# Preface

A significant preoccupation of modern traditional Chinese medicine (TCM) research has been the characterization of TCM components, such as pertain to their isolation, purification, structural determination, and pharmacological activity. As a reference tool, this *Encyclopedia of Traditional Chinese Medicines* presents a comprehensive and integrative work on surveying TCM plant sources, chemistry, pharmacology and medicinal effects and indications in a systematic manner.

This encyclopedia is an integrated achievement of a long-term TCM research project by the authors at the Chinese Academy of Sciences<sup>[1-4]</sup>, involving three parts and now organized in six volumes:

Part I (Volumes 1 to 4 and part of Volume 5) provides structural, physical, pharmacological and natural source information on 23,033 isolated chemicals captured from 5,535 references, basically up to year 2005. A great deal of effort has been paid on overlapping or contradictory data in order to provide readers with an accurate and reliable resource.

Part II (last part of Volume 5) describes 6,926 TCM plants and congeners, together with their medicinal effects and indications. The contents of Part I and Part II are all organized in alphabetical order.

Part III (Volume 6) includes seven indexes produced by a computer program. Based on the indexes, users can readily find concerned contents in multiple ways.

With this encyclopedia, the authors attempt to provide a bridge for the communication between the TCM system and Western medicinal systems, and a platform with multiple-subjects in support of research and development of the health sciences.

# Introduction

This encyclopedia mainly consists two parts - compound and plant. Its core content is the structural and pharmacological information of 23,033 phytochemicals, as well as medical effects and indications of 6,926 plant species from which the phytochemicals were isolated. The compounds, i.e. phytochemicals, are ordered alphabetically, and their ordinal numbers are used as compound unique codes. The plant species are coded from T0001 to T6926. With this code system, the complicated “many to many” relationship between compounds and plants can be clearly expressed, and any individual compound or plant could be located easily in this 6 volumes book.

## 1. Compound Entry

**Format of Compound Entry.** A compound entry starts with a title line, in which there are two items: the compound’s unique code and main name. Following the title line is the compound physical, pharmacological and source information, which may include 8 items:

**Title line (code number, main name)**

- A. Synonyms of the compound (if any);
- B. CASRN number (if any);
- C. Formula (relative molecular mass);
- D. Physicochemical properties;
- E. Pharmacological data (if any);
- F. Source(s);
- G. Reference(s);
- H. Graphic structure.

**Chemical Names and Synonyms.** Generally, a compound may have one scientific name and several trivial names. In the encyclopedia, based on original articles, we select one name as the “main name” (appeared at the title line of each compound entry), and use it to alphabetically order the 23,033 compounds in the first 5 volumes. The main name is either a scientific name or a trivial name. All of other names of each compound, if any, are presented after the title line.

**Stereochemistry of Chemical Structure.** We protracted all compound structures down to atom-bond level including complicated glycosides, with stereo-chemical information based on the data in the original papers. For example, the structure with full stereochemistry of compound 22,834 (isolated from CHUAN XU DUAN *Dipsacus asperoides*) is:

3-*O*-[ $\beta$ -*D*-Xylopyranosyl(1 $\rightarrow$ 4)]- $\beta$ -*D*-glucopyranosyl(1 $\rightarrow$ 4)]  
 [ $\alpha$ -*L*-rhamnopyranosyl(1 $\rightarrow$ 3)]- $\beta$ -*D*-glucopyranosyl(1 $\rightarrow$ 3)-  
 $\alpha$ -*L*-rhamnopyranosyl(1 $\rightarrow$ 2)- $\alpha$ -*L*-arabinopyranosyl hederagenin-  
 28-*O*- $\beta$ -*D*-glucopyranosyl(1 $\rightarrow$ 6)- $\beta$ -*D*-glucopyranoside

**Normalization of Pharmacological Data.** More than 8,000 TCM components in this encyclopedia have a variety of pharmacological data, which are valuable not only for the study of TCM, but also for the development of Western medicine. Because different expressions are used for the same kind of data in different articles, we have to define and normalize thousands pharmacological terms, so that the data could be expressed by a unified way, and be easily understood by readers.

The pharmacological terms in the encyclopedia are presented by a multi-layered structure. In the top layer, there are around 20 types of pharmacological activity terms, they are cytotoxic (*in vitro* anticancer), antineoplastic (*in vivo* anticancer), antibacterial, antifungal, antiviral, anti-HIV, anti-inflammatory, antioxidant, antimalarial, enzyme inhibitors, NO production inhibitors, cardiovascular activity, smooth muscle relaxant and stimulant, toxin and medium lethal dose LD<sub>50</sub>, and so forth. For each term there is a regulation about how to describe related pharmacological data. The following is an example:

**Term name** (*in vitro/in vivo*,  
 target cell **1**, quantitative data,  
 control Compound, control's data;  
 target cell **2**, quantitative data,  
 control Compound, control's data;  
 target cell **3**, quantitative data,  
 control Compound, control's data;  
 terse description of related mechanism if any).

Under the subtitle “Pharm:” of compound entry 248 (17-Acetoxyabda-7,12(*E*),14-triene), a set of bio-data is presented as follows:

Pharm: **Cytotoxic** (*in vitro*,  
 BT474 human galactophore cancer cell, IC<sub>50</sub> = 4.7µg/mL,  
 control Doxorubicin hydrochloride, IC<sub>50</sub> = 0.08µg/mL;  
 CHAGO human undifferentiated lung cancer cell, IC<sub>50</sub> = 5.7µg/mL,  
 control Doxorubicin hydrochloride, IC<sub>50</sub> = 2.3µg/mL;  
 HepG2 human liver cancer cell, IC<sub>50</sub> = 6.5µg/mL,  
 control Doxorubicin hydrochloride, IC<sub>50</sub> = 0.9µg/mL;  
 Kato3 human gastric cancer cell, IC<sub>50</sub> = 5.3µg/mL,  
 control Doxorubicin hydrochloride, IC<sub>50</sub> = 1.7µg/mL;  
 SW620 human colorectal adenocarcinoma cell, IC<sub>50</sub> = 5.6µg/mL,  
 control Doxorubicin hydrochloride, IC<sub>50</sub> = 1.1µg/mL).

In order to standardize abbreviations of cancer cells, such as BT474, CHAGO, etc., we defined and used 270 cancer cell codes (CCC) in the encyclopedia. For explanations of these codes, please see “Cancer Cell Codes in the Pharmacological Models” in Volume 1 of the encyclopedia.

By means of the formatted and structuralized methods, we normalized expressions of most pharmacological data appeared in the encyclopedia. For complete information of all 3367 normalized pharmacological activity terms, please see “Compound Pharmacological Activities Index” in Volume 6.

## 2. Plant Entry

**One Species One Entry.** Conventionally, a TCM name may include more than one plant species that have the same medical functions; therefore, a plant may not have an independent TCM entry and may be described under a TCM name. In this book, modern botany classification regulation is adopted and each plant species has an independent entry.

For example, traditional Chinese medicine DAN SHEN includes three species. They are equivalent in both effects and indications in TCM practice. In this encyclopedia, we defined three plant entries for each one of them.

T5680 *Salvia miltiorrhiza* (Lamiaceae); DAN SHEN; Danshen;  
 T5681 *Salvia miltiorrhiza* f. *alba* (Lamiaceae); BAI HUA DAN SHEN; Whiteflower Danshen;  
 T5688 *Salvia przewalskii* (Lamiaceae); GAN XI SHU WEI CAO; Przewalsk Sage.

With this method, we are able to smoothly link TCM information with that of modern botany.

**Simplified Latin Name.** For each TCM plant or TCM congener, four names are used in the encyclopedia. They are Latin name, English name, PIN-YIN name and Chinese

name, while the Chinese name only appears in TCM Plants PIN-YIN/Chinese Names Index” not in the main part of the book. For plant Latin name (e.g. scientific name), we use a simplified nomenclature, in which the nomenclator(s) information is not included. For example the Latin name of Chinese Angelica (DANG GUI) in the encyclopedia is “*Angelica sinensis*”, not “*Angelica sinensis* (Oliv.) Diels”.

**Family Name.** According to the “International Code of Botanical Nomenclature” (2007), the following eight authoritative family names are used in the encyclopedia. The family names of long usage, which are not used in are the encyclopedia, indicated in parentheses:

Apiaceae (Umbelliferae);  
 Arecaceae (Palmae);  
 Asteraceae (Compositae);  
 Brassicaceae (Cruciferae);  
 Clusiaceae (Guttiferae);  
 Fabaceae (Leguminosae);  
 Lamiaceae (Labiatae) and  
 Poaceae (Gramineae).

**PIN-YIN Name and Chinese Name.** A simplified PIN-YIN name system is used in the encyclopedia. That is not to include the four-tone mark. However, there are exceptions. Among the thousand PIN-YIN names in the book, there are seven confusing cases. For each mistakable name, a superscript is attached to the name for indicating its four-tone in order to distinguish it from other plant species. For example: BAI MAO GEN<sup>(1)</sup> and BAI MAO GEN<sup>(4)</sup> are two different TCM plants:

T3416 *Imperata cylindrica* var. *major* (Poaceae); BAI MAO GEN<sup>(1)</sup>; Lalang Grass Rhizome.  
 T3309 *Hydrastis canadensis* (Ranunculaceae); BAI MAO GEN<sup>(4)</sup>; Golden-seal.

Other six cases are:

T1449 *Cirsium japonicum* (Asteraceae); DA JI<sup>(4)</sup>; Japanese Thistle.  
 T2608 *Euphorbia pekinensis* (Euphorbiaceae); DA JI<sup>(3)</sup>; Peking Euphorbia.  
 T4124 *Matricaria chamomilla* [Syn. *Matricaria recutita*] (Asteraceae); MU<sup>(3)</sup> JU; Mayweed.  
 T0197 *Aegle marmelos* (Rutaceae); MU<sup>(4)</sup> JU; Sepiaria.  
 T1039 *Bruguiera gymnorrhiza* (Rhizophoraceae); MU LAN<sup>(3)</sup>; Common Bruguiera.  
 T3423 *Indigofera tinctoria* (Fabaceae); MU LAN<sup>(2)</sup>; True Indigo.  
 T6798 *Vitis vinifera* (Vitaceae); PU<sup>(2)</sup> TAO; European Grape.  
 T6267 *Syzygium jambos* (Myrtaceae); PU<sup>(3)</sup> TAO; Roseapple.  
 T2107 *Dendrobium nobile* (Orchidaceae); SHI HU<sup>(4)</sup>; Noble Dendrobium.  
 T2646 *Evodia rutaecarpa* var. *officinalis* (Rutaceae); SHI HU<sup>(3)</sup>; Official Evodia.  
 T1221 *Caryopteris divaricata* (Verbenaceae); YOU<sup>(2)</sup>; Divaricate Bluebeard.  
 T1478 *Citrus grandis* (Rutaceae); YOU<sup>(4)</sup>; Pummelo.

**Translation of TCM Effects Terms.** In the Volume 5 of the encyclopedia, 6,926 TCM Plant entries list in alphabetical order of *Latin names*, including 2,923 original TCM plants (including few of animals)<sup>[R01-R04]</sup> and 4,003 congeners (including a few of non-TCM medicinal plants). For each TCM plant, two most important features are traditional TCM effects and indications.

For preparing this encyclopedia, one of the greatest challenges is how to correctly translate each TCM term into correspondent English, so that Western readers are able to understand the true meaning of the content in the book. After comparing several translation systems, we decided to use Wiseman's terminological system<sup>[R05-R07]</sup> for this book.

Wiseman's system obeys two most important principles: (1). The English-language terms should be faithful to the original concepts in traditional Chinese medicine. (2). The English-language TCM terminology should be flexible enough to allow modifications and extensions so that derivative effects can be described by a structuralized manner. For instance, the term "quicken blood" describes a general effect meaning "activating blood flow" or "promoting blood circulation". Elaboration of this term produces "quicken blood and transform stasis", "quicken blood and relieve pain", "quicken blood and regulate menstruation", and so on. The following illustrations are an example of the structuralized expressions related to the term "quicken blood":

quicken blood and disinhibit water  
 quicken blood and dispel stasis  
 quicken blood and dispel wind  
 quicken blood and disperse swelling  
 quicken blood and disperse welling abscess  
 quicken blood and dissipate binds  
 quicken blood and dissipate stasis  
 quicken blood and free menstruation  
 quicken blood and free network vessels  
 quicken blood and free vessels  
 quicken blood and joint bones  
 quicken blood and move *qi*  
 quicken blood and move stasis  
 quicken blood and nourish heart  
 quicken blood and promote milk  
 quicken blood and quiet spirit  
 quicken blood and regulate menstruation  
 quicken blood and relieve pain  
 quicken blood and resolve toxin  
 quicken blood and settle pain  
 quicken blood and soothe sinews  
 quicken blood and stanch bleeding  
 quicken blood and strengthen sinews  
 quicken blood and transform stasis  
 quicken blood and vessels

**Translation of TCM Indications Terms.** Based on Wiseman's terminological system, "Chinese-English Dictionary of Traditional Chinese Medicine" compiled by Guangzhen Gao *et al.*<sup>[R08]</sup>, "An English-Chinese Medical Dictionary, Second Edition" compiled by Weiyi Chen *et al.*<sup>[R09]</sup>, and other reference dictionaries, we defined over 3,800 standard indication terms for translating TCM indications terms from Chinese to English. Among the 3,800 terms, 2,526 terms are actually used in the encyclopedia, in which 85% terms are traditional TCM terms and the rest 15% are common modern medicinal terms. Some typical examples of traditional TCM indication terms are as follows:

*yin* vacuity internal heat  
*yin* vacuity lung dryness  
*yin* vacuity tidal fever  
 chest impediment  
 chest impediment and heart pain  
 chest impediment and heart pain over back  
 chest oppression and pain  
 chest oppression with breathe hard  
 distention pain in rib-side  
 distention pain in stomach duct  
 distention pain in stomach duct and abdomen  
 externally contracted summer heat-damp  
 externally contracted wind evil  
 externally contracted wind-cold  
 externally contracted wind-heat  
 knocks and falls  
 sores  
 sores clove boil  
 swelling of sores and boils  
 sore scab and lichen  
 toxin swelling of sores

In summary, this encyclopedia provides a collection of more than 23,000 TCM chemical components isolated from natural resources and a large number of pharmacological activity data of these components. It may be used not only as a handbook to look for structures and pharmacological activities of TCM chemical components and source plant information, but also a fundamental platform for studying TCM with a systematic and integrative approach.

## Acknowledgements

We, the authors, would like to express our gratitude to Dr. Georga W.A. Milne, former chief editor of JCICS of American Chemical Society. Dr. Milne originally urged us to open a long-term project on TCM information study in 1993. From that time on, he has been supporting and helping us in many aspects.

We would like to thank a number of Chinese scientists who are working on TCM related fields for their support, help and information. Among them, special thanks are given to Prof. Peigen Xiao (member of Chinese Engineering Academy, Institute of Medicinal Plant Development, Chinese Academy of Medical Sciences & Peking Union Medical College), Prof. Guanhua Du (Institute of Materia Medica, Chinese Academy of Medical Sciences & Peking Union Medical College), Prof. Weiliang Wong (China Academy of Chinese Medical Sciences), and Prof. Luhua Lai (Peking University).

We would like to thank the leaders and colleagues of the Institute of Process Engineering (IPE), Chinese Academy of Sciences (CAS) for their understanding, support, and help. Particularly, thanks go to Prof. Mooson Kwauk (member of the CAS), Prof. Jinghai Li (member of the CAS, Vice president of CAS), Prof. Zhihong Xu, Prof. Zhiguo Su, Prof. Suojiang Zhang (Director of IPE), Prof. Yunfa Chen (Vice director of IPE), Prof. Huizhou Liu, Prof. Zhangyuan Yang, Prof. Hao Wen, and Prof. Xiaoxia Li.

We would like to thank our colleagues and students in the Molecule Design Group in the Lab of Computer Chemistry (LCC) for their indispensable contributions including information search, data collection, software development and technical support, etc. Among them, special thanks are given to Mr. Wucheng Tang, Ms. Hongping Xu, Ms. Qi Li, Asso. Prof. Dianfang Cao, Dr. Xianfeng He, Dr. Min He, Dr. Jianfeng Pei, Dr. Tao Peng, Dr. Jing Lei, Dr. Aihua Xie, Dr. Chengzhong Liao, Dr. Aijun Lu, Dr. Bing Liu, Dr. Haibo Liu, and Master Yingxin Qiao.

Cordial thanks are also given to Asso. Prof. Lanying Zhao, Asso. Prof. Peiwu Wang and Asso. Prof. Yuanzhang Luo for their toilsome work on information collection in the early stage of the project.

Finally, we would like to give heartfelt thanks to our family members. Without their complete and never-ending support, this book would never have been completed.

# How to Use the Books

## 1. Three Kinds of “Many to Many” Relationships

To help readers effectively search and use of the books, authors strongly suggest readers being familiar with the structure of the encyclopedia and certain important linkers or pointers between different data sets.

Firstly, in order to avoid confusing cases, please keep in mind the following three features of the book:

(a) In the encyclopedia, all of pharmacological data belong to compounds, not to plants. In other words, the encyclopedia doesn't include plants' pharmacological data.

(b) All effect and indication terms belong to TCM plants, not to compounds. And almost all of effect terms as well as 85% indication terms are pure Chinese traditional concepts.

(c) In the encyclopedia, there are three kinds of “many to many” relationships: (i), compounds to plants, which is the most important relationship. (ii), pharmacological data to compounds in the molecular level only. (iii), plants to effects/indications in the species level.

