## LEARN JEWELERS ENGRAVING

"The Engraving School that Graduates Experts."  
A fascinating, high-salaried and easily learned  
trade, taught thoroughly and practically by cor-  
respondence. Your instructor is the foremost  
authority and master workman in the world. We  
will teach the beginner better engraving by cor-  
respondence than he can gain in years of rigid  
apprenticeship. We will improve the skill of  
any engraver one hundred per cent. and make  
him master of the trade. The demand for com-  
petent engravers far exceeds the supply.  
Send for handsome, illustrated prospectus.

ISSUE OF AUG 25 1908

**896,734. ALARM-CLOCK.** EDWIN B. LAPHAM and JAMES WALKER, New York, assignors to the Seth Thomas Clock Co., Thomaston, Conn. Filed Sept 25, 1907. Serial No. 394,434. Renewed June 3, 1908. Serial No. 436,470.  
A combination a clock movement, an alarm mechanism, holding means normally preventing alarm mechanism from operating, let-off means operated by said clock movement and adapted to release said holding means and allow alarm mechanism to operate until said holding means is reset by hand, hand-operated resetting

means adapted to restore said holding means to normal position to stop said alarm mechanism, means to automatically restore said hand-operated resetting means to normal position, and hand-operated setting means adjustable with relation to said clock movement and adapted to set said let-off means for operation at a predetermined time.

**896,772. APPARATUS FOR FILLING FOUNTAIN-PENS.** PATRICK J. SULLIVAN, East Orange, N. J. Filed April 15, 1908. Serial No. 427,099.  
An apparatus for filling fountain-pens comprising a well to contain ink having a bore for the suction of a fountain-pen, an air pump connected

with the well, a reservoir having an outlet in the well, and automatic means for closing the outlet of the reservoir when a pen is in place.

**896,810. PIN.** GEORGE W. DOVER, Cranston, R. I. Filed March 19, 1908. Serial No. 422,073.  
In a pin of the type set forth, the combination with a base plate of journal ears cut inwardly

from the the margin of the plate and extending upwardly from the plate at points remote from the margin of the plate, a catch member also cut inwardly from the margin of the plate and extending upwardly from the plate at a point remote

from the margin of the plate, an ornamental front plate, and a flange upon the front plate overlapping the entire margin of the base plate.

**896,852. METHOD AND MOLD FOR MAKING HOLLOW WARE.** GEORGE H. MCKEE, Cambridge, Mass. Filed April 17, 1907. Serial No. 368,616.

A mold for making hollow ware articles out of dry clay, comprising inner and outer members separated by an intermediate space which surrounds the inner member; said space being adapted

to be filled with, and the upper end of the inner member adapted to support a layer of dry, pulverized clay to form respectively the sides and end of an article, the members being relatively movable longitudinally and the inner member contractible so as to shorten and compress the sides of the article.

**896,864. FOUNTAIN-PEN.** WALTER A. SHEAFER, Fort Madison, Ia. Filed March 2, 1908. Serial No. 418,748.

A device of the character specified embracing an outer casing formed with a longitudinally extending slot, longitudinally spaced guide pins arranged at the outer end of the casing, an elastic ink reservoir arranged within the casing, a compressing plate arranged between the reservoir and casing, one end of said plate being formed with longitudinally spaced apertures to receive said

guide pins, an operating lever pivotally mounted in the slotted portion of the casing, the free end of the former being designed to engage and move the compressing plate into compressing position when the free end of the lever is swung outwardly and locking means for normally retaining the free end of said lever in inoperative position.

**896,865. LINKED CHAIN.** ALBERT SPEIDEL, Pforzheim, Germany. Filed Nov. 22, 1907. Serial No. 403,352.

A chain of alternating links, one form of link comprising a frame  $a^1$  having end members  $e$   $e$  and side flanges  $a^2$   $a^2$  with recesses  $c^1$   $c^1$   $c^2$   $c^2$ , and the other form of link comprising a strip  $b^1$  having laterally projecting members  $d^1$  and flanges

$b^2$   $b^2$  in which are recesses  $b^3$   $b^3$   $b^4$   $b^4$ , each link being bent together upon a medial line and assembled by engaging the adjacent members  $e$  between the counterpart recesses  $b^3$   $b^4$  and the counterpart members  $d^1$  in the counterpart recesses  $c^1$   $c^1$  and  $c^2$   $c^2$ ; together with springs interposed between the end members  $e$   $e$  and the fold of the strips  $b^1$ .

**896,924. MACHINE FOR CUTTING JEWELERS' SOLDER.** GEORGE LIEB, Newark, N. J. Filed March 3, 1908. Serial No. 418,944.

A machine for cutting jeweler's solder comprising a body portion having a block with a cutting edge thereon, a lever rocking on the frame and having a plate with a cutting edge to register with the

cutting edge of the block, means for operating the lever, a plate sliding on the cutting plate and adapted to limit the entering of a strip of solder between the cutting plate and the cutting block, means for operating the sliding plate, and a visual indicator on the operating means.

**896,930. ALARM-CLOCK.** ELIJAH McCOMB, Johannesburg, Transvaal. Filed Jan. 27, 1908. Serial No. 412,805.

In a device of the nature described, in combination, the cabinet provided with the hinged door 6 in which is formed an aperture 11, the alarm clock 12 fixed in said aperture 11, the means for suspending the cabinet comprising the brackets 7

and cord 8, the fastener 9 to the door, the cells 16, 17 located in the cabinet, the conductors 18, 19, the bell 27 and the switch 28 fixed to the outside of the cabinet and interposed in the electric circuit, the contact maker fixed to the door 6 and comprising the bracket 20 and plates 21, 22, and the plate 15 attached to and actuated by the alarm spring spindle 14 to close the circuit when the alarm mechanism is released.

**896,944. SCARF-PIN OR SIMILAR ARTICLE.**

ALEXANDER W. ROTHSCHILD, New York, assignor to Rothschild, Bros. & Co., New York. Filed March 18, 1908. Serial No. 421,882.

A device of the character described, comprising

a shank, a bar secured thereto, an ornament carried by the bar, a head, and a box secured to the head and adapted to receive the bar.

**896,988. BRACELET.** PAUL L. HANSEN, Providence, R. I. Filed Sept. 30, 1907. Serial no. 395,116.

A bracelet composed of a plurality of units each consisting of a shell, a U-shaped link connecting

two adjoining shells and a coiled spring surround-

Fig. 1—shaped portion of the connecting link with the shell

897,019. ELECTRIC CLOCK MECHANISM. GEO. H. RUPLEY, Schenectady, N. Y., assignor of one-half to Frank J. Seabolt, Schenectady, N. Y. Filed April 2, 1906. Serial No. 309,256.

The combination with clock mechanism, of a winding mechanism therefor comprising an electric motor positively connected to said mechanism, permanently contacting members controlling the

motor circuit arranged to maintain the motor circuit closed for a predetermined period, and means for disconnecting the motor from the winding mechanism when the armature circuit is opened.

897,020. ELECTRIC CLOCK WINDING MECHANISM. GEORGE H. RUPLEY, Schenectady, N. Y., assignor of one-half to Frank J. Seabolt, Schenectady, N. Y. Filed Oct. 29, 1906. Serial No. 340,989.

The combination with clock mechanism, of a winding mechanism therefor including an electric motor and means for periodically controlling the

motor circuit, said means comprising movable members permanently in contact, one of which is driven by the clock mechanism with the motor circuit open and the other by the winding mechanism with the motor circuit closed.

897,058. SAFETY WATCH-POCKET. MARY E. BROWN, Pittsburg, Pa. Filed Jan. 18, 1908. Serial No. 411,476.

A safety watch-pocket comprising a bag, two pivoted members carried thereby, clamps normally holding said members in a closed position, each

of said members being bent to provide a central collar section for the reception of a watch stem, said collar sections opposing each other and adapted to inclose the watch stem, lugs carried by one of said members, a cap section fitted upon each of the collar sections and adapted to encircle the watch stem, and a safety-pin extending through said lugs and having a bent portion conforming to the shape of said pocket.

DESIGNS.

39,450. BACK FOR BRUSHES, MIRRORS, OR SIMILAR ARTICLES. HENRY J. HERBERT

Detroit, Mich. Filed May 1, 1905. Serial

No. 430,408. Term of patent 7 years.

6, 1908. Serial No. 437,206. Term of patent 3 1/2 years.

BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS, 1907 FROM Illustrated Official Journal.)

ISSUE OF AUG. 12, 1908.

9,240. CLOCKS. M. MOLLER, Altona Elbe many, April 20.

Electric Clocks; Winding-Mechanism. In electric clocks the armature 6 is attached to a wheel arm 16 which has a ratchet connection with minute-arbor 7 and carries an arm 17 with a pin 18 adapted to open or close the circuit of electro-magnets 1, 2, by pressing together or separating the spring-connected levers 19, 20

working around the piece 22 on the latter circuit being closed, the pin 18 is in contact with the lower edge of the lever 19, and, as the armature is attracted, works along the upper edge of the insulating-portion 22, keeping the circuit closed until it escapes from the levers, when spring 24 presses the insulated piece against lever 19. The pin then passes round the upper edge along the underside of the portion 22, and both levers against the action of the spring until it escapes past the beveled edge 23 into contact with the lever 19.

9,411. STUDS, DRESS FASTENINGS.

A. J. MASON, Edgbaston, Birmingham April 23.

The invention is described with reference to two-part collar studs, but is also applied to

velvety fastenings and the like. The head portion of the stud has a divided tubular stem 7, 8, slides in the shank 2 of the other part A, and the two parts are put together, the conical end 9 of the split stem springs over a knob at the bottom of the shank 2, and the parts are locked by means of a sleeve 10 which is fitted to a central pin 12, and pushed down into a head 14 fastened to the pin. In various positions, the sleeve has extensions which project through the top B of the stud, and the central pin may be dispensed with.

5. **JEWELRY** J. BAKER, Birmingham. App. 24.

pendant formed from a one-piece metal, the distance-piece A<sup>3</sup> situated between the plates A<sup>1</sup>, A<sup>2</sup> has a turned-up catch end G

connecting projection B which enters the hole in the stem. The edges of the plates A<sup>1</sup>, A<sup>2</sup> and the stem A<sup>3</sup> may be beveled.

Complete specifications accepted July 29, 1908.

22. **BRACELET.** ART.

23. **BUCKLE.** MARTIN. 1908.

24. **HAT PIN.** PATTERSON.

25. **BUCKLE.** JACOBS.

26. **CHATELAINE BROOCH.** WITHERS.

27. **CURLING-IRON.** RICKARDS.

28. **MATCH BOX.** NELSON.

Applications filed July 20 to July 25, 1908.

29. **PENHOLDER.** E. T. BUER and J. R. GLEDHILL, Birmingham.

30. **BRACELET.** ALFRED NOEL and SIEGFRIED SIMON, London.

31. **INKSTAND.** JOSEPH PRZYGODA, London. Complete specification.

32. **NECKTIE SECURER.** DAVIS ZAIDEN, London. Complete specification.

33. **BELT.** W. J. MYATT, Birmingham. Complete specification.

34. **HAIR-PIN.** G. E. OSMOND, London.

35. **TIME-RECORDER.** A. J. BOULT, London. Complete specification.

36. **HOLDER FOR WRIST BAGS.** ERNEST JOHNSON, Glasgow.

37. **BUCKLE.** EDWARD GUNTER, London.

38. **EYEGLASSES AND SPECTACLES.** HART SPEAR, London.

39. **EAR-ORNAMENT.** PHILIP ANTROBUS, Birmingham.

40. **BROOCH.** WILLIAM STUBBS, Manchester.

Complete specifications accepted Aug. 6, 1908.

41. **HAT-PIN.** MUNDY.

42. **TIME-RECORDER.** HEWITT & HEWITT.

43. **CLOCK-REGULATOR.** BUHLER. 1908.

44. **REPEATING ALARM CLOCK.** NEWTON.

45. **INKSTAND.** OSGOOD.

Applications filed July 27 to Aug. 1, 1908.

46. **SCARF CLIP.** W. E. PATTERSON, Birmingham.

47. **KNIFE AND FORK.** W. J. HOULGATE, Fleetwood, Lancashire.

48. **NECKTIE-RETAINER.** CAROLINE J. F. HIGHFIELD, South Croydon, Surrey.

49. **TIE-HOLDER.** A. F. BERGDAL, London.

50. **BROOCH PIN.** P. H. FAULKNER, Birmingham.

51. **FOUNTAIN-PEN.** CLEMENT ARRIGONI and WILLIAM SCRIVENOR, Lower Edmonton.

52. **UMBRELLA.** JEPSON CHARLESWORTH, London. Complete specification.

53. **TIE CLIP.** R. A. ELIOT, London.

16,087. **FOUNTAIN-PEN.** W. A. HOUSTON, London.

16,422. **COMB.** ROBERT THOMAS and FERDINAND CRASSER, London.

16,429. **TIME RECORDER.** C. A. MERCIER, London.

16,254. **NECK ORNAMENT.** PHILIPP DOPPEN-SCHMITT, London. Complete specification.

16,364. **BRACELET.** JOHANN OTT, London.

### UNITED STATES PATENTS THAT HAVE EXPIRED.

[Reported especially for THE JEWELERS' CIRCULAR-WEEKLY by R. W. Bishop, Patent Attorney, Washington, D. C.]

Issued Aug. 18, 1891.

157,806. **LAPIDARY'S TOOL.** JOHN MESSAZ, Geneva, Switzerland.

157,888. **TOOL FOR MAKING WATCH CHAIN SWIVELS.** J. E. POTTER, Providence, R. I., assignor of one-half to P. A. Fuller, Johnston, R. I.

157,895. **BUCKLE.** G. E. ADAMS, Providence, R. I.

157,973. **BOUTONNIERE HOLDER.** A. H. OVERMAN, Springfield, Mass.

458,367. **CANDLESTICK.** F. W. JENKINS, Brooklyn, N. Y.

458,372. **ELECTRIC ALARM CLOCK.** J. O. NEWTON, New Haven, Conn.

458,445. **CLOCK CASE.** JOHN DEJULIO, Batavia, N. Y.

458,459. **SECONDS-HAND DEVICE.** NICHOLAY JENSEN, Washington, D. C.

458,460. **STOP-WATCH.** NICHOLAY JENSEN, Washington, D. C.

458,485. **CLASP.** J. V. PILCHER, Louisville, Ky.

458,499. **THIMBLE.** G. O. ROGERS, St. Louis, Mo.

458,544. **SUSPENDERS-ATTACHMENT.** CURTIS DUNHAM, New York, assignor of one-half to Lottie E. Stein, same place.

458,546. **WATCHMAKER'S TOOL.** JACOB FISHER, Elizabethtown, assignor to E. F. Bowman, Lancaster, Pa.

Design issued Aug. 27, 1901, for 7 years.

34,989. **BROOCH.** ALBERT WITTMAYER, New York.

## Lancaster, Pa.

### TRADE CONDITIONS.

Lancaster jewelers are optimistic, and, besides taking a hopeful view of the situation, looking for improved trade this Fall, they say that business is now considerably better than it was a year ago.

Mrs. Anna Klein, optical specialist, has reopened her office here.

Charles F. Bowman has returned from Atlantic City and Mount Pocono.

S. Kurtz Zook, with his wife, has just returned from a week's visit to New York.

Walter Leonard, Shreveport, La., who was formerly with L. C. Reiser, of this city, visited Lancaster, last week.

Elbridge Wisner, with John B. Roth, Jr., is on a trip to Boston with his sister. They will make most of the journey by trolley.

George R. Weber, of Louis Weber & Son, and his wife, are home from a two weeks' trip to New York and the White Mountains, made in an automobile.

John B. Roth, Jr., visited Philadelphia last week, and he and Abram L. Barr, with Aug. Rhoads, were among the Masons who attended the Lodge of Perfection picnic at Wild Cat Falls, near Marietta, Pa., on Aug. 25.

Arthur Hanaway, a jeweler of Meadville, Pa., has entered the Ezra F. Bowman Technical School as a student in engraving. John Shoher, a Lancaster student, has returned from a trip to Atlantic City. Lee B. Spielman, Hagerstown, Md., another student, has taken a position with D. E. Kennedy, Cordele, Ga. He left for that place Aug. 25.

Mrs. B. F. Henry, 38 Conestoga St., this city, last week, found two pear-shaped pearls in a sea bass she was preparing for cooking and a local jeweler valued them at \$75. Harvey Barto, of 9 N. Queen St., also found a pearl last week in a plate of clam soup, but he broke it. It was examined by a local jeweler who said he would have given \$100 for it if it had not been broken.

Among the jewelers recently in Lancaster were: H. H. Leitzel, Mifflinburg, Pa.; Artemus Bucher, Springfield, Ill.; Mr. Yoselowitz, Steelton, Pa.; Jonas Porter, Columbus, O.; J. Levin, Steelton, Pa.; Max Bauman, Indianapolis, Ind.; Henry Fohl, Columbia; Stephen Kinard, Memphis, Tenn.; Anthony Slater, Baltimore, Md.; E. P. Zane, Christiana, Pa.; J. M. Kreider, Ephrata, Pa.

J. P. Kelker, belonging to a prominent Harrisburg family, was arrested in Chicago early last week on a couple of charges, one of which was forging his father's name to a check for \$50 which he gave to W. W. Appell, of this city, in payment for a purchase, receiving \$20 in change. He has been brought to Lancaster to stand trial. Kelker has only recently finished a five years' sentence in the Auburn prison before operating in Lancaster.

Jacob Lysakowski, a jeweler of Lebanon, Ill., and Mrs. Annie Gregory, St. Joseph, Mo., were recently united in marriage.

About 1:30 o'clock one morning, recently, two negroes attempted to break the show window in the store of J. J. Mercer, 416 Mulberry St., Macon, Ga. The noise made by the negroes awakened several families who live above the store and the robbers were frightened away.

# Now It's The Lord Elgin

The demand to-day is for thin watches.  
The public have been waiting for the  
thin Elgin Watch—now it's here—

## LORD ELGIN

The  
Thinnest  
Watch  
Made  
in  
America  
with  
Enamel Dial

the thinnest watch made in America  
with enamel dial.

Like all Elgin Watches—it was not  
put on the market until worthy to compare  
with it the Elgin reputation for reliability.

Every Lord Elgin is cased at the factory  
and timed in the case—the most  
accurate thin watch in America.

Four grades—7, 15, 17, and 19  
Jewels adjusted. 18K and 14K solid  
gold cases, also 25 year filled cases.

Furnished with metal dials, plain or  
engraved, gilt or silver.

Prices furnished on application by  
your jobber, or write the Company for  
only authorized price list.

**ELGIN NATIONAL WATCH COMPANY**

Factories, Elgin, Ill., U. S. A.      New York Office, 15 Maiden Lane  
General Offices, 131 Wabash Ave., Chicago

# THE HOROLOGICAL REVIEW

## Origin and Development of Tower Clocks.

Written expressly for The Jewelers' Circular-Weekly by Chas. A. Brassler.

The recent announcement of a public test of the automata attached to a remarkable clock, installed in the tower of Munich's beautiful new city hall, has reawakened public and especially professional interest in the important place these timepieces at one time occupied in municipal government and the general attention bestowed on their peculiarities and performance.

While the construction of such curious and complicated timepieces has not attained in the United States any such importance, none the less true that, astonishing as has been the development of the mechanic art in this country, it has been manifested in few other lines in as striking a degree as in horology, including all its products, from the smallest ladies' watch to the largest tower clock.

Considering the fact that it is not so many years since the first Yankee clocks, constructed with wooden wheels, were made in Connecticut and Massachusetts and peddled about the country, being often left on trial to the farmers to warrant confidence in their performance, the tremendous strides America has made in this interesting field can only be marveled at.

From the first crude specimens turned out by the pioneers in the trade, many of which are still in existence and doing good service, to the gigantic clock with its 40-foot dial recently set up on New York Harbor, is certainly a far cry. Despite the great perfection attained in tower clocks in America, they are not by any means as numerous in this country as they should be, considering the wealth of the country and the recognized munificence of its well-to-do citizens.

While the larger cities are probably plentifully enough supplied with accurate public timepieces, in the smaller towns their necessity is making itself more urgently felt from day to day.

Every little town in the principal European countries having a church, town hall, market hall or palace possesses a town clock, of which the inhabitants are often inordinately proud, despite the fact that, as in the case with a majority of old mechanicals, the timekeeping qualities may leave

much to be desired. Many of these clocks have an intimate connection with historical events, which in itself assures them of the warm regard of the natives.

Among how many of these ancient cities have there not been disputes as to which contained within its walls the most interesting of these complicated and monumental tower clocks. In the light of modern restoration and in many instances the practical reconstruction of these works of skill and perseverance, these disputes have become for the most part fruitless, although we can still find pleasure in the more notable of these products of mechanical genius and admire the intelligence, artistic taste and industry of which they are the lasting embodiment.

Before the town or public clocks, most of which were equipped with striking mechanism, became common, people employed sand glasses, with the aid of which they regulated the bell ringing or horn blowing by means of which the time of day was announced from the tower summits. At five in the Summer the morning bell rang, at 12 the mid-day bell and the evening bell or curfew at 10. Matins did not ring until six in Winter, while as early as nine o'clock "the curfew tolled the knell of parting day." The ringing of bells regulated every event in daily life, including the opening and closing of the town gates, the closing of saloons, etc., while important meetings of the city fathers, the gathering of the citizens for purposes of defense, the outbreak of a fire, etc., were announced by predetermined strokes on the bells, or by alarms pealed from their brazen throats.

Until the invention and introduction of striking clocks this primitive means of marking the division of time prevailed; their adoption was unquestionably an important step in advance, their installation a public benefaction.

Among the cities in which historically and mechanically famous clocks of the character above indicated exist or existed, we may mention Berne, Padua, Strasburg, Prague, Bourges, Olmütz, Lübeck, Besançon, Lyons, Venice, Rouen, Münster, Lund, Eger and others. The following chronological data will afford an idea of the antiquity of the public clock, as compared with other, still existing, products of mechanical skill.

As early as in the year 1288 the fines imposed by an English judge were expended for a striking clock that was installed in the clock tower at Westminster, London. During the 14th century there was a marked

INTERESTING OLD TOWER CLOCK IN BERNE, SWITZERLAND.

# WALTHAM WATCHES

## COLONIAL SERIES

These Extra Thin Watches may be had in four qualities of movements as follows:

### **RIVERSIDE; NICKEL;**

19 fine ruby jewels; raised gold settings; double roller escapement; steel escape wheel; exposed sapphire pallets; compensating balance, adjusted to temperature and five positions; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; red gold center wheel; exposed winding wheels.

### **ROYAL; NICKEL;**

17 jewels; red gold settings; exposed pallets; compensating balance, adjusted to temperature, and three positions; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

### **NO. 1425; NICKEL;**

17 jewels; red gilded settings; exposed pallets; cut expansion balance; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; red gilded center wheel; exposed winding wheels.

### **NO. 1420; NICKEL;**

15 jewels; settings; exposed pallets; cut expansion balance; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

Riverside and Royal grades are supplied in Gold and Gold Filled cases, both Regular Jointed Open Face and Calumet (Single Joint).

No. 1425 and No. 1420 grades are supplied in Gold Filled Cases only, both Regular Jointed Open Face and Calumet.

Colonial Series watches have Gilded or Silver Finish Metal Dials, as may be preferred. Solid Gold, 18k. and 14k. dials at an extra charge.

*Movements manufactured and guaranteed by*

**WALTHAM WATCH COMPANY,**  
WALTHAM, MASS.

case in the number of public clocks. In 1306 a clock was installed in the church of the Perdicatori fathers in Milan, and in 1313 a clock was constructed by Richard of Ingford, Abbott of St. Albans, England, which recorded the phases of the moon as well as the ebb and flow of the tides. In the Plaza del Capitane, Padua, a clock was set up, constructed probably by Jacob de Dinteville in 1341, on the strength of which movement he was named Horologius, an appellation that was adopted as hereditary

and suspected that the clockmaker, or some one in his employ, caused the clock to strike correctly at the proper time, and they consequently applied for and obtained the royal permission to keep a close watch on the tower.

We find clockmakers busy in different localities about 1370. Thus in 1368, Edward III gave three clockmakers letters of protection so that they could settle in England. The same year the first striking clock was set up in Breslau; in 1370, a clock con-

and another 12 hours from the rising to the setting of the sun.

Clocks at that time mostly struck and indicated 24 hours from one sunset to the next. This is shown to-day in the Prague city hall clock, which, at the moment of sundown, records 21 o'clock and strikes 24 strokes.

In the course of the period of the Reformation, the 24-hour clocks were gradually gotten rid of, consequently a decree of Council in Breslau, in 1580, prescribed the use of the so-called "half-clock." In Catholic countries, Italy and Bavaria, the 24-hour clocks were retained until the present time. Some had two dials, one for 24 hours and the other for the minutes, placed one above the other, and of which probably the minute dial is of more recent origin. The 24-hour clocks made daily the following number of strokes:

$$1 + 2 + 3 + \dots + 23 + 24 = 300.$$

Towards the end of the 14th and commencement of the 15th century many cities possessed public clocks. We have not a record of them all, for such contrivances, made by lower-grade masters, had to be made over again as soon as possible, and the record dates only from the installation of the reconstructed timepiece.

Although one of the chief reasons for the introduction of wheel clocks was that they could readily be equipped with striking apparatus, learned investigators found from old records that in ancient times machines equipped with wheel works existed, which reproduced the courses of the sun, moon and stars and which could be incorporated in the mechanism of clocks.

Competition now arose among the wealthier cities, and they frequently had such devices made by foreign clockmakers in collaboration with local scientists. On this plan the famous clocks in the Strassburg Cathedral and in the city halls of Prague and Olmütz and the St. Mary's Church in Lübeck were constructed.

In spite of their artistic style and ingenious construction, the public clocks of the earlier period suffered from inherent defects of mechanism and location, and soon fell into a sad state of disrepair. Not only this, but as progress was made in astronomical science, learned men sought to incorporate their discoveries in the clocks that were of an astronomical character, at the same time obtaining the association of their names with the original constructors. In time these clocks became, as it were, overloaded with complications, which, of course, did not improve their accuracy or reliability, and eventually the city authorities tired of the frequent expense of repairs and reconstruction and the clocks were allowed to fall into disuse and ruin.

But even where they were kept in working condition the accuracy of the old-time public clocks left much to be desired. Daily variations of a half to three-quarters of an hour were not exceptional, and it was not until Galileo, applying to practical purpose in 1593 his observation of the behavior of lamps hanging by long and short cords from the ceiling of a church, had suggested the pendulum as a means of controlling the movement of a clock that accuracy became possible.

(To be continued)

THE FAMOUS CLOCK IN THE STRASBURG CATHEDRAL.

is family. By others this work is ascribed to Johann Dondi. The first large public clock of which we have detailed information and pictorial representation, was installed in the castle tower at Paris in 1370. Henry V., of France, engaged Heinrich von Wick, a German, in 1364 to construct the clock. In addition to free lodging he received for his work daily six sous (6 cents of the money of to-day), a liberal wage under then existing conditions. When the clock was finished and began to strike, the Parisians doubted that it was capable of such a remarkable performance

constructed by Conrad Daspalius was set up in Strassburg; in 1375 Speyer, in 1398 Augsburg and in 1405 Lübeck each acquired a large clock; in 1419 Anton Pohl made the clock at Prague; in 1420 he completed the Olmütz clock. Olite, in Spain, acquired its first clock in 1390.

At this period Seville, too, must have had a clock, for the custodian thereof was granted by order of Charles III. of Navarre, a regular yearly stipend for winding and setting a clock.

In 1462 Nuremberg acquired its first complicated public clock. It showed 12 hours from the setting to the rising of the sun,

# Brooch and Case Combined

MANUFACTURED EXCLUSIVELY BY

## DUBOIS WATCH CASE CO.

MAKERS OF

### FINE SOLID GOLD WATCH CASES

Pat. June 9, 1908  
P. P.—No. 32

Pat. June 9, 1908  
P. P.—No. 41

Specialties in Casing of Chronographs, Repeaters and all Kinds of Complicated Swiss Watches

21 and 23 Maiden Lane

New York City

The Only Safety Chatelaine Case which enables a Watch to Keep Correct Time and Cannot be Lost

#### MERITS

Holds the watch firmly and securely, thus preventing the movement from being jarred, as there is no swinging or bobbing up and down while the wearer is walking or running. Protects both the case and garment from wear.

*Absolute Security*

Patented U. S. June 9, 1908.  
Patents Pending in Foreign Countries.

#### UTILITY

It can be raised so as to read the time, and reverse to have either the dial or back facing front, without removing brooch pin or watch from the garment. Can be worn on the shoulder, belt, chain or fob.

*Will not pull or wear off*

MADE FOR ALL SIZES OF LADIES' WATCHES, BOTH OPEN FACE AND HUNTING

#### Artistic and Practical

The only brooch and watch combined. Affords absolute security, as it has a safety catch. Nothing to wear out, as it works on friction bearings. Eliminates the possibility of loss of the watch owing to either bow, hook, swivel or link wearing out, breaking or coming apart, as in the old style chatelaine. Does not interfere with either winding or setting of movement.

Watch worn as Chatelaine, showing it lifted to read the time.

Watch worn on chain as a pendant, pinned to garment as additional security.

Licensed Under Wachter Patent. Patented July 25, 1905; May 21, 1907

**A Novel Display Piece.**

To the various show pieces which we have already reproduced from the competition instituted by *La France* magazine, we are now enabled to add another, which can be produced at a small outlay of time and money. This display piece has been designed by a clockmaker named A. Poutel, Port du Fort Carre (near St. Dizier in Haute Marne), France, and is entitled by him "The School." The dial figures need not be of plastic construction, but may, for instance, be cut out of saw wood, paper pasted on them and appropriately painted.

In the reproduced illustration, Fig. 1, this show window clock has for its principal feature a typical village schoolmaster, who

FIG. 1.

indicates with his ferrule the hours on a blackboard, which one school boy is observing while two other boys are busy with all kinds of mischief.

The expert reader will have surmised already the manner in which the indication of the hours is accomplished. Nevertheless, in Fig. 2 the simple mechanism with the aid of which this is effected, is portrayed. The arm of the figure is pivoted at the top and at a short distance therefrom a pin, *b*, is attached to it; below this is the vertical rod *cc'*, movable between suitable guides, the lower end being attached to the circumference of a cam, *d*. This cam or wheel is placed on the hour-hand arbor of a desired table clock or alarm movement, which is concealed beneath the figure; it completes in 12 hours a revolution, whereupon it forces the rod, *cc'*, upward. During the period the point of the ferrule traverses the scale on the blackboard. When the stick or pointer has attained the highest point, say about 12.45, it falls, of its own weight, back to one.

In order to set the pointer the cam must be revolvable with considerable friction on the hour arbor. Furthermore, the lever lengths, *a*, *b* and from *a* to the

point of the ferrule, must be so adapted to the depth of the cam that the pointer just traverses the scale, while the rod, *cc'*, mounts from the lowest to the highest point of the cam.

To the practitioner, it will be easy to determine all the measurements in advance. Those who do not understand how this is done may attain the same object with a little experimentation, either by setting the pin, *b*, further away from the pivotal point, *a*, when it is desired to make the arc described by the pointer smaller, or *vice versa*.

Still more simple is it perhaps to make the blackboard last of all and to adapt its size and the spacing of the hour scale according to the lift of the pointer actually caused by the cam; also, in case of neces-

FIG. 2.

sity, to shorten the pointer a little or to bring the blackboard nearer, or otherwise.

It is certain that the practical construction of the above show piece need not present to the least experienced any difficulty, whereas the impression on the passerby is reasonably certain; more especially if by skilfully contrasting the colors (making the teacher's coat, for instance, and the blackboard a deep black, and selecting much brighter colors for the clothes of the pupils) the attention of the passersby is more emphatically arrested.

Burglars, about a week ago, gained entrance into the store of Hyman Goldstein, 120 E. Water St., Elmira, N. Y., and stole eight hunting case watches, five dozen gold rings, two dozen children's rings, six fob chains, six lorgnette chains and a large amount of other merchandise. Thus far no clue has been obtained to the intruders.

H. Morton has secured a lease of the property at the northwestern corner of Broadway and 14th St., Oakland, Cal., which for a number of years has been occupied by a prominent dry goods establishment. The new quarters will be entirely renovated, especially for the use of the jeweler.

**A Walking Stick Watch as a Show Window Piece.**

THE accompanying illustrations show the exterior appearance and movement plan of a walking-stick watch, made by Watchmaker Karl Preecht, Naumberg, A. S., as a show window exhibit, and described in the *Deutsche Uhrmacher Zeitung*.

Fig. 1 shows, greatly reduced as to size, the upper part of the stick with the watch dial, which is placed not far below the handle. Fig. 2, which is actual size, shows the arrangement of the works. The pivotal points of the wheels are placed in a straight line, so that the frame plate is of narrow, elongated form, which permits the entire movement to be placed lengthwise in a recess in the stick. It is only necessary to exchange the round frame plate of an ordinary cylinder watch (ladies' watch) for a rectangular brass plate of suitable size, marking off on a central line the gear distances, which is fitted with the customary turned recesses, and then to reset the

FIG. 1. FIG. 2.

bridges in a suitable manner. For the watchmaker further explanation will not be necessary.

This "walking stick watch," mounted on a handsome cane, will attract the attention of many a passerby, thereby fulfilling its mission as a show force. An advantage that it possesses, compared with other show pieces, is that it is readily produced by simple means.

As an actual walking stick clock, the article described is not, by any means a novelty; in various countries, in former times, very similar clock-sticks have been carried. A few decades ago they were made wholesale in Vienna and were for a time at that period quite the fashion. The dial plate was attached in the same manner on the side. According to the then prevailing taste, the crutch handle stick was not carried, the sticks were simply provided with round or flat knobs of gold, silver, ivory, etc., and this was the more suited to the walking stick watch, as they could be made to wind up by turning the knob, thus dispensing with the watch key.

H. L. Chase, Cedar Falls, Ia., is making his annual buying tour to Chicago and New York.

Miss I. Bryan, advertising manager of the Jaccard Jewelry Co., Kansas City, Mo., was quoted in an interview that was incorporated in an article under the caption, "Jewelry Advertising," published in a recent issue of the *Advertiser's Magazine*.

The Favorite Movement with both Trade and Public

# The Omega Movement

stands in high favor with the trade, and is constantly increasing in popularity for the reason that the public is quick to appreciate its merits.

The man who carries an Omega is proud of it and misses no opportunity to sound its praises to his friends. He finds it invariably and uniformly reliable. He learns to depend upon it and it never abuses his confidence.

**Ω**  
**OMEGA**

**Adaptable, Interchangeable, and Suited to all Requirements**

The Omega is made in all sizes to fit regular American cases, besides a number of Swiss sizes. Every part is interchangeable, and all are made with lever escapements, double roller and pendant set. There are six different grades—from seven jewels to twenty-one jewels—adjusted to heat, cold, and five positions.

# Large Watches

FOR

**AUTOMOBILES,  
CARRIAGES,  
DESKS and  
TRAVELING**

FOR the above purposes we offer a line of watches which possess really remarkable selling qualities. They are one or eight-day watches, keeping remarkably accurate time under all circumstances, and so substantially built as to successfully withstand the jar of an automobile.

For many reasons we believe them to be the best watch of the kind on the market, as they are not only very well made and bear all the marks of good, careful workmanship, but the model is a very attractive and "snappy" one.

They are extremely convenient, and appeal strongly to the traveler because they are so compact that they take up but little room in a traveling bag, which makes them more desirable than the regular French traveling clocks.

They are built to stand rough usage, as they can be turned upside down or in any other position with no danger of their getting out of order.

No line of watches for the purposes mentioned can possess more elements of salability, as in style, appearance, convenience, good workmanship and accuracy they are everything that such a timepiece could be.

Just at this time of the year you ought to have these in stock.

**EDMOND E. ROBERT**

3 Maiden Lane, New York City

## Profit

Is what you are in business for—"Ball Watches" assure you several varieties.

- 1—A fair cash return.
- 2—Satisfied customers—most desirable "profit."
- 3—No preliminary repairing of movement—No fitting to case—No long regulation. Thus, saving your time is "profit."
- 4—No "price cutting" competitors.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

## Advances Made in the Art of Lock-Building

Old and Modern Means of Protecting Valuables from Lock-Breakers

(From the *Bookkeeper and Business Man's Magazine*.)

(Continued from issue of Aug. 26.)

IN Fig. 5 is shown a safe door fitted with the Stockwell device. (See previous issue.) This door has two bolts, A A, which in the illustration are shown shot forward as when the safe is locked. B is the bolt operating motor, which both locks and unlocks the bolts. The mechanism is now shown in the locked position, as it is set

to release the mechanism by hammering, jarring, tipping the safe over, or resorting to explosions of dynamite on the outer surface near the lock. The lever still retains its position. Should this punishment be so severe as to derange or stop the time movements, then the safe is irretrievably locked and nothing but the destruction of the door will give access to the contents.

Upon the arrival of the predetermined hour for opening, however, the time movements operate to pull the hooked lever to the right, which releases the unlocking device and the bolts are by it withdrawn. The door can then be swung open by a T handle attached to the outer plate of the safe door. At Fig. 6 is shown the same mechanism in the unlocked position. It will be seen that the bolts are withdrawn and the locking levers have fallen downward. While in this position the door can be closed at will without locking.

In the illustration three time movements are shown. This is simply to guard against the possible, though remote, contingency of stoppage of the movement. One might stop, two would hardly do so at the same time, while it is impossible to conceive of three all going wrong at the same time. Any one of the movements will perform the required work in releasing the locking motor, so that in case one should fail there are two more right behind it. This duplication of movements is sometimes carried still further and four and even six movements used. This seems needless, but it is in line with the wise precaution that provides for the most remote chances of trouble and seeks to eliminate any possibility of the safe not opening at the appointed time. Because if it does not open there is no longer a spindle through the door to drill out and release the bolts. The same principle is carried out in the duplication of the operating motor, which is also sometimes made double, so that in case of failure of one there is still another to perform the work of retracting the bolts. Both these motors are operated by one time-lock, the latter having usually three movements as above described.

It will thus be seen that at last the lock-maker is ahead in the game and the enterprising burglar is not burgling around

where time-locks and automatic bolt motors are employed. There are no more burglaries in banks employing these devices of safety and security. Safety is as alike to property and persons, for a banker can now rest assured that his valuables are safely locked, even from his slumbers will not be broken by a burglar to the bank at dead of night under the hand of a gang of safe-crackers.

But the ingenuity of the inventor has not stopped here. His work, though not finished, was not entirely completed. He had for all time baffled the burglar and provided means of security, depending

FIG. 6.

before the door is closed. At C is shown a small lever which, when the door is closed, strikes against the jamb of the safe and releases that part of the motor which controls the forward motion of the bolts, and the latter then shoot forward into the position here shown. The safe door is now securely locked. There is no communication with the interior, and no one, whether dishonest or honest, can open the safe until the time determined upon before the door was closed.

At D is shown the time mechanism which controls the opening of the door. Extending downward from the case is a small hooked lever which holds the bolt operating motor in the locked position. This is so accurately adjusted that a slight direct pull will unlatch it, but it cannot be jarred loose. If, therefore, any attempt to re-

FIG. 7.

no secret, and which, therefore, calls for no further element of protection.

There was one more contingency to provide for, and that this might also be necessary has been shown by such experiences as Charleston, Galveston and San Francisco.

Having determined that the safe should be opened at a certain hour of the following morning, the inventor foresaw that sometimes it might happen that the officers of the bank or vault could not be on hand at that time. The safe door, of course open to whoever should be there, and it can easily be imagined what would happen if this fact was known, and the bank or the street, or even the building be in the possession of a mob, or at the mercy of a gang of looters always to be found in the wake of a fire or earthquake. It

## Storekeeping Department.

Before determined by Stockwell to go a further and provide means whereby safe would be opened at the pre-determined time, but would be still closed or opened by other means.

This was accomplished by the invention of the Stockwell electric combination lock, shown in Fig. 7.

The usual time-lock A and double bolt or B, above described, are provided as the ordinary manner. There is in addition a combination lock, C, but constructed on an entirely different plan from anything else in that line. This combination may be set up, or thrown off—that is, locked or unlocked—at any distance from the safe. For instance, the safe may even be opened in Chicago and be unlocked from New York.

It has been determined that the vault door will be opened at 9, the time-lock will retract the bolt motor and place it in position to retract the bolts, but this motor will not perform its work until the electric combination has been set. When this is done the motor immediately retracts the bolts and the door may be opened. When the time mechanism and the bolt motor in turn performed their duty the setting of the electric combination may be deferred for any desired length of time, an hour, a week or a month. The security is unimpaired, and no access to the contents can be had except annihilation of the combination itself until the electric combination has been set to release. This may be done from the office of the Electric Burglar Alarm Co., if there is such institution in the city, or it may be done from the police headquarters, as is frequently the case. Another element of security is the fact that any amount of tampering with the electric combination while on guard will in any way affect the rest of the security devices, as the time-lock absolutely holds the key to the situation and cannot be bribed nor deceived.

It will be seen, therefore, that the intentions of the inventor have been carried out to the letter. The door is forever locked against the burglar. It is equally inaccessible to the officers of the institution until the proper time, and should the contingency arise which demanded it, the safeguarding may be prolonged indefinitely.

In the race between the lockmaker and the lockbreaker, therefore, honors were not even until within the last two decades, when the automatic devices above described at once and forever put an end to safe-cracking wherever they are used. It would seem that the right has prevailed and the might is helpless, from which many moral lessons might be drawn if it were the province of this article to point any such moral.

There is one circumstance, however, that may be used to adorn the tale, as if offers the most striking illustration of an inventor giving his life for the sake of his work. In the evolution of the details of the electrically controlled automatic bolt motor, there were many serious obstacles to overcome, and many intricate problems to be solved. It was not the work of a moment

nor of a year. At last, however, all had been worked out to the inventor's entire satisfaction except one little detail. It was a simple matter, seemingly, still it did not seem possible to bring it about. Several times the inventor was upon the point of abandoning the entire idea, simply because of this one little point which seemed to be the key to the entire situation. Finally, after working steadily for several months with indefatigable patience and study, Mr. Stockwell stated one day in the writer's presence that he was convinced that he could not solve the problem and would abandon the idea entirely. He left his workshop at 6 p. m. that night, and as he afterward stated, thought no more about his invention, and that even up to the time of retiring it had not again occurred to him to think of it. He retired early and slept soundly for the first time in months. In his sleep during the hours of early morning he was again in his workshop, and, marvelous to relate, was putting the finishing touches upon the very part that had so long baffled all his skill and ingenuity. So vivid was the impression that he awoke, and, stepping to a small table in his room where he always kept pencil and paper, he roughly sketched the finished part as he in his dream had seen it, donned his clothes and went to his workshop. At 7 that morning he had his invention perfect and complete, the problem successfully solved, and that very day the final papers in the patent application was forwarded to Washington.

But the master mind had ceased its working. It was the last work the gifted genius ever did. He never lived to see the results of his labors, and only knew by the foresight of faith what tremendous benefits he had bestowed upon the world. In six weeks from the night he dreamed out his invention he was dead. But though dead his work has continued to exalt his name, and so long as there are banks and bank locks so long will the name of Stockwell stand for all that was latest, best and, in all that pertains to absolute security, perfect.

(THE END.)

### Novel Use of Electric Globes.

A UNIQUE scheme for making effective use of the electric incandescent electric lamp for advertising purposes consists of fitting caps of colored glass snugly over the ends of the globes. Where these lamps are made use of for signs, their ends are generally the part which is exposed to the observer and the new idea consists of covering this part only with the cap. This permits the sign to be readily changed as often as desired.

By arranging a bank of these lamps and manipulating the caps to suit the demands it is a very simple matter to change the legend so that a sign may be made to read differently every day if desired with little trouble and no extra expense.

These caps are made in several different sizes, covering the globes of the four, eight and 16 candle power lights. They are also made in a number of different shades and colors.

G. J. J.

Walter B. Dean, Jr., Forsythe, Mont., is closing out his stock.

### The New Jewelry Establishment of Hammersmith & Co., San Francisco, Cal.

THE new Hammersmith building, occupied by Hammersmith & Co., and located at 801 Van Ness Ave., San Francisco, Cal., is shown below. The interior is simply and richly finished in mahogany, with all the latest improvements in the way of show cases and display fixtures. The jewelry department proper is on the first floor; the diamond and art department, engraving room and offices on the mezzanine floor; silverware and silver novelties, including an extensive line of silver trophies, on the second floor, and cut glass and clocks on the third floor. In the basement is located a well-equipped repairing department, fireproof vaults and the packing room. A smoothly running electric elevator makes all departments easy of access. On the

NEW BUILDING OF HAMMERSMITH, & CO., SAN FRANCISCO, CAL.

opening day the store was crowded with both customers and friends and members of the jewelry trade. The firm has been the recipient of many congratulations in view of their pluck to become pioneers in the new shopping district.

This concern was one of the first jewelry firms, if not the first, to locate on Van Ness Ave. after the earthquake and fire, and so can claim the distinction of being a pioneer in more than one respect. The firm of Hammersmith has been in business for the past 22 years, the first store having been opened at 118 Sutter St., under the name of Hammersmith & Field. The firm continued in business at this location for 14 years, and then removed to 36 Kearny St., where the great fire of 1906 found it. Shortly after the store was started on Van Ness Ave., Mr. Field died and the business was reorganized and incorporated under the name of Hammersmith & Co., with the following officers: John A. Hammersmith, president; Lester J. Hammersmith, vice-president, and Louis Hammersmith, secretary.

Frank W. Berka has discontinued his business at Montour, Ia., and located in Dow City, Ia.

# RETAIL JEWELERS ADVERTISING

The use of this department is open to every member of the retail jewelry trade. Forward for criticism your newspaper ads., booklets, catalogues, novelties, circulars, etc. Ask advice and offer suggestions. Replies in these columns are unbiased. Make letters as full and particular as you desire. Every letter and ad. sent will receive full attention, though the publication of the matter may sometimes be delayed several weeks.

SOME late Summer announcements varying considerably in mechanical make-up and construction are shown this week. A clever bit of originality characterizes the advertisement of the J. Gordon Jewelry

The first advertisement of the H. J. Whitley Co., Los Angeles, Cal., has been reduced from 11 inches, single column. The text is well written. The adjoining advertisement is by the same concern and was

inches, double column, published in July by Fred H. Sanders, Ottawa, Ill. The advertiser used a good argument to show why care should be exercised in the selection of reliable watches.

Shirt waist sets are timely articles to feature during the Summer months, and have been done by W. W. Mansfield & Co., 241 Middle St., Portland, Me. The present advertisement, which was used in a space five inches, single column, is very good in tone and gives a wide range of price in little more white space above and below. The catch phrase would have helped the typographical appearance of the announcement.

The P. J. Smith Co., Cumberland, Me., in an advertisement of five inches, double column, advertised a \$50 watch for \$30 other bargains. The advertisement attracted much attention and the mention of

JEWELER AND SILVERSMITH  
Dwight Illinois

A COLLECTION OF JEWELRY ADVERTISEMENTS USED DURING THE LATTER DAYS OF SUMMER.

Co., Shreveport, La. The announcement, which originally occupied five inches, single column, also gives information of historic interest, the date of Mr. Holmes' lecturing period being given.

used in the same amount of space to advertise rings. The text of the second announcement is also very good.

"Dangerous Delays" is a catch phrase of an advertisement of two and one-half

fact that the articles advertised could be seen on display in the show window was very helpful.

The typographical display of the advertisement of F. M. Truby, Coffeyville, Mo.,

**Retail Advertising Department.**

capable of improvement. The ad. was in a space of seven inches, single column.

More white space above and below the catch phrase, "We guarantee every watch," would improve the advertisement of Everett B. Lewis, Dwight, Ill. A good, forceful style, born of self-confidence, marks the ending of this ad.

The advertisement of Brock & Feagans, Los Angeles, Cal., is tastefully displayed from a typographical viewpoint. A dignified appeal is made for watch and jewelry repairing.

**A Mortuary Collection.**

WHATEVER is, is not necessarily right, says a scribe in *Printers' Ink*. Because some large and successful business men make a spectacular run on some eccentric line of advertising does not necessarily prove that some other kind of advertising would not have been a great deal more profitable.

Going back a few years, anyone can recollect certain advertising policies which were justly applauded at the time, but have since been discarded.

Why were they dropped? Possibly because they were considered to have served their purpose and that they should make place for something new. More likely, because the advertisers themselves lost faith in them.

Here are a few advertising ideas that were supposed to be very brilliant in their day:

- The Smile That Won't Come Off.
- Sunny Jim.
- Spotless Town.
- The Ham What Am.
- Omega Oil Geese.

Why is it, if these ideas were so good, that they have been allowed to perish by the wayside? Now that they have vanished from newspapers and public places, they sound very much like productions of the silly season. It would have been rank chicanery to have intimated such a thing a while ago. But can anything be said in their favor to-day? If these ideas were intrinsically meritorious why have they been thrown among the discards?

Perhaps one reason why they would not find continued publicity is that the arguments back of them were shallow. The advertiser probably got sick of them even quicker than the public.

Another reason may be their essential clownishness. A clown makes a lot of noise at the circus, but the circus manager limits his act to a very few moments and quickly withdraws him in favor of the more serious acts.

There are many successful business men who have no use for clownishness in advertising. They believe that nonsense is out of place and bears no sort of relation to real salesmanship. When the "Sunny Jim" campaign was at its height, advertising managers in other lines were often asked, "Why don't you think up something as clever as Sunny Jim? That is the artiest advertising yet!"

But where is Sunny Jim to-day? Where are the people that created him, and where are the people that paid the freight?

It is always a temptation to an advertising man to do spectacular things. It is hard for him to put the gallery out of his mind completely. How will such-and-such a thing impress the advertising community? Here's a scheme that will make the advertising man of our competing house gnash his teeth with envy!

Such thoughts are wholly unworthy of any man entrusted with the details of an advertising campaign. The basic question is not, "Is it smart?" but "Is it good business?"

"Will this copy lead directly to sales? Is it good common-sense? Is it the kind of talk that would make a buyer of me if I were on the outside?" If such questions were asked and honestly answered before a campaign started, there would be fewer mourners in the advertising procession.

**Post-Vacation Business.**

AFTER the return of vacationists and Summer tourists from the many Summer resorts, a goodly amount of business is to be obtained, owing to the damage which watches may have suffered by sand and water. "Many watches fall into rather deep water and have to be dived for," recently remarked a well known watch repairer, "and unless the case is very tight the water gets into the works. Then, again, a single grain of sand will impair the timekeeping qualities of a watch in no small degree. The funniest case I have had this year was that of a man who brought in a watch very badly smashed, and explained that it belonged to his wife, who had just returned from the seashore. While sleeping with her hand under the pillow, she had dreamt she was beside the sounding waves, and picking up a stone she had thrown it out to sea as far as she could. The stone in this case happened to be the watch, and the effect of its collision with the bedroom wall cost him just \$5.50 for repairs, which he charged up against the expenses of his wife's trip to the seashore."

**Common Sense—A Good Business Pilot.**

THE advertiser who has courage enough to cut loose from precedent and be guided by his own commonsense and experience doesn't lose much sleep over what the "authorities" say for or against his methods.—*Advertising World*.

John McGowan and William Steahly, of Hinckley, Minn., have found about 80 pearls during a three weeks' search along the St. Croix.

Mrs. Rosalind Nicola, 21 years old, and Miss C. Stema, 18 years of age, Italians, were taken into custody, recently, on a charge of shoplifting, preferred against them by a clerk in the store of Jos. Reininger, Easton, Pa. A ring in the possession of Mrs. Nicola was identified as the property of David Clark, a jeweler in Northampton St. The women pleaded guilty to the charge of larceny and were fined \$5 and costs.

Catch phrases, descriptions and arguments which retail jewelers have used in their newspaper advertisements.

YOU should know the best place to have your eyes attended to. Perhaps your eyes are all right at present. To-morrow you may develop eye trouble that needs immediate attention of an optometrist. We charge nothing for examination. J. Ramser, Rock Island, Ill.

Reflection is not necessary to convince you that when you buy jewelry you want something you can depend upon. On the outside plate looks the same as solid, but plate wears off. It's all right if you paid only for the plate price, but if you paid for solid— We make a specialty of getting only the most exquisite productions of the most skilful workmen. You can't get anything here that isn't thoroughly good in every respect. Levin Jewelry Co., Calumet, Mich.

Since the birthstones returned to vogue it is an easy matter for one to find an ideal gift. Some denote self-possession, contented minds, proof against traitorous lovers, armor to guard off folly, courage, wisdom and firmness, while some are even supposed to produce fascination and bring beauty to the wearer. We have all the birthstones and can give their historical meaning. J. B. Ingalls, Rock Island, Ill.

A Talk to Watch Owners.—Does your watch tick with uniformity? It may seem reliable and yet work cranky. Bring the watch here at the first signs of trouble. "A fix in time saves many dimes." You may possibly equal our prices, but it's impossible to equal our pre-eminent repairing. We are experts at watch doctoring. When your timepiece leaves our hands it is right, and permanently so. Now, as to jewelry, when you want anything in the better jewelry line, go to the old reliable A. F. Williams, Trenton, N. J.

A Suggestion on Selecting Diamonds.—We invite inspection of our new display of diamonds and diamond jewelry. While our stock is, perhaps, not the largest, yet by careful selection we have made it include pieces to suit all tastes and all means. We can give you a diamond ring for \$10, or one for \$1,000. We direct special attention to our \$100 diamond ring, which is particularly good value for the price. Buyers should also bear in mind that our special plans permit of easy terms at cash prices, and also permit of later exchange at full value. For example, should you, after paying for a \$100 ring, desire to own a larger stone, we will allow you \$100 for the old ring in part payment for the new. W. C. Graves & Bro., Memphis, Tenn.

# WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]  
Attention paid to communications unless accompanied by full name and address of the writer.

**QUESTION No. 2205.—Silvering Brass.**—  
Can I quickly silver small brass arti-  
cles such as chain links, key tags or other  
articles? I want a dip that can be used  
with the electric current. S. B.

**ANSWER:**—Brass articles can be silvered  
by dipping in a cyanide silver solution. The  
pieces should be polished if a bright  
finish is desired. A dead finish is obtained  
if an unpolished or matted surface. The  
pieces must be chemically cleaned, then  
placed in a solution composed of rain water,  
one gallon; nitrate of silver, one-fourth  
ounce; cyanide of potassium, 12 ounces.  
Dissolve the nitrate in the water, and in  
part of the water dissolve the cyanide. Add  
a little of the cyanide solution to the silver  
solution, let stand a while, then add more  
of the cyanide, a little at a time. Before  
the cyanide is added, heat the silver  
solution to about 150° F., dip the brass in  
for a moment and rinse off. The balance  
of the cyanide can be added after part of  
the solution has evaporated.

**QUESTION No. 2206.—Renovating Gold  
Jewelry.**—Kindly tell me how to impart a  
brilliant color to shopworn gilded or plated  
jewelry. T. I.

**ANSWER:**—Gilded or gold-plated jewelry  
can be brightened up to a brilliant finish,  
providing there is enough gold on the arti-  
cles to produce a good effect. Grind the  
jewelry into fine powder: Sulphur, five  
parts; alum, two parts; arsenic, two parts;  
mercuric, one part; native antimony, one  
part. Also prepare the following fluid:  
Ammoniac, three parts; salt, one part;  
Sage, six parts; water 23 parts. Boil  
and skim this, and put in the powder; boil  
for 15 minutes. Clean the gold pieces to  
be treated by washing and rinsing and dip  
in the solution. Let remain until the  
color is of sufficient brilliancy.

**QUESTION No. 2207.—To Color Soft  
Solder Yellow.**—When I repair cheap jew-  
elry I use soft solder, which will leave a  
yellow color where soldered. How can I color  
the solder yellow so it will appear like  
gold? T. C.

**ANSWER:**—To turn the tin solder yellow  
two preparations are used. The first is  
added to copper the solder, then cover the  
solder with a second solution to produce  
the yellow. Proceed as follows: Heat  
out half a pint of rain or distilled water  
and put in about a tablespoonful of sul-  
phate of copper. Apply some of this, while  
hot, to the tin-soldered places, touch the  
spots with a piece of steel or a nail, put  
a little more of the sulphate of copper solution  
and repeat until a coating of copper has  
formed. Now prepare a solution of two

parts of sulphate of copper and one part  
sulphate of zinc in warm water. Apply  
some of this last solution to the coppered  
spot and touch the spot with a zinc rod,  
which will produce a yellow color. The  
solution may be kept in bottles.

**QUESTION No. 2208.—Moulding Gutta  
Percha.**—How can I prepare gutta percha  
so I can mould it into special shapes and  
give it different colors? M. G.

**ANSWER:**—For a moulding mass of gutta  
percha several formulas may be used: (1)  
Gutta percha, two parts; bone, black, one  
part. (2) Gutta percha, two parts; bone  
dust, one part. (3) Gutta percha, three  
parts; bone dust, one part, pipe clay, one  
part. The mixing and working is done by  
warming the ingredients, kneading and  
moulding into shape. To produce different  
colors, mineral color is introduced during  
the kneading. A very unpleasant odor  
arises when the gutta percha is warmed,  
which may be overcome by adding a little  
powdered orris root.

## Jewelry Repairing.

(Translated for THE JEWELERS' CIRCULAR—WEEKLY  
from the *Deutsche Uhrmacher Kalender*.)

**T**HE proper repairing of jewelry em-  
bodies the knowledge and practice of  
soldering. Soldering as a branch of jew-  
elry repairing is subject to two sub-  
divisions; one is performed by the use of  
hard solder and the other by the use of  
soft solder. For the use of hard solder,  
which requires a glowing heat, a workman  
must have a great deal of practice and the  
knowledge of certain elements of chemical  
and physical conditions. The want of such  
knowledge causes the operation of solder-  
ing to be performed frequently in a bungling  
manner, often resulting in the ruin of a  
piece of jewelry entrusted to his care, be-  
cause the damage done cannot be repaired  
by a more skilful operator, no matter how  
capable such a succeeding operator might be.

Take, for instance, the case of a delicate  
breastpin which is broken, and which could  
easily be mended by hard solder, but in-  
stead is mended for convenience sake by  
a little soft solder, and the operator in so  
doing submitted the pin to an excessive  
heat. The most skilful workman would  
find it difficult to do any later repairs on  
this article except with soft solder. But  
articles which have been repaired originally  
with hard solder furnish no excuse for  
employing soft solder in any subsequent  
repairs.

It sometimes happens that an article of  
gold jewelry is of a color which may be

spoiled by heat. In such a case it would be  
necessary to employ solder of such material  
which will fuse at a low temperature. Such  
a case is quite common, and any jeweler  
who makes a business of repairing jewelry  
must possess the information and capacity  
to do any repairs in such a manner that  
articles do not show readily that they have  
been repaired. If he spoils the color of  
any object he must have the means of re-  
storing it. To prevent such mishaps he  
must have solder to suit any object, which  
would obviate the offensive appearance of a  
badly repaired article, and as a rule re-  
paired jewelry should have the fresh ap-  
pearance of a new article.

Hard soldering is the fused junction of  
two pieces of metal by means of solder ex-  
posed to a red-hot heat. The conditions  
are generally the following: The surfaces  
to be united must be scrupulously clean and  
free from greasy matter, which, in being  
heated, would leave impurities which would  
prevent the solder from flowing.

The solder to be fused in uniting two sur-  
faces must be similar in color and alloy to  
the metals to be soldered, but the former  
must have a lower fusing point than the  
metals to be joined by soldering. These  
conditions make it imperative for a re-  
pairer of jewelry to supply himself with a  
graduated stock of solder based on condi-  
tions modified by experience. An exception  
to this rule are such metals as iron and  
steel, which can be soldered with other  
metals, such as gold, silver, copper and  
brass. Gold solder must be exclusively  
used for soldering gold, while the quicker  
fusing silver solder must be used for silver  
or the baser metals, such as nickel, etc.

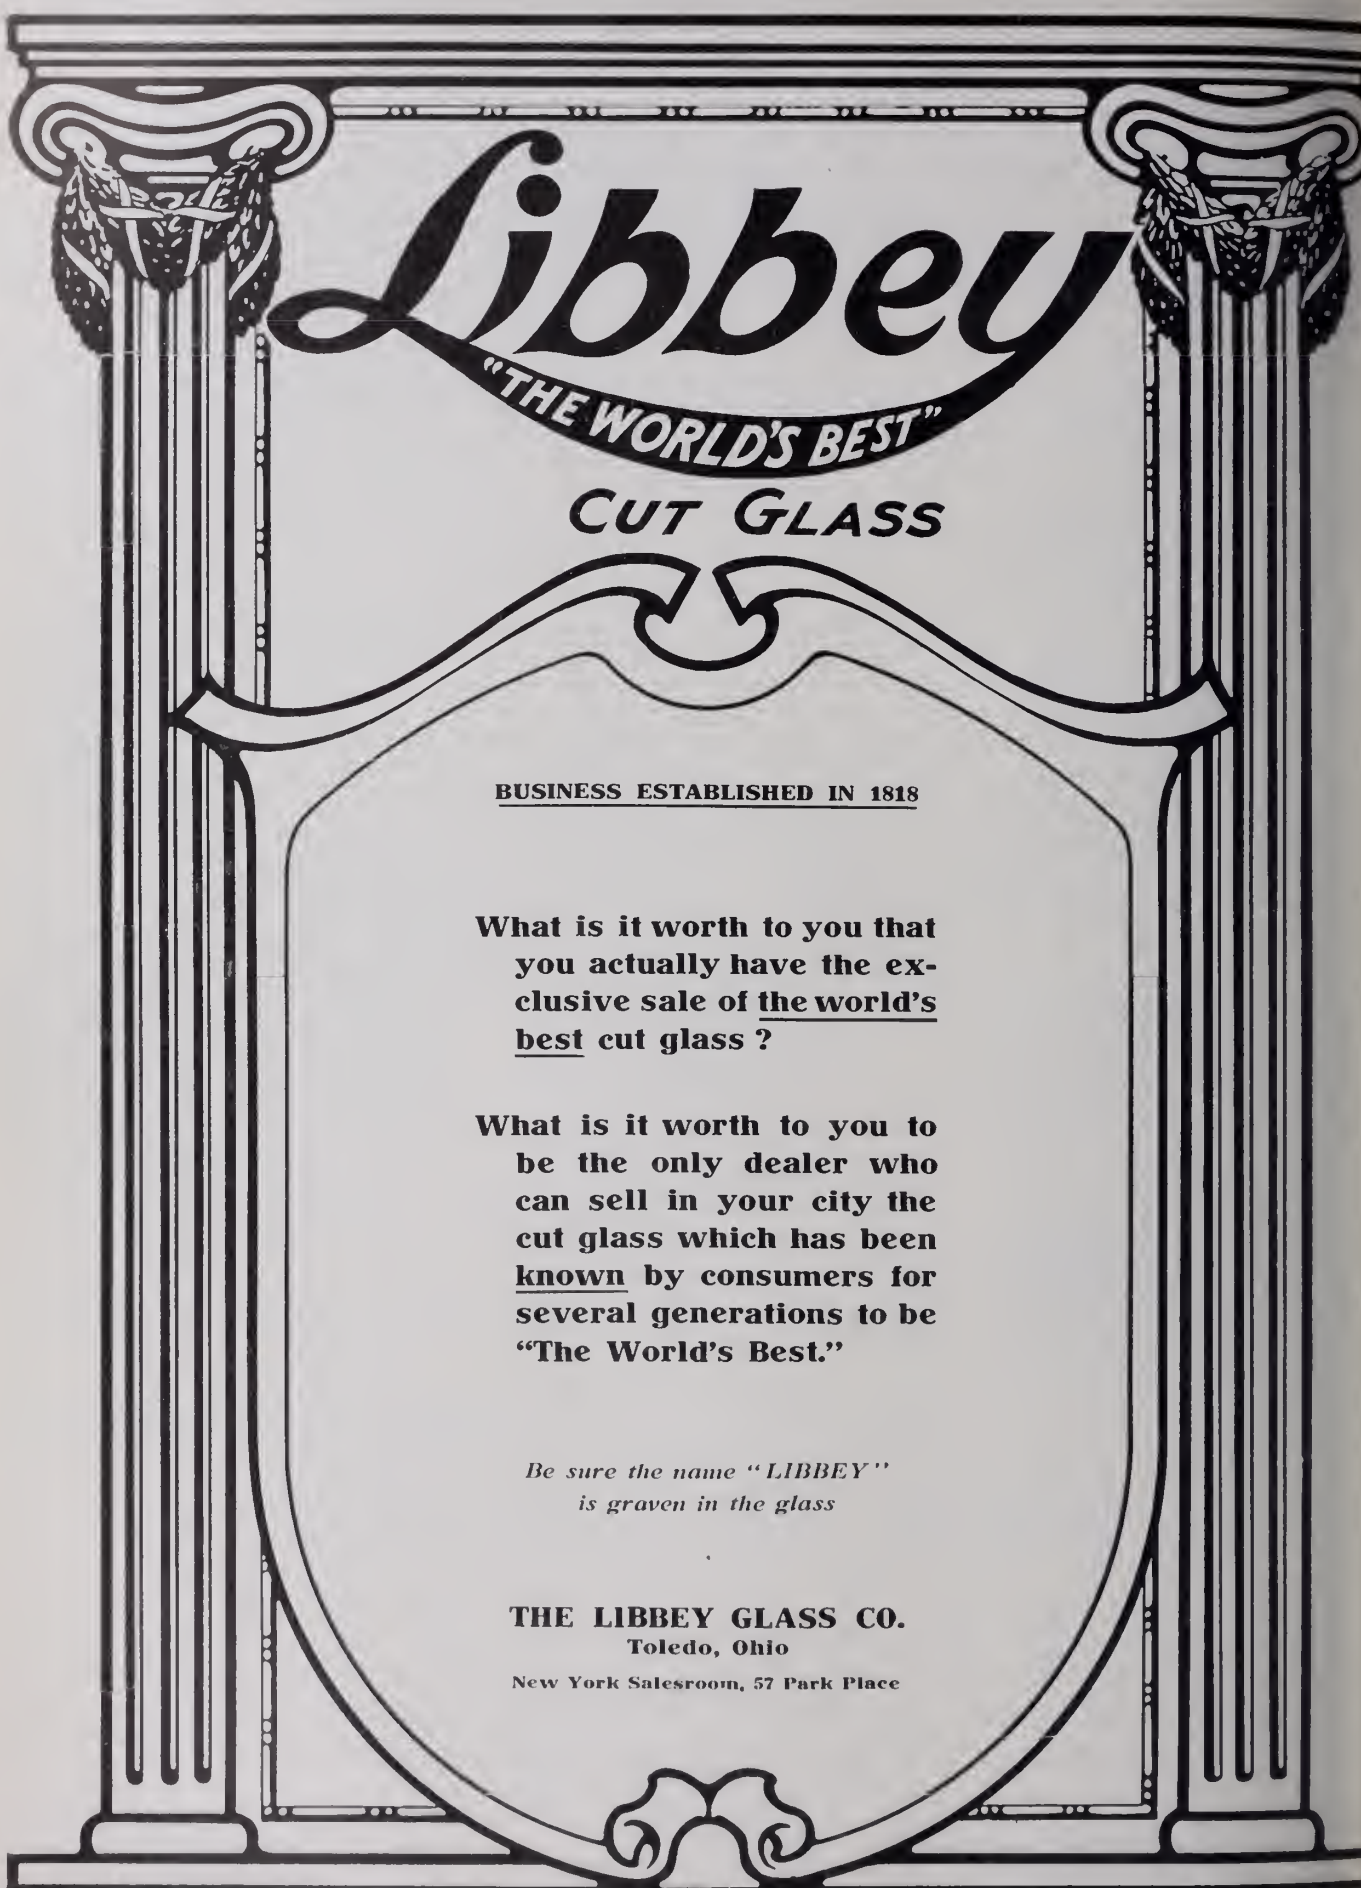

For the composition of hard solder prac-  
tical men recommend those which are  
graduated according to higher or lower  
fusing points, and which may be known as  
easy flowing, hard flowing and very hard  
flowing solders. Such solders are kept for  
sale by material dealers and require prac-  
tical tests for their successful use.

For the melting of an alloy for solder of  
a moderate quantity a crucible and a fur-  
nace are very desirable, and also an  
alcohol lamp, a blow pipe and a large piece  
of prepared charcoal. Such a piece of  
charcoal is prepared by having a cavity dug  
into it, the sides of which are covered with  
pulverized borax.

The melting of the different component  
parts of a gold solder may proceed as fol-  
lows: Begin by melting the gold and silver,  
following by the addition of copper, brass,  
etc., finishing with the zinc, as the latter  
easily melting metal is somewhat volatile,  
and cannot therefore be exposed too much  
to a protracted heat.

For alloying larger quantities a crucible  
will be needed, and this ought to be new.  
The interior of this should be rubbed over  
with borax, to prevent the adhesion of any  
metal to its side. When the alloying metals  
are in a state of fusion, as described above,  
and ready for casting, this should be done  
in a cast-iron mould of such form as would  
facilitate the laminating of the solder in  
such shape as will make it convenient to  
produce thin strips, which may be cut in  
minute fragments with the scissors, as occa-  
sion may suggest.

(To be continued.)

## Points to Be Considered in the Sale of Art Wares.

By The Commentator.

The art dealer had a little time to be miserable. A heavy rain had come on, bringing a temporary lull in business; and he talked for a while about customers in their own ways. He said:

It is curious the way people buy art wares. A customer comes to buy a certain thing, and almost invariably winds up by buying something entirely different. The purchaser wishes to make a present, but has a certain price in mind. The art desired exceeds the price limit; but, however, is sufficient to buy some other object admirably adapted to present purposes. The kind of ware asked for in the first instance, gives me a line on the customer's taste, so that I am able to call attention to other suitable things within the price. This is not resented at all. I am really rendering helpful service. The present is to be made, and it is decided that it should be the best possible for the money. Though not buying quite what was intended at first, the customer has obtained something really creditable and is satisfied."

These observations coming fresh and direct from the actual life of the store, are not abstract theories. Other dealers could not have a similar experience. It is good salesmanship to be able in appropriate cases, to guide a customer from one subject to another, from a contemplated purchase to one not contemplated. We say "in appropriate cases," because an obtrusive and ill-timed attempt to change a customer's mind, where the occasion did not suggest it, might savor of "substitution." Yet art wares by their very nature are less liable to that suspicion than other kinds of goods. The dealer, and others like him, recognize the appropriate cases when they see them. In handling customers they exercise the tact of the diplomatist and the psychologist, for on the last analysis good salesmanship resolves itself into a problem in psychology.

It is quite a usual thing when there is a present to be bought, to fix upon the price first. "What ought I to pay for it?" is what the customer first asks himself. Having settled upon the amount he is to spend, of course he has preferences as to what he would like to get for his money, but these preferences are not inflexible. He is willing to consider something else, if the desired objects come too high. This is the psychological attitude of multitudes

of people who visit art departments to buy presents. The good salesman will probably guide the visitor to an appropriate purchase; the poor salesman is likely to bungle the matter. The latter, when he hears the request for a certain thing at a certain price, will probably say he has nothing of the kind at that figure, and then close up like a clam. This will freeze out the customer, who will go somewhere else, to find a salesman who understands the situation, and make a suitable purchase without any difficulty.

Intelligent guidance of customers by art dealers is more justifiable than where the goods are of a more ordinary character. Two classes of people patronize art departments, those who are connoisseurs and those who are not—and the latter are infinitely the more numerous. Art wares embrace so many technicalities that to become familiar with almost any branch requires a great deal of time and experience. How, then, can the average layman, who only makes an occasional purchase, be expected to feel very sure of his ground? There is a growing feeling towards art in this country, an increasing desire to secure things that are beautiful and artistically correct. In the present state of art education, most customers look more or less to the dealer for guidance. The intelligent dealer is a good educator. He raises his vocation above the status of a trade and makes it a profession. The advice given to open-minded customers is "professional advice," is recognized as such, and is not resented.

Where the customer is a connoisseur, however, or where he has a fixed and definite determination as to the nature of his purchase, the situation is different. The object and not the price is now the main consideration. If you can supply the former, the sale is virtually made. If you cannot, it is as well to say so at once. Salesmanship in such cases consists in a sort of intelligent receptiveness, an attitude which quickly catches the customer's idea and endeavors to carry it out to the letter. When you make the sale, your best testimonial will be to have the customer say, "That is exactly what I wanted." Operations are often conducted from the opposite point of view: an effort to dispose of what one wants to sell rather than what the customer wants to buy. The sensitive customer with a definite purchase in mind,

would resent this. Of course, if he casts interested glances over other displays in the store, these manifestations of interest will open the way to other goods, because here you are really following his lead, not he yours. Yet the majority of art patrons are not of this class; they are not connoisseurs, nor are their minds inflexibly fixed upon the nature of the purchase they are to make. What is settled is rather the price they are to pay.

That fact is recognized in a very practical manner by certain dealers in art objects. Their window displays often group a number of things together, with a card announcing that any article in the window may be had at a certain price. The price is fixed, but there are a number of objects to choose from. The individual having that amount to spend for a present may see something perfectly suitable. These considerations show the advisability of price-classification in dealing with art wares; not that it is necessary to group the goods in that way in your window or upon your tables or shelves. There should, at least, be a mental classification, so that when the customer reveals his price limit you can at once recall a variety of objects coming within the figure. Be enough of a mind-reader to ascertain as quickly as possible whether it is the price or the object that is paramount in the customer's inner consciousness, and govern yourself accordingly.

## Recent Decisions by General Appraisers on Undecorated China.

DECISIONS of the Board of United States General Appraisers, in cases involving the duty on undecorated china, have been announced recently as follows:

UNDECORATED CHINA.—Protests of L. Straus & Sons. These protests related to china cooking ware, white inside and having a brown glaze outside. The importers contended that it was dutiable as undecorated china under Par. 95, Tariff Act of 1897. Under the rule laid down in *Thurnauer v. United States* (T. D. 28689) this contention was sustained as to invoices under the name of Pillivuyt.

UNDECORATED CHINA.—Protests of Frank & de Keyser and protests of G. M. Thurnauer & Bro. The merchandise was held dutiable as undecorated china, as claimed by the importers. These articles consisted of shirred egg dishes and coffee pots, of white china with brown coloring on the outside; also of earthenware pudding dishes and casseroles, white inside and brown outside. Protests sustained. *Thurnauer v. United States* (T. D. 28689).

**Trade-Marks—Their Use and Efficiency.**

Address of J. H. PERRY before the Third Annual Convention of the American National Retail Jewelers' Association, at Cincinnati, O.)

THE subject given me by the living dynamic force of the National Retail Jewelers' Association (President Hurlbut) is "Trade Marks Their Twin Brands," which have existed from the earliest commercial times. Brands have individual ownership only, though some articles have been branded by indentation and otherwise, which, though called brands, have many times really been trade-marks.

Pigs, hogs, etc., are branded regardless of ability to determine ownership. This distinction is not important in this connection, more than to a difference.

Often speak of cigars and certain liquids as given brand, which may or may not refer to quality.

Trade-marks, when intended to be permanent, indicate quality or character, and are usually simple and modest. Whenever we see on a bill "the great Behemoth of holy writ" in prominent display, we know there will be no mention of a hippopotamus. When things terrestrial are too insignificant to portray the grandeur of a man's performance, and the advertiser seeks ecclesiastical claims for description, as "gorgeous constellation of brilliant stars" and like expressions, we know that a woman is going to ride a horse perhaps jump through a hoop.

High-sounding descriptions, or elaborate marks or illustrations, are suspicious and smack of deception. Ingrossol is a modest trade-mark. It does not indicate quality as watchmakers understand quality, but indicates character. The character may be good or bad, or good or bad shaded to any degree of color. The public have learned that Ingrossol is a synonym for cheap!

Howard is also a modest trade-mark, which has become a synonym for quality, so we have learned that "Howard" refers to high quality and high prices.

Reverse these trade-marks, and note the confusion and disgust that will follow.

Should both these trade-marks be put on the market for sale, no doubt in this instance the one indicative of cheapness would bring the higher price because of nearer universal demand. Should the trade-mark "R. F. S. & Co." and some other well-known trade-marks indicating lower quality and lower price, or the same quality and price, which it would not be advisable to name—should these two be put on the market the trade-mark indicating the higher price and quality would command the higher price. Exactly the reverse of the former, because of the nearer universal demand and the better dealers.

**PSYCHOLOGY OF TRADE-MARKS.**

And here is where the psychology of establishing trade-marks must be considered, viz., to determine the marks and qualities that will become popular.

The trade-mark "Uneda" of recent origin, as applied to the National Biscuit Co.'s products, backed by good quality, has become of immense value, because of its unique combination of words in wide advertising. The president of the company is reported to have said that the great success of the company was largely due to that one word as its trade-mark.

The word "Rogers" accompanied by "1847" has become valuable by age, though many claim higher value, but they must go through the long, tedious process of educating the public, single-handed.

This leads us to the belief that should a trade class adopt a trade-mark, they could in one year present it to more people and popularize it more than could a person or corporation in perhaps a generation, principally because having an interest in such marks they would exercise especial stress upon its merits, naturally minimizing other trade-marks in which they had no interest.

**TRADE-MARK LAW.**

Trade-mark precedent in the United States for exclusive right was established as far back as 1803. The earliest legislation, however, did not occur until 1870. The Supreme Court ruled against it, stating it was neither invention nor discovery. By act of March 3, 1881, they could be protected by patent. Previous to that date to secure exclusive trade-mark rights required trade with foreign countries, Indian tribes, or by long use.

**VALUE.**

Their value is constantly increasing, and are more and more relied upon to build and maintain prestige for manufactured articles, because of the world's dishonesty.

Any consistent trade-mark, when backed by quality, is sure to become valuable to a greater or lesser degree and in shorter or longer time according to its number of friends, advocates and methods of promotion.

Should the retail jewelers establish a system of trade-marks, with qualities carefully guarded and marketed (with the now 1,000 members and the certain thousands to follow), they will create a value for it greater than all the combined jewelers' trade-marks now in existence in the United States.

And what are these trade-marks worth? What mathematician can calculate accurately their value?

What owners can approximate closely enough to set a price?

Ask the great watch companies their price for their trade-marks, with the condition that they transfer them to others and abandon their use. What would their property be worth?

Imagine the exodus of the employees from their factories and decay of their properties.

For example, let us cite a business without assets other than a trade-mark, and perhaps the best example of this would be a great newspaper. Suppose a great fire should destroy their entire plant—presses, type, buildings, etc. Again, suppose that they could employ their work done so that the paper could issue without serious interruption. When an annual profit of, say, \$10,000 could be netted, that trade-mark then would sell on the stock exchange for \$100,000. If the profit could be multiplied by 10, then that trade-mark, without other assets, would be worth \$1,000,000.

Running over conditions like this will impress upon any calculating mind the value of trade-marks, and naturally create a wholesome desire to own one or more in whole or in part.

When Seth Thomas sat in his little workshop with saw, knife, drill and plane, carving clocks from wood, little did he think that some day his white hair and honest, homely face and name would the world around become the synonym of good clocks, and how must his successors and beneficiaries revere that name.

When Dennison sat behind the kitchen stove with paper, scissors and string, making tags by hand, it was not possible for him to grasp the magnitude of business that would follow such humble beginning, and the prestige his name would inspire.

When Robert F. Simmons began in a modest way to make rolled plated chains, with the firm determination that through all varying conditions and temptations, hard times and good times, the quality should remain, he could not know that none would aspire to excel, or that he had established a standard for all tradesmen of his class.

It is not natural for the normal man as successor to the benefits of these high ideals to depreciate them by reduction of qualities or by violation of commercial ethics, and this is why trade-marks of merit live for generations.

Trade-marks were suggested by powers higher than man.

The story of the rainbow, with its prismatic colors dancing in the sunlight, placed in the heavens to assure mankind that the world would not again be devastated by flood. Though this is pure fiction, it echoes what was in the heart of man at that age of the world, that be it peace, war, good or evil, it should have its emblem indicative of its true condition.

It was Nature, or Nature's God, that painted the rose a distinctive shade and placed deep down in its recesses a perfume that none can successfully imitate.

It is an unknown force that instills into the petals of the flower honey sweeter than language can portray, that instinctively leads the honey bee to its portal to suck from its depths a delicious nectar for its Winter storehouse.

These colors, these emanations, each is peculiar to its own, suggesting in nature a mark by which to determine its exclusive virtue.

Thus, when with united purpose a body of well-meaning tradesmen unanimously adopt and promulgate a well-guarded insignia or mark of quality with so many advocates, each sincerely confiding in the standards represented thereby, they would again inspire the confidence of the public.

But few years would roll by when the jeweler would again be restored to his once high place in the world's esteem, enjoying the confidence of his compeers and fellow men, which in turn would lead him on to nobler ideals, a more profitable and honorable business, a more peaceful and satisfied life.

**AMONG the timely offerings in cut glass to be seen at the salesrooms of Joseph Irons, 35 Maiden Lane, New York, is a line of fern dishes. These dishes are shown in a number of sizes and styles of cutting, and are silver lined, the lining being so arranged that it can be readily removed. The dishes are rounded and are supported by three legs of clear glass. Another attractive offering is a fern dish shaped somewhat like a compot, and having a stem about five inches high, resting on a rounded base. These holders are specially adapted to long, drooping ferns, and when the dish is filled with ferns of this kind the effect is most pleasing. Rose jars in close cutting designs with pillar effects are shown, together with dainty dish and plate sets for serving Summer salads. Cologne bottles in a number of sizes are shown, with heavily cut stoppers. New patterns in bonbon dishes suitable for the Summer camp or lawn party come in a number of shapes, with intricate cuttings. The line of vases and compots is larger than ever, and includes many attractive offerings. Mr. Irons represents the Corning Cut Glass Co. and the O. F. Egginton Co.**

**SEASONABLE NOVELTIES IN RICH GLASS.**

AN ATTRACTIVE EXHIBIT OF CUT GLASS at the salesrooms of the International Silver Co., 9 Maiden Lane, New York, includes dainty fruit or bonbon baskets especially appropriate for Summer and Fall use. One of the baskets has a rounded base and is scalloped and notched at the top. The handle is rounded and is gracefully formed. The cutting on these pieces is especially attractive. A tall vase here shown is of special interest; it has a rounded base and body, and is highly decorated in an intricate pattern cutting. About the vase at regular intervals are circle cutting in star and other patterns. The line includes many salad and bonbon dishes, fruit receiver, compots, etc., which should prove of interest to jewelers carrying cut glass.

**AN ATTRACTIVE EXHIBIT OF CUT GLASS**

S. C. Doehring, Hempstead, Tex., has moved to Houston. Mr. Doehring conducted the only jewelry store in Hempstead for many years. E. J. Kassel, Shreveport, La., is the plaintiff in a suit brought against the Independent Order of Odd Fellows, Shreveport Lodge No. 63, for \$12,500, alleging that the lodge expelled him on the charge preferred by two members, who claimed that he belittled the order and referred to it as a "humbug." The jeweler avers that he had been a member of the order for 21 years.

S. C. Doehring, Hempstead, Tex., has moved to Houston. Mr. Doehring conducted the only jewelry store in Hempstead for many years.

E. J. Kassel, Shreveport, La., is the plaintiff in a suit brought against the Independent Order of Odd Fellows, Shreveport Lodge No. 63, for \$12,500, alleging that the lodge expelled him on the charge preferred by two members, who claimed that he belittled the order and referred to it as a "humbug." The jeweler avers that he had been a member of the order for 21 years.

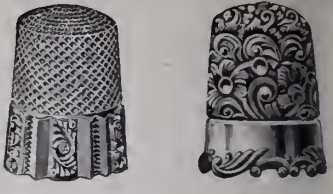

**S**OLID gold jewelry at less than plated jewelry costs. I bought 5,000 pieces, including cameo scarf pins, brooches in real cameo and corals, veil pins, cuff pins, rings, etc., all at less than one-half the regular price, as I bought them in trade sales; prices from 45 cents to \$1.38 in scarf pins, cuff pins, etc., large fine solid gold cameo belt pins and brooches, \$3.37 to \$5.00. Sent on memo. bill to well-rated dealers. Sold for cash only.

Look them over, return what is not wanted, enclose your check in box for goods kept, no other way. I have fine coral and amber necklaces, 38 cents a string; diamond rings, \$3 up to \$300.00 each;  $\frac{1}{2}$  carat fine white diamonds, perfect, \$60 to \$85 carat. A few imperfect, \$45 carat. Be quick for these bargains.

Imported ladies' elastic belts, 25c. to 75c. each, less than half the cost of the duty to import them. Gold-filled chatelaine watches, inlaid in gold; fancy enamel watch and pin to match in handsome velvet case, \$3.55 each.

# Another Record in Jewelry Auctioneering

2 SUCCESSFUL SALES IN ONE YEAR FOR THE SAME HOUSE

Just completed the second sale this year for L. Lechenger, of Houston, Tex. Mr. Lechenger removed his overstock to Beaumont, Tex., and although in a strange city, the sale was an immense success.

Read following clipping:

The sale which L. Lechenger, the popular Houston Jeweler, has been conducting in Beaumont, was brought to a close last night with the largest crowd and most brisk sale of the week, when the auctioneer, Sam Martin, bade good-bye to the throng at 10 o'clock and announced that he was about to leave for his home in Milwaukee. With the close of this sale ended one of the greatest movements in jewelry stock ever witnessed in Texas, and through it all Mr. Lechenger has kept every promise and stood behind every sale with his reputation earned by many years in active business in South Texas.

Sam Martin, the auctioneer, proved himself a master of his art, and while getting good prices for his wares, considering the nature of the sale, he always maintained interest and kept the crowd in good humor and the increase in attendance from night to night was largely due to his successful manipulation of the sales.

Two to six sales for hundreds of jewelers. Every one a Success

No client of mine has ever engaged another auctioneer if I could accommodate him.

## 5 SALES IN 10 YEARS FOR ONE OF AMERICA'S LEADING JEWELERS

THE MERMOD-JACCARD-KING CO., OF ST. LOUIS, MO., is one of the largest and most reliable jewelry house in the world. They carry only high-grade goods of standard quality, and they consider their reputation for honesty and reliability their most valuable asset. The policy of this firm in regard to auction sales and auctioneers is a beacon light for the trade at large. Send to them for reference.

I have made five sales for this firm in the past ten years, and each sale has not only been more successful than its predecessor, but was followed by a large permanent increase in the business of the house.

Recently conducted Nine Weeks' Sale for the M. Scooler Co., New Orleans. If you are overstocked, or want to live up your trade, or if for any reason you wish to realize promptly and profitably on your stock, and at the same time increase your future business, write at once to

## MIRROR FINISH

is the name which has been given to S. O. Bigney & Co.'s

## HIGH GRADE GOLD-FILLED CHAINS

on account of the beautiful finish. After the links are soldered the gold is somewhat porous. In order to get a perfect finish, the only method known to the art is the method of burnishing. This we apply to our chains. It closes the pores, hardens the surface, gives the mirror finish, and will add one-third to the wearing life of the chain. This method makes for durability and excels all other processes of hardening finish.

Every retailer should have a good stock of our high-grade, gold-filled, mirror-finish Chains, Fobs and Bracelets.

# The Railroad Watch

16 Size—Bridge Model      18 Size—Full Plate

**THE HAMPDEN WATCH CO., Canton, Ohio**

# Real Rose Hat Pins

Every genuine DEL-AMOTHE Real Rose Hat Pin has the name stamped on the pin here.

**This will be the largest selling article this Fall and Winter—it is already.**

So remarkable are the sales of DELAMOTHE Real Rose Hat Pins that we do not expect dealers to believe same until they have actually tried them out. It does not seem possible that during JULY this product was sold by Retailers at the rate of two to twenty dozen daily—EVERY day. The Retailers' profit is unusually large. Not only are they proved big sellers, but they are a great attraction for the stores that sell them. The largest Advertising Campaign in years is behind this product. Every possible Advertising and Selling Help will be furnished Dealers gratis. This product will be sold to the best Dealers only, and retail prices will be strictly maintained.

DELAMOTHE Real Rose Hat Pins are made out of live roses, changed by a secret process into metal, then finished in attractive colorings and mounted on Hat Pins. This SECRET process is a recent discovery of Prof. L. G. Delamothé, a noted French Electro-Chemist, and is owned solely by the Delamothé Natural Art Decorating Co., Spokane, Washington, for which this Company is the Sole Distributor. It is the ONLY process by which an OPEN Rose can be perfectly metallized. This product is made in the finest manner possible, and its high quality will be maintained. The Roses used are grown in Oregon and Washington, famous the world over for their beauty and superiority—made where these Roses grow. No two Real Rose Hat Pins are alike. Finished in five colors to conform to the prevailing fashions in millinery. Six sizes, from the smallest rosebud to the full blown flower.

**Not sold through Jobbers.**

*Do not buy inferior imitations. Sold direct only.*

**Write for Illustrated Price List**

*Or have Two Dozen Trial Assortment sent on 30 days approval.*

**DELAMOTHE DISTRIBUTING CO.,** SOLE DISTRIBUTORS **Spokane, Wash., U. S. A.**

# The SIMMONS 12-Chain Combination

A SPECIAL OFFER of an assortment of a dozen of the most popular patterns of Vest Chains—the best sellers in the entire Simmons line—for **\$21.75**

This unconditional and unequivocal guarantee goes with every Simmons Chain.

On the opposite page is shown a special assortment of Simmons Vest Chains, comprising twelve of the handsomest and most salable patterns we make.

The price of this special combination to retail jewelers is \$21.75.

This is certainly a remarkable offering; undoubtedly it is the most attractive selling combination of high-grade chains ever offered at anywhere near the price.

It is a well varied selection of desirable patterns—not a doubt seller in the lot—and every chain can be retailed at \$3.00 or more; and as an extra inducement, we give, *free of charge*, with each dozen, a *velvet roll, worth a dollar and a half*.

Each dozen chains will be mounted on a 14 x 17 inch *Imported Manchester Velvet Roll*, costing \$1.50, for which there will be *absolutely no charge*.

Roll of Imported Manchester Velvet (14 x 17 inches) worth \$1.50 given free with each combination.

*The combination is only sold through the jobbing trade, and a universal price to retailers is \$21.75.*

To insure early delivery, order of your jobber at once; if he cannot supply you, write us and we will let you know immediately where it can be obtained.

CROWN PLIER No. 331

For clamping the collar of crowns on dust-proof cases while removing same from pendant. This is usually found a difficult task but easily done with the help of this plier.  
Nickel plated.....each, \$ .60

1 Doz. BARREL HOOKS (threaded with Finished Drill and Tap

With this outfit a new barrel hook can be put in barrel in a short time, and in a proper manner will not pull out. Price.....\$ Same as above without Taps and Drill, per

JEWELERS' SQUARE SAWS, ROUND BACK

Hardened by a process, giving "toughness" in other brands of in No. 00000 t Price, per gross \$1

ECHARCO WATCH GLASS CABINET No. 15 (Patented) Price, each. \$16.00

This cabinet has many new features not found in any other. Novelty and usefulness are the chief arguments in its favor.

Construction and Material.—The cases are made of oak, finely finished and of attractive appearance. Sides are paneled. Partitions of bass-wood and put together in best manner possible.

Partitions are skeleton, preventing accumulation of dust, chips, etc. Bottoms of cabinets are hollow to receive chips, dust, etc.

Arrangement for Glasses.—The nine drawers contain 1,547 spaces to hold glasses in upright position.

Labeling of drawers, as shown in cut, is on the pulls of the drawers and done in gold bronze on black background.

Dimensions.—24 inches wide, 29½ inches high, 12 inches deep; weight, 45 lbs.; with packing case, 75 lbs.

The construction of drawers, the arrangement of partitions to economize space and weight, and the novel method of showing contents on drawer-pulls are all prominent characteristics and extremely well thought of.

Top View, Showing Skeleton Frame of Drawer. Accumulation of dust and chips is impossible.

SHELDON'S PATENT HAIRSPRING COLLET REMOVER

No need of any more distorted hairspring bent balances.

Every watchmaker knows how troubles in removing the collet without either distorting the hairspring or bending the balance; with the use of this tool the difficulty is overcome. The tool is provided with a pair of spring fingers, which at the ends and ground very thin and sharp. By tilting the balance the jaws may be slid under the hairspring and by pressing the jaws together will readily loosen the collet and then by turning the central screw, which has a hole in the center to receive the staff pivot, you can force the collet from the staff, without injury to the balance spring. The adjustable screw nut is provided to avoid wear or injury to the jaws. A general illustration will demonstrate the utility of this tool. Finely nickel plated.

Price, each, \$1.25

RING SEPARATING PLIER No. 1

A most effective device for cutting rings from fingers, when too tight to be removed otherwise. A few turns of the saw will cut a ring of average weight. Full nickel plated

Price, each, \$1.75

A handsome Booklet, 8 inches by 5 inches, fully illustrating Zipperer's tools for watchmakers will be mailed to you upon receipt of a postal card, with your name and address.

# A New Pattern in Toilet Ware

The distinguishing feature of the new Whiting FLORENTINE Toilet Ware is its refinement of line, of ornament, and of conformation.

The mirror handles are conveniently long, the brush backs of a distinctive shape, symmetrically elegant and adapted to advantageous service, while the exceptional flatness of all the mountings adds to the individual character of the set.

Workmanship and materials are of the best quality, and the Florentine is finished in four attractive styles—plain, engraved, etched and repousse.

## Read Our Customers' Letters

SOUTH BEND, Ind., Jan. 6, 1908.  
(Extracts from letter.)

THE ARNSTINE BROS. COMPANY,  
Cleveland, Ohio:

Dear Sirs—In reply to your favor, regarding testimony for your Catalog, will say that, as a medium for advertising, we believe your system very beneficial and elevating in gaining a high opinion of the trade as a first class jeweler, and by having our name brought up and spoken of in the store and at home. Having the merchandise to deliver, for certain illustrations when asked for, was very satisfactory.

We will be glad to interview your proposition for 1908 when you have it ready. Yours truly,

CALVIN K. CLAUER.

This firm used The Arnstine Bros. Company Catalogs in 1907, and again placed an order for 1908.

STORE OF CALVIN K. CLAUER, SOUTH BEND, IND.

SCRANTON Pa., Feb. 1, 1908.  
ARNSTINE BROS. COMPANY,  
Cleveland, Ohio:

Gentlemen—Answering your request, regarding the benefits derived from the Catalogs you made me, I am pleased to state that, notwithstanding the financial depression, which was in evidence here elsewhere, my business increased only 25 per cent. over December, 1907, which, I assure you, far exceeded my fondest expectations. Without the use of the Catalogs, I am satisfied my holiday business would have been much less than the previous December, as more than half of the working people were laid off, and I am, therefore, quite enthusiastic over the results.

Trusting I may have the pleasure of placing my order for your new catalog in the near future, and with kind regards to Mr. B. V. Arnstine, I remain, Yours truly,  
A. E. ROGERS.

This firm used The Arnstine Bros. Company Catalogs in 1905, 1906 and 1907, and again placed an order for 1908.

STORE OF A. E. ROGERS, SCRANTON, PA.

We have Salesmen in every State in the Union. If you are interested, and will notify us, our representative will take pleasure in calling on you and explaining our method

IN WRITING US PLEASE MENTION THIS ISSUE "JEWELERS' CIRCULAR-WEEKLY"

## Artists and Designers Agree

That the most meritorious compositions are those attaining harmony and breadth without superfluity of detail.

## Hostesses and Housewives Agree

That the best Sterling Silver Tableware is that having only enough ornamentation to lend the proper amount of grace to the dignity of clear, clean silver.

Note how Ye MOUNT VERNON PATTERN fills these requirements, being designed to ye Colonial taste of Strength, Beauty and Simplicity

*Its Success is Assured and Continuous*

### Rogers, Lunt & Bowlen Co.

Greenfield, Massachusetts

Write for Catalog

## HERE IT IS AT LAST!

Just what you **have** been looking for and have had calls for time and again. A German Silver Wrist Bag with a Soldered Mesh. Somewhat higher in price than the unsoldered mesh? Of course. But you can now sell a bag that will not break an one you can guarantee. Twelve patterns, 4", 5", 5½", 6", 6¼" widths.

We are still headquarters for high grade Sterling Silver Bags, and have also added a line of Change Purses.

Our goods are made on honor; we believe with Ruskin that "A composition for cheapness, and not for excellence of workmanship, is the most frequent and certain cause of the rapid decay and entire destruction of arts and manufactures."

# The "Krementz-Bodkin Back" STUD and VEST BUTTON

Pat. Feb. 16, 1904

Krementz & Co. believe the trade will agree that they understand the jewelry business sufficiently to know that the "Krementz-Bodkin Back" Stud and Vest Button is the simplest and best mechanical Stud or Vest Button made.

The "Krementz-Bodkin Back" Stud and Vest Button is not one piece, but is one-piece construction, which makes it very simple and the strongest and most durable, because:

- 1—It is Solderless
- 2—It has no spring or hollow wire to bend or break
- 3—It is made of solid, hard spring metal throughout
- 4—It is made by Kremenz & Co. which insures perfect quality, construction and workmanship

THE STORY OF THE HEAD

## Krementz & Co. Invite Comparison

Krementz & Co. stand back of their assertion. All "Krementz-Bodkin Back" Studs and Vest Buttons are sold also under the unique Kremenz Collar Button Guarantee.

THE STORY OF THE BODKIN BACK

### GUARANTEE

If for any cause whatever, a "Krementz-Bodkin Back" Stud or Vest Button should be damaged either in the hands of the dealer or wearer, a new one will be given in exchange, without charge. "Krementz-Bodkin Back" Studs and Vest Buttons are made in large variety of patterns in 14-kt. gold and platinum, set with pearls and diamonds.

## Candy Dishes of Sterling Silver

**L**IKE everything of our manufacture, these Candy Dishes are indisputably pretty and serviceable. Designed and wrought with an artistic daintiness suggesting the toothsome tid-bits they are destined to hold, these dishes invite the attention of your trade and lend an unmistakable refinement to the tea or dining table.

Your stock is incomplete without an assortment. Write for it.

**G. A. Henckel & Co.**

Makers of

Small and Medium Wares in Sterling Silver

FOR THE TRADE ONLY

109 to 115 West 26th St., New York City  
(One block west of Broadway)

The trade is cordially invited to call at our show rooms and inspect our new Fall productions

## JUST A REMINDER

that this is a good time to investigate our line. You may have shopped around and found nothing out of the ordinary and perhaps think you have seen all there is. But wait — you have overlooked the best and the one line that is different from any other.

Our goods are noted for their originality, graceful shapes and handsome designs. Good weight silver. As for prices, it is only necessary for us to state that every article in our line is a good seller and you will buy no other after the first trial.

**Silver Deposit Ware, Photo Frames, Belt Buckles, Sash Buckle Pins, and a large assortment of novelties.**

# "New Process" GILLETTE Blades

## Information to GILLETTE Dealers

Beginning with Sept. 1, 1908, only "New Process" GILLETTE blades will be distributed.

They differ in price, quality, appearance and style of package from the previous kind, and the public is being notified of the change by full-page advertisements in all the leading magazines.

More than two million GILLETTE users will now accept only "New Process" GILLETTE blades. If you have them in stock before other dealers in your locality you will get the business, and at the new price your profit is a very liberal one.

"New Process" blades are manufactured by newly-invented machines and processes, making them superior in appearance, operation and endurance to any blades ever produced by anyone.

These machines are automatically regulated, and grind, hone and sharpen each blade individually with the utmost precision.

Every cutting edge is perfect, and possesses a degree of keenness not produced by any other process.

"New Process" blades are finished with a high polish that renders them easy to

clean. Since dust and moisture do not cling readily to a polished surface, these blades are practically immune from rust.

"New Process" blades are packed in a handsome nickel-plated box which seals itself hermetically every time it is closed. This shuts out all dampness and effectively protects the blades from rust in any climate, land or sea. When empty, the box forms an attractive waterproof match safe.

**The set now contains twelve blades.**

**The Retail Price is \$1.00 per set.**  
Twelve sets are packed in a carton.

To those who are not handling the GILLETTE, we suggest, "Get Busy." Get the sales resulting from our huge advertising campaign—the increased business and profits that the co-operation of our Sales Department will bring you.

YOUR customers are continually seeing GILLETTE advertisements and they want the razor. Eventually they buy it somewhere.

**WHY NOT OF YOU?**

Write us for catalog and liberal discounts to dealers.

## SIGNING PARIS FASHIONS.

### JEWELRY NOVELTIES SEEN IN FRANCE'S CAPITAL.

PARIS Sept. 2.—Not only in the dark corners of the world, but even at the present time there is a deeply rooted faith in magic charms and fetiches, which are but various charms by various names. With the ancients certain gems were of good or evil omen and were to be worn under certain conditions, the birthstone usually being of fortunate import. People of sporting propensities, such as racing men, gamblers, auto-drivers and balloonists, who are always more or less in danger, appear to be specially imbued with the superstition, and if there were known, one would discover that many of these persons, men or women, wore upon their persons some charm which was supposed to preserve them from danger, cause them to win at cards or horse races or bring good luck in their business undertakings. In England and France one notices the motorist who make a habit of motoring wear upon their watch chain some quaint ornament, such as a religious medal of gold or silver. The sacred medals have great value as preservative agencies, St. Christopher, who is the patron saint of travelers, being to the fore. Under certain conditions St. Anthony is favored, while crosses and Oriental luck charms are numerous. There are Egyptian sistrums engraved with cabalistic characters, also the sacred ankh, little talismanic hands to ward off the evil eye, and a great variety of Turkish and Persian turquoise matrix pendants engraved in Arabic characters from the Koran, or other holy writings.

In China jade and ivory elephants with golden housings take the place of sacred talismans, or the faithful wear a miniature image of Buddha, while in India the sacred snake or snake is employed as a fetich. Those with occult proclivities believe firmly in the efficacy of the natal gem and refuse to wear aught else. Rings or locketts in the form of a heart with "Dieu vous garde" or other good sentiments are popular. Ladies usually suspend these talismans from a bracelet or sautoir.

Many automobilists set the image of a saint or animal on the bonnet of the machine, but in this case they are several inches high and generally of silver or bronze. It is said that the captains of sea and river craft, tennis, golf and ball players rarely neglect to provide themselves with some sort of mascot, which, if lost, they declare means defeat. The mystic Japanese amulet, a little trifle made in the form of a circle, with a sign of mystical import in its center, has become very fashionable. There are also tiny Chinese gods or other talismanic charms with small and barbaric silhouettes from Teheran and Africa, in the semblance of some horrible sacrificial victim who must be appeased by the wearing

of a charm. It is certain that this craze is spreading, and, although not all of the people addicted to motoring confess their belief in the potency of some favored mascot, it is certain that but few ever set out upon a journey or enter a race without wearing some particular mascot upon the person or set upon some part of the car.

### PRIZES FOR GAMES AND SPORTS.

A brooch which would be eminently adapted for a woman's tennis prize consists of a golden tennis net with posts, in which is entangled ruby and sapphire balls. For diabolo players there are brooches which reproduce this toy in gold and colored enamel with crossed metal sticks. A tennis racket of interlaced gold cords with a beaded ball and with handles set with turquoise or emeralds is among pretty sporting devices. For a riding tournament the winning party might be made happy by a scarf pin in the form of a gold or silver riding whip or crop, a stirrup, a racing shoe, a jockey cap in gold and enamel or a carven semblance of some renowned racer in gold or silver.

For the woman who follows the hounds there is a pin in the form of a golden fox, a hound in full chase, etc. There are besides whips and crops of the finest leather with superb jeweled handles, often knobs incrustated with tiny precious stones a handle a foot long in which are imbedded tiny garnets or turquoise. Others of *reposee* gold with a great faceted semi-precious stone, such as an amethyst, crocokolite, peridot or precious quartz set in the knob. Now and then one sees solid silver or gold stirrups or leather ones metal-decorated. These make exquisite prizes for men or women horseback experts at horse shows and tournaments. For golf prizes there are a pair of crossed golden golf sticks with an arrested pearl ball in the center. In fact, the ingenuity of the jeweler has been taxed in order to provide suitable prizes for the members of societies who are addicted to out-of-door sports.

For chess prizes there are black and red enameled cuff buttons in a checker-board pattern, while those for bridge are numerous—an enamel heart or diamond on a white ground in the shape of a tiny card for a gentleman's prize, while for a lady there are veil pins consisting of the same design set on a long gold or silver pin, or pin trays of silver with several cards in colored metal thrown over a silver or gilt background.

### FANCY JEWELRY.

Fancy jewelry for wedding and birthday souvenirs present an infinite variety, and many of the new conceits impart an effective touch to a woman's toilette when they are *en rapport* with the colors of her gown. The deep-tinted stones so much employed harmonize with rich Oriental embroidery, while the dainty neck chains, pendants,

bracelets and hair ornaments, lend a touch of needful color to pale-tinted toilettes. Gems are nowadays set almost invisibly in platinum settings with light and airy effect. An excellent example is a Maltese cross of splendid sapphires, caliber cut.

There are head *bandeaux* in a glittering tracery of leaf and bud in diamonds with sprays of delicate workmanship. A tiara, consisting of three rows of diamonds graduated, set on an invisible platinum wire, is an exquisite ornament. Of sentimental import is a bridesmaid's brooch in a pattern of two interlaced hearts and true-lovers' knots picked out in small turquoises, with the initials of the bride and groom in diamond sparks. Very attractive is a brooch of clear pink tourmaline with the center formed of a great aquamarine, with pearls in a mill grain setting.

Cameo hat pins with others of Royal Doulton and Wedgwood are attractive, while others are of Genoese filagree in frosted gold and silver.

Neapolitan coral is by no means akin to the common red variety. Great beads of this dark red coral and earrings surrounded with diamonds are most becoming to dark brunettes, and such ornaments are highly prized by the Italians.

Death's head masks and small coral hands are seen upon the watch chain of almost all of the Italians. A quaint ornament is a Japanese head in carven gold holding a fan; his dress is of colored enamel.

A showy and bizarre ornament for the hair shows two birds of paradise with enameled tails, the feathers picked out with tiny gems. One holds in his glittering beak an enormous wine-colored topaz, which he is offering to the bird beneath. The birds are several inches in height and are rather grotesque than elegant. Another bird fancier wears a brooch on which is depicted a gorgeous blue and green parrot with gem-incrustated head. Rather pretty for the hair is a peacock feather in blue and green enamel jewel incrustated.

Quaint Oriental necklaces show oval-shaped pendants of turquoise matrix engraved in golden characters with a sentence from the Koran. Amber necklaces are coming in, those in the beautiful hues of smoky amber being the most expensive and fashionable. A necklace composed of great oval beads, the center one two inches in diameter looks well on a black or white gown. The transparent variety reminds one of glass and is not so highly prized. Most of the best amber is found in the Black Sea. It is greatly prized by Oriental nations.

COUNTESS DE MONTAIGU.

Haviland & Hilkins, about a week ago, reopened the jewelry store of Edward Albertson, Glens Falls, N. Y., after having entirely remodeled and refurnished the establishment.

### Concerning the Use of Colored Fancy Stones

IN referring to the above subject, it is the employment of the ordinary stones that is to be considered, such as rubies, sapphires and emeralds, but frequently set fancy stones. It is true that stones of this description are employed for fancy articles. While, at times, says the *Deutsche Goldschmied-Zeitung*, these minerals have been given hardly any attention, nowadays, thanks to the efforts of artistic craftsmen, they have attained greater importance. As "fancy stones" we may designate all the precious stones used in the jewelry industries, with the exception of rubies, sapphires, emeralds, opals and diamonds which are sold according to their weight.

Primarily we may mention the aquamarine. Under the title aquamarine we understand the beryl, of pure cerulean or bluish-green or greenish-blue color, which may be likened to the color of sea water. These stones are very rare; those of deep sapphire blue are found, though seldom, in North America. In contrast to the emerald, which is also a species of beryl, the aquamarine has no voids and fissures, is rather perfectly clear and transparent, and in most cases without flaw. By itself alone aquamarine is not well adapted for setting, but in combination with brilliant-cut pearls very fine effects are obtained, especially when used as the central piece of a brooch or other piece of jewelry in connection with brilliants.

Fancy pieces, modeled after the animal world—dragon flies, lizards, etc.—are admirably set with fancy stones, in order to increase the resemblance to the semitelluric natural object. In England, for this purpose, the yellowish-green olivine is especially popular for this purpose, just as in this country the olivine is often preferred to emerald for white jewelry.

The vari-colored kinds of corundum under the title of fancy sapphires are used, in the finer pieces, for white jewelry ornaments, whereas the current kind is used in the chain manufacture for chains, necklets, etc. Here finely differentiated shadings are not so much at hand, and few diamonds, or none at all, are used. For fan chains, especially, every possible color is used together, but this is possible only to a certain extent.

Moonstone is admirably adapted to the now so fashionable vest and jacket buttons. Cut in flat button shape and set in the center with a fine fiery ruby, or a cabochon surrounded with a cluster of small rubies it is just as highly effective. Altogether, the combination of moonstone with rubies is very attractive.

We might extend this paper indefinitely, but will leave this to our readers, and hope that what is above written will be of some incentive.

We might mention, in connection with turquoise, a fancy combination that is little known, i.e., their employment with brown diamonds. This style of work is especially adapted for large pieces, such as stomachers (corsage fronts), etc.

### Jewelry and Silversmithing at the Franco-British Exhibition.

By W. Augustus Steward, Chief Instructor in Gold and Silversmithing at the Central School of Arts and Crafts, London.

(Continued from issue of Aug. 26.)

In the issue of Aug. 9 the writer described the exhibits of a number of French silversmiths, but at that time was unable to furnish any photographs of the individual pieces displayed. We show herewith three representative pieces of the French work displayed in the French Palace of Applied Art—two enameled pendants and a diamond brooch. These are all in the exhibit of

DIAMOND BROOCH, BY VEVE.

Veve Freres. Veve, as was said before, by his power of originality and artistic insight does more in his exhibit to make up for the absence of Lalique than any other French exhibitor or group of exhibitors.

When the description of Elkington & Co.'s booth and exhibit was given the photographs, from which the illustrations which appear herewith were made, had not yet come to hand; the cut of the

ENAMELED PENDANT, BY VEVE.

Booth shown here gives an excellent idea of the appearance of the exhibit as a whole, while the individual pieces illustrated are but representative of a large number of artistic products which the house

is showing. The Cochrane shield is the memento presented to His Majesty's ship *Cochrane* by the family of that name, while the ornamental piece with the many figures (page 61) is the massive table center for the

THE COCHRANE SHIELD.

Argyll and Sutherland Highlanders mess. The "Grand National" hunt trophy, also shown, is as typical of the beautiful collection of presentation cups as is the Cochrane shield of the number of massive silver chal-

lunge shields presented to different British warships which this exhibit shows.

Canada is represented in her fine building by Messrs. Hemmings, who show us what they can do in the way of silversmith-

PENDANT, BY VEVE.

ing; this exhibit is certainly very creditable, as are also their specimens of enameling. It is a bold exhibit and surprised not a few home birds. The same may be said of Caron Bros.' comprehensive exhibit of enameled badges, brooches, orders, etc. These Colonials help to demonstrate the fact that, thousands of miles from the

of learning, they can make successful efforts to vie with those who are located among the gems of the ages, and can do so by the assistance of the best men in the craft.

Indian exhibits are good of their kind but there is nothing special and absolutely nothing new about them except when they are influenced by European styles, and when they are absolutely spiritless.

On the whole the jewelry, silverware and logical exhibits at the Franco-British Exhibition form a splendid educational opportunity for all those engaged in these lines. The Exhibition itself has certainly

"GRAND NATIONAL" HUNT TROPHY.

for a better understanding between the two nations, and done much to firmly establish the true spirit of the entente cordiale.

**Rich and Handsome Corsage Ornament.**

At the suggestion of several of our readers who have asked us to give prominence to unique American products in gem jewelry, we illustrate on the front page of this issue a strikingly original corsage ornament which was made some time ago by Tiffany & Co., of New York, for display at one of the international exhibitions.

The piece is one of the richest as well as one of the most valuable that has ever been set out by an American firm, and the combination of the colors of the diamonds, rubies and other precious stones used was striking as well as beautiful.

Following the death of Emmett S. Smith, of Meola, Tex., the business has been closed

**LETTERS TO THE EDITOR.**

**A Defence of the Souvenir Program.**

SHARPSBURG, Pa., Sept. 2, 1908.

Editor THE JEWELERS' CIRCULAR—WEEKLY:

GENTLEMEN—Your unvarying generosity in permitting the use of space in the interest of retail jewelers' associations encourages me to presume that you will permit the presentation of an argument on the "souvenir program" question as seen by an association member.

It has been suggested by some trade organs that the practice of issuing these convention books is pernicious or hurtful, since it is alleged to be akin to a "holdup" or a begging attitude on the part of the association, and that in case of differences we cannot, with good grace, argue with a patronizing manufacturer or jobber as to the error of his business methods. I feel certain that I am right when I say that in issuing the programs and in offering advertising space for sale the associations honestly believe that their books have an advertising value, and I feel equally certain that some of the advertisers therein also believe in the advertising value of these convention books, and of the association back of them.

In support of this statement I can refer to the souvenir program of the Pennsylvania association for 1907 and 1908. A comparison of the two books will show that some of the advertisers used double as much space in 1908 as they did in 1907. Moreover, at least one of the advertisers obtained permission from the executive committee to order a considerable number of extra copies of the book of 1908 from the printer for his own use to send outside the State where our mailing list would not reach. None of our circulars asked nor did we make with any advertiser special effort to secure patronage for increased space, nor did we suggest the extra copies to any advertiser. This indicates that advertisers do not all look upon the convention book as a hold-up nor as beggary.

It is also said that when a manufacturer or jobber uses undesirable methods for marketing goods we dare not, and cannot with good grace, call him to account if he has been a patron of our advertising pages. This might be true if the associations generally regarded manufacturers and jobbers as natural enemies of the retailer who must be conquered and brought to submission, but the truth is that such is not the case. The retailer and his associations look upon manufacturers and jobbers in the business, as co-workers, who should be, and usually are, our friends.

But even the best friends may at times see matters in a different light than we because the pressure of circumstances touches them a little differently than it does us. If we may not reason with them and let them know our wishes, and in case of our disappointment our necessarily different course, then associations and programs and even the general trade press are all of no value to the retailer with reference to correcting undesirable marketing methods. These associations need not, in good service cannot, and except in case of misguided enthusiasm and judgment, do not conduct any boycott campaigns. It is true we regard the patron of advertising space as a friend, but a more

pronounced friend is he who adjusts his marketing methods in such manner that the retail jeweler (whose recommendation after all sells watches and staple jewelry and silverware, whether they go over the retailer's counter or are sold by the retail jobber, department store or mail-order house) may be sustained as a useful and important factor in the jewelry business. This is no less important to the manufacturer and jobber as a class than to the consumer who relies so much on the retailer's knowledge and judgment that it is always necessary for any other vender of these goods to assure the buyer that they are "as good" or "better" than they could get from a retail jeweler at the same price, thus acknowledging the retailer as an authority on the quality and

TABLE CENTER IN ELKINGTON EXHIBIT.

merit of all goods in our line. Why should we not cultivate the patronage of our friends, the manufacturers and jobbers? Why should we not reason with them when they do things which we consider hurtful to our interests? Why should we not divert our patronage in favor of those friends who try to do us a good turn in business?

If the souvenir program is useless as an advertising medium, it will probably cease to be used as such and in time the advertisements will be eliminated, but there is no reason why in that event the associations will look upon manufacturers and jobbers as enemies. The convention book will no doubt continue to serve its primary purpose as an educator and as a rallying medium for association work.

Hoping this communication may not prove too long to be accorded space and promising not to offend with such lengthy argument again, I remain,

Sincerely yours,  
A. C. GRAUL.

C. E. Terrell has moved from Haskell to Ranger, Tex.

### Another Canadian "Diamond Company" Discussed by a Montreal Newspaper.

UNDER the head of "A Confidence Game," the Montreal, Can., Daily Press says editorially in its issue of Aug.

An esteemed correspondent sends the press a prospectus of what is called the Quebec Mineral Exploration Co. Its head office is said to be in the Nordheimer building—Montreal. Where its other and minor offices may be is not stated. According to the Montreal directory, its vice-president is associated with an engraving firm, and lives at Cartier St., while its president, who is described in the prospectus also as of Montreal, has not his name and address in the Montreal directory. Neither the president nor vice-president or secretary-treasurer have their names in the telephone book. The prospectus starts with the statement, "It would appear, upon the imagination of a newspaper reporter, that one A. Mackenzie, a young American, has discovered a diamond field richer than Kimberley from which he brought 1,000 stones on the Nottaway River, between lakes Magallowan and Shabogama, 400 miles above Toronto, in the northwest corner of the Province of Quebec. To show that there is such a place, the prospectus is furnished with a map, on which are marked the localities and areas and a 'Diamondville.' The company claims that it has acquired mineral rights over a large area in this region, and we have no reason to believe that this claim is not true.

The prospectus relates a more or less grand and fascinating account of the history of the diamond, and of diamond value, and proclaims what a rush there will be soon to Mackenzie's find on the Nottaway River, where the 'diamond fields are vast extent and "pockets of stones" of the greatest water, of great richness and magnitude, are found scattered over a blue clay tract for a distance of 20 miles.' Because of this, the prospectus prophesies that we are going to witness one of the maddest experiments in the whole history of North America—a stampede of humanity in thousands, all setting their faces toward northward Quebec, heading for diamond fields, in quest of fabulous fortunes, struggling, fighting, bribing, beseeching, in the effort to reach the goal an hour in advance of the others. In the crush will be found people from all ends of the earth, of all conditions and nationalities, from the penniless immigrant to the millionaire, all catching contention to reach the goal of wealth. And nothing more to the same effect. But perhaps the crowning passage of the glowing word picture is: 'Soon, very soon, there will scarcely be a through train moving on the continent or a vessel sailing for America that will carry its passengers ticketed for Le Shabogama, all imbued with the most unbridled—diamonds, gold, silver, copper, which may be found lying hardly hidden, peeping from the surface of bountiful another earth. We have seen land formations, we have seen mining booms, but the Quebec Diamond Boom promises to eclipse all that has gone before.

"It may be said in passing that the canard of Mackenzie's find was published in the New York *American* as long ago as May 7, and we have yet to hear of anybody getting excited about it, except these three gentlemen of the circular, a testimony to the high estimate placed on the *American's* yarns. And it stands to common sense that if Mr. Mackenzie had made any such find, after enduring all sorts of hardships, he would have kept it to himself so far as possible, and not have published the facts broadcast to the world on the first opportunity. If there were any substantial truth in the story the rush would have set in months ago. Moreover, if there were diamonds in the locality to anything like the extent prophesied by the circular, they would soon become a drug in the market, and would be worth little more than common stones. As it is, the De Beers Co. has to restrict its sales to half of its possible production or less, and even then finds it almost impossible to keep up prices. But the gentlemen of the circular are not bothered about that. They tell us they have 'acquired mineral rights' in the neighborhood, and they want you and me to finance their scheme or 'proposition.' In red ink they invite, 'A \$10 flip, are you game?' They are frank with you, they are cynical, they try to 'jolly you along.' 'If even the total loss of a \$10 bill might cause you sleepless nights, then for goodness sake let us get along without you.' But if you do go in, if you do 'gamble,' you must ask no questions, you must be a good fellow, you must even be a good loser, if necessary—for, alas, you may lose—as is indicated in the midst of all the circular's glitter—"If we ever throw up the sponge," it says, 'we will inform you.'

"But the principal ingredient of those who go into 'our proposition' must be 'confidence.' 'If you enter this corporation, do so having full confidence in us,' says the circular, 'otherwise, Please Stay Out.' You were told before that you were invited to enter a game, now you learn what sort of a game it is—a confidence game. Are you ready now to send \$10 or what not to the bookkeeper and his two friends, the president and the secretary-treasurer, one of whose names is not even in the directory, where the names of all householders appear from cottager to palace lord? Is there any truth at all, it may be asked, in this talk of diamond finding; any sordid foundation whatever upon which our circular gentlemen have raised their tremendous dazzling story? There is this: Experts of the Ontario Bureau of Mines have reported that we have geological formations similar to those in which diamonds have been found in other countries; and it is also said that some precious stones have been found south of the boundary line in debris that was carried there from Canada by glacial action eons or ages ago. There may be plenty of diamonds in Canada, but the above seems to be the only evidence of it, except the report of the finding of an occasional stone, every year or so, on more or less credible evidence."

A half-tone illustration accompanied by a graphic description of the store of Henry J. Harm, Albert Lea, Minn., appeared in a recent issue of a local daily.

### New Officers Elected by Arkansas Retail Jewelers Association at Annual Meeting Held at Hot Springs.

HOT SPRINGS, Ark., Sept. 2.—The meeting of the Arkansas Retail Jewelers' Association, which was held in this city Aug. 25 and 26, was a success as a convention, and proved distinctly profitable and interesting to the many merchants that attended. The speeches and addresses were most instructive and the exhibits were all that could be desired.

At this, the first annual meeting, the organization started off with a membership of 58, and among those who attended in person were: J. W. Bader, Blytheville; C. H. Carmichael, Booneville; John E. Green, El Dorado; J. W. Johnson, Hope; J. J. Livingston, Conway; Ed. Nix, Waldoron; Mrs. E. W. Norvell, Stuttgart; C. H. Robinett, Conway; E. A. Short, Prescott; S. D. Spratt, Monticello; F. E. Towell, Hot Springs, while others were added to the roll while the proceedings continued.

President Short presided over the convention until the election of his successor, President John L. Green, El Dorado. The other officers elected were: S. D. Spratt, Monticello, first vice-president; F. E. Towell, Hot Springs, second vice-president; J. W. Johnson, Hope, secretary and treasurer. It was decided to hold the next meeting at Little Rock, this to take place June 15 and 16, 1909, and, at the suggestion of the president, an effort will be made to double the membership by that time.

Among the principal exhibits at the convention were those by S. O. Bigney & Co., C. B. Norton Jewelry Co., South Bend Watch Co., Leonard Krower, at the Bauman Massa Jewelry Co.

### Missing Dayton, O., Jeweler, Found at Petoskey, Mich., Where He Was Held as Insane.

DAYTON, O., Sept. 2.—The mystery surrounding the recent disappearance of Charles Gray, a W. 3d St. jeweler and repairer, was cleared up, last week, when his family received a telegram to the effect that he was held in jail at Petoskey, Mich., on suspicion of being insane. The message was turned over to Sheriff Boes.

A consultation between Sheriff Boes and Probate Judge Dale developed that Gray could not be extradited from Michigan by the local authorities; that only the Petoskey officers or the man's immediate relatives were empowered to return him to Dayton.

Prior to his leaving the city Gray's mental condition was such as to arouse criticism. Complaint was made that several persons who went to the store of Gray were driven away by him without explanation.

### Paul Girard, East Grand Forks, Minn., Goes Into Involuntary Bankruptcy.

EAST GRAND FORKS, Minn., Sept. 2.—Paul Girard, a retailer of this place, filed, Aug. 26, a voluntary petition in bankruptcy in the United States court. His schedule places his assets at \$3,935, of which \$380 are claimed to be exempt. He admits liabilities to the amount of \$10,135.

Jonas Koch, New York, recently foreclosed a chattel mortgage on the stock. The creditors include most of the prominent jobbers of the Twin Cities.

**Providence Jewelry Concerns Among the Heaviest Taxpayers of That City.**

PROVIDENCE, R. I., Sept. 3.—The Board of Tax Assessors has completed its work in making up the list of taxable property in this city and made its announcement public to-day. It shows an increase of nearly \$1,000,000 over the previous year, notwithstanding the period of business depression which swept over this section, in common with other parts of the country. Among the large number of firms, corporations and individuals, that are taxed on property of \$50,000 valuation or more are the following identified with the manufacturing jewelry industry or its kindred trades, the Gorham Co. heading the list with taxable property of \$1,406,620; Austin estate, \$105,560; B. A. Ball & Co., \$75,000; Belcher & Loomis, \$86,000; Charles W. Bowen, \$112,720; Charles Briggs, \$73,760; George Briggs, \$72,860;

Waite, \$221,240; A. T. Wall Co., \$58,780; Dutce Wilcox, \$335,620.

This is a total of \$10,121,460. Thus the 51 concerns identified with the jewelry industry of Providence, that are each taxed on \$50,000 or more, own directly one-twenty-third of the entire taxable property of the city, the total valuation of which is given by the Assessors as \$230,683,700.

**Buffalo Police Extradite Man Charged With Daring Diamond Robbery Committed in February, 1906.**

BUFFALO, N. Y., Sept. 2.—The arrest of Eugene Lobe, who was recently brought to this city from Memphis, Tenn., to answer to the charge of stealing diamonds valued at \$2,500, again recalls the daring robbery committed at the jewelry store of Paul Foerster, 131 Seneca St., in February, 1906. At the time of the robbery Lobe and two

companions of Harrington and to have instigated the robbery. The third man, Reagan, who was arrested in New Orleans, was not brought to trial.

**Details of the Robbery of the Store of Wm. S. Mills, Fillmore, N. Y.**

The Jewelers Security Alliance, of New York, has received details of the robbery of the jewelry and general store of William S. Mills, Fillmore, N. Y., in which is located the local post-office. The robbery occurred about 3 A. M. Saturday morning, Aug. 29. The safe was blown open and jewelry amounting to about \$1,500, consisting mainly of watches and rings, together with about \$300 in money and \$200 in stamps taken. As yet the burglars have not been apprehended, but every effort is being made to find the loot and apprehend the perpetrators of the crime.

The work was evidently that of professional crooks, and although the store is centrally located, not enough disturbance was made to attract the attention of nearby dwellers. The Jewelers Security Alliance was notified by Mr. Mills and Assistant Secretary Edward T. Garvin, who has been in charge of the office during the absence of Secretary Noyes, at once telegraphed the jeweler instructions and took immediate steps toward the apprehending of the criminal or criminals.

Entrance was gained to the store by prying open the front door with a chisel. The establishment is located on the second floor of the building, and is reached by a stairway leading from the lower store. A Mosler safe is located in the front of the store, the left hand door of which was completely blown off its hinges, and the right hand door, while remaining attached to the safe, was shattered on the inside, and a part of the cement filling was broke away. Two chisels, a number of horse blankets and robes, and a couple of bags marked "Voorhees" were found on the floor near the safe. Nothing in the immediate vicinity of the safe was disturbed. The blankets found in the store were claimed by two farmers who lived about a mile and a half north of the village. A sledge hammer and a chisel, which were also found near the wreckage, were claimed by a local blacksmith and carpenter.

Although no positive proof as to who the burglars are has as yet been deduced, detectives are at work on the case, and are following up several clues which, it is hoped, will eventually result in the capture of the culprits.

All chiefs of police within radius of 150 miles were at once advised of the burglary, and asked to keep a sharp lookout for any suspicious characters. Railroad detectives were informed and every means of locating the robbers is being taken. Livery establishments within a radius of 30 miles report no teams were rented to strangers on that date, and that none of their rigs were out at 3 o'clock on the morning of the burglary.

A wire screen on the top of the safe, to which was attached a Jewelers Security Alliance certificate, was broken off and placed on the floor. An offer of \$100 reward has been offered for the capture of the criminals.

EUGENE LOBEE, UNDER ARREST AT BUFFALO, N. Y.

In M. Buffinton, \$55,140; Callender & Anslan & Troup Co., \$645,620; Walter Clender, \$383,240; George B. Champlin, \$600; Waity Champlin, \$84,660; Joseph Cory, \$182,400; Josiah W. Crooker, et al., \$137,980; William H. Draper, \$115,340; First Street Land Co., \$112,180; Michael Fitzgerald, \$105,760; Theodore W. Foster & Bro. Co., \$112,180; James A. Foster, \$7,860; James A. Foster Co., \$81,400; B. I. Gladding Dry Goods Co., \$50,000; William C. Greene, \$51,140; William H. Herrick, trustee, and Helen M. Usbeck, \$107,000; Henry A. Hidden estate, \$390,680; Edwin Lowe estate, \$60,000; William Loeb, \$480; Manufacturers' Building Co., \$344,000; John Nelson, \$77,860; Samuel M. Nicholson, \$75,000; Nicholson File Co., \$7,340; Englehart C. Ostby, \$103,440; Coby & Barton Co., \$324,320; John S. Pomeroy, \$265,240; Pearce-Mauran Land Co., \$1,820; Dexter B. Potter, executor of Edgar L. Logee, \$50,000; Josephine E. Potter, executrix of Isaac M. Potter, \$125,000; Grace Remington, \$136,900; J. Samuels & Co., inc., \$93,100; Joseph and Leon Samuels, \$132,000; John Shepard, Jr., \$151,300; Shepard Land Co., \$223,080; John Shepard & Co., Real Estate Co., \$712,000; Stevens & Co., inc., \$75,000; Tilden-Thurber Co., \$51,000; Union Wire & Supply Co., \$75,520; Waite, Thresher Co., \$50,000; William H.

others were traced to New Orleans and Memphis, but before he could be extradited from the latter city Lobe was released on a writ of habeas corpus. A companion was brought to this city and sentenced to the Elmira Reformatory.

The robbery for which Lobe will be tried was one of the most daring and sensational ever perpetrated in this city, and occurred about 7 o'clock one Saturday evening. A young man entered the Foerster store and asked to see some diamonds. Mr. Foerster was in the front part of the store, and the stranger was waited upon by the jeweler's wife, who showed him a tray containing jewelry with fairly large stones. As these were too high in price she reached to get a tray of cheaper jewelry, and the man grabbed the one he was looking at and rushed through the door.

