# THE JEWELERS' CIRCULAR

WITH WHICH ARE CONSOLIDATED  
 THE HOROLOGICAL REVIEW,  
 THE JEWELERS' WEEKLY,  
 THE JEWELERS REVIEW

Copyright 1908 by  
 The Jewelers' Circular  
 Publishing Company.

11 John St., Corner Broadway, New York.

Entered as second-class matter at the New York, N. Y., Post Office.

40th Year.

WEDNESDAY, AUGUST 5, 1908.

Vol. LVII., No. 1.

Handsome Copper Trophy Made for Oshkosh Yacht Club.  
 (See Text on Page 45.)

# Alvin Deposit Ware

STYLE A.

The discriminating jewelers, those best qualified to appreciate Silver Excellence, have ever been our best patrons.

ALVIN SUPERIORITY is shown in the so-called "little points" which go so far to achieve elegance in style.

When you see a piece of deposit ware a little better than any deposit ware you have ever seen, you will find this trade mark.

STYLE B.

## A Full-Blown Success

By operating  
a cutting factory  
to produce goods  
at first cost.

By eliminating all need-  
less expenses in market-  
ing the goods.

We are able to offer you the  
finest cut diamonds at the ac-  
tual cost of material, plus the  
cost of cutting and our profit.

They are waiting to  
drop into your hands  
for the asking.

### J. R. Wood & Sons DIAMOND CUTTERS

Importers of Emeralds, Rubies and  
Sapphires

2 Maiden Lane, Cor. of 170 Broadway  
NEW YORK

# AN OLD FAVORITE

Some want 18kt. wedding rings, and some want 14kt. We have them—all weights, shapes and sizes. The best rings made, and for the least money—small wonder they are the favorite wedding rings.

## J. R. WOOD & SONS

WEDDING RING MAKERS

2 Maiden Lane, Corner of 170 Broadway

NEW YORK

# S. O. BIGNEY & CO.

## MIRROR FINISH

is the name which has been given to S. O. Bigney & Co.'s

### HIGH GRADE GOLD-FILLED CHAINS

on account of the beautiful finish. After the links are soldered the gold is somewhat porous. In order to get a perfect finish, the only method known to the art is the method of burnishing. This we apply to our chains. It closes the pores, hardens the surface, gives the mirror finish, and will add one-third to the wearing life of the chain. This method makes for durability and excels all other processes of hardening finish.

Every retailer should have a good stock of our high-grade, gold-filled, mirror-finish Chains, Fobs and Bracelets.

### We Make Bracelets of Every Description

Oval and Square, Side Swing and Hinge, beautifully finished and embossed. Pleasing to the eye, and rapid sellers.

**Office and Factory, Attleboro, Mass.**

New York Office, 3 Maiden Lane

Flat Belcher ring as received with claws badly worn.

How the same ring looks when stone is reset without new claws. Stone is not secure and point is below inside of ring.

How we splice settings and solder in new claws; seams do not show and rings are as perfect as when originally made.

How ring looks with new claws and stone securely reset. Entire ring is finished like new.

When we tell you that we have received as many as 75 diamond rings in one day for new claws and settings, you will not think us extravagant for using a full page in THE JEWELERS' CIRCULAR to exploit this feature of our business, but will wonder if you are getting your share of claw work.

99 out of every 100 owners of diamond rings willingly pay \$1.50 to \$5 for new claws or settings on their rings, but would not buy new mountings for \$5 to \$25.

It is worth while to familiarize yourself and your employees with this work, as it is one of the important little things that helps to make your business profitable.

## WENDELL & COMPANY

The firm that did much to change the repair end of the Retail Jewelry Business from a source of worry and dissatisfaction to one of pleasure and profit.

47 John Street  
New York

TWO WONDERFUL SHOPS

57 Washington Street  
Chicago

Tiffany ring as received with worn off claws. Stone cannot be reset, as it would be too low to look well and the point would come below the inner circle of ring.  
(See cut No. 2 of flat belcher.)

How same ring looks with new claws and stone securely reset. Entire ring is finished like new.

Oval Belcher ring as received with claws badly worn. Stone cannot be reset, as it would be too low to look well and the point would come below the inner circle of ring.  
(See cut No. 2 of flat belcher.)

How same ring looks with new claws and stone securely reset. Entire ring is finished like new.

THE PRICES QUOTED ABOVE FOR NEW CLAWS AND SETTINGS ARE SUBJECT TO OUR CATALOGUE DISCOUNT.

WE CAN PUT NEW CLAWS AND SETTINGS ON MOUNTINGS TAKEN IN TRADE AND REFINISH THEM SO THEY WILL BE AS GOOD AS NEW.

WE RETIP CLAWS AND MAKE NEW SETTINGS FOR CLUSTER MOUNTINGS SO THEY ARE AS GOOD AS WHEN ORIGINALLY MADE, AT PRICES THAT MAKE IT ADVANTAGEOUS FOR THE OWNERS TO HAVE THIS WORK DONE.

Carrying no diamonds in stock, entering and tagging each piece of diamond jewelry as received, then giving to each workman but one ring at a time, which is returned before he receives another, prevent any possibility of diamonds being exchanged while in our possession.

NEW YORK  
Maiden Lane

**STAR WATCH CASE CO.**  
LUDINGTON, MICHIGAN

COPYRIGHTED BY T. F. KENNEDY

**Pearl Setting Plier, No. 327**

This tool should prove a useful addition to any jeweler's outfit. It is intended for setting half pearls or other stones of similar shape, which are imbedded in gold or other metal. It is used for cutting a burr and forcing it against the stone, either in brooches or rings, thereby holding the stone securely without liability of the tools slipping or breaking the stone, as is often the case with the use of other tools. The lower jaws are half round, to conform to the inner shape of rings. The work can be done more perfectly and under better control than with gravers or other tools used heretofore.

Made of best Swedish steel, nicely nickel-plated.

**Price, each, \$1.25**

**Phesay's Two-In-One Soldering Tweezer**

**Price, each, 75c.**

By using Phesay's Two-in-One Soldering Tweezer the joint catch or Back is handled only once.

**SAVES TROUBLE.**—Phesay's Two-in-One, Soldering Tweezers will solder plumb and true. Will not let article slide when solder flows. Will hold pieces of jewelry with rounded stones or flat surfaces with equal firmness.

**Improved Turning and Jeweling Attachment No. 33**

**New Features**

Adjustment for alignment, fine feed, with direct connected screw. Positive binder operated by slight movement of the thumb or finger. Cutters may be changed quickly. No small projecting parts to become lost or broken. Special cutters can be made from wire.

**And Other Good Points**

One tool may be used on different makes of lathes by simply changing tapers. Can be changed quickly.

**All Standard Tapers in Stock**

Each attachment is furnished with two cutters, one burnisher and two blanks. In ordering, please give name and size of lathe. **Price, each, \$4.50**

**Randall Jewel Lamp**

Cut is full size

**Price, each, 50c.**

Especially designed for work where very small flame is essential and very desirable when cementing roller and pallet jewels, for drawing temper of pivots and annealing small parts of watches. Made of brass full nickel plated. Has rubber washers inside of cap and under the hood to avoid leaking and evaporating.

**Guaranteed "E. F. B." Turning Gravers No. 33**

**Price, per set of 7, in case, \$3.00**

The finest set of gravers on the market. Handle is of the finest cocobolo, fitted with nickel plated socket in which the gravers can be moved in or out as desired. The two set screws hold the graver rigid and prevent rocking or chattering. They will be appreciated by all users of fine tools.

**"Ideal" Pins for Engraving Blocks**

**Per set of 4 with 4 pure rubber tubes, 50c.**

The faces are milled to various shapes to take regular and irregularly formed articles. The few illustrations show their possibilities. Four pure rubber rings are furnished to slip over the pins when very delicate and highly polished articles are to be clamped. Made for all Standard Engraving Blocks. Please state name of Block when ordering.

# The Hampden Watch Co.

CANTON, OHIO

The Catalog we make for our customers not only gives their stores that high standard and prestige not obtainable by any other means, but it keeps them in the lead over all competitors, as well as holds that portion of business which would otherwise go to the large mail order houses.

**Read Our Customers' Letters and Write Us for Samples of Catalogs**

STORE OF CHAS. G. DERLETH, EAST ST. LOUIS, ILLINOIS.

EAST ST. LOUIS, Ill., Feb. 24, 1908.  
THE ARNSTINE BROS. COMPANY,  
Cleveland, O.:

Gentlemen—This section felt the effects of the financial disturbance preceding the holidays probably more severely, on account of the large manufacturing interests located here, than the average.

I went ahead, however, put out your Catalogs and awaited results. My faith in the Catalogs was justified, for while other jewelers complained of slack trade, this store had nearly all it could manage with the help obtainable; in fact, I had the largest holiday trade in my business career, about 25 per cent. in excess of the previous year.

Received a great many compliments on the handsome appearance of the Catalog, and the fact that I could promptly supply the articles illustrated had a great deal to do with making it a success.

Have used your Catalogs since 1904 and have invariably obtained excellent results through them.

I trust your Mr. Arnstine will call on me in plenty of time to make arrangements for my next Catalog. I want to double the number this year. Yours truly,

CHAS. G. DERLETH.

**This firm used The Arnstine Bros. Company Catalogs in 1904, 1905, 1906 and 1907, and again placed an order for 1908.**

REDDING, Cal., Jan. 9th, 1908.

THE ARNSTINE BROS. COMPANY, Cleveland, Ohio.

Gentlemen:—In regard to Catalogs, I don't really know what to think myself, as the panic naturally made things bad, but I know they brought business.

I think I could do better next year with them than I did this year. No doubt your traveler will be through here this Summer again, when I will talk it over with him.

Yours very truly,

A. DOBROWSKY.

**This firm used The Arnstine Bros. Company Catalog in 1907.**

**“Krementz-Bodkin Back”**  
**STUD and VEST BUTTON**

Pat. Feb. 16, 1904

Krementz & Co. believe the trade will agree that they understand the jewelry business sufficiently to know that the “Krementz-Bodkin Back” Stud and Vest Button is the simplest and best mechanical Stud or Vest Button made.

The “Krementz-Bodkin Back” Stud and Vest Button is not one piece, but is one-piece construction, which makes it very simple and the strongest and most durable, because:

- 1—It is Solderless
- 2—It has no spring or hollow wire to bend or break
- 3—It is made of solid, hard spring metal throughout
- 4—It is made by Kremmentz & Co. which insures perfect quality, construction and workmanship

THE STORY OF THE HEAD

## Krementz & Co. Invite Comparison

Krementz & Co. stand back of their assertion. All “Krementz-Bodkin Back” Studs and Vest Buttons are sold also under the unique Kremmentz Collar Button Guarantee.

THE STORY OF THE BODKIN BACK

### GUARANTEE

If for any cause whatever, a “Krementz-Bodkin Back” Stud or Vest Button should be damaged either in the hands of the dealer or wearer, a new one will be given in exchange, without charge. “Krementz-Bodkin Back” Studs and Vest Buttons are made in large variety of patterns in 14-kt. gold and platinum, set with pearls and diamonds.

16th Year

WEDNESDAY, AUGUST 5, 1908

Vol. VI. No. 11

If, prior to our EXHIBITION, which will be held at our offices from August 24th to 29th, inclusive, you have not made your Fall purchases, you have at least given the subject some thought. May we influence your decision by a word or two regarding a matter that is worthy of your consideration?

The Diamond Jewelry produced by our designers and craftsmen embodies the best styles of the moment. Influenced neither by ultra-radical nor by ultra-conservative tendencies, making our own mountings from our own designs, and setting into them the choicest precious stones which we ourselves import, we have merely to follow our own precedents and to live up to our chosen standard of giving you choice unequalled.

Because of our facilities, there is no increase in cost on account of the distinctiveness in these new productions—the price is as modest as is consistent with the high quality of our goods.

## A NEW WHITING PATTERN

## The "Madam Jumel"

The Whiting Company's new pattern, the "Madam Jumel," while thoroughly Colonial in its general simplicity of line and reticence of ornamentation, suggests in its pervading grace the spirit of the late 18th Century French Neoclassicism.

It is entirely appropriate, therefore, that a pattern displaying these characteristics should be associated with the name of one who, during Revolutionary time and later, was historically prominent as a social link between her own countrymen and their French sympathizers.

The "Madam Jumel" is produced in a complete line of spoons, forks and fancy flatware, and will be ready for delivery September 15, 1908.

## WHITING MFG. COMPANY

*Silversmiths*

Broadway and Nineteenth Street

New York

San Francisco, Cal.  
717 Market St.

# HERE IT IS AT LAST!

Just what you have been looking for and have had calls for time and again. A German Silver Wrist Bag with a Soldered Mesh. Somewhat higher in price than the unsoldered mesh? Of course! But you can now sell a bag that will not break and one you can guarantee. Twelve patterns, 4", 5", 5 $\frac{3}{4}$ ", 6", 6 $\frac{1}{4}$ " widths.

We are still headquarters for high grade Sterling Silver Bags, and have also added a line of Change Purses.

Our goods are made on honor; we believe with Ruskin that "A composition for cheapness, and not for excellence of workmanship, is the most frequent and certain cause of the rapid decay and entire destruction of arts and manufactures."

## ENGELSMAN'S PATENTED COMBINATION "GEM" DISPLAY RINGS and ADJUSTABLE STONE HOLDERS MEET A LONG-FELT WANT

THEY ARE MONEY-MAKERS AND MONEY-SAVERS

UNMOUNTED STONES of any size and shape can be displayed advantageously, as is herein illustrated. Your investment in stock can thereby be *decreased*, as you need not mount them up in expensive settings. Your sales will also *increase* by being able to exhibit unmounted stones. The prices are *low* enough to induce you to buy them and *save* you from incurring frequent losses caused by the awkward handling of the tweezers when your customer desires to examine unmounted stones. Try them. For sale by all jobbers.

Due to greatly improved automatic machinery and reduced cost of production, we are now quoting these as follows:

Sets of 18 (full set), in box,	\$6.00
" " 12	4.00
" " 9	3.00

## ¶ To the Retail Jeweler

¶ Are you interested in a beautiful Jewelry Catalog for this fall? We have prepared a sixty-four page catalog, which we are offering to the Jewelry Trade for their own distribution.

¶ We have carefully selected goods for this book from manufactures who sell *direct to the Retail Trade*.

¶ You are not obligated to buy one cent's worth of goods in order to secure this beautiful catalog. You buy when you please, and then *direct from the manufacturers*.

¶ Do you realize Mr. Jeweler, what an advantage this is? This catalog is the finest and most attractive book ever offered to the Jewelry Trade.

¶ There are no strings attached to our proposition either. This is a clean, legitimate proposition, and it places you on the ground floor, where you can buy the goods *direct from the manufacturers*.

¶ This catalog will enable you to compete successfully with such mail order competition, as you well know, exists in your community today.

FRANK E. HARMER

*LA  
VOGUE  
DIRECTOIRE*

*AN  
INSPIRING  
PERIOD*

**T**HE EPOCH following the Revolution but preceding the Empire witnessed a marvelous artistic impulse which took its inspiration from Greece, but added the distinctive touch of French genius. This was the period of the Directoire, whose artistic influence during the present season will be of the most widespread character. Jewelry, dress, coiffure, furnishings — everything will feel the impulse. The representatives of this house, in extended visits to France, have made exhaustive studies of the jewelry of the period and have garnered its richest treasures. These creations will delight you, while their moderate prices open splendid avenues to profit. Incidentally, sapphire will be the reigning stone.

## One Out of Many

The Flat Pencil being one of our most practical and beautiful styles, we feel called upon to particularly present it to the trade out of our line of hundreds of others.

This is the pencil that is used by the elite for Vest Pocket or Ladies' Purse use. It will be found also in the pocket or school bag of boys and girls everywhere. The shape has been wonderfully improved this year, insuring increased sales. Many new styles and patterns have been added to our line.

Front

Side

There has also been brought out a special shaped oval pencil in various attractive colors to conveniently fit this holder.

Write for information. Ask our salesman to show or we will gladly send an assortment for your inspection upon request.

**Difference in Structure of Reconstructed and Natural Rubies  
 Shown by Photographs.**

OUR esteemed German contemporary, the *Deutsche Goldschmiede Zeitung*, has supplemented an article which it recently published upon the points of difference between reconstructed and genuine rubies, by presenting some additional facts, and especially by reproducing two illustrations made from enlarged photographs of reconstructed and genuine rubies which were placed at their disposal by A. F. Kotler, of St. Petersburg. To this journal we are indebted for the following points as to the differences shown by the photographs of the natural and artificial stones.

On careful examination, in the case of the artificial ruby (Fig. 1), we shall notice

FIG. 1.—STRUCTURE OF RECONSTRUCTED RUBY.

at once the typical concentric lines as well as the little bubbles occurring in large numbers, which are always spherical, having, in other words, the character of an air bubble in a melted mass. The concentric fine lines showing variations in the color, were compared at the time with the circular or spiral lines that result from the string of a paste-like mass, and these can be distinguished in the picture, leaving nothing to be desired as far as plainness is concerned. Fig. 2, which represents an enlargement of a naturally formed genuine ruby, also shows spaces or enclosures, but these, as may be seen, are more or less angular, being bounded by crystalline surfaces. The angularity of these voids is, moreover, determined by the entire crystalline structure of the natural stone.

If, therefore, in the genuine ruby, the color is unequally distributed, the color stripes invariably assume a vertical direction, are never concentric as in the artificial stone. We may also frequently note that

the color does not run in one direction, but that color stripes, often of varying intensity, cross one another at obtuse angles; in other words, correspond strictly with the crystalline structure of the grown stone. We may reiterate the assertion that in a genuine natural ruby concentric lines are never noted. This most important, and at the same time, certain and simplest distinguishing characteristic, is the more to be regarded, inasmuch as the specific gravity, the color, the hardness and the dichroism; in other words, all the optical and chemical properties of the artificial ruby correspond, more or less, with those of the genuine stone and consequently the scientific assistance, in this case, fails us entirely. An experienced gem expert will, moreover, recognize the genuine ruby by its peculiar, characteristic, soft, silky brilliance, which is lacking in all artificial rubies.

One might supplement the foregoing by adding something on the preparation of artificial rubies that will certainly be of interest to our readers. Artificial rubies are produced according to two essentially different methods, first, by melting together small pieces to form a larger whole, also by synthesis, by the production from its proper constituents and according to the same conditions which in nature govern its production—great heat, a high pressure, etc. Synthetically produced rubies, therefore, are obtained by melting chemically pure alumina in an oxyhydrogen blast, or by the electric process. The color is obtained by a small addition of chromic acid.

The reconstructed ruby, as already stated, is made by the melting together of small Oriental rubies. The *modus operandi*, according to this system, consists in first melting a small stone in the oxyhydrogen blast, or in an electric furnace, and then gradually adding to the molten mass the remaining small stones, separately. Inferior rubies, Siamese rubies, or balas rubies, cannot be used; defective Oriental rubies also yield a poor result. The general belief, therefore, that otherwise waste pieces could be smelted together, possibly purified and improved by an addition of chemicals, does not hold good. Only faultless and dark-colored stones can be employed and even then some chromic oxide must be added to improve the color, for the natural color in part disappears during the smelting process.

C. W. Se Legue, a jeweler of Logansport, Ind., has been elected local watch inspector of the Pan Handle Railroad to succeed C. H. Church, deceased.

**Handsome Work in Copper as Prize for  
 Oshkosh Yacht Club.**

A BEAUTIFUL and at the same time unusual trophy, which will be ranked among the notable yachting prizes offered this year, is the punch set, consisting of bowl, plateau and 24 punch cups, which was recently made for the Oshkosh Yacht Club. The work, which is illustrated on the front cover of this issue, is entirely of copper and is hand wrought.

The bowl, which is gold-lined, stands about 25 inches high, is about 17 inches in diameter and has a capacity of five gallons. The plateau, holding the cups, measures about 33 inches in diameter.

The decorative scheme, which is suggestive of conventionalized effects, is etched, as is also the inscription, which is shown, in brass. The insignia of the club as well as the United States Jack and the yacht ensign are enameled in their proper colors.

FIG. 2.—STRUCTURE OF NATURAL RUBY.

The bowl is mounted on a base of mission oak, the whole piece setting in a groove which keeps it in its proper place on the plateau. The trophy was designed and made especially for the event by the Benedict Art Studio, East Syracuse, N. Y.

The most serious robbery of the Tercenary period took place at the jewelry store of J. F. Dobbins, on Buade St., Quebec, which was looted of stock valued at \$2,000. It is thought that the robbery was the work of an expert jewelry thief, who managed to get into the city despite the activity of an army of detectives. Early in the evening a well-dressed man entered the store of Mr. Dobbins and asked to see some diamond rings. He was shown a tray and requested to be shown some others. Mr. Dobbins turned to get some other jewelry, and by the time he had turned again the thief had gone. A tray containing 18 diamond rings disappeared with him. A number of detectives have been working on the case.

## DURING THE SPRING

OUR FACTORY has been very busy getting up many new patterns in our various lines of gold jewelry.

OUR PATTERNS AND PRICES are so attractive that they merit the attention of all progressive retail jewelers.

OUR TRAVELERS are now starting out with more new goods than ever before.

OUR CUSTOMERS will be wise in carefully considering the lines of 14k. and 10k. gold rings, 14k. lockets, 14k. link and stiff bar buttons, 14k. Larter shirt studs, 14k. Larter vest buttons and 14k. tie clips which our travelers are now showing.

## ELSIE BEE'S FASHIONS.

SUMMER NOVELTIES NOTED IN A LADY'S RAMBLES  
AMONG THE JEWELERS.

ALL the newest fobs are in wire effect, but the old-fashioned buckle, plain or engraved, is also used.

\* \* \*

Belt pins rather than buckles have the greatest call just now.

\* \* \*

The style of wearing links and scarf pin to match still prevails.

\* \* \*

Brooches and hat pins follow the leading toward the single stone idea.

\* \* \*

Everything runs to stones at present. There is little call for plain jewelry. Color, and much of it, seems to be the demand.

\* \* \*

Waist sets are having a steady sale. The designs vary from the simple round style resembling a button to oval-shaped affairs, engraved, frosted, or set with stones.

\* \* \*

Barrettes in gold and silver are in the monogram form, surrounded by a narrow strip of metal. They differ in shape and outline, according to the style of the lettering.

\* \* \*

There is a marked tendency toward the old-fashioned and unique in jewelry designs at present. The use of large, single stones of striking effect is also a noticeable feature of the Summer and early Fall goods.

\* \* \*

A queerly designed fob is composed of heart-shaped links made of polished concentric wires. Attached only at one point, these links move easily from side to side. A charm to harmonize with this unique design completes the ornament.

\* \* \*

The interchangeable scarf pin is having a good sale. It provides for a great variety of single cabochon stone settings, each slipping easily into place above the stationary diamond by means of a simple adjustment. One diamond thus serves the purpose for any number of pins.

\* \* \*

A new style of silver mesh bag has been launched upon the market. It is stiff, which means that it keeps in shape better than some of the soft ones, and is less likely to break, as a single wire runs all around, although it does not begin to have the space in it that the shirred bags have.

\* \* \*

A New York jeweler exhibits four new designs of gold bracelets. One of these is a rather broad band in the engine-turned work, styled "snake skin"; another is hollow with pierced effect across the front; a third is heavily engraved with a richly frosted appearance, while the fourth is in fine, delicate lines that form a sort of basket design.

ELSIE BEE.

Jno. W. Wehrly & Bro., Portland, Ind., have been succeeded by Wehrly & Hoke. John I. Hoke conducts a store at Ridgeville, Ind., which will also be conducted in future under the name of Wehrly & Hoke.

"JEWELLERY." By H. CLIFFORD SMITH, R.A. Royal octavo, 458 pp., cloth gilt. Copiously illustrated. Published by G. P. Putnam's Sons, New York. Price, \$7.50.

"JEWELLERY" is the latest of the 20 volumes projected to come off the press, which, under the title "Connoisseur's Library," will, when completed, form a series of textbooks worthy a foremost place in the reference library. The present work is written by no less an authority on the subject than H. Clifford Smith, M. A., of the Victoria and Albert Museum, London. It is copiously illustrated, having no less than 54 full-page plates in the best photo process. Several of these are in natural colors. These illustrations are reproductions of the finest jewelry collections loaned specially to the author. Among those who have contributed from their invaluable collections are Lady Rothschild, Lady Fuller-Elliott-Drake, Lady Cook (Vicomtesse de Monserrate), Lady Ramsay, Lady Monckton, Mrs. Holman Hunt, Mrs. Percy Macquoid, the Marquess of Clanricarde, Jeffery Whitehead, Max Rosenbaum, Sir John Evans, K. C. B.; J. Pierpont Morgan, Viscount Falkland, Lord Fitzhardinge, Herr James Simon, Lieut. Col. G. B. Croft Lyons, etc. Thus it will be seen the author has been enabled to draw his examples from the greatest private collections of antique jewelry, sources few have ever been able to get to.

The jeweler who means to keep well instructed in his art cannot well refrain from putting "Jewellery" on his book shelf. In fact, it is the book he has been needing, but did not miss because it had not been published. It covers ground never before touched; it clears up points always before hazy, and it furnishes unique examples of the different historic periods never before photographed.

The author confines himself to European jewelry, excepting only six pages devoted to Egyptian. He divides his work into chronological sections—jewelry worn during classical times and until the ninth century of our era; jewels of the Middle Ages; those of the Renaissance, and those of subsequent times.

The history of jewelry abounds with sentiment, incident and art. Much on each branch is found within the covers of this work. A shelf full of volumes could not cover all the sentiment, all the incidents or all the art phases that dwell within the realms of this entrancing history. "Jewellery" contains a large proportion of the kernel; it expresses the essence of the delightful subject. The waves of advance and decadence in the goldsmiths' art during the succeeding centuries are graphically described, and the multitude of examples cited and reproduced in the engravings help to give a very clear view of the progress of

the art, so far as Europe is concerned. The depiction is very vivid as the periods succeed one another—Egyptian, Phœnician, Greek, Etruscan, Roman, Byzantine, Celtic, Romano-British, Anglo-Saxon, Mediæval, Renaissance, Modern. And the *technique* of the styles is very fully explained in language clear to any lay reader.

In reviewing a work of such broad scope, space at disposal forbids any attempt at following the history or even depiction of the "pieces" seriously. The trend of events and their effect in jewelry production during the centuries in 400 pages is necessarily "boiled down" to an epitome already. It must suffice, in these columns, to "pick a few plums" from its pages—just atoms that interest, but having no consecutive bearing.

Mr. Clark in his preface calls attention to some much neglected sources on which he has drawn for valuable evidence in his Renaissance chapters, namely, engraved designs and working drawings of jewelers, personal inventories and pictures by the old masters.

In his introduction the author mentions a fact generally overlooked by writers on jewelry: "Among savages, and races not far removed from barbarism, it may be observed that the love of ornament is chiefly characteristic of men. As civilization advances it is displayed more and more by women alone. Yet even a century ago, among the most civilized nations of Europe, the 'beaux' and 'macaronis' adorned themselves with jewelry of all kinds." His few words on Phœnician jewelry are of special interest, as so little authoritative appears in print on this subject. In this connection we cannot help repeating his statement of two strange practices: "The Phœnicians were addicted to the barbaric practice of piercing the upper part of the ears, as well as the lobes, and attaching to them rings bearing drop-shaped pendants. Rings were also attached to the hair on each side of the face." Surely this will be news to most readers! The richly bejeweled stupendous headpiece on the Phœnician woman's statue (Platc II.) offers to jewelers a startling revelation of the barbaric splendor of that long-past period.

That is a strange fact (mentioned in the section devoted to Greek jewelry) that neither in Greek, Etruscan or Roman representations of the human figure do we find rings depicted on the fingers! Amber evidently in ancient days received higher esteem than in these times. It is found in Anglo-Saxon, Irish, Italian, Roman, and even in prehistoric, jewelry. It was not only an ornament, but a talisman for protection against danger, especially against witchcraft. Amber in which small insects were enclosed was particularly prized. "The price," says Pliny, "of a small figure in it, however diminutive, exceeds that of

a living healthy slave." Interesting reads the description of the Roman appetite for extravagant ring decoration.

Why Mr. Smith's antipathy to jet, which he characterizes as "unattractive material"?

He lets important light on the jewelry subject when, in the opening lines of the Mediæval section, the author says: "In the days of antiquity, so far as our knowledge goes, the idea of fashion in the present sense of the term did not exist. But in the Middle Ages, as Luthmer points out, it becomes an important fact in the history of civilization." Hence, the author tells us, the student of jewelry finds greater problems in the Middle Ages than in the classic antiquity because these variations in fashions brought in their train more rapid alterations in jewelry style to comport with the prevailing fashion in dress.

In a short chapter on "The Mystery of Precious Stones" are some extraordinarily beautiful reproductions of some cameo antiquities, viz., jewel of St. Hilary, cameo of Charles V., and the Schaffhausen onyx. This section deals with the many superstitions attached to gems. New to most readers will be the extensive information on *enseignes*, or hat badges. There is considerable enumeration of men's collar badges in this Mediæval division. In those days "wearing a superior's collar" meant something, and was no slur as in these days. Coral (lately becoming popular) has some interesting facts in this work, and the anomalous mixture of pagan superstition in religious ritual reads like blasphemy to us: "Coral was used for rosaries, and, above all, as a charm—a ring of gold or silver being attached to its stalk. The Romans tied little branches of it round their children's necks to ward off the evil eye; and the infant Saviour in many an early Italian picture is represented as wearing a piece of coral in a similar manner."

Life was very interesting for the manufacturing jeweler during Mediæval days, if the following "process of law" was a fair sample, and if orders were filled with such laxity. Ercole Fedele, the skilled goldsmith of Ferrara, received an order from Isabella d'Este, Marchioness of Mantua, for a pair of silver bracelets. She states they never would have been finished during her lifetime if Duke Alfonso had not thrown the jeweler into the Castello dungeon! Fifth Ave. patrons cannot "rush" orders these days, thank the heavens, by giving the jeweler a dose of "Tombs" treatment! We have much to be thankful for, after all, in spite of the panic times.

Fancy the cost of a wardrobe such as that of King Edward III. of England, with "304 dozen silver buckles and the same number of pendants"! Without denying the great merit in Cellini's masterpieces, the author gives credit to Germans for much of the beautiful products of genius that were formerly all accredited to the Italian master. In one case he even places the proof (by an engraved design of Hans Collaert) that takes a lovely pendant from the reputed Cellini and places it as an assured work of the Antwerp engraver.

Intensely interesting reading are some of those descriptions of potentates such as Henry VIII. and "Good Queen Bess" buried alive under their mass of gems and jewels

until nothing but their noses remain bare of the precious baubles.

As of special interest in this volume in these days, when cameos are in such vogue, must be mentioned the Cellini "Leda and the Swan." In its most exquisite workmanship it is capitally reproduced on Plate XXIX. The, to us, curious conjuncture of a cameo and repoussé gold in carrying out a picture shows up grandly in its still further enhanced effect with enamels, diamonds and small rubies. The combination to gain a grouped interior proves the great master's marvelous art and skill and convinces the reader that this is probably the most beautiful "piece" that crowns the galaxy of glorious examples of the Renaissance goldsmiths.

In the XVI. century "mere men" got so vain they took to earrings. And this not exceptionally, for Philip Stubbes writes: "Women are so far bewitched as they are not ashamed to make holes in their ears, whereat they hang rings, and other jewels of gold and precious stones; but this is not so much frequented among women as among men." Mr. Smith says men got this habit from Spanish influences, where both sexes wore earrings. In this connection it must be remembered that sailors always wore earrings, unless it is quite recently. Shakespeare's portrait shows him with earrings. The custom prevailed among men even to the middle of the 17th century. Charles I. wore a large pear-shaped pearl in his ear when he walked to the scaffold. Before placing his head on the block he gave the pearl to a faithful follower. It is now the property of the Duke of Portland. But during this Renaissance period men as well as women wore necklaces; this apart from official, guild or other insignia chains. In Elizabeth's day the necklace belonged to the regular equipment of a gentleman. However, there were lots of strange fashions in the Renaissance days. The wearing of rings strung on those men's necklaces and the sewing of gold rings on the hat band are some that 20th century jewelers, especially ring manufacturers, would like to see frantically revived.

It was a bad day for the goldsmith and a glad day for the lapidary when the Renaissance period passed away. Renaissance art displayed designs wrought in gold and enamels, using the precious stones to enhance the beauty of a *motif*. With the XVII. century a reversion comes about—the precious stones take precedence and the gold and enamel *motifs* are woven as subsidiaries around a faceted diamond or a ruby. The setting becomes a secondary feature to display the beauty and value (chiefly value) of the stone or stones. And the transition with its causes are well explained by the author—also how the practically colorless diamond dethroned the more splendid ruby, sapphire, emerald, etc.

Speaking of XVIII. century jewelry, the author says: "Unlike the earlier jewels, one cannot help regarding them rather more as accessories to costume than as independent works of art." Is not this the keynote to our decadence to the difference in situation to the public between the Mediæval and Renaissance and the modern jewelry? In the XVIII. century the stone cutter and stone setter had practically

supplanted the artist in precious metals.

Many a kindly word has Mr. Smith for our present ruling "new art" in jewelry, but, he continues: "While empty revivals and false adaptations are to be rejected, the reckless race after originality, resulting in the eccentricity which is so rife in modern art, should especially be avoided. It is the desire for originality, instead of a modest devotion to fine workmanship, a love for the outrageous and the *bizarre*, and a lack of proportion, both in form and in choice of material, that has ruined much of the jewelry produced under the *Nouveau* Art movement."

This Englishman's eulogy of Lalique and his style, together with a due meed of praise for such other French craftsmen as Lucien Gaillard, Gaston Lafitte, Georges Fouquet, etc., show the expert connoisseur's unbiased judgment of foreign products. And his praises are extended to the efforts in Germany of Hirzel, Möhring and Piloty of Munich, Van der Velde, Olbrich, Schaper and J. H. Werner of Berlin, Zerrenden, Fahrner, Friessler and Stoffer of Pforzheim and Hermann Bauer of Gmünd. English and Austrian talent receive a share of commendation, as well as that of Denmark. But space forbids further mention. "Messrs. Tiffany have shown how artistic design may be combined with fine and rare gems," etc. However, all of this is present-day topic, and this useful work must be read itself for its information.

A special chapter is dedicated to "Peasant Jewelry" and its rapid extinction, with the few solitary remaining specimens saved, and now in the art and industrial museums, chiefly of Germany. Holland, almost alone, has withstood the destructive influences of industrialism; the peasants there still retain their distinctive jewels, which see daylight still on every festive occasion. The two pages of engravings of examples of this class show great beauty of elaboration in design.

The last chapter but two in this useful work is a comment on "Jewelry in Pictures." The frequent reference this author makes all through his work to *pictorial* proof of designs and forms in jewelry is a great revelation of its value in the study of the subject.

The chapter on "Frauds and Forgery" gives much information on the *pseudo* art in jewelry from ancient to modern times, and the last chapter is devoted to skull, crossbones and other death emblems in jewelry, including the coffin, as well as descriptions of mourning or "memorial" jewels.

Following the regular reading matter is a bibliography of six pages. Is there any drier reading than a bibliography? And yet it is all *meat* to the hungry soul thirsting for sources of knowledge of his subject. A fairly complete bibliography is the key to the making of a well-versed seller of jewelry. There is drier work than *reading* a bibliography. It is the *compiling* of one. Therefore the jeweler should always take off his hat to the patient author who brings within a prescribed space the titles of those works it would take him perhaps tedious days to look up.

The index is both copious and effective.

#### Interesting Decision as to the Duty on Bronze Ornaments With Decorated China Vases.

A recent interesting decision was handed down by General Appraiser Sharretts in regard to the protest of G. Collamore & Co., New York, on bronze rose trees attached to the tops of china vases by means of metal caps, in which metal is the component material of chief value in the completed article. It was held that duty is applicable at the rate of 45 per cent. ad valorem under Par. 193 and not at 60 per cent. under the provision of Par. 95, for decorated or ornamented china. The protest of the importers is upheld and that of the Collector reversed.

General Appraiser Sharretts, in his decision, says: "The articles covered by this protest are limited to those described as 'two decorated china vases and two rose trees bronze.' Although separately invoiced the several parts are permanently attached to each other and constitute entireties. The so-called rose trees are composed entirely of bronze and are fitted to the tops of the vases by means of a metal cap. They form an ornamental part of a combination article, the china vase occupying the position of a base for the tree. In G. A. 6530 (T. D. 27870), on authority of Gallenkamp vs. Rachman (T. D. 27090), this board, contrary to their own judgment, felt constrained to hold that a china vase, the body of which was ornamented with bronze, was dutiable at 60 per cent. ad valorem as decorated china under Par. 95, notwithstanding the fact that metal and not china was the component material of chief value therein. A like conclusion was reached in Abstract 11485 (T. D. 27384). These decisions should be followed by classifying officers until they are shown to be wrong by judicial determination.

"The case at bar, however, presents an entirely different question. We do not regard the merchandise now before us to be china vases ornamented, but completed articles composed of two parts, each of which is ornamental, but each distinct from the other, the metal portion being the significant feature, or at least of more importance than the china base supporting it. In this respect it is entirely different from a china vase, the body of which is ornamented or decorated with metal mountings.

"Based on the evidence and the exhibits in this case, we find the merchandise involved, marked B on the invoice identification, to be manufactures of decorated china and bronze, metal the component material of chief value, and hold that it is dutiable at 45 per cent. ad valorem under Par. 193 of the Tariff, Act of 1907, as claimed by the importers, and not at 60 per cent. ad valorem under Par. 95, as assessed by the Collector, whose decision is reversed."

Frank A. Wyle, a jeweler, of Waverly, Ill., suffered a loss of \$500 during a recent fire at that place.

George Walsh, who was recently convicted of stealing a diamond ring and two diamond cuff buttons valued in all at about \$335 from the store of S. Sturmer, Sacramento, Cal., has been sentenced to three years' imprisonment at San Quentin. The prisoner pleaded guilty.

# New Patterns Now Ready

Trade-Mark

Registered

Our new line for the season of 1908-09 contains many absolutely new designs of unusual beauty and timeliness. We offer many unique pieces in diamonds, and combinations of diamonds and precious and semi-precious stones; all in the best of taste and all finished specimens of the best art work in jewelry, and we also have the staple patterns every Jeweler needs.

Our salesmen can show you these pieces, or we shall be glad to send you an assortment if you will tell us what you are interested in. Write us.

## THE NEWS FROM ENGLAND

Trade in London Shows Slight Improvement Due to Franco-British Exhibition.—Decrease in Cutlery Trade.—Annual Meeting of the N. A. G.—Visit of the Members of the Syndical Chamber of Parisian Retail Watchmakers and Jewelers.—Interesting Case Involving Use of Words "Gold Filled."—Amendments to "Daylight Saving" Bill.

LONDON, July 25. Trade in London shows a rather better aspect, but, alas, there is nothing to boast of. The number of visitors to the Franco-British Exhibition is responsible for the filling, to overflowing, of the hotels generally, and the boarding houses in the vicinity of Shepherds Bush. This also means the expenditure of money which must naturally have a more or less beneficial effect upon the jewelry and kindred trades. But as yet the effect is comparatively small. In Birmingham trade is much the same as when I wrote my last notes. Sheffield is rather better off. Some firms are fortunate enough to be in the position to give their men full employment in both silver and electro work, but the bulk of the houses have to keep their men on very short time, while quite a number of skilful silversmiths, chasers and engravers are without employment. All this notwithstanding, Sheffielders are in an optimistic mood.

\* \* \*

The tendency to use silver plated handles for cutlery has given work to a branch of the electro plating trade at the expense of workers in ivory, and its various imitations. Add to this the fact that exports of ordinary cutlery have fallen off and it will be realized that this branch of the cutlery trade is in a rather bad condition. There has been a tendency to decrease in the last three years, but during this year it has been more noticeable. In the first half of 1907 the value of cutlery exports was £352,706, but for the same period of this year the figures have fallen to £307,442, a difference of £45,264 on the wrong side of the scale. It is said that the export trade is worse than it has been for over 25 years; particularly is the export trade bad with South America.

\* \* \*

The annual meeting of the National Association of Goldsmiths, which was held in Manchester in the early part of the month, was full of surprises. The Honorary Organizing Secretary, who was one of its founders, refused to allow his name to be put forward for re-election on the score of ill health. As a matter of fact, as my notes have indicated on more than one occasion, there has been a considerable amount of friction owing to his methods. It is true he has been unwell, but it is equally true that the greater portion of the members are thankful to be in a position to elect a younger man. I am not sure that that will materially help the association, unless the meetings are held in a more businesslike manner. The rule by Executive and Council is not entirely to the liking of the more democratically inclined, and it was found at this meeting that the youngest branch was inclined to be very critical over the "re-cooked joint," which had been annually served up to do duty as the annual report.

The discussion upon technical education

in gemmology was one of the matters of serious trade interest brought forward, and the day's labor was of a very strong but comparatively negative character. The new Hon. Secretary, who was a founder of the association, and has been its chairman, is a country jeweler, living right in the north of England, right away from the central cities; a good man, but un-get-at-able by the general secretary, who lives near London.

Meanwhile the big Scottish Branch, which seceded from the N. A. G. last year, has held its first annual meeting as the Scottish Association of Watchmakers & Jewelers, and shown its businesslike qualities by dealing with a series of important resolutions of considerable importance to the trade.

\* \* \*

The visit of the members of the Syndical Chamber of Parisian Retail Watchmakers & Jewelers to London in order to inspect the Franco-British Exhibition, was, despite the terribly wet weather, much enjoyed by them. Under the guidance of W. Augustus Steward, they visited the Central School of Arts and Crafts, and with him and Cyril Davenport, one of the librarians of the British Museum, made a tour of the library rooms of the Museum containing the fine collections of Limoges enamels, watches of all nations, the magnificent gold jewelry and cameos in the gold room, and the famous Waddesdon Bequest Room containing so many precious treasures of ancient and medieval art, given by Baron Ferdinand Rothschild, the first president of the National Association of Goldsmiths. It was valued at £400,000, and is now possibly worth half a million

\* \* \*

A case of considerable interest to all engaged in the trade, and particularly American firms doing business with Great Britain, in gold filled jewelry, was recently heard in Birmingham. The prosecution was at the instance of the Birmingham Wholesale Jewelers & Silversmiths' Association, and the defendant was a well known and respected Birmingham manufacturer, who was summoned under the Merchandise Marks Act for applying a false description to certain chains and lockets. According to the evidence, the defendant had sold the chains and lockets as "18 carat gold filled finest quality." On the invoice no description of the goods was made, but they were "carded" upon cards bearing the wording, I give above. It was stated that the total weight of one article was 198 grains, but was found upon assay to contain less than one halfpenny worth of gold. It was stated by an expert that upon his assaying two chains, one showed only 1-5th of a grain of gold, and the other 1/8 of a grain—less than a farthing's worth. It was obvious from such evidence that there must be a conviction,

and the defendant was mulcted in a fine of £5 and £15 15s. as extra costs. The chairman of the Jewelers' Association in giving evidence said that the expression "gold filled" first came from America, and that the description given by the defendant to his productions was likely to seriously affect the trade in genuine gold filled jewelry. The description of gilt goods as gold filled was at the bottom of the trouble, and the prosecution is approved by all the Birmingham trade.

\* \* \*

The Daylight Saving Bill has received the benediction of the special committee of the House of Commons, but—and it is important, they recommend the putting forward of the clock one hour, practically the suggestion of Thomas D. Wright, the spokesman for the British Horological Institute. It is thought, however, that there is little chance of anything being seriously done over the matter for some time. To put it shortly, the committee suggests that the clock should be advanced one hour during the Summer, put forward on the third Sunday in April, and put back again the third Sunday in September. The Bill, however, adds "another injustice to Ireland." The distressful country is left out of all reckoning!

The report of the committee may be summed up as follows: That the weight of the evidence submitted justifies the opinion of the promoters of the Bill that the change is desirable and would be a public benefit, and the effect of the Bill would be:

- (1) To move the usual hours of work nearer to sunrise.
- (2) To promote the greater use of daylight for recreative purposes.
- (3) To lessen the use of licensed houses.
- (4) To facilitate the training of the Territorial Forces.
- (5) To benefit the physique and general health of all classes.
- (6) To reduce the expenditure on artificial light.

The report goes on to recommend a single Act of Parliament which will establish local time throughout the United Kingdom and expresses the opinion that "Interference with European traffic will be inappreciable compared with the general benefit to the nation at large and can be easily overcome." The Stock Exchange protested against any interference with time on the ground that it would materially affect American business, but the report states that the committee is of the opinion that any difficulties can be obviated by the adherence of those concerned to the existing hours, and in conclusion it is suggested that the Bill should be known as the "Local Time (Great Britain and Ireland) Bill," and that Greenwich Mean Time should be retained for scientific purposes, astronomy and navigation. ST. GEORGE.

Wm. Weber, Birmingham, Ala., recently sustained a loss by fire.

Scallin Bros. Co. is the title of the old firm of Scailin Bros., Mitchell, S. Dak., which has now become an incorporated concern. The officers of the new company are: President, F. H. Scallin; vice-president, P. A. Page; secretary and treasurer, M. W. Scallin.

## AMERICA'S NEWEST GEM :: AMATRICE

The most remarkable, beautiful and individual matrix precious stone ever offered to jewelry wearers. Color and matrix polish equally. No porosity or roughness. Amatrice positively does not fade or change color.

No retail stock is complete without an assortment of Amatrice jewelry in gold mountings.

Wonderful individuality in matrix effects. Exact duplicates do not exist, but beautiful matching effects for sets are obtainable.

Retailers should require manufacturers to supply different types in each lot bought, as the range of color combinations and innumerable matrix effects appeal strongly to the individual buyer.

If your regular manufacturers do not offer Amatrice jewelry, write us and obtain list of first-class manufacturers who will meet your requirements.

**Preparations Complete for Annual Convention of the Pennsylvania Retail Jewelers' Association at Philadelphia.**

PITTSBURG, Pa., July 30.—Secretary C. S. Wiley, of the Pennsylvania Retail Jewelers' Association, this week mailed 2,800 booklets to jewelers throughout Pennsylvania, giving a short history of the organization and the programme to be carried out at the third annual meeting of the association to be held in Philadelphia, Aug. 12 and 13. In addition photographs of the officers and members of the reception committee of the Philadelphia jewelers, who will look after the entertainment of the visitors, are also given. All of the officers of the association who are principally from the Pittsburg district, will leave here for Philadelphia the day before the time set for the convention.

The programme for Wednesday, Aug. 12, provides for an address of welcome by Col. J. Warner Hutchins, of Philadelphia; an address by President A. C. Gaul, of the association; the reading of the secretary's report; the report of Treasurer J. P. Steinman and a paper on "A System of Record of Stock," to be read by I. A. Deisher, the day's proceedings to conclude with a general discussion of the following subject: "Resolved, That the jeweler of to-day is not as good a business man as he could and should be."

On Thursday unfinished business will be disposed of followed by a lecture to be given by C. T. Higginbotham, consulting superintendent of the South Bend Watch Co., who will take for his subject, "How to locate and correct errors in the lever escapement." Delegates will be privileged to ask him questions. Officers for the ensuing year will be elected at the afternoon session.

Secretary Wiley said to-day that he did not know just who will go to Philadelphia, as he is now busy rounding them up, but that a good delegation will attend from here. Some of the local jewelers are endeavoring to arrange their vacations so that they will be in Philadelphia at that time.

The programme was as follows:

**WEDNESDAY, AUG. 12—MORNING SESSION.**

1. 10 A. M. Call to order.
2. Appointment of Auditing Committee.
3. Appointment of Resolutions Committee.
4. Appointment of Law and Constitution Committee.
5. Address of welcome, Col. J. Warner Hutchins, Philadelphia, Pa.
6. Col. Hutchins assumes chairmanship.
7. Roll call.
8. Reading minutes of last convention.
9. Application for membership.
10. President's address, A. C. Gaul.

Adjourn for lunch.

**AFTERNOON SESSION.**

11. Secretary's report, by C. S. Wiley.
12. Treasurer's report, by J. P. Steinmann.
13. Audit report, committee.
14. "A System of Records of Stock," a discourse by I. A. Deisher, Reading.
15. Resolved: "That the jeweler of to-day is not as good a business man as he could and should be." Discussion.

**THURSDAY MORNING SESSION.**

16. Unfinished business.
17. "How to Locate and Correct Errors in the Lever Escapement," a lecture by C. T. Higginbotham, Consulting Superintendent, South Bend Watch Co. Lecture at 10 A. M.
18. Questions may be asked Mr. Higginbotham at close of lecture.
19. New business. (Additional new members may be elected here.)

Adjourn for lunch.

**AFTERNOON SESSION.**

20. Report of Committee on Law and Constitution.
21. Report of Committee on Resolutions.
22. Question box.
23. Election of officers.
24. Adjournment.

**President of Newark Manufacturing Jewelers' Association Expresses His Views on the Apprenticeship Question.**

NEWARK, July 24.—Coming direct from an important meeting of the State Commission appointed by Governor Fort to investigate the need of more technical schools, George R. Howe, head of the commission, was found at his office by THE CIRCULAR-WEEKLY reporter. Mr. Howe is head of Carter, Howe & Co., Park and Mulberry Sts., and not only a veteran jeweler, but also an enthusiast of the most progressive type on the subject of technical schools. The commission, of which he is prime mover, has not yet reached a point where it can give publicity to any of the recommendations it will make to the Governor in the Fall, but its work is steadily progressing, and a volume of important data has been collected.

Mr. Howe is a particularly appropriate man to be studying this subject, partly because he has given certain phases of the jewelry industry more personal attention than some others, and partly because he is one of those who maintains in his own shop a system of training boys which is partly the result of a patriotic feeling which holds that every manufacturer and master craftsman owes it to his country to train up its youth. The training up of skilled jewelry makers is extremely important and also is beset with unusual difficulties. "The successful jeweler," said Mr. Howe, "is often a crank." In the first place, the jewelry manufacturing houses of the United States have been, and still are, on the whole, short-lived. Some years ago when the Federal Government wanted to get certain statistics of the wages paid to jewelers, going back a certain number of years, there were but four houses in the country able to supply the data. Of these four, Carter, Howe & Co. had to supply many of the figures, because of the thorough manner in which their books had been kept since 1841. One reason why the average manufacturing jewelry business lasts only during the active years of the organizer, is that most manufacturing jewelers are men who work up from the bench; men of manual skill and personal push, who fight their way to the top by sheer ability, but only within the past few years have they learned that it is necessary to properly organize a business if it is to be continued.

Mr. Howe recalled the early days of the Newark Manufacturing Jewelers' Association. At that time many of the manufacturers did not even know each other by sight. When the effort was made to unite them, feelings of jealousy and distrust, in some cases openly expressed, militated against the move as has been the case in all other trade organizations. Mr. Howe regarded this merely as a demonstration of the strong individuality which pervades the trade, in contrast to the sinking of the in-

dividual in the factory system, such as may be seen, for instance, in the shoe industry and many others which are highly centralized.

It seems to be admitted by thoughtful men in all trades that if American manufacturers are to hold their own with the technically trained mechanics of Germany in particular, and of France and England also, they must either re-establish an intelligent apprenticeship system or establish technical training schools, where boys and young men can be properly trained.

Some manufacturers in the jewelry trade maintain the old-fashioned apprentice system of a century and a half ago, while others have found by experience that owing to the difference between ancient and modern law the system is unsatisfactory, and have abandoned it, and the training of boys. The firm of which Mr. Howe is a member, has always trained boys, who serve for from four and a half to five years, and at 21 years of age are given a certificate showing their proficiency. In some of the other jewelry factories, boys or young men serve for four years without regard to age when they take up the trade.

One of the chief reasons for the present effort to arrange for technical education is that the New Jersey law discourages in many ways boys from going to work till they are 16. Yet they are able to leave school at 14 by securing a permit from the labor department and attending night school, and thousands who have no studious tastes do leave school then. The two intervening years are crucial. These boys become cash boys in stores, telegraph messengers, newsboys, or work at industries that furnish no mechanical training worthy of the name, until they reach the age of 16. Reputable manufacturers in all lines do not care to employ boys until they are 16 years old, and free from restrictions of the law, as above stated, but these two years between 14 and 16, the critical years in any boy's life so far as technical training is concerned, are practically wasted, and the boy at 16 is not as efficient as he would be if he went directly from school to what is to be his life work.

Speaking of the desire of himself and his confrères, Mr. Howe said: "We do not favor the lowering of the age limit, but we do favor the establishment of industrial schools to which boys from 14 to 16 years can be transferred from our public schools, efficient as they are in general training along conventional lines, to special departments in these industrial training schools, where special courses will be provided to fit boys for their selected trades, viz.: building, machinery, jewelry, etc., so that at 16 when the law allows a boy to go to work unrestricted, he shall be qualified for the manual labor he undertakes, and ready for the additional technical training the evening industrial training schools will supply."

A. P. Reynold, Brainerd, Minn., has moved his store temporarily a few doors east of his former location on Front St. The old building is being razed, and will be replaced by the Parker block, to which Mr. Reynold will return when it is finished.

# Modern Cameos

The first samples of the MODERN CUT CAMEOS were brought over by us about two years ago.

Confident of the ultimate success of the stone we never tired in our efforts to acquaint the trade with its merits. Its immense popularity now attests to our correct foresight.

The same effort has been exerted on the other side in improving the quality as well as securing an adequate supply. We have succeeded also in this respect, and our Cameos are unexcelled in the matter of superior engraving, and precision of size and finish—and at right prices.

ONYX CAMEOS in MODERN and CLASSIC DESIGNS on hand in all sizes and colors for immediate delivery.

## Members and Guests of the Jewelers' Twenty-Four Karat Club Enjoy Annual Outing and Shore Dinner at Long Branch, N. J.

THE Jewelers' 24-Karat Club of New York held its seventh annual outing and clambake last Saturday at the Port-au-Peck Hotel, Long Branch, N. J., and added another to its long list of successful outings, which to those who have participated are of the never-to-be-forgotten kind. The Port-au-Peck Hotel grounds were the location of the outing last year, and the day proved so successful that the committee this year decided to return to the same place again. That the decision was well made is testified to by the amount of genuine enjoyment each and every person present experienced.

Cloudy weather early Saturday morning threatened rain for at least the early part of the day, much to the disappointment of the members, but they had reckoned without their general manager. As soon as "Charlie" Brinck awoke he noticed this and started in all haste for headquarters, where he succeeded in bribing the weather sharp who deals out atmospheric conditions for New York and vicinity into putting a stop order on the rain taps. The result of "Charlie's" thoughtfulness was a genuine 24-karat day—warm enough, but not a bit uncomfortable. The selection of the first day in August rather than one later in the season, as was the case last year, proved a good idea, as far as attendance was concerned, there being over 200 members and guests on the trip, making it by far the largest outing in the history of the club. All arrangements were admirably made, thanks to the committees in charge, who are to be congratulated on the clockwork perfection with which the plans were carried out. There were no delays, and from the time the boat left New York until the return trip was completed everything moved with a snap and precision which added much to the enjoyment of such an affair.

Representatives from a number of cities, far and near, were among the guests to enjoy the pleasures of the occasion, but outside of the New York men, Philadelphia was, as usual, represented by the largest contingent of good fellows. Those who had decided to forget for the day the cares of business life assembled at Pier 10, foot of Cedar St., in good season, where they found a warm welcome awaiting them from the outing committee, composed of Charles L. Power, chairman, assisted by George T. Stebbins, Samuel Kramer, A. Rutherford and Harry R. Conklin. The steamer was in waiting for the trip to Atlantic Highlands, and at 9:15 o'clock the anchor was weighed and the day's outing began.

The First Regiment Band, of Newark, N. J., under the leadership of that veteran musician, "Pop" Voss, struck up a lively tune, and soon the skyscrapers of New York began to grow dim in the distance. The band accompanied the party all day and added much to the enjoyment of the occasion.

Percy Savery brought along on the boat his "lucky coin," which he laid away on a

top shelf after last year's outing. He was soon the center of a group of players anxious to tempt the "Goddess of Fate." His phenomenal luck, which he ascribes to his "luck coin," was in evidence again this year, and the title of "Arch Matcher of the Coins," which was given him last year, was upheld.

The trip to the Highlands took about an hour, and although the water was a bit rough no cases of seasickness have as yet been reported. On arriving at the Highlands, the party boarded private cars attached to an express train of the Central Railroad of New Jersey, and were soon speeding toward Long Branch, where four special trolley cars met the pleasure-seekers and conveyed them to Pleasure Bay. On leaving the trolley, headed by the band, the members of the club and their guests "fell in" in lines of four, and, marshalled by Charles L. Power and "Charlie" Brinck, the column wound its way across the Shrewsbury bridge and up the drive leading to the hotel. In front of the hotel all stood and cheered, and saluted a large white flag on which were the words "Twenty-four Karat Club of New York City" in green, within which was a "carrot," the emblem of the club.

The tempting odor of baking clams and the long rows of white tables under the trees promised that a feast was in store, but first the athletic events were in order. They were begun under the direction of the athletic committee, consisting of J. Warren Alford, chairman, William H. Kinna and Percy Savery. The first event started was pitching the quoits, and for this contest there were a large number of entries. While this event was under way the lemonade race was started. This race proved a most exciting contest, and was as unique as it was hotly contested. It was the idea of J. Warren Alford, chairman of the committee. Tables were placed at equal distances, on which were knives, glasses, sugar, lemons and water. The winner of the race was he who ran to each table for the necessities, then made his lemonade and first reached the judges' table with a complete glass of lemonade. The race was won by Russel Talbot.

The next race was the greatest fun of the day, and was, in fact, a genuine 24-karat race. It was open only to members of the club. For this 24 stakes were driven into the ground in rows of four, and in each of these stakes were six nails. At the starting line were six pans, each containing 24 carrots. It was explained that the winner in this event would be the one who succeeded in placing his 24 carrots on the 24 nails in his row of stakes, taking six at a time. So large a number of entries were booked for this event that it was decided to run it in three heats, the winners in these preliminary tests to compete in a final race for the cup. In the first heat J. T. Beechum was the winner. The second heat was a tie between William

I. Rosenfeldt and George Briggs, and the third was won by Robert Allen. The four successful in the first trials were, after a short rest, started in the finals. By this time the excitement was at a high pitch, the crowd about the ropes cheering on their favorites. William I. Rosenfeldt looked like a sure winner, but one of his carrots fell off the nail, and before he could replace it J. T. Beechum overcame the lead and won the race by a narrow margin. The winner of this race received a cup given by Harry C. Larter, president of the club. Mr. Larter originated the idea of the race, and received many emphatic encomiums on the success of the event.

The merry-makers then returned to watch the finals in the quoit-pitching contest. The contestants had been cut down until only two teams remained, they having defeated all comers. These two teams to contest for the cup were made up of Messrs. Benedict and Warner, and Crippen and Moyer. The final games were watched with much interest. Benedict and Warner at last won the event by a close score.

In the quoits contest the official score was as follows:

First Round—Moyer and Crippen beat Kaiser and Breidenbach, 21-13; Benedict and Warner beat Bennett and Palmer, 21-3; Wood and Flack beat Allan and Beiderhase, 21-9; Trewin and Mead beat J. A. McElroy and Heyer, 22-8; Adams and Stout beat George Lunt and J. R. Greason, Jr., 21-4; Cobb and Malone beat Chevalier and Osmer, 21-4; Williams and Barry beat Briggs and Moore, 21-13; Moore and Roberts beat Montgomery and Milleman, 21-13.

Second Round—Crippen and Moyer beat Trewin and Mead, 21-11; Cobb and Malone beat Adams and Stout, 21-13; Benedict & Warner beat Wood and Flack, 21-7; Williams and Barry beat Moore and Roberts, 21-11.

Semi Finals—Crippen and Moyer beat Cobb and Malone, 21-14; Benedict and Warner beat Williams and Barry, 21-14.

Final Round—Benedict and Warner beat Crippen and Moyer, 19-21, 21-7 and 21-9.

The hour for dinner having arrived, the strenuous athletes hastened to the tables, where name cards marked each place. At the center of the first table was Hon. William S. Bennett and President Larter. The Philadelphia delegation were seated at the second table, but otherwise there was no special order. After all were seated the shore dinner of unusual excellence, consisting of celery, hard and soft clams, bluefish, Irish potatoes, cucumbers, lobster, chicken, sweet potatoes, green corn, tomatoes, watermelon and coffee, was served.

During the dinner the story-telling contest was held. There were several contestants in this event, all of whom told mirth-provoking stories. The judges, however, finally decided that "Matt" Stratton was deserving of first place. His story touching on and appertaining to the catching of the "Whiffletit," a rare variety of fish, by boring a hole in the center of the lake and using limberger cheese as bait caused much amusement.

President Larter then called the noisy diners to order and formally presented the prizes won during the day. He next called upon Congressman Bennett, who spoke briefly to the assemblage and finished his remarks by telling a story which was received with much merriment.

President Larter exhibited a handsome challenge cup to be played for annually at the outings of the club, the cup to become the property of the club winning it twice

LONDON PARIS OBERSTEIN PROVIDENCE

in the next three years, with the stipulation that the team winning the cup first was to keep it in custody until the following year. The cup is a fine product of the silver-smith's art, and has three baseball bats supporting a silver ball as one of the decorative features. A circle of gold medallions bearing the emblem of the club surrounds the body of the cup.

During the day "Charlie" Brinck carried a mysterious-looking package which aroused considerable curiosity. The mystery was solved when "Charlie" began passing the cigars. A number not on the programme appeared at this time in the person of a colored minstrel, dressed in a long duster and battered hat. His ability to play his banjorine and sing was second to nothing save his remarkable capacity for watermelon. He received a generous collection and an extra generous supply of melon.

Immediately after the dinner the ball game between the Twenty-four Karat Club and the Philadelphia Jewelers' Club was started. It was agreed at the start to play four innings because of the lack of time to play a complete game. At the end of the third inning the time had been exhausted. The score then stood 5 to 0 in favor of the New York team. Both teams being "afraid to go home in the dark," a controversy arose as to the way in which the game should be decided. The New York team claimed the cup and the Philadelphia team declared the game should not count because only three innings had been played. The features of the game were a home-run hit by Harry Schwab and a double play by Davis, the Philadelphia shortstop. President Harry Larter and the Athletic Committee have decided that the three innings played are not to be considered as a game. Arrangements are under way for a full nine inning game, the details of which will be announced later.

After the game the tired pleasure-seekers returned to the hotel and boarded cars for the train. The return trip was enlivened by the band, which played often and well. The trip up the bay was especially enjoyed. The boat reached New York about 8 P. M., and all voted the day's outing the best they had ever attended.

#### Leonard Vett and Wife Tried in Los Angeles, Cal., on Charge of Stealing Diamonds.

LOS ANGELES, Cal., July 29.—Leonard Vett and his wife, who are said to have changed their names after coming to this country from Italy, were placed on trial in this city, this week, charged with the theft of diamond earrings worth \$170 from J. Macowsky, proprietor of the Angelus Jewellery Co., May 21. Mr. Macowsky testified that Vett came into his store alone, a few days before the gems were taken.

Continuing, he said: "I knew him, for about a year ago I bought a couple of diamonds from him. This time he had a single diamond earring and a diamond stud, which he said he wished to trade for a pair of earrings. I showed him some gems, and he left, saying that he wished his wife to see them.

"The next day they came together, bargained first for a \$170 pair, and finally left with me their two stones, which they agreed to exchange for a cheaper pair of stones, paying \$20 to boot. I put their gems and the cheaper ones in my safe until they should pay the \$20. I had my trays of jewels spread out before them while we were bargaining, and that evening, when I went to put the stones in my safe, I discovered that the \$170 earrings were gone. The next day, when the Vetts entered the store, I summoned a detective and had them arrested."

The jeweler identified as his gems those which the detective said he had found in the Vetts' safe deposit box. In this he had also found, he stated, about \$1,000 worth of other valuables, subsequently identified by jewelers as having been abstracted from their cases. It is said that, in some cases, cheaper gems were substituted for those taken. A large quantity of clothing and other articles were discovered in the Vetts' home on N. Main St. at the time of their arrest, May 22.

The trial lasted two days, and after the lawyers had summed up the case, the judge announced that he was not prepared to charge the jury until he had looked up certain points of law. He then took a recess until the following morning, when Mrs. Vett was acquitted. The jury disagreed as to Vett and he was held for retrial. Both were rearrested on a charge of stealing a diamond, last May, from Thomas B. Clark, a jeweler.

#### Complete List of Watches and Jewelry Stolen from the Store of W. E. Roach, San Antonio, Tex.

SAN ANTONIO, Tex., July 29.—The police of this city are making every endeavor possible to locate the thief or thieves who, on the night of July 25, broke into the store of W. E. Roach, 291 Houston St., and got away with jewelry valued at \$350. The burglars entered from the rear after prying off the heavy iron bars which protected the window.

The following complete list of the stolen jewelry has been made up for the use of the police and for publication in THE CIRCULAR-WEEKLY in the hope that the plunder will be identified in case it is offered to any member of the trade for sale.

The following is a list of the stolen articles:

- Ladies' New England movement, 186768, in 20-year filled case, O. F., raised leaves, style 9635.
- Ladies' New England movement, 71454, in nickel O. F. case, style 2651.
- Ladies' New England movement, 197381, in nickel O. F. case, style 6061.
- Ladies' New England movement, 192559, in gun metal case, O. F., style 6921.
- Ladies' Swiss movement, 96981 (?), in mother-of-pearl O. F. case.
- Gents' 12 size Swiss movement, 96971 (?), in mother-of-pearl O. F. case. (Note.—The numbers of the two Swiss movements with pearl cases may be transposed as I cannot tell from my records now which is which.)
- 7-J. Elgin, 6 size movement, 12936479, in 12 size, 20-year O. F. Royal case, 3611092.
- 7-J. Excelsior, 16 size movement, 2010286, in 18 size, 20-year Htg. Excelsior case, 8588612.
- 7-J. Waltham, 6 size movement, 13373447, in 6 size, 20-year Htg. Crown case, 8622377.
- 15-J. Waltham, 12 size movement, 13988887, in 12 size, 20-year O. F. Wadsworth case, 1247302.
- 15-J. Waltham, 12 size movement, 13635642, in 12 size, 20-year Htg. Crown case, 8665979.
- 7-J. N. Y. Standard, 6 size movement, 4859159, in 12 size, 20-year Htg. Star case, 653343.
- 7-J. N. Y. Standard, 16 size movement, 2008843, in 16 size, 20-year Htg. Royal case, 6052043.
- 7-J. U. S. watch, 0 size movement, 827030, in 0 size, 20-year Htg. Star case, 885164.
- Diamond brooch with green enamel leaves radiating from a small 1/8 diamond in the center. Mounting is solid gold and I think 14K.
- Diamond brooch with sunburst effect, the five or six prongs radiating from about a 1/8 diamond in the center are set with a number of small pearls. Mounting is 14-K. gold, I think.
- About two dozen children's signet and set rings, two of which are set with very small diamonds, all solid gold.
- About one dozen crown filled rings in plain flat bands and oval.
- Seven large hollow wire massive looking link stone loop neck chains, with large oval and square pendant, stone sets, stone encircled with fancy scroll work with baroque pearls in this scroll work, with a still smaller stone in a small drop from the bottom of the scroll work. Stones were amethyst, topaz, sapphires and Japanese jade. These chains are a little out of the ordinary and will be noticed very quickly for their up-to-dateness. The pendants are easily removed by a slip ring and may be shown or worn without the chain.
- Four men's set solid gold rings, stamped "N." One has a very nice flesh colored cameo set, one has very fine bright ruby doublet, another has a high set calcedony stone with several shades of red predominating.
- Two or three dozen Keen Cutter pocket knives, pearl and stag handles.
- Several ribbon fobs with filled mountings.
- Five or six solid gold, stiffened, diamond set Roman finish lockets.
- Eight or 10 pony vest chains, filled, nearly all small links.
- Two plain filled bracelets, Roman finish.

The store of the Merlin Mercantile Co., Merlin, Ore., was recently looted of a considerable quantity of jewelry and watches.

Trinidad: 2 cases jewelry, \$121.

Vera Cruz: 9 cases clocks, \$201.

**Jacob F. Braun Files a Voluntary Petition in Bankruptcy at New York.**

Jacob F. Braun, 2168 Third Ave., New York, filed a petition in voluntary bankruptcy last week in the United States District Court, his schedules showing liabilities of \$11,349 and assets of \$4,907, consisting of stock \$3,000, debts due on account \$1,832, and bills, promissory notes and securities \$75.

Among the unsecured creditors are: The Swiss Watch Import Co., \$561; Star Watch Case Co., \$281; Wildprett &amp; Saacke, \$487; Lyons Mfg. Co., \$169; Adolphe Schwob, \$1,408; Leon Hirsch, \$1,214; B. L. Strasburger &amp; Co., \$1,155; Estate of O. M. Draper, \$100; A. Lorsch &amp; Co., \$450; Adolphe Braun, \$850; De-Roy &amp; Reiss Co., \$119; Wm. L. Gilbert Clock Co., \$134; Barden &amp; Hull, \$236; Laubheim Bros., \$171; North American Watch Co., \$123; Morgan Jewelry Co., \$105; Baumgold Bros. &amp; Co., \$102; Ingomar Goldsmith &amp; Co., \$205; Providence Stock Co., . . . ; S. &amp; B. Lederer Co., \$363; J. J. White Mfg. Co., \$190; S. O. Bigney &amp; Co., \$449; A. Braun, \$267; Mrs. S. Sturm, \$950.

Judge Hough has appointed Jesse Watson temporary receiver of the assets in the bankruptcy proceedings.

Mr. Braun, who was originally employed by his father, A. Braun, started in the wholesale jewelry business at 37 Maiden Lane, New York, in October, 1905. In March of this year he moved to 2163 Third Ave., where he conducted a retail jewelry business.

**Thief Eludes Detectives After Stealing \$2,000 Worth of Diamonds from Jeweler of Quebec.**

QUEBEC, Can., July 29.—A tray of diamond rings, valued at \$2,000, was stolen from J. F. Dobbin's jewelry store, corner of Buade and De Tresor Sts., at 10 o'clock Monday night. The robbery was daring but simple in its execution.

A well-dressed man entered the store and asked to see some diamond rings. Mr. Dobbin himself waited on him. The man selected a ring from a tray, and asked that it be polished. Mr. Dobbin turned from the counter to comply with the request, and the man bolted, making his escape among the crowds on the street.

Police headquarters, a block away, was promptly notified, and a large number of detectives at once started off in the hope of capturing the thief. Three of them, with Mr. Dobbin, went on the Montreal boat, and while they were hunting there the boat started on its journey. The detectives had to proceed to Three Rivers before they could disembark.

**Closing of De Beers Mine Strengthens Situation in the Diamond Trade.**

(From the *African World*, London.)

THE news cabled by Reuter from Kimberley last Wednesday that it had been officially decided to suspend active work at the particular mine after which the great corporation is named not only failed to cause any special sensation on this side, but actually improved the price of the stock. As a matter of fact, the decision had been expected. The work at Wessleton, Kimberley and Bultfontein will continue as usual, and the closing of the De Beers area coincides with the recent stoppage of the No. 3 gear at the Premier Mine, near Pretoria.

On making inquiries this week in the highest quarters connected with the diamond trade, we were informed that the position, from a general point of view, was slowly but steadily improving, that many buyers had recently come to London from the Continent, and that the present undoubted improved demand for medium quality stuff was viewed by those engaged in the diamond trade of the world as a good omen for an early revival in business for high-class gems—which news all concerned will learn with due appreciation.

**Death of W. T. Steven.**

HARTFORD, Conn., July 30.—William T. Steven, a well-known optician of this city, died at his home, 265 Trumbull St., at 3 o'clock this morning of dropsy and a complication of diseases.

Mr. Steven was born in Prestonholm, Edinburgh, Scotland, in 1852, and came to this country in 1854 with his parents, settling in Chicago. Mr. Steven had been in business as an optician in this city since 1880, first under the Allyn House, next at 4 State St., and lately at 203 Trumbull St. A brother, Dr. John A. Steven, died in 1887. Mr. Steven leaves a widow, two sons and a daughter.

Mr. Steven had built up a large practice in this city. He was a member of the Park Congregational church. The funeral will take place from his late residence, Satur-

day afternoon at 2 o'clock. The Rev. Dr. Charles S. Thayer will officiate. Interment will be in Cedar Hill cemetery.

**Another Short Change Swindler Reported to be Working in the Middle West.**

The Jewelers Security Alliance, 13 Maiden Lane, New York, received a letter Friday which indicates that a short change swindler is now at large in the Middle West, where he has been trying his tricks on jewelers. The letter was from Cleveland and stated that on July 25 a man called at the store of the Hueter Jewelry Co., 5372 E. St. Clair Ave., and looked at some diamonds. He went out saying that he would return again. Mr. Hueter was suspicious of the man and determined to watch him closely. In a short time other customers entered the store, and while they were there the first visitor returned and became engaged in talking with everybody. He finally decided to purchase a solitaire diamond ring which was in the case, and also a diamond stud worn by Mr. Hueter. The two stones were well matched and were sold to the man for \$120 each. The buyer counted out the money in bills and stated that he would take the diamonds to the house and if they were not satisfactory he would return them.

When Mr. Hueter counted the money given in payment he noticed that it was one dollar short, but said nothing about it, as he intended to let it pass at this, but the customer insisted that he had counted out too much money and wished to recount it. Mr. Hueter told him of the shortage at this time, but said, "We will let it go." The man insisted upon recounting the money and did so, laying down two 50s, five 20s, four 10s and 19 ones, and exclaimed, "You are right, it's one dollar short," and he placed a silver dollar on top of the pile.

Meanwhile Mr. Hueter had drawn his gun from the pocket and held it between himself and the show case, and it began slipping down. Fearing that it would fall on the floor and strike the hammer, he replaced it in the pocket and transferred the money from the show case to a desk back of the counter, and the man departed. When he was about to put the money into the cash register he discovered that all the bills of larger denominations, which he remembers as being very crisp and new, were gone, and \$20 were all that remained.

Mr. Hueter immediately went out to look for the man and learned he had boarded a St. Clair Ave. car. The jeweler took the next car, being unable to secure an automobile, but trace of the thief was lost. The jeweler informed the police department of the trick and looked through the Rogues' Gallery, but found only one man who looked like the thief. The photograph selected, strange to say, was that of Samuel K. Reich, alias Max Gross, who is now under arrest in Brooklyn on a similar charge.

The description given of the man who swindled the jeweler is as follows: Age 30, height 5 feet 6 inches, weight 140 pounds, build medium, dark brown eyes, black curly hair, Roman nose, dark complexion, cheek bones prominent. He wore a Van Dyke beard and mustache and had on his finger a diamond ring of 1½ carats.

**Bids Solicited and Received by Government Departments to Supply Various Articles.**

WASHINGTON, D. C., July 29.—The Navy Department is calling for proposals for the following supplies for the use of the Naval Observatory at this city, bids for same to be opened Aug. 11: 30 quartermasters' spy-glasses, high power; 40 quartermasters' spy-glasses, low power; 20 quartermasters' spy-glasses, medium power; 10 quartermasters' spyglasses, low power; 100 spyglasses, officers of the deck; 50 spyglasses, officer of the deck; 10 comparing watches, 20 stop watches, 50 boat clocks, 75 deck clocks, No. 1; 50 deck clocks, No. 2; 10 boat clocks, 20 deck clocks, No. 1; 20 deck clocks, No. 2; 100 day binoculars, 100 night binoculars, 50 air thermometers, 50 water thermometers, 25 air thermometers, 25 aneroid barometers, 20 captain's reading glasses and cases. A number of instruments and cases for same.

WASHINGTON, D. C., July 31.—The Chief of Ordnance, War Department, has received the following bids for supplying 100 observation telescopes:

Queen & Co., Philadelphia, Pa., \$450 each, four to be delivered within four months and 12 each month thereafter.

A. Leitz Co., San Francisco, Cal., \$1,450 for all delivery within nine months.

Bausch & Lomb Optical Co., Rochester, N. Y., \$292 each, one to be delivered in 60 days, 50 by December 1, and balance by May 1, 1909.

A. P. Geyer & Co., Cleveland, O., \$325 each, 25 to be delivered in three months, balance in four months.

Pratt & Whitney Co., Hartford, Conn., \$387.50 each, 25 to be delivered in 60 days, 25 in 90 days, 25 in 120 days, 25 in 150 days.

Kueffel & Esser Co., Hoboken, N. J., \$270 each, 25 to be delivered in 170 days, and 175 in 120 days.

Warner & Swazey, Cleveland, O., \$174 each, 25 to be delivered in four months and 25 each following month.

### Houston, Tex., Jeweler Charged With Killing a Hackman During a Quarrel.

HOUSTON, Tex., July 29.—A tragedy which occurred at La Porte, Sunday, has caused considerable sorrow in the jewelry trade, owing to the fact that the assailant of N. J. Bonner, the hackman who was shot and instantly killed, is said to be J. L. Mitchell, a well-known jeweler of this city. The shooting occurred during a row between Mr. Mitchell and the hackman. Mr. Mitchell had accused the hackman of upsetting his family carriage a short time before.

After the shooting Mr. Mitchell immediately went to his home, where he was placed under arrest. Justice of the Peace R. A. Milam was notified and held an inquest, and ordered that Mr. Mitchell be conducted to jail without bail.

Later an application for a writ of habeas corpus was filed by Mr. Mitchell's counsel, and the jeweler was released upon a bond of \$25,000 pending a hearing on Monday. Monday Mr. Mitchell was bound over to the Grand Jury on the charge of murder, and a new habeas corpus hearing was set for to-day, the preliminary bail of \$25,000 being continued.

When asked to give a statement Mr. Mitchell refused to discuss the affair for publication. He said that he had greatly regretted that the man was dead, but that he had had trouble with him on the road between his home and La Porte for a long time. He said he did not intend to kill the man, and felt that his act would be considered justified when all the facts of the affair were known.

### E. Hochman, Savannah, Ga., Files Voluntary Petition in Bankruptcy.

SAVANNAH, Ga., July 30.—E. Hochman yesterday filed a voluntary petition in bankruptcy, giving the following schedule of assets: Stock of merchandise, \$5,000; real estate, \$37,500; notes and accounts receivable, \$3,763.71; total, \$9,101.21.

The liabilities are as follows: Secured claims, \$4,500; unsecured claims, \$14,784.76; notes, \$210; accommodation paper, \$14,513.26; total, \$34,008.02.

Honestead exemption of \$1,600 is claimed. The accommodation paper is principally for indorsements of notes of M. A. Stokes, \$4,050, and H. W. Jenkins, \$9,463.50, both of whom filed petitions in bankruptcy a few days before Mr. Hochman.

### Jewelers' Gold Bars Withdrawn and Exchanged at New York.

**Jewelers From All States Gather At Cincinnati**

Third Annual Convention of the American National Retail Jewelers' Association Begins At the Hotel Sinton With a Large and Enthusiastic Attendance.

CINCINNATI, O., Aug. 4.—The great event of the retail jewelry trade has been begun. The members of the American National Retail Jewelers' Association have started their first session of the third annual convention, which is now being held in the Sinton Hotel in this city. The meeting might properly be considered as beginning last night when President Hurlbut held a reception in Convention Hall, which was attended by the delegates, the visiting and local jewelers, manufacturers and wholesalers, together with their wives, sweethearts and friends. The official opening of the convention began this morning in the hall of the Hotel Sinton.

It seems now that there will be several changes in the programme as announced, the most important being the omission of the address by the Hon. E. B. Vreeland, author of the National Stamping Law, who was to speak to-morrow on "Legislation That Affects the Retail Jeweler." Mr.

forth applause and laughter in a well-turned speech that was listened to with deep attention. He said:

*Mr. President, Members of the American National Retail Jewelers' Association, Ladies and Gentlemen—In the illustrious words of Shakespeare, I say:  
"All hail, great master; hail, I come  
To answer thy best pleasure; be it to fly,  
To swim, to dive into the fire, to ride  
On the curled clouds; to thy strong bidding task  
I come."*

On behalf of the retail jewelers of the United States of America, it is my delightful privilege to

I behold many of my comrades and battle-scarred heroes of that meeting here to-day—Jennings and Hull, Radabaugh and Paegel, Graul and Wiley, Bernau and Tillson, Westmyer, Ryman, and others of like fame.

New heroes have arisen. New recruits have come to us. New States have joined our ranks, until we are to-day one grand army—1,000 strong. And this is only the beginning of our mission. Give us two years more and we shall enlist every State and territory under our banner. Give us two years more and we shall at least awaken every retail jeweler from his Rip Van Winkle sleep.

Let us set our standard 1,000 new members one year hence. This means only one new member for each member. Keep up this ratio for four years and every jeweler in the United States will be a member.

Let us enlarge our delegate system so that our conventions may have present 1,000 members. Numbers inspire enthusiasm. Enthusiasm begets work. And work is the keynote of our conventions.

On behalf of the retail jewelers I bespeak for Cincinnati a most successful convention. On behalf of the programme I bespeak a flood of eloquence and a feast of reason. We have a programme of which every number should command the closest attention and the keenest thought. We have questions for discussion in which every delegate should take part.

Great questions confront the retail jewelers—the retailing jobber, national and State stamping laws, parcels post, catalogue houses, restrictive selling price, watch inspection, watchmakers' school, and the elevation of the retail jewelry trade. These questions have been discussed at State conventions all over this land and will be discussed at this convention. It is now time that all these thoughts

J. P. ARCHIBALD, VICE-PRESIDENT.

MACK A. HURLBUT, PRESIDENT.

I. M. RADABAUGH, SECRETARY.

respond to the eloquent and pleasing address of welcome.

One year ago the retail jewelers of Cincinnati invited and exhorted our association to meet in your beautiful city. By a unanimous vote of our association we resolved to come and partake of your hospitality. For one year all eyes have been turned toward the "Queen City" of the southwest; because the representative retail jewelers of the United States would be gathered here, and because Cincinnati has within her borders the honored and distinguished citizen, lawyer, judge, statesman, politician, and Republican candidate for President of the United States, William Howard Taft.

Cincinnati has extended to us 100,000 welcomes. We have received a royal welcome from your citizens through your honored and respected Mayor; a sincere welcome from the retail jewelers of your city, a hearty welcome from your jobbers and manufacturers, a glad welcome from the press and journals of your city. In the language of the Hawaiian Islander we have heard "Aloha, Aloha, Aloha," which means welcome, welcome, thrice welcome. Therefore, in the name of more than 1,000 members of the American National Retail Jewelers' Association, we thank you for your warm welcome.

We are the representatives of 20,000 retail jewelers who are working for the elevation of our trade. Behold the faces of these representative men who have come from the north, the south, the east and the west, to join in the work of this convention.

Contrast if you please this convention, with her hundreds of delegates, with our first meeting in New York two years ago. That meeting began with a few delegates from a few scattered States. However there was laid the foundation of a great movement which has spread from State to State.

Vreeland had thoroughly intended to come, but as he was a member of the Committee of the National Monetary Commission, which sails for London to-day to investigate currency in the banking systems abroad, it was absolutely impossible for him to be here.

The proceedings began this morning with the registration and distribution of badges, etc., by the executive committee, and then the meeting was called to order. The Mayor of the city was booked to make an address of welcome, but instead of an elaborate address the Mayor made a few brief remarks, saying in a few well chosen words that he wished the delegates a good time generally, the convention a profitable session and expressed hope that all who were present shall on leaving Cincinnati have cause to wish that they will soon return again to the city.

Responding to the Mayor's words of welcome, Vice-President J. P. Archibald drew

should be crystallized into one idea, and that idea put into action.

May this convention go down in history as one of sober thought, careful deliberation and unanimous action. Let us be careful that we do not urge too much legislation, make too many changes in our plans. It is the concentration of our energies and our powers that removes the barriers in the way.

It is the attitude—the heart motive—of every retail jeweler in every hamlet and in every city in these United States that elevates our trade, or causes many trade abuses.

Why do we cry against the retailing jobber and then buy from the retailing jobber? Why do we cry restrictive selling price and do not maintain it ourselves? Why do we cry elevate the jewelry business and refuse to join in the movements of reform?

Let us start the reforms at this convention. Let us resolve to lay aside our petty jealousies. Let us resolve that our brother jewelers are our friends. Let us treat our brother jewelers as our brothers. Place the seal of condemnation upon any man who has not respect and brotherly love for an honest brother in the business.

May this be the handshaking convention. Will you make it such? Take a little time to meet our brother jewelers. Make new friendships. Make

friendships that shall last for time immemorial. Carry this idea to our homes and apply it in daily life. It is such meetings as these that removes the wrinkles from our weary brows, that takes the care-worn expression from our pallid faces. Yes, brother jewelers, these meetings are the fountains from which spring our inspiration for time to come. These meetings are the modern educators for the up-to-date business man. No business man in this day of keen competition can well afford to remain in his place of business 52 weeks in the year.

This organization stands for a more liberal education, a high fraternal spirit, and a square deal for all men. "It is education," says Locke, "that makes the great difference in mankind." Education, in its broadest sense, is the greatest need of the retail jewelers of our country to-day.

Each individual man must stand for honestly in all his dealings; temperance in all things, purity in daily life, politeness in every word, fraternity in every act, and character to crown it all.

In conclusion, my brothers, it behooves us to keep wide awake the trade abuses. We must not be satisfied with our present achievements.

It is when Samson lies in the lap of Delilah that the enemy steals upon him and takes him captive. It was when the great Assyrian king boasted in his pride, "Is not this great Babylon that I have built for the honor of the kingdom and for the honor of my majesty?" that the voices came to him, "Thy kingdom is departed from thee."

Again, in the name of our noble craft, we thank you, Mr. Mayor, for your words and acts of welcome.

The remainder of the morning session was devoted to the organization of the convention, the appointing of committees, the reports of the secretary and treasurer. I. M. Radabaugh, the secretary presented the following report, showing in tabulated form the exact membership of the organization.

### ANNUAL REPORT OF THE SECRETARY.

To the Officers and Members of the American National Retail Jewelers' Association:  
Gentlemen—I beg to submit the following report:

#### ORGANIZATION.

There are at the present time, to the best of my knowledge, 43 active associations of retail jewelers, which are sub-divided as follows: One national, 29 State and 13 city organizations; of these 23 State associations are in affiliation with the American National Retail Jewelers' Association, and at least three others have voted to affiliate but have not done so formally. During the past year we have organized an association in Virginia, Illinois and South Dakota. The two latter having been previously organized but had become defunct. There are at least four of the city associations that are included in the State associations now affiliated with the national body. This gives us a grand total of 27 associations, with a membership bordering close on the 2,000 mark now in affiliation with the national association. In addition to this increase in associations, I wish to add that nearly all of the old associations have made very substantial increase in their membership.

#### MEMBERSHIP.

The membership at the present time is as follows:

State.	Association.		At large.	
	Paid up.	Arrears.	Paid up.	Arrears.

At the beginning of this afternoon's session President Mack A. Hurlbut delivered his annual address, and this will be followed, probably by an address on "Scientific Salesmanship," by A. Sheldon, and an address by N. Nielson.

President Hurlbut, who was loudly applauded, is to make a long but exceedingly interesting address. He began by saying that Providence watches over the destinies of fools and infants, and as the association fell in the latter class it was certainly due to Providence that led them to select for their annual meeting, in a Presidential year, not only the city but the identical headquarters of the campaign and the man who may be the president of the United States. He caused a flutter by saying:

"The president's annual address seems to be one of the necessary evils of all conventions. It is supposed, like charity, to cover

a multitude of sins, and to act as a sort of a polish to remove the tarnish from the administration's escutcheon. We use it as a microscope to examine our good acts, and then as a high-power minus lense in examining our faults. In this address the president is supposed to throw a lot of bouquets at everything in sight, his administration in particular, and pump his hearers full of 'hot air.' This address is supposed to be a review of the past year's work, and from the knowledge and experience gained it ought to prove of value.

He said that mistakes were necessary in the development of an organization, and at least those they had made were the result of honest efforts to correct conditions. Conditions which beset them have been of long standing, he said, and the resultant evils of which we complain have been years in developing; most of them have been the natural evolution of the methods of retail merchandising. To expect to correct these conditions and settle wisely and definitely all these questions in the three short years of the association's history would be rank folly.

Of the 22,000 jewelers in the United States he stated there were only 15,000 real jewelers, of which the association had about 10 per cent. He spoke of the work of State associations and analyzed the position that the national association bore to the State associations, showing that it was the duty of the State association to be affiliated with the national body.

Mr. Hurlbut was still speaking when THE CIRCULAR-WEEKLY went to press. A full synopsis of his address will appear next week.

**Bankruptcy Proceedings Against W. J. Feeley Co., Chicago—Providence Concern Not Affected.**

CHICAGO, Ill., Aug. 3.—Bankruptcy proceedings have been begun against the W. J. Feeley Co., manufacturers of ecclesiastical silverware and church goods, etc., at 6 Monroe St., this city, and a receiver has been appointed under bond of \$25,000. No details of the condition of the business have been made public. W. J. Feeley, of the W. J. Feeley Co., Providence, is now in the city in connection with the affair.

The company was incorporated under the laws of the State of Illinois, and has a capital of \$50,000, which was increased to \$100,000 in March, 1905. Prior to the formation of the corporation the business was conducted for some years as a branch of the W. J. Feeley Co., in Providence, but recently it has been a distinct and separate corporation, though some of the stockholders have been interested in both concerns. The bankruptcy proceedings which have just begun will in no way affect the Providence house.

Creditors of Sol. Urbach, who was duly adjudged bankrupt on the 11th day of December, 1907, are notified that the first meeting of creditors will be held at the office of John J. Townsend, referee in bankruptcy, 45 Cedar St., New York, Sept. 9, at 12 o'clock, at which time creditors may attend, prove their claims, appoint a trustee, and transact such other business as may come up before the meeting.

O. Fulde, Chicago, will soon open a store at Anaheim, Cal.

C. H. Garvey has opened a repairing shop in Clermont, Ia.

B. E. Wycoff, Prescott, Ia., has begun business in Greenfield, Ia.

F. R. Mendenhall has engaged in the jewelry business in Tilden, Nebr.

E. H. Smith will shortly open an optical store in the Jern building, Santa Ana, Cal.

C. E. Bestor opened a watch repairing establishment in Newtown, Pa., last week.

Mr. Green, who conducts a drug store in Uehling, Nebr., is adding a line of jewelry.

Wm. Walz is a new watch repairer in Perkasi, Pa., where he recently opened a shop.

T. I. Stoner will soon open a general store in Des Moines, Ia., and will carry a line of jewelry.

M. A. Goldman has opened a first-class jewelry store at 217 Spring St., Los Angeles, Cal.

The Gilliland Mercantile Co. will start in business in Sapulpa, Okla., Sept. 1, with a capital of \$50,000.

John F. McNulty, now of North Attleboro, Mass., will open a retail jewelry store at Rock Springs, Wyo., in the near future.

W. S. Gish, with his son, has leased part of the Matt Diedrick building, at Onamia, Minn., and will shortly open a store at that place.

L. W. Scherffius, formerly of North Dakota, has started in the jewelry business in the J. M. Clark building, at Miles City, Mont.

Among the new concerns in Providence, R. I., are the Wing Comb Co. and the Superior Novelty Co., both at 9 Calendar St.

Geo. H. Sauer has opened a store on the ground floor of the Capital City Bank building, at E. 5th and Locust Sts., Des Moines, Ia.

E. Burnett, formerly of Arcata, has engaged in business at 229 N. Monterey St., Gilroy, Cal. He will devote most of his time to the repairing of watches.

George Teneycke, Johnstown, N. Y., and E. A. Parkman, Bridgeport, Conn., have entered into a partnership to conduct a retail jewelry business at the latter place.

**Market Price for Silver Bars.**

The following are the quotations of silver bars in London and New York, as reported by Zimmermann & Forshay:

	London.	New York. .999 Basis..

### Canada Notes.

F. P. Pyman, Enderby, B. C., has assigned to Geo. Bell.

J. Munro has purchased the jewelry business of A. G. Gaul, Beeton, Ont.

Judgment for \$183 has been entered against R. S. Coops, Milton, N. S.

The assets of the Ottawa Import Trading Co., dealers in jewelry, Ottawa, have been sold.

Frederick W. Dudley, Winnipeg, Man., has given a chattel mortgage to the P. W. Ellis Co., Ltd., for \$3,888.

Benson Dickson and Roderick Eyres were tried at Brockville, Ont., Friday, July 24, on several charges of robbery, including the stealing of \$500 worth of watches and diamonds from the store of Joseph Lane, Brockville, March 30. They pleaded guilty and Dickson was sentenced to five years' and Eyres to two years' imprisonment.

Richard Hemsley, the pioneer of enameled jewelry manufacture in Canada, and the maker of the casket recently presented to the Prince of Wales during the Tercentenary at Quebec, was knocked down by footpads at Westmount, near Montreal, one evening last week, and was painfully injured and robbed. The highwaymen escaped.

The Minto Cup started from Montreal on its long journey to the coast on Wednesday, July 29, both the losing Shamrocks of Montreal and the victorious Westminsters cheering each other as the train pulled out. It had been arranged to have a little gathering at the Windsor Hotel for the formal transfer, and the proceedings were marked by the best of good fellowship. The coveted cup was placed on a table and was filled with champagne and healths were drunk. The president of the Shamrock Lacrosse Club presided, and in the course of a few remarks wished success to the new cup holders. The cup, which was made in England, has been in the principal show window in the store of Henry Birks & Sons for many days, and has attracted universal attention. It is quite plain, except for the many records of history inscribed upon it, but is heavy and of solid silver.

### Washington, D. C.

Eugene E. Howell, who conducts a jewelry store at 612 7th St., S. W., reported to the police recently that a thief had broken into his show case and stolen jewelry valued at \$90.

The local police have been seeking the owner of jewelry which was taken from a negro arrested in Baltimore while trying to dispose of it. The jewelry, which was in a box bearing the name of R. Harris & Co., consisted of a diamond ring, an emerald ring, a sunburst breast pin set with a pearl, an old-fashioned breast pin and a gold knotted brooch.

Major Richard Sylvester is sending out cards to the police of various cities, announcing that a reward of \$50 will be paid for the arrest of Ralph Raume, who is wanted in this city to answer a charge of grand larceny. The missing man is an Italian, between 35 and 40 years old, five feet high, well built, with black hair and eyes and a sallow complexion. He was a

barber by trade, but has also worked in the jewelry business. The complainant in the case is Frederick Cole, of Cole & Swan, jewelers of the city, who thinks he may be working as a barber somewhere in the east.

### North Attleboro.

J. J. Sommer is enjoying a vacation at Oak Bluffs.

Mr. Wilkins, salesman for J. J. Sommer & Co., was at the factory last week.

William H. Bell and family are enjoying a vacation of 10 days on the Cape.

Charles H. Clark, of W. G. Clark & Co., will spend the month of August in Jersey City.

George Bicknell, New York representative for Fred S. Gilbert, was at the factory last Saturday.

John F. McNulty has resigned his position as colorer for the George L. Paine Co. and will move to Rock Springs, Wyo., where he intends opening a retail jewelry store. Mr. McNulty will leave for the west, Aug. 11. His friends will give him a reception Aug. 10.

There was a slight fire scare at the Manufacturers' building, Saturday morning. The awning over the office of Maintien Bros. & Elliot caught fire in some unexplainable manner. An alarm was pulled in from box 8, but before the department arrived the blaze had been extinguished.

Charles E. Riley, treasurer of the George L. Paine Co., has submitted the following report to the Commissioner of Corporations: Merchandise, \$9,102; machinery, \$21,987; cash and debts receivable, \$104,382; manufactures and merchandise, \$12,000; total, \$147,471. Capital stock, \$60,000; accounts payable, \$25,564; floating debt, \$40,039; profit and loss, \$21,868; total, \$147,471.

The following factories are closed this week: A. H. Bliss & Co., J. H. Peckham & Co., Codding & Heilborn Co., Doran, Bagnall Co., Sturtevant & Whiting, F. M. Whiting & Co., Miller, Fuller & Whiting, Riley & French, W. & S. Blackinton Co., G. C. Hudson & Co., C. Ray Randall & Co., T. G. Frothingham & Co., Cheever, Tweedy & Co., E. Ira Richards & Co., Estate of O. M. Draper, H. H. Curtis Co., E. I. Franklin & Co., Bugbee-Niles Co., F. H. Cutler & Co., H. D. Merritt Co., Maintien Bros. & Elliot, J. F. Sturdy's Sons Co., W. N. Fisher & Co., Scofield, Melcher & Scofield, Plainville Stock Co., Whiting & Davis, J. J. Sommer & Co., F. L. Shepardson & Co., Mandalien & Hawkins, W. N. Fisher & Co. and W. H. Bell & Co.

### Boston.

M. Myers starts to-day on a trip to the Pacific Coast.

Walter B. Snow has been on a brief vacation trip to Lake Winnepesaukee.

Ed. G. Morris, of Henry G. Morris, is at Beechwood, Me., for a brief outing.

F. W. Holt, head watchmaker for Myers & Franks, has returned from a trip to New Brunswick.

The O'Hara dial factory at Waltham, which has been closed for a couple of weeks, reopens to-day.

Charles A. Cooley, of the Jewelers' build-

ing, has been on a yachting trip to Southwest Harbor, Me.

Joseph Cowan has applied for a patent on a design for a Knights of Pythias emblem, to be used for a pin, seal or charm.

On Wednesday last the fixtures and stock remaining unsold in the store of Freeman & Taylor, on Temple Pl., were sold at auction by H. M. Rich.

The Waltham Watch Co.'s factory started up Aug. 1, after a shut-down of five and a half weeks, on regular Summer time schedule. The plant has been thoroughly repaired and renovated during the past month.

The E. Howard Clock Co. has placed a large four-dial striking clock in the tower of the Smith Memorial Church, at Hillsboro, N. H.; also a watchman's clock system in the Monadnock paper mills at Bennington, N. H. E. A. Bigelow, treasurer of the E. Howard Clock Co., has a Summer home at Bennington, N. H., to which he makes frequent week's-end trips during the season.

### News Gleanings.

Henry Zellerbach, formerly of Houston, Tex., is now at Hallettsville, Tex.

The store of A. L. Windle, Lexington, Tenn., has been damaged by fire.

R. W. Boyle's stock of jewelry, Brandon, Ore., has been moved into new quarters in the Gallier building.

Lewis & Van Sickle, Oskaloosa, Ia., are doubling the capacity of their retail store. New show cases and wall cases will be among the new improvements.

M. D. Petersen is improving the building, 313 Brady St., Davenport, Ia., occupied by the Simons Jewelry Co. It will have a new pressed brick front, large plate glass windows and other improvements.

The Williams Bros. Mfg. Co., Glastonbury, Conn., will be represented on the Pacific Coast by Jay H. Merrill. George M. Howard will travel for this company through Pennsylvania, New York, Ohio and Virginia.

While their store at 315 W. Superior St. is being remodeled, F. D. Day & Co., Duluth, Minn., will occupy a temporary location at 17 Second Ave. W. A Chicago artist has been delegated to design a mosaic front for the new store.

H. B. Kline, as attorney for E. F. Whittemore, Denver, Colo., sold at public auction, July 30, at 11 A. M., all the stock of jewelry, furniture and fixtures, etc., owned by Mr. Whittemore. The sale took place at Mr. Whittemore's place of business, 831 16th St.

Abraham Cohen, a youth 17 years of age, was recently taken into custody in Denver, Colo., accused of systematically stealing nearly \$1,000 worth of jewelry from the Enterprise Jewelry Store, 1115 16th St., that city, where he was formerly employed.

The Queen Elizabeth is the name of a very attractive pattern of flat ware recently put upon the market. It is made in silver plate, in standard and fancy pieces, either in bright or French gray finish. The manufacturers are making a special offer to dealers handling their standard plate goods. A circular describing this offer will be sent on request to the Williams Bros. Mfg. Co., Glastonbury, Conn.

No. 1. It is New, Neat, Practical, Inexpensive and Durable, a combination of facts which makes the Austin Pony Fob as much of a necessity to a well-dressed woman or man as the watch upon which it is fastened.

No. 2. The signet bottom on the Pony Fob works on a pivot, showing the initials on same when hanging in position from belt or pocket.

No. 3. The New Austin & Stone Pony Fobs are now being shown by the jobbers. If your jobber does not handle them, write to us and we will put you in touch with a live jobber.

IF FOR ANY REASON THIS CHAIN IS NOT SATISFACTORY TO THE PURCHASER IT CAN BE RETURNED TO THE MAKER AND A NEW CHAIN WILL BE GIVEN IN EXCHANGE.

AUSTIN & STONE, Inc.  
Attleboro, Mass.

**AUSTIN & STONE, Incorporated**  
ATTLEBORO, MASS., U. S. A.

## Providence.

William Loeb is confined to his house by serious illness.

William B. Streeter & Co. closed last Saturday until Wednesday of this week.

The Wing Comb Co. has started in the manufacturing business at 9 Calender St.

George W. Dover was registered at the Gladstone at Narragansett Pier the past week.

The K Mfg. Co. is the new style of the United Comb & Novelty Co., 168 Somerset St.

Henry O. Knapp has a retail jewelry and watch store at 118 Warren Ave., East Providence.

Charles E. Hancock, of the C. E. Hancock Co., is at his Summer camp on Lake Winnepausaukee, N. H.

C. E. Hancock & Co. began last week on 10-hour time, their business improvement having been very large from the west.

Edward B. Hough has been elected president of the Buttonwoods Casino Association, where he has a Summer cottage.

William Stephens, of this city, has gone to Kansas City to enter the employ of the Hassig & Krieke Jewelry Co. as an engraver.

Eugene E. Craddock, manager of the Providence Art Metal Co., has just returned from a business trip to England and France.

The Superior Novelty Co. is the name of a new firm that has begun the manufacture of mesh bags, brooches, belt pins, hat pins, etc., at 9 Calender St.

The regular quarterly dividend of 1 $\frac{3}{4}$  per cent. on the preferred stock of the United Wire & Supply Co., 109 Summer St., this city, has been declared and is now being paid.

Belcher & Loomis, wholesale and retail dealers in jewelers' hardware, tools and supplies, are increasing the size of their floor space by the addition of the store at 83 Weybosset St.

Claiming the amount of \$1,617.84 as due on an open account, the S. & B. Lederer Co., of this city, recently filed a suit in the Circuit Court, at Little Rock, Ark., against the Tribble Jewelry Co.

At the annual election of the High St. National Bank on Monday, Nathan B. Barton, Arthur E. Austin and Charles F. Irons were elected as directors, Mr. Austin being subsequently elected as president of the bank.

By an error it was stated last week that the Gorham plant at Elmwood had resumed work on an eight-hour schedule. The works, which were closed for two weeks, resumed work July 27 on a full 10-hour day schedule.

Earl B. Williams, who has been the traveling representative of D. M. Watkins & Co., has severed his connection with that firm and has accepted the position of New York representative of the George W. Dover Co., with headquarters in New York.

William J. Feeley, of the W. J. Feeley Co., was in Chicago the past week attending to matters incidental to the bankruptcy proceedings against the W. J. Feeley Co. of that city, in which he is interested, but which is in no way connected with the Providence concern of the same name.

Charles A. Barker, colorer with the N. Barstow Co., was knocked down by a vehicle at the corner of Fountain and Aborn Sts., a few days ago and seriously injured. He was removed to the Rhode Island Hospital, where it was found that he had sustained a fracture of two ribs and had a bad scalp wound.

The civil suit of the Werner Co., Akron, O., against Frederick T. Higgins, employed as an electroplater for the T. E. Bennett Co., of this city, was called in the Sixth District Court on Friday. This is a suit for the balance of \$34.25 on book account, and judgment was awarded the plaintiff for full amount of the claim with costs.

The Billings block, at the corner of Eddy and Worcester Sts., on a portion of the site of the disastrous Aldrick House fire of 1888, was sold at public auction last Tuesday to Tobias Burke, a liquor dealer, who has a place of business on the ground floor. It is a five-story brick building and was knocked down for \$34,850, there being but few bidders. The building was formerly occupied largely by manufacturing jewelry concerns and allied trades, which were driven out by the recent fire.

Herbert S. Tanner was executive officer of the rifle team that represented the State of Rhode Island at the competitive shooting by National Guard teams at Wakefield, Mass., last week. He will also be the official head of the State's team at Camp Parry, O., in the national rifle competition. It is a significant fact that jewelers have always occupied a prominent place in the rifle teams representing the militia of Rhode Island in interstate and national shooting contests. On the first team that ever went from this State to Creedmore, in 1878, of the 12 men six were jewelers, two being manufacturers, Ansel L. Sweet and Benjamin L. Hall. The others were George A. Forsyth, Joseph Stringer, Joseph Williams and George Taylor.

## Attleboro.

Carl Wendelstein is enjoying a vacation at Moranacock, Me.

W. H. Blake has been regaining his health on the Cape.

John M. Fisher has been enjoying a pleasure trip through the west.

Willard A. Engley is planning to pass the hot days of August at Harwichport.

Charles M. Robbins is chairman of the old Home Week celebration at Harwich.

The D. F. Briggs Co. and the Horton-Angell Co. teams were the winners in the Jewelers' Baseball League, Saturday.

Formal permit has been given by the Selectmen to A. S. Ingraham to build a three-story factory with basement at the corner of Union and Dunham Sts.

The engagement is announced of Miss Eva C., daughter of Mr. and Mrs. Charles H. Allen, to Zelotus E. Riley. The announcement was made at a banquet at Crown Hotel, Providence.

Moore Bros., who were obliged to seek new quarters because of the condemnation of the Old Steam Power building, have secured the top floor in the new concrete Tappan building on Union St., and will remove there within a short time.

S. O. Bigney & Co., Mason, Howard & Co., the Attleboro Mfg. Co., Attleboro Chain

Co., Austin & Stone, C. D. Lyons & Co., Carter, Qvarnstrom & Remington, W. E. Richards & Co., Fontneau & Cook Co., Bates & Bacon, A. A. Bushee & Co., C. A. Marsh & Co., D. F. Briggs Co., R. B. MacDonald & Co., Barden & Hull, J. C. Cummings & Co., Cunningham, McCarthy & Co., Regnell, Bigney Co., F. H. Sadler Co., and McRae & Keeler are among the Attleboro concerns that stop work this week to permit the operatives to enjoy the usual Summer vacation.

The employes of the Attleboro Mfg. Co. and the Attleboro Chain Co. enjoyed a joint outing at Boyden Heights, Saturday. A party of 350 made the trip on special electric cars, reaching the shore resort at 11 o'clock. A ball game was played between the two firms, and the Chain Co. nine won by 11 to 5, the contest being marked by some fine playing and vociferous rooting. A shore dinner was served after the ball game and the balance of the afternoon was spent with athletic contests. A silver loving cup was awarded to the winning ball nine, the gift of Samuel Einstein.

A party of Attleboro jewelers had a narrow escape in a collision near the gate of the Ponham Club, Providence, last Tuesday afternoon. An automobile owned by George H. Snell and containing Mr. Snell, Major Everett S. Horton, David E. Makepeace, Jesse Carpenter and J. Thomas Inman was struck by an electric car which came round a dangerous curve at a fast clip. Major Horton was seated nearest the electric car and sustained cuts about the face and a general shaking up. Mr. Inman and Mr. Carpenter were slightly bruised. Major Horton was conveyed home in an automobile owned by J. Perry Carpenter, Providence. Mr. Horton will escape without any serious results from the accident. It was a narrow escape and demanded prompt work by Mr. Snell and the motorman to avert a more disastrous crash.

If the town of Attleboro can provide a suitable factory, Bernard Rothschild announces that not only will the Rothschild Bros. concern remain in town, but he will also bring to Attleboro a branch business now located in Worcester and known to the trade as the Klingtite Comb Co. The Worcester concern employs about 75 hands, and if it comes to Attleboro will be consolidated with the jewelry business. A special factory with a floor space of 8,000 square feet is necessary. Because of the nature of the comb business no factory in Attleboro is suitable. In an interview with a CIRCULAR-WEEKLY correspondent, Mr. Rothschild said his company was not prepared to stand the expense of such a building, but he thought there were prominent men in Attleboro who would build it for an investment. Major E. S. Horton, D. E. Makepeace, Joseph L. Sweet, A. S. Ingraham and others are interested in the movement to provide the factory. Mr. Ingraham has offered to donate a site on Bank St., near the Horton-Angell factory, but in order to have a selection of two or three locations an advertisement was printed asking for land. About 25,000 square feet of land is necessary.

Lee Bros., Britt, Ia., have renovated their store and installed new oak display cases and a larger safe.

# TO THE TRADE

¶ The Gorham Company cordially invites those members of the Jewelry Trade who contemplate an early visit to New York, to make their headquarters at the Gorham Building, Fifth Avenue and 36th Street.

¶ Here they will be assured of a hearty welcome and of all conveniences necessary for the transaction of their business, the receipt and despatch of their correspondence, and the making of such appointments as they may desire.

¶ The Company's preparation for the business of the coming season has been unusually thorough, and visiting members of the Trade will be much interested in the inspection of the full and varied line of goods exhibited, which cannot fail to attract every legitimate jeweler.

**Use and Abuse of the Term "Gold Filled."**

An important prosecution under the Merchandise Marks Act, which recently came up in a Birmingham, England, police court, and of which mention is made in our news letter from England, involved the question of the legality of the use of the words "gold filled" on articles which proved to be no more than the cheapest variety of plate, or, more properly, "gilt," and serves to bring up prominently before the trade the importance of insisting on a proper use of this term. In the case before the British court it was the contention of the prosecution that the description "gold filled" was, within the meaning of the act, a description perfectly well known in the trade and had a particular meaning attached to it; that is, that the words meant that the gold had been applied to the article in the course of manufacture, and not (as in the case at bar) that it had been simply dipped into wet gold or passed through it. The outcome of the case, which was a victory for the prosecution, has no bearing upon the legality of the words as used in this country, but the case itself emphasizes to what extent the term has been used abroad as well as in this country upon goods which are in no way entitled to be so described.

There is no doubt that a large amount of cheap gold-plated ware is stamped "gold filled" and sold as "gold filled" simply because the buying public believes that the words mean that the article is essentially of gold, reinforced, and is of a character superior to gold plate. In fact, if the words did not convey this meaning the article would probably be called, as it properly should be, "gold plate" or "rolled plate." While it is true that a large number of manufacturers make substantial articles marked with these words which are in every way reputable, and with thoroughly wearable qualities, at the same time the term is being abused by others, who have even stamped it on the cheapest grade of electroplate.

For the sake of his own reputation, as well as for the protection of his customers, the jeweler should in no way acquiesce in the misuse of such terms as this, which is morally, if not legally, a fraud upon the public. It is doubtful if there is not even a question that a prosecution could not be sustained on a charge of obtaining money under false pretenses as to some of the articles which have been sold as "gold filled." However, the legal question aside, the jeweler should in no way be a party to such a misrepresentation, and should use every endeavor as long as this term is abused to discountenance its improper use by refusing to handle spurious goods so marked, and also, if necessary, by educating his customers as to the difference between those articles which are and which are not entitled to be called "gold filled."

**The Policy of the A. N. R. J. A.** THE members of the American National Retail Jewelers' Association are again in annual session as THE CIRCULAR-WEEKLY goes to press, and if "coming events cast their shadows before," this convention is destined to be one of the most important, if not the most important, in the

Tell the jewelers what you have to sell and why they should buy. Ninety per cent. of the buyers read THE JEWELERS' CIRCULAR-WEEKLY.

history of the organization. The association is now passing through the formative stage and getting upon a solid, substantial basis, having now affiliated with it associations in about every large State of the nation, and its power for good (or evil) is such that its proceedings and its policies will be watched with deep interest not only by its members but by the jewelers throughout the country who have not heretofore taken any part in the work of the organization.

It is a subject for gratification that some of the present officers of the organization are looking at the questions which affect the trade in a big and broad, as well as a sane and conservative, way, and it is to be hoped that the intelligent advice which has been offered in the addresses of a number of the speakers at many of the State associations will bear fruit at this national convention as well, and that the resolutions adopted, as well as the policies enunciated, will be the subject of careful and intelligent deliberation, and not the hasty act of a moment, as has been the case at some of the previous meetings. The policy of the American National Retail Jewelers' Association as enunciated in the programme of the present convention is fortunately big and broad in its lines, intelligent in its expression, and will be far reaching in effect if it is indorsed and adhered to in the future.

Those who are advocating this policy are big enough to see that a club is not the weapon of an intelligent man, and also that there are many points of identity in the interests of the retailer, jobber and manufacturer, which should properly necessitate co-operation among the three lines, and that the real abuses and evils from which the retail jeweler is suffering can be better remedied by a constructive policy which will properly consider the rights of all the parties involved, than by a destructive warfare that has for its end and aim retaliation more than correction. As the announcement reads, the policy of the organization is "to build up without tearing down, to harmonize the warring factions which now exist, to so knit together the different branches of the trade that they in future will be inseparable." While it is true that it is easier to state a policy than to carry it out, this sentiment expressed is more than mere words, and truly emphasizes the ideas of a large element of the organization.

It is to be hoped that those behind the constructive policy will for a long time be in control, as the predomination of their ideas means, for the organization, increased membership, strength and the respect, as well as the co-operation of the trade at large.

## ROCK BOTTOM PRICES ON DIAMONDS

Our diamond prices are rock bottom.

We import the stones direct, cut them ourselves, and sell them as close as anybody in the country does for diamonds of equal quality.

We carry a large stock at all times and the jeweler who sends to us for a selection not only gets rock bottom prices, but also a liberal assortment—and, what is of utmost importance, he gets it promptly.

### Good Gold Jewelry

*It's the  
only kind  
we make*

A RATHER COMMONPLACE DECLARATION, WE'LL AGREE, BUT WE MAKE IT WITH AN INSPIRING REVERENCE FOR THAT MUCH-ABUSED WORD "GOOD." OUR JEWELRY IS GOOD ALL OVER—GOOD THROUGH AND THROUGH. IT ISN'T ALONE SUPERFICIALLY IMPRESSIVE, IT GOES BEYOND THAT, SUPPORTING ITS VISIBLE DIGNITY WITH MATERIAL QUALITIES THAT MAKE IT MOST ENDURING. FURTHERMORE, LIKE EVERYTHING IMPRESSIVE, IT HAS A PERSONALITY—CHARACTERISTICS THAT EASILY HELP IDENTIFY IT AS A KIRBY PRODUCT. ASK TO SEE THE KIRBY LINE BEARING THE ABOVE TRADE-MARK.

### Pittsburg.

Walter Seth is spending a few weeks at Lucinda.

Paul J. Gillespie, of Gillespie Bros., has returned from a two weeks' trip to Belmar, N. J.

Abraham Lewis, of 207 Fifth Ave., left this week for Cambridge Springs, Pa., for the benefit of his health.

S. F. Roberts and Mrs. Roberts sailed, last week, for London, where they went to join their daughter, who has been in Europe for some time.

John Allison, a well known salesman, has accepted a position with the George B. Barrett Co. Miss Helen McFall, of the same house, has gone to the lakes on her vacation.

An involuntary petition in bankruptcy was filed against the Pittsburg Watch Co., Saturday. Claims of \$1,018 are given in the petition which makes the usual allegations.

Capt. William Klein will go to Conneaut next week with the Washington Infantry. Several other jewelers are planning to go with the infantry, a number being members of the organization.

William G. Ingham, buyer for the Geo. B. Barrett Co., of which firm he is a member, will leave next week for Philadelphia and Atlantic City, and will attend the Pennsylvania Retail Jewelers' Association convention.

George Chesterfield, aged 22, was arrested here, last week, while trying to sell foreigners cheap jewelry. The police have had considerable trouble with vendors of this sort lately, and have been taking a number of them in custody.

Gillespie Bros. were last week awarded the contract by the city for furnishing all of the badges used by the police and firemen. Some of these are to be solid gold, but most of them will be of metal. A number of jewelers bid on the contract.

Henry Terheyden, the Smithfield St. jeweler, is planning to give an exhibition of diamond cutting in the next week or two at his store. He is negotiating to bring several men to Pittsburg and believes that the experiment will be a good advertisement for his house.

August Loch, of the North Side, and J. Alexander Hardy, of the Hardy & Hayes Co., have been made members of the sesquicentennial industrial parade committee. The City of Pittsburg will celebrate its 150th anniversary in September and big preparations are being made for the event.

James Rush, whom it is alleged, was at one time engaged in the hotel business at Brownsville, was arraigned last week before Alderman John Fugassi, of this city, charged with larceny by bailee by J. M. Smit, of the J. M. Smit Co., Fifth Ave and Masters Way, and was held for court in the sum of \$2,000 bail, which he furnished at the conclusion of the hearing. It is alleged that Rush, who had been in the habit of buying on memorandum from the Smit house, and who had been stopping at a down-town hotel, picked out some diamond eardrops and made a small deposit on the goods, agreeing to pay a certain amount of money at specified times. The charge was brought to recover the amount owing.

## New York Notes

J. P. Benjamin will soon open a New York office for the firm of Boss & Baldwin, Attleboro Falls, Mass.

Col. John L. Shepherd returned from a trip through the south in time to be present at the annual outing Saturday.

Charles N. Hancher, a prominent jeweler of Wheeling, W. Va., was a visitor in town during the past week. He was the guest of Wm. I. Rosenfeld at the annual outing of the Jewelers' 24-Karat Club.

T. A. Powers, captain of the 24-Karat Club baseball team, was unable to attend the outing held Saturday because of a sprained ankle, which he sustained a short time ago while away on a vacation.

Frederick Pieper, a jeweler and optician of Covington, Ky., who is also watch inspector for the O. & O. and L. & N. railroads, was a visitor at the office of THE CIRCULAR—WEEKLY during the past week.

Michael Levy, formerly eastern salesman for C. P. Goldsmith & Co., has associated himself with Leon Abels as a partner. The firm name will be Leon Abels & Co., who will manufacture gold and diamond jewelry at 37 Maiden Lane.

Julia Calton Parsons, widow of the late Lewis A. Parsons, of the old firm of Wheeler, Parsons & Hays, and of the Brooklyn Watch Case Co., died at Narragansett Pier, July 28. The services and interment were held at Windsor, Conn., on Thursday.

The Borough Hall clock, Brooklyn, stopped at 8.59 A. M. last Wednesday, and within a quarter of an hour several citizens had telephoned to the Bureau of Public Buildings. Superintendent J. M. Lawrence found that all sorts of things were wrong with the clock, and he hurriedly summoned a repair gang. The trouble with the clock will not interfere with the ringing of the bell at noon, however, as the 12 strokes are struck by hand and are not controlled by the clock.

Judge Hough in the United States District Court has granted discharges in bankruptcy to D. A. Kessler, formerly in the jewelry business at 226 Henry St. His liabilities are \$11,683. A discharge in bankruptcy was also granted to David Rothman, a watchmaker, 126 Ludlow St. The liabilities in this case are placed at \$2,824. The assets in the schedule filed by Mr. Kessler amounted to \$9,795. In the schedules filed by Mr. Rothman the assets consist of unsecured debts due on open accounts, \$796, and tools and personal property, \$85.

Judge Hough, in the United States District Court, last week, signed an order condemning as forfeited to the United States Government 37 cut diamonds said to be owned by Everard Stocker, a second-class cabin steward on the steamship *Zeeland*. The articles were seized for valuation by the customs authorities on June 19. They were valued at \$544.54, the foreign value of which is \$495, the duty being \$49.50. The stones were brought from Belgium, and it was claimed at the time they were seized that they had been smuggled into the port of New York. Henry L. Stimson, attorney for the Government, asked that an order be signed condemning the diamonds for forfeiture. This order has now been signed.

Mrs. Katherine Keeley, wife of John Keeley, employed by a New York jeweler as a gold chaser, met her death by accidental poisoning, Tuesday of last week, at her home in Brooklyn. Death was caused by taking cyanide of potassium. The husband used the poison in his business and constantly had it in his home, and after having been working with the solution during the previous evening left the cup in which it was contained on the dining-room table. Mrs. Keeley complained of being ill Monday night, and early Tuesday morning decided to take some brandy. In the dim light of the early morning she saw the glass on the table, and, believing it was empty, poured the brandy in the glass and drank the contents. The poison worked quickly and she soon fell dead.

It has been decided to hold an interstate congress of commercial travelers in this city on Aug. 11 and 15. This season is selected because at this time of year there are usually a large number of buyers from all parts of the country, and at this time local merchants have their own traveling men in the city to meet the visiting buyers. The official name of the congress is the Commercial Travelers' Inter-State Congress. It is to be held under the auspices of the United Commercial Travelers and the Travelers' Protective Union. Herman A. Metz is the president of the congress. A committee will be appointed to consider all plans suggested to help along prosperity, from which 12 will be selected. Then a vote will be taken and the plan decided upon as the most practical will be put into effect.

S. Kaplan & Co., 47 John St., are rejoicing over the announcement received last week from the Austrian Consul, stating that Samuel Zucker, the salesman who was in the employ of the firm for a short time, but who, on Feb. 26, left their office with samples valued at \$4,162 and did not again report, had been apprehended by the police on the streets of Tarnow, Austria. Soon after the salesman disappeared the firm had issued a large number of circulars describing the missing man, and giving a list of the jewelry claimed to have been taken, and it was by means of the picture on these circulars that the police of the Austrian city recognized the man. When arrested it is said that the man had in his possession a quantity of jewelry. He denied his identity when apprehended by the foreign authorities. The matter has been turned over to the Austrian Consul.

Henry J. Shulte, said to be a jewelry salesman living at 85 Flatbush Ave., was accused, last week, of having shot Charles W. N. Akberg, a Swedish interpreter of the Butler St. police court, in the interpreter's employment agency at 184 Atlantic Ave. Shulte was made a prisoner on the charge of felonious assault. Akberg's condition is not serious, and unless complications set in he will recover when his doctor finds the bullet. Shulte was championing the cause of a woman who owed the interpreter \$47 when the trouble which resulted in the shooting began. Magistrate Tighe, in the Adams St. police court, held Shulte, who pleaded not guilty, in \$1,000 bail.

Burglars broke open a safe belonging to Samuel Harris, proprietor of a general store at 5116 Fifth Ave., Brooklyn, last

week and escaped with jewelry valued at \$1,000 and \$500 in cash. The burglars entered the hallway to the store and proceeded down the cellar stairs. From the cellar, it appears, they worked their way into the back yard from a high cellar window; they then forced one of the back windows in the store and, when inside, rolled the safe containing the jewelry and some money into the back room, turned the safe upside down, bored holes on the under side and, inserting a jimmy, forced open the doors. The jewelry taken consisted of a man's diamond ring valued at \$200, a woman's diamond ring worth \$250, one pair of diamond earrings, \$450; a man's gold watch, engraved with the initials "S. H.," valued at \$75; a ladies' watch engraved "H. H.," \$65; an old-fashioned gold chain, \$10, and other jewelry valued at \$50. No arrests have as yet been made.

When Warren F. Foster, of Boston, was arraigned before Judge Warren W. Foster, of the Special Sessions Court, last Thursday, he pleaded not guilty to the charge of having stolen \$100 worth of property from Dr. Alfred Dupont on July 15, after gaining admittance to his house by saying he was Judge Warren Foster of the Special Sessions Court. When his attorney moved his dismissal on the ground that Foster had already been arraigned on the charge in special sessions, Judge Foster denied the motion and stated that on July 15 he was called to the telephone by a representative of the Casperfield & Cleveland Co., jewelers at 144 Bowery, who told him that a man representing himself to be Judge Foster had offered a check in payment for a diamond ring worth \$450. They asked if Judge Foster had an account at the bank on which the check was drawn. He told them that the man was an impostor, and before the man could be arrested he had fled, leaving both the ring and check.

Seizures by special customs men on the pier of the French line early last week, after *La Touraine* had docked from Havre, caused considerable excitement, and finally the baggage of the people involved was sent to the Appraisers' Stores for further examination. A special agent of the Government saw Mlle. Martha Salvaggi Brogère pass a gold watch to a man who had come to the pier to meet her, and as her explanation seemed unsatisfactory the watch was seized. It was a gold watch of French design, set with 54 rubies and valued at \$400. The woman explained that she had been requested to bring the watch to this country from Paris for a friend, where he had been having it repaired; that she had the watch in a dress suit case, and that when she arrived here she placed it in her handbag and thought there was nothing wrong in giving it to the man whom she met at the pier. She said that she had no intention to in any way defraud the Government. Special Customs Inspector Timothy Donohue found in the pockets of a man's coat carried by Mrs. E. M. Ford, of Baltimore, a half dozen gun metal watches, an automobile clock, a speed indicator, a repeating watch and several other small articles. When the trunks of Mr. and Mrs. Ford were examined another valuable watch was found, together with a diamond-studded

strap fob. This baggage was all sent to the Appraisers' Stores and is held for appraisal and examination.

J. C. Sawyer, Boston, Mass., is a visitor in town.

Frank Bush, a buyer from Oakland, Cal., is in town.

D. L. Auld, of the D. L. Auld Co., Columbus, O., is a visitor in this city.

John Kelso, Providence, R. I., was a visitor in the jewelry district last week.

P. McNichol, buyer for Miller & Paine, Lincoln, Nebr., is registered at the Hotel Latham.

Oscar Kind, buyer for S. Kml & Sons, Philadelphia, was in town a couple of days last week.

H. F. Byrnes, buyer for the Harris, Emery Co., Des Moines, Ia., is spending a short time in town.

Dr. E. E. Hale, manager for the Estate of O. M. Draper, North Attleboro, visited the local offices last week.

George W. White, of West, White & Christy, Pittsburg, Pa., was among the visitors in town last week.

Miss Rosma Mandelberg, daughter of A. Mandelberg, an Omaha, Nebr., jeweler, is visiting friends in the city.

W. S. Newton, buyer for Frederick & Nelson, Seattle, Wash., is at the firm's local headquarters, 16 E. 18th St.

Charles D. Lyons, president of the C. D. Lyons Co., Attleboro, was a visitor in the Maiden Lane district last week.

A. Goldstein, of L. Goldstein & Sons, is in this city from New Orleans, La., for a few days, buying Fall stock.

Mr. Sachs, of Wolfshelm & Sachs, 35 Maiden Lane, returned the first of the week from a two months' southern trip.

The stock of the bankrupt firm of Ashley & Merwin, 1327 Fulton St., Brooklyn, is being sold this week at public auction.

Henry Ottenberg, a local diamond dealer, and Ralph E. York, a silverware dealer of this city, are traveling in southern California.

Harry Booth, local representative for Sturtevant & Whiting, North Attleboro, Mass., is sojourning at Greenwood Lake for two weeks.

Mr. and Mrs. Fred. E. Sturdy are the happy parents of a girl baby, born last week. Mr. Sturdy represents the firm of J. F. Sturdy's Sons Co.

L. L. Ferguson, 170 Broadway, returned Friday from a trip to Europe by way of Canada. While in Canada he attended the celebration at Quebec.

Julius Kelm, in charge of the watch department at the store of I. Lewkowitz, 269 Sixth Ave., is spending his vacation on a yachting and fishing trip.

The Occidental Gem Corporation, Salt Lake City, Utah, has opened a New York office at 71 and 73 Nassau St., in charge of A. J. Bruneau, the secretary of the company.

Le Roy Thompson, New York representative of C. Ray Randall & Co., together with Mrs. Thompson, were the guests of Mr. and Mrs. C. Ray Randall, North Attleboro, Mass., recently.

Sidney Y. Ball, secretary of the Webb C.

Ball Watch Co., Cleveland, O., was a recent visitor in this city. He spent the greater part of his time with his wife and child at Montclair, N. J.

The Seth Thomas Clock Co. will move from 51 Maiden Lane to the second floor of the new Silversmiths building about Sept. 1, where the company will occupy large and commodious quarters.

Wm. H. Cotter has resigned his position, with Jacques Baszanger & Co., 108 Fulton St., and has accepted a similar position with Wm. Bandler & Co., for whom he will cover the far west, Canada and Mexico.

The S. Rose Co., Inc., 20 John St., recently disposed of 800 carats of Brazilian rough from the July shipments to several prominent diamond firms of this city. The stones averaged from one to eight grains.

Bernard Strauss, of Oppenheim & Strauss, 87 Nassau St., who was quite seriously injured recently by being hit by a batted ball, is improving rapidly and expects to be able to be in his office by the first of next week.

Lester Cerf, a watchmaker and clockmaker, 49 Maiden Lane, has purchased the entire plant and good will of the late Paul Friedman, 51 and 53 Maiden Lane, who carried on a general business of watchmaking and wheel-cutting for the trade.

John Frick has completed the manufacture of loving cups for the Altoona Cricket Club, to be used as prizes at the annual tournament, Aug. 24 to 29. He has also made loving cups for the Glen Ridge Golf Club, to be given as prizes later in the season.

Judson C. Address has resigned as secretary of C. G. Alford & Co., to start in the jewelry business on his own account, and will be located at 200 Broadway. Mr. Address began his career in the trade 30 years ago as southern traveler for C. G. Alford & Co.

At the recent convention of stationers the Dennison Mfg. Co. presented a unique novelty to the banquet in the shape of a Dennison tag as a cigar pouch in which were enclosed the cigars for the occasion. The pouch was made of regular Dennison tags portraying a scene in Franklin St., the home of the Dennison tags, as it appeared in 1859.

Charles J. Dieges, of the firm of Dieges & Clust, 23 Maiden Lane, who is also president of the Timers Club of New York, returned, Thursday, from England on the White Star steamer *Teutonic*. He was a member of the party of athletic officials unofficially representing the United States at the Olympic games, and is the first of the Americans who were present at the games to return. Mr. Dieges, in discussing the games, said that in spite of the poor management the Olympic games were crowned with success.

Abel King, of Emrich, King & Schorsch, 42 E. 14th St., was one of the passengers on the steamship *Belle Haven*, of the Sheephead and Rockaway line, and while landing at Rockaway Bay, Sunday afternoon at 4:30 o'clock, fell when the gang-plank broke and was thrown into the water. His hand was cut and his ankle injured, so that he will be unable to start on a trip, as he intended. The water at the point where the accident occurred is about 12 feet deep. There were in all about 25 people—men, women and children—who were

thrown into the water. All escaped without loss of life.

William Haaf, who is connected with a silver concern, was bitten, Thursday, by a pet bull terrier in his home in Maywood, N. J. Dr. Currie was called to examine the dog and found it had certain symptoms of rabies. He had it tied up and later it died. Dr. Freeland, of Maywood, removed the head, which was sent to this city, and word was received that signs of true rabies were found in the brain. Haaf left at once for the Pasteur Institute to start the treatment. His daughter also was snapped at by the animal, but the skin was not broken. Haaf will consult the experts in the institute as to the advisability of having her treated.

The season's merchants' reduced rates—a fare and a half for the round trip, effective under the certificate plan—will apply to the city of New York from the territories of the Western Passenger Association and the Southwestern Excursion Bureau. These rates have been arranged by the Merchants' Association of New York. The southwestern territories included consist of the States of Arkansas, Oklahoma, Texas and that part of Missouri south of the Missouri River on the Rock Island-Frisco lines. The rate has been granted by practically all the railroads in the west and southwest. The second series of dates, Aug. 15 to 19, with final return limited to Sept. 13, is now being arranged through the jurisdiction of the Western Passenger Association and the Southwestern Excursion Bureau. The Merchants' Association of New York will send to the retail merchants in Arkansas, Colorado, Iowa, Kansas, Minnesota, Missouri, Nebraska, North and South Dakota, Oklahoma, New Mexico, Texas, Wisconsin and the northern part of Illinois, circulars giving full particulars as to the dates, rates, conditions, etc.

A boy who gave the name of Marx Goldberg, 14 years old, and who said he lived at 342 Madison St., visited the offices of William Nicholson, manufacturing jeweler, 13 Maiden Lane, New York, Monday morning about 11 o'clock, and asked to be shown some gold lockets set with diamonds. He inquired for a heart-shaped ladies' locket valued at from \$10 to \$15, and said he wanted a small one with a large diamond. Mr. Nicholson, who was alone in the offices, showed the caller a tray containing several lockets, and noticed that the boy picked up a gentleman's locket and slipped it into his coat pocket, and after a moment said he guessed he would not make a purchase. The jeweler tried to interest him in other lockets to keep him waiting until a young lady clerk returned to the office, but the boy became suspicious and dashed for the door. The jeweler followed him to the stairway, shouting "stop that man." The boy was captured by Victor Sahlberg, the elevator starter, Lieutenant Monahan and Patrolman Daly were soon on the scene and the boy was taken back to the offices of the jeweler and later to the Children's Court at Third Ave. and 11th St. The sum of \$1.75 was found on him when he was searched. He told the officials that he intended to make a deposit on the locket and pay the rest later. The locket was found secreted on the first floor of the building. In the Children's Court, yesterday, Goldberg was found guilty and held for sentence.

## Newark.

One of the encouraging signs of the times is to be found at the chain shop of C. Chatwin, who has recently been hiring a number of skilled chainmakers.

Emil Abig, of Abig & Wagner, has recently returned from covering his circuit. He finds conditions slightly improved. His concern this season has added the making of lockets to its other lines.

Wm. F. Weber is no longer connected with the firm of Moore & Son, Inc. ring-makers, 22 Green St. Having resigned as treasurer and sold out his interest, he will devote himself to the manufacture of a popular line of jewelry.

F. J. Meurlender, of the Elm Mfg. Co., Liberty St., has taken temporary charge of the traveling work for his firm, his former salesman having taken another position. The company has been recently hiring back a number of the laid-off hands.

Jared W. Kimball, superintendent of the Children's Aid Society, caused to be arraigned in the First Precinct Court, last week, Emil Bruch, a jeweler, of 42 Warren St., on the charge of having failed to provide for his three small daughters since Feb. 25. Judge Howell fined the man \$50, and as he could not pay he was taken to a cell.

William Clement, of 66 Columbia St., and Robert E. Lee, of 462 Mulberry St., were locked up at police headquarters, last week, by detectives, charged with the theft of two unfinished gold chains, valued at \$25, from Charles A. Becker, a manufacturing jeweler, of 13-15 New Jersey Railroad Ave. Clement has been employed by Mr. Becker, who recently has been annoyed by a series of petty thefts.

A novel form of land and water craft has been completed by Anton Schmidt, a jeweler of 457 18th Ave., which represents the work of eight years done at odd moments. It is built strongly and neatly of wood and metal and weighs altogether about one ton. The affair is propelled by means of hand power; a large chain runs over toothed wheels carrying the power to an axle likewise arranged with projections. The body of the boat or carriage is built of cedar, strongly protected by brass and aluminum. Mr. Schmidt's idea in building the boat is to make a winter journey in it to Florida and the tropics.

Two well-dressed strangers, who claimed to be desirous of renting space to conduct a jewelry store, visited Maurice Facker, 327 Grand St., Jersey City, one day last week, and negotiated for the rental of part of his store. They said that they were a trifle short of cash, but that they had a considerable quantity of jewelry and asked Mr. Facker if he would advance \$150 on a gold watch and chain and a couple of diamond rings. This Mr. Facker obligingly did, and the men went away promising to return early the next morning. Mr. Facker visited a friend who was a jeweler to get his opinion relative to the value of the goods deposited with him, and found that the entire lot was worth about \$2. The police were notified and are looking for the bunco men.

The will of the late Herman Unger, formerly of the firm of Unger Bros., who committed suicide recently, was filed for

probate in New Brunswick, last week. The testator leaves to the executors \$50,000 to be held in trust, the income to be paid to his grandson, H. U. Clark. A like sum of \$50,000 is held in trust, the income to be paid to another grandson, Francis H. Clark. Upon their death the money is to be paid to their surviving child or children. The deceased also directed that his brother, Eugene Unger, shall have the option to purchase all of his stock in the Unger Bros. corporation at \$70 a share at any time within three years of the testator's death. All the remainder of the real and personal property, inclusive of his stock subject to the provisions above stated, is bequeathed to Miss Caroline Unger, a daughter. The deceased named as executors Mrs. Clark and Eugene Unger. The will is dated Feb. 19, 1908.

## Last Week's New York Arrivals

**THE CIRCULAR-WEEKLY** each day posts in its office a bulletin of the latest buyers visiting New York, which every member of the trade is cordially invited to copy.

**For the sum of \$10 (payable in advance), a daily list will be mailed or delivered during the Fall season (July 20 to Dec. 15), to the offices of those desiring this service.**

At a meeting of 16 local jewelers, held at the Neil House, Columbus, O., Wednesday night, a local branch of the Ohio State Retail Jewelers' Association was organized. Otto Lightner, Cincinnati, secretary of the State association, was in attendance. L. W. Lewis was chosen temporary chairman, W. S. Albaugh secretary and Frank Deinlein treasurer. A permanent organization will be formed at a meeting Aug. 10. By that time it is expected the membership roll will be swelled to 25 members.

W. H. Sparks, representing the Seth Thomas Clock Co., was in Toronto, Ont., last week.

Traveling representatives in Los Angeles, Cal., recently, were: William Lamb, Geo. H. Fuller & Son Co.; Robert E. Kiehl, F. H. Noble & Co.; Frank Laughlin, Battin & Co.

The following traveling representatives visited the trade in Lancaster, Pa., recently: Clinton F. Robinson, Schwarzkopf Mfg. Co.; Benj. J. Lewis, S. B. Champlin Co.; Joseph D. Varley, Allsopp Bros.; Mr. Hassenplug, Aikin-Lambert Co.

Traveling representatives who called on the Cincinnati, O., trade, during the past week, included: G. A. Vecek, Leo Cahn; A. L. Hancock, C. Sydney Smith & Co.; Eugene C. Holbrook, Ferdinand Bing & Co., Successors; Jerome W. Lissauer, Arnstein Bros. & Co.; Ed. Sinnock, Ehrlich & Sinnock; Mr. Mead, Barbour Silver Co.; L. W. Arnold, Western Clock Mfg. Co.; R. W. Sawyer, Shafer & Douglas.

The following traveling representatives called on the trade in Kansas City, Mo., during the past week: W. S. Metcalf, Plainville Stock Co.; I. A. Levis, L. Adler & Son; Maurice Kohn, Silbermann, Kohn & Wallenstein; George Goldberg, Untermeyer-Robbins Co.; K. D. Yeaton, S. Sternau & Co.; James C. Haslam, John Holland Gold Pen Co.; Harry E. Farquharson, E. D. Gilmore & Co. and E. A. Potter Co.

Traveling representatives who visited Omaha, Nebr., during the past week, included: L. E. Dickson, Adelphi Silver Co.; Max Meyer, Jr., Scofield & De Wyngaert; D. N. Weil, Electric City Box Co.; George H. Thomas, Powell & Co. and Scharling & Co.; representatives of Shepard Mfg. Co. and Edward Todd & Co.; Alex. M. Thant-hauser, Wolfsheim & Sachs; E. B. Frank, Pairpoint Corporation; Lew Cowen, Ludin Novelty Co.; W. S. Dudley, International Silver Co.; W. S. Metcalf, Plainville Stock Co.

Among the traveling representatives who, recently, visited Pittsburg, Pa., were the following: Millard E. Heise, Langfeld Bros. & Co.; C. B. Bartlett, Whiting Mfg. Co.; Walter S. Strauss, Jacob Strauss & Sons; Louis A. Blackinton, W. & S. Blackinton Co.; M. F. Loomis, C. Sydney Smith & Co.; W. H. Race, Meriden Silver Plate Co.; Mr. Pierce, T. I. Smith Co.; Fred H. Felger, F. & F. Felger; F. C. Winship, H. C. Fry Glass Co.; Mr. Levy, S. Levy & Son Co.; Joseph Phillips, Hipp. Disheim & Bro.; Lucien Rockwell, Poole Silver Co.; M. E. VanBergh, VanBergh Silver Plate Co.; Mr. Ford, Ford & Carpenter; Jack Thompson, J. B. Bowden & Co.; L. M. Frank, Buffalo Jewelry Co.; Col. John L. Sheperd, Keystone Watch Case Co.; M. Decker, Plainville Stock Co.