Pharm. data ↔ Compound 1		Plant T0001 ↔ effects, indications
Pharm. data ↔ Compound 2		Plant T0002 ↔ effects, indications
Pharm. data ↔ Compound 3	↔	Plant T0003 ↔ effects, indications
.....		.....
Pharm. data ↔ Compound 23032		Plant T6925 ↔ effects, indications
Pharm. data ↔ Compound 23033		Plant T6926 ↔ effects, indications
(Molecular level)		(Species level)

### Sketch Map of Three Important “Many to Many” Relationships

## 2. Seven Useful Indexes

In Volume 6, there are seven indexes for data searching.

The indexes 1-3 are tools to search compounds from different starting-points:

**Index 1** (Compound Pharmacological Activity Index) links pharmacological terms

with related compound codes. For example, if there is a question as:

“Which compounds have *in vitro* cytotoxic activity against human breast cancer cells?”

From the index 1, the answer can easily be obtained as follows:

Cytotoxic, BC hmn breast cancer cells 24, 349, 526, 2244, 3416, 3429, 3708, 4775, 5095, 6759, 6759, 6759, 12453, 12454, 15494, 15495, 18515, 20671.

Cytotoxic, BC-1 hmn breast cancer cells 1277, 2260, 5064, 5327, 6759, 6759, 8220, 8221, 8222, 8235, 10250, 10297, 10511, 11353, 13489, 13490, 13491, 13492, 13493, 13494, 13495, 15919, 17008, 18866, 20809.

Cytotoxic, BCA-1 hmn breast cancer cells 6759, 13468, 13469, 13470, 15739.

Cytotoxic, Bcap37 hmn breast cancer cells 843, 11392, 13123, 16183, 17717, 18499.

Then, from compounds code numbers, one can get detailed data for each compound.

**Index 2** (Compound Molecular Formula Index) connects a molecular formula to its all isomers. For example, there are five isomers with formula  $C_{45}H_{76}O_{18}$ :

$C_{45}H_{76}O_{18}$

Abutiloside F, 40

Asp-IV, 1905

Asp-V, 1906

Trigoneoside IIIa, 21669

Trigoneoside IIIb, 21670

**Index 3** (Compound Synonym Index) is useful for searching a compound from a known name. A strong suggestion to readers is that when searching a compound from a known name, to search twice probably is necessary: firstly from entry title in the encyclopedia text and then from the index 3.

The indexes 4–7 are tools to search TCM plants:

**Index 4** (TCM Plant English Name Index) links a Plant English Name to other names of the plant, for example:

Chinese Angelica = T0495 *Angelica sinensis* = DANG GUI

Siberian Phlojodicarpus = T4804 *Phlojodicarpus sibiricus* = ZHANG GUO QIN

Dahurian Angelica = T0478 *Angelica dahurica* [Syn. *Angelica porphyrocaulis*] = BAI ZHI

Gigantic Angelica = T0483 *Angelica gigas* = CHAO XIAN DANG GUI

Narrowleaf Angelica = T0476 *Angelica anomala* = XIA YE DANG GUI

**Index 5** (TCM Plant PIN-YIN and Chinese Name Index) links PIN-YIN name to Latin name and/or English name, for example:

BAI HUA QIAN HU = T4768 *Peucedanum praeruptorum* = Whiteflower Hogfennel

BAI HUA SHE GAN = T3457 *Iris dichotoma* = Vesper Iris

BAI HUA SHE SHE CAO = T4485 *Oldenlandia diffusa* [Syn. *Hedyotis diffusa*] = Spreading Hedyitis

**Index 6** (TCM Plant Traditional Effects Index) and **Index 7** (TCM Plant Traditional Indications Index) connect specific effect and/or indication to related plants.

For example, to search all plants with effect “nourish heart and quiet spirit”, the result is:

**nourish heart and quiet spirit:**

T0944 *Biota orientalis* [Syn. *Thuja orientalis*; *Platyclusus orientalis*],  
 T1292 *Celastrus orbiculatus* [Syn. *Celastrus articulatus*],  
 T1381 *Choerospondias axillaris*,  
 T4194 *Menyanthes trifoliata*,  
 T4400 *Nelumbo nucifera*,  
 T4902 *Pimpinella thelungiana*,  
 T5108 *Polygonum multiflorum*,  
 T5497 *Rhodiola kirilowii*,  
 T5701 *Salvia yunnanensis*.

If searching all plants with indication “angina pectoris” (a modern medicinal term), “externally contracted wind-cold” (a TCM term), and “externally contracted wind-heat” (a TCM term), you will obtain the following results:

**angina pectoris:** T1215 *Carthamus tinctorius*, T1395 *Chrysanthemum morifolium* [Syn. *Dendranthema morifolium*], T1775 *Crataegus pinnatifida*, T1778 *Crataegus pinnatifida* var. *major*, T2274 *Dryobalanops aromatica*, T2389 *Epimedium acuminatum*, T2390 *Epimedium brevicornum*, T2392 *Epimedium davidii*, T2394 *Epimedium elongatum*, T2398 *Epimedium koreanum*, T2401 *Epimedium pubescens*, T2402 *Epimedium sagittatum*, T2404 *Epimedium sutchuenense*, T2406 *Epimedium wushanense*, T2846 *Ganoderma japonicum* [Syn. *Ganoderma sinense*], T2848 *Ganoderma lucidum*, T2964 *Ginkgo biloba*, T3388 *Ilex chinensis* [Syn. *Ilex purpurea*], T3396 *Ilex pubescens*, T3397 *Ilex pubescens* var. *glaber*, T3875 *Liriope spicata* var. *prolifera*, T3925 *Loranthus parasiticus* [Syn. *Loranthus chinensis*; *Taxillus chinensis*], T3926 *Loropetalum chinense*, T4303 *Moschus moschiferus*; *Moschus berezovskii*; *Moschus sifanicus*, T4507 *Ophiopogon japonicus*, T4608 *Panax pseudo-ginseng* var. *notoginseng* [Syn. *Panax notoginseng*], T4953 *Piper longum*, T5312 *Pueraria edulis*, T5313 *Pueraria lobata* [Syn. *Pueraria thunbergiana*; *Pueraria pseudohirsuta*], T5316 *Pueraria omeiensis*, T5318 *Pueraria phaseoloides*, T5320 *Pueraria thomsonii*, T5680 *Salvia miltiorrhiza*, T5681 *Salvia miltiorrhiza* f. *alba*, T5688 *Salvia przewalskii*, T6510 *Trichosanthes kirilowii*, T6513 *Trichosanthes rosthornii* [Syn. *Trichosanthes uniflora*], T6584 *Typha angustata*, T6585 *Typha angustifolia*, T6587 *Typha latifolia*.

**externally contracted wind-cold:** T4039 *Magnolia grandiflora*, T4445 *Notopterygium forbesii* [Syn. *Notopterygium franchetii*], T4446 *Notopterygium incisum*, T4956 *Piper mullesua*, T5727 *Saposhnikovia divaricata* [Syn. *Ledebouriella seseloides*].

**externally contracted wind-heat:** T0480 *Angelica decursiva* [Syn. *Peucedanum decursivum*], T1395 *Chrysanthemum morifolium* [Syn. *Dendranthema morifolium*], T1933 *Cyclea sutchuenensis*, T2798 *Fritillaria verticillata* var. *thunbergii* [Syn. *Fritillaria thunbergii*], T3819 *Ligusticum brachylobum*, T4413 *Nepeta cataria*, T4761 *Peucedanum longshengens*, T4768 *Peucedanum praeruptorum*, T4769 *Peucedanum rubricaulis*, T6791 *Vitex rotundifolia* [Syn. *Vitex trifolia* var. *simplicifolia*], T6793 *Vitex trifolia*.

### 3. Data Survey Example of Compound Entry

At last, we would like to take Ursolic acid (compound code 22270 in the books) as a data survey example. Under this compound there are a quite number of data as follows:

**22270 Ursolic acid**

$\beta$ -Ursolic acid [77-52-1] C<sub>30</sub>H<sub>48</sub>O<sub>3</sub> (456.72).

White solid powder (chloroform–methanol), mp 298~294°C, 265~267°C.

**Pharm: (27 items)**

- Cytotoxic** (KB, ED<sub>50</sub> > 25μg/mL, control Doxorubicin, ED<sub>50</sub> = 0.12μg/mL; Hep3B, ED<sub>50</sub> > 25μg/mL, control Doxorubicin, ED<sub>50</sub> = 0.14μg/mL; Colon205, ED<sub>50</sub> > 25μg/mL, control Doxorubicin, ED<sub>50</sub> = 0.10μg/mL; HeLa, ED<sub>50</sub> > 25μg/mL, control Doxorubicin, ED<sub>50</sub> = 0.11μg/mL)<sup>[4369]</sup>;
- cytotoxic** (*in vitro*, HONE-1 cell, IC<sub>50</sub> = (8.8±1.5)μmol/L, control Etoposide, IC<sub>50</sub> = (0.5±0.2)μmol/L, *cis*-Platin, IC<sub>50</sub> = (3.2±0.5)μmol/L; KB cell, IC<sub>50</sub> = (8.2±2.7)μmol/L, Etoposide, IC<sub>50</sub> = (0.9±0.3)μmol/L, *cis*-Platin, IC<sub>50</sub> = (4.4±0.9)μmol/L; HT29 cell, IC<sub>50</sub> = (4.7±1.5)μmol/L, Etoposide, IC<sub>50</sub> = (2.4±0.5)μmol/L, *cis*-Platin, IC<sub>50</sub> = (5.7±1.1)μmol/L)<sup>[5254]</sup>;
- antineoplastic** (liver cancer cells *in vitro*, mus ascites carcinoma *in vivo*, life was prolonged);
- antibacterial** (*Escherichia coli*, IZD = 13~15mm, control Chloramphenicol, IZD = 16~20mm, control DMSO (4%), IZD < 10mm; *Staphylococcus aureus*, IZD = 10~12mm, control Chloramphenicol, IZD = 16~20mm, control DMSO (4%), IZD < 10mm; *Bacillus subtilis*, IZD = 13~15mm; control Chloramphenicol, IZD = 16~20mm, control DMSO (4%), IZD < 10mm)<sup>[5315]</sup>;
- antibacterial** (*Staphylococcus* spp. *in vitro*, MIC = 300μg/mL, gram-positive bacteria *in vitro*, MIC = 50~400μg/mL, gram-negative bacteria *in vitro*, MIC = 200~800μg/mL, microzyme *in vitro*, MIC = 100~700μg/mL);
- antitubercular** (*Mycobacterium tuberculosis*, MIC = 41.9μg/mL, cytotoxic, Vero cells, IC<sub>50</sub> = 46.5μg/mL, SI (IC<sub>50</sub>/MIC) = 1.11, positive control Rifampin, MIC = 0.03μg/mL, IC<sub>50</sub> = 98.3μg/mL, SI = 3277)<sup>[4986]</sup>;
- anticonvulsant** (induced by corazol);
- anti-inflammatory** (rat, induced by embedding woolball, 12.5mg/(kg·d) ip, 7 days, effective);
- anti-inflammatory** (*in vitro*, murine macrophage RAW264.7 Cells, inhibits LPS-induced NO and PGE<sub>2</sub> release)<sup>[5016]</sup>;
- COX-2 enzyme selective inhibitor** (mean IC<sub>50</sub> of isomers = 130μmol/L)<sup>[4415]</sup>;
- COX-2 enzyme inhibitor** (PMA-treated hmn mammary and oral epithelial cells, molecular mechanisms is mediated by a cAMP response element in the COX-2 promoter, associated with inhibition of protein kinases)<sup>[4415]</sup>;
- antipyretic** (clearly reduces normal body temperature of rat);
- reduces serum transaminase** (animal, 100mg/kg);
- antitrypanosomal** (epimastigotes of *Trypanosoma cruzi*, MLC = 6.2μmol/L, control Gentian violet, MLC = 6.2μmol/L)<sup>[2579]</sup>;
- mucin release stimulator** (acts directly on airway mucin-secreting cells, increased mucin release (40~50)% above control at the highest concentrations 0.00001~0.001mol/L, possible use to treatment of chronic airway diseases)<sup>[4084]</sup>;
- platelet aggregation inhibitor** (2~5mg/mL collagen-induced, IC<sub>50</sub> = (511±4)μmol/L, control ASA, IC<sub>50</sub> = (420±3)μmol/L; 1~4μmol/L epinephrine-induced with 0.8~1.0mg/mL collagen, IC<sub>50</sub> = (82.6±2.8)μmol/L, ASA, IC<sub>50</sub> = (53.0±4.5)μmol/L; 10~40μmol/L Sodium arachidonate-induced with 0.8~1.0mg/mL collagen, IC<sub>50</sub> =

(669±12)μmol/L, ASA, IC<sub>50</sub> = (66.0±2.1)μmol/L; 1~5μmol/L PGH<sub>2</sub>/TXA<sub>2</sub> receptor agonist U46619-induced with 0.8~1.0mg/mL collagen, IC<sub>50</sub> > 1000μmol/L, ASA, IC<sub>50</sub> = (340±12)μmol/L)<sup>[4994]</sup>;

**tissue factor inhibitor inactive**<sup>[5387]</sup>;

**antirheumatic**<sup>[5341]</sup>;

**anti-diabetic**<sup>[5341]</sup>;

**antiulcer**<sup>[5341]</sup>;

**hypolipidemic**<sup>[5341]</sup>;

**anti-atherosclerotic**<sup>[5341]</sup>;

**anti-HIV**<sup>[5341]</sup>;

**TGF-β1 antagonist** (inhibits the binding of <sup>125</sup>I-TGF-β1 to its receptor in Balb/c 3T3 cell, IC<sub>50</sub> = (6.9±0.8)μmol/L, suggests TGF-β1 antagonistic activity is responsible, at least in part, for therapeutic efficacy of *Clerodendranthus spicatus* to treat humans with renal disease)<sup>[5496]</sup>;

**glucocorticoid** (enhances glycogen in liver, reduces glycogen in heart and striated muscles);

**LD<sub>50</sub>** (mus, ip) = 680mg/kg.

### Sources: (52 species)

BAI HUA SHE SHE CAO *Oldenlandia diffusa* [Syn. *Hedyotis diffusa*] (whole herb: mean content of 16 origins = 0.211%)<sup>[5508]</sup>;

BI LU GOU TENG *Uncaria tomentosa*,

CHE QIAN *Plantago asiatica* (whole herb: content scope = 0.28%~2.32%, mean content = 0.97%)<sup>[5508]</sup>;

CHI NAN *Syzygium buxifolium*,

CHONG YA YAO *Isodon ternifolius*,

CI WU JIA YE *Acanthopanax senticosus* [Syn. *Eleutherococcus senticosus*],

DA CHE QIAN *Plantago major*,

DA ZAO *Ziziphus jujuba* (ripe fruit: mean content = 0.016%)<sup>[5508]</sup>,

DAN SHEN *Salvia miltiorrhiza*,

DIAN NAN HONG HOU KE *Calophyllum polyanthum* (seed: yield = 0.0064%dw),

DONG LING CAO *Rabdosia rubescens* (whole herb: mean content = 0.414%)<sup>[5508]</sup>; leaf: mean content = 0.573%)<sup>[5508]</sup>;

DU ZHONG *Eucommia ulmoides*,

DUAN TING SHAN MAI DONG *Liriope muscari* (tuber),

GOU GU YE *Ilex cornuta* (leaf: mean content = 0.96%)<sup>[5508]</sup>,

GUANG JING QIAN CAO *Rubia wallichiana* (stem),

HONG HUA LU TI CAO *Pyrola incarnata* (whole herb: content = 2.06%)<sup>[5508]</sup>,

HU BEI SHAN ZHA *Crataegus hupehensis* (dried ripe fruit: mean content = 0.455%),

JIAN YE TOU WU GEN *Ligularia sagitta*,

LIAN QIAN CAO *Glechoma lungituba*,

LIAN QIAO *Forsythia suspensa*,

LIU QIU SHE GEN CAO *Ophiorrhiza liukiensis* (whole herb),

MA BIAN CAO *Verbena officinalis* (whole herb: mean content of 5 batch samples = 0.227%)<sup>[5508]</sup>,

MAO CAO LONG *Ludwigia octovalvis* (whole herb: yield = 0.00012%dw),

MAO PAO TONG *Paulownia tomentosa*,

MAO XU CAO *Clerodendranthus spicatus*,

MU GUA *Chaenomeles sinensis*,

NV ZHEN ZI *Ligustrum lucidum*,

PI PA YE *Eriobotrya japonica* (dried leaf: mean content = 0.677%)<sup>[5508]</sup>,

PI PA YE *Eriobotrya japonica* (stem and leaf),

PING CHE QIAN *Plantago depressa* (whole herb: mean content = 0.276%)<sup>[5508]</sup>,

RI BEN LU TI CAO *Pyrola japonica*,

RONG SHU *Ficus microcarpa* (aerial root),  
 SHAN DI XIANG CHA CAI *Isodon oresbia*,  
 SHAN LI HONG *Crataegus pinnatifida* var. *major*,  
 SHAN ZHA *Crataegus pinnatifida* (fruit: content scope = 0.31%~0.56%)<sup>[5501]</sup>,  
 SHAN ZHU YU *Cornus officinalis* [Syn. *Macrocarpium officinale*] (dried ripe fruit: content  
 scope = 0.24%~0.32%)<sup>[5501]</sup>, mean content = 0.263%)<sup>[5508]</sup>,  
 SHI NAN *Photinia serrulata* (leaf: mean content = 1.50%)<sup>[5508]</sup>,  
 SHI SHENG BIAN LEI *Gentianopsis paludosa*,  
 SHI YE *Diospyros kaki* (dried leaf: mean content = 0.784%)<sup>[5508]</sup>,  
 SHU HUA JIE CAO *Valeriana laxiflora* (aerial parts and root),  
 SUAN ZAO *Ziziphus jujuba* var. *spinosa* (ripe fruit: content = 0.030%)<sup>[5508]</sup>,  
 SUO YANG *Cynomorium songaricum* (fleshy stem: content = 0.78%)<sup>[5508]</sup>,  
 WEI LING CAI *Potentilla chinensis*,  
 WU GENG WU JIA PI *Acanthopanax sessiliflorus* (fruit),  
 XIA KU CAO *Prunella vulgaris* (dried spike: content = 0.780%)<sup>[5508]</sup>,  
 YANG MEI SHU PI *Myrica rubra* (bark: content = 0.027%),  
 YE SHAN ZHA *Crataegus cuneata* (dried ripe fruit: mean content of 3 origins =  
 0.399%)<sup>[5508]</sup>,  
 YI LANG QING LAN *Dracocephalum kotschyi*,  
 ZHI ZI *Gardenia jasminoides* [Syn. *Gardenia florida*] (dried ripe fruit: mean content =  
 0.041%)<sup>[5508]</sup>,  
 ZHOU YE LU TI CAO *Pyrola rugosa* (whole herb: content = 3.00%)<sup>[5508]</sup>,  
*Cussonia bancoensis*,  
 Occurs in many plants.

