging, Hyllus goes off in search of his father. The ch or us a ttempts to c omfort Deianeira. Just then a messenger arrives with the news that Heracles lives and will soon be home, and this is confirmed by a herald, Lichas, who has come directly from H eracles. L ichas r ecounts t he wanderings and a ccomplishments of He racles since he le ft

home. L ichas has a lso b rought with h im s ome captive exiles from Euboea. A mong these is Iole. Deianeira tries to draw her out, but Iole refuses to speak, and Deianeira respects her silence.

As Deianeira is about to leave the stage, the earlier m essenger de tains her a nd i nforms her that Lichas was untruthful for her benefit. The messenger confirms that Heracles sacked the city of Oechalia in Euboea because of his passion for Iole. Under pressure, Lichas confirms the truth of this. Deianeira goes within to prepare her message and gifts for Heracles, and the chorus rehearses her history and the story of her marriage to Heracles. Deianeira recounts the story of Nessus's gift and produces the robe. The leader of the chorus encourages her to send it. She does, but she suffers a sense of foreboding. She r eports to t he chorus that a ray of sunlight fell on a bit of cloth that she had anointed, and she tells how the cloth crumbled away to dust. She fears she has done a horrible t hing i n s ending H eracles t he rob e. She resolves that if it causes Heracles' death, she too will die.

Hyllus reenters with the news that the robe did indeed kill, or is in process of killing, Heracles. He gives a detailed, gruesome, eyewitness account of He racles' sufferings, and he tells h is mother that he has brought his father for her to see, either alive and suffering or by now perhaps dead. She exits, and the chorus sings of the events just past. The nurse enters to r eport Dei aneira's death by her own hand in the bed that had belonged to her and Heracles. The nurse also reports Hyllus's discovery of his mother and his grief at her suicide.

Hyllus a nd an old man now enter a long with Heracles, who is borne in on a litter. Heracles wants Hyllus to produce his mother so that Heracles can avenge himself up on her. He details the pangs of his agony and promises to kill Deianeira.

Hyllus t ries t o c alm h is v engeful f ather a nd reports Deianeira's death. He also informs Heracles that his wife's intention was only to regain his love, a nd t he v engeance was t hat of t he c entaur Nessus, not Deianeira. Heracles realizes that the oracle of his death has been fulfilled; a living person could not kill him. He commands that Hyllus prepare his funeral pyre on Mount Oeta and that he ma rry I ole. H yllus a grees, H eracles i s b orne offstage on h is litter, a nd t he c horus r eflects on the unreality of all existence except that of Zeus.

Though not one of Sophocles' best plays, $\bar{A} e$ *Trachiniae* is particularly notable for its sympathetic portrayal of the character of Deianeira and for its concomitantly unsympathetic portrayal of the vengeful Heracles.

tragedy in Greece and Rome

The word *tragedy* derives from the Greek *tragos* ("goat") a nd a eidein (" to sing"). I n i ts e arliest manifestations in Europe, Egypt, and the Middle East, tragedy seems to have been associated with religious ritual, with the cycle of death and rebirth in the vegetative world, and with such deities as the Egyptian Osiris or the Greek Dionysus who were connected with that cycle. Mythical figures such as the Greek god Adonis and, in Greece, the sacrifices o f g oats a t D ionysian r ites a lso s eem related to tragedy.

Some argue that ancient Greek theatrical tragedy sp rang p artly from e ulogies gi ven a t t he funerals of influential people. One scenario suggests t hat the m ost interesting ep isodes of t he lives of notable persons began to b e acted out at graveside and attracted such large audiences that someone g ot the i dea of s taging the action in a larger venue.

Thespis of ikaria (fl. ca sixth century b.c.e.) is us ually cr edited with having invented Greek stage tragedy by adding an actor who responded to the ch or us's song. The first Athenian author whose na me is r ecorded as a t ragic pl aywright was P hrynicos of A t hen s. The o nly t ragedy whose title survives is his \overline{A} e Destruction of Miletus, based on the Persian conquest of the Ionian Greek city of Miletus and the enslavement of its entire population in 494 b.c.e. Phrynicos's play or plays i nvolved o nly a si ngle actor—who m ight portray more than one part by changing his costume and mask—and a chorus.

Early on, the word *tragedy* applied to any serious play, even those with happy en dings such as Sophoc les '*Phil octe tes*. Together with Sophocles, Aesch yl us and Eur ipides were the principal Greek tragedians.

About 70 years after the death of Euripides (406 b.c.e.), A r ist ot l e developed a theory of tragedy in his *Poet ic s*. He thought of tragic figures as persons who, owing to a "tragic flaw," somehow contributed to their own downfall or destruction. The phrase *tragic flaw* translates Ari stotle's G reek word *hamartia*, a term used in archery that means missing the target or what one a ims at. It is the same w ord u sually translated as "sin" when it occurs in English versions of the Greek New Testa ment. Thus, to A ristotle, a t ragic hero w as a person whose j udgment or character was flawed but who was otherwise a p erson of some importance, with high morals and with intellect sufficient to her or his station and responsibilities.

Aristotle arri ved a t h is de finition o f t ragedy and his analysis of its elements empirically-that is, he attended the theater, watched many tragedies, and conducted an analysis of the way they seemed to operate. He noted that the action of tragic p lays r egularly t ook pl ace i n a 2 4-hour span, usually (but not always) occurred in a space limited by the distance one could travel in that time, and a lways swept i nescapably from beginning to end without interruption or remission. (This observation later became the basis for the Italian Ludovico Castelvetro's concept of the unities of time, place, and action-a concept Aristotle himself n ever m entioned.) A ristotle's a nalysis proposed that the action be complete in itself and of a sufficient magnitude, and that its language (always verse) be lofty. Because the flaw led to the protagonist's downfall, the tragic hero's situation finally had to reach a turning point (a peripeteia). This resulted in the hero's suffering in a way audience members identified with. That identification evoked in them the emotions of pity and fear, and the end of the play served to purge the audience of those emotions. The resultant catharsis, or cleansing, left the audience morally improved.

In t he c lassical Gr ecian w orld, t he p erformance of tragedy was intimately bound up with religious observance. Tragic playwrights competed annually to have their work selected as winner at such religious festivals as the Athenian festival of Lena ea or the festival of the wine vats, which occurred a nnually a fter t he w inter s olstice i n honor of the god Dionysus. The more important such festival, the Gr eat D ionysia, honored the same god in the spring.

During the Hellen isti c A ge, Greek tragedy survived at A lexandria, Egypt, and elsewhere in the Greek world in the hands of such poets as the Ple iad of Al ex andria. These writers included Alexander of A etolia, Homerus of Byzantium, Sositheus of A lexandria Troas, Lyc oph r on, Philicus, Dionysiades of Tarsus, and Aeantiades. To represent this group, only 1,500 lines of Lycophron's tragedy *Alexandra* have survived. It concerns a prophecy of doom for the Greeks returning home from the Trojan War.

Roman tragedy relied heavily for its subjects on its Greek forebears. The first Roman to write tragedy wa s L ivius A ndronicus, w hose w ork su rvives in about 40 fragments. On the basis of these fragments, we know the titles of five examples of his war tragedies: *Achilles, Aegisthus, Ajax Mastigophorus* (Ajax w ith the w hip), *Equos Troianus* (The Trojan horse), and *Hermiona*. We also have the n ames of three tragedies d rawn f rom my th: *Andromeda, Danaë*, and *Tereus*. It is clear f rom the fragments that Livius Andronicus introduced innovative elements into the plays and stories that he borrowed from his Greek predecessors.

The first Roman to write a tragedy based on Roman history rather than on Greek originals was Marcus Pacuvius (d. 220 c. e.) Entitled *Paulus*, his tragedy s eems based on the career of the

654 tragedy in Greece and Rome

Roman general Paulus Amelius, who had brought Greece u nder Roman control a nd had de stroyed 70 cities in Greece. Pacuvius also translated into Latin row- bst Greek tragedies composed after the career of Euripides. Only the names of four such translations survive. Beyond this, Pacuvius composed at least eight tragedies on subjects connected with the Trojan War. The I talian pl aywright Pietro M agno has tried to r econstruct o ne such play—*Teucer*—from its fragmentary remains.

The t ragedies o fs everal Ro man a uthors, including V arius and A ccius, h ave utterly perished. F ragments o f 20 tragedies by Quintu s Ennius, however, survive. These remains suggest that E nnius fr eely t ranslated f rom G reek or iginals and that he particularly revered Euripides.

Among R oman t ragic pl aywrights, Se neca remains by far the most celebrated. We have nine complete t ragedies t hat have been confidently ascribed to Seneca. These include four probably based o n pl ays b y Eu ripides: Hercules f urens (Mad Hercules); Medea; Phaedra; and Troades (A e Trojan Wo men). O ne, Agamemnon, b orrows its plot from Aeschylus. Two more, Oedipus and Hercules Oetaeus (Hercules on Oeta) rest substantially on the work of Sophocles. Another, Hippolytu s, r ests o n S ophocles a nd a s econd unknown s ource. Wh ere t he i nspiration c ame from for the ninth tragedy, Thyestes, no one is certain, though pre æ dent Greek and Roman versions existed and Seneca could have used any one of t hem or u sed t hem in c ombination. A fragment of Seneca's version of A e Phoenician Women also survives.

A 10th complete tragedy is sometimes doubtfully ascribed to Seneca, but because it is the only Roman t ragedy a bout na tive Ro man h istory to survive in its entirety, the play, *Oct avia*, remains important w hatever i ts a uthorship. A s S eneca's editor and translator, Frank Justus Miller, tells us, the m ain o bjection to S eneca's ha ving w ritten *Octavia* arises from the play's circumstantial account of t he de ath of N ero, w hich o f c ourse occurred after Seneca's judicial suicide.

Senecan tragedy is the source of a subcategory of t ragedy t hat became w idely popular on the

European stage during the early modern period the *tragedy of the blood*. Seneca's tragedies are the only complete Roman representatives of the form to survive. He may have intended them both for stage per for mance and for being read, either a s closet drama or by a single performer in the manner of a de clamation. H is plays reflect a preference for b revity that the l iterary h istorian Gi an Biaggio Conte attributes to the influence of Asiatic rhetoric.

We know the names of such subsequent tragedians as Mamercus Scaurus, whose veiled references to the emperor Tiberius in his play *Atreus* resulted in Mamercus's judicial suicide. The political and military dislocations that accompanied the fall of the Western Roman Empire along with a popular taste that valued spectacle more highly than traditional performance perhaps meant that fewer tragedies were written and enacted.

Late in t he a ncient pe riod, t he C hristian church co-opted t heater, m oving per formance into sacred spaces and focusing on such subjects as the lives of saints, so tragedy was little represented. A lthough plays ba sed on t he l ives o f Christian ma rtyrs c ame to b e p erformed i n abundance, such plays were examples of p athos insofar as they concerned the physical deaths of martyrs and of high comedy insofar as they concerned t he e ternal l ives o f t heir s ouls. F or t he Christian faithful, ultimate tragedy a d icts only condemned souls.

Trinummus (The Three-Penny Day, The Three-Bob Day, The Three-Dollar Day, The Thirty-Dollar Day) Plautus (late second century B.C.E.)

Thought t o b e a mong P l au t us's later p lays, *Trinummus* (a three- penny piece) shares some of the c haracteristics o f la ter m edieval m orality plays a nd i s d istinguished f rom o ther P lautine comedy by having an all-male cast. A comedy of manners, the play affirms the benefits of conventional morality.

In brief, the plot is this: Journeying a broad, Charmides appoints his friend Callicles to manage Charmides' a ffairs. Charmides' wastrel so n Lesbonicus, however, i mmediately spends all of his father's money that he c an lay h is hands on and then sells h is a neestral home to C allicles. The wastrel's profligacy, we hear, has deprived his unnamed s ister of t he do wry she w as to ha ve brought w ith he r i nto a n a rranged ma rriage. Another young man, Lysiteles the son of Philto, wishes t o m arry L esbonicus's s ister w ithout a dowry. Lesbonicus, however, is mortified by that notion. (In the ancient world, a do wry was a woman's insurance policy. If a marriage broke up, the dowry had to b e restored to her .) Moreover, Lesbonicus feels guilty about his prodigality and no longer considers his financially ruined family the social equals of Philto and Lysiteles.

Callicles is about to confer a dowry on Charmides' daughter when Charmides himself returns. At first, finding C allicles i n p ossession o f h is home, he thinks that Callicles has betrayed him. All m isunderstandings a re e ventually r esolved to everyone's satisfaction, generous d owries are bestowed, a nd L esbonicus reforms a nd s ettles down.

As the play opens, two allegorical figures, Luxury and her d aughter W ant, t ake the s tage and speak t he p rologue. Lu xury s ends W ant i nto Charmides' house and then add resses the audience, explaining that the son has run through the father's entire fortune and now must dwell with Want. Luxury also explains that Plautus has translated t he G reek p laywright P hilemon's c omedy, \bar{A} ensaurus, i nto L atin and g iven it a n ew title. The play's most recent English translator, Daniel Mark Eps tein, t akes h is c ue f rom P lautus a nd, allowing for inflation, has reentitled the piece \bar{A} e \bar{A} irty- Dollar Day. It is that version which is used here.

As act 1 opens, an elderly gentleman, Megaronides, enters and bewails the state of contemporary m orality: V ice is ruining t he c ountry. Callicles calls his wife to worship their household god and prays for his wife's death as soon as she is out of e arshot. Me garonides g reets h im, r eveals that h e t oo d islikes h is o wn w ife, a nd t he t wo argue about which wife is worst.

Now Megaronides gets to the point of his visit. He has come to reprove Callicles for his handling of Charmides' trust. He blames Callicles for having paid the son 100,000 dollars for Charmides' house and says that the boy will instantly squander the money.

Callicles f eels f orced to b etray C harmides' trust and tells Megaronides that, before leaving, Charmides had walled up 30,000 gold coins in the house, and Callicles has bought the house to take it o ut of t he s on's h ands a nd to p roperly exercise his guardianship of his friend's property. I f C harmides r eturns s afely, h is m oney i s secure; if n ot, it will pay his daughter's dowry. We learn that both Charmides' children are still living in the house as part of the sale bargain. A much-chastened Megaronides leaves, blaming himself for having b elieved i dle go ssip a gainst his friend.

