The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

Forward

I would like to acknowledge and personally thank those other authors and contributors to this book known and/or unknown for without the insights and knowledge shared by them this book would not be possible. As I am quite sure that you will recognize the sole purpose of this book is to educate inform and generally empower our fellow man to reach for higher more worthy goals. Goals in keeping with the knowledge of who we are and why we are here.

To all of my friends from around the world I also thank you for your love and support. A special thanks to Anne Godfrey and Bruce Johnson of Tapovan, Parola, India <http://tapovan.co.in> and to Abel Hernandez and Aleta Macan Terapita Homa <http://homa1.com>. Richard and Lisa Powers editors of Satsang <http://satsang.org> and to the support we continue to receive from Fritz and Lee Ringma of Om Shree Dham, Hunter Valley Australia <http://www.agnihotra.com.au> If you produced a video that we have used to fulfill the mission of educating and informing others about Agnihotra and Five Fold Path Thank you for making that video public and available to use as embeded media in keeping with Fair Use law and Intention.

Agnihotra has been resuscitated from this lost ancient storehouse of wisdom by Shree Ganjanan Maharaja and has been spread far and wide by his beloved disciple Shree Vasant Paranje until his recent passing in 2008. Leaving no one individual as a successor, Shree knew that his work would be spread by divine will through the faithful and loving members of his far flung global family comprised of students and devotees from virtually every nation on the globe.

This book serves to support and continue this important work which so many others throughout the world also share as they too spread this holy science and pollution mitigating process know as Agnihotra, so vitally needed as it is in today's exceedingly toxic and irradiated world.

A Note from the Author

In this world where real solutions and innovative inventions are regularly suppressed and stored under lock and key, to protect the entrenched monopolies, addressing the challenges and meeting the needs of the common man are becoming more and more difficult. This simple book wishes to offer more than just HOPE or the empty promises of contrived political rhetoric or propaganda. This book is about what we know to be effective as a means of neutralizing pollution in the air, water and soil of our planet as well as within the mind of man himself. It is in Truth a Solution to Pollution which for me and thousands of others has been validated through our own experience over the course of the past 42 years. Therefore it is the intention and purpose of this small book to help others make the decision to adopt this planetary healing regimen in sufficient numbers needed to raise and restore reverence for natural order and in so doing build a new global paradigm in keeping with the highest principles of compassion, love and mutual respect for one another and our Mother, "Space Ship Earth". The Sun has risen on a New Era!

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

Introduction

It is my sincere wish that this book will open the doors to the ancient knowledge which stands at the ready to assist us in our present hour of need. The future of all life upon our planet requires that we open our minds and our hearts to all the knowledge which is at our disposal in whatever forms it may take regardless of the container which holds it. We therefore must become as children again humbled by our brush with extinction never forgetting the lessons which we have learned. We must also divest ourselves of all forms of superstition religious and racial bigotry and the misunderstandings that emanate from them. Only a return to the Scientific Method, together with a united human family will save us from our headlong plunge into the darkness of total destruction and ecological degradation. Materialism and its handmaiden, Technology, have played its innings and have been found lacking as a comprehensive solution to the many complex problems we now face. The mechanistic view of life and the scientific rhetoric which issues from it must be replaced with a more holistic view that has as its core the objective and goal of answering the question of, what is truth.

What is going on?

World Scientists Warning to Humanity

“Human beings and the natural world are on a collision course . . . No more than one or a few decades remain before the chance to avert the threats we now confront will be lost and the prospects for humanity immeasurably diminished.”

*1,600 Senior Scientists, **November 18, 1992** — World Scientists Warning to Humanity*

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

It seems that there is a well lead and coordinated effort to right the many wrongs of the past during which time we have busily been polluting our planet in the name of progress. Whether we like it or not our planet is going to be rejuvenated, restored and made whole again by forces of which we know very little at this time.

Our recent past highlights just how dark man's heart can grow when greed and irresponsible abject self-interest take center stage, all but obscuring nature's importance and her irreplaceable role in the maintenance of the earth's vitally important ecological systems. These systems which have been established over millions of years are our lifeline and responsible for the support and maintenance of all life upon our planet and as such must be kept strong by protecting their bio-diversity and thus their strength and resilience.

Through today's sciences as well as vitally important ancient knowledge as given in the Vedas we are coming to know and more fully appreciate just how delicate and yet just how robust nature really is. It is through this growing appreciation and understanding of her many miraculous qualities and attributes that we are learning how we can actually assist natural processes and maintain balance long established over time immemorial through intelligent cooperation and co-participation as stewards of our, "Space Ship Earth".

We are in fact being lead to discoveries which will completely change the world as we know it today. The signs can be seen everywhere if you only know where to look, like sprigs of grass emerging through the asphalt defying man's attempts to dominate nature at every turn in the road. Awareness of the inevitability of global rejuvenation is spreading through the board rooms of business, the legislative and executive bodies of governments, grass roots activism as well through those empowered individuals who daily perform a sunrise and sunset process called Agnihotra which has been resuscitated from the storehouse of Vedic Wisdom.

Restoration of the Earth is in fact destined to become perhaps the biggest and most centrally vital enterprise in the years just ahead. Leading in this transformation are people from every walk of life from virtually every continent including, field biologists, anthropologists, gardeners, entrepreneurs, artists, poets, musicians, public servants, ecologists, architects, botanists and environmental activists, all of whom comprise a growing army of (bio-neers) who are working with nature to re-set and heal our environment.

Though it is not widely known there are effective solutions and processes that can be employed/performed which have the power to neutralize and thus mitigate virtually all of the most gravely serious environmental problems of our time. As the widespread degradation of our life support systems continue to decline those who have eyes to see are witnessing that the earth itself is stronger than we know and most definitely will survive our folly. The only question which remains is how many other species of life will we take down the road to extinction along with ourselves should we continue on this course of unabated materialism, consumerism and total disregard for our home planet, "Space Ship Earth".

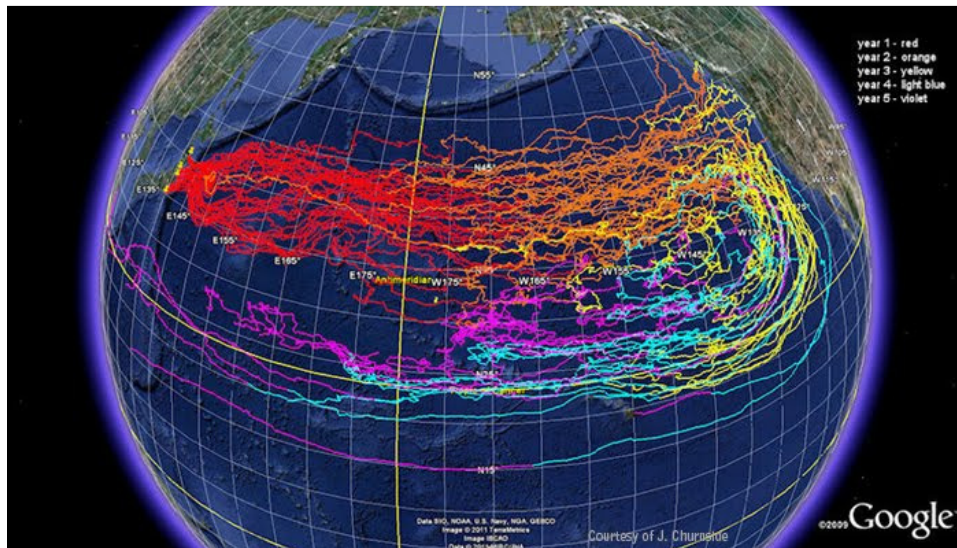

It is now blazingly clear to most that we have indeed precipitated severe damage upon the planet. The circumstances in fact call for an unprecedented mobilization of resources and demands massive action by millions of people in order to set things right. Indeed a level of mobilization seen only in times of war will be required if we intend to balance the books, for it is indeed a war which we have been waging with nature and natural processes which sustain our very lives. These are energy cycles/processes about which we are, for the most part, collectively, still ignorant or in a deep state of denial.

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

How will we find our way back to a well-lit path of sanity and how will we rediscover our true role as stewards and caretakers of this lonely planet while there is still time left to avert catastrophe and spiraling deva-station?

Fukushima Ocean Radiation Plume

Next Steps

As the Indian tribal chief Black Elk said, “It is the story of all life that is holy and is good to tell, and of us two-leggeds sharing in it with the four leggeds and the wings of the air and all the green things. For these are the children of one Mother and their father is spirit.”

Thus the indigenous peoples of the world have lived in a relationship of mutual cooperation with Space Ship Earth for millennia understanding the need to live in balance and harmony with her. The truth is that modern man knows very little about the natural order of things due to his total absence of connectedness and therefore is in dire need of reestablishing a relationship with his natural environment and reconnecting with life at all points and junctions wherever possible. To make the needed transition from where we are to a rejuvenated, just and healthy world we will need to understand ourselves as biologically integrated spiritual beings which are at one with the diversity of all life in all of its many forms and quantum levels of being. Once this is realized and we are able to see that there is unity and interdependence at all levels then we will come to know nature as forgiving, generous and resilient not, “red of tooth and claw”, as many of us wrongly believe.

With this perspective and sense of reverence reestablished a new covenant with nature will be possible, for it will be through restoring our earth that we each shall be able to heal and restore our spirit and natural state of health and in so doing our link with creation. Thus we say, “Heal the Planet and Healed Planet Heals You”. Native American peoples offer

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

a humble prayer for the life of the world saying; “All My Relations” this elegant phrase highlights our kinship with all of life and is expressed in innumerable indigenous languages from around the world.

From Hermetic Scripture comes another very telling story which was shared with Asclepius directly from Hermes also known as the God Mercury “The Messenger” of the Roman Era. In this short Lament Hermes describes in great detail and with astonishing accuracy what we are witnessing on a global scale today. When I first read this account of the future I was amazed and I am quite certain that you will be also;

The Lament of Hermes

“Do you know, Asclepius, that Egypt is an image of Heaven, or to speak more exactly, in Egypt all the operations of the powers which rule and work in Heaven are present in the Earth below? In fact it should be said that the whole Cosmos dwells in this our land as in a sanctuary.

And yet, since it is fitting that wise men should have knowledge of all events before they come to pass, you must not be left in ignorance of what I will now tell you.

There will come a time when it will have been in vain that Egyptians have honored the Godhead with heartfelt piety and service; and all our holy worship will be fruitless and ineffectual.

The gods will return from earth to heaven; Egypt will be forsaken, and the land which was once the home of religion will be left desolate, bereft of the presence of its deities.

O Egypt, Egypt, of thy religion nothing will remain but an empty tale, which thine own children in time to come will not believe; nothing will be left but graven words, and only the stones will tell of thy piety.

And in that day men will be weary of life, and they will cease to think the universe worthy of reverent wonder and worship.

They will no longer love this world around us, this incomparable work of God, this glorious structure which he has built, this sum of good made up of many diverse forms, this instrument whereby the will of God operates in that which he has made, ungrudgingly favoring man’s welfare; this combination and accumulation of all the manifold things that call forth the veneration, praise, and love of the beholder.

Darkness will be preferred to light, and death will be thought more profitable than life; no one will raise his eyes to heaven; the pious will be deemed insane, the impious wise; the madman will be thought a brave man, and the wicked will be esteemed as good.

As for the soul, and the belief that it is immortal by nature, or may hope to attain to immortality, as I have taught you, – all this they will mock, and even persuade themselves that it is false.

No word of reverence or piety, no utterance worthy of heaven, will be heard or believed.

And so the gods will depart from mankind, – a grievous thing! – and only evil angels will remain, who will mingle with men, and drive the poor wretches into all manner of reckless crime, into wars, and robberies, and frauds, and all things hostile to the nature of the soul.

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

Then will the earth tremble, and the sea bear no ships; heaven will not support the stars in their orbits, all voices of the gods will be forced into silence; the fruits of the Earth will rot; the soil will turn barren, and the very air will sicken with sullen stagnation; all things will be disordered and awry, all good will disappear.

But when all this has befallen, Asclepius, then God the Creator of all things will look on that which has come to pass, and will stop the disorder by the counterforce of his will, which is the good. He will call back to the right path those who have gone astray; he will cleanse the world of evil, washing it away with floods, burning it out with the fiercest fire, and expelling it with war and pestilence.

And thus he will bring back his world to its former aspect, so that the Cosmos will once more be deemed worthy of worship and wondering reverence, and God, the maker and maintainer of the Mighty Fabric, will be adored by the men of that day with continuous songs of praise and blessing.

Such is the new birth of the Cosmos; it is a making again of all things good, a holy and awe-inspiring restoration of all nature; and it is wrought inside the process of Time by the eternal Will of the Creator.”

“If these words resonate within your being you are ready and qualified to take up the daily morning and evening discipline of Agnihotra which will restore and rejuvenate the Earth and your connection to it.”

There is neither time nor reason to wait for the dragging heels of business as usual. As you will learn in the following pages we can all begin to make a tangible and lasting difference in our personal lives as well as in the world at large simply by following the wisdom of the past as given in the Vedas. Vedas is an ancient storehouse of knowledge and wisdom which, “We”, can no longer afford to ignore. To do so is to invite peril and close the door on the future of restorative change in the world. The historian knows that to ignore the past is to be doomed to repeat it. Thus we would be wise to take what we can from this ancient storehouse of wisdom and remember that it holds the key for tomorrow and all that it promises today as well as for future generations of yet unborn children.

The Problem Stated

Whether we like to admit it or not we have been delivered into the jaws of certain death by the technologies which we employ daily. The modern conveniences of this brave new world may have reduced the drudgery of old tasks only to land us into deeper and more immediate dangers both to our health and to the natural systems of our environment which are vital to the maintenance and sustenance of life on our planet. .

“What does it profit a man to gain the whole world but lose his soul?”

The following are just a few of the symptoms of the underlying causes and thus forms a growing body of evidence which exposes man’s role in the destruction of the environment and the resulting inability to grow healthy food, drink clean water and breath fresh air.

As the *Earth’s* climate changes and as the natural environment chokes with many kinds and types of pollution as a direct result of war, industrial pollution of countless kinds and unbridled consumerism (not CO2 that naturally occurring gas that plants breath), we humans already have seen firsthand what sort of organisms nature can and will suddenly unleash to

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

confront us. They're beginning to show themselves as mutated insect pests and new strains of deadly bacteria, viruses and algae particularly toxic to humans.. Furthermore our technologies produce a plethora of heavy metal recombinants that are extremely harmful and toxic to the environment and our health. Deadly Nuclear Radiation leaking from more than 80% of the world's reactors poses unspeakable problems for the whole of humanity for thousands of years into the future.

