In the past men of your profession have been the bankers for kings. Have financed the important wars of history and been the custodian of the wealth of nations. But while you do not aspire to such things to-day, yet the interest represented by you is one of the most important of our country. The conservatism which is almost invariably found in the jewelry business is one of the safeguards to the general business of our country.

I am particularly glad to welcome you to-day. I am sorry that your coming is at a time when drought conditions still prevail. We have not suffered from a water famine nor do we expect to, but should there be any scarcity in the supply you will be glad to know that there is an abundance of our famed "No-Tax."

Gentlemen, I bid you welcome, and hope that our city may so impress you that we may have the pleasure of entertaining you in future meetings.

W. L. Jones, of Martinsburg, responded in a brief but very interesting manner, after which President Westmeyer addressed

the convention in the following words:

*Jewelers of the West Virginia Retail Jewelers' Association, Brother Jewelers, their Guests, Ladies and Gentlemen*—This is the fourth convention of the West Virginia Retail Jewelers' Association. It gives me the greatest of all pleasure to welcome you, Mr. Archibald, as president of the American National Retail Jewelers' Association, I might also add one of the pioneers of the organization of the retail jewelers of these United States, and to you brother jewelers, I cannot help but feel proud to welcome you here to this convention, and to your guests I also extend a hearty welcome, for it gives me great courage in predicting the future of the West Virginia Retail Jewelers' Association. I trust that the next convention that we hold will see you all there together with your friends and guests, and in conclusion of my short talk, in the name of the American National Retail Jewelers' Association, I invite you all to the next annual convention to be held at Omaha, Nebr., next August. Come to that convention and see what a fine gathering of intelligent men or rather jewelers are there. Then, when you return home, look around yourself and see what you would have missed had you not attended.

National President J. P. Archibald delivered a very interesting address touching along the lines of organization work, together with a great deal of other valuable information. His remarks were frequently applauded. Mr. Archibald is a very eloquent talker and never fails to hold the attention of his audience.

The regular routine of business was then taken up and dispensed with. A vacancy having occurred, Charles J. Kinzer, of Bluefield, was appointed third vice-president.

Reports of committees were received and approved. The report of the delegates to the national convention at Cincinnati were read and approved. This was a very elaborate report, covering the entire business transaction of the national convention.

Resolutions were passed commending the action of the national executive committee at its meeting in Chicago, Sept. 16-18, 1908; also extending a vote of thanks to the Hotel Randolph Co. and the retail jewelers of Elkins for the many courtesies extended.

The convention adjourned at 11.15, Tuesday night, to meet in Wheeling, May 17 and 18, 1909.

### Death of Joseph Grant Barden.

NORTH ATTLEBORO, Oct. 3.—Joseph Grant Barden, one of the oldest and best known residents of North Attleboro, died this afternoon, after an illness which covered a period of many months. Mr. Barden was a retired jewelry manufacturer. He was associated for a number of years with Edward M. Blake and John Joyce, in the firm Barden, Blake Co.

Deceased was born in Blakes Hill, Plainville, Sept. 2, 1824, and was the son of Thomas and Rachel Smith Barden. He engaged in the hop manufacturing business until 1870, with his brother, S. H. Barden. For several years he conducted a large wholesale flour and grain house in Providence. Returning to North Attleboro, he engaged in the coal and wood business and later branched out into the manufacture of jewelry.

Mr. Barden married Ann F. Clark, who, together with five children, survive. The children are: Winthrop F., of the firm of Barden & Hull; Miss Cora, Edgar, Adelbert and Henry.

Edwin Jerauld has bought the business of H. A. Minasian, Sutter Creek, Cal.

**Aware of This Thief Who Telephones Jewelers Before Sending Messenger With Fraudulent Order for Goods.**

Because of the care exercised by John J. Clanev, employed in the offices of Rudolph Snedeker, 65 Nassau St., New York, a robbery was averted last Friday. Mr. Denev was in the office of the concern at about 3 o'clock in the afternoon, when a call came over the telephone purporting to come from the store of I. Lewkowitz, 17th and Sixth Ave. The speaker inquired about a Juergensen watch, and requested that a watch valued at \$300 be delivered to a messenger who would be sent to get it about 4 o'clock. Several questions were asked over the phone relative to the case and movement of the watch, and Mr. Denev became suspicious, and warned those in the office not to deliver a watch to anybody purporting to come from the store of I. Lewkowitz until further inquiry was made.

About 4.30 a boy came into the office and presented the card of Mr. Lewkowitz, on the back of which was written: "Please deliver to bearer on memorandum the watch arranged for over the telephone." Mr. Denev questioned the boy and learned that he was not employed by Mr. Lewkowitz. At that a man met him in Nassau St. and gave him the card, telling him that if he wished to earn 25 cents he should take the card to the office of the firm of Rudolph & Snedeker and procure the watch and return with it to the street. The man explained to the boy that he had had some trouble with members of the concern and that he did not wish to go to the office to transact the business himself.

After the boy had presented the card, Mr. Clanev sent out for Detective Lieutenant Tringer, who came to the office at once. An inquiry was then made over the telephone at Lewkowitz's store, and Mr. Humphrey, who answered the call, said that he knew nothing of any such transaction and that he would be downtown immediately.

The boy seemed very much frightened, but as he was evidently used as a tool he was not arrested. Instead, a package was wrapped up and given to him, and he returned to the street with it, but the man, who had evidently become suspicious, did not appear, and no trace of him could be found.

Jewelers throughout New York are warned to be on the lookout for any one trying to work the same trick.

**Exports of Jewelry, Clocks, Watches, Silverware and Kindred Lines from the Port of New York.**

WASHINGTON, D. C., Sept. 30.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York or Sept. 18 and 19:

- Antwerp: 1 case watches, \$364.
- Bremen: 1 case plated ware, \$230.
- Calcutta: 2 cases watches, \$260; 2 cases plated ware, \$364.
- Demerara: 2 cases plated ware, \$144.
- Hamburg: 1 case optical goods, \$608; 18 cases locks, \$500.
- Havana: 4 cases clocks, \$192.
- Kingston: 1 case jewelry, \$125; 9 cases clocks, \$229.

- Liverpool: 4 cases watches, \$2,900.
- London: 8 cases watches, \$1,023; 12 cases optical goods, \$4,781. 4 cases clocks, \$267.
- Montevideo: 1 case plated ware, \$263.
- Southampton: 17 cases watches, \$3,091; 6 cases clocks, \$210.

**Men Charged with Robbing Salem (Mass.) Jewelry Store Arrested in Boston and Stolen Property Recovered.**

Boston, Oct. 2.—Early Thursday morning the jewelry store of W. S. Lee, of Essex St., Salem, was entered by burglars and robbed of a quantity of jewelry. About 12 hours later two men were arrested in the pawnshop district in this city with some of the property, it is claimed, in their possession. Subsequently a third young man was taken into custody in connection with the case.

The prisoners gave the names of George Kelly, Lawrence, and Arthur McAuliffe and Michael Driscoll, Boston. At the latter's room, in a West End hotel where he has been lodging, 16 silver watches, two gold watch cases, stick pins and other articles were found.

Kelly and McAuliffe were arrested in a pawnshop, the Boston inspectors having been notified of the break and asked to co-operate with the Salem police. They had in a bag 280 rings set with stones, 27 wedding rings, 19 bracelets, 122 charms and locketts, 28 chains, two watches, one watch case, two belt buckles and 24 stick pins. The haul was estimated to be worth about \$1,500.

In court to-day the three were held in \$1,000 bonds for the Grand Jury. Kelly and Driscoll waiving examination. McAuliffe, however, pleaded not guilty, and desired a hearing. He claimed that he did not participate in the robbery, but stated that Driscoll, who is said to have confessed to the police, roomed with him, and that Kelly gave him a ring.

**Death of Adolph Hauser.**

MILWAUKEE, Wis., Oct. 1.—Adolph Hauser, for many years proprietor of a jewelry store at 237 3d St., died at his home, in this city, yesterday, at the age of 65 years.

Mr. Hauser was born in Vienna, Austria, and has been a resident of Milwaukee for the past 35 years, a greater part of this period having been devoted to the jewelry business. He was prominent in business and social circles and at the time of his death was a leading member of Harmony Lodge No. 142, F. and A. M.

The well known jeweler is survived by four children—Paul C. Hauser, Mrs. Sophia Harris and Daisy and Irma Hauser.

**Death of Robert Z. Block.**

The funeral of Robert Z. Block, of the firm of Robert Z. Block & Co., jewelry manufacturers, Newark, N. J., was held from the home of the deceased, 143 Monroe St., Brooklyn, at 10.30 o'clock Saturday morning. Death resulted from apoplexy Wednesday night while Mr. Block was on a business trip for his firm in Baltimore. The first news of his demise reached New York by telegraph from Baltimore and stated that Mr. Block had been found dead in bed at the Hotel Rennard in that city. He left New York Sunday afternoon, intending to visit the cities of Philadelphia, Baltimore and Washington, and at that time, while not seriously ill, complained

THE LATE ROBERT Z. BLOCK.

about not feeling very well. He stayed two days in Philadelphia and then went on to Baltimore, where he was found dead last Wednesday morning.

The business of which Robert Z. Block was the head was begun in July, 1906, by Mr. Block and Emil Albrecht. The New York office was in the Jewelers' Safety Deposit Rooms, 170 Broadway, and the factory at 38 Crawford St., Newark, N. J.

Mr. Block was born at Cape Girardeau, Mo., in 1842, where he spent his early life. Coming east, he entered the employ of Larter, Elcox & Co. as a traveling salesman. Later he was with other firms, and about 28 years ago started in business with Mr. Bergfels, in Newark, under the firm style of Block & Bergfels, which business was continued for 23 years, after which he retired, but being ill at ease when not busy, he formed the partnership with Mr. Albrecht, with which concern he was connected at the time of his death.

The deceased is survived by a widow, two sons and a daughter. The interment was in Greenwood Cemetery, the officiating clergyman being Dr. Roache, pastor of St. Mark's Church, Brooklyn, who was an old-time friend of Mr. Block.

Mr. Block was well known and highly esteemed in the trade, and his many friends regret his sudden passing.

### Missing Confidential Clerk of New York Jeweler, Suspected of Stealing a Large Quantity of Jewelry, Arrested in Jersey City.

Stories published in the daily papers in New York and other cities, last week, to the effect that jewelry valued at from \$25,000 to \$50,000 had recently been stolen by a trusted friend and employe from the store of Oliver M. Farrand, 3 Maiden Lane, New York, were greatly exaggerated, and, according to the statement of Mr. Farrand himself in many cases, come a long way from stating the conditions as they really exist. The facts on which the story is hinged have been known by a few dealers in the Maiden Lane district for three months, and the report in the daily papers relative to the matter has caused considerable comment.

While the exact value of the missing goods has not as yet been definitely ascertained, Mr. Farrand says that his loss will, all probability, not exceed \$5,000. The man who is suspected of the crime has not yet been found. He was connected with the business for a long period of time, and was highly esteemed by his employer. He was out of the city on a vacation when suspicion was first aroused by the missing of several expensive articles of jewelry. At first it was thought that when he returned he could tell where the missing articles were kept, and Mr. Farrand having implicit confidence in his integrity, did not worry.

The following statement, given out to a CIRCULAR-WEEKLY reporter by Mr. Farrand, explains the situation: "After my salesman started away on his vacation in July, there were some articles missing, but I did not suspect that he was dishonest until I received a letter in answer to one I had written to a hotel proprietor at the Delaware Water Gap, with whom he was spending his vacation, telling me that the man was not there. I had brought him up from a little boy, 15 years of age, and made him a beneficiary to quite a large amount in my will. The loss of confidence and the shock which I have sustained is greater to me than the value of the goods lost. When he did not come back, I made inquiry and could not find where he had gone. He left on July 3 for a two weeks' vacation and when he did not return, I began to worry. I cannot account for his strange action. I was paying him a salary of \$50 a week, which was \$25 more than his real value to me, but I willingly paid the extra \$25 because of the absolute confidence I had in the man. He started with me as a boy at \$2.50 a week.

"The amount of the loss I cannot estimate exactly, but think that it is about \$5,000, of which amount \$3,000 is in diamond rings. I have sworn out no warrant for the man, nor have I taken any official action, and I am deeply grieved that the newspapers have given such unwarranted and unauthentic publicity to the matter. After I began missing the jewelry, I came to my store on July 4, together with my wife, and we went over the stock and made up a partial list of the missing goods.

"When I became suspicious I consulted my stenographer. Let me say here that she has since been dismissed by me for im-

pertinence, but not in connection with the matter of the clerk's disappearance.

"The young woman told me that the clerk in question had 18 rings, which I questioned her about. She had charge of the ring stock, and she had these 18 missing ones checked up as being in stock.

"I have found out," the jeweler continued, "that the clerk made several purchases of silverware and novelties in Maiden Lane and charged them to me."

Among the missing articles of jewelry are nine single stone diamond rings, valued at \$1,415; one three-stone ring, valued at \$190; five cluster diamond rings, valued at \$1,348, and other rings containing diamonds and other precious stones, valued at \$319.

JERSEY CITY, Oct. 6.—Herman Marschner, the trusted clerk of Oliver M. Farrand, 3 Maiden Lane, New York, who left New York on a vacation trip on July 3, after which it was discovered that a considerable quantity of valuable diamond jewelry was missing, was caught, last night, by Lieutenant Monahan, the Maiden Lane plain clothes detective, and turned over to the city police. He was taken to New York this morning and held for examination. He confessed to the theft, and says he has disposed of the jewelry and spent the money on a woman.

Mr. Farrand, in speaking to a CIRCULAR-WEEKLY reporter, said that he felt all the time that the man would not go far from New York, and for that reason wished to keep the matter quiet. With tears in his eyes he said: "You don't know how badly this matter makes me feel, or how I hate to prosecute the man, but I most surely will prosecute him. I must, even though I hate to do so badly. I hate to think of the misery it will cause his poor old mother and family, but there is no other course open to me."

The jeweler worked quietly, and when he had learned about the salesman's whereabouts instructed the detective, who went to Jersey City and rented a room near the place where Marschner was staying, at 294 8th St., and at an opportune time captured him.

### Death of Peter Lamprecht.

GRAFTON, W. Va., Oct. 1.—Shortly after noon yesterday Peter Lamprecht, one of Grafton's grand old men, passed away. Mr. Lamprecht was born in Wurtemberg, Germany, Feb. 7, 1830, so that he was in his 78th year at the time of his death. He came to America at the age of 18, and followed his occupation of jeweler.

A writer of rare ability, an extensive reader, a linguist of many tongues, a student of history, his advice was sought by many and his passing will cause profound and genuine regret by the entire community.

He is survived by a widow, one daughter, Mrs. Frank Rauscher, and one son, Harry Lamprecht.

Joseph E. Ruffing, Delphi, Ind., has the sympathy of his many friends in the trade owing to the death of his son, Arthur, who was killed, recently, by an electric shock in the Delphi station of the Fort Wayne & Wabash Trolley Traction Co.

### Montgomery, Ala., Jeweler Causes Arrest of Man Who Offered Worthless Check.

The Jewelers Security Alliance of New York received a telegram, Monday morning, from Jesse Davidson, 17 Commerce St., Montgomery, Ala., stating that a man giving the name of C. H. Pope, alias Oxford, had been arrested in that city for passing worthless checks.

The man arrested by the Alabama jeweler went to Mr. Davidson's store, Friday night, and tried to buy a Commandery ring set with diamonds, representing himself as a "Shriner." After looking over the rings the man said he would call again in the morning. The following morning about 9 o'clock he again visited the store and selected a diamond solitaire, a gold watch and chain, a Knight Templar's charm and a 32d degree Masonic ring, the total value of the jewelry being \$468.75. He picked out the mountings he desired and said he would call at 1 o'clock.

The jeweler reports that in the meantime the prospective customer drew a bogus draft on a National bank and deposited it in a local bank in Montgomery, claiming that he had \$1,000, the amount of the draft, to his credit in a bank at Nashville, Tenn. The jeweler learned of the deposit of the draft with the local bank, and ascertained that no such man was known at the Nashville bank.

The stranger called for his goods and presented a check for the \$464.75, which the jeweler accepted, but did not deliver the goods. The man was arrested and held on suspicion at police headquarters.

The Jewelers Security Alliance warns the trade against the acceptance of checks from men unless they are known to the dealer, and asks if anyone has knowledge of the man now under arrest to communicate with Mr. Davidson.

### Adolph Bottstein Files a Voluntary Petition in Bankruptcy in New York.

A petition in bankruptcy was filed in the United States District Court, New York, Oct. 2, by Adolph Bottstein, a jeweler at 623 Eighth Ave., New York, and his schedules show liabilities of \$5,004 and assets of \$1,301, consisting of stock in trade \$1,000 and machinery \$300.

Among the unsecured creditors are: E. & J. Bass, \$175; R. L. & M. Friedlander, \$151; Julius Freudenheim & Son, \$183; Laubheim Bros., \$396; L. S. Meyer & Bro., \$353; H. J. Meyers, \$421; Jules Racine & Co., \$141; William H. Terhune, \$135; De Feo Bros., \$245; John D. Roche, \$566; Seamon Danziger, \$211; Louise B. Bottstein, \$400; Augusta Bottstein, \$600.

Judge Holt has appointed Elihu Root, Jr., receiver under a bond of \$1,000.

Sol. J. Freudenheim is the attorney for the petitioner.

Mr. Bottstein began business about 30 years ago. He failed in 1876 and settled at 25 cents on the dollar. He afterwards took M. Abraham into partnership under the style of A. Bottstein & Co., and they opened a branch in Brooklyn. This firm continued until January, 1882, when Abraham retired and took the Brooklyn store and Bottstein continued alone in New York.

## News Gleanings.

John L. Hastings, Sheridan, Ind., has removed to Cato, N. Y.

Ozias D. Johnson, Wenatchee, Wash., has succeeded by Frank L. Jones.

Burglars recently stole \$100 worth of jewelry from the show window of Haviland & Hilkins, Mechanicville, N. Y.

Harry S. Palmer has completed arrangements to open an attractively furnished store at 14 State St., Seneca Falls, N. Y.

Morgan D. Wise, Rockford, Ill., will shortly move into larger and newly furnished quarters at State and Wyman Sts.

Burglars recently entered the store of Ralph C. Cotton, Table Rock, Nebr., and stole rings, fobs and bracelets worth \$125.

The business of W. A. Simpson & Co., Landreau, S. Dak., will hereafter be conducted under the style of Simpson & Gebart.

S. Joseph & Sons, Des Moines, Ia., are about to enlarge their store at 1th and Walnut Sts. by the addition of an adjoining room.

T. W. Kibbee has bought an interest in the drug store of H. L. Haussaman & Co., Grafton, N. Dak. He will add a jewelry department.

D. A. Douglas, a short time ago, found pearl weighing 34 grains in Sugar River, near Broadhead, Wis., for which he received \$2,000.

A pearl weighing 67 grains was recently displayed in the show window in the store of J. C. Mahon, Aurora, Ill. Owing to its peculiar shape and one bad spot it is not of great value.

Two women and a man who recently entered the jewelry store of N. C. Hall, Fort Worth, Tex., purloined a diamond ring worth \$150 and substituted in its stead a ring containing a piece of glass.

Burglars recently broke the show window in the store of A. E. Palmer, Grand Forks, N. Dak., and escaped with about \$600 worth of jewelry, including rings set with sapphires, a silver chest and a number of bracelets.

The Jewelers' Mutual Fire Insurance Co., of Wisconsin, will write its first policy, Nov. 15. Application for insurance aggregating \$97,000 have been received, being within \$3,000 of the minimum required to secure a charter.

A gavel trimmed with silver, which was made for the local lodge of Eagles, to be used at the dedication of their new building in Camden, N. J., was exhibited in the store of A. F. J. Dorn, 834 Market St., that city. The wood contained in the gavel was taken from the old schoolship *Constitution*.

Burglars, on Monday of last week, broke into the jewelry store of George L. Palmer, Mansfield, Pa., and escaped with three watches, several fountain pens, half a dozen chains and a small amount of cash. Entrance was gained to the store by prying open a rear door. There is no clue.

An effort is again being made by the citizens of the State of Mississippi to raise the fund to present the battleship *Mississippi* with a silver service. The amount which the committee are endeavoring to collect is \$7,500, and the matter is in the hands of Chairman E. F. Noel, Dunbar Rowland, and Mrs. Eunice Lockwood, of Lockwood

Springs, to whom subscriptions are requested to be sent.

An attempt was recently made to rob the show window in T. J. Varhaben & Bro.'s store, in New Orleans, La., by burglars who smashed the plate glass with an iron spike. A policeman who appeared on the scene evidently scared away the thieves, for several hundred dollars' worth of watches and jewelry were in the window and nothing was taken.

At the recent International Fisheries Congress at Washington, D. C., the award of \$100 in gold made by the National Academy of Science for the most practical contribution read at the congress was given to John I. Solomon for his paper on "A Process for Preserving Pearl Oyster Fisheries, and for Increasing the Value of the Yield of Pearl Therefrom."

An apprentice named Bai Amerigo, in the employ of Jacob Glick, 213 E. Weber Ave., Stockton, Cal., was severely burned during an explosion of benzine, which occurred one morning recently in the rear of the establishment. The apprentice had accidentally knocked from a shelf a bottle of benzine. The room was very dark and the boy thoughtlessly struck a match to see what had fallen. Mr. Glick's hands were also severely burned in attempting to aid his young assistant, who was taken to the Emergency Hospital.

Chas. E. Dickinson, Garden City, Kans., recently captured a burglar who had broken into his store and was about to make off with a lot of valuable stock. After the man's capture Mr. Dickinson found in his possession two watch movements, five gold automatic spectacle holders, one horsehair silver mounted watch fob, one belt buckle, a turquoise matrix ring and a plain gold band ring. The prisoner gave his name as Charles S. Ulrey and said he resided in Kansas City. Ulrey was haled before Justice Folsom for a hearing and then sent back to the local jail.

R. E. Goodnough, Gouverneur, N. Y., had a narrow escape from death while hunting deer recently. He received a gunshot wound in one of his little fingers, which shattered the bone and made it necessary to amputate it at the second joint. Mr. Goodnough laid his gun against a tree and was starting for a buck which had been shot, when his guide picked up the gun and it accidentally went off, striking the jeweler. Mr. Goodnough had to walk 12 miles before he could get a conveyance to take him to Colton, where the wound was dressed. He was then taken to Ogdensburg, where the finger was amputated.

### Death of Charles H. Ankeny.

LAFAYETTE, Ind., Oct. 4.—Charles Howard Ankeny, leading jeweler of this city, died suddenly at his home on South St., at noon, yesterday. He had been in fair health and was not known to have been suffering from any complaint, so that when his lifeless body was discovered in his room the shock almost prostrated his family and friends.

Mr. Ankeny was born in Washington, O., and had been identified with the business life of this city since 1874. A full sketch of his career will appear in the next issue of THE CIRCULAR—WEEKLY.

E. C. Smith will soon commence business in Fresno, Cal.

Houser & Updegraff have started in business at Columbus, Ind.

F. S. Kreyer will shortly open a jewelry store in Haskell, Okla.

Ralph Weil has opened a retail store at 366 Fifth Ave., New York.

W. A. Kirkpatrick has begun business at Spirit Lake, Ia., as a retail jeweler.

A new jeweler in Gary, Ind., is Isador Kleinman, who recently began business.

W. A. Todd, Jr., has just engaged in business at 4107 Easton Ave., St. Louis, Mo.

T. Hayes and William Beck will soon engage in business in Kelso, Wash., as partners.

E. F. Randolph, Williamson, W. Va., contemplates opening a store in Bluefield, W. Va.

A. Shafer recently started in the retail jewelry business at 146 Madison St., Chicago, Ill.

A. N. Sherck, formerly with George Bashill, Marlette, Mich., has opened a store at Capac, Mich.

The Collins Jewelry Store has been opened for business in the Briggs block, Needles, Cal.

A retail jewelry store has been opened at 2735 Vendevanter Ave., St. Louis, Mo., by the Edward S. Hiles Co.

The Imperial Jewelry Co. is the name of a new concern in Detroit, Mich. The firm is located at 51 Gratiot Ave.

H. C. Lederer and Dr. Charles Curtis, Los Angeles, Cal., will shortly open an optical business in San Luis Obispo, Cal.

A new retail jewelry establishment has just been opened in Luling, Tex., by Mrs. S. C. Doehring, formerly of Houston, Tex.

Philip T. Hoefler, formerly with George H. Curry, Los Angeles, Cal., has opened a store on his own account at 501 W. 7th St., in the same place.

The Marott Department Store Co. has opened a large store on Massachusetts Ave., Indianapolis, Ind. The jewelry department will be in charge of F. N. Cobb.

Charles H. Ballou & Co. have started in the manufacturing jewelry business at 289 Thurber's Ave., Providence, R. I., where they will make a line of plated bead necklaces.

P. C. Tryner last week opened a store in attractively furnished quarters at 12 E. Main St., Galesburg, Ill. Mr. Tryner was formerly a watchmaker for the Wilbur Lamphear Co., of that place.

Samuel S. Prentiss, Shingle House, Pa., has moved to Lockport, N. Y.

Fleming Bros., Laurens, S. C., are putting in a cement floor and making other extensive improvements in their store.

# GORHAM LEATHER GOODS

## ATTRACTIVE NOVELTIES FOR THE HOLIDAY SEASON

¶ It is realized by the Jewelry Trade in general, that Gorham Manufactures of Leather have attained as convincing a reputation in the estimation of the public as Gorham Silverware.

¶ This is due to the absolute integrity of their workmanship, the unsurpassed quality of their material, and the individuality of the style and appearance.

¶ Special attention may be directed to such attractive holiday goods as the Men's and Women's Traveling Bags and Suit Cases, without fittings and completely fitted with Toilet and Traveling conveniences in gold, silver, turtle, ebony, ivory and tortoise shell; to the compact Manicure Cases and the Safety Razor combinations; to the Shopping Bags, Pocket Books, Card and Cigarette Cases in all the staple Leathers as well as in many exclusively controlled novelties.

THE payment last week of a dividend of 42 per cent. to the creditors of a Duluth, Minn., retail jeweler, again calls attention to what creditors can do when they act together under the bankruptcy law. In January last the jeweler made an offer to his creditors of 25 per cent., of which 15 per cent. was in cash and the remainder in undorsed notes. It developed later that he had arranged with a Chicago creditor to pay the latter in full and also pay his attorney a large sum to have this offer accepted. When the offer was placed before the Jewelers Board of Trade it was immediately rejected. He was put into bankruptcy, and though the assets had all to be sold last April at a most inopportune time and realized only 47 1/4 per cent. of the inventory price, \$11,000 was obtained by the trustee. The trustee also compelled a local bank to turn over \$2,000 worth of jewelry which it obtained as a security on a loan, and brought suit to recover from a Chicago creditor \$1,540 given as a preference, and also another suit to recover from an attorney \$1,400 given by the bankrupt, which it was claimed was an exorbitant fee. The trustee has now been enabled to pay creditors 42 per cent. in place of the 25 per cent. offered by the debtor, of which 10 per cent. was not secured, and in addition has paid all the fees of the bankruptcy proceedings.

**The 400th Anniversary of Wenzel Jamnitzer's Birth.**

ONE of Germany's most noted goldsmiths, and one to whom the development of the arts of the jewelry trade was in great part due, was Wenzel Jamnitzer. In fact, it is almost impossible to think of the artistic creations of the precious metals produced among the Germans without bringing to mind the names of the two great masters, Dillinger and Jamnitzer. As the 400th anniversary of Jamnitzer's birth occurs this year, and the occasion is being celebrated in one way or another among the jewelers of Germany, it is but fitting, even in these days when business, in the rapid pace which it has assumed, has almost divorced itself from precedent and tradition as well as art, to put before the followers of the craft to-day some facts about one of the men who raised the art of the jeweler to the supreme position it held, and obtained for it the recognition which it had 400 years ago.

Jamnitzer, who was a descendent of a family of noted goldsmiths, was born in Vienna (not Nurnberg, as has often been stated) in 1508, and in 1534 was made a master in Nurnberg. He was elected nominee for the Supreme Council of that city in 1556, and became a member of the Council in 1574. Although by no means a man of obscure birth, it was his wonderful work as an artist which obtained for him the friendship of kings, dukes and potentates, and it is this work that has left a reputation which has increased instead of diminished as the centuries have gone by. Jamnitzer, it might be recalled, was the goldsmith of four emperors of the Holy Roman Empire, Charles V., Ferdinand I., Maximilian II., Rudolph II., holding this position from 1519 until his death, Dec. 15, 1585.

That the jewelers of this country may become a little more familiar with the life

During September 1908 THE JEWELERS' CIRCULAR-WEEKLY published 470 pages of advertising, greatly exceeding all its previous September records, and over three times as much as any other jewelry paper ever published in September.

and works of this man, THE CIRCULAR-WEEKLY will in an early issue publish a brief history of his career with illustrations and descriptions of some of his important works in gold and silverware, many of which have been illustrated in our journal from time to time in the years gone by.

**Gem Imports Again Normal.**

THE statistics of the importations for the precious stones and pearls for the Port of New York for the month of September are indeed encouraging, indicating as they do, an increase of about \$665,000 over the figures for the month of September and coming within about \$500,000 of the total for September of the previous year. In all the importations of gems amounted to \$1,912,402.74, and they are the first monthly figures of the year that in any way approach the \$2,000,000 mark. Of this, the value of the cut precious stones and pearls amounted to \$1,731,098.38, which is about \$750,000 more than the figures of the previous month, and the uncut precious stones, principally diamonds, amounted to \$181,304.36 as against \$280,211 brought in the previous month. Another fact worthy of comment to be found in these figures is that the value of the cut precious stones and pearls is in excess of the amount brought in in September, 1907, when \$1,679,428 was imported, the excess of September, last year, over this, being in the uncut precious stones, \$790,169 being imported during that month in 1907.

With figures reaching to nearly \$2,000,000 for the month it is but fair to consider that the importations of precious stones are again back to normal conditions, at least as far as the cut stones are concerned. It is this condition that has been reflected in the optimistic reports that are being published in the daily paper from the diamond centers of London, Antwerp, Amsterdam and Paris, and it helps to emphasize the important part the American market plays in the diamond trade of the world.

**Jewelers' Gold Bars Withdrawn and Exchanged at New York.**

Week Ended Oct. 3, 1908.

The U. S. Assay Office reports:

Gold bars exchanged for gold coin.....	\$432,776.94
Gold bars paid depositors.....	64,690.73
Total.....	\$497,467.67

Of this the gold bars exchanged for gold coin are reported as follows:

Sept. 28.....	\$72,445.81
" 29.....	99,296.92
" 30.....	71,518.58
Oct. 1.....	92,740.06
" 2.....	40,722.42
" 3.....	56,053.15
Total.....	\$432,776.94

*Good  
Gold  
Jewelry*

*It's the  
only kind  
we make*

A RATHER COMMONPLACE DECLARATION, WE'LL AGREE, BUT WE MAKE IT WITH AN INSPIRING REVERENCE FOR THAT MUCH-ABUSED WORD "GOOD." OUR JEWELRY IS GOOD ALL OVER—GOOD THROUGH AND THROUGH. IT ISN'T ALONE SUPERFICIALLY IMPRESSIVE, IT GOES BEYOND THAT, SUPPORTING ITS VISIBLE DIGNITY WITH MATERIAL QUALITIES THAT MAKE IT MOST ENDURING. FURTHERMORE, LIKE EVERYTHING IMPRESSIVE, IT HAS A PERSONALITY—CHARACTERISTICS THAT EASILY HELP IDENTIFY IT AS A KIRBY PRODUCT. ASK TO SEE THE KIRBY LINE BEARING THE ABOVE TRADE-MARK.

### Boston.

Joseph Cowan returned, last week, from an extended western business trip.

Elinson & Weinstein, 66 Hanover St. are enlarging their manufacturing quarters.

Francis R. Appleton, of New York, was at the Boston office of Robbins, Appleton Co., last week.

John B. Humphrey has closed his Summer place at West Gloucester and returned to his city residence.

M. J. Graham, formerly on the seven floor, Washington building, has removed to room 807, on the floor above.

Myer Prussian, formerly with A. Hirshberg, has started in business, occupying a portion of room 609, Jewelers' building.

Vice-President William B. Garfield, of the New England Watchmakers' Club, is on his annual hunting trip at his camp, Wagon's Mills, Me.

Buyers in town during the week included: F. W. Perry, Lewiston, Me.; J. Sumner, Middleboro, Mass.; Eugene LaBerte, Nashua, N. H.

William R. Donovan, one of the best known manufacturing opticians in the trade, long located in Providence, Conn., has taken quarters at 5 Bromfield St.

George E. Homer, the Winter St. jeweler, has a jewelry booth at the Boston Food Fair, now being held in the Providence Railroad Station in Park Sq.

Edward E. Hardy, George E. Homer, S. Hirshberg and Elmer E. Knight have gone to Detroit on the annual Fall outing of the Ancient and Honorable Artillery Company.

A reproduction of an old engraving of the old State House in 1835, published recently by the Boston Budget, also shows the store of John Bigelow, founder of Bigelow, Kennard & Co.

James Cameron, of Temple St. was arrested, Friday, while trying to sell jewelry to passersby on Green St. He was offering diamond earrings worth about \$500, \$3, and had also two brooches and a ring valued at \$75. The latter he was offering at \$12. In the Municipal Court he was fined in \$1,000 bonds for the Grand Jury.

Bela L. Pratt has modeled a medal to commemorate the 100th anniversary of the Roman Catholic diocese of Boston, which occurs this Fall. The obverse bears a faithful profile portrait of Archbishop O'Connell. Beneath the likeness is the date 1908 in Roman numerals, and, forming the border, in Roman capital letters is the inscription: "Gulielmus Archiepiscopus Bostoniensis."

Philbrick & Webster Co., Inc., a new wholesale optical concern, has taken room 47, Jewelers' building. Charles H. Philbrick, treasurer, comes from Tilton, N. H. where he has paid especial attention to developing an improved 9-D curve toric lens. Llewellyn A. Webster, president, was formerly with C. N. Quimby, and has been for the past 11 years identified with the wholesale optical trade in Boston.

C. H. Coles, Sandwich, Ill., has sold his business and moved to Gainesville, Fla., where he has opened an attractively furnished store under the name of C. H. Coles & Son.

## New York Notes.

Ralph Weil has opened a retail store at 3 Fifth Ave.

Oscar T. Smith, Lancaster, Pa., is visiting relatives in town.

Jules Franklin, 65 Nassau St., is at present on the Pacific Coast.

John Kramer is on a western trip for the John T. Mauran Mfg. Co., Providence, R. I.

Ike Price, with Louis Strassburger's Sons Co., 170 Broadway, is in Denver because of his health.

Fred Hull, Saranac Lake, N. Y., was a caller at the office of THE JEWELERS' CIRCULAR—WEEKLY Saturday last.

G. A. Simmons, of the B. S. Freeman Co., Attleboro Falls, Mass., was a visitor in New York last week.

James Myers has removed from 11 Garden St. to 16 Washington St., opposite the Columbus Institute, Poughkeepsie.

George Dorchester, head of the W. E. Richards Co., Attleboro, returned to this city last week from a western business trip.

George H. Marchen, of the Pacific Gem Co., Los Angeles, Cal., was among the out-town jewelers here during the past week.

Max Freund, accompanied by his wife, returned recently on the steamship *Kaiser Wilhelm II.*, after a 19 months' sojourn abroad.

R. Van Keuren, senior member of R. Van Keuren & Co., Savannah, Ga., has returned to his home after spending a vacation in his city.

A. S. Kurtz, who was formerly employed in Boston, has opened offices at 66 Nassau St., and will conduct a diamond cutting business.

J. B. McDonald, representing the Wolcott Mfg. Co., Providence, R. I., spent Saturday in the city, after having finished a most successful southern trip.

J. J. Scanlon, who was formerly connected with several well-known firms in this city, has succeeded J. Schleisman, and will continue the business at 66 Nassau St. as an engraver.

Two large clocks are to be placed in the center of an ornamental bridge that is to be built to connect the new 14-story Wanamaker store and the old A. T. Stewart store at 9th St.

M. A. Mead, of M. A. Mead & Co., New York, Chicago and Pittsburg, has been at the New York office of the concern, 15 Maiden Lane, for the past week, and will remain here for some days.

Benedict Koch, an employe in the factory of the Charles S. Platt Co., gold assayers and refiners, 31 Gold St., dropped dead while at work last Wednesday morning. Death was caused by heart disease.

The Leather Goods Specialty Co. has been incorporated to manufacture silverware, leather goods, cutlery, etc., with a capital of \$50,000. The incorporators are: V. E. Morgan, M. C. Morgan, West Chester, and R. B. Alderof, Jr., of New York.

Lieut. E. F. Stringer, a plain clothes detective, has been detailed in the Maiden Lane district, and will work in conjunction with Lieutenant Monahan. Mr. Stringer has been for a number of years stationed in the Wall St. district. Adolph Blaha, who was for a short time assisting Mr.

Monahan, has been returned to headquarters.

J. B. Haskin, manufacturer and importer of black jewelry, has moved from 114 E. 14th St. to 170 Broadway, where he occupies a suite of three rooms on the seventh floor. Mr. Haskin is the successor of C. P. Granberry, and was formerly in the employ of the T. I. Smith Co. Before he moved uptown he was located at 5 and 7 Maiden Lane.

The Brooklyn Heights Seminary, 18 Pierrepont St., Brooklyn, which began its 58th year last week, has added a course which includes hammering, etching, cutting, chasing on copper, silver and gold, setting of semi-precious stones, and the artistic coloring of metals. Graduate students may be received in this course and a Saturday morning class will probably be arranged.

Moses and Aaron Anzelowitz, who have been doing business under the firm style of Anzelowitz Bros., at 125 Canal St., against whom a petition in bankruptcy was filed in August, have filed a petition dated Oct. 1, praying for a confirmation of a composition in bankruptcy, and creditors have been notified to attend a hearing in the United States Court, on Monday, Oct. 12, at 12.30 o'clock to act upon this.

According to the regular monthly statement of the Bureau of Statistics at the Customs House, giving the value of merchandise remaining in bond at this port for the month of August, 1908, as compared with August, 1907, clocks for the month of August, 1908, are given at \$19,143 as compared with \$33,347 last year; watches at \$143,258 as compared with \$143,953; diamonds, unset, \$60,107, with August, 1907, at \$56,570; precious stones, \$37,943, as compared with \$41,356 for the same time last year.

Jacob Strauss & Sons, importers of diamonds, 14 Maiden Lane, have adopted a safeguard in delivering articles to their customers which may be of interest to other firms who wish to follow their example. They have had printed cards which are to be signed by the customer to whom the goods are delivered, either by traveler, agent or other employe, by which the purchaser acknowledges that he has received the merchandise purchased at a specific rate, for a specific amount. This acts as a safeguard in case of the death of the purchaser or the employe, or a loss of memorandum of sale by either.

A decision handed down last week by General Appraiser Sharretts, of the United States Board of Appraisers, holds that "gold stones" composed in chief value of paste and glass less than an inch in diameter are dutiable at the rate of 20 per cent. The issue came before the board in the form of a protest filed by Albert Lorsch & Co., who objected to the action of the government in levying 60 per cent duty. After a consideration of the evidence, General Appraiser Sharretts, who writes the decisions for the board, concluded that the stones were not dutiable as jewelry, but should be admitted at 20 per cent. The protest is sustained on the authority of former decisions.

Dividends have been distributed in the last week by the Jewelers Board of Trade to the creditors of the following concerns:

J. Gruesen, Duluth, Minn., to whom were paid a first and final dividend of 42 per cent.; A. C. Bloor, Shawnee, Okla., to whom were paid a second and final dividend of 7½ per cent. (a previous dividend of 10 per cent. having been paid); B. Kahn & Bros., Baltimore, Md., who received 40 per cent. as a composition, 12½ in cash and the remainder in notes; A. W. Susan, El Paso, Tex., to whose creditors were paid a third dividend of 15 per cent., the estate having previously paid 30 per cent. The creditors of F. A. Anderson, Pittsburg, Pa., also received a first and final dividend of 20.26 per cent.

A story in the Indianapolis (Ind.) newspapers last week told of the sensation in police circles caused by the loss of a trunk containing a quantity of valuable jewelry by Arthur L. Sinclair, a New York traveling man, who is in the employ of F. Baumeister, 1181 Broadway. Sinclair went to the Union Station to take a C. H. & D. train to Toledo. After he had taken his seat in the car he went out to see about his trunk. It was not in the baggage car or baggage room, where he had checked it 15 minutes before. After delaying the train a short time Sinclair remained to look into the mystery. It was finally discovered that the trunk had been put aboard the wrong train. It was later discovered.

In a decision by the Board of United States General Appraisers, handed down last week, it was held that bronze statues which are cast in foundries by artisans from models made by artists cannot be regarded as statuary for the purpose of duty. B. Altman & Co., of this city, the importers, claimed that the statuary in question came within the provision of Par. 454 providing for statuary. When testimony was taken in the case it appeared that the original work of forming the statue was performed by a sculptor of recognized merit, and that the completion of the statue was left to artisans. The government declined the request to enter the goods as statuary with a duty of 20 per cent., and alleged that the merchandise should be assessed at the rate of 45 per cent. under the tariff division for "manufactures of metal." Judge Waite, who writes the decision for the Board of Appraisers, sustains the contention of the government.

James Nolan, a gas fitter, went into Nathan Selkowitz's store, 419½ Sixth Ave., last Thursday night, and asked to see a \$25 engagement ring. As soon as the tray was produced Nolan snatched seven rings, it is alleged, and dashed out. The jeweler followed, but was knocked down. A clerk in the employ of the jeweler was also tripped up and the fugitive rushed at top speed around the corner of 29th St. with a crowd at his heels. He was seen to dart into a building by two policemen, who gave chase after him up four flights of stairs to the roof, where he was cornered and captured. He handed over four of the rings, the police say, the rest having been dropped in the chase. At the station house Nolan told a pitiful story about his old mother, whom he said was sick at 324 1st St., Albany. He said that he came to this city three months ago as a gas fitter and lost his job and wanted

(Continued from page 85.)

money so badly to send home that he took the diamonds. For several weeks, he said, he had been sleeping in hallways, half-dressed.

N. Gamse, 54 Maiden Lane, is in San Francisco this week.

S. E. Theus, of Theus & Co., Savannah, Ga., was a recent visitor in town.

A. Peabody, a former resident of this city, is soon to open a store in Chicago.

R. G. Mass, of the firm of A. A. Spiegel Co., Cincinnati, is in town this week.

Frank Daughaday, Attleboro, Mass., visited friends in the Maiden Lane district last week.

Benjamin Lederer, of the S. & B. Lederer Co., Providence, R. I., was in the local office of the concern last week.

Mr. Lowell, of Lowell & Darrow, Binghamton, N. Y., was a caller in the Maiden Lane district during the past week.

W. S. Metcalf, senior member of the Plainville Stock Co., Plainville, Mass., was in the Maiden Lane district, Monday.

Staiger & Sons, diamond importers and manufacturing jewelers, 926 Broadway, have leased a suite of offices at 170 Broadway.

Everett Ward, buyer for N. H. White & Co., 21 Maiden Lane, who has been ill for some time past, has returned to his duties.

Chester Howard, who has been in charge of the office of W. E. Richards Co., for the past three weeks, has returned to his home in Attleboro.

Andrew Flagg, representing a new North Attleboro manufacturing company, the A. C. Lindroth Co., called on New York trade during last week.

F. W. Duesterwald has leased a spacious store at 1114 Cortelyou Road, Flatbush, Brooklyn, which he will fit up as an up-to-date jewelry store. He will be known as the Flatbush jeweler.

The firm of Stern & Corn, importers of diamonds and jobbers in watches and jewelry, 71 Nassau St., has been dissolved by mutual consent and is now under the sole ownership of Robert Corn.

An article, entitled "Fraud and Deception in Precious Stones," written by Dr. George F. Kunz, head of the precious stone department of Tiffany & Co., appeared in a recent issue of the *Saturday Evening Post*.

The firm of Herman Kohlbusch, Sr., Jersey City, has been incorporated with a capital of \$25,000. The incorporators are: Edmond M. Ferrett, C. F. Edsall and Benjamin Ferrett. The concern will manufacture balances, scales, weights, etc.

A costly silver loving cup which was presented to Lawrence F. Carroll, chief clerk of the Manhattan Ave. Police Court, Brooklyn, by the members of the Lawrence F. Carroll Euchre Club, at the annual outing of that club, was turned out by Louis Staudenbauer, the Grand St. jeweler.

In a note printed in last week's issue of THE CIRCULAR-WEEKLY, relative to the death of Louis Dejonge, of L. Dejonge & Co., 53 Duane St., it was stated that he leaves a son, Louis Dejonge, who is a member of the jewelry firm. This was an error as Mr. Dejonge is connected with the paper business.

George Stadtmuller, of Jacob Stadtmuller's Sons, 1179 Broadway, Brooklyn, has the sympathy of his many friends in the trade owing to the death of his five-year-old daughter at the German Hospital, Saturday night. Death was due to lockjaw, caused by inflammation which followed vaccination.

Wm. F. Ackerman, secretary of the Jewelers' Taft and Sherman Club, has sent out postal cards to every concern doing business in the Maiden Lane district, making inquiry as to how many employers will participate in the business men's parade, which will be held Oct. 31. Reports received thus far indicate that a large showing will be made by the jewelry trade.

Treasury Department regulations of February 11, 1901, establishing a rate for the allowance of drawback on watchmen's clocks manufactured from imported materials, have been extended, as far as applicable, to cover the exportation of portable watchmen's clocks and keys manufactured by E. O. Hansburg, of this city, with the use of imported works, metal cases and key blanks in combination with domestic material, in accordance with the manufacturer's sworn statement, filed with the Collector of Customs here.