The following traveling representatives were in Savannah, Ga., recently: Charles Marx; F. W. Cornell, J. A. & S. W. Granbery; Harry A. Bachman; C. M. Levry, A. Joralemon & Son; Arthur Totten, Sansbury & Nellis; Oscar S. Schmidt, Moore & Son; O. C. Bugh, Libbey Cut Glass Co.; A. Holzinger, Fred. Kaufman & Co.; Julius G. Bick, Adolph Goldsmith & Son; E. M. Sachs, Wolfsheim & Sachs; V. A. Picard, Pryor Novelty Co.; A. M. Haring, Carter, Howe & Co.; M. L. Barnard, Larter & Sons; William G. Andrews, Allsopp & Allsopp; F. S. Abraham, Cohn, Abraham & Co.; A. Eastwich Wood, S. B. Champlin Co.; William McGill, William B. Kerr Co.; B. J. Clark, La Pierre Mfg. Co.; Mr. Henderson, Crane & Theurer; Henry Cowan, E. A. Cowan & Co.; Joseph Nicholas, Wm. Bens Co.

C. R. Damuth is erecting a two-story brick block at Redfield, S. Dak., where he will conduct his business.

The firm of Petersen & Berg, Ortonville, Minn., conducting business as the Crescent Jewelry Co., has dissolved, Mr. Berg having retired. Mr. Petersen will continue the business.

**E**NTERPRISING and successful jewelers everywhere are pushing the sale of some individual line of watches which they believe to be superior to all others, and upon which they can also make a satisfactory and justifiable profit.

This explains the growing demand for **ILLINOIS WATCHES**, in 0, 12, 16 and 18 sizes, by increasing numbers of leading jewelers throughout the United States.

If you are not familiar with the superior quality of—and advantages gained by handling—**Illinois Watches**, it will mean reputation and dollars for you to investigate.

Every one fully guaranteed.

Price List sent on application.

CHICAGO, WEDNESDAY, AUGUST 5, 1908.

No. 1

### Chicago Notes.

S. J. Son is on a vacation to Ottawa Beach.

"Joe" Banman is on a vacation to northern Michigan.

F. M. Drummond is on a vacation to northern Michigan.

Dan Axman now represents the Art Metal Works in Chicago.

Tom Brown, Quincy, Ill., was here for a few days last week.

Sol. Hess has returned from an outing among the northern lakes.

A. J. Bloomfield, Winnipeg, Man., was here last week, buying his Fall stock.

"Ike" Richter, with Doran, Bagnall & Co., is on a trip through the middle west.

H. E. Cobb, representative of Daggett & Clap Co., is making a short western trip.

W. E. Clow, accompanied by his wife and son, are on a visit to the principal eastern cities.

C. B. Barker, with Benj. Allen & Co., started, last week, for Minnesota and Wisconsin.

Arnold McCabe, city salesman for the Schrader-Wittstein Co., is the father of a baby girl.

Leo Stein has returned from a week's encampment of the First Cavalry, Illinois National Guard.

J. J. Freeman, Toledo, O., passed through here on his way home after a two weeks' vacation in Wisconsin.

Max Gross, diamond broker, who has been confined to a hospital for some time, is now at business again.

Lewis Waldecker, representing the F. W. Drosten Jewelry Co., St. Louis, Mo., was a recent visitor in Chicago.

Mr. Hoyt, of the Hoyt Jewelry Co., St. Louis, Mo., stopped over here, last week, on his way home from the east.

Alfred Judson, of A. Judson & Co., leaves, this week, for Turtle Lake, Wis., where he will spend two weeks in fishing.

Esther Jalonaek, daughter of M. L. Jalonaek, the jewelry auctioneer, is engaged to be married to Arnold Pacyna.

Clarence J. Roehr has returned from a visit to the factory of the Bassett Jewelry Co., which he represents in the west.

Wm. C. Ulrich, who recently opened a jewelry store at 995 Milwaukee Ave., has discontinued business at that address.

R. W. Morris, local manager for R. Wallace & Sons Mfg. Co., has returned from a trip to the factory at Wallingford, Conn.

C. H. Williams, Condon, Ore., stopped here a day on his way to attend the convention at Cincinnati, the first week in August.

N. F. Wechter, buyer for Stein & Ellebogen, is spending his vacation at White Lake, Mich. He will return about Aug. 15.

M. L. Robbins, vice-president of the Untermeyer-Robbins Co., and Geo. Goldberg, representing the latter corporation, were here last week.

W. T. Hixon, El Paso, Tex., has been taking the baths at Mt. Clemons, Mich., for sciatic rheumatism. He returned to El Paso last week.

David Lochman, of Lochman Bros., Springfield, Ill., stopped here a few days last week on his return from an outing at Waukeshah. He was accompanied by his wife and baby.

James Donnelly, western salesman for Sproehle & Co., has sufficiently recovered from his automobile accident to be out of the hospital. He will be back on his territory by Aug. 10.

Walter S. Tompers, representative here for the Floyd-Horsman Co., has just returned from a trip northwest. He leaves, this week, for a trip east, and will visit the factory at West Somerville, Mass.

Wil Andersen, of the Juergens & Andersen Co., has returned from a month's vacation in northern Michigan. Will F. Juergens, of the same corporation, is spending a month with his family at Black Lake, Mich.

Chas. J. Jacobs has returned from a vacation trip in Wisconsin. Mr. Jacobs leaves, this week, to be gone about three weeks on a visit to the factory of the Knickerbocker Silver Co., Port Jervis, and eastern points.

August Johnson, of August Johnson & Co., fountain pen manufacturers, started, July 31, for a two weeks' outing at the Dells of Wisconsin. Mr. Johnson's wife is now slowly improving in health, and is on the road to recovery.

Nest No. 7, Noble Order of Ku-Kus, was installed here Wednesday, July 29, with a charter membership of 14. The following officers were elected: King, A. G. Larson; Prince, B. T. Roberts; Chief, Harry Palmer; Guard, L. W. Parke; Keeper of Kash, Howard Price; Scratcher, W. R. Stevens.

J. J. Kinnan, former teller of the Savings Bank, Detroit, embezzlement from which institution resulted in his serving five years in the penitentiary, was recently arrested as the thief who smashed a plate glass at Pea-

cocks and stole a quantity of jewelry. Kinnan was bound over to the September Grand Jury in \$3,000 bonds.

The following were among the buyers in this city during the past week: S. Bernstein, Des Moines, Ia.; L. Singer, of Younglove & Singer, Peoria, Ill.; A. W. Thomas, Mineral Point, Wis.; A. L. Howard, Beloit, Wis.; J. J. Freeman, Toledo, O.; A. Marks, Jr., Lawrence, Kans.; W. E. Schmidt, of Gmelich & Schmidt, Booneville, Mo.; Wm. Arnold, Jr., and wife, Ann Arbor, Mich.; G. A. Brock, of Brock & Feagans, Los Angeles, Cal.; D. Lochman, Springfield, Ill.; Thomas Brown, Quincy, Ill.; Fred Overstreet, Paxton, Ill.; C. H. Williams, Condon, Ore.

The offer of 27½ per cent. net in full settlement to the creditors of Jones & Dreyer came up in the United States District Court here, July 31. As no objections had been filed, the offer was technically confirmed, and only needed the sanction of Judge Landis, which was secured by sending a special emissary to him at White Lake, Mich. The money is in the custody of the court, and as soon as Referee Wean returns from his vacation the checks will be mailed to all creditors. Jones & Dreyer are now in possession of their business as heretofore. The business started up a few weeks ago by Mr. Dreyer in the Chicago Trust & Savings Bank building will probably be later consolidated with Jones & Dreyer.

### Detroit.

J. L. Chapman, Ann Arbor, visited the wholesale houses last week.

John B. Godfrey, who formerly traveled out of Detroit, was a visitor here, last week.

E. W. Krainbrink, well-known in the jewelry trade, is spending his vacation near Belleville, Ont.

G. W. French, who has been selling out the Hellerich stock at 39 Michigan Ave., which he purchased at bankrupt sale, is ill at his home, in Ionia.

Funeral services of the late Peter R. Stocker were held Friday morning from his late residence. The funeral sermon was preached at St. Mary's church at 9 A. M. Mr. Stocker was formerly connected with C. A. Berkey Co., but left here the first of the year to accept a position in Iowa. The deceased was only 22 years of age.

ROCKFORD :: :: ILLINOIS

**Cincinnati.**

Hess Henle, of the M. Schwab Jewelry Co., and his wife, have gone to Atlantic City for a few weeks.

Harry Pelzer, connected with Albert Sauer, Newport, Ky., is enjoying a western trip, including Yellowstone Park.

S. C. Bingham, Vine St., is convalescent after an operation for appendicitis and expects to resume business this week.

Arthur Catchadall, with the E. & J. Swigart Co., has left for Boston, Mass., where he will spend two weeks with his parents.

W. S. P. Oskamp, of the Oskamp Jewelry Co., and family, have left for northern Minnesota, where they will remain through August.

Albert H. Rolef, of Lockland, O., was in the city the past week, having just returned from a pleasure tour including the Rockies and other western points.

Eduard Schutte, bookkeeper for A. & J. Plaut, was married, July 30, to Miss Vera Grimmelsman. The couple are spending their honeymoon in the east.

Willard Howe, of the Loring-Andrews Co., and his family, are enjoying a Summer's outing in Nova Scotia. Loring Andrews, of this company, is making his annual visit abroad.

The Gustave Fox Co. has just received a patent for its new official emblem of the B. P. O. E., which is considered one of the most beautiful and unique pieces of emblem work ever turned out.

Many friends in the trade have extended to C. W. Lucius, of the Frank Herschede Co., their sympathy in his bereavement, due to the death of his wife, July 25, which occurred at their home in Hartwell, O.

Burton Fox, of Fox Bros. & Co., has arrived at Amsterdam and reports business there still quiet. Mr. Fox has made one shipment of goods to his company. George Fox, of this house, who has been abroad some time, sails for home Aug. 20.

J. C. Courtner, formerly with the E. & J. Swigart Co., has opened an office with Joseph Mehmert as watchmaker. Mr. Courtner takes up the business formerly done by Julius Shaepfi, deceased, and with his knowledge of the work is fully equipped to do full justice to his customers.

L. Gutmann & Sons have just received a second shipment from Japan. This one consists of Japanese trinkets used on festival days in that country. Many of them are made for advertising purposes and show the greatest skill and intelligence on the part of the Jap worker as well as ingenuity in this particular feature in business advertising.

A photograph was received the past week by the local police department which was recognized as that of Will Chandler, who was arrested here in November, 1901, and sent to prison on the charge of breaking the show window of the Duhme Jewelry Co.'s store and stealing \$7,000 worth of diamond jewelry. Chandler is colored and is now under arrest at Milwaukee, Wis., for smashing a jewelry store window in that place. He gives his name as Bert Davis. His record will be sent to the Milwaukee police.

The Ku-Kus of the local nest met July 31 at the Odd Fellows' Temple, when a class of 35 applicants were initiated. A. L.

Thoma, Piqua, O., the organizer of the Ku-Kus, and Philip Horr, of Aurora, Ind., were present, the latter being made a member. It is expected a class of about 300 will be initiated Aug. 5, during the convention. A committee consisting of D. J. Gutmann, William Fink, Charles Esberger, Mr. Freisens and Walter Schildman have charge of the Ku-Kus banquet on the evening of Aug. 5.

Out-of-town jewelers here the past week buying stock included: C. H. Creighton, Morrow, O.; J. D. Ward, Rising Sun, Ind.; Frank Emmerring, Hillsboro, O.; John E. Beck, Martins Ferry, O.; James A. Herlihy, Chillicothe, O.; Mr. Owens, of Delph & Owens, Livingston, Ky.; Mr. Petrovitzky, Dayton, O.; T. C. Lchman, Dayton, O.; R. L. Andrews, Lessburg, O.; Charles F. Gray, Dayton, O.; E. E. Stutic, Osgood, Ind.; H. C. Reed, Blanchester, O.; W. C. Huddleston, Butler, Ky.; Richard G. Tafel, Louisville, Ky.; William J. Martin, Louisville, Ky.; Owen Sherwood, Falmouth, Ky.; E. Scott, Batavia, O.; E. P. Williams, Olive Branch, O.; Mrs. R. Kupferschmidt, Lawrenceburg, O.

The "Taft notification demonstration" was not without some representation of the jewelry trade. S. O. Bigney, of S. O. Bigney & Co., had the distinction of being a member of the notification committee as delegate from Massachusetts. During the exercises which took place Mr. Bigney presented to Mr. Taft a large oil painting, the gift of Massachusetts, the subject being Mr. Taft himself in his Siberian fur costume, which he wore during his travels in that country. Frank Smith, formerly connected with G. Smith & Sons, Parkersburg, W. Va., but now postmaster at that place, was here as representative of his district. In the parade could be seen Emil Rossier, Martinsville, Ind.; Capt. D. A. Lamb, Wilmington, O., and T. C. Linsey, Dayton, O. Richard G. Tafel was identified with the Louisville, Ky., Owl Club, and Alf. Williams, of the Bancroft Bros. Co., with the Columbus Glee Club. The Glee Club was also assisted by some local talent—William Pflueger and J. B. Osthoff, of Joseph Noterman & Co. James E. Holland, of the John Holland Gold Pen Co., was quite busy the past week entertaining his old Harvard chum, Frank Hitchcock, who has received about as much public notice as Mr. Taft himself during the last few months. John A. Holland, Jr., of the John Holland Gold Pen Co., lined up with the Yale Club. Harry Gilsey, of S. H. Gilsey, did considerable work as one of the boat committee which entertained Mr. Taft and his party with a river ride during the display of fire works from Eden Park in the evening of July 28. In this assembly were: Harry Gilsey, of S. & H. Gilsey; William Pflueger, of Joseph Noterman & Co.; Jacob Dorst, of the Dorst Co.; James E. and John H. Holland, of the John Holland Gold Pen Co.

E. J. Youngquist, Centuria, Wis., recently visited his parents in Minneapolis.

The post office and general store of F. B. Core, Sedalia, O., was broken into on Tuesday night of last week, when jewelry and a lot of other merchandise was stolen. There is no clue.

**Kansas City.**

Margaret Patrick, with the Meyer Jewelry Co., has just returned from her vacation.

Florence Blunt, with the Ward & Crellin Jewelry Co., has left for a vacation trip to Colorado.

Sam Bloom, traveling representative of the Meyer Jewelry Co., paid the house a visit last week.

Wm. Terwilliger, with the Meyer Jewelry Co., is spending his vacation at Excelsior Springs, Mo.

Chas. Manor has just concluded a sale at Lexington, Mo., where he closed out the K. & C. S. Ludwigs stock.

The Hassig & Krieke Jewelry Co. has secured Wm. Stephen, Providence, R. I., to take charge of its engraving department.

Ed. Parnell, watchmaker for Margolis & Metzger, has the sympathy of the trade owing to the recent death of his baby girl.

Ernest Nelson, with the Porter & Wiser Jewelry Co., left, last week, for a vacation trip, which he will spend along the Iowa lakes.

Emil David has moved his watch repairing establishment from 311 Missouri building to the same rooms occupied by the Green Jewelry Co.

Frank Winkler, Kansas City, Kans., is starting a branch store on Central Ave., in that city, which will be in charge of his son, Alfred Winkler.

George Krieke, formerly of the Hassig & Krieke Jewelry Co., has opened a shop at 208 Missouri building, where he will do engraving for the trade.

W. E. Crellin, of the Ward & Crellin Jewelry Co., was called to Chillicothe, Mo., last week, on account of the serious illness of his father, who is 90 years of age.

J. R. Mercer and wife left, last week, for a vacation trip to the east and Canada. Most of their time will be spent in Canada, at some point where the fishing is found best.

Dr. J. A. Mosher, of the jewelry firm of J. A. Mosher & Son, Burlington, Kans., passed through this city, last week, while on his way to Excelsior Springs, Mo., to spend his vacation.

C. P. Kionka, who came to the city, about a week ago, to visit his brother, E. Kionka, was taken seriously ill, and for five days suffered from fever. He is able to get around again now.

C. B. Norton, president of the C. B. Norton Jewelry Co., left, last week, for a vacation trip of a month to Northern Wisconsin. He is accompanied by Mrs. Norton and Miss Edith Norton.

The following out-of-town jewelers called on the trade last week: J. M. Mitchell, Red Rock, Okla.; R. R. Smithers, Cameron, Mo.; Walter Sperling, Seneca, Kans.; H. L. Morrison, Pittsburg, Kans.; B. H. Jacobs, Atchison, Kans.; T. G. Norris, Florence, Kans.; Mr. Sprague, of Sprague Bros., Ada, Okla.

Ezra Nuckolls, Eldora, Ia., has just made extensive improvements in the exterior of his store.

Claude W. Davis, Des Moines, Ia., has moved into new quarters over the Wilmer clothing store.

## Los Angeles.

A. Lord, Goldfield, Nev., is spending some time here.

Hambright & Walsh have added a line of cut glass to their stock.

C. A. Love, with Smith Bros., Visalia, was here a few days ago.

C. M. Henkel, Bisbee, Ariz., is spending some time here and at Catalina Island.

H. L. Gruber has taken a position in the jewelry department of the E. W. Reynolds Co.

Paul D. Walsh, of Hambright & Walsh, has returned from his vacation, spent in the Yosemite Valley.

The office force of the Carl Entenmann Jewelry Co. is taking an inventory of the stock of the concern.

A. E. Morro moved, Aug. 1, to his new location at 400 S. Broadway, the store formerly occupied by Brock & Feagans.

W. A. Wheeler, H. L. Seaman and Chas. Schwenck, of H. F. Wallace's wholesale store, have returned from a short outing at Long Beach.

Painters are at work on the exterior of Montgomery Bros.' new store at 4th St. and Broadway. The interior decorations are nearly completed.

Ed. Turner, of the E. W. Reynolds Co., has returned, with his wife, from a pleasant vacation spent at Camp Rincon, in the San Gabriel Valley.

W. W. McCausland, Oxnard, accompanied by his wife, passed through this city on his way home from Long Beach, where he has been spending a short time.

Chas. Snell and Harry Lewis, of the optical department of the E. W. Reynolds Co., have returned from a short fishing trip along the Pacific Coast in a gasoline launch.

S. Conradi, of the Simon Conradi Co., who has for some time past had an office in the Bryson block, on Spring St., has been ill for a week past and unable to visit his office.

Philip Hoeffler, watchmaker and salesman with George H. Curry, is spending some time in San Luis Obispo and contemplates a visit to Guaymas, Mex., where his mother resides.

The Southwest Turquoise Co. has been enlarging and improving its new quarters on Spring St. and has put a number of additional men at work in its factory on Broadway.

A. Lubeck, formerly doing a jewelry and loan business on E. 1st St., under the German-American Bank, has removed to 448 S. Broadway, opening business at the new location, Aug. 1.

Kyle McBratney, El Centro, Imperial County, finding the climate there too torrid for comfort, has closed his store until Sept. 1, and is spending the Summer in this city and vicinity.

George Marcher, of the Pacific Gem Co., has just returned from a successful business trip of three months' duration through the east, including New York, Boston and the larger cities between the two coasts.

Miss Nina Richdale, who is associated with her father, C. C. Richdale, in the jewelry business in Santa Barbara, passed through this city, a few days ago, on her way to Coronado Beach, where she is taking a vacation.

M. A. Goldman has taken possession of

the store recently occupied by the Angelus Jewelry Co., 217 S. Spring St., and announces his purpose to conduct a first-class jewelry business there. J. Macowsky, proprietor of the Angelus Co., closed business on Aug. 1, and went to San Francisco.

Field & Walton have been exhibiting in their window, 348 S. Broadway, three magnificent opals, one an Australian opal, said to be the finest in the world, and valued at \$2,500; another a black opal, also said to be the finest of its kind and valued at \$1,500, and the third a very large and brilliant Mexican fire-opal.

Edward Mather, who was in business for some time at Downey, but who moved some time ago to San Pedro, was arrested, last week, on a charge of misdemeanor embezzlement, preferred by George Ralphs, of this city, who alleged that Mather had sold a \$25 watch left with him to be cleaned. Mather was released on \$50 bonds to appear for trial, Aug. 10. The defendant maintains that Ralphs left the watch with him to repair, and after keeping it a year, he notified Ralphs that unless it was called for in six months' time it would be sold to defray the repair bill.

A large advertisement in the local papers recently announced that the business conducted under the name of the S. Conradi Co., must be closed within five days, as the fixtures had been sold and the store rented. Cards in the windows announced reductions of 20 per cent. on watches and jewelry and 33½ per cent. on cut glass. Simultaneously Mr. Conradi announced, as he has announced heretofore, that he had no interest whatever in the concern. It is understood that the balance of the stock not sold was returned to Luckenbach & Co.'s store. The Conradi location will no longer be used as a jewelry store.

## San Francisco

F. E. Jenkins, Santa Paula, was a visitor in Fillmore, last week, on his way back from a fishing trip in the mountains.

J. H. Hoback, Riverside, has left for the San Jacinto lumber camp near Idyllwild, and during his absence F. W. Siefkes will assume charge of the store.

Radke & Co. are making some improvements in their building at Bush St. and Van Ness Ave. and will remain there as long as business will warrant their stay.

The gem mines at Rincon, recently purchased by Wilke & Moore, Palo Alto, are now being thoroughly worked, after having been closed during the past year owing to the illness of the former owner, Mr. Mack.

The store of A. Arita, a Japanese jeweler of San Jose, Cal., was entered one night last week by burglars and several trays of jewelry and gems were stolen. A portion of the loot was left in front of a residence across the street with the evident purpose of throwing the officers off the trail.

An accident in the store of A. C. Corwin, Merced, one day last week did damage to the extent of over \$1,000. The ceiling, due to some faulty construction of the building, suddenly gave way and Mr. Corwin, who was in the store at the time, barely had time to escape into a back room.

The show cases and cut glass were entirely destroyed and the stock generally damaged.

Col. A. Andrews, of the Diamond Palace, is making no preparations for a removal from the present location and will not do so until the down-town district is fairly well settled again. There is no likelihood of his going back to Montgomery St., because conditions there have changed so very much. The Russ Hotel building has been changed into an office building and the hotel district has moved up Market St.

C. O. Johnson, known in San Diego as "Carbonate Ore" Johnson, has just been indicted by the federal grand jury, which investigated the charges against him. Johnson is at present enjoying his liberty under \$1,000 bonds furnished by a security company. The indicted man conducted an alleged gem cutting business here for some time, during which he advertised extensively. He claimed to furnish and cut a genuine hyacinth for \$1.50. It is charged that Johnson, after receiving an order, would supply his patron with a bogus stone not worth 30 cents. His partner in business, becoming suspicious of his methods, notified the local post office authorities, with the result that he was arrested on the charge of using the mails to defraud.

With the removal of Hammersmith & Co. to the down-town section comes the news that the W. K. Vanderslice Co. is looking for a location near by, and that it is the intention of this firm to leave its Van Ness Ave. quarters as soon as the coming holiday season is past. Shreve & Co. are working steadily on the interior of their store at the corner of Post St. and Grant Ave., and expect to occupy this about March 1, when the White House and other high-class stores will be in their new buildings. The coming holiday season will witness a decided division of trade as far as the different retail districts of the city are concerned, and a fair portion of it will be done in the old district. The great removal from Van Ness Ave. is scheduled for next Spring, and by this time next year it has been predicted that but few high-class stores will be found in business there.

## Pacific Coast Notes.

George Blakeslee, Tonopah, Nev., has moved his store in that city to the Tonopah block.

The store of Narciso Mondragon, Santa Fe, N. Mex., is being enlarged and renovated.

A package of diamonds and jewelry valued at more than \$9,000 is missed by the agent of the Wells-Fargo Express Co. at Goldfield, Nev.

J. Van Klootwyk, who was recently arrested in Canada and brought back to Butte, Mont., on a charge of using the mails to defraud, is now on trial before the Grand Jury. It is alleged that Van Klootwyk sent large orders to jewelry firms in the east and in payment enclosed checks which proved to be forgeries.

Michael Madison and Thomas Shields were arrested in Joliet, Ill., about a week ago, on a charge of selling bogus jewelry. The men vigorously opposed arrest and fought desperately, but were finally subdued.

### Indianapolis.

E. M. Craft, of the A. P. Craft Co., spent last week on a business trip through southern Indiana.

J. Henry Smith, of the J. Henry Smith Jewelry Co., Greenfield, is convalescent after a six weeks' illness from typhoid fever.

Ikko Matsumoto has engaged a cottage at Lake Manitou for the season and will go there each week from Friday until Monday.

S. M. Lee has taken a position as watch repairer with George S. Kern. He was formerly employed by various retail jewelers in Cincinnati for a number of years.

A vacation trip to New York, Boston and other eastern cities is being made by Allen Pickett, a watch maker employed by George S. Kern. He will return next week.

The Burton Jewelry Co. has closed out its stock at 11 N. Meridian St., and will conduct its retail business at 58 Monument Pl., retaining the old location for a repair shop.

The Ontario Silver Plate Co., Muncie, has resumed operations with a full force of 250 men. The company recently suffered a loss by fire, but necessary repairs have now been made.

At the corner stone laying ceremonies of the Y. M. C. A. on Sunday, July 26, President John N. Carey used a silver trowel with a rosewood handle made especially for the occasion and presented by Charles B. Dyer, of the Arts and Crafts Shop.

At the reorganization of the Supreme Lodge of the World, Loyal Order of Moose, last week, Fletcher M. Noe was named as supreme prelate of the order. Mr. Noe was one of the founders of the order, which has just been incorporated.

H. E. Cohen, of H. Cohen & Sons, is one of the principal stockholders and has been elected vice-president of the Dixie Amusement Co., which was organized last week. The company has taken a long lease on the Gaycty Theater, a former burlesque house, and will conduct a talking picture show.

J. P. Mullally, president of the Indianapolis Retail Jewelers' Association and a candidate for the presidency of the National Retail Jewelers Association, left Sunday for Cincinnati, where he opened headquarters at the Hotel Sinton. H. H. Bishop, first vice-president, and J. H. Reed, a member of the executive committee, of the Indiana Retail Jewelers' Association; George S. Kern, secretary of the local association, and H. A. Winn and F. L. Bryant, local jewelers, will aid him in his campaign in Cincinnati.

A unique piece of fraternal jewelry was turned out last week by Ikko Matsumoto. It was a Shriners' chain and emblem with the various symbolical meanings of the emblem faithfully portrayed. The chain, of rope design, was of silver and about 16 inches long, the clasp being studded with a large Indiana fresh water pearl. Just above the pendant was a small flower of coral while the scimitar was of beaten gold with a tiger's head at the hilt. The pendant, a crescent, was formed from two genuine tiger claws, in the center of which was an Arab's head carved on sardonyx.

### SOLE

RUDOLPH & SNEDEKER

65 Nassau St., New York

AGENTS

### Pacific Northwest.

The store of S. Engstrom, Seattle, Wash., was entered one morning last week, although a policeman was on duty in front of the establishment, and about \$400 worth of jewelry was stolen. An entrance was effected by prying open a rear window with a jimmy.

The City Council of Portland, Ore., is requiring a franchise for the erection and maintenance of clocks on the sidewalk in front of stores in lieu of the special permit, which was declared illegal a short time ago. The first franchise has been given to the G. Heitkemper Co., 286 Morrison St.

The latest developments in the case of Fred Hamilton, former club member and athlete of Portland, Ore., who admits that he robbed three stores there last week, show that Hamilton was not working alone, but that he had an accomplice. It further develops that the three stores actually entered were not the only ones that had been marked for robbery, but that one other at least was on the list and an attempt had actually been made to enter it. An Italian bootblack is suspected of being Hamilton's confederate, and his arrest is expected at any time.

Wanted in Canada for the theft of diamonds valued at \$1,350, which were stolen from Jeweler Jacob Fleischman, Cranbrook, B. C., Arthur H. Clute and his wife are under arrest in Portland, Ore. It is doubtful whether the Canadian authorities will be able to recover many of the stolen diamonds. Before the couple had been searched an attorney was allowed to visit them and was given a large quantity of jewelry to care for, and it is a question whether this can be recovered, as he holds it for his clients. The Clutes while in Cranbrook had been in the habit of purchasing extensively from Mr. Fleischman, who, last April, at their request, sent a tray of gems to their apartments for inspection. That was the last he ever saw of the jewels.

### St. Louis.

N. L. Strauss, of Jacob Strauss & Sons, New York, was here last week.

Ralph W. Wilson, of the Eisenstadt Mfg. Co., is taking a vacation in the Michigan resorts.

F. L. Jaccard, of the Bauman-Massa Jewelry Co., is going to Texas next week. S. H. Bauman, head of the firm, has returned from his month's vacation in Wisconsin.

Among the out-of-town jewelers here recently were: J. E. Mitchell, Ft. Worth, Tex.; C. L. Glines, Harrison, Ark.; C. W. Scanlan, Indianapolis, Ind.; S. Berger, Glen Carbon, Ill.; M. Watson, Harrisonville, Ark.; Al. Grueber, Edwardsville, Ill.; G. W. Killum, Pittsburg, Kans.; C. F. Gash, Fredericktown, Mo.; J. Krumray, Belleville, Ill.; W. H. Wheeler, Palmyra, Ill.

Miss Elma Rumsey, daughter of one of the wealthiest families in St. Louis, has cabled to friends here that she will be married, next week, to Pierre Carter, one of the largest jewelers on the European Continent. The Carters have a branch in London, and recently opened a store in St. Petersburg. It was on one of Miss Rumsey's numerous trips abroad with her family that she met the wealthy young jeweler.

L. Yossun, formerly with the Remoh Jewelry Co., has bought out the store of Auguste Baujot, at 2237 S. Grand Ave. Baujot is the wealthy Frenchman whose trunk full of jewelry and jewelers' tools was seized several weeks ago just as he was starting for Europe. In disposing of his shop, Baujot had gotten Daniel G. Golding to aid him. Golding claimed a commission and got out an attachment for the trunk.

### Omaha.

Axel Hohnberg, with S. W. Lindsay, is taking his vacation.

C. B. Brown and wife have returned from an eastern trip.

Carl J. Schroeder, Manning, Ia., is visiting friends in this city.

Fred Brodegaard has just returned from a trip to St. Joseph, Mo.

Albert Edholm is at Lake Andrew, Minn., enjoying a short vacation.

Jno. J. Henrikson has returned from a fishing trip to Center City, Minn.

S. V. Gustafson left, last week, for a two weeks' outing at Arlington.

Louis A. Borsheim, Sr., and wife, have returned from a short stay at Sulphur Springs, Ark.

Miss Kerr, with A. Mandelberg, was at home for a few days of last week, owing to the extreme heat.

L. A. Green, Uehling, Nebr., is confined in St. Joseph's Hospital, where he recently underwent an operation.

Dr. Alice Goldsbury, Craig, Nebr., was operated on for appendicitis at the Swedish Hospital in this city last week.

Oscar Pihl and Albert Winter, with S. W. Lindsay, have returned from their vacations, which were spent in the State.

Geo. Williams, manager for the Bennett Co.'s jewelry department, left last week for the east, including Boston, New York and Washington.

A. Mandelberg supplied the solid gold watch which was presented, last week, by friends in this city to Carl Reiter, manager of the Orpheum Theater.

The following out-of-town jewelers were in this city during the past week: H. D. Howard, Fairfield, Nebr.; Alfred H. Hastings, Arcadia, Nebr.; A. G. Kupka, Schuyler, Nebr.; Sam Shean, Lincoln, Nebr.; Jno. Wehring, Missouri Valley, Nebr.; Jno. Ring, Hooper, Nebr., and E. J. Magle, Rawlins, Wyo.

### Milwaukee.

E. T. Warnke, president of E. H. Warnke & Co., has returned from an automobile tour and fishing trip in Waushara county, Wis. He visited several retail jewelers en route and reports that the jewelry trade about the State is in a prosperous condition.

Franklin Thomson, secretary of the Wisconsin Retail Jewelers' Association, made a recent visit to Berlin, Wis., and engaged in conference with Secretary Peck, of the Wisconsin Retail Hardware Dealers' Fire Insurance Co. Many valuable suggestions and ideas were obtained by Secretary Thomson for the organization of the Jewelers' Mutual Fire Insurance Co., which

will be formed on plans similar to that of the insurance company of the hardware dealers.

Similar to the jewelry robberies which recently took place in Milwaukee, the establishment of J. R. Chapman & Co., Oshkosh, Wis., was recently broken into by a thief who smashed one of the front windows with a stone tied in a cloth. Despite the fact that the store was on one of the principal corners of Main St., the thief worked undisturbed and secured more than \$300 worth of diamonds and other valuables. Several small robberies have taken place in Oshkosh of late, but the latest robbery savors of professional talent and the authorities believe that the robber or robbers were connected with the recent Milwaukee jewelry store robberies.

### Minneapolis and St. Paul.

B. N. Benz, Minneapolis, has the sympathy of the trade owing to the recent death of his wife.

C. E. Healy, house salesman for the F. L. Bosworth Co., Minneapolis, is now in the east on business.

F. G. Simpson, of B. F. Simpson & Co., Minneapolis, has left on his regular Fall trip. C. P. Simpson, with this house, has been at home ill for some time.

E. J. Bronson has bought the stock and fixtures of Mr. Benz, and will hereafter conduct two stores. His son, C. H. Bronson, will be in charge of the new purchase.

Axel Madsen, Minneapolis, representing the Chicago jobbing house, Rettig, Hess & Madsen, has just returned from a three months' tour of the Scandinavian countries.

S. H. Clausin & Co., Minneapolis, have moved their store and warerooms from 254 Hennepin Ave. into much larger and better quarters in a fireproof building at 17 S. 6th St.

D. G. Gallett, Aberdeen, S. Dak., was in the Twin Cities on his recent return from Chicago, to which place he accompanied his wife and daughter, Miss Gladys, en route for New York.

Cassius H. Bagley, Duluth, a member of the firm of F. D. Day & Co., Minneapolis, was a leading participant in the golf tournament, which was played, last week, at the grounds of the Minikahda Club, of Minneapolis.

Among the recent visitors in the Twin Cities were: D. Farrell, Warren, Minn.; Mr. Gebhardt, of Gebhardt & Simpson, Flandreau, S. D.; P. J. Remboldt, Farmington, Minn.; H. I. Golden, Warren, Minn.; Oscar Holmes, Cambridge, Minn.; E. M. Schwenke, New Richland, Minn.

T. W. Martin, Saginaw, Mich., announces that he has recently concluded his auction sale of part of his stock and that the business will be continued until sold. Mr. Martin is at present spending a vacation at Point Lookout with his family. Upon his return he will be associated with the Wm. Polson Co. His jewelry business will be in charge of a competent manager and at the same time will receive the owner's occasional supervision.

## Philadelphia

Jacob Rubentone, manufacturing jeweler, 125 S. 7th St., is suffering from hay fever.

Philip J. Friedel, watchmaker for the trade, 727 Sansom St., is spending a vacation at Atlantic City.

John Ernst, watchmaker, 623 Sansom St., was the guest over Sunday of S. W. Hart, a Kennet Sq. retailer.

The Keystone Watch Case Co. has declared its regular semi-annual dividend of 3 1/21 per cent., payable Aug. 1.

C. E. Bestor opened last week a watch repair shop in Newtown, Pa. Mr. Bestor is quite well known to the trade of this city.

William Walz opened, last week, a watch repair shop in Perkasio. Mr. Walz was formerly in the retail business in that town.

Harry Madera, with Simons, Bro. & Co., is receiving the condolences of his friends in the trade upon the death, last week, of his wife.

S. Kauffman, watchmaker, for about 30 years at and near 722 Chestnut St., contemplates retiring from active business before Fall.

William Brand, with M. Sickles & Sons, left, Monday, for a vacation trip. He will visit New York and later go to the Catskill Mountains.

Miss Street, daughter of Fred Street, formerly a retail jeweler of Kensington Ave., has taken a position as engraver for R. L. Saunders, 11-13 S. 8th St.

William Parker, of M. A. Mead & Co., New York, left this city early last week for an extended tour of the middle and southern Atlantic Coast States.

Al. Gallascheck, watchmaker for Joseph M. Parker, Jr., 12th and Sansom Sts., is spending a fortnight's vacation with his wife and child at Atlantic City.

Samuel Ludwig, with C. W. Bixler & Co., Easton, Pa., accompanied by Mrs. Ludwig, stopped off in this city, last week, on his way to Atlantic City for a vacation.

Jewelry forming part of the stock of the bankrupt firm of S. Pascal & Co., 730 Passyunk Ave., will be sold, to-day, at a trustees' sale in bankruptcy at the firm's place of business.

William Kiefer, 1428 Cumberland St., who was seriously burned by the explosion of a gasoline tank on his automobile, recently, while driving the car in suburban parts, is reported to be slowly improving.

R. T. Ferguson, a North Front St. retail jeweler, returned, last week, from a three months' European trip. He looks the picture of health and declares he had enjoyed the best vacation of his life.

James R. Stewart, watchmaker, 16th and South Sts., was in the parade of the Caldonia Club, Saturday morning, which passed through the jewelry district, and received an ovation from his friends along the sidewalk.

Visitors to this city's trade, last week, included: H. B. Schanley, Quakertown, Pa.; B. C. Foster, Bristol; George H. Bowen, Bridgeton, N. J.; E. K. Bean, Lansdale; D. H. Krause, North Wales; H. A. MacFarlan, Downingtown.

J. E. Caldwell & Co. displayed all of last week three handsome prize cups and some individual prizes in the nature of medals and badges especially designed by the firm to be awarded at the midsummer meeting

of the Automobile Association of Wildwood, N. J.

Joseph Hoover, of the Hoover & Smith Co., 616 Chestnut St., is back again in the city after a stay at Hot Springs, Va. Mr. Hoover, who has been in ill-health, is reported to be improved, but not yet able to resume active business duties.

Eugene Naegele, watchmaker and clock repairer, 1220 Filbert St., was notified, last week, of his appointment as general agent of the Crouse-Hinds Co. and the Hawley Time Register, Syracuse, N. Y., and will make his headquarters in this city.

Harry Lanz, formerly connected with prominent local wholesale houses, but lately of the Aiken, Lambert Co., New York, renewed acquaintances in this city's trade last week, after an eight months' absence. Mr. Lantz is spending his vacation period here and at neighboring resorts.

The jewelry store of Adolph Schweine, 5723 Germantown Ave., was robbed, last week, by a negro, who smashed the bulk window. Later a man answering the description of a man seen prowling near the store was arrested. Only a few eyeglasses were found on him. Little of value was taken from the store.

J. B. Bechtel, of J. B. Bechtel & Co., took his employes for an outing, Saturday afternoon and evening, at Hunting Park. At sundown all sat down to an appetizing supper. The afternoon had been spent playing baseball, quoits, etc. John Geist, with Bechtel & Co., has returned from a vacation spent visiting seashore resorts.

The sale of the N. Broad St. properties of the estate of Simon Muhr, late head of the old house of H. Muhr's Sons, at public auction, was ordered last week by Judge Anderson in the Orphans' Court, and was directed as a result of the disagreement of other heirs and trustees with Fanny Muhr, now recognized as the head of the Muhr family. They had agreed to sell the properties to the Knights of Columbus, for the erection of a hall, for \$85,000; but Miss Muhr, wishing to preserve the estate, declared that she would purchase them herself for more than the K. of C. offered. The dispute was taken into court, with the result that a public sale has been ordered.

Friends and former business associates of the late Emil Haffa, diamond broker, 125 S. 7th St., who died suddenly, Sunday of last week, at the Philadelphia Hospital, believe that his sudden demise was due to eating impure ice cream. He had come in from luncheon the Saturday before his death and complained of being ill. He said that he had eaten ice cream and did not believe it agreed with him. He became worse during the afternoon, and was finally hurried to the hospital. He was only 41 years old, and had appeared to be in perfect health. Haffa had long made his headquarters with Jacob Rubenstone & Co. and Joseph Lingg, and transacted a quiet but profitable business. He had many friends throughout the trade of this city and New York. The funeral services were held Wednesday of last week, and were attended by many friends in the trade.

One more meeting of the committee having in charge arrangement for the annual convention of the Pennsylvania Retail Jewelers' Association this week will round out

everything in advance of the convention. Ira D. Garman, chairman of the reception and entertainment committees, has just returned to this city from a vacation trip with his family in Massachusetts, and with characteristic zeal has set himself the task of making everything right for visiting jewelers on the occasion of the practically joint conventions of the National Association of Opticians and the Pennsylvania Retail Jewelers' Association. Mr. Garman has received such assurances from the trade as to depend upon having the greatest convention of retail jewelers ever held in Pennsylvania. This year's convention he says will set a pace which undoubtedly every successive year's convention will follow.

Members of the firm and old employes of Simons, Bro. & Co., manufacturing jewelers, 628 Sansom St., express deep regret at the death, July 28, of J. McLeod Smith, for many years the firm's head bookkeeper, and one of the most noted men of his calling. He was 61 years old and lived with his family at 1226 Stiles St. The funeral services were held, Friday, from his late residence, and a delegation of employes of Simons, Bro. & Co. attended and sent appropriate floral tokens. Mr. Smith had won his way to the esteem and confidence of all with whom he had been associated, and was an unusually gifted man. Many of the catchiest advertisements for houses doing large public advertising were written and illustrated by him. Mr. Smith was poetically inclined, and composed some really creditable matter during leisure time. His work in this way was always a pleasure to his fellow employes and decidedly profitable to business men for whom he wrote, but at all times gratuitously, refusing to be remunerated for what was to him a pleasant pastime. Besides, he enjoyed the lifelong comradeship of some of the city's and State's most prominent men, with whom in early life he had gone to school. These friendships were continued throughout life, making the path pleasant to the bookkeeper and more delightful to those privileged to enjoy his never-failing amiability, sincerity and those rare qualities which go to make up "a gentleman of the old school."

## Harrisburg, Pa.

H. C. Closter is one of the most active and enthusiastic officials of the new Suburban Club, which recently opened a beautiful country place a few miles east of the city.

E. L. Rinkenback and his son, Joseph S. Rinkenback, have been enjoying their leisure hours at their Summer home at Mt. Gretna, where the family of Geo. A. Hutman also occupy a pretty cottage.

At the close of the highly successful and largely attended reunion of the Brotherhood of Railway Trainmen in this city the handsome watch presented by the Hamilton Watch Co., Lancaster, to the person guessing the closest to the number of the works, was voted to John W. Smith.

Francis Lehman, who was charged with a number of thefts from local business men, including the taking of a watch and stick pins from the Woolworth store on Market St., and a silver cup from another Market St. store, was sentenced, last week, by Judge Kunkel to the Huntingdon Reformatory.

UNITED STATES PATENTS.

ISSUE OF JULY 28, 1908.

**894,314. WASHER FOR CASE-SCREWS FOR WATCHES.** CHARLES E. CASHMORE, New York. Filed Feb. 20, 1908. Serial No. 416,948.

In a watch, the combination with the front and back frame plates and a case having a rim to engage the peripheries of said plates, of a spacing block arranged between the plates and against the rim of the case, a washer comprising an arc shaped

body formed with a central inwardly extending bearing portion, said washer being arranged in position with its body bearing upon the rim of the case and extending in a plane concentric with the periphery of the back plate and with its bearing portion bearing upon the rear face of said plate, and a case-screw extending through the bearing portion of the washer, the front and back plates and the spacing block, the head of the screw seating on the bearing portion of the washer.

**894,415. BADGE.** LOUIS P. WICKLAND, Fremont, O. Filed Nov. 29, 1907. Serial No. 404,365.

A badge comprising a body, and a whistle carried by one side thereof and comprising a tube having one wall formed by the body, the side walls of said tube having longitudinal incisions extending thereinto from one end, a vibratory tongue having

its end portions within and movable longitudinally of the incisions for seating or unseating the tongue therein, and means for attaching the body to a garment, the walls of the incisions frictionally engaging and holding the end portions of the tongue.

**894,519. FOUNTAIN-PEN.** HENRY G. MILLS,

Milwaukee, Wis. Filed Jan. 31, 1908. Serial No. 413,519.

In a fountain-pen the barrel provided at its upper end with a nipple of reduced diameter and internally and externally threaded, in combination with

a plug threaded into said nipple and having a bulb secured thereto and a shield for said bulb threaded on said nipple.

**894,457. REGULATOR FOR TIMEPIECES.** OLOF OHLSON, Newton, Mass., assignor to

the Waltham Watch Co., Waltham, Mass. Filed April 10, 1908. Serial No. 426,223.

A regulator for timepieces mounted to rotate concentrically with the balance, having a resilient arm, and a positive slow-speed actuator for said arm.

**894,635. LATHE.** FRANKLIN HARDINGE, Chicago. Filed Nov. 9, 1903. Serial No. 180,287.

In a lathe, the combination with a lathe head spindle, of a tapered nose for said spindle, a slot on said nose extending longitudinally and spirally,

a work driving attachment provided with a tapered opening to fit said tapered nose, and a pin extending from said work driving attachment for engaging said longitudinal and spiral slot whereby said attachment may be clamped on said nose.

**894,634. LATHE.** FRANKLIN HARDINGE, Chicago. Filed Nov. 9, 1903. Serial No. 180,287.

In a lathe head, the combination with front and rear bearings, of a lathe spindle disposed in said bearings and cylindrical within and at each side of said bearings and of a diameter not greater than

that of the bearings, a cone pulley secured to said spindle between said bearings, and a ball bearing free from threaded engagement and loosely mounted upon said spindle and bearing against the rear end of said cone pulley and the front side of the rear bearing, the entire end thrust of the spindle being transmitted to the rear bearing through the pulley and ball bearings.

**894,666. STOP-WATCH.** GEZA KLUMAK, Vienna, Austria Hungary. Filed Feb. 11, 1907. Serial No. 356,862.

In a stop-watch the combination with a seconds hand, an arbor carrying the same, a clock-work moving the said hand with uniform speed over a dial divided into seconds and means adapted upon

a pressure to set the clock-work into motion and arrest it at will, of a balance wheel, governing the movement of the clock-work and adapted to make one oscillation corresponding to a predetermined

fraction of a second, a finger projecting from the arbor of the seconds hand, a stop-lever, and a pin secured thereto, the parts being so arranged, that the seconds hand is automatically arrested at zero position, after each complete revolution.

**894,667. FOUNTAIN-PEN.** CHARLES W. KNAPP, Brooklyn, N. Y., assignor to Nathan H. Casperfeld, New York. Filed Sept. 13, 1907. Serial No. 392,607.

A fountain-pen comprising an ink-holding cylinder having a smooth interior and with a pen in one end, a piston fitting the said cylinder and

means manually actuated for imparting to the piston both a longitudinal and rotary movement for drawing in the ink at the pen end of the said cylinder.

DESIGN.

**39,433. EMBLEM.** LEONARD JAMES FOX, Cincinnati, O. Filed May 22, 1908. Serial No. 434,424. Term of patent 14 years.

TRADE-MARKS REGISTERED, JULY 28, 1908.

**70,041. CERTAIN JEWELRY.** WOLCOTT MFG. Co., Providence, R. I. Filed Feb. 29, 1908. Serial No. 33,075. Published May 26, 1908.

BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS, 1907, FROM The Illustrated Official Journal.)

ISSUE OF JULY 18, 1908.

**7,236. WATCHES.** C. G. CHATELAIN, Holborn Circus, London. March 26. Keyless Mechanism.—Means is provided by

which keyless mechanism of the rocking-bar type can be used in cases where the winding-stem has a

sliding movement dispensing with the side push-piece for setting the hands. The extremity of the winding-stem *b* bears on a lever *h*, which engages a pin *f* on the rocking-bar and is embraced by the arms *i*<sup>1</sup>, *i*<sup>2</sup> of the forked spring *i*. With the pendant knob depressed, the wheel *g* is in engagement for winding, while raising the knob permits the stronger arm *i*<sup>1</sup> of the spring to put the rocking-bar into position for hand-setting.

**7,271.** PENS. W. H. WEGUELIN, Cricklewood, Middlesex, March 26.

A supply of ink for a reservoir pen is contained in a tube or vial *a*, which is contracted at its upper end and is closed by a cork or seal *b*. The

tube is slipped in the barrel of the pen, and is opened by screwing in the pen section *d*, when the pin *e* pushes in the cork. A suitable case may be provided for carrying a supply of fill-d tubes.

**7,273.** WATCH CASES. G. A. SCHLECHTER, Reading, Pa., U. S. March 26.

The back of the case is formed with a central aperture in which is fitted a ring *3*, having fingers *5* or other means for retaining an emblem, picture,

or the like. The front of a hunter case may be similarly fitted.

**7,530.** PENS. G. E. SHAND, Clerkenwell, London, March 28.

Reservoir pens, of the kind having a piston device situated within the barrel of the pen, are provided with a piston-rod composed of a suitable number of telescopic sections. In the example

shown, the piston-rod *d* is composed of two sections *g*, *h* connected by pins *l* which are attached to the section *h*, and work in slots *j* in the section *g*.

**7,576.** SAFETY-PINS; BROOCHES. J. and ADAM G. CANELEN, Birmingham, March 30.

In an enlargement 14 of the body of a safety-pin, a hole is bored to receive a tubular rivet or eyelet 16, Figs. 5 and 6. The preferably narrowed base of the pin 18 is pushed as far as possible through the slots 15, 17, in the enlargement and

eyelet, and is soldered inside the eyelet which may then be flared over. The movement of the pin is limited by the size of the slot 15 which is arranged so as to spring the pin against the catch. The invention is applicable to brooches, etc.

Complete specifications accepted July 8, 1908. 1907.

**15,100A.** ELECTRIC SECONDARY CLOCK. STRAY.

**19,948.** SPECTACLES. AITCHISON.

**20,061.** ELECTRICAL PENDULUM. STELJE. 1908.

**6,472.** JEWELER'S GAGE. DAUNER & WERMANN.

Applications filed June 29 to July 14, 1908.

**13,815.** TEA-POT. JAMES SADLER & SONS and EDWARD SADLER, Longport, Stoke-on-Trent.

**13,859.** THIMBLE. W. P. THOMPSON, Liverpool. Complete specification.

**13,929.** SEPARABLE CUFF-LINKS. F. P. BARNEY, Birmingham. Complete specification.

**13,952.** HAIR CLIP. R. E. LANDESMANN and G. H. E. EBBEFELD, London.

**14,008.** COMPASS AND TIME INDICATOR. E. A. REEVES, London.

**14,012.** VEIL-BROOCH. SARAH SANDEMAN, Glasgow.

**14,038.** TOILET WARE. HARRY WILKINS, Sheffield.

**14,071.** CLOCK. E. F. HERSCHDE, London. Complete specification.

**14,177.** MATCH-BOX AND CIGAR-CUTTER. THEODOR UERLIN, London. Complete specification.

**14,247.** HAT-PIN GUARD. CLARA M. KENNEDY, Manchester.

**14,264.** ENGRAVING-MACHINE. W. A. FORCE, London.

**UNITED STATES PATENTS THAT HAVE EXPIRED.**

[Reported especially for THE JEWELERS' CIRCULAR-WEEKLY by R. W. Bishop, Patent Attorney, Washington, D. C.]

Issued July 28, 1891.

**456,504.** TIME-REORDER. SAMUEL HALL, East Orange, N. J.

**456,745.** BOUQUET HOLDER. R. A. TYRRELL, Detroit, Mich., assignor to one-half to J. H. Rehse, same place.

**456,891.** JEWELER'S WORK-CLAMP. W. B. FISH, Springfield, Mass., assignor to O. W. Bullock & Co., same place.

**456,899, 456,900, 456,901 and 456,902.** WATCH-BOW FASTENERS. FRITZ MINK, Philadelphia, Pa., assignor to Keystone Watch Case Co., same place.

Designs issued July 30, 1901, for 7 years.

**34,857.** RING FOR CLUSTER-SETTINGS. SIMON GOLDNER and LOUIS GOTTLIEB, New York.

**34,859.** CUP. C. A. LEE, Saratoga Springs, N. Y.

**Lancaster, Pa.**

John Reitschy, watchmaker for T. Wilson Dubbs, is on a pleasure trip.

John J. Bowman, of Ezra F. Bowman's Sons, visited Riverside, N. J., last week.

Harry Kaplan, Worcester, Mass., was the guest, last week, of his brother-in-law, Benjamin Lichtenstein.

Harry J. Denlinger, formerly with Frank Fon Dersmith, Lancaster, now engaged in business at Norfolk, Va., for himself, spent last week in Lancaster with his parents.

Harte Smith, Phillippi, W. Va., in business there until last Winter, when he was burned out, has taken a position as watchmaker with W. J. Dombrowsky, at Tampa, Fla.

Among the guests at the Stevens House banquet the evening of July 29 were: A. J. McConomy, formerly with Aug. Rhoads, and G. Z. Rhoads. The beautiful silver loving cup presented to the host, Isaac Snader, was furnished by Aug. Rhoads.

Alfred W. Moyer, manager of the Non-Retailing Co., last week, visited New York, Philadelphia and Wilmington, and attended the Jewelers 24-Karat Club's clambake. C. E. Foose, a traveling representative of this company, with his family, is spending his vacation at Atlantic City. Miss Eva Herr, of the office force, has also gone to Atlantic City for her vacation.

Christian M. Bowman, one of the firm of Ezra F. Bowman's Sons, and Samuel M. Dietz, Mechanicsburg, a student of the Ezra F. Bowman Technical School, were part of a canoeing party on the Conestoga River, recently, one of whom, Christian D. Herr, was drowned by the upsetting of his canoe. Dietz was in the same boat, but swam ashore. Mr. Bowman, in another canoe, attempted to save his drowning companion, but failed.

**Connecticut**

Charles F. Bates, Stamford, on Monday of last week, lost \$25 by pickpockets, while bathing at Groton Pond.

Mr. and Mrs. C. H. Tibbits, Wallingford, left, Tuesday of last week, to attend the funeral of Mr. Tibbits' father, Wm. B. Tibbits, who died recently in White Plains, aged 65 years.

The large plant of the E. Ingraham Co., Bristol, resumed operations July 28, after a vacation of three weeks, during which time inventory was taken and the necessary repairs made in the factory.

Michael Hanley, who had been in the employ of the Seth Thomas Clock Co., Thomaston, for more than half a century, died at his home in Thomaston about a week ago, aged 73 years. The deceased was born in Ireland. He is survived by two sons.

Enoch P. Studley, a clockmaker by trade and one of the oldest residents of Ansonia, died, July 25, at his home, 15 Tronlin St., at that place, after an illness extending over about 18 months, which resulted from injuries received in a runaway. Mr. Studley was born in Sharon. He is survived by three children.

Andrew J. Reeves, Groton, is the owner of a watch which was at one time in the possession of the late Peter Hull, who died a short time ago in New London, at the age of 109 years. The watch has a verge escapement and keeps fairly good time. It bears the name of Charles Middletown, of London, as its maker, and is numbered 1492. The case is of silver protected by an outside removable case of the same metal.

Isaac Field, an employe of Louis Pearlman, New Haven, was taken into custody on Monday afternoon of last week, on a charge of theft. When searched several small precious stones, valued at about \$70, were found in his possession. It was alleged that the loot was taken from Field's former employer. The prisoner is 42 years of age and claims to have a wife and family in Russia. Field finally pleaded guilty and was sentenced to 15 days' imprisonment and to pay a fine of \$50.

The Connecticut State Optical Society was organized at the New Haven House, in New Haven, on July 29, with an attendance of 40 opticians from various parts of the State. Secretary W. E. Huston, of the American Association of Opticians, was present. The officers elected were: President, J. C. Tracy, Willimantic; first vice-president, R. N. Johnquest, New Haven; second vice-president, H. B. White, South Norwalk; secretary, W. R. Upson, Waterbury; treasurer, B. H. Tiffany, Torrington.

Burglars who recently broke into the store of Joseph Coleman, 138 Congress Ave., New Haven, stole several hundred dollars' worth of stock. The burglary was committed early in the morning, and was accomplished by breaking out a rear door, the iron bar of which was pressed so hard that it was forced from the socket. The burglars bored four large holes in the iron base of the safe until the space was large enough to enable the thieves to reach the little drawer which contained the money and jewelry. This was taken out and the contents removed.

## A CATECHISM OF THE LEVER ESCAPEMENT

Being an Informative and Instructive Series of Questions and Answers for Watchmakers and Apprentices

(Written expressly for THE JEWELERS' CIRCULAR-WEEKLY by T. J. WILKINSON.)

(Continued from issue of July 22.)

**QUESTION:**—What condition of the escapement does Test A, case e, deal with?

**ANSWER:**—It deals with an instance in which we find the acting length of the lever being too great.

TEST A, CASE E.

We, as in every instance, commence with an inspection of the pallet and teeth lock-

FIG. 92.

ings. This watch, we assume, has correct lockings. Having thus conformed to Rule I., we follow out Rule II., and close the bankings into position of drop or first lock. This done, we replace the balance, but find we are unable to rotate it. The roller jewel

FIG. 93.

refuses to leave the lever notch, which leads us to decide that the cause of the trouble is due either to the guard pin being too far forward, the acting length of the lever being too long, or the roller jewel being set too far forward; either of the last two causes produce similar effects. To discover if the error is due to the guard pin

we follow out Rule V., and bend the guard pin away from the edge of the roller table. This we do, but it fails to produce results, as the roller jewel fails to emerge out of the lever notch.

**QUESTION:**—How can we positively determine that the fault is not due to the guard pin being too far forward?

**ANSWER:**—By straightening the guard pin and placing the roller jewel outside the lever, *i.e.*, in a condition of over-banked. It is now an easy matter to make an examination of the freedom between the guard pin and edge of roller table. A like test should be made of the freedom of the parts on the opposite side. The results obtained indicate that a correct freedom exists be-

FIG. 94.

tween the guard pin and edge of roller table.

**QUESTION:**—Having disposed of the question of the trouble being attributable to the guard pin being set too far forward, upon what do we now decide?

**ANSWER:**—We decide that as the roller jewel is unable when in the lever notch to make its exit out of the notch, the trouble is attributable to the acting length of the lever being too great. As this calls for cutting away the notch of the lever as indicated by the dotted line seen in Fig. 92, it is first wise to confirm the supposed cause of error by other means.

**QUESTION:**—By what means can we positively find out that the acting length of the lever is too long?

**ANSWER:**—To do this with certainty we are compelled to open each banking, thereby just allowing the roller jewel exit out of the lever notch; then we make use of test B.

As directed by this test, we wedge the lever, and slowly cause the roller jewel to enter and make its exit out of the lever notch; at the same time we observe the tooth and pallet action and find that the tooth has been discharged from the impulse face of the pallet, as shown by Fig. 93, which is an incorrect condition, as explained in former contributions. We make a similar test of the opposite pallet and find that like conditions prevail. The result of test B strongly indicates that the acting length of the lever must be shortened. In order to avoid error, however, we shall make use of test C, as follows: We remove

FIG. 95.

the wedge from under the lever and place it under the balance; this done, slowly rotate the balance, bringing the roller jewel into the notch of the lever, thereby causing unlocking to take place. The instant that unlocking of the tooth and pallet takes place, cease moving the balance; in this instance, owing to the over-length of the lever, the roller jewel will be found between

FIG. 96.

the sides of the lever notch, its exit therefrom not having commenced, as shown by Fig. 94. It will be recalled that we were compelled to open each banking, the better to locate the cause of the error. When we commenced our examination we observed Rule II., but, as stated, we were compelled to transgress this rule, and, as an accurate observation cannot be made by test D, with-

Specialties in Casing of Chronographs, Repeaters and all Kinds of Complicated Swiss Watches

21 and 23 Maiden Lane

New York City

The Only Safety Chatelaine Case which enables a Watch to Keep Correct Time and Cannot be Lost

#### MERITS

Holds the watch firmly and securely, thus preventing the movement from being jarred, as there is no swinging or bobbing up and down while the wearer is walking or running. Protects both the case and garment from wear.

*Absolute Security*

#### UTILITY

It can be raised so as to read the time, and reversed to have either the dial or back facing front, without removing brooch pin or watch from the garment. Can be worn on the shoulder, belt, chain or fob.

*Will not pull or wear off*

Patented U. S. June 9, 1908.  
Patents Pending in Foreign Countries.

MADE FOR ALL SIZES OF LADIES' WATCHES, BOTH OPEN FACE AND HUNTING

Watch worn as Chatelaine, showing it fitted to read the time.

#### Artistic and Practical

The only brooch and watch combined. Affords absolute security, as it has a safety catch. Nothing to wear out, as it works on friction bearings. Eliminates the possibility of loss of the watch owing to either bow, hook, swivel or link wearing out, breaking or coming apart, as in the old style chatelaine. Does not interfere with either winding or setting of movement.

Licensed Under Wachter Patent. Patented July 25, 1905; May 21, 1907

Watch worn on chain as a pendant, pinned to garment as additional security.

out Rule II being in force, we are at present compelled to omit this last-named test.

Having accurately determined the fact that the acting length of the lever is too great, we cut away each corner of the lever notch as indicated by the dotted line in Fig. 92. Upon replacing the parts in position we once again place Rule II. in force, viz., closing the bankings to position of drop or first lock; then, with the balance in place, we find the watch starts running. To confirm the alteration made in the acting length of the lever and to prove thereby that we now have made the lever of correct length, we, as before, make use of test B. This time each tooth remains in contact with each pallet, as illustrated in Fig. 95. Next, using test C, we find that there is freedom between the corner of the lever notch and the roller jewel, Fig. 96. Test D likewise provides confirmatory results that the cutting away of the lever was necessary in order to obtain a correct, harmonious escapement action.

QUESTION:—When shortening the acting length of a lever, how should it be done?

ANSWER:—It should be done very slowly, doing most of the alterations in the vicinity of the corner of the notch, and making frequent tests to avoid over-shortening. Just as soon as the roller jewel during these frequent tests commences to emerge out of the notch, tests B and C should be made use of.

QUESTION:—What did test A, case a, illustrate?

ANSWER:—The normal action of an escapement under test conditions.

QUESTION:—What was the purpose of test A, case b?

ANSWER:—It showed the effect on an escapement under test conditions when the guard pin was too far forward.

QUESTION:—What does test A, case c, teach us?

ANSWER:—It showed the effect under test conditions when the guard pin is tight with one side of the roller table and these parts have normal freedom on the opposite side.

QUESTION:—What was the lesson of test A, case d?

ANSWER:—We considered the benefits derived from a change of roller tables.

QUESTION:—Of what did test A, case e, treat?

ANSWER:—In this last case we had to deal with an error due to the over-length of the lever.

QUESTION:—When making alterations, what points require attention?

ANSWER:—That alteration in an escapement should never be made without confirmatory evidence as to the cause of the error being first obtained from all tests.

QUESTION:—More fully explain test B; explain also its significance as it applies to various phases of escapement testing.

ANSWER:—At the risk of repeating in part the fundamental methods of test B, we shall, in order to make the subject clear, commence with the first principles of the test, and later on explain the exceptions we meet with in practice and explain the errors indicated by such exceptions.

#### TEST B, CASE H.

In this, as in other tests, we conform to Rule I. by examining the lock of the teeth

on the pallet jewel. Next, following Rule II., we close the bankings to the position of drop or first lock. Being satisfied that the lockings of teeth on the pallet stones are correct, we next place under the lever bar a wedge of tissue paper or one of pith. The lever will now move somewhat stiffly, and will remain in any position in which we place it. Having wedged the lever, we replace the balance; next, place a finger on the balance and gently rotate it, thereby bringing the roller jewel into the notch of the lever and out the opposite side. We observe, as the result of this act, that the lever is *not* at rest against its bank, and that the tooth is *not* discharged from the pallet; it will be found remaining in contact with the impulse face of the pallet, as Fig. 95 illustrates. The foregoing are the correct positions of the parts for test B. To examine the opposite action we discharge the tooth from the pallet and again bring the roller jewel into the notch and out the opposite side. Again we find the lever is not at rest against its bank, nor is the tooth

FIG. 97.

discharged from the pallet. Having completed our examination of both sides of the escapement action and found the conditions already mentioned, we pronounce the escapement action as far as it concerns the depth of the roller jewel in the lever notch as associated with the pallet and tooth action, to be perfectly sound. Now, to complete this escapement's examination, make use of test M to detect a tripping error, viz., bring the guard pin against the edge of the roller table and observe that the tooth remains locked on the pallet's impulse face, as shown in Fig. 97. Test A should next be used to determine the extent of freedom between the guard pin and the edge of the roller table. We next investigate, by means of test P, if it is possible for the roller jewel to strike the lever horn. This is done by pressing the guard pin against the edge of the roller table; then revolve the balance, thereby bringing the roller jewel past the lever horn. If the parts are correctly adjusted, the roller jewel will not come in contact with the lever horn; entire freedom will prevail up until the roller jewel is passing the corner of the notch, when a very slight friction will be felt, as the face of the roller jewel will then come in contact with the corner of the notch, owing to the fact that the guard pin has just entered the crescent. No sticking or catching of these parts should be discovered at this phase of escapement action. It is also well to observe that the tooth remains locked on the pallet, as Fig. 97 shows, because when the guard pin enters the crescent the prevention of tripping develops on the relationship of the

corner of the lever notch to the face of the roller jewel. Supposing we have found this action sound, test C should be employed, namely, allow a tooth to drop onto the pallet (the lever acting free as explained in former contributions); then investigate the freedom between the corner of the notch and the roller jewel. Having made a test on each corner of the notch, pass on to test D. On the supposition that all parts have been found correct, we follow out the instructions given in Rule VI., namely, after completing an escapement examination by the methods we have outlined the bankings must be opened to allow for the draw or second lock. This places the watch in correct running order so far as the escapement action is concerned.

QUESTION:—What does test B, case I, teach?

ANSWER:—It treats of an escapement test wherein we find the action irregular, namely, the tooth is discharged from the pallet, in place of remaining in contact after the manner of Fig. 95.

#### TEST B, CASE L.

Following our routine by acting as directed by Rule I., we attend to the pallet and tooth lockings. In this instance they appear satisfactory. Passing on to Rule II., we close the bankings. This allows the first lock only to be present of the teeth on the pallets; next, we replace the balance and wedge the lever bar as instructed for test B; then, slowly rotating the balance, we bring the roller jewel into the notch of the lever and out the opposite side. The effect on the tooth and pallet action is as shown in Fig. 93, namely, a tooth is discharged from the pallet. The correct action would have been for the tooth to have remained in contact with the impulse face of the pallet. (See Fig. 95.) Having determined that there is an incorrect action on one side, we pass on to examine the opposite action. Again, as before, we bring the roller jewel back into the notch and out beyond the horn. Then we reobserve the effect on the tooth and pallet action. We find that on this side of the escapement action the tooth and pallet action is correct, the tooth remains on the pallet's impulse face, as shown by Fig. 95. The results obtained give us an incorrect action on one side, i.e., the tooth is discharged (Fig. 93) and a correct action (Fig. 95) on the opposite side. The action, as depicted in Fig. 93, indicates that some error exists, viz., either the pallet lock is too light, a matter which can readily be observed, or else there is over-contact of the roller jewel with that side of the notch associated with the tooth discharged by the pallet. Should a re-inspection of the lock of tooth on pallet show it as being too light, the remedy is to increase the lock. Should we, however, find the lock to be satisfactory, then the defect is most likely attributable to over-contact of the roller jewel with one side of the notch. Before attempting to make alterations we employ tests C and D. We first employ test C. Allowing a tooth to drop onto the pallet's locking face, in the manner directed for this test, we try the extent of freedom between the roller jewel and corner of notch. Doing this on each side, we discover that on one side the correct amount of space exists between these

Waterbury, Conn.

parts, while on the opposite side the roller jewel is just able to pass out. No perceptible freedom exists between the roller jewel and corner of notch. Applying test D, we obtain the same conditions. Evidently one corner of the notch is too long. To further confirm this diagnosis we examine the freedom of the guard pin with each side of the roller table. These items appear equal. Hence as all tests go to prove that one side of the lever notch is too long, we carefully cut it away until the desired length of notch is obtained, viz., the tests give us conditions as indicated in Fig. 95. Had the shake of the guard pin with the edge of the roller table been excessive on one side, and had binding conditions existed on the opposite side, other remedies would most likely have been called for, as we shall explain in a typical case. In most cases, however, the observance of Rule II. to close the bankings will detect any great irregularities in the guard pin's adjustment to the roller table. Having cut the one side of the lever notch, and as all tests confirm the improvement made in the escapement action, we complete the job by observing Rule VI.—the bankings being opened, as directed by this rule, the escapement will now be found in excellent order.

(To be continued.)

**The Chronobarometer.**

A FRENCH inventor has just patented, in France, the "chronobarometer," an instrument of great precision, having the form and magnitude of an ordinary watch, but which, on one and the same dial, re-

A BAROMETER AND WATCH COMBINED.

ords the correct time and also the smallest atmospheric pressure and depression. Everybody is likely soon to own one of these ingenious little instruments for recording not only the exact time, but, in addition, the weather probabilities.

The chronobarometer is constructed in such a manner that the slightest atmospheric pressure and depression is transmitted to the pointer by a small lever with two crooks, one of which rests on the air box, while the other controls an index, fitted with two sectors, one of which commands the pointer by means of a pinion, the other

withdrawing the regulator or index as soon as a depression makes itself felt, by means of a spiral spring fixed to a pinion, the whole being mounted within the case of a watch of the ordinary average size.

This invention will be of very great utility for aeronauts, mountaineers, military and naval officers, mining engineers and in general for persons desiring to know at any moment the highest and lowest barometric pressure, as well as the time of day.

**A Watch in Legal Complications.**

IN April, some years ago, Richard Goldsmith hired a room of a hotelkeeper in Birmingham, Eng., named Morris Roberts, for the purpose of giving concerts. The speculation not proving successful, he was reduced to borrow £10 of Roberts, leaving a gold watch and chain as security. Goldsmith and Roberts seem to have lost sight of one another till five years later, when each entered an action against the other. Roberts to obtain repayment of his £10, and Goldsmith to recover his watch. Each was successful in his suit; but when the watch and chain were produced, Goldsmith declared they were inferior to those he deposited, and eventually Roberts was tried at the Central Criminal Court, London, for perjury, in swearing the watch and chain to be the ones left with him five years before, and sentenced to 12 months' hard labor.

On the expiration of his sentence he found his business gone, and ruin staring him in the face; but with rare determination he appears to have set himself the task of unearthing the history of the watch. The result of three years' research on the part of Roberts was that Goldsmith in his turn was charged with perjury. According to Roberts' advocate, it was found that the watch was purchased in the Strand, of a watchmaker since dead, but whose son remembered Goldsmith purchasing the watch, and found his name in the sale book, together with the description and number of the watch corresponding to the one produced by Roberts at first. It is asserted that Roberts has also traced other watchmakers who executed repairs to the watch for Goldsmith.

**Scholarship Fund for the Canadian Horological Institute.**

LEADING members of the trade in Toronto, Ont., have initiated a movement to establish a scholarship fund in connection with the Canadian Horological Institute of Toronto, Ont., which, it is felt, would considerably increase the usefulness of that institution by extending its facilities for giving technical education in watchmaking. A meeting of those interested was held at the institute recently and the following were appointed as a provisional board of trustee to take action in the matter: Thos. Roden, of Roden Bros.; C. S. Ellis, of P. W. Ellis & Co.; H. R. Playtner, director of the institute; Albert Kleiser, F. R. Bentley, with J. P. Mill, treasurer, and Harry Smith, secretary.

**Handy Device for Watchmakers Who Wear Eyeglasses.**

IT is during the hot season that most of the jewelers working at the bench have trouble in holding the loupe to their eye, and for the benefit of his brother craftsmen and especially those who wear glasses, F. A. Reeves, of High Bridge, N. J., sends to THE CIRCULAR-WEEKLY the following suggestion as a way to get over the difficulty which he personally has found practical and convenient. Mr. Reeves' plan is to add to the ordinary spectacle a lens on a hinge which will fit over the eye in question and take the place of the loupe.

In describing the way he made his own he says: "I filed out in the joint under the screw at the side of lens a small section of

DEVICE FOR EYEGLASS WEARERS WHO USE THE WATCHMAKER'S LOUPE.

about one-eighth of an inch in width and inserted therein a piece of metal which projects out far enough to make the lug for the hinge for a single eye piece. The latter is taken from under the bar to frame, using the screw as a hinge stud, and in this I fit a strong lens (focus according as desired), which when not needed can be turned to one side, but when needed in place of the loupe can be simply shoved around in front in place of the regular glass.

"I find this very convenient and give it to my brother members in the trade through your journal on the chance that they may reap from the suggestion the same benefit that I have."

The store of Ed. Nash, St. Louis, Mo., was recently entered by burglars, who stole watches exclusively, leaving untouched several diamonds which lay within their reach.

It is reported that the clock on which the senior class of the University of Chicago have been at work for five years has been finished and will be hung in the Mitchell tower. The clock, which measures 13 feet in diameter, was designed by Earl Ferson and the work has been done in the shop of the manual training department. The clock has four dials.

It was reported from London July 1 that the committee appointed by the House of Commons to consider the daylight saving scheme has filed a report favoring the introduction of a bill to achieve the object by altering clocks one hour on the third Sunday of April and altering them again on the third Sunday of September.

The Favorite Movement with both Trade and Public

# The Omega Movement

stands in high favor with the trade, and is constantly increasing in popularity for the reason that the public is quick to appreciate its merits.

The man who carries an Omega is proud of it and misses no opportunity to sound its praises to his friends. He finds it invariably and uniformly reliable. He learns to depend upon it and it never abuses his confidence.

**Ω**  
**OMEGA**

**Adaptable, Interchangeable, and Suited to all Requirements**

The Omega is made in all sizes to fit regular American cases, besides a number of Swiss sizes. Every part is interchangeable, and all are made with lever escapements, double roller and pendant set. There are six different grades — from seven jewels to twenty-one jewels — adjusted to heat, cold, and five positions.

503 Heyworth Bldg., CHICAGO.

## THE Ægis Case

(PATENTED)

THE ÆGIS is a new creation in gold case making. The center and bezel are in one. Instead of having the ordinary Cap, this case is provided with a rigid metal movement Cup, held friction tight in position. This Cup gives protection to the movement such as cannot be secured with the conventional jointed cap, while dust is thoroughly excluded from the front by means of the one-piece center and bezel.

# STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

## Business Methods Essential to Success

By Frank Yale, of the Kansas City Credit Men's Association, at the Recent Joint Meeting of Jewelers and Opticians in Kansas City, Mo.

THE term "good business," the subject on which I am to speak to you for a few minutes, is not intended to mean the quality or condition of business, whether active and profitable or dull and unprofitable, but rather relates to those practices and ethics of business that are termed "good business" in contradistinction to bad methods. It is a broad subject—one that has been the study of master minds through all the centuries since commerce began, and one in the contemplation of which any man might feel how vast his ignorance and how limited his knowledge.

It would avail nothing to enter into an academic discussion which could only result in the presentation of various theories and doctrines some good, some questionable, and others of no value for our purpose, but I will try to speak to you in a practical, homely way and endeavor to differentiate between the methods of business that count for success and those that almost invariably accompany failures. In doing this I draw from an experience that has given me the most intimate knowledge of the minutest details of the business of many retail concerns.

True, my investigations accompany embarrassments always, and usually insolvencies, yet they reveal dangers, and it is only by pointing out the dangers that they may be avoided and a safe course pursued. The clear road at night has no light to guide the traveler. The red lantern is at the obstruction or excavation; the open sea is not lighted; 'tis only the shoals and rocks that are marked. The whole course of one's life is likewise marked with danger signals. Admonitions, precepts and examples are all framed and presented to point danger spots; all else is clear and safe.

So, in speaking of good business, we are bound to dwell on the larger degree upon questionable and bad practices and their results; so we can more clearly see how our paths trend to reach the goal, "Success."

Most of the thoughts that will be presented to you will not be new. You undoubtedly have all thought of them, dwelt upon them, heard them repeated many a time, read them in different languages from many a pen, but reiteration does not damage a wholesome idea nor detract from its

truth or its value, but by repetition the thought may become fixed, become a practice; the practice becomes habit, and if the business habits are good, success is assured.

Some years ago an irrigation ditch was built to carry the water from the mountains of Colorado through the dry lands of western Kansas. It was scientifically constructed, flood gates were put in and much money was spent that its appointments should be perfect and ample for the service. The first season there was plenty of rain, and no irrigation was needed. The ditch was unused and an incipient growth of grass, weeds and an occasional washing of the soil from the banks appeared along its course. The next year there was plenty of rain, irrigation unnecessary, the growth increased, the washings multiplied and the obstruction became more complete. The third year the drouth came, and the ranchmen and farmers congratulated themselves that their foresight had been sufficient for them to prepare and be independent of the rains, but when the flood gates were opened there flowed no water. The growth and washings had completely obstructed the channel. The frantic plowing and spading was too late. The season passed, the crops failed and destruction covered the land. Had there been some voice of authority to call their attention to the results of their negligence or oversight during the prosperous years, had the ditch been kept clean, there would have been no disaster, no hopelessness, no despair.

Gentlemen, it may be that an insignificant, unnoticed growth is appearing along the channels that are intended to give life and sustenance to your business in some future time of stress, and may mine be to someone here, the voice of caution.

Perhaps the most important factors that contribute to commercial success are character, ability, energy and capital. These are the corner-stones, if not the entire foundation. Not one of them can be spared, for each must stand its own particular share of the weight placed upon it, and whether they are strong, firm and firmly set will depend the strength and ability of the superstructure.

We will not dwell upon character as an

element of business to-day, for you all know that it is only upon character that confidence can lean. In buying and selling, in receiving and giving credit, and, in fact, in all your dealings with business men, whether you feel it or not, the known character of him with whom you deal is what gives or withholds your confidence.

The necessity of ability is too often underrated. It is not uncommon for one to believe that it takes no talent of especial order to do this or that kind of business; that because the grocery man or merchant in any other particular line happens not to show a marked degree of brilliance there is no need of talent to engage in that particular line; but experience has demonstrated beyond question that knowledge of one's vocation in this day of competition and specialization is one of the greatest essentials of success. Knowledge of the markets, of the goods, of their relation to the seasons, of where to put on the profit and where to leave it off and how much profit to put on and how little, how much to charge for the labor and how much for the art, etc., is so particularly necessary that many a commercial wreck has been occasioned by lack of this knowledge.

And what can we say about energy, or, rather, what can we not say about it if we elect to consume the time? The constant, wholesome activity and push that we see around a well-ordered and money-making establishment is the very life of trade. Business nowadays does not come unsought, nor does it stay unattended to, and if we will have business we must work for it, and if we wish to continue and increase our business we must strive actively and constantly to retain it.

A business will not stand still. It will advance or retrograde. In many offices we used to see the sign: "Keeping everlastingly at it is what brings success." And it is infinitely better to do something and to keep doing something, even if done wrong, than to do nothing and to have the business die of "dry rot," for he who makes an effort is excusable for his mistakes, while the world has no place for a lazy man and the sluggard has no place in the world.

I have touched lightly upon these three principles, for they are accepted as true, and discussion would not add to the truthfulness. We now come to the other corner-stone of commercial success—"capital." We will not, if you please, speak of capital in its technical economic sense, involving all the various kinds of bonds and borrowed money incident to high finance, but

## Storekeeping Department.

let us speak of it as it is, understood and applied by merchants in the more modest walks of life. Let us think of it as of our own individual money that we have earned, or made, and have at the risk of the business, and for whose investment we are responsible and whose loss or gain is ours.

The proper investment and use of his capital is what occupies the greater portion of the thought and study of a business man. It is his aim to employ it where it will bring the best returns, commensurate with reasonable safety. The ownership of capital is a trust, and a most sacred trust, and it should not be viewed by its owner as a luxurious possession, for which he has no accountability to any but himself, but he holds his capital as a trust, for which he must give an accounting in some way at some time to his family, to his community, to his creditors and to himself.

In the complex organization of society one cannot be a law unto himself and his possessions, and until one grasps firmly that idea capital with him is in dangerous hands. Now, a merchant's assets usually consist of a stock of merchandise, his notes and accounts, if he does a credit business, fixtures, tools and very often the business premises. And, gentlemen, it is no easy matter to nicely balance the proper relationship that one of these assets should bear to the other or to the entire investment. In fact, it is more difficult to keep them regulated to a nicety of proportion than otherwise.

Men often lose sight of the fact that an investment in a store building or in fixtures is, to a very great extent, dead capital. The store building usually earns nothing excepting what it saves as the difference between the rent expense and the interest on the money invested, but the asset itself is fixed. It cannot be readily turned, attempts to borrow money on it are apt to be disappointing, the money cannot be used to increase business, but remains right there earning simply a small percentage as stated, and it is a very grave question whether it is wise to own a building for one's business until such time as he is paying cash for his merchandise, has no debts and has nothing better to do with his money, for the only thing about such an investment which can increase in value is the land. The building don't increase in value; it depreciates with age, gets out of style and out of condition. The business district may change arbitrarily. In fact, there is so much against the voluntary ownership of a store building that the purchase or building of one should be undertaken only after the greatest amount of thought and consideration.

The money invested in furniture and fixtures also brings no immediate and direct returns. They are a convenience for the transaction of business. Some lines of trade demand that the furnishing of the establishment shall be elaborate in order to attract trade, while in other lines the character of the business itself is the attraction and the furniture and fixtures a matter of indifferent consequence. But at the moment of liquidation one learns that the

depreciation in their value far surpasses the loss in the realizable value of any other asset he has.

So the investment in that part of one's assets should be reluctantly made and held as small as a decent regard for the requirements of the business will allow. In a neighboring city I have in mind a concern that started with \$60,000 capital. They invested \$27,000 in furniture and fixtures and had \$33,000 for merchandise. In less than a year they were frantically hunting for money so they could continue business. They obtained the money by increasing the capitalization, discounting their assets in consequence of their furniture and fixtures, and, as a result, although the business lived, the men who put in the \$60,000, which was ample to run the business, if invested judiciously, were compelled to take continually a smaller percentage of the profits than they otherwise would have had.

Now I mention these, gentlemen, in a precautionary way, and it may have no application to any person here, yet I have seen so many establishments go down to ruin in consequence of having too much capital that was dead that I was impelled to speak of it. The merchandise is, of course, the liquid asset, the movement of which makes the profit or loss. The net profit in a business is, of course, the difference between the gross profit on the merchandise, less the expenses. All that it is necessary to do to have a business make money is to have the expense account less than the profits. It is a simple proposition when thus stated, but let us see what it involves.

The merchandise must be limited in amount carried to the requirements of the community; it must be properly selected, the price must be right, as low as one's competitor's and the purchase must be made, not because it suits the taste of the buyer, but with a view to suiting the taste of his customers, and the seeing of merchandise with the eyes of prospective customers is what makes the successful buyer. "Goods well bought are half sold." In selling we all recognize the variation of percentages of profits as applied to this, that or the other department or kind of merchandise. Certain classes of goods will stand a profit of perhaps 5 per cent, some 10, others 20, some 50 and some 100 per cent., and here is where the ability of a merchant is called into play.

We learn by our experience that those articles which are consumed most quickly and enter most largely into the economy of living are those on which the profits are always smallest, and those articles which are infrequently used and not so essential, being rather in the category of luxuries, will stand and must bear the larger profit, and to grade the profit advantageously from the lowest point to the highest through the whole line of articles that the merchant carries is what marks the salesman.

And it might not be amiss to explain why these different percentages of profits are apparently legitimate, and in doing so it will be necessary to go outside of the jewelry business, although the principle applies to every line. The grocery business rep-

resents perhaps the most staple lines. A wholesale grocer's profits are perhaps 7½ or 8 per cent. gross. On his sugar he makes not over 1 per cent.; on his salt he makes nothing; on his canned goods he will make, say, 7½; on his spices, teas, extracts, etc., he makes his larger profits. Now, it seems almost impossible to conceive how a grocer on an average gross profit of 7½ per cent. can make money, but his capital invested in merchandise he will turn on an average of 10 times a year, and as it costs him about 5½ per cent. to do business he has a 2 per cent. profit left 10 times a year, making a yearly net profit of 20 per cent., so you see he can easily sell on a closer margin than the dry goods dealer, who turns his capital invested in merchandise five times a year, and the dry goods dealer will average 14 or 15 per cent. gross.

And so through all lines you will find that the reason why profits are small on some kinds of merchandise and high on others is because where the profit is the smallest it is possible to turn the capital invested oftener than when it is the largest.

One soon learns the average percentage of gross profit on his sales, and he also learns that he has a certain fixed expense, and that he must sell a certain amount to cover the fixed expense before there is a net profit. The trouble with many and many a merchant is in not knowing definitely from month to month what he is doing through the year. How often it is that the annual inventory shows a surprising deficiency that cannot be accounted for? It is in midwinter at invoicing time that most failures occur, and because it is not until then that the knowledge comes to many men that all is not well. By not knowing beyond conjecture and from accurate comparative data what the business was doing from month to month or day to day, no intelligent effort could be made to improve the condition, stop leaks and prevent the ship from foundering.

Good business requires that there be kept daily records of purchases, sales, expenses, etc., and at least monthly summaries prepared, including those items and the amount outstanding and amount owing. The comparison between the summary for any current month and the corresponding months of previous years will furnish an absolute barometer of the business, and expansion or retrenchment can be inaugurated before it is too late. If a business might show unhealthy signs in June, why wait until January to know and correct it? The lost opportunity to curtail purchases, cut down expenses or force sales, on account of the inexcusable ignorance of the actual condition of his business, has been the ruination of many a merchant. So I would urge upon every business man, be his opportunities large or small, to know continually what he is doing by keeping comparative records from year to year and studying them.

# WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]  
No attention paid to communications unless accompanied by full name and address of the writer.

**QUESTION No. 2191.—“B” Stands for Baume.**—Will you kindly tell me what is meant by saying “Cyanide stands at so many degrees B, in solution”? The term “B” I have noticed in a great many of your articles in Workshop Notes, and I have been unable to learn what is meant by the term.  
C. W. R.

**ANSWER:**—The term “B,” used in connection with solutions, refers to, “Baume” hydrometers. These hydrometers are specially made of glass for this purpose, with a glass stand, and cost 85 cents, according to size. They can be purchased from any platers’ supply house.

**QUESTION No. 2192.—Bronze Finish.**—We have bronze articles to which we want to give an artistic finish.  
B. & F.

**ANSWER:**—The following French method gives a fine finish to bronze articles: Mix equal weights of verdigris and salammoniac. Of this take two ounces and mix to a thick paste with commercial acetic acid. Place in a copper vessel—one that is not tinned inside—with five parts of water, and boil for 20 minutes. The water is then poured off and saved for future use. To finish a small article, clean thoroughly and place in a copper vessel, resting on a piece of wood or glass, so that it does not touch the copper. Pour in enough of the prepared solution to cover the object completely and boil for 15 minutes. The high portions may be polished carefully with a rag wheel. Thoroughly wash and dry, then lacquer and dry.

**QUESTION No. 2193.—Silver Gilt and Brass Covered Wire.**—How is the silver gilt and copper wire covered with brass produced?  
S. G.

**ANSWER:**—The silver gilt wire is produced by electroplating a silver wire with a gold deposit. The wire is then drawn through a draw plate to the desired size. A thin coating of gold will remain on the wire, even if drawn through the draw plate several times. For covering copper wire with brass a billet of copper is placed in an iron box and the copper sprinkled with granulated pure zinc and powdered salammoniac. The box is sealed up air-tight and heated. The evaporized zinc is absorbed by the copper forming a surface alloy of brass. The billet can then be drawn into wire of any size and the surface will be covered with brass.

**QUESTION No. 2194.—Brush Brass Finish.**—Can you tell me how to make a solution for brush brass finish or brass such as is put on gas lamps?  
C. T. F.

**ANSWER:**—The brush brass finish is best obtained by the brushing process, which gives better results than any of the other methods employed. The brass to be treated is first finished in the same manner as for other finishes—that is, it is tripoli polished so as to remove all scratches and imperfections, then potashed free from grease, dipped into a cyanide bath and rinsed in cold water. The brush finish is now produced by using a soft crimped brass scratch brush, secured to a lathe running about 1,200 revolutions. With a little powdered pumice, moisten with water. The water may be softened with a little washing soda. A scratch brush that has been used for other purposes and is a little worn will work better than a new one. If the articles are large a brush from five to six inches in diameter, with four rows, is best, but if the articles are small a smaller one with two or three rows will suffice. A little practice is necessary to produce a finish that will not show a scratchy effect. An even deadened finish is easily obtained if the brush is in the right condition and the brushing done in a direction to produce the best effect on the shape of the article. After it has all been scratched evenly the pumice is rinsed off in water, then again passed through the cyanide solution, rinsed off and washed clean from any pumice that may gather in crevices. The cyanide solution is made by dissolving about half a pound of cyanide of potassium in a gallon of water. After washing the pieces and rinsing in cold water, dip into boiling water, to which have been added about two ounces of cream of tartar; then dry in clean sawdust. The article is now ready for a coat of lacquer, which should be applied as soon as dry or before there be an opportunity for tarnishing. Should the brush brass finish not be satisfactory the pieces should be done over again by polishing off with tripoli and repeating the several operations.

The following clever device is the way that the natives of Liberia, in west Africa, who have no clocks, tell the time: They take the kernels from the nuts of the candle tree and wash and string them on the rib of a palm leaf. The first or top kernel is then lighted. All the kernels are of the same size and substance, and each will burn a certain number of minutes and then set fire to the one next below. The natives tie pieces of black cloth at regular intervals along the string to mark the division of time. The natives appear well satisfied with this crude system of indicating time.

## A Simple Method for Estimating the Quantity of Silver in Silver Plating Solutions.

THE method generally employed for estimating the quantity of silver in a silver plating solution is to take two ounces of it, evaporate to dryness, and then melt the residue in a clay or graphite crucible. The silver is reduced to the metallic condition in the form of a button in the bottom of the crucible. The crucible is broken, the silver button cleaned and then weighed. As there are 128 ounces in a gallon, the weight of the button in Troy ounces multiplied by 64 will give the number of ounces of silver to the gallon.

This evaporation and melting process is of long standing, and is not only slow and troublesome, but there is always danger that some of the solution may be lost in

FIG. 1.  
Burettes, stand, beaker and mode of using.

the evaporation, or that all the silver may not be reduced in melting, or may not form a good button. It frequently, when insufficient heat has been used, separates in shot through the mass of slag. Such shot are difficult to collect completely. Then, too, accurate scales are needed for weighing the silver button, and if other metals, such as copper, are present, the results are too high.

There is another method, frequently practiced, of precipitating the chloride of silver from a quantity of the silver plating solution, say two ounces, and then filtering and weighing the dried chloride of silver thus obtained. As chloride of silver contains 75 per cent. of pure silver, the weight of the chloride divided by three-quarters (75 per cent.) gives the weight of pure silver. This method, however, is unsatisfactory for the reason that the chloride must be thoroughly

## Workshop Notes Department.

washed, carefully dried and separated from the filter paper, and then accurately weighed. If cyanide of silver is used for making up the bath instead of the chloride, the results are inaccurate.

Neither of the foregoing methods can be called satisfactory ones in the hands of a plater, and even with those experienced in their use there is much to be desired. They cannot be called very accurate methods, although perhaps sufficiently so for ordinary purposes. It is rare, indeed, that a plater is found who expresses complete satisfaction with them.

The method about to be described is known as the *Volumetric Sulphocyanate Method*, and while the process has been used for some time in assay offices, laboratories and smelting works, it has only been applied to the estimation of pure silver. By a modification, however, it has been found possible to use it for the determination of silver in cyanide solutions.

A small quantity of apparatus only is needed, and the cost is small. Those who have equipped themselves for the determination of the free cyanide in plating solutions according to the method described in the *Brass World*, March, 1908, page 83, will need but very little additional apparatus, as the burettes and stand answer equally well for all kinds of volumetric determinations. Those who have not done any work of this kind will find a description of the necessary apparatus subsequently given.

No weighing is required except in making up the original solution, and as this may easily be done by outside parties or by a druggist, the operator need not be supplied with scales. The solution keeps indefinitely, if well stoppered, and enough may be made to last a number of years. After the solution has once been made, the process is quite simple, and a complete silver determination may be made in from 10 to 15 minutes. There is no calculation required and the reading on the burette, divided by 10, gives the number of Troy ounces of silver in a gallon of plating solution. The simplicity of the process will, therefore, readily be appreciated.

The principle of the method is based upon the fact that a solution of sulphocyanate of ammonium added to one of nitrate of silver precipitates the silver in the form of white, flocculent sulphocyanate of silver. By mixing the solution with a small quantity of nitrate of iron (called the indicator) a red color is given to the liquid when all the silver has been precipitated by the sulphocyanate of ammonium. In this manner the exact amount of sulphocyanate of ammonium needed to precipitate all of the silver may readily be ascertained.

The sulphocyanate solution is added to the nitrate of silver solution (to which a small quantity of the nitrate of iron has been added) until one drop imparts a pink or red color to the solution. The amount of sulphocyanate solution taken is then known and from which the silver is easily ascertained. The process is not only very accurate, but really easier to work than the free cyanide determination on account of the use of the indicator (the nitrate of

iron) which shows the exact point when the solution turns pink.

As the silver in a cyanide plating solution cannot be estimated directly by means of the sulphocyanate solution, it is first necessary to convert the silver in it into nitrate by destroying the cyanide by muriatic acid (which also precipitates chloride of silver) and then reducing the chloride of silver to metallic silver by zinc. The metallic silver thus obtained is dissolved in nitric acid to make nitrate of silver. This conversion process may seem complicating according to this description, but in practice it will be found quite simple and easily carried out.

### APPARATUS REQUIRED.

One liter flask with mark on neck; two Mohr-Geissler burettes with glass stop-cock and 50 cubic centimeters capacity, gradu-

FIG. 2.

Manner of boiling in beaker and on asbestos board.

ated to tenths; one double-arm burette stand; one iron tripod; one piece of asbestos board, 6x6x $\frac{1}{8}$  inches; one Bunsen burner and rubber tube; one glass stirring rod; one No. 5 lipped beaker; one three-inch glass funnel; filtering paper.

It is possible to get along with one burette, but it will have to be rinsed out each time. The use of two is to be recommended, as the silver solution can be placed in one and the sulphocyanate in the other.

### THE CHEMICALS NEEDED.

The chemicals needed are the following: Muriatic acid (hydrochloric acid), nitric acid, chemically pure, zinc, sulphocyanate of ammonium, nitrate of iron.

The quantity and quality of the chemicals will subsequently be described.

Burettes are made of a glass tube about two feet long, graduated on the outside by etching, and supplied with a glass stop-cock at the lower end. They are used for delivering known quantities of a liquid, and are used for the same purpose, therefore, as a graduate; but, owing to the small

diameter, the quantity of liquid delivered may be very accurately measured.

The best form of burette is known as the "Mohr-Geissler," as it has a glass stop-cock on the end. There is a cheaper form with a piece of rubber tubing at the end that is operated by a pinch cock. The burette should be graduated in tenths and hold 50 cubic centimeters. The cost of the burette with the glass stop-cock is from \$1.75 to \$2. Those who desire to economize can get along with one burette, but it will be found helpful to have two. In Fig. 1 the burettes and stand are shown.

This is used for making up the sulphocyanate solution. After that it is not employed at all. Those who purchase the solution or have it made by outside parties will not need this flask.

A liter flask is one of thin glass with a mark on the neck up to which liquid must be filled to make one liter. It may be provided with a glass stopper at the top or a cork may be used. The cost of such a flask is about 75 cents.

### BURETTE STAND.

This stand is used for holding the burettes and may be seen in Fig. 1. Its cost is about \$1.25 for the double stand and \$1 for a single stand. It is made of wood. The clamp for holding the burette is lined with cork to prevent breakage when tightly clamped.

The tripod is needed to hold the beaker while it is being heated. It consists of a ring of cast iron, to which are fastened three legs of iron rod. It may be seen by referring to Fig. 2. The cost of such a tripod is about 25 cents.

### ASBESTOS BOARD.

Asbestos board is necessary for heating the beaker. The board is placed upon the tripod, the beaker is then rested upon it, and the liquid boiled by means of the Bunsen burner. The use of the asbestos board prevents the breakage of the beaker when heating, as the heat is evenly distributed. It should be about  $\frac{1}{8}$  inch in thickness and costs but a few cents. A piece about six inches square is a good size.

A Bunsen burner, with which nearly everyone is familiar, is used to heat the asbestos board. A small gas stove or alcohol lamp will also answer. The cost of a Bunsen burner is about 25 cents. A piece of rubber tubing is needed to connect with the gas cock.

A small glass rod about  $\frac{1}{8}$  inch in diameter is used for stirring the solution while the sulphocyanate is being run in from the burette. It comes in lengths of about two feet and costs but a few cents. If a mark is made by a file on the rod it may be easily broken at that point by grasping close to the mark with the hands and bending. The end should be rounded by holding in the flame of the Bunsen burner until melted. The other end may be left straight or bent over as shown in Fig. 2. This is easily done by holding the rod in the Bunsen flame until soft and then bending. If the bottom end is not rounded the beaker will be scratched.

(To be continued.)

The store of Frank A. Hardesty, Indianola, Nebr., will hereafter be conducted under the firm style of Hardesty & Leth.

### Mr. Jeweler:

Do you know that hundreds of your competitors in all parts of the country are making a specialty of Fans? Do you know that even a small line of Fans, properly displayed, will "dress up" the whole appearance of your stock? Of course, the Fans themselves must be suitable for jewelers, and must be bought from one who thoroughly understands the requirements of your trade. There is but one such house in America—

**The Nature and History of Porcelain.**

A MOST interesting address on "The Nature and History of Porcelain" was delivered a short time ago before the annual meeting of the English Ceramic Society by L. Solon, the retiring president. To the *Pottery Gazette* of London we are indebted for the following abstract of Mr. Solon's most instructive discourse:

Mr. Solon remarked at the commencement, that since the formation of the Ceramic Society no paper had been read before the members which, wandering out of the scientific or technical fields of knowledge, dealt exclusively with a separate branch of the fictile art, considered from a purely esthetic, artistic and historical point of view. If then, he ventured to make a departure from the established order of things, and submit a few general observations on the nature and history of porcelain, he would plead as an excuse for once more tackling the somewhat hackneyed subject his incapability to descant upon any other matters than those to which the most fascinating studies of his life had been entirely devoted. Moreover, it occurred to him that in the near future historians and critics better intended than he to captivate attention, following his example, might be induced to submit interesting communications of the same order.

A few well directed incursions into the glories of the past were bound to exert a beneficial influence upon the labors of the present, and assist achievements to be accomplished in the future. He felt a kind of misgiving that the youthful generation of our scientific students was rather prone to take it for granted that all that had been done before was but a negligible prelude to the high degree of perfection that pottery manufacture had reached at the present day. A considerate examination of the choicest remains of departed handicrafts was sufficient to make us aware that, at very remote periods and in very distant countries, the potter had produced ceramic marvels which we might strive to equal, but hardly hope to surpass. This was obviously the case with the earthen vessels of a superior order, the variety of which was ranged under the generic name of "porcelain." Before entering into a short historical survey of the invention and transformations of the incomparable ware, he would ask leave to present a general consideration of the subject.

Man, through his mastery of the arts of fire, in their countless possibilities, had achieved amazing results. Of all the arti-

ficial substances that his ingenuity and perseverance had obtained by submitting to the transforming agency of intense heat, porcelain—an artful compound of rare materials—was one of those which reflected the greatest credit on his inventive power. Porcelain was to be the crowning glory of the consecutive efforts made by a long lineage of potmakers bent on raising the beauty of their work above the highest standard reached by their predecessors. From the early days of rising civilization, clays had been burned and metals smelted in primitive furnaces. But it must be borne in mind that the conquest of our most precious raw materials was originally due to a fortuitous discovery. Uncounted centuries might have elapsed before the discovery—whatever might have been the importance of its further practical applications—was at last turned to good account. It was only as the social conditions of the people went on improving that, accordingly, an unremitting course of technical modifications kept up the refinement of the long adopted clays and metallic ores to a point where they could fully satisfy newly created exigencies. For a long time the natural substances continued to be used by the craftsman in their native coarseness, and the earliest examples of pottery scarcely showed traces of a perfunctory epuration of the mass. One could not detect any essential difference between the bodily state of the rudely smelted and clumsily wrought ingot found in the graves of the prehistoric tribes and the virgin nugget picked up hard by. Absolutely similar was the nature of the terra cotta urn of the same period to the soil upon which it had been burned. Glassmaking itself—the remote precursor of the ceramic art in its noblest form—had its origin in the skilful elaboration of a facile discovery. Among the ashes of a brazier in which fusible matters had accidentally been brought into contact it was not rare to find vitrified nodules of irregular purity. The formation of glass was a natural phenomenon, strictly speaking, and whatever could be the degree of perfection to which it might have been brought in the course of ages, glass had certainly not to be "invented."

Perhaps it was better that, before going any further, he should define the exact sense in which he had made use of the word "invented." While "discovery" might be said to be the mere outcome of the superficial examination of the marvels that nature offered to the glance of any clear-

sighted observer, "invention," he thought, should be regarded as the intellectual triumph of a gifted personality who, grounding his unprecedented researches upon rational principles and experiments upon the combination of cosmic elements, arrived through subtle perceptions and sound deductions, at a materialization of the cogitations evolved in his brain. The distance which separated discovery from invention was forcibly illustrated in the range of ceramic productions, by contrasting simple terra cotta with the complex and highly refined material which we called "porcelain."

One could not deny that industrious man was, from the first, doomed to be a potter. The extreme ductility of the plastic clay, its faculty of being hardened by fire, and the limitless uses to which these qualities could be applied, were not to remain undiscovered. The ubiquity of the potter's art seemed to imply that cultured humanity could not have dispensed with its assistance. It was not so with porcelain considered as a material. Unaided nature did not produce its equivalent. We could understand that, were it not for the effective efforts made by successive artificers toward the realization of an ideal pottery this truly admirable substance would never have existed. It was true the world could have done without it. The earth yielded enough precious gems, dazzling stones and variegated marbles to gratify our cravings for all that was rare and priceless. But porcelain possessed, in one respect, a commendation which was not shared by any of these earthly treasures. The substance was one of man's own creation, and, as such, he might be justly proud of it, and could not too highly praise its achievement.

In the production of a porcelain body a curious similarity of external appearance had been obtained by so many different combinations of constitutive materials that the term did not admit of a scientific definition which would equally suit the numerous varieties of the ware. The word "porcelain" was, however, sufficiently explicit when taken in its familiar acceptance. A ceramic collector would find no hesitation in dividing the miscellaneous specimens of pottery and porcelain in his possession into two distinct sections. The experienced housewife, when putting the pantry into order, would, likewise, knowingly discriminate between her best earthenware and the more valuable china.

**THE SUPERIORITY OF CHINA.**

In such cases a confident appreciation of the superior delicacy, the extreme whiteness and the slight translucency of the substance ratified a superficial judgment. A scientist could not, however, be satisfied with the

application of these simple criteria. But when he attempted to formulate a precise definition of porcelain, as a separate class of ceramic wares, he had soon to recognize his inability to grasp with the difficulties of the task. Some of the intrinsic qualities of porcelain also belonged to other kinds of vitrified compounds, admittedly of a very different order. For instance, whiteness and translucency were conspicuously apparent in opaque glass and in certain enamels. On the other hand, the celadon porcelain of early Chinese manufacture was neither white nor translucent. It had been demonstrated that the Persian faience, when submitted to a much higher degree of heat, became translucent porcelain.

Were we to adopt, perhaps, the most acceptable definition among those which had been proposed which said that "Porcelain is technically characterized by an incipient vitrification of the whole mass," stoneware—made of plastic clay semi-vitrified throughout—would have to be placed into a class of pottery from which it differed obviously through the coarseness of its texture and the peculiar nature of its glaze.

Unlike the majority of artistic handicrafts, the making of porcelain was not of such an obscure origin that its birthplace could not be fixed at least within the bounds of a limited geographical area. Considered in chronological order, the history of porcelain comprised three distinct phases, which could be described as the periods of invention, imitation and vulgarization. The first period opened at the time when the Chinese potters conceived the idea of associating the kaolin—a white body which had so far been of little use to them on account of its refractory nature—with the *pe-tun-tse*, or felspar, a fusible rock found in the same bearings. From that day porcelain had come into existence, and one might say, in passing, that no true porcelain had ever since been manufactured either in China or Europe which had not a mixture of kaolin and felspar as its fundamental basis.

The second period, that described as the period of imitation, occurred when a radical transformation took place in European countries of the ways and means of obtaining a white and translucent ware, this being in response to the ardent admiration excited by the marvelous importations which came from the Far East. The European potter was in complete ignorance of the materials which entered into the constitution of the ware, and the chemist supplied him with a choice of artificial compounds which permitted the production of a highly satisfactory substitute. Technically speaking, there was nothing in common, despite their outward resemblance, between this artificial, or soft, porcelain, as it was usually called, and the genuine Oriental ware of which it was an excellent, but incontestably fictitious representation.

With regard to the last of the three periods, that described as the period of vulgarization, this occurred when the processes of manufacture were mastered in Germany, and spread far and wide, superseding the complicated and unreliable methods which, from a practical point of view, were no more than clever makeshifts. From this point the making of porcelain became a comparatively facile business. Many pot-

ters embarked in it, and whereas, so far, the adoption of porcelain as one of the indispensable requisites of a well appointed household had remained the privilege of the wealthy, now it was placed within the reach of all.

The speaker here gave a survey of the march and progress of the art of porcelain making during the three periods to which he had alluded. Dealing with the origin of porcelain, he said that although tradition had it that porcelain had been manufactured in certain localities since very remote, indeed prehistoric ages, this misty notion was gradually losing ground. While there could be no doubt that certain uncouth earthenware vessels were made in very ancient times, the question was whether these legendary vessels were anything else but primitive stoneware. As a matter of fact, there was reason to believe that the immaculate and diaphanous porcelain decorated in azure blue, the well defined types with which our conception of the finest form of Chinese manufacture was closely associated, was probably not produced before the beginning of the 14th century. It was at that epoch that the first specimens of it were introduced into Europe.

On the last point, dealing with the period of vulgarization, the speaker referred at some length to the advance of the industry in Germany and France, and spoke of the rapid revolution which occurred on the discovery of apparently inexhaustible mines of kaolin within a short distance of Limoges. Successful trials of the materials were made at Sèvres in 1768, and from this point the manufacture spread so rapidly that at the end of the 18th century no fewer than 30 factories were started in Paris alone.

In England, after Cookworthy had made his discovery of the required china clay and stone, although results, technically successful, had been obtained at Bristol and at Plymouth, the manufacture of hard porcelain could never take root. The addition of these two important factors in the development of British industry could not, however, be overestimated, and it was needless to expatiate upon the part that kaolin and felspar, obtained from Cornwall, when associated with the phosphate of lime of bones, had played in the settlement of the composition of British china. So satisfactory had proved the methods initiated at the beginning of the 19th century, and followed ever since without material alterations, that we need not apprehend the necessity of having to discard them in favor of very superior processes for a long time to come.

Bernard Moore proposed a vote of thanks to Mr. Solon for his past services to the society. In doing so Mr. Moore said that for many years Mr. Solon had been known as one of the most leading men in the ceramic world. He knew of no one better known all over the world than their retiring president. They had looked with pleasure at the marvelous productions which, through his medium, had been given to the world, and which would live as a credit to the ceramic industry of the ages. Mr. Williams, in seconding, said Mr. Solon had been an exemplary president, and had attended every meeting during his terms of office.

VASES FOR SUMMER TRADE.

**T**ALL and graceful vases for the reception of Summer flowers are always an attractive offering for the jeweler to have on hand during the hot months, when the abundance of flowers makes the demand for a suitable holder most felt. A variety of patterns are shown at the different salesrooms from which the jeweler can make a selection. Among those who have attractive offerings is Julius Palmé, 40 Park Pl., New York. His display includes a tall flower vase in ruby and white glass and decorated with a spray of roses in their natural color, showing the green of the leaves as a background for the more dainty tint of the flowers. The dainty color of the ruby glass at the top of the vase blends nicely with roses or other flowers having that peculiar dainty pink. Novelties shown by this house include a pipe and cigar tray decorated with a gilt pipe and flowers in colors. Another ash tray is shown which represents a butterfly in white and gold. The effect is distinctly pleasing.

JEWELRY DESIGNS ON CHINA.

**O**N exhibition at the American salesrooms of Josiah Wedgwood & Sons, Ltd., 25 West Broadway, New York, is a most attractive line of china suitable for the jewelry trade. Plates with double acid borders and hand-painted wreaths, showing flowers in their natural colors, are prominent, as are other plates shown with acid gold rims into which are knit roses; between the large flowers are smaller ones so arranged as to form a most attractive decorative design. The house is at present getting out plates with acid gold borders which will have as a part of the decorative scheme a representation of jewels in their natural colors instead of flowers. The designs will include jewelry forms as brooches, showing pearls, sapphires, etc., set in the natural way. The jewel effects will be set into the border pattern of the plates. Samples of these goods are expected about Oct. 1, and the full line will follow later.

THE RAMBLER.

It was reported, last week, from Cleveland, O., that Charles Rogers, had at the door of his home, 1222 Walnut Ave., N. E., about 2 p. m., on the morning of July 21, been assaulted by two men and women who, after they had choked him into unconsciousness, robbed him of jewelry valued at \$200 and about \$130 in currency. When found, Rogers was in a precarious condition, his skull having been fractured in his fight with the robbers. His throat was also torn and his condition is critical.

**Read this unsolicited endorsement.**

From the *Detroit Free Press*,  
July 1, 1908.

**NOTED AUCTIONEER  
IN DETROIT**

Seller of the Sturgeon Stock Famous  
in His Line of Work

Many of the thousands that have attended the great auction sale of the stock of W. A. Sturgeon & Co., jewelers, will be interested to know something of the man that brought this sale to such a successful conclusion. It requires no special talent to sell average merchandise at auction, but in selling a stock as fine as that carried by Sturgeon & Co., a man of more than ordinary ability is needed. The magnificent collection of precious stones, the products of famous silversmiths, objects of art, etc., that comprise the largest stock of its kind in this section of the country, were described and sold by Mr. Hand in a manner both interesting and instructive. Never before has such a representative audience been collected at an auction sale in Detroit. This was due not alone to the high standing of the firm, but to the manner in which the sale was conducted. A raised platform built on the main floor of the store enabled the ladies to be comfortably seated and see each article exhibited and sold. The auctioneer, Mr. James L. Hand, is a resident of New York, a son of the editor of a leading daily paper of New Jersey. On finishing his college course he traveled much, visiting the countries famous for the production of the various arts, so that on embarking in the selling of high class jewelry, art wares, etc., at auction fifteen years ago, he found himself well equipped for the work. His eloquence and wonderful descriptive powers hold his audience interested and at the same time command confidence in the quality and value of the articles offered. The demand for Mr. Hand's services calls him to all the important cities of the country, and when asked the other day as to his opinion of Detroit, said: "It is the most beautiful city in the country and wherever my business shall call me, will sound its praises as the city where 'Life Is Worth Living.'"

**Some of the Reasons That Have Made Hand the Leader of Jewelry Auctioneers:**

His knowledge of precious stones, high class jewelry and art wares.

He knows how to address an intelligent audience and sell goods without exaggeration or misrepresentation.

He does not ask the jeweler to allow a cheap assistant to conduct his sale. He has no assistants. Assistants are usually men without individuality and cannot "make good."

He carries no goods to "sweeten" your stock. If you need them your jobber will supply you.

He guards your reputation and leaves you with more friends than before your auction.

The successful auction to-day must be conducted on lines up-to-date, so beware of the old timer with antique methods.

Before you select your auctioneer send for my booklet on auctions. It gives references from leading jewelers and wholesalers of this country.

*The Special Manufacturers for the Retail Jewelry Trade*

47 JOHN STREET, NEW YORK

57 WASHINGTON STREET, CHICAGO

**Pearl Setting Plier, No. 327**

This tool should prove a useful addition to any jeweler's outfit. It is intended for setting half pearls or other stones of similar shape, which are imbedded in gold or other metal. It is used for cutting a burr and forcing it against the stone, either in brooches or rings, thereby holding the stone securely without liability of the tools slipping or breaking the stone, as is often the case with the use of other tools. The lower jaws are half round, to conform to the inner shape of rings. The work can be done more perfectly and under better control than with gravers or other tools used heretofore.

Made of best Swedish steel, nicely nickel-plated.

**Price, each, \$1.25**

**Randall  
Jewel  
Lamp**

Cut is full size

**Price, each,  
50c.**

Especially designed for work where very small flame is essential and very desirable when cementing roller and pallet jewels, for drawing temper of pivots and annealing small parts of watches. Made of brass full nickel plated. Has rubber washers inside of cap and under the hood to avoid leaking and evaporating.

**Guaranteed "E. F. B." Turning Gravers No. 33**

**Price, per set of 7, in case, \$3.00**

The finest set of gravers on the market. Handle is of the finest cocobolo, fitted with nickel plated socket in which the gravers can be moved in or out as desired. The two set screws hold the graver rigid and prevent rocking or chattering. They will be appreciated by all users of fine tools.

**Phesay's Two-In-One Soldering Tweezer**

**Price, each, 75c.**

By using Phesay's Two-in-One Soldering Tweezer the joint catch or Back is handled only once.

**SAVES TROUBLE.**—Phesay's Two-in-One, Soldering Tweezers will solder plumb and true. Will not let article slide when solder flows. Will hold pieces of jewelry with rounded stones or flat surfaces with equal firmness.

**Improved Turning and Jeweling Attachment No. 33**

**New Features**

Adjustment for alignment, fine feed, with direct connected screw. Positive binder operated by slight movement of the thumb or finger. Cutters may be changed quickly. No small projecting parts to become lost or broken. Special cutters can be made from wire.

**And Other Good Points**

One tool may be used on different makes of

lathes by simply changing tapers. Can be changed quickly.

**All Standard Tapers in Stock**

Each attachment is furnished with two cutters, one burnisher and two blanks. In ordering, please give name and size of lathe. **Price, each, \$4.50**

**"Ideal" Pins for Engraving Blocks**

**Per set of 4 with 4 pure rubber tubes, 50c.**

The faces are milled to various shapes to take regular and irregularly formed articles. The few illustrations show their possibilities. Four pure rubber rings are furnished to slip over the pins when very delicate and highly polished articles are to be clamped. Made for all Standard Engraving Blocks. Please state name of Block when ordering.

## Read Our Customers' Letters

GARDEN CITY, Kans.,  
Jan. 11th, 1908.

THE ARNSTINE BROS. COMPANY,  
Cleveland, O.

Gentlemen:—After comparing my '07 December trade with other merchants' trade, considering financial conditions as they existed, I am satisfied my Catalogs gotten from you helped my trade fully 25 per cent. I am well pleased with the results I received from them.

Yours truly,  
C. E. DICKINSON.

This firm used The Arnstine Bros. Company Catalogs in 1907, and have again placed an order for 1908.

PUEBLO, Colo., January 12, 1908.

THE ARNSTINE BROS. COMPANY, Cleveland, Ohio.

Gentlemen:—Replying to your inquiry of January 8th, relative to the results we obtained from the use of your catalogue for the holiday season just passed, we are pleased to say that the results we had were quite satisfactory to us, and in spite of the depression existing at that time our sales showed an increase over the previous year. We received quite a number of mail orders and believe we will, in time, secure a large increase of out-of-town customers.

We will want the catalogue again this year.

Yours very truly,  
THE RUSHMER JEWELRY COMPANY.

This firm used The Arnstine Bros. Company Catalogs in 1907, and have again placed their order for 1908.

We have Salesmen in every State in the Union. If you are interested, and will notify us, our representative will take pleasure in calling on you and explaining our method

16th Year

WEDNESDAY, AUGUST 12, 1908

Vol. VI. No. 12

In less than two weeks we shall open our SIXTH ANNUAL EXHIBITION, which will continue at our offices from August 24th to 29th, inclusive. Our preparations for this display began about six months ago and are now almost completed. We earnestly urge those Jewelers contemplating a visit to New York so to arrange their trip as to make it convenient to attend this important Exhibition. We shall not dwell upon the merits of the goods to be displayed, but shall leave it to the discrimination and judgment of the visitor to discover these merits for himself.

If we can be of any service in securing proper accommodations for you when you visit New York, advise us and the matter will receive our earnest attention.

## A NEW WHITING PATTERN

## The "Madam Jumel"

The Whiting Company's new pattern, the "Madam Jumel," while thoroughly Colonial in its general simplicity of line and reticence of ornamentation, suggests in its pervading grace the spirit of the late 18th Century French Neoclassicism.

It is entirely appropriate, therefore, that a pattern displaying these characteristics should be associated with the name of one who, during Revolutionary time and later, was historically prominent as a social link between her own countrymen and their French sympathizers.

The "Madam Jumel" is produced in a complete line of spoons, forks and fancy flatware, and will be ready for delivery September 15, 1908.

## Individuality

In your selection of bags it behooves you to buy those bags which stand out prominently as possessing an individuality of pattern, as opposed to the common goods scattered promiscuously around. You will find that the women know and discriminate in favor of the former every time. An inspection of the W. & D. line by you will lead you right.

925  
STERLING 1000

Is not confined to its beauty in design and finish but to the general skill and workmanship that enters into the making of every piece of Flatware, Hollowware or especially designed products. Originality, quality, and material have gained for this Company an enviable reputation throughout the entire trade.

FRANK W. SMITH CO. Manufacturers of Sterling Silverware  
GARDNER, MASS.

## HERE IT IS AT LAST!

Just what you **have** been looking for and have had calls for time and again. A **German Silver Wrist Bag with a Soldered Mesh.** Somewhat higher in price than the unsoldered mesh? Of course! But you can now sell a bag that will not break and one you can guarantee. Twelve patterns, 4", 5", 5½", 6", 6¼" widths.

**We are still headquarters for high grade Sterling Silver Bags, and have also added a line of Change Purses.**

Our goods are made on honor; we believe with Ruskin that "A composition for cheapness, and not for excellence of workmanship, is the most frequent and certain cause of the rapid decay and entire destruction of arts and manufactures."

## Sternau Coffee-Machine = Good Coffee

The one insures the other. The Sternau coffee-machine has done much to educate the public taste for good coffee. At one time we were perforce content with thick, muddy coffee; now there is no excuse for anything but the clear amber beverage fit for the gods. The Sternau coffee-machine has made this possible. Poor coffee cannot be made with it. All the delicious taste and wonderful aroma is extracted from the bean by the process of distillation. Prospective buyers and competent housekeepers know this. Progressive jewelers are stocking Sternau machines more fully every day, thereby gaining greater sales. Prices and illustrations on request.

*LA  
VOGUE  
DIRECTOIRE*

*AN  
INSPIRING  
PERIOD*

**T**HE EPOCH following the Revolution but preceding the Empire witnessed a marvelous artistic impulse which took its inspiration from Greece, but added the distinctive touch of French genius. This was the period of the Directoire, whose artistic influence during the present season will be of the most widespread character. Jewelry, dress, coiffure, furnishings — everything will feel the impulse. The representatives of this house, in extended visits to France, have made exhaustive studies of the jewelry of the period and have garnered its richest treasures. These creations will delight you, while their moderate prices open splendid avenues to profit. Incidentally, sapphire will be the reigning stone.

# ENGELSMAN'S PATENTED COMBINATION "GEM" DISPLAY RINGS and ADJUSTABLE STONE HOLDERS MEET A LONG-FELT WANT

### THEY ARE MONEY-MAKERS AND MONEY-SAVERS

UNMOUNTED STONES of any size and shape can be displayed advantageously, as is herein illustrated. Your investment in stock can thereby be *decreased*, as you need not mount them up in expensive settings. Your sales will also *increase* by being able to exhibit unmounted stones. The prices are *low* enough to induce you to buy them and *save* you from incurring frequent losses caused by the awkward handling of the tweezer when your customer desires to examine unmounted stones. Try them. For sale by all jobbers.

Due to greatly improved automatic machinery and reduced cost of production, we are now quoting these as follows:

Sets of 18 (full set), in box,	\$6.00
" " 12	4.00
" " 9	3.00

# The "Krementz-Bodkin Back" STUD and VEST BUTTON

Pat. Feb. 16, 1904

Krementz & Co. believe the trade will agree that they understand the jewelry business sufficiently to know that the "Krementz-Bodkin Back" Stud and Vest Button is the simplest and best mechanical Stud or Vest Button made.

The "Krementz-Bodkin Back" Stud and Vest Button is not one piece, but is one-piece construction, which makes it very simple and the strongest and most durable, because:

- 1—It is Solderless
- 2—It has no spring or hollow wire to bend or break
- 3—It is made of solid, hard spring metal throughout
- 4—It is made by Kremenz & Co. which insures perfect quality, construction and workmanship

THE STORY OF THE HEAD

## Krementz & Co. Invite Comparison

Krementz & Co. stand back of their assertion. All "Krementz-Bodkin Back" Studs and Vest Buttons are sold also under the unique Kremenz Collar Button Guarantee.

THE STORY OF THE BODKIN BACK

### GUARANTEE

If for any cause whatever, a "Krementz-Bodkin Back" Stud or Vest Button should be damaged either in the hands of the dealer or wearer, a new one will be given in exchange, without charge. "Krementz-Bodkin Back" Studs and Vest Buttons are made in large variety of patterns in 14-kt. gold and platinum, set with pearls and diamonds.

of  
Stock  
Orders

A THOROUGH and systematic laying in of regular stocks is now in order. Your season will depend on how you do it.

Past experience shows the exceptional selling qualities of the Day-Clark lines. They are known to cater successfully to a very wide and desirable trade. The high standards heretofore maintained, still prevail.

When considering your stock orders, you are invited to inspect the season's displays here. They cover just the goods and the kind you want.

## Interchangeable Scarf Pin

PATENT PENDING

The smart dresser wears a pin to harmonize with his cravat. Our new device permits the wearer to use a diamond or pearl in combination with any colored stone, such as Lapis Lazuli, Moonstone, Turquoise Matrix, Jade, Topaz, Amethyst, Garnet, etc., by merely snapping the colored stone on the pin, as shown in illustration. Easy to attach or detach—nothing to break. Made in 14 Kt. only.

# THE Ægis Case

(PATENTED)

**T**HE ÆGIS is a new creation in gold case making. The center and bezel are in one. Instead of having the ordinary Cap, this case is provided with a rigid metal movement Cup, held friction tight in position. This Cup gives protection to the movement such as cannot be secured with the conventional jointed cap, while dust is thoroughly excluded from the front by means of the one-piece center and bezel.

**IMPERIAL WESTMINSTER  
ELECTRIC CATHEDRAL CHIMES**

OPERATED FROM ANY STANDARD CLOCK  
at ANY DISTANCE by 10 Dry or Wet Batteries

On exhibition at our sales-rooms, 81 Nassau Street, New York.

Received Diploma and Highest Award Medal at the Lewis & Clark Centennial Exposition, Portland, Oregon, U. S. A., October, 1905.

The music of the chimes is the same as the famous Cathedral Chimes of Westminster Abbey, London. Makes a quarter-hour strike of any silent or striking clock, converting it into a wonderful Chime Timepiece.

Registered and Patent Applied For

Special Note—By the old methods, to obtain a Clock Chime Timepiece and the wonderful volume of sound and the sweet, clear tones in the chimes—to be heard at a great distance—they could only be procured at the enormous expense of \$5,000, while our most expensive set is but a slight fraction of this cost.

MANUFACTURED BY

**The W. GREEN ELECTRIC CO.**  
81 Nassau St., New York, U. S. A.

# Real Rose Hat Pins

Every genuine DEL-AMOTHE Real Rose Hat Pin has the name stamped on the pin here.

**This will be the largest selling article this Fall and Winter—it is already.**

So remarkable are the sales of DELAMOTHE Real Rose Hat Pins that we do not expect dealers to believe same until they have actually tried them out. It does not seem possible that during JULY this product was sold by Retailers at the rate of two to twenty dozen daily—EVERY day. The Retailers' profit is unusually large. Not only are they proved big sellers, but they are a great attraction for the stores that sell them. The largest Advertising Campaign in years is behind this product. Every possible Advertising and Selling Help will be furnished Dealers gratis. This product will be sold to the best Dealers only, and retail prices will be strictly maintained.

DELAMOTHE Real Rose Hat Pins are made out of live roses, changed by a secret process into metal, then finished in attractive colorings and mounted on Hat Pins. This SECRET process is a recent discovery of Prof. L. G. Delamothe, a noted French Electro-Chemist, and is owned solely by the Delamothe Natural Art Decorating Co., Spokane, Washington, for which this Company is the Sole Distributor. It is the ONLY process by which an OPEN Rose can be perfectly metallized. This product is made in the finest manner possible, and its high quality will be maintained. The Roses used are grown in Oregon and Washington, famous the world over for their beauty and superiority—made where these Roses grow. No two Real Rose Hat Pins are alike. Finished in five colors to conform to the prevailing fashions in millinery. Six sizes, from the smallest rosebud to the full blown flower.

**Not sold through Jobbers.**

*Do not buy inferior imitations. Sold direct only.*

## Beautiful Casket Presented to the Prince of Wales by the Citizens of Quebec.

IN the issue of THE CIRCULAR-WEEKLY, July 2, mention was made of the beautiful casket that the citizens of Quebec presented to his Royal Highness the Prince of Wales. It was the work of the firm of Richard Hemsley, Montreal, through whose courtesy we are enabled to present the illustration which appears on the front cover of this issue.

As before noted, the casket is of the finest frosted gold and is designed in form of a cigar case, so that the recipient may, if he

chooses, use the casket for that purpose. It is seven inches high, 11 inches long and seven and one-half inches wide, and has a total weight of 150 ounces or more. Within the gold casket there is an inner case of genuine Canadian cedar, and within this was the illuminated address of the citizens of Quebec to the Prince.

On the front of the casket are the arms of Quebec in a medallion in colored enamels: the cliffs, fort and ship in the background. In the central foreground of the medallion is an allegorical female figure, seated at whose feet is a Canadian beaver. In her right arm is supported a cornucopia, while beneath this is a beehive, and at the figure's side there rests a shield, with the old Quebec arms upon it, namely a lion holding a key, signifying the holding of the key to the continent by the city of Quebec. The medallion is framed with a wreath of laurel, around which is entwined

a ribbon, with the motto in blue enamel: *Natura fortis industria crescit* (by nature strong, increasing by industry). The whole medallion is surmounted with a mural crown. Beneath the frame is a ribbon in blue, bearing the words: *Troisieme centenaire de Quebec* in gold letters.

To the left of this are the "Ich Dien" and gray ostrich feathers of the Prince of Wales in enamel, and to the right the Prince's coat-of-arms, which are the royal coat-of-arms, with two additional signs imposed upon them in extra relief—the peculiar bar indicative of the eldest son across the chief, and the arms of the House of Hanover in

The casket rests on feet of eagle's claws clasping a ball at each corner, and the corners of the box are decorated from top to bottom with acanthus leaves. The whole decoration is in gold with the exception of the enamel, which is in rich color, and the general effect is most impressive.

The top bears a medallion portrait of Champlain from authoritative sources, executed in enamel painting upon enamel over silver, surrounded by a plain frame of gold, with the enamel lettering, "Champlain, 1608," and that in turn surrounded by gold laurel wreath and maple leaves.

The casket was on view at the store of Mr. Hemsley, St. James St., until July 18, when it was conveyed to Quebec.

Mr. Hemsley and a skilled staff of assistants were engaged on the work for several weeks, and no expense or time was spared to make the casket a perfect work of art and a credit to Canada.

### Sapphires in Idaho.

THE occurrence of gem sapphires in Idaho has been announced by Dr. Robert N. Bell, State Inspector of Mines. The sapphire was first found in the concentrates from the Rock Flat placer gold mine, near Meadows post-office, in Washington County. The possible gem value of the stones was first recognized by Dr. Bell, who sent specimens to Dr. Kunz for confirmation. The deposit is located on a high plateau divide between the Salmon and North Payette rivers.

The general formation of the district is gneiss, and the corundum crystals, which include some of excellent gem quality, seem to be derived from a wide dike of basaltic clay formation with a peculiar spheroidal structure. The gem stones are found associated with a great array of pyrope garnets in the clean-up boxes of an old placer pit.

Some beautiful gems have been found. They occur in variety of colors, the Oriental amethyst shades predominating. Most of them have an opalescent silky sheen and are not of high value, but would cut into excellent cat's-eyes and star sapphires. Some bronze crystals would also make handsome tiger-eye sets. Some small stones, however, of fine quality have been found, which, when cut, are as large as one-half to one carat, and have a beautiful clear cornflower blue color. Others make brilliant pink stones as large as one and a half carats in weight. The crystals also include some of poor red quality, but nothing as yet approaching a true ruby color.

Dr. Bell placed the value of sapphires from this locality sold in 1906 at about \$300. The highest price stone was a brilliant pink gem weighing one and a half carats and valued at \$20.

Development work has been started on the dike formation and consists of a drain-

chooses, use the casket for that purpose. It is seven inches high, 11 inches long and seven and one-half inches wide, and has a total weight of 150 ounces or more. Within the gold casket there is an inner case of genuine Canadian cedar, and within this was the illuminated address of the citizens of Quebec to the Prince.

On the front of the casket are the arms of Quebec in a medallion in colored enamels: the cliffs, fort and ship in the background. In the central foreground of the medallion is an allegorical female figure, seated at whose feet is a Canadian beaver. In her right arm is supported a cornucopia, while beneath this is a beehive, and at the figure's side there rests a shield, with the old Quebec arms upon it, namely a lion holding a key, signifying the holding of the key to the continent by the city of Quebec. The medallion is framed with a wreath of laurel, around which is entwined

the center of the shield. The crown above is the same as the King's except for the absence of the gold side.

On the right hand side of the casket is an enamel of Champlain's well-known drawing of his first "habitation" at Quebec, within a frame of mussel shells in gold, with gold laurel leaves and ribbon.

On the left is a similar enamel of the Don de Dieu, Champlain's ship.

The back bears the presentation inscription in gold lettering in blue enamel—a very fine piece of work, in an ornate frame of pierced old scroll work, with maple leaves in the corner.

The dedication reads:

*"Adresse des citoyens de Quebec a Son Altesse Royale le Prince de Galles Presentee le 23 Juillet, 1908, a l'Ouverture Officielle des Fetes du 111e Centenaire de la Fondation de Quebec par Samuel de Champlain."*

## DURING THE SPRING

OUR FACTORY has been very busy getting up many new patterns in our various lines of gold jewelry.

OUR PATTERNS AND PRICES are so attractive that they merit the attention of all progressive retail jewelers.

OUR TRAVELERS are now starting out with more new goods than ever before.

OUR CUSTOMERS will be wise in carefully considering the lines of 14k. and 10k. gold rings, 14k. lockets, 14k. link and stiff bar buttons, 14k. Larter shirt studs, 14k. Larter vest buttons and 14k. tie clips which our travelers are now showing.

age tunnel to cut the dike at a depth of 80 feet. Connection will doubtless be made with the surface and the working of the deposit be thereby greatly facilitated in the near future.

Since basaltic dikes, similar to the ones at Meadows, are common near the placer deposits found in the eruptive granites of central Idaho, other sapphire discoveries are likely to be made in placer mining, especially in those places where opaque corundum has already been found.—*Mineral Collector.*

### Exports of Jewelry, Clocks, Watches, Silverware and Kindred Lines from the Port of New York.

WASHINGTON, D. C., Aug. 5.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

Auckland: 4 cases plated ware, \$117.  
 Berlin: 13 cases clocks, \$1,179.  
 Bombay: 1 case watches, \$127.  
 Bremen: 2 cases plated ware, \$100; 5 cases watches, \$4,758; 2 cases jewelry, \$130; 1 case silver ware, \$1,000; 4 cases clocks, \$300.  
 Buenos Ayres: 12 cases plated ware, \$1,718; 3 cases optical goods, \$517; 20 cases clocks, \$395; 3 cases optical goods, \$322.  
 Buenasentora: 1 case jewelry, \$126.  
 Calcutta: 10 cases clocks, \$239.  
 Cherrulpo: 27 cases clocks, \$563.  
 Copenhagen: 8 cases scopes and views, \$360.  
 Corinto: 14 cases clocks, \$488.  
 Fayal: 2 cases plated ware, \$150.  
 Guayaquil: 5 cases scopes and views, \$480.  
 Hamburg: 4 cases jewelry sweepings, \$4,000; 3 cases optical goods, \$262; 6 cases jewelry, \$195; 6 cases optical goods, \$953.  
 Hayana: 1 case jewelry, \$102; 2 cases jewelry, \$224; 6 cases optical goods, \$232.  
 Havre: 1 case clocks, \$240; 5 cases jewelry, \$696; 1 case silverware, \$1,500; 1 case optical goods, \$251.  
 Hong Kong: 93 cases clocks, \$1,463.  
 Liverpool: 1 case plated ware, \$100; 1 case jewelry, \$800; 4 cases jewelry, \$606; 16 cases clocks, \$465; 72 cases precious stones, \$600.  
 Matanzas: 36 cases clocks, \$582.  
 Melbourne: 2 cases plated ware, \$113; 2 cases silverware, \$225; 1 case watches, \$736; 6 cases clocks, \$100; 1 case plated ware, \$164; 16 cases clocks, \$494.  
 Montevideo: 1 case plated ware, \$150.  
 Moscow: 3 cases clocks, \$225.  
 Pallimo: 1531 cases precious stones, \$450.  
 Santos: 19 cases clocks, \$341.  
 Shanghai: 30 cases clocks, \$466.  
 St. Petersburg: 32 cases clocks, \$1,160.  
 Rangoon: 20 cases clocks, \$278.  
 Rosario: 5 cases plated ware, \$337.  
 Rio de Janeiro: 23 cases clocks, \$583; 4 cases plated ware, \$518; 2 cases optical goods, \$916; 3 cases watches, \$1,240; 1 case jewelry, \$435.  
 Valparaiso: 12 cases clocks, \$116; 1 case watches, \$292.  
 Vera Cruz: 4 cases plated ware, \$244; 8 cases clocks, \$103.

### M. L. Clopton, Jr., Lufkin, Tex., Files a Petition in Bankruptcy.

LUFKIN, Tex., Aug. 5.—M. L. Clopton, Jr., a local jeweler, recently filed a voluntary petition in bankruptcy, and the schedules which accompanied the petition showed liabilities of \$1,200 and assets of \$10,000, of which amount \$1,000 was claimed as exempt.

Mr. Clopton has been in business in Lufkin since 1902, and had a good trade until last Fall, but recently has been unable to collect his outstanding accounts, and this is said to be the real cause of his present embarrassment.

Mr. Clopton was formerly a member of the firm of Henderson & Clopton, which he later succeeded.

**REPOUSSÉ WORK AND CHASING\***

ILLUSTRATED AND DEMONSTRATED BY AN EXPERIENCED ARTISAN

(Continued from issue of July 15.)

THE "Green vaults" at Dresden previously mentioned probably hold the most sumptuous collection of silverware and jewelry in the world; its actual value being estimated at close on £2,000,000. Most of this work dates from the days of Frederick Augustus, surnamed the Strong, the Elector of Saxony and King of Po-

land, who had the most luxurious court in Europe. Although wonderfully skilful, most of this work, which is in the style termed "baroque," from a Latin word meaning excrescence, must be classed to a period of decay, as far as true artistic merit is concerned, when the goldsmiths had thrown over the last remains of classic simplicity and restraint. The most important goldsmith of this period was Johann Melchior Dinglinger (1665-1731), who studied at Augsburg, then went to France, and finally settled as the goldsmith of the Elector in Dresden in 1702.

certain dignity about it which was entirely absent in the Rococo style that followed it. Although Oppenhard and Meissonier, who were at the head of this style, were architects, most of the work in this style lacks construction, the main shapes are often contorted, and there is no systematic arrangement of decoration, the ornament being almost anywhere as if by accident. Towards the close of the life of Louis XV. there was another change in style, probably owing to the discoveries of Herculaneum and Pompeii, and the metal-work there found, which once again turned the attention of artists towards classical art. During the reign of Louis XVI. this was well developed. The silver plate of this period abounds in decorative details borrowed from classical antiquity, and is, on the whole dignified and well-proportioned, and a great improvement on the Rococo style.

FIG. 1. ELEVATION OF COMMUNION CUP AND PATEN.

land, who had the most luxurious court in Europe. Although wonderfully skilful, most of this work, which is in the style termed "baroque," from a Latin word meaning excrescence, must be classed to a period of decay, as far as true artistic merit is concerned, when the goldsmiths had thrown over the last remains of classic simplicity and restraint. The most important goldsmith of this period was Johann Melchior Dinglinger (1665-1731), who studied at Augsburg, then went to France, and finally settled as the goldsmith of the Elector in Dresden in 1702.

LOUIS XIV.

Although French work in the time of Louis XIV. was heavy and cumbersome and not very beautiful, there was still a

\*All rights reserved. Copyright, 1907, in the United States by the Jewelers' Circular-Publishing Co., and in Great Britain by the Watchmaker, Jeweler, Silversmith and Optician.

FIG. 2.  
A = size of circle to be cut compared with bowl.  
1, 2, 3, 4, 5 = different stages in process of raising the bowl.

A noticeable feature are the animal supports so often met with in Græco-Roman work.

In England the brothers Adams, who were architects, did much to develop a style on these lines, and their work established a "style" of which several specimens are in South Kensington, and which closely resembles Græco-Roman.

After the death of Louis XVI. came the deluge, and in the days of the revolution in '93 a greater destruction of old plate took place than even France had ever witnessed before. Then came the French Empire under Napoleon, and with it a return to a semi-classical style, but without the saving graces of the style in the days of Louis XVI.

In this country no new style was introduced during the 19th century, the best silversmith work being designed by the prominent artists of the day. Flaxman designed the famous Wellington Shield, and, among other things, some plate which is now in the Royal collection at Windsor; copies of some of these can be seen in South Kensington Museum.

This, briefly, is the history of the craft until the present day, and although very short (nothing in the way of a detailed and elaborated history being attempted) it is hoped that the main lines on which the art of the silversmith has developed in the different countries has been made clear, and also that it will enable the reader to

more readily understand and determine the particular style (if any) of a piece of silverware.

He will find that nearly all silverwork of modern times is made in one or other of the styles prevalent years ago, be it Antique, Gothic, Renaissance or Rococo; very little really original work being attempted.

THE MAKING OF A CHALICE.

It is now proposed to deal more particularly with the practical side of silver-smithing and for this purpose explaining the making of various objects right through from start to finish.

We will take as a first piece an English Communion cup of the type prevalent in the 16th century. The particular one of which the first sketch (showing the elevation) is given this month was made in 1570 A. D. It serves our purpose very well as the "raising"—that is, the shaping of the various parts from circular pieces of sheet-metal—is comparatively simple, and there is very little ornamentation, the whole being in keeping with the Puritanical sentiment which prevailed in the days of the Commonwealth. The small paten (shown

in the sketch), when not in use, served as a cover for the cup. The main feature of the cup is the high and beaker-shaped bowl which is in marked contrast to the much more shallow bowls of the chalices. In explaining the making of the various parts, the size in each case will be taken from the sketch as shown by the scale; the total height of the cup (without paten) being 7 inches.

Beginning with the bowl of the cup, it will be found that this is about 3 3/8 inches deep and 2 1/2 inches wide at the base. To obtain this shape a circular piece of metal 7 inches in diameter should be cut out of a sheet size 14 Shakespeare gauge; this will be found a convenient thickness to work in. It should be noted that a 7-inch circle only gives you 3 1/2 inches either way measuring from the center of the base, and this would take you only 2 3/4 inches up either side, whereas they actually measure about 4 inches, but allowance must be made for the stretching of the metal in the course of hammering it into shape.

When cut out with the shears the edges should be trimmed up with a file before hammering. It should then be roughly beaten into a shallow cup (something like No. 1 in the second sketch) by means of a round-headed mallet or hammer on a wooden block which has been slightly hollowed out in the center. Then anneal it carefully, and when cool mark three or four consecutive circles on it with a pair

of dividers, the smallest one being rather larger than the bottom of the bowl is to be, eventually that is about 2¾ inches.

The "shaping" is now continued in gradual stages by beating on the *outside* of the bowl with a "raising" hammer; the bowl being held on an anvil (with a slightly convex face and small enough to allow the bottom of the bowl to be formed) with the left hand and moved round and round in consecutive circles as it is struck with the hammer in the right hand, so that the hammer-blows travel in a close spiral to the top of the bowl. Care should be taken not merely to stretch the metal, but by holding it at a slight angle (that is, with the top of the bowl away from the anvil) to actually drive the metal in and up. This is a process rather difficult to explain on paper, but a few minutes' practical demonstration by a silversmith would make matters clearer.