These multiple symptoms of disastrous proportions appear to be converging from every direction at these critical cross roads in our history. I can think of seventeen (17) vitally crucial challenges facing the continuance of sustainable life on our planet and I am sure that if you give it some thought you can find many more as well;

Albert Einstein once said, "When the bees die man has four years."

1) The death of food pollinators (the honey bee colony collapse disorder, A mysterious malady that has been killing honeybees en masse for several years appears to have expanded drastically in the last year, commercial beekeepers say, wiping out 40 percent or even 50 percent of the hives needed to pollinate many of the nation's fruits and vegetables.) **New York Times**

Scientists have been trying to discover why millions of beehives have collapsed and died during the past six years. The reason for the phenomenon - known as Colony Collapse Disorder - according to a new study, may be much more complex and disconcerting. Dozens of different types of chemicals may be combining to wreak havoc on the pollen that the bees collect for their hives.

2) Genetically modified crops pose a Global Threat to all life. (This pervasive corporate rush to profit at any cost places all of humanity at risk, as the industry barrels ahead without even questioning the consequences of their technology. Industry leaders have failed to slow down long enough to even ponder the long-term consequences of irreversibly manipulating the DNA of your food. And what independent researchers are finding in this regard is truly disturbing and is probably just the tip of the iceberg in this genetics experiment of unprecedented scale.)

<http://articles.mercola.com/sites/articles/archive/2013/01/12/ge-crops-affect-soil-fertility.aspx>

3) Loss of top soils due to acid/alkaline rain (a result of carbon emissions and massive chemical spaying in the upper atmosphere) Pure water has a pH of 7 and normal rainwater has a pH around 5.6. In 2000 the most acidic rain that fell in the United States had a pH of 4.3

4) Ocean acidification..(Scientific awareness of ocean acidification is relatively recent, and researchers are just beginning to study its effects on marine ecosystems. But all signs indicate that unless humans are able to control and eventually eliminate our fossil fuel emissions, ocean organisms will find themselves under increasing pressure to adapt to their habitat's changing chemistry or perish. **National Geographic**

5) End of the peak oil era (meaning the oil will now be more difficult to squeeze out of the earth, enter Fracking) Fracking is short for hydraulic fracturing. It's a water-intensive process where millions of gallons of fluid – typically water, sand, and chemicals, including ones known to cause cancer – are injected underground at high pressure to fracture the rock surrounding an oil or gas well. This releases extra oil and gas from the rock, so it can flow into the well.

<http://www.foodandwaterwatch.org>

6) Climate change due to global warming and desalinization of the oceans

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

7) Earth shifts; (Increased melting of the Greenland Ice Sheet and other ice losses worldwide have helped to move the North Pole several centimeters east each year since 2005) **Scientific American**

8) Deterioration of Earth's magnetic field. (Earth's magnetic field is fading. Today it is about 10 percent weaker than it was when German mathematician Carl Friedrich Gauss started keeping tabs on it in 1845, scientists say.) **National Geographic**

9) The end of fossil water supplies (We live in a watery world, with the average American lifestyle fueled by nearly 2,000 gallons of H₂O a day. Nearly 95 percent of your water footprint is hidden in the food you eat, energy you use, products you buy, and services you rely on.) **National Geographic**

10) Massive chemical contamination of everything downstream and in the ground water (including psycho-active drugs, heavy metals and fluoride) Waste from agricultural livestock operations has been a long-standing concern with respect to contamination of water resources, particularly in terms of nutrient pollution. However, the recent growth of concentrated animal feeding operations (CAFOs) presents a greater risk to water quality because of both the increased volume of waste and to contaminants that may be present (e.g., antibiotics and other veterinary drugs) that may have both environmental and public health importance. Based on available data, generally accepted livestock waste management practices do not adequately or effectively protect water resources from contamination with excessive nutrients, microbial pathogens, and pharmaceuticals present in the waste. **Environ Health Perspectives. 2007 February**

11) Global financial collapse (enough for everyone's need not everyone's greed) behind the scenes at the root cause of all our biggest problems is the geo-political rush to consolidate power and wealth in the hands of a select few)

12) Threat of nuclear war (not the biggest threat but as a fear tactic and diversion it keeps us all focused on side issues)

13) Pandemic outbreaks (Big Pharma and the Medical Industrial Complex) unfortunately it is very profitable for the drug industry to get the medical profession to promote vaccines to the general population. Drug companies are corporations and they do not have a duty to "do no harm". Their only duty is to make money and "mitigate" any liability the company might be forced to deal with in a court of law. It is important the public doesn't forget this as it is very unlikely your physician or anyone who works for public health will remind you of this reality.

<https://forohioans.wikispaces.com/Corruption>

14) Global crop failures due to ecological disaster and weather pattern changes

15) Global loss of plant and animal diversity as a result environmental degradation and destruction. (Clearing habitats for agriculture is the principal cause of habitat destruction.) **<http://en.wikipedia.org>**

16) Radiation leaking from Nuclear Power Plants (There are now over 430 commercial nuclear power reactors operating in 31 countries, with 372,000 MWe of total capacity.) source **<http://www.world-nuclear.org>** Fukushima underscores this threat and the ongoing potential for destruction of calamitous proportions.

Last but certainly not least;

17) The predominance of meat as a dietary source of nutrition and the contaminate effects of an industry which treats animals as a commodity to be fattened and sold without regards to the consequences to the environment or mental and physical health of the people who consume their flesh. (Water required to produce one pound (1 lb.) of: beef = 2000

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

gallons, Pork = 576 gallons of water, Chicken = 468 gallons of water, Soybeans = 206 gallons of water, Wheat = 138 gallons of water, Corn = 108 gallons of water.) <http://gracellinks.org>

The important thing to remember is that all of this is a result of man's collective actions and/or inactions and it is therefore of our own making. As a result it will require our undoing and our collective corrective action to turn about back to a path of sanity which will in course of time will restore and rejuvenate our planetary eco systems, resources and our lost state of health which is the only real foundational wealth we can have and enjoy. How much time, will be determined by our willingness to change our habits, reestablish new priorities and work towards integrating the solutions together as the unified body of humanity.

Of all our many problems one of the most disempowering of them all, as I see it, is that we really don't believe that we can make a difference or have an impact on our future at a macro level and thus we feel powerless to begin to take even the first steps towards improving our lot. We also feel incorrectly so that no matter what we do there is little or nothing we can do which can hold back the tide of this overwhelming degenerative trend.

Is it possible that this perception is really true?

The answer is absolutely NOT and emphatically NO!

What the Scientists are saying, although true, is not the whole story and there is still time to avert total destruction of our planetary systems and our species. The prevailing knowledge today unfortunately does not take into account the Ancient Vedic knowledge which we are talking about and introducing in this book. Nonetheless we are including this section to emphasize just how far we have gone down the road to self-annihilation. There is a wealth of help awaiting us. All we need to do is ask and it shall be given.

What are the scientists saying?

Even if we stopped all electric production, factories and automobile use worldwide we still have damaged to such an extent our planetary eco-systems that we cannot avert the inevitable destruction of our planet and our way of life as we know it. At this time the proverbial Dooms Day clock is reading 5 minutes after 12 midnight and we are all living on borrowed time. This is what the scientists in all countries are saying now as of 2013. There is no dispute of these facts and it is no longer open for debate. Man has done irreparable damage to our planet and we are all, each and every one of us, too some extent either by acts of omission or acts of commission responsible for this taking place.

Another glaring example can be seen in the health care sector. Despite advancements in medical science there is now more disease and even new diseases which defy modern medical treatments. These new modern plagues are cropping up in the news with greater and greater frequency. Anti-biotic once our miracle "cure all" are no longer effective as they once were because we are consuming vast quantities of these antibiotics in the treated and processed meat and dairy products we are consuming and therefore our bodies along with the micro-organisms we intend to kill have slowly over the course of many years now become immune to them. Interestingly, this mirrors what has happened on a larger scale within our agricultural sector worldwide and is a direct result of the unrestricted and indiscriminate use of insecticides, herbicides and chemical fertilizers. Is this starting to ring a bell?

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

This reflects how modern man in his role as a consumer in a throwaway society acts and functions very much like pathogenic organisms that kill their host, the behavior is predictable: multiply without regard for any limits to growth, consume senselessly and excrete levels of waste that grievously harms the host. When this is translated into human terms, it rings with a disquieting familiarity, especially when we equate human success with growth, consumption and material wealth. Geo-Political Agendas, Monetary Policies, Corporate Irresponsibility, coupled with an almost complete disregard for our natural systems, seem to be the underlying cause of all these problems.

Cancer and Degenerative Disease is a Business

It follows therefore, unfortunately, despite billions of dollars spent on finding a cure for cancer, for example, still little or no progress in this regard is evident after more than 60 years of research and billions in grant money awarded internationally. Why? I believe if we are honest with ourselves it is easily understood. There is no money and thus no future in finding a solution to this dreadful disease. With a solution comes the end to the research and all the grant money not to mention the disease itself which earns many times more money than all the research grants combined. Even many of the cancer treatments and diagnostics we employ cause cancer. Just take a look at a few of the institutions which have been established for the single and sole purpose of finding a cure for cancer.

Stress related and mental illnesses are also increasing as evidenced by drug and alcohol abuse as well as addictions of all kinds which are pandemic now affecting the entire population of our planet. As a result the economies of nations are being negatively impacted. The stresses of today's world are causing people to self-medicate as they search for relief through drugs and alcohol abuse. Even food is an addiction now as evidenced by a growing obesity problem which is increasing at an alarming rate. As a direct result of these various addictions and the corresponding health problems which issue from them combined with corporate greed in the U.S health care costs are skyrocketing and there seems to be no end in sight.

In 2008 alone there was a 200% increase in the incidence of autism in our children. 2013 Rates of all forms of autism in the U.S. may be substantially higher than previously estimated, according to a new government report that found that 1 out of every 50 school-age children – roughly one on every school bus – has the condition. The cause is most likely due to vaccines and heavy metals we are told. It appears that young normally healthy people are dying at younger and younger ages from diseases they never use to get. Why?

It is now a well-documented fact that there is no place on earth which is untouched by the dastardly and destructive effects of pollution of the air, water and soil. Even at the top of Mt. Everest toxic pollution can be found and measured. It is even becoming more and more difficult to find clean beaches upon which to relax and take a swim.

Now more so than ever before the food supply is toxic and becoming more and more dangerous to consume with each succeeding year. This is a direct result of fertilizers and pesticides which are being used in higher and higher amounts needed to achieve the desired results even as the nutritional and mineral content of our food crops have decreased. In Europe it is well documented that all of the food is radioactive and is dangerous to consume as a direct result of the nuclear power plant accident at Chernobyl, USSR in 1987.

Despite more comprehensive measures to reduce pollution governments worldwide are seemingly unable to turn the tide as we are educated and indoctrinated to accept that economic conditions require that we continue to ignore the environmental realities which threaten our very existence as a species. Carbon credits, a much touted solution, despite being an interesting idea on the surface are doomed to fail because in the end no nation or multinational business will make the necessary sacrifices or compromises to make it a real solution particularly when all they need to do is pay into a carbon credit fund to be administered by, guess who? What it really represents in the authors opinion is yet another way to make us all pay for the sins of the few major contributors to the wholesale pollution of our planet. Therefore in my opinion it is Human nature itself that must change before any such system of taxation or Cap and Trade system will work. How and why can this be when so much hangs in the balance even to include our very lives and the lives of future generations? If these primal considerations are not sufficient then taxes will of themselves also not accomplish their intended goals and will in fact further destabilize economies in favor of the wealthy and corporate elite.

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

Further complicating matters with the nations of India and China coming into their own as “super economies” more fossil fuels worldwide will be consumed in the next 10 years than were consumed over the previous 30 by all the nations of our planet. As a result acid and alkaline rains will increase in potency threatening the 7 inches of the world’s top soil upon which we rely to grow our foods. Our soil is already at a critical stage as the microorganisms are rapidly dying and next in line is the earth worm and together with the honey bee which constitute the farmer’s most important allies in the production of food crops. (<http://environment.nationalgeographic.com>)

The Solution

Where will it all end? I think it is plain and clear that the major cause of our rapid and precipitous decline is a direct result of unbridled greed combined with collusion between multinational business interests and corruption at all levels of government in virtually all the nations of our world with the exception of perhaps only one, that being Bhutan, which recently declared that it would adopt a 100% Organic Food production policy.

This having been said Multi-Nationals and our elected public servants didn’t do this without our complicity and consent and at this late date they won’t stop until we stop it for them by no longer dancing to their tune by supporting their power base. The tune to which we have been dancing is perpetuated by a paid for media which over the last 20 years has been consolidated into 5 major global networks all of which are controlled by the global business monopolies, political cronies and secret societies. The new directives which emanate from these business cabals has resulted in a new media which has abnegated its role as the fourth check and balance to unbridled tyranny in the world. As in the days of Watergate, for those of you who were alive at that time, the proof can be easily uncovered by following the money. Today we have no such media watchdog and on the contrary we have a complicit and immune media which serves to perpetuate the lies and half-

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

truths of their masters at great expense and peril to us all.

The solution therefore requires a total shift in our attitude so as to change our buying habits including which companies we purchase from, which media we listen to, how we use and prioritize our time and thus what we do within our own daily lives at every level. These decisions, which we have complete control over, are perhaps the fastest way to affect real and meaningful change for the better in our world.

Several ways which we can begin to assist this long overdue and much needed change is to become re-empowered to take back responsibility for our own lives no longer being content to let the government, business or so called “professionals make our decisions for us and thus taking back control of our own destiny. One really great way to begin to do this is to start today at home. There is a science based process which comes to us from the Vedas which if done properly in the prescribed way will help us to take these important first steps towards restoration and rejuvenation of our environment as well as our personal and spiritual lives thus reinvigorating our critical thinking faculties and in so doing leading to better decisions and thus better outcomes. That process as mentioned throughout this book is called Agnihotra and it is being practiced all over the world by literally thousands of people from every nation on the planet.

Agnihotra is a simple process of atmospheric purification which works together with and in cooperation with nature. It is performed at sunrise and sunset daily which I will explain in greater detail later in the book exactly how it works and why it is so needed on our planet at this time.

This powerful and effective solution has been practiced and validated over the period of the last 40 years on every continent to be very effective as a broad based solution to many of today’s biggest problems including addictions of all kinds such as drugs, Tabaco and alcohol, food, sex, chronic compulsive disorder, and chronic fatigue syndrome as well as many others. If that is not enough it has also been discovered to be a very effective means of treating some of today’s most troublesome chronic and acute physical diseases and conditions.