About a month later a part of the stolen jewelry was mysteriously turned over to New Orleans detectives, where Lobe and two other men, Walter Harris and John Reagan, had been arrested. This was believed to have been done by pawnbrokers who had been suspected as acting as a fence for the thieves.

Harris, alias Harrington, was brought to Buffalo, where he was identified as the thief and sent to Elmira. Lobe, however, is believed by the local police to have been the

**Police of Hot Springs, Ark., Hold Man and Woman Believed to be Connected With Jewelry Robberies.**

Hot Springs, Ark., Sept. 2.—The police of this city have in their custody a man and woman whom they believe to have been guilty of several jewelry thefts, though no positive evidence to this effect has been forthcoming up to the present time. In the belief that the people are professional crooks, a charge has been lodged against them. They will be held on this while the department communicates with other cities to see if they are wanted. A large amount of jewelry and valuable watches found upon prisoners is held awaiting identification. The arrest of the pair was brought about by the woman, who pawned a locket at a pawnshop and offered to sell the ticket for one dollar. This aroused suspicion, and the police, after watching them for some time, arrested them Sunday night. A search of the woman revealed jewelry which has been roughly estimated at about \$1,500, consisting of diamond studs, diamond rings, diamond set watches and watch cases, locket-bracelets, together with three unset diamonds about half a carat each. Most of the property was sewed up in chamois skin and carefully hidden in the woman's clothes. In addition, a search of her home revealed several pairs of shoes and a quantity of silk as well as some silk hose, which it was believed were stolen in this city. A charge to this effect has been made to hold the man and the woman.

In her home were also found a large number of souvenirs and some jewelry of the best character that had been either purchased or stolen in this city.

**Death of Henry B. Winslow.**

PROVIDENCE, Sept. 4.—In the death of Henry Bowers Winslow, which occurred at the home of his nephew, Herbert M. Briggs, 108 Hospital St., this city, on Tuesday evening, the city loses another of its old-time manufacturing jewelers. Death was due to disease incidental to his advanced age. He was in his 85th year.

Mr. Winslow was the son of Henry Bowers Winslow, one of the famous commanders of ships when this city was a port of entry from the Indies. After attending the public schools, Mr. Winslow learned the jeweler's trade, and afterwards engaged in the manufacturing business for himself. A brother, Nathaniel Winslow, who died 15 years ago, was also a manufacturing jeweler here for several years.

About 10 years ago, Mr. Winslow retired from active business life as a result of a severe paralytic stroke, which affected his right side so that he was crippled from that side until his death. He was in fair health otherwise, until within a few weeks, when the disease began to tell on him. The decline was gradual until death ensued.

J. Smith, who was recently taken into custody in Cheyenne, Wyo., after having been shot by a sheriff, had in his possession a large amount of jewelry and diamonds. Smith was discovered in the act of being about to enter a house in Cheyenne when apprised by the sheriff.

**Safe Blowers Captured at Newark, N. J., Plead Guilty to Five Charges.**

NEWARK, Sept. 3.—George E. Williams, alias "Humpty," the notorious burglar, and his two companions, Martin Tiffany and Richard Vaughn, each pleaded guilty before Judge Davis in the Court of Special Sessions to-day to five charges against them. They were remanded to jail for sentence next Friday.

None of the three men said a word when arraigned, entering their pleas through their attorney, Frank A. Boettner.

It was expected that Williams and his "pals" would be sentenced this afternoon, but Mr. Boettner asked for a postponement. Second Assistant Prosecutor Lehlbach made

George T. Baker & Co., Bemidji, Minn., have secured the services of O. N. Stensrup, Minneapolis, as watchmaker and jeweler.

The C. E. Frederick Co., Waterloo, Ia., has just been incorporated. C. E. Frederick, H. L. Chase and M. O. Frederick constitute the first Board of Directors. The authorized capital stock is \$10,000. The firm will manufacture and sell watches and jewelry at wholesale and retail.

no objection, and the court then fixed next Friday as the day for sentence.

Since the arrest of the trio, Williams, who is 44 years old, and by his own declarations has been a member of the underworld, and gained his living by crooked means ever since he was 20, has been revealed as an all-around burglar and safe breaker of exceptional ability. Williams, with his companions, were arrested after he had entered the building at West Park and Broad Sts. Williams declared that the object of the visit to this place was to map out a plan for robbing the safe of J. Wiss & Sons, at 683 Broad St., as an extension of the Wiss store runs back under the building which was entered at the time.

There is a movement on foot among the jewelers and opticians of St. Cloud, Minn., to form a local organization.

THE NEWS FROM ENGLAND

Trade Still Depressed Though Franco-British Exhibition Helps London Merchants—Importance of Proper Use of "Gold-Filled"—Associations Discuss Methods to Stop Thefts of Bullion—London Clocks Not Synchronized—Gem Market Shows Decided Improvement.

LONDON, Sept. 1.—The dull clouds of depression still hang heavily over the jewelry and allied trades. The silver lining which our eyes have got strained in looking for has given but a furtive sight and then disappeared. To some trade appears rather better, they are the fortunate few; the bulk manufacturers and wholesalers still resolutely lament the bad conditions. How to get out for them every one seems at a dead end.

In London trade has been somewhat better, but the shopkeepers have to thank the Franco-British Exhibition for it. Certainly as yet the manufacturers or wholesalers have not even had a look in. That exhibition is bringing money to London. In England there is little doubt, but it has yet had time to go round.

Lanashire trade is very bad, and the iron industry is far from prosperous. The same must still be said of the north of England and Scotland. The financial outlook is also very unpromising, while the Board of Trade returns are still declining. The latest reports give a decrease in exports of £7,000,000 and a fall in imports of £5,000,000. In the exports of jewelry and silverware we find we have a decrease of £16,000 when we compare the figures of July with those of the same month of 1907. In Birmingham every one is grumbling. I have returned from a visit there, have called on quite a number of leading men in all branches of the trade and not a single one reported trade as good. I saw, however, that some at least had considerable faith in the future, for large additions were being made to some of the premises. Others were building fine new and handsome factories, while a few are casting about for larger premises. In Sheffield much the same condition obtains, but the manufacturers do not exhibit such an optimistic spirit.

\* \* \*

The question of "Filled Gold," to which I referred in my last notes, and which the editor dealt with in an editorial, is one which American manufacturers should seriously consider. There is considerable quantity of "rolled gold" and "gold filled" articles sold in Great Britain; in fact, so far as cheap jewelry is concerned it has practically killed the silver jewelry business. While the watch case in "gold filled" is very common, but there is a feeling of uncertainty in the air. Both the trade and the public are getting very cautious, and in the light of recent events it behooves the former to understand exactly where they are when dealing in goods of the "rolled gold" or "gold filled" order. Now, there are American watches in "gold filled" cases on the British market which are a credit to makers and give lasting satisfaction to wearers, but there are others, and unfortunately the wretched cases which lose their semblance of gold in a month or two and very materially injure the reputation of the genuine articles. It does seem to me a great pity that America cannot en-

force some specific standard for her "gold filled" products so that she may maintain her reputation. I have personally seen a good movement produced by well-known American makers in a case fitted only for sale in a 5s. bazaar. I state this much because I think it should be known on your side that for all the Merchandise Marks Act enables those who care to take up a prosecution to do so may simply, but very effectively, talk and that goes a long way without those who are being injured finding it out until the mischief is almost past remedying. The moral for American watch manufacturers, who wish to keep an unsullied reputation, is to either ease all their own movements or else entrust them only to those on whom they can place absolute reliance.

\* \* \*

The question of stolen bullion is being taken up with great vigor by Sheffield manufacturers. It is a question which demands considerable patience as well as discussion. The trouble is how to catch the thief or illicit dealer. It is simple enough to make propositions, but difficult enough in actual practice to carry them out without injury to the bona fide jeweler or dealer. The question is a grievous one in the manufacturing districts as well as in big towns where burglars try to get rid of their ill-gotten gains through the jeweler, pawnbroker or refiner. The matter, anyway, is being discussed by a very representative body composed of members of our various wholesale and retail trade associations, and out of a multitude of counselors we may get much wisdom.

\* \* \*

American readers may be surprised to learn that despite the great possibilities existing in London for the synchronization of public clocks the three clocks outside the British General Post Office are as yet unsynchronized. But they are in good company, for not one of the clocks in the 30 churches in the city of London are synchronized.

\* \* \*

The Education Committee of the London County Council have voted £80 to establish afternoon design classes in jewelry and silversmithing at the Central School of Arts and Crafts. The class will be held two afternoons each week and the new Trade Art Council, established a few months ago, which was responsible for the suggestion, will now have the task of getting employers to let their apprentices and learners off for three hours in order that they may attend. The new Central School of Arts and Crafts opens Sept. 21, and will provide sufficient room each evening for 200 students in the jewelry, silversmithing and allied trades. The school has cost £75,000 for the site and an equal amount for its construction. It is centrally situated for the trades and great things are expected of it, but with a cheese-

paring policy in the matter of equipment and the remuneration of instructors there may be disappointments.

\* \* \*

There is a decided improvement in the London gem market, and generally there is a feeling that the unrest is dying away. Certainly the number of buyers who have visited the "diamond district" has been abnormal, moreover the press is veering round, and those who were leading in the outcry some few months ago are now "going back upon themselves" by the fulsome manner in which they talk of the improved diamond trade. ST. GEORGE.

Death of George M. Reed.

PITTSBURG, Pa., Sept. 2.—Funeral services over the remains of George M. Reed, for many years a prominent jeweler of this city, were held at his late residence, 1806 Bedford Ave., at 2.30 o'clock, yesterday afternoon. Mr. Reed died at 11 o'clock Saturday night at his home. Deceased was a native of Washington, Pa., and in his youth came to Pittsburg, and embarked in business with his brother, the late James B. Reed, in 1849. At the close of the Civil War Mr. Reed and his brother entered the jewelry business, forming the firm of J. B. Reed & Co., which for years has been one of the leading jewelry houses in this city.

Mr. Reed was closely identified with the progress of the United Presbyterian Church, not only in Pittsburg, but in the United States. He was one of the early members of the Third United Presbyterian congregation, but when the church was removed to the East End he became a member of the Shadyside United Presbyterian Church. He was treasurer of the home missions of the United Presbyterian Church of North America for over 30 years, and, although suffering from total blindness for many years, performed the duties of that office up to within about a year of his death. Mr. Reed was also trustee of the McElroy Bible Fund since February 5, 1876.

Deceased is survived by a brother, A. R. Reed; a son, D. T. Reed, engaged in the optical business in this city; a daughter, Miss Carrie Reed, at home, and J. Allison Reed, who was associated with his father in business; also by two grandchildren, Miss Mary S. Reed and Miss Katherine Reed.

Creditors File Involuntary Bankruptcy Petition Against Sam W. Rose, St. Joseph, Mo.

ST. JOSEPH, Mo., Sept. 2.—The creditors who filed the involuntary petition recently against Sam W. Rose in the United States District Court here are M. Wolfe, Nathan Wolfe and Kaufman & Strauss, New York, who allege that Rose is insolvent, has committed acts of bankruptcy in preferring creditors and also set up his recent assignment, saying that at the time he removed property amounting to about \$4,000.

Mr. Rose started in business for himself about November, 1907, and had formerly been employed by the Union Mercantile Co., of this city. Some time ago he gave a deed of trust scheduling his assets at \$7,000 and his liabilities in excess of \$8,000.

- Queen & Co., Philadelphia, \$276

**Sidney Hart, Waterbury, Conn., Files Voluntary Petition in Bankruptcy**

WATERBURY, Conn., Sept. 2.—A petition in bankruptcy has been filed by Sidney Hart, of this place, and the matter has been referred to Henry W. Newton, referee in bankruptcy. According to the schedule Mr. Hart's liabilities are \$8,318 and the assets \$4,056. Of the accounted assets \$2 consists of stock in trade. The largest individual creditor is I. Warshawer, of 1 ton, whose claim amounts to \$1,400.

Mr. Hart began business here in 1908 carrying a general line of merchandise having succeeded Jacob Harris. Early in 1908 the establishment was burned out, a loss of \$8,000, which was partially covered by insurance, amounting to \$2,100. The latter amount was attached by several creditors. At a creditors' meeting, held afterwards, a settlement of 30 per cent of endorsed notes was accepted.

E. B. Roser, a prominent retail jeweler in Wellington, Kan., is also president of National Bank of Commerce, of that city, and has the unique privilege of paying his bills with bank notes signed by him.

### Proposal to Run F. W. Sackett's Business Under Creditors' Trustee Until Seventy-five Per Cent. Is Paid.

Following the recent meeting of the creditors of Franklin W. Sackett, a wholesale jeweler, 59 Maiden Lane, New York, which was held at the offices of Walter Kohn, the debtor's attorney, 309 Broadway, another meeting was held last Thursday afternoon at the same offices. At the second meeting, Mr. Kohn, acting for Mr. Sackett, made two propositions to the creditors, the first of which, an offer of 45 per cent., of which 25 per cent. was to be in endorsed notes, was refused, and the second, a proposal for a trusteeship until 75 per cent. was paid, was favorably considered.

The second proposition was to turn over the business to three trustees, to be appointed by the creditors' committee, they to conduct the business until Feb. 1, 1910, and if possible to get 75 per cent. out of it. If this proved impossible, the business was to be closed at the end of the time limit. This proposition also stipulated that any amount of money above the 75 per cent. obtained from the business by the end of the time period, is to be turned back to Mr. Sackett. His proposition was accepted by the creditors, who were present in person.

The acceptance of the trusteeship plan will bring about the withdrawal of the bankruptcy proceedings, which were started by the filing of an involuntary petition in bankruptcy.

The liabilities shown by the figures presented are placed at \$52,686, of which amount the claim of merchandise creditors amount to \$50,725. The assets amount to originally about \$54,500, including stock valued at \$36,409. The committee appointed to investigate the financial condition of the debtor met Monday of last week and reported at the creditors' meeting on Thursday that the figures of assets and liabilities are substantially all right, as given at the first meeting. The trusteeship plan embodies the stipulation that Messrs. Sackett, Cox and Curren are to be employed by the trustees to conduct the business, and are to receive a stated salary.

Mr. Krower, of Albert Lorsch & Co., chairman of the creditors' committee, said at the trusteeship was accepted by most of the creditors at the meeting, and explained that if the 75 per cent. be paid by Feb. 1, 1910, the business is to be turned back to Mr. Sackett, and if not, it will be sold out when the time expires.

Mr. Sackett, in speaking to a CIRCULAR-WEEKLY reporter about his business trouble, said: "We are doing everything we can to straighten the matter out as evidenced by a trustee agreement."

The meeting was adjourned, subject to a call of the chair.

In speaking of the account in THE CIRCULAR-WEEKLY last week, Everett L. Spencer, of the E. L. Spencer Co., one of the members of the creditors' committee, stated that the story was incorrect in so far as it spoke of the creditors of Providence, making the suggestion to Mr. Sackett that he pay 50 cents. This, said Mr. Spencer, was Mr. Sackett's own offer of settlement, and was not the offer of the Providence Board

of Trade made to him. In fact, such a proceeding would be very foolish, he said, as the Manufacturing Jewelers' Board of Trade of Providence is noted for its habit of insisting on a good settlement for creditors.

### Adolph Nordmann, San Francisco, Cal., Files Voluntary Petition in Bankruptcy.

SAN FRANCISCO, Cal., Sept. 2.—Adolph Nordmann, proprietor of the Standard Optical Co., of this city, has filed a petition in voluntary bankruptcy, showing liabilities of \$11,863.11 and assets of \$7,400. A meeting of the creditors for the election of trustees was held on Monday. The financial condition of the Standard Optical Co. has been a matter of concern to creditors for some time and, a short time ago, an offer of settlement was made, at 40 cents on the dollar in four notes at 10 per cent. each, endorsed by Leon Nordmann, of Nordmann Bros. This offer was not carried out by Mr. Nordmann, and subsequently Nordmann offered 40 per cent. in cash, and this offer also was not carried out. The petition in bankruptcy was then filed.

Adolph Nordmann had been engaged in business in this city for a number of years. He originally managed a branch store conducted by Nordmann Bros., in Portland, Ore., and in 1904, with Jos. Nordmann, bought out the optical department of Nordmann Bros., and started in business as the Standard Optical Co. This business was later incorporated under the firm style, with a capital stock of \$50,000. In January the business was combined with that of the Cahn Optical Co., and that business was continued under the firm style of the Standard Optical Co. Mr. Nordmann afterward sold his stock in that concern to Mr. Cahn, and the latter removed to Los Angeles. Mr. Nordmann resumed business alone about Oct. 15, 1905, locating at 808 Van Ness Ave. He later removed to 1726 Fillmore St.

### Frank Gerstein, Cleveland, O., Goes Into Voluntary Bankruptcy.

CLEVELAND, O., Sept. 3.—A voluntary petition in bankruptcy has been filed in the United States Court by Frank Gerstein, 2215 Ontario St., who does a retail jewelry and pawnbroking business at that address. According to the schedules the liabilities are about \$7,287 and the assets, consisting of stock and ready money, amount to \$2,200.

Mr. Gerstein succeeded Mrs. R. Grepp in January, 1904, and has carried a stock of about \$3,000 to \$4,000. His local creditors are for very small amounts and the others are in New York and Chicago.

Jacob Dechelman, a jeweler of 704 Forest Ave., Baltimore, Md., was arraigned about a week ago before Justice Llewellyn, of the Northeastern Police Station in that city, charged with the larceny of a watch. He was held for the action of the Grand Jury. A woman alleged that she brought a watch to the jeweler for repairs, and after repeated calls was given another watch which was much less valuable than the original.

### Jewelers' Displays at the Canadian National Exhibition Less Conspicuous Than During Former Years.

TORONTO, Ont., Sept. 2.—The Canadian National Exhibition, which is held every year in Toronto, lasting two weeks, was formally opened, yesterday, by Sir Louis Jetté, Lieutenant-Governor of Quebec province. President W. K. George, of the exhibition association (who is president of the Standard Silver Co.), delivered an address of welcome. The attendance, so far, has been large, and the general display fully equal or superior to that of previous years, though the jewelry and allied trades are not so much in evidence as formerly.

Ambrose Kent & Sons, Ltd., Toronto, make a fine display of jewelry, souvenirs and art goods, including a large collection of solitaire diamond rings of from 1¾ up to 4½ carats, and varying in value from \$500 to \$1,500. A handsome diamond necklace of scroll design, valued at \$800, is shown. An assortment of 14-karat pearl jewelry of the firm's own manufacture is a conspicuous feature. The display of art goods includes some attractive hand-painted globes of Turkish designs for electric lights. There is a very full line of Canadian enameled souvenirs, showing various heraldic and symbolical devices and an exhibit of Masonic regalia.

The New York Standard Watch Co. and the E. Howard Watch Co., Boston, both of which are represented in Toronto by R. J. Dale, show a variety of gold and silver watches very neatly and tastefully arranged.

The Gundy-Clapperton Co., Toronto, makes a good display of cut glass, including the largest glass vase ever cut in Canada, which stands about four feet high. This firm is also represented in the Process building, where a number of men are at work showing the different stages of glass cutting in operation.

Gowans, Kent & Co., Toronto, are represented by an exhibit of cut glass, showing some new designs in handles of fruit dishes and baskets. Noticeable features of their display are a cup-shaped punch bowl of diamond pattern about 40 inches in diameter by 18 inches in height and a large swan-shaped jug of very elaborate workmanship.

The showing of mineral exhibits by the Ontario government is by far the largest and most comprehensive ever made in this province, a specially attractive feature being the product of the leading Cobalt silver mines, including numerous large nuggets of native silver and specimens of ore, and also the finished output of the smelters at Deloro, and Thorold, Ont. The latter plant, owned by the Conigas Reduction Co., has succeeded in utilizing the by-products of the refractory Cobalt ores, producing pure commercial cobalt oxide and white arsenic, samples of which are shown.

The most noteworthy feature of the display is a huge nugget of native silver from the Crown Reserve Mine, Cobalt, weighing some 1,600 pounds, the estimated value of its metallic contents being about \$5,000. Some rich gold ore was also shown the principal exhibit of this character being 60 ounces of gold nuggets of almost pure metal from the Laurentian Mine, Manitou Lake District, Ont.

**Death of John U. Rutishauser**

CHICAGO, Sept. 7.—John U. Rutishauser, formerly of the J. U. Rutishauser Co. in the Columbus Memorial building, died at his late residence, 5252 Prairie Ave., Friday afternoon after a lingering illness. Funeral services were held last Sunday morning prior to the interment at Arden Hill.

Mr. Rutishauser was born in Arden Hill, Ill., 44 years ago, and after coming to Chicago learned the watchmaking business on West Madison St. with a jeweler named Spaulding. Later he became watchmaker for Giles Bros. & Co., and subsequently associated himself with Geo. H. Richards, doing a watch repair business there.

THE LATE JOHN U. RUTISHAUSER

name of Richards & Rutishauser. The concern also bought out the mail business of Burchard & Co., and continued until its assignment in 1895. The business was bought up about 10 years ago by John U. Rutishauser, who incorporated it under the style of the J. U. Rutishauser Co., of which he was secretary and treasurer. He remained on the business until a short time before his death.

In manner Mr. Rutishauser was reserved, but he had many friends in the trade. He is survived by a widow.

Gold bars paid depositors..... 60,000

Total .....	\$484,000
Of this the gold bars exchanged for gold coin are reported as follows:	
Aug. 31.....	\$81,000
Sept. 1.....	106,000
" 2.....	11,000
" 3.....	71,000
" 4.....	11,000
Total .....	\$424,000

C. I. Josephson, Moline, Ill., received home, recently, from a purchasing agent in the east.

V. H. Hegeman is opening a store at Northwood, Ia.  
 Charles Melcher has just opened a store at North East, Pa.  
 The Cross Co. has begun business at 597 Westminster St., Providence, R. I.  
 E. Jeaneret is now located as watchmaker at 68 High St., Westerly, R. I.  
 L. Dobbin has commenced business on his own account on Main St., Metuchen, N. J.  
 Wm. Walsh recently engaged in business as jeweler and optician in Doylestown, Pa.  
 A. H. Glaser is now manufacturing craft jewelry at 503 Republic building, Cleveland, O.  
 Isaac Goldman will shortly open a retail jewelry store at 225 S. Main St., Rockford, Ill.  
 Q. Freeman, until recently with E. H. Miller, Allentown, Pa., has opened a jewelry and optical store at 907 Hamilton St., Allentown.  
 N. Knowlton & Co. have engaged in retail jewelry business at Rapid City, S. D. Mr. Knowlton had been with C. A. Lowbridge, of the same place, for some time.  
 The Virginia & Carolina Gem Mining Co. is incorporated, about a week ago, in Shenandoah, Va., with a capital stock of \$1,000. The officers are: President, A. C. Walker; vice-president, A. C. Bickers; secretary and treasurer, J. C. Walker.  
 The York Furniture Co., which was recently incorporated at Williamsburg, Va., with a capital stock of \$5,000 to conduct a general storekeeping business, will carry a line of jewelry. O. B. Hopkins is president of the concern and W. G. Bayliss, secretary and treasurer.

**Death of Jacob C. Keith.**

WILLWOOD CITY, Pa., Sept. 5.—The friends of Jacob C. Keith, a well-known jeweler of this section, were deeply grieved, Wednesday evening, to learn that he had passed away. Though Mr. Keith had been ill for about a year, and for a while was not able to attend to his store during the Winter, he had improved so much during the past few months that he was able to resume business and was believed to be on the high road to recovery. He was at his store, as usual, Wednesday, and after going home about 6 o'clock lay down to take a rest. When his wife went to awaken him about an hour later she found that he had passed away. Death was probably due to heart failure, superinduced by stomach and liver troubles. The funeral services were held at home this morning, and the interment was at New Castle.  
 Mr. Keith was about 45 years old, and had been in the jewelry business for a number of years. He was originally at Sandy Ke, Pa., and from there he went to New

Castle, finally coming to this city about 1895. He was a practical man and a thorough jeweler, and was well regarded in the business community.

Deceased is survived by a widow and a young son. The former has been appointed administrator of the estate and will continue the business of her husband, with A. B. Norton as manager.

**Schedules of Kleinschmidt, Howland & Co., New York, Filed in the Bankruptcy Court.**

The schedules of Kleinschmidt, Howland & Co., formerly importers of precious stones at 170 Broadway, against whom bankruptcy proceedings have been pending, were filed in the United States District Court yesterday. They show the firm's liabilities to be \$252,910.81, and the assets are \$239,716.77, of which real estate amounts to \$25,500; stock in trade, \$79,531.10; machinery, tools, etc., \$950; debts due, \$6,993.36; insurance policies, \$1,000; pledged goods, \$122,742.01. The real estate was turned over to D. C. Townsend as security and an interest in a second mortgage on real estate for \$500 was turned over to Chas. A. Martin.

The principal creditors include: Eichberg & Co., \$50,491; Jas. A. Foster & Sons, London, \$14,316; Goldman, Saks & Co., \$10,000; D. C. Townsend, \$26,575; J. H. Fink & Co., \$28,463; E. L. Gordon & Son, \$19,901; L. & M. Kahn & Co., \$20,338; Rudolph & Snedeker, \$19,674; S. B. Ross & Co., \$9,933; Marchand Frères, \$6,000; P. Robinson & Co., \$3,548; J. J. Cohen, \$1,630; Irving Baum, \$1,070; R. Reinhardt, \$600; Phelps & Perry, \$208; J. C. Grogan, \$718; A. H. Smith & Co., \$3,893; Frederick W. Eberhard, \$6,550; H. A. Koelsch, \$8,463; Jacob Rothardt, \$4,000; A. W. Gerstner, \$4,000; Mrs. William Kleinschmidt, \$1,500; Nassau Bank, \$5,285; Mercantile National Bank, \$2,750; Malliet & Maxwell, \$1,381; Eisenmann Bros., \$1,204.

**Market Prices for Silver Bars.**

The following are the quotations of silver bars in London and New York, as reported by Zimmermann & Forshay:

	London.	New York selling price, .999 Basis.
Sept. 1.....	23 5-8d.	.533%
" 2.....	23 9-16d.	.53
" 3.....	23 5-8d.	.533%
" 4.....	23 11-16d.	.533%
" 5.....	23 7-8d.	.535%
" 8.....	23 15-16d.	.537%

The new store of M. E. Nabstedt & Sons Co., Davenport, Ia., was formally opened to the public about a week ago. The establishment is equipped with mahogany show cases with plate glass doors. There is also a crystal room, which is most artistically designed.

Roger L. Jordan, who was arrested Aug. 28, accused of the larceny of watches worth \$578 from the National Jewelry Co., of which concern he was the agent in Portland, Me., appeared in the Municipal Court in Portland, but at the request of his attorney the case was continued until Wednesday. It is alleged that some of the watches which were entrusted to Jordan to sell upon the instalment plan were found in pawnshops.

**Newark.**

Antonio Petti, a jeweler, of 12½ Ferry St., has reported to the Third Precinct police that an attempt was made recently to gain entrance to his store.

Charles B. Gray, partner and traveling man of Schwartz & Gray, has started over his circuit. In trade through Pennsylvania he found improving conditions.

Mr. Davies, of Davies, Mason & Co., returned yesterday from a vacation at Asbury Park. The concern had a brief temporary shut-down this Summer but has now resumed full activity.

M. T. Goldsmith, maker of Britannia ware, sterling silver goods, and metal mountings, has removed from New York to 103 Oliver St., this city. His factory is now in running order.

Henry Wartenberg, traveling salesman for the Wiley Crawford Co., 91 Oliver St., is preparing his samples to leave in a few days to visit his circuit, which includes all the chief cities along the Atlantic slope.

W. R. Landrum, western man for the Layman & Straus Co., who has reached his distant district, reports that in and about San Francisco conditions are satisfactory. S. C. Straus and P. M. Layman, of the firm, are both east. Mr. Straus will go out later.

A warrant was issued early last week for the arrest of a jeweler on "The Hill," who failed to appear before Captain Vogel and explain what was done with a gold bracelet which he bought from Harry Hornstein, of 257 Broome St., who is locked up, having admitted the theft of jewelry from the home of Adam Novich, 93 Broome St. Hornstein was arrested after the robbery, admitted his guilt and told the police the names of three jewelers to whom he had sold the plunder.

To the Eastwood, Park Co., 103 Oliver St., belongs the distinction of being the first firm this season in its immediate group of factories, if not in the city, to order extra power for night work. Beginning this week the company not only runs its full force by day, but also puts on a small extra squad in the evening. John Rutan, salesman for the Atlantic slope district for this firm, has just returned from Washington and cities in that section, and started for the north. Abraham Cohn, western man, left last week.

**Last Week's New York Arrivals.**

(15 Years with  
S. L. Van Wezel)

**CUTTER AND POLISHER OF DIAMONDS**

It will pay you to have your BROKEN STONES RECUT in my factory, because it will save you much weight, and give them the proper attention.  
**Out of town dealers write for information.**

### Attleboro.

Raymond Wells has returned in a business trip to New York.

Mark E. Rowe has returned from Weymouth, where he passed the Summer.

Frank Mossberg is the latest manufacturer to give his unqualified endorsement to the proposition to establish a Boston Trade.

Col. Sidney O. Bigney has been in demand during the past few weeks in political speeches. He has made quite a tour in different parts of the State.

Joseph Bloom has gone to Germany in the interests of the recently organized Joseph Bloom Co. He will be located in Hufsburg, County Pozin. Mr. Bloom sailed from New York, Friday afternoon.

A Stanley steamer, owned by William J. Maitien, of Plainville, caught fire at North Main St., last Wednesday. It had accumulated under the boiler and hood of an automobile, and a loud explosion took place. The fire, which followed, was put out with an extinguisher.

Local jewelry workers are beginning to take an interest in bowling. Negotiations for admission to the Jewelers' Bowling Club have been made. Those applying are: F. Simmons Co., Austin & Stone, Marsh & Co., W. E. Richards & Co., Eaton-Angell Co., Standard Button Co., Boston Chain Co., D. F. Briggs Co., and the Boston Tool Mfg. Co.

The return of the want advertisements in the daily papers is a patent sign of increasing prosperity. The past week, Fisher & Co. sought bench hands; Saart & Co., brush trimmer; Atchafalaya Chasing Co., chasers; R. F. Sumner, girl curb chain makers; S. O. Bigney, girls to solder; J. J. Sommer & Co., etc. Many other firms have, besides, been compelled to work all their old help, being unable to secure new hands.

### Cleveland.

M. Loeb, of the Dueber Watch Case Co., was a visitor here, Sept. 4.

Chas. Bickelmann, Schenectady, was in Cleveland early last week.

J. W. Armbruster, of the Illinois Watch Co., spent part of two days in the city last week.

Comrade Hibbard, all decked out in A. R. regalia, stopped off in Cleveland on his way from Akron to the annual convention at Toledo.

J. W. Dutton and W. H. Saxton of Webb C. Ball Watch Co., have returned from their vacations and started their regular Fall trips.

Mr. and Mrs. Walter G. King, of Julius King Optical Co., have closed their Summer home at Chautauqua. They arrived in Cleveland to spend a week with their relatives.

Only a few jewelers called here last week. Among them were: O. G. Carter, of London, O.; H. C. Richardson, of Spencerville; F. R. Montgomery, of St. Louis; and C. H. Bickelmann.

A. H. Glaser has sent out a circular announcing the opening of a studio in the Republic building for the production and crafts jewelry, special order work and a general manufacturing jewelry business.

## Providence.

A. E. Jeaneret, watchmaker, is now located at 68 High St. Westerly.

Paul Shocker was one of the callers in town the past week on business.

Mr. and Mrs. Theodore W. Foster were guests at Narragansett Pier the past week. James R. Stone has returned from an extended western trip for the White Stone jewelry Co.

The Cutler Jewelry Co. has been working evenings for some days, to meet orders on old shell rings.

Wade W. Williams, of Warren & Williams, of this city, was in Chicago, last week, buying a new line.

Albert S. Vennerbeck, treasurer of the Humberck & Clase Co., and his wife are registered at Nantucket.

Fred C. Lawton, superintendent of the Graham Co., and wife, are on a 10 days' vacation trip to Woodstock, Conn.

Nathan H. Miles, employed as toolmaker of the Ostby & Barton Co., has returned from a vacation trip in New Hampshire.

Charles E. Hancock, president of the Charles E. Hancock Co., has returned from his summer home at Lake Winnepesaukee, N. H.

Manufacturers of tubing and other supplies for bracelet makers are so pushed with orders that they are working nights to meet demands.

Fucker & Norton have opened a retail jewelry store at 597 Westminster St., corner of Franklin St., under the style of the Fucker Co.

Patents on cuffpins have been granted to J. A. Chapin of Warwick and A. Robinson of this city, assignors to the Waiter-trasher Co.

Fred R. Pennell, for many years a manufacturing jeweler of this city, died at his home in Attleboro early Saturday morning, aged 56 years.

W. Louis Frost's crack sloop yacht *Edric II.* won the Fall regatta of the Bristol Yacht Club Saturday in Mount Hope Bay, in fast time.

The S. & B. Lederer Co. started the day following Labor Day on a 60-hour-a-week schedule. They have been running short of men for several months.

Ground has been broken for a unique home and a half story dwelling for Mr. and Mrs. George W. Dover, at Edgewood. It is to be 44 by 50 feet on the ground.

The monthly meeting of the Manufacturing Jewelers' Board of Trade will be held at the rooms of the association in the Wilcox building, on Friday afternoon, Sept. 11, at 2:30 p. m.

One of the largest contracts for campaign goods received in this city is being filled by the E. Bennett Co. It includes a million and a half of scarf pins, and the factory is working nights to fill the demand.

Edgar R. Barker, who is Junior Vice Department Commander of Rhode Island, was one of the delegates from this State to the national encampment of the Spanish War Veterans at Boston the past week.

The handsome silver cups presented as prizes in the various events in the annual contest for the golf championship of Rhode Island played on the links of the Narragansett Country Club, Saturday,

were furnished by the Shepard Co. and John Shepard.

Among the marriage licenses granted in this city, Friday, was one to James H. Carler, a jeweler of North Attleboro, Mass., son of Patrick Carley, a jeweler, and Louise R. Martin, daughter of John E. Martin, a jeweler, of Plainville, Mass.

A more enthusiastic crowd of funmakers than the 300 members of the Boston Store Employees' Association that assembled upon the slightly ground of Mount Pleasant Park, Friday afternoon, is seldom seen enjoying an outing. It was the last of the early closing Friday afternoons of the season.

The office and stock room of the George W. Dover Co. has been removed to 36 Garnet St., on the second floor of the new Herrick building. The company closed Saturday afternoon, and taking advantage of the half holiday and of Labor Day, were ready to meet its trade on Tuesday morning in new quarters.

W. L. Blackinton and S. E. Hall, who represent the Kinney Co. on the road, have returned from a two months' trip, during which Mr. Blackinton covered the extreme west and Pacific Coast and Mr. Hall the middle west and far south. Both report conditions most satisfactory. The Kinney Co.'s factory is now working full time.

Announcement has just been made of the withdrawal of Charles Lipsey, on May 9, and of David M. Lipsey, on July 24, from the copartnership existing under the name and style of "National Jewelry Co.," at 247 Willard Ave., this city. The business is to be continued under the same name and at the same place by Emil Ross, the remaining partner of the original concern.

The partnership heretofore existing between Frederic Whitten, Inez Whitten, Bertha Whitten, George W. Nichols, Alton H. Sweet, under the firm and style of the Westerly Jewelry Mfg. & Engraving Co., at Westerly, has been dissolved by the withdrawal of George W. Nichols. The business will be continued under the same name and at the same place by the remaining partners.

Among the latest arrivals at The Inn at Sakonnet the past week were Rufus L. Griffith, president, and Walter A. Griffith, treasurer, of the R. L. Griffith & Son Co., the latter being accompanied by his wife; Fred V. Kenyon, secretary of the John T. Mauran Mfg. Co.; Augustus A. Green, of the A. A. Green & Co., and William P. Chapin, secretary of the Chapin & Hollister Co., and his wife.

Walter J. Burns, 50 years of age, for many years employed by S. & B. Lederer Co., committed suicide Tuesday night by inhaling gas fumes. He left the jet in his room open upon retiring and was found dead in the morning. He had been suffering from illness for several months. His wife is in Europe on a visit. Mr. Burns was a practical jeweler and had been with the S. & B. Lederer Co. as sample maker, designer and inventor for many years. His death will be a great loss to the firm, as his capacity for ideas was exceptional.

A mortgage for \$165,000 made from the Manufacturers' Building Co. to the Rhode Island Hospital Trust Co. was discharged Friday according to the records at the City Hall. This mortgage was upon the build-

ing at the corner of Aborn and Sabin Sts., which was erected and originally owned by the manufacturing jewelry concern known as the Kent & Stanly Co. and is entirely occupied by manufacturing jewelers and kindred concerns. The building was purchased by the Manufacturers' Building Co. at the time of the settling of the business of the original owners after their failure. Charles Fletcher is the president and Franklin A. Chase the treasurer of the present owning company.

## North Attleboro.

Theron I. Smith has been enjoying a vacation at Poland Springs, Me.

E. Ira Richards, Brooklyn, is making a stay at his North Attleboro home.

J. A. Sweet left Wednesday for the west with the samples of J. F. Sturdy's Sons Co.

H. K. Sturdy and wife enjoyed an automobile trip through New Hampshire, last week.

Albert Totten announces his determination not to be a candidate for the legislature this year.

Edmund McDermott, jewelry buyer for Edward Malley & Co., New Haven, Ct., was a local visitor last Friday.

Contractors have the plans of the big addition to the Totten building to figure upon. It is expected that actual building will commence in several weeks.

Howard Welch, shipping clerk at the Payne & Baker Mfg. Co., was presented with a purse of money last Thursday by the firm and employes. Mr. Welch is to enter Bates College.

Frank H. Bliss, of A. H. Bliss & Co., while driving an automobile on North Main St., Attleboro, last Sunday, knocked down and seriously injured Gordon Boyce, a lad of five years, who had jumped directly into the path of the automobile.

Local jewelers were interested in the news despatches from New York that Mrs. Emma Heffron Sullivan was suing her husband for \$36,000 in cash and \$11,000 realized from property purchased by J. J. Sommer. Mrs. Sullivan claims that she gave the money to her husband for safe keeping, and that he refused to return it. Prior to her last marriage, Mrs. Sullivan was the widow of Fred D. Heffron, the well known jeweler and salesman.

Joseph Landry, the second employe of the W. & S. Blackinton Co. to be arraigned on a larceny charge, was sentenced to 30 days in jail. Landry at first signified his desire to appeal, but later came to a decision to work out the sentence. George G. Wheeler, superintendent of the factory, said Landry was employed as scratch brusher. A number of articles of jewelry were missing and suspicion pointed toward Landry, who, when confronted with the facts, admitted his guilt. He made an effort to return the missing stock, but could not get all of it. On the stand, Landry admitted having been taking jewelry for some time.

A fire was recently caused by the ignition of gasoline on a work bench in the store of Stein Bros., Pittsfield, Mass. Only slight damage was done, the flames having been quickly extinguished.

**JULES RACINE & CO.,** Exclusive Importers,

103 State St., Chicago.

37 MAIDEN LANE, NEW YORK.

### Connecticut.

The J. D. Bergen Co., Meriden, is creating its factory on full time.

M. A. Green, Waterbury, with his family, spent the Summer at Walnut Beach, Hartford.

S. Kronholtz, Stamford, returned, about a week ago, from a vacation spent at Mountain House, Catskill Mountains.

The toy salamanders of the International Silver Co., factory "L," at Meriden, given an outing at Double Beach, August.

C. H. Tibbitts and C. W. Leavenworth were at Mansfield's Grove, near New Britain, on Thursday, with the 12th Senate District delegates.

Robert P. Ferguson has entered the employ of the Aldrich-Murphy Co., Meriden. He will be in charge of the operating and repairing departments.

Raymond Crouch, son of W. L. Crouch, superintendent of the case department of the E. Ingraham Co., Bristol, has taken position with the Western Electric Co., Meriden.

Samuel H. Kirby, a well-known jeweler of New Haven, and his wife, on Friday evening, were given a pleasant surprise in honor of their 41st wedding anniversary.

Notices have been posted in the factory of the Sessions Clock Co., Forestville, until further notice the plant will be operated nine hours a day for five days a week.

T. W. Atkin, for 18 years superintendent of the case department of the Wm. L. Gilbert Clock Co., Winsted, has resigned and contemplates going to Michigan, where he will locate permanently.

Henry S. Atkins, a gilder, in the employ of factory "E," International Silver Co., Meriden, on Sunday of last week suffered a stroke of apoplexy. His condition is critical. Mr. Atkins has been in the employ of factory "E" for over 40 years.

John Whyte, with the Holmes & Narver Silver Co., Bridgeport, for a number of years, has severed his connection with that concern to go into business with his brother. Upon the occasion of his resignation, Mr. Whyte was given a handsome diamond ring by his fellow employees.

Chas. H. Tibbitts, Wallingford, has filed a counter suit which he filed against La Croix, who recently sued Mr. Tibbitts for \$500 damages, alleging that the latter's automobile ran into a horse owned by La Croix, avers that the horse ran into the auto and did the above-mentioned amount of damages. The case will be heard during the September term of court.

A blast which was set off one day last week in a sewer trench in front of the store of Samuel Phillips, Stamford, struck the gas main, and the sparks set them on fire. In a moment a sheet of flame from the broken main and blew directly front of the jewelry store, which immediately caught fire. Mr. Phillips and three employees placed all of the valuable stock in iron safes. Damage amounting to \$1,500 was done to the store.

Bartling & Nuckolls, Grinnell, Ia., successors to H. P. Proctor, have installed new machinery at considerable expense and engaged G. Dreyfuss, Denver, Colo., to take charge of their plant.

## Philadelphia.

J. C. Hart, watchmaker, with F. B. Wal-  
Camden, N. J., is spending vacation  
at Wildwood, N. J.

William Bode, associated in business with  
father F. C. Bode, 1804 Market St., re-  
turned last week from a sea trip to Bos-

V. H. Walz, Perkasio, Pa., whose af-  
fairs were recently in the bankruptcy court,  
opened a watch repair shop in Per-

P. A. Freeman, late with E. H. Kellar,  
Trenton, Pa., has opened a jewelry and  
optical store at 907 Hamilton St., Allen-

George Hoffman, formerly an uptown re-  
tail jeweler, resigned his position last week  
at Lit Bros. department store to accept  
position with Gimbel Bros.

Samuel A. Collins, formerly connected  
with the Webb C. Ball Watch Co., Cleve-  
land, O., was a visitor to this city, last  
week, renewing old acquaintances with the  
city.

E. Caldwell & Co. are displaying the  
gold and silver medals and prize cups de-  
signed and made by the firm for award at  
annual field day of the Knights of Co-  
lumbus.

Taylor Bros. & Co., manufacturers of cut  
glass at 3d and Cambridge Sts., will here-  
after be represented on the Pacific coast  
by Nordman Bros., 717 Market St., San  
Francisco.

The Bailey, Banks & Biddle Co. is mak-  
ing an elaborate display of the trophies de-  
signed by the firm for the forthcoming  
Penn Mawr Horse Show, which ranks as  
being one of the most exclusive outdoor  
festivities of society in this city.

Charles H. O'Bryon, wholesaler and mal-  
lial dealer, 735 Sansom St., is receiving  
condolences of the trade upon the death  
of a sister, last week, at his home, 2020  
13th St. Mr. O'Bryon was deeply at-  
tached to his sister and feels her death  
keenly.

The leading retail jewelry houses ob-  
served Labor Day by closing all day. Most  
of the wholesale houses closed a half day  
and the big factories were shut down to  
afford opportunity to workmen to enter in-  
to the festivities and observances of the  
day devoted to labor.

The death of C. Willis Bixler, head of  
the firm of C. Willis Bixler & Co., Easton,  
Pa., was a shock to many friends in the  
Philadelphia trade. Mr. Bixler had been a  
frequent visitor to this city to purchase  
stock and supplies for the Easton store and  
had made many friends. He was much  
loved.

Ed. Sharp, for many years with William  
Earle, manufacturing jeweler, 11 N. 9th  
St., but now with B. Gerson, Pensacola,  
Fla., spent all of last week in this city  
enjoying business and pleasure. Mr.  
Sharp met many old friends and told them  
of his prosperous conditions in the famous  
winter resorts in Florida.

Charles East, of J. S. East & Son, Boyer-  
town, Pa., is at Atlantic City seeking to  
regain health after suffering from a nerv-  
ous affection brought on by too close ap-  
plication to his business. Mr. East's phys-  
ical condition has caused grave fears among

his friends, but the belief is that he will  
soon regain complete mental and physical  
health.

Emil Haffa, diamond broker, 127 S. 7th  
St., who passed away suddenly about a  
fortnight ago after eating ice cream, died  
without leaving a will, and letters of ad-  
ministration on his estate were granted last  
week to Mary E. Haffa, Jobstown, N. J.  
The value of the estate is not definitely as-  
certained, but is reported to be in the  
neighborhood of \$25,000.

Col. J. Warner Hutchins, president of the  
Jewelers' Club, is the guest of Commodore  
J. Clifford Wilson on his new yacht the  
Clisade on a 10 days' cruise from the Cape  
May Yacht Club along the coast to New  
York and up to Albany. Commodore Wil-  
son is also a member of the Jewelers' Club.  
Mrs. Wilson and Mr. and Mrs. Charles  
Power of New York complete the yacht-  
ing party.

Visitors in this city's trade last week in-  
cluded: Roland Oliver, Burlington, N. J.;  
John Merz, Hopewell, N. J.; S. H. Bay-  
nard, Wilmington, Del.; A. G. Wolcott,  
Dover, Del.; W. K. Schlotterer, Schwenks-  
ville, Pa.; O. O. Stillman, New Brunswick,  
N. J.; B. C. Foster, Bristol; D. H. Krause,  
North Wales; J. W. Clark, Bristol, Pa.,  
and R. W. Wells, of Wells & Bro., Wil-  
mington, Del.

Patrick Carroll, a retail jeweler at 2211  
Atlantic Ave., Atlantic City, and formerly  
a retail jeweler in this city as Sydenham St.  
and Susquehanna Ave., widely known  
in the trade here and at Atlantic City, was  
held Wednesday last in \$800 bail by a  
justice at Atlantic City on the charge of  
assaulting Rufus Booye, Water Commis-  
sioner of the seashore resort. Accounts of  
the cause of the fight between the two men  
differ. Booye says that Carroll owes him  
money which he had been unable to col-  
lect. Carroll says that Booye insulted Mrs.  
Carroll, who has always been closely as-  
sociated in her husband's business. Booye  
bears marks and bruises as a result of the  
encounter with Mr. Carroll.

A. G. Wolcott, of Dover, Del., is reported  
to have bought out the retail jewelry es-  
tablishment in Dover of J. Frank Allee,  
former United States Senator, and  
once a political follower of J. Edward  
Addicks. Mr. Wolcott was formerly in  
business with R. Ewing, Dover, and traded  
under the firm name of Ewing & Wolcott.  
This partnership was dissolved some time  
ago and Mr. Wolcott started in business  
for himself. Former Senator Allee has  
long been regarded as the leading jeweler  
of Dover. His retirement from business as  
a jeweler is believed to have been occa-  
sioned by the demands made upon his time  
and resources by a multitude of enter-  
prises in which he became interested as he  
mounted up the ladder of political fortunes.

Final details have been arranged for the  
annual clambake of the Philadelphia Jew-  
elers' Club, Tuesday, Sept. 15. Col. J. War-  
ner Hutchins, L. P. White and Joseph E.  
Cadwallader of the Board of Governors  
have the affair in charge and promise that  
it will be by far the most successful clam-  
bake ever given by the club. The specially  
chartered steamer *Columbia* will leave  
Chestnut St. wharf at noon for Burlington  
Island far up the Delaware river almost

near Trenton. A band and vaudeville tal-  
ent will help enliven the river trips both  
going and returning. The boat is schedu-  
led to leave Burlington Island at 5:30 o'clock  
in the afternoon. Upon the return of the  
guests and the members, who this year are  
expected to make a happy throng of nearly  
three hundred, the Jewelers' Club head-  
quarters at 1228 Chestnut St. will be found  
prepared to welcome the returning club  
members and guests and here ample talent  
has been secured and diversions provided  
to continue the festivities of the day until  
bed time. A chef from New England will  
prepare the dinner.

The will of James M. Bennett, manufac-  
turing jeweler and diamond importer, head  
of the old firm of Jacob Bennett & Sons,  
who died last week, was admitted to pro-  
bate by the Register of Wills Wednesday  
last. The petition for the grant of testa-  
mentary letters to Mrs. Bennett, widow,  
gives the value of the estate as \$200,000  
and upward. It is believed to be much  
greater. The will was found in a safe in  
Mr. Bennett's place of business. The read-  
ing of it concerned especially those who  
had been for so many years in the employ  
of Mr. Bennett. Joseph Donaldson, one of  
the employes, had been with the firm 43  
years. Mr. Hughes, another, had been  
with Mr. Bennett 32 years, and Mr. O'Mal-  
ley had been with the firm 17 years. None  
of the employes were left any bequests.  
The entire estate is devised to Mrs. Ben-  
nett, the widow, and three sisters of the  
deceased. After the reading of the will,  
Mrs. Bennett announced that the business  
at 1024-26 Chestnut St. is to be closed out.  
The goods will be sold for the benefit of  
the estate at cost prices. It is assumed  
that it will be nearly a year before the  
affairs of the firm are wound up. In the  
meantime the place of business will be con-  
tinued at the Chestnut St. address.

## Boston.

Mrs. Hyman Bresnak, of 72 Allen St., re-  
ported to the police that 20 alarm clocks  
were stolen from her store during the night  
of Aug. 29 or on the morning of Aug. 30.

A. R. Harmon, London representative of  
the Waltham Watch Co., accompanied by  
Mrs. Harmon, left Prout's Neck, last week,  
where they spent the month of August, for  
New York en route for their home in Eng-  
land.

Morris Needle, of this city, 23 years of  
age, was arrested Sept. 3, charged with the  
larceny of three diamond rings, valued at  
\$120, from Morris Rosen, a Malden jeweler.  
The young man, it is alleged, obtained the  
rings last January, and did not pay for  
them, and subsequently went to New York.  
Police inspectors met him on the street last  
Thursday and took him into custody.

The Hammatt-Dickey Co. has been ex-  
hibiting in its show store at Jacksonville,  
Fla., models of the Cullinan diamond, as  
it appeared in the rough and as it will ap-  
pear when cut. This company has been  
making these models of rock crystal for  
various museums. The window display  
containing the models caused a great deal  
of comment and resulted in the company  
getting considerable newspaper publicity.

# GORHAM SILVER

¶ It has been the constant endeavor of the Gorham Company for more than three-quarters of a century to establish and sustain a reputation for only the best work.

¶ The Gorham name to-day stands for the accomplishment of this purpose.

¶ Our trade-mark is a guarantee of value as well as of the artistic beauty and distinction of the work that the best organized factory in the world makes possible.

¶ Buying now avoids the hurry attending the later season, and insures your getting the choice things you will need for the Holidays.

Table with 2 columns: Article Title and Page. Includes entries like 'Beautiful Jeweled Corsage Ornaments', 'Paris Fashions', 'Use of Colored Fancy Stones', etc.

Imports of Gems A GAIN the report of the Appraiser at the Port of New York shows the monthly importations of diamonds, pearls and other precious stones to considerably exceed the million mark, the figures for August just passed amounting to \$1,257,868, and exceeding by a slight margin the importations of July, which reached \$1,249,256.

The figures for August indicate a gradual but steady increase in demand in the gem trade that should be encouraging to those who understand what the industry has undergone in the past nine months.

The New Emblem of the Elks.

At a recent meeting of the Grand Lodge of the Benevolent and Protective Order of Elks, held at Dallas, Tex., an official design for the emblem of the order was adopted. Since the fact became generally known there has been some confusion in the minds of jewelers as to who has the right to make and sell this official design, or whether it is common property for the trade to use under the regulations of the order.

- Question 1. Has the emblem been patented or protected in any way?
Question 2. In whom does the patent right or control lie?
Question 3. Has any jeweler or manufacturer the right to make and use this emblem provided it is done for the order?
Question 4. If so, must permission be obtained from the patentee, or the one who controls it, or can the jeweler go ahead and make and sell the article without specific permission being granted?
Question 5. Can you tell us the status of the designs patented by individual firms which, it is claimed, are in accordance with the specifications of the official emblem?

The Jewelers' Circular-Weekly reaches the largest number of possible buyers at the least cost. The most profitable medium to use for marketing your goods.

- Answer 3. Any jeweler or manufacturer may make use of the emblem provided that the Grand Lodge does not prohibit any manufacturer from making and selling the emblem.
Answer 4. Jewelers can make the emblem, although permission should first be obtained from the above commission.
Answer 5. There are no patents in existence now which specifically cover this particular emblem.

Both questions and answers seem to be so clear and so thoroughly cover the points about which doubt existed in the minds of many of the members in the trade, as to make comment on our part unnecessary at the present time.

To Make a Bad Clause Worse.

It is reported from Washington that an attempt will be made at the coming session of Congress to amend the Tariff Law free list so as to double the amount or value of articles purchased abroad which the American residents may bring into this country without payment of duty. In other words, it is proposed that the "\$100 clause" of the free list which has already been the means of considerable loss to jewelry and other merchants in this country shall give place to a "\$200 clause."

The effect upon merchants of the present \$100 clause of the free list would not have been so bad had the exemption applied to what it was originally meant to apply—namely, articles intended for the comfort and convenience of the passenger during the journey, but since the courts and the Treasury Department have permitted the exemption to cover articles of all kinds, whether for the passenger or to be used as presents, the cause has been the subject of considerable abuse, and the doubling of the amount would more than double the harm that has already been done to the legitimate mercantile interests throughout the country.

## ROCK BOTTOM PRICES ON DIAMONDS

Our diamond prices are rock bottom.

We import the stones direct, cut them ourselves, and sell them as close as anybody in the country does for diamonds of equal quality.

We carry a large stock at all times and the jeweler who sends to us for a selection not only gets rock bottom prices, but also a liberal assortment—and, what is of utmost importance, he gets it promptly.

### Good Gold Jewelry

It's the  
only kind  
we make

A RATHER COMMONPLACE DECLARATION, WE'LL AGREE, BUT WE MAKE IT WITH AN INSPIRING REVERENCE FOR THAT MUCH-ABUSED WORD "GOOD." OUR JEWELRY IS GOOD ALL OVER—GOOD THROUGH AND THROUGH. IT ISN'T ALONE SUPERFICIALLY IMPRESSIVE, IT GOES BEYOND THAT, SUPPORTING ITS VISIBLE DIGNITY WITH MATERIAL QUALITIES THAT MAKE IT MOST ENDURING. FURTHERMORE, LIKE EVERYTHING IMPRESSIVE, IT HAS A PERSONALITY—CHARACTERISTICS THAT EASILY HELP IDENTIFY IT AS A KIRBY PRODUCT. ASK TO SEE THE KIRBY LINE BEARING THE ABOVE TRADE-MARK.

### Lancaster, Pa.

Alex. Farquhar, Pittsburg, is visiting his cousins here.

John J. and Charles E. Bowman visited Marietta, Pa., last week.

Mr. and Mrs. S. Kurtz Zook have returned from a trip to Boston.

The Friday half holidays observed by trade in this city ended with August.

Albert B. Smith, head salesman for Gust Rhoads, was in New York, last week.

Harold L. Sonwaster, Louisville, who learned the jewelry trade in Lancaster County, visited this city last week with his bride.

T. Wilson Dubbs has bought a house on West End Ave., between Walnut St. and College Ave., on which he will erect a handsome home.

George Glotz, with Charles Bissel, manufacturing jeweler, has taken a vacation with C. M. Wallace, Huntington, Va., as jeweler and watchmaker.

John B. Roth, Jr., is making 22 beautiful gold medals for the Dramatic Society of Pennsylvania State College. Elb Wissler, with Mr. Roth, has returned from a vacation trip to western Pennsylvania.

Among the jewelers who visited Lancaster recently were: H. J. Bare, Warrenton, Pa.; Theo. Nicols, Pittsburg, Pa.; Kingsly, Columbus, O.; T. B. Heine, Stanton, and Julius Lefever, Washington, D. C.

A walking club of the students of Ezra F. Bowman Technical School, during the past week, made a three-day jaunt to Reading. Just before leaving they had visited Wild Cat Falls on the Susquehanna River. Frank N. Diehl, of the school, is on a two weeks' vacation to his home in Mechanicsburg, Pa.

The merchants of Lancaster presented many handsome gifts as prizes for the tests held on Labor Day, Monday, under the auspices of the Central Labor Union, Rocky Springs Park, and among the contributors were Henry Weeber, T. W. Dubbs, W. W. Appel and Aug Rhoads. The prizes were exhibited in the show windows of the stores of Aug. Rhoads and Henry Weeber.

### Toledo.

The Globe Optical Co. is the latest member to join Toledo's colony of opticians. The new rooms of the company are located at 311 Madison St.

The Interstate Optical Co., 612 Madison St., has just renovated its optical shop and is holding a special sale during the present week.

Toledo jewelers entered heartily into the preparations for the reception to the G. K. which met in Toledo last week. All downtown jewelers and opticians decorated their stores in keeping with the request of the general entertaining committee, and all went to the expense of having specially designed souvenirs made for the occasion.

Charles Gray, Dayton, O., was recently taken into custody at Petoskey, Mich., by local authorities there believing him to be a fugitive. Mr. Gray mysteriously left his home in Dayton some time ago, and his family has been very solicitous about his welfare.

## New York Notes.

Arriessohn, 96 Columbus Ave., has opened a branch store at 2088 Broadway.

Ed. Goddard, assistant secretary of the Jewelers Safety Fund Society, is spending his annual vacation at Jackson, N. J.

J. H. Noyes, secretary of the Jewelers Security Alliance returned, yesterday, from his month's vacation at Holly Inn, Christmas, Me.

E. E. Alsterlund, of the H. E. Alsterlund, Boston, Mass., was a visitor in town, last week. He made his headquarters at the Astor House.

Julius Shapiro, 12 John St., expects to add to his present diamond and watch a fine complete stock of solid gold and gold-filled jewelry.

Detective Lieutenant Monahan, the Maiden Lane plain-clothes man, returned, last week, from a 15-days' vacation, a part of which was spent at Atlantic City.

J. J. Mulford, president of The Jewelers' Circular Publishing Co., started, last week, on a trip in the west. He will visit the Yellowstone country and spend some time with his son, in Denver.

Notice is given that C. Ernest Cashmore has withdrawn from the firm of Julius Jorgenson & Co., 2263 Broadway, and 334 Columbus Ave., and that Julius and William Jorgenson will conduct the business under the name of Julius Jorgenson & Co. at 2263 Broadway.

Charles Melchor, for many years salesman of the Rockford Watch Case Co., and Aikin-Lambert & Co., has opened a store at North East, Pa. His many friends who have known him as a traveling salesman will miss his visits, but join in best wishes for his future prosperity.

J. H. De Jong, an importer of diamonds and precious stones, 35 Maiden Lane, returned with his wife, Tuesday morning of last week, on the *Noordam*, from an eight weeks' visit in Europe. While abroad Mr. and Mrs. De Jong visited numerous points of interest on the Continent. Mr. De Jong spent some time in the diamond center of Europe.

The Jewelers Board of Trade, on behalf of a number of large creditors, have filed objections to the discharge in bankruptcy of Robinson & Anderson, Worcester, Mass., against whom a petition in bankruptcy was filed some time ago. The objection is taken on the ground that the bankrupts made an alleged false written statement, on which the writ was extended.

The firm of Wolfsheim & Sachs, 35 Maiden Lane, manufacturers of jewelry cases, recently made a special box in which is placed the book to be given to the graduates. The book contains the history of the Catholic Reform School. The same firm has also a number of moiré silk cases, to be presented by the Queen of the Asbury carnival to her ladies in waiting.

William H. Wheeler, of the firm of Hayden W. Wheeler & Co., 2 Maiden Lane, was married in Berlin Wednesday of last week, to Miss Wernicke, daughter of Mr. & Mrs. Hermann Wernicke. Mr. Wheeler is a graduate of Amherst College, class of 1884, a member of the Union League and several Athletic clubs, and a trustee of Amherst College. He is also a member of

Alpha Delta Phi, the 24-Karat Club, and the Underwriters' Club, of Manhattan.

Moser & Whyte, who recently formed a partnership to deal in diamonds, precious, semi-precious and imitation stones, are now settled in their new office in the Silversmiths' building, 15 Maiden Lane. Mr. Moser was formerly a traveling salesman for R. A. Breidenbach, for whom he covered the western territory. Mr. Whyte formerly represented the same firm, in this city and Newark.

A. K. Sloan, president of Sloan & Co., 21 Maiden Lane, celebrated his 70th birthday, last Thursday, and was the recipient of many congratulatory remarks because of his long and honorable career in the Maiden Lane district. He was entertained at luncheon at the Railroad Club, by Messrs. Carter and Gough, of Carter, Howe & Co., and that evening, at his home a dinner was served in honor of the occasion. Mr. Sloan came to this city, from Syracuse, N. Y., when a boy, and entered the employ of the old firm of Carter, Pierson & Hale, in 1854, as an office boy. He remained with this house 40 years, rising to the position of partner in the business. After retiring from this house, he later became head of the firm of Sloan & Co.

Carlo Mattarazzo, an educated Italian, claiming high connections in Italy, was held for the Grand Jury by Magistrate Dooley in the Adams St. Court last week, Tuesday. Mattarazzo, who is an agent for a Manhattan jewelry concern, was accused by Mrs. Josephine Carruba, of 202 Union St., of having stolen a pocketbook from one of the bureau drawers in her home, containing \$49.97. Mrs. Carruba said in court that she had been in the habit of secretly purchasing jewels from Mattarazzo on the instalment plan, and that on one of his visits to her home he took the pocketbook while she was upstairs and disappeared hurriedly.

The Seth Thomas Clock Co. is now settled in its new quarters in the Silversmiths' building, 15 Maiden Lane, where the concern occupies almost the entire second floor. The new salesrooms afford opportunity for a much better display than was possible in the old quarters. At the Maiden Lane front of the floor are the offices and watch department. The central space is occupied by a line of staple goods, and office clocks. A part of the space at one side is given over to the display of old style clocks. The large hall clocks are arranged against the wall at the opposite wall. The tower clocks have a special department, and make a most excellent showing. The finest lines are displayed in the rear salesroom, facing John St. Here are also shown bronzes in sets, mahogany and fine hanging clocks.

An \$1,800 pawnshop fraud came to light recently, when Inspector McCafferty, of the Detective Bureau, received word that Harry Mandler, of 208 Second Ave., was under arrest in San Francisco. It appears that early in March, at the request of Aaron Asen, a friend, Mandler pawned \$1,800 worth of diamonds because Asen needed cash to pull him through the hard times. He handed over to his friend \$700 and a number of pawn tickets. Then it happened that Mrs. Asen wanted to redeem a pair

of earrings, so she presented one of the tickets at a pawnshop, and was shocked to learn that Mandler had been there before her and redeemed the jewels, explaining to the broker he had lost the ticket. In half a dozen other shops it was the same story, so the police got busy.

In a decision handed down by the Board of United States General Appraisers, last week, it was held that imitation pearl beads were dutiable at 45 per cent., ad valorem, under provision of the law for "manufactures of glass." The importers, G. W. Sheldon & Co., contended that the beads should be admitted to duty as "manufactures of wax," at the rate of 25 per cent. The Board finds that the importation of the beads are dutiable as assessed, but certain of the articles should be accorded a 25 per cent. rate. A decision was also handed down by General Appraiser Sharretts, overruling the claim made by W. F. Lung, of this city, relating to finished watch chains made of German silver, nickel plated, fancy links, and watch chains of nickel plated German silver. It was held that the merchandise is dutiable at 60 per cent., as "jewelry," and not as manufactures of metal at 45 per cent., as was contended.

The funeral of Thos. H. R. Redway, once a member of the firm of Nesler & Redway, manufacturing jewelers, years ago located at 15 Maiden Lane, was held from the home of the deceased's son-in-law, Dr. John C. Forsythe, Trenton, N. J., Tuesday afternoon, of last week. The services were conducted by the Rev. Dr. John D. Fox, pastor of the State St. Methodist Church. Mr. Redway's health had been poor for some time, but his death came suddenly. Deceased was born in this city June 18, 1836. In 1875, he removed to Asbury Park, where he became a dealer in real estate. He was active in Masonic circles, and was elected Deputy Grand Secretary of the Grand Lodge in 1891. Later he became secretary, continuing so until his death. He was Grand Recorder of the Grand Commandery of the Knights Templars, and a member of every body connected with that order. Besides his widow, he is survived by one son, George M. Redway, of this city.

The season is drawing near when those in the trade interested in the Bowling League for the coming season are beginning to talk of what the season holds in store. A decided interest is being manifested in the formation of teams to compete this year, and it is expected that the coming season will be one of the most eventful in the history of the League. Teams this year will be made up from different combinations of players, selected from the different teams, and in this way the strength of each team will be, as nearly as possible, evenly balanced. The officers of the League are anxious that all interested persons who have not sent in their names for the coming season do so at once. Already teams representing Jos. Fahys & Co., Cross & Beguelin, L. E. Waterman Co., Solidarity Watch Case Co., W. E. Webber & Co., Aikin-Lambert Co., C. F. Wood & Co., and Hayden W. Wheeler & Co., have been placed on the schedule. It is expected that there will be several others added to the

**New York Notes.**

(Continued from page 81.)

The bowling season will open Sept. 13 and the same alleys will be used as last week.

Lebb C. Ball, Cleveland, O., was in town a week for a few days.

Charles B. Dyer, an Indianapolis jeweler, is in town visiting friends.

Mr. Felsenthal, of Felsenthal Bros. & Co., Chicago, is a visitor in town.

Adelman will open a retail store at Washington St., Hoboken, this week.

H. Sturdy, Chartley, Mass., was registered at the Hotel Astor last week.

K. Merrill's local man, Mr. Budlong, is at Labor Day with Providence friends.

Anton J. Anderson Co., 170 Broadway, will soon open a retail jewelry store on St. Nicholas St.

F. Freedman, of Freedman Bros., jobbers, Buffalo, was in town a few days last week.

Harry W. Fischer, of Furbish, Swift & Co., is spending a few days with his family in the east.

Red M. Cook, of Whiting & Davis, spent the week end and holiday with relatives and friends in North Attleboro, Mass.

Harney B. Brady, a former North Attleboro manufacturer, was a caller on friends in the Maiden Lane district last week.

Mrs. A. J. Swezy, of the Bastian Bros., Rochester, N. Y., was registered at the Hotel Cadillac the greater part of last week.

Redk A. Jeanne, ("Gemfinder"), Paris, who has been in New York for the past two weeks, will sail for Europe, Saturday, on the *New York*.

The jewelry stock, fixtures and safes belonging to Jacob F. Braun were sold at public auction yesterday morning. James Watson is trustee of the business.

John Frick, a Maiden Lane emblem and trophy manufacturer, has just completed a number of loving cups and medals for the Country Club of Augusta, Ga., which are to be given as golf prizes.

The first meeting of creditors of Solomon Urbach is to be held this afternoon at the office of John J. Townsend, referee in bankruptcy, at 45 Cedar St. Claims will be filed and a trustee appointed.

D. Silverberg, who severed his connection with the firm of Louis Shapiro, 12 John St., April 28, 1907, is again connected with that concern, and will leave soon for a buying trip to Providence and the Attleboros.

F. Lindner, watchmaker and jeweler, at 28 Third Ave., will celebrate his 70th birthday on Friday of this week. Mr. Lindner has spent 55 years at the bench, 34 years of which time has been spent at his present New York address. Mr. Lindner is at present enjoying good health, and his circle of friends wish him continued health and prosperity.

William Henckel, Jr., has been appointed receiver in bankruptcy for Constantine Skinty, a wholesale dealer in notions and jewelry at 60 Washington St. It is stated that his assets consist of stock and fixtures to the amount of \$2,000 with accounts of \$1,000 and some real estate in Queens County which cost \$1,200. The interest on

the mortgage is past due and it is necessary to protect the property.

The handicap gold tournament for the Fabyan championship was played at Fabyan, N. H., last Friday, and the beautiful gold championship cup was won by J. Bernstein, diamond importer, 46 Maiden Lane. Mr. Bernstein surprised his friends by his excellent work. He made a net score of 65.

The first meeting of the season of the Optometrical Society of the City of New York, will take place at the Waldorf-Astoria, at 8 p. m., this evening. The series of lectures arranged for by the society begin at this meeting, the first lecture being on "Measurement and Correction of the Extrinsic Ocular Muscles."

The *New York Globe* of Thursday contained a short note relative to the Olympic parade, in which was made a humorous mention of the appearance of Captain Charles Dieges, of Dieges & Clust, who is a large man and who in the parade rode a very small horse. A Broadway policeman asked Mr. Dieges where he got his watch charm.

The *Evening Journal* cup, to be given to the most popular ball player in the country, is now on exhibition in the Nassau St. store of A. G. Spalding & Bro. The cup is massive and the workmanship attractive. It has a round base on which rest three clubs forming a tripod, which support the cup proper. On one side of the cup is a place for engraving the name of the winner.

Thomas G. Frothingham, of T. G. Frothingham & Co., North Attleboro, Mass., was a passenger on the New Bedford line steamer *New Hampshire* last week when that boat collided with the yacht *Corsair*, owned by J. P. Morgan. Mr. Frothingham occupied a stateroom near the place where the *Corsair's* bow came through the side of the vessel. Fortunately he escaped uninjured.

The many friends of Dan I. Murray, the jewelers' auctioneer of 3 Maiden Lane, will be glad to learn that he will be ready to resume his work about Oct. 1. About nine months ago Mr. Murray was taken sick with ptomaine poisoning, since which time he has been treated by many noted specialists. The past three months Mr. Murray has spent at the seashore, where he has recovered his health.

The first meeting of the creditors of Anzelowitz Bros., 123 Canal St., who were adjudged bankrupts on Aug. 22, will be held at the office of McGrane Coxe, in the Hudson Terminal building, Sept. 18, at 12 o'clock, at which time the creditors may prove their claims, appoint trustees, consider an offer of compromise made by the bankrupt, and transact such other business as may come before the meeting.

According to *Dun's Review* the failures among merchants in the jewelry and clock lines during the month of August amounted to 24, with liabilities of \$324,530, an average of \$13,522. According to the same authority there were 11 failures in 1907, with liabilities of \$40,559; seven failures in 1906, with liabilities of \$108,261; seven failures in 1905, with liabilities of \$51,386, and 15 failures in 1904, with liabilities of \$158,598.

Max Ams, for 14 years president of the Mauser Mfg. Co., silversmiths, died at his

home, 121 N. Columbia Ave., Mount Vernon, Friday. He was 64 years old. He was connected with many industrial societies throughout the country and was for 30 years a member of the Arion Society of New York, and one of its board of directors. He is survived by three sons and a daughter. Deceased was also president of the Max Ams Machine Co.

A baseball game has been arranged between eastern representatives in New York City and New York salesmen for New York houses. The exact day on which the game will be played has not as yet been definitely settled, but will be announced this week. The list of the two teams is complete and will be made public at the time of the announcement of the game. The contest will be played at the Prospect Park parade grounds, Brooklyn, and promises to be an exciting contest.

A mattress, said to be one of the most valuable that has ever been seized by the customs officials, was taken from among the effects of Carmine Petti, upon his arrival on the steamship *Princess Irene*, of the North German line, from Naples last week. When Petti landed Special Inspector Donohue, of the customs service, searched him and found three small rings on his person. The incomer was about to depart when the customs man noticed a mattress which was brought back in the baggage from Naples. When the cover of the mattress was ripped off the inspector discovered an assortment of jewelry and other articles, included in which were 39 rings, 12 necklaces, eight copper vases, two brass jars, 14 pairs of earrings, four chains and other things including handkerchiefs, etc. In all there were 144 pieces. The whole collection was taken to the Public Stores, where a CIRCULAR-WEEKLY reporter was told that the appraised value of the goods amounts to 524 lire or about \$105 in United States money.

Mrs. Edward J. Sullivan, formerly Mrs. Fred D. Heffron, whose first husband, up to the time of his death, was a member of the firm of Riley, French & Heffron, N. Attleboro, has brought suit in the Supreme Court in New York County to get back her \$38,000 cash and \$11,000 that it is alleged Mr. Sullivan realized on real estate. Meanwhile Cornelius J. Sullivan has been appointed by Justice Bischoff as receiver for the \$47,000 and Mr. Sullivan, defendant, has been ordered to surrender this \$47,000 to the receiver, who will hold it for the benefit of the plaintiff until final judgment has been rendered. Mrs. Sullivan claims that she turned over money to her husband at different times to deposit in a bank or trust company in her name, and the money was deposited in the name of her husband. Mrs. Sullivan says her husband persuaded her to turn the property over to him because he claimed that there was danger of a claimant appearing for the assets of her first husband's estate. A complaint was served on Mr. Sullivan, and a few days later his lawyer filed an answer claiming that the money was a free gift.

Andrew Heinz, a laborer, was shot and killed at Garden City, early Saturday morn-

(Continued from page 83.)

While trying to break into the residence of S. Gimmel, of Henry Gimmel & Co. Klossen, a watchman, heard suspicious sounds outside a barn in which he concealed himself soon after midnight, fired two shots. Moans followed the sound upon going out the watchman found Heinz prostrate upon the ground. Gimmel's former said that the watchman had been in defense of the property and that he did not mean to shoot Heinz. When day came a bag containing a number of diamonds was found not far from where the watchman had been shot.

Abel, of Abel Bros. & Co., has returned from the south and west and reports an improvement in business in those sections.

Ernest Stern, with Hutchison & Huestis returned from a very successful trip to Philadelphia, Baltimore & Washington.

A middle aged man who called at the office of O. C. Jackle, 866 Third Ave., last morning, was recognized by the wife of the proprietor as the man who had stolen diamonds there some months ago. He was arrested, taken to court, and held in jail for trial. The man came to the office about 11:30 A. M., and, as soon as he was recognized, started for the door followed by the watchmaker, who had been summoned from the back of the store by the jeweler's wife. The man started to run to 53d St. elevated station, where he was overtaken by the watchmaker, who informed the jeweler wished to see him. The man refused to return and was arrested by a detective who happened along. The detective took his prisoner to the store, where C. Jackle, who had called on the visitor on his former visit, recognized him as the man who had stolen diamonds. The prisoner was then taken to the 53d station house, and from there to the 5th Avenue Police Court, where he was examined. He gave the name of Alexander, and said he was a Roumanian. He denied the charge against him, but was held. An attorney, Humacher, 46 Eighth Ave., was present at the Yorkville Court, and also recognized the man as the one who had visited the store, a while ago. The man is described as being about 55 years old, with a gray mustache and eyes. He is short and thickset, weighing about 170 pounds. He alleged that he is the man who has been visiting retailers on both Eighth and Ninth Aves. Mr. Jackle said that the first time the man called at his store he asked for some chains, and after inquiring the price he tried to get a better bargain. At the same time, it is alleged, he took out his pocketchief, wiped his forehead, and concealed two chains in it, returned both chains and handkerchief to his pocket, without detection.

The retail jewelry store of Dana S. Ham, Westbrook, Tex., was recently broken into by burglars, who stole a lady's watch, worth \$15; six rings, valued at \$15, and a dozen brooches worth about \$3.00. The gain was gained through the front door which was insecurely fastened.

**Pittsburg.**

R. L. Kirkpatrick, Butler, Pa., returned last week from an extensive European trip.

W. J. Johnston, of the W. J. Johnston Co., recently made a flying trip to the east.

Warren W. Wattles, of the Hardy & Hayes Co., is home from a vacation trip spent in the east.

J. Levant, Winder, Pa., was in Pittsburg last week, looking for a location, with a view of engaging in business in this city.

George W. Beggs and J. L. Roberts, of the John M. Roberts & Son Co., have gone to Toronto, Canada, to attend the races and enjoy several weeks of recreation.

On a page devoted to pictures of distinguished citizens of Massillon, O., the *Pittsburg Dispatch* recently published a large portrait of A. J. Miller, of that town.

Samuel Weinhaus has been appointed trustee for Abraham Lippard, who recently went into bankruptcy. Mr. Weinhaus will endeavor to wind up the affairs of the bankrupt as soon as possible.

The following out-of-town jewelers have recently been in Pittsburg, buying goods: F. H. Hayes, Washington; J. R. Thorn, Toronto; F. A. Heberline, Ambridge; Geo. V. Brady, Washington; Charles A. File, Mars; E. A. Blosser, New Kensington; P. J. Manson, Jeanette; H. R. Brown, Donora; S. S. Snyder, Dayton; Carl Leighner, Butler; R. H. Wolf, Smithton.

Notice has been given that an application will be made to the Governor, Sept. 2, for a charter for a corporation to be known as the Kerner Mfg. Co., of which Peter Kerner is the president. Mr. Kerner is at Cambridge Springs, and the details concerning the company, which is to manufacture silverware, enamel ware, jewelry, picture frames and other articles, could not be learned, because of Mr. Kerner's absence.

Max Cohen has bought the bankrupt stock of Sol Seleznick, doing business as the Liberty Jewelry Co., for \$490. Seleznick was thrown into involuntary bankruptcy several weeks ago, as stated in THE CIRCULAR-WEEKLY at the time. Cohen, it is said, was at one time manager of a tailoring shop, of which Seleznick was the proprietor. The affairs of the bankrupt have been referred to Referee in Bankruptcy, H. R. Myers.

Announcement was made in some of the daily papers last week setting forth that J. Alexander Hardy, of the Hardy & Hayes Co., had disposed of a business property at No. 713 Liberty Ave., for \$150,000, or at the rate of \$7,500 a foot front. Mr. Hardy says that the announcement was premature, as the deal has not been closed. Morris Kaufmann is said to have been the purchaser, but the deed has not been passed for the property, although a deal for the sale is said to be pending.

The Cosmopolitan National Bank of Pittsburg closed its doors last Saturday, on orders issued by the Controller of the Currency. Abraham Lewis, the Fifth Ave. dealer, was a depositor in the bank, and it is said that several other jewelers were also caught. Mr. Lewis had given a check the day before for \$200 for rent due on his

store, had issued another check for \$150 and several small ones, which came back to him Saturday. It will be some time, it is thought, before the affairs of the institution can be straightened out.

C. Hauch, 511 Smithfield St., who must move next April, because of the fact that his present quarters are to be razed to make way for the construction of a 25-story building, by the Oliver estate, says that he has not as yet found a location, and will wait until after the first of the year to hunt one. "One thing is certain," said he to THE CIRCULAR-WEEKLY correspondent: "I will not pay \$5,000 or \$6,000 a year rent, as some of the jewelers are doing. If I cannot get a store by myself, I will endeavor to rent a place and sublet half of it to another tenant or else go out of business." Mr. Hauch pays \$2,100 in his present location, where he has been located for many years.

Creditors of J. F. Murphy, Dawson, Pa., who recently filed a petition in bankruptcy in the United States District Court in this city, held a meeting early last week, and elected George P. Christy, of West, White & Christy, trustee of the estate. Mr. Murphy says his liabilities are \$15,048.16, with assets amounting to \$13,146.55. Mr. Christy says that he will endeavor to wind up the affairs of the bankrupt with as little expense as possible. He has been required to give a bond of \$17,000 for the faithful discharge of his duties and will begin making an appraisal of the stock this week. The affairs of the bankrupt will be adjudicated by James Carroll, of Uniontown, referee in bankruptcy.

M. Hollander, a Pittsburg jeweler, has been held for court on four charges by Justice of the Peace J. G. Storer, of Wilkinsburg, made by Julius Hartman, of Wilkinsburg. Hartman alleges that Hollander chased him about the downtown streets of Wilkinsburg and Pittsburg and laid violent hands on him in a Fifth Ave. building and threatened his life if he did not pay \$102 and the costs of criminal proceedings, when he says he only owed \$60.25. Justice Storer held Hollander for court in \$300 bail on a charge of assault and battery, \$500 bail for surety of the peace, \$500 on a charge of extortion and \$200 on a charge of false pretense. A charge of disorderly conduct is yet to be heard. Both sides have engaged attorneys to look after their interests and Hollander expects to tell his story in court.

Some of the creditors of the Pittsburg Watch Co., who recently held a meeting in the Monongahela House, to consider a proposition to accept 25 per cent. from the bankrupt firm, were disappointed to learn that certain eastern creditors refused to abide by the action taken. As a result, the receiver, Benjamin Biggard, has sent out notices stating that he will offer the stock of the bankrupt at auction at a public sale, to be held Tuesday, Sept. 15, at 10 A. M. The stock in all three stores of the bankrupt concern will be offered for sale the same day. The sale will begin in the Smithfield St. store, and the contents of the Liberty Ave. and Frankstown Ave. stores will be sold the same afternoon. Mr. Biggard says he doubts if the creditors will realize 25 per cent., after all expenses are deducted. The company's liabilities amount to \$33,000, with assets of \$15,000.

CHICAGO, WEDNESDAY, SEPTEMBER 9, 1908.

No. 6.

## Chicago Notes.

F. Prochnow is on a fishing trip. Harry H. Miller is on a trip to Denver,

Ziegler is back from a trip through Wisconsin.

A. Fay left for the Pacific Coast, Sept. 5.

H. Hess is busy buying furniture these days.

A. Dorrance has returned from a trip to the northwest.

A. Moore has returned from a western southern trip.

D. Smith is representing the International Watch Co., in Iowa.

E. Fay, with the R. F. Simmons Co., is on the Pacific Coast, Sept. 4.

A. Goldman, of Goldman Bros., is on a six-weeks' trip to New York City.

R. Spinney is the new manager for the Chicago office of the J. D. Bergen Co.

L. Lake, with the Waltham Watch Co., is on a month's vacation down east.

Mr. Koch and Melville Nordlinger, of S. Nordlinger & Son, were here, last week.

Harry A. Ferris is now connected with the diamond house of C. J. Roehr & Co.

V. F. Juergens has returned from a five-weeks' vacation at Black Lake, Mich.

Schwartz is taking a two months' vacation in Colorado for the benefit of his health.

V. F. Kirkpatrick, St. Joseph, Mo., accompanied by his wife, visited Chicago, last week.

Phil Armour, buyer for J. L. Brandeis & Sons Co., Omaha, Nebr., was here, last week.

Mrs. O. A. Starke and her daughter, Edna, spent last week with friends in Elgin, Ill.

"Al" Kolker, with the Juergens & Anderson Co., has returned from a trip to the northwest.

Max Buchsbaum is on a three-weeks' pleasure trip to the Yellowstone Park and the Pacific Coast.

Fred. H. Levy, of M. Schussler & Co., San Francisco, Cal., stopped here, last week, on his way home.

David Jacobs, salesman for M. A. Eisen & Bro., has opened a new jewelry store in Muskegon, Mich.

R. A. Talbot, with the New York office of Joseph Fahys & Co., stopped over here, last week, on his way to Denver.

Mrs. E. G. Pfeiffer and George S. Pfeiffer, respectively wife and son of the late

E. G. Pfeiffer, will continue the jewelry business at 164 N. Roby St.

Henry Reinhard is making a three-weeks' trip to Wichita, Kan., where he is interested in the Varney Jewelry Co.

S. A. Andrews, Tacoma, Wash., spent a few days here, last week, on his way to New York accompanied by his wife.

Walter King, of the Julius King Optical Co., and Albert Wells, of the American Optical Co., are expected here this week.

Frank A. Chace, Jr., with the Chas. M. Robbins Co., after an eight-months' trip east, is on a six-months' southern trip.

Charles A. Garlick, representing Charles F. Wood & Co., Inc., has taken an office in room 805, Columbus Memorial building.

The "Camels" will meet at Gallis's, Sept. 17. Banquets will be discussed for the annual banquet, which will be held in January.

R. F. Prochnow, secretary and treasurer of the Fort Dearborn Watch & Clock Co., has been enjoying a fishing trip in northern Minnesota.

W. P. Wincher, who recently sold out his jewelry store at 101 Washington St., is again in the jewelry business in the Heyworth building.

W. H. Hegeman was in town, last week, buying the opening stock for his new store at Northwood, Ia. Mr. Hegeman was formerly principal of a school in that town.

Jos. Brown & Co. have bought most of the stock and fixtures of the estate of E. F. Kvasnicka, 603 Blue Island Ave., and will continue a jewelry business at that address.

J. L. Teeters & Co., Lincoln, Nebr., recently moved into their new quarters, which are fitted up in mahogany, making one of the most attractive jobbing quarters in the country.

Irvin J. Shauck, a jeweler of Juneau, Alaska, was robbed of a diamond stud, valued at \$375, while riding on the rear platform of a north bound Clark St. car, one day last week.

Emanuel Mandel, of Mandel Bros. department store, died, Thursday night, at Basle, Switzerland, as a result of a concussion of the brain due to a fall at the railway station there.

A. Peabody & Co., 1410 New York Life building, has been incorporated to deal in watches and jewelry, with a capital of \$10,000. The incorporators are: Adolph Peabody, L. C. Huppert, William Friedman.

The first regular meeting of the National Wholesale Jewelers' Association will be

held here on Sept. 16 at the rooms of the Chicago Jewelers' Association. Jobbers from all over the country have promised to attend, and many important questions will be discussed.

The public administrator, through Samuel L. Winternitz & Co., auctioneers, sold out the stock and fixtures of the estate of Emil F. Kvasnicka, deceased, last Thursday. The sale realized about \$10,000. This is considered a good sale and is a tribute to the ability of Sam Winternitz, who conducted the sale in person.

Gustav R. Wolff, retail jeweler, of 968 N. Halstead St., was severely bitten by a mad dog one day last week, and was sent to the Pasteur Institute for treatment. Wolff, who saw the mad animal running toward a group of children, tried to catch him by the collar. His hand slipped and the infuriated beast nearly tore Wolff's right hand off. Wolff hung on, however, and held the dog with his left hand till a policeman shot it.

Among the buyers in town last week were: J. Fred. Nabstedt and Christian Jansen, Davenport, Ia.; John T. Holmquist, Sycamore, Ill.; Geo. Miller, Braidwood, Wis.; Everett B. Lewis, Dwight, Ill.; C. D. McElvain, Red Oak, Ia.; J. C. Mahon, Aurora, Ill.; A. F. Hall, Janesville, Mich.; C. W. Livergood, Reinbeck, Ia.; F. W. Andrews, Ludington, Mich.; Geo. Young, of Young & Allen, Abingdon, Ill.; Henry S. Hurlbut, Mineral Point, Wis.; John H. Williams, Clarksville, Mo.; Sam Ayres, Denver, Colo.; Walter Cramer, of James Cramer & Son, Clarinda, Ia.; Clyde C. Patton, Canon City, Colo.; Mr. Wilson, of Edward Vail & Co., Wichita, Kans.; Marsh Hainer, McComb, Miss.

## New Orleans, La.

"De Luce, of Paris," recently obtained a charter to do a jewelry business in this city. The capital is \$6,000.

Otto Seizler, a jeweler at Melpomene St. and St. Charles Ave., was recently injured in the wreck of an excursion train of the Great Northern road at Scabrooke.

The great conflagration in this city, which destroyed about \$1,250,000 worth of property in Decatur, Chartes, Iberville and Blenville Sts., caused practically a total loss to the brick building of Frank Adams, in which he had his gold and silversmithing works at 238 Decatur St.

## Indianapolis.

P. Craft, of the A. P. Craft Co., has returned from Wisconsin.

Joseph Cowan, Boston, Mass., was in this city a few days, last week.

For a two weeks' vacation at Bay View, Wis., F. M. Lierron has returned home.

Wholesale and retail jewelers of the city gathered during the afternoon on Labor Day, and a majority of the manufacturers closed their plants all day.

Among visitors in the city, recently, was Kurt Friege, King of the Cincinnati Circus, who, with his wife, spent a day with J. P. Mullally, of this city.

Joseph Reagan, manager of the Baldwin Jewelry Co., left last week to join his family in Ludington, Mich., for a week. His only will return home with him.

Bill Reed has returned after a vacation with relatives at Terre Haute and Illinois.

His brother, Harry Reed, left last week to attend a house party at Paris, Ill.

Out of town jewelers in this city, last week, were: Phillip Diels, Marion; Charles Ham, Franklin; George Clemens, Greenwood; E. Rossier, Martinsville; L. Heaps, Spencer, and J. W. Hudson, Milledale.

For the third consecutive year, Horace Postock was elected captain of the Crescent team of the Indianapolis Bowling League, last week. The team is now practicing for the games scheduled for the winter season.

The firm of Kohlmeier & Johns, with headquarters at 45-46 Claypool building, dissolved last week. L. D. Kohlmeier is going to take a position with Carl L. Johns, while E. B. Johns will continue the business. The company was organized but one year ago, and has a lucrative business.

A local branch of the Order of Ku Klux Klan will be organized here within the next two or three weeks. At the recent national convention at Cincinnati, J. P. Mullally, Joseph Reagan, George S. Kern, E. M. Reed, J. H. Reed, and J. M. Morris, of this city, and Eugene O. Collins, Franklin, were initiated into the mysteries of the order. It is believed that a branch with 25 members can be established here.

## Milwaukee.

W. Page, with the E. F. Erkstine Co., Rochester, N. Y., recently visited this city.

Laub, Cresco, Ia., was here recently, to attend the funeral of his mother. Mr. Laub is a well-known retail jeweler of this city.

Bert Boeing, Hustisford, Wis., spent his day during the past week in Milwaukee. Mr. Boeing, who has been ill at one of the Milwaukee hospitals, for some time, accompanied her husband back to Hustisford.

Thieves recently made away with several pieces of rings and watches valued at more than \$200 from the jewelry establishment of W. Thien, 405 Grand Ave. Entrance was made through the front door and indications are that the lock was picked.

A. Mikalson, De Forest; Edward S. Campbell, Columbus; O. J. Goeldner, Waterloo; W. T. Stetson, Lake Mills; Gustave Swinski, Oconomowoc, and F. P. Bes-

wick, Racine, were among the Wisconsin retail jewelers who called upon the local trade last week.

Ike S. Martin has purchased a handsome flat building at 251-257 12th St., the consideration being \$21,000. Added to this investment, Mr. Martin has been making extensive improvements at his place of business, among them the innovation of an elegant hand painted ceiling.

The board of directors of the Wisconsin Retail Jewelers' Association will meet at Oshkosh, the home of President Chapman, of the organization, Sept. 17. George Durner, Herman Stecher, Secretary Franklin Thomson and others will be in attendance from Milwaukee. Several important subjects will be up for consideration, among them being the new Wisconsin Retail Jewelers' Fire Insurance Co., now under organization.

John Armbruster, Cedarburg, Wis., was a recent Milwaukee visitor. Mr. Armbruster is erecting a fine double store building which will be one of the costliest in Cedarburg. One store will be occupied by Mr. Armbruster's jewelry business and the other store by his piano establishment. Offices and flats will be located in the second story.

## Denver.

Mr. Stone, of Stone & Lawson, Fort Collins, Colo., visited the trade here, last week.

Hiram R. Daniels, Douglas, Wyo., was in Denver, last week, on a business and pleasure trip.

Louis Freund, of Henry Freund & Co., was in the city, last week, visiting the jewelers.

Alban Herman, Brighton, Colo., was in this city, for a few days, last week, on a business trip.

Mr. Jacoby, of the Edward Lehman Jewelry Co., left, last week, on a business trip around the Horn.

William Fulton, of the Lewis Jewelers' Supply Co., left last week for Cripple Creek on a business trip.

N. N. McLean, Lamar, Colo., was here for a few days, last week, accompanied by his family. He purchased stock here before returning home.

Theodore E. Syman, of the Syman Bros. Jewelry Co., left, last week, for Evergreen, Colo., where he will spend a two-weeks vacation hunting and fishing.

Wynn Rankin, of the Lewis Jewelers' Supply Co., returned, last week, from his vacation, at Carter's Lake, on the Moffat Road, where he has been hunting and fishing.

Page A. Hardbridge, formerly with the Boyd Park Jewelry Co., of this city, left last week, for Goldfield, Nev., where he will accept a position with the Walter A. Lord Jewelry Co.

Faxon B. Park, manager for Dan. S. Park & Co., Cheyenne, Wyo., returned last week from Lincoln, Neb., where he had been to attend a fraternity convention, and is now back at work. Dan S. Park, who has been in Cheyenne for the past two weeks, has returned to the city, and will be here for a few days before leaving on a trip to the states in the middle west in the interests of Watson & Newell, of Attleboro, Mass.

## Cincinnati.

V. A. Gebhardt, of Gebhardt Bros., spent the past week in New York on business.

C. G. Schlenker, Hickman, Ky., called on friends here, last week, on his return from Eaton, O.

B. N. Atkins has assumed the business of his mother, Mrs. R. H. Atkins, at Cambridge, O.

Oscar Keck, president of the Herman Keck Mfg. Co., was in New York, last week, on business.

H. C. Walton, of the Keystone Watch Case Co., has left for Mackinac Island, for a 10 days' vacation.

A. G. Schwab, of A. G. Schwab & Sons, and his wife are at home after a long sojourn at Atlantic City.

Mr. McMillan and wife, Atlanta, Ga., stopped over here on their way to Cleveland, O., the past week.

George H. Newstedt, 4th St., is back at business again, having completed his three-weeks' automobile trip. He reports having had a very enjoyable time.

W. Clements Air, of the Duhme Jewelry Co., was away from business, last week, owing to the death of his mother, in Newport, Ky. The sympathy of the trade is extended to him in his bereavement.

George Fox, of Fox Bros. & Co., with his wife and daughter, has returned from a three-months' stay in Europe. Henry Fox, of the above firm, and family, have returned from a Summer's outing in Charlevoix, Mich.

The sympathy of his friends in the trade is extended to A. F. Chapman, of the Loring Andrews Co., owing to the death of his wife, and also to J. C. Miller, of the Miller Jewelry Co., who was a brother of Mrs. Chapman.

Leonard J. Fox, of the Gustave Fox Co., has been elected treasurer of the Cincinnati Taft Club. The Gustave Fox Co. made the large silver loving cup to be presented to the winner of the pool tournament given by the Order of Owls.

D. Gruen, of D. Gruen Sons & Co., is home from a six-months' stay in France, Germany, and Switzerland. Most of the time was spent at the latter place, where he was looking after the company's manufacturing interests at Madretsch.

Eli Gutman, of L. Gutman & Sons, is very much elated over the arrival at his home of a new son. Mr. Gutman says the young man will be named Louis, after his grandfather, the late Louis Gutman, and that he expects to enlist him in the ranks of company L. Gutman & Sons in time.

Out-of-town jewelers who were here, last week, purchasing stock, included: N. H. Marcoffsky, Huntington, W. Va.; Arthur B. Coover, Chillicothe, O.; J. A. Mott, Gallipolis, O.; A. Carr and wife, La Follette, Tenn.; N. Sanning, Walton, Ky.; A. W. Clark, Burlington, Ky.; H. Risinger, Lawrenceburg, Ind.; Owen Sherwood, Falmouth, Ky.; A. Weiler, Greenwood, Miss.; C. P. Taner, and Frank Emmerling, Hillsboro, O.; J. R. Sanders, Parkersburg, W. Va.; W. W. Roberts, Nicholasville, Ky.; Charles F. Gray, Dayton, O.; H. E. Battice, Mason, O., and G. F. Ireland, W. Milton, O.

The store of H. Hadley, Stirling, Ont., was recently destroyed by fire.

**The Greatest Fountain Pen Plan, Plant and Policy in the world are back of Waterman's Ideal Fountain Pen**

Find this imprint on a fountain pen and you will find the one that is popular for what it does—not for what it is said to do.

A few of the most popular styles are illustrated below. Each style is made with pen points of every kind, fine, medium, coarse, stub, etc., in order that the requirements of every writer may be fulfilled. The action of any steel pen can be exactly matched.

**ALBERT LESCHOT, 65 Nassau St., New York**  
IMPORTER AND MANUFACTURER

**Kansas City.**

**TRADE CONDITIONS.**

A first class horse exhibit as a part of the American Royal Stock Show, will be given here Oct. 17. The evenings are to be turned over to horse show section, and a big society attendance will be the result. This will bring many spectators from out of town and the event always is business for the jeweler.

W. E. Bunnell, cashier for the C. B. Norton Jewelry Co., is now taking a vacation in Oregon.

R. Norton, of the C. B. Norton Jewelry Co., has been spending two weeks at Sycamore Springs.

Frank White, Guthrie, Okla., passed through this city, last week, on his way home on a vacation trip.

R. Mercer is expected back from his vacation in about a week. He has been up in Canada and New York State.

H. Morehouse, Topeka, Kans., was in the city office, last week. He stated that there is no market for a watchmaker.

The material department of the Meyer Jewelry Co. was compelled to work a couple of extra nights last week to keep up with orders.

H. Woodstock, Clear Lake, Ia., was in the city, last week, visiting his brother, of the Woodstock-Hoefer Watch & Jewelry Co.

A. Maxwell, with the C. B. Norton Jewelry Co., attended the Arkansas Jewelers' Association meeting, held in Hot Springs, Ark., recently.

C. B. Norton, president of the C. B. Norton Jewelry Co., has just returned from a business trip to Wisconsin, where he and family will be in the month of August.

W. M. Sharp, who has been operating a watch repair shop on W. 12th St., in this city, has sold out and taken a position with the Legede, Richmond, Mo.

J. N. Brown, traveling representative of the Woodstock-Hoefer Watch & Jewelry Co. was in the house, last week, filling up his trunks for another trip over his territory.

W. Martin Abrahamson, who was formerly in the employ of the Hassig & Krieke Jewelry Co., but who went up to Minneapolis and later back to Norway, has returned and taken a position as manufacturing jeweler with the Hassig & Krieke Jewelry Co.

The following out-of-town jewelers called on the local trade, last week: M. F. Kohler, Parsons, Kans.; A. D. Lawrence, Dewey, Okla.; A. Marks, Lawrence, Kans.; F. S. Hunter, Lawrence, Kans.; Mr. Ingles, of Hesperia & Huber, Higginsville, Mo.; Mr. White, E. L. White, Guthrie, Okla.; C. J. Clinton, Mo.; Carl Ricker, Emporia, Kans.; I. E. Pettit, Downs, Kans.; Fay B. B. Louisiana, Mo.; Ray King, Superior, N. Dak.; H. T. Crane, Maryville, Mo.; G. H. C. Arch, Oak Grove, Mo.; J. Coffman, Salisbury, Mo.; Verne Q. Powell, Fort Scott, Kans.; J. O. Stott, Paola, Kans.; L. O. Kize, Harrisonville, Mo.; Jas. Hayden,ureka, Kans.; Richard Miller, McPherson, Kans.; R. H. Morehouse, Topeka, Kans.; C. B. Libby, Weir, Kans.; C. T. Akers, C. Dell, Okla.

In August 15 the Lee Hotel, in Oklahoma City, Okla., was destroyed by fire, and E. F. Snow, traveler for the Woodstock-Hoefer Watch & Jewelry Co., just managed to get his trunks all in his room in time to

lose them. He arrived in the city at six, got his trunks into his room by seven, and was out calling on a customer by eight, when the fire occurred. The room was on the fourth floor, and while the salvage on the stock amounted to very little, the loss was great. The salvage has all been disposed of now, however, and Mr. Fessenden, of the Jewelers' Safety Fund, has been here and adjusted the insurance. The total loss amounted to \$16,000. The fire occurred Saturday, the house heard of it Sunday morning, a new stock of goods was packed and shipped to Mr. Snow, arriving in Oklahoma City on Monday, and he was out taking orders with an entirely new line of samples on Tuesday.

**Minneapolis and St. Paul.**

S. H. Clausm, of S. H. Clausin & Co., Minneapolis, has gone to Toledo, O., for a few days' visit.

J. C. Marx, formerly of Shakopee, Minn., and now located in the State of Washington, has returned from the west and will spend a couple of months in Minneapolis.

The new jobbers' club of wholesalers of Minneapolis and St. Paul held its second meeting Sept. 8, when the formal organization was completed and the matter of constitution and by-laws considered. The organization seems to be meeting with favor among most of the wholesalers, and it is felt that there is a great field for such an association in which to work for the mutual benefit and aid and to the ultimate end of benefiting all concerned, including the retail trade.

The State fair brought in many retail dealers from the country. Among them were: E. H. Beatty, Brookings, S. Dak.; I. D. Allen, Cooperstown, N. Dak.; W. H. Buck, Doland, S. Dak.; Albert Wiltskie and C. A. Swanson, of C. A. Swanson & Co., Superior, Wis.; A. O. Hulberg, Two Harbors, Minn.; Fred Scofield, Cannon Falls, Minn.; Mr. and Mrs. H. B. Lund, Morris, Minn.; L. H. Bruns, Anoka, Minn.; J. N. Drake, Preston, Minn.; Mr. Parker, Lake Mills, Ia.; Ray S. Swarthout, Pine Island, Minn.; Olaf Rygh, Glenwood, Minn.; J. H. Reiner, Glencoe, Minn.; C. A. Sherdahl, Montevideo, Minn.; E. P. Mesmer, Milbank, S. Dak.; B. Kerr, Ellendale, N. Dak.; W. W. Peterson, Fargo, N. Dak.; D. W. Smith, Pipestone, Minn.; Mr. Hahn, Odessa, Minn.; Carl Slocum, Cando, N. Dak.; J. H. Hanson, Lake Benton, Minn.; C. O. Peterson, Alexandria, Minn.; T. E. Reinhardt, Duluth, Minn.; F. W. Estabrook, Coleraine, Minn.; O. Wang, Shell Lake, Wis.; S. J. Steiglitz, Crookston, Minn.; John L. Eggleston, Wadena, Minn.; Gust. Chellin, Dassel, Minn.; C. H. Todd, New Richmond, Wis.; K. A. Vick, Decorah, Ia.; Fred Green, Buffalo, Minn.; H. Schleuder, Janesville, Minn.; Geo. V. Williams, Cannon Falls, Minn.; A. L. Mealey, Delano, Minn.; Jesse L. Cross, Staples, Minn.; M. P. Lovgren, Wheaton, Minn.

S. J. Langdon was recently brought back to Wilmington, Del., where he will be tried on the charge of giving a bogus check for \$250 to Joseph T. Montgomery, a jeweler of that place, in payment for a diamond ring.

**San Francisco.**

**TRADE CONDITIONS.**

A couple of weeks of exceptionally fine weather in San Francisco has done much for the retail business, and there is a general feeling of optimism that has not been noticed until lately among retailers. The downtown district continues to grow in importance as a retail center, and within the next month there will be several other jewelry firms located there in fireproof buildings. Those who have moved there have done well.

Charles Michle, who has been ill for some time past, committed suicide, last week, in a cheap lodging house, on Fillmore St.

Word has just been received here that Benedict Lupaska, well known to the police here and on the coast, has been arrested in Paris after a series of daring robberies.

Fred Lange, who, before the fire, had a jewelry store on Powell St., near the Columbia Theater, and who did an extensive business then buying and selling diamonds, has been arrested here for passing fictitious checks. He has not been engaged in business since the fire.

Mrs. Col. A. A. Andrews, wife of Col. A. A. Andrews, of the Diamond Palace, died in San Francisco, Aug. 25, after a short attack of pneumonia. She was known in her lifetime as a charming and accomplished woman, and numbered among her friends many of the most prominent people in San Francisco. She leaves, besides her husband, a son, Alfred F. Andrews, and a sister, Mrs. Florence Dovichi.

There is quite a contest among several of the local retailers to see who will be the first to locate in downtown quarters, and before long there will be some hurried moving. The Keystone Jewelry Co. and Mr. Moskowsky have both secured stores in the new Phelan building, at Market and O'Farrell Sts., and now have a large force of carpenters at work putting in the fixtures. These firms expect to be the first concerns to commence business in this building, which is pronounced to be one of the finest that has been erected since the fire. Mr. Alexander is also preparing to occupy a new store in the downtown district, and all three will probably move about the same time.

What is claimed to be the oldest clock in America and one of the oldest in the world is now in the possession of a San Francisco watchmaker, A. Wallin, who has a shop on Montgomery St., and it will soon be placed on exhibition there. The timepiece is of crude workmanship and was probably made by monks about the middle of the 17th century, shortly after the principle of the pendulum had been perfected. The cogwheels, pegs and dial of this clock are made of cherry wood, and the dial is hand carved. The pendulum is a long wooden rod with an adjustable wooden disc. The weight is a hollow ball filled with sand. This sand was used to regulate the clock, as it could be made to go faster by the addition of more sand, and *vice versa*. The clock was found on the Island of Oland, near Sweden, by A. Carlsen, a resident of South Berkeley, Cal., while on a visit to his native land.

P. C. Nelson, formerly in business at Watertown, S. Dak., has moved to Wilbur, Wash.

## Los Angeles.

New & White are now located in their new store on Downey Ave.

R. A. Moore, Santa Barbara, is making a visit at his old home in Cleveland, O.

L. Rosenstein, Bisbee, Ariz., has been here several days buying new stock.

Messrs. Abell and Fink, of the J. P. Trafton Co., are both out on the road on business trips.

M. Nordlinger and H. Koch, of S. Nordlinger & Sons, have gone east to be absent a month or more.

J. G. Hardy has retired from the management of the jewelry department of Hamburger's big store. William Fitzpatrick is now in charge.

R. M. Peck, traveling representative of M. A. Mead & Co., Chicago, who has been ill in a hospital here, is out again and able to start on his route.

Manager Burger, of the T. B. Clark jewelry store, 204 S. Broadway, is now holding an auction sale every morning for the purpose of closing out the stock.

The workmen have been engaged in putting in the marble front of the H. J. Whitley Co.'s new store during the past few days. Work on the interior is also being pushed rapidly.

Philip Hoeffler has returned from a stay of several weeks at Matilija Hot Springs, Ventura County. His health is improved and he is again at his place in George H. Curry's store, on S. Broadway.

A. P. Care, manager of the material department of the E. W. Reynolds Co., and Chas. Snell, manager of the optical department of the same house, are both enjoying vacations. Mr. Snell is putting in his time fishing at Catalina.

Among the out-of-town jewelers here recently were: R. H. Wilson, Ocean Park; D. S. Binford, Whittier; O. G. Tullis, Santa Monica; A. L. Palis, Upland; W. A. Manson, San Bernardino; C. C. Zilles, Pomona. Mr. Zilles is here on a 10 days' outing trip.

Perey H. Greer, jewelry auctioneer, has given up his curio store here and gone to San Francisco, where he will be found with the Morgan & Allen Co., Jewelers' building. He has not, however, sold his residence here, and will continue to make this his home.

Pollock Bros., of Riverside, were victimized to the extent of \$15, recently, through a forged check. The forger had lived in Riverside for some time and was quite well known there. He victimized a number of others besides the Pollock Bros., and disappeared before he could be captured.

An event in jewelry circles here the past week was the opening of Montgomery Bros' palatial new store at 4th St. and Broadway. It was estimated by the local press that 25,000 people passed through the store during the opening day. The fittings alone cost over \$125,000, and the stock on exhibition was estimated to be worth a half million dollars.

H. B. Crouch, corner of Broadway and Mercantile Pl., is exhibiting in his window the magnificent gold and silver belt presented by the Pacific Athletic Club, of San Francisco, to Stanley Ketchel, the former middle-weight champion of the world in the athletic arena. He is also exhibiting a num-

ber of stick pins and other jewelry for Ketchel, Papke and Billy Welsh, pugilists, who are here at present.

Carbonate Ore Johnson, accused of using the mails to defraud, was before Federal Judge Wellborn, a few days ago, to have his case set for trial. The Government claims that the defendant sold large quantities of cheap quartz to various persons upon the representation that the stones were hyacinth in the rough, which had been mined in San Diego County. The accused, whose name was given him in consequence of the fact that he was the first white child born in the Black Hills, asserts that he has ample evidence to substantiate his claim that the stones sold for \$1.50 were genuine hyacinths. The case will be heard Dec. 22.

## Omaha.

Louis Borsheim expects to build an addition to his store room shortly.

Albert Edholm left, last week, on a short business trip to Evanston, Wyo.

Louis A. Borsheim has gone to Sulphur Springs, Ark., for a brief sojourn.

Louis A. Boysen, with the C. B. Brown Co., attended the State fair held at Lincoln, last week.

Miss May Murphy, with the Mawhinney & Ryan Co., has gone to South Dakota to spend two weeks.

Grover Peterson, with the Sol. Bergman Jewelry Co., is making a business trip through the State.

Miss Mary Hurst, with the C. B. Brown Co., has gone to Excelsior Springs, Mo., where she will spend her vacation.

A. Mandelberg and son Sidney returned, last week, from an extended trip to Manitou, Colorado Springs and Denver.

J. H. Riffes, Hastings, Nebr., and Louis Brandt, Lawrence, Nebr., were in this city, last week, replenishing their stocks.

E. J. Tucker and wife, Pender, Nebr., were in this city, last week, visiting friends and purchasing stock before returning home.

## Pacific Coast Notes.

Krenkel & Bosch have leased a new store in Winnemucca, Nev., and will occupy it about Oct. 1.

R. A. Moore, Santa Barbara, Cal., has just left for the east. He will be gone about six weeks.

S. Selka, Yuba City, has found it impossible to meet his obligations on time, and his entire stock of goods is being sold at auction to satisfy claims.

J. H. Hammond, who was caught in the act of robbing a Chinese jewelry store at Sacramento, has just been sentenced to two years' imprisonment in the State prison.

A. P. Shattuck, a diamond dealer of Cleveland, O., and M. R. Peck, a manufacturer of Chicago, are touring the Coast, and at the present time are in southern California.

The stock of L. L. Gilman, Bisbee, Ariz., was badly damaged by a flood, last week, and in order to save watches, clocks, etc., many jewelers in the city have been lending him assistance.

A. W. Bates has purchased the store of T. E. Russell, Riverside, Cal., and will take

immediate possession. It is his intention to increase the stock and make a radical change in the interior of the store.

Howard Boal, Mansfield, Ill., who has been visiting at Pomona, Cal., for the past month, has returned home, but announces that he intends to dispose of his store and return to California to engage in business.

## Harrisburg, Pa.

### TRADE CONDITIONS.

There are indications hereabouts of improved business conditions in the resumption of several industrial plants that have been shut down wholly or in part for some time. Local merchants are in a fair amount of trade last week, due to the presence of many strangers who stopped on their way to or from the annual Grangers' Pu-

George Hutman has been given the tract to supply a dozen or more clock various public schools of Harrisburg.

Fred Rohn, 1302 N. 6th St., sang a solo in Messiah Lutheran Church, this last Sunday evening. He is one of the tenors in Harrisburg.

Wilmer Crow, who has just been elected president of the State Retail Merchants' Association, is business manager of Harrisburg *Star-Independent*, and prominently identified with the Harrisburg Merchants' Association.

A local jeweler exhibits a watch key made by one of the pioneers of this section used in the Revolutionary War in 1776. Since being made it has been in the possession of but three persons. It is of a large size and of exceptionally fine workmanship, being entirely hand made.

The trials of Harry Mann and Frank Carthy, who were accused of being implicated in the robbery of May's jewelry store in York, are not coming up this month as was expected, both having been postponed until the October term of court. Their attorneys are making an effort to have them released on a technicality, claiming irregular proceedings on the part of the officers who indicted him.

Labor Day was celebrated in this city with a union labor picnic and a water festival on the river, a number of jewelers contributing prizes for the winners of various events. C. Ross Boas was one of the carnival officials. These jewelers' prizes: W. P. Denehey, watch chain winner of 220-yard swimming event; Tausig's Sons, watch fob in 50-yard race for boys under 16; C. Ross Boas, watch first prize; E. G. Hoover, watch fob second prize; G. A. Gutman, watch-third prize in four-mile motor boat race.

## Pacific Northwest.

Mark W. Heacock, Tekoa, Wash., has been very ill during the past week and his store has been closed.

C. C. Payne, Ontario, Ore., has moved his stock into the building formerly occupied by the First National Bank. He now has one of the finest stores in the State.

E. Roy, formerly of Stayton, Ore., now employed in Portland, is paying a visit to his home town, where his parents live. Before returning to Portland he will spend a few days at Newport.

UNITED STATES PATENTS.

ISSUE OF SEPT. 1, 1908

897,74. BUTTERFLY-JEWEL. WILLIAM W. DENTON and ROBERT W. DENTON, Wellesley, Mass. Filed Sept. 18, 1907. Serial No. 393,478.

A new article of manufacture, an imitation of a butterfly's wing beneath said section to form a backround, a natural butterfly is used between said wing section and said

a yielding filler beneath said wing section, and rigid backing to crowd said wing section flat and about said interposed butterfly and press them into complete and intimate contact with the front throughout their exposed areas.

897,48. CUFF-PIN JOHN A. CHAPLIN, Warwick, R. I., assignor to the Waite-Thresher Co., Providence, R. I. Filed March 4, 1908. Serial No. 419,133.

An article of the class described, the combination, with a cup-shaped front portion, of a back portion secured therein, said back portion provided at one end with a pin-catch and at

the other end with a pair of hinge-members, a pin pivoted therein, and a bearing portion in the back portion beneath said hinge-members, the free end of said bearing portion engaging the inner surface of the front portion.

897,105. WATCH AND KEY CHAIN GUARD. MAYHEW RICHMOND, Parkfield, Cal. Filed March 4, 1908. Serial No. 419,204.

The combination with a pair of trousers or the like of an attaching ring arranged upon the exterior of the trousers adjacent to the waist band.

A flexible strip arranged upon the waist band and extending one side of the ring and having its ends folded or doubled under, and rivets passed through the folded or doubled ends of the strip and the waist band of the trousers.

897,407. CUFF-PIN. ANDREW ROBERTSON, Providence, R. I., assignor to the Waite-Thresher Co., Providence, R. I. Filed March 4, 1908. Serial No. 419,114.

An article of the class described, the com-

ination, with a cup-shaped front portion, of a back plate secured therein, said back plate being provided with a pin catch and a hinge-member.

said hinge-member having a forwardly extending projection between said hinge-member and the body portion of said back plate.

897,170. SAFETY-CATCH FOR JEWELRY. EMILE LIBERT, Los Angeles, Cal., assignor, by mesne assignments, to the Crouch Mfg. Jewelry Co. Filed June 20, 1907. Serial No. 379,991.

A brooch comprising a body; a securing pin secured to, at or near one end of said body a bifurcated bearing secured near the other end of

said body, the bifurcations extending transversely the body; a bonnet pivotally mounted in said bearings to swing longitudinally the body, and a skirt secured to the lower part of said bonnet, said skirt projecting toward the junction of the securing pin and body.

897,563. RING CUTTER. JOHN H. TURCOTTE, Springfield, Mass. Filed March 9, 1908. Serial No. 419,852.

As a new article of manufacture, a ring adapted to fit a digital member and having an indentation

in its periphery which indentation extends into one edge without cutting into the other edge of said ring.

897,711. TIME-SWITCH FOR ELECTRIC CIRCUITS. HAYDEN W. BROWN, Waterbury, Conn. Filed April 27, 1908. Serial No. 429,532.

In a time-switch for electric circuits, the com-

ination with a time-mechanism, of a gear wheel turned thereby, a shaft on which the wheel turns and which is turned by the wheel, a switch block

mounted on the shaft and turned by said wheel, contact surfaces on said switch block, contact fingers in engagement therewith, and means for adjusting one of said fingers.

897,727. HAT-PIN. GUSTAF H. EKSTROM, Portland, Ore. Filed March 20, 1905. Serial No. 251,129.

The combination, of a hat-pin adapted to be inserted through the body of the hat, comprising a short shank through the body of the hat, compris-

ing a short shank made with a hook at its inner end, a clamp slidably mounted on said pin-shank and comprising a sleeve, arms on said sleeves extending inward toward the hook of the pin, and a bifurcated clamp-head on the inner ends of said arms arranged to be slipped off and on the pin shank, to release and fix the clamp in place.

DESIGNS.

39,468. BONBON-SPOON. WILLIAM W. BEVAN, Melrose, Mass. Filed June 6, 1908. Serial

No. 437,210. Term of patent 3 1/2 years.

39,469. SPOON, FORK OR SIMILAR ARTICLE. JOHN CLULLEE, Wallingford, Conn., assignor to the International Silver Co., Mer-

iden, Conn. Filed June 22, 1908. Serial No. 439,866. Term of patent 7 years.

39,470. HANDLE OF SPOONS, FORKS OR SIMILAR ARTICLES. WILLIAM C. CODMAN, Providence, R. I., assignor to the Gor-

ham Co., Providence, R. I. Filed July 3, 1908. Serial No. 441,924. Term of patent 14 years.

39,471. HANDLE OF SPOONS, FORKS OR SIMILAR ARTICLES. GEORGE P. ITTIG, Bridgeport, Conn., assignor to the E. H. H.

Smith Silver Co., Bridgeport, Conn. Filed June 20, 1908. Serial No. 439,626. Term of patent 14 years.

39,472. HANDLE OF SPOONS OR SIMILAR ARTICLES. JOSEPH E. STRAKER, JR., Attle-

boro, Mass. Filed June 13, 1908. Serial No. 438,407. Term of patent 7 years.

39,473. BACK FOR BRUSHES, MIRRORS OR SIMILAR ARTICLES. HENRY J. HERBERT,

# Wachter Patented

Patented July, 1905 — May, 1907

# Ball-Bearing Bow

Foreign Patents

**Great Care** has been taken by manufacturers of watches and cases in scientifically developing watch movements and watch cases, and it seems strange that the most important of all, the WATCH BOW, should have been neglected—and WHY? Why should such a precious mechanism hang only on a piece of BENT WIRE such as the present WATCH RING is made of? The public is not yet aware of such facts, but will learn soon.

MILLIONS of annoyances caused by the present Watch Bow can be avoided by adopting our **PATENTED BALL-BEARING BOW.**

TO THE RETAILER:

Use our Bow also for repairing purposes. It is easy to attach and cannot come out. Write for illustrations and samples.

 Chicago.

**BRITISH PATENTS.**

(ABRIDGMENTS OF SPECIFICATIONS, 1907, FROM THE  
 Illustrated Official Journal.)

ISSUE OF AUG. 19, 1908.

9,627. WORKMEN'S TIME RECORDERS. C.  
 H. A. VERITY, Roundhay, Leeds. April 25.  
 A clock-work 3, mounted in a casing on a base-  
 plate, drives a record cylinder 8 through a shaft  
 4, a fixed boss 5 bearing a pin 5', a loose boss 6,  
 and a friction coupling consisting of a blade spring  
 11. The drum is surrounded by a glass casing 12  
 carried by a framing 13, to which the end bearing  
 10 of the cylinder is hinged, a door being provided  
 to close the end of the casing. A longitudinal  
 aperture 14 formed in the casing is covered by a

hinged lid 15 and marked at the edge with the  
 employes numbers, the time being marked in the  
 center of the record trip as shown in Fig. 4.  
 The autograph of the employe is recorded in the  
 space opposite the number and the "in" or "out"  
 division, and a mark such as 25 is made with a  
 hand stamp. The movement of the cover 15 to  
 make a record actuates a bell through the pivot  
 pin and a hammer 26. Circular racks 28 and pawls  
 29 prevent independent rotation of the cylinder,  
 and any stoppage is shown by the difference be-  
 tween the times on a clock face 22 and on the  
 record sheet. According to the Provisional Specifi-  
 cation, a pointer is provided to show whether the  
 drum has been interfered with, and the casing is  
 constructed with two apertures to allow indepen-  
 dent records to be made.

9,902. PENS. F. GOLDING, Catford, Kent. April  
 29. Grant of patent opposed.

Relates to reservoir pens of the kind which are  
 provided with a piston *e* containing a valve *h* and  
 are filled by pushing in the piston *e*, dipping the

nozzle *b* in ink, and opening the valve *h*. To pre-  
 vent the piston from being pushed back by the  
 atmosphere when it is attempted to open the valve,  
 one flange *f* of the piston is loose, and can be  
 screwed in to expand the packing *g* so that it fits  
 the barrel *a* tightly.

10,027. TIME-RECORDERS. F. M. RUSSELL  
 and A. J. JUNG, London. April 30.

In time-recorders generally and in particular  
 those used for checking workmen, of the type in

which the time is stamped upon a strip of card  
 and the hour-printing disk is moved intermittently  
 from the continuously-driven minute disk, an ad-  
 justable stop is provided to prevent overrunning.  
 The minute-printing disk *B* is driven from the  
 clock through gearing *e*, *e*<sup>1</sup>, *e*<sup>2</sup>, *e*<sup>3</sup>, and carries a  
 snail cam *A*<sup>2</sup> which operates a spring-controlled

arm *B*<sup>3</sup> pivoted on the axle of the hour disk *C* and  
 carrying a spring pawl *B*<sup>2</sup> engaging with a ratchet-  
 wheel *B*<sup>1</sup> secured to the hour disk. Overrunning  
 of the pawl *B*<sup>2</sup> and the disk *C* is prevented by a  
 screw stop *A* mounted in a pillar *a*. The gear-  
 wheel *e*<sup>3</sup> is formed in two parts provided with a  
 spring connection *D* to prevent the stoppage of the  
 clock during the operation of the recorder.

**Agreement With Japan Covering Trade-  
 Marks in the Far East.**

INFORMATION has been received at the  
 Department of State by cablegram from  
 the American embassy at Tokyo that the  
 Japanese Government had ratified the trade-  
 mark treaty between the two countries,  
 which included features in regard to goods  
 in Korea and China.

A communication from the Department  
 of State concerning trade-marks suggests  
 that the present occasion presents an excel-  
 lent opportunity to impress upon Ameri-  
 cans that in Japan the system is priority of  
 registration and in the United States a pri-  
 ority of use, and that the Japanese is the  
 one in use in a majority of countries; con-  
 sequently, every American who wants pro-  
 tection for his industrial property in China,  
 Japan and Korea should register at the  
 earliest possible moment at the Tokyo pat-  
 ent office.

Japan is disposed to recognize priority  
 of use by a liberal interpretation of the  
 existing laws, such as by refusing to enter-  
 tain wrongful registration and by even go-  
 ing so far as to cancel registrations previ-  
 ously made.

An American whose trade-mark or other  
 such right has been pirated should lose no  
 time in seeking registration and in moving  
 for the annulment of the wrongful registra-  
 tion from which his business is suffering.  
 If these points impressed themselves upon  
 those most interested, the benefits of these  
 conditions would be great, but conditions  
 can accomplish little where the interested  
 beneficiaries are too indifferent or apathetic  
 to avail themselves of the protection af-  
 forded them.

The body of J. H. McDearmon, Paducah,  
 Ky., who was drowned, a short time ago,  
 in the Ohio River, was found on the morn-  
 ing of Aug. 20, at Calidonia, about 40 miles  
 below Paducah. The body was brought to  
 Paducah and thence taken to Trenton,  
 Tenn., for burial.

# Now It's The Lord Elgin

The demand to-day is for thin watches.  
The public have been waiting for a  
thin Elgin Watch—now it's here—

## LORD ELGIN

The  
Thinnest  
Watch  
Made  
in  
America  
with  
Enamel Dial

the thinnest watch made in America  
with enamel dial.

Like all Elgin Watches—it was not  
put on the market until worthy to carry  
with it the Elgin reputation for reliability.

Every Lord Elgin is cased at the factory  
and timed in the case—the most  
accurate thin watch in America.

Four grades—7, 15, 17, and 18  
Jewels adjusted. 18K and 14K solid  
gold cases, also 25 year filled cases.

Furnished with metal dials, plain or  
engraved, gilt or silver.

Prices furnished on application by  
your jobber, or write the Company for  
only authorized price list.

Factories, Elgin, Ill., U. S. A.      New York Office, 15 Maiden Lane  
General Offices, 131 Wabash Ave., Chicago

# THE HOROLOGICAL REVIEW

## Origin and Development of Tower Clocks.

Written expressly for *The Jewelers' Circular-Weekly* by Chas. A. Brassler.

(Continued from issue of Sept. 2.)

GALILEO himself, who became blind in his old age, did not apply the pendulum accessory to the works of a clock, but Vincenzo, is said to have subsequently accomplished this in 1649; and a few years thereafter was published in a technical journal a statement that the original pendulum clock of the younger Galileo had been discovered, accompanied by a picture of it. To the Galileos belongs the credit of suggesting the pendulum, the credit for its practical application as a regulator for clocks really belongs to Huyghens.\*

Galileo erroneously believed that the long and short swings of the pendulum were isochronous or, in other words, accomplished in the same period, whereas Huyghens observed, in clock works, that the pendulum required more time for a longer swing than for a short one, and he studied the laws of oscillation with the aid of the binomial formula originated by the German mathematician, Leibnitz.

The rapid progress made in the field of mechanics, dating from James Watt, the immortal inventor of the steam engine, resulted in such a development of the art of casting iron that it became possible to cast a frame, wheels and other parts of a tower clock of cast iron. At the commencement of the 19th century, the ingenious Reichenbach had cast the cylinders of the powerful water column machines in the foundry of gun-metal, instead of iron. The required material was consequently available. Many private people, clockmakers and institutions, already possessed clocks having a very accurate rate, and the question arising whether it was not possible to construct a public clock with a rate equally reliable, experts were prompted to enter into the matter. They sought to obtain success by employing a clock-work of known accuracy to release the tower clock-work every minute or half minute.

On this principle, Liebherr, in 1821, made a standard clock for the Academy of Sciences in Munich.

In 1821 Joh. Geist, a clockmaker in Graz, Styria, employed an astronomical

Christian Huyghens, born April 14, 1629, at the Hague, where he died June 5, 1695.

clock, operated by a weight of 18 pounds, for the release of a tower clock made by M. S. Fink in 1712 and weighing 12 cwts. The release was effected every minute.

In England the advancement in the art of

JACQUEMARTS, IN DIJON, FRANCE.

tower-clock construction dates from the first exposition held in London in 1851.

The English had recognized how far behind the French they were in the construction of tower clocks, but the inequality was

there adjusted. The main work shown was the clock afterwards installed in the houses of Parliament at Westminster, the constructor of which, Sir Edmund Beckett Denison, has furnished in it a fine example for great clock-works.

It is not to be denied that this creation serves as a pattern for monumental clock-works in England. The Denison movement with its famous double three-legged gravity escapement is used almost exclusively as a model for such clocks.

In Germany and Austria, on the other hand, it is usually the Maunhardt system that is followed—the transfer of the hand movement to a separate motion-train, which at the same time takes care of the release of the striking train.

The strongly built train, with a one second to two-second pendulum, arranged with compensation, has only to take care of the release of the hand mechanism. This arrangement also allows of the restoration to operation of the time-honored complicated clocks, which is so much desired nowadays without any too radical changes in their existing constituent parts. An excellent example of this is furnished in the restoration of the clock of the old city hall in Prague in 1865, by L. Hainz, sen., and Danck.

This facilitation of the restoration to their former usefulness of the old-time complicated clocks, with their many-sided advantages, will doubtless be followed by the restoration to their former activity of the "jacks" that enhanced the attractiveness of many of the old-time public clocks.

These "Jacks" or "Jacquemarts," to give them their French title, the name being derived from a combination of the two French words Jacques (Jack) and martel, a hammer, are unquestionably an ancient institution, as established by the fact that Shakespeare in his play of "Richard III." refers to the "Jack o' the clock," and St. Dunstan's Church, in London, was famous, centuries ago, for two Jacks, that rang the hours on the big bells.

With the decadence of the complicated clock on churches or public buildings the "Jack," too, went out of fashion, but now that the old-time clocks, with the aid of the improvements effected in modern mechanism, are being restored to their former popularity, the Jack or striking automaton is finding its way into favor again.

These clock jacks were in use before the introduction of dials. Froissart speaks of a Jacquemart in existence at Courtray before 1378; and Decker, in his "Gulst Hornbook," states that the clock of the Cathedral

# WALTHAM WATCHES

## COLONIAL SERIES

These Extra Thin Watches may be had in four qualities of movements as follows:

### **RIVERSIDE; NICKEL;**

19 fine ruby jewels; raised gold settings; double roller escapement; steel escape wheel; exposed sapphire pallets; compensating balance, adjusted to temperature and five positions; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; red gold center wheel; exposed winding wheels.

### **ROYAL; NICKEL;**

17 jewels; red gold settings; exposed pallets; compensating balance, adjusted to temperature, and three positions; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

### **NO. 1425; NICKEL;**

17 jewels; red gilded settings; exposed pallets; cut expansion balance; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; red gilded center wheel; exposed winding wheels.

### **NO. 1420; NICKEL;**

15 jewels; settings; exposed pallets; cut expansion balance; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

Riverside and Royal grades are supplied in Gold and Gold Filled cases, both Regular Jointed Open Face and Calumet (Single Joint).

No. 1425 and No. 1420 grades are supplied in Gold Filled Cases only, both Regular Jointed Open Face and Calumet.

Colonial Series watches have Gilded or Silver Finish Metal Dials, as may be preferred. Solid Gold, 18k. and 14k. dials at an extra charge.

