# Compound Name Synonym Index

This index lists in alphabetical order all compound's synonym names contained in the bodies of compound entries. A equal sign (=) and compound code number (from 1 to 23033) follow the synonym name immediately for locating the compound in the encyclopedia. Following symbols in prefix are ineffective in ordering: *D*-, *L*-, *dl*, *R*-, *S*-, *E*-, *Z*-, *O*-, *N*-, *C*-, *H*-, *cis*-, *trans*-, *ent*-, *meso*-, *rel*-, *erythro*-, *threo*-, *sec*-, *chiro*-, *para*-, *exo*-, *m*-, *o*-, *p*-, *n*-,  $\alpha$ -,  $\beta$ -,  $\gamma$ -,  $\delta$ -,  $\epsilon$ -,  $\kappa$ -,  $\xi$ -,  $\psi$ -,  $\omega$ -, (+), (-), ( $\pm$ ) etc., and: 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, {, }, [, ], (, ), ,, ;, \*, ', ", " ,  $\rightarrow$ , etc.