E. J. Hertz, a Philadelphia, Pa., jeweler, has reported to the Jewelers Security Alliance, in this city, that a man who was for a number of years employed as an engraver by the old firm of Hamilton & Diesinger, and later by John Wanamaker and the Bailey, Banks & Biddle Co., has lately obtained from a number of Philadelphia jewelers, including Mr. Herz, diamonds to the value of \$1,500 on memorandum under the pretense of having a customer for them. Mr. Herz writes that the man has gone west without making payment, and is probably seeking employment as an engraver in some large house.

The Oliver M. Farrand Co. has been incorporated under the laws of New York State to manufacture and deal in jewelry, with a capital of \$25,000. The incorporators are: O. M. Farrand, 3 Maiden Lane, and Wm. Barthman and Wm. Barthman, Jr., 1 Maiden Lane. In speaking of the incorporation to a CIRCULAR-WEEKLY reporter, Mr. Farrand said that he was the president of the company, and that the business had been incorporated to facilitate the handling of it. He said he was getting tired of such close confinement and wished to have more leisure and time for rest, and for that reason the business had been made into a stock company.

Julius Goldsmith, a broker in diamonds at 2 W. 38th St., died, Sept. 24, at his home, 203 W. 102d St., from heart trouble. Mr. Goldsmith was an old-time jeweler and was for a long period of time employed as traveling salesman by several well known concerns in this city. He was born at Darmstadt, Germany, 58 years ago, and spent his early life there. He served in the German army and later came to New York and has since been in the jewelry business. He was well known by a large number of jewelers throughout the country, who learned with regret of his death. He was a member of the Jewelers' League, of the Adelphi Lodge, F. and A. M. and the Manhattan Lodge. Deceased is survived by a widow. The fu-

neral was held from his late home, Saturday, Sept. 27.

Charged with smashing a window and making off with a quantity of valuable jewelry, Edward J. McNulty was arraigned in police headquarters last Wednesday and held for trial. Jacob Saron, a jeweler at 536 Second Ave., who appeared against him, identified four watches and some rings that had been taken from the window. The jeweler also said that three rings, a locket and two diamonds had been stolen, but they were not found in the stuff taken from the prisoner. According to the story told by the jeweler, the prisoner threw a brick through one of his windows and thrust a hand through the hole, grabbing the jewelry. The jeweler ran into the street, yelling; a crowd formed, and the thief was caught after a chase of two blocks.

John D. Northrop, city salesman for Ludwig Nissen & Co., 182 Broadway, while on the top floor of his bungalow on the West Park property at Seabright, N. J., Saturday, heard an explosion, followed by the screams of two women. He rushed downstairs in time to see his wife enveloped in flames. She was beating back her aged mother, Mrs. W. S. Seaman, an invalid, who was trying to aid her daughter. Mr. Northrop grabbed his wife about the waist and ran to the Shrewsbury River and plunged in, dragging her with him. Mr. Northrop succeeded in reaching the shore safely, but his wife was so severely burned that she died Monday morning in the Long Branch Memorial Hospital. The explosion was caused by an alcohol stove. Mr. Northrop has been with the diamond concern for about nine years. Friends in the trade extend their deep sympathy to him in his bereavement. He was also badly burned.

An offer of 62½ cents on the dollar has been accepted by a number of the large creditors of Franklin W. Sackett, wholesale jeweler, 59 Maiden Lane, against whom a petition in bankruptcy was filed a short time ago. This offer was recommended by the committee of creditors appointed to investigate the matter. Payment of the settlement according to the settlement plan is to be made as follows: 25 per cent. by promissory note, payable three months after the bankruptcy proceedings are dismissed; the note to be endorsed by Wm. E. Thorn; 12½ per cent. by promissory note June 1, 1909, endorsed by W. S. Mead; 12½ per cent., payable by note due Oct. 1, 1909, endorsed by Mr. Mead; 12½ per cent., payable by promissory note on the following dates and following amounts: Jan. 15, 1910, two per cent.; April 15, 1910, two per cent.; July 15, 1910, one per cent.; Oct. 15, 1910, one per cent.; Jan. 15, 1911, two per cent.; April 15, 1911, one per cent.; July 15, 1911, one per cent.; Oct. 15, 1911, 2½ per cent. The bankruptcy proceedings will be dismissed if the matter goes through, and it is expected that it will.

Reports in western papers during past week state that Frank Shercliffe, who will be remembered in the trade as the man who, in 1892, robbed William G. Pollack, a jewelry salesman, of diamonds valued at \$18,000 while on a passenger train in the west, is at present at large, having escaped from officers who had him in charge. Sher-

(New York Notes continued on page 89.)

**PATTERNS IN STERLING SILVER**

We invite careful inspection of our line of *Sterling Silver Flatware*. A suggestion of the variety of designs is here given in the Tea and Coffee Spoons shown. The patterns are of careful workmanship and made in substantial weights at a moderate price.

NEW YORK

## New York Notes.

(Continued from page 87.)

Sherliffe was prosecuted at the time of the robbery by the Jewelers' Protective Union of this city. A man named Thomas Dennison, who was later accused of participation in the robbery, but was tried and acquitted. He principal witness against Dennison at the time was Sherliffe, who had been hunted down by the Jewelers' Protective Union and had served a term in prison from 1893 to 1904. He was recently convicted of the murder of Jas. W. Walsh, who was killed 5 years ago, and, while being taken to prison at Canon City, Colo., escaped from the custody of the police officials while the train was in motion. Sherliffe has threatened Dennison with death and his recent escape opens up a new chapter in a long line of criminal history. It was through Dennison that Sherliffe was convicted of the murder which took place about 15 years ago.

Max Katz, 77 Manhattan Ave., Brooklyn, out of business.

Herbert Frankel was arraigned in the Bronx Police Court yesterday morning, charged with obtaining articles on memorandum from Dieges & Clark, 23 John St., and appropriating them to his own use. He was held for examination to-morrow at 2 p. m. The man visited the John St. Jewelers on Sept. 23, presented a card of introduction and selected two watches valued in total at \$110, a locket worth \$8 and a gold heart valued at \$20. The goods were given him on memorandum, but he did not make payment or return the goods. The firm turned the matter over to Detective-Lieutenants Monahan and Stringer, who located the man at 123 E. 114th St., and arrested him. The prisoner had pawned the goods, which have been located in a city pawnshop. The jewelry firm now has the pawn tickets.

Harry Jacoby was locked up at Police Headquarters, last Friday night, as a suspicious person after he had tried to dispose of a diamond and sapphire pin belonging to the wife of Walter Hernandez, a retired broker living in Flatbush. Mrs. Hernandez missed the pin and a set of diamond earrings valued at \$2,500, last Wednesday afternoon, after attending a New York theatre. She supposed that they had been stolen, and Mr. Hernandez advertised for their return, offering a reward of \$250. On the same afternoon that she lost her jewels Jacoby offered the pin for sale to Otto Folger, a jeweler, at 118th St. and Lexington Ave. He is alleged to have told Folger that he had also a fine pair of earrings that he would bring around the next day. The jeweler later saw the advertisement and notified Mr. Hernandez, who went to the store and identified the jewels. Friday Folger made an appointment with Jacoby at Maiden Lane and Broadway, and took with him Mr. Hernandez and two Central Office men, who made the arrest. Jacoby told the detectives that he had given the earrings to his brother. The brother said that he had given the jewels to a third man, who later handed over the earrings and was not placed under arrest. Jacoby denied that he had stolen the jewelry, but said that he had found it in the street.

## Connecticut.

The New England Watch Co., Waterbury, is operating its factory on the full-time schedule.

R. A. Culver has assigned to the E. Ingraham Co., Bristol, a patented design for the foot of clock cases.

The force of the R. Wallace & Sons Mfg. Co.'s factory, Wallingford, is now working on a 60-hour-per-week schedule, 10 hours per day.

Harry Vandenberg, of the International Silver Co.'s factory, in Meriden, returned home, last week, for a few days, after a trip through Ohio, Indiana and Illinois.

Walter Hubbard, president of the Bradley & Hubbard Mfg. Co., Meriden, recently celebrated the 80th anniversary of his birth. Mr. Hubbard was born in Middletown, but has resided in Meriden for over 60 years.

According to a dispatch from Meriden, the J. D. Bergen Co., of that place, has been incorporated under the laws of Illinois, in Chicago. The capital stock is given as \$60,000.

J. Val Bergen, of the J. J. Niland Co., Meriden, has just returned from a business trip through the south and southwest in the interests of the concern. He reports business in that section as considerably improved.

News was recently received in New London of the death at Appleton, Wis., of Mrs. Ann Butler, widow of the Wm. Butler who, at one time, was engaged in the jewelry manufacturing business in Jay St., New London.

George C. Wilcox, president of the International Silver Co., in a recent interview, said that the running time at the factory has been increased 25 per cent. since last Spring, the plant now being operated with nearly the entire staff.

Foster E. Harvey, of Harvey & Lewis, opticians, Hartford and New Haven, Conn., and Springfield, Mass., has just returned home from a 10 days' fishing trip to Grand Lake Stream, Me. Mr. Harvey is president of the Hartford Board of Trade.

Lueretia C. Bartless, widow of John B. Kirby, who for many years was a prominent jeweler of New Haven, and mother of Samuel H. Kirby, now engaged in business in New Haven, died, recently, at her home in the latter city. The deceased was 84 years of age.

Sylvester Whalen, until recently in the employ of factory "L," International Silver Co., Wallingford, was found dead, recently, the body having been discovered in a muddy street about two miles from Wallingford. The medical examiner said that death was due to suffocation.

The W. T. Bergen Co. is the name of a new concern which has been incorporated at New Bedford, Mass., to engage in the manufacture of cut glass. The president of the concern is W. Tracy Bergen, son of J. D. Bergen. John W. Murray, who had been superintendent of the Bergen Co., in Meriden, is associated with the new concern.

Walter R. Bristol, well known as a traveling representative for the International Silver Co., died at his home in Meriden, of heart trouble, on Monday of last week. The deceased was 57 years old. He is sur-

vived by two sons, Dr. Stanley Bristol, chemical expert in the United States Department of Forestry, and Howard Bristol, chemical expert for a large concern in New Brunswick.

A statement has been made by George L. Riggs, treasurer and manager of the Standard Electric Time Co., Waterbury, who says that negotiations on the part of Benjamin B. Bristol, E. H. Bristol and Watson F. Goodyear, with a view to acquiring a controlling interest in the concern, have been completed and the business will be developed considerably. The new officers have been elected as follows: President, W. F. Goodyear; secretary, B. B. Bristol; treasurer and manager, George L. Riggs. The business will be continued at 23 Jefferson St.

## Newark.

### TRADE CONDITIONS.

While the trade situation in Newark has brightened considerably during the past week, many of the manufacturers are as yet unable to declare that anything like old conditions will prevail until after election. The most encouraging returns are coming from the west.

Burstow & Kollmar, 18 Columbia St., have found it necessary to take on six new hands, and it is probable that the force will again be increased during the month.

John Chatellier has established a manufacturing jewelry plant at 306 Market St., where he will make a line of gold and silver wares, and has also opened a New York office at 351 Fifth Ave.

The factories of three firms in the building at the southeast corner of Halsey and Marshall Sts. were visited by thieves last week, Tuesday night, who forced open a window opening on an extension at the rear of the building. Corey Bros., William Baebi & Co. and David E. Dodd, all manufacturing jewelers, were the victims, and the police are of the opinion that the culprits were formerly employed in one or other of the factories. From the second named firm the thieves obtained about \$113 worth of jewelry and \$25 in cash, while in the other places gold filings and waste valued in all at about \$14 were taken. The safes in each place are protected by burglar alarms, and the visitors apparently knew enough not to tamper with them.

One of the most interesting developments of the Fall trade is the unusual demand for bracelets. In spite of the announcements made by fashion directors some weeks ago to the effect that the call will be for long sleeves this season, orders for wrist and arm ornaments continue to pour in on the firms specializing on jewelry of this description, and the manufacturers are at a loss to account for the movement. In the general trade the heaviest orders for bracelets are coming from the west. One large manufacturer, in speaking of the present demand for bracelets, said: "We do not attempt to explain the situation, but there is no denying the extraordinary call for wrist ornaments. In view of the recent statement that long sleeves would be the rule during the coming Winter season, we anticipated a serious falling off in orders for bracelets, but we are glad to report a heavy demand for them. There are indications that they will prove a valuable trade asset."

## Philadelphia.

### TRADE CONDITIONS.

Retail and wholesale jewelers are expecting a local business boom as the result of "Founders' Week" celebration, which started Saturday night and will continue throughout the week. It is appreciated that thousands of visitors will come to the city, including all jewelers from out-of-town points ordinarily visiting here, and preparations are made to extend to them the hospitality of the city. Besides these countless thousands of others are expected to patronize local retailers generously, especially in souvenir articles of jewelry. While no agreement has been entered into by either wholesalers or retailers, the understanding has been arrived at that the week is to be regarded as a holiday week, and employers are to permit employes opportunity to witness the pageants daily on Broad St., the naval parade on the Delaware and the military parade. All wholesale jewelry houses and retailers, both big and little, have decorated their establishment for Founders' Week.

R. Rublack, manufacturing jeweler, has re-engaged in business at 36 S. 7th St.

I. B. Braveman is reported to have resumed business in Reading, Pa., at 7th and Franklin Sts.

H. Everline, with E. Diesinger, casemaker, 7th and Sansom Sts., is in the Neversink Mountains on a short hunting trip.

Otto Kolle, watchmaker for the trade, 22 Chestnut St., spent part of last week with a party of friends at Ocean City, N. J.

Walter Rosenheim, with L. Stern & Co., Providence, was a visitor to this city, last week, renewing acquaintances with the trade.

E. Diesinger, casemaker, 7th and Sansom Sts., spent several days, last week, in Reading, Pa., combining business with pleasure.

J. E. Caldwell & Co. display handsome living cups, flacons, mugs, and other trophies made for award by the Bryn Mawr Kennel Club at the dog show to be held there.

Fine cut glass ware, china, ceramics, etc., are to be sold, Monday next, by order of the executor of the estate of the late Charles B. Edwards, a well known dealer and importer at 912 Chestnut St.

Col. J. Warner Hutchins, 728 Sansom St., the president of the Jewelers' Club, has returned from Pittsburg, where he went as one of Governor Stuart's staff to participate in the big civic celebration.

George W. Maxwell, an optician, at 3235 Berks St., was last week nominated for the State legislature by the newly formed Philadelphia party, which proposes to enter into reform municipal politics.

Among the retailers from out-of-town points visiting wholesalers here on business, last week, were: George Press, Oxford, Pa.; D. H. Krause, North Wales, Pa.; H. S. Kratz, Souderton, Pa.; Josiah Heckler, Mainland.

E. J. Berlet, of Maxwell & Berlet, silversmiths, 13th and Walnut Sts., called a meeting of the Walnut St. Business Men's Association, last week, to protest to the police authorities against allowing beggars and mendicants to annoy shoppers.

Charles Dau, a retail jeweler at 6204 Germantown Ave., was robbed of two gold watches, last week, by a chauffeur, who speeded up to the place in an automobile, and pretending to leave some repair work,

snatched the watches, leaped into the auto and fled.

Frank Thoman, F. B. Wallen, Thomas Smedley & Sons, and Harry Nurock, were among the Camden jewelers who, last week, helped to make a success of the Business Mens' Carnival, and who joined in the enterprise to distribute buttons so that any sightseer or visitor getting a button tallying with the number of an article to be found in any of the stores received such article as a present.

The American Numismatic Association, which held its annual convention at the Hotel Stenton, last week, elected the following officers for the ensuing year: Far-ron Zerbe, Tyrone, Pa., president; Dr. J. M. Henderson, Columbus, O., vice-president; P. O. Tremblay, Montreal, Can., second vice-president; F. G. Duffield, Baltimore, secretary. The next convention will be held in Montreal.

The old home of the late Joseph K. Davison, manufacturing jeweler and diamond broker, at 419 Locust Ave., Germantown, was sold, last week, in the interests of the estate. The purchaser's name and the price paid is withheld. Mr. Davison's sons, who have been keeping bacheors' hall in the fine old homestead, are reported to intend moving since B. Franklin Davison was married recently. The property is one of the handsomest in that portion of Germantown.

Harry Barry, of M. Sickles & Sons, is rapidly forging to the front rank of contestants for the *North American's* allotment of seats for Hammerstein's New Philadelphia Opera House, and seems assured of receiving one of the prizes. Throughout the trade, Mr. Barry's friends have aroused interest with the result that coupons are being mailed to the firm in large numbers daily. Abe Sickles, of the firm, spent part of last week in New York on business.

The cracksmen, who forced an entrance, about 10 days ago, into the manufacturing jewelry establishment of Joseph H. Deschamps, 701 Chestnut St., but who were frightened off by the Holmes Electric Protective System, before being able to secure any loot, are still at large. The police are totally unable to find any clues leading to their identity. The dynamite sticks left behind in their hurried departure, caused injury to policemen and detectives dispatched to Mr. Deschamps' place to make an investigation.

## Ontario.

A writ has been issued by P. W. Ellis & Co., Toronto, Ont., to recover \$702 from J. O. R. Newman, Winnipeg, Man.

John Wanless & Co., who recently sold their place of business at 168 Yonge St., Toronto, Ont., have removed to 396 Yonge St.

James Ryrie, of Ryrie Bros., Ltd., Toronto, Ont., left, Saturday, accompanied by Mrs. Ryrie, on a two months' trip to the Pacific Coast.

Fred A. Kent, of Ambrose Kent & Sons, Ltd., Toronto, Ont., leaves, next week, on a purchasing trip to New York and eastern jewelry markets.

Out-of-town jewelers who called on the Toronto, Ont., trade, last week, included:

Oliver Milburn, Peterborough; Jas. Hollingshead, Tottenham, and J. S. Smith, St. Catharines, all Ontario.

The residence of A. H. Dewdney, recently in the jewelry manufacturing business in Toronto, situated in the suburbs, was destroyed by fire on the night of Thursday, Sept. 30, entailing a loss of about \$10,000. It is partly covered by insurance.

## Lancaster, Pa.

F. A. Peters, of the H. S. Meiskey Co., visited Philadelphia on business and pleasure combined, this week.

Louis Weber & Son had a window exhibit of hand-made jewelry and art work that attracted much attention last week.

Frank Kent, arrested near Columbia, Thursday, for selling bogus jewelry, was committed for a court trial on a charge of false pretense.

J. A. Reed, of J. R. Reed & Co., Pittsburg, and F. L. Williams, Atlanta, Ga., were the guests, last week, of A. W. Moyer of the Non-Retailing Co.

A. H. Rosenstein, president of the Lancaster Silver Plate Co., has been visiting New York. Edw. Rosenstein is spending the week in Philadelphia, taking in the celebration of Founders' Week.

Among the jewelers recently in Lancaster were: Mr. Cohen, of Cohen Bros., York, Pa., and Claude N. Schauk, one of their staff; Horace Ulmer, Des Moines, Ia.; Charles Filbert, Memphis, Tenn.; Alonzo Hook, Baltimore, Md., and J. H. Sensenig, New Holland, Pa.

G. William Reisner has been on a trip to Reading and Pottstown, Pa. His factory recently finished several beautiful sets of class pins, 68 for the Lancaster High School's senior class, 80 for the class of 1911, Millersville, Pa., State Normal School, and 60 for the Williamson School, near Philadelphia.

Ezra F. Bowman's Sons last week engraved for the 12th Regt., P. N. G., the silver cup and silver medal, in the form of a target, won by the regiment in the State shoot at Mt. Gretna, Aug. 7. They also altered a rather remarkable belt for a Pittsburg jewelry firm, formed of 15 solid gold medals won by the owner in noted athletic contests, the centerpiece being one awarded by the American Athletic Association.

Kendig Bare, head instructor for the Ezra F. Bowman Technical School, has just returned from a three months' trip to Europe. James W. Leonard, a student at the school, has been visiting Philadelphia with John J. Bowman. James Fairchild, Lewistown, Pa., has entered the school as a student in engraving. Carlos D. Mann, Delaware, O., has finished a course in watchmaking and returned to Delaware, near which place he will open a jewelry store. Max Schall, late of Harrisburgh, Orange River Colony, South Africa, has entered the school as a student in watchmaking. The course finished, he will open a jewelry store somewhere in America.

Charles F. Gray, a jeweler, was adjudged insane at a hearing in the Probate Court at Dayton, O., a short time ago. Mr. Gray was an inmate of an asylum from August, 1890, until February, 1892, according to the certificate in the case.

*The Greatest Fountain Pen Plan, Plant and Policy in the world are back of*  
**Waterman's Ideal Fountain Pen**

Find this imprint on a fountain pen and you will find the one that is popular for what it does—not for what it is said to do.

A few of the most popular styles are illustrated below. Each style is made with pen points of every kind, fine, medium, coarse, stub, etc., in order that the requirements of every writer may be fulfilled. The action of any steel pen can be exactly matched.

No. 12 . \$2.50 " 13 . 3.50 " 14 . 4.00 " 16 . 5.00 " 18 . 8.00 " 17 . 7.00 " 18 . 8.00 Made in plain chased, mottled and cardinal	No. 12 G.M. \$3.50 " 13 G.M. 4.50 " 14 G.M. 5.00 " 15 G.M. 6.00 " 16 G.M. 7.00 " 17 G.M. 8.00 " 18 G.M. 9.00 With plain or chased bands. # THE Ægis Case

(PATENTED)

THE ÆGIS is a new creation in gold case making. The center and bezel are in one. Instead of having the ordinary Cap, this case is provided with a rigid metal movement Cup, held friction tight in position. This Cup gives protection to the movement such as cannot be secured with the conventional jointed cap, while dust is thoroughly excluded from the front by means of the one-piece center and bezel.

### W. H. BROKAW & CO.

14 MAIDEN LANE,

Diamond Exchange Building

NEW YORK CITY

**Chicago Notes.**

Geo. H. Thomas has returned from a eastern trip.  
 E. A. Dayton is on a western and north-eastern trip.  
 E. Shaefer has opened a new jewelry store at 116 Madison St.  
 Leland Stanford, with the Alvin Mfg. Co., is on a western trip.  
 The State St. store of H. Friend has added a jewelry department.  
 M. A. Gaskell and wife, Rochester, Minn., are visitors here last week.  
 M. A. Cohen, with Rettig, Hess & Madson, is on a trip through Wisconsin.  
 U. S. Bond, of Bond Bros., Osecola, Ia., was among the buyers here last week.  
 The family of Max L. Silverberg are spending the Fall and Winter in Europe.  
 Geo. S. Davis, Newton, Ia., was in this city, last week, accompanied by his wife.  
 Nest No. 7 of the Ku Kus will hold a meeting to initiate new members, Nov. 4.  
 J. W. Sutherland, with the Schrader-Vittstein Co., is on a trip through Illinois.  
 J. L. Lake, with Robbins & Appleton, has returned from a month's vacation down east.  
 J. E. Mitchell, Fort Worth, Tex., was here, last week, on his way home from the east.  
 J. A. Limbach, with the Theo. W. Foster Bro. Co., has returned from a western trip.  
 L. J. Will, Mrs. Will and Master Will were here, last week, from Iron Mountain, Mich.  
 Max Buchsbaum has extended his western trip, and is now on a visit to the Sandwich Islands.  
 C. L. Rogers, watchmaker with Moore & Evans, has opened a watch repairing shop at 445 W. 69th St.  
 A. J. Rinkenberger, catalogue man for the A. C. Becken Co., is on a pleasure trip to Toronto, Canada.  
 Herbert L. Joseph & Co., instalment jewelers, have added a ladies' clothing department to their business.  
 R. E. Strange and Mr. Reynolds, of the Strange Jewelry Co., Sherman, Tex., were in this market last week.  
 Messrs. Cook, Perry and Hall, of the Cook Jewelry Co., Fayetteville, Ark., were here, last week, buying stock.  
 C. R. Pearsall, buyer for the J. H. Leyton Co., Salt Lake City, Utah, stopped over here, last week, on his way east.

The engagement is announced of Miss Eva Hirsch, daughter of A. Hirsch, to George Friend.

T. Zurbrugg paid a visit to Chicago, last week, accompanied by L. M. Levy, sales manager of the Philadelphia Watch Case Co.

A second and final dividend in the matter of C. M. Robertson, bankrupt, will be declared, Oct. 1. The receiver has \$4,387 on hand.

E. H. Banker, of the Hamilton Silver Co., returned from the Pacific Coast, last week, and spent a few days here with Mrs. Banker.

W. A. Kirkpatrick, formerly watchmaker for Gauss & Simons, Shenandoah, Ia., has embarked in business for himself at Spirit Lake, Ia.

C. H. Bagley, principal owner of F. D. Day & Co., Inc., Duluth, Minn., announces that the name of the concern hereafter will be Bagley & Co.

Houser & Updegraff is the name of a new jewelry concern in Columbus, Ind. Mr. Houser was here, last week, buying their opening stock.

C. J. Roehr, with the Bassett Jewelry Co., is in the east, this week, to attend the funeral of his mother-in-law, Mrs. Reid, who died recently in Elizabeth, N. J.

Alvin Shattuck, with the W. & S. Blackinton Co. and Riley & French, will hereafter represent these two concerns on the Pacific Coast, with headquarters in San Francisco.

Fred Schrader, formerly with Vahlman & Jacobs, East St. Louis, Ill., was in this city, last week, buying his opening stock for the new store which he will shortly open in East St. Louis.

Geo. Wettstein, jewelry jobber of Cedar Rapids, Ia., was here, last week, buying a stock of jewelry for his son, George Wettstein, Jr., who will travel on the road for his father in the future.

Chas. F. Koempel has been engaged by the Quaker City Cut Glass Co. to represent their house in Wisconsin, Michigan and North and South Dakota. He will travel from the Chicago office.

A. E. Bennett, formerly engraver for Shreve & Co., San Francisco, Cal., was here, last week, buying an outfit for an engraving school which he intends to open in San Francisco shortly.

"Joe" Finn is again back to his old position as diamond buyer for the Loftis Bros. Co. Sam Newman, formerly with Hirsh

& Hyman and M. H. Kling & Co., has been engaged as assistant diamond buyer.

News was received here, last week, that Walter Hudson, son of J. B. Hudson, Minneapolis, has gone into the grain business with his father-in-law. Chas. Carpenter, formerly with S. Jacobs & Co., is now connected with J. B. Hudson & Son.

Max Kargauer, arrested in St. Louis, last week, for passing forged checks on several Chicago jobbers, was brought back here and is held under \$500 bail to await the action of the Grand Jury. In default of bail he was locked up. He intends to plead guilty.

Rudolph A. Kocher, son of R. Kocher, San Jose, Cal., passed through this city, last week, on his way to Baltimore to take up the study of medicine at the Johns Hopkins University. Mr. Kocher has spent four years at the Leland Stanford University.

Fred Perry, representing F. H. Sadler & Co.; Frank Barton, representing the Fontneau & Cook Co.; Dan Childs, with B. A. Ballou & Co.; Lucius Taylor, with Riley & French, and W. A. Fay, with the John T. Mauran Mfg. Co., returned from the Pacific Coast last week.

The assets of the bankrupt estate of Abraham Zlotnik, retail jeweler at 1107 Milwaukee Ave., were sold in bulk at auction, last week, for \$550. This included the fixtures, on which there was a chattel mortgage for \$80. Jos. Brown & Co. were the purchasers, and they will conduct an auction sale on the premises until further notice.

Harry Jehlinger, who has been the Chicago representative of the N. Barstow Co., Providence, R. I., L. Fritzsche & Co., Newark, N. J., and the Castiglioni Co., Providence, R. I., has accepted the position of buyer for the watch, jewelry, silverware, clock, leather goods and cutlery departments of the A. Hamburger & Son Co.'s department store at Los Angeles, Cal. Mr. Jehlinger is now in New York, buying stock.

Among the buyers in town, last week, were: Benjamin Martin, Logansport, Ind.; Ernest Starkey, Waterford, Wis.; A. H. Davis, Red Lodge, Mont.; E. A. Collins, Frankfort, Ind.; A. J. Munson, Ames, Ia.; M. C. Remington, Neligh, Nebr.; Miss A. Gulbrandson, Rockford, Ill.; R. E. Fate, Lena, Ill.; C. H. Blanchaine, Ossian, Ia.; Fay R. Smith, New London, Wis.; F. G. Berta, Coal City, Ill.; F. E. Holsten, Al-

316 Herkimer Street, Brooklyn, N. Y.

ance, Neb.; Geo. A. Young, Moberly, Mo.; J. D. Jenkins, of Jenkins & Saltzman, El Paso, Ill.; F. A. Vogt, Mishawaka, Ind.; Perry Jackson, Rockford, Ill.; Carl Osterle, Joliet, Ill.

Someone in this city is probably wondering why somebody else has not received a valuable piece of jewelry, and is worrying because the receipt has not been acknowledged. In the Dead Letter Office at Washington, said a dispatch to this city, last week, an unclaimed package recently was opened and was found to contain a valuable piece of jewelry. This has been placed in the custody of Fourth Assistant Postmaster General De Graw, who is awaiting the appearance of the owner. The package was plainly postmarked Chicago, but the name and address of the sender did not appear. The officials decline to describe the jewelry further than to say that it is of considerable value. It would be well for everyone who recently has mailed jewelry in Chicago and has not heard that it was safely delivered to write Mr. De Graw, reciting the facts and giving as minute a description of the piece as possible. Upon identification the jewelry will be returned to its original owner.

### St. Louis.

J. L. Mullins, Hillsboro, Ill., was a visitor in this city, last week.

R. F. Reeves, of the Reeves-Kemper Co., as returned from a three weeks' trip through Texas and Oklahoma.

Herman Mauch, of 507 Franklin Ave., as returned from a fishing trip which has been occupying his time for nearly two weeks.

O. A. Boelner, whose store has been at 710 Franklin Ave., will move this week to such larger quarters at 1734 Franklin Ave., even doors west.

Among the out-of-town jewelers in this city, last week, were: J. E. Mitchell, Fort Worth, Tex.; Alfred S. Bourgeois, Jackson, Miss.; John Thornton, Belleville, Ill.

Two new stores were opened in this city, last week—one by W. A. Todd, Jr., a recent graduate of a watchmaking school in St. Louis, at 4107 Easton Ave., and the other by the Edward S. Hiles Co., at 2735 N. Vandeventer Ave.

F. W. Hugunine, chief watch inspector of the Wabash Railroad, has returned to the city after a 10 days' fishing trip with his son, who has just recovered from a long illness. Mr. Hugunine was formerly an Olive St. jeweler before entering the railroad service.

T. B. Turnbaugh, Bloomfield, Mo., in addition to purchasing stock while in St. Louis, last week, has been attending the sessions of the Grand Lodge of Missouri of the Masonic order, which were held Tuesday Wednesday and Thursday at Scottish Rites Cathedral. Mr. Turnbaugh is a prominent Mason of Bloomfield.

H. V. Kyle, formerly of Algona, Ia., has taken a position with Gauss & Simons, Shenandoah, Ia., as jeweler and watchmaker.

Thieves recently broke the show window in the store of P. J. Koke, Grand Rapids, Mich., and escaped with two trays of gold-filled watches valued at about \$300.

### Cincinnati.

H. H. Graham, Hattiesburg, Miss., visited friends here during the past week.

William Owen, Elm St., has started on a business trip to Birmingham, Ala.

Lee Loeb, of Herman Loeb, left this week on his regular business trip west.

William Pflueger and J. B. Osthoff, of Joseph Noterman & Co., have left for the west.

Victor A. Gebhardt, of Gebhardt Bros., has returned from an automobile tour in Michigan.

Eli Gutmann, of L. Gutmann & Sons, is in the south looking after the business interests of his house.

John A. Herschede, of the Herschede Hall Clock Co., has left on a business trip north and northwest.

J. Hirschfield, of D. Jacobs & Co., is in town again after a three months' business sojourn in the south.

A. Newberry and F. W. S. Phillips, of Geo. Borgfeldt & Co., were here a few days last week.

George H. Opie, of the Wadsworth Watch Case Co., has left on an extended southern business trip.

E. S. Louther and wife, Guthrie, Okla., stopped over here on their return from a visit in the east, last week.

Edward Albert, of Albert Bros., has moved into his handsome new home he has just completed on Middleton Ave., Clifton.

V. C. Loos purchased his opening stock here for his attractive new store at Athens, O., which is reported to be one of the finest and most up-to-date in that section.

Charles Glass, with A. & J. Plaut, will resume business on the road in a short time, having rapidly improved in health while at Hot Springs, Va.

"Gus" Spiegel, of A. A. Spiegel & Co., has started on his regular southern trip of six weeks. M. Plaut, of the above firm, has left on business in Michigan.

W. T. Eisensmith, at Charleston, W. Va., bought stock here for his handsome new store he has just moved into and which is said to be one of the finest in the State.

Loring Andrews, of the Loring Andrews Co., is home after a Summer spent in Europe, where he made extensive purchases in the way of holiday goods, which are now arriving.

The Gustave Fox Co. has completed arrangements for their new New York office, which is about to be opened, and in which will be installed a complete sample line of the company's goods.

J. W. Smith, formerly with the White-Haines Optical Co., Columbus, O., has taken a position with the John Holland Gold Pen Co. as a road salesman, and is now making his initial trip in the south, which will be his territory.

The auction sale of the stock of the Duhme Jewelry Co. began Oct. 3 at 10 A. M., and will continue indefinitely. Mr. Keck states that the company expects to continue in business as heretofore after the sale closes. The sale is in charge of Auctioneer James L. Hand, of New York.

D. Gradison, one of the Arcade's prominent jewelers for the past 12 or 14 years, will vacate his old stand at No. 23, having met with considerable success, and will

open for business on a much larger scale at 436 Vine St., just opposite the Arcade. Mr. Gradison is about to leave on a three weeks' buying trip to Providence and Attleboro, and expects to begin business about Nov. 15 in his new quarters, which are being fitted up in a very attractive manner.

Out-of-town jewelers here last week purchasing stock included: R. Baldwin, Winchester, Ky.; Henry Hartman, Wapakoneta, O.; F. C. Taylor, Carlisle, Ky.; J. C. Meyer, Harrison, O.; F. A. Schweeting, Oxford, O.; L. M. Solan, Rockwood, Tenn.; Abe Art, Zanesville, O.; Mr. Moran, Kronenberger Bros., Brazil, Ind.; Mr. Jashinosky, Dayton, O.; William Leive, Aurora, Ind.; H. Stutie, Osgood, Ind.; C. F. Cross, Gadsden, Ala.; C. H. Creighton, Morrow, O.; Roscoe E. Murray, Fincher & Ogment, Tuscaloosa, Ala.; Shirley Bros., Taylorsville, Ky.; R. J. Zimmerman, Batesville, Ind.; J. W. Shirley, Bloomfield, Ky., and J. Felix Davis, Corbin, Ky.

There is a movement here by some of Cincinnati's capitalists toward erecting a business building in the heart of Cincinnati and calling it "The Silversmiths' Building," providing local wholesale and manufacturing jewelers and kindred trades will guarantee to take enough space in the building to warrant its erection. Many of local tradespeople are very much in favor of such a project, as it has been very difficult for some to secure suitable quarters at times, especially for manufacturing. The insurance rates, which have been excessively high on account of the dilapidated condition of certain structures, as well as the inconvenience of using these old buildings for factory purposes, has set some of the trade considering the idea of a "silversmiths' building."

Wednesday last throngs of people found their way to the Clemens Oskamp Co.'s store, as it was the celebration of the company's 64th birthday, and nothing was left undone that would tend toward making this event a memorable one. Great care was shown in the general arrangement of the store, and many words of praise were offered C. Oskamp Daller, its manager, through whom the business has become such a success during the last few years. Those who were seeking art and beauty found it here. Cut glass, silver and jewels of all descriptions shone forth in sparkling brightness from their stately resting places, which were made more attractive by handsome decorations in dainty draperies of satins and velvets. One, gazing at this bewitching sight and listening to the beautiful strains of music coming from the balcony in the rear of the store, could almost think he was attending a notable levee. Cut flowers were used in great profusion everywhere throughout the display, and each visitor upon taking leave received a souvenir bouquet. Pocket books were freely opened, as their owners could not resist the tempting and dazzling beauty of the encased articles of luxury and beauty, which seemed to say, "won't you please buy me?" In all, the affair was a great success.

Isaacs Bros., have succeeded to the business of Robert R. Temple, La Moure, N. Dak.

# AMERICA'S LEADING JEWELRY AUCTIONEER JAMES L. HAND

Now conducting the sale of the Largest and Finest Jewelry Stock ever made in America for

— THE —

## DUHME JEWELRY CO. CINCINNATI, OHIO

The Auctioneer who is capable of conducting a sale of this magnitude is competent to sell any stock, no matter how large or fine.

The Duhme Jewelry Co. investigated the record and ability of every Jewelry Auctioneer in the United States and then selected "Hand" to conduct this important sale.

## WHY?

Correspondence solicited from the leading Wholesalers and Retailers of the Jewelry Trade.

14 Maiden Lane, NEW YORK

## Omaha.

Fred Brodegaard & Co. have added new show cases to their N. 6th St. store.

Max Meyer, formerly in the jewelry business in this city for many years, is a visitor here at present. Mr. Meyer's home is now in Baltimore.

Jacob L. Jacobson made a solid gold wedding ring last week, for a western stockman, the weight being 30 dwts. The ring is one inch wide.

Mr. and Mrs. Riffce, Hastings, Nebr., and Mr. and Mrs. Phillip Folsom, Ashland, spent Ak-Sar-Ben week in this city, visiting friends and buying stock before returning home.

Joseph P. Frenzer has had mounted the 3-inch muscalonge which he caught several weeks ago at Hunt's Lake, Wis. He displayed it in one of his show windows during carnival week.

A thief, on Tuesday, Sept. 29, between six and seven o'clock in the morning, threw a paving block through the plate glass window in Henry Copley's jewelry store and stole jewelry valued at \$250. The loot consisted of rings, bracelets, a gold knife, a gold match-box set with a diamond and numerous other articles. Few people were on the street at the time and the thief made his escape.

The following out-of-town jewelers were in this city last week, attending the Ak-Sar-Ben Fall festival and purchasing stock before returning to their homes: Ross Henderson, Lincoln, Nebr.; W. Jones, Albion, Nebr.; H. D. Howard, Fairfield, Nebr.; Mr. Peterson, Walbach, Nebr.; Mr. Walker, Mason City, Nebr.; J. G. Johnson, Ord, Nebr.; A. R. Weaver, Harvard, Nebr.; J. N. Hole, Dewitt, Nebr.; A. A. Ericson, Edison, Nebr.; W. H. Wiker, Spalding, Nebr.; George Stitt, Farragut, Ia.; W. E. Miles, Nelson, Nebr.; John W. Crabill, Plattsmouth, Neb.; Robert Young, Alma, Nebr.; O. G. Coglier, Weeping Water, Nebr.; C. C. Fernald, Carroll, Ia.; A. L. Blier, Manilla, Ia.; A. Peterson, Weston, Ia.

## Detroit.

### TRADE CONDITIONS.

In both wholesale and retail lines business is reported better than at any time within a year. Wholesale houses have their men out and are getting good returns while the retail trade foresees good holiday business. One local retailer states that he has had a better trade in diamonds than at any time since before the panic of 1907; others report a brisk trade in watches and general lines.

Fred N. Pauli, Pontiac, visited the trade here on Friday.

A. Berry, Marine City, was a recent visitor in this market.

N. F. Wolfram, Millersburg, has been visiting in this city recently.

Hugh Connelly has been away the past week, visiting friends in Canada.

Max Jennings, St. Clair, called on his friends in the trade in Detroit a few days ago.

William Horton, with the E. H. Pudrith Co., has gone out in the northwestern territory.

Ed. G. Koelzer made a trip recently through the smaller towns of the State, going as far west as Ionia.

Charles Walker has moved from Mar-

lette to Flint, where he has opened a new establishment at 98 Broadway.

Clare Fuller, formerly with L. Roy Fuller, Yale, has taken a place in the wholesale house of the C. A. Berkeley Co.

Wm. Craven has made arrangements to take over the business of H. J. Sevy, Howell, the change taking place Nov. 1.

E. H. Pudrith and James H. Garlick were members of a party which recently returned from a successful fishing trip at Baltimore Bay.

Sol Sallan, who has been in the pawnbroker and jewelry business as Jacob & Sallan, on Randolph St., has opened a new store at 92 Woodward Ave.

A nesting of the Ku-Kus is arranged for to-night at 44 Grand River Ave. Although the September meeting of the Detroit nest was omitted it is hoped to hold a meeting the first Wednesday in each month hereafter.

The Imperial Jewelry Co. is a new enterprise started by Harry Kahn and Nathan Rose at 51 Gratiot Ave. Mr. Kahn previously had a store on Michigan Ave., while his partner was a watchmaker with Traub Bros.

## Cleveland.

John F. Schierloh, of the Keystone Watch Case Co., was a recent visitor to this city.

Howard Knight, of the Livermore & Knight Co., Providence, was in the city last week.

B. V. Arnstine and H. W. Arnstine have just returned from extended trips, reporting very satisfactory business.

A. L. Davis, secretary of the Arnstine Bros. Co., with family, are spending a two weeks' vacation in the New England mountains.

R. R. Micks, secretary of the J. E. Micks Co., Elkhart, Ind., stopped off in Cleveland on his way home from a short vacation spent in the east.

Webb C. Ball is in San Francisco in connection with the installation of a time-service and watch inspection system by the Southern Pacific Railroad Co.

The Euclid Optical Co., of this city, has been incorporated with a capital stock of \$10,000. The incorporators are: Frank Combes, Milton A. Combes, Owne B. Newman, Lyman W. Childs and Albert C. Streich.

Among the visitors last week were: J. F. O'Conner, of Burtiss & O'Conner, Utica, N. Y.; H. S. Sumner, Akron, O.; C. J. Duncan, Massillon, O.; R. R. Micks, Elkhart, Ind.; H. J. Wehrle, Garrett, Ind., and L. E. Clarke, DeKalb Junction, N. Y.

During the present epidemic of "baseball fever" in Cleveland, the Brunner Bros. Co. has been doing a land office business in their unique baseball fan's badge. Half of a miniature baseball is mounted on a gold representation of a palm-leaf fan with ribbon streamer attached bearing the name of the favorite team—every "dyed-in-the-wool" fan wears one. The Webb C. Ball Co. attracted attention by a window display in which baseballs, bats, gloves, etc., were displayed along with jeweled horseshoes, four-leaf clover pins, gold wishbones which said "Good Luck" for the home team.

Advertisements of a misleading sort recently appeared in the local papers inviting a 90 days' trial of a \$25 mail order watch for 25 cents. They do not seem to have accomplished much in this vicinity, as none of the watches has been seen by jewelers and the advertising has been discontinued. The prompt investigation and publication of accurate information by THE CIRCULAR-WEEKLY is generally commended, and the opinion has been passed that this movement is of the same breed as the "Time-ball Special" and the "Trainmen's Special," which have recently appeared on the market for the express purpose of catching the ignorant customer.

## Kansas City.

Wm. H. Weiss, formerly a stone setter with the Meyer Jewelry Co., has resigned and gone back to Chicago.

C. E. Bunnell, cashier for the C. B. Norton Jewelry Co., has just returned from his vacation, which he spent in Michigan.

Noble L. Fuller, of the Edwards & Sloane Jewelry Co., is now in St. Louis, and is expected home from his vacation next Monday.

W. E. Crellin, of the Ward & Crellin Jewelry Co., is just in from his territory, filling up his trunks for another start as soon as the carnival is over.

Sam Bloom, traveling representative for the Meyer Jewelry Co., is out making a short trip before the carnival, but will meet his friends from the country here next week.

F. S. Kreyer, who has been with his brother in Fort Scott, Kans., was in Kansas City last week, buying an opening stock of jewelry to open in the new town of Haskell, Okla.

B. L. Seybold, formerly in business in McLouth, Kans., was in this city last week. He states that he is quietly looking around for another good location in which to engage in business.

Warner & Reed have succeeded R. L. Warner in the stone and stone-setting business, in the Missouri building. Mr. Reed, the new member of the firm, has been a retailer in Kansas for several years, having been in Effingham and Osage City at different times. They are preparing to spread out their business considerably, and will at once greatly increase their line of stones.

The following jewelers called on the trade in this city during the past week: W. H. Story, buying for Dick Irion, Cleveland, Okla.; F. J. Amphlett, Amphlett Bros., Apache, Okla.; M. F. Kohler, Parsons, Kan.; C. B. Libby, Weir City, Kans.; A. G. House, Belton, Mo.; R. R. Smithers, Cameron, Mo.; W. S. Noble, Drexel, Mo.; H. C. Risse, El Reno, Okla.; L. E. Leek, Scammon, Kans.; R. R. Day, Little River, Kans.; Orville Shrack, W. H. Shrack & Son, Pratt, Kans.; J. O. VanVoorhis, Osawatomie, Kans.; W. F. Sharp, with L. Megede, Richmond, Mo.; J. W. Smith, Slater, Mo.; B. G. Gustafson, Lawrence, Kans.; Mr. Wyman, with L. Perrenoud, Humboldt, Kans.; O. J. Weseman, Pratt, Kans.; P. G. Roberts, McCune, Kans.; Mr. Britton, of Cowgill-Britton Co., Hartford, Kans.

## Mercantile Fountain Pens

Show Case supplied with 1½ dozen assortment.

bridge the gap between high priced pens and the cheap kind that are sold with misgivings. The various assortments permit a dealer to arrange his department as may be desired.

