## PREFACE.

---

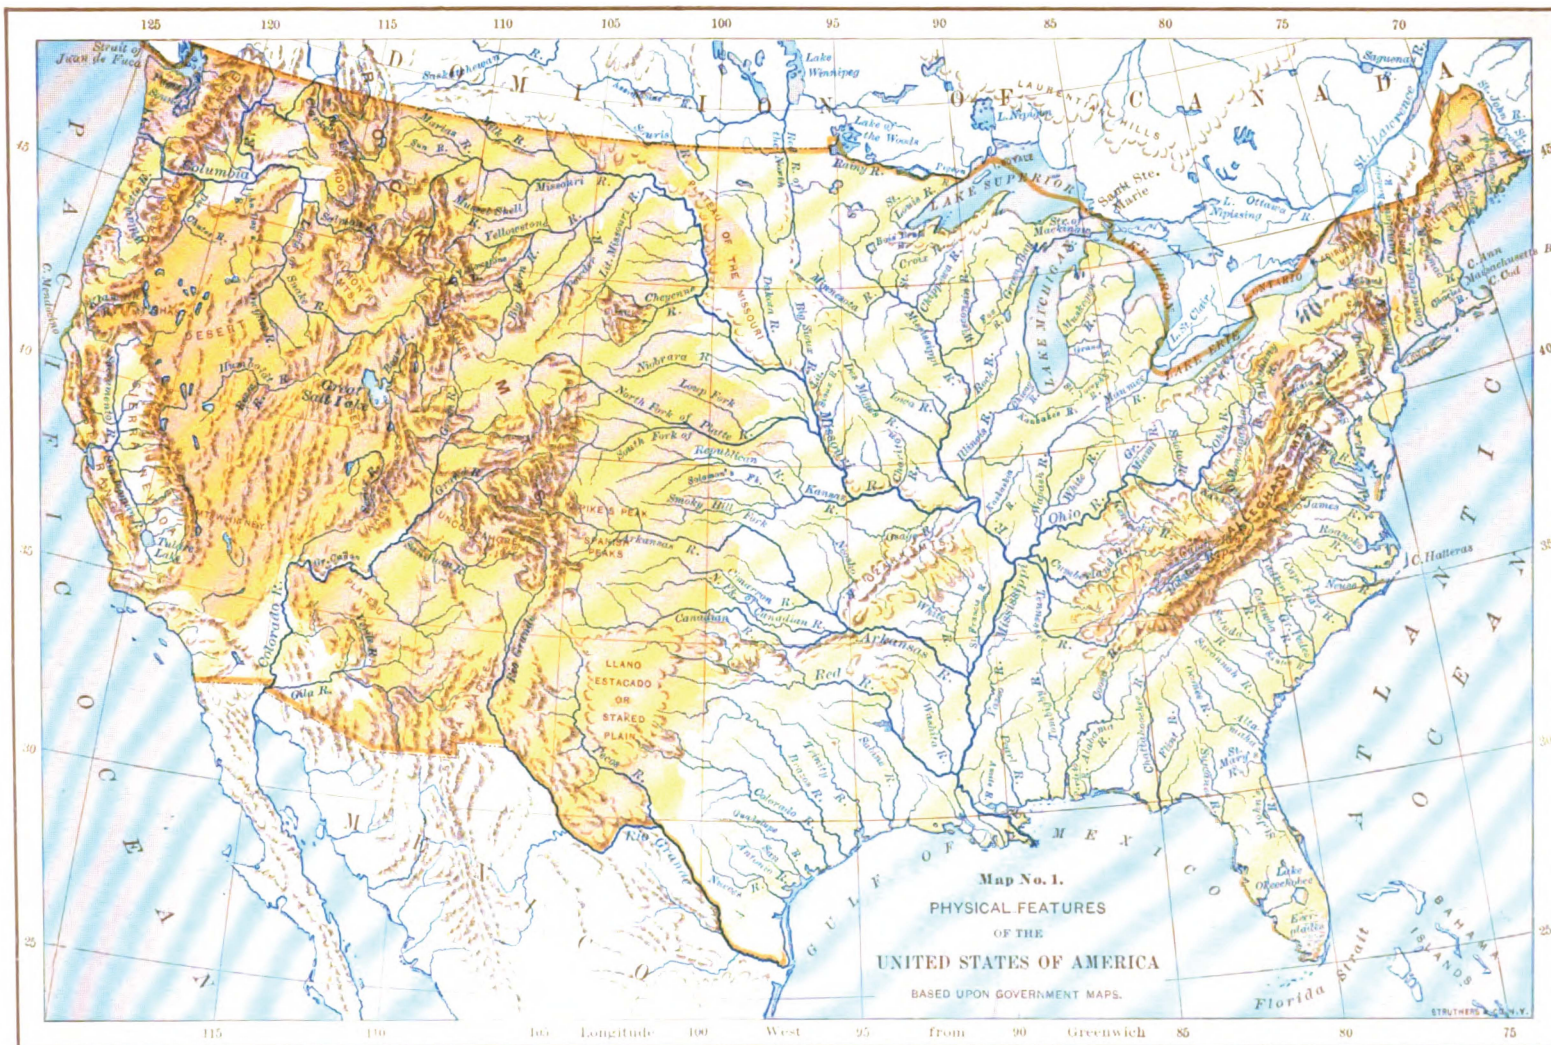

The historical geography of the United States and of the previous Colonies has been much neglected; it is therefore difficult to collect material upon which to base historical maps; or to check the results by the published work of other students. This brief series is offered as an attempt to make maps from the records,—from the texts of grants, charters, and governors' instructions, and from statutes, British, colonial, state, and national. The purpose has been to draw no boundary line for which documentary authority does not exist. The author hopes that in his use of records, and in the inferences which he has been compelled to employ where material is wanting, he has fallen into no unpardonable errors.