When you have worked round the bowl in this manner it should look something like No. 2 in the sketch. The hammering will have driven the cells of metal together, and the bowl will in consequence be very hard and springy. It should then be annealed—by which process the cells of metal expand and the whole is consequently softened—and the "shaping" taken a step further by repeating the hammering process exactly as before, just driving the metal in and up until it is something like No. 3 in shape. The same process is then repeated again and again until the required shape is obtained, taking care not to attempt to draw in the metal too much at a time, as this will result in cracks which even if carefully soldered are always unsatisfactory. It should be remembered that the bottom of the bowl is only 2½ inches wide, and as the "raising" process was commenced with the bottom rather larger, it should be taken in a little smaller after each annealing; a slightly smaller circle being marked and the metal beaten away from it in the same way as before.

The marks made by the hammer falling on the metal at an angle in the process of raising have now to be taken out. This is done by hammering the bowl over with a "planishing" hammer on the same anvil as before. In this case, however, neither the bowl nor the hammer are held at an angle, and care must be taken that the particular part of the bowl which is struck by the hammer is resting squarely on the anvil, and also that the metal is struck firmly but not too hard with the full face of the hammer. W. S.

(To be continued.)

**Jewelers' Gold Bars Withdrawn and Exchanged at New York.**

Week Ended Aug. 8, 1908.

" 8.....	5,279.75
Total .....	\$379,648.68

**Facts Concerning Inferior Precious and Ornamental Stones.**

By Emil Freund. 3

**M**ANY stones for a time unknown to the jeweler appear to be now used to a great extent for jewelry purposes. These stones and their respective names were, and are, known to the mineralogist, lapidary and stone dealer, but are now used generally for jewelry. Many of the stones were known by the names as are now used to designate them by Pliny and other *savants* among the Romans. That semi-precious stones were known in prehistoric epochs as jewels is, and should be, well known. In central Europe amber was the first gem; in Mexico, amethyst, red jasper and bright-colored fluorspur were used.

The expression "semi-precious" stones has found foothold in the precious stones trade, and is used for some of these gems. This expression, if carefully looked into and studied, is entirely wrong. Any stone used as a gem for jewelry, which is scarce, beautiful in luster, etc., is a *precious stone*. The name "semi-precious" stones is used (according to the writer's opinion) only because some of these so-called semi-precious stones were not known to the ancients, and made their appearance in later years and used in jewelry. It would be, and is, very hard to draw a line between "precious" and "semi-precious." The best name for the latter class of stones would be precious stones of an inferior rank, adopted according to the French mineralogists—Ed. Janetaz, Em. Vanderheyem, E. Fontenay, A. Constance, etc.—who call the so-called semi-precious stones "*Pierres Precieuses d'un Rang Inferior.*"

The writer wishes to call the manufacturing jewelers' attention to the fact that most or some of these stones ought to be treated with the greatest care. For example: Chrysoprase will stand washing in water with ammonia, but not in alcohol; turquoise should never be put in alcohol; opals should never be placed in hot water, etc. As all this is known to us, it is advisable that the jeweler set the stones *after* the article in which they are mounted is entirely finished, polished, colored, etc., because the pickle, acids, etc., will have a bad effect on the stones, and all the preventatives known, like covering the stone with paper, painting it with garlic juice, hard wax, etc., will have no effect.

Therefore, I recommend caution, and I cannot emphasize this too strongly to the manufacturing jeweler. Of late years so many substances, acids, etc., are imitated, that the use of some, now sold, which would be harmless, if pure, are harmful to some of these gems. A harmless wash for stones of any kind after they are set is a light solution of hot water and a little household soda and plain pure soap. The water should not be too hot.

**AMAZONITE.**

Amazonite, a verdis green variety of prismatic feldspar, is readily mistaken for green jade on account of its color. Amazonite is often associated with small white crystals of albite, and is found near Fort Troitzk. It is also found in America, as

well as in Siberia. The amazonite is absolutely opaque. As it takes a very bright green polish, its color is a beautiful pear green, and the longer it is looked at the brighter and more beautiful it appears. It was known to the ancients who procured it from the east, but we are not certain by what name they designated it. This gem, which is easily engraved, can be used with fine effect in every sort of precious ornament.

**AZURITE.**

The azurite, also called azurite-malachite, is a beautiful stone. It is found in transparent, translucent or opaque conditions; its color is azure blue of various shades, passing into blackish blue and berlin blue. The luster is vitreous, barely adamantine. Azurite, like malachite, in acids is soluble with effervescence, which is not immediate, but requires heat to produce.

This stone is sometimes found as concretionary masses inhamelons, which are sometimes so close together that they become joined. The little crystals which protrude from the surface give it a velvety luster. It has been found in little balls, which are evidently the product of decomposition, since they contain some oxide in their interior. The massive pieces are not always uniform in color, but are found as concentric zones, made up of different shades of blue. The earthy varieties often resemble lapis-lazuli, or vivanite. The luster of earthy varieties of vivanite is quite different, but it can quickly be distinguished by the blow-pipe or by acids. It has been reproduced artificially. When found abundantly it is a valuable ore of copper. It has been found in many of the copper mines of the United States.

**MALACHITE.**

Theophratus says: "The malachite is a false emerald." The malachite is a beautiful emerald green stone well known in ancient times. Malachite is usually found in nodular masses, which have a fibrous structure, rarely conchoidal. Its luster is silky and velvety. The color is green, and may be of different degrees of intensity, streaked, pale or dark in color, also often spotted. This stone takes a very high polish. The hardness is 3.5-4, specific gravity 3.7. These masses present a variety of shades, which, are, owing to different causes, a change in the direction of the fibers, a difference in the state of hydration of the mineral, or an admixture of other substances. This banded, silky and velvety appearance causes malachite to be sought for as an object of ornament. It is often found mixed with other minerals, which causes a change in the tint of the green. Some varieties resemble chryso-colla, but are distinguished by effervescing acids. It is a valuable ore of copper when found in large quantities. It is extensively used for articles of ornament, and is often used for veneering large articles, such as tables, doors, etc. A mass weighing 40 tons was found in Siberia. It has been found in small quantities in most of the copper

# New Patterns Now Ready

Trade-Mark

Registered

Our new line for the season of 1908-09 contains many absolutely new designs of unusual beauty and timeliness. We offer many unique pieces in diamonds, and combinations of diamonds and precious and semi-precious stones; all in the best of taste and all finished specimens of the best art work in jewelry, and we also have the staple patterns every Jeweler needs.

Our salesmen can show you these pieces, or we shall be glad to send you an assortment if you will tell us what you are interested in. Write us.

mines of the United States. In Cornwall, Pa., it is sometimes found in quite heavy pieces of a light green color; it is also found in New South Wales and the Burra-Burra mines in South Australia, in Africa, Hungary and the Ural mountains, the Tyrol and in Siberia.

#### EPIDOTE OR THULITE.

Epidote crystallizes as an inclined rhombic prism, with an easy cleavage parallel to the base, and also one parallel to the orthopinacoid, which gives it a fracture that is lamellar in one direction and sometimes fibrous. The luster is vitreous, but variable on the different faces, sometimes pearly or resinous. Transparent, translucent, opaque, the color is a pistachio green, yellowish or brownish green, black or greenish black, gray, greenish white, sometimes violet and sometimes clear red. Generally epidote is of a more or less dark green color, usually of a peculiar pistachio green, slightly yellowish. Some of the yellowish varieties are dichroic; they are reddish yellow in one direction and greenish yellow in the other. There are white varieties, but there is some doubt whether they are really epidote. The hardness of this stone is 6.7, gravity 3.25-3.5. Epidote is found in Norway, Saxony, Siberia, Brazil, on the St. Gotard, Alaska, North Carolina (stream beds), Pruzzan and Austrian Tyrol. Epidote takes a very high polish and is a very ornamental jewel stone.

The rose variety called "thulite" is found associated with cyprine and is very rare. It is not known to what the rose color is due. It is always crystallized or crystalline. Its color might cause it to be confounded with some of the cobalt minerals, but its hardness will distinguish it. The name thulite is from Thule, an ancient town of Norway, where most of these stones come from. Its hardness and gravity are like epidote, and it takes a high polish. Large crystals of epidote have been found also at Warren and Franconia, N. H.; Haddam Corner, in New York, New Jersey, Pennsylvania and Lake Superior.

(To be continued.)

#### Recent Decision by the United States General Appraisers on Jewelry and Kindred Lines.

Decisions of the Board of United States General Appraisers, New York, in cases involving duties on jewelry and kindred lines have been announced in the last week as follows:

**JEWELRY.**—Protest of American Express Co., protest of M. Goldberg, protest of J. G. Johnson & Co., protests of D. Lisner & Co. *et al.*, protest of R. H. Macy & Co., protests of Syndicate Trading Co. *et al.*, and protests of White & Perkins Co. *et al.*, New York. The importers contended that the merchandise had been improperly classified as jewelry under Par. 434, Tariff Act of 1897. Protests overruled.

**CORAL ARTICLES.**—Protest of Albert Lorsch & Co., New York. Coral cut for jewelry purposes was held dutiable under Par. 435, Tariff Act of 1897, as precious stones, as claimed by the importers.

The formal opening of the new store of Charles P. Remillet, W. Church St., Newark, O., was held about a week ago.

#### Reward of \$50 Offered for This Man Charged With Larceny by Washington, D. C., Jeweler.

WASHINGTON, D. C., Aug. 5.—Ralph Racinni, alias Maghili, alias Rock Magolda, alias Rodolph Mongoli, who is wanted in this city to answer a charge of larceny filed by Frederick Cole, of the firm of Cole & Swan, has not been captured up to this time, although Major Sylvester, the superintendent of police, has sent to all nearby cities cards bearing a picture of the man and telling of the reward of \$50 offered for his apprehension.

Racinni, who is a barber by trade, is between 35 and 40 years old, about five feet four and one-half inches high, is well built and dresses neatly. He has a sallow complexion, black hair and eyes and a small black mustache. He is a great mimic, his specialty being imitating a baby talking.

Jewelers on whom he may have called

RALPH RACINNI WANTED IN WASHINGTON, D. C.

are requested to notify Major Sylvester immediately at the headquarters of the Metropolitan Detective Bureau in this city.

#### Diamonds and Jewelry Stolen by Bandits Who Held Up Express Train, Recovered and Are to be Returned to Owners.

PITTSBURG, Pa., Aug. 6.—The diamonds shipped by Sam F. Sipe, of this city, to a Columbus house last winter, which were stolen by bandits who held up an express train outside of the city limits and robbed the messenger, were dug up near Walkers Mills, according to statements made by the Adams Express Co. officials and will be returned to Mr. Sipe. The diamonds are valued at about \$500 and were found some time ago. The express company promised to return them, but the goods have not been handed over.

Milton B. Slater, agent for the express company, who detailed detectives on the case, has also located a large amount of gold plate, the property of John M. Ney & Co., Hartford, Conn., which was stolen at the time of the express robbery. Like the diamonds recovered, the gold plate was mud-covered, having been dug out of the hillside, near the scene of the robbery, where the thieves "planted" the stuff after they had made good their escape.

A package of jewelry and gold plate

shipped by a New York firm to a St. Louis house is also said to have been recovered.

The robbery was the most daring ever perpetrated in the Pittsburg district, the police being surprised that such wild west tactics should be employed so near the city.

It is known that Mr. Sipe has been endeavoring to get possession of the diamonds shipped by him to Columbus and was making arrangements to this end before he went to Europe, but at his place of business to-day THE CIRCULAR-WEEKLY correspondent was informed that the goods had not yet been turned over by the express company.

#### Receiver in Charge of Three Stores of the Pittsburg Watch Co., Pittsburg, Pa.

PITTSBURG, Pa., Aug. 6.—As noted briefly in yesterday's issue of THE CIRCULAR-WEEKLY, the Pittsburg Watch Co. is financially embarrassed and the company's three stores have been closed. John S. Flack, James McGregor and C. F. Patterson, creditors, have filed the petition requesting that the company be declared bankrupt, the company having admitted its inability to pay the petitioners \$1,018 and other debts. T. G. McGregor, president of the company, formerly known as McGregor & James, asked for the appointment of a receiver, and the court named Benjamin Biggard, who has taken charge of the company's affairs.

The assets of the company total between \$40,000 and \$50,000, and it is said that their liabilities amount to between \$16,000 and \$20,000.

The firm's stores are situated on Franks-town Ave., 970 Liberty Ave. and 443 Smithfield St., the main store being at the last named. This was formerly the store of L. J. Selezneck, who sold out to McGregor & James several years ago and moved to New York.

The court has set Aug. 15 as the time to show cause why the company should not be adjudged bankrupts. Mr. Biggard, who is now in charge of the stores and who has been given power to hire such help as is needed, has filed a bond in the sum of \$10,000 for the faithful discharge of his duties. Just who the company's creditors are is not known.

The business depression is said to be responsible for the failure. The company paid a big rent for the Smithfield St. store, but business has been bad this year at the stores. An endeavor, however, is to be made to weather the financial storm. William R. Blair, with offices in the St. Nicholas building, is the referee in bankruptcy.

T. G. McGregor and D. P. James established the business in October, 1898 as a partnership, but incorporated it in 1905, with a paid in capital of \$10,000.

A. B. Luce, who recently disposed of his store in Columbus, O., last week visited Mount Gilead, O., where he selected a desirable location in which to continue business.

Damage amounting to about \$300 was done recently to the stock of Henry B. Howland, New Bedford, Mass., by water, which dripped down into the store from an overflowing tank in the attic of the building.

### Bids Solicited by Government Departments for Supplies of Various Kinds.

WASHINGTON, D. C., Aug. 5.—The Navy Department is inviting proposals until Sept. 1, 1908, for the following items for the Mare Island Navy Yard: Two thermometers, graduated to 150° F., straight stem; two thermometers, graduated to 150° F., angle stem; one thermometer, graduated to 250° F., straight stem; two thermometers, graduated to 220° F., angle stem; two thermometers, graduated to 220° F., angle stem; two thermometers, graduated to 250° F., straight stem; two thermometers, graduated to 150° F., one angle, one straight; two thermometers, graduated to 500° F., angle stem.

All the above are to be high-grade, fixed, mercurial thermometers, with nine-inch black scales, white figures, in heavy brass case, front protected by heavy glass plate.

Also three eight-day marine clocks, 8½-inch dials, brass cases, nickled, with hinged bezel, fitted with lock and key, chronometer balance, full jeweled, patent regulator, and extra long second hand, at least 1¼ inches diameter of circle.

WASHINGTON, D. C., Aug. 6.—The Purchasing Agent of the Isthmian Canal Commission is inviting proposals until Aug. 24 for six eight-day marine clocks, to have seven-jeweled lever-escapement compensation balance and Breguet hairspring. Movement to wind through the dial plate. Dial to be of metal, with dull or lusterless white or silvered surface 5¼ to 5¾ inches in diameter of visible face; to have figures and makers' name thereon, and to have hour, minute and second hands, and a regulator to be operated from the face. Case to be of polished cast brass.

WASHINGTON, D. C., Aug. 10.—The Bureau of Supplies and Accounts, Navy Department, is calling for proposals until Aug. 18 for 12 18-inch dial and six 12-inch dial Fred Frick electric clocks. Bids on clocks slightly different will be considered. These clocks are for the Washington Navy Yard.

### Bankruptcy Proceedings Against Maurice Dreshfield Will Not be Dismissed on Technicality.

At a recent hearing in the matter of the petition in bankruptcy filed against Maurice Dreshfield, the litigation was adjourned until Sept. 18. The petition was filed against Dreshfield by R. A. Breidenbach, 51 Maiden Lane, New York, March 11, the other petitioning creditors being Henry C. Morath and Lynn Wagner. The petition charged that the alleged bankrupt was associated with George H. Carpenter in transactions by which \$182,594 worth of diamonds were alleged to have been obtained from Breidenbach by fraudulent means.

When the matter came up the proceedings were referred by the United States District Court to Special Master Peter B. Olney. Sol. Oppenheimer, attorney for Mr. Breidenbach, conducted the examination together with William Lesser, the receiver. The attorneys representing the alleged bankrupt raised the contention that Morath and Wagner, to whom Breidenbach transferred two promissory notes,

were not bona fide creditors and the Special Master reported in favor of the dismissal of the petition against Dreshfield. Judge Hough denied the application and referred the matter back to the Special Master.

In the meantime other creditors of Dreshfield retained Attorney Oppenheimer as their counsel in the bankruptcy proceedings. Egbert C. Doughty, a plumber, who did some work on Mr. Dreshfield's house in Hackensack, N. J., became one of the petitioning creditors. Subsequently counsel was retained to appear for Stern Bros., manufacturing jewelers at 51 Maiden Lane, to whom Mr. Dreshfield owes, it is claimed, \$231 for goods sold and delivered to him.

The Dreshfield matter will now be proceeded with as though no technicality had been raised.

At the request of Mr. Dittenhoeffer, attorney for George H. Carpenter, the bankruptcy matter in his case has been adjourned and there is a strong expectation that the matter will be satisfactorily settled.

### Creditors of Anzelewitz Bros., New York, Begin Proceedings in Involuntary Bankruptcy.

An involuntary petition in bankruptcy was filed last Wednesday in the United States District Court, New York, against Moscs Anzelewitz and Aaron Anzelewitz, composing the firm of Anzelewitz Bros., 125 Canal St., New York, by Herman A. Dietz, \$188, and Alois Kohn & Co., \$153. It is alleged that Anzelewitz Bros. are insolvent and that they committed acts in bankruptcy by transferring property and making preferential payments to the amount of \$3,000 and that they concealed and secreted a large amount of jewelry valued at about \$2,000. The creditors, according to the petition, are less than 12 in number.

On the motion of Armin Kohn, attorney for the petitioning creditors, Edwin M. Cox has been appointed a temporary receiver under a bond of \$2,500.

The petition states that on Nov. 29, 1907, Anzelewitz Bros. made promissory notes to the order of Alois Kohn & Co. agreeing to pay \$40 the 29th day of each month for a period of 27 months, the first notes of the series becoming due March 29, 1908. It is claimed that \$843 is due on these notes.

Attorney Kohn said that the firm's liabilities were about \$15,000, mostly new debts incurred since the compromise of 35 cents on a dollar was accepted last October. The assets in stock and fixtures are estimated at \$4,000.

The members of the firm of Anzelewitz Bros. came from Moscow, Russia, and began business in 1892. Later they became involved and offered 35 cents in compromise payable in three, six, nine and 12 months, and it was accepted.

Thieves recently stole about \$300 worth of miscellaneous jewelry from the store of E. E. Wilber, E. Vermilion St., Danville, Ill. The burglars tore the screen from a rear door and then removed the glass in the panels. Several necklaces, brooches, bracelets, scarf pins, etc., were taken from the show windows.

### Tragic Death of J. Edward Eckert, Marengo, Ia.

MARENGO, Ia., Aug. 6.—The tragic death of J. Edward Eckert, a local jeweler, which occurred near Amana, July 30, has been a great shock to his friends who are not quite able to determine whether he was a victim of foul play or committed suicide. Mr. Eckert's body was found on the morning of July 30, on the banks of the Iowa River, by a searching party. There were two bullet holes in his temple, and other indications that he had taken his own life, but outside of the fact that he had been in ill health for sometime, no cause for his suicide can be advanced.

Mr. Eckert left his home in an automobile on Tuesday. He announced that he was going on a business trip, and nothing was thought of it, until he did not return, and no word was heard from him. A searching party was made up Wednesday and scoured the district. As he had gone in the direction of South Amana, and the searchers learned that he penetrated the woods, they kept up the hunt until his body was found. If he committed suicide it was evidently his intention to have his body lost in the river.

Mr. Eckert, who was widely known and popular in Marengo, was about 43 years old and had been in the jewelry business here since 1890. Of recent years he had done a very good business and was highly regarded in the trade. He is survived by a widow and five children as well as a father, brother and sister.

### Look Out for This Watchmaker Who Robbed an Albany, N. Y., Jeweler.

ALBANY, N. Y., Aug. 6.—The trade is warned by a local jeweler to be careful in dealing with a man who uses many names, but who has been in business in Lowell, Mass., Burlington, Vt., and other cities as a watchmaker, though he has also been employed as a cigarette maker. The man is a Jew, five feet nine inches high, has a short black mustache, large eyes and a rather pale complexion. He is about 35 years of age and weighs 165 pounds.

By means of a hard luck story he obtained the sympathy of the local jeweler, who permitted him to do work in the rear room of the store, and also allowed him to take work out. On July 15 the man left the store with four watches that had been given to him to repair, and these and the following watches have not been seen since: A 16-size in Roy case, No. 232313, heavy 14 karat; a 12-size O. F. 14-karat Solidarity case, No. 173385, fitted with seven-jewel Elgin movement; 16-size in Roy case, No. 388730, engraved top and bottom and fitted with a 15-jewel Elgin movement; 16-size Crown case with Elgin movement, seven-jewel, open filled gold case, No. 1093371.

The man is a fair workman and carries a red leather oval-shaped grip with tools. He often exhibits a picture of his store at Lowell, Mass. Jewelers who may come in contact with him are requested to communicate with THE CIRCULAR-WEEKLY.

John W. Runkel, Oconto, Wis., will soon move his stock across the street to the old postoffice building.

# Modern Cameos

The first samples of the MODERN CUT CAMEOS were brought over by us about two years ago.

Confident of the ultimate success of the stone we never tired in our efforts to acquaint the trade with its merits. Its immense popularity now attests to our correct foresight.

The same effort has been exerted on the other side in improving the quality as well as securing an adequate supply. We have succeeded also in this respect, and our Cameos are unexcelled in the matter of superior engraving, and precision of size and finish—and at right prices.

ONYX CAMEOS in MODERN and CLASSIC DESIGNS on hand in all sizes and colors for immediate delivery.

**OPTICIANS OF ALL STATES IN ANNUAL SESSION.**

Eleventh Annual Convention of the American Association of Opticians begins at Philadelphia, Pa., with a large attendance.

PHILADELPHIA, Pa., Aug. 11.—With a large attendance and every indication of a most successful meeting, the 11th annual convention of the American Association of Opticians opened here yesterday. The opening day was devoted to the reception of delegates, the holding of State meetings and a legislative conference. The Musical Fund Hall is the place in which the sessions are held.

The legislative conference was held last evening and was highly interesting, as a number of the most prominent members gave their views on the subject of optometry legislation. The fact that in 13 States such laws have been enacted, was regarded

BRIGGS S. PALMER, PRESIDENT.

as a strong indication that such legislation will soon be as general as medical and dental laws.

This is "A. A. O." day, and the business of the meeting is now well under way. This morning's programme included an address of welcome by the Mayor's secretary; a response by Alexander Martin, the president of the Pennsylvania State Optical Society and another response by Thomas Gowenlock, Clay Center, Kans. This is to be followed by the address of Briggs S. Palmer, Boston, president of the organization. William E. Huston, Kansas City, Mo., is to present his annual report and the other officers and the committees will report. Addresses are expected from Dr. T. G. Atkinson, Chicago, and C. E. Folsom, Atlanta, Ga.

For this afternoon and for the remaining days of the session, the programme is as follows:

TUESDAY AFTERNOON'S SESSION—2 O'CLOCK.

Address: W. T. McConnell, Pittsburg; Dr. Mason W. Pressly, Philadelphia; W. R. Warner, Cleve-

land; Alexander Martin, Philadelphia; E. E. Arrington, New York.

MANUFACTURERS AND INVENTORS' HOUR.

This time will be given to exhibitors to demonstrate and explain the merits of their productions. The time allotted each exhibitor will be 10 minutes, or less, depending upon the number who desire to talk.

"The National Association—Past, Present and Future." Ten-minute talks by ex-President A. Jay Cross, ex-President J. H. Ellis, ex-President John C. Eberhardt, ex-President H. P. Holmes, ex-President B. B. Clark.

THE PHYSIOLOGICAL SECTION, WEDNESDAY, AUG. 12, 9 A. M.

Opening Address.....Physiological Section President E. Le Roy Rycer, New York.

PRIZE ESSAYS.

- First Prize Essay....."Strabismus"  
Peter Scholler, Hancock, Mich.
- Second Prize Essay....."Precision in Optometry"  
Ralph H. Woods, South Bend, Ind.
- Third Prize Essay....."Anatomy of the Eye"  
Dr. Elva Cooper, Bradford, Pa.

SPECIAL PAPERS.

- "Visual Fixation and the Inter-dependence in Static and Dynamic Skiametry".....  
A. Jay Cross, New York.
- "The Ocular Muscles, Their Needs and Resources".....J. C. Eberhardt, Dayton, O.
- "Optometry Without Cycloplegics,"  
N. K. Standart, Detroit, Mich.

Afternoon, 2.30 O'clock.

HONORABLE MENTION ESSAYS.

- "Optometrical Legislation,"  
H. J. Cook, Knoxville, Tenn.
- "Methods of Precision in Optometry,"  
David Kletzky, Pueblo, Colo.
- "Prisms in Optometry,"  
Gustave Kahn, Winneconne, Wis.
- "Fogging Methods".... R. D. Judkins, Flushing, O.
- "Educational Standards,"  
John Lewis Beard, Charleston, W. Va.
- "Oculist vs. Optometrist,"  
David Syman, Springfield, O.
- "Shall the Optometrist Charge for His Examination?".....Ford A. Smith, Sterling, Ill.

PRESENTATION OF PRIZES.

Following the reading of each paper there will be a brief discussion of the same, limited to 10 minutes' time.

"BUSINESS DAY," THURSDAY, AUG. 13.

MORNING SESSION—10 O'CLOCK.

Business session, Physiological Section of the A. A. O.

1 P. M.

Business session, American Association of Opticians.

4 P. M.

Local entertainment. Banquet in Belmont Mansion, Fairmount Park.

An interesting feature of the convention is comprised in the exhibits of the latest products of the factories, numerous new devices and apparatus being shown. The exhibitors are: Aikin-Lambert Co., New York; American Thermo-Ware Co., New York; A. W. Anthoine, Westbrook, Me.; Bay State Optical Co., Attleboro, Mass.; S. O. Bigney & Co., Attleboro, Mass.; D. V. Brown, Philadelphia, Pa.; Edwin Beckwith, New York; the Bishop Co., North Attleboro, Mass.; De Zeng Standard Optical Instrument Co., Philadelphia, Pa.; Ely Eyeglass Mfg. Co., Middletown, Conn.; Fox Optical Co., Philadelphia, Pa.; Far-ington Mfg. Co., Roxbury, Mass.; Frank & Connet, New York; Globe Optical Co., Boston, Mass.; S. Galeski Optical Co., Richmond, Va.; Health Ray Lens Co., To-

peka, Kans.; Hub Optical Case Co., East Dedham, Mass.; S. H. Highsmith Co., Sumter, N. C.; Illinois Optical College, Chicago, Ill.; G. J. Kirby & Co., Willimantic, Conn.; E. Kirstein Sons Co., Rochester, N. Y.; the Keystone, Philadelphia, Pa.; Julius King Optical Co., New York and Chicago; Lander, Cleary & Co., Philadelphia, Pa.; the Kryptok Co., New York; A. A. La Forest, St. Louis, Mo.; S. G. Lovell Clock Co., Philadelphia, Pa.; George Mayerle, San Francisco, Cal.; McIntire, Magee & Brown Co., Philadelphia, Pa.; Murine Eye Remedy Co., Chicago, Ill.; Milwaukee Optical Co., Milwaukee, Wis.; Northern Illinois College of Ophthalmology and Otology, Chicago, Ill.; New York Institute of Optometry, New York; The Optical Journal, New York; THE OPTICAL REVIEW, New York; Pollak & Michaels, New York; Philadelphia College of Horology, Philadelphia, Pa.; Philadelphia Optical College, Philadelphia, Pa.; Potts Chemical Co., Camden, N. J.; Randall-Faichney Co., Boston, Mass.; Roches-

### Death of Joseph Becker.

CINCINNATI, O., Aug. 10.—The sudden and unexpected death of Joseph Becker, which was caused by heart failure, Wednesday night, after returning home from the building and loan association of which he was a member, was a source of deepest regret and sorrow to all who knew him. Mr. Becker had been attending the recent convention, where he found much pleasure in meeting old friends he hadn't seen for the past 30 years, and many had remarked about his healthy appearance.

Deceased was born 60 years ago in Cincinnati, where he received his early education and began his business career. In 1864 he started with Jenkins & Hatch, then wholesale jewelers in the Carlisle building. In 1866 he went with Duhme & Co., at 4th and Walnut Sts., where he remained until 1872, when he became associated with the

THE LATE JOSEPH BECKER.

Duober Watch Case Co., at that time located at 4th and Main Sts. When the concern moved to Newport, Ky., he went with it and remained with the company until its removal to Canton, O., in 1882, at which time he connected himself with Joseph Fahys & Co. He stayed with the latter company until 1901, and then he became identified with the Philadelphia Watch Case Co.

Two years ago Mr. Becker retired from business entirely, having had sufficient success to warrant his taking life easy for the rest of his days.

Mr. Becker was not a member of any organization except the Jewelers' League. He was a man who devoted all his time and energy to business, and was highly respected throughout the community in which he lived. He is survived by a widow, one daughter and three sons, the eldest of whom is J. Charles Becker, local manager of the Philadelphia Watch Case Co.

The funeral services were held this morning from the Holy Name Church, Mt. Auburn, and the interment was in St. Mary's Cemetery, St. Bernard, O. The flowers sent by the Cincinnati trade were many, and showed with what love and esteem the departed was held in the hearts of the local jewelers. Many of the latter

attended the funeral, and the following were selected as pallbearers. Charles A. Nolting, of the Oskamp, Nolting Co.; Louis Halbert, of Albert Bros.; Aaron Herman, of Herman & Loeb; Robert Vaupel, of the M. Schwab Jewelry Co.; Jacob Dorst, of the Dorst Co., and Peter Henry.

### Third Annual Convention of the Pennsylvania Retail Jewelers' Association Begins To-day in Philadelphia.

PHILADELPHIA, Pa., August 11.—From all parts of Pennsylvania retail jewelers are to-day gathering in this city in preparation for the Third Annual Convention of the Pennsylvania Retail Jewelers' Association, which will be called to order in Musical Fund Hall, to-morrow, Wednesday, and be continued until Thursday evening. Besides the members of the State association retailers from neighboring states, jewelers on vacation trips to New Jersey coast resorts and representatives of manufacturing jewelers from all parts of the country are arriving in the city to make greater in every way the Pennsylvania retailers' annual meeting and the 11th annual convention of the American Association of Opticians.

Everywhere arriving jewelers are hospitably met and welcomed to the city. Like the opticians they are making their headquarters at the Continental Hotel. The cosy rooms of the Philadelphia Jewelers' Club, 1228 Chestnut St., have been thrown open for the reception of the visiting state jewelers and such opticians as may accept the club's hospitality. Ira D. Garman, chairman of the reception and entertainment committees of the Pennsylvania Association has left nothing undone to insure the heartiest kind of a welcome for the jewelers and to insure a comfortable stay for them while here. Mr. Garman is happily located at 101 S. 11th St., within easy distance of all the meeting places and is devoting himself to see that the city's guests return after the convention convinced that the boasted hospitality of Philadelphia merchants is not a myth, but a warm, cordial reality. Louis P. White, wholesaler, 9th and Chestnut St., and an influential member of the Jewelers' Club, as well as Col. J. Warner Hutchins, president of the club, are aiding in every way to add to the happiness and comfort of out-of-town jewelers attracted here to attend both conventions.

Mr. Garman says: "This should, and I am sure will be, one of the largest and most successful gatherings of state jewelers ever held. The stimulus given to the movement for a closer association of the retail jeweler at last week's convention in Cincinnati is already having a marked effect on the applications pouring in to the officers of the Pennsylvania State Association for membership. I am told that many of those who attended the Cincinnati convention have joined a party to engage a special car and are due to arrive in this city to-day."

The convention will be called to order Wednesday morning at 10 o'clock, by the president, A. C. Gaul, Sharpsburg. Then will follow such details of organizations as the appointment of committees. Col. J. Warner Hutchins, president of the Phila-

delphia Jewelers' Club will deliver the address of welcome about 11 o'clock, and will assume the chairmanship. Col. Hutchins will be followed by the association's president, A. C. Gaul, who will make an address urging every retail jeweler in the State to become a member and reviewing the work of the previous conventions and the importance of the National Retail Jewelers' Convention last week in the Middle West. C. S. Wiley, Pittsburg, will present the secretary's report and J. P. Steinmann the treasurer's report.

The features of Wednesday's sessions promise to be the delivery of a discourse by I. A. Deisher, Reading, on "A System of Records for Stock," and a general discussion among all members of the association and invited guests on the question whether "the jeweler of to-day is not as good a business man as he could and should be."

Wednesday evening the State jewelers will join the opticians in a boat ride down the Delaware river to Washington Park. It has been planned to have all the entertainments of the Pennsylvania Retailers and the American Optical Society held jointly.

C. T. Higginbotham, consulting superintendent of the South Bend Watch Company, South Bend, Ind., will deliver a lecture at 10 o'clock Thursday morning on "How to Locate and Correct Errors in the Lever Escapement." At the close of the lecture Mr. Higginbotham will answer all questions propounded and a general discussion will ensue. At the afternoon session committees will present important reports and the convention will come to a close with the election of officers. Thursday evening a huge banquet will be given at Belmont Mansion, one of the most delightful parts of Fairmount Park. With opticians and jewelers it is anticipated that over 1,000 will be assembled on the broad plateau overlooking the Schuylkill river in attendance at one of the largest trade dinners ever held.

After the conventions of the opticians and retail jewelers are ended many of the jewelers and opticians propose to make short excursions to nearby seashore resorts

### Samuel Prager, Terre Haute, Ind., Files Voluntary Petition in Bankruptcy.

TERRE HAUTE, Ind., Aug. 8.—Samuel Prager, who did business as a retail and manufacturing jeweler, and also as an optician, at 406 Main St., filed a voluntary petition in bankruptcy in the Federal Court in Indianapolis, Thursday, and the schedules which accompanied the petition showed his liabilities to amount to \$6,654 and the assets \$4,275. A trustee will shortly be elected and the eastern creditors are now endeavoring to co-operate so as to control the election.

Mr. Prager, who is about 50 years old, is a practical watchmaker and has been in the business for a long time. He started in Frankfort, Ind., and from there went to Pittsburg, and in that city was the head of the firm of Samuel Prager & Co. in 1895. Later he met with financial reverses and went to Erie, Pa., thereafter working for several firms, but started in business again for himself 10 years ago. Mr. Prager came to Terre Haute in 1901.

**Receiver Appointed for the Hoosier Jewelry Co., Indianapolis, Ind.**

INDIANAPOLIS, Ind., Aug. 5.—Don S. Morris was appointed receiver for the Hoosier Jewelry Co., on Friday, by Judge Charles T. Hanna, of the Superior Court. The appointment was made as a result of the suit filed by L. F. Hurt and the Fidelity Trust Co., of Louisville, Ky., executor of the estate of S. J. Burford, who allege that the concern owes them \$2,800 on notes and is insolvent.

The Hoosier Jewelry Co., which conducted an instalment business at 104 N. Illinois St., was run by A. P. Earle, president, and H. S. Earle, vice-president. The concern was organized about eight years ago, with an authorized capital stock of \$1,500. The first president of the concern was S. J. Burford, who for several years had been in the furniture instalment business in this city. Mr Burford died, however, soon after assuming control and the business was then reorganized.

A. P. Earle, who had succeeded Burford as president, was formerly employed by the Burford Furniture Co. The concern carried a chattel mortgage amounting to \$9,000, which covered stock and lease notes.

**Death of Robert Moore.**

WILLIAMSPORT, Pa., Aug. 10.—The funeral of the late Robert Moore, a well known local jeweler, who died on Friday afternoon, took place at his home, 113 Rose St., this afternoon at 2 o'clock. Mr. Moore's death occurred very suddenly at the Market St. depot of the Pennsylvania Railroad. He had intended going to a Philadelphia hospital for treatment and was just about to open the door of the waiting room when the telegraph operator saw him fall over. He was picked up and a physician summoned, but before his arrival Mr. Moore had passed away. His death was due to congestion, probably brought on by the intense heat.

Mr. Moore was 63 years old, and is survived by a widow and one daughter, Mrs. B. T. Manley. He was born in Towanda, and spent most of his life in this city. He had been in the jewelry business for more than 20 years and was prominent in the Knights of Pythias.

B. T. Manley, Mr. Moore's son-in-law, will continue the business management for the estate of the deceased.

**Death of David L. How.**

INDIANAPOLIS, Ind., Aug. 10.—It was with deep regret that his many friends of this city learned last week of the death of David L. How, of How Bros., La Porte, Ind. Mr. How had visited Illinois on business, and while there died of heart trouble. The body was taken in charge by the order of Elks, of which the deceased was a member, and was brought to La Porte for burial.

The deceased, who was 38 years old, was in business with his brother, Edward C. How. The present firm succeeded the old firm of Parson, How & Co., in December, 1888, and carried on a jewelry and stationery business at 710 Main St. A second brother, Sherry, and a mother survive.

**National Monthly Import and Export Statistics.**

WASHINGTON, D. C., Aug. 5.—The records of the Treasury Department contain the following comparative statistics of interest to the jewelry trade, for June, 1907 and 1908, and for the 12 months ending June, 1907:

	IMPORTS.		—12 Months Ending—

**Involuntary Bankruptcy Petition Filed Against David J. Prince, New York.**

An involuntary petition in bankruptcy was filed Monday in the United States District Court, New York, against David J. Prince individually, and trading as the Prince Co., dealer and jobber in jewelry and novelties, 823 Broadway, by the following creditors: J. Solinger & Co., \$500; Rosenzweig Bros., \$200, and Herman Wittkowsky, \$138. It is alleged that Prince is insolvent and owes debts to the amount of over \$1,000, and that he made preferred payments.

Chas. L. Greenhall is the attorney for the petitioning creditors. The assets are estimated at \$2,000, consisting of stock and fixtures. The liabilities are about \$5,000.

David Prince was originally at Seattle, Wash. In the Spring of 1906 he went to San Antonio, Tex., and formed a partnership with W. B. Kelly and opened a branch store at Norfolk, Va. The partnership was dissolved in July, 1907. Mr. Prince opened a place in New York in January of this year.

**Death of George W. Gibson.**

RICHFORD, Vt., Aug. 5.—George W. Gibson, who died, Friday last, in this town after an illness of seven months, had been in the jewelry business for over 40 years and was widely known throughout this section of the State. The funeral services, which were held at his home Sunday afternoon were largely attended, and among the organizations represented was the Missisquoi Lodge, No. 9, F. & A. M., whose members conducted a Masonic burial service in addition to the regular funeral services at which the Rev. W. E. Douglass officiated. The interment was in Hillside Cemetery.

Mr. Gibson was the father of Leon E. Gibson, a jeweler in this town, and established the business in 1859 and built up a good trade. Deceased carried the business on alone for many years until he was succeeded by his son in 1904.

**J. E. Johnson, Smith Center, Kans., Goes Into Voluntary Bankruptcy.**

SMITH CENTER, KANS., Aug. 5.—J. E. Johnson, a local jeweler who filed a voluntary petition in bankruptcy in the United States Court at Salina, recently, has assets of about \$3,000, while the liabilities are somewhat larger. E. A. Cornell, of this town, has been appointed receiver for Mr. Johnson, and the matter is in charge of Referee G. E. Beatty, of Salina.

Mr. Johnson, who was formerly employed as foreman by the Illinois Watch Case Co., came here about three years ago and purchased the stock of Rhinehart & Slagle, druggists and jewelers. He paid \$1,700 for the stock and continued the business. He has worked hard, and it was believed that his industry was resulting in success; therefore the news of his business trouble is received here with regret, though it is hoped that he will soon be able to make arrangements with his creditors and resume.

**H. I. Scribner, Columbus, O., Disappears and a Receiver Is Appointed for His Assets.**

COLUMBUS, O., Aug. 8.—H. I. Scribner, a jeweler at 145 High St., this city, has disappeared and a receiver is now in charge of his assets. Thursday last the landlord discovered that Mr. Scribner had gone away and began proceedings; levies on the property were made and the receivership followed.

Mr. Scribner had been in business for himself five years. He is a practical watchmaker, having originally worked for the Waltham and Hampden companies, and after coming to Columbus was employed by B. C. Krouse. He did business with railroad men.

A local watchmakers' union was organized at Elgin, Ill., recently, by Wm. Rossell, of the Federation of Labor. This union was said to be the largest in the country in the watchmaking trade. It comprises 3,000 men and women employed in the large factories at Elgin.

## Pittsburg.

R. O. Stewart is spending his vacation at Conneaut Lake.

C. A. Schuldice is spending two weeks at Atlantic City.

W. O. Harrison has returned from a business trip spent in New York.

Paul A. Barr, formerly with Hall Bros. & Co., has gone on the road for J. C. Crawford.

Joseph A. Burkle has been recuperating for the last three weeks at Oakmont, on the Allegheny.

Harry Heeren is in Canada fishing and the Misses Hannah and Blanch Bevan, of the Heeren house, are at Chautauqua.

S. Davis and his family have taken a cottage at Ligonier for the Summer, Mr. Davis spending Saturdays and Sundays with his family.

W. L. Rarigh, a retired jeweler of Parkers Landing, who has not been in Pittsburg for a number of years, visited some of his old friends here last week.

William G. Ingham, buyer for the Geo. B. Barrett Co., left last Thursday for Atlantic City, earlier than he intended, and will attend the retail jewelers convention at Philadelphia this week.

William Owen, Cincinnati, and his family are visiting W. C. Owen, Pittsburg manager of M. A. Mead & Co. The former conducts the jewelry business established by his father many years ago.

J. F. Murphy, Wheeling, is building a handsome new front to his store. It is of colonial style, prism and art glass being used in the construction. The front will be one of the handsomest in the State.

A sheriff's sale of the stock of Edward F. Stewart, 4303 Butler St., is advertised for Thursday, Aug. 13, at 11 o'clock. Mr. Stewart has been in business at this address since June, 1902, and for over two years before that was located on 6th St.

Among the out-of-town merchants in Pittsburg last week buying stock were E. J. G. Lovett, Titusville; W. S. Berkeley, Homestead; F. B. McKinley, Washington; W. C. Schmid, New Castle; George Eckert, Jeanette; J. F. Murphy, Dawson.

J. R. Brown, of the Marsh, Brown & Mather Co., who spent his vacation at Vermillion, O., is telling his friends about the big string of white bass and catfish which he caught. W. W. Mather, of the same house, is at present at North East.

Clark & Bigelow, Washington, Pa., have recently equipped their establishment with machinery for plating goods, spending about \$2,500 on the enterprise. They have also installed an electric dynamo and are making their own electric light.

The creditors of Charles H. Allen, Turtle Creek, who met several weeks ago and discussed Mr. Allen's financial condition, have decided to grant him an extension of time to pay his obligations. As published in THE CIRCULAR-WEEKLY several weeks ago, Mr. Allen has assets amounting to \$9,500, while his liabilities are about \$7,200.

C. S. Wiley, secretary of the Pennsylvania Retail Jewelers' Association, who, with others, last Saturday returned from Cincinnati, was loud in his praise of the manner in which the delegates to the national convention were entertained.

M. C. Tyler has opened a jewelry store at Orland, Cal.

F. M. Mason, Merced, Cal., will shortly open a store at Visalia, Cal.

E. Burstein has started in business in the Gregg building, at Imperial, Cal

S. P. Wilson has opened a watch repairing establishment in Bethel, Conn.

P. E. Ostram is opening a general store in Ontario, Cal., and will carry a line of jewelry.

M. W. Clements, Lincolnton, Ga., will open a retail jewelry store in Madison, Ga., about Sept. 1.

E. J. Smith has opened a watch and jewelry repairing shop at 609 Phoenix building, Minneapolis, Minn.

R. H. Bach is about to open a jewelry department in connection with his music store at Owatonna, Minn.

Wm. H. Smith and J. B. Wilbur have formed a partnership to engage in the jewelry business at Golden, Colo.

Jacob Weinberger, formerly in business on Main St., will soon open a store at 337 S. Spring St., Los Angeles, Cal.

Fred. A. Harmon, a former student of the Kansas City Horological and Optical School, Kansas City, Mo., has begun business at Coweta, Okla.

A. W. Bartz and J. J. Keith, Garrison, N. Dak., will open a store, Sept. 1, in Minneapolis, Minn. They will be located in the Ed. Peterson building on Main St.

W. S. Gish, Little Falls, Minn., has leased half of the Matt Dedrick building on Main St., in Onamia, Minn., where he will open a store. His son will be associated in business with him.

A. R. Keese, Atlanta, Ga., will start in the retail jewelry business in Athens, Ga., having leased a building on Clayton St., in that city. He expects to be settled in his new location by Sept. 1.

**Columbus, O.**

E. S. Albaugh and T. O. Pickering, of Albaugh & Pickering; L. W. Lewis and Frank M. Deinlein attended the national convention of the retail jewelers at Cincinnati last week.

Announcement was made last Wednesday that Lester W. Hutchins, Johnstown, and Miss Mayme Hutchins, stenographer for Congressman Ashbrook, were secretly married March 20, at Covington, Ky.

The inventory of the stock of the D. C. Beggs Co., just completed, showed just about \$500,000 worth of goods on hand, and the opinion of the receivers is at present that the firm will pay 100 cents on the dollar.

The store of Sundstrom & Co., Elmore, Minn., is now conducted by John F. Tyck.

## Third Annual Convention Proves A Great Success

Members of the American National Retail Jewelers' Association Meet At Cincinnati, Ohio, Elect Officers, Adopt Important Resolutions and Hear Instructive Discourses

CINCINNATI, O., Aug. 8.—The third annual convention of the American National Retail Jewelers' Association has closed in a blaze of glory. It was the most successful meeting held so far, and from the very beginning to the time for adjournment not a moment lagged. The program was a fine one, both from an educational and an entertaining standpoint. The exhibits were many and were well displayed and well patronized. The speakers always faced a numerous and attentive audience of between 200 and 300 people. Altogether there were over 300 retail jewelers at the convention and all went home more than satisfied with the wonderful progress the national association has made in the space of only two years.

After the opening of the convention the Mayor's address and the response by J. P. Archibald, President Hurlbut announced that the convention would be run on broad-minded principles, and that he and the other officers of the association would see that everyone got a square deal from start to finish, and that no outsider would be allowed the privilege of the floor for the purpose of either aggrandizing himself or the interests he represents. The president then announced that he would appoint Max Egge, Nebraska, and A. C. Graul, Pennsylvania, sergeants-at-arms, so that proper order could be maintained.

The first committee appointed was the one on credentials. A. C. Westmyer, West Virginia, chairman; Claude Wheeler, Maine, and L. C. Eisenschmidt, Kentucky.

The next committee appointed was the one on resolutions. Herman Mauch, of Missouri, being absent A. E. Barker, Minnesota, was appointed chairman, with the following associates: C. Z. Rowe, Indiana; F. J. Euler, Maryland; F. A. Mareau, Illinois; Joseph Mazer, Oklahoma; T. I. Combs, Nebraska; J. B. Stebbins, Ohio; C. S. Wiley, Pennsylvania, and C. E. Baab, West Virginia.

The auditing committee appointed include Max Jennings, Michigan, Will King, Michigan, and Charles H. Williams, Oregon. The committee on revision of the constitution were F. L. Harris, Nebraska, chairman; Max Jennings, Michigan; Claude E. Range, Missouri; J. P. Archibald, Pennsylvania, and C. H. Williams, Oregon.

Mr. Hurlbut said the reason for placing so many executive officers on the committees was because they had a thorough knowledge of the needs of the association.

After the report of the secretary and the treasurer, published in full in the last issue of THE CIRCULAR-WEEKLY, was read and adopted, a resolution was passed giving the president and all the rest of the officers of the association all the power of a delegate. In other words, the resolution gave them the right to cast a vote, a right which they did not previously enjoy.

The report of the committee on credentials not being ready a question box was

started, the subject being "Is a time guarantee necessary in the selling of jewelry?" Opinion on this was greatly divided. President Hurlbut thought it wasn't necessary to guarantee goods. He said it implied a doubt right from the start regarding the quality of the goods. Mr. Neilson, of Iowa, said it was absolutely unnecessary to put a time guarantee on any article, and that he took all the guarantee tags off the chains he sold and had less trouble than when he left them on. He said watch cases should have a quality mark and no guarantee.

Mr. Bernau, of North Carolina, said he didn't see the use of a time guarantee on cases, but did see the use of the cases being guaranteed by the manufacturer. He wanted to know if a case manufacturer put 17 cents worth of gold on a time guarantee case, how much gold would he put in a case that wasn't guaranteed at all? This was too hard a nut for anyone to crack. Mr. Herzer, of Tennessee, thought a guarantee was necessary, because people had bought goods from department stores that were cheap and unsatisfactory and looked to the jeweler for guaranteed goods. He said some customers would not buy goods unless they were guaranteed.

President Hurlbut said he always guaranteed his goods to give satisfaction, and

Mr. Williams, of Oregon, claimed that the jeweler should establish an individuality for himself and not stand behind some one else's shield all his life. He said he never told a customer that a case would wear 20 years, but that it was the best case he could give for the price he charged for it. Mr. Barker, of Minnesota, said the best guarantee to give a customer was a satisfaction guarantee, while Mr. Combs, of Nebraska, said he always gave his own individual guarantee to make good on any article that did not wear well.

Mr. Hull, of Michigan, said the guarantee would seem to be a good thing, but it should not be so badly misused. The success of the mail-order houses and others is on the superfluous guarantee on their goods. They will stamp a filled case 20 years and they know it will not make good and their customers find out the same. They make their reputation on the fictitious guarantee. Speaking of watch cases, he said he used an idea of which he was not the originator. He has a sign which says: "Nothing but standard makes of watch cases sold here on original guarantees of their makers," claiming the maker knows more about it than he does, and their case is sold on the original guarantee. If the customer takes advice he will get nothing but the best cases, but if he is looking for a \$4.50 case he gets it. "I want to sell the schoolboy his first case and later a better one, and when he is a grown man I want to sell him a high-grade watch," he said. "The best chainmakers to-day do not guarantee their chains. You can take two chains of the same quality and put them

HOTEL SINTON WHERE THE JEWELERS MET.

that a reasonable interpretation should be placed on that word. Mr. Paegel, of Minnesota, said the jeweler himself often abused the word guarantee, and that the only way to avoid trouble was to guarantee satisfaction, and that in case the article did not wear well in a reasonable time to make it good.

on two individuals and one will outwear the other double. I claim a time guarantee on plated jewelry is not necessary for the legitimate jeweler. I do think you must have some standard on watch cases and you can sell them for what they are."

The discussions then closed and the committee on credentials then reported the fol-

lowing number of delegates present: Illinois, two; Indiana, two; Maryland, one; Michigan, four; North Dakota, one; Oregon, one; Minnesota, four; Missouri, six; Nebraska, five; North Carolina, one; Oklahoma, five; Tennessee, three; Virginia, three; West Virginia, two; Pennsylvania, seven; Ohio, 10; Iowa, six, and Kentucky, six.

The meeting then adjourned till Tuesday at 2 P. M.

#### PRESIDENT HURLBUT'S ADDRESS.

A good part of Tuesday afternoon was taken up with the address of President Mack Hurlbut. As mentioned in the last issue of THE CIRCULAR-WEEKLY, Mr. Hurlbut's address was very long but exceedingly interesting and the "chunks" of wisdom, philosophy, advice, etc., as well as the criticism and hints which he handed out to his audience, were deeply appreciated and were often the source of much laughter and amusement. Mr. Hurlbut has a style distinctly his own, and it is unfortunate that space will not permit his address being published in full.

In speaking of the scope of the national organization he said that, though the latter was dependent on the State associations for its very life, no State association could ignore the former, for without it they could not hope to cope with conditions which are as broad as the nation. On the other hand, what might be the greatest good for one particular State might be a detriment to the trade at large, and that a single State association's small, weak voice would count for nothing unless a national body stood ready to assist her. What the national association was to the State, so the State association was to the individual jeweler, and the State association that did not affiliate was like the individual who encouraged the movement but was afraid to join and pay his dues.

Speaking of the effect association work is having, Mr. Hurlbut said:

"Conditions which beset us have been of long standing, and the evils of which we complain, have been years in developing, most of them have been the result of the natural evolution of the methods of retail merchandising, and many of them have crept in through the fault of the jeweler himself. To expect to correct these conditions, and settle wisely and definitely all these questions, in the three short years since this association work was first undertaken, would be rank folly.

To say that the mountain has labored and brought forth a mouse, as has been said, or to say that no tangible results have been secured, would be equally foolish, and brand the author as being actually ignorant of the facts, or mighty careless in the way he handles the truth. In some States we have already united more than one-third of the jewelers of the State into one harmonious working body. And local city associations can be reckoned by the score, where all the jewelers have joined for mutual benefit and instruction, removing hundreds of the petty local jealousies and animosities, and making every jeweler in the town a better merchant and hence a better citizen.

Thousands of jewelers throughout the country can to-day testify to the fact that through this association agitation, the ideas that it has brought forth, both in the press and in the conventions, has done much to instruct them as to better methods and opened up new avenues of profit, made rough roads smoother, set them to using their heads more and their hands less, to the mutual advantage of themselves and the communities in which they live. So the greatest and most prominent result already to be considered is this of the education of the jeweler himself.

Another result which is manifesting itself, as a result of this work, is in the changing attitude of

some of our manufacturers, in regard to their treatment of the retail trade. Did you ever hear of a fixed price on anything but a box of pills 10 years ago? Did we hear any loud noises coming to us about lines confined strictly to legitimate jewelers, or any strong denials by the jobbers that they did not retail, before we got this association to working overtime? Did we ever hear much said about the qualities we were getting for the money we were paying? Was there ever so much interest in assays, stamps and qualities as there is to-day?

I say *no*, gentlemen. And I also emphatically state that these things have been brought about by the education the retailer has had, from these questions being brought up at State meetings and published broadcast through the trade press.

As an educator alone the association has its greatest excuse for being, for education along common sense business lines, and especially in the rudimentary elements of his own business, is what the average jeweler most needs to-day. Educate the jeweler in his own line to a point where he will make a merchant instead of a mechanic, and as a rule a poor mechanic at that, and you will

J. P. ARCHIBALD, PRESIDENT-ELECT.

have done wonders in removing nine-tenths of all the troubles of which he now so strenuously complains.

One of our largest watch companies has already fixed the minimum selling price on 26 of its grades. Another has adopted a policy of not allowing its product to go into a catalogue bearing the factory name. Another sells all its output direct to the retailer, and that at a fixed selling price. There are two makers of plated hollow and flat ware that sell no one but the retail jeweler and him direct, and the goods under a positive guarantee. Two of the largest manufacturers of sterling silver in the world sell no one but the legitimate trade, and their product under a fixed minimum selling price. There is not one large concern in the country, prominently known, which, although it may have been careless in its habits in the past, but what to-day, through this constant hammering by the associations, is gradually transforming its policies as rapidly as possible to conform to our demands. This may sound strong to you, but I know whereof I speak. They are all good business men, and by far too intelligent to ignore the handwriting on the wall.

After speaking of the two journals which are published exclusively by the association, he took up the subjects of elements necessary to the success of the organization, stating as an axiom that to do any permanent good to the craft at large the association work must necessarily be based on principles that are fundamentally correct and American to the core. The pugnacious organization, he thought, was a mistake, where the interests, although diversified, are tending toward the same end and the greatest danger to the organization was

radicalism, particularly along the line of policies which, carried to their logical conclusion, would result in greater damage to the trade than the evils which they attempt to correct.

He advocated the "square deal" principle toward all interests which, while curbing errors, would never wave the red flag of anarchy or stoop to abuse or vituperation. The paramount good to be obtained from association work will lie in making its members better merchants and broader business men, "educating them to their own rights, while advising tolerance of the rights of others." An education that would broaden the jeweler from his narrow environment, where he is prone to pass snap judgment on conditions without analyzing the case might make him discover the beam in his own eye as well as the mote in the other fellow's, and Mr. Hurlbut emphasized the fact that any question that arouses discussion, among serious-minded men must have two sides, each containing an element of truth, both of which should be entitled to a fair hearing. The jeweler must be in a position to intelligently judge those things that affect his interest, and, if he is not so, they will be settled by opposing interests and the jeweler can blame himself.

It is easier to make a snap judgment than it is to provide a suitable remedy. Putting yourself in the other fellow's shoes will frequently make the walking easier for both. To forever criticize and complain, without once offering a solution of the difficulty, and ignoring the other fellow's right to consideration, makes a man a common "knocker" and not a reformer. I take it for granted that it is a jewelers' association we are attempting to form, neither a "boosting" or a "knockers" club. Both sides to these many questions have rights in the matter, and for the jeweler in his association work or through his official organ to arbitrarily decide them to his own interest without regard to what injustice may be done to others, is simply presumption on his part and will never be of any permanent good to the trade. True, some so-called evils through cowardice on the part of the so-called enemy, may be temporarily whipped into line, but if so coerced at the first opportunity, will assert themselves with renewed life.

The true aim of this association work should be, to my mind, to harmonize the entire jewelry trade of the country—manufacturer, jobber, trade press and retailer. All four classes of which are striving toward the same end, namely, to gain a livelihood, and what measure of success is possible, either financial or otherwise, from the jewelry consuming public. Now, with this common end and interest in view, can we as retailers, or any one of the other branches, afford to antagonize any one or more of the other branches? We are all in the same boat, should be of one mind, and work together in harmony of purpose and unity of effort. That this ideal condition does not exist is clear to all, and its lack is the basis of all dissension and trade abuse, of which we as retailers so bitterly complain.

A house divided against itself cannot stand, there are signs of cleavage and cracks, and we are met for the purpose of discovering the cause and providing a remedy. Most of the bitter feeling is due to a mutual misapprehension of the conditions rather than a malicious intent to injure any one.

The first thing for the retailer to do, is to get his own door yard clean, and prepare himself, by thought and research, to intelligently and fairly meet all questions affecting his interests, and present them intelligently to the other divisions of his own craft. By the time he has gotten his own doorstep cleaned, I imagine he will at least have fewer complaints to make of some of the others. Of course, in order to present his side of the question he will have to have some definite organized body to deal with, as it is impracticable for the retailer to go to the others as individuals. This means necessity of organization in the other branches. But this is coming, and very rapidly, too.

Speaking of the organization in the job-

THREE SECTIONS OF A GROUP PHOTOGRAPH SHOWING THE OFFICERS, DELEGATES AND MEMBERS AT THE THIRD ANNUAL CONVENTION OF THE AMERICAN NATIONAL RETAIL JEWELERS' ASSOCIATION, AT CINCINNATI, O., AUG. 4-7.

ling and manufacturing lines, Mr. Hurlbut advocated the settlement of disputes by committees from the organizations of the sections of the trade meeting in dispassionate, joint conference and working out the best solutions for all the interests involved. He thought in this would lie the solution of many of the trade evils, but first the retailer would have to get properly organized, and he proceeded to show the members that an organization meant more than the names of a few men on a roll and the election of officers, and that a president and secretary cannot get out with "a torch in one hand and a red flag in the other and in 28 minutes revolutionize conditions which have been years in growing up."

Speaking of the mistakes made by State associations, he said that the national body had also made many of them, and that it was a distinct mistake to act precipitately. He warned the members to be careful during the convention in their proceedings, as they were apt to "not only put their foot in their mouth, but swallow themselves whole."

Mr. Hurlbut then devoted considerable time to the discussion of the question of an official organ, telling what, in his opinion, should be the character of such a paper if it were adopted, explaining the dangers that beset a paper of this kind when conducted by one man, even if he be the soul of honor, and saying that if such an organ were started it should be conducted by a board of control elected by a popular vote of the organization. Whether it was practical or not, remained to be seen, but the experiences with those papers which had already been started must be carefully considered.

Mr. Hurlbut urged the importance of a national organizer, but opposed the proposition for a paid secretary.

He then devoted considerable time to discussing the stamping laws, advocating the principle of the national gold and silver stamping laws which we have but declaring against compulsory stamping legislation, which, he thought, would be a bad thing for the trade and never be accomplished. The proposed amendment to the national law covering the words "solid gold" he suggested be again taken up and amended so as to do away with the use of the word "solid" entirely and confine the regulation to the word "gold."

After discussing the proposed watch case guarantee bill, he took up the subject of watch inspection, saying that a wrong construction had been placed on the real purpose of the resolution passed last year and that the association had discovered that it was being used as a cat's paw for certain interests. It was with principles and not individuals that they must deal, if the association wished to retain the respect of the trade, and he suggested that they do not make the mistake this year in passing any resolutions that might be used as an attack on a particular individual. As far as watch inspection was concerned he thought that it was a Federal rather than a State question, and, anyhow, it was the railroad man rather than the jeweler who suffered and it was up to the latter to make his own fight.

Emphasizing the importance of suppressing fraudulent advertising, he advocated a law that would make all misrepresentations

in advertising, direct or indirect, a case of fraud.

As to the location of the next convention, he warned the members that the handling of an assembly of this kind was a serious matter and should be considered so by those tendering the invitation and no place should be finally decided upon until they were convinced that their hosts were in a position financially and in other respects to take care of the entertainment and the visiting jewelers.

In the peroration with which he wound up his address, Mr. Hurlbut said that the officers put forth these views on the vital questions simply from their standpoint and as a result of their experiences, but it was the duty of the convention to stamp their recommendations with either approval or otherwise, as it was on the jewelers there assembled that rested the responsibility of giving official sanction or stating the sense of the organization. He asked them to bear in mind the question of the greatest good for the greatest number in making their decision, to note well the former mistakes and avoid a repetition of them. He asked that their actions express the will of the organizations which they represented, but that they do not antagonize the great mass of jewelers who were as yet not members of the association.

In electing officers he asked them to consider the fitness of the man for the place, remembering that the success of the association depended largely upon the work of the officers. No man was too good to be at the head of the organization, nor no man so big that the position will not do him honor.

Remember, gentlemen, said he, that in a sense the eyes of the jewelry world are on us. What we do here marks either a milestone of progress or a loss of prestige. What we do here either wins us the respect of the craft at large, or sounds the doom of association work in the jeweler's field. This, to my mind, is our most important convention; on its results depend the success or failure of association work. Other lines have made organization a success, why not the jeweler?

A. F. Sheldon then delivered an address on scientific salesmanship, and a resolution of thanks was passed, after which N. Nielson, of Iowa, read a paper entitled "Are our lines drifting in other channels?"

This address will be published in full in the next issue of THE CIRCULAR-WEEKLY.

The meeting then adjourned till the evening, when T. C. Higginbotham, consulting superintendent of the South Bend Watch Co., delivered a lecture on "Ailments of the escapement and how to treat them." A working model of the lever escapement  $4\frac{1}{2}$  feet high was used in demonstration. The lecture was well attended and more than interesting to the audience. The lecture appears in the Horological Department of this issue.

This marked the end of the first day's proceedings.

#### WEDNESDAY'S SESSION.

Wednesday morning President Hurlbut opened the convention by announcing that he had received word from the Hon. E. B. Vreeland, of New York, that he could not make the address before the convention on "Legislation that Effects the Retail Jew-

eler," as Mr. Vreeland was in Europe. He introduced Joseph Mazer, president of the Oklahoma Retail Jewelers' Association, who addressed the meeting on "The Fixed Selling Price."

#### THE ADDRESS OF JOSEPH MAZER.

Mr. Mazer's address was by all odds one of the most interesting, instructive and entertaining delivered before the convention, for in it facts were mixed with humor in a way that both held his listeners and made them smile, and his stories were directly to the point.

After beginning by speaking of the honor conferred upon him in letting him talk about the "fixed selling price," he spoke of the interest he had taken in the subject and said he had always considered the phrase a synonym of equality and that there was no equality in conditions which permit mail order concerns to sell eight-day clocks for less than the cost to the retailer. He compelled the attention of his hearers and evoked great applause by saying:

From the term "Fixed Selling Price" I understand a condition where certain well known articles are sold at uniform figures wherever the purchase may be made. And lest I be misunderstood, let me place myself on record as favoring a fixed selling price on certain classes of goods only. As, for instance, a 15-jeweled Elgin movement to fit an 18 size case is the same wherever bought, and because of its character can be readily distinguished as being the same by the most ordinary purchaser. The same conditions exist in well known makes of plated flat ware, gold filled watch cases, nickel alarm clocks and other merchandise of a similar nature. On goods of that character only do I believe in having a fixed selling price. When it comes to a gold brooch or stick-pin or piece of cut glass, where the chances are that ordinarily your customer would never be likely to see another one of the same pattern, I say charge what you like. But when it comes to an 1847 Rogers butter knife it should never be possible for a customer to enter your store and price it at 75 cents, go to your next door neighbor and price the same butter knife at maybe 65 cents, and what is still worse go to some department store or write to Sawbuck & Co. and get the same 1847 butter knife for 37 cents.

The manufacturers all have fixed selling prices now for the jobber, and they maintain them, too. Wherever you buy a Waltham movement you pay the same price for it. The same is becoming true of flat ware and alarm clocks and Carmen bracelets, and other items I might mention. If the jobber can be protected by the manufacturers against cut throat competition, why in the name of common sense cannot the retailer be protected in the same manner?

Do we want a fixed selling price? Of course we do. As well ask do we want the complete abolishment of the mail order and department store evil. For, Mr. President, ladies and gentlemen, the establishment of a fixed selling price, I claim, is the only solution to the mail order problem of to-day. And at this point permit me to deviate slightly from my subject. A great many jewelers are all the time harping about the mail order evil and feel that the only solution to the problem is to stop the supply of those houses. And it is in this respect that the jeweler makes a mistake. Our mission in life is to rebuild, not to destroy. We are fighting destruction. We object to the wanton destruction to our business resulting from unfixd price competition, but not evil while practicing the God given right of self-preservation have we the right to be unnecessarily cruel to the enemy. We are not a combination for the restraint of trade, as would be the case if we denied the right to mail order houses to handle the merchandise peculiar to our craft, we are a body of men met here for the purpose of seeing that the manufacturers, whose existence is made possible by the retail jeweler, give to us the fixed price protection on all their output which some of them are now giving us on but part of it.

Compel a reasonable, legitimate fixed selling price at which the jeweler could sell and the mail order house would have to live up to and

what the customer would buy from the mail order house or department store, when he knew that he could buy at the same figure from you. I claim that under such conditions the mail order evil would practically eliminate itself of its own accord in less than two years.

The speaker then convulsed the jewelers by drawing a mental picture of the effect which the establishment of the fixed selling price would have, telling how he saw in four years' time Mr. Sawbuck knocking at his door on a cold Winter night, gazing into his eyes and saying in a broken voice filled with emotion, "Joe Mazer, your 1908 jewelers' convention, which met at Cincinnati, is responsible for this," telling him that the fixed selling price had jolted the

how they had told him that they were able to protect the higher priced movements, but on the low priced could do no better than compel the mail-order houses to sell 10 per cent. above list. This, he said, reminded him of the story of the doctor who was called in to attend the baby who had swallowed a five-dollar gold piece, and who reported to the father a short time after that he was not quite successful inasmuch as he had only been able to recover \$2.98. He said the manufacturer who tells him he can enforce 10 per cent. and not 25 per cent., reminds him very much of this doctor.

Mr. Mazer then read to the convention

instances in other lines, among others, phonographs, cameras, Gillette safety razors, etc., and said that while it was true that there may be retailers who would be mean enough to cut secretly, he believed that the number was so small as to have no appreciable effect upon the condition of the trade. Concluding, he said:

Let me impress upon you the fact that the manufacturers are not your enemies. There is not one of them but what is your friend, and a well formed demand for your rights, backed by your pledges to refrain from the handling of the goods of any manufacturer who refuses to recognize them, will quickly bring any one of them to his senses. For the past year we have had a great and good president, a hard working secretary, and to-day we have one of the largest and best attended jewelers' meeting which has ever been held in this country. The future looks brighter, the clouds are passing away, and before this meeting has adjourned the sun will be out in all its glory, and as we look at the bright blue sky, we will see the rainbow, the symbol of hope and the performance of a promise ever shining to remind us of the covenant to stick to each other forever and eternity. I thank you.

The applause which greeted Mr. Mazer at the conclusion was subject to comment in many of the newspaper accounts.

Then followed an informal discussion of the subject for half an hour. Nielson, of Iowa, said the association must fight fire with fire. Mazer said he would fight it with water. Nielson said every mail-order house wanted to drive every jeweler out of business. Mazer told him he was mistaken. The mail-order house had a right to exist, but as long as there was no fixed selling price he was not going to buy from the factory who sold them. He said to Nielson, What right have you to sell china? You're no Chinaman!

Mr. Heizer, of Tennessee, said if the jewelers only had backbone enough they could get what they wanted. Mr. Barker, of Minnesota, ended the discussion by saying there were two ways of doing business; one was the old style, where everyone was for himself, and the new style, which was the organization style of controlling prices.

President Hurlbut then said: "At the meeting of the Executive Committee in January we took occasion to condemn certain watch factories for making special stuff under a fictitious or assumed name and selling it to the catalogue houses. Now, then, the question I want to propose is this: Do we approve of that policy where the concern does it in order to prevent knifing of their goods? For instance, a concern goes to a catalogue house who will have their goods and they say: "If you will not mention our name in your catalogue, or cut the price, we are willing to lose the advertising value of your catalogue, and we are also willing to furnish you all the movements that you want." Now, then, is that good business on their part? Is it not proper for us to accept that policy rather than have the prices cut? This is quite a question if you will think of it, and I would like to hear from you. There have been resolutions passed by several State associations indorsing this—that is, that if we cannot have a whole loaf we would rather take half a loaf.

Mr. Rothermel, Indiana, said if they conceded this privilege that they open the doors to all other manufacturers to do the same thing.

Mr. Stebbins said it did not make much difference what the name is that is on the

OFFICERS OF THE AMERICAN NATIONAL RETAIL JEWELERS' ASSOCIATION.

Front Row—A. E. Paegel, J. P. Archihald, C. H. Williams, I. M. Radabaugh. Rear Row—Mack A. Hurlbut, R. C. Bernau, S. Callison.

mail order people with a solar plexus blow more severe than was ever delivered by Fitzsimmons, and recalling to him the hey-day of the mail-order man's prosperity when the jeweler would write to the manufacturer to stop selling mail-order houses, and how often he (Sawbuck), with much glee and jubilation, would assist in writing the letters with which the manufacturer would jolly the complainants.

Speaking seriously again of the fixed selling price, he said that they would want it fixed sufficiently high "to enable the jeweler to enjoy life, liberty and the pursuit of happiness from behind the dashboard of a four-wheeled buggy." He then told how, as president of the Oklahoma Association, he had written the watch manufacturers on the question of the selling price and

the resolutions which were adopted by the Oklahoma Retail Jewelers' Association at the last annual meeting covering the fixed selling price, to the effect that the fact that the manufacturers protected the price on movements to 10 per cent., proved the practicability of protecting them to a higher extent, and insisting that this protection should be put at 25 per cent. above list, the profit to be at least \$2.50 on each movement. The resolutions also pledged the jeweler to handle only such price protected goods. This resolution, he said, would be introduced on the floor of the convention by Oklahoma, and he asked for its support.

Speaking of the contention that the manufacturer could protect the selling price of his wares, and showing the good that could result to the trade, he cited many specific

movement. The thing the jeweler is after is the profit. Besides, there is a matter of law at stake. "We have no right to demand that goods be taken away from our competitor when he is serving the public. There is no question about that, and it does not make any difference what we say, the public are going to say, 'What is the jeweler going to charge us for his goods?' Now, the Illinois Watch Co. has made special watches—watches under fictitious name. They make one for me under a fictitious name—under my own name. It is the profits we are for. It is a reasonable profit we are after. I do not care a rap about the name on the case. What I want is a reasonable, living profit. If the companies find they can control the situation better for us by making the watch under another name and selling these fellows, let them do it. It yields us profits."

President Hurlbut then gave instances in the silver-plated ware trade, showing why certain companies had to go to hardware trade who made a market for their products.

Mr. Armbruster then explained the position of the Illinois Watch Co. towards the mail-order houses. He said 18 years ago mail-order houses sold watches at 50 per cent. above the list, and as they gradually lowered their price the Illinois company threatened to cut off their supply. The mail-order houses had accumulated such a stock, however, that they threatened to demoralize the market. The Illinois company then bought back all these watches and agreed to furnish the mail-order houses with special watches of a different design and construction from the ones they had previously been selling. The Illinois name is not mentioned in the mail-order catalogue or advertising matter.

The visiting ladies' outing commenced at 10 A. M. Wednesday. Forty-two ladies headed by Louis E. Dornseifer, the local jeweler, marched to Fountain Sq., where were in waiting two special cars. The party, after taking seats, were soon on their way to Ft. Thomas, Ky., and the Highlands of Kentucky. At 12 o'clock the trip was completed. On their return to the city the ladies were served an elaborate lunch at the "Bismarck." At exactly 1 P. M. the party started on a trolley ride through the eastern suburbs, winding up at the Zoo at 3.45 P. M., where all were entertained by the Indian show Hiawatha. This being the closing time of the afternoon's program at Sinton Hotel, the men soon met their wives and friends at the Zoo, where they had supper and listened to the band concert in the evening. It was agreed by all the ladies present that Mr. Dornseifer knows how to entertain, and as an act of appreciation circled around this gentleman and gave him the Chautauqua salute, with three rousing cheers, which he no doubt will long remember.

The ladies' reception committee, of which Louis E. Dornseifer was manager, consisted of Mrs. R. F. Freisens, Miss E. Gimper, Miss Lotta Huck, Mrs. L. Hohneck, Miss Edith Dornseifer, Miss Ida Heintz, Mrs. J. H. Reinstatler, Miss Ruby Bertling, Miss Alma Heintz, Mrs. Barker and Mrs. John Bertling.

In the evening 150 Ku-Kus were initiated in Nest No. 2. This was followed by a Dutch lunch and smoker.

#### THURSDAY'S SESSION.

Thursday morning the secretary announced that the total membership was 1,778, and the treasurer reported \$970 net balance in the treasury. President Hurlbut read a letter from Secretary Taft wherein the latter said it would be impossible for him to address the meeting. J. H. Purdy then addressed the meeting on "Trade-Marks—Their Use and Efficiency." Mr. Purdy began by saying that it was not price, but quality, that should be impressed on the general public. He said jewelers should acquire prestige and price would follow. He said that organizations should be organized so that the benefits should accrue to its members only, and that the A. N. R. J. A. should adopt a trade-mark indicative of high quality on all the various lines of jewelry handled. He received a rising vote

A. E. PAEGEL, VICE-PRESIDENT.

of thanks when he concluded. Mr. Purdy's address will be published in a future issue of THE CIRCULAR-WEEKLY.

A. L. Sackett next delivered an address on "Retail Organization and Its Benefits to the Manufacturer." Mr. Sackett began by paying a glowing tribute to the memory of the late John C. Dueber. Mr. Sackett said the benefits of organization cannot rest with the organizer alone, but that both retailer and manufacturer would derive equal benefit, but that they must meet face to face on all questions. He said if the organization was strong enough to eradicate from the trade objectionable characters who make it impossible for the manufacturer to control the distribution of his product at a proper price, the benefits to the manufacturer would be great. Mr. Sackett concluded by saying that organization men should stand by their creed and stand by those who stand by them.

Mr. Sackett's address will be published at length in a future issue of THE CIRCULAR-WEEKLY.

T. L. Combs, Omaha, then read a telegram from the Omaha Commercial Club,

inviting the next convention to come to Omaha. This invitation was accepted.

A. E. Paegel, Minnesota, as chairman of the Audit Committee, then read his report on last year's exhibition expenses. Total receipts, \$1,092.25; expenses, \$3,575.10; net balance, \$517.15. This was approved and adopted.

Thursday afternoon the Credentials Committee reported 110 delegates present entitled to a vote.

The new Auditing Committee (A. B. Hull, chairman) reported a balance of \$970.74 on hand, and recommended a new set of books.

Nominations for election of officers were then begun.

Mr. Mazer, of Oklahoma, made a magnificent speech and nominated John P. Archibald, Blairsville, Pa., and A. C. Graul seconded the nomination. R. B. Clark, Anderson, Ind., nominated John P. Mullally, Indianapolis, Ind., and Mr. Stebbins, of Ohio, seconded the nomination. Mr. Archibald won and Mr. Mullally then withdrew, Mr. Archibald being elected unanimously.

The race for first vice-president was between Joe Mazer, of Oklahoma, and A. E. Paegel, of Minnesota, and the latter won.

Charles H. Williams, Condon, Ore., was then elected second vice-president by acclamation. G. J. Damm then nominated Ira M. Radabaugh for secretary, but the latter declined to serve on account of ill-health, and S. Callison, Dexter, Ia., received the office.

R. C. Bernau, Greensboro, N. C., was re-elected treasurer. These officers, together with Mack A. Hurlbut and Ira M. Radabaugh, constitute the Executive Committee.

In the evening the members took a boat ride to Coney Island, a resort on the Ohio river, and enjoyed themselves visiting the various attractions.

#### FRIDAY'S SESSION.

Friday morning the chairman of the Committee on the President's Address, Mr. Hannis, of Nebraska, reported it advisable to make some minor changes in the constitution. The president was heartily commended for his work during the past year. The chair then announced that in future all complaints should be sent to the national secretary, although conceding the States the right to regulate their own difficulties if they so choose.

After a discussion on how to build up membership, Mr. Arkright, of Nebraska, suggested a central bureau of information to be run in connection with the secretary's office. The question of a next meeting place was then reopened. Mr. Hull, of Michigan, backed by Detroit firms, invited the convention to that city, but Omaha was again decided on.

Friday afternoon marked the end of the meeting. This was by far the most important session of all, as the members gathered to hear the report of the Committee on Resolutions. The following resolutions were read and passed:

#### The Resolutions.

##### APPRECIATION.

RESOLVED, That we the American National Retail Jewelers' Association, in convention assembled, take this occasion to heartily express our appreciation for the many courtesies extended by the city and trade press; the exhibitors, speakers,

advertisers, the committee of the retail and wholesale jewelers, the Mayor, the manufacturers, the hotel people, the visiting ladies and all others, for their many manifestations of interest which they evidenced by their anxiety at all times to do everything possible and impossible to add to our comfort and that we realize to the full that it is due entirely to their stupendous labors that we are able to leave Cincinnati feeling that our leaving is perforce sad to us because of the many endearing friendships that we are forced to leave behind; and

BE IT FURTHER RESOLVED, That a copy of these resolutions be spread upon the minutes of this meeting and that they be published in the different city and trade journals.

#### WATCH INSPECTION.

Whereas, A certain resolution regarding "Watch Inspection" legislation, which was passed at the last annual convention of this association, has been grossly misconstrued, thereby putting the association in a bad light; and

Whereas, The said resolution did not condemn the present system of "Watch Inspection" as a whole; and

Whereas, We believe that the "Watch Inspection" system has been of incalculable benefit to the public safety; now therefore be it

RESOLVED, That we regret that our former well-meant action should have been so misconstrued; and

BE IT FURTHER RESOLVED, That we favor a uniform system of "Watch Inspection" conducted along lines like or similar to those now in use; and

BE IT FURTHER RESOLVED, That we do not favor any State legislation pertaining to "Watch Inspection," but that we do favor federal legislation compelling "Watch Inspection" upon all railroads known and recognized as "common carriers"; and

BE IT FURTHER RESOLVED, That we favor a uniform minimum standard of grade and performance regardless of make for all watches, for all roads; and

BE IT FURTHER RESOLVED, That copies of these resolutions be forwarded to the officials of all railroads and to all chief inspectors in the United States.

#### AMERICAN SOCIETY OF EQUITY.

RESOLVED, That we commend the American Society of Equity for the valuable assistance in our campaign against the "mail order evil" by refusing to publish their advertisements in the official journal of the society, and that a copy of these resolutions be spread upon our minutes and a copy be sent to their secretary.

#### EXECUTIVE COMMITTEE.

RESOLVED, That we recommend empowering the Executive Committee with full authority to arbitrate all disputes which might arise between jobbers and jewelers, or manufacturers and jewelers, and accept and extend such invitations for joint conferences and take any other such action as they may see fit for the promotion of friendly relation and the advancement of mutual interest.

#### WATCHES.

RESOLVED, That we commend the various watch companies who have changed their plans of marketing their product with a view to strengthening the regular retail jeweler; and

BE IT FURTHER RESOLVED, That we more heartily commend those watch manufacturers who are marketing their products entirely through the legitimate jobber and retail jeweler.

#### BUREAU OF ASSAYS.

Whereas, There seems to exist various reasons which make it advisable that a bureau of assays be established in the American National Retail Jewelers' Association; and

Whereas, There seems to be a feeling in the trade that such a bureau would be of untold benefit to the retail jeweler; therefore be it

RESOLVED, That the executive committee be and hereby are instructed to establish such a bureau as soon and in such manner as they may deem expedient.

#### OFFICIAL ORGAN.

RESOLVED, That the American National Retail Jewelers' Association, in convention assembled, refer the advisability of establishing an official journal to the executive committee with power to act.

#### FIXED SELLING PRICE.

BE IT RESOLVED, That the American National Retail Jewelers' Association, in convention assembled, indorse the principle of a fixed minimum selling price on all articles manufactured in the jewelry line of a staple nature; and be it further resolved that we recommend to the jewelers of the country that in the sale of staple articles in our

line a preference be given such manufacturers as offer and maintain these prices.

RESOLVED, That we the American National Retail Jewelers' Association, in convention assembled, hereby commend the policies of all manufacturing concerns of jewelry and kindred lines, who have established a minimum selling price on their products; and be it further resolved that we as members of the A. N. R. J. A. bend every effort to the maintenance of such fixed prices.

#### STAMPING.

RESOLVED, That we do not favor stamping laws as now proposed, but do recommend a federal advertising law which will prosecute fraudulent advertising.

#### SOLID GOLD.

RESOLVED, That the name gold or solid gold shall be considered to be 23.85 fine.

#### DISCOUNT KEY.

RESOLVED, That we recommend to the watch, jewelry and kindred material dealers the adoption of a new discount key, to be known as the association key, to be used in all their catalogues and advertisements. The key to be disclosed only to the legitimate retail jeweler, and in every case to be sent under separate cover from the catalogue and as sealed mail only. The character of the key to be decided upon at the first meeting of the executive committee, and that a copy of this be sent to the National Jobbers' Association.

#### TRADE-MARK.

RESOLVED, That we favor an association trade-mark, controlled entirely by the association, the privilege of the use of said trade-mark to be confined exclusively to such jewelry only as is sold to regular association jewelers and the character of the trade-mark to be such as to permit its stamping on the average article of jewelry. And the composition of said trade-mark to be such as will permit the jeweler to recognize at a glance the maker and the quality.

BE IT FURTHER RESOLVED, That the executive committee be instructed and empowered to take such steps that they may deem advisable to bring about this result.

#### TIME GUARANTEE.

RESOLVED, That this association favors the elimination of a time guarantee from the watch cases, provided that a law preventing fraudulent advertising be passed.

#### JOHN C. DUEBER.

Whereas, The all wise ruler of the universe has seen fit to remove from our midst one of our co-workers, John C. Dueber; and

Whereas, We realize that in his death we lose a friend and a worker in our behalf; now therefore be it

RESOLVED, That we deeply deplore the death of Mr. Dueber and we extend to the bereaved family our sincerest sympathy; and be it further resolved that a copy of these resolutions be spread on the minutes and a copy be sent to the family.

#### MERCHANTS' TRADE JOURNAL.

Whereas, the *Merchants' Trade Journal*, of Des Moines, has caused the indictment in the courts of certain catalogue houses who have seemingly misrepresented the wares which they sell, including the jewelry line.

BE IT RESOLVED, That we, the American National Retail Jewelers' Association, in convention assembled, do hereby most heartily commend and indorse the above-mentioned journal for its untiring efforts in the interests of honorable merchandising; and be it further

RESOLVED, That we spread these resolutions upon our minutes and forward a copy to the *Merchants' Trade Journal*.

Mr. Williams, of Oregon, in a fine tribute of appreciation to Mark A. Hurlbut on behalf of the organization, presented him with a large loving cup. G. J. Daum presented Ira M. Radabaugh with a silver vase and Max Jennings received a loving cup at the hands of Hr. Herzer, of Tennessee.

After the installation of officers the assembly sang "America" and the convention was over.

#### FRIDAY EVENING.

Friday evening was the wind-up of the American National Retail Jewelers' Association convention. This was the Cincinnati Wholesale Jewelers and Manufacturers' Association treat to the visiting jewelers and

ladies. And it might be well to say, though it was the last feature of the convention, it was by no means the least, for in many years Cincinnati has not seen such an entertainment given in her city as was offered on this evening.

Sixteen well-filled special cars left the city at 5.30 p. m., carrying the association's invited guests over considerable territory to Chester Park, where the jewelers and their wives were soon seated at beautifully decorated tables. An elaborate banquet was served, and during this time the diners were pleased with music furnished by some of the finest talent in the city. It might also be said that at times this music only served as an accompaniment to the multitude of voices which went up in songs like "My Old Kentucky Home," etc.

Souvenir programmes handsomely decorated by hand graced each plate, as well as the quantities of cut flowers artistically arranged. The main crowd were seated at long tables running through the banquet hall, while small tables were set to accommodate the overflow. By 8 o'clock all had been served, a flashlight picture made, and the throng were pushing their way along to the theatre where the opera "Carmen" was played.

A spirit of merriment seemed to pervade the air, and as an act was completed the air was filled with shrieks of the members of the Ku Kus, who seemed to be in all parts of the house. Many songs were sung and various kinds of entertainment afforded until the main performance began again.

At 10.30 the opera was over and the departing guests went their different ways declaring that this had been a most enjoyable day, and none could say enough in praise of the Cincinnati Wholesale Jewelers and Manufacturers' Association for the hospitality. The committee in charge, who are to be congratulated on this most successful affair, are D. J. Gutmann, Arno Dorst, A. J. Thoma, George J. Gruen, Wm. Pflueger, E. J. Fox, W. W. Oskamp, H. C. Schwab and I. Herman.

#### The Roster.

Among those registered at the convention were:

Charles E. Raab, Parkersburg, W. Va.; David C. Cornwell, Athens, O.; G. J. Daum, Port Clinton, O.; W. T. Harrison, Williamstown, Ky.; W. C. Hollinger, Madisonville, Ky.; Nicholas Lanning, Walton, Ky.; T. C. Lewis, Hardinsburg, Ky.; L. W. Lewis, Columbus, O.; V. C. Loos, Athens, O.; W. D. Martin, Rocky Mount, Va.; W. R. Pfeifferle, Dunkirk, O.; R. N. Phipps, Fulton, Ky.; Charles J. Scholler, Van Wert, O.; J. K. Stebbins, Ashtabula, O.; W. R. Stevens, Chicago, Ill.; A. Thoma, Piqua, O.; Max J. Mittendorf, Mrs. A. Zerweck, Mrs. Ed. Zerweck.

#### OHIO RETAIL JEWELERS MEET.

CINCINNATI, O., Aug. 5.—The Ohio Retail Jewelers' Association met at 2 p. m. Monday, with J. R. Stebbins, president, in the chair. The object of this meeting was to appoint delegates for the present convention. After the reading by Secretary Lightner of the minutes of the last meeting, held in conjunction with the Tri-State Convention here last September, President Stebbins gave an address reviewing the work of the past year and forecasting the coming convention.

Reports of standing committees were given on "Trade Interests and Legislation," "Qualities and Assays" and "Membership and Deceased Members." The membership has increased from 137 to 182. The resolutions committee was appointed as follows: Robert Freisens, Cincinnati; G. J. Daum, Port Clinton, O.; Frank Deinlein, Columbus, O.; C. Scholler, Van Wert, O., and A. Schemel, Cincinnati, O. Delegates were then appointed by President Stebbins as follows:

DELEGATES—Robert Freisens, Cincinnati, O.; John Bertling Cincinnati, O.; Otto C. Lightner, Cincinnati, O.; George Heintz, Cincinnati, O.; Edward Simper, Cincinnati, O.; G. J. Daum, Port Clinton, O.; A. L. Thoma, Piqua, O.; L. W. Lewis, Columbus, O.; C. K. Weaver, Miamisburg, O.; J. R. Stebbins, Ashtabula, O.

ALTERNATES—George Nagel, Cincinnati, O.; C. S. Scholler, Van Wert, O.; A. S. Schemel, Cincinnati, O.; W. Barker, Cincinnati, O.; E. B. O. Smith, Lancaster, O.; George Link, Cincinnati, O.; Mr. Cornwell, Athens, O.; August Hohneck, Cincinnati, O.; William Fink, Cincinnati, O.; J. T. Burkhardt, Dayton, O.

A recess followed; business will again be resumed during the week. Resolution will not be presented for adoption until last day of convention.

CINCINNATI, Aug. 10.—A meeting of the Ohio Retail Jewelers' Association was held, Aug. 7, and the following officers were elected: J. R. Stebbins, Ashtabula, president; Robert Freisens, Cincinnati, first vice-president; L. W. Lewis, Columbus, second vice-president; A. L. Thoma, Piqua, secretary; G. J. Daum, Port Clinton, treasurer.

A resolution was passed condemning certain watch manufacturers for not establishing a fixed minimum selling price for their product, and also for not marketing it through the retail jewelry trade. The resolution commended the companies who did so.

#### The Exhibits.

Too much praise cannot be given to the exhibits or exhibitors. A great deal of genuine hard work was spent on this particular feature of the convention, and the result would do a "world's fair" considerable credit. Though the weather was almost unbearable, those representing the different exhibitors did not shirk and everyone showed the greatest care and taste in arrangement of the booths, as much so as though the exhibits had come to stay. The majority of the booths were decorated in white and pale green, which gave a cooling and very inviting aspect. Many trailing greens as vineing asparagus, similar and other dainty hot-house plants were used as finishing touches and added much to the pleasing effect generally.

The exhibits were located on the ninth floor where visitors were constantly dropping in as all of the meetings were also held on this floor. A reception room, especially fitted up by Lindenberg, Strauss & Co., having beautiful floral decorations, etc., was generally well filled with visiting jewelers who always received a cool drink of lemonade, no matter how many times they called.

The exhibit of the Whites Art Co., Ontario, Can., in charge of C. F. White, showed the largest and finest display of hand-painted china of this kind ever seen here. The concern's specialty in mat colors in the velvet finish made a distinct hit.

Charles M. Slemmons and J. W. Armbruster, in charge of the Illinois Watch Co.'s display, were very busy showing their watch and its construction, as well as handing out the company's handsome souvenir postal cards.

The Western Clock Mfg. Co., La Salle, Ill., exhibited a very large line of various kinds of clocks under the management of L. W. Arnold and W. J. Stanton, who presented callers with a souvenir miniature alarm clock attached to a ribbon badge.

The Seth Thomas Clock Co. made a large display of the Seth Thomas Clocks. The exhibit was in charge of Geo. H. Wald.

The Dueber-Hampden Watch Works exhibited 1,500 complete watches. This display was very effective and in charge of D. W. Douglass. Dialing blocks, memorandums and stick pins were the souvenirs given to visitors.

The Bay State Optical Co. exhibit was in charge of W. R. Stevens, who made the main feature of his exhibit the new "Defi" frame. Samples of solder were given away by this company.

The R. F. Simmons Co. made a handsome display of chains, under the management of George L. Sweet.

Sydney Y. Ball and J. S. Coy, of the Webb C. Ball Watch Co., were here and "talked watch" as their company did not exhibit.

Lindenberg & Fox exhibited their various lines of jewelry. The members of the firm were in charge of the booth and served lemonade to all visitors.

The Herschede Hall Clock Co. exhibited one of their handsome hall clocks on the stage of the convention hall, and it proved

not only ornamental, but useful to the convention.

The Rockford Watch Co., represented by J. M. Rosenbach, made a fine display of about 300 watches, beautifully arranged on a large red velvet and gilt horseshoe.

Joseph Homan, president of the Homan Mfg. Co., was in charge of the Homan exhibit, which was very handsome, and showed only the richest and latest products of the company's plated hollow ware line.

The Bastian Bros. Co., Rochester, made a very fine showing in class pins, emblems and badges of all kinds. The exhibit was in charge of A. J. Swezy.

The new Cincinnati Ice Hot Bottle Co. exhibited a new heat and cold retaining bottle, under the direction of G. P. Altenberg, the proprietor, and his assistant, Miss Ida McCray.

Representative McKinley, of the Elgin National Watch Co., was here in the interests of his company, and busy handing out yellow lead pencils, on which was printed in gilt letters: "The Watch in the Box" is an Elgin.

The North American Watch Co., whose exhibit was in charge of Will Halger, assisted by his wife and son, made a fine display of watch emblem goods, showing samples of cases in the different stages of completion. This company gave miniature mirrors as souvenirs.

The Kraemer Art Co., Cincinnati, made a very beautiful and attractive showing with lines of postal cards and art novelties, under the direction of J. Kraemer. Many souvenir cards were given to callers.

The Peninsular Engraving Co. had a most interesting and instructive display of jewelry catalogues and art novelties for jewelry business. H. F. Gruschow was in charge of the exhibit and had no difficulty in getting rid of the fans, which he presented as souvenirs.

L. W. Lewis, proprietor of the Tarnishoff Mfg. Co., exhibited, demonstrated and gave some of his new discovery in silver polish, which contains *no cyanide*. It is thought to be a wonderful discovery.

The Queen City Silver Co. had on view a full and very handsome line of hollow ware. The exhibit received many comments of praise and was in charge of G. H. Honbrink, H. E. King and R. Betts.

Allsopp Bros. showed a very fine line of rings, the specialty being a lady's coral set shirtwaist ring. The exhibit was in charge of George A. Allsopp, Jr., assisted by his wife. Each visiting jeweler received a fine leather pocket book containing a genuine accident policy for \$1,000 for one year.

S. O. Bigney & Co.'s booth, which contained a very fine and large display of chains, bracelets, lockets and fobs, was an object of interest. The exhibit was in charge of Carl T. Weibezahn, assisted by his wife. Souvenir show case mats were given to visiting jewelers.

The Smith Silver Co., under the management of W. F. Joel, exhibited a fine and extensive line of flat ware. Mr. Joel was congratulated on his ability as an exhibitor.

The Carence Crafters, Chicago, had the finest and most extensive exhibit of arts and crafts ware of a high type ever ex-

hibited to the jewelers here in connection with an event of this kind. The exhibit was in charge of H. E. Calmer and E. H. Hless.

The W. & S. Blackinton Co. made a very handsome showing with an extensive line of chains, fobs, bracelets and lockets, under the management of Alvin Shattuck. An interesting feature of the exhibit was a length of gold rope chain extending from 600 to 800 feet, and the process of making this was explained from beginning to end. Desk mats were the souvenirs presented by this company.

Joseph Fahys & Co. and the Alvin Mfg. Co. had a joint exhibit which was distinctly attractive and contained some very fine lines of watches, flat, hollow and deposit ware. The souvenirs which were here given were much sought after. A very unique pendant stick pin was presented by Joseph Fahys & Co., whose exhibit was in charge of W. B. Harris. George Holden, assisted by G. M. Hanan, took charge of the Alvin Mfg. Co.'s lines.

The principal feature of the South Bend Watch Co.'s exhibit was a large model of an escapement, which C. D. Higginbotham used in his lecture on "The Errors in Escapements and How to Correct Them." Representatives of the company here with the exhibit included: S. D. Ryder, vice-president and general manager; C. D. Higginbotham, H. C. Carpenter, J. K. Coulter, George H. Lang, V. C. Regan and J. W. Frazer. These gentlemen were kept busy showing the concern's "keep track of tack system."

The White-Haines Optical Co.'s exhibit, in charge of F. R. Combs and Mr. Parks, was a very fine one, as well as extensive.

The Buck Silver Co. showed a large and very handsome line of their hollow ware. The exhibit was in charge of A. L. Sacket, manager of the concern.

M. Greer, of the Greer Mfg. Co., demonstrated with the Greer solder and pinning and holding clamps, as well as his double bearing pin stems. He presented his callers with a patent fish hook.

The M. S. Benedict Mfg. Co.'s exhibit showed a large display of hollow ware, flat ware, arts and hand-wrought craft goods, as well as fine display of art metal wares.

The Pickard China Co., Chicago, made a very extensive display of hand-painted china. The exhibit was in charge of A. A. Bruckner. L. D. Bloch & Co. also made a fine display of china and art goods, under the direction of Alfred Goldsmith.

The Philadelphia Watch Case Co. and the New York Standard Watch Co. held a joint exhibit of the lines of the latter, being in charge of C. S. Wilson, who made a special feature of the Excelsior watch. The watch case exhibit was in charge of F. E. Hyatt and J. C. Becker.

William Weidlich & Bro. exhibited sterling silver line for the Watson & Newell Co., chains for the Chapin & Hollister Co., and the Wright self-filling fountain pens. The exhibit was in charge of William Weidlich and H. F. Hines.

The Quaker City Cut Glass Co. made a very extensive and handsome display of rich glass ware, which was in charge of M. Weinstein.

Albert Bros., local jobbers, pleased the

visiting jewelers by presenting handsome oxidized silver paper knives, bearing the name of the firm. Robert J. Seifert and H. M. Chaffee represented this house at the convention.

While, Wile & Warner showed a complete line of rings of all kinds. The exhibit consisted of 5,000 rings and was in charge of Harry H. Wile.

The Onaida Community, Ltd., made a very handsome display of flat ware, a specialty being made of a fine line in the Louis XVI. pattern. John H. Cragin was in charge of the exhibit.

Austin & Stone exhibited a very fine line of fobs, vest chains, bracelets and cameo necklaces. J. E. Dunn was in charge.

The Keystone Watch Case Co. and the Crescent Watch Case Co. made an extensive and fine display in charge of Harry Walton, their local manager.

#### KENTUCKY ASSOCIATION MEETS.

CINCINNATI, O., Aug. 5.—The members of the Kentucky Retail Jewelers' Association held their first regular meeting since organizing, Monday at 3 p. m., when the association planned its business for the coming year. President L. C. Eisensmith of Covington, took charge of the meeting, which closed the open charter.

A new committee on constitution and by-laws was appointed as follows: William M. Irion, Matt Irion, R. Baude, all of Louisville, and the following delegates and alternates were appointed by the president to represent the association at the present convention: DELEGATES—C. E. Duhme, Covington; Fred Pieper, Covington; J. W. Jones, Mt. Sterling; T. C. Lewis, Hardinsburg; R. N. Phipps, Fulton.

ALTERNATES—W. C. Carroll, Lebanon; S. S. Van Hoy, Shelbyville; J. W. Keller, Georgetown; O. R. King, Lexington; G. Gallup, Cattlesburg.

The next annual meeting of the association will be held at Louisville, Ky., in conjunction with the optical association.

#### Death of John Harriott.

BOSTON, Mass., Aug. 8.—John Harriott, an old and well-known manufacturing jeweler of this city, died to-day at the residence of his brother at Everett. The news of his demise was received with deep regret by his many friends in the trade, as the deceased had long been known not only in this city, but throughout New England.

Mr. Harriott, whose specialty was manufacturing emblems, and who was an expert enameler, designer and engraver, was about 68 years old. He learned the jewelry business as a young man and started in for himself in the early '70's, and for more than 30 years he had occupied the quarters at 3 Winter St. He built up an excellent trade in lodge jewelry, class pins and emblem work generally. Of recent years Mr. Harriott had associated with him his two sons, Thomas C. and Bertram, who will, no doubt, carry on the business as before.

Deceased's reputation in the trade was of the highest, and he was noted as a square man whose honesty and integrity were both beyond question. Though in some things considered somewhat eccentric, those who knew him best found him a staunch friend and an able business man.

# TO THE TRADE

¶ The Gorham Company cordially invites those members of the Jewelry Trade who contemplate a visit to New York, to make their headquarters at the Gorham Building, Fifth Avenue and 36th Street.

¶ Here they will be assured of a hearty welcome and of all conveniences necessary for the transaction of their business, the receipt and despatch of their correspondence, and the making of such appointments as they may desire.

¶ The Company's preparation for the business of the coming season has been unusually thorough, and visiting members of the Trade will be much interested in the inspection of the full and varied line of goods exhibited, which cannot fail to attract every legitimate jeweler.

**MEMBERS** of the trade who have **officially Approved.** Use of Elk Teeth Of-  
 were no doubt pleased

at the news, received last week, to the effect that the Committee on Preservation of the Elk Animal, appointed at the request of Grand Exalted Ruler Melvin, at Philadelphia, a year ago had made its report during the session of the Grand Lodge of Elks at Dallas, Tex., sustaining the use of the elk's tooth as a charm of the order, and verifying by their investigation the statements that were made by the manufacturers of these charms when the agitation first came up, to the effect that the use of the elk's tooth in jewelry had in no way increased the death of this noble animal, nor incited the hunter to slay him. Jewelers who remember the agitation that was practically started by some public letters of the President will recall that it resulted in a number of people trying to abolish the elk tooth as a charm, because the use of it might induce needless slaughter of the elk. Many members of the Order of Elks opposed this view, and the manufacturers who bought and mounted the teeth insisted that the elk was never killed for its teeth, which were worth but a small amount compared with the other parts of the carcass, but, on the other hand, that the greatest number of fine elk teeth came from elks that had been killed years and years ago by the Indians, and were only now being put in the market.

While the Order of Elks took no definite action in regard to abolishing the charm, the Committee on Preservation of the Elk Animal took the subject under advisement, made a careful investigation and spent at least a month's time in the personal haunts of the animal inquiring into the conditions and obtaining data on which to base a report. The results of this investigation were lucidly set forth in the report submitted to the session of the Grand Lodge in Dallas, and showed conclusively that no one hunted the elk for his teeth, but the supply which the Order used in its charms had come almost entirely from the Indian graves, having been used as ornaments by the red men years ago, when the teeth practically passed as currency.

Until this committee had submitted its report many members of the Order concluded to desist from wearing the tusk simply to be on the safe side, but since the committee reported there is now no reason why the tooth should not obtain its former popularity, or be even in greater demand than ever before. It might be mentioned in passing that nothing submitted to the Grand Lodge was more enthusiastically received than was the report of this committee.

**Satisfactory Increase in Gem Importations.** AN even greater improvement in the importation of precious stones than was

noted during the month of June is apparent in the figures showing the amount of gems brought into the port of New York during the month of July, the total increasing from \$701,869 to \$1,249,256, making the past month the first of the year in which normal figures have even been approached. The gratifying feature of the statistics lies in

The circulation of The Jewelers' Circular-Weekly covers the entire jewelry field. Properly designed advertising in its columns produces positive results.

the fact that the increase has been gradual, as well as pronounced, ever since December last, every month exceeding the previous month by many thousands of dollars and by a greater amount than before. As June jumped over May by an increase of nearly \$240,000, so July jumped over June by an increase of \$547,000.

Of the total for July, \$1,249,256, the value of cut precious stones and pearls was \$1,101,842, and of the uncut precious stones, principally diamonds, \$147,414. Of course, these figures look small in comparison with those of June, 1908, which was one of the greatest months in the history of gem trade (the cut stones and pearls brought in then amounting to \$3,075,004 and the uncut stones \$1,383,729), but a comparison would not even have been proper if the present year had been normal, as there had been a concentration of imports at that time.

If actions speak louder than words, the importations of gems worth a million and a quarter dollars by our diamond and precious stone merchants indicate a confidence in the future as well as an improvement in the present conditions of business that is most gratifying, particularly when we bear in mind the fact that the gem line is the first to feel a depression in business and the last to feel a resumption.

**Failures During July.** ACCORDING to statistics compiled by *Dun's Review*, commercial failures in the United States were 1,232 in the month of July, with liabilities of \$14,222,126.

This is the lightest mortality of any month in the past year, with the single exception of May, 1908. In July last year there were 777 failures, involving \$12,334,710 in amount. Manufacturing failures last month were 314 in number, against 211 in July, 1907, while the amount of liabilities was \$5,835,018, compared with \$4,449,226 a year ago. There were 871 trading failures for \$6,160,713, whereas in the same month last year only 531 defaults occurred in this class and the amount involved was \$4,852,907. Other commercial failures, including brokerage, real estate, insurance and similarly partially speculative concerns, were 47 in number and \$2,226,395, against 35 last year, when the amount involved was \$3,082,577.

Unfortunately the jewelry trade by itself does not make the good showing indicated by the statistics for all lines. According to the table of failures by branches of business compiled for *Dun's Review* there were 21 insolventcies among jewelry and clock dealers last month, whose liabilities amounted to \$183,697, or an average of \$8,747. According to the same table, there were but

## ROCK BOTTOM PRICES ON DIAMONDS

Our diamond prices are rock bottom.

We import the stones direct, cut them ourselves, and sell them as close as anybody in the country does for diamonds of equal quality.

We carry a large stock at all times and the jeweler who sends to us for a selection not only gets rock bottom prices, but also a liberal assortment—and, what is of utmost importance, he gets it promptly.

### Good Gold Jewelry

*It's the  
only kind  
we make*

A RATHER COMMONPLACE DECLARATION, WE'LL AGREE, BUT WE MAKE IT WITH AN INSPIRING REVERENCE FOR THAT MUCH-ABUSED WORD "GOOD." OUR JEWELRY IS GOOD ALL OVER—GOOD THROUGH AND THROUGH. IT ISN'T ALONE SUPERFICIALLY IMPRESSIVE, IT GOES BEYOND THAT, SUPPORTING ITS VISIBLE DIGNITY WITH MATERIAL QUALITIES THAT MAKE IT MOST ENDURING. FURTHERMORE, LIKE EVERYTHING IMPRESSIVE, IT HAS A PERSONALITY—CHARACTERISTICS THAT EASILY HELP IDENTIFY IT AS A KIRBY PRODUCT. ASK TO SEE THE KIRBY LINE BEARING THE ABOVE TRADE-MARK.

three failures in July, 1907, with liabilities of \$2,793; 12 in 1906, with liabilities of \$38,201; eight in 1905, with liabilities of \$11,495, and 12 in 1904, with liabilities of \$49,377.

### Lancaster, Pa.

#### TRADE CONDITIONS.

With prospects good for another big tobacco crop (Lancaster County's staple asset) this Fall, Lancaster jewelers look forward to improved trade conditions. Stocks, however, are not heavy at the present time.

Morris Edelstein has been visiting in Philadelphia, Paterson, N. J., and New York.

Thomas T. McIntyre, a Quebec jeweler, is at present visiting his brother in Lancaster.

John Shookers, watchmaker for Louis Weber & Son, is spending his vacation at Atlantic City.

The Hamilton Watch Co.'s factory, after an unusual vacation of a month, has resumed operations.

Ansel Whiting, Detroit, stopped in Lancaster, last week a few days with friends, en route to New York on a buying trip for his firm.

William G. Fehl, with S. Kurtz Zook, has gone to New York on a pleasure trip, and Edwin D. Mason and his wife are on a week's fishing trip.

Oscar Benton left Aug. 2 for New York, from which place he has since sailed for Liverpool, England. He will spend a few weeks in Yorkshire with relatives.

Louis Berman, with M. Berman, Altoona, formerly of the local technical school, while en route to Norfolk, Va., last week, stopped off in this city for a short time to see his brother.

At the golden jubilee of the Lancaster Maennerchor, Aug. 6, Henry Gerhard, honorary president, was presented by the society with a beautiful large gold loving cup, furnished by Aug. Rhoads.

Isaac Weidler has been prosecuted before Alderman Stauffer by William Grant & Co., Philadelphia, for larceny by bailee. It is alleged they sent jewelry and other goods to him to Lancaster, and he appropriated the same to himself. He was also prosecuted in Philadelphia, and now the legal authorities of both places are at loggerheads as to which shall try him.

A very neat little centering device has been invented and patented by S. G. Twambley, Biddeford, Me. This simple device was invented for the purpose of finding the centers of a staff or pinion before drilling a hole for a new pivot. It is made of tempered steel and consists of a drill holder, a tube, a centering piece and a blade. The drill holder is made to fit accurately into the tube. The centering piece into which the tube is also perfectly fitted, is provided with a conical hole on one end, where different sizes of staffs can be fitted without shake. By adopting this method the staff or pinion to be drilled is kept in center by the conical hole of the centering piece and the drill holder entering from the opposite side is also kept in center by the tube, so that the centers of a staff or pinion can be found without difficulty or error.

## New York Notes

I. L. Grady, Jackson, Tenn., was in town last week.

B. Roede, 47 John St., returned Thursday on the *Proctoria* from Europe.

H. H. Curtis, North Attleboro, Mass., was a visitor in town last week.

Andrew Irons, representing Joseph Irons, 25 Maiden Lane, is on a trip in the south.

Wm. Brand, with M. Sickles & Sons, Philadelphia, is spending a vacation in this city.

Mr. Elling, eastern buyer for Isidor Lewkowitz, Grand St., is enjoying a two weeks' vacation.

James McDermott, of the Jewelers' Board of Trade, is spending his vacation at Catskill, N. Y.

Edmond E. Robert returned from a trip in Europe on the *Kronprinz Wilhelm* early last week.

Henry Fera, of Fera & Kadison, 65 Nassau St., returned from Europe recently on the *Amerika*.

Henry Kirschner, Buffalo, N. Y., is visiting his brother, of J. Kischner & Co., 621 Broadway.

Albert Pfeifer, of Albert Pfeifer & Bro., Little Rock, Ark., was a visitor in town during the week.

Wm. Hofman, of Eichelberg & Co., 65 Nassau St., sailed, recently, on the *Kronprinzessin Cecilie*.

Wm. Eyster, head of the Jewelers' Supply Co., Seattle, Wash., has been a visitor in town during the week.

George Williams, the manager of the Bennett Co.'s Omaha, Nebr., store, was a visitor in this city last week.

Wm. Parker, Philadelphia, is covering the south Atlantic States for the New York office of M. A. Mead & Co.

M. Herman, of Herman & Loeb, Cincinnati, O., was a visitor in this city for several days during the past week.

F. R. Hauser, for 15 years with M. Straus, 409 Fulton St., Brooklyn, has resigned his position with that concern.

E. Frank, jewelry buyer for the Young-Quinlan Co., Minneapolis, Minn., was registered at the Hotel Wolcott last week.

Wm. C. Solomon, of Wm. C. Solomon & Co., has returned from a trip in the southwest. He reports business fairly good.

Walter B. Marble, of the W. B. Marble Co., Attleboro, Mass., returned last week from a vacation spent at Asbury Park.

Miss Katherine Flynn, jewelry buyer for Chuneman & Evans, a large St. Paul, Minn., department store, is in town this week.

Miss W. S. Anker, jewelry and leather goods buyer for Stewart & Co., Baltimore, Md., was a local visitor during the past week.

J. Ernest Thier, employed locally by A. H. Bliss & Co., returned last week from Europe, where he spent a two months' vacation.

H. J. Cook, Nashville, Tenn., was in town last week on his way to Boston. He will attend the optical convention in Philadelphia.

Chas. Hanni, western representative for Sussfeld, Lorsch & Co., returned Saturday of last week on the *Savoie* from a trip to Europe.

Directors of the Gorham Mfg. Co. have declared the regular quarterly dividend of

2½ per cent. on the common stock, payable Aug. 12.

F. L. Chamberlain, a jewelry buyer for the Jones Dry Goods Co., Kansas City, Mo., was registered last week at the Hotel Grand, in this city.

Arthur A. Kahn, of the American Gem & Pearl Co., returned from Europe, Tuesday, Aug. 4, on the *Kronprinz Wilhelm*, after an absence of 10 weeks.

George G. Wheeler, superintendent of the W. & S. Blackinton Co.'s factory, North Attleboro, Mass., was at the local offices of the concern last week.

John R. Scofield, New York and Boston representative for Thomas W. Adams & Co., is critically ill at a Brooklyn hospital after an operation for gall stones.

Frank J. Gibson, with the J. J. White Co., has engaged a suite of rooms at the Oriental Hotel, Manhattan Beach, where, with his family, he will spend the Summer.

C. P. Kionka, of this city, is recovering from a short illness which he suffered while visiting his brother, a Kansas City, Mo., jeweler. He will return to this city soon.

John Drew, local salesman for Parks Bros. & Rogers, Providence, while on his vacation, was unfortunate enough to severely cut his foot. He is able to be about on crutches.

Harris Michalson, president of I. L. Michalson & Sons, Ltd., Montreal, Can., sails, Aug. 18, from this port on the *Kaiser Wilhelm II*. He will visit London, Paris and Amsterdam.

J. B. Haskins, formerly for over 20 years a New York representative for the T. I. Smith Co., 13 Maiden Lane, has purchased an interest in the J. P. Granberry Co., manufacturer of jet goods at 114 E. 14th St.

The New York Times in last Sunday's issue printed a half-page article giving an interview with Dr. George F. Kunz, head of the precious stone department of Tiffany & Co. in regard to the proper selection of precious stones and jewelry by men and women. A photograph of Dr. Kunz was also published with the interview.

S. Warren Granbery, of J. A. & S. W. Granbery, entertained a party of Maiden Lane friends on a trip in his power boat, the *Irene II*, Wednesday and Thursday of last week. The trip was started on Wednesday afternoon and Thursday was spent fishing off the New Jersey coast near Asbury Park. A most enjoyable time is reported.

The Board of United States General Appraisers decided last week that brooches, slides, gold, silver and nickel plated watch chains and side and back combs mounted with metal and gold plated are properly dutiable as jewelry with a tax of 60 per cent. The importers contended that the articles should be considered as of the value of metal, and as such should be dutiable at the rate of 45 per cent. ad valorem.

John J. McGrane, a well-known jeweler of this city, has presented the Pope with a valuable building in New York State, which is to be given to the Italian Salesian Fathers for the establishment of a college. The building is located at Hawthorne, Westchester County, and is to be called Christopher Columbus Hall in honor of the Knights of Columbus. Mr. McGrane is at

present in Europe. He is expected home about the middle of September.

A decision written by General Appraiser Fischer, last week, held that various lines of Japanese goods shipped to this country by Kaitsu Gomei Gwaisha, a firm of Yokohama, were undervalued and must stand the higher duty. The merchandise in question includes brass vases, brass candlesticks, antimony ash trays and similar goods. Some of the vases invoiced at 5 yen apiece were held by the Board to be worth 6.25 yen each, while the candlesticks and ash trays were also advanced over the entry price.

The home of Wm. J. Ward, 13 Maiden Lane, which is located in Jersey City, was visited, Saturday, by a man who gave the name of Charles Nelson, and said he was from Providence. Policeman Wm. Blakey had been trying the doors of the houses on Bentley Ave. when he saw a man emerge from the basement of the Ward residence. He had a grip in one hand and a package in the other. The policeman stopped the man and took him to police headquarters, where about \$500 worth of jewelry and other trinkets were found in the man's possession, according to the police. Mr. Ward hurried to Jersey City to make an inventory of his property.

The boy giving the name of Marx Goldberg, who visited the offices of Wm. Nicholson, 13 Maiden Lane, Aug. 3, where he attempted to get away with a locket, and who was caught in the hallway of the building by the elevator man and on the complaint of Mr. Nelson taken to the Children's Court and there found guilty, has been paroled until Sept. 16. The locket was found secreted on the first floor of the building. The young man represented that he wished to buy a lady's gold locket valued at from \$10 to \$15, and after looking at the stock attempted to conceal a gentleman's locket in his pocket. He was detected by the jeweler and caught when he tried to escape.

Solomon Urbach, who was formerly a diamond dealer, and who professed to have been robbed of about \$40,000 worth of diamonds which he obtained on memorandum from Maiden Lane merchants, was by order of Judge Holt released last Saturday from the Ludlow Street Jail. On Oct. 28 of last year Judge Holt committed Urbach to the County Jail for contempt of court and Urbach was told that he would have to remain locked up until he turned over the missing diamonds to his creditors. The jewels were not restored, but yielding to the appeal of the prisoner's friends, and because of the fact that Urbach had been locked up for more than nine months, Judge Holt decided to give him his freedom.

The nephews of Charles Rubens, who died in Paris in 1906, bequeathing his fortune of \$2,000,000 to two friends in New York named Schellheimer and Heidelberg, are contesting his will on the ground that Rubens was in reality a Frenchman named Samuel Woog who went to America, became naturalized and amassed a fortune in the diamond trade and then returned to France in 1868. The nephews declare that this being so the property should be divided in accordance with the French law. Schellheimer and Heidelberg maintain that as the

## New Orleans, La.

Adrian J. Morais, 304 Godshaux building, recently returned from New York and the east, where he made large purchases of jewelry and diamonds and greatly increased his stock.

The local police recently sent to the police of Houston, Tex., a quantity of jewelry valued at \$100, taken from the rooms of R. A. Brown, now in the penitentiary on a charge of burglary. Brown admitted to the local police that he had committed burglaries in Houston and the jewelry was sent there in the hope of finding the owners of it.

August Royerre, a jeweler residing at 1554 N. Claiborne St., brought the police to his home recently by discharging his revolver at what he believed to be burglars entering his house. The police learned that Mr. Royerre was at present under treatment of a physician and was continually under the impression that burglars were trying to rob him.

The New England Watch Co., Waterbury, Conn., has just issued a very handsome catalogue, illustrating the company's entire line of watches for both men and women. The half-tone plates, printing and paper are of the highest class, while the arrangement and decorations are most artistic. Every movement is illustrated and fully described, and withal this catalogue is one that every jeweler will find interesting. Copies will be sent upon request to the New England Watch Co.

## Newark.

J. F. Crane, of Mandeville, Carrow & Crane, 332 Mulberry St., returned from Europe on the *New Amsterdam*, last week.

Some of the creditors of Joseph Karlenesky, who skipped from Newark about two years ago under sensational circumstances, learned, last week, that he had returned to this city.

V. L. Kurtz, traveling for A. Rosenberg, 50 Columbus St., has started from Philadelphia on a trip over his territory in the middle west. Charles Weinberg, who covers the Pacific coast for this house, also started this week, as did F. M. Scheiner, who covers Ohio and New York.

Theodore C. Bothmann, retail jeweler, 225 Broad St., Elizabeth, has returned from a two months' tour through Germany. He left Elizabeth May 28 on the steamer *Deutschland* for Cuxhaven, the home of his parents. He remained 14 days with them and assisted in celebrating with his family his father's 70th birthday anniversary.

Complications have arisen in the settlement of the estate of the late John D. Nesler, this city, who died June 16, leaving property valued at \$60,000. Two wills were offered at the Surrogate's office, one for probate and one for filing, and three caveats were filed on behalf of prospective contestants. Mr. Nesler, who was a retired jewelry manufacturer, was 80 years old when he died.

William Frazer, a 14-year-old boy, was arraigned in the Recorder's Court, Jersey City, last Friday morning, on complaint of Mr. Schaffer, who keeps a stand at Melville Park. Schaffer testified that young Frazer broke into the stand and stole nine one dollar watches. The boy admitted the theft, but said he took only two of the timepieces. On condition that the loss be made good Schaffer withdrew the charge.

Benjamin Berkowitz and Maurice Apisdorf, who, according to the police, have been working a clever game upon their fellow countrymen, were locked up last week at the Central Police Station on charges of obtaining money by means of false pretense. Their plan was to approach one of their own nationality who presented a prosperous appearance and wore some article of jewelry and tell the victim a hard-luck story. If the person with whom they conversed were a woman, wearing a pair of diamond earrings, they would explain to her that they had a pair that were much better than hers and that, owing to their financial condition, they would trade with her providing she would give to them a certain sum of money in addition to her jewelry. In the cases where they were successful the party who made the trade discovered, after the men had made good their escape, that the jewelry given them by the men was of no value.

One class of Newark manufacturers who are enjoying improved conditions lately are those making the best lines of goods. One of the leaders in this regard explains the situation this way: "When times are flush there are millions of people who buy comparatively cheap jewelry, but once, twice or three times in a lifetime indulge themselves in something much better, such as a \$150 brooch, a \$200 ring, or things of

that sort. They are contented with the lesser grades for the most part, but celebrate weddings or some special occasions with these more elaborate purchases. Then there are the very rich who think nothing of spending \$500 for a desired piece of jewelry. When times are close, as they are now, our business flourishes, for we deal with what I choose to call the 'poor millionaires.' The class which buys something expensive only a few times in a lifetime stops buying altogether, but the ones who ordinarily would buy \$500 goods are now down to \$100 to \$200 purchases. What we lose from one class we gain in the other."

Three young men are under arrest in Union Hill, N. J., charged with receiving stolen goods from Pauline and Minnie Miskam, daughters of Frederick Miskam, a jeweler at 105 Bergen Line Ave., Union Hill. The stolen property included diamond rings, watches and other jewelry which came from the jeweler's show cases and safe. Mr. Miskam appeared as complainant against the trio, but declined to take criminal action against his daughters. The prisoners are Nicholas Schutz, Jacob Maibach and Robert Baker. The sisters acted as clerks for their father in his absence and for a long time the jeweler missed articles from his stock, but was unable to account for their disappearance. According to the estimate made by the police the losses have totaled about \$1,000. Young Maibach had so much money that his mother became suspicious and, learning that he was on good terms with Pauline Miskam, a confidential talk with the jeweler followed. It is said that Mr. Miskam scouted the suggestion that his daughter was responsible for the young man having so much money, but later the girl confessed that she had been giving things away. She also furnished her father with a list of the young men who had been enjoying themselves on the proceeds of his stock and, as a result of this, warrants for their arrest were obtained. The three young men were held without bail for examination.

## Trans-Atlantic Voyagers.

## TO EUROPE.

Edward Herschede, of the Frank Herschede Co., Cincinnati, sailed July 30.

Wm. Hofman, of Eichberg & Co., New York, sailed on the *Kronprinzessin Cecilie* last week.

Harris Michalson, of I. L. Michalson & Sons, Ltd., Montreal, sails, Aug. 18, on the *Kaiser Wilhelm II*.

## FROM EUROPE.

B. Roede, New York, returned recently on the *Pretoria*.

Henry Fera, of Fera & Kadison, New York, returned from Europe recently on the *Amerika*.

Edmond E. Robert returned recently from a trip to Europe on the *Kronprinz Wilhelm*, Tuesday of last week.

Arthur A. Kahn, of the American Gem & Pearl Co., New York, returned, Aug. 4, on the *Kronprinz Wilhelm*.

Herman Schulz, Dubuque, Ia., has taken a position as watchmaker and engraver with A. H. Smith, Cherokee, Ia.

## Philadelphia.

Jacob Rubenstone, 1607 Susquehanna Ave., is reported to be seriously ill with an attack of bronchitis.

S. Rosenblatt, a retailer, Germantown Ave. and York St., is spending August with his family at Atlantic City.

A. F. J. Dorn, 834 Market St., Camden, with his watchmaker, Charles Zeskey, spent the week's end fishing at Avalon, N. J.

Philip Muhr, formerly of the old house of H. Muhr's Sons, but now a portrait painter, is with his family at Atlantic City.

Albert Loetznitz has given up his retail jewelry store at 318 Girard Ave., and is now doing work for the Sansom St. wholesale trade.

Bert. Gaylord, with H. O. Hurlburt & Sons, has returned from a three weeks' vacation to Atlantic City and other Jersey sea coast resorts.

Philip Friedel, watchmaker for the trade, 727 Sansom St., contemplates building in the Fall on property recently purchased by him at Faraday Park.

Andrew S. Smith, with L. P. White, has the sympathy of his friends in the trade owing to the death, Thursday, of his father, Wm. Hastie Smith, a well-known stock broker.

J. Fisher, with R. M. Cooper & Son, material dealers, 722 Sansom St., is receiving the sympathy of his friends in the trade on account of the death last week of his mother.

The Philadelphia Watch Case Co., at Riverside, N. J., closed down last week to permit their employes to enjoy a 10 days' vacation and to furnish opportunity to prepare for a resumption of full time under the most favorable conditions.

William H. Doebele, 722 Sansom St., manufacturing jeweler, began to move, Monday, into the new building leased by him at 811 Sansom St. He expects to have completed all necessary alterations and to be well started in business at his new place by Sept. 1.

Retailers here last week to purchase of local jobbers included: Henry Bolte, Atlantic City; Josiah B. Heckler, Mainland, Pa.; Edmund D. Oliver, Burlington, N. J.; D. H. Krouse, North Wales; E. K. Bean, Lansdale; B. C. Foster, Bristol, Pa.; H. V. Stratton, Bordentown, N. J.

Charged with obtaining under false pretenses a ring valued at \$250, from a jeweler in Wilmington, Samuel P. Langdon, a former coal mine owner and millionaire, was held in \$600 bail by Magistrate Scott in the central police court, recently. Langdon is accused of passing a bogus check to get the ring.

J. A. James, Swedesboro, N. J., started this week for Omaha on a three weeks' vacation. He will revisit the scenes of his boyhood and the family seat in the west. Mrs. James stopped off in this city last week homeward bound from Washington, and visited wholesalers to replenish stock during her husband's absence.

Fred T. Barry, with L. Stern & Co., returned to the city from Ocean City, where he is spending the Summer with his family to attend the convention of the Pennsylvania Retail Jewelers' Association and the American Optical Association, with whose

members Mr. Barry has become intimately acquainted during years of traveling for representative jewelry houses.

J. Burroughs Robertson, with M. Sickles & Sons, spent a few days last week at Wayne, Pa. James McMillan, also of the material department, returned from a vacation in the Pocono Mountains. Gustavus Sickles, connected with the Newark factory, was in the city the latter part of the week and rejoined his family, which is quartered at Atlantic City for the Summer.

Wholesale jewelers and material men are prepared this week for an influx of retail jewelers from all rural points near Philadelphia, Delaware, New Jersey, Maryland and Virginia, who will take advantage of the assemblage of Pennsylvania Retail jewelers in annual convention to visit this city, place their order and join in the festivities of the gathered jewelers and opticians.

Sylvan Lentz, a youth of 21 years, employed as a salesman for Schweizer & Co., jewelers, 122 N. 12th St., shot and killed himself Friday at his home, 57 N. Millick St., in the presence of his sister, Florence, with whom he had been joking a few minutes before. The motive for the suicide is unknown. The young man had a good position and no financial troubles. He had no love affairs so far as is known and was a temperate character. It is believed that the heat may have affected his mind temporarily.

Evan Gaunt, Rio Grande, N. J., has established himself in business as an itinerant clock and watch repairer and retailer of jewelry. He has purchased two wagons and, leaving his place of business in Rio Grande early every morning, starts out through the neighboring country in South Jersey, visiting farmers, planters, small industrial places and business men. Mr. Gaunt declares that a jeweler who keeps literally on the move in the country is what is needed and declares that early results justify him in expecting success.

Henry Bolte, Jr., 926 Atlantic Ave., Atlantic City, N. J., has purchased the property at 928 Atlantic Ave., adjoining the store, and proposes to remove the partitions, make extensive alterations and improvements and unite the two properties, making for himself perhaps the largest and handsomest retail jewelry store at the popular seashore resort. Mr. Bolte's business career at Atlantic City was begun six years ago and has been remarkably successful. He is being urged by influential friends at the shore to become a candidate for the Atlantic City Council. The contract for the improvements to be made to the old and new store of Mr. Bolte was let last week.

Thomas Howard, a boastful young man, who is of the opinion that he is a clever and notorious jewelry robber and who lays claim to many sensational jewelry store robberies (which he cannot substantiate and of which the police declare is not guilty), is again in police custody. This time it is for attempting to steal a fishing reel. It will be remembered that he gave himself up some months ago and declared his conscience had jolted him so often about robberies that he had committed that he was impelled to make a complete con-

fession. The confession was made and the police investigated, only to learn that Howard was the victim of hallucinations. Now he is starving. He is deficient mentally. The police are trying to find some institution to accept him as a boarder.

Another outing is to be given its members and their friends by the Philadelphia Jewelers' Club. At a meeting of the Board of Governors last week it was decided to give the annual clam bake, Sept. 15, at Burlington Island, in the Delaware river, 20 miles above the city. The club members and their guests from all surrounding parts and New York and the New England centers will leave the city at noon in a special boat. The journey up the Delaware river will be made delightful. Burlington Island is situated at a point in the river where the scenery is especially charming. It is well wooded and shaded. For the clam bake the club will bring a noted chef from Pleasure Bay. On the banks of the island all the delicious sea food, fowls and vegetables will be roasted on mounds of seaweed in sight of the guests. Louis P. White and Joseph E. Cadwallader are entrusted by the Board of Governors of the club with authority to complete arrangements to make this year's Fall outing the most successful ever given by the club, and with the memory of the success attending the shad dinner and other recent festive celebrations, the club members declare they need no further assurances.

## Harrisburg, Pa.

W. H. Gantt was one of a party of Newport business men who drove from that town to Millerstown, Liverpool and Millersburg last week. The return trip was made via Montgomery's Ferry and Buck's Valley.

Several local jewelers were present at various sessions of the joint convention of the American Association of Opticians and the Pennsylvania Retail Jewelers' Association, held in Music Fund Hall, Philadelphia, Aug. 10-13, and were delighted with the entertainment provided by the Quaker City jewelers and opticians.

Through the efforts of the Harrisburg Retail Merchants' Association the aquatic carnival scheduled for Saturday next has been postponed until Labor Day, which will be a general holiday. The merchants, who are passing through a dull period, were afraid a Saturday carnival would injure Saturday trade. They expect to profit somewhat by the annual excursion to this city Saturday, Aug. 29, of Waynesboro shipmen and their friends to the number of 1,000 or more.

A fire recently broke out on the roof of the building occupied by Herbert Knox & Co., Elgin, Ore. The flames were extinguished before doing any great damage to the jewelry store.

Frank L. Miller, New Vienna, O., who recently purchased the jewelry stock of E. F. Marble & Bro., Wilmington, O., assumed charge of the business, Saturday, Aug. 1. Mr. Marble has retired after 50 years of active business service.

No. 2.

### Chicago Notes.

Dudley Bard, with A. C. Bard & Co., is on a vacation.

F. W. H. Schmidt made a short trip in Indiana last week.

H. S. Record, Cambridge, Ill., is taking a course in optics here.

John Hillinger, of R. J. Hillinger & Co., leaves, this week, for a Pacific Coast trip.

L. Lyons, of the Lyons Mfg. Co., Providence, R. I., visited the Chicago office last week.

H. G. Rettig, of Rettig, Hess & Madsen, is taking a two weeks' outing near Ludington, Mich.

A. R. Oughton, manager for the Chicago office of the Jennings Bros. Mfg. Co., is making a trip in Michigan.

Miss A. Hansen, cashier for the M. S. Fleishman Co., is taking an outing at Muskegon, Mich.

August Meyer, Grand Island, Nebr., stopped over here on his way to the convention last week.

The American Silver Co. has just issued a new catalogue which is being mailed to the trade from the factory.

W. H. Kinna, New York agent of the Elgin National Watch Co., is visiting the Chicago office of the company.

F. E. Hyatt, Chicago manager of the Philadelphia Watch Case Co., attended the convention at Cincinnati, last week.

C. W. Monel, Legonier, Pa., has taken a position as traveler for Benj. Allen & Co., and will cover Texas and the southwest.

Sam Amberg has taken the Chicago representation of the Electrolytic Art Metal Co., Trenton, N. J. He formerly represented the C. D. Lyons Co.

T. Sengreen and wife, Seymour, Ia., were recent visitors in Chicago. Their son has just completed a course in engraving and returned home with them.

Hiram A. Jacobs, salesman for Morris, Mann & Reilly, has just completed a western trip and is spending a few days in Chicago prior to going on his Fall trip.

Wm. J. Digges, manager here for the Jewelers Board of Trade, together with his family, is taking his usual vacation in his home town in Maryland, near Port Tobacco.

The American Jeweler Publishing Co. has been incorporated with a capital stock of \$10,000. The incorporators are: B. R. Hazlitt, C. E. Walker and H. Randall.

T. S. Simpson, of the Chicago office of the E. Howard Clock Co., recently sold for

the Catholic Church at Mendon, Mich., a four illuminated dial tower clock, hour striking, with 1,000-pound bell.

Capron Giddings, of S. B. Giddings & Sons, Sterling, Ill., is confined here at the Mercy Hospital, where he underwent an operation last week. It will be about two weeks before he can return home.

Henry Paulson & Co. have secured the services of two new salesmen for west and south territory, O. L. Tribble and F. B. Weaver. Jake Levine, salesman with this firm, is taking a vacation at Galveston, Tex.

Otto S. Liebermann, with the Stein & Ellbogen Co., has just returned from a two weeks' sailing trip at Elkhart Lake, Mich. H. M. Kohn, with the same company, is taking a vacation at Ottawa Beach. A. Sanche, of the firm, is at Whitehall, Mich., with his family, for an outing.

C. G. Sydow, Rockford, Ill., was in the city, last week, buying a new stock of goods and fixtures. He suffered a complete loss by fire on the night of Aug. 2, with exception of the articles in his safes, one of which even was partly damaged. His loss will be between \$4,000 and \$5,000, and he was not insured. He immediately secured a new location, and will commence business on the arrival of his stock, which he will insure this time.

The papers in this State are again giving prominence to the failure of the Harvell Jewelry Co., having stores in Litchfield and other towns, and which was recently noted in THE CIRCULAR-WEEKLY. The schedules in bankruptcy, which were recently signed, show liabilities of \$104,640, and the assets are \$47,758, consisting of merchandise, \$36,993; tools, machinery, etc., \$5,000; accounts payable, \$5,764. The trustee is John Ball, Farmersville.

The following out-of-town jewelers were among those in this city during the past week: R. Weitlich, Sturgeon Bay, Wis.; M. Egge, Grand Island, Nebr.; John A. Jones and family, Columbus, Wis.; J. B. Ferguson, Princeville, Ill.; J. S. Schrueder, Coopersville, Mich.; H. S. Record, Cambridge, Ill.; J. H. Hudson, Fortville, Ind.; C. G. Sydow, Rockford, Ill.; Mrs. John Becks, Michigan City, Ind.; Mr. Steiner, of the St. Louis Clock & Silverware Co.; Jean Kiger, of C. A. Kiger Co., Kansas City, Mo.

The show window in the store of J. R. Chapman & Co., Oshkosh, Wis., was broken recently, when \$300 worth of diamonds were stolen.

### Milwaukee.

S. Newman, a well-known Chicago jewelry salesman, was a recent Milwaukee visitor. Mr. Newman believes that there is a general improvement in the jewelry business all over the country.

F. P. Beswick, Racine, Wis., has returned from his automobile trip through the Chain o' Lakes districts of Wisconsin and on his return trip stopped over in this city to call on his friends in the trade.

E. G. Longcroft, Berlin, Wis.; William F. Notbohm, Oconomowoc, Wis., and a member of the firm of Amidon Bros., Hartford, Wis., were among the retail jewelers who visited Milwaukee during the past week.

M. Kars, Racine, Wis., is erecting a new two-story business block of pressed brick construction, which will be completed by September. Mr. Kars will conduct a jewelry business in one-half of the building, and will rent the remainder of the space.

The original ordinance regulating the erection of street clocks was vetoed by Mayor Rose, and now Alderman Fass believes that it is only fair that an ordinance upon the matter should be separated from the one regulating signs, and should stand by itself inasmuch as a street clock is not a sign. While jewelers have gone ahead in the matter with the sanction of the city authorities and have erected their clocks they would like to see a law passed making definite the future of the timepieces.

Bert Davis, the colored man who is being held by the Milwaukee police for looting three jewelry stores on the night of July 11, has waived examination in the district court and has been bound over for trial before Judge Brazee. Davis was arrested by Detective Peck with a watch on his person belonging to Edwin F. Rohn, one of the three jewelers who had his window smashed and lost several watches. Davis claims that another negro gave him the timepiece. When shown a rogues' gallery photograph the other day Davis denied that it portrayed himself.

N. S. Nelson, Hutchinson, Minn., who had been quite ill, has recovered.

A town clock has been donated to the town of Williamsport, Md., by Burgess W. D. Byron. It will be placed on the tower to be erected on the new Knights of Pythias Hall.

# New Black Shield Staking Tool

*Consisting of*

**120 PUNCHES**

and

**30 STUMPS.**

*Representing*

**Supreme

## Los Angeles.

A. Glass, San Francisco, has been visiting in this city.

H. B. Crouch enjoyed a vacation at the beach, last week.

Work has been begun on the H. J. Whitley Co.'s new store.

H. M. Simons, with H. F. Wallace, now calls daily on the trade in Pasadena.

J. Pudlin, watchmaker, with F. Selkinghaus, is spending some time at Coronado.

E. W. Reynolds, of the E. W. Reynolds Co., has been enjoying a short but much-needed rest.

Clarence Coleman, of the H. J. Whitley Co., with his wife, is visiting for a couple of weeks in San Diego.

A. Protsch, Redondo, has recently been in this city buying a stock and a new plate glass show case for his store.

S. Simmons has been spending a week at his favorite sport, fishing at various points along the coast in this vicinity.

H. F. Brown, traveling representative of G. Moore & Lee, has just returned from a successful trip through northern California.

J. Kaplan, manager of the manufacturing department, and Ed Villamont, engraver, with J. Wiesenberger, are enjoying a short vacation.

J. M. Hartzberg, who has been in San Francisco for two weeks, has returned and is again behind the counter in J. Wiesenberger's store.

George Spaulding, salesman for William M. Kinney, is taking a two weeks' vacation hunting deer in the mountains about San Gabriel Canyon.

J. D. Wilchar, a manufacturing jeweler formerly with the Ernsting Co., San Diego, has taken a position with S. Nordlinger & Sons, in this city.

Leonard Woolz, who was in charge of the Simon Conrad Co.'s store, 205 S. Spring St., has returned to his old place with Luckenbach & Co.

John A. Ramage, who has been doing a jewelry business in Hollywood, has closed his place there and will open a store at 514 E. 5th St., this city.

Miss Bailey, who is engaged with her brother, S. B. Bailey, in the jewelry business, has returned from a stay of four weeks in the Yosemite Valley.

Montgomery Bros.' big sidewalk clock has been removed and set up at the new location at 4th St. and Broadway. Painters are completing their work on the outside of the store.

Mr. and Mrs. W. A. Lord, the former a jeweler at Goldfield, Nev., are spending several weeks at one of the prominent hotels in this city.

I. W. Birnbaum went to a resort in the mountains, but became ill while there and returned home. He has gone to the beach to complete his vacation.

Mrs. H. J. Whitley and Miss Grace Whitley have returned after an absence of more than a year abroad. They, with Mr. Whitley, are now at their summer cottage in Ocean Park.

Leonard Vett and wife, the Italians recently on trial charged with the theft of diamonds worth \$170, from J. Macowsky, and who were subsequently rearrested on warrants sworn out by Mr. Burger, man-

ager for T. B. Clark, on the charge of stealing a diamond from him, were examined Aug. 4 and held for trial.

The Los Angeles Gem Co., 420 S. Broadway, moved into its enlarged quarters, last week. Mr. Peck, president of the company, has returned from Arizona, where he went to look after the company's mines and engage additional help.

The store at 217 S. Spring St., formerly occupied by the Angelus Jewelry Co., J. Macowsky, proprietor, was closed, last week, so that M. A. Goldman, the new lessee of the premises, may take an inventory and prepare to reopen the place.

J. Macowsky was the victim of a shrewd thief just before he left for San Francisco. A young man entered his store and selected a diamond ring valued at \$700. He represented himself as the son of Maj. E. F. C. Klokke, a prominent wealthy citizen, and said he must let his mother see the ring before he could buy it. Mr. Macowsky consented to accompany him home to see his mother. They accordingly went in an automobile to Mr. Klokke's residence and entered the house. As Macowsky waited in the hall for Mrs. Klokke, the young man made his escape through a side or rear door, taking the ring with him. The next day, while searching for the thief, Mr. Macowsky encountered him on the street, caught him and had him taken to the police station. He did not have the ring, but is supposed to have pawned it, as \$160 in money was found on his person. He was charged with grand larceny.

## Indianapolis.

J. D. Day, with H. C. Schergens, is spending a few weeks in New York.

Among the visitors in this city, last week, was: C. Z. Rowe, Argos, president of the Indiana Retail Jewelers' Association.

J. P. Mullally, president of the Indianapolis Retail Jewelers' Association, has gone to West Baden, where he will spend several days, returning this week.

After a two weeks' automobile trip through southern Indiana, touring seven counties, C. S. Wallace, with the Baldwin-Miller Co., has returned to work.

Charles W. Lauer & Co. have taken an additional room on the ninth floor of the State Life building. The partition between the two rooms has been removed, making one large room.