But perhaps the most important benefits it offers is in mitigating the harmful effects of nuclear radiation, rejuvenating the soil, air and water resources of our planet, as these, combined with stress, are the major root causes of most all of our disease today. Very soon, as a result of the worldwide success of this scientific process, this knowledge will be openly discussed by governments as they frantically search for ways to save their nations from total economic collapse and the erosion of their precious tax bases (which is the source of their power). Due to skyrocketing health care costs, massive crop failures and a generally depressed business environment, soon we will see the outlawing of pesticides and fertilizers as well as GMO crops (at the time of the first edition of this book in 2008 this was not the case) which threaten our entire agricultural system of food production and thus our very ability to produce abundant and healthy food for the worlds need.

Most all of these changes have occurred within the last 70 years since the end of World War Two. The war machine which provided the weapons and technology of destruction needed to make a shift from a war time economy to a peace time economy yet it still employed its terribly flawed models devoid of any ethical code or global responsibility. These facts must be acknowledged and understood or we may well be the generations that finally succeed in destroying all life upon our Space Ship Earth. Surely if we continue to do nothing I am afraid that we will suffer such intense regret as has never been experienced in all of recorded history. So let it not be regret but satisfaction and success that we feel when we

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

look back on our lives hopefully many years from now and know we did what needed to be done. Let us take the available solutions in hand and work every day to redeem and rejuvenate our natural systems for it is our home and our lives and our children's futures which hang in the balance.

The future generations will thank us and remember us as the bio-neers that broke ranks and set the world free from tyranny and corruption by taking back our personal power and evolving beyond our petty differences, prejudices and idiosyncrasies to become a unified field of humanity despite all prompting and influence to the contrary. It is also vitally important to note that according to systems analysis if the square root of 1% of the population of the world were to focus their attention on solving a problem it could be done in a short period of time.

Ancient Wisdom, which we shall come to know, is the means whereby we can find our way back to sanity and to a renewed reverence for ourselves and our planet.

Agnihotra is not dependent upon religious belief or faith in a supreme being. It works just as the law of gravity works as a part of the universe of laws which are operating in our world.

Therefore it is not the purpose or intension of this book to convince or convert anyone to a new religion or philosophy. Although the Vedas do discuss these subjects whether or not you believe in God or a supreme intelligence is a personal matter and is immaterial as these techniques work regardless and they are totally scientific in nature and founded upon scientific principle which has been shown to operate very effectively according to natural laws of which modern science knows very little or is unwilling to acknowledge at this time. Nonetheless this knowledge is beginning to slowly be recognized, accepted and utilized by people in all walks of life in every continent of our planet.

The result of the daily performance of Agnihotra has a neutralizing effect on pollution and provides relief from the tremendous tension which this growing toxic burden places upon us all physically and mentally as well as on our delicate eco systems throughout the globe. When we think more clearly we are able to make better decisions which further frees us from the out of control spiral of negatively impacting convergence we are witnessing today.

It is through these ancient scientific processes which we will find a solution to our most pressing problems and challenges of today's world. Clearly technology, "the handmaiden of materialism", has betrayed us, therefore we must look to nature and the natural meta sciences and practices which can be used by the common man wherever he may reside using materials and implements which are readily available and easy to source locally most anywhere in the world.

Albert Einstein said, "When the solution is simple and within the reach of the common man therein lays Gods hand"

How does Agnihotra work and how is it performed?

Agnihotra is performed at the precise moment of sunrise and sunset and the timing is crucial to the results which we are

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

seeking. If Agnihotra timings are missed then it is no longer Agnihotra and it will not provide the same benefits as when it is performed at the precise and correct times. Also vitally important is that the materials used be pure in terms of their origin, methods of collection and other important factors which I will embellish upon later in the book. The materials used are cow dung, cow's ghee and whole grain unpolished rice. These materials are burned in a seamless copper pyramid of prescribed size and shape at the precise times of sunrise and sunset. Agnihotra is accompanied by the performance of a word/sound combination which is spoken/sung at the precise moment of either sunrise or sunset at which time the rice is offered as an oblation to the fire which consumes the ingredients and thrusts them into the atmosphere where they have a very powerful and beneficial effect upon the entire biosphere in the vicinity where we are performing Agnihotra.

Because mind and atmosphere are linked this benefit is transposed to the realm of mind where it's many benefits may be felt by the practitioner in the form of relaxation from stress and a healing effect is also induced which ever so delicately changes the individual to become a more conscience and compassionate human being. Something which I am sure you will agree we need many more of. As previously stated the specific procedures for the correct performance of Agnihotra will be explained in greater detail at the end of the book with references to websites and other sources from which to draw direction, assistance and support. The total combined effect of the correct performance of Agnihotra culminates into a powerful purificatory effect upon the atmosphere and thus upon the individual that is performing the process.

According to this ancient knowledge at sunrise and sunset the Qi or Prana (life force) which emanates from our sun extends all the way to the earth at those coordinates where the sun is said to rise. I say, "Said to rise", because in truth the sun is always rising and setting somewhere in the world. In fact it is setting and rising simultaneously at this very moment.

Performance of Agnihotra allows us to capture these energies and vitality which are drawn to the copper pyramid and magnified. It then thrusts these healing and revitalizing energies including micro-nutrients into the environment on an enormous scale enabling nature to heal itself.

The ash which results from this fire process has an extraordinary power to heal the soil, plants and humans which has been well documented throughout the world where Agnihotra has been practiced daily for many years. In the book entitled the Secret Life of Plants the authors Peter Tompkins and Christopher Bird share their experience of Agnihotra and the results they have witnessed.

An analysis of the Agnihotra ash by NASA (National Aeronautical and Space Administration, Monsanto Corp. and the government of Brazil S.A. have each independently confirmed that the ash contains all 92 elements and trace minerals essential for life. These 92 trace minerals and elements are also in what conventional wisdom considers to be perfect proportion for use by man, animals and plants to maintain optimal health and energy levels. It should be pointed out here that only the ash which comes from a properly performed Agnihotra fire will contain this same 92 trace elements and minerals as described. If the performance is conducted in any other way the same results will not be achieved. This is, according to scientific method, is proof positive that this process of Agnihotra is in fact founded upon scientific principle and method.

As I have referenced before in this book, Einstein once said that when the honey bees die man will follow in only 4 years. We are in those times now. At Tapovan Homa Farm in Parola, India <http://tapovan.co.in> where Agnihotra has been

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

practiced daily for many years there are more than one hundred active natural bee hives within a thirty acre area which are thriving and producing vast quantities of honey and other bees products. These are nature's pollinators making it possible for increased production of fruits and flowering plants within a 26 kilometer range their nests.

Homa Organic Farming is a method which incorporates these scientific processes and will be the future of food production if we are to survive in the 21st Century. Folk remedies which are made using the ash are effective in treating many common and some not so common ailments. Both internal and external symptoms can be successfully addressed using the ash in combination with ghee (clarified butter) and water or both as can evidenced by hundreds if not thousands of testimonials from around the world.

When Agnihotra is practiced twice daily consistently and properly for 3 months a protective bio dome is created which extends upwards 12 kilometers above the location where Agnihotra is performed and 2/3 of a kilometer in diameter on the ground which acts as a buffer to pollution and allows for nature to come back into balance within its boundaries.

In Conclusion

AGNIHOTRA IS A PROCESS WHICH IF WE BEGIN DOING TODAY WE CAN TURN IT ALL AROUND AND SLOWLY RESET THE ENERGY CYCLE OF OUR PLANET.

As previously stated the Ancient Science of Homa Therapy comes to us from the most ancient body of knowledge called Vedas. Vedas which is written in the Sanskrit language predates all of the modern bodies of knowledge by many thousands of years and therefore may hold answers which have yet to be discovered by the scientists of today. We know today for example that the earth and other planets of our solar system revolve around the sun whereas it was not many years ago that most everyone believed otherwise.

It took the Roman Church 500 years to acknowledge this mistake in judgment which lead to the execution of many innocent messengers of truth. Do we have another 500 years to admit our wrong doing to this planet and begin a long overdue change of course?

Those who rightly said that the earth was round and revolved around the sun were thought to be fools and often paid with their lives for voicing their contrary and controversial opinions. Today of course we know that this was due to mass ignorance of the truth and lack of scientific thinking. Yet still today we find ourselves in very much the same predicament. Most people believe that modern technology, "the handmaiden of materialism", will find a way to solve the world's problems but how, I ask, can we rely upon the very technology which landed us in error to extricate us from the same? Can we really afford to wait until modern technology finds a solution to the problems it has, with our help, actually created? I think not!

The scientists are saying that the time to act is passed now and that we do not have any time left as now nature begins to take back control of her own affairs with little thought to mankind in the balance. Of this there should be no doubt as one can see daily how the earth is in rebellion by simply reading the news. The natural balance must be restored and so shall it be.

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

Remembering that Albert Einstein also said, “When the solution is simple and within the reach of the common man therein lays Gods hand”. Let us remember that Albert Einstein was a brilliant physicist whose theories paved the way to a greater understanding of our universe and of course the nuclear revolution was made possible through his formula $E=MC$ squared. This was just the beginning of what will be learned. In the years to come there is much that remains to be discovered and today many of the physicists are veering in the direction of Ancient wisdom known as Vedas.

One reason for this is that this body of knowledge actually made it possible for man to accomplish one of his greatest crowning achievements to date; that being the act of successfully sending humans to the Moon and back safely to Earth. How you may ask? The Vedas tell us that cow dung, one of the ingredients used in the performance of Agnihotra, is a very special substance with wonderful and almost magical qualities. One of those qualities is the ability to stop harmful radiation much more effectively pound for pound than even lead. This is how it was possible for NASA to send men and women into space safely. NASA today also tells us, that not only have they discovered that the Vedas may hold the answers to some of today’s greatest mysteries but that the Sanskrit language itself, the language of the Vedas, is the only language on our planet which is most suited for use in creating an interface with an Artificial Intelligence computer software solution. So we can see that there is much more than meets the eye to this ancient super science founded in the Vedic wisdom.

Several of the more illustrative examples of just how effective this ancient wisdom is, can be found in two of the most disastrous manmade accidents of our recent history. One was the cyanide gas leak at Union Carbide at Bhopal, India which took the lives of more than 30,000 innocents and another was the Nuclear Power Plant disaster at Chernobyl, Soviet Union. Both of these took place in the mid-eighties and hundreds of thousands are still living in the wake of their devastating effects even to this day. I asked for and was given permission by the subjects of these two stories herein used. In both cases I was personally present during one of the many times these stories were told.

In the first story we are set in Austria hours after the nuclear accident was discovered at Chernobyl and the warnings were going out.

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

The following was excerpted from <http://agnihotra.org/content/agnihotra-and-radioactivity> March 18, 2011

In light of the nuclear power plant /radiation issues unfolding in Japan, we have received numerous requests for information on Agnihotra and radioactivity.

I. Following are some quotes from Homa Therapy, Our Last Chance by Vasant V. Paranjpe:

Chapter 3—More About Agnihotra Homa

"When Agnihotra is performed, the Agnihotra smoke gathers particles of harmful radiation in the atmosphere and on a very subtle level, neutralizes their radioactive effect. Nothing is destroyed, merely changed."

"Agnihotra ash totally solves the radiation problem. Even more so Agnihotra negates its effect. Agnihotra neutralizes harmful radiation and cleanses the planet."

Chapter 4--Yajnya, the Great Material Aid

"When radioactive particles and poisonous gases are released from the earth's core, our only protection is YAJNYA."

Chapter 10--Let Science and Government Be Warned

"...we would like to remind you that around Chernobyl, site of the nuclear power plant accident, the insects have not died. They have become radioactive. They will multiply and create havoc. There is no way to stop them except Agnihotra Homa Therapy. Scientists please examine carefully what we are telling you. We would also like to state that due to seepage of radiation, people near Chernobyl will get sores on the body that begin to ooze. This will create panic. Much pressure will be put on scientists and the medical profession to come up with solutions. They have no way out but to come to us. We will offer our services with humility and Love. Here again Agnihotra and Agnihotra ash healing will work."

II. Homa Farming Experience with Radioactivity

The following article is from <http://himalayahomahealing.blogspot.com>.

Friday, April 10, 2009 EUROPEANS BEWARE

By Ms. Karin Heschl kasardevi8@yahoo.com

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

When the Chernobyl nuclear accident happened in 1986, I had a farm near Graz in Austria. The Austrian Government immediately issued that every farmer had to bring in milk and fodder for testing for radioactivity. When I did this, the inspectors were shocked, because they found only normal radioactivity levels in our milk and fodder samples while all the farmers in the surrounding area had high doses in their samples. The inspectors said it was not possible to have normal radioactivity after Chernobyl and is there anything special that I do on my farm?

I told them that my farm was using ancient Ayurveda technology to grow food which is now presented as HOMA Organic Farming Technology.

“We do a small fire in small copper pyramid exactly at the moments of Sunrise/sunset. Materials burnt are dried cow dung cake pieces a little clarified butter from cows and a few grains of raw rice. This is called Agnihotra Homa. Also we do another Homa, repeating one mantra and adding a drop of clarified butter to the fire after the mantra for four hours daily. On full moon and new moon days we take turns to maintain the second HOMA for twenty four hours. According to Ayurveda by this method we inject nutrition in to the atmosphere. This affects the plant, soil and subsoil water.”

However, the inspectors were not interested in doing further research.

For a scientist, normally one such experience will be enough to motivate him to do further research.

This Ayurvedic farming method was tested on 1200 hectares of land in the Amazon region of the Republic of Peru by the agronomical engineers connected with the office of the President of Peru. This observation lasted seven months and covered all crops grown in the area.

The results were fantastic:

(see separate report)

- Greater quantity per hectare
- Better quality i.e. taste, color, disease resistance, etc.
- Longer shelf life.
- Shorter harvesting time.
- Cost per hectare is much less

In ancient Ayurvedic teachings of farming it is stated that this type of set-up on a farm with ONE RESONANCE POINT CAN COVER BETWEEN 150 TO 200 ACRES OF CROPS.

This set-up totally negates the effects of radioactivity and related problems in humans, animals and plants.

My personal experience on my farm should act as an eye-opener for scientists to do further research.

This Ayurvedic technique was brought to the West by VASANT PARANJPE of INDIA who later came in contact with some ex-Soviet scientists for doing further research. After several years of research they came to the conclusion that AGNIHOTRA ASH IS THE SOLUTION TO COUNTER RADIOACTIVITY-RELATED DISEASES.

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

In Germany one pharmacist, Monika Koch, had rediscovered how to use this ash for treating various human physical and psychological maladies.

Insects, which became radioactive after Chernobyl, have not died out. Now they proliferate and spread disease everywhere. Now all food grown in Eastern, Central, and Western Europe has damaging doses of radioactivity. Even the medical tablets will have this radioactivity as the ex-Soviet scientists predicted soon after the year 2000.