# Abbreviations and Symbols

12(S)-HETE	12(S)-Hydroxy-5,8,10,14-EicosaTetraEnoic acid	cAMP-PDE	cAMP-phosphodiesterase
<sup>125</sup> I-TGF- $\beta$ 1	<sup>125</sup> I-Transforming Growth Factor- $\beta$ 1	CAPE	Caffeic Acid Phenethyl Ester
5-FU	5-FluoroUracil	CB	cytochalasin B
5-HT	5-HydroxyTryptamine (serotonin)	CC	macrophage inflammatory protein (MIP-1 $\beta$ ), monocyte chemotactic protein (MCP-2), and C lymphotactin (Itn) (a chemokine family)
95%FL (=CI <sub>95</sub> )	95% Fiducial Limits (=95% Confidence Interval)	CC <sub>0</sub>	Minimum cytotoxic concentration
AA	Arachidonic Acid	CC <sub>50</sub>	IC <sub>50</sub> of cytotoxicity (concentration of the 50% cytotoxic effect)
AAPH	2,2'-Azo-bis-(2-AmidinoPropane)-diHydrochloride	CCR1	chemokine receptor 1
ABTS <sup>+</sup>	2,2'-Azino-Bis-(3-ethylbenzThiazoline 6-Sulphonic acid), radical	CD	concentration required to double enzyme (induction) activity
ACAT	Acyl-CoA Cholesterol acyltransferase	CD	Concentration required to double quinone reductase (induction) activity
ACE	Angiotensin Converting Enzyme	CD <sub>50</sub>	medium Convulsive Dose
Ach	Acetylcholine	cGMP	cyclic guanosine monophosphate
AChE	Acetylcholinesterase	cGMP-PDE	cGMP-phosphodiesterase
ACTH	AdrenoCorticoTropic Hormone	CGN	<i>cis</i> -Golgi network
AD	Alzheimer's disease	CGRP	Calcitonin gene-related peptide
ADM	adriamycin	CHO	Chinese hamster ovarian
ADP	adenosine diphosphate	CI	Chemopreventive index (=IC <sub>50</sub> /CD)
AG	aminoguanidine	CI <sub>95</sub> (=95%FL)	95% Confidence Interval (=95% Fiducial Limits)
AggRt	aggregation rate	CIC	complete inhibiting concentration
AIDS	acquired immunodeficiency syndrome	CIMC	complete inhibiting minimum concentration
ALS	amyotrophic lateral sclerosis	CINC-1	cytokine-induced neutrophil chemoattractant 1
ALT	alanine aminotransferase	CMV	Cytomegalovirus
AMP	adenosine monophosphate	CNQX	6-Cyano-7-nitroquinoxaline-2,3-dione (non-NMDA receptor antagonist)
AMV	avian myeloblastosis virus	CNS	central nervous system
AP	angina pectoris	ConA	concanavalin A
AP-1	activator protein-1	COX	cyclooxygenase
APN	Aminopeptidase N	COX-1	cyclooxygenase-1
APV	<i>dl</i> -2-Amino-5-phosphonovaleric acid (a competitive antagonist of the NMDA receptor)	COX-2	cyclooxygenase-2
aq.	aqueous solution	CPT	camptothecin
ASA	AcetylSalicylic Acid	CRF	corticotrophin releasing factor
AST	aspartate transaminase; aspartate aminotransferase	CRH-1	corticotrophin releasing hormone-1
AT-III	Antithrombase-III	CRP	C-reactive protein
ATPase	Adenosine triphosphatase	CV-3988	<i>rac</i> -3-( <i>N</i> -octadecylcarbomoyloxy)-2-methoxypropyl 2-thiazoliethyl phosphate
AZT	3'-azido-3'-deoxythymidine	CVS	cardiac vascular system
BACE1	$\beta$ -Secretase	CXC	Stromal cell-derived factor (SDF)-1 $\alpha$ and IL-8 (a chemokine)
BChE	Butyrylcholinesterase	CYP1A	Cytochrome P450 1A
bFGF	basic Fibroblast Growth Factor	CYP2D6	Cytochrome P450 2D6
BHA	Butylated HydroxyAnisole; 3- <i>tert</i> -Butyl-4-HydroxyAnisole	CYP3A4	Cytochrome P450 3A4
BHT	Butylated HydroxyToluene	d	day
bid	bis in die (Latin)	DCFH	2',7'-dichlorodihydrofluorescein dye
BLM	bleomycin	DDDP	DNA-dependent DNA polymerase
bp	boiling point	dec	decomposition
BST	Brine Shrimp lethality bioassay = Brine Shrimp Test	D-GalN	D-galactosamine
c	concentration		
C5a	complement 5a		
cAMP	cyclic adenosine monophosphate		

DGAT	Diacylglycerol acyltransferase	GSH	Glutathione; <i>N</i> -( <i>N</i> - <i>L</i> - $\gamma$ -Glutamyl- <i>L</i> -cysteinyl)glycine
dil.	dilute	GTP	Guanosine TriPhosphate
DIZ	Diameter of Inhibitory Zone	GVHR	Graft-Versus-HostReaction
DMBA	9,10-dimethyl-1,2-benzanthracene (carcinogen); 7,12-dimethylbenz[a]anthracene (carcinogen)	h	hour
DMDP	(2 <i>R</i> ,3 <i>R</i> ,4 <i>R</i> ,5 <i>R</i> )-2,5-DihydroxyMethyl-3,4-Dihydroxy-Pyrrolidine	HAD	hmn immunodeficiency virus associated dementia
DMSO	DiMethyl SulphOxide	HBeAg	hmn type B Hepatitis, e Antigen
DNA	deoxyribonucleic acid	HBsAg	hmn type B Hepatitis, Surface Antigen
DNJ	1-Deoxynojirimucin (one kind of polyhydroxy alkaloid, glucosidase inhibitor)	HBV	Hepatitis B Virus
DOX	doxorubicin	HC <sub>50</sub>	medium Hemolytic Concentration
DPI	Diphenyleneiodonium	HCoV-229E	hmn coronavirus strain 229E
DPPH	1,1-DiPhenyl-2-PicrylHydrazyl free radical	HD	Huntington's disease
DS8000	Dextran sulphate, prepared from average Mr 8000	HER rat	Hypertensive Essential Rat
DSCG	DiSodium ChromoGlycate (anti-allergic agent)	HIV	hmn immunodeficiency virus
dw	dried weight	HIV-1	hmn immunodeficiency virus type 1
E.A.	Enzyme Activity	HIV-1 IN	hmn immunodeficiency virus type 1 integrase
EBV-EA	Epstein-Barr Virus Early Antigen	HIV-1 RT	hmn immunodeficiency virus type 1 reverse transcriptase
EC	Effective Concentration	HIV-RT	hmn immunodeficiency virus reverse transcriptase
EC <sub>50</sub>	medium Effective Concentration	hmn	human
ED	Effective Dose	HSV-1	herpes simplex virus 1
ED <sub>25</sub>	Effective Dose for 25%	HSV-2	herpes simplex virus 2
ED <sub>50</sub>	medium Effective Dose (in some cases for the medium Effective Concentration)	HVA	homovanillic acid
EGCG (EGCg)	(-)-Epigallocatechin gallate	hydroxyl radical	OH <sup>•</sup>
EGF	Epidermal Growth Factor (it protects MPP <sup>+</sup> -induced cell death)	ia	intra-arterial injection
EGFR	Epidermal Growth Factor Receptor	IAA	indole-3-acetic acid
ELAM-1	Endothelial-Leukocyte Adhesion Molecule-1	IC	Inhibiting Concentration
ELISA	Enzyme-Linked ImmunoSorbent Assay	IC <sub>50</sub>	median Inhibiting Concentration
eotaxin	eosinophilous cytotoxin	IC <sub>100</sub>	Absolute Inhibiting Concentration
ERK	Extracellular signal-Regulated Kinase	ICAM-1	Intercellular Cell Adhesion Molecule-1
ET	experimental times	ICR	Imprinting Control Region mouse
FAG	Fagomine (one kind of polyhydroxy alkaloid, glucosidase inhibitor)	id	intradermal injection
FCA	Freund's complete adjuvant	ID	Inhibiting Dose
FI	Feeding Index (= ((C-T)/(C+T)×100)	ID <sub>50</sub>	Median Inhibiting Dose
Flu-A	influenza virus type A	IFN	interferon
fMLP	<i>N</i> -formyl- <i>L</i> -Methionyl- <i>L</i> -Leucyl- <i>L</i> -Phenylalanine	IFN- $\gamma$	Interferon- $\gamma$
fp	freezing point	IgE	Immunoglobulin E
FR <sub>50</sub>	Feeding ratio when the consumed area of control disc (CCD) is 50% [FR = CTD(consumed area of treated disc)/CCD]	IgG	Immunoglobulin G
fw	fresh weight	IL	interleukin
G6PD	Glucose-6-Phosphate Dehydrogenase	IL-1	Interleukin-1
GABA	$\gamma$ -aminobutyric acid	IL-1 $\alpha$	interleukin-1 $\alpha$
GaIN	galactosamine	IL-1 $\beta$	interleukin-1 $\beta$
GI	growth inhibition	IL-2	Interleukin-2
GI <sub>50</sub>	the concentration of sample necessary to inhibit the growth to 50% of the control	IL-4	Interleukin-4
Glu	glutamate	IL-6	Interleukin-6
GOT	Glutamate-Oxaloacetate Transaminase	IL-8	Interleukin-8
Gp	Gastro protective effect	IL-10	Interleukin-10
gpg	guinea pig	IL-12	Interleukin-12
GPT	GlutamicPyruvic Transaminase	im	intramuscular injection
GRO	Growth-Related Oncogene	<i>in vitro</i>	<i>in vitro</i>
		<i>in vivo</i>	<i>in vivo</i>
		Indo	indomethacin
		iNOS	inducible Nitric Oxide Synthase
		InRt	inhibitive rate
		ip	intraperitoneal injection

i.t.	intrathecal injection	MMP	Matrix MetalloProteinases
iv	intravenous injection	MMP-2	Matrix MetalloProteinase-2
IZA	Inhibition Zone Area (mm <sup>2</sup> )	mp	melting point
IZD	Inhibition Zone Diameter (mm)	mPGES	microsomal ProstaGlandin E Synthase
J774.A1	murine monocyte/macrophage cell J774.A1	MPP+	1-methyl-4-phenylpyridinium ion (neurotoxin)
JNK	c-Jun NH <sub>2</sub> -terminal kinase	MRSA	Methicillin-Resistant <i>Staphylococcus aureus</i>
KD <sub>50</sub>	Dose required to Knock down 50% of the population of insects	MSSA	Methicillin-Sensitive <i>Staphylococcus aureus</i>
LC <sub>50</sub>	concentration at which only 50% of the cell are viable	MTC	Minimal Toxic Concentration
LC <sub>50</sub>	concentration of inhibiting luminous intensity 50%	MTT	A Cytotoxicity measurement method (tetrazolium-based colorimetric assay used for cytotoxicity bioassay, see Rubinstein L. V., et al., <i>Nat. Cancer Inst.</i> , 82, 1113-1118, 1990)
LCIC	Lowest Complete Inhibition Concentration	mus	mouse
LD	Lethal Dose	<i>n</i>	number of parallel experiments
LD <sub>100</sub>	100% Lethal Dose	nAChR	neuronal nicotinic AcetylCholine Receptor
LD <sub>50</sub>	medium Lethal Dose	NADH	reduced nicotinamide adenine dinucleotide
LDH	lactate dehydrogenase	NADPH	cytochrome C reductase
LDL	Low Density Lipoprotein	NCCLS	A standard antibacterial activity test method (see Wayne P. A., "National Committee for Clinical Laboratory Standards Performance Standards for Antimicrobial Disk Susceptibility Tests," 6th ed., Approved standards M2-A6. NCCLS, 1997)
L-NA	N <sup>o</sup> -L-nitroarginine	NDGA	Nordihydroguaiaretic acid
L-NMMA	N <sup>G</sup> -monomethyl-L-arginine	NEP	Neutral EndoPeptidase
LOX	Lipoxygenase	NF	Nuclear Factor
LPO	lipid peroxidation	NF-κB	Nuclear Factor κB
LPS	lipopolysaccharide	NFAT	Nuclear Factor of Activated T cell
LTB <sub>4</sub>	Leukotriene B <sub>4</sub>	NGF	Nerve Growth Factor
LTC <sub>4</sub>	Leukotriene C <sub>4</sub>	NMDA	N-methyl-D-aspartate
LTD <sub>4</sub>	Leukotriene D <sub>4</sub>	NO	nitric oxide
MA	maytenfolic acid	non-oral	paraoral
MA	maslinic acid	NOR1	(+/-)-(E)-4-methyl-2-[(E)-hydroxyimino]-5-nitro-6-methoxy-3-hexenamid
MA	minimal amount	NOS-2	Nitric oxide synthase type-2
MABA	Microplate Alamar Blue Assay	OCIF	OsteoClastogenesis-Inhibitory Factor
MAC-1	integrin MAC-1	oral	oral
MAO-A	Monoamine oxidase A	OVA	ovalbumin
MAO-B	Monoamine oxidase B	oxazolone	oxazolone
MAPK	Mitogen-Activated Protein Kinase	OZ	opsonized zymosan
MCC	Minimum Cytocidal Concentration	P450	Cytochrome P450
MCP	Monocyte Chemotactic Protein	PAF	Platelet Activating Factor
MCTHBE	Minimum Concentration for Total Haemolysis of Bovine Erythrocytes (µg/mL)	PAF	Platelet Aggregation Factor
MDA	Methylene Dihydroxy Amphetamine	PAI-1	Plasminogen Activator Inhibitor type 1
MDA	Malondialdehyde	Para-3 (=PIV3)	Parainfluenza type 3 virus
MDR	MultiDrug Resistance	PBMC	hmN Peripheral Blood Mononuclear Cell
MED	Minimal Effective Dose	PCA reaction	Passive Cutaneous Anaphylaxis reaction
MFC	Minimal Fungicidal Concentration	PD	Parkinson's Disease
MIA	Minimal Inhibitory Amounts (µg/disc)	PD	a cytotoxic model
MIC	Minimum Inhibitory Concentration	pD2 (=pEC <sub>50</sub> )	negative logarithm (-logM) of the concentration required to produce 50% of the maximum response (EC <sub>50</sub> )
MIC <sub>80</sub>	Minimal Inhibitive Concentration for 80%	PDE	phosphodiesterase
MIC <sub>90</sub>	Minimal Inhibitive Concentration for 90%	PDTC	pyrrolidine dithiocarbamate
min	minute	PEBP2αA	polyoma enhancer binding protein 2αA
MIP-1α/β	macrophage inflammatory protein	pEC <sub>50</sub>	negative logarithm (-logM) of the concentration required to produce 50% of the maximum response (EC <sub>50</sub> )
MIQ	Minimum inhibitory quantity (µg)		
MK-801	dizocipline maleate (a non-competitive antagonist of the NMDA receptor)		
MLC	Minimum Lethal Concentration		
MLD	Minimum Lethal Dose		
MMDC	Minimal Morphological Deformation Concentration		
MMOC	Mouse Mammary Organ Culture model		