Act 2 begins with the soliloquy of the young Athenian, Lysiteles. He is pondering the question of whether to concentrate on love a ffairs or on business and wonders which option would bring the g reater ha ppiness. B usiness w ith i ntegrity wins his internal conflict. His father, Philto, now enters spouting a fountain of moral advice. After assuring his father t hat he always observes his counsel p unctiliously, L ysiteles tries t o borrow money to help a young friend out of financial difficulty. Philto's high principles, however, do not usually extend to rescuing the financially foolish, but a s Lysiteles keeps insisting, Philto begins to weaken until he hears that the friend is Charmides' s on, L esbonicus. Then h e o nce more g rows reluctant to help a wastrel.

Lysiteles s uggests t hat he b e a llowed to w ed Lesbonicus's s ister a nd to t ake her w ithout a dowry. Sho cked a t such a n u nprecedented i dea, the doting father nonetheless yields and agrees to arrange the marriage on terms he regards as unfavorable. As he do es, he s ees L esbonicus coming with his slave Stasimus, and Philto hides to eavesdrop on their conversation. The two are trying to sort out where 100,000 dollars has disappeared to in the past two weeks. Philto interrupts them and tries t o arr ange t he ma rriage, b ut L esbonicus refuses the contract on the grounds that, because he has wasted his father's substance, the families are no longer social equals. He is also unwilling to put his sister into a situation in which she does not have the protection that a dowry affords. After some persuasion, Lesbonicus agrees to the match provided that Philto will accept a remaining family farm as his sister's dowry.

The slave Stasimus, trying to keep the farm in his m aster's f amily, i nterrupts a nd tel ls P hilto awful s tories a bout the farm's imperfections. I n the end, Philto refuses the farm but still insists on the m atch, and Le sbonicus finally app ears to agree. Wh en P hilto e xits, h owever, L esbonicus reveals that, if he can not provide his sister with a dowry, he has no intention of following through. As act 3 opens, Stasimus explains the situation to Callicles, who goes in search of Megaronides to ask hi s adv ice. Then L ysiteles a nd L esbonicus meet a nd d iscuss t he r uinous f act t hat, u nlike Lysiteles, Lesbonicus chose love affairs instead of business a s t he road to h appiness. L esbonicus continues to try to s ave some sh red of his selfrespect b y re fusing to a llow h is si ster to ma rry without a dowry, and Lysiteles argues that, if he allows h is friend to r uin him self financially b y providing a dowry, Lysiteles' own reputation will be in tatters.

Stasimus i nterrupts t hem w ith a b it of s lapstick h umor, a nd the fr iends m ove o ff to a void him and then take their leave of one another. Stasimus c oncludes t hat he ma y ha ve to jo in t he army.

Scene 3 of the third act opens with a dialogue between Megaronides and Callicles, who hatch a plot to ma ke it app ear that Charmides has sent money for his daughter's dowry. Callicles is going secretly t o d ig u p t he g old, a nd a grees to h ire some local lowlife as the fake messenger who is bringing the money.

Charmides himself opens act 4 with a prayer of gratitude to the sea god N eptune for having brought the old man home safely, though u nexpectedly. As he nears his house, he sees approaching the swindler whom Megaronides and Callicles have hired for the 30 dollars that give the play in this version its title. Charmides decides that the swindler bears watching. As the two encounter one a nother, the swindler plays the role he h as been h ired f or, saying t hat he is Charmides' messenger-except that he does not know Charmides' name. Charmides prompts him to remember it a nd t hen que stions h im a bout t he pl aces that th ey s upposedly h ave s pent t ogether. The swindler claims to have 200,000 in gold belonging to Charmides. Charmides identifies himself and demands that he hand it over.

After a n e xchange o f in sults, t he s windler departs, and as Charmides sees Stasimus approaching at a drunken jog, he first hides and then confronts S tasimus, w hom he does not at first recognize. Stasimus discourses like an orator about the sad state of public morality and manners, and Charmides e ventually r ecognizes h im. It t akes a while, though, for the s odden St asimus to r ecognize his master, and Plautus milks the situation for its comic potential. Then Stasimus reveals that Lesbonicus has sold the house, and Charmides thinks that C allicles h as b etrayed h im, b ut s oon a ll i s explained. Charmides sends Stasimus to supervise unloading the ship he arrived on.

The two old friends u nravel the mystery of the swindler for Charmides, who is pleased to find t hat h is d aughter is betrothed to a y oung man of good family. Lysiteles arrives and introduces h imself a s C harmides' new son- in hw. Charmides awards a dowry of 200,000 dollars. He recalls, however, that this is his son's friend and blames him for having led Lesbonicus astray. Lysiteles denies t he ac cusation a nd r econciles the father to his son. Lesbonicus agrees to the marry Callicles' daughter, and Charmides utters one more m isogynist a nd m isogamist r emark, saying: "One wife is punishment enough for any man." Callicles d isagrees, s aying t hat L esbonicus's sins would require 100 wives as just retribution. Lesbonicus promises to reform. All agree that the wedding will occur the next day, and the play ends.

The Eps tein t ranslation of t his pl ay i s often appropriately f ree. H owever, o ne de vice t hat Epstein introduces seems to ring false: He employs ste ro typical, Hollywood- slave- en-plantation verbal h umor i n t he sp eeches of t he Gr eek s laves. While it is true that Greek and Roman stage slaves were often ste ro typical figures and often associated with low humor, the a nalogy that Epstein tries to establish strikes me as outdated for contemporary readers. George E. Duckworth's older translation provides interested readers with a more literal alternative.

Tristia and Epistulae ex Ponto Ovid (8–ca. 17 c.e.)

For more than 2,000 years, literary scholars and historians h ave advanced n umerous t heories concerning the reasons that Rome's first emperor, A ugus t us C a esar, d ecided to e xpel O vid from Rome in the eighth year of the C ommon Era. None of the scenarios that the scholars suggest is impossible, but neither is any one of them certain. N o u ncertainty, h owever, s urrounds Ovid's p ermanent b anishment b y i mperial decree to a r emote and u ncongenial outpost of Roman control—Tomis o n t he sho res o f t he Black Sea.

Technically, Ovid's banishment did not amount to exile, otherwise he could not have retained his property and his rights as a Roman citizen as he did. The literary historian Hermann Frankel sensibly suggests that, whatever the deciding occasion had been, the aging and increasingly conservative Augustus perceived in Ovid's a matory freethinking and risqué humor a threat to the family values that th e e mperor c herished f or Ro me. Though Augustus allowed the private circulation of Ovid's works to c ontinue, he had t hem r emoved f rom public l ibraries. I n a ny case, t here w as n o le gal appeal f rom t he de cree. On ly i f t he em peror changed his mind could Ovid hope to e scape the bitter cold and what he considered the provinciality of Tomis.

Despite the poet's depression at this unlookedfor turn of events, he discovered that his capacity for writing first- rate poetry had not diminished. While O vid was still aboa rd ship on the outbound journey, he turned his attention to composing t he first of many collections of e legies that would flow from his pen during the last nine years of his life. He titled this first collection of 5 books of el egies *Tristia* (Sadness, or *Elegies of Gloom*).

658 Tristia and Epistulae ex Ponto

Tristia, Book 1

The first of Ovid's elegies is an extended address to the book he is writing. He imagines that it will visit the beloved places in Rome where he cannot go, and he charges the book to greet those places for him. He also warns the book that readers may take no pleasure from it. He begs the book to try to intercede with Augustus on the poet's behalf and to withdraw the edict that has left him isolated from his friends and his family. He imagines that his book at last comes to rest in the "round book-cases" of O vid's home, where Tristia will find itself lodged among its brothers. Ovid warns Tristia to avoid those of his books that "teach how to love"—his Art of Love. He tells his book to make haste while he h imself continues "to dwell at the edge of the world."

In the second elegy, Ovid describes a storm at sea and his responses to the storm's fury. Among those responses is his vain prayer that he will be drowned. His thoughts turn to the wife he left in Rome and her g rief for him. But the violence of the storm does not long allow him to think about her, a nd h is t houghts turn a gain to dy ing. H e decides that he p refers to b ear "Caesar's wrath" with h im to the appointed pl ace of h is ba nishment. H e makes explicit h is continued a nd former loyalty to Augustus and insists that no guilty deed incurred his punishment.

In the third elegy, Ovid revisits in his imagination his final night at home before his exile and leave-taking from his wife and friends. He regrets that his daughter was in Libya and had not heard about his circumstances. He recalls his fruitless prayers, his three attempts to leave his home for the final time. He remembers his wife's offer to accompany him and her frenzied grief as he left. Ovid entertains the hope that her staying in Rome will present opportunities for her to intercede on his behalf and bring him home at last.

The sea roars again in the fourth elegy as Ovid remarks on the boldness to which his fear of seafaring has forced him. He sees the mariners pale with fear and notes that even the helmsman has given over any attempt at steering. He prays that, like him, the adverse wind will yield to the desires of the divine Augustus. If Ovid were not already dead, he thinks, he would like not to die.

A lengthy epistolary elegy, the fifth, addresses an un named friend—the first a mong h is c omrades. O vid cr edits t he f riend w ith ha ving dissuaded him from suicide a fter t he de cree o f banishment. The poet ruminates on the fickleness of fortune, considers examples of friendship from the annals of mythology and literature, and then remarks t hat he knows the qu ality o f h is o wn friendship wi th th e o de's a ddressee th rough experience of t he a nonymous friend's k indness. He m akes on e o f ma ny veiled references to t he reason for his b anishment, a sserting y et a gain that h is naiveté, not h is malice or fault, was the cause of Augustus's displea sure.

Ovid then whines a bit about his own frailty, which does not suit him to w ithstand the hardships h e a nticipates. H e contrasts h imself w ith Ulysses, a h ardened w arrior u sed to a dversity. An urban poet, Ovid can expect no homecoming of t he s ort th at a waited H omer's hero—unless Augustus relents.

The si xth ele gy of the first book of *Tristia* is both a love letter and an encomium to his wife, who has stood by him through all of life's vicissitudes. Now all he can promise her is what hopeful poets a lways promise their ladies—immortality for as long as the poems are read. In Ovid's case, we are at 2,000 years and counting.

A c ertain de gree of theatrical exaggeration attends the seventh elegy of the first book. In his grief over h is ba nishment, O vid had b urned a copy of h is greatest work, *Met amorp hoses*. He treats t his a ct as if h e had de stroyed t he o nly extant copy. In fact, of course, many copies were in circulation as they have been ever since.

The eighth and ninth elegies make a pair. The first of t hem r eproves a "traitorous f riend" for having d ropped h im w hen O vid lo st i mperial favor. The o ther app reciates a t rue f riend w ho stuck by the poet despite his ill fortune and who seems to be laboring at having the emperor withdraw Ovid's decree of banishment. The 10th elegy traces Ov id's c ourse, first f rom I taly ac ross t he Adriatic S ea to G reece, then to the Dardanelles, and finally to the Black Sea (also called the Euxine Sea) and the city of Tomis. His ship bears a figurehead of the goddess M inerva on its stern, and to her he p romises a s acrificial lamb if he makes it safely to his place of exile.

The 1 1th a nd final ele gy of the collection addresses the reader. O vid a ssures h is a udience that every preceding word was written at sea often during perilous circumstances. Even as he writes the final words of the first book, a storm is raging.

Tristia, Books 2 and 3

The en tire s econd b ook of *Tristia* represents a probably fore doomed e ffort on O vid's part to change Augustus Caesar's mind about him. Ovid hopes, fondly as it proved, that he can lead Augustus to revoke Ovid's banishment by pleading his poetic t alent. O vid pu lls out a ll t he s tops a nd observes that two faults—a poem and a bl under in s eeing s omething that he should not have—have resulted in his ruin. He argues at length that poetry has n o power t o c orrupt if the mind of the reader is pure. He clearly thinks he knows the cause o f Ca esar's d ecision re specting him. H e ends the book by asking not for pardon but for a more salubrious place of exile.

Book 3 begins with Ovid imagining his book's arrival in Rome. Then, in the second elegy, Ovid shivers in the S cythian c old a nd longs for Rome. The t hird p oem is a le tter to O vid's wife t hat he dictated to a scribe as he lay ill in Tomis. He sends her h is lo ve, p raises her u ndoubted lo yalty, a nd imagines that he may soon die. He asks that, should that h appen, his b ones b e r eturned to Ro me for interment o r c remation. He a lso w rote h is o wn epitaph. In the translation of Arthur Leslie Wheeler, it reads: "I, who lie here, with tender loves once played, / Naso, the bard, whose life his wit betrayed. / Gr udge n ot, O L over, a s t hou pa ssest b y, / A prayer: "Soft may the bones of Naso Lie!"

The fourth elegy has two parts. The first part warns a friend against being too familiar with the mighty of the earth. Danger lurks in their company. The second part declares that though his body is in a godforsaken part of the world, Ovid's mind is with his wife and friends in Rome. He cautiously do es n ot na me h is friends lest they be tarred with his brush.

A s eries of a ffectionate ep istolary e legies follows. Two a re to f riends a nd a nother to O vid's daughter, Perilla, to whom he gives fatherly advice. The eighth elegy is another prayer to Augustus for a more congenial place of exile.

Associatively, Ovid now turns his attention in the nineth elegy to Tomis itself. He traces its origin as a Grecian colony of s ettlers from Miletus who made their homes a mong the tribesmen of the Scythian Getae. He recalls the story of Jason and the Argonauts, who came to Scythia's shores in search of the Golden Fleece, and the way Medea became involved in his plot (see *Medea*). Tomis, he concludes, is the place where Medea tore her brother's body apart after she had murdered him.

The 10th elegy spins tales—accurate enough of Tomis's icy climate and the way the inhabitants dress to deal with it. Ovid also details how, when the r ivers fr eeze over, T omis is exposed to the raids of mounted barbarians, with the consequent theft of b oth p eople and livestock. He finds the place to be without any redeeming qualities.

Ovid's next elegy addresses an unnamed enemy whom he holds responsible for i nflaming Augustus against h im. He hopes that man can experience Tomis in h is own p erson. I n elegy 3.12, a s spring begins to melt the ice of Tomis but not that of Ovid's exile, he hopes that he may meet a sailor who speaks Latin or at least Greek and get some news of Italy. The 13th elegy is addressed to Ovid's birthday deity, w ho a rrives to find h imself s urprised at Ovid's new location and circumstances. Instead of a nother y ear of l ife, O vid longs for a funeral p yre. I n a n e pilogue, t he 1 4th ele gy o f book 3, Ovid complains that the Gothic language is beginning to adulterate his Latin.