*Movements manufactured and guaranteed by*

**WALTHAM WATCH COMPANY,**  
WALTHAM, MASS.

at Paul was equipped since before 1298 with figures for striking the hours. Martin and Martine, the automatons in the shape of bronze statues of a man and a woman, who have officiated since 1382 as "Jks" in the belfry of Our Lady at Dijon, France, and are still fulfilling the same useful function, are to all outward purposes as reliable as ever, in spite of the vicissitudes of fortune to which they have been

CLOCK STRIKING SHIPS' BELLS, U. S. NAVAL ACADEMY, ANNAPOLIS, MD.

subject Philip the Bold carried them off in a town far distant from Dijon, and when they were not new. The group was increased in 1714 by the addition of a child-figure that strikes the hours on a smaller dial. We present a picture of this interesting group with the clock, of which they constitute an adjunct, and may remark that they present quite a youthful appearance—a couple that has been before the pub-

CLOCK IN JERSEY CITY, N. J., HAVING LARGEST DIAL IN AMERICA.

since about the time of the birth of Christopher Columbus.

Other notable specimens of striking "Jacks" are to be seen at Compeigne, Avignon and Cambrai, France; London, Wells, Lancaster, Blytheburgh, Southwold, Wimborne, Norwich, etc., in England, while the most beautiful examples extant are probably the two Moors of San Marco, Venice. The clock and bell tower of Berne, Switzerland, also has a Jacquemart which, shortly before the striking of the clock, of which it is an

attachment, tolls a bell that is adjacent. While the public clocks of our younger country are necessarily more modern than those that have helped to make the ancient cities of Europe attractive to the traveler and the antiquarian, America is not lacking in interesting examples of the public timepiece and in a land where time is so intimately associated with money, the accurate performance of these clocks has received especial consideration.

Probably no clock the world over furnishes the "time o' day" to so many people as the one that occupies the tower of New York's City Hall. Dominating a most attractive example of the art and skill of one of the world's most famous architects, re-

CLOCK OF THE FAMOUS INDEPENDENCE HALL, PHILADELPHIA, PA.

owned especially for his classic productions, it was installed in the year 1859, so that in 1909 the movement will complete half a century of continuous operation. Visible, owing to its position in City Hall Park, from every direction, its four dials mark day and night for passing multitudes the flight of time, the record it furnishes being regarded as authentic alike by Gothamites and by dwellers in adjacent cities.

Another clock to which fame is imparted by the historical interest of its surroundings no less than by its remarkable accuracy, "marks time" in the cupola of Independence Hall, in the city of Philadelphia, the very cradle of the nation's liberty. It was presented by a public-spirited citizen in commemoration of the centennial of the nation's independence in 1876, and has a

record of not varying more than one to two seconds per month from "mean time." The frame of the clock is about 10 feet long and eight feet high, its total weight being about 6,000 pounds, while the deep-toned bell on which it strikes the hours weighs 13,000 pounds. The pendulum consists of a "bob" weighing upwards of 700 pounds, swinging on a rod 14 feet in length; the dials, 10 feet in diameter, are illuminated after dark so that at all hours of the day or night its record is available to the residents of the City of Brotherly Love.

Unique of its kind is the clock that occupies a conspicuous place in the façade of the Academic building at the U. S. Naval Academy, Annapolis, Md. This clock rings the hours by "bells," as on board ship, so that hearing its sonorous notes the cadets will become accustomed to the method of dividing time that prevails afloat; it is believed to be the only tower clock in this country sounding ship "bells," although similar timepieces have been made for installation on board ship.

The public spirited individuals, to whom the people of a few hundred years ago were indebted for the first public clocks, to replace the stroke of the bell, the blast of the whistle or trumpet or the watchman's quaint chant, would be astonished at the latest development of the public clock, as displayed on the roof of a large factory in Jersey City, N. J. This clock, which was made by the Seth Thomas Clock Co., is the largest in America and was illustrated and described in the issue of THE CIRCULAR-WEEKLY of April 1, but as no illustration of the timepiece as installed appeared in connection with the description, we present one herewith.

It would seem as though it would be an easy matter for the enterprising local jeweler and watchmaker by making a propaganda among citizens of wealth not averse to having their names handed down to posterity as public benefactors and contributors to the attractiveness of their place of residence, to obtain the erection by them of such public clocks either in their simple or complicated form, while by the gift of such a clock, especially if the public funds are low, the donor will ingratiate himself into the good feeling of his fellow citizens as much or more than by any other form of donation.

As for the watchmaker or jeweler whose efforts result in the erection of such a clock, while he does not make the clock and consequently there may not be anything in it for him directly, he is likely to profit to some extent by securing the contract and by the subsequent care and maintenance of the timepiece. Frequently the municipality itself, if funds are available, will be found willing to make an appropriation for the purchase of a clock.

[THE END.]

Burglars recently broke into the store of the Fillmore Jewelry Co., in Fillmore, N. Y., and stole \$1,500 worth of stock and several hundred dollars cash. The intruders are supposed to have escaped in a freight train which passed shortly after the theft. It is supposed that they have gone to Pittsburg.

# Brooch and Case Combined

MANUFACTURED EXCLUSIVELY BY

## DUBOIS WATCH CASE CO.

MAKERS OF

### FINE SOLID GOLD WATCH CASES

Pat. June 9, 1908  
P. P.—No. 41

Specialties in Casing of Chronographs, Repeaters and all Kinds of Complicated Swiss Watches

21 and 23 Maiden Lane

New York City

The Only Safety Chatelaine Case which enables a Watch to Keep Correct Time and Cannot be Lost

#### MERITS

Holds the watch firmly and securely, thus preventing the movement from being jarred; as there is no swinging or bobbing up and down while the wearer is walking or running. Protects both the case and garment from wear.

*Absolute Security*

#### UTILITY

It can be raised so as to read the time, and reverse to have either the dial or back facing front, without removing brooch pin or watch from the garment. Can be worn on the shoulder, belt, chain or fob.

*Will not pull or wear off*

Patented U. S. June 9, 1908.  
Patents Pending in Foreign Countries.

MADE FOR ALL SIZES OF LADIES' WATCHES, BOTH OPEN FACE AND HUNTING

#### Artistic and Practical

The only brooch and watch combined. Affords absolute security, as it has a safety catch. Nothing to wear out, as it works on friction bearings. Eliminates the possibility of loss of the watch owing to either bow, hook, swivel or link wearing out, breaking or coming apart, as in the old style chatelaine. Does not interfere with either winding or setting of movement.

Watch worn as Chatelaine, showing it lifted to read the time.

Licensed Under Wächter Patent. Patented July 25, 1905; May 21, 1907

Watch worn on chain as a pendant, pressed to garment as additional security

## A CATECHISM OF THE LEVER ESCAPEMENT

Being an Informative and Instructive Series of Questions and Answers for Watchmakers and Apprentices.

(Written expressly for THE JEWELERS' CIRCULAR-WEEKLY by T. J. WILKINSON.)

(Continued from issue of Aug. 26.)

### TEST C, CASE D.

THAT we always employ Rules I. and II. as preliminaries to escapement examinations will be learned from our former lessons. Having observed these rules, we place the balance in position, and under it place a wedge so it will stay in any position we desire. Next rotate the balance, bringing the roller jewel slowly into the lever notch and causing unlocking of tooth and pallet. The instant a tooth drops on the opposite pallet, cease rotating the balance, and, with a watch oiler, lift the lever off its banking to the extent to which we are able to lift the lever away from its banking guides us in forming an idea as to the freedom which exists between the corner of the lever notch and the roller jewel. A like test should be made of the action of the roller jewel with the corner of the notch. What the extent of this freedom should be can only be learned from actual experience.

### TEST C, CASE S.

Supposing that Rules I. and II. have been conformed with, the balance in place, and a wedge placed under the balance as directed, we allow a tooth to drop on to the opposite pallet, and then, with a watch oiler, lift the lever off its bank. In this instance we are unable to lift the lever or lift it only to a very slight extent. Remembering this, we pass on and examine the opposite position where we find the same condition present. Fig. 104 shows the fault; the reason we are unable to lift the lever away from its banking is that the roller jewel is in contact with the corner of the notch as shown in the drawing. This difficulty may be due either to the pallet lockings being too light, or the acting length of the lever being too long. If the lockings are too light this defect can easily be seen and remedied; if we decide they are sound, we must cut the corner of the notch as directed in previous tests. Recourse to tests B and D would be had before making alterations; so test P should be employed in all cases where shortening the acting length of the lever is attempted.

### TEST C, CASE T.

Having put Rules I. and II. in operation, and the balance having been wedged and put in place, we allow a tooth to drop on the pallet's locking face, as before. Then, with a watch oiler, lift the lever off its banking. This we find we can do to an undue extent. A test on the opposite side reveals like conditions. The error before is due either to the pallet and tooth lockings being too deep, or the acting length of the lever is too short. This latter condition is not often met with. The error is chiefly found in deep lockings. Correcting the lockings allows us to further close in the bankings to their new position of drop lock. In this way we usually cure the trouble. At times, however, we have a combination of conditions; for instance, we

may find too much freedom between the corner of the notch and the roller jewel on one side, while on the other, no freedom can be detected. When such is the case, use tests B and D to confirm the findings and throw light on the cause of error. If we find the error to be due to irregular lock, viz., deep on one pallet and light on the other, then correct their deficiencies. Should we still find that the roller jewel binds on the notch, try test A. Should this test show the guard pin as tight on one side, a slight bend to the lever will set matters right. Should test A not indicate that any correction is required, again use tests B, C, D and P, and from the informa-

FIG. 104.

tion they supply, cut that corner of the notch which binds the roller jewel. Everything being corrected, follow out the instructions in Rule VI.

### TEST D, CASE T.

In every instance follow Rules I. and II.; this done, replace the balance and place a wedge under it; then slowly guide the roller jewel into the notch. The moment the roller jewel comes in contact with the side of the notch, cease rotating the balance. It is wise to remember that the roller jewel must not in any way lift the lever. It must only rest lightly against the side of the notch. With this clearly understood, we proceed with our test by taking a watch oiler and lifting the lever off its bank. The extent to which we lift the lever indicates the freedom which the roller jewel has from the corner of the lever notch as indicated in Fig. 100; a test of the opposite side of the notch with the roller jewel should show similar conditions. This test, it will be seen, resembles Test C; the deductions to be made from the results found exactly conform to Test C, hence they call for no further treatment. We desire to lay stress on the importance of observing Rule II. when Test D is used; also Rule VI. when an escapement examination is completed.

(To be continued.)

Japan has 32 timepiece factories, which turn out annually goods valued at nearly \$800,000; the latest figures being 209,792 standing clocks, 141,755 hanging clocks and 25,360 watches.

The Seth Thomas Clock Co. have just issued 25,000 new catalogue supplements containing cuts and descriptions of a number of new additions to their extensive line of clocks.

## Wire Clamps for Retaining the Wheels of Striking Clocks.

THE device illustrated in Fig. 1 is capable of rendering very acceptable service in putting together striking works in which the wheels and pinions are designed to accompany one another—in other words, must mesh together, as regards certain teeth. If in such a clock, for instance, the spring is broken, the wheels, on the removal of the top plate, fall into confusion, they must all be taken out and correctly replaced.

In such cases, says Alfred Schneider in the *Deutsche Uhrmacher Zeitung*, these clamps, which are bent up in brass wire, do excellent service. As shown in Fig. 2, they are sprung onto the arbor of a wheel and that of the pinion meshing with it, and hold the two parts in place. If, before taking the clock apart, two or three such clamps are applied to the respective parts, and the top plate is then carefully removed,

FIG. 1.

FIG. 2.

the wheels interlocked remain standing in place on the bottom plate. This plate, with the wheels, can then be put aside, the barrel taken out, the new spring put in place, the barrel replaced and the top plate put on again without the striking works wheels having been disturbed in their original meshing.

When we have such a clock to clean, these contrivances are a great convenience in putting it together. The wheels are simply set up in mesh, according to the marks made upon them, on the lower plate, connected by means of the clamps, and the upper plate put in place, following which the striking works are at once correctly reassembled.

This simple, helpful device, according to the author, has not as yet been marketed. With its help it is possible in many cases to save a great deal of time, especially when we have a clockwork with projecting bushings, which may make it quite difficult to put together.

At the entrance of the Chamber of the Seraphin in the Royal Palace in Stockholm, says the *Philadelphia Ledger*, there is a clock which was the late King Oscar's especial pride. It represents a lion held in leash by a youth, both of which figures move with the clockwork in the most natural fashion. It was a gift from the explorer, Nordenskjold.

A miniature model of a grandfather's clock has been made by Charles C. Snow, Bath, Me. The clock stands about 30 inches in height and has a moon face and brass works, with hand made weights and works. In every way the proportions are identical with the larger size clocks. It is a valuable timepiece and one that will undoubtedly be highly cherished.

# Large Watches

FOR

**AUTOMOBILES,  
CARRIAGES,  
DESKS and  
TRAVELING**

FOR the above purposes we offer a line of watches which possess really remarkable selling qualities. They are one or eight-day watches, keeping remarkably accurate time under all circumstances, and so substantially built as to successfully withstand the jar of an automobile.

For many reasons we believe them to be the best watch of the kind on the market, as they are not only very well made and bear all the marks of good, careful workmanship, but the model is a very attractive and "snappy" one.

They are extremely convenient, and appeal strongly to the traveler because they are so compact that they take up but little room in a traveling bag, which makes them more desirable than the regular French traveling clocks.

They are built to stand rough usage, as they can be turned upside down or in any other position with no danger of their getting out of order.

No line of watches for the purposes mentioned can possess more elements of salability, as in style, appearance, convenience, good workmanship and accuracy they are everything that such a timepiece could be.

Just at this time of the year you ought to have these in stock.

### Special Railroad Movements

To secure and hold the railroad trade there is no more attractive and permanently satisfactory line than the V. & C. Special Railroad Movements.

The watches in question have been in use for many years by a great many railroad men on all important lines in this country, and have shown a degree of accuracy and reliability which is unparalleled.

Many railroad watch inspectors have assured us that the rigid requirements of a railroad watch are met by the V. & C. to a degree which is beyond criticism, and which places the line in a class by itself.

You should have a representative showing of these railroad movements—17 to 21 jeweled, adjusted to heat, cold and position, and lever set—in order to get your share, and more than your share, of this most desirable class of business.

# STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

## How to Make the Most of the Show Window

Written expressly for The Jewelers' Circular-Weekly by Otto Jonas

THE average retail merchant does not work, to its fullest capacity, his show window—his best and least expensive advertising method, for although all other advertising—that is, properly placed—will bring in a generous amount of business, no other means of reaching the buying public will result in such quick and direct returns as show windows attractively dressed and frequently changed, if they are reinforced by judicious newspaper advertising.

Equal in importance to having a tastily arranged window is to have a live one—that is, one in which there is always something different from that which one's competitors are offering—some specialty that attracts attention and makes sales, either because of its novelty or on account of being low-priced. Too many retailers are prone to adopt some one style and stick to it, year in and year out. They would be astonished at the beneficial results of changing the displays and the method of their arrangement as frequently as possible.

Don't ape the style of window dressing in general use in your particular line of trade. Be distinctive. To do this does not require a large expenditure, but some use of the gray matter in your head and a few extra hours' work a week, but the results attained will more than repay you for the labor.

Good ideas may frequently be picked up by observing the windows of merchants in other lines of business and adapting them to meet one's own needs.

Some suggestions as to how changes may be made are given herewith. For instance, your window base may be arranged as a flat or a slanting platform, as straight steps, as semi-circular steps—flat with a central pyramid, etc. All the old and other changes of base can be made quickly and easily by having on hand a few nice strong, small boxes, some floor boards and a box of small nails.

The boxes can be placed to suit and the boards laid in position to form the desired effect and tacked together. After a little practice one acquires the knack of doing this work and many new ways of building the platform will suggest themselves.

Several pieces of cloth—each of a different color—are also convenient things to

have on hand, so that whenever a change of platform is made a covering of different hue can be draped over it. These cloths should be of good material, for if care is used they will last a long time. Be sure that the price cards used are distinctly worded, as the silent salesman (*i.e.*, show window) can only do efficient work if prices are plainly stated. The use of glass shelving is recommended, as it always looks neat and is easy to clean. Some goods can be most effectively shown on a large mirror, used as a window base.

Almost every retailer makes special shows for the more prominent holidays, but few merchants make a practice of keeping their window displays always seasonable. Many of the minor holidays can be exploited to great advantage and the seasons suggest another set of ideas. The various sports—baseball, football, racing, golf, tennis, skating, etc.—all suggest certain goods, and many times there are local festivities that could be advantageously recognized. Carefully watch results from your window and you can soon determine which points catch the eye quickest and this will be most valuable information, as one need not place the easy-selling articles in the most prominent positions, but rather reserve these places for those goods one is most desirous of "pushing."

Unless your window is so constructed that goods may be easily reached, be careful not to place any article therein unless duplicates are in stock, as nothing more quickly destroys the confidence of the average buyer than a failure to produce the same goods as are advertised in the window. Avoid crowding your window, show as much variety as possible, but give each article a distinct place.

Remember that window dressing is an art which can be mastered by any one who has sufficient patience, energy and self-interest to give it a fair share of his leisure time.

Among the \$200 worth of goods stolen from the store of John Ott, 622 Seventh Ave., Altoona, Pa., recently, were a quantity of cuff buttons and stick pins. Entrance was effected to the store through a coal hole in the sidewalk.

## The Way of the Enterprising.

A DIAMOND sale that has attracted considerable attention is being conducted by F. M. Noe, Indianapolis, Ind. The show window is filled with diamond rings, the price of which is to be marked down \$1 each until sold. Mr. Noe states that in addition to the advertising derived from the sale, many sales have already been made.

\* \* \*

Miss Lillian B. Hill told a number of Duluth jewelers, at a recent jewelers' meeting, a good way to get off for a vacation without being missed from business. "During the last holiday season," she said, "I met a jeweler at a seaside hotel. 'What do you think of my business?' 'I thought you were such a busy man!' 'How do you manage your affairs here?' 'Oh,' said he, 'I am just putting my advertisement out of the paper until my return, and so you see there are no affairs to manage.'"

\* \* \*

Fred Brodegaard & Co., Omaha, Neb., have placed numerous articles of jewelry, cut glass, etc., in their show windows marked them: "Any article in this window \$1." The idea has attracted considerable attention and proven very successful.

## Current Business Philosophy.

SOME of the best and most profitable advertising never induces a sale. But if advertising be rightly done, it so enlightens possible buyers and so enhances the article in their esteem as to insure it, in the long run, profitable. Advertising may not bring visible results every day in proportion to its cost, any more than a salesman does, but that advertising selling help stands squarely on all fours there is no longer any doubt. *—S. Magazine.*

The trade of the moneyed class is desirable, but don't get the notion of running a store for one class of customers unless that class is large enough to support the business you want.

The man who bides his time, who commended a good deal, but it was watched one of those men who had time and succeed in the end, you will find that while they wait they labor. *—Printers' Ink.*

F. L. Hopper, Belton, S. C., returned recently, from a purchasing trip to Baltimore where he has gone in the interest of Tate Jewelry Co., in which he is interested.

**Storekeeping Department.**

**Jewelry and Optical Establishment of Berman Raff, New York.**

VIEW of the show windows and the façade of the retail jewelry store of Berman Raff, at 453-455 Sixth Ave., New York, is illustrated herewith. The establishment is 40 feet wide and 65 feet deep. There are four attractive show windows, each being seven feet wide and five feet high. There are also two entrances to the store.

The first window, from left to right, is devoted to diamonds, watches and jewelry; the second window to cut glass and optical goods, the third window to cheap watches, and the fourth window to cutlery, leather goods and musical instruments.

The front of the establishment is painted a rich dark maroon color. There is a large illuminated lettered sign extending all the way across the building. The woodwork of the interior is of quartered oak. A well equipped optical department is located in the rear of the jewelry store.

**Pointed Paragraphs.**

Isn't the largest ad. that is the best ad. What would you think of a man who wears the largest size pair of shoes in order to get the biggest value. The shoes must fit the ad. must fit.

Between the drilling of the plebes and the marching of the highest class lies a vast amount of routine that wasn't fun. The work that makes any success may not be fun but it's absolutely necessary.

Don't tie yourself to the wrong side of the street just because you have been there a long time. It takes a radical change to make a big success. If you want to be ahead, do something noticeable.

In new lines of goods is where the profits are. The old standbys that every dealer has have the prices all cut to pieces on the part of the dealers and thus make the bigger profits.—E.R.

**The Jewelry Business in the Island of Jamaica.**

PRIMITIVE methods are used to manufacture jewelry down in Jamaica. The articles made are principally of silver. There are few jewelry establishments on the island, there being practically no gold articles offered for sale, outside of Kingston, where there are several good stores. George W. Dunbar, of the Geo. B. Barrett Co., of Pittsburg, Pa., visited Jamaica recently, and was much impressed with what he saw, especially in Port Antonio, where his attention was directed to a jewelry shop.

JEWELRY STORE IN JAMAICA.

medallion, which covers a hole punched in the left nostril. On Sundays and festival days the medallion is removed and an immense nose ring, which hangs below the nose, is inserted in its stead.

This together with rings, anklets, bracelets and necklaces make up an attractive attire.

The merchants outside of Kingston do not display any jewelry in their shops or carry any stock whatsoever. The interior of the shops is nothing more than a workplace. An inventory made by the visitor disclosed that their equipment consists of antiquated rolls and swedges, devices for

WEARERS OF JAMAICAN JEWELRY.

Attracted by the name of the proprietor, painted on the side of the building, a photograph of which is here given, Mr. Dunbar entered and found several men engaged in making silver articles, but saw no goods displayed. The workmen were busy melting silver coin, making wristlets, anklets, bracelets and necklaces into different designs, according to the taste of the person ordering them.

The workmen used a blow pipe and charcoal to fuse the silver, the blowing being done by mouth power. The silver in its heated condition is hammered with a swedge by hand into the form desired and approved by the Indian taste, for most of the customers of the Jamaica jeweler are natives of India—coolies, who are imported from India, and hired under contract to those persons who desire to engage their services.

The women natives all wear huge bracelets. During week days they wear a silver

making jewelry, primitive charcoal furnaces and work benches.

Many of the natives are well educated, being graduates, in some instances, of American institutions. The coolies are, in most part, the principal customers of the native jewelers and are brought to Jamaica under five-year contracts. They work for a shilling a day. Most of the men bring their wives with them. A premium of \$150 a head is paid for their importation. When they refuse to work, they are put in jail.

Mr. Dunbar says that he believes there are opportunities in Jamaica, and recent events show that the English have sent salesmen into that territory. Most of the jewelry sold in Kingston is of the very poorest quality.

Henry J. Harm, Albert Lea, Minn., has installed 11 new plate glass counter show cases. The store is now one of the most attractive in southern Minnesota.

# WORKSHOP NOTES AND QUERIES

Answers are also solicited from our readers to the questions published on this page. Attention paid to communications unless accompanied by full name and address of the writer.

**QUESTION No. 2209.—Silver Plating Leaves and Flowers.**—We want to silver some leaves and flowers. We want to them for making moulds and casting out of soft metal. Kindly give us a formula for doing this. S. & P.

**ANSWER:**—Flowers and leaves may be plated with silver with the electro-deposit-process. A covering over the non-metallic flowers is required to make them suitable for the electric current. This covering consists of wax, one ounce; spirits of turpentine, 1½ fluid ounces; india rubber, 1 dram; asphalt, one ounce. The rubber and asphalt are dissolved in the turpentine, wax is melted and added, and the whole stirred together. Add to this one ounce of a solution of phosphorus in bisulphide of carbon in the proportion of one part of former and 15 parts of the latter. The leaves to be treated are attached to a wire and dipped for a few moments in this solution.

They are next dipped into a weak silver solution until the article appears black, then rinsed off, placed in a silver solution and the current is turned on, when a silver deposit is obtained. Another method described by C. P. in the *Metal Industry* is as follows: Coat the surfaces by dipping in a solution of denatured alcohol, 12 ounces; nitrate of silver, one ounce, slightly warmed, and allow to dry in a normal temperature. Now prepare a solution of phosphorus in bisulphide of carbon in the proportion of one ounce of yellow phosphorus to 12 ounces of the bisulphide of carbon. Proceed as before by dipping the articles in this solution. The metallic silver is thereby deposited, and as soon as dry the objects are ready for immersion in a copper bath and electric current. They may afterwards be plated in silver.

**QUESTION No. 2210.—Jewelry Wash.**—You give us a receipt for making a slow-acting jewelry wash which, when cold, is like a soft jelly, and when heated becomes a liquid. It has an odor that suggests ammonia, and that is the only substance we know there is in it. E. J.

**ANSWER:**—The jelly-like substance may consist of washing powder with the addition of ammonia. Take Gold Dust washing powder, add water to it and boil, making the consistency jelly-like when cold and liquid when warmed; to this add a portion of ammonia. This combination will remove tarnish from gold. It is best for gold jewelry to use a slow-acting dip. It does not roughen the articles as does a quick-acting dip, and is therefore considerably more desirable. A regular preparation consists of bicarbonate of soda, two ounces;

chloride of lime, one ounce; common salt, one ounce; water, 16 ounces—well mixed together. The jewelry can be left in this for a short time, or may be used by applying with a soft brush. If the articles are much discolored and require a stronger treatment, then it is best to warm the solution.

**QUESTION No. 2211.—Bright Cutting Platinum.**—Will you kindly advise me whether there is any method of bright cutting platinum? If so, kindly state how it is done. Thanking you in advance for the favor. G. C. B.

**ANSWER:**—For bright cutting platinum the engraving tools should be sharp and the cutting edges brought to the highest polish that is possible. The bright cut can only be produced by the high polish of the cutting point, which applies to all metals. But with hard platinum or aluminum it is necessary to dip the point in oil of turpentine to act as a lubricant. To bring the graver to a high polish it is best to secure a glass plate, to which has been glued a piece of the finest crocus cloth. They can be purchased from the material supply houses.

## Jewelry Repairing.

(Translated for THE JEWELERS' CIRCULAR—WEEKLY from the *Deutsche Uhrmacher Kalender*.)  
(Continued from issue of Sept. 2.)

THE following are some of the favorite alloys for the different solders:

### (I.) SILVER SOLDER.

(A)—This is a very hard silver solder, which is used on articles which have not been previously soldered:

- (1) Fine silver, 4 parts; copper, 1 part.
- (2) Fine silver, 2 parts; copper, 1 part.
- (3) Fine silver, 4 parts; brass, 3 parts.
- (4) Fine silver, 19 parts; brass, 19 parts; copper, 1 part.

As brass is composed of copper and zinc, it is added in the place of these two metals, as practical men claim that this mode of alloying makes the solder more fusible.

But, while such might be the case, the solder thus alloyed is less ductile and elastic.

(B)—This is an easily fusible silver alloy, for use on articles which have already been soldered with hard silver solder:

- (1) Low silver, 750/1000 fine, 16 parts; zinc, 1 part.
- (2) Low silver, 750/1000 fine, 7 parts; zinc, 1 part.
- (3) Low silver, 750/1000 fine, 16 parts; zinc, 3 parts.

Another hard silver solder containing fine silver is the following:

- (1) Fine silver, 16 parts; brass, 4 parts; zinc, 1 part.
- (2) Fine silver, 16 parts; brass, 5 parts; zinc, 1 part.
- (3) Fine silver, 2 parts; brass, 1 part; zinc, 1 part.

Still another easily running silver solder contains:

Low silver, 800/1000 fine, 60 parts; brass, 30 parts; spelter, 10 parts; (spelter is chemically pure zinc).

### (II.) GOLD SOLDERS.

The use of fine gold in making gold solder causes it to be very hard to fuse. The addition of silver, copper and zinc makes it more fusible and different in color—red, yellow or green, according to the different proportions.

(A)—Objects to be soldered by hard solder should be at least of 14-kt. gold or of a finer grade, as only such are adapted to be colored, where lower solder would turn black.

### HARD SOLDER.

- (1) Fine gold, 16 parts; fine silver, 2 parts; copper, 8 parts.
- (2) 18-kt. gold, 8 parts; fine silver, 2 parts; copper, 1 part.

(B)—Easily fusing solder for objects 14-kt. fine. The No. 2 is useful for objects of 14-kt. or a little less, and especially for yellow gold, which is similar in color to the solder.

- (1) Gold, 14-kt., 3 parts; fine silver, 2 parts; copper, 1 part.
- (2) Gold, 14-kt., 10 parts; fine silver, 5 parts; zinc, 1 part.
- (3) A mixture of even parts of silver solder and 14-kt. gold.

### III.

Soldering is done with the assistance of a flux, which keeps the surfaces to be soldered clean and prevents oxidation by excluding the access of air. The number of fluxes is large, and their efficacy depends on the selection of that best adapted to the kind of metal to be treated. The principal fluxes for soldering gold and silver are borax, phosphate of soda and so-called soldering fluid. It is important to know the relative properties and effects of a flux in order to be able to use it advantageously.

Borax consists of colorless crystals. It can be dissolved in cold, or, better, in warm water, and has a slightly salty taste. As a chemical term it is called a double boric acid soda, which is a combination with soda as a basis called "boric acid."

[THE END.]

## A New Aluminum Alloy.

A NEW aluminum alloy, having several admirable qualities, has been patented (May 5, 1908) by Water Gosmann, and by him assigned to Fried. Krupp Aktiengesellschaft, of Essen-on-the-Ruhr, Germany. The alloy consists of about 87 per cent. of aluminum, 8 per cent. of copper and 5 per cent. of tin. The content of copper in the alloy may vary between 7 and 8.5 per cent., and the content of tin may vary between 4.5 and 5.5 per cent. It can be easily cast and it is claimed the castings are completely homogeneous, and have relatively high rigidity; they can be easily worked and the finished articles have a beautiful, lustrous appearance—*Metal Industry*.

## Growth of the Glass Ware Industry in the United States.

By Hugo Pick, in the *American Business Man*.

SOMEONE—I think it was a newspaper man—once asked me how much glass, reckoning in dollars and cents, was sold in the United States every year. My answer was: "If you will tell me how many grains of sand there is in the seashore, or how many drops of water in the oceans, perhaps I can answer your question."

No one man can tell how much the glass of the country amounts to yearly, but the aggregate is something tremendous, going into the millions of dollars, and even hundreds of millions. It is used for many purposes—for articles of utility, for purely ornamental purposes and for purposes that combine ornament and utility. There are thousands of uses to which glass is applied, and some in which it is indispensable. Take the incandescent electric light bulbs, for instance. If it was not for glass, the light would be an impossibility. Look at the miles upon miles that enter the show cases, into windows, into bottles, and even into sidewalks. No one man can enumerate the different purposes to which glass is applied, and no one man or company handles glass for all the different purposes to which it is applied. Dealers in glass have to specialize, the same as physicians do in the practice of medicine, or lawyers in the practice of law. Hence you will find large concerns who do nothing but make stained glass windows, and the sales of some of these windows will run into the thousands of dollars. Other concerns will handle nothing but glass to be used in connection with electricity, and others nothing but looking glasses. One concern, for instance, handles a large amount of glass for table ware, as well as supplies for hotels, restaurants and bars. Other firms do a large trade in what is called glass ware for "scheme" houses, or firms that use the glass ware for premium prizes. These various supplies will represent several thousand different styles and many varieties of glass. For all glass is not alike, and there are almost as many variations in the quality as there are in the uses to which it is applied.

The United States is a great producer of glass, and always has been. Glass was made here before the Revolutionary War, although at that time only the cheaper grades of glass were made, because of the lack of skill and knowledge on the part of the manufacturers. We have made tremendous strides since that time, until now in

certain products and grades of glass ware the United States is supreme. But for certain characters of glass the Europeans still hold the supremacy, notably France and Belgium, which turn out the finest and most costly glass ware that is made, and the product of these two countries has a world-wide renown for its superior excellence. In the manufacture of rich cut glass the Americans are the first in the world.

The manufacture of glass and glass ware in the United States is centralized in a comparatively small territory, known in the trade as the Pittsburg district. This comprises portions of Pennsylvania, West Virginia, Ohio and Indiana, the reason for this close grouping of the industry being largely due to the discovery of natural gas, and partly due to the grouping of the skilled labor required in that section of the country. A cheap supply of fuel is an essential in the manufacture of glass, and the discovery of the great natural gas belt gave an enormous impetus to the industry in this country. Scores of thriving towns have grown up in this district and many thousands of men have obtained employment because of the gas discovery. Capital was quick to see the profits that could be made in the business with this cheap fuel, and plant after plant was established. With the influx of capital came science and invention, with the result that in many branches of the industry within the past 20 years there has been a complete revolution in the processes of manufacture, which have enabled the American makers to enormously increase their output with a corresponding lessening of cost. In spite of this fact, however, and the protection that is afforded by a tariff of 60 per cent., the foreign glass-maker is able to place his goods in this country in competition with American makers, on certain grades of glass. The cheaper labor of Europe helps to offset the greater efficiency of American workmen and methods and our cheap fuel supply.

In making glass the fires must never be allowed to go out and the work is on the "continuous performance" plan. Once the fire it lit under what is called the "pot," it burns without cessation until it is necessary to make repairs. The flame may burn a year or more at a time before this is necessary, and in the meantime that "pot," with relays of men working in shifts, is constantly producing glass. In recent years the diminishment of the pressure in the

gas belt has been such that many manufacturers have had to supplant it with other fuel, and now one will generally find in close proximity to some of the glass works great tanks which contain thousands of gallons of crude petroleum, the abundance and cheapness of which has enabled the manufacturers to withstand the failing gas supply.

Glass ware, such as is used for drinking purposes, in the shape of goblets or glasses, is made in either one of two ways. It is either pressed or blown. The first is the cheapest process and the goods turned out by it are a little better wearing than the blown goods, but the blown goods are the most popular for drinking purposes, whereas for table ware the pressed is used almost entirely. Almost anyone can tell the difference between blown and pressed glass at a glance. Pressed glass is thick, whereas blown glass is thin. Flick the rim of a blown glass goblet with the finger and a clear, bell-like sound is produced, vastly different in its musical tone from that produced by pressed. It fitting up a hotel or bar with glass the cost will depend altogether upon the taste of the purchaser, and the quantity he buys. He can buy glass for a few cents apiece or for a dollar apiece. He can easily spend \$500 or he can keep the expense largely below that figure. The cost will vary according to the location and character of the place.

Blown glass ware can be bought plain or decorated. If the purchaser so desires he can have his plain glass ware decorated in any style that he may choose. He can have his name or initials or an emblem placed upon every article. This can be done for him, the cost depending entirely upon the amount of work that it takes. Pressed glass ware is decorated in figured patterns and sometimes with colored effects. The Belgium and other makers have designs that are called rock crystal. They are noted for their beauty, and are faithful reproductions of the work of nature.

There is another way of decorating glass ware, which is known as the deep plate acid etching. The designs for this work are first engraved on a steel plate, which is inked, the same as for a steel engraving, and then an impression is taken on a piece of tissue paper and this is transferred to the glass. This will leave a layer of ink around the glass, except where the pattern is, which will be perfectly clean. Then the remainder of the glass is given a coat of paraffine, and the glass is immersed in a bath of acid. The acid will not touch either the ink or paraffine, but on the clean surface which shows the pattern it will eat its way to any required depth. This process

11 John St., New York

is only used where the design is of an irregular or geometrical nature. When you have a set of glass ware of this kind all decorated in the same patterns the cost mounts up, because for every variation in the circumference of the glasses a special plate has to be engraved of exactly the same length as the circumference of the glasses. If there are 18 different sized glasses in the set this means that 18 plates have to be engraved for their decoration, and these plates are expensive.

Another process of decorating glass is by means of a needle which operates on a machine. This is an automatic arrangement and is only applicable to certain designs, such as scroll work, loops, etc. The design, after being selected, is applied to the machine, and the glass, which has first been coated with wax or paraffine, is then moved in contact with the needle, which removes the paraffine, leaving the glass decorated through the desired pattern. You can feed a *crème de menthe* glass into this machine or a wide champagne glass, and the machine will automatically adjust itself to the varying circumferences, so that when the ends of the pattern join on the glass the connection is perfect. After the needle has finished its work the glass is then dipped in an acid solution, which acts on the exposed glass. Glass decorated in this manner is considerably cheaper than the rock crystal, but lacks the indescribable beauty of the latter.

One of the largest glass factories in the world is that of Val St. Lambert, in Belgium, whose goods have a world-wide reputation. These works have been in operation for some hundreds of years. The art of glass-making is regarded as more or less one of the mysteries abroad, and they have long guarded the secrets of manufacture which are jealously guarded. The trade runs in families and it is almost an impossibility for one not born to the business to break into it. Hence at Val St. Lambert you will find that the men working in the plant are descendants of the stockholders and employees of a century or more ago. A couple of centuries ago it was deemed so necessary to guard the secrets of the craft from outsiders that a wall was built around the plant to keep out strangers, and this wall still remains—probably the only town in Europe of the kind.

With the wealth that abounds in the western part of the United States one would naturally suppose that hotels and bars in that section of the country would indulge in the most expensive kinds of glass ware. The reverse is the case. Take New York as an illustration. As a general rule, New York buys the cheapest thing it can obtain in glass ware. As you come west the quality grows better. Chicago buys a very high grade of goods, but the farther west you go the higher is the grade demanded. When you strike the mining camps of the west there is nothing too good for them. You can go into a little frame one-story building in a western mining camp and see a display of glass ware that cannot be exceeded. Why this should be so I do not know. It may be due to the fact that a drink costs about twice as much out there as it does in the east, but most probably

it is due to the lavishness of the western character.

While there is no "trust" in the manufacture of glass ware and consequently no application of trust methods to the trade, the majority of manufacturers are members of an association which regulates trade questions. Some years ago things were vastly different. Then a jobber was compelled to buy of members of the association alone. If they found that he was buying of an independent manufacturer the members of the association might refuse to sell him goods. They further "cinched" their hold on the jobbers by allowing them rebates which were based on the amount of the jobber's yearly sales, and this percentage of rebate increased as the sales increased. If the jobber bought of the independents, however, he forfeited his rebate. Under this condition the jobber naturally confined his trade to the association members.

Things are different now, however. While the association still exists there is no prohibition on the jobber buying from anyone outside it. But the association members still retain their hold on the trade, because they now allow the jobber a larger rebate on his year's purchases, thus making it the jobber's interest to confine his purchases to the association's members.

Labor is a big item in the cost of making glass, and the glass workers have a strong and well-organized union. As a consequence they are among the best paid artisans in the country, the wages of the glass blowers being from \$40 to \$50 a week for the best. There is comparatively little glass made in this country by non-union labor.

Glass ware is sold in two ways—by traveling salesmen and by catalogue, or mail-order methods. It may appear a difficult thing to carry a sample line of glass ware comprising hundreds of specimens around the country, but there are special sample trunks made especially for this purpose, and it is astonishing the amount of material that can be packed in them. Every inch of space is utilized. In the catalogues are shown, by illustration, the various styles of goods and their prices. These catalogues are sent out by the thousands every year. Such a catalogue is a very expensive work and the mere postage on them amounts to thousands of dollars.

### Russian Black Silver Jewelry.

OUR consul, W. W. Masterson, at Batum, states that there are no manufacturers of jewelry, as the term is understood in the United States, engaged in the manufacture of novelties in jewelry in that part of Russia, but that there is made by hand in Batum in little shops novel and beautiful silverware called "Georgian work." It is an inlay of almost black silver in fancy designs on the white silver background, and the work is used in spoons, cups and mugs, belts and buckles, tea sets, and, in fact, in everything in which ordinary silver is used.

The makers of the ware profess to keep the process of making this dark silver inlay as a trade secret.

Harvey Fritz has installed new fixtures, show cases and made other extensive improvements in his store at Oil City, Pa.

AN ATTRACTIVE CLOCK SET.

AT their salesrooms, 12 Barclay St., New York, Harris & Harrington have on exhibition an attractive clock set in gold effect, the central piece of which contains the clock, resting on an oblong base supported by four eagles. On this base stand two figures representing angels, and they in turn support on their heads a second rest which supports figures representing a chariot drawn by two prancing horses. Standing in the chariot is a man dressed in flowing robes. He holds in his outstretched hand a wreath of victory. Riding on one of the horses is an angel. The clock is suspended from the center of the higher cross support. The two candelabra accompanying the set are finished in keeping with the centerpiece.

ARTISTIC BRONZE ELECTROLIERS.

IN the warerooms of Lazarus, Rosenfeld & Lehmann, 62 Murray St., New York, there is on exhibition a comprehensive line of electroliers, among which is one entitled "Arion," by Louis Moreau. This offering shows a young man holding on his arm a harp, while with the other hand he supports a cluster of clouded glass bulbs. "Le Calme," another offering at the same salesrooms, represents a young woman standing on a rounded pedestal and leaning on a fork. She is dressed in rustic garb and seems to be in deep meditation. From the back of the pedestal rise three curving branches, which terminate above the head of the figure in three clusters of colored glass, forming a flower effect.

JUST at present Hugh C. Edmiston, American representative for the Crown Staffordshire Porcelain Co., is exhibiting a line of vases made after famous *Famille Noire* vases, in which the designs were first drawn on the vase and the ground work then filled in with a dull black, leaving the flower work in white, and the whole is then enameled over in five colors. The green, a transparent color, covering the black, and the leaf work produce a brilliant and lustrous effect, the flowers and stems standing out strongly. This line is most attractive, and should prove popular with jewelers.

THE RAMBLER.

An interesting display recently seen in the store of J. A. Merrill & Co., 503 Congress St., Portland, Me., was an Indian belt valued at \$8,000. It was obtained in Calcutta. The belt is constructed of threads of gold and contains 183 diamonds, 47 rubies and 91 emeralds.

### INTERCHANGEABLE CHATELAINE WATCH OR LOCKET FOB

The above illustrations represent a few of our newest ideas. The Chatelaine Watch Fob and the Chatelaine Locket Fob to be worn at the belt; more secure than the old fashioned Chatelaine; does away with soiling the dress or shirt waist; safety catch on back of the Watch Fob, making the watch secure, also Washburn fastener, attaching Fob to belt.

Our Locket Fob has already proven itself to be a great seller. We predict for our Watch fob great results. It is a winner. Write for samples. We sell the wholesale trade only.

OFFICE AND FACTORY  
Attleboro, Mass.

NEW YORK OFFICE  
3 Maiden Lane

Belcher ring as received with stone badly worn.

How the same ring looks when stone is reset without new claws. Stone is not secure and point is below inside of ring.

How we splice settings and solder in new claws; seams do not show and rings are as perfect as when originally made.

How ring looks with new claws and stone securely reset. Entire ring is finished like new.

When we tell you that we have received as many as 75 diamond rings in one day for new claws and settings, you will not think us extravagant for using a full page in THE JEWELERS' CIRCULAR to exploit this feature of our business, but will wonder if you are getting your share of claw work.

99 out of every 100 owners of diamond rings willingly pay \$1.50 to \$5 for new claws or settings on their rings, but would not buy new mountings for \$5 to \$25.

It is worth while to familiarize yourself and your employees with this work, as it is one of the important little things that helps to make your business profitable.

## WENDELL & COMPANY

The firm that did much to change the repair end of the Retail Jewelry Business from a source of worry and dissatisfaction to one of pleasure and profit.

47 John Street  
New York

TWO WONDERFUL SHOPS

57 Washington Street  
Chicago

Tiffany ring as received with worn claws. Stone cannot be reset, as it would be too low to look well and the point would come below the inner circle of ring.  
(See cut No. 2 of flat helcher.)

How same ring looks with new claws and stone securely reset. Entire ring is finished like new.

Oval Belcher ring as received with claws badly worn. Stone cannot be reset, as it would be too low to look well and the point would come below the inner circle of ring.  
(See cut No. 2 of flat helcher.)

How same ring looks with new claws and stone securely reset. Entire ring is finished like new.

THE PRICES QUOTED ABOVE FOR NEW CLAWS AND SETTINGS ARE SUBJECT TO OUR CATALOGUE DISCOUNT.

WE CAN PUT NEW CLAWS AND SETTINGS ON MOUNTINGS TAKEN IN TRADE AND REFINISH THEM SO THEY WILL BE AS GOOD AS NEW.  
WE RETIP CLAWS AND MAKE NEW SETTINGS FOR CLUSTER MOUNTINGS SO THEY ARE AS GOOD AS WHEN ORIGINALLY MADE, AT PRICES THAT MAKE IT ADVANTAGEOUS FOR THE OWNERS TO HAVE THIS WORK DONE.

Carrying no diamonds in stock, entering and tagging each piece of diamond jewelry as received, then giving to each workman but one ring at a time, which is returned before he receives another, prevent any possibility of diamonds being exchanged while in our possession.

CROWN PLIER No. 331

For clamping the collar of crowns on dust-proof cases while removing same from pendant. This is usually found a difficult task but easily done with the help of this plier.

Nickel plated.....each, \$ .60

1 Doz. BARREL HOOKS (threaded with Finished Drill and Tap

With this outfit a new barrel hook can be put in barrel in a short time, and in a proper manner so will not pull out. Price..... \$ Same as above without Taps and Drill, per doz.

JEWELERS' SQUARE SAWS, ROUND BACK

Hardened by a new process, giving a very "toughness" not found in other brands of saws. Made in No. 00000 to No. 6. Price, per gross, \$100

ECHARCO WATCH GLASS CABINET No. 15 (Patented) Price, each, \$16.00

This cabinet has many new features not found in any other. Novelty and usefulness are the chief arguments in its favor.

Construction and Material.—The cases are made of oak, finely finished and of attractive appearance. Sides are paneled. Partitions of bass-wood and put together in best manner possible.

Partitions are skeleton, preventing accumulation of dust, chips, etc.

Bottoms of cabinets are hollow to receive chips, dust, etc.

Arrangement for Glasses.—The nine drawers contain 1,547 spaces to hold glasses in upright position.

Labeling of drawers, as shown in cut, is on the pulls of the drawers and done in gold bronze on black background.

Dimensions.—24 inches wide, 29 1/2 inches high, 12 inches deep; weight, 45 lbs.; with packing case, 75 lbs.

The construction of drawers, the arrangement of partitions to economize space and weight, and the novel method of showing contents on drawer-pulls are all prominent characteristics and extremely well thought of.

Top View, Showing Skeleton Frame of Drawer. Accumulation of dust and chips is impossible.

SHELDON'S PATENT HAIRSPRING COLLET REMOVER

No need of any more distorted hairsprings bent balances.

Every watchmaker knows how troublesome it to remove the collet without either distorting the hairspring or bending the balance; with the use of this tool the difficulty is overcome. The tool is provided with a pair of spring fingers, curved at the ends and ground very thin and sharp. By tilting the balance the jaws may be slid under the hairspring and by pressing the jaws together, the collet will readily loosen the collet and then by turning the central screw, which has a hole in the end to receive the staff pivot, you can force the collet from the staff, without injury to balance or hairspring. The adjustable screw nut is provided to avoid wear or injury to the jaws. A glance at the illustration will demonstrate the utility of this tool. Finely nickel plated.

Price, each, \$1.25

RING SEPARATING PLIER No. 1

A most effective device for cutting rings from fingers, when too tight to be removed otherwise. A few turns of the saw will cut a ring of average weight. Full nickel plated

Price, each, \$1.75

A handsome Booklet, 8 inches by 5 inches, fully illustrating Zipperer's fine tools for watchmakers will be mailed you upon receipt of a postal card, giving your name and address.

For Sale by all Jobbers in the United States and Canada

"Silversmiths' Building," Malden Lane

NORTH ATTLEBORO, MASS.

# A New Pattern in Toilet Ware

The distinguishing feature of the new Whiting FLORENTINE Toilet Ware is its refinement of line, of ornament, and of conformation.

The mirror handles are conveniently long, the brush backs of a distinctive shape, symmetrically elegant and adapted to advantageous service, while the exceptional flatness of all the mountings adds to the individual character of the set.

Workmanship and materials are of the best quality, and the Florentine is finished in four attractive styles—plain, engraved, etched and repousse.

### THE "CHIPPENDALE" DESIGN

**I**N the "Chippendale" line of Flatware, this Company has undoubtedly produced a masterpiece in the art of the Silversmith. The real "Chippendale" spirit is embodied in every portion of the design. Grace, Strength, Refinement and Practicability are the distinguishing characteristics of all of Chippendale's productions, and these same excellent qualities are represented in every piece of Smith "Chippendale" Flatware.

Specimen Page from a Catalogue issued by

The Bent Glass Novelty Company, 79 Walker Street, New York

Engraved and Printed by

**THE J. W. PRATT COMPANY**

52 DUANE STREET

NEW YORK

(SEE OTHER SIDE)

THE value of three and four color process engraving and printing as a method for accurately representing precious stones, manufactured jewelry and kindred goods, is becoming steadily more apparent to the progressive advertiser, and is being used to great advantage by the wide-awake hustlers for business.

On the other side of this leaf we show how the three-color process is employed for illustrating colored lamps and shades in their natural colors. The page shown is from a catalogue recently engraved and printed by us. This is one of the many uses to which this method of engraving and printing is adapted. If you are going to have a new catalogue, let us figure with you.

*The J. W. Pratt Co.*

52 Duane Street, New York.

PATTERNS IN STERLING SILVER

We invite careful inspection of our line of *Sterling Silver Flatware*. A suggestion of the variety of designs is here given in the Tea and Coffee Spoons shown. The patterns are of careful workmanship and made in substantial weights at a moderate price.

# Leadership in Business

like leadership in anything else, is simply the working out of nature's law of the survival of the fittest. Show me a business that is successful and I will show you, in ninety-nine cases out of a hundred, one that deserves to be. The law of the universe constantly seeks and demands the best and casts out the useless and unfit.

If you would be successful you cannot afford to give anything less than the best that is in you, and that man is worse than a fool who undertakes to succeed by trickery, chicanery or dishonesty, for when he attempts to cheat his neighbor, or deliver less than he sells, he injures himself beyond repair. His deceit will find him out and surely tear down and destroy.

It has been our constant aim in business to deliver more than we sold. Our sun is still shining.

# The SIMMONS 12-Chain Combination

---

(See last week's JEWELERS' CIRCULAR-WEEKLY, pages 12-13)

The Simmons Twelve-Chain Combination is beyond question the best proposition in vest chains that has been offered the trade.

It furnishes a good selling assortment of the very best gold-filled chains made, for a nominal sum—and at a special price that makes them unusually profitable to handle.

*An assorted dozen patterns of Simmons Vest Chains, all of which sell readily at from \$3.00 up, and a dollar-and-a-half Imported Velvet Roll for \$21.75 is an offer so much out of the ordinary that few jewelers are likely to overlook it.*

Consequently, it is advisable to place your order for the combination at once. (Sold only through the jobbing trade).

Order of your nearest jobber—if he can't supply you, write us and we will let you know immediately where the combination can be obtained.

# Real Rose Hat Pins

**This will be the largest selling article this Fall and Winter—it is already.**

So remarkable are the sales of DELAMOTHE Real Rose Hat Pins that we do not expect dealers to believe same until they have actually tried them out. It does not seem possible that during JULY this product was sold by Retailers at the rate of two to twenty dozen daily—EVERY day. The Retailers' profit is unusually large. Not only are they proved big sellers, but they are a great attraction for the stores that sell them. The largest Advertising Campaign in years is behind this product. Every possible Advertising and Selling Help will be furnished Dealers gratis. This product will be sold to the best Dealers only, and retail prices will be strictly maintained.

DELAMOTHE Real Rose Hat Pins are made out of live roses, changed by a secret process into metal, then finished in attractive colorings and mounted on Hat Pins. This SECRET process is a recent discovery of Prof. L. G. Delamothe, a noted French Electro-Chemist, and is owned solely by the Delamothe Natural Art Decorating Co., Spokane, Washington, for which this Company is the Sole Distributor. It is the ONLY process by which an OPEN Rose can be perfectly metallized. This product is made in the finest manner possible, and its high quality will be maintained. The Roses used are grown in Oregon and Washington, famous the world over for their beauty and superiority—made where these Roses grow. No two Real Rose Hat Pins are alike. Finished in five colors to conform to the prevailing fashions in millinery. Six sizes, from the smallest rosebud to the full blown flower.

**Not sold through Jobbers.**

*Do not buy inferior imitations. Sold direct only.*

**Write for Illustrated Price List**

*Or have Two Dozen Trial Assortment sent on 30 days approval.*

# STERNAU COFFEE = MACHINE

Users of coffee are quick to recognize the difference between *good* coffee and the other kind. Good coffee is the *only* kind that can be made with the Sternau Coffee-machine, because its process of distillation is the only proper way to make the beverage. This is a telling point that can be used effectively by the retail jeweler in making the sale to his shoppers.

This machine is so constructed as to be easily taken apart and cleaned. Its beauty is another feature that makes it an easy seller.

We have them made in silver-plate, nickel-plate and copper. Write us for further description and information.

## ENGELSMAN'S PATENTED COMBINATION "GEM" DISPLAY RINGS and ADJUSTABLE STONE HOLDERS

MEET A LONG-FELT WANT

**THEY ARE MONEY-MAKERS AND MONEY-SAVERS**

UNMOUNTED STONES of any size and shape can be displayed advantageously, as is herein illustrated. Your investment in stock can thereby be *decreased*, as you need not mount them up in expensive settings. Your sales will also *increase* by being able to exhibit unmounted stones. The prices are *low* enough to induce you to buy them and *save* you from incurring frequent losses caused by the awkward handling of the tweezer when your customer desires to examine unmounted stones. Try them. For sale by all jobbers.

Due to greatly improved automatic machinery and reduced cost of production, we are now quoting these as follows:

Sets of 18 (full set), in box,	\$6.00
" " 12	" " 4.00
" " 9	" " 3.00

**S**) CREATIVE an epoch artistically as the Directoire Period could not fail to evolve forms as notable for variety as for their artistic beauty. All had a fine touch of distinction. Happily the Directoire Jewelry displayed here represents the finest types: it is characteristic, distinctive and varied. Taking the Sapphire as the appropriate basic stone, it is finely imitated in the old cabochon cutting of the Period. Among the more notable revelations must be mentioned:

*DIRECTOIRE BANDEAUX (Charmingly Grecian)—DIRECTOIRE COMBS  
DIRECTOIRE NECKLACES—HAT PINS—BUCKLES  
LARGE DIRECTOIRE BARRETTES—DIRECTOIRE BROOCHES*

*D. Lisner & Co. Creating Importers of Jewelry Novelties

## Individuality

In your selection of bags it behooves you to buy those bags which stand out prominently as possessing an individuality of pattern, as opposed to the common goods scattered promiscuously around. You will find that the women know and discriminate in favor of the former every time. An inspection of the W. & D. line by you will lead you right.

## Whiting & Davis Co.

PLAINVILLE, Norfolk Co. MASS.

 Chicago Office: Room 405, 103 State St.

## Artists and Designers Agree

That the most meritorious compositions are those attaining harmony and breadth without superfluity of detail.

## Hostesses and Housewives Agree

That the best Sterling Silver Tableware is that having only enough ornamentation to lend the proper amount of grace to the dignity of clear, clean silver.

Note how Ye MOUNT VERNON PATTERN fills these requirements, being designed to ye Colonial taste of Strength, Beauty and Simplicity

*Its Success is Assured and Continuous*

# The "Krementz-Bodkin Back" STUD and VEST BUTTON

Pat. Feb. 16, 1904

Krementz & Co. believe the trade will agree that they understand the jewelry business sufficiently to know that the "Krementz-Bodkin Back" Stud and Vest Button is the simplest and best mechanical Stud or Vest Button made.

The "Krementz-Bodkin Back" Stud and Vest Button is not one piece, but is one-piece construction, which makes it very simple and the strongest and most durable, because:

- 1—It is Solderless
- 2—It has no spring or hollow wire to bend or break
- 3—It is made of solid, hard spring metal throughout
- 4—It is made by Kremenz & Co. which insures perfect quality, construction and workmanship

THE STORY OF THE HEAD

## Krementz & Co. Invite Comparison

Krementz & Co. stand back of their assertion. All "Krementz-Bodkin Back" Studs and Vest Buttons are sold also under the unique Kremenz Collar Button Guarantee.

THE STORY OF THE BODKIN BACK

### GUARANTEE

If for any cause whatever, a "Krementz-Bodkin Back" Stud or Vest Button should be damaged either in the hands of the dealer or wearer, a new one will be given in exchange, without charge. "Krementz-Bodkin Back" Studs and Vest Buttons are made in large variety of patterns in 14-kt. gold and platinum, set with pearls and diamonds.

TRADE A 14 K MARK

## The Necklace at Its Best

**T**HE MOST FEMININE of Jewelry, the Necklace, makes its own appeal. This appeal gains strength in proportion to the artistic beauty of the Necklace. It need not be elaborate—there is a beauty in simplicity. The BEAD Necklace is a simple and yet classic form. It admits of dainty decoration and charming variation, but even the plain Gold Bead is rich in beauty. The wide recognition given the Bead Necklaces of this house, bespeaks for them the special consideration of the trade.

Plain Roman Beads, straightaway sizes and graduated.

Vermicilli Trim Beads, straightaway sizes and graduated.

Alternated Beads, plain and decorated, in even or straightaway sizes.

Gems Alternated with Beads, producing very rich effects. Coral and Amethyst are used in this manner most impressively.

Other variations include Oval-shape Beads, etc.

**TO THE TRADE:**

We are working hard now compiling our logue, and our compiler asserts that it will any former edition of that valuable work. It will be a great deal more than a mere book; it means the most careful selection of choice goods from every part of the world means reliability, salability and right price means that every dealer loses money unless "goes by the book."

If he buys from this book he gets mighty to cost of production, and right into actual quarters, for we are the foremost concern of the kind.

People who write that they can fill orders from our catalogue write falsely, as it cannot be done. To meet our prices they must substitute an inferior article.

Send for a copy of our book, and get a rock.

For the trade only—our new, big catalogue of 100,000 items, sent free.

# Heppelwhite

(DESIGN PATENTED)

## STERLING SILVER TEA SET

The tremendous success and popularity of our Heppelwhite Pattern sterling flatware has induced us to carry out the same design in hollowware. We show here the Tea Set. Other pieces now ready for delivery are the Waiter for Tea Set, Meat Dish, Fish Dish, Vegetable Dish, Dinner Plate, Tea Plate, Sandwich Dish, Water Pitcher, Gravy Boat and Candlestick. These pieces are furnished both plain and engraved.

This line is named after Heppelwhite, a celebrated designer of classic furniture, who flourished during the latter part of the XVIII Century, and whose works were characterized by a charming dignity and grace which appealed especially to people of culture and refinement.

The Heppelwhite Pattern has met with instant favor among the trade, and its success is undoubtedly assured. The trade should bear in mind, however, that the Heppelwhite design is manufactured exclusively by Reed & Barton.

Prices and illustrations of the entire line of Heppelwhite flatware, hollowware and Toilet Set will be sent to the regular jewelry trade upon request. To insure delivery in time for the wedding season, orders should be placed promptly.

# "New Process" GILLETTE Blades

## Information to GILLETTE Dealers

Beginning with Sept. 1, 1908, only "New Process" GILLETTE blades will be distributed.

They differ in price, quality, appearance and style of package from the previous kind, and the public is being notified of the change by full-page advertisements in all the leading magazines.

More than two million GILLETTE users will now accept only "New Process" GILLETTE blades. If you have them in stock before other dealers in your locality you will get the business, and at the new price your profit is a very liberal one.

"New Process" blades are manufactured by newly-invented machines and processes, making them superior in appearance, operation and endurance to any blades ever produced by anyone.

These machines are automatically regulated, and grind, hone and sharpen each blade individually with the utmost precision.

Every cutting edge is perfect, and possesses a degree of keenness not produced by any other process.

"New Process" blades are finished with a high polish that renders them easy to

clean. Since dust and moisture do not cling readily to a polished surface, these blades are practically immune from rust.

"New Process" blades are packed in a handsome nickel-plated box which seals itself hermetically every time it is closed. This shuts out all dampness and effectively protects the blades from rust in any climate, land or sea. When empty, the box forms an attractive waterproof match safe.

**The set now contains twelve blades.**

**The Retail Price is \$1.00 per set.** Twelve sets are packed in a carton.

To those who are not handling the GILLETTE, we suggest, "Get Busy." Get the sales resulting from our huge advertising campaign—the increased business and profits that the co-operation of our Sales Department will bring you.

YOUR customers are continually seeing GILLETTE advertisements and they want the razor. Eventually they buy it somewhere.

**WHY NOT OF YOU?**

Write us for catalog and liberal discounts to dealers.

## Beautiful Trophies for the Trans-Pacific Ocean Yacht Race from San Pedro, Cal., to Honolulu.

The illustration on the front page of this issue is that of the prize trophy for the Trans-Pacific Ocean Yacht Race, started July 1 from San Pedro, Cal.,

and the Chamber of Commerce and the South Coast Yacht Club, of Los Angeles, offered this trophy to the winner of the race.

ANOTHER TROPHY FOR THE TRANS-PACIFIC RACE.

cover, is made of sterling silver gold lined. The design is all nautical figures. The front side has flags of the South Coast and Honolulu Yacht Clubs enameled in their proper club colors, with heavy raised letters, "Trans-Pacific Ocean Race." The opposite side is left for a description of the winner's yacht.

The base shown below is composed of ebony, is silver mounted, and represents a capstan.

The complete trophy is said to be the finest ever given for any event on the Pacific Coast. It was won, as announced by cable, by the yacht *Lurline*, owned in Los Angeles.

Another handsome trophy for the same race, illustrated on this page, was supplied by S. Nordlinger & Sons, Los Angeles, Cal., and was made by the Mauser Mfg.

BASE FOR PUNCH BOWL SHOWN ON THE FRONT COVER. IT IS MADE IN THE FORM OF A CAPSTAN.

Co., New York. The cut used herewith was made from the artist's design and not from the completed vase, and hardly does justice to the graceful lines or perfect workmanship of the trophy, though it serves to give a general idea of its appearance.

Among the novelties just placed upon the market are the new interchangeable initial buttons and scarf pins. They are a substitute for engraved buttons and pins, but more attractive. They are made and patented by Henry Freund & Bro., 71 Nassau St., New York, and are furnished in handsome display boxes for each set. These pins and buttons are made in 10-karat and 14-karat, with a full line of initials and fraternal emblems. Sample and booklet will be supplied to jewelers upon request to the manufacturers.

Honolulu, Hawaii. The contestants for the trophy were yachts representing the different Pacific coast yacht clubs, located in San Diego, Seattle and Los Angeles, and the yacht from Honolulu built by pub-

lic subscription on the Hawaiian Islands. The Chamber of Commerce and the South Coast Yacht Club, of Los Angeles, offered this trophy to the winner of the race.

The punch bowl as represented on the

Southampton: 11 cases watches, \$1,607.  
St. Johns: 19 cases clocks, \$216; 7 cases, \$546.  
Sydney: 65 cases clocks, \$1,220.  
Valparaiso: 1 case watches, \$525; 3 watches, \$270.  
Vera Cruz: 7 cases plated ware, \$307.

### Texas Jeweler and Optician Cor Murder and Suicide in Jealous Rage.

HILLSBORO, Tex., Sept. 9.—J. H. W., a jeweler and optician of this town, committed suicide in this city, Sept. 7, shooting Miss Ethel Edsall, a night operator in the telephone exchange, and killing roll Horne, a young business man. He is supposed to account for the deaths.

Watson, together with Miss Edsall Horne, left the telephone exchange at 8 a. m., Monday morning, and walked together as far as Church and F. Sts., where Horne left them. Watson and Miss Edsall walked a little farther suddenly, as Horne came toward them. Watson drew a revolver, and after two shots at Miss Edsall, shot Horne in the chest, killing him instantly. He turned the revolver upon himself.

### Death of C. G. Holmberg.

FORT WORTH, Tex., Sept. 9.—C. G. Holmberg, who died at his home on Heights, Sept. 4, was well known as a clerk and had been in business at New Worth for some time. Mr. Holmberg died in apparently good health, but was discovered dead the following morning.

The deceased, who was 50 years of age, was head of the firm of C. H. & Son, the partners being himself and Holmberg. Prior to engaging in business for himself Mr. Holmberg was in the employ of J. H. Greer. He is survived by a widow and four children.

The funeral services, which were held from his late residence, were conducted under the auspices of the Odd Fellows.

Some of the Latest Productions of Lalique and Other French Artists.

In a previous issue THE CIRCULAR WEEKLY has already published a general account of the jewelry exhibited this year at the Salon des Artistes Français, owing to the fact that Lalique, who has long retained his leadership, exhibits

Lalique understands the modeling of this material as only an artist can; he is capable of bringing out all that it can effect, constantly varying his motives and ornamentations. Sometimes it is a single animal that constitutes the object. A gurnard,

HORN COMB BY RENÉ LALIQUE.

is more interesting than the other where jewelry is exhibited, viz., that of the Société Nationale des Beaux Arts. It is enabled now to present to our readers a few illustrations of conspicuous

for instance, of vigorous character, is engraved in a beautiful horn of a dark brown color, the eyes being formed from two stones of a bright orange.

Probably still more striking, however, is another paper cutter of black horn, shaded with whitish grey. A large night butterfly is shown, with its great wings extended. In another, the extended wings are marvelously worked out in horn, brown or transparent in spots. Some orange markings

BROOCH BY LALIQUE.

by Lalique and a pretty brooch by Liénard. Lalique's exhibit this year, as on previous years, is of the highest interest. It is so charming to follow this great artist in his constant advancement of his production, finding invariably interest in the ever increasing ingenuity of composition, the choice of subject and composition in newly

are of overlaid enamel and produce a warmly harmonious but discreet effect. Then, again, it is a grasshopper, the wings of which are ornamented with vigorously wrought muscles; again fish, passing

A comb is really charming in its ingenious composition. Two swallows on the wing cross one another, one bearing in its beak a small spray, set with diamonds. The prongs of the comb are formed by the graceful wings of the two birds and the whole is in dark brown, spotted with a warm white, so that the diamonds set in the blade of grass form a rich and brilliant relief.

A complete series of brooches and buttons accompany these beautiful pieces, in various subjects, and in colorings of an invariably unique character; pigeons, or flowers, peacocks, or insects, are always harmonious and treated in an exceedingly ornamental manner. One brooch, more

BROOCH BY LALIQUE.

important, must be specially mentioned: in this specimen of very pale blue, wasps are flying above flowers; the wings are in translucent enamel and the entire effect presented is charming.

Also there is a little box, a perfect sym-

BROOCH BY M. LIÉNARD.

phony in green; again a necklet of a somewhat bristling and stern appearance. But everywhere, always and with an inexhaustible fecundity, Lalique gives proof of a fancy always new, and charms us by his conceptions and the unique realization of his superb talent as a decorator.

Among the jewels to be found in the show case of M. Liénard, where we may discover some beautiful objects, is a diadem, ornamented with eucalyptus and of ingenious design, with its flowers formed in pearls and its leaves in horn. Altogether, its appearance is simple, but not without character. We may also mention, by the same artist, a brooch, in which two Dragon flies, are britted together; the color harmony in this, which is very soft, is formed by diamonds, an aqua marine and pale gold. Of this piece an illustration appears.

HORN PAPER CUTTER BY RENÉ LALIQUE.

materials, and the harmony of his lifeful and subtle devices. Offers, this time, a series of paper cutters, really remarkable and certainly absolutely perfect. In this series a prominent place must be given to the works in horn.

through transparent water, with sea grass in an eddy, or bumble bees on blades of grass. But everywhere we may perceive a wonderful fancy, a subject and material marvellously appropriate to the object and its decoration.

SOME ANCIENT PURSE HISTORY.

is a strange literary fact that, while the works written on the subject of money would fill many bookshelves, what discoverable concerning recorded decisions of purses and their history can be summed up in a very few pages. Since money was invented it has been a worded commodity; but the shrine that holds the precious disks have often been gaudy productions of artistic genius. Then, has so little been written on an interesting subject? When the shell is eaten all throw away the shell, but who, through the centuries, have been

bearing receptacles we have no written descriptive matter that defines their appearance.

The *marsupium* we know to have been a little bag of leather. Its mouth was closed by drawing it together with a cord. They were sometimes adorned with tassels and other decorative embellishments. Mercury is often represented as carrying a purse (probably the *marsupium*). For this fleet-footed celestial, swift messenger of the Olympus deities was the god of merchants, especially the crafty, thieving trader. The cheating merchant prayed to him for protection in his evil transactions.

The purse of the ancient Saxons was called *pusc*. The Celts had an *alwar*, and, during the Norman period, money was carried in the *aulmonière* (contracted later to

Heneage Legge, an antiquarian. It has been an heirloom in his family for three generations. Their exact identity shows they were cast, and from the same mould. They are in bronze.

In Fig. 1 we have another purse bar or beam of about the same period; it was, in its day, an extremely elegant piece of workmanship. It is in bronze inlaid with silver.

These gipcières, or wallets, were of the larger kind and measured about seven inches long by five inches deep. They were always carried at the wearer's side or waist and were hung on a waist-band or strap that passed through the loop of the beam. During the 14th century every person, king, noble and peasant wore a gipcière. In the case of Fig. 2 there is little doubt that the pouch was made of leather. The thickness of the twists or links of wire that held the material lead one to this impression. But we know that in the 15th century purses were made of leather, silk and velvet.

FIG. 1—BRONZE PURSE BAR. XVIII. CENTURY.

endowed by the gods with the ability to carry in their persons plenty of the "root of all evil" have usually used, as receptacles for their "articles" captivating of design and often bedecked with gems. The blind-gull-absorbing interest in the contents of purses to have induced universal silence about the containers.

The ancient Greek *balantium* and the Roman *crumena* were of leather and were held by a strap over the neck at the front of the owner. On account of the fact that they were sometimes called *fundae* (bags). Juvenal mentions money bags of leather; Plutarch describes them as having been closed with strings. Classic

FIG. 3—BRONZE GIPCIÈRE PURSE BEAM.

*culner* or *alner*). We know little or nothing definite as to what they looked like. Next we come to the Mediæval-French words *gipcière*, or *gypcière*, which designated the form of purse used during the 14th and 15th centuries. These were made of silk, velvet, leather or canvas. They were made on a metal frame. These frames consisted of a top bar, with a ring or loop for suspending to the girdle or holding on the finger. The bars were usually of brass, though some were in silver and some were very handsomely decorated, even set with gems at times.

It is an amusing fact that only a few years ago the intent of these beams puzzled the archæologists. They supposed from their form that they were beams for some species of *balance*, but their actual purpose only recently became clear.

The earlier gipcières had the mouth covered with an overhanging flap, but in the 15th century the pocket was sewn to the metal beams and, a semi-circular frame being added, to which the gipcière cover was

One of these ornamental purse bars is illustrated in Fig. 1. It was found in France. Gemmed and refined as the *motif* is, it is generally considered to date back as far as the eighth century. The ends doubtless represent either hawk or eagle heads. The material of which it is made is bronze.

In Fig. 2 is represented a bar of a 14th or 15th century gipcière. The lettering is in niello. The quality of the workmanship is proof that a craftsman of no mean ability produced it. But he added unwittingly to the present day interest in his performance by being evidently illiterate. You will notice he has two forms of T in St. Maria and St. Barbara (the last A is missing). And his anomalous two S's in Crisste, one of which is reversed, is striking to say the least. His N's in Domine and Honor show similar lack of knowledge of his alphabet's construction.

The absolute facsimile of this purse frame (which is in the British Museum), errors included, is also in the possession of W.

FIG. 4—TOP BAR OF SMALL PURSE.

attached, it could be opened like the lid of a box.

In the 16th century the gypcière was abandoned. The ladies took to carrying their purses in the hand, the men, however, still slung the purse at the girdle. For the temptation to thieves that existed in those loosely hanging purses rendered it necessary with "wicked days" that one's money should be more safely stowed. And the "pickpocket" took the place of the "cut-purse." In James I. reign the purse had found its way into the pockets of both sexes.

It is uncertain where the purse-clasp, or

FIG. 2—GIPCIÈRE PURSE FRAME. XIV. OR XV. CENTURY.

As we tell us of the *bulga*, *follis*, *pasceolus*, and its diminutive *sacculus*, but none seem design to enlighten us with any designation as to their appearance. Suidas mentions purses of goatskin. Pigs' ears (being larger, were preferred) were used for purses. And to these bluff old Henry VIII. of England referred when he retorted to a supposed impoliteness of his fellow monarch in France: "You might make a silk purse out of a sow's ear." But of all these many titles to money-

came into vogue. Not earlier than the latter half of the 17th century. It was the "purse-string" that closed the money bag at the mouth till then. And those money bags were articles of great beauty in their intricate embroidering and many tassels—until the metal frames had passed away in the chapter in purse history does not belong to the gold and silversmith or the jeweler, so we must pass it by. C. W. C.

**Legal Firm's Suit Against Former Employee Involves Interesting and Novel Points.**

PROVIDENCE, Sept. 14.—The equity suit against Stevens & Co., dealers in optical goods, against Ned C. Stiles, a former employe, was heard Saturday before Judge Tanner, in the Superior Court, on the complainant's prayer for a preliminary injunction to restrain the respondent from soliciting patronage from former customers of Stevens &

It was claimed that Mr. Stiles was with the complainants as an expert refractionist for several years and that after leaving to employ a few weeks ago, he sent out circulars to a list of the customers of his former employers. The complainants claim that the list was obtained by the respondent while he was in their store and that his use of the names was a violation of the fiduciary relationship existing between them. The question arose and was discussed by the court at some length whether Mr. Stiles had actually copied the list of the firm's customers or simply sent out his circulars to a list of them as he could remember after going into business for himself. The court held that he did send letters to persons whose names he learned while he was an employe of the complainants.

Arguments were submitted and authorities cited bearing upon the legal points involved. Attorney for the complainants contended that the respondent had improperly and illegally made use of knowledge obtained while he was in Stevens & Co.'s employ. Counsel for the respondent argued that the acts of his client were only such as were justified by legitimate competition in business. The court held the matter for judgment, allowing counsel for the respondent time in which to submit additional authorities.

**Death of Charles L. Taylor.**

ST. LOUIS, Mo., Sept. 9.—Charles L. Taylor, formerly in the jewelry business in Sedalia, Mo., and of late years general inspector for western railroads, died in this city, recently, after a long illness from a general nervous breakdown. Mr. Taylor is survived by his widow and one child.

He deceased was born in Sedalia, Mo., on April 21, 1859, and, until 10 years ago, was associated with his father in the jewelry business there. In that position he became acquainted with most of the jewelers in the State, and when he came to St. Louis to do railroad work he was well known. He was time inspector for the Missouri, Kansas & Texas Railroad and the San Antonio system, until two years ago, when he resigned on account of ill health. Ever since then he has been in a hospital.

**Career of the Late Christian Willis Bixler, Easton, Pa.**

EASTON, Pa., Sept. 8.—C. Willis Bixler, head of the firm of C. W. Bixler & Co., who died here Aug. 31, as reported in THE JEWELERS' CIRCULAR-WEEKLY of Sept. 2, was not only one of the most prominent jewelers of this section of Pennsylvania, but was the third generation of the family whose names have been noted in the jewelry, watch, clock and silver industry for about 120 years.

Christian Bixler, the grandfather of the deceased, was born in 1763 in Berks County, and was the first to attain prominence in this craft. He served his apprenticeship with John Keim in Reading, and after working for a time as a journeyman started in business in Easton in 1788 as a clock-maker and silversmith. Here he continued in business, especially the manufacture of clocks, until 1830, and in that time made

THE LATE C. WILLIS BIXLER.

nearly 800 timepieces, doing all the casting and the greater part of the forging himself, or having it done in his own shop under his eye. In 1825 his son, Daniel K. Bixler, became an apprentice in the business, to which he succeeded in 1832, gradually developing it into a general jewelry business and becoming associated with his brother, William Bixler, a silver spoonmaker.

The late Christian Willis Bixler was the son of Daniel Bixler, and was born in this city 62 years ago. Like his ancestors, he learned the jewelry trade, and after conducting business for two years in New York moved back to Easton in 1874. He continued alone for about 30 years, but in 1894 admitted as a partner S. P. Ludwig, who had been with him since he started in Easton; two years later his son, Arthur B. Bixler, was also admitted in the firm. The surviving partners are continuing the business without change.

The late Mr. Bixler was a man of whom Easton can be truly proud, and his death, which was due to cirrhosis of the liver, was deeply deplored. The house in which he died was the one in which he had been born, and had been built by his grandfather on the property which has been in the family for 135 years.

Deceased was a member of the Dall Lodge, No. 396, F. & A. M.; Easton Chapter, No. 172, R. A. M., and Hugh De Payens Commandery, No. 19, K. T. He was also a member of St. Paul's Lutheran Church. Besides his son Arthur, Mr. Bixler is survived by a daughter, Mrs. Forrest Mitchell, and three grandchildren.

The portrait from which the cut herewith was made was taken 11 years ago.

**Contracts Awarded by Government Departments to Supply Various Articles.**

WASHINGTON, D. C., Sept. 9.—The purchasing agent of the Isthmian Canal Commission has awarded a contract for six marine clocks to Vermilye & Power, of New York, at \$104.40.

WASHINGTON, D. C., Sept. 10.—The Navy Department has awarded the following contracts:

For 100 quartermaster's spy-glasses, to the Iszard-Warren Co., \$1,410.

For 150 spy-glasses, to the Iszard-Warren Co., \$1,050.

For 10 comparing glasses, to Robert Leding, Washington, D. C., \$14.48.

For 20 stop watches, to H. C. Karr, Washington, D. C., \$39.50.

For 225 clocks, to Chelsea Clock Co., \$3,177.50.

For 200 binoculars, to the Iszard-Warren Co., \$3,500.

For 125 thermometers, to Fred A. Schmidt, Washington, D. C. \$112.50.

For 25 barometers, to the Sussfeld-Lorsch Co., \$6.95 each.

For 20 reading glasses, to Fred A. Schmidt, \$5.20.

The Navy Department has awarded a contract for 18 electric clocks for the Washington Bureau of Yards and Docks to the Standard Electric Time Co., of Waterbury, Conn., at their bid of \$192.

Enterprising jewelers are always on the outlook for the latest and most up-to-date articles with which to brighten up their stocks, and nowhere can a more acceptable offering be found than the combination walking cane and umbrella set just now being presented to the trade by the W. W. Harrison Co., 1149 Broadway New York. This combination set is made of Pimento wood and has plain sterling silver mountings. A new line of umbrellas with mottled ebony handles in a number of shapes is also being exhibited by this firm. These umbrellas are very closely rolled, of high-grade material, and present a most pleasing appearance. "Merry Widow" umbrellas with straight long handles 15 inches in length in dark wood with sterling silver mountings are proving popular, while the line of Russian Niello work handles are also meeting with public favor as the highest grade of silver is used in their manufacture. They look like enamel work, but are more durable. Jewelers will be particularly interested in the line of 14-karat gold-mounted canes and umbrellas in crook and straight handles. Ivory handles are still proving popular, says Mr. Harrison, but the ladies' walking sticks, he says, are not meeting with general approval in this country, and will, in all probability, never come into general use.

## Technical Jewelry Classes in Providence

What Manufacturing Jewelers of New England Have Done to Establish Courses in Jewelry Designing and Working—Fall Term of Jewelry Class of Rhode Island School of Design Starts Sept. 21—Y. M. C. A. Class Starts Oct. 15—Technical High School Not Ready.

PROVIDENCE, Sept. 12.—The manufacturing jewelers of this city and vicinity are taking with considerable interest the progress that is being made in the practical theoretical training that is being given in certain of the educational institutions in the jewelry industry and its kindred branches of stone setting, designing, engraving and chasing, and die and hub making.

In addition to the course arranged as a part of the regular curriculum of the Manual Training or Technical High, in the public school system classes have been maintained at the Rhode Island School of Design for more than a decade, while last year a class was organized at the Young Men's Christian Association. Thus three institutions have well established departments for instructions in designing and making of jewelry, whose importance is already being recognized by manufacturers.

It was nearly 15 years ago that the New England Manufacturing Jewelers and Silversmiths' Association, seeking to stimulate interest among the students at the Rhode Island School of Design to take up a systematic study in designing for articles of jewelry and silverware, offered a sum of money to be divided into about half a dozen prizes for the most artistic practical designs for brooches. The contest was very successful and in the following year was repeated, the designs being for a back for pill mounted brushes. The association followed the custom of offering prizes for several years.

This enterprising move on the part of the New England Association was the first made by any industry in Rhode Island looking to the establishment of a special course in designing of a practical character and inaugurated an innovation that was speedily followed by other lines of business until now there are provisions made for special classes in several lines.

The success that attended these experimental classes was so satisfactory that the managers of the school, in a few years, adopted the designing of jewelry as one of the permanent classes in the regular course. This has been gradually extended, the purpose of the course being to develop a refined taste and artistic ability and skill in making original designs. The student is taught to make models to show the proper relief, to cut the necessary hubs and dies for production by machines, and to put together the various pieces to form the finished design. The workshop is equipped with all necessary power appliances and general shop tools. Beginners in drawing and modeling are advanced to practical work in metal as soon as their ability warrants. The Fall term in this department will commence Monday, Sept. 21, and will include jewelry designing, silversmithing and a shop work.

Last Winter the Young Men's Christian Association started a class for instruction

in the jewelry industry, and while the number of students was small the results were very satisfactory. This year the school will open Oct. 5, and with the exception of two weeks' vacation at Christmas, will be operated continuously all Winter. It will be conducted in periods of eight weeks, two evenings each week.

Three departments will be maintained this Winter—bench work, engraving and stone setting—with an experienced instructor in each branch. In the bench work will be included the different processes required in the production of high-grade articles. The work includes the use and care of tools, sawing, piercing, setting up, charging, soldering, bending, scrolling and trimming. In the engraving line will be taught the handling of engraving tools for the general run of jewelry work, the care of tools and the development of original designs. The stone setting course is calculated to drill a man in the regular line of stone setting, including close and point work, beading in, box, star cutting, etc.

Harry Cutler, of the Cutler Jewelry Co., president of the New England Manufacturing Jewelers and Silversmiths' Association, who is a member of the education committee of the Y. M. C. A., is in direct charge of the school, and the three departments will be in charge of Asa Cushman, stone setting; Henry Fales, bench work, and B. F. Graffam, engraving.

Last Winter the school was opened in January during the business depression, but 14 students taking the entire course. This Fall extensive improvements and additions have been made, so that accommodations are provided for from 60 to 100 students, and with the complete and extensive appointments good results are expected.

The jewelry department of the Technical High School will not be ready for the pupils of the Evening High School this Winter, as had been anticipated. It is expected that the department will be fully equipped by Jan. 1, but that will be too late to start with the work for the evening class. The department will be used, however, in connection with the day school, for those who are taking courses in applied designing and hammered work in copper. It is also probable that a course will be given in jewelry soldering.

The jewelry department was particularly considered in connection with the work of the pupils of the Evening High Schools, and was counted upon as a help to some of the young men who are now employed in the manufacturing jewelry establishments of this city and vicinity as a means of increasing their efficiency and aiding them to secure higher and more responsible positions, especially as designers.

Recognizing that this was an important step to take, the city property committee has moved cautiously in making expenditures. That what was done might not be in the line of misdirection of effort and money.

the committee invited Councilman William A. Schofield, who is a member of the manufacturing jewelry firm of Schofield, Battey & Co., to act as a member of a subcommittee in the equipping of the department.

### Former Treasurer of Wilson Bros., Boston, Sued by Partner With Whom He Started a New Business.

BOSTON, Mass., Sept. 12.—Willard D. Lombard, treasurer of the Wilson Bros. corporation, 95 Court St., who opened an establishment in the Paddock building last April, having associated with him George O. Skoog, a former employe of Wilson Bros., is made co-defendant with his wife, Mattie N. Lombard, in an injunction suit brought by Mr. Skoog.

Subsequent to the dissensions in the Wilson Bros. concern, growing out of the mysterious disappearance from the safe, about Christmas time, of a box containing a large sum of money, Mr. Lombard was quite active in efforts in the courts to have the concern dissolved, but was unsuccessful. John Wilson, president and manager of the company, was charged by the police authorities with the larceny of the box and its contents, but the case has never been settled. Meanwhile he has been permitted by the court to retain the management of the establishment, and Lombard has paid more attention to the business established last April in the Paddock building than to the conduct of the Wilson Bros. company.

In the suit in equity brought by Skoog, the complainant avers that a partnership was formed April 15, 1908, between himself and the Lombards, under an agreement to conduct a jewelry business as the Lombard-Skoog Co., the plaintiff to contribute his time and experience in the capacity of manager and the defendants to furnish the capital, assist in the management, keep the books, etc., two-thirds of the profit to go to Skoog and the balance to the Lombards. He further maintains that he has been prevented from managing the business, that the defendants have attempted to dissolve the partnership, locked the plaintiff out, seized the goods, and no settlement of the accounts has been made. He asked on Aug. 14 for an injunction and a receivership. A preliminary injunction was ordered and on Sept. 2 the case was referred to Clarence H. Cooper, as master.

In their rejoinder the Lombards state that an oral agreement was made that a corporation should be formed, but no charter was taken out. Pending the organization of a corporation a store was opened in the building at 101 Tremont St., but W. D. Lombard furnished it and incurred all the obligations personally. It is further claimed that Skoog reimbursed himself out of the business by way of salary, no partnership agreement having been drawn up, and that he drew out more than a reasonable amount.

The outcome of this peculiar case, as well as of the Wilson Bros. case, is of much interest to the trade in Boston.

H. J. Harm, Albert Lea, Minn., has entirely renovated his store, which has been equipped with new fixtures, plate glass show cases, etc.

**Death of George M. Reed in no Way Affects Business of J. R. Reed & Co.**

PITTSBURG, Pa., Sept. 12.—The late Geo. M. Reed, senior member of the firm of J. R. Reed & Co., who died Aug. 29, as mentioned in THE CIRCULAR-WEEKLY last week, held a one-half interest in the business, the other half being owned by his son, J. Allison Reed, owning the remaining half. While the exact details are not known at this time, it is understood that the deceased left his estate to his three

THE LATE GEORGE M. REED.

children, to be equally divided, and the business of J. R. Reed & Co. will be conducted as heretofore. J. Allison Reed has been identified with the business for the last 20 years, but several years ago he bought out the interest of his father, J. R. Reed, who died last December. The firm is one of the oldest and most reputable in Pittsburg, and no change will be made in the conduct of the business.

**Kleinschmidt, Howland & Co. May File Amended Schedules—First Meeting of Creditors Called for Sept. 25.**

Following the filing last week of the schedules in bankruptcy of Kleinschmidt, Howland & Co., formerly importers of precious stones, at 170 Broadway, New York, against whom bankruptcy proceedings have been pending in the United States District Court, notice is given by the referee in bankruptcy, William Allen, that the first meeting of creditors will be held in the office of the referee, 67 Wall St., on Sept. 25, at two o'clock in the afternoon, at which time it is expected that claims will be filed and a trustee appointed. It is stated on behalf of the bankrupts that the amended schedules will probably be filed before the first meeting of creditors, which will point out that a part of the liabilities are contingent and that the financial standing of the bankrupt concern is not as better than would appear from the schedules already filed. In recording the schedules in last week's issue of THE CIRCULAR-WEEKLY no distinction was made between the secured and unsecured creditors. The schedules now on

file show that Eichberg & Co. hold securities of \$94,394.55 in precious stones, for a debt of \$50,491.67; Goldman, Sacks & Co. hold securities amounting to \$21,656 in precious stones and notes, the amount of the indebtedness in this case being about \$10,000; James A. Foster & Sons, London, are secured by precious stones to the amount of \$16,691.46, the amount of the debt being \$14,316.84, while David C. Townsend is a creditor for \$26,575.91, and is secured by the interest of Mr. Kleinschmidt in certain real estate at Boerum Place and Dean St., Brooklyn, and 450 Halsey St., Brooklyn, the valuation of which is placed at \$25,000.

**Death of Silas Stuart.**

Silas Stuart, who will be remembered as at one time a partner in the firm of Stuart & Shepard, dealers in watches and jewelry at 2 Maiden Lane, New York, died suddenly in the library of his home, 49 Church St., Montclair, N. J., last Thursday night from apoplexy. Up to within a short time of his death he was in excellent health.

Silas Stuart was born at Sag Harbor, L. I., March 3, 1848. At the age of 14 he went to New York City, where he found employment as a clerk in a jewelry store. He was at one time employed by the old firm of Wheeler, Parsons & Hayes. John E. Shepard, with whom he later became associated, had previous to the formation of the partnership been connected with several firms in the trade. The partnership was formed about 1877.

Mr. Stuart retired from business in 1892 on account of ill-health.

In 1881 he moved to Montclair, and when the town was incorporated in 1894 he was appointed treasurer for a term of two years. Each incoming mayor and council had re-appointed him continuously ever since. In 1902 he was also made custodian of the school funds. Mayor Henry Crawford, of Montclair, ordered the flags raised at half-mast on all public buildings in the town as a mark of respect to the deceased.

Mr. Stuart is survived by his widow, three sons and one daughter. The funeral was held Monday afternoon at 2.30 o'clock. The interment is to be at Sag Harbor, at the convenience of the family.

**Diamonds from German Mines for Kaiser.**

(From the Berliner Lokal-Anzeiger.)

Herr Dernburg, German Secretary of State for the Colonies, will, on his return from Africa, present the Kaiser with a golden casket filled with diamonds from German Southwest Africa.

The casket is the work of Herr Burmester, a jeweler of Cape Town. It is 12 centimeters long and six centimeters wide and has on the lid the initial "W" surmounted by a crown. Seven diamonds are set in the lid, representing the Southern Cross.

A jeweler of Ellsworth, Me., A. W. Greely, received for repair, recently, a watch which he discovered, with no little surprise, that he had repaired just 48 years before, when he was serving his second year as an apprentice. He made the discovery by means of a special mark which he had placed on the back of the watch dial.

**Safe Burglars Who Pleaded Guilty, at Newark, Sent to Jail for Fourteen Years.**

NEWARK, N. J., Sept. 12.—George E. Williams, Richard Vaughn and Martin Tiffany, three noted safe blowers and burglars of jewelry stores, who, as told in the last issue of THE CIRCULAR-WEEKLY, pleaded guilty to five charges lodged against them by the Newark police, have been each sentenced to 14 years in the State prison. With the commutation allowed for good behavior, they must serve about 10 years and eight months before they can hope for freedom. The sentence given to these men came somewhat as a surprise to the prisoners and their counsel in view of their pleas of guilty and seemed to be a particularly hard blow to Williams' aged parents, who were in the court room at the time.

When the men were called before Judge Davis, and punishment passed upon them, Vaughn made an ineffectual attempt to withdraw his plea of guilty and stand trial, his counsel having asked permission to retract the plea on all charges. Judge Davis, after reviewing the charges, imposed a seven years' sentence on each of the two burglary charges lodged against the men, and on the other three charges of carrying burglars' tools and robbery, etc., sentence was suspended. The sentences on the burglary charge are so arranged that one begins immediately as the other ends.

Williams, who was the leader of the gang, and most dangerous criminal, according to the police, would have received a heavier sentence than his companions, except for the fact that he had aided the police in clearing up a number of mysterious burglaries and also helped them in getting trace of articles which had previously been stolen. The men will be taken to Trenton next week.

**Thief Who Stole Diamonds from New York Firm Sentenced to Jail for Two Years.**

Frederick Kenney, one of the two men who were caught in an attempt to steal a package of loose diamonds from the firm of Cooper & Forman, 3 Maiden Lane, New York, on July 6, and who was detected, arrested and put in jail, pleaded guilty Friday to the charge of grand larceny in the second degree and was sentenced by Judge Swan in Part I. of General Sessions for two years in the State's Prison. J. D. Schenck, his companion in the attempt, pleaded guilty some time ago to grand larceny in the first degree, and is being held until October, when he will be sentenced by Judge Forster.

As told in a recent issue of THE CIRCULAR-WEEKLY, the two men called at the office of Cooper & Forman and asked to see some loose diamonds, representing that they were deputized by employes of a large concern to buy a gift for the superintendent and his wife. One of the men secreted a package of loose stones beneath his hat, but was seen by William Stenson, an employe of the concern, who surprised the two men by appearing with a revolver and accusing them of the theft. They ran for the door, but were caught and held.

Brooks, Simons Bro. & Co.; a representative of Brown & Mills; a representative of the Traub Jewelry Mfg. Co.; J. A. McIntire, Kreis & Hubbard; R. E. Williams, St. Louis Silver Plate Co.; M. F. Thornton, A. J. Hedges & Co.; S. A. Schreiber, Arnstein Bros. & Co.; J. K. Carlisle, Folmer, Clogg & Co.; R. L. Robinson, Dennison Mfg. Co.; S. F. Guggenheim, Ingomar Goldsmith & Co.

**Death of Chas. P. Murphy.**

NEW CASTLE, Ind., Sept. 9.—News of the death of Charles P. Murphy, a well-known citizen of this town, who passed away Saturday after an illness of about a week, caused profound regret among his many friends in the jewelry industry, as he had been connected with this trade for about 25 years. Mr. Murphy has been suffering from stomach trouble recently, but his condition was not considered critical until late on Saturday, when a specialist was summoned from Indianapolis, but arrived too late to give the sick man effectual relief, and he passed away Saturday evening.

Mr. Murphy, who was 55 years old, has spent practically all his life in the jewelry trade. He learned his trade as a young man and became an expert watchmaker, and for his ability as such was noted through his career. He started in business for himself in a small way in 1883, though he met with reverses about 10 years later, and continued in this town until his fatal illness seized him.

The funeral services, which were held from his late home yesterday, were conducted by the Rev. L. C. Howe, and the Masonic, the I. O. O. F. and the Knights of Pythias lodges, of which the deceased was a member, sent delegations.

Mr. Murphy is survived by three brothers.

Alex. Lischkoff, Pensacola, Fla., recently sold out to I. Fried, Montgomery.

**The Death of Fred A. Pennell.**

ATTLEBORO, Mass., Sept. 9.—Fred A. Pennell, a well-known resident of Attleboro, who died at his home, 48 Dunham St., Saturday last, after an illness of a week, was widely known in the jewelry trade, having been formerly a manufacturer of Providence, in which city he was born 56 years ago.

As a young man Mr. Pennell entered the employ of J. W. Richardson & Co., and after learning the trade worked for other firms until he started in business for himself, a little over 20 years ago, with William Atkinson and the latter's sons. The firm was first known as Atkinson & Co. and was later changed to F. A. Pennell & Co., and the business was finally transferred to the W. F. Main Co. The business was brought by the last concern to Iowa City, where Mr. Pennell was manager of the factory for several years. He later returned to the east and worked for various houses, and for the past two years has been a resident of Attleboro.

Mr. Pennell was married Sept. 18, 1881, to Miss Ida May Perkins, and she and two children, a son and a daughter, survive him. The funeral services were held yesterday afternoon, and the interment was at Grace Church Cemetery.

Mr. Pennell was prominent in fraternity work and was a member of the Wamsutta Tribe of Red Men, a member of Tilford Lodge, Degree of Honor and was recorder of the Providence Lodge No. 3, A. O. U. W. He had a wide circle of friends by whom he was greatly liked and highly respected.

**New Members Elected by the Jewelers Security Alliance.**

The regular monthly meeting of the Executive Committee of the Jewelers Security Alliance was held on Friday, the following members being present: President Sloan, Vice-President Champenois, Treasurer Karsch, Secretary Noyes, and Messrs. Alford, Bowden and Brown of the committee. The following new members were admitted:

F. L. West & Co., Boston, Mass.; G. W. Berisford, Piedmont, W. Va.; R. Campbell, Pryor Creek, Okla.; W. A. Harper & Co., Gardiner, Me.; A. W. H. Hellberg, Gardnerville, Nev.; F. L. Hunke, Albany, N. Y.; F. F. Johnson, Genoa, Nebr.; Martin Kunkel, Albany, N. Y.; C. A. Lamont, Thompson, Pa.; W. T. Lloyd, Washington, Kans.; W. A. Mashaw, Winnfield, La.; Mitchell Jewelry Co., Red Cloud, Nebr.; A. E. Morlan, Gulfport, Miss.; Nordman Bros. Co., San Francisco, Cal.; O'Donnell & Boucher, Utica, N. Y.; Mrs. E. G. Pfeiffer, Chicago; Alban P. Reich, Dolton Station, Ill.; H. H. Savage & Sons, Boston, Mass.; Jerome A. Scherer, Buffalo, N. Y.; Silver & Partridge, Boston, Mass.; George L. Stanley, Ponca City, Okla.; Taubman-Harding & Co., Fort Plain, N. Y.; L. W. Anderson, Ottawa, Ill.; John O. Bellis, San Francisco, Cal.; John Frick and S. Kaplan & Co., New York; Max Morgan and O'Neill & Eher, San Francisco, Cal.; Palace Jewelry Store, Walnut Ridge, Ark.; E. J. Thomason, McGregor, Tex.; Wm. E. Wallace, Moscow, Idaho; George Yackle, Utica, N. Y.; Philadelphia Watch Case Co. (two additional), Riverside, N. J.; C. E. Fritts, Sag Harbor, N. Y.; Castle Co., Inc., New York; O. C. Blount, Lockport, N. Y.; American Gem & Pearl Co., New York; P. W. Gaff, Lyons, N. Y.; C. F. Hill, Akron, O.; Ed. Huback, San Francisco, Cal.; T. Edw. Poole, Skaneateles, N. Y.; Martin E. Sturn, Buffalo, N. Y.; C. A. Wagner, San Francisco, Cal.; Yung & Debus, Buffalo, N. Y.; Hulett & Church, Ogdensburg, N. Y.; A. L. Schiller, Scranton, Pa.; Bishop & Bishop, Newark, N. J.; Oppenstein Bros., Kansas City, Mo.; F. J. Dahlmeyer, New Haven, Conn.

TO EUROPE.

Frank Mossberg, Attleboro, sailed for Europe. Max Ellbogen, of the Stein & Ellbogen Co., Chicago, sailed Saturday.

**Market Prices for Silver Bars.**

The following are the quotations of silver bars in London and New York, as reported by Zimmermann & Forshay:

	London	New York
Sept. 8.....	23 15 16d	\$3.50
" 9.....	23 3 4d	"
" 10.....	23 13 16d	"
" 11.....	23 13 16d	"
" 12.....	23 13 16d	"
" 14.....	23 13 16d	"

**Warrants Issued for the Arrest of Solomon Sill, Baltimore, Md.**

BALTIMORE, Md., Sept. 13.—Solomon Sill, whose store was located at 137 N. Gay street, is being sought by the police on the charge of embezzling sums of money from several banks. The first warrant was issued by the Third National Bank on Wednesday, charging the jeweler with the embezzlement of over \$300, while another warrant was issued later by the Old National Bank, on the same charge, alleging he secured \$750 from them. The detectives who are working on the case of the missing man is in hiding with his wife out of the city. Mr. Sill's wife disappeared with him. She frequently visited him in his store and is well-known to many of his customers. The Marine National Bank is also interested, it is said, in Sill's apprehension.

Sill's apparently prosperous business in Baltimore and his deposits with the Old National Bank put him in the confidence of the bank officials. He secured the \$750 from them several months ago on a note that was due last week. The money was forwarded to him by the bank, but it was not cashed, resulting in a private investigation which found that the jeweler had left the city. The police were notified and then followed the action of others who were tested.

The man had been highly recommended by his friends as to his reliability, integrity and honesty. When Sill left the city he took with him all his jewelry and household goods, his friends who were associated with him not being aware that he intended to leave the city.

**Prinier Diamond Mining Co. to Raise Special Reserve Fund to Write Off Debt to Transvaal Government.**

A special letter received Monday by the *New York Journal of Commerce* from Frankfurt, Germany, says that the *Frankfurter Zeitung* has received a cablegram from its Johannesburg correspondent stating that the diamond crisis has of late lost its acuteness. It is declared on excellent authority that the financial situation of the Prinier Diamond Co. will be particularly strengthened by the fact that the Government will consent to the constitution of a special reserve fund by means of annual payments off before the distribution of any profits, the amount of such writings off to be fixed by law.

It is not yet certain, however, whether the Government proposals will be laid before the Transvaal Parliament during the coming season, or whether they will be deferred until next year.

**Death of Joseph Gotthelf.**

MEMPHIS, Tenn., Sept. 9.—The funeral of Joseph B. Gotthelf, for many years prominent in the jewelry business in this city, who died at his home, 133 N. Bellevue Boulevard, Saturday night, was held from the residence Monday afternoon. The body was interred in the Jewish cemetery.

Mr. Gotthelf, who was 63 years old, came to Memphis as a young man. He was well known in this city and had many friends. He is survived by his widow, Nannie Gotthelf, two sons and four daughters.

**National Monthly Import and Export Statistics.**

WASHINGTON, D. C., Sept. 9.—The records of the Treasury Department contain the following comparative statistics of interest to the jewelry trade for July, 1907, and for the seven months ending July 31, 1907.

**Burglars Make Bold Attempt to Break Into the Store of the Hennegen-Bates Co., Baltimore, Md.**

BALTIMORE, Md., Sept. 14.—A bold attempt to break into the skylight of the Hennegen-Bates Co.'s building, yesterday morning, was thwarted by the night watchman. It was shortly after 3 o'clock in the morning when the watchman, Henry Yingling, who was making his rounds, espied the shadow of a tall, slim man working at the inner skylight. He immediately set about notifying a private detective agency and the police, but the robber had evidently heard some noise, and suddenly disappeared, for when the police arrived they found some things he had stolen from an adjoining haberdashery, which he had deserted in his hurry to escape.

Investigation showed that the man had gained an entrance through the outer wire-glass skylight, and had been lowered to the inner section, on which he was at work when apprehended. A close inspection showed where the beading had been partly removed. Access to the roof had been made somewhat easy by the scaffolding of a new building erected on the second door above. A rope ladder was used to get from the scaffolding to the roof.

**Jewelers' Gold Bars Withdrawn and Exchanged at New York.**

Week Ended Sept. 12, 1908.

The U. S. Assay Office reports:

Gold bars exchanged for gold coin.....	\$387,363.08

## CROSSMAN COMPANY

3 Maiden Lane, New York

### North Attleboro.

A. B. Chace is back from the west. Fred S. Gilbert returned Friday from west.

The factory of Whiting & Davis, Plainville, is working nights.

James R. Cooney, a jewelry worker 35 years, died early last week.

Charles Struntz, of Seaman & Stru Philadelphia, was in town last Friday placing orders with some of the local manufacturers.

David Blakeney, a veteran jeweler, his hand crushed under a stamp last Friday while at work at the Plainville factory.

John McDonald, toolmaker at the factory of the Estate of O. M. Draper, was married in Pawtucket, Sept. 8, to Miss Yvonne Blanchard.

Frank M. Sturdy, of the J. F. Sturdy Sons Co., met with a severe accident Monday. While cranking an automobile sustained a broken wrist.

George L. Paine has returned from a western trip in the interests of his company. The G. L. Paine & Co. is working 12 hours a day in order to fill orders.

William F. Maintien was awarded a prize for having the best decorated costume at Lake Archer, Wrentham, during Labor Day carnival.

Maintien Bros. & Elliot, Friday, presented Miss Edith Cumberland, an employee who left them to enter college, with a watch and chatelaine.

The bracelet department of J. J. Sisson & Co. is working until 9 o'clock every day. In addition the concern has hired 10 additional bracelet makers during the week.

Thomas Aston, one of the earlier workers of this section, died last week, his 81st year. Deceased was engaged in the jewelry business at one time with the Totten. By trade Mr. Aston was a sinker. He has not followed his trade for many years.

John E. Tweedy, of Cheever, Tweedy & Co., has been endorsed by the local Republican town committee for the legislature. Tweedy has not yet finally consented to do so as the business sacrifices that the post would compel him to make, must be given consideration.

### Trade Gossip.

A new Knights of Pythias emblem has just been placed upon the market by J. J. Cowan, 373 Washington St., Boston, Mass., and patent applied for on the design.

The Aikin-Lambert Co. is introducing a new clutch point pencil which is one of the most satisfactory styles that have been produced in any refill pencil. The pencil will hold leads of almost any size and is a convenient size for the vest pocket.

The Handel Co., Meriden, Conn., is issuing a new catalogue in colors showing its large line of decorated shades. The company makes a specialty of domestic goods for the jewelry trade, consisting of electric and gas lamps. Every jeweler ought to have a copy of this catalogue which will be sent free upon application to the manufacturers.

## Providence.

### TRADE CONDITIONS.

Manufacturing jewelers in this vicinity report a good improvement in nearly all lines, but collections remain slow. Evidences of the improvement in business are to be found in the classified advertisements of the daily newspapers. One of the past week there were 14 calls for manufacturers in the jewelry and kindred

Henry A. Kirby's shop is now working six days a week, nine hours per day.

Harry Cutler, of the Cutler Jewelry Co., is enjoying a vacation trip at Lenox, Mass. Edward J. Gilrain has started a shop for plating and electroplating at 220 Eddy

the National Jewelry Co., at 113 Point Street has been succeeded by the Ross Jewelry Co.

More & Hill have taken a shop at 95 Eddy St. to engage in stone setting and work.

The Providence Art Metal Co., 137 Cliff Street, has added a new line of buckles and watch pins.

Thomas J. Pollard left last week on an extended western trip in the interests of the Ford & Darling.

W. H. & Son is the style of a new concern at the junction of Broad St. and Prairie Street for engine turning.

Frederic C. Noyes, designer, chaser and cutter, has removed from 101 Sabin Street to 45 Eddy St., room 16.

John S. Drabble, with W. J. Davis, of Woonsocket, has returned from a vacation in various cities throughout Virginia.

W. A. Limbach, western representative for Theodore W. Foster & Bro. Co., is making a business trip through Ohio and Michigan.

The football team representing the Gorham Mfg. Co. has become a member of the New England Football League of Rhode Island for the current season.

Ed H. Cole, who started a short time ago to manufacture novelties at 113 Point Street under the style of the Portland Novelty Co., has discontinued business.

Several of the older manufacturing jewelers of this city attended the funeral of R. Pennell, which took place on Tuesday from his late home in Attleboro.

EA White, representing the George L. White Mfg. Co., of this city, was one of the speakers among the trade in Chicago and other western cities during the past week.

Greenberg & Co. is the name of a new firm that has started at 113 Point Street to manufacture a special line of combs for the combing trade and department stores.

Among the recent marriage licenses issued in this city was one to Dominick T. Lomb, a comb manufacturer, Leominster, Mass., and Elizabeth Jennings, of the same town.

Wm. J. Straker has withdrawn from the manufacturing jewelry firm of Mitchell & Straker, at 95 Pine St. The business will be continued at the old place by Oscar Mitchell.

The crack yacht *Medric II.*, owned by Wm. H. Frost, was the winner of the third annual race for the Possner Cup, held under the auspices of the Edgewood Yacht Club on Labor Day.

Ms. Sarah Greene Waterman, who died

at Woonsocket, Sept. 8, in the 91st year of her age, was the widow of Henry Waterman, for many years a manufacturing jeweler at Millbury, Mass.

Barton A. Ballou has recently registered with the State Board of Public Roads the purchase of a 30-horse power Corbin runabout automobile and Richard Wildpret has registered a 20-horse power Stevens-Duryea touring car.

A carboy of vitriol fell from one of the George L. Clafin Co.'s gears on South Water St., Friday afternoon, the caustic fluid pouring over the pavements and necessitating the services of a fire engine company to wash it off the highway.

Among those who participated in the annual outing and reunion of the Providence Marine Corps of Artillery Veteran Association at the Warwick Club on Friday last were Edgar R. Barker and William Clark, of the Clark & Coombs Co.

The nominee of the Prohibition party of Rhode Island for the office of Secretary of State is William G. Lawton, an employe of the Gorham Co. Mr. Lawton is the son of John F. P. Lawton, secretary and assistant treasurer of the Gorham Co.

The building corner of Clemence and Weybosset Sts., owned by the Lederer Realty Co., was damaged by fire Friday night to the extent of \$5,000. Damage of about \$300 was done by water in the United Jewelry and Optical Co.'s store at 197 Weybosset St.

Albert S. Vennerbeck, of Vennerbeck & Chase, won the State Championship on the golf links of the Wannamoisett Country Club on Saturday, after a four days' tournament. John Shepard, Jr., was also one of the contestants, being defeated in the semi-finals.

Henry G. Thresher, of the Waite-Thresher Co., and his family, have returned from an extended automobile trip through Maine, New Hampshire and eastern Canada. They were accompanied by Mrs. William W. Flint, widow of W. W. Flint, of Flint, Blood & Co.

Providence and Attleboro manufacturing jewelers, who are members of the Manufacturing Jewelers' Board of Trade, are interested in the failure of the J. P. Morgan Jewelry Co., of St. Louis, for about two-thirds of the firm's total liabilities, which are announced by the firm as \$20,955.37.

George W. Parks, of the George W. Parks Co., announced the past week that he was not a candidate for re-election to the City Council. He is prominently mentioned as Republican candidate for nomination as Mayor. Alderman Parks has been a member of the City Council for eight years.

Raffaele Marino has entered a suit in the Superior Court to recover \$7,000 damages from his former employers, D. M. Watkins & Co., manufacturers of jewelers' findings, 95 Pine St. Marino claims that he was working on a drop which was operated by a belt so old and worn that it broke or slipped and let the hammer of the drop fall upon his right hand with great force, crushing the bones. Marino claims that his earning capacity for the remainder of his life has been greatly reduced by the accident.

Labor Day was observed by the shutting down of all the manufacturing jewelry es-

tablishments, as well as all of the retail jewelry stores in this city. George E. Brady, former international president of the Jewelry Workers' Union of America and one of the foremost workers in the endeavors to form a local union among the jewelers of this city, was an aide to the marshal of the first division in the parade. The local jewelers' union, which at one time was said to number between 600 and 800, was conspicuous by its absence.

In appreciation of past favors, the employes of Blanchard, Young & Co. had for their guests at an outing at Boyden Heights, overlooking Narragansett Bay, Saturday afternoon, Henry A. Young, Alfred Ainsworth, Edward C. Wilde, of the firm, and their families. The women employes of the firm were also guests. The party, numbering about 100, went to the Heights in chartered cars, and after the shore dinner was disposed of games were in order, including an exciting baseball game between the married and single men, which the latter won by 12 to 6.

About 80 employes of the chasers' and engravers' departments of the Gorham Mfg. Co. held their annual outing Saturday afternoon at the Warwick Club. Special electric cars were boarded immediately following the closing of the works at noon and took the merrymaking silversmiths out of town. At the club there was a dinner and then games, much interest centering in the baseball game for the Gorham cup, won last year by the engravers. The game Saturday was a tie. Just as the fat men's race was ending William Westerman, one of the contestants, fell and sprained the ligaments of one of his legs so badly that a physician had to be called and later Mr. Westerman was removed to the hospital in an ambulance.

The weekly meeting of the advisory council of the New England Manufacturing Jewelers' and Silversmiths' Association was held Thursday afternoon and the entire attention of the members was devoted to the consideration of the report of the special committee that was appointed to prepare a letter in explanation of the Canadian Stamping Law. The attendance was unusually large, the interest in the Canadian law being very general. The matter was first called to the attention of the association at a meeting two weeks ago when a committee consisting of William A. Copeland, of the Martin-Copeland Co.; Theodore W. Foster, of the Theodore W. Foster & Bro. Co.; Everett L. Spencer, of the E. L. Spencer Co.; George H. Holmes, of the George H. Holmes Co., all of this city, and Charles P. Paye, of Attleboro, was appointed. The report of this committee was discussed in its various details, but the consideration was not completed and was continued until the next weekly meeting.

Charles B. Hibbard, Pulaski, N. Y., has retired from business after being connected with the jewelry trade for 40 years, and has sold out to John C. Peace, who took possession Sept. 4. Mr. Hibbard has been widely and favorably known in the vicinity of Pulaski for many years. He was at one time head of the business of C. B. Hibbard & Co., but succeeded this firm in 1896, since which time he continued the business alone.

#### TRADE CONDITIONS.

A sign of the revival in the jewelry business was quite plainly indicated, during the past year, by the continued demand for additional help. The advertisement asked for 100 purse chain make

Harry E. Clap was in New York on a business last week.

Herman T. Regnell has returned from a vacation passed in Maine.

The Bristol Die & Tool Co. has been chased by Providence men and has been removed to that city.

The C. D. Lyons Co., Mansfield, is planning to make its own gas and to also provide its own electricity.

James E. Blake entertained, last week, Judge Treeber, of the United States District Court of Arkansas.

Frank M. Mossberg sailed to-day for England, where, he will enjoy a trip, which business will be combined with pleasure.

Charles M. Robbins has formally announced his withdrawal as a candidate for Congress in opposition to Congressman William C. Lovering.

Major Everett S. Horton was one of the speakers on Labor Day at the annual union of the 47th Massachusetts Regiment held in the American House, Boston, on Labor Day.

C. M. Dunbar, Winthrop F. Barden, L. Barnes, William F. Maintien and George H. Herrick were local jewelers to be honored at the annual election of officers of the Bristol Commandery of Knights Templar.

George H. Sykes, of Sykes & Strang, of Bristol, was pleasantly surprised by the members of Bristol Commandery of Knights Templar at the last meeting, when he was presented with a loving cup. It was a testimonial of the gratitude felt by the members for the valuable service rendered by Mr. Sykes as drill master during the past 12 years.

Robert P. Marble, assistant treasurer of the W. B. Marble Co., has filed his report with the Commissioner of Corporations, as follows: Machinery, \$4,100; and debts receivable, \$10,600; merchandise, \$13,600; tools and dies, \$12,500; good will, \$5,000; total, \$45,660. Capital stock, \$500; accounts payable, \$4,766; floating debt, \$2,107; profit and loss, \$16,289. Total, \$45,660.

### Buffalo, N. Y.

The Buffalo Times recently published a large three-column cut of the front building of Best & Co., opticians and jewelers, at 11 E. Genesee St.

The first meeting of the Buffalo Optometrical Society was held a short time ago in room 139, Lafayette Hotel. Among the interesting subjects which came up at the meeting was one relating to the establishment of an optometrical clinic in Buffalo. Applications for membership were reported from Louis Gottlieb, Ralph Oakes, and Otto H. W. Frick.

W. L. Pegg, Thomasville, N. C., has moved his store to E. A. Pegg, Greensboro, and moved to the latter place. The business merely exchanged locations.

## Pittsburg.

George W. Biggs and J. Loughrey Robb have returned from a pleasant jaunt to Canada.

Having decided not to manufacture jewelry, the Kerner Mfg. Co. has changed its location for a charter.

The stock in the stores of the Pittsburg Watch Co., which went into bankruptcy recently, was offered for sale yesterday.

Mr. and Mrs. Carl Leighner, Butler, returned to Pittsburg last week on business and attended the Pittsburg Exposition, which opened a week ago for a season of 10 days.

The stock of J. F. Murphy, of Dawson, who recently filed a petition in bankruptcy is being appraised, and the trustee, George P. Christy, hopes to be able to make a profit on the result this week.

Thieves entered Wylie Bros' store at Pittsburg both early last Thursday morning and Friday, and succeeded in carrying off several watches and a quantity of jewelry. Other places in the town were also entered. There is no word of the thieves.

Among the out-of-town jewelers who returned to Pittsburg last week were the following: F. H. Hayes, Washington; A. J. Ammeyer, Burgettstown; B. E. Brown, Wexford; Harry Furtwangler, Greensburg.

Sele F. Roberts, of E. P. Roberts & Co. and Mrs. Roberts have returned from Europe. Mr. Roberts says that European jewelers are not selling the goods this year as they did last year, for fewer Americans are going abroad.

"Old Home Week" was celebrated last week at Monongahela, Pa., and all of the jewelers of the town profusely decorated the places of business. A similar celebration was also observed at Carnegie, Pa., and jewelers there also decorated their establishments in honor of the event.

W. E. Lewin has rented from the Eisner Phillips estate, the large building on the corner of Wood St. and Fifth Ave., for a term of 10 years at a total rental of \$10,000, and will open a department as soon as he can make alterations in the building. It is understood that the building will have a jewelry department.

A meeting of the members of the Jewelry Duckpin League will be held to-morrow night at the Hotel Schenley, when arrangements for enlarging the organization will be taken. Rules will also be made and a schedule arranged for the coming year. It is proposed to have 10 or 12 members in the league, and already a number are applying for admission.

Edward Hall, who recently inherited \$50,000 and who is serving a seven-year term in the penitentiary for robbing Raab & Niemann's store, has served notice on the State to apply for a pardon, which will be opposed. Hall did not get away with his booty, but he had every thing arranged to carry off about half of the stock of the store at the time the robbery occurred three years ago.

James Alexander Hardy, of the Hardy & Co., has had plans prepared for a new jewelry building, which he contemplates erecting in Penn Ave., adjoining the Pennsylvania building, which he also owns. The contract

has not been let, but if Mr. Hardy carries out his ideas the building will be one of the handsomest in the street. He owns the property on the east side of the Pennsylvania building.

David Levy, a Wylie Ave. pawnbroker, has brought a suit against Mrs. Alice R. Donnelly for \$25,000 damages, alleging that through neglect she allowed the house and property at 513 Wylie Ave. to go to ruin. It collapsed and fell on the property of the plaintiff at 511 Wylie Ave., and asserts that great damage was not only done to his property, but to his store, and brings the action to recover. The suit is attracting interest.

Manufacturing jewelers of Pittsburg will be asked to sign an agreement, requiring customers to make settlement with the manufacturers every 30 days. If the plan be followed out no work will be done for any jeweler who fails to pay his bills every 30 days. A system will be inaugurated whereby each manufacturer signing the agreement will be notified every 30 days (by those entering into the arrangement) of persons who have failed to pay their bills within the specified time. The manufacturers assert that the character of their work is such that they must of necessity advance cash for material and wages, and that under existing conditions the best that they can do is to carry their customers for a month. This plan has been followed by other lines of trade in Pittsburg, and it is said to be proving successful.

The schedules in bankruptcy of William James Eroo, New Castle, have been filed in the United States District Court in this city, as already noted in THE CIRCULAR-WEEKLY, and show his liabilities to be \$15,751.98, and his assets \$8,395.01. He owes employes \$357.98 for wages, and owes the Courtney heirs \$537.81 for rent. Other creditors to whom he owes in excess of \$50 are: A. H. Smith & Co., \$438; Cross & Beguelin, \$234; S. B. Chaplin Co., \$217; Ehrlich & Sinnock, \$57; Fry Cut Glass Co., \$78; Ingomar Goldsmith & Co., \$1,400; Heeren Bros. & Co., \$77; International Silver Co., \$137; Johnston Optical Co., \$171; Miller Jewelry Co., \$155; Wm. C. Penfold Co., \$99; Reed & Barton, \$646; Rodney Pierce Optical Co., \$44; E. Ira Richards Co., \$173; H. P. Sommer & Co., \$73; Wm. Seckles, \$178; Thier, Krauss & Beam, \$140; H. W. Wheeler & Co., \$1,200; Whiting Mfg. Co., \$74; A. Wittnauer Co., \$555; Scribner & Loehr Co., \$7,558; Joseph Cowan, \$112; C. Dorflinger & Sons, \$90; First National Bank, New Castle (note), \$50; James Sutherland (note), \$636. Eroo says that the stock in his store is worth \$4,000 and store fixtures \$5,500. He has outstanding book accounts amounting to \$860. The lease of his present location expires next April. He also has two life insurance policies in eastern companies, with no surrender values. The court has as yet made no order toward directing how Eroo's affairs shall be adjudicated.

The Cosmopolitan National Bank, which closed its doors last week, on orders from the comptroller of the currency will pay depositors in full, but it will take a little time to liquidate the affairs of the institution. S. Davis, of S. Davis & Co., was one of the directors of the bank, being one

of its organizers. The bank opened for business about seven years ago and the charge is made that when the bank examiner made an investigation, he was intoxicated. Mr. Davis will not discuss the matter, but E. A. Kitzmiller, the vice-president, says that the depositors and stockholders will not lose a dollar. Mr. Davis kept his account at the bank, but did not do business exclusively with that institution. It has not been announced just why the bank was closed, but it is now asserted that the bank was not insolvent. The deposits of the institution totaled \$900,000, its liabilities and assets exceeding \$1,800,000.

## Lancaster, Pa.

Harry Kiehl, of Louis Weber & Son, is on a pleasure trip.

Henry Musselman, with E. P. Sangsten, Danville, Va., is in Lancaster on a visit to friends.

Jack L. Straub was among those who had horses entered at the amateur horse show held here last week.

Edgar Hagenberger, Mt. Joy, has returned from a two weeks' trip to Washington, Atlantic City and New York.

Morris Bucher, Milwaukee, who spent last week in Lancaster, his old home, lately engaged in the jewelry business for himself.

John Kohr and Philip Miscally, members of a long-distance walking club, last Sunday "hiked" it to Reading and return, a distance of about 70 miles.

The residence of A. H. Rosenstein, president of the Lancaster Silver Plate Co., on N. Duke St., will soon become the parsonage of the First Presbyterian Church.

R. J. Pettengill, Haverhill, Mass., a Bowman Technical School student, has finished his course in engraving, and returned to his home town, where he will take a position.

The following members of the trade in the county visited Lancaster city jewelers last week: J. M. Kreider, Ephrata; Henry Foehl, Columbia; S. H. Miller, Mt. Joy; J. H. Sensesing, New Holland.

E. R. Kant, agent of the Non-Retailing Co., has returned from a successful trip up the Cumberland Valley, and will immediately start out on a western trip. C. E. Foose, of the same concern, has gone on a business trip through Virginia and the south.

A pair of clever tricksters managed to elude the police last week and get away with considerable cash, received from bogus sales on silverware. The men operated on a clever plan. One would call at a house, exhibit his samples and agreement of sales, and while so engaged his mate would call, pretending ignorance of the other's presence. A laugh would follow all around, and one of them was pretty sure of getting an order and \$2 down to bind the bargain. The men got out of Lancaster while the police, who had been warned of the pair, were looking for them.

George H. Bassinger, 12 Glen St., Glens Falls, N. Y., is closing out his business by a series of special sales and will retire from the jewelry trade early next year after a career extending over 48 years.

### Connecticut.

J. Clulee, Wallingford has assigned the International Silver Co., Meriden, a novel design for the handles of spoon forks.

Mayor George M. Landers, of Britain, returned home from his vacation last week with Charles F. Smith, president of Landers, Frary & Clark.

P. T. Ives, Meriden, accompanied by wife, arrived home, about a week ago, from a Summer sojourn in Europe. They had toured England, Ireland, Scotland and France.

S. Abat, for some time past in the employ of factory "L," International Silver Co., Wallingford, died recently as a result of eating toadstools which he believed to be mushrooms.

In the auditorium of the Town Hall, Wallingford, on the evening of Sept. 10, a local Republican Club held a meeting which was addressed by President A. Wallace, C. H. Tibbits and others.

The directors of the International Silver Co., at a meeting held recently, declared a dividend of one per cent. on the preferred capital stock, payable Oct. 1, to stockholders of record Sept. 18. The books will close Sept. 18 and reopen Oct. 2.

C. B. Bradley has been elected as treasurer of the Bradley & Hubbard Co., Meriden. Mr. Bradley, in his official capacity, is assistant to his brother, M. L. Bradley, who has been treasurer of the concern for many years.

Harry Smith, a boy who was taken into custody in South Norwalk about a week ago, confessed that he robbed the store of several merchants, including the store of the establishment of A. Tarlov, 111 Water Street, that place. When arrested, the youth had in his possession \$25 in cash.

Frank H. Hotchkiss, who for over 20 years had been associated with the Thomas Clock Co., Thomaston, died at home, at that place, recently, after an illness which extended over two weeks. The factories of the concern closed on the noon of Sept. 9 out of respect to the memory of the deceased. The interment was in Hillside cemetery.

Joseph Adams Peck, brother of Dr. E. Peck, who, with Edward Stevens, founded the New Haven Clock Co., New Haven, is said to have been the first to introduce American clocks into English market at his home, 28 Elm St., New Haven, Conn. He died on Sept. 5, in the 85th year of his age. The deceased was also a brother of Prof. Peck, of Yale University.

O. H. Benoit, of Acushnet Ave., New Bedford, Mass., removes to larger quarters, convenient quarters on the same street, at the same fare.

C. C. F. Brandt, a jeweler of Louisville, Ky., who was recently threatened with prosecution by the school board of that town because he had expressed his opinion of their acts on a postal which he mailed through the mails, after making an investigation, has publicly admitted the charge against the board was not warranted and has withdrawn it. The prosecution of the jeweler under the States mail laws has now been dropped.

## Philadelphia.

W. Rose, Pine St., above 11th St., returned last week from a pleasure trip to Ocean City, N. J., where he was with Percy Savery, of the Wadsworth Watch Co., was a visitor to this city's trade week.

Ganz, representing the Gustave Fox Cincinnati, O., was a visitor to this city's trade last week.

P. White is on a cruise with a party of friends along the southern Atlantic coast in the Chesapeake Bay.

Joseph Crosland, 4224 Frankford Ave., is reported as having almost completely recovered from a serious illness.

Ernest Hoffman, bookkeeper for J. B. G. & Co., 725 Sansom St., is spending his vacation days in Reading, Pa.

Victor Kurtz, 900 Chestnut St., returned last week from a trip down east. He reports that business is improving.

L. Stone, a prominent Pottstown, Pa., merchant, spent several days last week in Atlantic City, N. J. on a pleasure trip.

J. Wilkinson, of Lyons & Wilkinson, 10 Lancaster Ave., spent several days last week in Atlantic City, N. J., on a pleasure trip.

William Lewis, Berwyn, Pa., returned last week from Lake Placid in the Adirondack Mountains, where he had spent the summer.

Andrew S. Smith and George W. Fisher, with L. P. White, and F. C. Bode, 1804 Market St., departed Saturday on a fishing excursion to Tuckertown, N. J.

Abriel H. Mayer, formerly a manufacturing optician at 728 Sansom St., was discharged as an involuntary bankrupt in the Third States District Court last week.

George K. Ware, Atlantic Ave., Atlantic City, N. J., is receiving the congratulations of his friends in the trade upon the presentation to him, last week, of a fair tiny vessel.

It is reported by travelers returning from their summer trips that M. H. Barbee, of Abingdon, Va., has taken over the business of Lee & Barbee and will continue it under the old firm name.

M. Sickles, of M. Sickles & Sons, and M. Polak, of the traveling staff of the firm, have both returned from extended trips and are preparing to "take the road" again without delay.

George Sickles, of M. Sickles & Sons, has returned with his family from Atlantic City, N. J., where they had passed the Summer. He has taken apartments at the Brantwood Hotel for the Fall and Winter.

W. Zanders, formerly with the J. Frank & Co., Dover, Del., is reported to have purchased a property in Dover, Del., with the intention of starting a retail jewelry store there on his own account.

William Pinkstone, retailer, 19th and Arch Sts., has been elected president of the Adams County, Pa., Fair Association and is devoting much of his time to making the fair a success for the farmers, cattle breeders and visitors.

Wells Bros. manufacturing jewelers, 409 Market St., Wilmington, Del., have installed a new optical plant in connection with their establishment and propose grinding lenses and manufacturing optical appliances and

frames in connection with their jewelry business.

J. Campbell, watchmaker and jeweler, recently located in New York, but formerly of this city, where he conducted a retail store at 10th and Spring Garden Sts., has returned to Philadelphia and opened quarters at 1209 Fairmount Ave.

Caspar Weiss, a Lilliputian and the smallest watchmaker in the world, who has been at Cape May during the Summer, is convalescent after an attack of typhoid fever. Mr. Weiss is with the watch repairing department of Lit Bros.

L. Jackson, watchmaker, opened last week a retail jewelry store of his own at 2612 Germantown Ave. Mr. Jackson is well known to the trade and enters business for himself with the best wishes of the trade for a prosperous career.

An attempt was made last week to rob the pawnbroker's establishment of Weil Bros., at 13th and Tasker Sts., but the thief was discovered by a policeman, who fired at him and wounded him. The thief, however, escaped, despite his wound.

Lynn, Thomas & Co., 407 Market St., Wilmington, Del., are making extensive alterations to their store for the Fall trade. The watch repairing department is being moved from the rear to the front, which move is expected to draw more trade.

Samuel J. Merchant, head of the Merchant Cut Glass Co., Woodbury, N. J., died at the Pennsylvania Hospital, in this city, last week, as he was about to undergo an operation for stomach trouble. Mr. Merchant was born 62 years ago in Worcestershire, England.

The daughter of D. H. Wolff, watchmaker and retailer, at 907 Vine St., was robbed of a purse containing \$17 and a gold watch in a department store, last week, by a young woman to whom she entrusted her purse while she made purchases and examined some linens.

It is announced that Louis Kuebler, a widely-known watchmaker, has purchased the stock and fixtures of the store of Max Henschel, 2317 Germantown Ave., who was recently declared an involuntary bankrupt. Mr. Kuebler will continue the retail jewelry business at the old stand.

Among the visitors to this city's wholesale trade last week to purchase stock were: A. M. Kendall, Millville, N. J.; John MacPherson, Mauch Chunk, Pa.; R. W. Quicksall, Mt. Holly, N. J.; David Krause, North Wales, Pa.; Thomas J. Apryle, Johnstown, Pa.; B. Reiner, Bangor, Pa.; Henry Bolte, Atlantic City, N. J.

A. Rosenblatt, optician, Germantown Ave. and York St., opened up last week a jewelry department in connection with his optical store. Mr. Rosenblatt made attractive alterations to combine both jewelry and optical lines in his store. He has been in the optical business exclusively at the Germantown Ave. store for some years.

What is believed to be the thinnest watch which was ever made is in the possession of D. A. Wolff, 907 Vine St., for repairing. It is of Geneva make and scarcely thicker than a piece of heavy paper. Mr. Wolff declares it to be the thinnest watch made. He says it was made about 25 years ago and is intrinsically, as well as a curiosity, is valuable. Despite its delicacy he says it

keeps excellent time and is a magnificent example of a watchmaker's skill.