PEG	PolyEthylene Glycol	Singlet oxygen	$^1\text{O}_2$
PEP	Prolyl endopeptidase (a serine protease)	SIZ	sulfisoxazole
pet. ether	petroleum ether	SNP	sodium nitroprusside
PFTase	farnesylprenyltransferase	SOD	Superoxide dismutase
PGD <sub>2</sub>	prostaglandin D <sub>2</sub>	sp.	species
PGE <sub>2</sub>	prostaglandin E <sub>2</sub>	SP-A	pulmonary surfactant Protein A
PGF <sub>2<math>\alpha</math></sub>	prostaglandin F <sub>2<math>\alpha</math></sub>	spp.	species (plural)
PGH <sub>2</sub>	prostaglandin H <sub>2</sub>	SRSA	Slow-Reacting Substance of Anaphylaxis
PGI <sub>2</sub>	prostacyclin (prostaglandin I <sub>2</sub> )	StRt	Stimulatory Rate
PHA	phytohemagglutinin	STZ	streptozotocin
Phe	Phenylephrine	superoxide anion	$\text{O}_2^{\bullet-}$
pIC <sub>50</sub>	negative logarithm (-logM) of IC <sub>50</sub>	SuRt	survival rate
PK	protein kinase	Syn.(= ‡)	Synonym
PKC	protein kinase C	T/C	survival ratio
PLA <sub>2</sub>	phospholipase A <sub>2</sub>	TACE	$\alpha$ -Secretase (a serine protease)
PMA (=TPA)	Phorbol-12-Myristate-13-Acetate	TBARS	ThioBarbituric Acid Reactive Substance assay
PMNs	polymorphonuclear cell	TC <sub>50</sub>	50% cytoToxic Concentration
pNPPase	<i>p</i> -nitrophenylphosphate enzyme	TCM	Traditional Chinese Medicines
POA	pentacyclic oxindole alkaloids	TFP	Trifluoperazine (calmodulin antagonist)
PPase1	Protein serine/threonine Phosphatase	TGF- $\beta_1$	Transforming Growth Factor- $\beta_1$
PRA	Plaque Reduction Assay	TGI	Total Growth Inhibition, concentration at which no growth was observed
PTH	parathyroid hormone	TI	Therapeutic Index (=IC <sub>50</sub> /EC <sub>50</sub> )
PTN	parthenolide	TNF- $\alpha$	Tumor Necrosis Factor- $\alpha$
PTP1B	Protein Tyrosine Phosphatase 1B	TOA	tetracyclic oxindole alkaloids
QR	quinone reductase	topo II	DNA topoisomerase II
RA	rheumatoid arthritis	TP	Thymidine phosphorylase
Raji	EBV-transformed B cell line	tPA	tissue Plasminogen Activator
rat	white rat	TPA (=PMA)	12- <i>O</i> -tetradecanoyl phorbol 13-acetate
rbt	rabbit	TrkA	proto-oncogene TrkA
RDDP	RNA-dependent DNA polymerase	TXA <sub>2</sub>	thromboxane A <sub>2</sub>
RDS	Respiratory Distress Syndrome	TXB <sub>2</sub>	thromboxane B <sub>2</sub>
rel-InRt	relative inhibitive rate (taking the control compound as 100%)	UDP-MurNac	UDP- <i>N</i> -acetylmuramic acid
RM	Relative Mobility	VCAM-1	Vascular Cell Adhesion Molecule-1
RNA	ribonucleic acid	VCR	vincristine
RNase H	inherent ribonuclease H	VEGF	Vascular Endothelial Growth Factor
ROS	reactive oxygen species (they are involved in the genesis of various cancers, arteriosclerosis, rheumatism and ageing)	Veraguensin	veraguensin
RSV	Respiratory Syncytial Virus	VHR DS-PTPase	VHR Dual-Specificity Protein Tyrosine Phosphatase
RT	Reverse Transcriptase	VHR protein	Vaccina open reading-frame H1-Related protein phosphatase
RT-PCR	reverse-transcribed polymerase chain reaction	VP-16	A positive control for cytotoxic assay (Sigma product)
sALT	serum alanine transaminase	VRE	Vancomycin-Resistant <i>Enterococci</i> sp
sAST	serum aspartate transaminase	VSE	Vancomycin-Sensitive <i>Enterococci</i> sp
sc	subcutaneous injection	VSV	Vesicular Stomatitis Virus
SC <sub>50</sub>	Half-maximal radical Scavenging Concentration	ww	wet weight
SC <sub>50</sub>	50% Scavenging Concentration	XTT	sodium 3'-[1-(phenylaminocarbonyl)-3,4-tetrazolium] bis(4-methoxy-6-nitrobenzene)sulfonic acid
ScRt	scavenging rate	†	homonym mark
SDF	Stromal cell-Derived Factor	‡ (=Syn.)	synonym mark
SGOT	serum Glutamic Oxalacetic Transaminase	*	the name is given by the authors of the books
SGPT	serum Glutamic Pyruvic Transaminase		
SHR rat	Spontaneously Hypertensive Rats		
SI	Selective index = cytotoxic CC <sub>50</sub> /target EC <sub>50</sub>		
SI	Selective index = cytotoxic IC <sub>50</sub> /target IC <sub>50</sub>		
SI	Selective index = cytotoxic IC <sub>50</sub> /target MIC		

# Cancer Cell Codes

This set of codes for 270 cancer cells, named as **CCC code**, are defined and tried out in the books for the first time by the authors.

<b>1A9</b>	hmn ovarian cancer (cell).	<b>CaEs-17</b>	hmn esophageal cancer (cell).
<b>212</b>	inducible <i>Ha-ras</i> oncogene transformed from the NIH/3T3 cell line.	<b>CAKI</b>	hmn renal cancer (cell).
<b>308</b>	cultured mouse epidermal cells.	<b>CAKI-1</b>	hmn renal cancer (cell).
<b>3LL</b>	mus Lewis lung cancer (cell).	<b>Calu1</b>	hmn lung cancer (cell).
<b>3PS</b>	mouse leukemia (cell).	<b>Capan1</b>	pancreas cancer (cell).
<b>780-6</b>	renal cancer (cell).	<b>Capan2</b>	pancreas cancer (cell).
<b>9KB</b>	hmn epidermoid nasopharyngeal carcinoma (cell).	<b>CaSki</b>	hmn cervical carcinoma (cell).
<b>9L</b>	rat glioma (cell).	<b>CEM</b>	leukemia (cell).
<b>9PS</b>	mouse lymphocytic leukemia (cell).	<b>CHAGO</b>	hmn undifferentiated lung cancer (cell).
<b>A2780</b>	hmn ovarian cancer (cell).	<b>CNE</b>	hmn nasopharyngeal carcinoma (cell).
<b>A375</b>	hmn melanoma (cell).	<b>Col1</b>	hmn colorectal cancer (cell).
<b>A431</b>	hmn epidermic cancer (cell).	<b>Col2</b>	hmn colorectal cancer (cell).
<b>A498</b>	hmn renal cancer (cell).	<b>COLO320DM</b>	hmn colorectal cancer (cell).
<b>A549</b>	hmn non-small cell lung cancer (cell).	<b>Colon205</b>	colorectal cancer (cell).
<b>ACHN</b>	hmn renal cancer (cell).	<b>Colon26-L5</b>	mus colorectal cancer (cell).
<b>AGS</b>	gastric adenocarcinoma (cell).	<b>COS-7</b>	monkey kidney cells.
<b>APM1840</b>	hmn leukemia (cell).	<b>CPAE</b>	calf pulmonary arterial endothelial cells.
<b>B16</b>	mouse melanoma (cell).	<b>CT-26</b>	mus colorectal cancer (cell).
<b>B16(F-10)</b>	mouse melanoma (cell).	<b>CTV1</b>	hmn leukemia (cell).
<b>BAEC</b>	bovine aortic endothelial cells.	<b>CXF94L</b>	hmn tumor (cell).
<b>BC</b>	hmn breast cancer (cell).	<b>DLD</b>	hmn colorectal adenocarcinoma (cell).
<b>BC-1</b>	hmn breast cancer (cell).	<b>DLD-1</b>	hmn colorectal adenocarcinoma (cell).
<b>BCA-1</b>	hmn breast cancer (cell).	<b>DMS114</b>	hmn lung cancer (cell).
<b>Bcap37</b>	hmn breast cancer (cell).	<b>DMS273</b>	hmn lung cancer (cell).
<b>Bel7402</b>	hmn liver cancer (cell).	<b>DU145</b>	prostatic cancer (cell).
<b>Bel7405</b>	hmn liver cancer (cell).	<b>EAC</b>	Ehrlich ascites cancer (cell).
<b>BGC823</b>	hmn gastric cancer (cell).	<b>EJ-1</b>	hmn bladder cancer (cell).
<b>BIU87</b>	bladder cancer (cell).	<b>FM3A</b>	mus breast cancer (cell).
<b>BL6</b>	mouse melanoma (cell).	<b>H.Ep.-2</b>	hmn cutis cancer cells in throat.
<b>Bowes</b>	skin cancer cells.	<b>H116</b>	hmn colorectal cancer (cell).
<b>Bre04</b>	hmn breast cancer (cell).	<b>H9</b>	lymphocytes.
<b>BSY1</b>	breast cancer (cell).	<b>HBC4</b>	breast cancer (cell).
<b>BT474</b>	hmn galactophore cancer (cell).	<b>HBC5</b>	breast cancer (cell).
<b>BT549</b>	hmn galactophore cancer (cell).	<b>HCC2998</b>	hmn colorectal cancer (cell).
<b>BXPC3</b>	pancreas cancer (cell).	<b>HCT</b>	hmn colorectal cancer (cell).
<b>C6</b>	rat glioma (cell).	<b>HCT116</b>	hmn colorectal cancer (cell).
<b>CA</b>	hmn liver cancer (cell).	<b>HCT15</b>	hmn colorectal cancer (cell).

**HCT8** hmn colorectal cancer (cell).  
**HEK-293** hmn epithelial kidney cell.  
**HEL** hmn embryonic lung fibrocytes.  
**HeLa** culture cervical epithelial cancer (cell) from Henrietta Lack.  
**HeLa ATCC-17** hmn cervical epithelial cancer (cell).  
**HeLa-S3** hmn cervical epithelial cancer (cell).  
**HELF** normal hmn embryo lung fibroblasts.  
**Hep2** hmn liver cancer (cell).  
**Hep2,2,15** hmn liver cancer (cell) transfected with hepatitis B virus.  
**Hep3B** hmn liver cancer (cell).  
**Hepa** hmn liver cancer (cell).  
**Hepa1c1c7** mus liver cancer (cell).  
**Hepa59T/VGH** hmn liver cancer (cell).  
**HepG2** hmn liver cancer (cell).  
**HEPZ** hmn epithelial cancer (cell).  
**HFF** hmn foreskin fibroblasts.  
**HGF** normal hmn gingival fibroblast cells.  
**HL-60** hmn acute promyelocytic leukemia (cell).  
**HM02** hmn melanoma (cell).  
**HMC-1** hmn leukemic mast cells.  
**HMEC** hmn microvascular endothelial cells.  
**HO-8910** hmn ovarian cancer (cell).  
**HOG.R5** green fluorescent protein (GFP)-based reporter cell.  
**HONE-1** hmn nasopharyngeal carcinoma (cell).  
**HOP-62** non-small cell lung cancer (cell).  
**Hs578T** hmn breast cancer (cell).  
**Hs740T** hmn gastric cancer (cell).  
**Hs742T** hmn breast cancer (cell).  
**Hs756T** hmn gastric cancer (cell).  
**HSC-2** hmn oral squamous cell carcinoma cells.  
**HSG** hmn salivary gland tumor (cell).  
**HT** sarcoma (cell).  
**HT1080** hmn fibrosarcoma (cell).  
**HT29** hmn colorectal cancer (cell).  
**HT3** hmn cervical carcinoma (cell).  
**hTERT-RPE1** hmn telomerase reverse transcriptase-retinal pigment epithelial cells.  
**Huh7** hmn hepatoma (cell).  
**HUVEC** hmn umbilical vein endothelial cell.  
**Jurkat-T** hmn T-cell leukemia (cell).  
**K562** hmn leukemia (cell).  
**K562/ADM** hmn leukemia (cell) of adriamycin-resistant.  
**Kato3** hmn gastric cancer (cell).  
**KB** hmn nasopharyngeal carcinoma (cell).  
**KB15** hmn nasopharyngeal carcinoma (cell).  
**KB16** hmn nasopharyngeal carcinoma (cell).  
**KB3** hmn nasopharyngeal carcinoma (cell).  
**KBV200** MDR nasopharyngeal carcinoma (cell).  
**KB-VIN** vincristine-resistant nasopharyngeal carcinoma (cell).  
**Ketr3** hmn renal cancer (cell).  
**KG-1** hmn leukemia (cell).  
**KM12** hmn colorectal cancer (cell).  
**KM20L2** hmn colorectal cancer (cell).  
**KU-1** hmn bladder cancer (cell).  
**L<sub>1210</sub>** Lymphocytic leukemia (cell).  
**L5178Y** lymphosarcoma (cell).  
**L-6** rat skeletal myoblasts.  
**L<sub>615</sub>** mouse spleen leukemia (cell).  
**L<sub>7212</sub>** mouse leukemia (cell).  
**L-929** fibrosarcoma (cell).  
**LLC** mouse Lewis lung cancer (cell).  
**LMTK** mouse fiber cells.  
**LNCaP** hmn prostatic cancer (cell).  
**LNCaP-FGC** hmn prostatic cancer (cell).  
**LO2** hmn liver cell.  
**LoVo** hmn colorectal cancer (cell).  
**LoVo/Doxo** hmn colorectal cancer cell, drug-resistant subclone.  
**LOX** melanoma (cell).  
**LOX-IMVI** melanoma (cell).  
**LS174T** colorectal cancer (cell).  
**Lu04** hmn lung cancer (cell).  
**Lu1** hmn lung cancer (cell).  
**LXFL529L** hmn large cell lung cancer (cell).  
**M1** mus myelocytic leukemia (cell).  
**M14** melanoma (cell).  
**M4BEU** hmn melanoma (cell).  
**M5076** ovarian sarcoma (cell).  
**Ma7373** mus breast cancer (cell).  
**MALME-3M** melanoma (cell).  
**MBT-2** mus bladder cancer (cell).  
**MCF7** hmn breast cancer (cell).  
**MCF7/6** hmn breast cancer (cell).  
**MCF7/ADR-RES** hmn breast cancer (cell).  
**MCF7-ras** hmn breast cancer (cell).  
**MDA231** hmn breast cancer (cell).  
**MDA-MB-231** hmn breast cancer (cell).  
**MDA-MB-435** hmn breast cancer (cell).  
**MDCK** Madin-Darby Canine.  
**MEL-28** hmn melanoma cell.  
**Meth-A** Meth-A sarcoma (cell).  
**MGc803** hmn gastric adenocarcinoma (cell).  
**MH-60** mus leukemia (cell).  
**MI4** melanoma (cell).  
**MIA-PaCa-2** hmn pancreas cancer (cell).  
**MK1** hmn gastric cancer (cell).  
**MKN1** hmn gastric cancer (cell).  
**MKN28** hmn gastric cancer (cell).  
**MKN45** hmn gastric cancer (cell).  
**MKN7** hmn gastric cancer (cell).  
**MKN74** hmn gastric cancer (cell).  
**MM1** highly invasive clone isolated from parental rat ascites hepatoma AH130 cells.  
**Molt4** hmn lymphoma (cell).  
**Mono-Mac-6** mononuclear cells.  
**MQc80-3** gastric adenocarcinoma (cell).  
**MRC-5** hmn diploid embryonic cells.

**MS301** mus breast cancer (cell).  
**MS310** mus breast cancer (cell).  
**N04** hmn neuroma (cell).  
**NCI-H1417** hmn small cell lung cancer (cell).  
**NCI-H187** hmn small cell lung cancer (cell).  
**NCI-H226** hmn non-small cell lung cancer (cell).  
**NCI-H23** hmn lung cancer (cell).  
**NCI-H460** hmn lung cancer (cell).  
**NCI-H522** hmn lung cancer (cell).  
**NK/LY** ascites cancer (cell).  
**NSCLC-N6** hmn non-small cell lung cancer (cell).  
**NUGC** hmn gastric cancer (cell).  
**NUGC-3** hmn gastric cancer (cell).  
**NUGC-4** hmn gastric cancer (cell).  
**OVCAR-2780** ovarian adenocarcinoma (cell).  
**OVCAR-3** ovarian adenocarcinoma (cell).  
**OVCAR-4** ovarian adenocarcinoma (cell).  
**OVCAR-5** ovarian adenocarcinoma (cell).  
**OVCAR-8** ovarian adenocarcinoma (cell).  
**P1534** mus, transplanted leukemia (cell).  
**P<sub>388</sub>** mouse lymphocytic leukemia (cell).  
**P<sub>388</sub>/ADM** mouse lymphocytic leukemia (cell) of adriamycin-resistant.  
**PACA-2** hmn pancreas cancer (cell) .  
**PANC1** pancreas cancer (cell).  
**PBMC** peripheral blood mononuclear cells.  
**PC12** hmn lung cancer (cell).  
**PC3** hmn prostatic cancer (cell).  
**PC-6** hmn lung cancer (cell).  
**PLC/PRF/5** hmn liver cancer (cell).  
**PSN1** hmn pancreas cancer (cell).  
**PTX10** ovarian cancer cells with  $\beta$ -tubulin mutation.  
**QGY-7703** hmn liver cancer (cell).  
**RAW264.7** mouse macrophages.  
**RBL-2H3** rat basophilic cells.  
**RL33** rbt lung cancer (cell).  
**RPMI-7951** melanoma (cell).  
**RPMI-8226** leukemia (cell).  
**RXF-393** renal cancer (cell).  
**RXF-631L** renal cancer (cell).  
**S<sub>180</sub>** mouse sarcoma (cell).  
**S37** mouse sarcoma (cell).  
**Sca7901** hmn gastric adenocarcinoma (cell).  
**SCL** hmn gastric cancer (cell).  
**SCL-37'6** hmn gastric cancer (cell).  
**SCL-6** hmn gastric cancer (cell).  
**SCL-9** hmn gastric cancer (cell).  
**SF268** hmn brain tumor (cell).  
**SF295** hmn brain tumor (cell).  
**SF539** hmn brain tumor (cell).  
**SGC** hmn gastric cancer (cell).  
**SGC7901** hmn gastric cancer (cell).  
**SiHa** hmn cervical carcinoma (cell).  
**SKBR3** hmn breast cancer (cell).  
**SKCO1** colorectal cancer (cell).  
**SK-MEL** hmn caucasian melanoma (cell).  
**SK-MEL-2** hmn melanoma (cell).  
**SK-MEL-28** hmn melanoma (cell).  
**SK-MEL-5** hmn melanoma (cell).  
**SK-MES-1** bronchogenic carcinoma cell.  
**SK-OV-3** ovarian adenocarcinoma (cell).  
**SMMC-7721** hmn liver cancer (cell).  
**SNB75** hmn brain tumor (cell).  
**SNB78** hmn brain tumor (cell).  
**SNU638** hmn gastric adenocarcinoma (cell).  
**SR** leukemia (cell).  
**St4** gastric cancer (cell).  
**SVR** mouse endothelial cells.  
**SW620** hmn colorectal adenocarcinoma (cell).  
**T24** hmn liver cancer (cell).  
**T24S** hmn bladder cancer (cell).  
**T47D** hmn breast cancer (cell).  
**T98G** hmn caucasian glioblastoma (cell).  
**TK10** renal cancer (cell).  
**Tmolt3** hmn leukemia (cell).  
**U14** mouse cervical carcinoma (cell).  
**U251** brain tumor (cell).  
**U373** caucasian glioblastoma (cell).  
**U4** mouse cervical carcinoma (cell).  
**U-87-MG** caucasian glioblastoma (cell).  
**U937** hmn monocytic leukemia (cell).  
**UACC62** melanoma (cell).  
**UO-31** renal cancer (cell).  
**Vero** green monkey kidney tumour (cell).  
**W<sub>256</sub>** rat Walker sarcoma (cell).  
**WEHI-164** mus fibrosarcoma (cell).  
**WHCO1** hmn esophageal cancer (cell).  
**WI-38** hmn lung fibrocyte (normal hmn diploid fibrocyte).  
**WiDr** colorectal adenocarcinoma (cell).  
**Wish** transformed epithelial tumour (cell).  
**XF-498** hmn tumor (cell).  
**ZR-75-1** hmn breast cancer (cell).