Tristia, Book 4

The introductory ele gy of b ook 4 add resses t he Muse s who inspire Ovid's verse. When they seize control of his mind, he can forget his misery for a time and share with his Muses the creative joys of Mt. Helicon.

Among t he t roubles O vid f aced i n T omis, apparently, was a responsibility for serving in the civil guard. When pirates attacked from the sea, as they do in the 2 nd ele gy, a nd the sig nal was given, he had to don s word, a rmor, a nd hel met, and join the other citizens to r epel the r aid. He confesses that he had always done his best to avoid military service, and he has not learned to like it any b etter th an b efore. In t his mi litary m ood, Ovid next celebrates in his mind's eye the Roman triumphs over the Germanic tribes, and he c ongratulates Augustus in absentia.

Elegy 4.3 is a to uching e pistolary p oem to Ovid's wife. He expresses h is fear t hat she ma y have grown ashamed of being his wife. He comforts he r, a ssuring he r that h is gu ilt h as n ot touched her n or tinged her r eputation. On t he contrary, adversity provides opportunity for the display o f g enuine v irtue. The f ollowing ele gy, also e pistolary, a ddresses a n oble f riend. O vid assures this friend, perhaps Messalinus, that the friend's regard for him will do the friend no harm since A ugustus r ealizes t hat O vid's f ault w as unintentional. Ovid closes the poem by reciting some of the mythical history of his place of exile. He notes here, as elsewhere, that the Euxine Seathe hospitable sea-is a m isnomer. The s ea o n whose sh ores h e now dw ells s hould i nstead be named the Axine—*inhospitable*—Sea.

The fifth ele gy o f b ook 4 add resses a nother friend and expresses Ovid's frequent concern that his friendship may be dangerous to his associates. Ovid praises the friend and s ends warm wishes for h im a nd h is f amily. The f ollowing p oem laments the poet's failing health and the fact that time's passage has not eased his sense of loss. He lives in the hope that death will release him from his woes. The next verse letter chides a friend who has n ot w ritten, a nd t he n ext a fter t hat a gain rehearses the poet's woes and warns against arousing the wrath of the emperor, who is a living god.

The ninth elegy of book 4 atypically threatens revenge a gainst the person whom O vid b lames

for his banishment. In the 10th and final elegy, he summarizes h is a utobiography a nd t hanks h is Muse for h is talent and the relief that she offers from his psychological misery. He also gratefully thanks h is readers for the fame and wealth that their eager acceptance of h is poems has brought him. He feels certain that h is fame will survive, though the earth will claim his body.

Tristia, Book 5

The fifth book of Tristia opens with a poem that is also an apology. Ovid expresses the fear that his e pistolary p oems f rom e xile w ith a ll t heir complaining may burden the friends to whom he sends them. He explains that he sends them as a way of being with them if only by an exchange of thoughts. In the second poem, a letter to his wife, he imagines that she must pale with fear whenever a le tter a rrives. H e r ehearses h is de pression and lists some of the many sorrows that oppress him. He ends his address to his wife by saying that he will seek refuge at the holy altar-that is, appeal to Augustus-even t hough he k nows himself to be hated there. The ba lance of the poem contains a direct address to t he emperor, imploring once again a more pleasant and healthful place of exile. Such pleas continued to fall on deaf ears.

Since Ovid's pleas have failed to move Augustus, the p oet appeals to h igher authority in his next ve rse le tter, o ne add ressed to t he g od Bacchus. He begs the god to intercede with the emperor. He also hopes that poets, drinking the wine that marks the god's festivals, will recall the name of Naso (Ovid's family name) and drink to h is he alth. A nother le tter of c omplaint to a friend follows, and after t hat c omes a b irthday greeting to his wife, expressing the hope that she may live happily even though her husband is banished from her side. It is the poet's fervent wish that h is wife be spared grief t hat she ha s do ne nothing to deserve.

The sixth letter-poem of the fifth book seems to re spond to h is w ife's appa rent i mpatience with all of Ovid's self-pity. He begs her to overcome her anger and bear with him lest he utterly despair. The seventh epistolary poem describes Ovid's neighbors—the descendants of the Greeks who founded Tomis as well as the Gothic tribes people, the Getae and the Sarmatae. The latter two, h airy and vi olent, g o a rmed w ith b ows, poisoned arrows, and knives. The former speak a variety of Greek whose vocabulary and pronunciation has been invaded by the language of their barbarous neighbors. The poet comments on the news that his verses are being performed in Roman theaters to ac company d ancing. He says that, though he has no interest in applause, anything th at keeps h is r eputation a live i s pleasing.

The eig hth v erse le tter add resses s omeone whom O vid hates. The p oet s ays t hat, ho wever low he h imself has fallen, the add ressee is lower still. O vid wa rns h is en emy t hat he ma y y et b e restored to Rome. W hen that h appens, he w ill endeavor to s ee t he add ressee s entenced to a worse form of exile.

The ninth verse letter is to an unnamed friend who has apparently provided Ovid with continual support during his period of exile. Ovid expresses his gratitude and credits the friend for preserving the p oet's life. The 1 0th ele gy a gain e xpresses Ovid's distaste for Tomis and for the barbarians who la ugh a t h is L atin a nd t hreaten h im w hen they believe that he makes fun of them. Moreover, the very sheep in the fields fear the frequent warfare a nd r aiding p arties m ore t han t hey f ear wolves. Ovid closes the poem by upbraiding himself for his madness i n offending A ugustus a nd bringing this exile on himself.

The 1 1th ele gy of the fifth a nd final book of *Tristia* addresses O vid's w ife. S omeone had offended her by calling her a n "exile's wife." He advises her to en dure such slights courageously. He reminds the unkind name-caller that, technically, Ovid is not an exile. Although he is like a disabled sh ip, he i s n onetheless s till a float. H e closes by cautioning the offending person against lying by calling Ovid an exile.

The following p oem add resses a well-wisher who has offered Ovid the advice that he ought to

spend his time writing. Ovid points out that writing verse is a joyful occupation best accomplished by a p eaceful m ind. More over, t he p oet's ha rdships have sapped his strength. After detailing all the reasons that he ought not to try to write, Ovid at last confesses that his "Muse cannot be restrained from composing verses." Most of these, however, he consigns to the flames. Such verses are emblems of t he w ay i n w hich O vid's a rt ha s r uined h im and left his life a heap of ashes.

The 1 3th elegy, composed while O vid was ill, reproves a friend for n eglecting to write. The 1 4th an d l ast ele gy o ft he c ollection addresses his wife. Again the poet reminds her that his readers will forever remember her. She is a lso t he so le g uardian o f h is fortune. H e compares her to the faithful wives of mythology and epic—to P enelope, A lcestis, A ndromache, and Evadne. He observes that by reminding her to dow hat s he i s a lready do ing, he i s expressing his praise and approval.

Epistulae ex Ponto

Ovid spent the rest of his life in Tomis; he died there in 17 c.e. Before his death, he wrote a similar, four-book co llection o f ep istolary el egies, which were gathered in his *Epistulae ex Ponto*— Letters f rom P ontus, or L etters f rom t he Bl ack Sea. The to ne and t he subjects of t he ele gies i n this collection often recapitulate those described above. The principal difference between the t wo collections is t hat, i n the p oems fr om P ontus, Ovid n ames mo st of t he f riends to w hom he writes. Only one of the letters, book 3, elegy 1, is addressed to his wife, and the final letter, 4.16, is addressed to an unnamed enemy.

662 Trojan Women, The

Trojan Women, The Euripides (415 B.C.E.) Produced s hortly a fter t he A thenian attack on and c apture of t he i sland of M elos, Eu r ipides' verse p lay e xplores t he d ehumanizing e ffect of war on the conquerors and elucidates the misery to which war's a ftermath r egularly sub jects t he conquered. In real life, the inhabitants of Melos had merely wished to maintain their neutrality in Athenian d isagreements with o ther p olities. I n punishment, the A thenians s laughtered a ll t he men of the island and sold the women and children in to slavery. This o utrage se emingly sha ttered Eu ripides' e arlier f aith i n t he j ustice a nd fairness of Athens and its democratic institutions, and the playwright's disillusionment reflects itself in the play.

It would have been to o dangerous politically for E uripides to p resent t he M elosian si tuation directly, as the policy makers who per petrated the M elosian d ebacle r emained in p ower. The playwright therefore displaces his grief at the suffering of t he i slanders and h is d isillusionment with the democratic institutions of his native land by setting his play four centuries earlier and at a geo graph i al d istance. The a udience finds it self surveying the battlefield before the ruined walls of Troy. The flower of Trojan manhood a lready lies dead. The women of Troy who are destined to become the concubines of the Greek conquerors are housed in a series of shacks around the battlefield, a nd a n ol der w oman, t he T rojan que en Hecuba, lies sleeping on stage.

One of Troy's tutelary deities, the god of the sea and e arthquake, P oseidon, sp eaks first. H e reviews the cause of the desolation and identifies Hecuba and o thers, including her d aughter, the priestess Cassandra, among the women awaiting deportation to the beds of their conquerors. Poseidon also mourns some of the fallen Trojans and bids farewell to a city he has especially favored.

The goddess Pallas A thena enters and speaks next. Poseidon has credited her with the Trojan defeat, but she surprises him by announcing that she wishes "a bitter homecoming" for the Grecian fleet. Poseidon finds that, although Pallas Athena supported the Greeks, she ha s b een offended by the outrages offered her p riestess C assandra b y one of the Grecian warriors, and the divinities join forces to p unish the Greeks. Poseidon then pronounces judgment on those who initiate warfare: "How are ye blind, / Ye treaders down of cities, ye that cast / T emples to de solation, and lay waste / Tombs, the untrodden sanctuaries where lie / The ancient dead; yourselves so soon to die!" [Translation by Gilbert Murray.]

Hecuba aw akens a nd m ourns t he m ultiple losses she has sustained: children, city, husband, and king, and calls forth the other women to help her g rieve. They a ppear f rom the d oors of t he huts, bewail their circumstances, and utter their deepest fears about their futures. The arrival of a Greek her ald, Talthybius, i nterrupts t heir ke ening. He has come to announce which Greek has won e ach wom an for h is p rize. Q uestioned, he reports that King A gamemnon himself has chosen the priestess Cassandra.

When H ecuba as ks a bout an other d aughter, Polyxena, Talthybius temporizes, saying that she watches Achilles' tomb. He does not say that she has been murdered there. Hecuba continues asking about women of her family. Her daughter-inlaw A ndromache has fallen to the lot of Pyrrhus the son of Achilles. Hecuba herself is intended for Odysseus, the king of Ithaca.

Cassandra enters; out of her m ind with grief, she t akes jo y i n t he p rospect o f b ecoming Agamemnon's thrall as it will give her the chance to kill him, which she swears to do. She continues darkly to predict the future until the herald leads her away to Agamemnon, and Hecuba collapses.

A chor us of watchers comments on the action, and some of the women go to Hecuba's assistance. She, however, refuses it and distractedly continues to e xamine her f ate and remember her pa st. As she weeps for Troy's fate, a chariot comes. It is loaded with b ooty, and in it to o a re a w eeping woman and a child. The woman is Prince Hector's widow, Andromache, and the child, Astyanax, is Hecuba's g randson by t hat union. A ndromache and Hecuba share remembrances, their grief, and their fears of the future while the le ader of t he chorus i nterjects obs ervations on t he a ction of the play and on the history that led up to it.

The Gr eek her ald, T althybius, r eenters a nd with great difficulty and sorrow informs Andromache t hat O dysseus ha s p ersuaded t he Gr eek council that allowing Astyanax to live will be too dangerous b ecause, when he g rows u p, he ma y seek vengeance against the Greeks. The child is to be flung from a tower and his broken body allowed no burial. This last detail is particularly heartless. The Greeks traditionally thought that the soul of an unburied person would wander forever, unable to cross over the river Styx into the underworld. Moreover, such a sentence amounted to sacrilege since the dead were no longer the enemies of any living person and belonged to the gods. A soldier seizes the child to perform his commission, and Andromache is borne away on the chariot. The chorus sings a lengthy lament on the action. They conclude that the events they have witnessed have destroyed their love of the gods.

Now K ing Me nelaus enters and, after justifying the w ar on the g rounds that Pa ris s educed and abducted Helen, commands that his faithless wife be dragged before him. Hecuba warns him that he must kill Helen at once lest her wiles once more ensnare him. Hecuba even promises to bless Troy's destroyer if he will do the deed.

Helen asks leave to speak, and, after declaring his in tention to k ill H elen, Me nelaus yields t o Hecuba's r equest t hat He len b e a llowed to t alk. Helen reviews the story of the way in which three goddesses, Pa llas At hena, H era, and A phrodite, contended for first prize in the world's archetypal beauty co ntest. E ach g oddess s ought to r ig t he contest, offering respectively (in this version) military s uccess, ro yal po wer, and the love of t he world's most b eautiful woman—Helen herself to Pa ris, who was foolish en ough to a gree to b e judge. Compounding his folly, Paris chose beauty. Thus, Helen argues, she was not at fault when she deserted Menelaus for Pa ris. She w as merely the pawn of Aphrodite.

The chorus is both unmoved and unconvinced by Helen's disclaimer of responsibility for deserting Menelaus. So is Hecuba, who criticizes Helen's per for mance and calls on Menelaus to pronounce judgment and kill her. Menelaus resolves to do so, but He len emb races h is k nees a nd a sks h im to "remember all." Despite Hecuba's encouragement, Menelaus we akens and in structs t he s oldiers to take Helen to the ships.

The chorus now takes the part of citizens, and its ve rse s ongs c onvey t he f eelings o f c itizens about to be enslaved and transported across the sea to uncertain fates.

Talthybius a nd s oldiers en ter be aring the corpse of Astyanax, which the chorus recognizes and bemoans. Only one ship remains, Talthybius reports, to carry off his detachment, Hecuba, and the remaining women. He cannot, however, bring himself to observe the s acrilege of h is i nstructions by leaving A styanax unburied. I nstead he announces the respectful funeral arrangements that he has decided on, and he bl ames Helen for all the Trojan women's troubles. Hecuba pantomimes t he f uneral r ites o ver t he c hild's de ad body, and the chorus mourns the boy's death.