Joseph H. Deschamps, manufacturing jeweler and diamond dealer, northwest corner 7th and Chestnut Sts., has recovered a diamond valued at \$387, which was sold by him to Samuel P. Landgon, formerly a coal dealer. Mr. Deschamps accepted as security for the diamond a bond which Landgon said was worth \$1,012, but which proved to be worth only \$100.

The early closing agreement among wholesale jewelers of this city ended Sept. 1, but many have been keeping the Summer hours until the middle of September. H. O. Hurlburt & Sons, the G. S. Lovell Clock Co. and L. P. White closed early last Saturday. Beginning this week all wholesale houses will return to the regular hours, closing on week days at 6 p. m. and Saturdays 5 p. m., with a few exceptions, where the pressure of business will keep the establishments open until 6 o'clock Saturdays as well as other week days.

The clambake of the Philadelphia Jewelers' Club was given yesterday afternoon at Burlington Park in the upper Delaware River. About 200 jewelers of this city, neighboring towns and from New York and the east were guests of the club and enjoyed themselves hugely. A specially chartered boat left the river front at noon and returned in the evening. Music and vaudeville entertainment made the time pass pleasantly. As the clambake was held as THE CIRCULAR-WEEKLY was going to press, a full report will be given in the next issue.

## Newark.

John D. Dalzell, of J. D. Dalzell & Co., has been spending a number of days on business in New England.

W. I. Boyce, traveling salesman for the David C. Dodd Co., will start west this week for his first trip of the season.

George R. Howe, head of Carter, Howe & Co., and head of the State Commission on Industrial Education, has returned from an extended vacation in Vermont.

Otto Roggenkamp, retail jeweler, Elizabeth, served last week as foreman of a jury in Supreme Court session which tried and found guilty an Italian murderer, one Dominick Manago.

Charles Vongerhoets, a diamond cutter, of 701 Bloomfield St., Hoboken, was fined \$5 for disorderly conduct, last Wednesday, by Recorder McGovern. Vongerhoets, whose right eye was blackened, had given the policeman some trouble when arrested, and it was to punish his contempt for the blue uniform that the fine was imposed.

Eugene Unger has succeeded his late brother, Herman Unger, as president of Unger Bros. The former was vice-president and treasurer until recently, and advanced as a result of the unfortunate tragedy which removed his brother's name from the roster of veteran and successful Newark manufacturers. The administration of the business will be continued with practically no difference, because the late Herman Unger had been for some years inactive in the affairs of the concern. The annual meeting of the corporation will be held in January, so for the present no other changes will be made.

# GORHAM SILVER

## GORHAM FALL SILVERWARE

¶ For the approaching Fall and Holiday seasons the Gorham Company have made thoroughly adequate preparation, and for many months past their designers and craftsmen have sedulously engaged in the production of new and original examples of Gorham activities.

¶ As a consequence, the Company's display of Fall and Holiday goods has never been more complete or so comprehensively varied. New and attractive patterns in all the standard lines, as well as exclusive novelties not to be found elsewhere, are offered at prices comparing more than favorably with those asked for goods of a similar character but lacking the Gorham trade-mark and prestige.

## THE GORHAM COMPANY,

Silversmiths and Goldsmiths

Fifth Avenue and 36th Street, New York.

Table with 2 columns: Article Title and Page. Includes entries like 'Beautiful Trophy for the Trans-Pacific Ocean', 'Beware of the Check Swindler', 'A Common Sense Decision', etc.

A DISPATCH from Johannesburg, South Africa, a few days ago, stated that a local diamond cutting company would start operation this month, but that experts in the trade did not expect that there would be any practical competition as far as the European diamond cutters were concerned. In fact, it might have been safe to go further and state that the chances were that the only way the diamond trade would know of this cutting firm would be through the free advertising which it obtained through the South African papers. The experiment, while interesting, is hardly of sufficient importance to warrant the publicity which it has been given and which it will no doubt continue to receive.

Beware of the Check Swindler. Of the many clever or professional crooks and thieves that are at present working upon the jewelry trade, one class to which particular attention should be given at present, owing to their successful operations in many sections of the country, is composed of the check swindlers who pose as traveling men stopping in town a few days on business. As these men bear not only all the indicia of respectability and honesty with apparently sound credentials as to their position and standing, and in most cases are able to get out of town without exciting suspicion long before fraud is discovered, their chances for success in their swindling operations have been good.

The way the crime is usually worked is something like this. The swindler whose appearance bears out the statement that he is a traveling man will call upon the jeweler and after stating his name and business will say that he is in need of a watch or ring but will not be able to buy it for a day or two until he receives a remittance from his employers. He picks out the watch or ring that he wants, and if a watch, asks the jeweler to regulate and hold it for him. He then visits the store two or three times while waiting the remittance, and during his visits he grows somewhat confidential, often telling how he had been robbed on his way to the town in a railroad train and, incidentally, in the course of his conversation shows letters bearing out his statements as to his business. He is impatient at being held in town awaiting his remittance, but finally (generally on a Friday or Saturday) comes to the store with a letter from his firm in which a check is enclosed. This letter which he will often show the jeweler, apologizes for the delay and is apparently signed by some large firm of a big city. As the swindler is in a hurry and has got to catch a train he asks the jeweler to take the check, giving him the article and the change for the difference. The traveler goes away and a few days later the jeweler learns that the check bears a bogus signature or has been forged with the name of a reputable firm. By that time the swindler is beyond reach.

Sometimes the traveler will work several merchants in the same town, but the jeweler is his especial prey, owing to the large intrinsic value of the articles which he can obtain and the size of the check he can give and get his change without exciting suspicion.

Consider what it means to have your announcement of Fall goods read by nearly all the jewelry buyers of the country—they read THE JEWELERS' CIRCULAR-WEEKLY the only newspaper of the trade.

THE CIRCULAR-WEEKLY has received word that this game has been tried either in the above way or with slight modifications in a number of towns in the Carolinas, Virginia, Tennessee and West Virginia, but the description of the man operating is not in all cases the same. One of the latest victims of this kind of a swindle was a jeweler in Wheeling, W. Va., and so thoroughly did the trickster gain the confidence of his victim that the latter is quoted as saying that he would have cashed a check for double the amount of the one with which he was buncoed. In this case, however, the check offered amounted to but \$22.50, the man purchasing a watch for \$17 and receiving \$5.50 in change.

Members of the trade upon whom this class of swindlers may call are urged to notify their local police even though they may not fall victim to the trickster's wiles, and they should also get the police to notify the authorities of the surrounding towns and cities.

A Common Sense Decision. It is gratifying to note that despite the fact that certain interests are endeavoring to extend the scope of the exemption, or "hundred dollar," clause of the Tariff Act to \$200, as mentioned editorially last week, the chances are that the law will hereafter be more rigidly enforced against tourists than ever before, if the decision handed down by United States General Appraiser Hay last week is not upset by the courts. This decision, which was on the protest of one Munson against the assessment of duty by the Collector at Honolulu on certain articles which he claimed were exempt under the \$100 clause, emphasizes and upholds the contention which THE CIRCULAR-WEEKLY has always made, that the exemption in regard to articles purchased abroad by American residents applies only to wearing apparel and personal effects necessary for the comfort and convenience of the tourist in his or her journey.

General Appraiser Hay in his decision, which follows that of a recent decision of the United States Circuit Court of Appeals, shows there is no basis for the latitude which has been given by the customs officials to tourists in permitting them to claim exemption as articles purchased abroad for others or to be given away as presents. The opinion of Mr. Hay, which was concurred in by the other members of Board No. 3, is brief and interesting. He says:

This is a protest against the assessment of duty on certain articles purchased abroad and accompanying the protestant on his return to the United States. These articles consist of vases, doilies, table covers, wearing apparel and various other articles of a similar nature, all intended as sou-

## ROCK BOTTOM PRICES ON DIAMONDS

Our diamond prices are rock bottom.

We import the stones direct, cut them ourselves, and sell them as close as anybody in the country does for diamonds of equal quality.

We carry a large stock at all times and the jeweler who sends to us for a selection not only gets rock bottom prices, but also a liberal assortment—and, what is of utmost importance, he gets it promptly.

### Good Gold Jewelry

*It's the  
only kind  
we make*

A RATHER COMMONPLACE DECLARATION, WE'LL AGREE, BUT WE MAKE IT WITH AN INSPIRING REVERENCE FOR THAT MUCH-ABUSED WORD "GOOD." OUR JEWELRY IS GOOD ALL OVER—GOOD THROUGH AND THROUGH. IT ISN'T ALONE SUPERFICIALLY IMPRESSIVE, IT GOES BEYOND THAT, SUPPORTING ITS VISIBLE DIGNITY WITH MATERIAL QUALITIES THAT MAKE IT MOST ENDURING. FURTHERMORE, LIKE EVERYTHING IMPRESSIVE, IT HAS A PERSONALITY—CHARACTERISTICS THAT EASILY HELP IDENTIFY IT AS A KIRBY PRODUCT. ASK TO SEE THE KIRBY LINE BEARING THE ABOVE TRADE-MARK.

venirs and presents for the family of the protestant.

The tendency of the department has been to administer Par. 697 of the Tariff Act of 1890 liberally, while the tendency of the courts is to construe it according to the exact meaning of the language used by Congress. Since the decision in the case of United States vs. Bernays (28861), by the Circuit Court of Appeals, it seems to be impossible for customs officials to admit free of duty any other articles than wearing apparel and similar personal effects accompanying the returning traveler, and then such as are necessary for his wear and use during his journey. The wearing of wearing apparel in question in this case is the only thing which the decision could possibly be construed as exemptible free of duty, and we think the facts as stated by the protestant himself exclude even that. The protestant is a man, while most of the cases in question are of women wearing wearing apparel, and he expressly states that he brought all of the articles as presents for his family and friends. G. A. 5114 (T. D. 2) G. A. 5618 (T. D. 25131).

The protest, we think, must be and should be sustained. It has taken a long time to get a correct sense interpretation of this statute in harmony with the spirit of the section which it is a part. Now that it has been rendered, it is hoped that further attention will be brought to bring in jewelry and trinkets under the section exempting wearing apparel no longer be tolerated by the customs authorities.

### Boston.

W. W. Campbell, Bath, Me., was in the city during the week, the guest of F. R. O. of the Jewelers' building.

Henry G. Morris is on an outing to Chicago and other points west. F. G. Morris has returned from a trip to Concord.

Josiah W. Anderson, salesman to Paul & Co., whose marriage took place Sept. 5, is enjoying a three weeks' vacation trip with his bride.

Philip W. Carter, clerk of the corporation of the Waltham Watch Co., has returned from a vacation spent in New York and his former home.

Buyers in town during the week were L. V. Guertin, Biddeford, Me.; J. Towle, Peterboro, N. H.; Joseph W. Bach, Stafford Springs, Conn.; C. Schmidt, Lawrence, Mass.

Ira C. Flagg, an old resident of Concord, who died there, recently, was at one time a jeweler, having engaged in this trade in Fall River in 1896, and remained there until ill health forced his retirement six years ago. He was a member of the I. O. O. F., the A. O. U. W., and the N. E. O. P.

The F. Howard Clock Co. has recently installed a striking tower clock at the Salem Academy, New Salem, Mass., a memorial gift of Samuel C. Gale, a former student. The company has also installed a unique clock for the banking establishment of Alessandro Delli Paoli, in Mulberry Street, New York City.

Personal property valued at \$425,000, including more than 700 watches, was pawned in the city of Boston, Sept. 8 and 9. C. W. Farley, of the loan division of the Bureau of Criminal Investigation, spent the day in the history of the department in recording the loans. No reason for the unusual amount of pawning is known.

James Coxford will continue the business of Coxford & Taylor, Cobden, Ont.

## New York Notes.

A. Andrews, Tacoma, Wash., is visiting friends in this city.

Wm. A. Keene, 180 Broadway, was a visitor in Boston last week.

Max Arnstein, of Arnstein Bros. & Co., returned recently from Europe.

Goldman, of Goldman Bros., Chicago, is a visitor in town last week.

T. Goldsmith, a local maker of silver, has opened a shop at 103 Oliver St.

P. Carpenter, of Ford & Carpenter, Providence, R. I., was in town, last week.

Alph Weil will occupy a store at 368 1 Ave. as a jewelry establishment about Oct. 1.

Earl Keck, president of the Herman Mfg. Co., Cincinnati, O., is a visitor in town.

Harry Kap, salesman for the H. F. Barrett Co., returned last week from a western trip.

Robert Steele is making a western business trip for David Kaiser & Co., 12 1/2 St.

A. Falbot, New York salesman for Fahys & Co., was in Denver, Colo., last week.

Harry Caro, representing the Manchester Co., leaves this city on Monday for a week's trip.

Charles Willimin, salesman for T. G. Bingham & Co., has returned from his last vacation.

C. Bunch, buyer for the William Hender Co., Buffalo, was in this city buying last week.

A. Gebhardt, of Gebhardt Bros., Cincinnati, O., was a visitor in town for several days recently.

Harvey Clap, Jr., of the Daggett & Clap Co., Attleboro, visited the local offices of concern last week.

The International Silver Co. has declared a dividend of one per cent. on the preferred stock, payable Oct. 1.

John Marshall, buyer for J. R. White, Rochester, N. Y., spent a few days in town last week buying Fall goods.

Wm. Talon, New York salesman for the Whitman & Hough Co., has returned from a three weeks' vacation.

The last name in the new city directory, which has just been issued is that of Louis Zis, a jeweler, at 350 Bowery.

John Cerf, a well-known Pittsburg jobber, stopped at the Hotel Knickerbocker and visited the local trade last week.

Among the prominent passengers returning recently on the *Oceanic* was Edward H. Brook, of the Gorham Mfg. Co.

Everett Ward, buyer for N. H. White & Co., 23 Maiden Lane, was confined to his bed several days last week by illness.

Harold Draper, of North Attleboro, has secured the employ of Whitehead & Hoag as a designer in their metal badge department.

Wheffany & Co. made the cups which were competed for at the short automobile races held on Friday afternoon at the Brighton Beach track.

Bernard Didisheim, of Hipp, Didisheim & Co., 49 Maiden Lane, returned recently from the *La Gascogne* after a visit to Chaux-de-Fonds and other Swiss cities.

Samuel O'Brien, senior member of the

firm of Russell & O'Brien, retail jewelers, Binghamton, N. Y., is staying in town for a few days visiting friends and buying goods.

Wm. B. Shaw, formerly president of the Barrett, Shaw Co., jewelers at 32 W. 34th St., has been granted a discharge in bankruptcy. The liabilities were placed at \$36,281.

Robert H. Ingersoll & Bro., 15 John St., have just opened a branch office at 200 McGill St., Montreal, through which all business in the Dominion will be conducted hereafter.

G. B. Vitelli, of Borrelli & Vitelli, 401 Broadway, who has been abroad for the past two months, expects to leave Europe Oct. 1 for this country. The firm will open a European office soon.

B. Ostertag, formerly associated with S. Danziger, has formed a partnership with L. Roman, 25 Maiden Lane. The firm, which will do an extensive business in antique jewelry, will be known as Ostertag & Roman.

H. E. Dana is now connected with the firm of H. A. Kirby. It is of interest to note that the three generations of Danas are at the present time employed in the Maiden Lane district. Mr. Dana's father, F. H. Dana, is employed with the same concern, and his grandfather, E. B. Dana, is with Carter, Howe & Co.

The baseball game between the eastern and Maiden Lane salesmen will be played at the Prospect Park Parade Grounds, Brooklyn, on Saturday afternoon, Sept. 26. Harry Wiltshire will be the captain of the New York team and George Heywood will lead the eastern boys. The game will be played for \$10 a side.

William Allen, referee in bankruptcy, has notified creditors of Lindo Bros., 1157 Broadway, that on Sept. 9 he declared a first dividend of five per cent. out of the above assets, and that on application at his office, 258 Broadway, Sept. 25, or any day thereafter, creditors may receive a warrant for a five per cent. dividend due them.

At the regular monthly meeting of the board of directors of the Jewelers' Board of Trade, held last Thursday, the following firms were unanimously elected to membership in the board: Henry Baschkopf, New York; James C. Doran & Sons, Inc., Providence, R. I.; Gove Advertising Co., New York; A. Sabsewitz, New York, and Tushnett & Laneton, New York.

William Lesser, receiver in bankruptcy for Maurice C. Dreshfield, who it is alleged had been connected with George H. Carpenter in transactions by which a large quantity of precious stones were obtained by alleged fraud from R. A. Breidenbach, 51 Maiden Lane, sold yesterday at public auction pawn tickets for diamonds pledged by Dreshfield in the city of Washington on Sept. 19, 1907. The next meeting in the Carpenter-Dreshfield case will be held Sept. 18.

Edward Carson, a New Rochelle jeweler, has ordered a large clock to be hung in front of his store. When completed the timepiece will weigh nearly a ton and a half. The clock was made especially for Mr. Carson by the Seth Thomas Clock Co. It will rest on a marble foundation and

will be 18 feet high. Two 40-inch dials of ground glass, with numbers printed on them, will form the faces, and at night the clock will be illuminated from the inside by electric lights.

Sir Caspar Purdon Clarke, director of the Metropolitan Museum of Art, returned, last week, from London on the Atlantic transport liner *Mesaba*. While abroad he picked up a number of art objects for the Museum, among which is one of the four pedestals of the "Peacock Throne" of the Empress of Delhi. These pedestals were taken from India by an English officer many years ago. The pedestal bought for the Metropolitan Museum is about two feet high, one foot square and made of white marble inlaid with agate malachite.

In sustaining a protest filed by Borrelli & Vitelli and other New York importers, the Board of United States General Appraisers, last week, held that coral balls and other coral articles intended for jewelry are dutiable properly under the provisions of the tariff law providing for precious stones, advanced in value, at 10 per cent. The articles were classified as manufactures of coral, with duty at the rate of 50 per cent. General Appraiser Fisher, who wrote the decision for the Board, says that it is clear that the importations should be admitted at the rates claimed by the importers.

Arrangements have been completed by the Jewelers' Taft and Sherman Club for the holding of noon-day campaign meetings in Maiden Lane, to begin Oct. 1. These meetings will be held at least three days a week. A number of able speakers have been engaged and a quartet of singers will be present at each meeting. Col. John L. Shepard, chairman of the executive committee of the association, is also president of the Commercial Travelers' Sound Money League. A large Republican banner has been strung across Broadway at Maiden Lane by the club. The committee is making arrangements to open the first meeting with a brass band.

A. Shapiro, 1547 First Ave., reports that Sunday morning, Sept. 6, a poorly-clad woman called at his store and offered him a fine-looking ring, asking if he would advance her a loan on the ring, as she would return later and redeem it. Mr. Shapiro says that he saw that the stone in the ring was not genuine, and refused her request. He explained to the woman that he never did a loan brokerage business and could not accommodate her. He said that he was alone in the store at the time and could not follow the woman, but advises other jewelers to beware of her as the stone is a very perfect imitation and might easily deceive experienced jewelers.

There was a meeting, Wednesday, of the creditors of Solomon Urbach, formerly a well-known wholesale diamond dealer at 47 Maiden Lane, who was declared a bankrupt in 1906, following his claim that he had been robbed of \$30,000 worth of diamonds on a Pullman sleeper. Mr. Urbach was released from the Ludlow St. Jail recently, where he had been a prisoner for eight months for contempt of court. About 10 claims were filed and Job E. Hedges was elected trustee. Mr. Urbach was not present at the meeting, but his attorney, S. J.

(Continued from page 87.)

benbloom, said that the bankrupt would be present at the next meeting. The sensational examination in the preliminary bankruptcy proceedings aroused much interest in the trade at the time, and the hearing in the bankruptcy will doubtless be followed with interest. The next meeting of creditors will be held on Sept. 18 at the office of Referee John Townsend, 45 Cedar St.

Nathan Kuplan has moved from 111 Nassau St. to 45 John St.  
 Aaron Daych, 1412 Broadway, Brooklyn, has been succeeded by the Modern Jewelry Co.

I. A. Hagen, Fargo, N. Dak., is a visitor in town this week. He is stopping at the Hotel Clinton.

F. Rodgers, of Rodgers & Krull, Louisville, Ky., is among the out-of-town visitors this week. He is stopping at the New York Hotel.

H. Carpenter, of E. H. Carpenter & Son, Burlington, Ia., is a caller in this city. He is making his headquarters at the Hermitage.

Lawrence Stern will not be at the New York office of Hutchison & Huestis this week, as he left Monday, on a trip through New York State.

Jack Teichlauf, who was formerly employed in the office of S. Nathan & Co., 71 Nassau St., is now the city representative of the same firm.

Serman Marks has succeeded C. Schneider at 2134 Seventh Ave. Mr. Marks was formerly for seven and a half years with I. Lewkowitz, on Grand St.

Louis Castagnetta, of the firm of I. Castagnetta & Son, 51 Maiden Lane, is attending the Republican State convention at Saratoga as a delegate from the 34th Assembly District of the Bronx.

Louis S. Beckwith, manager of the Sessons Clock Co.'s store, 37 Maiden Lane, was the guest of his parents, Mr. and Mrs. S. V. Beckwith, of Gilbert Ave., over Sunday and Labor Day of last week.

Miss A. M. Walker, who has been connected with the firm of Benedict & Warner, 10 Maiden Lane, as managing and financial clerk, has severed her connection with that concern and will go into business on her own account in a short time.

The Houston Jewelry Co. has been incorporated under the laws of New York to deal in watches, diamonds, jewelry, etc., with a capital of \$2,500. The incorporators are Alexander Bienstock, Max Zucker and Louis Rubin, all of New York.

Louis Goldsmith, formerly for many years in the jewelry trade and at one time connected with L. Tannenbaum & Co. and Casperfeld & Cleveland Co., died Sunday night at his late home, 106 E. 10th St., after a long illness.

William Zenz, said to be a jeweler, committed suicide by inhaling illuminating gas in his room at 346 E. 84th St. on Sunday morning. He feared that he was going blind. Some time ago his eyesight began to fail him, and he had been unable to work at his trade for the past six weeks.

Miss Hilda Goddard Tiffany, daughter of the late Mary Woodbridge Goddard Tiffany and Louis C. Tiffany, vice-president and

director of Tiffany & Co. and head of the Tiffany Studios, of this city, died Monday, at Saranac Lake, N. Y. The funeral services will be held at the Madison Square Presbyterian Church to-day at 11 o'clock.

Adam L. Winckler, one of the oldest manufacturers of gold and silver mountings in this city, died Wednesday of last week at his home, 562 Lafayette Ave., Brooklyn. Mr. Winckler was 85 years old. He was never employed by Tiffany & Co., contrary to obituary notices in daily papers. He is survived by a widow, two sons and one daughter.

The golden wedding of William H. Rogers, president of the Nassau Bank, and his wife was celebrated last Saturday at the home of Mr. and Mrs. Rogers, of 103 Hancock St., Brooklyn. Mr. Rogers has been connected with the Nassau Bank for the past 52 years, and previous to that was in the employ of the old Chatham National Bank, of this city.

Meyer Wolf, who recently covered the south and east for W. Green & Co., has severed his connection with that firm, and with Abner Shonkoff has formed a partnership under the name of Wolf & Shonkoff. They are establishing themselves in business at 41 Maiden Lane, where they will carry a line of watch materials, tools and jewelers' supplies.

Fred H. Levy, of M. Schussler & Co., San Francisco, Cal., is a visitor in this city. He will spend another week here and will make his headquarters with L. & M. Kahn & Co., 170 Broadway. Mr. Levy reports improved conditions on the Pacific Coast during August. Collections in small towns are reported very good, and a good Christmas trade is expected. Crops this year are excellent.

L. Tannenbaum, of L. Tannenbaum & Co., 15 Maiden Lane, started Sunday for California to visit the mines of the Himalaya Mining Co. and will reinforce them with more men. As soon as Mr. Tannenbaum returns, which will be in a few weeks, the concern will enlarge its cutting plant. Julius Goldsmith accompanies Mr. Tannenbaum on his trip to the mine and will remain in charge as general manager. Upon Mr. Tannenbaum's return to this city Max Tannenbaum, of the same firm, will go to Europe, where the concern will also open a large factory in Germany, thus enabling them to fill foreign orders much more quickly. L. Tannenbaum will also visit the American jade property while in California. Members of the firm report that there is a steady increase in the call for gem products of this country.

Abraham Berrent, a jeweler at the corner of 116th St. and Lenox Ave., reported that last Friday afternoon two negroes entered his store and asked to see some signet rings. After examining several rings they decided that none suited them and started for the door. The jeweler, thinking he had seen one of the men substitute a plated article for a solid gold ring, suddenly reached under the counter as if to get a revolver and shouted: "Drop that ring or I will shoot you." One of the negroes dropped a ring, the jeweler says, and the two fled in the street. Berrent followed and soon a crowd took up the chase and the fugitives were captured at 116th St. and Seventh Ave. They were taken to

the Harlem Detective Bureau, where they gave their names as Sidney White and Harry Jones. They were locked up and charged with petty larceny. Saturday morning they were both held under \$500 bonds for trial.

About 5 P. M. one afternoon last week, burglars robbed the store of S. Kohn, diamond setter and jeweler, 1217 Broadway, of jewelry and diamonds valued by Mr. Kohn at between \$1,500 and \$2,000. The store is located on the second floor of the building and at a busy point on Broadway. The jeweler had no safe in his store, but kept his jewels, including many rings, in two large cases, and on the afternoon in question did not remove the valuable property from the case. A caretaker of the building was the first to discover the robbery. He said he heard the bell of the door leading to the store ring soon after 5 o'clock, but thought at the time that either Mr. Kohn or his brother, who had been at the store earlier in the day, had returned for something. Nearly an hour later it was noticed that the store door had been broken into and both the cases emptied of all the valuable jewelry. Some of the cheaper grade of goods had been left untouched. The robbery was reported at the West 30th St. station. Later a watchman employed in the building discovered a diamond ring which the thieves had failed to take with them. The thieves left no clue. Mr. Kohn, in speaking to a CIRCULAR-WEEKLY reporter, said that nearly all of his valuable jewelry had been taken, and mentioned among other things 150 unset mountings, two three and four-stone rings, tooth and Japanese settings (some of which had platinum tops), a quantity of bracelets, ladies' and gentlemen's chains, brooches, lockets (with and without chains), pearl rope chains, etc.

Lieutenant Andrew J. Nugent, the well-known and highly-esteemed Central Office detective, who has served so faithfully in the Maiden Lane district in New York for 16 years, has retired from the service on half pay. He will be succeeded by Lieutenant Thomas Monahan, who has worked with Mr. Nugent for some time past. Detective Blaha has been assigned to Maiden Lane to help Lieutenant Monahan. Lieutenant Nugent, who was born in New York in 1857, entered the police service March 30, 1882, as a patrolman, and for eight years was stationed in Mercer St. and acted as precinct detective in the First Precinct. During that time his excellent work attracted the attention of Inspector Byrnes, who brought him to the detective bureau. After serving two years he was promoted to detective-sergeant in 1892, and since that time has served in the Maiden Lane district. His fine record is too well known in the Maiden Lane trade to need special mention. During his years of service he has formed many friendships among the jewelers, who will miss him greatly. He has always been faithful in his attention to duty, and his years of experience enabled him to recognize at sight all the principal jewelry thieves of the country, and he has often prevented great loss to the trade by this knowledge. Mr. Nugent leaves the service with the record of never having had a complaint lodged against him. He will now act as a private detective for the Importers & Traders' Bank.

THIRD EDITION

# WORKSHOP NOTES

For JEWELERS and WATCHMAKERS

Revised and Enlarged

100 Pages New Matter

Containing 300 Pages (size, 7½x10½ inches), Bound in Cloth, Stiff Covers

A collection of the latest practical receipts on the manufacture and repairing of watches and clocks, and on the various processes entering into the manufacture and repairing of jewelry, as coloring, polishing, enameling, annealing, oxydizing, etc., in short, a thorough compendium of the numerous mechanical departments of the jewelers' and watchmakers' shop.

This book is the most useful, comprehensive and perfect publication for the workman at the bench, and should be in the hands of every jeweler and watchmaker in the country. It is the only book of its kind published.

PRICE, by mail postpaid, \$2.50

CHICAGO, WEDNESDAY, SEPTEMBER 16, 1908.

No. 7.

## Chicago Notes.

S Titus has returned from an eastern trip.

J Rochr is back from a tour of east-town.

M Church has returned from a trip to the northwest.

Harry Q. Farquharson has returned from a trip to the southwest.

John A. Berg, Westby, Wis., will shortly move to Pierre, S. Dak.

C. Eppenstein and his wife have returned from Atlantic City.

Tom Stanek has returned from a vacation to Hamlin Lake, Mich.

Organ D. Wise, Rockford, Ill., is the father of a new baby girl.

W. Weidman, with the Hamilton Watch Co., visited in Chicago last week.

Charles Loeb, of the Dueber-Hampden Watch Works, was here last week.

E. Jones, with the Wadsworth Watch Co., is on a north western trip.

The United Clock Co. has removed from room 405 to room 1109 Heyworth building.

A. Wilkens, with the Ostby & Barton Co., is on a visit to the factory at Providence, R. I.

Ed Noel is to be married to-day to Miss Rose Greenebaum at the bride's home, 7 E. 45th St.

Mr. and Mrs. Wm. C. Graves, Memphis, Tenn., stopped over in this city, last week, on their way east.

The family of Clarence J. Williams, of M. Williams & Co., has been increased by the arrival of a baby boy.

W. Swarthild & Co. have been appointed special western selling agents for New England Watch Co.'s material.

Frank Slough, formerly watchmaker for Meyer Bros., has bought out the store of E. J. Morrison, 513 E. 39th St.

Joseph Wright, with the Illinois Watch Co., left, last week, for a 10 months' tour to South America via England.

Joseph Weinstein, with B. Weinstein, 4 S. Halsted St., has returned from a 10 weeks' outing in northern Michigan.

Spitz, Santa Fe, New Mex., accompanied by his wife, stopped over in this city last week, en route to New York City.

J Horstman was here last week buying his opening stock for a new jewelry store recently opened by him at Havana, Ill.

Mr. and Mrs. Frank Dyer, Caro, Mich., were here last week and visited the factory

of the Elgin National Watch Co., at Elgin, Ill.

F. E. Wallis, with T. W. Adams & Co., after returning from a month's northwestern trip, is now on a trip to Denver and back.

The James E. Blake Co., Attleboro, Mass., has opened a Chicago office in room 908 Heyworth bldg., in charge of A. M. Chadbourne.

"Joe" Finn, formerly diamond buyer for Loftis Bros. Co., has resigned his position and is no longer connected with this corporation.

Martin A. Hagen, Fargo, N. Dak., spent a few days here, last week, before he left for New York where he intends to spend a few weeks.

The Vincennes Novelty Mfg. Co., South Bend, Ind., has opened a Chicago office in room 401 Heyworth building, in charge of Clarence A. Moore.

Thos. F. Kennedy, Chicago agent for the Star Watch Case Co., spent four days at the factory at Ludington, Mich., last week, accompanied by his wife.

C. W. Coles, Sandwich, Ill., has sold out his jewelry business to the Newton Drug Co. Mr. Coles intends to embark in the jewelry business in Florida.

I. V. Varney, of the Varney Jewelry Co., Wichita, Kans., spent a few days here, last week, prior to his departure for New York, where he will spend two weeks.

O. A. Starke, of the Star Watch Case Co., spent a few days here, last week. Mr. Starke reports the new 150-foot addition to the factory nearing completion.

"Jake" Joseph, of S. Joseph & Son, Des Moines, Ia., was here, last week, looking over the market for new fixtures for their store which is soon to be remodelled.

The Rockford Silver Plate Co., Rockford, Ill., has opened a Chicago office in room 501 Heyworth building, in charge of A. M. Shepard, assisted by W. H. Thompson.

Maximilian Ellbogen, of the Stein & Ellbogen Co., sailed from New York last Saturday on a visit to the European diamond markets. He expects to return about Oct. 10.

The J. Floersheim Co. has taken a lease of the second floor of the Adams building, 230-236 Adams St., for five years, from Jan. 1, 1909, at rental of \$40,000 for the term.

L. Fleming, with the Chicago office of Joseph Fahys Co., has returned from a trip to New York. W. B. Harris, with the

same corporation, is on a trip through Illinois.

Aug. Warren, formerly of the firm of Abram Warren & Son, Calumet, Mich., was here, last week, buying stock for the new store which he recently opened in Calumet on his own account.

Walter King, of the Julius King Optical Co., and Albert Wells, of the American Optical Co., were guests, last week, at the Summer home of Mr. and Mrs. J. T. Brayton, at Burlington, Wis.

Among the buyers in town, last week, were: Edward A. Buder, Cairo, Ill.; Jos. Chero, Iron River, Wis.; S. Hicks, Providence, Ky.; Philip Jacoby, Kalispel, Mont.; F. A. Marean, Belvidere, Ill.

Albert M. Dueber, president of the Dueber-Hampden companies, spent a few days here last week. Mr. Dueber reports trade in a very satisfactory condition and says indications all point to a successful Fall trade.

James Mower, formerly connected with the tool and material business here, and now with Roy P. Matthews & Co., San Francisco, Cal., was in this city, last week, with his bride, whom he recently married in Keokuk, Ia.

Alfred Doughty, for many years head repair man for the Schrader-Wittstein Co., died, last week, in his 57th year. He is survived by a widow, son and daughter. Mr. Doughty was one of the best jewelry workmen in Chicago.

Joseph I. Bernstein and Henry O. West have bought the stock and fixtures of the National Jewelry Co., at 163 State St., and have formed the Howe National Jewelry Co., which will do a mail order jewelry and jobbing business at the same address.

Ben Overstreet, Farmer City, Ill., recently moved into his new store across the street from his old location. New fixtures, show windows, new floor and ceiling make his present premises one of the most up-to-date jewelry stores in that part of the State.

Frank Eastman, of Petersburg, Ill., came to Chicago, last week, and bought a four-seated Buick automobile. He thought it would be a good idea to return home in his new machine, so with a party of friends, which included S. E. Croft, with E. Schwartz & Co., started for Petersburg.

The officers of the Chicago Jewelers' Association have completed plans for entertaining the members of the National Wholesale Jewelers' Association, who meet here

### WORKSHOP NOTES

for Jewelers and Watchmakers  
Cloth :: Postpaid, \$2.50  
Published by  
The Jewelers' Circular Pub. Co.,  
11 John St., New York

Sept 16). As the Illinois Retail Jewelers' Association meet here to-day and tomorrow (Sept 16 and 17), and the executive committee of the American National Retail Jewelers' Association are scheduled to meet to-day the week promises to be a success.

**St. Louis.**

F. Reeves, of the Reeves-Kemper Co., the South at present.  
 K. Green, who has just opened a store in Leitchfield, Ill. was in this city, purchasing last week.  
 J. Schoenthaler, secretary of the Eisenberg Mfg. Co., has gone to the St. Francis Hotel on a week's fishing trip.  
 F. Kohler, Parsons, Kans., accompanied by his wife and son, spent several days here, last week, en route to St. Paul. Emanuel Kober, secretary of the E. Maritz Jewelry Mfg Co., will depart for a two weeks' trip through Oklahoma and the Northwest the first part of this week.  
 St. Louis friends of W. C. Brinkmann, who was a jeweler and optician in Marthasville, Mo., for several years, have been advised that he recently moved to Hermann, Mo.  
 Charles L. Taylor, who died at his home in this city, recently, of softening of the brain, was formerly a jeweler of Sedalia, Mo. and was the son of C. G. Taylor, a former jeweler of that town. The deceased was survived by a widow and by his mother.  
 Philip H. Nolting has established a new jewelry shop at 4482 Delmar Boulevard. Mr. Nolting was formerly with his father, also A. Nolting, at 1046 North Vandeventer Ave. The elder Nolting is one of the oldest jewelers in this city.  
 The J. P. Morgan Jewelry Co., of this city, has made an assignment to Mr. William H. Abbott, Campbell & Willson, local attorneys. A short time ago Mr. Morgan made an offer to settle with creditors on a basis of 33 1-3 cents on the dollar.  
 Among other out-of-town jewelers here, last week, were: E. Zimmerman, Stonington, Ill.; Otto Rink, Carlyle, Ill.; C. W. Halesley, Leitchfield, Ill.; B. C. Clark, Purcell, Okla.; I. B. Morris, Perry, Mo.; M. H. Muskogee, Okla.; W. J. Krug, Trenton, Ill.  
 J. Ellis, of the Ellis Drug Co., Vandalia, Mo., was in St. Louis, the past week, bringing a stock of jewelry, which will be sold in conjunction with the drug trade at his store.  
 Kirkpatrick, president of the Model Jewelry and Jewelry Co., of Oklahoma City, Ok., was also a visitor here, last week.

**Indianapolis.**

TRADE CONDITIONS.

The trade, last week, was the best which local retail jewelers have enjoyed in many years. Thousands of visitors were in the city owing to State Fair week, and spent money liberally. "Usually people who attend the State Fair are not liberal patrons of the jeweler," said a retailer. "and our local patrons are, as a rule, too busy entertaining visitors to do any buying. We had a big trade, however, last week—the best week in some months."

J. F. Kiser, Muncie, has returned from an extended western trip.

W. A. Van Patten, with the Benedict Art Studio, New York, was among the visitors in this city last week, calling on Frank L. Bryant.

Harry Reed, employed by his father, J. H. Reed, has returned after a pleasant camping and fishing trip in Illinois. He was away two weeks.

An old-fashioned clock with a walnut case is being exhibited at Mishawaka, by Cleis & Co. It is believed to have been manufactured in Paris, in 1807.

Asher W. Gray, of Gray, Gribben & Gray, is taking a two weeks' rest and is visiting friends at Logansport and Rochester. He will spend a few days at Lake Manitou.

The Baldwin, Miller Co. has ordered a 70-foot sign which will be placed across the second floor of the State Life building. This will be one of the longest signs in the city.

After a 70 days' tour of Europe, Chas. B. Dyer has returned home and is now in camp at Fort Benjamin Harrison for 10 days, with Battery A, of which he is a member.

Mr. and Mrs. J. W. Hudson, Fortville, have returned from a trip through the West, which included a visit of several days in Denver. Mr. Hudson is the only jeweler in Fortville.

It is stated that Chas. Rigdon, Warsaw, will retire from business as soon as he can dispose of his jewelry stock. He is mayor of Warsaw, and has other interests that require his attention.

Charles Peek, well known in manufacturing circles, having been with Don A. Hickman for some time, has gone to Texas for permanent residence. The change was made because of Mr. Peek's ill health.

H. A. Winn, official watch inspector for several steam and interurban railways, returned recently from a trip to Cleveland and Cedar Point. He was accompanied on the trip by members of his family.

The September meeting of the Indianapolis Retail Jewelers' Association, which was to have been held on Monday evening, Sept. 7, was postponed. As the date fell on Labor day, many of the members had other engagements.

News has been received here of the recent death of Arthur Ruffing, oldest son of J. E. Ruffing, Delphi, Ind. Young Mr. Ruffing, with a friend, was inspecting the new power plant of the interurban railway at Delphi, when he came in contact with a high tension current of about 33,000 volts, dying instantly.

Among the out-of-town jewelers here, last week, were: Frank Haseltine, Kokomo; J. E. Ward, Worthington; Charles Wildt, Veedersburg; Martin Jensen, Clay City; A. B. Johnson, Sheridan; John Duncan,

Wingate; Edward Williams, North Vernon; S. E. Marks, Coatesville; Mr. Bowers, New Ross; J. F. Kiser, Muncie; R. E. Murray, Muncie; J. E. Johnson, Anderson; George Gannon, Seymour; J. E. Porter, Loogootee; L. E. Heaps, Spencer; F. L. McKee, Cloverdale; Mr. Harrison, Crawfordsville; L. J. Savage, Macy; J. B. Dennis, Williamsport, and Joe Vollmer, Princeton.

**Milwaukee.**

TRADE CONDITIONS.

The past week was marked by an especially large and varied business for Milwaukee jewelers, owing to the large attendance at the Wisconsin State Fair held in the city. Not only was the transient trade very satisfactory to the retail jewelers, but wholesalers and manufacturers received a liberal patronage from out-of-town dealers. Milwaukee retail jewelers closed their establishments on Thursday afternoon of the past week, the occasion being Milwaukee day at the fair, and jewelers helped to swell the general attendance at the exhibition to the 100,000 mark.

The out-of-town jewelers here last week included: F. H. Coburn, East Troy; Sigmund Hoffman, Jefferson; Gustav Slinwinski, Oconomowoc; J. P. Schlaefler, Campbellsport; H. Lappley, Mazomanie; F. P. Beswick, Racine; L. C. Bruss, Reedsville, and M. L. Werner, Deerfield.

R. J. C. Bott, formerly located at 171 3d St., is now settled in his new establishment in the *Free Press* building. Mr. Bott, who established himself in business only last Spring, was for many years connected with several of the leading jewelry firms of this city, among them Bunde & Upmeyer Co. and the C. Preusser Jewelry Co. Mr. Bott is considered one of the leading pearl authorities in the west, and while connected with Bunde & Upmeyer he was buyer in the pearl field.

**Omaha.**

Harry Ryan, of the Mawhinney & Ryan Co., is home from a short vacation.

H. Damm, watchmaker for Fred Brodegaard & Co., left last week to visit in Chicago.

Frank C. Wittenberg, Laverne, Minn., was in Omaha last week calling on friends and purchasing stock.

O. L. Wright, bookkeeper for the Mawhinney & Ryan Co., is spending a couple of weeks at Bethany, Nebr.

J. P. Holliday, of the Mawhinney & Ryan Co., has returned with his family from an extended visit at Long Beach, Cal.

Fred Brodegaard & Co. supplied the gold watch which was presented to C. Berger on his birthday anniversary by the G. A. R. Post of this city.

Joseph P. Frenzer has returned from a three weeks' fishing trip in Wisconsin. A muscalonge weighing 17½ pounds and measuring 41 inches was one of the successful catches which he made.

Out-of-town jewelers in this city last week, replenishing their stock, included: C. C. McLeese, Davenport, Nebr.; J. L. Moore, Tekamah, Nebr.; William Abel, Clarks, Nebr.; John Crabill, Plattsmouth, Nebr.; J. T. Mudd, Merriman, Nebr.; Max J. Egge, Grand Island, Nebr.; A. E. Anderson, Broken Bow, Nebr., and M. M. Huck, North Bend, Nebr.

Boches for deep mourning take upon themselves the form of flowers or leaves of a leaf set, with sometimes a tiny diamond coming from the center. Others are in a variety of designs in cut jet, in gun metal, in faceted and geometrical shapes, while others are set with pearls or amethysts. A elegant sautoir shows gun metal links between plaques of rich purple enamel. A ribbon dog collars have ornamental links of faceted jet or gun metal. There are narrow necklaces of moire ribbons interlarded with faceted jet or with oval plaques of small diamonds set on a ground of black enamel.

# Large Watches

FOR

## AUTOMOBILES, CARRIAGES, DESKS and TRAVELING

They are extremely convenient, and appeal strongly to the traveler because they are so compact that they take up but little room in a traveling bag, which makes them more desirable than the regular French traveling clocks.

They are built to stand rough usage, as they can be turned upside down or in any other position with no danger of their getting out of order.

No line of watches for the purposes mentioned can possess more elements of salability, as in style, appearance, convenience, good workmanship and accuracy they are everything that such a timepiece could be.

Just at this time of the year you ought to have these in stock.

FOR the above purposes we offer a line of watches which possess really remarkable selling qualities. They are one or eight-day watches, keeping remarkably accurate time under all circumstances, and so substantially built as to successfully withstand the jar of an automobile.

For many reasons we believe them to be the best watch of the kind on the market, as they are not only very well made and bear all the marks of good, careful workmanship, but the model is a very attractive and "snappy" one.

## EDMOND E. ROBERT

3 Maiden Lane, New York City

### Cincinnati.

Edwin Gebhardt, of Gebhardt Bros., and his wife, are enjoying a trip on the "La

Julius Goodman, Memphis, Tenn., was a guest of friends in this city the past week.

D. J. Gutmann, of L. Gutmann & Co., is in New York buying new holiday goods.

Hess Henle, of the M. Schwab Jewelry Co., has started on a two months' business trip south.

S. Strauss, of Lindenberg, Strauss & Co., is home from a sojourn at French Springs, Ind.

Chase Hoffman, manager of the A. Hoffman Jewelry Store, Springfield, O., and his daughter, spent the past week in this city.

C. W. Lucius, of the Frank Hershey Co., spent Labor day in Chicago as a guest of W. C. Barry, with Larter & Co.

Larz Creutz, of the Creutz Plating Co., has returned from a pleasure trip to Canada. Otto Creutz, of this firm, has been on vacation at Mammoth Cave, Ky.

F. C. Rockwell, who formerly conducted a trade repair shop in Atlanta, Ga., has opened a watch trade repair shop in Cincinnati, at 106 4th St., in the Tele-Phone building.

E. W. Sprochnle and C. Seymour, wholesale jewelers, of Chicago, were in this city last week calling on some of the jewelry firms in reference to Association affairs among wholesale jewelers.

J. H. Drake has sold out his jewelry business at Lebanon, O., to M. Kohler of Birmingham, Ala. Mr. and Mrs. Drake will soon leave for California where they will spend considerable time traveling before locating in that State.

Albert P. Honer, 410 Central Ave., has started on a trip during which he will visit all the principal cities of the south, gathering information as to the jewelry business in various sections. He will spend some time in Georgia with relatives and will wisely combine business and pleasure on his trip.

Lee Horn, who has been out of the jewelry business for the last three years, has again connected himself with his old firm, Lindenberg & Fox, as a traveling salesman. Mr. Horn will cover the territory of Alabama and Georgia until the latter has recovered sufficiently to resume business again for himself.

One night last week an attempt was made by two men to rob Clifford's jewelry store on Central Ave., Marietta, Ga. Mr. Flint heard a noise from the window of his store from his home and fired several shots in the direction of the noise. The thieves made good their escape.

Out-of-town jewelers here the past week buying goods included: J. A. Matt, Marietta, O.; Charles F. Gray, Dayton, O.; A. Wahrab, Dayton, O.; Mr. Eglar, Marietta, O.; U. L. Jennings, Watertown, N. Y.; Gladstone Sherrill, Russellville, Ky.; Zorich, Lexington, Ky.; A. B. Charleston, W. Va.; J. Gluck, Charleston, W. Va.; Fred Zimmerman, Fehetsch, Ky.; J. W. Tufts & Son, Loveland, O.; Messner, Hamilton, O.; O. G. Kelley, Marietta, O.; J. E. Robertson, Augusta, Ky.; A. Fisher, Fairmont, W. Va.; and J. Leeds, Terre Haute, Ind.

## Los Angeles.

J. Mittenhal, Dallas, Tex., has been leaving a short time in this city.

C. W. Morrell, secretary of the Los Angeles Gem Co., has returned from a short vacation on trip to San Diego.

F. M. Seamans, of the wholesale house of F. Wallace, has been taking a vacation at Catalina and Ocean Park.

W. Hammerschlag, formerly of Denver, has taken a position as salesman with Rosenberg, 453 S. Broadway.

George L. Bannister, 309 S. Spring St., one of the delegates from this city to the recent Republican State convention.

A. Schwarzkopf, of Schwarzkopf & Pennington, is again at home after a business trip of several weeks' duration on the road.

Frederic E. Diebenkorn, formerly with Rosenberg & Fox, Cincinnati, has taken a position as salesman with the E. W. Reynolds Co.

John Hartzberg, formerly with J. Wiesberger, has decided to remain in San Francisco, to which place he recently went on a visit.

Joseph Reed, formerly with the E. W. Reynolds Co., has now taken a position with Hambricht & Walsh, as Los Angeles salesman.

The Illinois Watch & Optical Co., Shepherd Wolff, proprietors, 214 W. 2d St., has been putting in a new front and otherwise improving the store.

D. H. B. Davis, a well-known oculist and optician of 20 years' experience, has taken charge of the optical department of Carson's store, 545 S. Broadway.

A announcement has been made of the engagement of Leonard Cohn, son of L. B. Cohn, of the Diamond Palace, 425 S. Broadway, and Miss Delphine Levy, of this city.

H. T. Anderson, with J. G. Donovan & Co., has returned from a week's vacation at Camulos Ranch, which Helen Hunt Jackson made famous as the home of "Aunt Anna."

W. A. Blocker, formerly with the E. W. Reynolds Co., has bought the stock and fixtures of Oscar Bruffat, Pico Heights, this city, and is now in possession and conducting the store.

E. E. Peck, president of the Los Angeles Jewelers' Association, 420 S. Broadway, was home again, a few days ago. He intends, hereafter, to spend about half his time at the company mines at Mineral Park, Ariz.

Leonard Woelz, a well-known young jeweler, formerly with Luckenbach & Co., and Mrs. Gladys Burt, San Diego, were married recently. Mrs. Woelz is the granddaughter of the late Judge Burt, of Iowa.

David Lipman, manufacturing jeweler, 342 S. Broadway, has been notified that his wife has filed a suit for divorce in San Francisco. The Lipmans were married in San Francisco, in March, 1906, and came to Los Angeles after the great fire.

Ederson and family met with a severe affliction, last week, in the death of Mrs. Ederson's mother, who passed away at Oxnard, Ventura county. Mr. and Mrs. Ederson attended the funeral and accompanied the remains to San Luis Obispo, where the interment took place.

N. Lavene, a traveling representative for the Western jewelry house, appealed to the

police here, a few days ago, for help in securing a diamond ring, said to be his sister's engagement ring, which he had lost in a game of cards. But neither the diamond nor the gamblers could be located.

Out-of-town jewelers, who were here, recently, include: E. B. Smith, Santa Anna; J. E. Crowell, of the Crowell Optical Co., Riverside; Mr. McNeil, of the McNeil Optical Co., San Diego; A. W. Pequegnat, Riverside; C. C. Richdale, Santa Barbara. Mr. Richdale made a pleasure trip to Coronado.

The occurrence of two holidays last week, Labor day on Monday, and Admission day on Wednesday, interfered somewhat with the jewelry trade, as well as with other kinds of business. Most of the large houses were closed all day Monday. Some closed half a day and a few remained open all day. Wednesday was not so generally observed as a holiday.

The Carl Entenmann Jewelry Co. has nearly completed extensive alterations in factory and office, making the arrangement much more commodious than heretofore. About 50 persons are on the company's payroll at present. Among other improvements which this company has made is the installation of the largest rolling mill in Southern California, if not in the State. It was made to order by the W. W. Oliver Mfg. Co., Buffalo.

## Toledo.

Miss Caroline Allerdice, with the M. Judd Co., is seriously ill at her home.

Mrs. Fannie Eells has removed her china painting studio from Mancroft and Monroe Sts. to 2303 Rosewood Ave.

Frank Wilcox, with the International Silver Co., spent last week in Toledo attending the National Convention of the G. A. R.

J. J. Freeman & Co., furnished a fine trophy to the Toledo Times, to be given to the best amateur record in the recent automobile endurance trip through Ohio. The cup was won by E. R. Torgler, of this city.

A. J. Heesen, who had been seriously ill at the Toledo Hospital for several weeks past, was removed to his home last week. He is now on the road to recovery, but it will probably be several weeks yet before he can attend to business. He has, however, greatly increased his stock and expects a large holiday trade.

Harry Tibbals, who travels out of this city for Mandeville, Carrow & Crane, enjoys the reputation of being one of the greatest baseball fans in Toledo. He is deeply grieved because Toledo did not win the pennant in the American Association, and his friends are having considerable fun at his expense on that account.

The Globe Optical Co., which recently opened an optical parlor on Madison St., has closed up the shop and moved elsewhere. When the store was opened it was thought that the firm was here permanently, but it appears that it located here only for the G. A. R. Encampment. Local jewelers and opticians are incensed over the methods pursued by the concern in dealing with the old soldiers and others during the time the business was here.

## San Francisco.

### TRADE CONDITIONS.

Local traveling representatives who have just returned from their trips to the interior towns of the State with their lines of Fall and Winter samples, are enthusiastic over the reception they have been accorded by retail jewelers outside of the large cities and are much pleased with the trade improvement that is manifest since they made the same territory in the early Spring. Trade conditions are much nearer normal in the country districts than they are in the large cities, such as San Francisco and Los Angeles, and it is to this outside territory that wholesalers are now catering. A Presidential year is usually considered a very dull one on the coast, but there are indications that go to show that this one will be an exception.

S. H. Collins, who is still at 2540 Sacramento St., located in a private residence, is looking for a downtown location.

De Ferrari & Peters have been located in temporary quarters ever since the fire, but have just completed a magnificent store at 265 New Montgomery Ave., where, as usual, they will cater to the high-class Italian trade.

The Harris Loan Office will soon be found on Kearny St. as in the days before the fire. A large store with a mezzanine floor is being fitted up at 615 Kearny St., and it is the intention not only to carry the largest stock but to have the finest store in this section of the city.

Realizing that it would be impossible to get back downtown in a satisfactory location before the holidays, the Diamond Parlor Jewelry Co. has decided to renew the lease on its Van Ness Ave. store until the first of next July. In the meantime, Manager H. A. Long will keep on the hunt for a permanent location and states that it is quite probable that a removal will be effected before next Summer.

Shreve & Co. studied for a long time over the proposition of moving to the new store at Post St. and Grant Ave., and finally decided to postpone that action until next March or thereabouts. While they felt that a good business would be done and were tempted to go downtown, they thought it best to remain at the present location for the convenience of their customers, feeling that at the very best, shopping in the downtown district would be disagreeable during the coming winter. The new store is practically completed and the removal will be easily effected when once commenced. After the removal to the permanent store the goldsmith department will be located on one of the upper floors of the Shreve building, but the silver department will remain at the present location on Sacramento St., for an indefinite time. At the present time Shreve & Co. have a very fine line of cups and trophies on exhibition in their show windows almost all of which were made for distribution as prizes at the meeting of the San Mateo Kennel Club, at San Mateo, Sept. 9. Among those who have offered trophies which were made by Shreve & Co. are: I. C. Ackerman, A. H. Hayes, Jr., George R. Shreve, L. S. Greenbaum, Robert A. Roos, Shreve & Co., New California Jockey Club, F. L. Hansen, C. R. Walter, H. R. Brown, G. S. Thomas and C. H. Harley.

Jewelry valued at about \$150 was stolen, recently, from A. L. Darnell & Son, Fleming, Ala. The store has been entered twice during the past month.

**H. M. Quackenbush, HERKIMER, N.Y., U.S.A.**

**News Gleanings.**

G. L. Eason has completed arrangements to open a retail jewelry store at 807 East St., Des Moines, Ia.

Charles Q. Erisman & Co., Lafayette Ind., are adding a lens grinding plant to their jewelry business.

Cornell Heidenger, Belleville, Ill., has entered the employ of Ormond & Klu Sedalia, Mo., as watchmaker.

Benjamin Johnson, while fishing in Laughery Creek, near Napoleon, found a pearl which was subsequently priced at \$45.

Extensive improvements have just been completed in the interior and exterior of the store of Hubert Zimmer, 271 Main Poughkeepsie, N. Y.

Robert Ernst, a jeweler of Vicksburg, Miss., recently purchased the Citizens National Bank building and other property at that place, for the sum of \$30,000.

L. J. Cook; Findlay, O., was severely burned about the face, about a week ago by the explosion of gas which occurred from oil in a large can in his store.

N. D. Wells contemplates engaging in a retail jewelry business in Henderson, Mo.

Mr. Wells at present conducts a store at Southern Pines, in the same State, and he will continue as usual.

Three stores were entered recently by burglars in Independence, Mo., who secured in all about \$150. Among the valuables looted was that of Frederick K., a jeweler of that place.

F. L. Van Allen has sold his business interests in the firm of C. H. Van Allen & Son, Eastman, Ga., to W. A. Wilkins. The business will be continued under the firm style of Van Allen & Wilkins.

H. E. Moore, who has been in business in Vandalia, Mo., for the past four years, has sold out to J. H. Ellis, who was formerly employed by J. A. B. Keith, of that town. Mr. Ellis has moved the stock of the drug store of Ellis Bros.

A tray of rings valued at about \$500 was stolen a short time ago from the store of Ralph C. Cotton, Table Rock, Neb. The man who was later taken into custody at Pawnee City was released, owing to a lack of incriminating evidence.

C. A. Sievers, of Sievers & Devers, Pa., will erect a new building on the site of the firm's present quarters, 17 and 19 George St. The proposed improvement of the property will begin next Spring and the new building will be four stories high and will cover the entire lot.

The show window in the store of C. Wehrle, 16 E. Main St., Belleville, Ill., was broken early one morning, recently, and \$75 worth of miscellaneous jewelry was stolen. The thief dropped a plain card bearing an imprint of his thumb, and the card was originally displayed a gold ring.

Wm. H. Watkins, a jeweler at Breckenridge, Mo., recently underwent an operation at the Centerville Hospital, Centerville, Mo., by which about two square feet of skin was removed from his body to be grafted upon that of his wife. Mr. Watkins sacrificed his skin in order to aid in the recovery of his wife, who was recently seriously burned in a gasoline explosion at Breckenridge.

**Kansas City.**

Edwin H. Abney, 1319 Grand Ave., has his place to Gilbert Cohen.  
 A. Heise, St. Louis, has been entered student at the Kansas City Horological Optical School.

George Taylor, traveling representative of Woodstock-Hoefler Watch & Jewelry Co. in town replenishing his trunks preparatory to another trip through his territory.

A. Brown, traveling representative of the Woodstock-Hoefler Watch & Jewelry Co., has started out with replenished trunks for an ante-holiday trip through his territory.

Jacard Jewelry Co., 1017 and 1019 1/2 St., this city, supplied the hand-trophy cup which was awarded by the *City Star* to the winner of the tour to Oklahoma City and return. Following new students have been admitted at the Kansas City Polytechnic Institute: Harry A. Crane, Fort Scott, Kans.; Sill, Carthage, Mo.; H. L. Noe, H. Rossen and Lee Queen, Kansas City.

Business conditions here are constantly improving and dealers regard the outlook very encouraging. Several manufacturers have been compelled to work lean, and jobbers are all as busy as can be taking care of orders. Collectors are far and, viewed from any standpoint, the business prospect is bright.

The following retail jewelers called on the trade during the past week: Andrew Bon, Winfield, Kans.; F. E. Pirtle, Hill Grove, Kans.; W. J. Mulnix, King Mo.; Charles Ragsdale, of Ragsdale & Smith Center, Kans.; F. C. Clement, Mount Hill, Mo.; W. G. Morhart, Enid, Okla.; W. A. Kincheloe, Centerville, Mo.; G. B. Brown, Hill City, Kans.; Mr. Mel. of Bichsel Bros., Sedalia, Mo.; L. A. Axtell, Kans.; I. Yourman, Wilton, Okla.; C. E. Duvall, Kincaid, Mo.; Harry J. Linn, Aetison, Kans.; C. W. an Ness, Mound City, Kans.; A. G. G. field, Leavenworth, Kans.; M. F. G. r. Parsons, Kans.; W. R. Pearce, Kansas, Kans.; C. Holmes, Alton, Kans.; Phillips, Randall, Okla.; Percy Wil-Marceline, Mo.

**Pacific Northwest.**

The L. L. Moore Co. is planning to have one of the finest jewelry stores in Seattle. It has been secured of quarters in the new building, that is to be reconstructed here, and Mr. Moore is already making arrangements for securing fixtures, the cost of which will be about \$30,000.

S. Mazurosky, who conducts a store at 24 Burnside St., Portland, was fined \$25 for offering Magistrate Swett a bribe. He had been arrested for keeping his place open on Sunday and the Judge closed the case under advisement as it was thought that other establishments were also violating the law. In the meantime the jeweler came to the Magistrate's office and offered him \$10 to dismiss the case. The court fined \$50 was imposed.

Ed N. Hamilton, the Portland athlete who gained much notoriety, a short time ago, by committing a number of daring robberies

in jewelry stores, passed away at a sanitarium, near Portland, last week. After his arrest his friends rallied to his support, and the claim was put forth that he was not responsible for what he had done and that he was suffering from an injury to his head received several years ago in a football game. Judge Webster decided that the young man's friends were right, and sent him to a sanitarium.

Antone Cloise, a jewelry salesman, lost \$300 worth of jewels as the result of a game worked by bunco men in a cafe in Seattle, recently. Two men framed up a fake fight, and the proceedings so angered Cloise, who was a spectator, that he took off his coat and laid it on the bar and was going to help one of the men. When the trouble was finally settled, and he proceeded to put on his coat again, he found that a wallet containing valuable jewelry was missing from an inside pocket. One of the bunco men has been arrested.

**Denver.**

Arthur Syman has been spending the last two weeks at Watkins, Colo.

Mr. Banks is now running the store formerly occupied by E. F. Whittermore.

Will Hurley, of this city, is back in town after a two weeks' vacation spent in Cheyenne, Wyo.

C. C. Patton, one of the most prominent jewelers of Canon City, was in this city, last week, on his way east to buy goods for his Fall trade.

Theodore Syman has returned to this city after spending a few weeks' vacation at his country home, "Idlehour," situated in Evergreen, Colo.

The Syman Bros. Jewelry Co., of this city, furnished the prizes given by the United Labor Union at their fair and bazaar held at Coliseum Hall on Labor Day. The first and second prizes were a chest of sterling silver and a beautiful diamond ring, besides a great number of smaller articles. The firm had on exhibition the silver loving cups which they supplied the Denver Real Estate Exchange for the Interstate Fair and Exhibition, which was opened in this city, Sept. 7. The prizes were given to the county that had the best agricultural exhibit.

Messrs. Glavins and Rubin, of this city, have just formed a co-partnership under the firm style of Glavins & Co., to do a wholesale and jobbing business in all kinds of plated and gold-filled jewelry. The temporary office is located at 316 Josephine St. Mr. Rubin was formerly engaged in the hardware, paint and glass business in Boston, Mass., for 11 years.

A daring holdup was committed in Glenwood Springs on the night of Sept. 5, shortly before eight o'clock, when three men entered the jewelry store of E. L. Peisar and robbed the cash drawer of \$40. Two of the men attracted the attention of the clerk in charge of the store while the third emptied the money drawer. The clerk noticed the men at the safe and gave the alarm and the thieves dashed out of the store and down Grand Ave., which is the principal business street of the town and which was crowded at the time. They succeeded in turning up a dark alley.

**Canada Notes.**

The sheriff is in possession of the store of Thomas Saad, Nanapan.

R. Allen & Co., Sydney Mines, N. S., have assigned to D. Buckles.

The assets of W. Northgraves, Perth, Ont., are scheduled to be sold Sept. 18.

H. Booth has purchased the assets of J. H. Jackson, deceased, Huntsville, Ont.

The jewelry store of F. Groulx, L'Orignal, Ont., was destroyed by fire on the night of Friday, Sept. 4. His loss is partly covered by insurance.

Among the out-of-town jewelers visiting Toronto, Ont., during the fortnight of the Canadian National Exhibition, ending Sept. 12, were the following: J. S. Barnard, London; P. S. Byrne, Beaverton; C. B. Diesfeld, Port Perry; J. R. Tuck, Port Colborne; H. E. Prince, Dutton; W. C. Forbes, St. Thomas; S. Mathers, Palmerston; W. Coates and J. Lane, Brockville; W. M. Ketchum, Brighton; A. O. Boehmer and Heller Bros., Berlin; W. J. Chambers, Coldwater; W. Ashcroft, Wiarton; J. G. Collinson and F. H. Pearson, Dundas; G. A. Shaver, Arthur; J. H. Young, A. Moffatt and A. N. Pequegnat, Brantford; E. J. McIntyre, Chatham; Geo. Hynds, Acton; W. H. Roberts, Stratford; H. Wendt, Clifford; J. H. Sterling, Simcoe; Geo. Savage, Guelph; I. Shoemaker, Paisley; L. Edmonds, Alliston; M. E. Knox, Picton; Chas. P. Grill, Hespeler; J. F. Maynard, Campbellford; Harry Irwin, Pembroke; A. B. Custis, Warkworth; J. E. Tindale and J. L. Wilson, Woodstock; A. W. Cox, Paris; W. H. Hellyer, Clinton; S. C. Warne, Peterboro; S. Marshall, Fergus; E. D. Wilcox, Uxbridge; A. E. Bywater, Trenton; W. H. Smith, Oakville; Joseph Park, Bradford; H. H. Odell, Orono; E. Marchand, Milton; R. F. Dale and George; T. Wehrley, Harriston; D. Lundy, Mount Albert; Ben Harris, Hamilton, and T. W. Blackburn, Belleville, all Ontario.

**Pacific Coast Notes.**

Mr. Clark, the jeweler, has returned to Quincy, Cal., and will re-engage in business there, having already secured a store.

Solomon Brown, 419 Seventh Ave., Oakland, Cal., has asked jewelers to be on the alert for a man who robbed him of a gold signet ring, recently. He says that a few days ago a man came into his store and applied for work. Brown gave him a gold watch and chain to clean and the work was satisfactorily done. Later the stranger told Brown that he had a purchaser for a gold ring of a certain description, and a ring was given to him to sell.

J. Jessop & Sons, San Diego, have just finished 200 pins that will be presented to the members of the winning crews for the best gunning in the navy in the cruiser class. One hundred of these pins are of single design and the other hundred of double design. Those of the double design are for the sailors who were a part of the crew of the old cruiser *Boston*, and who have since been transferred to the *Albany*. These trophies are given by the Navy Department because the *Albany's* gunners made the best score at the target practice at Magdalena Bay, last Spring.

# THE SHEPARD MANUFACTURING CO

## MELROSE HIGHLANDS, MASS.

NEW YORK OFFICE: 15-17-19 Maiden Lane

CHICAGO OFFICE: 501 Heyworth Building

WE are the leading manufacturers of high-class wares in cloisonne and French transparent enamels. Our new fall lines in

*Gentlemen's Vest Buttons*  
*Cuff Links*  
*Stick Pins*  
*Bon-Bon Boxes*

*Ladies' Dress Buttons*  
*Buckles*  
*Hair Pins*  
*Hat Pins*

NEW YORK

**A** GENTLEMAN of thoroughly wide experience and fully acquainted with the needs of the jewelry trade of the United States, as salesman, designer and manufacturer, intends to open a European office, in Paris, to represent American firms in the purchase of foreign novelties in jewelry, art goods, bric-a-brac and kindred lines.

Correspondence in this direction is solicited from concerns not represented who wish to be thoroughly informed as to the markets, and others who wish to intrust special commissions to a competent resident buyer.

References and assurances of capability as to knowledge of languages and foreign markets, etc., without question, will be submitted.

PARIS, care of Jewelers' Circular-Weekly.

501. WATCHMAKER'S PLIERS. EARL A. BARKER, Bemidji, Minn. Filed May 19, 1904. Serial No. 208,719.

A pair of pliers adapted to be used for jewel setting comprising jaws pivoted together, one of which is straight and flagelliform and devoid of

lateral projections, and having a work supporting surface occupying a plane in radial alignment with the pivot, and being provided at its outer end with a semi-circular recess having its semi-circular wall disposed at right angles to the plane of the work supporting the surface, the other said jaw having a portion extending upward at a right angle to the radius of the pivot, then outward at a right angle to the first said portion, then downward parallel with the first said portion, the first said portion being greater in length than the last said portion, said downwardly extending portion being located opposite the recessed end of the first said jaw and having in its end a socket the center of which is aligned directly opposite the center of the semi-circular recess of the first said jaw, a straight punch held within the socket by frictional contact with the walls thereof, and the lower end of the downwardly extending portion of the upper jaw being spaced from the upper edge of the semi-circular recess and the work supporting surface of the lower jaw when the said jaws are in closed position.

405. CHANGEABLE-DIAL WATCHMAN'S TIMER JOSEPH J FITZSIMMONS, Portland, Ore. Filed Feb. 28, 1908. Serial No. 418,401.

An employe's timer comprising a clock-movement, an hour-hand post and minute-hand post, an hour-dial mounted on and rotated by said hour hand post, having radially spaced cipher-characters on its face arranged relatively to the figures of a clock-dial, a fixed ring on the frame of the clock-

movement and appropriately marked to represent a clock-dial, said ring being arranged to encircle the said hour-dial, a minute-dial mounted on and rotated by said minute-hand post, in front of said hour-dial, also having cipher-characters on its face arranged relatively to the figures of a clock-dial, and a screen having apertures arranged to disclose certain of said cipher-characters on said hour and minute-dials to view, but concealing all the remainder of said cipher-characters.

DESIGNS.

499. BADGE. ALBIN L. THOMA, Piqua, O.

Filed May 28, 1908. Serial No. 435,573. Term of patent 14 years.

502. HANDLE FOR MANICURING-FILES,

TOOTH-BRUSHES OR SIMILAR ARTICLES. HENRY J. HERBERT, Detroit, Mich. Filed May 1, 1908. Serial No. 430,419. Term of patent 7 years.

503. HANDLE FOR MANICURING-FILES, TOOTH-BRUSHES OR SIMILAR TOILET ARTICLES. HENRY J. HERBERT, Detroit, Mich. Filed May 1, 1908. Serial No. 430,420. Term of patent 14 years.

504. BACK FOR BRUSHES, MIRRORS OR SIMILAR ARTICLES. HENRY J. HERBERT, Detroit, Mich. Filed May 1, 1908. Serial No. 430,410. Term of patent 7 years.

505. BACK FOR MIRRORS, BRUSHES OR SIMILAR ARTICLES. HENRY J. HERBERT, Detroit, Mich. Filed May 1, 1908. Serial No. 430,411. Term of patent 7 years.

506. BACK FOR MIRRORS, BRUSHES OR SIMILAR ARTICLES. HENRY J. HERBERT, Detroit, Mich. Filed May 1, 1908. Serial No. 430,418. Term of patent 7 years.

508. CANDY-TONGS MEMBER. LEBRECHT FRITZSCHE, Newark, N. J., assignor to the

Richmond Bros. Co. Filed March 17, 1908. Serial No. 421,747. Term of patent 7 years.

509. HANDLE FOR SPOONS, FORKS OR SIMILAR ARTICLES. FREDERICK HABEN-SACK, Sag Harbor, N. Y., assignor to the

Fahys Watch Case Co., New York. Filed July 23, 1908. Serial No. 445,059. Term of patent 7 years.

510. BODY OF TEA OR COFFEE-POTS OR SIMILAR ARTICLES. GEORGE E. BALL,

Taunton, Mass. Filed June 11, 1908. Serial No. 437,987. Term of patent 14 years.

511. PLATTER OR SIMILAR ARTICLE. GEORGE E. BALL, Taunton, Mass. Filed June

11, 1908. Serial No. 437,988. Term of patent 14 years.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after

**“HULL” is the  
“Sterling”  
Mark for  
Umbrellas**

**Will It Not Pay You To Handle An  
Umbrella With These Qualifications?**

**First**—It is the foremost and only practical detachable and interchangeable umbrella on the market.

**Second**—The interchangeable feature enables you to suit the customer with any sort of base that may be desired, thus avoiding the likelihood of having him select an umbrella handle which pleases him and then complain about the price or quality of base.

**Third**—“Hull” handles can be shown in an exceedingly small space, and the bases laid away in a drawer, to be fitted to the handles when the customer calls.

**Fourth**—The detachable handle permits you to lay in a superb order of umbrellas at a modest outlay without buying an equally large quantity of bases to be carried from one season to another.

**Fifth**—It is stronger than any other umbrella, either regular or detachable.

**Sixth**—It is the outcome of our best thought, the best workmanship, and the best material that money can buy.

These six qualifications should convince you that the “HULL” umbrella will not only sell readily and yield a good profit, but that you will never have to apologize for one sold over your counters.

Write to-day for samples and we will send them by prepaid express.

publication of the mark sought to be registered, with said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for." Marks which are stated to have been "Used 10 years" are registrable under the last proviso of section 5 of said act, which is as follows: "And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."

**PUBLISHED SEPT. 8, 1908.**

No. 27,491. (CLASS 27. HOROLOGICAL INSTRUMENTS.) LANGENDORF WATCH CO., Langendorf, Switzerland, assignor to the American Swiss Watch Co., New York. Filed May 18, 1907.

Particular description of goods.—Watches, watch movements.

No. 35,332. (CLASS 37. PAPER AND STATIONERY.) MABIE, Todd & Co., New York. Filed June 13, 1908.

Particular description of goods.—Fountain-pens.

**BRITISH PATENTS.**

JUDGMENTS OF SPECIFICATIONS, 1907, FROM The Illustrated Official Journal.)

**ISSUE OF AUG. 26, 1908.**

70. PENS. H. EGGERT, Harburg, Germany. May 1.

relates to fountain-pens of the kind that are operated by the movement of a piston contained in the pen barrel. To prevent jerky or too rapid movement, the piston *b* is caused to rotate during its travel by a pin *k* attached to the piston-rod *d* cooperating with one or more spiral slots *j* in the

division *h* of the pen barrel *a*. The pin *k* is also attached to a ring *m* sliding on the extension *h*. To ensure an even flow of ink to the nib, the penage *p* in the feed-bar *n* is divided into two by aaphragm *q* which bears elastically against the nib at the front end, and a series of recesses *v* is formed in the feed-bar to act as an equalizing chamber.

75. BRACELET, ETC., FASTENINGS. R. L. ANTROBUS, Birmingham. May 4.

fastening for bracelets and the like comprises an upper part 12 and a base part 11 Fig. 3. The upper portion 12 has a plug 15 engaging with a

socket 13 on the base 11, doubled spring catches 14 on the plug 15 engaging under flange 14 on the socket. The springs 16 are attached to flat plates 15a, Fig. 5, and work in recesses 15c, Fig.

6. Finger-pieces 16a allow the springs to be compressed. Dowel pins 17, Fig. 4, on the part 12 engage with sockets 18 on the part 11 to make the fastening rigid.

10,493. PENS. M. W. MOORE, Everett, Mass., U. S. May 6. Period for granting patent not yet expired.

Relates to reservoir pens of the class which, when the pen is retracted into the reservoir, are filled from the pen end through the spaces between the pen carrier and the inner surface of the reservoir. The nib 4 is carried by a rod 3 provided

with a valve 19 fitting the reservoir 2, and is withdrawn into the reservoir by a slide 9. The reservoir is closed at the rear end by a collapsible nipple 12 attached to the rod 3. A plurality of bypasses 20 in the walls of the reservoir allows ink to pass into the reservoir when the pen is retracted.

10,538. CLOCKS. G. L. JOHNSON, London. May 6.

The clock is adapted to ring an alarm at the completion of the second portion of the development of a photograph, the alarm being set and the clock started as soon as the contour lines appear on the plate. The length of this period depends on the development number of the plate and the duration of the first period of development between the immersion of the plate and the appearance of the contour lines.

Dials; Seconds' Mechanism.—The large dial *a* has an outer minute-ring and within a series of concentric arcs corresponding with varying dur-

ations of the first stage of development of a photographic plate (such durations being determined by means of a band *h* and a dial graduated to show 120 seconds), the arcs themselves having radial divisions corresponding with the different development numbers of the plates.

Alarms.—To set the clock, the pointer *b* is set to the required division of the dial by turning the milled button *d*, the wheel *f* on the pointer spindle simultaneously rotating the screwed shaft *k*, when the hammer lever *q* by virtue of an internally threaded hub traverses the shaft. The clock now rotates the spindle *k* in the reverse direction through the friction wheel *l*, gradually returning the alarm lever *g*, so that the latter is raised by the pin *f* on the shaft *o* to strike the alarm bell and indicate the completion of the development when the hand *b* reaches zero, and a second time when the hand reaches the fixed stop on the dial. The spindle *o* is driven from the shaft *k* through gearing *m*, *n*.

Stop-Mechanism.—In its extreme position the alarm lever *q* raises the spring-actuated lever *r* by means of the pin *s* to put the spring *t* into engagement with the balance and stop the clock.

10,575. JEWELRY AND LIKE FASTENINGS. W. H. PERRY (trading as J. Perry), Nottingham. May 7.

In a snap fastening for bracelets, necklets, lockets, watch chains, waistbelts, and the like, a bent spring *A* takes into a socket part *B*, Fig. 5, the end of the turned-back member 2 of the spring *A* engaging with the lip 7 of the socket. The fastening is released by pressing a piece 8 at-

tached to a spring in the socket. Fig. 1 shows the fastening to be applied to a chain bracelet, the ends of the chain being attached to rings 1,

3. Fig. 6 shows the fastening applied to a padlock-shaped lock.

# Now It's The Lord Elgin

The demand to-day is for thin watches.  
The public have been waiting for a  
thin Elgin Watch—now it's here—

## LORD ELGIN

The  
Thinnest  
Watch  
Made  
in  
America  
with  
Enamel Dial

the thinnest watch made in America  
with enamel dial.

Like all Elgin Watches—it was not  
put on the market until worthy to carry  
with it the Elgin reputation for reliability.

Every Lord Elgin is cased at the factory  
and timed in the case—the most  
accurate thin watch in America.

Four grades—7, 15, 17, and 21  
Jewels adjusted. 18K and 14K solid  
gold cases, also 25 year filled cases.

Furnished with metal dials, plain or  
engraved, gilt or silver.

Prices furnished on application of  
your jobber, or write the Company for  
only authorized price list.

# THE HOROLOGICAL REVIEW

## How a Great Modern Watch Factory Obtains the Correct Time for the Regulation of Its Watches.\*

its accuracy he refers to some other higher standard—such, for instance, as a public clock or the chronometer in some watchmaker's window. In case these higher standards should disagree, it is necessary to go to some ultimate standard, superior to all of them. The ultimate standard time in the United States is the time determined at the Naval Observatory, Washington, and this is referred to the transit of fixed stars across the meridian, which is a time that never varies, and therefore is the absolute standard.

AMONG the many fields of industry in which hand labor has been superseded by automatic machinery, there is none in which the change has been so strikingly complete and successful as in that of the manufacture of watches. That the machine-made American watch of the higher grades can attain as high marks for time-keeping as the finest products of the skilled watchmakers of some of the older countries of Europe has been proved by tests at the National Laboratory, London. This fact is the more remarkable when we remember that

The possession of some standard of time must be reckoned as one of the absolute necessities of the highly developed life of to-day. Every man's watch is his own particular standard. In case of doubt as to

EXTERIOR OF THE OBSERVATORY.

at Waltham factory, from which the test watches referred to were selected, is turned out watches at the rate of nearly 3,000 per day.

It is not our intention to describe, just now, the wonderfully complex and ingenious machinery by which the American watch is made; that is a long and deeply interesting story in itself. The present article will show how one great, modern watch works maintains its own private standard of time, for the guidance of the workmen in the various rooms of the establishment, in regulating the watches that are turned out at the rate of so many thousand per day.

\*From the *Scientific American*.

INTERIOR OF OBSERVATORY SHOWING THE TRANSIT.

# WALTHAM WATCHES

## COLONIAL SERIES

These Extra Thin Watches may be had in four qualities of movements as follows:

### **RIVERSIDE; NICKEL;**

19 fine ruby jewels; raised gold settings; double roller escapement; steel escape wheel; exposed sapphire pallets; compensating balance, adjusted to temperature and five positions; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; red gold center wheel; exposed winding wheels.

### **ROYAL; NICKEL;**

17 jewels; red gold settings; exposed pallets; compensating balance, adjusted to temperature, and three positions; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

### **NO. 1425; NICKEL;**

17 jewels; red gilded settings; exposed pallets; cut expansion balance; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; red gilded center wheel; exposed winding wheels.

### **NO. 1420; NICKEL;**

15 jewels; settings; exposed pallets; cut expansion balance; meantime screws patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

Riverside and Royal grades are supplied in Gold and Gold Filled cases, both Regular Jointed Open Face and Calumet (Single Joint).

No. 1425 and No. 1420 grades are supplied in Gold Filled Cases only, both Regular Jointed Open Face and Calumet.

Colonial Series watches have Gilded or Silver Finish Metal Dials, as may be preferred. Solid Gold, 18k. and 14k. dials at an extra charge.

*Movements manufactured and guaranteed by*

**WALTHAM WATCH COMPANY,**  
WALTHAM, MASS.

The Waltham Watch Co. enjoys the unique distinction of being the only watch factory in the world equipped with a complete observatory of its own. All other factories are dependent upon some outside instrument to furnish time signals by which to compare their own timepieces and determine the time rates for their product of watches.

Many years ago the managers of this company realized that it would be to their best interest to get as closely in touch as possible with the prime source of time, which, they would be the transit of any celestial body, preferably a fixed star, across their meridian; and, acting under the advice of the late Professor Rogers (at that time connected with Harvard Observatory, Cambridge), they built in the works an observa-

tory of Harvard Observatory from Greenwich has been established by taking the mean time of 10 box chronometers. At a later date this longitude was verified by means of cable connections between a chronograph at Greenwich and a chronograph at Harvard University, connected by the transatlantic cable. In 1880 the longitude of the Waltham Observatory from Harvard was similarly established by means of two electrically connected chronographs.

As the plant of the company increased in size the vibration of the heavy moving machinery, that was transmitted through the earth to the clock room, caused perceptible vibrations in the time of the two master clocks. It was decided, therefore, to build the new clock room illustrated herewith, install within it the two master clocks, and

The outer shell rests upon the floor of the basement, and its ceiling is within two or three inches of the basement ceiling. The inner shell is 100 feet square and eight feet in height, measured from the level of the cellar floor. There is an 18-inch space between the walls of the inner and outer shell and a nine-inch space between the two ceilings. On the front of the building the walls are three feet apart to accommodate the various scientific instruments, such as the chronograph, barometer, thermostat, level-tester, etc. The inner house is carried down four feet below the floor of the basement and rests upon a foundation of gravel. The walls of the inner house below the floor level consist of two thicknesses of brick with an air space between, and the whole of the excavated portion is lined,

A SECTIONAL VIEW THROUGH THE CLOCK-ROOM.

and put in the Geodetic and Hydrographic Surveys. In connection with the observatory they also constructed a clock room, in which they placed two master clocks, which were designed specially for that purpose by the superintendent of the works. As far back as the '40's the longi-

add a sidereal clock. The room was completed early in 1904, and is now running, as we shall show later in this article, with exceptional results as to accuracy.

The clock room, which is located in the basement of one of the buildings, is built with a double shell of hollow tile brick.

sides and bottom, with sheet lead, carefully soldered to render it water-tight.

At the bottom of the excavation is a layer of 12 inches of sand, and upon this are built up three solid brick piers, measuring three feet six inches square in plan by three feet in height, which forms the

Specialties in Casing of Chronographs, Repeaters and all Kinds of Complicated Swiss Watches

21 and 23 Maiden Lane

New York City

The Only Safety Chatelaine Case which enables a Watch to Keep Correct Time and Cannot be Lost

#### MERITS

Holds the watch firmly and securely, thus preventing the movement from being jarred, as there is no swinging or bobbing up and down while the wearer is walking or running. Protects both the case and garment from wear.

*Absolute Security*

#### UTILITY

It can be raised so as to read the time, and revealed to have either the dial or back facing front, without removing brooch pin or watch from the garment. Can be worn on the shoulder, belt, chain or fob.

*Will not pull or wear off*

Patented U. S. June 9, 1908.  
Patents Pending in Foreign Countries.

MADE FOR ALL SIZES OF LADIES' WATCHES, BOTH OPEN FACE AND HUNTING

#### Artistic and Practical

The only brooch and watch combined. Affords absolute security, as it has a safety catch. Nothing to wear out, as it works on friction bearings. Eliminates the possibility of loss of the watch owing to either bow, hook, swivel or link wearing out, breaking or coming apart, as in the old style chatelaine. Does not interfere with either winding or setting of movement.

Watch worn as Chatelaine, showing it lifted to read the time.

Watch worn on chain as a pendant to garment as additional security.

Licensed Under Wachter Patent. Patented July 26, 1905; May 21, 1907

oundation for the three pyramidal piers  
to carry the three clocks. The interior  
walls and ceilings and the piers for the  
clocks are finished in white glazed tiling.  
The object of the lead lining, of course, is  
to thoroughly exclude moisture, while the  
bed of sand serves to absorb all waves of  
vibration that are communicated through  
the ground from the various moving ma-  
chinery throughout the works. At the level  
of the basement floor a light grating pro-  
vides a platform for the use of the clock  
pendants.

Although the placing of the clock room  
in the cellar and the provision of a complete  
space around the inner room would in-  
deed afford excellent insulation against ex-  
ternal changes of temperature, the inner  
room is further safeguarded by placing in  
the outer 18-inch space between the two  
shells a lamp which is electrically connected  
and controlled by the thermostat, of  
which we give an illustration. The ther-  
mostat consists of a composite strip of rub-  
ber and metal, which is held by a clamp at  
its upper end and curves to right or left  
in response to temperature changes, opening or closing  
the contact points at the lower end of  
the thermostat, the electrical circuit which  
regulates the flame of the lamp. The ther-  
mostat is set so as to maintain the space  
between the two shells at a temperature  
which shall insure a constant temperature of  
70° in the inner clock house. This it does  
with such success that there is less than  
1/100 of a degree of daily variation.

The two clocks that stand side by side  
in the clock room serve to keep civil time—  
that is to say, the local time at the works.  
The clock to the right carries a 12-hour  
dial, and is known as the mean-time clock.  
By means of electrical connections it sends

time signals throughout the whole works,  
so that each operative at his bench may  
know the time his watch to seconds. The other clock,  
known as the astronomical clock, carries a  
24-hour dial, and may be connected to the  
works if desired. These two clocks serve  
as a check one upon the other. They were

made at the works, and they have run in  
periods of over two months, with a varia-  
tion of less than 0.3 of a second, or 1/259,000  
part of a day. For a period of 361 days  
(Jan. 21, 1907, to Jan. 17, 1908), the varia-  
tion of rate was a trifle less than 44/1,000  
of one second.

The third clock, which stands to the rear  
of the other two, is the sidereal clock. It  
is used in connection with the observatory  
work, and serves to keep sidereal or star  
time.

Sidereal time is determined by the transit  
of the fixed stars across the meridian. The  
stars are at such enormous distances from  
the earth that their transit is not appreciably  
affected by the revolution of the earth in  
its orbit. It is the change of the position  
of the earth with regard to the sun that  
accounts for the daily difference between  
sidereal and solar time of three minutes  
56.55 seconds, the solar day being shorter  
than the sidereal day by this amount. The  
passage of a particular star across the mer-  
idian at Waltham is noted in the works'  
observatory on two nights of every week,  
and an exact record of this time is obtained  
by means of a chronograph.

The chronograph which is carried on a  
shelf in the space between the inner and  
outer shells of the clock room consists of  
a horizontal metal drum, rotated at such  
a rate of speed by means of a weight as to  
give exactly one revolution a minute. Upon  
the drum is fastened a sheet of paper. In  
front of the drum is a small carriage, which  
is moved laterally, by means of a revolving  
feed screw. This carriage carries a pen  
that normally traces a continuous straight  
line on the sheet. The pen is electrically  
connected to the sidereal clock, and at every  
full oscillation of the pendulum, or at every

Special Railroad Movements

To secure and hold the railroad trade there is no more attractive and permanently satisfactory line than the V. & C. Special Railroad Movements.

The watches in question have been in use for many years by a great many railroad men on all important lines in this country, and have shown a degree of accuracy and reliability which is unparalleled.

Many railroad watch inspectors have assured us that the rigid requirements of a railroad watch are met by the V. & C. to a degree which is beyond criticism, and which places the line in a class by itself.

You should have a representative showing of these railroad movements—17 to 21 jeweled, adjusted to heat, cold and position, and lever set—in order to get your share, and more than your share, of this most desirable class of business.

**EDMOND E. ROBERT, Sole Agent**

3 Maiden Lane, NEW YORK CITY

**Profit**

Is what you are in business for—"Ball Watches" assure you several varieties.

1—A fair cash return.

2—Satisfied customers—most desirable "profit."

3—No preliminary repairing of movement—No fitting to case—No long regulation. Thus, saving your time is "profit."

4—No "price cutting" competitors.

A "profit proposition" straight through for every reliable retail jeweler.

Write for booklet of facts and figures—We want an authorized agent in every locality.

alternate second, the electrical circuit is broken and the pen makes a slight jog in the line. The speed of the cylinder is so arranged that the distance between the jogs corresponds to a certain scale—say, of one inch to the second. The pen carriage of the chronograph is also electrically connected to the observatory, where a button is placed conveniently to the hand of the observer.

When an observation of a transit is to be made, the chronograph is started and the observer, with his eye at the telescope, presses the button at the instant that the

error is then compared with the amount of error observed at the last observation, and the difference between the two observations, divided by the number of days, gives the daily rate of variation. This rate, as observed at the Waltham works, rarely exceeds 1/10 of a second per day. That is to say, the sidereal clock will vary only one second in 10 days, or three seconds in a month. The variation, as found, is corrected by adding or subtracting weights to and from the pendulum, the weights used being small disks, generally of aluminum.

Summing up, then, we find that the great

**Novel Astronomical Clock.**

ALL the movements of the earth are represented by a remarkable astronomical clock which recently was placed on public view at the American Museum of Natural History. It was designed by Dr. Herman C. Bumpus, the director of the institution, and is the result of months of patient experiment.

It not only shows the daily rotation of the earth upon its axes, but the motion about the sun, and also demonstrates through all the year the changes which cause the march of the seasons.

The earth is a globe of paper composition four feet in diameter, while the sun is a stereopticon placed at a distance of 10 feet. The light from the stereopticon shines upon the sphere in such a manner as to illuminate half of it at a time. The shadow of a wire which is back of the lens corresponds to the meridian of New York.

The earth is caused to revolve by means of a shaft which derives its power from a small Howard steeple clock. This shaft passes through a wooden tunnel and communicates its power to bevel gears, which cause the sphere to be always changing its poise.

By watching the meridian shadow the observer can always tell the time of day with mathematical accuracy.

No device of its kind has ever been exhibited in a museum for the instruction of the public, and this astronomical clock rivals in its accuracy and in the painstaking way in which it is constructed the most delicate instruments to be seen in well equipped observatories. The contrivance was constructed by W. H. Beers, an expert mechanic connected with the museum.

It was the original intention to have merely a globe showing the one motion of the earth, but as the scheme developed through experiments the present elaborate clock was gradually perfected.

On the ground floor of the museum is another device showing the revolution of the earth about the sun on a larger scale. The orbit swings through the entrance hall and over the information bureau and into the hall of forestry.

**American Watches in Germany.**

IN stating that in 1907 1,107 American silver watches and 12,763 watches in steel, nickel and other cases were imported into Germany, Consul-General Richard Guenther comments:

"It would be worth while for American manufacturers of watches to make efforts to increase their sales in Germany, and Frankfurt-on-the-Main, being a chief distributing center for southern and middle Germany, would be a good place to push their products. It would seem that the United States watch works should be able to compete in the German market with Switzerland. When it is taken in consideration that in 1907 355,938 gold watches, 846,189 silver watches and 458,057 watches in steel, nickel and other cases were imported from Switzerland into Germany, it would seem reasonable that a part of that large trade could be secured by the United States if proper methods were employed."

Chronographic record.—The parallel lines are traced on a rotating drum by a pen which is electrically connected with the sidereal clock. At every alternate second, a jog is made in the line. Intervening jogs record the time of passage of a fixed star across the field of the transit.

observer passes each vertical hairline (there are 50 in all) in the eye piece of the transit. At a time the button is pressed an extra mark is made on the paper, and by using a micrometer graduated, say, to 0.01 inch, it is possible to determine to 1/100 of a second the time of the transit of the star across each hairline. The accompanying illustration will serve to show the hair lines as they appear in the field of the observer's vision looking through the telescope. They are mere dots, varying in size according to their observed magnitude, some of them being so small as actually to disappear as they pass behind each of the hair lines. The amount of time occupied by the passage of the star from one line to the next is from about three seconds to about five seconds, depending upon the "declination" of the star.

The chronographic record, shown in the illustration, indicates that the time of passage was about *three seconds*, showing that the star must have been near the meridian.

By taking the mean of these five observations, it will be seen that the time of the transit of the star is obtained with remarkable accuracy.

The next step is to compare the time of transit as recorded by the sidereal clock at the Waltham with the time of transit of the star as given in the tables of the "Ephemeris." The "Ephemeris" is an official publication, issued annually, which gives the exact position of the heavenly bodies on every day of the year, and from this the exact time of the transit of the particular star observed may be known. Whatever the sidereal clock differs from this time is the error of the clock. The amount of this

accuracy obtained in this clock room is due to the careful elimination of the various elements that would exercise a disturbing influence. Changes of temperature are reduced to a minimum by insulation of the clock house within an air space, in which the temperature is automatically maintained at an even rate. Changes of humidity are controlled by the specially designed walls, by the preservation of an even temperature, and by placing boxes of hygroscopic material within the inner chamber. Errors due to vibration are eliminated by placing the clocks on massive masonry piers which stand upon a bed of sand as a shock-absorbing medium.

The astronomical clock is encased in a barometric case, fitted with an air pump, by which the air may be exhausted and the pendulum and other moving parts relieved from barometric disturbances. For it must be understood that variation in barometric pressure means a variation in the density of the air, and that the speed of the pendulum must necessarily be affected by such changes of density.

In conclusion, it may be mentioned that of late years it has been the custom of the company to submit a percentage of its watches to the National Physical Laboratory at the Kew Observatory, London, an institution which accepts instruments of precision from applicants all over the world, tests them, and makes a report. Here 86 per cent. of the watches submitted by the Waltham Watch Co. have been accepted and passed in Class A. A mark for accuracy of as high as 80 to 85 per cent. is a common figure. This result is extremely interesting as showing that American automatic machinery has been brought to such a pitch of perfection that the machine-made watch is able to hold its own at this laboratory with the finest products of European hand labor.

# STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

## A Timely and Original Autumn Display

Designed expressly for The Jewelers' Circular-Weekly by Otto Jonas

A MINATURE model of the world-famed Statue of Liberty, dressed in a garb of Autumn leaves, will produce a display which will be beautiful as well as novel and more than ordinarily attractive. Secure a large quantity of Autumn leaves. For a slight compensation any boy will gather more than is sufficient; the more

your doll to this stake, tying it firmly, as shown in Fig. B.

Now run your electric wiring down the back of the board. This wiring can be laid in the regulation moulding strips to the base of the platform, and thence be carried to attach with connection. The socket for the incandescent lamp should rest in the

statue to the base, and after sewing cotton duck strongly around the neck of your doll, draw it down firmly and tuck it both fore and aft, and tack the cloth at the feet of the statue. Drape this very tight so that it will serve as the base on which to drape the brown cloth. This is to be arranged in folds and layers, pinned or sewn in position, as shown in Fig. C.

Now take your leaves (which have been previously wrapped for a short time so in a damp cloth so as to soften and make them pliable), and fit them to the dress of the figure. Begin at the head and work up, so that you will have a full arrangement like Fig. H.

The crown of small leaves is made by sewing or pasting these leaves to a small cardboard formed into a ringlet to the top of the head. Fig. D shows crown partially completed.

Another smaller circle of leaves is used to cover the lower part of the electric socket and bulb, as shown in Fig. E. Make it wide enough so that it does not touch the bulb and become scorched by close contact.

On the left of the statue a sign should be substituted for the book. This display when neatly arranged, will prove very attractive, and in order to do it justice the best be completed outside the window during leisure hours, as it cannot be prepared as a hurry-up job. The base of the window should be covered with green wallpaper, and the back and sides draped with some lighter colored cloth. Appropriate signs are suggested below.

Should one desire to construct a large model, only a head and bust are required and a pair of tan gloves. Figs. G and H show method of assembling parts of large statue, otherwise the details are as per above description.

For a statue of moderate size the cost should not exceed \$2, and will probably be less.

Appropriate signs are as follows:

Concerning Presents Let Us Enlighten You
Light Upon the Subject of PRESENTS.
Our Values SHINE by Comparison
A Brilliant Showing of Fine Ware.

colors there are the better the general effect will be.

Next, get a doll of a size suitable to your window, some liquid bronze, a yard of cotton duck and a yard of brown lining cloth. In case you are making use of an extra large doll more cloth and other materials will, of course, be required. For the torch, enough electric wire will be required to stretch from your nearest connecting plug to the top of your statue, and, of course, this wiring will be fitted with a socket at one end and plug at the other. Measure a board as wide as your doll and as high as its shoulder. Nail this to a small square board used as a base, then attach extensions for support of each arm, like Fig. A. Bind

the hand of the doll (use four, eight or 16 candlepower, to match size of your doll), and can be secured by tying with small twine.

Saturate the hair of the doll with mucilage after trimming it so that it will not fall lower than the shoulders. The mucilage will cause the hair to stick close to the head and form a hard surface. When this is thoroughly dried, paint the face, hands, hair, etc., with the liquid bronze, including eyes and lips. It may be necessary to give these parts two coatings of the bronze.

Meantime build a box of proportionate size to your statue in rough imitation of the base on the original. This should be built of smooth boards and bronzed. Nail your

**Up-to-the-Minute Selling Arguments Used by Retail Jewelers**

**ANTIQU** Jewelry.—We have a number of very interesting pieces, including a some antique drop of pearls and diamonds, set in old silver, \$18; a very pretty pearl and emerald necklace, \$150; a beautiful antique enameled pendant, with a sapphire in center, surrounded by diamonds, \$150; a turquoise necklace, with diamonds, a great gem, \$45. Also a large selection of brooches, collars, rings, etc., in artistic designs. Herrmann, Newport,

Windows of the soul are the eyes. Are you taking proper care of your children's eyes? Do you know that a conscientious optician may save their sight? Can they see as good with one eye as they can with the other? Better have their eyes examined before the Fall term of school starts. Our methods are accurate and satisfaction guaranteed. M. O. Nobbe & Co., Galveston, Tex.

Only a short time and the schools will open; it's your duty to see that your children's eyes are prepared for the task of constant study. We have the best equipped optical rooms in the city and a competent optician to make the examinations. If you have noticed the slightest defects in the eyes of your children, bring them to us at once. Reliable watches, diamonds and the latest styles in fashionable jewelry are here in large selections. We always handle the best in quality, although our prices are the lowest. M. Berman, Altoona, Pa.

There is no stone that can equal the diamond; its brilliancy is fascinating to the owner and the observer. Worn in any position, they give the wearer an air of distinction—always worth their face value—a good investment at any time. I would like to show you my new line; the pleasure

would be mutual. A finer line of diamonds and settings cannot be seen anywhere; \$20 to \$350. Geo. H. Doherty, Ottumwa, Ia.

Autumn attire demands new articles of jewelry to adorn, beautify and add to your costume those fascinating touches of elegance that nothing else can give. Our line of new goods in pearls and all precious stones is not only complete, but very attractive. Throw on the brake! You are traveling at such a high rate of speed as necessitates you to slow up and consider your physical necessities. You have been neglecting your eyes, and now you feel the necessity of using spectacles. Don't delay this longer, but come in and let us fit you now. Taylor Bros., Houston, Tex.

Engagement rings should be set with flawless, perfect gems to be appropriate and symbolic. We have a fine collection of rings set with single stones of great beauty. The prices vary according to the weight of the stones, and are remarkably fine values at the prices named. Single diamond ladies' ring, \$10, \$20, \$30, up to \$500. W. Neiman's, Duquesne, Pa.

Stop and think how easy it is to be deceived in buying a diamond. The diamonds sold at Leffert's are the finest to be had anywhere. This establishment has a record for selling nothing but pure white, flawless, brilliant stones. We are offering some special prices on diamonds this month. Here are a few prices: \$7.50, \$10, \$12.50, \$16, \$25, \$35, \$50, \$100, upwards. Leffert Bros., Portland, Ore.

**Fine Watch Repairing.**—We mean this in its fullest sense. We have the facilities for repairing fine watches, and we do fine work on all repairing. If your watch is out of order bring it to us; we'll return it to you as good as new. Milton Haney, Marysville, Cal.

**The Store of H. Jorgenson, Superior, Wis.**

**I**LLUSTRATED below is the attractively furnished store of H. Jorgenson, 1124 Tower Ave., Superior, Wis. The dimensions of the store are 70 by 17 feet. There is one small window fronting on a side street and one large window eight feet wide and 11 feet high, facing the main street. The fixtures, including the show cases and wall cases are of oak.

Mr. Jorgenson has been engaged in business in Superior for the past 17 years, having previously conducted a store for 10 years in Mayville, N. Dak. Upon first coming to Superior he bought out the business of Lars Shaker, who then had a store at 615 Tower Ave., but he soon moved into more commodious quarters and, again in 1903, leased his present quarters. The establishment, which in the beginning had only one man besides Mr. Jorgenson himself, now has a working force of four men. On the right as you enter the establishment a finely equipped optical department occupies a space in the rear, while on the left is the repairing department. The stock is attractively displayed in wall and counter cases. Gas is used as the illuminant.

**The Way of the Enterprising.**

**A** JEWELER of Nashua, N. H., A. De Montigny, has originated a method of attracting attention to his show window which has proved very successful. Mr. De Montigny cuts out the striking and timely illustrations published on the front cover of THE CIRCULAR-WEEKLY, neatly pastes them upon a sheet of white bristol board, and around the edges mounts a number of brooches, lockets, bracelets and watches.

An interesting window display was seen recently in the store of J. A. Johnson, Independence, Kans. The display consisted of garments worn by the natives of the Fiji Islands, attractive pieces of coral and the skins of rare animals. Some of the curios were sent in by Mr. Johnson's son, who is making a tour with the novelist, Jack London.

INTERIOR VIEW OF THE STORE OF H. JORGENSON, SUPERIOR, WIS.

## The Preparation of Good Retail Advertising Copy.

By HENRY HERBERT HUFF, in the *General Merchants' Review*.

**T**HE purpose of retail advertising is to furnish information concerning goods or services offered for sale. It is the aim of the advertiser to influence the greatest number of individuals to purchase his product or trade at his store. As it is the mind that causes the will to act, we shall say then that the success of an ad is measured by the number of minds influenced strongly enough to induce buying.

Retail advertising embraces not only newspaper advertisements, but folders, package slips, street car cards, posters, novelties, or anything else that helps to build up a store's reputation or promotes the sale of its wares. However, we are to consider only the more important form of publicity—the newspaper advertisement.

### MUST PRODUCE FAVORABLE IMPRESSION

Good advertising consists in being able to produce favorable impressions upon the minds of those who read the ad. An impression that causes the reader to want to buy is the one sought. The final test of advertising is results. In this paper we are to discuss the elements that contribute to the success of an advertisement.

The history of retail advertising is a record of remarkable development. In early days, buyer and seller stood face to face. The former used his various senses—sight, smell, taste, etc., to examine the merits of a commodity, while the latter, in his efforts to make a sale, used his personal magnetism and ability to show up the articles' best points. Gradually this form of salesmanship has lost ground—first, because the increase in population brought so many patrons to the store that the seller had no time to meet each separately and discuss the merits of his wares; second, because keen competition and Yankee ambition have led merchants to reach out after trade, far remote from their immediate vicinity.

### ADVERTISING VS. SALESMANSHIP.

In either case, advertising has been substituted for the human salesman. The dealer found that, by this new method, he could tell as many individuals as he wished, in substance, what he had been saying to each one separately. The catalogue houses, utilizing this idea have succeeded in drawing business from every corner of the earth. The advertisement gives such definite information and in such an attractive way that the reader comes to the store, ready to buy without further urging. It has been demonstrated, with stores, advertising continually and extensively, that any cut in the advertising appropriation means proportionately less work for the clerks.

### BUSINESS CARDS OUT OF DATE.

Modern advertising has but one purpose—to build up business. Occasionally it takes the form of invitations to openings or merely outlines the policy of the store, but, as a rule, the only ad that pays is the one that gives specific illustrations of articles on sale with prices and selling points. Early advertising took the form of "business cards" and was done more to help the paper than anything else. Slowly the more ambitious dealers recognized the possibilities of the advertisement as a substitute for the salesman. From a crude beginning, this idea has grown to be the basis of modern retail advertising.

The ideal advertisement embodies, in the largest degree, the positive qualities of the human salesman. In changing from the "salesman individually" (the advertisement), the seller loses to a great extent his personality and ability to frame proper arguments for each particular individual while the buyer is forced to judge goods from the mere description or illustration.

### INJECTS PERSONAL ELEMENT.

To overcome these objections, the modern advertisement is written in as "personal," attractive manner as possible, with selling points for several classes of buyers included in the one advertisement; and, as for the buyer, he makes his imagination do for all his different senses. To assist the buyer in obtaining a true conception of the goods, it is necessary that the description be both accurate and complete; that the illustration be clear; and the senses of taste, sound, sight, etc., be appealed to by the use of euphonious and suggestive words and phrases. The steps leading up to a sale, either orally or in the printed ad, are as follows:

- (1) Securing attention.
- (2) Creating an interest and arousing a desire.
- (3) Overcoming objections or convincing the will.
- (4) Closing the sale—the resolve to buy.

### HEADLINES AND DISPLAY IMPORTANT.

The first is of vital importance. No salesman could hope to sell anything if he did not first obtain the attention of his prospective customer. For this reason, the headlines and display of an advertisement deserve much attention.

The opening sentences of the ad usually constitute the second step. This, however, is not always present nor will the steps always follow in the order given. With products, the desirability of which is not already known, it is very necessary to cre-

ate a desire for them. There are many products, however, for which a desire already been cultivated and with which the public is familiar.

### NECESSITY FOR DESCRIPTION.

The third step consists in describing article and presenting its merits. The customer's objections must be answered. Interest has been obtained and his desire aroused, but he hesitates before deciding to buy. He wonders how long the article lasts, how well it is made, and the like.

The final step consists in overcoming last bit of resistance offered by the customer and leading him to make his resolve to buy. Price is stated and, with weight of quality before it, is more likely to result in a sale. As a final objection would-be buyer feels that he cannot afford the article or does not care to buy it that day.

### Photography in Advertising.

**T**O discover and retain new customers is the mission of the advertisement, says a writer in the *Novelty News*, of Chicago. To be seen is 99 per cent. of the success of an advertisement—so the greater strength of the argument is in the pictorial part. Then comes the selection of the study which will best fit the goods and impress the public.

Facts simply and briefly told in a simple style, both in the picture and word, will be most convincing. Where can we get the facts for illustrating? There is no revelation so correct as the lens, no one can picture them so simply or so concisely. The photograph carefully prepared is the most useful part of the copy.

It takes long and special training, with the skill of an artist and the knowledge of advertising with the special quality what we call sounding the public taste to produce a study that conveys a strong reason why one should buy the goods advertised. There is great power in a picture. Artists have moved the world by well-timed pictorial utterances. History is chronic in the picture. Napoleon knew the value of pictures when he scorned the world, stole every piece of art he could. Why for? To illustrate his advertisement—"Napoleon's Glory."

Our art is to make things conspicuous to be seen, to awaken an interest in certain goods, but spare us having so much originality that we become odd, and let none of us play a tune so constantly that our ears become long, but rather to our original add the ennobling truth and sincerity which in our hearts we know are the lasting qualities of any business, and let us flee from the blatant style of any overdrawn advertisement.

Advertisements are more forceful than they ever were because men who special in this work have learned to put the purchasing power both in the illustration and the wording. An advertisement without a picture is sometimes a dead investment. The picture should give the life, strength, attraction, power and dignity to the advertisement.

Public taste and public sentiment demand something of real merit. If the goods advertised have merit, why should not

appearance in public each month is  
rst introduction to many new readers,  
ur argument should not fail to greet  
angers in a most pleasing and con-  
cig way. If your address to the public  
ooklet, to be of highest value pic-  
a, it should have on the front page  
trg introduction and the theme of the  
rpictured throughout the article. The  
ks must have fine quality of paper  
pit on and give the engraver and the  
seen an opportunity to make the illus-  
ds develop their highest colors and  
nes sufficiently to please the most  
s taste. The type set up with cuts  
oklets and for periodical work may  
ul to run a few hundred extras at a  
lost for letter insert advertising.

must attract the attention of buyers.  
ne the best written arguments in the  
are lost—utterly lost. This is the  
s of the picture. It must be the  
ll to the mind to draw it away from  
at then engaging the attention to the  
u and hold the eye and mind to  
k an interest, first in the picture, then  
th words, and later the goods they de-  
b all of which must contain the "buy-

buy" force strong enough to determine in  
the reader the decision to order. This de-  
cision follows a pleasant association of the  
article in the mind, made pleasing by the  
pleasure-giving force in the picture.

We would not advertise an automobile  
killing someone, leaving the reader with  
the grim horrors of an accident. Far from  
it. The picture must be full of the pleasure-  
giving life of the machine, the full bloom  
of young strength, health and outdoor  
surroundings.

Many salesmen, in their personal inter-  
views, talk too much. Many ad. writers  
write too much and picture makers picture  
too much. Space and time are money.  
Talk and words are often tiring, while the  
picture, to be a successful advertising prod-  
uct, should have all the tiresome, the de-  
pressing and fatiguing element eliminated.  
The illustration must be a gem, with a set-  
ting so costly.

One of the first points a salesman makes  
is to give a general idea of the goods, a  
review of the whole machine or product.  
This preliminary and most efficient point is  
exactly what the illustration does. An  
hour's talk to describe a machine does not  
leave half as correct an idea of the exact  
working of the machine as does a photo-  
graph of it which shows the machine in its  
true likeness.

Often a salesman is turned down because  
he arrives when the buyer cannot afford to  
give him any time, and the expense of  
travel and time may include several days  
just to catch this buyer. So the salesman  
loses an order, because to be insistent would  
cause him to lose a customer. On the  
other hand, if the salesman had first sent  
a full series of photographs and had fol-  
lowed to close the order after the photo-  
graphs had done their work, his labors  
would have been simplified and the task of  
closing the sale rendered far easier. Or if  
the salesman does not make a personal visit  
any questions that arise are sent to the  
house direct.

Thus the salesman feels the buyer is a  
clear thinker, a man who knows what he  
needs and buys it, while the buyer is sat-  
isfied on a short interview and commends  
the house for sending these silent forerunners  
on to advise him of their goods, and, alto-  
gether, buyer and salesman have had a  
pleasant closing of a deal and both feel that  
the expediency of business is a sane man's  
way of doing business.

Many artists who make good photographs  
do not always make the picture that will  
help sell the goods. A picture, to do this,  
must address the public. It must be a study  
effervescing with business—not a picture to  
please alone from an artistic sense. It  
must be an illustration with publicity in it  
rather than one of scrolls and dashes.

The general appearance of an advertise-  
ment is so largely dependent on the illus-  
tration that we must claim it has much to say  
that will interest buyers, in its strength and  
brightness and the thought represented. To  
get an *idea* for an illustration that will tell  
the story, inspire confidence, have bright-  
ness and strength of purpose, and yet be  
full of the selling quality, one must study  
every phase of the goods in its relation to  
a picture as well as the relation of the goods  
to the public. This requires of the pho-  
tographer much original observation and

research, and the necessity of combining his  
art and pictorial feeling to very prosaic lines  
requires such a variety of handling that he  
is prevented from falling into a prosaic  
sameness.

This adds another vigor to this branch  
of the work—that of versatility. Its value  
is the mind, the perception, the imagination,  
applied to many different themes. The story  
of the creation was told in about 600 words.  
Space, space and printers' art were valuable  
in earlier days, and required then, as now,  
that when the public at large is to be ad-  
dressed the message must be brief, concise  
and to the point.

The picture is the brevity of the story,  
the condensing of manifold ideas that would  
fill long columns of reading matter into a  
pleasing and attractive art story.

### Put Your Heart Into Your Work.

(By JEROME P. FLEISHMAN, in *Profitable Adver-  
tising.*)

**T**HE man who succeeds in any line of en-  
deavor is he who has worked whole-  
heartedly, whole-souledly, whole-selfedly for  
success.

For this thing called Success is simply  
the realization of ideals we have formed,  
and striven to materialize.

Don't have a "grouch" against the firm  
that supplies your bread and butter. Better  
work for \$10 a week and *work* than be em-  
ployed at \$25 a week and *shirk*.

Coming down to the office in the morning  
with a desire to make the day pass as quick-  
ly as possible, and with as little real work  
performed as is absolutely necessary, is a  
dead-sure way to oblivion.

There's no exhilaration that can equal the  
feeling a man sensates after a particularly  
hard job has been got out of the way, and  
got out of the way by being *done right*.

The difference between enthusiasm and  
half-heartedness is the difference between a  
big, fat envelope on pay day and a salary  
that gets smaller in the eyes of the man who  
is always looking for, but never working  
for a raise.

Enthusiasm! That's the thing that builds  
bridges and tunnels through mountains. One  
enthusiastic employe in an organization is  
worth an army of wishers for six o'clock  
and Saturday afternoon.

And there can be no enthusiasm unless  
you are heart, head and hand in league  
with your work.

The man who views his daily work as  
part of his daily self is the man who ac-  
complishes things. The man who performs  
his duties in a spirit of let's-get-rid-of-  
these-pesky-matters is the man you never  
hear of as making progress.

*Put your heart into your work!*

J. L. Mosher, Akeley, Minn., has taken  
advantage of the advertising possibilities of  
the electioneering season by sending out  
attractively printed cards three inches wide  
by five and one-half inches high, and bear-  
ing a half-tone photo of the jeweler. Above  
the photo is the inscription, "Twenty-eight  
years' experience on railroad watches in  
city and country," and below the photo,  
"J. H. Mosher, Hubbard County, candidate  
—for your watch repairing."

# WORKSHOP NOTES AND QUERIES

Answers are also solicited from our readers to the questions published on this page.] Attention paid to communications unless accompanied by full name and address of the writer.

**QUESTION No. 2212.—Melting Small Quantities of Silver.**—How can I melt quantities of silver scraps and filings?  
M. S.

**ANSWER**—The silver can be melted in a white crucible, capable of holding double amount of silver to be melted. Place silver in the crucible and add enough carbonate of soda to cover the silver thoroughly. Prepare a fire, preferably of coke, at the crucible can be heated to a red heat. When melted stir with an iron rod and pour into an iron mould or pan, so it will form in an ingot.

**QUESTION No. 2213.—Substitute for Platinum.**—Are there any alloys that could be used as a substitute for platinum?  
S. P.

**ANSWER**—An alloy has been patented and is claimed to be a good substitute for platinum. It consists of: Silver, 16½ ozs.; Nickel, 4 1/5 lbs.; bismuth, ½ oz., and gold, 16 wts.

**QUESTION No. 2214.—Browning of Steel.**—Is there any way that I can brown pieces of steel?  
T. B. S.

**ANSWER**—A recent German patent for the browning of steel is described as follows: The articles which are to be browned are placed in the anode of the bath, which consists of distilled water. The cathode is formed by the vessel, which contains water, if the anode is made of carbon. Otherwise a plate of iron. Copper carbon is placed in the bath. The water is kept at from 160 degrees F. to 180 degrees F., and the tension of the current must be sufficiently great to decompose the water. The oxygen which then is given off at the anode forms in an hour or so a layer of black oxide of iron (a combination of ferrous and ferric oxide), which is said to polish up very well.

**QUESTION No. 2215.—Soldering Iron to Iron.**—What is the most reliable material to use for soldering iron to iron?  
S. A.

**ANSWER**—Pure copper is the best metal to use as solder to join iron to iron. It adheres the surfaces firmly, and by its ductility allows the soldered pieces to be bent without breaking.

**QUESTION No. 2216.—Gold and Silver Cyanide Solution.**—How can I recover gold and silver from old cyanide solutions?  
T. R. G.

**ANSWER**—The simplest method of recovering the gold and silver from old solutions is by boiling down the solution to dryness, then melting in a crucible. This is accomplished by the following method: Put the solution in an enameled iron kettle and

boil down to dryness over a good fire. When the solution becomes thick at the end it should be stirred in order to prevent baking to the bottom of the kettle. The mass is now poured on a sheet iron plate and completely dried over a slow fire. It is afterwards put into a mortar and pulverized fine. This powdered mass is placed in a crucible, after it has been well mixed with a flux consisting of calcined soda and powdered charcoal; use about one-quarter more flux than the dried substance to be reduced. The crucible, which should be only a little over half full of the well-mixed mass, is then warmed and placed over a good coke fire. When it begins to boil, more of the mixed reduction and flux is added gradually, but not too much, or it will boil over. The boiling mass should be stirred with a warmed iron rod to facilitate the escaping of the gas. If the mass threatens to boil over, it can be driven back by throwing on a little table salt. When the mass becomes so that it will stir easily and when the rod, upon being removed, appears clean, the crucible should be covered up and some coke should be piled over the top so that the mass will reach a white heat. Let this remain in the fire for half an hour. Remove the crucible and let cool. A second crucible can be placed in the fire for another run. When the crucible is cold the metal will be found in the shape of a button at the bottom, but if the heat has not been sufficient then it will be found as small globules scattered among the slack.

**QUESTION No. 2217.—Soft Solder and Flux for Jewelry.**—Kindly give me a formula for a soft solder and flux for soft soldering delicate pieces of jewelry.  
S. S.

**ANSWER**—For soldering delicate objects where a rod of solder cannot be employed it is best to take any good tin solder and file it into fine particles. Mix these with glycerine and powdered sal ammoniac into a thin paste. A little of this paste is placed at the point where the soldering is to be done, the gas flame is applied and with little heat the solder will melt, leaving a clear joint. For silver soldering, silver solder is filed fine, mixed with borax and water into a paste and applied to the joints.

Several pearls of considerable value have been found recently at Hononegah Park on the Rock River, near Beloit, Wis. Louis Goss, of Beloit, one of the more fortunate, picked up an exceptionally fine pearl valued at \$500. Miss Hazel Bullock, of Cheboygan, Wis., found a stone of luster and perfect shape, valued at \$50.

## A Standard Silver Solution for Plating Flat-Ware.

THE largest silver-plating industry is in the manufacture of flat-ware, says the *Brass World*. While both cheap and good work are made, the majority of the goods turned out are really high grade.

In plating this class of work, experience has been such a good teacher that nearly every concern uses practically the same formula for making up its solutions. To be sure, a slight variation in the amount of silver and the quantity of free cyanide exists in the case of each manufacturer, but it is so small that it can scarcely be called an actual difference in the formula. The formula which is in general used for this class of work, and which the test of time has demonstrated to be very satisfactory, consists of the following:

Water .....	1 gallon
Silver .....	3 ozs.
Free cyanide.....	3 ozs.

In other words, there are three ounces of metallic silver and three ounces of free cyanide in each gallon.

Some platers prefer the chloride of silver in making up the bath, while others use the cyanide of silver. It is an open question which is the better. One of the leading makers uses the chloride of silver, and their work cannot be excelled. A competitor, also noted for the excellency of his ware, prefers the cyanide of silver. Theoretically, of course, the cyanide of silver is preferable, as it does not introduce any foreign matter into the solution. When the chloride of silver is dissolved in cyanide, potassium chloride is formed, which has no value in the solution. The fact that the chloride of silver is more easily made is much in its favor, and it seems possible to obtain results equally as good as with the cyanide.

## A New Process for Producing a Dark Coating Upon Nickel.

ALEXANDER CLASSEN, of Aachen, Germany, who is well known as an investigator and discoverer of electrochemical processes, has recently patented a method of producing a black or dark-blue color upon nickel deposits which is somewhat different from anything of this nature now carried on.

The method as described in the specification (U. S. Patent 91,982, June 30, 1908) is as follows:

A nickel solution is made up of the following ingredients:

Water .....	25 gallons
Nickel sulphate .....	40 lbs.
(Single salts.)	
Sodium sulphate .....	8 lbs.
Nickel chloride .....	2 lbs.
Boric acid .....	1 lb.
Extract of licorice root.....	10 lbs.

The work to be treated is first sand-blasted or dipped in order to obtain a dead surface and then inserted in the preceding solution as the cathode. The deposition is allowed to go on for any desired time in order to produce a good deposit, and when this has been done, the voltage of the current is suddenly reduced, when a dark color will be imparted to the deposit. The article is then removed from the solution.

## Beautiful Athenian Pyxis in the Metropolitan Museum of Art.

Among the recent important accessions to the pottery exhibited at the Metropolitan Museum of Art, New York, is a Greek vase, an Athenian pyxis. In regard to this purchase the *Bulletin of the Museum* says:

One of the finest Greek vases purchased by the museum last year is a white Athenian pyxis, or toilet-box, decorated with a scene representing the Judgment of Paris. It ranks among the best vases of its kind in existence, and both in technique and in the treatment of the subject is an excellent example of the high level of art which was sometimes attained by Greek

The height of the vase is 4¾ inches (12 cm.) with the cover 6¾ inches (17 cm.). There are a few chips on the cover and a slight discoloration of the white surface, but the vase is in perfect preservation.

The subject represented is one of the most popular in ancient art. Paris is seated on a rock, with his shepherd's staff in his hand, looking up at Hermes, who has evidently just arrived and is in the act of explaining to him the purpose of his mission. In this period of vase-painting Paris is represented in two ways. He is either in Asiatic costume, richly dressed and often adorned with ornaments, reminding us that he is the son of the King of Troy; or he has the simple clothes and attributes of a simple shepherd, with nothing to point to his Asiatic descent and royal descent. It is thus that he is represented here. With a true instinct for characterization—of which indeed we have evidence throughout the scene—the artist has depicted him as an easy-going, somewhat effeminate boy, with a curly head of hair, pouting lips and turned-up nose. He is not at all disturbed by the approach of the three goddesses.

The three goddesses are represented each with her characteristic attributes. Hera is shown towards the other two as if hesitating before the first to enter the scene of the contest. She wears a veil and holds the scepter, the latter betokening her position as the queen of heaven, and her right hand bestows sovereignty and riches, the left is prepared to promise Paris in return for his deciding the dispute in her favor. Next comes Athena with aegis, helmet and lance. Even she has lost her usual dignified bearing, and has become self-conscious. As if she had found the helmet too forbidding, she has taken it off and put on a diadem in its stead; but

she still holds the helmet in her hand so as not to lose her martial character altogether, since she will promise Paris glory and renown in war as her offering. Behind Athena stands Aphrodite, absorbed in giving the finishing touches to her toilet. Eros stands in front of her looking up full of admiration at the goddess, as if sure that his mother's charms and her promise of the fairest wife to Paris would win the day. The bowl she holds in her hand probably

AN ATHENIAN PYXIS, SHOWING SCENE REPRESENTING THE JUDGMENT OF PARIS.

contains the perfume with which she has anointed herself.

"The period to which this pyxis belongs is soon after the beginning of the fine red-figured period, about 470-460 B. C."

The Pittsburg Association of Credit Men is agitating amendments to the bankruptcy laws, and the attitude which has been taken is enlisting the attention of jewelers. A majority of the jewelers of Pittsburg are members of this organization, and the question was discussed at considerable length, Sept. 3, at which time the members of the association and their friends enjoyed an outing at Rock Springs, W. Va. President Enoch Rauh, of the organization, asserts that the present law gives many persons an opportunity to rush into bankruptcy, and that the recent business depression has taught some good lessons.

## American Art Teacher Speaks at the International Art Congress on Broader Use of Drawing in Education.

AT London, England, Aug. 7, Dr. James P. Hancy, director of art and manual training in the public schools of New York, who, with Prof. Arthur W. Dow, represented the United States on the programme of the Third International Congress for the Development of Art, addressed the members of the congress at the Royal College of Science, South Kensington. Dr. Hancy, who is secretary of the National Society for the Promotion of Industrial Education, made a plea for the broader use of drawing in education and urged its immediate relation to many school subjects and its great importance in all phases of training for a vocational life. He also laid emphasis upon its peculiar value in leading to aesthetic appreciation, saying in part: "Drawing is the syntax of the arts; it is the foundation of successful practice of all forms of hand work. It is also essential in all practice of the innumerable branches of industrial design and to the development of the sense of appreciation of fine form and excellent proportion."

"The older teaching emphasized the technical side, and spent much time in copy work. The subject was made dry, formal and imitative. Later teaching in America has seen much more free and creative work. The drawing is not now taught as a mere end in itself, quite apart from other school subjects, but has been made a means to many ends and has been successfully introduced from the kindergarten to the high school. Our present teaching sees drawing made of use in all forms of constructive work. The boy in school now learns the use of plans, and how to make and read them. This knowledge is an invaluable asset to one who later enters the vocational field, as so many boys must. Many hundreds of pupils are yearly taught in our elementary schools how to make directly from the model a working sketch properly lettered and dimensioned. Thus the work has been taken out of the formal and theoretical field and made immediately practical."

"Besides this, both our boys and girls are constantly called upon to use drawing in connection with their work in design. The latter subject not only gives excellent training in taste, but is daily becoming of more importance in our industries. We have learned that good form and pattern must appear in all our manufactured products which are to compete with the well-designed goods made in foreign markets. Teaching of design in the public schools not only

908 G Street N. W., Washington, C.

creates prospective workmen and designers but also is fast developing an appreciation of public which understands the practical value of art and each year demands higher standards in all forms of dress and furniture.

In all this teaching of drawing in relation to other subjects there is a direct educational value of high importance. Art so taught is learned not through precept, but through practice. This teaching gives the student the constant joy and stimulus of achievement, and calls for continuous creative work. Giving also a desire for what is most appropriate in decoration and dress, leads to a keener interest in things that are in every way for better surroundings in our cities and towns, for better architecture, better public buildings and better schools. Thus it makes for a finer civic spirit."

In illustration of his remarks Dr. Haney showed a large number of examples of the work of the pupils in the New York City schools.

**Hints to the Jeweler in Buying Precious Stones.**

In buying gems, says the *Deutscher Goldschmiede Kalender* for 1908, we must, first of all, consider of whom we purchase the goods. Every jeweler who is absolutely certain of his experience should resort only to reliable, well-known sources; above all, he should beware of so-called "bargains," as there is often a trap in them. On the other hand, an unfortunately widespread lack of confidence in trustworthy dealers in gems is unwarrantable.

The little stratagems resorted to in trade are minute in the desire to show the goods in the best light, which every jeweler also wishes to attain by tasteful arrangement, display cases, small boxes, etc. Thus the jeweler will notice that the dealer offers him the stones or pearls lying on, or wrapped in, papers of different colors. This is for the reason that the tinted background causes the stone to appear a trifle better in color than it really is. The diamond is usually shown on a thin, bluish-white paper; it is a peculiar kind that, to judge to say, is best obtainable in Paris. As a rule, dealers in supplies keep these Persian stone papers, which, compared with our makes, are somewhat more expensive.

These diamonds are shown on black paper, the lower and medium grades of opals. The fine opals are usually shown in white papers, and usually resting on white wadding. For pearls, pale blue and dark papers are the most practical; they are thereby made to appear whiter. Rubies look best on brown or brownish shades; other stones are often shown reposing on white wadding, or, better still, on silk plush, of a cobalt-yellow color. Sapphires, light-colored varieties, are shown on brown or brown tints; dark stones, on the other hand, on white. Emeralds look best on a pale-colored paper; if wadding is selected, pink best answers the purpose. Turquoise makes the best appearance on orange or brick red papers.

This does not exhaust all the shades employed, and in the most artistic manner

every advantage is coaxed out, so that by judiciously chosen tints the stones are made to look their best. All these colors, however, apply only to the interior, according to which the outer covering is selected. Salmon-colored and reddish interiors are set in gray-green, white interiors in white, brown insides have brown coverings of the same color. To escape such influence, the buying jeweler should accustom himself to take the stone out of the paper and examine it while lying on the back of the hand or on some neutral color.

The light and the time of day also play a not unimportant part in the selection of gems. A northern light is best by which to buy stones—that is to say, the windows of the room in which the stones are examined for color and quality should face the north. This is a cold and sober light that does not lead to any deception as to the color in question. In a room flooded with sunshine all colored stones, especially the ruby, look much better than where the sun is shaded out. We should therefore avoid buying stones in such surroundings unless thoroughly familiar with their effects. Altogether, we should never buy in an unknown light; the loss on reaching home will be unpleasantly evident. It is a peculiar fact that the ruby in the late afternoon hours looks much paler than it really is; in light varieties the color shades into violet, then, again, by artificial light, such a stone would present a faultless appearance.

From the foregoing it will be apparent that the purchase of stones is a difficult matter, requiring, in the first place, comprehensive knowledge and, above all things, practical experience. As generally recognized good colors we find in the case of the ruby the dark pigeon-blood color, with a slight tendency to violet. If the color is brownish, as in the Siamese rubies, the stone is no longer first class. In the sapphire we prefer the dark, velvety cashmere blue; in the emerald, the rich emerald green. In England the color shading slightly into yellow is preferred, as in the latter country it is especially the yellowish green olivine that is used.

Concerning the color much might be said, and in regard to the innumerable shades there is always difference of opinion. If the jeweler buys from a house known to be reliable he will always be well served and the vendor will not be backward in enlightening the jeweler. Again, in closing, we voice a warning against apparent "bargains."

Lewis & Van Sickle, Oskaloosa, Ia., recently held a formal opening of their new store, which has been fitted up very attractively.

The jewelry store of Henry F. Korsmeyer, Chapin, Ill., was looted, recently, by burglars who gained entrance through a window in the rear. Most of the stock taken consisted of cheap lockets, rings and bracelets, and the loss is estimated at \$75. Bloodhounds were secured in Decatur and put on the track. The burglars were traced towards Winchester. Upon their arrival in Winchester the dogs entered the railroad depot, where they came to a stop, and it is supposed that the thieves took a train at that point, and thus effected an escape.