The assortments with which we furnish our attractive show cases are as follows:—

1 dozen	..	\$15.00 net
1½ "	..	29.40 "
2 "	..	35.40 "
3 "	..	36.70 "
4 "	..	65.75 "
6 "	..	102.00 "

The margin of profit on this line is very liberal, and the satisfaction resulting from use is well known. Send for complete catalogues showing styles and show cases prepared for display purposes.

Our handsome, new Plate Glass Show Cases for 2 and 4 Dozen Assortments are particularly worthy of your careful investigation.

Write for complete catalogues to-day.

138a St. James St., Montreal.

15-19 Maiden Lane, New York

## Milwaukee.

### TRADE CONDITIONS.

Milwaukee jewelers are busy restocking in preparation for the heavy Fall trade that is confidently expected. Retailers are contrasting the present bright prospects with the outlook of a year ago.

W. L. Grothey, formerly with Adam Bloedel, and also with the C. Preusser Jewelry Co., is now with R. C. J. Bott as general repair man.

Among the out-of-town jewelers in this city last week were: J. B. Kimball, Waukesha; W. S. Sargent, New Lisbon, F. P. Beswick, Racine; William D. Triplett, Ironwood, Mich.

E. H. Warnke, of E. H. Warnke & Co manufacturing jewelers, as a member of the racing board of the Milwaukee Automobile Club, took a prominent part in the recent automobile races held in the city.

One of the prizes offered in the recent 24-hour and short event automobile race held in Milwaukee was the Esser cup, handsome prize donated by the Louis Esser Co., well-known jewelers located in the Wells building.

David Goldman is about to open a downtown branch in the new Caswell building, corner of Grand Ave. and W. Water St. Mr. Goldman has leased the attractive store at a rental which averages \$6,600 a year for a term of 10 years, the rental starting at about \$5,000 a year and being gradually raised until it amounts to more than \$8,000 annually. The new Goldman store has floor space of about 500 square feet, and is considered one of the desirable locations in the city. The enterprising jeweler expects to be situated in his new establishment in about one week.

## Indianapolis.

T. S. Biggs, Fontanet, was in this city last week, buying stock.

George G. Dyer is expected home from Denver, Colo., this week, after a two week vacation trip.

J. H. Reed will spend part of this week in Brown County, where he is arranging to build a country home.

The Marott Department Store Co., who opened its five-story store on Massachusetts Ave., Oct. 1, has a large jewelry department, in charge of F. N. Cobb.

The last two weeks of this month will be spent at Lake Maxinkuckee by Julius Walk, of J. C. Walk & Son, and C. Kiefer, of L. F. Kiefer & Son. They make two fishing trips a year to the lake.

The Arts & Crafts Shop, on Massachusetts Ave., has completed two sets of silver and bronze medals, to be awarded at the gallery shooting practice of the Indiana National Guard. Three beautiful silver and bronze cups have also been sold for the same purpose.

Authorities over the State are looking for a cheap spectacle and jewelry peddler who is robbing farmhouses while disposing of his wares. At one place he made a sale and left with \$215 while the farmer stepped to a window to inspect his new purchase. The wares are said to be absolutely worthless.

David O. Brown, formerly of Bloomington, Ind., is now at Lincoln, Ill.

Published by THE JEWELERS' CIRCULAR PUB. CO., 11 John Street, New York

## Pittsburg.

The I. Ollendorf Co. was elected a member of the Pittsburg Credit Association, at its last meeting of that organization.

Capt. William Klein and Harry H. Heeren were among the jewelers who marched in the centennial parade last Thursday.

Gillespie Bros. have made a number of changes at their store and have replaced their show cases differently adding to the attractiveness of the establishment. This firm served its visitors with coffee on the day of the centennial parade, their store being on the line of march.

A meeting of the creditors of J. F. Murphy, of Dawson, has been called by the trustee, George P. Christy, to be held in the office of Referee Wm. R. Blair, in Pittsburg, Oct. 8, when all persons are requested to present their claims. Mr. Christy is anxious to wind up Murphy's affairs as soon as possible.

During the parade last Thursday the Geo. Barrett Co. entertained upward of 100 guests at their store, it being on the line of march. The view from the many splendid windows afforded one excellent opportunity to witness the pageant. The firm provided an excellent luncheon, much to the surprise, as well as the gratification, of those present. Otto Heeren, of Heeren Bros. & Co., was noted in the papers last week as saying that there was a time when Americans considered that a good Indian was a dead Indian, but not so now. Mr. Heeren invited a house abroad to send a famous artist to this country some time ago to study the habits and traits of the Indians. The result was that many works in Indian art have been turned out, and they formed a part of a special exhibit made at the Heeren Bros. store during the last week, and attracted much attention.

The article in the last issue of THE CIRCULAR-WEEKLY regarding the move being made by the Business Men's Association of Pennsylvania, with headquarters at Philadelphia, for the repeal of the mercantile tax, caused a great deal of talk. It was recalled that a year or more ago some one collected considerable money here under the same pretext and local jewelers are very much interested in ascertaining just what the true state of affairs is with reference to the success of the movement, before taking too active a part in the matter. They would like to hear from Philadelphia. The headquarters of the association are in Weighman building.

A number of out-of-town jewelers were in Pittsburg, last week, attending the sesquicentennial festivities, as follows: Albert Gooder, Reynoldsville; A. D. Randall, Selinople; A. C. Guth, DuBois; Robert Lintner, Lorain; E. H. Kennerdell and wife, Arantum; J. F. Stoop, Leechburg; H. S. Johnston, Apollo; Frank Worrell, Canonsburg; R. L. Kirkpatrick, Butler; Mr. Allach, Emlenton; Mr. and Mrs. H. A. Jackson, Saltsburg; R. V. Marshall, Freeport; J. H. Wolf, Smithton; F. E. Leitzell, Scottsdale; J. A. Sloneckee, Scio; F. B. McKinney, Washington; A. Katzenmyer, Burgettsown; J. E. Beck, Martins Ferry; J. A.avanagh, Johnstown.

A jeweler well known throughout Penn-

sylvania, recently, was sent a bill by a local wholesale house and asked to remit. When the check was received, with it came poetry as follows: "Many moons have passed away since Jones received his proper pay, but Saturday the cash came in and now I send to him the tin; there's consolation in my mind concerning Jones, benign and kind; if twenty-five his need will meet, then this puts him on easy street." The jeweler thought so well of the rhyme that he requested THE CIRCULAR-WEEKLY correspondent to send it on for publication, saying that such poetical genius in the trade should at least not have its efforts "born to blush unseen."

E. P. Roberts & Sons have made and sold for \$1,000 the handsome Masonic emblem presented last week to W. S. Brown, Imperial Treasurer of the Nobles of the Mystic Shrine. The top of the badge represents a triangle of the keys, suspended to which is a genuine tiger's claw. Above it is a sphinx head, small diamonds being set therein profusely, as well as around the triangle. In the center of the tiger's claw is a gold star which holds a diamond of one and one-half carats. The emblem is of solid gold, and is, without doubt, one of the handsomest special designs of the kind ever made. It has been on exhibition in the window of the jewelry house during the last week, and has attracted no little attention.

The Pittsburg Watch Co., which conducted three stores in this city, and against whom a petition in involuntary bankruptcy was filed several months ago, last week offered to settle with creditors on a basis of 25 per cent. on the dollar, which offer was accepted. The firm's liabilities amounted to \$33,000. It is stated that the receiver, Benjamin Biggard, 3 Smithfield St., advised the creditors to accept a settlement on that basis, as it was doubted if even that much would be realized should steps be taken to auction off the stock in the stores. On the request of the receiver, the sale had been postponed on three different occasions. A few of the creditors held out to the last, but it was finally agreed to accept the amount stated and now Mr. Biggard will wind up the affairs of the concern as soon as possible. This, it is stated, will be done by selling off the stock of the company and, according to reports on Saturday, the sales will begin next week. It is hoped to realize a generous sum of money from the stock.

## Pacific Northwest.

Alexis Mairat, a pioneer watchmaker of Portland, Ore., has just returned from an extended visit to Switzerland, after an absence of 40 years.

T. Hayes, Ostrander, Wash., will soon be associated with William Beck, in business in Kelso, Wash. They have gone to Portland to purchase a stock of goods.

The jewelry department conducted by W. A. Ingalls, Prosser, Wash., is to be closed on account of other duties of the proprietor. The stock will be sold at auction.

Plate glass windows in the stores of the H. E. Silver Co., in the Hinckley block, on Second Ave., Seattle, Wash., and of T. J. Carroll, 1100 First Ave., of the same place, were smashed with bricks one night last week, and valuable jewelry was taken from each place. Jos. Kelly, one of the robbers,

was captured after a long chase. Part of the stolen property was found in his possession.

## Pacific Coast Notes.

W. N. Jenkins has just opened a store at 166 12th St., Oakland, Cal.

Vern Bishop has entered the employ of E. B. Smith, Santa Ana, Cal., as watchmaker and jeweler.

A. M. Cross, who recently arrived in Long Beach, Cal., from Topeka, Kan., has opened a jewelry store at 207 Pine St.

The store of T. V. Wheeler, Oceano, Cal., was entered by burglars one night recently, when stock of considerable value was stolen.

The store of John T. Lowe, Hollister, Cal., has been completely remodeled. New fixtures have been installed and other improvements made.

The E. C. Smith Co., Pasadena, Cal., has been purchased by the J. Herbert Hall Co., of that city, and Mr. Smith will begin business in Fresno, Cal.

The new store of Krenkel & Bosch, Winnemucca, Nev., is now almost ready for occupancy, and the stock and fixtures are arriving from San Francisco.

Sam Selka, Marysville, Cal., has decided to dispose of his business there, and is desirous of locating in some of the large cities around San Francisco Bay.

The Santa Paula Jewelry Co. has made extensive improvements in its store at Santa Paula, Cal., and new show cases and counters are being installed.

S. M. Joel, formerly with the Hamilton-Wilson Co., San Diego, now occupies a position with Kendall & Smith, Pasadena, Cal., as manufacturing jeweler.

G. E. Mann, formerly with J. R. Hicks, Silver City, N. Mex., has left for Los Angeles, Cal., where he expects to locate. He has been succeeded by William Baer.

Miller Robinson, Saugatuck, Mich., has just arrived at Haywards, Cal., and from now on will have full charge of the jewelry department of H. Hauschildt's store, at that place.

L. E. Anselme, who learned his trade as jeweler in Switzerland, has arrived at Tonopah, Nev., to take charge of the watch and jewelry repairing department of George F. Blakeslee.

It is reported that H. C. Lederer and Dr. Chas. Curtis, Los Angeles, are about to open a jewelry and optical business in San Luis Obispo, Cal. Dr. Curtis is an oculist.

## Harrisburg, Pa.

W. W. Rudisill, president of the Altoona Merchants' Association, is injecting new life into that organization, which is now endeavoring to land an industrial plant employing several hundred men in that town.

Jacob Polinski, Jules Juliski and John Sliva were convicted in Pottsville, last week, of receiving stolen goods to the value of \$500, taken from a Mt. Carmel jewelry store and shipped to New York, where it was disposed of.

John Lloyd, Northumberland, who escaped some weeks ago after the theft of a bicycle from Frank Dowling's jewelry store, was captured as a vagrant at Berwick, Pa., last week. He has been jailed at Sunbury to answer in court for his crime.

## Los Angeles.

Y. H. Boudreau, Hanford, Cal., was here on a business trip last week.

Newton Moore, 354 S. Broadway, made a short visit to Riverside a few days ago.

O. H. Potter, watchmaker with the J. H. Hall Co., Pasadena, is taking a vacation in this city.

John Belfils, of the force of H. F. Wallace, wholesaler, is spending a three weeks' vacation at Fresno.

A. B. Cohn & Bro., 3d and 1 Main Sts., have been making alterations and improvements in the interior of their store.

Mrs. S. Meyer and Miss Meyer, wife and daughter of S. Meyer, wholesaler, are expected home from Chicago this week.

Philip T. Hoeffler, formerly with George H. Curry, has opened a store at 501 W. 7th St., formerly occupied by Walter T. Harris.

H. W. Hughes, formerly a watchmaker with O. L. Wuerker, this city, but now of Ely, Nev., has been spending some time here.

Arthur Smith, of George W. Smith & Co., Philadelphia, Pa., who made the fixtures for Montgomery Bros.' new store, was here a few days ago.

J. W. Hagan, representatives of A. J. Hedges & Co., New York, was confined to his room in this city for several days by illness. He is again able to be out, however.

J. G. Donovan recently sprained his ankle severely, a circumstance which was very unfortunate because it occurred just at the time when he was engaged in moving into his new store.

E. F. Whittmore, watchmaker with J. C. Fleming & Co., who was formerly in business in Denver, Colo., has brought his family here, and expects to make this his permanent home.

H. C. Lederer, who bought out Dr. H. B. Shillito, 620 S. Broadway, has associated with him Dr. Chas. Curtis, of this city. The new firm has been closing out the stock of the store as rapidly as possible.

J. H. Birnbaum suffered from illness while having a vacation in Bear Valley and at Seven Oaks, recently, and was compelled to hasten home. He was unable to return to business for about three weeks.

Out-of-town jewelers who have been here, recently, include: A. Protsch, Redondo; F. J. Rigg, Alhambra; A. E. Springborg, Redlands; E. B. Smith, Santa Ana; B. Hartfield, Anaheim; A. W. Pequegnat, Riverside.

J. C. Fleming was taken suddenly and seriously ill a few evenings since, after having taken dinner at a popular restaurant. It is suspected that he suffered from ptomaine poisoning. It was several days before he entirely recovered.

Henry Boehmen, foreman of the cutting department of the Southwest Turquoise Co., is now taking a vacation. Miss Charlotte Reynolds, of the same company, has returned from her vacation, and is now in the company's Spring St. store.

The Southwest Turquoise Co., 113 N. Broadway, has been installing new machinery which will double the capacity of the factory. A new jeweler and four new cutters have already been engaged. Mr. McMullen, of the company, has gone to the

mines in Arizona to put more men at work.

Carl Entenmann, of the Carl Entenmann Jewelry Co., is expected home from Europe, this week. He arrived in New York several days ago, and expected to spend two or three days in Chicago. When he arrives home he will be surprised to find the interior of his store materially improved in appearance. His associates in the firm have just completed extensive alterations and improvements in the front office.

With the removal of the firm heretofore known as J. G. Donovan & Co. to their new store at 253 S. Spring St., formerly occupied by Montgomery Bros., the firm name has been changed to Donovan & Seamans Co. There is no change, however, in the personnel of the company, Mr. Seamans having been heretofore a member of the firm. Arthur Andrews will have charge of the improvements in the front office.

Dr. H. B. Shillito, who has been doing a jewelry and optical business at 620 S. Broadway, has sold his store there to H. C. Lederer, formerly of Tennessee. Dr. Shillito will engage in the wholesale optical and optical manufacturing business, catering especially to oculists' prescription trade, and also to doing an outside jobbing business. He will have associated with him J. Ralph Cobb, senior partner of the former firm of Cobb & Martin. The new firm will be the H. B. Shillito Co., and will occupy the rooms heretofore occupied by Cobb & Martin, in the Bumiller building, 420 S. Broadway. Mr. Cobb will be the general manager. The best machinery obtainable has been ordered, and a new outfit will be installed in order to do the best possible work.

## Minneapolis and St. Paul.

J. J. Esslinger, with the Birkenhauer-Thomsen Co., Minneapolis, spent a week in St. Cloud, Minn., recently.

W. F. A. Woodcock, formerly of Minneapolis, is now settled in attractively furnished quarters in his new territory in St. Charles, Winona County, Minn.

White & MacNaught, Minneapolis, are preparing to move, shortly, to new and larger quarters in the Andrus building, on the next corner, at 510 Nicollet Ave.

Among the out-of-town jewelers in the Twin Cities during the past week were: T. J. Collins, Proctor, Minn.; A. O. Wold, Langdon, N. Dak.; J. C. Gerde, Paynesville, Minn.; George H. Lang and wife, Mankato, Minn.; Herman Huesgen, Devil's Lake, N. Dak.; H. T. Holverson, Alexandria, Minn.; M. D. Lonergan, Grantsburg, Wis.; H. A. Hanson, Rushford, Minn.; A. H. Davis, Red Lodge, Mont.

The Thomas J. Harrison Jewelry Co., Pryor Creek, Okla., has sold out to Ralph Campbell.

Capt. W. F. Weiss, of the Montgomery (Ala.) True Blues, who is a member of the jewelry firm of Julius A. Weiss & Son, of that city, was recently presented by General Graves, on behalf of the National Rifle Association, with a handsome bronze loving cup. This cup is awarded each year to a National Guardsman making the highest official score in his native State.

## San Francisco.

### TRADE CONDITIONS.

That business conditions have at last reached the level of a year ago and that the volume of business transactions is about the same as it was just preceding the depression of last November is the report that is being made by traveling representatives whose territory embraces the coast States. Clyde C. Brooks, of the Morgan & Allen Co., one of the leading wholesale jewelry firms in San Francisco, in discussing the present situation said: "The revival in business during the past month is remarkable, and sales closely approach the record for the same month last year, which is putting it strongly, as this time last year the coast was on the top crest of a wave of prosperity. We are now, I think, just beginning an era of conservative and healthy business operations. The immense crops that have been harvested in California during the past two months have placed a large amount of money in circulation and the jewelry business is just commencing to feel the effects of this. A month ago wholesalers were of the opinion that the bulk of the business this season would be done during the last few weeks of the holiday season, but of late the spirit of confidence has become more manifest among the retail jewelers. Country orders are really heavier than they were this time last year but conditions in the large cities along the coast are not so noticeably prosperous, as dealers feel that they can wait for quite a time yet and still be sure of securing desired stock."

Alphonse Judis is visiting in the south this week.

James Morton has just left on a business trip to Los Angeles. He will be gone several days.

D. C. Brooks, a silverware manufacturer is away on a vacation at the present time and will be absent for a couple of weeks.

W. G. Hodger, of the silver department of Shreve & Co., has been ill for some time with a severe attack of appendicitis, but now gradually recovering.

Both Louis E. Pels and Arthur Glass, the firm of Pels & Glass, are out of town at the present time, and are sojourning in the southern part of the State.

The Colorado delegation to the Trans-Mississippi commercial congress that meets here, next month, will present, on behalf of the people of the State of Colorado, handsome silver service to the cruiser *Colorado*. Governor Buechel, of that State, will be present and will make the presentational speech. Arrangements are being made to have the cruiser in the bay during the meeting of the congress here, and the delegates of the Centennial State will be given an opportunity to inspect the ship.

Notwithstanding the fact that he has suffered heavy losses both by robbery and fire in the Blythe block, on Market St., Lundy thinks that it is the finest place for a business of his kind in the city, and has shown his confidence in the location by securing a larger store at 728 Market St. Much more room is afforded in the new place than in the old one, and a correspondingly larger stock will be carried. The glass department in the new store is especially noteworthy, and it is the intention to carry a large line during the holiday season.

Garrett B. Lobdell, of Hall & Lobdell, Carthage, N. Y., narrowly escaped death by drowning in Black River, near Carthage, a short time ago. Mr. Lobdell, in company with a number of friends, had gone on a canoeing trip, and upon returning home, the canoe capsized and the jeweler was thrown overboard. He was rescued by Earl Weed.

## Providence.

### TRADE CONDITIONS.

Reports from buyers are encouraging. "We believe that the jewelry business will increase rapidly from now till the beginning of next year, and we are backing our judgment with our bank bill," said H. R. MacMillan, general manager of the Dry Goods Alliance, a New York purchasing house, whose buyers were in this city the past week purchasing jewelry for the Fall trade. "Ever since the 'panic,' as it has been called, the jewelry business has been better than any other branch of the dry goods business, and we have had more sales of jewelry than of other stock which goes to fill a dry goods store. Now that the holidays are coming on and the financial horizon begins to look a little brighter, it is the jewelry business which begins to pick up first and which will be the best."

The retail store of I. Guertin at Arctic Centre has been fitted with a burglar alarm system.

Frank B. Reynolds has returned from a several weeks' camping and hunting trip in Maine.

Frank Somes has been on a successful southern trip with the sample line of Arnold Steere.

Harold Ostby and family have closed their Summer home at Warwick Neck for the season.

A meeting of the Jewelry Workers' Union is announced for to-night at the Labor Temple.

Theodore W. Foster left, Saturday, accompanied by his wife, for an automobile trip to Chicago.

Young Bros., of this city, are being represented outside the local territory by Harry Schofield.

William Taylor has been sending home some good orders from the western circuit to Williams & Payton.

W. H. Williams, senior member of Williams & Payton, was recently a visitor among the New York trade.

The Wightman & Hough Co. is operating its plant on full time, making 55 hours a full schedule for 60 hours' pay.

William H. Thurber, of the Tilden-Thurber Co., and family, have returned from their Summer home at Bristol.

Ralph S. Hamilton and wife departed Saturday in their touring car for an automobile trip through the Berkshire Hills.

Arnold C. Messler has been elected as one of the delegates to the Democratic State and Congressional conventions from Pawtucket.

Albert Newman, who has been doing a manufacturing jewelry business at 289 Thurber's Ave., as the Newman Co., has discontinued.

Miss Carrie B. Johnson, with the Rhode Island Cardboard Co., Pawtucket, has returned from a vacation spent at Great Cheague Island, Me.

The monthly meeting of the Ostby & Barton Employees' Relief Association will be held, next Monday evening, at their rooms, 98 Weybosset St.

The finishing departments of H. A. Kirby began last week working nights in order to catch up on orders. The engraving force was nearly doubled in number.

The Gorham Co. has been granted permission by the Inspector of Buildings to erect a one-story wooden building for storage purposes on Adelaide Ave.

Edward N. Cook, president of the Ed-

ward N. Cook Plate Co., has been elected one of the vice-presidents of the Eighth Ward Republican Club, of this city.

Dunn & Rodenberg, of this city, have opened an office in room 805, Columbus Memorial building, Chicago, which is in charge of their representative, F. O. Bohnen.

Edward J. Doran, a well-known journeyman jeweler, of this city, son of Francis Doran, an Attleboro jeweler, was married, the past week, in this city, to Miss Margaret J. Donnelly.

John Gardner died last week in Pawtucket, at the age of 63 years. He was a native of Birmingham, Eng., and as a silversmith was employed for many years by the Gorham Co.

F. A. Simmons, watchmaker and optician, 39 Dorrance St., has had the entire interior of his store refinished in white enamel, relieved by mahogany finish for all the cases and woodwork.

Frank Lewis Thierfelder, 62 years old, died suddenly at his home in this city, Friday. He was a jeweler and was at his work Thursday, but was taken ill Friday morning and died within a few hours.

Robert L. Saunders, a retail jeweler of Philadelphia, who has been enjoying a vacation trip through New England with his wife, was a guest of George B. Champlin, of the S. B. Champlin Co., the past week.

Omer J. Paquin has given a chattel mortgage of \$475 to Alderie Beauchaine, Central Falls, on stock, machinery and other personal property used in the enameling business at 299 Weybosset St., this city.

Albert T. Lenzen, of this city, a member of the Mason-Lenzen Co., of North Attleboro, was awarded three first and one second premiums on white fantail pigeons at the Brockton, Mass., fair, last week, in strong competition.

Charles H. Ballou & Co. have started in the manufacturing jewelry business at 289 Thurber's Ave., where they will make a line of plated bead necklaces in a variety of corrugated designs for which Mr. Ballou holds patents. They will sell to the jobbing trade.

William A. Lowe, Jr., a gold plater, had a narrow escape from serious injury in an accident Saturday night while driving on Broad St., this city. An automobile collided with his buggy, demolishing it and throwing him out. Mr. Lowe was badly shaken up and bruised.

Alexander C. Fellows, who has been employed for several years by the Ostby & Barton Co. as a designer, has resigned on account of ill-health, and will move to Wales in a short time. At the conclusion of his service he was presented with a handsome gold watch from his associates.

Horatio E. Bellows, counsel for Calvin Dean, filed a demurrer Saturday morning in the United States Circuit Court in the case of the Frank E. Farnhamas "The Jewelers' Supply Co." for alleged infringement of patent on cuff links. The grounds of demurrer are largely technical in nature.

The manufacturing jewelry industry and its kindred branches was well represented at the smoker and luncheon given at the West Side Club, last Wednesday evening, at the reception tendered Governor Higgins. Among the jewelers present were: Oren C. Devereux, Walter Hunold, E. A.

Potter, Asher Stark, Herbert E. Capron, Frank P. Eddy, Albert S. Vennerbeck, Charles W. Battey, Edward N. Slade, Harry C. Lindol, Edwin C. Bliss, Peter Lind, Morton F. Winsor, Frank Arnold, Samuel S. Wild, Robert Shoemaker, Harry B. Mead and Frederick Watkins.

The Advisory Council of the New England Manufacturing Jewelers' and Silversmiths' Association held its regular weekly meeting on Thursday, at which the financial budget for the coming year was discussed. At the meeting this week it is expected that plans will be perfected for the annual meeting to be held later in the month.

Among the foreign importations received through the Providence Customs House the past week were the following: From Bremen, 11 packages of imitation precious stones, one of jewelry, one of silverware, and one of rope chain; from Havre, one of imitation precious stones; from Rotterdam, one of brassware; from Southampton, one of china.

William H. Luther, of William H. Luther & Son, is one of the police commissioners of Providence. He is a short man physically. This fact does not usually bother him, although it caused him some embarrassment at a theatre recently. He tells the story himself. "I was sitting in a box," he said, "and was all alone. There was a scene on the stage in which three comedians were supposed to be out on the ocean. 'Oh, see the whales!' said one, pointing to the imaginative ocean. 'See the sharks!' said another, with a ludicrous expression. I was laughing, as was everyone else in the house, when the third comedian turned toward the box in which I was seated. 'See the sardine in the box!' said he, and everyone that knew me shrieked. I felt a trifle embarrassed, too."

The Providence Journal said editorially Wednesday morning, under the caption of "American Jewelry Abroad": "Whether he is more enterprising than manufacturers in other lines, or whether he finds foreign markets more readily receptive to his goods, the fact seems to be that the American jewelry manufacturer has been expanding his export business and producing an effect on the foreign consumer where other American productions are scantily represented. Recent figures disclose a marked falling off in importations, whereas the activity of jewelry makers in the foreign field is attested by an increase of exports from less than a million in value in 1907, to more than a million and a quarter last year. In all other manufactures of gold and silver a corresponding increase of foreign business is shown. Canada continues to offer the most favorable market; but some of the South American countries have greatly increased their purchases and promise to be steady customers to a considerable amount."

J. F. Byrnes, of this city, recently made an assignment and a meeting of creditors was held Friday afternoon at the offices of Joseph J. Cunningham, his attorney. A statement was made placing the assets in stock, fixtures and lease at \$2,653, with liabilities of \$4,143, practically all of which are for merchandise. It was suggested that the debtor be allowed to continue the business under the supervision of two trustees

who would pay dividends as fast as the business could afford it. Byrnes to be employed on a salary of \$20 a week and keep the business expenses down. The plan met with the approval of all creditors present.

Somebody fell through the window of A. J. Maker's jewelry store, Warren St., about midnight Saturday.

At the annual meeting of the corporation of the People's Savings Bank, held Monday, Dutee Wilcox was elected one of the vice-presidents, and his son, Howard D. Wilcox, one of the directors.

Creditors in this vicinity of F. W. Sackett, of New York, are favorable to the latest proposition of settlement on the basis of 50 per cent. in indorsed notes and 12½ per cent. unindorsed, and the matter will probably be arranged within a few days.

The house of Edward N. Slade, 16 Mawney St., was burglarized last Saturday night and an attempt made to force an entrance to the home of Roswell C. Smith, 315 Elmwood Ave. Both are connected with the jewelry business. Nothing was missed from either place.

Everett L. Spencer, accompanied by his superintendent, Walter Henry, and Miss Wilcox, his bookkeeper, were called to Buffalo, N. Y., last week to appear in a suit on book account against K. A. Bistany, who operates an Oriental store in that city. The account is some seven years old and involves several hundred dollars. Mr. Spencer secured judgment.

### North Attleboro.

G. C. Hudson has returned from a western trip.

The J. F. Sturdy's Sons Co. plant is working 13 hours a day.

Charles F. Martin left Monday on a trip through New York State.

James P. Black has left on a 10-day trip through the State of Maine.

St. Elmo Coombs has returned from a trip for Paye & Baker Mfg. Co.

Donald Le Stage has returned from a trip West in the interests of the H. D. Merritt Co.

Percy Clap, New York representative of the Daggett & Clap Co., is spending a few days with his parents.

Arthur C. Sylvester, who was formerly superintendent of the Webster Co., has withdrawn from the United Brush Co., of Providence, with whom he was recently connected.

John E. Tweedy, of Cheever, Tweedy & Co., and George G. Wheeler, superintendent of the W. & S. Blackinton Co., have been appointed to the 12th Congressional District Committee.

Philip McGiviney, an engraver for W. G. Clark & Co., was presented with a handsome traveling bag by his shop mates last Friday, owing to the fact that he was married last week in Nashua, N. H.

Fred A. Howard, treasurer of Frank M. Whiting & Co., has submitted the following yearly financial report of his company to the Commissioner of Corporations: Machinery, \$62,233; cash and debts receivable, \$39,526; merchandise, \$96,025; total, \$197,514. Capital stock, \$100,000; accounts payable, \$40,679; surplus, \$56,835; total, \$197,514.

Whiting & Davis have offered a silver loving cup as a prize for the team winning the shop bowling championship. Two clubs have been formed among the employes and the tournament will consist of five matches. The series begins Thursday. A shop bowling league is under advisement by local jewelers. A meeting will be held this week to perfect an organization.

### Attleboro.

Work is being pushed forward rapidly on the new Ingraham factory.

Col. Sidney O. Bigney addressed the Newton Highlands Club, last Thursday, on "The Men of the Hour."

Aldro French and Fred H. Hill have qualified for the semi-finals in the play for the golf championship of the Highland Golf Club.

George L. Shepardson, of C. A. Marsh Co., has purchased the residence of Charles H. Eden at the corner of Pleasant and Forest Sts.

Charles H. Tappan and wife and Mrs. Fanny Tappan have gone to California to spend the winter. The party will make a short stop in Chicago.

John M. Fisher has declined the Prohibition nomination for lieutenant-governor, which was unanimously extended. He has been drafted as an elector at large.

Richard Harding, salesman for the Sweet Mfg. Co., was married, last Wednesday, to Miss Pearl Smith, who, until recently, was employed in the packing room of S. O. Bigney & Co.

In the shop bowling league the W. E. Richards Co. team is in the lead, having won six straight games. The Standard Button Co. is in second place, with five games won and one lost.

William D. Flagg has resigned the position of advertising manager for the Reed & Barton Co., Taunton. Mr. Flagg held the post for six years, and his resignation is due to a desire to enter business in Boston.

William H. Saart has instituted suit against the Taunton & Pawtucket Street Railway Co. to recover damages for injuries sustained in an accident at Talaquega Park early in August. The ad damnum is placed at \$5,000.

In the Taunton Superior Court, last week, the Cornell-Andrews Smelting Co. was awarded a verdict of \$5,842.72 against the town of Attleboro and \$583.47 against the Boston & Providence Railroad. Clarence L. Watson secured damages amounting to \$1,635.96 against the Boston & Providence road, and \$3,505.63 against the town of Attleboro. All of the actions resulted from the recent abolition of grade crossings.

The Rothschild Bros. Co. has finally decided to remain in Attleboro, and has concluded arrangements to remove from the old Steam Power building to the second floor of the Bates & Bacon factory on County St. The Klingtite Comb Co., of Worcester, will also remove to Attleboro, and will be consolidated with the Rothschild Bros. Co. and Atlantic Comb Co. The Worcester concern will be brought to Attleboro immediately. It was the intention of the Rothschild concern some time ago to build a new factory, but this idea has been given up for the time being.

### Rochester.

The business of Phineas C. Joel has been incorporated as the Joel Co., with an authorized capital stock of \$10,000.

The Rochester Optometrical Society is to continue its educational work of last season including lectures by prominent educators.

The employes of all the leading jewelry stores and the various branches of the jewelry trade of this city have organized an association, to be known as the Jeweler Employees' Social League. The following officers have been elected for the ensuing year: President, Guy H. Brockway; vice-president, Emanuel Present; secretary, Charles A. Haskins; treasurer, Albert F. Manchester. Included among other social affairs will be a bowling league, composed of eight clubs, named after some of the leading makes of watches in this country. A schedule has been arranged for the season of 1908-'09, to be rolled at Elm Hill. Each of the bowling clubs is named after a well-known make of watch—Elgin, Waltham, Hampden, Illinois, Rockford, Hamilton. Howard and Ingersoll. The principal stores which are represented by employes at the present time are: E. J. Scheer Co., E. S. Eitenheimer & Co., Henry Oemisch & Co., Klee & Groh, Humbert Bros., J. R. White & Co., C. F. Walter Sunderlin Co., J. J. Ernisee, E. A. Hand S. D. Burritt, C. F. Vanderpool, Phil Present, Morris Rosenbloom & Co., and several small stores and offices as well.

### Buffalo, N. Y.

Weed & Co., dealers in cut glass, silver ware and other articles, recently celebrated the 90th anniversary of the establishment of the business, the concern having been started in 1818.

J. J. Carr, Niagara Falls, last week, celebrated the 22d anniversary of his occupancy in his store at Main St. and Ontario Av. in that city, and in honor of the event gave souvenirs to his customers.

The News of this city, last Saturday, published an interview with Thomas G. Hawl of T. G. Hawks & Co., the cut glass manufacturers of Corning, N. Y., in which the latter gave reasons why the protective tariff on cut glass ware should be continued.

Burglars recently entered the store of James Clegg, 43 E. Seneca St., through a rear window, and stole six gold bracelets and \$3 out of the cash drawer. The men were evidently frightened away before they could complete their work. The bracelets were taken from a tray in the show case. Detectives are working on the case, but a clue of the men has been found.

A check swindler has been operating in Buffalo, and among the merchants to whom he called was William A. Buehl, Grant St., at whose place he looked at several watches. After considerable dickering selected a \$14 watch and gave a check payment which later was found to be good. The same man is also said to be called on Louis Rosokoff in West Seneca, where he also obtained a watch and gave a bogus check for \$18. The man was well-dressed and had an air of importance which impressed his victims so thoroughly that they did not suspect him.

William Veler, a watchmaker on State Ave., at E. Broadway, is having plans drawn for a fine large bank building, which will be located near his present place of business. Mr. Veler may occupy a part of the building himself.

C. M. Slemmons, representing the Illinois Watch Co., is conducting an interesting display in the window of the M. Judd Co., which has been seen in the majority of the leading cities of the country, showing the evolution of a modern watch.

## LEARN JEWELERS ENGRAVING

"The Engraving School that Graduates Experts."

A fascinating, high-salaried and easily learned trade, taught thoroughly and practically by correspondence. Your instructor is the foremost authority and master workman in the world. We will teach the beginner better engraving by correspondence than he can gain in years of rigid apprenticeship. We will improve the skill of any engraver one hundred per cent. and make him master of the trade. The demand for competent engravers far exceeds the supply.

Send for handsome, illustrated prospectus.

UNITED STATES PATENTS.

ISSUE OF SEPT. 29, 1908

**39,571. TIME-ACTUATED MECHANISM.** HARRY B. SNELL, Toledo, O. Filed April 24, 1908. Serial No. 428,896.  
In a mechanism of the class described, the combination with a pair of releasing levers, of a pair of rotatable timing-disks provided with notches in

their peripheries and also having a portion of their peripheries continuous, and means for shifting the position of the disks axially to cause the ends of the levers to ride in contact with either the notched portions or the continuous portions of the peripheries of the timing-disks.

**39,778. JEWELERS' TAG.** CHARLES T. WITTESTEIN, Newark, N. J. Filed March 2, 1907. Serial No. 360,128.

A jeweler's tag comprising a piece of flexible material having lobes with a weakened connection which predetermines a line of folding and an at-

aching strip projecting from one of said lobes independent of the said connection and adapted to be bent around a body to which the tag is to be applied and folded over upon the lobe to which it is attached, said lobes being adapted to be brought flatwise together by folding and form a display tab, and a layer of adhesive matter on one of said lobes at one side surface of the tag, the attaching strip being devoid of such adhesive matter.

**39,852. ARTIFICIAL FLOWER.** WILLIAM A. WARNER, Bridgeport, Conn. Filed Feb. 28, 1907. Serial No. 359,877.

An artificial flower comprising an electrically deposited metal shell in the form of a flower and

having a reduced calyx portion, a cap to engage the said calyx portion of the shell, a stem attached to the cap, and a metal plating covering the shell cap and pin.

**399,897. WATCH.** JAMES T. PENDLEBURY, Manchester, Eng. Filed May 29, 1908. Serial No. 435,716.

The combination, with a watch case and movement, of a dome dust-cover *a* secured at its edges to the band of the case, the said cover having the arc-shaped slot *c* located over the regulator, and

a disk-shutter *h* pivoted to the cover adjacent to said slot and having an arc slot *f* arranged concentrically with the pivot of the disk and adapted, when the shutter is rotated, to register with the slot in the cover.

**900,053. TIME-CONTROLLED MECHANISM.** MATTHIAS K. BAUER, Evanston, Ill. assignor of one-half to Joseph Heinzen, Gross Point, Ill. Filed Sept. 16, 1907. Serial No. 393,128.

The combination with an oscillating, spring-actuated part, of time controlled mechanism comprising, in combination with a clock train, means for locking said oscillating part against the action of its spring, a spring actuated tripping device for

releasing the locking means, means for normally restraining said spring actuated tripping device, embracing a rotative pawl and ratchet mechanism, one member of which is driven by the clock train, and means disposed in axial alignment to the axis of rotation of the members of the pawl and ratchet mechanism for disengaging said members from each other at a predetermined point in the rotation thereof to effect the release of the tripping device.

**900,059. AUTOGRAPH TIME-RECORDER.** WILLARD D. DOREMUS, Washington, D. C., assignor to Henry L. Bryan, trustee, Washington, D. C. Filed Nov. 28, 1905. Serial No. 289,450. Renewed April 16, 1908. Serial No. 427,487.

A time-recorder comprising a depressible plate, a pivoted shutter operated by the plate, a paper

feed roller, a pawl connecting the feed roller and the shutter whereby as the shutter oscillates the roller is rotated, a spring actuated hammer, and means connected with the hammer whereby as the plate is depressed the spring of the hammer is

placed under tension and is released as the plate is returned to its normal position.

DESIGNS.

**39,584. BADGE.** JEANNETTE SABIN, Coeur

d'Alene, Idaho. Filed July 29, 1908. Serial No. 416,019. Term of patent 3½ years.

**39,585. BADGE OR SIMILAR ARTICLE.** ALBERT W. SOUTHARD, New York. Filed Aug.

24, 1908. Serial No. 450,121. Term of patent 3½ years.

**39,586. CAMPAIGN EMBLEM.** EMIL J. POS-

FISL, New York. Filed Aug. 27, 1908. Serial No. 450,593. Term of patent 7 years.

**UNITED STATES TRADE-MARKS.**

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."

**Trade Gossip.**

"The Redbook," issued by the Edwards & Sloane Jewelry Co., Kansas City, Mo., is just off the press. It contains about 30 extra pages.

W. Green & Co., New York, are about to issue an elaborate 700-page catalogue descriptive of tools, machinery and general supplies for the trade. The catalogue is bound in heavy covers and is by far the biggest catalogue ever attempted by the concern.

Each year new and attractive designs in jewelry are made up in Paris, and these designs form a basis for the reigning styles. New patterns just received in this country by Chopard Frères Co., 56 Maiden Lane, include a variety of attractive offerings, among which is a line of rococo jewelry set with a variety of fine imitation sapphires, emeralds and other precious stones. Styles in jewelry have reverted to the directoire period, and the latest examples of up-to-date jewelry are shown with embellishments typical of that time. Hatpins are shown with dainty fringe effects, while pendants and chains also have this decoration. Gun metal goods, including a line of hatpins and brooches, are shown in new styles, together with a most comprehensive line of imitation pearl chains. The display of jet goods is replete with new designs in combs, chains and collars.

One of the most beautiful books that has been issued in the advertising line that has come to the office of THE CIRCULAR-WEEKLY in many a day is that recently sent out by the Eisenstadt Mfg. Co., St. Louis, Mo., which gives a history of the company from its foundation in 1833 to the present day. The history, which comprises a book of 32 pages 9 1/4 by 12 inches and beautifully bound in vellum, is entitled "The House of Eisenstadt," and is written by Richard Spamer. In it are contained beautiful half-tone portraits of the members of the concern at all times, from Michael Gabriel Eisenstadt, who started the business at the corner of Fifth (now Broadway) and Morgan Sts., up to the present head of the firm, Morris Eisenstadt, and his associates among the present officers and directors. The book contains photographs of the concern's locations in 1853, 1860, 1883, 1885, 1892, 1897, as well as cuts of its present beautiful quarters, with views of the offices, such as diamond salesroom, directors' meeting room, president's office, corridors, manufacturing department, receiving and shipping department, credit department, the factory, and with portraits of the salesmen, department managers, factory hands and office employes. The text is printed on heavy coated paper with large margins, and altogether the work is such a handsome specimen of the printer's art that it will be cherished by its recipients as an example of book-making, as well as for the valuable and interesting information which it contains about this enterprising house.

# Now It's The Lord Elgin

The demand to-day is for thin watches.

## A CATECHISM OF THE LEVER ESCAPEMENT

Being an Informative and Instructive Series of Questions and Answers for Watchmakers and Apprentices.

(Written expressly for THE JEWELERS' CIRCULAR-WEEKLY by T. J. WILKINSON.)

(Continued from issue of Sept. 23.)

**QUESTION:**—If the adjustment of the banking pins along the lines we have indicated resulted in producing an excessive drop or first lock, explain the nature of the error, and how the defect can be remedied.

**ANSWER:**—If the position of the banking pins by the method just explained resulted in producing too great a first or drop lock, the trouble is attributable to the guard pin's being too far forward, or the dimensions of the roller table being too great. Such an error as excessive drop lock is readily observed. When such a condition exists calls for correction, as a light but safe

FIG. 112.

locking is essential to the escapement's action, and should be obtained. In an instance like this we can follow two methods: first, either set the guard pin further back from the edge of the roller table, or, second, replace the roller table for one of lesser diameter. This is usually the most desirable way of correcting the defect.

**QUESTION:**—As a reverse of the foregoing, we may find that the positions of the banking pins produces little or no lock; in fact, we will assume on one pallet the tooth strikes the impulse face of the pallet jewel, while on the opposite side the lock is nearly deficient. Explain this condition and state remedies.

**ANSWER:**—When, upon adjusting both bankings so the guard pin is brought in contact with the edge of the roller table, in our endeavor to obtain the lost position of drop or first lock of the teeth on the pallet jewels, we obtain, in place of a lock, the effect depicted in Fig. 107, namely, the teeth of the escape wheel strike on the impulse face of the pallet jewels; such being the case, we are compelled to go to work without any guide and simply provide for each pallet the lightest and safest lock possible. When this is done, the guard pin and roller table must be brought into harmony with the new condition of drop lock; as it now exists, there is too much freedom between the guard pin

and edge of roller table. To correct this, we must either bring the guard pin forward or else (and this is a better remedy) secure a roller table of greater dimensions than the old one—one which will allow for just the correct freedom between the pin and table. Many other points will require our attention when making changes in roller tables; but as the subject has been fairly well covered in former papers, we shall not now consider them, further than remarking that a difference of two-one hundredths of a millimeter in the diameter of a roller table will frequently change an imperfectly acting escapement into a sound one. To all workmen who wish to do better escapement work we commend gauges capable of registering such amounts. They will be found of great practical benefit and will eliminate guesswork. When, by means of the banking pins, we bring the guard pin in contact with the edge of the roller table, and an observation shows the drop or first lock to be either too deep on both pallets or too light on both pallets, in either event, the fault being due to the relation of guard pin to the roller table, we must fall back on our judgment to first obtain a correct amount of lock of the teeth on each pallet, and, next, make changes in the size of the roller table to suit the altered lock. At times we find that by giving the guard pin a slight backward bend, *i.e.*, away from the roller table (Fig. 112), a better adjustment and relationship of the parts is obtained. Only a slight bend is admissible. Should we decide on such a measure, it is always wise to thin the lower part of the guard pin in the manner shown in Fig. 113; this will allow of straightening, the effect and result being thereby improved. Whenever a guard pin requires a decided bend, it is better practice to replace the old roller table with one of smaller dimensions.

**QUESTION:**—Briefly review the action of the escapement parts and their adjustment as related to each other (single-roller escapement).