Shree Vasant has been teaching HOMA Organic Farming and also HOMA Folk Medicines as rediscovered by Monika Koch in all continents with miraculous results. These teachings are FREE and also we are insisting that any medicines prepared from Agnihotra ash should ALWAYS BE GIVEN GRATIS and never should any money be charged.

It is now necessary to produce this ash in large quantities from Agnihotra pyramid fires using substances which HAVE NOT BECOME RADIOACTIVE. According to those ex-Soviet scientists, INDIA will be the right place to prepare this ash with proper disciplines mentioned in Ayurveda tradition. Then we can dispatch this valuable ash FREE to Europe.

Please refer to our website

www.homa1.com

III. Dr. Ulrich Berk, who has been active for many years in Agnihotra work in Eastern Europe, writes the following:

There was some report from Eastern Poland that after Chernobyl, Agnihotra and Tryambakam Homa helped to reduce the radiation level, but the mode of measurement was with a pendulum. The report was published in a Journal for Radiesthesie.

The only research in the sense of modern science done on that subject was by some physicists from Eastern Europe at the time of Soviet Union. The result was that Agnihotra ash is not radioactive (although the ingredients used to prepare the fires may be radioactive) and that all 92 natural chemical elements are present in Agnihotra ash.

After doing these studies, the scientists suggested that we all should eat Agnihotra ash before every meal. The reason, according to them, is that all food now is radioactive—that it has more radioactivity than the natural level of radioactivity on this planet before humans increased it in the last couple of decades. If we eat some Agnihotra ash, the body would absorb the micro-elements (such as iodine) from the ash which are not radioactive, and if later, in our food, we take in more iodine (which may be radioactive), the body would not incorporate these radioactive micro-elements, as its requirements for those would have already been fulfilled through the non-radioactive Agnihotra ash.

Alas, most of the data on this was lost in the wars which followed the breakdown of the Soviet Union, so we do not have any scientific documentation of these statements.

Also, it is not so easy to make some tests. A Geiger counter is by far too imprecise.

The following is an excerpt from the book *Secrets of the Soil* by Tompkins and Bird, p. 251:

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

"From Europe we received reports of a group of scientists in Rovinj, Yugoslavia, experimenting to establish just what Agnihotra does, and how. Their interest had been aroused by the discovery that after they burned the required ingredients in the copper pyramid their instruments failed to pick up radioactivity in the immediate area, an anomaly since the Chernobyl disaster, which irradiated, along with large parts of Europe, even their small Adriatic seaport in the province of Croatia. The Yugoslavs also learned that groups of subcontinent Indians living within the borderlands of the Soviet Union who used dried cow dung to seal their huts were unaffected by the radioactive contamination. Intrigued by these mysterious developments, the Soviets have invited one of the Yugoslav scientists, Mato Modric, a biochemist, to visit the Soviet Union to demonstrate the method of Agnihotra in the hope that it may be of value to its citizens.

"To check out this curious data we travelled to Rovinj. Mato Modric, an expert in electromagnetic fields, dowsing and geopathogenic zones, lives with his wife in a small house overlooking the harbour. Modric says he became involved in the Agnihotra phenomenon through his interest in pyramid energy. Trained in physics, he was particularly curious about the role of the special vessel made of copper and its specific ziggurat shape, a form related to the horn antennas used in high-frequency transmissions. What high frequency, he wondered, might be being amplified and broadcast by such an antenna to affect the human aura, its nadis, chakras or its kundalini? That the ash could produce disinfectant, anticoagulant and tissue-contracting effects on living matter, he said, was well established. And he said he believed the ash had pesticidal and fungicidal properties and that it might ultimately solve the problem of mineral deficiencies. It remained to be established what trace elements were in the ash, research into which was going on in such disparate places as Yugoslavia, Germany and U.S.A.

"Modric explained that he believed he was dealing with a complex that could potentially affect the whole environment, countering the toxins of modern technology developed over the last century by the industrial revolution, and that the process might have enormous implications for our very existence.

"He explained that the Agnihotra was energetically quite complex, involving at least three energetic aspects or field phenomena having to do with the fire and the ash, with radiation of an undefined nature and with ESP or psychism. We believe we can establish the fact of an electromagnetic radiation during Agnihotra. But we are in an area beyond what conventional science considers rational, into an area of informational transfer through intermolecular and interatomic

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

processes mediated by ultraviolet photons. It is logical to conclude that some kind of energetic mechanism is being activated which can be translated into physical meaning linked to concrete information systems that are as yet unknown, but connected to systems of resonance. We are in an area where it is not easy to prove anything. A lot of work will be necessary and it will depend upon cooperation of very many people.' "

IV. Following are some ideas and suggestions from Monika Koch, pharmacist, long-time Agnihotra teacher, and author of Homa Therapy, The Ancient Science of Healing:

Agnihotra – the Solution for Radioactivity

We hear about the situation in Japan with problems of radioactivity and are deeply concerned. But not only in Japan there are such problems. We know about many nuclear tests in Kazakhstan, the situation in Chernobyl as well as with other problematic nuclear situations worldwide, whether they are known to public or not; even many submarine boats are confronted with radioactive problems of their nuclear systems for energy, etc.

What can we do practically? What can I do?

Agnihotra, the healing pyramid-fire of Ayurveda, supports healing and balance on all levels, even when there are problems with radioactivity. The Agnihotra fire supports the basic healing of atmosphere as well as for all humans, animals, plant life and all nature at the place where it is performed. This healing is also locked in the ashes of the Agnihotra fire and is there like a medicinal substance with all qualities of the Agnihotra fire available for all and everything at all times. You can eat it, drink it, add it to your bathwater and bathe in it. You can add it to water and wash your clothes in it. You can make your own medicines, ointments for wounds, inhalations for the lungs, compresses, eye drops, etc. It has been proven to support healing, even when nothing else would provide any healing. You also can spray your food, plants land and riverside with Agnihotra ash for healing. Please find detailed explanations of how to perform Agnihotra and how to make use of your own Agnihotra ashes as folk-medicines, complete book-text and video free of charge on the website

www.homatherapy.de

Please find many experiences and results of healing worldwide on the website

www.terapiahoma.com

What else can we do, especially in the situation of high radioactivity? It has been proven to be very helpful to drink a lot of green tea always with a bit of Agnihotra ash in every cup of green tea. Additionally it helps when you use a lot of Miso mixed with Agnihotra ash. You can use this mixture for all your soups, vegetables, salads, grains, rice, etc., but also as a spread on your bread or just dissolved in water to drink. It is very helpful to use plenty of green tea and miso together with the Agnihotra ashes.

And what can you do in a situation of emergency, when you have no Agnihotra pyramid at hand, no Agnihotra ashes for help? Dr. Masaru Emoto of Japan has proven in all of his books that you can charge water with energies (please see his books). And when you have nothing at hand, only a pencil and a piece of paper, what can you do then? You just can write the words, “OM SHREE” and “AGNIHOTRA ASH” on the paper and then put everything that you drink, every glass of

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

water or tea, first on these words on the paper and let it set there as long as possible, so that the water can take over the energy of these words. Afterwards, when you drink it, all the cells of your body will get this healing information and can have support. Let all your drinking water and your food set on such words written on paper, overnight and also during the day, so that all your drinks and food can get this healing energy for your welfare.

Dr. Emoto is explaining how the energy of words can be transferred into water, and by drinking such water and washing your clothes with such water, feeding your pets and plants and gardens with it you can give great support, when performing Agnihotra or using Agnihotra ash is not possible.

And in case there is some situation of super-emergency, if you have no chance for Agnihotra or Agnihotra ashes, and if you even have no pencil and no paper to write on? Then you just can sing these words to give the healing energetic information to all that you drink and eat, to all your bodily cells and clothing, to all rain that might fall and to all snowflakes that might cover your body. Sing it again and again to all air, to all land and river and ocean, that everyone and everything can get this great energy of healing information, with all love of your heart, because everyone and everything needs this healing.

And what can you do for help, when you are at some place far away from such disaster? You can share such information with any friends or strangers in need, who stay in places of danger--by phone, by mail, by email, by thoughts, by the love of your heart. From at home, where you stay just now, you can choose to support some person, some family, some children, some healer, some yoga group or whoever with your communication, just as you would like to support some dear aunty overseas. You just can be in touch with whoever you decide to support. As we all are like brothers and sisters of the same family, and let us fill all spheres with love!

Fire & Water book

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

Ashes, collected after Agnihotra ceremonies conducted worldwide were examined in the Hado Life Europe laboratory. The results are published in the book 'Fire and Water'

Homa Therapy comes from the ancient most body of knowledge known to mankind, Veda. Veda means knowledge. Veda is given in Sanskrit language. Sanskrit is the mother of all indo german languages. Veda was given to mankind as blueprint a manual for prosperous, healthy and happy life on this planet. Veda is a storehouse of knowledge and provides solution to our modern world problems. For example it is stated thus: Agnihotra (see <http://www.homa1.com/>) the smallest form of Homa Fire totally solves the radiation problem. Studies conducted after the devastating Chernobyl accident 1986 by soviet scientist have revealed that even while burning contaminated ingredients during Agnihotra the resulting ashes have not had higher radioactivity. A lot of data has been collected by Prof. Miroslav Haber and his research members. This healing tool is important now to combat the radioactivity at Fulkushima, Japan. The healing power of the Agnihotra ashes have been documented recently by the Hado Laboratory of Dr. Masaro Emoto shown in water crystals photographs and published in the book "Fire and Water"(2011) by Aranda, Emoto and Vasant.

The book serves to help finance studies and education on Homa Therapy and also social activities in India to lift women out of poverty and give work and hope.

The other incident which took place in 1984 Bhopal, India to a friend whom I recently had the pleasure a meeting for the first time yet I have known of him for so many years since first hearing of the tragedy at Bhopal many years earlier. As of the initial writing of this book Dr. Aditya Arya was studying to become a doctor of Pharmacy in Malaysia and herein describes for us his experience so many years ago when so many lost their lives. He recounts the horror of seeing many die from the gases which were leaking in this letter which he sent to me in 2008.

In his own words,

Dear Mr. Robert,

A very fantastic and good morning to you with the essence of

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

Agnihotra.

Sorry, that I could not write my testimonial about Bhopal incidence on last Thursday, as I was quite busy doing some work.

In fact Agnihotra gave us a lot in our life, as we were the victims being present at the time of Gas tragedy on December 3, 1984 and are safe before you because of Agnihotra in our daily life.

Myself, Aditya Arya pursuing PhD, in Department of Pharmacology, at Faculty of Medicine in University of Malaya, Kuala Lumpur, Malaysia. At the time of Union Carbide Gas tragedy happened on December 3 1984, was really very sad moments in which I was there in Bhopal and was at the age of 5, living with my parents in Bhopal and my family, all my parents were regularly performing this Agnihotra and yajna, as Tryambakam, and Gayatri Mantra, so we found that by doing this not only we but the surrounding peoples also saved when the leak of the gas happened and save many lives near to us, but unfortunately many of the lives was passed, and I think if all or few might have done this Agnihotra by that time no loss of living being would be there, so we were only few just only 10 families were performing Agnihotra and saved many life too in this Bhopal Gas disaster. As due to this approximately more than 30,000 lives were passed, which is really a very sad story and life threatening moment as well.

This is about me who saved in this Tragedy and now speaking before you all, and regularly performing Agnihotra here also in Malaysia and enjoying the life with this true essence of nature cure which not only gives us inner strength but keeps us fit and enthusiastic and fresh forever and at the same time save the atmosphere from many calamities as global warming, and pollution.

Therefore, this is very short about myself and about, my experience and if you need some more information about myself and my family please do let me so that I can write and will be happy doing so.

Thanking you Mr. Robert...

Warm Regards,

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

Aditya Arya

Many people have ask me over the years of speaking with them, why if all this Ancient wisdom is so effective has not the government made use of it to verify it and then shared it with the rest of us?

I think that this is a fair question which deserves a carefully considered response. In my opinion there are two reasons and maybe many more which I have not considered. First and foremost is the fact that most politicians are afraid to take a controversial position no matter how effective it may be. Agnihotra is controversial because it steps on the toes of conventional thinking even if that thinking has been unable to offer a better solution or any solution at all for that matter. Also I think that it is fair to say that problems like the economy, disease, war, terrorism and now “global warming” are the meat and potatoes of politics. Without them we really have no need for governments or politicians and thus political leaders seek to accentuate the problems themselves even at the expense of finding effective solutions. Said another way, it is far less risky politically to point out the problems and instill fear into your constituents than it is to postulate meaningful and effective solutions which may also be controversial. This I believe is really at the core of our problem today. Our leaders lack the will and to be quite frank the leadership capabilities to stand up and speak to our real needs. It is much easier for them to listen to and cater to business interests than it is to address the dire problems we are all facing. The few politicians that have stood up and attempted to tell it like it really is have been assassinated and or defrocked of their power. Three examples are President John F. Kennedy and his brother Bobby and of course Martin Luther King who’s work was bringing people together so as to create unity not division and the subsequent lack of confusion that would create for humanity.

This, in my humble opinion, is sadly the way it is, therefore “We the People”, as Japanese, as Hawaiians, as Africans, as Arabs, as Jews, as Christians, as Buddhists, as Americans, as Chinese as spiritually free people everywhere must take back our personal power if we are to survive the coming years. We as sovereign and free people from all over the world with the power of Agnihotra can take back our freedom and heal the planet and ourselves for generations to come, with or without the blessings of our political leaders and masters.

You are why I wrote this book!

Before I learned about Agnihotra I was not aware of the Vedas or that they represented what may well be the most comprehensive storehouse of actionable knowledge we have to extricate ourselves from the jaws of certain death. I was like most others in that I was not well traveled I had read a handful of books but nothing that would prepare me for life in the 21st Century. Let’s face it, I was going nowhere fast. In truth if it weren’t for a real strange turn of fate I may never have been able to live the incredible live I have been shown. You see were if not for another’s choice to share some knowledge with me when I was at the young age of 17 I may never have come to learn all the wonderful truths that are a part of this life. To share my life with you is why I was born. I know this now and it is for this reason that I am writing this book.

The Transformative Power of Truth

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

Let's just assume for a moment that all the things which are said about Agnihotra and the Vedas are true. Could we afford to overlook such an astounding revelation of knowledge as is presented to us in the Vedas? The sheer magnitudes of this information first need to be fully appreciated before we can humble ourselves to a point where we can fully accept what is being given and then go on to take this magnificent gift and apply it in our daily lives. This accomplished we will come to find that the greatest gift is in the transformative aspects of its daily performance. Its effects on the minds of both man and animals can be seen and observed to result in what can only be described as total and complete transformation. This is my purpose in living and I invite each and every one of you to join me and see this through so that our children's children can have a place to call home and live a healthy and peace filled life for millennia to come.