**JEWELERS** carrying a fine of cut and Bohemian glass ware will find a ready

sale for unique and attractive vases and flower dishes. Offerings now to be seen in New York salesrooms include a variety of vases, rose jars, etc. A translucent glass rose jar is shown having an overwork effect in fantastic designs in colors. This jar has a rounded base, and is peculiarly attractive in shape. The sides of the jar flare outward until the central line is reached where the top part of the jar slants inward to end in a smooth, rounded top. A green glass vase with pattern work in gold is another attractive offering for the season's trade. It has a circle of gold about the base and a similar band at the top. Four regular concave curves on each of the four sides of the vase are surrounded by a pattern in gold, and have a dainty decorative scheme at the center. An especially odd-shaped receiver is shown this season, having a rounded base and a cone-shaped body terminating in a long, slender neck. Tall jars for long-stemmed flowers in red or ruby glass, with flower effect decorative tendencies in natural colors, are attractive. These vases come in a number of sizes from 10 to 14 inches in height.

**ARTISTIC CLOCKS OF VARIOUS FORMS**

At their salesrooms, 30 Barclay St., New York, Bawo & Dotter have on exhibition a line of attractive novelties in china, cut glass, clocks and kindred lines. Among the clocks now exhibited is a small mantel set. The base of the clock is supported on four curved legs, and is of white marble. On this base is a round standard of gold work, about which is festooned a wreath of the same workmanship. The clock face is at the front of the standard, and is embellished with gold hands and a wreath of painted flowers twining about the numerals. On the top of the standard stands a cupid, bow in hand. He has just sent an arrow and is watching its flight. At his feet is his quiver of arrows. Two candelabra accompany the clock, and are finished in keeping with the central piece. Another attractive clock seen at the same salesrooms is finished in ormolu gold. It has an oblong base on which is a standard about four inches in height, and in this is the clock face. On top of this standard is the figure of a small child holding aloft a wreath. At one side of the standard is the figure of a woman looking and reaching upward toward the child.

*The Special Manufacturers for the Retail Jewelry Trade*

47 JOHN STREET, NEW YORK

57 WASHINGTON STREET, CHICAGO

The only manufacturers who make College Fraternity Pins for the trade. A complete assortment always in stock. Illustrated catalog shows the entire line with list prices. Manufacturing pins for local sororities and fraternities a specialty. Designs cheerfully furnished.

CROWN PLIER No. 331

For clamping the collar of crowns on dust-proof cases while removing same from pendant. This is usually found a difficult task but easily done with the help of this plier.  
Nickel plated.....each, \$ .60

1 Doz. BARREL HOOKS (threaded) with Finished Drill and Tap

With this outfit a new barrel hook can be put in a barrel in a short time, and in a proper manner will not pull out. Price,.....  
Same as above without Taps and Drill, per doz.

JEWELERS' SQUARE SAWS, ROUND BACK

Hardened by a new process, giving a "toughness" not found in other brands of saws. in No. 00000 to No. 1. Price, per gross, \$1

ECHARCO WATCH GLASS CABINET No. 15 (Patented) Price, each, \$16.00

This cabinet has many new features not found in any other. Novelty and usefulness are the chief arguments in its favor.

Construction and Material.—The cases are made of oak, finely finished and of attractive appearance. Sides are paneled. Partitions of basswood and put together in best manner possible.

Partitions are skeleton, preventing accumulation of dust, chips, etc. Bottoms of cabinets are hollow to receive chips, dust, etc.

Arrangement for Glasses.—The nine drawers contain 1,547 spaces to hold glasses in upright position.

Labeling of drawers, as shown in cut, is on the pulls of the drawers and done in gold bronze on black background.

Dimensions.—24 inches wide, 29 3/4 inches high, 12 inches deep; weight, 45 lbs.; with packing case, 75 lbs.

The construction of drawers, the arrangement of partitions to economize space and weight, and the novel method of showing contents on drawer-pulls are all prominent characteristics and extremely well thought of.

Top View, Showing Skeleton Frame of Drawer. Accumulation of dust and chips is impossible.

SHELDON'S PATENT HAIRSPRING COLLET REMOVER

No need of any more distorted hairspring bent balances.

Every watchmaker knows how troublesome to remove the collet without either distorting hairspring or bending the balance; with the use of this tool the difficulty is overcome. The tool is provided with a pair of spring fingers, which at the ends and ground very thin and sharp. By tilting the balance the jaws may be slid under hairspring and by pressing the jaws together will readily loosen the collet and then by turning the central screw, which has a hole in it to receive the staff pivot, you can force the collet from the staff, without injury to balance or spring. The adjustable screw nut is provided to avoid wear or injury to the jaws. A glance at the illustration will demonstrate the utility of this tool. Finely nickel plated.

Price, each, \$1.25

RING SEPARATING PLIER No. 1

A most effective device for cutting rings from fingers, when too tight to be removed otherwise. A few turns of the saw will cut a ring of average weight. Full nickel plated

Price, each, \$1.75

A handsome Booklet, 8 inches by 5 inches, fully illustrating Zipperer's tools for watchmakers will be mailed you upon receipt of a postal card, with your name and address.

# Leadership in Business

like leadership in anything else, is simply the working out of nature's law of the survival of the fittest. Show me a business that is successful and I will show you, in ninety-nine cases out of a hundred, one that deserves to be. The law of the universe constantly seeks and demands the best and casts out the useless and unfit.

If you would be successful you cannot afford to give anything less than the best that is in you, and that man is worse than a fool who undertakes to succeed by trickery, chicanery or dishonesty, for when he attempts to cheat his neighbor, or deliver less than he sells, he injures himself beyond repair. His deceit will find him out and surely tear down and destroy.

It has been our constant aim in business to deliver more than we sold. Our sun is still shining.

## Read Our Customers' Letters

MILWAUKEE, Wis., Jan. 17, 1908.  
The Arnstine Bros. Company,  
Cleveland, Ohio.

Gentlemen:—The Holiday Rush being over, I herewith enclose you a remittance for my account, as there is no bill that we owe that we pay more cheerfully than we do yours.

This has been the fourth year that we have used your Catalog with splendid results. It gives me great pleasure to state that, in spite of there being 20,000 men out of employment in this territory, our business compares favorably with the month of December a year ago, and we attribute it largely to the good advertising that your Catalog has done for us, both in and out of the Holiday Season.

Wishing you a happy and prosperous 1908, I am,

Yours very truly,  
ARCHIE TEGTMEYER.

**This firm used The Arnstine Bros. Company Catalogs in 1904, 1905, 1906 and 1907, and again placed an order for 1908.**

STORE OF ARCHIE TEGTMEYER, MILWAUKEE, WIS.

NORFOLK, Va., Jan. 22, 1908.  
The Arnstine Bros. Company,  
Cleveland, Ohio.

Gentlemen—Replying to your card of the 4th inst., relative to the results obtained from the catalogs, beg to say that the results, considering the times, and being my first year, were very satisfactory. I think, of course, of establishing the Catalogs for several years, that it will result in doing a much larger business.

My customers and friends complimented me very much upon the appearance of the Catalogs and the class of goods illustrated, and it is my intention to follow next season with another Catalog, even larger and better. Yours truly,

E. F. JAKEMAN.

# Real Rose Hat Pins

**This will be the largest selling article this Fall and Winter—it is already.**

So remarkable are the sales of DELAMOTHE Real Rose Hat Pins that we do not expect dealers to believe same until they have actually tried them out. It does not seem possible that during JULY this product was sold by Retailers at the rate of two to twenty dozen daily—EVERY day. The Retailers' profit is unusually large. Not only are they proved big sellers, but they are a great attraction for the stores that sell them. The largest Advertising Campaign in years is behind this product. Every possible Advertising and Selling Help will be furnished Dealers gratis. This product will be sold to the best Dealers only, and retail prices will be strictly maintained.

DELAMOTHE Real Rose Hat Pins are made out of live roses, changed by a secret process into metal, then finished in attractive colorings and mounted on Hat Pins. This SECRET process is a recent discovery of Prof. L. G. Delamothe, a noted French Electro-Chemist, and is owned solely by the Delamothe Natural Art Decorating Co., Spokane, Washington, for which this Company is the Sole Distributor. It is the ONLY process by which an OPEN Rose can be perfectly metallized. This product is made in the finest manner possible, and its high quality will be maintained. The Roses used are grown in Oregon and Washington, famous the world over for their beauty and superiority—made where these Roses grow. No two Real Rose Hat Pins are alike. Finished in five colors to conform to the prevailing fashions in millinery. Six sizes, from the smallest rosebud to the full blown flower.

**Not sold through Jobbers.**

*Do not buy inferior imitations. Sold direct only.*

**Write for Illustrated Price List**

## THE "CHIPPENDALE" DESIGN

IN the "Chippendale" line of Flatware, this Company has undoubtedly produced a masterpiece in the art of the Silversmith. The real "Chippendale" spirit is embodied in every portion of the design. Grace, Strength, Refinement and Practicability are the distinguishing characteristics of all of Chippendale's productions, and these same excellent qualities are represented in every piece of Smith "Chippendale" Flatware.

FRANK W. SMITH COMPANY

GARDNER, MASS.

Manufacturers of Sterling Silverware

# A New Pattern in Toilet Ware

The distinguishing feature of the new Whiting FLORENTINE Toilet Ware is its refinement of line, of ornament, and of conformation.

The mirror handles are conveniently long, the brush backs of a distinctive shape, symmetrically elegant and adapted to advantageous service, while the exceptional flatness of all the mountings adds to the individual character of the set.

Workmanship and materials are of the best quality, and the Florentine is finished in four attractive styles—plain, engraved, etched and repousse.

# BIRTH-MONTH SPOONS

NOTHING is more suitable for a birthday gift than a handsome souvenir spoon, especially when you are able to make a choice from such a unique and attractive line as we herewith present your consideration on this and the preceding page.

Careful study has been made in the designing of the different patterns, that each month be represented by its symbolic flower.

This, together with the exceptionally fine die work, heavy weight and beautiful gray finish, prove to be the finest set of Birth-Month spoons ever offered to the Trade.

Their beauty cannot be adequately described. They must be seen to be fully appreciated.

Write us and let us tell you what special inducements we can offer in regard to this handsome Flemish Oak display box, velvet lined, with plate glass cover

These spoons are made and are for sale by

# SPECIAL Blackinton Locket Combination

## 18 Old Reliable W. & S. B. ★ Locket for \$31.15

Above are shown 18 of the handsomest and most salable lockets ever produced. The price of this combination of lockets to Retail Jewelers is \$31.15, and the total retail selling price is \$51.92.

This is undoubtedly the most desirable combination of lockets ever offered. There is not a poor or doubtful seller in the lot. With the lockets we give free of charge a handsome velvet lined case in which to display them, and keep them in perfect condition.

This combination is sold only through the jobbing trade and the universal price of the 18 lockets and velvet lined case is \$31.15 to Retail Jewelers. The retail selling price of each locket is plainly marked on a tag, the prices ranging from \$2.08 to \$3.50 and aggregating \$51.92 for the lot.

Order early to insure prompt delivery. If your jobber cannot supply you write us direct and we will tell you where to get the goods.

These goods are NOT sold to department stores or retail catalog houses.

## ENGELSMAN'S PATENTED COMBINATION "GEM" DISPLAY RINGS and ADJUSTABLE STONE HOLDERS MEET A LONG-FELT WANT

THEY ARE MONEY-MAKERS AND MONEY-SAVERS

UNMOUNTED STONES of any size and shape can be displayed advantageously, as is herein illustrated. Your investment in stock can thereby be *decreased*, as you need not mount them up in expensive settings. Your sales will also *increase* by being able to exhibit unmounted stones. The prices are *low* enough to induce you to buy them and *save* you from incurring frequent losses caused by the awkward handling of the tweezer when your customer desires to examine unmounted stones. Try them. For sale by all jobbers.

Due to greatly improved automatic machinery and reduced cost of production, we are now quoting these as follows:

Sets of 18 (full set), in box,	\$6.00
" " 12	4.00
" " 9	3.00

# The Williams Bros. Mfg. Co.—“Quality Ware”

CARVING SET—QUEEN ELIZABETH DESIGN

The latest of our well-known “Queen” Patterns is illustrated above. While each pattern we produce is more artistic, perhaps than its predecessors, we can hardly improve the *quality*. The Queen Elizabeth may be had either in bright or French Gray—5-oz. or 12-oz. plate. Almost any article of flat ware now ready.

THE WILLIAMS BROS. MANUFACTURING COMPANY, GLASTONBURY, CONN.  
(Plant Established 1849)

## Individuality

In your selection of bags it behooves you to buy those bags which stand out prominently as possessing an individuality of pattern, as opposed to the common goods scattered promiscuously around. You will find that the women know and discriminate in favor of the former every time. An inspection of the W. & D. line by you will lead you right.

# THE WILLIAM B. KERR CO.

*Specialists in Small Wares and Novelties in both  
Gold and Silver*

Three essentials of commercial success distinguish  
The William B. Kerr Company's productions:

**Admirable Workmanship.**—Every article exhibits in its smallest detail the perfection of modern silversmithing.

**Attractive Design.**—The graceful lines and refined ornamentation demanded by the best customers characterize all these productions.

**Moderate Price.**—Despite their superiority of design and workmanship, these goods are sold at thoroughly practical prices.

Factory and General  
Office,  
NEWARK, N. J.

320 Fifth Ave., New York CORNER OF  
32nd STREET

## Artists and Designers Agree

That the most meritorious compositions are those attaining harmony and breadth without superfluity of detail.

## Hostesses and Housewives Agree

That the best Sterling Silver Tableware is that having only enough ornamentation to lend the proper amount of grace to the dignity of clear, clean silver.

Note how **Ye MOUNT VERNON PATTERN** fills these requirements, being designed to ye Colonial taste of **Strength, Beauty and Simplicity**

*Its Success is Assured and Continuous*

CHICAGO OFFICE:  
501 Heyworth Building

We are the leading manufacturers of high-class wares in cloisonne and French transparent enamels. Our new fall lines in

<i>Gentlemen's Vest Buttons</i>	<i>Ladies' Dress Buttons</i>
<i>Cuff Links</i>	<i>Buckles</i>
<i>Stick Pins</i>	<i>Hair Pins</i>
<i>Bon-Bon Boxes</i>	<i>Hat Pins and Brooches</i>

embody several of the latest creations from the celebrated French artists and designers, Rene Lalique, Eugene Feuitatre, Rene Beauclair and others.

Many of our newest pieces have been made up from the advance 1909 fashion sheets from Paris, and these pieces have not as yet been made abroad.

We are manufacturing a line in enamel ware that duplicates the European creations in color and finish, and far exceeds anything of its sort in material and workmanship.

Our representatives are now out with a full line of samples and it will pay you to await their call and see these new goods before purchasing

### THIRD EDITION

# WORKSHOP NOTES

For JEWELERS and WATCHMAKERS

Revised and Enlarged

100 Pages New Matter

Containing 300 Pages (size, 7½ x 10½ inches), Bound in Cloth, Stiff Covers

A collection of the latest practical receipts on the manufacture and repairing of watches and clocks, and on the various processes entering into the manufacture and repairing of jewelry, as coloring, polishing, enameling, annealing, oxydizing, etc., in short, a thorough compendium of the numerous mechanical departments of the jewelers' and watchmakers' shop.

This book is the most useful, comprehensive and perfect publication for the workman at the bench, and should be in the hands of every jeweler and watchmaker in the country. It is the only book of its kind published.

PRICE, by mail postpaid, \$2.50

11 JOHN STREET, COR. BROADWAY (Corbin Building), NEW YORK

# The "Krementz-Bodkin Back" STUD and VEST BUTTON

Pat. Feb. 16, 1904

Krementz & Co. believe the trade will agree that they understand the jewelry business sufficiently to know that the "Krementz-Bodkin Back" Stud and Vest Button is the simplest and best mechanical Stud or Vest Button made.

The "Krementz-Bodkin Back" Stud and Vest Button is not one piece, but is one-piece construction, which makes it very simple and the strongest and most durable, because:

- 1—It is Solderless
- 2—It has no spring or hollow wire to bend or break
- 3—It is made of solid, hard spring metal throughout
- 4—It is made by Krementz & Co. which insures perfect quality, construction and workmanship

THE STORY OF THE HEAD

## Krementz & Co. Invite Comparison

Krementz & Co. stand back of their assertion. All "Krementz-Bodkin Back" Studs and Vest Buttons are sold also under the unique Krementz Collar Button Guarantee.

THE STORY OF THE BODKIN BACK

### GUARANTEE

If for any cause whatever, a "Krementz-Bodkin Back" Stud or Vest Button should be damaged either in the hands of the dealer or wearer, a new one will be given in exchange, without charge. "Krementz-Bodkin Back" Studs and Vest Buttons are made in large variety of patterns in 14-kt. gold and platinum, set with pearls and diamonds.

## The Necklace at Its Best

**T**HE MOST FEMININE of Jewelry, the Necklace, makes its own appeal. This appeal gains strength in proportion to the artistic beauty of the Necklace. It need not be elaborate—there is a beauty in simplicity. The BEAD Necklace is a simple and yet classic form. It admits of dainty decoration and charming variation, but even the plain Gold Bead is rich in beauty. The wide recognition given the Bead Necklaces of this house, bespeaks for them the special consideration of the trade.

Plain Roman Beads, straightaway sizes and graduated.

Vermicilli Trim Beads, straightaway sizes and graduated.

Alternated Beads, plain and decorated, in even or straightaway sizes.

Gems Alternated with Beads, producing very rich effects. Coral and Amethyst are used in this manner most impressively.

Other variations include Oval-shape Beads, etc.

# Mr. Jeweler:

Do you know that hundreds of your competitors in all parts of the country are making a specialty of Fans? Do you know that even a small line of Fans, properly displayed, will "dress up" the whole appearance of your stock? Of course, the Fans themselves must be suitable for jewelers, and must be bought from one who thoroughly understands the requirements of your trade. There is but one such house in America—

TO THE TRADE:

We are working hard now compiling our catalogue, and our compiler asserts that it will be any former edition of that valuable work.

It will be a great deal more than a mere book; it means the most careful selection of choice goods from every part of the world means reliability, salability and right price means that every dealer loses money unless "goes by the book."

If he buys from this book he gets mighty to cost of production, and right into a real quarters, for we are the foremost concern of the kind.

People who write that they can fill orders from our catalogue write falsely, as it cannot be done. To meet our prices they must substitute an inferior article.

Send for a copy of our book, and get in a rock.

For the trade only—our new, big catalogue, 100,000 items, sent free.

# The New Ideal Keyless Engraving Block

This is a beautifully finished Block and the keyless advantages are marked. The jaws are actuated by rotating bronze milled ring of head. The method is a great improvement over the key system, is very rapid and entirely satisfactory in every way. The jaws are adjustable and it is good practice to set one jaw stationary while the other should be permitted to swivel.

The turnable revolves on a self contained train of tempered steel balls, which may be removed in an instant when a less sensitive motion will be obtained, or the turntable may be locked to the base by the insertion of the locking pin. Every Block guaranteed and highly recommended.

No. F95. Price (complete with attachments), \$16.50

If you have not a copy of our double-sized 410-page Catalogue, write at once. Sent gratis upon application.

# "New Process" GILLETTE Blades

## Information to GILLETTE Dealers

Beginning with Sept. 1, 1908, only "New Process" GILLETTE blades will be distributed.

They differ in price, quality, appearance and style of package from the previous kind, and the public is being notified of the change by full-page advertisements in all the leading magazines.

More than two million GILLETTE users will now accept only "New Process" GILLETTE blades. If you have them in stock before other dealers in your locality you will get the business, and at the new price your profit is a very liberal one.

"New Process" blades are manufactured by newly-invented machines and processes, making them superior in appearance, operation and endurance to any blades ever produced by anyone.

These machines are automatically regulated, and grind, hone and sharpen each blade individually with the utmost precision.

Every cutting edge is perfect, and possesses a degree of keenness not produced by any other process.

"New Process" blades are finished with a high polish that renders them easy to

clean. Since dust and moisture do not cling readily to a polished surface, these blades are practically immune from rust.

"New Process" blades are packed in a handsome nickel-plated box which seals itself hermetically every time it is closed. This shuts out all dampness and effectively protects the blades from rust in any climate, land or sea. When empty, the box forms an attractive waterproof match safe.

**The set now contains twelve blades.**

**The Retail Price is \$1.00 per set.** Twelve sets are packed in a carton.

To those who are not handling the GILLETTE, we suggest, "Get Busy." Get the sales resulting from our huge advertising campaign—the increased business and profits that the co-operation of our Sales Department will bring you.

YOUR customers are continually seeing GILLETTE advertisements and they want the razor. Eventually they buy it somewhere.

**WHY NOT OF YOU?**

Write us for catalog and liberal discounts to dealers.

No. 8.

## IGNING PARIS FASHIONS.

JEWELRY NOVELTIES SEEN IN FRANCE'S CAPITAL.

PRETTY little ball watches are in the shape of a rosy-cheeked apple of enameled gold.

new fancy sautoirs, rarely, however, of workmanship, show metallized links not two inches in length reproducing a row moire ribbon in delicate tints edged with gold links and pearls.

torse shell hat pins are carved in the shape of flowers and have rhinestone or pearl centers.

the cross has returned to favor, in how- rather unobtrusive dimensions. Lit-

pearl or diamond crosses about two inches long hang from slender gold chains. A pretty brooch consists of a big dark sapphire surrounded by a wreath of turquoise and pearls.

new use for the image of Buddha has been discovered. The brooding, good, fat Buddha with a complacent god sits in front of a gilded golden screen, while on each side are fluted pillars in which hold tall wax candles.

etchou boxes of silver gilt or enamel ornament for men after smoking are about the size of a 25-cent piece and hang by a chain to the watch chain, while those for women depend from the sautoir or are carried in the purse or glove. Very handsome boxes show tiny painted miniatures on the inside in imitation of ancient snuff boxes, while others are gem-encrusted.

handsome hat pins come in the form of diamonds, with here and there a diamond drop. Quaint are hat pins in the guise of a big black cat's head in tarnished silver or black enamel with real fur surrounding the eyes.

gentleman's fob of black moire or very broad chain-work shows for pendant a gold medallion with a female head in profile. Medallions of dull silver reveal the silhouette of some renowned personage, Napoleon, etc., and are worn on the fob.

recent bride, in lieu of the traditional orange blossoms, had her veil secured by a pair of Mercury wings of silver set with diamonds.

## MOURNING JEWELRY.

in a country like France, where one puts so much mourning for a 46th cousin, mourning jewelry is of importance; the manufacturer pays great attention to this branch of the trade, and have evolved a number of novel jewelry. Jet, gun metal and blackened silver with such gems as the amethyst, black onyx, diamond and pearl are the sole stones which can be utilized during the period of mourning. I noticed a long sautoir of fine silver with jet beads punctuated at intervals with big irregular pearl cabochons, the ends terminating in jetted tassels.

A bar of gun metal was punctuated at each end with a cabochon amethyst rimmed

in black enamel. Black bracelets of dull enamel are suitable for the first stages of grief, as are Whitby jet with no luster. After this comes the ornate faceted jet, which is made in a variety of fetching designs. There are necklaces consisting of many twisted strands of small jet beads, weighted at each end with a tassel and which are thrown once over the neck. A dog collar in an open design of cut jet extended into a sort of flat jabot which fell in front. Strands of big cut jet beads make a pretty neck dressing.

A chain of tarnished silver links gold-engraved is divided by crystal beads. There are glittering jet coronets, bowknot or floral hairpins, high-backed Spanish combs of intricate pattern in jet with side combs to match. The watch bracelet or tiny ball watch of silver is rimmed in somber black enamel. Very elegant are parasol handles a foot long studded thickly with very small beads varied with cut jet, the knob set with either a great dark amethyst or a ball of faceted crystal. The card case and pocket-book are fashioned in the same manner, and the three pieces are extremely ornamental adjuncts to a mourning toilet.

Sautoirs of flexible enamel links, associated with tiny pearls are handsome, while others are in gun metal chains. Chain hand bags are of gun metal with mounts of the same, sometimes discreetly studded with amethysts or rhinestones. Barrettes of gun metal or black enamel are sometimes pearl or rhinestone-incrusted. There are big beads of gun metal for the neck and also beads of black opal expensive and rare.

COUNTESS DE MONTAIGU.

## Interesting Remnants of the Golden Cuirass of Theodoric the Great.

THE illustration on the front cover of this issue shows some excellent Byzantine goldsmith work of the Sixth Century, A.D., in the Museum di Classe, Ravenna. These ornaments date from the period at which the Byzantine, late Roman and Germanic influences, contended for supremacy in Italian art.

The central gold ornament shows the same so-called denticulate decoration that is so noticeable on the tomb of Theodoric in Ravenna. As the costly piece was found in 1854, during excavations in the Darsena, near the tomb, and seemed to be part of a coat of mail, Ferdinand de Lasteyrie has laid claim to it as belonging to Theodoric personally—a hypothetical claim that assuredly merits mention here, as it has been given some consideration.

The remaining ornaments, shown on the same plate, also of Byzantine character and approximately of the same period, were found in 1879, in the crypt of San Francesco at Ravenna.

## Badges Presented to the Sailors of the Gunboat "Albany."

THERE are now being made at the factory of J. Jessop & Sons, San Diego, Cal., 200 gold clasp pin badges which are to be delivered to the members of the crew of the United States gunboat *Albany*, when it reaches San Diego this month. The badges are presented by the Government as trophies for the best marksmanship in the navy in the cruiser class.

One hundred of the pins are of single pennant design, while the remainder show the two pennants. The latter go to those

BADGES PRESENTED TO SAILORS OF THE GUNBOAT "ALBANY."

members of the crew who were a part of the crew of the old gunboat *Boston*, and who have since been transferred to the *Albany*. The two-pennant pins bear the names of the *Boston* and the *Albany*, and the dates '07 and '08, the *Boston* having been the winner in 1907, while its successor carried off the honors at the target practice at Magdalena Bay, off the coast of Lower California, early this year.

The pins are of 14-karat gold, and are very handsome in their finish. It will be a proud day for the 200 jackies when they receive them and pin them, for the first time, to the lapels of their blouses.

A. H. W.

L. D. Rosenkrans has disposed of his interest in Rosenkrans & McKee, Oconomowoc, Wis., to Louis Notbohm, the style of the firm being now E. H. McKee & Co.

## WEBSTER SAYS:

“The word ‘Automatic’ is applied to a self-moving machine or one which has its moving power within itself. The moving power is usually a spring or weight, particularly the former.”

In applying the word “Automatic” to the Larter Shirt Studs and Larter Vest Buttons we wish to convey the full meaning of the word as “Webster” defines it.

The Larter Shirt Studs and Larter Vest Buttons are automatic in action, because they are moved by a strong spring which obviates the necessity of pushing or pulling the backs into place so as to prevent them from falling out or working out of a button-hole or eyelet-hole.

This is one of the strongest points in favor of our line of Larter Shirt Studs and Larter Vest Buttons. Each is made in the largest variety of patterns on the market.

## Annual Report on the Production of Precious Stones.

Text of the United States Geological Survey's Advance Pamphlet on Gems and Gem Minerals for 1907, compiled by Douglas B. Sterrett.

WASHINGTON, D. C., Sept. 18.—Through the courtesy of the United States Geological Survey THE CIRCULAR-WEEKLY is pleased to present its readers the following text of the department's annual report on the production of precious stones in addition to its regular publication. The result of which is again prepared by Douglas Sterrett, reads:

### INTRODUCTION.

Interest in the mining in the United States of more valuable of the precious stones, as emerald, ruby, emerald and sapphire, was during 1907. The announcement of the discovery and the statement of the incidents associated with the discovery of diamonds in Arkansas made during the year by Messrs. Kunz and Langton. Development work on this diamond mine was carried on and is still in progress. Ruby deposits of Cowee Valley, Macon County, N. C., were still further tested, and the ruby in matrix specimens was reported and. Prospecting for emerald at the emerald mine in Alexander County, N. C., resulted in the discovery of promising gems, and is expected that the locality will be developed on a larger scale in the near future. The output of sapphire in Montana, of both the rich blue and multicolored gems, was very large. The blue sapphire is found in the matrix in a dike; the multicolored sapphire is found in placer deposits. The locality the latter variety was mined with gold along with gold.

Several new localities and varieties of gems were reported during the year. Among the discoveries are deposits of topaz near Macon County, Tex., and of beryl, tourmaline, garnet and rose-quartz in Colorado. The new varieties of gems are benitoite, chrysoptase, serpentine cat's-eye, blue and gold quartz and smithsonite. Benitoite is a rare blue colored stone found in San Benito County, Cal. Blue chrysoptase is copper-stained sapphire, and has been found at Globe, Arizona. Serpentine cat's-eye has been found in Tulare County, Cal. It is gray to green serpentine with a luster, and gives a marked cat's-eye effect when cut "en cabochon." A new variety of gold consists of native gold liberally sprinkled with copper-stained vein quartz. The new variety of benitoite is a translucent, apple-green variety found in large quantities in the Kelly mine, New Mexico. The color is similar to that of chrysoptase though the gem is much softer.

Gems appearing under new names are amazonite (matrix) and azurmalachite. Amazonite is the green, blue-green and bluish variscite matrix with its associated matrix. The color varies from white to gray, yellow, red, and brown in color, and the various colors obtained in cut gems are quite pleasing. Amazonite is the name applied by Dr. G. F. Smith to the copper carbonate gems from the mines of Arizona, and, as the name indicates a combination of azurite and malachite.

The precious stones industry was in a flourishing condition during the first part of 1907. During the last half of the year, however, there was a depression in mining and the sale of gems. The active mining part of the industry was not seriously affected as the part dependent on cut material.

### AGATE, MOSS AGATE, ETC.

Agate or chalcedony "clams" were reported from South Bend, Wash., by the Haberal Lapidary Jewelry Co. Whether these are petrified or mammillary deposits the writer is not sure. They are said to contain globules of several thousand pounds of moss agate reported by W. C. Hart from the Hartville district of Wyoming. Dr. George E. Ladd reports the occurrence of agate and other chalcedony minerals in southeast Missouri. They occur in the residual soil over limestone formations, and some handsome specimens are

found in sufficient quantity to be of commercial value, at two localities in the province of Santiago, Cuba. One of these is about seven miles south of Bayamo; the other is about two miles southeast of Jibacoa, a town about 16 miles southeast of Manzanillo.

Comparatively few agate and chalcedony gems are cut or polished in the United States, the bulk of these minerals being cut at Oberstein, Idar, and other towns in Germany. The agate-cutting industry in Oberstein dates back to the 15th century, from which time it flourished until the close of the 18th century. With the exhaustion of the native deposits of agate, a decline followed until 1830, when new supplies were obtained from Brazil, and from that time until the present the industry has flourished, though scarcely any native agate is now used.

### AMAZON STONE.

The production of amazon stone came principally from Colorado, with a small quantity from Pennsylvania. In Colorado part of the output was obtained from the vicinity of Pikes Peak and part from Florissant, also in Teller County. J. D. Endicott reports the discovery in Custer County, Colo., of a new deposit of amazon stone, which has not yet been opened.

### AMBER.

#### BURMA.

The production of amber from the Myitkyina district of Burma in 1906 was 217 hundredweight, valued at £709,<sup>1</sup> as against 126 hundredweight, valued at £945, in 1905. According to Consul-General W. H. Michael, of Calcutta,<sup>2</sup> the Burmese amber is in good demand. Its rich color, hardness, and the high polish it takes render it suitable for making into beads for rosaries and necklaces. Mining for amber by the Burmese is done in a crude way, and generally after the harvest work is completed. The men dig down, near places where amber has been found, sometimes to a depth of 45 feet, and then if no amber is found, a new trial is made elsewhere.

#### GERMANY.

A large block of golden yellow amber, about five inches long, four inches wide, and three inches high, weighing 33 ounces, is reported to have been found on the beach at Thiessow, Pomerania. It is said to be free from cracks or flaws.

### AMETHYST.

There was a small production of amethyst in 1907 from scattered localities. The largest output came from Nelson County, Va., with smaller quantities from Amherst County in the same State; Iredell and Macon counties, N. C.; Rabun County, Ga.; Fremont County, Colo., and Maine.

In Macon County, N. C., amethyst has been found at various places in the region of Tennessee Creek, near Scaly Mountain, and to the south of Highlands. In Rabun County, Ga., a few miles to the south of the last-named localities, amethyst has been found at several places within two or three miles of Clayton, and from 12 to 15 miles to the east. The amethyst of this region occurs in veins cutting granite gneiss and mica gneiss. The veins in which the amethyst occurs are generally irregularly filled, well-defined fissures cutting the enclosing rocks at variable angles, though generally with a high dip. Some of these veins have been traced several hundred feet. Deep-colored amethyst crystals are found in pockets in these veins, often associated with pale amethystine and colorless quartz crystals. The spaces between the crystals are commonly filled with red clay or other earthy material. The pockets range from a fraction of an inch to 15 or 18 inches in thickness, and may extend several feet along the vein. The crystals range in size from a small fraction of an inch to three and four inches across. In some of the crystals the purple color of amethyst is entirely lacking or present only in pale shades. In others the rich purple of Siberian amethyst is present. The color is generally most intense near the points of the crystals and often occurs in planes parallel to the crystal faces. This renders only portions of the crystals suitable for cutting,

although much amethyst and quartz suitable for specimens only is obtained.

The production of amethyst from Colorado was reported from a new deposit discovered by T. D. Endicott and operated by C. A. Beghtol & Co., of Canon City. This deposit is near Parkdale, about 13 miles west of Canon City. Mr. Endicott describes the vein as 30 inches wide, striking northwest, with a nearly vertical dip, through decomposed granite. The crystals of amethyst and amethystine quartz range in size up to two inches thick and three inches long.

### AZURMALACHITE.

The name azurmalachite has been applied by Dr. George F. Kunz to the gems cut from blue azurite combined with green malachite.<sup>1</sup> This form of gem is found in the copper mines of Bisbee and other districts in Arizona. The combination of minerals occurs in a variety of different forms, as concentric layers in stalactites, and as globular and botryoidal masses, etc. Various effects result from cutting in different directions through the masses, and attractive cuff buttons, scarf-pins, hat-pins, and other stones for less expensive jewelry are thereby obtained. Some of this gem was found at Yerrington, Nev., during 1907.

### BENITOITE.

Benitoite is a new gem mineral from California from the mount Diablo range near the San Benito-Fresno county line. The gem has a blue color and was first mistaken for sapphire when discovered early in 1906 by Messrs. Hawkins and Sanders. The following notes are taken from a description of the physical and chemical properties of the stone by George D. Louderhack and Walter C. Blasdale,<sup>2</sup> and from a description of the geological occurrence by Ralph Arnold.<sup>3</sup>

Benitoite is regarded as an acid titanate-silicate of barium with the formula BaTiSi<sub>3</sub>O<sub>9</sub>. It fuses quietly to a transparent glass at about 3, the fusing point of almandine garnet. Though practically insoluble in hydrochloric acid, it is readily attacked by hydrofluoric acid and dissolves in fused sodium carbonate. Its hardness is above 6, probably between 6½ and 6¾, and its specific gravity is 3.64-3.65. Benitoite crystallizes in the hexagonal system, trigonal division. The common forms observed are the basal plane, positive and negative trigonal pyramids, and corresponding prisms. The common habit is pyramidal, though occasionally the base is well developed and the crystal tabular. No tendency toward a prismatic habit was observed. The refractive index is a little above sapphire, or about 1.77 for the ordinary ray and 1.80 for the extraordinary ray. The double refraction is therefore strong. The color of benitoite varies from deep blue with a violet tint to pure blue of a lighter shade; small crystals are sometimes perfectly colorless. The color is not affected when the mineral is raised to a red heat.

The features of benitoite as a gem are its brilliancy, attractive colors and strong dichroism, and its hardness is nearly equal to that of peridot or kunzite. The depth of color varies in different portions of many of the crystals, while the strong dichroism causes a variation of color depending on the direction the crystal is viewed. Light transmitted perpendicularly to the base is practically colorless, while that parallel to the base, or perpendicular to the principal axis, is blue. To secure the best effect, then, the gem should be cut with the table parallel to the principal axis and not to the base, which is contrary to the rule for sapphire.

Benitoite occurs in veins and pockets or geodes in a lens of basic schist enclosed in one of the largest serpentine areas of the Coast Range of California. The mineral is associated with natrolite and a black or brownish-black mineral, thought to be a new species and called carlosite. The lens of schist enclosing the benitoite veins is about 150 feet wide and at least 1,200 feet long, and cuts through a low serpentine hill with a strike of about N. 70° W. and a dip of 70° to 80° NE. The schist varies in color from dark greenish on the southwest border to bluish in the immediate vicinity of the gem-bearing veins near the middle of the mass. The bluish portion is an altered phase, and is often largely replaced by natrolite in contact with the veins. The altered portions of the schist are full of cracks and cavities varying in size up to two or three inches in width and roughly parallel to the planes of schistosity. The

es are generally filled with natrolite, with  
without benitoite or calcite, or both. Natro-  
is not always accompanied by benitoite,  
h benitoite has not been observed without  
ite. The association of the minerals indi-  
that the crystallization of the benitoite and  
site was previous to the complete deposition  
of the natrolite.

Development work consists of a tunnel 50 feet  
and several open cuts, the largest of which  
is 10 feet deep, four feet wide and 14 feet long,  
along the strike of the schist. The gems are  
recovered by panning up the richer portions of  
the matrix and picking out the crystals or frag-  
ments remaining, or large crystals are etched  
at the expense of the smaller ones. Since  
the material is rather brittle, a large percentage is  
lost in this operation.

As reported to the Survey, the production in  
1907 amounted to about 15 pounds of rough  
material, a large part of which was not suitable  
for cutting. Up to Jan. 1, 1908, 350 carats of  
had been cut from this material.

#### BERYL.

The production of beryl gems, as aquamarine,  
emerald, golden beryl, rose or pink beryl, and  
other beryl, was chiefly from California, North  
Carolina, Colorado and Maine, with small amounts  
from New Hampshire, Pennsylvania and Con-  
necticut.

#### CALIFORNIA.

The California output came from near Ramona,  
Imperial, and Pala in San Diego County,  
Riverside, Riverside County. Descriptions of  
the localities in San Diego County are  
given under the notes on the gem minerals of  
California (pp. 43-48). C. O. Johnson  
describes the occurrence of new deposits of beryl  
about two miles east of Riverside at the base of  
the Box Springs Mountains. The beryls are of a  
pale aquamarine color, some approaching the  
color of emerald in depth of color. The best material was  
found on the land of F. D. Mears in a pegmatite  
cutting diorite or gabbro. Dark green  
emerald mica is also found with the beryl, but  
is not so common. It is generally occurs in the  
gem-bearing pegmatites of southern California. About  
hundreds of pounds of rough material, part suitable for  
cutting, was obtained before development work  
was stopped through financial troubles.

#### COLORADO.

The beryl from Colorado was reported as aqua-  
marine, chiefly from the gem mines in Royal  
Gardens and Mount Antero, Chaffee County, oper-  
ated by C. A. Beghtol & Co. J. D. Endicott re-  
ports the discovery of four deposits of aqua-  
marine-colored beryl, some suitable for cutting, as-  
sociated with rose quartz, about six miles north  
of Las Vegas Creek, Fremont County.

#### IDAHO.

W. S. Schernikow, of New York, reports the  
discovery of two good blue beryl crystals near  
Teton, Idaho. These crystals were obtained  
from an Indian squaw who would not reveal their  
locality.

#### NORTH CAROLINA.

The beryl mining for aquamarine and the beryl  
was carried on in North Carolina during  
1907. Scattered lots were brought  
from mica miners and prospectors in other parts  
of the mountain country, chiefly in Mitchell and  
Wayne counties, though some were obtained in  
Catawba County and at Barretts Mountain, Alex-  
ander County.

The hiddenite and emerald mine, one-half mile  
west of Hiddenite, Alexander County, was re-  
discovered and worked during part of the year by  
W. H. Wright for the American Gem Mining Syn-  
dicate. At the same time Mr. Wright opened a  
new prospect called the Ellis emerald mine, one-  
mile east of Hiddenite. The work was  
started in September, 1907, pending the installa-  
tion of a power plant for larger operations. Aqua-  
marine and beautiful specimen beryl, emerald  
and hiddenite were obtained in promising quanti-  
ties. Mr. Wright mentions one beautiful speci-  
men two inches long by one and one-half inches  
wide, weighing over 750 carats, obtained  
from the emerald-hiddenite mine. It was trans-  
parent with prism faces highly polished. Many  
other beryl crystals of from 10 to 20 carats were  
obtained in the same mine. Several fine crystals of  
aquamarine were found at the Ellis mine, two of  
which were embedded in transparent quartz crys-  
tals making splendid cabinet specimens. Emeralds

mentioned in a personal letter, dated April 24, 1908.

of fine color were obtained from both mines. At  
the Ellis mine one dark-green emerald weighing  
276 carats was found. About 200 carats of hidden-  
ite were obtained from the emerald-hiddenite  
mine. One crystal, weighing about 10 carats,  
was one-half colorless and the other half a deep  
emerald green. Jet black tourmaline crystals as-  
sociated with feldspar; clear, colorless, smoky and  
rutiled quartz crystals; rutile crystals, etc., were  
also found associated with the beryls.

At the emerald-hiddenite mine there are a large  
number of veins generally striking north of east  
with high dips to the north. For a distance of  
over 50 yards both to the north and to the south  
of the main workings a number of pits and  
several shafts have been made on different veins.  
In all of the veins opened quartz crystals were  
found, some very clear and beautiful, with well-  
developed crystal form. Some of these openings  
yielded beryl or hiddenite, occasionally of gem  
quality.

The old workings at the emerald-hiddenite mine  
were made chiefly between 1880 and 1885, and  
consisted of a large open cut, with two shafts  
near the western end, besides numerous smaller  
test pits in the vicinity of the open cut. The open  
cut is situated near the top of a low ridge and  
is probably 150 feet long, 20 to 40 feet wide,  
and 15 to 20 feet deep. A haulway had been cut  
to the same level at the east end of the dump.  
The new work in 1907 consisted of an open pit,  
some 12 feet wide and 18 feet long, near the  
eastern end of the old cut and at the north side  
of the haulway. Two well-defined veins were  
found in this cut, and also two less promising  
ones. These veins were nearly parallel, and the  
strike measured on the best one was N. 70° E.,  
dip about 85° N. Several good, though small,  
pockets were found in this cut.

The country rock in the region around the  
emerald-hiddenite mine and the Ellis emerald  
mine is chiefly biotite gneiss, garnetiferous in  
places, which has been much compressed and  
folded, probably while in a plastic condition.  
Veinlets of quartz in the original rock have been  
folded and crumpled during this compression into  
forms resembling folded ribbon. The country rock  
in the neighborhood of the veins has been highly  
silicified by the addition of much quartz. This  
quartz along with other minerals, as muscovite,  
rutile, pyrite, etc., has replaced the biotite and  
feldspars and other minerals of the country rock.  
This replacement was later than the compression  
of the rock and about contemporaneous with the  
deposition of the vein matter. These phases are  
beautifully illustrated in hand specimens which  
show typical biotite gneiss with folded quartz  
veins, several feet from a vein, and in similar  
rock, highly silicified, with a portion of the vein-  
filling adhering. In the latter specimen the vein  
filling a fissure is glassy quartz with calcite,  
rutile and pyrite inclusions. The wall next to the  
vein consists largely of granular quartz and an  
emerald-green (chrome) muscovite, with a little  
rutile and pyrite. At about one inch from the  
vein the replacement of the country rock is not  
so complete, and biotite becomes gradually  
prominent in the rock. At two inches from the  
vein the rock is nearly black biotite gneiss, rich in  
quartz. A folded quartz veinlet cuts the gneiss  
to the vein wall. It is more prominent in the  
black gneiss than in the highly replaced gneiss,  
though it can readily be traced through the latter,  
since the quartz of which it is composed was not  
so easily replaced as certain constituents of the  
gneiss. Some of the rock cut by the veins con-  
tains much chlorite and has a yellowish-green  
color.

The material filling the gem-bearing veins con-  
sists of quartz, calcite, dolomite, muscovite, rutile,  
black tourmaline, aquamarine and emerald beryl,  
hiddenite, pyrite, chalcopyrite and monazite. All  
of the veins in the neighborhood do not contain  
all of these minerals, but each of the numerous  
veins exposed in the workings contains some or  
all of them. In the cavities all of these minerals  
occur in crystals; in solid-vein matter certain  
ones only have crystal form. The calcite was  
introduced after the other minerals had been  
deposited, in many places filling up previously  
existing cavities. Crystals of the other minerals  
are embedded in solid calcite veins, and calcite  
has been deposited between broken fragments of  
beryl and other crystals. Rutile suitable for cut-  
ting is plentiful in brilliant crystals, some long  
and slender, others short and thick. The crystals  
are commonly twinned, several crystals often  
joined or crossing each other at angles of 60°,  
forming beautiful cabinet specimens of rosettes  
or reticulated masses of needles. The gem min-

erals—emerald, aquamarine and hiddenite—occur  
in distinct crystals in the veins, and when lining  
the walls of cavities and of good color they make  
a beautiful contrast with the associated gangue  
minerals.

The vein at the Ellis emerald mine is pegmatite,  
with cavities and pockets included in it. The  
pegmatite strikes N. 50° E., with a high northerly  
to vertical dip. There are stringers or arms of  
pegmatite along the walls, and at one place the  
pegmatite is composed along one side largely of  
small mica blocks. The country rock is biotite  
gneiss, small dikes of quartz diorite being in-  
cluded. The latter weathers out in rounded  
boulders or "nigger heads," which are scattered  
over the surface near the mine. The quartz in  
portions of the pegmatite is a fairly dark rose  
color. So far, however, none suitable for gem  
purposes has been found.

#### CALIFORNITE.

Californite is a compact variety of vesuvianite  
with color and texture so like jade that it was at  
first mistaken for that mineral. It is found in  
Siskiyou County, Cal., on the south fork of In-  
dian Creek, 12 miles from Happy Camp, and has  
been described by Dr. George F. Kunz.<sup>1</sup> Two  
other localities are known where californite has  
been found in Tulare County, Cal. One of these  
was described in this report for 1906. During  
1907 there was a considerable production of  
californite by the Himalaya Mining Co. from its  
mine in Siskiyou County.

#### CAT'S-EYE OR TIGER-EYE.

##### CALIFORNIA.

*New Variety.*—A specimen was received at the  
Survey from Miss Gertrude S. McMullen, of the  
Southwest Turquoise Co. of Los Angeles, Cal.,  
which seems to be a new species of cat's-eye or  
tiger-eye. The mineral is a compact variety of  
serpentine, sufficiently fibrous to have a silky  
luster, though not readily separated into fibers  
like asbestos. The hardness is about 4.5. The  
color is opaque gray with the grain and dark  
green across it. A cabochon stone cut with the  
grain gives an excellent play of light across the  
rounded surface as the stone is rocked. The hal-  
f of light reflected from the middle of the stone  
is greenish gray, while the color on the sides at  
the ends of the fibers is dark green. The beauty  
of the gem is somewhat marred in some speci-  
mens at least by frequent irregularly shaped  
hairs and tubes of yellowish mineral, apparently  
also serpentine, running for some distance through  
the massive material and parallel to its fibers. If  
the mineral is found without these yellow mark-  
ings, as it doubtless will be, very attractive stones  
for scarf-pins, pendants, etc., could be cut from  
it. This mineral is found in Tulare County, as-  
sociated with asbestos and other serpentine. It  
might appropriately be called California cat's-eye  
or tiger-eye, if no other name has been given  
to it.

#### CHRYSOPRASE AND BLUE CHRYSOPRASE.

##### CALIFORNIA.

There was a large production of chrysoprase  
from the mine of the Himalaya Mining Co., in  
Tulare County, Cal. Some of this material is of  
beautiful color and is suitable for high-grade jew-  
elry. It is used also for handsome ornamental  
effects, as in mosaics, etc.

##### ARIZONA.

Specimens of blue and bluish-green copper-  
stained chaledony were received from H. P.  
Wightman, of Globe, Ariz. The mineral occurs  
in small stringers in the Keystone copper mine  
in that district. The copper ore at this mine is  
said to be principally chrysocolla or silicate ore.  
The chaledony varies in color from bright to  
pale blue, bluish green, and nearly apple green,  
and is more or less translucent. In some pieces  
the color occurs in curved layers and varies in  
intensity, thus bringing out the mammillary  
structure of chaledony in peculiar wavy markings.  
In other pieces the color approaches that of chryso-  
prase, or resembles that seen in certain artificially  
colored chaledony. Mr. Wightman reports a sale  
of probably 200 pounds of selected mineral dur-  
ing 1907 by the miners in Globe. After cutting,  
this blue chrysoprase brings locally from \$3 to  
\$10 a piece for the best grades.

(To be continued.)

**Two Hundred Members and Guests Enjoy Annual Clambake of the Philadelphia Jewelers' Club at Burlington Park.**

PHILADELPHIA, Pa., Sept. 18.—Perfect tumnal weather, splendid in its glorious shine, showering blessings of warmth and brilliancy over a fair countryside and the placid waters of the upper Delaware river, and air full of those mysterious musical sounds which seem to bid a fair, yet farewell to Summer days, made ideal day of Sept. 15, when the members of Jewelers' Club and their guests to the number of more than 200 journeyed to Burlington Park, far up the Delaware river, just near Trenton, to participate in the annual clambake of the Philadelphia Jewelers' Club. Everything was just as it should

The day was perfect, the club members and their guests were in great spirits, the river banks presented rare scenes of color and beauty, and a thoroughly delightful repast, in the old New England style, awaited the guests when they arrived at Burlington Island. There was music, both going and coming, to soothe the aching breast, and no end of liquids to refresh parched throats.

Again, there were vaudeville performances, merry monologists, balladists, etc., to make the time pass pleasantly.

Louis P. White, Joseph P. Cadwallader, and Col. J. Warner Hutchins, admirably arranged every detail of the clambake and dining. William Wardell, a clambake expert and a chef of "great renown" along the upper New Jersey coast resorts, prepared the bake and contributed much to making the day successful. But the club's hosts and its members did their share, though they are willing to accord all honors of the success of the day to the able committeemen in charge.

The party gathered at the wharf in crowds before noon and boarded the steamer *Columbia*. The start was made, as had been announced previously, precisely noon, and some who broke away from business and hurried to the wharf with the expectation that they could still make the start after the noon hour had to follow in motor boats, or by train to Bristol, from whence they were ferried across the river to the island. On the ride up the river the jewelers who have only occasionally the opportunity of renewing acquaintances, and of introducing friends, and usually only at such times as they are guests of the Jewelers' Club, talked, chatted and dined away the time in a most companionable manner. A crisp, bracing September day, with clear skies and a bright sun, showed up the beauties of the Delaware and its palatial residences of wealthy people which line it, to the best possible advantage. Scenically, the trip was a revelation to many of the members and guests.

Landing at the park about 2 p. m., the party found the chef, Wardell, with a corps of helpers, already "on the job." The wood was lighted and the heavy stones were stacked under the intense heat. Then came the good things to eat, which were piled in baskets made from seaweed on the mound of heated stones, with iced watermelons and lemons, also ices, near-by. Chickens, lob-

sters, clams, sweet and white potatoes, corn on the cob and other victuals made up the mound. Meanwhile the jewelers watched with interest the cooking of the dinner and the savory odors wafted from the smoking pile contributed no little to whet the appetites. Dinner was spread on crudely made tables, laid on the green sward and with formality, but with the freedom of school boys dining, the guests seated themselves and hugely enjoyed the feast.

During the dinner and afterward H. Bart McHugh, who had been engaged to bring theatrical talent along, helped with a band to enliven the occasion. He had with him Billy Farnon, of Keith's circuit, the man known to jewelers as "Blue," Vaughn and Comfort, Gilbert Lozee, James E. Dempsey, Ed. Goldrich, James Jones, and others, who sang, danced, told stories and gave monologues. Among the Jewelers' Club guests were John Brandt, Fred Yoekel and Isaac Elliott, who appeared as auxiliary talent and were warmly applauded in their special club songs and ballads. Jacob Binder, who usually contributes somewhat to the fun-making, did not essay this time to give any recitations, though strongly urged to do so.

Returning from the scene of the clambake the club members and guests thoroughly enjoyed the river ride homeward, singing, reciting, telling stories and ending with a reunion at the cosy club quarters at 228 Chestnut St. Here the festivities were continued until after midnight, and all who attended voted the day one of the most pleasant ever enjoyed by them.

In the happy throng of members and guests were Howard Stevenson, T. M. Stanger, Victor Burgess, L. P. White, Joseph E. Cadwallader, J. Warner Hutchins, William G. Earle, Andrew Smith, Robert Coates, Isaac Elliott, John Brandt, Ira D. Garman, William Linker, W. C. Penfold, S. Halberstadt, E. C. Schellenberger, Jacob Alburger, A. T. Whitehead, H. B. Sommers, Henry Bodenheimer, J. D. Sallade, David Provan, Joseph Montgomery, Robert A. Garman, Harry Haas, Joseph Lynch, George Spoerhase, Robert C. Greene, W. D. Rexford, William H. Long, Charles Kranich, George Kranich, Col. Lewis Beidler, Charles Powers, Allen Powers, E. M. Williams, "Bucky" Moore, C. C. A. Baidi, J. D. Ewing, William Pepper, Otto Eisenlohr, Fritz Bloch, Z. T. Zurbrugg, H. B. Stanger, H. Bart McHugh, and many more.

Silas L. George, Watertown, N. Y., has won the suit brought by A. P. Sheldon, a druggist, to recover \$100 reward which Mr. George offered for the return of two diamonds, valued at \$450 stolen by George Katz. Sheldon will appeal. Sheldon bought the stones from Katz, who was sent to the reformatory at Elmira. After George secured his diamonds, Sheldon claimed the reward and George refused to pay him. It developed on the trial that Sheldon told a witness that George could not identify his diamonds, and that the affair would soon blow over.

Chester N. Fogg is the name of a new jeweler in Waltham, Mass.

Louis Walker will begin business in Wichita, Kans., as jeweler about Oct. 1.

G. Ingram Dean, Merced, Cal., will open a store at Newman, Cal., in the near future.

Brush & Brickley is the name of a new retail jewelry firm at 6108 Penn Ave., Pittsburg, Pa.

S. Wiseman opened a retail jewelry store at East Grand Forks, Minn., about a week ago.

Parns & Fassberry have started in the wholesale jewelry business at 804 Penn Ave., Pittsburg, Pa.

Charles G. Oelschlager, engraver, has opened a jewelry establishment at 706 Chestnut St., Philadelphia, Pa.

J. Breslauer has begun business at Ellis & Powell Sts., San Francisco, Cal., under the name of the Golden West Jewelry Co.

C. H. Meyers and J. M. Reading have opened a retail jewelry store and pawnbroker's establishment at 112 W. 1st St., Oklahoma City, Okla.

Philip Young, for many years in the employ of Robert W. Sutton, Addison, N. Y., has completed arrangements to open a store on his own account in Depew, N. Y.

The Weil Curio & Jewelry Co. was recently incorporated in Denver, Colo., with a capital of \$3,000. The incorporators were: I. C. Weil, D. C. Weil and M. Weil.

Jack Weimer has resigned his position with R. R. Keith, Clarion, Ia., and will soon open a jewelry store on his own account in Marcus, Ia.

The United Silver Co. is the name of a new concern incorporated in New York City with a capital of \$1,000. The directors are: H. Wright, A. R. H. Wright and James Dean, all of Mount Vernon, N. Y.

**Market Prices for Silver Bars.**

It was believed that a new set of officers would be elected, according to the plan of the last meeting, but on account of the charter granted by the State of Illinois it was finally thought best to have no election till next year. The following are the officers of the association: President, F. A. Marean, Belvidere; first vice-president, Frank Smith, Pontiac; second vice-president, Lorenz Holland, Cullom; secretary, George B. Elbe, Chicago; treasurer, Paul N. Lackutz, Chicago. These five officers, with A. F. Pierce, Milford, W. G. Werner, Chicago, and W. A. Hammond, Bement, constitute the board of directors.

After adopting a constitution similar to that of other State jewelry organizations a committee on resolutions was appointed as follows: Arthur Rovelstad, W. P. Reichert, W. G. Werner, Lorenz Holland and Charles Axt.

J. M. Radabaugh, formerly secretary of the American National Retail Jewelers' Association, then delivered a short talk on trade topics and told the members not to lose courage, but to keep on working for the good of the cause. He said plenty more members would come in when they saw the association had become successful. He said the one thing necessary was protection from trade evils and the only way jewelers could protect themselves was by handling lines that afforded protection. He urged the jewelers to practice more closely what they preach and buy only from those houses who protect the retail jeweler. He further said that association would help the retail jeweler to be a better business man and harped back to that worn-out saying that the reason so many jewelers were poor business men was because they were originally mechanics only and not merchants. Mr. Radabaugh reviewed the work of the national association, told of many high grade watches on which the price was now protected and told of a silverware house which bought back all of its goods from a hardware concern, said bracelets were no longer on sale in mail-order houses and department stores and thought the association was in need of a clock manufacturer who sold his clocks to retail jewelers only.

An auditing committee was appointed, consisting of all the officers, and the meeting then adjourned for lunch.

Wednesday afternoon F. G. Thearle, on behalf of the Chicago Jewelers' Association, made an address of welcome. He said the relation between retailer and jobber should be friendly. All should understand that there were two sides to every question, he said, and hoped that organization would do much toward establishing a closer relationship between buyer and seller.

President F. A. Marean then made his address. He began by saying that Illinois could benefit greatly by the discussions of previous conventions in other States. He said every craft was organized before the jewelers were and that it had been shown that organized bodies could accomplish more than unorganized bodies could. One man making a complaint was considered a kick-

RESIDENT F. A. MAREAN.

SECRETARY GEO. B. ELBE.

er, said the speaker, but 15,000 kickers rose to the dignity of protestants and commanded respect. The United States Government, he claimed, protected the public from fake mining and other advertisers, but that every day the jeweler was being robbed of sales by counterfeit jewelry advertisements sent through the mails. He said that all watches should be sold at the same price, no matter through what channels they are sold.

Mr. Marean advocated no high-handed or drastic methods in overcoming the evils indulged in by the manufacturer or the jobber, but hoped that a mutual understanding between all concerned could be arrived at.

G. P. Engelhard then spoke on the value of organization, emphasizing many points that have been made on the subject in the past. He also touched on the topic of a State board of examiners who would license watchmakers. He urged a fixed selling price on watches and insisted that every jobber should be shut off who sells goods at retail. However, Mr. Engelhard was willing to put in a work for the jobbers if they quit retailing. He would have the retail jeweler buy from the jobber exclusively, unless he got better service from the manufacturer, or unless the manufacturer did not sell to the jobber.

J. H. Purdy then spoke on "Organiza-

PROVIDENCE

and said that as labor and business exist it is class against class, and that sophistry could obliterate the fact that present time is a struggle of commercial genius against commercial genius, trade against trade, merchant against merchant, that jewelers should get together, so their trade should not be scattered among other branches of business and then retailer, the jobber and the manufacturer must act in harmony.

E. Paegel, first vice-president of the American National Retail Jewelers' Association, then made an address complimentary to Illinois on her good start in organization and saying Minnesota started with seven members and now had over 100. He said it was necessary to get the jobbers and retailers to join the State organization and above all to keep harmony in ranks.

A question box was then started. In answer to the question, "What is the greatest difficulty with which the retail jeweler has to contend?" the unanimous answer was, "The mail order house and the department store." To the question, "Shall we carry lines of any factory whose lines are handled by mail order concerns?" the answer was, "Yes, only when we have to."

The question of a time guarantee on watch cases and chains then came up, but two members seemed to agree on this. Mr. Paegel thought a guarantee of satisfaction was all that was necessary. Mr. Callison thought a guarantee was necessary.

Mr. Rovelstad thought it was necessary on watch cases, but not on chains. He brought Carl Weibezahn, representing O. Bigney, to his feet, and Mr. Weibezahn carried off the prize for oratory. He said a time guarantee was the only method to help the sale of chains.

The meeting then adjourned till Thursday morning.

#### THURSDAY'S SESSION.

Thursday morning the meeting place for the year's convention was selected, Peoria, being chosen, and the time set for it is the last week in June or the first week in July.

Mr. Callison, secretary of the American National Retail Jewelers' Association, read a paper on the subject, "Is a retail jeweler more than a mechanic?"

Mr. Callison said that it was about time to get certain theories regarding the poor business ability of the retail jeweler should be relegated to obscurity. That it was unfair and unjust to believe in generalities that had absolutely no foundation on fact. That a mechanic the jeweler excelled all other workmen and repaired instruments of precision that called for a skill especially his own. He said that jewelry stocks throughout the country would average about \$3,000, and those stocks would compare favorably with stocks in other lines of business.

The speaker said that in making comparisons ability together with circumstances governing the case should be taken into consideration. In some cases jewelers who are poor payers are so because a salesman places more goods on the jeweler than the customer should buy. He claimed the jewelry dealer, though selling luxuries only, was in a better condition and far better off even dur-

ing the late depression than many other lines, because the jeweler was a good manager and hard worker and had kept his store expenses down to a minimum, although his profit was smaller than many other lines of business.

Mr. Callison concluded by saying: "The retail jeweler starts in business with less money than any retail merchant, carries a heavier expense, has a smaller field of operation, has more illegitimate competition, works on a smaller percentage of profit and shows as great if not greater results than any other tradesman."

R. C. Bernau, treasurer of the American National Retail Jewelers' Association, next delivered an address on how a retail jeweler should improve his position in the business world. Mr. Bernau advised all present to read the jewelry trade papers and become posted on what is going on in the jewelry world. He advised them to study their business in every phase and to leave politics alone. He exhorted them to do good work, become masters of their craft and to charge fair prices for their work.

H. C. Carpenter, sales manager of the South Bend Watch Co., next made a few remarks on organization work and advised a national clearing house for State convention dates, so that the dates of the different State meetings did not conflict. This would give many manufacturers and jobbers a chance to attend all meetings. Mr. Carpenter also suggested that State conventions should be held in different cities of the States, so that retail jewelers from different sections could have a chance to come to the meeting.

The following resolutions were then read and adopted:

*Whereas*, The jewelry industry is one of the greatest sufferers from fraudulent advertising, therefore be it resolved that the Illinois Retail Jewelers' Association recommends a Federal advertising law which will prosecute fraudulent advertising. And be it further resolved that we instruct our secretary to correspond with the Illinois Representatives in Congress on the subject of a fraudulent advertising bill.

*Whereas*, The American National Retail Jewelers' Association, in convention at Cincinnati, adopted a resolution favoring an association trade-mark, controlled entirely by the association, the privilege of the use of said trade-mark to be confined exclusively to such jewelry only as is sold to a regular association jeweler; the character of the trade-mark to be such as to permit its stamping on the average article of jewelry, and the composition of the said trade-mark to be such as will permit the jeweler to recognize at a glance the maker and quality. Therefore, be it

*Resolved*, That we, the Illinois Retail Jewelers' Association, concur in this resolution and instruct our board of directors to assist the national officers in carrying out the spirit of the resolution.

*Resolved*, That we concur in the recommendation of the American National Retail Jewelers' Association for a new discount key, to be used in all their catalogues and advertising, this key to be disclosed only to the legitimate retail jeweler, and in every case to be sent under separate cover from catalogue and as sealed mail.

*Resolved*, That the Illinois Retail Jewelers' Association, in convention assembled, endorse the principle of a fixed minimum selling price on all articles manufactured in the jewelry line of a staple nature, and be it further resolved that we recommend to the jewelers of the State of Illinois, that in the sale on staple articles in our line a preference be given such manufacturers as offer and maintain these prices. Be it further

*Resolved*, That the Illinois Retail Jewelers' Association pledges its support to such manufacturers in the marketing of their products.

The secretary was then instructed to send communications to the retail jewelers of

Illinois asking the latter for particulars in relation to the retailing by jobbers. The morning session then closed.

Thursday afternoon J. P. Archibald, president of the American National Retail Jewelers' Association, delivered a short address on timely topics. He advised the association to work hard for new members and to always keep working for them. He advised them to attend the national conventions, as by doing so they would come in contact with the members to treat all traveling men with courtesy and meet their brother competitors in a friendly spirit at all times.

Charles T. Higginbotham, consulting superintendent of the South Bend Watch Co., next delivered a lecture on "The Modern Detached Lever Escapement." This was illustrated by a metal working model four and one-half feet high, the largest model ever made. The lecture was much appreciated and was listened to with unabated interest. Mr. Higginbotham received a vote of thanks after he had concluded.

Communications were then read from Burley & Tyrrel and F. A. Hardy & Co., extending to the members an invitation to visit their respective establishments.

The Elgin National Watch Co. wanted the members to visit the factory at Elgin, Ill., but lack of time prevented the acceptance of this offer.

A discussion was then entered into regarding who was entitled to the jobbers' catalogues and it seemed to be the consensus of opinion that a new discount key was necessary and that jobbers should refrain from printing their own names on the catalogues distributed by them. The meeting then adjourned.

### Paris Pearl Market.

PARIS, France, Sept. 10.—The month of August is a very quiet one in this market, and therefore the trade did not expect much business this year. At that season, considering all circumstances and general business conditions, however, business on the whole is better than a good many had hoped for. Most of the dealers closed their office and a number of brokers left Paris earlier than usual, but a few who were in the market found something to do.

There were a number of foreign buyers here, some of them coming in the hope of picking up stones at less than their actual value, but these were quickly disappointed, as they found prices were steady.

As far as the market generally is concerned, assortments are poor and there are no large stocks. Confidence is returning, credit conditions are better, and those who successfully weathered the crisis feel that the prospects are better than they have been for some time. Altogether, the Fall season promises to be good. Among the buyers noted here were representatives of Italian, Hungarian and South American firms.

An Italian pearl company, La Societa Perliera Italiana, has been formally dissolved and reorganized.

A fire, about a week ago, broke out in the jewelry store of J. L. Bell, 127 S. Gay St., Knoxville, Tenn., but was extinguished before serious damage had been done to the stock.

**Bids Received and Contracts Awarded by Government Departments to Supply Various Articles.**

WASHINGTON, D. C., Sept. 16.—The following proposals have been received by the purchasing agent of the Isthmian Canal Commission for supplying 12 watchmen's watches: Berry & Aiken, Philadelphia, \$90, 30 days; James Boyd & Bro., Philadelphia, \$510, 35 days; The Fairbanks Co., New York, \$378, 42 days; Fox Bros. & Co., New York, \$377.88, 24 days; R. W. Geldart, New York, \$360, 40 days; Handlan-Buck Co., St. Louis, \$408, 30 days; Manning, Maxwell & Moore, New York, \$420, 30 days; Motley, Green & Co., New York, \$30, 30 days; Nanz Clock Co., New York, \$8, 42 days; National Electrical Supply Co., Washington, \$374.40, 30 days; Newman Clock Co., Chicago, \$600, 30 days; The Watchkeeper Co., Chicago, \$300, 60 days; Milby & Power, New York, \$375, 45 days; Watchman's Clock & Supply Co., New York, \$450, 30 days.

WASHINGTON, D. C., Sept. 17.—The following bids have been received for supplying the Brooklyn Navy Yard with 200 stop watches: R. W. Geldart, New York, \$3.98; Henry C. Karr, Washington (a), \$10, (b) \$9.90; Robert Ledding, Washington, (a), \$4.58; (b) \$5.29; (c), \$6.32; Myers Bros., Newport News, Va., \$5.30; Manhattan Supply Co., \$5.39; Western Electrical Co., \$4.11.

The Old Dominion Paper Co., of Norfolk, Va., has been awarded a contract to supply 17 thermometers to the Mare Island Navy Yard at \$176.25; this firm underbid other firms.

WASHINGTON, D. C., Sept. 18.—Awards of supplies for the Third Lighthouse District, Tompkinsville, N. Y., for the current fiscal year include the following: Barometers—Hemphill Engineering Co., New York, \$115.20. Marine clocks—Chelsea Clock Co., Boston, Mass., \$2,026 (only bid). Compasses—Peter J. Constant, Brooklyn, \$364.

**Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.**

WASHINGTON, D. C., Sept. 16.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

London: 5 cases plated ware, \$382; 2 cases watches, \$128; 1 case optical goods, \$223; 151 cases clocks, \$2,627.  
 Berlin: 3 cases clocks, \$135.  
 Bremen: 1 case plated ware, \$135; 2 cases jewelry, \$410; 3 cases watches, \$4,833.  
 Buenos Ayres: 53 cases clocks, \$1,529; 7 cases plated ware, \$712; 10 cases plated ware, \$1,363; 2 cases optical goods, \$777.  
 Christiania: 15 cases clocks, \$446.  
 Ciudad Bolivar: 2 cases plated ware, \$134.  
 Colombo: 2 cases watches, \$300.  
 London: 1 case clocks, \$175.  
 Copenhagen: 8 cases clocks, \$251.  
 Frankfurt: 4 cases optical goods, \$688.  
 Frankfurt: 3 cases optical goods, \$425.  
 Havana: 4 cases clocks, \$120.  
 London: 77 cases clocks, \$705.  
 Hamburg: 6 cases scopes and views, \$390; 2 cases optical goods, \$182; 5 cases optical goods, \$214.  
 Havana: 1 case jewelry, \$272; 3 cases optical goods, \$214.  
 London: 6 cases scopes, \$142.

Las Palmas: 10 cases clocks, \$178.  
 Lisbon: 13 cases clocks, \$133.  
 Liverpool: 1 case jewelry, \$1,000; 5 cases clocks, \$208; 1 case jewelry, \$477; 62 cases clocks, \$1,166.  
 London: 17 cases clocks, \$815; 3 cases watches, \$600; 9 cases optical goods, \$3,382; 18 cases clocks, \$125; 3 cases optical goods, \$326; 61 cases clocks, \$2,338.  
 Para: 1 case plated ware, \$160; 16 cases clocks, \$379; 3 cases watches, \$379; 7 cases jewelry, \$1,203.  
 Puerto Barrios: 6 cases clocks, \$105.  
 Rangoon: 29 cases clocks, \$406.  
 Rio de Janeiro: 1 case plated ware, \$189; 16 cases clocks, \$828.  
 Sanchez: 2 cases watches, \$134; 1 case jewelry, \$183.  
 Sheffield: 7 cases jewelers' sweepings, \$2,400.  
 Southampton: 7 cases watches, \$1,058; 1 case optical goods, \$477; 9 cases watches, \$1,402; 1 case silversmiths' sundries, \$148.  
 Sydney: 57 cases clocks, \$449; 1 case optical goods, \$150; 14 cases plated ware, \$556; 3 cases optical goods, \$580; 24 cases clocks, \$610.

**Death of Charles F. Duffy.**

The funeral of the late Charles F. Duffy, for 40 years connected with the firm of Enos Richardson & Co., 21 Maiden Lane, was held in the chapel of St. Vincent's Hospital, Friday morning, at 10 o'clock. Interment followed immediately after the services in Hoboken. Mr. Duffy died Wednesday of last week at St. Vincent's Hospital after an illness which had covered some length of time. He resigned from the firm on account of ill health in July, and since that time had been trying to recuperate, but had steadily grown worse.

Charles F. Duffy was born in New York City, April 28, 1853, and at the age of 14

THE LATE CHAS. F. DUFFY.

years first became an employe of the firm of Enos Richardson & Co. By careful attention to duty he rose to the position of vice-president. He was one of the best-known traveling men in the trade, and for a long time, beginning February, 1878, he visited the trade in the south. Later he covered Philadelphia, Washington and Baltimore, and during this time he formed a large circle of friends and acquaintances, who will learn of his death with much regret.

Deceased was a member of the Jewelers League, the Jewelers' Club of Philadelphia and the Brotherhood of Traveling Jewelers. He was unmarried. He is survived by one brother, Hugh Duffy, of New York.

Among the out-of-town friends of the deceased present at the funeral were: Wm. H. Long, J. Warner Hutchins, Wm. G. Earle, L. P. White, Wm. Linker, H. E. Stevenson, A. J. Le Jambre and George Reed, all of Philadelphia. A number of fine floral offerings were brought to the bier of the deceased, among which was one from the Jewelers' Club, of Philadelphia, and one from the Brotherhood of Traveling Jewelers, in which organizations Mr. Duffy was very prominent.

W. S. Trowbridge, who, at one time, conducted a school for watchmaking and engraving at Winona, Minn., died recently, at Colorado Springs, Colo. He was 41 years of age.

Rosaire Morin, Crookston, Minn., has made improvements in the interior of his store, which has been redecorated and equipped with new fixtures.

**Look out for This Man Who Steals  
Watches Left to be Repaired.**

NEW BEDFORD, Mass., Sept. 18.—The jewelers of this town have been visited by somewhat clever thief, whose method of operation has not heretofore been tried in New Bedford. In some places he has succeeded in getting valuable watches which were left with the jeweler to be repaired and though not successful in other places he was able to get away without giving the jeweler a chance to cause his arrest.

The man's methods of operation are nearly all cases the same, though he may vary the details to meet different conditions. In substance they are as follows: The crook enters the jewelry store and asks the jeweler (or preferably the clerk) for a watch that had been left to be repaired and gives a fictitious name. When he is told that the watch is not there he insists that it is, and while the jeweler or clerk is hunting for the timepiece he carefully scans the repair rack and the tags on the watches until he gets the name of some customer. When he has apparently been convinced that the jeweler cannot find the watch he remarks that this is strange as it had been left by his brother-in-law, who told him that it was this particular store. He gives as the name of his brother-in-law the name that he has found on a watch rack, whereupon, in many instances, the jeweler looks under the alleged brother-in-law's name, finds the watch and offers it to the swindler.

In two instances here the crook learned after getting the watch from the jeweler that it was not as valuable a timepiece as he supposed, and instead of paying the charges, he said that as his brother-in-law left it he would let the latter call for it, and departed.

The man is said to be about five feet seven inches high, of medium build and has a dark complexion. A distinguishing feature is a very prominent protruding lower jaw.

**Frank T. Pearce, Providence, Becomes  
a Thirty-Third Degree Mason.**

PROVIDENCE, Sept. 19.—Frank T. Pearce, head of the Frank T. Pearce Co., gold and silver manufacturers, and said to be the first manufacturing jeweler of Rhode Island to receive the honor, was given the 33rd degree at the 96th annual meeting of the Supreme Council of the Northern Masonic Jurisdiction of the Ancient Accepted Scottish Rite, held at Buffalo, N. Y., Tuesday. There were 58 candidates who tried for the degree, Mr. Pearce and ex-Mayor Robert S. Franklin of Newport, being the only ones from this State.

Mr. Pearce has held many important offices in the local Masonic organization and has been prominent in social and business circles connected with the manufacturing jewelry business, having been President for several years of the New England Manufacturing Jewelers' and Silversmiths' Association.

A tower and, it is believed, a large clock will shortly be added to the north end of the Federal building, in St. Paul, Minn. The construction of the tower was at first delayed on account of the lack of available funds.

**Markets for American Watches, Clocks and Jewelry in India, China and the Far East.**

WASHINGTON, D. C., Sept. 19.—Continuing an item which appeared a few weeks ago relative to markets for American jewelry, plated ware, etc., we find that British presents abundant opportunities for an increasing trade. The annual import of cutlery and plated ware in 1906, the best period for which returns are available, showed a value of \$8,869,455, and of \$156,585 was from the United Kingdom.

We always think of India as a market of supply for precious stones, yet, in fact, these imports were valued at \$1,000,000. Madras is not a single American market, the only Americans there being the missionaries. Yet Madras presents a favorable market for those inter-

esting in a ready sale for American clocks and watches in Bombay, the imports in one month amounting to \$41,485.

In all, it is safe to say that India, with an annual importation valued at more than \$10,000,000, is almost ignored by American exporters. Yet it is a market that Germany finds it remunerative to cater to. It is wanted its representatives who are deeply interested in their work and in the merits of the goods they are representing and who will see to it that the house represented will forward orders promptly and properly packed. Particularly there is a splendid outlook for trade in Bombay, where the imports have increased from \$116,856,539 in 1905 to \$126,600,000 in 1906. Of these totals, clocks and watches amounted to \$270,851; jewelry to \$1,590; hardware and cutlery to \$3,105, and ivory to \$451,562.

The far-away Isle of Ceylon also presents good opportunities for trade. Her import of jewelry in one year amounted to \$1,000,000, and of watches to \$569,062. The market in American clocks is steadily increasing. Our share of this trade in 1906 amounted to \$4,505, and of watches to \$8,000, and of jewelry only \$1,945. The value of exports of pearls and precious stones, correctly reported, at \$23,010, is far below what one might reasonably have expected. China is another country where golden opportunities are being neglected. But only a small amount of work will ever secure much of the market.

In one district, Ichang, 1,214 clocks and watches were imported in one year. In Chungking, during the same year, the value of these imports was \$4,039. In Changchun there are six large retailers of foreign watches, and among the articles they carry are pocket and silver watches, hanging and pocket watches, and fancy goods, with the Chinese virtually in control of the market. Japan is working hard to obtain a supremacy in the import trade of China, where she has a place on the markets clocks, watches, jewelry and toilet accessories. In New York there is a large import trade, the value in 1906 being \$11,178,800, and of \$77,800 was for clocks and watches.

Trade in Japan is quite in keeping with the general idea of Japanese business; exports are increasing and imports decreasing. The latter in 1905 were valued at \$243,836,282, and in 1906 at \$208,-

914,172; on the other hand, the value of the exports increased from \$160,766,805 to \$211,877,116. The imports are exceedingly diversified in their nature, and include clocks, in which there was an increase during the last two years from \$109,427 to \$202,105, and of watches, and parts from \$782,536 to \$1,163,675. These clock importations, however, are far behind the export values for the same lines, where the increase has been from \$287,869 to \$421,787. The exports of coral are quite important and show an increase from \$269,157 to \$339,591. We have no share in the clock importations, but last year the imports of American watches were valued at \$442,678, as against \$233,677 in 1905.

**India's Precious Stones**

OUR Consul-General at Calcutta, William H. Michael, sends the following notes on the production of valuable stones in India:

"The value of corundum stones exported from Madras, principally to Hongkong, Shanghai and Singapore, was \$15,000.

"There were 2,214½ hundredweight of jade and jadeite taken out in the Myitkyina district mines, Burma, in 1906, which was valued at \$39,309, and 2,685 hundredweight in 1905, valued at \$90,342, which shows a decrease for 1906. No figures for 1907 are available.

"The output of rubies in Burma during 1907 amounted to 2,128,368 trucks, valued in Magok books at \$577,325. The royalty revenue for the year was \$99,245. The market for rubies was fairly good the first of the year, falling away discouragingly toward the last of the year.

"The output of amber in 1907 by the mines of Burma was two and a half tons, valued at \$1,920. These mines are situated in the administered territory of the Myitkyina. The output of the year previous was 216½ hundredweight, valued at \$3,543. Amber mining in Burma is reported not to be a paying business. The average value of amber in Burma is \$43 per hundredweight, which is higher by \$8 or \$9 than the price of last year."

**Providence Optician Enjoined from Using List of Customers of His Former Employers in Soliciting Business.**

PROVIDENCE, Sept. 17.—A preliminary injunction, the first of its kind in this State, was granted by Judge Tanner of the Superior Court yesterday in the equity suit brought by Stevens & Co. against Dr. Ned C. Stiles, one of the complainants' former employes, enjoining Dr. Stiles from using the names and addresses said to have been copied by him from the records of the company, or from soliciting customers whose names he thus obtained to patronize him now that he is in business for himself.

The complainant in the suit is doing business on Mathewson St. under the style of "The Villers Co., the Modern Optical Shop." Dr. Stiles was employed to examine the eyes of customers and, it is claimed, had access to the books and records of the company, including the names and addresses of customers. He left the employ of the company and engaged in

business for himself, and, it is alleged, addressed circulars to the customers of the concern, soliciting their patronage and referring to his previous employment.

The court found, as a matter of fact, that the respondent did "surreptitiously" copy the names and addresses from the records of his employers. His counsel argued that the court had no authority to grant the injunction asked for by forbidding him to use or communicate the trade secrets. The court did not agree with the statement of law put forth in behalf of Mr. Stiles. The language of the rescript filed by Judge Tanner is in part as follows:

We are of the opinion that the surreptitious copying of the names and addresses of the complainants' customers from its records is a violation of confidence against which equity can enjoin, and that equity can enjoin against the use of such lists so unfairly obtained. It is true that equity will not enjoin against an employe carrying away such skill and intelligence as he can carry in his head, other than trade secrets. This would not permit him to copy the records of his employer for further use. We do not think, however, that we can under the authorities go to the extent of enjoining the respondent from advertising the fact of his former connection with the complainant company.

We will, therefore, enter a decree temporarily enjoining the respondent from using names and addresses of customers which he copied from the records of the complainants, or from divulging the names and addresses of said customers of the company to any one else. This injunction will, of course, apply to any of the servants or agents of the respondent.

L. D. Anderson, 230 Penn St., Reading, Pa., left, about a week ago, on a business trip to California, where he will remain for some time.

By foreing open a door in the store of S. Stone, Lakewood, N. J., a burglar, a short time ago, gained entrance and stole a large amount of jewelry.

Wm. Snow, 19 years of age, about a week ago, made his escape from the Central Prison, at Toronto, Ont. Snow was arrested in Niagara Falls, together with two others, and all were convicted of breaking into and entering the jewelry store of Kling Bros., in Queen St. W., at that place. Snow is five feet nine inches tall, of slender build, has a fair complexion, brown hair and gray eyes.

The Youmans Jewelry Co. has applied for a charter of incorporation with a capital stock of \$50,000 for the purpose of extending its trade in Georgia, Florida, Alabama, North and South Carolina. The concern will do a wholesale and retail business, and the principal office will be located in Waycross, Ga. G. R. Youmans, of the firm, has been engaged in the jewelry business in Waycross for about 20 years. He was at one time mayor of that place.

The will of the late C. W. Bixler, of Easton, Pa., was recently admitted to probate. Mr. Bixler left an estate valued at between \$80,000 and \$100,000. According to the will, each of Mr. Bixler's two children, Mrs. Charles S. Marshall and Arthur B. Bixler, are each given \$8,000, and the same amount is bequeathed to R. L. Elliott, grandson of the deceased. The sum of \$2,000 was given to Samuel P. Ludwig, who was in Mr. Bixler's employ for several years, and who is now a member of the firm. The remainder of the estate, real and personal, is given to the widow of Mr. Bixler.

Below are given a few extracts from the

**Death of Theodore H. Schulz**

Theodore H. Schulz, a former gem and at one time a partner with Rudolph in the firm of Schulz & R. 65 Nassau St., New York, died at the of his daughter in Antwerp, Belgium 12, of rheumatic trouble.

Mr. Schulz was born near the border of Holland and Germany about 78 years ago and came to this country as a young man. Previous to the time that he became identified with the jewelry trade he was engaged in other mercantile lines. In April, 1882, he started as a broker in diamonds and precious stones, and later, in 1892,

THE LATE THEODORE H. SCHULZ

a partnership with Henry Rudolph retired in 1901, and since that time spent his Summers abroad and his Winters in New York at his home at 161 E. 11th St.

Mr. Schulz was highly esteemed in the jewelry trade and was considered an expert in diamonds. During his connection with the jewelry trade he formed a wide circle of friends and acquaintances, who were with regret of his death. He was a member of the Liederkrantz Association, a musical organization, and was a lover of fine horses, having owned a number of trotters at different times. Mr. Schulz was spoken of by those who knew him in the jewelry trade as a generous, kind-hearted man, always willing to lend a helping hand in time of need.

Mr. Schulz is survived by a wife, a son and one daughter. His remains were brought to New York for interment.

### Jewelers of Several Cities Attend Meeting of Their New National Organization Held in Chicago.

Chicago, Sept. 19.—The National Wholesale Jewelers' Association met last week in Chicago, Sept. 16 and 17, at the rooms of the Chicago Jewelers' Association in the Columbus Memorial building. This new organization aims to remedy certain evils the jewelers have to contend with, or at least to show the way the members put it. Others bluntly that the association was organized to cut out certain manufacturers who sell to both jobber and retailer. The subject is a manufacturer selling to the jobber and to his customers. However, some jewelers are in a peculiar position. A manufacturer may object to a large retail business if they object to a manufacturer selling to a retailer they themselves are not willing to buy from a manufacturer, but they are virtually retailers.

The meeting held here last week was held behind closed doors. No outsider was admitted not even before the sessions commenced. The members of the trade press were treated with marked discourtesy by a leading officer of the organization, and their presence was not required to make the meeting a success. Secrecy was the order of the day, and when a member was reached for news he immediately buttoned up his coat and felt for his pocket.

Instead of looking like a convention of prosperous merchants, it reminded one of a school for young detectives, so deep was the mystery surrounding this assemblage. It was promised that a committee would be appointed to give out a statement to the press. This promise was not kept. The statement made was the one that "the jewelers have a meeting." That was all that was necessary to know.

There were about 40 out-of-town jewelers present and about 20 Chicago jewelers and their representatives. Quite some time was spent upon making the members acquainted with one another. The question of long credits, discounts and dating was discussed, and the all-important one of manufacturers selling direct to the retail trade. A stumbling block found was the fact that eastern jewelers were there and the association felt that they could do nothing unless they were more thoroughly organized. They felt they would be at a disadvantage if they were bound by rules that eastern jewelers do not have to abide by, and at this end in view a committee was appointed to visit the eastern jewelers and urge them to become members.

After a lunch at the Chicago Athletic Club and a dinner at the Automobile Club the meeting adjourned till next February, when the members will gather in New York.

Among those present were: Chicago—B. C. Allen and B. C. Allen, Chas. Spencer, A. Becken, S. Glickauf, A. Hirsch, A. W. Pehnle, H. F. Hahn, H. N. Hahn, Henry Mason, Jake Swartzchild, C. H. Knights, Thearle, Harry Kohn, Emil Despres, C. Bridges, M. S. Fleishman, L. H. Berber, Claude Seymour and Lem Flerke. Cincinnati—A. G. Schwab, Jos. Norton, A. J. Thoma, Eli Gutman and S. Rosenberg. St. Louis—Edwin Massa, Ellison Bauman and Harry Aller. Kansas

City—C. C. Hocfer, C. B. Norton, G. H. Edwards, Ward Lewis and C. A. Kiger. Denver—Edward Lehman and W. W. Hamilton. Buffalo—Ed. Eisele. Cleveland—Chas. Keim and H. W. Burdick. Detroit—Chas. A. Berkey and W. C. Noack. Indianapolis—J. Reagen.

### Executive Committee of A. N. R. J. A. Meet at Chicago and Confer With Committee from N. W. J. A.

Chicago, Sept. 19.—A meeting of the executive committee of the officers of the American National Retail Jewelers' Association was held at the Great Northern Hotel, on Wednesday and Thursday Sept. 16 and 17. Those present were J. P. Archibald, president; A. E. Paegel, first vice-president; S. Callison, secretary; R. C. Bernau, treasurer, and Ira M. Radabaugh. All of these officers made addresses before the convention of the Illinois Retail Jewelers' Association, which met on the above dates. The executive committee met to consider the advisability of publishing an official organ. After much deliberation it was unanimously decided to defer the publication of such a paper.

Thursday the committee met a committee from the National Wholesale Jewelers' Association at the Great Northern Hotel for a little conference. The following were present:—For the American National Retail Jewelers' Association, J. P. Archibald, R. C. Bernau, S. Callison, I. M. Radabaugh and A. E. Paegel. For the National Wholesalers' Association, B. C. Allen, C. A. Berkey, G. H. Edwards, W. C. Noack, Eisele, Edwin Massa, A. W. Sprochnic, A. G. Schwab, J. Reagen, C. A. Kiger, H. W. Burdick and Claude Seymour.

J. P. Archibald, president of the American National Jewelers' Association was elected chairman. Charles A. Berkey of the National Wholesale Jewelers' Association, was elected secretary. Mr. Archibald thanked the members of the executive committee of the wholesalers' association for the privilege of the meeting. Mr. Massa, in a short talk stated that he thought all matters of differences between a retailer and wholesaler, or between the two organizations, should be referred to the executive committees of both associations.

A motion then made by Mr. Massa and seconded by Mr. Bernau was to the effect: "that all matters of dispute between a retailer and a jobber be referred to the executive committees of both associations for adjustment." The motion was carried.

A motion by Mr. Berkey "That every known instance of a catalogue being in illegitimate hands be referred to the executive committee of the National Wholesale Jewelers' Association and that this committee will do all possible to keep regular wholesale jewelry catalogues in the proper retail jewelry channels" was also acted on favorably.

The committees went on record as advocating a more uniform and conservative granting of terms and credit.

The retail jewelers' committee then attended to some executive details, arranged for the program for the next annual convention and selected Aug. 3, 4, 5 and 6 as the dates on which the convention is to be held. They then adjourned.

### Improvement in the Diamond Trade Indicated by Resumption of Work at Large Factories.

A significant indication of the returning prosperity in this country is shown by the fact that some of the largest diamond cutting factories in New York are again working under a full time schedule, and it is probable that other factories will again start up within a short time. The diamond industry was the first to feel the stress caused by the financial disturbance last year, and it is among the last to revive. While people must of necessity have that which will sustain life, luxuries are passed by during a time of depression, and no better proof of an improvement can be cited than the reopening of the large diamond factories both here and abroad.

A. Meyer, president of the Diamond Workers' Protective Union of America, when seen by a CIRCULAR-WEEKLY reporter, at the headquarters of the Union, 157 Washington St., Brooklyn, Monday, said that the outlook for the future is good. Mr. Meyer, in speaking of the matter, said: "The Van Dam and Van Wezel factories, two of the largest diamond cutting plants in this city, are now working on full time, and it is expected that other factories will start again within a short time. Some of the members of our Union," said Mr. Meyer, "who returned to Antwerp and Amsterdam at the beginning of the financial trouble last year, have again returned to this city, while others who have secured employment in the European cities will be returning to New York again as soon as conditions warrant.

"Conditions in the diamond cutting centers of the Continent have again reached a normal condition. For the past 10 months practically not a man was at work, but now about one-fifth of our membership in this country are again employed, and almost all the men on the other side are working on full time. There are only 300 unemployed out of a membership of 4,000 in Antwerp, while in Amsterdam only about 1,000 out of a membership of 8,000 have not yet found work."

This return to employment is most encouraging and predicts better things for the future.

"Our men have followed the work of polishing and cutting diamonds since youth and are unfitted for rough work, and as a result of this they have in many instances been unable to find employment suitable to their capabilities. The resumption of the work is therefore most gratifying. Some of the members of the Union are still working in this city in various lines of work, but are anxious to return to their old-time employment, and will welcome with great pleasure a resumption of better conditions."

Asked as to when he thought a normal condition of affairs would be reached in this country he said: "It is hard to say just how long it will be before conditions return to the normal state. If the Christmas trade in this country is good, a normal condition will ensue directly after the holidays. It all depends upon the demands made for diamonds."

Eduard Van Dam, in speaking about the revival in conditions, said: "We are run-

ning our factory in this city with a force of men and are working full time. The same conditions exist in our Amsterdam and Antwerp factories. The demand in this country for diamonds is greatly increasing, and I think that within a short time normal conditions will return. Our factories in this city are starting and will be employing more men as conditions improve. Reports from Amsterdam and Antwerp indicate a brisk condition of business. About 80 per cent. of the workmen again employed."

In speaking of the business situation generally, J. L. Ewell, of *Dun's Review*, on Monday to a representative of THE JEWELERS' CIRCULAR—WEEKLY:

"City dispatches this week from the respondents of *Dun's Review* in all important centers are very favorable, indicating a gradual but continual improvement in business conditions throughout the country. The eastern ports, for example Boston and New York, show a large increase in domestic business, while San Francisco shows a very much larger export business, being practically the same for the week, of New York. The dispatches state that dry goods merchants report evidences of steady expansion in the retail trade. Cotton mill owners are sanguine over the outlook, and would have increased their business, very materially, many branches, if low bids had been accepted; and the large hosiery mills are receiving an increased number of orders, a fact they have enough in sight to warrant steady employment for the balance of the year. The demand for anthracite continues good. The lumber business is picking up, and the paper mills expect an increased business. Dispatches from Philadelphia indicate a gradual recovery in business, prices are holding firm and there are many substantial improvements, an increasing demand for the various commodities. The Pittsburg market shows a better demand for sheet iron. The pig iron trade is much more actively employed and is receiving orders that extend into the future. Prices are stiff and the producers seem to be holding for higher figures, as the market is in better condition and there are lots of new customers in sight for the time this season. The larger demand regulates shipments, and the movement on the lakes this month is expected larger than last month. On the whole, the iron and steel trade—the great barometer of trade conditions generally—is in a healthier condition. Quite a few orders for cars and rails, as well as for structural steel, are coming in now, and the improvement is made more apparent by the fact that new buyers who have not made their appearance heretofore, are now actively engaged in placing orders for the remainder of this year and the early part of next year. Every manufacturer takes heart from the increased demand and the rise in price in the pig iron market, having been considered always as the unfailing sign of returning prosperity. On the other hand a decline in the pig iron market is also a most reliable and sure sign of falling prices and a general depression in business."

## Philadelphia.

ross Quicksall, Mt. Holly, has recovered from an attack of typhoid fever.

red. T. Barry, with L. Stern & Co., returned from a western trip.

W. Laubach, 7038 Woodland Ave., is reported to be seriously ill with nervous prostration.

W. Broadbent, 929 Shipley St., Wilmington, Del., has completed alterations to his store for the Fall trade.

oy Phillips, a watchmaker, Darby, Pa., accepted a position last week with John West, watchmaker for the trade, 7th and Sansom Sts.

Andrew V. Brown, manufacturing optician, 740 Sansom St., returned, last week, from a three weeks' excursion into the pine woods.

Some of the wholesale jewelry houses were closed all day Monday, Oct. 6th, on the usual observance of Yom Kippur, a Jewish fast day.

A. Markley, watchmaker for T. H. Sedley & Son, Camden, N. J., is enjoying vacation visiting the old homestead at Swenksville, Pa.

Bester, watch and clock maker, Morristown, Del., last week opened a branch store at 5th and Market Sts. He proposes to call it a "clock hospital."

Willis Porter, Burlington, N. J., returned last week from a business trip to New York, made largely to replenish stock for Fall and Christmas trade.

Allez, Millville, N. J., is receiving the congratulations of his friends in the trade of this city upon the recovery of his wife from an attack of typhoid fever.

John Miller, western salesman for L. P. White, who returned, last week, from a trip through the west, says business everywhere he went showed a better tone.

Louis Siekles, of M. Sickles & Sons, has returned from Atlantic City and is occupying his country house at Wyncote until October, when he will return to the city.

Richard Pinkstone, youngest son of R. M. Pinkstone, 19th and South Sts., entered Dickinson Seminary, a theological school, last week, to prepare himself for college.

Edward Bennett, a watchmaker, who recently arrived in this city from Ohio, has taken a position as watchmaker with L. Thomas & Co., 409 Market St., Wilmington, Del.

A fire broke out in the jewelry store and dwelling of Harry A. Cain, 2924 Ridge Ave., last week, but was fortunately discovered in its incipiency, causing a loss of \$20.

Lawrence Smith, son of J. W. Smith, jeweler, West Haines St., Germantown, married recently with Miss Martha Hachmann. After their parents learned of the wedding all was forgiven.

Charles G. Oelschlager, engraver, who spent the last two years in the Klondike regions of Alaska, has returned to this city. Last week reopened an establishment at a hold stand at 706 Chestnut St.

George Vitner, Altoona, Pa., who is recovering from an attack of appendicitis, visited this city last week to make purchases and to enjoy the benefits of a change of climate and scenes during his convalescence.

Ed. Lewis, with W. W. Fulmer, 8th and Sansom Sts., returned last week from an extended trip down east and brought back word that business on his trip was excellent and conditions generally decidedly encouraging.

Lee Henle, of Susstfeld, Lorsch & Co., received the felicitations of his friends in the trade of this city, last week, when the glad tidings were broken to him that he was the father of an heir. Mr. Henle was married about a year ago.

Williard Davis, a Wilmington retailer, recently a candidate for the Governorship of his State, opened last week a store at 10th and Market Sts., Wilmington, which he will conduct in conjunction with his old store on 2nd St., Wilmington.

Clifford Spoerhase, son of L. Spoerhase, 4078 Laueaster Ave., who has been sick five weeks, following an operation for appendicitis, is still gravely ill, his recovery having been retarded by complications which set in following the operation.

C. F. Rudolph, a prominent Wilmington, Del., retailer, at 4th and Market Sts., was seized with a slight stroke of apoplexy last week at his home, 910 West St., Wilmington, while at dinner. Mr. Rudolph is 78 years old, but hopes are expressed for a complete recovery.

Charged with stealing 14 gold watches from his employers, Gatey & Hadley, Camden, Orville Vanderslice, 1732 Fillmore St., this city, was arrested while trying to pawn one of the watches at 9th and Race Sts. Four other watches were found in his possession. Vanderslice was held to await the action of the Camden authorities.

W. Esti, watchmaker for the trade, 709 Sansom St., was seized with an attack of appendicitis last week and removed to the Jefferson Hospital. The physicians, however, decided that an operation was not necessary and Mr. Esti was treated. He soon grew very much better and is reported now to be on the road to complete recovery.

E. D. Sturner, retailer, Easton, Md., a brother of Oscar Sturner, of that place, whose business he took over when Mr. Sturner fell from the Peninsula Express as the train was crossing the Susquehanna River, presented to William D. Crawford, last week, a handsome gold watch in appreciation of the latter's services in recovering the body of his brother. April 17th.

Louis Stern, of Louis Stern & Co., of this city and Providence, R. I., went to New York, last week, to meet Mrs. Stern, who has been abroad all Summer and brought back with her Miss Florence Stern, a daughter, who, for five years, has been at school in Berlin. The family at once returned to Atlantic City, where Mr. Stern has a Summer home, and spent the week's end receiving friends and old acquaintances.

Among the out-of-town visitors to this city's wholesale trade last week were: J. Lacey Tyler, Laceyville, Pa.; B. C. Foster, Bristol, Pa.; D. H. Krause, North Wales, Pa.; W. K. Schlotterer, Schwenksville, Pa.; Charles Kohler, Norristown, Pa.; H. V. Stratton, Bordentown, N. J.; Gus. Lanz, Norristown; E. W. Carter, Glassboro, N. J.; H. C. Brown, Cambridge, Md.; B. F. Custer, Mt. Carmel, Pa.; M. Sternberg, Savannah, Ga.

There is manifested a disposition on the part of the wholesale jewelers of this city to observe "Founders' Week," beginning Oct. 5th, largely as a holiday week in accord with the proclamation made by Mayor Reyburn, who requested all merchants and the executive heads of commercial establishments to close at least part of each day that their employes might take part in the celebration of the week marking the founding of the city. The leading retail and wholesale jewelers are expected to arrive at an agreement concerning the closing hours during Founders' Week early next week.

The death of Charles Duffy, once one of the most popular salesmen who ever covered the Philadelphia trade for a New York house, was a source of deep regret to the jewelers of this city, and especially to the members of the Philadelphia Jewelers' Club, of which Mr. Duffy had been an active and an influential member for many years. The Board of Governors of the club met and appointed a committee to attend the funeral services in New York City. L. P. White was made chairman. Appropriate resolutions are soon to be adopted expressive of the feeling of the members of the club. Mr. Duffy was at times vice-president and a director of the club. He was one of its original members. Last Spring when he was especially invited to attend the shad dinner given by the Jewelers' Club at the Bingham House and after he had apparently recovered from a serious illness he was given the heartiest kind of a welcome and the dinner almost resolved itself into a dinner in honor of Mr. Duffy. This attested in the most pleasant way his great popularity. He was forced by repeated applause to make a speech, and was followed by others who made flattering remarks about him.

Ralph Seaman, a member of the firm of Seaman & Struntz, by rare presence of mind and a display of remarkable nerve, frustrated an attempt to rob his store of two diamond rings worth \$350. Friday morning a man entered and asked to be shown several rings. After a while he carried two of them toward the door, apparently to examine them more closely. The man hurried as he had about reached the door. Instantly Mr. Seaman pressed an electric button, which closed the door, and drawing a revolver commanded the man to throw up his hands and stand still. Dr. Mark Bradner and John Walsh, who were in the rear of the store, came to Mr. Seaman's assistance, and members of a fire company across the street, seeing the commotion, thought the place was on fire. They rushed over and Mr. Seaman's prisoner was handed over to them. The man gave the name of George Beam, 23 years old. He was given a hearing before Magistrate Scott and held in \$2,000 bail for court. F. W. Parrot, retail jeweler, 2037 N. Front St., who lost a gold watch stolen in the same manner, identified the man as the one who several days previously had been in his store. F. D. Glover, 2806 Germantown Ave., likewise identified Beam as a man who tried to steal a tray of watches from him.

R. Brandenburg, Waverly, Ia., has bought a stock in Tripoli, Ia., at sheriff's sale.

# GORHAM SILVER

## GORHAM FALL SILVERWARE

¶ For the approaching Fall and Holiday seasons the Gorham Company have made thoroughly adequate preparation, and for many months past their designers and craftsmen have sedulously engaged in the production of new and original examples of Gorham activities.

¶ As a consequence, the Company's display of Fall and Holiday goods has never been more complete or so comprehensively varied. New and attractive patterns in all the standard lines, as well as exclusive novelties not to be found elsewhere, are offered at prices comparing more than favorably with those asked for goods of a similar character but lacking the Gorham trade-mark and prestige.

ACCORDING to the reports received from the various sources, last week probably showed the most distinct improvement as well as the largest gain in business that the jewelry trade has had for some time, manufacturers in nearly all lines that enter the trade feeling an appreciable gain in the number of orders sent in from all sections of the country. The improvement is generally noted in all the manufacturing jewelry centers of the east—Providence, the Attleboros, New York and Newark—while generally good reports are coming in from the main distributing centers, principally Chicago, St. Louis, Cincinnati, Pittsburg and Kansas City. While the most pronounced increase in the retail jewelers' business will not take place until the holiday trade begins in November, nevertheless if the inquiries which the retailers are beginning to receive and the purchases which are now being made are straws which indicate the direction of the business wind, a very comfortable holiday trade is in store for jewelers in most sections of the country.

**A Misleading Watch Advertisement.**

WITHIN the past few weeks an advertisement of a mail order house has appeared in a number of western newspapers which has proved of considerable annoyance to jewelers, and judging from the orders which the company advertising is receiving, is apt to affect the trade of legitimate dealers in watches to a considerable extent. This advertisement starts off by speaking of a \$25 watch for \$7, and by its wording permits the reader to believe that a special offer is being made for this month by which he can get a non-magnetic railroad watch of great value for this price. The advertisement is signed by the Union Watch Co., 49 Maiden Lane, to which orders are to be sent direct, and the offer is made to send the watch on approval on a payment of 25 cents, the advertisement leaving it to be inferred by the readers that after this payment the watch may be kept for 90 days, and if satisfactory, the \$7 can be forwarded, and if not the money can be returned.

While it is needless to prove to the jeweler that the watch in question is a cheap kind of a Swiss affair in an electroplated case; that it is in no way a timepiece of the character which the reader will think it is, and that the Union Watch Co. is not a watch manufacturing company, at the same time it is hard for the retail jeweler to show this clearly to his customers without distinct facts upon which to base his statements. Therefore, the story in another column explaining what the watch is, and who the advertisers are, may be of use to the trade in their efforts to prevent their customers from sending for the articles in question, and also in explaining to the newspaper proprietors the exact character of the advertisement which they are carrying.

After this advertisement had appeared in one town in Wisconsin an enterprising jeweler published a large advertisement in a rival paper exposing the "lies" which he claimed the advertisement contained, and also denouncing the proprietor of the paper which had published it. Although the newspaper proprietor has, for the sake of his standing in the community, brought suit for

Nothing succeeds like "Reason Why" advertising. Tell why your goods are salable in THE JEWELERS' CIRCULAR-WEEKLY.

libel, we doubt if the jeweler has anything to worry about.

THE CIRCULAR-WEEKLY has just received word to the effect that the advertisement has appeared in certain papers in New York State. If it has, we think that there is no doubt that proceedings can be brought against the advertisers for violating the provision of the advertising law passed a few years ago, and a stop put to advertising in this way. By the admission of the company's own clerks, the regular price of the watch is not \$25, but \$9, while in the trade the value of the watch is placed at a very much lower figure than is asked for it in the "special offer for this month." We do not know whether the advertising laws are on the statute books in other States in which the advertisement has already been published, but it will be easy for the jeweler to find this out by consulting with his local district attorney, or in fact, any reputable attorney-at-law.

The information about the watch itself and the firm which supplies it, published herewith, may be used to advantage by jewelers in whose towns the advertisement may appear.

**The Annual Report AGAIN THE CIRCULAR-WEEKLY on Gem Production.**

is enabled, through the courtesy of the United States Geological Survey, to present to its readers the annual report of this department upon the production of precious stones, which report will form an important part of the volume on "Mineral Resources of the United States," which is published annually under the direction of George Otis Smith, Director of the Survey. The report, which has again been prepared by Douglas B. Sterrett, is larger and in some respects an improvement over the report of 1906, published last year, which was the first under Mr. Sterrett's management.

As is usual, all gems and gem materials are included, but the largest divisions are those devoted to diamond, sapphire and turquoise, though the gem minerals of southern California are given considerable attention. The entire product of American gems of 1907 as reported, amounted to \$471,300 as against \$208,000 for the previous year, the largest production being sapphires, in which it is estimated there were about 11,000,000 carats worth about \$229,800. The next important figure is that of tourmaline, of which 21,040 pounds were produced, estimated to be worth \$84,120, while the value of the 3,105 pounds of chrysoptase was valued at \$46,500. Other important items are turquoise, \$23,840 and Californite, \$25,000.

The first instalment of the report, which begins this week, deals with agate, amazon

## ROCK BOTTOM PRICES ON DIAMONDS

Our diamond prices are rock bottom.

We import the stones direct, cut them ourselves, and sell them as close as anybody in the country does for diamonds of equal quality.

We carry a large stock at all times and the jeweler who sends to us for a selection not only gets rock bottom prices, but also a liberal assortment—and, what is of utmost importance, he gets it promptly.

### Good Gold Jewelry

It's the  
only kind  
we make

A RATHER COMMONPLACE DECLARATION, WE'LL AGREE, BUT WE MAKE IT WITH AN INSPIRING REVERENCE FOR THAT MUCH-ABUSED WORD "GOOD." OUR JEWELRY IS GOOD ALL OVER—GOOD THROUGH AND THROUGH. IT ISN'T ALONE SUPERFICIALLY IMPRESSIVE, IT GOES BEYOND THAT, SUPPORTING ITS VISIBLE DIGNITY WITH MATERIAL QUALITIES THAT MAKE IT MOST ENDURING. FURTHERMORE, LIKE EVERYTHING IMPRESSIVE, IT HAS A PERSONALITY—CHARACTERISTICS THAT EASILY HELP IDENTIFY IT AS A KIRBY PRODUCT. ASK TO SEE THE KIRBY LINE BEARING THE ABOVE TRADE-MARK.

stones, amber, amethyst, azure, malachite, benetioite, beryl, californite, cat's-eye and chrysoprase. In the next instalment, which will be begun with the diamond, there will be given not only a summary of what has and has not been done in the production of diamonds in the United States, but also facts about the diamond production of South Africa, Brazil, India and a few others on the diamond industry generally.

The report will be continued weekly until it is completed.

### New Orleans, La.

#### TRADE CONDITIONS.

The jewelers are making preparations for a Fall season, although it may come somewhat late. The wholesale houses all seem to be busy. Some sections of the south have been affected by the bad weather, but a fair crop seems assured and business will increase after the crops begin to move.

B. B. Harris has moved into a new store. E. Barbier, 308 Royal St., has made some improvements in his store.

L. H. Aubert, 1625 Dryades St., has installed new fixtures in his store.

Ed. Fitzgerald has moved into new quarters on Dryades St. This street is becoming quite a jewelry center.

Katz & Co. have lately started in business on Magazine St., and their establishment is up-to-date in every way.

Dr. N. Bellamore, local optician, is now one of the finest optical parlors in the south, having removed from Royal St. to 805 Canal St.

An occurrence which has created a favorable comment and likewise pleasure is the outing of the employes of Leonard Krower. They all visited the exposition a body and later were entertained by Krower at one of the principal restaurants.

At the opening of the Fall season Leonard Krower placed before his establishment, 526-538 Canal St., a most attractive sign, measuring 15x15 feet, advertising New Orleans as being the place to buy goods and the best market for the southern people.

There have been a number of jewelers visiting here lately, among others, Mr. and Mrs. Clements, Peter Lindquist, J. G. Mackey, Mr. Lehman, Mr. Simon, Wm. Townsend, E. G. Hammer, Vignes, J. C. Moorefield, Alfred Jack, Mr. Glover, Mr. Chapman, Mr. Kysar and Mr. Streiffer.

Numerous excursions are being made to this city to induce the people of our southern States to visit the Home Manufacturers' Exposition, which has been extremely successful in every way. The influx of people has caused some stir in the jewelry business, which is quite acceptable after the long, dull Summer. The display of T. Haussmann & Sons, Ltd., is quite commendable, as it shows a number of articles of the firm's manufacture, like silver loving cups made for different presentations. The plating department received a good share of display. The exhibit of Leonard Krower is the most attractive of all, and shows a number of articles produced by this house such as tiaras, rings, the celebrated gold and silver fac-simile of the Isidore Newman Trust School, etc. Another item of great interest is known as the "evolution of the ring"

## New York Notes.

V. H. Deuble, Canton, O., is a visitor in this city this week.

Goodman, New Haven, Conn., was a visitor in town, Friday.

M. Michelson, Montreal, Can., stopped at the Astor House last week.

J. White, a Providence manufacturer, closed his local office last week.

Thomas Harrison, 11 Maiden Lane, is among the eastern jewelry factories.

J. Gutmann, of L. Gutmann & Sons, Cincinnati, O., was in town last week.

James P. Harper, 37 Maiden Lane, sailed for Europe on the *Lusitama* Wednesday.

Thomas Davidson, of the Thos. Long Co., Boston, Mass., is in town on a buying trip.

Martin A. Hagen, Fargo, N. Dak., was a visitor in town last week, buying Fall stock.

Mr. Samuels, of Samuels Bros., Youngstown, O., was among the out-of-town visitors last week.

Fenton Cahn-Coblen's jewelry buyer in Baltimore, Md., was a caller in town several days last week.

Frederic Greene, with the Hansen-Bennett Co., Providence, R. I., reached this city, this week from a western trip.

Henry F. Barrows, of the H. F. Barrows Co., North Attleboro, was at the New York office of his concern last week.

Charles L. Trout, president of Charles L. Trout & Co., 170 Broadway, returned, Monday, from a short vacation.

Alvin Chisholm, president of the Bugbee & Viles Co., was a visitor at the New York offices of the concern, last week.

Valter Ballou, head of R. Blackinton & Co., North Attleboro, Mass., was a visitor in the Maiden Lane district last week.

James Lincoln, with the Walcott Mfg. Co., Providence, R. I., returned to this city, Tuesday, after a trip in the middle west.

C. Mizer, jewelry buyer for the Howland Dry Goods Co., Bridgeport, Conn., was at 15 Spring St. a part of last week.

Larry Caro, with the Manchester Mfg. Co., Providence, R. I., left this city, last week, for a five weeks' business trip west of south.

Minnie B. Levy, bookkeeper for Hipp. D. Scheim & Bro., has returned from a two weeks' vacation spent at the Delaware Water Gap.

Bert Ganz, of the Gustave Fox Co., Cincinnati, was a visitor in town last week.

Called at the office of THE JEWELERS' CIRCULAR-WEEKLY.

Extensive repairs are soon to be made at the Gill building, 9 Maiden Lane. The contract has been awarded, and the work will be begun soon.

Cross & Beguelin have just supplied the Melair Country Club with a number of gold medals, which will be given as prizes in a Fall golf tournament.

W. A. Marcellus, secretary of the Assurance League of America, returned this week on a fortnight's vacation spent at Clayton, N. C., on the St. Lawrence River.

Henry Tissot, 68 Nassau St., is seriously ill at his home in Brooklyn from a complication of diseases. He has been in ill health for some time past.

A. Budlong, of the firm of S. I. Rodberg & Son, Baltimore, Md., was a visitor in this city last week en route on a trip to the

manufacturing cities to complete his stock in trade.

The Gorham Co. has declared a regular quarterly dividend of 1½ per cent. on the preferred stock payable Oct. 1. Books close Sept. 25 and open on Oct. 1.

Cross & Beguelin, now at 31 Maiden Lane, have rented the store formerly occupied by the Gorham Co. in the Hays building, 23 Maiden Lane, and will move to their new quarters in a short time.

Goodman King, president of the Mermod, Jaccard & King Jewelry Co., St. Louis, Mo., returned from Europe last week on the *New Amsterdam*. He made a short stop in this city on his way home.

A meeting of the creditors of the American Sheffield Silver Co., against whom a petition in bankruptcy was filed some time ago, will be held at the office of Nathaniel Prentice, 120 Broadway, Oct. 2, at 3 p. m.

Edwin P. Leobl is opening a place of business at 53 Maiden Lane as a broker in diamonds, pearls, precious stones, jewelry, etc. He is well known, having been located in the Maiden Lane district for a number of years.

The United Silver Co., of New York, has been incorporated to do a mail order business, with a capital stock of \$1,000. The directors are: John H. Wright, A. R. H. Wright, and James Dean, all of Mount Vernon, N. Y.

The L. E. Waterman Co. has on exhibition in its Broadway store, corner of Cortlandt St., two pictures showing San Francisco after the big fire and as it now appears. The pictures have attracted considerable attention from passers-by.

The partnership formed by Satzman & Forman, manufacturers of gold chains and bracelets, 102 Fulton St., about a year ago, has been dissolved. Mr. Satzman will continue the business alone. Mr. Forman has not decided as yet just what his future work will be.

Joseph Wright, who is connected with the Illinois Watch Case Co., 9 Maiden Lane, sailed Wednesday on the *Lusitania* for Europe. After spending some time in Europe he will return to South America, where he will make an extensive trip. He expects to be absent about 10 months.

Dieges & Clust, 23 John St., designed and made the medals presented by the New York *American* which were awarded, Saturday, to successful contestants in a mile run conducted by the New York paper. The boys have been under the instruction of John Hayes, the winner of the Olympic Marathon.

Frank E. Harmer, western salesman for the Solidarity Watch Case Co., is seriously ill and has gone to the Catskill Mountains for a few weeks, on the advice of his physicians. Owing to the illness of Mr. Harmer, John W. Sherwood is making the western circuit for him. Mr. Sherwood expects to return to this city about Sept. 23.

The note in last week's issue of THE JEWELERS' CIRCULAR-WEEKLY relative to the formation of the partnership between B. Ostertag and I. Roman, under the firm style of Ostertag & Roman, stated that Mr. Ostertag was formerly associated with S. Danziger. This was an error, as Mr. Ostertag was never associated in business in any way with Mr. Danziger.

The meeting of creditors of Anzelewitz Bros., 125 Canal St., against whom a petition in involuntary bankruptcy was filed in August, was held at the offices of MacGranme Cox, in the Hudson Terminal building, at 12 o'clock, Friday, at which time claims were filed and Leo Kohn was named as trustee. The meeting was adjourned until Sept. 22 at 2:30 p. m. at the same offices.

The funeral of Louis Goldsmith, whose death was noted in the last issue of THE JEWELERS' CIRCULAR-WEEKLY, was held, Thursday, from his late home, 106 E. 81st St. Mr. Goldsmith had not been identified with the jewelry trade for about 10 years past, but at one time he was in business for himself at 65 Nassau St. He was 56 years of age. He is survived by a widow and one son.

The funeral of John Davies, a retail jeweler, 60 years of age, was held on Friday night from his late home, 33 N. Oxford St., Brooklyn. He died suddenly on Wednesday of last week of heart disease, while talking to his sister, Mrs. Jane Murfitt, 33 N. Oxford St. Mr. Davies was an old-time member of the Baptist Temple, Third Ave. and Schermerhorn St. He appeared to be in excellent health up to the time he was stricken. The deceased is survived by a widow, three sons and two daughters. Interment was in the family vault at Greenwood on Saturday morning.

A meeting of creditors in the matter of Morris Dreshfield, against whom a petition in bankruptcy was filed some time ago, which was called for Friday afternoon, at the office of Referee Peter B. Olney, 68 William St., has been adjourned until Oct. 9, at 2 p. m., at the same place. William Lesser, receiver in bankruptcy for Mr. Dreshfield, has sold at auction two pawn tickets dated Sept. 7, 1907. One ticket called for 81 loose diamonds on which \$3,734 was loaned, and the other ticket called for 28 on which \$2,066 was loaned. The two tickets were sold for \$340.

The adjourned meeting of the creditors of Solomon Urbach, a former diamond dealer of 47 Maiden Lane, who was recently released from Ludlow Street Jail, where he has served eight months for contempt of court, was called at the office of Referee in Bankruptcy Townsend, 45 Cedar St., Friday afternoon, at 2 p. m. Urbach was declared a bankrupt in 1906, after he had claimed he was robbed of \$30,000 worth of diamonds on a train between New York and Baltimore. The court ordered him to turn over the missing property to the receiver in bankruptcy, and when he did not do so sent him to jail, from which he was recently discharged. Urbach was present with his attorney at the meeting Friday, as were the attorneys for a few of the creditors, but nothing was done, owing to the fact that the referee announced that Job E. Hedges, who has been appointed trustee, has refused to act in that capacity. On request of the attorneys for creditors another adjournment was taken until Friday next at 3 p. m., when it is expected a trustee will be elected, and an examination of the bankrupt will also be begun.

## New York Notes.

(Continued from page 87.)

returned to duty, last week, from a vacation spent at Liberty, N. Y.

J. Cohen, Philadelphia, was a visitor in town the first of the week.

Edward M. Coe, salesman for Bliss Bros., Attleboro, Mass., is back in New York for a short western trip.

Albert Feldenheimer, Portland, Ore., is in this city, and is making his offices with his brother, Louis Feldenheimer, 41 Maiden Lane.

William Blake, of the James E. Blake Co., Attleboro, Mass., who has been seriously ill, has recovered and is spending his days in town.

Charles M. Robbins, Attleboro, Mass., is in this city and has opened an office at 41 Maiden Lane on the 12th floor. He will have the personal charge of the New York territory.

V. A. Sturgeon, Detroit, Mich., and Charles L. Hand, the New York auctioneer, recently completed an automobile trip from New York through the Berkshire Hills to Hartford, Conn.

Ernest Cashmore, who has withdrawn from the firm of Julius Jorgenson & Co., 33 Broadway and 334 Columbus Ave., will continue in the jewelry business at 334 Columbus Ave., under his own name.

A dispatch from Washington, D. C., states that a fraud order has been issued against the Rogers Silverware Co., the Rogers Mfg. Co., located at 143 W. 11th St., and 438 W. Broadway, on charges similar to those reported on previous occasions in THE JEWELERS' CIRCULAR-WEEKLY.

H. Miller, for many years connected with Chester Billings & Son, has accepted the position as eastern manager of the Occidental Gem Corporation, sellers of "amalgams," and will be located at the New York office of the concern, in the St. Paul building, 220 Broadway, after Oct. 1. The concern is at present located at 71 Nassau St. The New York *Herald*, in its Sunday edition, carried a full page descriptive article on the new book on pearls, which is in the process of publication, by Dr. George F. Knapp, head of the precious stone department of Tiffany & Co., and Dr. Charles Hugh Stevenson. The article is illustrated with prints of famous women adorned with costly pearls.

The bulletin of the Metropolitan Museum of Art for September, which has just been issued, contains a continued report of the Egyptian expedition, giving further detail of the season's work at the pyramids of Giza. The museum now possesses replicas of three pieces accounted among the best and most characteristic of the works of the Egyptian Saint Gaudens. These are bas reliefs of children.

Wm. Lesser, receiver in bankruptcy for George H. Carpenter, will sell under order of the court, to-morrow, at public auction, 113 Leonard St., a quantity of office furniture, including a mahogany roll-top desk, chairs, hat rack, typewriter and other articles. A petition in bankruptcy was filed against Mr. Carpenter some time ago, in

which it was alleged that he obtained a large quantity of diamonds from R. A. Breidenbach, 51 Maiden Lane, by alleged false means. Maurice Dreshfield was alleged to have been connected with Mr. Carpenter in the transactions.

D. Gorham, a silverware and jewelry dealer, of this city, by his attorney, W. H. Jessup, has filed a trespass suit against F. S. Godfrey, proprietor of Hotel Jermyn, Scranton, Pa., to recover the value of silverware and jewelry which was stolen by a porter of the hotel about a year ago from the trunks of an agent of the plaintiff. The plaintiff sues the defendant to recover \$2,500, the value of the goods stolen. The theft took place in the night time, when two trunks of the agents were broken into by a porter, it is alleged, and silverware and jewelry were taken. No clue to the whereabouts of the porter has been obtained.

The report which emanated from Chicago last week to the effect that the Gorham Co., or Spaulding & Co., was about to open a retail jewelry store in St. Louis, at 10th and Olive Sts., was positively denied at the office of the Gorham Co., in this city, Friday, as being absolutely without foundation in fact, as far as this company was concerned, as the Gorham Co. has no intention of opening retail stores anywhere in the country at any time. As far as Spaulding & Co. are concerned it was learned from a reliable source that this house had no intention of opening a store in St. Louis, though the site on Olive St. had been laid before the management by the owners or agents of the property some time ago.

S. Kohn, 215 Broadway, New York, reports in connection with the burglary which occurred at his store recently that shortly after the occurrence of the robbery two men who gave the names of Fred Cole and John Summers were arrested, and according to Mr. Kohn confessed to the robbery and gave a complete list of places where the pawned goods had been taken. The list included the store of one Abraham Fox, 24 Second Ave., so Mr. Kohn says. When the detectives entered Fox's store the storekeeper seemed very much excited and could not answer questions coherently. He was pointed out as the person who bought the goods. It is claimed that Fox paid \$28 for a large quantity of jewelry and several watches, but upon searching his premises nothing could be found. He was arrested and taken to police headquarters. Mr. Kohn reports that part of the jewelry has been recovered. A third man, who is charged with being implicated in the robbery of Mr. Kohn, is being held in New Jersey, awaiting extradition.

The Davis Liquidating Co., which was incorporated under the laws of the State of New York, recently, has sent out notices announcing that the corporation has purchased the entire assets of B. H. Davis & Co., 71 Nassau St., New York, consisting of loose and mounted diamonds, and notes and accounts receivable amounting to \$458,000, and that the liquidating of accounts and selling of merchandise will be conducted at the office of H. Z. & H. Oppenheimer, 1 Maiden Lane, New York. For the purposes mentioned a corporation has been formed, with H. Z. Oppenheimer, as

president; Herman Oppenheimer, Jr., secretary; Joachim S. Van Wezel, of the firm of S. L. Van Wezel, vice-president, and Solomon J. Van Wezel, of the same firm, treasurer. The members of the firms of H. Z. & H. Oppenheimer and S. L. Van Wezel are the sole owners of the corporation, whose capital is \$50,000. Davis & Co. will go out of business.

Importers of hat pins won a victory last week before the Board of Appraisers when it was decided that hat pins, with paste heads, cut and faceted, the heads composing the material of chief value to the finish articles, are dutiable at 45 per cent. under the provision of the tariff for manufacture of paste. Collector Fowler thought that the articles should pay a duty of 60 per cent. as cut glass. General Appraiser Sharretts, who writes the decision for the Board, reaches the conclusion that the articles should be admitted at the lower rate of duty. The Board holds that hat pins with heads of imitation jet, cut and faceted, imitation stones, such as rock crystal, garnet, emerald, etc., blown glass and metal are properly entitled to the lower duty claimed by the New York Merchandise Co., the importers. The Board overruled the protest of Bailey, Green & Elger, holding that gilt metal scarf pins must stand duty as jewelry.

## Newark.

S. B. Berensohn, importer and cutter of diamonds, and dealer in jewelry, has opened quarters at 82 Springfield Ave.

Detective Alexander D. McCrea, of the Pennsylvania Railroad police, last week arrested John Brunnell, at Elizabeth, charged with the larceny of \$100 worth of goods from a freight car. The alleged loot included much silver tableware, whose ownership has not been traced. Brunnell was held for the October grand jury.

Prosecutor Wilbur A. Mott Monday took up for investigation the manner in which eight policemen of the staff of Inspector McCafferty, of New York, performed work a short time ago in Newark. After the arrest of George Williams, Martin Tiffany and Richard Vaughn, the jewelry burglars, it was learned that the New York policemen had followed the trio for several weeks to catch them at work in New York. During that time five business places were burglarized in this city, and it is said the New York policemen followed and watched the burglars, but did not make their presence known to the Newark police authorities.

The house of L. Lelong & Bro., gold and silver refiners, assayers, etc., at Halsey, Marshall and Nevada Sts., is celebrating the 50th year of its establishment in business, the concern having been started by the late Louis Lelong in the Fall of 1858. After the war Dr. Lelong, who had offered his services to the Government as a surgeon, but who was also an expert metallurgist, joined his brother, and with him conducted the business until the death of the founder, since which time Dr. Lelong has been continuing it without change. The celebration of the half century has served to call to mind the great growth of this house in the years it has been dealing with jewelers.

### News Gleanings.

F. W. Hoskins, Beresford, S. Dak., who was recently confined to his house for more than a week by illness, is convalescent.

The H. P. Doe Co., Lawrence, Mass., is remodeling its store, and will have a very attractive interior when the work is completed.

Thomas J. Routledge, Elmira, N. Y., was elected by the Elmira Business Merchants' Association, Sept. 15, as a member of the board of directors to serve for the next year.

J. Fuhrman, Albany, N. Y., has been exhibiting in his show window at his jewelry store, 99 N. Pearl St., a large striking clock to be installed in the tower of the Lady of Angels Church, that city. The clock will be four dials on the clock, with a 2,000-pound bell.

F. Schneider, Lawrence, Mass., was confined to his house as the result of a collision of his automobile a short time ago with an electric car. The automobile was broken in two by the force of the impact, and Mr. Schneider was thrown out and seriously injured.

James K. Lemon & Son, well-known jewelers of Louisville, Ky., have filed for incorporation with a capitalization of \$25,000. The incorporators are: Brainard Lemon, who holds 197 shares; E. E. Mitchel, 20 shares; Goslee F. Geiger, 15 shares; Herman Reike, 15 shares, and Charles O. Schmitt, three shares.

Chester H. Wells, Meshoppen, Pa., who is the inventor of the well-known padding ring adjuster, has returned to his home from a trip to Philadelphia and Wilmington. Mr. Wells, while away, was on the *City of Chester*, which on Sept. 11 ran aground and sank a tugboat with seven people on board, two of whom were drowned. On the side of the shock he suffered no injury in the accident.

The Shepard Mfg. Co., Melrose Highlands, Mass., is adding another story to its factory building, the new floor space measuring 40 by 70 feet. When it is completed it is the intention of the management to move the entire enameling department to these quarters, where accommodations for expert bench hands, filers, polishers, etc., being arranged. The main office of the company will occupy the entire rear of the new floor, and the space on the ground floor formerly occupied by the executive office will hereafter be utilized by the stamp department.

After smashing the plate glass window of the jewelry store of Ben Sands, 21 E. 10th Ave. and 8th St., Cleveland, O., two thieves made an attempt to get away, but were pursued by a crowd, and one of the men, who gave his name as William Allen, was captured. The robbery occurred about midnight, Sept. 11, and the money used by the man to break the window was a stone wrapped up in a stocking. A \$1,000 worth of jewelry was in the window at the time, and a large amount of it was taken by the thief and scattered during his pursuit. Nothing was found on the man who was captured, but he admitted to the police that he committed the robbery while on the verge of starvation. He was taken over to the Grand Jury.

## Providence.

Arthur Beaudet, Woonsocket, is putting additional clerks.

A. Ballou & Co. started their shop full time last week.

Harry H. Miller is on the western circuit with Hutchison & Huestis.

The S. & S. Novelty Co. has removed its factory from 25 to 9 Calender St.

Joseph O. Otis, of Harvey & Otis, is calling upon the firm's western customers.

Edmund J. Rogers is calling upon the western customers of C. H. Cooke Co.

John Lubo has been calling upon the re-trade in this city for Oscar Gottlieb &

Parker Ford is visiting the trade on the Pacific Coast with a new line by Ford & Center.

P. McDonald is showing the Wolcott Manufacturing Company's line to the firm's western trade.

Robert H. Cushman concluded 20 years as president of H. A. Kirby's jewelry factory, Sept. 14.

The Rhode Island Fob Co. has started manufacturing of a line of campaign buttons at 113 Point St.

Frederic K. Potter, of the E. A. Potter Co., returned from a six weeks' trip through Switzerland and France.

The National Jewelry Company of this city is offering creditors a 25-cent compromise in settlement of claims.

Theodore C. Hudson, of Hudson & Co., was married to Miss Helene Winter at Riverside on Thursday.

William H. Luther & Son are making a line of new campaign novelties, being one of the pioneer firms in this line of business.

George B. Champlin, of the S. B. Champlin Co., and his son G. S. Champlin, returned last week from a Summer spent in England and on the Continent.

At the meeting of the Common Council last week Councilman William A. Schofield, of Schofield, Battey & Co., distributed attractive campaign buttons of both sides.

Frank P. Boland has just returned from a successful trip to Philadelphia, Baltimore and Washington for Herbert J. Astle & Co. The interests of their jewelry mechanical department.