**ANSWER:**—We shall first consider the guard pin as it relates to associated actions. The guard pin, when a watch is running, occupies three important positions, *viz.*, as it enters within the crescent of the roller table, as it emerges out of the crescent, it

then being closest to the edge of the roller table, and next when the lever rests against its bank, it then being furthest from the edge of the table. The office of the guard pin is, first, to prevent overbanking; second, to prevent contact of the roller jewel with the horns of the lever. This it effects so long as the guard pin remains without the crescent. Third, to prevent tripping. In part relation to this third office of the guard pin is the action of the corner of the lever notch, with the face of the roller jewel, whereby once the guard pin enters the crescent, and in the event of the corner of the notch coming in contact with the face of the roller jewel, a tripping error is thereby prevented. All of the foregoing facts relative to the correlation of the guard pin, roller table, roller jewel, corner of lever notch, and lock of teeth on pallet jewels, require

FIG. 113.

to be thoroughly grasped before making an escapement examination. It might also be wise to state that defective pivots, jewels or holes too large for their pivots, must be changed before making any alterations in an escapement; in addition, the roller jewel must fit the notch correctly. In brief, see to it that all parts connected with the escapement action, are sound before you decide that an error is present, since the putting in of a new staff often materially alters the workings of an escapement, changing a very imperfect escapement into a sound one. All escapements cannot, of course, be made perfect, but we can usually improve them and obtain better results. We shall conclude this series with a short explanation of the practical methods outlined in former papers. Having a watch before us, and having determined that all escapement parts, pivots, jewels, etc., are in perfect condition, or, if not, having made them so, we commence a closer inspection by placing Rule II. in force, namely, closing the bankings to drop or first lock. This done, replace the balance; then if the parts are free the watch will start running. Should we have contact of the parts, say of the guard pin with edge of roller table, or should the roller jewel be unable to make its exit out of the notch, corrections should be made as indicated in former contribu-

**THE NEW ENGLAND WATCH CO.**

**Waterbury, Conn.**

Or any of our Distributing Agents

ions. On the other hand, the fact that the watch starts running, showing no indication of a bind, does not indicate that the relationship of the parts is correct. For instance, the guard pin may be too far away from the edge of the table, or the guard pin's relation to the roller jewel and lever horns may not be satisfactory, and yet the watch will start running. Had we encountered too much freedom of the guard pin with edge of roller table, and a normal lock was present, such a watch will start running, but the excess of freedom between the guard pin and table will probably allow the escapement to trip, and thereby result in stoppage. On the other hand, should the guard pin bind on the edge of the roller table, an examination of the tooth and pallet lockings should be made. If the lock is satisfactory it will indicate that a change of roller tables is desirable. The selection of one of lesser diameter may correct the difficulty, but never go by appearances; make a thorough examination along the lines formerly laid down before making changes. Should we find the guard pin tight on one side of the roller table, and too much freedom on the opposite side between the pin and the table, an alteration of the pallet jewels is probably desirable. If this class of error was only a slight one, the lever can be bent to remedy the trouble, thereby equalizing the freedom of the guard pin with each side of the roller table. Should the relationship of the roller jewel to the horns of the lever be found to be one of contact when freedom should exist, an examination alone can determine the cause of contact. No cutting should be done on a lever until you have made use of the tests outlined in this series, thereby investigating the relation of the guard pin to the roller table. The condition of the lock of the teeth on the pallet jewels, the relation of the roller jewel to the corner of the lever notch, all require attention before doing any cutting or bending on a lever. The makes and drops, inside and out, of the scape wheel teeth with the pallet jewels always call for attention when making an escapement examination. We have already treated of such matters at some length, and simply recall their existence to your attention because of their importance. Both the form and teachings of this course have departed from the beaten paths, and the writer hopes that he has benefited some of the craft.

A few words about drafting will conclude our paper. We strongly advise all who desire a thorough knowledge of the lever escapement to make repeated drafts from various specifications, and to continue doing so until you have become so familiar with specifications and angles that you can readily make a drawing without reference to directions, as a thorough knowledge of the theory underlying escapement construction will aid in solving problems now hard to comprehend. Such knowledge will make our work easier, surer and better, and will well repay the effort put forth to master the intricate relationship of the parts in the lever escapement.

(THE END.)

B. B. Case, Eureka, Cal., has sold out to A. Fitzgerald.

**Original Method of Straightening Pivot.**

**A**N original method is recommended by Th. Bulle for straightening pivots. Any ordinary lathe may be adopted for this operation. The pivot to be straightened is placed in a chuck with a hole larger than the pivot in order to allow the cone-shaped end of the staff to run in the hole and give a free view of the bent pivot.

The balance or wheel is then slowly turned until the end of the bent pivot is at

STRAIGHTENING PIVOT BY A BRASS PUNCH.

its highest point. A brass punch is then applied and a light tap with the hammer will bring the pivot to its original shape without injuring its polish.

**Founder of the "Union Horlogère" Honored in Berlin.**

**T**HE German section of the *Union Horlogère*, now an international watch makers' society, assembled this year in Berlin. An album, containing the photos of all the German members, was presented to G. Hauser, founder and director. The following dedicatory address was read on the occasion:

It is 25 years to-day since you, with a small band of keen and devoted men, founded the *Union Horlogère*. The undertaking had to overcome many difficulties, and even in more recent years it has had to fight against prejudice and all sorts of obstacles. But with indomitable zeal and far-seeing guidance you have managed to organize the society in such a way that it has developed and consolidated in spite of menacing dangers. The *Union* has communication with almost every civilized country and this success, most honored sir, we owe entirely to you. It is with the most heartfelt pleasure that the German division uses the present occasion to tender to you their thanks for, and express recognition of, your unceasing activity in the service of the society. May you continue long and in undisturbed health to stand in the place you have made your own at the head of the *Union*. While tendering you these wishes in the name of the German members, whose likenesses are in the album, which we most cordially beg you to accept, we wish you with the utmost friendliness and respect, good luck in future years.

On the same day the meeting of the Dutch members took place in Utrecht, and a week later the Austrian and Hungarian members met in Vienna. In July the delegates from every country came to the general meeting in Macolin, near Bienne, Switzerland. An International Support Fund was instituted, which is to be called

the "Gottlieb Hauser" Fund, in honor of the founder.

The statutes and rules of the *Union Horlogère* have now been printed in five languages.

**Concerning the Center-Wheel of Watches.**

(Translated for THE JEWELERS' CIRCULAR-WEEKLY from the *Allgemeines Journal Der Uhrmacher Kunst.*)

**T**HE center wheel, with few exceptions, is placed in the center of the plate. The diameter of the center wheel must not be too great, for if the space available does not admit it, the balance spring comes too close to this wheel, giving rise to all sorts of irregularities in the rate of the watch. For this reason the center wheel should always be smaller than the balance, and this latter should never be larger than the diameter of the barrel. A good proportion in dimensions is obtained when the diameter of the center wheel is about three-fourths the diameter of the barrel, while the diameter of the balance is equal to or somewhat smaller than the diameter of the barrel cap.

In the old cylinder watch there was rarely cause for complaint of too large a center wheel; it usually measured about two-thirds of the diameter of the complete barrel. The larger the diameter of the center wheel the smaller should be that of the ratchet wheel in key watches. The center wheel pinion is in most instances perforated and takes up the center staff with slight friction. In English and American watches and in some makes of Swiss watches the solid center-wheel pinion is to be found, similarly as was used in verge watches.

The center wheel, as its name in German, "Grossbodenrad" indicates, is the largest of the crossed-out wheels; near the end of the staff it is riveted onto the pinion, because the barrel and the balance move beneath it and must have sufficient space. In some stem-winding varieties (for instance, in the Lehmann system), with endless screw, and in the case of fusee watches the reverse is found to be the case: the center wheel runs deep in a recess in the plate, as we find in watches with a verge escapement.

The center-wheel bridge must be trued if the plate is not plane, because if the center wheel stands out of true we may find the hands rubbing on the crystal or on the dial plate. If the center-wheel pinion stands vertical between the plate and the bridge, we must look to see whether the wheel itself runs plane; should this not be the case it must be trued. If the center wheel runs very much out of true, we must first ascertain whether it is firmly riveted; then we insert a close-fitting, turning arbor in the hollow arbor and place the wheel in the double-ended calipers, in order to true it. Finally the center wheel must be perfectly trued on the plate, if it does not run perfectly plane. Truing, between bridge and plate, is effected, either by simply bending the wheel broadside or by truing on a hollow stake. The particular arm that requires truing is marked, and the wheel then taken out. It is advantageous also to set the third wheel in with it, because its pinion affords us a good marking for the place of the truing.

The friction points of the pivot shoulder

15 Maiden Lane  
NEW YORK

# Seth Thomas Clock Company

70 Wabash Ave  
CHICAGO

Makers of Superior Timepieces of all kinds, sizes and prices, from a Lady's O-size Watch to a 40-foot Dial Tower Clock, largest in the world

of the center wheel pinion must also be attended to, in order that the friction may be reduced to the smallest proportion. We can readily imagine with what considerable friction the shoulder of the center wheel pinion runs in a recess of the bridge, made with the chamferer, for the purpose of affording the necessary play for the arbor between plate and bridge. The usually somewhat sharp shoulder on the pivot, very easily detaches fine chips from the arched recess, which run with the oil and defile it. In cleaning the wheel, too, no chalk, that may adhere to the brush, should be allowed to get into the hollow pinion, because, on account of its mixture with the oil, the pivots will suffer.

If the center wheel has too much play between bridge and plate, the teeth of the cannon pinion can easily rub on the plate and also on the bridge of the washer. Furthermore, on account of the excessive play, the minute hand may rub on the crystal, and in other cases the setting square against the lid of the case.

The center wheel, as already stated, must run perfectly plane, otherwise sundry defects may occur; the center wheel may (1) occasionally rub against the barrel; (2) it may rub against its bridge or against the third wheel bridge; (3) the third wheel may occasionally get out of mesh, especially with very thin watches, and if both wheels have much end shake. This defect is revealed by the sudden running ahead of the watch, by several minutes at once, and the repairer is at first inclined to believe that the center wheel is running loose on the pinion. 4. The center wheel may come in contact with the balance or also with the balance spring.

**The English "Daylight Saving Bill."**

THE proposed English "Daylight Saving Bill" has elicited many humorous and serio-comic editorials from the American press. A recent writer in the *Minneapolis Tribune* contributed the following: It is a common American trick to stop or turn backward the clocks in legislative halls on the last night of the session. If the trick were not acquiesced in by everybody, the validity of some very important State and federal laws could be assailed in the courts. It is a new trick to cheat a whole nation into early rising and early going to bed by setting all its clocks more than an hour ahead by a solemn act of legislation. This proposal has been actually made by a member of the British house of commons by the name of William Pearce. His bill provides that all the clocks in the United Kingdom shall be set 80 minutes ahead from the first of April until the first of October. Funny as this seems to all Americans who have heard of it, it is taken so seriously in England that the probability of its passage is anticipated and the stock and commercial exchanges are campaigning furiously against it. These exchanges do business with all the world and they have trouble enough with varying time now without submitting to a wider divergence than that of nature. The London exchanges close now about an hour after those in New York open, so that the contemplated exchange would prevent dealing in both the same

day and break up the profitable business of arbitrage. The avowed motive for the bill is almost funnier than the effect of it would be. Mr. Pearce wants to cheat people into early rising and early going to bed, to give them the sanitary benefit of more sunlight and save them the expense of artificial light. The theory is that all hours of labor and business would remain as at present, though actually everything should be done 80 minutes ahead. This is all very well for London business men who do not get down town until 11 o'clock. But we doubt its popularity with industrial workmen who begin the day at seven or with rural laborers who start even earlier.

**Watch Glass Gauge.**

AN improvement in gauges was recently made and patented by M. Guerneau, a French watchmaker. This gauge is similar to the regular measuring instruments of its kind which are generally used by watchmakers, the main difference being in

WATCH GLASS GAUGE INVENTED BY FRENCH WATCHMAKER.

the jaws, which contain recesses of various sizes, into which the different parts to be measured may be placed.

This gauge was invented for the purpose of measuring the diameter of wheels and watch glasses.

The members of St. Mary's Church, at Alton, Mo., have been trying for some time to ascertain why the big tower clock on the church does not keep time. The face on one side never agreed with the face on the other three sides. It was recently learned that flocks of pigeons passing over the city roosted on the hands of the clock, which are exposed. Twenty to 30 pigeons were seen resting on a hand, which, going down, gained time because of their weight. When the hand went low they shifted to another hand. Thus another side of the clock would be weighted out of time. A screen will be placed over the clock's face.

**An Old Japanese Masterpiece.**

THE remarkable clock, illustrated herewith, is now one of the curiosities in the jewelry store of Ten Shodo, in Tokio. Its simplicity and very grotesque appearance hardly suggest its utility. The most interesting feature of this clock is the division of the dial. The time of day in Japan was, until recently, divided into two parts of changeable durations, from sun-rise to sun-set, and *vice versa*. As the days during the Winter are shorter than those in Summer, and clocks could not be constructed to follow the changes, the maker of this clock has provided it with a changeable dial, on which the figures are movable and can be placed closer or further apart from each other, to correspond with the sun. Furthermore, this clock, like all other old Japanese and Chinese clocks, has only one hand, to indicate only the hour of the day. The different hours on the dial are represented by pictures of animals and fowl. A rooster, *e.g.*, represents the first hour at

JAPANESE CLOCK WITH ONE HAND.

sun-rise, a dog, the second hour, etc. The hours after sun-set are indicated by various pictures of stars and planets.

J. H. Gunther, Listowel, Ont., has been appointed watch inspector of the C. P. R. Guelph and Goderich line, covering all stations between Guelph and Goderich, and including Guelph City and Listowel. He will receive standard time daily from Toronto by wire.

A watch which was made near the close of the 15th century is at present in the possession of Reubin S. Price, a retired traveling representative of Chicago. The dial contains two rows of figures, an inside circle bearing Roman characters to denote the hours and an outside row set with Arabic figures to indicate the minutes. The timepiece was made by R. Banner, of Liverpool.

# Large Watches

FOR

**AUTOMOBILES,  
CARRIAGES,  
DESKS and  
TRAVELING**

FOR the above purposes we offer a line of watches which possess really remarkable selling qualities. They are one or eight-day watches, keeping remarkably accurate time under all circumstances and so substantially built as to successfully withstand the jar of an automobile.

For many reasons we believe them to be the best watch of the kind on the market, as they are not only very well made and bear all the marks of good, careful workmanship, but the model is a very attractive and "snappy" one.

They are extremely convenient, and appeal strongly to the traveler because they are so compact that they take up but little room in a traveling bag, which makes them more desirable than the regular French traveling clocks.

They are built to stand rough usage, as they can be turned upside down or in any other position with no danger of their getting out of order.

No line of watches for the purposes mentioned can possess more elements of salability, as in style, appearance, convenience, good workmanship and accuracy they are everything that such a timepiece could be.

Just at this time of the year you ought to have these in stock.

GOLD

No. 1015.

## A NEW ONE AND A GOOD ONE

MR. EXCLUSIVE JEWELER:

Do you wish a case of maximum value at a minimum cost, in shapes the thinnest and models most superb—finish and engraving that of the finest 14K. solid gold line—a solid gold case throughout of extra heavy weight at about the same price as the best makes of gold filled?

This is a large order but **WE ONLY** can fill it in every respect. These cases are made in triple stock, the outside of which is 14K., and this 14K. stock is  $\frac{1}{2}$  of the total thickness of the backs. The inside is 10K. and a low K. between, which is crystalized, making a harder, stronger and stiffer case in every way than either a filled case or 14K. solid. Ask your Jobber or write us direct for Prices and Samples.

"LORD YORK"

"Send us a card with your name and address and we will send you an illustrated catalog describing and illustrating 'LORD YORK,' and his associates. He is the most interesting character for the Retail Jeweler in existence to-day. You can't afford to be without him."

# STORE KEEPING DEPARTMENT

## An Original All Hallowe'en Display

Especially adapted to the needs of the retail jeweler and designed expressly for THE JEWELERS' CIRCULAR-WEEKLY, will appear in this department next week.

## Use and Abuse of the Jeweler's Show Window

Written expressly for The Jewelers' Circular-Weekly by Frank Farrington

IT hardly seems likely that any live merchant is going to assume that the windows of his store can be used to better advantage in any other way than in displaying goods in them, though we know of at least one big store that claims that its windows serve the store best by letting in only light and the gaze of people who are curious enough to stand outside and look at the inside of the store through those windows. As the proprietor puts it, "We have no boxed-up windows. We take special pride in keeping the entire store neat and clean and the stock neatly arranged, hence the whole store is our show window. It is a pretty sight either day or night, and you will often see people out on the pavement standing and watching the customers trading or the clerks fixing up the stock."

There may be money in that plan, but there would be hundreds of times more money in the pretty sight of people looking into windows filled with goods and then coming into the store and buying them.

Windows are the greatest trade pullers that you can have if they are used in the right way. Let your windows tell stories that are brief, concise and easy to understand and remember. That is the rule for other advertising, and it is the rule for windows.

The display which shows the use and possibilities of the goods the best and gives their price is the good window. The window trim that shows a little of everything in the store is a poor proposition. The principle to follow is that of dressing the window in such a way that the person who stops to look into it will be led to enter the store with a possible intention of buying.

There is no off season for window displays. They must be kept working all the time. You cannot stop taking care of them for a week any more than the publisher of a weekly paper can skip an issue once in a while without losing subscribers. Make the window trimming as much a part of the regular routine of the store as sweeping out.

In the matter of special sales the window is most important and can help them along as much as advertising in the papers. Some merchants' ideas of a special sale window are to dump a lot of goods in the middle of the window in a miscellaneous pile with

a price stuck on the top. They say that this is a novelty in window decorating and attracts attention and sells the goods.

As for its novelty, it is the old original window trim such as the first merchant might have undertaken. The worst part of such a plan is that it is taking old goods that are to be put at a bargain, and instead of adding to their appearance in every way so as to make them look as much like fresh stock as possible, it adds to their appearance of age and shelf-worn quality.

The oldest goods in the store can be made to look more attractive if displayed with pretty trimmings and fixtures than if thrown upon their own resources.

The window can be helped much and trimming made far more easy by the use of such fixtures as are made nowadays purposely for windows. When you begin your window campaign, or when you begin it over again after reading this, go or send to the best fixture house you know of and stock up with such appliances as your window dresser deems useful for his work. It will pay you to have these things. They will save work and they will save the goods. They will make it far more easy to use goods in decorating without making them look second-hand.

The beginner in window trimming should no more tackle window schemes beyond his ability than the tyro at the piano should attempt the masterpieces of music. It requires much experience to trim windows well, and the art is not the simplest, either. The novice must proceed warily lest he make failures that will cause him to appear ridiculous.

Before removing one display from the window, have the next one not only planned but as nearly as possible ready to put right in. Some stores pull down their curtains and keep them down for a day while they dress a window. It may take them a day to do the trick, and we have known of places where they took two days, but there is no need of losing a day on a window. If it takes so long to dress one, after everything is made ready outside of the window, you are using more elaborate trims than you can handle, or else you ought to have the work done at night.

The windows should be made to supple-

ment the newspaper advertising, and the two work best together when the displays are of goods that are being advertised at the time. In such a case it is usually well to run in the window such display cards as reproduce the catchy headings of the ad. as applied to the goods in question. I have known dealers who reproduced in the window an almost exact copy of the newspaper ad; this is not as difficult as it might seem, though requiring some preparation. Make a white background for the window to represent the page of the paper before printing the ad. Beginning at the top, copy the wording of the advertisement, abbreviating it if necessary to make it go into the space. The novelty of the display comes in in the fastening of the background in the place of any goods which might be mentioned, the goods themselves making a sort of huge rebus of the exhibit.

Such a thing is more practical as a novelty than as a regular display. However, displays occasionally which show great ingenuity are valuable on account of their making people think of you as a clever window dresser—a notion which, if it becomes at all prevalent, will result in shoppers as well as the more curious crossing the street on purpose to see what you have done last

The window trimmer in most stores must expect to work, and work hard. If it is a busy time, he is kept hustling to make the necessary changes in order to get as many goods before the public as possible. In the dull seasons he must rack his brain to think of schemes and displays that will tempt the public's jaded taste. There is no rest for the successful window trimmer.

The successful decorator is usually the man whose window trims run to comparatively simple displays rather than to those that are made up of much "gingerbread work." A display that is simple and suggestive of a need on the part of the observer, with a means of filling that need, will be the winning display.

The best workers in this direction to-day are not as elaborate in their plans as were those of a few years ago. There is a tendency toward a richer dressing and yet a simpler. The clean-cut, easily comprehended exhibit with nothing to confuse the mind is the winner. An article shown at its best and an attractive price make up the first principle, and any deviation from that should be in the line of making it more pronounced.

The city window trimmer finds that it is easy to get anything he wants to work with in the way of fixtures, etc. The country window trimmer is less fortunate, but, on

### Storekeeping Department.

On the other hand, the windows in the country store are more valuable in proportion and the results from window trimming are greater. There is less and poorer competition. Less expense is necessary to obtain results.

Window trimming calls for a continuous search for ideas. These may be found in the windows of other stores, especially if the worker may visit other cities and see the ideas that are followed there. Ideas are obtainable in a thousand ways, and everyone that enters the mind should be set down in a small book kept for that purpose.

There are some lines of business where the dealers have always said they could not see how they could make window displays that would be of any advantage. There are some lines where the dealers have always talked just that way about advertising, but that has simply been proof of the lack of enterprise on the part of that particular dealer, rather than a lack of opportunity. Talk about a business that will not permit of window displays, even the newspapers are using their windows at great expense in some cases to show the public what they are doing.

You can use your windows and you can make money with them; small dealer or large, you will find that your windows are always worth something to you, and you can make them worth more and more accordingly as you use them well.

### The Way of the Enterprising.

MANY jewelers keenly feel the rivalry of the mail-order houses which send out elaborate catalogues and seductive literature. A jeweler and clock dealer in one of the livelier of the western cities recently undertook to show the disadvantages of this kind of trading by a comparative display made in his window. He had a big sign on which was shown a picture of a miserable pig, labeled:

THE PIG IN THE POKE.

One side was a clock somewhat battered and not running, and at its side a picture of a much more beautiful timepiece, a page torn from the catalogue of the mail-order house. The illustration represented what the purchaser had selected, and the clock was what was alleged to have been delivered. In front of this was an itemized statement of the total cost of the timepiece, to which was added the cost of putting it in running order. On the other side of the window was a clock taken from the regular stock of the jeweler. The latter was in running order and represented much better value for a smaller expenditure. This was an eloquent lesson in favor of the home dealer.

A "Skidoo Sale" was announced by an energetic western merchant recently. Everything had to go and the price of every article offered contained the figures "23."

In order to attract new patrons to a store "Charity Sale" is a novel idea. It is announced that \$1,000 will be contributed to

some one of the local charities, the lucky institution to be decided by a voting contest. Every visitor to the store is given a ballot upon entering, and allowed to vote once on that particular visit, but on certain days it is announced that one vote will count for two. This plan was adopted by a retail dealer recently, the result being that a great deal of interest was manifested and the business done more than warranted the outlay.

A silver loving cup, which was won at the Greenfield Hill (Conn.) Fair, recently, by the horse "Helen Z.," that was adjudicated the most handsome equine, was exhibited for several days in the show window in the retail jewelry store of C. H. Dilworth, Norwalk, Conn.

What is said to be the largest pear ever seen in McKenzie, Tenn., was exhibited a short time ago in the show window in the store of W. R. Crawford, of that place. The

### The Attractively Furnished Store of H. Cohen & Sons, Indianapolis, Ind.

ONE of the attractive retail stores in Indianapolis, Ind., is that conducted by H. Cohen & Sons, now entering upon their fourth year.

The store is located at Pennsylvania and Market Sts., just at the head of the financial district, and in one of the best locations in the city.

In 1869 H. E. Cohen engaged in the jewelry business there, conducting it until about four years ago, when he took his sons, B. B. and I. G. Cohen, into partnership, under the present firm name.

### Stray Items of Business Philosophy.

THE trade of the moneyed class is most desirable, but don't get the name of running a store for one class of customers

INTERIOR VIEW OF THE STORE OF H. COHEN & SONS, INDIANAPOLIS, IND.

pear was grown by the jeweler in his own garden and weighed 26 ounces.

A gold brick—not the antiquated device used to lure unwary specimens of the race, but the genuine article—makes an attractive window display. Samuel Perkin, 128 N. 6th St., Allentown, Pa., is showing in his store window a genuine brick of gold. The brick is from the Philadelphia Mint, and is the result of the refining of the jeweler's gold filings during the past year. It weighs about 22.22 ounces.

A window display which attracted much attention recently was that of the C. Howard Daley Co., Danbury, Conn. The concern showed in the display window a stuffed and mounted Hungarian partridge. With the bird was shown a small photograph of a partridge nest, with 10 eggs in it.

Daniel Buegeleisen was recently convicted of obtaining a diamond by false pretensions and trying to pass a bogus check on G. B. Rose, a jeweler of La Crosse, Wis. Buegeleisen was sentenced to three years in the Waupun Penitentiary

unless that class is large enough to supply all the business you want.

When you find that you have a salesman who is too good at selling, who overloads his customers or who misrepresents goods to sell them, give him his release forthwith. You can't afford such a luxury.

The goods of the season should be put in rapid motion. As "left-overs" they not only diminish their own value, but they put a false flavor on the store itself.—*Canadian Pottery & Glass Gazette.*

### Lost or Found?

JUDY JEWELS:—"Can you tell me where lost articles of jewelry are kept?"

STATION AGENT:—"No, madam; but they keep found articles over there in the Lost and Found Department."

R. Branchaud, Cavalier, N. Dak., has added a plate glass show case, with adjustable ribbed glass shelves and electric light attachments, and made other improvements in his store.

These well-known Razors, the quality of which is warranted, possess this great advantage, that they may be used for ten years before they require actual sharpening. Before using them it is necessary to rub them on good leather strop. Le Coultre's Strops (to be had with the Razors) should be used in preference to others.

THIS CUT IS TWO-THIRDS OF REGULAR SIZE.

"SPECIAL"—Single Razors for Jewelers' Travelers at trade price.

# WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]  
No attention paid to communications unless accompanied by full name and address of the writer.

**QUESTION No. 2124.—Melting Silver.**—Through the columns of your valuable paper would you kindly give me full particulars as to the melting of silver? I have melted as follows: I place the scrap silver in a crucible after thoroughly examining to determine that no foreign substance exists. When the metal is just about melted I place in a very small portion of powdered borax. In the meantime I have heated the ingot just hot enough to allow its being touched with the hand with impunity. I stir the metal with a cherry red iron rod, and when the metal is thoroughly melted I let stand a few seconds and then pour. I also oil the ingot, but the silver bar always has a roughness. When rolled it becomes full of scales and is therefore absolutely useless. Would you also tell me what alloys I should put in pure silver in order to make it 925/1000 fine?  
J. W. McK.

**ANSWER:**—Cover the silver well with borax and the silver will run more smoothly. After it has cooled in the bar it should be pickled enough to remove all scale, in nitric acid diluted with two parts of water. If the silver has been melted over a number of times it becomes brittle, and new silver should be added. When rolling keep the silver soft by annealing frequently, and pickling to remove scales. Sterling silver contains 925 parts of fine silver and 75 parts of pure copper. They are alloyed and melted together in the same manner as pure silver.

**QUESTION No. 2125.—Gold-Reducing Agent.**—Will you tell me how much nitric or muriatic acid is used to "cut down" gold for a solution?  
B. L.

**ANSWER:**—For cutting down gold for a solution only enough nitric and muriatic acid are used to reduce the gold in the liquid. It is immaterial how much acid is used, the only drawback being that it takes so much longer to evaporate the acid to dryness, which, of course, takes longer for an excess of acid. Use two parts C. P. muriatic and one part C. P. nitric acid on the finely cut-up pieces of gold. Heat the evaporating dish gently over a warm sand bath. If the acid does not dissolve all the gold, then add a little more until the desired result is accomplished. Keep up the warmth of the dish until the whole is of the consistency of syrup. After this, treat in the usual way by adding warm water. Mix up well and run through filtering paper, and the gold is ready for the plating solution.

**QUESTION No. 2126.—Gilding Watch Plates.**—How can I gild watch plates? I have tried to gild them in the same way as

other articles, but they do not come out right.  
G. W.

**ANSWER:**—Watch plates are usually gilded in the regular way, with a cyanide of gold solution, then immersed in a mixture composed of copper sulphate, three parts; verdigris, seven parts; ammonium chloride, six parts; potash nitrate, six parts; acetic acid, 31 parts. After dipping, heat the articles on a sheet of copper until they turn dark or black, then treat with a solution of concentrated sulphuric acid, rinse off and dry. Or, in place of the above dip, prepare into a paste the following: Alum, three parts; potash nitrate, six parts; zinc sulphate, three parts; sodium chloride, three parts. Coat the articles with it, heat on an iron plate until they turn black, then wash in cold water.

**QUESTION No. 2127.—Painting Gold Signs.**—We want to put some gold lettering on a glass show case. Please tell us how we can make the gold leaf adhere to the glass.  
P. & G.

**ANSWER:**—To secure the gold leaf to the glass for lettering, a size is required. This size is made by dissolving finely cut isinglass, about one-half teaspoonful, in a little boiling water. Add as much alcohol as there is water and strain through silk. Draw the outline of the letters with anything that will mark on the glass, paint on the size with a fine brush and lay on the gold or silver leaf. When dry, heat the size and paint over the letters again, while warm; then put on another gold or silver leaf. When dry, mark the outline with soap on the back and proceed to cut away the surplus leaf with a sharp penknife to the soap mark. Paint over the letters again with a size composed of gum tragacanth in water, using the size very thin.

## Ormolu Gold.

(From the Brass World.)

**ORMOLU** gold wares are now extensively sold in a large variety of ornamental novelties such as clocks, jewel boxes, vases, trays, etc. Many concerns are engaged in its production. While a difficult finish to produce commercially on account of the great care that is needed in carrying out the different processes, there is no secret about the method used. It may be described in a very few lines:

The article may be of any metal, but antimonial lead or spelter is usually employed. These are sand-blasted by some concerns to obtain a fine matt finish, and left in the original surface by others who expect to obtain a sufficient matt finish out of the acid

copper deposit. The satin finish wheel is also used for this purpose.

The article is next cleaned in the regular manner and given a good, heavy coat of copper in a hot cyanide copper solution. A heavy deposit is necessary, as the acid copper subsequently put on does not "throw" sufficiently to reach all of the deep places. When the article is afterward dipped (as it has to be), the copper is removed in such locations. The object of the hot cyanide copper solution is to have it cover and throw to the best possible extent. From half an hour to one and one-half hours may be necessary for this operation, depending upon the character and whether the deep portions are prevalent. A good, bright, clean-working copper solution is necessary, and if used hot generally stands at about 6 degrees Beaumé.

The next process is the acid copper deposit. This is the regular sulphate of copper solution, and should not contain over one or two per cent. of free acid. If more is used, the edges of the deposit are apt to "burn." The solution should stand from 16 to 18 degrees Beaumé. From one to two hours should be used for giving this deposit, and it should be run slow. The pressure should be from one to one and one-half volts, and care must be taken to cut it down as soon as the edges show dark red from "burning."

When the acid copper deposit has been put on, the article must be dipped in a regular dip. Unless this is done, the surface will have a muddy tone, instead of the glistening luster, after the gold has been put on. The regular bright dip (not the ormolu dip) is used for this purpose. The article is simply dipped in it until a clean, uniform surface is produced, after which it is carefully rinsed and then given a brass deposit.

The brass deposit now put on is used to economize gold and give the yellow shade so much desired in gold deposits. If the gold is put directly on the copper, the surface has a red shade, and in order to overcome it a large quantity of gold would have to be put on—an expense too great for ordinary work. By first brass plating the acid copper deposit, not only can the least possible amount of gold be put on, but a better shade is produced. The brass should be a bright one, and to give it this property a small quantity of white arsenic is used. The brass is run at about 120 degrees F.

After the surface has been covered with brass no further deposit is necessary. If it is allowed to go on, the glistening effect of the acid copper will be obliterated. All that is needed is a mere "blush."

A gold deposit is now put on over the brass. The regular phosphate gold bath is used, and it is made from the chloride of gold. From three to five pennyweight of gold per gallon is used. The solution is used at a temperature of about 120 degrees F. The article is kept in motion while the gilding is going on.

After the desired color has been produced, the article is rinsed and dried.

The high lights are now burnished and the whole lacquered with a satin finish lacquer. When well done, an ormolu gold deposit will have a fine matt, glistening surface which is very beautiful and delicate.

## Modern Changes in Pottery and China Decoration.

ALTHOUGH the pottery industry is conservative to the last degree, as indeed it has occasion to be, yet the present era of hustle, labor-saving appliances, and competition has not developed itself without its influence being felt on our lethargic industry, says a special contributor to the *London Pottery Gazette*. The last 25 years have seen perhaps more changes in methods of manufacturing and decoration than the previous 50 years. Whether all these developments and changes are for the better may be left to individual opinion; the object of these remarks is to diagnose them and point out a few collateral facts connected therewith.

Could we be transported back to some year, say, between 1860 and 1870, and placed in a high-class crockery stall, one thing any rate would strike the experienced observer—the fact that so far as durability and finish of our wares is concerned, we cannot congratulate ourselves upon any material advance, with the exception, perhaps, of one or two leading firms. Another point may be mentioned by the way—that practically all the goods displayed would be of British production—a feature that would not be likely at the present day.

But to come to a closer inspection of our crockery stall, let us take a glance at the principal sources of decoration in vogue at that period. We should see what seems destined to endure through all changes of fashion, viz., the ordinary printed dinner, toilet, and tea patterns, and in practically all the colors that we see them to-day. Further we might see some of the identical patterns—pheasant, willow pattern, etc.—which for some inscrutable reason seem fitted with immortality. We might see printing in two or three colors—a style which has apparently died an undeserved death. Elaborately tinted and enameled tinted patterns would form the principal feature of the next grade, while in fancy articles and dessert ware, ground laid colors with hand-painted panels elaborately faced in gold—that is in real burnished gold.

At that period the art of the old pottery painter was at its height. The style was no doubt conventional, but it was undoubtedly clever. That it was original we cannot claim, being inspired by both Dresden and Sévres, but its dexterity of manipulation and the simple honesty of its effects are such that cannot be excelled to-day throughout the whole range of the British potteries. Groups and sprays of flowers,

rose, poppy, anemone, forget-me-not, pansy, every painter had a list of flowers, each of which required certain stereotyped but elegant turns and strokes of the brush, which were never departed from. An artist painting groups of flowers, say, on a dessert service, would go through the entire service with the roses, then he would follow with the anemone or poppy, and so on, till all the flowers being completed he would add leaves in two greens (light and dark), and afterwards put in tracing and various touches to his flowers, all according to rule. The principle was to work through in the various colors one at a time, and it was extremely curious to see how the parts of different flowers which happened to be of the same color were touched in when he was working in that particular color, having the appearance of a Chinese puzzle to the uninitiated. This style of decoration has become quite obsolete. In fact the art of the pottery painter of the more modern type is fast becoming defunct; there is a limited and diminishing market for the very highest class, and a similar demand, unfortunately, for the very lowest.

These, then, are the principal forms of decoration we should find in our old-time store, the sources of which would be printing, ground-laying, gilding, and painting, each entailing male skilled labor of no mean order. Now practically all the changes that have come about in the intervening years are due to three things, viz., liquid gold, the aerograph, and the chromo lithographic transfer, each one in its turn, it should be said, exercising a retrograde influence on the skill of the old pottery decorator.

The first named, dependent for its effect on its glitter and not to elegance and accuracy of line, has displaced to a large extent the old-fashioned gilder, whose place has been taken by women with technical ability which does not rise above ugly and inaccurate splashes of gold, and edges and lines of varying breadth. Incidentally, the art of the burnisher has become a disappearing quantity, as, of course, liquid gold does not require it.

The aerograph is not such a sinner in this respect, as there are many beautiful effects obtained by this ingenious contrivance, but there is no doubt it has exercised a decimating influence on the little army of groundlayers that existed formerly. The male groundlayer was once an important feature in a well-equipped pottery, and was a skilled worker of no mean order, but at the present time it is probable that one

might count on the fingers of one hand the firms that employ men groundlayers as such only. What is left of the old art of ground-laying is mostly what is known as "oil and dusting," which is an unskilled and feeble imitation of the old method, chiefly done by women. But it is the advent of the chromo lithographic transfer that has dealt a death-blow to the art of pottery painting, and further, adding insult to injury, many of the painters have gone over to their enemy and assist by what is known as "touching-up" and extending the lithos, to further cripple their industry; they have to do it or join the ranks of the unemployed. So we are compelled reluctantly to come to the conclusion that the principal changes during the period we have mentioned are due to inventions which militate against application and skill, and tend towards a dead monotony of mechanical processes, requiring a minimum of intelligence and capacity.

To revert a little to these forenamed items, for the benefit of the uninitiated we may explain that what is known as liquid gold is not a gold in the true sense of the word. Although containing a certain proportion of the precious metal it is in reality a lustre in composition. It is supposed to be a German invention, but the date of its inception is shrouded in mystery, and for a long period its exact composition was a mighty secret. Although it is pretty well known in England how it is made, up to the present time almost our entire supply is obtained from Germany and France. For a long time its use was very limited in this country, it contrasted so badly with the ordinary burnished gold that the trade would have none of it. Improvement, however, continued to be made in its preparation, a better color was obtained, and a greater facility for working it, till eventually opposition was broken down, and the years 1870 to 1880 saw a huge extension of its use, which has gone on increasing, till, at the present time, no potter who decorates his ware at all can afford to do without it. It is, however, even now a peculiar product, and has vagaries and disadvantages to which ordinary gold is not subject. Of course, it is the price, being only a fraction of that of ordinary gold, that has brought it into favor so extensively.

Of the aerograph little need be said except that it is an extension of the principle that is in vogue in every hairdresser's shop in the land, viz., a spraying device; color is blown through a small aperture in a kind of tube by compressed air. Its manifest advantage over groundlaying is in the facility it affords of varying the strength of

olor, and the delicate gradation of tint that it allows. Its manipulation is exclusively a feminine operation, and its introduction on a large scale dates from 10 or 15 years ago.

The application of a form of chromolithography to the decoration of pottery is an entirely modern affair. The first patent taken out for this process was by a Frenchman about 20 years ago. The difficulties connected with its perfection were enormous and intricate, but local firms have successfully overcome them, and at the present time our local productions are quite equal, if not superior, to the foreign article. The designs in this process are printed in ceramic colors on a film-like paper, which is placed on the pottery, previously sized, which retains the design, allowing the paper to be removed, when the ware is ready for the kiln. The effect of a good lithographic transfer is equal to that of a fine china painting and the difference cannot be detected by the casual observer. The only serious defect connected with this process is that of necessity, large editions of each design have to be produced to make it profitable, and, unless in the case of exclusive designs, one sees the same design so often on all manner of articles that the eye thoroughly wearies of it.

Of course, in this hasty review of the changes that have come about in modern times we cannot take note of all the various special decorations of firms, which spring up from time to time and are exploited with various success. What we have set out here are the main features that have modified and altered the styles of decoration that existed in the good old days when the art of potting was not a misnomer or the manufacture of pottery.

**How Nature Is Making Diamonds and Why Man Cannot Do It.**

ALL experiments, and they have been many, go to show, if not to prove, that diamonds are formed by the slow cooling of crystallization of liquefied carbon in an environment of other fused material at intense heat under enormous pressure, says *The Queen*.

To obtain any affective approach to the heat of the interior of the earth electric furnaces have been invented which are capable of producing a temperature of 5,500 degrees centigrade; and vessels of such strength have been made as to stand a pressure of 50 tons to the square inch. To the non-scientific mind these figures are practically incomprehensible, and the vastness of the first set can only be dimly imagined when one remembers that in the centigrade register the boiling point of water is represented by 100 degrees.

As to the second figure, we can vaguely illustrate its meaning by comparing it with the pressure produced in the underground laboratories of nature, which is enough to shake a continent, while the mere excess of the molten material, which is, as it were, boiling over, is sufficient to devastate whole districts and bury entire cities.

The third condition precedent to the making of a diamond is slowness of crystallization, or, in other words, length of time. Sir William Crookes, who has made dia-

monds, plunged his white hot crucible into cold water, with the result that any crystals produced generally exploded a short time after being liberated from their matrix, even if they did not do so before.

If the scientist cannot wait long enough for the cooling process, the rogue in a hurry to be rich by deceiving people cannot afford to wait. Hence there is no chance of a swindler achieving any real success, for he could not afford to wait long enough for the proper crystallization, even if the other conditions were present.

There are many tests for ascertaining the genuineness of a diamond, some simple and some more difficult of carrying out, such as the use of the cathode rays, under the influence of which paste does not glow as do the real gems. But nature herself has imposed a condition and test which none but the genuine stones can stand.

Her test is simply that of time, and the proof of fraud, which is at once decisive and penal to the artificially made diamond, is simply self-destruction—it explodes and dissolves itself into dust. We have seen that the gem is produced under immense pressure, but as the outside solidifies first and carbon has the abnormal property of expanding instead of contracting on solidification there is generally a condition of strain in the interior of the crystal which sooner or later, but usually very soon, causes the stone to explode.

This occurs indeed not infrequently in nature, when the gems have crystallized under relatively rapid cooling, and the diamond soon after its removal from the enveloping matrix, the so-called "blue ground," explodes. This is doubtless the case with the great Cullinan diamond, the largest yet discovered, measuring four by two and a half and two inches and weighing before cutting nearly one and a half pounds.

It was a part only of an enormous octahedron, which had probably split owing to this internal strain. Even if "scientific" diamonds could be made no one in his senses would purchase a gem which was liable to destroy itself at any moment, and no reputable firm would dream of selling jewels which might explode even before the customer got home.

Chemically produced or "scientific" diamonds were first experimented for by J. B. Hannay in or before 1880, and by Sydney Marsden in 1881, who produced black and transparent diamonds; but the first authentic artificial preparation of the diamond is due to the celebrated French chemist, M. Moissan, who followed Mr. Marsden's experiments in 1894-1905.

The French savant, however, never succeeded in obtaining transparent diamonds by his process; at least the white crystals yielded to reagents and were probably not pure carbon. These results, although deeply interesting to scientists, have not the least interest to any one else. For one thing the "diamonds" are so small they need a magnifying glass to see them, the largest ever produced being only one-fortieth of an inch long.

The firm style of the business conducted by Charles H. Rothinghouse, Jonesboro, Ind., will hereafter be known as Rothinghouse Bros.

FERN AND FLOWER DISHES

**P**ORCELAIN dishes for holding ferns and flowers for the table have

oddly shaped pedestals. One of the newest designs shows the body of the dish resting on six pedestals, suggestive of Greek columns. An attractive and unique centerpiece for holding flowers is made with higher stands than have previously been used. Its shape is a narrow oval, and at the blunted ends the dish proper rests on columns which are attached to a flat oval base. Sometimes there is a silver pedestal or standard with a porcelain fern dish, and again entire porcelain centerpieces are seen. Another novelty of this kind is oval in general outline, with the entire surface cut in squares, giving a lattice effect. These are open, and under the dish of metal there fits one of a contrasting color, of green glazed pottery or brownish porcelain. The legs are slender silver columns finished at the base with a claw and ball design.

FINE IMPORTED CLOCKS

**A**TTRACTIVE exhibits seen at the salesrooms of Theodore Schisgall, im-

porter of clocks, 116 Chambers St., New York, include a dainty mantel set. The clock is set in a standard of white marble which rests on an oblong base embellished with decorative effects in golden bronze. The face of the clock is partly surrounded with a wreath pattern, while at one side of the clock stands a bronze Cupid. One of his arms is raised above his head and in his chubby hand he lightly holds an arrow. The other hand holds his bow pressed against his breast. At the top of the standard is a quiver filled with arrows. Each of the two candelabra, which are finished in keeping with the central piece, have a small bronze Cupid who is about to climb the standards toward the three gracefully curving arms which support cups used for the candles. Another attractive clock set seen at the same salesrooms has a clock mounted in a standard resting on a white marble base. The base of the clock is decorated with a design showing a basket filled with fruit. On top of the standards is a bronze statuette of an infant with arms outstretched toward its mother who is standing at one side of the clock.

THE RAMBLER.

The jewelry store of Victor A. Engstrum, Evanston, Wyo., was robbed one morning recently of diamonds and gold jewelry valued in all at about \$1,500. Entrance to the store was gained by prying open a rear window with a jimmy. A reward of \$500 has been offered for the apprehension of the thieves by Gov. Bryant B. Brooks, of Wyoming.

ANOTHER PAGE FROM OUR TOILET WARE CATALOGUE

The Standard Railroad Lines of the Country insist that all of their employees in the operating departments have high-grade watch movements, and these movements must be encased in dust and moisture-proof cases to ensure their keeping accurate time.

Fahys Cup Screw Cases, made in "Permanent," "Bristol" and "Montauk" qualities, are in great demand and give satisfaction at all times; hence their popularity with Railroad employees and mechanics.

## INTERCHANGEABLE CHATELAINÉ WATCH OR LOCKET FOB

The above illustrations represent a few of our newest ideas. The Chatelaine Watch Fob and the Chatelaine Locket Fob to be worn at the belt: more secure than the old fashioned Chatelaine: does away with soiling the dress or shirt waist: safety catch on back of the Watch Fob, making the watch secure, also Washburn fastener, attaching Fob to belt.

Our Locket Fob has already proven itself to be a great seller. We predict for our Watch Fob great results. It is a winner. Write for samples. We sell the wholesale trade only.

WENDELL & COMPANY  
OF

47 John St., New York, and 57 Washington St., Chicago

**SHELDON'S PATENT HAIRSPRING COLLET REMOVER**

**CROWN PLIER No. 331**

For clamping the collar of crowns on dust-proof cases while removing same from pendant. This is usually found a difficult task but easily done with the help of this plier.

Nickel plated.....each, \$ .60

No need of any more distorted hairsprings or bent balances. Every watchmaker knows how troublesome it is to remove the collet without either distorting the hairspring or bending the balance; with the aid of this tool the difficulty is overcome. The tool is provided with a pair of spring fingers, curved at the ends and ground very thin and sharp. By tilting the balance the jaws may be slid under the hairspring and by pressing the jaws together it will readily loosen the collet and then by turning the central screw, which has a hole in the end to receive the staff pivot, you can force the collet from the staff, without injury to balance or hairspring. The adjustable screw nut is provided to avoid wear or injury to the jaws. A glance at the illustration will demonstrate the utility of this tool. Finely nickel plated.