I. Grohs, of the I. Grohs' Jewelry Co., State Life building, left, Saturday, for St. Louis, where he will remain several weeks to meet customers of the company from the west and southwest.

The State Board of Health, through Dr. J. N. Hurty, secretary, has just filed a mortality report for last year. In it it is stated that during 1907 about 23 Indiana jewelers and watchmakers died.

Indiana jewelers in this city, last week, were: M. I. Kirkman, Pendleton; E. M. Willhite, Danville; F. L. McKee, Cloverdale; J. F. Kiser, Muncie; C. R. Van Meter, Greenfield, and J. A. Miessen, Cicero.

Carpenters and decorators have taken charge of the rooms that are to be occupied by the Baldwin-Miller Co., in the State Life building, and when the necessary alterations are made the company will take pos-

session. The additional rooms will give the company the entire Washington St. side of the second floor and make it one of the largest wholesale jewelry concerns in the middle west. New fixtures are to be installed and the stock greatly enlarged.

J. P. Mullally, George S. Kern, E. M. Craft, H. H. Bishop, A. W. Gray, J. H. Reed, H. A. Winn and J. E. Reagan attended the annual convention of the National Retail Jewelers' Association, at Cincinnati, last week.

## Cincinnati.

W. W. Stark, general manager of the North American Watch Co., Mansfield, O., came too late to be registered at the convention.

The Miller Jewelry Co., by order of the King of the Ku-Kus, A. L. Thoma, Piqua, O., has gotten out a new improved Ku-Ku emblem.

John Alger, the seven-year-old son of Will Alger, who exhibited the North American Watch Case Co.'s line, gained considerable favor here among the jewelers at the convention while assisting in distributing souvenirs for his father and by taking great interest in convention affairs generally.

A. & J. Plaut's store, opposite the Sinton Hotel, where the convention was held, received many compliments on its exterior decorations. The stores generally throughout the city were in some way decorated in honor of the visiting jewelers. The booth in the Oskamp, Nolting Co. store received many visitors who were presented with cigars and a copy of Evans' Essays. The store throughout looked beautiful in its decorations of flowers.

The convention which has just ended is thought to have done Cincinnati a great deal of good, as far as the wholesale trade is concerned, as a great many people came here who were never here before and were pleasantly surprised by the interesting sights and pleasures offered. A great many jewelers will hereafter make it a point to visit Cincinnati in the future to do their purchasing. All left with a pleasant impression of the city and the entertainment afforded them while here.

## Toledo.

J. J. Freeman and wife have returned from a two weeks' vacation in Wisconsin.

L. Lazarus has opened a jewelry store on Adams St. in the room occupied by the Schoen Floral Co. He will devote his attention to the cheaper grades of jewelry.

Wholesale jewelers operating at this point are planning for a good holiday trade and are getting ready for a strenuous campaign. Some will put on an extra traveling salesman.

C. K. Merrill, of the Merrill-Brower Co., has returned from a two weeks' trip through the east. W. F. Broer, of the same firm, has just returned from an automobile trip to Buffalo.

A. J. Heesen is slowly recovering from a severe illness and operation at the Toledo hospital. For some days fears were entertained as to his recovery, but at present he is said to be out of danger.

**LEONARD KROWER**, Wholesale Manufacturing Jeweler and Optician  
536-538 Canal Street, NEW ORLEANS, LA.

## San Francisco.

### TRADE CONDITIONS.

Immense crops of fruits are now being harvested, labor is well employed and farmers are receiving a good price for their produce. This prosperous condition is bound to make its effect felt on lines of business that have been more directly disturbed by the recent financial flurry, and jewelers expect to be benefited along with other branches of trade, and are making preparations for a good Fall and Winter business. Wholesalers feel no concern over the fact that the local business is still a little quiet, as such is usual at this season of the year. They do not expect retailers to commence laying in any very extensive stocks of holiday goods until rather late in the Fall. As almost all of the retail stores are located in temporary buildings, upon which there is a very high insurance rate, there is more of an inclination than ever to defer the purchasing of advance stocks until the latest possible moment.

George Greensweig & Co. contemplate moving into the Jewelers' building within a short time.

The Gorham Co. has established temporary salesrooms and offices across the Bay, in Oakland.

Mr. Capo, of the Capo-Hohusen Jewelry Co., Tucson, Ariz., was in San Francisco on business last week.

C. W. Wickersham, Bakersfield, Cal., passed through San Francisco recently, on his way to the north for a vacation.

W. S. Fulton has completed a summer home in Marin County, across the Bay, and has now joined the ranks of the commuters.

Radke & Co. still have a large force of men at work enlarging their crystal rooms and thoroughly overhauling the store in anticipation of the coming holiday trade.

Work is progressing very rapidly on the Emporium building and the management announce that the removal will positively take place during the month of October.

The stock of jewelry formerly belonging to Connelly & Senseney, Reno, Nev., is now offered for sale to private bidders by the San Francisco Jewelers' Board of Trade, whose office is in the Monadnock building.

The Keystone Jewelry Co., now located at 739-741 Van Ness Ave., has secured a location in the Phelan building, now in the course of construction on Market St. at the corner of O'Farrell St., and expects to be able to remove about Sept. 1.

Alexander, the jeweler, has secured a location for a downtown store at 932 Market St., and will be there for the winter trade. A portion of the store at Van Ness Ave. and Pine St., will be retained until after the commencement of the coming year.

Ed. Bastheim, of the Alphonse Judis Co., gained considerable notoriety while in Seattle recently, on a business trip for his firm. He discovered burglars at work on one of the safe deposit vaults there and turned in an alarm while they were in the midst of their work. But little of value was secured.

The present week in San Francisco is a very busy one among a number of the largest wholesalers in the jewelry line on account of their removal into new and permanent quarters. Immediately after the fire of 1906 several of these firms secured options and quarters in the Kamm building, on Market St., near 3rd St., and since that time this building has been known as jewelers'

headquarters. However, there was no general inclination to establish permanent offices there and many firms signed but a two years' lease. The leases signed by three of the largest firms located there have now expired, and they have moved to the new Jewelers' building on Post St., near Kearny St. This building is a beautiful seven-story structure, located in a convenient part of town and has been fitted especially for this class of trade. The firms that moved from the Kamm building last week are: A. I. Hall & Son, who are located on the sixth floor of the new building; Morgan & Allen, who occupy a large portion of the fifth floor; and Nordman Bros. Co., who are on the fourth floor. Among the other firms that are preparing to move to permanent quarters here are: H. C. Van Ness & Co., J. S. Dinkelspiel, Rothschild & Hadenfeldt and M. L. Levy & Co. The factory of Rothschild & Hadenfeldt will remain in Oakland for the present at least.

## Detroit.

J. O. Varley, with R. J. F. Roehm & Co., has gone to New York, after a vacation at Whitmore lake.

L. J. Liesemer recently took an auto trip to West Branch, in the northern part of the State.

W. C. Noack returned to the city on Monday, of last week, after an extended vacation.

Among the jewelers who visited the local trade, last week, were: N. J. Eddy, Portland; L. A. Stehle, Linden, and W. F. Blashill, Oxford.

G. Wm. Stolz, Saginaw, stopped over to visit the wholesale houses on his return from the Cincinnati convention, last week.

A. E. Patterson, of Burr, Patterson & Co., has returned to the city, after a vacation.

It became known Friday that Carl Langbein and Miss Myrtle Hiddinger went to Tipton on a motorcycle July 24, and were married. Mr. Langbein is employed by Charles W. Lauer & Co., wholesale jewelers, while Miss Hiddinger had been in the employ of J. P. Mullally, a local retail jeweler, for some time. Mr. and Mrs. Langbein are receiving the felicitations of numerous friends in the jewelry trade.

Detroit wholesalers are entertaining their customers this week and the plans, which have been maturing since winter, contemplate a full six days of entertainment. The Detroit Jewelers Board of Trade has taken a prominent part in the affair and invitations have been sent to all the retailers within a radius of 200 miles to come to Detroit on the one-fare basis. Tuesday evening's programme was made the most elaborate of the week, a river parade with several hundred crafts in line and a fine display of fireworks being the principal attractions. Retail jewelers are distinguished during the week by wearing a knot of gold ribbon in the button hole. This summer fête will be made an annual affair, the idea being to attract visitors to the city at its best season.

A. Cohen, Allentown, Pa., will carry on the business formerly conducted by A. & B. Cohen.

## Kansas City.

D. H. Abney has been on the sick list for a week.

Charles Mull has purchased the business of Mr. Day, at Lawton, Okla.

E. P. Nevin, of Nevin Bros., spent Sunday in McAllister Springs, visiting his mother.

The new prospectus of the Kansas City Horological and Optical School will be ready Aug. 15.

The Hassig & Krieke Jewelry Co. is remodeling and enlarging its quarters in anticipation of increased business.

John Switlik, an employe of the Hassig & Krieke Jewelry Co., was recently married to Miss Mary Smith, of this city.

Forrest Wells, Neodesha, Kans., and W. H. Grace, Everton, Mo., have been enrolled as students at the Kansas City Horological and Optical School.

Earl C. Young, Burden, Kans.; C. H. Fisher, Medford, Okla., and G. Rothfelder, Axtell, Kans., have been enrolled as new students at the Kansas City Polytechnic Institute.

The following out-of-town jewelers were in this city during the past week: J. O. Stott and wife, Paola, Kans.; C. A. Clement, Springfield, Mo.; C. W. Morrison, Olathe, Kans.

The father of W. E. Crellin, of Ward & Crellin, died at his home in Chillicothe, Mo., Sunday, Aug. 2. Mr. Crellin was 90 years of age and was an old and respected citizen of Chillicothe.

Dr. W. P. Needles, who has charge of the optical department of the Kansas City Horological and Optical School, has been laid up for a week with ptomaine poisoning, as the result of eating fish.

Morris Silverman, who has been in business on E. 12th St., near 5th St., is out of business for the present. The building recently occupied by him and others is being remodeled and he is seeking a new location.

## Minneapolis and St. Paul.

Wm. M. Stone and wife, Minneapolis, have been spending a vacation at Annandale, Minn.

Mr. and Mrs. M. A. Bratrud, Crookston, Minn., were in Minneapolis, last week, en route for home, after spending three months in Europe.

James Falk, a jeweler and pawnbroker on Washington Ave., Minneapolis, was fined \$25 for failure to report to the police an article which he received. It proved that the article had been stolen, and the delay in tracing it resulted in the thief's escape.

Out-of-town jewelers in the Twin Cities recently, not elsewhere mentioned, were: A. J. Rost, St. Peter, Minn.; Wm. Krohn, Annandale, Minn.; A. M. Harper, Renville, Minn.; Mr. Mo, of Gehres & Mo, Sleepy Eye, Minn., and L. H. Bruns, Anoka, Minn.

A. H. Heyes, formerly with Kohler & Hinrichs, St. Paul, has taken a position with B. F. Simpson & Co., for whom he will travel in Minnesota, North Dakota and Montana. Frederick G. Simpson, of this house, returned from his first trip in southern Minnesota, and started out again last week.

**St. Louis**

E. J. Baumann and his family, Ste. Genevieve, Mo., have been visiting here during the past week.

M. Burnstine, of Burnstine, Caster & Co., and his family are spending their vacation in Okawville, Ill.

F. J. McKenna, vice-president of the Bauman-Massa Jewelry Co., went to Illinois for several days last week.

D. P. Richards, of the Masehmeyer-Richards Silver Co., is back after a three weeks' trip through the north and west.

Max Weiss, of Weiss & Fassett, has left for a visit to his old home in Budapest, Hungary. He will be away several months. His family accompanied him.

R. F. Reeves, president of the Reeves-Kemper Co., has returned from a 10 days' fishing trip to Black River, Mo. The trip is an annual event with Mr. Reeves.

O. F. Kay, of the J. Bolland Jewelry Co., and his wife have gone to Atlantic City, N. J., for several weeks. Julius Steidemann, of J. W. Cary & Co., is also at Atlantic City.

H. W. Kellersman, cashier of the Eisenstadt Mfg. Co., will leave, next week, for Macatawa Park, Mich., where he will spend his vacation with his wife. Mrs. Kellersman has been in Michigan for a week.

R. Niehaus and John Menges, buyers for the Mermod, Jaccard & King Jewelry Co., who went to New York several weeks ago in company with Goodman King, president, have returned. Mr. King continued on to Europe.

E. Maritz, head of the firm of the E. Maritz Jewelry Mfg. Co., is confined to his home on account of sickness. During his absence the business is being looked after by Samuel Kober, secretary of the company.

Among those of the Mermod, Jaccard & King Jewelry Co. who went on vacations last week were: Linn Paine, who goes to Cleveland; W. B. Lauman, who will go to Niagara Falls; E. L. Dorn, who will spend a week at Walloon Lake, Mich.; Robert Elliott and Charles Stevens. Louis Kuhn, of the clock department, has returned from his vacation.

William Henekler, one of the oldest jewelers in the city, had his wrist badly cut, last week, by falling glass in the show window of his shop at 2237 Chouteau Ave. He was arranging a display when the glass fell. This is the second misfortune in the Henekler household in the last year, his wife having been paralyzed eight months ago. Mrs. Henekler is gradually improving.

The delegates from the Missouri Society of Retail Jewelers left, last week, to attend the convention of the American National Retail Jewelers' Association in Cincinnati. The delegates are: C. E. Zerweck, St. Louis; Arnold Zerweck, East St. Louis; Charles Mauch, Marshall, Mo.; Claud Wheeler, Columbia, Mo.; Fred Tieman, California, Mo., and R. M. Walker, Monroe City, Mo. The delegates were accompanied by several out-of-town jewelers, and spent two days in this city en route to the convention city. They will be gone a week.

Among the out-of-town jewelers in this city during the past week were: E. Milton, Magnolia, Ark.; C. E. Willis and A. L. Alpciser, Edwardsville, Ill.; C. L. Glines,

Harrison, Ark.; George Killiam, Pittsburg, Kans.; Charles Mosby, Batesville, Ark.; Harry Oransky, Duluth, Minn.; W. J. Krug, Staunton, Ill.; W. H. Wheeler, Palmyra, Ill.; W. E. Wuesteman, Champaign, Ill.; Albert Pfeifferm, Little Rock, Ark.; W. C. Pfaeffle, Enid, Okla.; Joe Mazer, McAlester, Okla.; M. Miesch, Jr., Muskogee, Okla.; Claud Wheeler, Columbia, Mo.

**Omaha.**

John Fleekenstein, Sioux City, Ia., was in this city last week.

C. B. Brown and wife have returned from an extensive eastern trip.

Sol. Bergman is taking his annual trip to the Black Hills, S. Dak.

D. F. Meleher, with Albert Edholm, is spending his vacation at Clear Lake, Ia.

Oscar Homan, of the C. B. Brown Co., has gone to Des Moines, Ia., for two weeks.

Albin Wikstrom, with J. L. Jacobson, has gone to the lakes of Minnesota for two weeks.

H. S. Knapp, representing the Shook Mfg. Co., left, last week, for Oklahoma and Texas.

C. H. Patch, with the Sol. Bergman Jewelry Co., is making a business trip through the State.

Henry Copley and family have returned from a four weeks' sojourn at Vancouver, Seattle and Puget Sound.

Fred Brodegaard & Co. supplied the lodge pins for the Deutsche Landwehr Verein at Bennington, Nebr.

F. Hansen, with Fred Brodegaard & Co., has returned from a visit to St. Paul, Minn. Harry Holmes is at Sheridan, Wyo.

Chas. H. Larson and wife, Greeley, Nebr., were in Omaha for a few days while on their wedding trip last week.

Max Carleton, Chicago, has just purchased, through the heirs, the jewelry stock of the late Adolph B. Huberman for \$12,000.

The following out-of-town jewelers were in this city, last week, replenishing their stocks: B. S. Wells, Merna, Nebr.; A. Zimmern, Nebraska City, Nebr.; M. O. Reynolds, Culbertson, Nebr.; John Hiber, Hastings, Nebr.; A. Urbahns, Minden, Ia., and E. W. Konkle, Defiance, Ia.

The news of the selection of Omaha as the place for the holding of the convention of the National Association of Retail Jewelers in 1909 was received with considerable pleasure by the members of the local jewelry trade, and the delegates from the Nebraska State organization of retail jewelers, which is associated with the national organization, will be the recipients of an ovation upon their return. Next year will be the first time that the national convention of jewelers has ever been held in a western city. Fully 80 per cent. of the jewelers of Omaha belong to the State organization, of which there are nearly 200 members.

Friends in the trade of George E. Meyer, who was at one time engaged in the jewelry business in Frederick, Md., were deeply grieved to hear that he had died at the Frederick City Hospital, July 31. The immediate cause of his death was paralysis of the throat. The deceased was a native of Germany, and was 65 years old, and is survived by a widow, a son and three daughters.

**Canada Notes.**

C. E. Slater, Vermillion, Alberta, has assigned to H. V. Fieldhouse.

Frank Northcote, of Northcote Bros., Toronto, Ont., returned, last week, from an extended trip through western Canada.

The style of the firm of M. Bilsky & Son, jewelers and watchmakers, Ottawa, has been changed to M. Bilsky & Son, Ltd.

Harry Ryrie, of Ryrie Bros., Ltd., Toronto, Ont., left, Aug. 5, accompanied by Mrs. Ryrie, for a fortnight's canoe trip up the Saguenay river.

Harris Michalson, president of I. L. Michalson & Sons, Ltd., diamond and precious stone merchants, Montreal, will sail, Aug. 18, from New York to Europe on the *Kaiser William II*. He will visit London, Paris and Amsterdam.

The marriage of Chester McDermott, of the advertising department of Ryrie Bros., Toronto, Ont., to Miss Fader, of Vancouver, B. C., took place in Toronto, Wednesday. They are spending the honeymoon in Atlantic City, N. J.

Out-of-town jewelers calling on the Toronto, Ont., trade, last week, included W. A. Fenwick, Shelburne; P. G. A. Webster, Durham; T. Fox, London; H. Odell, Orono; E. W. Ross, North Bay, and J. S. Smith, St. Catharines, all Ontario.

Though no definite particulars have been received, it is presumed that among the sufferers by the great fire which practically destroyed the entire mining town of Fernie, B. C., on Saturday, Aug. 1, were the two jewelers, A. C. Liphardt and C. C. Wright.

The death by drowning of Percy J. Wall, assistant department manager of Ryrie Bros., Ltd., Toronto, Ont., occurred on the afternoon of Saturday. Mr. Wall, with two companions, was out in a canoe on Lake Ontario. The canoe was laden with a quantity of baggage, as the party intended to camp at Port Credit, and, the water being rough, the craft overturned. Mr. Wall sank suddenly, being struck on the head by the canoe when trying to get hold of it. The others were rescued with difficulty. The deceased was 22 years of age, and his home was at Brantford, Ont., where he was for some time in the jewelry establishment of Alex. Moffatt. He had been with Ryrie Bros. for about one year.

During the past few days the Montreal detectives have arrested a gang of criminals who have been committing many burglaries for some months past. Sam Rosenzweig and his wife Sarah, the last to be captured, were partners of Abraham Feldman and Morris Silver, and came to Montreal from New York, last March. Numerous burglaries have been brought home to them through goods found in their possession, and those seized from the Singers, who were arrested on the charge of receiving stolen goods. Peter Singer and his wife kept a second-hand store on Craig St., Montreal. When they were arrested a patrol load of their stock was taken to police headquarters, consisting of all kinds of silverware, jewelry, cutlery, watches and many other articles supposed to be stolen. Already many of these have been identified by their owners. Rosenzweig is described by the detectives as a porch climber, and Feldman as a false key manipulator.

## Providence.

### TRADE CONDITIONS.

Manufacturing jewelers report a more hopeful condition the past 10 days than any time in several months. Many of the shops which have been closed for the annual vacations and clean-ups are resuming and in general conditions are much brighter. Orders are beginning to come in, small in size but encouraging in the aggregate, and there is more activity manifested generally in the jewelry district. Collections, which have been slow for some time, are said to be showing a slight improvement. Many of the salesmen have started and others are preparing to follow in a few days. Most of the business so far reported is from the far west, New York market having displayed but little signs of recovery.

George N. Steere left, last week, on a western trip for his firm.

Mr. and Mrs. H. C. Lindol have gone to the White Mountains for a vacation.

Nelson S. Davis, of this city, is registered at Greene's Inn, at Narragansett Pier.

Benjamin J. Lewis has started on an extended western trip for the S. B. Champlin Co.

Mr. and Mrs. Harry Mays have returned from an automobile trip through Massachusetts.

Henry A. Kirby's factory, 85 Sprague St., resumed business Monday after a short shut-down.

Thomas W. Lind and wife have sold real estate on Bucklin St. to Frank E. Sweet and wife.

A trade-mark on certain lines of jewelry manufactured by it, has been granted to the Wolcott Mfg. Co., of this city.

The A. C. Chain Co. is now comfortably located at 38 Friendship St., having recently removed from 35 Garnet St.

Frank Esser has returned to his Summer cottage at Narragansett Terrace, after a two weeks' vacation trip to Nantucket.

J. Parker Ford, of Ford & Carpenter, of this city, is calling on the firm's western trade with a seasonable line of novelties.

William Lamb, representing the George H. Fuller & Son Co., Pawtucket, is calling on the trade on the Pacific coast for his firm.

J. A. Limbach, Chicago representative of the T. W. Foster & Bro. Co., of this city, has started on a trip through the north-west.

Herbert S. Tanner and wife have returned from their vacation in Proctorsville, Vt., and later will go to Provincetown, Mass.

The shop recently vacated by the Potter Machine Chain Co. at 95 Pine St., is now occupied by P. A. Willemin, die cutter and designer.

Mr. and Mrs. William H. Manchester have returned from an automobile trip through Massachusetts, New Hampshire and Maine.

The Standard Enamel Co., which was burned out at 234 Chestnut St. about two months ago, is fitting up new quarters at 107 Friendship St.

W. Louis Frost spends much of his spare time on his crack yacht *Medric*, one of the fastest of his class on Narragansett Bay and is winner of several races.

John S. Palmer, 2d, has been elected a director of the Equitable Fire & Marine Insurance Co., of this city to fill the unexpired term of John S. Palmer, deceased.

Clarence J. Roehr, who has been visiting the factory of the Bassett Jewelry Co., this city, has returned to Chicago, where he has charge of the firm's western headquarters.

William R. Dutemple and family, who are spending the Summer at their cottage at Shawomet Beach, have been taking an automobile trip through southeastern New England.

W. A. Schofield, of Scholfield, Battey & Co., accompanied by his wife and F. N. Young, of Young Bros., and wife, are enjoying an automobile trip through the Berkshire hills, in Massachusetts.

Edward Little, manager of the Gorham Co.'s downtown store in New York, was one of the visitors at the plant of the company in this city the past week.

Harry Cutler, president of the New England Manufacturing Jewelers & Silversmiths' Association, was a guest at the outing of the "C.H.U.M.P.S." at Palace Garden last Saturday.

Rudolph G. Grode, formerly manufacturer of jewelers' findings at 234 Chestnut St., under the style of R. G. Grode & Co., has resumed business at 107 Friendship St.

The regular monthly meeting of the Manufacturing Jewelers' Board of Trade will be held in the association's rooms in the Wilcox building on Aug. 21, at 2:30 P. M.

Ernest K. Widergren, with the Ostby & Barton Co., died last Thursday in the 39th year of his age. The members of the Ostby & Barton Employees' Mutual Relief Association attended the funeral in large numbers.

Frank D. White will hereafter represent D. M. Watkins & Co., of this city, on the road. He was traveling salesman for A. Bushee & Co., of Attleboro, and later for three years was with Esser & Co., of this city.

Several jewelry salesmen were among the large party that enjoyed the 13th annual outing of Providence Council, No. 67, United Commercial Travelers of America, held at Crescent Park, on Narragansett Bay, last Saturday.

Among the members of the Knights of Pythias who participated in the parades and other events incidental to the annual convention of the Supreme Lodge of that order at Boston last week, were a number of prominent jewelers of this city.

Andrew S. Dickson, Jr., who has been connected with the New York office of the Jewelers Board of Trade as traveling reporter, has been assigned to the Providence branch as investigator, under the direction of Franklin N. Wood, who has succeeded to the position of local manager.

The George W. Dover Co. has leased the entire second floor of the Herrick building, on Garnet St., for a term of years, to which it will remove the offices and stock and shipping rooms about Sept. 1. This will give the concern an additional space of nearly three times that occupied by the same departments at present.

The following jewelry buyers have been looking at the lines of local manufacturers recently: S. Hudis, of the Rosenbaum Department Store, Pittsburg, Pa.; A. L. Stone, of Stone Bros., Chicago; Oscar Kind and Louis Block, of S. Kind & Sons, Philadelphia; W. A. Kaufman, of the R.

W. K. Co., Chicago, and W. M. Kahn, of Kahn Bros., Chicago.

Sporting events of various kinds with a Rhode Island clambake to top off the day made the annual outing of the employes of the American Enamel Works at Emery Park, on Saturday, a marked success. About 75 employes of the concern went to the park and every minute of the day was enjoyed.

Thomas S. Jackson & Co. is the style of a new firm at 116 Chestnut St., where it will manufacture a line of silver novelties and ladies' plated gold jewelry. The head of the firm, Thomas S. Jackson, was formerly a member of the firm of William A. Reed Co., which occupied the shop, but was sold out at mortgagee's sale, the property being bought by Mr. Jackson.

John Nelson, the N. Main St. retailer, was before the Sixth District Court the past week, charged with receiving stolen goods, and pleading not guilty, was held for trial Aug. 14. The police allege that he purchased a lot of plated chain links, valued at \$10.60, one lot of gold-plated buckle rings, valued at \$5.60; a lot of fob chains and buckles, valued at \$2.40, and one lot of gold-plated scraps, valued at \$2.70, the whole being the property of Fonteau & Cook Co.

An equestrian statue of Gen. Philip H. Sheridan is being cast this week at the foundry of the Gorham Co. at the plant in this city, which experts declare will take its place immediately as one of the finest pieces of equestrian sculpture in the country. It is to be erected in Sheridan Circle on Massachusetts Ave., Washington, D. C., and is being constructed under the direction of the Congressional Commission, an appropriation of \$50,000 having been made for this work. The statue is to be of bronze and of heroic proportions. The designer was G. Borglum, New York. The statue is to be 14 feet high and will stand on a plinth of granite.

## Rochester.

The Bastian Bros. Co. had a prominent exhibit at the recent convention of the American National Retail Jewelers' Association, held in Cincinnati, the exhibit being in charge of A. J. Swezy and Frank Fernald.

Supreme Court Justice Sawyer has opened a default in the suit of Chas. T. Thatcher against the International Time Recording Co., of New York, in which a judgment for \$1,157 was recently obtained for want of a defense.

Chas. F. Damm recently swore out a warrant for the arrest of Robert Mytlen, a salesman, who was brought here from Syracuse, Wednesday morning, charged with grand larceny in the second degree. Damm claimed that the man had been formerly employed as a salesman and collector, and that when he left him several months ago, he failed to account for a gold watch worth \$65, and other articles.

Mr. Swanson has succeeded Lundberg & Swanson in the jewelry business at Polk, Nebr.

The firm of Kirkpatrick Bros., Clarion, Ia., has dissolved. Hereafter the business will be carried on by L. L. Kirkpatrick.

## Connecticut.

The E. H. H. Smith Silver Co., Bridgeport, resumed work on full time, Monday of last week.

The annual outing of the foremen of the Bradley & Hubbard Mfg. Co., Meriden, was held Saturday, in Saybrook. The party returned to Meriden by way of New Haven.

Mayor George M. Landers, New Britain, Thursday of last week, left on the *Baltic*, of the White Star line, for Europe. He will make a tour of the British Isles and will return early in September.

Adolph Maschmeyer, 62 years of age, and for many years employed as an engraver by the Meriden Britannia Co., Meriden, died at that place about a week ago. The deceased had resided in Meriden since 1865.

The Seth Thomas Clock Co., Thomaston, has been awarded the contract by the Treasury Department in Washington, D. C., to furnish office clocks for public buildings during the fiscal year which began July 1.

John M. Murden, formerly employed by the Waterbury Clock Co., Waterbury, was found dead in Hitchcock's Pond, near Waterbury, Wednesday. Mr. Murden was 58 years of age and lived in Waterbury for many years.

Mark T. Rounds, formerly employed at R. Wallace & Sons Mfg. Co.'s factory, Wallingford, was arrested in New Bedford, Mass., about a week ago, on a charge of counterfeiting. Rounds was an expert mould maker.

The will of the late Wm. T. Steven, Hartford, was admitted to probate, Wednesday. All the furniture and stock passed to the widow, who is executrix. One-third of the remainder of the estate goes to Agnes C. Steven, the rest being equally divided among the children.

Thomas Hoyle, for some time in the employ of R. Wallace & Sons Mfg. Co., Wallingford, died at the home of his daughter in Stamford, recently, of tuberculosis. The deceased was a member of the Wallingford Council, N. E. O. P., and of the George Stephenson Lodge, Sons of St. George.

The large safe belonging to H. S. Townsend, Winsted, whose store was recently destroyed by fire, was dug out of the debris Monday of last week, but was so hot that no attempt could be made to open it. It is expected that some of the stock will be found undamaged. Mr. Townsend's loss is partially covered by insurance.

August Bassart, maker of the silver plate on which the first successful daguerreotype was taken, died recently at his home in St. Louis, Mo., aged 89 years. The deceased was for many years a resident of Waterbury, and later of Naugatuck. At an early age Mr. Bassart began work in the silver factory of a well-known silversmith in Paris.

The Steele & Johnson Co., Waterbury, has awarded the contract for the construction of a four-story building to supplant the two-story wooden structure on S. Main St. The concern was organized in 1852 and continued business until 1856, when it was sold to the Waterbury Jewelry Co., which went into liquidation a year afterward. The new organization came into existence in 1858, and was known as the Steele & Johnson Button Co. until 1875, when the present firm style was adopted.

Two packages of gold plate worth about

\$500 were returned to the John M. Ney Co., Hartford, Wednesday, after having been lost for several months. They were shipped from the local gold refinery last April, one going to Kansas and the other to Texas. The train which carried the gold was boarded by bandits a short distance from Pittsburg, April 30, and the packages were stolen. They were subsequently found in the woods not far from the scene of the robbery. The robbers have not been caught.

## Attleboro.

George H. Herrick is at Narragansett Bay.

C. D. Lyons was in New York last week on business.

Thomas H. Moore, of Moore Bros., left Sunday on a western trip.

Louis E. Sadler, of F. H. Sadler & Co., sojourned, last week, at Yarmouth.

Thomas G. Sadler has been enjoying a vacation with his family in Maine the past 10 days.

Charles P. Keeler was in Canada last week on a trip in which he combined business and pleasure.

Louis B. Jones left, Wednesday, for the west in the interests of C. A. Marsh Co. W. E. Harward left last week on a western trip with the samples of the Fontneau & Cook Co.

Contrary to expectations there were no definite developments the past week in the movement to erect a factory for Rothschild Bros. Co. and the Klingtite Comb Co., Worcester.

Charles L. Barrows left last Wednesday for Philadelphia, where he is attending the national convention of opticians. He has a display booth of the goods manufactured by the Bay State Optical Co. Mr. Barrows will be assisted by Stephen J. Clulee.

The C. D. Lyons Jewelry Mfg. Co. has definitely determined to move its plant from Attleboro to Mansfield. Ever since the concern received notice that it must vacate its place in the old Steam Power building a removal to Mansfield, where both members of the concern are prominent citizens, has been anticipated. Last week the factory building of the Mansfield Braiding Co. was purchased at public auction by William Graves, the mortgagee, who will transfer it to the Lyons Co. Repairs that will cost several thousand dollars have begun which will make the building available for a jewelry shop.

## North Attleboro.

George Angell has left on a trip in the interests of the George L. Paine Co.

H. H. Pierce, western salesman for the T. I. Smith Co., was at Oak Bluffs last week.

Howard R. Grant, western representative for Riley & French, is enjoying a vacation at Nantucket.

Percy Clap, New York representative of the Daggett & Clap Co., has been enjoying a stay in the White Mountains.

The employes of Irons & Russell, of Providence, enjoyed an outing at Lake Pearl, Wrentham, last Thursday. A very enjoyable day was passed.

An attempted burglary at the residence of Thomas G. Frothingham was frustrated

last Friday. The place was closed but neighbors sighted the strangers and notified the police. The men had disappeared by the time the police reached the scene.

All of the concerns with the exception of those located in the Riley & French building resumed operations on Monday. Riley & French, the W. & S. Blackinton Co., G. C. Hudson & Co., and C. Ray Randall & Co. were scheduled to go back today.

L. C. Young Co. has been incorporated under the laws of Massachusetts. The capitalization figure is set at \$25,000. The firm was started several months ago on the ground floor of the Bacon building, Plainville. A line of brooches, scarf pins and buckles will be manufactured as well as other articles of jewelry.

Contractors are now figuring on the three-story addition which will be built onto the Totten building. The dimensions are 90 feet long and 40 feet wide. The George L. Paine Co. will have the top floor and J. J. Sommer & Co. the second floor. The first floor is not rented as yet. The addition will give the Paine and Sommer concerns much more space.

## Boston.

Selig Jacobs has taken a position as salesman on the road for the newly incorporated Mendelssohn Co.

Buyers in town during the week included George E. Twambley, Biddeford, Me.; F. A. Towle, Peterboro; John A. Brightman, Southbridge.

A box of silverware consigned to D. C. Percival & Co. from Rogers & Bro. was stolen from an express wagon on the street while the big parade of the Knights of Pythias was in progress last Wednesday. The matter was reported to the police, who recovered the property and made arrests in connection with the theft.

Royal Robbins, treasurer of the Waltham Watch Co., who has been abroad for the past month, accompanied by his family, is on the return voyage from England. Ezra C. Fitch, president of the company, returned recently from his camp in Labrador. A. R. Harmon, of the London office of the company, is in this country for his annual vacation, and is stopping at Sacarappa, Me.

The new secretary of the New England Watchmakers' Club, succeeding William Coburn, who has resigned, is Perl D. Vaughn. The other officers under the proposed incorporation are the same as those of the old association, namely, Francis J. Whilton, president; William B. Garfield, vice-president; Leroy E. Nichols, treasurer. The directors are William B. Garfield, John S. Lowell, Fred L. Lovejoy, Joseph Emanuel, Charles S. Robb, Thomas F. Proctor, Henry L. Reynolds and Perl D. Vaughn.

A beautiful memorial window has just been added to the series of the Beatitudes in the Arlington St. Unitarian Church in this city. The design, by Frederick Wilson, has for its central figure an angel bearing gifts of fruits of the earth, typifying the text, "Blessed are the meek, for they shall inherit the earth." It is executed in Favre glass, in rich tones of purples, greens and golden opalescent tints, by the Tiffany Studios, of New York, and is a memorial to Rebecca Andrews Green.

UNITED STATES PATENTS.

ISSUE OF AUG 4, 1908.

**894,839. MATCH-BOX.** GUSTAVE F. KOHR, Mount Vernon, N Y., assignor to the Mauser Mfg. Co., New York, a Corporation of West Virginia. Filed May 18, 1907. Serial No. 374,513.

A pocket match-box comprising a body having its sides at one end rounded and the adjacent portion of the bottom curved to conform to and engaging said rounded ends, a cover having one end curved concentric to and movable over the rounded portion of the bottom, ears connected to said cover at its curved end and bearing over the rounded

ends of said body sides, the rounded portion of the cover having slidable engagement with the rounded portion of the bottom and adapted to limit the outward swing of the cover, and independent pivots extending through said ears and sides concentric to the curved portions of the body and cover and terminating at the inner side faces of the sides of the body, whereby the interior of the box is free of openings and projections.

**894,892. CIGAR-CASE.** JONAS LANGFELD, New York, assignor to Abraham M. Langfeld and Morris F. Langfeld, trading as Langfeld Bros. & Co., Philadelphia, Pa. Filed Dec. 14, 1907. Serial No. 406,420.

A pocket cigar-case permanently closed on the

bottom, combined with a humidifier arranged in the bottom thereof and upon which the ends of the cigars directly rest.

**895,019. COMBINED PENCIL HOLDER AND SHARPENER.** ELLWOOD E. HOPKINS, Philadelphia, Pa.; Cora E. Hopkins, executrix of said Ellwood E. Hopkins, deceased. Filed Feb. 5, 1908. Serial No. 414,342.

In a combined pencil holder and sharpener, the combination of a sleeve; a cutter formed of a split tube having a slotway and frictionally retained in said sleeve; and a projection on said sleeve enter-

ing the slotway of said split tube to prevent relative rotation of said tube and sleeve.

**895,078. BRACELET, BANGLE, RING, AND THE LIKE.** PHILIPP DOPPENSCHMITT, Pforzheim, Germany. Filed Aug. 3, 1907. Serial No. 386,913.

An ornament adapted to be worn comprising in combination a member in the form of a helix and a series of ornamental devices each independent of the others and provided with a single eye cor-

responding in diameter to that of said helical member in order that the said devices may individually appear at different parts of the circumference of the periphery of the bracelet.

**895,172. COMPENSATING CONTROLLER FOR TIMEPIECES.** FREDERIC ECAUBERT, New York. Filed Feb. 16, 1906. Serial No. 301,374. Renewed Dec. 27, 1907. Serial No. 408,266.

In an escapement regulator, a member having a low coefficient of expansion and provided with two resistant supports, a yielding member having a high coefficient of expansion interposed between the said two resistant supports in such a manner

that the said resistant supports will move only within the limit of movement of their own inherent expansion and contraction and whereby the resistance of the two supports will cause the yielding member by the latter's own expansion or contraction to move in a predetermined path to compensate for temperature-induced variations in size of the regulator.

**895,180. FINGER-RING-MARKING MACHINE.** HENRY HENRICH, New York, assignor to J. R. Wood & Sons, New York, a Corporation of New York. Filed Feb. 26, 1907. Serial No. 359,450.

In a ring-marking machine, the combination of a spindle having a die mounted thereon and extending part only of a circle, a ring-holder having

a ring-receiving groove, and a slide carrying said ring-holder, said slide being movable parallel to said spindle.

**895,188. LEAD-PENCIL SHARPENER.** AR-

THUR W. MUELLER, Cincinnati, O. Filed Nov. 13, 1907. Serial No. 401,954.

A pencil sharpener comprising a barrel, a re-

voluble pencil-clamp therefor, a knife-holder longitudinally movable in said barrel and limited in rotation with relation thereto, and a spring for urging said knife-holder toward said pencil-clamp, substantially as described.

**895,293. BUTTON.** JAKOB NIEOERER, Heiden-Bissau, Switzerland. Filed Jan. 31, 1908. Serial No. 413,543.

A button, comprising an outer head member embodying a disk provided on its inner face centrally thereof with a seat and having an returned peripheral flange forming an annular groove around the circumference of the inner face, a cushioning disk held in said groove and having a central opening registering with the seat in said outer head member, an inner button head, a shank projecting centrally therefrom and having a head on its outer

end, and a securing member for connecting the outer head to the said shank, said securing member comprising an apertured disk provided with incisions or cuts extending inwardly from the periphery of the disk in pairs, the outer ends of the outer cuts or incisions of each pair being in juxtaposition and one cut or incision of each pair extending in the opposite direction to the other cut or incision of the same pair, the portion of the disk bounded by each pair of cuts being bent inwardly and bowed to form spring arms, the free ends of which overlie the central opening in said disk and engage back of the head on said shank, and the outer faces of which engage the cushioned disk, the remaining peripheral portion of said disk being received in the groove in the outer head and holding the cushioning disk against the latter.

**895,322. NECKTIE-SECURING DEVICE.** DAVIS ZAIDEN, New York, assignor to Anna Zaiden, New York. Filed March 9, 1908. Serial No. 419,905.

In a device of the class described, a button having a shank of larger diameter in cross section one way than another and a head also of larger diameter in cross section one way than another; a plate adapted to be secured to a tie and through

which said button projects, said plate having means removably locking the plate to the button; and a back-plate carried by said first-mentioned plate and having a socket of similar shape to the button head, and within which socket the button-head rests in use.

DESIGN.

**39,436. PIN OR BUTTON HEAD.** CHARLES H. CLARK, Denver, Colo. Filed April 22, 1903.

Serial No. 428,697. Term of patent 3 1/2 years.

The ornamental design for a pin or button head, as shown.

**"HULL" is the  
"Sterling"  
Mark for  
Umbrellas**

Will It Not Pay You To Handle An  
Umbrella With These Qualifications?

**First**—It is the foremost and only practical detachable and interchangeable umbrella on the market.

**Second**—The interchangeable feature enables you to suit the customer with any sort of base that may be desired, thus avoiding the likelihood of having him select an umbrella handle which pleases him and then complain about the price or quality of base.

**Third**—"Hull" handles can be shown in an exceedingly small space, and the bases laid away in a drawer, to be fitted to the handles when the customer calls.

**Fourth**—The detachable handle permits you to lay in a superb order of umbrellas at a modest outlay without buying an equally large quantity of bases to be carried from one season to another.

**Fifth**—It is stronger than any other umbrella, either regular or detachable.

**Sixth**—It is the outcome of our best thought, the best workmanship, and the best material that money can buy.

These six qualifications should convince you that the "HULL" umbrella will not only sell readily and yield a good profit, but that you will never have to apologize for one sold over your counters.

Write to-day for samples and we will send them by prepaid express.

**Hull Brothers Umbrella Co.**

TOLEDO, OHIO

## UNITED STATES TRADE-MARKS.

[The following trade marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."]

## Revision is Planned for India's Patent System.

IN reviewing the operations of India's patent office for the past year, Consul-General William H. Michael states that an improved law is contemplated. He writes:

"The recent report of the Government on the patent office at Calcutta states that there were 615 applications made during 1907 for leave to file specifications, and that 508 specifications were actually filed. The total number of applications under the Inventions and Designs Act V of 1888 was 8,959 and of specifications 6,916. The range of inventions for which protection is sought is said to be as usual very wide, and as in previous years the railway and textile industries predominate.

"In regard to applications for the registration of designs there were 34, of which 25 were allowed and 5 refused, the remainder now pending or abandoned. Several applications relating to religious tokens or ornaments are said to have come from Delhi and Madras. The Madras trade appears to have been started by converting into jewelry French 5-franc gold pieces, and it is reputed to have grown considerably in consequence.

"The amendment of the Indian patents act so as to bring the system of protecting inventions and designs more into line with the practice in England is in hand and a draft bill is under preparation. The bill will shortly be ready for examination, and when the necessary sanction has been obtained it will be submitted for the criticism of the manufacturing public."

## Pacific Northwest

C. C. Payne is temporarily located in Ontario, Ore. He expects to find a suitable permanent location very soon.

Ed. Clark, Portland, Ore., a peddler of imitation diamonds, and for years one of the best known and most conspicuous characters in the North End, was arrested there, recently, for peddling without a license.

Hoquiam, Wash., is making an active bid for the watch factory that Fred B. Shriner is planning for that section of the country. The idea is to manufacture medium-priced timepieces especially for the Oriental trade.

Word comes from Chattanooga of the strange disappearance of E. B. Loving, a jeweler, of Blue Ridge, Ga. According to the despatch, Mr. Loving recently visited Charleston, Tenn., and registered at the Barrett House. After supper he announced his intention of taking a walk, and since that time has not been seen, though the following morning a hat believed to have been his was found on the river bank with a bullet hole in it, and an examination showed the inside covered with blood. Friends fear that the man was murdered and robbed and his body thrown into the river.

# THE HOROLOGICAL REVIEW

## How to Locate and Remedy Errors Found in the Lever Escapement

Paper read by C. T. Higginbotham, Consulting Superintendent of the South Bend Watch Co., before the Convention of the American National Retail Jewelers' Association, at Cincinnati, O.

WHEN we wind a watch we store up in the mainspring a certain amount of power. The amount is probably greater than is commonly supposed. For instance, in an 18-size watch the force exercised at

is convinced of its truth as we proceed. The loss of power from the impingement of the mainspring coils upon each other and upon the inside of the barrel occasions a serious loss; the more serious because it is greatest when power is most needed; that is, when the spring is nearly run down. The loss from the friction of the pivots in their bearings and the friction of the wheel teeth against the pinion leaves is another item, but by far the greatest loss occurs in the escapement. Of the amount of power delivered by the mainspring through the train to the escape wheel more than one-third is lost in transmission from that point to the balance. It is therefore of the utmost importance that the escapement be in as good order as is possible to secure to the end that this loss be reduced to the minimum.

The object of this address is to give simple directions by the use of which certain difficulties inherent in the escapement may be readily located and such remedies applied as will secure the best results from the particular escapement being treated, for be it understood that no amount of manipulation will make a perfect escapement of one that has not been correctly designed. I shall use for illustration the model which you see before you. (Fig. 1.) All of the essential parts of this model are adjustable in order that the necessary demonstration may be made. You will observe that one-half of the roller is constructed to illustrate the single roller action. The guard pin instead of being mounted directly in the fork as is usual is placed in a slide and faces toward the front, as does the impulse pin, thus affording a simultaneous view of both roller pin and guard pin actions.

The other half of the roller represents the double roller action, the guard piece or arrow being placed in a slide and the impulse roller cut away shows the action of both impulse pin and safety roller simultaneously. Attached to the roller is a pointer which overlaps an arc of a circle whose center is the roller. This circle is marked in degrees. Attached to the pallet is a similar pointer overlapping an arc whose center is at the pallet. Attached to the escape wheel is a third pointer overlapping an arc whose center is the escape.

These hands indicate correctly the arcs of impulse, lock, slide, drop and other angular functions of the escapement.

### METHOD OF PROCEDURE.

I should recommend as the first step a thorough examination, separately, of its different parts. Take out the balance, examine its pivots, see that they are round, examine the staff for truth, see that the roller edge is perfectly polished and free from rust or other defects, that the roller pin is upright and set firmly with its flat face square to the front, that it is free from chips or other

FIG. 1.

FIG. 2.

the pitch circle of the barrel is about one pound Troy weight when the spring is at its best; this is to say, when it has run one hour after being wound to the top. Of this force more than one-half is lost in conveyance to the balance, even under the most favorable conditions.

This statement may seem extravagant, but I feel confident that my hearers will be con-

imperfections in that part which is acted upon by the fork slot. The roller pin may be round with a flat face, triangular or oval, but if circular with unflattened face it should be changed for one of the former styles. Examine the fork and pallet, see that the slot has parallel sides, polished or smoothly finished, that the guard pin is perfectly upright and firmly set, that the stones

# Automatic 8-Day Long Alarm Clocks.

Requires winding but once a week. Does not need any attention at night. Automatically alarms each morning, ringing until you get up and stop it.

**MR. JEWELER,** we have been studying for years to perfect this up-to-date alarm idea and give the public what they have needed for a long time; we also wanted to increase your profits on alarm clocks. Here is your opportunity.

**MODERN**  
Fumed Oak. Height, 9 in. Dial, 4½ in.  
Sash and mat, antique brass finish.  
Time-Alarm, list.....\$5.00

Every jeweler should have the full assortment of patterns; you cannot appreciate these fine cases without seeing them.

## Movement

A superior 8-day pendulum movement, fitted with an ingenious 24-hour alarm dial so that clock can be set for A. M. or P. M., as desired.

The Alarm in Time-Alarm Clock will ring 50 minutes, and in Strike and Alarm Clocks for 25 minutes unless shut off.

**ADVANCE**  
Black adamantine finish, green marbled top and base mouldings, the best imitation of marble ever produced. Guaranteed not to crack, chip or peel. Gold plated feet and ornaments.  
Height, 11 in. Dial, 4½ in.  
Time-Alarm, list.....\$6.50  
Strike and Alarm, list..... 8.50

**VIGIL**  
Metal case of artistic design and workmanship. Height, 12½ in. Dial, 1½ in.  
**Fine Bronze Finish**  
Time-Alarm, list.....\$8.50  
Strike and Alarm, list..... 10.50  
**Rich Gold Finish**  
Burnished and lacquered.  
Time-Alarm, list.....\$10.50  
Strike and Alarm, list..... 12.50

**GRAND**  
Metal case and dial. Verde antique base. Gun metal top and hands. Gold dial, silver center and raised black numerals and minute dots.  
Height, 11 in. Dial, 7½ in.  
Time-Alarm, list.....\$7.50

**PROGRESS**  
Quartered Oak and Mahogany. Highly finished and polished.  
Height, 12½ in. Dial, 4½ in.  
Time-Alarm, list.....\$6.50  
Strike and Alarm, list..... 8.50

Place your order early and ask for electrotypes. Send for window cards and a package of illustrated circulars for distribution to the public.

If your jobber cannot serve you, please order direct. September 1 we will mail to the trade a large 16-page supplement, showing **MANY NEW STYLES** of clocks, *i. e.*, Novelties, 8 and 30-day Hanging, Cabinets, Art Metal Sets, Empires, Alarms, Adamantines, Figures, etc.

51 MAIDEN LANE  
NEW YORK

**SETH THOMAS CLOCK COMPANY**

70 WABASH AVE.  
CHICAGO

ESTABLISHED 1813

Makers of Superior timepieces of all kinds, sizes and prices, from a Ladies' O size Watch to 40-foot dial Tower Clock, largest in the World.

are securely set, properly polished, the acting corners rounded, no chips or roughness in any acting part of the stone and all other essential parts as near perfect as possible.

Examine the escape wheel, see that the corners of the teeth are not marred or burred, that the action parts are free from imperfections and that it runs true in the flat. Should it be out of round it will be more readily detected while examining its action on the pallet. In replacing the several parts see that the side shake of the pivots in their bearings is not excessive. This is particularly necessary in the pallet for the reason that any undue side shake of those pivots in their bearings entail a loss of power of a serious nature. Of course, the balance pivots must be fitted to their holes with as little side shake as possible,

FIG. 3.

trying the roller shake at several points while doing so; continue the motion till you have made an almost complete circle, still trying the roller shake. If it is uniform the entire way round you have the assurance that the roller is perfectly true; if it is not uniform it is an indication that either the roller or staff is out of round.

With slight pivot broach press the guard pin gently against the roller edge and rotate the balance until the pin enters the fork slot, as in Fig. 1. It should do this without catching on the fork horn or on the corner of the slot. When the escapement unlocks the roller pin should be embraced by the fork slot, as shown in Fig. 1. This can readily be determined by trying the shake of the fork slot on the pin at this point, then turning the roller to the position shown in Fig. 3. The correct shake is about 1,000th of an inch and should be equal in both positions.

We will now examine the escape and pallet action. Referring to Fig. 3 it will be noticed that the impulse faces of the receiving stone and a wheel tooth are in proximity, but not parallel. The locking corner of the escape wheel tooth is in contact with the impulse face of the receiving stone, and from this point of contact to the left there is a divergence of the faces. This condition—for want of a better name—I shall call a natural divergence, for the reason that it is the condition which should exist in a properly constructed escapement. Now rotate the roller, bringing it to the position shown in Fig. 1. As the wheel tooth is released by the receiving stone the amount of drop before another tooth is arrested by the discharging stone will be indicated by the pointer at the lower right hand corner—one and three-fourths degrees.

Now reverse the motion of the roller, rotating it until unlocking takes place on the discharging stone: while doing so note the hand at the upper left hand corner. It will be seen to indicate three-fourths of a degree. This amount of lock measured on the pallet stone of a watch would about equal 1,000th of an inch. Should it be more, or less, it may be altered by pushing in or by drawing out one or both of the pallet stones. One will answer, for the reason that drawing out one stone makes the lock deeper on both sides and pushing in one stone makes the lock lighter on both stones. Care should be exercised in making such an alteration that a new error is not created or an already existing one aggravated. In order to appreciate this a thorough understanding should be had of the effect produced by the alteration.

There are few parts of an escapement that can be altered without producing more than one result. For instance, drawing out the receiving stone increases the lock on both stones, increases the drop on the discharging stone, increases the draft on the discharging stone, increases the natural divergence of the impulse faces between the wheel tooth and the receiving stone. Pushing in the receiving stone has the opposite effect. This will be particularly noticeable in the action of the impulse faces. See Fig. 4 for what I shall term unnatural divergence. It will be noticed that the locking corner of the receiving stone is in contact with the impulse face of the wheel tooth, and that

there is a divergence of the faces to the right. This condition causes a scraping effect of the pallet stone across the wheel tooth in delivering the impulse. It can be remedied, generally, by drawing out the receiving stone as in Fig. 3. The discharging stone may be pushed in to restore the lock to its former condition. Drawing out the discharging stone increases the lock on both stones, increases the drop on the receiving stone, decreases the draft on the receiving stone, decreases the natural divergence of the impulse faces of wheel tooth and discharging stone.

It should be understood that as I have previously stated care should be taken in making these alterations and all conditions carefully studied in order that the best results may be produced. As a general rule

FIG. 4.

it will be found best in making alterations on an escapement to adjust the escape wheel and pallet action before making any alteration in the work and roller action. Let us assume that the escape and pallet action has been properly adjusted and that the drop, lock, draft and impulse are correct.

It now remains to adjust the fork and roller action. Referring to Fig. 5 it will be seen that a tooth has just dropped on the receiving stone and the fork is against the left banking. In this condition the roller pin should be in such relative position as to pass out of the slot, but in this case it will not, the fork interposing an obstacle. This indicates that the fork does not occupy the proper relative position with regard to the pallet; in other words, the escapement is out of angle. It is true that the roller pin might be released by opening the left banking, but in this case there would be the danger of catching on the corner or it might

consistent with freedom. I would recommend that no alteration be made in the escapement until a thorough examination of its various functions has been gone through with. Make a note of the difficulties as you find them, then proceed to make the alterations as judgment shall dictate. The advantage in following this plan is that you will be less liable to have to make alterations in the same part a second time.

Bring the escapement in position as at Fig. 1. Grasping the fork with a pair of light tweezers try the roller shake, that is, the play or freedom when the fork edge touches the banking, and from that point to when the guard pin touches the roller edge. With the finger on the balance move it round until the escapement reaches the position shown in Fig. 2,

### FINE SOLID GOLD WATCH CASES

Pat. June 9, 1908  
P. P.—No. 41

Specialties in Casing of Chronographs, Repeaters and all Kinds of Complicated Swiss Watches

21 and 23 Maiden Lane

New York City

The Only Safety Chatelaine Case which enables a Watch to Keep Correct Time and Cannot be Lost

#### MERITS

Holds the watch firmly and securely, thus preventing the movement from being jarred, as there is no swinging or bobbing up and down while the wearer is walking or running. Protects both the case and garment from wear.

*Absolute Security*

Patented U. S. June 9, 1908.  
Patents Pending in Foreign Countries.

#### UTILITY

It can be raised so as to read the time, and reversed to have either the dial or back facing front, without removing brooch pin or watch from the garment. Can be worn on the shoulder, belt, chain or fob.

*Will not pull or wear off*

MADE FOR ALL SIZES OF LADIES' WATCHES, BOTH OPEN FACE AND HUNTING

Watch worn as Chatelaine, showing it lifted to read the time.

#### Artistic and Practical

The only brooch and watch combined. Affords absolute security, as it has a safety catch. Nothing to wear out, as it works on friction bearings. Eliminates the possibility of loss of the watch owing to either bow, hook, swivel or link wearing out, breaking or coming apart, as in the old style chatelaine. Does not interfere with either winding or setting of movement.

Licensed Under Wachter Patent. Patented July 25, 1905; May 21, 1907

Watch worn on chain as a pendant, pinned to garment as additional security.

be necessary to open it to a sufficient extent to produce the serious error or excessive slide. The proper manner of procedure would be to open the left banking to just release the roller pin, then swing the fork to the left on the pallet, or if the fork and pallets are in one piece, bend the former until the condition is produced that the edge of the fork shall touch the banking at the instant of locking.

Now proceed in a similar manner with the discharging stone, and when both are correct adjust the guard pin action.

The guard pin should occupy such position that there shall be no shake between it and roller, and at the same instant the edge of the fork shall be in contact with the banking and the wheel will have just locked. This is the condition known as

FIG. 5.

“banked to drop.” It is now only necessary to open the banking in order to give the required slide. What is meant by slide is that amount that the locking face of the pallet stone slides down the locking corner of the escape wheel from the instant of drop to the time the fork edge comes in contact with the banking pin. The slide should about equal the lock. This is to say, the lock being three-fourths degree the combined lock and slide should be one-half degree, or, in other words, the lock being one-thousandth of an inch, the combined lock and slide should be two-thousandths of an inch. Lock and slide are often confounded. They are two distinct terms, designating entirely different functions.

Lock is the distance intervening between the locking corner of the pallet stone and the locking corner of an escape tooth at the instant of drop, and is necessary to prevent possible unlocking. Slide is the additional amount between the point of locking and

the contact of the fork edge and banking pin, and is provided to secure freedom between the guard pin and roller edge; also to provide against any slight error in the truth of the escape wheel. It will be seen that the amount of lock is controlled entirely by the position in which the pallet stones are set, whereas the slide is controlled by the position of the banking pins. To open or close the banking pins does not affect the lock.

We will not examine the roller pin for proper position. It is assumed that the size is correct. If it is not it should be changed and properly set. Leaving the escapement banked to drop the pin will just pass out of the fork slot; if it does not it is an indication that it is set too far forward and should be moved back. Now bring the escapement to the position of about midway between the locking and unlocking point. If the roller pin is not embraced by the fork slot—the manner of detecting this has been previously explained—it will be an indication that the pin is too far back and should be brought forward.

I will now proceed to explain certain differences between the single and double roller. It will be seen by moving the balance to bring the roller jewel into the fork slot that the safety action in the single roller escapement is entirely between the guard pin and roller edge. In this escapement, if correctly designed, the fork horn might be dispensed with without impairing its efficiency. Its disadvantage is that the penetration of the guard pin into the path of the roller being less than that of the double roller the watch is more subject to going out of action, or, what is improperly called, over-banking. In the double roller a part of the safety action is between the face of the roller pin and the fork horn. This will be seen by referring to Fig. 6. It will be observed that the guard point is opposite the passing hollow of the safety roller, and were it not for the interposition of the fork horn into the path described by the roller pin the escapement would either go out of action or catch on the fork horn as the case might be.

The advantage of the double roller is that the penetration of the guard point into the path of the roller pin being much greater than the single roller it is less liable to go out of action. Its disadvantage is that a part of the safety action being dependent upon the fork horn and roller pin great care is necessary in the finish of these parts and their proper relative positions to avoid a serious retardation, indeed a possible stoppage, when the fork is thrown over toward the roller during the safety action. As a result of these conditions, while it is a matter of no import what curve the fork horn of a single roller may be, it is a vital point in the double roller that the curve of each horn shall be from a separate center, these centers so located that the curve, when the fork edge is against the banking, shall conform with the path described by the face of the roller pin in the rotation of the roller. It is also important that the roller pin in a double roller escapement be provided with well-rounded corners and preferably the face on an arc of a circle corresponding with its distance from its center.

Up to this point I have referred to watches provided with movable bankings. Where the bankings are fixed it will be necessary to make a difference in some slight details in making the tests. These will naturally suggest themselves to the watchmaker. For instance, in trying the roller shake, since it will be impossible to reduce it to practically nothing, it will be necessary to note instead the difference in its amount.

I have referred to the loss of power in the escapement and will now explain some of the principal causes. Each tooth of the escape wheel in delivering its impulse moves through an arc of 12 degrees. Of this  $1\frac{3}{4}$  degrees is lost in drops—a loss of  $14\frac{1}{2}$  per cent. The arc of oscillation of the fork

FIG. 6.

is 10 degrees, of which  $1\frac{1}{2}$  is taken up by lock and slide—a loss of 15 per cent. The roller pin is usually, in an 18 size watch, about .008 inch in diameter. One thousandth of an inch is allowed for shake—a loss of  $5\frac{1}{2}$ . The aggregate of these losses will be seen to be 35 per cent. In addition there is loss from impact. Five times every second the train starting up from a dead rest, and moving forward is suddenly brought to a stop by a tooth of the escape wheel contacting with the pallet stone.

The momentum acquired is thus transformed into heat. The power of the momentum is lost as a force, and while the amount of heat is infinitesimal the change takes place nevertheless. A much greater loss is sustained when the roller pin strikes the fork in the act of unlocking the escapement. At this instant the balance has

### A NEW ONE AND A GOOD ONE

MR. EXCLUSIVE JEWELER:

Do you wish a case of maximum value at a minimum cost, in shapes the thinnest and models most superb—finish and engraving that of the finest 14K. solid gold line—a solid gold case throughout of extra heavy weight at about the same price as the best makes of gold filled.

This is a large order but WE ONLY can fill it in every respect. These cases are made in triple stock, the outside of which is 14K., and this 14K. stock is 1/2 of the total thickness of the backs. The inside is 10K. and a low K. between, which is crystalized, making a harder, stronger and stiffer case in every way than either a filled case or 14K. solid. Ask your Jobber or write us direct for Prices and Samples. "LORD YORK"

"Send us a card with your name and address and we will send you an illustrated catalog describing and illustrating 'LORD YORK,' and his associates. He is the most interesting character for the Retail Jeweler in existence to-day. You can't afford to be without him."

### How to Locate and Remedy Errors Found in the Lever Escapement.

(Continued from page 115.)

attained its maximum velocity, and the force of the impact in overcoming the inertia of the fork is very great in proportion to the mass of metal involved. The momentum of the balance must not only overcome this inertia, but must also force the entire train backward. This can be readily demonstrated by placing the escapement as in Fig. 1. Now, while rotating the balance in unlocking the escapement the hand attached to the escape wheel will be seen to have moved backward on its index about one-quarter of a degree. The lesson to be learned from these facts is that in order to secure the best results all the conditions in an escapement must be made as favorable as possible to reduce friction and impacts to the minimum. Finally let me caution you to make no alteration without careful study.

It is a common practice, and a very bad one, to open the bankings at haphazard. If a watch will not run, the lock and slide being sufficient—about .002 of an inch, the trouble is elsewhere than in the banking. Opening the bankings may make the watch run, but do not forget that it imposes just so much more extra work on the escapement, so I say, gentlemen, make no alteration blindly. First determine just what the contemplated alteration will do and if the best under the circumstances do it.

#### The Brazilian National Exposition.

IN reporting that the opening of the Brazilian National Exposition, set for June 15, was postponed to July 14, Consul-General George E. Anderson, of Rio de Janeiro, describes the buildings and speaks of American exhibits as follows:

"The first building on the right as one enters the grounds is the Exhibition Palace, the main building of the exposition. It covers an area of 38,750 square feet and is of three stories. Next is machinery hall, occupied altogether by machinery used to run the exhibition. There is a Federal district building, pavilions used by the botanical garden exhibit, the forestry and garden bureaus, music pavilion, fire stations, theaters, Portuguese pavilion, carriage and motor car pavilion, restaurants, skating rink and other places of amusement. Several of the State buildings are of notable size, that of Minas Geraes covering 7,535 square feet; Sao Paulo twice that surface; Bahia, 5,382 square feet, while the pavilion for carriages and motors covers 12,917 square feet.

"The exhibits from the United States direct are housed in the Palace of Industry, and the representatives of such American concerns making exhibits who are now here express themselves as well satisfied with their location and their prospects. American exhibits so far received consist almost altogether of cotton and rice machinery, but it is arranged that other notable exhibits in the line of general agricultural machinery will be installed. The national, rather than international, character of the exposition has caused the doubts of many exporters as to customs arrangements.

## Business Methods Essential to Success

By Frank Yale, of the Kansas City Credit Men's Association, at the Recent Joint Meeting of Jewelers and Opticians in Kansas City, Mo.

(Continued from issue of Aug. 5.)

PERHAPS one of the most difficult problems in the retail business particularly is to maintain a proper and safe ratio between live assets and liabilities. One looks with a jealous eye upon that which he owns and values it accordingly, but in regulating the amount of liabilities he can safely incur he should view his possessions from the standpoint of his creditors. One is not immune from the accidents of business. One wants to be safe in any emergency and to feel that besides satisfying creditors in full there would still be some of his capital saved. Upon the adjustment of a fire loss, a forced liquidation, the administration of the estate of a deceased person, a heavy discount varying from 25 to 60 per cent. is made from the cost of merchandise in the settlement or sale. It must not be thought that this discount is an arbitrary squeeze—simply an advantage taken of circumstances. These elements do, to an extent, enter into it as they do in any other kind of a transaction, but the main reason or excuse is the natural tendency to get down from the commercial value to the intrinsic value.

The items that enter into the cost of an article on the retailer's shelves include its proportion of the expense, labor, etc., of the manufacturer, the converter and the wholesaler and jobber, the transportation charges and the interest for carriage from the raw material up, besides the cost of the material itself and the art employed in its make-up. In order to arrive at the actual value many of these items must be eliminated; hence the heavy discounts. And then the good-will of the business is unknown and oftentimes of doubtful value.

Now, safety demands that the maximum of indebtedness should never be above the minimum of the liquidating value of the live assets, which have been found to be merchandise and cash, and occasionally outstanding accounts. If the average value of stocks of your lines of merchandise in liquidation is 60 per cent. of cost, don't ever owe more than 60 per cent. of its cost, including indebtedness, for borrowed money. Right here let me say that while it is conceded to be good business to borrow money with which to discount bills and pay cash for goods, it is decidedly bad business to be

compelled to borrow money in order to meet bills due or past due. The former method makes a profit in the difference between interest and discounts, and the latter loses both interest and discounts. Besides this, a known cash buyer or discounter buys his goods for less money than does he who is behind in payment.

The relation between debtor and creditor is that of mutual benefit. There is no special favor from one to the other. The debtor, of course, by buying from a concern, helps the profit side of his creditor's business; but the creditor, by selling his customer on credit terms, certainly gives him the opportunity of making profit on the goods without any immediate money investment. But too often the spirit of toleration or consideration is absent in their dealings, each seeming to believe from his point of view that his share in the transaction is the greater favor. 'Tis a common experience to find debtors who have an utter disregard for the maturity of obligations, who see no point of honor violated, no unfair advantage taken, nor the breaking of a promise and a duty in letting bills run past due, but assume it as a right not to be questioned and not to be paid for in interest. And not infrequently do we find a creditor who has no consideration for the accidents and vicissitudes of business, but insists upon his pound of flesh.

There should prevail a feeling of absolute confidence between debtor and creditor. The financial condition of one who seeks credit should be made known to his creditor, and by him held in sacred confidence. If temporarily embarrassed, who is so able to advise as the creditor house with its vaster experience and broader knowledge? Many a commercial life has been saved by the co-operation between debtor and creditors, and many a wreck has come through timidity or disinclination to reveal the true inwardness of one's business.

Gentlemen, you have been patient listeners to a somewhat rambling and disconnected talk, yet where to begin, where to end, and what breadth of thought to cover on so extensive a subject is a matter not easily regulated, but if I have suggested anything of benefit to you, have furnished an idea that will redound to the good of

any, I am indeed repaid for the effort, and venture to express the hope that each of you will so trim his sails and mark his course that he may keep clear of the danger points in the sea of commerce and reach the safe harbor of success, where he may enjoy the results of his efforts in full measure.

[THE END.]

### Mail-Order Houses.

(Address of J. C. HAUPT, before the Recent Joint Meeting of the Jewelers and Opticians of Kansas and Missouri, in Kansas City, Mo.)

FEAR that this is rather an old subject for a youthful jeweler to deal with. However, it is one which confronts the young men of our calling as well as the men who are ripe with years of business experience, and if I can throw any light on the subject I shall be glad to do so.

I believe that the jeweler who is located in a country town feels the mail-order house competition more keenly than the jeweler who is located in the city, and in dealing with this subject I shall treat it as I find conditions in the country towns. You are familiar with the methods used by the mail-order houses in conducting their watch and jewelry departments. Their catalogues tell the story, and it is not a very pleasant one for the jeweler. They have taken business right away from our stores that rightfully belonged to us. They are still at it, and unless they are hindered in some way we jewelers may expect this evil to spread to other homes like a contagion. One of their worst forms of competition is to select some line of goods, watches, for instance, that should be handled exclusively by the jeweler and at a fair profit. By some means they have obtained a stock of them, and what is still worse have listed them in their catalogues at a price in which there is not enough profit to pay the running expenses of the average jewelry store.

They have done this very thing with the watch business. How did they do it? The answer is simple. A few manufacturers and jobbers thought it no harm to sell them, and we jewelers remained quiet and the practice continued. The mail-order houses have grown until it takes an army of clerks to conduct the business. We have watched them and remained silent so long that the fight is going to be a hard one.

The association movement has caused some of the manufacturers to "take notice," and as a result we have a few watch manufacturers who do not sell to the common enemy—the mail-order and catalogue

## Storekeeping Department.

houses. Others have fixed a minimum price for selling certain grades of their movements, and have compelled its strict enforcement, and if they will only increase this practice, making it cover more of the better grades, we will have attained a fair beginning.

Every jeweler should obtain the mail-order catalogues and study them. They should be careful in purchasing stock, so they will not have the very same makes and patterns of goods found listed in their catalogues. We should know the prices of such goods as they sell that we are interested in, not in the sense of meeting that price, as that would defeat the very object. It is not the man who meets their prices who influences the people to buy at home, but rather the man who uses tact in describing his superior grade of goods. Remember that any one can give goods away, but it takes a smart man to sell at a good profit.

We can do more good for the cause by creating sentiment in the right direction than by knocking the mail-order houses. I have found this a pretty safe rule to follow: when a customer comes in your store you should presume that he wishes to buy. Don't be in too big a hurry to get back to the bench, as the work will wait, but engage your customer in conversation, find out what he wishes to look at and begin by showing the best you have. This usually pleases the customer, as the most of us are vain enough to want the best, even if we can't have it. If the goods are better than wanted, or if it is a watch that has 23 jewels and he tells you he wants about a 17-jeweled one, you have the cue, and should be sure to dwell on quality, but say nothing about prices until you are asked, and never say anything about mail-order or catalogue houses unless your customer introduces the subject. Then is the time to use tact. I mean good honest salesmanship. I have no patience with the dishonest clerk, and would rather lose the sale than make a false statement concerning the goods. You should show him that there is more than one grade of 17-jeweled movements manufactured, also that there are a number of filled cases which are guaranteed for the same length of time, but are not equal in quality or price, and it is a good plan to have a few of the very cheap cases to sell if you are forced into it, but I would rather not sell them.

If you fail to impress upon your customer that what you say is true, ask him to think it over, bearing in mind that you are a practical watchmaker and understand how to keep his watch in repair during the entire term of the guarantee, that there is no loss of time or express charges which might run up quite high in the course of a year in case he bought away from home. Always ask him to call again, and the chances are that he will, and that you will make the sale.

If you have a customer who calls for a watch with "cut expansion balance, safety pinion and 'burget' hair-spring" (as I once heard it pronounced), you can be sure that he has been studying his catalogue and you should be ready to use your tact. He has

mastered some of the technical terms pertaining to the watch business, but "a little learning is a dangerous thing," and you, being well informed, should be able to interest him in buying. Perhaps it may take several visits on the part of the customer, but he usually buys in the end.

We have more to fear from the customer who never comes to our store to see our stock, but just gets out the catalogue and sends in the order. It seems there is no way of reaching this class except by advertising and creating sentiment.

The mail-order houses do not work very much harm to the optical business, so far as I am concerned. I have more to fear from the traveling "professor," but he is getting scarcer every year.

The repair department does not suffer as much harm as our sales department from catalogue-house competition. It is true that they quote prices on nearly every kind of watch repairing, also prices of some things in the way of material, but I have no trouble from that source.

As a cure for mail-order abuses I can hold up organization as a remedy. Create the right kind of sentiment; the kind that will influence the mail-order customers to "turn from their evil ways." Use tact. It is the chief among the attributes of the jeweler. We cannot expect to bring about a complete reformation in a few years, but let us bind ourselves closer in organization. We must first have strength and then the fight will be easy. If every jeweler in this country was a member of a State association, and all in turn were members of the National Retail Jewelers' Association, we could ask for almost any revision in trade practices and get it.

### The Choice of a Catch Phrase.

THE value of a good catch phrase in advertising is unquestioned, but it should be chosen with great care, says *Printers' Ink*. To be of any value it should do more than attract attention—it should tell a story, concrete, compact and unforgettable.

One of the best examples we have ever had is the well-known phrase that helped to popularize amateur photography: "You press the button, we do the rest." Packed in this single, short sentence was the powerful suggestion that you could "take" all the pictures you desired, while the detail work of bringing out the finished product was not for you, if you wished to avoid it.

In contrast I give you an example of the folly of adopting a catch phrase just for the sake of having one. A furniture dealer in Boston, some years ago, used the expression "when in doubt buy of . . . ." This is inapt, carrying as it does entirely the wrong suggestion. Our furniture friend was evidently a devotee of "Bridge," and his phrase was adapted from the well-known advice of Hoyle. It seems to me that if I had been a rival dealer I should have had something to say in my advertising to the effect, that: "There is no doubt in the minds of 10,000 pleased and satisfied customers that Andrews Furniture Co. is the best place to trade."

A home furnishing company in Detroit, Mich., did better, I think, when it said: "You furnish the girl, we do the rest."

But this could have been improved upon and imitation avoided by saying, in the latter portion of the phrase, "we furnish the home"—that being just the thing that ought to be emphasized. You see what a difference it makes how you put it. It is like the old joke of the man who said that he "fell notwithstanding." A friend who tried to repeat the joke said "he fell nevertheless."

When I was a boy railroad crossings bore a massive sign which read: "Railroad Crossing, Look Out for the Engine while the Bell Rings." But accidents were common, and finally one railroad management was wise enough to pay a man to produce something that would hit people quick and hard. This he did with the familiar sign: "Stop, Look, Listen." It is said that the writer received \$6,000 for his work. It seems a large fee, but it would only take two or three damage suits saved to pay it. Brevity is said to be the soul of wit—it is certainly the salvation of the sign writer.

"Twenty thousand dollars' worth of new furniture in every bottle" was not a bad expression for a furniture polish.

"A square foot of real estate is worth more than a dozen castles in the air" goes well with an advertisement of house lots.

"It serves you right" and "There's a plate for you" are phrases that have been made the trade-mark of successful restaurateurs.

A barber in Chicago says over his door: "Take home a shave."

A lunch room in Haverhill, Mass., is called "The Life Saving Station." This may or may not be appropriate. I have seen places of that nature that I considered I saved my life by keeping out of. A catch phrase will inevitably have a facetious turn to it, but unless it does more than that, don't nail it to the masthead. A phrase that has a strained effect will never stick in anybody's memory.

### The Way of the Enterprising.

AN enterprising jeweler of Lincoln, Ill., A. J. Reinhardt, used a full-page advertisement of graduation gifts in the June number of the *Lincolnian*, an interesting journal issued by the students of Lincoln College, in Lincoln, Ill. The advertisement offered a number of suggestions in the way of gifts for boys and girls.

C. L. Smyth & Co., Cheboygan, Mich., believe in combating the methods of the mail-order houses by vigorous advertising, which they do to good advantage. One of their recent advertisements was used in a space of about 14 inches wide, by 19¼ inches high. The announcement was well balanced and attractively displayed. Prices were quoted under three different articles, namely, eight-day clocks, fountain pens and detachable umbrellas. The ad. would have been strengthened were more prices quoted.

F. W. Swan, Muscatine, Ia., is sending out neat postal cards bearing on the reverse side two of the jeweler's photographs, one of which was taken in 1868 and the other in 1908. Over the photos is the appropriate caption, "40 years known to the jewelry trade." The idea is a novel one, and, according to Mr. Swan, has proved very effective.

# WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]  
No attention paid to communications unless accompanied by full name and address of the writer.

**QUESTION No. 2195.—Satin Finish or Matt Tool for Jewelry.**—Please tell me how I can make a matt, or satin finish, tool to be used for frosting jewelry repairs.  
S. F.

**ANSWER:**—Anyone having a small lathe for polishing, or a watchmaker's lathe, can make a very effective satin finishing wheel for frosting or matting purposes. Take a brass tube, any small size that will fit a mandril, or in a chuck in the lathe (about one-quarter inch in

and, before it becomes dry, apply some bronze powder. The bronze powder can be purchased in various metals—bronze, copper, silver and resembling gold.

**QUESTION No. 2197.—Polishing After Plating.**—I want to know how to polish an article, say a spoon, after plating. I have a motor polishing lathe, and after plating my articles satisfactorily I have trouble in getting a high polish on them. I can give a nice satin finish to my articles. Also tell me how to bright polish gold articles after they come out of the plating bath. A. W.

**ANSWER:**—If silver or gold plated articles are to be finished after plating by buffing, then it is necessary to prepare the pieces before plating them, so they will have a fine finish. The articles should be highly polished. This, of course, can only be done after all scratches and abrasions have been removed. Do this by using polishing material suitable for the different articles to be polished. For spoons, the tripoli composition with a muslin buff will answer, or the black lead composition may be used for various metals. This is termed grease buffing, and should bring the articles to a good polish. After this they are ready for the plater, who should plate them in such a manner that the polish will not be destroyed by scratch-brushing or scouring. They should be cleaned in very strong boiling potash, and should be clean enough to plate without further scouring. The current for the deposit must be mild, so that a smooth, soft plate is the result, which will buff up very nicely. The buffing, after plating, should be done with cotton flannel buffs, and with the use of gold rouge, moistened with coal oil, or alcohol and water. The buff must be kept as clean as possible. Two buffs should be used—one for cutting down with a generous use of rouge, and the second with less rouge, for the finishing. The buffing should be done in one direction, which will produce a more satisfactory finish. The best finish for burnished silver is done by burnishing the articles after plating, then finishing with a finishing buff and washing out clean. Gold is polished with cotton flannel buffs and gold rouge in much the same manner as silver, washed out in strong soap suds, to which some ammonia is added, then rinsed in hot water and dried in boxwood sawdust. It must be remembered that the better and the cleaner the polish is before plating the better will the finish appear afterwards.

Fraser & Tubbs, Gladwin, Mich., have been succeeded by Fraser & Coan.

## A Simple Method for Estimating the Quantity of Silver in Silver Plating Solutions.

(From the Brass World.)  
(Continued from issue of Aug. 5.)

**T**HE beaker is quite an essential part of the operation and a good one is necessary. The size used is known as the "No. 5 Griffin lipped beaker, low form." It is about five inches high and 3½ inches in diameter at the bottom. It holds about 25 ounces. The cost of the best grade of such a beaker is 40 cents.

As the beaker is heated, it is necessary that only the best quality should be used. We strongly recommend the Bohemian beaker, as these stand heating without breakage. The difference in price between a cheap beaker and one of the best grade is very slight.

A three-inch glass funnel is necessary for filtering the solution. This should not be ribbed, but of the plain variety. The filter paper on a ribbed funnel does not fit close to the sides, and, while useful for many

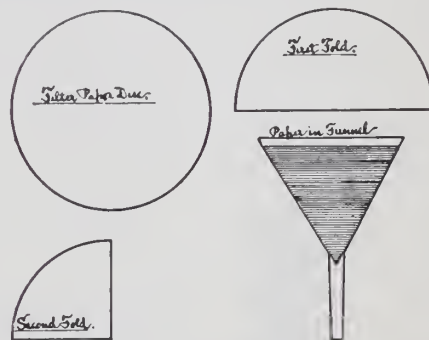

FIG. 3.

METHOD OF FOLDING FILTER PAPER TO FIT FUNNEL.

purposes, for this particular case it cannot be washed thoroughly.

The filter paper need not be of any particular grade except that it should not be too thick. White paper is preferable, as it is pure and the precipitate on it is readily seen. The ordinary white filtering paper of commerce is suitable and is not expensive. One small piece only is necessary for each determination of silver.

While the chemically pure muriatic acid is preferable, it is not absolutely necessary and the commercial acid may be used. As long as there is no silver in it (which there never is) it will answer. The pure acid, however, is so inexpensive that its use is to be recommended.

It is absolutely necessary that the chemically pure nitric acid be used. The commercial acid will not answer, as it contains chlorine that will interfere with the determination of the silver.

Zinc in shavings, chips, filings or other finely divided condition is needed. The best grade is the most satisfactory. Turnings are excellent. The granulated zinc is made by pouring molten zinc into cold water. The shot thus obtained are usually of varying sizes and the flaky pieces are the best. It matters not what the condition of the zinc is as long as it is finely divided. Large pieces take too long to dissolve. Those who are unable to obtain any other kind may use sheet zinc (perfectly clean) cut into small shreds.

The sulphocyanate of ammonium used

FIG. 1.

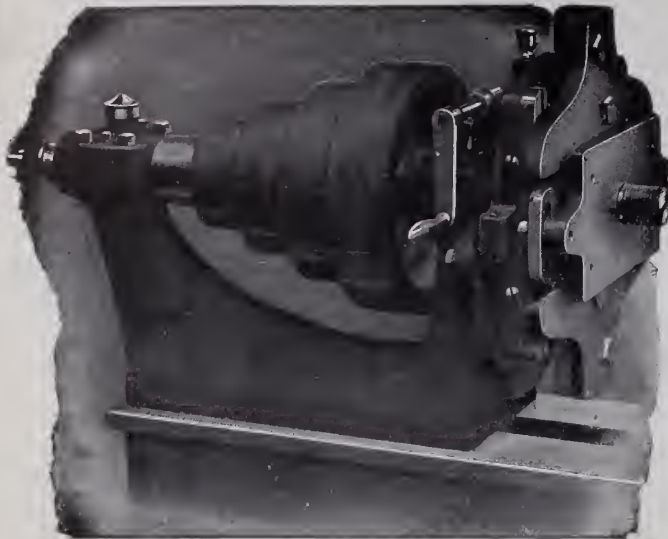

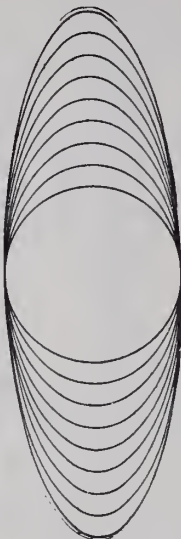

FIG. 2.

diameter is a good size), and cut the tube the length desired. Solder a washer on the outside of the tube and drill a number of holes around the edge. (See Figs. 1 and 2.) Next secure some ferrules, which may be made out of brass tubing, and solder to one end an eyelet. In this ferrule put fine steel wire, about 32 gauge, securing the wires with shellac. Make a ring to hang the brush through the holes in the washer, trim the brushes all the same length, and the brush is ready for use by running at a speed of about 1,500 revolutions.

**QUESTION No. 2196.—Celluloid Cement.**—We have a white celluloid set that we have engraved and would like to fill the engraving in with some waterproof substance. Will you tell us through your column or by letter how the preparation is made and put on?  
C. G. B. Co.

**ANSWER:**—Filling of letters on celluloid may be done best by getting some celluloid cement, and with this cement mix bronze powder, then fill in the engraving with the mixture and let dry. Or fill the cement in the engraving and sprinkle the bronze powder on; when dry, the bronze can be smoothed down. The following method may be used: Mix together three parts of alcohol and four parts of ether, and put in a well-corked bottle. When filling in is to be done, apply some of the alcohol and ether mixture in the letters

should be chemically pure. The sulphocyanate of potassium will not answer. If used the results will be inaccurate on account of the difference in the molecular weight.

Sulphocyanate of ammonium is also known as sulphocyanide of ammonium. In addition to this, it is called the thiocyanate of ammonium.

It must be pure and dry. As it usually occurs in commerce in a rather moist condition, it is necessary to dry it. To do this, spread a small quantity on a clean sheet of filter paper and allow it to remain exposed to the air for several hours or more. It should be so dry when in good condition that the crystals will not adhere to one another. The drying is quite necessary as moist material will not give as high a silver determination as it should. By spreading the sulphocyanate out upon the paper it will dry completely in a few hours. Dust and dirt must be kept out of it.

This is easily made. Take one ounce of chemically pure nitric acid and add one

FIG. 4.

ounce of water to it. Now dissolve in it all of the fine iron wire that it will take up. The acid should be present in an evaporating dish and the iron added to it little by little. When it will take up no more, filter it into a bottle. The black sediment in it is the carbon from the iron and should be filtered out through paper before using.

Weigh out 22 grams of the sulphocyanate of ammonium, previously dried, and place in the liter flask. Care must be taken not to lose any of it. Now fill the flask half full of water (distilled or rain water should be used) and shake until dissolved. Now fill the flask up to the mark with more water, insert the stopper or cork tightly and shake at least 10 times, allowing the liquid in the neck to run back each time. In this manner the solution will be thoroughly mixed. Now pour out into a clean, dry bottle supplied with a good cork or stopper. A bottle may be dried by inverting and allowing to drain over night. Label the bottle "Sulphocyanate Solution."

### MEASURING THE SILVER-PLATING SOLUTION.

The silver-plating solution to be tested is placed in the left-hand burette shown in Fig. 1. The burette is previously rinsed with water and inverted to dry. The solution is poured in until it reaches over the zero mark of the graduation. The stop-cock is now carefully opened and the solution allowed to run out into a bottle or other receptacle until the bottom of the curved line (called the meniscus) of the surface of the solution exactly coincides with the zero mark when the eye is held level to it. The solution which runs out in thus adjusting it should be thrown away.

The beaker is now placed under the burette and exactly 37.8 cubic centimeters (C. C.) are allowed to run out.

### ADDING THE MURIATIC ACID.

To the beaker containing the 37.8 cubic centimeters of the silver-plating solution add four ounces of water (distilled or rain water should be used unless very pure water is had). The beaker should now be placed near an open window or in the air and two ounces of strong muriatic acid are added to it little by little to avoid violent frothing. The hydrocyanic acid fumes given off should not be inhaled, as they are very poisonous.

When all of the acid has been added, the solution is ready for boiling. Place the beaker on the asbestos tripod as shown in Fig. 2 and heat by means of the Bunsen burner. Stir from time to time, particularly if the solution "bumps." The object of this warming is to drive off the hydrocyanic acid gas so that it will not be injurious while testing. When steam begins to come off (it need not actually boil), it is ready for the addition of the zinc.

### ADDING THE ZINC.

Weigh out about half an ounce of zinc (the weight need not be exact) and add little by little to the solution in the beaker. It will be noticed that the acid precipitated the white chloride of silver, which, upon heating, collects in clots. As the zinc is added, the chloride of silver changes to metallic silver and hydrogen gas is given off. Do not add all of the zinc at once or the solution will be apt to boil over. A five-inch watch glass, which may be purchased for 15 or 20 cents, is useful for covering the beaker and preventing loss by spattering.

When all of the zinc has been added, the action should be allowed to go until it has all dissolved. When this has taken place the chloride of silver will all have been reduced to the metallic state. It now has a gray appearance and collects in clots. It is silver in a very finely divided condition.

### FILTERING.

The zinc has all dissolved with the formation of chloride of zinc, while the silver is in the metallic condition. The chloride of zinc must be removed or separated from the silver, and this is done by filtering.

A piece of filter paper is cut out so that it is about  $4\frac{1}{2}$  inches in diameter. This is shown in Fig. 3 as the circle. It is then folded once in the form of a half circle and then into a quarter circle. The folds are then opened out so that it is in the form of a cone, when it is inserted in the funnel. The paper is held in the funnel

with one finger and thumb, and wet with water while thus held. In this manner it will fit the funnel and not become loose. The paper should not reach clear to the edge of the funnel, but about one-eighth of an inch should be left. If it reaches above the top, washing becomes difficult.

The solution, while still hot (the hot solution filters better than a cold one), is poured into the funnel. If the rod is held in the left hand and the solution poured down into it from the beaker, splashing will be avoided. When the liquid has all run through, some water (pure water) is poured into the beaker and from there into the funnel. A wash bottle, which can be obtained from chemical dealers, may be used for hot water and the washing greatly hastened. This wash bottle consists of a flask fitted with glass tubes and a rubber stopper so that it may be directly heated like the beaker.

The beaker is rinsed with water at least six times and completely poured out. The solution in the funnel is allowed to run out completely before any fresh liquid is added. It makes no difference whether some of the silver remains in the beaker, as it is afterwards dissolved in it. When water has been poured into the beaker and from there into the funnel at least six times (more is better—say 10 times) in order to wash all of the chloride of zinc out of the silver, the filter paper and silver on it are placed back in the beaker.

The funnel, during the washing, may rest in a bottle or flask. If hot water is used, a flask is preferable, as a bottle is likely to break. See Fig. 4.

(To be continued.)

### Producing a Brown Color on Bronze.

It is not generally known that a very satisfactory brown color can be obtained upon both solid bronze and that which has been bronze plated by means of liver of sulphur. Much ornamental bronze work is now used finished in this manner.

The bronze to be so colored should be cleaned and then dipped into a cold solution of liver of sulphur, made by dissolving about one-quarter ounce of liver of sulphur in a gallon of water. The bronze should not be allowed to remain in the solution until it becomes black or the desired results cannot be obtained. When a dark-red color has been obtained, or one that is a light brown, immediately remove the article and immerse in water containing a very small quantity of muriatic or sulphuric acid to "set" the color. Then rinse in clean water and dry.

The surface will now have a peculiar shade of reddish-brown, and the real luster is obtained by scratch-brushing. In this manner the bronze is exposed upon the high lights, while the brown color remains in the background.

This finish, although quite simple and largely used, is not well known, and it is possible to obtain beautiful effects on bronze by it. When the liver of sulphur is too strong, a black color is obtained, or if the article is left in the solution too long the same effect is produced. On copper, liver of sulphur gives a black color, but on bronze it has a brownish shade, particularly if not carried too far and relieved by the scratch-brush.

## The Pottery of Etruria as Shown by Numbers of Vases Found in Oft Rifled Graves.\*

THE number of vases found in the cemeteries of Etruria is immense, and yet these spoils of the dead bear but a very small proportion to the multitudes still entombed.

Most of the vases disinterred have been discovered in tombs, but it has been conjectured that they were not originally intended exclusively for sepulchral purposes. Some probably were used as prizes at the national games or palæstic fêtes, or were given as nuptial presents or as pledges of love and friendship.

Many were articles of household furniture for use or adornment, and those con-

tery. But it often happened that either from ignorance or superstitious motives the violators of tombs neglected the vases in the search for precious metals, and the former were left in place, though generally broken to pieces.

The barbarians who overran Italy at the close of the empire plundered the tombs that had escaped the Romans, and their rifling was undertaken on so extensive and well organized a system that the tombs of the poor, which were known to contain no gold or jewelry, were left untouched. In fact, although it is extremely rare to find unopened the sepulchre of a person of

guidance, the questions and doubts of antiquaries concerning the vases of Etruria must remain unsolved. Still, it cannot be denied that many Etruscan vases are purely Greek in character, and such a fact is easily explained when one remembers that the art of painted pottery originated in Greece and was developed later in Etruria and other parts of Italy.

A brief survey of a few technical facts respecting the mode of manufacturing vases is indispensable for a full comprehension of the subject. The art of working in clay does not exceed the intelligence of the rudest savage. The invention of the brick, which superseded the rude plan of plastering the hut with clay to protect it from the sun and storm, seems to have been the first step toward the fictile art which developed in later times when the forms of the physical world began to be modeled in clay.

Modeling in clay was soon superseded by sculpture in stone and metal. Clay was applied to the making of vases when the potter's wheel was invented, and the art advanced rapidly. The baking of clay in order to render it indestructible, the glazing of it to make it capable of retaining liquids, and its painting for decorative purposes, were successive and gradual developments of this art, which is undoubtedly one of the most ancient.

The wheel was a very early invention, yet the Etruscans modeled their vases with the hand and did not turn them on the wheel, which suggests the idea that their vases were imitations of metallic vases. Later they resorted to moulding; that is, they made a model from which they took casts in clay, which were subsequently baked.

The vases were painted when dry. Originally they were simply colored, but when a pattern was added the outline, previously traced on the wet clay, was followed by the painter, and the vase was then baked. Afterward all the details were scratched in with a pointed tool.

The coloring of vases varied according to the epochs in which they were made. Originally the figures were colored, but later the ground of the vase was painted while the figures were left in the natural color of the clay, and their muscles and finer portions of their outline were marked in a different color, generally a dark one.

After the paint had dried, a glaze was laid all over the vase. The receipt for making this glaze, which is so thin that it cannot be analyzed, is now lost. Hardly anything is known about the furnaces used by the Etruscans, as none has ever been discovered, but it has been plausibly conjectured

A PERFECT AMPHORA.

ARCHAIC ETRUSCAN AMPHORA.

ETRUSCAN KYLIX.

taining wine, milk and honey were placed in tombs as offerings to the manes—that is, the souls or spirits of the dead, or served for the customary libations and feasts held at the sepulchre. Sometimes these vases were used to hold the ashes of the dead, but, as a rule, they were placed in the tomb together with other articles, like armor and jewelry, which the deceased prized in life.

The number of vases yielded by the cemeteries of Etruria is astonishing, the more so as almost all the tombs that contain them have been opened and rifled in bygone times. Robbers of tombs were common in ancient times in Greece, Egypt and Italy, and the Romans in the time of Julius Cæsar ransacked the sepulchres of Corinth and Capua for the sake of painted vases, which were more prized than gold and jew-

elry. But it often happened that either from ignorance or superstitious motives the violators of tombs neglected the vases in the search for precious metals, and the former were left in place, though generally broken to pieces.

The fictile vases found in Etruria are so numerous that the art of their manufacture might be traced from them alone. Still, notwithstanding peculiarities of style and distinguishing characteristics of Etruscan pottery, antiquaries are divided in opinion as to its origin, and while some maintain that all the vases found in Etruria were imported from Greece and her colonies, others affirm that they were of local manufacture in imitation of the Greek.

The history of Etruscan pottery cannot be elucidated by ancient literature, as is the case with the Greek, for the reason that Etruscan literature is still a mystery, and hence, in the absence of historic records for

hat the kilns had a tall chimney and an open fire below.

Etruscan vases are generally regarded as belonging to three classes, which are distinguished as follows:

1. Egyptian, Phœnician or Babylonian, primitive Greek vases, particularly Doric. The figures in vases of this class are painted on the pale yellow ground of the clay, generally in black, sometimes in purple, white or crimson, and, as a rule, consist of representations of animal life adorned with annular bands, meanders, concentric circles and geometrical patterns. These vases are of high antiquity and are supposed to date as far back as 12 centuries before Christ. They cannot be later than 540 B. C., when improvements in metal casting marked a new era in ancient art.

2. Etruscan proper or Tyrrhene, though a more correct appellation would be Archaic Greek. The figures here are painted black on the natural ground of the clay, which is generally yellow warming to red. The flesh of women, the hair of old men, the devices

when the decline of the ceramic art began and metal vases were introduced in place of those of terra cotta. The subjects illustrated on these vases generally represent Greek myths or representations of Greek manners, and hence little or nothing is to be learned from them of the customs, manners, creed or traditions of the Etruscans. A few of these vases have polychrome figures on a white ground.

(To be continued in issue of Aug. 26.)

**How the Wisconsin Jewelers Enjoyed the Outing During the Recent Convention at Milwaukee.**

ALTHOUGH the members who attended the recent annual convention of the Wisconsin Retail Jewelers' Association, held in Milwaukee, spent a great deal of its time in the consideration of important features which in themselves were entirely new in the jewelry circles of the west, plenty of time was found for enter-

ARTISTIC METAL SMOKING SETS.

THERE are some very handy smoking sets now being offered by dealers in New York which are very appropriate for the Summer and Fall seasons of the year, as they are especially convenient on the veranda. The best ones are made of dull-finished brass or bronze. The stands are shaped like a miniature table with long slender legs having a firm base so that the stand will not upset, and just the right height to come within easy reach when the smoker is seated. The stands are so light that they can easily be carried from one corner of the veranda to another and takes up very little room. On the top of one stand, which is hardly larger than a saucer, are fastened a match-box holder, a tiny candlestick and candle, an ash tray and a rest for a lighted cigar or cigarette. Instead of the top being flat some of the stands are bowl shaped, thus providing a depository for ashes, while the other conveniences are arranged around the edge on tiny metal supports.

\*

RICH PLATES AND VASES OF LIMOGES AND CHINA.

AT the salesrooms of Wm. Guerin & Co., 33 Park Pl., New York, is to be seen an attractive display of Limoges china, included in which are novelties especially suitable for the jewelry trade at this season. The line of service plates includes a pattern showing a heavy gold band about the edge, within which is a blue disk overlaid with gold. A separate ring of gold over the shoulder of the plate has leaf effect patterns in blue against the background formed by the gold work. Plates with border patterns in wreath and flower effects are also shown. Dainty receivers for use in a variety of ways, together with vases in a number of patterns, are shown. One especially attractive china vase is glazed a deep purple and has a band of gold at the top and bottom. On the body of the vase is a pattern design, showing flowers in gold.

THE RAMBLER.

INTERESTING PHOTOGRAPH SHOWING MEMBERS OF THE WISCONSIN RETAIL JEWELERS' ASSOCIATION AT THE OUTING AT "BLATZ PARK" DURING THE RECENT STATE CONVENTION.

on shields and a few other objects are painted white, the armor is sometimes purple, while crimson is occasionally introduced in draperies. The outlines, the muscles and the folds of drapery are marked by incised lines. The human figure forms the principal subject of design, and no vase belonging to this class, which is purely Hellenic both as regards subjects and inscriptions and extends from 540 to 450 or 440 B. C., is free from the severity of archaic art, though many of the conventional and constrained attitudes of the figures in earlier works are remedied. The subjects depicted are taken from the heroic cycle, deeds of Hercules or Theseus, events of the Trojan war, and similar episodes and fables from the Hellenic mythology.

3. The third class has been called perfect. The vases belonging to it are painted black, while the figures are left of the natural reddish color of the clay and the details are either marked with black lines or brownish red in the more delicate parts of the figures and drapery.

The vases of the third class belong to the finest period of Greek art, and they were manufactured from about 460 B. C. to 336,

tainment and merriment. One of the occasions which was termed a "jollification" affair by the visiting jewelers was the Wednesday evening outing to Pleasant Valley, or, as Milwaukeeans are wont to call the place, "Blatz Park." Cars were taken by the jewelers and their lady friends to North Ave. in the city, where the entire party embarked in boats to the shade of the pleasure ground which is named after one of the amber fluid products of Milwaukee.

Here the annual banquet of the association was held and here the photographer caught the party just before they departed for a pleasant evening visit to Wonderland.

Watches and jewelry, valued in all at about \$7,000, were stolen by burglars recently from the store of Alfonso Campbell, Toren, Mexico. The store is on the ground floor of the Iberin Hotel. A man applied for a room and was conducted to the one above the store. During the night he cut a hole through the floor and climbed down into the store where the jewelry stock was located.

Extensive improvements have just been made in the interior and exterior of the store of H. Spahr & Son, W. Russell St., Orangeburg, S. C. A new front has been added to the store and up-to-date cabinets and show cases have been installed.

Burglars recently broke into the store of McCulley Bros. & Sturdevant, Halsey, Ore., blew open the safe and escaped with several diamond rings and a small amount of cash. A tray of rings which had been placed on top of some books was overlooked. R. A. McCulley, the youngest member of the firm, was absent on a wedding tour with his bride at the time of the robbery.

In Your Cash Box?****READ!!**

We guarantee you against loss; your reputation remains the same after we finish. We never misrepresent the quality, and you can always depend on us to fill our engagements. We will make your sale and **POSITIVELY GUARANTEE** that our **NEW SYSTEM** will produce the required results. Wire or write for date.

**A \$40,000 SALE**

To My Brother Jewelers:  
My sale, which was conducted by H. E. Glendore & Co., was one of the most pleasant surprises of my business career, surpassing all my expectations. Yours,  
A. KAEMPFER,  
146 West Madison St., Chicago.

**A \$20,000 SALE**

To anyone seeking the service of a first class auctioneer, I can sincerely and truthfully recommend Mr. Glendore, who has made a friend of myself, and his entire attendance, and is a hard worker for his employer, who made good margins on his sales, and highly satisfactory to me. This sale was a surprise. I beg to remain most friendly.

JOE FRIEDLANDER, Memphis, Tenn.

**A \$7,000 SALE**

I moved to Amarillo, Texas, and opened there Dec. 15, 1907. Mr. Glendore made my sale the following month (January), opening sale Jan. 11, 1908, selling over \$7,000 and averaging 5 per cent. profit, under the most difficult circumstances. Many thanks to him.

E. I. PITTMAN &amp; SON

**A \$10,000 SALE**

My sale made in last month, February, 1908, by H. E. Glendore and M. L. Jalonack, was in every way satisfactory. My guarantee with them was for them to get me 80 cents on the dollar. But they made my stock bring me dollar for dollar, above expenses.

H. L. MORRISON, Pittsburg, Kan.

The auction sale you made for us was a great success. It was a good business proposition. We cordially recommend you.

RAINES BROS., Maryville, Mo.

The sale you conducted for us was in every way satisfactory to us and our patrons.

J. H. WUERTH &amp; SON,

Leavenworth, Kan.

Our New Pattern of Sterling Silver Flatware  
THE "EVANGELINE"

A pattern of the old Colonial period  
Plain, substantial and good

Wherever it has been seen it has met  
with immediate favor, and is certain  
to become a standard family pattern  
of great popularity.

Anyone who wants an attractive,  
serviceable pattern that will always  
be in good taste for all occasions,  
will appreciate

## THE "EVANGELINE"

A more moderately priced pattern  
than one would imagine—Teas from  
\$11.00 to \$19.00 a dozen—subject  
to regular catalogue discount.

Made in full line, fancy pieces and  
cutlery.

When our salesmen call, ask to see

THE "EVANGELINE"

*Silversmiths*

NEW YORK

The Election of Candidates is largely due to what they have done in the past, what they promise to do in the future, and what the majority of voters think is best for the country.

If an Election of Gold Filled Watch Cases was taken—on these lines, the three Candidates that would carry the day would be—

**Fahys “Permanent”**  
**Fahys “Bristol” and**  
**Fahys “Montauk”**

The three best cases in each grade. Their past is known with favor, their future is guaranteed by the house of Fahys, and with judicious recommendation the retail jeweler can carry the country with Fahys' Cases when a vote is taken on filled cases.

**JOSEPH FAHYS & CO.**

NEW YORK

# S. O. BIGNEY & CO.

## MIRROR FINISH

is the name which has been given to S. O. Bigney & Co.'s

## HIGH GRADE GOLD-FILLED CHAINS

on account of the beautiful finish. After the links are soldered the gold is somewhat porous. In order to get a perfect finish, the only method known to the art is the method of burnishing. This we apply to our chains. It closes the pores, hardens the surface, gives the mirror finish, and will add one-third to the wearing life of the chain. This method makes for durability and excels all other processes of hardening finish.

Every retailer should have a good stock of our high-grade, gold-filled, mirror-finish Chains, Fobs and Bracelets.

## We Make Bracelets of Every Description

Oval and Square, Side Swing and Hinge, beautifully finished and embossed. Pleasing to the eye, and rapid sellers.

**Office and Factory, Attleboro, Mass.**

**New York Office, 3 Maiden Lane**

Flat Belcher ring as received with claws badly worn.

How the same ring looks when stone is reset without new claws. Stone is not secure and point is below inside of ring.

How we splice settings and solder in new claws; seams do not show and rings are as perfect as when originally made.

How ring looks with new claws and stone securely reset. Entire ring is finished like new.

When we tell you that we have received as many as 75 diamond rings in one day for new claws and settings, you will not think us extravagant for using a full page in THE JEWELERS' CIRCULAR to exploit this feature of our business, but will wonder if you are getting your share of claw work.

99 out of every 100 owners of diamond rings willingly pay \$1.50 to \$5 for new claws or settings on their rings, but would not buy new mountings for \$5 to \$25.

It is worth while to familiarize yourself and your employees with this work, as it is one of the important little things that helps to make your business profitable.

## WENDELL & COMPANY

The firm that did much to change the repair end of the Retail Jewelry Business from a source of worry and dissatisfaction to one of pleasure and profit.

47 John Street  
New York

TWO WONDERFUL SHOPS

57 Washington Street  
Chicago

Tiffany ring as received with worn off claws. Stone cannot be reset, as it would be too low to look well and the point would come below the inner circle of ring.  
(See cut No. 2 of flat belcher.)

How same ring looks with new claws and stone securely reset. Entire ring is finished like new.

Oval Belcher ring as received with claws badly worn. Stone cannot be reset, as it would be too low to look well and the point would come below the inner circle of ring.  
(See cut No. 2 of flat belcher.)

How same ring looks with new claws and stone securely reset. Entire ring is finished like new.

THE PRICES QUOTED ABOVE FOR NEW CLAWS AND SETTINGS ARE SUBJECT TO OUR CATALOGUE DISCOUNT.

WE CAN PUT NEW CLAWS AND SETTINGS ON MOUNTINGS TAKEN IN TRADE AND REFINISH THEM SO THEY WILL BE AS GOOD AS NEW.

WE RETIP CLAWS AND MAKE NEW SETTINGS FOR CLUSTER MOUNTINGS SO THEY ARE AS GOOD AS WHEN ORIGINALLY MADE, AT PRICES THAT MAKE IT ADVANTAGEOUS FOR THE OWNERS TO HAVE THIS WORK DONE.

Carrying no diamonds in stock, entering and tagging each piece of diamond jewelry as received, then giving to each workman but one ring at a time, which is returned before he receives another, prevent any possibility of diamonds being exchanged while in our possession.

## A PERSONAL INVITATION

We most cordially invite all retail Jewelers to attend our SIXTH ANNUAL EXHIBITION which will open at our offices on August 24th. In order to comply with the unprecedented demands of a large number of Jewelers in various parts of the country for an opportunity to view our exhibit, we are compelled to extend this display beyond the time originally set, and shall therefore continue our EXHIBITION on Monday, August 31st and Tuesday, September 1st.

Whether you have visited our former displays or not, do not miss this one. We have taken great care in the production of goods to meet present-day demands, and it will be a revelation to many to note the great changes which have taken place in up-to-date Diamond Mounted Jewelry.

Wire or write if we can be of service in securing for you proper hotel accommodations.

## A NEW WHITING PATTERN

## The "Madam Jumel"

The Whiting Company's new pattern, the "Madam Jumel," while thoroughly Colonial in its general simplicity of line and reticence of ornamentation, suggests in its pervading grace the spirit of the late 18th Century French Neoclassicism.

It is entirely appropriate, therefore, that a pattern displaying these characteristics should be associated with the name of one who, during Revolutionary time and later, was historically prominent as a social link between her own countrymen and their French sympathizers.

The "Madam Jumel" is produced in a complete line of spoons, forks and fancy flatware, and will be ready for delivery September 15, 1908.

New York

San Francisco, Cal.  
717 Market St.

## HERE IT IS AT LAST!

Just what you have been looking for and have had calls for time and again. A German Silver Wrist Bag with a Soldered Mesh. Somewhat higher in price than the unsoldered mesh? Of course! But you can now sell a bag that will not break and one you can guarantee. Twelve patterns, 4", 5", 5½", 6", 6¼" widths.

We are still headquarters for high grade Sterling Silver Bags, and have also added a line of Change Purses.

Our goods are made on honor; we believe with Ruskin that "A composition for cheapness, and not for excellence of workmanship, is the most frequent and certain cause of the rapid decay and entire destruction of arts and manufactures."

THE  
DIRECTOIRE  
STONE

A  
SAPPHIRE  
PERIOD

**T**HE GENIUS which inspired the Directoire regime, did not confine itself to designs, costumes or fabrics. With nice discrimination it even selected its distinctive gems. Of these the Sapphire was pre-eminent. Beautiful in itself, the effect of the stone was heightened by the artistic uses to which it was put. In reviving the tendencies of that marvelous period, this house is giving the Sapphire its appropriate recognition. The effect loses nothing by the artificial stone, so faithful is the imitation. Jewelry of the Directoire period is here reproduced to the life. The influence of this period cannot now be over-estimated.

# The "Krementz-Bodkin Back" STUD and VEST BUTTON

Pat. Feb. 16, 1904

Krementz & Co. believe the trade will agree that they understand the jewelry business sufficiently to know that the "Krementz-Bodkin Back" Stud and Vest Button is the simplest and best mechanical Stud or Vest Button made.

The "Krementz-Bodkin Back" Stud and Vest Button is not one piece, but is one-piece construction, which makes it very simple and the strongest and most durable, because:

- 1—It is Solderless
- 2—It has no spring or hollow wire to bend or break
- 3—It is made of solid, hard spring metal throughout
- 4—It is made by Kremenz & Co. which insures perfect quality, construction and workmanship

THE STORY OF THE HEAD

## Krementz & Co. Invite Comparison

Krementz & Co. stand back of their assertion. All "Krementz-Bodkin Back" Studs and Vest Buttons are sold also under the unique Kremenz Collar Button Guarantee.

THE STORY OF THE BODKIN BACK

### GUARANTEE

If for any cause whatever, a "Krementz-Bodkin Back" Stud or Vest Button should be damaged either in the hands of the dealer or wearer, a new one will be given in exchange, without charge. "Krementz-Bodkin Back" Studs and Vest Buttons are made in large variety of patterns in 14-kt. gold and platinum, set with pearls and diamonds.

## The Intelligent Placing of Stock Orders

**A** THOROUGH and systematic laying in of regular stocks is now in order. Your season will depend on how you do it.

Past experience shows the exceptional selling qualities of the Day-Clark lines. They are known to cater successfully to a very wide and desirable trade. The high standards heretofore maintained, still prevail.

When considering your stock orders, you are invited to inspect the season's displays here. They cover just the goods and the kind you want.

### Silver Deposit Ware

Our low price for Silver Deposit Goods is made possible by our making them in large quantities, coupled with long practical experience in their manufacture.

We have constantly guarded our reputation of being the leading house for Deposit Ware, and have never made a reduction in price at the expense of quality. "Quality" indeed has been our motto since we first made Deposit Ware years ago.

Send us a trial order and you will find that these goods will make friends and customers for you as they have for us.

## THE Ægis Case

(PATENTED)

THE ÆGIS is a new creation in gold case making. The center and bezel are in one. Instead of having the ordinary Cap, this case is provided with a rigid metal movement Cup, held friction tight in position. This Cup gives protection to the movement such as cannot be secured with the conventional jointed cap, while dust is thoroughly excluded from the front by means of the one-piece center and bezel.

MADE ONLY BY

**ROY WATCH CASE CO.**

21-23 MAIDEN LANE  
NEW YORK

San Francisco Office, 704 Market Street

THOMAS J. DUNN CO.

100-1 Chambers St. NEW YORK

Official Emblem

for the Benevolent and Protective Order of Elks. At the last meeting of the Supreme body an emblem was adopted as official. The official emblem was described by them as to what it should be, and from their description we have **originated** the following designs:

The base is finely enameled in colors specified as they should be by the Grand Lodge. The head is nicely raised, being modeled and true to nature in every respect, and the entire emblem is a **masterpiece of the Goldsmith's art**. The Supreme body ruled that it was optional as to whether members wear this or not, so that, although this emblem will sell to a great many people desiring the official emblem, still, the masses will continue to want the old and recognized Elk head which has been made for so many years. The above designs which we **originated** have turned out so **successfully** that we have applied for a **PATENT** on same, so they are **PATENT APPLIED FOR**, and the last advices received point to the fact that there is no question, but that we **will receive the patent** on this design, and we take this way of notifying various manufacturers that they will be "in pocket" by not making dies, tools, etc., for this emblem, as they have tried to do with our entire line, they will try to copy, as the **patent will be issued shortly and infringements will be prosecuted by us to the fullest extent of the law**. The above emblem is made in gold, silver and plate; also mounted with diamonds and other precious stones, it is also mounted on various beautifully designed charms, badges, rings, etc. We are at present completing the entire line and a selection on memorandum will be sent to reliable jewelers if your jobber will not supply them.

THE GUSTAVE FOX CO.

14-16 E. Fourth Street - - CINCINNATI, O.

Interchangeable  
Scarf Pin

PATENT PENDING

The smart dresser wears a pin to harmonize with his cravat. Our new device permits the wearer to use a diamond or pearl in combination with any colored stone, such as Lapis Lazuli, Moonstone, Turquoise Matrix, Jade, Topaz, Amethyst, Garnet, etc., by merely snapping the colored stone on the pin, as shown in illustration. Easy to attach or detach—nothing to break. Made in 14 Kt. only.

### The Hollenback Automobile Trophy.

ONE of the most beautiful silver trophy cups of the automobile racing season is that known as the Hollenback trophy, of which an illustration appears herewith. The prize was presented by Hon. John W. Hollenback of Wilkes-Barre, Pa., to the Wilkes-Barre Automobile Club as a grand prize for the club's third annual hill climb

THE HOLLENBACK AUTOMOBILE TROPHY.

up Wilkes-Barre Mountain on Memorial Day, May 30, 1908.

The piece, as the illustration shows, is somewhat of an unusual form, but is distinctly artistic in conception and perfect in execution. The total height of the silver portion of the trophy is 28½ inches, and this rests on a green base of Mexican onyx (which is not shown in the illustration)

tion) which is 11½ inches in diameter and about six inches high. On the front of the cup is a scene depicting "Giant's Despair," with two racing cars all chased in relief. On the reverse in the same treatment is the scene of the "Devil's Elbow." On either side are two beautifully modeled Indian heads. Surmounting the trophy is the figure of Victory resting on a keystone and surrounded by winged wheels.

The trophy, which is in soft French grey finish throughout, was supplied and made by the Bailey, Banks & Biddle Co., Philadelphia.

### World's Trophy Awarded to Winner of Typewriter Speed Contest.

A MANUFACTURING silversmith of Attleboro, Mass., completed recently a magnificent silver trophy for the winner of the national typewriter speed contest recently held in New York. The trophy is a sterling silver cup, 36 inches in height, including its ebony base, and 21 inches wide. The body is globular in shape, and on the surface are engravings of the natural divisions indicated in the minute details.

On the upper rim are etched the words "World Trophy." Connecting this rim to the body is a row of silver typewriter keys, each containing a letter of the word "Typewriter Speed Contest."

The body of the cup is supported by two spread eagles in silver, one on the front and the other on the back of the cup. The eagles support the bottom of the handles, one on each side. At the top the handles are joined to the upper rim, and are embellished with laurel wreaths, the Mercury wings, serpent and human hand, indicative of speed.

On the bottom of the cup are engraved the words "Speed and Accuracy" in English, French, German and Spanish.

The base is of ebony and contains on the front a silver tablet on which are the names of the various typewriter concerns of the country which contributed to the cost of the cup. On the rear is another tablet on which will be engraved the names of the winners.

The cup was in the Watson & Newell Co. factory about one month. It was designed by J. E. Straker. Its cost has been advertised as \$1,000.

The winner of the contest was Miss Rose L. Fritz. While blindfolded she wrote on an Underwood typewriter 97 words a minute for 30 minutes, breaking all records and winning the world's speed championship.

The G. W. Meyer Jewelry Co., Chattanooga, Tenn., has renewed its lease on its present location for 10 years, according to a recent dispatch, and will not retire from business, as was previously reported.

### ELSIE BEE'S FASHIONS.

SUMMER NOVELTIES NOTED IN A LADY'S RAMBLES AMONG THE JEWELERS.

WOMEN are wearing mannish sets for the shirt waist. They comprise stock pin, links, and three or four studs usually having a cabochon setting, oval in shape, with the narrowest rim of gold around it. Sometimes the pin is a bar of gold with a clasp pin and a setting to correspond with the other pieces. Again, the studs may be pins with which to fasten the front of the waist.

The collar-and-bow pin has developed from the prevailing fashion for bows worn with the stiff collar. It consists of a simple setting, usually the single stone surrounded by a gold band, at the sides of which are two large rings. The ribbon passes through these rings and under the stone setting. The chief advantage of this pin is that it holds the bow well in place without the wear and tear of constant pinning.

In brooches, the sporting, odd, fantastic and often grotesque designs seem to be holding sway. One is in the form of a checker board of onyx and diamonds. There are also such musical instruments as a violin and a banjo wrought out in enamel, pearl and diamonds. A large key of beaten gold, set with rubies and sapphires, is also a conspicuous novelty, as is the hawk's head with enameled open beak as if in the act of uttering a cry.

The rose hat pin is one of the Summer's distinct novelties. It is made of the real California rosebud, which is treated with acid, plunged in a copper solution and then dipped in gold. The effect is most charming, the natural features of the rose being preserved—the irregular curling of the leaves, the roughness of the calyx, the artistic outlines. It is well adapted to the purpose of a hat pin, a golden rose being quite the proper thing for the ornamentation of headgear.

A new style of separable cuff link has just appeared. It consists of the inevitable cabochon stones, surrounded by the narrow rim of gold; but to avoid the crushing of the linen caused by pushing so large a setting through the buttonhole, it is made in two parts, which are furnished with a hook and eye. The eye has the longer shank, and the flat hook, when adjusted in the cuff, is of such a size that it is kept securely in place by the thickness of the linen. Its simplicity and practicability recommend it highly.

Extensive improvements have just been completed in the store of C. M. Morse, Huntington, W. Va.

## A GREAT LINE OF BUTTONS

We are making probably the greatest lines of 14K. stiff bar buttons that are on the market to-day.

These lines have four distinct points in their favor.

- Low priced
- Well made
- Attractive patterns
- Finely finished

We have eight distinct lines of patterns at the following prices:

\$2.75	\$4.25
3.15	5.50
3.50	6.00
3.75	7.00

Our travelers are now showing them, or we would be pleased to send a selection package to progressive retail jewelers in good standing.

## Jewelry and Silversmithing at the Franco-British Exhibition.

By W. Augustus Steward, Chief Instructor in Gold and Silversmithing at the Central School of Arts and Crafts, London.

AS I write the King is opening the Olympian games in the Stadium of the Franco-British Exhibition. The exhibition itself is a monument to friendly relationship between two neighboring nations; the prac-

a brave show, indeed the women have used every effort to demonstrate how versatile they are, but their work cannot compare with the products of the men, who have not only spent long years at the jeweler's bench,

THE PALACE OF BRITISH APPLIED ARTS.

tical embodiment of the *entente cordiale*. But the great Stadium, filled to-day with the athletic manhood of all nations, demonstrates that healthy rivalry of peace which makes for the brotherhood of man. The Franco-British Exhibition is remarkable inasmuch that two nations have co-operated to fill such a large area with the products of the workshop, factory, mine, field, studio and laboratory. I have seen every exhibition of any consequence during the past quarter of a century, but this, in my opinion, with its variety of exhibits, diversity of talents demonstrated, and the arrangement of most of the buildings, holds a premier position. Perhaps it appeals more to me because I knew the bleak, drear lands upon which it has been built and have watched the gradual transformation until a town of white palaces has arisen, which not only please the eye but leave a lasting impression upon the mind.

The Palace of Art is an imposing building. In this the pick of the paintings and sculpture of France and Britain are arranged in a most praiseworthy manner. The Palace of Women's Work close by is the most packed museum in the whole Exhibition. Here every available inch of space has been covered, and one may see some remarkable specimens of jewelers' work (I don't think always the honest work of women). Mrs. Dick has a nice show of carved and colored horn combs which is decidedly attractive, and also some good enameling. Several other women also make

but who also are satiated with craft traditions; so for jewelry in the trade sense of the term one must cross, wending his way through the rich carpet bedding of flowers, to the French and British Palaces of Applied Arts.

In both palaces are to be seen some re-

REAR VIEW OF THE EXHIBIT OF R. & S. GARRARD.

markable examples of the diamond mounter's art. In the French Palace, Boucheron, Vever, Tamplier, Teteger and Sandoz all have splendid exhibits, the first showing some strange but dainty lace-like brooches

and pendants looking like a mixture of iron or oxydized silver and platinum with an edging of gold, heightened with tiny brilliants set in the "knots" of the lace. These, which emphasize the clever technique of Parisian craftsmen, are unique indeed, but remind one somewhat of the German iron jewelry of a century ago, which one sees in the Berlin Museum. Then there is a wonderful lightly built tiara, just a few swallows supplying the motif and making an extremely fine result, so unlike much modern work. In this case one also observes the finest of work in grain-set pendants, specimen pearls and diamonds set in rings, and a remarkable large blue diamond. But possibly the attraction in the jewel case is a fine pearl necklace priced at £40,000.

One finds close by a splendid collection of delicately enameled boxes, bonbonnieres and others for nick-nacks, all of exquisite charm and demonstrating a rare knowledge of style on the part of the designers. Of silverware for the toilet table Boucheron also shows some finely modeled pieces quite in keeping with the reputation of a firm which is first of all a producer of artistic jewelry.

Facing this fine collection is the exhibit of Ekanyan. It surprises the dealer, astonishes the public and mystifies both. There, indeed, one might spend an amusing half-hour with those who call themselves jewelers. Ekanyan simply shows diamonds. Everyone can see that the magnificent pippin-shaped gem, priced at £22,000, is a diamond, and that the fine brilliant valued at £12,000 is of the same class, but what of the pink, green, yellow, brown, blue or black diamonds, and those of strangely neutral colors. I wonder how many of those who gaze upon the great colored single stones or the ranges of colored diamonds, set out in their pads showing how they may be harmoniously disposed in a mount, realize that it is a remarkable collection of diamonds they are looking at and not specimen sapphires, topaz, etc.?

Vever is a near neighbor, and it is he who helps to fill the gap made by the absence of René Lalique. Vever is a jeweler with deep, artistic insight, who possesses considerable power of originality. His work is

## Reconstructed Rubies

IN CABOCHON AND BRILLIANT CUT, ALL SIZES AND SHAPES

invariably refined and the coloring delicate. It compels admiration. Particularly does one pause for a time to inspect the diamond-mounted combs and the dainty enameled ornaments in his case. The rich buckles also command our attention and elicit also no small modicum of praise. But we miss Lalique. Teterger makes a small but attractive exhibit of well-modeled jewelry, etc., and also claims special attention because of the delicate quality of that which is enameled. Then Templier, he who does so much for the Parisian Jewelers' Associations and the Orphanage, shows some magnificent specimens of the diamond mounter's craft. The most important pieces in his exhibit are some truly magnificent corsage ornaments, but his well-designed and particularly cleverly made brooches and diamond set pendants call for more than passing comment were my space not restricted. The pearls of Paquier are exquisite, while the gold brooches of Sandoz—mainly the product of the medallist's art—are nice to look upon, but lack the first quality demanded of all jewelry, *i. e.*, that it shall appeal to the onlooker by its beautiful (shall I say for want of another word, "jewel-like") effect. The gold brooches of Sandoz are excellent specimens of the medallist's art, but they are too solid, there is too much sameness about them to make them suitable for their purpose.

The Collaboration des Fabricants of Besançon enables us to get a good idea of what the French center of watchmaking can produce. But it would appear from the character of the work shown, richly enameled and jeweled ladies' watches, or handsomely cased gents' watches, that it is Switzerland whom the French city has set out to rival. The enameled cases are quite up to the standard one expects from the French, while the gem-set cases are also technically excellent.

It would seem that the French have only made up their minds to show what they can do to supply the richest class of people. There is comparatively little in the way of jewelry for the middle or working class, and what there is of it will not compare at all favorably with the same class of jewelry made in England.

Christoffe, of course, makes a fine exhibit of silverware. The dinner services are typically French, with objects of the kitchen garden as motifs for decoration. There is also shown a parti-gilt coffee set which is strangely rich in work and appearance, but is nevertheless inartistic. Massive silver gilt vases, a table mirror in silver with nude female figures, also, all of which are pleasant to the eye, but the silversmithing in this exhibit of France's leading house is, like the rest of that shown in the section, indicative of that lack of modernity which one expects from an artistic nation; it is worse, for it is not up to the standard we may rightly expect.

The bronzes of Susse Freres are beyond criticism; they are what we might expect from a house which appreciates its reputation. The objects which strike one among the exhibits at this stand are those in which bronze, ivory and silver have been skilfully combined. The *chriseléphantine* effect is invariably good, helping to give a more picturesque quality to the model.

In the Palace of British Applied Arts there are some fine specimens of the Silver-smith's craft. France cannot, even with Christoffe's rich exhibit, which lacks modernity, vie with the productions of R. & S. Garrard and Messrs. Elkington. It is in silversmithing that Britain demonstrates beyond doubt her superiority. It is essentially a British craft, the work produced by native born men, which makes it all the more gratifying, since though British diamond mounting and goldsmithing compares favorably with the French (one must accord the palm to the latter), it must be remembered that the best of British work is made in London in what one may term cosmopolitan workshops, for a number of French, German and Italian are employed

for this year's Ascot races are also shown. "The King's Gold Vase," the annual gift of His Majesty, is an oviform cup and cover in the 18th century English style, reminding one, however, of the style of Paul Lamerie; "The Royal Hunt Cup" for the same races is in the 17th century Italian style, while the "Ascot" Gold Cup is a two-handled cup and cover supported by demi-centaurs, the body of the cup being decorated with festooned drapery which falls over handles formed of double scrolls ornamented with leafage marks. A winged figure of a boy representing Fame surmounts the cover. R. & S. Garrard & Co. are the Crown jewelers, and this, I might explain, means more than an ordinary Royal appointment, for the house has to

BOOTH OF THE GOLDSMITHS & SILVERSMITHS' CO., LTD.

by the leading houses. It is this variety of craftsmen which has been particularly helpful to the London trade and resulted in the production of work which, if it fails in the very light, graceful effects of the French productions, possesses the quality of soundness and stability.

The collection of gold Ascot cups, which form the great attraction in the artistic exhibit of R. & S. Garrard & Co., give historical proof of the fact that there is at least one London house which has maintained unsullied the best traditions of the silversmith's craft. The firm was established in the reign of George II., in 1721. There is in this collection the fine cup given by His Majesty in 1884, which was modeled by the late C. B. Birch, A.R.A. It is in the early Italian style, somewhat grotesque but rich in effect. Then the copy of the celebrated Warwick Vase, which the King won with his famous horse "Persimmon" in 1897, shows great care and faithfulness in reproduction. The three cups

supervise the regalia and are responsible for the production of insignia for the principal orders of British knighthood. In the exhibit splendid specimens of work in this connection are shown. There is a magnificent insignia of the Garter exhibited, including the pendant with diamond-set garter and finely-cut model of St. George and the Dragon in onyx. Specimens also of fine diamond mounting, including effective tiaras and necklets of diamonds for court occasions, help to make a combined exhibit of the silversmith's and jeweler's craft which is without rival in any part of the Exhibition.

Mention should be made of the specimen stones which form central features in some of the objects in this stand. There is a golden diamond of remarkable quality set in a band of ordinary diamonds with a large pearl drop; a ruby of remarkable size and quality also attracts, while a Persian turquoise of rare color and size is the cynosure of all eyes. It forms an ideal brooch

# New Patterns Now Ready

Our new line for the season of 1908-09 contains many absolutely new designs of unusual beauty and timeliness. We offer many unique pieces in diamonds, and combinations of diamonds and precious and semi-precious stones; all in the best of taste and all finished specimens of the best art work in jewelry, and we also have the staple patterns every Jeweler needs.

Our salesmen can show you these pieces, or we shall be glad to send you an assortment if you will tell us what you are interested in. Write us.

2 Tulp Straat, AMSTERDAM

37-39 Maiden Lane, NEW YORK

with its well-arranged diamond-set base. Americans will be interested to learn that a fine piece of Kunzite valued at 500 guineas also forms a great attraction, while a necklace composed of 13 pearls of perfect shape and fine color is placed at £25,000.

Messrs. Elkington & Co., although they cannot claim the antiquity of the Garrards, have nevertheless a name which is of world-wide reputation. The method of electro-deposition, which revolutionized the trade and superseded the older method of "Sheffield plating," was early exploited by this firm to no inconsiderable extent, and their name is to be found in practically every museum as the electro-copyists of antique silver and gold. At this stand, the largest in the Palace, are finely modeled busts of His Majesty King Edward VII. and Queen Alexandra, while an object attracting all visitors is the fine cup presented by the ancient city of Westminster to the city of Paris. Presentation cups of all kinds help to make a most imposing exhibit, while the massive silver challenge shields presented to different British warships, together with the magnificent silver challenge trophy of the National Rifle Association, add to the handsome and artistic arrangement of the *tout ensemble*, which is heightened by the rich dashes of color given by the gold caskets the firm has from time to time made for presentation to celebrities.

At the stand of Mappin & Webb is shown the great silver gilt Coronation Cup made for the Benchers of the Middle Temple, the great lawyers' corporation, a fine trophy of cutlery supported by a handsome pair of ivory tusks, a cabinet of George III. cups, and in the case of diamond-mounted work is shown a blue diamond of good color valued at 1,000 guineas. There are also several good examples of diamond tiaras and necklets.

At the flower-decked stand of the Goldsmiths & Silversmiths Co. are some choice specimens of both the silversmith's and goldsmith's crafts, and the gold casket presented by the city of London to the French President, M. Fallières, naturally formed an item of considerable interest. Several well-wrought copies of antique silverware make a telling exhibit, which is enhanced by the good taste and skilful execution of the diamond-mounted jewelry shown and the well-matched diamond and pearl necklets which this house is noted for. A magnificent Burma ruby weighing 11½ carats, valued at 10,000 guineas, a rope of pearls priced at £11,500, a corsage ornament with a fine pearl center valued at £3,000, and a sapphire and diamond pendant with a magnificent pendeloque diamond valued at £4,350, are only items in this varied exhibit.

Catchpole & Williams exhibit the "Medicis" collar which made such an attraction at the Milan Exhibition; it is composed mainly of diamonds and rubies with pearls helping to give relief to the whole. This is a clever piece of constructive diamond mounting, but it gives one the impression of a horse collar, and it is difficult to imagine even that it can look effective or feel by any means comfortable when worn by a lady. I hear the Maharajah of Nepal tried in on!

The Association of Diamond Merchants make a good show of jewelry, while S.

Smith & Son, who occupy the same stand, exhibit some fine watches and clocks.

(To be continued.)

#### Our Commerce in Jewelry, Silverware and Kindred Lines With West Indies and South America.

WASHINGTON, D. C., Aug. 14.—A hasty glance at the markets and possible openings for trade to be found in the immense area to the south of us we find, for the size of the place, a very good market for jewelry and plated ware in Bermuda. Taking the principal sources of supply we find that we have the major portion of the trade, \$10,886, while the United Kingdom ran us very closely for second with a value of \$10,307, Canada coming in with a value of \$6,151. It is also worthy of note that this is a steadily growing market. This is also true of Jamaica, where we have a steadily increasing market in cutlery, although we are not yet the dominant factor.

In Martinique we find a decreasing market for American goods, and one of the most important reasons for this is to be found in the freight and passenger communication, both of which are largely better with France than with our own country. This is amply evidenced by the fact that during the year of 1906 the imports of clocks, silverware, etc., from the United States were valued at only \$718, while from France they were \$19,860.

Our trade with Haiti, according to the latest returns, is gradually increasing; this is true of the imports of table cutlery and jewelry. This is due, to some extent, to the fact that the merchants find we are paying greater attention to both packing and patterns.

So much for the trade of the West Indian Islands. Turning to South American countries we find ever widening fields with many active competitors in all lines of business. Argentina is in a prosperous condition, owing to her fine agricultural uplift of the past two years. The market there for American clocks and watches is showing marked improvement, the value for 1906 being \$71,761, as against \$65,337 in 1905.

In Brazil there are wonderful possibilities for increasing trade which we are steadily allowing the "other fellow" to monopolize. Great Britain and Germany are steadily increasing their hold on Brazilian markets. That it is a growing country may be readily imagined if we remember that as between the years 1905 and 1906 there was an increase in its foreign trade of \$57,250,000, and the greatest increase in imports was in manufactured materials.

Among the principal exports of Brazil in 1906 were precious stones, the value being \$807,700, as compared with \$345,900 in 1905. Clocks and watches were among the principal items of importation, and showed an increase for the same years from \$319,596 to \$351,130. The diamond exports from Bahia in 1905 were only valued at \$76,598, of which it does not appear that any part were shipped to the United States; in 1906 the total value of these exports was \$188,253, or more than double those of the year previous, and of that sum \$5,073 came to the United States. From the same city the

shipments of precious stones shows an increase from \$22,995 in 1905 to \$75,504; no part in either year came to the United States. The principal imports at that port include clocks from the United States and plated ware from Germany, while Switzerland supplied the watches. In this, as well as in all other ports of Brazil, the United States is at a distinct disadvantage compared with European countries in the matter of transportation facilities.

Turning to British Guiana we find that the exports of diamonds fell from 5,585 carats in 1905 to 4,330 carats in 1906, about one-fifth came to the United States and the remainder to England.

Colombia is another country in which there are excellent opportunities for American trade; and among the resources of the country are gold, silver and emeralds, all of which only await transportation facilities to be developed on a large scale. The principal contestants for Colombian markets are Germany, United Kingdom, United States and France.

One of the great sources of ivory nuts are the South American countries. The value of these exports from Ecuador in 1906 was \$1,307,669, of which \$449,950 came to the United States. Colombia imports jewelry to a limited extent. In 1906 the value of those imports was \$19,509.

If only attention is paid to three points—packing, detail requirements and transportation facilities—there is an opportunity for largely increased markets for American jewelry, table cutlery, glass and crystal ware and jewelry in all South American countries.

#### Exports of Jewelry, Clocks, Watches, Silverware and Kindred Lines from the Port of New York.

WASHINGTON, D. C., Aug. 12.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

Acajuto: 1 case watches, \$100.  
 Accra: 1 case watches, \$125.  
 Bombay: 47 cases clocks, \$960.  
 Bremen: 1 case plated ware, \$200; 2 cases jewelry, \$280; 1 case watches, \$1,796; 2 cases optical goods, \$155.  
 Buenos Ayres: 4 cases watches, \$1,625; 1 case jewelry, \$270; 2 cases thermometers, \$136.  
 Calcutta: 1 case watches, \$240; 25 cases clocks, \$260.  
 Colon: 3 cases plated ware, \$245; 1 case watches, \$274.  
 Guayaquil: 1 case jewelry, \$250; 1 case clocks, \$225.  
 Havana: 2 cases jewelry, \$321; 2 cases optical goods, \$100; 7 cases clocks, \$133.  
 Havre: 4 cases plated ware, \$500; 4 cases jewelry, \$854; 3 cases optical goods, \$256.  
 Liverpool: 1 case jewelry, \$500; 18 cases clocks, \$1,093; 1 case watches, \$200; 1 case jewelry, \$700; 3 cases jewelers' sweepings, \$500; 8 cases jewelers' ashes, \$6,500; 63 cases clocks, \$4,232.  
 London: 49 cases clocks, \$1,610; 13 cases optical goods, \$3,394; 7 cases thermometers, \$172; 3 cases watches, \$1,046; 81 cases clocks, \$2,143.  
 Manila: 7 cases clocks, \$181; 3 cases silverware, \$627.  
 Melbourne: 342 cases clocks, \$263; 6 cases optical goods, \$755; 86 cases plated ware, \$6,665; 12 cases watches, \$662; 19 cases clocks, \$200.  
 Oporto: 10 cases clocks, \$110.  
 Rangoon: 10 cases clocks, \$130.  
 Sheffield: 13 bbls. jewelers' sweepings, \$4,585.  
 Sydney: 57 cases clocks, \$524.  
 Southampton: 30 cases clocks, \$1,050; 17 cases watches, \$2,561; 1 case optical goods, \$257.  
 St. Miguel: 10 cases clocks, \$88.  
 Tumaoco: 1 case jewelry, \$118.

**AMERICA'S  
NEWEST GEM :: AMATRICE**

The most remarkable, beautiful and individual matrix precious stone ever offered to jewelry wearers. Color and matrix polish equally No porosity or roughness. Amatrice positively does not fade or change color.

No retail stock is complete without an assortment of Amatrice jewelry in gold mountings.

Wonderful individuality in matrix effects. Exact duplicates do not exist, but beautiful matching effects for sets are obtainable.

Retailers should require manufacturers to supply different types in each lot bought, as the range of color combinations and innumerable matrix effects appeal strongly to the individual buyer.

If your regular manufacturers do not offer Amatrice jewelry, write us and obtain list of first-class manufacturers who will meet your requirements.

**John F. Murphy, Dawson, Pa., Files a Voluntary Petition in Bankruptcy.**

PITTSBURG, Pa., Aug. 13.—John Franklin Murphy, of Dawson, Pa., has filed a voluntary petition in bankruptcy in the United States District Court, in this city. In his schedules he says his liabilities are \$15,481.16 and his assets amount to \$13,146.55.

Mr. Murphy is a well known jeweler, having been in business in Dawson since 1897, and his failure occasioned some surprise. He has a long list of creditors. Those whom he owes more than \$25 are as follows: Bessie O. Murphy, assignee of the judgment of M. A. Kiefer vs. J. F. Murphy, \$351; H. T. Cochran for money loaned, \$300; Marsh, Brown & Mather Co., \$1,061; West, White & Christy, \$748; First National Bank, Connellsville, \$800; A. J. Cochran and E. F. Hutson, \$500; J. L. Cochran, \$340; Samuel F. Sipe, \$680; Heeren Bros. & Co., \$800; Goddard, Hill & Co., \$798; Youghiogheny National Bank, \$2,000; First National Bank, Scottdale, \$1,000; George M. Strickler, \$500; First National Bank, Dawson, \$1,200; N. J. Miers, \$46; Webb C. Ball Watch Co., \$229; N. H. White, \$120; Biggard & Co., \$123; W. A. Pickard, \$61; Thomas D. Murphy, \$68; F. F. Evans, \$130; W. J. Reed, \$50; W. H. Cochran, \$205; Dawson Supply Co., \$55; Harry Cochran, \$350; J. S. Laughrey, \$96; First National Bank, Vanderbilt, \$150; H. T. Cochran, \$1,350; Youghiogheny National Bank, \$500.

In his schedule of assets he says that he is the owner of a house and lot in Laughlin St. valued at \$4,500. The lot has a frontage of 50 feet and there is a two-story residence on it. He also holds a judgment note given to him by W. H. Cochran for \$1,000. His stock of jewelry is put in at \$6,000. He also says he owns 10 shares of the Cosmopolitan Coal Co., valued at \$400.

His schedules also show that he holds insurance policies in the following companies and societies for amounts as follows: Equitable Life Assurance Society, \$4,000 (20 payment policy); Mutual Life Insurance Co., \$1,500; Royal Arcanum, \$3,000; Loyal Addition, \$1,000; Modern Woodmen, \$3,000; Order of Iroquois, \$1,850; Americus, \$500; Knights Templar Aid and Masonic Association, \$2,000. These insurance policies are not included in his assets.

The court took the petition and has referred the affairs of the bankrupt to J. G. Carroll, of Uniontown, for adjudication.

**Bankruptcy Petition Filed at Pittsburg, by Edward Francis Stewart.**

PITTSBURG, Pa., Aug. 14.—Edward Francis Stewart, doing business at 4303 Butler St., has filed a voluntary petition in bankruptcy. He says his liabilities are \$3,918.61 and his assets, \$1,988.75.

In his schedules Stewart sets forth that he is indebted to the following creditors: Laura Stewart, \$200, for wages; rent, \$580; H. M. Smith & Co., \$33; Kaufman & Rothschild, \$232; P. H. Aronschids, \$116; A. Covert, \$25; Henry Terheyden, \$27; Kingsbacher Bros., \$500; Mr. Hahn, \$100; Mary C. Stewart, note, \$543, on which an execution has been issued; International Silver Co., \$40; Pioneer Cut Glass Co., \$43; C. F.

Munroe Co., \$159; Adolph Goldsmith & Son, \$50; Heeren Bros. & Co., \$191; Berr Bros. & French, \$56; Louis Kaufman & Co., \$168; Milton Herzog, \$162; S. Dabis & Co., \$25; Grafner Bros., \$35; Biggert & Co., \$335. Mr. Stewart says that his outstanding book accounts amount to \$335.

An order adjudging him a bankrupt has been made by William R. Blair, the referee in bankruptcy for this district.

**Improvement in the Gem Markets of London and Antwerp.**

**S**PEAKING of the improvement in the gem market of London, the *Jeweler and Metakworker*, of that city, says in its last issue: "During the last few weeks it seemed as if dealers and manufacturing jewelers were doing their utmost to make up for the slackness from which they have previously suffered. From several quarters reports have reached us that fair business has been done during the last part of the month in various branches of the gem trade. As regards the diamond branch business was done in very small-sized stones, and also in the good *melées*, and we have good reason to state that prices have gone up slightly, and there was a better tendency to buy.