The monthly meeting of the directors of the Manufacturing Jewelers' Board of Providence was held in their rooms on Friday afternoon, but nothing except routine business was transacted.

At the fifth annual meeting of the stockholders of the River View Improvement Association, held Monday evening, Charles Kettlety, of the Marden & Kettlety Co., was re-elected secretary.

Tingley Wall, accompanied by his wife, daughters and son, arrived in New York on the *Oceanic* last Wednesday and reached his home in this city that night after a delightful trip abroad.

The Wolcott Mfg. Co. has taken in the shop room formerly occupied by the E. A. Potter Co., increasing its floor space by 3,000 square feet. The plant at 71 Peck St. is being increased and improved.

Charles W. Brigham, of this city, who sometime past has been employed as a designer in North Attleboro jewelry con-

cern, was married last week Saturday and is now on his honeymoon in New York.

In the Sixth District Court, Civil Division, last Thursday before Judge Rueckert, the case of William Loeb against the American Mercantile Co. was called and judgment entered for the plaintiff for \$21.60 and costs.

Among last week's importations at the Providence Custom House were four packages of imitation precious stones from Bremen; five packages of decorated china from Hamburg and 10 packages of clocks from Liverpool.

C. R. Hendrickson, for several years foreman at the silverware manufactory of the Manchester Mfg. Co., has severed his connection with that concern having become a partner in the new Sterling Silver Mfg. Co., which is starting business at 150 Chestnut St.

A slight fire occurred about 7 o'clock Sunday morning in the shop on the third floor of the building at 299 Weybosset St., occupied by W. M. Baker, die sinker and A. H. Anthony, tool maker. The fire started near a forge and caused about \$150 damage.

Maxy W. Potter, traveling salesman for J. M. Fisher & Co., Attleboro, was robbed of \$75 last week while waiting for his train in the railroad station in this city. Mr. Potter was on his way home from a western trip and was in a large crowd that surged towards the gates when they opened at which time his pocket was picked.

Conley & Straight have been making additions and improvements at the refinery, 236 Eddy St. The building in the rear of their plant has been so altered that an additional floor has been gained. New elevators have been installed and all the chimneys overhauled. The building was used as an arsenal in the Dorr war in 1842.

Among the buyers in town the past week were the following: Herman Pichel, of Samstag & Hilder Bros., New York; W. Barrett Shaw, of "The Fair," Chicago; Joseph Daniels, of Hub Jewelry & Novelty Co., Boston; Albert Kunstader, of Kunstader Bros., Chicago; Harry Bodek, of W. Bodek Co., Philadelphia, and E. Rothschild, Chicago.

Charles Fletcher, Sergeant in the First Machine Gun Battery of the Rhode Island National Guard, is the winner of the handsome silver loving cup offered as an annual trophy by Brig. Gen. Herbert S. Tanner, the Westminster St. jeweler, to the best revolver shot in the State militia. Mr. Fletcher is one of the best known journeymen jewelers in the city.

At the weekly meeting of the advisory committee of the New England Manufacturing Jewelers and Silversmith's Association, held Thursday afternoon the report of the committee on the new stamping laws of Canada was finally considered and a copy of the law and of the report will be sent to all manufacturing jewelers in this vicinity as soon as they come from the printers.

The employes of Clark & Coombs held their second annual outing at Emery Park Saturday afternoon, the party numbering about 60. The grounds were reached during the forenoon and after lunch games were participated in, the bake being served at 4 o'clock. The guests of the day included

William Clark and Arthur I. Clark, of the firm, and several others. The committee in charge of the day's programme included William J. Reed (chairman), Charles Gallagher (secretary), and John McLaughlin (treasurer.).

The jewelry and celluloid comb manufacturing establishment of J. Keppler and Isaac Marks, 165 Somerset St., was badly damaged by fire that broke out shortly after midnight Friday. The loss to the stock will be considerable, the blaze having a good start before its discovery. The blaze started on the second floor and had burnt through the roof before it was gotten under control. There was no insurance on building or stock, it was stated, the insurance companies refusing to take the risk owing to the inflammable nature of the product.

After a lapse of several years the employes of Henry A. Kirby held an outing at Warwick Club Saturday afternoon as the guests of the firm. It was made more than usually interesting from the fact that nearly every employe was present, while the head of the concern was also in attendance. Fully 200 of the male and female employes were down to the club grounds in the early afternoon and ate clams and participated in sports and games until sunset drove them back to the city. The affair was a shop event pure and simple, the only guest outside of the shop being THE CIRCULAR-WEEKLY correspondent. The ride to the club grounds was made in two chartered cars, the party making the run to Grant's station, named in honor of the late "Nat" Grant, an old-time manufacturing jeweler, for the remainder of the day. Upon arriving at the grounds a lunch was served and after various sittings for photographs the games were in order. The fact that the day was the 20th anniversary of Charles Kackson's service with the firm was made the occasion of an informal census of those present, by which it was found that there were four others who had been with the firm for that period of years. These were Superintendent Albert H. Cushman, Fred Felker, John Carroll and Walter Hatch. After the regular clambake with seasonal accessories, favors in the shape of cigars to the men, and boxes of chocolates to the women were distributed with the compliments of Mr. Kirby, and then came the presentation of the prizes to the winners of the several sporting events. These were solid gold scarf pins for the men and brooches to the women, presented by the firm. Dancing was indulged in until late in the evening. A vote of thanks was extended to Mr. Kirby, for whom three hearty cheers were also given with a vim.

The *Lokal Anzeiger* has been interviewing a Berlin gem expert, who throws heartlessly cold water upon the fatherland's hopes of putting Kimberley out of business, as far as the new diamond fields in German South Africa are concerned. He points out the fact that the German diamonds were found in quicksand and not deep down in mines. He is inclined to think they got there by accident. The stones so far discovered are small, none weighing so much as a single carat. "Wait and remain pessimistic," is the gem expert's cheerless advice to his would-be jubilant countrymen.

## Indianapolis.

Asher W. Gray, of Gray, Gribben & G. has returned home after a 10 days' trip to Lake Manitou with his family.

Charles Murphy, employed in the Meriden St. store of Geo. S. Kern, is on week for a two weeks' vacation.

Leo Markowitz, of the I. Grohs' Jew Co., has gone to Texas on a business and will likely remain until just before holidays.

The Guarantee Jewelry Co. has succeeded the Lucios Diamond Co., at 43 W. Winton St., and will continue to make a specialty of imitation diamond jewelry.

Charles Mayer & Co. supplied 11 trophy cups to the Indiana Lawn Tennis Association to be given as prizes at annual tournament held in this city a few days ago.

After a three months' tour of Europe Mr. and Mrs. Chris. Bernloehr sailed for Bremen, Sept. 15. They will visit Winton and other eastern cities before returning home.

It has been decided not to hold a meeting of the Indianapolis Retail Jewelers' Association until Monday evening, Oct. 7. The September meeting was postponed as a result of Labor Day.

The trial of Albert Roubick, charged with the murder of Emil Kvasnicka, Chicago, at his Summer home near North Judson, will be held in the Starke County court room next month.

Joseph Reagan, manager of the Paid Miller Co., attended the recent meeting of the National Wholesale Jewelers' Association, his firm being the only local member of the association.

J. P. Mullally was in Chicago, last week, where he attended a banquet given to the supreme officers of the American Order of Owls, of which Mr. Mullally is supreme vice-president.

During the two days' race meet held at the State Fair Grounds, last week, by the Indianapolis Automobile Trade Association, Horace Comstock, Gus Craft, Carl W. Fred Herron and Geo. S. Kern, all acted as official timers.

Miss Lucy Kuntz, Madison, a travel representative, was held by the police in Urbana, O., one day last week. She had tried to sell a diamond brooch to a jeweler. She soon satisfied the police she was honestly employed and they quickly released her.

Gray, Gribben & Gray, who have their business at 35 N. Illinois St., for some time will conduct two retail stores after Oct. 1 when their present lease expires. A new store has been rented on Massachusetts St. and will be opened as soon as necessary alterations can be made, and the stock fixtures installed. The company has decided whether to renew the lease on the present building for another year or to move to a new location, although it rather favors the latter plan. The firm is composed of Asher W. Gray, A. R. Gray and David Gribben, and has enjoyed a large trade for several years.

O. J. Fryklund & Son, Chicago, Minn., have opened a branch store in Minneapolis, with John Buskala in charge.

## Los Angeles.

o. H. Curry, S. Broadway, is taking  
urse in optics with Dr. Ketchum.

urry Seaman, salesman for H. F. Wal-  
has returned from a vacation spent  
ean Park.

s, Rochester, N. Y., is spending a few  
in this city.

L. Leartart has taken a position as  
facturing jeweler with S. B. Bailey,  
S. Broadway.

X Hirschfeld has now taken full  
ge of the department of watch repair-  
or the trade with H. F. Wallace.

L. Lion, formerly of Evanston, Ill.,  
who has been in this city for a year  
is now with W. J. Getz, 557 S. Broad-

F. Kring, formerly doing a jewelry  
ss at 714 W. 3d St., has moved to  
orthwest corner of S. Flower and W.

S. Schwenck, salesman for H. F.  
e, wholesaler, 114½ S. Broadway, is  
g a vacation in the San Bernardino  
tains.

H. Schwarzkopf, of Schwarzkopf &  
man, recently returned from an ex-  
d business trip over the Pacific  
territory, as far north as Seattle  
is far east as Denver.

C. Abel, of the J. P. Trafton Co., is  
ted home soon from the extended busi-  
trip he has been making. A. Fink,  
e same company, came home a few  
ago and again started for another trip.  
anager Burger discontinued the auction  
T. B. Clark stock, 204 S. Broadway,  
t four days. The results were not  
as to warrant a continuance. It is  
probable that Mr. Clark may seek a  
vacation before long.

R. Baranger, formerly with the E. W.  
lds Co., this city, but who recently  
d a store at San Jacinto, has been  
ing several days in this city. He  
ht his wife to Pasadena for the pur-  
of having a serious surgical operation  
med.

Jewelry from neighboring towns who  
been in this city recently include: H.  
nton, Lompoc, Santa Barbara county;  
King, Redlands; Dr. Wilson, San  
Gem Co.; J. D. Morrow, Oceanside;  
Zilles, Pomona; H. H. Hooper, Whit-

nbright & Walsh have become the  
g agents for a Nevada turquoise min-  
company and are selling large quanti-  
of cut matrix turquoise to eastern  
manufacturers. Already orders are com-  
d more rapidly than the firm is able  
them.

J. Donovan & Co. already are in  
sion of their new store, 253 S. Spring  
formerly occupied by Montgomery.  
The time from now until Oct. 1 will  
ent in making ready the interior of  
store. On that date Mr. Donovan  
p to be able to open for business.

Werk on the new store of the H. J.  
ey Co. is going forward rapidly. The  
or front, as has already been stated,  
rely of marble. The ceiling is being  
eally decorated in the Byzantine style.  
diamond room and the watchmakers'

department have already been moved into  
the new store, and the other departments  
expect to occupy their new quarters before  
long.

S. Simmons, 315 S. Spring St., has re-  
turned from a vacation spent at Santa  
Catalina Island, where he had an especially  
enjoyable time fishing. While there, he  
caught a black bass which weighed 121  
pounds. He played the big fish in the  
water for two hours and a quarter before  
he succeeded in bringing him into the boat.  
The fish was placed on exhibition in one  
of the large markets in this city.

## Pacific Coast Notes.

Frank Silva, Novato, Cal., has added a  
jewelry department.

J. L. Marshall, Fullerton, Cal., has moved  
to the new Amerigo building, at that place.

W. D. Flagg, San Diego, has just opened  
a repair shop. He was formerly in River-  
side.

E. C. Reed, Riverside, has taken the  
place of Bert Ranch, in the store of Mrs.  
J. H. Hoever, Willow.

George W. Hill, Lodi, Cal., who has  
been visiting in the east for the past six  
weeks, has returned home again.

Mr. Kleinenbroich, Oakland, Cal., has  
just returned from a vacation spent at Los  
Angeles and the beach resorts in the vicin-  
ity of the southern city.

Visitors to the coast have been numerous  
of late. The following have been noted  
during the past week: J. F. Rothschild, E.  
H. Baker, Henry Agate, New York; Geo.  
Huet, Kansas City.

F. Willis Sharpe, Oakland, Cal., who at  
the present time is occupying a store at  
538 14th St., has secured a location one  
block nearer Broadway, and will move to  
487 14th St., within the present month.

Richard Jessop, of J. Jessop & Sons, San  
Diego, states that the exhibit of this firm  
at the State Fair won a gold medal and a  
\$20 prize. The collection of San Diego  
County gems was a fine one and attracted  
much favorable comment.

S. B. Clem, of the Redondo Gem Co.,  
Redondo, Cal., together with several others  
at that place, has made a complaint to the  
trustees of the town that persons are  
peddling polished moonstones on the beach  
without a license. Now that the officers  
are watching their operations, the offenders  
are resorting to new schemes to evade the  
law. One is to sell a bunch of unpolished  
stones, and throw in, for nothing, a pol-  
ished one, which is really the object of the  
buyer. Another is to show the gems to  
the tourists and then go with them out-  
side the town limits where the sale can be  
made.

One of the most daring thefts that has  
occurred in San Bernardino County, in  
many years, occurred last week, when tur-  
quoise gems, valued at \$5,000, were stolen  
from a cache in a shack at Wood & Co.'s  
gem mine, near Hart. Justice of the Peace  
Milton Munday, of Hart, had taken pos-  
session of the gems, which were to be  
shipped to New York. They had been  
cached several days ago, immediately after  
having been taken from the mine. Sus-  
picion points to three strangers who were  
in the neighborhood of the property, re-

cently, and two posses are in pursuit of  
the men. The gem property is supposed to  
be guarded at all times, but when the rob-  
bery was discovered the guard was found  
in a stupor. It is believed that knockout  
drops were given to him.

## San Francisco.

### TRADE CONDITIONS.

Business for the first week of September was  
considerably heavier than during the first week of  
August, and was but little short of the record of  
a year ago, which is acknowledged to have been  
exceptional. Judging the local business by the  
business of corresponding periods of the last five  
years it is asserted that a difference of more than  
10 per cent. could not be found. Rentals are very  
high at the present time, however, as are operating  
expenses.

Henry M. Abrams is now visiting his  
customers in the north. Mr. Innis is also  
away, and is covering the southern terri-  
tory successfully.

Mr. Hovey, representing J. B. Whitney  
& Co., is covering the northern territory,  
and is sending in more orders than at any  
time during the past year. Mr. Whitney  
has just returned from a vacation.

Edgar Yates, of the White House, states  
that the silverware department of that  
concern will be made a prominent feature  
of the new store now in course of con-  
struction at the corner of Sutter St. and  
Brant Ave. A full line of sterling silver  
will be added.

E. V. Saunders, of A. I. Hall & Son,  
has just returned from a hunting trip. The  
new quarters of this concern in the Jew-  
elers' building on Post St., are now finished  
and are the finest ever occupied by the  
firm. They now have more space than ever,  
with excellent light, a feature that was  
lacking in the store in the Kamm building.  
The cut glass department is especially note-  
worthy and many novelties for the holiday  
trade are now on exhibition.

Two firms, which recently opened down-  
town, the Keystone Jewelry Co. and Jacob  
Macowsky, have moved back to the sites  
occupied by them before the fire in the  
Phelan building, and both have stores far  
superior to the old ones. There is a ten-  
dency on the part of many shoppers to  
come to the old district to make their pur-  
chases, whenever possible, and the firms  
who have located here, even although they  
are in the midst of building activities, are  
doing as heavy a business as they had  
done previously on the avenue.

Alleging that a considerable sum of  
money obtained from valuable bullion re-  
covered from the ruins of the store of  
Hammersmith & Field, Kearny St., is due  
her, as the late Mr. Field's wife, Mrs.  
Blanche M. Field, has commenced suit  
against John A. Hammersmith. In her  
complaint she cites the fact that the molten  
gold, silver and other metals recovered  
from the store, was sold to the Selby  
Smelting Co. for \$2,914.50, and that one-  
half of this was due her. She claims that  
she has received \$830 from Mr. Hammer-  
smith, and sues for a balance of \$627.25.

M. G. Shirk, located in the Irwin drug  
store at Spearfish, S. Dak., has sold out to  
Frank Boss, late of Salt Lake City. Mr.  
Shirk will go to Albuquerque, N. Mex.

## Kansas City.

J. R. Mercer is home again, after an enjoyable vacation trip.

J. Donnell, with the Meyer Jewelry Co., has just returned from a two weeks' vacation.

O. L. Evans has resigned his position as shipping clerk for the C. B. Norton Jewelry Co.

It is reported here that A. W. Pierce has purchased the Geo. A. Parkins stock of jewelry in Ord, Nebr.

Jacob Bath, with the Meyer Jewelry Co., has been spending his vacation at his old home in Columbus, Kans.

E. B. Wiser, of the Porter & Wiser Jewelry Co., has been spending a couple of weeks at Excelsior Springs, Mo.

Mr. Thomas, formerly watchmaker for the Eaton & Pease Jewelry Co., is now in a similar position with Margolis & Metzger.

M. D. Benkowitz was recently married to Miss Blooma Silverman, St. Joseph, Mo. The couple are now at home at 814 E. 17th St.

Sam Shrack, of W. H. Shrack & Son, Pratt, Kans., was in this city last week with his mother, who is taking medical treatment here.

G. Hallouer, who has been doing watchmaking for the trade in the Altman building, will soon move to the fifth floor of the Missouri building.

Louis Jeanneret, who has been in the retail business here for several years, has accepted a situation as instructor in the Kansas City Polytechnic Institute.

H. S. Knapp, representative of the Shook Mfg. Co., Omaha, Nebr., was in this city last week, having stopped off on his way home from a successful Oklahoma trip.

Ed. Parnell, watchmaker for Margolis & Metzger, has resigned his position and gone to Lawrence, Kans., where he has taken a similar position with A. Marks.

Herbert Koppel, manager of the material department of the Meyer Jewelry Co., is away on a 10 days' vacation, which he and family are spending at Monegaw Springs.

J. H. Whitney, representing Edwards & Sloane Jewelry Co. in northern Kansas and Nebraska, was in the house, last week, and reports satisfactory conditions in that section.

Earl St. Hott, formerly with the C. B. Norton Jewelry Co., but now with the Chicago office of the American Oil & Supply Co., visited relatives and friends in this city last week.

Geo. H. Edwards, of the Edwards & Sloane Jewelry Co.; C. B. Norton and Ward Lewis, of the C. B. Norton Jewelry Co.; C. A. Kiger, of C. A. Kiger Co., and C. C. Hofer, of the Woodstock-Hofer Watch & Jewelry Co., were in Chicago last week attending the meeting of the jewelry jobbers.

The following out-of-town jewelers not elsewhere mentioned called on the local trade during the past week: S. J. Huey, Excelsior Springs, Mo.; Mr. Makepeace, with Walter Stareke, Junction City, Kans.; G. Phillips, Randall, Colo.; Percy Wilkins, Marceline, Mo.; W. F. Moser, LaCrosse, Kans.; A. G. House, Belton, Mo.; O. E. Morgan, with S. F. Rieker & Son, Emporia, Kans.; A. Y. Boswell, Tulsa, Okla.;

C. S. Poole, Joplin, Mo.; A. A. Marvin, Blue Rapids, Kans.; Mr. Morrison, of Morrison Bros., Olathe, Kans.; S. E. Howard, Hastings, Nebr.; J. S. Pfeiffer, Parsons, Kans.; L. Megede, Richmond, Mo.; H. E. Boughton, Eagle Grove, Ia.; S. J. Strickler, Salina, Kans.

## Minneapolis and St. Paul.

F. B. Hankinson now has charge of the repairing department of the Gittelsohn Jewelry Co., Minneapolis.

William M. Stone and wife, Minneapolis, who have been spending a vacation at Anandale, Minn., a famous Summer resort, have returned home.

Charles M. Thomsen, of the Birkhenhauer-Thomsen Co., Minneapolis, enjoyed a hunting trip, last week, in Big Stone County, on the western border of the State, in company with Will Olin, with Charles Olson & Co.

J. B. Hudson has bought a site on Nicollet Ave., between 8th and 9th Sts., Minneapolis, about three blocks further out from the present store, and is prepared for the uptown tendency of the retail center. Mr. Hudson does not expect to build upon the new site immediately, but may do so within a year or two.

The Minneapolis Credit Men's Association, an organization composed of the credit men of the various wholesale houses of every line, is taking a step to make known to their customers the aims and objects of the organization. It is proposed to explain the objects of keeping credits where they are sought to be placed, and the idea is that the retail trade may well utilize the same ideas in their own business to stimulate prompt payment on the part of customers. A number of articles have been prepared touching upon different phases of collections. The matter of credits with the retail trade is a point upon which many wholesalers in all the different lines are inclined to feel dissatisfied.

## Milwaukee.

Max Marcus, of Max Marcus & Co., Chicago, called upon the local trade last week.

Morris Silverberg, with Stein & Ellbogen, Chicago, called upon the Milwaukee trade, last week.

D. C. Nesler, of the Nesler-Mackenzie Co., Newark, and with offices at Chicago, called upon local jewelers, last week.

John Hampel and Benjamin Buelow, formerly connected with E. H. Warnke & Co., will soon open a new engraving establishment in the Merrill building.

Paul P. Sass, optician, Sank City, Wis., was a recent Milwaukee visitor. Mr. Sass is contemplating a change of location and is looking over the Wisconsin field.

Secretary Franklin Thomson, Herman Stecher and George Durner were among the number who attended the meeting of the board of directors of the Wisconsin Retail Jewelers' Association at Oshkosh on Sept. 17.

David Goldman, 330 Grove St., will open an extensive downtown branch store in the Caswell block, about Oct. 1, as soon as the new quarters are ready for occupancy. The new establishment will be located in the

heart of the downtown business section. Among the out-of-town jewelers who visited this city, last week, were: M. T. Peters, Mauston; J. B. Kimball, Waukegan; A. M. Conerus, Elroy; F. H. Coburn, Troy; G. Franke, Ncosho; E. Ellis, Forest; E. L. Petersen, Plymouth, and J. Graff, Boscobel.

Bert Davis, colored, who was arrested the charge of burglarizing Milwaukee jewelry stores, last July, has been sentenced to 10 years at hard labor by Judge Br. On the night of July 12, some one threw a huge stone through the display window of the store of E. J. Rohn and made away with about \$300 worth of gold watch stick pins and brooches. The establishment of W. & E. Schmidt was robbed in the same manner of about \$100 worth of jewelry and an unsuccessful attempt was made to loot the store of Gross & Saxe.

## Toledo.

Mr. Bingaman, of Bingaman & Co., Cincinnati, O., spent some time in Toledo last week.

Elias Gross, of the M. Judd Co., left, the early part of next week, on a fishing trip through Michigan.

The M. Judd Co. reports the loss of a souvenir spoon business in its history during the G. A. R. encampment two weeks ago.

H. O. Wallace, an old retired jeweler in Chicago, visited friends in Toledo last week, as did J. A. Cooper, a souvenir engraver.

Robert Nelson, general manager of a wholesale jewelry firm which bore his name but which failed some time ago, is traveling for a varnish firm.

Joseph Teipel, for many years an umbrella dealer on Adams and Summit is suffering from a nervous breakdown and has gone to Oak Grove Summit, Flint, Mich.

H. L. Richards, with Fessenden & who called on members of the local trade last week, while here was suffering from such a severe cold that he contemplated giving up his present trip until he could be well.

Hull Bros., umbrella manufacturer, putting on a larger force of traveling men and are anticipating a great increase in trade this Fall. They have just taken more floor space, and now have the largest umbrella plant in northern Ohio.

## St. Louis.

E. Markley, Marianna, Ark., accompanied by his wife, has been visiting in this city.

Joseph Auer, of the Bauman-Messerschmidt Jewelry Co., who has been laid up for some time with a sprained ankle, is again expected to be about.

The engagement of Miss Bernice, daughter of Marcus Bernheimer, to Mr. Bauman, president of the L. Bauman & Sons Jewelry Co., has been announced.

Among the out-of-town jewelers who visited this city, last week, were: N. A. Childs, Montas, Ark.; J. H. Smythe, Ft. Smith, Ark.; Mr. Bransford, of Bransford & Andrews, Union City, Tenn.; J. C. Farr, Russellville, Ark., and W. K. Urban, Dallas, Ill.

## Cincinnati.

John Hansen and daughter, of Washington, D. C., were recent visitors to D. Gruen, S. & Co.

J. S. P. Oskamp, of the Oskamp Jewelry Co., and family are home from a Summer sojourn in northern Minnesota.

K. Bingham, of Bingham & Co., has been on a two weeks' outing, including West Point, Ind., and Detroit, Mich.

Loeb, of Herman & Loeb, has returned from an extended western trip and reports business there is improving.

B. Mahlenkamp, formerly connected with the John Shillito Co. here, has become agent for the John Holland Gold Pen

mes D. Carr, of the B. H. Stief Jewelry Co., Nashville, Tenn., called on friends on his return home from the east last

Henry Hahn, formerly of Henry Hahn Co., is home from a northern trip, and is now arranging to leave for California in December.

Gar Fox, of Lindenberg & Fox, left last week, for Chicago on business. "Joe" Rabinbaum, of this house, will visit the trade this week.

Le Schlenker, Eaton, O., has connected himself with the Burnett Jewelry Co. at Shelbyville, Ky. His father will conduct business at Eaton.

E. Richter and George Heisel, of Richter & Phillips, attended the opening of the retail jewelry store of Herman E. Runtz, Van Wert, O., Sept. 15.

Miss Irma Peck, daughter of "Sam" Peck, of Peck, Schmeier & Peck, was married Sept. 16, to Max Block. The marriage took place at the St. Nicholas Hotel.

B. Jacobs, of D. Jacobs & Co., is making an extended western trip. Mrs. Henrietta D. Jacobs, widow of the late D. Jacobs, of this house, and her daughter, are home from a four months' stay abroad.

The Miller Jewelry Co. has secured the contract to make 5,000 Knights Templar senior emblems for the conclave to be held here Oct. 13-14-15, when it is expected there will be a large number of visiting jewelers.

Out-of-town jewelers who purchased stock here during the past week included: M. Clements, with W. T. Newton, Knoxville, Tenn.; L. C. Diefenbaugh, Lewisburg, O.; L. C. Eveslage, Ripley, O.; C. P. Sigler, Vienna, O.; W. W. Roberts, Nicholasville, Ky., and C. A. Gossard, Washington Court House, O.

A party consisting of Joseph Noterman, Joseph Noterman & Co.; Eli Gutmann, E. Gutmann & Sons; A. J. Thoma, of Thoma Bros.; A. G. Schwab, of A. G. Schwab & Sons, and S. Lindenberg, of Lindenberg, Strauss & Co., have returned from Chicago, where they attended the meeting of the national jobbers' association.

Alph Kaplan, jeweler at 505 W. Sixth Street, reports he has a clue to the man who swindled him out of \$75 worth of watches, Sept. 13, by the "switch trick." A stranger entered Kaplan's store on this day and made arrangements with the jeweler to purchase watches. He agreed to deposit \$75 for the watches which he was to sell, and handed Mr. Kaplan a roll of bills which,

when counted, proved to be but \$74. The stranger then counted it, handed the jeweler the roll with one dollar added, and as the jeweler was counting this the stranger disappeared. The last roll handed the jeweler contained 10 one-dollar bills.

## Denver.

A. Rapin, Central City, was here for a few days, last week, on business.

William P. Jones, Fort Lupton, was in this city, last week, making Fall purchases.

E. D. Carter, Laramie, Wyo., was in this city, for a few days last week, buying stock.

W. W. Hamilton, of the Hamilton Jewelry Co., left last week for New York on a purchasing trip.

Mr. Hawkins, of the Edward Lehman Jewelry Co., left, last week, on a trip around the Horn.

L. E. Gardner, Longmont, was in this city for a few days, last week, laying in a Fall supply of stock.

Sam Park, of the Boyd Park Jewelry Co., Salt Lake City, has been on the sick list for the past week.

John W. Clark, who has been in the jewelry business here for a number of years, has moved to 1663 Champa St.

S. Spitz, Santa Fe, N. Mex., was in this city, last week, with his daughter, on his way east to buy goods for his Fall trade.

Mr. Jacoby, of the Edward Lehman Jewelry Co., left, last week, on a trip through Wyoming, Utah and the western part of Colorado.

Harry Decker, of the Empire Cut Glass Co., was here, for a few days last week, in company with his family, on their way to the coast.

Edward Lehman, of the Edward Lehman Jewelry Co., left Sept. 14 for Chicago, to attend the convention of the National Jewelers' Association.

Mr. Crocker, of Cunningham & Crocker, Silverton, Colo., and N. N. McLean, Lamar, Colo., were in this city as delegates to the Republican State Convention, last week.

The Denver Competitive Chorus, last week, presented Henry Housley with a beautiful gold watch and a 32-degree charm, appropriately engraved. These articles were furnished by the Syman Bros. Jewelry Co.

George L. Strawman, formerly of Denver, who has been engaged the last three years in Nome, Alaska, in the jewelry business, was in this city, for a few days, last week. Mr. Strawman sold out his business in Nome, and came through here on his way to Canon City, where he will visit his parents.

Jos. Hamilton has left on a trip to the southwest. Mr. Hamilton, who travels for the W. W. Hamilton Jewelry Co., will visit all the southwestern States and come back by way of El Paso, Tex. Mr. Bentz, of the same firm, left, last week, on an extended northwestern trip. He will go as far west as Seattle.

The Fox River Valley Jewelers' Club, organized by the jewelers of Green Bay, Appleton, Neenah, Oshkosh, Fond du Lac and Berlin, Wis., held a meeting Sept. 17, in Oshkosh, Wis.

## Harrisburg, Pa.

The York Manufacturers' Association is in correspondence with a Meadville (Pa.) jewelry manufacturing concern which seeks to locate in that city.

Patrick Mangan has been jailed at Wilkes-Barre charged with assaulting and robbing Adolph Webber, an aged watch and jewelry peddler of Sheppton, Pa.

John P. Hecker, of this city, who was, last week, sentenced at Lancaster to six years in the Eastern Penitentiary for forging a check and passing it on W. W. Appel, is known to the police of this city and only recently finished a three-year term in the Auburn (N. Y.) prison.

The local police have located at Youngstown, O., Daniel Buegeleisen, who will be brought here to answer charges of forgery preferred by several firms of pawnbrokers and jewelers upon whom he passed worthless checks for various amounts, all signed "A. D. Buegeleisen," whom he said was his father. The young man is also wanted in New York for similar offenses.

Mrs. Alice Kelly and her son William and William Smith, of Johnstown, were, last week, acquitted of burglary and receiving stolen goods. The case grew out of the theft of \$150 worth of goods from the store of Cramer Bros. at Cramer, Pa., some weeks ago, and the subsequent discovery of jewelry, etc., in a house occupied by Mrs. Kelly. The latter testified that the articles found in her home were left there by her son who, she stated, was a traveling salesman for a jewelry firm.

Daniel Drawbaugh, the aged inventor of Eberly's Mills, about six miles from this city, who claims to be the original inventor of the telephone, was here last week, exhibiting a time transit which he says will revolutionize the setting of clocks and watches accurately. He claims that climatic conditions will not affect it. The transit is a combination of the sundial and the compass in a circular box, and is no more cumbersome than the average watch. In use the magnetic needle is set at the "noon" point. The time is indicated by a lens throwing the sun's rays in prismatic colors on the dial.

## Last Week's New York Arrivals.

ATLANTA, GA., A. K. Hawkes (A. K. Hawkes Co.), Plaza.

AUGUSTA, GA., Wm. Schweigert (Wm. Schweigert & Co.), Marlboro.

BALTIMORE, MD., J. W. Putts (J. W. Putts Co.), Albert.

CANTON, O., W. H. Deuble, Astor House.

CHICAGO, W. M. Lewald (F. Lewald & Co.), Park Ave.

CUMBERLAND, MD., Walter Powell (W. Powell & Sons Co.), St. Denis.

DETROIT, MICH., A. Black (L. Black Co.), Knickerbocker.

LOUISVILLE, KY., B. F. Rodgers (Rodgers & Krull), Hotel Astor.

NORTH TONAWANDA, N. Y., E. A. Koetsch, St. Denis.

PITTSBURGH, PA., P. C. Gillespie (Gillespie Bros.), Breslin.

SELMA, ALA., J. Hirschfield, Gilsey.

ST. LOUIS, MO., G. King (Mermod, Jaccard & King Jewelry Co.), Plaza.

W. E. Friton (Friton Bros.), St. Denis.

WASHINGTON, D. C., A. Rosenthal (M. Goldenberg), Grand; 65 Bleecker St.

WATERBURY, CONN., A. K. Burnham (Reid & Hughes Dry Goods Co.), 75 Spring St.

ZANESVILLE, O., O. A. Bauer (Bauer Bros.), Herald Sq.

Definition of a Battleship:

# "A MACHINE TO FIGHT BATTLES WITH"

We do not require a Battleship; our battles HAVE BEEN WON; the constant increase of our business attests to the veracity of our statement.

**Attleboro.**

L. Thurber & Co. have decided to manufacture a line of jewelry. The W. N. Harrington Co. is now located in the Hayward building.

Mr. Emerson left, last week, for the west with the samples of S. O. Bigney & Co. class in jewelry designing will be held in the Y. M. C. A. rooms, Oct. 7.

H. Lyons, of C. D. Lyons & Co., an interesting address recently before Mansfield Board of Trade.

Edward, Charette & Menard Co., now located in the old Steam Power building, obtained a location on West St.

George D. E. Makepeace Co. has been ordered to work overtime, and several departments of the Horton-Angell Co. have been working extra hours.

John D. Spaulding, son of D. S. Spaulding, the Mansfield manufacturing jeweler, secretly married in New York, last week, to Miss Huldah D. Wellington. The groom is a senior at the Tufts Medical School.

John H. Gow, eastern representative of the Standard Button Co., was relieved of a great deal and some personal effects recently.

A fire in the New York hotel. His room was destroyed. The loss was made good by the hotel proprietor.

It was reported, last week, that John H. Marsh, of C. A. Marsh & Co., had been killed in the west. At the factory it is believed that they were not aware of the fact.

That as much as Mr. Marsh is making regular calls the report was not credited.

A new electric road from Attleboro to Bridgewater via South Attleboro has been opened to the public.

Edward A. Sweeney, Robert S. Horton, Thomas E. McCaffery, James E. Blake, William F. Maintien and James F. Blake were special guests on the train to go over the road last Wednesday.

Roy Webber, a well-known local jeweler, was badly hurt in an accident at a Bridgewater jewelry shop last Monday.

Webber was fooling with a fellow employee during the noon hour. During a wrestling match he was thrown heavily to the floor sustaining concussion of the brain. He is recovering.

A jewelry shop bowling league was organized Thursday evening. The tournament was held Monday.

The shops represented in the league are: Standard Button Co., R. J. Ammons Co., C. A. Marsh & Co., W. E. Richards Co., Austin & Stone, Horton-Angell Co., Attleboro Chain Co., Bristol Jewelry Co., Bates & Bacon, and R. B. Macomber & Co.

**North Attleboro.**

John F. Sturdy is reported ill at his home in Attleboro Falls.

James P. Black left, this week, on an extended trip through Maine.

William Metcalfe has returned from a business trip for the Plainville Stock Co.

William Peckham, eastern representative of H. Peckham & Co., was in town over the week-end.

Ed M. Cook, New York representative of Whiting & Davis, was at the factory over the week-end.

Walter C. Sherman returned, Sunday,

from a western trip in the interests of the Estate of O. M. Draper.

Woodbury Melcher has returned from a business trip through the west in the interests of Scofield, Melcher & Scofield.

Elmer E. Rockwood returned, Thursday, from a six weeks' trip through New England in the interests of A. H. Bliss & Co.

Ross Whitmarsh, bookkeeper for the George L. Paine Co. for several years, has resigned his position to become foreman for Boss & Baldwin.

Joseph F. Kivlin, who has been head shipping clerk for the W. & S. Blackinton Co. for the past six years, has resigned and is to enter Brown University to-day.

John E. Tweedy has declined to become a candidate for representative because of the inability to arrange his business affairs to permit his filling the place. He therefore, early last week, declined the town committee endorsement.

Charles Stanley, eastern and New York representative of the Estate of O. M. Draper, was at the factory, last week. A new room has been added to the factory which will be used as a private office by Dr. Hall, who is having it handsomely fitted up for this purpose.

Receiver Charles G. Bancroft, of the Jewelers' National Bank, was able to collect from a large manufacturing concern, last week, \$43,000 that was owing the bank and was the remainder of amount due for notes discounted by the late cashier, Frederick E. Sargeant. Another dividend is expected soon.

The Boss & Baldwin Mfg. Co., Attleboro Falls, is making extensive improvements to its factory on Mt. Hope St. The lower floor is being thoroughly renovated. When finished it will be used for the business office, packing room and a small part for bench hands. On the second story will be the stock room and main factory.

**Utica.**

C. C. Yorke, professional crook, who flim-flammed George A. Schilling, jeweler, at Oswego, out of a watch, was immediately rearrested after serving a six months' sentence. He is wanted in Watertown and other places upon complaints of jewelers.

The suit of the International Time Recording Co. against the Day Time Register Co., Syracuse, and others, was recently announced as settled. The litigation involved rights under letters patent claimed by the plaintiff company. The case has been in the courts for over four years.

It was reported from Syracuse recently that General Sam Pearson, mining engineer and veteran of the Boer War, recently came to that city to investigate the dikes on James St. Hill, to see if the so-called "blue ground" which has been found in Syracuse was likely to be of a diamond-bearing character.

Abelson & Liberman, wholesale jewelers, in the Martin building, have bought the old Seward property at 326 Bleeker St., and plans have been prepared for a fine new building on this site. Work will be started next month. The building will be three stories high, 50 feet wide, and 76 feet deep. There will be a large double store on the first floor, while the upper floors will be

used for storage purposes. Abelson & Liberman will remain in the Marton building on Genesee St.

**Boston.**

**TRADE CONDITIONS.**

The past week has been signalized by the advent of a much larger number of traveling salesmen in the city than usual, and orders placed were of fair amount, considering the general situation, showing that stocks have been reduced considerably, despite the effects of the trade depression. Many jobbers expressed the opinion that business is working up gradually to a normal level, and they are quite hopeful of further gains after the election and at a more rapid rate. Retail trade has shown some expansion since the month began.

Mrs. Nelson H. Brown returns this week from a six weeks' vacation at Head Tide, Me.

The marriage of George E. Phillips, who is with the clock establishment of Nelson H. Brown, to Miss Fitzgerald, of the Dorchester district, is announced to take place to-day.

John Brown Sias, of Salem, who claims the distinction of having invented the first practical time lock, celebrated the 89th anniversary of his birth, Sept. 15, at his home in that city.

Robert Hutchinson, head watchmaker with George W. Hazen, City Hall Ave., has built in his spare time a handsome 18-foot motor boat, at his home in Everett, which was successfully launched a few days ago.

E. A. Cowan has presented to the New England Watchmakers' Club a fine roll top work bench for the headquarters of the association on Bromfield St. The club is also the recipient of a lathe, the gift of the American Watch Tool Co., of Waltham.

The Boston Jewelers' Band, which was organized several months ago under the management of Eugene W. Rollins, and is composed almost wholly of musicians in the jewelry trade of Boston and vicinity, will give three entertainments in suburban cities in October.

Buyers in town during the week included: C. A. Senter, Brockton; Thomas Margetts, Hingham; Jacob Hirschhoff, Lawrence; A. B. Chapin, Worcester; Mr. Avery, of Avery & Woodbury, Milford, Mass.; J. M. Johnson, Sanford; William Senter, Portland, Me.; W. H. Story, Hillsboro, N. H.

The annual outing of the Boston Jewelers' Club was scheduled to take place yesterday. The program included an automobile run from the Hotel Somerset, starting at 4 P. M., to Point Shirley Clubhouse, with a banquet on arrival at Point Shirley, upward of 75 members participating.

George A. Carpenter, one of the principal owners of the Jewelers' building and Boston manager for the Crescent and other watch case companies, is having an 11-story building constructed at the corner of Washington St. and Temple Pl., which will be one of the finest structures in the retail shopping district. On account of the large area and extensive character of the building operations, considerable inconvenience has been caused storekeepers and shoppers in the vicinity of the site. Last week a protest against the blockades occasioned was filed with the street department, and some changes in the methods of construction have been agreed to by Mr. Carpenter. He hopes to have it completed by March next.

## Pittsburg.

Charles M. Roberts spent last week at Cambridge Springs.

M. Bonn & Co. last week contributed \$50 to the sesqui-centennial fund.

Phillip C. Gillespie, of Gillespie Bros., is in New York, buying stock for the Fall trade.

J. Alexander Hardy went to New York, last week, to buy stock for the Fall and Christmas trades.

Charles T. Ahlborn was in Pittsburg last week as the representative of Lebkuecher & Co. He was formerly a Pittsburger.

A. L. Stephenson, of the Marsh, Brown & Mather Co., after spending but a week of his vacation, was summoned to serve a two weeks' term on the jury and began his duty in court on Monday.

The three stores of the bankrupt Pittsburg Watch Co., which were to have been sold last Tuesday by the receiver, Benjamin Biggard, at public sale, were offered for sale on Monday.

Joseph Beach, who travels for the Derby Silver Co., Meriden, Conn., was called home from Pittsburg last week, because of the death of his father. The announcement was a great shock to him.

A number of jewelers have discovered that the placing of screen doors in the doorway of their places of business helps to keep out the dust. Some, however, do not like the idea of screens, as, in their opinion, it detracts from the beauty of the interior of their establishments.

Albert York Smith, receiver for Edward F. Stewart, who recently filed a petition in bankruptcy, giving his liabilities as \$3,918.61, with assets amounting to \$1,988.75, will, on Saturday, Sept. 26, offer the bankrupt's stock at public auction. Stewart's place of business is at 4303 Butler St.

Brush & Brickley is the name of a new firm which has opened up for business at 6108 Penn Ave., in the East End section of Pittsburg, rapidly growing as a commercial center. The senior member of the firm, Clarence C. Brush, was formerly identified with the Hardy & Hayes Co. The firm has installed a high class line of jewelry and art.

A new wholesale house is being opened in Pittsburg, the firm to be known as Parns & Fassbery. They have secured a location at 801 Penn Ave. Both members of the firm formerly were engaged in the produce commission business in this city. It is stated that they will surround themselves with competent men who know the business.

George P. Christy, of West, White & Christy, trustee for J. F. Murphy, of Dawson, Pa., says that the appraisal of Murphy's stock and property shows it is worth about \$8,000. His liabilities are \$15,048.46. His petition in bankruptcy placed his assets at \$13,116.55. Mr. Christy is holding down the expense so that every cent possible will be realized from the estate.

There has been no change in the condition of the affairs of the failed Cosmopolitan National Bank, which was closed by order of the comptroller of the currency, except that the comptroller says that the local bank examiner was justified in closing the bank's doors, since a further investi-

gation has been made. Several jewelers are interested. There are indications that the bank will soon liquidate its affairs.

Sam F. Sipe is chairman of the publicity committee of the Pittsburg "trade boomers," who last week toured western Pennsylvania, eastern Ohio, and a portion of West Virginia in search of trade. The trade enthusiasts made the tour in a private train of Pullmans, and it was a most successful trip, the merchants everywhere being given hearty receptions by committees at the various towns visited and organized for that purpose. The trip was made under the auspices of the Pittsburg Chamber of Commerce.

The will of George M. Reed, late of J. R. Reed & Co., was filed for probate last week in the office of the register of wills. It was in the shape of a memorandum, written in lead pencil on a half sheet of unruled paper, and provided that an estate valued at \$49,000 shall be equally divided between his three children, D. Templeton, J. Allison and Carrie M. Reed. This disposition of the estate is in accordance with the forecast in the last issue of THE CIRCULAR-WEEKLY. The affairs of the firm will be carried on just as usual.

Pittsburg's sesqui-centennial will begin Sunday, and the jewelers throughout Greater Pittsburg are preparing for it. All of the local dealers will decorate their establishments. J. Alexander Hardy is chairman of one of the committees having charge of the celebration, and unless present plans fail, the jewelers of Pittsburg intend to combine and have a float in the parade, symbolic of their interests, with no suggestion of advertising. The John M. Roberts & Son Co. expect to have a brilliant electric display in front of their establishment, while other jewelers are figuring on decorations out of the ordinary. The event is planned in honor of the 150th anniversary of the naming of the city, and thousands of strangers and former residents will come here next week to celebrate "The Old Home Week" event. It will be the biggest affair in Pittsburg's history. The jewelers, along with other merchants, probably will close their stores during the period of the parade, which takes place next Thursday, and which is to be participated in by many thousands, representing every trade in the city. The civic part of it will be exceptionally beautiful.

## Atlanta, Ga.

George B. Wood, of this city, has decided to go to Athens and will locate his optical business in that town.

Word has come from Wayeross to the effect that G. R. Youmans, J. M. Bell, C. M. Sweat and L. A. Wilson have made application for a charter for the Youmans Jewelry Co., with a capital stock of \$5,000. The company will carry on a wholesale as well as retail business, with its principal office in Wayeross, where Mr. Youmans has been for the past 20 years, and will extend its jobbing business to cover the States of Georgia, Florida, Alabama and the Carolinas.

Charles E. Gray, Dayton, O., has been adjudged insane and committed to the Dayton State Hospital.

## Connecticut.

Walter Camp acted as coach for the football candidates during a practice held one day last week in New Haven.

Wm. E. Sessions, Bristol, at the Republican convention in New Haven selected to head the list of presidential electors.

The hearing which was to have been in the Superior Court in Waterbury, Tuesday, on the bankrupt estate of S. Hart, 25 Grand St., Waterbury, was postponed until to-morrow, Sept. 24.

The Waterbury Clock Co. Waterbury is drawing up plans for the erection of a large addition to its plant. The new factory will be five stories high, of construction, and 40 by 175 feet.

The members of the Hartford Business Men's Association held a meeting in their rooms, last week, after an interval of three months. The meeting was called order by President Harvey, of Hart Lewis, of that place.

Harry Smith, who was recently taken into custody, accused of breaking into establishments in South Norwalk, including the retail jewelry store of Abe Taft at that place, has pleaded guilty. The court reserved his decision.

George M. Wallace, son of the late R. Wallace, of R. Wallace & Sons Mfg. Co., Wallingford, returned to town for the first time last week, after having spent the summer at the seashore in Maine. Mr. Wallace's health is much improved.

A number of prominent citizens of Wallingford met on Monday evening, last week, in the office of Supt. C. S. Marston, the Town Hall, and formed the Wallingford Entertainment Committee. C. H. Tibbits, well known in the trade as an elected vice-president.

W. A. Starkey, for several years employed by the American Silver Co., in Wallingford, died Sept. 15, in Southington, Conn. Death was caused by Bright's disease. The deceased had lived for 75 years in Middletown, where he was employed by the Middletown Silver Co.

An alarm of fire from the premises of the New Haven Clock Co., New Haven, about 9.30 on Monday night, of last week, brought into quick use the automatic fire fighting service by which the flames were extinguished before any serious damage was done. A small blaze, which started in a japanning room, was discovered by time by the night watchman.

The Wallace Hose Co., of the R. Wallace & Sons Mfg. Co., Wallingford, held its annual meeting, held on Tuesday evening of last week, elected the following officers and committees: Fireman, Thomas Downey; first assistant, Robert Newcomb; second assistant, Wm. S. Fogarty; treasurer, Harry Schomberg, Jr.; secretary, Hogan; steward, James A. Downey. The property committee consists of B. B. James, James A. Downey and Charles K. James Leonard, G. C. Rundle and J. were appointed fire police.

John W. Fraser, Wimpick, Me., has constructed an attractive building on a site occupied by his old store, which was destroyed by fire, a short time ago. The new structure is of brick.

**A** GENTLEMAN of thoroughly wide experience and fully acquainted with the needs of the jewelry trade of the United States, as salesman, designer and manufacturer, intends to open a European office, in Paris, to represent American firms in the purchase of foreign novelties in jewelry, art goods, bric-a-brac and kindred lines.

Correspondence in this direction is solicited from concerns not represented who wish to be thoroughly informed as to the markets, and others who wish to intrust special commissions to a competent resident buyer.

References and assurances of capability as to knowledge of languages and foreign markets, etc., without question, will be submitted.

PARIS, care of Jewelers' Circular-Weekly.

**AMERICA'S LEADING JEWELRY AUCTIONEER**

# JAMES L. HAND

**14 Maiden Lane**

**NEW YORK**

Are you considering an auction sale? Then write me and I will mail you my booklet on auctions. It will tell you of "The Hand Way," the right way to conduct a sale. The way that has made me famous as the seller of the largest and finest jewelry stocks of this country and Canada. It is not my policy to "knock" other auctioneers. Many of them are men of character and high standing, but these are the days of young men and modern methods, even in auctioneering. The most successful business men in every line appreciate that. They intrust young men with original ideas, with the most important business interests.

I conducted the largest auction sale of high class jewelry ever held in the United States with great success.

I will, on request, give you the names of every jeweler whom I have ever sold for and invite you to write him as to the result of his sale and the after-effect on his business.

I refer you to the largest wholesalers and manufacturers in the jewelry trade. They will tell you of my ability.

I sell without misrepresentation or exaggeration.

I do not ask you to introduce goods of inferior quality to "help your sale."

I turn your oldest stock into cash without loss and do so in a manner consistent with legitimate business.

*THE DETROIT FREE PRESS, July 1, 1908, says:*

*Hand has conducted the largest and most successful jewelry sales ever held in America. His eloquence and wonderful descriptive powers hold his audience interested and at the same time command confidence in the quality and value of the articles offered.*

Mighty Men O' The Hammer

America's Best-Known Auctioneers

WE CAN FURNISH THE GREATEST LIST OF SUCCESSFUL

# Jewelry Auction Sales

EVER MADE BY ANY FIRM IN THE BUSINESS

It costs no more to obtain our services than it does for men of no recognized ability.

During the past year we made our seventh successful sale in the city of Cleveland.

Our ninth sale in Chicago netted \$75,000 in four weeks for Keil & Hettich.

We sold \$38,000 worth for R. Van Keuren & Co., Savannah, Ga. This was our second sale for that concern.

Our sixth successful sale in Atlanta, Ga., was made for the J. C. Mellichamp Co., and amounted to \$50,000.

We just closed a five weeks' sale for Harrison & Co., Sault Sainte Marie, Mich. Sold the entire stock of Lockhart & Co., Johnstown, Pa., and held a six weeks' reduction sale for W. F. Kirkpatrick & Co., St. Joseph, Mo.

UNITED STATES PATENTS.

ISSUE OF SEPT. 15, 1908

422. HAT PIN. JOHN D. BANKS, Philadelphia, Pa. Filed March 11, 1908. Serial No. 420,499.

combination with a holder comprising a casing having oppositely disposed slots arranged at an angle to each other, of a pin extending through said slots, said pin having a specially extended portion thereon of greater width than the width of said slots.

598. WORKMAN'S TIME-CONTROLLER. WILLIAM ROCKWELL, Syracuse, N. Y., assignor to the Dey Time Register Co., Syracuse, N. Y. Filed May 24, 1907. Serial No. 375,380.

the time recorder, in combination, an impression surface, printing mechanism, means for causing a relative movement between said surface and mechanism to cause the latter to make records

said surface progressively and successively at different points in determined sequence, and means independent of said first-named means to cause a relative retrograde movement between said surface and mechanism to enable the latter to make an impression at a point passed over in said first mentioned movement.

648. ELECTRIC CLOCK. MONNOSUKE HIGUCHI, New York. Original application filed Nov. 3, 1903, Serial No. 179,661. Divided and this application filed Dec. 2, 1905. Serial No. 290,008.

a clock, an electric alarm bell ringing mechanism, comprising a minute arbor and a separate indicator shaft, each independently operated, a cam on said indicator shaft, a circuit controller actuated by said latch, a cam on the indicator shaft actuating the latch to place the controller in position to throw the bell ringing mechanism

into operation, and said latch also operated by the minute arbor to release the circuit controller and

throw the bell ringing mechanism out of operation.

898,649. ELECTRIC CLOCK. MONNOSUKE HIGUCHI, New York. Filed Nov. 3, 1903. Serial No. 179,661. Renewed March 17, 1900. Serial No. 421,709.

In a clock, the combination with the balance wheel and the hairspring, of an actuating lever for said balance wheel, an electromagnet adapted to attract said lever, circuit closing contact pieces electrically connected to said magnet, a balance

governing lever, a contact arm mounted on said governing lever for closing a circuit through said contact pieces, and means on said balance wheel for engaging said contact arm to close a circuit, but adapted when the force of oscillation of the balance wheel is of sufficient strength to strike said governing lever with sufficient force to displace the same and carry said contact arm out of the path of engagement.

898,670. PIN AND PIN-JOINT. EUGENE W. MOREHOUSE, Providence, R. I., assignor to B. A. Ballou & Co., Rhode Island. Filed Feb. 17, 1908. Serial No. 416,349.

As a new article of manufacture, the jeweler's finding herein described, comprising in one piece a base and two ear pieces, the edge of each ear piece being curved in an arc of approximately 270° in extent and is outwardly convex and inwardly concave in a section parallel to said base

and also outwardly concave and inwardly convex in a section perpendicular to said base, and each provided with a pivot hole concentrically located: said article being adapted to locate accurately within itself a pin tongue provided with a pivot the latter in registration with said pivot holes and said ear pieces of said article being adapted to be flattened by pressure first to engage said pivot in said pivot holes thereof, and then to be further flattened to assume the form of straight, parallel ear pieces extending at right angles with said base.

898,742. CLOCK. GUSTAVE JAEGER, Philadelphia,

Pa. Filed Aug. 14, 1907. Serial No. 388,455.

In a clock of the character described, a base, a stem formed therewith, said stem having a central opening therethrough, a clock works secured in the base, a tube D secured to the hour wheel of the clock works and passing through the stem, a spacing tube fitted over the tube D, a tube G also fitted over the tube D and adapted to revolve therewith by friction, a semisphere secured to the outer end of the tube G and adapted to indicate the hours, a spindle passed through the tube D,

a squared socket formed upon the lower end of said spindle adapted to engage the squared end of the minute wheel arbor, a semisphere secured to the outer end of the spindle, said last named semisphere adapted to indicate the minutes, a stationary pointer adapted to register with the number upon both semispheres, and a base formed with the pointer, said base being secured to the upper end of the spindle and adapted to act as a washer bearing for the tube G.

898,962. REGULATOR FOR WATCHES.

FRANK W. BUCKINGHAM, Greensburg, Pa. assignor of two-fifths to J. Harvey Harrison, Pittsburg, Pa. Filed Feb. 28, 1907. Serial No. 359,833.

A watch regulator comprising a worm, a wheel

meshing therewith, a lever having a segment operated by said wheel, said worm being spring pressed lengthwise.

899,012. ELECTRIC CLOCK. MONNOSUKE HIGUCHI, New York. Original application filed Nov. 3, 1903. Serial No. 179,661. Divided and this application filed Sept. 15, 1905. Serial No. 278,544.

In a clock, the combination with an hour arbor and a striking lever, of means for intermittently actuating said lever to effect an hour and minute strike, controlling means to throw said lever actuating means into operation to temporarily throw said lever actuating means out of operation at the completion of the hour strike and to permanently throw said lever actuating means out of operation at the completion of the minute strike to determine

TRADE CONDITIONS.

The local jewelers report a slight, but steady improvement in trade, due to the gradual brightening in business conditions generally in Lancaster County. The safe harvesting of the county's staple crop, tobacco, a very large and fine one this season, gives hope among the business men for a good Winter trade. Even at last year's prices, which were not high, the new crop will put upwards of \$3,000,000 in the farmers' pockets.

John J. Bowman, of Ezra F. Bowman's Sons, visited Harrisburg last week.

Clayton E. Hinkle, Ephrata, was married, Sept. 15, to Miss Eva V. Weidler, of that town.

F. A. Peters, of the H. S. Meiskey Co., spent several days last week in Philadelphia.

Benjamin Lichtenstein, N. Queen St., has just purchased a fine business property on Market St., Williamsport, Pa.

Harry T. Kiehl, head salesman for Louis Weber & Son, is home from a trip to the Ephrata Springs for his health.

Miss Bertha Oberlin, sister of Howard and William S. Oberlin, Columbia, was badly injured last week by being thrown from a runaway team.

The local jewelers made some very pretty window displays last week during the convention of the State Council, Junior Order United American Mechanics.

Edgar Hirsch has taken a position with Charles Bischoff, manufacturing jeweler. Arthur Bischoff, son of the above, has recovered from a long illness, and will soon be back at the factory.

John B. Roth, Jr., has just completed two dozen solid gold fob medals for the Pharsonian Dramatic Club of Pennsylvania State College. They represent symbolically comedy and minstrelsy.

The beautiful 14-karat gold open-face watch, Hamilton movement, which the players of the Lancaster Tri-State League team presented last week to their manager, Clarence Foster, was furnished by T. Wilson Dubbs.

A beautiful silver, gold-lined loving cup which was presented to the Germania Maennerchor Society by the Germania Quartet, of Baltimore, has been on exhibition in a show window of Breneman Bros. & Co.'s store, where it attracts much attention.

Richard Weisenfeld, a watchmaker of Baltimore, Md., was recently taken into custody on a charge of the larceny of a gold watch belonging to Joseph H. Meyer, of the same city. Meyer alleges that he left the watch at the establishment of Weisenfeld and when he called for it was told that it would not be ready for several days. Meyer became suspicious and notified the police, who located the watch in a pawnshop. When searched at the police station Weisenfeld had several pawn tickets in his possession.

to rotate with said hour arbor to gage operation of said controlling means.

BRITISH PATENTS.

EXTRACTS OF SPECIFICATIONS, 1907, FROM The Illustrated Official Journal.)

ISSUE OF SEPT. 1, 1908.

18,338. DISPLAYING GEMS. M. ENGELSMAN, New York, U. S. May 9.

A holder for displaying gems, diamonds, stones, etc., and the like consists of a U-shaped spring 20, with a strengthening strip 21 and spring 22, 23, permanently fastened or adjustably attached by a screw 23 and slot 24. In a modification, the spring jaws terminate in elliptical

kets. The band 20 and strip 21 are perforated 26 for the passage of light. The holder may be supported on the finger, or small holes are provided at the top and sides for use with a pair of tweezers or special stand.

18,971. HAT-PINS. G. F. YOUNG, Edinburgh. June 20.

A point-protector for hat-pins is retained by the

engagement of a spring clip with a notch in the pin. The clip is in the form of a split tube E at right-angles to the pin.

18,043. SLEEVE-LINKS. H. H. CHAMPNESS

and S. LINSEY, Middlesex. May 11.

A fastening for a shirt or like cuff consists of

# Now It's The Lord Elgin

The demand to-day is for thin watches. The public have been waiting for the thin Elgin Watch—now it's here—

## LORD ELGIN

The  
Thinnest  
Watch  
Made  
in  
America  
with  
Enamel Dial

the thinnest watch made in America with enamel dial.

Like all Elgin Watches—it was not put on the market until worthy to carry with it the Elgin reputation for reliability.

Every Lord Elgin is cased at the factory and timed in the case—the most accurate thin watch in America.

Four grades—7, 15, 17, and 18K Jewels adjusted. 18K and 14K solid gold cases, also 25 year filled cases.

Furnished with metal dials, plain engraved, gilt or silver.

Prices furnished on application to your jobber, or write the Company for only authorized price list.

# THE HOROLOGICAL REVIEW

## A CATECHISM OF THE LEVER ESCAPEMENT

Being an Informative and Instructive Series of Questions and Answers for Watchmakers and Apprentices.

(Written expressly for THE JEWELERS' CIRCULAR-WEEKLY by T. J. WILKINSON.)

(Continued from issue of Sept. 9.)

**QUESTION:**—Briefly review the relation of guard pin to escapement action (single roller), Rule II. being in force.  
**ANSWER:**—First, we have the normal condition of freedom between the edge of the roller table and the guard pin. The cor-

mal, i.e., a correct amount of freedom may exist on each side (Rule II. being in force); second, we might find too much freedom between the guard pin and the edge of the roller table on each side; third, we may find a bind on one side and too much freedom on the other side; fourth, we may discover that the guard pin binds on each side of the roller table, also we might have a condition wherein we found a normal amount of freedom between the guard pin and edge of table on one side, while on the opposite side we might either discover the guard pin binds on the table, or the reverse,

FIG. 105.

extent of this normal freedom can best be learned from an examination of a sound escapement. Second, a condition may exist wherein we find that the guard pin has entirely too much freedom with each side of the roller table. Third, and most troublesome, is that condition wherein we find that

FIG. 107.

viz., too much freedom. The cause, effect and remedy for such errors we have pointed out in former papers.

**QUESTION:**—Review the guard pin's adjustment as related to the lockings of the escape wheel teeth on the pallet jewels.

**ANSWER:**—The adjustment of the guard pin as it relates to the lock of the teeth on each pallet jewel is as follows: First, when we bring the guard pin in contact with the edge of the roller table we should determine if the adjustment is correct, that the tooth remains on the pallet jewel's locking face as depicted in Fig. 106; second, the action may be sound on one side, i.e., the tooth remains locked on the pallet jewel when the guard pin is against the edge of the roller table, while on the opposite side an incorrect condition may exist, namely, the tooth of the escape wheel enters onto the pallet jewel's impulse face, as shown by Fig. 107; third, we may find that on both pallet jewels

FIG. 106.

the guard pin binds on one side of the table, which error is illustrated at A, Fig. 108, while on the opposite side of the table, as shown at B, Fig. 105, too much freedom would exist. Fourth, we may discover that the guard pin binds on each side of the

brief, the guard pin's relation to the edge of the roller table may, first, be nor-

mal, the teeth enter on their respective impulse faces as shown in Fig. 107, due, as pointed out, to an incorrect relationship of the guard pin and roller table. Such errors call for correction, as explained in former contributions. The foregoing, briefly stated, means that whenever we bring the guard pin against the edge of the roller table (at any point outside of the crescent) the tooth

FIG. 108.

of the escape wheel must remain locked on the locking face of the pallet jewel as depicted in Fig. 106.

**QUESTION:**—State the relation of the guard pin to the fork action.

FIG. 109.

**ANSWER:**—The adjustment of the guard pin to the roller table, as it relates to the fork action, is as follows: First, when we bring the guard pin in contact with the edge of the table, doing so at any phase of action when the roller jewel is well past the extremity of the horn, we then steadily maintain the guard pin in contact with the edge of the roller table. Next, we slowly

# WALTHAM WATCHES

## COLONIAL SERIES

These Extra Thin Watches may be had in four qualities of movements as follows:

### **RIVERSIDE; NICKEL;**

19 fine ruby jewels; raised gold settings; double roller escapement; steel escape wheel; exposed sapphire pallets; compensating balance, adjusted to temperature and five positions; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; red gold center wheel; exposed winding wheels.

### **ROYAL; NICKEL;**

17 jewels; red gold settings; exposed pallets; compensating balance, adjusted to temperature, and three positions; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

### **NO. 1425; NICKEL;**

17 jewels; red gilded settings; exposed pallets; cut expansion balance; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; red gilded center wheel; exposed winding wheels.

### **NO. 1420; NICKEL;**

15 jewels; settings; exposed pallets; cut expansion balance; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

Riverside and Royal grades are supplied in Gold and Gold Filled cases, both Regular Jointed Open Face and Calumet (Single Joint).

No. 1425 and No. 1420 grades are supplied in Gold Filled Cases only, both Regular Jointed Open Face and Calumet.

Colonial Series watches have Gilded or Silver Finish Metal Dials, as may be preferred. Solid Gold, 18k. and 14k. dials at an extra charge.

*Movements manufactured and guaranteed by*

**WALTHAM WATCH COMPANY,**  
WALTHAM, MASS.

ceed to rotate the balance, thereby bringing the roller jewel towards the notch of the lever. If the adjustment, so far as it relates to this action, is correct, we will find the following conditions present: First, the roller jewel passes the horn (see Fig. 108), no contact of the parts should be felt; second, immediately the guard pin enters the crescent it will be noticed that the corner of the notch comes in direct contact with the roller jewel. Their manner of contact is shown in Fig. 109. The effect of this contact will be that the roller jewel

FIG. 110.

rests on the corner of the notch, no stick or catch being discernible; as against this perfect adjustment of the roller jewel, to the curve of horn and corner of lever notch, you may note the following: First, we may observe that when the roller jewel is passing any part of the horn there is a decided catch of the roller jewel with some part of

FIG. 111.

the horn, as illustrated in Fig. 110, which condition being erroneous, calls for correction, as already explained in other contributions. Second, the roller jewel may succeed in passing the curve of the horn successfully, and yet catch on the corner of the lever notch (see Fig. 111). Such an error calls for an exhaustive test to discover the exact nature and cause of the error. Use the tests formerly explained. It is quite possible and quite frequently found that a certain action and relationship of the roller jewel to the curve of the lever horn and corner of notch exist on one side of the fork, while on the opposite side of the fork action of incorrect condition prevails. Familiarity with the tests mentioned in this series will reveal the cause of such errors.

QUESTION:—In what way is the corner

of the lever notch and face of roller jewel associated and related to the pallet and tooth action?

ANSWER:—When we bring the roller jewel in contact with the corner of the lever notch (Fig. 109) the tooth of the escape wheel should remain locked on the locking face of the pallet jewel in the manner illustrated in Fig. 106.

QUESTION:—What erroneous condition of tooth and pallet is sometimes discovered when we bring the roller jewel in contact with the corner of the lever notch? (See Fig. 109.)

ANSWER:—It will at times be found that the tooth of the escape wheel enters onto the impulse face of the pallet jewel, as shown in Fig. 107. This type of error requires investigation. The cause must be located and corrections made according to our former instructions.

QUESTION:—State how you would commence to reset both pallet jewels, all idea of their correct location being unknown, and the position of the banking pins being likewise unknown.

ANSWER:—When the position of the pallet jewels in their settings has become an unknown quantity, and the position of the banking pins has been tampered with, the following is the readiest method of overcoming the difficulty: Commence by placing the lever in position; next, the balance; this done, adjust the position of each banking pin so that its effect is such that the guard pin is brought into slight contact with the edge of the roller table. Having adjusted each banking to obtain this effect, we are now in a position to reset the pallet jewels, taking the bankings as a guide for the probable extent of the first or drop lock.

QUESTION:—Will this method always work out in practice?

ANSWER:—The before-mentioned system of resetting pallet jewels will always work out correctly, provided the escapement is properly proportioned. If the escapement parts are not correctly proportioned we must aim to obtain a light lock and make such corrections as will tend to improve the escapement.

(To be continued.)

### Winner of the Chronometric Cup.

M. LEROY, of Paris and Besancon, has been awarded the Chronometric Cup at the Besancon Observatory for the year 1907-8, with a chronograph which was elapsed with 244.6 points. The firm were also awarded the first prize of the series and the annual bounty of 12,000 francs (£500) awarded by the Minister of Marine for a marine chronometer elapsed first in the competition of the hydrographic surface. This is the seventh consecutive time the firm have gained the bounty. They also secured the first and second prizes in the competition organized by the French Automobile Club, first and second also in the competition for marine chronometers, and first, second and third in the competition for non-magnetic watches. Messrs. Neyret Bros. came very close with a chronograph which gained 244½ points out of a total of 300. This particular house claims to be the oldest of established French watch manufacturers.

### Results of Transportation of Clocks.

IT is generally believed that clocks, if carried to some other place, often show differences in the running, and in order to see to what an extent this really takes place experiments were carried out some time ago at the Imperial Chronometer Observatory, in Kiel. About the year 1883, when the observatory was opened, 70 clocks were transported from the old building to the new home by workmen. Two came to a stop, while 15—that is, 21 per cent.—showed a difference in working of more than one second. The greatest difference was 2.6 seconds.

The new trials of more recent date, however, gave much better results. A large part were newly purchased chronometers, which were transported from Hamburg to Kiel by rail in a compartment with cushioned seats and thence by steamer to the new observatory. Before the test the times were accurately fixed and afterwards only very small differences were found. Two clocks were not affected at all, and the greatest ever experienced was 0.5 seconds. The average was 0.01 to 0.4 seconds. In all 64 chronometers were carried, and the trials extended over a whole year, in all kinds of weather, in order to see the difference. Old as well as brand-new clocks were tried.

The method was as follows: In the clock room of a steamer comparison was made between the standard clock and those to be transported, by means of the chronograph, taking into account tenths of seconds. Then the work was stopped by fixing the arresting lever and turning on the thumbscrew so that it could not become loose or fall back. The clocks were put into boxes and carried by sailors and workmen to a bridge—a distance of 50 yards—and placed on board a small steamboat. The greater number of the men were inexperienced and no special precautions were taken, save that they were told the clocks should be handled carefully, and any sudden turning round while in horizontal position was to be avoided. In the boat itself the boxes were not taken upon the knees, but put directly upon the deck above the mainshaft in the neck. The steamer made a round trip in the harbor and returned to the bridge, after which the boxes were carried back to the old place in the same manner. The thumbscrews were released and the arresting levers set free. The times of the clocks were again compared with the standard clock by means of the chronograph, taking into account tenths of seconds.

Such a trip lasted 45 minutes, and the difference in temperature was 12 degrees. As said before, many such experiments were made during the course of a year in rainy as well as fine weather. Summer and Winter; also when the sea was running high. The results were very satisfactory. Not one clock stopped, nor was any change noticeable in the running. The fact that two chronometers stopped during the previous trials, in 1883, was due to careless handling on the part of the workmen, who certainly had suddenly turned the clocks around in a horizontal position, which is the worst thing which can be done to a clock.

# Brooch and Case Combined

Specialties in Casing of Chronographs, Repeaters and all Kinds of Complicated Swiss Watches

21 and 23 Maiden Lane

New York City

The Only Safety Chatelaine Case which enables a Watch to Keep Correct Time and Cannot be Lost

#### MERITS

Holds the watch firmly and securely, thus preventing the movement from being jarred, as there is no swinging or bobbing up and down while the wearer is walking or running. Protects both the case and garment from wear.

*Absolute Security*

Patented U. S. June 9, 1908.  
Patents Pending in Foreign Countries.

#### UTILITY

It can be raised so as to read the time, and reverses to have either the dial back facing front, with removing brooch pin watch from the garment. Can be worn on the shoulder, belt, chain fob.

*Will not pull or wear off*

MADE FOR ALL SIZES OF LADIES' WATCHES, BOTH OPEN FACE AND HUNTING

#### Artistic and Practical

The only brooch and watch combined. Affords absolute security, as it has a safety catch. Nothing to wear out, as it works on friction bearings. Eliminates the possibility of loss of the watch owing to either bow, hook, swivel or link wearing out, breaking or coming apart, as in the old style chatelaine. Does not interfere with either winding or setting of movement.

Licensed Under Wachter Patent. Patented July 25, 1905; May 21, 1907

Watch worn as Chatelaine, showing it lifted to read the time.

Watch worn on chain as a pendant, pin to garment as additional security.

## Hints on the Repairing of Complicated Watches

Bits of Technical Advice for the Young Watchmaker

COMPLICATED watches are mostly manufactured in Switzerland in very all quantities, by different manufacturers, consequently their construction varies so much that their repairing is a hard task for the majority of watch repairers. A watchmaker, in order to be successful in repairing complicated work, like repeaters, chronometers, etc., should make a study of his watch as a physician studies his patient before diagnosing the disease.

Many repairers consider certain errors in complicated watches as mysterious for the simple reason that no observation is made before taking the watch apart. The method

to which the rack A can be pressed down.

Fig. 2 shows the hour snail with the rack B resting on the 12 o'clock step of the hour snail A. The hour snail, which is mounted on the star, controls the number of blows which are struck by the hammer on the gong. The rack B can be pushed down until its lower point rests on a step of the hour snail. The steps of the hour snail are of various depths and are turned one division, each hour, by a projecting lever upon the cannon pinion.

### TAKING APART A REPEATER.

In taking apart the repeating mechanism, the striking train must first be blocked in

FIG. 1.

FIG. 2.

adopted by many repairers is to take a watch apart and clean each piece in the regular way. The repairer then finds before he attempts to replace all in the right position. The result in such cases is, as a rule, a loss of time, and the watch is finally in action only after many trials and experiments.

### THE REPEATING TRAIN.

A repeating train contains a second small main spring. The act of pulling the slide winds the main spring, which operates the hammer through racks and is regulated by a small train of running wheels, and an escapement like the alarm clock. All mechanisms of repeating watches are constructed under the dial.

Fig. 1 shows the lower watch plate under the dial. The letter A indicates the hour rack, mounted on the squared arbor of the main wheel of the repeating train. B is the hammer pallet. A is wound up by the teeth of rack C. In old-fashioned repeaters A is pressed down by a slide in the center of the case edge. When A is wound up the teeth pass the point of the pallet B, which trips backward as the teeth go by and is returned to its proper position by a light spring. The moment the tooth rack C is released, A commences to run forward and its teeth operate on the point of the pallet B, each tooth causing one blow of the hammer on the gong. The striking of the time is regulated by the rack that passes the pallet B. This is determined by the distance

order to diminish the pressure of the various parts. The repeating mechanism should then be carefully examined. It often happens that the holes in which the center wheel runs get worn out, causing unsteadiness of the quarter snail, which is placed on the cannon pinion. An error in striking is in such cases unavoidable, and corrections can only be made by bushing the defective holes.

Complicated watches, as a rule, are more subject to stoppage than the ordinary watch, for several reasons. The complicated watch has more to perform than the ordinary watch, and although the mechanism of a repeater is operated by a separate main spring, there is, however, more weight indirectly attached to the escapement, and therefore a somewhat stronger mainspring is required for a repeater than for the ordinary watch.

Mainsprings are very often neglected by the majority of watch repairers. In many cases, when the mainspring is not broken, it is taken for granted to be the properly selected spring and is not removed from its barrel. Every delicate part of a watch may be scrupulously inspected, and yet the main fault lies in the improperly selected mainspring, which the repairer failed to inspect.

"Why are Swiss watches more subject to main spring errors than the American?" it may be asked. The American watches do not suffer from that error for the simple reason that material for all American watches can be bought in any material store. Mainsprings especially can be bought for

any American watch by merely mentioning the name, size and grade of the watch. Parts of Swiss watches, as a rule, are hard to get in foreign countries. The first time the main spring of a Swiss watch needs replacing the watch is generally in a more serious condition than is realized.

The selection of a mainspring suitable for the watch in this case, depends wholly on the ability and judgment of the repairer. If the selection of a mainspring is left to a careless repairer, very little attention will be given to this important part of the watch. The broken mainspring will simply be replaced with a new one, either too strong or not strong enough.

### EFFECT OF A WRONGLY SELECTED MAINSPRING.

The barrel of a watch may be divided into three equal parts—mainspring, barrel arbor and the space between the mainspring and the barrel arbor. If the mainspring is too long, filling out more than one-third of the barrel, the watch will not run fully 24 hours, for it will be impossible to wind the whole mainspring.

When winding a mainspring the spring is transferred from its resting place to the barrel arbor by turning the barrel arbor itself, to which the inner end of the spring is attached. When the mainspring is too long the barrel is unequally divided, and only a small part of the mainspring is wound. The other part remains at its resting place because the lack of space prevents bringing the whole length of the spring into action.

A mainspring, which is shorter than the desired length cannot possess the necessary elasticity, and although a watch with a mainspring that is too short will run longer than it would with a mainspring that is too long, the power, however, will, in both cases, be unequal, and the following defects will be apparent. The watch with a mainspring that is too long will not run fully 24 hours, contrary to the belief of many watchmakers, and the short mainspring will transmit to the escapement an unequal amount of power, and the lack of elasticity will make its breakage absolutely unavoidable. Besides neglecting the inspection of the mainspring, many repairers also fail to remove from the barrel and spring old oil.

### PUTTING A REPEATER TOGETHER.

It is advisable to oil each lower pivot of the train wheels before replacing the striking mechanism, as many pivots are later covered with the respective striking parts. Much attention must also be given to the cannon pinion, which is to be set friction tight on the center wheel pinion. The projecting lever upon the cannon pinion turns the hour snail one division each hour. The cannon pinion, however, when too loose on its center pinion, will stop before the hour snail and will remain uncontrollable. In this case the watch will run and leave the hands at a standstill.

The setting of the hands also requires careful attention, as the minute hand, when not set at its exact place, will cause a confusion of the repeating. Many watch repairers, when "dialing" a repeater, put a wedge under the balance in order to stop its motion and move the cannon pinion slowly until the snail is moved one step. The hands are then placed at the hour at which the repeater recorded. C. R.

# STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business;

## Factors to Be Considered in the Display of Diamonds

Written expressly for The Jewelers' Circular-Weekly by C. W. Coumbe

EVERY once in a while a question comes up to THE CIRCULAR-WEEKLY couched more or less in the following form: "How can a jeweler best furnish and decorate his store with a view to displaying his stock of diamonds to best advantage, that they may be seen in their true colors—that is, with no false colors reflected from walls, ceilings, etc.?"

A few words as to the laws of light and color are necessary to afford any really clear and thoroughly satisfactory explanation of the conditions met with and the method of utilizing or overcoming them in order to gain the desired effect in displaying diamonds. In a short article, as this has to be, we must be satisfied with a statement of the chief facts.

In the first place, the average jewelry store is open both in daytime and evening, thus enforcing consideration of both daylight and artificial light as illuminating sources. In the second place, there are various different conditions ruling in both phases of the "lighting" proposition which should bring in their train changes in their method of treatment.

Taking up the subject of day or sunlight, first we have to remember that the light rays entering the store on a bright, clear day before noon afford a light altogether different in quality, as well as quantity, to that pouring in from, say, a "western" sun with its slanting golden, or glowing red, rays.

Again, with a hazy atmosphere or, still worse, in foggy weather the sunrays that are deflected by the minute particles of suspended moisture or smoke are mostly yellow. In the case of artificial illumination the white light of the sun is never reproduced. The candle, kerosene, incandescent electric, etc., give us a superabundance of yellow rays. The mercury vapor (Hewitt, etc.) lights give us violet rays mostly. The incandescent "mantle" furnishes either an excess of green or yellow rays, according to the metallic oxides used. Nearest to the white light of the sun is the electric arc light. All of these departures from the white qualities of the sunlight tend to change the appearance of the diamond.

Now the effect of yellow rays on a yellow-

tinged substance, such as a diamond, is to whiten it—to reduce the color. On a blue stone the yellow rays reduce the brilliance to a dull or "dirty" tone. Let us look at more familiar examples. The rice merchant desires to detect, or bring out, what yellow exists in the grains he is sampling with a view to purchase. The whiter rice is the more valuable. He examines his grains heaped on blue paper. The

ELECTRIC LIGHT WITH REVERSED POLES.

ballet dancer desires her gauzy skirts to look snow white in the glare of the yellow stage lights. She leaves her fluffy flounces a dull yellow, and in the brilliantly lighted ballet she appears to be clothed in the purest of white gossamer. Contrariwise, the housewife adds a little "blueing" to "bleach" out of view the yellow tone of her "washing" and makes it look, in daylight, like "driven snow." At "court" balls and banquets given by royalty and the nobility (in former days at least when the electric illumination was yet unborn) wax candles in multitudes replaced the common ones composed of fats. The former were said to throw less of the yellow rays and therefore better show the masses of jewels displayed on the persons of the noble guests. And, lastly, the artist, in his need to differentiate not only between the colors but their tones eschews all artificial light, working by daylight alone, and seeking, where possible, to gain a "North" light—the most diffused and purest light known.

It affords him an optical analysis of color otherwise impossible.

Putting theory and facts aside, we can one best gain some pertinent information on the subject from one who knows the practical rules governing the situation. Where can the enquirer "strike" the "who knows" or ought to know. The architect can teach you all about "lights" in the building standpoint, the decorator expound the rules and practices from an artist side of view. But when you meet them on the point of diamond display you are necessarily ignorant. It is to the diamond expert we must appeal for the best if not the methods of meeting them. With these thoughts in mind a visit was paid Ludwig Nissen, of the Ludwig Nissen Co., 182 Broadway, New York. Mr. Nissen has studied all the conditions surrounding the purchase and sale of diamonds. And in self-preservation he must be thoroughly digested all the conditions of daily handling of the glittering stones that have taught him. And in Mr. Nissen the writer discovered one of those personalities who not only knows the subject but is willing to permit the layman inquiring mind to share in the knowledge. Said he, upon the inquiry being put as to "how to display diamonds to their advantage," etc.

"I know nothing of the theory involved in this question, but I know the practical. And there is little of it to explain."

"First, and above all, avoid green and yellow in displaying diamonds."

"Next, let your ceiling be white and your wall surfaces light blue."

"Your fittings are best in dark mahogany. If not dark mahogany then absolutely best stained furniture."

The writer's next inquiry concerned the lighting of the diamond store after sundown.

"At night," he declared emphatically, "you cannot judge the quality of a diamond. A by-water stone in artificial light can show the same as a stone five times its value."

Questioned as to whether it would be possible to imitate the sun rays by using the requisite number of colored incandescent bulbs, Mr. Nissen declared it was possible to produce sunlight artificially. He declared: "The electric arc light brings out the qualities of a diamond better than any other artificial light. It has, however, among other peculiar effects, the power of deepening the tone of a blue diamond; darkens the blue reflections."

## Storekeeping Department.

Here in a nutshell we have the practical side of the situation boiled down to three points. Avoid yellow and green. Ceiling white, walls light blue, fittings dark mahogany or black. And lastly sunlight alone displays a diamond in true colors. So there you are. Before leaving my genial source of knowledge I noticed the roomy offices were furnished according to the laws laid down. A quiet blue wall surface, dark mahogany wood work, the counters covered with dark blue cloth. And a glimpse into the offices of several other diamond merchants showed me identical conditions, following Mr. Nissen's decided laws were those of the Medes and Persians, religiously followed by the diamond dealing fraternity in general.

Filled with expert knowledge of the subject let us take a peep into a few of New York's leading retail stores to see if these conditions are maintained. Perhaps the magnificent stores centred near the Wall and Astoria can be considered leaders. The latter called in at Chester Billings & Son's and in that fashionable store yellow and green tones on the walls, the gracefully draped curtains on the Fifth Ave. windows, reducing the western sun's glare, were of light blue outside and light green within. The woodwork of the fittings however was exceedingly dark. A statement by the writer was in search of methods adapted for diamond display, etc., elicited from the management the clearly apparent fact that rubies and other colored gems were as important a part of the stock as diamonds; hence the color scheme in the decoration was more that of displaying an assorted colored gem stock and reducing any crudeness of the furnishing in order to enhance the attractiveness of the jewelry. A noticeable feature is the fact that the immense plate-glass front on the 34th Street side was absolutely bare, thus admitting a great flood of the much-desired unobstructed north light to penetrate every corner of the big interior and permitting on the east side of the store a perfect light for diamond observations.

Going a few doors downtown we come across the well-known store of Theodore Kohn & Co. Here we find dark mahogany cases and neutral gray walls. But the fittings are in that greenish-tinged oak vulgarly called Pompeian and the seats of the chairs are in deep green leather. White and green stripes make up the sunblinds. Again we are confronted with the fact that rubies, emeralds, sapphires, etc., are considered. Diamond examination can be undertaken up in the gallery where the lights are correct for such purposes.

A glance into the interior of the T. Kirkpatrick & Co. store alongside the immense red-brick "Waldorf" shows us buff walls and dark fittings.

But a little further up town on the opposite side of the busy thoroughfare brings us to Tiffany's gem palace. Surely we can expect to look for guidance in the store decoration designed by these arbiters of jewelry fashion. On entering we find the windows on the western frontage protected from the red rays of the setting sun by

striped awnings, grey and "unbleached" fabric. And its beautiful interior with its matt steel furniture and grey and silver ceiling shows brilliant lighting, the neutral tones barely broken by a few warm rays from the brown veined marble of the large pillars. Passing along the northern aisle between the magnificent jewel displays before reaching the office we see to our left the "diamond rooms" partitioned off from the main store. Here we find the perfection of detail for the observing of diamonds, viz.: a north light unobstructed by the great plate-glass windows, skyblue shades hanging from partitions on the south side. Dark grey blue cloth table tops, on which to place the diamonds. Altogether an ideal set of conditions just as set forth in Mr. Nissen's authoritative instructions.

And now, having examined into the surroundings, let us see what prevails as to the true backgrounds in the displays of brilliants. In the Tiffany show cases we find the glittering diamonds disposed artistically on skyblue velvet. The Theodore A. Kohn & Co. diamonds repose on a white surface. In the Kirkpatrick show window the diamonds are arranged on light buff colored velvet. The trays of diamonds in Chester Billings & Son's show cases are lined with a deep red, or maroon velvet, vividly contrasting the gleaming white stones.

And with all these facts before us what definite conclusions can we draw?

Assuredly we can start out with the determined factor that a pure white ceiling is advantageous in every respect. Secondly, that, while a general display of jewelry allows diversity as to the selection of color schemes in decorating the interior, in aiming to furnish and decorate the store with a view to obtaining the truest effect on your diamond display you must suppress all colors but blue and sombre mahogany tones, and more especially yellow and green. That after the sun has reached its zenith the slanting colored rays from the west must have their yellow and red rays reduced by the use of white or neutral colored window awnings. That the most perfect light in which to view diamonds is the diffused North light which should have unobstructed opportunity to reach all parts of the store.

And as to the background on which to display the stones, we can safely consider velvets in skyblue, cream yellow and deep reds such as maroon, or a blue black to be preferable for the backing of a diamond display. The former two enhance the lighting value of the facets below the "girdle." Blue-black velvet gives beautiful contrast suppressing all but a few blue rays. Maroon velvet permits contrast without the steely whiteness produced by the black backing.

But the average jeweler is forced to keep his store open after sunset. What of the treatment of a diamond display after dark? Mr. Nissen truly asserts no artificial light yet known takes the place of sunlight in displaying diamonds. But the electric arc light is the superior of all other illuminating devices yet on the market for this purpose. In an article on store illumination by the present writer on page 223 of the anniversary issue of THE CIRCULAR—WEEKLY dated Feb. 5 of this year, mention is made

of a method of utilizing the electric arc lamp to best advantage. The chief source of trouble with this illuminating device lies in its overpowering glare. By inverting the lamp—that is to say by reversing the poles so that the positive carbon is beneath (instead of above) the negative carbon—and then placing a good reflector below the light, we cut off the blinding direct rays. Thus the powerful illumination is reflected to the white ceiling and thence in a desirable dispersed form it floods the store with rays more closely allied to sunlight than any other artificial light. A rough outline of the plan is displayed in the accompanying engraving.

Before closing the discussion perhaps it might be worth a few words to briefly mention the facts that hinder what might appear a simple plan of reproducing sunlight with our present artificial illuminating sources. Theoretically it is possible to do this. Science tells us we can obtain a white light with the complementary colors. So that by arranging in pairs incandescent electric lights with glass screens of the following complementary colors at first glance we should be able to create the desired effect: Red and bluish-green; orange and greenish-yellow; yellow and blue; greenish-yellow and violet; green and purple. A little closer consideration, however, will show us that this is impractical. These colored shades will be found in combination to send forth so little illuminating power that with an immense force of lights we only obtain the dimmest of illumination. The cause is simple. The artificial lights have so few rays except yellow that when these are mostly suppressed there is little illuminating power left to pierce the darkness. There is an insufficiency of the needed blue rays available. And so artificial sunlight is still beyond our reach and our diamond display is shown off at a disadvantage directly Old Sol hides his face behind the horizon.

### The Way of the Enterprising.

WHAT was probably the finest exhibit of pearls ever displayed in Milwaukee, Wis., was seen recently in the show windows in the store of the Bunde & Upmeyer Co., at the corner of E. Water and Wisconsin Sts. The collection comprises pearls of all colors and grades, and also includes a large assortment of artistically mounted pieces, the whole display valued at more than \$200,000. Every pearl in the exhibit is of the Wisconsin variety, and there are pearls ranging from \$3,000 in value down to \$1 pieces. A pair of pearls valued at \$8,000 is included in the lot. The whole display was brought from the New York offices of the Bunde & Upmeyer Co., and will be returned there.

\* \* \*

Montgomery Bros., Los Angeles, Cal., recently exhibited in their window all the prize cups and trophies for the southern California lawn tennis tournament held at Long Beach.

\* \* \*

Displayed recently in the show window in the store of M. Berman, Altoona, Pa., was an interesting collection of old coins and paper money which the jeweler has been collecting for the past 15 years. Among the coins is a gold 25-cent piece.

# WORKSHOP NOTES AND QUERIES

Answers are also solicited from our readers to the questions published on this page.] Attention paid to communications unless accompanied by full name and address of the writer.

**QUESTION No. 2218.—Bronzing Buttons.**  
Kindly tell me how to bronze buttons. I understand the latter wear fairly well.

T. R. S.

**ANSWER:**—Buttons and ornaments will wear well if electroplated, but bronzed-over articles will soon wear through on the ends. To rebronze them use a good lacquer and mix it thoroughly with bronze powder. Brush over the cleaned buttons or ornaments and dry them in an oven, if possible. Care should be exercised that the bronze powder is thoroughly mixed and dissolved in the lacquer. The bronze powder can be purchased in gold or other colors, and the lacquer from the platers' supply houses.

**QUESTION No. 2219.—Dry Gilding.**  
Kindly let me know how to gild on leather and other fabrics.

C. R. A.

**ANSWER:**—If the gilding is to be genuine use gold leaf for any patching or gilding on leather or fabric. The gold leaf is applied by putting a coat of white of egg to the spot. Let dry and then rub on a little oil and place gold leaf on the spot. Heated iron, just hot enough to melt the white of egg, is pressed on and the gold will adhere. The cheapest method is to take a little varnish and mix a little in some bronze powder. It may be used for leather, wood, fabrics and some of the metals. Bronze powders can be had in gold, silver, copper, bronze, brass and aluminum, so that any kind of finish may be quickly produced. The mixed paint is put on with a brush and allowed to dry.

**QUESTION No. 2220.—Enameling Steel Catches.**—I have a number of thin steel catches or clasps which I want to enamel. But seems to injure them. Can you tell me how to proceed?

D. G. X.

**ANSWER:**—If the catches are thin, the temper of the steel will not permit the method of enameling by the heat process without injuring the articles. An enamel not used on bicycles may be suitable. This is made by using bleached shellac, five parts; borax, one part; alcohol, five parts; water, four parts; methylene blue, sufficient. Dissolve the borax in the water and the shellac in the alcohol, reserving a small portion to dissolve the methylene blue. Heat the water solution to a boiling point and add the alcoholic solution, stirring constantly. The steel catches should be chemically clean, dipped in the solution and allowed to dry. By using a very little of the shellac a natural blue steel color can be produced. The most economical method, perhaps, would be to copper plate the steel catches, then flash them with a coat of sil-

ver. This would not affect the temper nor would it cause cracking and peeling off. A large number of catches could be plated in the tumbling plating apparatus, which would polish them in the same operation. If desired, they could be finished in French gray. The plating is done by electroplaters who handle articles made by manufacturing jewelers.

**QUESTION No. 2221.—Anti-Magnetizer.**  
—Is there any metal or composition of metals which when placed between a permanent magnet and a piece of soft iron stops the magnetic influence upon the iron?

T. F. P.

**ANSWER:**—A new combination of nickel and tin is prepared by E. Vigouroux, of Paris. It is formed by the method of fusion, and when in a powdered state has a light brown color. After standing in the air for some time the color becomes darker. When near the composition which corresponds to the formula, Ni Sn, the mass, after fusion, has the appearance of bronze. This body is stated to be non-magnetic. As to the method used in preparing the new compound, Vigouroux uses a Schlosing furnace in which is heated a porcelain tube. In the latter is placed a magnesia trough containing a mixture of nickel and tin, the former in powder and the latter in shape of grain. Iron may be protected from the magnet by insulation, which may be hard or soft rubber, or a paint which covers the iron. One of the best protectors, perhaps, is mica, which should protect the iron from the magnet. This is used very extensively by electricians to prevent segments from coming in contact with each other in the construction of motors and dynamos. A piece of iron may be demagnetized so there is no indication of magnetic influence, but placing it next to a permanent magnet would naturally magnetize it. The only preventive is to place a non-conductor between. It is doubtful if any kind of alloy can be used for it, and the only protection against the magnet, in our opinion, would be a non-conductive insulation—mica, rubber, glass or wood.

William White, a negro, was taken into custody in Morgan City, La., recently, on the charge of breaking the show window in the store of C. O. Johnson, of that place, and stealing a bracelet and spoons.

A dispatch from Kenosha, Wis., announces that cheap watches having a maximum value of about \$2 are being sold there at prices ranging from \$15. to \$20 on the representation that they are high-grade railroad watches.

## A Cheap Method of Producing a Gold Color on Brass.

**A** GOLD color may be obtained upon small brass articles, such as buckles, buttons, upholstery hardware, furniture trimmings, etc., by a simple dip, says the *Brass World*. Although this dip has been used for other purposes, it is little known as a means for producing an imitation gold color. The dip that is used is the one so frequently employed for imparting a steel-blue color to brass or other metal goods.

The dip is made in the following manner:  
Water ..... 1 gallon  
Sugar of lead..... 4 ozs.  
Hyposulphite of soda..... 4 ozs.

The sugar of lead is dissolved in the water previously heated nearly to boiling, and then the hyposulphite of soda (hypo) is added. The sugar of lead is also known as acetate of lead. The solution turns a milky color from the precipitated hyposulphite of lead, but it should not be filtered out.

In order to get the best results the solution should be heated to a temperature of about 200 degrees F. or just short of boiling. It deteriorates very rapidly when actually boiled and turns black. When immediately made, the white precipitate in the solution is fine and adheres to the articles being colored, but after heating for five or 10 minutes, it collects in clots and settles to the bottom. It is then that the best results are obtained in coloring brass. After some time the solution does not work as rapidly and finally a new one must be made. A large quantity of work can be passed through, however, without deteriorating it as the color is a mere film.

The brass to be colored should be cleaned in the usual manner and may be polished or dipped. It makes no difference about the result. The articles are immersed in the hot solution (nearly boiling) and carefully watched. It takes a few seconds for the first shade of color to appear and it is then very light. Soon a darker yellow forms and then a brownish-gold shade is produced.

The articles are removed as soon as the desired color is reached and should not under any circumstances be allowed to remain as the shade rapidly darkens until the surface becomes purple. As the different tints form slowly it is not a difficult operation to obtain the desired color. By allowing the articles to remain in the solution for a longer time, a purple, blue and finally steel-black color can be produced.

When the desired color has been obtained on the articles they should at once be removed, rinsed in cold water, then in hot water, dried in sawdust and lacquered.

The colors that are produced in this manner are not as rich as gold to be sure, but answer the purpose on cheap work as well as the trade will demand.

The brownish shade which appears just before the purple color begins to form is quite rich and is very pleasing. There are quite a number of makers of cheap novelties that have taken advantage of this solution which, although old, has never been used extensively for the production of a gold color. Its general application has been for the production of a blue color to imitate blued steel and for such a purpose it is necessary to allow the articles to remain in the solution for a longer period.

## Had the Attic Potters Models?

It appears very probable, even certain, that the Attic decorators had before their eyes a model to guide them. Unfrequently, however, we have not precise recollection of this very important point. One may only reach this conclusion from practical necessity, from modern usages, from a study of ancient paintings, but we are ignorant of the models were selected or how much credit to the fancy of the copyist. The resemblance in the composition of

difference between the ancient and modern productions. We know that they fabricated sometimes in the atelier a pair of vases naturally as similar as possible. But those that we know of are never exactly identical. For this reason I should hardly admit the hypothesis suggested by M. Reichhold of a model already prepared of a vase completely executed in color that the artizans were to copy exactly, line for line, upon the pottery, apportioned to them. If it had been thus we would have had many vases absolutely identical, and we can say they don't exist. I believe in a model furnished by the chief of the studio, perhaps that he had himself entirely executed; perhaps that he had had carried out under his direction by his collaborators. But I imagine it was the correct thing for the artizan to introduce untutored details, to transpose the elements, in some fashion to give to the entire work an air of novelty. It is in this way that an artizan of talent finds occasion to exploit qualities that carry him out of the rank and file and enforce the master's attention as one to be permitted to add his signature as a collaborator.

The majority of the Attic vases show in their decorative aspect that the necessary parts vary abundantly, although they have preserved the fundamental disposition. As to the model itself, we have seen how it should have been composed; it received either directly, or more often at the hands of industrial intermediaries, high art. We may have preserved to us, M. Klein believes, specimens of these studio models in certain *pinax ronds* (round Greek tablets), like those of Epiktetos. But I do not feel assured of this.

Let me add one remark that is essential in order to be a good judge of ancient productions: There is no bar to imitation. On the contrary, it is the soul and even the principle itself of the esthetic Greek. Not only does the ceramist borrow without shame in the superior industries and in high art, but he pillages his neighbors and fellows without any suspicion of commercial revindication. Nicosthenes copies the ships of Exekias; Panphaios takes the Nicosthenes amphora; Chachrylion imitates the ephebes of Epictetus, etc. Those plagiarisms are continued and only receive encouragement. It is for manufacturers who have no genius the most commodious source for subjects. They only have to look around them to be provided for.—E. POTIER in *L'Art Pour Tous*.

Fred C. Newhall, of W. F. Newhall & Son, Lynn, Mass., enjoyed a month's shooting and fishing at Quananiche Lodge, Grand Lake Stream, Me.

## Two Interesting Sevres Vases Shown at This Year's Paris Salon.

AMONG the specimens of decorative art exhibited at this year's Salons in Paris, ceramics were well represented. The Manufacture de Sevres showed a series of modern specimens outside of a collection of biscuit of the 18th century.

Two vases, by Mlle. Rault, attracted especial attention, and we take pleasure in furnishing an illustration of these, thus enabling our readers to study for themselves

SEVRES VASE AT PARIS SALON.

SEVRES VASE AT PARIS SALON.

the unique ornamentation with which these specimens are embellished. French artists are indefatigable in devising new and striking motifs and the ceramic branch derives its share of benefit therefrom.

S. Joseph & Sons, Des Moines, Ia., have secured a lease on the room adjoining their store in the Kirkwood Hotel, and will double their space. The change will be made about Oct. 1.

of the vases and in certain cases the repetition of the same picture upon different specimens attests the existence of a common model. Nevertheless, the copies most resembling one another show some variation in details and differences in execution which exclude absolutely the idea of a stencil borrowed in the panels of different potteries. Mechanical reproduction of a motif appears to have been contrary to the Greek custom, and was not used in their ornaments. The chief reason lies in the fundamental quality and

**Treaties for Protection of American Trade-Marks in Orient.**

TWO treaties were signed in Washington on May 19 between duly appointed representatives of Japan and the United States, for the protection in China and Korea of inventions, designs, trade-marks and copyrights of American citizens and Japanese subjects. The conventions are to be ratified and the ratifications to be exchanged in Tokio as soon as possible, and to come into force 10 days after such exchange. The principal provisions of the treaty concerning China are as follows:

Article I.—Inventions, designs and trade-marks patented or registered by citizens or subjects of one high contracting party in appropriate parts of the other contracting party shall have in the same parts of China the same protection against infringement by citizens or subjects of such contracting party as in the dominions and possessions of the other contracting party.

Article II.—The citizens or subjects of each of two high contracting parties shall enjoy in China the protection of copyright for their works of literature and art as well as in photographs to the same extent as they are protected in the dominions and possessions of the other party.

Article III.—In case of infringement in China by a citizen or subject of one of the two high contracting parties of any invention, design, trade-mark, or copyright entitled to protection in virtue of this convention, the aggrieved party shall have the competent territorial or consular courts of the other contracting party the same rights and remedies as citizens or subjects of such contracting party.

Article IV.—Each high contracting party engages to extend to the citizens or subjects of the other contracting party the same treatment in China in the matter of the protection of their commercial names as they enjoy in the dominions and possessions of such contracting party under the convention for the protection of industrial property signed at Paris, March 20, 1883. "Hong" marks shall be considered to be commercial names for the purpose of this convention.

Article V.—Any person amenable to the provisions of this convention who possesses at the time this convention comes into force merchandise being an imitation of a trade-mark owned by another person or entitled to protection under said convention shall remove or cancel such false trade-mark or withdraw such merchandise from market in China within six months from the date of the enforcement of this convention.

Article VIII.—Unauthorized reproductions by the citizens or subjects of one high contracting party prior to the operation of this convention of the works of literature and art as well as photographs of the citizens or subjects of the other contracting party published after the 10th of May, 1907, and entitled to protection in virtue of this convention shall be withdrawn from sale or circulation in China within one year from the date of the enforcement of this convention.

**KOREA.**

The principal provisions of the treaty concerning Korea are as follows:

Article I.—The Japanese Government shall be bound to be enforced in Korea simultaneously with the operation of this convention, laws and regulations relative to inventions, designs, trade-marks and copyrights similar to these which now exist in Japan.

These laws and regulations are to be applicable to American citizens in Korea equally as to Japanese and Korean subjects in case the existing laws and regulations of Japan referred to in the preceding paragraph shall hereafter be modified according to the principle of such new legislation.

Article II.—The Government of the United States of America engages that in case of the infringement by American citizens of inventions, designs, trade-marks or copyrights entitled to protection in Korea, such citizens shall, in these respects, be under the exclusive jurisdiction of the Japanese courts in Korea, the extra territorial jurisdiction of the United States being waived in the particular.

Article IV.—Korean subjects shall enjoy in the United States the same protection as native citizens in regard to inventions, designs, trade-

marks and copyrights upon the fulfilment of the formalities prescribed by the laws and regulations of the United States.

Article V.—Inventions, designs, trade-marks and copyrights duly patented or registered in Japan by citizens of the United States prior to the enforcement of the laws and regulations mentioned in Article I. hereof shall, without further procedure, be entitled under the present convention to the same protection in Korea as is or may hereafter be there accorded to the same industrial and literary properties similarly patented or registered by Japanese or Korean subjects.

Inventions, designs, trade-marks and copyrights duly registered in the United States by citizens or subjects of either high contracting party or by Korean subjects prior to the operation of the present convention shall be similarly entitled to a patent or registration in Korea without the payment of any fees, provided that said inventions, designs, trade-marks and copyrights are of such a character as to permit their patent or registration under the laws and regulations above mentioned, and provided further that such patent or registration is effected within one year after this convention comes into force.

Article VI.—The Japanese Government engages to extend to American citizens the same treatment in Korea in the matter of the protection of their commercial names as they enjoy in the dominions and possessions of Japan under the convention for the protection of industrial property signed at Paris, March 20, 1883.

"Hong" marks shall be considered to be commercial names for the purpose of this convention.

**The Limoges China Trade.**

THE British Vice-Consul reports that the trade of the Limoges district in 1907, although below the average, was fairly good until November. There was ill-feeling at the end of the first six months on account of trouble between the china manufacturers of Limoges and the United States customs with respect to the alleged undervaluation on invoices of Limoges ware exported to the latter country. These troubles were brought to an end in June by the intervention of the French Government, and on Sept. 29 an American official commission arrived in Limoges. This commission made an inquiry into the market price of Limoges china, and finally appointed a commission composed of the president of the Chamber of Commerce of Limoges, the Consul of the United States and a manufacturer, to draw up a schedule of prices of china based on the average prices of all manufacturers.

The trade of the district was affected in the second part of the year 1907 by the American financial crisis. Numbers of workmen were discharged in December. Buildings and improvements in the factories were stopped. China works were fairly busy. There was an output of 3,574 fired, an increase of 108 on 1906. Coal used amounted to 66,000 metric tons for china works, only 20,000 tons of which came from Newport. Prices quoted were very high at the end of the year.

Contracts for the first six months at Limoges were £1 8s., Newport 15s., but in October prices went up to Limoges £1 13s. 6d., Newport 19s.

The tile factories are very prosperous, and orders exceed production.

W. C. Mullin has begun business as a jeweler and optician in Livingston, Tex.

George H. Greer, Jackson, Tenn., is enlarging his store and installing new mahogany fixtures. When the work is completed the store will be one of the most attractive in the south.

MODERN ART IN BRONZE.

"HOLDING the Load" is the title given an attractive bronze offering on

exhibition at the Fifth Ave., New York, salesrooms of the Gorham Co. The statuette is the work of Anna Vaughn Hyatt and represents two rugged horses descending an incline. They are holding back as if to prevent the advance of a heavy wagon. The harness of each horse is taut, and the wagon tongue projects ahead of the team. The base on which the horses stand represents a rough country road. Another subject seen at the same salesrooms shows an American bison with an arrow embedded in its side. The bison is represented with lowered head. A chubby bronze cupid seated on a sphere, on the front of which is a sun dial, is another attractive subject. The offering bears this inscription: "Time flies on the wings of love." Cupid holds clasped in his arms an hour glass.

SEASONABLE NOVELTIES IN CLOCKS.

AT the new salesrooms of the Seth Thomas Clock Co. in the Silversmiths building, 15 Maiden Lane, New York, are many attractive additions to the extensive line of clocks manufactured by this well-known concern. Among the new pieces now on exhibition is the Lusitania hanging set. It is intended for hanging against the wall, and is richly finished in highly burnished gold. The length of the clock is 20 inches, with a width of 9½ inches. The porcelain dial rests in the center of an intricate scroll design frame, and is protected by a French sash and convex beveled glass. The clock is fitted with an eight-day lever time movement. The two candelabra accompanying the clock are finished in keeping with the central piece, and each has three gracefully curved arms bearing the candle cups. Another new line of clocks is seen in the automatic eight-day alarms shown in five different styles, among which is one having an oblong verde antique base decorated in scroll work and supporting a rounded gun metal case. The hands are of gun metal, while the dial is of gold with a silver center. The numerals are black, and are in raised work. These styles combine living room mantel forms and alarm clocks.

THE RAMBLER.

Gold rings, valued in all at about \$1,000, were stolen, some time ago, from the store of L. W. Pennington, Worcester, Mass. The store had been temporarily left in charge of a janitor, who has been exonerated after a thorough investigation. It is believed that the theft was committed while the janitor, who was deaf, was engaged in cleaning windows in the store.

# Fahys Dust-proof Cases

It is necessary for Engineers, Firemen and Mechanics to have their watch movements absolutely protected from dust and dampness to ensure their keeping accurate time.

This can be done only by using a case so well made as to exclude all dust and dampness, such as Fahys Cup Screw Cases, made in "Permanent," "Bristol" and "Montauk" qualities.

# A STAR PERFORMANCE

"Up above the world so high  
Like a diamond in the sky."

¶ Because the most painstaking care is exercised in cutting the diamonds we sell.

¶ All the stones are perfectly round, of the proper thickness, and all the facets correctly laid.

¶ Producing the most possible brilliancy at the least possible price, for there is but one slim profit between the price we ask and the actual cost of production.

## INTERCHANGEABLE CHATELAINÉ WATCH OR LOCKET FOB

The above illustrations represent a few of our newest ideas. The Chatelaine Watch Fob and the Chatelaine Locket Fob to be worn at the belt: more secure than the old fashioned Chatelaine; does away with soiling the dress or shirt waist: safety catch on back of the Watch Fob, making the watch secure, also Washburn fastener, attaching Fob to belt.

Our Locket Fob has already proven itself to be a great seller. We predict for our Watch Fob great results. It is a winner. Write for samples. We sell the wholesale trade only.

OFFICE AND FACTORY  
Attleboro, Mass.

NEW YORK OFFICE  
3 Maiden Lane

Flat belcher ring as received with stone badly worn.

How the same ring looks when stone is reset without new claws. Stone is not secure and point is below inside of ring.

How we splice settings and solder in new claws; seams do not show and rings are as perfect as when originally made.

How ring looks with new claws and stone securely reset. Entire ring is finished like new.

When we tell you that we have received as many as 75 diamond rings in one day for new claws and settings, you will not think us extravagant for using a full page in THE JEWELERS' CIRCULAR to exploit this feature of our business, but will wonder if you are getting your share of claw work.

99 out of every 100 owners of diamond rings willingly pay \$1.50 to \$5 for new claws or settings on their rings, but would not buy new mountings for \$5 to \$25.

It is worth while to familiarize yourself and your employees with this work, as it is one of the important little things that helps to make our business profitable.

## WENDELL & COMPANY

The firm that did much to change the repair end of the Retail Jewelry Business from a source of worry and dissatisfaction to one of pleasure and profit.

7 John Street  
New York

TWO WONDERFUL SHOPS

57 Washington Street  
Chicago

Oval ring as received with worn claws. Stone cannot be reset, as it would be too low to look well and the point would come below the inner circle of ring.

How same ring looks with new claws and stone securely reset. Entire ring is finished like new.

Oval Belcher ring as received with claws badly worn. Stone cannot be reset, as it would be too low to look well and the point would come below the inner circle of ring.

(See cut No. 2 of flat belcher.)

How same ring looks with new claws and stone securely reset. Entire ring is finished like new.

THE PRICES QUOTED ABOVE FOR NEW CLAWS AND SETTINGS ARE SUBJECT TO OUR CATALOGUE DISCOUNT.

WE CAN PUT NEW CLAWS AND SETTINGS ON MOUNTINGS TAKEN IN TRADE AND REFINISH THEM SO THEY WILL BE AS GOOD AS NEW.

WE RETIP CLAWS AND MAKE NEW SETTINGS FOR CLUSTER MOUNTINGS SO THEY ARE AS GOOD AS WHEN ORIGINALLY MADE, AT PRICES THAT MAKE IT ADVANTAGEOUS FOR THE OWNERS TO HAVE THIS WORK DONE.

Carrying no diamonds in stock, entering and tagging each piece of diamond jewelry as received, then giving to each workman but one ring at a time, which is returned before he receives another, prevent any possibility of diamonds being exchanged while in our possession.

CROWN PLIER No. 331

For clamping the collar of crowns on dust-proof cases while removing same from pendant. This is usually found a difficult task but easily done with the help of this plier.

Nickel plated.....each, \$ .60

1 Doz. BARREL HOOKS (threaded w  
Finished Drill and Tap

With this outfit a new barrel hook can be put barrel in a short time, and in a proper manner will not pull out. Price..... Same as above without Taps and Drill, per doz.

JEWELERS' SQUARE SAWS, ROUND BACK

Hardened by a new process, giving a "toughness" not found in other brands of saws. In No. 00000 to No. 5 Price, per gross, \$1.

ECHARCO WATCH GLASS CABINET No. 15 (Patented) Price, each, \$16.00

This cabinet has many new features not found in any other. Novelty and usefulness are the chief arguments in its favor.

Construction and Material.—The cases are made of oak, finely finished and of attractive appearance. Sides are paneled. Partitions of basswood and put together in best manner possible.

Partitions are skeleton, preventing accumulation of dust, chips, etc.

Bottoms of cabinets are hollow to receive chips, dust, etc.

Arrangement for Glasses.—The nine drawers contain 1,547 spaces to hold glasses in upright position.

Labeling of drawers, as shown in cut, is on the pulls of the drawers and done in gold bronze on black background.

Dimensions.—24 inches wide, 29 1/2 inches high, 12 inches deep; weight, 45 lbs.; with packing case, 75 lbs.

The construction of drawers, the arrangement of partitions to economize space and weight, and the novel method of showing contents on drawer-pulls are all prominent characteristics and extremely well thought of.

Top View, Showing Skeleton Frame of Drawer. Accumulation of dust and chips is impossible.

SHELDON'S PATENT HAIRSPRING COLLET REMOVER

No need of any more distorted hairspring bent balances.

Every watchmaker knows how troublesome to remove the collet without either distorting hairspring or bending the balance; with the use of this tool the difficulty is overcome. The tool is provided with a pair of spring fingers, which at the ends are ground very thin and sharp. By tilting the balance the jaws may be slid under the hairspring and by pressing the jaws together will readily loosen the collet and then by turning the central screw, which has a hole in the end to receive the staff pivot, you can force the collet from the staff, without injury to balance or hairspring. The adjustable screw nut is provided to avoid wear or injury to the jaws. A glance at the illustration will demonstrate the utility of this tool. Finely nickel plated.

Price, each, \$1.25

RING SEPARATING PLIER No. 1

A most effective device for cutting rings from fingers, when too tight to be removed otherwise. A few turns of the saw will cut a ring of average weight. Full nickel plated

Price, each, \$1.75

A handsome Booklet, 8 inches by 5 inches, fully illustrating Zipperer's tools for watchmakers will be mailed you upon receipt of a postal card, giving your name and address.

# Real Rose Hat Pins

**This will be the largest selling article this Fall and Winter—it is already.**

So remarkable are the sales of DELAMOTHE Real Rose Hat Pins that we do not expect dealers to believe same until they have actually tried them out. It does not seem possible that during JULY this product was sold by Retailers at the rate of two to twenty dozen daily—EVERY day. The Retailers' profit is unusually large. Not only are they proved big sellers, but they are a great attraction for the stores that sell them. The largest Advertising Campaign in years is behind this product. Every possible Advertising and Selling Help will be furnished Dealers gratis. This product will be sold to the best Dealers only, and retail prices will be strictly maintained.

DELAMOTHE Real Rose Hat Pins are made out of live roses, changed by a secret process into metal, then finished in attractive colorings and mounted on Hat Pins. This SECRET process is a recent discovery of Prof. L. G. Delamothé, a noted French Electro-Chemist, and is owned solely by the Delamothé Natural Art Decorating Co., Spokane, Washington, for which this Company is the Sole Distributor. It is the ONLY process by which an OPEN Rose can be perfectly metallized. This product is made in the finest manner possible, and its high quality will be maintained. The Roses used are grown in Oregon and Washington, famous the world over for their beauty and superiority—made where these Roses grow. No two Real Rose Hat Pins are alike. Finished in five colors to conform to the prevailing fashions in millinery. Six sizes, from the smallest rosebud to the full blown flower.

**Not sold through Jobbers.**

*Do not buy inferior imitations. Sold direct only.*

**Write for Illustrated Price List**

*Or have Two Dozen Trial Assortment sent on 30 days approval.*

# Leadership in Business

like leadership in anything else, is simply the working out of nature's law of the survival of the fittest. Show me a business that is successful and I will show you, in ninety-nine cases out of a hundred, one that deserves to be. The law of the universe constantly seeks and demands the best and casts out the useless and unfit.

If you would be successful you cannot afford to give anything less than the best that is in you, and that man is worse than a fool who undertakes to succeed by trickery, chicanery or dishonesty, for when he attempts to cheat his neighbor, or deliver less than he sells, he injures himself beyond repair. His deceit will find him out and surely tear down and destroy.

It has been our constant aim in business to deliver more than we sold. Our sun is still shining.

STORE OF HENRICKSEN JEWELRY CO., DULUTH, MINN.

The Arnstine Bros. Company, Cleveland, Ohio:

DULUTH, Minn., June 20, 1908.

*Gentlemen*—It gives us great pleasure to express our opinion as to benefit and result through the use of your Catalog. For the last four years we have used it with pronounced success believing it has added materially in increasing the business each year over the previous one. You are certainly to be complimented on your thorough knowledge of the Catalog business, as your accurate system and mode of improvements in same from time to time comes up to the expectancy and demand of the most critical. The goods are of a high grade and placed before the customer in a tempting manner, and we at all times feel the working power of the Catalog. It in all is very gratifying and speaks volumes for the good work your Catalogs have done for us. We can state that our last book was admired by all recipients, a great many taking the trouble to write or telephone us thanking for the favor of receiving our Catalog. Wishing you success in your future labor, I am, respectfully,

HENRICKSEN JEWELRY CO., per M. Henricksen.

**This firm used The Arnstine Bros. Company Catalogs in 1904, 1905, 1906, 1907, and again placed an order for 1908.**

STORE OF THE AMERICAN JEWELRY CO., BAKERSFIELD, CAL.

(Extracts from letter.)

BAKERSFIELD, Cal., Feb. 6, 1908.  
 The Arnstine Bros. Company,  
 Cleveland, Ohio:

*Gentlemen*—In regard to results of our Catalog business as inquired after by you, we beg leave to state the following: Three years ago, we used your book and, though we were inexperienced in the needs of that line (Catalog business), we increased our business materially. In 1906, the second book we used of yours doubled our former year's business. Of course we were gaining knowledge of the Catalog business all the time, and even in face of the financial condition that the year closed in, we still nearly doubled our last year's business in December.

Business here (everybody says) is quiet, but we are working nights and feel that our steady hold and gain is attributable only to the liberal use of the book. You'd be surprised to know how far reaching this method of getting business is. Our book has been sent from the coast to Minnesota and south to New Orleans.

It's the only way to kill off opposition, putting as it does a full jewelry stock in the hands of your competitors' customers to study over at their leisure; and comparison is usually odious to the sleepy, old style merchant. Therefore we say "The Catalog for us."

Yours for a still larger year,  
 THE AMERICAN JEWELRY COMPANY.

**This firm used The Arnstine Bros. Company Catalogs in 1905, 1906 and 1907, and again placed an order for 1908.**

Our Salesmen visit every State in the Union. If you are interested, and will notify us, our representative will take pleasure in calling on you and explaining our method

# SPECIAL Blackinton Locket Combination

## 18 Old Reliable W. & S. B. ★ Locketts for \$31.15

Above are shown 18 of the handsomest and most salable locketts ever produced. The price of this combination of locketts to Retail Jewelers is \$31.15, and the total retail selling price is \$51.92.

This is undoubtedly the most desirable combination of locketts ever offered. There is not a poor or doubtful seller in the lot. With the locketts we give free of charge a handsome velvet lined case in which to display them, and keep them in perfect condition.

This combination is sold only through the jobbing trade and the universal price of the 18 locketts and velvet lined case is \$31.15 to Retail Jewelers. The retail selling price of each locket is plainly marked on a tag, the prices ranging from \$2.08 to \$3.50 and aggregating \$51.92 for the lot.

Order early to insure prompt delivery. If your jobber cannot supply you write us direct and we will tell you where to get the goods.

These goods are NOT sold to department stores or retail catalog houses.

# A New Pattern in Toilet Ware

The distinguishing feature of the new Whiting FLORENTINE Toilet Ware is its refinement of line, of ornament, and of conformation.

The mirror handles are conveniently long, the brush backs of a distinctive shape, symmetrically elegant and adapted to advantageous service, while the exceptional flatness of all the mountings adds to the individual character of the set.

Workmanship and materials are of the best quality, and the Florentine is finished in four attractive styles—plain, engraved, etched and repousse.

# Cigar Chests

THERE IS ALWAYS A DEMAND for the finer products for the use of gentlemen. To this class belong the Cigar Chests described in these paragraphs—except that instead of calling them "*the finer*" we should call them "*the finest.*" They furnish an added luxury to smokers, and an attractive opportunity to the Trade.

A DISTINCTION—It is important to note at the outset that these goods are not to be confused with other chests which have long been on the market and which have obvious disadvantages. For example, the efficiency of the last named goods depends on keeping a proper and even humidity by means of a moist blotter or pad—an impossibility. The pad is generally too wet or not moist enough; or, what is most frequent of all, is forgotten altogether and left dry. The contrivance is too troublesome to care for and the smoker generally gives up the attempt.

These Cigar Chests are totally distinct in principle and construction, and accomplish their purpose perfectly. They are absolutely *air tight*. All that is necessary is to keep the cover closed and locked. The natural virtues of the contents are retained unaffected by external atmospheric conditions.

Capacity	Outside Measurement				Oak or Mahogany	Rosewood or Circassian Walnut
	Width	Length	Depth	Depth		
50 Cigars	8	11½	x 5		\$8 50	\$13 00

| <i>Bon-Bon Boxes</i>            | <i>Hat Pins and Brooches</i> |

embody several of the latest creations from the celebrated French artists and designers, Rene Lalique, Eugene Feuittate, Rene Beauclair and others.

Many of our newest pieces have been made up from the advance 1909 fashion sheets from Paris, and these pieces have not as yet been made abroad.

We are manufacturing a line in enamel ware that duplicates the European creations in color and finish, and far exceeds anything of its sort in material and workmanship.

Our representatives are now out with a full line of samples and it will pay you to await their call and see these new goods before purchasing

## ENGELSMAN'S PATENTED COMBINATION "GEM" DISPLAY RINGS and ADJUSTABLE STONE HOLDERS MEET A LONG-FELT WANT

THEY ARE MONEY-MAKERS AND MONEY-SAVERS

UNMOUNTED STONES of any size and shape can be displayed advantageously, as is herein illustrated. Your investment in stock can thereby be *decreased*, as you need not mount them up in expensive settings. Your sales will also *increase* by being able to exhibit unmounted stones. The prices are *low* enough to induce you to buy them and *save* you from incurring frequent losses caused by the awkward handling of the tweezer when your customer desires to examine unmounted stones. Try them. For sale by all jobbers.

Due to greatly improved automatic machinery and reduced cost of production, we are now quoting these as follows:

Sets of 18 (full set), in box,	\$6.00
" " 12	" " 4.00
" " 9	" " 3.00

## Artists and Designers Agree

That the most meritorious compositions are those attaining harmony and breadth without superfluity of detail.

## Hostesses and Housewives Agree

That the best Sterling Silver Tableware is that having only enough ornamentation to lend the proper amount of grace to the dignity of clear, clean silver.

Note how Ye MOUNT VERNON PATTERN fills these requirements, being designed to ye Colonial taste of Strength, Beauty and Simplicity

*Its Success is Assured and Continuous*

## Rogers, Lunt & Bowlen Co.

Greenfield, Massachusetts

*Write for Catalog*

## Individuality

In your selection of bags it behooves you to buy those bags which stand out prominently as possessing an individuality of pattern, as opposed to the common goods scattered promiscuously around. You will find that the women know and discriminate in favor of the former every time. An inspection of the W. & D. line by you will lead you right.

# “CHIPPENDALE.”

The word “CHIPPENDALE” is synonymous with refinement, grace, strength and extreme practicability. The Chippendale pattern recently produced by this company represents the Chippendale spirit and feeling in every particular. It is without question the most beautiful line of flatware ever placed on the market.

## THE WILLIAM B. KERR CO.

*Specialists in Small Wares and Novelties in both  
Gold and Silver*

Three essentials of commercial success distinguish  
The William B. Kerr Company's productions:

**Admirable Workmanship.**—Every article exhibits in its smallest detail the perfection of modern silversmithing.

**Attractive Design.**—The graceful lines and refined ornamentation demanded by the best customers characterize all these productions.

**Moderate Price.**—Despite their superiority of design and workmanship, these goods are sold at thoroughly practical prices.

Definition of a Battleship:

# "A MACHINE TO FIGHT BATTLES WITH"

We do not require a Battleship; our battles HAVE BEEN WON; the constant increase of our business attests to the veracity of our statement.

Follow your predecessors if you have not fallen in line, it will redound to your benefit. Send US your orders for WATCHES DIAMONDS, JEWELRY, WATCH CASES, MOVEMENTS, FESTOONS, LA VALLIERES, LINKS, SCARF PINS, BROOCHES, NECKLACES, SIGNET RINGS, STONE RINGS, and EVERYTHING appertaining to the jewelry business.

*You will save Money. Get the Styles and Dependable Qualities*

WE MAKE

## The Alliance Ring

The graceful style of the Alliance Ring is rapidly supplanting the use of the old-style wedding ring. The joints are invisible, and whenever engraving is desired it is done in the inside surface. Can be easily separated by inserting a pin in inside pinhole.

14 karat, 3 dwts., each, \$1.25 per dwt.; in dozen lots, \$1.25 per dwt., net; 18 karat, 3 dwts., \$1.40 per dwt.; in dozen lots, \$1.30 per dwt., net.

MADE ONLY BY

**LEONARD KROWER**

Wholesale Manufacturing Jeweler and Optician  
536-538 Canal Street, New Orleans, La.

**F**OR CLASSIC BEAUTY the coiffures of the Directoire Period were unexcelled. The primary inspiration came from ancient Greece, as witness the BANDEAUX, which will be found here in perfection. Indeed, all the Hair Ornaments now displayed by this house, are faithful reproductions—actual copies—of the creations of the Period. The Directoire COMBS glow with characteristic beauty. The rather large BARRETTES of the epoch will be a revelation to many. Nor should one fail to see the appropriate HAIR PINS taking the shape of Bells, Olives and Loops. Women's eyes sparkle at seeing them.

*Creating Importers of*

# The "Krementz-Bodkin Back" STUD and VEST BUTTON

Pat. Feb. 16, 1904

Krementz & Co. believe the trade will agree that they understand the jewelry business sufficiently to know that the "Krementz-Bodkin Back" Stud and Vest Button is the simplest and best mechanical Stud or Vest Button made.

The "Krementz-Bodkin Back" Stud and Vest Button is not one piece, but is one-piece construction, which makes it very simple and the strongest and most durable, because:

- 1—It is Solderless
- 2—It has no spring or hollow wire to bend or break
- 3—It is made of solid, hard spring metal throughout
- 4—It is made by Kremenz & Co. which insures perfect quality, construction and workmanship

THE STORY OF THE HEAD

## Krementz & Co. Invite Comparison

Krementz & Co. stand back of their assertion. All "Krementz-Bodkin Back" Studs and Vest Buttons are sold also under the unique Kremenz Collar Button Guarantee.

THE STORY OF THE BODKIN BACK

### GUARANTEE

If for any cause whatever, a "Krementz-Bodkin Back" Stud or Vest Button should be damaged either in the hands of the dealer or wearer, a new one will be given in exchange, without charge. "Krementz-Bodkin Back" Studs and Vest Buttons are made in large variety of patterns in 14-kt. gold and platinum, set with pearls and diamonds.

Perfect  
 Vermicilli  
 Decoration

THERE ARE many types of so-called Vermicilli Trim on the market. The differences are not so easy to point out in words, but are at once apparent to the eye. The standard for comparison is furnished by the Vermicilli Decoration executed by this factory.

A certain fineness, daintiness and delicacy of arrangement, a richness of effect and refinement of design, coupled with rare perfection of color—These are some of the qualities which cause the Vermicilli products of this house to stand ahead.

STANDARD IN

# White Stone Combs and Hat Pins

Our line of White Stone Combs forms a class by itself. They are warranted to retain their brilliancy, and should any of the stones fall out, either in the hands of the dealer or consumer, we will repair free of charge. This guarantee assures customers and makes sales. Our line of Combs and Hat Pins consists of over 100 new styles of exclusive designs which sell at popular prices.

On application we will send a selection on approval, with all charges paid

TO THE TRADE:

We are working hard now compiling our catalogue, and our compiler asserts that it will any former edition of that valuable work.

It will be a great deal more than a mere picture book; it means the most careful selection of choice goods from every part of the work means reliability, salability and right price means that every dealer loses money unless "goes by the book."

If he buys from this book he gets mighty to cost of production, and right into actual quarters, for we are the foremost concern of the kind.

People who write that they can fill orders come from our catalogue write falsely, as it cannot be done. To meet our prices they must substitute an inferior article.

Send for a copy of our book, and get in a rock.

For the trade only—our new, big catalogue, 100,000 items, sent free.

# PENNSYLVANIA WATCH CASES

SOLID  
 Trade **XXX** Mark  
 GOLD

No. 1013

**A NEW ONE AND  
 A GOOD ONE**

MR. EXCLUSIVE JEWELER.

Do you wish a case of maximum value at a minimum cost, in shapes the thinnest and models most superb—finish and engraving that of the finest 14K. solid gold line—a solid gold case throughout of extreme heavy weight at about the same price the best makes of gold filled?

This is a large order but WE ONLY can fill it in every respect. These cases are made in triple stock, the outside of which is 14K., and this 14K. stock is 1/2 of the total thickness of the backs. The inside is 10K. and a low K. between, which is crystalized, making a harder, stronger and stiffer case in every way than either a filled case or 14K. solid. Ask your Jobber or write us direct for Prices and Samples

"LORD YORK"

"Send us a card with your name and address and we will send you an illustrated catalog describing and illustrating 'LORD YORK,' and his associates. He is the most interesting character for the Retail Jeweler in existence to-day. You can't afford to be without him."

**AUGUST GRIFFOUL** 313 HALSBY STREET NEWARK, N. J.

# The New Ideal Keyless Engraving Block

This is a beautifully finished Block and the keyless advantages are marked. The jaws are actuated by rotating bronze milled ring of head. The method is a great improvement over the key system, is very rapid and entirely satisfactory in every way. The jaws are adjustable and it is good practice to set one jaw stationary while the other should be permitted to swivel.

The turntable revolves on a self contained train of tempered steel balls, which may be removed in an instant, when a less sensitive motion will be obtained, or the turntable may be locked to the base by the insertion of the locking pin. Every Block guaranteed and highly recommended.

No. F95. Price (complete with attachments), \$16.50

If you have not a copy of our double-sized 440-page Catalogue, write at once. Sent gratis upon application.

# "New Process" GILLETTE Blades

## Have You Got Them in Stock?

"New Process" GILLETTE blades have been an instantaneous success.

They differ in price, quality, appearance and style of package from the previous kind, and the public is being notified of the change by full-page advertisements in all the leading magazines.

More than two million GILLETTE users will now accept only "New Process" GILLETTE blades. If you have them in stock before other dealers in your locality you will get the business, and at the new price your profit is a very liberal one.

"New Process" blades are manufactured by newly-invented machines and processes, making them superior in appearance, operation and endurance to any blades ever produced by anyone.

These machines are automatically regulated, and grind, hone and sharpen each blade individually with the utmost precision.

Every cutting edge is perfect, and possesses a degree of keenness not produced by any other process.

"New Process" blades are finished with a high polish that renders them easy to

clean. Since dust and moisture do not cling readily to a polished surface, these blades are practically immune from rust.