Hecuba b ehaves a s if she is in a trance and announces h er vi sion: She ha s, she s ays, s een God's open hand, and there is nothing in it. She pronounces a n ihilistic view of the purposes of the universe—a view that h as p erhaps b ecome Euripides' as well.

The Greek soldiers set fire to the ruins of Troy. Hecuba a ttempts to i mmolate her self, b ut t he Greeks restrain her. Then she a nd the chorus in turn lament the passing of Troy, and after a final farewell to her past, her fallen kin, and her c ity, she s ets her f ace to ward the f uture a nd the f ate that awaits her. A trumpet s ounds, a nd she a nd the o ther Trojan women m arch to t he w aiting Greek ship—just a s, p resumably, the women of Melos had been constrained to do.

Turnus (fl. first century B.C.E.) *Roman dramatist*

Only a single fragment of past or al poet ry and one fragment of a drama survive as evidence of Turnus's t alent. A llusions to h im by such other ancient writers as Martial and Juvenal su ggest, ho wever, t hat T urnus's c ontemporaries principally valued him as a satirical playwright one who perhaps dealt with themes of social justice and risked the wrath of the emperor Nero. Some evidence also survives to suggest that Turnus may have been a freed slave.

Tusculan Disputations Marcus Tullius

Cicero (45 B.C.E.)

Cast in the form of a dialogue between Cicer o and an unnamed respondent, the *Tusculan D isputations* are dedicated to Brutus and represented a s ha ving taken p lace a t C icero's v illa a t Tusculum. The work is composed of five books, each o f wh ich considers ha ppiness f rom t he point of view of Stoic philosophy (see St oicism) in the context of the following subjects: de ath, grief, sadness, spiritual disquiet, and whether or not v irtue c an a ssure happ iness. B ecause t hese questions i nterest Ci cero n ot only a s ac ademic considerations b ut a lso a s deeply felt personal issues, a r eader feels t he em otional u rgency of Cicero's pers onal i nvolvement a s h e w orks h is way through the principal ethical issues that had concerned the ancient world.

The method that Cicero develops for conducting his explorations is this: H e defers forming his o wn o pinion u ntil he a rticulates a ll t he points o f v iew t hat h e knows to have been offered. Having done so, he compares the several viewpoints in terms of their internal consistency and th eir p robability. H e s trives to g ive e ach view a fair representation and to avoid argumentative d iscourse a nd d irect c ontradiction. The result is almost always a courteous and reasonable exchange of viewpoints between Cicero and his companion.

Only when the discussion turns to the subject of Epicurus and Epicureanism does Cicero's discourse b ecome h eated. A s a st atesman, Cicero abhorred the positions taken by Epicurean apologists. He felt that following their lead made pe ople d isdain pa rticipation i n pu blic affairs—a view that was anathema to the publicspirited Cicero. Second, Epicureanism, though it a sserted the existence of deity, held that no immortal being living in a state of bliss would take any interest in the doings of its creatures. While C icero hi mself ma y not h ave a ctually believed i n t he p antheon of Rom an g ods, h e nonetheless thought that an approved state religion led to better behavior among the citizenry. Moreover, he did believe in Providence. Therefore, for him, a national religion was the foundation of ethics.

Cicero's p rose s tyle r epresented t he i deal toward wh ich w riters st rove a s la te a s the 20th century of the Common Era. Nowhere, perhaps, in the pages of his extensive work does that style achieve more poignant effect than in his heartfelt discussions in the *Tusculan Disputations*.

Tyrtaeus (fl. ca. 647 B.C.E.) Greek poet

Only the elegiac poet Callinus is known to have flourished b efore a nother a ncient Greek p ractitioner of that poetic form: the Athenian Tyrtaeus. Reported to have been a lames choolmaster at Athens, Tyrtaeus was held in low esteem by his fellow citizens, who thought him weak-minded and odd.

When an oracle revealed to the Spartans that, if they wished to succeed in their battles against the southwestern Peloponnesian city of Messene, they needed to find a n Athenian general, they sent to Athens in search of one. Wishing the Spartans ill success, the A thenians s ent them Tyrtaeus. C ontrary to A thenian e xpectations, t he y oung ma n proved to b e a n e xtraordinarily e ffective general. His w ar s ongs i n t he ele giac m eter, m oreover, heartened t he Spa rtan t roops a nd en couraged them to extraordinary acts of valor. After 20 years of previously fruitless warfare, the Spartans under Tyrtaeus's command took Messene, and they razed the c ity t o th e g round. Tyrtaeus's poetic r eputation rests on the fragmentary re mains of his hortatory v erse a nd o n ancient opinion of him. Pl ut a r ch, as the literary historian J. M. Edmonds tells us, called Tyrtaeus "a good poet for sharpening the courage of the young." (See el egy a nd el egiac poet ry.)

A c ollection o f H indu w isdom l iterature, t he Upanishads are thought by the devout to contain (in t he words of t heir translator, S. Radhakrishnan) " a c omplete c hart o f t he u nseen Re ality...[an] immediate, intimate... convincing light on the secret of human existence."

A composite word that literally means "to sit down near," the term *Upanishad* suggests a long, oral history in which the works' inherent wisdom was passed from teacher to student over the generations. A m ore metaphorical interpretation of the word suggests that Upanishad conveys "bhrama-knowledge by which ignorance is loosened or destroyed." Both philosophy and spiritual enlightenment are implicit in the term.

While the numbers of texts that have come to be included under the Upanishads umbrella have grown over the centuries to m ore than 200, the ancient l ist of texts connected w ith the e arliest Vedic s chools seems to n umber between 10 and 14. Valerius Flaccus, Gaius (d. ca. 90 c.E.) Roman poet

A Roman poet about whom little is known, Gaius Valerius Flaccus left eight books of an unfinished epic, his *Argonautica*. U sing a s h is p rincipal source t he *Argonaut ika* of A pollo nius o f Rhodes, V alerius Flaccus m odified so me i ncidents i n t he s tory, s ometimes u sing H omer o r Virgil as models for some of his changes. Others seem t o h ave been the work of his powers of invention.

Valerius displays a deeper concern and a greater psychological s ympathy for t he c haracter of Medea than do his models (see *Medea*). The poet understands Medea as a woman torn between her loyalties to her pa rental family and to t he lover for whom she feels a passion so intense that she is willing t o m urder a b rother a nd b etray her father.

Valerius a lso t akes a le ss sympathetic view of Jason than does Apollonius. In Valerius's version, Jason e merges a s i mmature, weak, a nd vacillating. Beyond that, Valerius feels the relevance of the v oyage of the Argonauts—which was t he archetypal Greek voyage of discovery—to a pattern of Greco-Roman a scendancy a nd to t he eventual establishment of the Roman imperium. The s ole re presentative of V alerius's t alent s uggests that he was a very able poet indeed and that his talent was more than adequate to renovate an old story by making it entirely relevant to his own times and their temper. Quint il ian considered Valerius's death to have been "a great loss."

The p oem d isappeared i n a ncient t imes a nd had been completely forgotten until, in the 15th century, a manuscript of the first four books was discovered.

Valerius Maximus (fl. first century c.E.)

Roman prose writer

A Roman of the patrician class, Valerius Maximus collected a miscellany that he entitled *Factorum a c d ictorumque me morabilium lib ri i x a d Tib. C aes. Au gustum* (Memorable ac tions a nd

668 Vālmīki

sayings in nine books dedicated to the Emperor Tiberius C aesar). Valerius o rganizes t he n ine books by the sort of material to be ha ndled i n each. The first book deals with religion, and each chapter ha ndles a sub topic u nder t hat he ading. Beyond t hat, V alerius d eals with l argely Gr eek foreign e xamples (which he c alls *external*) and with Roman examples (which he c alls *internal*). The topics so treated under religion include such matters as "religion feigned" and "augury."

The s econd b ook handles a ncient institutions in a similar manner, examining such subjects as "Military D iscipline." B ook 3 c onsiders the wellsprings of human valor. "Moderation" is the topic of the fourth book and "Humanity and Mercy" of the fifth. Book 6 treats the virtue of chastity, giving examples such as that of a Greek woman called Hippo w ho, when c aptured b y en emy s ailors, drowned herself rather than submit to their lust.

In Bo ok 7, Valeriust urnsh is a ttention to "Good Fortune." Among the attributes of the fortunate, he lists wisdom displayed in speech and in action. He then, however, wanders about a mong subtopics whose relation to the overarching consideration a re n ot a ltogether clear, a s when, for instance, he considers the operation of necessity in human affairs and the difficulties that coping with necessity sometimes imposes.

The eig hth b ook c onsiders t he r easons t hat defendants w ith bad r eputations were ei ther acquitted or condemned for crimes of which they were a ccused. The final b ook e xamines v iciousness of various kinds: "luxury and lust," "cruelty," "anger a nd h atred," and th e l ike. The t itles o f chapters were p robably the later i nnovations o f copyists, so it may well be t hat when some subtopic strikes a reader as peculiar given the chapter title, the copyist guessed wrong about the organizing concept that Valerius had intended.

In bringing t ogether s uch a v olume as t his, Valerius intended to collect in one place examples that people might find useful for purposes such as speaking and writing. His object was to s ave his readers—including, as he hoped, the emperor time that would otherwise be devoted to individual research. Though s ome h ave fo und h is s tyle a rtificial and overblown, h is attributions faulty, and some of his personal asides silly, critics generally praise the c ontent o f V alerius's w ork. The a ncients apparently d id find h is c ompendium helpful, a s indicated b oth by its survival and by later summaries that scholars made of the work.

Varro, Marcus Terentius (116–27 B.C.E.)

Roman prose writer

Ancient Rome's most important and most productive scholar, Varro is credited with a life work of some 75 different compositions written in over 600 papyrus s crolls. B orn in t he to wn of Re ate (now Rieti) to the north of Rome, as a child Varro moved to Rome, where he studied philosophy, letters, and antiquities. L ike many of h is g ifted co ntemporaries, Varro undertook a career of public service, rising eventually to the post of praetor—the leading official of the city after the two he ads of state during t he re public, t he c onsuls. I n addition to serving as head of state in the absence of the consuls, the praetor chaired the senate and was empowered to lead an army if the occasion arose.

Varro's c areer c oincided with the tumultuous period that preceded Rome's civil wars, the end of republican Rome, a nd t he e stablishment of t he Roman E mpire. I n t he s truggles t hat ac companied that changeover, Varro aligned himself with Pompey t he Great—the odds- on-favorite to become the head of an imperial Roman state. In the e vent, h owever, J uliu s Ca esar overcame Pompey, and after C aesar's a ssassination, M ark Antony banned Varro from holding public office and had Varro's library at his estate in Casinum plundered. This was not only Varro's loss but also that of the literary persons to whom Varro had granted free access to his collection.

Varroh imself, h owever, e scaped Antony's agents and devoted the rest of a long life to study and wr iting. The r ange o f h is i nterests w as astounding. He wrote about language, producing a w ork, *De lingua L atina*, o n L atin v ocabulary and syntax in 25 books (papyrus scrolls). Of these, the fifth and sixth books survive in their entirety, as do portions of the seventh through the 10th. He a lso w rote a n amusing little tr eatise a bout agriculture and animal husbandry, *De re rustica*, which survives in its entirety.

Everything else Varro wrote, except the titles and some representative surviving fragments, has apparently b een irretrievably l ost t o u s. F rom those remains, however, we c an gain an idea of the subjects that Varro a ddressed. These include education, a topic add ressed in h is *Disciplinae*, where he outlined the subjects to be mastered by an educated individual. These were the subjects included in the traditional liberal arts education.

Varro a lso c ompiled a collection of some 700 biographical s ketches o f fa mous G reeks an d Romans, appending a r elevant e pigr a m to e ach portrait. Beyond t hat, he composed a collection of dialogues that he titled by associating the name of a notable person with the subject under consideration. He prepared a series of 150 amusing verse and p rose e ssays, en titled *Menippean Satires*, exploring human foolishness and vice. The work derived its title from the fact that in it Varro imitated the pithy style of a Greek model, Menippus of Gadara (fl. third century b.c.e.). (See Sat ir e in Gr eece a nd Rome.)

In 41 books, Varro also explored topics associated with ancient Rome. He discussed the peoples of early Italy as well as the places, the tenor of the times, and the things that were to be found there. Varro dedicated the 16 final books in that collection t o J ulius C aesar in h is r ole as t he *pontifex maximus*—the le ading member of the college of priests responsible for controlling the Roman state cult. In these works that dealt with religious matters, V arro e xplored t he way t hat h uman b eings make divinities in their own images. He discussed priests and their organizations, sacred places, the natures of the gods, rituals, and sacred occasions.

Varro a lso w rote on m ythology, the cults of the gods, the founding of the city of Rome, and the h istory of p hilosophy. A t le ast s ome of h is writings were well known to St. August ine, who borrowed from Varro in \overline{A} e City of God.

Though b oth *On A griculture* and the e xtant portions of *On the Latin Language* have been several times translated into En dish, the fragmentary r emains of Varro's o ther w orks a re a s y et available on ly in the or iginal Latin and in G erman and Italian translations.

victory odes (fifth and sixth centuries B.C.E.) Tele vision has s chooled t hose of u s w ho follow athletic events to expect them to be accompanied by the commentary and an alysis of former athletes who endlessly repeat pretty much the same things. Similarly, for a span of time that was only slightly longer than the 80 years of the Greek poet Pindar's probable lifetime, the victors in the athletic events of the ancient Greek world were celebrated by p oems i n their h onor. Three a ncient Greek poets are remembered for writing victory ode s that, accompanied by musical instruments, were s ung (and pro bably d anced) i n pr aise of winning a thletes or of t he owners of w inning horses. Only the lyrics have survived the ages.

Two of t hese poets were Simonides of Ce os (ca. 556–468 b.c.e.) and Simonides' nephew, Bacchylides of Ceos (ca. 505–ca. 450 b.c.e.). Slightly

670 victory odes

senior t o Ba cchylides was Pi ndar, un iversally regarded as the greatest lyric poet of the ancient Greek world. A fter the work of the three poets named, the genre they all successfully practiced, as it related to athletics, disappeared from the literary scene.