**Price, each, \$1.25**

**ECHARCO WATCH GLASS CABINET No. 15 (Patented)**

Top View, Showing Skeleton Frame of Drawer. Accumulation of dust and chips is impossible.

The Most Modern Watch Glass Cases are the Echarco, Nos. 15 and 20.

These Cabinets have many new features not found in any other. Novelty and usefulness are the chief arguments in their favor.

**Construction and Material.**—The cases are made of oak, finely finished and of attractive appearance. The sides of Cabinet No. 15 are paneled. Partitions are of basswood and put together in the best manner possible.

**Partitions** are skeleton, preventing accumulation of dust, chips, etc.

**The Bottoms of Cabinet No. 15** are hollow, while Case No. 20 has a special drawer to receive chips dust, etc.

**Arrangement for Glasses.**—Case No. 15 has nine drawers with a total of 1,547 spaces, and Case No. 20 with four drawers, has 784 spaces, to hold glasses in upright position.

Labeling of drawers, as shown in cut, is on the pulls of the drawers and done in gold bronze or black background.

**Dimensions and Weight of Case No. 15.**—Width, 24 inches; Height, 29½ inches; Depth, 12 inches Weight, net, 45 lbs.; Weight, including packing case, 75 lbs.

**Dimensions and Weight of Case No. 20.**—Width, 26 inches; Height, 13¾ inches; Depth, 11¾ inches Weight, net, 30 lbs.; Weight, including packing case, 50 lbs.

The construction of drawers, the arrangement of partitions to economize space and weight, and the novel method of showing contents on drawer-pulls are all prominent characteristics and extremely well thought of.

**ECHARCO WATCH GLASS CABINET No. 20 (Patented)**

**Price, No. 20, Each, \$7.75**  
 " No. 15, " 16.00

**SET OF 12 BEADING TOOLS, WITH INTER-CHANGEABLE HANDLES No. 50**

The rosewood handles have brass bushing so that the beading tools may be used by hand or hammer.

**Per Set, \$2.00**

**SET OF 6 CARBORUNDUM DISKS No. 100**

The variety of shapes should make this a desirable article on the bench.

**Per Set, 90c.**

# Leadership in Business

like leadership in anything else, is simply the working out of nature's law of the survival of the fittest. Show me a business that is successful and I will show you, in ninety-nine cases out of a hundred, one that deserves to be. The law of the universe constantly seeks and demands the best and casts out the useless and unfit.

If you would be successful you cannot afford to give anything less than the best that is in you, and that man is worse than a fool who undertakes to succeed by trickery, chicanery or dishonesty, for when he attempts to cheat his neighbor, or deliver less than he sells, he injures himself beyond repair. His deceit will find him out and surely tear down and destroy.

It has been our constant aim in business to deliver more than we sold. Our sun is still shining.

**PROMINENT RETAIL JEWELERS who have used THE ARNSTINE CATALOGS**  
**WHAT WE HAVE DONE FOR THEM WE CAN DO FOR YOU**

The Leffert Brothers Stores, Council Bluffs, Iowa, and Portland, Oregon

Store of Emil H. Leffert, Council Bluffs, Iowa.

**Read Our Customers' Letters**

COUNCIL BLUFFS, Ia., Jan. 22, 1908.  
 THE ARNSTINE BROS. COMPANY,  
 Cleveland, Ohio:

*Gentlemen* We wish to testify to the efficacy of our Catalog, as furnished by your house, as a "puller." It was given the supreme test during the recent holidays, and proved its worth.

The financial slump made things look a bit dubious for a time, coming as it did right at the beginning of the holiday buying season. We went ahead, however, and covered our territory thoroughly with the Catalog, and awaited results.

The Catalog did the business. It presented our goods in such tempting shape that people seemed to forget the panic. Of course, we did other advertising, but we know from remarks made by customers that the Catalog was at work all the time, everywhere.

As a result, we brought up at the end of the holidays with a better showing than last year, which we consider going some in the face of the financial breakdown. All honor to our Fifth Catalog.

Very truly yours,  
 EMIL H. LEFFERT.

**This firm used The Arnstine Bros. Company Catalogs in 1903, 1904, 1905, 1906 and 1907, and again placed order for 1908.**

PORTLAND, Ore., Feb. 5, 1908.  
 THE ARNSTINE BROS. COMPANY,  
 Cleveland, Ohio:

*Dear Sirs*—Replying to your letter of Jan. 17, we would say that our holiday business, in the face of the financial flurry, was very large and taxed our clerical force to its utmost. The numerous calls for goods illustrated in your Catalogs; the aid it gave the customer to make a selection, through its numerous choice illustrations, speaks volumes for your Catalog as an advertising medium.

While 1906 was our first year in business in this city, we were thoroughly acquainted with your Catalog's good qualities through our main store at Council Bluffs, Iowa, where it has been since 1903, and while we expected some results, were afraid that the financial crisis would be a serious barrier. However, happily, we were mistaken, for our holiday business was all that we could have hoped for even in normal times. This, we are satisfied from careful observation, was the result of the drawing qualities of your Catalog, combined with judicious advertising patterned after the splendid "copy" and electro-types you so kindly furnished.

In conclusion, we wish to add that we are entirely satisfied with our Catalog experience and shall certainly place an increased order whenever your Mr. Arnstine can make it convenient to call on us.

Yours truly,  
 LEFFERT BROS.

# Real Rose Hat Pins

**This will be the largest selling article this Fall and Winter—it is already.**

So remarkable are the sales of DELAMOTHE Real Rose Hat Pins that we do not expect dealers to believe same until they have actually tried them out. It does not seem possible that during JULY this product was sold by Retailers at the rate of two to twenty dozen daily—EVERY day. The retailers' profit is unusually large. Not only are they proved big sellers, but they are a great attraction for the stores that sell them. The largest Advertising Campaign in years is behind this product. Every possible Advertising and Selling Help will be furnished Dealers gratis. This product will be sold to the best dealers only, and retail prices will be strictly maintained.

DELAMOTHE Real Rose Hat Pins are made out of live roses, changed by a secret process into metal, then finished in attractive colorings and mounted on Hat Pins. This SECRET process is a recent discovery of Prof. L. G. Delamothe, a noted French Electro-Chemist, and is owned solely by the Delamothe Natural Art Decorating Co., Spokane, Washington, for which this Company is the Sole Distributor. It is the ONLY process by which an OPEN Rose can be perfectly metallized. This product is made in the finest manner possible, and its high quality will be maintained. The Roses used are grown in Oregon and Washington, famous the world over for their beauty and superiority—made where these Roses grow. No two Real Rose Hat Pins are alike. Finished in five colors to conform to the prevailing fashions in millinery. Six sizes, from the smallest rosebud to the full blown flower.

**Not sold through Jobbers.**

*Do not buy inferior imitations. Sold direct only.*

**Write for Illustrated Price List**

# SPECIAL Blackinton Locket Combination

## 18 Old Reliable W. & S. B. ★ Locket for \$31.15

Above are shown 18 of the *handsomest* and most *salable* lockets ever produced. The price of this combination of lockets to Retail Jewelers is \$31.15, and the total retail selling price is \$51.92.

This is undoubtedly the most desirable combination of lockets ever offered. There is *not a poor or doubtful seller* in the lot. With the lockets we give *free of charge* a handsome velvet lined case in which to display them, and keep them in perfect condition.

This combination is sold *only through the jobbing trade* and the universal price of the 18 lockets and velvet lined case is \$31.15 to Retail Jewelers. The *retail selling price* of each locket is plainly marked on a tag, the prices ranging from \$2.08 to \$3.50 and aggregating \$51.92 for the lot.

Order early to insure prompt delivery. If your jobber cannot supply you write us direct and we will tell you where to get the goods.

**These goods are NOT sold to department stores or retail catalog houses.**

# Cigar Chests

EXCLUSIVELY FOR THE JEWELER

THERE IS ALWAYS A DEMAND for the finer products for the use of gentlemen. To this class belong the Cigar Chests described in these paragraphs — except that instead of calling them “*the finer*” we should call them “*the finest.*” They furnish an added luxury to smokers, and an attractive opportunity to the Trade.

A DISTINCTION — It is important to note at the outset that these goods are not to be confused with other chests which have long been on the market and which have obvious disadvantages. For example, the efficiency of the last named goods depends on keeping a proper and even humidity by means of a moist blotter or pad — an impossibility. The pad is generally too wet or not moist enough; or, what is most frequent of all, is forgotten altogether and left dry. The contrivance is too troublesome to care for and the smoker generally gives up the attempt.

These Cigar Chests are totally distinct in principle and construction, and accomplish their purpose perfectly. They are absolutely *air tight*. All that is necessary is to keep the cover closed and locked. The natural virtues of the contents are retained unaffected by external atmospheric conditions.

Capacity	Width	Outside Measurement	Length	Depth	Oak or Mahogany	Rosewood or Circassian Walnut	
50 Cigars	8	x	11½	x	5	\$8 50	\$13 00

GENERAL OFFICE, MERIDEN, CONN.

# A Timely Suggestion

**L**AST month the Whiting Company directed attention to two of their new patterns—the “MADAM JUMEL” in Flat Ware, and the “FLORENTINE” in Toilet Ware.

These patterns, both of which have already attained a notable degree of success, are indicative of the general scope and character of the Whiting Company's recent productions in sterling silver ware.

Those Jewelers, therefore, who wish to add to their stock of silver ware suitable for the Fall and Holiday Trade will find the entire line of Whiting goods marked by the same characteristics of graceful design, admirable workmanship, and moderate prices as distinguish the “Madam Jumel” and the “Florentine.”

32nd STREET

# STERNAUWARE

has won such favor that it is now an essential part of the stock of every enterprising Retail Jeweler. Most wares the jeweler sells are designed for ornament rather than utility. The primary object of every Sternau article is *practical usefulness*, but each is also remarkable for its *beauty*, being elegantly ornamented. These combined qualities explain the demand for *Sternauware* on the part of Jewelry patrons.

As a sample, take the Chafing-dish shown in this illustration. Not a lady enters your store but knows the advantages of possessing a Chafing-dish and would quickly see the superior qualities of the Sternau article.

# The Shepard Manufacturing Co.

MELROSE HIGHLANDS, MASS.

We are the leading manufacturers of high-class wares in Cloisonne French Transparent Enamels. Formerly these goods were made abroad, and the work done by hand, and the prices charged for the goods put them beyond the reach of the ordinary buyer. By our process of manufacture we are able to put on the market work that is equal in every respect, including design, finish, and the beautiful transparent effects that are obtained in the foreign productions, and at a price that is only a fraction of the cost of the imported articles. Many of our newest designs are made up from the advanced 1909 designs from Paris. The enamel lad is on in this country as well as in Europe, and we are the leaders in the line.

Our representatives are out with a full line of samples, and it would pay you to await their call, and to see our line before purchasing.

Our new Fall lines include the following:

- |                                 |                              |
|---------------------------------|------------------------------|
| <i>Gentlemen's Vest Buttons</i> | <i>Ladies' Dress Buttons</i> |
| <i>Cuff Links</i>               | <i>Buckles</i>               |
| <i>Stick Pins</i>               | <i>Hair Pins</i>             |
| <i>Bon-Bon Boxes</i>            | <i>Hat Pins and Brooches</i> |

They embody several of the latest creations from the celebrated French artists.

Definition of a Battleship:

## "A MACHINE TO FIGHT BATTLES WITH"

We do not require a Battleship; our battles HAVE BEEN WON; the constant increase of our business attests to the veracity of our statement.

Follow your predecessors if you have not fallen in line, it will redound to your benefit. Send US your orders for WATCHES DIAMONDS, JEWELRY, WATCH CASES, MOVEMENTS, FESTOONS, LA VALLIERES, LINKS, SCARF PINS, BROOCHES, NECKLACES, SIGNET RINGS, STONE RINGS, and EVERYTHING appertaining to the jewelry business.

*You will save Money. Get the Styles and Dependable Qualities*

WE MAKE

## The Alliance Ring

The graceful style of the Alliance Ring is rapidly supplanting the use of the old-style wedding ring. The joints are invisible, and whenever engraving is desired it is done in the inside surface. Can be easily separated by inserting a pin in inside pinhole.

14 karat, 3 dwts., each, \$1.25 per dwt.; in dozen lots, \$1.15 per dwt., net; 18 karat, 3 dwts., \$1.40 per dwt.; in dozen lots, \$1.30 per dwt., net.

**ENGELSMAN'S PATENTED COMBINATION "GEM" DISPLAY RINGS and ADJUSTABLE STONE HOLDERS MEET A LONG-FELT WANT**

**THEY ARE MONEY-MAKERS AND MONEY-SAVERS**

UNMOUNTED STONES of any size and shape can be displayed advantageously, as is herein illustrated. Your investment in stock can thereby be *decreased*, as you need not mount them up in expensive settings. Your sales will also *increase* by being able to exhibit unmounted stones. The prices are *low* enough to induce you to buy them and *save* you from incurring frequent losses caused by the awkward handling of the tweezer when your customer desires to examine unmounted stones. Try them. For sale by all jobbers.

Due to greatly improved automatic machinery and reduced cost of production, we are now quoting these as follows:

Sets of 18 (full set), in box,	\$6.00
" " 12	4.00
" " 9	3.00

THE  
 DIRECTOIRE  
 NECKLACE

TASSEL  
 AND DROP  
 EFFECTS

**T**HE CHARACTERISTIC grace of these Directoire Necklaces impresses one at a glance. They are distinctive, historically and artistically. With appropriate Tassel and Drop, they correctly embody the typical "cravat effect." The decorative center and focus is the Chimera with dragons and other designs of Oriental inspiration. The Sapphire is properly the reigning stone. It is imitated skillfully. Every Necklace is true to its Period from the first link to the tassel-ends. They are beautiful withal. And not expensive. Displaying handsomely, these goods do credit to any establishment.

# The "Krementz-Bodkin Back" STUD and VEST BUTTON

Pat. Feb. 16, 1904

"Not One-Piece but One-Piece Construction."

The simplest and best mechanical Stud or Vest Button made.

KREMENTZ & CO. invite the following comparisons (or any others that you can think of):

## CONSTRUCTION.

The "KREMENTZ" Bodkin Stud and Vest Button

1. Is absolutely solderless
2. Is made of solid, hard spring metal throughout
3. Has no spring or tubing to bend or break

## QUALITY

The highest grade of mother-of-pearl, half pearls, whole pearls, diamonds, sapphires or whatever material is used.

## FINISH

The regular "KREMENTZ" finish which has helped very materially in the building up of our business.

## OPERATION

Very simple. Easily inserted or removed without fear of bending the post or marring the shirt or vest.

## PRICES

Lower than those of any other makers.

## DURABILITY

See our guarantee.

## GUARANTEE

If for any cause whatever, a "Krementz-Bodkin Back" Stud or Vest Button should be damaged either in the hands of the dealer or wearer, a new one will be given in exchange, without charge. "Krementz-Bodkin Back" Studs and Vest Buttons are made in large variety of patterns in 14-kt. gold and platinum, set with pearls and diamonds.

# OFFICIAL ELK EMBLEMS

The following is taken from Official Circular No. 1, issued by Hon. R. H. Holland, Grand Exalted Ruler of the Elks:

NAME AND EMBLEM.

The Commission on Protection of Name and Emblem submitted an exhaustive report which will be printed in full in the proceedings of the Grand Lodge. This commission also reported to the Grand Lodge a design which was unanimously adopted as the Official Emblem of the Order and the commission was instructed to have the same fully protected by Letter Patent. Unfortunately the description of the emblem has appeared in the public prints from which cuts have been designed and printed purporting to be the genuine. Manufacturing jewelers in utter disregard of our rights are flooding the market with a so-called Official Emblem. I therefore deem it my duty as Grand Exalted Ruler to denounce this unwarranted interference with our rights and to call upon every brother to REFUSE TO PURCHASE OR TO WEAR THESE SO CALLED OFFICIAL EMBLEMS. The commission is actively at work and as soon as these complications are adjusted or rights protected and permission granted to manufacture and place the genuine official emblem on the market, the order will be advised by official circular.

Domestic Products up to Imported Standards. High Class Goods. A Revelation.

**NOTHING EQUAL** to these Jewel Boxes has ever been produced before, except in solid silver. Made of heavy, hard Rolled Brass and Nickel Silver, they cannot be compared with the cheap castings which break so easily—yet the price is low. All popular finishes, including Butler and Oxydized Brass, Butler and Oxydized Silver and Roman Finish Gold. Handsome designs. Fitted with lock and key. Satin and velvet linings. Compartment trays with larger sizes. A line you can recommend.

PRICES: FROM \$4.00 PER DOZEN TO \$10.50 EACH

# "New Process" GILLETTE Blades

## Have You Got Them in Stock?

"New Process" GILLETTE blades have been an instantaneous success.

They differ in price, quality, appearance and style of package from the previous kind, and the public is being notified of the change by full-page advertisements in all the leading magazines.

More than two million GILLETTE users will now accept only "New Process" GILLETTE blades. If you have them in stock before other dealers in your locality you will get the business, and at the new price your profit is a very liberal one.

"New Process" blades are manufactured by newly-invented machines and processes, making them superior in appearance, operation and endurance to any blades ever produced by anyone.

These machines are automatically regulated, and grind, hone and sharpen each blade individually with the utmost precision.

Every cutting edge is perfect, and possesses a degree of keenness not produced by any other process.

"New Process" blades are finished with a high polish that renders them easy to

clean. Since dust and moisture do not cling readily to a polished surface, these blades are practically immune from rust.

"New Process" blades are packed in a handsome nickel-plated box which seals itself hermetically every time it is closed. This shuts out all dampness and effectively protects the blades from rust in any climate, land or sea. When empty, the box forms an attractive waterproof match safe.

**The set now contains twelve blades.**

**The Retail Price is \$1.00 per set.** Twelve sets are packed in a carton.

To those who are not handling the GILLETTE, we suggest, "Get Busy." Get the sales resulting from our huge advertising campaign—the increased business and profits that the co-operation of our Sales Department will bring you.

YOUR customers are continually seeing GILLETTE advertisements and they want the razor. Eventually they buy it somewhere.

**WHY NOT OF YOU?**

Write us for catalog and liberal discounts to dealers.

# THE JEWELERS' CIRCULAR

WITH WHICH ARE CONSOLIDATED

THE HOROLOGICAL REVIEW

THE JEWELERS' WEEKLY THE JEWELERS REVIEW

VOL. LVII.

WEDNESDAY, OCTOBER 14, 1908.

No. 11.

## Some Fine Examples of German Silversmithing in the Pure Styles of Former Periods.

THE German precious metal industry continues to produce very creditable work which is well worthy of attention. In addition to prominence in the jewelry industry, the city of Hanau for instance occupies a leading position in the silverware industry proper, notably as regards plastic corpus metal work. In this respect,

parts of the world and to-day we still find a number of factories that keep up a lively competition among themselves in this field.

In this issue we illustrate some especially original specimens in fine execution and pure styles in this particular branch, from the shops of J. D. Schleissner Sohne, of Hanau, who also had a fine ex-

copies, fully deserve the designation of "masterpieces," may be found in private collections and museums, where they bear

SILVER NEF IN FORM OF MEDIEVAL GALLEY.

at all times. the proximity of the commercial city of Frankfort has not been without its influence, moreover the classes in embossing and chasing at the Royal Academy of Design have attracted a great deal of talent to Hanau. Here the budding ability found opportunities for cultivation and in many instances the ambitious young artisan found and finds employment in the local silverware establishments. Hanau silversmiths have been famous for centuries; they supplied masterpieces to all

hibit at the recent world's fair in St. Louis, Mo.

A special branch of the Hanau silverware industry is devoted to the production of the so-called "modern antiques." Innumerable masterpieces of Roman and Greek origin, are faithfully copied; at the same time, the ancient working methods are given scrupulous attention, so that it takes the practiced eye of the connoisseur to distinguish between the original and the copy. Many such works of art, which, although

EQUESTRIAN FIGURE OF IVORY AND SILVER.

eloquent testimony to the industry and skill of Hanau's workers in precious metals.

Registered Trade-Mark

ing a Roman battle. The figures in this wonderful ornamental plateau stand out to a height of two inches, the piece being embossed entirely by hand in a most vigorous manner, after a medieval example.

On this page and pages 63 and 69 are shown illustrations of the following interesting productions by the same firm:

An equestrian figure, representing the Prince of Lichtenstein, in fine, rich silver mounting. The horse and face of the knight are in ivory.

A fine "nef" for use as an "aquamanile," being a reproduction of a medieval galley.

A six-branched candlestick, in true Louis XVI style.

An Empire tureen, with base, a replica of one formerly in the possession of Napoleon I.

A mug and dish, with richly embossed pure Renaissance ornaments.

A set comprising tea kettle, coffee pot, tea pot, milk pitcher and sugar bowl, on a large ornamental silver tray, a fine example of the "Dauphin" style. This is a show service of the highest order (See page 69.)

All these pieces are worked entirely "free hand," *i.e.*, without the use of dies and moulds. The embossing and chasing is done after the manner of the Augsburg and Nurnburg repoussé artists, of the Renaissance period.

It is a peculiarity of Hanau, the gold city, that it is not the factory style of work that is specialized there, at least not to the extent that is the case in Pforzheim, for

whereas in the latter city enormous factories and lofty chimneys confront the visitor, the factories in Hanau are mostly hidden behind gardens and an almost intimate

MUG AND DISH, WITH EMBOSSED RENAISSANCE ORNAMENTATION.

TUREEN, EMPIRE STYLE. REPLICA OF ONE OWNED BY NAPOLEON.

understanding exists between employer and employed.

The productions of Hanau may be classed generally as first-class goods, for although, within the past few years, an effort has been made to introduce a popular class of goods, Pforzheim, in this respect, has kept the lead; Hanau, on the other hand, leads decidedly in better class and jewelry lines.

First of all, perhaps, we find in Hanau the finest jewelry goods, made in platinum as well as in high grade gold alloys and in the production of this "white jewelry" Hanau is probably without a competitor in Germany. Numerous firms keep their employes occupied almost exclusively with the production of the finest jewelry. The elegance and valuable character of this work, the intrinsic value and purity of style in the designs, bear substantial testimony to the character of Hanau's artistic workshops or industrial establishments.

Henry Olsen, of Jersey City, N. J., recently bought a "solid gold ring worth \$20" from a man for \$7. He took it to a Newark Ave. jewelry store to have it valued, and was much chagrined when the jeweler informed him that the ring was actually worth about 13 cents. Then he began a search for the stranger and found him, endeavoring to sell the mate of the ring he had purchased to a fireman. Olsen induced a police officer to arrest the stranger. The prisoner said he was a salesman, of North Philadelphia. He expressed surprise that Olsen should have caused his arrest, and remarked that he did not think he would repent of his bargain so quickly. At the station house half a dozen rings of the kind he sold Olsen were found in his possession. He insisted that they were worth all he asked for them. The man, at the request of the police, was held for further examination in the First Criminal Court.

## Turquoise — Turquoise Matrix

## Annual Report on the Production of Precious Stones.

Text of the United States Geological Survey's Advance Pamphlet on Gems and Gem Minerals for 1907, compiled by Douglas B. Sterrett.

(Continued from issue of Oct. 7.)

### RUBY.

#### NORTH CAROLINA.

Interest in the ruby deposits along Caler Fork of Cowee Valley, Macon County, N. C., has been revived through operations of the United States Ruby Mining Company. This company has undertaken to develop the ruby in the matrix lead previously located at "In Situ Hill" in the valley, and expects to wash the ruby-bearing gravels left unworked during former mining operations. For a distance of over two miles rubies have been found in the creek gravels, much of which has been worked. The gem-bearing gravels lie both above and below the company's headquarters at the mouth of Dalton Branch. Good rubies have been found in the creek gravels about a mile above the mouth of Dalton Branch as far as "In Situ Hill." This hill is merely the end of a ridge or spur which extends from the mountains on the south side of the valley down close to the creek.

In the report of C. Barrington Brown, in 1896, to the American Prospecting and Mining Co., on the ruby mine of Cowee Valley, the rubies are described as generally of good color, many resembling the true pigeon-blood ruby of Burma. Some of them have bluish borders, which give them a magenta tint. Messrs. Pratt and Lewis<sup>1</sup> state that some large gems—three or four carats in weight—of good color and transparency and free from inclusions, have been found. Though found in less quantity, the color and quality of these stones equal the Burma rubies. Some of the Cowee Valley rubies contain inclusions of rutile, ilmenite, garnet, etc., or are silky or badly flawed. Much pink and red corundum, some of it approaching the ruby in color and quality, is associated with the ruby. The concentrates obtained in washing for ruby contain red, pink, bluish, gray, and yellowish corundum, ilmenite, rutile, cyanite, red and pink or rhodolite garnet, small zircon crystals, quartz, feldspar, etc. In the New York office of the United States Ruby Mining Co. an admirable display of ruby and ruby corundum, as well as specimens of ruby matrix material, has been arranged by Aldred H. Smith.

During 1907, N. E. Isbell, of the United States Ruby Mining Co., constructed a new ditch to carry the creek from above "In Situ Hill" along the opposite hillside, where it could be tapped for pressure for hydraulic purposes. This ditch was extended to a point opposite the mouth of Dalton Branch, where a fall of nearly 100 feet could be obtained to hydraulic the bottom lands below. Another reason for the construction of the ditch was the hope that by turning the creek from its bed close to "In Situ Hill" the flow of water in the shaft on the ruby matrix would be diminished and the surrounding mud become harder. A 20-horsepower engine with a rotary centrifugal pump and bucket elevator were installed to assist in sinking the shaft and driving a crosscut from the bottom through the soft ground.

The matrix in which the ruby corundum occurs, and in which genuine rubies are said to have been found, consists of hornblende gneiss and pegmatite in hornblende gneiss. The pegmatite occurs in small streaks and lens-shaped pockets from an inch or two to a foot thick, roughly conformable with the bedding of the inclosing hornblende gneiss. Both the pegmatite and the hornblende gneiss are very badly decomposed at the surface. The feldspar of the pegmatite has largely passed into kaolin, while the hornblende gneiss has altered to the yellowish brown earth characteristic of the saprolite of that rock, with hydromica and black spots where small garnets have rotted away throughout. That this weathering extends to a depth of over 30 feet is shown by the material removed from a shaft of that depth. The strike of the country rock at "In Situ Hill" is north of east, with a high dip to the southeast. A dike of hard unaltered hornblende eclogite outcrops in the bottom of the valley, a few feet north of the ruby matrix, and can be traced to the east and west some distance. The hornblende gneiss sapro-

lite contains parallel streaks of mica-gneiss saprolite included in it.

In some of the pockets of decomposed pegmatite translucent pink to lilac colored corundum is very abundant, both in fairly large well-formed crystals and in small fragments. Red and ruby colored corundum is less plentiful, and but few crystals of gem quality have been found in the pegmatite bodies so far. Portions of the hornblende saprolite inclosing the pegmatite carry small translucent corundum crystals and fragments, some of rich red color in small pockets of soft white material. These were probably small masses of pegmatite which have decomposed, though they might possibly represent the decomposition products of former corundum crystals. From the few specimens of matrix seen by the writer, it appeared that the corundum associated with larger bodies of pegmatite is inclined to be of a lighter color pink or lilac—than the richer red stones in the hornblende rock alone, or where pegmatite is less prominent.

#### INDIA.

*Burma.*—The production of ruby, sapphire, and spinel by the Burma Ruby Mines Co. during the year ended with Feb. 28, 1907,<sup>1</sup> amounted to 326,855 carats, valued at £95,540, as compared with £88,340 in 1906. Of the total value of the output, ruby amounted to £93,023, sapphire to £1,132, and spinel to £1,385. The net profits of the company amounted to £15,160 after deducting a tax of £6,819 paid to the government of India.<sup>2</sup> During the year, 1,890,914 trucks of ruby earth were washed, at a cost of 7.7 pence per truck, as compared with 1,773,129 trucks at 8.1 pence in 1906.

### SAPPHIRE.

#### MONTANA.

There was much activity in sapphire mining in Montana during 1907, with a consequent large production, both of the yogo-blue sapphires and of the varicolored sapphires found in other parts of the State. Two large companies operated mines containing blue sapphire in its original matrix, and two other large companies and smaller or individual producers worked auriferous placer deposits containing varicolored sapphires. The blue sapphire in matrix was worked in the Judith River region, in Fergus County, at points about 11 and 13 miles west-southwest of Utica, by the New Mine Sapphire Syndicate and the American Sapphire Co. Placer deposits of varicolored sapphires were operated on the head of Dry Cottonwood Creek, Deerlodge County, by the Variegated Sapphire Co., and along the West Fork of Rock Creek, in Granite County, by the American Gem Mining Syndicate. A little mining was done and a few finds reported from the auriferous sapphire deposits along the Missouri River, below Helena, once so extensively worked.

*Yogo Blue Sapphires.*—The blue sapphires of Fergus County, often called "Yogo sapphires," occur in a dike of basic igneous rock<sup>2</sup> cutting nearly perpendicularly across the bedded limestone country rock. The dike crosses the canyon of Yogo Creek (the north fork of Judith River) and the rolling country sloping eastward from the crest of Yogo Canyon to the bottom lands of Judith River, a distance of nearly four miles. The limestone country rock belongs to the Madison limestone formation of carboniferous age, as mapped by W. H. Weed.<sup>4</sup> This formation is over 1,000 feet thick, and consists of thinly bedded strata of light-grayish limestone which dip rather gently to the east. There are a few minor folds in the limestone, some of which can be seen in the walls of Yogo Canyon near the mine of the American Sapphire Co. The sapphire-bearing dike is slightly sinuous and has a strike a little north of east with a nearly vertical dip. In the canyon, however, it seems to split up into two or more parts (one of which pinches out in the limestone) or to be intersected by another dike. The thickness of the main dike throughout

<sup>1</sup>Rec. Geol. Survey India, Vol. 36, pt. 2, 1907.

<sup>2</sup>Jewelers' Circular-Weekly, Sept. 25, 1907.

<sup>3</sup>Somewhat fully described by Weed and Pirsson: Twentieth Ann. Rept. U. S. Geol. Survey, pt. 3, 1898-99, pp. 454-459 and 552-557.

<sup>4</sup>Geologic Atlas U. S., folio 56 (Little Belt Mountains), U. S. Geol. Survey, 1899.

its known length varies from two to over 14 feet.

The rock of the sapphire-bearing dike has been described by Prof. L. V. Pirsson. When fresh and unaltered it has a dark-gray color with a greenish or bluish cast. The principal constituents are biotite mica and pyroxene, of the diopside variety, with minute and large inclusions of calcite, quartz, pyroxene, and pyrite. Some of the biotite occurs in phenocrysts of two or three mm. diameter, though the greater part is in small shining flak s, thickly scattered through the rock. The glistening scales of biotite and some of the inclusions are the principal constituents that can be recognized in hand specimens. The inclusions of calcite and quartz are surrounded by reaction rims of pale and sometimes bright emerald green pyroxene. This pyroxene sometimes occurs scattered through the smaller inclusions, or even constitutes the mass of them. The dike rock contains numerous seams and veinlets of calcite and quartz as well as large inclusions of limestone. Pyrite in crystals and agglomerations of crystals is scattered through the rock. This pyrite, along with some pseudomorphous limonite, is separated from the rock along with the sapphires and constitutes the greater part of the concentrates obtained in washing for the latter. In thin section under the microscope the biotite is strongly pleochroic, varying from almost colorless to a strong clear brown color. It occurs abundantly in ragged shreds through the rock, rarely with crystal form, and contains small apatite crystals. The pyroxene is pale greenish to colorless and belongs to the variety diopside. It contains numerous inclusions which may originally have been glass. No feldspars have been observed in the rock, though a kaolin-like substance in the interstices may represent a decomposed mineral, as leucite or analcite, especially since the rock resembles a known basic analcite basalt.

The sapphires are scattered through the lamprophyre, none having been observed associated with the limestone inclusions. One sapphire crystal was seen embedded in a mass of heavily pyritized lamprophyre. It is thought the sapphires formed by the crystallization of an excess of alumina dissolved in the lamprophyre magma. The source of this alumina is supposed to be in the shales of the several thousand feet of older formations, underlying the thousand feet of Madison limestone through which the dike cuts. During the intrusion through the shales fragments were torn off and floated up with the magma, by which they were eventually dissolved. When the magma began to solidify the excess of alumina separated out in the form of sapphire. The sapphires crystallized out before the magma completely solidified, for some of them were badly etched and corroded by a partial reabsorption by the magma after formation. Included fragments of limestone taken in at higher levels were acted on to varying degrees by the magma. Smaller masses were metamorphosed to crystallized calcite, and nearly all were surrounded by diopside rims formed by the reaction on the magma.

The sapphires range in size from minute crystals up to four or five carats. Rarely crystals of eight or 10 carats are found, the majority, however, weighing under three carats. A large quantity of small sapphire, classed as "culls," is obtained. This material is in great demand for watch jewels, for which, through the flattened form of many of the crystals, it is especially suitable. The color of the Yogo sapphire ranges from a light blue to the rich characteristic "cornflower" blue of the oriental sapphire. They make a beautiful gem and are highly prized for their color and brilliancy. Probably over 90 per cent. of the sapphire is of good blue color and gem quality, the remainder being grayish or of poor color. Occasionally purplish-colored gems are found. The Yogo sapphires occur in rough crystals whose common forms are the base and a rare rhombohedral face  $\alpha(3032)$ .<sup>1</sup> The basal plaques are roughly striated parallel to their intersection with the rhombohedron faces. A repeated development of the base and rhombohedron is not uncommon. The basal planes are badly etched on some crystals, the etched figures generally showing a rhombohedral symmetry and several being sometimes grown together.

*New Mine Sapphire Syndicate.*—The writer wishes to acknowledge the courtesy shown and the assistance rendered him by C. T. Gadsden, superintendent, at the time of his visit to the mine of the New Mine Sapphire Syndicate. The earlier

mining operations of the New Mine Sapphire Syndicate consisted chiefly of open cuts, of which probably nearly a mile were made along the outcrop of the sapphire-bearing dike. These cuts were from 10 to 60 feet deep, in one place the dike material being removed to a depth of 90 feet. The walls of the cuts were held apart by stulls as needed. At present the sapphire ore is all obtained from underground workings. The latter consist of a shaft 100 feet deep with drifts in each direction from the bottom. The shaft is located in a smaller coulee or valley crossing the dike. The west drift is about 2,000 feet long and nearly 200 feet below the surface of the hill on the west of the coulee, while the levels above and one of the stopes reach nearly to the bottom of the 90-foot open cut in this hill. The east drift was carried nearly 800 feet, with stopes above at varying intervals. At one place in this drift the dike has been stoped out to the surface. The nature of the dike as exposed in these workings is variable in both richness and size. Nearly barren places occur in the dike where the latter seems to be choked with limestone, between the fragments of which there is but little dike material. The barren places commonly occur where the dike pinches down to smaller dimensions, which changes in size were doubtless caused by the jamming of limestone fragments included in the magma in the narrower parts of the fissure at the time of intrusion. In places the walls of the dike are rough where the edges of the limestone strata were broken during the fissuring and fragments were torn off by the intrusion of the dike. Jagged furrows or elbows in the limestone walls show where such fragments were torn off. In some places a single flat bedding plane of the limestone or steps, including several beds, form the bottom of these furrows, which are somewhat wedge-shaped toward the top.

Contrary to reports circulated during 1906 that the work of this company was hindered by the difficulty of disposing of the waste and slums from the sapphire washing, a larger supply of ore was mined and treated during 1907 than ever before. Instead of containing chemicals injurious to vegetation, as claimed by some of the ranchers along the river below the mine, the slums have been shown actually to improve, for raising crops, the lands on which they are turned. Analysis of the slum is also reported to show the presence of nitrates and phosphates, which are helpful to any crop growth. To test this, C. T. Gadsden, superintendent of the mine, turned the water carrying the slums over portions of the ranch land owned by the company. Oats, alfalfa, and vegetables were successfully grown, both where the slums were turned over crops already planted and where the vegetables were planted directly in thick deposits of slum. In each case vegetation was most luxuriant where the slum was thickest. The coarser sands from the sapphire washings were removed by the sand trap from the sluice ditches, where the grade was low, to keep the latter from clogging up. This was accomplished automatically by a simple device operated by an undershot waterwheel in the sluice.

In some respects the method of separating the sapphires from their matrix is similar to that of separating diamonds from the "blue earth" of South Africa. Near the surface and to a depth of 20 feet and more, the dike rock was decomposed by weathering to a yellowish clay, from which the sapphires were readily washed. As the work was carried deeper, the dike rock was less altered and hard, so that it has been found necessary to disintegrate it in some way before washing. This is accomplished by exposing piles of ore to the weather with occasional wettings. The action of moisture and air, aided by the frequent freezings and thawings of the Winter climate, soon starts the slacking and disintegration of the lumps of "blue," as the ore is called. The disintegration is carried out on inclined floors or settling grounds, where the ore is deposited after removal from the mine. After an exposure of several months, a large stream of water is turned on the piles of "blue," which are forked over at the same time. The disintegrated surfaces of the lumps are washed off and down through a sluice along with other loose disintegrated material. This leaves the "blue" in apparently hard fresh lumps, which, however, soon begin to disintegrate and crumble again. The material in the sluice is carried over a set of riffles to a settling dam, where the lump material brought down undergoes further disintegration. From the first settling dam the "blue" is washed down over riffles to a second, for final disintegration. The sluices are made of board and have iron-

plate bottoms. Iron riffles are placed at the proper places in the sluice to catch the sapphires, and clean-ups are made four or more times in 24 hours. The concentrates are separated in a rock sieve into three sizes, and each grade is panned down closer over a wooden tank. The oversize left on a screen of 5/8-inch mesh is carefully examined for large sapphires before discarding. The contents of the tank in which the panning is done receive further treatment on screens of two different meshes from those first used. Sapphires are picked up by hand from the coarse sizes of concentrates before shipping. The small sizes containing the culls for watch jewels are shipped in the rough. All the sapphires go to the company's office in London for cutting and marketing.

(To be continued.)

**ELSIE BEE'S FASHIONS.**

ATTRACTIVE NOVELTIES NOTED IN A LADY'S RAMBLES AMONG THE JEWELERS.

**A**METHYST and topaz briolettes are a conspicuous feature of the new earrings.

\* \* \*

The woods most in favor for umbrellas just now are pimento and snake wood, both from Jamaica.

\* \* \*

Pansies and daisies of carved amethyst,

departure from the usual conventional designs. Wrought out in etching and Russian-niello, they constitute a striking novelty. Another comparatively new treatment in the way of handle ornamentation is the use of ivory as a sort of tipping or finishing. It first appeared this Spring, but bids fair to be a staple style.

\* \* \*

The pansy is a popular theme for the ornamentation of the velvet band. A striking treatment consists of a delicate outline in small half pearls. Another applies the baroque pearl, which is so well adapted to nature motifs.

\* \* \*

Jeweled sections on grosgrain ribbon for watch chains and pendants, and also on velvet bands, are evidently here to stay. Greek designs are seen, and all descriptions of combinations of stones with polished or dull-finished gold are employed.

Earring designs grow more and more elaborate. The drops—single, double or triple—are longer and sometimes surmounted by a diamond bowknot surprisingly large. Dainty little platinum chains

SILVER SET IN DAUPHIN STYLE.

(See text on page 65.)

dull in finish, with a diamond or pearl center, form exquisite brooches.

\* \* \*

A quantity of opal beads of graduated sizes, in long and short strings, are being exhibited by a prominent dealer.

\* \* \*

A simple but effective design for the velvet band is a straight-lined X, with a cabochon sapphire in the center.

\* \* \*

Enameled handy pins are unlimited in designs. They include the barred, dotted and Greek-bordered effects, in yellow, blue, green, pink, lavender and white, combined with all manner of stones.

\* \* \*

An effective brooch is in the form of a basket of flowers, the latter of tiny diamonds, while the basket is formed of a single piece of carved turquoise, topaz or amethyst.

\* \* \*

The newest designs for cane and umbrella handles are an ingenious application of the curious insignia on the shields of the South Sea islanders. These are unique and artistic and represent a decided

are also used between a succession of dependent stones.

\* \* \*

New designs in the old-fashioned, spindly lognons with round lenses, are constantly making their appearance. The soft, dull enamel, studded with tiny diamonds, rubies and emeralds, are charming and graceful, and offer infinite opportunities for the jeweler's display of art.

\* \* \*

This Russian-niello work, which is far more effective and expensive than etching and stands the test of time better than oxidization, constitutes the latest decoration for cane and umbrella handles. The smooth surface, handsome and attractive, retains its brightness and beauty indefinitely. It is used with great success on the directoire umbrella, which is the proper accessory of the clinging costumes now in vogue. The handles of these umbrellas, 16 to 18 inches in length, are also made of snake wood and pimento, and are three, four, five, seven and eight-sided, or round. The same shape of handles prevails in men's umbrellas and canes. **ELSIE BEE.**

### The Career of the Late Charles H. Ankeny, Lafayette, Ind.

LAFAYETTE, Ind., Oct. 8.—The news of the death, Oct. 3, of Charles Howard Ankeny, published in the last issue of THE CIRCULAR-WEEKLY caused deep and lasting regret to his many friends not only throughout the business community in this city, but also in many sections of the jewelry trade, as Mr. Ankeny was one of the best known and most highly respected jewelers of Indiana. His demise was unusually sudden, as 15 minutes before he passed away he had been chatting with friends in the Lafayette Club in his usual cheerful manner, and no one suspected that he was in any way ailing before the news came that he had passed away.

Leaving the club, Mr. Ankeny walked to his home, South and 9th Sts., about noon, and after speaking to his wife and daughter went up stairs to take his customary short rest before dinner. A noise in the room caused his daughter Alys to go upstairs and investigate, and she found her father on the floor in a lifeless condition. Physicians who were hastily summoned pronounced Mr. Ankeny dead and gave heart disease as the cause.

The deceased, who was a native of Ohio, was born in Washington, Guernsey County, 65 years ago. As a young man, after receiving his education, he was fired with the spirit of patriotism which swept over his State prior to and at the beginning of the Civil War, and after the breaking out of hostilities enlisted in the 60th Ohio Infantry, in which he served until the end of the war. After the war he went to Cincinnati and entered the jewelry business with the old house of Duhme & Co., with whom he got an excellent knowledge of the trade, and from Cincinnati he went to Richmond, where he engaged in business for a short time. About 35 years ago Mr. Ankeny came to Lafayette and established the jewelry business now known under the style of C. H. Ankeny & Co., and during all that time until his death, with the exception of a very short while spent in Cincinnati, had given it his personal attention. By his industry, ability and integrity as a merchant as well as genial nature and kindly disposition as a man, he made many friends and built up an excellent trade. In fact so thoroughly was he imbued with the spirit of the true merchant that a training under him started many a young man on the road to a successful career. He had a keen appreciation of the beautiful and art in nature, excellent taste and judgment and was eminently fitted by nature for the calling which he followed.

For a number of years Mr. Ankeny conducted his business alone, but in 1900 was joined by Charles E. Erisman, the firm being changed to Ankeny & Erisman. They dissolved in 1902, each continuing alone, and two years ago Mr. Ankeny incorporated his business as a stock company with a capital of \$30,000, becoming president of the concern.

Outside of business the deceased was prominent in the social and fraternal world, especially in Masonic and grand army circles. He was a chapter member of John A. Logan Post No. 3, G. A. R., a

member of Lafayette Commandery No. 3, of the Indiana Chapter of the Loyal Legion, and of the Knights Templar. He was also prominent in the Lafayette Commercial Club, and had been identified with many movements looking to the welfare of his city.

### Optical Society of State of Pennsylvania Holds Thirteenth Annual Meeting.

PHILADELPHIA, Pa., Oct. 7.—The 13th Annual Meeting of the Optical Society of the State of Pennsylvania was held at the City Club, 1418 Walnut St., Tuesday, Oct. 6. At the afternoon session, W. W. Bissell, Rochester, N. Y., secretary of the New York State Board of Optometry, spoke on "Making a Profit," and F. B. Marchant, Brooklyn, N. Y., also member of New York State Board of Optometry, spoke on "A Discussion on Some Phases of Muscular Anomalies." Both papers were very much appreciated and many questions were asked by those present.

In the evening an enjoyable banquet was followed by the regular annual business meeting. The report of the executive committee showed a very gratifying condition of the society, 63 members having been admitted during the year. The treasurer's report showed the finance also to be in a flourishing condition.

A committee of five was appointed to assist in forming local societies throughout the State. The by-laws were amended so as to make the initiation fee one dollar and the annual subscription of two dollars. Local societies outside Philadelphia and composed of 12 or more members may be received into membership by payment of one dollar for each member per annum by the local society.

The following officers were then elected: President, J. H. Martsch; first vice-president, J. F. Brinkerhoff; second vice-president, W. G. Walton; secretary, C. A. Longstreth; treasurer, H. F. Freeman; executive committee, J. D. Stroud, A. N. Peoples and O. Jarck. Auditors, W. F. McGaffrey and R. A. Tollinger.

After the business session, A. Martin, the retiring president, delivered an address on "Modern Methods, as Applied to an Up-to-date Optometrist's Office," illustrated by lantern slides.