The territorial development of the United States, and the status of territorial slavery, are questions on which no two investigators will precisely agree; the principle adopted has been to make the maps conform to the official treaties and to the laws of the United States, as understood at the time when they were negotiated or enacted.

By the courtesy of the publishers, I am able to reproduce the maps prepared for the series of Epochs of American History.

# LONGMANS' SCHOOL GEOGRAPHY.

By GEORGE G. CHISHOLM, M.A., B.Sc.,

*Fellow of the Royal Geographical and Statistical Societies,*  
AND

C. H. LEETE, A.M., Ph.D.,

*Fellow of the American Geographical Society.*

Second Edition, Revised 1891. Large 12mo, pp. 384, with 70 Illustrations, \$1.25.

In Longmans' School Geography an attempt is made at a new departure in the teaching of Geography by providing a text-book which is founded on the results and Methods following from the great advance which has taken place in Geographical Science and Teaching on the Continent, and especially in Germany. The aim of the author has been to exclude from the books almost all details which pupils cannot be expected to keep permanently in mind, but to take care that what the book does contain should consist of what is most effective as discipline, and of most importance to know. In the American edition prepared by Mr. Leete, the portions on America in general, North America and the United States have been newly written. The other parts have been changed but little, though alterations and adaptations have been made wherever they seemed called for by the fact that American instead of English or Australian pupils were to be the readers.

"The closing paragraph of the prospectus is much closer to the opinion of the reviewer than such paragraphs usually are: 'This text-book adapts itself to pupils of intelligence, and will be highly appreciated by all teachers imbued with a spirit for teaching real geography, not attempting to supersede their functions by dictating the length of the daily tasks or the questions that shall be asked, but furnishing a body of material so selected, arranged and presented, that its perusal is at once pleasurable, suggestive, and of substantial value.' This is perfectly true. . . . On the whole the book is remarkably successful."—NATION.

"It has a system of cross-reference that is very valuable and constantly reminds a pupil that all are parts of a whole. It does not merely state facts, but attempts to show a cause for each phenomenon, so that the study of geography is not mere memoriter work. The work is worthy careful study and consideration by all teachers. No one can read or study it without gaining much from it. Its method is good, its fulness makes it valuable, and its careful study will aid much in improving geographical knowledge."—EDUCATIONAL COURANT.

"We have nothing in this country with which to compare it."—N. E. JOURNAL OF EDUCATION.

"As a whole the book is a good example of applied geography, containing a happy combination in right proportion of the physical and the descriptive."—THE CRITIC.

## COMMERCIAL GEOGRAPHY.

**CHISHOLM'S HANDBOOK OF COMMERCIAL GEOGRAPHY.** 8vo, 522 pages, \$5.00.

"No better text-book of the subject could be had, for such institutes as deal with commercial geography. Taking the book as a whole, probably no hand-book of commercial geography in any language is equal to it."—PROCEEDINGS OF THE ROYAL GEOGRAPHICAL SOCIETY.

**CHISHOLM'S SCHOOL TEXT-BOOK OF COMMERCIAL GEOGRAPHY.** 12mo, 216 pages, 90 cents.

This book is in the main an abridgment of the author's Handbook of Commercial Geography. In making the abridgment, endeavor has been made to retain as much as possible of the matter that seemed fitted to present the leading facts of international commerce in such a way as to impress the memory. The description of countries is confined to features of importance in relation to commerce.

Like the larger book, this text-book is divided into paragraphs for the sake of making frequent cross references. The references are made by printing the number of the paragraph referred to in thick type, in parenthesis, thus (245.)

## A STUDENT'S HISTORY OF ENGLAND. From the Earliest Times to 1885.

By SAMUEL RAWSON GARDINER, M.A., LL.D., Fellow of All Souls College, Oxford, etc. Three Volumes. Illustrated under the Superintendence of Mr. ST. JOHN HOPE, Secretary to the Society of Antiquaries.

Vol. I. B.C. 55—A.D. 1509. With 173 Illustrations. pp. XXXII—359 and Index. Crown 8vo, \$1.20.

Vol. II. A.D. 1509—1689. With 96 Illustrations. pp. XXVI—288 and Index. Crown 8vo, \$1.20.

Vol. III. (1689—1885). With 109 Illustrations. pp. XXII—990. Crown 8vo, \$1.20.

The complete work in one volume with full Table of Contents and Index, revised. Cloth, plain, \$3.00, *net*.

"If we do not greatly mistake, this History of England will supplant all others used as text-books in schools and colleges. The name of the author . . . would prepossess any one in its favor, and a perusal of its pages only accentuates the feeling that here at last we have an accurate, succinct, and entertaining book, fit for schools as well as for the general reader. . . . The illustrations, a notable feature, . . . are not the old-fashioned and hackneyed ones to be found in most so-called illustrated histories; . . . they are illustrative of the text and afford an excellent study in the manners of the times."—N. Y. CRITIC.

"Never, perhaps, in such a treatise has pictorial illustration been used with so good effect. The alert teacher will find here ample material for useful lessons by leading the pupil to draw the proper inferences and make the proper interpretations and comparisons. The style is compact, vigorous and interesting. There is no lack of precision; and in the selection of the details, the hand of the scholar thoroughly conversant with the source and with the results of recent criticism is plainly revealed."—THE NATION.

"This is the best school history of Greece which has appeared for many a day. While the style is never heavy, nothing of importance has been omitted. The book is, moreover, not a mere summary of larger histories; it gives proof of independent judgment, and it passes beyond earlier books in finding room for the most recent information derived from archaeological discoveries."