To u nderstand t he e mergence of t he v ictory ode, one must have a sense of the importance of athletic events in the ancient Greek world, of the way such events were or ganized, and of the utility and function of the poems themselves.

The first O lympic ga mes i n a ncient Gr eece occurred in 776 b.c.e. The Greeks so venerated that beginning that they dated the beginning of Greek history from those games. The games at Olympus honored Zeus and gave the competitors the opportunity to demonstrate for the immortal the excellence t hat m ortals c ould a spire to a nd ac hieve through innate strength and courage, training, and hard work. As time went on, as the literary historian William H. Race explains, other communities or ga nized games. The major ones were the Pythian games at Delphi in honor of the sun god Apollo; the Isthmian games at Corinth in honor of the god of sea and earthquake, Poseidon; and the Nemean games, held s ometimes u nder t he sponsorship of the city of Kleonai and sometimes of Argos, also in honor of Zeus. These were the major contests. Dozens of local ones also sprang up.

The ga mes were o rganized s ot hat t hey occurred serially and did not compete for audiences. This meant that athletes successful in one location could also compete in others, and some famous a thletes swept t heir e vents in all of t he games. In fact, some athletes extended their winning streaks to as many as 25 contests. The events included b oxing and wr estling, b oth s eparately and in combination; a pentathlon that included throwing both the discus and the javelin, w restling, the long jump, and a 200-meter dash; a 400-meter r ace w ith the p articipants wearing full armor; and a 4,800-meter run. These were called the gymnastic events.

Additionally, e questrian e vents were st aged. These varied from time to time, but while Pindar was active, they included as the main event a fourhorse c hariot r ace, a n ordinary horse r ace, a nd sometimes a mule-cart race. The chariot race was viewed as the most important of all the events. When the major games were in progress, if there happened to be a war going on among the Greek city-states, a nyone e n route to t he ga mes w as granted safe passage.

Like our contemporary horse racing, chariot racing was an expensive enterprise. The owners of t he horses a nd c hariots m ade a significant investment in an imals, t heir transportation t o the s ites of t he r aces, c hariots, t raining, a nd usually in hiring the charioteers. Rarely did the owner himself drive. Regardless of who did the driving, the owner was nonetheless regarded as having won.

When a n a thlete or a w inning horse's owner achieved the distinction of a v ictory, the athlete's sponsors or the owner would hire a poet to c ompose a celebratory p oem. P indar w as c learly the poet of choice, and as a result some 43 of his poems have survived.

Pindar e njoyed t he p atronage o f s everal important persons. Particularly notable among them w as H ieron, t he r uler (tyrant) o f t he important city of Syracuse in Sicily-a Greek island a t t hat t ime. O ther p owerful Sic ilian patrons included the ruler of Agrakas (today's Agrigento); Theron, h is b rother, Xen ocrates; and his nephew, Thrasyboulos. Arkesila of Cyrene in Libya also commissioned poems from Pindar, as did others. Although Pindar is known to have traveled widely, it is not clear that he was necessarily present at the events his poems commemorate. H is ve rses d id n ot i nvolve de scriptions of t he e vents t hemselves. R ather, t hey tended to d raw u niversal w isdom f rom si tuations somehow thematically connected with the contest or the patron.

Virgil (Vergil, Publius Vergilius Maro) (70–19 B.C.E.) *Roman poet*

Born in the village of Andes near Mantua in what was t hen C isalpine G aul, Vi rgil i s t hought to have had a working-class father, perhaps a farmer or a potter, and a p riestess or sorceress (*magia*) mother n amed P olla. H e re ceived a n e xtensive formal education, first at Cremona, then at Milan (Roman Mediolanum), and finally in Rome itself, where a mong other subjects he s tudied philosophy and rhetoric. One of his teachers is known to have been the Epicurean philosopher, Siron. That Virgil was able to afford this extensive education suggests that his family had independent means.

Following h is e ducation, Vi rgil r eturned to Mantua in 43 b.c.e. to begin writing his Ecl ogues (published 37 b.c.e.). In the unsettled years following the slaying of Julius Caesar, party faction, civil strife, and punitive actions became the Roman norm for a time. It appears that Virgil lost possession of his ancestral lands through confiscation in 41 b.c.e., had them restored, and then once again was forced to flee from them. His te acher Si ron sheltered Virgil for a period, but Virgil's influential friend an d p atron, G aius Mae cenas, i ntroduced him to the first Roman emperor, August us Caesar. From that time forward, Virgil enjoyed imperial patronage. As a result, in addition to dwelling for a time in Rome, he ac quired estates in Naples and at Nola in Campania, as well as a considerable in de pendent fortune.

Virgil's second major publication, *Georgics*, appeared in 30 b.c. e., and thereafter he devoted his e nergies t o the c omposition of his g reat national Roman e pic, the *Aeneid*. A round 20 b.c.e., Virgil traveled to Greece and elsewhere to

view some of the scenes he was describing in the *Aeneid*. He fell ill on that journey, however, and passed a way on t he trip h ome b efore finishing the *Aeneid* to h is o wn s atisfaction. Though he had g iven i nstructions to ha ve t he ma nuscript destroyed, n o o ne ob eyed t hem. O ther, sho rter poems are also attributed to Virgil, though often controversially so.

Other h ands may have lightly corrected t he Aeneid before its publication, though it seems that no substantive alterations in its fabric have been made. Once it appeared, Virgil's masterpiece occupied a n u nchallenged p lace a s the national epic of Rome, and its author became the poet-seer of the golden-age Roman Empire. The Aeneid conducts an intertextual conversation with the epics of Homer from which it drew its founding mythos, some of its material, and its clear inspiration. After its app earance, i t j oined a nd o ften su perseded Homer's e pics a s t he re pository o f i ncident a nd meaning up on w hich s ubsequent w orks i n t he Western literary tradition would draw to ach ieve both d epth a nd a llusiveness. Da nte's Commedia provides the most notable example.

Wang Chong (Ch'Ung) (27–97 с.е.) Chinese prose writer

A scholar of the later Han dynasty (see a nci ent Chinese dynast ies a nd per iods), Wang Chong set out to debunk the wildly superstitious nonsense that over time had spread from pop uar culture into the teachings of ill-educated Confucian preachers and teachers. He even leveled h is critique at those portions of the standard Confucian canon that he found offensive to reason and common s ense. He c onducted h is e xamination i n a series of stylistically elegant, lively, conversational essays entitled *Lun Heng* (*Critical Essays*, or *Balanced Discussions*), deployed in 85 sections. In its pages, he scathingly exposes the silliness of many of the supernatural fictions that had crept into the Confucian fold.

Wang w rote other works of a si milar nature, but all have been lost. Victor Mair, the historian of C hinese l iterature, tel ls u s t hat a nother o f Wang's t itles w as *Satires a gainst Cu stoms an d Usages*. There, ac cording to su rviving commentary on the work, Wang proposed abandoning the artifices of the stylized Chinese literary language in favor of straightforward contemporary vernacular e xposition in w riting. M air o bserves t hat such an outcome would have been "salutary [and] liberating" for Chinese thinking and letters. Vested interests, however, made su ch a r evolution in literature impossible.

Wang's r ationalist s tance also did not sit well with his superstitious contemporaries. Until the 19th century, few read him. Then his advocacy of using vernacular language in writing earned him a wider readership. Not until the 20th century did the revolutionary gove rnment of C hina re suscitate Wang's reputation as a phi los opher, celebrating him as an early rational materialist.

Wasps, The Aristophanes (422 B.C.E.)

Ari st ophane s p roduced hi s polti al comedy, $\overline{A} \ e \ Wasps$, at the Athenian festival of Lenaea, where it won the first prize. The play succeeds as an a dmirable pie ce of stagecraft even t hough Aristophanes had probably not yet attained to his fullest powers as a comic playwright.

The pl ay's p rincipal c haracter, t he el derly Philocleon, finds himself utterly addicted to serving in the capacity of juror at lawsuits. So problematic has t his obs ession b ecome t hat t he ol d man's son, B delycleon, has had t he entire house surrounded with a g igantic n et a nd p osted t wo slaves, Xanthias and Sosias, as guards to keep his father away from the court. As the play opens, the drowsy guards ar e trying to keep one a nother awake by r ecounting t heir d reams and attempting t o in terpret t hem. Xanthias in terrupts hi s conversation with Sosias to address the audience directly. He explains t hat, u nlike A ristophanes' \overline{A} e Acharnians and \overline{A} e Knights, this play will contain little by way of attack on the Athenian demagogue, Cleon. Instead he explains Philocleon's mania for jury duty and his invariable judgment of guilty. This a ssertion, h owever, m erely alerts the audience to look for unflattering references to the hated Cleon. The play is full of them, in fact. The na mes of t he p rincipal c haracters, Philocleon and Bdelycleon, for example, c an b e respectively translated as "one who loves Cleon" and "one who loathes Cleon."

Bdelycleon a wakens on the roof and c alls to the men below that he hears his father in the stove chamber. A moment later, the old man pokes his head out of the c himney and s ays he i s just the smoke. Thwarted, the old man explains that a n oracle warned that if he ever voted for an acquittal, h e w ould d ie o f c onsumption. F inding n o sympathy for that story, he says he will gnaw his way through the net. His guardians remind him that he has no teeth. He then says that he wishes to sell his jackass, but his son replies he w ill sell the beast on his father's behalf. Philocleon agrees, and when the a nimal is led out, the old man is found clinging to its belly like Odysseus escaping from the Cyclops's cave.

Discovered, t he o ld ma n c alls f or a ssistance from h is fellow jurors. N o s ooner has he b een locked in than he reappears among the roof tiles, trying to escape that way. As soon as the slaves have secured him again, the members of the chorus appear costumed as wasps and representing the other oldsters who comprise the jury. They sing their concern that their fellow juror, Philocleon, has not appeared to join them.

Singing as well, the old man appears at a window b ehind t he n et a nd e xplains h is p roblem. Encouraged by his fellow wasps, he de cides that gnawing through the net is best, and he attacks it with h is toothless g ums. Suc ceeding i n g etting through, h e s lides d own a rope to his waiting compatriots, b ut h is n oise a wakens B delycleon. He calls the slaves to help restrain his father, but the old jurymen who await him shed their cloaks, and all discover them e quipped with the stings of wasps. A ro using battle en sues i n w hich t he strength o f the y ounger c ontestants e ventually prevails, and the waspish old men are exhausted.

Now B delycleon u ndertakes t o co nvince hi s father that, far from fulfilling an important office, he is actually the slave of ruthless masters. Philocleon a nd B delycleon a gree to a rgue t he c ase before h is co lleagues, th e w asps, a nd a bide b y their judgment.

Philocleon argues that a juryman is more powerful t han a k ing. H e de scribes t he w ays t hat accused persons attempt to i nfluence him before a trial. He speaks of the disregard of the jurors for the wills of de ceased p ersons a nd t he a uthority they e xercise o ver t he g oods a nd c hildren o f deceased p ersons. H e t hen sp eaks o f the h igh regard in which the demagogue, Cleon, holds this par tc uhr group of jurors.

Bdelycleon encourages his father to keep talking, with an unsavory comparison b etween the power h et hinks he is e xercising and an anus. When Philocleon has exhausted his arguments which have earned the admiring approval of the jury of wasps—Bdelycleon re sponds. First he makes the jurors understand what a small p ercentage of state revenue their payment represents. They are surprised and want to k now where the rest goes. He tells them how their theoretical subordinates, w ho a re r eally their ma sters, en rich themselves a t s tate e xpense, w hile t he j urors receive a pittance for their services. His examples

674 Wasps, The

convince h is fa ther of t he venality of A thenian statesmen.

The o ther j urors a lso find t hemselves convinced, and they beg Philocleon to f orego judging. F or the old man, ho wever, w orking at the court has become a drug. He is hooked and cannot face the consequences of withdrawal.

Sympathetic to his father's addiction, Bdelycleon proposes a solution. Philocleon can do his judging at h ome, r uling o n a ll matters to uching t he household and fining offenders in keeping with the nature of their crimes and with their means to pay. Philocleon likes the idea, but he wonders who will pay him. B delycleon a ssures h im that he w ill pay and goes to arrange the home court. He provides a chamber pot, a fire with a crock of lentils to snack from, a rooster whose crowing will keep the judge from dozing, and a picture of the hero Lycus, a former king of Thebes.

They are about to look for a case to judge when Philocleon r ealizes that there is n o b ar f or a n accused to plead before. He rushes off in search of something that will s erve. I n h is a bsence, th e slave X anthias enters and explains that the dog, Labes, has snatched and eaten a Sicilian cheese in the k itchen. B delycleon d ecides t hat t his w ill make an admirable first case for his father. After more s ending a fter forgotten pa raphernalia, the case b egins with solemn l ibations a nd p rayers. When all is in readiness, two actors costumed as dogs a re led o nstage. On e, the ac cuser, w ears a mask that looks like the Sophist L aches, and the other, the defendant, wears a likeness of the demagogue Cleon.

Having heard the case against Labes, Philocleon instantly wishes to rush to a harsh judgment. Bdelycleon, however, insists that h is father hear the other side, and since the dog c annot speak, Bdelycleon speaks for him. He praises h is qualities as a sheep dog and a guard dog, but says that he is ignorant. A group of children costumed as puppies no w en ter a nd pa w a t P hilocleon f or mercy. The judge weeps, b ut n onetheless de termines to condemn the dog.

The tears in his eyes, however, blind Philocleon so that Bdelycleon must lead him to the jar into

which the old man must drop the pebble of judgment. This, of course, is the jar of ac quittal. The old man is certain that he will die of consumption; his last reason for insisting on being a judge dies within him, and the principal ac tors le ave the stage.

The chorus now berates the audience for their prior m istreatment of the p oet and explains to them the utility of p oets in helping them think through political problems. They also praise the older generation of war heroes—a generation they themselves represent—the men who saved Greece from the threat posed by Persian invasion. They have, they say, come by their stings honestly while fighting in d efense of their h omelands. They admit, however, that some among them are drones, and t hat s uch citizens—doubtless in cluding Cleon—are parasites on the body of the state.

In the ensuing scene, the principals return. Bdelycleon is trying to get his father to dress and talk like a member of the leisured upper classes of Athenian society. He reproves his bawdy humor and his juridical shoptalk in favor of urbane banter. A ristophanes, ho wever, c annot lo ng s tray from his enmity for Cleon, which resurfaces here as Bdelycleon tries to prepare his father for life in society. They go to the party.