### Exports of Jewelry, Clocks, Watches, Silverware and Kindred Lines from New York.

WASHINGTON, D. C., Oct. 7.—The following were the exports of jewelry, plated ware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just past:

Alexandria: 2 cases plated ware, \$248.  
 Antwerp: 11 cases clocks, \$200.  
 Auckland: 2 cases plated ware, \$167; 13 cases clocks, \$225.  
 Berlin: 20 cases clocks, \$504; 5 cases clocks, \$285; 4 cases optical goods, \$2,274.  
 Bombay: 43 cases clocks, \$750.  
 Bremen: 2 cases watches, \$1,310.  
 Buenos Ayres: 1 case silverware, \$107; 2 cases optical goods, \$969; 245 cases clocks, \$5,850; 235 cases clocks, \$6,446.  
 Callao: 3 cases optical goods, \$518.  
 Calcutta: 1 case watches, \$126.  
 Christiania: 10 cases clocks, \$447.  
 Colon: 3 cases plated ware, \$128; 2 cases silverware, \$305.  
 Corinto: 2 cases plated ware, \$267.  
 Chaux de Fonds: 1 case watch cases, \$165.

Hamburg: 2 cases jewelry, \$913; 1 case watches, \$3,518.

Havana: 2 cases optical goods, \$147.

Havre: 1 case watch cases, \$290; 3 cases jewelry, \$613; 10 cases clocks, \$525.

Liverpool: 87 cases clocks, \$1,629; 1 case jewelry, \$500; 14 cases silverware, \$822; 4 cases watches, \$2,500; 3 cases jewelry, \$755; 4 cases clocks, \$190.

London: 84 cases clocks, \$1,621; 1 case silverware, \$250; 2 cases thermometers, \$108; 2 cases optical goods, \$386; 29 cases clocks, \$1,279; 4 cases thermometers, \$325; 3 cases watches, \$710; 8 cases optical goods, \$1,980; 3 cases optical goods, \$175; 121 cases clocks, \$2,392; 64 cases clocks, \$2,600; 1 case plated ware, \$100.

Matanzas: 15 cases clocks, \$183.

Montevideo: 5 cases plated ware, \$494; 1 case optical goods, \$100; 13 cases clocks, \$1,561; 30 cases plated ware, \$1,439.

Pelotas: 37 cases clocks, \$731.

Port Antonio: 55 cases clocks, \$335.

Rangoon: 15 cases clocks, \$272; 57 cases clocks, \$1,050.

St. Johns: 7 cases clocks, \$116; 2 cases silver-smiths' sundries, \$722; 5 cases watches, \$508; 1 case optical goods, \$270; 5 cases clocks, \$175; 20 cases watches, \$3,419.

Rio de Janeiro: 5 cases plated ware, \$678; 73 cases clocks, \$1,757; 2 cases watches, \$682.

Sydney: 52 cases clocks, \$620.

Vera Cruz: 4 cases plated ware, \$223.

### Look Out for This Check Swindler Who Has Been Working in Pittsburg, Pa.

PITTSBURG, Pa., Oct. 9.—A check swindler attempted to cheat C. S. Wiley, 3602 Forbes St., secretary of the Pennsylvania Retail Jewelers' Association, out of \$150 last Saturday night, but Mr. Wiley was too clever to be caught. The man is described as being about 28 years old, with a smooth shaven red face and weighing about 165 pounds.

He called at Mr. Wiley's store and engaged one of his women clerks in conversation while Mr. Wiley was in the rear of the store, and the clerk called him to wait on the customer. Peters told Wiley that he had bought a carat diamond stone from him just before the holidays and named the price, which Mr. Wiley at once knew he could not have paid for the size of the stone he had described. However, Mr. Wiley showed the man a number of diamonds, and finally the stranger selected a ring valued at \$145. Then he said he would like to look at some watches and picked out one valued at \$15. The stranger then presented a check signed by C. M. Schwab, "the National Tube Co." being stamped underneath Schwab's name.

Mr. Wiley at once asked Peters if he could give reference. The stranger said that he could not, as he was not very well acquainted in the city. He laid a \$10 bill on the show case as a bait, saying he wanted the watch engraved and would call Monday, but would take the ring with him. Mr. Wiley told the man that he would refer the check to his bank, which is situated in the same block as the store. The stranger at once became indignant, and saying, "I do not wish to do business with you if you think I am suspicious," grabbed check and money and departed.

The man managed to get away before Mr. Wiley had an opportunity to notify the police and have him apprehended. Mr. Wiley, however, made some inquiry among his neighbors, and learned that a man answering the description of the swindler had called at a neighboring store and had offered a check for \$18, but the storekeeper refused to cash it.

# HIMALAYA

MINING COMPANY has for many years owned and operated its own mines. It has the most complete and up-to-date Cutting Works in this country, employing only the most skilled and experienced men, thereby enabling them to guarantee for their production the best possible workmanship.

The Company carries in stock a complete assortment of all kinds of Precious and Semi-Precious stones in all sizes and shapes, also receives orders for the cutting of special odd shapes to fit plates or settings. and their popularity is demonstrated by the orders received by the Company for these goods. A money-making suggestion just now might be timely—if you are looking for merchandise that will sell, and sell at a good profit, by all means have these gems in your stock—all manufacturers and jobbers carry them. The Company will send you such goods as you may desire on memorandum for your approval.

**Samuel K. Reich, Short Change "Flimflammer," Convicted in Brooklyn, and Sentenced to Prison for Nearly Ten Years.**

The jewelry trade throughout the country will be interested to learn that Samuel K. Reich, who, it was alleged, obtained \$1,370 worth of diamond jewelry from the Robert Simpson Co., Myrtle Ave., Brooklyn, N. Y., by a short-change trick, was convicted of the crime Wednesday after a trial before Judge Dike in the Kings County Court, Brooklyn. Monday he was sentenced to serve a term of not less than nine nor more than 10 years.

Reich was arrested in Buffalo in June and taken to Syracuse on another charge of the same character, but there was not evidence enough to hold him. Then he was brought to Brooklyn, where he was arraigned before Magistrate Dooley in the Adams St. Court, and held for the Grand Jury. The complaint against the prisoner entered at the time was to the effect that on Feb. 25 he visited R. Simpson Co.'s pawn shop on Myrtle Ave. and obtained the diamond jewelry and then, after paying for the goods, succeeded in extracting the big bills from the roll he had given, and disappeared, leaving only \$19 in bills and one silver dollar with the pawn brokers in payment for their property.

At the examination, Mr. McIntire, an employe of the Simpson concern, testified that the man called at the Simpson pawn shop and was waited on by Mr. Tweedy. The evidence taken then brought out statements to the effect that the man, after examining the goods placed before him for inspection, left the store and returned in a short time and paid over to Mr. Tweedy \$1,369 in two \$500 bills, three \$100 bills, one \$50 bill, and 19 one dollar bills. Mr. Tweedy testified that he counted the money and found a shortage of \$1 and called the attention of the purchaser to this fact, and then handed it back to him to be recounted. The man admitted the shortage and took from his pocket a silver dollar, which he handed back to the clerk together with the roll of bills, and after having obtained the receipted bill, took the jewelry and departed. The money was counted at once and the fraud discovered. Mr. Adams, another employe of the concern, was called as a witness and he also positively identified the prisoner as the one who visited the store on the date in question. He stated that the man's face impressed itself upon his memory and pointed out particularly his peculiar nose and mouth and sunken cheeks.

The prisoner was held in the Raymond St. jail, Brooklyn, awaiting the action of the Grand Jury.

When the case came up for trial Wednesday, the testimony of Mr. Adams, Mr. Tweedy and Mr. McIntire was in substance the same as that given before the Magistrate in the police court. The witnesses positively identified Reich as the man who had visited the store. Mr. Tweedy told of his trip to Syracuse and of how, when the prisoner first appeared in a different coat, he was not sure of him,

as he was later when the man put on the coat he was wearing at the time he visited Simpson's store. The matter of the short-change trick was rehearsed and testimony of Detective Busby, who has been instrumental in causing the conviction of the man, and through whose work he was located, was taken, in the course of which the detective said that the prisoner and a

SAMUEL K. REICH, THE "SHORT CHANGE" EXPERT, CONVICTED AT BROOKLYN AND SENTENCED TO SERVE NEARLY 10 YEARS.

brother worked together with a third confederate, and had traveled throughout the country working the game.

The prisoner was placed on the stand to testify in his own behalf. He stated that his name was Samuel K. Reich, that he was 23 years old and that he was born in Austria. He said that he had a twin brother who was a traveling optician and that he had been mistaken for this brother. He said that he had never been in Brooklyn previous to the time of his arrest and denied any connection with the theft or acts charged. He said that his twin brother was exactly like him in appearance and that his brother came to him while he was in Buffalo and left two bags, or traveling grips, and requested that he keep them for him. Soon after this time the police authorities pounced down upon Reich and he was arrested.

A photograph was offered in evidence,

which the prosecution claimed to be the photograph of the prisoner's brother. This photograph did not resemble the prisoner sufficiently to make it possible for a mistake being made by the witnesses as to his identity.

A large number of New York jewelers were visited by the same man that visited the Simpson pawn shop and in many instances he was successful in obtaining jewelry by the same trick. A number of these people were present at the trial and expressed satisfaction that the man had been convicted.

After the testimony had all been taken the jury filed out but were absent less than half an hour, returning with the verdict of "guilty" of grand larceny in the first degree. Judge Dike, in speaking to the jury, congratulated them on their finding and roundly rated the prisoner at the dock. He said that in his opinion the man was one of the worst crooks that had menaced the country in some time and that he was glad of an opportunity to sentence him.

**Creditors File Involuntary Petition in Bankruptcy Against Samuel Weinstock, New York.**

An involuntary petition in bankruptcy was filed Thursday in the United States District Court at New York against Samuel Weinstock, retail jeweler, 161 Rivington St., New York, by Emanuel Feller, a creditor for \$500; Abraham Tokajen, \$100, and Boris Burstein, \$100.

It is alleged that the jeweler is insolvent and has committed acts of bankruptcy by making preferred payments of about \$1,000, and by transferring merchandise and accounts of about \$1,000. It is also stated that he has abandoned his business and that there is about \$1,500 in stock in the place.

Judge Holt appointed Louis B. DeKoven receiver. H. & J. J. Lesser are the attorneys for the petitioning creditors.

Mr. Weinstock started business at the present address eight years ago. Prior to that time he was with A. Greenspan.

**Last Honors Paid to the Late John F. Sturdy, at Attleboro Falls, Mass.**

ATTLEBORO FALLS, Oct. 8.—The funeral of John F. Sturdy, one of the last of the pioneer jewelry manufacturers of the Attleboros and one of the best known and most highly esteemed citizens of this section, was held from the late home of the deceased here yesterday (Wednesday) at 2 p. m., and was attended by a large number of representatives of the trade. The funeral services were conducted by the Rev. Zenas Crowell, pastor of Central Congregational Church, and Rev. George H. Tilton, of North Woburn, first pastor of the church. Mr. Tilton delivered a glowing eulogy of the character of the deceased and his value as a citizen and churchman. He recalled the interest and liberality displayed

THE LATE JOHN F. STURDY.

by Mr. Sturdy during the infancy of the church.

The floral gifts were numerous and beautiful. Handsome pieces were sent by the employes of J. F. Sturdy Sons Co. and the Jewelers Board of Trade of Providence. The bearers were: Fred E. Sturdy, Jr., of New York; Herbert K. Sturdy, Jr., Carleton Sturdy and Charles Hoisington. Burial was at Mt. Hope Cemetery.

J. F. Sturdy Sons Co., B. S. Freeman & Co., W. H. Bell & Co., and W. N. Fisher & Co., were closed Wednesday out of respect of the deceased jeweler.

As stated in the last issue of THE CIRCULAR-WEEKLY, Mr. Sturdy died Oct. 4 at his home, 42 Towne St., Attleboro Falls. His death was not entirely unexpected, as he had been seriously ill for some time past, but it marks the end of a long and useful career. His life clearly indicates what can be accomplished by industry, perseverance and integrity. Starting with no great amount of capital, his concern has prospered until to-day it enjoys the prestige of being one of the largest in the country.

The deceased gave much to the jewelry trade that will be remembered because it was his keen perception that resulted in

the introduction of rolled gold plate, which is now in universal demand.

In 1893 Mr. Sturdy retired from active business and turned over the business to his three sons, who have since carried on the manufacture of chains and bracelets under the firm style of J. F. Sturdy's Sons Co.

Mr. Sturdy was born March 14, 1822, only a short distance from where he died. He was the son of William and Clarissa Sturdy and was the seventh of a family of 14 children. He was married Nov. 26, 1848, in Cumberland Hills, to Miss Knapp, and directly after his marriage went to Providence, and with his brother, James, engaged in the manufacture of jewelers' tools. In 1849 he returned to Attleboro Falls and founded the firm of Draper, Sturdy & Co., which resulted in the J. F. Sturdy's Sons Co. of to-day. Mr. Sturdy was one of the founders of the Central Church of Attleboro Falls and a member of the Pulham Club of Philadelphia.

**Higher Prices Realized at the Third Quarterly Auction Sale of Ivory Held at Antwerp, Belgium.**

WASHINGTON, D. C., Oct. 7.—Consul-General Henry W. Diederich reports that at the third quarterly ivory sale of 1906 at Antwerp the following lots (in kilos of 22 pounds) were disposed of:

Hard Kongo, 30,340; soft Kongo, 245; Angola, 2,995; Ambrize, 968; West Coast, 698; Senegal, 2,171; Abyssinia, 393; Cameroon, 157; Gabon, 53; a total of 38,020 kilos. For comparative purposes the following statistics of ivory sales in previous years are given:

Year.	Kilos.	Year.	Kilos.
1907.....	61,555	1899.....	72,908
1906.....	64,922	1898.....	35,559
1905.....	71,364	1897.....	71,733
1904.....	59,292	1896.....	53,408
1903.....	70,334	1895.....	62,000
1902.....	71,171	1894.....	43,083
1901.....	72,207	1893.....	63,055
1900.....	77,699		

Notwithstanding that from the beginning there was a complete reaction, resulting in a rise of 2 francs (39 cents) and eventually of 4 francs (78 cents) for large tusks, several holders found this rise insufficient and 18 of the 56 tons originally for sale were withdrawn.

Competition for account of American buyers was very keen, and the inferior lots of large tusks fetched 30 to 31 francs (\$5.79 to \$5.98) instead of the 26 to 27 francs (\$5.02 to \$5.21) obtained at the last sale. Prices of bangle tusks rose 2 to 3 francs, and billiard-ball tusks and scrivailles also realized 1 franc (19.3 cents) more.

The stock on hand at the end of August was about 195 tons, as against stocks at the same time of previous years as follows:

Year.	Tons.	Year.	Tons.
1907.....	114	1900.....	95
1906.....	105	1899.....	102
1905.....	86	1898.....	79
1904.....	104	1897.....	70
1903.....	132	1896.....	57
1902.....	127	1895.....	144
1901.....	136		

The next quarterly ivory sale is fixed for Tuesday, Nov. 3, 1906.

Joseph M. Ditto has purchased the business of Harry Black, Monte Vista, Colo.

**Epileptic Fit of Sharpsburg, Pa., Jeweler's Clerk Causes Exciting Reports of a "Daring Robbery."**

PITTSBURG, Pa., Oct. 10.—John Glatz, a clerk employed by Philip Ruprecht, a jeweler at Sharpsburg, was seized yesterday with an epileptic fit in the absence of Mr. Ruprecht from the store, and the finding of the young man in an unconscious condition by Mrs. Ruprecht made her believe that a robbery had been committed and the police were notified. In falling Glatz struck his head against the corner of a show case, inflicting a wound, and it was thought that he had been struck by some instrument. The police of the town immediately arrested two suspects, who were later discharged.

Glatz was removed to a hospital, and after working with him for several hours he regained consciousness, and then it was that he was able to tell his story of the affair. In the meantime, however, Mr. Ruprecht was sent for and made a hurried inventory of his stock, but no goods were found to be missing.

The affair caused great excitement, because a few years ago Ruprecht's store was robbed of about \$3,000 worth of stock and the affair caused unusual excitement. In explaining the affair to-day to THE CIRCULAR-WEEKLY correspondent, Mr. Ruprecht only laughed about the real cause of the trouble—though sorry, of course, that his clerk had suffered illness. The Pittsburg papers published columns about the daring "robbery."

**New Members Elected by the Jewelers Security Alliance.**

The regular monthly meeting of the Executive Committee of the Jewelers Security Alliance was held on Friday, the following members being present: Chairman Butts, President Sloan, Vice-President Champenois, Treasurer Karsch, Secretary Noyes and Messrs. 182 and 184 BROADWAY  
NEW YORK

**Death of Henry A. Lugin.**

Henry A. Lugin, an expert horologist, recognized in this country and abroad as one of the leading men in that line of work in the world, died suddenly in Washington Park, Newark, N. J., Friday afternoon, of heart disease. He was employed by the A. Wittnauer Co., 13 Maiden Lane, at the head of the technical department, and left the offices about 1 o'clock in the afternoon. He was never again seen alive by his friends.

Mr. Lugin had been for years considered a genius in his calling and during his lifetime made a number of important inventions in the field of horology. He was born May 9, 1848, at Chaux de Fonds, Switzerland, where he spent his early life. As a young man he learned the watch-

THE LATE HENRY A. LUGIN.

maker's trade and worked at the bench in Geneva for some time.

From the Swiss city he came to New York in 1868, and was first employed by a Mr. Nordman. Later he went with A. Wittnauer & Co., where he remained until April 1, 1900, when he formed a partnership with E. Long, under the style of Long & Lugin. A watchmaking business was conducted by the firm for a year, at the end of which time Mr. Lugin returned to the employ of the Wittnauer concern, with whom he remained until his death.

In 1878 Mr. Lugin invented a new system for chronographs, and two years later invented important improvements in split seconds and other complicated watches. Among his inventions is a big chronograph for timing horse races. He was granted 24 patents in all, two of which are used in American watches and others in Swiss products. The Waltham watch, Agassiz and Longines watches have his inventions. His last patent was for a doctor's watch. His inventions had long been of much importance to horology—as far back as December, 1877—the *Deutsche Uhrmacher-Zeitung* having given considerable space to a technical description of one of Mr. Lugin's devices.

When Mr. Lugin died Friday it was thought at the time that possibly he had been poisoned, but an autopsy proved this

to be untrue. His family say that he was in good health and that he had never suffered from heart trouble as far as is known.

Deceased is survived by a widow and four sons, Walter, Broser, Arthur and George, to whom is extended sympathy in their bereavement.

Masonic services were held Monday evening by Joppa Lodge, and the funeral occurred from the late home of the deceased, 33 Linden St., Brooklyn, yesterday morning.

**Thief Who Robbed Fall River, Mass., Jewelry Store, Captured in Providence, R. I.**

PROVIDENCE, R. I., Oct. 12.—Wilfred Mercier, aged 22 years, who the police say was trying to sell a quantity of jewelry in this city, was arrested at 11 o'clock this morning, by Inspector Wolf, of the second precinct, on S. Main St. The young man, who carried a small valise, was going into second-hand stores and aroused the suspicion of the police, who, after questioning him, took him to the police headquarters.

The satchel contained watches, bracelets, breastpins, charms, watch chains, neck chains, rings and other articles, all amounting in value to about \$150, which Mercier confessed to stealing last night in Fall River from a jeweler's store. He said he did the job alone, gaining access to the store by a rear window. He says he grabbed the articles quickly and put them in his satchel, which he also took from the store.

About 1 o'clock this afternoon Inspector Shea of the Fall River police arrived at police headquarters in this city, and said that the man under arrest was Amory Tanguay, a resident of Fall River, who had served a sentence in the Massachusetts Reformatory. The store which he broke into was that of the Luso-American Co., of which Manuel J. Ferreira is manager, at 126 S. Main St., Fall River. Chief Inspector Horton says the man sold some of the articles in this city, and that these will be recovered later. Tanguay was taken to Fall River later in the afternoon.

**Bids Received by Canal Commission Departments to Supply Various Articles.**

WASHINGTON, D. C., Oct. 8.—The Purchasing Agent of the Isthmian Canal Commission has received the following proposals.

On 12 pocket compasses—Kueffel & Esser Co., Hoboken, N. J., (a) 1 1/4 in., \$32.62; (b) 2 in., \$37.56; (c) 2 3/8 in., \$41.64. Queen & Co., Philadelphia, Pa., \$40.50; Eugene Dietzgen & Co., \$45.60; Fred A. Schmidt, Washington, D. C., \$40.80.

On two Aneroid barometers—Kueffel & Esser Co., \$30.24; Queen & Co., \$35.70; Eugene Dietzgen & Co., \$21.50; Fred A. Schmidt, \$22.40.

On two surveying barometers—Kueffel & Esser Co., \$83.52; Queen & Co., \$95; Eugene Dietzgen, \$61.20; F. A. Schmidt, \$69.

On six marine field glasses—Kueffel & Esser Co., \$58.15; Queen & Co., \$99; Eugene Dietzgen, \$60; Fred A. Schmidt, \$60.

On two prism binoculars—Queen & Co., \$76; Eugene Dietzgen Co., \$79.50; C. P. Goerz Am. Optical Co., 6 power, \$61.32; 9 power, \$92; Bausch & Lomb Optical Co., 5 power, \$71; 6 power, \$70; 7 1/2 power, \$71.

**\$30,000 in Diamonds Stolen from S. C. Powell Are Recovered from Negro Arrested in St. Louis.**

ST. LOUIS, Mo., Oct. 12.—George Foster, a negro, of half a dozen aliases, was arrested in a room at 2319 Pine St., this afternoon, and a large quantity of diamonds was found concealed in all parts of his clothing. The man's treasure amounted to over \$30,000, and was the proceeds of a robbery of a New York diamond merchant a few months ago.

The capture is considered the biggest diamond robbery arrest in the city in months and served to end a tireless search by Pinkerton detectives and the police of half a dozen large cities, dating from June 29 last.

All of the stones recovered were identified as those composing the lot which was stolen from S. C. Powell, New York, on a Pullman car en route from Chicago to St. Louis. Powell's suit case containing the jewel fortune was stolen while he slept, and when the train came into Union Station its porter was missing.

Mr. Powell, when seen at the New York office yesterday by a CIRCULAR-WEEKLY reporter, said that he had received notice of the recovery of the gems, but had no knowledge as yet of the particulars of the recovery.

**Alfred H. Ewert, Ukiah, Cal., Goes Into Voluntary Bankruptcy.**

SAN FRANCISCO, Cal., Oct. 8.—Alfred H. Ewert, Ukiah, Cal., has filed a petition in bankruptcy in the United States District Court. The liabilities are scheduled at \$7,316.57, and the assets are estimated at \$1,800. The firm of Rothschild & Haydenfeldt, of San Francisco, has a claim of \$1,370.63 for merchandise against Ewert.

Mr. Ewert started in business in Ukiah in 1896, succeeding S. L. Moore. For a time he did business as the "Ukiah Jewelry Store," but later conducted the store under his own name.

**Jewelers' Gold Bars Withdrawn and Exchanged at New York.**

Week Ended Oct. 10, 1908.

Traveling representatives in Toronto, Can., recently, were: George Smith, Theodore W. Foster & Bro. Co.; Mr. Stripp, Trufus & Co. (London, Eng.).

F. Presbrey, a new traveler for J. B. Whitney & Co., San Francisco, Cal., has just returned from an extensive trip through the northwest. He reports doing a very satisfactory business except in Montana, and states that conditions there are less favorable than in any other part of the territory covered by him.

The following traveling representatives called on the trade in Kansas City, Mo., during the past week: Charles H. Ide, Farrington Mfg. Co.; R. Hehl, F. H. Noble & Co.; Mr. Fay, T. I. Smith Co.; H. G. Pfordresher, Geo. L. Brown & Co.; F. R. Truell, W. H. Saart Co.; H. F. Tourtellot, Waite, Thresher Co.; Maurice Kohn, Sherman, Kohn & Wallenstein; Charles Jacob, Frederick Speidel; H. C. Hubley, George Borgfeldt & Co.; W. G. Raymond, Goehring Mfg. Co.; C. W. Edwards, Leach, Miller & Co.; Mr. Edwards, Furbish, Swift & Fisher; Mr. Keith, French Process Co.

The following traveling representatives visited the trade in Lancaster, Pa., recently: Walter J. Mays, McIntyre, Magee & Brown; C. S. Fake, Whiting Mfg. Co.; Henry Caro, Manchester Mfg. Co.; W. H. Chadderton, Jennings Bros. Mfg. Co.; William A. Lamb, West Silver Co.; George Spitzer, Goodfriend Bros.; M. S. Olin, A. & Z. Chain Co.; W. S. Gardner, Bassett Jewelry Co.; Benjamin Lewis, S. B. Champlin Co.; Mr. Kline, Stott Bros.; M. F. Loomis, C. Sydney Smith & Co.; J. F. Townsley, Cross & Bequelin; Samuel Zimmern, Henry Zimmern & Co.; H. Greenthal, Albert Lorsch & Co.

The following traveling representatives were in St. Louis, Mo., last week: C. F. Hartshorn, Krenetz & Co.; Thomas E. Rogers, Riker Bros.; H. R. Blackman, Champenois & Co.; Vincent W. Henderson, Crane & Theurer; W. H. Osborne, R. Wallace & Sons Mfg. Co.; G. S. Johnson, G. A. Henckel & Co.; C. T. E. Smith, Reed & Barton; J. S. Willis, Gorham Co.; Charles H. Ide, Farrington Mfg. Co.; Arthur A. Kahn, American Gem & Pearl Co.; J. M. Curtis, Meriden Silver Plate Co.; L. Seligsberger, Mauser Mfg. Co.; G. A. Armstrong, Paye & Baker Mfg. Co.; Edward O. Krauss, Western Watch Case Mfg. Co.; Wallace E. Welch, Hoyt, Ohrig & Geiger Co.; F. E. Buffum, J. A. & S. W. Granbery.

Among the out-of-town representatives who visited Pittsburg, Pa., last week, were the following: D. N. Jacoby, Providence Stock Co.; George H. Remington, Maintien Bros. & Elliot; Frank W. Cullom, Sulzberger Bros.; G. W. Bleecker, Martin-Copeland Co.; Fred H. England, Frolichstein, England & Klein; Mr. Pierce, T. I. Smith Co.; Charles L. Drown, Ostby & Barton Co.; J. F. Dean, Reed & Barton; E. F. Harris, E. Ingraham Co.; M. E. Van Bergh, Van Bergh Silver Plate Co.; Mr. Peare, Wm. L. Gilbert Clock Co.; H. F. Tourtellot, Waite, Thresher Co.; D. A. Davidson, Wallach & Davidson; M. V. Decker, Plainville Stock Co.; H. L. Sherman, Simpson, Hall, Miller & Co.; C. P. Begley, Adelphi Silver Co.; Fred T. Barry, Louis Stern & Co.; A. E. Motteran, Frank M. Whiting & Co.; Mr. Gorman, Woodside Sterling Co.; Jules Franklin; Edward O. Krause, Western Watch Case Mfg. Co.; H. H. Meyer, Wm. B. Kerr Co.

Traveling representatives in Omaha, Nebr., during the past week, were: W. D. Sinnock, Ehrlich & Sinnock; Charles E. Lochner, Hayes Bros. Co.; Mr. Singleton, Adams & Singleton; Arthur Totten, Sansbury & Nellis; S. E. Dickson, Adelphi Silver Co.; Alvin A. Cahn, Aikin-Lambert Co.; F. F. Gibson, Gibson, Krugler Co.; H. F. Hines, Wm. Weidlich & Bro.; Charles H. Ide, Farrington Mfg. Co.; Ralph C. Dick, Scofield & De Wynngaert; K. L. Taylor, Riley & French; Maurice Clark, Whitall-Tatum Co.; H. G. Pfordresher, Geo. L. Brown & Co.; Robert E. Kehl, F. H. Noble & Co.; L. W. Arnold, Western Clock

Mfg. Co.; Leopold Heyman, Stern Bros. & Co.; John S. Cunningham, E. L. Spencer Co.; Charles Hanni, Sussfeld, Lorsch & Co.; George H. Thomas, Scharling & Co.; F. J. Keller, Keller Mfg. Co.; C. T. Barhour, International Silver Co.; Vincent W. Henderson, Crane & Theurer; John R. Leudan, Katz & Leudan; George S. Weiss, Schwarzkopf Mfg. Co.

Traveling representatives who called on the Cincinnati, O., trade, during the past week, included: F. Mayer, Bruhl Bros. & Hienus Co.; Ike Price, Louis Strasburger's Son & Co.; Norbert Hoffman, Eichberg & Co.; N. Gunzberger, L. & M. Kahn & Co.; Joseph Rifkin, L. Heller & Son; J. D. Beach, International Silver Co.; L. Goldberg, J. Söllinger & Co.; Mr. Powell, S. O. Bigny & Co.; I. Lederer, S. & B. Lederer Co.; Mr. Sweet, C. O. Sweet & Son Co.; John H. Baker, Jacobson Bros.; J. H. Carmichael, Bride & Finckel; W. Strauss, Jacob Strauss & Sons; Walter S. Noon, Cory Bros. Co.; T. W. Smith, Roger Williams Silver Co.; H. B. Bliss, B. M. Shanley, Jr., Co.; Charles H. Horton, Bradley & Hubbard Mfg. Co.; Julian G. Hall; Mr. Henle, Sussfeld, Lorsch & Co.; D. Jacoby, Providence Stock Co.; K. L. Taylor, Riley & French; Mr. Kent, Jacob Weintraub; Frank W. Collom, Sulzberger Bros.; William Link, Frank P. Steitz; C. A. Weideman, Geo. Borgfeldt & Co.

**Games Rolled Last Week by the Jewelers Bowling League of New York.**

The Jewelers' Bowling League has issued its schedule of games for the season of 1908-1909. The schedule is printed on blue cardboard, and contains a list of the clubs represented, the officers of the club and the prizes to be given. The membership of each team is also given. The games rolled during the week of Oct. 5-9 resulted as follows:

Oct. 5. Solidarity Watch Case Co.	837	709	728
vs. Jos. Fahys & Co.	761	826	802
Oct. 6. H. A. Meyers	867	898	875
vs. Aikin-Lambert Co.	796	866	838
Oct. 7. Cross & Bequelin	946	975	876
vs. Jewelers' Circular-Weekly	792	670	659
Oct. 8. C. F. Wood & Co.	764	883	809
vs. H. W. Wheeler & Co.	734	842	826
Oct. 9. Tiffany & Co.	768	779	878
vs. L. E. Waterman Co.	720	855	783

**Death of Charles E. Lewis.**

PHILADELPHIA, Pa., Oct. 13.—Charles E. Lewis, one of the most prominent retailers of Frankford, this city, who comes of a family of jewelers widely known in the northeastern section of the city, died early this morning at his home, 4615 Franklin St., Frankford. He had been ill for some time.

Deceased had been in partnership with his brother in the jewelry business at Frankford Ave. and Orthodox St. for many years. He had been actively identified with the trade for more than 30 years, and was greatly esteemed and much liked. He was 49 years old at the time of his death.

Mr. Lewis was influential in secret society circles, being a member of the following: Frankford Lodge F. & A. M.; Mary Commandery, K. T.; Lu Lu Temple, Washington Camp, P. O. S. of A, and Wingohocking Tribe No. 33, Imp. O. R. M. The funeral is to be held Thursday from his late residence, and interment is to be under Masonic ceremonies at Greenwood Cemetery.

M. H. Surtzer recently opened a store at Mars, Pa.

Will Reeves has engaged in the jewelry business at Newton, Ia.

Schofield & Wetzel are about to open a jewelry store at Norfolk, Nebr.

D. D. Elliott contemplates starting in the jewelry business in Hope, Ind.

Frank Didda, Eureka Springs, Ark., has opened a new store at 5969 Easton Ave., St. Louis, Mo.

Allen, Loneragan & Co. have completed plans to begin the manufacture of jewelry in Attleboro, Mass.

Miss E. E. Helmstren has begun the manufacture of fine chains at 38 Friendship St., Providence, R. I.

H. J. Crun, a former student of the Kansas City Polytechnic School, has started in business in Bridgeport, Okla.

Rubin & Clark is the name of a new firm just opening a retail jewelry store at 331 S. Spring St., Los Angeles, Cal.

Wm. Stofft, Moline, Ill., has just fitted up an office in the Arlington Block, Omaha, Nebr., where he will do engraving.

L. Eppstein, formerly with the Meyer Jewelry Co., Kansas City, Mo., has opened a manufacturing jewelry establishment in the Missouri building.

I. A. Wise, Chester, S. C., has rented quarters on Main St., Mount Sterling, Ky., where he will open a first-class retail jewelry establishment, about Oct. 20.

Horace H. Newmark has begun business at 316 Fourth Ave., Louisville, Ky., where he conducts a novelty store, making a specialty of jewelry, combs, cut glass and bric-à-bric.

Chas. H. Wallace, formerly of Washington, N. C., has opened a jewelry store in Beaumont, Cal., and will carry a complete line of jewelry. Beaumont is a rapidly growing town in Riverside County.

Arthur Hutto, for some time an engraver with Anderson & Burns, Indianapolis, Ind., has gone into business with Clarence Crane under the firm name of Hutto & Crane. They have established quarters at 24 Postal Telegraph building, in the same city.

The Flickinger Jewelry Co. is the name of a new concern which has just opened an attractively furnished retail jewelry store at 206½ W. Main St., Norfolk, Va. S. A. Flickinger, who was for some time with the Paul-Gale-Greenwood Co., of that place, will be associated with the firm.

The Hall Mfg. Co., Ltd., has been incorporated under the laws of Ontario with an authorized capital of \$40,000 to manufacture and deal in jewelry, gold and silver ware. The head office will be in Toronto, Ont. The provisional directors are: Franklin D. Hall, Attleboro, Mass.; Luther R. Hall and Glen L. Kitchen, of Toronto.

### TRADE CONDITIONS.

The local manufacturing jewelry establishments report a sudden increase in orders for the Fall and Christmas trade that in some cases has necessitated the operating of the plant overtime. That the jewelry business has practically recovered from the results of the financial depression of the past Winter and Spring, and that the business barometer now stands at "good," is conceded by a majority of the manufacturers of this city and vicinity. Orders are being received from all parts of the country by the local manufacturers, and from the present indications the conditions promise a steady and growing improvement in business lasting and becoming better after the first of the year. The brightening in the trade was noticed soon after Sept. 1. Up to that time the trade had been somewhat dormant; then, suddenly, the clouds of pessimism rolled away before the sun of optimism and the rush commenced.

Bert Kitter is on the Pacific Coast circuit for H. A. Kirby.

The Theodore W. Foster & Bro. Co. is working until 9 p. m.

F. D. Mix, with the Wightman & Hough Co., returned, Saturday, from a western trip.

Arthur Henius, of the Bruhl Bros. & Henius Co., is back from a European business trip.

Wade Williams has been in New York, the past week, in the interests of Warren & Williams.

Benjamin Lederer, of the S & B. Lederer Co., was one of the visitors among the trade in New York the past week.

J. Parker Ford, of Ford & Carpenter, has arrived home from a successful and extended trip among the firm's western customers.

Charles S. Bush and family closed their Summer home at Buttonwoods, Wednesday last, and have returned to their residence in this city.

Stevens & Co., Inc., manufacturers of optical goods, are operating their plant until 9 o'clock every night in order to catch up with orders.

Frederick A. Fairbrother, a well-known jewelry salesman, has become associated with the Jewelers Board of Trade, attached to the Providence office.

Omer J. Paquin, enameler, has removed from 95 Pine St. to 256 Weybosset St., where he is now doing business as the Providence Emblem Enamel Co.

H. Fellman, 132 Main St., Woonsocket, is conducting what he styles an odds and ends sale, by which he is working off accumulations of various lines of stock.

Miss E. E. Helmstrem has begun the manufacturing of fine chain at 38 Friendship St., supplying other manufacturers with chain in both solid gold and rolled plate.

The regular monthly meeting of the directors of the manufacturing Jewelers Board of Trade will be held at the rooms in the Wilcox building, next Friday afternoon, at 2.30 o'clock.

George H. Allen has accepted a position as traveling salesman with Salvatore Chiapinelli, who is conducting a manufacturing jewelry business at 220 Eddy St. under the name of the Armour Mfg. Co.

The James A. Foster Co. is closing out at auction sale the entire stock of bric-à-brac, statues, imported vases, figures, bronzes and clocks at their rooms, corner of Dorrance and Weybosset Sts.

The name of the O'Gorman Co. department store, which was recently purchased by L. Dimond & Son, has been changed to "Dimond's." The jewelry department is conducted by Goldsmith & Harzberg.

Moses Rosengarten and Abraham Jacobs, co-partners doing business as M. Rosengarten & Co., at 113 Point St., have discharged a chattel mortgage of \$1,400 held by Sigmund Rosen on their stock, tools, machinery, etc.

Among the foreign importations received, the past week, through the Providence Custom House were the following: From Bremen, six packages of imitation precious stones, and from Liverpool, six packages of manufactured metals.

Julius Eichenberg, who until about 18 months ago was a well-known manufacturing jeweler, and for many years previously a prominent dealer in precious and imitation stones, was recently taken to the Butler Hospital for treatment for paresis.

The Whitehead & Hoag Co., Newark, N. J., furnished the handsome gun metal fob badges for the Cigar Makers' International Union of America, the first of which were distributed at the New England Label Conference, held here the past week.

George Eberhard, who has been associated with Wm. J. Braitsch & Co. for 17 years, and recently with the Providence Metal Spinning Co., has started in business for himself at 9 Calender St., where he will do spinning of all kinds in round and oval.

Struck in the head by a section of an emery wheel which had burst at the Elmwood plant of the Gorham Co., Friday afternoon, Volda Schultz, 29 years of age, a polisher, sustained a fracture of the skull. He is at the Rhode Island Hospital, where the surgeons say he is in a serious condition.

Mr. and Mrs. William A. King celebrated the 20th anniversary of their marriage at their Washington Park home, last week, Saturday evening. The rooms were prettily decorated with goldenrod, while the dining-room was adorned with Autumn leaves and flowers. Mr. and Mrs. King were assisted in receiving by their daughter, Miss Adeline L. King.

During the past week the Manufacturing Jewelers Board of Trade disbursed the following dividends to their members who were interested in the three concerns: 25 per cent. on claims against Max Marcus & Co., Chicago; 25 per cent. from the Pittsburg Watch Co., Pittsburg, Pa., and 15 per cent. from A. W. Susen, El Paso, Tex. The latter is the third dividend, the aggregate being 45 per cent.

At the annual session of St. John's Commandery, Knights Templar, in which Frank T. Pearce assisted as master of ceremonies, the following members of the trade were elected to office: Generalissimo, Sir Edward I. Mulcahey, foreman for Charles Sidney Smith & Co.; guards, Frederick J. Mills, of Brown & Mills; Edgar C. Lakey, foreman for B. A. Ballou & Co., and Charles D. Cook, of Cook, Dunbar, Smith Co., Inc.

During the past week it was announced in this city that arrangements had been completed whereby the creditors of Perry, Aldrich Co., Boston, will undoubtedly secure a settlement of its claims in a short

time. The affairs of this concern have been in the hands of a receiver for about a year, but the settlement has been delayed through litigations of various kinds. Manufacturing jewelers of this city and the Attleboros are interested to the extent of about \$7,000.

The finance committee of the Manufacturing Jewelers Board of Trade held a meeting at the rooms of the board, Thursday afternoon, at which time the matter of removal from the present location in the Wilcox building was discussed at considerable length. No definite conclusion was arrived at as to where the headquarters of the Board should be located, but it is understood that it is the intention to have the removal occur so as to be settled previous to the holding of the annual business meeting of the Board. The Board has occupied its present quarters ever since it was organized 21 years ago.

The advisory board of the New England Manufacturing Jewelers' and Silversmiths' Association held its weekly meeting, Thursday afternoon, and voted to hold the annual corporation meeting of the association on Saturday evening, Oct. 31, at Free Masons' Hall. The business meeting will be preceded by a supper for the active members, following which the annual reports of the officers and standing committees will be presented and officers for the ensuing year elected. Arrangements are being made for practical talks by members of the trade on subjects particularly pertinent to the manufacturing jewelry industry.

The members of the Rhode Island National Guard State Rifle Team were the guests of Lieut. Martin S. Fanning, son of Joseph H. Fanning, the old-time manufacturing jeweler, at the University Club, last week Friday evening. On the team are several employes in the manufacturing jewelry establishments, and every member of the team was present. Maj. Howard D. Wilcox, of D. Wilcox & Co., who was captain of the rifle team, was presented with a handsome loving cup. Lieutenant Fanning, who was quartermaster of the team, was also the recipient of a loving cup.

The manufacturing jewelers of this city and vicinity are sending forward their trade-marks, through the Manufacturing Jewelers Board of Trade, to the Secretary of Agriculture in Canada for registration in conformity with the new Canadian stamping law that became effective, Oct. 1. So far as has been learned, none of the score or more of concerns that have sent their trade-marks for registration has received any acknowledgment of receipt. One concern sent its trade-mark for registration, but it was returned as non-acceptable, and a representative of the firm went to Ottawa, the past week, to investigate the reasons for the refusal.

Allen and Virginia Williams, aged four and five years, children of Wade W. Williams, manufacturing jeweler of this city, had a narrow escape from suffocation during a fire which broke out at their home, 62 Paterson St., Tuesday night, Oct. 6. Mr. Williams was in New York on business, and Mrs. Williams had gone to the theatre, leaving a maid in charge of the house. The fire started in the chimney behind the kitchen range and had communicated to the roof before anyone discovered it. Superin-

**KILLAM & CO.**

15 Baptist St. PAWTUCKET, R. I.

tendent John A. Droege, of the Providence division of the New York, New Haven & Hartford Railroad, heard the children crying, and, seeing the smoke, forced an entrance and took them to a place of safety. The damage to the house and contents is expected to amount to about \$3,000.

James Gower Whitehouse, for many years a manufacturer of enamellers' materials, died at his home in this city Sunday evening in the 60th year of his age. He was prominent in the Masonic fraternity, in the Odd Fellows, Knights and Ladies of Honor, New England Order of Protection, Royal Arcanum and several other secret societies. He was a member of the City Council of Providence from 1881 to 1886.

George W. Parks is prominently mentioned as the probable nominee for Mayor of this city by the Republicans, while the names of Henry Fletcher, of Fletcher, Burrows Co., and of John M. Buffinton, of Potter & Buffinton Co., have also been under consideration for that office. The following manufacturing jewelers and others identified with this industry were named as delegates to the various conventions at the Republican primaries held in this city the past week: Ward 1, Harold W. Ostby; Ward 2, Edward B. Hough and Charles C. Darling; Ward 4, Samuel S. Wild; Ward 5, Frank P. Eddy, Charles W. Battey, Danforth K. Barrett, John T. Holden, Herbert R. Dean and William B. Peck; Ward 6, George H. Grant and W. Louis Frost; Ward 7, Roswell C. Smith, Gustave Strandberg, Howard F. Mulchahey and Oscar H. Munroe. For members of School Committee, Walter B. Frost, of Ward 6. For members of City Committee, Ward 1, Frederick D. Carr; Ward 3, Walter Lloyd; Ward 7, Arthur W. Barrus and Aldredge E. Pearce. For General Assembly from Providence, First Representative, George H. Holmes, of George H. Holmes Co., and Fifth Representative, Harry Cutler, of the Cutler Jewelry Co. Charles C. Darling has been selected as permanent chairman of the City Assembly convention.

### Canada Notes.

Thomas Evans, watchmaker, Alliston, Ont., died about a week ago.

J. E. Sancton, a watchmaker, formerly of Bridgeton, N. S., is dead.

Frank H. Pearson, Dundas, Ont., has given a chattel mortgage for \$250 to W. E. S. Knowles.

The death of R. Harry Avey, of Trebilcock, Avey & Co., manufacturing jewelers, London, Ont., is announced.

Walter J. Barr, president of the Goldsmiths' Stock Co., Toronto, Ont., has gone to New York and eastern jewelry centers on a purchasing trip.

Out-of-town jewelers calling on the Toronto, Ont., trade last week, included: A. Cook, Montreal; J. Bulger, Seaforth, Ont., and H. J. Mayhew, Colborne, Ont.

The jewelry store of J. Gilders, Grand Valley, Ont., was broken into by burglars on the night of Thursday, Oct. 1, and a case containing 25 gold and silver watches valued at \$600 was taken. Entrance was effected by prying open the door, the work apparently being that of experts. The village post office was robbed the same night and letters rifled of valuable contents.

H. E. Duncan, of the Waltham Watch Co., delivered a lecture at St. George's Hall, Toronto, recently, on "The Modern Watch and Its Manufacture," illustrated with stereopticon views showing the mechanical principles governing the action of the watch. An audience of about 200 was present, including a number from the trade in neighboring towns.

### North Attleboro.

W. H. Bell & Co. are working 11 hours a day.

Stephen Stanley has reopened his machine shop. He is now located on Stanley St.

Fred S. Gilbert lost a valuable and highly prized dog on Saturday. He was run over by an electric car.

The foundation is almost completed for the big addition that is to be built on to the Totten factory.

G. Cheever Hudson sprained a tendon in his right leg while playing tennis at the Country Club, last week.

James H. Shannon, bookkeeper for Maintien Bros. & Elliot, has been selected as librarian for the Plainville Library.

William E. Flynn, shipping clerk for the F. I. Smith Co., was married, last week, in Milton, to Miss Louise Doering.

Frank Kennedy, New York representative of the Paye & Baker Mfg. Co., was at the factory several days this week.

While chestnutting recently, C. V. Whitmarsh, of Frank M. Whiting & Co., sustained a painful, though not serious, injury. In getting over a stone wall he sprained his ankle, which has confined him to his home.

Charles H. Ballou, who for several years has been a toolmaker for H. H. Curtis & Co., has gone into business on his own account. He has organized the Charles H. Ballou Mfg. Co., which is located at 289 Thurber Ave., Providence.