"Almost every week during the last few months a great number of Continental dealers have arrived here, mostly from Amsterdam, but also from Antwerp, to buy rough diamonds, among whom are to be found those who are importers of large-sized stones. The demand for big polished stones will therefore be better in future, and we may state on good authority that very soon the London market will buy large-sized stones. Of course, it is impossible to say for what market they are intended. They may be for the American market, and bought merely on speculation in view of a good Christmas season in the United States; or it may also be they are for the European markets, among which Russia was notable some years ago, and is still, for the diamond and jewelry trade. The outlook in Russia, though still far from prosperous, has not become worse till lately; and, as your readers may know, financial facilities to be given to this country by England and France are now being arranged. Therefore, a better demand for diamonds may be expected at the Russian market which, in the diamond trade, is a great rival to America. Trade at the colored stones branch was fairly good during the month. Special inquiry is still made for large amethysts in various shapes, providing they are of good color, and our leading jewelers who are displaying just now a fine collection of the same are already arranging to make up stock for the Christmas season, which they will begin to do soon after the midsummer holidays, as they expect a great demand during the Winter in this branch of the gem trade. Good opals in large sizes are also meeting with a ready sale."

A cable dispatch from London, Aug. 8, to New York papers stated as to the condition in Antwerp:

"A well-informed Antwerp correspondent states that the crisis which has been well-nigh suppressing the diamond trade in

Antwerp for several months is diminishing speedily in intensity and will probably have come to an end by October next.

"Some important American orders of cut diamonds have again been placed with Antwerp tradesmen, and it is anticipated that the trade speedily will be up to its normal conditions."

**Involuntary Bankruptcy Petition Filed Against Solomon Seleznick, Pittsburg, Pa.**

PITTSBURG, Pa., Aug. 15.—An involuntary petition in bankruptcy was filed this week against Solomon Seleznick, trading under his own name and as the Liberty Jewelry Co., the claims amounting to \$558.42. The petitioners are: Freudenheim Bros. & Levy, creditors for \$355.50; Fontneau & Cook Co., \$67.50, and the McKee-Jeanette Glass Co., \$31.85. The petition sets forth that Seleznick allowed the First National Bank, of Pittsburg, to obtain judgment against him for \$568.34 in Common Pleas Court No. 4, thereby making the bank a preferred creditor. The petitioners asked for the appointment of a receiver, and the court named Simon Sher, who filed a bond of \$5,000 for the discharge of his duties. Seleznick waived a subpoena and consented for the appointment of a receiver. The bankruptcy proceedings have been referred to William R. Blair, referee in bankruptcy, for adjudication.

Seleznick was also engaged in the tailoring business in the Murtland building, Sixth Ave. and Smithfield St. His jewelry store is situated at 976 Liberty Ave., being in close proximity to the Union Station, and is well equipped with fixtures. Just what Seleznick's liabilities are could not be learned. Mr. Seleznick has been in the jewelry business many years and was formerly connected with the Pittsburg Jewelry Co., of which his brother is the head. He started in business for himself in 1901, and opened stores in Pittsburg and Cleveland, O., and later one in Allegheny. He discontinued all branches but the one on Liberty Ave.

# Modern Cameos

The first samples of the MODERN CUT CAMEOS were brought over by us about two years ago.

Confident of the ultimate success of the stone we never tired in our efforts to acquaint the trade with its merits. Its immense popularity now attests to our correct foresight.

The same effort has been exerted on the other side in improving the quality as well as securing an adequate supply. We have succeeded also in this respect, and our Cameos are unexcelled in the matter of superior engraving, and precision of size and finish—and at right prices.

ONYX CAMEOS in MODERN and CLASSIC DESIGNS on hand in all sizes and colors for immediate delivery.

### Career of the Late John Harriott.

Boston, Aug. 15.—The funeral of John Harriott, the pioneer manufacturer and engraver of modern society emblems, charms and kindred jewelry products in this city, who, as noted in the last issue of the CIRCULAR-WEEKLY, died, Aug. 8, after a brief illness from Bright's disease, took place, Aug. 11, with services at the chapel in Forest Hills cemetery, followed by interment there in the family lot. The funeral was largely attended by relatives and friends and by his business associates in and about Boston. Many beautiful floral tributes, attesting their esteem and regard, were banked about the altar of the chapel.

Mr Harriott's death is the culmination of a series of deaths in the family in a short period. In the past four years he had

THE LATE JOHN HARRIOTT.

lost his father, one of his sons, a daughter and granddaughter. These losses, with other sickness in his family, no doubt contributed to his last sickness and death, which, coming as it did, greatly shocked all who had known him. He was able to be about the house, although in failing health, until the very last day of his existence.

Mr. Harriott is survived by a widow and one son, Alfred T. Harriott, jeweler, of Norwood, who was for 14 years associated with his father in the business, and two brothers, James, of Concord, N. H., and Harry, at whose house he died, also by a little great-granddaughter. Mr. Harriott was a member of Mt. Hermon Lodge, A. F. & A. M., and Mystic Royal Arch Chapter, of Medford, Mass.

Thomas C. Harriott, the nephew of the deceased, who was employed at the Winter St. establishment, is temporarily in charge of the establishment. It is possible that either the son, Alfred T., who has conducted a retail jewelry store in Norwood for several years, or the nephew, Thomas C., may succeed to the business of the deceased.

Mr. Harriott, who was born in England in 1839, came from a family of jew-

elers and engravers, being a direct descendant of George Heriot, jeweler to King James at London. Having graduated from the finest art school in Birmingham, the art city of England, and having thoroughly mastered the applied art of engraving, he came to America in 1861, introducing into this country what is known as bright-cut engraving. A few years after his entry into this country he established an engraving shop on Winter St., Boston, moving shortly afterwards to 3 Winter St., where he commenced manufacturing lodge and society jewels and badges, remaining at this place until his death.

### Death of Harrison A. Williams.

ATTLEBORO, Mass., Aug. 17.—Harrison A. Williams, one of the pioneer jewelers of Attleboro, died Friday at a Taunton hospital, where he had been for several weeks. He had been in ill health since the death of his wife a year ago.

Mr. Williams was born in Mansfield, Sept. 22, 1822. He was one of the earlier jewelers at Attleboro Falls. His first venture into business was in the concern of Bates, Capron & Williams in 1858. One of the partners, the late Joseph M. Bates, later became the wealthiest citizen of Attleboro. The firm later became known to the trade as Sherman, Capron & Williams and did business in Mansfield. Just as the Civil War broke out the firm removed to Attleboro. The war was hard on the finances of the concern, and like many other firms of that day it went to the wall. Immediately after the war Mr. Williams resumed manufacturing in Mansfield, but the factory was destroyed by fire. Mr. Williams was known as the originator of horn and shell jewelry which was in great demand years ago.

Mr. Williams married Abby Jane Richardson, a member of Attleboro's best-known families.

The funeral was held Sunday afternoon from his home on East St., Mansfield, where deceased had lived for many years.

### Death of Robert Bradley.

PROVIDENCE, R. I., Aug. 13.—The funeral of Robert Bradley was solemnized from his late residence, 411 Prairie Ave., yesterday afternoon in the presence of a large gathering of relatives, friends and former business associates. His death removes one of the oldest manufacturing jewelers in this city, although he had not been an active participant in business for several years.

Mr. Bradley was born in England in 1826, but came to this country with his parents while quite small. For a number of years before he became interested in the manufacturing jewelry business he was clerk and afterward general manager of the Valley Bleachery on Valley St., in this city. In 1883 his son, Robert, Jr., who had gained considerable experience as foreman in one of the large manufacturing jewelry shops, desirous to enter the manufacturing business on his own account, prevailed upon his father to join him in the venture.

They first located at 28 Potter St., now Garnet St., but their business rapidly outgrew their facilities, and the following year they were forced to remove to a large

shop at 227 Eddy St., where they remained until 1899 manufacturing solid gold jewelry with imitation diamonds and real pearls, garnets, doublets, etc. Previous to the discontinuance of the business the firm name was changed to Robert Bradley & Sons by the admission of a second son, Richard, to the copartnership.

### Creditors File Involuntary Petition in Bankruptcy Against R. S. & J. D. Patterson, Port Huron, Mich.

PORT HURON, Mich., Aug. 12.—An involuntary petition in bankruptcy has been filed against the firm of R. S. & J. D. Patterson, jewelers, at 911 Military St., by attorneys acting in the behalf of the Jewelers Board of Trade, New York, and J. Frank Wilson, of the law firm of Moore & Wilson, this city, has been appointed receiver on the application to the United States Court in which the petition is filed. The bankruptcy proceedings result from the fact that J. D. Patterson refused to sign the regular extension agreement proposed by the Board, to which extension the creditors, as well as the debtors, had practically agreed at a meeting held in New York recently.

The liabilities are roughly estimated at \$30,000 and the assets at over \$15,000, but exactly what the condition of the affairs is cannot be learned at the present time, and, in fact, it may take an investigation to determine the amount of the liabilities as well as the assets. If the mother of J. D. Patterson is considered a partner, or as having an interest in the business, the financial condition of the debtors will undoubtedly be good, but if she is declared to be a creditor of the concern instead, this will augment the liabilities and take away from its resources as far as the other creditors are concerned.

The business which has been owned by the estate of the late Reuben S. Patterson and Jesse D. Patterson was begun about 1870 by R. S. Patterson, who was later joined by J. D. Patterson about 1894. The firm first known as R. S. Patterson & Co. was changed to R. S. & J. D. Patterson about 1896, by which it has since been known. The senior member died in February, 1904, but his interest in the business was continued by his estate. The firm handled jewelry, books and other lines.

### Death of Louis M. Weinbrecht.

ST. LOUIS, Mo., Aug. 14.—Louis M. Weinbrecht, one of the pioneer uptown jewelers of this city, died, Tuesday morning, at his home, 5969 Easton Ave. He was 34 years old, and was much esteemed by the trade in this city. His shop was beneath his home on Easton Ave.

Mr. Weinbrecht had been ill but a short time. He is survived by his widow, Mrs. Louisa Weinbrecht, and three daughters, Helen, Edna and Emma. The funeral was held Thursday afternoon, Aug. 13, from the undertaking parlors of George L. Pleitsch. Burial was in Bethania Cemetery.

G. A. Broquist recently began business in the Martin building, Aurora, Ill., to which place he moved a short time ago from Batavia, in the same State.

## Pennsylvania Retail Jewelers in Convention.

Indorse Doctrines Established by National Convention and Win Many New Members.

PHILADELPHIA, Pa., Aug. 11.—The third annual convention of the Pennsylvania Retail Jewelers' Association was ended last night when the jewelers, and the delegates and guests to the 11th annual convention of the American Association of Opticians, dined at Belmont Mansion, both forming an assemblage of nearly 1,000, and contributing to make one of the most successful trade dinners ever held.

The convention hall of the American Association of Opticians and the Pennsylvania Retail Jewelers' Association in Musical Fund Hall, 8th and Locust Sts., was shared by both jewelers and opticians. Starting their convention Monday, the op-

IRA D. GARMAN, PRESIDENT-ELECT.

tion of further legislation to prevent cheats and humbugs from deceiving both the retail jewelers and their patrons, was presented to the convention: "The filled Case Bill has passed (into the waste basket) because many feared that it would not fill the need of a bill to prompt makers to produce filled cases to meet the need for jewelers. Would a filled jewelry bill that requires makers to indicate the proportionate amount (1-10 or 1-4, etc.) of gold or silver contained, with or without specific time guarantee, be a good thing for the jeweler and the public? Ought State governments to provide inspectors of weights, measures and qualities for all merchandise, including jewelry?"

Just when the discussion of this question was becoming acrimonious and when it appeared that the Pennsylvania Retail jewelers would adopt resolutions advocating legislative measures to prevent the sale of "phony jewelry" and especially watch cases with long time period guarantees, but which last only for short periods, Ira D. Garman made the point that no legitimate jeweler could possibly be deceived and that finally it was up to him to make sure that he was selling the goods that his patrons sought to buy. Then Wm. J. Benn reminded the retail jewelers that an entertainment had been provided for them and 'buses were then waiting for them. Thereupon it was agreed to drop the matter with the passage of a resolution declaring that the Pennsylvania Retail Jewelers Association meant to help in every way the movement inaugurated by the national association of retail jewelers to prevent impositions on themselves and the public in the matter of filled goods and plated ware.

The opticians had been in session and had transacted a great volume of business in two days before the convention to the Pennsylvania Retail Jewelers Association was called to order Wednesday morning at 10 o'clock by A. C. Graul, of Pittsburg, its president. Mr. Graul, made enthusiastic by the success of the annual convention of retail jewelers in Cincinnati, last week, launched forth boldly into insistence upon the cementing of business relations between retail jewelers. "The time has come," said he, in his introductory remarks, "when we must all of us appreciate that we needed united support to protect ourselves as retailers. We should be cemented as a body, so that we may favor or oppose legislation. It will be needful, I fear, in the near future to take such steps as will place us in a position where we may buy and sell what we ask for, and what our customers desire and not be forced to take such goods as may be sold on false guarantees. I am pleased to tell you that the Pennsylvania Retail Jewelers Association has increased its membership nearly 200 per cent. during the year. It is now a fairly representative body of the trade of the great Commonwealth of Pennsylvania."

Mr. Graul explained that Col. J. Warner Hutchins, president of the Philadelphia

Jewelers' Club, was unavoidably absent from the city and could not make the address of welcome to the visiting State jewelers, but Ira D. Garman, of Philadelphia, who was chairman of the entertainment committee, of the association, would do so.

Mr. Garman made a brief address of welcome, in which he said: "I wish, on behalf of the people of Philadelphia, as well as on behalf of all the jewelers, to extend to you the best wishes of the trade here, and to assure you that you will have every hospitable endeavor made to insure you a pleasant stay while here. We wish to make our State retailers' association something to be proud of, and I am sure we are going to do so." Mr. Garman added that "out-of-town retail jewelers would find Philadelphia one of the greatest cities of the country."

Following Mr. Garman, the secretary, C.

J. WARNER HUTCHINS, FIRST VICE-PRESIDENT.

S. Wiley, of Pittsburg, presented his report as follows:

East, west, north, south, wherever you look, jewelers' associations are springing into existence over night. Why? There must be a reason for this unusual move on the part of our fellow craftsmen. Does he feel the need of social intercourse? Has he not always taken part in the social and fraternal societies of his community? Yes, but there is something deeper than even his social enjoyments. He has found at last his business interests have suffered. He has always been a good social fellow, and while he enjoyed himself the mail-order and department stores and a dozen other interests have stolen away much of his legitimate trade, but he awakens and is combining with his brother, who has also suffered and is ready to win back that which is his own.

Our own association is now two years old. At our initial meeting, July 10, 1906, 18 members were enrolled. At our annual meeting last year 46 was the number. We have to-day 122.

During the year your executive committee has met in executive session seven times.

I am not prepared to give the number of pieces of mail matter consisting of letters, circulars, postal cards, etc., sent out, but it will run up into the thousands.

For our last two annual meetings we have sent out 216,000 pages of programmes, weighing nearly a ton.

Our association has been at a disadvantage in not having the number to work out as much good as we had hoped, but soon the steady, persistent work that is being done will reward us with a large enough membership to accomplish much good. While we as a State association cannot point out

ticians crowded the hall with exhibits and the jewelers took possession of such space as was left. From all parts of the country, as well as from Pennsylvania, came jewelers to attend the two conventions, and S. O. Bigney & Co., the South Bend Watch Co., the Keystone Watch Case Co., the L. E. Waterman Co., and the Philadelphia College of Horology, added their displays to those of the manufacturing opticians and helped to make Musical Fund Hall fairly hum with the rattle of machinery and buzz with trade, and shop talk from Monday until yesterday.

The Pennsylvania Retail Jewelers' Association placed itself on record as favoring the consummation of legislation proposed at the annual convention of the national association of retail jewelers in Cincinnati. A. C. Graul, outgoing president of the association; William D. Haines, of this city; S. C. Wiley, Pittsburg, and J. P. Archibald, of Blairsville, Pa., all urged the passage of laws to compel manufacturers of plated ware, both silver and gold, to stamp such articles manufactured by them, in a manner to positively define their intrinsic value.

This was the manner in which the ques-

much we have done, our national body has corrected much that was detrimental to the trade.

Since our last annual meeting we have added 72 to our membership. During the year we have lost one member by death, Fred Quartier, of Seltsburg, making two deaths since our organization. Three have resigned, one on account of leaving the State, one discontinued business and one who did not disclose his reasons.

We believe that until we are stronger than only by a personal canvass can any great number be added to our association, while many feel kindly towards us it takes personal contact and argument to bring results.

There have been very few complaints sent in to the secretary by our members; several have been made by jewelers outside our association in regard to price-cutting on goods with a minimum resorted selling price, but upon investigation we have found the matter either a mistake or the dishonest dealer had been cut off.

We feel the association has made a decided advance in the last year and is the banner State in point of increase. With 1,600 or 1,700 retail jewelers to draw from, what say you, shall we go on until we have the vast majority?

Mr. Wiley then announced the following new members secured since the opening of the State retail jewelers' booth on the floor of the optical association's exhibit hall: Daniel A. McMaster, Arondale, Pa.; E. M. Dickinson and Wm. E. Kelly, Galeton, Pa.; Emil Holl, Media; B. F. Freeman, West Chester; Josiah Heckler, Mainland; Theodore Lassen, Germantown; A. N. Peoples, Chester, Pa.; H. M. Patterson, 20th and Federal Sts., this city; Gus. Reitzen, Ashland, Pa.; E. J. Weider, Jr., Pennsburg; Wm. Gibbons, Philadelphia; John A. Kinsler, Philadelphia, and B. F. Geist, Pottsville.

It was after the routine business and formal addresses and reports of the executive officers of the association had been read, that the discussion took place over the proposed legislation to require manufacturers of filled goods and plated ware to stamp their products in such a way that the amount of gold or silver contained in the imitation goods could be known.

In making out the complaint of the retailers, Mr. Graul, the president, said:

A great deal of filled and plated goods is offered to the public with time guarantees which are worthless. Pledges as to guarantees are made for everything under the sun. In our business this encourages only the illegitimate dealer to the permanent injury of the legitimate dealer. We must do our best to avoid this illegitimate competition. We must kill it for the sake of our reputations. It may be our ruin some day. Think of watch cases guaranteed for 20 years and sold to a credulous public turning black in 30 days. It is only a rascal who will take advantage of a gullible and unsuspecting public by the sale of these goods, but our only weapon of defense is the passage of such a law which will make it a criminal offense for any manufacturer to falsely stamp even plated and filled ware. The legitimate retail jeweler has sought long, earnestly and I think successfully to educate the public to a rare appreciation of artistic jewelry. We know something about good jewelry and we endeavor to handle only the best. But in comes the mail-order man with his "phony" jewelry, which is sold everywhere and helps to undo much that we have so long and so earnestly endeavored to correct. We do not wish to antagonize the manufacturer. We should seek to approach him diplomatically, but nevertheless with the view in mind of requiring him to be responsible in every way for the goods he sells us and permits us to sell to our customers. Heretofore, as retailers, we have been practically strangers to each other; now let us know each other and be friendly. It cannot hurt any of us. We are in business to remain. It is our calling. But we can help each other wonderfully by uniting and seeking to protect our rights. As things go to-day the illegitimate jeweler has the advantage of the legitimate retailer. He may sell these crude imitations of watch cases with a 20-year, a 25-year or a so-called permanent guarantee. A certain silver plated

ware concern admitted to me recently that their guarantees as well as those of most other silver plated houses were in fact humbugs. Now then shall we be called lagging in our duty?"

William D. Hames, of this city, echoed the sentiments of Mr. Graul. He demanded also laws to require manufacturers to stamp their filled and plated goods so that the proportion of gold or silver used in the making might be known. He declared that he knew of the sale of watches, whose cases were guaranteed for years, but which turned black in 30 days. C. S. Wiley, of Pittsburg, also spoke in a like vein.

Ira D. Garman made a brief but pithy speech which quieted apprehensions on the part of most of the delegates. He said: "This is a very grave subject. I do wish you would not act hastily. I don't think that any one of us here would sell the goods of which we are complaining. We

C. S. WILEY, SECRETARY.

deal openly with the manufacturer. We look to him to protect us, and for the best part he does. We know enough to tell whether a case for a watch is guaranteed properly. We should and do know the materials we buy and we should and do know the manufacturer with whom we deal. He would not be in business long if he deceived us often. It is to his advantage to sell only lasting goods and to our advantage to see that they do last and our customers are not disappointed. We make our profits because we are able to hold our trade. This we could not do if we were deceived by the manufacturer or if we deceived our patrons."

W. J. Benn here interrupted the discussion with a reminder to the delegates that an entertainment in the nature of an automobile ride was in readiness. He suggested an early adjournment that this treat would not be missed. President Graul said, somewhat heatedly: "We are here to transact business and we must and shall get through with it. It is delightful that the local entertainment committee is so hearty and agreeable, but I am sure none of us wish to take joy rides when we have work ahead of us." The discussion was thereupon continued until it was finally decided that the association should indorse

the legislation advocated at the Cincinnati convention.

I. A. Deisher delivered at the session Wednesday afternoon, a discourse, illustrated by blackboard drawings, and a card index system for keeping records of stock in retail jewelry stores. Mr. Deisher had cards to show, indicating how a complete and thorough record of all stock transactions, the acceptance of repair work, its letting to trade watchmakers or manufacturing jewelers, or its disposition in any other way might be accounted for. Philip Kind, of S. Kind & Sons, amplified the address of Mr. Deisher and joined him in advocating the adoption of a card system for stock-keeping by all retail jewelers. Both Mr. Kind and Mr. Deisher were warmly applauded and the delegates expressed the conviction that the time was ripe for a prompt adoption of a systematic keeping of stock accounts.

P. C. Yester, of McKeesport, Pa.; Geo. S. Rice, Pottsville; George S. Kratz, Phoenixville, continued later, Wednesday afternoon, the discussion concerning the proposed stamping law for gold filled goods and plated ware. But, after all was said and done, it was agreed to take no further action than had been taken at the morning session in making an endorsement of such legislative measures as had been proposed before the National Retail Jewelers' convention in Cincinnati.

With the delegates to the optical convention the jewelers who came to town especially to attend the joint conventions were entertained Wednesday evening at a smoker, given at the Optical Club of Philadelphia at 1416 Arch St. The late afternoon had been spent by many in visiting stores and in having group pictures taken.

#### THURSDAY'S SESSION.

By far the most interesting session of the association was held Thursday morning and afternoon. In the morning, C. T. Higginbotham, of the South Bend Watch Co., repeated the address delivered by him at the National Retail Jewelers' Association convention in Cincinnati, on "How to Locate and Correct Errors in the Lever Escapement." Mr. Higginbotham's address at Cincinnati was published in full in the Horological Section of THE CIRCULAR-WEEKLY, of the last issue. To many of the delegates at the Pennsylvania State convention the exhaustive analysis made by Mr. Higginbotham was heard for the first time, and aroused great interest and occasioned no end of theoretical discussion.

The session Thursday afternoon was perhaps the most pleasant of all. Col. John L. Shepherd, New York, had arrived, as well as Col. J. Warner Hutchins, president of the Philadelphia Jewelers' Club. Col. Hutchins and Col. Shepherd gave the Pennsylvania retailers a taste of the entertainments usually given at festive times in the calendar of the Jewelers' Club, and kept the delegates laughing all afternoon with one story and another.

J. P. Archibald, Blairsville, Pa., the newly elected president of the American National Retail Jewelers' Association, advocated the payment by the Pennsylvania association of the expenses of its retiring president, Mr. Graul. The latter was quick to oppose such action. He handed the

gavel over to Hugh A. Jackson and fought the proposition, spiritedly declaring that he was amply repaid for such expenses as he had undergone by the opportunities the office had afforded him to get acquainted with the trade. However, the sentiment of the entire body of jewelers was that Mr. Graul deserved something more than a happily-worded resolution, and he was made to accept the association's contribution to meet his expenses.

It was decided to increase the secretary's salary also from \$25 a year to \$75 a year. H. F. Seltzer, P. C. Yester, Ira D. Garman and others made complimentary remarks about Mr. Wiley, the secretary, who was then and there assured of re-election. It was declared that as the association grew the salary of the secretary would be annually increased.

After adopting resolutions praising THE CIRCULAR-WEEKLY for the complete manner in which the annual conventions had been reported and for the exhaustive and highly creditable report made of the recent national convention of retail jewelers in Cincinnati, and declaring that the daily press of Philadelphia had been more liberal in the space devoted to reports of the conventions of both the opticians and jewelers than has the press of any other city ever before been, the convention got down to the serious work of electing officers and selecting the city where it will hold its next meeting. Harrisburg was unanimously approved of as the city in which will be held the fourth annual convention of the Pennsylvania Retail Jewelers' Association.

Praising Ira D. Garman, chairman of the local entertainment committee of the jewelers for the liberality and whole-heartedness with which he and his colleagues, Louis P. White, Col. J. Warner Hutchins, A. G. Lee, and other of the local jewelers, the delegates united with acclaim upon Mr. Garman's election as their next president. Mr. Garman is a retail jeweler at 101 S. 11th St. He has been active in affairs of the Philadelphia Jewelers' Club, and is esteemed by the trade of this city as one of its representative men.

The newly-elected president at once assumed office and made a neat speech expressing appreciation at the honor accorded him. It had been proposed to elect J. P. Archibald, first vice-president, but he declined upon the grounds that he had just been elected national president.

Upon the arrival in the convention hall of Col. J. Warner Hutchins he was given an enthusiastic reception and was promptly decided upon as first vice-president, an office which he accepted in a speech declaring his conviction that the State retail jewelers' associations were destined to become formidable bodies of jewelers. The other officers were elected as follows: Second vice-president, P. C. Yester, McKeesport; third vice-president, I. A. Deisher, Reading, Pa.; fourth vice-president, F. C. Bode, Philadelphia, and fifth vice-president, W. F. Steinmacher, Pittsburg. A. C. Graul, the retiring president, and H. A. Seltzer, of this city, were elected members of the executive committee. This committee was empowered to elect another member. C. S. Wiley was re-elected secretary, and P. G. Diener, of Harrisburg, was elected

treasurer. Mr. Diener succeeds J. P. Steinmann, of Pittsburg, who had been unable to attend the convention on account of serious illness in his family.

Early Thursday afternoon the jewelers ended their convention in an exchange of pleasantries, in which Louis P. White, Colonel Hutchins, Colonel Shepherd and Ira D. Garman were leading figures, and then hastened to board trolley cars in the Sansom St. wholesale district which had been especially chartered and sidetracked there, to go to Belmont Mansion, in Fairmount Park, where a great banquet was given in the evening for both jewelers and opticians. The banquet was a joint festive gathering and plates were laid for 600 guests, including nearly every jeweler, great and small, in the optical and jewelry trade around this city. Colonel Hutchins presided as toastmaster and speeches were made by Col. Lewis E. Beiler, Colonel Hutchins, Colonel Shepherd, Archibald B. Millar, Governor Stuart's private secretary; Mr. Garman, Alexander Martin, Briggs S. Palmer, of Boston, outgoing president of the American Association of Opticians; John C. Eberhardt and J. P. Archibald, president of the American National Retail Jewelers' Association.

#### Convention Hall Chat.

Adelbert G. Lee, of the staff of the Howard Watch Co., who was here, was quite at home in Philadelphia.

H. F. Seltzer, of this city, returned from a vacation just in time to get busy at the second day's convention of the State retailers.

E. J. Thompson, of Sidney, New South Wales, was a visitor to the convention and exhibition halls and was given a cordial welcome, since he had traveled so far to attend the convention.

Emil Bracher and F. A. Peters, with the H. S. Meiskey Co., Lancaster, Pa., were given a cordial reception by the convention delegates. They were especially active about the booth of the "Community Silver" exhibit, and won many new friends.

E. J. Phillippi, of Riverside, Cal., hustled into the convention hall one day late, after having traveled over 4,000 miles with Mrs. Phillippi. After the convention Mr. and Mrs. Phillippi will end their travels by touring the Atlantic coast resorts.

Elmer Horn, of M. Sickles & Sons' material department, represented Louis Sickles, of the entertainment committee, on the exhibition floor. Mr. Horn had useful souvenirs to distribute in the form of memorandum books. Louis Sickles acted as the host of many out-of-town jewelers.

One fact is admitted by both opticians and jewelers, and this is that the daily press of Philadelphia exploited the convention in the most liberal sort of manner. Representatives of all the leading daily papers were constantly in attendance at the sessions of the opticians and the jewelers.

C. S. Wiley, Pittsburg, was so overwhelmed with compliments by the jewelers for his success in landing the Pennsylvania Retail Jewelers' Association firmly on its feet that he hurried away to seek the quietness of his room at the Continental, where he and President Graul were quartered.

Color was lent to the convention hall by the appearance of C. T. Weibezahn, who had charge of the exhibit of S. O. Bigney & Co., and which displayed the goods of that concern to full advantage. Mr. Weibezahn, "big as life," paraded the convention hall with his finger pointed warningly.

The Noble Ku-Kus left no stone unturned in their visit to Philadelphia to interest jewelers and opticians in the expansion of Ku-Ku to this city, with the result that Philadelphia Nest No. 8 was planted Wednesday night at the Continental Hotel. The question in the Philadelphia trade now is, are you a Ku-Ku?

Louis P. White, of the Board of Governors of the Jewelers' Club, was in charge of the registration booth. He had a hearty greeting for every visitor and seemed to know all by their Christian names. Throughout the day Mr. White had his automobile going at a lively rate for the special accommodation of the visiting jewelers.

C. D. Higginbotham, of the South Bend Watch Co., got into all kinds of arguments and debates with the assembled jewelers over the technical side of lever escapements. Late Thursday afternoon he became involved with a group of jewelers, and it required the combined efforts of his associates to assure him that the convention was over and that the exhibits must be displaced.

A bit of romance found its way into the conventions when Daniel La Chappelle, of Stockbridge, Mass., a delegate to the American Association of Opticians' convention, fell in love with Miss Viola G. Willoughby, a pretty Philadelphia girl, and straightway married her. Mr. La Chappelle had known Miss Willoughby in a Massachusetts town and there they had been friends. Miss Willoughby moved to this city four months ago, and has resided on Summer St. Mr. La Chappelle called to pay his respects. He immediately fell a victim to Dan Cupid and proposed. The marriage was solemnized in the Cathedral, 18th and Race Sts.

#### Receivership Proceedings Against H. I. Scribner, Columbus, O., the Result of Friendly Suits and He Will Resume Business.

COLUMBUS, O., Aug. 13.—H. I. Scribner, whose place of business was closed last week, has not "run away" from this city and abandoned his business, as the reports about his disappearance and the legal proceedings which followed would indicate. It appears that Mr. Scribner merely went off for a short vacation, but, the report being spread abroad that he had run away, several creditors filed attachment suits and made levies on his stock.

The receivership was asked for by parties friendly to Mr. Scribner and for the purpose of protecting his interests and countersuits have already been begun to secure the return of the goods carried off by the creditors above mentioned. The receiver is Winfield Packham, who was appointed Aug. 6, under a bond of \$1,500.

It would seem that a great personal injury has been done Mr. Scribner by the publication in the daily press of this unwarranted story. Nevertheless, he will return soon from the east and continue his business as formerly, according to advices received by his friends here.

B. Silverstone, Scranton, Pa., has been made the defendant in a suit for \$5,000 damages, brought against him for infringement on the patent or trade-mark of the E. Kirstein Sons Co., Rochester, N. Y., makers of the Shur-On eyeglasses as well as the Right Shur-On eyeglasses. An injunction has been asked to prevent the defendant from using the names mentioned. The plaintiffs allege that the defendant has made eyeglasses which he called the Shur-On, and that a few years later made another kind which he called the Rite Tite Shur-On.

**United States' Proposal to Canada for Prevention of Smuggling Accepted.**

OTTAWA, Can., Aug. 12.—The government of Canada has concurred in a proposal of the United States authorities for the reservation of a strip of land 60 feet in width along either side of the international boundary line between Yukon and Alaska. In its memorandum on the subject the Dominion Government has suggested also that steps be taken to make a similar reservation along parts of the boundary between the United States and Canada, which, besides extensive stretches of water boundary, comprises some 1,900 miles of land.

On the 400 miles summit of the Rockies the Government of British Columbia has already reserved a strip 66 feet wide wherever the land has not already been disposed of. East of the Rockies, under the original surveys, road allowances were left adjoining the boundary. These road allowances are no longer under the control of the Dominion Government, having now passed under the jurisdiction of the provinces of Alberta, Saskatchewan and Manitoba. The four provinces mentioned would doubtless agree, however, to make the reservation permanent, although to secure that end concurrent legislation by the United States or by the several states affected, to reserve a similar strip, would appear to be desirable.

The memorandum proceeds: "The minister states that along the line from the St. Lawrence River to the St. Croix River the natural difficulty of enforcing the lines of the two countries along an extensive boundary line is enhanced by the fact that the property adjacent to the line on both sides has passed into private hands, and at many points there exist so called 'line houses' which stand close to or upon the line, and which in many instances, as has been charged, have been used for smuggling or for evasion of the law to a serious extent. While it may not be practicable, by reason of the expense which it would involve, to apply the effective remedy of removing these houses altogether, it is a matter for consideration whether or not there are any steps which the two governments could take to prevent the erection in future of further houses of this kind.

The Dominion Government's views on the subject have been forwarded to the United States authorities through the British ambassador.

**Son of Providence Jeweler Escapes from Kidnappers After Being Held Captive 24 Hours.**

PROVIDENCE, R. I., Aug. 15.—Kidnapped in broad daylight by two strange men, carried to a tent in a swamp near the banks of Narragansett Bay, tied there and held captive until he effected his release 24 hours later, is the strange tale unfolded by 12-year-old Earle Griffith, to his father, Rufus K. Griffith, shipping clerk at the manufacturing jewelry establishment of R. L. Griffith & Son Co., a few days ago.

The little fellow was seen playing not far from his home during the early afternoon, but suddenly disappeared. When his father returned home later in the afternoon

a search was instituted, without success. The police were notified and the entire night was spent in the vain hunt for the missing child. The hunt was continued in the morning, but it was not until late in the afternoon that the boy, having succeeded in releasing himself, made his way out of the swamp and was found shortly afterward by his father. The little fellow when questioned concerning his prolonged absence related his story of his detention. The police made an exhaustive investigation and proved the truth of the boy's story, but were unable to obtain any trace of the men of whom he spoke.

**Arthur U. Wetzel, Minneapolis, Minn., Becomes a Voluntary Bankrupt.**

MINNEAPOLIS, Minn., Aug. 15.—Arthur U. Wetzel, a jeweler of this city, has filed a voluntary petition in bankruptcy in the United States Court. His schedules show liabilities of \$3,538, and assets of \$2,735. The sum of \$2,350 is claimed as exempt.

Wetzel, who was originally in business at Sacred Heart, Minn., was later at Heron Lake and came to Minneapolis about 1903. He carried a small stock, but his store at 85 S. 7th St. was always attractive.

**Trade Gossip.**

The silver anniversary of the Benedict Mfg. Co., East Syracuse, N. Y., is commemorated in a neat booklet issued by the company giving some valuable advice upon the selling of silverware and how to stock, display, lay out and advertise silverware of various kinds.

A quaint and well-printed booklet, describing "Ye Mount Vernon Pattern" of sterling silver table ware, is being sent to the trade by Rogers, Lunt & Bowlen Co., silversmiths, Greenfield, Mass. This booklet illustrates the various staple and fancy patterns in which the Mount Vernon pattern is made, besides containing an interesting descriptive preface on Mount Vernon.

**Hard Fight Being Made to Convict Providence Jeweler on Charge of Receiving Stolen Jewelry.**

PROVIDENCE, R. I., Aug. 15.—The supposition that the case against John Nelson, the North Main St. jeweler and former member of the Rhode Island General Assembly, charged with receiving stolen goods, knowing the same to have been stolen, would be hard fought, is being borne out by the facts. The case was called to trial before Judge Lee in the Sixth District Court yesterday afternoon and was continued to this morning, after occupying the greater portion of the afternoon and at 1 o'clock to-day, was further continued until next week. Attorney Albert B. Crafts for the defence brought up a point, which was new, that a case of receiving stolen goods could not be made against a man where the goods in question had been stolen in another State.

The trial began yesterday afternoon, when William J. Wallace, who has been convicted in Massachusetts of stealing the goods, consisting of one lot of plated chain links, valued at \$10.60; one lot of plated buckle rings, valued at \$5.60; one lot of fob chain buckle blanks, valued at \$2.40, and one lot of gold-plated scrap, valued at \$2.70, from the Fontneau & Cook Co., Attleboro, testified.

Wallace said that he took several chain links, gold-plated buckles, rings and gold scrap to Nelson. He met the defendant twice at a drug store on N. Main St., near Nelson's place of business, by appointment made over the telephone. He said he met Nelson four times in addition to two occasions that he went to Nelson's store.

The last lot of stuff that Wallace took to Nelson, he says, was delivered on the street. They met on the street, and upon receiving a signal from Nelson they walked past each other without stopping at first. After halting they walked toward each other, and when they met Wallace said that he handed to Nelson a coat that he was carrying on his arm, and Nelson asked if the stuff was in it and he answered in the affirmative. Before this he had delivered metal by handing Nelson a coat and Nelson paid him money at the time and afterward paid him something more once or twice on finding that there was more of the metal than he had estimated.

Wallace testified that he had been arrested, tried and convicted in Massachusetts for stealing the stuff turned over to Nelson and was fined \$20 and costs. He said he had been employed by the Fontneau & Cook Co., and took the metal from the bench where he worked.

Frank Fontneau, president; Frank E. Fontneau, vice-president, and Mr. Cook, treasurer of the company, testified to the value of the goods after they had identified them as being a pattern exclusively made for their concern. Charles Lee, foreman of the Fontneau & Cook Co., and Mr. Crowell, a gold refiner, also testified for the purpose of showing that the goods produced in court were from their shop.

J. C. Owen, of the Owen-Cotter Jewelry Co., Tampa, Fla., has returned from his vacation, which he spent at Henderson, S. C.

# GORHAM SILVER

¶ It has been the constant endeavor of the Gorham Company for more than three-quarters of a century to establish and sustain a reputation for only the best work.

¶ The Gorham name to-day stands for the accomplishment of this purpose.

¶ Our trade - mark is a guarantee of value as well as of the artistic beauty and distinction of the work that the best organized factory in the world makes possible.

¶ Buying now avoids the hurry attending the later season, and insures your getting the choice things you will need for the Holidays.

WITH the convention of the American Association of Opticians and that of the Pennsylvania Retail Jewelers' Association, both of which were held in Philadelphia last week, the convention season in the trade practically comes to an end, although the Arkansas Retail Association is scheduled to hold a meeting at Little Rock, Ark., Aug. 25, 26 and 27. However, the great majority of the organizations in the optical and jewelry trade have finished their work for the year, have elected officers, and are in a position to note the progress they have made, as organizations, as well as the good that has been done the members by meeting together in a fraternal way and exchanging ideas on business lines and getting away from the narrow routine of store life. There is little doubt that they will feel the experiment is one that they can afford to repeat many times.

THE annual convention of the American Association of Opticians in Philadelphia last week, while no doubt a success in regard to the number of the members who participated, and the work accomplished, had elements which caused some dissatisfaction to those who attended. There is no doubt that an effort will have to be made at future meetings to improve some features as to taking care of and holding the members together better; also to so join the educational business and entertainment features as to keep up the interest of the attendants continually. Unfortunately the weather was not propitious for comfort in Philadelphia during this session, and this tended to some lack of interest in the more serious proceedings that would not have been manifest under ordinary circumstances. The association, however, was able to accomplish certain good work, and this and the changes in the constitution and the adoption of a code of ethics are bound to strengthen the organization in the future and make its work more effective, as well as to make the privileges of membership more than ever desirable to the optometrist and the jeweler-optician.

**Work and Policies** THE third annual convention of the A. N. R. J. A. American National Retail Jewelers' Association, which was held at Cincinnati, Aug. 4 to 7, as reported in full in the last issue of THE CIRCULAR-WEEKLY, is now a thing of the past, and the work it accomplished a matter of history, but its proceedings will live long in the memory of those who participated, and there is little doubt that the convention will be considered in later years one of the most important that the association has held, no matter what be the future policies, plans or developments of the organization. It was not so much in the actual work accomplished by the gathering of the jewelers as the foundation which it laid for future work that will be the subject of the greatest comment by members and non-members alike. The keynote of the convention was "conservatism," particularly when contrasted with the two previous conventions of the organization, in which the "extremists" thoroughly dominated. What is more, the temperateness of the speakers and those who participated in the discussions indicated an earnestness of purpose and a sin-

The independence of The Jewelers' Circular-Weekly justifies the dependence which jewelers place upon it.

cere desire for the betterment of the craft that bodes well for the organization and the trade in general.

The resolutions of the convention from which the policies of the present administration and the members generally may be inferred, appear to have been passed only after having given careful consideration of the rights of all parties involved, or those who in any way will be affected by them, while properly insisting on certain reforms. A remarkable, and, in fact, noteworthy, feature of these resolutions is the group relating to "watch inspection" legislation, which, while nominally explaining the resolutions of the year before on the subject, practically rescind the latter in many particulars, and take away whatever backing the association might be considered to have given to the "watch inspection" bills which have been introduced into the various legislatures. The present resolutions justify the contention that THE JEWELERS' CIRCULAR-WEEKLY has continually made that the indorsement of the watch inspection bill by the organization did not mean that the jewelers were opposed to the watch inspection system, but that it was merely a crude attempt to make more perfect that which already existed. The organization has now not only put itself on record to this effect, but has gone to the extent of indorsing the watch inspection system as an incalculable benefit to the public safety, favoring its use and regretting that the organization's former actions should have been misconstrued. The organization is now officially on record as against State legislation on watch inspection, but favors Federal legislation compelling watch inspection upon all railroads, known and recognized as "common carriers."

The organization has also put itself on record as favoring a fixed selling price; favoring a Federal advertising law to prosecute fraudulent advertising; favoring a definition of "solid gold" as gold 23.85 fine; favoring the establishment of a trade-mark by the organization, and favoring a new discount key to be used by wholesalers in jewelry and materials. As far as the time guarantee on watch cases is concerned, the organization is in favor of it, provided a law preventing fraudulent advertising be passed.

Among the important matters turned over to the executive committee is the decision in regard to the establishment of an official organ. This committee is instructed to establish a Bureau of Assays, and has also now been given the power to arbitrate any disputes which arise between the members and either manufacturers or jobbers.

The resolutions indicate both a conservative and progressive spirit, which will probably result in increased membership and greater effectiveness in the work of the organization.

## ROCK BOTTOM PRICES ON DIAMONDS

Our diamond prices are rock bottom.

We import the stones direct, cut them ourselves, and sell them as close as anybody in the country does for diamonds of equal quality.

We carry a large stock at all times and the jeweler who sends to us for a selection not only gets rock bottom prices, but also a liberal assortment—and, what is of utmost importance, he gets it promptly.

### Good Gold Jewelry

*It's the  
only kind  
we make*

A RATHER COMMONPLACE DECLARATION, WE'LL AGREE, BUT WE MAKE IT WITH AN INSPIRING REVERENCE FOR THAT MUCH-ABUSED WORD "GOOD." OUR JEWELRY IS GOOD ALL OVER—GOOD THROUGH AND THROUGH. IT ISN'T ALONE SUPERFICIALLY IMPRESSIVE, IT GOES BEYOND THAT, SUPPORTING ITS VISIBLE DIGNITY WITH MATERIAL QUALITIES THAT MAKE IT MOST ENDURING. FURTHERMORE, LIKE EVERYTHING IMPRESSIVE, IT HAS A PERSONALITY—CHARACTERISTICS THAT EASILY HELP IDENTIFY IT AS A KIRBY PRODUCT. ASK TO SEE THE KIRBY LINE BEARING THE ABOVE TRADE-MARK.

## Pittsburg.

F. F. Lang is spending a few weeks at Cambridge Springs, Pa.

Adolph Mascher, East Palestine, O., has been camping for a week or more.

Samuel Weinhaus, of S. & B, C. Weinhaus, is home from a Canadian fishing trip.

F. M. Parks, Ravenna, O., is visiting at Mt. Clemens, having gone there to recuperate.

William Heeren has returned from a European trip which lasted for several months.

Walter G. Smith, Youngstown, is home from a fishing trip to Canada and had some splendid luck.

Among the out-of-town jewelers in Pittsburg last week were H. R. Brown and Asa Joseph, of Donora, Pa.

George W. White, of West, White & Christy, who has been in New York for several weeks, has returned home.

Herbert Meyer, Massillon, is erecting a splendid residence there, and is giving its construction much of his time during the warm weather.

L. W. Vilsack & Co. are exhibiting the silver cup given by the Pittsburg Leader to the champions of the Allegheny County Baseball League. The cup is attracting attention.

Some attention was attracted in Pittsburg last week by an advertisement which appeared in an eastern paper, asking for the name of the man who shipped a package of jewelry from Latrobe (Pa.) to a Boston (Mass.) man, the name of the sender not appearing on the package.

H. Weinberg, a watchmaker with Sol Cerf & Co., who is searching for his brother Samuel, who has been missing for 11 years, and whose photograph was recently published in THE CIRCULAR-WEEKLY, has received no word from the missing man. Mr. Weinberg now believes that his brother is dead.

Sam F. Sipe, who is in Europe, last week addressed souvenir postal cards to all of his friends and customers in America, setting forth that he had bought a large quantity of diamonds and would be prepared to save them money. The "ad." is regarded as a good one. In addition, some of the papers published contents of letters received from Mr. Sipe on the athletic events in England.

A meeting of the creditors of the Pittsburg Watch Co. was held at the Monongahela building, in this city, Wednesday, at which time creditors representing more than half of the debtors appeared. According to the statement of the receiver, the liabilities run to \$33,000 and the assets have been appraised at \$15,000. One bank is a creditor for \$6,500 and holds as security property worth \$2,000 which cannot be recovered by the trustee. The company has three stores, of which the rent has been paid until July 1, but the landlords can claim until the end of the lease, April 1, which would put the rent claim up to \$7,500. An offer of 25 per cent, made on behalf of the bankrupt concern, met with favor on the part of the creditors present and is now being submitted to those who did not attend. It will have to be an unanimous consent.

## New York Notes

E. Knapp, with J. A. & S. W. Granbery, visited the Boston trade, last week.

Charles F. Brinck is spending his annual vacation in Pike County, Pennsylvania.

J. D. Day, with H. S. Schergens, Indianapolis, Ind., is visiting relatives in this city.

Geo. Fred Heydt, head of the advertising department of Tiffany & Co., is on his vacation.

Oscar Benton, Lancaster, Pa., sailed from this port recently for a vacation in Europe.

Frank Ryder, of the Heywood Co., has returned to this city from a three weeks' vacation.

Wm. H. Wright, 65 Nassau St., is spending a few days with his family at Binghamton, N. Y.

J. Lavinsky, Waco, Tex., was among the out-of-town visitors in this city, during the past week.

H. M. Ryman, Calbert, Tex., who has been in this city, recently, returned home last Saturday.

Herman Herz, buyer for Mandel Bros., Chicago, was in the Maiden Lane district during the week.

Miss Hannah Goldberg, daughter of J. Goldberg, 68 Nassau St., is in Maine, spending her vacation.

Charles A. Keene, 180 Broadway, returned from a trip to Europe, last week, on the Cunard Line.

Robert Scholz, eastern salesman for the Plainville Stock Co., is at the New York offices of the concern.

Mr. Merrell, of Merrell & Baughman, Jeannette, Pa., was a visitor in town for a few days, last week.

Mr. Craft, of Craft & Newman, Providence, R. I., was among the visitors in Maiden Lane, last week.

The Pryor Mfg. Co., Newark, N. J., has opened offices at the Day and Night Bank building, 527 Fifth Ave.

Edward Stern, jewelry buyer for Sauger Bros., Dallas, Tex., was among the visitors in town during the week.

Mr. Kelsey, formerly with C. D. Lyons Co., Attleboro, will hereafter represent Fay Bros., Providence, in this city.

Robert Woodrow, with Cross & Beguelin, 31 Maiden Lane, is spending a vacation with relatives in Philadelphia.

Charles Williman, New York representative for T. G. Frothingham & Co., North Attleboro, is away on a two weeks' vacation.

L. R. Wood, representing the Hunter-Tuppen Co., Syracuse, N. Y., was stopping during the past week at the Herald Square Hotel.

W. H. Kinna, local manager for the Elgin National Watch Co., has been at the Chicago office of the concern during the past week.

Wallace G. Franklin, of E. I. Franklin & Co., North Attleboro, was at the local headquarters, 7 Maiden Lane, during the past week.

E. J. Kastner, of the L. E. Waterman Co., Ltd., Montreal, Can., was in New York, last week, calling on his old friends in the trade.

S. Warner Granbery's power boat, the *Irene II.*, was one of the fleet of the Co-

lumbia Yacht Club boats which sailed for the Thousand Islands, last week.

K. L. Wedgwood, of Josiah Wedgwood & Sons, Ltd., 25 West Broadway, who is at present in Europe, is expected to return about the first week in September.

Frank Paterson has been appointed receiver for D. J. Prince, trading as the Prince Co., 823 Broadway. The liabilities are given as \$5,000 and the assets \$2,000.

M. O. Nobbe, of M. O. Nobbe & Co., Galveston, Tex., was among the visitors at the offices of THE CIRCULAR-WEEKLY during the past week. He is stopping with his brother in Newark.

L. E. Waterman, of the L. E. Waterman Co., is home from a trip in Europe. He passed the time while abroad, visiting different cities in England and on the Continent, and has returned much refreshed from his trip.

Notice is given that the property of David J. Prince, against whom a petition in bankruptcy was filed last week, consisting of a large assortment of watches, rings, fobs, brooches, etc., also a safe, show cases and other fixtures, will be sold at public auction at 823 Broadway, Aug. 21, at 10:30 A. M. The property will be open for inspection at that address, to-day and to-morrow, between 10:30 and 5 P. M.

George Marsho, a Turkish barber, was locked up at police headquarters last Wednesday night, charged with having sent a threatening letter. The complainant was N. Narzarain, a jeweler of 293 Fifth Ave., who said that Marsho sent him a letter threatening to destroy him and his family unless he gave up \$125. The letter which the complainant turned over to the police bore the photograph of Marsho. It was received on Aug. 10.

David L. How, of How Bros., La Porte, Ind., whose death was noted in the last issue of THE CIRCULAR-WEEKLY, was a traveling salesman for E. & J. Bass Co., importers and manufacturers of jewelry, at 610 Broadway. He was with that concern about a year, representing them in Michigan, Indiana and Illinois, and was held in high esteem by his employers. The deceased was 38 years of age. Death was caused by heat prostration and occurred at the Burlington Union Depot, Quincy, Ill., as he was on his way to take a train.

John S. Holbrook, vice-president of the Gorham Co., when seen by a CIRCULAR-WEEKLY reporter at the Fifth Ave. offices and asked in regard to the probable effect of the recent decline in the price of silver as affecting the price of silverware, said that he did not think any change in the price would occur for the present at least. "The prices were rearranged in January," said Mr. Holbrook, "and I anticipate no change at present." As to the silver trade he said that orders are coming in better now and the general conditions are more satisfactory under the circumstances. "While I don't look for a big year yet I expect business will be about normal," he said.

A dispatch from Paris, dated Aug. 11, stated that the court had that day sustained the contention of the American legatees in the Rubens case, holding that the American courts alone had jurisdiction over the case involved. Charles Rubens, who was

at one time a well-known watch dealer in Maiden Lane, died in Paris in 1906, and bequeathed his fortune of \$2,000,000 to two friends in New York. The nephews of Rubens contested the disposal of his property on the ground that Rubens was in reality a Frenchman who went to America when a young man, became naturalized and after amassing a fortune returned to France in 1868. The nephews said the property of Rubens should be divided in accordance with the French laws. Ickelheimer and Julia Heidebach maintained that as the will of Rubens was drawn in America the French laws did not apply.

Commercial bar silver reached its lowest point in five years, Tuesday of last week, when there was a sharp decline of  $\frac{3}{4}$  per cent., which carried the price to 51 $\frac{1}{2}$ ¢, following a corresponding reduction in the metal in London. This is the lowest since April 23, 1903, when silver sold at the same price. The depression is said to be due largely to general trade conditions. For some time the only demands for silver has come from the Indian bazaars. Owing to the crop failure in India, last year, the Indian mints ceased buying silver, but the Indian bazaars have continued to take advantage of the falling prices. The United States Government has been a small buyer of silver, owing to the depression in business. The demand from the arts has also been comparatively small for the same reason. It is thought that conditions in silver will revive with the improvement in general trade conditions.

Representatives of the Firemen's Memorial Fund have been calling on members of the trade during the past week, soliciting advertising or contributions to be used in erecting a fitting and lasting memorial to the heroes of the fire department. It is the intention of the committee to collect a large fund, a part of which will be used to place in one of the city public parks, a monument to the late Deputy Chief Charles W. Kruger, and other members of the fire department who have lost their lives in the performance of their duty. The balance of the fund is to be added to the Pension Fund of the department, so that the families of the men who have sacrificed their lives may be cared for, and the fatherless children brought up and educated. Those who have the matter in charge have arranged for a benefit to be given, Aug. 26, at Luna Park, and at Celtic Park on Aug. 29. Another benefit will also be given at the Hippodrome on Oct. 26, at which time Sousa will give a band concert.

A meeting of the executive committee of the old Jewelers' Roosevelt and Fairbanks Club, of which Col. John L. Shepherd is chairman, was held at 21 Maiden Lane, Thursday last, and it was decided to change the name of the organization to that of the Jewelers' Taft and Sherman Club, and to continue an active organization throughout the present presidential campaign. The following officers were elected: President, A. K. Sloan, of Sloan & Co.; first vice-president, Ludwig Nissen, of Ludwig Nissen & Co.; second vice-president, Edward Holbrook, of the Gorham Co.; third vice-president, John C. Moore, of Tiffany & Co.;

fourth vice-president, Leopold Stern, of Stern Bros & Co.; fifth vice-president, F. R. Appleton, of Robbins & Appleton; sixth vice-president, Louis Kohn; seventh vice-president, Dr. Geo. F. Kunz, of Tiffany & Co.; treasurer, Leo Wormser, of the Julius King Optical Co.; secretary, Wm. F. Ackerman, and chairman of the executive committee, and Col. John L. Shepherd, of the Keystone Watch Co.

The business of Joshua Abeloni, 90 Graham Ave., Brooklyn, has been closed.

Meyer Sabevitz has succeeded to the business of Sabevitz Bros., 115 E. Broadway.

F. A. Jeanne, the "Gemfinder" of Paris, sailed for this city, last Saturday, on the *Philadelphia*.

David Goetz, 2022 Third Ave., is offering to settle with creditors on a basis of 40 per cent., 10 cents cash and the balance in three notes.

Fred N. Day, a jeweler of Winston, N. C., was a visitor in this city during the past week. He made his headquarters at the Astor House.

A. Merchant Clark, of the staff of the *CIRCULAR-WEEKLY*, who is now on his vacation in the northern part of this State, will probably surprise his friends on his return by bringing a bride back with him.

The Modern Jewelry House is the name of a firm incorporated, last week, under the laws of New York State. The directors named are Lillian Magness, Henrietta Blum and John H. Boehm, Jr., of Brooklyn.

While his wife struggled with him Emile Moeschler, of 577 Eighth Ave., committed suicide last Friday afternoon by shooting himself in the mouth. Moeschler was a jeweler, with a store at that address, and lived with his wife in the rear. For several years he had been suffering from cancer of the stomach.

A case of interest to the trade has arisen out of a memorandum transaction between J. R. Wood & Sons and H. H. Reinert, Parkersburg, Ia., which brings into question the matter of selling goods on memorandum. On Dec. 7, 1907, Mr. Reinert received \$2,500 worth of goods on memorandum from the Wood firm, a part of which he returned in January. He still has in his possession, according to the claim of the Wood concern, \$1,700 worth of goods, which amount J. R. Wood & Sons refused to charge up to him. It appears that Reinert, in the meantime, had given a bill of sale to W. N. Clark for the remainder of the goods. J. R. Wood & Sons have caused the arrest of Reinert and he is now held in \$2,000 bail awaiting developments in the matter.

Leo Wormser, of the Julius King Optical Co., who is also president of the Jewelers Board of Trade, has been subjected to considerable annoyance recently by the actions of a man calling himself M. Altman and other names, who has been traveling around the country soliciting loans from jewelers and opticians. The man, who says he lives at 47 E. 123d St., has claimed to be a relative of Mr. Wormser, either nephew or cousin, and on the strength of

his claim of relationship several jewelers have accommodated him. As Mr. Wormser does not know the man, nor is he related to him in any way, his fraudulent representations have been distinctly annoying. The man's action was called to Mr. Wormser's attention about two weeks ago, though he must have been working his tricks for some time before. He has been heard of in Parkersburg, W. Va., Harrisburg, Pa., and Cincinnati, O., in all of which places he tried to borrow money. Jewelers or opticians on whom he may call are requested to be careful of him and also to notify Mr. Wormser.

Jacob Weiss, a boy, 13 years old, who was arrested Tuesday of last week on a charge of stealing jewelry valued at about \$500 from his employer, J. Harber, a jeweler of 96 Houston St., was arraigned in the Jefferson Market police court last Wednesday morning. Joseph Praeger, who was taken into custody on a charge of abetting the theft, and Abraham Hanan, alleged to have received the jewelry, were also arraigned at the same time. According to Weiss he entered the employ of the jeweler about three weeks ago and began stealing on the first day. Later, it is claimed, he took three silver watches and two diamond stick pins valued at \$150. According to the report the boy also took a diamond brooch and a woman's gold watch and stick pin, and his sister, who saw him hide these articles about the house, informed his mother, who had him taken back to the jewelry store, and the jeweler notified police headquarters. Magistrate Droege placed the two boys in the care of an officer of the Gerry Society. Hanan will have a hearing later.

Among the recent accessions to the Metropolitan Museum of Art is a porcelain elephant, Chinese, 18th century; a vase and dish, Kashan, 19th century; plate, 17th century; plate, 18th century; Persian Bokhara plate, Turkish, 19th century; enameled chatelaine, Italian, early 19th century, and a copy of Sergeant's Mace, silver parcel gilt, English, early 17th century, all of which were purchased. Among the list of loans is a Phoenician vase decorated with colored glaze, about 1600 B. C., loaned by Miss Annie Herrmann Vedder; Bidri dish, inlaid with silver, Persian, 17th century, loaned by Edward Colonna; a bronze group, Comanche Indian breaking a wild horse, by Henry K. Brown, 1873; a head of a half-breed Indian squaw, cast in silver, by Henry K. Brown; head of a child, cut in Hollywood, 1861-62, by Henry K. Brown, loaned by Henry K. Bush-Brown. There have also been received 1,600 photographs from James Loeb and one engraving from James D. Smillie. The popular subscription to enable the Memorial Committee to purchase several replicas of the works of Saint-Gaudens to be presented to the Metropolitan Museum is finding some favor. Those interested may address Daniel C. French, chairman, or Frederick S. Wait, treasurer, care of the Museum.

O. M. Farrand, 3 Maiden Lane, who has been working for some time on a patent lock, has brought his invention to a high state of perfection. The lock can be set with a catch only, when so required, by a simple turning of the knob. By another

simple movement an automatic bell attachment can be connected which will ring when the door is opened. The lock works on the principle of a combination, the arrangement being such that by changing different small screws the combination can be changed. It has been figured that 40,000 different combinations can be used on the lock. The lock is practical, not only for doors, but for trunks and other articles that need to be protected. A door, when locked with this device, can be opened from the inside at any time by simply turning the knob.

**Newark.**

E. N. Mandeville will represent the Arch Crown Mfg. Co. in New York, Pennsylvania and New England, beginning the middle of this month.

The awning on the store of Theodore Bothman, retailer, 225 Broad St., Elizabeth, was burned accidentally last week, for a time endangering the store. A still alarm was sent to a nearby fire station.

Friends of Theodore M. Woodland, of the Jones & Woodland Co., are booming him for the regular Republican nomination for Sheriff. Mr. Woodland lives in Llewellyn Park, West Orange, and has a host of friends. Recently several of his friends in Orange, East Orange and West Orange met and decided to work at the polls on primary day and do all in their power to land the nomination for him.

Charles Davis, a jeweler of 481 Orange St., received a letter containing a pawn ticket, last week, from a thief who had stolen a gold watch from his store a few days before. The watch had been left with Davis to be repaired. In his letter the unknown regretted the step to which he had resorted for ready money, and said as soon as he was in better circumstances financially he would return the amount which he secured on the watch.

The three young men who were found with the property of Jeweler Fred Miskam, of Union Hill, in their possession and who declared the jewelry had been given to them by the jeweler's daughters, were arraigned in court last week and held in \$1,000 bail each on the charge of receiving stolen goods. They gave their names as Robert Baker, Nicholas Scheutz and Jacob Maibach. No charges have been made against the girls, who, according to the statement of the boys, stole the jewelry.

William Peace, Yonkers, formerly of Newark, and for many years employed by Thomas W. Adams & Co., manufacturing jewelers of Newark, died suddenly at his home in Yonkers, recently, at the age of 55 years. Mr. Peace came from Birmingham, England, in the early 70s, was well known and highly respected by his many friends in and near Newark. Up to the time of his death he appeared to be in his usual good health, but was stricken with apoplexy while ascending the stairs of his home and expired almost instantly. Mr. Peace removed to New York from Newark about 10 years ago. In New York he was employed by Woods & Chatellier. He was unmarried. The funeral services were held in St. Andrew's Church, Yonkers, and interment followed in Oakland Cemetery.

## Members of American Association of Opticians Hold 11th Annual Convention at Philadelphia, Pa., Adopt Code of Ethics and New Constitution and Elect Officers.

PHILADELPHIA, Pa., Aug. 14.—The 11th annual convention of the American Association of Opticians adjourned yesterday and the proceedings came to a close last night with a banquet given to the members of the association and to the Pennsylvania Retail Jewelers' Association in the Belmont Mansion, Fairmount Park. About 600 persons were present at the dinner, which was greatly enjoyed. The speakers were Col. John L. Shepherd, Archibald B. Millar, Briggs S. Palmer and John C. Eberhardt. The master of ceremonies was Col. J. Warner Hutchins.

The convention of the optical association accomplished much in the way of strengthening the organization and making preparations for future work. A code of ethics

some of the larger American cities real homes are disappearing, but not so in Philadelphia. He also referred to the old political corruption, the packing of ballot boxes and juries, and said that the Philadelphians have put an end to this.

Because of illness, Thos. Gowenlock, Clay Center, Kans., was not present to deliver the response at this point.

President Palmer read his annual address, in which he referred to the growth of the organization, and spoke on legislative matters. He referred to the possibility of the national association taking a more active part in promoting legislation in various States. Some believe that there should be uniformity in optometry laws of different States, and that a man who passes an examination in one State should be recognized as a practitioner in other States. On the other hand, he pointed out, there might be danger in the national society interfering in State affairs. If a State association could not, without outside aid, obtain an optometry law, it might not be strong enough to retain such a law. There would also be many objections in each State to the admission of practitioners from other States without a new examination. Mr. Palmer said that these and various other matters should be duly considered, and he urged all the members to act in harmony in order to promote the best interest of the profession.

Reports of officers and committees were read and were accepted. An address of Dr. T. G. Atkinson, Chicago, was read, and C. E. Folsom, Atlanta, spoke on "The Relations of the Optometrist, Dispenser and Physician." In the afternoon W. T. McConnell, Pittsburg, spoke on "The Advancement of Optometry from a Mechanical to a Professional Standard."

Dr. Mason W. Pressly, an osteopathic physician, of Philadelphia, said that osteopath and optometrist should stand together; that their real interest is in fighting against traditional drug giving. He said that both ask for the recognition of their profession and both seek to drive away the incompetent and the "fakers." He predicted that a time is coming when no man will be "drugged."

W. R. Warner, Cleveland, gave an illustrated lecture on Egypt, which he had visited a year or so ago. Alex. Martin, Philadelphia, gave an illustrated lecture describing his methods of conducting an examination, making sales and keeping records.

Wednesday was Physiological Section day. President E. Le Roy Ryer, New York, in his opening address, outlined the reasons for changing the name of the association and advocated the other changes which were afterward made by adopting a new constitution.

The prize essays were read by Peter Scholler, Hancock, Mich.; Ralph H. Woods, South Bend, Ind., and Miss Elva Cooper, Bradford, Pa. Special papers were read by

A. Jay Cross, New York, and John C. Eberhardt, Dayton, O. A paper written by Nelson K. Standart, Detroit, Mich., was read in his absence by S. S. Grant, Montreal, Canada. Seven honorary mention essays were read in the afternoon, by title. The writers were H. J. Cook, Knoxville, Tenn.; David Kletsky, Pueblo, Colo.; Gustavus Kahn, Winneconne, Wis.; John L. Beard, Charleston, W. Va.; R. D. Judkins, Flushing, O.; David Syman, Springfield, O., and Ford A. Smith, Sterling, Ill.

Thursday the business sessions of the Physiological Section and of the American Association were held. The Physiological Section at that time changed its name to the Scientific Section, and adopted its new constitution. Officers were elected as follows: Chancellor, W. T. Eisensmith, Charleston, W. Va.; vice-chancellor, Fred Peiper, Covington, Ky.; registrar, Ernest Eimer, Muskegon, Mich.

At the business meeting of the American Association of Opticians, held in the afternoon, the following officers were unanimously elected: President, H. J. Cook, Knoxville, Tenn.; first vice-president, C. H. Wood, Oakland, Cal.; second vice-president, N. K. Standart, Detroit, Mich.; sec-

H. J. COOK, PRESIDENT-ELECT.

W. T. EISENSMITH, CHANCELLOR OF THE SCIENTIFIC SECTION.

retary, W. E. Huston, Kansas City, Mo.; treasurer, W. B. Ankeny, Corning, Ia.; executive committee, the foregoing officers and Howard C. Doane, Boston, Mass.; Thos. Gowenlock, Clay Center, Kans.; Frank C. Robbins, Elmira, N. Y.; Hardwick Ruth, Montgomery, Ala.; member of Board of Regents, E. Le Roy Ryer, New York City.

There was a contest for the convention of 1909 between Atlanta, Ga., and Cedar Point, O. Atlanta was finally chosen by a large majority, but a resolution was first adopted on motion of John C. Eberhardt, by which those present pledged themselves to do everything in their power to bring the convention of 1910 to Cedar Point.

A resolution was also adopted which provides that after this the board of directors shall have full charge of the arrangements for annual conventions and exhibits.

Following were the committees:

Committee on entertainment—Chairman, Alexander Martin; D. V. Brouen, Edgar A. Brown, Louis Sickles, Fred Hurlbut, B. Thorpe, J. Warner Hutchins, C. A. Longstreth, secretary, and L. P. White, treasurer.

Committee on exhibits and programmes—A. Reed McIntire, chairman; Wm. J. Benn, secretary, and Andrew Brown.

was adopted similar to that recognized in several of the States. The name of the Psychological Section was changed to the Scientific Section, and a new constitution was adopted for the section in order to bring about closer relations with the main organization and in order that they might both work for the common welfare.

Tuesday was A. A. O. day. After an address of welcome had been delivered by William S. Gleason, secretary to the Mayor, there was an appropriate response made by Briggs S. Palmer, Boston, Mass., the president of the organization. Alexander Martin, Philadelphia, as president of the Pennsylvania State Optical Society, also welcomed the delegates in an interesting and witty address. He spoke particularly of the civic pride in Philadelphia. He described it as a city of "homes, and not flats," and said that the members would have opportunities during their visit to see for themselves that this is so. Mr. Martin said that the purity and stability of the home are the foundation of society. When Rome ceased to have homes it went down. In

### Chicago Notes

Ed. Taylor, of the Rockford Silver Plate Co., was here last week.

E. A. Dayton, of E. A. Dayton & Co., is making a trip through Illinois.

Briggs & Dodd are holding an auction sale for Harrison & Co., Sault Ste. Marie, Mich.

C. E. Sutton, representing McRae & Keeler, in Chicago, is at the factory at Attleboro, Mass.

E. J. Walther, Chicago representative for the D. F. Briggs Co., took an outing at Long Lake, Wis.

H. A. Allen, western representative of C. H. Allen & Co., returns this week from a visit to the factory.

John H. Dunham, manager of the Western Clock Mfg. Co., has just returned from a two weeks' vacation.

Jos. Weinstein, with B. Weinstein, 531-33 S. Halsted St., is taking a two weeks' outing in northern Michigan.

L. P. Northup, with wife and daughter, Woodward, Okla., stopped here a few days on their way home from a trip East.

E. J. Wiggins, 410 E. 63d St., has sold out his business to N. Kahn, who formerly kept a retail jewelry store on W. 12th St.

Julius Jacobson, of C. G. Breitenbach & Co., was on the sick list a few days last week, but has now completely recovered.

F. E. Behrendt, representative here for the Homan Mfg. Co., is on a month's trip, making Duluth, St. Paul, Minneapolis and Missouri.

Wm. Lines, hailing from Milwaukee, is a new salesman engaged by C. G. Breitenbach & Co. He is now making Wisconsin territory.

Harry E. Farquharson, representative here for Gilmore & Co., returned, last week, from a vacation and fishing trip at Windom, Minn.

H. A. Eyster, of the Jewelers' Supply Co., Seattle, Wash., stopped over here on his way home from the east, last week, accompanied by his daughter.

In addition to representing the Rockford Watch Co. in Chicago, A. M. Shepard has secured the line of the Rockford Silver Plate Co. for the same territory.

Arthur L. Fuller, with the Chicago office of the Towle Mfg. Co., is having an outing with his family at Camp Arcadia, Ludington, Mich. He will return Sept. 1.

Louis Epstein, traveler for Theo. Jacobs & Co., has just returned from a Pacific

Coast trip. Mr. Jacobs leaves this week for a short trip in the Middle West.

Arthur M. Seligman, formerly manager of the jewelry department of the John M. Smyth Co., has succeeded W. P. Wincher in the jewelry business at 101 Washington St.

Emil G. Pfeiffer, retail jeweler at 150 N. Robey St., was drowned with his wife at Kilbourn, Wis., by the upsetting of a gasoline launch. Mrs. Pfeiffer and her son Ralph were rescued.

Albert Y. Adcock, son of the late Albert Y. Adcock, of the Shourds-Adcock-Teufel Co., is engaged to be married to Miss Eleanore Puls, daughter of Adolph F. Puls, a retail jeweler of Milwaukee, Wis.

Frank H. Mooney, of Frank H. Mooney & Co., and H. J. Hank, salesman for the same concern, have just returned from a fishing trip at Eagle Lake, Wis. Mr. Hank leaves this week on a southern trip.

Rhodes & Riddel, watch repairers to the trade, have removed from room 503, Heyworth building, to room 1508, Masonic Temple. They will also carry a stock of watches and jewelry in their new quarters.

Dr. Walter C. Soff, manager of the optical and jewelry departments of Louis Weber & Co. has returned from an extended eastern trip. Mr. Soff, while away, combined business with pleasure and spent some time at Atlantic City.

Herbert Crompton, jewelry buyer for the L. Bauman Jewelry Co., St. Louis, Mo., came to this city, last week, in answer to a telegram announcing the arrival in his family of a baby boy. Mr. Crompton received the congratulations of his friends while here.

Olaf Pearson, of Pearson & Malmstrom, 11340 Michigan Ave., died last Thursday morning, aged 39 years, from a complication of diseases. He had been ill for years. He is survived by a wife and daughter. The business will be continued as usual. Mr. Pearson was one of the best known retail jewelers of the South Side.

The following were among the buyers in Chicago during the past week: Claud Wheeler, Columbia, Mo.; W. H. Carew, Streator, Ill.; George F. Beach, Valparaiso, Ind.; M. A. Hurlbut, Fort Dodge, Ia.; G. S. Bauder, Elburn, Ill.; A. W. Ford, Freeport, Ill.; C. D. Wolff, Marion, Ill.; M. Sherman, Sherman Bros., Ludington, Mich.; L. P. Northup, Woodward, Okla.

Charles H. Seiler, Galena, Kans., is offering 50 cents on the dollar.

### Denver.

E. L. Allen, Trinidad, was in Denver, last week, making purchases.

Morris Cohen, formerly of Cripple Creek, has opened a store at 405 15th St.

S. V. Wathen, Ouray, was in this city, for a few days, last week, buying stock.

Wm. Oppenheim has opened a new store at the corner of 15th and Curtis Sts.

Mr. Jacoby, of the Edward Lehman Jewelry Co., left last week on his vacation.

Mr. Crowder, of Paine & Crowder, Boulder, was in this city, replenishing his stock, last week.

Mr. King, treasurer of the W. W. Hamilton Jewelry Co., is spending his vacation on a tour of California.

S. C. Johnson, of the Johnson Jewelry Co., Colorado Springs, was in the city purchasing stock, last week.

D. S. Dean, of the Watson & Newell Co., has returned from Attleboro, Mass., after an absence of several weeks.

E. F. Whittemore, a 16th St. jeweler, has turned his stock over to his creditors, and it is now being sold at auction.

I. Rosenblum, formerly with the W. W. Hamilton Jewelry Co., of this city, is now in the employ of H. H. Frumess.

It is reported that J. M. Bolding, Longmont, Colo., has left for parts unknown. His stock is in possession of his creditors.

Jas. Lewis, of the Lewis Jewelers' Supply Co., is making a short business trip through Utah and the southwestern part of this State.

W. Llewelyn left on an extensive trip, last week, for the northwest, with a line of sterling silver goods, in the interest of Watson & Newell Co., and Wilcox & Wagoner.

The Syman Bros.' Jewelry Co., of this city, has had on display the \$5,000 dinner service for the cruiser *Colorado*, during the past week. As many as 3,000 persons have visited the store in one day to inspect this magnificent donation from the people of the State.

The business of John H. Ruge & Co., Faribault, Minn., will hereafter be carried on by John H. Ruge alone.

F. W. Drosten, of the F. W. Drosten Jewelry Co., St. Louis, Mo., is about to erect a modern office building at 412 N. 7th St. The lot has a frontage on 7th St. of 25 feet, and is 90 feet deep.

### Cleveland.

H. W. Beattie is away on a two weeks' vacation.

C. J. McCormick is now associated with J. N. Gear.

Geo. J. Nieberg has accepted a position with J. H. Heiman.

H. W. Burdick is spending part of his vacation at the Shore Club, near Painesville, O.

J. Lieblich has purchased the Euclid Ave. store of Biskind Bros. and will continue at the present location.

The Cowell & Hubbard Co. is displaying three silver cups furnished to the Country Club as prizes for the Third Annual Amateur City Golf Championship.

G. L. Gunther, of Gunther & Karshner, Bellevue, O., has gone to Canon City, Colo., for his health, and will conduct there a branch of their Bellevue store.

F. R. Gee and S. N. Nusbaum have purchased the business of the Wingate-Nusbaum Co., which will be continued by them at the old location on Euclid Ave.

The display window of Harry Goldberg's store was broken again last week. Nothing of value was taken and Mr. Goldberg's only loss was occasioned by the breaking of the glass.

An agent's grip containing several hundred dollars' worth of watches, jewelry, etc., was stolen from one of Shanabarger & Murray's salesmen recently, while the latter was taking a nap on one of the benches on the Public Square.

The Cleveland Retail Jewelers' Association is assuming very definite form and meetings are now being held on the third Monday of every month in permanent club rooms secured at the Pythian Temple. At the last meeting about 20 members were presented and joined the association, paying a nominal initiation fee and the first quarterly instalment of their dues. The first efforts of the association will be devoted to recruiting new members and arousing sufficient interest so that matters of importance to the entire trade may be taken up and acted upon in the interests of every retail jeweler in the city.

The Sigler Bros. Co., Scribner & Lochr, and the Bowler & Burdick Co. report the recent incoming trade excursion a great success. Dealers were attracted to the city in great numbers and many took advantage of the opportunity to purchase their fall stocks while here. Among the jewelers in attendance were: C. C. Whitaker and wife, Clyde; Mr. and Mrs. F. R. Montgomery, Sandusky; Wm. Shibly and wife, Wooster; Mr. Carsner, of Gunther & Carsner, Bellevue, H. H. Vath, Sandy Lake, Pa.; H. H. Brainerd, Medina; A. L. Bonewell, Gibsonburg; W. G. Lowrie, E. Palestine; Thad Aclay, Warren; Robert Miller, Lorain; Jas. Rollins and wife, Londonville.

Circulars just received from San Francisco, Cal., under date of Aug. 1, announce the appointment of Webb C. Ball, of this city, as general time inspector for the Southern Pacific Lines, with headquarters at San Francisco. This announcement, which comes from Vice-President and General Manager E. E. Calvin, means that Mr. Ball will immediately establish a San Francisco office in order properly to administer

the time service of the Harriman lines on the Pacific Coast. Mr. Ball already has charge of the time service of several Harriman lines, including the Baltimore & Ohio, Illinois Central and Union Pacific.

Biskind Bros., 220 Superior Ave., N. W., were swindled out of a \$65 diamond ring, last week. A well dressed man drove up to their store, selected a ring and presented a check drawn to his order by a third party, which he endorsed to them in payment of the ring. Telephone inquiry at the German-American Bank indicated that the third party was good for the amount and Biskind Bros. accepted the check, which was later protested and proved to be a forgery.

### Cincinnati.

J. C. Miller, of the Miller Jewelry Co., is calling on the Ohio trade this week.

S. C. Bingaman, Vine St., has recovered sufficiently from his recent illness to resume business.

E. Moos, Owensboro, Ky., and wife stopped over here on their return from Cedar Lake, O., last week.

George F. Selmcier, secretary of the E. & J. Swigart Co., and wife are making a two weeks' stay at Atlantic City.

William Pfluger and J. B. Osthoff, of Joseph Noterman & Co., have left on their respective trips west and north.

George Detmering, of the M. Schwab Jewelry Co., left last week on a business trip through Ohio and Michigan.

Andrew Aman, Dayton, O., was in this city last week prior to his departure to Michigan, where he will stay some time.

E. C. Meyer, of the Dorst Co., and his bride, have returned from their honeymoon in the west and will reside in Westwood.

J. C. Daller, Sr., of the Clemens Oskamp Co., and wife, are enjoying a pleasure trip among the Great Lakes, including a stop at Mackinac Island.

Ross Jones, son of J. W. Jones, Mt. Sterling, Ky., spent last week here on his way to Toronto, Canada, where he will complete his education as an expert watch-maker.

The Gustave Fox Co. has completely remodeled its offices. This company has the contract for making the emblems of the new order of Lions and the new H. H. society.

A. G. Schwab, of A. G. Schwab & Sons, and his wife are sojourning at Atlantic City. Herbert Schwab, of the firm, is cruising on Lake Michigan with a party of friends.

W. Hohneck, son of Louis Hohneck, has become city salesman for Lindenberg & Fox. Walter Schildman, who formerly held this position, has become the firm's general manager.

George J. Gruen, of D. Gruen, Sons & Co., has purchased a fine new home in a beautiful section of Clifton. Fred Gruen, of this company, and wife have left for Atlantic City, where they will remain about three weeks.

Out-of-town jewelers here the past week buying goods included: I. N. Pollack, Ashland, Ky.; Herman A. Rohs, Cynthia, Ky.; John M. Messmer, Hamilton, O.; E. Scott, Batavia, O.; Frank Miller, Wilmington, O.; R. H. Dilley, Cambridge, O.; John

F. Willis, Mobile, Ala.; N. D. Wells, Southern Pines, N. C.; W. S. Hoke, Winchester, Ind.

Mr. and Mrs. George H. Newstedt, with a party of friends, have left on a 2,000-mile automobile trip to Maine, going via Cleveland, O., Buffalo and Albany, N. Y. They will return about Sept. 9 via Harper's Ferry, W. Va., and Washington, D. C.

Mrs. Louisa Chapin, Beechmont Ave., who a few years ago was worth \$60,000, was arrested last week for shoplifting. One of the alleged thefts was committed at John Bertling's store, upper Vine St., where she secured two gold locket, after telling the clerk she had decided not to buy any of the articles shown her. After the woman had left the store Mr. Bertling noticed that two lockets were missing and notified a policeman, who started in pursuit of the woman, located her and after much dodging placed her under arrest. In the police court Friday she pleaded guilty to petit larceny, saying she was driven to it by her poverty which she had suffered of late. Her fortune had vanished with mismanagement. None of Mrs. Chapin's victims wished to prosecute her, as she had always borne a good reputation. As an example to others, however, she was fined a small sum and costs.

### St. Louis.

C. R. Dietz, son of Herman J. Dietz, New York, has been in this city for the past week.

Leo Bauman, junior member of the firm of Bauman-Massa Jewelry Co., who was recently married, is now residing in the Kenmore apartments, on McPherson Ave.

William Hines has been engaged by William Weidlich & Bro. to represent that concern in the western territory. Mr. Hines' brother is western representative, traveling for the same concern, and the two brothers are now traveling together on a western trip.

The Mermod, Jaccard & King Jewelry Co. has started an innovation in the way of jewelry stores by establishing a branch in the rotunda of the Pierce building, one of the largest downtown office structures. The place is called "Ye Jewel Shop," and is fitted up artistically. C. L. Bates, of the firm, is in charge of the establishment.

George Kirchner, of the office force of Mermod, Jaccard & King Jewelry Co., who was married last week, has gone on a vacation and bridal tour to the northern resorts. Mr. Grimes, also of the firm, accompanied by his wife, is at Walloon, Wis. Others of the Mermod, Jaccard & King Co. who are away are William A. Boehn, A. E. Addor, William Shoemaker and Joseph Higgins.

Among the out-of-town jewelers in St. Louis the past week were: E. E. Gibson, Marissa, Ill.; John H. Greer, Fort Worth, Tex.; Mike Miesch, Muskogee, Okla.; Michael Ziegler, Kimmswick, Mo.; W. C. Pfaeffle, Enid, Okla.; Joseph J. Mazer, McAlester, Okla.; C. H. Riedeman, Vinita, Okla.; H. J. White, Staunton, Ill.; W. R. Haselwood, Bardwell, Ky.; W. K. Urbani, Vandalia, Ill., and Mr. Gardner, manager of Barnett Bros., Edwardsville, Ill.

E. F. King, Jasonville, Ind., has sold his business to A. J. Long.

## Los Angeles.

C. C. Zilles, Pomona, was here on a business trip last week.

J. W. Brown is now doing optical work with W. J. Getz, 557 S. Broadway.

Young Mr. Gray, of O. C. Gray & Son, Baso Robles, is spending a vacation here.

The Western Gem Co., F. Stansfield, manager, has moved from S. Broadway to 2206 S. Main St.

R. H. Gilmore, of Gilmore & Lee, is making a business tour of the towns of southern California.

H. B. Lewis is making a tour of southern California towns with some special lines for the E. W. Reynolds Co.

W. G. Barks, watchmaker for H. E. Rader, Monrovia, recently visited this city in company with his wife.

Fzta Kendall, of Kendall & Smith, Pasadena, is spending his vacation at La Jolla, a seaside resort near San Diego.

E. W. Reynolds, wholesaler, is spending his vacation in the northern part of the State. He is accompanied by his family.

E. F. Whittemore, formerly of Denver, Colo., is now associated with the J. C. Fleming Co. as watchmaker and jeweler.

A. B. McKelvey, Pasadena, has been compelled to give up his business on account of ill-health. He is advertising it for sale.

The E. W. Reynolds Co. has been enlarging its jewelry department, putting in three solid oak cases for silverware and cut glass.

The Carl Entenmann Jewelry Co. has just completed a set of medals as prizes for the Southern California Swimming Association.

Max Hirschfeld, who was with J. G. Donovan & Co. during the absence of Mr. Donovan in the east, has returned to his old place with H. F. Wallace, 414½ S. Broadway.

Floyd R. James, of the J. P. Trafton Co., has returned from his vacation and is again at his place in the store. Harry Adams, of the same company, is taking a vacation at Catalina Island.

Clarence C. Abel, of the J. P. Trafton Co., returned a few days ago from a very successful business trip through southern California. He immediately started out again to visit other nearby towns.

George M. Williams, proprietor of the Geneva Watch & Optical Co., and Paul Grimm, of the J. P. Trafton Co., made a brief trip a few days ago to Glen Ivy, Riverside County, in Mr. Williams' new automobile.

J. G. Donovan, of J. G. Donovan & Co., has returned after a tour of 7,000 miles through the east. He visited Chicago, Buffalo, Corning, N. Y., New York City and Providence, R. I. He was accompanied by his wife and little son.

S. Simmons, 315 S. Spring St., has in his window a turquoise labeled "Largest single nugget turquoise in the world. Weight, 3,456 carats." A peculiarity of the polished surface of the stone is that it bears the rough outline of a map of the United States.

Aug. 5 is observed annually by Pasadenans as "Pasadena Day." All the jewelers closed their places of business on that date this year and went with their fellow citizens to Balboa, a beach resort down the coast where a general jollification was held.

A. T. Werner, manufacturing jeweler, 411½ S. Broadway, whose place was robbed, June 21, has made a satisfactory settlement with the Maryland Casualty Co., with which he was insured. He was allowed \$600 to cover his loss. No trace of the robber has ever been found.

The Pacific Gem Co., in view of concessions made by the proprietor of the store where they have been doing business at 335 S. Spring St., have decided to continue their retail department at that location. Their new factory at 622 S. Broadway is completed, and a full force of men is at work there.

In the new department store of A. Hamburger & Sons, the largest west of Chicago, the best location on the lower floor is given to the jewelry department. Figures given by J. G. Hardy, manager of this department, show that 185 feet of counter space is provided, and a \$90,000 stock will be carried in that department alone. Four bench men and one optician are employed.

Los Angeles has as many beautiful new stores as any city of equal size in the United States. For three years Montgomery Bros. have been planning and building a new store in the Grant building, at the corner of Broadway and 4th St. Nothing like it has ever been attempted here for size, elegance and expense. It is now almost completed, and the opening will be held on Monday, Aug. 31.

## Milwaukee.

J. H. Roberts, Columbus, Wis., was a recent visitor in this city.

F. P. Beswick, Racine, was a Milwaukee visitor during the past week.

William D. Triplett, jeweler at Ironwood, Mich., spent a few days of the past week in this city.

R. Boeing, Hustisford, and John Armbruster, Cedarburg, were among the Wisconsin jewelers who were visitors in Milwaukee last week.

On deposit in a Milwaukee bank is \$14,000, for which the widow of Dr. David H. Lando, St. Paul, and Adolph Lando are fighting in court at St. Paul. Dr. Lando is a nephew of Julius Lando, the well-known Milwaukee optician, who is also interested in the disposition of the estate.

Actual gold mining operations will soon be under way in Wisconsin. The mine is located near Knapp, on the Hickman farm, and is owned by the Knapp Mining & Investment Co., which was organized four years ago for the purpose of developing and working the mines. Godfrey Ordeman is president and manager, and T. W. Robert secretary, of the concern.

The sign ordinance in the Milwaukee Common Council containing a provision regulating the erection of the jewelers' street clocks, has been indefinitely postponed by a joint committee of finance and judiciary. It seems that the action was brought about because of the fact that the ordinance provided for the creation of two new city offices—one to be filled by an official sign inspector. One faction in the council is opposed to the creation of any new offices.

Present indications are that Wisconsin will soon be put on record as having an optical law. Jewelers and opticians all over

the State are laying their plans and are offering suggestions to A. J. Stoessel, the well-known Milwaukee jeweler, chairman of the committee appointed by the Wisconsin Association of Optometrists, to prepare for the campaign to be waged during the coming session of the Wisconsin legislature. Special efforts are being made by the Wisconsin Association to raise the necessary funds to go forward with the work. C. D. Waugh, optician, who is the new secretary of the association, is endeavoring to collect the dues of members in advance, in order to swell the legislative fund. Bills have been sent out to members and money is coming in satisfactorily. Other members of the legislative committee of the association are: W. A. Pfister, Sheboygan, and W. H. Becken, Beaver Dam.

Suit has been brought against Richard Seidel by Margaret Devon for the recovery of a five-carat diamond ring valued at \$700. It is averred that the ring has been retained by the jeweler since June 26, and damages to the amount of \$100 are demanded. It seems that Miss Devon was captivated by a \$2,000 diamond necklace at the Seidel establishment, and placed her order for the same. She wanted her \$700 diamond put into the creation, and left it at the store. Later she found that the necklace would cost \$2,200, and decided that she would not buy it. When she demanded the return of her ring it was refused her, she alleges. Mr. Seidel says he is simply holding the ring until actual damages have been paid to him as a result of the unsatisfactory transaction. Not only was a considerable sum expended on the remodeling of the necklace for Miss Devon, but a ready sale of the article was lost to Mr. Seidel while it was being held and remodeled.

## Minneapolis and St. Paul.

M. Spiegel has moved his store to 3109 Nicollet Ave., Minneapolis.

Grant R. Simons, Langford, S. Dak., visited the Twin Cities, recently.

M. L. Finkelstein, St. Paul, is about to erect a residence, which will cost about \$10,000.

A. Kling, 826 Minnehaha Ave., Minneapolis, has bought the building in which his store is located.

W. H. Reighart, Minot, N. Dak., and Mr. Sullivan, of Estabrooks & Sullivan, Blackduck, Minn., were recent visitors in the Twin Cities.

Jacob Maurer, New York, has taken up his residence in Minneapolis, and contemplates engaging in the retail jewelry business if a suitable location is found.

C. E. Healy, with the F. L. Bosworth Co., Minneapolis, has been visiting the eastern factories, inspecting the current goods. He returned home, last week.

W. D. Heulin & Son are now conducting the business formerly owned by Geo. W. Smith & Co., Centralia, Mo.

John D. Mayer, who for several years has been engaged in business at Littlestown, Pa., will dispose of his jewelry stock, having lately purchased the hardware business of L. T. Melring.

## Detroit.

### TRADE CONDITIONS.

Buyers' week brought a large number of jewelers to the Detroit market, although the purchases were not extensive in amount as compared with some other trades. The Detroit Jewelers' Board of Trade took an active part in the entertainment and will co-operate with other bodies in a similar enterprise next year. It is hoped to make the river fete an annual affair of the same nature as the Mardi Gras at New Orleans. During the week various manufacturing concerns threw their plants open for inspection and a number of entertainments and excursions by water were arranged.

Hugh Connolly is recovering from his recent severe illness.

Sidney D. Tompson, Shepherd, has purchased a new Ford car.

W. H. Kress, Cheboygan, has been spending a vacation at Mackinac.

R. C. Cowan, formerly with the E. H. Pudrith Co., has taken a place in the store of J. H. Garlick.

Merton E. Rowley, with the E. H. Pudrith Co., is back from a trip through the northern portion of the State.

G. P. Washburn, Chadron, Nebr., visited this city, last week. He started in business here, but removed, 21 years ago.

W. M. Morton, house salesman for Noack & Gorenflo, has embarked on a long canoe trip. With John Parker, he is making a voyage to Albany by way of Lake Erie and the Erie Canal. From there they take boat to New York, but will make part of the return trip by canoe.

A session of the local lodge of Ku-Kus, No. 5, was held Friday evening, when 32 new members were initiated. The following officers were chosen: Ku-Ku King, Nelson K. Standart; Noble Prince, Chas. A. Berkey; Noble Chief, Frank Kennedy; Keeper of the Kash, Evan E. Thomas; Scratcher, A. E. Charlesworth; Guard, Frank R. Fitch. Many of the visitors remained to be present at this lodge meeting. Hereafter Ku-Ku meetings will be held each month.

Among the visiting jewelers here, last week, were: L. L. Johnson, Tawas City; Chas. V. Haas and wife, Ravenna; F. W. Dearlove and wife, Mayville; Ed. Girzi, Ishpeming; S. M. Cooley and wife, Flint; E. S. Barnes and wife, Rochester; M. J. Taylor and wife, Camden; Grant Halden, Yale; S. D. Spray, Waldron; C. W. Chamberlin, Farmington; W. E. Merrill, Ovid; C. E. Keever, Fountain City, Ind.; M. O. Lewis, Ovid; E. Culver, Mason; Eugene Campbell, Pinckney; W. F. King, Adrian; W. F. Sherk, Mayville; J. L. Chapman, Ann Arbor; W. T. Cushman, Wakefield; L. M. Bennett, Traverse City; J. H. Dickerson, Flushing; Edward Thomas, Springfield, Mo.; S. Feuerstein, Green Bay, Wis.; M. D. and H. D. Walton, Armada; G. D. Hamilton, South Lyons; Mrs. F. E. Touse, Pioneer; C. G. Draper, Plymouth; M. L. Green and wife, Mt. Clemens; John Karrman, Holland; W. T. Blashill, Oxford; George Chambers, Mt. Clemens; O. L. Hanks, Whittaker; W. V. Brown, Stockbridge.

The McKinney Wholesale Jewelry Co., Hutchinson, Kans., has applied for a charter. The capital stock is given as \$25,000. J. F. Meek recently retired from the firm.

## Kansas City.

### TRADE CONDITIONS.

The heavy rains of the past week in Kansas are reported to have greatly helped the corn crop. This means good business for the jeweler. Elaborate preparations are being made for entertainment in this city, next October, and thousands of visitors are expected. The Priests of Pallas, the American Royal Stock Show, etc., will celebrate and are expected to attract many out-of-town persons.

W. E. Crellin, of the Ward & Crellin Jewelry Co., went out to his territory last week.

Miss C. A. Porter, of the Porter & Wisner Jewelry Co., left, last week, for a trip to St. Louis.

Jas. Mace, formerly with the Meyer Jewelry Co., has taken a position with Margolis & Metzger.

Sam Bloom, traveler for the Meyer Jewelry Co., has left for the road again, after a short stay in the house.

The Hassig & Krieke Jewelry Co. has rearranged its store. The office has been placed in the extreme rear.

H. C. Kionka, of H. C. Kionka & Co., New York, was in this city, last week, paying a visit to his brother, E. Kionka.

W. F. Parker, who has just finished a course at the Kansas City Polytechnic Institute, has gone to Bolivar, Mo., where he has taken a position with F. O. Adams.

John B. LePage, formerly in the retail jewelry business on the Southwest Boulevard, in this city, has moved to Leavenworth, Kans., where he has taken a position with L. L. Hoffman.

The McDonald Jewelry Co., which recently opened a store in the Areade of the Scarritt building, is contemplating a removal to the store room in the Ricksecker building, corner of 9th and Walnut Sts.

R. L. Warner, who recently took the management of the store of Kionka & Kionka, has purchased the entire business and will continue under his own name, handling it in connection with his stone setting business.

George Taylor has been assigned to the Iowa and Minnesota territory of the Woodstock-Hoefler Watch & Jewelry Co., and will leave on his first trip over that section this week. His many friends in the trade will be glad to hear of his getting this territory, which is considered one of the best in the west.

The following jewelers from the surrounding country have been buying in this market during the past week: F. O. Adams, Bolivar, Mo.; Mr. Woods, with Morrison Bros., Olathe, Kans.; Leslie Hutton, Lebo, Kans.; C. L. Dockhorn, Oskaloosa, Kans.; F. C. Clement, Pleasant Hill, Mo.; W. S. Noble, Drexel, Mo.; J. Hausehild, Eskridge, Kans.; S. F. Rieker, Emporia, Kans.; Mr. Inglis, of Inglis & Huber, Higginsville, Mo.; Otto Burkland, Moberly, Mo.; M. L. Hutton, Garden City, Mo.; J. H. Leighty, Spring Hill, Kans.; F. E. Fearl, Hutchinson, Kans.; C. D. Hmit, Garnett, Kans.; J. L. Potts, of the Potts Jewelry Co., Marceline, Mo.; H. L. Morrison, Pittsburg, Kans.

The Sherwood-Bartlett Jewelry Co. was recently incorporated with a capital stock of \$25,000 in Montgomery, Ala. The incorporators are: John H. Sherwood, J. E. Bartlett and W. A. Jordan.

## Omaha.

Albert Edholm has returned from a fishing trip spent at Alexander, Minn.

Jno. Voss, with Jos. P. Frenzer, returned, last week, from a two weeks' vacation.

Jos. P. Frenzer left, last week, for the Lakes of Wisconsin, to spend a short vacation.

Mrs. Ada Scouten, with S. W. Lindsay, has gone to Kansas City, Mo., on a short visit.

Mrs. C. L. Shook left, last week, for Canton, O., where she will visit friends and relatives.

O. J. Dahlen, watchmaker for Gustafson & Hendrickson, has gone to Center City, Minn., for a short stay.

About 700 veterans of Douglas County were entertained at a reunion given by Fred Brodegaard at his home in Benson, Nebr., last week.

Chas. H. Larson and wife stopped off in this city for a few days last week, on their way home to Greely, Nebr., having been east on their wedding trip.

J. C. Huteson, of the Huteson Optical Co., accompanied by his family, removed home, last week, after spending six weeks at Vancouver, Seattle and Portland.

T. L. Combs has gone to New York, where he will spend two weeks. Mr. Combs is receiving the congratulations and encomiums of his many friends in the trade, owing to his successful efforts in having Omaha selected as the scene of the next national convention.

J. Bernstein, a former jeweler of Columbus, O., arrived in this city, last week, from Chicago, and found that he had been robbed of \$300 worth of diamonds which he had been carrying with him. The valuables comprised a stud, several rings and a number of loose stones. Mr. Bernstein cannot understand how the stones disappeared, and he is positive they were in his possession on the train. The loss was reported to the police, and before he ends his visit here he hopes to learn something of their whereabouts.

A young man entered the store of Albert Edholm one day last week and asked the price of a diamond collar button that he had in his possession. Mr. Edholm appraised the article at \$25, whereupon the man smiled and said he had just paid \$10 for it. Closer inspection disclosed Mr. Edholm's

own mark on the button. Going to the case, he looked through the tray and found that one button was missing. The clerks had sold none for several days, so suspicion rested at once on the young man. He denied he had stolen it, but said he had bought it of a friend at a hotel, but would not reveal his name until detectives were finally called. The man who sold the button was found on the street during the day, and he confessed that he had stolen the article at Edholm's store. The jeweler refused to prosecute, because the theft was the young man's first offense.

The front window in the store of the Bliss Jewelry Co., Atchison, Kans., was broken, early one morning, and a diamond worth \$100 was stolen. A hole about six inches square was made in the heavy plate glass window.

## San Francisco.

### TRADE CONDITIONS.

Dealers are much pleased with the prospects of a good Winter business and are preparing accordingly. Money is now much more easily obtained and it has been at any time since last October, and this is causing a decided revival in building. Owners who cannot improve their property will be compelled either to sell or to lease it to those who can. Local dealers believe that San Francisco will be one of the busiest cities in the United States this Winter and next Spring, and that labor will be well employed.

L. Jaccard, Livermore, has taken new quarters in the Library annex at that place. Burr W. Freer, local manufacturers' agent, is at present on his Summer vacation.

J. W. Moomaw, of Porterville, has just returned from a deer hunting trip in the nearby Sierras.

Harry Bruce and F. Stitch, two watchmakers employed by Shreve & Co., are away on their Summer vacations.

J. A. Young has left on a trip through the northern part of the State and will take a most of the mountain territory before his return.

Henry M. Abrams and wife, who have been residing across the bay in the Mill Valley region, have returned to this city to spend the Fall and Winter months.

L. C. Swain has decided not to leave Richmond, as was recently planned, but will continue business there at a new store a little further down Washington Ave.

The continued absence of Harry Bressler, jeweler of Calexico, is the cause of considerable comment there. He left on June 15 for a 10 days' trip and has not been heard from since.

The Keystone Jewelry Co.'s store on Van Ness Ave. was threatened by a fire that broke out in a restaurant upstairs recently. The damage was slight, owing to the efficient work of the fire department.

Among the applications for space at the State Fair for exhibition purposes is one from Jos. Jessop & Sons, of San Diego, who will exhibit cut and uncut gems and jewelry made from kunzite and tourmaline found in San Diego County.

Among the out-of-town jewelers who have been in town within the past week are: Ray Friedburger, Stockton; O. L. Wuerker, Los Angeles; A. G. Prouty, Napa; C. W. Thissell, Concord; E. W. Hamelin, Fresno, and G. Heimbach, Hollister.

The store of Jacob Macowsky, in the new Phelan building, is being renovated, and will be ready for occupancy Sept. 1. Mr. Macowsky states that the man who robbed him of a \$700 diamond ring when he was the proprietor of the Angelus Jewelry Co. at Los Angeles, is now on trial in that city.

A picture that is having quite a sale now in San Francisco is entitled "The Clock That Worked Thro' It All." This is a photograph of the clock in front of the old Kearny St. store of Hammersmith & Co., which, while the dial glass was broken, was otherwise not affected either by the earthquake or by the fire.

T. C. Johnson, Santa Rosa, was arrested recently, charged with grand larceny by Robert Schulthess, to whom Johnson had

sold a second-hand business. The complaining witness declares that Johnson returned to the store after he was given possession and took valuables worth more than \$300. Among these were diamonds and watches.

Mr. and Mrs. H. Traube, of 1831 Webster St., Alameda, recently celebrated their golden wedding with their children and grandchildren. The venerable couple were married in New York Aug. 8, 1858, and came to this city in that year, by way of Cape Horn. Mr. Traube first engaged in the jewelry business there, and later opened a store in Alameda, where he has been in business ever since.

The Southern Pacific Railroad Co. has just appointed Webb C. Ball, Cleveland, O., general time inspector of all its lines in the Pacific system. Mr. Ball will have his headquarters in San Francisco and will keep two inspectors here, whose duties will be to appoint and supervise local inspectors all along the Southern Pacific lines. Mr. Ball now acts as general time inspector for about 20 companies. A general inspection of the watches carried by its employes has always been maintained by the Southern Pacific Co., but the present step will insure a very systematic regulation. Local inspectors will be appointed in the different cities and towns from among reputable jewelers, who will inspect regularly the watches of all the railroad employes and issue certificates, which must be shown upon request.

## Pacific Northwest

H. W. Whalen, Portland, Ore., has leased a store at Tillamook.

Among the visitors in Portland during the past week was J. V. Rounsepel, manager of S. Nordlinger & Sons, Los Angeles.

The Seattle Safe Deposit vaults were entered last week by cracksmen and a partial list of the losses shows that \$500 worth of antique jewelry was taken. H. E. Holmes, of the firm of Stewart & Holmes, owner of the vaults, has turned the list of stolen articles over to the police and they are now working on the case. The San Francisco police have also been notified and detectives are on the lookout for any traces of the stolen property. A reward of 50 per cent. of its total value has been offered for the return of it.

## Pacific Coast Notes.

Walter A. Lord and wife, Goldfield, Nev., are spending a vacation in southern California.

J. C. Jones, Tucumcari, N. Mex., has sold a half-interest in his store to F. W. Slocum.

The Vann Mercantile Co., Albuquerque, N. Mex., has leased a new store there and will put in a large stock of jewelry in a short time.

Edward La Mont has located in Phoenix, Ariz. Mr. La Mont is a jeweler and will enter the employ of his brother, Frank La Mont.

George E. Gay, Gadsden, Ala., is moving into an attractively furnished store in the Stocks building at that place.

## Indianapolis.

J. P. Mullally has returned from a week's visit to West Baden.

F. L. Bryant is spending a week in Pittsburg, combining pleasure and business.

After a two weeks' visit with his mother, C. J. Kiefer will return from Lake Maxinkuckee this week.

John A. Bernloehr, of Chris. Bernloehr & Bro., has returned from a business trip of several days to Terre Haute.

A. R. Gray, of Gray, Gribben & Gray, is taking a couple of weeks' vacation, spending the most of his time, he states, at home.

J. H. Reed will go to Brown County, this week, where he hopes to close a deal for a large tract of land upon which he will establish a Summer home.

A. P. Craft, of A. P. Craft Co., spent part of last week at Kokomo and Anderson, while his son, E. M. Craft, called on the trade at Sullivan and Terre Haute.

John Williams, a watchmaker employed by J. H. Reed, is taking a two weeks' vacation, which he is spending at French Lick Springs and other southern Indiana points.

Following a few days at Atlantic City, Lon R. Mauzy will go to New York to buy his Fall and holiday stock. He will be at the Broadway Central Hotel for 10 days, beginning Aug. 18.

A watch owned by Mrs. M. A. Brown, Greenfield, has attracted the attention of jewelers and watchmakers of that city. It is said to be 143 years old and of English make, running with a chain and spring. The watch has four cases.

Julius C. Walk & Son, J. H. Reed and Carl L. Rost are exhibiting diamond rings that are to be given to the three most popular young women in the city at a fair to be held under the auspices of a local newspaper for charity. The rings were supplied by the respective jewelers.

In the investigation of the mysterious death of Mrs. Mayer Frankel by the local police, Nathan Abramson, who conducts a small jewelry business, has been arrested on a charge of blackmail. Frankel carried a large amount of insurance on his wife, and he charges he gave Abramson notes to the value of \$500 as "hush money."

Following a burglary at the home of Henry C. Schergens, 1506 N. Pennsylvania St., last week, Ike Lucas, a coachman employed by the family, has been arrested on suspicion. Nothing was taken but the contents of a bank, amounting to \$7. An investigation revealed that the burglary has evidently been committed by someone acquainted with the premises.

Last Winter Charles D. Rood, president of the Hamilton Watch Co., whose old home is Ludlow, Mass., notified certain authorities there that during "Old Home Week" he would present \$10,000 to the village for various purposes, and last week he fulfilled his promise, sending bonds, with the July coupons attached, and cash. The gifts include \$1,000 in trust, to accumulate, for the village's centennial in 1974, and similar amounts, also to be held in trust, for the celebration of the second, third, fourth and fifth centennials. When the 500th anniversary is celebrated the funds, if still intact, will have reached a colossal figure.

## Philadelphia

### TRADE CONDITIONS.

A decided stimulus to general business conditions in the jewelry trade has been experienced in this city during the week. The joint conventions of the American Association of Opticians and the Pennsylvania Retail Jewelers' Association partially account for it, but not entirely. It is believed that business is fast working up to normal levels. The conventions have attracted thousands of visitors mostly of the trade and prepared to leave orders here for goods for immediate and future deliveries. The wholesale houses had their hands full to meet the requirements of a midsummer swarm of visitors. But without the conventions it is declared that business shows a considerable improvement in volume. It is expected that the latter part of August and early September will prove brisk weeks.

Alexander Martin, optician, 118 S. 11th St., has gone to New England for an extended vacation trip.

Harry Weir, a prominent Manayunk retailer, has taken his family to Wildwood for the balance of the season.

Roy Phillips, formerly of Wilmington, Del., opened up last week a watch repair shop in Darby, just outside this city.

Col. J. Warner Hutchins, 728 Sansom St., returned Wednesday of last week from a trip to the White Mountains and Montreal.

Joseph Gumpert, 2218 Ridge Ave., has taken his family to the Phoenix Hotel, Willow Grove, for the balance of the Summer.

L. B. Jones, with C. A. Marsh & Co., Attleboro, stopped off in this city last week before leaving for an extended vacation trip.

Charles J. Heins, with William Gibbons, 49th and Market Sts., has started on a two weeks' vacation trip to the Allegheny Mountains.

Fred T. Barry, with Louis Stern & Co., has rejoined his family at Ocean City, after having attended the jewelers and opticians' conventions.

L. C. Reisner, Lancaster, Pa., formerly a prominent figure in the jewelry trade, was a visitor to this city last week and called on his old friends.

Walter M. Engle, 4233 Lancaster Ave., is spending a vacation with Mrs. Engle in traversing central Pennsylvania in the rural and mountainous regions.

William P. Kemmerer, with Col. J. Warner Hutchins, departed early this week on a vacation trip to be spent with his family in the Cumberland Valley, Pa.

Otto Jarek, of Easton, spent the entire week in the city with Mrs. Jarek. Mr. and Mrs. Jarek were active in the conventions and afterward took a seashore excursion.

Charles H. Dean, diamond broker, 719 Sansom St., proposes opening his new store at the corner of 8th and Sansom Sts., Sept. 1. He will continue his present establishment.

B. Musselman, of the Dennison Mfg. Co., has planned a vacation trip to Niagara Falls, Toronto, the Thousand Islands and Canadian points of interest, with a stay later at Danville, Pa.

John Simons, of Simons, Bro. & Co., manufacturing jewelers, has departed for an extended vacation trip to the Thousand Islands and other New England and Canadian resorts and will not return until September.

Ira D. Garman, the newly elected president of the Pennsylvania Retail Jewelers' Association, 101 S. 11th St., departed at

once after the convention for Harwichport, Mass., where he will rejoin his family and will, after spending a week there, return with his family to this city.

R. L. Saunders, 13 S. 8th St., is reported to contemplate closing his store at 604 N. 2d St., and to concentrate his business at the 8th St., establishment. The N. 2d St. store has been the parent store and has been regarded almost as a landmark of the old Northern Liberties District.

George Thorman, with Harry Pollard, manufacturing jeweler, 1107 Chestnut St., is rapidly convalescing from shock. Mr. Thorman was in a cottage in Ventnor, just below Atlantic City during a severe electrical storm recently and a bolt of lightning which struck the house injured him.

Louis Sickles, of M. Sickles & Sons, had as his guest at his Summer home at Wyncote, Pa., last week, Miss Bessie Kendall, daughter of A. M. Kendall, of Millville, N. J. Benjamin Krischer has returned to M. Sickles & Sons after a month's absence during which time he sought successfully the restoration of his health.

L. B. Jones, with C. A. Marsh & Co., Attleboro, was in this city, last week, renewing acquaintances in the trade. Mr. Jones has been away from the Philadelphia jewelry trade for about three years, since which time he has been traveling in the west. He says that business is brighter and breezier in the west than in the east.

Charles Smith, recently retired as a lapidist from 719 Sansom St., where he was long established in business, has accepted a position with his brother, Harry Smith, at 717 Sansom St., who is also a lapidist. Charles Smith is assuming charge of his brother's business during his absence in the Pocono Mountains, to recuperate from a physical breakdown.

It became known last week that Max Henschel, a retail jeweler, 2313 Germantown Ave., was financially involved. Mr. Henschel has not been seen by reporters since early last week, and it is believed that he has left the city. Mrs. Henschel is in charge of the store. Efforts are being made by his creditors to avert a sale of the stock until bankruptcy proceedings may be legally put into effect. Mr. Henschel bought out the place of William Liener about a year ago. The latter removed to N. Front St.

To attend the Pennsylvania Retail Jewelers' convention and take a peep also at the manufacturing opticians' display in Musical Fund Hall and to enjoy the series of entertainments planned for both jeweler and optician the following out-of-town retailers were here, last week: W. W. Harper, Hurllock, Md.; J. Charles Ernst, Charlestown, W. Va.; S. W. Hart, Kennett Square, Pa.; Calvin Sallada, Lambertville, Pa.; W. K. Schlotterer, Schwenkville, Pa.; H. V. Stratton, Bordentown, N. J.; Roland Oliver, Burlington, N. J.; H. S. Kratz, Souderton, Pa.; Ellwood K. Bean, Lansdale, Pa.; J. S. Garrison, Cape May, N. J.; A. E. Baylies, Bristol, Pa.; R. M. Mason, Bishopville, S. C.; David H. Krause, North Wales, Pa.; H. B. MacFarlan, East Downingtown, Pa.; J. W. Parrish, Newark, Del.; B. F. Geist, Pottsville, Pa.; Joseph Gerz, Minersville, Pa.; Gus Rietzen, Ashland, Pa.; E. J. Weider, Pennsburg, Pa.; Josiah B. Heckler, Main-

land; Thomas and Brown Topping, of Topping Bros., Milford, Del.; I. A. Deisher, Reading, Pa.; P. J. Diener, Harrisburg; E. P. Zane, Christiana, Pa.; M. R. Lummis, Salem, N. J.; Robert Steel, Hammononton, N. J.; W. R. Hartenstein, Conshohocken, Pa.; Otto Jarek, Easton, Pa.; W. K. Schlotterer, Schwenkville; J. P. Archibald, Blairsville, Pa.; F. C. Graul, Pittsburg.

## Canada Notes.

Francis Pyman, Enderby, B. C., has assigned to G. Bell.

The Crown Optical Co., Winnipeg, Man., is disposing of its jewelry stock by auction.

L. H. Lewis has disposed of his interest in the Canadian Jewelry & Importing Co., Ltd., Vancouver, B. C.

J. A. Hetherington, secretary of the Goldsmiths' Stock Co., Toronto, Ont., is enjoying a vacation at Welland, Ont.

E. G. Ripley, Dryden, Ont., has moved into new premises in the Blair block, and made considerable additions to his stock.

A disastrous fire, on the night of Saturday, Aug. 8, destroyed a number of stores in Stirling, Ont., including the jewelry store of Herbert Hadley.

Albert Elms, manager of the silver department of Rytic Bros., Ltd., Toronto, Ont., is rusticiating in the Rainy River district, Northwest Ontario.

Out-of-town jewelers visiting Toronto, Ont., last week included W. E. Best, Saul Ste. Marie; R. F. Dale, Harriston; Charles Wendt, Mildmay; J. S. Beck, Brampton; J. Hollingshead, Gottenham, and I. Jenkinson, Lakefield, all Ontario, and D. G. Thomson, Westville, N. S.

The other day a man coming into Montreal lost a small package of jewelry which he left behind him in a street car. He advertised the loss, offering a liberal reward if the finder would return the package to Henry Birks & Sons. Inquiry at Messrs. Birks' store elicited the information that the package contained a few pieces of jewelry which the advertiser had taken out to show to his intended wife.

A well-dressed man, giving the name of John V. Smith, was arrested at Port Huron, Mich., Aug. 11, while attempting to sell diamonds in a saloon. On his person were found four loose diamonds and three set rings valued at about \$1,000 in all. He was charged with smuggling and the diamonds were confiscated. In a room occupied by Smith at the Hotel Vendome, Saranac, Ont., four more unset stones valued at \$700 were found.

Three men named Wm. Snow, John Walker and Reuben Costello, respectively, a well-known to the police, were arrested at Niagara Falls, N. Y., as suspicious characters on Saturday, Aug. 8. When caught one of them threw into the canal a bag containing jewelry, and another similar disposed of a gold watch. The jewelry upon being recovered, was identified as having been stolen from the jewelry store of Cline Bros., 125½ Queen St. W., Toronto, about a week previously, when \$100 of goods were taken. The prisoners agreed to waive extradition proceedings and to return to Toronto for trial. They were brought before the police magistrate late and remanded for a week.

# TURQUOISE

IN THE ROUGH

**Q** I feel I can say without egotism, that you have heard of my Moqui Turquoise Mine, Nevada. Its production of Turquoise Matrix is universally recognized as the best on the market owing to its beautiful, heavenly blue color and peculiar fantastic markings and for the lapidary it is superior to any other and produces better and more cut stones to the pound than any other material on the market, owing to its natural nugget formation, almost free from rock. **Q** I can supply you now with the rough in any quantity and quality, at prices ranging from \$4.00 to \$20.00 per pound Troy. No sample less than one pound. Order at once.

**S. SIMMONS**

315 S. Spring Street, Los Angeles, Cal.

THE MOQUI TURQUOISE  
MINE, NEVADA

## Providence.

### TRADE CONDITIONS.

There was a slight improvement in general manufacturing jewelry business in this city during the last week as compared with that of the preceding week, but it is not sufficient yet to place the majority of the shops on full time. There appears but little activity in New York orders as indicated from the business of the week, but there is a better feeling existing than for some time past. While many of the salesmen have started on their western trips, there are fully half the number who are waiting until after Sept. 1 for people to return from the seashore, the country and their vacations for a more positive revival of trade. Manufacturers of hollow seamless wire for bracelets report a big increase in call for this line of stock, and one of them are working 12 and 14 hours a day.

J. W. Grant and family are at Shawomet beach for the Summer.

David Jacoby is on a western trip in the interests of the Providence Stock Co.

Orin M. Otis, president of Otis Bros. Co., and wife, have gone to the White Mountains.

Arnold C. Messler was registered at the Ocean View House, Block Island, last week.

William P. Otis, of Harvey & Otis, and wife, are spending a couple of weeks at Sakonnet.

Maurice Ettlinger and wife were registered at the Narragansett Pier Casino, the past week.

The Cutler Jewelry Co., 7 Eddy St., is calling for experienced girls to charge and solder stone rings.

Harry Cutler, of the Cutler Jewelry Co., and wife, are registered at Bayside Hotel, Longmeadow, for a few weeks.

E. Merle Bixby, head of the silverware department of the Shepard Co., started Monday, on a week's vacation.

E. C. Ostby, of the Ostby & Barton Co., is in Maine, where he is enjoying a respite of several weeks from business cares.

Charles F. Irons and Charles A. Russell, of Irons & Russell, spent a portion of last week at the Plympton House, Watch Hill.

Benedict Lederer, of the S. & B. Lederer Co., and E. Lederer and wife, were guests at the Casino at Narragansett Pier, the past week.

A large and fully equipped up-to-date coloring plant has been installed in the new factory of L. Davidsburg in the Doran building.

Frank W. Marden, treasurer of the Marden & Kettley Co., and family, are sojourning in New Hampshire, among the White Mountains.

Theodore W. Foster, president of the T. W. Foster & Bro. Co., and wife, arrived at Greene's Inn at Narragansett Pier, Sunday, for a few days' stay.

Charles E. Hansen, president of the Hansen-Bennett Co., has been granted a patent for a design of a match-box, which he has assigned to the company.

M. Herz, buyer for Mandel Bros., Chicago, formerly with R. H. Macy & Co., arrived in this city the latter part of the week to look over lines of Fall goods.

Moritz Freudenberg, New York, who is on a pleasure trip through the east, accompanied by his wife, visited several of the jewelry manufacturers in this city, the past week.

Charles Herbert Fowler, a jeweler of New Brunswick, son of James D. Fowler,

who is also a jeweler, was married in this city, last week, to Miss Jenette C. Yerxa, of New Brunswick.

Stockholders of the capital stock of the Silversmiths Co., residing in this city and vicinity, have been notified of a quarterly dividend of \$1 per share on all holdings of record of Aug. 13.

Leo Samuels, of the Outlet Co., left Sunday morning on a week's automobile trip through Massachusetts, New Hampshire and Maine, with Gov. J. H. Higgins, of Rhode Island, as his guest.

Charles E. Westcott, of Snow & Westcott, has returned from his Summer cottage at Cotuit, on Cape Cod, Mass., where he has been spending five months of July and August, fishing and yachting.

Mr. and Mrs. Frank T. Pearce have returned from a fortnight's visit with Capt. H. M. Knowles, superintendent of the Rhode Island District of the United States Lighthouse Service, at Point Judith Pond.

Among the devotees of the tennis courts this season are Englehart C. Ostby, president, and Ralph G. Ostby, salesman of the Ostby & Barton Co. They are both members of the Wannamoisett Country Club.

Fred C. Lawton, superintendent of the Gorham Co., accompanied by his wife, was among the guests at Portsmouth, N. H., on the occasion of the presentation of a silver service made for the battleship *Neve Hampshire*.

Robert O. Smith, of the Cook, Dunbar, Smith Co., and Aldridge G. Pearce, superintendent of the F. T. Pearce Co., left Saturday, on a two weeks' motor trip to Whitefield, N. H., and other places in the White Mountains.

The employes of J. A. Foster Co. had their annual outing Friday at East Providence Center, where a feature of the day was a baseball game with the Volunteer Hose team of that village, the latter winning by a score of 11 to 9.

At the organization of the River View Boat Club on Thursday evening, Charles D. Waite, of Waite, Mathewson & Co., was elected treasurer, and William P. Otis, of Harvey & Otis, chairman of the membership committee. Earl Kettley is also a member of the latter committee.

Horace W. Steere, of Arnold & Steere, accompanied by his wife, left Sunday morning, on an extended automobile trip of 12 or 15 days. They intend to go to Worcester, Springfield, Pittsfield, Albany, Saratoga, the White Mountains and Portland, Me. They will return along the coast.

Henry C. Luther was elected by the United States Volunteer Veteran Association as delegate to the General Committee, at its annual meeting held on Thursday last at Field's Point, on Narragansett Bay. Major Everett S. Horton, Attleboro, was among those present and made an address.

Among the buyers who paid manufacturing jewelers of this city a call, the past week, were: B. E. Moore, buyer and jewelry salesman, and Miss Maude Waters, buyer in the silverware department of Lebolt & Co., New York; L. Weinberg and William A. Steinberg, of J. Floersheim & Co., Chicago; Harry Bloomfield, of Bloomfield Bros., Montreal, and S. Davis, of S. Davis & Co., Pittsburg, Pa.

The rifle team that is to represent the

Rhode Island National Guard at the national rifle match, to be shot at Camp Perry, Ohio, during the week of Aug. 21, has been announced in General Orders from the military headquarters. Among the members are several jewelers. Major Howard D. Wilcox, of D. Wilcox Co., will be captain; Brig.-Gen. Herbert S. Tanner, coach, and Charles S. Harwood and Charles Fletcher.

Plans have been prepared for rebuilding portions of the Billings block, on Eddy St., which was recently burned. These provide for a new wall on the Worcester street side above the second story, new tar and gravel roof, third and fifth floors of new material, sprinklers on all floors and on outside walls, iron sash, wired glass windows, new elevator in fireproof well, low pressure steam heating plant and wired for electric light and power.

A slight blaze in the jewelry shop of Capron & Co., on the top floor of the building, 43 Sabin St., about 4.30 o'clock, Saturday morning, released the automatic sprinkler service and flooded the building from top to bottom, causing damage to the extent of nearly \$3,000. The Protective Department was called and spread a number of covers which materially assisted in keeping down the loss. Goldsmith & Harzberg, jewelers, are also located in this building and suffered considerable damage.

There was a bit of romance surrounding the marriage in this city of Edward A. Anthony and Miss Gladys Irene Gould, both of Attleboro. Apparently wishing to avoid the bother of a more formal wedding, the young people decided to come to this city and be married quietly. The groom is the son of John S. Anthony, a manufacturing jeweler, for whom the young man is salesman. The bride's father is Charles M. Gould, a jeweler. Both are prominent in the younger set in Attleboro, and are very popular. News of the marriage was received with considerable surprise by the parents of both the young people.

About 300 employes of the B. A. Ballou Co., Inc., of this city, went to Newport Friday on their annual excursion, and made the beach their place of outing. The factory closed shortly after 10 o'clock and all embarked on the steamer for a sail down the bay. Upon their arrival at Newport they took special cars for the beach, where, after a series of sports on the sand, arranged for both men and women, bathing was in order, which all enjoyed. The excursionists re-embarked on the special electric and at 6.45 o'clock sailed for this city, a box luncheon being provided on the boat and the sail up Narragansett Bay for 30 miles to this city by moonlight being not the least of the enjoyable features of the outing. Each member of the party wore a six-pointed star with a letter "B" thereon, all were furnished with boxes of candy for the women and cigars for the men, the funds to pay all of the expenses being supplied by the firm.

The retail jewelry store of John Gilles, Fort Scott, Kans., was entered a short time ago by burglars, who stole six gold bracelets and other stock. A young girl, 13 years of age, who is supposed to know something about the robbery, was subsequently arrested.

## Boston.

Louis Wilks, formerly with Sam Mendelssohn, is now with the Howard Jewelry Co.

Gay Sterr, of H. E. Alsterlund & Co., manufacturing jewelers, is at Newport, R. I., on his vacation.

E. A. Bigelow, treasurer of the E. Howard Clock Co., is at his Bennington, N. H., farm for a fortnight.

David Nemser, for 14 years with E. A. Cowan as salesman, is now with M. Sickles & Sons, Philadelphia.

Miss Nuremberg, bookkeeper for A. S. Hirshberg, has been ill for nearly a month, but is now reported improving in health.

John C. Sawyer is at his handsome new shore residence at Kenberma, Nantasket Beach, for the remainder of the Summer.

Walter H. Beane, a watchmaker of Waltham, has filed a petition in bankruptcy here. His liabilities are \$639, and he has no assets.

Joseph Cowan will start this week on a western trip and E. W. Carleton, New England salesman, is on a trip through the northern section of his territory.

Buyers in town during the week included: W. A. Harper, Gardiner, Me.; F. S. Dyke, Northfield, Vt.; A. D. Bastein, Williamstown, Mass.; J. M. Johnson, Sanford, Me.

Maj. William P. Shreve, of the Shreve, Crump & Low Co., is on a vacation trip to Vermont. A. W. Armington, diamond buyer for the company, has returned this week from a trip to Europe, where he visited the principal diamond and precious stones markets.

C. D. Smith, of the Smith, Patterson Co., is at his country home near Keene, N. H. James Kingman, jewelry buyer, has returned from an outing at Castile, N. Y. Joseph D. Bateholder, head of the silverware and glass departments, is taking a vacation on the Cape.

The Thomas Long Co. has succeeded in recovering the \$750 diamond stolen from the concern a few weeks ago by a clever woman operator, who is now in the reformatory for the crime. It was sold by her reputed husband to a Providence theater manager, and by him it was pawned with J. A. Foster, of that city, for considerably less than its value.

John A. Corbett, who has been with A. J. Landry & Co. for the past five years, has removed the business to room 608 in the Washington building, and will continue it there as manager, Mr. Landry having gone to his farm in Maine for a respite from business. The building at the corner of Temple Pl., where he was located for several years, and the adjoining, one where Freeman & Taylor were located, have been torn down within a short time.

Joseph B. Levesque, charged with forgery on three counts, was discharged on one count and held for the grand jury on two counts by Associate Justice Bixby in the Brockton police court Saturday. The complainant was Henry L. Thorson, manager for Davis Bros., a Boston house, for whom Levesque was a salesman. It was charged that he forged three contracts for the sale of three watches, and that he appropriated the watches for his own use. Levesque

appealed and bail was fixed at \$300 in each case.

Following a trip to this city with his wife, Bishara Couri, an Assyrian dealer in diamonds and jewelry, at No. 1 Monument St., Portland, Me., was robbed, presumably by pickpockets, of several valuable rings and diamonds, worth \$700, just as he was alighting from the 10.15 train from Boston. Couri had the jewels in a leather pocket-book which he carried in his hip pocket. He says he took off his coat and walked to the drinking fountain once or twice, and that presumably someone saw it and relieved him of it as he was getting off the train.

## Attleboro.

Jason L. Wells has left on a short trip.

Clarence L. Watson has entirely recovered from his recent illness.

John M. Fisher entertained over Sunday Prof. A. S. Watkins, Prohibition candidate for Vice-President.

The Horton-Angell nine beat Bates & Bacon 7 to 1, and Robert Earle Co. won from D. F. Briggs Co., 11 to 7 in the Jewelers' League Saturday.

The employes of the Standard Button Co. are planning a big outing and clambake. It will be held on Aug. 22 on the grounds of the Highland Country Club.

Harold O. Bigney while returning late one evening last week discovered a man prowling about his home. The intruder escaped in a hurry. Nothing was taken.

The contract was given last week to build the new factory of Albert S. Ingraham at the corner of Dunham and Union Sts. The factory will be of brick instead of wood as was originally planned.

Numa A. Guyot, an Attleboro hub-cutter, has a valuable collection of drawings and designs for watch cases that are over 200 years old. They originally came from Switzerland. They have been in the possession of the Guyot family for three generations.

William H. Saart, senior member of W. H. Saart & Co., and wife were both injured last Monday evening in a rear end electric car collision on the Taunton & Pawtucket line, near Ridge Hill switch. Mr. Saart was cut and bruised about the head and face, while his wife was seriously bruised and jammed. No serious results are anticipated.

A new concern, to locate in Attleboro, has been incorporated under the laws of the State of Massachusetts. It will be known as the Joseph Bloom Co. The capitalization figure is \$30,000, and of this sum \$5,000 has been paid in. The firm will manufacture jewelry, with rope chain, as a specialty. Joseph Bloom is president; John E. Barry, treasurer, and Arthur A. Clark, secretary. Mr. Bloom says a new method of chain-making will be used. Mr. Bloom was formerly in the pearl business on County St.

The general store of Dominick & Nefra, 1307 Penfold Ave., Lorain, O., was entered, about a week ago, by burglars who stole eight watches and a small amount of general merchandise. Entrance to the store was gained through a rear window.

## North Attleboro

Fred S. Gilbert left Saturday afternoon for the west.

Albert B. Randall has gone west for the Codding & Heilborn Co.

Edward D. Sturtevant is home from a six weeks' stay at York Beach, Me.

T. C. Frothingham & Co. resumed work Monday, after a two weeks' vacation.

Howard Gardiner has been on an eastern trip for H. A. Gardiner & Co., Plainville.

Howard Ballou, who has been spending the Summer in Maine, has returned home very much improved in health.

Dr. Annie Cheever, daughter of George W. Cheever, of Cheever, Tweedy & Co., was married Aug. 11 to Ernest T. Upham.

Burglars made two unsuccessful efforts to enter the home of Donald Le Street, western representative for the H. D. Merritt Co., Wednesday evening. Neighbors frightened the men in both instances.

Although the second dividend of 25 per cent. was declared five weeks ago by the receiver of the Jewelers' National Bank 140 depositors, representing one-quarter of the dividend, have not called for the money.

Manufacturers are interested in the announcement that an earlier mail will be given to North Attleboro. The first mail will arrive at 6.20 and be distributed by 7 o'clock, an hour earlier than what is now enjoyed, and will therefore facilitate filling of orders.

John F. McNulty left last week for Rock Springs, Wyo., where he will open a retail jewelry store. He was given a public reception one night last week. The employes and firm of George L. Paine & Co. presented him with a purse of money besides considerable jewelry.

The clogging of a pipe leading to the boiler necessitated the closing of the Plainville factories Wednesday afternoon at 2 o'clock for the day. It stopped the supply of water, and the register stood at a dangerously high figure. For a brief spell an explosion was feared.

The first report of the Jewelers & Silver Smiths' Co-Operative Refining Co. has been submitted by the treasurer, Alton H. Riley, as follows: Real estate, \$3,525; cash and debts receivable, \$3,185; manufactures and merchandise, \$3,933; profit and loss, \$5,194; total, \$15,837. Capital stock, \$15,000; accounts payable, \$837; total, \$15,837.

## New Orleans, La.

A. L. Beaumont, Plain Dealing, this State, is spending a two weeks' vacation in Washington, D. C.

Word was received from Alexandria recently to the effect that a force of men under charge of George J. Hoffman representing a clock company of St. Louis, Mo., had started to install a large tower clock in the big tower of St. Francis Xavier's Catholic Church in that town. The dials of the clock are nine feet in diameter.

Mrs. H. Keil, who keeps an antique jewelry store at 320 Royal St., has again received what purports to be a letter from the Black Hand, demanding \$1,000. The first letter was received July 15, at which time \$500 was demanded. Mrs. Keil has been prostrated for fear an attempt to harm her husband or son will be made.

## Connecticut.

M. P. Leghorn and family, New Britain, returned, last week, from a short sojourn at Fort Trumbull Beach, Milford.

The employes of Factory "L," International Silver Co., Wallingford, enjoyed an outing Aug. 8, at Paden's Grove.

President Charles F. Smith, of Landers, Frary & Clark, New Britain, has returned from Nova Scotia, where he has been spending his vacation.

Stanley Warner, who travels for the New England Watch Co., Waterbury, has started on a western business trip and expects to be away until October.

The Probate Court has appointed Bernard Gregory and Robert Blair appraisers of the estate of the late Wm. T. Steven, formerly engaged in business as an optician, in Hartford.

The safe in the store of H. S. Townsend, Winsted, which passed through a fire, recently, was opened, last week, and all its contents were found to be intact. Some of the jewelry was tarnished.

The Bradley & Hubbard Mfg. Co., Meriden, has just been awarded a contract by the New York, New Haven & Hartford Railroad Co., to install the ornamental iron work in the large new Union Depot.

Among those who attended the recent reunion of the Connecticut Legislature, held at Cosey Beach, near New Haven, were: Charles D. Morris, Frank A. Wallace and Samuel Hodgkinson, all well known in the trade.

P. G. Alvert, who recently opened a jewelry and watch repairing business at 261 Main St., Danbury, is about to discontinue business and return to New York, where he will take a position with a large establishment.

Joseph W. Holmes, who worked for many years as a watchmaker in Waterbury, died at that place Aug. 11, aged 50 years. The deceased was born in Waterville. He is survived by his widow, two sons and three daughters.

C. H. Tibbits has been made the defendant in a suit for \$500 brought against him by Peter Lacroix, who alleges that Mr. Tibbits' automobile collided with the plaintiff's team of horses, July 21, 1907, threw the plaintiff out of the wagon and caused much damage.

Wm. Forest, who died recently at Lang's Sanitarium, in Waterbury, worked for several years in the case department of the Seth Thomas Clock Co., Thomaston. The deceased was a well known resident of Waterbury. Mr. Forest's wife, who has been sojourning in Scotland for the past three months, was informed of his death by cablegram.

A spark from a fire engine on the way to a fire recently landed in an awning over the display windows in the store of Henry Kohn & Sons, Hartford, and in a short time the large canopy was ablaze threatening the large plate glass windows above and below it. Firemen finally extinguished the blaze by means of hand extinguishers and thus saved the windows.

The annual meeting of the stockholders of the Wm. E. Gilbert Clock Co., Winsted, was held at the office of the concern, Aug. 13. George B. Owen, Jr., of New York, was elected director to fill the vacancy

caused by the death of the late Henry Gay. Resolutions on the death of Mr. Gay were adopted by the stockholders and copies were ordered to be sent to the family and to the *Winsted Evening Citizen*, for publication.

## Lancaster, Pa.

George Tounsley, jeweler at New Holland, has closed out his business.

John J. Bowman, of Ezra F. Bowman's Sons, visited Harrisburg last week.

Marcus Edelman last week visited Philadelphia, New York and Paterson, N. J.

A. Burns, of the William L. Gilbert Clock Co., paid his initial trip to Lancaster last week.

John B. Roth, Jr., manufacturing jeweler, with his family, spent last week at Atlantic City.

The Boyd Optical Co. last week entertained its employes with a picnic at Rocky Springs Park.

John M. Shookers, with Louis Weber & Son, was married, Aug. 12, to Miss Katherine F. Sherts, of this place.

Louis Weber & Son are making an extensive addition to their large store, with a view of putting in new departments.

A. H. Rosenstein, president of the Lancaster Silver Plate Co., last week visited Harrisburg, Scranton and Wilkesbarre.

F. R. Helms, a jeweler of Hamlet, N. C., who is watch inspector of the Seaboard Air Line, spent last week with Lancaster friends.

C. F. Reisner, representing the H. S. Meiskey Co., with his family, is back from the mountains of central Pennsylvania. Miss Leila Shaut has been added to the office force of the firm.

C. N. Jones, Parkersburg, W. Va., has entered the local technical school as a student in watchmaking, and C. M. Newroh, Sharon, Pa., has enrolled as a student in watchmaking and engraving. Jesse Smith, a student of the school, has returned from a two weeks' camping out trip on Muddy Creek, York County, Pa., with a club.

The following jewelers were in Lancaster last week: Eli Miller, with P. G. Diener, Harrisburg; J. H. Sensenig, New Holland; P. B. Shomer, Baltimore; N. W. Pinkerton, Manheim; Robert Porter, Philadelphia; S. H. Miller, Mt. Joy; Robert Hudson, of Helm, Pa.; H. F. Maurer, Strasburg, Pa.; C. E. Huckle, Ephrata.

The following Lancastrians last week attended the annual convention of the American Association of Opticians at Philadelphia: F. A. Peters, of the H. S. Meiskey Co.; W. W. Appel; D. F. Grove, in charge of the optical department of Louis Weber & Sons; Dr. H. Hohner Boyd, and George R. Huber, of the Boyd Optical Co.

Isaac Weidler, of this city, arrested in Philadelphia some time ago on the charge of embezzling goods, mostly jewelry, valued at \$2,222.75, from the Philadelphia house of William Grant & Co., was turned over to the Lancaster authorities last week by the Philadelphia police. He was given a hearing on Aug. 13 by Alderman Stauffer, who held him for trial at court.

The firm style of the Geo. W. Ellis Jewelry Co., Butler, Mo., has been changed to the Eric Jewelry Co.

Rev. C. W. Dobson is preparing to open a jewelry store at Orleans, Ind.

John F. McNulty will soon open a retail jewelry store at Rock Springs, Wyo.

Roy Phillips, Wilmington, Del., has opened a watch repair shop in Darby, Pa.

Homor Archer has just begun business as a jewelry and watch repairer in West Union, Ia.

Morris Cohen, formerly of Cripple Creek, Colo., has opened a store at 405 15th St., Denver, Colo.

W. D. Vanderburg has moved from Seattle, Wash., to Los Angeles, Cal., where he has opened a jewelry store at 521 S. Spring St.

Wm. Beatty has opened a retail jewelry store in West Lebanon, Ind. He was formerly engaged in business in Indianapolis, Ind.

On Sept. 1, A. Rodgers Keese, Atlanta, Ga., will open a first-class jewelry store in Athens, Ga. Mr. Keese is a brother of Walter H. Keese, Anderson, S. C.

The American Silver Plate Co., St. Louis, Mo., has been incorporated with a capital stock of \$10,000, one-half of which is paid in. The incorporators are Harry Kopler, Samuel Lewis and Joseph Stamer.

George Godfrey, formerly with S. Nordlinger & Sons, Los Angeles, Cal., has started in the jewelry manufacturing and diamond setting business in the Wilcox Annex, 212 S. Spring St., in the same city.

## Harrisburg, Pa.

A charter has been granted by the State to the K. D. S. Gast Mercantile Co., of Mifflinsburg, with a capital stock of \$35,000.

G. A. Hutman will bring his family home from their Summer home at Mount Gettysburg, this week. Mr. Hutman's daughter has returned to her home in Pittsburg.

J. Zoeks, who now operates two stores in Steelton, is looking around for a suitable place in this county to establish another store. It is his intention to considerably improve his S. Front St. store.

Joseph Rinckenback and H. B. Rubin have returned from the convention of the Pennsylvania Retail Jewelers' Association and the American Association of Opticians in Philadelphia and report a very profitable and enjoyable meeting.

Harrisburg jewelers are much pleased at the decision of the State Retail Jewelers' Association to hold next year's convention here, and it is highly probable that a reorganization of the Harrisburg Jewelers' Association will be effected during the Winter in order to provide for the proper entertainment of the visiting members. Much activity can be expected among the jewelers and opticians along the line of needed legislation for the craft at the coming session of the State legislature.

Traveling representatives in Los Angeles, Cal., recently were: Sam Zimmern, Henry Zimmern & Co.; Wm. Elliott, Adelphi Silver Co.; Joseph Finley, Whiteside & Blank.

Salesmen visiting Boston during the week included: E. Cooper Stone, Jones & Woodland Co.; A. D. Manning, D. Wilcox & Co.; C. H. Craue, Strobell & Crane; W. H. Thornton, Henry A. Kirby; Arthur H. Schmitt, Harvey J. Flint Co.; William Matschke, A. Joralemon & Co.; G. W. Read, Larter & Sons; James W. Wortz, C. Sydney Smith & Co.; L. C. Martin, Martin-Copeland Co.; George A. Joachim, C. Cornelsen; E. H. Cox, Sussfeld, Lorsch & Co.; C. E. Mott, J. B. Bowden & Co.

Lancaster, Pa., was visited recently by the following traveling representatives: Max Traub, Lisauer & Co.; Mr. Gray, Swartz & Gray; Louis Gerstman, Dattelbaum & Friedman; John H. Baker, Jacobsohn Bros.; R. R. Carmichael, Hollmar, Rauch & Co.; S. E. Hall, Kinney Co.; E. J. Kerns, Simcon L. & George H. Rogers Co.; John A. Lassell, Albert Borgzinner & Co.; Mr. Wolly, Wolfshelm & Sacks; J. H. Claxton, Dennison Mfg. Co.; F. C. D. Bonner, F. & F. Felger; William A. Lamb, F. B. Rogers Silver Co.; Mr. Cohn, Louis Kauffman & Co.; L. Bachofer, S. R. Kamp & Co.