Xanthius the slave returns and reports what happened. Philocleon got roaring drunk, insulted everyone, and made off with a totally nude flute girl whom, when we next see him, he is escorting to h is ho me f or n efarious p urposes. B delycleon rescues her, and a parade of persons with complaints a gainst Philocleon b egins to o ccupy t he stage. In his drunken state, he has ruined merchandise and started fights. Those he injured are pursuing him with summonses. Ironically, Bdelycleon has a chieved the objective he s ought. H is father is no longer obsessed with pleadings at law. Moreover, t he o ld ma n has c onceived a pa ssion for dancing, after a manner that wildly parodies the dances often performed in Euripides' tragedies. A trio of dancers attired as crabs joins the old man on stage, and the four dance frenziedly together as the chorus sings an accompaniment and ends the play.

Woman from Samos, The (The Marriage

Contract) Menander (ca. 320 B.C.E.) Restored from a variety of fragmentary sources to a reasonably complete condition, this play, under the title \overline{A} e Girl from Samos, appears as the sole representative of Mena nder's work in the literary historian Harold Bloom's selection of works in the Western c anon o fl iterature. S ince t hat ch oice, however, a c omplete d rama of Menander's, *Dyskol os* (\overline{A} e Bad Tempered Man), has been discovered and probably should be added to Bloom's list as a second representative of Menander's work.

Though Menander peopled his stage with stock characters, a n umber of h is d ramatis pers onae seem to have been drawn from life. This, as the literary historian W. Geoffrey A rnott tells us, is surely the case with some of the characters in \overline{A} e *Woman from Samos.* The title character, Chrysis, has c ome to A thens f rom S amos a s a r efugee, worked as a hetaera (a courtesan), and eventually cohabited w ith a n el derly A thenian na med Demeas—also one of the play's characters. Without b elaboring t he po int, t he l ikelihood e xists that details of the plot of this play are drawn from events that actually occurred in the Athens of the fourth century b.c.e.

Set in a n A thenian street n ear the houses of the wealthy Demeas and the impoverished Nikeratos, the play opens with Moschion, the adopted son of Demeas, addressing the audience and giving the play's background. He tells how Demeas adopted h im a nd brought h im u p a ffectionately and carefully, providing him with many luxuries. Then Demeas fell in love with the Samian courtesan and took her to live with him. At this point, a number of lines are lost or imperfect.

When intelligible discourse resumes, Moschion confesses that he got drunk and raped Nikeratos's d aughter, P langon. M oreover, a ba by had been bo rn f rom t he union, and M oschion h as brought the child into Demeas's house for Chrysis to help n urse. Both D emeas and Nikeratos have been away on a journey together for some months and ar e u naware of t he e vents t hat ha ve t ranspired. Moschion hopes to conceal his paternity of the b aby fr om b oth m en, and C hrysis su ggests that th ey p retend th e c hild i s h ers. She t hinks Demeas's lo ve f or her w ill d isarm h is a nger. I n their a bsence, h owever, Demeas a nd N ikeratos have decided that their children should be joined in marriage.

The second act probably began with Demeas expressing h is d isplea sure over finding C hrysis nursing a ba by. M oschion en ters a nd finds his father angry and threatening to send Chrysis and the baby—which at this point he thinks is his away. Mo schion a rgues against t his, a nd a fter more lost lines, he seems to have prevailed. When the action resumes, Demeas suggests that his son marry Plangon and is surprised when h is adoptive son eagerly agrees.

Demeas then convinces Nikeratos, against the latter's better judgment, that the wedding should take place at once—that very day. D emeas s ends his s ervant Pa rmenon to i nvite t he w edding guests and go off to the market for the necessary goods.

Act 3 opens with Demeas's accidental discovery that the baby's father is Moschion, but of c ourse Demeas thinks the mother to be Chrysis. Deciding that Parmenon will know the truth, Demeas crossexamines h im. P armenon li es. D emeas s ays he knows that the baby is Moschion's and threatens to beat Parmenon.

Now D emeas c onsiders h is si tuation. H e decides that Moschion is not at fault since he has so willingly consented to marry Plangon. Demeas concludes that the fault lies with Chrysis, and he resolves to send her away. He immediately acts on his d ecision and l ocks her o ut. A t t his p oint Nikeratos a rrives, and he and Chrysis c onclude that D emeas's u npredictable b ehavior s uggests that h e h as g one mad. N ikeratos t akes C hrysis and the baby into his house, hoping that Demeas's illness will soon pass.

676 Women at the Thesmophoria

Act 4 opens with Nikeratos telling his wife that Demeas's c allous b ehavior i s a n i ll o men f or a wedding day. Moschion arrives. Impatient for the wedding, h e h as b een t rying t o w hile a way th e hours until the appointed time. Nikeratos reports the problem. Demeas enters, and Moschion tries to ple ad on Chrysis's behalf. Moschion's defense of C hrysis c onvinces D emeas t hat h is son has taken his mistress's part against him.

Eventually Moschion confesses to his father what has really happened, and Demeas is pacified. N ikeratos, h owever, stumbles i n on h is daughter, P langon, w hen she i s n ursing t he baby; he realizes what has really happened and becomes furious. After further complications including Moschion's temporary decision to run away and become a soldier—and after additional misunderstandings a nd m ore r econciliations, everything gets sorted out. The wedding t akes place, e veryone b ecomes f riends a gain, a nd Demeas speaks the epilogue.

The pl ay i s l ively a nd f ull o f f un a nd g ood humor. It also illustrates a penchant of Athenian playwrights o f t he N ew C omedy f or s atirizing some of their fellow citizens on the stage.

Women at the Thesmophoria (The

Parliament of Women, The Assembly Women) Aristophanes (ca. 411 B.C.E.) Probably performed at the Great D ionysia in the same year as Lysist rata's debut at the Athenian Festival of Lena ea, Women at the Ā esmophoria subordinates to professional and s exual satire the politics that so often attracted Ar istophanes' d ramatic at tention. The t reatment of wives an dw omen i n Eu ripides' t ragedies becomes t he particular object of A ristophanes' scorn in this play.

The Thesmophoria w as a f estival t hat o nly women could attend. As the play opens, a character r epresenting Eu ripides is le ading a r eluctant kinsman to the home of the tragic poet and effeminate homosexual Agathon. Euripides has learned that at their festival—one that A ristophanes has here turned into a mock governmental assembly the women intend to sentence Euripides to death for h is u nflattering p ortrayal of wome n in hi s tragedies. E uripides hop es to en list A gathon a s his ally. He plans to persuade Agathon to dress as a w oman a nd sp eak i n Eu ripides' f avor a t t he assembly.

The t wo k insmen find A gathon i n feminine attire. The p oet e xplains t hat d ressing t he pa rt assists hi m i n h is a rt. Eu ripides e xplains h is errand, b ut A gathon r efuses h is r equest. The women, he suggests, will find him more attractive than they are and will turn on him.

Euripides is forced to t urn to h is kinsman for aid an d, wi th A gathon's hel p, sha ves h im a nd dress him as a w oman. So attired, The Kinsman makes h is w ay to t he f estival w here t he c hair, Critylla, calls the assembly to order and leads the prayers to the various patron deities. The last such prayer invokes punishments on Euripides and on others who expose women's misbehavior.

A speaker named Mica succeeds Critylla. It is she who brings charges against Euripides, accusing him of having acquainted husbands with the devices that wives formerly could use to de ceive the men. She proposes that the women plot the playwright's destruction. Her views are seconded by a garland seller who complains that Euripides is sowing disbelief in religion with the result that her sales of votive flowers have fallen off.

Euripides' k insman is the third to sp eak. He defends Euripides by suggesting that he has only revealed a few of the tricks women use to deceive their husbands, and that the women have thousands more. The examples that he gives so incense his listeners that the women threaten h im, a nd Critylla restrains them with some difficulty. Just t hen, a n e ffeminate ma le, Cleisthenes, enters with the intelligence that Euripides' kinsman has infiltrated the meeting. The kinsman is shortly identified as the spy, and a brief physical confirms his ma sculinity. C oncerned t hat t here might be other infiltrators, the women begin a search. Se izing his m oment, t he k insman g rabs Mica's baby from her arms and races to seek sanctuary at an altar.

The w omen de cide to ga ther firewood a nd burn the k insman. He u nwraps the child i n h is arms and discovers that he holds not a baby but a skin f ull o f wine. A s th e k insman s eeks o ther strategies to extract himself from his difficulties, the c hor us e numerates a s eries o f co mplaints against husbands.

Euripides' kinsman has an idea and begins to parody his cousin's tragicomedy, *Helen*. In that play, Menelaus, shipwrecked in Egypt, discovers that the real and virtuous Helen has been there all along, and that the woman over whom he fought the Trojan War was an evil phantom. Menelaus conspires to rescue his wife.

In Women at the \overline{A} esmophoria, as the kinsman plays virtuous Helen, Euripides enters in the guise of Menelaus. Still parodying the play, Euripides at tempts to lead h is k insman/Helen a way from the a ltar a nd o ut of ha rm's w ay. Cr itylla, however, stops them and points out that a ma rshal a nd a n a rcher a re o n t heir w ay. Eu ripides decides to b eat a ha sty retreat, while promising not to desert the kinsman. The marshal announces that the kinsman has been condemned to d ie in the feminine apparel he w ore to the festival. The archer drags the kinsman away to chain him to a plank.

Returned to the stage so chained, the kinsman spots Eu ripides in t he d istance, t his t ime c ostumed as Perseus from Euripides' play Andromeda. Assuming that Euripides has a pl an for h is rescue, the kinsman takes the role of the chained Andromeda and begins reciting lines s atirizing that p lay. A nother c haracter, E cho, c omes a nd repeats the final words of e ach of A ndromeda's speeches. The e xchanges b ecome i ncreasingly insulting and funny, and Echo takes up the same routine w ith t he a rcher, w ho g rows m ore a nd more incensed.

Euripides arrives through the air via the stage crane, just a s P erseus arrived in the b orrowed winged sandals of Hermes in the source myth for Andromeda. When, however, Euripides attempts to unchain his kinsman, the archer threatens to behead t he playwright. Eu ripides m ust i nvent another stratagem and exits to do so. After a choral interlude, he reenters dressed as a female procurer with a girl dancer, a boy piper, and a travel bag. In his own person, he offers to effect a peace treaty with the women of A thens. If t hey will release his kinsman, he promises never to i nsult them again. If they do not, however, he promises to tell their husbands, who are away fighting the Peloponnesian War, what the women have been up to in the men's absence.

The w omen a gree. Eu ripides s ees t hat t he archer b ecomes o ccupied w ith t he d ancing g irl and s pirits h is k insman a way. W hen t he a rcher returns, he finds h is prisoner gone and his bow stolen. The chorus misdirects his pursuit, and the play ends with a choral blessing.

Works and Days Hesiod (ca. 710 B.C.E.)

A poem of 828 Greek dactylic he xameter verses (see q uant it at ive verse), He siod's Works and Days, though it contains a good deal of mythological material, differs from the epic poetic tradition in which Homer composed. Hesiod's is the earliest Greek poetry to concern itself with agriculture and with the situation of the ordinary citizen to a degree victimized by the jud ges and leaders of his community. The poem opens a window through which one c an view the life of a Greek farming village in the eighth century b.c.e.

678 Works and Days

Thus, Hesiod's work can be studied profitably by those principally interested in literature, sociology, or history. It c an a lso shed light on a ncient autobiography to a de gree si nce H esiod often alludes to his own circumstances.

After o pening with a b rief a nd c onventional invocation to the Muses, Hesiod declares that he wants to present the facts of a certain situation to his brother, Perses. Two sorts of strife exist, the poet says. One is the evil kind that leads to w ar and ill matured disagreement. The other is a good kind: It is the sort of disagreement whose careful discussion by the di sagreeing p arties le ads to a settlement that may n ot en tirely ple ase a nyone, but with which everyone can live. It appears that Perses and Hesiod disagreed over the disposition of their father's holdings and that perhaps Perses bribed or otherwise influenced the civic fathers to find in his favor.

Hesiod n ext looks b ack on the way in which troubles came into the world. He recites the myth of Pandora, who, in the version told here, opened a jar and released upon the world the troubles the jar contained. B efore that time, and before Zeus and Hesiod's contemporary Greek pantheon, the god Cronus created from gold people who populated a golden age. They lived in peace and plenty and di ed e asy d eaths. N ext, h owever, the gods created human beings from silver, and they introduced violence into the world. Eventually they all passed o n. A r ace made o f b ronze suc ceeded them. These people developed violence into warfare and wiped each other out.

Until t his p oint, H esiod bo rrows f rom st andard m ythology. Ne xt, ho wever, he i nvents a fourth group. Zeus brings forth the race of heroes who po pulate G reek m yth and legend—heroes such a s H eracles, Aga memnon, A chilles, a nd Odysseus. These too pass away.

Hesiod and his contemporaries, however, have the misfortune, a s do w e, to b elong to t he i ron age. They are dishonest; they do not honor their aged p arents; t hey l ie, a re foul- mouthed, and rejoice in evil. These people are doomed never to cease f rom labor, never to enjoy good u nmixed with e vil, an d e ventually to b e de stroyed wh en they begin to be born already gray-headed. Hesiod regrets that he is one of them.

Again ad dressing his brother P erses, H esiod advises h im to s eek g ood j udgments i nstead o f crooked ones, and he tells a fable illustrating the latter. H e t hen advises those who sit i n c ouncil and pass judgment in disagreements to find wise solutions and to a void being influenced by bribery a nd t he like. Turning o nce m ore to P erses, Hesiod l oads h im w ith m uch b rotherly adv ice: Work h ard. O rganize c arefully. B e trustworthy. Seek solutions to problems that all can assent to. Treat y our g uests well since Zeus protects the traveler. Be hospitable to friends a nd avoid enemies. Be c onstant in f amilial r elationships. D o not associate with promiscuous women.

Hesiod next advises Perses to get himself a little homestead. He instructs him in fascinating detail about the things he will need to equip it properly and the p eople he w ill ne ed to s taff it. M odern sociology has learned much about a ncient farming arr angements and e conomy f rom H esiod's extended i nstructions t o P erses. These i nclude instructions for building a plow and other implements needed in farming and for selling produce profitably.