"New Process" blades are packed in a handsome nickel-plated box which seals itself hermetically every time it is closed. This shuts out all dampness and effectively protects the blades from rust in any climate, land or sea. When empty, the box forms an attractive waterproof match safe.

**The set now contains twelve blades.**

**The Retail Price is \$1.00 per set.** Twelve sets are packed in a carton.

To those who are not handling the GILLETTE, we suggest, "Get Busy." Get the sales resulting from our huge advertising campaign—the increased business and profits that the co-operation of our Sales Department will bring you.

YOUR customers are continually seeing GILLETTE advertisements and they want the razor. Eventually they buy it somewhere.

**WHY NOT OF YOU?**

Write us for catalog and liberal discounts to dealers.

No. 9.

## The Order of Silver Trophies Supplied by Allentown, Pa., Jewelers.

ONE of the largest orders for prize cups which has ever been given to a Pennsylvania jewelry house was obtained some ago by Fahler & Landis, jewelers at Hamilton St., Allentown, Pa., from the Allentown Fanciers' Association of the Allentown Fair, the cups being principally the best poultry exhibits. In all there are about 80 cups. A number of the \$2,500 worth of prizes which the jewelers supplied for the fair are shown in group in the illustration which appears herewith. Some of the cups are plated, but most are sterling silver. A few were won last year, but as they must be won twice before they are awarded, they are practically cups of the present season as well.

Last year Fahler & Landis obtained only a part of the order, but this year they were fortunate in supplying everyone of the prizes offered, and their enterprise in getting this has redounded to the credit of the

firm in many ways, as the fair draws out from all over the country people who never previously exhibited at any other poultry exhibit except at Madison Square Garden, New York. Not only has the large order been the subject of considerable newspaper comment, but the exhibit of so many cups has attracted many people to the jewelers' store and has been the cause of their obtaining orders for at least 10 additional cups for tennis tournaments, athletics and other events which might otherwise have been placed in Philadelphia, Pittsburg, New York or other large cities.

### Renaissance Basin of Mother-of-Pearl.

MOTHER-OF-PEARL, the shell of the pearl oyster, which also produces the precious pearl, has at all ages found favor as a decorative material for fancy work, and the jeweler and goldsmith has made extensive use of it. The outer layer of the shell consists essentially of carbonate

of lime, which coincides in character with calcareous spar, while the inner mother-of-pearl layer and the pearls are identical to aragonite, a variety of calcareous spar occurring in Aragon. Hence the mother-of-pearl and the pearls are considerably harder than the outer shell. The latter consists of closely set little rods standing perpendicularly on the inner mother-of-pearl layer. The mother-of-pearl consists of very thin closely superposed flakelets of minute size. Therefore, it does not form a continuous covering of the inner shell, but is composed of separate, irregular little tablets of varying size closely set together.

The artists of the Renaissance were especially clever in the employment of mother-of-pearl in conjunction with jewelry, gold and silver work, etc., and we show on the front page of this issue a handsome basin of mother-of-pearl and silver a fine specimen of the school of Benvenuto Cellini from the 16th century, and preserved at the Green Vaults in Dresden. The basin is one of the masterpieces of its time.

PART OF THE \$2,500 WORTH OF CUPS SUPPLIED BY ALLENTOWN, PA., JEWELERS FOR THE ALLENTOWN FAIR SHOW OF 1908.

## WEBSTER SAYS:

“The word ‘Automatic’ is applied to a self-moving machine or one which has its moving power within itself. The moving power is usually a spring or weight, particularly the former.”

In applying the word “Automatic” to the Larter Shirt Studs and Larter Vest Buttons we wish to convey the full meaning of the word as “Webster” defines it.

The Larter Shirt Studs and Larter Vest Buttons are automatic in action, because they are moved by a strong spring which obviates the necessity of pushing or pulling the backs into place so as to prevent them from falling out or working out of a button-hole or eyelet-hole.

This is one of the strongest points in favor of our line of Larter Shirt Studs and Larter Vest Buttons. Each is made in the largest variety of patterns on the market.

## A Babylonian Vase Inlaid With Ivory and Precious Stones Dating from 4500 B. C.

By Prof. E. J. Banks, in the *Scientific American*.

It may seem to the layman that the Assyriologist and Egyptologist are in the efforts to bring to light the earliest traces of civilization, for during the last decades each has startled the world by announcing that he has discovered the remains of a civilized man of five, six, and 10,000 years ago. In confirmation of these statements, he produces strange objects from the ruins of Babylonia or Egypt. Yet extremely ancient antiquities are rare. In Bismya, the ruin in central Babylonia, as field director of an expedition from the University of Chicago, I recently reported, and which has proved to be the nucleus of the oldest known city in the world, was discovered, among other re-

FRAGMENTS OF VASE INLAID WITH IVORY.

Other things, a blue soapstone vase engraved with human figures and inlaid with ivory and precious stones.

This vase, when found, was in fragments, some of which were recovered from among the remains of fragments of vases of other periods.

All were lying in an ancient heap of the temple, where they had been thrown. The position of this heap

SKETCH OF THE DESIGN ON THE VASE.

was buried beneath the ruins of structures known to date from 3800 B. C., and containing a number of inscriptions on bricks, as well as the style of art, point to a date not far from 4500 B. C. The original diameter of this vase of blue soapstone was about 22 centimeters (8 3/4 inches); the height of its nearly vertical body was about 20 centimeters (eight inches), and the three surviving fragments represent somewhat more than a quarter of the vase.

One of the most remarkable features of the vase is that it is unlike anything before discovered in any ancient ruins. In the three fragments are represented at least 13 human figures, either entire or broken away. The two central figures are musicians, who are playing upon

their five and seven stringed harps as they are marching along. If for no other reason, the engraving is remarkable because it gives us the picture of the musical instrument of more than 6,000 years ago. Behind the musicians marches a person of importance, possibly the king, for from his hat project three rays to distinguish him from the others in the procession. Behind him are two other figures. One, judging from his size, is a boy; the other is holding up his hands in the attitude of worship. Before and above the musicians are figures, who are represented as running to meet the procession. One man holds in his hand a branch of a tree, while other branches are scattered about among the figures. The engraving may represent one of the religious processions common in later Babylonian history, when the gods were carried about the city. Yet the running figures more likely indicate the triumphal procession of a victorious king, accompanied by music, and an occasion of great joy is represented.

Still more remarkable is the execution of the engraving. While the field of the picture is represented by the blue stone of the vase, the figures are partly composed of inlaid materials. When found, the inlay, with the exception of a few pieces of lapis lazuli in one of the tree branches, was missing, yet the deep grooves into which it had been set remain to show where it had been. Later I discovered a square piece of ivory, which formed the skirt of the figure bearing the branch. From this one ivory dress we may infer that the dresses of all the figures were of the same material. The faces, arms and feet are represented in relief, and the long braids of hair and the hats are also of the stone of the vase.

Judging from other objects found in the Bismya temple it would seem that the eyes were inlaid with blue stone. The material employed to represent the bracelets and head bands and other inlaid parts cannot be known, yet from the dump small pieces of red and blue stone, mother-of-pearl, and engraved ivory appeared. Some of them may have been used in the missing parts of the vase.

A chief peculiarity of the art is that the figures are represented with enormous noses, imparting to the face the grotesque appearance of a caricature. The few specimens of early Babylonian art at hand, while representing the nose in a straight line with the forehead, fail, with the exception of a few terracotta statuettes, to exaggerate to such an extent. The faces of the figures are shaved; the hair is braided and hangs down behind. A hat, either with or without a band and rays and a ribbon, is worn; the rays probably distinguish the rank of the wearer. Apart from the hat, the one other piece of wearing apparel represented on the fragments of the vase is the short skirt, which is known to be the Babylonian costume of about 4500 B. C.

This unique vase of the greatest antiquity, so different from anything previously discovered, therefore opens a new study in the history of early art; it is one of the most highly prized objects from the most ancient civilization of Mesopotamia.

### Silver Loving Cups Presented to the Director of the Bureau of American Republics.

THE ambassadors and ministers of the Latin-American republics stationed in Washington, who represent their governments on the Governing Board of the International Bureau of American Republics, recently presented to the Director of the Bureau, John Barrett, two handsome silver loving cups in expression of their appreciation of his efforts, not only in making a success of the cornerstone laying of the new building, but in broadening out the work and influence of the institution.

The cups were presented to the director

LOVING CUPS PRESENTED TO DIRECTOR BARRETT.

by a committee, consisting of the Minister of Peru, Felipe Pardo; the Minister of Colombia, Enrique Cortes, and the Minister of Chile, Anibal Cruz, all of whom made brief addresses, thanking the director on behalf of the Latin-American countries for what he had done to develop commerce and friendship between them and the United States.

The cups are of a graceful design, 24 inches in height. The first bears on one side the words:

*A John Barrett, Director de la Oficina Internacional de las Repùblicas Americanas.*

and on the reverse side is inscribed:

*Once de Mayo de 1908, Washington, D. C.*

The second cup carries the autograph engraved signatures of the 19 Latin-American ambassadors, ministers and chargés de affaires in Washington.

## Annual Report on the Production of Precious Stones.

Text of the United States Geological Survey's Advance Pamphlet on Gems and Gem Minerals for 1907, compiled by Douglas B. Sterrett.

(Continued from issue of Sept. 23.)

### DIAMOND.

#### UNITED STATES.

**Kansas.** The work of testing the Arkansas diamond deposit continues quietly. A brief report of the locality was prepared by Philip F. Schneider for the Arkansas Bureau of Mines.

The latest authoritative information on the Arkansas diamond deposit has been given by Mrs. Kunz and Washington in a paper before the February meeting, 1908, of the American Institute of Mining Engineers in New York. The general geology of the area and the petrography of the weathering of the peridotite are described as were in a paper by the same authors incorporated in this report for 1906. In tests made with a diamond drill the peridotite was proven to be of 80, 186 and 205 feet. The green and yellow grounds underlying the layer of black "gumbo" soil were found to extend down to 200 feet in places and are estimated to average 100 feet in depth over the area. The outcrop of peridotite is estimated to cover about 40 acres, and it may be found larger after further exploration.

General conditions concerning future work are fully discussed. Water supply, timber and coal are available, and labor and transportation facilities can probably be satisfactorily arranged. Some diamonds have been found, with an aggregate weight of about 200 carats. The largest stones weigh less than 6½ carats, though the average compares favorably with the general run of the South African diamonds. There is a large proportion of white stones, many of which are free from flaws and are very brilliant. Some of the yellow diamonds are also of exceptional purity and color. The genuineness of the occurrence of the diamonds in their matrix is reitended, and the occurrence of one stone embedded in the green ground at a depth of 15 feet is cited to strengthen the conclusion. The quantity of yellow ground that can be readily washed is large. The peridotite on the borders of the outcrop are in such hard masses as to indicate that it will not readily decompose. The sludge recovered from the diamond drill tests, however, is a badly altered rock at depth at many places, and suggest that much of the peridotite from which will readily disintegrate on exposure to weather. Some fresh hard peridotite will be encountered, as in the South African mines, and will probably have to be treated with a certain amount of crushing. Warning is given against the unscrupulous who will probably claim to have located new peridotite areas "on the same lead" or "an extension" of the present one. It is pointed out that since this peridotite has the form of a pipe the outcrop will be limited to one place. Even should new areas of this rock be located, and should their nature be proven by an examination by a petrographer, it will still be necessary to prove the presence of diamonds and in paying quantities. Peridotite rocks are not uncommon, though few are known to be diamond bearing.

**California.** Frequent reports have appeared in the newspapers concerning the prospecting for diamonds near Oroville by M. J. Cooney. It appears that washing machinery and more land are to be purchased and extensive prospecting is to be carried on. Besides the occurrence of a diamond claimed to be identical in appearance with the kimberlite of South Africa, reports state that diamonds have been found associated with that rock. Authentic finds of diamonds in this section of Butte County are recorded,<sup>2</sup> especially at Cooke above Oroville. These diamonds have been from alluvial deposits, however, and were generally found in washing for gold. Up to the present time no authenticated discovery of diamonds in its original matrix in California is recorded. During the early part of 1907, specimens of serpentinized rock called "kimberlite" from the supposed diamond pipe were kindly sent to the

Schneider, Philip F., a preliminary report on the Arkansas diamond field: Arkansas Bur. Mines, Manufactures and Agriculture.

Werner, H. W., Diamonds in California: Am. Geol. Vol. 23, 1899, pp. 182-191.

Survey by Mr. Cooney. These specimens were discussed in this report for 1906. Upon careful examination and comparison with typical kimberlite from South Africa, it became evident that the Oroville rock was quite different from true kimberlite.

**Kentucky.** Newspaper reports have appeared telling of the discovery of diamonds in Kentucky during 1907, though no authenticated finds are recorded.

According to the report of H. A. Millar, secretary of the Kentucky Diamond Mining and Developing Co., the complete diamond washing plant installed by that company on Creech's Creek in Elliott County was operated during the latter part of the Summer and in the early Fall. Overburden was removed from three portions of the kimberlite rock outcrop, and some of the yellow ground was washed. Delays were caused by the breaking of the gearing, and operations were finally closed for the Winter on Oct. 22, when the water supply for washing was exhausted. Though a total of 2,825 loads of 18 cubic feet were washed without finding diamonds, operations were to be resumed in the Spring of 1908.

#### SOUTH AFRICA.

**Griqualand West.**—According to the 19th annual report of the De Beers Consolidated Mines,<sup>1</sup> the number of loads of "blue" raised and washed and the quantity and value of diamonds obtained again showed large increases. The total production of the blue ground at all the mines—De Beers, Kimberly, Wessleton, Bultfontein and Dutoitspan—was 9,010,686 loads, as against 8,144,979 loads in 1906, and the total quantity washed was 6,626,291 loads, as against 5,625,592 loads in 1906. This leaves a remainder of 9,391,603 loads on the floors, as against 6,769,126 in 1906, an increase of 2,622,477 loads. The number of carats of diamonds won from all the mines and from the tailings and debris was 2,619,872, as against 2,213,991 carats in 1906. The increase in the number of diamonds won came from the Wessleton, Bultfontein and Dutoitspan mines, and from the increased quantity of tailings washed. The average yield per load was slightly less in 1907 than in 1906 for all of the mines except the Wessleton, which showed an increase. The average yield of all of the mines in 1907 was 0.3125 carats per load, as against 0.3250 carats in 1906. The average value per carat was greater in the Bultfontein, De Beers and Kimberly mines, and less in the Wessleton and Dutoitspan. In the Wessleton mine alone was the average value per load greater in 1907 than in 1906. The total quantity of "blue" in sight above the lowest levels of the mines and on the floors was 57,409,013 loads, as against 64,315,580 loads in 1906. The deepest workings were in the Kimberly mine, where the main shaft was down 2,599 feet; the hoisting was done from the 2,520-foot level. At the De Beers mine hoisting was done from the 2,040-foot level, though the deepest shaft was 2,466 feet. Hoisting from the other three mines was all done from a depth of less than 1,000 feet.

The sale of diamonds realized £6,452,597, as against £5,607,718 in 1906. The net profits were £2,607,240. Dividends amounting to £2,350,000, or £750,000 more than in 1906, were distributed, and a balance of £932,624 was brought forward. The buying syndicate took diamonds valued at about £1,000,000 more than the minimum limit contracted. Up to November of 1907, however, only the minimum limit called for by the contract had been bought. Finding that there was to be no relief from the heavy income tax, amounting to nearly £100,000 annually, imposed by the British Government, the De Beers Co. voted to transfer from London to South Africa its office controlling operations at the mines. The London tax would have been an especially heavy burden, since the company will probably have a 10 per cent. tax on profits to pay to the Cape government also.

**Transvaal.**—The production of diamonds in Transvaal<sup>2</sup> during the fiscal year 1907 amounted to 1,545,336 carats, valued at £2,203,511, an increase of 786,930 carats and of £1,235,282

<sup>1</sup>Nineteenth Ann. Rept. De Beers Consolidated Mines for year ending June 30, 1907.

<sup>2</sup>Ann. Rept. Govt. Min. Eng., Transvaal, 1907.

over 1906. The production was chiefly from six volcanic pipe mines, the alluvial diggings at Christiana contributing only 2,562 carats, valued at £13,579. The Premier mine was the principal producer, having perfected its mine equipment. Several million loads of ore can be handled a year at this mine, and a regular and adequate water supply and a satisfactory method of disposing of tailings and slums have been provided.

**Orange River Colony.**—The production of diamonds in the Orange River Colony during the fiscal year ending June 30, 1907, is given by Burnett Adams as 398,703 carats, valued at £1,221,202, as compared with a value of £902,727 in 1906. The increase comes chiefly from the two new mines—the Roberts-Victor and the Voorspoed. Other mines producing were the Jagersfontein, Koffyfontein, Lacc, Monastery, and the alluvial diggings. The yield of the alluvial diggings was 7,103 carats, valued at £36,895, while the matrix mines produced 391,600 carats, valued at £1,185,308. The price per carat of the alluvial diamonds is about 43 per cent. higher than of those from the pipe mines. The production for the calendar year 1907 is given for the Roberts-Victor mine<sup>2</sup> as 123,427 carats, an average of 0.536 carat per load, and for the Voorspoed as 40,653 carats, an average of 0.21 carats per load.

**Vaal River Diamonds.**—The terraces and river gravels along the Vaal River from Bloemhof, in Transvaal, to its junction with the Orange River in Griqualand West, a distance of about 200 miles, have been worked for diamonds.<sup>3</sup> The deposits vary from a few inches to 40 or 50 feet in thickness, and in some cases extend three or four miles laterally from the river. The gravels consist of a large number of greenstone boulders filled in with sand and pebbles, and resting on a flow of amygdaloidal greenstone. The pebbles are chiefly siliceous, as jasper, chalcedony, agate, etc., and with them are associated pebbles of greenstone, ironstone, ilmenite, garnet, topaz and diamond. There has been more than one period of sedimentation, and the gravels of the most recent period have a matrix of stiff siliceous clay. The diamonds have been found almost everywhere through the gravel deposits, there being no reliable geological indications as to their occurrence. The placer diamonds, taken collectively, are probably the finest stones obtainable in South Africa. They occur more commonly in dodecahedral crystals and are singularly free from flaws. Stones with a yellowish tint are predominant, though all colors are found. The value is estimated at about £6 per carat for all diamonds sold to buyers along the river.

#### SOUTH AMERICA.

**Brazil.**—The diamond and carbon mining industry of Brazil is increasing. Consul General George E. Anderson, of Rio de Janeiro, reports that dredges<sup>4</sup> have been installed along the Jequitinhonha River, in the State of Minas Geraes, and that large amounts of American capital are being invested in the Diamantina country. The work on the mines in the latter region has necessitated the building of a highway from the end of the railroad at Curialinho. This work is under the direction of an American engineer and will be carried out by American methods. Heretofore the shipments of Brazilian diamonds have been to Europe, though it is likely a number of them will be made to this country direct, now that American capital is so heavily interested.

It is difficult to obtain information on the production of Brazilian diamonds, since large quantities were smuggled out of the country to avoid the payment of the five per cent. export tax. Consul-General Anderson, in the report quoted above, gives the value of diamonds registered for export during 1906 as \$310,000. This is said to include the carbons or black diamonds from Bahia. That the official export figures do not adequately represent value of the production is shown by the figures given in a report by former Vice-Consul J. P. W. Rowe,<sup>5</sup> of Bahia, in which it is estimated the annual exports from that State amount to over \$4,000,000. The State government of Bahia found that it failed to receive the proper revenue due from the seven per cent. export tax, and accordingly abolished the export-tax law in favor of another. Each merchant or dealer ship-

diamonds or carbons was to be charged and calculated to bring the revenue up to what should have been under the seven per cent. tax law. The new law was met by the closing of many dealers and their shipping firm.

**British Guiana.**—The output of diamonds in Guiana is chiefly in small sizes. The government report for the year ending June 30, 1907, shows a production<sup>1</sup> of 65,903 stones, weighing 71 carats. The change from the preceding year is of large, though in 1904-5 the output was 70 diamonds, weighing 19,619 carats. An estimate of the value of British Guiana diamonds may be made from the exports between Jan. 1 and Feb. 18, 1907,<sup>2</sup> which are placed at 1,564 carats, valued at \$12,370.

#### INDIA.

The production of diamonds in India<sup>3</sup> is given for 1906 as 305.9 carats, valued at £5,160, as against 172.4 carats (valued at £2,474) in 1905. The increased production came chiefly from Panna, the value of output was £4,348. The remainder of the production came from the States of Hari and Ajajgarh.

#### NEW SOUTH WALES.<sup>4</sup>

The total production of diamonds in New South Wales between the years 1867 and 1906 is given as 137 carats, valued at £104,089. The largest stones recorded were in the years 1899 and being 25,874 carats valued at £10,350, and 1900 carats valued at £11,620, respectively. The production for 1906 was considerably smaller and valued at 2,827 carats valued at £2,120.

#### DIAMOND INDUSTRY.

The consumption of diamonds in the United States is ordinarily large and amounts to over one-third of the world's production. With the immense drop in purchases of diamonds in the United States caused by the financial depression in 1907 reduced sales in other countries, the diamond industry has had to face a serious situation. The reduced demand for diamonds has affected all branches of the industry. Large numbers of miners, not only in the United States but also in other countries, have been without employment for several months. Several diamond mining companies have been forced to close their mines or limit their operations. At one time it was rumored that the price of diamonds would fall when the agreement of the De Beers and Premier diamond mining companies, the diamond buying syndicate expired in the month of March, 1908. The reduction of prices by one large company would have precipitated a war of low prices with the other, and this would have ruined those dealers with large stocks of high-priced diamonds on hand. The six months' agreement made in 1907, by which the diamond buying syndicate was to purchase the output of the Premier mine at a certain value proportional to that paid for the De Beers output, was not renewed after expiration in March, 1908. Frequent advances, however, have been given to diamond miners and merchants by both the De Beers and Premier mining companies and the diamond buying syndicate, that the price of diamonds will be maintained under all circumstances.

**Cullinan Diamond.**—The great Cullinan diamond presented to King Edward of England on his birthday, by the people of Transvaal as a demonstration of loyalty and high regard. This diamond is now being cut to be placed among the crown jewels of England. In the rough the Cullinan diamond weighed nearly 3,025 carats, or about 1.37 carats avoirdupois, and was found in the Premier mine, Transvaal, in January, 1905. The cutting and polishing of this huge diamond is being carried on by the firm of Joseph Asscher & Co., in Amsterdam, and will probably not be completed before the end of 1908. According to Louis Asscher,<sup>5</sup> of the Asscher firm, the cleaving of the diamond was very successfully accomplished by Joseph Asscher, who split it through a defective spot, part of which was left in each portion of the diamond. The diamond was cleft by making an incision half an inch deep with a sharp diamond point in the proper place and then striking a specially designed knife placed in the incision a heavy blow with a piece of steel. Apparatus specially designed for cutting the diamond has been constructed as a diamond six inches across and weighing about 20

pounds, which is raised mechanically from the polishing disk. The latter is about 16½ inches across and makes 2,400 revolutions per minute. Diamond dust mixed with oil will be used in large quantities in polishing the stone. The larger portion will probably be cut into a drop-shaped stone weighing between 500 and 600 carats when completed. The other portion will be cut into smaller stones, one of which, even then, will be one of the large diamonds of the world. Extreme precaution is taken to guard the diamond at all times, both by the use of numerous watchmen and by combinations of safes.

**Hope Blue Diamond.**—The famous "Hope" blue diamond has been sold by Joseph Frankel's Sons, of New York. The buyer is S. I. Habid,<sup>1</sup> a Spanish collector in Paris, and the price was about \$400,000. The "Hope" diamond is a beautiful blue, very brilliant stone weighing 44¼ carats, believed to be a part of the wonderful blue diamond, weighing 112 carats, brought from India by Tavernier in 1642 and sold to Louis XIV. A century later this diamond was cut into a triangular shaped stone weighing about 67 carats. In 1792 it was stolen, and no trace was ever discovered. In 1830 three blue diamonds, of the same color and quality as the Tavernier stone appeared on the market. The aggregate weight of these three diamonds was less than that of the stolen French jewel by an amount which would naturally be lost in cutting. The largest stone was purchased by Henry Thomas Hope, from whom it was named. After Mr. Hope's death the diamond was purchased from the heirs by Joseph Frankel.

**Metric Carat.** The weight of the carat used in different parts of the world is quite variable, ranging from 188.5 milligrams in Boulogne to 213.3 in Turin and to 254.6 in Arabia.<sup>2</sup> The weights most used, however, fall between 205 and 207 milligrams. The advantages to be gained by the use of a standard carat for all countries hearing a simple relation to other standard weights can readily be seen. The metric carat, of 200 milligrams, answers this purpose well and is not greatly different from the carat used by several countries. With the acceptance by the international committee of weights and measures and the recent adoption of the metric convention,<sup>3</sup> the metric carat is a legal weight in all countries using the metric system of weights and measures.

**Artificial Diamonds.** Much interest has been manifested in the case of Sir Julius Wernher, of the De Beers Co., against a French engineer, Henri Lemoine, who claimed to manufacture diamonds by a secret process. In 1904 Lemoine succeeded in interesting Sir Julius in his process, and when its genuineness was apparently established a contract was drawn up. Under the conditions of this contract Lemoine was to receive a large sum of money for his invention, which was to remain secret until his death, and all diamonds made were to be turned over to Sir Julius. A description of the process of manufacture was placed in a sealed envelope and deposited in the Union of London and Smith's Bank, where it was to remain until Lemoine's death and then to become the property of Sir Julius. It is said that over \$300,000 were advanced to Lemoine for a factory and apparatus, and for this sum, or part of it, Sir Julius brought suit, since he no longer had faith in Lemoine's process. During the trial Lemoine asked for an opportunity to give a demonstration, and during April, 1908, was released on bail for this purpose. After making elaborate preparations he not only failed to produce artificial diamonds but forfeited his bail and fled. The sealed envelope was opened and was found to contain a jumble of recipes of no value.

#### EMERALD.

##### NORTH CAROLINA.

Emerald was obtained from three places in North Carolina during 1907. The greater part came from the emerald-hiddenite mine and the Ellis emerald mine, already described under beryl. Of the remainder, part was found at a prospect belonging to W. H. Warren, one mile north of Hiddenite, and part consisted of emerald matrix from Mitchell County probably mined some years ago and recently cut.

##### COLOMBIA.

A few notes on the famous emerald mines of Muzo, Colombia, are given in a letter from Bogota,

based on the report of the German minister to his government, in the New York Herald.<sup>1</sup> The mines are now leased to a Colombian syndicate for a period of five years, under rigid government supervision. The Government expects to work the mines on its own account when the present lease expires. The mines are on the side of a steep mountain about 350 feet above the mining village. Formerly the Spaniards worked them for emeralds by driving adits into the hillsides; now they are operated by open cut work with terraces. The rock is broken into smaller and smaller fragments by peons, who pick the gems out from washing troughs. A plentiful supply of water is obtained from the mountains for washing purposes, and the debris is washed down to the Rio Minero. Over 100 persons are employed at wages of about 25 cents a day with food, shelter and medical attendance free. The workmen are protected from the sun by canvas awnings and palm leaf shelters. Even then the temperature in the pit reaches 115° to 120°, and the air is excessively humid. The peons are carefully watched, and every stone is turned over to inspectors as soon as it is found. The latter clean the gems and report to the government officials. At least \$1,000,000 worth of emeralds were mined and sold during 1906.

(To be continued.)

## Foreign News Notes.

Persia is increasing her exportations of precious stones, the latest returns showing a value of \$204,486 as against that of \$193,644 for the year previous.

\* \* \*

During recent years the Diarbekir, Harput, retail dealers are finding a ready sale for American-made clocks and watches of the cheaper grades, and there is an opportunity to build up a prosperous trade.

\* \* \*

When you go to look for silver-plated ware in Russia, you do not look for it in a jewelry but in a hardware store, and, as a rule, when you find it, it is very inferior in quality and design. There is a large waiting market there for American plated forks and spoons, and other articles. In Siberia there is also a good field, her annual importation of clocks and watches amounting to nearly \$700,000, and of that amount only a very nominal part comes from Russia, possibly not in excess of \$16,000 annually.

\* \* \*

In British South Africa, out of a total import value of clocks and watches amounting to \$159,329, the United States stood first with \$44,820; United Kingdom, \$43,779, and Germany third with \$30,690. Over 80 per cent. of the export value of that country is represented in diamonds and other minerals, the returns from diamonds alone amounting to \$45,051,775 in a single year. Of the latter amount \$33,247,000 were from Cape Colony, \$7,729,301 from the Transvaal, \$4,046,928 from the Orange river, and \$28,469 from other sources.

\* \* \*

The imports into Cape Colony are many and varied, and, strange to say, include more than \$700,000 of diamonds, likewise \$410,781 worth of jewelry. A good field for clocks and watches is found in Natal, the value reaching more than \$66,000 annually, and it is a still better market for jewelry, of which they receive more than \$107,900 annually. Of the former, about one-third the value covers importations from the United States; of the latter, our share is very small.

**Catalogue House Offers Non-Magnetic Railroad Trainman's Watch for Seven Dollars—What the Watch Really Is.**

Jewelers' throughout the country during the past week or two have had called to their attention the advertisement of a mail-order house of New York City, which has appeared in the daily papers throughout a large part of the country, advertising a "non-magnetic watch for \$7," and a 90-day trial for 25 cents. The advertisement of the company is in all instances the same size—two inches wide by four inches deep. It is given in reduced form in the accompanying cut. The offer, which, in big letters, is described as a "great one" and "for one month only," is made by the Union Watch Co., a catalogue house, with offices at 49 Maiden Lane, New York.

The watch is described as a non-magnetic railroad-trainman's watch, 17 jewel move-

proportions of pinions and wheels are pretty nearly right. The balance is out of proportion. The hairspring is non-magnetic and of a white composition.

The case, which is stamped "Union Watch Co., warranted 20 years," was submitted to a well-known assayer of New York, who reported that the gold plating on the case was so thin that all gold immediately disappeared upon being dipped in the cyanide bath.

Two of the cases in which the movements of the Union Watch Co. were enclosed have been analyzed by the United States Assay Office, one at the office in New York and the other in Philadelphia. The case analyzed in the New York Assay Office was a hunting case of which the front cover had previously been taken off and dipped in cyanide, with the result that the gold had practically disappeared. The remainder of the case was assayed by H. G. Torey, superintendent of the office, who reported that the outside back cap was very thin rolled plate, the gold being 6/1000 of the total and the inside cap was "dipped" or electroplate, the gold being 2/10 of 1/1000 of the total.

The other case which was assayed at the Mint Assay Office in Philadelphia contained seven grains of gold, or about 30 cents worth.

**\$25.00 Non-Magnetic Watch, \$7.00**  
 Price the month  
 25c for 90 days' Trial  
**This is a great offer; read it!**  
 We make and sell in quantities watches of non-magnetic, 17-jewel, Swiss-made, American-made, electrical, heavy case, precision, gold filled, hunting case or open face. Retail price at \$21.00.  
**For one month only**  
 we offer this watch for \$7.00  
 We will send any man's judgment of value by sending the watch on money order (that on receipt of this the cover express charges are paid). Send \$1.00 in stamps, and pay watch cost THIS MONTH may be returned or paid for at \$1.00.  
 We have no remaining watches that will be sent you on demand.  
 See our catalogue, which will be sent you on demand.  
 UNION WATCH CO., Dept. H2, 49 Maiden Lane, New York City

ADVERTISEMENT OF THE UNION WATCH CO.

ment, 20-year guarantee, gold filled hunting case or open face. The regular price is listed at \$25. As a matter of fact the watch, a cheap imported movement, in American style, made in Switzerland, has 17 jewels, but only seven jewels, and is in no sense a railroad-trainman's watch and would not pass inspection on any railroad in the country. It has a time inspection service. Instead of being worth \$25, it is worth not even the "reduced price" asked for it, \$7, some members of the trade placing the value of the watch and the cheap plated case in which it comes at not more than \$4.

As orders are apparently coming in in large quantities to the advertisers, jewelers in small towns in which the advertisement appears should be in a position to warn their customers as to exactly what they may expect, and for this reason THE CIRCULAR-WEEKLY gives a full description of the watch, and a detailed description of the movement made by a practical watch expert, who examined it carefully.

The watch which was purchased by a representative of THE CIRCULAR-WEEKLY at the office of the Union Watch Co., and presented by the salesman to be the watch sent in response to the advertisement, was movement No. 172654 and case No. 848695. The analysis of the movement showed the following:

**REPORT ON WATCH.**

Watch No. 172654, marked "Union Watch Co.," composed of two brass plates nickel plated. The third, fourth and escape wheel are jeweled on plate only. The jewels are of poor quality. The balance has two whole jewels and one cap jewel. The lower cap jewel is steel. The roller jewel is brass. The pallets are of steel and jeweled. The balance is non-magnetic, and struck in a dye. The pinions are all unfinished, the

The Union Watch Co. occupies a room at 49 Maiden Lane, on the 11th floor, where it employs a number of people and is evidently doing a large mail-order business. The business was incorporated June 30, 1908, under the laws of the State of New York, with a capital of \$20,000, of which one-half has been paid in, according to the statement given out by A. Hartfield, the secretary and treasurer. Dominick Melillo is president, Elio Galassi, vice-president, and Alexander Hartfield, secretary and treasurer. Dominick Melillo formerly conducted a jewelry business at 72 Washington St., Boston, while his brother John was previously employed by his father, Emanuel Melillo, in a similar line in Boston. In 1894 they formed a partnership under the style of the Union Watch Co. In June, 1908, the incorporation was put through when John Melillo withdrew. Alexander Hartfield, the secretary, was for eight years connected with the Amsterdam Silk Mills, Amsterdam, N. Y.

Mr. Hartfield, one of the heads of the company, said to the editor of THE CIRCULAR-WEEKLY last week that he felt that the editorial which appeared did the company an injustice, and when asked to point out in what respects it was erroneous said that it referred to the case as a cheap electroplated case, whereas it was rolled plate. Mr. Hartfield said that the movement was an imported Swiss movement that had been on the market for years, and that the cases are now being made by two large companies of this country, and were not electroplated, but rolled plate.

The manager of the company which, it was said, made the case purchased by THE

CIRCULAR-WEEKLY informed the editor that the case he supplied the Union Watch Co. was their cheapest rolled plated, five-year case, and that though it is rolled plated the gold was rolled down to a maximum of thinness—in fact, just as thin as it could be without danger of having it taken off in the buffing.

Mr. Hartfield admitted that the watch was not a 17-jeweled movement as advertised, and that it was only a seven-jeweled movement, but said that the knowledge had only just come to the concern and they had based their advertising on the representations made to them by the manufacturers, which proved to be incorrect. As far as this was concerned, he said, it would be changed in future advertisements and the watch would hereafter be described as "jeweled." He said that the company had nothing to conceal, either in regard to its past or present, its business methods or the character of the articles which it sold; that he welcomed the fullest publicity that might be given, provided that only the facts were stated. He felt that the members of the company were entitled to refer to themselves as manufacturers, because they assemble the movement and case, and that as they stood behind the guarantee of the case and movement it made no difference what the quality was, as long as they were able to make this guarantee good.

When asked if it was true that the purchaser who sent 25 cents in response to the advertisement must pay the difference between that and the \$7 before he got the watch from the express company, he said that it was, but that as the company offered to take back the watch within the 90 days and return the \$7 paid on delivery, the advertisement's statement about "25 cents for a 90 days' trial" was correct.

The fact was called to his attention that the damascening on the watch purchased by THE CIRCULAR-WEEKLY imitated the ornamentation of a well-known movement made especially for railroad men, but he said he knew nothing about this, and that the damascening differed on the various watches that the company put out. As far as this being a "railroad movement," he saw no harm in the use of the term, because he had been told that a New York Central inspector had passed one of the watches.

BELOIT, Wis., Sept. 23.—The advertisement of the Union Watch Co., offering a "\$25 railroad watch for \$7," which appeared in the Beloit Daily News, has resulted in an answer to the advertisement on the part of Alva Snider, an enterprising local jeweler, and his ad. in turn has brought forth a libel suit against Mr. Snider, instituted by the editor of the Daily News.

After the advertisement had first appeared Mr. Snider in a rival paper inserted a large advertisement, pointing out, as he termed them, the "lies" in the Union Watch Co.'s advertisement, stating that there were no Union Watch Co. factories, that it was no trainmen's watch and attacking the editor of the paper for publishing such an advertisement, claiming he was a party to a swindle. It was this that brought forth the libel suit, but neither Mr. Snider nor his friends are worried as to its outcome.

**New England Manufacturing Jewelers and Silversmiths' Association Reports on the New Canadian Stamping Law.**

PROVIDENCE, Sept. 26.—The advisory council of the New England Manufacturing Jewelers and Silversmiths' Association, held their regular weekly meeting Thursday afternoon, at which the report of the special committee appointed to call the attention of manufacturers of this vicinity to the provisions of the new Canadian Stamping Law was accepted and ordered printed and distributed. The report simply points out the main generalities in the new law, and is as follows:

PROVIDENCE, R. I., Sept. 16, 1908.  
 Enclosed please find a copy of the Canadian Stamping Act, which goes into effect Oct. 1, 1908. If you are exporting to Canada, this law should receive your careful consideration, so that you may conform to its provisions on and after that date.  
 The law allows the following divergencies when articles are stamped or marked indicating the quality:  
 One-quarter (1/4) carat divergence on articles of silver made without solder.  
 One-half (1/2) carat divergence on articles of silver made with solder.  
 One-thousandths (10/1000) divergence on articles of silver made without solder.  
 Twenty-five one-thousandths (25/1000) divergence on articles of silver made with solder.  
 Ten per cent. (10%) divergence on articles of gold plate.  
 The law provides:  
 That it violates the act to warrant goods to last for any specified time, either through advertisement or otherwise.  
 That a trade-mark Registered in Canada must accompany any mark indicating the quality of the article.  
 That no article can be stamped with the terms "Solid Gold," "Pure Gold," etc., unless accompanied by a trade-mark and quality mark, and assays at least nine karat with the lawful divergence.  
 That no article can be stamped with the terms "Sterling Silver," "Sterling," "Coin Silver," unless accompanied by a trade-mark and quality mark, and assays within the law-divergence.  
 That articles marked "G. F.," "Gold Filled," "G. P.," "Rolled Gold Plate," "G. P.," "Gold te," "R. G.," "Rolled Gold," "R. P.," "Rolled te," must be rolled gold plate and not electroplate.  
 That gold electroplated articles must be stamped "E. P.," if mark is used.  
 That other marks or terms on electroplated articles see Section 15.  
 That marks are understood to apply whether stamped on goods, printed on cards, tags, wrapper, box, appear in advertisement or on invoice.  
 That goods not marked or stamped, whether of precious or base metal, are not mentioned in this act. Penalty: For every conviction under this act, a fine not exceeding \$100 for each article or part, and destruction of goods.  
 That registration of trade-mark applies to all goods, whether of gold, silver or plate.  
 That the act contains numerous provisions, applicable to the product of individual manufacturers only, on such article as German silver, britannia metal, etc., or on such articles as are described in Section 6, under Application. Therefore, this communication simply contemplates drawing your attention to the new law and a study of its provisions.  
 That the Association will endeavor to place these laws in the hands of every manufacturing jeweler in this vicinity, but if you know of any interested manufacturer who does not receive one, he will be furnished with a copy upon application at the headquarters of the association, 42 Weybosset St., Providence, R. I. Yours respectfully,  
 E. MFG. JEWELERS' AND SILVERSMITHS ASS'N,  
 EVERETT L. SPENCER, Sec. HARRY CUTLER, Pres.

**Imports of Clocks, Watches, Jewelry and Gems Into Canada.**

TORONTO, Can., Sept. 24.—The monthly report of the Department of Trade and Commerce of Canada for June, just issued, gives the value of the imports for home consumption in the jewelry and allied trades as follows:

	Month of June,		Three months ending June,

and their popularity is demonstrated by the orders received by the Company for these goods. A money-making suggestion just now might be timely—if you are looking for merchandise that will sell, and sell at a good profit, by all means have these gems in your stock—all manufacturers and jobbers carry them. The Company will send you such goods as you may desire on memorandum for your approval.

### St. Louis Police Arrest Man Believed to be Thief Who Swindled Chicago Jewelers.

ST. LOUIS, Mo., Sept. 26.—Max Kargauer, believed to be an expert diamond swindler, with a police record at Columbus, O., is held by the police in St. Louis following his arrest, Thursday, in the store of the L. Bauman Jewelry Co., in the Century building, on complaint of N. Gunzburger, a salesman for I. & N. Kahn & Co., at Chicago. Gunzburger said that the man was wanted for passing worthless checks on Chicago jewelers.

Kargauer posed as J. A. Weiser, dealer in diamonds, watches and jewelry, of Savannah, Ga., and firmly maintained that was his name until Superintendent Shea, of the millon system, produced photographs of the man taken three years ago and counted Kargauer with them.

"I guess you've got me," the man replied,

slenderly built man of dark complexion, with a black mustache, walked into a jobbing house here and presented a card bearing the name of "Mink & Carr, Watches, Diamonds and Jewelry, Savannah, Ga." He said he was the Mr. Carr of the firm, and that he had come north to buy jewelry. The jobber looked up the name in Bradstreet's, and finding no such jewelry firm in Savannah, told his visitor of the fact. Mr. Carr said that it was probably true, he was not listed in Bradstreet's because the concern was only in business about two months. He showed a bank book purporting to carry a balance of \$2,300 and said he was prepared to pay for his goods with a certified check, of which he had a number on hand, made out for various amounts.

The *soi-disant* jeweler bought about \$105 worth of watches, paid \$5 in cash and gave a certified check for the balance. The

MAX KARGAUER, ARRESTED AT ST. LOUIS, MO.

men shown the Rogues' Gallery pictures. They were taken after his arrest for snatching the satchel of R. S. Schlessinger, a jewelry salesman, of Denver. Kargauer was wanted in Cincinnati, however, for stealing a grip there, and sentenced to a year in the penitentiary. Kargauer also served 90 days in the Milwaukee House of Correction for snatching a grip there. That is the last known of him prior to this arrest.

At first Kargauer maintained that he was J. A. Weiser, of 348½ W. Broad St., Savannah, Ga., and produced cards to bear him out, though he later admitted his identity. He was just presenting this card at the Bauman establishment when the salesman saw and recognized him.

On Kargauer at the time of his arrest were found three checks for \$200 each and one for \$100 drawn on the Citizens' Savings Bank of Savannah in favor of Joseph Weiser and signed J. A. Weiser.

Mr. Gunzburger, the Chicago salesman, said that Kargauer had victimized Louis Manheimer & Bros. and the N. Shure Co., Chicago, by buying jewelry with worthless checks, which, he said, were drawn on the Citizens' Bank of Savannah. Receipts from the Manheimer firm were also found on Kargauer.

Kargauer will be turned over to the Chicago police.

CHICAGO, Sept. 24.—Last week a short,

### Death of John G. Sleret.

CHILlicothe, O., Sept. 23.—John G. Sleret, one of the most prominent business men of this city, who died at his home on E. 5th St., a week ago, after a lingering illness, was well known in the jewelry trade, with which he had been connected for over 30 years. He had been in failing health for a long time, and had not been able to attend to business since last June.

The deceased was born in Chillicothe, May 25, 1850, and at the age of 14 entered the jewelry business as an employe of C. F. Dufeu, with whom he learned the trade. He started in business for himself about 1875, and built up an excellent trade, continuing in his own name until ill-health forced his retirement. For the last year his son has been associated with him in business. He occupied his store at E. Main St. for a long time, and had a large clientele not only in Chillicothe, but in many of the surrounding towns.

Mr. Sleret was married, March 21, 1875, to Miss Anna Vallery, and she, with three children, two daughters and one son survive him. The funeral services, which were held, Thursday afternoon, at his residence, were in charge of the Rev. Elizabeth Howland. The interment was at Grand View.

### Death of Charles A. Packard.

MIDDLEBORO, Mass., Sept. 23.—Charles A. Packard, a well-known jeweler, died here on the morning of Sept. 17 as a result of heart trouble. He was 68 years of age.

Mr. Packard, who had been in the jewelry business a number of years, started originally at Harwich, and from there went to Maynard, and in 1892 moved to Lowell, where for a while he was a member of the firm of Packard & Pratt, which later dissolved. In 1897 he located at Holbrook, Mass., but quit business in 1899 and did not start again actively until the early part of 1906. He then opened a store in Middleboro at 12½ Center St., and also ran an establishment at Bridgewater for some time.

The deceased was a thorough master of his craft, and made a specialty of repairing. He was a veteran of the Civil War, having served in the Navy. Among the associations to which he belonged was the G. A. R. and the Masonic fraternity.

### Octave Prairie, Holyoke, Mass., Makes a General Assignment.

HOLYOKE, Mass., Sept. 24.—Octave Prairie has made a general assignment under State laws for the benefit of his creditors to P. J. Garvey, and his liabilities are said to be about \$4,000. The largest factor of his assets is his stock, which is said to be worth \$2,000. The assignment under the Massachusetts laws does not become valid until acquiesced in by the creditors.

Mr. Prairie, who is a young man of about 32 years, began business in January, 1906, as a retail jeweler and optician. His store has been at 219 Main St.

H. E. Scattergood, Hillsdale, Mich., recently reported to the authorities at that place that a circular panel had been cut through the glass in a window in the back of his store. The work is believed to have been done by would-be burglars. No further damage was discovered.

George R. Dodson, of George R. Dodson, Inc., Spokane, Wash., is having plans made for a three-story building to be erected at Howard and Main Sts. The building will cost about \$35,000.

**Cracksmen Who Enter Philadelphia Jewelry Establishment Frightened Away by Burglar Alarms—Officers Injured by Explosives Left Behind.**

PHILADELPHIA, Sept. 28.—A most daring jewelry robbery was frustrated yesterday afternoon through the Holmes system of fire protection. The thieves were frightened by the burglar alarm and ran away, leaving behind them dynamite sticks and other explosives with which they intended to blow open safes. In the detection of the crime and in the investigation a policeman carelessly toyed with a dynamite stick and explained to detectives how it was to have been used. It exploded and detectives were injured. The attempt at robbery was made on the establishment of Joseph H. Deschamps, diamond broker, manufacturing jeweler and gem expert, at Chestnut street. Mr. Deschamps is one of the leading members of the trade of this city and is generally known to have in his establishment gems worth about \$200,000. The thieves carefully planned their robbery. They entered an adjoining building through the rear and swung themselves into the building occupied by Mr. Deschamps. It was late on Sunday afternoon, at a time when the business section of the city was usually deserted. The men by "jimmying" open a door forced entrance into Mr. Deschamps' factory but the burglar alarm, Holmes system, was sprung and in a few minutes detectives were rattling at the doors. In five minutes they had forced entrance, but in the meantime the thieves made their escape through the rear in the same manner in which they entered. The Holmes officers notified the detective bureau. Police were dispatched at once to the scene to make an investigation. They found the kit of burglars' tools outside of Mr. Deschamps' office. Lying at the door was a block of dynamite. Beaumont, a policeman, handled it carelessly explaining how it would explode. It did explode and caused injury to the following: Samuel Beaumont, reserve policeman, sight of right eye destroyed, general lacerations and cuts; Harry C. Moffit, detective, cuts of face, lacerations of chin and abdomen; Howard Smith, policeman, cuts on face, neck and hands; Wilson, Holmes detective agent; Eugene torn and cuts on face; Campbell, detective, cuts on face and body; George Williams, detective, three cuts on left side of face; William Brown, left eye almost blown out, cuts on face and neck; Graham, reserve policeman, cuts and lacerations. All the injured men were removed to the Pennsylvania Hospital. Mr. Deschamps said to-day: "I have only praise for the burglar alarm agency's men. They were 'on the job.' It was lucky that they were so active. The agency men only missed capturing the men because of a block of wood which we had placed under the door of the entrance. This stopped them from getting in quickly after the door had been unlocked. Had they not been compelled to force the door, I am sure the thieves would never have escaped. In my mind there is no doubt the men were professional cracksmen and would have gotten away with about \$200,000 worth of stock

if they had not been promptly interrupted." The police have absolutely no clue to the robbers.

**Death of Henry B. Beech.**

MERIDEN, Conn., Sept. 25.—Henry B. Beech, one of the oldest and best-known silverware men in the United States, and once a director in the Wilcox Silver Plate Co., died at his home on Crown St., here, about 9 o'clock Tuesday morning. The deceased was born in New Milford, Litchfield County, Conn., March 17, 1831, and was the son of Burrough Beech, a native of Oxford, Conn., and Harriet M. Weller, of Bridge-water.

Henry Beech, after receiving a generous education, learned the dry goods business. In the early '50s he located at Stillwater,

THE LATE HENRY B. BEECH.

Minn., where he became engaged in the lumber and milling business. It was about the year 1863 that the deceased settled permanently at this place, where he at first engaged in the chuck and drilling business for about one year, after which time he entered the employ of the Wilcox Britannia Co., later known as the Wilcox Silver Plate Co., as traveling representative. He continued uninterruptedly, with the exception of one year, in that capacity until 1905, retaining connections with the firm up to the day of his death.

Mr. Beech served as one of the directors of the Wilcox Silver Plate Co. from 1879 until the business became organized as part of the International Silver Co. in 1903. He was a member of Meridian Lodge 77, A. F. & A. M., of Meriden, and was also a member of the council R. & F. M., of Bridgeport. Mr. Beech is survived by a widow and six children.

The funeral services, which were held at St. Andrew's Church, were largely attended. Many floral offerings were received, not the least conspicuous being those sent by the Home Club, of the Wilcox Silver Plate Co.'s employes. The pallbearers were W. B. Morley, R. W. Isbell, C. A. Miller, F. Stevenson, Sanford Coggins and H. E. Hubbard. Interment was in Walnut Grove Cemetery.

**Death of August J. Ehrlich.**

NEWARK, Sept. 28.—August J. Ehrlich, widely known as a manufacturer of jewelry and a member of the firm of Ehrlich & Sinnock, died at his home, 45 Osborne Terrace, Saturday, from a complication of diseases. He had been in failing health for over a year.

Mr. Ehrlich was born in Jersey City, Dec. 21, 1859, and was educated in the public schools of that city. The business with which he was connected was originally founded by Smith, Ehrlich & Heinz. They dissolved partnership in 1884, and were succeeded by Ehrlich & Heinz. In 1899 Mr. Sinnock was admitted, and in 1891 Mr. Heinz withdrew.

The deceased was the Republican Alderman from the 16th ward and was one of the most popular members of the Board. He had an excellent record in municipal affairs, although he had never sought political honors, and had held only the office of Alderman during his 30 years' residence in Newark. He was elected in November, 1907. He was a member of Newark Lodge of Elks, Columbia Lodge, No. 26, F. and A. M.; and Heptasophs.

Mr. Ehrlich is survived by a widow, who was formerly Miss Margaret Klein, of Jersey City, and four children, Julius, Frederick, August and Mrs. George Bucman. The funeral services were held on Tuesday afternoon at 2:30 o'clock from the residence, Rev. Mr. Skevington officiating. Burial will be at the convenience of the family.

**New Enterprises.**

D. W. Ewing has opened a store at West Grove, Pa.

Wm. Beck is about to open a store on 2d St., Kelso, Wash.

The Tape Jewelry Co. has commenced business in Anderson, S. C.

G. W. Carleton will shortly open a jewelry store at Marshfield, Ore.

B. Braunwarth is about to open a store in the Horr building, at Prentice, Wis.

F. Richardell, watchmaker, opened a store of his own in Mauch Chunk, Pa., last week.

M. Kalof has opened a jewelry and pawn brokerage establishment at Moose Jaw, Sask.

A new firm in Los Angeles, Cal., is that of Harris & Wolf. The store will be located on Spring St., near 4th St.

Fred Schrader, formerly with Vahlman & Jacobs, East St. Louis, Ill., has just begun business on his own account in that town.

The Criveling & Scott Co. is the name of a new firm of clockmakers who recently started in business at 2351 N. Camce St., Philadelphia, Pa.

The Wertheimer-Schwartz Jewelry Co. has leased a portion of the store at 741 Market St., San Francisco, Cal., in which to conduct a jewelry business.

W. E. Evison, who recently finished a course at the Kansas City Horological and Optical School, Kansas City, Mo., has started in business for himself at Eldorado Springs, Mo.

Wm. F. Stanton has opened a retail jewelry store at 1226 Main St., Bridgeport, Conn. Prior to his new venture, Mr. Stanton had been for 20 years with E. W. Button & Co., of the same place.

## Providence.

William H. Culf, Jr., stone setter, has moved from 151 to 136 Pine St.

E. Jeaneret, Westerly, was one of the jurors in this city the first of the week.

The Universal Die Sinking Co. has removed from 234 Chestnut St. to 14 Blunt St.

Ed Greene has returned from a successful western trip with the Hansen-Ben-Co.'s line.

The Providence Metal Spinning Co., 95 St., is working overtime to keep pace with its orders.

Harry Caro is on an extended trip through the south and west for the Manton Mfg. Co., of this city.

The Rhode Island Novelty Co., 59 Page St., will be represented during the coming season by George C. Mendell.

Joseph A. Durrell has been engaged by Providence Mfg. Co., 107 Friendship St. to represent them in the trade.

A quarterly dividend of  $1\frac{1}{2}$  per cent. of the preferred stock of the Gorham Mfg. Co. has been declared payable Thursday, Oct. 1.

Howard D. Wilcox, of D. Wilcox & Co., and family have returned from Barber's Springs, where they have been spending the summer.

Ed D. Carr, secretary of the Ostby & Son Co., has been elected to fill a vacancy on the Republican committee of Ward 1 of this city.

Robert M. Hamilton was chairman of the committee of arrangements for the testimonial tendered at the Providence Opera House to Eugene Wendelschafer last week.

Albert S. Vennerbeek was a member of the all-Rhode Island golf team that met defeat at the hands of the all-Massachusetts team at Watertown, Mass., last Saturday.

Louis Frost's crack sloop yacht, *Morie II.*, won the closing event of the season's racing of the Narragansett Bay Yacht Racing Association last week, Saturday.

The K Mfg. Co., 165 Somerset St., which was burned out last week, has resumed work, and its representative, Mr. Ringheimer, will call upon the trade in a few days.

Everett I. Rogers, of Parks Bros. & Rogers, and family have returned from an automobile tour of the White Mountains, a month of which was spent at Gray's Inn, Jackson, N. H.

Walter A. Griffith, treasurer of the R. L. Griffith & Son Co., is on a two weeks' vacation tour, which he is enjoying on an automobile trip in the Intervale Section of New Hampshire.

At the annual election of the Anawan Club, Wednesday, Edward B. Hough was elected vice-president and Everett L. Spence secretary, the former being also elected a member of the board of directors.

Alph S. Hamilton, Harry Cutler, Henry I. Sharpe and Samuel Nicholson are members of the general committee to arrange for the annual donation day for the benefit of the Providence District Nursing Association on Oct. 24.

At the last regular monthly meeting of

the Manufacturing Jewelers' Board of Trade four new members were admitted, making the total number 170. This is a gain of 70 members since the reorganization of the Board of January, 1906.

Albert E. Hathaway, who was in charge of one of the departments of the Theodore W. Foster & Bro. Co., died at his home in East Providence, last week, in the 33d year of his age. A delegation from the shop attended his funeral and a handsome floral piece was sent by his shopmates.

An innovation was inaugurated, last week, at the big plant of the Brown & Sharpe Mfg. Co. It is in effect a practical school of mathematics for the apprentices who are employed at the establishment and who number at the present time about 150. Classes are held four hours each day.

A quarterly dividend of  $2\frac{1}{2}$  per cent. on the capital stock of the Nicholson File Co. has been declared, payable Sept. 30 to stockholders of record at the close of business, Sept. 23. This is an increase of one-half per cent., the other quarterly dividends this year having been two per cent. each.

Alarie R. Tuck, of Tuck & MacAllister, was married in this city, last Saturday evening, to Miss Mabel Remington. Ellis W. MacAllister, Mr. Tuck's partner, was one of the ushers, and his daughter, Miss Lucille MacAllister, was flower girl. Mr. and Mrs. Tuck started immediately on a trip to Maine.

An elevator in the Gorham Mfg. Co.'s plant, in Elmwood, dropped, Wednesday morning, with three workmen on it. One of them, John Gordon, foreman of the polishing room, was taken to St. Joseph's Hospital in an ambulance suffering from injuries to one leg. The others escaped unhurt.

Capt. Ralph Hamilton, adjutant of the First Regt. of Infantry, Rhode Island National Guard, is prominently mentioned for election as colonel of that regiment to fill the existing vacancy. Until a colonel is elected the command devolves upon Lieut.-Col. George A. Forsyth, a well-known journeyman jeweler of this city.

The Employes' Association of Blanchard, Young & Co. held an election of officers Saturday, with the following result: President, Curwin C. Harrall; vice-president, Albert A. Cohn; secretary, N. Theodore Peterson; treasurer, William H. C. Just; counsel, Howard V. Leonard. These five officers constitute the board of directors.

The Jewelers' Supply Co., 36 Garnet St., manufacturers of jewelers' findings, has notified the trade that a suit has been commenced in the United States Court for the Rhode Island District against Calvin Dean, also of this city, alleging infringement of the company's patented two-piece "cuff pins." It is reported that other suits are to follow.

Among the larger taxpayers in Pawtucket, according to the assessment just completed, are the following: Callender, McAuslan & Troup Co., \$46,520; James M. Carpenter Tap & Die Co., \$54,040; George B. Champlin, \$54,640; Bela P. Clapp, \$25,360; Charles H. Fuller, \$136,060; Arnold C. Messler, \$40,000, and the United Wire Supply Co., \$43,400.

The following jewelry buyers were called upon the trade in this city the past week: S. A. Mester, Columbus, O.; E. Walter, representing Marshall Field & Co., Chicago; Herman Pichel, Samstag & Hilder Bros., New York; P. Barnett, representing the Associated Manufacturers' Co., Chicago; Thomas Lyons, Calhoun, Robbins & Co., New York, and M. L. Schwab, Guthman, Solomon & Co., New York.

The entire business interests of the O'Gorman Co., which for a number of years has conducted one of the largest department stores in this city, have been acquired by L. Dimond & Sons, Inc. The purchase includes all the capital stock of the O'Gorman Co., its stock of goods, fixtures, good-will and assets of all kinds. It is understood to be the intention of the new owners to continue the store on much the same lines as under the old management.

Frank Dale Westland, of the engraving department of the Gorham Mfg. Co., received an agreeable surprise when, on returning from lunch at noon, recently, he found beside the chair at his bench a handsome silk umbrella. On reading the card that was attached to the umbrella Mr. Westland found that the gift was a token of appreciation from his fellow-employees in the engraving and chasing departments for his good work as chairman of two very successful outings enjoyed by the men of those departments in the past two years.

The jewelry industry was well represented in the several teams from the various commands of the Rhode Island National Guard in the National Guard rifle shooting match at the State range, Rumford, last Wednesday. The following were among the contestants: First Lieutenant H. A. Crosby, Co. D, First Regt. Inf., which won the match; Charles F. Harwood and A. F. Williams, of Co. G, First Regt. Inf.; Sergt. Charles Fletcher, First Machine Gun Battery, and Capt. E. Merle Bixby, of the same command, and Lieut.-Col. George A. Forsyth, of First Regiment.

Municipal politics are now occupying considerable attention, and among the various candidates under consideration for the several offices are the following members of the trade: Henry Fletcher is talked of by the Republicans for Mayor, but will probably be renominated on that ticket for Alderman of the Seventh Ward. In case of his nomination for Mayor, Roswell C. Smith will receive the nomination for Alderman from that ward; John Kelso for Alderman from Ward 2; William A. Schofield for Councilman Ward 2, and E. Merle Bixby for Councilman Ward 7. George W. Parks has declined renomination for Alderman from Ward 1.

The creditors in this vicinity of the Barrett-Shaw Co., of 34th St., New York, have agreed to accept a compromise settlement of that firm's notes maturing Oct. 1. The Barrett-Shaw Co. became financially embarrassed last December, and in the Spring the creditors, the larger of whom are in this city, the Attleboro and vicinity, accepted a compromise. During the last week they were notified that the firm's notes, due Oct. 1, could not be met in full. An investigation was made by a committee from the Manufacturing Jewelers'

Board of Trade, who reported that the conditions of the firm's business were such that it was advisable to accept the offer. Accordingly they will accept 25 per cent. on the face of these notes and grant an extension of three months for the balance. Among the foreign articles received through the Providence Custom House last week were the following: From Bremen, 1 package of imitation precious stones, 1 package of silverware, and 1 package of decorated china.

William Champlin Greene, 82 years of age, an old-time manufacturing jeweler, of Olive Burgess Fuller Peck, 60 years of age, took out a marriage license at the Providence City Hall Monday noon. Mr. Peck is a widower, his wife having died in February.

Alexander Brough, for many years an employe of the Callender, McAuslan & Troup Co., died Sept. 20 at his home in Providence at the age of 76 years. He was born in Edinburgh, Scotland, Aug. 23, 1832. In 1872 he was asked to take the superintendency of the Boston store, operated by Callender, McAuslan & Troup Co., and remained with that firm until ill health rendered him to retire about six years ago.

Edward F. Seery, formerly a manufacturing jeweler of this city, but now an inmate of the Soldiers' Home at Togus, Me., started to the police here Monday, that he had been in a Dorrance St. saloon last Thursday night he was drugged and robbed of several watches valued at several hundred dollars and \$35 in money. He stated that he knew nothing of how it occurred and remembered nothing until he found himself in the street Friday morning.

A meeting of the creditors of the Jewelry Supply Co., Seattle, Wash., was held Sept. 22 at the rooms of the Manufacturers' Board of Trade, at which Robert E. Budlong was chairman and Marcus W. Morton, secretary. This concern is not financially embarrassed, but it has explained that Mr. Eyster, because of domestic troubles, had found it necessary to dissolve the partnership. The meeting of the creditors was for the purpose of discussing the firm's conditions, and whether the retiring partner should be released from liability. It was decided to secure, if possible, further information in the matter, and the case was referred to a committee consisting of Robert E. Budlong, William Cook and Horace W. Steere.

### Attleboro.

Frank Daughaday went to New York last week.

Otto Becker was in New York last week in the interests of the Chartley Pearl Co.

Fred L. Torrey is serving on the Superior Court jury, which is in session at Fall River.

Thomas E. McCaffery and James F. Adams have been elected members of the Democratic town committee.

John M. Fisher took an active part in the proceedings at the State convention of the prohibition party, held in Boston last Saturday.

Alterations are being made to the basement in the D. F. Briggs Co. building. It will be fitted up so as to be available for occupancy.

C. J. Nickerson & Co., South Attleboro, has been compelled because of the increase in its business to fit up the basement of its shop for manufacturing purposes.

The Attleboro Chain Co. has been obliged to build additional benches in order to accommodate the help needed to get out the work. It is thought additional floor space will soon be obtained.

The standing in the Shop Bowling League is as follows: Standard Button Co. won three, lost none; W. E. Richards won three, lost none; R. F. Simmons won two, lost one; Austin & Stone won one, lost two; Bates & Bacon and Horton-Angell won none, lost three.

Interest is being manifested in the efforts to reopen the big sanatorium built several years ago by John M. Fisher. The parties desiring to open the institution are endeavoring to raise \$25,000 by popular subscription. John M. Fisher has offered \$5,000, Joseph L. Sweet signified his willingness to subscribe \$2,000, and David Lowe will give \$500. Other contributions will be secured.

The Attleboro Rod and Gun Club has been organized. Arthur A. McRae, William H. Saart, Harvey Clap, Charles P. Keeler, Albert Saart, Charles R. Bates, Robert Magaveny, John H. Vallette, Amos Blackinton and Charles M. Robbins constitute the membership. A. A. McRae is president; W. H. Saart vice-president, and J. H. Vallette secretary and treasurer. A cottage has been purchased on the Cape.

Jewelers were liberally remembered in the distribution of political plums on Tuesday. Frank Mossberg and Everett S. Horton were named as delegates to the State convention; Harvey E. Clap, Frank Mossberg, Samuel E. Einstein and David E. Makepeace were chosen to go to the Congressional convention; Arno E. French, David E. Makepeace, Henry P. Wilmarth, Charles P. Keeler, Arthur A. McRae and Harvey Clap were councilor delegates; Col. Sidney O. Bigney, Everett S. Horton, Emmons D. Guild, Albert S. Ingraham, Frank Mossberg, George Sykes and Frank W. Weaver were chosen to go to the representative convention. Aldro A. French and Arno E. French were elected to the town committee.

### North Attleboro.

W. H. Bell is on a western trip.

Whiting & Davis are working nights until 9 P. M.

William Boss has gone west with the samples of Boss & Baldwin.

George Simmons is in the west in the interests of the B. S. Freeman Co.

A. B. Chace left on a western trip for Mandalien & Hawkins, Thursday.

Herbert Robinson has returned from a visit to New York for Robinson Bros.

Henry Wilson, New York representative of Plainville Stock Co., was at the factory last week.

Louis D. Barrows and Foster Clark journeyed to New York last week in an automobile on a pleasure trip.

Edwin B. Wilmarth traveled through New York State, last week, in the interests of V. H. Blackinton & Co.

William F. Maintien was elected last week by the Plainville Republicans to represent them at the State convention.

Charles V. Whitmarsh and Elton B.

Fisher won a remarkable victory at golf last Thursday over A. S. Vernerbeck and H. B. Rust, the Rhode Island champions.

James P. Black is negotiating for the lease of land in Wrentham on which he is planning to erect a building. The first floor will be occupied by a drug store which he is to open, and the second floor will be used as a location for his wholesale jewelry business, which is now in North Attleboro.

At the Republican caucuses, Tuesday night, Representative Frank O. Coombs was renominated for a third term. Edward D. Sturtevant was chosen as delegate to the State convention, and Charles T. Paye is a delegate to the Senatorial convention. Fred S. Gilbert, Walter B. Ballou, Henry A. Balcolm and H. Alton Hall were elected to the town committee.

The list of heavy taxpayers as published by the Board of Assessors contains the following manufacturers and jewelry concerns: Walter Ballou, \$186; William H. Bell, \$241; W. H. Bell & Co., \$143; V. H. Blackinton, \$186; V. H. Blackinton & Co., \$115; A. H. Bliss & Co., \$721; Bugbee & Niles Co., \$259; Cheever, Tweedy Co., \$368; W. G. Clark Co., \$230; Coddling & Heilbron Co., \$478; Edwin H. Cummings, \$120; James A. Coddling, \$223; H. H. Curtis Co., \$161; F. H. Cutler & Co., \$150; Doran, Bagnall Co., \$138; Edwin L. Evans, \$341; William N. Fisher, \$161; W. N. Fisher & Co., \$184; E. I. Franklin & Co., \$373; B. S. Freeman Co., \$115; Mauran I. Furbish, \$100; Jewelers' & Silversmiths' Refining Co., \$107; Manufacturers' Building Trust, \$838; John F. Makinson, \$450; Mandalien & Hawkins, \$103; Maintien Bros. & Elliot, \$172; Mason Box Co., \$262; H. D. Merritt Co., \$322; E. I. Richards & Co., \$373; Ira Richards, \$301; William W. Sherman, \$502; Stephen Stanley, \$235; J. F. Sturdy's Sons Co., \$1,619; Herbert K. Sturdy, \$167; Frank M. Sturdy, \$184; John F. Sturdy, \$137; Fred E. Sturdy, \$153; Edwin Whitney, \$147; Edwin B. Wilmarth, \$117; R. Blackinton & Co., \$575; W. & S. Blackinton & Co., \$621; James O. Copeland, \$193; F. S. Gilbert, \$175; G. C. Hudson Co., \$230; Jewelers' Building Association, \$598; Frank G. Pate, \$129; C. Ray Randall & Co., \$173; Alton Riley, \$232; Riley & French, \$575; William H. Riley, \$1,914; Theron I. Smith, \$117; Sturtevant & Whiting, \$252; Albert Totten, \$590; Frank M. Whiting & Co., \$575; F. M. Whiting Co., \$966; Walter B. Ballou, \$106; H. F. Barrows, Jr., \$205; H. F. Barrows Co., \$1,223; A. S. Bishop, \$439; Roswell Blackinton, \$160; Anthony H. Bliss, \$181; Walter G. Clark, \$508; Frank H. Cutler, \$123; Herbert G. French, \$1,218; T. G. Frothingham, \$157; Furbish, Swift & Fisher, \$129; Edgar L. Hixon, \$687; George L. Paine Co., \$184; Paye & Baker Mfg. Co., \$490; C. Ray Randall, \$223; T. I. Smith Co., \$1,585; William E. Smith, \$292; J. J. Sommers, \$246; J. J. Sommers & Co., \$230; Straker & Freeman, \$180; John L. Thompson, \$203; Totten & Sommers, \$304; Union Power Co., \$283; George K. Webster, \$379; George A. Whiting, \$110; Louis W. Wise, \$925.

Thieves recently smashed the front window in the store of Wm. J. Burkhardt, on 308 E. 5th St., Dayton, O., and stole stock worth about \$55. The loot included watches, fobs and silverware.

## Philadelphia.

Bechtel is this week canvassing the Valley.

C. Kremer, Phoenixville, is recovering from a slight illness.

Richardell, watchmaker, opened a store in Mauch Chunk last week.

D. Grover, 2804 Germantown Ave., is bed as convalescing after a serious illness.

S. Massey, Middletown, Del., returned last week from a gunning trip into the Valley.

A. Lieberman, 3525 N. 5th St., has returned to the city from a stay at his farm at Bridgeton, N. J.

F. Clews, formerly with the Whitcomb Co., is now covering the southern part of the interests of Taylor Bros.

L. Sides, Chestertown, Md., has returned from an extensive pleasure and fishing trip to Niagara Falls and Canada resorts.

Ewing, formerly of Wilmington, Del., is reported by returning travelers last week to have opened a retail store of his at West Grove, Pa.

X. Goldstein, wholesaler, formerly 718 N. 5th St., has moved to 738 Sansom St., where he has obtained larger quarters better adapted to his business.

P. Ledos, a manufacturing jeweler, of Newark, N. J., was a visitor to this city's jewelry district last week and was given a cordial welcome by old friends.

Joseph Mahla, watchmaker, formerly with J. Mellin, 1903 South St., left this city last week to accept a position in Iowa City, Mo.

Yvette Taylor, of Taylor Bros., the cut glass manufacturers, left Philadelphia last day for Corning, where a little daughter, two weeks old, has been waiting to meet her.

C. J. Warner Hutchins, 628 Sansom St., was a guest Saturday at Valley Forge, of the Mattfield Commission, together with Honor Stuart, of whose staff he is a member.

C. S. Kepner has turned over his retail store on Ashbury Park, N. J., until next season to his watchmaker, and is now devoting his entire time and attention to his business in Chester.

In Linquist, a watchmaker, formerly in employ of the Bailey, Banks & Biddle of this city, has notified his friends in the trade here that he is now connected with the Stieff Jewelry Co., Nashville, Tenn.

Fry J. Bolte, Jr., 926 Atlantic Ave., Philadelphia City, has been nominated for Councilman of the seashore resort. Mr. Bolte's entrance into politics is a source of satisfaction to the many friends he has in the trade of this city.

Working under the name of the Criveling Clock Co., a new firm of clock makers has begun business last week at 2351 N. 5th St., and have adopted novel means of advertising, describing themselves as "clock doctors."

Fry S. Kratz, Souderton, Pa., displayed in his show windows last week the pennant trophy won by the Souderton baseball team in the Inter-County League. Mr. Kratz received the contract to design and engrave the winner's trophy.

A package of jewelry from J. E. Cald-

well & Co., and sent to J. H. Earnshaw, Bryn Mawr, was stolen last week from an express wagon at Bryn Mawr. The package was valued at \$76. Dennis Gallagher, suspected of the theft, was arrested.

Harry Barry, of M. Sickles & Sons, is entered in the contest of the *North American* to secure seats for the season of Hammerstein's new Philadelphia Opera House, and is receiving the cordial and hearty support of hundreds of friends in the trade.

Samuel Chestnut, with M. Sickles & Sons, had his home entered by thieves last week, but they were frightened off without securing much of value. Louis Sickles has moved into the city from Wyncote, where he has occupied a summer place with his family.

John Kirschmek, Media, made an automobile trip into the city last week with a party of friends to combine pleasure and business. C. Williams, formerly watchmaker for Alfred Roberts, on S. Clinton St., Trenton, has accepted a position with his father, William Williams, on S. Broad St., Trenton.

Mrs. A. E. Bates, proprietress of the jewelry store, Virginia and Atlantic Aves., Atlantic City, N. J., was awarded \$150 damages by a jury before Judge Ingersoll last week, because a tree on an adjoining property which was being cut down, fell into a show window of the store about two years ago.

W. G. Atherholt, formerly with W. C. Reiser & Co., later with the Hoover & Smith Co., and recently in business in Chester under the firm name of O'Hara & Atherholt, has notified his friends in the trade that he is in Washington, D. C., with the Columbia Optical Co., at 908 F St., N. W.

The jewelry department of Wanamaker's store has been removed to new quarters at Market and 13th St., from the Chestnut St. corner, which part of the old building is being demolished to give way to the last section of the new store. The new quarters are attractively furnished and equipped with all the latest appliances for a retail jewelry store.

The American Numismatic Society are meeting in annual convention at the Stenton Hotel, from Sept. 28 to Oct. 2. The meeting was attended by about 100 delegates from this country and Canada. Each delegate will display the most cherished pieces of his individual collections. After the convention the delegates will go to Atlantic City for a short stay.

Among the visitors to this city's trade last week were included: E. Schertzinger, Mahanoy City, Pa.; S. W. Hart, Kennett Square, Pa.; W. S. Hartenstine, Pottstown, Pa.; R. W. Quicksall, Mt. Holly, Pa.; John MacPherson, Mauch Chunk; H. Fitzsimons, West Chester, Pa.; J. Lacey Tyler, Laceyville, Pa.; C. S. Kepner, Chester, Pa.; C. D. Cassel, Norristown; E. A'lez, Millville.

Wholesale and retail jewelers of this city are looking forward expectantly to the celebration of Founders' Week, beginning Oct. 6, on which occasion it is expected that thousands of visitors to the city from all parts of the country will give a decided impetus to Fall business. In various sections of the city retail jewelry stores will be especially decorated in observance of the celebration, and all the wholesale houses have arranged to extend a hospitable reception to

all visitors, whether on sightseeing excursions solely or whether here to purchase.

The Philadelphia Horological Club resumed its meetings after the Summer recess with a reunion last Thursday at Sulas', 5th and Minor Sts., with Charles Murset presiding, in the absence of President Cullen. The meetings will be held regularly throughout the Fall and Winter on the last Thursday of each month. Several new members were admitted last week. It is proposed that the club soon visit as a body the works of the Hamilton Watch Case Co. at Lancaster.

Charles H. Dean, diamond broker, formally opened his new store, 8th and Sansom Sts., last week, and was visited by a host of friends in the trade, who extended congratulations and best wishes for a successful career in his new place of business. The store is regarded as one of the most attractive retail stores of its size in the city. Safes and fixtures are entirely new and of the latest pattern and the walls are covered by oil paintings and tapestries. A special room for the display of diamonds and more expensive pieces of jewelry is added to the store proper and makes also a private office for Mr. Dean. On the opening day the store was attractively graced with potted plants and cut flowers.

## Harrisburg, Pa.

### TRADE CONDITIONS.

Better business is reported by a majority of local jewelers.

Mrs. Frank E. Commings has returned from a visit to Reading.

E. L. Rinckenback spent several days last week visiting his aged mother in Mauch Chunk, Pa.

W. J. Kuhn has opened a watch repairing and jewelry establishment on New 4th St. above Keiper.

Burglars broke into the store of Bowman & Himmelberger in Jonestown, last week, and got away with \$500 worth of jewelry and other articles.

The owner of the five packages of silver table ware found, last week, on a hill close to this city has not been found as yet. Justice Coble is holding the goods, which may have been stolen from some store.

The New York Racket Store in Mechanicsburg was robbed of about \$300 worth of jewelry, revolvers, watches, etc., last week. A pane of glass was removed from a rear window. Mr. J. W. Ryan conducts the store.

## Savannah, Ga.

R. Van Keuren, of R. Van Keuren & Co., has returned from New York.

Mrs. Yette Hochman, Sept. 19, bought at the trustees' sale, the stock of jewelry and fixtures of E. Hochman, bankrupt, at 18 Broughton St. W., for \$2,522.50. The store was opened for business immediately.

S. E. Theus, of Theus & Co., has gone to New York. Mr. Theus was a member of the committee recently appointed by the Chamber of Commerce to collect subscriptions for the aid of the victims of the recent flood, at Augusta, Ga. Mr. Theus was also a guest at the dinner given in honor of Hon. Jos. M. Brown, Democratic nominee for Governor of Georgia, given on Friday at the Chatham County farm.

# GORHAM SILVER

## OCTOBER WEDDINGS

¶ October is now dividing supremacy with May and June as a wedding month and it therefore behooves the alert jeweler to assure himself that his stock is amply supplied with articles of Gorham Silver suitable for wedding gifts.

¶ At the Gorham Company's Wholesale Department may now be seen a complete line of samples of the newest and most attractive productions, especially designed for the above purpose as well as to meet the usual Fall requirements of the Jewelry Trade for holiday goods.

¶ Despite their exclusiveness of design and unsurpassable workmanship the prices will be found to compare most favorably with those of wares which merit far less consideration.

THE article describing the watch that has been offered by a catalogue house advertising throughout the country, mentioned editorially last week, is published this week on page 71, and will no doubt prove of interest to all jewelers who may seek to explain to customers and to their local newspapers the exact character of the watch that has been advertised. The information which is published herewith has not been obtained without some trouble and expense, but if the service we have rendered to the jewelry trade results in preventing the jewelers from loss in business in watches that might otherwise go to catalogue houses, we will feel amply compensated for the work. In this report THE CIRCULAR-WEEKLY has tried to be absolutely fair, and simply place before the trade the exact information that is to be obtained upon the subject in question, without comment or inference on our own part, in order that our subscribers, who might not otherwise be able to get them, may be in a position to present facts to back up any statements which they wish to make to their customers.

**A Device to Prevent Robberies.**

THE attempted robbery in a Philadelphia jewelry store, noted last week, which was prevented by the use of a device which permitted the jeweler to close and lock his door, worked from behind the counter, has caused the Jewelers' Security Alliance, which has for some time past urged retail jewelers to equip their stores with a contrivance of this character, to again call attention to the trade to the matter as such an attachment or device may be the means of preventing many important robberies, and if used at all will probably save the jeweler many times the cost of installing it.

In the case noted last week the prisoner, who bore all the earmarks of respectability and had been examining diamonds which were ostensibly to be bought by his wealthy grandmother, picked up the gems from the counter, where the artificial light affected them, and asked to look at them in better light near the door. As he did this the jeweler moved down the counter to a foot lever by which he could lock the door through the operation of a bolt at the bottom, and also ring a gong. When the man attempted to run out of the door with the gems the jeweler pressed the lever, locked him in, and with the help of a fireman who had been summoned by the gong, turned the man over to the police officers.

There is a suggestion in this which members of the trade would do well to heed.

**Obtaining Money Under False Pretenses.**

THERE is no doubt that the trade of the jewelers in the small towns is hurt to some extent by the hordes of swindling itinerant vendors, who travel throughout the country selling cheap jewelry, silver and watches with forged brands or names. A number of instances have occurred recently in the middle west where these men have sold very cheap watches as "rail-

During September 1908 THE JEWELERS' CIRCULAR-WEEKLY published 470 pages of advertising, greatly exceeding all its previous September records, and over three times as much as any other jewelry paper ever published in September.

road" watches, bearing the forged name of a reputable manufacturing concern. In the vicinity of Kenosha, Wis., the police are receiving a number of complaints showing that a number of such watches were sold for from \$15 to \$20, but were actually worth but \$2.

The prosecuting authorities have often refused to punish these swindling vendors when caught, saying it would be hard to obtain a conviction as the practice was not a theft but an *over charge* on the part of the accused, and that the legal maxim of *caecat emptor* (let the buyer beware) might be considered to apply. To such an argument the jeweler should suggest in answer that practically every State has a criminal statute covering "obtaining money under false pretenses," and an effort should be made to punish the swindlers on this charge if no more specific charge can be made.

**Don't Ask Unreasonable Credit.**

IT is to be regretted that certain members of the jewelry trade who are in a position to meet their obligations have taken advantage of the business conditions which have existed in the past year and the leniency of manufacturers and wholesalers resulting therefrom by refusing to pay obligations and drafts made upon them, for no other reason than that they did not wish to part with the money, or thought that they could use it to advantage in other ways. While the practices have in no way been general, there have been brought to the attention of THE CIRCULAR-WEEKLY instances where jewelers have insisted on extending the time of payment who have at the same time purchased automobiles, real estate and even made investments in stocks. To such we would say that these actions have not only been unjust to the manufacturer or wholesaler with whom they dealt, but also to those other members of the trade who have paid their bills when they were due; and, what is more, these acts may result in harm to others as well as themselves.

Sometimes the retail jeweler seems to forget that the manufacturer from whom he demands credit extending beyond a reasonable time (without payment of interest) must add to the price he gets for his product in order to avoid loss in meeting such demands; for the manufacturers, particularly those who use the precious metals, must practically pay cash for their material and cash for their labor of manufacturing, as well as cash for marketing their product, and that their prices are based on these items. When a manufacturer cannot collect at the time counted upon, he himself must borrow capital for which he must pay interest.

Probably some of the instances referred to above have been the result of thoughtlessness. If so, we suggest that the offenders give careful consideration to the above facts.

## ROCK BOTTOM PRICES ON DIAMONDS

Our diamond prices are  
*rock bottom.*

We import the stones  
direct, cut them ourselves,  
and sell them as close as  
anybody in the country  
does for diamonds of equal  
quality.

We carry a large stock  
at all times and the jeweler  
who sends to us for  
a selection not only gets  
rock bottom prices, but  
also a liberal assortment—  
and, what is of utmost  
importance, he gets it  
*promptly.*

### Good Gold Jewelry

*It's the  
only kind  
we make*

A RATHER COMMONPLACE DECLARATION, WE'LL AGREE, BUT WE MAKE IT WITH AN INSPIRING REVERENCE FOR THAT MUCH-ABUSED WORD "GOOD." OUR JEWELRY IS GOOD ALL OVER—GOOD THROUGH AND THROUGH. IT ISN'T ALONE SUPERFICIALLY IMPRESSIVE, IT GOES BEYOND THAT, SUPPORTING ITS VISIBLE DIGNITY WITH MATERIAL QUALITIES THAT MAKE IT MOST ENDURING. FURTHERMORE, LIKE EVERYTHING IMPRESSIVE, IT HAS A PERSONALITY—CHARACTERISTICS THAT EASILY HELP IDENTIFY IT AS A KIRBY PRODUCT. ASK TO SEE THE KIRBY LINE BEARING THE ABOVE TRADE-MARK.

### Boston.

Walter B. Snow has been on a trip a number of western Massachusetts towns. Employees of D. C. Percival & Co. had their annual Summer outing last Saturday on invitation of the Messrs. Percival.

Mr. Foster, of Shreve & Co., San Francisco, has been in Boston during the week visiting a number of the wholesale houses.

Sam Mendelsohn has been on a trip to a number of eastern New England cities, a states that in several of the manufacturing centers there is a decided improvement in general trade conditions.

The Federal Grand Jury reported Thursday finding a true bill against George Rogers and Eugene M. Richmond, who acted for the firm known as the "Royal Silverware Co.," on the charge of "using the mails in a scheme to defraud."

A. Stowell & Co. has reported to the police the loss by theft, last week, of a fine diamond weighing about 1¾ carats. The stone, with a number of others, was shown to a woman, and when she had departed the diamond was missed. It was valued \$585.

President Charles W. Davidson, of Thomas Long Co., has returned from a buying trip to New York. Charles Garr for five years in the wholesale department of the company, has relinquished his position. R. Kelsie McKeen, of the retail department, is receiving congratulations on the advent of a junior McKeen in household. Armond Haberstroh, who has been ill seven weeks with typhoid fever, expects to return to the store next week.

The outing of the Boston Jewelers' Club on Sept. 22 was a great success, being attended by upward of 75 members. President M. N. Smith was unable to accompany the party from the Hotel Somerset in this city, which was the rendezvous the start on the auto run to Point Shir having a cold which detained him in city. The party reached the Point Shir clubhouse shortly before 6 o'clock, spent upward of two hours at the quiet tables. Vice-President Charles Cook, who is president of A. Stowell & Co. presided in the absence of President Smith. There were no formal exercises at dinner.

Frederick S. Flagg, president of Ideal Comb Co., was fatally burned and a dozen others were seriously injured in a fire in the company's factory in New Cambridge last Friday. The material is a compound containing celluloid, the explosion of a gas tank started a blaze, which in less than 15 minutes destroyed the plant. The loss is estimated at \$25,000, about \$17,000 on machinery, the greater part having recently been received at the establishment. The stock that on hand was valued at \$8,000. Ex. M. Casey, of Lowell, is treasurer of the company. Of the 40 men who worked in the factory it is believed that not one escaped without a slight burn or having his hair singed, so rapidly did the flames spread as the result of the explosions in the celluloid combs and raw material.

M. Jaffe has moved from the First National Bank building to 223 19th St., Birmingham, Ala.

## New York Notes.

Henry Agate, a local jeweler, is visiting on the Pacific coast.

Ed M. Cook, of the Whiting & Davis Co. is at present on a southern business trip.

Er. Binzwanger, a jewelry buyer for the Siedl, Cooper Co., Chicago, was here last week.

Phillip C. Gillespie, of Gillespie Bros., Pottsville, Pa., was in town last week on a business trip.

W. Hamilton, of the Hamilton Jewelry Co., Denver, Colo., was seen in this city last week.

G. Harris, the jewelry buyer for Gabel's Jewelry Store, Altoona, Pa., is in town this week having stock.

P. Schuessler, Baton Rouge, La., was in town at the office of THE CIRCULAR-WEEKLY Monday.

Samuel Levy, Washington, D. C., is a visitor in town, and expects to remain the remainder of the week.

W. Walters, head of Gimbel Bros.' jewelry department, Philadelphia, was in town several days last week.

W. W. Brigham, a Providence, R. I., jewelry designer, accompanied by his wife, is spending some time in this city.

Percy Clap, local salesman for the Tippet & Clap Co., is spending a 10 days' vacation at Attleboro Falls, Mass.

Discharge in bankruptcy was granted last week to Levy & Knopf, dealers in cut glass and crockery at 62 E. 116th St.

J. Gulula & Co. will open a retail jewelry store at 5 Cortlandt St., about Oct. 5, and also conduct a repair department.

A. Mester, of David C. Begg Co., Columbus, O., was at 320 Church St., most of the week, looking over the jewelry lines.

Mr. Williams, senior member of the firm of Williams & Payton, Providence, R. I., visited the local office of the concern last week.

Wallace G. Franklin, of E. I. Franklin & Co., North Attleboro, was a visitor in town last week.

George Shepardson, of C. A. Marsh & Co., Attleboro, Mass., was a caller in town last week.

A. Henus, of the Bruhl Bros. & Henius Co., 15 Maiden Lane, returned, Tuesday of last week, on the *Kronprinzessin Cecilie*.

Wm. Taylor, the far Western representative for William & Payton, Providence, R. I., has returned to this city after a successful trip.

W. L. Black, of the firm of Black, Starr & Frost, has returned to this city after spending some time in Oswego as guest of W. T. Ellis.

Chris. Bernloehr, Indianapolis, Ind., returned recently from a trip abroad on the North German Lloyd line. He spent a short time in this city.

Walter Boss, of Boss & Baldwin, manufacturing jewelers, Attleboro Falls, Mass., was a visitor at the local offices of the concern, 15 Maiden Lane, last week.

Stories in the daily papers of recent date indicate that a prominent jeweler is at work on an order from a Wall Street operator for 15 solid gold finger bowls to cost \$5,000.

L. Korper has opened an office at 51 Maiden Lane, and will do repairing for the

trade. Mr. Korper was formerly employed by Lambert Bros., J. Wodiska and Aronson & Spiegel.

Fred Goldsmith, of Ingomar Goldsmith & Co., 182 Broadway, returned from Europe on the Holland-American liner *Rhinendam* last Friday.

Capt Lewis T. Squire, New York representative for F. H. Cutler & Co., North Attleboro, has resigned as quartermaster of the 14th Regiment, Brooklyn, to take a similar position with the 47th Regiment.

Ida Josephine Leete, artist and designer in silverware, died, last Wednesday, at the residence of her parents, 275 McDonough St., Brooklyn, after a short illness. She obtained her education in art at Cooper Institute.

The firm of Borrelli & Vitelli, 101 Broadway, have just opened a new office in London. G. B. Vitelli, of the firm, is at present in London. John P. Melhad, with the same firm in this city, will start on a business trip in a few days.

Adolph Bauman, manufacturer of ivory goods at 53 W. 37th St., who was prominently known in the ivory trade, died suddenly, Tuesday of last week, of acute indigestion at his home, 40 E. 36th St., Bayonne, N. J. He was 55 years of age.

The department of applied and fine arts of the Pratt Institute will give an exhibit of the work in photography, including portrait studies and illustrations by Alice Boughton, in the Art Gallery of the Institute during the day and evening from Sept. 24 to Oct. 10.

Chas. J. Dierckx, 38 Murray St., has recently obtained the exclusive agency in the United States of the well-known firm of Bayerische Krystallgalsfabrik Steigerwald, Ludwigstahl, N. D. B., and has on hand an attractive lot of Bavarian crystal, gold and enameled glassware.

Ralph M. Coen, 15 Maiden Lane, who is the New York representative of Frisch Bros., manufacturing jewelers of Newark, and other concerns of Providence and Attleboro, is the campaign manager in Harlem for Samuel Koenig, the Republican candidate for Secretary of State. He is also interested in the Jewelers' Taft and Sherman Club. Mr. Coen is being spoken of as a candidate for Senator.

A partnership has been formed by Albert Davis, son of B. H. Davis, of B. H. Davis & Co. and Emmanuel Reubenstein, who has been connected with B. H. Davis & Co. for 18 years, under the firm style of B. H. Davis' Son & Co., to carry on a gold and diamond jewelry manufacturing business. The new firm will retain the same factory facilities that B. H. Davis & Co. had, and will add a special department for fine repair work. The firm will locate at 12 John St. after Oct. 1.

Col. John L. Shepard, president of the Commercial Travelers' Sound Money League, has arranged for week-day campaign meetings from now until election time to be held at 37 Union Sq. The first meeting of the series was opened Friday afternoon, at which time the Vice-Presidential nominee, James D. Sherman, spoke to a large assembly. He was introduced by Col. Shepard. The meeting was attended by a number of representatives of the jewelry trade, among whom was A. K. Sloan, who assisted in entertaining Mr. Sherman.

A meeting of the Business Men's Republican Association was held last Thursday night at headquarters, and it was decided to have a parade Oct. 31. Enrollment blanks for those that wish to sign may be had in the arcade of the Silversmiths building, 15-17 Maiden Lane. The parade will start at the Battery and proceed up Broadway. Col. Shepard, of the New York office of the Keystone Watch Case Co., has arranged for noonday meetings to be held in connection with the Drug and Chemical Club in Maiden Lane. It was impossible to get separate quarters in the Lane.

A meeting of the creditors of Kleinschmidt, Howland & Co., former importers of precious stones at 170 Broadway, against whom bankruptcy proceedings have been pending for some time past, and who filed schedules early this month, was held at the office of Referee in Bankruptcy Allen, 45 Cedar St., Friday, at 2 p. m., at which time it was voted to appoint three trustees, and Lee Reichman, Chas. Schmedeker and H. B. Singer were elected under a bond of \$50,000. The trustees are to serve without compensation, and are to settle up the estate as expeditiously as possible, and sell the assets at their discretion. Myers & Goldsmith were the attorneys representing the bankrupts, and the creditors were represented by Hayes & Hirschfeld. An adjournment was taken until Oct. 9 at 3.30 p. m. The schedules show liabilities of \$252,910 and nominal assets of \$235,716.

Judge Waite, of the Board of United States General Appraisers, ruled recently that the duty on a small bronze statue of Mercury, valued at several thousand dollars, on which the Collector assessed 45 per cent. ad valorem, should hold. The importers claimed that the statue should be admitted to entry as a work of art dutiable at 15 per cent. under the terms of the reciprocity treaty with Italy. The only evidence of the manner in which the statue was produced, says Judge Waite, is a signed statement on the invoice that the marble and bronze work were executed by Italian artists in Florence during 1907. This statement is not sufficient to rebut the report of the appraiser that the statue in question falls distinctly in the class of commercial bronzes. The importation was excluded from the paragraph for works of art as not being wrought by hand.

An adjourned meeting of the creditors of Solomon Urbach, a former diamond dealer at 47 Maiden Lane, who was recently released from Ludlow St. Jail, where he served eight months for contempt of court, was held at the office of Referee Townsend, 45 Cedar St., Friday afternoon, at 3 p. m. Mr. Urbach was declared a bankrupt in 1906, after he had claimed he was robbed of \$30,000 worth of diamonds on a train between New York and Baltimore. The bankrupt was present with his attorney at the meeting Friday. M. C. Anson, of Hays & Hershfield, appeared for the receiver in bankruptcy and stated that since J. E. Hedges, who had been appointed trustee, had refused to act that he suggested the name of Sol. E. Rogers as trustee. Mr. Rogers, who was present, signified his willingness to act, and was named as trustee under a bond of \$1,000. Mr. Anson said that as the bankrupt had been thoroughly

## New York Notes.

(Continued from page 89.)

Examined at previous meetings there was further business for the present, and meeting was closed.

Anna Grant, bookkeeper for J. Jacoves, 4 Maiden Lane, has returned from a four weeks' vacation spent at Hunter, N. Y.

Charles Reiss expert watchmaker and adjuster, is now located at 15 Maiden Lane. He has succeeded the firm of Malbert & Co.

Leopold Stern, of Stern Bros. & Co., is one of the Presidential electors on the ticket of the Republican party of New York.

The Anton J. Anderson Co. will remove from 170 Broadway to 47 E. 59th St., where the concern will conduct a retail jewelry business.

The Jewelers' Taft and Sherman Club has placed a flag across Nassau St. at Maiden Lane. The headquarters of the club are now open in the arcade in the Silversmiths Building, 15 Maiden Lane.

The annual convention of the United States Appraisers was held in this city, last week, Monday and Tuesday. During the meeting questions involving duty on jewels and precious stones were discussed.

The business of Freed & Peikes has been incorporated under the laws of New York State as M. J. Peikes & Son, to manufacture jewelry, with a capital of \$25,000. The incorporators are M. J. Peikes, J. Peikes and D. Berg, all of this city.

The Chicago *Record-Herald* in the Sunday edition of Sept. 20 contained a laudatory article on the book on pearls by Dr. George F. Kunz, head of the precious stone department of Tiffany & Co., and Dr. Charles Hugh Stevenson. The book is still the press.

Otto Caesar, at one time employed by a jewelry concern in this city, died at home, 732 N. Fifth St., Allentown, Pa., last week, at the age of 65 years. Mr. Caesar was born in Germany, Feb. 2, 1843, and when 16 years old came to the United States and located in this city, where he followed the jewelers' trade for 30 years, says an employe.

The bowling season of 1908-09 of the Jewelers' Bowling League opened Monday night at the Universal Alleys, Washington St., Brooklyn, with a clash between the Kin-Lambert Jewelry Co. and the Jos. Hays & Co. teams, resulting in a victory for the former by the following scores: first game, 866-846; second game, 854-827; third game, 805-761.

With the beginning of the next month the regular meetings of the Boost Club, of New York, will begin. The schedule as outlined for the present includes dinners in October and November, a theatre party in December and a special affair in January. While it is understood that this arrangement is not official, it is presented, in a general way, the plans of the organization in charge of the club's affairs. The organization is in better shape than ever before.

Word was received in New York Monday that Louis Dejonge, 86 years old, partner of the firm of Louis Dejonge &

Co., 73 Duane St., had died on Sunday at Frankfort-on-the-Main, Germany. Mr. Dejonge had retired from business about 15 years ago, returning shortly afterward to the Fatherland. He leaves a son, Louis Dejonge, who is also a member of the jewelry firm and another son, Alfred Dejonge, of 109 W. 69th St.

Julius Dreyfus, of the Dreyfus Mfg. Co., 61 Beekman St., was seriously hurt in a railroad wreck which occurred near Carthage, Mo., last week. He is now in a hospital with injured back and hips. The engineer and fireman were killed and about 50 persons injured. The engine left the track while rounding a sharp curve, and the cars followed it. The engine turned over twice and plunged into a river. Mr. Dreyfus was on a trip for the firm at the time the accident occurred.

Entering the tailor shop of Henry Bauer, 69 S. Broadway, Yonkers, Tuesday of last week, a young man offered to let Bauer have a man's gold watch, a gold chain, a gold locket, a lady's gold watch and two plain gold rings for \$20. The offer was declined, however, and Bauer, suspecting that perhaps the jewelry was not honestly possessed, informed the police when the stranger had left. Officer Nolan arrested the seller of the jewelry and arraigned him upon a charge of peddling wares without a license. He was held in \$250 bail for examination.

An action brought by the Electric Chain Co., Attleboro, Mass., against J. Herzog, 59 Maiden Lane, to recover \$56.95 in discounts over which a difference of opinion arose was settled last week, Tuesday, in the Ninth District Court, 59th St. and Madison Ave., in favor of the plaintiff. The plaintiff printed on the bills rendered terms of six per cent. at four months, or 10 per cent. in 10 days' time, and contended that since it is always the policy of the plaintiff concern to maintain this arrangement that the defendant should receive discounts only in accordance with this arrangement. The defendant claimed that a representative of the plaintiff made a verbal agreement with him whereby he was to receive a 10 per cent. discount without having the time stipulation enter into the agreement. The court held that the discount claimed by the plaintiff must hold good, and ordered the \$56.95 paid, which was done.

The baseball game between the eastern and New York representatives on Maiden Lane was played at Prospect Park, Saturday, before a large and enthusiastic audience, and resulted in a victory for the eastern boys by a score of 11 to 10. The game was hard fought from start to finish, and was replete with sensational plays which kept the spectators in a frenzy of excitement. Barker pitched a good game for the New York boys, and Heywood and Lincoln alternated in the box for the eastern boys. Features of the game were a double play by Howard & Lowe, the hitting of Parker and Heywood and the base stealing of Kip and Gray. The line-up was as follows: Easterners—Lowe, 1b.; Heywood, p. and c.; Lincoln, 3b. and p.; Semple, 1f.; Sturdy, 3b.; Howard, cf.; Gray, rf.; Nickerson, ss.; Sisson, 2b. New York—Black, 1f.; Woodrow, 2b.; Windorff, cf.; Wiltshire, rf.; Barker, p.; Horn, 3b.; Helsing, 1b.; Parker, c.; Kip, ss. Chas. J. Toury, umpire.

## Newark.

The four-story Proctor building, on Cookman Ave., Asbury Park, was burned to the ground recently. I. J. F. King, who has a jewelry store in the building, was found unconscious on the floor and was dragged out by two firemen and taken down the ladder in safety.

George Schmidt, a truckman, in moving an eight-ton safe belonging to B. U. Packer, a jeweler of New Brunswick, N. J., to the jeweler's new store, recently, met with a misfortune. One of the ropes attached to a pulley broke and the safe fell, crushing into a plate glass show window. The damage amounted to about \$100.

Lewis Young, a South River (N. J.) youth who was on a visit to this city, recently got himself into serious trouble by entering a jewelry store and asking the clerk, a woman, to show him some jewelry. After the jewelry was placed on a tray before him Young pretended to search his pockets for his eyeglasses, and, drawing a brownish powder therefrom, threw it into the face of the clerk and attempted to make off with the articles brought out for his selection. Young was arrested and sent to a reformatory.

Thieves broke into two jewelry factories in the rear of 50 and 52 Walnut St. last Wednesday night and got away with more than \$100 worth of booty. The plant of Scofield & De Wyngaert was entered by a rear window which was opened by breaking a pane of glass and then removing the catch. At the factory of Reeves & Browne a window had been left unlocked, and it was by this way the intruders entered. Scofield & De Wyngaert were the greatest losers. About \$50 worth of old gold and silver, two gold rings and three loose pearls were stolen from their shop. The rings were in a secret corner of a drawer, and the fact that they were taken leads to the belief that the thief was familiar with the shop. In the plant of Reeves & Browne a platinum anode, worth \$6.50, was stolen.

Theodore D. Edwards, for many years connected with the firm of Carter, Howe & Co., died at his late home, 319 Mulberry St., Thursday, at the age of 83 years. He was one of the oldest and most highly respected employes of the concern. "Daddy" Edwards, as he was familiarly called, was one of the best type of American mechanics ever in the employ of the firm. He was faithful and attentive to his duties, loyal and trustworthy under all conditions, and respected and esteemed by all who knew him. When the late Aaron Carter established the business of Carter, Howe & Co., in 1841, Theodore D. Edwards was his first, and, for a long time his only, apprentice, and except for the limited time he was obliged by the trade customs of the time to journey and see how work was done in other shops, for there were no great factories in existence then, he remained with his first employer. He was with the firm after the death of Aaron Carter until the Fall of 1905, when the burden of years made it best for him to give up his position and enjoy, so far as the increased feebleness of his advanced years permitted, the comfort he had provided for his declining years.

### Chicago Notes.

Harry E. Jones is back from a north-eastern trip.  
Steve Bridges is on a trip through Iowa and Nebraska.  
Julius Ziegler has returned from a trip through Illinois.  
John Helinger has returned from a trip to the Pacific Coast.  
Mr. and Mrs. George Weidig are on a trip to Atlantic City.  
Emery Munson, Mendota, Ill., has been here for the past four weeks.  
Jacob Bunn, of the Illinois Watch Co., visited this city last week.  
E. Jacobson, of Jacobson Bros., New York, was in Chicago last week.  
C. L. Barrows, of the Bay State Optical Co., was a visitor here last week.  
Albert M. Dueber, of the Dueber-Hampden Watch Works, was here last week.  
Carl Hirt, with the Jnergens & Andersen Co., has returned from an extensive western trip.  
Jules Frankin, New York, stopped over here last week, on his way home from the Pacific Coast.  
The family of John Wechter, of S. Wechter & Co., has been increased by the arrival of a baby boy.  
J. F. Varney, Wichita, Kans., stopped off in this city last week on his way home from New York.  
H. G. Schramm, with the Stein & Ellbogen Co., has returned from a three weeks' trip to the coast.  
Chas. Moe has returned from a three months' trip to Europe, where he combined business and pleasure.  
Frank H. Challen has returned from a visit to the factory of the Quaker City Cut Glass Co. at Philadelphia.  
P. B. Noyes, general manager of the Oneida Community, Ltd., paid a visit to their Chicago office last week.  
Sol H. Hess, of Rettig, Hess & Midsen, will be married on Oct. 7 to Mrs. Ray Hoffman. The wedding will be private.  
Mrs. Mary Youngerman, mother-in-law of John Woollett, died, last week, at her home near Des Moines, Ia., aged 81 years.  
G. Schlender, Austin, Minn., was here, last week accompanied by his brother, jewelry buyer for Henry J. Harm, Albert Lea, Minn.  
News is received here that the jewelry store of the Petter Jewelry Co., Hannibal, Mo., was recently very seriously damaged by fire.

Dunn & Rodenberg, Providence, R. I., have opened an office in room 805, Columbus Memorial building, in charge of F. O. Bohnen.

The wife of H. W. Yaseen, who has retail jewelry stores in Dalhart, Tex., and Tucumcari, N. Mex., was here last week buying stock.

R. E. Johnston, manager for the Rochester Cut Glass Co., was here, last week, visiting F. B. Tinker, western manager for the concern.

J. R. Holly, treasurer and general manager of the American Silver Co., paid a visit last week to the Chicago office of that corporation.

A Peabody & Co. is the title of a new jewelry concern in the Champlain building. Mr. Peabody was formerly in the diamond business in New York.

J. M. Bostwick, Port Washington, Wis., spent a few days here as the guest of J. Ziegler. This was the first vacation Mr. Bostwick had taken in 10 years.

J. C. Manheimer, of Louis Manheimer & Bros., accompanied by his wife, returned last Saturday on the steamer *Amerika*, after a six months' tour of Europe.

J. C. Klaholt, Springfield, Ill., was here last week, with Mr. Poggenbohl, who bought his opening stock for a new store soon to be started by him in Seattle.

A morning newspaper last Friday published a sensational report about Claude Seymour being seriously injured at a golf game. There was no truth in the story.

Frank B. Harris, a retail jeweler of Lincoln, Nebr., accompanied by his wife and son, stopped over here last week, on their way home from a three months' European trip.

J. D. Bergen, formerly of the J. D. Bergen Co., Meriden, Conn., stopped over in Chicago, last week, on his way east. Mr. Bergen announced that he will embark in the cut glass business at New Bedford, Mass.

Benj. Allen and Harry Hahn, representing the wholesale jewelry trade, and C. D. Peacock and E. S. Hyman, representing the retail jewelry trade, visited the wholesale and retail jewelers last week, soliciting subscriptions for the Republican campaign.

Creditors of E. J. Wiggins, who formerly kept a retail jewelry store at 410 E. 63d St., would like to know when they are going to be paid. Wiggins sold out nearly two months ago, owing \$2,300, and as yet has signified no intention of paying up.

M. J. Yunn, for many years with the

Chicago office of Adolphe Schwob, has been promoted to the position of traveling salesman by J. W. Tice, western manager. Mr. Yunn has just reached his majority and started on his initial trip on Sept. 24.

The Geneva Optical Co. is removing from 67 Washington St. to the top floor of the Powers building, 156 Wabash Ave., where it will have one of the finest optical plants in the United States. In its new premises the concern will occupy 7,100 square feet of space.

W. M. Hathorn, F. M. McKee and N. H. Chadwick have been appointed appraisers for the bankrupt estate of Abraham Zlotnik. The American Trust & Savings Bank has been appointed receiver, under a bond of \$200, and the case referred to Referee in Bankruptcy Wean.

The National Wholesale Jewelers' Association, which was originally formed to admit only those jobbers who handled jewelry, have sent out notices to exclusive watch houses and tool and material dealers, asking them to join the organization on payment of \$35. Optical houses have not yet been invited to join.

Sam Swartzchild, of the tool and material house of Swartzchild & Co., returned, last week, on the steamer *Kronprinzessin Cecilie* with his wife, after an absence in Europe of one year. An immense bouquet of American Beauty roses, a tribute from the employes of Swartzchild & Co., awaited Mr. and Mrs. Swartzchild on their arrival in Chicago. While abroad Mr. and Mrs. Swartzchild visited England, Germany, France, Switzerland, Italy and Austria.

Death closed the career of Morris Weiss, a Chicago pioneer, Sept. 22. He reached the age of 99 years and seven months, and had long expressed a desire to round the century mark. He was born in a small village near Berlin and came to America in 1870. He embarked in the jewelry business in Chicago just previous to the great fire, establishing himself at State and Harrison Sts. Mr. Weiss leaves three sons, David, Valentine and Israel. There are three surviving daughters. The funeral took place Wednesday at 10 A. M. from his late residence, 1480 Barry Ave.

Among the buyers in town last week were Fred H. Young, Maquoketa, Ia.; Mr. Barrett, Emerick, Barrett & Co., Freeport, Ill.; L. J. Crawford, Burlington, Wis.; W. S. Still, Delavan; A. H. Bolender, Rockford; J. W. Veatch, Rossville; G. C. Martin, Genoa, Ill.; H. L. Hausman, Grafton, N. Dak.; Edward Werder, Charles City, Ia.;

J. Ballard, Evansville, Wis.; Mr. Nagel, Nagel & Meyer, Paducah, Ky. Mr. Hoerr, of Martin & Hoerr, Mankato, Minn.; Clint E. Dice, Joliet, Ill.; Mr. Voetsch, Voetsch Jewelry Co., Aberdeen, S. Dak.; G. Schlender, Austin, Minn.; Mrs. W. Yaseen, Dalhart, Tex.; Lincoln H. Hall, Trinidad, Colo.; Martin A. Hagen, Fargo, N. Dak.; C. M. Franke, Newton, Ia.; C. H. Nelson, Guthrie Center, Ia.; W. Carew, Streator, Ill.; J. Peterson, Dunlap, Ill.; John Sievers, Hebron, Ind.; Gordon Rushmer, Pueblo, Colo.; S. B. Turner, Cassopolis, Mich.

It was reported from Elgin recently that a check forger has worked in that city and among the many firms he had swindled was the Bauer Jewelry Co., on whom he had cashed a check for \$17.50. The checks were drawn on the First National Bank of Elgin and signed with a rubber stamp John Wright Mfg. Co., under which was the signature of J. W. Wright. The police were not notified until long after the swindler had ceased operating.

### Denver.

Henry Curtis, Jr., Littleton, was in this city for a few days last week.

Ike Price, with Louis Strasburger's Son Co., New York, is recuperating in Denver, after a severe illness.

J. W. Abbott, Hershey, Nebr., was in this city for a few days last week, buying goods for his Fall trade.

The wife of Harry H. Frumess is seriously ill. Mr. Frumess is one of the prominent jewelers of this city.

Mr. Rauschlaub, formerly employed in the factory of Syman Bros. Jewelry Co., is taken a position in Pittsburg.

G. L. Gunther, formerly of Bellevue, O., opened a new store in Canon City, recently, and not C. C. Patton, as previously reported.

E. J. Lewis, of the Lewis Jewelers' Supply Co., left, last week, on an extended trip through the southern part of this State and the west.

W. Llewellyn, of Watson & Newell, and so of Wilcox & Wagoner, returned, last week, from an extended trip through the northwest. Dan S. Park left, Sept. 20, for North and South Dakota and all of the states in the middle west in the interest of these concerns.

Mr. Dominick, of Hahn & Co., has returned to his office in this city, after an extended fishing trip through northern Minnesota and southern Canada. Mr. Dominick won a prize for catching one of the largest muscalonge ever caught in that country. The fish weighed a little over 40 pounds.

Harry Hellerstein has opened a new store at 525 15th St. Mr. Hellerstein was formerly in business at 316 16th St., but has been on the retired list for the last three years. The new store is in one of the best locations in the city. All of the fixtures are new and the stock is large and varied.

The Syman Bros. Jewelry Co., of this city, recently received an order for what is claimed to be the most expensive necklace ever manufactured in Denver. The necklace was made by Syman Bros. and consists of 52 diamonds varying in size from four carats to a 32d. The setting is of platinum.

### Cincinnati.

Joseph Melmert will leave, next week, to visit the trade in Ohio, Indiana and Illinois.

N. Mendelsolm, of Wallenstein, Mayer & Co., has left on an extended eastern business trip.

Charles E. Payne, of L. Gutmann & Sons, will call upon his trade in Ohio and Indiana this week.

M. D. Geigerman, of the Sterling Glass Co., is enjoying a few weeks fishing on northern lakes.

William P. Flueger, of Joseph Noterman & Co., is making a business trip through Ohio and West Virginia.

I. Herman and Mayo Loeb, of Herman & Loeb, are now making their respective trips in Ohio and through the west.

Alvin Lindenberg, Indianapolis, Ind., was visiting his father, S. Lindenberg, of Lindenberg, Strauss & Co., last week.

R. G. Maas is no longer connected with A. A. Spiegel & Co. and has left for New York, where he anticipates locating in the future.

Mr. Conn, of the Conn Jewelry Co., Bowling Green, Ky., and his family spent the past week here, combining business and pleasure.

E. F. Randolph and Edward Muttendorf, Williamson, W. Va., were visitors here last week, the latter on his return from a trip to Chicago.

Emil Lohmeyer, son of E. G. Lohmeyer, Covington, Ky., surprised his friends by getting married last week. The happy couple are now enjoying a honeymoon in the east.

Edward Herschede has returned from Europe, where he has spent some weeks in the interests of the Herschede-Hall Clock Co., superintending the construction of chime movements, one of his recent inventions.

S. C. Bingamm, Vine St., and Miss Sarah Minear, Chillicothe, O., were married at the latter's home, Sept. 19. Friends in the local trade have extended their heartiest congratulations to the couple, who are now spending their honeymoon in Canada.

Out-of-town jewelers who purchased stock here the past week included: A. Clooney, Maysville, Ky.; Ed De Voss, Wilmington, O.; D. A. Sewall, Wilmington, O.; R. F. McComb, Hamilton, O.; C. F. Maurer, Lexington, Ky.; H. S. Freelan, Seaman, O.; F. G. Meyer, Dayton, O.; Mr. Anderton, Dayton, O.; W. L. Fredeking, Hinton, W. Va.; Charles Sieglitz, Vevay, Ind.; A. Boiarsky, Charleston, W. Va.

Otto C. Lightner recently filed suit in the Common Pleas Court to recover \$700 from the Cincinnati Retail Jewelers' Association. He claims that at the American National Retail Jewelers' convention, in this city, he fulfilled a contract which should have paid him \$400, and also advanced \$210 to the local association. He asks for an injunction against the association drawing money it has deposited in the Western German Bank. Wm. A. Moeller is his attorney.

Theodore Neuhaus, of Theodore Neuhaus & Co., is recovering from what came near being a fatal accident. As he was driving to his business in the city one morning last week he collided with a cab which came upon him very suddenly from around

a corner he was approaching. Mr. Neuhaus was thrown from his runabout and one of the shafts penetrated the side of his head, necessitating an immediate surgical operation. Mr. Neuhaus had but recently recovered from a sprained ankle which he sustained in a similar accident.

A rumor current in the trade for the past six months regarding the retirement of the Oskamp Jewelry Co. has proved to be true. This company, for the past 20 years located at the corner of Fifth and Vine Sts., has determined to discontinue its jewelry business and has advertised the entire stock and fixtures for sale. An auction will begin about Oct. 15. The Oskamp Jewelry Co. is an offshoot of the old firm of Oskamp, Nolting & Co., formed about 30 years ago by William S. P. Oskamp and Charles A. Nolting, who were long in the Carlisle building on 4th St. This business increased to such an extent that larger quarters were necessary and a removal to the corner of 5th and Vine Sts. followed. The concern remained here some years and, finding the business increasing so rapidly, decided to divide it into two departments—retail and wholesale. The latter was moved to Elm St., its present location, and it was intended to close out the retail department. Not being successful in closing out this department, Mr. Oskamp bought out his partner's interest and turned this business over to his son, Herbert, who has been conducting it for the past five years under the name of the Oskamp Jewelry Co. Mr. Oskamp, finding the jewelry business too confining and not caring to make a lifework of it has decided to devote his time to other interests.

### Omaha.

A. Mandelberg has secured the services of a Mr. Hayden, of San Francisco, as watchmaker.

Harry Ryan, son of Geo. Ryan, of the Mawhinney & Ryan Co., has returned from a hunting trip in the State.

C. E. Rose, formerly with the Shook Mfg. Co., but now manager of a store in Lead, S. Dak., was a visitor in this city last week.

Mr. and Mrs. M. L. Carrier, Edgerton, Wis., arrived here last week, to be the guests of their cousin, Henry Copley, during the Ak-Sar-Ben Festival.

H. S. Knapp, traveling representative for the Shook Mfg. Co., will spend Ak-Sar-Ben week in this city, entertaining out-of-town customers and jewelers.

The solid gold medal which was presented to Mail Carrier Tebbens for having been in the service 35 years, was supplied by Fred Brodegaard & Co.

The following out-of-town jewelers not elsewhere mentioned were in the city last week: A. G. Kupka, Schuyler, Nebr.; M. O. Hamel, Orig, Nebr.; Chas. Farnham, Blair, Nebr.; J. T. Mudd, Merriman, Nebr.; Mr. Pedley, Bertrand, Nebr.; and L. S. Robinson, Glenwood.

Albert Edholm returned last week from a visit with his brother, of the Edholm & Akin Co., Evanston, Wyo. While there Mr. Edholm witnessed a genuine bronco-busting contest in which his brother offered a solid gold watch as the first prize. Mr. Edholm also stopped at Salt Lake City before returning home.

## Los Angeles.

A. E. Morro, corner Broadway and 4th St., has added a third watchmaker to the working force in his new store.

Ed. Turner, traveling salesman for the E. W. Reynolds Co., has gone on a business trip through the north, to be absent about a month.

Eight of the employes of the E. W. Reynolds Co. took a day off together last week, and went fishing at one of the near-by beaches.

Emil Shostrom, formerly with Brock & Feagans, has joined the sales force of J. G. Donovan & Co. He will have charge of the jewelry department.

Messrs. Schwarzkopf & Penniman, after having spent some time at home, are both preparing to start again on business trips among their patrons on the Coast.

H. L. Harris, formerly in business on W. 7th St., has taken I. Wolff as a partner and opened a store on Spring St., near 4th, under the name of Harris & Wolff.

The following out-of-town jewelers were in Los Angeles recently: B. F. Washler, San Dimas; E. H. Smith, Orange; E. T. Lewis, Long Beach; B. Hartfield, Anaheim; Mr. Kendall, of Kendall & Smith, Pasadena; and H. H. Hooper, Whittier.

A. Russell, traveling representative of the Pacific Gem Co., has just started for a business trip up the coast. Geo. H. Marcher, of the same company, expects to start early in October for another extended trip through the east, taking in all the large cities, including New York and Boston.

S. Simmons, 315 S. Spring St., having succeeded in getting enough miners at work in his Nevada mine to supply immediate demand for turquoise, is now installing machinery and will open a lapidary department in the rear of the store. He reports the demand for turquoise increasing, both from the East and from the Pacific Coast.

The Whitley Jewelry Co. has been busy for more than a week past getting settled in its new store, 347 S. Broadway, preparatory to the regular opening for business, which took place Monday. This new store has a front made entirely of white marble. This front will be one of the attractive features of Broadway. With the change of the new location, the company's name is changed from that of the H. J. Whitley Co. to the Whitley Jewelry Co.

## Pacific Coast Notes.

The jewelry department in C. H. Leggett's store at Madera is to be closed out. C. C. Hay, New York, and C. H. Angels, St. Louis, are making a tour of the Coast on business.

G. M. Briggs, manufacturers' agent, with headquarters at San Bernardino, Cal., is making a trip northward along the coast.

John Luxmore, with E. R. Hubbard, Lompoc, Cal., has just finished remodeling the high school electric clock, at that place.

Harry Lewis, a watchmaker at Geo. L. Dietrich's store, Anaheim, Cal., is absent during the present week on a trip to San Diego.

Lewis D. Anderson, a manufacturing jeweler of Reading, Pa., is on the Coast, enjoying an outing. He is in southern California at the present time.

A. E. Baranger, San Jacinto, Cal., is away from the store at that place, owing to the illness of his wife at Monrovia. During his absence the store is being cared for by Miss Edith Ryan.

T. T. Sullivan, manager of the chryso-prase mine on Deck Creek, was in Porterville recently, and states that he has enough of the stone now on hand to last three years at the present rate of consumption. They are still uncovering a great amount of rock, but are not taking it out, preferring to leave it where it is, as there is less danger of its being destroyed by fire.

## Kansas City.

### TRADE CONDITIONS.

Jobbers and manufacturers say the business situation continues to improve. Quite a number of retailers were in the city during the week, and as a rule they were liberal buyers. Collections, which were slow during August, are much better, and promise well for the present month. The Fall festivities which take in the early days of October always bring to the city a large number of business men from the west and southwest, who combine business with pleasure, and are usually liberal patrons of the wholesale and retail jewelry trade.

W. M. Lewis, secretary of the C. B. Norton Jewelry Co., has returned from a business trip to Chicago.

B. L. Seybold, who recently sold out his business in McLouth, Kans., was a visitor in the city during the week.

Mrs. K. G. Nevins, mother of the Nevins Bros., dealers in jewelers' supplies, has returned to her home in Kansas City after a three months' sojourn at McAllister Springs, Mo.

N. R. Fuller, manager of the jewelry department of the Edwards & Sloane Jewelry Co., who was at his desk all through mid-summer weather, is enjoying a well-earned vacation on a farm near Kearney, Mo.

Otis K. Bell, Louisburg, Kans.; Harry Shaffer, Basin, Wyo.; Merritt J. Rice, Trenton, Mo., and L. M. Stroud, Hutchinson, Kans., have all entered as students at the Kansas City Horological and Optical School.

The following new students have been enrolled at the Kansas City Polytechnic Institute: R. C. Horner, Hanover, Kans.; C. C. Mitchell, Pratt, Kans.; Elmer Bennett, Parnell City, Mo., and D. P. Hulén, Centralia, Mo., who has returned to complete a course of engraving.

The following out-of-town jewelers were in this city during the week: I. D. Fagin & Son, Lathrop, Mo.; Walter Sperling, Seneca, Kans.; O. J. Wiseman, Pratt, Kans.; A. Danzig, Herkimer, Kans.; Mr. Britten, of the Cowgill & Britten Drug & Jewelry Co., Hartford, Kans.; P. L. J. Lukins, Bucklin, Kans.; W. H. Story, Cleveland, Okla.; Mrs. J. H. Whiteside, Liberty, Mo.; Mr. Harney, manager for the Leonard Jewelry Co., Kinsley, Kans.; A. Y. Boswell, Tulsa, Okla.; J. W. Brasfield, Smithfield, Mo.; Mr. Huber, of Juglis & Huber, Higginsville, Mo.; Arthur Kroencke, Concordia, Mo.

R. L. McLaughlin, who recently sold his business at Lishon, N. Dak., has been looking over the field at Edgeley, N. Dak., with a view to locating there.

Cassius Bagley, of F. D. Day & Co., Duluth, Minn., will leave shortly for New York, to secure stock for the new store which his firm intends to open.

## San Francisco.

### TRADE CONDITIONS.

The local retail trade is now reported as better than at any time since the holiday season last year, even exceeding the record of last May and June when the fleet was here and business was good for a time. Labor is better employed for many months, and there is a feeling that coming Winter season will prove to be a satisfactory one.

About Oct. 1 the Emporium is to open its Market St. store. The jewelry department will be enlarged.

May Mott-Smith Cunningham, a designer and maker of unique jewelry, has taken her residence in the Argonaut Hotel.

Arthur Glass, of the firm of Glass & I 1738 Fillmore St., is absent at the present time on a trip through southern California.

The Alexandra Jewelry Store, of which Joseph Cahen is proprietor, is now in permanent location at 934 Market St., and is open for business. The receipts for the first week of business in the new place are far ahead of those of the Van Ness store, which is being retained until after the holiday season.

Although the Keystone Jewelry Co. has been doing business for a week at its new store at 756 Market St., the opening was not held until Saturday. The firm is making a proposition to any customers to take back and return for full chase price on any diamond purchases during the opening week.

The present month has been a good one for the manufacturers of trophies, as sporting events and shows have been in the vicinity of San Francisco. The high point of the week was the automobile races under the auspices of the Olympic Club at Tanforan, and dozens of beautiful trophies and prizes were distributed. Many of these were furnished by the W. K. Vandenberg Co., which offered a handsome cup of its own, and Hammersmith & Co.

After an exciting series of maneuvering between attorneys and the police, H. V. Weinberg, who was arrested in San Francisco some time ago, on charges from which he stated that he was wanted there for the embezzlement of diamonds valued at several thousand dollars, was finally sent to San Francisco. Weinberg employed a number of attorneys and these made several attempts to secure his release on writs of habeas corpus, fearing that he would be liberated before eastern police could reach here, but the San Francisco officials spirited him over to the Oakland jail, where he was kept.

## Springfield, Ill.

Julius Armbruster, with the Illinois Jewelry Co., is on an eastern trip.

J. C. Klaholt has just furnished a one-inch five-star diamond badge given to the chief of police of Springfield.

A. S. Wormood, now a jobber in New York, recently received an old rifle made in 1776, which figured in the early history of Kentucky.

The establishment of John C. P. is now undergoing extensive remodeling. The new office will be in the center of the store, the right-hand side and will be completely enclosed. A balcony is being added to the rear of the store will be devoted exclusively to fine art goods.

## Minneapolis and St. Paul.

The Birkenhauer Thomsen Co., Minneapolis, has installed two large new cabinets for findings and materials.

G. Simpson, of B. F. Simpson & Co., Minneapolis, has started on his regular trip in the interests of his firm.

P. Meyer, Minneapolis, has retired from the repairing business on 7th St., and will engage in the printing business.

C. Gaus, Minneapolis, who has been somewhat ill with a throat affection, has recovered and will resume his trips on the

John Mathis, Morgan, Minn., was recently in the city. He has just bought a store at Marshall, Minn., where he will be located in the winter.

The son of M. Albrecht, St. Paul, has returned home after completing a five years' service in the navy. He expects to enlist after a few months' rest.

C. Marx, who recently sold out at Shakopee, Minn., and went west, has returned. He is now visiting in Shakopee, and expects to engage in business in South Dakota in the near future.

Benjamin Francis Simpson, a wholesale jeweler, and Miss Gladys Marie Jobert, who quietly married in Minneapolis last week. Mr. and Mrs. Simpson left at once for Lake Minnetonka, for their honeymoon.

They were joined there by Mr. and Mrs. P. J. Rembold, Farmington, Minn. The wedding of the latter couple occurred at Gaylord, Minn., the bride being Miss Augusta M. Bonne.

Among the jewelers in the Twin Cities recently were: L. Nachtseim, Shakopee, Minn.; W. D. Nelson, Pierre, S. Dak.; F. W. Estabrooks, Coleraine, Minn.; D. W. Smith and wife, Pipe Stone, Minn.; Carl Dauth, Redfield, S. Dak.; John Emoak, Droit, Minn.; F. D. Schrimpf, Inkster, S. Dak.; A. O. Hulberg, Two Harbors, Minn.; J. H. Hunkins, Le Sueur, Minn.; J. H. Gerde, Paynesville, Minn.; Henry Es, Montevideo, Minn.; H. L. Waldron and wife, Staples, Minn.; A. W. Voedisch, Akeley, Minn.

## Pacific Northwest.

C. Payne is now located in new quarters in Ontario, Ore.

E. Zenier, Clarkston, Wash., is enlarging his store at that place.

The E. Howard Clock Co. has been awarded the contract to install a tower clock at Prineville, Ore., at a cost of \$725.

L. Thomas, Newport, Ore., who operates an agate grinding shop, will leave shortly on an extended trip, on account of ill health.

W. Carleton is preparing to open one of the largest stores in the Coos Bay county at Marshfield, Ore., and is now purchasing stock. The store is being fitted up and will be ready for occupancy by Oct. 15.

A heavily loaded wagon got beyond the control of the driver in Seattle, recently, and crashed into M. & N. Lichenstein's jewelry store, breaking the plate glass windows and doing damage to the extent of \$350.

Chas. H. Williams, Condon, Ore., has returned from a convention at Cincinnati, O., where he went as a delegate for the Retail Jewelers' Association. He was re-elected

to his old position as second vice-president and was much impressed with the success of the convention. While on his way home he was caught in a disastrous railroad wreck on the Rio Grande, but escaped injury.

## St. Louis.

J. A. Key, of Simon Van Raalte & Co., is away on a vacation.

Herman Mauch, 507 Franklin Ave., was in Illinois on a fishing trip the past week. Mrs. Mauch and a party of friends accompanied him.

Brener & Co. will move from their quarters in the Globe-Democrat building, 6th and Pine Sts., to 511 N. 6th St., Oct. 1. The new store will adjoin that of S. Ruby.

J. C. Bohl, Hot Springs, Ark., and Mrs. Belle Stauder, of New Orleans, were married at the Rozier Hotel, last week, the groom having just been granted a divorce from his first wife.

The store of the late Louis M. Weinbrecht, who died several weeks ago without leaving a will, was sold, Tuesday of last week, at public sale, the property going to Mr. Yackel, Mr. Weinbrecht's watchmaker. The price paid was \$1,400.

Joseph G. Rogers, who for eight years has been in the repairing department of the Mermod, Jaccard & King Jewelry Co., has resigned and will go to Los Angeles, Cal., to take charge of the repairing department of the firm of Brock & Feagans.

Many jewelers were present on Tuesday, of last week, at the wedding of Miss S. Reichenstein to S. Ruby, of this city. Dr. Wolfenstein, of the Cleveland Orphan Asylum, where the bride lived for many years, performed the ceremony. Miss Rosa Reichenstein was the bridesmaid, and M. Eisenstadt, of the Eisenstadt Mfg. Co., was best man.

Among the out-of-town jewelers in this city, last week, were: M. P. Green, Marissa, Ill.; J. T. Fields, Chaffee, Mo.; J. T. Perkins, Rolla, Mo.; Mr. Strange, of the Strange Jewelry Co., Sherman, Tex.; C. S. Scanlin, Indianapolis, Ind.; N. P. Jensen, Alfred S. Bourgeois, Jackson, Miss., and John Fink, of Klein & Fink, Fort Smith, Ark.

Emil Bauman, a jeweler and watchmaker at 2514 S. Broadway, has entered the aeronautic arena. Mr. Bauman, who has only been in this country from Europe for three years, has the model of a combination airplane-airship, and last week he organized the Emil Bauman Mfg. Co., which will manufacture his invention and supply the capital for trial flights.

## Columbus, O.

S. C. Bingaman, a Cincinnati jeweler, and Miss Sarah Minear, of Chillicothe, were married in this city at the Chittiden Hotel, Sept. 19, and left from here on a wedding trip to Canada.