“The sun has risen on a new era and now we must get off the fence and get in the game”.

Homa Farming our Last Chance

Agriculture is the fastest way to register change in our environment because agriculture the way it is practiced today is the single largest contributor to pollution of our entire planet. It is also a necessary human activity which is practiced virtually everywhere in the world.

The Homa Culture Position

The entire foundation upon which Homa Culture rests is a Vedic but also Buddhist concept known as Ahimsa or non-violence. The Holy Tapestry of Life is such that there is no life here that does not have a reason and a purpose to be here, thus there are no “good” or “bad” life forms as all have a valuable and important role to play. Let us also remember that what we have inherited in terms of an eco-system was many millions perhaps billions of years in the making. This ancient Eco System includes many participants the purpose of which is to select, evolve and assist in the evolutionary process and the process of natural selection. When the farmer endowed with free will, also a part of the eco system, makes a decision to eradicate one “pest” using poisons and other methods he is choosing to eliminate another workers food source. This food source, which is a requirement for what may be an important and “helpful” insect or other life form, like birds for example, should also be protected. This selective elimination of one pest is difficult to do without killing other “helpful” insects as well as other life forms i.e. microorganisms which are also very important on the Homa farm.

It is the position of Homa Culture that all of the eco system participants have a role to play in the grand design of life and thus it is best practice to allow all participants to be included. Exclusivity may or may not have a place in the society of men but it has no place in the natural order of things within an eco-system. Remember also that the strength of an eco-system lies within the richness of its bio diversity. The concept of Homa Culture allows for a wide range of possibilities as well as robust bio diversity so important and necessary to a healthy and resilient eco system. Most importantly however it allows for the tapestry of life to function at its most optimal level in a sustainable way that promotes the process of evolution and natural selection which is the goal and objective of all life.

The Homa Culturist must and ultimately will come to appreciate the grand design of things and embrace this inclusivity if are to make the most of what opportunities we have to improve our crops, our farming conditions, as well as the community we live in and have our life. Agnihotra is the simplest form of Homa Therapy but also is the core discipline of all other Homa Culture practices and techniques and provides us with a wealth of assistance not easily grasped at first glance.

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

Today as we all know the world is in a much stressed state. Rain fall is now toxic and in some cases carries within it the seeds of soil degradation in the form acids and even other toxins from the polluted conditions of our world. By daily performance of Agnihotra the Homa Culturist is benefited with a number of very valuable inputs. The first is that by regular and proper performance of daily Agnihotra the natural rhythms' of the farm are established to function within the time table of the local eco system as is determined by the cycles of the sun and moon. This rhythm when it is reestablished will provide numerous benefits to the eco system on the Homa farm as well as increasing the dynamic energy of the farm itself.

One benefit which comes after a period of three months of daily practice is that the rain which falls on the farm will be timely and nutritious and no longer will it have acid powerful enough to destroy the soil and the microorganisms which have their life within it. If this were the only benefit which Homa Therapy and Agnihotra provided it would be more than sufficient reason to incorporate it as this is a perhaps the most serious problem which must be solved if we are have a future on this planet.

The second is that the ash which is produced in the performance of Agnihotra has virtually all of the 92 elements and micro nutrients in perfect proportion which are needed to grow healthy and abundant crops. This has been confirmed by three independent studies one from NASA (The National Aeronautical and Space Administration of the U.S), another from Monsanto Corp., and a third from the Government of Brazil S.A. Another benefit that can be found within the ash itself is its ability to buffer the soil from the existence of acids already in the soil as the ash itself has a PH of 9.5.

Also another very important benefit of Agnihotra is its ability to make P205 (water soluble phosphorous) available to the crops without having to add it to the soil as an amendment in the form of super phosphate. This also reduces the cost of farming input and at the same time reduces the strain on the soil by eliminating the possibility of the buildup of mineral salts in the soil. It also should be mentioned that the manufacture of super phosphate is extremely polluting to our environment globally and consumes a great deal of fossil fuels in order to produce it. Therefore if we can eliminate this less than perfect farming input it would be extremely helpful to our planetary eco system as a whole.

Hydroponics/aquaponics can be adapted to work very well with Homa Culture using BioSol and Vermiculture to create a superbly effective completely organic nutrient solution which provides virtually all of the minerals and trace elements as well as a perfect balance of NPK for abundant and vigorous growth.

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

VermiCulture provides all the nutrients the soil needs to produce abundant crops and sustainable agriculture which does not damage the environment. In conjunction with BioSol and daily performance of Agnihotra this represents a complete farming solution.

Homa BioSol is a foliar feeding solution which also acts as an insect repellent and anti-fungus solution for the Organic Farmer. It is made from Agnihotra Ash, cow's urine, cow's dung and vermi-culture worm castings.

The following are some of the most compelling reasons for beginning daily performance of Agnihotra immediately;

- Agnihotra is a broad based solution to many if not all of the most challenging problems of our present times.
- It is easy to learn and perform in the privacy of one's own home.
- Its daily performance assures protection in times to come.
- It is healing to the atmosphere and is an extreme act of kindness towards nature.
- Agnihotra is a scientific process of environmental restoration and revival which is founded upon precise and scientific principles of which modern day science knows little.
- Agnihotra comes to us from the Ancient Knowledge revealed in the Vedas. Vedas are written in the Sanskrit language. This is perhaps the most sophisticated and scientific language on our planet. NASA scientists say that the Sanskrit language is the most suitable language for using in the creation of Artificial Intelligence software.

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

- Vedas possess an understanding of cosmology which exceeds that of modern day science.
- Modern sciences are in fact slowly veering in the direction of Vedic knowledge. Though science cannot explain why the quantum view is perhaps the most plausible nor can it prove it but neither has it been able disprove it.
- The proof that the process of Agnihotra is in fact scientific lies in the fact that the results will be consistent providing it is performed as prescribed. When this is done the ash which remains after the performance of Agnihotra is comprised of all 92 minerals and trace elements all in perfect proportion for the maintenance of healthy plant and animal life including humans.
- The ash is in fact healing to the soil and water resources of our planet as well. Numerous chronic and acute diseases have been treated with this ash.
- Daily performance of Agnihotra has been shown to reduce the stress and tension on the mind of man and animal alike. Plants are benefited as well by the smoke and ash that is produced.
- Additionally daily performance of Agnihotra has been shown to improve soil friability and assist in moisture retention ability of the soil. This among other benefits like the ashes 92 minerals greatly increases crop yields and reduces the need for farm input such as fertilizers and pesticides.
- Thus Eco Systems are benefited greatly by its performance which provides vital energy and nutrition the earth, atmosphere and water resources of the planet.
- Experiments were conducted in the Soviet Union many years ago in the mid-eighties which revealed that Agnihotra appears to have the ability to neutralize 50 years of pollution on our planet. This declaration was accompanied by an admission that they could not explain how.
- One experiment which was conducted then involved the use of radioactive materials in the performance of Agnihotra. After the radiation was measured and found to have been neutralized in some way. In any case it was no longer present after the materials were used in the process of performing Agnihotra. This is an area that will yield great new discoveries if only the scientists will investigate.
- Agnihotra smoke when inhaled goes directly into the blood and has the ability to precipitate the regeneration of nerves and brain cells. Previously this was considered to be impossible.
- Agnihotra when properly performed for a period of three months establishes what can only be described as a bio dome of protection. The area of protection and benefit is approximately 30 acres on the ground and extends upwards to an altitude of 12 kilometer's or more than 36,000 feet.

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

Agnihotra being performed in Sukothai, Thailand.

The following are frequently asked questions which were answered in a recent issue of Satsang a bi-monthly publication the purpose of which is to spread the knowledge of Agnihotra and Vedas throughout the world through a network of international volunteers.

WHAT IF I CAN'T DO AGNIHOTRA EVERY DAY?

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

WHENEVER AGNIHOTRA IS DONE CORRECTLY, IT WILL HAVE EFFECTS. ENCOURAGE THE PERSON TO DO IT WHENEVER THEY CAN. OF COURSE, FOR MAXIMUM EFFECT ONE SHOULD DO IT EVERY DAY, TWICE A DAY, BUT IF THEY DO AGNIHOTRA EVEN ONCE, IT'S BETTER THAN NEVER DOING IT AT ALL. IF A PERSON TRIES AGNIHOTRA AND HAS A GOOD EXPERIENCE, HE/SHE MAY BE MOTIVATED TO FIND WAYS TO DO IT MORE OFTEN. A PERSON MAY BELIEVE THAT THEY CAN'T DO AGNIHOTRA REGULARLY DUE TO THEIR CIRCUMSTANCE, BUT THEY DON'T KNOW THE FUTURE; THEIR CIRCUMSTANCES MAY CHANGE IN TIME TO ALLOW THEM TO PRACTICE AGNIHOTRA MORE REGULARLY. AGNIHOTRA CHANGES A PERSON'S KARMA.

WILL AGNIHOTRA CURE MY SICKNESS?

WE CANNOT PROMISE OR MAKE CLAIMS THAT AGNIHOTRA WILL CURE A PARTICULAR PERSON'S ILLNESS, BUT WE CAN SAY THAT THOUSANDS OF PEOPLE AROUND THE WORLD HAVE BEEN HEALED BY AGNIHOTRA AND HOMA THERAPY. WE CAN SHARE HOMA THERAPY INFORMATION--AGNIHOTRA ASH MEDICINES, ETC. WHEN GIVING TALKS, IT IS GOOD IF PERSONS FROM THAT COUNTRY OR REGIONAL AREA CAN GIVE TESTIMONIES ABOUT THEIR HEALING EXPERIENCES WITH AGNIHOTRA.

IS AGNIHOTRA A RELIGION?

AGNIHOTRA IS ANCIENT KNOWLEDGE THAT ANYONE, OF ANY RELIGION OR NO RELIGION, CAN PRACTICE FOR HIS/HER BENEFIT.

WHERE DOES AGNIHOTRA COME FROM?

AGNIHOTRA COMES FROM VEDAS, THE MOST ANCIENT BODY OF KNOWLEDGE KNOWN TO MAN. THIS KNOWLEDGE BELONGS TO ALL MANKIND. IN ANCIENT DAYS, THIS KNOWLEDGE WAS ALL OVER THE PLANET. VIRTUALLY ALL ANCIENT CIVILIZATIONS HAD SOME PRACTICES OF PURIFICATION THROUGH FIRE. ARCHEOLOGICAL DIGS FROM AROUND THE WORLD HAVE FOUND REMAINS OF FIRE ALTARS, ETC. IN THE COURSE OF TIME, THE SCIENCE BEHIND YAJNYA WAS LOST, AND TODAY, IN VIEW OF OUR POLLUTED CONDITIONS, THE SCIENCE OF ATMOSPHERIC PURIFICATION THROUGH YAJNYA IS BEING REVIVED.

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

HOW DOES AGNIHOTRA WORK?

THERE IS AN ANCIENT SCIENCE GIVEN IN THE VEDAS WHICH TALKS OF SUBTLE ENERGIES. ON A PHENOMENOLOGICAL LEVEL, WE HAVE DOCUMENTED THAT AGNIHOTRA SUPPORTS PLANT LIFE, HAS HEALING EFFECTS ON HUMANS AND ANIMALS, BUT WE DON'T KNOW WHY.

MODERN SCIENCE STILL HAS TO UNDERSTAND AND EXPLAIN HOW THOSE RESULTS COME ABOUT.

ABOUT THE TIMINGS-HOW LATE IS TOO LATE?

WE CAN ONLY ENCOURAGE THE PERSON TO ALLOW ENOUGH TIME TO SET UP FOR AGNIHOTRA, AND TO COUNT DOWN THE SECONDS UNTIL AGNIHOTRA TIME, TO DO IT EXACTLY ON TIME.

WHEN THIS QUESTION WAS ASKED OF SHREE VASANT IN JULY, 2008, THE FOLLOWING EMAIL REPLY WAS RECEIVED: "THE FIRE IS ABLAZE AND YOUR CLOCK OR WATCH IS WITH YOU. SUPPOSING YOU KNOW THAT SUNSET IS AT SIX HOURS-TEN MINUTES-25 SECONDS. IF YOUR RICE WITH GHEE IS IN YOUR HAND OR ON A PLATE. WHEN IT COMES TO 06-10-25 ACCORDING TO YOUR WATCH OR CLOCK, YOU ARE NOT GOING TO WAIT UNTIL 06-10-35 TO BECOME LATE PURPOSELY ARE YOU?."

"THEN THE QUESTION COMES IF YOUR WATCH IS NOT CORRECT. THEN YOU MUST SET UP YOUR WATCH OR CLOCK ON RADIO OF YOUR COUNTRY DAILY."

WHY ARE YOU CHANTING MANTRAS? TO WHOM ARE YOU PRAYING?

THERE ARE THREE INPUTS TO AGNIHOTRA: SPECIFIC ORGANIC SUBSTANCES BURNED, EXACT TIMINGS OF SUNRISE/SUNSET, AND VIBRATIONAL INPUT IN THE FORM OF TWO SHORT MANTRAS. ALL THREE INPUTS ARE NECESSARY TO PRODUCE AGNIHOTRA'S EFFECTS. SCIENTISTS KNOW THAT DIFFERENT VIBRATIONS HAVE DIFFERENT EFFECTS ON LIVING THINGS: IF YOU PLAY NICE MUSIC TO COWS, THEY YIELD MORE MILK; IF YOU PLAY NICE MUSIC TO PLANTS, THEY GROW BETTER. SHREE SAID, "HUMAN VOICE MUST BE INVOLVED IN OFFERING."

WHAT ABOUT THE MEDICINAL YAJNYAS MENTIONED IN *HOMA THERAPY, OUR LAST CHANCE?*

CAN I LEARN TO PUT HERBS IN THE YAJNYA FIRE, AS THE BOOK MENTIONS?

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

SHREE VASANT SAID THAT TO DO THOSE YAJNYAS WITH HERBS, ONE WOULD HAVE TO STUDY FOR YEARS. WE TEACH AGNIHOTRA, VAHRUTI HOMA, OM TRYAMBAKAM HOMA, ETC., AND THEY ARE VERY POWERFUL. SHREE VASANT SAID THAT WHEN THE TIME COMES, WE WILL BE SHOWN HOW TO DO THOSE YAJNYAS.

WHY ARE THE TIMINGS ON MY SUNRISE/SUNSET TIME SHEET DIFFERENT FROM THOSE IN THE NEWSPAPER?

FOR AGNIHOTRA, WE USE A SPECIFIC DEFINITION FOR SUNRISE AND SUNSET. THAT DEFINITION IS USED IN THE COMPUTER PROGRAM WHICH CALCULATES OUR TIME SHEETS.