## 20575 Tabernaemontanine

$C_{21}H_{26}N_2O_3$  (354.45). Acicular crystals (ethyl acetate), mp 219–222°C,  $[\alpha]_D^{25} = -57.5^\circ$  ( $c = 1$ , chloroform); hydrochloride crystals (acetone), mp 230–233°C. **Pharm:** Antibacterial (against 30 different pathogenic bacterial strains, 3.7% solution, InRt = 17%); cytotoxic (KB); used in treatment of arteriosclerosis, cerebral wounds and dysemia; vasodilator (dog, iv, 0.5–5.0mg/kg). **Source:** DONG FANG GOU YA HUA *Ervatamia orientalis*. **Ref:** 658.

## 20576 Tabernamine

$C_{40}H_{48}N_4O_2$  (616.85). **Pharm:** Antineoplastic (P<sub>388</sub>). **Source:** YUE HAN SI TONG SHAN MA CHA *Tabernaemontana johnstonii*. **Ref:** 658.

## 20577 Tabernanthine

$C_{20}H_{26}N_2O$  (310.44). **Pharm:** CNS activity; binding activity to benzodiazepine receptor. **Source:** family Apocynaceae spp. **Ref:** 658.

## 20578 Tabernoschizine

Pericalline [2122-36-3]  $C_{18}H_{20}N_2$  (264.37). mp 198–199°C. **Pharm:** Analgesic; antibacterial (*Shigella* sp., *Salmonella* sp., *Escherichia* sp., *Bacillus termo*, *Pseudomonas maltophilia*, *Staphylococcus* sp.); antiviral (spodiomyelitis virus). **Source:** CHANG CHUN HUA *Catharanthus roseus* [Syn. *Vinca rosea*; *Lochera rosea*], CU MAO GUO BAI JIAN MU *Aspidosperma dasycarpon*. **Ref:** 6, 658, 1521.

## 20579 19-(Z)-Taberpsychine

$C_{20}H_{24}N_2O$  (308.43). Oil,  $[\alpha]_D = -180^\circ$ . **Source:** GOU WEN *Gelsemium elegans*. **Ref:** 14, 411, 416.

## 20580 Tabersonine

$C_{21}H_{24}N_2O_2$  (336.44). **Pharm:** Antihypertensive. **Source:** CHANG CHUN HUA *Catharanthus roseus* [Syn. *Vinca rosea*; *Lochera rosea*]. **Ref:** 2, 658.

## 20581 Tabulalide A

$C_{34}H_{40}O_{17}$  (720.69). White amorphous powder,  $[\alpha]_D = -44^\circ$  ( $c = 0.21$ , MeOH). **Source:** MA LIAN *Chukrasia tabularis* (root cortex). **Ref:** 3868.

## 20582 Tabulalide B

$C_{35}H_{42}O_{17}$  (734.71). White amorphous powder,  $[\alpha]_D = -37^\circ$  ( $c = 0.14$ , MeOH). **Source:** MA LIAN *Chukrasia tabularis* (root cortex). **Ref:** 3868.

## 20583 Tabulalide C

$C_{33}H_{40}O_{16}$  (692.68). White amorphous powder,  $[\alpha]_D = -49^\circ$  ( $c = 0.28$ , MeOH). **Source:** MA LIAN *Chukrasia tabularis* (root cortex). **Ref:** 3868.

**20584 Tabulalide D**

$C_{35}H_{42}O_{17}$  (734.71). White amorphous powder,  $[\alpha]_D = -52^\circ$  ( $c = 0.16$ , MeOH).

Source: MA LIAN *Chukrasia tabularis* (root cortex). Ref: 3868.

**20585 Tabulalide E**

$C_{35}H_{44}O_{18}$  (752.73). White amorphous powder,  $[\alpha]_D = -2.9^\circ$  ( $c = 0.07$ , MeOH).

Source: MA LIAN *Chukrasia tabularis* (root cortex). Ref: 3868.

**20586 Tabularin**

$C_{29}H_{36}O_{13}$  (592.60). White amorphous powder,  $[\alpha]_D = +41^\circ$  ( $c = 0.19$ , MeOH).

Source: MA LIAN *Chukrasia tabularis* (root cortex). Ref: 3868.

**20587 Taccalonolide E**

$C_{34}H_{44}O_{12}$  (644.72). Source: LIE GUO SHU *Tacca plantaginea* [Syn.

*Schizocapsa plantaginea*]. Ref: 293.

**20588 Taccalonolide F**

$C_{34}H_{44}O_{13}$  (660.72). Source: LIE GUO SHU *Tacca plantaginea* [Syn.

*Schizocapsa plantaginea*]. Ref: 293.

**20589 Taccalonolide G**

$C_{32}H_{42}O_{11}$  (602.68). Source: LIE GUO SHU *Tacca plantaginea* [Syn.

*Schizocapsa plantaginea*]. Ref: 293.

**20590 Taccalonolide H**

$C_{36}H_{44}O_{14}$  (700.74). Source: LIE GUO SHU *Tacca plantaginea* [Syn.

*Schizocapsa plantaginea*]. Ref: 293.

**20591 Taccalonolide I**

$C_{34}H_{44}O_{13}$  (660.72). Source: LIE GUO SHU *Tacca plantaginea* [Syn.

*Schizocapsa plantaginea*]. Ref: 293.

**20592 Taccalonolide J**

$C_{36}H_{46}O_{14}$  (702.76). Source: LIE GUO SHU *Tacca plantaginea* [Syn. *Schizocapsa plantaginea*]. Ref: 293.

**20593 Taccalonolide K**

$C_{34}H_{44}O_{14}$  (676.72). Source: LIE GUO SHU *Tacca plantaginea* [Syn. *Schizocapsa plantaginea*]. Ref: 293.

**20594 Taccalonolide L**

$C_{36}H_{46}O_{15}$  (718.76). Source: LIE GUO SHU *Tacca plantaginea* [Syn. *Schizocapsa plantaginea*]. Ref: 293.

**20595 Taccalonolide M**

## TCM Plants and Congeners

In this part of the encyclopedia, 2923 TCM original plants (including a few of animals) and 4003 their congeners (with small number of other medicinal plants) list in alphabetical order of *Latin names*. Total number of plants described in the encyclopedia are 6926, which are coded as T0001 to T6926.

For each TCM plant entry in 2923 TCM plants, data terms are listed as following format:

Plant code (a specific code from T0001 to T6926)  
*Latin name* (family); PIN-YIN name; English name.  
 Equivalent plant: if any, a sequence of Latin names.  
Used part: a particular description for the plant.  
TCM Effects: a sequence of traditional TCM effects terms.  
TCM Indications: a sequence of traditional TCM indications terms.  
Isolated compounds: a sequence of compounds codes.

For each congeneric plant and other medicinal plant entry in 4003 plants, data terms are listed as following format:

Plant code (a specific code from T0001 to T6926)  
*Latin name* (family); PIN-YIN name; English name.  
Isolated compounds: a sequence of compounds codes.

### A

T0001 *Abelmoschus manihot* (Malvaceae); HUANG SHU KUI HUA; Setose Abelmoschus. Used part: flower. TCM Effects: To disinhibit urine and free strangury, quicken blood and stanch bleeding, resolve toxin and disperse swelling. TCM Indications: Strangury syndrome, blood ejection, spontaneous external bleeding, flooding and spotting [= metrorrhagia and metrostaxis], retention of afterbirth, swollen welling abscess and sore toxin, burns and scalds. Isolated compounds: 10887, 11642, 15170, 18317, 18390.

T0002 *Abelmoschus moschatus* [Syn. *Hibiscus abelmoschus*] (Malvaceae); HUANG KUI; Musk-mallow. Used part: whole herb. TCM Effects: To clear heat and resolve toxin, promote lactation and free stool. TCM Indications: Ardent fever incessant, lung heat cough, dysentery, constipation, postpartum galactostasis, fracture, welling abscess with pus swelling, innominate toxin swelling, burns and scalds. Isolated compounds: 1027, 7734, 19987.

T0003 *Abies alba* (Pinaceae); OU ZHOU LENG SHAN; European Silver Fir. Isolated compounds: 12843.

T0004 *Abies balsamea* (Pinaceae); XIANG ZHI LENG SHAN; Balsam Fir. Isolated compounds: 3241, 3242, 3243, 4935, 7751, 9669, 11987.

T0005 *Abies koreana* (Pinaceae); CHAO XIAN LENG SHAN; Korean Fir. Isolated compounds: 16370, 19622, 19983, 19987.

T0006 *Abies nephrolepis* (Pinaceae); CHOU LENG SHAN; Khingan Fir. Used part: leaf and bark. TCM Effects: To dispel damp and relieve pain. TCM Indications: Pain in lumbus and legs. Isolated compounds: 1935, 6201.

T0007 *Abies sibirica* (Pinaceae); XI BO LI YA LENG SHAN; Siberian Fir. Isolated compounds: 1935, 15332.

T0008 *Abies* sp. (Pinaceae). Isolated compounds: 3194, 3981, 13594, 18003.

T0009 *Abies tazaotana* (Pinaceae). Isolated compounds: 16088.  
*Abrus cantoniensis* = *Abrus fruticosus*

T0010 *Abrus fruticosus* [Syn. *Abrus cantoniensis*] (Fabaceae); JI GU CAO; Canton Abrus. Used part: whole herb. TCM Effects: To clear heat and disinhibit damp, dissipate stasis and relieve pain. TCM Indications:

- Icterohepatitis, stomachache, wind-damp bone pain, stasis pain from knocks and falls, mammary welling abscess. Isolated compounds: 13, 14, 15, 16, 17, 18, 19, 20, 22, 31, 12113, 12307, 20083, 20127.
- T0011 *Abrus precatorius* (Fabaceae); XIANG SI TENG; Coralhead Plant Vine. Used part: stem-leaf. TCM Effects: To clear heat and resolve toxin, disinhibit urine. TCM Indications: Common cold, swelling pain in throat, lung heat cough, mammary welling abscess, sore and boil, hepatitis. Isolated compounds: 11, 24, 26, 27, 30, 32, 33, 34, 35, 18576, 18582.
- T0012 *Abrus precatorius* (Fabaceae); XIANG SI ZI; Coralhead Plant. Used part: ripe seed. TCM Effects: To clear heat and resolve toxin, dispel phlegm, kill worms, check vomiting. TCM Indications: Vomiting, welling abscess, parotitis, scab and lichen, wind-damp bone pain. Isolated compounds: 12, 13, 21, 23, 24, 25, 27, 28, 29, 30, 31, 36, 1113, 3040, 3575, 4473, 8095, 8846, 9267, 10877, 12114, 14428, 17772, 20083, 20084, 20237, 20369, 21662, 21978.
- T0013 *Abuta imene* (Menispermaceae); YI MEI NI A BU TA CAO. Isolated compounds: 15792.
- T0014 *Abuta rufescens* (Menispermaceae); HONG A BU TA CAO. Isolated compounds: 15792.
- T0015 *Abutilon indicum* (Malvaceae); MO PAN CAO; Indian Abutilon. Used part: whole herb. TCM Effects: To course wind and clear heat, relieve cough and transform phlegm, resolve toxin and disperse swelling. TCM Indications: Common cold, fever, cough, diarrhea, otitis media, deafness, pharyngitis, parotitis, urinary tract infection, swelling toxin of sore and welling abscess, knocks and falls. Isolated compounds: 4446, 8965, 8966.
- T0016 *Acacia arabica* (Fabaceae); A LA BO JIN HE HUAN; Arabian Acacia. Isolated compounds: 7441, 8095, 12714, 17174.
- T0017 *Acacia auriculaeformis* (Fabaceae); ER XING JIN HE HUAN; Auriculate Acacia. Isolated compounds: 2016.
- T0018 *Acacia caffra* (Fabaceae). Isolated compounds: 6982, 6984, 6986, 16197.
- T0019 *Acacia catechu* (Fabaceae); HAI ER CHA; Catechu. Used part: dry decocted paste of branch and trunk without bark. TCM Effects: To contract damp, close sores and engender flesh. TCM Indications: Enduring sores, eczema, mouth sore, painful wound from knocks and falls, bleeding due to external injury, suppurative infection. Isolated compounds: 677, 3308, 6853, 6854, 7802, 18305.
- T0020 *Acacia dealbata* (Fabaceae); YIN BAI JIN HE HUAN; Silver Wattle. Isolated compounds: 7821.
- T0021 *Acacia galpinii* (Fabaceae). Isolated compounds: 6982, 6983, 6984, 6985, 6986, 6987, 16197, 16198.
- T0022 *Acacia karroo* (Fabaceae); KA LUO JIN HE HUAN; Karroo Acacia. Isolated compounds: 22122.
- T0023 *Acacia luederitzii* (Fabaceae); LE SHI JIN HE HUAN; Luederitz Acacia\*. Isolated compounds: 9079.
- T0024 *Acacia mearnsii* (Fabaceae); HEI JING SHU; Wattle. Isolated compounds: 18857, 18858.
- T0025 *Acacia melanoxylon* (Fabaceae); HEI MU JIN HE HUAN; Australian Blackwood. Isolated compounds: 62, 10887.
- T0026 *Acacia mellifera* (Fabaceae); JU MI JIN HE HUAN; Honeyed Acacia. Isolated compounds: 2331, 2334, 2338, 10340, 10342, 10573, 13097, 13098, 16373.
- T0027 *Acacia mollissima* (Fabaceae); ROU JIN HE HUAN; Black Wattle. Isolated compounds: 14899.
- T0028 *Acacia nilotica* (Fabaceae); A LA BO JIAO JIN HE HUAN; Gum-arabic Tree. Isolated compounds: 205, 3308, 3551, 5510, 6853, 6921, 12715, 18317, 18856.
- T0029 *Acacia sieberiana* (Fabaceae); XI BO JIN HE HUAN; Sieber Acacia\*. Isolated compounds: 9467, 17863.
- T0030 *Acacia* sp. (Fabaceae). Isolated compounds: 862, 1057, 1282, 5351, 6533, 7482, 9467, 13296.
- T0031 *Acacia spirorbis* (Fabaceae); LUO XUAN JIN HE HUAN; Spiral Acacia\*. Isolated compounds: 9646.
- T0032 *Acacia* spp. (Fabaceae). Isolated compounds: 59, 9598, 17083.
- T0033 *Acacia tortilis* ssp. *raddiana* (Fabaceae); NIU XUAN JIN HE HUAN; Tortile Acacia\*. Isolated compounds: 18454, 18455.
- T0034 *Acacia victoria* (Fabaceae); WEI DUO LI YA JIN HE HUAN; Bramble Acacia. Isolated compounds: 2036, 2038.
- T0035 *Acalypha hispida* (Euphorbiaceae); CU YING MAO TIE XIAN CAI; Chenille Plant, Red-hot Cat's-tail. Isolated compounds: 4440.
- T0036 *Acanthopanax giraldii* [Syn. *Acanthopanax giraldii* var. *inermis*; *Eleutherococcus giraldii*] (Araliaceae); HONG MAO WU JIA PI; Girald Acanthopanax Root-bark. Used part: stem cortex or root cortex. TCM Effects: To dispel wind-damp, strengthen sinews and bones, quicken blood and disinhibit water. TCM Indications: Wind-cold-damp impediment, hypertonicity and pain, limp wilting sinew and bone, inability of legs and knees, pain in heart and abdomen, mounting *qi* [=hernia], knocks and falls, fracture, vacuity and edema. Isolated compounds: 618, 3342, 9276, 16053, 20569.
- T0037 *Acanthopanax giraldii* var. *hispidus* (Araliaceae); MAO GENG HONG MAO WU JIA; Hispidus Girald Acanthopanax. Isolated compounds: 11465.
- Acanthopanax giraldii* var. *inermis* = *Acanthopanax giraldii*
- T0038 *Acanthopanax gracilistylus* (Araliaceae); WU JIA PI; Slenderstyle Acanthopanax Root-bark. Equivalent plant: *Acanthopanax sessiliflorus*, *Acanthopanax senticosus*. Used part: root cortex. TCM Effects: To dispel wind-damp, supplement liver and kidney, strengthen sinews and bones, quicken blood and vessels. TCM Indications: Wind-cold-damp impediment, pain in lumbus and knees, limp wilting sinew and bone, infant retardation of walking, vacuity and marked emaciation, knocks and falls, fracture, edema, beriberi, damp itchy in genitals. Isolated compounds: 6754, 12893, 14717, 19777, 19983, 20280, 20569.
- T0039 *Acanthopanax japonicus* (Araliaceae); RI BEN WU JIA; Japanese Acanthopanax\*. Isolated compounds: 64, 65, 66, 67, 68, 69, 70, 71, 72.
- T0040 *Acanthopanax koreanum* (Araliaceae); CHAO XIAN WU JIA; Korean Acanthopanax\*. Isolated compounds: 73, 74, 75, 79, 82, 83, 20486.
- T0041 *Acanthopanax senticosus* [Syn. *Eleutherococcus senticosus*] (Araliaceae); CI WU JIA; Manyprickle Acanthopanax. Used part: root and rhizome. TCM Effects: To boost *qi* and fortify spleen, supplement kidney and quiet spirit, increase appetite. TCM Indications: Spleen-kidney *yang* vacuity, vacuity and hypodynamia, inappetence, aching in lumbus and knees, insomnia and frequent dreaming. Isolated