A. B. Loose, formerly in the jewelry business on Mt. Vernon Ave. with his brother, but who more recently managed C. E. Radebaugh's store at N. High St., during Mr. Radebaugh's illness, has gone to Mt. Gilead, O., where he has opened a retail jewelry and optical store.

## Indianapolis.

Streng & Lux have given up their Indiana Ave. location. Streng recently opened a retail store at 5 W. Market St.

Chris. Bernloehr reached home, Monday, after a three months' trip to Europe. He spent a few days in Washington, D. C.

William Brewer, for some time with Dan S. Hickman, manufacturing jeweler, has taken a position with Carleton Wiggam, on Virginia Ave.

George B. Dyer, of the Arts and Crafts Shop, has gone on a two weeks' western trip, and will spend several days at Denver and Colorado Springs before returning home.

The five years' lease of the Moses Optical Co., 31 N. Illinois St., has expired, and the company has taken a similar lease on the room at 11 N. Meridian St. recently vacated by the Burton Jewelry Co.

The Arts and Crafts class conducted by Chas. B. Dyer, a Massachusetts Ave. Jeweler, will open for the Fall term, Oct. 6, and will continue until Dec. 8. About 50 young men and women have enrolled for the term.

While mussel hunting in White River last week, John Lucas, of Washington, found a pearl for which he refused an offer of \$800 by R. I. Lindsay, Vincennes. The pearl is of the pink variety, and almost perfect in shape.

A. S. Orr, Greenfield; Aaron Pursel, Noblesville; T. S. Biggs, Fontanet; J. W. Hudson, Fortville; J. A. Miessen, Cicero, and George F. Long, New Richmond, were among the Indiana jewelers in the city last week.

The business of the Hoosier Jewelry Co. has been sold to A. J. Earl and Ernest Newlin, who were stockholders in the company, when it went into the hands of a receiver some time ago. Donald S. Morris was appointed receiver, and, with the permission of the court, sold the stock to Earl & Newlin, as the new firm will be styled.

It is probable that steps toward the organization of a local nest of Ku Kus will be taken some time during October, as plans are being made to hold a meeting for the purpose at an early date. J. P. Mullally, president of the Indianapolis Retail Jewelers' Association, states he believes a nest with at least 75 members can be established.

Gray, Gribben & Gray have decided to remain at 35-37 N. Illinois St. for another year, having taken a new lease, beginning Oct. 1. They first contemplated giving up this location upon the expiration of the lease, to establish two stores. After leasing the building at 345-347 Massachusetts Ave., where they expected to establish one of the new stores, they cancelled the lease.

Arthur L. Sinclair, traveling for a New York jewelry house, put in a few anxious hours here, Thursday night, when he thought his trunk containing \$20,000 worth of jewelry had been stolen. The local detective department was put to work, but after a few hours word was received that the trunk was on a C., H. & D. Railroad train bound for Toledo, O., and from external appearances had not been disturbed.

George H. Hayden has bought out J. W. Hickel, Jacksonville, Ore.

Eggers Bros. have erected a new plate glass front at their store, in Atlantic, Ia.

## Pittsburg.

Harry Weilman, Kittanning, visited his friends here, last week.

Sol Cerf, of Sol Cerf & Co., has returned from a buying trip in New York.

George S. Dunbar, of the George B. Barrett Co., has just returned from a road trip.

Harry McKowen, Indiana, Pa., was in Pittsburg, last week, visiting friends and attending the Pittsburg Exposition.

Ligonier, last week, celebrated "Old Home Week." The jewelers of the town took a prominent part in the celebration.

George P. Christy, trustee for J. F. Murphy, Dawson, Pa., expects to be able to offer the stock for sale within a week or two.

The Hardy & Hayes Co. is exhibiting some handsome cups in honor of the Horse Show, which held attention, last week, in the fashionable suburb of Sewickley.

Charles Heupel and Miss Heck, the latter of Mt. Washington, were married last Tuesday and immediately after the wedding ceremony started for Mt. Cheateau, W. Va., where they are spending their honeymoon.

Among the out-of-town jewelers who were in Pittsburg last week on business were F. B. McKinley, Washington; J. B. Kurtz, Connellyville; S. S. Snyder, Dayton; Frank Murdock, Ligonier; J. E. Whitten, Mingo Junction.

George West, of West, White & Christy, who represented on the road the firm, of which he is the senior member, has given up the work, R. W. Voorhees, a nephew, taking his place. Mr. West will devote his attention to the management of the house.

C. C. Marsh, of the Marsh, Brown & Mather Co., who has been resting at Mt. Vernon, O., for over a year, on account of illness, writes to his partners here that he is putting in his time raising chickens and at present is watching over 100 "peeps." His health is improving.

A gang of youthful thieves were held for Juvenile Court, last week, for robbing some pawn shops in the Wylie Ave. district. The boys, Edward Schubert, aged 13; Earl Bailey, aged 15, and Max Coperman, aged eight, confessed to robbing the store window of the Banner Loan Co., 1221 Wylie Ave., by breaking it and stealing some jewelry and to breaking the window of the shop of M. Lungo, 75 Washington St., and making away with jewelry.

The stock of the Pittsburg Watch Co., bankrupts, which was to have been sold Monday of last week, was deferred for the third time until this week. Creditors, it is stated, have been offered a settlement of their claims on a basis of 25 per cent. on the dollar, and the receiver is endeavoring to secure an adjustment. It is said that all but one or two creditors have agreed to accept the amount in settlement of their claims.

There was excitement on the morning of Sept. 21 about the establishment of the George B. Barrett Co., Smithfield St. and Fifth Ave., caused by the burning of decorations on the Park building. Someone is thought to have thrown a lighted match out of one of the upper windows on the deco-

rations, which caught fire, and the department was called out. The windows of the Barret place on the second floor were closed and the firemen played chemicals on the front of the structure. The windows were smoked and covered with chemical liquid, but no damage was done to the interior. Several hours afterward the windows were cleaned and no trace was left of the cause of the excitement.

Great preparations have been made by the local jewelers to properly celebrate the sesqui-centennial week, which opened Monday. All of the local establishments have been decorated, a more detailed account of which will be given next week. Heeren Bros. & Co. intend to have a float in the big civic parade to-morrow, which, it is stated, represents an expenditure of \$500. The firm is spending upward of \$2,000 in decorations. A large number of people from out of town are in the city and dealers do not expect to do much business during the days of the parades. Among those who contributed to the centennial fund during the last week were W. W. Wattles & Sons, \$50; Sam F. Sipe, \$25; E. P. Roberts & Sons Co., \$10.

Suit was entered in the Common Pleas Courts here last Friday against the M. J. Smit Co., jewelers, at Fifth Ave. and Masters Way, by John S. Dougherty to recover \$10,000 damages for alleged malicious prosecution. In his bill of complaint Dougherty asserts that Smit had him arrested Aug. 29 last, and that he was confined in jail until Sept. 2, when the court ordered his release on a writ of habeas corpus. When THE CIRCULAR-WEEKLY correspondent called at the Smit establishment Mr. Smit said that he had not been served with notice that such a suit had been brought. The house has entered several suits of the character and have secured judgment against debtors, who, failing to pay for goods bought on a lease, have been sued for the entire amount, under an old act, and judgment for the sum owing obtained. The suit which Dougherty enters perhaps will be in the nature of a severe test of the old statute, and jewelers will be much interested in the outcome, especially those who sell on leases.

Agents of the Business Association of Pennsylvania for the repeal of the mercantile tax, with offices in Philadelphia, have been in Pittsburg during the last week interesting dealers in the movement for the repeal of this obnoxious measure. It is being shown that merchants generally, and jewelers in particular, pay into the State an annual tax of \$2,000,000. It is asserted by the agents that it costs \$1,750,000 in commissions to collect this tax, and that at least a large portion of it goes into the hands of politicians or the men who hold the offices. Quite a number of wholesale and retail jewelry merchants of Philadelphia are on the business men's committee having the campaign in charge, among whom are S. Kind & Sons, while opticians and jewelers generally of that city are members. Members to the organization are also being enrolled here, and some of the jewelers are assisting the association by contributing to the fund. It is stated that over 200 candidates for the Legislature are now pledged to vote to repeal the law if they are elected. Its

elimination from the statute books means the saving of many hundreds of dollars to local jewelers.

## Milwaukee.

Val. Schemerell, Sun Prairie, Wis., was a recent visitor in Milwaukee.

Max Krieger, 498 Mitchell St., is erecting a new Seth Thomas street clock. Mr. Krieger did not possess a street timepiece at the time of the midnight clock race of last Spring.

Among the out-of-town jewelers in Milwaukee, last week, not elsewhere mentioned were: William F. Notbohm, Oconomowoc; John Armbruster, Cedarburg, and Beswick, Racine.

The dates for the next annual meeting of the Wisconsin Retail Jewelers' Association were fixed for July 20, 21 and 22. It had already been decided to hold the meeting at the Blatz Hotel, in this city.

The Peerless Jewelry Co., of which Martin is manager, is preparing to enter the wholesale field in addition to its present extensive retail business. Only Milwaukee and Wisconsin territory will be covered, and gold and gold-filled jewelry will be made a specialty in the new business.

The matter of the examination of jewelers was taken up at the recent Oshkosh meeting. At the last annual meeting of the State association in Milwaukee it was decided to appoint an examining board to issue certificates or diplomas to those passing the examination. At the recent Oshkosh meeting President Keller appointed an examining board made up of The Schelle, Milwaukee; W. H. Becken, F. Dam, and Julius Sauermann, Milwaukee.

A meeting of incorporators will be held in Milwaukee within a short time to organize the new Jewelers' Mutual Fire Insurance Co. of Wisconsin. At the recent meeting of the board of directors of the Wisconsin Retail Jewelers' Association, at Oshkosh, preliminary steps were taken toward the organization of the company, and a committee was appointed to take the necessary steps toward the incorporation of a new company. Members of the committee who will also be the incorporators are: W. H. Upmeyer, Richard Seidel, C. Durner, E. F. Rohn and A. J. Stoessel, Milwaukee; Gustave Keller, president of the State association, Appleton; J. R. Chas. Oshkosh; W. A. Pfister, Sheboygan; J. De La Port, Berlin. It is expected that President Keller will head the new company. Applications for insurance aggregating \$97,000 have already been received and practically assures the minimum \$100,000 which must be received to obtain the State charter.

R. Blackinton & Co., North Attleboro, Mass., have just issued a most attractive catalogue of purses, card cases, boxes and powder books made in silver. The catalogue is bound in color covers, with the inscription in letters. The articles advertised are illustrated in exceptionally clear half-tones on heavy glazed paper. The catalogue is 9 by 12 inches in size and contains 100 of illustrations. A price list accompanies the catalogue, and is bound in the same manner as is the catalogue.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."

## Practical Course in Adjusting

By THEO. GRIBI

Comprising

A review of the laws governing the motion of the balance and balance spring in watches and chronometers, and application of the principles deduced therefrom in the correction of variations of rate arising from want of isochronism, change of position and variation of temperature.

Elucidated and Demonstrated

By original experimental researches in the actual problem, never before published, showing the causes that are operative in the variation of rate, and leading to correct remedies. To which have been added chapters on

How to make a Balance Arbor with Modern Appliances; How to Clean a Watch Properly; and, the Lever Escapement—Some Current Defects in it and How to Remedy Them.

**BRITISH PATENTS.**

(ABRIDGMENTS OF SPECIFICATIONS, 1907, FROM *The Illustrated Official Journal.*)

ISSUE OF SEPT. 9, 1908

1374. JEWELRY, ETC., FASTENINGS. F. V. PATTERSON, Birmingham. May 15.

fasteners for brooches or the like of the type which two hooks *b, b'*, Fig. 3, on bars *c'* slide in the tubular part *a* of the brooch, the hooks being drawn into the fabric by springs, the springs *e* are confined between the ends of the tube and abutments on the ends of the bars *c'*. The bars *c'*, Fig. 4, are of square or angular section to prevent the rotation of the hooks in the tubular

part *a*, also of angular section. It is stated in Provisional Specification that the invention may be employed for connecting articles of wear-apparel, holding down neckties, etc., and con- taining bracelets.

1333. PENS. R. W. JEFFREYS, Highbury, London. May 8.

relates to fountain-pens provided with a flexible reservoir *g* having a presser *g'* attached thereto, the reservoir being compressed, for filling purposes, by the insertion of a pin *c'* attached to cap *c*, through an aperture *a'* in the barrel *a*. The feed-bar *d* is formed with a cylindrical portion *d'* which tightly fits the pen barrel *b*, and is

provided with a slot *d''* and transverse groove *d'''*. Gravity feed-needle *f* of twisted wire is loosely seated in the bore *d''* of the feed-bar, its movement being limited by a loop *f'* at its inner end, engaging with a pin *f''* fixed to the pen section *b*. To prevent leakage when not in use, the interior of the cap *c* is provided with a tapered plug *c''* which fits the bore *d''* of the feed-bar.

1391. DRESS PINS; BROOCHES. G. A. WILDER, Birmingham. May 15.

A point-protector is formed of a metal strip *b* which is provided with holes *c* for the insertion of the pin and is retained by its resilience, the

point *a* being curled over as shown. In combination with a short pin, the article may be used as a brooch.

1,572. DRESS PINS. A. H. K. TAYLOR, Ealing, Middlesex. May 17.

A pin for securing soft collars consists of a

rigid member *A* which is threaded near the end to receive a hollow screwed cap *C*.

1,860. WORKMEN'S TIME-RECORDERS. W. BERESFORD, Liverpool. May 22. Period for granting patent not yet expired.

In an autographic time-recorder, the forward movement of the operating-lever inks the disks, opens the shutter for the signature aperture, and trips the printing-hammer; the spring-actuated return feeds the record-strip. The time-types are carried on the flat of the disks *I*, the hour-disk having a ratchet-wheel attached to it as to be moved by a transfer finger on the minute-disk. Numbers on the upper side of the disks show the time through apertures in the

casings. The inking-pad 49 is carried on an arm 7 on the vertical shaft 54 controlled by a spring 53 and operated by an arm 50 engaging a cam 52 attached to the lever 6. The shutter 8 is loosely pivoted on the spindle 54 and is urged by a spring to follow the arm 7 against which a pin 55 on the shutter rests. A preliminary movement of the arm raises the pawl for locking the shutter till the arm meets a second pin 56 thereon. The shutter is thus locked till the platen 35, Fig. 4, is actuated; the platen is drawn down against the actuating-spring 44 by a finger 48 pivoted on an

extension of the platen engaging an arm 47 on the spindle of the operating-handle. An arm on this spindle carries the pawl 40 for feeding on the record-strip. The slot in the casing for the actuating-lever is closed normally by a spring-pressed plate guided by pins and slots and having an incline 73 so as to be moved aside by the lever.

Complete specifications accepted Sept. 2, 1908. 1907.

**Canada Notes.**

Jacob Singer, Toronto, is selling out. Thomas Tucker, Madoc, Ont., has given a chattel mortgage for \$664. J. P. Vick, Owen Sound, Ont., has given a chattel mortgage for \$763 to H. I. Clegg. A. Snell, Los Angeles, Cal., formerly of Strathroy, Ont., was in Toronto, Ont., last week. J. E. Nettleton, Penetanguishene, Ont., has returned from a trip to New York and Atlantic City. John W. Fraser, Russell, Man., has erected a fine new block on the site of his old store, which was destroyed by fire some time ago. He will occupy the center store in the building. Out-of-town jewelers calling on the Toronto (Ont.) trade last week included: E.

Marchand, Milton; A. Moffatt, Brantford; W. H. Smith, Oakville; N. Bassett, Whitby; and W. E. Kelly, Goderich, all Ontario; W. E. Best, Mariapolis, Man.; and W. W. Wellner, Charlottetown, P. E. I.

M. Bilsky & Son, Ltd., have obtained a provincial charter of incorporation with an authorized capital of \$40,000, to carry on a manufacturing, wholesale and retail jewelry business, having taken over the assets of M. Bilsky & Son, Ottawa, Ont. Provisional directors are Moses Bilsky, Paulina Bilsky, Samuel Bilsky, Rebecca Vinberg, and Oliver E. Culbert.

On Wednesday afternoon the marriage of Miss Edith Kent, daughter of Benjamin Kent, of B. & H. B. Kent, Toronto, Ont., to Walter E. Berkinshaw, took place at the home of the bride's parents, St. George St., Toronto, where a reception of relatives and friends was held after the ceremony. Mr. and Mrs. Berkinshaw left on a wedding trip to New York.

**Lancaster, Pa.**

Oscar T. Smith is spending 10 days in New York.

Paul F. Saylor has gone to Cleveland to visit his brother, Samuel Saylor, a jeweler of that city.

O. E. Bell, president of the Pennsylvania Watch Case Co., York, Pa., visited Lancaster last week.

T. L. Wilson, a Georgetown (Del.) jeweler, has returned home after visiting J. M. Kreider, Ephrata.

Harry M. Musser, proprietor of Musser's silver plating works, is home from a two weeks' trip to the west.

The Millionaires' Club, composed of employes of the Hamilton Watch Factory, held a banquet last Thursday night at the Park Hotel.

Aug. Rhoads engraved the beautiful silver loving cup received as a prize for his exhibit at the late Bryn Mawr Horse Show by Richard P. McGraun, this city.

Edgar Brenneman, Altoona, having finished a course in watchmaking at the Ezra F. Bowman technical school, has returned to Altoona to take a position as watchmaker and optician with his brother, Clayton G. Brenneman.

S. Kurtz Zook is celebrating the 15th anniversary of his business career with special sales. During the past week a window exhibit of automatons demonstrating a self-filling fountain pen has proved quite an attraction to street crowds.

Among the jewelers who lately visited Lancaster were E. P. Zane, Christiana; Albert T. Heberling, Parkesburg; Jacob Esch, Intercourse; J. A. Kirk, Quarryville; J. M. Kreider, Ephrata; S. H. Miller, Mt. Joy; Frank C. Maurer, Strasburg.

B. Frank Phillips, formerly in charge of the tool department of Ezra F. Bowman & Co., has taken a similar position with the H. S. Meiskey Co. E. M. Bracher, of that company, just home from a trip through New York State, has started on a western trip, and F. A. Huber, another representative, has gone South.

The J. R. Henley Co. will hereafter conduct the business formerly owned by Mrs. Frances Worthington, Westfield, Mass.

# Now It's The Lord Elgin

The demand to-day is for thin watches.  
The public have been waiting for  
thin Elgin Watch—now it's here—th

## LORD ELGIN

The  
Thinnest  
Watch  
Made  
in  
America  
with  
Enamel Dial

the thinnest watch made in America  
with enamel dial.

Like all Elgin Watches—it was not  
put on the market until worthy to carry  
with it the Elgin reputation for reliability.

Every Lord Elgin is cased at the fa-  
ctory and timed in the case—the most  
accurate thin watch in America.

Four grades—7, 15, 17, and 19  
Jewels adjusted. 18K and 14K solid  
gold cases, also 25 year filled cases.

Furnished with metal dials, plain or  
engraved, gilt or silver.

Prices furnished on application by  
your jobber, or write the Company for  
only authorized price list.

General Offices, 131 Wabash Ave., Chicago

## The Technical Characteristics of Tower Clocks

Conditions to Be Considered in Their Construction

WHILE a great deal has been written of late in regard to the tower clock, the astronomical and the monumental clock from an historical standpoint, and their mechanical and automatic features have been described at length, while their dimensions have been the subject of public controversy. We have not heard so much of their technical characteristics. As a brief contribution to this branch of the subject, we give here a few points, some of which are excerpted from a lecture on tower clocks, etc., delivered some time ago before the Society of Arts of Great Britain, by a recognized authority on tower clocks.

The author first distinguished three classes of tower clocks—the timepiece purely simple, or non-striking clock, the striking clock and the chiming clock.

Attention was directed to the fact that the soundings of the non-striking clock are practically immaterial; it fulfils its allotted function irrespective of the din of the surrounding streets and other disadvantages of similar character. But in the case of a striking or chiming clock, this must be considered, and the sounding power of the timepiece must be gauged according to the noises it must overcome. Several instances are quoted in which expensive installations of bells, chimes, etc., in large cities were practically useless, owing to lack of foresight in this respect.

Another important factor to which special reference was made, was the provision of suitable openings in the bell towers for the dissemination of the sound. While this properly concerns the architect, the clockmaker is also interested in securing a hearing for his work. The equipment of the bell-tower openings with louvres is not essential, for the weather will not hurt the bells, while the louvres, unskilfully disarranged frequently turn the volume of sound downward on to the head of the passerby, in place of allowing it to spread itself over the neighborhood. The necessity for having the bells large and sonorous enough to produce the effect expected of them, is likewise dwelt on.

Whether the clock be of the striking or non-striking variety, suitable provision must be made for the ascent and descent of the

weights, by means of which all large clocks are nowadays driven. The simplest and safest arrangement is to allow them a clear descent to the ground in an angle of the tower or building, the longer the descent the less frequent the necessity for winding. Moreover, in case of such an occurrence as the breaking of a weight rope—an accident not always avoidable—the weight will come to rest without damage to the structure. Where this cannot be done, the weight well

FORM OF OLD TOWER CLOCK MECHANISM.

may end at a solid offset from the wall, or on a substantially built platform, well padded to receive the possible impact of a falling weight. It is hardly necessary to state that the weight well should be enclosed, the floors through which it passes properly cased and provision made to keep people from standing beneath the descending weights.

As to the weights, it was formerly customary to make them in a single mass, a clumsy method, involving the handling of a ponderous body at the time of installation or in case of accident. Nowadays they are usually made in segments of convenient size, easily handled, and which can be increased or reduced at will. For the lines, steel wire or cable is now exclusively employed.

The heavier service required of the powerful striking movements common in our times has led to the use of solid machine-

cut wheels and pinions and to the manufacture of gun metal in place of the softer and more spongy brass. Pinions are usually cut from solid steel, where durability is an object. The "lantern pinions" formerly used were cheaper, but should the pin wires be worn badly, bent or displaced, they will rapidly cut and wear the teeth of the wheels they engage.

The construction of the pendulum should make it easily compensable. If made of a rod of zinc and iron tubes, with a center rod of steel, it can readily be adjusted to compensate for changes in length due to temperature.

Pendulums of excessive length are a thing of the past. A pendulum of 15 or 16 feet, beating once in two seconds, is quoted as good practice. The best place to hang a seconds' pendulum is against a convenient wall. This keeps it out of the way, guards it from interference and leads to the location of the clock works near the wall, where they will be most firmly supported, in place of locating them in the center of a vibrating or unstable floor.

To do justice to the tone of a bell, the hammers must be of proper weight, the accepted proportionate ratio of hammer to bell in order to bring out its full tone being one-fortieth; chime hammers may be somewhat lighter. The hammer should be raised far enough to give a hard, sharp blow and must be in contact with the bell only at the instant of striking. After delivering its blow it must be at once withdrawn to avoid jarring, and strong springs held the hammers off the bells at other than striking times. The hammer work should receive periodical attention, such as oiling, painting, etc.

After the bells it is the dial of the clock that directly appeals to the world, and dials may be of divers types. There is the skeleton dial of cast or wrought iron, the dial of sheet copper, appropriately painted, and the illuminated dial, best made of white opal glass, lighted from within.

For village clock towers, residences, etc., and where it is desirable to adopt a dial in keeping in design with the prevailing architectural style, the first named type is preferable. For ordinary buildings, where illumination is not contemplated, the dial of sheet copper is best. It can be painted to harmonize with its surroundings, black with gilded figures, being the prevailing style, and while reasonable in first cost, surpasses in durability. Properly protected by painting, it is practically indestructible, does not disfigure its surroundings by corrosion and is

# WALTHAM WATCHES

## COLONIAL SERIES

These Extra Thin Watches may be had in four qualities of movements as follows:

### **RIVERSIDE; NICKEL;**

19 fine ruby jewels; raised gold settings; double roller escapement; steel escape wheel; exposed sapphire pallets; compensating balance, adjusted to temperature and five positions; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; red gold center wheel; exposed winding wheels.

### **ROYAL; NICKEL;**

17 jewels; red gold settings; exposed pallets; compensating balance, adjusted to temperature, and three positions; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

### **NO. 1425; NICKEL;**

17 jewels; red gilded settings; exposed pallets; cut expansion balance; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; red gilded center wheel; exposed winding wheels.

### **NO. 1420; NICKEL;**

15 jewels; settings; exposed pallets; cut expansion balance; meantime screws; patent detachable balance staff; patent Breguet hairspring, hardened and tempered in form; patent micrometric regulator; tempered steel safety barrel; exposed winding wheels.

Riverside and Royal grades are supplied in Gold and Gold Filled cases, both Regular Jointed Open Face and Calumet (Single Joint).

No. 1425 and No. 1420 grades are supplied in Gold Filled Cases only, both Regular Jointed Open Face and Calumet.

Colonial Series watches have Gilded or Silver Finish Metal Dials, as may be preferred. Solid Gold, 18k. and 14k. dials at an extra charge.

*Movements manufactured and guaranteed by*

**WALTHAM WATCH COMPANY,**  
WALTHAM, MASS.

more extensively employed than any other. Where the clock is to be illuminated after dark a dial of solid opal glass is best; a cheaper grade, known as flashed opal glass, is made, but the difference in quality is out of proportion to the difference in cost. The solid opal is always clean and bright in

To illuminate the clock face properly, the lights should be at least 15 inches from the inner surface of the glass. If too close, they show through as bright patches, in place of giving the soft, evenly diffused effect; if too distant, light is wasted, or the clock face is dark.

A few words relative to the size of the

framework of cast brass will be found most durable and satisfactory.

The best made modern tower clocks have the frame of cast iron, a single casting, obviating joints that work loose and doing away with the danger of warping, to which the old type, wood-frame clocks, were exposed. In setting up the clock, the feet must rest on a solid foundation, which must be absolutely level, as must also be the top of the frame, on which the bearers rest. It is needless to state that the works should be so set up that every part is readily accessible, for adjustment, lubrication, etc. The clock chamber must, of course, be weather-proof. For lubrication only a good brand of lubricating oil, free from grit or acid and that will not gum or harden at a low temperature, should be employed. Tower clocks should be wound at regular intervals, and should not be suffered to run until the possibility of their running down altogether is imminent, as this entails uneven strain on the works that results ultimately in irregularity of performance. A good tower clock, while robust, is essentially a delicate piece of mechanism and should be treated accordingly.

#### Unique Watch Examiner.

It has been said that the examining of a watch is somewhat akin to the examination which a careful physician makes of his patient. It is at least useful to make this comparison in order to urge young watch-

NOVEL DEVICE FOR EXAMINING WATCH MOVEMENTS.

makers to go about a watch as a physician proceeds with a sick person.

First of all, examinations must be made to reach the fault, before corrective remedies are applied. Scrupulous attention must be given to the escapement, so that the watch will retain its motion in every position; otherwise the regulating of watches would become farcical, indeed.

To observe the motion of a watch in every position, M. Mautin, of Mautinetian, France, has constructed a handy little device, which is illustrated on this page. The illustration needs no explanation, the mode of working being very apparent.

N. J. Zeller has purchased the business of E. E. DeGroff, Le Roy, Minn.

TOWER CLOCK IN CITY HALL OF PORTSMOUTH, ENGLAND.

any weather, plainly visible by day and translucent, rather than transparent, at night, requiring the least volume of artificial light.

For lighting a dial at night, the electric light, or even lamps, are preferable to gas. They can be automatically controlled by an apparatus operated by the clock work. Gas stoves and heaters, which are a source of vibration and dries up the lubricating oil.

dial may not be out of order; a foot in diameter for each 10 feet from the ground will be found a satisfactory proportion, and may be exceeded, but should not be lessened.

Finally, as to the hands, where of small or ordinary size, they may be fashioned from a suitably durable and non-corrosive metal. Where they are required to be of large size, sheet copper on a supporting

Makers of Superior Timepieces of all kinds, sizes and prices, from a Lady's O-size Watch to a 40-foot Dial Tower Clock, largest in the world.

interesting "Pocket Tests" of English, Swiss and American Watches.

REPORTS of the trials of watches and chronometers at the various observatories, such as Besançon, Kew, Geneva and

known high character in workmanship and observatory rating.

Mr. Bookwalter conducted these tests himself at his business desk, where he has Western Union signals from Washington for five minutes every day. Each watch

tested during the same five minutes' receipt of signals.

At night the vest was laid in a dresser drawer horizontally and alternated on alternate nights, thus giving them the position of face up and face down alternately on alternate days, and practically pendant up during the day.

The watches were not removed from the pockets except for winding and time-taking. Therefore, the conditions were precisely the same for each, and the tests impartial.

A single microscope was used on the second hand divisions or markings, and the observations were rarely ever more than a tenth of a second in error, which would be lost in the average of 10 to 20 days.

The writer had the assurance of the director of the Naval Observatory at Washington that their signals were correct within a 10th to a quarter of a second.

Emperor Joseph's Watch.

UNTIL quite recently, says a daily exchange, Emperor Francis Joseph claimed the distinction of being the only reigning monarch, with the exception of the pope, who wore a silver watch. He had a

Neuchatel, have appeared at different intervals in THE CIRCULAR-WEEKLY. These reports show only observatory results, and it will undoubtedly be interesting to examine some pocket results as noted by Frank M. Bookwalter, Springfield, O., who is preparing an interesting work on marine and pocket chronometers. The pocket reports include the English Karrusel escapement watch No. 6,984, which gave the lowest "mean variation of rate" at the Kew trials of all the watches for 1907; a pocket record of a "first prize" Swiss watch having an exceedingly good Geneva report, and of two American-made watches of different firms.

One table exhibits an 18-day run of the three last mentioned pieces; all data taken at the same dates, and under exactly the same treatment. Explanatory remarks accompanying cover the conditions of trial, and the quality or grade of the different pieces.

There is also a table of the pocket performance of the English and Swiss movements, taken together and at the same time, for a given period, accompanied with full description, all of which should indicate the practical service obtained from pieces of

was carried in a separate pocket in the same vest, each being wound at the same time at seven o'clock in the morning, and each

gold watch, an old-timer, that had to be wound up with a key, but it got so feeble that the emperor abandoned it, and for the last 12 months or so constantly wore the watch that formerly accompanied him on his hunting trips. This was a massive silver affair, and so heavy that it incommoded the imperial owner occasionally. Yet he could not be persuaded to buy a modern watch, saying the old ones must do, even if they cost a lot of money in repairs. Finally the Archduchess Frederick persuaded the emperor to accept a new watch on the plea "that it would amuse the children." For the timepiece she offered his majesty has all the latest improvements. It sounds the hours, halves and quarters of hours, and, besides, plays popular melodies when a button is pressed. The emperor "tried it on the children," several of his numerous grandchildren, grand-nephews and grand-nieces, and they were highly amused. So the new watch was permanently accepted by Francis Joseph.

**Special Railroad Movements**

To secure and hold the railroad trade there is no more attractive and permanently satisfactory line than the V. & C. Special Railroad Movements.

The watches in question have been in use for many years by a great many railroad men on all important lines in this country, and have shown a degree of accuracy and reliability which is unparalleled.

Many railroad watch inspectors have assured us that the rigid requirements of a railroad watch are met by the V. & C. to a degree which is beyond criticism, and which places the line in a class by itself.

You should have a representative showing of these railroad movements—17 to 21 jeweled, adjusted to heat, cold and position, and lever set—in order to get your share, and more than your share, of this most desirable class of business.

# STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

## Novel Window Display for the Wedding Season

Prepared expressly for The Jewelers' Circular-Weekly by Otto Jonas

AN out-of-the-ordinary and especially attractive jewelers' window can be arranged by combining a number of every-day household articles so as to represent a room in the home of a newly married couple, and this arrangement will permit a great variety of articles to be shown which are suitable for wedding gifts.

The window must be transformed so that it will represent a room. To do this, purchase sufficient cheap wallpaper to drape

beneath the "logs" are very effective. The bulbs used should be red. If you cannot get the colored bulbs from your electric light company, dye the ordinary ones the proper hue. For arrangement of these lights see Figs. 2 and 3. Be careful that your extra wiring is done properly.

The "pictures" hanging on the walls may be advertising posters or attractive signs.

The arrangement of the "room" will permit of the advantageous display of a large

card can be placed in the forepart of display. Suitable signs are the follow

Presents Purchased Here  
Are Always Satisfactory.

Wedding Presents  
Are  
Our Specialty.

Surely We Can Please Everyone  
With  
Our Assortment of Wedding Gifts

The window above described is so different from the arrangements usually adopted by jewelers that those who make use of the idea will be gratified by the result. Care must be used to have the display arranged in proportions proper for the size of your window, and, above all, to do neat job.

## Fighting Mail Order Competition in Savannah, Ga.

SAVANNAH, Ga., Sept. 23, 1914  
Editor THE JEWELERS' CIRCULAR WEEKLY  
As I always read with interest your articles on how to meet the competition of mail-order houses, I enclose a slip by one of the merchants of this city, which he encloses in all packages sent by him. If you think it worth while you will be glad to have you publish it.

A. H.

### TEN REASONS WHY YOU SHOULD TRADE WITH SAVANNAH MERCHANTS.

Because: You examine your purchase and assure of satisfaction before investing your money.

Because: Your home merchant is always ready and willing to make right any error or ineffective article purchased of him.

Because: When you are sick or for any reason it is necessary for you to ask for credit, you go to the local merchant. Could you ask it of a mail order house?

Because: If a merchant is willing to extend credit you should give him the benefit of cash trade.

Because: Your home merchant pays local taxes and exerts every effort to build and better the market, thus increasing both the value of city and country property.

Because: The mail order merchant does not lighten your tax or in any way help the value of your property.

Because: The mail order merchant does not contribute for the benefit of markets or real estate value.

Because: "If your town is good enough to patronize in it is good enough to spend your money in Governor Folk, of Missouri.

Because: The best citizens in your community patronize home industry. Why not be one of the best citizens?

Because: If you will give your home merchant an opportunity to compete, by bringing your business to him in quantities you buy out of town, he will demonstrate that, quality considered, he will give you money.

Fig. 4.

Fig. 1.

FRONT VIEW  
Fig. 2.

REAR VIEW  
Fig. 3.

back and sides of your window. This wallpaper will retain its position nicely if tacked on carefully at the top and bottom, with possibly an occasional extra tack placed where it has a tendency not to lie smooth. The wallpaper is practically all the material that needs to be bought. The other articles used can be brought from home, or rented at a nominal expense.

The mantelpiece is simply constructed, being merely a wide piece of board nailed to two uprights. (See Fig. 1) The "tiling" underneath the mantel is a bit of glazed wallpaper in a square design, or can be made at home by using a large sheet of paper and ruling it carefully so as to represent the size of tile wanted.

The "logs" consist of a few sticks of wood. A few electric lights arranged in the fireplace, one on either side, and one

variety of goods suitable for wedding gifts—and especially those larger pieces that one finds it hard to show nicely in the usual run of windows. These "presents" should all be labeled with descriptive price cards, giving the name of the article in neat, plain lettering. The price should be distinct, but not too glaringly large. Some of the articles suggested for use in this display are clocks of every variety, vases, bric-à-brac, silver ornaments, cut glass, silverware, fancy carving sets, trays, placques, toilet sets, brushes and combs, bracelets, coffee and tea sets, fine umbrellas and canes, bombon dishes, salt and pepper cellars, etc. In a word, let there be a general variety. The effect of the complete show is shown roughly in Fig. 4.

To get the best results from this type of window, don't crowd. If desired, a neat

## Storekeeping Department.

### Keep Awake.

It is strange how quickly people can make themselves believe that they can accomplish only a limited amount of work, and therefore lose all ambition; and equally wonderful to what extent some one with light and optimistic spirits can live up and endow with fresh courage an entire establishment.

Many a promising business has been dragged down by lack of proper kind of interest on the part of those who had most stake, and should have built it up.

Too often parties open new establishments with the enthusiastic idea that they will soon acquire a fortune, and when they are disappointed because they find results are not quickly as gratifying as they hoped for, they begin to lose interest and, what is worse, to show visible signs of being discouraged.

Clerks are apt to copy the manner of the boss, and customers are soon aware of a certain shiftlessness in service which begets a don't-care-I-can't-succeed-anyhow spirit. If merchants could only be made to realize how much it means to them they could certainly cultivate to its fullest limit a bustling, cheery mannerism and choke down any appearance of listlessness.

A bright store that is kept neat and up to date and in which clerks and proprietor are with each other in keeping customers interested is bound to win success in the long run. There are certain little ways of arranging the stock and always touching up the store; that is, keeping up appearances—a general way that go far toward attracting trade and holding it.

Keep people interested—a few little lessons in business can be copied from very humble sources. Notice the street fakir. No matter what article he is selling, he attracts the attention of the public by exciting their curiosity; holds his audience by keeping up a constant stream of talk and to further stimulate his trade he has usually several "boosters" who, at the propitious moment, begin "buying" the goods and the interested crowd follows the example of these "leaders." The fakir thus thrives on knowing human nature and catering to it. The storekeeper must realize that each buyer he can bring in his shop will attract other customers. The mere fact of people walking in and out of a place of business draws attention to it, and satisfied customers usually are quick to tell their friends about places they are pleased to patronize. A very successful New York retailer relates how a customer walked into his place after he had been established more than a year, and after making a purchase, said: "My office is directly opposite your store. When you started I thought you wouldn't hold out, and as I see you are still here, I will now give you my trade." The dealer thanked him for his patronage and said: "It's lucky for me that everybody did not wait as long as you before coming in to buy."

The new customer answered: "That's all very true, but you will find that the customers you make from now on will be more

valuable to you than the first comers, who were either transients or of that element who are always drifting into new places. You have established yourself now. If I am satisfied with your goods I will recommend your place to my friends." And the "crank" (if one may call him so) became and still is a valuable customer, and the remarks he made when getting acquainted proved true.

This is an extreme case, but many a man

### An Expression of Art in This Magnificent Display.

A WINDOW display which attracted an unusual amount of attention was shown recently in the gem window in the store of Ryrie Bros., Ltd., Toronto, Ont., during the Canadian National Exhibition.

From an artistic point of view the display was very remarkable. It consisted of three stocks of corn, each bearing three

A SYMBOL OF HARVEST DAYS—A \$250,000 DISPLAY BY RYRIE BROS., TORONTO, CAN.

starting a new enterprise would be all right if he could but tide over that period of depression which usually comes to all beginners when the novelty begins to wear off. One cannot emphasize too much the necessity of keeping up appearances and courage when things don't come the way we want them to. O. J.

Burglars, about a week ago, broke into the jewelry store of George Miller, Mahanoy City, Pa., and escaped with finger rings valued at about \$100. The display window was broken by the thieves.

cobs of corn made entirely of diamonds. The cobs contained more than 2,700 diamonds, which ranged in size from a small stone valued at \$3 to large scintillating gems valued in the thousands.

There were also shown four small jewel boxes with various sizes of rubies, emeralds, pearls and sapphires, numbering in all about 2,000. The total value of the display was \$250,000.

Endicott & Dietz, Myrtle Point, Ore., have dissolved partnership. R. P. Endicott will continue the business alone.

# RETAIL JEWELERS ADVERTISING

DAILY PAPER

## Increasing Industrial Activity Stimulates Autumnal Jewelry Advertising

Written expressly for The Jewelers' Circular-Weekly by R. F. N.

INDUSTRIAL conditions, according to authoritative reports, are again assuming a normal state to the satisfaction of the entire country, and those advertisers who did not cease advertising during the

Both experience and good judgment force the conclusion that any surcease or relaxation of advertising during a time of financial stress is detrimental to a merchant's business interests. A concern which adver-

results may be apparent at certain times even for an extended time, the advertiser which is continuous keeps up the public confidence in the advertiser and, not infrequently, sustains at the same time the bright hopes of the reader.

Retail advertising, which is abruptly discontinued for an appreciable length of time operates to bring about one of two things. First, the concern may be entirely forgotten and undoubtedly will be, by a large percentage of persons. Secondly, many of those who formerly read the advertisement may be led to conclude that the concern no longer financially able to continue to advertise. It will readily be recognized that both of these impressions hamper the success and impair the progress of a business.

With the unmistakable signs of renewed prosperity now in sight the present year's Fall advertising is remarkably heavy.

**New Leather Bags For Early Autumn**

We've just opened a new line of LEATHER BAGS, and a display of the same may be seen in our north window.

The new Fall Styles are represented in this collection and are worth seeing.

**NEW STONES**

THE decree of Dame Fashion that Jewelry and Costumes must match, gave jewelers an opportunity to bring a number of new stones forward, which though not new, are almost unknown. Among these so-called new stones are the Amazonite, the Chrysoprase, the Jade, the Japanese Coral and the Lapis Lazuli.

The Amazonite is very much like a Turquoise, but is a darker green. The Chrysoprase is a very clear, pale green, while the Jade is a dark rich green. Japanese Coral is a dark pink with streaks thru the stone while the Lapis Lazuli ranges from a deep blue to a pale green.

These stones are very odd, and consequently very popular. We have a number of them, and will be pleased to show them at any time.

WE HAVE THEM SET IN BROOCHES, SCARF PINS, BELT BUCKLES, LAVALIERE NECK CHAINS, AND RINGS, OR UNMOUNTED, AS YOU PREFER.

526 Broadway **A. J. REINHARDT, Jeweler, Lincoln, Ill**

WEDDING AND OTHER ADVERTISEMENTS USED RECENTLY BY RETAIL JEWELERS.

interim of inactivity, or so-called "financial panic" are reaping the harvest. What is probably the most significant indication of returning prosperity is, as reported in last week's issue of THE CIRCULAR-WEEKLY, the fact that the largest diamond factories in New York are now being operated on a full time schedule.

tises only in periods of unusual prosperity does not make as favorable an impression upon the buying power which it seeks to interest as does the concern which advertises perennially.

The advertising should be continuous in order that the impression should be permanent and profound. Although no direct

kinds of stock suitable as wedding gifts have been exploited well during the month of September and will also be advertised more vigorously during October and November.

A very attractive announcement is that of Brock & Feagans, Los Angeles, Cal. "Wedding or Family Gifts of Permanent Value"

**Retail Advertising Department.**

uses a striking catch phrase. The text under the catch phrase reads as follows: "What is the mark on your silver? Is it standard English sterling quality of desirable weight and unquestionable design and workmanship? This store is over particular on all matters pertaining to family silver, otherwise little credit would come to us in years to follow. Four excellent engravers are at the service of our patrons. Fine pressed monogram or initial engraving."

John C. Pierik & Co., Springfield, Ill., in a space of six inches, single column, lay special emphasis on the diamond department. The watch and optical departments should be mentioned under the caption of "diamonds." Special captions should have been devoted to these departments.

S. Baird, Watertown, N. Y., in his advertisement of four and three-quarter pages, double column, makes a convincing appeal to purchasers of wedding presents.

Trizer Bros., San Antonio, Tex., use a very well written advertisement of silver ware in four inches, single column. There is an element of human interest in a little announcement, which makes it very readable and interesting.

The Ashby Jewelry Co., Colorado Springs, Colo., in an ad. of three and three-quarter inches, single column, features solid card cases in a dignified manner.

Robinson & Canham, jewelers and opticians, Springfield, Ill., in the early part of the month printed a list of miscellaneous jewelry for men and women in a space of one and one quarter inches, single column. "Our show windows," printed at the top of the list, is a good request to make the reader.

Jeffert Bros., 272 Washington St., Portland, Ore., made a specialty of scarf pins, brooches and brooches for one week and advertised the fact in a space of five inches, single column. The prices quoted give the impression of reliability and moderate prices.

The popularity of several odd stones, such as chrysoptase, jade, amazonite, lapis lazuli, etc., gave A. J. Reinhardt, of Lincoln, Neb., an opportunity to do some judicious advertising. His present advertisement, carrying the caption "New Stones," has been reduced from a space of five by nine inches. Exception might be taken to the grammar and spelling used in the advertisement of the Faison Jewelry Co., Baltimore, Md., in its style of optical advertising is hardly commendable. It would have more commercial value if its tone were more scientific. Instead of using the negative catch phrase "There'll be no worry, no pain," which, notwithstanding the negatives, suggests worry and pain, it would have been more advisable to use a positive catch phrase referring to the crystallized lenses advertised. Examples are: "Eyeglasses of clarity and beauty," or, "Scientific eyeglassing," or, at the top of the announcement "Small Livermore type, might be set the sentence, "A thing of beauty is a joy forever," and under this, "Eyeglasses that look well and fit well." This, of course, should be followed on with appropriate text.

Exhibited, a couple of weeks ago, in the store of Albert Pfeifer & Bro., Little Rock, Ark., were several leather bags. The amount of attention which the display attracted and the number of sales made were considerably enhanced by a series of small advertisements, about five inches, single column, which were run simultaneously with the display in the local papers.

In the ad. of Henry Castellberg, Baltimore, Md., diamond rings are advertised in a space of seven inches, single column.

**What Some Jewelers Say.**

**REPEATING Watch**—Is quite a comfort to one after he has used it a while. If you have never seen one we'll be very glad to "show you" merely as a matter of education. They are quite interesting as well as useful. At any time you press the spring, a tiny little silver-toned gong strikes the hour and a second gong strikes the five-minute period. Others of the finer grade strike the hour, the quarter and the minute, so that one can tell time within a minute in the dark. We have these watches at unusually low prices, ranging from \$50 up to \$300, and will be pleased to have you call on us. Jas. Allan & Co., Charleston, S. C.

**Don'ts**—Don't buy glasses over a counter and select them for yourself. You may select a pair that aids your vision for the time being, yet may prove most injurious. Don't buy cheap lenses; such lenses are imperfectly ground. Don't read in bed or on a moving train. Don't read without your glasses. Don't continue wearing your old glasses when you feel they are not just right. It's so easy to have them right. Thos. Porte, Grand Forks, N. Dak.

**Silver of Proven Quality**—Whatever the occasion, choose silver on the reputation of its quality. If for a gift, your taste and judgment will be commended. If for your own use, lasting satisfaction will be assured. Our line of silver: Tea sets, coffee sets, dessert sets, cake trays, bread trays, baking dishes, fruit bowls, etc., cannot be equaled. E. L. Askren, Manhattan, Kans.

**Character in Jewelry**—We have just received our first large shipment of fine gold-filled jewelry. Fobs, bracelets, necklaces, brooches, scarf pins, links, Waist sets, etc., in designs of a character far above the ordinary plated jewelry lines. See our show window. Frank LeBron, Keokuk, Ia.

**Diamond Values**—The size of a diamond does not by any means determine its value. The cutting and color are the two essential requirements necessary to constitute a first-class stone. Don't be deceived by parties advertising cheap prices on diamonds (or anything else in jewelry). Go to a store that is reliable and carries the stock. We make a specialty of diamonds and precious gems. See our line before you purchase. Our watch repairing department is flourishing. We repair all kinds of complicated and railroad watches. Mr. William Sommer has entire charge of our Optical Department—all cases under his personal supervision. John C. Pierik & Co., Springfield, Ill.

**Everything for the Baby**—The indispensable buttons and pins, spoons, silver cups, corals, rings, rattles; in gold, silver and ivory. Hess & Slager, Jacksonville, Fla.

**Clever Advertising of a Newly Incorporated Retail Jewelry Concern.**

THE recent incorporation of the Mulford Jewelry Co., 6 S. Main St., Memphis, Tenn., furnished the occasion for some rather original retail jewelry advertising on the part of the concern. The firm, which was formerly conducted by John N. Mulford, shows, by means of the advertisement illustrated herewith, which has been reduced from a space of 16 inches, triple column, the personal element behind the entity

# WORKSHOP NOTES AND QUERIES

Answers are also solicited from our readers to the questions published on this page. Attention paid to communications unless accompanied by full name and address of the writer.

**QUESTION No. 2122.—Metal Base for Electroplating.**—We have a number of plaster of Paris figures and statues that we desire to cover with a copper deposit by electroplating. How must we treat the objects to make them conduct the electric current so that the deposit will take?

T. C. & A.

**ANSWER:**—Plaster of Paris objects may be readily electroplated after the surface has been made metallic for the electric current. It is best to immerse the plaster in linseed oil so that all the air spaces may be filled; then let dry. Now paint the surface over with plumbago, which will give sufficient conductivity for depositing copper in an acid copper solution. Another method employed is to take the objects, after they have been treated with the linseed oil and dried, and paint them over with a viscous varnish. Then dust them over evenly with bronze copper powder and let remain for a day to give the varnish an opportunity to become dry. This will also give a metallic surface that will be suitable for a copper deposit. All bronze powder contains oil that should be removed before it is used, and this is best done by heating until the oil burns out, or a little alcohol is added and burned off with a flame. Be careful not to heat so much as to melt the powder into solids.

The copper deposit is put on in the regular copper acid bath, but the solution must be used cold. Warming up would interfere with the varnish or oil. If the plaster has been carefully covered with the copper bronze powder, then a substantial coating of copper can be deposited on the surface. The acid copper bath is made from the following proportions: Com. copper sulphate, one pound; com. sulphuric acid, four ounces; water, one gallon. Dissolve the copper in a little boiling water, then add the balance of the water. A soft piece of sheet copper may be used as an anode.

**QUESTION No. 2123.—Silvering Mirrors with Copper.**—Will you be good enough to let us know whether anybody now uses copper with which to "silver" mirrors. I read a note on the subject in your Workshop Notes Department a short time ago.

V. & L.

**ANSWER:**—According to reports copper was used very little up to a few months ago as a silvering for mirrors. According to an exchange, in some mirrors exhibited at the Royal Society by Dr. F. D. Chattaway, the copper has been deposited upon the glass by reducing cupric oxide by an aqueous solution of phenyl hydrazine in the presence of potassium hydroxide, which accelerates the

action in a remarkable degree. The mirrors are equal in brilliancy and uniformity of surface to silver mirrors and, on account of the color of the copper, are much more beautiful.

## Silver Finishing and Polishing.

(By ANDREW HELLTHALER, in *The Metal Industry*.)

THE methods of silver finishing are as varied as the colors of the rainbow, almost every factory having a system different from all the others, and the results are almost as varied as the methods. This is due entirely to the endeavor of various manufacturers to produce articles like those turned out by some competitor, at a lower figure, and to the detriment, I believe, of first-class finishing.

The first thing to be considered in silver finishing is the preparation of the article, already shaped by spinning, stamping or the hammer, for the application of whatever mounts may be wanted upon it, such as feet, handles, borders, etc. This preparation consists of sand bobbing the article, removing all fire that may be in the silver, at least  $1\frac{1}{2}$  inches further out than the mounts extend, so that fine stoning around the mounting will not be necessary, thus saving on ordinary jobs about six hours. This only applies to the past methods of fine stoning all around borders and mountings, an operation oftentimes consuming more time than all the other operations put together. The new method does not in any way prevent the finisher producing a cleaner and neater piece of work, while it at the same time lessens the cost of the work and does not require so much skill.

After this, the first operation, has been gone through and the article is complete in its make-up, the actual finishing begins. While many finishers endeavor to bob an article all over, no matter what shape it may be, there is a hard and fast rule to be followed in bobbing shapes, as follows: Flat bottoms, concave bottoms, and all perfectly flat surfaces must be pumiced and fine stoned. Convex or slightly raised surfaces must be pumiced and can then be bobbed, thus saving fine stoning. All other shapes, surfaces, etc., can be bobbed, eliminating stoning in its entirety.

The bobbing of a piece of work is by far the most difficult branch of silver finishing, requiring the most skill and careful judgment, inasmuch as ridges and hollows can be cut into the finest made piece of work by the finisher if he does not handle his bobbings correctly. For first-class

bobbing walrus hide must be used. Some firms use felt, owing to the difference between the price of felt and walrus hide. Walrus is the best by far since you get a first-class finish, while with the other you do not. Once a finisher has a set of walrus hide bobbings they last him for years, while felt lasts no time at all, wearing out rapidly and never giving satisfactory results. All walrus hide bobbings should be pounded soft with a hammer; the softer the better. This is a point a great many finishers do not know, consequently they prefer felt; but one thing is certain, all first-class finishers want the walrus hides.

Another mistake made by a great many firms to-day, as well as finishers, is the grade of pumice they use in bobbing, they having an idea that coarse grades, cutting quicker, give the best results. This is a very grave mistake, as the fine pumice gives such a clean surface that brushing is absolutely unnecessary, thus saving the cost of brushes as well as the time of the extra operation. Bobbing should never be done with a coarser grade of pumice than No. 0. A piece of work treated in this way only requires a small amount of brushing around the mountings and nowhere else. One small two-row brush is all that is necessary for a dozen bread trays, etc.

All brushing should be done with tripoli and oil. This having been accomplished the next operation is grease buffing, the easiest operation in finishing. This is done with a cloth buff and tripoli composition. With this all bobbing and brush marks are buffed out, so that a clean color is brought up on the metal.

Bufs of all wool are by far the most preferable, but no work on silver should be done with the buff worn down to the stitching. When a buff becomes worn down that far the stitching should be opened to render the buff soft. With silver the operation is directly the opposite of all the other metals. In handling brass, copper, etc., the harder the buff the better the result, and it is to this cause alone that the brass and copper finisher owes much of his poor work when he finds employment in a silver shop.

The effect of using a hard buff on silver is the working of a cloud in the metal through the friction and heat. This cloud is very hard to remove and it consumes too much time. This is the only thing to be considered in grease buffing.

Polishing, the next operation, requires very little explanation. The same rules apply as in grease buffing, except that the buffs should be made of cotton flannel, and rouge should be applied instead of tripoli composition, the rouge being first dipped in kerosene oil each time before it is applied to the buff. This permits the easy washing of the article, as the oil prevents the rouge from sticking around mounts, etc.

Oxidized borders should be oxidized before polishing. All work should be dipped in "fire acid" before any finishing is started in order to remove fire from the job. This acid consists of one-third nitric acid to two-thirds water and is used hot. The best way to heat it is to place a sheet iron box filled with sand upon a gas stove, and on this put the stone jar containing the acid. The acid should be very hot, but not boiling.

## Ceramic Triumphs of Early French Potters.

By J. A. R., in the *Canadian Pottery and Glass Gazette*.

(Continued from issue of Aug. 19.)

THE present, and concluding, instalment of our short studies in early French porcelain, is devoted entirely to the factories located in Paris and its immediate neighborhood.

**A BASSE COURVILLE.**—Locre de Roissy founded this factory in 1771 at the corner of the Rue Fontaine-au-Roy and the Rue de la Courtille, in that part of Paris called la Courtille, Faubourg du Temple. About three years after the foundation he was employed as director, Russinger, who is generally supposed to have been the proprietor of that name who worked in the factory at Höchst, 1759-1766. Locre and Russinger continued working together till 1785, when the former retired, owing to financial difficulties in connection with the factory buildings, which were purchased by Gaudron. Russinger continued the manufacture of porcelain, and in 1800 took Luyat into partnership. The factory was carried on under various owners till 1841, when it ceased. The productions after the middle of the 18th century are characteristic of the artistic decadence of the period, and have very little interest. During the latter period of its existence, namely, up to the date of the retirement of Locre, this factory was one of the most important in France, and was one of the strongest competitors against the monopoly of Sèvres. Although the permission to carry on the production of porcelain was only granted under the usual restrictions, these conditions were practically ignored, and everything which was made at Sèvres was also produced in Locre's factory; even the biscuit figures were manufactured successfully in large quantities, though in many cases they are nothing but absolute copies of the original. The characteristics of the porcelain made in this factory are general excellence in form, coloring, glazing and gilding.

**RUE POPINCOURT.**—This factory was founded by Jean Nepomucene-Herman Nast, who was born in 1754 at Radersburg in Styria. Nast, who has scarcely received the recognition due him as a craftsman, arrived in Paris as a young man to seek his fortune. After trying his hand as a saddler he took up the art of porcelain making in the Vincennes factory in 1780. Two years later we find him setting up for himself in the Rue Popincourt, where he seems to have executed all the principal

part of the work with his own hands. He soon became so successful that he received numerous offers of partnership and patronage from other ceramists and exalted personages, all of which were declined. In 1784 he removed to larger quarters in the Rue des Armandiers-Popincourt. He devoted much attention to sculpture in biscuit porcelain, and also made many ornamental vases in the style of Wedgwood's blue jasper ware with decoration in white relief. He died in Paris in 1817, leaving two sons, who carried on the factory very successfully till 1835, when they sold it to the city of Paris.

**RUE THIROUX.**—The date when this factory was founded is uncertain, but there is proof that it was working in 1775, and there is on record the registration of the trade mark by the proprietor, Lebeuf, on Sept. 9, 1776. Notwithstanding the fact that Lebeuf's factory was under the special protection of Queen Marie Antoinette, he was unable to escape the consequences of having infringed the prerogatives of the royal factory at Sèvres, for in 1779 his premises in the Rue Thiroux were entered by the police and his goods seized. He does not, however, appear to have allowed himself to be discouraged from continuing to break the ordinances of Sèvres and to manufacture every description of porcelain, but he, doubtless, trusted to a large extent in the Queen's influence for protection against the infliction of further penalties. Lebeuf continued to carry on the factory after the outbreak of the revolution, until he sold it in 1797 to Charles-Barthelemy Guy, who took Housel into partnership. The factory changed hands at long intervals, and was working in 1869, when it came into the hands of Leveille. The productions of this factory, which are usually known as *Porcelaine à la Reine*, were, both as regards form and decoration, modelled after the Sèvres. Although lacking originality, the quality is good in material as well as in execution. Corn-flowers, the favorite blossom of Marie Antoinette, were very much used as subjects of decoration; gilt designs on plain white ground, are also often met with. This factory must have occupied an important position during the first twenty years of its existence, as the productions of that period are still very numerous, and are even to be found to-day in most of the principal dealers' shops in England and on the Continent.

**RUE DE REUILLY.**—This was a small factory established by Jean-Joseph Lussia, who registered his factory mark on October 26, 1774. He appears, according to the official records, to have had a somewhat checkered career. A native of Strasbourg, he went to Paris in 1765, at the age of 35, and, although of low origin, he was always well dressed and lived in considerable style. He picked up his knowledge of porcelain making from Hannong, whose secrets he managed to obtain, and improved himself by journeys to Sèvres, where he learned what he could until he was imprisoned. Notwithstanding his doubtful reputation, he appears to have successfully conducted his factory for a considerable period, for it is not till 1798 that we lose trace of it. The productions, although of no particular interest, were of good quality, very hard and well gilt. They were usually decorated with over-glaze colors, a yellow ground being characteristic.

**RUE DE BONDY.**—This factory, which was one of the most important in France, of the period, was founded by Dihl in 1780 in association with Guerhard, in the Rue de Bondy in Paris. From the very beginning it had the advantage of the protection of Louis de Bourbon, Duc d'Angouleme. Dihl, who was one of the greatest ceramists of his day, brought his factory to a high state of efficiency, and the productions take rank with the best French porcelain of their time. It is probable that Dihl was, during the first few years, only the director, and that the factory was financed by Guerhard, with the assistance of the Duc de Angouleme, for in the mark of the factory there is nothing to represent Dihl's name until after 1817, when he was nominally sole proprietor, although Guerhard's widow was still financially interested.

**CLIGNANCOURT.**—The factory at this place was founded by one Deruelle, who registered his mark on Jan. 24, 1775. Being granted the protection of the King's brother, Deruelle paid him the compliment of adopting the initial of his name, Louis-Stanislas-Xavier—L. S. X. Deruelle appears to have remained head of the factory till about 1790, when he gave it up to his son-in-law, Moitte, of whom nothing is recorded after 1798. The factory of Clignancourt, which was situated in the outskirts of Paris, held a high position and was regarded by Sèvres as a serious competitor. Its productions were characterized by the great technical excellence of the paste and artistic skill in decoration. The exalted patronage extended to Deruelle was not always successful in protecting him from the consequences of his persistent infringements of the privileges granted to

## Mr. Jeweler:

Do you know that hundreds of your competitors in all parts of the country are making a specialty of Fans? Do you know that even a small line of Fans, properly displayed, will "dress up" the whole appearance of your stock? Of course, the Fans themselves must be suitable for jewelers, and must be bought from one who thoroughly understands the requirements of your trade. There is but one such house in America—

vres, for we find records of prosecutions and seizures of decorated porcelain. The factory failed to preserve the high quality which had characterized its productions during the directorship of Dernelle, and the later years are distinguished by the diocrity which is always a characteristic work which is unaccompanied by enthusiasm.

**BOISSETTE.**—The factory which was situated in the village of Boissette was founded by Jacques Vermonet and his son Jean in 1818, and appears to have been under the patronage of the Duc d'Orleans. It lasted only a very short time. The productions were good in quality and style, but present no characteristics to distinguish them from any of the other factories in the neighborhood of Paris of the same period.

[THE END.]

### Points in Selling Art Pottery and Glass.

**MERCHANDISE** must be sold with a little legerdemain. Just as the conqueror forces upon a spectator precisely the word he wants him to hold, so the skilful merchant and salesman forces goods by playing *one*. What sells goods is forcing the card and making decisions for the customers. Putting goods in the window is them. Every business man knows it. It isn't the fact that the stuff is in the sight that sells it, however, but because the window, properly dressed, makes decisions for the customer. Instead of coming in to look at some vases, he comes and says he wants *that one*, and nothing is likely to change his decision.

The principle of forcing the card applies all more broadly. Inside the store, arrange items specifically wherever possible. A woman comes in for a chocolate jug or a silver tray. If scattered all over the store it is hard for her to decide which one she prefers, and takes up twice the necessary time of the salesman. Grouped together on a table or a shelved recessed fixture, she sees all at a glance and decides quickly. Art pottery should be segregated as to place in the store and window displays, only the finish of a particular line and but a few pieces. The window drapery should harmonize with the color of the pottery or form a pleasing contrast. Cut glass should be exhibited alone in the window display, though a piece or two of silver is permissible.—*Canadian Pottery and Glass Gazette.*

### International Pottery Exhibition at Faenza.

THE Secretary of the London Chamber of Commerce has received a communication from the British Chamber of Commerce for Italy, stating that the International Pottery Exhibition will be held at Faenza, Italy, in August and September.

In order that the expenses of British exhibitors may be as small as possible, the Italian State Railways have granted a reduction of 60 per cent. in rates of freight over their lines, and the Italian Minister of Finance has also granted great facilities in regard to Customs formalities.

The H. W. Alexander Co., Sac City, Ia., has dissolved, N. H. Alexander continuing the business.

### Field in Columbia for the Development of American Trade in Glassware.

THE following information concerning the trade in glass and glassware in Columbia, and the opportunity which exists in that Republic for American manufactures, is furnished by Consul Isaac A. Manning, of Cartagena:

Recently a local firm imported a considerable consignment of glassware from the United States, ordered from the catalogue of a well-known factory. The goods proved very satisfactory, the order apparently having been filled carefully and from good stock. The ware was packed in hogsheads, very carefully, and arrived with little breakage. This shipment has given the importing firm good satisfaction and will no doubt lead to other orders.

While packing in hogsheads is all right for Cartagena and other cities on the coast, for the interior cities care must be taken in packing in barrels or crates not to exceed 125 pounds in weight per package for muleback transportation.

The opportunity for the sale of American glassware in Columbia is very good and merits the attention of manufacturers. In this, as in the case of too many other manufactures, the United States do not hold the position to which they are entitled. For example, the imports of glassware into Columbia in 1907 amounted to 9,141 kilos (1 kilo = 2.2 pounds), of which only 319 kilos were from the United States, while 5,430 kilos were from Germany and 3,244 kilos from the United Kingdom. Of glass tumblers, 29,543 kilos were imported, of which 19,976 kilos were from Germany, 5,079 from the United States, and 4,286 kilos from France. Of mirrors imported at Cartagena, 3,758 kilos were from Germany, and only 1,896 kilos from the United States.

American manufacturers of glass and glassware are not supplying a very great share of Colombian imports. It would seem as if they are completely overlooking an excellent field. It is possible they are doing what too many other manufacturers have done, and are still doing, sending out catalogues only, and wondering why orders do not reach them. It seems useless to continually dwell on the value of the "drummer" in the extension of trade, but if American glassmakers and other manufacturers making lines consumed here will begin sending their travelers to this and other Spanish-American countries the result will be a surprise to them. Occasionally a firm will place an order from a catalogue, but, with a houseful of catalogues on hand, one traveler, with a knowledge of the language of the country, a good line of samples, and a little push, will receive more attention and accomplish more in one day than catalogues will in a whole year.

Frank L. Jones has purchased the business of O. D. Johnson, Wenatchee, Wash. Mr. Jones had been with Mr. Johnson for the past three years, and had done most of the jewelry work in that time. Mr. Johnson has been in business at Wenatchee for about 13 years, and retires on account of ill-health.

DAINTY PLATES OF ENGLISH CHINA

**D**AINTY and sea-sonable service plates of English china shown at the salesrooms of W. S. Pitcairn, 44 Murray St., New York, include one in hand-painted effect showing a cluster of grapes and apples interwoven with roses and daisies. The design is at the center of the plate, and is most striking. The fruit and flowers contrast with the green leaves and the beautiful white of the china in pleasing style. The border is a gold work design. Another plate seen at the same salesrooms shows a single rose at the center offset by a background of leaves. Circling the plate are roses joined by daintily draped rosebuds. An offering of much interest is a large jardiniere decorated in underglaze hand-painted flower effect. The decoration is excellent and the whole effect most pleasing. At the top and bottom of the vase are bands of gold work.

SEASONABLE CHINA NOVELTIES.

**O**FFERINGS for the present season's trade at the salesrooms of Julius Palme, 35 Barclay St., New York, include a line of dinner ware which is meeting with popular favor. The decorative scheme is a heavy band effect shown in different colors, popular among which are green and brown. The display of game and fish plates includes a number of pleasing designs. The decorations are shown in natural colors. A dinner set with a dainty rose pattern is also shown. Plates with acid gold borders are exhibited in a number of sizes. These plates have bands of varying widths. Some of the plates have bands at the edge, while others carry this decoration at both the edge and shoulder of the plate. Dainty afternoon tea sets are also included in the line, and are shown in a number of patterns.

A HANDSOME CLOCK.

**A**N attractive mantel clock on exhibition at the salesrooms of Tiffany & Co., Fifth Ave., New York, has been receiving favorable comment from passersby recently. The clock rests on an oblong white marble base, which supports a smaller pedestal. It is enclosed in a round bronze case embellished with garlands in gold bronze and surmounted by a quiver filled with arrows. At one side of the clock is the figure of a child, and by his side an openwork cage. "L'Enfant a la Cage" is the title given the piece. The bronze figure is the work of Jean Baptiste Sigalle, and is an exact reproduction of the original marble one in the National Museum of the Louvre.

**SHELDON'S PATENT HAIRSPRING COLLET REMOVER**

**CROWN PLIER No. 331**

For clamping the collar of crowns on dust-proof cases while removing same from pendant. This is usually found a difficult task but easily done with the help of this plier.

Nickel plated.....each, \$ .60

No need of any more distorted hairsprings or bent balances. Every watchmaker knows how troublesome it is to remove the same without either distorting the hairspring or bending the balance; with aid of this tool the difficulty is overcome. The tool is provided with a pair of spring fingers, curved at the ends and ground very thin and sharp. By tilting the balance the jaws may be slid under the hairspring and by pressing the jaws together it will readily loosen the collet and then by turning the central screw, which has a hole in the end to receive the staff pivot, you can force the collet from the staff without injury to balance or hairspring. The adjustable screw nut provided to avoid wear or injury to the jaws. A glance at the illustration will demonstrate the utility of this tool. Finely nickel plated.

**Price, each, \$1.25**

**ECHARCO WATCH GLASS CABINET No. 15 (Patented)**

Top View, Showing Skeleton Frame of Drawer. Accumulation of dust and chips is impossible.

The Most Modern Watch Glass Cases are the Echarco, Nos. 15 and 20.

These Cabinets have many new features not found in any other. Novelty and usefulness are the chief arguments in their favor.

**Construction and Material.**—The cases are made of oak, finely finished and of attractive appearance. The sides of Cabinet No. 15 are paneled. Partitions are of basswood and put together in the most perfect manner possible.

**Partitions** are skeleton, preventing accumulation of dust, chips, etc.

**The Bottoms** of Cabinet No. 15 are hollow, while Case No. 20 has a special drawer to receive chips, dust, etc.

**Arrangement for Glasses.**—Case No. 15 has nine drawers with a total of 1,547 spaces, and Case No. 20 with four drawers has 784 spaces, to hold glasses in upright position.

**Labeling of drawers**, as shown in cut, is on the pulls of the drawers and done in gold bronze black background.

**Dimensions and Weight of Case No. 15.**—Width, 24 inches; Height, 29½ inches; Depth, 12 inches; Weight, net, 45 lbs.; Weight, including packing case, 75 lbs.

**Dimensions and Weight of Case No. 20.**—Width, 26 inches; Height, 13¾ inches; Depth, 11¾ inches; Weight, net, 30 lbs.; Weight, including packing case, 50 lbs.

The construction of drawers, the arrangement of partitions to economize space and weight, and novel method of showing contents on drawer-pulls are all prominent characteristics and extremely thought of.

**Price, No. 20, Each, \$7.75**

**" No. 15, " 16.00**

**ECHARCO WATCH GLASS CABINET No. 20 (Patented)**

**SET OF 12 BEADING TOOLS, WITH INTER-CHANGEABLE HANDLES No. 50**

The rosewood handles have brass bushing so that the beading tools may be used by hand or hammer.

**Per Set, \$2.00**

**SET OF 6 CARBORUNDUM DISKS No. 100**

The variety of shapes should make this a desirable article on the bench.

**Per Set, 90c.**

# Leadership in Business

like leadership in anything else, is simply the working out of nature's law of the survival of the fittest. Show me a business that is successful and I will show you, in ninety-nine cases out of a hundred, one that deserves to be. The law of the universe constantly seeks and demands the best and casts out the useless and unfit.

If you would be successful you cannot afford to give anything less than the best that is in you, and that man is worse than a fool who undertakes to succeed by trickery, chicanery or dishonesty, for when he attempts to cheat his neighbor, or deliver less than he sells, he injures himself beyond repair. His deceit will find him out and surely tear down and destroy.

It has been our constant aim in business to deliver more than we sold. Our sun is still shining.

## Read Our Customers' Letters

ALBANY, N. Y., Jan. 17, 1908.  
THE ARNSTINE BROS. COMPANY,  
Cleveland, Ohio.

Gentlemen:—Answering your favor of recent date, regarding your methods, treatment and results, I can only repeat that there can be no doubt about the trade-bringing powers of the Catalog and other advertising matter, and since becoming a customer of your house I have found your methods and treatment courteous, fair and helpful.

Respectfully,  
E. H. SOUDER.

This firm used The Arnstine Bros. Company Catalogs in 1905, 1906, 1907, and again placed an order for 1908.

CLEARFIELD, PA., Jan. 6, 1908.

THE ARNSTINE BROS. COMPANY,  
Cleveland, Ohio.

Gentlemen:—In answer to your letter of Jan. 4th, your Catalogs, methods, advertisements and business principles are the very best. I can do nothing but praise them. Had the general financial business depression been delayed six months, we would have increased our business 25 per cent. As it is, I think the Catalog helped me to do as well as we did.

Yours very truly,

W. W. HOWE.

This firm used The Arnstine Bros. Company Catalogs in 1907, and again placed an order for 1908.

# Real Rose Hat Pins

**This will be the largest selling article this Fall and Winter—it is already.**

So remarkable are the sales of DELAMOTHE Real Rose Hat Pins that we do not expect dealers to believe same until they have actually tried them out. It does not seem possible that during JULY this product was sold by Retailers at the rate of two to twenty dozen daily—EVERY day. The retailers' profit is unusually large. Not only are they proved big sellers, but they are a great attraction for the stores that sell them. The largest Advertising Campaign in years is behind this product. Every possible Advertising and Selling Help will be furnished Dealers gratis. This product will be sold to the best dealers only, and retail prices will be strictly maintained.

DELAMOTHE Real Rose Hat Pins are made out of live roses, changed by a secret process into metal, then finished in attractive colorings and mounted on Hat Pins. This SECRET process is a recent discovery of Prof. L. G. Delamothe, a noted French Electro-Chemist, and is owned solely by the Delamothe Natural Art Decorating Co., Spokane, Washington, for which this Company is the Sole Distributor. It is the ONLY process by which an OPEN Rose can be perfectly metallized. This product is made in the finest manner possible, and its high quality will be maintained. The Roses used are grown in Oregon and Washington, famous the world over for their beauty and superiority—made where these Roses grow. No two Real Rose Hat Pins are alike. Finished in five colors to conform to the prevailing fashions in millinery. Six sizes, from the smallest rosebud to the full blown flower.

**Not sold through  
Jobbers.**

*Do not buy inferior imitations.  
Sold direct only.*

# Cigar Chests

EXCLUSIVELY FOR THE JEWELER

THERE IS ALWAYS A DEMAND for the finer products for the use of gentlemen. To this class belong the Cigar Chests described in these paragraphs — except that instead of calling them “*the finer*” we should call them “*the finest.*” They furnish an added luxury to smokers, and an attractive opportunity to the Trade.

A DISTINCTION — It is important to note at the outset that these goods are not to be confused with other chests which have long been on the market and which have obvious disadvantages. For example, the efficiency of the last named goods depends on keeping a proper and even humidity by means of a moist blotter or pad — an impossibility. The pad is generally too wet or not moist enough; or, what is most frequent of all, is forgotten altogether and left dry. The contrivance is too troublesome to care for and the smoker generally gives up the attempt.

These Cigar Chests are totally distinct in principle and construction, and accomplish their purpose perfectly. They are absolutely *air tight*. All that is necessary is to keep the cover closed and locked. The natural virtues of the contents are retained unaffected by external atmospheric conditions.

Capacity	Width	Outside Measurement	Length	Depth	Oak or Mahogany	Rosewood or Circassian Walnut	
50 Cigars	8	x	11½	x	5	\$8 50	\$13 00
100 “	9	x	12½	x	6¼	11 50	16 00
200 “	10	x	12½	x	9	22 00	26 00
300 “	12¼	x	15¼	x	10¼	28 00	30 50
500 “	12¼	x	21	x	10½	33 00	38 00
1000 “	14	x	25	x	13	38 00	48 00

(Subject to discount of 6/10—5/30)

Mirror Polished Copper, or Porcelain Lining, Inlaid Brass Trimmings. The woods used are the finest seasoned Oak, Mahogany, Rosewood and Circassian Walnut.

## R. BLACKINTON & CO.

Established 1861 TRADE  MARK SILVERSMITHS

New York Salesrooms  
15-17-19 Maiden Lane

Factory: NORTH ATTLEBORO, MASS

# A Timely Suggestion

**L**AST month the Whiting Company directed attention to two of their new patterns—the “MADAM JUMEL” in Flat Ware, and the “FLORENTINE” in Toilet Ware.

These patterns, both of which have already attained a notable degree of success, are indicative of the general scope and character of the Whiting Company's recent productions in sterling silver ware.

Those Jewelers, therefore, who wish to add to their stock of silver ware suitable for the Fall and Holiday Trade will find the entire line of Whiting goods marked by the same characteristics of graceful design, admirable workmanship, and moderate prices as distinguish the “Madam Jumel” and the “Florentine.”

TABLE SPOON

These Advertisements will appear during October and November in the leading magazines.

**W**HY WAIT for bargain day? Community Silver is a bargain every day, since you get more than triple plate, and, therefore, more than triple wear, at about the price of ordinary plated ware.

**Don't wait. Ask your dealer for Community Silver to-day, and furnish your table beautifully and economically.**

**More than triple plate  
More than triple wear**

**WE ANNOUNCE** the completion of our latest design in plated ware.

*The LOUIS XVI*

In exquisite grace and delicacy of line it harmonizes perfectly with the period which it represents—the later French Renaissance—while in rich simplicity it rivals the best examples of sterling silver.

Made only in a plate heavier than triple. Costs no more than ordinary plate.

On sale at your dealers.

**ONEIDA COMMUNITY, Ltd.**  
ONEIDA, N.Y.

Founded in 1848.

**¶** Upon request we will gladly send a booklet showing cuts and electros suitable for advertising Community Silver in your local newspaper.

A striking and extremely effective "C. S." advertisement, which will appear in December in the leading magazines.

AS A GIFT, Community Silver is unequalled. Its *unusually heavy* plate of pure silver gives *unusual* wearing quality; while its beautiful designs—comparable only with the best sterling—harmonize with the richest table settings. *At your dealer.*

Many beautiful designs  
at about the price of  
ordinary plated ware

Upon request we will gladly send a booklet showing cuts and electros suitable for advertising Community Silver in your local newspaper.

Simmons Chains are made in the most perfectly equipped gold-filled chain plant in the world, employing the most highly skilled chain makers that can be procured.

The gold-filled wire used in their manufacture is made by a patented process controlled solely by us and every inch of wire used is produced in the Simmons factory. Thus we know that our wire is absolutely and uniformly right in quality and accurately drawn.

Logically, the best workmen, having the highest grade basic stock to start with and the best equipped factory to work in are in a position to produce the very best gold-filled chains that can possibly be made.

That Simmons Chains *are* the best is everywhere recognized; that they are the best selling proposition in gold-filled goods that can be carried, is evidenced by the fact that they are sold by fully four out of every five retail jewelers in the country.

# The "Krementz-Bodkin Back" STUD and VEST BUTTON

Pat. Feb. 16, 1904

"Not One-Piece but One-Piece Construction."

The simplest and best mechanical Stud or Vest Button made.

KREMENTZ & CO. invite the following comparisons (or any others that you can think of):

## CONSTRUCTION.

The "KREMENTZ" Bodkin Stud and Vest Button

1. Is absolutely solderless
2. Is made of solid, hard spring metal throughout
3. Has no spring or tubing to bend or break

## QUALITY

The highest grade of mother-of-pearl, half pearls, whole pearls, diamonds, sapphires or whatever material is used.

## FINISH

The regular "KREMENTZ" finish which has helped very materially in the building up of our business.

## OPERATION

Very simple. Easily inserted or removed without fear of bending the post or marring the shirt or vest.

## PRICES

Lower than those of any other makers.

## DURABILITY

See our guarantee.

## GUARANTEE

If for any cause whatever, a "Krementz-Bodkin Back" Stud or Vest Button should be damaged either in the hands of the dealer or wearer, a new one will be given in exchange, without charge. "Krementz-Bodkin Back" Studs and Vest Buttons are made in large variety of patterns in 14-kt. gold and platinum, set with pearls and diamonds.

Artistic Hat Pins

14kt.

Only

EXPERIENCE counts in the making of Hat Pins, Specializing makes for perfection. Hat Pins are a Specialty here—and have been for years.

For many seasons the Hat Pins of this house have been acknowledged leaders. For richness, grace and variety the designs have challenged comparison. There has always been a generous response to their artistic appeal.

The present line is even larger and finer than the displays of former seasons. Their charm has compelling power. Their reasonable prices facilitate buying and selling.

# "New Process" GILLETTE Blades

## Have You Got Them in Stock?

"New Process" GILLETTE blades have been an instantaneous success.

They differ in price, quality, appearance and style of package from the previous kind, and the public is being notified of the change by full-page advertisements in all the leading magazines.

More than two million GILLETTE users will now accept only "New Process" GILLETTE blades. If you have them in stock before other dealers in your locality you will get the business, and at the new price your profit is a very liberal one.

"New Process" blades are manufactured by newly-invented machines and processes, making them superior in appearance, operation and endurance to any blades ever produced by anyone.

These machines are automatically regulated, and grind, hone and sharpen each blade individually with the utmost precision.

Every cutting edge is perfect, and possesses a degree of keenness not produced by any other process.

"New Process" blades are finished with a high polish that renders them easy to

clean. Since dust and moisture do not cling readily to a polished surface, these blades are practically immune from rust.

"New Process" blades are packed in a handsome nickel-plated box which seals itself hermetically every time it is closed. This shuts out all dampness and effectively protects the blades from rust in any climate, land or sea. When empty, the box forms an attractive waterproof match safe.

**The set now contains twelve blades.**

**The Retail Price is \$1.00 per set.**  
Twelve sets are packed in a carton.

To those who are not handling the GILLETTE, we suggest, "Get Busy." Get the sales resulting from our huge advertising campaign—the increased business and profits that the co-operation of our Sales Department will bring you.

YOUR customers are continually seeing GILLETTE advertisements and they want the razor. Eventually they buy it somewhere.

**WHY NOT OF YOU?**

Write us for catalog and liberal discounts to dealers.

### The Cullinan Diamond.

OUR consul at Amsterdam, Henry H. Morgan, furnishes the following information concerning the polishing of the Cullinan diamond in that city. Most of this information has already been published in THE CIRCULAR-WEEKLY and noted by the daily papers of this country. As the work of polishing progresses to completion great interest attaches to the Cullinan diamond, although several months will elapse before it will be completely finished. There has been a great deal of news connected with the polishing of the stone, but I have been able to obtain certain facts in connection therewith which may be of general interest.

The delicacy of the work undertaken by the polishers in the execution of this work cannot be realized. It was necessary in the first instance to cleave the stone in three pieces in order to remove two very bad spots therein. This cleaving is done by making an incision into the stone with a diamond-cutting saw at the point where it is to be cleaved and following the grain (all diamonds have a grain as wood has) to a depth of one-half to three-quarters of an inch. Before this cleaving operation was undertaken crystal models were made and saved, in order to ascertain, as far as could be known, just what would happen when the same process was applied to the real stone.

#### METHOD OF HANDLING.

After the incision was made the cleaver is inserted into the slit a specially constructed iron blade made of the finest steel, and then with a thick steel rod struck it a hard blow and cut the stone in twain exactly at the point where it was proposed should be cut. It was an exceedingly well-executed piece of work. It must not be overlooked that the cleaving of a diamond is not always done along the line it is intended, and it not infrequently happens that in cleaving a stone it flies into a great number of pieces.

The stone having been successfully split, the next and final operation is the polishing thereof, and this process is now being carried on.

To give an idea of the hardness of diamonds it may be interesting to state that the disk on which this diamond is being polished, which is made of cast iron and steel, revolves at a rate of 2,400 revolutions per minute. The diamond is pressed down on this disk, which is liberally supplied with a mixture of diamond dust and oil, by weights of 15 to 25 pounds, and the disk will constantly turn from 7 A. M. to 9 P. M., including Sundays, for 10 to 11 months before the polishing operation will be completed.

It has not yet been positively decided in what shape the stone will be finished, but

the general impression is that it will be pear-shaped. It will be, when polished, many times larger than the Excelsior, which was, up to the discovery of the Cullinan, the largest diamond in the world. The Cullinan weighed in its rough state 3,027 carats. The part of the stone which is on the mill will positively be given 58 facets, which is the number given to all other diamonds of whatever size, and it will weigh, when finished, between 500 and 600 carats.

The actual commercial value of the completed stone will be about \$2,500,000, but its unique character will possibly make it priceless. (See also article on page 67.)

When the Cullinan was found about three years ago it was a problem of the Premier Co. as to what disposition could be made of it. Its mere size, weighing as it did something over 1½ pounds, made it unmarketable and unsalable, and to cut it up into small pieces would destroy, to a large extent, not only its intrinsic but its sentimental value. The diamond hence remained in the vaults of the Premier Co. for nearly three years, when it was decided by the Transvaal government to present it to the King of England on the anniversary of his 60th birthday. In the rough the stone was valued at about \$1,000,000, and about this price was actually paid therefor, viz., \$400,000 in cash and \$600,000 representing 60 per cent. of the interest they had therein, on account of the fact that the government is entitled to this percentage of the output of all diamond mines in South Africa. It will possibly be ready for delivery within seven or eight months.

Photographs illustrating the foregoing sketch of the diamond and the factory where it is being polished are on file in the Bureau of Manufactures, Washington, D. C.

### Stronger Tone of Last Quarterly Public Ivory Sale at London.

CONSUL-GENERAL ROBERT J. WYNNE gives the following results of the quarterly sale of ivory held in London on July 22:

A total of 71¼ tons of ivory, sea-horse teeth, boar tusks, and rhinoceros horns were offered for sale, comprising 22¼ tons Zanzibar, Bombay, Mozambique, and Siam; 11 tons Abyssinian, 21 tons Egyptian, 7½ tons West Coast Africa, ½ ton Lisbon, 4 tons land carriage, ½ ton sea-horse teeth and boar tusks, ¾ ton rhinoceros horns, and 3¾ tons waste ivory. During the progress of the sale 24¼ tons were bought in or withdrawn.

There was a somewhat improved tone throughout the sales, with more general competition. This is attributable in a measure to importers showing less disposition to submit to further serious reductions in value, and the market was distinctly

strengthened by the increased buying orders from the United States.

The following ivory prices per hundred-weight (112 pounds) were realized: Zanzibar, Bombay, Mozambique and Siam, \$170.32 to \$345.52; Abyssinian, \$206.82 to \$321.18; Egyptian, \$209.25 to \$321.18; West Coast African, \$177.62 to \$323.62. The following were prices per pound: Rhinoceros horns, \$1.51 to \$3.64; boars' tusks, 10 to 21 cents; sea-horse teeth, 36 cents.

### The Famous "Kasseler Kanne."

THE unique and interesting wine pitcher shown on the front cover of this issue is a striking example of German silver work of the close of the 15th century, and is preserved in the Royal Museum at Kassel. The Germanic Museum at Harvard has a replica of this fine piece, as it formed part of the collection of antique plate presented by citizens of Germany. In an article on this collection in THE CIRCULAR-WEEKLY we furnished a small cut of a reproduction of this pitcher, but have just succeeded in getting hold of the good photograph of the original which we publish to-day.

The pitcher is in excellent embossed work cast and gilt. It represents a wooden tankard mounted with hoops, probably the typical shape of the receptacle for a domestic beer, as most Thuringian beers are still served in wooden vessels. The ornamental accessories of such a vessel could only be attached exteriorly without organic connection. The bottom rests on three turrets, while a fourth turret is attached to the lid. The spout is in the shape of an eagle head and neck of beautiful execution. The smooth handle again reminds of the utilitarian purpose of the object.

The pitcher was formerly in the possession of the Counts of Ziegenhain, whose coat-of-arms appears on the wings of the eagle. C. A. B.

Wm. Levy, employed at a jewelry store at 1306 Franklin Ave., St. Louis, Mo., one day recently, recognized a watch which had been left with him to be repaired as one of several stolen from his father, H. Levy, 14 Franklin Ave., last August, and notified the police. Three men were subsequently taken into custody and 15 watches and several other articles of jewelry were recovered. Frederick C. Emser, 53 years old, who left the watch at the jewelry store, told the police that he bought the time-piece from John Jost and the latter was arrested. Jost claims that he bought 16 watches from a man in East St. Louis. Wm. Scherer, 36 years old, who bought a watch from Jost, has also been taken into custody. Nine watches found in Jost's room were identified by Mr. Levy.

## Annual Report on the Production of Precious Stones.

Text of the United States Geological Survey's Advance Pamphlet on Gems and Gem Minerals for 1907, compiled by Douglas B. Sterrett.

(Continued from issue of Sept. 30.)

### GARNET.

Several varieties of gem garnets were produced during 1907, and from several States. The most important were the hyacinth garnets, spessartite, and essonite, which were obtained chiefly from California, though Don Maguire, of Ogden, reported a large production of rough spessartite from San Juan County, Utah. Much of the hyacinth came from the foothills in the desert near Dos Cabezas Springs, San Diego County, Cal., where the San Diego Gem Co. owns 10 claims. The remainder came from the gem mines near Ramona and Mesa Grande, Cal.

W. P. Dorsey sent in specimens of hyacinth garnets found by him near Silver City, N. Mex. They were small, clear, trapezohedral crystals with a rich yellowish-red to brown color. The crystals varied from pin-head size to three or four millimeters in diameter, and will furnish beautiful gems if larger ones are found. The garnet crystals were associated with quartz crystals in the specimens, both appearing in line cavities in a feldspathic rock impregnated with garnet and quartz.

A quantity of pyrope garnets were collected from the Indian reservation in northwestern Arizona and northwestern New Mexico. J. L. Hubbell, of Ganado, Ariz., mentions a locality about 75 miles west of north of Ganado where garnet is found abundantly over a stretch of country about 10 miles long. The garnets are picked up from the surface of the ground by the Indians. They occur in a sandy soil and are uncovered by the action of the wind.

Samuel Scott, of Custer, S. Dak., reports the occurrence of beautiful red garnets four miles west of Custer in Elephant Gulch. These garnets were obtained while mining for placer gold, and the flawless ones were sold as gems at from 10 cents to \$5 each.

C. A. Beghtol, of Canon City, Colo., states that the ledge of almandine garnet near that place, mentioned in this report for 1906, will be worked for abrasive purposes. At the same time it is expected considerable material suitable for cutting will be obtained.

J. D. Endicott reports the discovery of a band of mica schist carrying almandine garnets, near Canon City. Some of these garnets are as much as 1½ to 3¼ inches in diameter. They have a rich red color, and some are clear and free from flaws. About 10 pounds of stones fit for cutting were obtained at this locality during 1907. This deposit may be the same as that referred to as reported by Mr. Beghtol, though this has not been ascertained.

### GOLD QUARTZ.

A new variety of gold quartz from the Quartet mine, Searchlight, Nev., has been cut into small articles, such as watch charms, etc., by William Petry, of Los Angeles, Cal. A small specimen, kindly sent to the Survey by Mr. Petry, contained much bright yellow free gold in irregularly shaped particles and flakes in and between the grains of granular quartz. Most of the quartz appears bright green from the presence of films and small masses of malachite between the grains. The specimen also contained patches of purplish stains which could not be identified. The combination of colors makes an attractive small ornament, though the presence of malachite with quartz may give trouble in producing a high polish.

### JADE.

#### BURMA.

The production of jade (jadeite) in the Myit-thina district of Upper Burma during 1906 amounted to 2,214½ hundred weight.<sup>1</sup> This was less than in 1905, owing to scarcity of labor. The exports of jade, through Rangoon, however, were greater and amounted to 2,566 hundredweight, valued at £64,433, in 1906, as against 2,342 hundred-weight, valued at £43,474, in 1905. In 1905 there was a further export of 343 hundredweight, valued at £2,000, overland to China.

### JASPER.

There was a production of jasper in Colorado and southern California during 1907. Miss Ger-

trude S. McMullen, of the Southwest Turquoise Co., of Los Angeles, mentions a vein of jasper in San Bernardino County, Cal., from which a specimen was sent to the Survey. This deposit is owned by the Cracker Jack Bonanza Gold Mining Co. The jasper has a dark-red brown or liver color, and is mottled with many small gray streaks. The mottled effect is due to a former brecciation of the jasper, with a subsequent cementation by chalcedony. Some of this jasper has been polished by the Southwest Turquoise Co., and furnishes handsome small ornamental objects, though the color is rather dark and of course the mineral is expensive to polish since it is so hard.

Good jasper is known to occur in the eastern part of San Diego County, Cal., and from this region jasper was obtained during 1907. The Native Gem Mining Co. reports that abundant material can be obtained from its mine. John F. Schwartz, of San Diego, describes some of the jasper from Dulzura, San Diego County, as very handsome, but he makes the same statement as do others who have handled the California jasper, that it is so hard to cut as to render it doubtful whether the deposits will be worked commercially.

Louis J. Deacon describes the occurrence of smooth, water worn pebbles of brick-red, brown, and yellow jasper, associated with quartz pebbles and occasional jet black flinty quartz, on the Delaware Bay beach at Cape May, N. J. The occurrence is similar to that of the "pebble beach" of Redondo, Cal. Both at Redondo and at Cape May visitors spend much time searching for pebbles suitable for cutting or for specimens. A. C. Keck describes the occurrence of very fine red and green jasper pebbles with chalcedony and other gems at Redondo. The chalcedony is cut and sold as moonstone, and the jasper as bloodstone and sardonyx.

### OPAL.

#### UNITED STATES.

A small quantity of opal was reported from Oregon, California, Colorado and North Carolina. That from Oregon was probably from the deposit in the eastern part of the State, a few miles below the town of Durkee, described by Dr. Kunz<sup>1</sup> as occurring in cavities in rhyolite tuff. The opal from California came from the deposits in San Bernardino County, about 20 miles northwest of Barstow. Small pieces of precious opal and handsome specimen and ornamental material have been found here. Some of the latter variety obtained by C. O. Johnson is described<sup>2</sup> as dark red jasper streaked with semi-opal. J. D. Endicott reports the discovery of lechosos or milky opal in the water-worn gravels in the foot-hills south of Canon City, Colo. Opal in North Carolina was limited to one specimen of lechosos or milky opal found in the southern part of Iredell County by J. T. Cashion.

#### NEW SOUTH WALES.

The production of opal in New South Wales is still largely from the White Cliffs division.<sup>3</sup> New grounds have opened in the neighborhood of White Cliffs and near Bunker, or Gemville. The ranges along the White Cliffs are still unprospected, though it is thought they contain rich deposits of opal. There was an increase in production from Wallangulla and Lightning Ridge, in Walgett division. The production of opal from 1890 to 1906 is given as £989,099. The largest productions were £135,000 in 1899, and £140,000 in 1902. The production for 1906 amounted to £56,000, of which about £50,000 came from White Cliffs.

#### HUNGARY.

The opal mines of upper Hungary were advertised in 1907 for lease for a period of 10 years<sup>4</sup> or longer, or to be sold by the Government. At the same time about 30,000 carats of polished precious opal deposited with the exchequer was to be put up for sale.

<sup>1</sup>Mineral Resources U. S. for 1905, U. S. Geol. Surv'y, 1906, p. 1247.

<sup>2</sup>San Diego News, Jan. 23, 1908.

<sup>3</sup>Ann. Rept. Dept. of Mines, New South Wales, 1906, p. 53.

<sup>4</sup>Mining World, May 18, 1907.

### PERIDOT.

Peridot was produced in 1907 in the north-eastern part of Arizona and the northwestern part of New Mexico. The output came, as usual, chiefly from the Indian reservations, where the stones were gathered by the Indians and traded at different points. J. L. Hubbell reports a quantity of peridot gathered from the surface on the Ziltusayan Butte, about 20 miles northeast of Ganado, Ariz.

### PETRIFIED WOOD.

Petrified wood occurs at a number of localities in the Western States. W. C. Hart reports the sale of some 5,000 pounds during 1907, obtained from El Paso County, Colo. Samuel Scott reports that agatized and jasperized wood is plentiful in the Dakota sandstone formation around the Black Hills. This material is not used at the present time. The beautiful petrified wood from the petrified forests of Arizona, near Adamana, is carried off in some quantity each year as specimens and souvenirs by tourists. The specimens taken are generally limited to a few pounds in weight.

### PHENACITE.

A small quantity of phenacite was reported from Bald Face Mountain, Stoncham, Maine, by Messrs. Bickford brothers, of Norway, Maine, and by Leon Allen. Part of this was gem material and part specimen material consisting of crystals attached to quartz crystals.

### QUARTZ.

The quartz produced, including rock crystal, smoky, citrine, rutilated, and tourmalinated quartz, came from California, Colorado, North Carolina, Maine, Pennsylvania and Connecticut. In the first four States mentioned the quartz came from mines or regions around mines noted for their beautiful gems, as tourmaline, beryl, emerald, kunzite and hiddenite. A small quantity of rutilated quartz was obtained from the mines near Hiddenite, Alexander County, N. C., and in the adjoining county of Iredell. Of much interest is the polishing of a large crystal sphere by the Catalina Novelty Co., of Avalon, Cal. This sphere is reported to be six inches in diameter and quite perfect.<sup>1</sup> According to a press report,<sup>2</sup> it is 19 inches in circumference and weighs 11 pounds. The crystal from which it was cut was found in Riverside County, Cal. The value of the sphere is placed at \$3,300.

Louis J. Deacon mentions the occurrence of clear, pellucid quartz pebbles, called "Cape May diamonds," on the Delaware Bay beach at Cape May, N. J. These pebbles are gathered by visitors, who have them cut as souvenirs.

Consul-General G. E. Anderson, of Rio de Janeiro, states that the foreign demand for large size quartz crystals for optical work is quite variable. The value of the exports of such crystals from Brazil amounted to \$16,103 in 1904, \$18,132 in 1905, and \$10,553 in 1906. The fluctuations are due in part to variations in supply. The best crystals come from a belt extending from the central portion of Sao Paulo through Goyay and the western portion of the State of Minas. The price given as the average for the exports during 1906 was 42 cents per kilogram.

### ROSE QUARTZ.

There was a large production of rose quartz, amounting to 51,300 pounds, from South Dakota and Colorado. The largest production was from South Dakota, from the Red Rose vein, seven miles southeast of Custer. The whole output was not sold during 1907, however. Samuel Scott reports rose quartz in a number of localities in Custer and Pennington counties, S. Dak., though the deposits are not worked. J. D. Endicott reports the discovery of a ledge of unusually dark-colored transparent rose quartz six miles north of Texas Creek, Fremont County, Colo. The ledge is said to outcrop prominently on a mountain side for a length of 125 feet through a height of 30 feet. It occurs in the midst of pegmatite. This deposit is being operated by C. A. Beghtol & Co., and it is expected will yield much fine material. Frank H. Jackson, of Los Angeles, reports the occurrence of a vein of fine rose quartz in Hemet Valley, 20 miles southeast of Hemet, Riverside County, Cal. The vein is said to be from six inches to three feet thick, and the material could be obtained by the ton. Rose quartz occurs in numerous pegmatite bodies associated with the gem minerals of southern California.

(To be continued.)

# REPOUSSÉ WORK AND CHASING\*

ILLUSTRATED AND DEMONSTRATED BY AN EXPERIENCED ARTISAN

(Continued from issue of Sept. 2.)

## THE MOLDINGS.

THE moldings, of which there are three (one at the bottom of the bowl and one at the wide end of either collet), can be made either by turning on the lathe or by mounting wires of various shapes and sizes on to a band. For making one of the moldings by the first method, which is the usual one employed in workshops where a lathe is used, a strip of metal is cut a little wider than the molding is to be, to allow for truing. This is then cut off to the length required (in this case for the molding on the upper collet, 6 $\frac{3}{8}$  inches), and turned up into a circular band and soldered. It can then be taken to an anvil and hammered true, and also stretched a little larger if necessary. All bands or collars turned up in this way should, in the first place, be made a little small, as it is a very simple matter to stretch them with a hammer on an

to the band, using the hardest solder, as otherwise there is a danger of them giving way when the moldings, at a later stage, are soldered on to the collets and bowl.

The work, after being pickled to remove the borax, is now ready for the lathe. Theoretically, the process now is to cut away with turning tools the superfluous metal of the square until the required section is reached; but to obtain a practical knowledge of this branch of the work, workshop experience or a demonstration by a practical turner is absolutely essential.

The second method of making the moldings needs no lathe or a knowledge of turning, and, from an artistic point of view, is possibly better than the first or more usual method.

To begin with, a band is turned up in the same way as for the turned molding. Then, instead of making two rings of heavy square wire, two rings of thin round wire

on to the collets. It should be noted that in the case of the top collet the molding projects slightly over the edge of the collet, while with the lower collet the reverse is the case. After tying on to the collet with binding wire, the molding (before soldering) should be painted over with a mixture of rouge and whitening or loam, to protect the solder used for soldering the wires on to the band from the flame while the molding is being soldered on the collet. Care must be taken that no rouge gets between the molding and the collet, as the solder will not run properly if the juxtaposed edges to be soldered are not absolutely clean.

When the moldings have been soldered on, the next step is to solder the wire against which the boss fits (shown in the elevation on this page) on to the narrow end of each collet. It is best made by turning up a ring of square wire, which can be filed to shape before soldering on to the collet. Before fitting the wire on, the edge of the collet should be filed perfectly true; that is to say, it should run parallel with the edge at its wide end.

A line can then be marked with the dividers right round about  $\frac{1}{4}$  inch away from

A

3

A. Showing three stages in making a molding by the first method described; 1. Circular band, showing stitches. 2. Circular band, with square wires in position. 3. The finished molding.

B. Showing three stages in making a molding by the second method described: 1. Circular band, same as A 1. 2. Circular band, with the first two wires in position. 3. Circular band, with additional wires in making the molding complete.

anvil to the required size; while, on the other hand, if too large, they have to be cut, a piece taken out, and then soldered again.

The next thing to be done is to turn up two rings of wire, roughly square in section, which are to be soldered, one at the top and one at the bottom of the band previously made. Here, again, it is essential that the rings be on the small side in the first instance, so that they can be carefully stretched, trying them from time to time, until they push over tightly on to the band. Before slipping the wires over, two rows of "stiches," as described previously, should be thrown up on the band, to prevent the wires, when pushed over, from slipping too far toward the center. It should be noted that the top wire has to be rather thicker than the lower one, to allow it being turned to the shape shown on the sketch. The wires can then be soundly soldered on

are turned up and soldered. After the "stiches" have been cut in on the band, these rings (marked AA on the sketch) can be pushed over down to the stitches, but need not be soldered until the other rings (marked BB on the sketch) have been made and pushed on. The lower one of these B rings is of round wire (about double the thickness of the A wire immediately above), flattened top and bottom with a hammer or file. The top B ring is best made out of square wire in the first place; then, after it has been turned up and soldered, it can be shaped with a file to the section shown in the sketch. When all the rings of wire are in position on the band, they can be soldered together, making sure that the solder flushes right through.

Almost any type of molding may be made in this way by a judicious use of wires of various sizes and sections, provided that care is taken in the fitting of the wires against one another.

The moldings, when finished, can then be soldered on, the larger one round the bottom of the bowl and the two smaller ones

the edge. After throwing up a few stitches on this line, the wire can be pushed over and down to the stitches, leaving about 1-12 inch of the collet projecting to fit into the boss.

The collets, after the wires have been soldered on, should be fitted and soldered into the boss separately, making sure that the collet fits quite tightly in each case, as otherwise it will probably move during soldering, with the result that the whole cup will be thrown out of truth.

The stem (that is, the collets and boss) is now ready for soldering on to the base. A circle should be struck on the base the full size of the molding on the bottom collet, and stitches thrown up all round. These will prevent the stem, when dropped between, from moving out of truth during soldering. Another circle, about  $\frac{1}{4}$  inch smaller in diameter, can now be marked on, a hole drilled, and the center of the base cut out with a fretsaw to this line. After painting all previous soldering and joints over with rouge and whitening, the stem can then be soldered on, using softer solder

an additional precaution. In connection with soldering, a point which is often forgotten, is that it is exceedingly difficult to solder a rather flat base on to a stem unless the base is lifted a little from the firebrick or asbestos on which it is placed for soldering by means of little pieces of iron charcoal, so as to allow of the flame getting underneath it. If this is not done, the stem becomes red-hot before the base is properly warm, with the result that the solder runs on to the molding instead of joining the two parts.

Finally, the stem and base has to be soldered on to the bowl. As with the base, a circle is marked on the bottom of the bowl, having the same diameter as the molding on the upper collet, and a number of stitches are thrown up on this line to hold the stem in place while soldering it to the bowl.

To solder the two parts together the bowl is placed bottom upward on the firebrick or charcoal. The stem is dropped between the stitches and tied on to the bowl with binding wire, or it can be soldered without any tying whatsoever, as the binding wire, when hot, is apt to pull the work out of place. All previous soldering near enough to be affected by the heat should be protected with rouge or loam. Loam, which is generally used for larger work, is less expensive than rouge, is inclined to flake off when the metal becomes hot during soldering. It will adhere better if a little salt is added to the loam when mixing it with water. If rouge is used, care should be taken to brush this off with water before putting the cup into the acid.

When thoroughly cleaned, any superfluous solder about the joints and moldings can be removed with a few needle files and scrapers.

The bowl of the cup should then be lightly polished over, in order to give it a certain amount of springiness and hardness, as it will have become soft in soldering it on to the stem, and it is easily ruined if left in this state.

(To be continued.)

### The Diamond Markets.

LONDON, Sept. 27.—A special despatch to *The African World*, of this city, says: "We are informed on the best authority that the De Beers Co. will continue its policy of reducing the output from its mines, hoping thereby to gradually restore confidence in the diamond trade.

"The controllers of the De Beers Consolidated Mines, Ltd., are hopeful that the sacrifices incurred in the drastic measures recently found necessary to be taken at Kimberley will in the early future cause a permanent improvement in the diamond market. It is perfectly correct, as stated by the *Frankfurter Zeitung*, that the recent sales to the 'syndicate' have been effected at a reduction of at least 25 per cent. from the high prices ruling a year ago."

The London syndicate has, and is, maintaining prices without change, and no longer has trouble in doing so, since the demand for rough has become general again. The price which it pays to the De Beers Consolidated Mines for the latter's product has nothing to do with the market for the stones, though it has an effect upon the market price of the shares of the company. The Syndicate's price for rough is not based upon the mine's price or product for any season or year, but upon the production, consumption and price of diamonds during a long period of years. This accounts for the stability of the market price in bad and good seasons alike.

LONDON, Sept. 30.—As the result of a renewed demand for diamonds in the United States and England, the De Beers mines, which have been working only five days weekly, will resume full operations beginning Oct. 3.

The last issue of *Le Joaillier*, Antwerp, contains the following news of the diamond trade from European centers:

LONDON—The Syndicate has sold most of its goods. The demand for Kimberley is less, but sales of Bullfontein goods are numerous, including spotted browns, fancies and second spotted. It seems as if we had come back to that time when all is in demand. The Premier has sold almost all of old shipments, and promises to show new goods within a fortnight.

AMSTERDAM—The price of polished goods is rising, and transactions are more freely consummated than heretofore. The demand for small goods is limited, but mêlée up to four carats are chiefly in demand. Rough is higher, and there is considerable disparity between the prices for polished and rough, although polished has advanced. Every week there are 60 or 70 buyers of rough in the British market, but they are treated with little consideration by the English sellers. Not only are they asked higher prices, but they are compelled to take entire lots, while for a long time they were allowed to make some selection of packages. There is a famine of "cleavages," as most of these buyers finish the goods for export. Cloven goods (kapjes) are quiet, many waiting to see how the market for polished goods will turn. Roses are higher, and some transactions in ordinary browns are recorded, for the first time in a year. There is consider-

able activity in small fine roses. Bort is decidedly firm. The number of cutters out of work is decreasing weekly, and before very long all will be normal.

### The Two Great Diamonds Known as the Cullinan, and Cullinan II, to Be Ready for King Edward by Christmas.

THE HAGUE correspondent of the London *Daily Mail* reports that the cutting of the great Cullinan diamond, the largest in the world, presented by the Transvaal government to the King, is proceeding with unexpected speed in Amsterdam, and it is hoped that the two stones from it will be ready for the adornment of the English crown and sceptre before Christmas.

The two stones into which the diamond was first split weighed 1,700 carats and 1,000 carats, respectively. There are, besides, some "splinters" weighing 300 carats. On March 3, Henri Koe, the diamond cutter of the Amsterdam firm of Asscher, began cutting the larger stone, which will be called the Cullinan. A month later he began work on the smaller stone, the Cullinan II. The cutting of the latter was finished on Sept. 12. It is in the form of a round brilliant, and is the largest cut diamond now existing, weighing 330 carats. The Cullinan II. is a jewel of the greatest worth and of unparalleled beauty. Of a bluish-white color and incomparable purity, its "sparkle" is of a rare brilliance. In order to increase its refraction, the number of facets was made double that of other diamonds. At the top is the "table," and from the table to the point or end of the stone appear hundreds of facets.

The Cullinan itself, which will weigh 600 carats after the cutting, will be ready within two months. It possesses the same qualities as the smaller stone, but on account of its greater size its beauties will be even more apparent. Its value is very difficult to ascertain, but it may be safely assumed that it is about £3,000,000.

Among the "splinters" from the great diamond are several fine stones, one weighing 100 carats and valued in its present state at £2,000.

### Awards of Contracts by Government Departments to Supply Various Articles.

WASHINGTON, D. C., Sept. 30.—The Department of Agriculture has announced the following awards for supplies for the present fiscal year: 500 maximum thermometers, J. Henry Green, Brooklyn, \$2 each; 100 mercurial thermometers, J. Henry Green, Brooklyn, \$1.25 each; 500 minimum thermometers, J. Henry Green, \$2 each.

WASHINGTON, D. C., Oct. 1.—The bid of Barbier, Barnard & Turrene, of Paris, France, for furnishing the Third Light-house District of Tompkinsville, N. Y., with 232 90-degree segments for lens lanterns, at \$3,625, has been accepted. The other bidders on this contract were the estate of Henry Lepaute, Paris, France, \$3,650, and Chance Bros. & Co., Ltd., of Smithwick, England, \$3,712.

No bids were received for 130 four-inch alarm clocks, nor for 25 regulator clocks and 10 world clocks.

## THE NEWS FROM ENGLAND

Trade in London Feels Good Effects of Franco-British Exhibition, But Other Sections Not Faring Well—Australia and Cheap Jewelry Exhibition Juries Complete Their Work—New Building of the Central School of Arts and Crafts—Proceedings of the N. A. G.—Earrings Still Popular Diamond Market Improves.

LONDON, Sept. 29.—Trade in London is fair; the Franco-British Exhibition has begun to make itself felt, though most people are of opinion that we shall reap the benefits later. Certainly the hotels are filled to overcrowding and "love nor money" will benefit the belated traveler who has not engaged his bed well ahead. The visitors to the exhibition again have a good sprinkling of possible buyers. London, consequently, is looking brighter from the trade standpoint and anticipating a good Autumn and Christmas trade. Birmingham is still in a mood which shows that the city is not yet faring well. Trade, though it shows signs of improvement, is not by any means brisk, neither is that of Sheffield, but there is an improvement in the "Cutlery City," and maybe it will increase before the year is far advanced. Sheffield is also the more fortunate with Australian trade. Stocks everywhere are very low, and it will be strange indeed if the manufacturers do not quickly get a "look in." Some of the seaside resorts make a good return for August and September, but the Scotch trade is very poor. The Scottish National Exhibition has not been very much of a benefit to Edinburgh, while Glasgow and its surroundings are still suffering from the bad condition of the shipbuilding industry and the general result of the strike, which is now happily finished. Ireland is no better; trade is bad, and like the rest of the kingdom there is a shortage of money.

There is much tribulation in the camp of the makers of cheap gold jewelry, particularly in Birmingham, over the action of the Australian authorities. Really no one can reasonably complain, certainly not those who believe in the honesty of trading and have any thought for the reputation of the goldsmith's craft. Of course there are excuses, reasonable enough in a way. Severe and unhesitatingly unscrupulous competitors forced the hands of the bona fide jeweler who produced for the cheap home and colonial markets. He had been in the habit of producing a good, sound article, but the maker without scruples, and possessing an easy conscience, by using an abundance of solder, and then, if needs be, "packing" or "loading" the article (after it was hall marked) with metal or composition, forced the trade into the unsatisfactory position it is now in. Whether the assay offices will step in and deal, as they should do, in a drastic manner with goods of this description, remains to be seen. It is important, in the interests of the trade, that it should be protected against itself. Few seem strong enough to fight against the curse of shoddy goods for fear of losing their position. Meanwhile Australia is determined not to take goods which will not assay at the value of the hall mark.

The work of the juries in connection

with the Franco-British Exhibition has just been completed, and the exhibitors, now that the expectancy and excitement of the jury business is over, are patiently awaiting the notification from the superior jury as to the awards. The class jury, which judged the silversmithing and enameling exhibits, had for its president André Aucoc, a member of the famous French silversmith's house in the Rue de la Paix, while W. Augustus Steward, chief instructor in gold and silversmithing at the London Central School of Arts and Crafts, was vice-chairman of the class jury, and also secretary of the second or group jury. Sir George Birdwood was the president of the goldsmithing and jewelry class jury, and M. Paul Templier, one of the best-known Parisian jewelers, was selected vice-president, while Henri Teterger, also of Paris, was appointed secretary. Sir John Birmingham, of Walker & Hall, Ltd., chairman of the cutlery class, was elected president of the group committee, with Paul Templier and M. Soleau as vice-presidents, and, as mentioned above, Mr. Steward as secretary. Julien Trippin, F.R.A.S., the translator of Saunier's famous treatise on Horology, was president of the horological class jury, and T. D. Wright, chief in charge of the horological department of the Northampton Institute in Clerkenwell, deputy jurymen and expert. Paul Lévy, of Besançon, was vice-president, and S. Hébert, secretary. It might be placed on record also that the jurors did not receive a dime for their labors or expenses, owing to the fact that the exhibition is not established for the purpose of making a profit for individuals, any profit being divided between British-French charities. The exhibition has positively been an enormous success, viewed either from the sentiment of the *entente cordiale*, the practical or trade side, and the patronage of the public.

The new Central School of Arts and Crafts, in London, has just been opened. It is a remarkable building, erected upon an irregular site, having a frontage of 100 feet in Southampton Row and 106 feet in Theobalds Road. The building is of four stories, which give a floor space of 74,000 square feet. The building contains 70 rooms, viz.: 42 class rooms or workshops, a large central hall for exhibitions, common rooms, administrative offices and staff rooms. There is also a lecture theatre which will accommodate 300 students. The goldsmithing and silversmithing department (which has been under the charge of W. Augustus Steward since the foundation of the school) has been arranged on the first floor, and is one of the most comprehensive in the building. In the workshops 200 students can be comfortably accommodated each day or evening, while in the basement is a workshop for the heavier kinds of art metal work. The Central School was started as an experiment by the

Technical Education Board of the London County Council in 1896, in temporary premises known as Morley Hall, in Regent St., W. So successful was the school from the commencement that by 1898 the accommodation was too small, and additional premises had to be rented in the neighborhood, and now after many years of waiting a really handsome and self-contained building, fully equipped, takes the place of a ramshackle ex-club and enables the crafts of London to be taught under the most satisfactory conditions. As hitherto, the work of the school will be mainly directed to assisting students engaged in the typical London artistic crafts, and the work will be mostly done in the evening, but for those who are able to attend during the day classes have been established for some time and will now be further developed, particularly the day technical school for boys preparatory to entering the gold and silversmithing and allied trades, while a special day class for design in jewelry and silversmithing will be commenced at the instigation of the Gold and Silversmiths' Art Council.

The National Association of Goldsmiths has just concluded its first general council meeting in London. Many matters of importance were discussed by a full gathering. A question of considerable importance related to the production of objects in silver or gold in technical schools. It was pointed out that the conditions under which articles were produced were such as would give the producers and sellers a great advantage over the manufacturer and shopkeeper. There is no doubt whatever that unless definite rules are laid down, and arrangements made to prevent undercutting, that a technical school might become a source of considerable trouble by means of unfair competition; but they manage to arrange things all right in Germany, and I don't see why they should not be arranged in Britain. Still, the note of warning in this case is reasonable, and the person who brought it forward was well advised.

Earrings are still very much in favor and are likely to remain so, and perhaps gain even greater favor, now that Winston Churchill is known to have made his bride a present of a very handsome pair. The very ornate type of earring which about a year ago seemed likely to become the fashion has fortunately not had such a large demand, but on the other hand dainty little earrings or long, light chains of pearls or diamonds are very much in vogue, and I think from all appearances are likely to remain so.

The diamond market has settled down very nicely now and the unrest is apparently passing away. Without doubt, the action of the De Beers saved the position. People complain of monopolies, and, in the main, I think, with considerable reason, but in this case we have seen what the wise action of a very powerful body can do; it has saved the trade from a position which it would have taken years to retrieve.

and their popularity is demonstrated by the orders received by the Company for these goods. A money-making suggestion just now might be timely—if you are looking for merchandise that will sell, and sell at a good profit, by all means have these gems in your stock—all manufacturers and jobbers carry them. The Company will send you such goods as you may desire on memorandum for your approval.

**Jewelers Take Part in Jubilee Celebrating the 150th Anniversary of Naming City of Pittsburg.**

PITTSBURG, Pa., Oct. 3.—A jubilee period is observed in Greater Pittsburg this week and the jewelers took an important part. The celebration was planned in honor of the 150th anniversary of the naming of the city, in honor of William Pitt.

court of honor was erected in Fifth Ave., huge white pillars being constructed at a distance of 100 feet apart, on either side of the street, these being brilliantly lighted at night, while the triumphal arch was erected at Liberty and Sixth Aves., with smaller arches constructed elsewhere.

There were two parades during the week. The first took place on Wednesday, the

Indians from the Cornplanter reservation of Pennsylvania took an active part, heading the parade in canoes. It was a picturesque sight. George Washington and his followers, who visited Pittsburg after the British had captured Fort Duquesne, were successfully portrayed, and those who took part in the representation of the early period, rode the streams in vessels which were a counterpart of those used in the early days. The great land parade, military and civic, took place on Thursday, it being the most brilliant pageant ever seen in Pittsburg. It is doubtful if any city ever witnessed anything more beautiful. There were 60 floats in the pageant, some of which cost as much as \$4,000 each. Many of these were drawn by 30 and 40 horses, each animal being led by a costumed attendant, while outriders led the way, and in many instances bands. This division alone was nearly two miles in length, the entire procession taking four hours to pass.

There were no advertising features in the "Mardi Gras" division. The business houses, manufacturing interests and railroads which had floats in the procession modestly placed their names on a sign a foot wide and two feet in length, to designate ownership.

Heeren Bros. & Co. had the only float in the procession representing the jewelry trade. The subject was "The Jeweler's Art." The central figure represented a goldsmith of the 17th century, working at his trade. The two figures in the front held the finished article. The eight heralds walking alongside of the float carried different emblems representing the jeweler's craft. The two women in the center of the

FLOAT OF HEEREN BROS. & CO., REPRESENTING THE JEWELER'S ART.

1758 Gen. John Forbes, with a handful of men, captured Fort Duquesne after the Indians and French had evacuated. Aarrison was placed in command by the British general, who held it, renaming it Fort Pitt. A town was established and General Forbes called it Pittsburg.

In arranging for the sesqui-centennial activities it was thought fitting to invite from England the nearest of kin of the English nobleman, and Arthur Forbes, a great-great-grandnephew and his wife came as guests of honor, from Edinburgh, Scotland. With them came Miss Hester Pitt-Taylor, a great-great-great-granddaughter of Lord Chatham and her niece, Miss Madaline Pitt-Taylor, of London. Other visitors of honor included Vice-President Charles W. Fairbanks, of the United States, Governor Edwin S. Stuart of Pennsylvania, and many other notable men. A fund of nearly \$50,000 was raised by the citizens to defray the expenses of the celebration, while perhaps \$200,000 was spent by the jewelers in decorations, the jewelers all contributing to make the affair a gigantic success.

Every jeweler in the city who has a round floor store decorated his establishment and kept pace with the decorations of his neighbors. The houses especially well decorated were those of the John M. Roberts & Son Co.; J. C. Grogan & Co.; R. Reed & Co.; the Hardy & Hayes Co.; P. Roberts & Sons; W. W. Wattles & Sons; L. W. Vilsack & Co.; Henry R. Verheyden; Kingsbacher Bros.; Heeren Bros. & Co.; Sam F. Sipe; Geo. B. Barrett Co.; the Joseph Horne Co.; Gillespie Bros. and dozens of others, including the smaller jewelry establishments of the city. The

marine demonstration, the pageant being on the local rivers, and participated in by more than 100 steamers. The primitive methods of boating were made conspicuous.

hat represented the present modern idea of the jewelry trade. The ornamentations on the side were set in white rhinestones, thousands being used for the purpose. The metals used in the decorations were made of metal and the leaves chased and worked in gilt. The shield on the side represented the official seal of Pittsburg. Tools used in the manufacture of jewelry formed a part of the exhibit, while potted plants helped to give the float a most attractive appearance. The rear figure represented "rather Time," a fitting sequel to the subject. The float was drawn by six horses. The attendants were dressed in Oriental costume.

It is estimated that fully 500,000 persons witnessed the parade. All of the retail jewelry stores closed for the day and business was practically suspended throughout the city. Visitors came from far and near. Arrivals were held nightly during the week in the streets, the populace being given a free rein. There could have been no more striking exhibition of the local pride which pervades the community than as exhibited during the last week, and the event will give Pittsburgers and their friends much to talk about for years to come.

#### Police Officer Shoots Thief Who Tries to Escape After Breaking Into Pittsburg Jewelry Store.

PITTSBURG, Pa., Oct. 1.—A thief who says his name is Charles Edwards, and his home in Chicago, was shot at 3.15 o'clock this morning by Special Officer Edward Brophy, of the city police, while attempting to escape from Special Officer Herbert Clark, of the Holmes Electric Protective System. Edwards sawed through a skylight of the jewelry store of Henry Terheyden at 530 Smithfield St.

When the alarm went off in the Holmes office Clark hurried to the store, and as he opened the front door and started for the second floor he heard Edwards running to the rear of the building. Clark then started around to Cherry Alley, realizing that the burglar was going to escape by the roof. As the officer reached the alley the thief was fleeing toward Sixth Ave. and Clark fired at him. The shooting attracted the attention of Officer Brophy, who hurried out of the Public Safety building and overtook the burglar. Leveling his gun at him, he demanded the thief to stop. At the same time Edwards drew his revolver, but Brophy was too quick for him and fired, the ball entering Edwards' shoulder. As the policeman pulled his gun Edwards yelled, "Get out, you!" and then Brophy blazed away and Edwards fell. "I am done; I am shot," he said. "I came here from Chicago, Saturday, and tried to rob the jewelry store."

Edwards was arraigned this morning before Magistrate Brady on a charge of entering a building with intent to commit a felony and another of felonious shooting, having attempted the life of Brophy, and was held to await the action of the Grand Jury. Edwards said later that he was glad he did not shoot the policeman. A check for baggage shipped from Wheeling to Pittsburg was found on the prisoner. The grips were searched, but nothing of value was found.

#### Career of the Late Joseph Linz.

Joseph Linz, a pioneer Texan, one of the most prominent business men of Texas, and the founder of the jewelry firm of Jos. Linz & Bros. (now Linz Bros.), Dallas, Tex., in brief mention of whose death appeared in the last issue of THE CIRCULAR-WEEKLY, was for years the leading jeweler in the southeast. He died of ptomaine poisoning, contracted while in St. Louis, Monday, Sept. 28. He was taken sick Friday, and despite every effort of medical skill succumbed at the Marquette Hotel in that city. The funeral was held last Wednesday morning from the residence of Mrs. L. D. Loery, a cousin, living at 4946 McPherson Ave., St.

THE LATE JOSEPH LINZ.

Louis, Mo. Interment was in Mount Sinai Cemetery.

Although four years ago Mr. Linz suffered a nervous collapse and has been in bad health ever since, the suddenness of his death occasioned great surprise. In order to recuperate he had been traveling a great deal, visiting health resorts in Europe and in the United States. He and his family had spent the Summer in Chicago, and three days before his death he went to St. Louis. His wife and daughter, Miss Elma, remained in Chicago. They were to have followed him to St. Louis in a few days.

Mr. Linz was born in Virginia 55 years ago, the oldest of a family of seven. He received his education in the public schools of St. Louis, and began his career in the trade as an employe of a Mr. Goldsall. In 1879 he started in business for himself at Denison, Tex., and in 1882 he removed from that place to Sherman, Tex. Shortly after that time Simon and Albert Linz were admitted to a partnership interest, and the firm of Joseph Linz & Bros. was formed. In 1895 the business was removed from Sherman to Dallas, and in 1887 Benjamin Linz was given an interest without a change in the style of the firm, and the erection of the six-story Linz building began. In 1907 the interest of Joseph Linz in the firm was purchased by his brothers and continued as Linz Bros.

In fraternal circles Mr. Linz was prominent. He was a member of the Knights of Pythias, B'nai B'rith and the Masons. He was a Scottish Rite Mason and a Shriner, and the Masons have been requested to conduct the burial service.

Mr. Linz was regarded as a remarkably active man. He was held in high esteem in the trade and by a large circle of acquaintances. He owned several office buildings in Sherman and Dallas, the Linz building in the latter city being one of the finest in that section of the country.

The deceased is survived by a widow, two children, Miss Elma, of St. Louis, and Clarence, of Dallas; three brothers, Albert, Simon and Ben, all of Dallas, and three sisters, Mrs. J. A. Bach, of Chicago, Mrs. Leopold Freund and Mrs. Fred Steiner, of St. Louis. J. A. Bach, a brother-in-law, was with Mr. Linz at the time of his death. An aged father, Meyer Linz, also survives.

#### Death of John F. Sturdy.

NORTH ATTLEBORO, Oct. 5.—The death of John F. Sturdy at his home on Towne St., Attleboro Falls, removes one of the most prominent of the earlier manufacturing jewelers. Mr. Sturdy has been ill for some time and death was not unexpected. He was the founder of the firm of J. F. Sturdy's Sons Co., and it was mainly through his resourcefulness and integrity that the Sturdy firm rose from a humble position to its present proud place in the front ranks of jewelry concerns with a name highly honored wherever jewelry is sold in America.

John F. Sturdy was born in Attleboro, March 14, 1822, in a house not located more than half a mile from the place where he died. He was the son of William and Clarissa Whittemore Sturdy and was the seventh of a family of 14 children. His education was obtained in the Attleboro public schools, and when he laid aside his school books he assisted his father, who was a prominent cotton manufacturer.

Mr. Sturdy was married Nov. 26, 1848, at Cumberland Hills, to Miss Knapp. Immediately after his marriage he engaged, with his brother James, in the manufacture of jewelers' tools. The business was located in Providence. In 1849 Mr. Sturdy returned to Attleboro Falls and, uniting with Herbert Draper, founded the firm of Draper, Sturdy & Co. The business was prosperous, but in a few years Mr. Draper died.

During the earlier years of his business life Mr. Sturdy engaged in the manufacture of novelties. It was the result of keen observation in this branch whereby he conceived the idea of rolled gold plate and, together with his brother James, they first gave to the trade this great boon. The demand for rolled gold plate since it was put on the market by the Sturdys has been enormous and has been a great stimulant to the jewelry business.

In 1893 Mr. Sturdy retired from active business life and turned over the cares of business to his three sons—Fred E., Herbert K. and Frank M.—who now carry on one of the largest chain and bracelet concerns in America.

The funeral takes place Wednesday afternoon at 2 o'clock.

### Death of Samuel Hammond.

Samuel Hammond, an old and prominent retail jeweler and late head of the firm of Samuel Hammond & Co., 72 Wall St., New York, died at his home, 661 Putnam Ave., Brooklyn, last Tuesday, Sept. 29, of Bright's disease, after an illness of over a year. He was long been known as a specialist in cutting diamonds and precious stones, and is highly respected in the jewelry trade. Mr. Hammond was born Feb. 10, 1849, in Brooklyn, where he spent his early life, and after leaving the public schools he entered

THE LATE SAMUEL HAMMOND.

the store of his father, Samuel Hammond, which was located at that time at 41 William St. There he served his time as an apprentice at the bench, learning the trade in all its details, and later entered his father's employ, where he acquired a wide knowledge of precious stones. He remained in the employ of his father until after the latter's death in 1887, and from that time until the death of his mother managed the store. He then formed a partnership with his brother William, under the firm style of Samuel Hammond & Co., and the business was removed to 62 Wall St., and later to 71 Wall St., where it was continued until a recent removal to 72 Wall St.

The business was originally founded by the elder Hammond in 1837, and for years the firm have been the keepers of the New York Stock Exchange time, and have numbered many of the leading men in the country as customers.

Mr. Hammond was prominent in Democratic politics in the 17th district, Brooklyn, for many years, although he never sought office. He was prominent in the New York Microscopical Society, and was member of Bedford Lodge, F. and A. M.; General Putnam Council, R. A.; Columbia Council, L. A., and the Ancient Order of United Workmen. He was prominent in the Royal Arcanum in his early days, and one time was Regent of Fairview Council.

Deceased is survived by a daughter, Mrs.

Harold Webster, a son, Samuel, Jr., a grandson, Louis Hammond Webster, two sisters and two brothers, William, who is associated with him in the firm, and George, a resident of New Jersey. Mr. Hammond enjoyed the acquaintance of a wide circle of friends who deeply regret his demise.

The funeral was held Wednesday night from his late home, and interment was in Greenwood Cemetery.

The business will be continued at the present location under the old style.

### Members of West Virginia Retail Jewelers' Association Hold Convention at Elkins, W. Va.

ELKINS, W. Va., Oct. 1.—A very interesting session was that held by the West Virginia Retail Jewelers' Association in this city, Tuesday, Sept. 29, at Hotel Randolph. President T. A. Westmeyer, of Wheeling, called the convention to order and presided over the proceedings of the day, while President Archibald, of the American National Retail Jewelers' Association, was also in attendance. A large number of enthusiastic jewelers from all sections of the State were present and more interest was shown in the work and more new members secured than at any previous convention.

Mayor A. M. Fredlock welcomed the visitors in the following well chosen words:

*Mr. President and Members of the Retail Jewelers' Association*—As Mayor of our city it is my pleasing duty to welcome you into our city and extend to you the city's freedom. I believe that this meeting should furnish mutual congratulations. We are to be congratulated that the representatives of one of the oldest and most important business interests of the country should choose our city for its annual meeting. And you are to be congratulated on the wisdom of your choice. Our city is fast becoming throughout the State as a "Convention City." Our central location, our accessibility by rail, our pure mountain air, our healthful surroundings, and the hospitality of our citizens, make our city an ideal one for conventions and associations. Our city is young yet, having not reached the legal age for voting. But I believe when you look at the number and character of our municipal and private improvements you will agree that we compare favorably with older cities.

I have said that the business you represent is both old and important. And it is. You have to go back to the dawn of history for the beginning of the jewelry business. The first descendants of Adam turned their attention to tilling the soil, but Tubal-Cain, the seventh from Adam, realizing the importance, and possibly the profits, of the jeweler's trade, became the first artificer of brass and iron. And many times when I have looked at the green marks left upon my finger by a beautiful ring I have thought that the descendants of old Tubal-Cain would never die.