IF YOU'RE BURNING THINGS IN AGNIHOTRA, HOW CAN YOU SAY THAT YOU ARE GETTING RID OF POLLUTION? AREN'T YOU CREATING MORE POLLUTION?

FIRE PRODUCES CARBON DIOXIDE. CARBON DIOXIDE IS ALWAYS PRESENT IN THE ATMOSPHERE AND IS NOT HARMFUL IN ITSELF, BUT IS HARMFUL IF IT REACHES EXCESSIVELY HIGH LEVELS. PLANTS TAKE IN CARBON DIOXIDE AND GIVE OFF OXYGEN. IN FARMING PROJECTS AROUND THE WORLD, IT HAS BEEN SHOWN THAT AGNIHOTRA AND HOMA THERAPY REJUVENATED THE PLANT LIFE OXYGEN AND HELPING TO PURIFY THE ATMOSPHERE. SOME PLANTS HAVE THE ABILITY TO REMOVE, DEGRADE, OR RENDER HARMLESS VARIOUS HAZARDOUS MATERIALS PRESENT IN THE SOIL OR GROUNDWATER. (THIS PROCESS IS KNOWN AS PHYTOREMEDIATION.) BY SUPPORTING THE PLANT KINGDOM, AGNIHOTRA AND HOMA THERAPY CAN HELP PURIFY LAND AND WATER CONTAMINATED BY HEAVY METALS AND OTHER POLLUTANTS.

ISN'T ALL SMOKE BAD FOR THE LUNGS?

IN MANY CASES AROUND THE WORLD, PEOPLE WITH ASTHMA, WHO NORMALLY CANNOT TOLERATE SMOKE, EXPERIENCED IMPROVEMENT AND RELIEF BY SITTING IN HOMA ATMOSPHERE. NEGATIVE IONS SIGNIFY PURE AIR. POSITIVE IONS SIGNIFY POLLUTED AIR. WHEN SCIENTISTS TESTED

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

CIGARETTE SMOKE, POSITIVE POLLUTING IONS WERE PRESENT. WITH AGNIHOTRA FIRE, EXACTLY THE OPPOSITE OCCURRED - NEGATIVE IONS WERE PRODUCED.

THAT IF SOMEONE CRITICIZES THE HOMA THERAPIST FOR THINKING NEGATIVELY WHEN DISCUSSING POLLUTION, CLIMATE CHANGE, ETC.?

ONE COULD SAY, "TRY SITTING BY A POLLUTED RIVER AND CHANGING IT WITH YOUR THOUGHTS!"
AGNIHOTRA IS A MATERIAL AID WE USE TO HELP RESTORE BALANCE IN NATURE. WE ARE AWARE OF THE CURRENT STATE OF THE ENVIRONMENT, BUT WE ALSO OFFER A SOLUTION.

Special project Alto Huallaga

The Headquarters of the Zone Leoncio Prado-Padre Abad

Certifies:

That since 7 months, in the area of Alto Huallaga, an Organic and Ecological technique called HOMA THERAPY, is being applied in the rejuvenation of the crops of the region, achieving a substantial reduction in the existence of different pathogenic agents. As a consequence, plagues and diseases were eradicated, the yield of the harvest was increased, the fruit grew healthy, with better color, taste, weight, texture, etc. Since many years efforts have been made to get out of the emergency situation concerning plant health with methods such as: cultural control,

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

chemical control, biological control, legal control, etc., without having achieved any success.

In the zone of Alto Huallaga to date we have 30 modules established and more are being installed in agricultural areas in which HOMA THERAPY is being applied, each one with 40 hectares. This makes a total of about 1,200 hectares. All of them are under an integrated system of permanent crops such as plantains, bananas, papayas, cocoa, citrus, avocados, coffee, tea, star fruit, mango, etc. These cultivations are combined with plants of short vegetative cycle such as rice, corn, soya, nuts, sesame, etc., and complemented with apiculture activity and breeding of cows and bulls.

We give full support to Dr. Gloria Guzman Mendez in her capacity as expert and the person in charge of AGRICULTURAL HOMA THERAPY in our area of influence and we have considered to give total support to the farmers who have been working in the application of HOMA THERAPY, because with their work, they are making a contribution in favor of agriculture, of the conservation of soils, forests and the preservation of the environment in the area of Alto Huallaga.

TECHNICAL REPORT

NAME OF THE FARMER: Edgar Arevalo Potow
FARM: The Three Sisters
AREA: 35 Hectares
SECTOR: Shrinigal
DISTRICT: JOSÉ CRESPO AND CASTILLO-AUCAYACU

1) PHYTOSANITARY SITUATION

* Initial state of the cultivations before applying HOMA THERAPY.

BANANA

. VARIETY: Bellaco Plantain

- Plantain Plantation of approximately 9 hectares.
- 30% of the total area is over 14 years old. It was only kept to give shade to the coffee plantation.
- The whole plantain area was infected with:
 - Mal de Panama "Fusarium oxysporum Var. Cubense" with an incidence of 70%.
 - Yellow Sigatoka. "Mycosphaerella musicola" with an incidence of 60%
 - Black Sigatoka. "Mycosphaerella fijiensis Var. Difformis" with an incidence of 30%
 - Presence of:
 - Nematodes: "Rodopholus semilis"
 - Black Gorgojo: "Cosmopolitus Sordidus"
 - Cordana: "Cordana Musae" whose incidence increased considerably during summer.

*Plagues:

- Ants
- Bedbugs
- Plant lice

COCONUT TREES

New and old trees attacked by ants and fungi like the Fumagina.

Fruits are falling off the tree before maturing.

Production per cluster only five coconuts, which ripen very slowly.

CAROMS

Fungi attack on the leaves, appearance of mal nutrition.

Suffers und fruit fly attack and produces only medium sized fruits.

MANGOSTINO

Plants are 8 years old with an average height of only 1.5 meters.

Leaves are affected by fungi and querezas (parasite plants). They appear to be without vitality and are yellowish.

Plants have not given fruits a single time.

CITRUS FRUITS

Dangelo plantation with approximately five years of age has not given any production yet.

Shows presence of fungi and querezas (parasite plants).

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

The whole plantation is attacked by ants, commonly named "Utaca". They perforate the leaves and this leads to defoliation problems. Plants do not have any buds.

PLANTATIONS OF SHORT VEGETATIVE CYCLE:

BEANS

In the previous campaigns they were attacked from the beginning of their development by insects, which affected in the yield of the crop.

CULINARY PLANTS

The characteristic of the Amazonian soil are:

very sour and with big aluminum concentration. To these are added the abrupt temperature changes with lots of fluvial precipitation (15 mm) and the extenuating circumstance that the soil is highly degraded by the indiscriminate use of agricultural chemicals, used in the cultivation of cocoa leaves. They brought an unchained and alarming appearance of plagues and diseases to all of the cultivations of the region, to the native species like the sapota and the kaimito and even the natural flora. A fact, that made the farmers of the area of Alto Huallaga not very devoted to the cultivation of the culinary plants, because they are more susceptible to the previously mentioned factors.

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

REJUVENATION OF THE CULTIVATIONS AFTER THREE MONTHS OF APPLYING HOMA THERAPY

PLANTAIN AND BANANA:

In the whole plantation new very green and brilliant leaves began to grow.

The plantation of Plantains, variety "Bellaco Platano" with over 14 years of age showed the same behavior.

Plagues and illnesses began to disappear progressively.

The production was increased with more and heavier clusters. With each harvest there is an increase, beginning with the offspring developed in Homa atmosphere.

Lots of production of true offspring; on an average per mother plant from 12 to 14 offspring were observed.

This fact allowed the farmer to enlarge his plantain area, besides paying back the received credits to Government Entities. This was done only with true offspring capable of propagation.

COCONUT:

Plants with ants and fungi attack, who gave little production, healed through the effect of HOMA THERAPY, producing now from 20 to 25 coconuts per cluster (one cluster counted 35 coconuts) and showing many clusters staggered in fruition development. The production with HOMA THERAPY is permanent.

CAROMS:

The whole foliage was renewed with healthy and very green leaves. The fruits developed almost twice the size of the previous campaign. They are more brilliant, have more fragrance, taste sweeter and are of uniform color.

MANGOSTINO:

The eight years old sick plants rejuvenated after only three months of applying HOMA THERAPY. New leaves and shoots sprouted and they doubled in size (one meter and half).

These plants are about to flower due to the HOMA THERAPY effect. Normally it takes 10 years before they produce the 1st time.

CITRUS FRUITS:

A 5-year old Dangelo plantation, which didn't have any production, is now full with flowers und in fruition process. It is free of plagues and diseases due to HOMA THERAPY.

Orange grafts: were installed in the final field during the application of HOMA THERAPY. They grew 45 cm. in 40 days. They received every 6 days a fumigation with the Agnihotra ash water solution, which acted like a foliar nutrient.

Two seedbeds were installed; one for "Cleopatra" mandarins and the other for lemons in order to obtain five thousand grafts each. They were installed close to the resonance hut and received the Agnihotra ash water solution. The "Cleopatra" mandarin plants developed 15 cm of height in three months and the lemon plants reached after 2 months a height of 18 cm. The lemons were installed in the open field, in the plain heat of the summer and they all have very uniform dark green leaves, show lots of vitality and are free of plagues and diseases.

PAPAYA:

The plants show very green leaves, healthy fruits and have no deficiencies like it was observed before applying HOMA THERAPY.

CULINARY PLANTS:

TOMATOES:

Variety Israeli:

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

- Their vegetative cycle from sowing to crop was from 50 to 60 days.
- During their development cycle there was no attack of plagues and diseases observed.
- Their sole treatment was the HOMA THERAPY FIRES whose effect is through smoke and radiation, besides the application of the Agnihotra ash water solution, with a frequency of every 6 days. The Agnihotra ash acts as pesticide, fungicide, nematocide, insecticide and contains nutrients besides controlling weed growth.

CUCUMBER:

- Applying HOMA THERAPY their vegetative cycle is 40 days.
- Average production of 17 healthy fruits per plant.
- Each fruit is between 25 to 30 cm long and 20 to 25 cm thick.
- Uniform maturation.
- With conventional agriculture using agrochemicals the vegetative cycle extends up to 80 days.

CABBAGE:

- Their vegetative cycle shortened to 60 days applying HOMA THERAPY.
- Each plant has an approximate diameter of 80 cm per head and is free of plagues and diseases.
- With conventional agriculture, using chemicals the cabbage matures in 90 days.

BEANS:

Variety Recline:

- They were harvested approx. two months after sowing, applying HOMA THERAPY. Each plant carrying approx. 45 sheaths and each sheath contains 3 beans, which makes a total of 135 beans per plant.
- Using agro chemicals this variety is usually harvested after three months.

Variety Castilla:

- 75 days after having been sown the plants show a great number of sheaths and are very loaded with beans.
- Using agro chemicals this variety is usually harvested between 3 to 4 months.

1) PHYTOSANITARY SITUATION

***Initial state of the cultivations before applying Homa Therapy:**

PLANTAIN AND BANANA:

Varieties: Island, Inguiri, common Bellaca and Guallabo.

- Plantation of approximately 10 Hectares.
- 20% of the total area is a fifth generation plantation and another 20% is a new plantation, with only one previous production.
- The fifth generation plantation was in a minimum production stage, with very small clusters.
- The whole plantation area was infected with the same plagues and disease as in the jurisdiction of the whole district José Crespo and Castillo. The biggest incidence presents the fungi Fusarium (70%), being the same fungi that destroyed 3,000 cocoa plants and offspring of plantain and banana trees, recently planted on the same farm. This fungi, known as Fusarium is the one that destroys the coca plantations. It also began in this same farm attacking avocado plants that were in full production.
- There was also a strong incidence (40%) of Pseudomona Solanace in the 10 hectares of the plantation.
- Hardly any offshoot production, the average is 6-7 offshoots, the majority not fit for propagation.
- The production of the "Isla" variety plantains was delayed due to the presence of the Yellow and Black Sigatoka. The maturation process took a year and three months and in many cases it did not come to the end of the maturation.
- In the summer time the bananas and plantain plants showed a high incidence of the fungi Cordana, presenting a devastating panorama of yellow leaves.
- Due to the presence of the Yellow and Black Sigatoka the clusters matured without functional leaves.
- The banana and plantain plants attacked by the fungi Fusarium dried off starting from the guide, later advancing via the vascular system.
- If the plant resisted the fungi attack for some more time, the plant developed a very small cluster and finally the plant fell without ending the maturation of the cluster.

COCOA:

Due to the high incidence of Moniliasis in this farm, 10 hectares of Cocoa plantation were destroyed and in the few plants that remained, leaves with white stains, severe attack of Witch's Broom and Moniliasis were observed. They did not manifest any flowering, less so fruition.

KAIMITO:

- Regional plant, which presented the same plagues as the cocoa.
- White stains in the leaves and all the fruits mummified due to fungi Monilia.

CITRUS FRUITS:

- Presence of querezas (parasite plants), plant lice and fungi in orange grafts, variety Valencia, installed

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

since one year in the final field.

- Orange grafts with an average height of 30cm presented yellow leaves, devitalized through plagues and diseases.

COCONUT:

- Trees attacked by fungi and ants mainly on leaves and roots. The leaves were covered with a black layer of the Fumagina fungi.
- The production of each cluster was between 3 and 4 coconuts and was temporary.

BOVINE LIVESTOCK:

- On the farm are 45 heads of bovine livestock, which presented parasites, inclusive ticks.
- Strong solar radiation affected directly the vitality of their skins.
- This bovine livestock was under permanent veterinary treatment, given through the Universidad Nacional de la Selva and the Ministry of Agriculture.
- There was no milk production.

PASTURE:

The pasture presented little growth and strong presence of weeds.

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

REJUVENATION OF THE CULTIVATIONS AFTER 4 MONTHS OF APPLYING HOMA THERAPY

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

PLANTAIN AND BANANA:

- The whole plantation experienced a uniform rejuvenation.
- Absence of plagues and diseases.
- Accelerated rejuvenation in the variety "Bellaco", shortening it's productive cycle from one year three months to 9 months.
In the variety "Isla" the productive cycle shortened from 8 and ½ months to 6 months.
- Offspring production of each mother plant is 12 to 13 that are fit for propagation.
- The 4 year old plantation that was in degeneration has developed new leaves with an unusual shine, production of small clusters at the beginning but with more weight than those obtained under agro chemical treatment. In the second production the clusters increased weight and size.
- Fruit clusters obtained from offspring grown in Homa atmosphere are bigger and with more weight. With the variety "Inguiri" 120 fingers (fruits) were obtained on the average, while as a normal good production is 80 to 100 fingers. This happened with a fifth generation plantains which were in a highly sick area, only after 4 months of HOMA treatment, which is really astonishing.
- The main base for the production of a good cluster is the number of functional leaves at the moment the flower is cut off. With HOMA THERAPY, 13 leaves were observed on the average and at the end of the maturation of the cluster the plant still has 8 - 10 healthy leaves.
- The production of clusters is uniform in the whole plantation.
- The conformation of the stems from the offspring, in its development is similar to the cloned plantains. They don't develop a lot of height, but give a quick production and the stems are very thick.
- Agnihotra ash is applied to the rhizome of the recently cut plant after the harvest. This disinfects and makes the stem harder, besides activating them for a good offspring production.
- With each generation the offspring comes out better conformed, thicker than the mother plant, which assures a better production with regard to the previous crop.
- In summer the "Cordana" fungi usually appears in the plantations. In the area where Homa Therapy is applied there is no presence of those fungi and all the leaves have the same color.