The funeral of Joseph G. Barden took place, Tuesday afternoon, Oct. 6, from his late residence on Park St. The funeral services were largely attended, and were conducted by Rev. William A. Farren, pastor of the Baptist Church. Burial was in Plainville. The bearers were Henry, Adelbert, Walter E. and Winthrop F. Barden.

William F. Maintien, chairman of the Plainville Board of Selectmen, received a telegram, last week, announcing that the Van Bergh Electric Protection System Co., at a meeting held in New York, had decided to locate in Plainville. A factory will be built to accommodate 300 hands. The land was given by H. E. Thompson and George Demarest, a retired jewelry manufacturer.

Two employes at the J. F. Sturdy's Sons Co. factory had a narrow escape, Thursday. A large pulley broke from its fastenings and was hurled through a glass partition near the polishing room. It struck Thomas Slavin a glancing blow on the shoulder, and when it passed through the partition glass flew in all directions. Slavin and John McCretton were cut quite badly by the glass. Both were very fortunate to escape more serious injuries.

The total attendance at York (Pa.) Fair, last week, was over 200,000, which was a record-breaker. The exhibits in the jewelry and fine arts section were quite attractive.

### Connecticut.

Factory "E." International Silver Co., Meriden, has begun to operate all departments on a schedule of 59 hours per week.

Irving H. Chase has been renominated for the office of Senator by the Republicans in the 15th Senatorial District, of Waterbury.

The R. Wallace & Sons Mfg. Co. recently acquired an additional parcel of real estate at the corner of Quinipiac St. and Bull Ave., in Wallingford.

George Bingham, foreman in the movement department of the Seth Thomas Clock Co., Thomaston, and Mrs. Emma Bowkett were united in marriage, Wednesday evening.

Frederick K. Allyn, Canaan, recently moved his stock from the second floor of the Canfield building to the first floor, where he has combined his store with that of George W. Ford.

Wm. Bass, North St., New Britain, Wednesday, sustained a fractured skull while descending in an elevator in the factory of Landers, Frary & Clark, of that place. He is said to be in a critical condition.

C. W. Leavenworth, a director, and F. A. Wallace, who is president of the First National Bank of Wallingford, represented the bank in the bankers' parade which was held at Hartford in honor of the bridge celebration, Oct. 7.

John Sutherland, formerly in the employ of the Waterbury Clock Co., Waterbury, and now of Hastings-on-the-Hudson, has the sympathy of his many friends, owing to the recent death of his little son, John, Jr., five years old, who was killed, Thursday night, by an automobile.

The factories of the Seth Thomas Clock Co., Thomaston, were closed, last Wednesday, in order to allow employes who desired to attend the exercises incident to the dedication of the new Connecticut bridge, in Hartford. The factories were operated an extra day in order to make up for the holiday.

While attending a meeting of the directors of the Wm. L. Gilbert Clock Co., Winsted, at the offices of the concern, Tuesday afternoon of last week, Lyman R. Norton, director of the Mechanics' National Bank, sustained a shock which at first was believed to be of a serious nature. A doctor was summoned and Mr. Norton was soon taken to his home, where it is said his condition is not critical.

Plans have just been completed for the proposed new building of the Plaut-Cadden Co., Norwich. The structure will be erected in Main St., and will be five stories high. The main floor will be tiled and will have a plate glass front with prismatic top lights. The first floor will be occupied by the jewelry salesroom. A special department will be arranged for the practice of optometry and the sale of optical goods. The structure will be strictly modern in every respect and equipped with every improvement.

The Easton (Pa.) *Free Press* is conducting a voting contest for the three most popular young ladies in that city. The prizes, which were purchased from Jeweler Robert K. Lerch, and are on exhibition there, are: \$45 diamond ring, \$20 lady's gold watch and \$10 lady's gold bracelet.

# THE CHESTERFIELD

The immediate success of this pattern with the Trade, upon its introduction, indicates a wholesome reaction from the elaborate, over-ornate designs with which the market has been flooded during the past few seasons, and its success also indicates that the trade are prepared to place before their patrons silverware of a higher artistic character whenever offered by manufacturers in whom they have confidence.

Out of the latter half of the XVIII Century there are few figures more interesting than that of Lord Stanhope, Earl of Chesterfield, statesman, wit and man of fashion.

His epoch was marked in literature and art by a revival of the classical ideals. The excavations at Pompeii, begun in 1748, were revealing treasures of ancient art which public taste was eagerly turning to for inspiration. Silverware, furniture and decorative art in general were reverting to a style more austere and subdued than that which had preceded. The Brothers Adam in England have left us many beautiful examples of this neo-classic art, and in France the private apartments of Queen Marie Antoinette also contain many typical instances of the exquisite workmanship of the Louis Seize period.

In its chaste and severely simple outline, the motif of the spoon is truly characteristic of the times. The decorative effect obtained by a tasteful arrangement of husks, swags, Grecian border, and such motifs of the period, is most happy in producing a design thoroughly representative of Chesterfield and his epoch in elegance and refinement worthy of the period.

We have something interesting to say about the Chesterfield to dealers throughout the United States who will write us direct for this information.

## Boston.

William R. Donovan has removed from Province Court to 5 Bromfield St.

Frank B. Chace is on a business trip this week through eastern New England.

The Cohannet Silver Co. has given up its Boston office in room 27, Jewelers building. George Swett, formerly with the Boston Optical Co., is now in business at 178A Tremont St.

Edward J. Farrington, publisher of the Hyde Park *Times*, who died Oct. 5, was formerly in the jewelry trade.

E. L. Shubert, of the American Silver Co., makes Boston his headquarters now, instead of Bristol, Conn., where he was formerly located.

George W. Homer, who has been sick at the homeopathic hospital with typhoid fever, is now nearly recovered, and expects to return to business shortly.

The partnership injunction case of Skoog vs. Lombard came up for a hearing before a master, Oct. 9, and was continued to Oct. 20 for further taking of testimony.

A final hearing in the case of Albert G. Farnham, Lawrence, was held on his petition for a discharge in the United States Bankruptcy Court, in this city, Oct. 12.

A. A. Vantine, dealer in curios and quaint jewelry, has removed from the old location on Boylston St. to Nos. 360 and 362 on that thoroughfare, which have been fitted up handsomely for the concern's occupancy.

E. B. Cook, of the Woodman-Cook Co., fully recovered from his recent illness, was at the Boston office of the company during the week. He reports sufficient improvement in business to warrant resumption on full time, recently, at the factory in Portland.

Martin C. Winsor, formerly a salesman for Carl G. Aldrich, of the Jewelers building, was arrested at Pittsfield, last Thursday, charged with retaining samples valued at \$1,373.75 belonging to Mr. Aldrich. In court he waived examination and was held in \$2,000 bonds for the Grand Jury.

Francis R. Mullin, attorney, who sued Mrs. E. W. Grogan, daughter of the late Alvan Clark, the famous telescope maker, and the trustees of the Clark estate for \$500 for legal services, was awarded \$232.25 in the jury-waived session of the Superior Court at East Cambridge, last Thursday.

M. Myers, of the Jewelers building, who has been on an extended business trip through the northwest and Pacific Coast section, arrived in Boston last Saturday. He reports business in that portion of the country much better than in the eastern section. Mr. Myers will make a return trip over the same territory about a fortnight hence.

George E. Blanchard, 16 years of age, was captured by a Chelsea policeman in the jewelry store of Samuel Fritz, at 131 Broadway, Chelsea, on the night of Oct. 6. Blanchard broke a window, it is alleged, to effect an entrance, and was looting the store when caught. He was charged with the theft of three watches, jewelry valued at \$20, and a number of tools.

The New England Watchmakers' Club, which recently secured its incorporation charter, is planning for a series of instruc-

tion nights for classes of members. The topics will be as follows: "Balance Truing and Poising," "Hair Spring Truing," "Escapement Matching and Finishing," "Pivoting," "Staff Making" and "Jeweling." At the meeting last night there was a talk on the care of lathes and their attachments by a representative of the Waltham Watch Tool Co.

The Boston Optical Co. is adding 417 square feet of floor space to its establishment in the Jewelers and Washington buildings. About 300 feet of this space will be added to the manufacturing department, and the balance to the shipping room. The concern will install immediately nine new surfacing machines, part of which will be automatic. The company now employs about 40 persons, and has practically doubled its business in the past two years.

In the Salem court, last Thursday, Herman Grose and Joseph Fink, both claiming to be from Philadelphia, charged with obtaining money under false pretenses, were held for the Grand Jury. The men represented an optical company which has a booth at the Boston food fair, but which disclaims authorization of their acts. They are alleged to have charged extortionate prices for glasses sold by them in Salem to residents of that place, and making false claims regarding the properties of the glasses.

Buyers in town during the week included: O. H. Benoit, Fall River, who has recently moved to new quarters on Well St.; C. A. Senter, Brockton; A. B. Chapin, Worcester; J. H. McGovern, Haverhill; H. A. Wippich, Provincetown; B. D. Loring, Plymouth; E. S. Clark, Sandwich; W. F. Chisholm, Gloucester; H. S. Hewett, Brockton, Mass.; P. Dinan, Biddeford, Me.; Mr. Montgomery, Camden Jewelry Co., Camden; J. E. Stephens, Rumford Falls, Me.; A. W. Avery, Plymouth; George H. Woodbury, Newport; E. S. Albee, Wolfboro; M. P. Foss, Pittsfield; F. A. Towle, Peterboro, N. H.

## Attleboro.

Henry Mason is traveling through the south in the interests of the Bliss Bros. Co.

Col. Sidney O. Bigney has been elected a member of the Old Colony Historical Society.

Edward A. Sweeney was elected, last Thursday, a member of the Republican County Committee.

F. C. Somes has returned from an extended and highly successful western trip for Bates & Bacon.

Fred Perry arrived home, last week, from a two months' journey through the middle west for Bliss Bros.

W. E. Richards Co.'s team still holds the lead in the shop bowling league, with eight victories and one defeat.

M. J. Brohan, an employe of the Horton-Angell Co., has been nominated for Senator by the Independent party.

David E. Makepeace and Orville P. Richardson returned, Thursday, from a visit to Detroit with the Ancient and Honorable Artillery of Boston.

A 500-pound power press came down on the hand of Narsina Gibeault at the F. M. Mossberg Co. factory, last Thursday. Three

fingers were so badly crushed that amputation was necessary.

The D. F. Briggs Co. baseball nine has been presented with a handsome pennant for winning the baseball championship of the Jewelers' League.

J. M. Fisher & Co. are duplicating for a customer an old Chinese curio owned in Nantucket, Mass. The curio is a little locket of cherry stone size, but large enough to hold 144 tiny silver spoons.

The James E. Blake Co. is making arrangements for increasing the water supply of the factory. A well is being sunk on the bank of the Ten Mile river to the north of the factory. The water will be carried to the shop, a distance of 1,000 feet, through a large pipe.

The Y. M. C. A. evening class in jewelry designing will open to-night, Oct. 14, with a large enrolment. Classes will be held on Wednesday and Friday evenings. On Wednesday night Edmund Gurry will instruct the class in drawing and designing. Friday evening the instructor will be J. H. Harrold, and the period will be devoted to designing and modeling.

The C. M. Robbins Co. is planning to remove from its present quarters on Pine St. to the W. H. Wilmarth & Co. building on Hazel St. Final arrangements have not been quite completed, but it is expected that the Robbins company will have the entire top floor of the building. P. J. Cummings & Co., who have had half of the floor, will in all probability take space in the basement.

At a special town meeting held on Thursday evening the town voted to appropriate \$700 a year for a bed if the sanatorium built by John M. Fisher is opened. At the conclusion of the meeting various subscriptions were offered to assist the project. Joseph L. Sweet and Harold E. Sweet offered to give \$100 for three years to assist in the payment of taxes. A. R. Crosby offered to be one of 20 to give \$50 for three years. Other contributors were: F. W. Lincoln, \$50; Charles O. Sweet, \$25; W. H. Lamb, \$25; Fred L. Torrey, \$25, and E. V. Sweet, \$25.

A new jewelry concern is about to start in Attleboro. The firm will be known to the trade as the Allen-Lonergan Co., the personnel of the concern including Harlan A. Allen, for the past six years Chicago and western representative of C. H. Allen & Co.; E. J. Lonergan, for eight years bookkeeper for the Allen concern; Samuel LeFavour, who has been head toolmaker of the same firm for 12 years, and Elmer A. Scott, who was also employed in the tool department. The Allen-Lonergan Co. will manufacture a general line of jewelry, but will devote most of its attention to men's goods. A location will in all probability be obtained on the second floor of the new Ingraham building. The firm will have its line on the market about Dec. 1. Mr. Allen will be the traveling representative. Mr. Lonergan will take charge of the office part. Mr. Scott will be the foreman, and Mr. LeFavour will have charge of the tool department.

Lucien Diacon, Chaska, Minn., is reported to be very ill, with an affection of the heart. Serious fears are entertained about his condition.

**J**EWELRY failures during the month of September show an increase both in number and amount of liabilities over the corresponding months of the previous four years. According to the statistics compiled for *Dun's Review* in the table of failures by branches of business, there were 19 insolvencies in the jewelry and clock trades last month, with liabilities of \$111,628, as against six failures in 1907, with liabilities of \$103,612; six failures in 1906, with liabilities of \$16,428; nine failures in 1905, with liabilities of \$30,407, and 10 failures in 1904, with liabilities of \$48,181. The similar table compiled for the same authority showing failures by branches of business during the third quarter of the year (July, August and September) show the total failures in the jewelry trade to be 64, with liabilities of \$619,855, as against 20 in 1907, with liabilities of \$146,964; 25 in 1906, with liabilities of \$162,890; 24 in 1905, with liabilities of \$143,288, and 39 in 1904, with liabilities of \$256,156.

**T**HE trade is again warned to be exceedingly careful in accepting checks from strangers, as the information which THE CIRCULAR-WEEKLY is constantly receiving from many sections of the country show that check swindlers are at large to an even greater extent than in previous years, and though their victims in the jewelry trade have not been many in number, more attempts to swindle jewelers are being made now than ever before at this season of the year. A little caution, a little firmness, as well as a curb on the natural anxiety of the dealer and his clerk to make a sale under suspicious circumstances, is all that is necessary to prevent these swindlers from operating successfully. Above all the jeweler should be careful to pay little more attention to alleged certifications by banks than to the ordinary uncertified check. A man who cannot give references or wait until the bank or the drawer of a check is telephoned to, is in 999 cases out of a 1,000 not a desirable customer. Another maxim for the jeweler to remember is that the busier he is, the more cautious he must be, for it is the busy man that the swindler expects will take the most risk.

**Conviction of a MEMBER** of the trade generally will be pleased to read in another column the conviction of Samuel K. Reich, for a long time known to jewelers as "the short change flim-flammer," who operated in many States, and succeeded in getting many thousands of dollars worth of jewelry in exchange for a very small amount of cash. Reich's trick, it will be remembered, consisted of the purchase of a valuable piece of jewelry worth from a few hundred to several thousand dollars, and paying for it with a few bills of large denomination and a number (generally 19 or 14) one dollar bills. According to the charges made, he always presented in payment \$1 less than the amount called for, and when the jeweler called the fact to his attention he recounted the money, admitted the mistake, added a silver dollar to the pile and departed. After he had gone his

Advertising in THE JEWELERS' CIRCULAR-WEEKLY will bring you buyers of a most desirable kind.

victim discovered that the bills of larger denomination had been "palmed" in the operation of recounting and he had nothing for his jewelry but one dollar bills and the silver dollar.

Reich was arrested in Buffalo on a charge of swindling a Syracuse jeweler, but when taken to that city the evidence was not strong enough to sustain the charge. Fortunately THE CIRCULAR-WEEKLY had published a picture of Reich, which was identified by his victims in many large cities, over a dozen dealers recognizing him as the man who had swindled them or had tried to do so. He was brought to Brooklyn on the charge of swindling the R. Simpson Co. out of \$1,370 worth of jewelry, and it is on this charge that he has just been convicted.

That part of Reich's defense, that he is the victim of a mistaken identity, and that his twin brother committed the crime charged against him will also be read with interest, as there has been a man operating in the same way in the jewelry trade, whose appearance is somewhat similar to the prisoner. It may be that he has a twin brother engaged in the same work. If so, it is to be hoped that the latter will soon be located and given the same punishment.

**An Aid to the Progressive Jeweler.** It is at this season of the year that the progressive jeweler seeks most diligently for the newest and most salable lines of articles which his customers will call for, and is ever on the alert for new sources of supply in order that he may be sure that he is buying "right," not only as to price, but as to quality, workmanship and general attractiveness of design as well. It is for this reason that the really up-to-date merchant is constantly seeking information which will keep him in touch with the most progressive manufacturers of his trade, and there is no way in which he can do this better than by a careful and frequent perusal of his trade journal.

While the reading columns of THE CIRCULAR-WEEKLY are devoted exclusively to news and information of value to the retail jeweler and unlike other journals are never used directly or indirectly for exploiting or puffing the product of any manufacturer, nevertheless the reader has in this journal the greatest opportunity to keep abreast of what the manufacturer is doing and what new goods he puts on the market, because the 100 or more pages of advertising which this journal is publishing from week to week is the finest directory of up-to-date merchandise that could possibly be compiled, even if a special effort was made to do this and nothing else. As practically every progressive and up-to-date manufacturer is an ad-

### Good Gold Jewelry

*It's the  
only kind  
we make*

A RATHER COMMONPLACE DECLARATION, WE'LL AGREE, BUT WE MAKE IT WITH AN INSPIRING REVERENCE FOR THAT MUCH-ABUSED WORD "GOOD." OUR JEWELRY IS GOOD ALL OVER—GOOD THROUGH AND THROUGH. IT ISN'T ALONE SUPERFICIALLY IMPRESSIVE, IT GOES BEYOND THAT, SUPPORTING ITS VISIBLE DIGNITY WITH MATERIAL QUALITIES THAT MAKE IT MOST ENDURING. FURTHERMORE, LIKE EVERYTHING IMPRESSIVE, IT HAS A PERSONALITY—CHARACTERISTICS THAT EASILY HELP IDENTIFY IT AS A KIRBY PRODUCT. ASK TO SEE THE KIRBY LINE BEARING THE ABOVE TRADE-MARK.

vertiser (and, in fact, one of the best indications of his progressiveness is his proper use of printers' ink), the retail jeweler can rest assured that his examination of the lines of articles illustrated and described by manufacturers and jobbers in their advertisements in THE CIRCULAR-WEEKLY from week to week will give him a full and complete idea of all that the market offers to him.

It is this fact that has made the advertising part of each issue of THE CIRCULAR-WEEKLY a feature of strong interest to all readers of recent years and one that is growing in importance as time goes on.

### Lancaster, Pa.

Charles Bischoff and his son visited Philadelphia last week.

T. Wilson Dubbs has sold his property, 552 W. Walnut St., to Dr. D. H. Nissley.

F. A. Wheeler, of the Non-Retailing Co., is on a trip to Tennessee; C. E. Foose is in Central Pennsylvania, and E. C. Kant is touring Ohio.

A letter received last Thursday from Maurice Fitzgerald, now in Los Angeles, Cal., says his health has so improved that he expects to return home within a month.

G. William Reisner, manufacturing jeweler, paid a visit to Allentown last week, and John Conlin and Joseph Boll took in Founders' Week celebration at Philadelphia.

Last week Engene P. Coho, late treasurer of the Hamilton Watch Co., who has removed to Philadelphia, resigned as secretary of the West End Building & Loan Association.

A number of employes of the Hamilton Watch Factory, last week, organized a bowling club, which will enter the Lancaster City Bowling League. John Shock was elected captain, and the name adopted is the Cuba Bowling Club.

Louis Weber & Son are extending their big store, with a view of creating a department for fine cut glass and chinaware goods, as well as art metal wares. The diamond room will occupy a prominent location in the front of the store.

J. J. Bowman, of the Ezra F. Bowman Technical School, and the following students visited Philadelphia during the Founders' Week celebration: Edgar Bierer, John Carr, Frank Dietz, Ralph Sprenger, John Shober, T. H. Henshaw and Clyde McCormick.

On the occasion of the celebration of the 70th birthday of Rev. Dr. J. H. Dubbs, of the faculty of Franklin and Marshall College, a few nights ago, the local chapter of the Chi Phi Fraternity, which he founded, presented him with a beautiful loving silver cup, which was furnished by Aug. Rhoads, of Lancaster.

A couple of Gypsy women, last week entered Neilson W. Pinkerton's jewelry store at Manheim and one proposed telling his fortune, while the other examined some bracelets. When the Gypsies left bracelet left with them. A constable visited the camp, recovered the stolen property and chased the band out of town.

Bernard Ganter, Sr., Galveston, Tex., has admitted his son into the business, making the firm style Bernard Ganter & Son

## New York Notes.

A. Schoor, 212 Broadway, returned from abroad last week.

The Jewelers' Bryan & Kern Club has put up a flag at Nassau and John Sts.

Theodore Kaufmann, jewelry buyer for Kaufmann Bros., Pittsburg, Pa., was in this city last week.

B. Konijn, of Konijn, Frank & Shire, 65 Nassau St., arrived from the European diamond market, recently, on the *Lucama*.

The Jewelers' Taft & Sherman Club has placed a banner at Broadway and John St. This is the third flag put up by the club.

John P. Melhado, representing Borrelli & Vitelli, New York, will leave shortly for an extended trip through the south and middle west.

John H. Peckham, head of the firm of J. H. Peckham & Co., North Attleboro, Mass., accompanied by his son, Harry, is spending a few days in town.

An interesting article on "Artificial Gems," by Emil Freund, with Henry Freund & Bro., appeared in the October issue of the *Mineral Collector*.

G. B. Vitelli, of the firm of Borrelli & Vitelli, 401 Broadway, New York, 19 Rue d'Hauteville, Paris, France, and Torre del Greco, Italy, has established a new office at 57 Hatton Garden, London, England.

The firm of A. Satzman & Son has been incorporated under the laws of New York State with a capital of \$4,000. The directors are Abraham Satzman, Pauline Satzman and Charles Satzman, all of this city.

The Jewelers Board of Trade reports that it has sent out a first and final dividend of 30 57/100 per cent. to the creditors of J. P. Evans, Bois, Idaho, and a second dividend of 10 per cent. to the creditors of P. C. Pulse & Co., Oakland, Cal.

The *New York Mail*, in the issue of Oct. 8, quoted a long interview with Ludwig Nissen, of Ludwig Nissen & Co., 182 Broadway, in regard to the political situation in this State as far as the German-American residents were concerned in the coming election. The gist of the interview was to the effect that the German element would support Taft and Hughes.

The partnership known as the Schultzer-Jerseman Mfg. Co. was dissolved, Oct. 6, 1908, by mutual consent. The business has been purchased by Max Jerseman, who has taken into partnership Louis Wagner, formerly foreman for Wolfsheim & Sachs. The business will be conducted at the same place as formerly, 105 Maiden Lane, under the style of Jerseman & Wagner.

Henry Bruml, senior member of the firm of Henry Bruml & Co., dealers in silver plated ware, 194 Broadway, was knocked down at Broadway and Franklin St. by a Broadway car, southbound, last Wednesday, and severely bruised. He was taken to the Hudson St. Hospital and afterward removed to his home. Mr. Bruml was injured about the body and legs and it will be some time before he will be able to return to business.

In the note last week, speaking of the receiver appointed in the bankruptcy of Adolph Bottstein, it was stated that Sol. J. Freudenheim was the attorney for the petitioner, meaning the creditor who filed the petition for the receiver. Some read-

ers understood this to mean that Mr. Freudenheim was the attorney for the bankrupt, which was not so as Mr. Freudenheim represented a creditor and now represents the receiver.

At the regular monthly meeting of the board of directors of the Jewelers Board of Trade, held, last Thursday, at the offices of the board, the following firms were unanimously elected to membership in the board: Max Deutz, Providence, R. I.; Electrolytic Art Metal Co., Trenton, N. J.; Fessenden & Co., Providence, R. I.; Mitchell & Straker, Providence, R. I.; Bernhard Roede, New York; Nathan A. Sachs, New York; Weizenegger Bros., Newark, N. J., and the Fourth National Bank, New York (associate).

When the examination of Herbert Frankel, charged with obtaining articles on memorandum from Dieges & Clust, 23 John St., and appropriating them to his own use, came up, last Thursday, it was adjourned for a week. Frankel visited the John St. jewelers, Sept. 23, and presented a card of introduction. He selected jewelry to the total value of \$138, which he took on memorandum. According to the statements made by the firm, he did not return the goods or make payments on them. The matter was turned over to Detectives Monahan and Stringer, who arrested the man.

Stories in the daily papers during the past week have contained a statement that Mrs. Meyer Newman, wife of the jewelry salesman who mysteriously disappeared from his home, 1555 Fulton Ave., the Bronx, some time ago, and who, it was thought, was abducted by the "Black Hand," is now endeavoring to collect a \$2,000 insurance policy on his life. Since the man's disappearance in June she has heard nothing from him. Following the disappearance of the jewelry salesman, Stern Bros. & Co. received letters stating that unless \$10,000 was left in a tin can at the entrance to Bronx Park the salesman would be put to death. Newman plied his trade along the water front, and it is thought that he was lured aboard one of the ships and carried away.

L. W. Sweet & Co., 37 Maiden Lane, recently received a letter dated Sept. 7, signed "Mrs. Mary W. Babcock," which asked the jewelry concern to send to her a combination gentleman's stick pin and half moon of diamonds, to cost about \$200, and a finger ring to cost about \$100. The letter enclosed a drawing of the articles desired. Two days later the firm received another letter, also supposed to come from Mrs. Babcock, in which a check was enclosed for \$225, with the statement that the rest of the money would be sent when the goods were received. The pin was sent by the concern, and on Sept. 21 a check for \$67.50, signed by the name of Mrs. Babcock and drawn on the Gallatin Bank, was sent to the firm. The pin did not reach Mrs. Babcock and she knew nothing of the two checks until she went to the bank on Oct. 1, when she had her bank book balanced; then she found they had been drawn against her account. She protested that they were forgeries and was shown the letter signed with her name. Harrison Williams, a negro, 19 years old, was locked up at police headquarters charged with having forged the checks.

Another meeting of the creditors of George H. Carpenter, with whom Maurice C. Dreshfield was associated in transactions by which \$182,549 worth of diamonds were obtained from R. A. Breidenbach, 51 Maiden Lane, New York, was called, Friday afternoon, before Referee Olney at his offices, 68 William St., New York. No testimony was taken, the time being given over to a discussion between the attorneys relative to what should be done. R. P. Levis, who has been called into the matter by Solomon Oppenheimer, attorney, representing R. A. Breidenbach, argued in favor of an adjudication in bankruptcy for Mr. Carpenter. He made an offer of the withdrawal of every allegation of fraud in the petition filed against Mr. Carpenter, providing that Mr. Carpenter would submit to being declared a bankrupt on the allegations of insolvency. Considerable discussion occurred in regard to this point between Attorneys Levis and Dittenhoefer, representing Mr. Carpenter. In a statement made by Mr. Carpenter in regard to bankruptcy proceedings, he said that he was opposed to being declared a bankrupt, either involuntary or voluntary, and that he wished to have the matter of the alleged fraud cleared up and every charge wiped out. He said that for his own personal feelings it was worth the while for him to fight the thing out fully. Mr. Carpenter said that after the petition was filed against him in March he began again to do the best he could with the limited means at his command, and stated that he had kept on since that time, and is in a fair way to make a compromise with his creditors. No definite arrangement was reached in the matter, and an adjournment was taken until Oct. 30 at 2 p. m., at the same office, at which time the matter will again be taken up and the Dreshfield proceedings continued.

A petition in involuntary bankruptcy was filed in the United States District Court, Wednesday, against the Bank Clock Mfg. Co., 154 Nassau St., New York, by Shattuck & Glenn, attorneys for the Dixon Mfg. Co., creditors for \$2,679, the consideration for the indebtedness being steel cases and small items sold by the petitioners to the defendant and delivered at its request to the New Haven Clock Co. to assemble. The total agreed price of the cases is placed at \$954.42, against which are credits for \$250 cash and \$74.54 for replating. A further indebtedness of \$2,054.10, representing the agreed purchase price for 6,847 cases which were tendered to the Bank Clock Mfg. Co., but were not accepted, is also named. The petition sets forth that the petitioners are unable to sell the clock cases to anyone else, because the cases are designed especially for the alleged bankrupt concern. The petition also alleges the total assets of the alleged bankrupt does not exceed \$2,300, and that it owes debts for \$5,750. It is alleged that the concern is insolvent, and that on Sept. 29 transferred first and second mortgages of \$5,500 on property in Allentown, Pa., to the New Haven Clock Co., a creditor, to prefer it. The petition claims that the alleged bankrupts have approximately ceased to transact business or to make any effort to obtain

new business. Judge Holt appointed Chas. R. Hickox receiver under a bond of \$2,500.

Chas. Aronowitz has sold out to Wm. Greenfeld.

G. P. Granberry, 111 E. 14th St., has gone out of business.

The William L. Gilbert Clock Co. has leased a loft at 8 Gold St.

S. Lebolt, buyer for Rothschild & Co., Chicago, was in town last week.

Lewis Bernheim, of Bernheim & Beer, returned last week from a western trip.

F. B. Nourse, Cortland, N. Y., visited THE CIRCULAR-WEEKLY offices one day last week.

Rothenberg & Weiss, 111 Ludlow St., have been succeeded by Schneider Bros. & Weiss.

Max Moser, of Moser & Whyte, is on a business trip to Philadelphia, Baltimore and Washington.

Earl R. Sheppard, manufacturer's agent, 53 Maiden Lane, is visiting Pittsburg, on his way west.

Fred A. Kent, of Ambrose, Kent & Sons, Toronto, Can., was in this city, last week, buying stock.

Orin W. Clifford, with the Webster Co., North Attleboro, spent several days in this city, last week.

Henry H. Curtis, manufacturing jeweler, North Attleboro, was in the Maiden Lane district, last week.

I. E. Anthony, a pearl dealer, Clinton, Ia., and A. C. Windau, Danville, Ill., were in this city last week.

R. C. Bruneau, secretary of the Occidental Gem Corporation, has gone to Salt Lake City, Utah, on a business trip.

A. H. Rosenstein, president of the Lancaster Silver Plate Co., Lancaster, Pa., was a visitor in this city last week.

H. Ginder, president of the A. B. Griswold Co., New Orleans, La., accompanied by his wife, is a visitor in town.

James B. Smith, with the Wolcott Mfg. Co., Providence, has moved his family from Providence to East Orange, N. J.

G. Herbert French, of Riley & French, North Attleboro, was at the local offices of the concern, 180 Broadway, last week.

Wm. J. Ward, 9 Maiden Lane, spent a few days, last week, visiting the jewelry factories in Attleboro and Providence.

E. White, with the George L. Vose Mfg. Co., Providence, R. I., was in town last week en route for Galveston, Tex., on a business trip.

Staiger & Sons, importers of diamonds and manufacturing jewelers, are moving today from 926 Broadway to 170 Broadway, room 507.

Benjamin F. Rees, of Zimmern, Rees & Co., 14 Maiden Lane, sailed from Europe on the *Kaiser Wilhelm der Grosse*, Tuesday of last week, for home.

In a letter received by a prominent pearl dealer of this city from the pearl centers of the west, last week, it was stated that shelling has been finished and the present pearl season is about at an end.

Harry Jehlinger, who is now a jewelry buyer for A. Hamberger's Sons & Co., Los Angeles, Cal., is in town buying Fall stock.

He formerly represented the N. Brastow Co., Providence, in the west.

The Bayer & Pretzfelder Co. has been incorporated under the laws of New York State, with a capital of \$50,000. The directors are: Clarence F. Bayer, Albert Pretzfelder and Byron L. Strasburger, all of New York.

The Silver Art Metal Co. has been incorporated under the laws of New York State, with a capital of \$50,000. The directors are: Fred B. Cochran, Charles H. Corbett, Jr., New York, and William G. Milner, of Queens.

A cablegram received Tuesday morning by Borrelli & Vitelli, 101 Broadway, states that Louis Borelli, president of the firm of Borrelli & Vitelli, has been nominated a *Chevalier* by the King of Italy. This is an honorary title which stays in the family indefinitely.

The Postoffice Department has issued a fraud order against the American Novelty Co., at 95 Liberty St., New York, and Hudson Heights, N. J. The company advertised to sell valuable watches on the installment plan, but sent a very cheap watch instead, insisting on receiving full payment before the good watch is sent.

At a recent meeting of the Maiden Lane Outing Club, held at the offices of William J. Ward, 9 Maiden Lane, it was unanimously voted to participate in a body in the business men's parade, Saturday, Oct. 31. A second meeting will be held shortly to choose a marching captain. About 75 men are expected to be in the parade.

The October meeting of the Optometrical Society of the City of New York will be held at 8 o'clock this evening in the Waldorf-Astoria Hotel, Fifth Ave. and 33d St. The meeting is one of the most important of the season, as nominations will be made for the officers for the coming year. The second lecture of the series on "Lens Transposition" will be delivered by E. Le Roy Ryer.

American private gold coins were the feature of the third and last day's sale of coins held by Thomas L. Elder at the Collectors' Club, last Thursday. A rare five-dollar Bechtler gold piece, struck at a private mint in North Carolina in 1834, was sold to H. O. Granbury, Oshkosh, Wis., for \$785, the highest price ever paid for a North Carolina gold coin. High prices were also received for several other rare coins.

Stories in the daily papers during the past week stated that a large quantity of corals and cameos of Italian manufacture are reported to have been seized by the Federal authorities at Chicago. It is claimed that these goods were traced from a steamship docked in this city. The Treasury Department is of the opinion that its officers are on the trail of a conspiracy involving a dozen or more smugglers. The total value of the goods seized thus far is said to reach \$20,000.

The schedules in bankruptcy of the Walter E. Bush Co., 123 Liberty St., filed in the United States District Court, Tuesday, show liabilities of \$3,084.33 and nominal assets of \$3,360, of which stock in trade is named at \$2,167; machinery, tools, etc., \$339, and debts due on open account, \$237. Among the unsecured creditors named are: R.

Breidenbach, \$190; J. W. Richardson Co., \$117; Riker Bros., \$276; Power & Allen, \$255; F. Jaickle, \$169; Robt. A. Albers, \$500, on promissory notes. The petition was filed against the company in June last by Riker Bros., Dick & Dodge and Harry D. Miller.

The 18-story Broadway-Maiden Lane building at the southeast corner of Broadway and Maiden Lane, has been sold by the Broadway Building Co. to John B. Brower, of Ipswich, Mass. In part payment for the Broadway skyscraper South Chicago property owned by the Brower estate and valued at \$1,500,000 is given. The total amount involved in the transaction is said to be about \$6,000,000. The Broadway-Maiden Lane building was put up about seven years ago by the Broadway Building Co., of which Stewart Browne is president. The site measures 78 feet on Broadway and 112 feet on Maiden Lane. This land cost the present sellers of the property about \$1,250,000. The building itself involved an outlay of an additional \$1,000,000, the entire property representing at that time a total investment of about \$2,250,000.

J. D. Schenck, one of the two men who were caught in an attempt to steal a package of loose diamonds from the firm of Cooper & Forman, 3 Maiden Lane, on July 6, has been released on a suspended sentence by Judge Foster in the Court of General Sessions. Frederick Kenney, his companion in the attempt, was sentenced a short time ago to two years in State's prison. As told in a recent issue of THE CIRCULAR-WEEKLY, the two men called at the office of Cooper & Forman and asked to see some loose diamonds, representing that they were deputized by employes of a large concern to buy a gift for the superintendent and his wife. One of the men secreted a package of loose stones beneath his hat, but was seen by William Stenson, an employe of the concern, who surprised the two men by appearing with a revolver and accusing them of the theft. They ran for the door, but were caught and held.

Saturday morning about 10.30 o'clock, a young man called at the establishment of Dieges & Clust, 23 John St., New York, and asked to be shown some jewelry. He selected a watch fob and brooch, valued at \$67.50, and in payment presented a check on the National Bank of Commerce for \$77.50. Inquiry at the bank disclosed the fact that the man had no account there, and was not known. He was arrested, taken to headquarters and held for examination in \$1,000 bail. The man had bought jewelry at the same place on previous occasions and always seemed to have a supply of money. It is reported that he had a large sum of money left to him and that he has been spending it on all sides, buying an automobile and other expensive luxuries. At a former visit he had bought a quantity of jewelry and given a check for \$47, which was accepted, but it later proved worthless. When he presented the second check, which was signed John D. Rose, the jewelers sent an employe out to find Detective-Lieutenant Monahan, who hastened to the firm's place of business. The man was taken to headquarters and held. The prisoner is a young man of medium build. He gave the name

**Harrisburg, Pa.**

Fred Robin has been engaged as tenor soloist of the Messiah Lutheran Church choir.

Fred J. Marx, clerk in Flick & Lieb's store, Sunbury, Pa., has become a member of the firm of Schaffer & Co., that town.

Mrs. Reba Cohen, whose husband conducted a jewelry and notion store in Russia, and who now resides in Middletown, this county, claims to be 103 years of age, and is still quite active. Her husband died 19 years ago.

Among the corporations chartered at the State Department, last week, were the People's Commercial Co., Albion, capital \$10,000; Farmer Mercantile Co., Canonsburg, capital \$5,000, and the Montgomery Store Co., Montgomery, capital \$60,000.

The retail merchants of the State are gathering data to present to the coming session of the Legislature in support of their proposed bill to abolish the mercantile tax. At the recent convention of the State merchants at New Castle resolutions were adopted to the effect that every effort be made for the repeal of the law, which is claimed to be an unnecessary and oppressive burden upon the merchants of the commonwealth.

The Nazareth (Pa.) Merchants' Protective Association is backing an ordinance in Town Council, providing for a peddler's license of \$12 a year.

**News Gleanings.**

Alphonse Strobel, St. Cloud, Minn., has taken a position with Bechtold & Fritz, Sioux Falls, S. Dak.

Barnard B. Gragg, Brook, Ind., has admitted his brother into the business. The firm style is Gragg Bros.

Albert H. Allen, Barnesville, Minn., has moved his stock into larger quarters in the Tweeton building, on Front St.

Casper Fenzel, Middletown, O., is about to erect a new building in Main St., in which to continue his retail jewelry business.

L. M. Barnes, North Adams, Mass., last week, enjoyed the felicitations of his many friends on the occasion of the 70th anniversary of his birth.

Ben. F. Harless, Houston, Tex., has left on a purchasing trip to New York, where he will purchase stock for his new store at 315 Main St., which will be opened about Oct. 15.

The Crawford Jewelry Co., which was conducted by B. A. Cordell, Temple, Tex., has been sold to A. L. Jones, Llano, Tex., who will continue the business under the old firm style.

Burglars broke into the store of A. H. Pehrson, Mitchell, S. Dak., about a week ago, and stole \$300 worth of stock. The more valuable jewelry had been stored in the safe, which was unmolested.

L. J. Weikert, Waynesboro, Pa., recently purchased a three-story building at 36 and 38 W. Main St., that place. Mr. Weikert will move his stock into the new location just as soon as the improvements are completed.

Wallace Dye, 40 years old, who conducted a pawn brokerage business on Jay St., Bedford, Ind., while inspecting a revolver, one day last week, was killed almost instantly, the weapon having been accidentally discharged.

Wessels Bros., Aiken, S. C., have sold their stock and fixtures to B. F. Grohmann. Charles Wessels, formerly manager of the firm of Wessels Bros., has left for Memphis, Tenn., where he will engage in the optical business.

Thomas Leegan, Arthur Poland and Alexander Kazman, three itinerant vendors of cheap jewelry, were recently taken into custody in Saginaw, Mich., and after pleading guilty were fined each \$25, or five days' imprisonment in the city jail.

Two strangers recently entered the store of C. H. Mowen, 105 W. Franklin St., Hagerstown, Md., and purloined a watch valued at \$24, after having pretended that they wished to purchase a timepiece. J. C. Mowen, son of the proprietor, suspected one of the men, who was searched, but the watch was not found. Neither of the men was arrested.

It was reported from London, that the jurors of awards in the Franco-British Exhibition have awarded to R. & S. Gerard & Co., the grand prix for silversmithery and the grand prix for jewelry, Elkinton & Co. the grand prix for silversmith, and E. Dent & Co., Ltd., "the makers of Big Ben," grand prix for watch and clock making. A similar prix was awarded to the British Horological Institute. The Gold & Silversmiths' Co., Ltd., are hors-concours.

**Newark.**

The force of the Elm Jewelry Co., Lafayette St., has been increased by several new hands.

Herpers Bros., who have taken on several new hands during the past two weeks, are prepared to make another slight increase in the staff soon.

William Huger & Co., Halsey St., have increased their force by six new hands, and the plant is now running on practically a full-time schedule.

Cory Bros. Co., Marshall St., near Halsey, are now using the full staff of employes, with a reduction in the schedule from 60 to 50 hours per week.

As a result of the death of Robert Z. Block, of the firm of Robt. Z. Block & Co., the plant, 38 Crawford St., will continue at its present schedule for a time in order to allow for the readjustment incident to Mr. Albrecht's assuming full charge.

Another jewelry factory was entered, recently, apparently by the same gang that has shown such a leaning to this kind of loot. C. Rech & Son reported that their factory, at 481 Washington St., had been entered through a window and a quantity of gold chains stolen.

Officials of the New York Standard Watch Co. have decided to resume operations at the factory of the concern, in Jersey City, within a few days. The employes will be taken back and allowed to work five days each week until the times demand their regular day's service.

Pins combining the letters T-A-F-T in several of the cheaper metals, and in more than one unique design, have appeared on the market here, and there is a heavy demand for them, although the call for general campaign emblems made up as pins does not seem to be as great as in other presidential years.

William C. Fink, Orchard St., who formerly confined his output to silver castor tops, badges and emblems, has taken up the manufacture of a newly patented safety razor, and he expects from now on to increase his force. He has been obliged to make improvements at his factory in order to meet the demand.

A surprise party was given to Charles C. Champenois, of Champenois & Co., by a number of his friends at Achtel Stetter's, last Friday night, it being his 57th birthday. Mr. Champenois is a manufacturing jeweler, of 50 Walnut St., and lives in South Orange. As a token of their esteem his friends gave him an imported clock with chimes. Dinner was then served.

**New Orleans, La.**

H. Ginder, of A. B. Griswold & Co., is in New York.

The John Holland Gold Pen Co. recently brought suit in this city against the Robbert Optical Co., on a disputed claim amounting to \$316.09.

Thieves recently broke the padlock on the showcase of the American Jewelry Store, at 1000 Canal St., and got away with three bronze clocks, 12 cheap watches, nine ladies' back combs and 10 razors. Jacob Dulberger, who runs the store, estimates the value of the stolen goods at \$73.

# New Art Monogram Book

It is the latest and most artistic attempt at Monogram and Letter Designing ever published in this country. Full of original and practical designs and a most pleasing arrangement of novelties that will make a study of its pages both pleasurable and instructive.

A supplement of an especially engraved plate with 28 monograms suitable for the jewelry trade accompanies each copy.

The size of the book is 9x12 and is placed on the market at a price within reach of all. No. F101, Price \$2.50.

### Chicago Notes.

M. A. Mead is back from a trip to New York.

G. S. Titus has returned from a north-western trip.

"Sig" Stern, of Stern Bros. & Co., was in this city last week.

Jacob Bunn, of the Illinois Watch Co., spent a day here last week.

E. Bengston, Freeport, Ill., accompanied by his wife, was here last week.

O. A. Starke, of the Star Watch Case Co., spent a few days here last week.

Chas. E. Howes, with E. L. Logee, is back from a trip to the Pacific Coast.

Harry H. Miller, with Hutchison & Huestis, is on a trip to the southwest.

George S. Weiss, with the Schwarzkopf Mfg. Co., has returned from a western trip.

I. L. Gross, with the Knickerbocker Silver Co., has returned from a southern trip.

Harry Harrison, of Harrison & Co., Sault Ste. Marie, Mich., was here last week.

J. B. Reuker, with the American Silver Co., is on a trip through Texas and Oklahoma.

H. E. Glendore, jewelry auctioneer, is making a sale for Henry G. Yahn, Joliet, Ill.

F. S. Newcomb, with the M. S. Fleischman Co., has returned from a three months' western trip.

Chas. Spencer, with Norris, Alister & Co., is taking a vacation at his native town of Oswego, N. Y.

David Wells, with the Waltham Watch Co., stopped over here, last week, on his way to Denver.

Robert Barlow, with the C. H. Knights & Thearle Co., is on a trip to Kansas, Missouri and Arkansas.

J. S. Pfeiffer, Parsons, Kans., who claims he has the finest jewelry store in that State, was a visitor in this city last week.

Wm. T. Irvine, La Crosse, Wis., was here, last week, buying new fixtures for his store, which he will completely refit.

C. C. Offerman, with Wm. Smith & Co., paid Chicago a visit last week. Mr. Offerman has not been here for some time.

The wife of R. Huber, a retail jeweler at 2030 W. 38th St., underwent an operation, last week, and is now convalescent.

Albert Feldenheimer, of A. & C. Feldenheimer, Portland, Ore., stopped over here, last week, on his way home from New York.

E. Staehli left for New York last Satur-

day, where he will sail on the *Kaiser Wilhelm II* for Europe. He will be gone about six weeks.

"Jim" Donnelly, with Sproehnle & Co., came in from the Pacific Coast, last week, entirely recovered from the accident he sustained several months ago.

The Ellis Time Stamp Co. has been incorporated here with a capital of \$2,500. The incorporators are Charles S. Ellis, A. H. Wesemann and F. J. Griffen.

The local nest of Ku Klux will meet at room 408, 42 E. Randolph St., Nov. 5, at 6 p. m. sharp. New members will be initiated and the ceremony will be interesting.

