## slovak

## introduction

The cosy position of the Slovak language (*slovenčina slo-ven-chi-na*) in Central Europe makes it a perfect base for learning or understanding the languages of other Slavic nations. It shares certain features with its close relatives in the West Slavic group – Czech and Polish. To a lesser extent, Slovak is similar to the South Slavic languages (particularly Slovene, from which it was distanced by the arrival of the Hungarians to their present day homeland in the 9th century). There are even similarities between Slovak and Ukrainian, which represents the East Slavic branch.

Not surprisingly, however, the language that bears the closest resemblance to Slovak is Czech, since ties between the two now independent countries date back to the 9th century and the Great Moravian Empire. More recently, the 20th-century Czechoslovakian affair established even closer relations between Czech and Slovak, to the extent that the two languages are mutually intelligible (although less so in the colloquial form or among the younger generation). Hungarian influence on Slovak (mainly in the vocabulary) is a result of the centuries during which Slovaks formed first part of the Kingdom of Hungary, and later the Austro-Hungarian Empire.

The literary standard of Slovak emerged in the mid-19th century, during a national revival movement marked on the linguistic front by the work of L'udovít Štúr. In earlier times, it was mostly a spoken language, subordinated in writing to Latin and Czech, although texts with elements of Slovak or written entirely in Slovak can be traced back to the 15th century. The Great Moravian Empire was originally the place of St Cyril and Methodius' mission, which used the Glagolitic script, the precursor of the Cyrillic alphabet, for Old Church Slavonic literature. However, the West Slavic languages, including Slovak, soon adopted the Roman alphabet due to the influence of the Catholic Church.

Since 1993, Slovak has stepped out of the shadow of its larger neighbour, Czech, with which it shared official status during the Czechoslovakian days. It is now the official language of about 5 million speakers in Slovakia and there are Slovak speaking minorities in Poland, Hungary, Romania, Ukraine, the northern Serbian province of Vojvodina, and of course, the Czech Republic.

Even if you don't speak Slovak, be sure to look up your name in the official Slovak calendar – in which each day corresponds to a personal name and entitles people to celebrate their 'name day' (*sviatok svyuh-tok* or *meniny me-ny-i-ni*) with equal pomp as their birthday!