- compounds: 1102, 1576, 3781, 3782, 3783, 4680, 6115, 6204, 6756, 7439, 9265, 11428, 11429, 11503, 12916, 13641, 15942, 17412, 18317, 18734, 19777, 19983, 20280, 20446, 20569.
- T0042 *Acanthopanax senticosus* [Syn. *Eleutherococcus senticosus*] (Araliaceae); CI WU JIA PI; Manyprickle Acanthopanax Root-bark. Used part: root cortex. TCM Effects: See *Acanthopanax gracilistylus*. TCM Indications: See *Acanthopanax gracilistylus*. Isolated compounds: 7439.
- T0043 *Acanthopanax senticosus* [Syn. *Eleutherococcus senticosus*] (Araliaceae); CI WU JIA YE; Manyprickle Acanthopanax Leaf. Isolated compounds: 819, 3519, 3520, 6755, 6756, 15365, 16050, 19983, 22270.
- T0044 *Acanthopanax sessiliflorus* (Araliaceae); WU GENG WU JIA PI; Sessileflower Acanthopanax Root-bark. Used part: root cortex. TCM Effects: See *Acanthopanax gracilistylus*. TCM Indications: See *Acanthopanax gracilistylus*. Isolated compounds: 85, 86, 87, 88, 3040, 3519, 3520, 4680, 16050, 19427, 19777, 19983, 19983, 20369, 20556, 22270.
- T0045 *Acanthopanax trifoliatum* (Araliaceae); CI SAN JIA; Trifoliolate Acanthopanax. Used part: root or root cortex. TCM Effects: To clear heat and resolve toxin, dispel wind and disinherit damp, soothe sinews and quicken blood. TCM Indications: Common cold with fever, sore pharynx, headache, chest pain due to cough, pain in stomach duct, diarrhea and dysentery, pain in rib-side, jaundice, stone strangury, vaginal discharge, wind-damp impediment pain, aching in lumbus and legs, hypertonicity of sinews and bones, fracture due to knocks and falls, epidemic parotitis, mammary welling abscess, toxin swelling of sores, snake or insect bites. Isolated compounds: 91, 92, 93, 11753, 12178, 13264, 17371, 20713.
- T0046 *Acanthospermum glabratum* (Asteraceae); GUANG CI BAO JU; Glabrous Acanthospermum\*. Isolated compounds: 76, 78, 84, 89, 90, 5537, 8489, 10148.
- T0047 *Acanthus ebracteatus* (Acanthaceae); XIAO HUA LAO SHU LE; Smallflower Acanthus\*. Used part: fruit. TCM Effects: To resolve toxin and disperse swelling. TCM Indications: sore and boil with swelling of clove. Isolated compounds: 3815, 6663, 6664, 6665, 6666.
- T0048 *Acanthus ilicifolius* (Acanthaceae); LAO SHU LE; Hollyleaf Acanthus. Used part: root or branch-leaf. TCM Effects: To clear heat and resolve toxin, transform phlegm and disinherit damp, dissipate stasis and relieve pain. TCM Indications: Mumps, scrofula, liver spleen enlargement, stomachache, taxation damage in lumbar muscle, phlegm-heat cough asthma, jaundice, white turbidity, acute hepatitis, chronic hepatitis. Isolated compounds: 63, 77, 1476, 1494, 1557, 2229, 3554, 4136, 4137, 5765, 5766, 8666, 10988, 10989, 10990, 11642, 15935, 18317.
- T0049 *Acer ginnala* (Aceraceae); CHA TIAO QI; Amur Maple. Used part: tender leaf. TCM Effects: To clear liver and brighten eyes. TCM Indications: Headache due to externally contracted wind-heat, liver fire and red eyes, clouded flowery vision. Isolated compounds: 95, 7441.
- T0050 *Acer nikoense* (Aceraceae); MAO GUO QI; Nikoo Maple. Isolated compounds: 96, 97, 98, 100, 101, 102, 103, 104, 105, 106, 1522, 2296, 3308, 3399, 3831, 3832, 4055, 5786, 6233, 6853, 6923, 7007, 7942, 7944, 8311, 10384, 10614, 15595, 18740, 18795, 18797, 19175, 19542, 21897, 21923, 22332.
- T0051 *Acer okamotoanum* (Aceraceae); CHAO XIAN WU JIAO FENG; Okamoto Maple. Isolated compounds: 18340.
- T0052 *Acer platanoides* (Aceraceae); NUO WEI QI; Norway Maple. Isolated compounds: 16836.
- T0053 *Acer pseudoplatanus* (Aceraceae); OU YA QI; Great Maple. Isolated compounds: 14358.
- T0054 *Acer rubrum* (Aceraceae); HONG HUA QI; Red Maple. Isolated compounds: 8118, 8971.
- T0055 *Acer saccharinum* (Aceraceae); YIN BAI QI; Silver Maple. Isolated compounds: 3983, 8971, 19910.
- T0056 *Acer saccharum* (Aceraceae); TANG QI; Sugar Maple. Isolated compounds: 20446.
- T0057 *Acer* sp. (Aceraceae). Isolated compounds: 4055, 8311.
- T0058 *Achillea ageratifolia* (Asteraceae); XI LA SHI CAO; Greek Yarrow. Isolated compounds: 14692.
- T0059 *Achillea alexandri-regis* (Asteraceae); SAI ER WEI YA SHI CAO; Serbian Yarrow. Isolated compounds: 1110, 1113, 1750, 1751, 1752, 1753, 3695, 5414, 10346, 10347, 10348, 10349, 13497, 13498, 13499, 13500, 17415, 19087, 19983.
- T0060 *Achillea alpina* [Syn. *Achillea sibirica*] (Asteraceae); YI ZHI HAO; Alpine Yarrow. Used part: herb. TCM Effects: To dispel wind and relieve pain, quicken blood, resolve toxin. TCM Indications: Bleeding of digestive tract, bleeding from hemorrhoids, acute enteritis, infection from wounds, gastrointestinal ulcer, common cold with fever, head wind headache, toothache, wind-damp impediment pain, abdominal pain, amenorrhea due to blood stasis, abdominal lump glomus, knocks and falls, swelling toxin of welling abscess and sore, snake bite. Isolated compounds: 538, 552, 553, 3048, 3464, 4749, 8228.
- T0061 *Achillea asiatica* (Asteraceae); YA ZHOU SHI; Asiatic Yarrow. Isolated compounds: 1201, 1202, 1203.
- T0062 *Achillea fragrantissima* (Asteraceae); JI XIANG SHI CAO; Extreme-fragrant Yarrow\*. Isolated compounds: 3743.
- T0063 *Achillea holosericea* (Asteraceae); XI LA SI MAO SHI; Greek Silk-hair Yarrow\*. Isolated compounds: 287, 16432.
- T0064 *Achillea leptophylla* (Asteraceae); XI YE SHI; Fine-leaved Yarrow. Isolated compounds: 20505.
- T0065 *Achillea millefolium* (Asteraceae); YANG SHI CAO; Common Yarrow. Used part: whole herb. TCM Effects: To dispel wind, quicken blood, relieve pain, resolve toxin. TCM Indications: Wind-damp impediment pain, knocks and falls, amenorrhea due to blood stasis, swelling toxin of welling abscess and sore, bleeding from hemorrhoids. Isolated compounds: 538, 1476, 1792, 2071, 2325, 2550, 2555, 2557, 2887, 3241, 3242, 4550, 4749, 7521, 7557, 7881, 8031, 11754, 14757, 14854, 19211, 20369, 21331, 21350, 21618, 21662, 22461.
- T0066 *Achillea moschata* (Asteraceae); SHE XIANG SHI CAO; Musky Yarrow. Isolated compounds: 2325, 3464, 7521.  
*Achillea sibirica* = *Achillea alpina*
- T0067 *Achillea* sp. (Asteraceae). Isolated compounds: 552, 2044, 5236, 13605.
- T0068 *Achillea* spp. (Asteraceae). Isolated compounds: 17719, 19312.
- T0069 *Achillea wilsoniana* (Asteraceae); YUN NAN SHI; Wilson Yarrow.

- Used part: whole herb. TCM Effects: To dispel wind and eliminate damp, dissipate stasis and relieve pain, resolve toxin and disperse swelling. TCM Indications: Wind-damp pain, stomachache, toothache, stasis swelling from knocks and falls, amenorrhea and dysmenorrhea, swelling toxin of welling abscess and sore, snake or insect bites. Isolated compounds: 538.
- T0070 *Achras* spp. (Sapotaceae). Isolated compounds: 13098.
- T0071 *Achyranthes aspera* (Amaranthaceae); TU NIU XI; Common Achyranthes. Equivalent plant: *Achyranthes aspera* var. *indica*. Used part: root and rhizome. TCM Effects: To quicken blood and dissipate stasis, dispel damp and disinhibit urine, clear heat and resolve toxin. TCM Indications: Amenorrhea, dysmenorrhea, menstrual disorder, knocks and falls, pain in joints due to rheumatism, strangury, edema, fever due to external contraction, malaria, dysentery, sore pharynx, swollen welling abscess and clove sores. Isolated compounds: 539, 540, 541, 542, 6679, 22044.
- T0072 *Achyranthes aspera* var. *indica* (Amaranthaceae); DUN YE TU NIU XI; Obtuseleaf Achyranthes. Used part: root and rhizome. TCM Effects: See *Achyranthes aspera*. TCM Indications: See *Achyranthes aspera*. Isolated compounds: 6679.
- T0073 *Achyranthes bidentata* (Amaranthaceae); NIU XI; Twotooth Achyranthes. Used part: root. TCM Effects: To supplement liver and kidney, strengthen sinews and bones, quicken blood and regulate menstruation, disinhibit urine and free strangury. TCM Indications: Aching in lumbus and knees, amenorrhea due to blood stasis, dysmenorrhea, postpartum blood stasis abdominal pain, concretion and conglomeration, retention of placenta, heat strangury, blood strangury, knocks and falls, swollen welling abscess and malign sore, swelling pain in throat. Isolated compounds: 543, 544, 2363, 2364, 3525, 3615, 5404, 6679, 11067, 11068, 11069, 16050, 19043, 20168, 20169.
- T0074 *Achyranthes fauriei* (Amaranthaceae); RI BEN NIU XI; Japanese Achyranthes. Isolated compounds: 11067.
- T0075 *Acnistus arborescens* (Solanaceae); BA XI YE YAN; Brazilian Wild Tobacco, Marianeira. Isolated compounds: 302, 5324.
- T0076 *Aconitum anthora* (Ranunculaceae); HUANG WU TOU; Yellow Monkshood. Isolated compounds: 1964.
- T0077 *Aconitum balfourii* (Ranunculaceae); YA DONG WU TOU; Yadong Monkshood. Used part: tuberoid. TCM Effects: See *Aconitum carmichaeli*. TCM Indications: See *Aconitum carmichaeli*. Isolated compounds: 18017.
- T0078 *Aconitum barbatum* var. *puberulum* [Syn. *Aconitum ochranthum*] (Ranunculaceae); NIU BIAN; Puberulent Monkshood. Used part: root. TCM Effects: To dispel wind and relieve pain, relieve cough and transform phlegm, calm asthma. TCM Indications: Wind-damp with painful swollen joints, pain in lumbus and legs, asthma and cough, scrofula, scab and lichen. Isolated compounds: 12510, 13169, 18166, 18167, 18168, 18169, 18531.
- T0079 *Aconitum brachypodium* (Ranunculaceae); XUE SHANG YI ZHI HAO; Shortstalk Monkshood. Equivalent plant: *Aconitum nagarum* var. *lasiandrum*. Used part: root. TCM Effects: To dispel wind and eliminate damp, quicken blood and relieve pain. TCM Indications: Wind-damp bone pain, knocks and falls, pain in limbs, toothache, toxin swelling of sores, pain from carcinoma, pain in joints. Isolated compounds: 554, 2741, 2742, 13189.
- Aconitum bullatifolium* = *Aconitum nagarum* var. *heterotrichum*
- T0080 *Aconitum bullatifolium* var. *homotrichum* [Syn. *Aconitum nagarum*] (Ranunculaceae); BAO SHAN WU TOU; Paoshan Monkshood. Used part: tuberoid. TCM Effects: To dispel wind and overcome damp, free network vessels and relieve pain. TCM Indications: Wind-cold-damp impediment, headache. Isolated compounds: 551, 2737, 2738, 2739, 2740, 10875.
- T0081 *Aconitum bulleyanum* (Ranunculaceae); DIAN XI WU TOU; Yunnanwest Monkshood. Isolated compounds: 4211, 22482, 22938.
- T0082 *Aconitum campylorrhynchum* (Ranunculaceae); WAN ZHUO WU TOU; Curvebeak Monkshood. Isolated compounds: 384.
- T0083 *Aconitum carmichaeli* (Ranunculaceae); FU ZI; Prepared Common Monkshood Daughter Root. Equivalent plant: *Aconitum carmichaeli* cv. Used part: daughter root. TCM Effects: To return yang and treat collapse, supplement fire and reinforce yang. TCM Indications: Yang-collapse vacuity desertion, cold limbs and faint pulse, impotence, uterus cold, cold pain in heart and abdomen, vacuity cold chronic diarrhea and dysentery, yin cold edema, yang vacuity external contraction, wind-cold-damp impediment, yin flat abscess and sores. Isolated compounds: 554, 1059, 1060, 1061, 1292, 2738, 2739, 3201, 3713, 4211, 4992, 4999, 5000, 5001, 5007, 5008, 5033, 5034, 5036, 5037, 5067, 5071, 5072, 5136, 5149, 5166, 5458, 8042, 10875, 11373, 11728, 12161, 12898, 12899, 13794, 15418, 20650, 22237, 22394, 22482.
- T0084 *Aconitum carmichaeli* (Ranunculaceae); WU TOU; Common Monkshood. Equivalent plant: *Aconitum karakolicum*, *Aconitum balfourii*. Used part: tuberoid. TCM Effects: To dispel wind and eliminate damp, warm channels, dissipate cold and relieve pain. TCM Indications: Wind-cold-damp impediment, pain in joints, numbness in limbs, hemiplegia, head wind headache, cold pain in heart and abdomen, cold mounting with pain, stasis pain from knocks and falls, swelling toxin of flat abscess. Isolated compounds: 554, 877, 2247, 2738, 2742, 3201, 3712, 5067, 9574, 9575, 10875, 10962, 11083, 11084, 11085, 11373, 11728, 12161, 13794, 19198, 19701, 19702, 19703, 20075, 20076, 20650, 22237.
- T0085 *Aconitum carmichaeli* cv (Ranunculaceae); ZHONG BA E ZHANG YE FU ZI; Zhongba Monkshood Daughter Root\*. Used part: daughter root. TCM Effects: See *Aconitum carmichaeli*. TCM Indications: See *Aconitum carmichaeli*. Isolated compounds: 12162, 19701.
- T0086 *Aconitum chasmanthum* (Ranunculaceae); ZHAN HUA WU TOU; Patentflower Monkshood. Used part: tuberoid. TCM Effects: To dispel wind and overcome damp, relieve pain. TCM Indications: Wind-cold-damp impediment, pain in joints. Isolated compounds: 3483, 11012.
- T0087 *Aconitum chrysotrichum* (Ranunculaceae); HUANG MAO WU TOU; Yellowhair Monkshood. Isolated compounds: 3483.
- T0088 *Aconitum coreanum* (Ranunculaceae); HUANG HUA WU TOU; Korean Monkshood. Used part: tuberoid. TCM Effects: To dispel wind and transform phlegm, settle fright epilepsy, dissipate cold and relieve pain. TCM Indications: Wind stroke with congesting phlegm, deviated eyes and mouth, epilepsy, migraine, headache, wind-phlegm dizziness,