Dispersed t hroughout Hesiod's p oem a re instructions for the best times of year for performing c ertain s orts of f arm work. C ut wood when the rains start and the constellation Sirius is mostly visible. When the Pleiades are setting and the c ranes m igrating, do y our plo wing. P rune vines when A rcturus ri ses at twilight and the swallows are in evidence. When the Pleiades rise and the fig leaves grow, it is a good time for sailing and time for the harvest. A fter the summer harvest is finished, the time is ripe for drinking, and the g rapes o ne ha rvests i n S eptember w ill produce the wine for the following season. Hesiod c ontinues with advice a bout she ep she aring and against sowing grain on the 13th day of any month.

The p oem a lso p rovides a t reasure t rove of superstitions on a broad variety of subjects. These appear mostly in the context of advice on how to avoid unwanted consequences of various sorts. It ends b y l isting t he d ays t hat a re p ropitious f or building n arrow ships, f or c onceiving, a nd f or being born. Hesiod finally advises that many days are of "mixed thunder" and imply n either good fortune nor bad. It behooves a p erson, n onetheless, the poet says, to take into consideration all of Hesiod's good advice.

Xenophon of Athens (ca. 429–ca. 357

B.C.E.) Greek historian

The son of a p rominent A thenian family, Xenophon was a memoirist, writer of fictionalized history, e ssayist, a nd s tudent a nd p rotégé o f Socrates. As a na dventurer a nd o bserver, he attached himself to a Persian military campaign led by the young Persian prince Cyrus against his elder brother and king, Artaxerxes II. When that effort f ailed and C yrus a nd t he le aders o f h is Greek m ercenaries d ied (401 b.c.e.), it fell to Xenophon to lead the 10,000 Spartan soldiers of fortune who had b een serving with Cyrus from the frozen mountains of Armenia to Greek colonial territory on the Black Sea and finally to the Hellespont. Xenophon was then able to negotiate permanent appointments for himself and for the men who followed him in the Spartan army-an act for which Athens at first banished him, though its citizens ultimately relented.

Xenophon never returned to A thens, but spent the final de cades of h is l ife w riting a t pl aces of retirement i n t he c ountryside, first a t S cillus a nd then at Corinth. The model of government that he most admired, however, was always that of Sparta a constitutional monarchy.

Literary history remembers Xenophon for four principal sorts of compositions. The first of these

include hi s s traightforward h istorical w ritings. His Hellenics details the history of Greece for a period of 50 years during the author's own lifetime. H e b egins w ith 4 11 b .c.e.-the p oint a t which Thucydides' discussion of A e Pel oponnesian War breaks off-and carries the narrative down to 362 b.c.e. This was the period during which Sparta triumphed over Athens and temporarily emerged as the principal military power of Greece. Then Sparta, in turn, found itself eclipsed by the rise of Thebes. Thebes defeated Sparta at the b attle of L euctra (371 b.c.e.), a nd a gain a t Mantinea (362 b.c.e.). On t he s econd o ccasion however, the brilliant Theban general Epaminondas was killed in action, effectively thwarting further Theban ambitions.

As compared with Thucydides, says the literary historian Carleton L. Brownson, Xenophon's historiography is filled with disappointing omissions a nd w ith a f ailure to ma ke c onnections between h is own narrative a nd t he one t hat he tries to continue. He also displays a pro-Spartan bias t hat s ometimes c louds h is re porting o f events. In the final a nalysis, Bro wnson finds Xenophon less than trustworthy as a historian of this period.

Xenophon's *Anabasis*, however, is a different story. This is Xenophon's own memoir of the cam-

paign of Cyrus against his brother, Artaxerxes II. It r ecounts t he remarkable le adership role t hat the young scholar Xenophon, who in the beginning was a sort of military sightseer, came to play. The opening pa ragraph of t his entry g ives t he framework of t he s tory, but the importance of Xenophon's ac hievement i n le ading h is 1 0,000 Spartans back across hundreds of miles of hostile Persian territory c an ha rdly be e xaggerated. Xenophon had to invent tactics to ensure the safety of his rear guard. His success in defeating Asiatic armies much larger than his own revealed to the entire world the soft military underbelly of the e normous Persian E mpire. A 19th-century writer o n m ilitary tactics, Theodore F. D odge, remarked of the Anabasis: "After ... 23 centuries, there is no better military textbook."

Perhaps t he le ast h ighly r egarded o f Xen ophon's historical works is his funeral appreciation of the Spartan king Agesilaus—the descendant at a remove of 25 g enerations of t he hero H eracles (Hercules). D espite i ts a uthor's p reference f or Spartan g overnment a nd i ts m ilitary v irtues, Xenophon treats his subject in an uncharacteristically perfunctory fashion. Probably the necessity for the hasty composition of a funeral oration is at the source of the compositional defects it displays, i ncluding wholesale b orrowing f rom t he author's previously written works.

In his *Cyropædia* (The education of Cyrus not the would-be u surper with whom Xenophon marched, b ut C yrus the Gr eat who founded the Persian empire), Xenophon creates a k ind of historical fiction. The literary historian Walter Miller calls it the pioneering work of Western literature in the field of "historical romance." Though Xenophon had a firm firsthand acquaintance with Persia, the system of gove rnment a nd training t hat the a uthor a ttributes t o P ersians c omes s traight out of Sparta. So do the practices of soldiers going into battle and the tactics they employ.

The work is much more historically reliable when it comes to reporting the customs of the Armenians and Chaldeans, peoples whom Xenophon k new from having fought against them. Yet the book's principal purpose is not historical; rather, it is educational. It strives to paint an ideal society as Xenophon conceived of one. His Cyrus is guided, as Xenophon tried to be, by the principles of Socrates. Cyrus's imagined subjects enjoy f reedom of sp eech a nd le gal equality benefits unrelated to the Persian system of ruling. R oman w riters a nd s tatesmen such a s Cice r o and Cato nonetheless found in the book a model for the Rome they hoped would evolve. When considered as didactic fiction rather than as history, *Cyropaedia* deserves its place as Xenophon's masterpiece.

Among Xenophon's lesser writings we find his *Hiero*, a n i magined d ialogue b etween t he p oet Simonides of Ce os and King Hiero of Syracuse in Sicily. Their conversation presents a d ialogue in the manner of Socrates on two subjects: First, who is happier, an absolute ruler or a private citizen? Se cond, if the r uler is less happy, can t hat ruler b ecome h appier b y ga ining t he sub jects' affection? Critics generally judge this essay to be a lesser work than Pl at o's on the same subject.

Beyond t he w orks m entioned a bove, Xen ophon also wrote essays on miscellaneous subjects, including o ne a bout t he c onstitution o f hi s beloved Spartans: "Constitution of the Lacedemians." H e wr ote a nother pa ir c alled " Ways a nd Means" and "Athenian Finance," o n the way i n which the city of Athens might replenish the treasury it had e xhausted in warfare. A fourth essay treats the subject of horsemanship, a fifth—a military treatise—discusses "The Cavalry Commander," and a sixth considers the art of "Hunting."

Others a mong Xenophon's s urviving w orks commemorate his b eloved t eacher a nd ma ster, Socrates. His *Memorials of Socrates (Memorabilia)* sketches the character of Xenophon's revered teacher at the ethical and practical rather than at the philosophical level. Like Plato, Xenophon also wrote a *Socratic Apology*. In it, Xenophon reports Socrates' defense when the Athenians put him on trial f or im piety. As X enophon w as o ff on h is expedition with Cyrus at the time, he had to r ely on the d escriptions re ported by h is friend H ermogenes. In Xenophon's version, though Socrates, as in P lato and e lsewhere, i s innocent of t he

682 Xenophon of Ephesus

charges against him, he is nonetheless willing to die to avoid the ad ictions that accompany old age rather than, as Plato has it, on principle.

Also notable among Xenophon's Socratic writings i s hi s *Symposium* (Banquet), in which he reports the doings at a banquet held in 421 b.c.e. at the home of Callias. X enophon describes the entertainment a nd activities at t he banquet a nd pictures Socrates as a relaxed, jovial, and genial companion. Socrates' more serious reported conversation centers on the inferiority of carnal love to spiritual love.

Xenophon of Ephesus (fl. second or third century B.C.E.) *Greek prose writer*

A member of a c ategory of w riters s ometimes described as Greek erotic novelists, X enophon of Ephesus composed a story that is sometimes called *An E phesian T ale (Ephesiaca)* and i s sometimes known by the names of its protagonists, A brocomes a nd A ntheia. Xunzi (Hsün Tzu) (ca. 312 B.C.E.) Chinese prose writer

What little we know of the Chinese philoso pher Xunzi's life has be en ga thered from o ccasional snippets in his own work and from a short biography of him that the historian Sima Qian (Ssuma Ch'ien) wrote about a century after Xunzi's death. The first biographical n otice we have of Xunzi app ears when, at a bout the age of 50, he traveled from his native Zhao (Chao) to the state of Qi (Chi) to teach and to study; he arrived there about 26 4 b .c.e. S ometime d uring t he p eriod 266–255, b.c.e., Xunzi himself wrote that he had debated military matters before King Xiaocheng (Hsiao- dreng) of Zhao.

For a time after his arrival in Qi, Xunzi was welcomed and honored, but jealousy produced slander, and he moved on to the state of Chu. There the prime minister appointed him to be the magistrate of L anling in Shandong (Shantung) Province. He remained in this post until the assassination of his patron in 238. Though he lost h is app ointment on t hat o ccasion, he remained for the rest of his life in Lanling and was b uried there. The d ate of h is de ath is n ot known.

As a philoso phe, Xunzi a rdently rose to t he defense o ft raditional C onfucianism, w riting mostly in prose but also in verse against the positions of such opponents to Confucian doctrine as Moz i. Mozi had disparaged two central doctrines of Confucianism—the value of ritual for instilling ri ght t hinking an d t he e thical b enefit o f music. X unzi c onsidered both n ecessary t o a functioning and upright human society. Xunzi also a rgued a gainst revisionist thinkers w ho were r esponsible f or the r ise of neo-Confucianism. In that group Xunzi included his pre de cs for Mencius. Xunzi t ook issue w ith Mencius's argument that basic human nature is good. Such a view, Xunzi argued, contradicts the authority of r itual, w hich p rovides models for emulation in the human effort to become good. The a ssertion t hat e ssential h uman na ture i s good also marginalizes the necessity for education, and it contradicts universal human experience. People require external restraint to a vert wrongdoing, and ritual provides it. In his own time, however, Xunzi lost the argument to Mencius's adherents. Xunzi was a p rolific w riter, a nd h is w orks have survived to be collected for us in three substantial v olumes i n J ohn Knobloch's E nglish translation.

Yamanoue no Okura (ca. 660–ca. 733 c.E.) Japanese Poet

Born in Korea in the kingdom of Paekche, Okura was a child of three or four when he a rrived in Japan as a refugee. The literary historian Donald Keene su ggests t hat, g iven Ok ura's ma stery of Chinese as well as Japanese and his acquaintance with the thought of C onfucius, B uddha, and the *Lao tz u* (*Daode jing*), his father had probably educated him in Chinese philosophy. In any case, his Japanese p oems on subjects c onnected with such ma tters often ap pear in the *Man'yōshū*, Japan's e arliest s urviving a nthology of p oetry, with lengthy explanatory prefaces in the Chinese language.

In 701, Okura went to China as a junior diplomatic official, remaining there for perhaps two or perhaps five years. During that stay, he composed the o nly p oem i n the g reat c ollection t hat w as penned outside Japan. Eventually he rose to become the governor of Hōki and, later, a tutor to the crown prince. H is p upil e ventually became t he emperor Shōmu, who assigned Okura the important post of governor of C hikuzen, a ma jor p rovince w here many people with literary interests dwelled.

In his verse, Okura objected to the Taoist (see Daoism) rejection of worldly responsibilities and encouraged Bu ddhist as ceticism and C onfucian

devotion to the family. His most eloquent poem, his "Dialogue o n P overty" i s d escribed in the entry on the *Man'yōshū*.

Okura h imself c ompiled a lo st a nthology, *Karin* (Forest of verses) that became a source for the *Man'yōshū*. Okura's reputation as a p oet has recently risen because of the 20th century's preference f or t he lo nger s ort o f p oem t hat Ok ura wrote over the shorter poems that came to characterize Japanese letters after the ancient period.

Yang Xiong (Yang Hsiüng) (53 B.C.E.–18 C.E.) Chinese poet and prose writer

A poet, literary critic, scholar, ethicist, and statesman, Yang Xiong had been a precocious child. He read widely, thought much, and, owing to a bad case of stuttering, spoke little.

Yang combined the roles of poet and ethicist in a collection of fu poems, six of which survive. Couched in the form of debates, t hese poems deal with such issues as moderation in the use of wine or as a consideration of the negative and positive attributes of hunting. His poem "Changyangfu" (Tall poplars) suggests that the aristocratic sport of hunting imposes on the common people by d rawing t hem f rom t heir l abors t o trap game for the nobility to chase. On the positive side, hunting provides a u seful adjunct to diplomacy, for it impresses foreign guests with the hosts' generosity and the warlike qualities that the huntsmen display in the chase. Yang's verse self- onsciously imitated the work of older poets a nd t herefore s eemed a rchaic to h is contemporaries.

As a scholar, Yang interested himself in the science of acupuncture, musical theory, and the origins and development of language. The old-fashioned st yle t hat ma nifested itself in h is verse a ppeared elsewhere i n h is writing. H e found the *Boo k of Changes* to be a compelling document and wrote a companion volume pointing o ut i ts excellences—his *Taixuanjing* (*T`ai hsüan ching*).

As a literary critic, however, Yang later came to disavow his own verse. He felt that the rhymed prose (fu) in which he had c omposed led people into idle and lascivious thoughts. Moreover, he found h is own verse f alse r ather t han g enuine and fu verse in general no better than "worm carving."

Posterity p rincipally r emembers Y ang f or a work on ethics, *Fayan*, in which he modifies some of the principles of Confucius. The *Fayun* argues that essential human nature is neither good nor evil but can be shaped to go either way.

Relatively late in life, Yang became an official in the government of the usurper Wang Mang, who ha d b riefly o verthrown t he Ha n dy nasty. Yang was not happy in his official role and once attempted suicide by jumping out a library window. Nonetheless, his affiliation with a disreputable sovereign adversely colored the Confucians' evaluation of Yang's work for 1,000 years.