The following traveling representatives were in St. Louis, Mo., last week: G. W. Bleecker, Martin-Copeland Co.; Joseph Rifkin, L. Heller & Son; A. M. Liebman, E. P. Reichhelm & Co.; H. C. Kronka, H. C. Kionka & Co.; Alfred J. Moss, Ostby & Barton Co.; Mr. Mendoza, Van Dusen & Stokes Co.; Julius F. Sehumann, Jr., William Kinschler Co.; Jules Franklin; Edward O. Krauss, Western Watch Case Mfg. Co.; R. W. Sawyer, Shafer & Douglas; C. L. Krugler, Mandeville, Charrow & Crane; H. R. Blackman, Champenois & Co.; C. T. E. Smith, Reed & Barton; Lucien Rockwell, Poole Silver Co.; A. J. Sherrard, Enos Richardson & Co.; George S. Melville, D. Wilcox & Co.; L. M. Frank, Buffalo Jewelry Case Co.; C. A. Hulstrom, Wilcox & Evertsen.

The following traveling representatives called on the trade in Kansas City, Mo., during the past week: T. W. Agnew, New Haven Clock Co.; E. J. Hiller, Sussfeld, Lorsch & Co.; E. E. Stockton, E. Ingraham Co.; R. T. Kleckner, Theodore W. Foster & Bro. Co.; H. S. Noyes, Bates & Bacon; Richard Robinson, Shiman Bros. & Co.; C. W. Bleecker, Martin-Copeland Co.; C. A. Barnum, International Silver Co.; Frank T. Barton, Fontnean & Cook Co.; H. G. Pfardresher, Geo. L. Brown & Co.; W. F. Drexmit, Keystone Watch Case Co.; Wm. F. Perry, Bliss Bros. Co.; K. L. Taylor, Riley & French; Emil Pick, Hammel, Riglauder & Co.; Samuel Jacobson, Jacobson Bros.; Carl F. Haber, Towle Mfg. Co.; Frank W. Bloomer, E. I. Franklin & Co.; Joseph Phillips, Hipp, Didsheim & Bro.; I. J. Rosenthal, Rothschild Bros. & Co.

Traveling representatives calling on the trade in Omaha, Nebr., during the past week included: Frank T. Barton, Fontnean & Cook Co.; Frank E. Behrendt, Homan Silver Plate Co.; W. S. Willis, Gorham Co.; C. H. Davison, Kohn & Co.; R. F. Kleckner, Theodore W. Foster & Bro. Co.; Alvin Fox, Fox Bros. & Co.; Mr. Brinckle, C. F. Monroe Co.; Leo Cahn, G. A. Vecek; Mr. McIntyre, Kreis & Hubbard; M. Wolfe; G. S. Melville, D. Wilcox & Co.; C. H. Hartshorn, Krenentz & Co.; H. C. Barker, Warren & Williams; Thos. E. Rogers, Riker Bros.; S. W. Ahlby, E. In Richards & Co.; E. B. Frank, Parpoint Corporation; Mr. Fickemuer, Alvin Mfg. Co.; Mr. Emerson, S. O. Bigney & Co.; B. S. Cohen, Michigan Optical Co.; L. A. Lewis, I. Adler & Son; J. Rothschild, Kaffeman, Rothschild & Co.; Joseph Phillips, Hipp, Didsheim & Bro.

Among the traveling representatives who visited the trade at Pittsburg, Pa., last week, were the following: Frederick S. Potter, Flint, Blood & Co.; Mr. Tinker, Wm. B. Durgin Co.; J. W. Taylor, Taylor Bros. & Co.; R. C. Wilde, Meriden Cutlery Co.; Charles Levy, Bristol Mfg. Co.;

Benj. Schloss, A. Wallach & Co.; J. E. DeWyngeart, Scofield & DeWyngeart; L. E. Powell, S. O. Bigney & Co.; H. C. Berdan, Gorham Co.; Harry B. Kennion, Parks Bros. & Rogers; A. E. Hayward, Seth Thomas Clock Co.; Charles L. Drown, Ostby & Barton Co.; Mr. Frothingham, T. G. Frothingham & Co.; Alfred J. Moss, Ostby & Barton Co.; Fred H. England, Froelichstein, England & Klein; Frank W. Bloomer, E. I. Franklin & Co.; Mr. Macpherson, Macpherson-Roubaud Co.; W. H. Osborne, R. Wallace & Sons Mfg. Co.; E. A. Reed, Reed & Barton; Mr. Gow, Standard Button Co.; Charles H. Clark, W. G. Clark & Co.; George Remington, Maintien Bros. & Elliot; H. T. Daughaday, Providence Mfg. Co.; W. E. Hoswood, Fontnean & Cook Co.; Mr. Somes, Bates & Bacon, S. C. Corbin, Waterbury Clock Co.; George Pulzer, Goodfriend Bros.; Edwin F. Skinner, Roy Watch Case Co.; W. R. Shute, Day, Clark & Co.; C. W. Hickok, Graf, Washourne & Dunn.

Traveling representatives who called on the Cincinnati, O., trade during the past week included: J. T. Griffith, Jr., Carter, Howe & Co.; J. R. Carmichael, Bride & Tinkler; E. A. Reed and J. F. Dean, Reed & Barton; Thomas F. Fleming, Jones & Woodland Co.; S. E. Dickson, Adelphi Silver Co.; Lucien Rockwell, Poole Silver Co.; Frank E. Buffum, J. A. & S. W. Granbery; Fred D. Smith, Burstow, Kollmar & Co.; C. A. Hulstrom, Wilcox & Evertsen; T. H. Batcheller, Moore & Son; Fleetwood Lanneau, R. Blackinton & Co.; L. Seligsberger, Mauser Mfg. Co.; Henry E. Hart, Albert Lorsch & Co.; H. B. Bliss, B. Shanley, Jr., Co.; Edward O. Krauss, Western Watch Case Mfg. Co.; H. B. Matthews, Matthews Co.; A. J. Sherrard, Enos Richardson & Co.; J. W. McClannin, Wilcox Silver Plate Co.; Mr. Macpherson, M. Rouhand Co.; J. Gunzberger, I. Gunzberger & Son; J. Thompson, J. B. Bowden & Co.; Ernest Black, Louis Stern & Co.; Frank Brigham, Cheever, Tweedy & Co.; Arthur Dolan, Moore Mfg. Co.; Mr. Boss, Boss & Baldwin; Frank Whiting, Whiting & Davis; Fred Melcher, Scofield, Melcher & Scofield; Mr. Gau, Standard Button Co.; John Marsh, C. A. Marsh & Co.; H. F. Tourtelott, Waite, Thresher Co.; A. J. Brech, Bawo & Dotter; L. E. Powell, S. O. Bigney & Co.

### Last Week's New York Arrivals.

**THE CIRCULAR-WEEKLY each day posts in its office a bulletin of the latest buyers visiting New York, which every member of the trade is cordially invited to copy.**

**For the sum of \$10 (payable in advance), a daily list will be mailed or delivered during the Fall season (July 20 to Dec. 15), to the offices of those desiring this service.**

### News Gleanings.

The store of Herbert Knox & Co., Elgin, Ore., was damaged by water in a recent fire.

E. O. Peterson is erecting a new store building in Elgin, Nebr., for his jewelry stock.

J. W. Edmonds, Grand Junction, Col., has sold out to A. M. Cross, formerly of Pierce, Nebr.

Henry Zellerbach, Houston, Tex., will soon engage in the jewelry business at Hallettsville, Tex.

Harry B. Kennedy, of the Kennedy Jewelry Co., Aurora, Mo., has sold out his jewelry interests to Wilson Bros.

An interesting history of the business career and the development of the John B. Varick Co., Manchester, N. H., appeared in a recent issue of a local daily.

Mrs. Breuninger has closed out the business of her late husband, W. Breuninger. A. Breuninger, his son, has opened a watch repairing and jewelry manufacturing business at the Central building, Pennsylvania Ave., N. W., Washington, D. C.

The J. J. Sweeney Jewelry Co., Houston, Tex., moved recently from the old location at 310 Main St. into handsomely furnished quarters at 419 Main St. The new store is very spacious and contains every modern improvement.

C. C. F. Brandt, a young jeweler of Louisville, Ky., recently got himself into complications by writing a protest to the secretary of the local School Board against alleged actions, which he characterized as graft. This being on a postal card, the School Board threatened to bring a charge against him for violating the laws in regard to United States mails.

Theodore Overbeck, a jeweler, living at 1223 North Carolina St., Baltimore, Md., reported to the police of the Northeastern district, that sometime between 1 and 2 o'clock one morning, last week, while he was being driven from Mount Royal Station to his home in a cab he was robbed of a diamond stud, a pin and a sum of money valued in all at \$181. He stated that there were two men on the driver's seat when he entered the cab. He was unable, however, to say whether they had committed the robbery, as he fell asleep and did not awake until he had reached home. A man who tallies with the description given by Mr. Overbeck of one of the men was arrested in the Central district recently.

Frank Trainor, 18 years old, was arrested in Baltimore, last week, by Round Sergeant James and taken to the Northeastern Police Station on two charges of obtaining money by means of false representation. He was arrested at the instance of Frank A. Persohn, a jeweler of Baltimore. According to Mr. Persohn, the boy obtained an open-faced gold watch and fob worth \$18.00 and an Ingersoll watch worth \$1, a nickel watch worth \$1.50, and \$25 in money from him. Mr. Persohn testified that the young man appealed to him for the money, saying his father was away from the city and he needed the money to pay a freight bill on some goods that were shipped to Mr. Trainor, the boy's father.

IN WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN THE UNITED STATES PATENTS THAT HAVE EXPIRED AND THE REGISTERED TRADE-MARKS.

UNITED STATES PATENTS.

ISSUE OF AUG 11, 1908.

895,424. BELT-FASTENER PLATE HAVING BEADED OR ROLLED EDGES. GEORGE F. BULL, Birmingham, and ISAAC JACKSON, Glos-sop, England. Filed Oct. 26, 1906. Serial No. 340,758.

A headed metallic belt fastener plate produced by stamping or pressing the inwardly rolled bead of

which consists of a part of the plate which has been tapered or thinned towards the edge, substantially as hereinbefore described and as illustrated by the drawings.

895,454. MATCH-BOX. CHARLES E. HANSEN, Providence, R. I., assignor to Hansen-Bennett Co. Filed Aug. 16, 1907. Serial No. 388,850.

The combination with the body and cover of a match-box, of pivotally mounted means in the body

for holding the matches and means projecting above the upper end of and movable with said pivoted means for pressing the upper portion of said means out of the plane of the box wall when the cover is opened.

895,463. FOUNTAIN-PEN. WILLIAM A. HOUTSON, Tracy, Minn. Filed Sept. 9, 1907. Serial No. 391,935.

A fountain pen having a body with a reservoir therein, a thimble seated in the end of said reservoir and having an axial opening in the inner end thereof, a feeder mounted in said thimble and hav-

ing a thread connection therewith of high pitch, whereby a partial turn of said feeder may advance the same to close said opening, and a stop engaging said feeder and limiting the rotation thereof in either direction.

895,484. SPEED-MEASURE. CHARLES J. MILLIS, Pontiac, Mich., assignor of one-half to

William J. Hartwig, Detroit, Mich. Filed March 27, 1908. Serial No. 423,504.

A device for attaching a watch to a rotation counter, comprising a holder in the form of a trough-shaped segment of a circle having means at

a point intermediate its ends to rigidly attach the same to a part of the rotation counter, whereby when a watch is placed in the holder, said holder and watch form a handle to manipulate the rotation counter.

895,500. HAT FASTENING DEVICE. ELIZABETH C. SCANLAN, Newark, N. J. Filed Sept. 27, 1907. Serial No. 391,867.

In combination with a hat, means for fastening said hat to the head of the wearer, consisting of a

member secured to and projecting below the body of the hat in the form of a pair of loops, and a fastening member adapted to be horizontally inserted through said loops in said first-named member and engaging the hair of the wearer.

895,511. PEN OR PENCIL POINT PROTECTOR. HERBERT M. STURGIS, Kansas City, Mo., assignor to Aaron Levingston, Kansas City, Mo. Filed Jan 11, 1908. Serial No. 410,803.

A pen or pencil point protector comprising a sleeve having a spring jaw at its rear end and a truncated front end, and provided with a longitudinal slot, a clamp ring fitting on the sleeve and adapted to be slid rearwardly thereon to press the spring jaw inwardly, and a second sleeve fitting

telescopically on the first forward of the ring and provided between its ends with a spring having an inwardly projecting pin for engagement with the longitudinal slot of the first named sleeve and adapted when slid rearwardly to force the ring in the same direction in the event that said ring has not been previously so adjusted.

895,746. BUTTON, BROOCH, BELT-CLASP, AND BUCKLE-FRONT MADE FROM HORN OR HOOF. FRANCIS H. GROVE, Halesowen, England. Filed Aug. 4, 1906. Serial No. 329,268.

A horn or hoof button, brooch, belt clasp, or buckle front, having a dyed back surface and

a turned front surface thereby showing the dyed back surface through the semi-transparent hoof or horn substance at the front, substantially as set forth.

895,772. SECONDARY ELECTRIC CLOCK. FRANK F. LANDIS, Waynesboro, Pa. Filed Sept. 11, 1906. Serial No. 334,174.

In a secondary electric clock, the combination, of the frame, the dial train, comprising a ratchet wheel, electro-magnets, a lever provided with an armature adjacent to said magnets, another lever

pivoted on the opposite side of the frame, the inner ends of said two levers being pivotally connected by a link, the pivots in the two ends of leading to said receptacle, a reciprocating slide, an opposed yielding mounted bar, and means for operating the slide to cause it to engage and hold a coin between it and the yielding bar and in engagement with the reciprocal cbute.

895,835. CIGAR-TIP-CUTTING ATTACH-

MENT AND FASTENING DEVICE FOR CIGAR BOXES. RAYMOND BAKER, Philadelphia, Pa. Filed Jan. 11, 1908. Serial No. 410,385.

In combination with a cigar box provided with a

lid, co-operating means carried by the box and lid whereby when said lid is closed a cigar may be cut and said lid automatically locked to said box at the completion of the cutting operation.

895,845. SALT HOLDER. HENRY W. COMSTOCK, Chicago. Filed Nov. 12, 1907. Serial No. 401,850.

A condiment holder comprising a box having upper and lower bottoms, a plate located between said bottoms and having a set of fingers projecting

through said upper bottom and movable to and from the top of the box, a pin connected to said plate to advance the fingers, and extending through the lower bottom, and a spring between the plate and the said upper bottom, to retract the fingers.

895,865. SAFETY SCARF-PIN. JOHN ST. GEORGE JOYCE, Philadelphia, Pa. Filed May 29, 1907. Serial No. 376,240.

As a new article of manufacture a perforated

scarf-pin and a safety device provided with means for locking it in the perforations of said pin.

895,866. BRACELET. STEPHEN B. KENT, East Orange, N. J. Filed Nov. 5, 1907. Serial No. 400,863.

A bracelet comprising suitably hinged segments and a guard which bridges the space between the free ends of said segments when sep-

arated, said guard being secured to one of said segments by a universal joint and both guard and joint being completely incased by said segments when closed.

896,043. SPOON. MARY V. PUTNAM, New Orleans, La. Filed April 25, 1907. Serial No. 370,237.

As an article of manufacture, a spoon comprising a bowl of soft, resilient and non-absorbent

material having an integral shank, a handle and a longitudinal connecting pin extending between the shank and handle and joining the two parts together.

REISSUE.

12,843. TIME-STAMP. GEORGE E. PERRY, Chicago, Ill., assignor to Stromberg Electric Mfg. Co. Filed July 8, 1908. Serial No.

# THIS TOOL

Holds the pallet so that one jewel can be adjusted without danger of the other shifting.

Uses practical gauges to determine the amount jewel is to be shifted.

Holds all styles of pallets, large or small.

Full directions with each tool No. F-66. Each \$2.00.

## SWARTCHILD & COMPANY

If you have not a copy of our double-sized 440-page Catalogue, write at once. Sent gratis upon application.

Heyworth Building, Chicago

**THE LARGEST EXCLUSIVE JEWELERS' SUPPLY HOUSE IN THE WORLD**

BEWARE OF IMITATION

Patented July 25, 1905; May 21, 1907.  
Other patents applied for.  
Patented in foreign countries.

# AN IMPORTANT QUESTION

Before all manufacturers and dealers in watches and watch materials is whether you are to continue using old style watch bows with the resulting dissatisfaction among your customers and diversion of trade to your more progressive competitor,

OR,

Be *Up-to-Date*, and adopt the only *absolutely secure, durable and artistic* bow made,

# THE BALL BEARING BOW

**THE WACHTER MANUFACTURING CO.**  
HARTFORD, CONN.

Manufacturers of Ball Bearing Pendants and Bows and gold-filled Bead Neck Chains. All our gold-filled goods are stock plate 1-10.

THE FUNDAMENTALITY OF

# "Tavannes" Movements and "Cyma" Watches

manifests itself in their performance.

**ALL TRIALS HAVE PROVEN CONVINCING**

They possess all the features required and fully appreciated by the critical merchant to make a timepiece a satisfactory article of merchandise and,

**IN ADDITION TO THIS**

TAVANNES Movements and CYMA Watches give most satisfactory results when exposed to the extreme influence of TEMPERATURE, ELECTRICITY or MAGNETISM.

## TAVANNES WATCH COMPANY

131 Wabash Avenue  
Chicago

ADOLPHE SCHWOB, Sole Agent for the U. S.

2 and 4 MAIDEN LANE, NEW YORK

704 Market Street  
San Francisco

442,630. Original No. 885,676, dated April 21, 1908. Serial No. 256,915.  
 In a time stamp, the combination with a framing gage parts adapted to engage the surface to be impressed and adjust the impression mechanism actively thereto, of an impression mechanism having moving time controlled parts, a horologic motor for driving said parts mounted wholly on a frame, said impression mechanism being moveable relatively to said motor mechanism to make an impression, and a plurality of shafts, one of which shafts being operatively connected to said

motor mechanism, and another of said shafts being operatively connected to the time driven elements of said impression mechanism, said shafts constituting a continuous connection between said motor mechanism and said impression mechanism, and being adapted to occupy a substantially horizontal position when the stamp is in its normal position and adapted to move toward a vertical position when an impression is made, whereby shafts of the required length may be used without increasing the height of the stamp.

DESIGN.

9,440. SOUVENIR-SPOON. CREASEY J. WHELLAMS and ALFRED G. PINKHAM. St. Paul, Minn. Filed Feb. 13, 1908. Serial No. 415,758. Term of patent three and one-half years.

Paul, Minn. Filed Feb. 13, 1908. Serial No. 415,758. Term of patent three and one-half years.

UNITED STATES PATENTS THAT HAVE EXPIRED.

[Reported especially for THE JEWELERS' CIRCULAR-WEEKLY by R. W. Bishop, Patent Attorney, Washington, D. C.]

Issued Aug. 11, 1891.

- 157,376. FRUIT KNIFE. C. A. SHERMAN, Norwich, Conn., assignor to W. H. Watrous, Hartford, Conn.
- 157,449. UMBRELLA. L. H. CLOGG, Philadelphia, Pa.
- 157,470. FOUNTAIN PEN. L. B. WOOLFOLK, Cincinnati, O.
- 157,475. BUTTONER. A. S. DOUGLAS, Washington, D. C.
- 157,492. RUBY-PIN SETTER. W. R. JOHNSON, Rock Island, Ill., assignor of one-half to M. L. Galt, same place.
- 157,560. MATCH BOX. EBERHARD JUNGINGER, Stuttgart, Germany.
- 157,607. UMBRELLA TIP-CUP. ANTOINE REVEL, Lyons, France.
- 157,681. BALANCE-STAFF. J. E. SWARTHOUT Elmira, N. Y.
- 157,723. ORANGE-SPOON. A. F. JACKSON, Taunton, Mass., assignor to Reed & Barton Corporation, same place.
- 157,739. WATCH-CASE HINGE. GEORGE NEWTON, New York.
- 157,748. SPOON. W. S. O'BRIEN, San Francisco, Cal. Design issued Aug. 7, 1894, for 14 years.
- 23,548. BOX. A. A. LOW, Brooklyn, N. Y.

- Designs Issued Aug. 13, 1901, for Seven Years.
- 34,918. CUP. H. L. WHEELER, Brooklyn, N. Y.
- 34,921. NOSE-GUARD FOR EYEGLASSES. E. A. INSKEEP, Chicago, Ill.
- 34,923. COMB. C. F. FILOR, Trenton, N. J. Designs Issued Feb. 7, 1905, for Three and One-half Years.
- 37,322. and 37,323. PLATE OR DISK. W. A. PICKARD, Chicago, Ill.
- 37,327. MEMBER FOR MATCH-SAFES. A. T. OGDEN, Poughkeepsie, N. Y.

BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS, 1907, FROM THE Illustrated Official Journal.)

ISSUE OF JULY 29, 1908.

8,073. WATCHES. J. LEITOMISCHEL SKERIK, Bohemia, Austria. April 6.  
 Regulators. The arm *f* carrying the curb pins *h*, *h'* carries also a toothed sector *n* geared through the wheel *m* to a spindle *e*, which carries a pointer *g* arranged outside the dust-proof cover, so that

FIG. 3.

the regulation may be effected without removing this cover. A pin on the casing limits the movement of the arm *g* in each direction. Specifications No. 2913, A.D. 1876, No. 10,459, A.D. 1885, No. 12,546, A.D. 1894, and No. 16,387, A.D. 1902, are referred to.

8,218. SPEED INDICATORS. R. P. BROWN, Philadelphia, U. S. A. April 9.

Relates to speed indicators of the type in which a variation in speed produces a change in the level of a rotating column of liquid, thus moving a stylus over a clock-rotated disk. A tube *G*, preferably filled with mercury, communicates by a small hole *h'* with tubes *K* carrying reservoirs *H*,

FIG. 1.

which are eccentrically mounted so that by rotating them the movement of the mercury may be varied for any given number of revolutions. A float *S* communicates its motion by an arm *V* and a spring *W* to a stylus *Y* moving over a clock-rotated disk *P* marked according to the rate of revolution.

8,321. DRESS STUDS. S. MENOEL, Manchester, April 10.

In collar studs and the like with detachable heads, the head is attached to a hollow stem which slides in an outer one fixed to the base. A U-shaped spring *e* is fixed in the inner tube so that its ends, normally lying within the stem, are

forced by means of a conical block *g* through small holes *f*. The protruding ends, engaging with a rim *a'* on the outer stem, thus hold the parts together. The block *g* is attached to a spring-pressed stem *h* in the stud head, and is lifted by

FIG. 2.

any suitable means in order to disengage the lockingspring *e*. The spring arms may be formed from the hollow stem itself.

8,402. WATCHES. J. T. PENOLEBURY, Manchester. April 11. Period for granting patent not yet expired.

Cases; Dust Caps.—A dust-proof cover *a* of metal, celluloid, etc., is secured by "dog screws" *d* to the raised rim *c* of the hand *b*, and is provided with a slot *e* situated over the finger *f* of

FIG. 1.

the regulator *g*. A pivoted circular cap *h* normally covers the slot, but is provided with a similar slot adapted to be brought above the former by turning the cap, when the regulator may be set by a pin or penknife. Alternatively, an eccentric cap may be used, and the cover may be arranged to snap on, or be hinged or secured in a bezel.

Complete specifications accepted July 22, 1908. 1907.

- 16,414. SPECTACLE-CASE. PRICE.
- 20,065. FOUNTAIN-PEN. MUNRO.
- 23,702. FOUNTAIN-PEN. DE LA RUE. 1908.
- 6,709. BRACELET-FASTENING. HASLEHURST.
- 9,632. CLASP. KOPS.  
 Applications Filed July 13 to July 18, 1908.
- 14,809. CANDLE LAMP. J. R. CHURCHILL, Sheffield. Complete specification.
- 14,845. VEIL FASTENER. HEINRICH BROSSELER, London.
- 14,847. KNIVES AND FORKS. HENRY HARRIS, London.
- 14,858. HAIR FASTENER. G. G. SINCLAIR, London. Complete specifications.
- 14,900. CHAINS, BRACELETS, ETC. G. E. LANCELOTT, Birmingham. Complete specification.
- 15,032. ENAMEL JEWELRY. J. B. CHAUMET, Liverpool. Complete specification.
- 15,110. CLASP. MARTIN DUISBERG, London.
- 15,226. COLLAR BUTTON. G. C. BEALL, Newcastle.
- 15,249. TIME RECORDER. HARRY DYSON and J. S. GAUNT, Manchester.
- 15,279. BRACELET. WILHELM LANGBEIN, London.

R. M. Craig, Haskell, Tex., will shortly move into newly furnished quarters in the Henderson building. The premises will be remodeled and entirely renovated.

# Brooch and Case Combined

MANUFACTURED EXCLUSIVELY BY

## DUBOIS WATCH CASE CO.

MAKERS OF

### FINE SOLID GOLD WATCH CASES

Pat. June 9, 1908  
P. P.—No. 41

Specialties in Casing of Chronographs, Repeaters and all Kinds of Complicated Swiss Watches

21 and 23 Maiden Lane

New York City

The Only Safety Chatelaine Case which enables a Watch to Keep Correct Time and Cannot be Lost

#### MERITS

Holds the watch firmly and securely, thus preventing the movement from being jarred, as there is no swinging or bobbing up and down while the wearer is walking or running. Protects both the case and garment from wear.

*Absolute Security*

#### UTILITY

It can be raised so as to read the time, and reversed to have either the dial or back facing front, without removing brooch pin or watch from the garment. Can be worn on the shoulder, belt, chain or fob.

*Will not pull or wear off*

Patented U. S. June 9, 1908.  
Patents Pending in Foreign Countries.

MADE FOR ALL SIZES OF LADIES' WATCHES, BOTH OPEN FACE AND HUNTING

Watch worn as Chatelaine, showing it lifted to read the time.

#### Artistic and Practical

The only brooch and watch combined. Affords absolute security, as it has a safety catch. Nothing to wear out, as it works on friction bearings. Eliminates the possibility of loss of the watch owing to either bow, hook, swivel or link wearing out, breaking or coming apart, as in the old style chatelaine. Does not interfere with either winding or setting of movement.

Licensed Under Wachter Patent. Patented July 25, 1905; May 21, 1907

Watch worn on chain as a pendant, pinned to garment as additional security.

**Making an Electric Alarm Watch.**

**A**N electric alarm in which an ordinary watch may be used was described by S. K. Harlow, in a recent issue of the *Electrician and Mechanic*.

"The principle the alarm works upon is that the circuit closer is placed in a very delicate position of unstable equilibrium so that the least touch lets the circuit closer drop, thus connecting the circuit and ringing a bell. For our purpose we use the hour hand on a watch to trip a trigger

we see the principles this alarm works on, I will proceed to describe the construction of one as illustrated by the photograph, Fig. 1 A.

"Fig. 1 is a plan. The base may first be taken in hand. It is a 1/2-inch board, of any of the hard woods, of the dimensions shown. It is chamfered or beveled 1/4 inch to add to its neatness in appearance. A hole is bored 1/2 inch in diameter, clear through 1 1/2 inches from left end for watch pedestal (Fig. 2); two inches from center of this one a mortise through the board is made 1/4 inch square for trigger support (Fig. 4).

"The watch pedestal is a piece of curtain pole 7/8 inch diameter, bored the entire length with 3/8-inch bit, the lower end cut away until 1/2 inch in diameter, a set screw fitted 3/8 inch below top, then glued in the hole provided for it in the base. The standard is a piece of 3/8-inch diameter iron rod; a saw cut, with a hack saw, is made in upper end and a piece of 1/32-inch brass drilled with 1/8-inch drill, soldered in rod as shown; a binding-post from the carbon element of an old dry battery, with head filed as thin as possible, as in drawing, fits in this hole in the piece of brass. This is for the purpose of locking the watch holder in different positions.

"The watch holder (Fig. 3) is cut from a piece of hardwood 1/2 inch thick, to a size in which the watch fits tight, so as not to fall out. It may be sawed out with a compass saw, a piece of veneer or cigar box wood being glued on to form a back. When the glue is thoroughly dry and hard, the lower and middle portion is sawed out to the back; two mortises are made to receive the tangs of a piece of iron bar curved to radius of watch-holder ring, and the channel for the battery binding-post of the standard to slide in, drilled and filed out.

"This piece in my alarm was filed from the same piece of iron rod of which the standard was made, being barely the inscribed square in the rod. This curved bar is fitted to the ring of watch holder with any good cement. I used one composed of equal parts of pitch and gutta-percha.

"We next make the trigger support, Fig. 4, and glue it in the mortise we have previously made in the base. The wood part is now finished, and after thorough sandpapering, may be varnished.

"While we are waiting for the varnish to dry we proceed with the trigger, Fig. 5. It is a 1/16-inch brass wire 6 1/8 inches in length; the end to the left is filed flat until 1/32 or 3/64 inch thick, so that the minute hand may readily pass over the trigger without setting alarm going. At 2 3/8 inches from end a piece of 1/32-inch brass with a 1/8-inch hole drilled in it is soldered. At 1 1/4 inches it is gripped in a pair of pliers, 1/4 inch bent at an angle to bring the end in the center of the circuit closer; the remainder is bent in a parallel line with the other end. A small nick or notch is filed 3/16 inch from right end to engage in the upper edge of the circuit closer and hold it in a position of unstable equilibrium.

"The circuit closer is a piece of 1/32-inch sheet brass, 3 1/2 inches long and 1/2 inch wide; 1/4 inch from left end is soldered a piece of 1/16-inch brass wire 3/4 inch long; at 2 3/8 inches from center of wire is soldered a platinum point, D. This platinum

The Seth Thomas Clock Co. has received a letter from A. F. Goodhue, Fort Fairfield, Me., giving an interesting account of the loss and recovery of a Seth Thomas watch. During the first week in July, D. W. Haines, a resident of Fort Fairfield, found on his farm a watch, which he took to Mr. Goodhue for inspection. On the back of the watch's case were engraved the letters "E. W. T." On turning back on his books Mr. Goodhue found that 24 years ago he had sold the timepiece to Edward T. True, a well-known trapper and hunter of Fort Fairfield. Several years later True gave the watch to his son, Edward, who lost it while hunting in the woods on Mr. Haines' farm, 14 years ago. Last Winter his forest was cut down, and the "choppins" were burned in the Spring. After the fire the watch was found in the ashes.

that holds the circuit closer off its contact.

"The crystal is taken off the watch, it is then placed in the watch holder and the apparatus set at the time it is desired that the alarm shall go off. The hour hand is the one that sets the alarm working. The manner of setting is to turn the watch holder or raise or lower it until the trigger is in front of the hour at which the alarm is to ring. Of course, the position varies with different lengths of hour hands; in the case of short ones the trigger must be placed a little above the hour mark.

"I took off the hands of my watch and fitted hands made from No. 16 spring brass wire, hammered flat and filed to a point, the other end soldered to the same rings that remain when the old hands are broken off; that is, the part of the old hands that push on the running spindles. The hour hand may now be made of a length to just come to the circle on the dial, in which the hour and minute marks are placed. Now, since

Watch from the Plains of Abraham.

A UNIQUE reminder of the Battle of the Plains of Abraham is in the possession of Alexander Sterling, Montreal. It is a quarter-repeater French verge watch, in an admirable state of preservation. The watch belonged originally to Lieut. Vanquelin, of the army of Montcalm, who, after many deeds of valor, was slain during the notable engagement which decided the destiny of British North America. Including this watch, the effects of the young officer were sent home to his relatives in France after his death, and the watch was later brought out to Canada by one of them. This Lieut. Vanquelin was nearly related to the famous Capt. Vanquelin, who was in command of a small man-of-war during the struggle in the early part of 1760, and about whom so much was said in praise during the recent Tercentenary proceedings at Quebec, and whose gallant deeds at the time caused him to be honored by his conquerors.

The watch has an open face and gold hands. It strikes the hours and the quar-

ELECTRIC ALARM WATCH.

ters on different gongs, which emits very melodious sounds, imitating cathedral chimes. On the gold inner cover of the watch the name Protas is engraved, with Lyons as the place of manufacture. Mr. Sterling has made an expert examination of the watch and describes the movement as most admirably constructed. The watch is half an inch in thickness, and as the present owner remarks, a double interest attaches to it by the fact that it ticked in the pocket of an officer of the French army on that fateful day when Wolfe and Montcalm met, and in the fact that in a day when machinery rules, and the aim is for accuracy and energy more than beauty, this souvenir of a by-gone time still chimes out its hours and quarters to add poetry and romance to the insistent beats of time.

oxidize under sparking as fast as other metals.

"The connecting plates, Fig. 7, are cut from the same sheet brass as the circuit closer. One piece, the one in which the circuit closer is to swivel, is cut with an extra portion  $1\frac{1}{2}$  inches long,  $\frac{1}{4}$  inch wide; and two  $\frac{1}{16}$ -inch holes are drilled  $\frac{1}{8}$  inch from each end, as shown. Cut along lines e and f, bend up the ends at right angles on dotted lines A and B, so as to act as bearings for the brass wire on the circuit closer. Two  $\frac{1}{8}$ -inch holes are drilled in the main part of the connecting plate; one,  $\frac{1}{8}$  inch from the upper end, to receive a small brass screw to hold it to base, the other to receive the screw of the binding-post. The next connecting plate is  $2\frac{1}{2}$  inches long,  $\frac{1}{2}$  inch wide; a platinum point is soldered at  $\frac{3}{4}$  inch from upper end on

tion. Leclanche or dry batteries are best to use for this alarm. A single Leclanche cell works my alarm."

A. J. Rand, Holyoke, Mass., accompanied by his wife, is spending a few weeks in East Boothbay, Me.

A stranger recently made a fruitless attempt to secure a diamond ring and gold watch and chain from the Harrison Jewelry Co., Roanoke, Va., by means of a bogus check. The man signed his name on the check as French, the initials being doubtful, and variously interpreted as "L. C. C.," "D. C." and "H. C." The man has been described by Mr. Harrison as being about five feet 10 inches, weighing 160 pounds, clean shaven and of a dark and almost swarthy complexion. He wore eyeglasses and appeared to be of genteel appearance.

Silverware and money were stolen from the store of Mrs. Lizzie Moore at Village View, Media, Pa., recently. In their haste to get away the robbers dropped some silver knives and forks.

Three youthful suspects have been arrested for assaulting and robbing Joseph Johns, an Assyrian jewelry peddler, on the road between Jeannette and Grapeville, Pa., one day recently. It was Johns' first trip and the assault was committed in broad daylight. He offered resistance and was promptly knocked down by a blow from a stone, which hit him on the head. While prostrate the highwaymen are alleged to have rifled his pockets.

The Favorite Movement with both Trade and Public

# The Omega Movement

stands in high favor with the trade, and is constantly increasing in popularity for the reason that the public is quick to appreciate its merits.

The man who carries an Omega is proud of it and misses no opportunity to sound its praises to his friends. He finds it invariably and uniformly reliable. He learns to depend upon it and it never abuses his confidence.

**Ω**  
**OMEGA**

**Adaptable, Interchangeable, and Suited to all Requirements**

The Omega is made in all sizes to fit regular American cases, besides a number of Swiss sizes. Every part is interchangeable, and all are made with lever escapements, double roller and pendant set. There are six different grades—from seven jewels to twenty-one jewels—adjusted to heat, cold, and five positions.

## A NEW ONE AND A GOOD ONE

MR. EXCLUSIVE JEWELER:

Do you wish a case of maximum value at a minimum cost, in shapes the thinnest and models most superb—finish and engraving that of the finest 14K. solid gold line—a solid gold case throughout of extra heavy weight at about the same price as the best makes of gold filled.

This is a large order but WE ONLY can fill it in every respect. These cases are made in triple stock, the outside of which is 14K., and this 14K. stock is 1/4 of the total thickness of the backs. The inside is 10K. and a low K. between, which is crystalized, making a harder, stronger and stiffer case in every way than either a filled case or 14K. solid. Ask your Jobber or write us direct for Prices and Samples.

"LORD YORK"

"Send us a card with your name and address and we will send you an illustrated catalog describing and illustrating 'LORD YORK,' and his associates. He is the most interesting character for the Retail Jeweler in existence to-day. You can't afford to be without him."

### Maintaining the Integrity of the Trade-Mark.

(By JOHN IRVING ROMER, in *Printers' Ink.*)

**P**ATENT attorneys say that the amount of trade-mark litigation has increased enormously of late years. It usually takes the form of opposition on the part of owners of valuable trade names to the use by others of names having a striking resemblance.

This matter of trade-mark violation strikes at the very root of all advertising. At least 50 per cent. of the advertising being done to-day is for the purpose of creating property in trade-marks.

Now there appears to be a growing class of shrewd persons who seek to wrest from the successful advertiser his hard-won laurels. This thing is not simply a matter of sentiment—it is the most practical kind of a business proposition. Suppose you have spent \$100,000 in popularizing the name of a soap. Along comes another man with a soap which he calls by a similar name—perhaps only three or four letters of the name being changed. He trusts to such similarity to create confusion in the public mind, and to enable him to intercept a certain amount of the sales resulting from the great publicity given to the original article. If it is a palpable infringement the Patent Office or the courts will afford proper redress.

But infringers are growing more skilful. They are learning how to infringe and still keep out of harm's way. Problems are every day being put up to the Patent Office which are enough to turn the examiner's hair prematurely gray. If someone builds up a reputation for a "Rub-Dry" towel, has some other manufacturer the right to market a "Dry-Quick" towel or a "Rub-Down" towel?

Between such names there are points of similarity and also points of dissimilarity. The careful buyer will not confuse these names and purchase one when he intends to get the other.

But most people are not careful buyers. Advertisements are read hastily and only a general impression is left on the public's mind. The infringer realizes this, and it is a study with him to see how close he can come to a well-advertised trade name and still evade the penalty of the law. If he can invent a word sufficiently distinct to pass muster with the Patent Office and yet close enough to a famous trade-mark to confuse the large class of careless buyers, he may begin at once to reap where he has not sown.

One of the neatest bits of sarcasm ever handed down from the bench emanated from Judge Lacombe, in the case of the

National Biscuit Co. *vs.* Baker, involving the words "Uneeda" and "Iwanta":

"It is a curious fact that so many manufacturers of proprietary articles when confronted with some well-advertised trade name or mark of a rival manufacturer seem to find their inventive faculties so singularly unresponsive to their efforts to differentiate.

"Thus, in one case with the word 'Cottolene' before them, defendants' best effort at differentiation resulted in 'Cottoleo'; and 'Mongolia' seemed to another defendant entirely unlike 'Magnolia.' The manufacturer of the articles which defendants in the case at bar are selling seems to have had no better luck, for, with the word 'Uneeda' before him his device to avoid confusion was the adoption of the word 'Iwanta.'"

The whole publishing and advertising fraternity are interested in the preservation of the integrity of trade-marks. The infringer does not intend to advertise. His purpose is to secure the results of advertising without paying for them.

Therefore he is an Ishmaelite so far as we, who depend upon legitimate advertising for our living, are concerned.

The Patent Office in the first instance and the courts as a final resort can be depended upon to deal out even-handed justice. But the publishing and advertising interests wield a great deal of power in themselves, and they can make the course of the predatory manufacturer decidedly unpopular if the situation becomes sufficiently grave to warrant united action. And the situation certainly is becoming more and more serious every day.

It is not fair that a manufacturer who, by expenditure of money and brains, succeeds in creating value in a trade name should be harassed and put to heavy legal expense to defend his rights to property which he has already purchased in the regular way from newspapers and magazines. The more light that is let in upon this subject, the more apt will the commercial pirate be to hesitate before he tries to get on the market with a close approximation of a famous trade-mark.

The infringer's natural tenor of defense is that his proposed title is quite different from that of the article which it is alleged to resemble. He magnifies the points of dissimilarity and minimizes the points of similarity. How could any intelligent human being ever mistake one for the other? he argues. Perfectly preposterous! And there are clever lawyers who will build up for him a plausible defense.

Now, there must always be some points of dissimilarity between a trade-mark and

its infringement. As Justice Bradley pointed out in trying the case of the Celluloid Mfg. Co. *vs.* the Cellonite Mfg. Co., "The defendant's name is not identical with the complainant's name. That would be too gross an invasion of the complainant's right. Similarity, not identity, is the usual recourse when one party seeks to benefit himself by the good name of another."

Trade-marks are not handled like copyrights, but come within the province of the Patent Office, which places certain safeguards around them, realizing how valuable is the property they frequently represent. The person who wishes to register a trade-mark makes his application to the Patent Office according to required forms. The application, the name and symbol are printed in the *Patent Office Gazette*, and in one month's time, if no one has entered an opposition, the trade-mark is confirmed.

Then a new trade-mark must pass a double fire—first, that of the trained examiners of the Patent Office itself; next, that of all subscribers to the official publication.

It is, therefore, well worth the while of the owner of a valuable trade-mark to watch carefully the new applications that are published from month to month. In this way he may be able to nip in the bud some clever infringement which later might cause him endless trouble and serious financial loss. The *Patent Official Gazette* is a Government publication, admitting no advertisements, and is sent to any address for \$5 a year.

### What Some Jewelers Say.

**B**EAR us in mind when in need of glasses. If your eyes ache and your vision is becoming indistinct, you may have some error of refraction. Our methods for fitting glasses to the eyes are the most modern in use. We will take pleasure in examining your eyes and telling you the facts as they exist. H. J. Pippitt, Port Jervis, N. Y.

A lucky find is fully demonstrated by taking advantage of our present July "sub-basement" prices on jewelry. At the price goods are offered it will pay you to use a bit of that "rainy-day" money to secure some of them. You know it's at this store you always get "extra" bargains about now—besides, what you buy here you can always rely on. R. E. Inman & Co., McKee's Rocks, Pa.

We have often heard the remarks: "He is all right. He has been practicing for 27 years." Next time you hear that, think, has he kept step with progress, or is he where he was 27 years ago? They treated eyes by burning the lids 27 years ago. Some are practicing it yet, but they ought to be put in jail. You should know better than that yourself. C. B. Linn, Prescott, Ariz.

Souvenir Spoons.—We are showing a great variety of spoons which are original and exclusive of Duluth. It will pay you to inspect our stock before buying. Spoon like cut, \$1.50 to \$2, heavy sterling silver. J. B. Erd, Duluth, Minn.

Handsome Copper Goods.—Swellest line of copper goods ever shown in this city—coffee percolators, chafing dishes, lemonade sets. Note the beauty of the line in the window and come in and see the complete stock. Al. E. Henry, Rockford, Ill.

# STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

## Advances Made in the Art of Lock-Building

Old and Modern Means of Protecting Valuables from Lock-Breakers

THE question of securing proper protection in locks which are impervious to the ingenious attacks of burglars and cracksmen has always been an important one to the storekeeper, and particularly to the retail jeweler, owing to the valuable stock which he carries. Modern advances in the science of lock building have done a great deal in the way of guarding valuable stock, but entrances to stores and safes by lock breaking are still too numerous. The advances made in the construction of locks and the weak points in many of the old

FIG. 1.

locks were pointed out in an interesting article printed some time ago in the *Book-keeper and Business Man's Magazine*.

While it is a fact that many of the locks of the present day offer no real difficulty to the expert lockbreaker, it is seldom that he resorts to any of the devices which are commonly believed to be his stock in trade, says this writer.

It is also a notorious fact that the safeguarding of valuables depends largely upon the publicity of the receptacle, and in many cases this is absolutely the only protection.

Probably if our bankers throughout the country actually knew the inherent weakness of many of their ponderous vaults, and their combination locks with millions of changes, they would give the police force of our cities much more credit than they do. For it is well known to the lockbreaker, as well as to the lockmaker, that often what seems to the eye to be the utmost security, is really the greatest weakness.

When Shakespeare said "Fast bind fast find" he was probably sincere. But Shakespeare was not a lock expert, and, Donnelly, to the contrary notwithstanding, it is not believed he was a thief. Therefore he could not be supposed to know that locking up valuables is not always the way to preserve them to the owner's possession. I doubt not that in those days in Venice

there were expert gentry who could walk into Shylock's dwelling with as much ease as did Lorenzo the heart of his daughter.

The earliest locks of which we have any authentic knowledge were those used in Oriental lands, some of which are even in use at the present day. They usually consisted of large and heavy wooden bolts fastened to the inside of the door, and kept from being removed by a number of pegs of different lengths. The pegs were arranged upon another billet of wood, called the key, which was inserted through a hole in the door, which, while it would admit the hand and arm, was sufficiently far from the lock proper to prevent its being tampered with by one not in possession of the proper key.

Here, again, at the very beginning of things, the owner of the house advertised to the world the secret of his lock, for the keys were so large that it was impossible to carry them concealed about his person. Often the Oriental merchant or householder could be seen walking serenely along with his keys slung over his shoulder and reaching down to and even below the waist. The thief who possessed a good eye for proportions, and, be it remembered, such persons are usually of more than ordinary keenness of wit in this direction, could easily prepare for himself a similar key from memory and after a few trials open the door as easily as the owner himself.

When the German iron workers began to make locks, they produced what are known as warded locks. These used a ponderous brass or iron key, and the keyhole, while not large enough to admit the hand and arm, would admit the finger, or any suitable picking tool, so that while the large and massive construction gave a semblance of security, such locks were in reality no security at all to the ingenious or observing thief.

Illustrated herewith, Fig. 1, are some of the more common forms of warded locks. These, while seemingly difficult of duplication, and offering obstruction to almost any ordinary form of picking tool, in reality consist of a single tumbler, which is operated by the end of the key. Any key with a blade which does not conform to the cut-

tings in the blades of the keys shown would, of course, not turn in the lock, and hence could not throw the bolt. But in No. 4 is shown a skeleton key which will open any of the locks, its shape being such that it clears all the wards and reaches the tumbler. As these wards were formed in the cutting of the interior case of the lock, it is evident that no impression of the keyhole would give the correct shape. But as the secret of warding locks did not long remain a secret, it only necessitated two or three with slight variations of the

FIG. 2.

skeleton blade to open almost any of the locks of that day.

Locks of the present day are divided into three classes: (1) wing key locks, as has just been described; (2) pin tumbler locks, and (3) dial or combination locks. The higher type of modern bank locks, which will be described in full later on, is not properly susceptible of classification as a lock, it being an intricate automatic mechanism having none of the characteristics of the lock as is ordinarily known.

Wing key locks, with but little change except in the intricacy of the warding, continued to be used up to a comparatively recent date. In the early part of the nineteenth century the pin tumbler lock was invented, this being simply a return to the early Oriental lock, but made small, with a key which could easily be carried in the pocket. The pins were concealed inside of the end of the key, and the modern methods of close working in iron and steel made this key impossible of duplication except by careful study.

For a long time this lock was really secure, but it remained for a Yankee at the court of Queen Victoria to show to the

## Storekeeping Department.

British lockmakers, who were then the masters of the art, that their wonderful Magic and Infalible locks could be easily picked.

Price, in an old volume upon Fire and Thief Proof Locks, describes the method of ascertaining the proper means for picking. Coloring matter, printer's ink, or some similar agent, was introduced into the lock in the owner's absence, or without his knowledge. When the true key was used to operate the lock this coloring matter was by it distributed upon the faces of the tumblers and the path of the key clearly marked out. Now, by inserting a bit of wood covered with white paper and moving it under the tumblers an impression would be transferred to the paper which would clearly show the proper biting of a key that would open the lock.

The next important step in lockmaking was the so-called Yale lock. This was invented by an American by the name of Yale, who made his locks with a very small and narrow slit for a keyhole. The original Yale key was a small flat piece of metal about one inch long and half an inch wide, with a series of indentations like saw teeth upon one edge. It was another form of the Oriental pin tumbler lock, the indentations on the edge setting a series of pin tumblers, so that the key could be turned, and with it the bolt of the lock. Strange to say, this earliest known form of lock is to-day in its later perfected shape, the only really secure key lock known.

It was soon found, however, that the Yale lock was in its early form easily picked by some small flat tool that would enter the keyhole, and again the lockbreaker was ahead of the game. Not long, however, for the lockmaker hit upon the expedient of making the key corrugated, or crimped, and the keyhole of a corresponding cross-section. This precluded the insertion into the keyhole of an ordinary picking tool, but the ingenuity of the lockpicker soon invented a tool that did open it and further improvements were forced. Yale locks are to-day made with an improved form of key and keyhole, which while resembling very much the corrugated key, still is of such peculiar formation that so far as is known to the writer no picking tool has yet been found to open it. The term Yale locks is commonly applied to all locks having flat or corrugated keys. There are many makers of such locks and their products are not distinguishable to the uninitiated. What has been said regarding the Yale locks, as regards security and general characteristics, holds good of the whole range of that class of locks.

But while the lock itself is practically secure against picking, it really offers little or no security against the determined lockbreaker, because manifestly the lock cannot be stronger than the door upon which it is used, and this offers the vulnerable point to him who would for any reason force the lock.

Both wing key and pin tumbler locks are used upon all classes of doors and receptacles to-day, and it is remarkable that for some 20 years no radical improvement in

either has been made. This, too, in the face of the fact that there is not a single form of wing key lock that offers any real security, and most of them can be easily opened with a button-hook or a piece of bent wire.

When, however, we come to consider the question of locks for use of banks and similar institutions, the development of the present devices, and the exciting race between the lockmaker and the lockbreaker reads like some highly imaginary romance.

As stated above, more than is generally supposed, the banks owe their safety to the fact that they are so located that at all times of night the safe is in full view of the main business street frequently patrolled by watchful guardians, so that the burglar dares not assume the risk of detection at his work. There are, however, conditions under which the utmost publicity will be no protection, and it is to meet these conditions, and incidentally perhaps to guard against dishonesty of some employe that the modern bank locking devices are used.

The earliest form of bank locks were, of course, the intricate forms of key locks. Here intricacy was depended upon as a means of security. But it was found that no lock, however intricate or complex, was proof against attack so long as access was afforded to the interior of the lock by any form of keyhole.

The invention of the combination lock marked a decided step in advance, as it gave no access to or hint of what was on the inside. Combination locks, or as they are technically known, "dial locks," are so well known to every one that but little description of their exterior is necessary. It may not be patent to every one, however, just how they are operated, and in the illustration, Fig. 2, is shown a dial lock with the tumbler case removed to illustrate the action of the tumblers. These, it will be seen, consist of a set of disks mounted upon a central arbor. Each disk has a notch cut in its edge. Each disk, by a lug near its center, moves the one next to it. Turning the dial on the front of the safe door communicates motion to the first tumbler, which in turn moves the second, the second the third and so on. Numbers on the tumblers correspond to the numbers on the dial, so that the operating lugs may be set to any combination of numbers desired, and by turning first in one direction and then the other all the notches are set in alignment, and the tail of the bolt slides back into the notches of the tumblers and the lock is open.

It will be seen that there is absolutely no way to pick this form of lock. The secret must be known or the lock is impregnable to picking. But so long as security depends upon a secret there must be some one who will discover that secret and the security is then gone.

This secret was gained in two ways. First, by force, or bribery, from the one possessing it, as in the case of the cashier or other bank officer who was seized in his house, taken to the bank and compelled to open the lock. Again it was found that if one possessed the sense of feeling to a keen degree he could, by turning the spindle, feel the point at which the notches of

the tumblers passed the tail of the bolt. When once this was known it was an easy matter to open the lock, and the safe-breaker was once more the master of the situation.

This latter means was defeated by the invention of what is known as the roller fence arbor and balanced fence. Briefly described this consists of devices by which the point at which the tumbler notches pass the tail of the bolt cannot be felt. The tail of the bolt is carried further away and a part called the fence interposed between it and the tumblers. The act of turning the tumblers in the direction of setting carries this fence entirely out of contact with the tumblers until they are all set in line, so that no one, however expert, can possibly gain any knowledge from the lock itself as to the proper combination for opening it. It was this invention which frustrated the expert combination lock-opener, and gave rise to the masked burglaries so common a few years ago, and which resulted in the loss of millions.

The kidnapping of bank officers soon came to be attended with extreme danger and the enterprising burglar had to cast about for other means. It was soon found in nitro-glycerine. Immediately safe-cracking became popular because of the ease and celerity of the process.

Having gained admission to the bank the cracker kept out of sight until the sentry had passed on his rounds, and then in a very few moments the contents of the safe were at his disposal and he was away before any one could reach the scene, if indeed any one should become aware of what is going on. As this method of safe-cracking is practiced to this day on safes protected alone by combination locks, it may be well to describe the process.

The materials are a piece of putty and a small piece of fuse. The safe-cracker no longer carries a kit of tools. A sledgehammer can be easily stolen for each occasion. One blow of the hammer knocks the knob from the dial on the outside of the safe. A little putty dam is then built upon the outside around the dial and liquid nitro-glycerine is poured in around the broken spindle. The fuse is then adjusted with more putty, lighted, and in a few seconds the door of the safe is on the floor. In cases where the lock parts are loosely fitted the dial is not broken, as the liquid nitro-glycerine penetrates the crevices easily. Often, also, the concussion is deadened by wet blankets, so that a person standing across the street would hardly be conscious of the explosion. It would seem that at this point the safe-cracker had the banks at his mercy. So far as the security afforded by dial locks goes, he had indeed, and still has. A cheap combination lock is no protection at all. A good one is secure only against picking. There is not a combination dial lock known that cannot be forced in a few minutes, sometimes seconds, by the expert crackman.

(To be continued.)

The Greenville Jewelry Co., Greenville, S. C., has moved from 121 S. Main St. to 123 S. Main St., where the concern has more space and better facilities for the display of stock.

# WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]  
No attention paid to communications unless accompanied by full name and address of the writer.

**QUESTION No. 2198.—Cyanide of Potassium.**—Will you kindly tell me what I can keep cyanide of potassium in so that it will not come out? I put mine in a large glazed crock, and it sweats and the outside is thick with a white, frosty substance. I think the rats get it and crawl away and die. R. A.

**ANSWER:**—The cyanide solution must be very strong when it will sweat through a good glazed jar. Evidently the solution contains more cyanide than is necessary for dipping purposes. Cyanide will work through wooden tanks that are not well lined with asphaltum or pitch. An earthen jar can be lined with asphaltum by heating two parts of asphaltum and one part pitch into liquid. Pour it into the clean and dried jar and quickly turn the jar around so the pitch will form a smooth coating over the entire inside. Use a swab for the top edges and sides. If this does not stop the cyanide from sweating through, then it would be advisable to sponge off the outside of the jar two or three times a week.

**QUESTION No. 2199.—Brass Polish.**—Kindly send me a good receipt for brass polish. F. R.

**ANSWER:**—If the polishing is to be done by rubbing with the hand, Vienna lime and oil may be used. Another method is to make a paste of equal parts of sulphur and chalk with sufficient vinegar to reduce it to the proper consistency, or paste. Apply it to the metal while moist, allow to dry on, and rub with a chamois skin. For ornaments or engraved work clean with a brush. A method employed considerably is a weak solution of ammonia in water; apply with a rag, dry with a piece of chamois and afterwards rub with chamois and a very small quantity of jewelers' rouge. Still another way is to rub oxalic acid solution, made by dissolving the acid in water, over the tarnished brass until clean. The acid must then be washed off with water and the brass rubbed up with moistened whitening.

**QUESTION No. 2200.—To Clean Plaster of Paris Statues.**—Will you please publish in the Workshop Notes department of THE CIRCULAR-WEEKLY a method of cleaning plaster of Paris statues that have turned yellow from age? Can they be made to look like new again? J. R. B.

**ANSWER:**—One way to treat plaster objects is to make a hot starch paste and paint it on the plaster, while hot, with a stiff brush, and let dry. The starch will split and scale off under the action of the finger nails. The fragments, when detached, will bring off the soiled portions of the plaster. But a more satisfactory method

is to give the plaster a coat of varnish and bronze powder. This is done by taking furniture varnish and thinning it a little with turpentine. In this mix bronze powder of the desired color. The bronze powders can be had in various colors and a nice shade can be produced by mixing two, so that a dark green or olive shade is obtained. The prepared varnish is painted over the cleaned plaster and left to dry. It sometimes requires two coats for a good finish, but do not put on a second coat until the first has thoroughly dried.

## A Simple Method for Estimating the Quantity of Silver in Silver Plating Solutions.

(From the Brass World.)  
(Continued from issue of Aug. 12.)

### DISSOLVING THE SILVER.

THE filter paper with the silver on it is carefully placed in the beaker and a mixture of  $\frac{1}{2}$  ounce of water and  $\frac{1}{2}$  ounce of strong nitric acid (chemically pure) is poured on it. The silver usually goes into solution in a short time, but if not place on the asbestos and warm. It will then immediately dissolve.

Now fill the beaker about half full of water and add to it from 10 to 15 drops of the nitrate of iron solution. Stir with the rod to mix.

### ADDING THE SULPHOCYANATE SOLUTION.

The right-hand burette is now filled with the sulphocyanate solution previously made and allowed to run down to the zero mark as previously mentioned in measuring out the silver solution. The beaker is then placed on a sheet of white paper underneath the burette so that the color can readily be distinguished at the end. The sulphocyanate solution is now allowed to run in drop by drop and with constant stirring.

It will be noticed that the sulphocyanate produces a white flocculent precipitate and a pink color. The pink color, however, disappears upon stirring. The sulphocyanate is added with constant stirring until one drop gives a decided pink color to the whole solution which does not disappear when stirred. This is the end of the operation. The sulphocyanate does not act upon the iron until all of the silver has been precipitated, when it changes the color to red. The nitrate of iron is called the indicator. It indicates when all the silver has been precipitated (thrown down).

The burette is now read off and the amount shown is divided by 10. The result is the number of Troy ounces of silver per gallon. Suppose, for example, that the reading of the burette gives 36.5 cubic centimeters. This is divided by 10 and

gives 3.65 ounces Troy of silver per gallon of plating solution. If the reading gives 15 cubic centimeters, then the solution contains 1.5 ounces of silver per gallon. All that is necessary to do is to divide the number of cubic centimeters on the burette by 10. No other calculation is required. There is, therefore, no opportunity for error.

The liquid in the burette should run down the sides of the glass without leaving drops. If it does not, then the glass is greasy. A piece of absorbent cotton should be fastened to a stiff wire and with it the inside of the glass cleaned with a warm, strong potash solution, after which it is rinsed out and turned upside down to dry.

The glass cock should be greased over with tallow in order to render it free turning. A very light film only should be put on. Too much grease will interfere.

The various operations in the process may be summed up as follows:

(1) Making up the sulphocyanate of ammonium solution by dissolving 22 grams in one liter of water.

(2) Measuring out 37.8 cubic centimeters of the silver-plating solution.

(3) Adding four ounces of water and two ounces of strong muriatic acid.

(4) Heating nearly to boiling.

(5) The introduction of half an ounce of zinc.

(6) Allowing all the zinc to dissolve.

(7) Filtering the liquid.

(8) Washing the silver.

(9) Dissolving in nitric acid ( $\frac{1}{2}$  ounce nitric acid and  $\frac{1}{2}$  ounce water).

(10) Filling the beaker nearly full of water.

(11) Adding from 10 to 15 drops of the nitrate of iron solution.

(12) Running in the sulphocyanate solution.

(13) Reading off the burette and dividing the result by 10.

### RAPID METHOD WHEN GREAT ACCURACY IS NOT REQUIRED.

The foregoing method is capable of giving results of the greatest accuracy, and, in fact, the purity of fine silver may be determined by it. It is one of the most accurate of chemical processes. The filtering, however, takes a little time, so that in instances where the greatest accuracy is not desired the filtering is dispensed with.

Instead of filtering the silver, after the zinc has all been dissolved, it may be allowed to settle and the clear liquid poured off. The beaker is then filled with water, the whole stirred, and the silver allowed to settle. The clear liquid is again poured off and the operation repeated six times.

Great care should be taken in pouring not to lose any of the silver. By pouring down the stirring rod this may be avoided. The silver thus washed is dissolved in the nitric acid as previously mentioned in the filtration method.

The objection to the preceding method is the slight loss of silver in washing (called the decanting operation). It is, however, quite small when care is used and repeated tests have shown that it is possible to obtain results within 0.1 of an ounce by it. Such a result is close enough for ordinary purposes, and the rapidity renders it useful and, perhaps, necessary in many instances.

[THE END.]

### Mr. Jeweler:

Do you know that hundreds of your competitors in all parts of the country are making a specialty of Fans? Do you know that even a small line of Fans, properly displayed, will "dress up" the whole appearance of your stock? Of course, the Fans themselves must be suitable for jewelers, and must be bought from one who thoroughly understands the requirements of your trade. There is but one such house in America—

### Ceramic Triumphs of Early French Potters.

By J. A. R., in the *Canadian Pottery and Glass Gazette*.

(Continued from issue of July 29.)

**ORLÉANS**—This factory was founded on March 13, 1753, by royal authority for the manufacture of faience, with powers for 20 years granted to Dessault de Romilly. The first director was Louis-François Le Roy. About 1760 Claude Charles Gerault d'Aurabert bought out the company and took over the sole direction. Although only authorized to manufacture earthen ware, there is no doubt that porcelain was made there from the beginning as well. About 1768 kaolin from St. Yrieix was used for the manufacture of hard porcelain, and from that time, for some considerable period, the two kinds were made concurrently. The productions consisted mostly of table services and pieces for domestic use, but a considerable number of figures and groups were also turned out. A specialty in decoration was flowers, modelled and painted after nature. The paste of the soft porcelain was very translucent and brittle, which later quality accounts for the fact of the rarity of existing specimens, almost all of which are decorated in blue. The hard paste was usually painted in polychrome. Benoit Le Brun became director in 1806 and the factory closed in 1812.

**ARRAS**—The foundation of the porcelain factory at Arras is attributed to Joseph-François Boussemart, who owned a factory at Lille, which he abandoned in 1770 when he came to Arras to be among his relations. Here he started a porcelain factory in the Rue de la Comédie, now the Rue du Blanc-Pignon. He very soon found himself pressed for money, and he entered into partnership with one Delahay and four sisters named Delemer, who kept a faience shop at Arras in the Rue Royale, now the Rue Chateaudun. Their resources also soon being exhausted they applied for, and obtained, a subvention from the State of Artois. The loan was granted under certain conditions of a modification of the company, and Boussemart, who retired, died in the following year, 1773, aged 75 years. The sisters Delemer considerably increased the premises of the factory, but, nevertheless, were unable to make it a commercial success, partly owing to the heavy duties levied on their produce by the neighboring French provinces, as compared with the facilities enjoyed by their principal competitor, Tournay, which had entered into a customs union with their neighbors. This competition eventually compelled the Arras factory to

close on July 22, 1790. The Arras productions are very similar in the body to those of Tournay, although hardly so fine in quality. They consisted for the most part of table services; scarcely any artistic pieces are known. The decoration is usually in blue, a few plates only being decorated in colors.

**CÆN**—This factory was established in 1797 for the manufacture of earthen ware in the English style, but want of success induced the authorities to substitute the manufacture of porcelain. The first director was d'Aigmont-Desmares, who brought the factory to a high degree of prosperity by 1802, when a new director, Ducheval, took his place. Chiefly owing to the war and general stagnation of trade, the factory from that time rapidly deteriorated, and in 1806 was obliged to close. The productions show great technical excellence both in paste and decoration, the latter being mostly imitated from Sèvres models.

**SAINT-AMAND-LES-EAUX**—A factory of faience, the property of Jean Baptiste-Joseph Fauquez, was established at Saint-Amand-les-Eaux about 1740. In spite of the official sanction having been refused, he commenced to manufacture porcelain in 1771, on the grounds that St. Amand, being a free town, he would be able to import foreign porcelain and sell it as his own. The competition of Tournay, however, forced him in 1778 to give up porcelain and to confine himself to earthen ware. Maximilien de Bettignies, who had made porcelain at Valenciennes, became the owner of the factory about the year 1800, and it remained in the Bettignies family during the greater part of the last century. The characteristics of the Bettignies period are a great similarity to the productions of the Tournay factory, and a persistent imitation of the decoration of Sèvres. These imitations are recognizable by an expert, but very many amateur collectors possess examples of the factory of St. Amand which they prize as valuable pieces of Sèvres.

**SEYNE**—In the year 1774 three members of the French nobility, the Comte de la Seynie, the Marquis de Beaupoil de Saint-Aulaire, and the Chevalier du Gareau de Grevigne, went into partnership and founded a factory of hard-paste porcelain in the Chateau de la Seynie at the gates of Saint-Yrieix-la-Pesche in Limousin. Having requested and received the necessary authority to make porcelain, the works were in full

swing early in 1775, their operations being considerably facilitated by the fact that all the raw material was available in extensive quarries of china clay on the estate of the Marquis de la Seynie within 600 yards of the chateau. In spite of the advantages enjoyed by La Seynie the factory was never very successful. M. de la Seynie left it in 1789, and it passed into other hands, one of whom was a person named Baignol, who held it 1791, when the work people took the concern into their own hands—a régime which continued till 1805—when it again came into private ownership, but changed hands at various intervals, the last record being in 1856, when the firm of Pelletier et Mailler appear as proprietors.

**MARSEILLES**—Marseilles, which is justly celebrated for its factories of faience, has never greatly distinguished itself in the production of porcelain. In this direction, however, a certain amount of credit is due to the enterprise of Joseph-Gaspard Robert in the last quarter of the 18th century. Robert commenced his porcelain factory in 1776 and in 1777 it was in full activity. The productions of Robert, on the whole, were tolerably good in quality, some pieces being of exceptional merit, for several examples of his work exist which testify to his skill. The factory does not appear to have been very successful. It was adversely affected by the revolutionary troubles, and it was closed in 1793.

**LILLE**—The manufacture of hard porcelain at Lille was founded by Leperre-Durot in 1784. No particular characteristic distinguishes this porcelain from other hard porcelains of the same period, the forms and decorations never rising above mediocrity. But for general utility the Lille ware was well suited on account of its technical excellence. The factory was closed in 1817.

**VALENCIENNES**—Jean - Baptiste - Joseph Fauquez, late of St. Amand, founded the porcelain factory at Valenciennes in 1785. In 1787 Lamoinary was sole director. In 1795 he sold his effects and left France till 1800, when he returned and attempted to reinstate his factory. It was in such a bad condition, however, that his small amount of capital was insufficient to place it upon a sound basis, and in 1810 it was sold. The factory is celebrated for its figures and groups in biscuit porcelain.

(To be continued.)

Burglars stole about \$200 worth of merchandise from the general store of John McIntosh, Hillsville, Pa., one night recently. The loot included silverware, watches, etc. Thus far no clue has been obtained.

## Are Our Lines Drifting Into Other Channels?

Address of S. NEILSON, before the Third Annual Convention of the American National Retail Jewelers' Association at Cincinnati, O.)

IN answering this plain question, I will at the same time ask: *Have* our lines drifted into other channels? and, gentlemen, the answer will be the same for both of them. Every one present knows that they *have*, without being told, but, the question is not on the programme just to be answered with a yes or no—the question is there to bring out the cause for our wares going into the hands of outsiders for distribution to the public, when they ought not to, and in locating the cause find the solution for stopping any further drifting in the future.

I may not be as old a man in the trade as some of you, but I have tried my level best to make good use of the time I have made the jewelry business my profession. It is now over 12 years since I made a start from the bottom of the ladder, and put my feet under my own bench, and hung out my shingle—out where the Indians roam (and where we eat pie with a knife). I have not arrived at the top yet, but I have kept my eyes open, and with what information I have dug up I shall try to answer the question.

In knowing that our lines have drifted, and that they are still drifting, is where we will have to look for the key to solve this most unfortunate condition that the trade has to contend with. Unless we learn from past experiences how to undo what has been done in the past and is still being done, our lessons will be lost, and we will continue to have our contention in the future as we have in the past. We care nothing for the past except in so far as from the past we learn how to succeed in the future. This is the thing I want to dwell on, and this is what the question is intended to bring out.

The manufacturers of jewelry lines in the past, even at the time of George Washington, had exactly the same things to contend with as they have to-day. The manufacturers have two functions to perform—namely, to make the goods, and to sell them. It is absolutely necessary that they are sold after they are made. What was more natural for our manufacturers, through the many changes from good to bad years in the past or even from being overstocked, than to sell to any one who had the rating or the money, and who wanted to buy, whether it was John Selemquick from Rabbit Hollow, or The Watch Dog on the Lake Front? I ask you, why should they refuse business when offered if they needed the money? And I want to ask you, how could we expect them to refuse business as long as there were no protests from the ranks of the retail jewelers even as loud as the whisper of the evening breeze that does not blow?

So much for the past.

Similar conditions have faced the jobbers. There are times when jobbers are overstocked and must raise money; then if it is not possible to make the jewelers buy, why not sell the dry goods man, or the firms who use Uncle Sam's transportation to aid in selling their goods, "as good as," for half price?

A taste of this business, and the habit is formed and continues. And why not? There was no one to say "Nay" except in very rare cases. When some individual jeweler mustered up courage to tell the traveling salesman what he thought the jobber owed the trade, he would then possibly wind up with an apology for being so rude; such a complaint would not stand much show of reaching headquarters, let alone the manufacturers. I again say, "So much for the past."

These conditions, so detrimental to the retail jewelry trade, have been forming ever since this country boasted of jewelry manufacturers and jobbers, and I will add that what we ought to wonder at is that conditions are not "worse instead of better." These conditions have been brought about by evolution, and just as natural as it is for water to flow down hill, when there is no dam to prevent, just as certain were the lines bound to drift elsewhere, as long as not restrained. The fact remains that we, as retail jewelers, are partly to blame for having permitted our lines being sold through outside channels in the past. There is not a mother's son among us who would not have done likewise under the same circumstances, so why "holler" ourselves black and blue in our faces over the past?

Now for the present:

We will admit that our lines are still sold through other channels than the legitimate jew-

eler, but there is a decided change for the better. New concerns in the manufacturing field in our lines nearly all give out the battle cry, "Sold through the legitimate jeweler only." The older, faithful concerns are enforcing their protective policy more rigidly. And, by the way, we should never lose sight of the fact that whatever happens, we are under and will continue to be under a double obligation to those few who were faithful, when the rest did not show by a wink of the eyelid that we as jewelers were created for any other purpose than to tell the public what a fine fellow Mr. Rogers was, and that his only desire was to make silver that would wear till "Kingdom Come" (if not used). Or when the watches stopped and were brought in with a broken drive wheel, the man with the tweezers was supposed to assume all blame, and in the most profuse terms persist in showing the customer that Mr. Bill Elginwaltham made the finest ruby jeweled, crown hardened, spring steel watches in the world, and in particular explain carefully to the enraged customer, telephoning at six o'clock in the morning that his clock had stopped, and that S. T. Gilinburry made clocks while we were in our cradle, and that they held the world's record for long distance running, and that he would come up immediately and blow new life into it.

I again state that there is a change for the better. A number of lines have recently been withdrawn from the outside channels. Among these are some of the most important lines to the trade. Two of the largest manufacturers of sterling silver goods are among them, and there are a number of others in the band wagon. The two largest movement manufacturers, and also the larger case manufacturers, have succeeded in getting prices raised on their product in the mail-order catalogues, so we can sell the goods at the same price and make a fair living profit, and they are also making a strong effort to enforce the selling of their product at a living profit everywhere else.

Our old friends, the \_\_\_\_\_ Clock Co., have actually succeeded in getting Montgomery Ward to raise their leader in a \_\_\_\_\_ mantel clock to a figure that will give us a profit of 35 cents in addition to the six per cent. usually allowed the jeweler who is marked in Dun's or Bradstreet's, *cash with order*; this line of clocks was formerly quoted in said catalogue at a less price than they were offered at to the retail jeweler from the factory (unless he stole them).

A number of others have made promises to reform and are trying to make good. New lines will come out and will be marketed through legitimate channels only. The jobbers are doing less and less retailing and restrict the sending of their catalogues more and more to the jewelry trade; all this has happened in the last year or two.

What is the cause for this change for the better?

It is purely and simply this—united action on the part of the retail jeweler. In other words, the ASSOCIATION.

In the association we have the key for improving trade conditions, and eventually have the legitimate jewelry lines sold through the retail jeweler. Through it we impress on manufacturers and jobbers that it is essential for the good of the retail trade that our lines are not sold through outside channels, and through it we also show them where they will be the gainers in the long run by being square with us, even though there may be a temporary loss, because the association movement represents thousands of jewelers in addition to the two or three thousand we now have, all acting in accord with the association, and little by little the bulk of the trade will go to the firms who confine themselves to the retail jewelers. The only exception to this rule will be where a firm's business methods may not be of a character to deserve the patronage.

The larger per cent. of trade is bound to go to the manufacturers and jobbers who give the retail jeweler the protection he is entitled to, goods and business methods being equal.

Right here is where I wish I could have the manufacturers' and jobbers' attention. The association is here to stay, conditions are rapidly changing, and if they would only realize this they would adapt themselves to this as fast as existing conditions would permit. It is for getting the results now obtained and for what we expect the future to bring that so many of us have spent our good time and money to obtain. I know I have spent many and many an evening at my store till midnight or better in order to do my duty to the association and through it benefit the trade. And it is this spirit that actuates the entire membership and which will make for better trade conditions. It is in the air, and the sooner our manufacturers and jobbers realize this, the sooner

they will be willing to work with us where they are not yet doing so.

We cannot blame them for the past, nor need we be enemies at present, even if they are not with us; but just as sure as the city of Cincinnati is located in the State of Ohio, just as certain will the larger per cent. of trade go to the interests who favor us retailers and protect us; this is good common sense and nothing else.

There are scores and scores of unfair things done against the retail jeweler as yet that ought to be corrected, and there is a great deal of work ahead for the association; but one of the encouraging signs of the times is the formation of the jobbers' association, and I look for splendid results from co-operation of both associations in the near future. It will simplify the question of distributing jobbers' catalogues and also the retailing by jobbers. If all the leading jobbers join, which they cannot fail to do, there can be no question about it—they will be with us, and if such is the case the rest are most likely to fall by the wayside. At any rate, the move cannot fail to be a great improvement. The coming years will see a change for the better in the marketing of a great many makes of goods, and there is many a line, the Lord knows, ought to be under better control.

I think the association and the manufacturers and jobbers have learned that the best way to get results is to get together and adjust things in a friendly spirit. War to the knife will never accomplish the good arbitration will, and only as the last resort should we get out the big stick, and when this is found to be unavoidable, go at it, and go at it hard.

After discussing the growth of the association and the question of having an official organ, he concluded by saying:

Summing up of it all, it focuses on this one point: Our lines are at present sold through channels where they ought not to be sold, but the remedy is at hand and is being applied right now. As the disease was slow in developing, so will the remedy require some little time to effect a cure.

Let us "boost" with all our might and main for the association, and it is the wish and hope that it will stand as long as the Irishman's house.

Long live the A. N. R. J. A.

## A Glass-Blowing Story.

A BRITISH paper relates how the Emperor Nicholas wished to illuminate the Alexander column in a grand style. The size of the round lamps to be used for the purpose were indicated and the glasses ordered at the manufactory, where the workmen exerted themselves in vain, and almost blew the breath out of their bodies in the endeavor to obtain the desired size.

The commission must be executed—that was self-evident—but how? A great premium was offered to the one who could solve the problem. Again the human bellows toiled and puffed. Their object seemed unattainable, when at last a long-bearded Russian stepped forward and declared that he could do it; he had strong lungs; he would only rinse his mouth first with a little water to refresh them. He applied his mouth to the pipe, and puffed to such purpose that the vitreous ball swelled and puffed nearly to the required dimensions—up to them—beyond them. "Hold! hold!" cried the lookers-on. "You are doing too much. And how did you do it all?"

"The matter is simple enough," answered the long-beard; "but, first, where is my premium?" And when he clutched the promised bounty he explained. He had retained some of the water in his mouth, which had passed thence into the glowing ball, and then, becoming steam, had rendered him this good service.

William Woodward, while clamming in the river at Winona, Minn., recently found a pearl weighing 17 grains.

Beautiful Punch Bowl and Plateau of Silver Service Presented to the United States Battleship "New Hampshire."

(See Text on Page 51.)

# ALVIN SILVER

Be ready for the Fall Weddings, with a full stock of appropriate patterns of Sterling Silver flat ware

“THE BRIDAL ROSE”  
and  
“ORANGE BLOSSOM”

These two patterns immediately they were placed on the market met with phenomenal success as special patterns for weddings and anniversaries, not only for their beauty of design and appropriateness but because of their strong individuality. They are distinctive and at once appeal to the sentimentality of the occasion, besides being of the highest grade and artistic workmanship known to the Silversmith's art.

That is why they have maintained their prestige as the most appropriate special wedding patterns.

BRIDAL ROSE.

## MIRROR FINISH

is the name which has been given to S. O. Bigney & Co.'s

## HIGH GRADE GOLD-FILLED CHAINS

on account of the beautiful finish. After the links are soldered the gold is somewhat porous. In order to get a perfect finish, the only method known to the art is the method of burnishing. This we apply to our chains. It closes the pores, hardens the surface, gives the mirror finish, and will add one-third to the wearing life of the chain. This method makes for durability and excels all other processes of hardening finish.

Every retailer should have a good stock of our high-grade, gold-filled, mirror-finish Chains, Fobs and Bracelets.

### We Make Bracelets of Every Description

Oval and Square, Side Swing and Hinge, beautifully finished and embossed. Pleasing to the eye, and rapid sellers.

## Read Our Customers' Letters

Joliet, Ill., Feb. 24, 1908.  
THE ARNSTINE BROS. COMPANY  
Cleveland, Ohio.

Gentlemen:—As a rule of business I do not usually believe in testimonials which generally are so easily obtained that to the thinking man they have little weight, but feel an exception is due you for the splendid Catalog you publish, and for the exceptional fairness with which you treat your customers.

As you know, I have been a large user of your Catalogs from almost the first year of the publication, and know that a jeweler will benefit by the judicious use of them; especially so since the merchandise you illustrate in your book is high-class standard goods from well-known leading manufacturers and sold to Catalog users at fair prices, many times at a lower price than is asked by the manufacturers themselves, or is asked by the regular jobbing trade.

Wishing you continued success, believe me, Sincerely,  
GEORGE E. FEAGANS.

**This firm has used The Arnstine Bros. Company Catalogs since 1903.**

STORE OF GEORGE E. FEAGANS, JOLIET, ILL. (Also at Los Angeles, Cal.)

Springfield, Mo., Feb. 11, 1908.  
THE ARNSTINE BROS. COMPANY,  
Cleveland, Ohio.

Gentlemen:—Replying to your recent inquiry regarding benefits derived from using your Catalogs last year, wish to say that they proved to be a very attractive advertisement for our business and in fact considerably increased our sales over those of December, 1906, and was far in excess of what they would have been under the strained conditions caused by the money stringency. Being highly pleased with the result, I will continue using your Catalogs, and having used them since 1904, I can strongly endorse them as a business getter even in hard times.

Very truly yours,  
H. M. HECKART.

**This firm used The Arnstine Bros. Company Catalogs in 1904, 1906 and 1907, and has again placed an order for 1908.**

## Announcing the Smith "Chippendale" Design for Flat Ware

THOMAS CHIPPENDALE, England's foremost designer, is responsible for the inspiration which has made possible the latest Smith flat ware product—The Chippendale. This pattern will be shown in these pages in the early part of September. The "Chippendale" design is a masterpiece of the Silversmith's art and will no doubt be a "leader" in the trade this Fall.

**Frank W. Smith Company**  
Manufacturers of Sterling Silverware  
Gardner, Mass.

### HERE IT IS AT LAST!

Just what you **have** been looking for and have had calls for time and again. A **German Silver Wrist Bag with a Soldered Mesh**. Somewhat higher in price than the unsoldered mesh? Of course! But you can now sell a bag that will not break and one you can guarantee. Twelve patterns, 4", 5", 5½", 6", 6¼" widths.

We are still headquarters for high grade Sterling Silver Bags, and have also added a line of Change Purses.

Our goods are made on honor; we believe with Ruskin that "A composition for cheapness, and not for excellence of workmanship, is the most frequent and certain cause of the rapid decay and entire destruction of arts and manufactures."

## IMPORTANT ANNOUNCEMENT

We are now in the midst of our SIXTH ANNUAL EXHIBITION, and desire to state that the attendance, up to now, has been far greater than at any of our previous displays, and that the EXHIBITION itself has been a phenomenal success.

Our stocks will be divided within a few days and our travelers will leave for their respective territories. When our representative calls, do not fail to look carefully through his stock, as it contains all the very latest up-to-date ideas in Diamond Mounted Jewelry.

We also desire to state that this is the last number of the EXHIBITION BULLETIN for this year. Its publication will be resumed when we are ready to notify you of our SEVENTH ANNUAL EXHIBITION.

## A NEW WHITING PATTERN

## The "Madam Jumel"

The Whiting Company's new pattern, the "Madam Jumel," while thoroughly Colonial in its general simplicity of line and reticence of ornamentation, suggests in its pervading grace the spirit of the late 18th Century French Neoclassicism.

It is entirely appropriate, therefore, that a pattern displaying these characteristics should be associated with the name of one who, during Revolutionary time and later, was historically prominent as a social link between her own countrymen and their French sympathizers.

The "Madam Jumel" is produced in a complete line of spoons, forks and fancy flatware, and will be ready for delivery September 15, 1908.

# Sternau Coffee-Machine

Perfect coffee is easily obtained when made in the Sternau Coffee-Machine, by the process of distillation, which is the only proper way to make coffee, as it extracts only the delicious part of the bean. The Sternau Coffee-Machine is so constructed that every part may be easily cleaned. The machine is so attractive looking that jewelers will find it a quick seller, because of its beauty aside from its utilitarian properties. It will bring new customers and will make up old ones. We want you to write to us for description of and information about these machines. Made in copper, silver-plate and nickel-plate.

THE  
DIRECTOIRE  
STONE

A  
SAPPHIRE  
PERIOD

**T**HE GENIUS which inspired the Directoire regime, did not confine itself to designs, costumes or fabrics. With nice discrimination it even selected its distinctive gems. Of these the Sapphire was pre-eminent. Beautiful in itself, the effect of the stone was heightened by the artistic uses to which it was put. In reviving the tendencies of that marvelous period, this house is giving the Sapphire its appropriate recognition. The effect loses nothing by the artificial stone, so faithful is the imitation. Jewelry of the Directoire period is here reproduced to the life. The influence of this period cannot now be over-estimated.

# The "Krementz-Bodkin Back" STUD and VEST BUTTON

Pat. Feb. 16, 1904

Krementz & Co. believe the trade will agree that they understand the jewelry business sufficiently to know that the "Krementz-Bodkin Back" Stud and Vest Button is the simplest and best mechanical Stud or Vest Button made.

The "Krementz-Bodkin Back" Stud and Vest Button is not one piece, but is one-piece construction, which makes it very simple and the strongest and most durable, because:

- 1—It is Solderless
- 2—It has no spring or hollow wire to bend or break
- 3—It is made of solid, hard spring metal throughout
- 4—It is made by Kremenz & Co. which insures perfect quality, construction and workmanship

THE STORY OF THE HEAD

## Krementz & Co. Invite Comparison

Krementz & Co. stand back of their assertion. All "Krementz-Bodkin Back" Studs and Vest Buttons are sold also under the unique Kremenz Collar Button Guarantee.

THE STORY OF THE BODKIN BACK

### GUARANTEE

If for any cause whatever, a "Krementz-Bodkin Back" Stud or Vest Button should be damaged either in the hands of the dealer or wearer, a new one will be given in exchange, without charge. "Krementz-Bodkin Back" Studs and Vest Buttons are made in large variety of patterns in 14-kt. gold and platinum, set with pearls and diamonds.

### Silver Deposit Ware

Our low price for Silver Deposit Goods is made possible by our making them in large quantities, coupled with long practical experience in their manufacture.

We have constantly guarded our reputation of being the leading house for Deposit Ware, and have never made a reduction in price at the expense of quality. "Quality" indeed has been our motto since we first made Deposit Ware years ago.

Send us a trial order and you will find that these goods will make friends and customers for you as they have for us.

# The Intelligent Placing of Stock Orders

**A** THOROUGH and systematic laying in of regular stocks is now in order. Your season will depend on how you do it.

Past experience shows the exceptional selling qualities of the Day-Clark lines. They are known to cater successfully to a very wide and desirable trade. The high standards heretofore maintained, still prevail.

When considering your stock orders, you are invited to inspect the season's displays here. They cover just the goods and the kind you want.

# Interchangeable Scarf Pin

PATENT PENDING

The smart dresser wears a pin to  
harmonize with his cravat. Our  
new device permits the wearer to  
use a diamond or pearl in com-  
bination with any colored stone,  
such as Lapis Lazuli, Moonstone,  
Turquoise Matrix, Jade, Topaz,  
Amethyst, Garnet, etc., by merely  
snapping the colored stone on  
the pin, as shown in illustration.  
Easy to attach or detach—nothing  
to break. Made in 14 Kt. only.

## ROTHSCHILD BROS. & CO.

NORTH ATTLEBORO, MASS.

WE SELL TO THE JOBBING TRADE ONLY

Illustration about One-Third Actual Size

**CROWN PLIER No. 331**

For clamping the collar of crowns on dust-proof cases while removing same from pendant. This is usually found a difficult task but easily done with the help of this plier.

Nickel plated.....each, \$ .60

**1 Doz. BARREL HOOKS (threaded with Finished Drill and Tap**

With this outfit a new barrel hook can be put in a barrel in a short time, and in a proper manner so it will not pull out. Price..... Same as above without Taps and Drill, per doz.

**JEWELERS' SQUARE SAWS, ROUND BACK**

**Peerless No. 0 Wasp Trade Mark**

Hardened by a new process, giving a certain "toughness" not found in other brands of saws. Made in No. 00000 to No. 0. Price, per gross, \$1.00

**ECHARCO WATCH GLASS CABINET No. 15 (Patented) Price, each, \$16.00**

This cabinet has many new features not found in any other. Novelty and usefulness are the chief arguments in its favor.

**Construction and Material.** The cases are made of oak, finely finished and of attractive appearance. Sides are paneled. Partitions of bass-wood and put together in best manner possible.

**Partitions** are skeleton, preventing accumulation of dust, chips, etc.

**Bottoms** of cabinets are hollow to receive chips, dust, etc.

**Arrangement for Glasses.**—The nine drawers contain 1,547 spaces to hold glasses in upright position.

**Labeling of drawers,** as shown in cut, is on the pulls of the drawers and done in gold bronze on black background.

**Dimensions.**—24 inches wide, 29 1/2 inches high, 12 inches deep; weight, 45 lbs.; with packing case, 75 lbs.

The construction of drawers, the arrangement of partitions to economize space and weight, and the novel method of showing contents on drawer-pulls are all prominent characteristics and extremely well thought of.

Top View, Showing Skeleton Frame of Drawer. Accumulation of dust and chips is impossible.

**SHELDON'S PATENT HAIRSPRING COLLET REMOVER**

No need of any more distorted hairsprings bent balances.

Every watchmaker knows how troublesome it is to remove the collet without either distorting the hairspring or bending the balance; with the use of this tool the difficulty is overcome. The tool is provided with a pair of spring fingers, curved at the ends and ground very thin and sharp. By tilting the balance the jaws may be slid under the hairspring and by pressing the jaws together will readily loosen the collet and then by turning the central screw, which has a hole in the end to receive the staff pivot, you can force the collet from the staff, without injury to balance or hairspring. The adjustable screw nut is provided to avoid wear or injury to the jaws. A glance at the illustration will demonstrate the utility of this tool. Finely nickel plated.

**Price, each, \$1.25**

**BLACK BRONZE PIVOT LATHE**

With 24 Rests, 24 Lanterns, 4 Rests for Long Pivots, with Carrying Collet-Guide Screw and Pivot Gauge. Put up in Mahogany Box with Drawer Suited for Pivot Files and Burnishers.

**Price, each, \$12.00**

A handsome Booklet, 8 inches by 5 inches, fully illustrating Zipperer's tools for watchmakers will be mailed you upon receipt of a postal card, giving your name and address.

# Real Rose Hat Pins

Every genuine DEL-AMOTHE Real Rose Hat Pin has the name stamped on the pin here.

**This will be the largest selling article this Fall and Winter—it is already.**

So remarkable are the sales of DELAMOTHE Real Rose Hat Pins that we do not expect dealers to believe same until they have actually tried them out. It does not seem possible that during JULY this product was sold by Retailers at the rate of two to twenty dozen daily—EVERY day. The Retailers' profit is unusually large. Not only are they proved big sellers, but they are a great attraction for the stores that sell them. The largest Advertising Campaign in years is behind this product. Every possible Advertising and Selling Help will be furnished Dealers gratis. This product will be sold to the best Dealers only, and retail prices will be strictly maintained.

DELAMOTHE Real Rose Hat Pins are made out of live roses, changed by a secret process into metal, then finished in attractive colorings and mounted on Hat Pins. This SECRET process is a recent discovery of Prof. L. G. Delamothe, a noted French Electro-Chemist, and is owned solely by the Delamothe Natural Art Decorating Co., Spokane, Washington, for which this Company is the Sole Distributor. It is the ONLY process by which an OPEN Rose can be perfectly metallized. This product is made in the finest manner possible, and its high quality will be maintained. The Roses used are grown in Oregon and Washington, famous the world over for their beauty and superiority—made where these Roses grow. No two Real Rose Hat Pins are alike. Finished in five colors to conform to the prevailing fashions in millinery. Six sizes, from the smallest rosebud to the full blown flower.

**Not sold through Jobbers.**

*Do not buy inferior imitations. Sold direct only.*

**Write for Illustrated Price List**

*Or have Two Dozen Trial Assortment sent on 30 days approval.*

No. 4.

## Massive Silver Service Presented by State of New Hampshire to the Battleship "New Hampshire."

THE beautiful silver service presented to the United States battleship *New Hampshire*, Saturday, Aug. 8, by the State of New Hampshire at Portsmouth, is a specimen of art as well as an exquisite of workmanship. It is massive and the design, which is carefully and artistically worked out, embodies in emblematic form the history of the old Granite State. The service consists of 71 pieces. The massive punch bowl, holding 36 pints,

eagles, with out-spread wings, rest on the base of the punch bowl.

Below on the plateau is the inscription: "Presented by the State of New Hampshire, August, 1908. Charles M. Floyd, Governor." An idea of the size of the plateau can be had from the fact that it measures over 40 inches between extreme points. It is made of highly polished New Hampshire granite with heavy silver mountings.

There is a large loving cup, a centerpiece

CENTERPIECE FORMED OF COMBINED FRUIT BOWL AND FLOWER VASE.

The set throughout is of massive character, as will be shown by the fact that over 1,900 ounces of silver were used in its construction. In designing this set careful attention was directed to make it suggestive of the various places and products which have made New Hampshire known throughout the country, and it is without doubt one of the most massive, beautiful and artistic silver services that has as yet been given by any of the States to warships named in their honor.

The service was sold to the State by the John B. Varick Co., Manchester, N. H., and made by the Wm. B. Durgin Co., silversmiths, Concord, N. H. The silversmiths were occupied constantly on this work for nearly six months. The John B. Varick Co. also supplied the engraved invitations sent out to the guests who were asked to the presentation services.

The vessels of the United States Navy whose presentation services have been illustrated and described in *THE CIRCULAR-WEEKLY*, and the dates of the issues in which these illustrations and descriptions appeared from time to time, are as follows:

(Continued on page 57.)

with ladle, rests on a New Hampshire granite plateau, emblematic of the Granite State, and has candelabra on each side supporting three lights each (see front cover); 24 drinking cups surround the bowl. In front of the bowl appears the seal of New Hampshire, surrounded by a group of purple festoons in keeping with the seal and below it a shell ornament symbolical of the sea. On the two panels on either side of the State seal appear etchings of the State House at Concord and old Dartmouth Hall at Hanover, the latter illustrative of the arts and sciences. On the two panels flanking the seal of the navy are etchings of the Tip Top House on Mount Washington, showing the railway and also the Old Man of the Mountain. Two large

consisting of a combination fruit bowl and flower vase, a large salad bowl, four large compotes, 12 finger bowls and plates, six candlesticks and six bon-bon dishes.

On the salad bowl are etched four panels. The first panel represents the caravel in which Capt. John Smith made his first landing at Star Island off Portsmouth, N. H.; John Paul Jones' *Ranger*, which was fitted out at Portsmouth; the *Kearsage* of war fame, and a reproduction of the battleship *New Hampshire* as she appears to-day, the etchings being intended to show the evolution in naval construction.

On each piece appears the State seal on one side and the seal of the navy on the reverse. The name "New Hampshire" also appears on each piece.

## Jewelry and Silversmithing at the Franco-British Exhibition.

By W. Augustus Steward, Chief Instructor in Gold and Silversmithing at the Central School of Arts and Crafts, London.

(Continued from issue of Aug. 19.)

ONE of the most interesting horological exhibits is to be seen in the stand of house of Chas. Frodsham, the successor of Arnold, which has a remarkable collection of British-made watches on show. The astronomical watch is certainly a unique specimen of the horologist's art. It is a very large gold keyless watch, with dials on the front and back of watch. English tourbillon escapement, revolving in one minute, strikes the hours and quarters of a clock, repeats the hours, quarters and minutes at will by pushing the winding button; shows Greenwich mean time, equation of time, sunrise and sunset, moon's rising and setting, phases and age of moon, the days of week, days of month, con-

stellations. The small enamel dial is a fixture, with a frame attached, through which the constellation passing under the meridian is shown. The second dial turns once in 24 hours, 50 minutes, 28 seconds, showing high and low water, the hand attached representing the moon to show her opposition to, or conjunction with, the sun. Opposite the moon hand is a point showing the age of moon. The phases of the moon are shown through a small opening in this dial. The third dial turns once in 24 hours, is divided into 29½ equal parts, the lunar days. The sun hand is attached to this. The large enamel astronomical dial turns 1,464 times in 1,460 days, and shows the signs of the Zodiac, constellations, the sun's declination north and south. When the sun

hand passes on 0 (declination circle), or on the point of intersection of the Equator and the Ecliptic, it shows the equinoxes, and when the sun passes on 23½°, the solstices. It is valued at £1,000. The other most interesting object at this stand is an original "Arnold" chronometer with his particular form of escape wheel teeth and a fine helical gold spring.

Next door, so to speak, is located the stand of E. Dent & Co., who have arranged a very distinctive building, at the corner of which is an excellent model of the clock tower at the Houses of Parliament, while

CHRONOMETER MOVEMENT MADE WITH GLASS SPRING 50 YEARS AGO.

the time ball synchronized from Greenwich makes an attractive feature at the center. This is the firm which made the great clock known as "Big Ben," and the clock tower is a practical advertisement of the fact. Besides a series of turret clocks, in which the members of this firm are specialists, there are a number of fine grandfather clocks of the latest type, a special type of regulator made for the use of amateur astronomers, their famous "Standard" mean time regulator as used in all the government dockyards and by foreign governments, also electric clocks, and a fine range of high-class watches. But here also an alluring exhibit is to be seen in an old specimen of the horologist's art produced by a long deceased member of the firm, T. Dent. It is a marine chronometer with a glass spring which is still in perfect condition after 50 years' running. A well-assorted range of high-class jewelry in which fine semi-precious stones are well arranged gives added quality to the fine stand.

Stewart, Dawson & Co., Ltd., have one of the largest shows in the building. It occupies practically one whole side and contains a collection of every kind of high-class fancy goods, as well as silverware and jewelry. Mr. Dawson does not profess to be showing the highest class of goods. He claims to be the producer of jewelry, silverware and the like for all classes, and his great exhibit, which is finely housed, gives a good idea of what may be done by one who endeavors to be the "World's Provider." There are other exhibitors, but they fail to make any impression, good or bad—they simply are beyond thought.

The last, but not least, of the British

## OPALS

All Sizes and Qualities

exhibits is that of the British Horological Institute. This is certainly an eye-opener to many, particularly those who imagined that the craft was in a very decadent condition. I have been privileged to talk with several famous foreign manufacturers, and with one accord they confess they are surprised. It was generally admitted that makers of high-class watches and chronometers still exist in England; that they are

vice-president of the Watch & Clockmakers Guild, and Usher & Cole, who demonstrate the deep thought and unsurpassable technique which the modern representatives of ancient Clerkenwell watch houses can put into their productions.

J. V. Poole, another Clerkenwell veteran, who holds the appointment to the Prince of Wales, exhibits a good specimen of a Clerkenwell-made chronograph and a marine chronometer, the finishing, escapement and springing of which was entirely his own handwork. The one square foot exhibit of H. Golay, another Clerkenwell man, is entirely composed of complicated movements, valued at over £500.

A very old Clerkenwell clock house, J. J. Elliott & Sons, exhibits in the institutes "collectively" some excellent clocks, the movements and cases of which were entirely produced in Clerkenwell. Camerer, Kuss & Co., an old-established retail firm, also show some good work of the same kind, while close by is the unique exhibit of sundials, etc., by the old Clerkenwell house of Barker & Sons.

Messrs. Mercer, St. Albans, also take part in the collective exhibit, and show some fine marine chronometers and horological work of high order, while G. Beard holds the only exhibit of gongs and tubes, but then he and W. Moore are the only makers in London of these articles, and the latter, the most famous, was fearful, like many more manufacturers, of making his clients think he was bidding for retail custom.

Unfortunately, this fear has also kept all our manufacturing silversmiths and jewelers from exhibiting, and the consequence is that the exhibits are representative only—except in that of the British Horological Institute—of the taste of the shopkeeper. Exception, however, must, of course, be made in the cases of Messrs. Garrard, Messrs. Elkington, and Mappin & Webb, who actually produce for sale in their "front shops."

A small but extremely interesting exhibit is that of Mr. Wood, who makes a spec-

ialty of opals. At his stand are shown a necklace of red opal beads valued at £2,000, and a maple leaf weighing 300 carats carved out of a solid piece of Australian opal. But it is in the Australian building where the show of opals is to be seen. There pearly, fiery white, also green, red, yellow and rich black opals are to be seen of all sizes and shades, while in the New South Wales Court of the Australian building our friend, E. Hopkins, exhibits in the most central position, several interesting and unique specimen pearls. The "baby monkey" is a novelty to which photographic reproduction cannot do full justice. Close by, Percy Marks & Co., of Sydney, show a fine collection of opals of rich color and fine qual-

EXHIBIT OF AUSTRALIAN GEMS.

all maintaining the high order which their predecessors established, and that they have made considerable efforts to keep up with the demands of the 20th century. It is a Clerkenwell man, Hope-Jones, who demonstrates the latest possibility in electric clocks with his synchrophone, and Clerkenwell men like Thomas D. Wright,

BRONZE AND IVORY FIGURE EXHIBITED BY SUSSE FRÈRES.

INTERESTING EXHIBIT OF THE BRITISH HOROLOGICAL INSTITUTE.

ity. In this section also is exhibited the famous "Southern Cross" pearl, a group of nine pearls united so as to form a perfect cross. It is valued at £10,000.

The exhibit of Flavelle, Roberts & Sankey in the Queensland section is one of the most attractive. It is in charge of Major Sankey, the managing director, and he is kept busy the livelong day with a continuous train of people inspecting the fine opal goods on show. At this exhibit there is a remarkably unique dragon fly of large proportions, the wings of which are made of matchless pieces of green opal. Finely carved emu eggs well mounted in silver, and artistic bracelets, brooches and pendants set with Queensland gems, including the diamond, help to make a rich setting to the raw material which forms such a

THE CENTAUR EWERS, SILVER IN THE GARRARD EXHIBIT.

Association this noon, at which there was a very large attendance. Several applica- tions for membership were received and referred to the executive committee. The reports of the secretary and treasurer were read and showed that the financial condi- tion of the association was very encourag- ing. The work that has been accomplish- ed during the past year was reviewed by the secretary in his report and the information was received with much general satisfaction by the members.

The Jewelers' Protective Association has been established but about three years, but during that time much has been done to- ward protecting the manufacturers who are members against the depredations of the employes, and also against "fences," who have for years made a business of not only receiving stolen gold, silver and other valuable metals, but instigating the pilfer- ings. Already several convictions have been secured through the legal representa- tives of the association and the reports from the members indicate that these con- victions and the activity of the association have had a beneficial effect upon deterring employes from such stealings.

The members of the Board of Directors will hold a meeting in a short time at which the officers for the ensuing year will be elected.

\$140, and contingent liabilities \$220. The assets consist of cash, \$17; promissory notes, \$5,000; machinery, etc., \$700, and debts due, \$4,252.83.

SILVER TROPHY IN GARRARD EXHIBIT.

Among the unsecured creditors for more than \$100 are: Freudenheim Bros. & Levy,

N. A. Clausen, Duluth, Minn., has re- turned from the west and is re-engaging in business in Duluth, starting a new store.

Thieves recently made an unsuccessful at- tempt to break into the store of E. H. Beardshear & Co., Sweetwater, Tenn.

# Modern Cameos

The first samples of the MODERN CUT CAMEOS were brought over by us about two years ago.

Confident of the ultimate success of the stone we never tired in our efforts to acquaint the trade with its merits. Its immense popularity now attests to our correct foresight.

The same effort has been exerted on the other side in improving the quality as well as securing an adequate supply. We have succeeded also in this respect, and our Cameos are unexcelled in the matter of superior engraving, and precision of size and finish—and at right prices.

ONYX CAMEOS in MODERN and CLASSIC DESIGNS on hand in all sizes and colors for immediate delivery.

### Thief Throws Red Pepper in Eyes of New York Jeweler's Wife in an Attempt to Steal a Diamond Ring.

Early in the afternoon of Thursday, Aug. 14, a young man, 20 years old, entered the jewelry store of Nathan Schwartz, 1422 Third Ave., New York, and asked Mrs. Schwartz, who was alone in the store at the time, to show him some diamond rings. Mrs. Schwartz, who says he "didn't look much decent," showed him only one ring at a time.

After he had quibbled for 15 minutes, trying to induce her to reduce the price of a \$145 gem to \$140, he asked to see a certain ring that he had noticed in the window. Mrs. Schwartz stepped to the window, leaving the \$145 ring on the counter. When she returned, the man quickly, and without warning, dashed a handful of red pepper into her face, then with the ring ran to the door.

Mrs. Schwartz, though blinded, followed him into the street, crying "Thief, thief!" Her detectives, who heard her cries, gave chase and captured the fugitive. They overpowered him with difficulty and brought him back into the jewelry store, where he threw the missing ring behind the counter. Here it was picked up still attached to its card. In the pocket of the thief was found a bag of red pepper.

The prisoner said he was William Armstrong, 20 years old, an embroidery worker, living at Plainfield, N. J. He was sent to Police Headquarters. The case is now before the Grand Jury.

### Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., Aug. 19.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the port of New York for the week just ended:

Antwerp: 2 cases watches, \$100.  
 Bahia: 9 cases clocks and watches, \$163.  
 Bombay: 7 cases watches, \$1,346.  
 Bremen: 5 cases plated ware, \$375; 1 case scopes and views, \$185; 3 cases watches, \$3,043.  
 Buenos Ayres: 23 cases clocks, \$367; 11 cases plated ware, \$1,020; 1 case optical goods, \$140.  
 Calcutta: 1 case clocks, \$180.  
 Cape Town: 33 cases clocks, \$678.  
 Christiania: 10 cases clocks, \$345.  
 Colon: 1 case scopes and views, \$143; 16 cases watches, \$107; 2 cases clocks, \$375.  
 Corekary: 2 cases watches, \$102.  
 Guayaquil: 2 cases jewelry, \$129.  
 Hamburg: 2 cases optical goods, \$187.  
 Hong Kong: 59 cases clocks, \$950.  
 Havana: 1 case optical goods, \$136.  
 Havre: 2 cases plated ware, \$145; 2 cases jewelry, \$288.  
 Iquique: 1 case clocks, \$100.  
 Liverpool: 2 cases jewelry, \$705; 1 case silverware, \$452; 1 case jewelry, \$614; 350 cases precious stones, \$750; 42 cases clocks, \$881.  
 London: 58 cases clocks, \$3,678; 3 cases watches, \$362; 15 cases optical goods, \$5,094; 2 cases plated ware, \$297; 1 case optical goods, \$127; 19 cases clocks, \$469.  
 Melbourne: 17 cases plated ware, \$752; 2 cases optical goods, \$690; 76 cases clocks, \$1,315; 4 cases scopes and views, \$332; 7 cases plated ware, \$525; 5 cases clocks, \$763.  
 Para: 14 cases imitation jewelry, \$1,263; 12 cases clocks, \$336; 1 case watches, \$101.  
 Rangoon: 4 cases watches, \$285.  
 Rio de Janeiro: 2 cases plated ware, \$240; 208 cases clocks, \$3,193; 1 case jewelers' supplies, \$2,083.  
 Puerto Cahello: 2 cases scopes and views, \$720.  
 Shanghai: 20 cases clocks, \$310.  
 Smyrna: 11 cases clocks, \$101.

Southampton: 26 cases clocks, \$930; 4 cases watches, \$549; 3 cases scopes and views, \$599; 13 cases watches, \$1,496.

Tampico: 1 case silverware, \$148.

Valparaiso: 12 cases plated ware, \$2,017; 2 cases watches, \$840.

Yokohama: 1 case scopes and views, \$175; 68 cases clocks, \$1,986.

### Career of the Late Emile Moeschler.

Emile Moeschler, whose suicide was noted briefly last week, was a native of Switzerland, and received a thorough education in the schools of that country. At an early age he joined the army as a recruit and was soon advanced to the rank of lieutenant. In his student days he gained some prominence as a duelist, having been victorious in six strenuous encounters with the sword, the record of which he bore upon his body through life.

Though a son of wealthy parents, young Moeschler scorned to live save by his own efforts, and when not on duty as a soldier he studied the watchmaking trade and also completed a course in mechanical engineering. Coming to America at the age of 24, he engaged in the retail jewelry business in New York City. While here he was made first lieutenant of the 13th Battery of Switzerland Artillery, but never returned to his native country.

Mr. Moeschler first started in business as a member of the firm of Moeschler & Tschantree, in January, 1885, at 347 Eighth Ave. This partnership dissolved the following year, and he continued alone up to 1901, when he moved to 445 Eighth Ave., and in 1904 to the present location of the business, 577 Eighth Ave.

The cause of his suicide was despondency from ill-health due to cancer of the stomach which physicians had pronounced incurable. The cancer had closed the orifice by which food entered the stomach, so that the patient could no longer eat. When the doctors recommended an operation so that food might be passed in through the walls of the stomach Mr. Moeschler objected, and it is presumed decided at once to end his life. Telling his wife that he was going for a car ride, he went out and bought a revolver, and at bedtime, in her presence, shot himself in the mouth. Two bottles of poison were afterward found hidden in his bed.

Mr. Moeschler's widow will continue the business.

Fred Wehler, who for the past year has been with James J. Bill, Madelia, Minn., will leave about Sept. 1, for his old home at Algona, Ia., where he has purchased the store of F. W. Dingley & Co.

Mrs. A. P. Williams, Rome, N. Y., who for some time has been missing pieces of jewelry, and who was at a loss to account for their mysterious disappearance, was surprised one day recently to discover that the purloiners of the valuable stock were no other than ordinary store rats, which carried the articles to the cellar under the store, where a heterogeneous collection of jewelry, including lockets, charms, chains, spectacles, rings, etc., was found. The rat robbers were unconsciously instrumental in giving the jewelry establishment a great deal of newspaper publicity.

### Providence Jeweler Convicted of Receiving Stolen Goods—Novel Point Involved in His Appeal.

PROVIDENCE, Aug. 19.—Overruling the contention raised by the counsel for John Nelson that a man could not be prosecuted for receiving property stolen in another State, Judge Christopher M. Lee, in the Sixth District Court, sentenced Nelson to three months' imprisonment in the Providence County Jail. Nelson took an appeal and furnished bonds in the sum of \$500. During the progress of the trial, James A. Pirce declared to the court that the members of the Jewelers' Protective Association desired a substantial sentence for Nelson, if he were adjudged guilty.

The prosecution of Nelson was the result of transactions between himself and William J. Wallace, of Attleboro, who, it was testified, brought property belonging to the Fontneau & Cook Co., of Attleboro, which he admitted he had stolen, to Nelson, in this city. The stuff was valued at about \$16.

In imposing sentence, Judge Lee went into the question of the relative guilt of the thief and of the receiver in this sentence, and declared that in a case where a receiver had apparently fostered a disposition on the part of another to steal he considered him worse than the thief himself. In ruling upon the point as to whether a respondent could be prosecuted for receiving stolen property in one State when the theft was committed in another, Judge Lee said: "Unless it is absolutely clear that a man cannot be held for receiving stolen property which has been stolen in another State, I shall be obliged to decide the question in favor of the State in this instance, because the State has no right of appeal."

It became evident from the arguments of the attorneys on both sides that the point had not been definitely settled as between States.

Mr. Pirce, representing the Fontneau & Cook Co., which lost the property and also the Jewelers' Protective Association, said that association regarded the respondent as a "menace to themselves and to the community." The association believed, Mr. Pirce said, that the respondent had defrauded them out of thousands of dollars. The clerk of the Attleboro court had told him personally, he added, that, when persons had been convicted of stealing gold or silver scraps and other precious metals in that town, they had informed the court that they had taken the stuff to Nelson, of Providence, to dispose of it. Mr. Pirce referred to two cases in which he said that Nelson had been convicted, but had escaped through a technicality.

Judge Lee then imposed sentence, saying that he felt justified in taking into account the fact that two juries had convicted the man on questions of fact. The amount involved in the present case, he said, was very small, but in a case where others were incited to theft, he considered the receiver worse than the thief.

The Beck Jewelry Co., Beaumont, Tex., has secured the services of A. W. Hyde, who will have charge of the concern's optical department. Mr. Hyde was formerly in the optical business in New York.

**Members of "Rogers Silverware Co." Arrested at Boston Charged With Using Mails to Defraud—Proceedings Taken in Other Cities.**

BOSTON, Mass., Aug. 21.—George M. Rogers and Eugene M. Richmond, doing business in Boston under the name of the Rogers Silverware Co., were arrested yesterday by a deputy United States marshal on the charge of using the mails in a scheme to defraud. They were taken before Commissioner Hayes in the Federal building and entered a plea of not guilty. Bail was fixed at \$2,000 for each.

To-day their counsel sought a reduction of the bail, especially in the case of Richmond, but it was stated by the Government prosecutor that he had evidence to show that Richmond had invested \$1,800 in the company, and was a partner in effect with Rogers. Bail was not reduced, and the men were taken to Charles St. jail in default thereof. Next Tuesday was assigned the date for a hearing.

The "scheme" to which the Government opposes objection is an old one. It is alleged that the so-called "Rogers Silverware Co." inserted an advertisement in several periodicals, offering a prize of a valuable set of silverware to readers who could solve an easy puzzle which formed a part of the advertisement. On receipt of an answer with the solution, word was sent to the correspondent that on receipt of \$5 to cover expenses of shipping, etc., the prize would be forwarded. It is claimed that the goods shipped were worth about 50 cents.

Evidently they caught a large number of subscribers. The size of their mail attracted attention, and information was also furnished from members of the jewelry trade to the effect that the company was doing a questionable business. Yesterday forenoon alone there were nearly 100 registered subscribers for the concern, which indicated that the money was probably enclosed in them.

The Government officials think the men are the same ones who are reported as having operated in this way in several other cities, and are awaiting the outcome of the hearing with a feeling that it will develop a number of interesting facts in this connection. They are said to have been working the scheme here about three weeks.

Rogers claims Boston as his home, and Richmond is from New Jersey.

A New York dispatch states that Rev. John W. Craig, who claims to be an Episcopal clergyman of 3323 Broadway, Manhattan, was examined in Newark yesterday in connection with the case. He is said to be the treasurer of the company.

PROVIDENCE, Aug. 21.—The two men, giving the names of George M. Rogers and Eugene M. Richmond, arrested in Boston yesterday, it is believed, are the same who have operated extensively in New England as "The Rogers' Silverware Co." Last summer "The Rogers' Silverware Co." opened an office in this city on Washington st. The insertion of advertisements in the current publications to the effect that anyone solving a series of puzzles would be entitled to a prize of a silver tea set of four pieces, which was represented as being

worth about \$35, quickly brought a flood of mail to the office, but the action of the post office officials in the matter brought the operations of the company here to a summary end soon after. The suspicions of the Providence postal officials were aroused by the flood of mail which began to arrive at the local office. A young woman assistant to the company tried to cash a money order here and was refused.

A man, giving the name of Rogers, appeared at the post office, it is claimed, with a money order made out to the company and was notified that the authorities would not cash the money order without proper identification. He came back soon afterward with a man to identify him, he said, but was confronted by Inspector Pendleton, and "The Rogers' Silverware Co." ended its existence here in short order. On the day following Inspector Pendleton went to Bridgeport, Conn., and the company ceased its operations there as a consequence.

In New York last June another fraud order was issued against "The Rogers' Silverware Co." and then the firm evidently came back to the New England district.

NEWARK, N. J., Aug. 21.—The Newark police have also been active in suppressing the work of the silverware concern known as the Rogers Silverware Co., and with the police, Charles E. Entemann, a post-office inspector, has been working. The concern has been advertising here as elsewhere to give away a beautiful set of silverware as a prize to those who answered a simple picture puzzle, the recipient to send \$1.35 to pay for packing, shipping, etc.

When detectives called, Wednesday afternoon, at the office of the concern, they found a man who claimed he was the Rev. John W. Craig, and said that he was local manager. Mr. Craig came to police headquarters and had an interview with the inspector, and as a result of the outcome of the talk, Mr. Craig wrote an order on the Newark postmaster, authorizing him to class all the mail of the Rogers Silverware Co. as "unclaimed," and to return the same to the writers.

Mr. Craig explained that he had bought an interest in the concern for \$25, and that he had paid \$5 in cash, but that after the police had explained the nature of the charges against the concern, he said he would do anything they considered right in the matter and the order to the postmaster followed.

The police think that the Rev. Mr. Craig was sincere, and, if anything, a victim of the others. It is believed that a number of honorable people were induced to invest in the concern without knowing the character of the scheme or its status under the law, and from what the police have learned interests have been sold in many parts of the country.

Though the scheme is an old one, and has been suppressed by the Post-Office Department for years back, still it comes up time and time again, and the same concern or concerns of a name similar to the Rogers Silver Co. has had fraud orders issued against it in several instances, despite the fact that it fought the order.

As far as Newark is concerned, the company only became known to the post-office about two weeks ago, when a man tried to

rent a box for the concern. The investigation which followed disclosed who the parties were, and a watch was kept, and it was found that the concern was distributing a large amount of mail, which was followed by the receipt of a large number of answers directed to the Rogers Company. Before the concern had time to operate, however, the police officers took a hand with the results outlined above.

**Sixth Annual Jewelry Exhibition Opened by Powers & Mayer, New York, to Continue Until Sept. 1.**

The annual jewelry exhibition of Powers & Mayer, New York, is always a subject of interest to the trade, but the sixth exhibition which is now taking place at the firm's show rooms, 258 and 260 Fifth Ave., has been conceded by many prominent jewelers who have visited it to be not only a most marvelous display of jewels of artistic merit, but far more extensive and beautiful than any display ever made by the firm in the past.

The number of jewelers who have visited and contemplate visiting the exhibition exceeds far in number those who visited the display of any former years.

It is impossible to properly deal with each individual piece shown on account of the vast number of articles being displayed, no two of which are alike in style and design. The stock, aside from the magnificent costly pieces for which this firm has always been famous, consists also of an extensive line of medium-priced goods such as Powers & Mayer have never made in the past.

Several mahogany cabinets, about three feet in height and over three feet in width, have been arranged in a semi-circular way, all lighted with electricity and lined with white satin, on which are fastened artistically the goods shown, all of which goes to bring out the character of the articles in a striking manner.

The exhibition will be continued until Sept. 1, when the stocks will be divided up and the firm's representatives will visit the different sections of the country.

**W. J. Eroe, New Castle, Pa., Goes Into Voluntary Bankruptcy.**

NEW CASTLE, Pa., Aug. 20.—W. J. Eroe, a leading New Castle jeweler, went into bankruptcy Wednesday. The schedules as received by Referee in Bankruptcy E. M. Underwood, show that the assets are \$8,395.01, and the total liabilities \$15,751.98. The liabilities include \$14,840.44 of unsecured claims, and \$357.98 is due clerks.

The failure is due to hard times and the refusal of New York creditors to wait longer. The largest claim is that of the Scribner & Loehr Co., Cleveland, O., for \$7,558.

Mr. Eroe, who was formerly for 16 years employed by Geo. W. Pratt & Co., New York, came here in 1895, and with W. P. Hanna formed the firm of Hanna & Eroe. This firm dissolved in 1905, both partners continuing. Mr. Eroe obtained an extension from his creditors in October last, at which time his liabilities were \$17,067 and his assets \$20,742.

**Editors of F. W. Sackett File Voluntary Petition in Bankruptcy Against Him.**

Franklin W. Sackett, wholesale dealer in jewelry and diamonds, at 59 Maiden Lane, New York, is in financial difficulties. An attempt which was made to carry through a scheme of settlement with his creditors by reorganizing into a corporation, was temporarily blocked, last week, by filing of a petition in involuntary bankruptcy against Mr. Sackett, in the United States District Court at New York. The attorney who filed the petition was Leonard Bronner, on the claims of three creditors: Wood & Woodhull, for \$3,302; Ketcham McDougall, for \$40, and Wm. F. Utter, for \$8. It is alleged in the petition that Mr. Sackett is insolvent and had made preferential payments amounting to about \$30,000.

When asked to make a statement, Saturday, Mr. Sackett referred a reporter of THE JEWELERS' CIRCULAR-WEEKLY to his attorney, Walter T. Kohn, 309 Broadway, who examined that the bankruptcy proceedings were precipitated by the action of certain creditors in New York, who had begun suits in the City Court. These suits had been commenced by the service of a short return summons, after Mr. Sackett had put before the creditors his proposition of compromise. As far as the assets and liabilities were concerned, Mr. Kohn said that he had made no inventory and was not in a position to give any exact figures, except in the statement made in the application for the receiver, that the liabilities were \$30,000, was greatly exaggerated, and he did not think that they would amount to more than half that sum. What the exact value of the assets was he could not say, but as far as Mr. Sackett's condition is concerned, he said that the creditors would find everything in good shape, and that there were no assignments of accounts or anything of that kind.

The allegation in the bankruptcy proceedings, that Mr. Sackett had made preferred payments to creditors to the amount of \$30,000, Mr. Kohn said, had reference only to those payments which Mr. Sackett had made to creditors in the last three months, the ordinary course of his business. His intention, he said, had made every effort to continue and his position was due to the general condition of business and also to the fact that he could not collect on his accounts. "However," said Mr. Kohn, "I hope to bring about a settlement of affairs in short order, and for that purpose will probably call a meeting of the creditors during the week."

Explaining why he filed the petition in bankruptcy, Leonard Bronner stated that it was done simply to conserve the estate for the creditors as a whole and prevent any individual proceedings in the interest of particular creditors. He stated that no attempt would be made to force an adjudication in bankruptcy, the petition being simply filed to preserve the status quo.

In the United States District Court, Friday, Judge Hough appointed Marshall S. Jaeger temporary receiver of Mr. Sackett's estate, fixing his bond at \$40,000.

Mr. Sackett commenced business in 1890

under the style of Sackett & Co., his partner being a Mr. Tucker, and in the following year Chas. H. Welsh bought out Tucker's interest and the business was continued as Sackett & Welsh. This firm failed in 1892 and compromised with creditors. It dissolved in January, 1893, since which time Mr. Sackett continued alone. Mr. Sackett is well regarded in the trade. According to statements made last April, he then had liabilities of about \$60,000, and assets of about \$80,000.

PROVIDENCE, R. I., Aug. 21.—A meeting of the creditors of F. W. Sackett, of New York, was held at the rooms of the Manufacturing Jewelers' Board of Trade this afternoon, at which there were about 20 present. Members of the Board are interested for about \$30,000. Everett L. Spencer, of E. L. Spencer Co., was chairman, and Marcus W. Morton, secretary of the Board, was secretary. The meeting voted to accept a compromise requiring the reorganization of the business by a new corporation, which is to include some of the employes of the firm. A committee consisting of E. L. Spencer, David L. Lowe, of the D. F. Briggs Co., and George A. Whiting, of Sturtevant & Whiting.

**Death of Walter S. Trowbridge.**

COLORADO SPRINGS, Colo., Aug. 19.—The funeral of the late Walter S. Trowbridge, who died in this city late Monday night, was held from the Elks lodge rooms at 2.30 o'clock this afternoon.

Mr. Trowbridge was 41 years old and had lived in Colorado Springs about seven years. He came here from Winona, Minn., where he conducted an engraving and watchmaking school. Afterward he came to Colorado Springs and engaged in the jewelry business. He managed the Goodspeed jewelry store here for a time, afterward working for the Colorado & Southern railroad. His last venture was in the optical business.

**Police Capture at Newark, N. J., Men Believed to be Responsible for Many Burglaries of Jewelry Stores.**

NEWARK, N. J., Aug. 24.—With the capture Saturday morning, in this city, of George Williams and Richard Vaughn, who were arrested on the charge of attempting to blow open the safe of Joseph Wiss & Sons, dealers in jewelry, cutlery and silverware, 683 Broad St., the police believe that they have run down the men who have been wholly or partly responsible for a long series of daring burglaries and several robberies, among which are those of a number of jewelry concerns. Great credit is due not only to the local police, but to the detectives of the New York department, who have been working on the case and have been following the case for several months. The third man, who it is claimed was operating with Williams and Vaughn, was arrested and gave his name as Martin Tiffany. He got away at first, but was later arrested at his home, where a detective found a safe-blowing outfit.

Among the jewelry robberies which the men are believed to have been connected with are those of the Diamond Pen Point Co., whose safe in its Beekman St., Newark, establishment was blown open, and that of the Thomas J. Dunn Co., 101 Chambers St., New York, whose plant was robbed in a similar manner.

Later detectives went to the home of Lizzie Jacobson, who is said to be a confederate of the men, and took therefrom booty which is estimated to be worth \$25,000. In addition to a counterfeit outfit, a kit of burglar tools was found.

It seems that the detectives from New York had been following the men for some time, ever since they had come to the conclusion that the robbery of the Diamond Pen Point Co. and that of the T. J. Dunn Co. were performed by the same hands. They were traced to this city and watched, and it was finally learned that an attack was planned on the stores of J. Wiss & Sons and Charles Hartegen.

The New York detectives who had been watching the men make their arrangements for the attack on the Fiss store saw them divide up the bag of tools, and then one of the men stayed outside the store of Wiss & Sons while the others, with tools and explosives, went inside. After waiting until they were sure the men were at work the detectives, with the officers of this city, swooped down upon the intruders, and caught the man on the watch gave a warning signal, his confederates inside had no chance to get away. The burglars were caught inside the Wiss premises and the glycerine was found already in the safe for.

Williams and Vaughn were captured immediately, but Tiffany broke away and managed to get a trolley car bound from Newark to Hoboken. The detective chased, instead of taking a car, took a train for Hoboken and went straight to the man's lodgings on Clinton St., Brooklyn, where he had been seen the night before. When the man reached home he was placed under arrest.

When taken to police headquarters Williams described himself as a drug clerk and

Vaughn said he was a salesman. Williams, however, was identified as "Humpty" Williams, who has a long record as a robber and burglar and whose picture is in the Rogues Gallery. He is said to be a graduate chemist and the brains of the band. He recently completed a term in prison for a similar crime. Vaughn and Tiffany are not well known to the police. Lizzie Jacobson, the woman arrested later, was accused of being a suspicious person, though it was later charged that she was implicated in the burglary at the R. H. Ingersoll & Bros' store, 65 Cortlandt St., New York, last February. The police believe her to be the wife of Williams, and the counterfeiting outfit which was found in her home has caused the United States Secret Service men to take a hand in the case.

Should the evidence not be sufficiently strong to hold the men in Newark, an attempt will be made to have them brought to New York to answer to the crimes which the police accuse them of committing here.

NEWARK, N. J., Aug. 25.—After being questioned almost continuously for two days and two nights, "Humpty" Williams, leader of the band of burglars and counterfeiters arrested in Newark early on Saturday morning, have made a confession to Sergeants Ryan and Harris, of Newark. He admitted he had directed robberies in Newark, and had robbed safes in five offices where much valuable jewelry and nearly \$1,000 in cash were obtained. He gave the name of Albert Rosenthal, a jeweler, of 49 New Chambers street, as the man to whom he had disposed of most of the stolen property. Rosenthal was arrested and is held for further examination on the charge of receiving the stolen property.

Williams informed the police that some of the jewelry had been hidden under the floor in the parlor of his mother's home, at 686 Lexington Ave., Brooklyn, while more, he said, would be found in the house at 28 4th St., Brooklyn. He continues to disclaim all knowledge of the burglaries in New York City.

**Jewelers' Gold Bars Withdrawn and Exchanged at New York.**

**Creditors Close Store of Faison Jewelry Co., Florence, Ala., Under an Attachment.**

FLORENCE, Ala., Aug. 19.—The stock of the Faison Jewelry Co. was, yesterday morning, attached by F. M. Perry and Rogers Bros., and the place of business closed up by the sheriff. The concern is a new one, and the attachment was filed by owners of the building in which it is located for rent arrears.

The company was run by Paul Faison, who has had a checkered career in the jewelry business in North Carolina and Alabama. He was also a partner in a firm at Union Springs, Colo. Since he came to this town from Troy, Ala., he has been in business as the Faison Jewelry Co.

**News Gleanings.**

C. Hopkins recently purchased the store of William De Bolt, Breckenridge, Mich.

L. Kronenberg has succeeded to the business of Kronenberg & Sons, Selma, Ala.

B. L. Seybold has sold his jewelry business in McLouth, Kans., to C. O. Sullivan.

David Bergeda, of A. Bergeda & Bro., Nashville, Tenn., returned to that city recently after a two weeks' trip to the eastern markets.

At the annual meeting of the Colorado State Optical Society, held in July, J. C. Bloom, of Denver, was elected president and F. M. Agnew secretary.

E. L. Price is now settled in business in a neatly furnished store in Nebo, Ill. The establishment has been equipped with new fixtures and a well-assorted stock.

The J. F. Dailey Jewelry Co., St. Louis, Mo., was the complainant recently against James Divens, 25 years old, who was accused of pawning samples belonging to the jewelry concern.

The John Holland Gold Pen Co., Cincinnati O., is busy mailing to the trade a handsome new poster which illustrates just how to use a Holland fountain pen. The design is unique as well as attractive, and the poster finds great favor with all the company's patrons.

A full page in a recent issue of the Superior (Wis.) Telegram was devoted to a description of the three jewelry establishments owned by C. A. Swanson & Co., N. Peterson and H. Jorgenson, respectively, in that city. The descriptions were accompanied by half-tone illustrations of the several stores.

The auction sale of the stock of E. Albertson, in bankruptcy, Mechanicsville, N. Y., which was conducted by James L. Hand, Jr., jewelers' auctioneer, 14 Maiden Lane, New York, was completed last week. Mr. Hand will commence this week a sale to reduce the stock of Kinnear & D'Esterre, of Kingston, Ont.

The sphygmometer, the new precision watch especially adapted for the use of physicians, giving rapidly and without calculation the number of beats of the pulse in a minute, and which was described and illustrated in THE CIRCULAR-WEEKLY of April 8, has been patented in this country. Henry Freund & Bro., 71-73 Nassau St., New York, are the sole distributors for the United States.

Two women, Rose Loveri and May Mone, both Italians, and believed to be professional shoplifters, were caught stealing rings in O'Donnell & Boucher's jewelry store, recently, in Utica, N. Y. Later developments showed that they had stolen rings and other jewelry from Burtiss & O'Connor's jewelry store, in that city. The police believe they have been operating in other cities. Both were sent to jail for four months. Their record will be looked up.

## Providence.

Frank E. Farnham, of this city, has been granted a patent for a collar supporter.

Hamilton & Hamilton, Jr., 7 Eddy St., want bench hands and experienced bracelet makers.

An additional story is being erected to the brick refinery of Conley & Straight, 236 Eddy St.

The Standard Machinery Co., of 7 Bevy St., is having a good run on automatic cop presses.

Frederick A. Haskell, 206 Weybosset St., is making a big specialty of heavy brass programs for automobiles.

E. Merle Bixby, with the Shepard Co., at the first of the week for a vacation trip to Nova Scotia and St. John.

John Silverman, of Silverman Bros., is passing out the cigars upon the advent of a new girl baby in his household.

Edward B. Hough, manager of the Houghton & Hough Co., returned Thursday from a short trip to Europe.

Mr. and Mrs. Ralph S. Hamilton and Master Robert Hamilton have been motor-traveling through the White Mountains.

Archibald Silverman, of Silverman Bros., left, last week, for an extended trip among the firm's trade in the west.

Henry A. Kirby is building a handsome motor boat at Apponaug and expects to have it ready for launching in a few weeks.

Sidney J. Straker, formerly of the firm of Mitchell & Straker, with his wife, is at Newport, Mass., for the month of August. Charles E. Monroe, optician, of Springfield, Mass., was in this city the first of the week, calling upon the trade and customers. Among the Providence people at Gray's Inn, Jackson, N. H., are Mr. and Mrs. Everett L. Rogers, of Parks Bros. & Rogers.

A. J. Kelsey, formerly with the C. D. Jones Co., of Attleboro, has accepted the position of New York representative for Jones Bros., of this city.

R. T. Kleckner, western representative of Theodore W. Foster & Bro. Co., of this city, started from Chicago, the past week, on his trip to the Pacific coast.

William T. Lewis, Jr., with B. A. Ballou Co., has returned from a trip to New London, N. H., where his family is to remain until the close of Summer.

Mr. and Mrs. William P. Otis, Mr. and Mrs. Theodore W. Foster and Mr. and Mrs. Maurice Ettlinger were registered at Greene's Inn, Narragansett Pier, last week.

Henry G. Thresher, secretary and treasurer of the Waite-Thresher Co., and wife and daughter and Mrs. William W. Flint, left, Thursday, for an auto trip to Maine.

James R. Stone is on a western trip for the White Stone Jewelry Co., of this city, and is sending in some good orders from the new line with which he has been supplied.

The executive committee of the Republican State Central Committee, of which Walter H. Dufee, of this city, is a member, is preparing for a vigorous campaign this Fall.

Emil R. Crecelius, of this city, has been granted a patent for pins, which he has assigned to A. C. Messler, Pawtucket. The invention relates to that class of cuff pins

which are struck up from metal to form a hollow, oblong body.

The association football team which represented the Gorham Co. in the New England League so successfully last season will not play this year, the team having disbanded.

The new Herrick building recently erected on Garnet St., at the corner of Pine, is now completely leased, being mainly occupied by manufacturing jewelers and kindred trades.

Among those who are taking an active interest and participation in yachting and yacht racing on Narragansett Bay this Summer are Horace L. Manchester and Frank Marsden.

The George W. Dover Co. will make changes in the interior arrangements of the offices next week Saturday and with Labor Day to set things to rights the firm will be ready for business on Tuesday.

The weekly meeting of the New England Manufacturing Jewelers and Silversmiths' Association was held Thursday afternoon with a good attendance. Routine business was transacted and plans for the coming season discussed.

The Alloyo Co. is the style of a new concern that has commenced the engineering business at 265½ Canal St., this city. The firm is showing a large line of special and novel designs and has already established a good business.

There was a large attendance at the regular monthly meeting of the Manufacturing Jewelers' Board of Trade on Friday afternoon at the rooms in the Wilcox building, although but little business was transacted excepting routine matters and the auditing of current bills.

Among the recent buyers who have called upon the manufacturers of this city are the following: J. F. Williams, Omaha; Gilbert Friendlich, representing the Baltimore Bargain House, Baltimore, Md., and George M. Andrews, representing Walker Bros., Salt Lake City, Utah.

An attempt to break into the optical store of Clarence Holmes, 76 Westminster St., was made early the past week. There were also evidences that an attempt had also been made to force an entrance to the retail jewelry store of Herbert S. Tanner, a few doors below.

The annual field day of the employes of the Watson & Newell Co., Attleboro, was held Saturday at Crescent Park in spite of the rain. The employes turned out in large numbers and special cars transported them from Attleboro to the park, where a programme of sports and dinner were enjoyed.

The Sterling Silver Mfg. Co. is the name of a new concern that is to begin the manufacture of a line of sterling silver flat ware in the new Doran building, 150 Chestnut St. While the names of the members of the concern have not yet been announced it is understood that one has been for several years the foreman of a factory in this city and that the new firm is financially backed by a Newark (N. J.) capitalist.

On Friday evening occurred the celebration of the 50th birthday of Charles Donle at his Summer cottage at Field's Point. The affair was a complete surprise to Mr. Donle, who, later was escorted to the hall

near by, where the guests had assembled and where amid flags and banners and flowers he was presented with several remembrances of the occasion. A musicale followed, after which refreshments were served to the 250 guests.

Frank B. Reynolds, treasurer of the Cory & Reynolds Co., left here, last Friday morning, in his automobile for a vacation trip to Camp Tanglewood, Bridgeton, Me. The party which accompanied him included Governor James H. Higgins, of Rhode Island. The camp is the property of Mr. Reynolds and he will remain there for six weeks, making the return by automobile. Previous to the departure of the party a dinner was enjoyed at the Newman Hotel, this city.

Signmund Rosen, a real estate dealer, has purchased the manufacturing plant of the Jacobs Jewelry Co., on Point St., and is planning extensive repairs and alterations upon the building preparatory to the making of a line of solid gold jewelry. The ground plan of the building is about 50 by 60 feet and it contains about 3,000 square feet of floor space. Mr. Rosen estimates that he will spend about \$25,000 in the alterations and refitting of the plant. He gained experience in the jewelry business by spending 16 years with the S. & B. Lederer Co.

## Connecticut.

C. D. Morris, Wallingford, left Aug. 15 for a short vacation, to be spent in Block Island.

N. J. Lustig, about Sept. 1, will open an up-to-date jewelry and optical store at 1207 Main St., Bridgeport.

A. Rabinowitz, Stamford, has returned from a vacation spent at Saratoga and Sharon Springs, N. Y.

Edward Corey, optician with the Ely Eyeglass Mfg. Co., Middletown, returned, Aug. 19, from an automobile trip to Philadelphia.

Marshall K. Thomas, of Wallingford, last week, completed the 26th consecutive year of his association with the Wilcox Silver Plate Co., Meriden.

Nearly one-half of the departments of the Waterbury Clock Co., Waterbury, have begun working on a full time basis of six days a week, nine hours a day.

Frederick Weber, Meriden, returned home about a week ago, after having spent several weeks in Germany, Switzerland and France. While in Germany Mr. Weber visited Hamburg, Berlin, Leipsic and Frankfort-on-the-Main.

The polishers and buffers of the Bradley & Hubbard Mfg. Co. and of Manning, Bowman & Co., Meriden, held an outing at Birdsey Grove, near Meriden, Saturday, Aug. 15. A dinner was served and athletic games were held.

The employes of the Barbour Silver Co., Hartford, enjoyed an annual outing, Saturday, Aug. 15. The party went to New Haven by trolley and thence by boat to Mansfield Grove, where sports and dinner made up a very enjoyable day.

E. W. Spencer, for many years an inspector in the case department of the factory of the E. Ingraham Co., Bristol, and a well-known resident of that place, died Aug. 17, at his home on Woodland St., after having been ill for about a week. The deceased was born in Gilford, 55 years ago.

### WORKSHOP NOTES

for Jewelers and Watchmakers  
Cloth :: Postpaid, \$2.50

Published by  
The Jewelers' Circular Pub. Co.,  
11 John St., New York

**Attleboro.**

Frank M. Mossberg is planning a trip to Europe early in September. An automobile owned by James E. Pike collided last Saturday with a wagon. The damage was slight.

The schedules of Cummings & King, in bankruptcy, will in all probability be filed the first part of September.

Roy MacPherson has left the employ of the Standard Button Co., which he represented on the Chicago circuit.

Work of building the foundation for the brick factory of Albert S. Ingraham began the latter part of last week.

Mark E. Rowe, president, of the P. J. Cummings Co., has been elected vice-president of the Attleboro Savings Bank.

George W. Lee, a veteran jeweler, observed his 73d birthday last Wednesday. He has been in the employ of A. A. Bushee & Co., for 24 years.

The new home of the C. D. Lyons Co., Mansfield, is now ready for occupancy. The work of removal begins this week and will consume some time.

William H. Saart, who was injured quite badly in an electric car crash, several weeks ago, has now recovered sufficiently to resume his duties at the factory.

Edward A. Anthony, salesman for his brother, John Anthony, who was married in Providence, last week, has returned from a wedding trip. He will make his home in Providence.

The Standard Button Co.'s employees had an outing on the Highland Golf Club grounds, Saturday. An enjoyable day was passed, despite the stormy weather. At noon a clam-bake was served.

A special meeting of the creditors of the A. White Co., which recently assigned, was held last Wednesday to act on the petition of Trustee Ralph C. Estes, asking authority to dispose of the business by sale. He was given authority to sell the business for a sum of not less than \$3,000.

We are informed that THE JEWELERS' CIRCULAR—WEEKLY's description of the world's trophy awarded to the winner of the typewriter speed contest, which was illustrated on the front cover of last issue, contained an error in regard to the designer. We learn from J. H. Harmstone that the trophy in question was designed and modeled by him.

Rothschild Bros. have not as yet settled upon their future plans, although they have done considerable work to interest Attleboro capital in building a factory that would make it possible for them to maintain their jewelry business in town and so bring to Attleboro the Klingtite Comb Co., Worcester. If the Klingtite Co. does not come to Attleboro there is a strong possibility of its removal to Chicago.

Alexander Chadbourne left last week for Chicago to open the office of the James Blake Co. in that city. Mr. Chadbourne was to have gone west about a month ago, but it was detained because of the illness of his brother, Henry Blake. The James E. Blake Co. is preparing for the market a purse of slender silver links, handsome engraved mounts and attractive chain. It takes two weeks to manufacture each purse. The making takes one girl 13 days.

**North Attleboro.****TRADE CONDITIONS**

Salesmen traveling through the middle west send home encouraging reports as to the outlook for the Fall business. A general feeling of confidence prevails among the jewelers, and the buying has been larger the past few weeks than it has been any time this year.

E. Ira Richards has returned from a visit to Europe.

J. Frank Mason is enjoying a vacation in New Hampshire.

James P. Black has returned from a vacation passed at Lake Sunapee, N. H.

A good-sized addition has been built onto the engine-room in the Plainville shops.

Charles E. Riley, treasurer of George L. Paine Co., has been enjoying a vacation at Oak Bluffs.

Charles F. Martin left Sunday on a trip through New York State in the interests of Fred S. Gilbert.

William Miller went to New York on business in the interests of Doran & Bagnall Co., last week.

Robert Clampitt, salesman for C. Ray Randall & Co., has been enjoying a vacation at Oak Bluffs.

A third dividend of 10 per cent is predicted by those in charge of the defunct Jewelers' National Bank, to be paid in the early part of the Winter.

An attempt was made a few nights ago to enter the factory of the J. F. Sturdy's Sons Co. The watchman detected the men prowling about the windows and they fled upon being discovered.

Charles Sekowski has taken a position as superintendent of J. H. Peckham & Co. He entered upon his new duties Monday morning. Mr. Sekowski has been employed in a responsible position by the A. H. Bliss Co., for 12 years.

The improvements at the Company Shops, which are now practically complete, cost in the neighborhood of \$30,000. The installing of the sprinkling system and the new hydrants about the yard have caused a big reduction in the insurance rates.

**Baltimore.**

A. Wallenhorst is at present making a tour of Germany and France.

M. Berman, Harrisburg, Pa., is now established in business at 876 W. Baltimore St.

Gorman & Hahnfeld, contemplate opening a retail store on Park Ave., near Lexington.

Jos. B. Scofield, optician, has moved into newly furnished quarters at 1630 Pennsylvania Ave.

Robert B. Smith, 204 N. Gay St., returned recently from a fishing trip to Ocean City.

S. S. Sill, mysteriously disappeared, a short time ago, and thus far no clue to his whereabouts has been found.

H. Dearing has completed arrangements to move to 239 W. Broadway, where he will have larger quarters for his increasing business.

The building occupied by the Simons Jewelry Co., Davenport, Ia., will soon undergo important improvements.

**Lancaster, Pa.**

John B. Roth, Jr., has returned from a sojourn at Atlantic City.

Henry Sobel has returned to his store after being ill two weeks.

Otto Salzman, Danville, Va., has returned there after a visit to his parents at Mannheim.

F. A. Huber, C. F. Reisner and E. M. Bracher, of the H. S. Meiskey Co., have started on their Fall trips.

Jack Straub, a former Lancaster jeweler, now vice-president of the Star Ball Retaining Co., is home from his seventh visit to Europe.

Erwin A. Harvey, engraver for S. Kurtz Zook, is at Atlantic City and W. G. Fehl, of the same house, is back from a trip to Philadelphia, New York and Atlantic City.