- tetanus, infant fright wind, wind-damp impediment pain, sores scab and lichen, damp itchy skin. Isolated compounds: 9045, 9046, 9047, 9048, 9049, 9050, 9051, 9052, 10875.
- T0089 *Aconitum crassicaule* (Ranunculaceae); CU JING WU TOU; Thickstem Monkshood. Isolated compounds: 3483, 4210, 15228.
- T0090 *Aconitum delavayi* (Ranunculaceae); MA ER SHAN WU TOU; Delavy Monkshood. Used part: tuberoid. TCM Effects: To dispel wind-damp, relieve pain. TCM Indications: Wind-cold-damp impediment, pain in joints. Isolated compounds: 4993.
- T0091 *Aconitum excelsum* (Ranunculaceae); ZI HUA GAO WU TOU; Purpleflower High Monkshood. Isolated compounds: 5073, 7673, 12510, 14513, 14570, 14798.
- T0092 *Aconitum falconeri* (Ranunculaceae); FA KANG WU TOU; Falcon Monkshood\*. Isolated compounds: 7706, 11012, 18017.
- T0093 *Aconitum ferox* (Ranunculaceae); NI BO ER WU TOU; Nepal Monkshood. Isolated compounds: 2372, 11012, 18017.
- T0094 *Aconitum finetianum* (Ranunculaceae); GAN WAN WU TOU; Finet Monkshood. Used part: root. TCM Effects: To dispel wind and relieve pain, harmonize blood and vanquish toxin. TCM Indications: Wind-damp impediment pain, knocks and falls. Isolated compounds: 2042, 4741, 4745, 4771, 5009, 5035, 7800, 11112, 11476, 12510, 15658, 18168, 18531.
- T0095 *Aconitum fischeri* (Ranunculaceae); BO YE WU TOU; Azure Monkshood. Isolated compounds: 11867.
- T0096 *Aconitum Forrestii* [Syn. *Aconitum likiangense*] (Ranunculaceae); LI JIANG WU TOU; Likiang Monkshood\*. Used part: tuberoid. TCM Effects: To dispel wind-damp, settle pain. TCM Indications: Painful joints due to rheumatism, knocks and falls. Isolated compounds: 3483, 7880, 12781, 12935, 22482, 22938.
- T0097 *Aconitum franchetii* (Ranunculaceae); DA DU WU TOU; Franchet Monkshood. Isolated compounds: 20650.
- T0098 *Aconitum geniculatum* (Ranunculaceae); XI BAN WU TOU; Genuiculate Monkshood. Used part: tuberoid. TCM Effects: To dispel wind and dissipate cold, quicken blood and relieve pain, resolve toxin and disperse swelling. TCM Indications: Wind-cold-damp impediment, reversal cold of limbs, knocks and falls, sore toxin. Isolated compounds: 8270, 22938.
- T0099 *Aconitum gymnanthum* (Ranunculaceae); LU RUI WU TOU; Nakedstamen Monkshood. Used part: root, leaf and flower. TCM Effects: To dispel wind-damp, warm center and dissipate cold, kill worms and relieve pain. TCM Indications: Rheumatism numbness, pain in joints, leprosy, stomachache, common cold, influenza, intestinal parasitic disease. Isolated compounds: 9103, 14478.
- T0100 *Aconitum Hemsleyanum* var. *circinatum* (Ranunculaceae); QUAN JU GUA YE WU TOU; Circinate Hemsley Monkshood. Used part: tuberoid. TCM Effects: See *Aconitum Hemsleyanum*. TCM Indications: See *Aconitum Hemsleyanum*. Isolated compounds: 3735, 3736.
- T0101 *Aconitum Hemsleyanum* (Ranunculaceae); GUA YE WU TOU; Hemsley Monkshood. Equivalent plant: *Aconitum Hemsleyanum* var. *circinatum*. Used part: tuberoid. TCM Effects: To dispel wind and eliminate damp, quicken blood and relieve pain. TCM Indications: Painful joints due to rheumatism, pain in lumbus and legs, knocks and falls, innominate toxin swelling, lichen sore. Isolated compounds: 1366, 2738, 3483, 4792, 6915, 9356, 11012, 18016, 19107, 19702, 20650, 22938.
- T0102 *Aconitum Hemsleyanum* var. *leueanthus* (Ranunculaceae); ZHUA KUI GUA YE WU TOU; Unguiculate Hemsley Monkshood. Isolated compounds: 3483, 4210, 4774, 5473, 7700, 7935, 12728, 12729, 12730, 12731, 20650.
- T0103 *Aconitum heterophyllum* (Ranunculaceae); YI YE WU TOU; Heteroleaf Monkshood\*. Isolated compounds: 1964, 9459, 9472.
- T0104 *Aconitum japonicum* (Ranunculaceae); RI BEN WU TOU; Japanese Monkshood\*. Isolated compounds: 5067, 11728, 20648.
- T0105 *Aconitum karakolicum* (Ranunculaceae); DUO GEN WU TOU; Manyroot Monkshood. Used part: tuberoid. TCM Effects: See *Aconitum Carmichaeli*. TCM Indications: See *Aconitum Carmichaeli*. Isolated compounds: 551, 3201, 12160, 15250, 17127, 20076.
- T0106 *Aconitum kirinense* (Ranunculaceae); JI LIN WU TOU; Kirin Monkshood\*. Used part: root. TCM Effects: To dispel wind and eliminate damp, dissipate cold and relieve pain. TCM Indications: Wind-cold-damp impediment, hypertonicity of limbs, cold pain in heart and abdomen, swelling toxin of welling abscess and sore, toothache. Isolated compounds: 388, 392, 821, 7673, 8378, 12668, 12669.
- T0107 *Aconitum kongboense* (Ranunculaceae); GONG BU WU TOU; Gongbo Monkshood. Used part: tuberoid. TCM Effects: To dispel wind and eliminate damp, relieve pain. TCM Indications: Painful joints due to rheumatism, knocks and falls, poisonous insect stings. Isolated compounds: 7936, 12259.
- T0108 *Aconitum kusnezoffii* (Ranunculaceae); BEI WU TOU; Kusnezoff Monkshood. Used part: tuberoid. TCM Effects: To dispel wind and overcome damp, warm channels and dissipate cold, disperse swelling and relieve pain. TCM Indications: Wind-cold-damp impediment, pain in joints, head wind headache, wind stroke with hemiplegia, cold pain in heart and abdomen, cold mounting with pain, knocks and falls, blood stasis swelling and pain, swelling toxin of flat abscess, anesthesia. Isolated compounds: 304, 554, 2214, 2231, 10875, 12668, 13794, 17672, 22938.
- T0109 *Aconitum leave* (Ranunculaceae). Isolated compounds: 508, 5008, 12510, 13872, 18169, 20501.
- T0110 *Aconitum legendrei* (Ranunculaceae); MIAN NING WU TOU; Legendre Monkshood. Isolated compounds: 20650.
- T0111 *Aconitum leucostomum* (Ranunculaceae); BAI HOU WU TOU; Whitethroat Monkshood. Isolated compounds: 508, 6227, 12668. *Aconitum likiangense* = *Aconitum Forrestii*
- T0112 *Aconitum lijestradii* (Ranunculaceae); GONG GA SHAN WU TOU; Konka Mountain Monkshood. Isolated compounds: 4792, 4806, 8271, 13065, 18016, 19107.
- T0113 *Aconitum lucidusculum* (Ranunculaceae); GUANG ZE WU TOU; Lucid Monkshood\*. Isolated compounds: 13057.
- T0114 *Aconitum lycocotum* (Ranunculaceae); LANG DU WU TOU; Badgersbane. Isolated compounds: 13169, 13189.
- T0115 *Aconitum monticola* (Ranunculaceae); SHAN DI WU TOU; Country Monkshood. Isolated compounds: 5035, 20076. *Aconitum nagarum* = *Aconitum bullatifolium* var. *homotrichum*
- T0116 *Aconitum nagarum* var. *heterotrichum* [Syn. *Aconitum bullatifolium*]

- (Ranunculaceae); XIAO BAI CHENG; Unequalhair Paoshan Monkshood. Used part: tuberoid. TCM Effects: To dispel wind and eliminate damp, quicken blood and relieve pain. TCM Indications: Wind-damp pain, taxation damage in lumbar muscle, sprain in joints, intercostal neuralgia, wind stroke paralysis, early stage of welling abscess and flat abscess. Isolated compounds: 15228.
- T0117 *Aconitum nagarum* var. *lasiandrum* (Ranunculaceae); XUAN WEI WU TOU; Haoryanther Paoshan Monkshood. Used part: root. TCM Effects: See *Aconitum brachypodum*. TCM Indications: See *Aconitum brachypodum*. Isolated compounds: 304, 20075, 20076.
- T0118 *Aconitum napellus* (Ranunculaceae); OU WUTOU; Aconite. Isolated compounds: 552, 554, 10875, 13794, 15250.
- T0119 *Aconitum napellus* ssp. *neomontanum* (Ranunculaceae). Isolated compounds: 12030, 12034, 18333.
- T0120 *Aconitum nemorum* (Ranunculaceae); LIN DI WU TOU; Woodland Monkshood. Isolated compounds: 20650.  
*Aconitum ochranthum* = *Aconitum barbatum* var. *puberulum*
- T0121 *Aconitum orientale* (Ranunculaceae); GAO JIA SUO WU TOU; Eastern Monkshood. Isolated compounds: 2042, 12510.
- T0122 *Aconitum pendulum* (Ranunculaceae); TIE BANG CHUI; Pendulous Monkshood. Used part: tuberoid. TCM Effects: To quicken blood and dispel stasis, dispel wind and eliminate damp, disperse swelling and relieve pain. TCM Indications: Knocks and falls, fracture, wind-damp lumbago, swollen welling abscess and malign sore, innominate toxin swelling, scrofula, frostbite, poisonous snake bite. Isolated compounds: 2231, 16803, 16808.
- T0123 *Aconitum polyschistum* (Ranunculaceae); DUO LIE WU TOU; Manypltted Monkshood. Used part: tuberoid. TCM Effects: To dispel wind and overcome damp, dissipate cold and relieve pain. TCM Indications: Wind-cold-damp impediment, hypertonicity of limbs, knocks and falls, innominate toxin swelling. Isolated compounds: 2231, 17672, 17673, 17674, 17675.
- T0124 *Aconitum pseudohuiliense* (Ranunculaceae); LEI BO WU TOU; Leabo Monkshood. Isolated compounds: 12667, 12668, 12669.
- T0125 *Aconitum pseudostapfianum* (Ranunculaceae); NI YU LONG WU TOU; Pseudostapfia Monkshood. Used part: tuberoid. TCM Effects: To dispel wind-damp, relieve pain. TCM Indications: Wind-damp impediment pain, pain in lumbus and legs. Isolated compounds: 2248.
- T0126 *Aconitum pukeese* (Ranunculaceae); PU GE WU TOU; Pukee Monkshood. Isolated compounds: 18189.
- T0127 *Aconitum sachalinense* (Ranunculaceae); KU YE WU TOU; Sachalin Monkshood\*. Isolated compounds: 11867.
- T0128 *Aconitum sanyoense* (Ranunculaceae); SHAN YANG WU TOU; Shanyang Monkshood\*. Isolated compounds: 15658.
- T0129 *Aconitum septentrionale* (Ranunculaceae); BEI FANG WU TOU; Northern Monkshood\*. Isolated compounds: 12510, 18168, 22199.
- T0130 *Aconitum sinomontanum* (Ranunculaceae); GAO WU TOU; Tall Monkshood. Used part: root. TCM Effects: To dispel wind and eliminate damp, rectify *qi* and relieve pain, quicken blood and disperse swelling. TCM Indications: Wind-damp impediment pain, swelling pain in joints, knocks and falls, stomachache, distention fullness in chest and abdomen, acute bacillary dysentery, chronic bacillary dysentery, acute enteritis, chronic enteritis, scrofula, sore and boil. Isolated compounds: 12510, 18531, 19956, 19957, 22938.
- T0131 *Aconitum soongaricum* (Ranunculaceae); ZHUN GE ER WU TOU; Dzungaria Monkshood. Isolated compounds: 20076.
- T0132 *Aconitum* sp. (Ranunculaceae). Isolated compounds: 1964, 12736, 12737, 12738.
- T0133 *Aconitum spicatum* (Ranunculaceae); SUI ZHUANG WU TOU; Spiked Monkshood. Isolated compounds: 2372, 18017.
- T0134 *Aconitum subcuneatum* (Ranunculaceae); XIE XING WU TOU; Cuneate Monkshood\*. Isolated compounds: 3483, 11867.
- T0135 *Aconitum sungpanense* (Ranunculaceae); SONG PAN WU TOU; Sungpan Monkshood. Used part: root. TCM Effects: To dispel wind and overcome damp, dissipate cold and relieve pain, dissipate stasis and disperse swelling. TCM Indications: Wind-cold-damp impediment, pain in joints, toothache, knocks and falls, swelling toxin of welling abscess and sore, neuralgia. Isolated compounds: 331, 5473, 22938.
- T0136 *Aconitum talassicum* (Ranunculaceae); TA LA WU TOU; Tala Monkshood\*. Isolated compounds: 11728, 20650.
- T0137 *Aconitum tanguticum* (Ranunculaceae); GAN QING WU TOU; Tangut Monkshood. Used part: whole herb with root. TCM Effects: To clear heat and resolve toxin, disinhibit damp. TCM Indications: Hepatitis, cholecystitis, pneumonia, pharyngolaryngitis, gastroenteritis, common cold with fever. Isolated compounds: 2243, 9459, 9472, 9646, 20650, 20676, 20689.
- T0138 *Aconitum umbrosum* (Ranunculaceae); CAO DI WU TOU; Meadow Monkshood. Used part: root. TCM Effects: To dispel wind and dissipate cold, dispel damp and relieve pain. TCM Indications: Wind-cold-damp impediment, pain in limbs, hypertonicity of limbs, neuralgia, knocks and falls, osteoarthritis, cold pain in heart and abdomen, welling abscess and flat abscess with clove sore. Isolated compounds: 781, 22199.
- T0139 *Aconitum variegatum* (Ranunculaceae); BAN HUA WU TOU; Manchurian Monkshood. Isolated compounds: 396, 4867, 7415, 7447, 9895, 20650, 22348, 22390, 22391, 22393.
- T0140 *Aconitum violaceum* (Ranunculaceae); ZI WU TOU; Violet Monkshood\*. Isolated compounds: 2372, 11012.
- T0141 *Aconitum zeravschanicum* (Ranunculaceae); ZE WU TOU. Isolated compounds: 9459, 15658.
- T0142 *Acorus calamus* (Araceae); BAI CHANG; Drug Sweetflag. Used part: rhizome. TCM Effects: To transform phlegm and open orifices, dispel damp and fortify stomach, kill worms and relieve itch. TCM Indications: Stupor due to phlegm reversal, wind stroke, epilepsy, fright palpitation and amnesia, tinnitus and deafness, food accumulation abdominal pain, diarrhea and dysentery, wind-damp pain, eczema, scab sore. Isolated compounds: 550, 560, 561, 564, 565, 566, 957, 1835, 1840, 2435, 2550, 2934, 2939, 3048, 3241, 3242, 4398, 7019, 7521, 9486, 11193, 11302, 11408, 11713, 11717, 13141, 14530, 14531, 17809, 19852, 21929.
- T0143 *Acorus calamus* var. *angustatus* (Araceae); RI BEN CHANG PU; Japanese Sweetflag\*. Isolated compounds: 1835.
- T0144 *Acorus gramineus* (Araceae); JIN QIAN PU; Grassleaf Sweetflag. Used part: Rhizome. TCM Effects: See *Acorus tatarinowii*. TCM Indications: See *Acorus tatarinowii*. Isolated compounds: 957, 1835, 2435, 3241, 3242, 9669, 13883, 14531.