Yantielun (*Yen t'ieh lun, Debates on Salt and Iron*) Huan Kuan (ca. 80 B.C.E.)

During t he r eign of t he Ha n dy nasty em peror Wu, a leader who saw warfare as a principal tool of d iplomacy, t he C hinese g overnment c reated state monopolies that controlled the distribution of salt and iron. These assertive policies, though they were strongly endorsed by the imperial civil servants, the Legalists, both oppressed the common p eople a nd o ffended t he ad herents of t he humanistic Confucian way.

If the accounts a re true, r epresentatives of the two sides engaged in an extended series of debates in which they argued their respective views of the state monopolies and e conomic p olicy. A s cholar named H uan Kuan (fl. 1 st c., c. e.) r ecorded a nd edited the debates, and he produced the lively, 60section a ccount of t hem t hat ha s c ome do wn to posterity.

Whereas the L egalists u phold the b enefits of foreign wars, the Confucians are dead set against them. The Legalists insist that such wars are necessary to d efend the empire a gainst militaristic tribal people who must be destroyed. Besides, the wars bring glamorous goods into the marketplace as a side effect. The Confucians object, citing the universal b rotherhood o f ma n, a nd i nsist t hat diplomacy and friendship can win the barbarians to China's side.

The Legalists favor stern laws and harsh punishments as the proper means for ke eping the common people in line. The Confucians describe the wretchedness and want of the common people and call for social programs to relieve their misery. The L egalists feel su re t hat su ch p rograms only encourage slothfulness. The Confucians insist that proper educational programming can l ead t he u ntutored c ommoners to v irtue. Besides, the Confucians argue, the idle rich have no c oncept of the m isery and dru dgery th at make up the ordinary lot of common folks.

Huan Kuan manages to catch the flavor of the debates. While the rhetoric is high-flown and the speeches a re o ften s et p ieces, i nsults a re s ometimes e xchanged, t empers flare, and t hey occ asionally become so bitter that personal quarreling and mme- alling ensue.

Yanzi chunqiu (Yen Tzu Ch'un-ch'iu, Spring and Autumn of Master Yen) (ca. 500 B.C.E.)

The he ro of t his eight-chapter s eries of r igidly moralistic a necdotes, Yen Y ing, w as a y ounger contemporary of Confucius who shared some of Confucius's views b ut w as n ot a lways the g reat sage's admirer. Specifically, Yen took issue with the C onfucian p enchant f or lo ng p eriods o f mourning and elaborate funeral rituals. He also disapproved of t he C onfucian f ondness f or music. I nstead, he s eemed to f avor the view of Moz i, who considered music to be tainted with lascivious overtones.

The literary historian Burton Watson suggests that much of the material contained in this work has been borrowed from the *Zuoz huan*. That fact alone r ules out t his work's sometimes- proposed claim t o be an early r epresentative of C hinese biography.

Yen Ying is portrayed as an unwittingly sententious courtier-one in the mold of Sha kespeare's Polonius in Hamlet. In the role of the good a dviser t o h is r uler, D uke J ing (Ching), Yen must thwart the duke's evil advisers, Liang Chu Qu and I Quan. The duke is predisposed to a remarkable a rray of vices, and Yen reproves his sovereign for every one of them. The duke is a g lutton, a d runkard, a nd a s ensualist. H e neglects affairs of state so he can go hunting. He is fond of expensive clothes, luxurious palaces, and lavish gardens a nd watercourses. H e a lso likes musical performance. Yet the only harping that Yen Ying will allow his master to h ear is Yen's own perpetual reproof. Not very credibly, the reprobate duke docilely follows his counselor's priggish advice.

Sometimes, however, the onus of providing the duke with a moral example shifts to another character, as it does when Duke Ching tries to arrange the marriage of his favorite daughter to the already married Y enzi (Y en T zu). The d uke o pens t he negotiations by commenting on the age and ugliness of Yenzi's wife. He then proposes to present Yenzi with the ducal daughter as a more attractive second spouse.

Groveling respectfully on the floor, Yenzi declines on the grounds that he married his wife when she was young and beautiful and in the expectation that time w ould w ork its r avages. The c ouple re mains happy, a nd Yenzi feels c ertain that D uke J ing will not forc e h im to t urn a gainst h is l ifetime partner. The authority of Yenzi's moral fortitude trumps the Duke's arbitrary exercise of power.

yuefu (yüeh-fu) (poems and ballads) (ca. 120 B.C.E.)

According t o B urton W atson, t he h istorian o f Chinese literature, in the late Han dynasty Emperor W u e stablished a n official bureau of m usic to write ritual songs to b e performed in connection with r eligious and c ivic s acrifices. This b ureau survived from around 120 until 6 b.c. e. After that date, its 829 employees lost their jobs or were reassigned, and other civil de partments assumed the functions of the b ureau. The c ompositions t hey wrote amounted to old-fashioned liturgical works, patterned o n t hose i n t he C onfucian *Boo k o f Odes*. The bureau's *yue fu* songs served their public p urposes, b ut t hey c ontributed l ittle to t he cause of good poetry.

In addition to cranking out hymns, however, the b ureaucrats a lso c ollected a nonymous folk ballads from a round t he empire. These songs the second kind of *yuefu* verse—were intended to inspire the o fficials and t o a cquaint t hem with popular taste. In quality, the surviving examples of such works vary from being merely quaint relics of a long- dead past to moving poems that convey and recreate sincere feelings in the reader.

A third subcategory of poem falling under the *yuefu* rubric, and one that has occasioned considerable c ontroversy a mong s tudents of a ncient Chinese letters, includes examples of poems that, using a five-word me ter, e mulate t he e arly ba lads. The c ontroversy a bout t hese works c enters on the degree to which they are or are not expressive of a n i ndividual, self-consciously p oetic,

authorial personality. Those who favor the 19th and early 20th c entury formulations t hat en vision poets as lonely geniuses starving in garrets tend to follow the view that the idea of the expression of i ndividual subjectivity emerged i n su ch works i n C hina in the late Han p eriod. Those, instead, who find p ostmodern critical positions more convincing—critics like Christopher Leigh Connery—argue that such works were often the result of a ctive c ollaboration a mong g roups of poets. The works represent the spirit of the times and l inguistic e xpressive capacities and l imitations rather than the emergence of a cult of authorial personality.

From the point of view of their subjects, *yuefu* poems o ften c oncerned su ch to pics a s life o n farms or in villages. Or phans, foot soldiers, the wives who would accompany them to battle, and singing girls p opulate their lines. Such subjects, however, do n ot p reclude p ersons o utside t hose classes from authorship. Those who argue for folk origins t o a c onsiderable de gree m ust su pport oral composition, since most country commoners were i lliterate. The s cholarly deba te co ncerning the class of authors who produced the best *yuefu* verse will not be resolved in these pages.

Zhuangzi (Chuang Tzu, Chuangtse, Kuan

Tzu) (fl. ca. 350 B.C.E.) *Chinese prose writer* A p rose w riter, p hilosopher, a nd h umorist, Zhuangzi g enerally r eceives cr edit f or ele vating the beliefs of Daoism into a unified philosophical position. Though there is general agreement that not a ll o f t he b ook t hat b ears h is na me, t he *Zhuangzi*, is his, Zhuangzi advances a nontheistic view of the operations of the universe in its pages. The u niverse c omes i nto b eing sp ontaneously, unmediated by any divine intention. It changes according to t he i nternal p rinciples a ssociated with i ts b eing a nd i s n ot a lways su sceptible to human understanding.

Zhuangzi thinks that the moral systems about which h uman b eings argue—particularly th ose of Confucius and Mozi—are the constructs of the schools that argue them. Human beings are neither essentially good nor essentially bad. They simply a re w hat t he u niverse ha s made t hem. Their goal, then, should be to operate as spontaneously as the universe does and to seek to behave just a s naturally. A ny a ttempt to do o therwise will result in failure. Life a nd death a re si mply different m odes of existence, n either of w hich i s b etter t han t he other. Therefore, when a beloved person dies, the survivors m ourn for themselves a nd t heir s ense of loss. I mmortality of individual consciousness does not exist. Some interpreters, however, think that a sort of unself-conscious life force persists as a part of the universal processes.

Zhuangzi, in sofar as he constructs a rguments at a ll, do es so by telling sto ries. He r elates, f or example, the tale of a keeper of monkeys who provided th ree nuts for the monkeys' breakfast a nd four for their d inner. The monkeys were h ighly displeased with this a rrangement, s o the k eeper changed it. He gave them four nuts for breakfast and th ree f or d inner, a nd t he monkeys were entirely satisfied with this arrangement. The point is t hat l ikes a nd d islikes f ollow f rom sub jective evaluation. The w ise p erson will b ring t ogether such evaluations and de cide on the most ac ceptable by trying out the alternatives.

The wise person will also always seek the natural path of least re is tance, as did the cook whose knife n ever n eeded sha rpening si nce he a lways carved up the animals he prepared in such a way that the k nife m issed the b one a nd g ristle a nd only passed through flesh and internal interstices. His prince congratulated the cook on this method, commenting t hat t he cook had t aught t he prince how t o c onduct h is life: Find the natural path.

Many of the stories Zhuangzi tells both teach and amuse. This one concerns himself. Two high officials of the Prince of Chu came from the ruler as emissaries. Their mission was to invite Zhuangzi t o beco me C hu's c hief m inister. Z huangzi replied that he had heard of a sacred tortoise that had died at t he age of 3,000 y ears a nd t hat t he prince k ept its remains in his an cestral temple. Would t he to rtoise r ather, Z huangzi a sked t he messengers, h ave its re mains venerated there or wag its t ail in t he mud? The messengers a greed that the tortoise would have preferred the latter. Zhuangzi sent them away with the message that he too preferred to wag his tail in the mud.

Zoroaster (Zarathustra Spitama)

(ca. 630–ca. 553 B.C.E.) Persian poet An ancient Persian poet, prophet, and religious leader, Zoroaster may have been the founder or the head of a reform movement within the religion of an cient Persia. R eference to h im a s a historical figure a ppears at the b eginning of Zoroastrianism's holy book, the Avesta.

The historian W. B. Henning finds Zoroastrianism to be an essentially dualistic kind of mixed religion whose beliefs varied with time. Whether Zororaster in itiated o r inherited t he r eligious beliefs that came to be associated with his name, Henning enumerates the following central points. Zoroaster b elieved i n o ne g od c alled A hura Mazda—the g od o f l ight. H e a lso b elieved t hat god had an adversary, an evil spirit named Anra Mainyu—a f orce o f d arkness. Z ororaster a lso thought that human activity played an important role i n t he e ventual o utcome o f t he s truggle between light and darkness.

From Zoroaster's own hand we have about 900 lines of surviving verse. These are dispersed in 17 poems c alled $G\bar{a}th\bar{a}s$ and arranged into five groups according to their meter. From them we learn that, in addition to being a dualist who saw universal history as a struggle between the powers of light and darkness, Zoroaster was also an agrarian reformer who had at heart the interests of small farmers against those of the great landowners who ex ploited them. He also supported the e stablishment of p ermanent s ettlements of farmers and herders who took precautions against the raids of roving bands of nomads who would use force to carry off the farmer-herders' animals and provisions.

Zoroastrianism became a world religion and, before Ch ristianity, ha d a n i mpact on t he thought and theology of the ancient Greeks and Romans that was a lmost u nique a mong A sian religions. That the religion of Zoroaster shared some po ints o f co rrespondence w ith e arly Christianity is perhaps at tested to by the fact that the three wise men, the Magi of the Christmas s tory, were ad herents of t he Z oroastrian faith.

Zuozhuan (Tso Chuan, Commentary of Zuo) (ca. 475 в.с.е.)

Written by a Confucian disciple named Zuo (Tso), this e xpansive c ommentary o n C onfucius's *Annals of Spring a nd Aut umn* has been incorporated with its source document into the essential canon of Confucian writing.

Confucius's own work provides brief notices of occurrences in his native state of Lu between the years 722 and 484 b.c.e. At the head of each entry, Confucius r ecorded t he y ear, m onth, d ay, a nd season of the noted event's occurrence. Confucius included summer under spring and winter under autumn, thus giving rise to the common title of the work. In the Annals that Zuo used as an index to help locate Confucius's sources, the sage points out natural phenomena such as meteor showers and politi al events such as raids by warriors from other states, victories and defeats in feudal warfare, a nd t reaties r esolving d isagreements w ith neighboring rulers. Confucius also takes note of such u nfortunate o ccurrences a s de aths f rom natural causes and from murders.

Onto this bare-bones list, Zuo grafted the flesh of incident and significance that revealed much of

the meaning implicit in Confucius's original catalogue. An illustrative example recorded by the literary h istorian H erbert A. Gi les w as l isted b y Confucius in the Spring section of the 21st year of the government of Duke Xi (Hsi). "In su mmer there was a g reat d rought" is all that Confucius says about the matter, but Zuo gives the following additional i nformation: As a r emedy for t he drought, the duke proposed burning a witch. An adviser r etorted t hat suc h a r emedy w ould n ot help. The duke would do better to repair the city's walls, eat less, spend less, and encourage the people to assist each other. Witches were not involved. If God wanted this one slain, why did he bother to let her b e b orn? B esides, i f she d id c ause t he drought, burning her would make matters worse.

Zuo's e xpansion c larified t he r easons t hat Confucius h ad s elected t he i ncidents he l isted. Beyond t hat, o ther co mmentaries augmented every sentence of C onfucius's br ief en tries w ith interpretative significance. Zuo, however, was not only a go od conceptual C onfucian, he w as a lso the first g reat master of Ch inese p rose w riting, and many subsequent writers looked to h is work for their inspiration.

Beyond s uch commentary, t he *Zuozhuan* also contains i ts a uthor's comments a bout m usic a nd about m usic's role i n governing a p olity. Superior men, thought Zuo, would not listen to "lascivious or seductive airs." Good people played their instruments to he lp re gulate their conduct, not si mply for aesthetic pleasure or to stir their emotions.

The *Zuozhuan* is also the source of such inspirational maxims as its definition of "t he t hree things that do not decay—establishing oneself by virtue; establishing oneself by deeds; [and] establishing oneself by words."