Harry Knodt has just taken the position of bookkeeper with the Non-Retailing Co. H. W. Detterlein, of the company's force of representatives, is spending his vacation at Atlantic City, Philadelphia and New York.

J. Orton Clawson, manager of the jewelry store, Belle Vernon, Pa., and his wife visited Lancaster last week, as did Frank N. Mason and wife, of Pittsburg. Both gentlemen are former students of the local technical school.

Among the jewelers who recently visited Lancaster were: Chester McAfee, Memphis, Tenn.; J. H. Sensenig, New Holland; E. P. Zane, Christiana; N. W. Pinkerton, Manheim; C. E. Hinkle, Ephrata; Carl Baumeister, Pittsburg.

S. H. Miller, Mount Joy, has just repaired a clock that is a genuine curiosity, made in Germany over 200 years ago. The plates are of wrought iron, with heavy wrought iron pillars. The case is tall, like the "grandfather's" style.

J. C. Thomas, of Stephen Thomas & Bro., Charleston, S. C., is spending his vacation in Lancaster. He brought along his son, Joseph Thomas, and entered him as a student in engraving and jewelry work at the Ezra F. Bowman Technical School. E. F. Nolt, of Lewisburg, Pa., has also entered the school, as has Jesse G. Fox, of Point Pleasant, Pa.

**Atlanta, Ga.**

John Berkele, of Maier & Berkele, has been elected a member of the cemetery commission.

E. C. Hughes, the man who forged the name of Dr. L. Amster to a check and got a diamond ring and \$2 in money from Schaul & May, pleaded guilty before Judge Roan in the Superior Court, criminal division, Aug. 18, and was sentenced to three years in the penitentiary. The forgery took place about two months ago. Accompanying the check was a forged letter from Dr. Amster, commending Hughes to the jewelers. D. A. Tobias, a clerk there, gave him the ring valued at \$48 and \$2 in change. He then suggested to Hughes that they go across the street to the Fourth National Bank building to Dr. Amster's office and verify the check. Arriving at the entrance of the building Hughes broke and ran, but was captured after a chase.

W. McClusky has sold his store in Clinton, Mo., to a Mr. Wagner.

# GORHAM SILVER

## TO THE JEWELRY TRADE

Attention is respectfully invited to the fact that the Gorham Company's traveling representatives have already resumed their customary activities in introducing to the Jewelry Trade the many original and exclusive novelties as well as the standard lines of silverware which have been prepared by the Gorham artificers for the approaching Fall and Holiday Seasons.

In view of the period of approaching prosperity it seems pertinent to suggest to the progressive jeweler the advantage he will gain by a careful examination of his stock so as to arrive at a speedy and discreet decision as to the directions in which it needs replenishing. Orders given now will be shipped whenever required.

THE editorial paragraph which appeared in a recent issue of THE CIRCULAR-WEEKLY in regard to the use of air-ships by smugglers, should the dirigible balloon or aeroplane become a practical proposition, has been copied in a number of the daily papers throughout the country. While some of these papers have taken the paragraph in the spirit in which it was intended, unfortunately others have not appreciated the poor attempt at humor or facetiousness by the writer, and have taken literally what was intended as a joke.

AN interesting article on the subject of what has been done in the manufacture of artificial or scientific precious stones will be published in the next issue of THE CIRCULAR-WEEKLY. The author, E. Hopkins, of London, is well known as an expert in gems and probably best known as the compiler of the table showing the various kinds of gems, classified by the different colors, giving the different qualities of each and the methods by which they may be distinguished from one another. His article on the work done in scientific gems is written for the purpose of putting together, in brief form, all that has actually been accomplished in this way that will have any effect on the commercial side of the subject, and at the same time of correcting the many newspaper stories and alleged scientific accounts of discoveries as to making of gems, which appear from time to time. With the article the jeweler can see not alone what has, but what has *not* been done and be able to keep his customers informed as to how the really scientific and the improperly called scientific gems may be tested and distinguished. While the article does not add much to the literature upon the subject, it brings together much that has been heretofore published separately that might have been forgotten, and may serve to allay the fears of some timid merchants who have an exaggerated idea of what the German and French chemists have actually achieved.

**The Pepper Throwing Thief.** THE note in another column telling of the dastardly attack on the wife of a jeweler of New York by a thief who tried to escape with a diamond after throwing red pepper in her eyes, serves to again bring prominently before the members of the trade the knowledge that they of all merchants are most subject or liable to attacks of this kind, and offers an excellent excuse for discussion as to what means can be taken to protect the jeweler from the pepper throwing thief. It may be that there are no precautions which the jeweler can take that will make him immune from surprise from the man who wishes to dash pepper in his eyes, but if any plan can be suggested that will permit only a minimum of risk to the salesman or saleswoman it should be put before every jeweler of the country.

True, something may be gained by enlisting the sympathy of the prosecuting officers and trying to have an example made of every thief who stoops to such dastardly methods in committing crime, but unfortunately the instruments of the law cannot always be used in such a way, as justice

Good advertising is the fuel that keeps the fire of business burning brightly.

in this country is administered according to certain abstract rules involving the consideration of certain technicalities, and not on the principle of making the punishment fit the crime. Another unfortunate circumstance lies in the fact that the man who commits this crime as a rule does not take into consideration the fact that he is liable to be caught, because he thinks the very use of pepper makes his chance of escape so much greater.

Have any of our readers any suggestions to make upon this subject, or has any one a plan that has proven or would be likely to prove, at all effective in dealing with the thieves of this character? Truly, it would seem that as the danger is so real and one to which any merchant may be exposed at any time that the subject is worthy of careful consideration by all merchants and employes in the trade.

**Novel Suit at Providence to Restrain Merchant from Soliciting Customers of His Former Employer.**

PROVIDENCE, Aug. 20.—A bill in equity, which has no precedent in Rhode Island court annals, was filed in the Superior Court this morning by Stevens & Co., proprietors of the Villers Co., which conducts an optical business at 185 Mathewson St. The respondent in the case is Dr. Ned C. Stiles, proprietor of the Stiles Optical Co., located at 50 Aborn St. The plaintiff asks the court to restrain Dr. Stiles from soliciting the customers and patrons of the Villers store and from advertising that he was formerly employed at that place. The papers in the case set forth that Dr. Stiles was for a period of more than two years employed at the Villers store, and that during his employment he copied the names of the customers of the complainant, or obtained the names in some way without the knowledge or consent of the complainant, in violation of the confidence placed in him.

The papers further allege that since Dr. Stiles set up in business for himself, and after he had left the Villers' employ, he has addressed circular letters to the customers and patrons of that concern, asking their patronage. He has also, the bill alleges, advertised in the newspapers that he was formerly employed at the Villers establishment.

Though the case is a new one for the Rhode Island courts, and will be watched with considerable interest by lawyers and merchants, cases have been decided in Michigan, Ohio and England in which the right of the complainant to enjoin the respondent in cases of this sort have been declared, it is said. The citation is returnable Sept. 12.

## ROCK BOTTOM PRICES ON DIAMONDS

Our diamond prices are rock bottom.

We import the stones direct, cut them ourselves, and sell them as close as anybody in the country does for diamonds of equal quality.

We carry a large stock at all times and the jeweler who sends to us for a selection not only gets rock bottom prices, but also a liberal assortment—and, what is of utmost importance, he gets it promptly.

*It's the  
only kind  
we make*

A RATHER COMMONPLACE DECLARATION, WE'LL AGREE, BUT WE MAKE IT WITH AN INSPIRING REVERENCE FOR THAT MUCH-ABUSED WORD "GOOD." OUR JEWELRY IS GOOD ALL OVER—GOOD THROUGH AND THROUGH. IT ISN'T ALONE SUPERFICIALLY IMPRESSIVE, IT GOES BEYOND THAT, SUPPORTING ITS VISIBLE DIGNITY WITH MATERIAL QUALITIES THAT MAKE IT MOST ENDURING. FURTHERMORE, LIKE EVERYTHING IMPRESSIVE, IT HAS A PERSONALITY—CHARACTERISTICS THAT EASILY HELP IDENTIFY IT AS A KIRBY PRODUCT. ASK TO SEE THE KIRBY LINE BEARING THE ABOVE TRADE-MARK.

### Boston.

M. J. Atherton is at "Castle Atherton" his Summer place at Mt. Desert.

John Addison, the Charlestown district retail jeweler, is at Mt. Desert enjoying a outing.

E. W. Langford, engraver, is occupying a bungalow, built by himself, at Plymouth for a month.

During a severe electrical storm at Gardner, Mass., recently, a bolt of lightning hit the chimney of the factory of the Frank W. Smith Co., causing damage estimated at \$300.

E. M. Wilder, of the Jewelers' building, who is a member of the Veteran Firemen's Association, of Hingham, his home town, attended the big firemen's muster and played out at Lowell, last week.

A. R. Harmon, London manager for the Waltham Watch Co., who has been in the country for the month of August, accompanied by Mrs. Harmon, and stopping at Prout's Neck, a coast resort, returns this week to England.

Miss E. M. Sproul, bookkeeper of the Smith, Patterson Co.'s factory, was married last week to M. A. Fletcher, buyer for the R. H. White Co., of this city. After a trip through New York, Baltimore and Washington they will reside in Somerville.

Elmer E. Knight and "Jaek" Hollister, Boston; E. A. Doyle, the Lynn jeweler, and H. E. Slater and Paul H. Phelps, of New York, were the guests of William Robinson Springfield, Mass., last Thursday at a clam bake, and had a very enjoyable outing with their host.

The first meeting of the creditors of Samuel Zumelman, who was adjudicated bankrupt July 20, will be held Aug. 25, 10 A. M., in the Bankruptcy Court room 121 and 122 Post Office building. Claims may then be proved, the bankrupt examined and a trustee elected.

Max Rosenblum, who said he was from New York, was held, Thursday, in \$1,500 in the Municipal Court on a charge of substituting a cheap paste diamond for a real stone in a ring which he sold to August Rancatre. It is claimed Rosenblum allowed Rancatre to take a \$125 ring and have it examined by several jewelers, and that just before the low price of \$50 was paid and the ring transferred a false stone was substituted. The charge as specified in the complaint is larceny. It is claimed that when the police searched the prisoner's clothes they found one really good ring and three imitations, and one solid gold watch and three bogus ones.

Consul-General Frank D. Hill, of Barcelona, gives the following result of a recent visit of a representative of one of the largest New England manufacturers of silverware to that Spanish commercial metropolis: He found practically no market for these wares in Barcelona and abandoned all idea of going to Madrid or Bilbao, the other two places of his itinerary, as planned. American heavy silver plate and plated ware was too expensive for the Spanish trade and the market also limited. He received an order for \$200 worth of goods, which was regarded as a large order.

## New York Notes.

W. H. Schwarzschild, of Richmond, Va., as in the city last week.

H. H. Collard has taken quarters on the 17th floor of 15 Maiden Lane.

John Drake, of the R. F. Simmons Co., is in Canada on an extended vacation.

A. E. Fisher, formerly with L. Kroll & Co., now represents Meyer Sabsevit.

Charles A. Whiting, of Whiting & Davis, Plainville, Mass., was in town last week.

Foster Clark, of W. G. Clark & Co., North Attleboro, Mass., is visiting in this city.

George Philipps, Scranton, Pa., who is visiting in New York, will be here all this week.

L. F. Kadison, of Fera & Kadison, returns from Europe this week in the *Mauremnia*.

Harvey Clap, of Daggett & Clap Co., North Attleboro, Mass., is visiting his brother in this city.

Wm. H. Cotter has left on his usual western trip for Bernard Bandler & Son, 5 Nassau St.

M. A. Mead, Chicago, will be at his New York offices for a week about the first part of September.

D. C. Van Riper, who is spending a vacation in Michigan, will return to New York about Sept. 1.

Morris Hodes will resume his retail jewelry and optical business about Sept. 1, at 711 Seventh Ave.

T. R. Bassett, Andover, N. Y., was in the Metropolitan, last week, as was also Ben Ashe, of Binghamton.

The Patten Co. has leased the store at 105 W. 125th St., where the jewelry business will be conducted.

Fred. Kennon, of the John T. Mauran Mfg. Co., Providence, R. I., visited friends in the jewelry district, last week.

Henry E. Oppenheimer, of H. E. Oppenheimer & Co., 3 Maiden Lane, sailed from Antwerp on the *Vaderland* on Saturday.

Jas. H. Noyes, secretary of the Jewelers' Security Alliance, who is now on a vacation in Maine, will return to his office, Sept. 8.

Max Moser and Howard Whyte, importers of diamonds, are new tenants of the Silversmiths building, occupying room No. 1610.

The Plainville Stock Co. has moved its New York offices from the eighth to the 13th floor of the Jewelers' building, 9-13 Maiden Lane.

David Offenhutter, formerly a diamond dealer at 12 John St., has been discharged of all his debts in bankruptcy. His liabilities were \$3,204.

F. A. Jeanne, Paris, France, arrived in this city, last week, on the *Philadelphia*. He will make his headquarters at 170 Broadway until Sept. 5.

Alex Sabsevit, formerly of Sabsevit Bros., has opened for business as a manufacturing jeweler and jobber of watches and diamonds, at 48 Canal St.

Jesse Watson, as trustee of J. F. Braun in bankruptcy, will sell at auction at 2186 Third Ave., Bronx, the entire assets of the bankrupt. The sale will begin Sept. 8, at 10 A. M.

The Bruhl Bros. & Henius Co., now on the 11th floor of the Silversmiths' build-

ing, 15-19 Maiden Lane, has taken more pleasant quarters on the 18th floor in the same building.

Among the passengers on the *Abraham Lincoln*, which arrived Wednesday, was E. B. Hough, of the Wightman & Hough Co., Providence, R. I., who had been in Europe for the past two months.

Emanuel Gattle is reported to be the owner of one of the automobiles which met in collision at Far Rockaway early last week. At the time of the accident Mr. Gattle was not in the car.

J. B. Haskin, who recently bought out C. P. Granbery, has succeeded to the business, which is now under his sole control and will continue the manufacture of black jewelry at 114 E. 11th St.

William Pringle, formerly an engraver for Tiffany & Co. in this city, died Wednesday of a complication of diseases at his home in Dobbs Ferry. He was born in 1832. He left a widow and one son.

In his window at Maiden Lane and Liberty Pl., John Frick has been showing a series of cups which he has made as tennis trophies for the coming tournament of the Park Club, Plainville, N. J.

Detective-Lieutenant Andrew Nugent, who has been acting as the police guardian of the jewelry trade for the past 15 years, is back again at his post in Maiden Lane, after a vacation spent at Hawthorne, N. Y.

J. H. Miles has moved from 9 Eldridge St. to 33 Forsyth St. H. Schaefer left Aug. 25 on the *Kaiser Wilhelm* in Mr. Miles' interest, for Paris, Antwerp and London, for the purpose of purchasing diamonds and colored stones.

J. J. Sweeney, of the J. J. Sweeney Jewelry Co., and the Sweeney Loan Office, Houston, Tex., who is at present in New York, is making his headquarters at the downtown offices of the Gorham Co., 15 Maiden Lane.

Robert G. Simms, a native of England, employed in the Ansonia Clock Co.'s factory, died at his home, 354 Seventh Ave., Brooklyn, Thursday. The funeral services were held at his late home Sunday afternoon at 2 o'clock.

W. N. Norton, who is connected with the jewelry firm of Noack & Gorenflo, Detroit, Mich., while in New York, last week, was telling his friends an interesting story of how he had come with a companion from Detroit to Albany in a canoe.

The well known Oriental traveling representatives, Keegan and Rosencrantz, who travel through Japan, China and India and who returned here from Europe recently, are visiting the Lane this week. They will return to their business in the Orient next month.

Chas. G. Alford, of C. G. Alford & Co., 11 John St., started Thursday night for Canada, where he will spend the next two weeks with a party, fishing in the region of the St. Lawrence. This is the fourth fishing trip which Mr. Alford has taken this Summer.

The Jewelers Board of Trade, last week, sent out to the creditors of Chas. O'Bryon & Co., Pittsburg, Pa., checks in full settlement of their claims at 100 cents on the dollar. The Board also distributed a 40 per cent. settlement in the bankruptcy of

Ball & Putnam, Joplin, Mo., and a first dividend of 10 per cent. to the creditors of John Hellerich, Detroit, Mich.

Louis Friedlander, of the firm of R. L. & M. Friedlander, recently presented to the Metropolitan Museum of Art several valuable books on art from his library. Mr. Friedlander has been a member of the museum for many years past and is one of its most ardent supporters.

Cyrus Price, of Cyrus Price & Co., 170 Broadway, sailed, Aug. 25, on the *Kaiser Wilhelm II.* for Europe, where he will visit the diamond markets of Antwerp, Amsterdam, London and Paris. While abroad he will make his headquarters at his firm's Antwerp office, 249 Longue rue D'Argile.

It was decided Wednesday by the Board of United States General Appraisers that electric scarf pins are to be held dutiable under the tariff as "jewelry." Holcombe & Co., of New York, the importers, insisted that the articles should be returned for duty as manufactures of metal with a duty of 15 per cent. The Board, however, found that the merchandise must be regarded for tariff purposes as "jewelry," with a tax of 60 per cent. ad valorem.

A number of excited citizens, police reserves and curious pedestrians and street car employes surrounded the jewelry store of James Mulhan, at 668 Flatbush Ave., Brooklyn, Wednesday last when a burglar alarm rang out a warning. Investigation showed that in addition to the protection of the burglar alarm, the owner of the store hires a night watchman to sit in the store and keep prowlers away. He went to sleep Wednesday night and accidentally set the alarm off.

The police of the upper west side made strenuous endeavors last week to obtain a clue to the identity of the burglars who earlier in the week entered the home of Marcus Weil, a jeweler of E. Houston St., who lives at 203 E. 72d St. Mr. Weils, whose family is away, was alone in the house, and early in the morning of Aug. 18, was aroused by a noise. He investigated and discovered that the thieves had gone through the house and had stolen jewelry valued at \$5,000. They had evidently left by a sky-light in the roof, which was probably the way they gained an entrance.

In looking over the plunder found in the trunks in the rooms of James H. McGill, who was arrested on suspicion of receiving stolen property last week, a reporter for a local paper found a watch with the initials J. B., which in every way tallied with the watch carried by James Bullen, an employe of Tiffany & Co., when the latter disappeared from his home 305 W. 42d St., Manhattan, April 11 last. The police were informed and have been endeavoring to get information from the man who sold a quantity of jewelry to McGill, and who is now in jail, that would lead to a clue of the disappearance of Bullen.

From a man, describing himself as John Thompson, a passenger on the steamer *Deutschland*, which arrived in Hoboken Thursday, Customs Inspector Timothy Donohue took a quantity of diamonds and jewelry valued at about \$1,500, which was sent to the Public Stores. While watching

## THE STATE BANK

376-378 GRAND STREET, NEW YORK

Capital and Earned Surplus, over \$1,500,000. Deposits over Fifteen Millions.

Offers a favorable market for short and long time jewelry and diamond paper.

## New York Notes.

(Continued from page 73.)

A man on the Hamburg-American pier inspector Donohue thought that he looked unnecessarily fat and decided to search him. The search brought to light the diamonds and jewelry and a fine gold watch, together with a bill showing that the articles had been purchased in Paris. The articles were taken to the Appraisers' Stores for valuation. Mr. Thompson was allowed by the Customs officers to depart.

A number of jewelers and diamond merchants were present in the office of United States Marshal William Henkel, in the Post Office building, Friday last, when a sale of cut diamonds, found in the possession

of Edward Stocker, a passenger on the steamship *Zeeland*, who had attempted to smuggle them into this country, was announced. The foreign value of the goods was placed at \$495 and the duty at \$49.50. The highest bid was \$544.50. The first bid was \$200, and the price advanced by offers of \$25 until it reached \$300. Then the bids were on \$100 advances until \$350 was reached, and then by \$5 bids until the diamonds were knocked down to George H. Squire, Maiden Lane. There were congratulations all around, as the Government got nearly eight times the amount of duty, while Mr. Squire claimed that the diamonds were worth the full appraised value, and he therefore had a bargain.

The Newman Clock Co., Friday, commenced an action in the United States Circuit Court, at New York, by depositing its complaint against the General Watchmen's Time Detector Co., to which a subpoena was issued ordering that the complaint be answered. The action, which was brought by Attorneys Kerr, Page, Cooper & Haywood, is a suit for an infringement of patent. The complaint alleges that the defendants have made and sold devices and apparatus similar to an improvement on watchmen's clocks which Abraham Newman invented Dec. 9, 1899, and for which patent 76,764 was issued to him June 18, 1901. This patent he later assigned to the Newman Clock Co. The complaint, after alleging the infringement, asks that the defendant may be decreed to account for all the profits and income which it has received from the sale or use of the alleged infringing device, and that it be perpetually restrained and enjoined, as well as its agents, workmen, etc., from making, using or selling further infringements. The usual damages and accounting are asked for and a preliminary injunction pending the trial of the suit is also demanded.

One of the interesting exhibits at the recent convention of the American National Retail Jewelers' Association, at Cincinnati, O., was the Icy-Hot Bottle. This is a metal bottle, nickel plated and surmounted with a nickel plated drinking cup, which screws on and holds the cork in place, and any liquid placed in this bottle will remain cold or hot, as the case may be, for from 24 to 100 hours. It is manufactured by the Icy-Hot Bottle Co., 216 Longworth St., Cincinnati, O.

## Newark.

John A. Pryor, of the Pryor Mfg. Co., will be in Chicago all this week, calling on the jewelry trade.

B. M. Shanley, Jr., is at Glen Springs, Watkins, N. Y., for a month's vacation. Mr. Bliss, of the B. M. Shanley, Jr., Co., is traveling through the northwest this week.

The five salesmen of the La Pierre Mfg. Co., silversmiths, in the Richardson building, went on the road last week, and report thus far finding business in an encouraging condition.

Reports from the salesmen of several of the houses now on the road indicate improvement, especially in the middle west and south. Panic days such as have just passed seem over at last. Stone goods are reported in more demand than ever.

George R. Howe, of Carter, Howe & Co., has been absent from the office of late, enjoying a well-earned rest. On his return he will take up with fresh enthusiasm his work not only in the factory, but also as chairman of the State Commission on Industrial Education.

John F. Schrink & Son, 67 Hamilton St., are contemplating a removal from their present quarters into a new factory to be built by the firm for its own use. The lease on the present quarters will run another year, but its size is not adequate to the growing business.

William G. Hacker, a resident of this city, but a valued and long-time employe of Tiffany & Co., has the sympathy of his associates in the trade in the dual bereavement he suffered last week. His son, Edward H., a young traveling salesman, and the latter's wife committed suicide together.

Burglars broke open the safes of the Newark Engraving Co., at 870 Broad St., on the night of Aug. 17, and secured a quantity of engraved jewelry and \$50 cash. The loss, which was mainly personal, amounted to about \$450. Six other safes in the same building were looted on the same night, with inconsiderable loss.

The Newark police have been able to recover, by subjecting a prisoner to the third degree for five hours, a large quantity of jewelry, including costly watches and scarf pins, stolen a few days ago from the dressing room occupied by the Eastern League baseball players. George Davis and Joseph H. Magill are in custody.

George E. Kenyon, an optician, residing at 71 Astor St., died suddenly Tuesday evening, Aug. 18, at the residence of his nephew, C. Frank Cowley, 221 Glen Ridge Ave., Montclair. Death was due to heart disease. Mr. Kenyon had been a sufferer for years from hemorrhage of the lungs, and while his death was looked for at any time, his end caused a great shock to his family.

Investigation Friday of the death of Mrs. Mary E. Schiller, wife of Walter O. Schiller, a jeweler, at her home, 83 S. 16th St., East Orange, satisfied the police that she had committed suicide. Mrs. Schiller's body was found still warm by her husband when he returned from work Thursday night. She had evidently taken gas from a tube and had fallen to the floor in the kitchen when the fumes overcame her.

Owen, Steeber & Co., makers of bracelets and brooches, have resumed full time owing to the improvement in the market as found by their salesmen. John J. Kraus, who covers the district including New York State and west to Ohio; Harry G. Young, who looks after the big eastern cities, and A. M. Arnkens, of the middle western district, left, a few days ago, to meet their customers. As soon as business warrants an additional salesman will be employed for the extreme southern circuit.

A. M. Friedland, a retail jeweler at 148 1st St., Elizabeth, was appealed to one day last week to appraise a handsome set of diamond earrings purchased by a school teacher of that city. In the judgment of Mr. Friedland they were worth between 10 cents and a quarter. His patron nearly collapsed, and it developed that he had been cleverly duped in a park nearby, and had given in exchange a gold watch, chain and ring aggregating in value between \$80 and \$90. No clue to the confidence man involved has been found by the police.

The Lee-Dodd Co. has been incorporated, and has taken quarters at 67 Hamilton St., where already the nucleus of the plant has been set up and a number of skilled men put at work. High-grade goods of the sort to be worn as personal adornment by women will be the first line put out, and William A. Lee, of the company, will soon take the sample case on the road. His associates are Harry K. Dodd and David E. Ellenberger. All three of them were in the past associated with the David C. Dodd Co., Harry K. Dodd being grandson of the founder of that house. Mr. Ellenberger was in Mr. Dodd's employ for several decades, and Mr. Lee was also with the Dodd concern for a long time. Mr. Ellenberger will be factory superintendent. The incorporation papers on file at the office of the county clerk show that the concern has an authorized capital of \$10,000, of which \$3,000 has been paid in.

## Savannah, Ga.

R. Van Keuren has announced the dissolution and liquidation of the firm of R. Van Keuren & Co. caused by the death of James H. Hunter. R. Van Keuren has assumed all liabilities and acquired all assets of the late firm, and will continue the business under the name of R. Van Keuren & Co. R. Van Keuren has gone to New York on a business and vacation trip.

Theus & Co. have on exhibition the prize of \$1,500 won by Georgia Co. No. 1, Knights of Pythias, of Savannah, at Boston, Mass., Aug. 5. The prize consists of two framed United States gold certificates of the denomination of \$1,000 and \$500. There is also exhibited a handsome Pythian sword and scabbard presented to Capt. R. J. Davant, of Georgia Co. No. 1, by St. Joseph cavalry troop, Knights of Pythias, of St. Joseph, Mo., a handsome cut glass punch bowl presented to Capt. Davant by his own company and a large collection of badges and souvenirs of the Pythian convention and encampment.

Burglars broke into the store of W. L. D. Hagan, Newton, Kans., a short time ago, and stole rings, lockets and other jewelry valued at about \$20. There is no clue.

VOL. LVII.

CHICAGO, WEDNESDAY, AUGUST 26, 1908.

No. 4.

### Chicago Notes.

S. C. Eppenstein and wife are at Atlantic City.

S. Buchsbaum is on a vacation in Wisconsin.

H. P. Cutter is again in the jewelry business at room 1103, Heyworth building.

William G. Swarthchild and wife have returned from a vacation at Lake Harbor, Mich.

Jules Franklin, New York, was here, last week, and left for the Pacific Coast last Friday.

O. L. Tribble has been engaged by L. H. Schafer & Co. to represent them in Texas, Oklahoma and Arkansas.

Harry Adler, of Chas. Adler's Sons, and Fred Mayer, of the Bruhl Bros. & Henius Co., were here last week.

R. T. Kleckner, of the Chicago office of the Theo. W. Foster & Bro. Co., is making a trip to the Pacific Coast.

G. S. Titus, western representative for the Middletown Silver Co., leaves this week for a three weeks' trip east.

Will H. Cleaver is entering the retail jewelry business in Dubuque, Ia. Mr. Cleaver bought his opening stock here last week.

C. E. Range, Trenton, Mo., and Albert O. Kettelkamp, Nokomis, Ill., were among the prominent buyers who visited the trade last week.

Robert J. Simmons, formerly with Depres, Bridges & Noel, has been engaged by Emil Brander & Bro. to represent them among their city trade.

C. H. Coles, Sandwich, Ill., is closing out his store at that place, intending to remove to some point in Florida, where he proposes to open a jewelry store soon.

Geo. Mellor, formerly a prominent jeweler at Malvern, Ia., was a recent visitor in Chicago, stopping over on his way to his Summer home in Wisconsin.

W. A. Kinna, New York agent of the Elgin National Watch Co., was here last week on his way to New York, after spending a vacation at his native town of Sharon, Wis.

Mrs. H. Graffe, wife of Henry Graffe, of Graffe & Stanek, recently landed a 12-lb. pike at Powers Lake, Wis. Mr. Graffe is having this fine specimen mounted for exhibition at his office.

Recent removals in Chicago include those of Max Goldberg, from 4606 S. Ashland Ave. to 4616 of the same avenue; John A. Rinkus, from 4640 to 4630 S. Ashland Ave.,

and A. Leibson, from 1411 W. 35th St. to 4530 S. Ashland Ave.

The administrator for the estate of Emil Kvasnicka will sell the entire contents of the store at 603 Blue Island Ave., on Aug. 26 to the highest bidder, in order to settle up the estate.

The McIntyre Watch Co., Kankakee, Ill., has been incorporated to manufacture timepieces, with a capital of \$200,000. The incorporators are: Fred McIntyre, H. S. Dixon, William Fraser.

Noah Clark, brother of James W. Clark, president of Moore & Evans, and himself an officer of that corporation, died recently at Haddam, Conn., at the age of 47. Mr. Clark was engaged in the real estate business in Brooklyn, his home.

The police of the 50th St. station recovered between \$800 and \$1,000 worth of jewelry which was stolen about two weeks ago from Norman T. Fowler's jewelry store, 30 State St. They are now searching for a man who dropped a bag in which it was found.

Alexander H. Revell was recently the recipient of the golden cross of the Legion of Honor bestowed by the French government because of Mr. Revell's connection with the movement of American school children who presented a statue of Lafayette to France.

C. F. Huntington, for a great many years a salesman for the Ansonia Clock Co., committed suicide by shooting himself in the temple on Aug. 20, at the Riverview Hospital, in Kankakee, Ill. Despondency, due to ill-health, was probably the cause of his act of self-destruction.

C. E. Tillson, Carrington, N. Dak., was here, last week, on his way home. After the Cincinnati convention Mr. Tillson visited his native town of Oneonta, N. Y., spent a day with A. L. Sackett, at Salamanca, N. Y., stopped over two days at the Dueber-Hampden Watch Works, Canton, O., and spent a day at the South Bend watch factory.

Among the out-of-town buyers in Chicago during the past week were the following: Ed. Kwapil, Columbus, Wis.; F. H. Reid, Perry, Ia.; Mrs. Rose, Telluride, Colo.; M. Hainer, McComb, Miss.; Maurice Schlossberg, Missoula, Mont.; Mr. Baldwin, of O. T. Johnson Co., Galesburg, Ill.; Dr. G. W. Wheeler and wife, Fisher, Ill.; Claude M. Wheeler, Columbia, Mo.; J. W. Neasham, Ottumwa, Ia.; Aug. Meyer, Grand Island, Neb.; L. W. Otto, Craw-

fordsville, Ind., and W. F. Kirkpatrick and wife, St. Joseph, Mo.

Edward A. Bender, a well-known gold beater, with a workshop at 184 Dearborn St., was recently found dead there with an ugly wound on the back of his head. At 6 o'clock in the evening the janitor saw Bender at work, and when he next went his rounds he found him dead and notified the police at once. Everything points to robbery as the motive for the deed. Mr. Bender was 43 years old and was well known in the trade. The funeral was held Aug. 21.

Watch circles were disturbed, last week, by a western jobber advertising Rockford watches at prices much below the market figures. This was done without the knowledge or consent of the Rockford Watch Co. The latter corporation through several retailers tried to get some of the watches at the advertised prices, but in each instance the order could not be filled, the wholesale house replying they had none of the watches on hand. The Rockford Watch Co. believes it to be spite work on the part of a wholesale house with which it had a controversy, and that its enemy sought to disturb the market in revenge.

### Minneapolis and St. Paul.

Samuel Cutts, Jr., formerly with the American Jewelry Co., Minneapolis, has taken a position with the jewelry department of the Dayton Dry Goods Co., of the same place.

A fire in the building adjoining that in which the H. E. Murdock Jewelry Co. is located, in Minneapolis, threatened to do some damage to the latter, but was confined to the building in which the fire originated.

Walter G. Hudson, vice-president of the retail firm of J. B. Hudson & Son, Minneapolis, has severed his active connection with the business and has become identified with the Van Dusen-Harrington Co., of Minneapolis, a wholesale grain and elevator firm.

The jewelry jobbers of the Twin Cities assembled at a social dinner Aug. 19, and considered informally the conditions surrounding their business and the northwest generally. These little social gatherings are to be held from time to time, as opportunity may permit and circumstances warrant, and it is hoped that a better feeling may result from them.

## Los Angeles.

Edouard Sutter, Vallejo, Cal., has been spending some time here.

J. H. Birnbaum, of Birnbaum Bros., is spending a two weeks' vacation in Bear Valley.

John Hartzberg, salesman with J. Wiensberger, was confined to his home by illness last week.

Harry B. Oberlin, of Oberlin Bros., Fresno, is here on a visit combining pleasure and business.

Miss Pearl Ruggles, formerly with J. C. Fleming & Co., is now with M. A. Goldman, 217 S. Spring St.

Leonard E. Woolz, of Luckenbach & Co., is taking a week's rest after closing out the Conradi & Co. business.

E. W. Reynolds, of the E. W. Reynolds Co., has returned from his visit to the northern part of the State.

The Illinois Watch & Optical Co., 214 W. 2d St., is having alterations and improvements made in its store.

F. E. Wolfarth, Covina, has been taking an outing with his family at Venice, Cal., having made the trip in his new automobile.

Ed. Burr, formerly with the H. J. Whitley Co., is now with A. E. Morro in his new store at the corner of 4th and Broadway.

Out-of-town jewellers who have been here recently include: H. S. Huff, Orange; A. W. Bates, Corona; and F. B. King, Redlands.

Jacob Marx, of the Kossuth-Marx Jewelry Co., who is now in this city, reports that he finds business improving all along the line.

Edward Josephson, watchmaker with Newton Moore, 354 S. Broadway, is taking a vacation, spending most of his time in Riverside, Cal.

H. E. Rader, Monrovia, whose wife has been ill in a hospital here, was here a few days ago and took Mrs. Rader home with him. Her health is improving.

W. C. Libs, with Hambright & Walsh, is home again after a very pleasant trip to Detroit and his own home at Adrian, Mich. He was gone one month.

Chas. C. Noble, diamond salesman for Montgomery Bros., has returned from a vacation of two months, spent in Minneapolis and among the northern lakes.

It was Robert W. Woodley and not Mr. Buley who left the employ of Brock & Feagans. The recent announcement of Mr. Buley's withdrawal was erroneous.

The Carl Entemann Jewelry Co. has again been compelled to enlarge its office, and is at the same time making general improvements throughout the factory.

B. Sandstrom, watchmaker with Bridgen & Pedersen, is taking a vacation at Catalina Island. F. Daschek, jeweler for the same firm, is again at his place in the store.

C. S. Glass and C. T. Duusmoor, of the H. J. Whitley Co., established a new fishing record at Catalina a few days ago, having pulled in 18 albicore, ranging in weight from 18 to 25 pounds each, in a single day.

All the employes of the E. W. Reynolds Co. have now had their vacations, and are ready to take care of the Fall business. Edward Turner has started on a some-

what extended tour with the company's Fall lines of jewelry. These lines are larger than ever before.

Montgomery Bros. have employed about 20 additional sales people to assist in handling their business in the new store at the corner of 4th and Broadway. These include: Alfred S. Morton, formerly with the Gorham Co., Fifth Ave. and 36th St., New York, who is in the silver department; J. C. Taylor, formerly diamond salesman with S. Nordlinger & Son, who is in the diamond department; John Bohn, formerly with Shreve & Co., San Francisco, who is in the silver department; Harry W. Harrison, formerly with Ryrie Bros., Toronto, Can., who is in the gold department, and Chas. Lipton, formerly with Henry Birks & Sons, Montreal, who is in the watch department.

## Milwaukee.

Sol Martin, Jr., manager of the Peerless Jewelry Co., at 130 Grand Ave., made a recent business trip to Chicago, where he made extensive purchases for the holiday trade.

Rudolph J. C. Bott, 151 Knapp St., will be located in new quarters after Sept. 1, on the ground floor in the Free Press building.

A. Wiggenhorn, of A. Wiggenhorn & Son, Watertown, Wis., was here on a business trip, last week.

Mayor Rose's recent veto of the Fass street clock ordinance has been sustained in the Common Council by a vote of 18 to 15. Alderman Fass announces that he will yet present an ordinance on the subject which the Council will see fit to pass.

Among the out-of-town jewelers who were visitors in Milwaukee, recently, were: Edward Kwapil, Columbus; Otto J. Goeldner, Watertown; John Armbruster, Cedarburg; C. E. Goodnetter, Beaver Dam; F. P. Beswick, Racine; W. T. Stetson, Lake Mills; W. F. Zilmer, Monroe; W. C. Pauers, West Bend; Andrew O'Brien, Oshkosh; E. B. Hobkirk, Brandon, and R. Hille, Menominee Falls.

Wisconsin pearl hunters have been interested in the clam growing experiments of Professors Curtis and Le Fevre, of the University of Missouri, who have been operating at La Crosse in the interests of the United States fisheries. Specimens of practically every known variety of clam have been planted in the river channel, and fish have been inoculated with their spawn. The purpose is to ascertain if artificial propagation of the mussel can be obtained.

During a recent heavy rain and wind storm which passed over Milwaukee one of the large plate glass windows in the jewelry establishment of the Louis Esser Co. was broken. Contrary to the usual order of things, the section fell outward, instead of into the show window, and damage to the valuable displays of stock was averted. The loss will amount to \$100. The Esser establishment is located on the second floor of the Wells building, one of Milwaukee's largest office structures.

The remarkable exhibit of Wisconsin pearls, valued at more than \$200,000, which has been on display in the windows of the Bunde & Upmeyer Co. for some weeks, has been attracting considerable attention. The

display includes mounted and unmounted pearls, ranging in value from \$1 to \$3,000. One of the especial attractions is one pair supposed to be the finest in the United States, listed at \$8,000. In place of the pearl display last week, Bunde & Upmeyer have been showing an interesting collection of 15-jeweled watches sold under a 24-year guarantee.

## Cincinnati.

Jacob Wendel, Piqua, O., was here last week on business.

Mr. Pollak has moved his jewelry repair business from the Arcade to Barr St.

A. F. Chapman, of the Loring Andrew Co., is in the east on a purchasing trip.

Bert Ganz, of the Gustave Fox Co., left last Monday, on an eastern business trip.

George Simper, Vine St., is at home again after a two weeks' visit to Atlantic City.

John Bartels, of the Frank Hershey Co., is spending a few weeks in St. Louis, Mo.

M. Richen, bookkeeper for Joseph Memert, is enjoying a 10 days' fishing trip at Covedale, O.

Mayo Loeb, of Herman & Loeb, is enjoying a two weeks' sojourn with friends in St. Louis, Mo.

Heisterman & Zechman, Germantown, O., have bought another store in Miami, O., and were here, last week, buying the opening stock for their new establishment.

The Cincinnati Watch Case Repair Co. has leased the room adjoining its present quarters, which is now being fitted up with new machinery. With this addition the company will be able to handle its growing business more satisfactorily than heretofore.

Out-of-town buyers here the past week included: Frank Fullilove, Owenton, Ky.; John F. Willis, manager of the E. O. Zed Jewelry Co., Mobile, Ala.; G. F. Irwin, Milton, O.; R. F. Willing, Paris, Ky.; G. Witlinger, Middletown, O.; Mr. Pugh, Russellville, Ky., and W. H. Keller, Carbon, Ind.

While August Newstedt, of Lindenbrau Strauss & Co., and wife were enjoying Summer's outing, last week, thieves got away with all of their silver wedding presents, which consisted mostly of sterling ware. Mrs. Newstedt had, as she thought, placed the goods in safe keeping with her sister in the same building, the "Alexandra" Walnut Hills, but the thieves gained entrance to this flat also and secured the families' silver, which is estimated at \$800.

One of the handsomest and most admired trophy cups ever shown here is one on exhibition made by the Homan Mfg. Co. and is called the "Homan Trophy Cup." This cup is about two feet in height, but on the goblet style, with long, slender stem and is made in perfectly plain satin finish silver. The only decoration is one handsome fleur-de-lis gracefully fastened at the side, with its long, slender stem and leaf entwining the stem of the cup. The word "The Homan Trophy Cup" appear in brilliant cutting. This is one of several cups to be awarded the prize winners of the annual motor boat races of the Ohio River Lumber Club, Aug. 29, 1908.

### St. Louis.

Sam Kober, secretary of the E. Maritz Jewelry Mfg. Co., and his wife have gone east for a week's stay.

Mr. Maritz, president of the above firm, who has been confined to his home for 10 days, on account of a sprained ankle, is again back at his desk.

M. F. Kohler, Parsons, Kans., his wife and son were in St. Louis, last week, en route to St. Paul by boat.

Mr. Heinrichs, of the firm of Heinrichs & Jambers, Jefferson City, Mo., who has been visiting in the east, passed through the city last week on his way home. He called on many of his old friends here.

W. K. Urbani, Vandalia, Ill., was a recent visitor to this city. Other out-of-town jewelers in the city, last week, were: E. K. Green, Greenfield, Ill.; I. Jacobs, Joplin, Mo.; J. E. Siz, Booneville, Mo.; John J. Gaffney, St. Louis, Mo.

Friends of Bernard Kersting, president of the St. Louis Jewelers' Supply Co., are offering their condolences to Mr. Kersting over the death of his mother, last week. Mrs. Kersting died at the home of her son, 609 S. 11th St.

Joseph J. Gutfreund, of the Reeves-Kemper Co., is on a three weeks' vacation, traveling to Niagara Falls and other points in New York. W. F. Kemper, also of the Reeves-Kemper Co., is on a trip through northern Missouri and Illinois.

A. Helmrich, of the jewelry department of the Hess & Culbertson Jewelry Co., had a narrow escape while boating on the Illinois River, near Campsville, last week. He was on the river with William Bammer when the skiff capsized and the two men fought around in the stream for 15 minutes before Bammer got to shore and brought the boat back.

### Kansas City.

Frank White, Guthrie, Okla., is in the east in the interest of his firm.

M. Oppenstein, of Oppenstein Bros., this city, is absent on a vacation trip in Colorado.

Mr. Huff has taken the place of Mr. Hill as watchmaker for I. T. Gabbert, Caldwell, Kans.

L. White, traveling representative for Ward & Crellin, is replenishing his trunks prior to making another trip.

Jake Linn, with Martin, Low & Taussig, as just reached the city from a trip in Texas. He reports that business prospects are good in that territory.

The Hassig & Krieke Jewelry Co. has completed the work of remodeling its shop and office. It now has a commodious and convenient place of business.

Morris & Son, Oklahoma City, Okla., have recently moved into their new establishment, which has been furnished to meet the demands of their growing business.

W. A. Wendover, St. Joseph, who is a student at the Kansas City Polytechnic Institute, has resumed his studies after a vacation which took in the northern lakes.

Otto Knaufl, traveling representative for the Woodstock-Hoefler Watch & Jewelry Co., is in from his regular trip, replenishing his trunks. He will start out again in a few days.

C. L. Donaldson, who has been in the hospital two months, is back at his desk again in the office of the Edwards & Sloane Jewelry Co., looking stronger and better than ever before.

J. M. Scott, cashier for the Woodstock-Hoefler Watch & Jewelry Co., has returned from Oklahoma City, Okla., where he went to look after the company's interests concerning some of their trunks which were destroyed in the Lee Hotel fire.

The following out-of-town jewelers were in this city, last week: T. S. Lidstone, Dearborn, Mo.; W. N. Kirkman, Edgerton, Mo.; H. A. Tibbals, Emporia, Kans.; Carl Ricker, Emporia, Kans.; C. J. Keil, Clinton, Mo.; R. L. Skaggs, Lebanon, Kans.; H. E. Moore, Vandalia, Mo.; Mr. Hardway, of Hardway & Williams, Fort Smith, Ark.; J. S. Birck, Lawrence, Kans.; W. S. Almitt, Richmond, Mo.; H. W. Walter Starcke, Junction City, Kans.; L. Megede, Richmond, Mo.

### Omaha.

Geo. W. Ryan has returned home after a two months' outing.

Sol Bergman has returned from a business trip to the Black Hills, S. Dak.

The store of S. W. Lindsay has been remodeled and equipped with new fixtures and furnishings.

O. C. Homan, of the C. B. Brown Co., is home from a visit with his parents in Des Moines, Ia.

Earl Roscoe, watchmaker for W. C. Flatau, returned from a visit at Fort Dodge, Ia., last week.

D. F. Melcher, with Albert Edholm, has returned from a watch inspection trip over the Union Pacific Railroad.

A. Mandelberg and his son, Sidney, left last week for an indefinite visit at Manitou and Colorado Springs, Colo.

Warren M. De Camp, watchmaker for Henry Copley, has gone to Yellowstone Park for a two weeks' vacation.

H. D. Howard, Fairfield, Nebr., and A. G. Cooper, Schuyler, Nebr., were in town last week replenishing their stocks.

J. Potts, now of Denver, and formerly of this city, has returned to this city and taken a position with the Mawhinney & Ryan Co., as watchmaker.

J. P. Holliday, of the Mawhinney & Ryan Co., left last week for Long Beach, Cal., where he will visit for a few days, bringing his family home with him upon his return.

The C. B. Brown Co. supplied the Omaha Field Club with the sterling silver loving cup which was given away at the Midwest Tennis Tournament held in this city last week. The cup is 15 inches high, with an elaborate pattern of leaves.

Frank A. Persohn, a jeweler at 701 N. Gay St., Baltimore, Md., was the plaintiff about a week ago against Frank Trainor, 18 years of age, who was accused of obtaining money by false pretenses. According to the jeweler, Trainor obtained an open-face gold watch and a fob worth \$18.50, an Ingersoll watch, a nickel watch and \$25 in money from him.

### San Francisco.

#### TRADE CONDITIONS.

The local wholesalers state that there is more business being done with the interior towns of the State at present than there was a year ago at this time. This is due not so much to the fact that the retail business there is better than it was last year, but because stocks have been allowed to run so low that it has become necessary to replenish many lines in order to be able to do business. One very favorable indication of a good Winter trade is the fact that the Southern Pacific Railroad has decided to institute its colonist rate to the Pacific coast again, this year, and expects to bring more people here than ever, through the inducement of low fares. These special rates will go into effect Sept. 1, and as low a fare as \$30 will be named from Missouri River points. This will be welcome news to jewelers as the greatest need of the State is more population and the people brought here from the middle west are a very thrifty class and are usually possessed of some means.

Radke & Co. have completed the alterations in their building at Bush St. and Van Ness Ave., and are occupying the new addition at their disposal as a crystal room.

Alexander, the jeweler, will occupy but a small part of his present store on Van Ness Ave. during the coming holiday season, but will have his principal store at 932 Market St., where he will open in two weeks.

H. C. Van Ness & Co. are sending out very attractively printed cards announcing their removal to the Jewelers' building on Post St., between Kearney St. and Grant Ave. The concern's new quarters have been handsomely furnished.

The Keystone Jewelry Co. is rushing the work on its new store in the Phelan building, on Market St., and expects to be the first firm to open in that location. The fire in the building occupied by the firm on Van Ness Ave. has increased its desire to seek quarters.

Coney Island Park, an amusement resort on Fillmore St., between Turk and Eddy Sts., was wiped out by fire, Aug. 13, and the adjoining buildings were damaged. The store of the San Francisco Jewelry Co. was slightly damaged, and there was a loss caused by water and smoke, but the place has already been renovated and is doing business as usual.

The silver service of the armored cruiser *California* is now complete, and Shreve & Co. have turned over to the vessel the pair of candelabra and a silver loving cup which were not completed at the time the service was presented to the ship by the Governor. The loving cup will be placed in a suitable glass case, and will be on display in the quarters of the crew. After each year's target practice the names of the best gunners and their scores will be inscribed upon it.

Shreve & Co. have devoted almost all their display window on the Van Ness Ave. side of their store to the display of trophies, and of these there are at least 150. The Delmonte Dog Show will be held Aug. 26-28, and some of the most valuable prizes will be distributed then. The Del Monte Golf Tournament will be held Aug. 31-Sept. 5, and the Bay Counties Tennis Championship games will be played Sept. 7-19. Shreve & Co. will supply the trophies for these events. The work on the interior of the new store at Post St. and Grant Ave. is now practically completed, but it is not likely that the store will be occupied until Spring.

### Detroit.

W. F. King, Jr., was in town, last week, from Adrian.

Mr. Ostby, Jr., of Ostby & Barton, visited this city, last week.

W. J. Bottomley, Brown City, has been visiting at Armada.

J. T. Eddington, Pontiac, has been spending a vacation at Mackinac.

L. E. Palmer, Rochester, has been attending the home-coming festivities at his old home in Hudson.

Mr and Mrs. Jas. A. Stewart, Gladstone, stopped over in Detroit on their way to New York, recently.

Wm. M. Morton, with Noack & Gorenflo, has returned from a long and unusual canoe trip. With a companion he crossed Lake Erie in five and a half days, and then paddled down the Erie Canal and the Hudson to New York. The return trip was made by rail. They had many interesting experiences en route, including the rescue of two other canoeists in Lake Erie, near Long Point.

A meeting of the Detroit Jewelers' Board of Trade was held Friday evening. The recent buyers' excursion was discussed and it was decided to participate in the event again next year. There was some discussion among the wholesalers of the board in regard to the wholesalers' convention to be held in Chicago next month. All the Detroit firms which belong to the Wholesale Jewelers' Association will be represented at that gathering.

### Pacific Coast Notes.

A system of electric clocks will soon be established in the public schools of San Jose, Cal.

Bert Ranch has severed his connection with the store of Mrs. J. H. Hoever, Willow, Cal., and will retire from the business. His place has been filled by R. Van Dack.

Everett Bennett, who recently opened a store in Gilroy, Cal., was found about 1 o'clock one morning last week, in San Jose, bound to a post and gagged. He states that about half an hour previous to this he had been approached by two men, who threw a sack over his head and robbed him of \$175.

Jos. Jessop & Sons, San Diego, Cal., have just finished a handsome challenge cup that will be contested for by various teams of the Modern Woodmen of the World in a big meeting to take place at Coronado, early in September. The cup stands about 14 inches high, and is mounted on a natural stump of orange wood. It is of sterling silver with an inside gold finish, the emblems of the order being embossed in gold on one side.

### Pacific Northwest.

A Gardner, Salem, Ore., is in Portland, accompanied by his wife. He will visit Puget Sound points before returning home.

Talott Bros., Olympia, Wash., have received more sections of safe deposit boxes to place in their fireproof vaults, and these are being placed at the disposal of their customers.

If present plans are realized the county

building at Bellingham, Wash., will be fitted with a clock tower and a large time-piece installed. No particular make of clock has been decided upon as yet, but bids will be invited within a short time.

### Pittsburg.

Dawson B. Adams has been spending his vacation at Cambridge Springs.

George W. Biggs is enjoying a short vacation, taking trips by trolley about Pittsburg.

Kingsbacher Bros., 505 Market St., have erected several large bill boards about the city for advertising purposes.

Employees of W. W. Wattles & Sons recently challenged the E. P. Roberts & Sons' employes to play a match game of baseball.

Henry A. Barrett is spending the Summer at Lakewood, and writes that his health is improving. He has been ill for several years.

Abe Lewis, who has been at Cambridge Springs, going from there to Buffalo and then to New York, on a business trip, is now home.

William G. Ingham, buyer for the Geo. B. Barrett Co., who has been at Atlantic City and other cities of the east, is home from his vacation.

Edward Shaffnit, of Goddard, Hill & Co., is listening to the wild sea waves. John Allison, formerly of the same house, is now with the Geo. B. Barrett Co.

The creditors of J. F. Murphy, Dawson, Pa., held a meeting several days ago and elected George P. Christy, of West, White & Christy, receiver. An effort is now being made to straighten out Mr. Murphy's affair. It is not known how much his estate will pay the creditors, but a good sum is expected to be realized.

The Jewelers' Duckpin Bowling League is to be revived, and next season's club will contain about a dozen teams. Some of the wholesale houses will enter the league.

Graf & Niemann have erected a large sign in front of their place of business in Wood St. The firm occupies the second story and the sign has been placed underneath the front windows.

The show window of the store of J. S. Leedham, Elwood, Pa., was broken one night recently, but nothing was carried away. Several other windows were broken the same night, and some assert that the windows were smashed by friends of two suspended policemen, with a view of having the officers reinstated.

It begins to look as if rents are going to come down in Pittsburg. Some of the real estate agents have been notified to reduce rents in order to find tenants for empty store rooms. There are quite a number of them in the downtown portion of Pittsburg. Quite a number of failures recently are directly attributed to high rents and the dull times.

While Benjamin Yake, Bridgeville, Del., was absent from his store, about a week ago, thieves entered the establishment by opening a rear window and stole miscellaneous jewelry worth \$300. The only clue is a handkerchief which was dropped by one of the thieves in his hurry to get away.

### Indianapolis.

F. L. Bryant has returned from a trip Pittsburg.

O. A. Wise, Mitchell, is spending several weeks in West Virginia, revisiting scene of his boyhood days.

After two weeks at French Lick and other southern Indiana points, John Williams, watchmaker for J. H. Reed, has resumed his business duties.

I. Grohs, of the I. Grohs' Jewelry Co. who has been in St. Louis on business several weeks, will return early next month and will later make a trip east.

A meeting of the Indianapolis Retail Jewelers' Association will be held at the Commercial Club, Monday evening, Sept. There is no special program, but some of the questions discussed at the national association will be taken up.

Krauss & Sectors, in business at 305 1/2 Washington St. for several years, is remodeling his store room, and when alterations are completed it will have a very attractive appearance. New display windows are being put in and new fixtures added.

The Ontario Silver Plate Co. is building a substantial addition to its plant at Mercier. A two-story brick building which is being erected will be used for a larger plating department. The company expects to increase its operating force when the building is completed.

Alterations, increasing the size of the quarters of the Baldwin-Miller Co. in the State Life building, have been completed and the company now has all of its stock in one salesroom. New fixtures have been installed, the office being located in the center of the big room.

A new variety of tomato that is attracting much attention, has been brought out this Summer by Julius C. Walk, of Julius C. Walk & Son, who, in addition to being a jeweler, is an enthusiastic amateur gardener. It resembles a large Alberta peach, is of dull red color and has a slight fuzz.

While boating on White River, a few days ago, near Broad Ripple, Horace Comstock, jeweler, had an opportunity to prove himself a hero. A woman fell out of a canoe and Comstock, with a friend, went to her assistance, dragging her out of the water by the hair. The young woman soon recovered.

J. T. Scovell, U. O. Cox and Walt Woodrow, well-known educators, have started on a six weeks' mussel investigation trip on the Wabash River. The investigation is to be under the investigation of the United States Fish Commission. Pearl button manufacturers and manufacturing jewelers having asked that the Government take some action to renew the supply.

Articles of jewelry and silverware to be given as awards at the International Interdenominational County Fair, held for the benefit of the Summer Mission for Sick Children, last week, were given by George S. Kern, Julius C. Walk & Son, Krauss & Sectors, Joseph T. Head, Francke Hardware Co., Gray, Gribben & Gray, H. I. Burghheim and J. H. Reed. They were awarded in the baby show.

H. H. Harris has purchased the stock of A. L. Madison, Orient, Ia.

37 MAIDEN LANE, NEW YORK CITY

## Philadelphia.

Joseph Wacks, with J. F. Neill, 727 Sanson St., is spending a vacation at Atlantic City.

A. F. J. Dorn, 834 Market St., Camden, ned his wife and family last week at a union of the Dorn family in Baltimore.

T. Burroughs Robertson, of the material department of M. Sickles & Sons, spent a few days last week with his family at his native place in Wayne, Pa.

William Lewis, watchmaker and jeweler, Bryn Mawr, Pa., who is a daily visitor to this city's trade, has departed for a vacation trip to Lake Placid in the Adirondacks.

F. B. Wallen, 405 Broadway, Camden, N. J., has returned from New York State and joined his family at Wildwood, where they will remain for the balance of the Summer. Financial circles it was announced last week that there had been listed on the Philadelphia Stock Exchange \$330,100 additional stock of the Keystone Watch Case Co. of the par value of \$100.

R. M. Cooper & Son, wholesale jewelers, will move about the first of the month from 22 Sansom St. to 721 Sansom St. Alterations are being made at the latter premises to fit the building for the occupancy of its new tenants.

The Bailey, Banks & Biddle Co. is displaying prizes made for the Atlantic City Yacht Club's annual races, to be held in September. The prizes are silver cups, artistically shaped and made emblematic of nautical events.

The *Commercial Journal* in a recent issue carried the head of "Conspicuous Enterprise" published a sketch of the career of Mrs. H. Dean, 715 Sansom St., telling of the handsome retail store he will open at 117 S. 8th St.

Announcement is made of the forthcoming marriage of Miss Adeline Hurlburt, daughter of Frederick B. Hurlburt, of H. O. Hurlburt & Sons, to George Huber White, of the home of her brother, West Horton St., Germantown, Sept. 9.

Fred. H. Voigt, watchmaker for the 7th and Sansom Sts., has returned to his bench after being confined to his home for months by an injury sustained during a violent wind and electrical storm, when a hanging sign was blown down upon him.

M. Moskovitz, a retail jeweler, 34th and Market Sts., last week was the victim of thieves, who entered his store and made away with a tray of watches before they could be caught. The detective department is sent out "flyers" for the recovery of the watches in the event of their being pawned.

John and James Blisard, of the firm of John F. Blisard & Co., material dealers, 727 Sansom St., are receiving the condolences of the trade upon the death, Wednesday of last week, of their father, Francis J. Blisard. The establishment was closed until after the funeral services, which were held Saturday.

Among the retail visitors to local wholesalers from out-of-town points, last week, were: E. Allez, Millville, N. J.; Ivan Jen-son, Riverside, N. J.; Henry Bolte, Jr., Atlantic City, N. J.; E. K. Bean, Lansdale, Pa.; George Ware, Atlantic City, N. J.; A. I. Kendall, Millville, N. J.; H. A. McFar-son, Downingtown, Pa.

William H. Doebele, manufacturing jeweler and diamond dealer, is expected to complete the moving of his establishment from 722 Sansom St. to 809 Sansom St. by the first of the month. Some of the machinery and appliances are already being moved, but the entire work, it is expected, cannot be completed until next month.

The sympathy of his friends in the trade has been extended to Joseph Koons, manufacturing jeweler, 13th St., above Market St., on account of the death, last week, of his last surviving brother, Frank P. Koons. Of seven brothers and sisters Joseph Koons is now left alone. All of the family were widely known socially and politically.

As forecasted in THE CIRCULAR-WEEKLY of last week Max Henschel, a retail jeweler, 2317 Germantown Ave., was adjudged an involuntary bankrupt in the United States District Court, last week. The petitioning creditors and the amounts claimed are: H. O. Hurlburt & Sons, \$230.25; Joseph B. Bechtel & Co., \$81.32; Louis P. White, \$756.09.

The William C. Penfold Co., of this city, recently brought suit at St. Joseph, Mo., against Sam Rose and W. D. Rusk, seeking to secure 37 watches, valued at \$250, which are in Rose's bankrupt stock. It is alleged that they were not seized under any action against the Philadelphia company, which asks for damages in the amount of \$50, and the property, or judgment for \$250 and \$50 damages.

Charged with robbing the jewelry store in West Chester, near here, of a quantity of watches, bracelets and other jewelry, William O'Brien was arrested, last week, and held for trial at the next term of the Delaware County Criminal Court. O'Brien is alleged to have confessed and revealed the hiding place of much of his loot with the result that the greater part of it has been recovered.

Pleased at the manner in which his acting secretary, William F. Gleason, had welcomed the American Association of Opticians and the Pennsylvania Retail Jewelers' Association to the city recently, Mayor Reyburn, on Saturday, formally appointed Mr. Gleason to the secretaryship. It will be remembered that the young secretary to the Mayor was given a cordial hearing by opticians and jewelers.

Alfred Broa, once a well-to-do real estate broker on Walnut St., was rearrested last week just after being discharged from the House of Correction, to which institution he had been committed for a six months' term charged with passing bogus checks. Broa was sent to prison in the first place for passing a bogus check on a manufacturing jeweler of Sansom St., near 8th St., who for sentimental reasons desires that his name should not be used. In former days he and Broa were friendly before the latter is alleged to have "gone wrong."

Herman T. Brown, a colored elevator operator in the building of the Bailey, Banks & Biddle Co., 1218 Chestnut St., was killed, last week, while trying to recover a few pennies which he dropped accidentally to the bottom of the elevator shaft. Brown asked a messenger boy to regulate the elevator while he climbed into the shaft and secured the coveted pennies. The weights of the elevator which descend, as it as-

cends, crushed out his life. Fortunately none of the customers in the store were aware of the tragedy and no excitement was created.

Plans are under way to make special inducements to retail jewelers throughout Pennsylvania and southwest New Jersey and Delaware and Maryland to visit this city during the Founders' Week celebration, Oct. 4 to 10. The Merchants and Travelers' Association, of this city, is sending letters to between 10,000 and 12,000 well-rated merchants within a radius of 250 miles of the city, calling attention to the celebration and the exceptional opportunities offered for making themselves acquainted with Philadelphia jobbers and manufacturers. The local jewelers are taking an active interest in promoting the celebration in every possible way.

All arrangements are completed for the annual clambake of the Philadelphia Jewelers' Club to be given Tuesday, Sept. 15, at Burlington Park in the upper Delaware River. Louis P. White and Joseph E. Cadwallader, of the Board of Governors, have worked and propose to continue to work unceasingly to make the next clambake the most successful in the history of the club. A famous chef is to be brought here from the east especially to prepare toothsome dishes for the jewelers. There will be music and a specially chartered boat to take the guests up the river and bring them back again. After the afternoon festivities and the dinner is over the guests will return to the club headquarters at 1228 Chestnut St., when further entertainment will be provided to round out the day and night in a most enjoyable manner.

## Canada Notes.

Lydia Girard has registered as H. Guertin, jeweler, Sherbrooke, P. Q.

The Empire Jewelry Co. has issued a writ for \$257 against Letros Bros., Toronto.

John P. Vick, Owen Sound, Ont., has given a renewal chattel mortgage for \$306 to R. Wightman.

Out-of-town jewelers visiting Toronto, Ont., last week, included: A. J. Gabel, Berlin; E. H. Newman, Brantford; E. W. Ross, North Bay, and Wm. McCarty, Lindsay, all Ontario.

C. Ray Randall & Co. have opened a Canadian office at 28 St. Josephs St., Toronto, Ont., in charge of Arthur E. Kentleton. Mr. Kentleton has been identified with the wholesale jewelry trade in the Dominion for over 20 years. He will call upon the retail trade.

James Walker, William Snow and Reuben Costello, three young men, who were arrested at Niagara Falls, on a charge of breaking into the store of Cline Bros., 125½ Queen St., Toronto, and stealing a quantity of jewelry, were convicted of the crime on Monday, of last week, and sentenced to 23 months' imprisonment each. They had all previous convictions recorded against them at other places.

Thieves recently broke a large show window in the store of Wm. M. James, Breckenridge, Minn., and stole a gold watch and chain. A reward of \$1,000 has been offered for the arrest of the guilty parties.

## "HULL" is the "Sterling" Mark for Umbrellas

### Will It Not Pay You To Handle An Umbrella With These Qualifications?

**First**—It is the foremost and only practical detachable and interchangeable umbrella on the market.

**Second**—The interchangeable feature enables you to suit the customer with any sort of base that may be desired, thus avoiding the likelihood of having him select an umbrella handle which pleases him and then complain about the price or quality of base.

**Third**—"Hull" handles can be shown in an exceedingly small space, and the bases laid away in a drawer, to be fitted to the handles when the customer calls.

**Fourth**—The detachable handle permits you to lay in a superb order of umbrellas at a modest outlay without buying an equally large quantity of bases to be carried from one season to another.

**Fifth**—It is stronger than any other umbrella, either regular or detachable.

**Sixth**—It is the outcome of our best thought, the best workmanship, and the best material that money can buy.

These six qualifications should convince you that the "HULL" umbrella will not only sell readily and yield a good profit, but that you will never have to apologize for one sold over your counters.

Write to-day for samples and we will send them by prepaid express.

back plate provided with perforations and fixed to the front plate, a base plate between the front plate

and back plate, and ears upon the base plate passing through the perforations.

896,367. COLLAR SUPPORTER. FRANK E. FARNHAM, Providence, R. I. Filed April 6, 1908. Serial No. 425,431.

The combination of two concavo-convex lace pins each having a pin tongue; a bar and two lining

plates integral with said bar and extending angularly therefrom at opposite ends, each of which plates is adapted to be seated in the concavity of one of said lace pins; and means for fastening said lining plates within said lace pins, respectively.

896,373. COMB. ISAIÉ FRECHETTE, Montreal, Quebec, Canada, assignor of one-fourth to Joseph Antoine Morin, Montreal, Can. Filed Aug. 19, 1907. Serial No. 389,123.

In combination with a comb having a flange provided with an elongated slot, a hair retaining member adapted to be removably wedged between the comb body and its flange, a loop fixed to said

hair retaining member adapted to travel freely in said slot and to constitute a movable pivotal connection between said flange and said hair retaining member, and means for retaining said hair retaining member beneath said flange, said means comprising co-operating lugs and recesses on the retaining member and the flange of the comb, respectively.

896,392. BELT CLASP OR BUCKLE. GEORGE J. KELLEY, Attleboro, Mass. Filed Feb. 11, 1908. Serial No. 415,275.

In a device of the character set forth, the combination with a frame, of a transverse bar upon the frame, a plate pivotally mounted in the frame

adjacent the bar, downwardly directed teeth upon the plate, and a hook upon the plate extended in a plane parallel with the toothed portion, said hook and teeth both being on the same side of the pivot.

896,408. KEY FOR WATCHMEN'S TIME-DETECTORS. PAUL MOOSMANN, New York. Filed Dec. 6, 1904. Serial No. 235,769. Renewed Jan. 11, 1908. Serial No. 410,444.

The combination, with a portable time detector

clock, of means for actuating the same, and means for automatically indicating on said means each such actuation.

896,441. CHATELAINE-BROOCH WATCH. CHARLES L. DEPOLLIÉ, New York, assignor to the Dubois Watch Case Co., Brooklyn, N.

he combination, with the pendant of a watch, a cross-bar swivelled to the base of the pendant,

cross-bar being provided at the ends with up-and-perforated ears, and a chatelaine hook hinged to said ears and provided with means of attachment to a garment.

6,576. PEN. GEORGE RENAZ, Wells, Minn. Filed June 18, 1907. Serial No. 379,571.

A fountain pen comprising a hard rubber barrel, a flexible ink bag inclosed within barrel, a presser bar engaging said ink bag, an outwardly extending push pin on said presser bar, a tubular sleeve axially slidable on the barrel and

ing a key-hole slot the narrowed portion of which is adapted to engage the push pin and prevent actuation thereof, the said barrel being provided with a groove extending in a line with the slit in the sleeve, and a metallic stud formed integral with the metallic sleeve and extending to the groove.

6,627. COMBINED NAPKIN RING AND HOLDER CORNELIUS J. DALY, Philadelphia, Pa. Filed March 2, 1908. Serial No. 418,747.

A combined napkin ring and holder comprising a strip of resilient material having a slot extend-

longitudinally thereof to form napkin holding means, said strip being constructed to normally form a spiral and adapted to be opened out to form a collar.

6,633. WATCH CASE. WALTER H. FITZGERALD, New York, N. Y., assignor of one-fourth to Benjamin A. Bloch, Brooklyn, N. Y., and one-fourth to Emanuel M. Bloch, Sag Harbor, N. Y. Filed Nov. 23, 1907. Serial No. 403,334.

A magic watch case, comprising an outer case, and an inner case mounted therein by a universal

joint, whereby the inner case may be swung upward out of the outer case upon such universal joint and be rotated thereon while the inner case thus raised above the outer case, substantially described.

6,659. CUFF AND WRISTBAND FASTENER. ROLAND ONNEFROY, JR., San Francisco, Cal. Filed April 27, 1905. Serial No. 257,753.

A cuff fastener comprising a plurality of members each having a head and a circular base united together and spaced apart by a stem which passes transversely through the base and is formed into an eye located under the lower surface thereof.

said stem being spread laterally at a point between the head and the base and a longitudinally exten-

sible flexible element connecting said eyes together.

BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS, 1907, FROM THE Illustrated Official Journal.)

ISSUE OF AUG. 5, 1908.

8,687. POTTERY. A. LOVATT, J. LOVATT and A. E. LOVATT, Derbyshire. April 15.

The design is printed by transfers or the like upon unfired, biscuit or fully vitrified ware with a medium containing both the coloring-matter and the glaze, so that a fully glazed design is produced with one firing. The design may be printed on unglazed ware, or the ware may be first dipped in "smear" or half-glaze, or in full-glaze, to form a ground, the ware being then dried and the design printed upon it. The "smear" or half-glaze employed is preferably composed of two parts by weight of clay and three parts of glaze. In preparing the printing medium, a metallic oxide, preferably in the form of powder, is mixed with a glaze, which is also preferably in the form of powder, and liquid gum or other viscous substance is added and the whole worked into a paste or viscous fluid. Examples of suitable proportions are (1) one part of oxide of cobalt to 32 parts of glaze, or (2) two parts of green oxide of chromium to 40 parts of glaze.

8,813. SLEEVE LINKS AND STUDS. R. W. C. PALMER, Blackfriars, London. April 16.

In a ball-and-socket attachment for the heads of sleeve links, collar studs and the like, the dis-

tinutive feature is that the head part may lie in the same plane as the stem portion whilst at the same time angular movement of these parts is possible. The head a of the link or of the stud has

radial recesses b, d respectively on the underside, which recesses extend to the periphery. At its center is a socket in which engages a knob c on the coupling part of the link, or a knob e on the stem of the stud.

8,826. PENS. C. A. FABER, Toledo, O., U. S. April 16.

A fountain pen having an elastic ink reservoir 8 is provided with a compression lever 9, pivoted to the holder 1 at the ends of 11. Integral with the

lever is an operating bar 12 which is rotated by a swivel cap 3. To compress the reservoir more completely, a curved plate may be attached to the lever 9.

8,971. SAFETY-PINS. T. MORTON, Birmingham. April 18.

Trumpet-shaped brooches or pins are made without soldering. A blank A, shown in Fig. 2, is shaped so as to form the body of the pin, Fig. 3, which has aligned openings D, E at the ends.

Pieces L, N are formed from suitably-cut blanks, to support the pivoted and pointed ends respectively of a pin K, the tubular portions of the said pieces being inserted through the openings D, E. Caps O, M close the ends of the trumpet.

9,088. STUDS AND SOLITAIRES. T. W. JONES and F. R. BAKER, Birmingham. April 19.

A two-part stud has the back part A formed with a slightly swivelling pillar 2 having a beveled head 4. The front part B, formed by the junction of a tubular shank 7 and a cup-shaped shell 8, contains a disk 9 with an eccentric hole 10 and

a spring-pressed hollow locking-piece 15. The head 4 of the pillar 2 enters the hole 10 in the disk 9 when in an inclined position as shown in Fig. 4, whereupon the locking-piece 15 engages with the head 4 holding the pillar in a central position and locking the two parts A, B together as shown in Fig. 3.

# THE HOROLOGICAL REVIEW

## A CATECHISM OF THE LEVER ESCAPEMENT

Being an Informative and Instructive Series of Questions and Answers for Watchmakers and Apprentices.

(Written expressly for THE JEWELERS' CIRCULAR-WEEKLY by T. J. WILKINSON.)

(Continued from issue of Aug. 5.)

**QUESTION:**—Upon making an escapement examination, using Test B methods, suppose we discover that there is over-contact (Fig. 98) of the tooth with the pallet jewel. Explain what such a condition would indicate.

**ANSWER:**—Whenever we commence an

FIG. 98.

examination of the escapement we conform to Rule I, which calls for an inspection of the locking of the teeth on the pallet jewels. Next we follow this inspection by observing Rule II, by closing the bankings in so that we have only drop or first lock present.

FIG. 99.

These points being attended to, the balance could be replaced and then slowly rotated, bringing the roller jewel into the notch of the lever and continuing the rotation until the roller jewel is beyond the tip of the lever horn. Hold the balance in this position and make an observation of the pallet jewel tooth action. This time we find over-contact of the tooth and pallet, as illustrated in Fig. 98. The drawing, Fig. 99,

shows the normal contact. Under Test B conditions the results on this side of the escapement action are incorrect. We next examine in a similar manner the opposite tooth and pallet action. The result is a duplicate, namely, we find over-contact of the tooth with the pallet, as shown in Fig. 98. As the extent of contact in Fig. 99 represents the standard for our test, it is evident we have some defect to deal with, as follows: Either we will find that the action of the roller jewel in the notch of the lever is not deep enough, or, second, that the locking of the escape wheel teeth on the pallet jewels is too great. We will reinspect the lockings of the teeth on the pallet jewels, and to suit the purpose of this example we shall assume that we find

FIG. 100.

the drop lock excessive on each pallet jewel. The remedy is easy, namely, to push the pallet jewels further back into their respective seats. On doing this we retest and assume that we now find a correct amount of drop or first lock on each pallet, as Fig. 99 indicates, when using Test B methods. We have also other means of determining that an error is due to an excessive amount of drop lock, aside from a personal inspection of the lock or the indication given by Test B, as shown in Fig. 98. This means, first, the freedom between the guard pin and the edge of the roller table, which freedom will be found excessive in amount when the drop lock is too great, and, second, by using tests C and D methods, as in the first instance we find too much freedom between guard pin and edge of roller table. We shall find that tests C and D will reveal an overplus of freedom between the roller jewel and corner of the notch; as our personal observation of the locks and tests B, C and D agree that there is an

excessive amount of drop or first lock, we always find in conjunction with any excess of the first lock that the bankings are opened in proportion to the extent of the excessive drop lock. Hence if we reset the pallet jewels, thereby lessening the amount of first lock, we must, in proportion, close in the bankings to agree with the lessening of the lock. If this were not done we should find, as the result of leaving the bankings open after altering an excessive drop lock, that both locks, namely, drop and draw, would be present. Therefore, in this instance, as we have lessened the excess of draw lock by resetting the pallet

FIG. 101.

jewels, we close in the bankings to agree with the extent of the new drop lock. This item agrees with Rule II. This being done, we again examine the guard pin's freedom with edge of roller table. This time we find it correct in amount. Next, using Test B, we find conditions as illustrated in Fig. 99, which is correct. Also on remaking tests C and D we find a normal amount of

FIG. 102.

freedom between the corners of the notch and the roller jewel.

**QUESTION:**—Give an instance in which we find over-contact (Fig. 98, Test B), the cause of which is *not* attributable to excessive drop lock.

**ANSWER:**—In this as in all other tests we first inspect the pallet jewel lockings with escape wheel teeth, the result being we find that the drop lock is practically perfect.

New York City

The Only Safety Chatelaine Case which enables a Watch to Keep Correct Time and Cannot be Lost

#### MERITS

Holds the watch firmly and securely, thus preventing the movement from being jarred, as there is no swinging or bobbing up and down while the wearer is walking or running. Protects both the case and garment from wear.

*Absolute Security*

Patented U. S. June 9, 1908.  
Patents Pending in Foreign Countries.

#### UTILITY

It can be raised so as read the time, and reverses to have either the dial back facing front, without removing brooch pin watch from the garment. Can be worn on the shoulder, belt, chain or fob.

*Will not pull or wear off*

MADE FOR ALL SIZES OF LADIES' WATCHES, BOTH OPEN FACE AND HUNTING

#### Artistic and Practical

The only brooch and watch combined. Affords absolute security, as it has a safety catch. Nothing to wear out, as it works on friction bearings. Eliminates the possibility of loss of the watch owing to either bow, hook, swivel or link wearing out, breaking or coming apart, as in the old style chatelaine. Does not interfere with either winding or setting of movement.

Watch worn as Chatelaine, showing it lifted to read the time.

Watch worn on chain as a pendant, pinned to garment as additional security.

Licensed Under Wachter Patent. Patented July 25, 1905; May 21, 1907

sign of excessive drop lock exists. We follow this with an examination of the relation of the guard pin to the edge of the roller table. This we likewise find satisfactory. Next, making Test B, we find conditions shown in Fig. 98, which illustrates an over-contact of these parts. As our first examination decided that the drop lock was correct, another cause must be found for the error Fig. 98 shows. As we used Rule II. in force at the commencement of the test, we next try Test C, and thereby discover an excess of freedom between the corner of the lever notch and the roller jewel, Fig. 100; employing Test D, it also confirms our findings as to excessive freedom between the corner of the notch and the roller jewel.

QUESTION:—What tests showed this escapement to be perfect in part?

ANSWER:—First, an inspection of the drop lock showed it to be perfect; second,

Fig. 103.

extent of freedom between the guard pin and edge of roller table was found to be wise correct.

QUESTION:—What does the foregoing show us in reference to Test B?

ANSWER:—That when we correct the drop lock and Test B indicates an error, as it did in this instance, the error must then be sought for in the roller jewel fork action.

TEST B, CASE N.

We follow Rule I. and attend to the notch and pallet lockings. Thus we know the condition. Following previous methods we put Rule II. in force and close the bankings so first lock only is present. Wedging the lever and placing the balance in position, we start our examination, rotating the balance and thereby bringing the roller jewel towards the lever's notch, but were unable to make it enter (Fig. 101). We commence again, this time dropping the roller jewel into the lever notch, but we find it won't make its exit out of the notch. In an instance like this it is wise to transgress Rule II.; therefore, we open the bankings on each side sufficient to allow of the roller jewel's exit; accordingly we commence our examination over again. The act of guiding the roller jewel into the lever notch and out the other side produces the effect on the tooth and pallet shown in Fig. 102. The same effect is observable on both pallets, the tooth being discharged from each, as shown. Our first observation under Rule I. showed an extraordinary amount of lock, but a second observation of the lock made after Rule II. was put in effect showed that the drop or first lock on each pallet stone was about correct. As the result of both observations we conclude that the excess of lock lies in an overplus of draw or second lock (Fig. 103). This

is a part solution of our difficulty; we found, however, that with bankings closed (Rule II.) the roller jewel was unable to make its exit out of the lever notch, and also that the condition of the first lock was thoroughly satisfactory. We are forced to conclude that if the first lock is not at fault we must attribute the error to over-contact of the roller jewel in the notch of the lever; the inference being plain, we cut away the corner of the notch and a part of the horn in its vicinity and make frequent tests. When the tooth and the pallet assume the position illustrated in Fig. 99, Test B, we cease cutting, the opposite side of the escapement action should be made to correspond, and tests C and D should also be made use of. Whenever we find a deep first lock of tooth and pallet in an escapement, it demands correction before using the tests; otherwise we are wasting time attempting escapement corrections and obtaining results that lead to nothing. While giving a few words of advice, let us add that all escapements cannot be made to come up to our standard, but we can usually vastly improve them.

(To be continued.)

Hairspring Stud Indicator.

It has always been difficult to set a watch in beat, several trials being usually required before the hairspring stud is placed in the proper position. Owing to the different models and various ways in which escapements are constructed, it is hard to

Fig. 1.

employ a positive index for that purpose, and many workmen mark the balance before removing the hairspring. To obviate these difficulties is the purpose of the device illustrated herewith and invented by W. D. Smith, Denver, Colo. In order to take the roller table and hairspring on the balance staff so that they will be in the proper position to have the watch on beat, the frame of this device is taken from the stand and the lower end of the stump, 6, is placed on the cap jewel in the cock bridge, 15, of the balance wheel, 16. The lower pointer, 9, is turned so it is directly above the lever pivot, and the upper pointer, which moves independently of the lower

one, is turned until it is directly over the hairspring studhole in the cock bridge, 17. (See Figs. 1 and 3.)

When the stump, 6, is placed on the cap jewel, the spring, 10, gives a yielding pressure and allows the stump to yield so as to

Fig. 2.

prevent too much pressure being put on the bridge. The tool is then replaced on the stand, the reverse to what it is shown with the glass shade on, so that the stump may be over the edge of the stand. Staff 19 is then placed in the tool and the roller jewel enters the slot, 8; the hairspring is then placed on the staff with its stud directly over the upper pointer, 11, and the hairspring and roller table are then forced in

Fig. 3.

place by the stroke of a hammer on the punch, 13. (See Fig. 2.) By means of this device the setting on beat of a watch will be found correct and simple.

The new store of J. M. Hubbard & Co., Anderson, S. C., at the corner of Earle and Main Sts., is rapidly nearing completion. When finished the establishment will be one of the most attractive in that territory.

**THE WEBB C. BALL  
WATCH CO**

Ball Bldg.  
Cleveland

Railway Exchange  
Chicago

**"World Map" Railroad Clock.**

THE "world map railroad clock" made by M. G. Dalamoy, watchmaker, at Benneville, France, might be the sister to the "autodrome" clock, made by him, for it is constructed on the same principle, but with a difference, that in the autodrome clock the automobile turns about fixed pickets, while in the show-piece illustrated here the world map makes a revolution in 12 hours and the locomotive would also make a revolution about this world map in the same time, if it were stationary. In reality, is the explanation of the mechanism.

The clock work movement, located in the interior of the world map, causes it to make a revolution in 12 hours. A platform, representing the equatorial rails, is attached to the world map and consequently turns with it; there is placed on the rails a locomotive fitted with a clock-work movement, which would enable it to make a circuit of the globe in 12 hours.

UNIQUE NOVELTY CLOCK.

**A Clock Representing a Locomotive.**

AN interesting clock, made by F. R. Stohler, Topton, Pa., and representing a locomotive, is illustrated below. One side of the cab has a regular time clock as shown, and every time the minute hand reaches the hour and the half-hour mark all the wheels turn, the eccentric works in and out, the piston begins to move and the bell rings within the cab.

This clock is 15 inches high, nine inches wide and 26 inches long. It is built in the form of a full-size locomotive and is very ornamental. It is built of wood and finished with polished brass.

**Habits and Clocks.**

LURKING not far beneath the surface of that most curious British plan to set all the clocks ahead an hour is probably the ancient idea that there is a moral

in the morning when everybody knows that it is only 6?

The "time of day" is not what the clock says, but an agreed fraction of the period between one noon and another, and while those fractions can be made large or small at will, the clock cannot change the relative position of any one of them. It would be precisely as hard to get up at 6 if it were called 5 as it is now, and 10 would remain for most of us "just the edge of the evening" if it were called 11. Midnight and noon insist on fixing themselves, and they cannot be changed, even by an act of Parliament.

Again, while it seems "natural" for man to arrange his goings to bed and his risings therefrom in rather close accord with the appearance and the disappearance of the sun, he has always fought against the compulsion to do so. Even when a savage he does so with some degree of success, and as he advances in civilization he makes for himself better

FULLY EQUIPPED LOCOMOTIVE CLOCK.

the movement of the map of the world the reverse of that of the locomotive, and it follows that the latter is made to appear stationary, although advancing on the circle it carries it along, the hour being at the same time shown by the locomotive on the other side, that is to say, the side shown to the people, who can, with difficulty, comprehend the system and find exercise for their wits in the solution of the combination.

M. Wallace has just completed extensive improvements in his store in Huntington, W. Va.

John B. Smith, who was recently arrested while trying to sell diamond jewelry, which it is alleged was smuggled from Canada, was arraigned before United States Commissioner Harris at Port Huron, Mich., about a week ago, and held for trial. He was committed in default of \$1,000 bail. The jewelry is valued at about \$1,000.

difference between daylight and darkness, and that it would be better for people—or at least for other people—if they devoted to sleep most of the time when the sun wasn't on duty to show what they were up to.

Of course, all the talk in support of the Pierce bill is purely economic. By beginning work an hour earlier in the morning, it is said, an hour could be gained at the other end of the day, with no diminution of product, and all classes of labor would have just that much more leisure for the amusements and edifications to be obtained only by natural light. This is good argument, as far as it goes, but, strangely enough, the demand for the change comes from the employing classes, and not from those who would get the increased playtime upon which so much stress is laid. Moreover, if the argument is sound, why not act upon it without any foolish pretense that it is 7 o'clock

and better light of the kind called artificial and he uses it more and more in exactly those activities that differentiate him most from the animals. Were it not for the fact that not a few queer people find it a satisfaction and a utility to carry a watch which they know is five minutes fast, one would be tempted to say that the Pierce plan could be adopted without affecting in the slightest the "hours" of any human being. As it is, that would be going too far, but certainly the effect would be minute—except in the way of confusion and inconvenience for those who followed it whenever they were brought into relations with those who rejected and ignored the absurd scheme.—*New York Times*.

W. Smith, Groveton, Tex., was taken into custody in Trinity, Tex., a short time ago on a serious charge preferred against him by Miss M. Edgely, 17 years of age.

**VACHERON & CONSTANTIN**

**Special Railroad Movements**

To secure and hold the railroad trade there is no more attractive and permanently satisfactory line than the V. & C. Special Railroad Movements.

The watches in question have been in use for many years by a great many railroad men on all important lines in this country, and have shown a degree of accuracy and reliability which is unparalleled.

Many railroad watch inspectors have assured us that the rigid requirements of a railroad watch are met by the V. & C. to a degree which is beyond criticism, and which places the line in a class by itself.

You should have a representative showing of these railroad movements—17 to 21 jeweled, adjusted to heat, cold and position, and lever set—in order to get your share, and more than your share, of this most desirable class of business.

## PENNSYLVANIA WATCH CASES

SOLID  
Trade **XXX** Mark  
GOLD

No. 94.

### A NEW ONE AND A GOOD ONE

MR. EXCLUSIVE JEWELER:

Do you wish a case of maximum value at a minimum cost, in shapes the thinnest and models most superb—finish and engraving that of the finest 14K. solid gold line—a solid gold case throughout of extra heavy weight at about the same price as the best makes of gold filled.

This is a large order but WE ONLY can fill it in every respect. These cases are made in triple stock, the outside of which is 14K., and this 14K. stock is 1/2 of the total thickness of the backs. The inside is 10K. and a low K. between, which is crystallized, making a harder, stronger and stiffer case in every way than either a filled case or 14K. solid. Ask your Jobber or write us direct for Prices and Samples.

"LORD YORK"

"Send us a card with your name and address and we will send you an illustrated catalog, describing and illustrating 'LORD YORK,' and his associates. He is the most interesting character for the Retail Jeweler in existence to-day. You can't afford to be without him."

## Advances Made in the Art of Lock-Building

Old and Modern Means of Protecting Valuables from Lock-Breakers

(From the *Bookkeeper and Business Man's Magazine*.)

(Continued from issue of Aug. 19.)

THE lockmaker could not allow this state of affairs to continue and his studies resulted in the invention of the time lock. The credit of this invention is claimed by several persons, but from personal knowl-

fact that he recognized the ease with which any dishonest officer could visit the bank, open the safe and abstract the contents. His earliest invention, therefore, consisted in certain mechanism operated by a clock movement, which kept the combination lock on guard until a certain predetermined hour, and no one could open it until that hour. The early form of time-lock is shown in Fig. 3. There are two high-grade watch movements, in front of each of which is a dial with 24 pins, 12 black and 12 white. The black pins denote the hours of the night, the white ones the hours of the day. These dials turn with the movements in similar manner to the hour hand on the watch or clock. The two wheels shown directly above the dials ride upon the rear ends of the pins. If certain pins are pulled forward, when these pins arrive under the wheels the latter will drop down into the spaces behind the ends of the pins. This causes the bar A to drop, pulling down the right-hand end of the bar B, which in the illustration is up and closing a hole in the lock case into which the tail of the bolt of the combination lock slides when the lock is opened. These movements are kept running continuously and lock and unlock automatically at predetermined hours—each day except Sunday. On that day it does not unlock, but goes over to Monday. If now we assume that the safe is locked at 4 in the afternoon, and it is determined that it shall be opened at 9 next morning, all the pins on each dial are pushed in except those between 9 and 4 on the white. When No. 9 arrives under the little wheel the operation above described takes place and the lock can be opened. When No. 4 comes under, the wheels ride up on the pins from No. 4 to 9 and the safe is locked. The reason for two movements will at once be evident. In case one should fail the other will do the work. One movement may stop or become deranged. It is almost certain that it will do so at some time. Two, however, can scarcely be imagined to go wrong at the same time.

Many improvements were made in the lock mechanism, and the certainty of operation increased by further duplication of movements, each one capable of performing

all the required work. One of the best is the Quadruple time-lock shown in Fig. 5. This is used both for dogging the bolt of the combination lock and also in a more highly improved form as will be shown later.

For reasons above stated, however, Stockwell soon abandoned the idea of simply dogging the bolt of the combination lock. Three points for consideration brought the ingenious inventor to three separate decisions, viz.: (1) Keep the bolt out at all times; (2) admit the bolt at the proper time, and (3) in case of

FIG. 3.

edge the writer is convinced that the credit really belongs to Emory Stockwell, an ingenious Connecticut Yankee, whose contributions to this class of locks has done more to place within the reach of bankers and

FIG. 4.

others means for absolute security than those of all others combined.

Stockwell argued along the well-known lines that no lock was secure so long as it could be reached by any means whatever, and he set about to provide for placing beyond the reach of any one, honest or dishonest, the means of access to the lock.

He was first induced to do this from the

FIG. 5.

tempt to force the lock provide such means that the result would be to effectually protect the safe. He reasoned that it was better far that any tampering would result in the safe being completely shut out the world than that there should be any possibility of the safe being unlawfully opened. Thus it happens that if the safe is dynamited in the attempt to destroy the lock, and this results in opening the lock or destroying the mechanism, the safe is forever locked and the contents must be torn out or the safe destroyed. How he accomplished this will be interesting to note.

The first point for consideration was the isolation of the locking mechanism and its work from all connection with the exterior of the safe or vault. This means that there must be an absolutely solid wall and a steel door, with no place at any point where liquid explosives could be introduced. This problem was not an easy one, as can be readily seen, for it involved the use of

# WORKSHOP NOTES AND QUERIES

Answers are also solicited from our readers to the questions published on this page.]  
Attention paid to communications unless accompanied by full name and address of the writer.

**QUESTION No. 2201.—Making Plaster Bits and Statues.**—How are the plaster bits and busts made? If made in a mold, how are they made so the figures draw out without breaking? M. P.

**ANSWER:**—The making of plaster ornaments, in which the Italians are proficient, is mostly done in gelatine moulds, which are pliable and will permit taking out of the finished pieces without breaking them. For the production of moulds for casting objects of any description a model must first be produced, which could be as accurate as possible. A shell next made of plaster, which is in two halves and surrounds the model, leaving a space of one-half to one inch around the model. To make this, one-half of the shell is first made of the plaster by inclosing a space large enough with pasteboard or cards on a table; pour in the plaster, and when set so it can be handled, turn the cast so as to bring the flat side to the top. Now make a deep mark to indicate where the cutting is to be done. Allow from one-half to one inch space around the model. Cut a few shallow holes on the outside of the marks, paint over the flat side with capsuds, surround the plaster with pasteboard again, and pour enough plaster on to make the other half. When set, take the two halves apart and chisel or cut out the space required for the model. The model may be made of plaster, wood, or any substance that will not melt. The model is placed on the table and the plaster set up around it and tied together securely. All openings must be closed up at the bottom. The plaster halves should have an opening at the top where the hot gelatine is poured. After 10 hours the outer plaster is removed by taking apart. The gelatine mass is now cut in half lengthwise with a sharp knife, down to the model, and the two halves are taken off. After treating the gelatine with alum and greasing the mould, the two halves are put together and the plaster cast is tied around them. A mixture of water and plaster of Paris is then poured in the mould, which is taken in both hands and vigorously shaken so that the plaster will reach every cavity in the mould. The surplus is, of course, poured out. This operation is repeated several times, until the desired thickness of the plaster article is obtained. If wanted in a solid state, the center must be filled with the plaster. When the plaster has set the plaster shell is removed and the gelatine mould can be pulled away from the plaster casting. Many pieces can be made from the moulds. After drying the statues for a day or so, they are finished by scraping where the seams show,

or building on with plaster where there are any broken parts. They are then treated by oiling and bronzing or by painting.

**QUESTION No. 2202.—To Imitate Antique Pottery.**—How can I treat pottery so as to make it appear antique? T. M. P.

**ANSWER:**—Pottery can be made to have an antique effect by boiling in oil and then burning in wood ashes. The desired finish may be regulated by the length of time the article is buried in the ashes.

**QUESTION No. 2203.—Jewelers' Putty or Putty Powder.**—Please inform me how jewelers' putty, used for polishing, is made. J. P.

**ANSWER:**—Jewelers' putty, or putty powder, is made by melting equal parts of tin and lead and letting it get red hot. The tin will be forced on top in shape of putty, which is skimmed off, and which forms the putty powder. If only a small quantity is wanted, pure tin melted to an excessive heat will form the same putty powder.

**QUESTION No. 2204.—To Bronze Steel Buckles.**—I want to bronze some steel belt buckles. Please give me a formula for doing this without the use of the electric current. T. B. S.

**ANSWER:**—Steel articles may be bronzed by using the bronzing salt metal. This is made by mixing to the consistency of cream antimony chloride, used for bronzing, with olive oil. The mixture is slightly heated, covered evenly over the surface and left there until the proper color is obtained. Another formula is: Nitric acid, ½ ounce; spirit of nitri, ½ ounce; alcohol, one ounce; copper sulphate, two ounces; ferric chloride, ½ ounce; water, two pints. The bronzing will be more durable if covered with a coating of lacquer.

### Mixing Metals.

**WHEN** alloying gold or silver, in fact, in the making of any composition such as German silver, brass, bronze, etc., the principle is to vigorously stir the mixture so that it will be thoroughly mixed. As a writer in *The Metal Industry*. To do this (no matter what composition is being made) take the ingredients that melt at the highest temperature, such as nickel, copper, scrap and all heavy pieces, and get this nicely melted and stirred well; then put in the zinc, tin, or lead, as the case may be. When all the ingredients are in, the mixture should be thoroughly stirred from the bottom of the crucible as it is most important that the heavy metal should be mixed with the lighter portions on the top.

This is the failing of a great many men—

they do not stir enough and thereby make lots of trouble for those who use their castings. This, I think, is done mostly for want of thought, as most men would stare with astonishment if told they did not stir their metal enough; but it is a cold fact. I can vouch for this as I have had more trouble with mer over this one thing than any other.

What I claim is that stirring the metal toughens and makes it more tenacious; also that you get a better and steadier stream when pouring and, last but not least, the last piece to be cast is the same as the first. I know of furnace men working in both large and small bronze foundries who charge a crucible outside the furnace. They place the copper in the pot, then the zinc in around the copper, and then put the crucible in the furnace. When that charge is melted they put in the lead, but never by any chance do they use a stirrer. Now, I claim this bronze is not properly mixed and the loss of zinc must be enormous.

The right way to make good bronze is to melt the copper first, put in the zinc and stir thoroughly; then put in the lead and stir as before; then pour and, without a doubt, you will get better bronze and the loss will be considerably less.

When melting metal for rolling purposes it must be constantly stirred to get the most intimate mixture of the ingredients. A metal not thoroughly mixed is liable to crack in the process of rolling. A metal well mixed will stand up better under the hammer and drop, or in the draw bench.

Some time ago I was hired by a firm (silversmiths) to correct their German silver which had gone wrong, and while working there I saw the sterling silver melter at work. He never used a stirrer once. I am aware some claim it is not necessary. In this instance the sterling scrap, fine silver and alloy were weighed out before being sent to the melting room.

Now, I claim this system is wrong because the proper mixture cannot be obtained. If a piece of work made from silver melted in this way gets into the assay office, it is liable to be found under the standard; and the manufacturer is fined through no fault of his, but because the metal was not mixed. Again, pieces made from the same melt might run above the standard. Some melters, instead of using a stirrer, melt their silver twice; this mixes it some, but the method is not so good as that just mentioned.

I claim that any metal with one per cent. of alloy needs as much stirring as a composition with 20 or 30 per cent. of alloy. In making brass sheets the greatest care is necessary in stirring the zinc which, being so much lighter than the copper, has a tendency to float on top, and unless you stir up the copper from the bottom of the crucible you will have several grades of brass when you pour off. This I know from experience.

When working at Holdford Mills, Birmingham, England (this is years ago) we experimented with 12 melts without stirring, and there was not one melt out of the 12 that would roll. The reason was the metal would not mix itself. You will find it is so with any composition—the whole must be stirred to get an intimate mixture.

## The Pottery of Etruria as Shown by Numbers of Vases Found in Oft Rifled Graves.\*

(Continued from issue of Aug. 12.)

THE period of decadence dates from about 330 to 150 B. C., when metal ware superseded earthen ware, and the vases of this class continue to have red figures on black ground; but while colors are sparingly used, white is abundantly introduced. The designs are coarse and careless, and very often nude women are introduced.

The genuine pottery of Etruria is purely Oriental in character and has hardly any trace of Hellenic influence. As a rule, it is

sepulchres of Etruria and were supposed to contain Egyptian perfumes. This fact, added to the circumstance that in some cases they were inscribed with hieroglyphs almost identical with those found in Egypt, leads to the supposition that they were imported to Etruria from that country.

Many of the vases found in Etruria bear inscriptions either painted or scratched on them. The former, with few exceptions, are in Greek. The name of the potter is not unfrequently recorded, and sometimes that of the painter as well.

3. Mixing vases, the most common being the krater, characterized by its wide mouth for convenience of dipping the cups and ladles, and the lobes shaped like a caldron.

4. Vases for pouring out liquids, such as the ope or ewer and the oinochoe.

5. Cups and goblets, the most common in Etruria being the kantharos, a two-handled cup; the skyphos, shaped like a small boat, and the kylix, a wide flat bowl on a slender stem.

6. Ointment and perfume vases. The lekythos, or oil flask, which was laid by the corpse in tombs; the aryballos, used for unguents and carried on the person by a strap for anointing the body after the bath; the alabastron, an ointment vase with no feet, generally in the shape of animals or of heads or limbs of the human body, and the pyxis, or jewel casket.

A modern art or trade that has sprung up in connection with Etruscan vases consists in mending and restoring pottery which has been discovered broken. Generally such restorations are so skilfully made in Italy that it is often difficult to detect them, and hence in some cases unscrupulous workmen have not hesitated to counterfeit genuine old vases.

In the Museum of Corneto Tarquinia, the old Tarquinii, there is a beautiful kylix discovered in 1874 with dark figures on a yellow ground representing within the bowl a combat between two satyrs. This vase was found broken in three pieces and subsequently it was carefully repaired.

Some years ago a native of Corneto, who imitated ancient vases, asked permission to copy it. He did this so well that his imitation could hardly be distinguished from the original, the more so as he purposely broke it into three pieces and repaired it in the same way as the original. It is said that the copy was sold to the Louvre Museum for \$20,000 as a genuine Etruscan vase, and experts doubt whether the original kylix is the one still at Corneto or the one in Paris. In other words, they cannot ascertain whether a substitution has been effected and the copy was left instead of the original.

The writer heard this story from the custodian of the Corneto Museum and cannot vouch for its accuracy, but his informant assured him that the artist is now in America, where he has made a fortune in selling imitation Etruscan vases as genuine specimens to museums.

Wm. White, a negro, was recently taken into custody in Morgan City, La., accused of breaking the window in the store of C. O. Johnson and stealing bracelets and spoons. White subsequently confessed and is now in jail.

ARCHAIC ETRUSCAN AMPHORA. KRATER SHOWING A DISK THROWER. ENAMELED WARE.

ever painted, but scratched or stamped on the clay or with figures in relief. It is of brown or black ware, hand made, sun dried and unglazed.

Its generic name is buccero or black ware, and it is easily to be distinguished from Greek vases of the same kind. Some think that this ware was made of a black bituminous earth found in the Etruscan territory; according to others it is of a clay naturally yellow, but darkened by casting the smoke of the furnace upon it.

The vases are generally lustrous, and this is supposed to be due to a polish produced in the lathe. Another class of ware quite distinct consists of enameled vases, resembling faience or porcelain, ornamented with zigzag white or dark ornaments on a pale yellow green ground.

These vases or jars were found in the

Other inscriptions refer to the owner of the vase, and either mention his name or bear expressions such as "Hail to thee," "Happy as possible," "Hail and drink." Vases for domestic use sometimes have the expression "Drink me," as though the goblet itself were speaking. Often the names of the figures represented on the vase, especially when, as often is the case, they are mythological persons, are inscribed.

Etruscan vases, like the Greek, may be classified according to their shape and the use they were intended for, as follows:

1. Vases for storing liquids, such as amphora, with a long cylindrical body, long neck and two angular handles, and the pithos, a tall jar with a full body, wide mouth, a lid and no handles.

2. Vases for carrying water, like the hydria and kalpis, with three handles, two small horizontal at the shoulders and a vertical one at the neck.

## Retail Organization and Its Benefits to the Manufacturer.

Substance of the Address of A. L. Sackett, Before the Third Annual Convention of the American National Retail Jewelers' Association at Cincinnati.

is with a feeling of extreme pleasure, tempered by one of deepest sadness, born of a cherishing memory of the past, that I appear before you to-day from my present position, of a manufacturer in the jewelry line, but I am thankful to say growing wiser, I try to talk to you of the benefits the maker of merchandise derives from the organization of retail merchants, the distributors of that merchandise. However, I would be untrue to that cherished memory of which I have spoken; I shall fall far short of all that is better and more within myself, if I did not, before attempting to talk upon the subject assigned to me, endeavor to voice a word of loving and tender remembrance for that grand old man, now gone, in whose interests I have always come before you to-day.

was with you at your last convention, and had the honor of being placed upon your programme, as the representative of the Dueber-Hampden Co., and more strictly speaking, as the representative of John C. Dueber. This is the first meeting of retail jewelers I have attended since your last convention, and the first time I have mingled with those who make possible our manufacturing industry, since, by the death of John C. Dueber, I am not only an employer, but a friend.

It is any wonder that the pleasure of being with you to-day has upon it the shadow of a heartfelt regret? I will miss the old time home-going from the convention. I will miss the interested listener, who wished to know of every detail in the efforts made by the retail merchants for self-protection and advancement. I will miss the kindly, gracious speaker, and the words of approval which always followed honest effort in his behalf. I will miss the contact with a life of integrity, and untiring devotion, which was a reward for efforts past, and an inspiration to future activity.

It could not pass, at this national convention of retail jewelers, without paying my humble tribute of respect to this man whom I honored and loved, and who, in my judgment, did much for the development of the business in which you, gentlemen, are engaged. He rests here in this city. It is here that, as a child of poverty, he began the struggle of life, and conquered in the achievement of fame and riches.

It may not always have been fully understood, but we may have seen in him that which was to me objectionable, but to me, his was a life which brought true to the end, and rang truest to those who loved him best, and I do not believe that I am overstepping the bounds of propriety, when, as a friend who served and loved him, I ask, that here, in the city of his early struggles, this convention of American jewelers pass resolutions of respect to his memory.

The benefits of any kind or class of organization are not, and cannot remain with the organizers alone. The spirit of "live and let live" is too American, and too prevalent, and ever present, to permit of the formation of any organization upon so selfish and narrow a platform.

Even did the desire to perpetuate so selfish an undertaking exist, it would be impossible; for good, like evil, cannot be confined, although it certainly does seem that evil, as a traveler, has out the relative comparison with good, as does the fast express to the stage coach. It must be acknowledged, then, that if there is any benefit, or good in retail organization, that benefit, that good must extend, in some degree, to the makers of the goods you handle.

How are the manufacturers benefited by retail organization? If such organization makes better relations and better merchants, then, if in no other, or more direct manner, we are benefited. If this brings together, this acquaintanceship, and hand shaking, and good cheer, sends you home with a broader view of life, and a deeper charity, then, as manufacturers, are benefited to a degree measurable. However, I know that a body of merchants—business men convened to transact business—do not want any of these sentimental pourings, any of these generalities. What you want are concrete facts, if there are any worthy of consideration, in connection with your relation, as an association, to the makers of the goods you market. \* \* \*

As a matter of fact, this organization movement,

before it can be of any great specific benefit to the manufacturer, must become an individualized and specific benefit to each of you, its promoters. Right among the retailers, everywhere, when this organization work is discussed, we are confronted with the question, "What good is it?" That is, what benefit can I, as a retail merchant, derive from a connection with this movement?

The chief benefit of this, or any other organization, to be derived by its membership, is the correcting of such trade abuses and irregularities as curtail your present profits and menace your future prosperity, and this is exactly where the manufacturer also receives his benefit from your organization. However, to eradicate any of these abuses, some person must "take his medicine"; some one must either be cured or killed and either the curing or the killing has got to be accomplished by a specific and sometimes emphatic and allopathic dose.

Perhaps the one needing the remedy is in your own ranks. He may not be a member of your organization, but simply a retail jeweler, whose selfishness and lack of good business methods cause him to destroy the entire trade of a town. His competitors, in the same town, no matter how much they might desire to conduct a legitimate business, are forced to meet his methods. He may be a price cutter; he may be a man who handles the truth carelessly in representing his goods to the buying public; he may be a man who handles the truth still more carelessly in speaking to the public about the goods his competitors handle. No matter just what he is, either one, or a combination of objectionable characteristics, it is certain that the only way he can be reached and controlled is by some organization in his State, allied with some stronger organization, covering the entire country, as we hope this organization of retail jewelers will soon do. If you, as merchants, can regulate your competitors by this organization movement; if you can eradicate from the trade those objectionable characters who make it impossible for the manufacturer to control the distribution of his product, at a proper price, the benefits to the manufacturer are beyond all possibility of computing.

There are, as you fully understand, gentlemen, many manufacturers who desire to so conduct their business as to protect you in the handling of their product, and make reasonably profitable the sale of the same. You know that these manufacturers are constantly worried and harassed by the retail merchant who has no regard for either principle or promise, and who is constantly placing the manufacturer in a wrong light, before the legitimate trade, by mishandling his goods. Inestimable would be the benefits to such manufacturers, if this organization could become sufficiently strong to control this element within their own ranks, sufficiently, at least, to aid the manufacturer who is inclined to do the right thing in the placing of his goods before the public.

I am well aware, however, that it is the general belief that most of these trade abuses, of which you complain, are a direct result of the misconduct of some manufacturer, and I am willing to grant you that this belief is substantially correct. Such an organization as this can only expect to benefit its members, and benefit the better element of manufacturers, when it has attained sufficient strength to take hold of these matters forcefully, and with a certainty of correcting that particular evil to which you give your attention. The ramifications of our commercialism are such that every manufacturer, that is, even a manufacturer adopting such methods as are objectionable to the legitimate trade, is bound to have a certain number of friends in an organization of this kind, who are always ready to defend him, and as a result your organizations pass resolutions of a general and indefinite character, and these resolutions are adopted, and by and by, seeing no results, your membership begins to lessen and dwindle down until even the few faithful give up in despair.

If this organization movement is going to be perpetuated; if it is going to become a power in the moulding and forming of our commercialism, then it goes without saying that the sooner we, as manufacturers, conform to its requirements, the better it is for us. If this movement toward organization is simply a temporary spasm, some-

thing which is to be short lived, as predicted by some, then there cannot possibly be any benefits derived from it, either for you, as its members, or for us as manufacturers who are catering for your trade. If you, as business men, are not going to take hold of these matters in a business way; if you are not going to put personal friendship secondary to the governing principle, which you claim actuates your organization, then there can be no benefits derived from these meetings, and this expenditure of time and effort. If, on the other hand, this effort and enthusiasm is something which has come to stay, something which has come to formulate methods of business for your protection and advancement, then it must redound to the good of all coming within its influence and restrictions, even the manufacturer, who may receive your present severest censure.

I have often said to you before, in speaking at your State and national conventions, that I could not believe there were many, if any manufacturers, who desired to place themselves in an antagonistic attitude to the retail trade. There are some who have made mistakes, and some who, on account of severe competition, have copied the mistakes of others, until at the present time there is unquestionably a trade condition most undesirable. I firmly believe, however, that the majority of manufacturers, who are in any way guilty of objectionable practices, would be glad to change their methods and cease such practices, did they deem it possible for them to do so and meet the competition with which they are compelled to come in contact. In other words, I believe that these abuses, of which you complain to-day, are the results of an overwrought, and unregulated competition, for which no individual person or firm is solely and entirely to blame, although there are, of course, certain leaders who are more to blame than others. \* \* \*

The benefits of your organization, or any similar organization, to the manufacturer, are in exact proportion to how closely you live up to your profession. You will, I know, pardon me for reference to my own present business connection, but since I last met with you I have changed my business relations, and in so doing have changed my methods of doing business, in their relation to the retail trade. In entering this new field of action, I have had an experience new to me, and have had a chance to sound the loyalty of the retail jewelers to the principles which they claim actuate their movement for organization. From this experience I want to give you a few facts, and I hope they will be welcome and not insulting.

Mr. Sackett then gave a number of specific instances, showing how some members do and some do not support the manufacturer whose policy is to stand by the retail jewelers, and showed what substantial inducements the mail-order and other houses offer the manufacturer who will make their lines. He concluded by saying:

In closing, I am going to quote my friend Taylor's motto, "Stand by those who stand by you," and I want to assure you that if you do this, as individuals, in anywhere near the manner that, as an organization, you demand protection and a square deal, the manufacturer who meets your requirements will be benefited to the full extent of his desire; and the manufacturer who does not make an effort to meet you, within the bounds of reason, will, in slang parlance, simply get what to invest."—Washington Star.

### The First Step.

"So you have a plan for making diamonds?"

"I have," answered the man from Paris.

"And what is the first step in your process?"

"To find someone who has foolish money to invest."—Washington Star.

The first meeting of the creditors of E. Hockman, 18 W. Broughton St., Savannah, Ga., who recently filed a petition in bankruptcy, was held at the office of Referee in Bankruptcy McDonnell, Aug. 8, when J. F. Doyle was appointed trustee.

### NOTED AUCTIONEER IN DETROIT

Seller of the Sturgeon Stock Famous  
in His Line of Work

Many of the thousands that have attended the great auction sale of the stock of W. A. Sturgeon & Co., jewelers, will be interested to know something of the man that brought this sale to such a successful conclusion. It requires no special talent to sell average merchandise at auction, but in selling a stock as fine as that carried by Sturgeon & Co., a man of more than ordinary ability is needed. The magnificent collection of precious stones, the products of famous silversmiths, objects of art, etc., that comprise the largest stock of its kind in this section of the country, were described and sold by Mr. Hand in a manner both interesting and instructive. Never before has such a representative audience been collected at an auction sale in Detroit. This was due not alone to the high standing of the firm, but to the manner in which the sale was conducted. A raised platform built on the main floor of the store enabled the ladies to be comfortably seated and see each article exhibited and sold. The auctioneer, Mr. James L. Hand, is a resident of New York, a son of the editor of a leading daily paper of New Jersey. On finishing his college course he traveled much, visiting the countries famous for the production of the various arts, so that on embarking in the selling of high class jewelry, art wares, etc., at auction fifteen years ago, he found himself well equipped for the work. His eloquence and wonderful descriptive powers hold his audience interested and at the same time command confidence in the quality and value of the articles offered. The demand for Mr. Hand's services calls him to all the important cities of the country, and when asked the other day as to his opinion of Detroit, said: "It is the most beautiful city in the country and wherever my business shall call me, will sound its praises as the city where 'Life Is Worth Living.'"

## Some of the Reasons That Have Made Hand the Leader of Jewelry Auctioneers:

His knowledge of precious stones, high class jewelry and art wares.

He knows how to address an intelligent audience and sell goods without exaggeration or misrepresentation.

He does not ask the jeweler to allow a cheap assistant to conduct his sale. He has no assistants. Assistants are usually men without individuality and cannot "make good."

He carries no goods to "sweeten" your stock. If you need them your jobber will supply you.

He guards your reputation and leaves you with more friends than before your auction.

The successful auction to-day must be conducted on lines up-to-date, so beware of the old timer with antique methods.

Before you select your auctioneer send for my booklet on auctions. It gives references from leading jewelers and wholesalers of this country.

## MIRROR FINISH

is the name which has been given to S. O. Bigney & Co.'s

## HIGH GRADE GOLD-FILLED CHAINS

on account of the beautiful finish. After the links are soldered the gold is somewhat porous. In order to get a perfect finish, the only method known to the art is the method of burnishing. This we apply to our chains. It closes the pores, hardens the surface, gives the mirror finish, and will add one-third to the wearing life of the chain. This method makes for durability and excels all other processes of hardening finish.

Every retailer should have a good stock of our high-grade, gold-filled, mirror-finish Chains, Fobs and Bracelets.

### We Make Bracelets of Every Description

Oval and Square, Side Swing and Hinge, beautifully finished and embossed. Pleasing to the eye, and rapid sellers.

**Office and Factory, Attleboro, Mass.**

New York Office, 3 Maiden Lane

Belcher ring as received with claws badly worn.

How the same ring looks when stone is reset without new claws. Stone is not secure and point is below inside of ring.

How we splice settings and solder in new claws; seams do not show and rings are as perfect as when originally made.

How ring looks with new claws and stone securely reset. Entire ring is finished like new.

When we tell you that we have received as many as 75 diamond rings in one day for new claws and settings, you will not think us extravagant for using a full page in THE JEWELERS' CIRCULAR to exploit this feature of our business, but will wonder if you are getting your share of claw work.

99 out of every 100 owners of diamond rings willingly pay \$1.50 to \$5 for new claws or settings on their rings, but would not buy new mountings for \$5 to \$25.

It is worth while to familiarize yourself and your employees with this work, as it is one of the important little things that helps to make your business profitable.

Many ring as received with worn claws. Stone cannot be reset, as it would be too low to look well and the point would come below the inner circle of ring.  
(See cut No. 2 of flat belcher.)

How same ring looks with new claws and stone securely reset. Entire ring is finished like new.

Oval Belcher ring as received with claws badly worn. Stone cannot be reset, as it would be too low to look well and the point would come below the inner circle of ring.  
(See cut No. 2 of flat belcher.)

How same ring looks with new claws and stone securely reset. Entire ring is finished like new.

THE PRICES QUOTED ABOVE FOR NEW CLAWS AND SETTINGS ARE SUBJECT TO OUR CATALOGUE DISCOUNT.

WE CAN PUT NEW CLAWS AND SETTINGS ON MOUNTINGS TAKEN IN TRADE AND REFINISH THEM SO THEY WILL BE AS GOOD AS NEW.

WE RETIP CLAWS AND MAKE NEW SETTINGS FOR CLUSTER MOUNTINGS SO THEY ARE AS GOOD AS WHEN ORIGINALLY MADE, AT PRICES THAT MAKE IT ADVANTAGEOUS FOR THE OWNERS TO HAVE THIS WORK DONE.

Carrying no diamonds in stock, entering and tagging each piece of diamond jewelry as received, then giving to each workman but one ring at a time, which is returned before he receives another, prevent any possibility of diamonds being exchanged while in our possession.

**CROWN PLIER No. 331**

For clamping the collar of crowns on dust-proof cases while removing same from pendant. This is usually found a difficult task but easily done with the help of this plier.  
Nickel plated.....each, \$ .60

**1 Doz. BARREL HOOKS (threaded with Finished Drill and Tap**

With this outfit a new barrel hook can be put in barrel in a short time, and in a proper manner so will not pull out. Price.....\$ Same as above without Taps and Drill, per doz.

**JEWELERS' SQUARE SAWS, ROUND BACK**

Hardened by a new process, giving a certain "toughness" not found in other brands of saws. Made in No. 00000 to No. 6. Price, per gross, \$1.00

**ECHARCO WATCH GLASS CABINET No. 15 (Patented) Price, each, \$16.00**

This cabinet has many new features not found in any other. Novelty and usefulness are the chief arguments in its favor.

**Construction and Material.**—The cases are made of oak, finely finished and of attractive appearance. Sides are paneled. Partitions of basswood and put together in best manner possible.

**Partitions** are skeleton, preventing accumulation of dust, chips, etc.

**Bottoms** of cabinets are hollow to receive chips, dust, etc.

**Arrangement for Glasses.**—The nine drawers contain 1,547 spaces to hold glasses in upright position.

**Labeling** of drawers, as shown in cut, is on the pulls of the drawers and done in gold bronze on black background.

**Dimensions.**—24 inches wide, 29½ inches high, 12 inches deep; weight, 45 lbs.; with packing case, 75 lbs.

The construction of drawers, the arrangement of partitions to economize space and weight, and the novel method of showing contents on drawer-pulls are all prominent characteristics and extremely well thought of.

Top View, Showing Skeleton Frame of Drawer. Accumulation of dust and chips is impossible.

**SHELDON'S PATENT HAIRSPRING COLLET REMOVER**

No need of any more distorted hairsprings bent balances.

Every watchmaker knows how troublesome it is to remove the collet without either distorting hairspring or bending the balance; with the use of this tool the difficulty is overcome. The tool is provided with a pair of spring fingers, curved at the ends and ground very thin and sharp. Tilting the balance the jaws may be slid under hairspring and by pressing the jaws together will readily loosen the collet and then by turning the central screw, which has a hole in the end to receive the staff pivot, you can force the collet from the staff, without injury to balance or hairspring. The adjustable screw nut is provided to avoid wear or injury to the jaws. A glance at the illustration will demonstrate the utility of the tool. Finely nickel plated.

Price, each, \$1.25

**RING SEPARATING PLIER No. 1**

A most effective device for cutting rings from fingers, when too tight to be removed otherwise. A few turns of the saw will cut a ring of average weight. Full nickel plated

Price, each, \$1.75

A handsome Booklet, 8 inches by 10 inches, fully illustrating Zipperer's tools for watchmakers will be mailed you upon receipt of a postal card, giving your name and address.

## A NEW WHITING PATTERN

## The "Madam Jumel"

The Whiting Company's new pattern, the "Madam Jumel," while thoroughly Colonial in its general simplicity of line and reticence of ornamentation, suggests in its pervading grace the spirit of the late 18th Century French Neoclassicism.

It is entirely appropriate, therefore, that a pattern displaying these characteristics should be associated with the name of one who, during Revolutionary time and later, was historically prominent as a social link between her own countrymen and their French sympathizers.

The "Madam Jumel" is produced in a complete line of spoons, forks and fancy flatware, and will be ready for delivery September 15, 1908.

# How Shall a Retail Jeweler Advertise?

Catalogs make it possible to reach the persons whose trade you desire in the most direct and cheapest way. We can furnish you such a Catalog at a modest expense. Write for Samples

## Read Our Customers' Letters

CORSICANA, Tex.,  
Feb. 7, 1908.

THE ARNSTINE BROS. CO.,  
Cleveland, O.

Gentlemen:—While our community in general, like others, severely felt the effects of the financial stringency, the use of your Catalogs, combined with your Circulars and judicious Newspaper advertising, resulted in bringing us a satisfactory Holiday business. This was the second year we put out your Catalogs and intend to use them again for 1908.

Very truly,  
HENRY IVERSEN & Co.

This firm used The Arnstine Bros. Company Catalogs in 1906 and 1907, and again placed an order for 1908.

STORE OF HENRY IVERSEN & COMPANY, CORSICANA, TEXAS.

LOUISVILLE, Ky.,  
Jan. 14, 1908.

THE ARNSTINE BROS. CO.,  
Cleveland, O.

Gentlemen:—Yours of the 4 inst., to hand. In reply I would say, that you may use the store picture in your Souvenir Book. The second part of your letter is hard to answer. We credit a great deal of business to your Catalog. I could not approximate the amount, but will say, we were well satisfied with results. We really want to get in again on your next Catalog. With best wishes for '08, we remain,

Yours truly,  
MATT. IRION.

This firm used The Arnstine Bros. Company Catalogs in 1906 and 1907.

STORE OF MATT. IRION, LOUISVILLE, KY.

Our Salesmen visit every State in the Union. If you are interested, and will notify us, our representative will take pleasure in calling on you and explaining our method

# THE ARNSTINE BROS. COMPANY

Originators of Our Exclusive Catalog Method for the Retail Jeweler  
CLEVELAND, OHIO

IN WRITING US PLEASE MENTION THIS ISSUE "JEWELERS' CIRCULAR-WEEKLY"

## HERE IT IS AT LAST!

Just what you have been looking for and have had calls for time and again. A German Silver Wrist Bag with a Soldered Mesh. Somewhat higher in price than the unsoldered mesh? Of course! But you can now sell a bag that will not break and one you can guarantee. Twelve patterns, 4", 5", 5½", 6", 6¼" widths.

We are still headquarters for high grade Sterling Silver Bags, and have also added a line of Change Purses.

Our goods are made on honor; we believe with Ruskin that "A composition for cheapness, and not for excellence of workmanship, is the most frequent and certain cause of the rapid decay and entire destruction of arts and manufactures."

## Artists and Designers Agree

That the most meritorious compositions are those attaining harmony and breadth without superfluity of detail.

## Hostesses and Housewives Agree

That the best Sterling Silver Tableware is that having only enough ornamentation to lend the proper amount of grace to the dignity of clear, clean silver.

Note how Ye MOUNT VERNON PATTERN fills these requirements, being designed to ye Colonial taste of Strength, Beauty and Simplicity

*Its Success is Assured and Continuous*

## INGELSMAN'S PATENTED COMBINATION "GEM" DISPLAY RINGS and ADJUSTABLE STONE HOLDERS MEET A LONG-FELT WANT

**THEY ARE MONEY-MAKERS AND MONEY-SAVERS**

UNMOUNTED STONES of any size and shape can be displayed advantageously, as is herein illustrated. Your investment in stock can thereby be *decreased*, as you need not mount them up in expensive settings. Your sales will also *increase* by being able to exhibit unmounted stones. The prices are *low* enough to induce you to buy them and *save* you from incurring frequent losses caused by the awkward handling of the tweezer when your customer desires to examine unmounted stones. Try them. For sale by all jobbers.

Due to greatly improved automatic machinery and reduced cost of production, we are now quoting these as follows:

Sets of 18 (full set), in box,	\$6.00
" " 12	4.00
" " 9	3.00

New York Office  
9-13 MAIDEN LANE

Chicago Office  
103 STATE STREET

**T**HE GENIUS which inspired the Directoire regime, did not confine itself to designs, costumes or fabrics. With nice discrimination it even selected its distinctive gems. Of these the Sapphire was pre-eminent. Beautiful in itself, the effect of the stone was heightened by the artistic uses to which it was put. In reviving the tendencies of that marvelous period, this house is giving the Sapphire its appropriate recognition. The effect loses nothing by the artificial stone, so faithful is the imitation. Jewelry of the Directoire period is here reproduced to the life. The influence of this period cannot now be over-estimated.

# The "Krementz-Bodkin Back" STUD and VEST BUTTON

Pat. Feb. 16, 1904

Krementz & Co. believe the trade will agree that they understand the jewelry business sufficiently to know that the "Krementz-Bodkin Back" Stud and Vest Button is the simplest and best mechanical Stud or Vest Button made.

The "Krementz-Bodkin Back" Stud and Vest Button is not one piece, but is one-piece construction, which makes it very simple and the strongest and most durable, because:

- 1—It is Solderless
- 2—It has no spring or hollow wire to bend or break
- 3—It is made of solid, hard spring metal throughout
- 4—It is made by Kremmentz & Co. which insures perfect quality, construction and workmanship

THE STORY OF THE HEAD

## Krementz & Co. Invite Comparison

Krementz & Co. stand back of their assertion. All "Krementz-Bodkin Back" Studs and Vest Buttons are sold also under the unique Kremmentz Collar Button Guarantee.

THE STORY OF THE BODKIN BACK

### GUARANTEE

If for any cause whatever, a "Krementz-Bodkin Back" Stud or Vest Button should be damaged either in the hands of the dealer or wearer, a new one will be given in exchange, without charge. "Krementz-Bodkin Back" Studs and Vest Buttons are made in large variety of patterns in 14-kt. gold and platinum, set with pearls and diamonds.

# HEPPELWHITE PATTERN STERLING TOILET SET

Illustrations One-Half Size.

The tremendous success and popularity of our Heppelwhite flat-ware pattern has led us to carry out the same design in a toilet set, and here are shown the three principal pieces. These illustrations show the pattern plain. It is also furnished with appropriate engraving.

This line is named after Heppelwhite, a celebrated designer of classic furniture, who flourished during the latter part of the 18th Century, and whose works were characterized by a charming dignity and grace which appealed especially to people of culture and refinement.

This toilet set has met with instant favor among the trade, and its success seems assured as much by reason of its beauty as by its attractive price.

We have also carried the Heppelwhite design into a line of sterling hollow-ware, including such articles as the tea set, kettle, meat dishes, vegetable dishes, candlesticks, etc., etc.

Prices and illustrations of the entire line of Heppelwhite flat-ware, hollow-ware and toilet set will be sent to the regular jewelry trade upon request.

# "New Process" GILLETTE Blades

## Information to GILLETTE Dealers

Beginning with Sept. 1, 1908, only "New Process" GILLETTE blades will be distributed.

They differ in price, quality, appearance and style of package from the previous kind, and the public is being notified of the change by full-page advertisements in all the leading magazines.

More than two million GILLETTE users will now accept only "New Process" GILLETTE blades. If you have them in stock before other dealers in your locality you will get the business, and at the new price your profit is a very liberal one.

"New Process" blades are manufactured by newly-invented machines and processes, making them superior in appearance, operation and endurance to any blades ever produced by anyone.

These machines are automatically regulated, and grind, hone and sharpen each blade individually with the utmost precision.

Every cutting edge is perfect, and possesses a degree of keenness not produced by any other process.

"New Process" blades are finished with a high polish that renders them easy to

clean. Since dust and moisture do not cling readily to a polished surface, these blades are practically immune from rust.

"New Process" blades are packed in a handsome nickel-plated box which seals itself hermetically every time it is closed. This shuts out all dampness and effectively protects the blades from rust in any climate, land or sea. When empty, the box forms an attractive waterproof match safe.

The set now contains twelve blades.

The Retail Price is \$1.00 per set. Twelve sets are packed in a carton.

To those who are not handling the GILLETTE, we suggest, "Get Busy." Get the sales resulting from our huge advertising campaign—the increased business and profits that the co-operation of our Sales Department will bring you.

YOUR customers are continually seeing GILLETTE advertisements and they want the razor. Eventually they buy it somewhere.

# THE VALUE OF A NAME

If there are any goods made that are better than ours we don't know it. FOR THIRTY-FIVE YEARS OUR NAME HAS STOOD FOR THE BEST. Our Fall Catalogue, a book of 315 pages of over 6000 good sellers, is now ready. Besides Sterling Silver Toilet and Manicure Goods, Pocket Goods, Candle Sticks and Novelties, we carry a large line of Fine Gold Filled Jewelry, including many unique designs in Lockets and Charms, Necklaces and Pen and Bracelets, Scarf, Hat and Brooch Pins, as well as Link Buttons and Studs. REMEMBER WE GUARANTEE OUR GOODS. OUR NAME IS AN INSURANCE AGAINST UNSATISFACTORY WARE.

## Another View of the Beautiful Spokane Trophy.

A SUPERB trophy which was presented to the Navy by the citizens of Spokane, Wash., as a perpetual gunners' prize, has been the object of great admiration and use in the northwest ever since it was

the piece in its completed state, many modifications being made in the base and in the position of one of the principal figures. Inasmuch as this is one of the notable pieces of silver work that has been turned out in the northwestern part of the country as well as one of the finest trophies presented to the Navy, we present herewith a

## Beautiful Epergne Presented to a German Cruiser.

A NOTABLE example of German silversmith work is the table center recently presented to the new German cruiser *Nürnberg*, by the City of Nürnberg, shown in the illustration on the front cover of this issue.

The design, in the conception of which old motives are cleverly combined with new forms, is ascribable to Prof. Franz Brochier, director of the Art Trade Schools of Nürnberg. The composition can be described as a conventional tree, bearing a fac-simile of the coat-of-arms of the city, i.e., the fortifications and the citadel. The three-sided foot is reminiscent in its ample convolutions of a tangle of roots. The trunk is membered by slender laurel branches, that cling to the boldly wrought dish. This ends at the top with a castellated wall work, within which, on a picturesquely formed amethyst cliff, the ancient Nürnberg castle rises.

The three allegorical figures of pages, located on the projecting foot, were modeled by the Sculptor Philip Kittler; the entire beautiful work in heavily gilded silver was executed in perfect style by Goldsmith Oscar Dessart (of Wich & Co.), Nürnberg, a new proof of the flourishing condition of the goldsmiths' art in old "Durer City."

For the illustration and facts for the description of this work we are indebted to our esteemed contemporary, the *Deutsche Goldschmiede-Zeitung*.

### The End of the Flurry.

CHEER up, the worst is over,  
To worry now is sin,  
You're going to live in clover  
And might as well begin  
To count up all the blessings,  
You've forgotten all about,  
Astonished at their number—just awakened from  
your slumber—  
You'll soon commence to shout  
"Good times!"

Brace up, stop this fool kicking  
And quit that dismal howl;  
You merit well a licking  
For that pessimistic growl;  
Good prospects are about you,  
Never noticed them before?  
Why, man, wake up, you're sleeping—or wasting  
time in weeping,  
Join the universal roar  
"Good times!"

Look up, the sun is shining,  
Choke that infernal whine,  
Time's up for all repining  
The crops are looking fine;  
The old cloud's silver lining  
Has turned, it's glowing bright,  
The Sunny South is welcoming—just hear them  
make the welkin ring—  
The tune that is all right,  
"Good times!"  
—BOB. TAYLOR.

HOW THE SPOKANE NAVAL TROPHY APPEARED WHEN FINISHED.

Completed by the firm of Jos. Mayer & Co., Seattle, Wash., to whom the order was turned over by Leo M. Dornberg & Co., of Spokane, who obtained the contract supply it.

The trophy was described in THE JEWELERS' CIRCULAR of May 30, but the illustration was made from the wash drawing the design adopted, and this proved later to differ in essential particulars from

new cut from a photograph of the completed article, by courtesy of the makers.

August Zimmerman, Stewartville, Minn., while fishing in the Zumbro River, near Rochester, Minn., recently, came across a bed of clams. After searching about 150 of them he was rewarded by finding three pearls, the largest being the size of a pea and considered quite valuable.

### How the Tasmanian Shell Necklace Industry Is Carried on in an Australian Island.

OUR Consul, Henry D. Baker, writing from Hobart, gives the following account of the traffic in shell necklaces in part of Australia: "The invoices of necklaces exported from Hobart to the United States for the year 1907 amount to \$3,083. The shells which are used in the stringing of necklaces for this export trade are known locally as the 'marn shell,' of which there is a green and a blue variety of many different sizes, varying from about one-fourth inch to one-half inch long, the width being about half the length and the shape that of a cornucopia. They are found among the seaweed at low tide around the south and east coasts of Tasmania and among the Furneaux group of islands in Bass Strait to the north of Tasmania.

"The shells, to have any value, must be taken dead, but while the fish wear them alive, otherwise they have no value. After being taken from the seaweed they are exposed to the sunlight and atmosphere for several months, and the fish eat out of them by flies and ants; after which they are immersed for further cleaning in hydrochloric acid, after which treatment their appearance is quite lustrous. Some show many of the prismatic colors. Some of them are strung in this natural state while others are dyed pink, light or dark blue, green and yellow. After strung they sell at retail in Hobart for about 25 cents a necklace, or about \$1.80 a dozen necklaces, and in still larger quantities about \$1.50 a dozen. The sale to tourists from the mainland of Australia during the summer season is very large.

The best shells are found in the vicinity of D'Entrecasteaux Channel. Those found on the east coast of Tasmania are all the same in appearance, but are usually more easily broken than the shells of the south coast of Tasmania. Those of the Furneaux group are apparently of good quality, and when properly cleaned make very attractive necklaces. In these islands the work of gathering and stringing shells is performed mostly by half-caste women and children. On a recent visit to this group I found a number of attractive varieties of shell necklaces which are little known to the Hobart trade. They were made up from shells known locally as "penguins," "toothies," "cats' teeth," "rice" shells, "feather" shells and "pair ladies." The half-caste children at Campbell Barren Island were contributing quite a number of these interesting varieties when I was there, to be sold for the benefit of the children's hospital at Launceston, Tasmania.

Hobart firms which export shell necklaces to the United States are also imported to a smaller extent of shell and pebble ornaments from the same American firms which buy the necklaces, pearl shells being the most common article of import from the cities of San Francisco and Vancouver. British Columbia, furnish for the tourist trade many bracelets made up of polished Japanese and Chinese pebbles which is usually attached a spangle-shaped heart shape of the island of Tasmania.

**Some Interesting Facts Concerning the Production of Artificial Precious Stones.\***

By E. Hopkins.

FOR the past 12 or 18 months the precious stone business of Europe has been much depressed, owing to the collapse of the American demand, followed by that of the other trade centers. After this came the Lemoine affair, which, indeed, caused a commotion among the public that appeared on the surface. In connection with this incident may be mentioned. At the close of the investigation, a lady of high rank asked her jeweler if he would advise the sale of her jewels in view of the possibility of artificial production; of course, the answer given was not to do so, but she naturally held off further purchases until the matter was settled, and a further proof of the interest is given by some diamond transactions that were made subject to the condition that the goods should be taken back if Lemoine were successful. Considerable uneasiness has been felt in the trade for several years concerning the various manu-

factories hardly be seen with the naked eye. It is by no means a modern investigation. One of the earliest experiments that had any measure of success was that of Despritz in 1853, and since then many attempts have been made. The lecture delivered in September, 1905, by Sir W. Crookes includes a concise description of Professor Moissan's experiments. Perfectly pure iron is obtained and placed in a carbon crucible with pure charcoal from sugar. The crucible is

ter results might be obtained. This, however, has not been the case, and to quote from the same lecturer, "The chemist arduously manufactures infinitesimal diamonds, valueless as ornamental gems, but nature, with unlimited temperature, inconceivable pressure and gigantic material, to say nothing of measureless time and appalling energy, produces without stint the dazzling, radiant, beautiful, coveted crystals that are so well known." Lemoine professed to obtain pressure and heat; certainly had the pressure continued it would have become somewhat "tropical" for him to have stayed in Paris.

Concerning other precious stones, a different factor enters, and although considerable heat has to be used the extreme pres-

FIG. 1.

FIG. 2.

A mass of artificial ruby (Natural History Museum, South Kensington, London), manufactured by Professor Frémy. On the surface are many crystals but they are extremely thin. The rest of the block excepting the lower "crust" is of ruby but quite opaque and not suitable for jewelry purposes. Length, five inches.

factured imitations of precious stones. This feeling has been, to a small extent, warranted, there having been some remarkable colored productions on the market, and, perhaps, it would be of interest to some to state what is the present position, and a review of the steps in the various developments.

Taking the diamond first, nothing has been produced approaching the genuine one except microscopical pieces that can

then placed in the electric furnace and a powerful arc formed close above it between two carbon poles. The iron rapidly melts and saturates itself with carbon. At 4,000 degrees C. the iron becomes like wax and volatilizes in clouds; the current is then stopped and the fiery crucible with its contents plunged into cold water. At the moment of passing from the liquid to the solid state, iron expands, but the outer surface hardening first, prevents the inner portion doing so rapidly, thereby creating enormous pressure, which has the effect of crystallizing out the liquid carbon into minute diamonds. After extraordinary treatment in various powerful acids and chemicals for several weeks, the microscopical portions of diamond are eaten out from the iron mass, but are so small that they must be mounted on a microscopical slide before they can be examined. Having obtained a small specimen, the natural inference was that with larger masses and appliances bet-

sure is not necessary, as will be noticed in the methods described later. To obtain some idea of how much patient labor has been taken, expense incurred, and with what exceedingly small results, it is only necessary to glance at a list of corundum (ruby and sapphire) experiments from "La Reproduction Artificielle des Minéraux," by M. L. Bourgeois, which was published in 1884. In 1837 Gaudin produced corundum in form of crystals (although microscopic) from powder, in equal quantities of alum and sulphate of potash with charcoal, and produced thin hexagonal plates 1 mm. across and 1/3 mm. thick. De Senarmont (1850) used a solution of chloride of aluminum or nitrate of alumina in a solution of water and produced very small rhombohedrons. Ebelman (1850) fused borax with alumina and obtain flat hexagonal pieces from the mass by separation with hot hydrofluoric acid.

Various colors were obtained by intro-

ing metallic oxides (the violet by oxide manganese). Sainte-Claire Deville and Con (1858) procured red and blue corundum at the same operation, and, by adding a larger proportion of fluoride of chromium, obtained specimens of a green color. Deville (1861) passed hydrochloric gas over aluminate of soda at a red heat. Several

Siam rubies were introduced, one at a time, at the junction of the jets and rapidly became in a plastic condition. The heat had the effect of driving most of the color away, but, chrome being added, the final tint given was that of a Burma ruby. The somewhat circular beads thus produced invariably broke in one or more pieces on

pamphlet, "Mémoire sur la production artificielle du rubis par fusion," giving minute particulars of the manner of obtaining a similar result by fusing powdered ammonium-alum. He points out that Gaudin might have been successful if the powder had been completely purified. Gaudin's numerous experiments always resulted in opaque "boules." The sketch shows a portion of the earlier apparatus used by Professor Verneuil.

M is the small hammer actuated, and its speed regulated by an electric coil A. P is the box containing the powder which is precipitated in small and even quantities by the taps given by M. At O is the entry for the oxygen gas to the cylinder C, and passing into a narrow pipe till it emerges at the point below. H represents the pipe for the hydrogen, or ordinary gas, which was found equally effective. It will be noticed that the powder travels along the same pipe with the oxygen and mixes with the hydrogen above R, where the two gases are ignited. The fused material falls on a small point at R, and as the volume increases, the support is lowered on the screw at V. T is a water jacket for adjusting the heat of the apparatus. If a certain amount of gas is used, the growth becomes similar to the long piece shown in Fig. 3; but in the usual way more pressure is exerted, causing the "boule" to flatten somewhat at the top and spread out proportionately, as shown by the other specimens in the same illustration. The point is in all cases at the base; four of the examples show this distinctly, and are of different colors. At the end of the operation the gases are suddenly turned off and the mass allowed to cool. It is very curious to note that although the particles of alumina fall separately, and the lower ones have partly cooled (and, there-

FIG. 3.

other scientists, Grandeau, Hautefeuille, Manier, Fouqué, Michel Lèvy and Parmentier, have since that time been successful by various methods in reaching the same small results.

Verneuil and Feil in the year 1877 produced larger hexagonal plates, examples of which are in the Natural History Museum at South Kensington, and also in the Geological Museum at Jermyn St. In 1886 C. Friedel was successful in obtaining specimens of considerable size and much clearer than anything hitherto made. Soon after this the "Geneva" rubies appeared, pieces that weighed from 1/2 carat to 3 cuts each, and, although not quite of a correct ruby color, caused a considerable sensation.

RECONSTRUCTED RUBIES.

It is doubtful who introduced the "reconstructed rubies," although they were probably of French origin.

In 1901, however, a tenant of the writer produced in London many correctly colored specimens, which were made from Siam rubies, in a very primitive manner. The writer was on the same premises and supervised the rough material, and there being no secret in the matter, he had every opportunity of seeing the process, which was extremely simple. The plate on which the operation took place was connected by an attachment through a hole in the table, with the interior of a clock underneath, and thus given a slow rotation. The oxygen gas on one side was conducted from a vertical cylinder, ordinary coal-gas being produced from the usual gas supply; small

being cut, if not before. This peculiarity exists in those made at the present day, and shows that the constituent parts are under great strain when first made. An-

FIG. 4.

other curious thing is that the flaw (which is not a cleavage plane) always takes place somewhat in the direction of the longer axis.

In 1904 Professor Verneuil published a

fore, become fixed before the others descend) each particle is crystallized in exactly the same position with regard to its crystallographic axes and the whole is, in

city, one crystal with a fused surface. Considerable quantity of these artificial rubies have been exported to India in the rough, and it is important that purchasers of Indian-cut rubies should thoroughly examine each stone, as on several occasions both genuine and artificial have been found in the same parcel.

#### SPINEL.

Many attempts have been made to produce the blue corundum (sapphire), but without success. A remarkable result has,

FIG. 5.