CITRUS FRUITS:

- In citrus plants was observed that the Agnihotra ash acts as a foliar nutrient. In only 26 days of Homa application the orange grafts, variety "Valencia" rejuvenated completely, they had been installed at the final field one year ago. After the first week of having begun to apply the Homa Technique, all the sick and yellow leaves fell off the grafts. Then buds came up all over the pants and leaves started to develop and then flowers bloomed and at the end they clotted into fruits and this whole process in only 26 days. When the fruits were taken off, the grafts developed more leading branches and more foliage.
- The querezas (parasite plants), plant lice and fungi disappeared.
- In all citrus plants many new, very green and brilliant leaves developed.

BELL PEPPER:

With the application of Agnihotra ash the plants of bell peppers developed without insect attacks and with healthy and very green leaves.

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

WEED:

- Due to the effect of HOMA THERAPY the weed degenerates. It begins to flower at little height, starts vanishing until it finally disappears. It requires only 3 weed cuts until it is completely controlled. The effect of the smoke and the radiation from the Homa Technique is supplemented with the application of the Agnihotra ash water solution.
- A weed called "Arrocillo" due to the Homa effect and the Agnihotra ash water application degenerates. It begins to flower at already 50 cm height, starts vanishing until it finally disappears.

COCONUT TREES:

The production increased per cluster to 20 - 25 coconuts and the trees are in permanent production

YUCCA:

Their crop accelerated its growth (less time), has thicker roots and the white eatable part needs less cooking time.

PAPAYA:

In the middle of the summer the plants did not manifest the usual symptoms of deficiencies, which becomes visible in the formation of fruits with protuberances. This summertime all the fruits and the plants show a lot of vitality, have very green leaves, the fruits have a good color and texture and are healthy and flavorful.

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

COCOA:

- The few remaining cocoa plants of the destroyed 10 hectare plantation began to rejuvenate, developed first healthy, shiny and very green leaves. Then the flowers came up in cushions, forming clots and turning then into fruits. They remain their good development free of plagues and illnesses.
- In the agricultural area of the neighbors that also receive the effect of the HOMA resonance point, has it been observed that the previous cocoa production of 35 kilos per hectare, ascended to 140 kilos per hectare on the average and they have a permanent production.
- The Homa effect in the annexed agricultural areas acts on all cultivations.
- The banana variety "Seda" in an annexed area to the Homa resonance point produces a second crop of 185 fingers per cluster.

TOMATOES:

The yield in tomatoes with Homa Therapy is 200 kilos per week in an area of approx 500 m2.

BOVINE LIVESTOCK:

- In all the cattle is observed that their fur is free of stains and is very shiny.
- Bigger voracity to consume pasture. They are being given Agnihotra ash mixed in a certain quantity of salt. Each time the Agnihotra ash quantity is increased while the salt quantity is lowered. The tendency is going toward giving them pure Agnihotra ash.
- In order to get rid of the ticks, they are powdered with Agnihotra ash. The tocks fell one by one and after one week of treatment the ticks were gone.
- The cattle do not receive any veterinary medication.
- The calves are born without any nutritional deficiency; they are well conformed and healthy.

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

ECO PHYSIOLOGICAL BEHAVIOR OF BANANA AND PLANTAIN

VARIETY	Plant Height		N° of Offsprings		Production

CULTURAL WORK

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

	Permanent performance of HOMA fumigations (Effect through smoke and radiation)	N° of applications of the Agnihotra ash water solution	N° of applications of the AGNIHOTRA ash
Clearing of the non functional parts of the plant	DAILY	4 times/month	1 time/month
Weed control	DAILY	4 times/month	1 time/month

NOTE:

1) the HOMA fumigations carried out are:

- Agnihotra
- Vyahruti Homa
- Tryambakam Homa

2) the cleaning of non functional parts of the plant is done once a month

3) manual weed control is done every three months

Translation from Spanish original document signed and sealed by the Republic of Peru, Ministry of the Presidency - INADE. Special Project Alto Huallaga

The Headquarters of the Zone Leoncio Prado - Padre Abad

Certifies:

That in the area of Alto Huallaga, an organic and ecological technique, called HOMA THERAPY, is being applied in the implementation of the project "Integrated Management of the Crops of the Region, applying Homa Therapy, which is based on the Biorhythms of Nature and the Science of Pyramidology". The following has been observed in the Mango plantations:

- The pathogenic agents, which produce plagues and diseases decrease in a progressive way until they are eradicated after 4 months.
- The first reaction of the Mango trees to the application of Homa Therapy is that the sick leaves fall off and healthy shoots emerge. This happens even during the full fruition period of the tree. This means that a total and complete rejuvenation of the plant is taking place.
- The period of bearing fruits extends itself and the fruits produced are healthier, bigger and of better taste and color. The ripening of the fruits accelerates.
- In the area of cultivation where Homa Therapy is being applied, when the seeds fall on the soil, they start germinating even when adequate conditions are not there.

The Ancient Solution to Modern Pollution

Subject: Diagnosis of the situation on the Agricultural
Farm in PICURUYACU.

Date: Tingo María, November 22, 1998

Through this letter I address myself to you, to greet you and report to you, that according to what was coordinated under your direction, a local visit was carried out to the Farm where HOMA THERAPY is being practiced under the direction of Dr. Gloria Guzmán M. in Picuruyacu in order to evaluate the situation of the Farm.

Enclosed please find the results of the evaluation and description of achievements obtained with HOMA THERAPY, for your information and further action you choose to take.

The Ancient Solution to Modern Pollution

Sincerely,
(Seal and signature)

Eng. Carlos Juaregui Sánchez
COCOA EXPERT
PROYECTO ESPECIAL ALTO HUALLAGA (PEAH-PERU)

TECHNICAL REPORT

Situation concerning the health of plants.

- Initial State:
- Cocoa plantation, more than 25 year old.
- Pruning done with hatchet, without technical criteria.
- Broken branches, knuckles became sort of nurseries for black ants.
- Felled trunk trees, stripped from branches and leaves.
- Plants covered by moss and other parasite plants.
- An area with problems of ants which cut the leaves called "UTACA" which had continued to destroy the foliage of most cacao plants.
- Plants with no shoots at the base of the trunk.
- Abundant weeds, specially the "Cortadera" (a pernicious weed) which had reached approximately 2 meters height.
- Lack of the growing point in the plant, due to wrong pruning.
- Ants in the cultivation field, turning the soil not suitable to grow new crops and making agronomic management very difficult. Thus, the place was abandoned five years ago.
- The cocoa plantation was unproductive. It had some very old fruits, destroyed by the fungus Moniliasis.

PLAGUES AND DISEASES:

DISEASES:

- a) Moniliasis: "Moliophthora roreri" with an incidence of 90%
- b) Witch's broom "Crinipellis perniciososa" with an incidence of 60%
- c) Phytophthora: with an incidence of 30%.
- d) Moss and other parasite plants with an incidence of 100%.

PLAGUES

- a) Ants
- b) Bugs which undermine fruits

OBSERVATIONS:

EPIDEMIOLOGICAL BEHAVIOR

The cocoa plantation was in a situation of emergency concerning the health of plants. Three months after having started the application of HOMA THERAPY, it was determined that through the implementation of this technique of organic agriculture called HOMA THERAPY one can observe the following:

- That in the cocoa plantation, the presence of Moniliasis, witch's broom, phytophthora, and attack from plagues (bugs)

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

does not exist.

- Concerning production, one can observe plants producing healthy fruits of good size, showing a luminosity in the texture of each cocoa fruit or bean.
- The plants are full of vigor and with abundant production foliage.
- Most of the production units are in full flowering. Flower cushions are well activated, because there is a minimal presence of moss in the trunk of the trees. The moss dried up in spite of the rainy season. These months of observation have been the ones when the rains began. The fact that the moss and other parasite plants dried out, is due to the application of HOMA THERAPY.
- The signs of witches' broom and other sicknesses and plagues were substantially reduced until they disappeared. At the same time, the production of healthy fruits increased in number and quality, obtaining greater and better cocoa beans/ cocoa seeds (almonds). A harvest was carried out each 10 days.
- Due to the quality of the cocoa seeds which are free from sicknesses, a nursery of cocoa siblings got started, which is under observation.

BEHAVIOUR OF THE LEAVES

of the plants observed inside the experimental are:

From an average of 100 plants all look full of vigor, free from stains in the leaves. There is no vegetative witches' broom. The leaves are very healthy.

PRUNING DUE TO HEALTH REASONS

After finding the cultivation in bad shape due to the severe pruning carried out without technical criteria with lack of signs of life, the plants were showing their trunks and stems split apart, providing a dwelling for the ants. The trees had wounds which gave favorable conditions for sicknesses produced by fungus. With HOMA THERAPY techniques, however, these trees were rejuvenated. We can observe positive results in the effect of control. Badly developed plants, plants whose trunk was left with no branches, branches with old leaves; plants which could barely breathe or carry out the photosynthesis process, they are producing fruits, even though this is not harvesting time.

CULTIVATION OF MANGO

Concerning the cultivation of Mango one can observe a tree which had stopped producing 4 years ago and had produced only once. It was a plant with problems in the leaves, full of white stains.

Without having any knowledge about this specific sickness, "Homa Therapy" was applied in September, the time of greater flowering and fructification. The outcome was very positive, the tree started to produce mangos again. Also, mango plants from the neighbors adjacent to this farm had problems with the Fruit Fly and they used to produce mangos full of worms. Now, in this year the fruits are healthy and of good quality. This means that the technique HOMA THERAPY functions at all levels and it has an immediate effect.

CULTIVATION OF CITRUS FRUITS

- LIME tree with health problems, attacked by "UTACA" ants. These ants were making holes in the leaves. The plants also were suffering from defoliation (they were losing the leaves). The plants did not have any shoots at their base.
- ORANGE tree with problems of antraerosis, moss and ants.

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

After HOMA THERAPY techniques got started, in a short while, one could observe the results. These plants had a TOTAL RECUPERATION after applying HOMA THERAPY. Each 7 days new leaves began to sprout. Thus the plants were REJUVENATED. The same happened with the LEMON and CHERRY trees, which had never produced fruit and now they are in full production.

NOTE: In this area of 2 hectares of plantations from this region, such as cocoa, mango, citrus fruits, coconuts, etc., where HOMA THERAPY is applied, no Agro-chemical products are used.

Translation from Spanish original document signed and sealed by the Republic of Peru, Ministry of the Presidency - INADE. Special Project Alto Huallaga

Headquarters of the Zone Leoncio Prado - Padre Abad

Certifies:

That in the area of Alto Huallaga, an Organic and ecological technique called Homa Therapy has been applied since 7 months ago, for the implementation of the project "Integrated Management of the Crops of the Region applying Homa Therapy, which is based on the biorhythms of Nature and the Science of Pyramidology". The following has been observed in the Coffee plantations:

- In these crops, new leaves are noted right at the top and on the lateral branches of the plant. The top branches are stronger and erect as they sprout, the new leaves are very shiny and of intense green color. All this with only 22 days of applying Homa Therapy.
- The disease has been disappearing little by little from the fruits that were previously affected with fungus by the effect of Homa Therapy.
- A decrease can be seen in the plagues and diseases nearing to their eradication by the effect of application of Homa Therapy.
- The blossoming took effect out of season, this all around the 40 Has., area of action of Homa Therapy from a Homa Resonance point.
- The existing fruits started to gain size, eventually leading to the increase of yield of the crop. "Caturra" variety behaved as the "Catimor" variety by the Homa Therapy effect.
- Coffee plants started to produce all throughout the year by the effect of Homa Therapy. The blossoming is permanent.
- Coffee plants that were planted a year ago in their final location, after 18 days of applying Homa Therapy, they started to develop new top branches with healthy leaves and started to blossom.
- The coffee nurseries also benefited by the accelerated development of the shoots, which were free of plagues and illnesses by the application of Homa Therapy. In the high Huallaga area, around 300 Has. have been established. Other coffee plantations are being established of "Caturra" and "Catimor" variety. From the coffee crops obtained from the implementation of Homa Therapy, seed banks were established with HOMA coffee beans.

Reference to the proper performance of Agnihotra by Lee and Fritz Ringma of Om Shree Dham

IMPORTANT POINTS ABOUT HOMA THERAPY

THE PYRAMID:

Before using the pyramid for the first time wash with hot water and mild soap as some residue might have been left after the fabrication process. After Agnihotra the pyramid will become black and lined with a film of ash and ghee – do not clean off. Also be careful not to bang the pyramid. Its structure should be free of dints, pin holes etc. Keep one pyramid for Agnihotra only. Keep a separate pyramid for other Homas such as Gaiatri and On Tryambakam.

CLEANLINESS IS IMPORTANT:

Before performing Agnihotra, preferably shower and put on clean clothes. Minimal requirement is to wash face, hands and rinse mouth. Remove shoes for energetic cleanliness. Keep silent at least 3 minutes prior to making the offering, again for energetic reasons. Keep area clean where Agnihotra is performed. Ensure that ghee is kept clean by keeping it covered. Do not contaminate the ghee by dipping your fingers in or by dipping the cow dung in the ghee. Use a clean copper spoon to extract ghee from container. Avoid pouring any unused portion of ghee back into clean unused ghee.

START WITH SUNSET AGNIHOTRA:

To begin Agnihotra at a new location you should start with performing Sunset Agnihotra.

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

FACE THE PYRAMID TO THE EAST:

A little bump has been pressed into the top rim. Use a compass to place this face direction east so the pyramid is always magnetized to this direction; it enhances the process of Agnihotra. If there is no bump put a small scratch on the lip of one side and always face this eastwards. Always sit square on to the pyramid. It is best to face East at sunrise and one can sit facing West at sunset if you wish. The thrust of the healing energy is Eastwards. For this reason sick people are advised to sit on the Eastern side as close as possible and square on to the pyramid. One can also charge food, crystals etc with healing energy by placing them on the Eastern side of the Pyramid, at sunset, followed by sunrise.