- T0145 *Acorus gramineus* (Araceae); JIN QIAN PU YE; Grassleaf Sweetflag Leaf. Used part: leaf. TCM Indications: Great wind sore, scab sore. Isolated compounds: 957, 1835.
- T0146 *Acorus tatarinowii* (Araceae); SHI CHANG PU; Grassleaved Sweetflag. Equivalent plant: *Acorus gramineus*. Used part: Rhizome. TCM Effects: To transform phlegm and open orifices, transform damp and move *qi*, dispel wind and eliminate impediment, disperse swelling and relieve pain. TCM Indications: Febrile diseases clouded spirit, phlegm reversal, amnesia, tinnitus, deafness, distending pain in stomach duct and abdomen, food-denying dysentery, wind-damp impediment pain, knocks and falls, scab and lichen with welling abscess and flat abscess. Isolated compounds: 1834, 1835, 7056, 7521, 7523, 11194.
- T0147 *Acritopappus* spp. Isolated compounds: 419.
- T0148 *Acronychia baueri* (Rutaceae); BAO RUI SHAN YOU GAN; Bauer Acronychia. Isolated compounds: 569, 570.
- T0149 *Acronychia haplophylla* (Rutaceae); DAN YE YOU GAN; Singleleaf Acronychia\*. Isolated compounds: 570.
- T0150 *Acronychia laurifolia* (Rutaceae); YUE GUI YE SHAN YOU GAN; Laurel-leaf Acronychia\*. Isolated compounds: 14364.
- T0151 *Acronychia pedunculata* (Rutaceae); SHA TANG MU; Pedunculate Acronychia. Used part: wood or root. TCM Effects: To move *qi* and quicken blood, fortify spleen and suppress cough. TCM Indications: Wind-damp pain in lumbus and legs, stasis pain from knocks and falls, *qi* pain in heart and stomach, bronchitis, common cold, cough. Isolated compounds: 570, 571, 572, 573, 574, 575, 577, 2169, 5852, 6022.
- T0152 *Acronychia* sp. (Rutaceae). Isolated compounds: 12254.
- T0153 *Acronychia vestita* (Rutaceae); BAO SHAN YOU GAN; Vested Acronychia\*. Isolated compounds: 577.
- T0154 *Acroptilon repens* (Asteraceae); DING YU JU; Creeping Acroptilon. Used part: aerial parts. TCM Effects: To dispel wind-damp, resolve heat toxin. TCM Indications: Swelling toxin of welling abscess and sore, rheumatic arthritis. Isolated compounds: 576, 17127, 18627.
- T0155 *Actinidia arguta* (Actinidiaceae); MI HOU LI; Bower Actinidia. Used part: fruit. TCM Effects: To enrich *yin* and clear heat, eliminate vexation and allay thirst, free strangury. TCM Indications: Febrile diseases fluid damage, sand strangury, stone strangury, hypovitaminosis C, gum hemorrhage, hepatitis. Isolated compounds: 582, 2887, 3308, 5763, 9818.
- T0156 *Actinidia arguta* (Actinidiaceae); MI HOU LI GEN; Bower Actinidia Root\*. Used part: root. TCM Effects: To clear heat and disinhibit damp, dispel wind and eliminate impediment, resolve toxin and disperse swelling, stanch bleeding. TCM Indications: Jaundice, indigestion, vomiting, wind-damp impediment pain, carcinoma in digestive tract, welling abscess and sores with sore and boil, knocks and falls, bleeding due to external injury, breast milk stoppage. Isolated compounds: 12080, 18385.
- T0157 *Actinidia callosa* var. *henryi* (Actinidiaceae); JING LI MI HOU TAO; Henry Actinidia. Used part: root cortex. TCM Effects: To clear heat, disinhibit damp, disperse edema, relieve pain. TCM Indications: Damp-heat edema, intestinal welling abscess, swelling toxin of welling abscess and sore. Isolated compounds: 2887, 5763, 9818.
- T0158 *Actinidia chinensis* (Actinidiaceae); MI HOU TAO; Yangtao Actinidia. Used part: fruit. TCM Effects: To resolve heat, allay thirst, fortify stomach, free strangury. TCM Indications: Heat vexation, diabetes mellitus, dry cough due to lung dryness, indigestion, damp-heat jaundice, stone strangury, hemorrhoids. Isolated compounds: 582, 2887, 3765, 5763, 9818, 18838, 22975.
- T0159 *Actinidia chrysantha* (Actinidiaceae); JIN HUA MI HOU TAO; Goldflower Actinidia. Isolated compounds: 2887, 5763, 9818.
- T0160 *Actinidia deliciosa* (Actinidiaceae); MEI WEI MI HOU TAO; Delicious Actinidia. Isolated compounds: 2887, 5763, 9818.
- T0161 *Actinidia eriantha* (Actinidiaceae); MAO HUA MI HOU TAO; Hairyflower Actinidia. Used part: root and root cortex. TCM Effects: To resolve toxin and disperse swelling, clear heat and disinhibit damp. TCM Indications: Heat toxin swollen welling abscess, mammary welling abscess, aphonia due to lung heat, damp-heat dysentery, strangury-turbidity and vaginal discharge, wind-damp impediment pain, carcinoma of stomach, carcinoma of esophagus, mastocarcinoma, knocks and falls. Isolated compounds: 2887, 5763, 9818.
- T0162 *Actinidia glaucophylla* (Actinidiaceae); HUA NAN MI HOU TAO; Greyleaf Actinidia. Isolated compounds: 2887, 5763, 9818.
- T0163 *Actinidia latifolia* (Actinidiaceae); KUO YE MI HOU TAO; Broadleaf Actinidia. Used part: fruit. TCM Effects: To boost *qi* and nourish *yin*. TCM Indications: Enduring illness vacuity, tuberculosis. Isolated compounds: 2887, 5763, 9818.
- T0164 *Actinidia polygama* (Actinidiaceae); MU TIAN LIAO; Silvertine Actinidia. Used part: branchlet-leaf. TCM Effects: To dispel wind-damp, warm channels and relieve pain, disperse concretion and conglomeration. TCM Indications: Wind stroke with hemiplegia, wind-cold-damp impediment, lumbago, mounting *qi*, concretion conglomeration accumulation and gathering, *qi* dysentery. Isolated compounds: 581, 582, 583, 584, 937, 2284, 2887, 5680, 5763, 6320, 9818, 10008, 10365, 11144, 11145, 11149, 11181, 11196, 11378, 11467, 11559, 11560, 12080, 13596, 13597, 13598, 15434, 15437, 15484, 18385, 22855.
- T0165 *Actinidia rubricaulis* var. *coriacea* (Actinidiaceae); GE YE MI HOU TAO; Coriaceousleaf Actinidia. Used part: fruit. TCM Effects: Anticarcinoma. TCM Indications: Tumor. Isolated compounds: 2887, 5763, 9818.
- T0166 *Actinodaphne lancifolia* (Lauraceae); PI ZHEN YE HUANG ROU NAN; Lanceleaf Actinodaphne\*. Isolated compounds: 586, 587.
- T0167 *Adenanthera pavonina* (Fabaceae); HAI HONG DOU; Sandal Beadtree. Used part: seed. TCM Effects: To course wind and clear heat, dry damp and resolve itch, moisten skin. TCM Indications: Wandering wind of head and face. Isolated compounds: 6632, 12800, 15935.
- T0168 *Adenium obesum* (Apocynaceae); SHA MO QIANG WEI; Desert Rose. Isolated compounds: 15497.
- T0169 *Adenophora triphylla* var. *japonica* (Campanulaceae); RI BEN SAN YE SHA SEN; Japanese Trileaf Ladybell\*. Isolated compounds: 2792, 7437.
- T0170 *Adhatoda vasica* (Acanthaceae); DA BO GU; Malabanut. Used part: branchlet-leaf. TCM Effects: To quicken blood and relieve pain, joint sinews and bones, stanch bleeding. TCM Indications: Sinew and bone wound, sprain, blood stasis swelling and pain, wind-damp impediment pain, lumbago, profuse menstruation, flooding and spotting. Isolated

- compounds: 627, 1291, 2318, 16770, 22349, 22350, 22351, 22352.
- T0171 *Adiantum capillus-veneris* (Adiantaceae); ZHU ZONG CAO; Southern Maidenhair. Used part: whole herb. TCM Effects: To clear heat and resolve toxin, disinhibit water and free strangury. TCM Indications: Common cold with fever, lung heat cough, damp-heat diarrhea, dysentery, strangury-turbidity, vaginal discharge, mammary welling abscess, scrofula, poisonous snake bite. Isolated compounds: 632, 1935, 2901, 7099, 7760, 10123, 10541, 12098, 16042, 16043, 18373, 18414.
- T0172 *Adiantum caudatum* (Adiantaceae); BIAN YE TIE XIAN JUE; Walking Maidenhair. Used part: whole herb. TCM Effects: To clear heat and resolve toxin, disinhibit water and disperse edema. TCM Indications: Dysentery, edema, dribbling and inhibited voidings of urination, mammary welling abscess, poisonous snake bite, oral ulcer. Isolated compounds: 632, 10119, 10120, 10402, 11197, 15363, 15756.
- T0173 *Adiantum lunulatum* (Adiantaceae); BAN YUE XING TIE XIAN JUE; Philippine Maidenhair\*. Used part: whole herb. TCM Effects: To clear lung and relieve cough, disinhibit water and free strangury, disperse welling abscess and promote lactation. TCM Indications: Lung heat cough, dribbling pain of urination, mammary welling abscess with swelling and pain, breast milk stoppage. Isolated compounds: 7178.
- T0174 *Adiantum monochlamys* (Adiantaceae); DAN GAI TIE XIAN JUE; Monochlamys Maidenhair. Used part: whole herb. TCM Effects: To clear heat and resolve phlegm, resolve toxin. TCM Indications: Lung heat cough, common cold with fever, swollen welling abscess and toxin of clove. Isolated compounds: 629, 630, 9641.
- T0175 *Adiantum pedatum* (Adiantaceae); TIE SI QI; American Maidenhair Fern. Used part: whole herb. TCM Effects: To clear heat and resolve toxin, disinhibit water and free strangury. TCM Indications: Lung heat cough, dysentery, jaundice, dribbling and inhibited voidings of urination, swollen welling abscess, scrofula, scalds. Isolated compounds: 632, 641, 7757, 7758, 7795, 7796, 9642, 11197, 11425, 15405, 15406.
- T0176 *Adiantum* sp. (Adiantaceae). Isolated compounds: 15286, 18815.
- T0177 *Adiantum* spp. (Adiantaceae). Isolated compounds: 15406.
- T0178 *Adiantum sulphureum* (Adiantaceae); LIU HUANG TIE XIAN JUE; Sulphur Maidenhair Fern\*. Isolated compounds: 5969.
- T0179 *Adiantum venustum* (Adiantaceae); XI YE TIE XIAN JUE; Venus Maidenhair. Isolated compounds: 633, 634, 635.
- T0180 *Adina pilulifera* [Syn. *Cephalanthus pilulifera*] (Rubiaceae); SHUI TUAN HUA; Pilular Adina. Used part: whole herb, or flower and fruit. TCM Effects: To clear heat and disinhibit damp, disperse stasis and settle pain, engender flesh and stanch bleeding. TCM Indications: Dysentery, enteritis, edema, swelling toxin of welling abscess and sore, eczema, foot rot, enduring sores, bleeding due to external injury. Isolated compounds: 3676, 14979, 18427, 20369.
- Adina racemosa* = *Sinoadina racemosa*
- T0181 *Adina rubella* (Rubiaceae); XI YE SHUI TUAN HUA; Thinleaf Adina. Used part: stem-leaf or inflorescence. TCM Effects: To clear heat and resolve toxin. TCM Indications: dysentery with ardent fever, wind-fire toothache, eczema, bleeding due to external injury. Isolated compounds: 18437, 18438, 21922.
- Adina sessilifolia* = *Neonauclea sessilifolia*
- T0182 *Adinandra nitida* (Theaceae); GUANG LIANG YANG TONG; Shining Adinandra\*. Isolated compounds: 15540, 16766, 21864.
- T0183 *Adlumia cirrhosa* [Syn. *Adlumia fungosa*] (Papaveraceae); XUN ZHUANG SHAN YUAN CAO; Climbing Fumitory. Used part: whole herb. TCM Effects: To settle pain. TCM Indications: Various pain. Isolated compounds: 642, 643.
- Adlumia fungosa* = *Adlumia cirrhosa*
- T0184 *Adonis amurensis* (Ranunculaceae); FU SHOU CAO; Amur Adonis. Used part: whole herb. TCM Effects: To strengthen heart, disinhibit urine, calm. TCM Indications: Cardiac insufficiency, atrial fibrillation, congestive cardiac failure, edema due to heart disease, CNS depression. Isolated compounds: 644, 2246, 4012, 4036, 4547, 4548, 5525, 7992, 7993, 11497, 11643, 12880, 15529, 15530, 16034, 16917, 19375, 19542, 20072, 20397, 20402, 20405, 22195.
- T0185 *Adonis annua* (Ranunculaceae); QIU FU SHOU CAO; Annual Adonis\*. Isolated compounds: 647.
- T0186 *Adonis chrysocyatha* (Ranunculaceae); JIN HUANG CE JIN ZHAN HUA; Golden Adonis. Isolated compounds: 4547.
- T0187 *Adonis mongolica* (Ranunculaceae); MENG GU CE JIN ZHAN HUA; Mongolian Adonis\*. Isolated compounds: 4036, 7320, 16084.
- T0188 *Adonis sibirica* (Ranunculaceae); BEI CE JIN ZHAN HUA; Siberian Adonis. Isolated compounds: 646.
- T0189 *Adonis* spp. (Ranunculaceae). Isolated compounds: 22581.
- T0190 *Adonis sutchuenensis* (Ranunculaceae); SHU CE JIN ZHAN HUA; Szechwan Adonis. Used part: whole herb. TCM Effects: To clear heat and resolve toxin, dry damp, strengthen heart and calm. TCM Indications: Swelling toxin of welling abscess and sore, red eyes with gall, vomiting and diarrhea, dysentery, palpitation and insomnia, epilepsy. Isolated compounds: 3306.
- T0191 *Adonis vernalis* (Ranunculaceae); CHUN FU SHOU CAO; Yellow Adonis. Isolated compounds: 646, 4547, 6204, 22404.
- T0192 *Adonis wolgensis* (Ranunculaceae); FU ER JIA CE JIN ZHAN HUA; Volga Adonis. Isolated compounds: 646.
- T0193 *Adoxa moschatellina* (Adoxaceae); WU FU HUA; Muskroot. Isolated compounds: 14982.
- T0194 *Aegiceris corniculatum* (Myrsinaceae); LA ZHU GUO; Corniculate Aegiceris. Isolated compounds: 465, 4987, 5867, 5975, 5976, 6767, 7436, 10485, 14042, 14347, 14347, 18546.
- T0195 *Aeginetia indica* (Orobanchaceae); YE GU; Indian Aeginetia. Used part: whole herb. TCM Effects: To clear heat and resolve toxin. TCM Indications: Swelling pain in throat, urinary tract infection, medullitis, clove sore. Isolated compounds: 656, 657, 18656.
- T0196 *Aegiphila lhotzkyana*. Isolated compounds: 4590, 7080, 20465, 21231, 22213.
- T0197 *Aegle marmelos* (Rutaceae); MU<sup>(4)</sup> JU; Sepiaria. Used part: young fruit. TCM Effects: To check dysentery and diarrhea, disinhibit throat and disperse swelling. TCM Indications: Chronic diarrhea, abdominal pain, dysentery, swelling pain in throat. Isolated compounds: 933, 4863, 7703, 13571, 19540, 22195.
- T0198 *Aesculus assamica* (Hippocastanaceae); CHANG BING QI YE SHU; Assam Horsechestnut. Isolated compounds: 1913, 1914.
- T0199 *Aesculus californica* (Hippocastanaceae); JIA ZHOU QI YE SHU; Californian Buckeye. Isolated compounds: 6853.

- T0200 *Aesculus carnea* (Hippocastanaceae); HONG QI YE SHU; Red Horsechestnut. Isolated compounds: 6853.
- T0201 *Aesculus chinensis* (Hippocastanaceae); QI YE SHU; Chinese Buckeye. Used part: ripe fruit without shell. TCM Effects: See *Aesculus wilsonii*. TCM Indications: See *Aesculus wilsonii*. Isolated compounds: 660, 661, 662, 665, 667, 7361, 7362, 7363, 7364, 7365, 11416, 11417.
- T0202 *Aesculus hippocastanum* (Hippocastanaceae); OU ZHOU QI YE SHU; Horsechestnut. Used part: ripe fruit without shell. TCM Effects: See *Aesculus wilsonii*. TCM Indications: See *Aesculus wilsonii*. Isolated compounds: 660, 663, 664, 7942, 7944, 17867, 17876, 17888, 18411.
- T0203 *Aesculus* spp. (Hippocastanaceae). Isolated compounds: 17869.
- T0204 *Aesculus turbinata* (Hippocastanaceae); RI BEN QI YE SHU; Japanese Buckeye. Isolated compounds: 659, 663, 2152, 3829, 3830, 5271, 7942, 17964.
- T0205 *Aesculus wilsonii* (Hippocastanaceae); SUO LUO ZI; Wilson Buckeye Seed. Equivalent plant: *Aesculus chinensis*, *Aesculus hippocastanum*. Used part: ripe fruit without shell. TCM Effects: To soothe liver, rectify *qi*, loosen center, relieve pain. TCM Indications: Distending pain in chest and rib-side, distending pain in breast, dysmenorrhea, pain in stomach duct, pain in chest and abdomen. Isolated compounds: 660, 21368.
- T0206 *Aframomum daniellin* (Zingiberaceae); DUO NI FEI SHA REN. Isolated compounds: 675.
- T0207 African frog FEI ZHOU WA; African frog. Isolated compounds: 22057.
- T0208 *Afromosia elata* XI FEI HONG DOU SHU; West Africa Afromosia. Isolated compounds: 676.
- T0209 *Agapanthus africanus* (Liliaceae); FEI ZHOU BAI ZI LIAN; African Lily. Isolated compounds: 6195.
- T0210 *Agaricus bisporus* (Agaricaceae); SHUANG BAO MO GU; Bispore Mushroom\*. Used part: sporocarp. TCM Effects: See *Agaricus campestris*. TCM Indications: See *Agaricus campestris*. Isolated compounds: 701, 7250, 13608.
- T0211 *Agaricus campestris* (Agaricaceae); MO GU; Mushroom. Equivalent plant: *Agaricus bisporus*. Used part: sporocarp. TCM Effects: To fortify spleen and promote digestion, calm liver and raise spirit. TCM Indications: Non-digestion of food accumulation, torpid intake, scant breast milk, hypertension, fatigued spirit and desire to sleep. Isolated compounds: 625, 701, 1040, 1055, 3205, 3774, 4223, 4591, 5350, 5351, 7853, 9602, 10357, 12399, 18261, 18266, 19360, 21504, 21505, 21506, 22254, 22814.  
*Agaricus piperatus* = *Lactarius piperatus*
- T0212 *Agastache rugosus* (Lamiaceae); HUO XIANG; Wrinkled Gianthyssop. Used part: aerial parts. TCM Effects: To dispel summerheat and resolve exterior, harmonize stomach and transform damp. TCM Indications: Summer common cold, cold-heat headache, glomus and oppression in chest and stomach duct, vomiting and diarrhea, diarrhea in pregnancy, deep-source nasal congestion. Isolated compounds: 56, 61, 708, 709, 1186, 1282, 2851, 2940, 2941, 2943, 3241, 3242, 4219, 4550, 4680, 6059, 6741, 6918, 7385, 7730, 7951, 9522, 9524, 9670, 11200, 12843, 12849, 13883, 14359, 15978, 15979, 16050, 16498, 16711, 17376, 17377, 18668, 19983, 21391.
- T0213 *Agathis dammara* (Araucariaceae); BEI KE SHAN; Amboina Pitch Tree. Isolated compounds: 710.
- T0214 *Agathis palmerstoni* (Araucariaceae); PA SHI BEI KE SHAN; Palmerston Pitch Tree\*. Isolated compounds: 4376.
- T0215 *Agave americana* (Amaryllidaceae); FAN MA; American Agave. Used part: leaf. TCM Effects: To resolve toxin and draw out pus, kill worms, stanch bleeding. TCM Indications: Sores with welling abscess and flat abscess, scab and lichen, pelvic inflammation, flooding. Isolated compounds: 697, 698, 699, 712, 713, 714, 715, 716, 725, 727, 3552, 4928, 4945, 7008, 8457, 9253, 13510, 17479, 18893, 20216, 21383, 21386, 22045.
- T0216 *Agave americana* var. *marginata* [Syn. *Agave americana* var. *variegata*] (Amaryllidaceae); WU CI FAN MA; Spineless Agave. Used part: leaf. TCM Effects: To moisten lung, transform phlegm, suppress cough. TCM Indications: Vacuity taxation cough, blood ejection, asthma. Isolated compounds: 3552, 4928, 4945, 9192, 9253, 12126, 13510, 15463, 15525, 21383, 21388.  
*Agave americana* var. *variegata* = *Agave americana* var. *marginata*
- T0217 *Agave angustifolia* (Amaryllidaceae); DUAN YE LONG SHE LAN; Narrowleaf Agave. Isolated compounds: 3552, 9253, 13510, 21383.
- T0218 *Agave angustifolia* var. *marginata* (Amaryllidaceae); YIN BIAN LONG SHE LAN; Silveredge Agave. Isolated compounds: 3552, 9253.