Refractometer showing inverted brooch with table of center stone in position.

ever, been produced in a material which color equals a fine blue sapphire, but otherwise may be classified under the head of spinel. Many of this particular production change to violet in artificial light. Yellow and colorless corundums are accomplished facts, but all can be tested in the usual manner, except, perhaps, occasionally a few of the smallest pieces, 1/2 carat and less.

In Fig. 4 is shown a portion of a manufactory having very similar features to those already described. The nearest instrument is not in use, the pin on which the "boule" is "grown" has been withdrawn from the square fire chamber just above it. The operator's right hand is adjusting the valve of the torpedo-ended cylinder in which is contained the oxygen gas. In the left hand is held a colored glass which prevents the glare of the flame in the square of the second instrument damaging the eyesight. Two men can attend to 30 of these machines at once, the period of fusing taking 1 to 1 1/2 hours according to the size of the piece being made.

The writer will be pleased to show some of the failures to any one in the trade who is interested.

Nothing of importance has occurred since 1886, 22 years ago, that ought to have shocked the holders of precious stones. This was the date at which the "Geneva" corundum made their first appearance. Occasionally a fresh sensational statement appears, but it soon dies a natural death; one of these is at the present moment circulating, viz., the much-advertised German discovery. In addition to the prominence given in the daily papers, a circular has been sent broadcast through the trade in

several European centers. Many of the present readers have received one, and will, doubtless, have noticed numerous misleading statements in it. For the benefit of those who have not seen the pamphlet the following extracts are given. The opening statement, which is reiterated several times, is somewhat assertive. "In fact, our synthetic gems can in no way be distinguished from the natural stones."

The next noticed is, "We create even the rare and greatly valued alexandrite (chry-

soberyl), also the blue sapphire in all tints from the light blue to the rare and beautiful cornflower blue." The first named is of a pale, unpleasant green and is merely a corundum with different coloring mixture. It changes to a pinkish hue under artificial light; but this is nothing extraordinary, many pastes having the same peculi-

ally from France, discolored, dim and, therefore, worthless, small rubies, which are melted down, cut and then sold as "rubis reconstitués." As a matter of fact, these bad (?) imitations have not been made by the process mentioned for some time, the method of production from the powdered ammonium-alum being cheaper. We then come to something very attractive, but enigmatic: "Our synthetic gems are neither remelted, nor reconstructed, nor otherwise manufactured from solutions or fused material." If this were so, it would, indeed, be outdoing nature herself. The products are, however, similar to those with which the trade are already familiar. If the testimonials given be read carefully, it will be observed that neither Dr. Max Bauer nor Professor Miethé indorses the statement that the alexandrite is the genuine stone (chrysoberyl). They merely state that the "generation of alexandrite is interesting." The latter authority also says, "Only the expert with modern instruments can distinguish the white sapphire from the diamond."

#### QUERY FOR DIAMOND MERCHANTS.

What do our friends the diamond merchants say to this? Apparently the only difference between the classes of specimens is shown in a comparison of their prices with those of French manufacture. The former are much higher.

#### LITTLE PROGRESS MADE.

To summarize the foregoing it may be said: For many years little progress has been made except in the simplification, and, therefore, cheapening of manufacture. Corundum has been differently tinted; various reds and pinks, yellow, light brown, and also a dirty green have been produced. Neither emerald nor alexandrite has been made.

That some are pretty is undoubtedly true, but, with the exception of very small pieces, they can be easily distinguished as described. This is proved by the extreme difference in price between the natural and the artificial. A genuine business is being carried on in them, and of this there is nothing to complain, but when purchased this should be done with responsible firms and invoiced as such. They should not be allowed to sail under false colors.

Perhaps what most interests the dealer in precious stones is how to test quickly these productions, and nothing better can be advised than the use of a strong magnifying glass, the dichroscope and the refractometer before mentioned. The first named detects the glassy looking bubbles, dust and curved lines in all the corundum specimens. In the natural stone if there are lines they are always perfectly straight, and if any bubbles, these are always more or less angular, not round or oval. The dichroscope is useful for the blue examples, and the refractometer mentioned covers all the work not only of the dichroscope, but much else besides, including also all the colorless productions.

The American National Retail Jewelers' Association has filed articles of incorporation with the Secretary of State, at Des Moines, Ia. No capital stock is issued and its purpose is to promote business throughout the country.

FIG. 6.

Dichroscope. A and B are revolving parts.

liarity. The second mentioned imitates the sapphire only in color, and in no other respect. Again, "All (?) colored natural stones and also our own gems have a peculiar and particular optical characteristic—double refraction." The blue specimens do not, of course, show this, and can be detected immediately with either the dichroscope or the handy little refractometer, for which we have to thank Dr. Herbert Smith. A little further on we read, "There have been lately dumped on the market, espe-

**Cleveland Association of Credit Men seek to Locate North Baltimore, O., Jeweler.**

CLEVELAND, O., Aug. 29.—The Cleveland Association of Credit Men of this city is making a strenuous endeavor to locate F. Freeman, who was formerly in the jewelry business in North Baltimore, O., and who is said now to be a fugitive from justice. Freeman left North Baltimore during the latter part of the year, after having disappeared from two or three Cleveland jewelry stores which he later had forwarded to North Baltimore to South Bend, Ind.

F. FREEMAN, MISSING FROM N. BALTIMORE, O.

I was traced to that city, but there all trace was lost.

From information which has been received by the association it is believed that the missing man may have assumed the name of C. R. Henry or F. F. Bronny and may now be in the jewelry business either as a merchant or as an employee. The association has had portraits of him made and is sending out this full description throughout the country to the various credit men's associations, asking aid in discovering Freeman.

Any one who may be able to give information about Mr. Freeman is requested to communicate directly with the Cleveland Association of Credit Men, Chamber of Commerce building, Cleveland, O.

**Death of Emile Quarre.**

LOS ANGELES, Cal., Aug. 27.—Emile Quarre, who came to this city 25 years ago and opened what was then known as the Diamond Palace, a jewelry store opposite the Baker Block, is dead at his home as the result of a relapse when recovering from an attack of pneumonia. After conducting the store opposite the Baker Block for some time, he removed to Third and Spring Sts., which is now very near the center of the business portion of the city. The store at that town, however, was sold out in the suburbs, and, as a result, Mr. Quarre lost money and abandoned the jewelry business. He established a French cafe here, and afterward removed to Alaska, where he was twice elected Mayor of Eagle City. He acquired considerable

**Imports of Clocks, Watches, Jewelry and Gems Into Canada.**

TORONTO, CAN., Aug. 27.—The monthly report of the Department of Trade and Commerce of Canada for May gives the value of imports for home consumption in the jewelry and kindred trades as follows:

**Recent Decisions by General Appraisers on Jewelry and Kindred Lines.**

Among the decisions of lesser importance handed down last week by the Board of United States General Appraisers at New York were the following:

**AMBER ARTICLES.**—Protest of Emrich, King & Schorsch. Articles inadvertently classified as jewelry were held dutiable as manufactures of amber under Par. 448, Tariff Act of 1897, as claimed by the importers.

**CORAL ARTICLES.**—Protest of Davies, Turner & Co. Coral articles imported in July, 1907, were held dutiable as precious stones, under Para. 435, Tariff Act of 1897, as claimed by the importers.

**ORNAMENTS.**—Protest of Guthman, Solomons & Co. Certain ornaments classified as jewelry were held dutiable as manufactures of metal, as claimed by the importers.

**STRUNG BEADS—TOY JEWELRY.**—Protest of Geo. Borgfeldt & Co. As claimed by the importers, a portion of the merchandise, consisting of cheap jewelry, was held dutiable as toys under Par. 418, Tariff Act of 1897, and another portion consisting of strung beads was held dutiable as manufactures of glass under Par. 112.

Jacob L. Pittluck, Shamokin, Pa., is selling out his store.

**Death of James M. Bennett.**

PHILADELPHIA, Pa., Aug. 30.—James M. Bennett, one of the leading jewelers of this city and senior member of a firm which was established in 1828 and has been continuously in business ever since, died suddenly Wednesday, at 15th and Chestnut streets while hurrying to catch a train for his summer residence at St. David's, Pa. Mr. Bennett was in business at 1024-26 Chestnut St., as a manufacturing jeweler, wholesaler and retailer. The house was owned by Jacob Bennett in 1828, the father of the deceased. It had early earned a reputation as one of the most conservative places dealing in precious stones and fine mountings, and this reputation spread throughout the trade of the entire country.

THE LATE JAMES M. BENNETT.

At 68 years old Mr. Bennett had enjoyed excellent health and his death, due to a heart failure, has been a severe shock to the trade, as well as to a host of customers and personal friends. Mr. Bennett was born in this city and was educated here. At the age of 18 years he followed his father in business as an importer of precious stones and a dealer in fine gold jewelry. For 50 years Mr. Bennett kept a constantly watchful eye over the business well established by his father. For many years, after the death of Jacob Bennett, he was associated in business with his brother, Charles Bennett. The latter died five years ago of heart failure in much the same manner in which Mr. Bennett was seized. Throughout his career as a jeweler Mr. Bennett held the respect and confidence of the trade and of his customers and was regarded as an authority on diamonds, rubies, emeralds and pearls. It is said that no one in the local trade had better judgment of the quality and value of emeralds and rubies than he. Many members of the trade, when in doubt, consulted him and much of the most costly and expensive pieces of jewelry, necklaces, tiaras, stomachers, etc., worn by wealthy Philadelphia women and valued down as heirlooms are products of the establishment of Jacob Bennett & Son. Many fine pieces of jewelry have been

turned out for leading retail and wholesale houses by the firm.

While regarded as a man of business all his life, Mr. Bennett was also known as a most companionable man, genial, warm-hearted and ever courteous. He seemed to thoroughly enjoy life and was a member of the Union League, the Vesper Boat Club and the Jewelers' Club. He had served throughout the Civil War in the 119th Pa. Vol. Inf., and was a member of Post 1, G. A. R.

Deceased is the last of his race. He is survived by a widow, but leaves no children or near relatives. The funeral services were held Saturday from the Bartram, an apartment house at 33d and Chestnut Sts., where Mr. Bennett made his permanent home. Interment was private. Many representative members of the trade attended the funeral.

It is not yet known what disposition will be made of the business. An immense stock of valuable gems is carried by the firm. H. D. Hughes, who has been connected with the firm for 32 years and who has long been the right-hand man of Mr. Bennett, will, for the time, continue the business. He is assisted by Joseph H. O'Malley.

The firm of Jacob Bennett & Son was established in 1828 in Carter's Alley, near 4th and Chestnut Sts., at that time a fashionable shopping section. It was moved to 326 Chestnut, thence to 712 Chestnut, to 108 S. 8th St., to 925 Chestnut, and finally to 1024-26 Chestnut St. Most of the employes have been with the firm all their lives.

**Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.**

WASHINGTON, D. C., Aug. 26.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

- Auckland: 55 cases clocks, \$772; 7 cases plated ware, \$576.

- Buenos Ayres: 3 cases plated ware, \$284.
- Bocas del Toro: 2 cases watches, \$442.
- Calcutta: 4 cases clocks, \$119; 3 cases jewelry, \$325.
- Callao: 2 cases jewelry, \$180.
- Cape Town: 3 cases plated ware, \$196; 64 cases clocks, \$1,617; 4 cases jewelry, \$252.
- Chaux de Fond: 3 cases watches, \$150.
- Havana: 6 cases clocks, \$216.
- Havre: 2 cases plated ware, \$1,684; 1 case watches, \$150.
- Jaffa: 12 cases clocks, \$105.
- Lancaster: 4 cases clocks, \$145.
- Limon: 2 cases plated ware, \$163.
- Liverpool: 1 case jewelry, \$500; 3 cases thermometers, \$451; 1 case jewelry, \$450.
- London: 39 cases clocks, \$1,558; 4 cases watches, \$690; 6 cases optical goods, \$200; 1 case jewelry, \$485; 2 cases thermometers, \$125; 15 cases clocks, \$391; 1 case jewelry, \$120; 1 case plated ware, \$125; 1 case silverware, \$250.
- Matanzas: 15 cases clocks, \$188.
- Melbourne: 10 cases plated ware, \$232; 62 cases clocks, \$442; 6 cases optical goods, \$1,200; 20 cases plated ware, \$2,563; 49 cases clocks, \$935; 6 cases thermometers, \$160.
- Para: 1 case jewelry, \$168; 1 case optical goods, \$245.
- Rangoon: 11 cases clocks, \$281.
- Rio de Janeiro: 71 cases clocks, \$969.
- Savannah: 2 cases silverware, \$151; 4 cases clocks, \$130.
- Sheffield: 7 barrels jewelers' sweepings, \$4,400.
- Southampton: 1 case optical goods, \$298; 11 cases watches, \$1,200.
- Tampico: 2 cases plated ware, \$198.
- Vera Cruz: 12 cases clocks, \$252.

**Death of James W. Fuller.**

LOS ANGELES, Cal., Aug. 26.—Jas. W. Fuller, a pioneer jeweler and optician of this city, died here a few days ago at the age of 74 years. Dr. Fuller came here 24 years ago, and is said to have been the first optician who established business in this city. He was actively engaged in business at his store, 203 N. Main St., almost up to the very day of his death, having been at his store on Tuesday, and passed away on Thursday following.

At the time of his death Mr. Fuller was the oldest man in the jewelry business in this city. He was highly respected by all

THE LATE JAMES W. FULLER.

who knew him, was a man of intelligence and integrity, and leaves many friends to mourn his loss. He is survived by a widow, a daughter of 18 years and a son eight years old. His business will be continued by Dr. Benj. F. Royer, who has been with Dr. Fuller for two years past.

**Isthmian Canal Commission Solicits Bids to Supply Various Articles.**

WASHINGTON, D. C., Aug. 27.—The Purchasing Agent of the Isthmian Canal Commission is calling for proposals until Sept. 4, for one stop watch, standard make, in nickel hunting case. Cuts and full description will be required with the bid.

The Purchasing Agent is also inviting proposals until Sept. 14 for 12 watchmen's watches, 24-hour movement, portable, with keys and station boxes for 16 stations, closed face and 12-hour dial. Cuts and descriptions will be required with the bids.

The retail jewelry store of W. M. Weed, Lake Mills, Ia., was recently entered by burglars, who carried off all the jewelry of any value that had been left in the show cases during the night. The safe was untouched. There is no clue.

## Safe Blowers Confess to Newark Police.

Three Burglars Charged with Looting Many Stores May Plead Guilty—Head of Gang Gives Newark Jeweler Advice as to Protection of His Safe.

NEWARK, N. J., Aug. 31.—George alias "Empty" Williams, Martin Tiffany and Edward Vaughn, the three "yeggmen" held for bold breaks and safe breaking operations in this State, and implicated in grave crimes in New York, will appear Friday before Judge Davies in the Court of Special Sessions. They declare they will enter pleas of guilty. At present each one is held in default of \$3,500 bail ordered in the City Precinct Court. The charges against them will be carrying burglar tools, breaking and entering the building at the southeast corner of West Park and Broad Sts., robbing the offices of three concerns in the Kremlin block, 870 Broad St.

Williams, the brains and leader of the gang, has made startling and interesting statements and confessions since his incarceration. He has not told anything the police might not have found out for themselves in time, but he has saved them weeks of effort and has proven an instructive asset at headquarters.

While he is said to have withheld a direct confession, he is at the same time reported to have made statements which only implicate him in the break at the depot of the Iver Johnson Co., dealers in sporting goods; R. H. Ingersoll & Bro., and the Diamond Pen Point Co., all in New York. The Iver Johnson robbery netted its perpetrators \$5,000, the Ingersoll, \$2,000, and the pen company larceny involved gold in rough and finished state to the value of several thousands.

Goods confiscated at Williams' home indicate his probable connection with breaks at the New Jersey Handkerchief Co.'s plant, 20 Market St., Dec. 14, 1907; from the John H. Bahre & Bro. establishment, at 313 Market St., Jan. 17, and possibly the robbery some time ago at the store of Tiffany & Co., in New York.

Williams admitted that he entered the building of Aaron Ward & Sons, provisioner, for the purpose of arranging to cut through the wall and penetrate to the interior of the store of Joseph Wiss & Sons, dealers in jewelry, cutlery and silverware, at 83 Broad St.

Frederick C. Wiss, of the firm whose store the trio planned to loot, called at police headquarters, and had a long talk with Williams. Mr. Wiss explained to the burglar that as his store was protected by every modern device against burglars, he was anxious to know how Williams and his party had proposed to do their work. The talk convinced Mr. Wiss that their plans would have carried except that some street wiring might have intercepted the safe-breakers when they least expected it. Williams referred to buildings he had entered, and said that a practical knowledge of electricity had enabled him to overcome many more obstacles than were apparent at the Wiss store.

"I would advise you," Williams declared to Mr. Wiss, "to guard your building better on the sides. Your wiring is horizontal and should be perpendicular. One good

scheme that has caused the 'cops' to 'come in' on us was the use of a stool or chair on a button, which connected with the alarm. A fellow will think nothing of moving a stool or chair."

Williams admitted he had not satisfactorily located the safe to tamper with the wiring, and, despite what he told the detectives at the outset, he declared that his plans were to cut through the wall in the building he entered and in this way keep clear of the wires.

"You had better make some improvements," was Williams' parting remark to Mr. Wiss.

The police recovered at the Market St. station of the Pennsylvania Railroad a bag left there by Williams and his associates, preparatory to attempting the Wiss break. It had been handled about rather carelessly at the station, and when the police officers called for it the check-room clerk bumped it hard down on the counter. At headquarters it was found to contain enough dynamite to blow the big passenger station into the air, if properly applied. With it was a full kit of tools.

Williams opened his heart to the police to the extent of showing how all the various devices were used. He rigged up the safe at headquarters all ready for blowing, and even went to the point of adjusting the dynamite cap.

As the circumstances of the arrest of the gang come to light, together with the past movements of the police on their trail, the glory which at first shone about the heads of the New York detectives has waned and finally vanished, and whatever satisfaction there is from the catch is found to belong exclusively to the Newark officers. It has been learned that the New York detectives suspected the trio, and followed them for three months, seeking to bring them down, and in no case taking the local authorities where they went into their confidence, even when the trail led through two or three New England States and into New Jersey. Their plans are unofficially declared to have been to trail the gang till it could be caught operating in New York. Meantime, breaks were committed with seeming impunity elsewhere.

The men were caught only when the Newark police, ignorant of the presence of the gang, discovered the New York detectives in the city and demanded to be taken into the campaign. Instead of consenting to continue the waiting game the Newark detectives went after the trio at once. The three were about to begin their attempted break at the Wiss jewelry store. Williams strolled into Military Park to wait while one of the others went to the station and brought the tools.

Instead of allowing the three men to get inside and lay out their tools and nitroglycerine, and then be captured by a blood-thrilling dash by the New Yorkers, as the detectives from that city first gave it out to the papers, the facts were materially different. A New York detective was sent off to

catch Tiffany, while two Newark detectives went after Williams and Vaughn. The two Newark men were successful, Williams being taken in the park and Vaughn on the street. The New Yorker assigned to Tiffany allowed the latter to escape to Brooklyn, where he was later captured.

The Newark police have received from Superintendent Cornelius V. Collins, of the Albany bureau of identification, the official criminal records of the three prisoners. Williams served his first term in the Connecticut State Prison, from 1884 to 1885. Between 1886 and 1889 he served a second term there. On Sept. 25, 1903, he was given two years in the Kings County Penitentiary in Brooklyn, and Nov. 23, 1896, was sentenced to 10 years in Sing Sing. Tiffany served two and a half years for burglary in Elmira. Vaughn served three terms in the Connecticut prison, where he formed the acquaintance of Williams.

Albert Rosenthal, who lives at 142 E. 83d St., and has a jewelry store at 49 New Chambers St., New York, was brought to police headquarters, Tuesday of last week, because he had bought a watch from Williams. The watch was identified as the property of a Newark man. The police searched Mr. Rosenthal's store and took to headquarters a quantity of jewelry on suspicion that some of it might be included in the articles stolen by the members of the Newark gang. Mr. Rosenthal was held for examination.

### Death of David Francis Haynes.

BALTIMORE, Aug. 29.—David Francis Haynes, founder of the pottery firm of D. F. Haynes & Son, died Aug. 24, of paralysis of the spine, aged 73 years. Mr. Haynes' first connection with the pottery business was as a jobber with Ammidon & Co. In 1876 John P. Ammidon retired and Mr. Haynes organized the firm as D. F. Haynes & Co. In 1895 he admitted his son, Frank R. Haynes, under the present firm name. The firm began to manufacture pottery in 1885, having previously done a jobbing business.

Mr. Haynes was married three times. His last wife and four children survive him.

The will was filed last Friday, showing an estate valued at \$124,091.75. The deceased made liberal allowances for his surviving relatives and also the Home and Foreign Mission boards, without mention of religious denominations.

### A. C. Stephens, Anniston, Ala., Becomes a Voluntary Bankrupt.

ANNISTON, Ala., Aug. 31.—A. C. Stephens, 1011 Noble St., filed, Aug. 27, a petition in voluntary bankruptcy in the United States court. The liabilities are about \$5,600, of which \$1,600 is due on notes secured by real estate. The property includes the stock of jewelry, cut glass, stationery and optical supplies valued at \$2,000; seven show cases, \$100; two wall cases, \$40; one safe, \$60; tools, \$10; real estate, \$1,900; accounts due, \$300.

Mr. Stephens has been conducting the store in this city for several years.

M. Musgrave, Twin Falls, Idaho, has sold out to C. D. Anderson.

**Death of George Brabrook.**

TAUNTON, Mass., Aug. 31.—George Brabrook, for upward of 50 years identified with Reed & Barton in the silver manufacturing business and widely known to the jewelers in all parts of the country, died Aug. 26 at his home in Spring St. Mr. Brabrook was one of the most prominent citizens in this community, and his death will be deeply regretted.

The following sketch of his career was prepared from facts furnished by friends:

George Brabrook was born in Acton, Mass., Aug. 9, 1828, son of Joseph and Sally Adams Brabrook. He came of the sturdy New England stock of that town which furnished many minute men at the outbreak of the Revolution. Indeed, it was emphasized a century ago, in a popular saying, that the battle of Lexington was fought at Concord by Acton men.

He attended the town schools and resided at home on his father's farm until he was 21. Then he studied civil engineering, supposing it would be his life work, but was on the point of taking a place on a railroad for engineering work, but his elder brother, Alonzo, bookkeeper for Reed & Barton for many years, sent for him to come to Taunton and begin work as shipping clerk. This was in 1850, and since that time Mr. Brabrook has been identified with Taunton interests. His brother began work with Reed & Barton in 1837, and continued in the service for more than 50 years.

George Brabrook soon showed his capacity for work and good commercial judgment, and his advancement was steady. In 1858 he became a member of the firm and was added to the financial side of the business. After the incorporation, in 1888, his position was that of treasurer, and he handled the vast financial matters of the house until the sale of his interests a year or two ago. Since then he had lived in retirement.

Mr. Brabrook was a quiet, undemonstrative man, who never took an active part in public or social affairs. He was engrossed by the details of a large business, and to them he gave his undivided attention, and the upholding of the Reed & Barton works from moderate dimensions was due in great measure to his sagacity and indomitable energy for the work which occupied his mind and his mind for nearly 60 years. He was the last of the partners who built up the business and put long years into the work.

Mr. Brabrook entered business life as a clerk and finished nearly an octogenarian, leaving behind him a record for integrity and an innate sense of responsibility which in itself is a priceless legacy to his descendants. He had all the qualities of mind and character, and his willingness to give himself unsparingly to the tasks before him that would have been an assurance of success in any field he chose for his life work. He was one of the gallant army of young men which New England has produced on its farms, who, with nothing to back them but their own ability, integrity, capacity and willingness to labor, overcame all obstacles and pushed themselves upward to commanding positions in the business world, rounded out their lives with successful labor and passed away leaving no blot on their good names, respected

and regretted as citizens, friends and neighbors.

Mr. Brabrook married in 1860 Eliza Hale Knowles, of Boston, who died several years ago. Two sons survive him, Carleton and George Hale Brabrook.

The funeral took place at 2.30 o'clock Saturday.

-----

**Creditors of Franklin W. Sackett Meet at New York—His Assets Nominally Above His Liabilities.**

The affairs of Franklin W. Sackett, a wholesale jeweler of 59 Maiden Lane, New York, against whom an involuntary petition in bankruptcy was filed recently, are in process of being straightened out, and negotiations are now pending looking to a settlement with creditors that will obviate his going through bankruptcy.

A meeting of the creditors, called by the debtor's attorney, Walter T. Kohn, was held at the office of Mr. Kohn, 309 Broadway, New York, on Thursday last, at which the bulk of the merchandise indebtedness was represented by those who attended. Marshall D. Hagar, the receiver named by the Bankruptcy Court pending the adjudication of the involuntary petition which had been filed against the debtor, was also present, and gave to the creditors the result of the inventory he had made of the estate. In his statement the stock was taken at net cost, and though the figures were made up from cursory examination of the books, they were essentially correct.

In general, Mr. Hagar's figures showed that the liabilities amounted generally to \$52,686 and of this the claims of merchandise creditors amount to \$50,725, the rent \$400 and back salaries of employees about \$1,208. The assets amount to nominally about \$54,500, in which the stock was valued at \$36,400; the fixtures (at cost), \$2,685; equity in notes pledged at banks, \$3,000; good accounts receivable, \$11,047; notes receivable, \$225, and doubtful accounts, \$1,101. In addition there was some merchandise of \$354 just received, memorandum goods of \$708; memorandum goods not yet placed in stock, \$1,279, and also some articles of which it was not known whether they were memorandum.

Mr. Kohn, speaking of the debtor, explained that his failure was an honest one in every way, and accounted for the difference between this statement and the one Mr. Sackett had made in January by showing that it was due to losses through bad accounts and heavy business expenses. Mr. Kohn explained that there was a contingent liability to bank on customers' paper discounted, of \$16,000, on which \$13,000 had been borrowed, making up the \$3,000 equity mentioned in the receiver's figures.

While no definite proposition made on behalf of the debtors was acted upon, the question of a 50 per cent. settlement which had been recommended by the Providence creditors, was taken up, and some of the New York creditors raised objection to the consideration of any such amount inasmuch as Mr. Sackett had originally gone before the Manufacturing Jewelers' Board of Trade of Providence, with the idea of simply getting an extension and his creditors in that city had suggested the 50 per cent. settlement instead. Some of the creditors

who objected suggested that the debtor pay 75 per cent. based on the showing which the receiver made.

It was decided to appoint a committee to investigate affairs more thoroughly, ascertain the present business settlement for adjustment which would be made and report back to the creditors. The committee appointed by the chairman, Alfred Krower, of Albert Lorsch & Co., consists of E. L. Spencer, of E. L. Spencer & Co.; Mr. Woodhull, of Mount & Woodhull; David Mayer and Charles N. Gray, of the Jewelers' Board of Trade. They met Monday and will report the result to a meeting of the creditors to be held to-morrow.

-----

**New York State Board of Examiners in Optometry Organize at Albany.**

ALBANY, N. Y., Aug. 29.—The New York State Board of Examiners in Optometry, organized Aug. 26, elected C. F. Prentice, New York, president, and W. W. Bissell, Rochester, secretary. The other members of the Board of Examiners are: H. C. Watts, Syracuse; George R. Fox, Buffalo, and P. B. Marchant, Brooklyn. Charles F. Wheelock, chief of the examination division, represented the State Education Department at the meeting.

The examiners prepared a blank which must be filled out by all optometrists who wish to obtain certificates exempting them from examination. Those who have practised two years are entitled to certificates of exemption. The blanks may be obtained by writing to the State Education Department at Albany.

The examiners will hold another meeting about Oct. 1 to prepare blank forms of application for examination. It is said that many who are entitled to exemption certificates will obtain them and will also undergo the examination in order to qualify in both ways, for practice.

-----

**P. J. Koke, Grand Rapids, Mich., Gives a Trust Mortgage to Secure Creditors.**

GRAND RAPIDS, Mich., Aug. 29.—P. J. Koke, a jeweler of this town, has given a trust mortgage for \$20,000, naming as his trustee Henry A. Schuil and specifying creditors with claims amounting to the entire mortgage. This is equivalent to a trust deed and indicates that the liabilities will be somewhat more than the amount specified.

Mr. Koke is well known in Grand Rapids, as he is a native of this town. From 1895 to 1897 he was employed in the jewelry business in Chicago, but came back to Grand Rapids then and worked for D. L. Thompson. He started in a small way in 1898 and gradually increased his business until recently he had carried quite a large stock. He was operating under an extension by his creditors, under which terms he was to pay five per cent. monthly, beginning with September, until Jan. 10, 1910, paying 10 per cent. in January next and 15 per cent. in January, 1910. Whether the filing of the trust mortgage will be followed by bankruptcy proceedings is yet to be determined.

A. L. Putnam, Provincetown, Mass., has sold his business to F. H. Dearborn.

 at 72 Fifth Ave. Mr. Carstensen recently

completed a course in optometry in New York.

Lewellyn A. Wenster, formerly with C. N. Quimby, optician, Boston, Mass., has started in business in the Paddock building, at Tremont and Bloomfield Sts., Boston.

A. Peabody & Co. were recently incorporated in Chicago, Ill., to deal in jewelry, with a capital stock of \$10,000. The incorporators were: A. Peabody, L. C. Guppert and W. Friedman.

The Lee-Dodd Co. has been incorporated in Newark, N. J., with a capital of \$10,000, to manufacture jewelry. Among the incorporators are: W. A. Lee, Harry K. Dodd and D. E. Ellenberger.

G. L. Gunther, formerly of Gunther & Karshner, Bellevue, O., opened a jewelry and optical store at Canon City, Colo., Sept. 1. Mr. Gunther will also retain interest in the Bellevue store as before.

The MacFarland Mfg. Co., Bridgeport, Conn., last week filed a certificate of incorporation to engage in the manufacture of silver plated ware. The capital stock is \$50,000, of which \$2,000 has been paid in. The incorporators are F. H. MacFarland, J. R. Burnes and E. M. MacFarland. The firm contemplates erecting a new building 800 by 50 feet, on State St., near Fairfield Ave.

**Men Connected With "Rogers' Silverware Co." Held for United States Grand Jury at Boston.**

Boston, Mass., Aug. 29.—Eugene M. Richmond and George M. Rogers, the two men arrested last week on the charge of using the mails with intent to defraud, were held for the United States Federal Grand Jury after the preliminary hearing before United States Commissioner Hayes on Aug. 25 and 26.

The witnesses included E. C. Orin, a boy who "solved the puzzle" and got some cheap silverware "as a prize," on payment of \$1.35; George Lund, the tailor, who has a room in the Studio building at 110 Tremont St., near Bromfield St., where the "Rogers Silverware Co.," as they styled themselves, had headquarters, in Boston; William Prouty, a Worcester printer, at whose place in that city they were said to have received mail also, and several post-officials.

Richmond's bail was reduced to \$500, but that of Rogers was continued at \$2,000, as at first.

**Market Prices for Silver Bars.**

" 28.....	23 11-16d.	.53 1/4
" 29.....	23 5-8d.	.53 1/4
" 31.....	23 5-8d.	.53 1/8

An automobile owned and driven by Edward C. W. Reith, 1516 Michigan Ave., Detroit, Mich., was struck by a fire engine at the corner of the Boulevard and Baker St., recently, and Mr. Reith and several other occupants received slight contusions and suffered from shock. None of the injuries was serious.

**Noble Order of Ku Kus Start a Nest in Philadelphia.**

PHILADELPHIA, Pa., Aug. 31.—The enthusiasm displayed during the recent optical convention over the secret society that was started about a year ago in the Central West took definite shape when a local Nest was started in Philadelphia on Aug. 25. Following a circular notice sent out by several of the wholesale optical houses, the first nesting was held at Odd Fellows' Temple on Tuesday evening.

About 28 were elected to membership and the organization permanently shaped, officers being elected as follows: King, Dr. George W. Hales; prince, Christian L. Bauer; chief, W. P. Sagebiel; keeper of cash, Ed. P. Woodruff; guard, Charles Bose; scratcher, L. A. Breitingner.

The name of the local order will be Philadelphia Nest No. 8, Noble Order of Ku Kus. The new officers were duly installed by the First Grand King, A. L. Thoma, of Piqua, O., of Nest No. 1, who had journeyed hundreds of miles to be present on this occasion. In order that as many as possible of the local opticians and jewelers could become charter members of the Philadelphia Nest, it was decided to keep the charter open for 60 days. Any members of the trade who wish further information regarding the order, or who would like to join it, should communicate with the secretary, Louis A. Breitingner, 628 N. 5th St., Philadelphia.

**Death of C. W. Bixler.**

EASTON, Pa., Aug. 31.—C. Willis Bixler, one of the most widely known business men in this city, died this morning, aged 62 years. He had been in poor health for two years. Mr. Bixler in 1879 succeeded to the jewelry business established by his grandfather, Christian Bixler, in 1788. The firm is to-day C. W. Bixler & Co., and its store is at 358 N. Hampton St.

Christian Bixler, the founder of the business, was the most famous eight-day clock manufacturer of his day, and some of his clocks are still in use, being among the most high-priced and valued of old-fashioned grandfather's clocks to be found hereabouts.

C. Willis Bixler died in the house in which he was born, his father having owned it, and the property having been in the Bixler family for 138 years. The funeral takes place there at 3.30 P. M., Thursday.

One of the prettiest catalogues of clocks ever published is that of the Sessions clocks, now being sent to the trade. It shows the various lines in natural colors. Particular attention is directed to an entirely new line of solid mahogany cases with inlaid scenes in colored woods, which while very rich and attractive in appearance and made of the genuine wood, can be sold at a moderate price with good profit. The Chippendale eight-day cathedral gong, half-hour strike, in polished solid mahogany cases with genuine inlaid panel and gilt top ornament, is a clock that appears to be worth a great deal more than the price charged. These lines are distinctly for the jewelers' trade, and every dealer should have a copy of this catalogue, which will be forwarded upon application to the Sessions Clock Co., Forrestville, Conn.

# REPOUSSÉ WORK AND CHASING\*

ILLUSTRATED AND DEMONSTRATED BY AN EXPERIENCED ARTISAN

(Continued from issue of Aug. 12.)

It should be noted that in the case of this bowl (as well as in most cases where the edge is left unprotected without the addition of a wire or moulding) the edge could be thickened to about size 20, Shake-gear gauge. This materially strengthens the bowl, and if (as in this case) it is used for drinking purposes makes it far more pleasant to drink from than a bowl with a thin, knife-like edge. To obtain this thickening towards the top, the edge should be beaten from the top, driving it downwards, and at the same time spreading it. This could always be done after each course of "raising," when the bowl is in a hard and "ringy" condition. If attempted immediately after an annealing, the bowl will probably be distorted, as the sides have not sufficient resisting power.

a little for fitting into the boss, they are about an inch deep. For each part a circular piece of metal  $2\frac{1}{8}$  inches in diameter will be required. It need not be quite so thick as that used for the bowl, as a strong moulding is soldered on one end, while the other end is let into the boss. The "raising" process is practically the same as that of the bowl, but a smaller anvil or stake will have to be used to allow the bottom, which in this case is only an inch across, being formed.

Another point to notice is that, as the collet spreads very much towards the top, there is no need in the early stages to hammer right up to the edge of the metal, as was the case with the bowl. After it has been beaten into a shallow cup a circle should be struck just over an inch wide, and from this line the metal should be beaten

by beating it back from the inside on a sandbag, or, where this is impossible, by stretching it on the anvil with a hammer. In the latter case the shape must be held firmly and squarely on the anvil as for planishing (not at an angle) and struck with the hammer, always working round and round until the metal has stretched to the proper size.

After the two collets which form the stem have been shaped up and planished, the bottom ends (that is, the ends from which the metal is beaten upwards in the raising process) can be cut off with a fretsaw and filed up true. These ends, which are now open like the top or larger ends, will eventually be fitted into the boss. The larger end of each collet should also be filed up true ready for the moulding to be soldered on at a later stage.

### THE BOSS.

The boss is easier to make in two halves, although, with skill and patience, it is possible to make it in one piece, drawing the metal up from the bottom and over on a small bent tool or anvil. If made in two halves they should be equal in size, the

A.—SECTION THROUGH LOWER PART OF COMMUNION CUP. THE DIFFERENT PIECES ARE DRAWN SLIGHTLY DETACHED TO SHOW CONSTRUCTION. 1, 2, 3—SHOWING DIFFERENT STAGES IN THE PROCESS, OF RAISING ONE OF THE STEM PIECES, THE BOSS HALVES AND THE BASE.

The smoothing, or "planishing," of the bowl should be done well enough to allow it eventually being polished without having previously to file and stone over the whole surface, as the marks left by the planishing hammer give a far better quality to the surface when polished than the glass-like appearance which results from polishing a large surface which has previously been filed and stoned over.

### MAKING THE COLLETS.

After the bowl has been planished, the other parts of the eup which have to be raised should be taken in hand. The two parts, one below and one above the boss which form the stem of the eup, are somewhat similar in shape to the bowl, although they spread out much more at their widest part. They measure about one inch across at the point where they fit into the boss, spreading out to  $2\frac{1}{2}$  inches, and, allowing

in and up on the small anvil (the end of which should not be more than three-fourths inch across) with a raising hammer rather smaller than that used for the bowl of the cup, leaving off when about five-eighths inch away from the edge. When annealed it can be taken in a little more at the bottom, but as the top edge is neared the shape should be held down more firmly on to the anvil, as in "planishing," while the hammer is also brought over more and more until the metal is struck with its full face. This process is repeated until the required shape is obtained.

The sketch showing the different stages in the shaping of this collet will, it is hoped, assist in explanation. When absolute exactitude in the shape of a bowl or collet is desired, it is advisable to cut out a template to work to. This is best made by taking a tracing of the piece required, pasting it onto a thin sheet of metal, and then cutting out the shape with a fretsaw. If in the process of raising the shape has at any point become too small, it can be remedied either

division being horizontally through the center of the boss, which measures about  $1\frac{7}{8}$  inches across. For each half a circular piece of metal  $1\frac{7}{8}$  inches in diameter, about size 12 or 14, is required. They can then be beaten out on a wooden block to almost the right shape and finished on an anvil, somewhat like those previously used for raising the other pieces on, but with the end rounded off rather more. Care must be taken that both halves are exactly the same size, so that when the edges are filed flat they fit perfectly together and form one continuous line. Before the two halves are soldered together the openings should be cut in each for the collet pieces to be fitted into afterwards. A circle should be struck with the dividers the exact size of the collet, a hole drilled well inside the line for the piercing saw to pass through, and then the piece can be cut out, keeping well inside the line so as to allow of the opening being trued up with the file without its becoming too large. Before soldering the edges should be thoroughly cleaned and

ngthened with a coarse file, so as to insure a sound joint. Before tying with binding wire, both edges should be well boraxed, and the hardest possible solder used for fusing the two halves together.

#### THE BASE.

For the shaped piece forming the base, directly beneath the stem piece and moulded, a circular piece of metal, about  $3\frac{1}{4}$  inches in diameter and size 12 or 11 Shake-are gauge will be required. This, as the other pieces, is roughly hollowed out into a shallow cup on a wooden block and then finished on the anvil from the outside with a hammer. The essential point of difference between the vase and the other raised pieces which have so far been discussed will be noticed on referring to the sketches. The outline of the base is composed of a flange and a hollow, while the other pieces have only the one or the other, but not both. In working this piece on the anvil to commence in exactly the same way as with the bowl and the two halves of the vase, beating it up in a gentle curve to the edge of the metal. It can then be placed, edge downwards, on the bench or large flat-anvil, and the hollow gently tapped in with a collet hammer. (The face of this hammer should be oblong and slightly domed, not quite flat.) When the hollow has been set in this manner, it can again be taken to the anvil and the whole carefully planished over.

#### THE RIM.

The rim on which this shaped piece is to be soldered must now be got ready. As it forms the extreme bottom of the cup and is strengthened by a wire or a moulding in any way, it is best made out of a thick piece of plate, about 16 or 17 Shakespeare gauge. It measures  $3\frac{1}{2}$  inches across; this, when the shaped piece is soldered on, giving one-fourth inch step all around. When this has been cut out, an inner circle, measuring  $2\frac{3}{4}$  inches, should be struck with the viders and cut out; this will leave a rim about three-eighths inch wide. The edge of the shaped piece should now be trued up with a file, and it can then be soldered onto the rim. In order to keep it in its right position while soldering onto the rim, it is advisable before tying on with binding wire to place it accurately in the center of the rim and scratch a line right around at the point where the edge of the shaped piece rests on the rim. The shaped piece is then taken off and at intervals of about three-fourths inch a number of tiny points or beads of metal are thrown up all around the scratched line on the rim. These points are thrown up by cutting with a graver or bitsticker in a straight line across from near the inside edge of the rim to the scratched line (a distance of about one-eighth inch). Beginning very gently, it is necessary to cut deeper as the line is neared, leaving off abruptly on the line, and not allowing the cut to die away. Before removing the graver from the cut, the point of metal in front of the graver is gently pushed up by using the graver as a lever in an upward direction—that is, holding it at a greater angle away from the rim than during the cutting. To throw these points or stitches up successfully they must be made with one clean cut; if a number of strokes are attempted, they become very weak.

The shaped piece when dropped between these points and firmly tied down with binding wire will be quite secure, and the danger of its moving out of truth during the soldering will be avoided. When soldered, the stitches can be removed with a file or raffle.

W. S.

(To be continued)

### News Gleanings.

Chester M. Snyder, Colfax, Wis., has removed to Glenwood, Wis.

J. E. Nutt, Lemont, Ill., has been succeeded by Bernard H. Seeliger.

R. W. Phipps has purchased the business of T. A. Robinson, Monticello, Ky.

The disappearance is reported of J. M. Bolding, a jeweler, of Longmont, Colo.

Wright Bros., Coshocton, O., have dissolved, Melvin B. Wright continuing alone.

C. A. Peabody, Argos, Ind., has sold out to Lester R. Ralston, Culver, Ind., who will remove to the former place.

Cleary & Hare is the firm style of the business which was heretofore conducted by William P. Cleary, Odell, Ill.

Alfred P. Lahmer, San Jose, Cal., has admitted a partner into the business, making the firm style Wehinger & Lahmer.

B. F. West and R. A. West, both in business at Dardanelle, Ark., have consolidated under the firm style of R. A. West & Son.

J. H. Rutroff, Pikeville, Ky., has admitted his son into the business, and the firm style will hereafter be known as J. H. Rutroff & Son.

Mr. De Long, who formerly conducted a watchmaking school at Dallas, Tex., has accepted a position with Hutchinson Bros., Shreveport, La.

It is reported that William Mosby, Newport, Ark., is offering a settlement of 50 cents to its creditors, 15 cents in cash and the balance in notes.

In the store of Thomas A. Brown, Quincy, Ill., were displayed, recently, several medals and trophies which were won by members of the South Side Boat Club, of that city.

Burglars recently broke into the store of H. Pinel, Montreal, and stole about \$1,000 worth of miscellaneous stock, including watches, rings, bracelets, etc. There is no clue.

S. M. Snider, who bought out his partners in Snider, Byrd & Co., Durham, N. C. two years ago and has since been conducting the business alone under the old style, began Sept. 1 under his own name.

The Radius Jewelry Co., which now has stores in New Orleans, La., and in Atlanta, Ga., on Sept. 15, will open a third store in Chattanooga, Tenn. The concern's quarters will be at 722 Market St.

M. J. Gillespie, formerly of 3 Main st., Fitchburg, Mass., recently held a successful clearance sale prior to his removal to new quarters a short distance from his former location and on the same street.

The retail jewelry store of G. W. Custer, Du Bois, Pa., was flooded one night recently, owing to an overflow of water from a pipe in the apartments immediately above the store. The damage done was slight.

J. E. Thompson, Glens Falls, N. Y., is displaying in his window an interesting relic of the Revolution in the form of a flint lock musket which was made in England. It bears the mark of the English

King George III., and the English coat-of-arms is on the stock.

A fire last week started in the premises occupied by the jewelry store of the Cousins-Carrel Jewelry Co., Bessemer, Ala., but was extinguished before making much progress. The loss is fully covered by insurance.

Three negroes recently broke into the jewelry store of J. Owens, who has quarters jointly with T. J. McMichaels & Co., in Dekalb, Tex. The intruders were apprehended and are now in jail. All the loot was recovered.

J. H. Hammond, who entered a Chinese jewelry store at 903 3d St., Sacramento, Cal., a short time ago and stole several watches, has been sentenced to two years' imprisonment at Folsom. The accused pleaded guilty to the charge of burglary.

An attempt was made recently to rob the Hoffman Jewelry Co., at 78 N. High St., Columbus, O. The burglar, who claimed that he was an electrician and showed a badge to that effect, was seen by a watchman, who was not satisfied with his explanation and chased him out of the building. Nothing was taken and the police were notified.

Charles Wiltke, 915 Elizabeth Ave., Elizabeth, N. J., has the sympathy of the trade in the disappearance of his 15-year-old son Charles. The boy has not been seen since Sunday, but his hat and shoes have been found by searchers on the long bridge between Elizabeth and Bayonne. It is believed he went in bathing while alone and succumbed to cramps.

C. B. Engel, A. E. Rogers, A. L. Schiller and Max Gross, of Scranton, Pa., who were recently arraigned on a charge of conducting a pawn brokerage business without a license, have been adjudged guilty and fined \$100 each. They immediately took an appeal and claim that since their licenses have expired they have purchased articles outright from individuals, which proceeding, they aver, took them out of the class of pawnbrokers.

F. C. Rivoire, Napoleonville, La., who was appointed administrator of the late Albert W. Susen, the jeweler who disappeared in El Paso, Tex., and later worked under the name of Albert W. Stegna, in Napoleonville, where he died, has paid all the debts of the estate in Louisiana and turned the balance over to the referee in bankruptcy at Texas, appointed in the proceedings brought against Mr. Susen when he disappeared.

From Paul Faison, of the Faison Jewelry Co., Florence, Ala., against which firm an attachment was recently issued, as noted in the last issue of THE CIRCULAR-WEEKLY, we learn that the trouble was due not only to general financial conditions, but to the fact that Mr. Faison's wife had been ill with typhoid fever, and this necessitated his absence from the store to such an extent that his business suffered greatly. Mr. Faison claims that the attachment would not have been issued but for the fact that one of the complainants had recently bought the building and wished to force him out, as well as buy his fixtures at a bargain. He says the Faison Jewelry Co. will discontinue business until the company obtains a suitable location, and will probably resume business in Montgomery or Troy, Ala.

## Providence.

George Southwick left, last week, on an extended western trip for Payton & Kelley Co., of this city.

J. Perry Carpenter, of Ford & Carpenter, has returned from a vacation spent at Clifton Springs, N. Y.

Mr. and Mrs. Horace F. Carpenter have been registered at Revere Beach, Mass., during the past week.

Samuel Moore, of Samuel Moore & Co., is with his family on the old homestead, at Falmouth, Cape Cod, Mass.

The O. C. Devereux Co. started last week on a nine-hour schedule, with practically a full complement of workmen.

Julius Palmer has been appointed by the Municipal Court as executor of the last will and testament of John S. Palmer.

Henry E. Smith, treasurer of the United Wire & Supply Co., has returned from a two weeks' visit to Worcester and vicinity.

Henry W. and Harry B. Little, of Little & Co., are camping out at Bay Side, on the shores of Narragansett Bay for the Summer.

Nephtalie Levy, importer and dealer in imitation and precious stones in this city, has returned from Atlantic City and other resorts.

The Irons & Russell Co., 95 Chestnut St., reported to the police, last week, that a lead tread had been stolen from the stairway of their shop.

William W. Ferris, optician of this city, is furnishing a series of optical talks in the local newspaper at Westerly, where he has a branch store.

Harold W. Ostby, superintendent of the Ostby & Barton Co., and wife were among the guests at the Hotel Mathewson, at Narragansett Pier last week.

Philip Linton, president and treasurer of the P. & A. Linton Co., and his wife are at the Kearsarge Hotel, North Conway, in the White Mountains, N. H.

Peter Lind, treasurer of the T. W. Lind Co., manufacturers of jewelers' findings, has returned from a vacation trip to his early boyhood home in Scotland.

Retail jewelers, with other merchants of Woonsocket, have entered into an agreement to keep open only two nights a week, Wednesday and Saturdays.

Hamilton & Hamilton, Jr., report that their factory is as busy now as it ever was and that they will probably have to begin working nights in the near future.

George A. Forsyth, past department commander of the Rhode Island, United Spanish War Veterans, was one of the delegates to the National Encampment at Boston this week.

Benedict Lederer, of the S. & B. Lederer Co., purchased a valuable tract of land, containing 25 acres, on the Ocean road at Narragansett Pier, last week, at auction for \$2,300.

Everett L. Spencer, of the E. L. Spencer Co., manufacturing jewelers of this city, was in New York looking after the interests of the firm's office in that city the past week.

David Sutherland, one of the department foremen at the Ostby & Barton Co.'s factory, who has been confined to the Rhode Island Hospital for a fortnight undergoing

an operation for appendicitis, is improving and expects to be able to be removed to his home in a short time.

Daniel A. Denison, publisher of "Denison's Manufacturing Jewelers and Silversmiths' Directory," with his wife, is stopping at Oakland Beach for the remainder of the Summer.

The firm name of William I. Macomber & Co. has been changed to that of the Macomber Mfg. Co. The firm will engage in the manufacture of a line of plated jewelry at the same location, 109 Friendship St.

A roll of German silver, which was stolen from the Henry L. Scott Co., 227 Eddy St., Aug. 12, was recovered by Inspector McGann in the junk shop of Jacob Kominsky, 294 Eddy St., last Friday night.

Henry C. Luther is one of the members of the Rhode Island party that left Monday morning to attend the 42d annual encampment of the Grand Army of the Republic, which is being held at Toledo, O., this week.

James Campbell, who has been foreman with the O. C. Devereux Co. since 1871, was one of the participants at the annual outing of the 11th Rhode Island Regimental Volunteer Veterans at Slocum's, on the Pawtuxet, last Saturday.

Among the jewelry buyers who paid the manufacturers of this city and vicinity a visit the past week were the following: W. W. Wail, of the May Co., Cleveland, O.; Miss Henrietta Graff, of Berg Bros., New York, and J. Seligmann, of Seligmann & Deutsch, Seattle, Wash.

In a rescript handed down last week by Judge Stearns in the Superior Court the petition for a writ of mandamus filed by the Lederer Realty Co. to compel the inspector of buildings of Providence to issue a permit for the construction of alterations on a wooden building in the first fire district was denied.

Henry Fletcher, treasurer of the Fletcher, Burrows Co., and George W. Parks, president of the George W. Parks Co., are prominently talked of as possibilities as nominees for the mayoralty of the city of Providence on the Republican ticket. Both are members of the Board of Aldermen at the present time, the former being president of that body.

The employes of John Austin & Son, gold refiners, went on their annual outing, Saturday, the first stop being at Field's Point, where a shore dinner was partaken of. The steamer was then taken for a sail down Narragansett Bay and back to Crescent Park, where sports of various kinds were enjoyed. About 25 participated in the outing.

The partnership between John S. Palmer, Julius Palmer and Fenelon A. Peirce, under the firm name of Palmer & Capron, manufacturing jewelers at 167 Dorrance St., was dissolved, July 8, by the death of the senior partner, John S. Palmer, but the business will now be carried on under the same name and at the same place by Julius Palmer, Fenelon A. Peirce and John S. Palmer, 2d.

At the Warwick Club on Saturday some 35 employes of the Improved Seamless Wire Co., of this city, participated in an outing under the auspices of the beneficial association connected with the shop. There

were outdoor sports and a baseball game between the married men, Captain Dix and the single men, Captain Tillblad. The F. Carlisle, superintendent, and John J. F. Carlisle, officers of the firm, were guests of the employes.

A final dividend of 4.7 per cent, was declared in the case of the Chase Mfg. Co. this city, Aug. 27, by Chester W. Barreferec in bankruptcy. This makes a total of 12.7 per cent. William A. Greene, business as the Chase Mfg. Co., manufacturing jewelers at 40 Clifford St. was judged bankrupt after he had made a schedule of assets was \$18,419.33 and liabilities, \$34,772.67. James W. L. this city was appointed trustee at the meeting of the creditors.

The regular weekly meeting of the Rhode Island Manufacturing Jewelers and Silversmiths' Association was held in rooms Friday afternoon, but only a few business was transacted by the members present. With the commencement of the new month, vacations having been completed and indications for business in the Fall season improved, it is expected the affairs of the association will assume more active appearance. At the meeting held next Thursday an interpretation of the new stamping law of Canada was given, followed by a general discussion of the same.

Among the calls for help wanted published during the past week in the papers were the following: Expert toolmakers on seamless rings, also expert set stones in rings, by the Cutler J. Co.; engravers on silver, by Wat Newell Co., Attleboro; chain maker fine soldered link chain by Prov Stock Co.; chasers on bracelets and work, by Attleboro Chasing Co.; engraver by Standard Button Co., Attleboro; man, also girls experienced in etching hard enamel work, by Shepard Melrose Highlands, Mass., and girls to set up and charge, also solderers on white cluster work, by L. Davidsburg & Co.

Arthur Crowell Stone, president of Geo. W. Dover Co., manufacturers of jewelers' findings, was married to M. Lawton Wales, of this city, at St. Stephen's Church, Saturday afternoon, Rev. McClellan Fiske, rector of the church, performing the ceremony. The ceremony was a very quiet affair, only a few of the intimate friends of the couple being present. The news of the wedding was quickly among their friends, however, before the wedding supper at Mr. Stone's newly furnished home on Water was concluded, congratulations and wedding gifts began to pour in upon the Mr. and Mrs. Stone went by automobile to Pawtucket, whence they started on their intended tour of the White Mountain

Ralph G. Ostby, salesman for the Ostby & Barton Co., has just returned from a trip through the west, taken for the purpose of studying prospects for business during the season that is now opening. He reports "West of Chicago I could find no business. There the demand for our line of jewelry was practically as strong as ever. There that there was plenty of money in the cultural districts, but that there was

... toward economy, induced, without  
... by the hard times talk in the news-  
... When I got to Chicago I found  
... was not quite so good and as I grad-  
... toward the Atlantic coast I found that  
... had fallen off to a very decided  
... I discovered, however, that in these  
... centers which are beginning  
... over from the 'panicky' conditions,  
... the is beginning to pick up also."  
... the Fleischer, formerly general man-  
... Goldsmith & Horzberg, has started  
... manufacture a general line of jewelry at  
... tanton St.

... employees of the Theodore W. Fos-  
... bro. Co., to the number of 175, spent  
... Saturday, at Palace Gardens, the  
... being their annual outing. Dinner,  
... sports and entertainment and a base-  
... game caused the time to pass rapidly.  
... p to and from the grounds was made  
... social cars. Last week, Saturday, the  
... was scheduled for the outing, which  
... set for that day at Lake Pearl, Wren-  
... Mass., but the rain so interfered with  
... enjoyment of the occasion that it was  
... ed on Saturday. The programme of  
... sports was run off in two sections,  
... of them before dinner and the rest in  
... afternoon, while immediately after din-  
... entertainment was enjoyed. Danc-  
... is also one of the features of the af-  
... n's pleasures. Mr. and Mrs. Theo-  
... W. Foster and Clyde Foster were  
... st during the afternoon.

### North Attleboro.

... Art Totten has gone to Nova Scotia  
... extended visit.

... Elmo Coombs left, recently, on a two  
... s' trip for the Paye & Baker Mfg. Co.  
... ak J. Ruggles left, last week, on a  
... n trip in the interests of W. H. Bell

... Thomas G. Frothingham has returned  
... a three weeks' trip through the mid-  
... west.

... Erik Guild, a Connecticut retail jew-  
... was the guest of his brother, William  
... Guild, last week.

... John A. Rose, for 30 years employed by  
... Frothingham & Co., has taken a  
... sion as foreman for the H. F. Barrows

... William H. Riley has recovered a num-  
... er tools that were stolen from his place.  
... re were found at the home of a man  
... it is believed, is responsible for many  
... es in this part of Massachusetts.

... The employees of the J. F. Sturdy's Sons  
... enjoyed an outing at the Attleboro  
... al Fair Grounds, Saturday afternoon. A  
... game between the married and single  
... and a foot race were the principal  
... ates.

... Announcement is made of the dissolution  
... of the co-partnership existing between  
... ra: L. Shepardson and Mrs. Esther J.  
... urdson under the firm name of F. L.  
... urdson & Co. Mrs. Shepardson with-  
... as from the concern, and Mr. Shepard-  
... will continue the business under the  
... n name as heretofore. The dissolution  
... will make no change in the policy of the  
... firm. Mr. Shepardson has been the  
... manager for many years, and he  
... ny acquires the holdings of his step-  
... cer.

Two arrests were made, Friday, of em-  
... ployes of the W. & S. Blackinton Co., who  
... are charged with larceny. William Steb-  
... bins, at the Attleboro Court, pleaded guilty  
... to the larceny of about \$35 worth of jew-  
... elry. Bracelets and lockets constituted the  
... jewelry taken. Stebbins was a scratch-  
... brusher and considerable work passed  
... through his hands. The court sentenced  
... Stebbins to pass 30 days in Taunton jail.  
... An appeal was taken and surety furnished  
... by a brother for his appearance at the Su-  
... perior Court. Joseph Landry was also ar-  
... raigned for larceny. It was claimed that  
... Landry was connected with Stebbins and  
... the officers desired a further opportunity for  
... investigation. The case was continued un-  
... til to-day. Bonds were fixed at \$100, which  
... were furnished.

### Attleboro.

Leach & Miller are working nights.

Frank W. Weaver spent last week in  
... Maine.

The Standard Button Co. has been oper-  
... ating overtime to fill orders.

Improvements have been made in the of-  
... fice of Walter E. Haward Co.

David E. Makepeace enjoyed a vacation  
... last week at South Poland, Me.

C. H. Tappan has returned to Attleboro  
... from Maine, where he has been for several  
... months.

The C. D. Lyons Co. concluded removing  
... to Mansfield and has begun operations in  
... the new shop.

J. E. Cohn, formerly of Attleboro, is now  
... located with W. S. Stanley, dealer in em-  
... blematic goods, at 45 Cornhill St., Boston.

Charles L. Barrows, who represented the  
... Bay State Optical Co. at the recent Phila-  
... delphia convention, is very optimistic about  
... the future business outlook, as indicated by  
... the national gathering.

A decision in favor of the plaintiff was  
... given Saturday by Judge Byram in the At-  
... tleboro District Court in the civil action of  
... the Ben Wyman Co. against the C. O.  
... Sweet & Son Co. The award was \$175.75.

The Horton-Angell Co. team beat D  
... F. Briggs Co.'s nine in the Jewelers' Base-  
... ball League, Saturday, 13 to 6. Bates &  
... Bacon won from the Robert Earl Co., 9  
... to 4.

Frank Mossberg, H. E. Clap, David E.  
... Makepeace, Samuel M. Einstein and Em-  
... monson D. Guild have consented to act as lo-  
... cal delegates for Dr. Frank Wheatley, who  
... seeks to defeat Congressman Lovering for  
... renomination.

The business of the D. A. White Co. was  
... disposed of last Wednesday to the E. A.  
... Eddy Machinery Co., of Providence. The  
... sale was made by Ralph C. Estes, acting as  
... trustee. The necessary authority was given  
... by the court last week. The machinery  
... and contents of concern will be sold by the  
... Eddy Co. either separately or collectively.

Col. Sidney O. Bigney has issued a pub-  
... lic statement in defense of Congressman  
... William C. Lovering, concerning his atti-  
... tude on questions affecting the jewelry in-  
... dustry. Mr. Bigney declares that when the  
... Wilson-Gorman revision of the Dingley bill  
... was under consideration Mr. Lovering used  
... his best efforts to aid the jewelers and also  
... that at the time the French treaty was pro-

posed he gave his hearty co-operation.

The list of heavy taxpayers given out by  
... the Board of Assessors includes the follow-  
... ing manufacturers and concerns: Attleboro  
... Mfg. Co., \$1,612; Bates & Bacon, \$1,096;  
... S. O. Bigney, \$2,541; J. E. Blake, \$2,269;  
... D. F. Briggs Co., \$2,275; J. M. Fisher,  
... \$1,232; Horton-Angell, \$1,719; D. E. Make-  
... peace, \$1,653; D. E. Makepeace Co., \$1,312;  
... A. Marsh, \$1,175; R. F. Simmons Co.,  
... \$1,249; C. H. Tappan, \$1,389; Watson &  
... Newell, \$2,625; C. L. Watson, \$6,049; C.  
... H. Allen & Co., \$420; S. O. Bigney & Co.,  
... \$840; J. E. Blake & Co., \$745; Bliss Bros.  
... Co., \$437.60; Bristol Mfg. Co., \$612.50; A.  
... A. Bushee & Co., \$394.98; Harvey E. Clap,  
... \$261.10; A. R. Crosby, \$462.42; P. J. Cum-  
... mings Co., \$280; Daggett & Clap Co.,  
... \$647.50; C. H. Eden & Co., \$735; S. M. Ein-  
... stein, \$261.61; Electric Chain Co., \$385; Wil-  
... lard A. Engley, \$550.54; Finberg Mfg. Co.,  
... \$315; J. M. Fisher & Co., \$546; Fontneau &  
... Cook Co., \$490; E. D. Gilmore & Co.,  
... \$271.25; Emmons D. Guild, \$304.31; Walter  
... E. Hayward, \$440; Everett S. Horton,  
... \$750.47; Raymond H. Horton, \$623.42; A.  
... S. Ingraham, \$456.21; Leach, Garner Co.,  
... \$437; J. W. Luther Co., \$367; John R.  
... Marsh, \$542.50; Mason, Howard & Co.,  
... \$262; Thomas E. McCaffery, \$418.15; Mc-  
... Rae & Keeler, 787; Frank Mossberg Co.,  
... \$910; Fred A. Newell, \$924; Regnell, Big-  
... ney Co., \$851; Robbins Co., \$525; Mark E.  
... Rowe, \$442; F. H. Sadler, \$396; Sadler  
... Bros., \$525; F. H. Sadler & Co., \$560; Her-  
... bert A. Sadler, \$614.85; Thomas Sadler,  
... \$290; Smith & Crosby, \$507; Standard But-  
... ton Co., \$875; E. A. Sweeney, \$813; Harold  
... E. Sweet, \$586.15; Joseph L. Sweet, \$695;  
... W. H. Wilmarth & Co., Inc., \$700.

### Rochester.

Nat. Brenner, with Morris Rosenbloom &  
... Co., has left on an extended southern trip.

Geo. Andrus has had his store at 415  
... Main St. E. tastefully redecorated, making  
... a marked improvement in its appearance.

J. Mintzer has opened a small but neat  
... store at 175 Clinton Ave. N. Mr. Mintzer  
... will make watchmaking and jewelry work  
... his specialty.

The following judgments were taken in  
... Municipal Court last week: Malcolm I.  
... Danks vs. Ray W. Pinch, \$18; Don I.  
... Danks vs. Thomas J. Crowe, \$7.80; same  
... against Joseph C. Drumm, \$19.05.

The local police department received word  
... Saturday morning that the post-office at  
... Fillmore, Allegany County, was robbed dur-  
... ing the night, yeggmen blowing open the  
... safe and getting loot worth more than  
... \$1,000. The post-office is in a jewelry store  
... and a number of diamonds were part of the  
... booty, besides \$400 in cash.

J. J. Ernisse, for many years located on  
... State St., just a few doors from the Four  
... Corners, has removed to his new store on  
... Main St., and is rapidly getting established.  
... The new store is 16½ by 52 feet, and is  
... prettily decorated in blue. The woodwork  
... and fixtures are in mahogany, the whole  
... being nicely set off by handsome mirrors  
... placed at intervals along the walls. Two  
... fair-sized and well-placed display windows  
... give the store a very neat and up-to-date  
... appearance. The new store is situated in  
... the Powers Hotel building.

## Philadelphia.

Lewis Brody has opened a retail jewelry store on Spring Garden St., near 11th St. William G. Earle, 11 N. 9th St., is spending the balance of the Summer at Atlantic City.

William Brown, engraver, established himself in business, last week, at 727 Sansom St.

Harry Cramer, watchmaker, resigned his position, last week, with J. D. Sallade, Norristown.

S. Rush Weaver, manufacturing jeweler, 8th and Sansom Sts., is away on a vacation trip in rural Pennsylvania.

L. P. White, 9th and Chestnut Sts., with a party of friends made an automobile trip to Atlantic City last week.

William H. Doebele, manufacturing jeweler and diamond dealer, completed his move from 722 Sansom St. to 807 Sansom St., Friday of last week.

Walter M. Engle, Lancaster Ave., has just returned, with his family, from the Pocono Mountains. He proposes to spend next week at Wildwood, N. J.

William C. Williams, with Charles H. O'Bryon, 735 Sansom St., returned, last week, from a week's vacation spent at Avalon, N. J., fishing and yachting.

S. T. Bennett, Apex, N. C., stopped off in this city, last week, on his way north on a pleasure and business trip. Mr. Bennett proposes visiting the Atlantic coast resorts and New York City.

J. B. Bechtel, of Joseph B. Bechtel & Co., 725 Sansom St., returned, last week, from a trip through the Schuylkill County, after spending a few days' vacation at the old homestead here.

Charles Dean, diamond broker, who opened a handsome new store at the northeast corner of 8th and Sansom Sts., the first of the month, spent much of last week taking life easy at Atlantic City.

C. P. Meyer, 929 Passyunk Ave., returned last week from a 10 weeks' pleasure tour of Europe, looking much benefited in health and declaring that he had enjoyed the best months of his life while traveling abroad.

Richard C. Wilde, local representative of the Meriden Cutlery Co., returned, last week, from a four weeks' tour of the State and reports that, though buying is still conservative, the outlook for the future is very good.

Ira D. Garman, president of the Pennsylvania Retail Jewelers' Association, 101 S. 11th St., returned, last week, from Massachusetts, where he had gone to bring home his family, who had spent the Summer at a New England resort.

Richard M. Cooper & Son completed the work of moving last week from their old quarters at 722 Sansom St. to 721 Sansom St., immediately opposite. The new quarters have been especially equipped and fitted for the material business.

Max Einhorn, head of the watch repairing department of M. Sickles & Sons, has returned from a week's vacation to Atlantic City. Elmer Horn, head of the material department of the house, has returned from a visit to Atlantic City, Asbury Park and Easton on a pleasure trip.

A. V. Brown, manufacturing optician, while speeding homeward in his automobile

last week ran down J. F. Schaffer, an aged man, living at 1815 Mount Vernon St., at Broad and Callowhill Sts. The man's arm was fractured. Mr. Brown took him to the Hahnemann Hospital.

In promoting a "trade-fest" of unusual proportions during the Founders' week celebration, Oct. 4 to 10, the Merchants and Travelers' Association are expecting from 15,000 to 20,000 special buyers in this city. It is proposed to take visitors who come to visit manufacturers throughout all the big plants of the city.

The contract for gilding the city hall tower 500 feet above the street level was awarded, last week, to John R. Wiggins & Co. The contractors estimate that 10,230,500 sheets of gold leaf will be required for the gilding, which alone will cost \$20,000. The gold leaf to be used will be manufactured expressly for the purpose, so as to be stormproof and withstand the ravages of time.

D. V. Brown, manufacturing optician, 735 Sansom St., returned, last week, from the Maine woods, where he had gone with Mrs. Brown to recuperate from illness caused by the excessive heat of the early Summer. Andrew V. Brown, in company with A. Lincoln Acker, a personal friend, leaves early this week for Kineo, Me., from which point he will explore the Maine woods, fishing and gunning.

Miss Florence Julia Riggs, daughter of Robert Riggs, of the firm of Riggs & Bro., jewelers, 310 Market St., surprised her father last week by suddenly making up her mind to get married at Atlantic City to John D. Taylor, of this city. The couple had been engaged to be married in the late Autumn, but declared that they wanted no "fuss." So they were married at once, just as invitations were to have been sent out. Now the cards have been changed to announcements.

The Philadelphia trade had a pleasant morsel of gossip furnished it last week when it became known that B. Franklin Davison, of the firm of Joseph K. Davison's Sons, manufacturing jewelers, diamond importers and makers of medals and dies, 718 Sansom St., had eloped, a week ago, in a motor car with Miss Marion Louise Vanderslice, daughter of Mr. and Mrs. Theodore Pennypacker Vanderslice, of 415 N. 63d St. They had gone to Perrineville, Monmouth County, N. J., which had been for generations the home of the Davisons, and had been married, returning immediately to this city and keeping the news secret until it leaked out as they prepared Saturday to depart on a honeymoon trip. Mr. Davison is expected to bring his bride back to the Germantown home of the Davisons, where the three brothers have kept bachelor's hall for years at Locust Ave.

The Jewelers' Baseball Club, recruited from manufacturers, diamond setters, workmen and clerks of the Sansom St. trade, and captained by William C. Robertson, manufacturer, 727 Sansom St., ended its season Saturday, of last week, in a brilliant game at 53d and Walton Ave., with the John A. Ross Club, bearing the name of a well known diamond broker of this city. Fully 3,000 people witnessed the game, which was won by the "Jewelers" by a

score of 9 to 4. In the final game the jewelers' nine was made up as follows: porte, 1b.; Dunn, 2b.; Bowers, c.; Flann, 3b.; Kuehn, lf.; Robertson, cf.; Warr, rf.; Tabot, ss., and Griffith, p. The R nine lined up as follows: Carroll, c.; Meg, p.; Buckholtz, 1b.; Stevens, 2b.; Math, ss.; Preston, 3b.; Terrell, lf.; Wilson, and Reese, rf. Nearly all the Sansom trade was on hand to witness the game, rooted mightily for their friends. A forward ovation was given Captain Robertson.

## Connecticut.

Charles W. Morris and Clifford Leavenworth, Wallingford, returned for short stay at Block Island, last week.

Mayor George M. Landers, of New Britain, sailed for home from Europe on the *Cedric*, on Thursday of last week.

At the recent Republican caucus in Wallingford, C. H. Tibbits and Clifford Leavenworth were elected delegates to attend the State convention.

Factories "L" and "X" fire brigades in Wallingford, enjoyed an outing, Aug. 22, at Double Beach, near New Haven. At the dinner the party sailed to Savin Hill.

Mortimer Miller, of C. H. Case & Hartford, has resumed his regular business duties after having been confined at home by illness for the past five months.

L. E. Carstensen is a new optician in Bridgeport, where he has opened a shop at 72 5th St. Mr. Carstensen recently completed a course in optometry in New York City.

Robert G. Simms, for many years in employ of the New Haven Clock Co., New Haven, died suddenly at his home in Brooklyn, N. Y., last week. The deceased also been in the employ of the New Haven Clock Co. for an extended period.

Warren M. Woods, a well-known resident of Thomaston, where for a number of years he had been engaged as foreman of the movement department of the Thomas Clock Co., died, about a week ago, after a lingering illness, aged 40 years.

A large number of friends attended the recent funeral of Edwin W. Sperry, of Bristol, about a week ago. Among the present was a delegation of the deceased's former shop mates from the E. H. Clark Co., where he had been employed 35 years. Interment was in West Cemetery.

Frederick L. Johnson, for some time employed by factory "L," International Clock Co., and the inventor of several calligraphies, died, Aug. 23, at his home on S. 1st St., Oxford, aged 69 years. Mr. Johnson was a veteran of the Civil War, and served in the First Connecticut Artillery.

Several prominent business men of Wallingford held a meeting, Aug. 21, at the National Bank in that city, for the purpose of discussing the most available site for a Post-Office building. The meeting was of an informal nature, and was attended by the following well-known members of the trade: C. D. Morris, C. W. Leavenworth, W. H. Edsall, C. H. Tibbits, Fred Wallace, H. E. Biggins and Charles Phelps. The property of F. A. Wood and C. F. Wooding was favorably mentioned as a desirable site. This lot has a frontage on Main St. of 108 feet and on Centre St. of 90 feet.

Among the traveling representatives who visited Ontario, Ont., last week, were: A. Sherrill, S. W. Sherrill, and the representative of Wagon & Gerstley, London, Eng.

Traveling representatives in Los Angeles, Cal., only, included: St. Clair Ryan, Unger Bros.; Daniel Jacobson, Jacobson & Bros.; Roger Cooper, his associate, Mr. Gilbert, M. Schmsler & Jacob Marx, Kossuth-Marx Jewelry Co.; A. Parker, Osmon-Parker Mfg. Co.

The following traveling representatives visited Lancaster, Pa., recently: Arthur Littschwager & Co.; B. J. Clark, La Pierre Mfg. Co.; R. Riedel, Oneida Community, Ltd.; Mr. Jackson Carter, Qvarnsirom & Remington; George Schaeffer, C. O. Sweet & Sons Co.; George Mason, Finberg Mfg. Co.; Mr. Buckwalter, Sykes & Grandberg, T. D. Barley, Robert S. Gatter; Mr.ombs, M. B. Bryant & Co.

Traveling salesmen visiting Boston, Mass., during the past week, included: "Jack" Townsend, and C. Townsend & Co.; W. H. Kinna, Elgin National Watch Co.; Mr. Power, Power & Allen; Hur Simons, Stern Bros. & Co.; J. Mayer, Richard Frères, Mr. Frank, Konijn, Frank & Co.; Mr. Skinner, Roy Watch Case Co.; George Read, Larter & Sons; R. H. Schley, Sloan & Charles T. Dougherty, Osmer's Dougherty Mr. Allsopp, Wordley, Allsopp & Bliss Co.; H. H. Phelps, Enos Richardson & Co.

The following traveling representatives were in St. Louis, Mo., last week: C. H. Hickok, Washbourne & Dunn; Mr. Duncan, C. Ray & Co.; F. R. Horton, Carter, Howe & J. M. Curtis, Meriden Silver Plate Co.; W. McClann, Wilcox Silver Plate Co.; Mr. Tis, T. G. Hawkes & Co.; W. S. Willis, Gordon Co.; Mr. Lucas, Frank W. Smith Co.; W. Osborne, R. Wallace & Sons Mfg. Co.; E. A. Reed, Reed & Barton; Lucien Rockwell, Poole & Co.; Mr. Wetton, C. Dorflinger & Sons; Lanneau, R. Blackinton & Co.; Zach. A. Opheim; George Pilzer, Goodfriend Bros.; C. Holbrook, Sloan & Co.; John A. Abel, Abel & Co.; J. M. Morrow, American Watch Case Co.; W. R. Shute, Day, Clark & Co.; C. H. Wilson, Kohn & Co.; R. B. Carr, Link & Angell; Hur Totten, Sansbury & Nellis; George W. Wardsley, Allsopp & Allsopp; F. E. Buffem, J. & S. W. Granbery; Mr. Smith, La Pierre Mfg. Co.; H. H. Meyer, William B. Kerr Co.; F. F. Mason, Gibson, Krugler Co.; Thomas E. Rogers, Ser Bros.

The following traveling representatives were in Omaha, Nebr., last week: W. H. Wagner, Sigler Bros. Co.; E. C. Bell, Omega Watch Co.; J. H. Mednikow, J. H. Mednikow & Co.; Joseph Hasler, Korones Bros.; De Lancy Stone, Shafer & Ogilby; William T. Smith, International Silver Co.; S. K. Jonas; H. A. Allen, C. H. Allen & Co.; A. H. Richmond, Zare White; Milton S. denberg, Dunn & Rodenberg; Woodbury Melner, Scofield, Melcher & Scofield; P. A. Wilkin, J. J. Sommer & Co.; John S. Cunningham, L. Spence Co.; C. Y. Kenworthy, Geo. Borght & Co.; George D. Laurence, Reed & Barton; Mayer, Mauser Mfg. Co.; S. L. Mitchell, Sloan Co.; Adolph M. Kuhn, Towle Mfg. Co.; J. M. Curtis, International Silver Co.; Fleetwood Lannu, R. Blackinton & Co.; William H. Torrance, W. S. Christie & Co.; A. G. Kimball, Landers, Cary & Clark; William J. Harber, Enos Richardson & Co.; H. A. Allen, J. J. White Mfg. Co.; Walter Noon, Cory Bros.; Robert Edwards, Whitcomb Mfg. Co.; Samuel S. Macpherson, Macpherson, Roubaud Co.; C. W. Hickox, Graff, Washburne & Dunn; H. H. Meyer, William B. Kerr Co.; F. T. Blackford, S. B. Champlin Co.

Traveling representatives who called on the Cincinnati, O., trade, during the past week, included: George W. Beardsley, Allsopp & Allsopp; William Matschke, A. Joralemon & Son; Walter Noon, Cory Bros. Co.; D. Zimmermann, Zimmermann & Co.; O. Krauss, Arthur W. Ware & Co.; B. Carr, Link & Angell; D. A. Davidson, Walsh & Davidson; Wallace E. Welch, Hoyt, Oberg

& Geiger Co.; Mr. Tinker, William B. Durgin Co.; A. N. Dorchester, Chapin & Hollister Co.; Mr. Dinean, C. Ray Randall & Co.; J. T. Griffith, Jr., Carter, Howe & Co.; T. H. Smith, Roger Williams Silver Co.; Mr. Hofman, Eichberg & Co.; E. H. Smith, Bippart, Grison & Osborn; Thomas E. Rogers, Riker Bros.; H. N. Van Bergen, Snow & Westcott; Donald Le Stage, H. D. Merritt Co.; R. J. Rogers, C. H. Cooke Co.; William Bosselman, T. Quayle & Co.; A. W. Levy, Byron L. Strasburger & Co.; Frank W. Collom, Sulzberger Bros.; Arthur Bradshaw, Meriden Britannia Co.; G. Rodenberg, Rhode Island Novelty Co.; F. R. Truell, W. H. Saart Co.; Leo Henke, Sussfeld, Lorseh & Co.; C. S. Dawn, F. H. Cmler & Co.; George Southwick, Payton & Kelly Co.; Vincent W. Henderson, Crane & Theuer; G. A. Buckmaster, Sykes & Strandberg; Mr. Primrose, Burley & Tirrell Co.; Charles S. Peckham, J. H. Peckham & Co.; Mr. Pierce, T. I. Smith Co.; William Moulton, F. W. Weaver, Mr. Schwarzkopf, J. Schwarzkopf & Co.; Mr. Hull, Barden & Hull.

## Boston.

M. N. Smith, of the Smith, Patterson Co., is taking his vacation at Maplewood, N. H.

Henry G. Morris is having the interior of his quarters in the Jewelers' building remodeled.

Charles N. Rauh, who was for 20 years at 4257 Washington St., has moved to Poplar St.

The E. Howard Clock Co. has installed a fine tower clock in the cupola of the new \$78,000 town hall at Sanford, Me.

The New England Jewelry Co., heretofore at 127 Park St., Dorchester district, has removed to 1514 Dorchester Ave.

Lester I. Fisk, formerly with Rankin, the Dedham jeweler, is now in business on Centre St., West Roxbury district, this city.

Ralph L. Polland, optician, 392 Boylston St., forced to vacate by the razing of the building on that site, has removed to 406 Boylston St.

E. A. Bigelow, treasurer of the E. Howard Co., returned Monday from a fortnight's vacation at his Summer place in New Hampshire.

Hahn Bros., who also have a jewelry store in Brookline, have opened a new establishment on Columbus Ave., this city, near Roxbury Crossing.

Benjamin C. Allen, of Benjamin Allen & Co., Chicago, and Herbert Burdick, of the Bowler & Burdick Co., Cleveland, were in town during the week calling on friends in the trade.

The Boston Jewelers' Club will hold its next quarterly meeting and dinner, Sept. 22, at the Point Shirley Clubhouse, the occasion being observed as an early Fall outing by the members.

W. A. H. Robie, formerly with Freeman & Taylor, is now located in room 706, Washington building. S. H. MacPherson, who was with the same firm before it went out of business, is with A. Stowell & Co.

Joseph Goldberg, Alexandria, La.; I. L. Gregg, Jackson, Tenn.; W. F. Avery, Columbia, S. C., and A. D. Harding, Petersburg, Va., prominent jewelers in the south, were entertained by E. A. Cowan, of the Jewelers' building, last week.

J. M. Rosenbach, representing the Rockford Watch Co., has been in Boston during the past week in connection with a unique exhibition of watches in process of manufacture in the display windows of the Thomas Long Co., Summer St.

Max Alberts, of I. Alberts & Co., has re-

turned from a business trip through eastern New England and reports trade conditions somewhat improved, especially in the manufacturing cities, where some of the big plants have recently resumed operations.

G. Willard Frost, who bought out Nelson Bros., Chelsea, shortly before the great fire in that city, and whose place was totally destroyed by the flames, has opened his new store on the site of the old building. It is much handsomer than the one which it replaces.

The handsome sterling silver gold-lined cup given to Denton T. ("Cy") Young, the veteran baseball pitcher, recently, by his fellow ball-players of the American League, was made by N. G. Wood & Sons, of this city, and has been on exhibition in their window during the past week. It stands 15 inches high and weighs about 100 ounces.

Mrs. Emily Willard Brown, who died last week, was a grand-daughter of Aaron Willard and grand-niece of Simon Willard, the famous Boston hall and wall clock makers of a century ago. She married John J. Brown, of Andover, who was an apprentice of Aaron Willard, in 1837, and 11 children were born to them, only four of whom survive her. She was 89 years old last June.

A special exhibition of a collection of Chinese and Japanese mirrors has just been opened in the Japanese corridor of the Museum of Fine Arts. This collection, which contains 109 specimens, was chosen by Okakura-Kakuzo last year in the east, and it is the largest collection of its kind in the world. The mirrors were bought for the museum by Okakura-Kakuzo with a special fund appropriated for the purpose, to which was added \$5,000 given by Mrs. Scott Fitz.

## Trade Gossip.

The Arch Crown Mfg. Co., Newark, N. J., has brought out a new six-pointed star jewel setting. It has also given licenses to 15 other concerns to make its patented pin and support for women's collars.

The new folding cane of Arthur W. Ware & Co. is now being supplied in individual fancy boxes, which make them still more desirable for presentation purposes. These canes fold so as to fit any traveling bag, and are a novelty in this line that is distinctly suitable for the jewelers' trade. A new illustrated catalogue, showing many novelties in walking canes, riding crops and corkscrews will be sent to any jeweler upon request to Arthur W. Ware & Co., 109 Leonard St., New York.

In the magazine supplement of the New York Herald, Aug. 22, appeared a half column fashion note, describing the interchangeable scarf pins of Rothschild Bros. & Co., 51 Maiden Lane, New York, and pointed out how desirable these pins are to the man of fashion who wishes to wear a pin harmonizing with his various scarfs without buying a whole line of different pins. The patent on these pins has just been granted and a description is published in the patent department of this issue. These scarf pins are supplied with stones of various colors such as lapis-lazuli, moonstone, turquoise, matrix, jade, topaz, amethyst, garnet, etc., which can easily be attached or detached.

**Minneapolis and St. Paul.**

**TRADE CONDITIONS.**

Business conditions through the northwest improving in consequence of the crop being harvested and marketed. While the total was not as large as some anticipated of fair volume, and as ruling prices the volume of money brought in will, it is as large or larger than usual.

J. J. Donohue, Faribault, Minn., was in the Twin Cities on his return from South Dakota, where he has been looking after land interests.

Elmer Anderson, well known as a mining representative for S. H. Clausen & Co. was married, Aug. 26, in Minneapolis to Miss Margaret G. Millain. They returned on their western trip, and will be at home again Sept. 15, in Minneapolis.

Out-of-town jewelers in the Twin Cities recently, were: Martin Hagan, Fargo, Dak.; H. T. Holverson, Baumbach & Holverson, Alexandria, Minn.; A. L. McDelano, Minn.; J. J. Birkelak, La Prairie, Minn.; C. B. Tilson, Carleton, N. Dak.

Minneapolis is inclined to copy the lighting of St. Paul with reference to lights along the different streets. St. Paul has done it to good advantage on the 7th Sts., Robert and some of the other streets. A standard with a central globe, two side arms, each enclosed in an opaque globe, with four side arms. The cross strands, give the street a brightly lighted appearance. Nicollet Ave. in Minneapolis, is similarly lighted, and merchants along 4th St., from Hennepin Ave. to Second Ave., propose a similar line of lighting.

The Minnesota State Fair, which opened Aug. 31 and will continue until Sept. 15, at Hamline, a suburb of St. Paul and near the two cities, usually brings to the fairgrounds a great many transients, and the dealers in retail trade profits thereby. The fair was made the occasion on which retail law came to the cities. The two-cent-a-mile law inclined the railroads against any concessions in rates last year, and attendance from the country suffered in consequence. Some of the roads have broken the rule against reduction, and a better attendance is expected.

**Omaha.**

R. P. Brandt, with Albert F. Brandt, is spending his vacation at Auburn, Neb.

Fred Brodegaard & Co. supplied the Commercial Club with club dinner last week.

Bennie Ellerdeen, right fielder for Combs baseball team, was given a watch, last week, by T. L. Combs, for excellent work during the season.

Mrs. C. L. Shook returned, last week, from a visit in Canton, O. While in Canton, Vincent, the 10-year-old son of Shook, narrowly escaped death by drowning.

A. Urbans, Minden, Nebr.; P. S. Zinger, Pleasanton, Nebr.; A. Walcott, Oakland, Nebr.; C. A. Tucker, Lincoln, Nebr.; and B. F. Smith, Valley, Nebr., in the city, last week, replenishing stocks.

Wm. Swank will in future conduct a store of J. D. Swank, Somerset, Pa.

# GORHAM SILVER

## AN INVITATION

¶ Last week the attention of the jewelry trade was directed to the approaching visits of the Gorham traveling representatives.

¶ To those members of the trade, however, who have in contemplation a visit to New York, a most cordial invitation is extended to the wholesale salesrooms in the Gorham Building. Here they will find displayed samples of the most attractive new goods for the Fall and Holiday seasons, upon which the Company's force of accomplished silversmiths has been busily engaged for many months past.

¶ The result is seen in the most extensive assortment comprising the greatest variety of silverware that has ever been gathered together in one establishment, the prices being as low as is consistent with the character of the goods offered.

The Value of the Trade-Mark.

AN address upon trade-marks delivered before the recent convention of the American National Retail Jewelers' Association, at Cincinnati, which is published in full in another column of this issue, serves to call attention to the distinction between trade-marks and trade names, or brands, a distinction which the merchant does not always make. It also takes up the subject of the trade-mark from a psychological standpoint and shows the value of these marks in the good will that is contained in them. A careful consideration of both the article and the subject generally will show the merchant and manufacturer (if he does not already appreciate the fact) that there is no part of his business in which his good will as well as his personal identity is so bound up as in the trade-mark, and there is nothing that he can devise that can give him greater protection in competition along the lines in which quality and merit count than a mark identifying the product. The ownership of a trade-mark or trade name which is known to the public as identifying an honest product of good quality is the greatest weapon of defense which a manufacturer or a dealer may have against unscrupulous competitors.

More Misinformation About Scientific Gems.

THE newspaper story about Professor Bordas, of France, turning ordinary white corundum crystals into rubies, oriental topaz, blue sapphire, etc., by means of radium rays, has again been repeated in print, this time in an article in the Technical World Magazine, despite the fact that Professor Bordas had repudiated the newspaper accounts last year in which these statements were first made. That Professor Bordas changed the color of some corundum gems was admitted, but in most cases they had been changed from valuable to less valuable stones by the operation, and, as was clearly shown in the interview with him, his experiments in no way indicated any lasting change in the color of the gems, nor had they any great commercial importance, though of value from a scientific standpoint.

The author of the article in the magazine referred to above also falls into another error in talking about the manufacture of real sapphires and emeralds as well as rubies as having been made in the electric furnaces, and being now on the market in commercial quantities. As all jewelers conversant with the gem trade know, and as we have had occasion to remark many times, the ruby is the only gem that has been successfully made artificially in a way that gives the product of the laboratory exactly the same qualities as the gem of nature. And even the scientific and reconstructed rubies, though identical with the natural ruby in most particulars, have certain characteristics of their own which permit them to be distinguished from the genuine stone by an expert. As far as the emerald is concerned absolutely nothing in the way of artificial productions of this gem has appeared, nor is it likely anything of the kind will appear, while as to sapphires, though blue stones similar to the sapphire in many qualities have been pro-

Any business will grow under the influence of plenty of good advertising.

duced, all the qualities of the sapphire have not yet been found in any of the artificial productions put upon the market. What the future will bring forth, of course, time alone can show.

It is unfortunate that newspaper writers and magazine authors seem to be unable to touch upon the question of gems without falling into error that is misleading to the public and harmful to the jewelry trade when such mistakes could be so easily avoided by very little study of the subject.

Another "Diamond Mine" Scheme.

ANOTHER attempt is being made, this time by a Canadian concern, to draw the dollars out of the pockets of the unwary investor in this country in exchange for stock in a company to develop diamond mines in Canada, and for this purpose alluring prospectuses have been sent to many parts of the country, asking for subscriptions to stock in sums from \$10 up. The officers, the names of but one of which can be found in the directory of the city in which the home office is located, ask those who enter into the proposition to have full confidence in them or to stay out, and we think that the advice is good, particularly the latter part of it.

The company seems to place its claim to being able to produce riches for its subscribers or stockholders solely on a story which appeared in a New York paper, May 7, about a man who came down from the Nottaway River with a quantity of diamonds, but unfortunately, though this is supposed to have occurred four months ago, nothing more has been heard of the man or his diamonds, nor have other finds in the territory been recorded. That part of the prospectus telling about the De Beers mines, the rise in value of its stock, etc., while undoubtedly true, is no doubt used by the company with the idea that it will give the impression to the prospective stockholders in their scheme that they will go through the same experience as did the stockholders of the South African mines.

Let us hope that the intelligence of the average American is sufficient to prevent him from being attracted by a proposition which seems to have as its sole foundation an unverified yarn of a yellow journal.

Schwarzchild Bros., Inc., is the new firm style of the business formerly conducted by Schwarzchild Bros., Richmond, Va. Officers of the incorporation are: President and treasurer, W. A. Schwarzchild; vice-president, G. M. Schwarzchild, and secretary, Fred H. Powell. The capital is \$50,000, of which \$15,000 has been paid in.

## ROCK BOTTOM PRICES ON DIAMONDS

Our diamond prices are rock bottom.

We import the stones direct, cut them ourselves, and sell them as close as anybody in the country does for diamonds of equal quality.

We carry a large stock at all times and the jeweler who sends to us for a selection not only gets rock bottom prices, but also a liberal assortment—and, what is of utmost importance, he gets it promptly.

### Good Gold Jewelry

*It's the  
only kind  
we make*

A RATHER COMMONPLACE DECLARATION, WE'LL AGREE, BUT WE MAKE IT WITH AN INSPIRING REVERENCE FOR THAT MUCH-ABUSED WORD "GOOD." OUR JEWELRY IS GOOD ALL OVER—GOOD THROUGH AND THROUGH. IT ISN'T ALONE SUPERFICIALLY IMPRESSIVE, IT GOES BEYOND THAT, SUPPORTING ITS VISIBLE DIGNITY WITH MATERIAL QUALITIES THAT MAKE IT MOST ENDURING. FURTHERMORE, LIKE EVERYTHING IMPRESSIVE, IT HAS A PERSONALITY—CHARACTERISTICS THAT EASILY HELP IDENTIFY IT AS A KIRBY PRODUCT. ASK TO SEE THE KIRBY LINE BEARING THE ABOVE TRADE-MARK.

## Pittsburg.

### TRADE CONDITIONS.

More confidence is now being manifested in the future, regarding business conditions, than any time this year. One of the largest merchants in Pittsburg discussing the matter said that business is talking more encouragingly and there is a much more buoyant feeling than months past. The local mills are not yet running full time, but more men are now employed at any time this year. There is quite a bit of activity in the building lines in Pittsburg vicinity and many idle men are finding employment on the work.

Harry Heeren, who was in Canada several weeks fishing, is back at work and is telling some great fish stories.

Samuel F. Sipe, who, with Mrs. Sipe, has been in Europe for nearly two months, has returned to Pittsburg.

J. L. Roberts, of the John L. Roberts Son Co., is in Canada attending to the horse shows and doing some fishing.

J. P. Steinmann has erected an electric sign in front of his place of business on Fifth Ave., which attracts much attention.

A. A. Gillespie, of Gillespie Bros., who has been abroad on a buying trip, is home. He spent about 10 days in New York before returning to Pittsburg.

Elmer Vey, a son of Benjamin Vey, of the North Side, who was seriously injured some time ago by being thrown from a street car, is recovering from his injuries.

Steele F. Roberts, of E. P. Roberts & Sons, who, with Mrs. Roberts, has been in Europe, is expected home about September 10. He is bringing back with him his daughter, who has been abroad for some time.

Beginning Saturday the local wholesale dealers will keep their places of business open until 5 o'clock Saturdays, instead of closing at 1 p. m. The retail stores will keep open for the same period. Some of them had closed at noon and 1 p. m. during July and August.

The movement to build a new city hall on the site of the market house appears to have been abandoned. The city had intended buying a large amount of property on Market Ave. and in Market St., to give the new hall an entrance, but from present indications this will not be done. If the plan had been carried through, the John M. Roberts & Son Co., J. R. Reed & Co., J. C. Gan & Co., and other jewelers would have been compelled to seek new locations.

Pittsburg jewelers are making great preparations for the sesquicentennial celebration which will be observed in this city from September 27 to October 4, and the indications are that great many strangers will visit Pittsburg at that time. Jewelers are looking for business to sell, especially souvenirs, and many of the dealers expect to do a very big business during the week of the celebration. It is estimated that there will be a large number of strangers in the city. The celebration will also be an "Old Home Week" event.

The Kintner Jewelry & Optical Co. has been incorporated in Painesville, O. O. Kintner, A. E. Kintner, Ray F. Kintner and others, to conduct a general jewelry and optical business at the old stand of E. Kintner, on Main St., at that place. O. Kintner will be general manager and concern.

## New York Notes.

Laubheim has entered a judgment for \$84 against Isaac Eisler.

W. Shattuck has moved from 31 Maiden Lane to 15 Maiden Lane.

C. Rueckert, of the Rueckert Mfg. Co., Providence, R. I., was in town last week.

Konijn, of Konijn, Frank & Shire, 65 Nassau St., sailed for Europe on the *Deutschland* Thursday.

Kupple bought out S. I. Ferkin, 2809 10th Ave., Aug. 21, and will continue the business at the same location.

The International Silver Co. has declared a quarterly dividend of 1 per cent. on its preferred stock, payable Oct. 1.

Leol Safford, secretary of the Jewelers' Board of Trade, returned to his desk today after an enjoyable vacation.

Silverberg, formerly manager of Eisler Bros., jobbers at 51 Maiden Lane, is no longer connected with that concern.

David H. Seckels, of William Seckels, 65 Nassau St., has returned from Europe, where he has been spending several months.

Cross & Baldwin, Attleboro Falls, Mass., have opened a New York office at 15 Maiden Lane, in charge of J. P. Benjamin.

Erving Strauss, formerly with L. Witsenhausen, has joined the forces of the E. Ritz Jewelry Mfg. Co., St. Louis, Mo., returning on his duties with this concern at St. L.

Dolph J. Grinberg & Co., importers of precious stones, have moved their offices from the Knox building, 452 Fifth Ave., to a building at 29 Maiden Lane and 58 Nassau St.

F. Rees, of Zimmern, Rees & Co., sailed, yesterday, on the *Kronprinzessin Sile*, on a buying trip to Antwerp, Amsterdam, Paris and London. He will be away five weeks.

Joseph Collins, watchmaker with George Merritt, Wilmington, N. C., was recently married in this city to Miss Rose Kessler.

The couple spent a short time in Washington on their honeymoon trip on their way back to Wilmington.

Wm. Naigles, formerly of Weiner, Garfield & Naigles, 15 Maiden Lane, has severed his connection with that concern, and with Wm. Wolfson has started in the manufacturing jewelry and diamond business at 73 Nassau St., under the style of Wm. Naigles & Co.

Colyer & Co., of New York, to deal in watches and jewelry, was incorporated last week with a capital stock of \$15,000. The directors are: Whitson Colyer, Freeport, L. I.; E. Fritts, Sag Harbor, L. I., and Harry C. McKay, 79 St. Edwards St., Brooklyn, N. Y.

The Board of United States General Appraisers, last week, overruled a protest of Albert Lorsch & Co., regarding the duty on a consignment of precious stones, sustaining the collector's ruling that the articles were composed of paste and were dutiable at 20 per cent. ad valorem.

Beauty pins composed of metal made to imitate gold are properly dutiable as jewelry for tariff purposes at 60 per cent., according to a decision of the General Appraisers last week. The matter came up on a protest of Geo. Borgfeldt & Co., claiming that they were dutiable at 45 per cent.

A beautiful trophy known as the Town

Topics Cup, which was awarded to the winner of the Lake George, N. Y., regatta last week, was made by the Gorham Co., which also supplied the cups awarded at the five preceding competitions. The trophy weighs 80 ounces, and was especially designed for the occasion.

Miss Edna Marie Kleinschmidt, the daughter of William Kleinschmidt and Joseph Hodupp, an operator on the Mercantile Exchange, were married Wednesday evening at the home of the bride's parents, 135 Stratford Road, Flatbush, Brooklyn. The maid of honor was Miss Louisa Arnold Card and the best man was W. O. Saxton, Jr.

Erle R. Sheppard, manufacturers' agent, 53 Maiden Lane, who carried the Elk Jewelry Mfg. Co.'s line of Elk goods for four years, has made a change and has taken a line of 10-karat gold lockets from Philip Tushnett, 64 Maiden Lane. Mr. Sheppard will travel in his old territory in Pennsylvania and the middle west.

Tiffany & Co. made the cup offered by the Automobile Club of North America as the grand prize to be awarded in the race at Savannah, Ga., on Thanksgiving Day. The trophy is of solid gold and weighs 25 pounds. It is 20 inches high and 14 inches in diameter across the bowl. Standing on the edge of the bowl is an eagle which holds a laurel wreath in its mouth. The cost was \$5,000.

Two young men, Franklin and Louis Wein, aged 17 and 20, respectively, were taken to police headquarters, last week, on the charge of robbing Abraham Diener, who claimed he was in the instalment jewelry business and lived at 282 2d St. Diener charged the men with attacking him when he entered the hallway of his home. Diener brought two detectives, who took the men into custody.

The retail trade is warned to be careful in dealing with a man who is said to be getting around New York, and under the pretense of buying jewelry, principally gold chains, getting away with one or two valuable articles. The man, who has visited retailers on both Eighth and Third Aves., is about 53 to 55 years old, and has grayish hair and mustache. He is said to be about five feet seven inches in height and weighs about 180 pounds. Apparently he is a foreigner, as he speaks with an accent.

The Jewelers Board of Trade notified creditors of Hugh Murray, of Danville, Ky., last week, to the effect that a compromise offered by Mr. Murray had been accepted by the majority of the creditors, the proposition being to pay 50 cents on the dollar out of the proceedings of the business as conducted under the supervision of the trustee. The first payment of 10 per cent. is now being made, and it is expected by the trustee that the remainder will be paid by December.

A claim filed by A. Steinhardt & Bros. was denied, Saturday, by the Board of United States General Appraisers, which decided that compound duties accrue under the tariff law on clocks containing movements. The firm imported china clock cases containing movements. The customs authorities imposed a tax of 60 per cent. ad valorem on the cases, while the movements were assessed at the rate of 40 per cent.

The importers claimed that the cases and movements were dutiable at a single rate of duty, but the General Appraisers decided against this contention.

The reports from Pittsburg, last week, telling of the arrest on the charge of burglary of a detective by the name of Beech, said that the prisoner had at one time robbed Tiffany & Co., of New York, of about \$10,000 worth of diamonds, for which crime he served a term in Sing Sing. At Tiffany & Co.'s it was said that the members of the concern had no knowledge of the crime referred to and did not recall any robbery in their establishment in which the man in question had been connected. They thought it was the usual case of using Tiffany & Co.'s name, as is done whenever any big jewelry house in New York is connected with an out-of-town story.

Treasury agents acting upon tips which they had received from Europe that certain men who were passengers on the Cunard line steamer *Carpathia* were engaged in smuggling jewelry, had a severe disappointment after they had held up the men and had taken from them a quantity of what appeared to be gem-set jewelry of a valuable nature. The men could not speak English and their explanation could not be understood, but when a deputy appraiser had been called to determine the character of the articles he told the Treasury agents that the supposed diamonds and gems were nothing but paste, and that the whole lot was not worth more than \$30; consequently was not subject to duty. The men were given back the jewelry and allowed to go.

An involuntary petition in bankruptcy has been filed in the United States District Court against Georges A. Glaenzer & Co., a corporation doing an art and interior decorating business at 33 E. 20th St., by attorneys for these creditors: H. B. Clafin Co., \$28; Harry H. Kutner, \$48, and Georges Brette Glaenzer, \$929. It is alleged that the corporation is insolvent and admitted in writing inability to pay its debts. The liabilities are about \$50,000 and assets \$26,000, and the trouble due to poor business and lack of cash. The business was started in 1870 by Georges A. Glaenzer and was incorporated in April, 1888, with a capital stock of \$50,000, with Georges A. Glaenzer, president. Edward S. Thomas has been appointed temporary receiver of the firm.

An event of importance in the silver trade has been the establishment of headquarters in Maiden Lane, where three silver lines not heretofore represented in the jewelry district, will be carried in the future. H. H. Collard, who for the past 21 years has been associated in the silver business, has opened an office in the Silver-Smiths' building, 15-19 Maiden Lane, and here now represents the Shepard Mfg. Co., Melrose Highlands, Mass., the E. H. H. Smith Silver Co., Bridgeport, Conn., and the Hartford Sterling Co., Philadelphia. For the Shepard Mfg. Co. he is showing a line of souvenir spoons and transparent enamel French novelties, while for the E. H. H. Smith Silver Co. he is carrying a full line of silver-plated flat ware, and for the Hartford Sterling Co. a line of sterling flat ware and plated hollow ware. Mr. Collard's offices have been ar-

**New York Notes.**

(Continued from page 79.)

aged with a view to the comfort and convenience of his patrons, and are handsomely fitted up in a way that shows his lines to the best advantage.

Customs officers removed a belt containing gold rings, watch chains and other jewelry from about the waist of Raimondo Muscatello, a passenger on the *Duca degli Abruzzi*, which arrived from Genoa and sailed Monday night. Edward Helgans and John Slattery, the special customs officers, then made further search and found gold plates, meerscham pipes, cigar holders and pieces of jewelry stowed away in the trunk that filled Muscatello's modest appearing luggage. The articles were seized.

Joseph Deckler, who conducts a jewelry store at 1615 Fulton St., Brooklyn, complained to the police of the Gates Ave. Store, last week, that his window had been broken for the third time, and although officers were detailed on the case they have been unable to locate the guilty party. The window was smashed twice within a week, last April, and the third time only on Wednesday morning. After the third occurrence Mr. Deckler was careful to keep everything of value out of his window when the store was not open, and as nothing was taken by the window smasher he believed that the act was done more in spirit of revenge than for the purpose of robbery, though the cobblestone used by the miscreant had made a hole large enough to admit out any or all the articles left on display. Mr. Deckler and his wife were sleeping in their apartments in back of the store, when the last break occurred, and though Mr. Deckler rushed right out there was no one to be seen, and he immediately telephoned to the police, who sent reserves there in a hurry. Mr. Deckler says he has strong suspicion as to the identity of the party who committed the break, though he has not evidence enough to cause the arrest.

David Leshner, who gave his address as 4 Georgia Ave., Brooklyn, and who said that he formerly conducted a jewelry store at 218 Grand St., Manhattan, was the complainant, last week, against two men and a woman, whom he claimed had been attempting to extort money from him. Leshner told the police that his store in Grant St. had been looted by burglars a year and a half ago and his loss caused him to go into bankruptcy. The woman against whom he made the charge, he said recently, demanded a bracelet and a watch and chain which she claimed she had left at his store to be repaired. She showed no repair ticket or other proof of her claim, and he refused to pay the \$75 which she demanded. Later, he said, she called at his home with two men who claimed to be private watchmen, and who, after displaying their shields as special policemen, threatened to arrest him if he did not give them each \$100 and \$50 to the woman. Leshner made an engagement to meet the men at 321 Broome St. the evening last week and had detectives waiting. After handing them marked bills the detectives arrested the pair and found a woman waiting nearby.

**Canada Notes.**

Out-of-town jewelers calling on the Toronto, Ont., trade last week, included: H. Richardson, Ingersoll, Ont., and J. Walker, Strasburg, Sask.

The cases against Nicolo Alleuric and Henri Delicato, arrested on suspicion of theft, have been withdrawn by Michaelson & Co., Montreal.

The store of A. E. Archer, Glencoe, Ont., was totally destroyed by fire on Wednesday morning last, entailing a loss on stock of \$3,000, insured for \$1,100.

Extensive alterations and improvements are being made in the refitting of R. Strachan's store, Fort William, Ont., the interior of which was recently badly damaged by fire.

The jewelry store of Harry Rubin, 487 Craig St., E., Montreal, was robbed on the night of Friday, Aug. 21, the thieves finding entrance by cutting a hole through the glass of the window. They obtained goods valued at over \$1,000.

As a result of the efforts made by R. Murphy, the general agent of the Canadian and American Express companies, in Montreal, new regulations have been made regarding outward customs brokerage which will prove of much convenience to merchants sending articles of moderate value across the border. A new schedule has been drawn up by Mr. Murphy and is now in effect. The changes are as follows: On all dutiable shipments, where the value does not exceed \$10, the charge for customs brokerage will be 25 cents, plus 20 cents, where formal entry is required. On all shipments where the value is above \$10 and does not exceed \$25, the charge for customs brokerage, including entry at a frontier port, will be 50 cents. On all shipments where the value is above \$25 and does not exceed \$100, the charge for customs brokerage, including frontier entry, will be 75 cents. Where the value exceeds \$100 the charge will be \$1. The chief change which will be appreciated by all classes of Canadian shippers is that whereas hitherto entries have been required on all shipments made to the United States, without regard to value under the new rule, no formal entry is required on articles of any description under the value of \$10.

**Jewelers' Gold Bars Withdrawn and Exchanged at New York.**

Week Ended Aug. 29, 1908.

The U. S. Assay Office reports:

Gold bars exchanged for gold coin.....	\$378,384.25
Gold bars paid depositors.....	68,465.34
Total .....	\$446,849.59

Of this the gold bars exchanged for gold coin are reported as follows:

Aug. 24.....	\$124,489.58
" 25.....	63,430.44
" 26.....	41,956.66
" 27.....	61,323.95
" 28.....	71,762.16
" 29.....	15,421.46
Total .....	\$378,384.25

A. Lombard, Des Moines, Ia., recently met with an accident while sailing in his steam launch, which necessitated the amputation of part of one of his fingers. The finger had become caught in the electric machinery in the launch.

**Newark.**

Improvement in business within the past few weeks and signs of still more in the near future are reported by the Newark Watch Case Supply Co., of Ward St.

The G. B. Ball Cutlery Co., of Rahway, has been incorporated, with a capital of \$20,000. The incorporators are Fred Knowlton, C. Q. Deau and M. V. Landeen.

James S. Holmes, formerly a manufacturing jeweler of this city and at one time associated with the late Isaac Alling, with his wife, last week, celebrated their golden anniversary of their wedding at their home, Day St. and Park Ave., Orange. Mr. Holmes retired from business about 20 years ago and has lived in Orange ever since.

Kohn & Co., of 26 Camp St., through Factory Superintendent William Skillman, have reported to the police the larceny from their plant of three bars of gold, valued at slightly over \$100. At the office of the company no statement is given out in regard to how the booty was secured, as it is believed certain information in the hands of the employers and of Detective-Sergeant Fred Kuhn, assigned to the case, will quickly solve the mystery.

Suspicion that an attempt might have been made to enter the jewelry store of Gustav Korn, 35 Broad St., Elizabeth, one night last week led to the proprietor being hurriedly summoned to his place of business in the small hours by Patrolman Fritz. Lights which had been burning in the store all night suddenly went out, and the officer believed some one was at work inside. No evidence of a break was discovered by Korn.

**Last Week's New York Arrivals.**

**THE CIRCULAR-WEEKLY** each day posts in its office a bulletin of the latest buyers visiting New York, which every member of the trade is cordially invited to copy.

*For the sum of \$10 (payable in advance), a daily list will be mailed or delivered during the Fall season (July 20 to Dec. 15), to the offices of those desiring this service.*

## Chicago Notes.

has J Jacobs has returned from a visit to the factory at Port Jervis, N. Y. The Jones Bros. have enlarged their shop in anticipation of a big Fall business. E. Cobb, representative of the Daggett & Lap Co., has returned from a trip north-west. W. Crafts, formerly at Greenland, Wis., has opened a new store at Neenah, Wis. L. Tribble has been engaged by Henry Wilson & Co. as salesman for Arkansas and Texas. Max Ellbogen, of the Stein & Ellbogen is having an outing with his family at Lake Harbor, Mich. A. Vanderburg, Los Angeles, Cal., was a recent visitor in Chicago, stopping over on his way east. J. A. Cohn, traveler for Rettig, Hess & Mosen, left, last week, for his territory in Kansas and Nebraska. W. R. Stevens, who represents the Bay State Optical Co., has returned after a three weeks' outing in Ohio. Wm. J. Diggs, manager here of the Chicago office of the Jewelers Board of Trade, returns this week from a trip east. H. Miller, representative of Hutcheson & Auestis, has just returned from a trip which included Cincinnati and St. Louis. F. Proehnow, of the Ft. Dearborn Watch & Clock Co., is taking a 10 days' fishing trip among the lakes in northern Minnesota. The creditors of Sigmund Ascher have received a final dividend of 8 per cent. recently. This makes a total of 20½ per cent. paid by his estate. Chas. H. Williams, Condon, Ore., after visiting the recent convention at Cincinnati, stopped here a few days and also visited his former home in Michigan. D. Carr, of the Ostby & Barton Co., Providence, R. I., accompanied by Mrs. Carr, after a visit to the Chicago office, spent a week at Mackinac Island. The creditors of Maison Nouvelle, in bankruptcy, were recently paid a dividend of 2½ per cent. Another dividend of this amount will be paid in a few months. C. Ostby, Jr., of the Ostby & Barton Providence, was a recent visitor to the Chicago office, as was also A. J. Mess, brooch man of the same concern. Peabody & Co. were recently incorporated to deal in jewelry, with capital stock

of \$10,000. The incorporators were: A. Peabody, L. C. Huppert and W. Friedman.

L. C. Howe recently bought his opening stock in Chicago preparatory to opening a new store at Edinburg, Ill. Mr. Howe was formerly employed in the jewelry business in this city.

Miss Mary F. Werne, daughter of Henry L. Werne, a salesman with C. D. Peacock, recently committed suicide by jumping into the lake. Temporary aberration, as the result of nervous prostration, is given as the cause of the act.

In the recent fire in the building at 67 Washington St., R. M. Johnson & Son were fortunate enough to escape with only slight damage and were only closed one day, while all other firms in the building suffered considerable damage.

M. O. Milligan, traveler for E. A. Dayton & Co. in Nebraska and Dakota, started on his trip last week. Miss Gertrude Rieden, for the past few years bookkeeper for E. A. Dayton & Co., left the latter's employ this week to take an extended vacation and a much needed rest.

Chas. G. Breitenbach & Co. announce in a recent circular letter to the trade the retirement of Louis Sachs and Julius Jacobson from the firm and the addition of David Oliver, until recently secretary of the Great Western Cereal Co., as secretary-treasurer and general manager of the corporation. Messrs. Sachs and Jacobson have returned to their retail business in Milwaukee.

In the belief that he is the man who attempted to dynamite the home of Antonio Lummia, a wealthy Italian jeweler, at 43 Gault Court, after demanding \$800, the police of the Chicago Ave. station are holding Samuel Saladeno, 22 years old, on a charge of carrying concealed weapons, while they investigate the more serious charge against him. Saladeno was arrested by Policeman McFadden, who is guarding the Lummia home.

Among the buyers in town recently were the following: W. F. Kirkpatrick, St. Joseph, Mo.; W. A. Sheaffer, Ft. Madison, Ia.; Walter Cramer, Clarinda, Ia.; Horace Cordy, Sedro-Woolley, Wash.; Sam Ayers, Denver, Colo.; F. A. Hannis, York, Neb.; S. P. Giddings, Sterling, Ill.; T. L. Coombs, Omaha, Neb.; J. H. Greer, Ft. Worth, Tex.; J. H. Hammon, Vincennes, Ind.; A. C. H. Baker, Appleton, Wis.; T. W. Kibbee, Grafton, N. Dak.; A. J. Lauch, Kankakee, Ill.; J. G. Grant, New

Albany, Ind.; E. H. Carpenter, Burlington, Ia.; S. E. Dickinson, Hartford, Wis.; Carl Oesterle, Joliet, Ill.; Will Chapman, Benton Harbor, Mich.; W. A. Tall, So. Haven, Mich.; G. P. Washburn, Chadron, Nebr.; Aug. Hinrichs, Clinton, Ia.; Frank Thayer, Rockford, Ill.; A. Michael, Green Bay, Wis.; A. Marks, Lawrence, Kans.; H. W. Slingsluff, W. Burlington, Ia.; A. P. Taliaferro and wife, Bunkie, La.; W. H. Cleaver, Dubuque, Ia., and L. J. Carter, Aledo, Ill.

## Kansas City.

### TRADE CONDITIONS.

There has been a marked improvement in business here within the past few weeks. Dealers say business is getting better every day and that the outlook for a large Fall and holiday trade is very encouraging. Traveling men who have been out in Kansas City territory report a good trade and say that dealers are buying liberally.

Otis Barr has entered the employ of the Owens Jewelry Co., Bartlesville, Okla.

Clarence Owens has entered the employ of Samuel J. Huey at Excelsior Springs, Mo.

Wilbur McCloskey has accepted a position with Stafford & Sanford, Marshall, Okla.

F. E. Nevin, of Nevin Bros., contemplates taking a short vacation at McAllister Springs, Mo.

W. F. Parker, a former student of the Kansas City Polytechnic Institute, has taken a position as manager for F. O. Adams, Bolivar, Mo.

The new catalogue of the Kansas City Horological and Optical School is the most complete in every respect ever issued by that institution. It is liberally illustrated and well printed.

The following out-of-town jewelers were in this city last week: H. W. Wallace Starke, Junction City, Kans.; George Bedell, Gallatin, Mo.; C. J. Benson, Lee's Summit, Mo.; Harrie Blake, of the Blake Jewelry Co., Muskogee, Okla.; G. W. Kerr, Bonner Springs, Kans.; I. E. Pettit, Downs, Kans.; Mr. Tucker, of the Tucker Jewelry Co., Higginsville, Mo.; John Gingeriek, Moberly, Mo.; O. A. Karnes, Overbrook, Kans.; Arthur W. Haley, Delphos, Kans.; C. A. Stevens, Niekerson, Kans.; J. J. Barker, Moline, Kans.; Richard Miller and wife, McPherson, Kans.; J. L. Duke, Fayetteville, Ark.

F. B. Sweet, who succeeded Mr. Kayser in Marshall, Minn., has gone into bankruptcy, with liabilities exceeding his assets by about \$4,000.

**THIRD EDITION**

# WORKSHOP NOTES

For JEWELERS and WATCHMAKERS

Revised and Enlarged

100 Pages New Matter

Containing 300 Pages (size, 7½x10½ inches), Bound in Cloth, Stiff Covers

A collection of the latest practical receipts on the manufacture and repairing of watches and clocks, and on the various processes entering into the manufacture and repairing of jewelry, as coloring, polishing, enameling, annealing, oxydizing, etc., in short, a thorough compendium of the numerous mechanical departments of the jewelers' and watchmakers' shop.

This book is the most useful, comprehensive and perfect publication for the workman at the bench, and should be in the hands of every jeweler and watchmaker in the country. It is the only book of its kind published.

PRICE, by mail postpaid, \$2.50

## JAMES L. HAND

14 Maiden Lane

NEW YORK

The Detroit "Free Press," July 1, 1908, says: "Hand has conducted the largest and most successful sales of fine jewelry ever held in America. His eloquence and wonderful descriptive powers hold his audience interested and at the same time command confidence in the quality and value of the articles offered."

You are referred to the following jewelers for whom I have lately conducted sales:

W. A. STURGEON & Co., Detroit, Mich.; Mrs. T. KIRCHER, Davenport, Iowa; R. S. & J. D. PATTERSON, Port Huron, Mich.; ISAAC BRUSH, Bridgeport, Conn.; L. C. SMITH, Gainesville, Florida; KENNEAR & D'ESTERRE, Kingston, Ontario, Canada; W. P. HITCHCOCK Co., Syracuse, New York.

Hundreds of letters of recommendation from the leading jewelers and wholesalers of this country.

*I will bring you experience, ability and results unequalled.*

Send for my booklet on Auctions. It will tell you of the "Hand" way.

**MY METHODS LEAVE YOUR REPUTATION UNSULLIED**

## Pacific Coast Notes.

W. F. Wooster, Suisun, was in Stockton, a week, on business.

The stock of jewelry of Miss Pierce, Auburn, is being sold out at Newcastle.

The stock of the Hanson-Pearse Jewelry Co., Oakland, is being sold in Berkeley, by A. Khne.

John S. Jepson, New York, who is visiting California at the present time is touring southern California.

The business of J. E. Russell, Riverside, has been purchased by A. W. Bates, who will take possession immediately.

The Naylor Gem Co. has resumed operations in its Mesa Grande tourmaline property, and now has a force of 12 men at work.

F. T. DeArman, Ontario, has presented a post-office there with an attractive time-piece. It has been placed in the lobby for the convenience of the public.

Walter W. McCausland has removed his store from the old site in Oxnard to a more convenient location in the same town. He has installed new fixtures and display cases. Charles R. Wallace, formerly of Washington, N. C., has purchased property in Paramount, Cal., and will construct a two-story business block there. He will occupy one of the stores with a stock of jewelry.

The store of S. A. Alexander, 215 S. 1st St., San Jose, was entered one night last week by burglars, and about 15 watches were stolen. This included all that could be taken inside the safe, the latter not having been molested.

Mark B. Elliott, for many years superintendent of a large mine in South Africa, is in Oroville, recently. In company with Mr. Conney he visited the property of the United States Diamond mine, near that city, and after an inspection of the property found that the indications that diamond-bearing ground existed there were unquestionable.

The exhibit of J. Jessop & Sons, San Diego, for the State fair, to be held at Sacramento during the first week of September, has been finished, and is now ready to be shipped north. The exhibit is valued at \$5,000, and consists mainly of San Diego county gems, the only foreign stones being a few diamonds and some pearls from lower California.

A clever jewelry thief is operating in the small towns around the Bay, and of late reports of his activities have been of frequent occurrence. The last place to be heard from is Vallejo, and it is said that he secured \$600 worth of goods from two firms there. It is known that a diamond brooch valued at \$180, and a Howard watch worth \$100 were palmed from one of the clerks at Andrew White's store, and that a George Bangle also lost stock. The man's scheme was to visit the stores and pretend to be anxious to purchase some article of jewelry. He then palmed a valuable article while the clerk's attention was engaged elsewhere. The losses were not discovered until the jewelry was checked up at night after the man had gotten away.

H. Morton, 1109 Broadway, Oakland, Cal., who, some years ago, succeeded to the business that had been established by the late Mr. Steffanoni, has secured a lease on

one of the most valuable pieces of property in that city at the corner of Broadway and 14th St., which, for almost a generation has been occupied by the firm of Taft & Penoyer. This firm will move shortly to a new store at Clay and 14th Sts., and, as soon as the removal is completed, the jeweler will take possession and commence the installation of fixtures. Artisans are now working on these fixtures, and it is intended to have them in place by the middle of October. The interior will be divided into a number of departments, and among these will be one for the display of cut glass. In addition to the retailing of jewelry he will also carry on a manufacturing enterprise of considerable magnitude, and expects to pay much attention to the repairing of jewelry. There will be 125 feet of window space for the display of stock.

## Denver.

C. W. Primrose, Grand Junction, was in this city for a few days last week.

W. E. Payne, of Boulder, has sold a half interest in his store to Mr. Crowder.

The Syman Bros. Jewelry Co. has engaged the services of Sam Woff as diamond setter.

John Marsh, of C. A. Marsh & Co., Attleboro, Mass., was in this city a few days of last week.

Mr. Burns, of Juergens & Andersen Co., Chicago, has returned to this city after a successful trip.

Dan Weil, traveling representative for I. C. Weil & Co., has returned to this city, after a successful trip.

Fred Syman, of the Syman Bros. Jewelry Co., will soon leave on a trip east to buy goods for his Denver store.

H. L. McLaughlin, with the W. W. Hamilton Jewelry Co., started out last week on his Fall trip with a line of samples.

Mrs. E. C. Veysey, wife of a well-known jeweler of Boulder, died last week. Deceased had been an invalid for several years.

E. L. Peisar, a jeweler of Glenwood Springs, was married recently. He and his wife visited Cheyenne during the Frontier Days Show.

The Buechner Jewelry Co., Cheyenne, Wyo., recently erected a large Howard St. clock in front of its store. At night it is lighted by electricity.

Mr. and Mrs. Inskeep were among those attending the Frontier Days Show, at Cheyenne, Wyo., last week. Mr. Inskeep is local manager here for F. A. Hardy & Co., wholesale opticians.

Mr. Lehman, of the Edward Lehman Jewelry Co., left last week for the mountains, where he will spend a short vacation. Mr. Jacoby, of the same firm, returned last week from Grand Lake, where he had been spending his vacation.

W. Rankin, of the Lewis Jewelers' Supply Co., is spending his vacation at Carter's Lake, on the Moffat road. James Lewis, of the Lewis Jewelers' Supply Co., has returned from his trip through the southern part of the State and Utah. He reports that there are good indications for the Fall trade.

Dan S. Park & Co., Cheyenne, Wyo., exhibited, last week, the sterling silver loving cups, presented by the Denver Post,

for the automobile races between Denver and Cheyenne. Faxon B. Park, manager of the Cheyenne branch of Dan S. Park & Co., was in town, on Monday of last week, en route to Lincoln, Nebr., to attend the convention of the Delta Phi Omega Fraternity, of which he is an officer. Dan S. Park left Thursday to attend the Frontier Show.

## Pacific Northwest.

F. C. Cooledge, Atheno, Ore., has decided to dispose of his stock there and move to a larger town.

F. W. Clarke, The Dalles, Ore., has been enjoying a vacation at Hood River during the past few weeks, but is now back at his store again.

A fire, last week, at Junction City, Ore., did much damage to that town, and among the losers was the firm of R. C. Roberts, whose store was insured.

Mr. Arnstein, of Arnstein Bros. & Co., New York, is visiting the trade in Portland, at the present time, and expresses himself as much pleased with business conditions there.

William Gardner, Oregon City, Ore., has enlarged his quarters by leasing the store next door, making his establishment double its former size. He is now putting in an additional stock and is extending his show windows across the entire front of the establishment.

Mr. and Mrs. Harry Hagen, Nome, Alaska, were in Georgetown, Wash., on a visit a short time ago, and will return home soon, from San Francisco, where they are now visiting Mr. Hagen's mother. Mr. Hagen is one of the most prominent jewelers in the northern city, and he reports that the business depression that swept over the United States was scarcely felt there, the only effect noticeable being the unusual number of men who have come there this season in search of employment.

## St. Louis.

Mr. Campbell, with Gustavus A. Carlson, Richmond, Mo., was a visitor in this city, last week.

O. L. Davis, New Madrid, Mo., is in St. Louis on a buying trip. Mrs. Davis accompanies him.

S. L. Loewenstein, of the Bauman-Massa Jewelry Co., is back from a trip through the southwest.

Among the out-of-town jewelers who visited the trade here, last week, were: Al. Gerber, Edwardsville, Ill.; T. E. Gonterman, Granite City, Ill.; J. A. Bainbridge, Marion, Ill.; W. J. Kirkpatrick, Oklahoma City, Okla.; E. K. Green, Greenfield, Ill.; I. B. Morris, Perry, Mo.

Burglars entered the store of Heiman Leve, at 1412 Franklin Ave., recently, and stole goods valued at \$500, on which there was no insurance. Entrance was gained through a rear window, from which the screen was pried. The watches, chains and rings taken were in a show case.

Frank Gaskins, Sunbury, Pa., supplied the loving cup which was presented by the officers of the Twelfth Regiment of that place, recently, to the company team making the highest score in the skirmish match at the local rifle matches. The cup is of silver, lined with gold.

### TRADE CONDITIONS.

An extended tour among the jewelers of both wholesale and retail, a few days ago, brought out convincing evidence that there is general improvement in conditions all along the line. There has been no special reason apparent for this in the presence of any unusual number of sales in the city, but it seems to be the result of a general though gradual improvement in all lines of business, and a feeling of confidence in the future. The opening of a large department store at 8th St and Broadway, the largest west of Chicago, has had a marked influence in bringing patronage in that direction. This means the presence of more people on S. Broadway, where a greater number of jewelry stores are now located, and these stores will undoubtedly reap considerable benefit from this new influence.

M. Renche, 235 S. Spring St., has been taking a vacation at the beach.

J. F. Wallace is now engaged in the work of taking his annual inventory.

B. Rodgers, Pasadena, has been taking a two weeks' vacation in Bear Valley.

V. A. Wheeler, with H. F. Wallace, spent Saturday and Sunday at Corona.

Harry Adams, of the J. P. Trafton Co., has returned from a vacation spent at the beaches.

Nicob Puddlin, optician, with F. Selkinghous, 502 S. Broadway, has returned from a pleasant visit to Coronado.

Walter Behrstock and Nate Meyer, traveling representatives of S. Meyer & Co., are away both on the road with their new lines.

J. Haviland, in charge of the French clock department of Brock & Feagans, has just returned from a vacation spent in the nearby foothills.

J. G. Koeberle, head watchmaker for J. O'Donovan & Co., is taking a vacation of two weeks. His place is being filled by Max Hirschfeld.

Geo. L. Bannister, 309 S. Spring St., has been spending a considerable portion of last month at Balboa, indulging in his favorite time of fishing.

R. H. Gilmore, of Gilmore & Lee, has returned from a business trip to San Diego. He says he finds business considerably improved in that city.

The New England Optical Co. has been established in connection with M. A. Goldman's store, 217 S. Spring St. It is under the management of M. F. Cagwin.

I. C. Bowden, head of the jewelry manufacturing department of Brock & Feagans, is a prominent athlete and is booked for a wrestling match at Venice, Sept. 5.

John Hartzberg, salesman for Julius Mesenberger, spent last week at San Francisco, having gone to that city to attend the wedding anniversary of a particular friend.

Edward Gerson, 545 S. Broadway, was the first jeweler in the city to have on sale the new buttons recently adopted by the U. S. These goods are manufactured in Gerson's own factory.

Mrs. S. Meyer and Miss Meyer, wife and daughter of the senior member of the firm of S. Meyer & Co., are spending five or six weeks in Chicago. It is Mrs. Meyer's first return to Chicago in 11 years.

Jewelers from nearby towns who have been here recently include the following: Leonard Hartfield and Geo. L. Dietrich, Anaheim; F. T. De Arman, Ontario; L. E.

Vaughn, Oxnard, and H. H. Hooper, Whittier.

Messrs. Hambright and Walsh have both gone out for business trips on the road. Mr. Walsh expects to be gone about two months. Mr. Hambright will make a shorter trip. Mr. Libs will remain in charge of their business during their absence.

Clem S. Glass, J. Jepson and C. T. Dunsmoor, of the H. J. Whitley Co., enjoyed an outing Saturday and Sunday, going by automobile to Long Beach, where they stopped at the Virginia Hotel. Mrs. Jepson and Mrs. Dunsmoor accompanied them.

E. E. Peck, president of the Los Angeles Gem Co., has again gone to the company's turquoise mines in Arizona for the purpose of pushing operations there. The factory in this city has been unable to get a sufficient quantity of turquoise to meet the demand of customers.

M. A. Goldman, who occupies the store at 217 S. Spring St. formerly occupied by the Angelus Jewelry Co., had a formal opening on Monday, Aug. 31, displaying at that time his new stock of goods. Previous to that time he had been disposing of the stock which he took from the Angelus Co.

The Southwest Turquoise Co. has found it necessary to enlarge its quarters, and has rented the floor above the store on N. Broadway. The upper floor is being used by the jewelry manufacturing department, the working force of which has been increased. The gem-cutting department will be enlarged soon. The company reports increased sales in the wholesale department.

The jewelry business, like all other branches of trade in this city, is gradually moving toward the southwest. M. R. Thomas, at 404 W. 7th St., with whom R. J. Lippold is associated as optometrist, and G. V. Lippold, watchmaker and manufacturing jeweler at 410 W. 7th St., both report very satisfactory business conditions. G. V. Lippold has a much larger and finer store than he formerly occupied on Broadway.

## Milwaukee.

F. P. Beswick, Racine, Wis., and John Armbruster, Cedarburg, Wis., were among the visiting jewelers here last week.

The senior member of the firm of Schneider & Son, Burlington, Wis., was a recent Milwaukee visitor, where he purchased new show cases and other equipment for his Burlington store.

E. H. Warnke & Co. are enlarging their plant. The working force at the establishment has been increased the past week by the addition of two new men and one other employe will be added this week.

Milwaukee jewelers have received with regret the news of the death of G. H. Frese, McGregor, Ia. Mr. Frese was a member of the firm of G. H. Frese & Bro., and was well known to jewelers of this city.

Jewelers have been viewing with disfavor the fact that several transient dealers have opened establishments of late, offering a line of wares for sale advertised as "drummers' samples of jewelry," and other goods in the so-called jewelry line. Considerable pressure was brought upon one establishment of this kind, and the proprietors have now left the city.

Leading and enterprising business men of Milwaukee, including several prominent

jewelers, under the name of the Milwaukee Live Wire Association, recently held a most successful banquet in the city. The meeting was held mainly for the purpose of forming a definite organization which will have as one of its principal objects the exchange of ideas related to the selling of merchandise by all legitimate means of publicity, including newspaper, street car, magazine, bill-posting and catalogues. Decision was reached that an organization to be known as the Milwaukee Advertisers' Association will be formed at a special meeting on Sept. 3. Louis Esser, the well-known jeweler, was one of the leaders in the movement to place Milwaukee on record with other large cities in the possession of an enterprising advertising association.

## San Francisco.

### TRADE CONDITIONS.

During the past few weeks there have been several large fires in the present districts and jewelers are afraid that if they stay there they may suffer a heavy loss. Insurance men are demanding heavy rates on policies on temporary structures and this is one reason why dealers carry very light stocks. Those who have moved downtown say they are doing a very satisfactory business. Many of the available stores in that district are now leased. The removal of the Emporium to Market St., next month, will, it is thought, have much weight in causing others to make a speedy removal. The jewelry department of this store will be fitted out on a scale of grandeur more pronounced than before the fire and is preparing to carry a stock fully twice as large.

The capital stock of the Morgan & Allen Co. is to be increased from \$100,000 to \$200,000.

Alois Pallhammer, a local engraver, asks to be declared a bankrupt. He schedules his liabilities as \$2,064.83, with assets of \$60.20.

Nordman Bros. Co., 717 Market St., have been designated as representatives on this coast for the cut glass line of Taylor Bros. & Co., Philadelphia, Pa.

During the past week detectives have been searching many of the local pawnshops for jewels which are said to be hidden there, and which are stolen property. The information comes from R. R. Burke, alias E. J. Boecke, who is now serving a sentence in Sing Sing prison for larceny.

Fred A. Smith, formerly with Radke & Co., is now in possession of a store of his own at 1718 Devisadero St. Shortly after the fire Radke & Co. established a store in this vicinity and conducted it as a branch after the removal to Van Ness Ave. and Bush St. This branch was closed this Summer, and feeling that there was need for a first-class establishment in this neighborhood Mr. Smith branched out for himself.

Alexander Green, who was convicted, several weeks ago, of stealing diamonds from several of the leading jewelers of this city and substituting ones made of paste, has just been sentenced to six years' imprisonment in San Quentin. Upon his arrest Green pleaded guilty, and on this ground his attorneys fought for a light sentence, claiming that he had saved the State the cost of a protracted trial and had aided the police in the recovery of the stolen gems.

E. L. Piesar and Miss Lillie Englebrecht, both of Glenwood Springs, Colo., were married, about a week ago.

## Indianapolis.

### TRADE CONDITIONS.

Local jewelers, retailers as well as wholesalers, are preparing for State Fair, which opens here next Monday and continues all week. It is estimated that 200,000 visitors will be in the city during the week, and it is expected they will make considerable business for the jewelers, as they have in past years.

Allen Pickett has returned from an eastern trip.

F. M. Herron is enjoying a few weeks at Bay View, Mich., where his family is spending the Summer.

A pleasure trip to New York, Boston and other eastern points will be made the latter part of September by George B. Dyer.

A. P. Craft, of A. P. Craft & Co., has gone to Wisconsin to look after his mining interests, but expects to return next week.

William Reed is visiting friends and relatives in Terre Haute, Danville and other points in Illinois, and will return next week.

Elmer Stokes, a watchmaker employed by George S. Kern, is taking a two weeks' vacation. He will make an eastern trip after a few days' rest at home.

Miss Maey Coughlin and Miss Kate Layman, young society women, spent last week at the Arts and Crafts Shop, turning out some original designs in gold and silver rings.

After a pleasure and business trip to Atlantic City, New York City and Providence, R. I., Lon R. Mauzy has returned and is getting his new stock in shape for the holiday trade.

Among Indiana jewelers in the city last week were: Chas. G. Wildt, Veedersburg; John Bauchert, of Bauchert & Axline, Noblesville; A. B. Johnson, Sheridan; E. Rossier, Martinsville, and Geo. W. Clemons, Greenwood.

After a search of several days, Chester Cash was arrested here, last week, by Detectives Gerber and Larsh and held as a fugitive until officers from Sheridan arrived to take him in charge for larceny. Until recently Cash was employed by A. B. Johnson, Sheridan.

Joseph T. Head, who, a few weeks ago, purchased the stock of G. F. Reber, is now comfortably located in his new quarters at 17 Virginia Ave. He has installed new fixtures and added to the stock, and now has a most attractive salesroom. He was formerly with Charles Snavely.

A. B. Johnson, Sheridan, was in this city last week, and reported that he had purchased the stock of J. L. Hastings and had combined the two stores. Mr. Hastings has returned to the east, where he was located many years, and expects to engage in the jewelry business as soon as he can find a suitable location.

Students of the Arts and Crafts Shop are preparing a reception and picnic in honor of Chas. B. Dyer, head of the school, following his return this week. He is expected home on Saturday, after a 70 days' tour of Europe personally conducting a party of 12. The picnic will likely be held at Riverside Park.

L. Markowitz, of the I. Grohs' Jewelry Co., returned, last Friday, after a two months' trip through Texas. He is very enthusiastic over the outlook in the southwest, and States that conditions continue to improve. He will return to Texas about

Sept. 15, to remain several weeks, visiting points he missed on the trip just concluded.

S. Jette Shepard, with Hoffman & Lauer, and Miss May Harrison, daughter of Mr. and Mrs. Charles Harrison, were married at the home of the Rev. Austin Hunter, on Kenwood Ave., last Tuesday evening. It had been intended to have the ceremony performed Wednesday evening, but because of a demonstration planned by friends the date was changed.

H. S. Gray, Madison, was in the city a few days ago, exhibiting a season ticket to the first Indiana State Fair, held at Madison, in 1854. It was worn by his father, James Gray, and was printed on a blue silk ribbon, which is fairly well preserved, although it has assumed a yellow tinge. H. S. Gray is the father of A. W. Gray, of Gray, Gribben & Gray, of this city.

## Cincinnati.

Henry Korf, 625 Main St., is enjoying a long pleasure trip among the eastern cities.

Lee Loeb and Mayo Loeb, of Herman & Loeb, have started on their respective trips west and south.

George H. Newstedt, 4th St., is closing out his cut glass department in order to extend his other lines.

A. C. Wallenstein, of Wallenstein, Mayer & Co., left this week on a business trip through Indiana and Ohio.

J. F. Talbot, president of the Dennison Mfg. Co., was a visitor at the local office of the company the past week.

The engagement of Edgar Kohn, of D. Jacobs & Co., and Miss Sara Mayer, of Walnut Hills, was announced last week.

Burton Fox, of Fox Bros. & Co., has just returned from Amsterdam and reports business in diamonds is improving in Europe.

The Icy-Hot Bottle Co., of Cincinnati, was incorporated Aug. 25, with \$20,000 capital. The incorporators are: George P. Altenberg, J. M. McCrea, Homer Bradford, Martin L. Glenn and B. E. Breitenstein.

Eugene Mahy, of the E. Mahy Co., has severed his connection with this company as manager, and will locate in the diamond business in San Francisco, Cal., early this month. Gebhardt Bros., connected with this company, have taken over the business.

H. Gilsey, of S. & H. Gilsey, was quite busy last week, as one of the committee on entertainment for the visitors attending the Merchants & Manufacturers' Association convention, held here at that time. Local jewelers aside from contributing toward the entertainment took no part in the convention, having just had one of their own.

Lee Kahn, of Lindenberg & Fox, is in the Jewish Hospital suffering from a badly broken knee-cap he sustained, last week, in Kentucky, in the vicinity of Somerset. Mr. Kahn was making a part of his trip in a runabout, and while going down a hill the horse became frightened and severely kicked him on the knee and leg. The injury was so serious that an operation was thought necessary.

Out-of-town jewelers in this city last week, purchasing stock, included: C. P. Williams, Olivebranch, O.; J. W. Tufts, Loveland, O.; J. E. Coehran, Tipton, Ga.; Mr. Dufen, Demopolis, Ala.; Charles Sieglitz, Vevay, Ind.; M. A. Selbert, Frankfort,

Ky.; H. J. Miller, Cross Plains, Ind.; Joseph Lees, Butler, Ky.; R. H. Dilley, Cambridge, O.; R. T. Willing, Paris, Ky.; F. Ireland, West Milton, O.; N. H. McCoffsky, Huntington, W. Va.; S. A. Bogyne, Mobile, Ala., and A. Wahra, Dalton, O.

## Cleveland.

Webb C. Ball was in New York, Saturday.

Geo. W. Eroo, of Scribner & Loeb Co. has just returned from a flying trip to Chicago.

Jos. C. Goodman, of the Goodmae Br Co., Columbus, was in this city for a few hours recently.

Col. John L. Shepherd, of the New York office of the Keystone Watch Case Co., was in this city last week.

H. W. Burdick, of the Bowler & Burdick Co., is at present on a business trip in large cities of the east.

E. H. Dutter and wife, of the Cowell Hubbard Co., are spending two weeks at East Moriches and New York.

E. D. Rider, vice-president, and F. Reeves, superintendent, of the South Broadway Watch Co., were in this city recently.

H. A. Weideman, missionary and lecturing representative of the Hamilton Watch Co., was a visitor in this city, last week.

Geo. W. Hook, of the Webb C. Ball Watch Co., has just returned from his vacation, spent along the New England shore.

H. A. Winn, Indianapolis, Ind., ran out last week from Cedar Point, where he was spending several days with his wife and family.

Mr. and Mrs. Geo. W. Scribner and their son, Clarence Scribner, left, Saturday, for F. P. Potter in his touring car for West Hill, R. I.

Wesley B. Webb, jeweler and watch inspector for the Grand Trunk Railway, Allendale, Ont., is spending some time in this city with his son.

Herbert W. Burdick, III., made his first appearance in this city about a week ago. The mother is doing very nicely and father and grandfather have cigars read.

A representative of the Elgin National Watch Co. has been distributing in Cleveland, lately, a very handsome window about two by four feet in size. It is transparent in beautiful colors, and at least retailers now have them in their windows.

The following jewelers visited Cleveland during the past week: C. F. Hill, Akron; C. N. Hibbard, of the Hibbard Jewelry, Akron; Ed. Rossel, Orville; C. F. Garret, Newton Falls; F. R. Montgomerie, dusky; A. E. Oyster, Alliance; J. C. Shull, Alliance; F. H. Buxton, Granville; Barr, Ashland; Jos. Emby, Richwood; E. Kintner, Painesville.

Several jewelers throughout the country have recently made use of a unique device in order to attract attention to their windows. The dial numbers are painted on the glass of the show window, and the clock apparently consists merely of hands, which seem to indicate the time with a fair amount of accuracy and order without any mechanism.