NO METALS TO BE NEAR THE PYRAMID

With the exception of copper or gold, all other metals interfere with the energy flow around the pyramid. Eg do not stand pyramid on metal plate. Utensils for Agnihotra need to be of copper.

PLACEMENT OF THE PYRAMID:

Directly on the soil, or on a brick etc. - something natural and inflammable. It is optimum to have the pyramid contacting the earth however Agnihotra can be done anywhere i.e. indoors, on a top story, on a ship etc and will still have tremendous benefit. For farming it is best to have the pyramid directly in contact with the soil.

PERFORM AGNIHOTRA INSIDE OR OUTSIDE:

It is best to perform regularly in one place which sets up a concentrated healing atmosphere in that space. The healing energy is more concentrated the closer to the pyramid. Therefore if you want to purify certain rooms or clear and vitalize different areas then you can perform Agnihotra at these places. Start with sunset followed by sunrise. If building a special hut for Agnihotra contact a Homa Therapy Centre for specifics.

LIGHTING:

*Light a piece of cow dung outside of the pyramid using a match, lighter, candle etc, so as to make sure no match debris or candle wax goes into the pyramid. Then place this ignited piece into the middle of the stack of cow dung in the pyramid. The stack needs to be arranged for air flow and also to enable the rice and ghee offering to go into the middle of the burning stack. NB. Do not light the fire by placing camphor or other lighting aids in the fire. Only use cow dung and cows ghee. Do not burn incense during Agnihotra while the fire is going. Blow out any candle near the fire before the mantra is uttered. Before the mantra is uttered one can ensure a good vigorous Fire by adding more cow dung and/or ghee if necessary and one can rearrange smoking pieces with the copper tongs to allow more air flow. Do not disturb the Fire in any way **after** the mantra has been spoken. If the Fire is not burning well after the mantra one can mimic the wind by fanning the Fire but do not blow into the Fire.*

PRIMARY HEALING:

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

*Agnihotra happens at the exact moment of sunrise/sunset when the mantra is uttered. For this reason do not rearrange the contents of the pyramid in any way **after** the mantra is uttered as this will interfere with the process.*

SECONDARY HEALING:

A secondary healing action occurs if one leaves the pyramid undisturbed until the next Agnihotra. This allows the pyramid to remain subtly connected with a stream of healing energy from the sun.

SIZE, SHAPE AND DIMENSION OF PYRAMID is as given. If you want to create more power several Agnihotras can be performed at one time or you can utilize RESONANCE, [see 'Growing Food' information). You do not increase the size of the pyramid. Pyramid can be of copper or gold.

THE MANTRA IS EXACT

*Agnihotra and Homa Therapy operate according to resonance. The Sanskrit mantra given for Agnihotra exactly resonates with the energetic occurrence of sunrise/sunset attracting the life sustaining torrent available at that time only. Sanskrit is pure resonance. The Agnihotra mantra is uttered only once and the ghee and rice is offered into the Fire on the word 'swaha' at the exact time mentioned on your time sheet. Only the person performing Agnihotra sings the mantra. As it is a science of resonance **it is very important** to learn to **pronounce and sing** the mantra accurately. For example the 2 syllables in the word swaha are pronounced with equal length. Please practice by listening to the CD provided with a kit and reading the mantra at the same time. Or listen to the mantra sound files on eg www.agnihotra.org*

IMPUTS ARE EXACT:

- 1. DRIED COW DUNG;** *cow dung is the only dung according to the ageless knowledge of the Vedas that is not dirty. Indeed in organic circumstances it is medicinal. In the Chernobyl nuclear disaster scientists discovered that cow dung was the only substance in the area that did not hold radioactivity. This is Vedic knowledge i.e. yogis would build their huts out of cow dung to create a space where no distorted energy could enter. In the world wars cow dung poultice was used for septic wounds.*
- 2. GHEE;** *This is clarified butter from the cow i.e. butter with the impurities removed. What remains is ghee, which if made correctly does not go off and does not need refrigeration. Old ghee kept out of sunlight goes white. This is the most medicinal. According to Vedas cow ghee is a conductor of pure consciousness. During Agnihotra the ghee particles carry the high vibrational pranic energy and micro-nutrients into the atmosphere and adhere to leaves etc. When Agnihotra ash medicine is mixed with ghee to make ointment the ghee carries the prana and micro-nutrients, locked into the ash at Agnihotra time, into the body to where it is needed.*

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

- 3. RICE:** Preferably brown organic rice. Only unbroken pieces to be used. Ensure that the rice offering goes into the middle of the pyramid so that it is consumed immediately.
- 4. TIMING:** Light the Fire 4-8 minutes before the time of offering depending on the moisture levels in the atmosphere. It is important to have the Fire blazing at its maximum at the moment of the offering which is indicated by the daily timings on your time sheet. Right on the time indicated on the time sheet start the mantra.

TIMING MUST BE EXACT

Timings are calculated according to the Vedic understanding of sunrise and sunset, which is the energetic moment of sunrise and sunset. The timings provided by internet, almanac, newspaper are **not correct** for Agnihotra. They are up to 5 minutes out. The pranic window, which Agnihotra taps into, is exactly to the second when the first rays of the sun energetically hit your land called sunrise and when the last rays are withdrawn back to the solar range, called sunset. Accuracy of time is determined by a computerized program, which utilizes the Longitude/Latitude position where Agnihotra is to be performed to plot the exact moment of sunrise and sunset in that location. The timings change by a few seconds daily so a timesheet covers every day for a full year. Certified Homa Therapy Centers provide timesheets free of charge. If you wish to perform Agnihotra in several places contact us for appropriate timesheets. Times change with each 4 km distance eg 2 different suburbs in the same city, 4 or more kilometers apart, will need a different timesheet. A new timesheet is required every year therefore at the end of each year contact us for your new timesheet for the coming year. For exact timing to the second on your watch/clock acquire a digital piece with hours, minutes **and seconds**. **Regularly correct the watch to the second by timing against Greenwich meantime** available on phone number 1194 in Australia and Ph.: 090034567 in NZ. Or, for Malaysia call Telekom 1051. Or go to <http://www.timeanddate.com/worldclock/city.html?n=240>

THE OFFERING FOR AGNIHOTRA

Use the rice and ghee dish from your kit for the offering. Hold dish in left hand at the level of the heart and offer with the middle fingers and thumb of your right hand. Only the right hand is used to make an offering into the Fire. This applies also to left handed people. Preferably use organic whole grain unpolished rice. Remove the broken bits of rice and discard. Mix the whole grains with a little ghee and divide into two portions. The mantra is uttered only once. There are two offerings corresponding to the two 'swahas' in the mantra. Place the first portion of rice and ghee into the Fire (in the middle of the pyramid) after pronouncing the word swaha followed by the second portion after the second 'swaha'. Each offering must be given with one flick of the hand only. Discard any remaining rice. Do not offer with the copper spoon.

AGNIHOTRA ASH

Remove the ash with the right hand and place in a container made of natural material eg glass or ceramic or

The Ancient Solution to Modern Pollution

Super Science anyone can use for health and protection in a toxic world.

copper. However no other metals should be used. Do not place in plastic. Always keep ash covered. Ash used for medicinal purpose should be from Agnihotra Fires where the performer has first had a shower and put on clean clothes. Keep Agnihotra ash in a separate container from other Homa ash such as that from Om Tryambakam Homa. The latter ash can go on the garden but it is Agnihotra ash that has the potency.

HOMA THERAPY SUPPORT AND SUPPLIES

Om Shree Dham in the Hunter Valley, NSW, Australia is the location for the Homa Therapy teaching Center of Australasia. Frits and Lee Ringma are directors of Homa Therapy Association of Australia, a non-profit organization and are presently the only accredited Homa Therapy Teachers in Australia. Om Shree Dham is set up to supply all Agnihotra and Homa Therapy needs as well as teaching Homa and providing a healing environment. Please don't hesitate to contact us if you have questions regarding Homa Therapy or if you need supplies such as cow dung, copper pyramids and utensils, time sheets, books etc. Certification Homa Therapy Teacher Training courses are available as well as Homa Organic Farming Courses.

STAY AT OM SHREE DHAM

One can also spend time here either as a spiritual or healing retreat participating in the daily healing Fire program or to learn Homa Organic Farming or both. We also have gatherings on Sundays [Please inquire]

OM TRYAMBAKAM HEALING FIRES

Om Tryambakam Homa can be performed regularly to fortify the biosphere created by daily Agnihotra. Agnihotra creates the basic healing cycle so it is important that one is a regular practitioner of Agnihotra in order to perform other special purpose Homas. Due to the critical conditions on the planet it is highly recommended that people who perform regular Agnihotra also perform 1 hour per day of Om Tryambakam Homa. On Homa Farms and Homa teaching Centers 4 hrs of Om Tryambakam Homa is performed daily and 24 hours on full and no moons, or as much as possible. If you are a regular Agnihotra practitioner and would like to contribute by performing Om Tryambakam at Om Shree Dham you are welcome anytime.

FULL AND NEW MOONS

During powerful planetary transitional times such as full or new moons, equinoxes etc. more healing Fires are required to maintain balance and harmony. For this reason at Om Shree Dham we aim to perform 24 hr. Om Tryambakam Healing Fires. This is achieved through rostering. Each shift is usually an hour duration. If you would like to participate we are happy to provide you with a new and full moon calendar. Just contact us prior to a moon so we can roster you in. Free caravan stay is available for those wishing to contribute during the night or early morning time slots. Just being in the energy field of 24 hr Homas is very healing and

transformative. You can also facilitate 24 hour Fires for the healing of your own area.

HOMA THERAPY AND MENSTRUATION:

Both Agnihotra and menstruation are cleansing actions. The purification energy spiral of Agnihotra travels upwards while the purification energy spiral of menstruation travels down into the earth. The latter lasts for the duration of bleeding. The menstrual cycle is in an elimination process. Agnihotra can disrupt this cycle and the menstrual spiral can negate some of the effectiveness of Agnihotra. For this reason the woman does not sit for Agnihotra nor should she be in a room where Agnihotra is performed. She does not handle any materials connected with Agnihotra such as pyramids or cow dung. In Vedic lifestyle the woman goes into retreat at this time, is served meals and does not walk through or work in the orchard or Homa veggie gardens etc, for these resonate with the Homa energy. It is also requested that she does not enter the Fire Temple or food preparing areas. After the bleeding cycle is over the next morning she takes a full shower including hair under flowing water before Agnihotra is recommenced. In the case of very short cycles the minimum wait before commencing Agnihotra is 4 days. Of course one still benefits from the energy created by Agnihotra and can sit for meditation at the time of Agnihotra. [At least a room away]. If the pyramid is accidentally touched the energetic spiral can be neutralized by placing under running water by someone not in their menstrual cycle. At Om Shree Dham and at all Homa Therapy Centres and farms we aim to have separate accommodation and facilities for women when they are in period. Until these facilities are built at Om Shree Dham we ask that visitors time their visit or stay when not in period.

HOMA HEALTH NEWS, SATSANG AND AUSTRALASIAN HOMA THERAPY NEWSLETTER

come out regularly They are very inspiring reading on Homa Therapy, with its many applications and amazing healing results for nature and people worldwide. If you have an E-mail address we can send these newsletters to you regularly.

ORION MESSAGES

Orion Messages often carry pertinent information regarding personal development and our planetary situation. The information is received by Parvati, a long standing Agnihotri, who is facilitating with her husband Jarek a Homa Centre called Bhrgu Aranya in Poland. If you have given us your email address you will automatically receive these messages.

HOMA THERAPY IS VOLUNTARY WORK *Homa Therapy is conducted by volunteers worldwide. Homa Therapy Association of Australia is a non-profit organization. The teaching of Homa Therapy is always free of charge. As such we are grateful to share this great planetary healing science with others so more and more people can self empower.*

THE PURITY OF AGNIHOTRA IS ENTRUSTED TO YOU!

In order that the purity and thus power of Homa Therapy remains intact it is asked of all that it never be commercialized, that is if you wish to perform Agnihotra and associated Homas in different places it is always done free of charge. Also ash medicine is not to be charged for. It is always given away free. Of course if you combine the ash with other substances such as in herbal creams. The latter can be charged for. As Homa Therapy is an exact super science do not change or add to any aspect of Agnihotra and Homa Therapy as given, thereby its purity and effectiveness is uncompromised.

About the Author

"Late one afternoon on July 4th, 1999, Robert met his destiny, when he was injured in a head-on collision with a 2000 lb. Bull named Red Rife. This confrontation led Robert on a journey that has brought him to a greater appreciation of his innate personal power and a greater role to be played as a citizen of the world.

With a broken jaw and damaged teeth Robert sought a solution that was more affordable than could be found in the United States and subsequently a brief time later he found himself in Thailand where his injuries were addressed successfully.

To this day he remains in Asia and has journeyed to other surrounding countries like, Cambodia, Laos, Burma, Malaysia, India, Singapore and Indonesia. Robert currently lives on the Island of Bali has built a life dedicated to healing the earth of pollution and disease.

Formally trained as an emergency room Physician's Assistant after a stint in the US Army as a Medic, Robert has made the most of his education and life experience to investigate and come to terms with the seemingly divergent herbal medicinal lore of Thailand and other Southeast Asian countries.

He is the co-founder and once managing director of Thai Freeze Dry Company Ltd. for which he obtained in his capacity as Managing Director between the years 2003 and 2006 the coveted BOI Endorsement of Thailand. He worked diligently

with the company chairman to create a line of freeze dried herbal products which included among them what some including, David Wolfe, renowned whole foods advocate, refer to as his secret herbal ingredient, Jiaogulan, Gynostemma Pentaphyllum, aka “The Herb of Immortality”.

Presently, Robert spends his days designing and perfecting a sustainable method of small scale agriculture designed to empower individuals, small families and communities with the methods and means needed to produce abundant organic food within the confines of a small area at low cost with little technical knowledge required on the part of the grower.

The system which Robert employs relies upon a foundation of what he refers to as, “Homa Culture”, which he explains in a recently published book appropriately titled, “The Ancient Solution to Modern Pollution.”

This small publication presents what may be potentially one of the most empowering bodies of knowledge that individuals can leverage to improve their lives. He credits his teacher and revered spiritual mentor Shree Vasant V. Paranjpe as the spearhead and chief disseminator of this Ancient knowledge and takes absolutely no credit for it personally but simply acts as a conduit for sharing what has been graciously shared with him over the period of the last 42 years since first meeting Vasant in Washington DC in 1973.

His brand, “HomaGrown”, has a website and Facebook Fanpage, the purpose of which is to share and enlighten others interested in this Ancient Body of knowledge which has its origins in the Ancient Vedas. For those who may see the wisdom inherent in further pursuing a more complete understanding of this knowledge, Robert may be contacted directly at workshops@HomaGrown.com