Charles T. Ross, with the Waterbury Clock Co., was married, Oct. 7, to Miss Matilda Lifton. Mr. and Mrs. Ross will be at home after Nov. 2 at 2579 W. Van Buren St.

S. H. Hess, of Rettig, Hess & Madsen, was married, Oct. 7, to Mrs. Rae Hoffman. Mr. and Mrs. Hess are on an eastern wedding trip, and will be at home, 4911 Prairie Ave., after Nov. 15.

Eugene D. Wooster died here, recently, aged 55 years, and was buried in his native town of Essex, Conn. He had been in poor health for the past six years. Prior to that time he had been with Norris, Alister & Co. for about 15 years. He was a bachelor.

George Schofield, formerly with Carlos Hayes, Norfolk, Nebr., has formed a partnership with a Mr. Wetzel, and was here, last week, buying the opening stock for the new jewelry store of Schofield & Wetzel, which will shortly be ready for business at Norfolk.

Edward E. Hardy, manager for D. C. Percival & Co., Boston, Mass., paid a visit to Chicago last week. Mr. Hardy is a member of the Ancient and Honorable Artillery Co., of Boston, and came west with that organization to participate in its annual field day meeting, which was held in Detroit.

Emil Schmidt is acquiring a reputation as a sprinter. Last Sunday morning he acted as pacemaker for his brother-in-law, William Diener, who bet that he could run a half mile in less than three minutes. The latter won by a large margin, and Mr. Schmidt was so excited that he forgot to spend the \$10 he won as a side wager.

Among the buyers in town, last week, were: Peter Ziegel, Nashville, Ill.; J. Frank Goudy, Fairbury, Ill.; Wm. H. Peterson, Camp Point, Ill.; J. B. Ferguson,

Princeville, Ill.; Jas. H. Ramsay, Aledo, Ill.; Frank Thayer, Rockford, Ill.; Harry Hanson, Princeton, Ill.; Younglove & Singer Peoria, Ill.; C. V. Conyers, Oneida, Ill.; A. Pappmeier, Beardstown, Ill.; H. L. Baker, Greenville, Mich.; Wm. B. Murray, East Tawas, Mich.; T. O. Christian, Owosso, Mich.; Aug. Krautheim, Muskegon, Mich.; Adolph Hahn, Durango, Colo.; L. Sachs, Milwaukee, Wis.; Frank Mayr and Calvin Clauer, South Bend, Ind.; D. E. Holland, Lapeer, Mich.; W. G. Riley, Gary, Ind.; A. A. Burbank, Rochelle, Ill.; Miss Spencer, Edgerton, Wis.; L. H. Holbrook, Kenosha, Wis.; J. E. Micks, Elkhart, Ind.; H. A. Roberts, Veidersburg, Ind.; J. Entencuer, Havana, Ill.; D. W. Boydston, Nevada, Ia.; G. R. Farley, Lake City, Ia.

### Milwaukee.

Frank L. Trayser, formerly associated with the Alsted-Kasten Co. as engraver, is now located with Henry Zwengl, manufacturing jeweler at 435 E. Water St.

The contract has been awarded for the installation of a Seth Thomas tower clock combined with the Hahl auxiliary office clock system in the new \$215,000 Brown county court house, to be erected at Green Bay, Wis.

Among the out-of-town jewelers in Milwaukee the past week were: E. B. Hobkirk, Brandon, Wis.; F. P. Beswick, Racine, Wis.; C. E. Slocum, Rosholt, Wis.; J. P. Schlaefer, Campbellsport, Wis.; R. Weitlich, Sturgeon Bay, Wis.; W. S. Sargent, New Lisbon, Wis.; W. J. Graff, Boscobel, Wis.

Miss Anna E. Durkee, secretary and general manager of the Alaska Garnet Mining & Manufacturing Co., said to be the first manufacturing company in the world to be organized, incorporated, officered and managed exclusively by women, recently visited various Wisconsin points in the business interests of her company. The company owns an Almandine Garnet mine on the Stikine river, near Fort Wrangell, Alaska.

The will of Adolph Hauser, the late Milwaukee jeweler, disposes of an estate valued at \$15,000. The will provides that the daughter, Irma, shall be given \$4,500 with the proviso that she hold \$1,000 in trust for an aunt, Minna Berger, in Vienna. At the death of the aunt, the daughter will secure this amount also. The will states that according to agreement, the son, Paul

Hauser, will conduct the business at 237 3d St. and take one-half of the profits. The present business and stock on hand is bequeathed to the four children, each to share equally.

The Milwaukee Jewelers' Club will hold its regular monthly dinner at the Blatz Hotel, in this city, this evening, Oct. 14.

The organization of the Jewelers' Mutual Fire Insurance Co., of Wisconsin, has at last been perfected, as announced in last week's issue of the CIRCULAR-WEEKLY, and officers of the company have been elected as follows: President, Gustave Keller, Appleton; vice-president, W. H. Upmeyer, Milwaukee; treasurer, W. A. Pfister Sheboygan; secretary, Franklin Thomson, Milwaukee. To serve with the officers as members of the board of directors, the following were elected: George Durner, A. J. Stoessel and Edward J. Rohn, Milwaukee, and C. T. De LaPorte, Berlin. Applications for insurance amounting to the required \$100,000 before the State charter can be secured have been received and indications are that applications aggregating at least \$200,000 will be placed.

### St. Louis.

Augustus Maschmeyer, of the Maschmeyer-Richards Silver Co., has just returned from an eastern visit.

Samuel Kober, secretary of the E. Maritz Jewelry Mfg. Co., has gone south to New Orleans and surrounding territory for a week.

Morris Eisenstadt, of the Eisenstadt Mfg. Co., has gone to the east for a three weeks' trip. He will visit Baltimore, Boston, New York, Attleboro, Philadelphia, Newark and Pittsburg.

H. G. Pfordresher, a representative of George L. Brown & Co., Attleboro, Mass., was a guest at the Kommers celebration of German day in St. Louis, Monday night of last week.

S. Van Raalte & Co., 213 N. 7th St., have announced the sale of the \$40,000 stock of a jewelry company, formerly of the Commercial building. Notice of the purchase of this stock from the assignee of the company, six weeks ago, was published in THE CIRCULAR-WEEKLY at the time.

Frank Simmons, Quincy, Ill., has bought the store of F. W. Kuhn, 8106 N. Broadway. Mr. Simmons is a young man who just graduated from a watchmaking school in his home town. He will move to St. Louis to conduct the store he has bought.

H. B. Pelz, of the Matthewson-Pelz Jewelry Co., Marshall, Tex., was a visitor here, last week. Among the other out-of-town jewelers were: E. H. Wardell, Nowata, Okla.; J. C. Faulkner, Russellville, Ark.; George A. Young, Moberly, Mo.; C. F. Lehnhoff, Belle, Mo.; J. A. Baumberg, Marion, Ill.; W. F. Smith, Cairo, Ill.; A. Koetting, Malden, Mo.; F. B. Wolff, Chester, Ill.; F. L. Thost, Omer, Mo.; W. A. Richardson, Cuba, Mo.; S. O. Harvell, Litchfield, Ill.; N. S. Cloud, Waverly, Ill.; Harry Mill, Springfield, Mo.; T. Ben Turnbaugh, Bloomfield, Mo.; G. T. Longnecker, Winchester, Ill.; N. S. Weiler, Cape Girardeau, Mo.; J. E. Kory, Bluffs, Ill.; J. J. Gaffner, St. Jacobs, Ill.; W. A. Milligan, Coulterville, Ill.; C. W. Scanlin, Indianapolis; H. W. Foerste, Okawville, Ill.;

William Westphal, St. Charles, Mo., and Alfred Bourgeois, Jackson, Miss.

### Kansas City.

#### TRADE CONDITIONS.

The week of the Fall festivities has proven very satisfactory to manufacturers and jobbers. They looked for a large number of retail dealers from Kansas City territory and they were not disappointed. Those who came bought liberally, and their buying was largely of the better class of goods. The number of visitors was not so large as in former years, and they were not so liberal in patronizing the retail trade. On the whole, however, business is very good and the closing months of the year give promise of a much better trade than the closing months of 1907.

Miss Anna Downer has entered the employ of the Hassig Jewelry Co., in the polishing department.

I. Brummer has entered the employ of the Green Jewelry Co. as an assistant in the engraving department.

A. C. Hailey, Cassville, Mo., has sent out a very attractive card engraved in silver, announcing the 30th anniversary of his marriage.

Cards announcing the death recently of Helen May Stevenson, daughter of Roy E. Stevenson, a jeweler of Julesburg, Colo., have been received here.

The following students have been enrolled at the Kansas City Polytechnic Institute: L. Hall, E. P. Thomas and A. D. Burton, Kansas City; A. M. Wurtz, Clyde, Kan.

William H. Taft, the Republican candidate for President, was the guest of C. B. Norton, of the C. B. Norton Jewelry Co., last Sunday, during an automobile ride through the city.

Il. J. Cruse, a former student of the Kansas City Polytechnic, has embarked in the jewelry business in Bridgeport, Okla., and Clarence Owen, another former student, has taken a position with Bundy & Upmeyer Co., Milwaukee, Wis.

Announcements have been received here of the marriage, Oct. 6, in Colorado Springs, Colo., of James Clifford Cottrell to Miss Sarah Berlen, daughter of Mrs. Sarah C. Welsh. Mr. Cottrell, who is now in business in Colorado Springs, was formerly in the employ of the Meyer Jewelry Co., in this city.

The following out-of-town jewelers were in this city, last week: F. J. Burgy, Brunswick, Mo.; Arthur West, Galena, Kan.; J. T. Doyle, Shelbyville, Mo.; D. D. Johnson, Sedgwick, Kan.; J. H. Briggs, Lexington, Mo.; J. H. Leighty, Spring Hill, Kan.; C. B. and R. C. Libby, Weir City, Kan.; B. G. Gustafson, Lawrence, Kan.; Ora Stutzman, Garden City, Mo.; J. O. Stott, Paola, Kan.; H. M. Patterson, Meadville, Mo.; A. L. Cline, Edgerton, Kan.; J. M. Harrison, Concordia, Kan.; Mrs. C. W. Bowen, Brunswick, Mo.; M. V. Steele, Gentry, Ark.; S. C. Hall, Tulsa, Okla.; Mrs. J. W. Schmandt, Holden, Mo.; J. W. Phillips, Chanute, Kan.; G. W. Ellis, Butler, Mo.; F. E. Pirtle, Council Grove, Kan.; W. H. Pontius, of F. E. Pirtle & Co., Anthony, Kan.; Guy Wilhite, Canadian, Okla.; C. D. Hunt, Garnett, Kan.; A. Buchmann, Clay Center, Kan.; Ed. Church, Claremore, Okla.; J. Crowell, with J. B. McDearmon, Cedarville, Mo.; E. J. Barrett, Ponca, Okla.; Mr. Miller, of Miller & Cash, Sapulpa, Okla.; C. A. Whited, Kelley Bros., Greensburg, Kan.;

A. B. Macdonald, Chillicothe, Mo.; W. G. Glick, Junction City, Kan.; Mrs. W. J. Holt, Stillwater, Okla.; Wolf Bros., Greensburg, Kan.; C. P. Roberts, McCune, Kan.; W. F. Kirkpatrick, St. Joseph, Mo.; Roy E. Bertholf, Cherokee, Kan.; J. Ritter, Leavenworth, Kan.

### Minneapolis and St. Paul.

W. H. Chamberlain has moved his store from 10 N. 5th St., Minneapolis, to 11 N. 5th St., directly opposite.

P. M. Alstad, with White & MacNaught, Minneapolis, spent a week in Biwabik, Minn., on a vacation, last week.

Alfred Anderson has returned to Minneapolis, after a trip among the different camps of Montana and eastern Washington.

E. E. Spalding, with the Bassett Jewelry Co., with headquarters in Minneapolis, has returned from an extended trip along the Pacific Coast.

Axel E. Madson, of Rettig, Hess & Madson, Chicago, has returned to his Minneapolis office after a trip through North Dakota and northern Minnesota.

Recent out-of-town jewelers in the Twin Cities included: Mrs. T. Lewis, Moorhead, Minn.; Mrs. E. A. McAyeal, Morris, Minn.; E. C. Gross, Litchfield, Minn.; M. E. Hamilton, Osakis, Minn., and John Morton, Northfield, Minn.

R. A. Spencer, a traveling representative, had his sample case, containing a large quantity of fraternity and other pins, taken from the desk of a hotel in Minneapolis by mistake, one day last week. He had set it down for a moment, and upon returning it was gone. The police were notified, but were unable to discover any clue. Another traveler showed up the following day, seeking a grip that he had missed, and, receiving it, gave back Spencer's, which he had taken in error.

The Association of Wholesale Jewelry Jobbers of Minnesota has been formed by the wholesalers of Minneapolis and St. Paul, nine of the 11 firms eligible having joined in the charter membership list. The objects of the association are many, and include the promotion of trade, the reformation of trade abuses, the elimination of irregular practices, and generally to advance the wholesale and jobbing business to a higher, better and more satisfactory plane. The organization has, among other objects, the social feature, wherein it is believed that the mingling together of competitors upon an equal basis will lead to better and more intimate acquaintance. It is believed that the absurd lengths of credits may also be regulated in a way that is more in keeping with the general conditions which are being adopted by all lines of merchants.

John B. Ash, Rockford, Ill., well known to the jewelry trade as the "Ebony King," and Miss Julia B. Lange, daughter of Mr. and Mrs. John F. Lange, were married, Monday, Oct. 5, at the home of the bride, 415 Forest Ave., Rockford, the ceremony being performed by the Rev. H. M. Vannen, and only intimate friends and relatives of the bride and groom being present. Mr. and Mrs. Ash left for Chicago on their honeymoon, but will be at home to their friends after Nov. 1, at 1022 Spafford Ave. friends after Nov. 1, at 1022 Spafford Ave., Rockford.

# THE Ægis Case

(PATENTED)

THE ÆGIS is a new creation in gold case making. The center and bezel are in one. Instead of having the ordinary Cap, this case is provided with a rigid metal movement Cup, held friction tight in position. This Cup gives protection to the movement such as cannot be secured with the conventional jointed cap, while dust is thoroughly excluded from the front by means of the one-piece center and bezel.

## Indianapolis.

J. H. Reed and daughter Helen spent last week in Brown County, where Mr. Reed is building a Summer home.

Kermel & Zink, who conduct a manufacturing business in the Waverly building, have installed an electric motor to run all of their machinery.

William J. Hoffman, of Hoffman & Lauer, dealers in jewelers' supplies, has been confined to his home several days by illness. He expects to return to his office this week.

Among jewelers in the city, last week, was Philip H. Molter, vice-president of the Chicago Art Metal Works, Chicago, who spent a few days calling on the local jewelry trade.

George G. Dyer, of the Arts and Crafts Shop, arrived home, last Wednesday, after a two weeks' western trip. He visited Denver and also spent a few days with a brother at Beloit, Kans.

During the last week Chris. Bernloehr & Bro. received an attractive shipment of jewelry that Chris. Bernloehr purchased while in Germany during a tour of Europe. The display attracted much attention.

The class in hand-wrought jewelry of the Arts and Crafts Shop opened for the Fall term, last Tuesday, with about 50 students, many of whom took part of the course last year. The present term expires Dec. 6.

An attractive home on N. Arsenal Ave. has been completed by Perry M. Slauter, a watchmaker employed by Chris. Bernloehr & Bro. The house is constructed from an original plan embodying Mr. Slauter's ideas.

Harry C. Sebel, who was formerly with the Baldwin-Miller Co., leaving some months ago, to accept another position, has returned to the company. He will represent the company in the city and surrounding towns reached by electric interurban lines.

Ikko Matsumoto, a local Japanese jeweler, last week began the work of remodeling his house at Schurmann Ave. and Fall Creek, and when the alterations are completed it will be one of the most attractive residences in that neighborhood.

Among Indiana retail jewelers in the city, last week, buying stock were the following: C. K. McKay, Kokomo; F. C. Sheldon, Shelbyville; C. A. Bassett, Anderson, Mr. Raber, of Clark & Raber, Anderson; F. L. McKee, Cloverdale; J. W. Thompson, Danville; J. C. Wilson, Mooresville; J. W. Hudson, Fortville, and J. A. Miessen, Cicero.

County Treasurer E. F. Robison has issued a list showing those who pay taxes on more than \$10,000 worth of property in Indiana. The following identified with the jewelry trade are represented: Chris. Bernloehr, \$16,290; Fredrick M. Herron, \$17,640; Emil Mantel, \$14,000; Ferdinand and Charles Mayer, of Chas. Mayer & Co., \$332,740; Charles Mayer (individual), \$12,900; Ferdinand L. Mayer (individual), \$21,830; Fletcher M. Noe, \$13,160; Jacob C. Sipe, \$28,130; Charles Snavely, \$12,260, and the Baldwin-Miller Co., \$28,300.

A most interesting meeting of the Indianapolis Retail Jewelers' Association was

held Monday night, of last week, in the jewelry store of J. H. Reed, on W. Washington St. At the conclusion of the meeting an elaborate lunch was served. One of the special features of the meeting was a lecture on the salesmanship of watches by Charles M. Slemmons, of the Illinois Watch Co., Springfield, Ill., who is conducting a special demonstration in the city. The association also discussed the advertisement of the Union Watch Co., New York, one of whose watches was described in the issue of THE CIRCULAR-WEEKLY of Sept. 30. A committee was appointed to visit the local newspapers and request that the advertisement be excluded. This committee consists of Albert Gray, J. H. Reed and H. H. Bishop, and will report at the next meeting. The annual election of officers will be held at the meeting on the first Monday night in November, while it is likely the present officers will again be selected. President J. P. Mullally has told the members that he is willing the presidential honors should be passed on to some one else.

## Cincinnati.

F. Wiedemann & Son, 1602 Freeman Ave., are closing out their business at auction.

H. J. Huber, Perin building, has put in a new line of all kinds of jobbing stones for the trade.

G. V. Dickinson, of the Elgin National Watch Co., visited the trade in this city, last week.

Joseph Mehmert, Jr., Freeman Ave., has been kept away from business the past three weeks by illness.

Dan. I. Murray is in town conducting the auction sale of the Oskamp Jewelry Co., which opened this last week.

J. B. Kennedy, of the Dennison Mfg. Co., is enjoying a two weeks' vacation at his old home in New Philadelphia, O.

John Haslam, of the Clemens-Osamp Co., was very happy over the arrival of a new baby boy at his home, last week.

J. K. Bingaman, of Bingaman & Co., has returned from northern resorts, where he sojourned for a couple of weeks.

S. C. Bingaman, Vine St., and bride have returned from their honeymoon at the "Lakes" and other northern resorts.

D. D. Elliott, formerly with W. H. Te-well, of Madison, Ind., stated to friends here that he is about to start a business in Hope, Ind.

Henry Mehmert, Olney, Ill., was here, last week, buying the opening stock for a handsome new store he has just fitted up in that place.

The sympathy of his friends in the trade has been extended to E. G. Lohmeyer, Newport, Ky., owing to the death of his 16-year-old daughter.

Herman E. Promnitz was down from Van Wert, O., and says he is making a good start in the new business he has lately opened in that place.

Joseph Phillips, of the Sterling Glass Co., is about to erect a handsome brick building on Alaska Ave., Avondale, which he and his family will occupy.

The members of the firm of Randolph & Muttendorf, Williamson, W. Va., were here

last week arranging for stock for their new branch store at Bluefield, W. Va.

M. O. Archer, Ravenswood, W. Va., reports that he was robbed one night last week of \$50 worth of gold-filled watches. There is no clew to the thieves as yet.

G. P. Willams has sold out his jewelry business at Olive Branch, O., and has opened a store in St. Henrys, O., for which he was here buying stock, last week.

William Michie, of Michie Bros., and C. E. Richter, of Richter & Phillips, are assisting on various committees in the Masonic celebration here, this week and next.

The United Cigar Stores Co. has leased the quarters at the southwest corner of 5th and Vine Sts., now occupied by the Oskamp Jewelry Co., for a term of 10 years at \$20,000 a year.

Lee Kahn, of Lindenberg & Fox, who sustained a serious injury to his knee some weeks ago, is reported as slowly improving. It is hoped he will be able to resume business about Jan. 1.

A. S. Carrel, of the Cousin-Carrel Jewelry Co., Bessemer, Ala., last week, bought stock here for a new store which he has just opened on the site of his old place, which was destroyed by fire five weeks ago.

The Gustave Fox Co. has secured control of a patented silver elk tooth match safe and whiskey flask, and are placing a large line on the market. This firm has contracted to furnish 10,000 badges for the engineers' conclave of California, to be held in Los Angeles, Cal., the last of October.

Out-of-town jewelers here the past week purchasing goods included: Otto Zoellner, Portsmouth, O.; F. C. Theinemann, Franklin, O.; Andrew Aman, Dayton, O.; Felix Davis, Corbin, Ky.; C. J. Klar, Dennison, O.; William Helman, Terre Haute, Ind.; R. T. Welling, Paris, Ky.; Sam M. Whitehead, Middlesboro, Ky.; C. M. Ivy, Sumner, Ill., and C. Fenzel, Mid-dletown, O.

William Preuer, 5 W. 7th St., thinks he has located Harry Morgan, for whose arrest he swore out a warrant in the police court last week. Morgan, it is alleged, called at Mr. Preuer's store to look at diamond rings. He selected two valued at \$113, saying he wished to present one to his niece. After she made her selection he would return the other and pay for the one he kept. Mr. Preuer, being acquainted with the man, gave him this privilege, but has since failed to see Morgan or get his goods back.

George H. Newstedt, a prominent jeweler and mason, has decorated one of his windows quite extensively in honor of the Masonic celebration, which is taking place in our city this week. A Maltese cross in black, white and red, measuring about five by five feet and beautifully illuminated with red and white electric lights, is the main feature in the display. Ferns, flowers and a special exhibit of Masonic emblem goods artistically arranged on the floor of the windows underneath the cross, which is suspended from above, add to the attractiveness of the decorations.

J. W. Morley, Clarion, Ia., has purchased the interests of his partner, W. F. Pitts. Mr. Pitts has returned to his home in Manchester.

## Los Angeles.

B. Hartfield, Anaheim, was one of the few out-of-town jewelers here, last week.

Mr. Hawkins, Detroit, has been added to the watchmaking force of J. Wiesenberger.

S. Simmons, 315 S. Spring St., now has his new gem-cutting machinery installed and in operation.

D. A. Brown, an engraver with Bailey, Banks & Biddle, Philadelphia, Pa., is here on a vacation trip.

R. H. Schwarzkopf started, Wednesday, for a trip as far north as Seattle, expecting to be gone about 30 days.

Mrs. Worthington, formerly with Percy H. Greer, on W. 2d St., has been engaged by J. Wiesenberger as saleswoman.

E. A. Ralph, a stone-setter, who has been with the Carl Entenmann Jewelry Co. for several years, has gone to Denver to reside.

Almon G. Stone, who was ill for a number of days from ptomaine poisoning, has so far recovered as to be able to attend to business at his store again.

Ed. Turner, traveling representative for the E. W. Reynolds Co., returned home, a few days ago, and then started on an extended trip, expecting to be gone until the holidays.

Garretson & Hubbell, formerly in the retail business at 451 S. Main St., have gone into the manufacturing business in the location formerly occupied by James & Co., 342 S. Broadway.

Edward Peterson, 819 W. 3d St., has been putting in a new dark-room and increasing his facilities for optical work. He is also increasing his stock of jewelry and expresses himself as well satisfied with his new location.

Montgomery Bros. have just moved their manufacturing shop to the seventh floor of the new building now occupied by them at the corner of 4th and Broadway. The new rooms are light and form an exceptionally good location for shop work.

Mrs. A. E. Baranger, wife of the San Jacinto jeweler, who was formerly with the E. W. Reynolds Co., underwent a serious surgical operation at Pasadena a few days ago. The operation was successful and she is reported to be convalescent.

A movement for the establishment of a Kuku nest here has been started by C. E. Diebenkorn, a salesman with the E. W. Reynolds Co. Mr. Diebenkorn, who was formerly with Lindenberg & Fox, Cincinnati, was a member of the order in that city.

Shuttleworth & Samuels is the name of a new firm taking possession of the store at 451 S. Main St. Mr. Shuttleworth was formerly a jobber in the Bumiller Block on S. Broadway. Mr. Samuels has been a watchmaker with Taylor Bros., 217 W. 5th St.

Rubin & Clark are a new firm who are opening a retail store at 331 S. Spring St. Mr. Rubin has been in business on his own account at 528 S. Spring St. Chas. Clark, the other member of the firm, until recently, was with the Diamond Palace, on S. Broadway.

Miss Celia I. Dent, who has been for some months a saleswoman with the firm of J. C. Fleming Co., was married, Sept. 28,

to William Jerrue, a well-known Los Angeles business man. At the urgent request of the firm she has consented to remain in the store until the close of the holiday trade.

The Donovan & Seamans Co. is now fully established in its new store at 253 S. Spring St. The concern added to the sales force George A. Battell, a well-known and experienced salesman of this city, and Robert V. Phillips, formerly with the Cady & Olmstead Jewelry Co., Kansas City, Mo. H. C. Lybye, formerly with Montgomery Bros., has been engaged as an additional watchmaker.

About 5 o'clock on Sunday morning the watchman in the German building found water leaking from above into a room on the second floor. Thinking that it came from S. Meyer & Co.'s store, he hastily called Mr. Meyer by telephone, informing him that unless he came immediately to his store, he (the watchman) would break the large glass in the transom and enter the room. Mr. Meyer forbade him to enter, but before Mr. Meyer could reach the store the watchman had attempted to enter. Immediately upon his breaking the glass the burglar alarm went off, and as he was attempting to enter the window an officer arrived and seized him by the leg and put him under arrest. Mr. Meyer was very indignant. He had assured the watchman that the water could not come from his room, and when the officers entered it was discovered that no water was leaking from the room.

## Omaha.

S. W. Lindsay and wife are spending a week in Chicago.

Albert Edholm has returned from a fishing trip to Lake Madison, Minn.

Mrs. George W. Ryan has returned from a Summer spent in Boston and eastern points.

H. S. Knapp, with the Shook Mfg. Co., left on a business trip through the west, last week.

Oscar Homan, secretary for the C. B. Brown Co., left, last week, on a trip to Dallas, S. Dak.

Albert Gustafson, son of S. B. Gustafson, has returned from a visit with friends at Wahoo, Nebr.

Fred Brodegaard & Co. have just installed new electrical appliances in their N. 16th St. store.

The diamond brooch which was presented to the queen at the coronation ball, last week, was supplied by the C. B. Brown Co.

Albert Edholm supplied the 23 past master Masonic jewels which were made expressly for Court Lodge No. 11, A. F. & A. M., last week.

Robert M. Ingalls, Waukegan, Ill., spent a few days in this city, last week, visiting friends, while en route to Ainsworth, Nebr., to visit his father.

C. S. Melick, Orleans, Nebr.; L. J. C. Reichard, Stuart, Nebr.; E. A. Waterman, Gordon, Nebr.; F. E. Holsten, Alliance, Nebr.; L. S. Robinson, Glenwood, Ia., and L. B. Hoyer, Woodbine, Ia., were in the city during the past week, purchasing stock.

Word was received in this city, last week, that Anton Zimmerer, a prominent young

jeweler of Nebraska City, was found dead in bed on the morning of Oct. 6 at the home of his parents. He was apparently in good spirits the day before, having been to business as usual. Mr. Zimmerer was born in Nebraska City.

Fred Brodegaard & Co. organized a new company, last week, for the purpose of manufacturing a fine non-nicotine pipe for the trade. The capital stock is \$20,000. The factory is located in Omaha, and is known as the Crown Pipe Mfg. Co. Mr. Brodegaard is treasurer and general manager of the concern.

## Cleveland.

C. F. Brinck, of the Crescent Watch Case Co., was in the city during the past week.

R. G. Munroe spent last Wednesday and Thursday in Cleveland.

Messrs. Gattle and Hammel, of Gattle, Ettinger & Hammel, New York, were in Cleveland several days recently.

A system of clocks consisting of master-clock, programme-clock and 60 secondaries has just been placed in the new Technical High School, recently completed. The equipment was furnished by the Prentiss Clock Improvement Co., New York City, and the installation superintended by the Webb C. Ball Watch Co.

The next meeting of the local association of retail jewelers will be held at Pythian Temple on Monday evening, Oct. 19, at 8:15 p. m. The attendance at these meetings has been constantly improving, and all Cleveland jewelers are invited to be present. Information may be secured from President C. C. Lewis, of the Lewis Jewelry Co., or from Jos. A. Welf, of the J. Welf Sons Co.

While standing in front of Cowell & Hubbard's last Friday, an express wagon belonging to the Adams Co. was robbed of several valuable packages belonging to local jewelers. The Scribner & Loehr Co. lost two small packages, the Sigler Bros. Co. a parcel of diamonds, reported worth several hundred dollars, and Bamberger & Gaines, a valuable bracelet belonging to a customer. The robbery took place while one of the two men with the wagon was in Cowell & Hubbard's securing the afternoon shipments.

A man giving the name of George J. Huston, and saying that he was stopping at a downtown hotel, walked into the jewelry manufacturing establishment of Rudolph Deutsch, in the Clarence building, 612 Euclid Ave., Oct. 16. He ordered jewelry to the amount of \$1,550, and told the proprietor that he was about to open a jewelry store. After he had left it was discovered that three small diamonds and several articles, valued altogether at \$51, were missing. The police are searching for him. At the hotel it was said last night that no such man was on the register.

Improvements have just been completed in the interior of the store of Moses W. Clements, Madison, Ga.

Thomas D. Gard & Co., Worcester, Mass., have just installed new machinery for the manufacture and repairing of jewelry and made other extensive improvements in the interior of their establishment.

## San Francisco.

W. C. Schimmel, Sanger, Cal., will locate in San Francisco within a short time. His wife is ill here at the home of her parents, and his desire to be with her is responsible for his decision to close the store in the valley.

Radke & Co. are making no efforts to get a downtown location, for the reason that they own the building occupied by them at Bush St. and Van Ness Ave., and it is to their interest to remain there as long as trade will warrant it.

A number of out-of-town jewelers have been noted in the city during the past week making their Fall and Winter selections. Among these were: L. C. Koberg, Healdsburg; Charles A. Bothwell, San Jose; Ed Haas, Haywards, and Mr. Geitkemfer, Jr., Klamath Falls, Ore.

The W. K. Vanderslice Co. expects to be able to announce the selection of a permanent downtown store, within a short time, but even if it is secured at once no removal will take place until next Spring, as preparations have been made to remain at the present location for the holiday trade.

Roy P. Matthews, of the Roy P. Matthews Co., has just returned from a trip to the southern part of the State. He found conditions rather quiet there, but dealers are optimistic and are commencing to make extensive purchases. George McCarthy has taken a position with this firm, and has recovered from the illness, which has kept him away from his duties for some time.

A fire of considerable magnitude broke out at O'Farrell and Fillmore Sts. on the evening of Oct. 3, and did much damage in the temporary retail district. The store of Lee Heringhy was just on the edge of the burned area, and but a small loss was suffered, mostly from water and smoke. W. J. Hesthal, located at 1436 Fillmore St., also suffered a small loss, which is fully covered by insurance.

The Emporium, the largest general store in this city, removed from its temporary location on Van Ness Ave., at Post St., to its old site on Market St., last week. The jewelry department of this store is a large one. The significance of the move to the downtown district does not mean much just from the fact that a big jewelry department is now located there, but the drawing of vast crowds to this section of the city means much to retail jewelers who have located in the vicinity. While a large part of the holiday trade will be done in the temporary retail districts this year, the downtown section will receive more attention than was thought possible, a few months ago.

## Pacific Northwest.

Archie Cooper has purchased the stock of Louis Hunziker, at Pendleton, Ore., and, in partnership with Samuel Kinkons, will engage in business at Pilot Rock.

A large plate glass window in the front of John Gemberling's store, Burns, Ore., was broken one night recently by some miscreant who hurled a rock through it. As all the jewelry had been placed in the safe, it is not thought that burglary was the motive for the deed.

E. H. Banker, vice-president of the Ham-

ilton Silver Co., with general offices in Chicago and factories at Muncie, Ind., and Cincinnati, O., is now in Spokane, Wash., and states that he is considering the advisability of establishing a branch factory at that place in the near future.

## Pacific Coast Notes.

F. E. Poujade, Alturas, Cal., has moved his store and repair shop to a more central location.

The engagement is announced of Miss Clarice Strongren and Bernard Meves, a jeweler of Oakland, Cal.

H. L. Amstutz & Sons have completely refurbished their store at Napa, Cal., and are now prepared for the holiday trade.

J. R. Kennedy's store, San Bernardino, Cal., is being moved two doors west, into the St. Charles block, where more space will be available.

A dispatch from Fullerton, Orange County, Cal., says: "A large number of small and almost perfect garnets has been found at the bottom of oil well No. 29, on the Santa Fe lease at Olinda. The well is down 3,675 feet."

C. St. Louis, Yreka, Cal., has sold his business at that place to S. A. St. Cyr, and the new owner is now in possession. The new proprietor is a successful business man from Minnesota, and is an experienced workman. He is placing new fixtures in the store and has ordered a large stock of goods.

The main offices of the Jupiter Consolidated Jewel Co. have been established at 1930 Tulare St., Fresno, Cal. This concern has recently secured a lease, with the privilege of buying, upon the Venus Hill and the Baby Venus chrysoprase mines, of Tulare County. This gives the company possession of 14 of such mines between Mariposa and Tulare counties.

For the past three months, S. Samuels, 461 12th St., Oakland, Cal., has noticed refuse in his show window in the front of the store, and when the window cleaner came around, recently, he told the man to examine the box containing the electric switches above the window. When the man looked into the box he saw comfortably curled up in the box a live gopher snake. It was pulled out by Mr. Samuels, and when killed, measured five feet 10½ inches. How it came in this unusual place is a mystery.

## Utica.

B. T. Jones, 41 Main St., Cortland, has installed new show cases and other elaborate fixtures in his store. New chandeliers have also been added to the store, which is now an unusually attractive one.

Irving H. McConkey, retail jeweler in N. Market St., Johnstown, will close out his business. He has been engaged there for about 12 years. Mr. McConkey will have an auction sale and then engage in other lines.

The Utica Retail Jewelers' Association has held its annual meeting. Charles T. Evans has been elected president; James R. Burtiss, vice-president; William A. O'Donnell, secretary, and Pierre F. Darri-grand, treasurer. S. Charles Greene was elected member of the executive committee. The association is in excellent condition.

## Columbus, O.

The McDonnell Optical Co., of this city, was recently incorporated with a capital of \$10,000. The incorporators are: Frank M. Peale, A. B. McDonnell, C. N. McDonnell, M. B. Peale and J. O'Shaughnessy, Jr.

Sam Hutchison was arrested recently in this city on a charge of stealing a diamond bracelet from the Baneroft Bros. Co., 108 N. High St., and was later released on \$500 bond signed by his brother. Last week the bond was forfeited by the court, it being charged that the accused has escaped to a place unknown.

In involuntary bankruptcy proceedings begun in the United States Court in this city, recently, C. J. Pretzman was appointed receiver for H. I. Scribner, formerly a jeweler at 145 N. High St., for whom a receiver was appointed in the Common Pleas Court last August. The last receivership was in proceedings instituted by Heintz Bros., W. C. Solomon & Co. and Zack. A. Oppenheimer, who claim that the action was necessary to protect the interest of themselves and other creditors.

A large number of merchants of this city have been sufferers by the work of a vandal who either acting on an insane impulse or from pure maliciousness has been cutting initials upon and otherwise destroying the plate glass windows. Altogether, about 31 windows have been cut and the total damage so far is estimated at about \$2,500. The Frank F. Bonnet Co., 77 N. High St., was among the sufferers, the two front panes of the concern's store being damaged to the amount of \$50 each. A reward of \$150 has been offered by the merchants for the arrest of the miscreant.

## Rochester.

Will Levinson and H. Luxenberg, with Morris Rosenbloom, left, last week, on a trip through Pennsylvania and the near south. Nat Brenner has returned from a trip through Kentucky, Virginia and the south.

The regular monthly meeting of the Rochester Retail Jewelers' Association was held, Thursday evening, Oct. 8. After the regular routine business was disposed of, the members present had lunch at the Masonic Club, and then visited the Genesee Amusement Hall, where the rest of the evening was devoted to bowling.

A County Court jury, a few days, granted a verdict for \$150 to John Darcy in his suit for malicious prosecution against M. I. Danks, an instalment jeweler. Darcy, who is a waiter in the Whist Club, bought an engagement ring for his fiancée of Danks. Last Spring Danks had a body execution issued for Darcy on the ground that he had converted to his own use the personal property sold under contract and not fully paid for. Seven summonses were issued for Darcy. When he appeared in court with counsel, Danks, it is said, did not appear, but continued securing the service of summonses upon him. When Darcy was finally examined the complaint was dismissed. Danks declared that his action in the case was dictated by counsel, and was for the purpose of securing possession of the property without delay.

## Pittsburg.

Kaufmann Bros., last week, donated three silver cups, played for by local baseball fans.

M. H. Switzer, who has opened a new store at Mars, Pa., was in Pittsburg, last week, buying stock.

The sesquicentennial appears to have attracted a number of swindlers to Pittsburg. A chap endeavored to cheat the house of Goddard, Hill & Co. in a printed letterhead scheme, but failed.

J. Wendel Lowenberg, formerly of Chicago, is going on the road for S. Davis & Co. The Davis concern intends to enlarge the territory covered by its traveling salesmen, and will now have a man in Ohio, Indiana, Illinois, Michigan and Wisconsin.

In giving the names of a number of jewelry houses which were handsomely decorated during the sesquicentennial week, the houses of Goddard, Hill & Co. and the J. M. Smit Co. were omitted. This was a mistake, as they were among the best decorated establishments in the city.

The Marsh, Brown & Mather Co. entertained about 100 friends at the store during the sesquicentennial parade, the store being on the line of march. The firm built a temporary grand stand along the row of windows in 6th St., and from there the entire party secured an excellent view of the procession.

An involuntary petition in bankruptcy was filed last week in the United States District Court against the William E. Stieren Co., 607 Smithfield St., on claims aggregating \$2,188. The petitioners and the amounts claimed to be owing are Wagner Bros. & Co., \$679; Eugene Dietzgen Co., \$704; Ruhl & Co., \$422, and the Lutz Co., \$383. A. E. Ellis is acting for the creditors.

Among the out-of-town jewelers who were in Pittsburg, last week, were the following: Asa Joseph, Donora; L. L. Peddington, Marietta; B. E. Brown, Monessen; H. R. Brown, Donora; R. Eberling, East Liverpool; D. W. Hull, Warren; J. Linnenbrink, Rochester; Mr. Muller, Myersdale; Frank Blosser, New Kensington; Carl Schmid, New Castle; J. C. Dufford, Clintonville; Charles Loughman, Braddock; A. B. Kurtz, Connellsville.

A clock now on exhibition at the Carnegie Institute is attracting a great deal of attention. The timepiece was made by William Jourdain, in London, Eng., between the year 1640 and 1690. It was purchased by Casper Otto Mueller and brought to Baltimore in the year 1808, from whence it was taken to Ziekenople in 1814. From there it was transferred to Sewickley, Pa., in the early '70's, when it came into the possession of G. F. Mueller, by whom it was sold to Joseph G. Taylor, who recently placed it in the institute. The clock is about 240 years old.

The Jewelers' Duck Pin League has reorganized for the season of 1908 and 1909. The following officers were elected: President, J. C. Crawford, with W. W. Wattles & Sons; treasurer, B. S. Kunselman, with J. R. Reed & Co., financial secretary; W. W. Steadford, with E. P. Roberts & Sons; recording secretary, L. C. Letzkus, with L.

W. Vilsack & Co. The members meet every Monday at the Davis alleys, at 8 P. M. The teams representing the League are August Loch, Henry Terheyden, J. R. Reed & Co., E. P. Roberts & Sons, W. W. Wattles & Sons and L. W. Vilsack & Co.

## Philadelphia.

W. A. Bush, a retired retailer of Easton, Pa., spent the entire week in this city with his family and renewed acquaintance with the trade.

Calvin Solliday, a prominent retailer of Lambertville, N. J., is at a seashore resort seeking to regain health. Mr. Solliday has been critically ill for some time.

Paul Dilger, watchmaker for the trade, N. W. Cor, 8th and Chestnut Sts., was kept away from business last week by the serious injury of his wife from a fall.

O. O. Stillman and Mrs. Stillman, New Brunswick, N. J., while in this city last week to view the parades, were the guests for a few days of Ed. Sickles, of the firm of M. Sickles & Sons.

Harburger's, instalment retail jewelers, 808 Chestnut St., started last week a big advertising campaign for the Christmas trade, offering memberships in clubs being formed up until Nov. 1.

Thomas Lyons, watchmaker for Milton Reed, Doylestown, Pa., is receiving the felicitations of his friends in the trade upon the fact that he has recently been presented by Mrs. Reed, with a bouncing baby daughter.

Jewelers taking part in religious exercises opening Founders' Week, included: Philip Freidel, 727 Sansom St.; B. E. Loefer, 114 S. 11th St.; Peter Costello, 7th and Sansom Sts.; Harry D. Finney, with Kennedy & Bro., 13th and Arch Sts., and Louis Meyers, 8th and Sansom Sts.

Col. J. Warner Hutchins, president of the Jewelers Club, and a diamond importer, 728 Sansom St., took a prominent part in the celebrations of the week as a member of the staff of Governor Stuart. Col. Hutchins was also an officer in the Knight Templars parade, Saturday.

Among the old Philadelphia jewelry firms, which liberally supported "Founders' Week" celebration, were: The Bailey, Banks & Biddle Co., J. E. Caldwell & Co., Z. J. Pequignot and Simons, Bro. & Co. All are among the oldest firms in the country. Simons, Bro. & Co. celebrate the 70th anniversary of their founding soon.

Walter M. Engle, 4233 Lancaster Ave., made a notable display during Founders' Week of rare porcelain, pottery and bric-à-brac of the Revolutionary period, which descended to him from ancestors. The whole bulk window was given over to an artistic display of the work of artisans in the jewelry and kindred lines at early periods of the city's history.

The Bailey, Banks & Biddle Co. made the magnificent trophy, offered by the Quaker City Motor Club, as the first prize in the Founders' Week Stock Chassis Road Races, in Fairmount Park, Saturday. It cost \$2,000, and is one of the finest examples of the silversmith's art, carrying in its design the full import of the event for which it was made. The cup was displayed all week in the show windows of the firm. It stands three feet in height and measures

from tip to tip of the winged wheel handles, 20 inches.

E. J. Hertz, retail jeweler and diamond dealer, 13th and Chestnut Sts., had his motor car destroyed by an explosion, Friday, caused by a short circuit. The explosion damaged the garage in which the car was standing, on the grounds of Mr. Hertz's residence, at Spring and Elkins Ave., Elkins Park. The automobile is valued at \$4,000 and is a complete loss. The damage done to the garage is estimated at \$800. Both losses are covered by insurance. Robert Aschenfelder, Mr. Hertz's chauffeur, was in charge of the garage at the time of the explosion, but miraculously escaped injury.

H. D. Stephens, manager of the jewelry department of Strawbridge & Clothier's store, showed what is regarded as being one of the most costly, handsome and ingenious displays made by any store in the Founders' Week Celebration, and won the well-merited praise not only of the public, but of jewelers and the trade in general. Mr. Stephens exhibited a Subway car, made entirely of precious stones, diamonds, rubies, emeralds, etc., and passing over tracks of precious stones and into a subway lined with gold and silver. The car and subway were diminutive, but of great value intrinsically, and what was more wonderful, the diamond car moved. This exhibit, together with the special decoration and adornment of the department, made a lasting impression on visitors.

"Founders' Week" will be long remembered by jewelers as an admirable holiday week, and one directly profitable to the trade. From all parts of the east and from the west and south came jewelers with their families to take in the festivities of the week and incidentally to do business. The trade generally expresses satisfaction with the week of pageants, river parades, motor car races, parade of war vessels, Schuylkill River regatta, and all the other features of a huge municipal celebration. Throughout the week jewelers, both manufacturing, wholesale and retail, made plans to join in the celebrations and give opportunity to the employes to do so likewise. By agreement, Friday and Saturday afternoons were made half holidays. Among the jewelers visiting here during the week were: H. Burgess, of the Bishop Co., Attleboro; G. Heuser, of Heuser & Bros., Wytheville, Va.; J. A. Smith, Mechanicsburg, Pa.; W. A. Bush, a retired retailer, Easton, Pa.; C. L. Painter, Pulaski, Va.; R. W. Quicksall, Mt. Holly, N. J.; W. K. Schlotterer, Schwenksville, Pa.; J. A. James, Swedesboro; S. Zimmern, of F. H. Zimmern & Co., New York; S. Bell, Atlantic City; George Bowen, Bridgeton; David Krause, North Wales, Pa.; O. O. Stillman, New Brunswick; Gus Lanz, Norristown; J. C. Beitel, Catasauqua, Pa.; Ro'and Oliver, Burlington, N. J.; George Hess, Tamaqua; O. F. Sturmer, Easton, Md.; Leo Levi, Chester, Pa.; H. S. Kratz, Souderton, Pa.; S. W. Hart, Kennett Square, Pa.; Milton Reed, Doylestown, Pa.

Fire recently destroyed the jewelry store of E. L. Graves, Camp Point, Ill. The loss amounted to about \$2,000. This is partially covered by insurance, amounting to \$500 on the building and \$200 on the stock.

TO JEWELRY manufacturers; I am looking for a firm who will make me 35,000 enameled pigeon bands from hard metal; spot cash. "O., 440," care Jewelers' Circular-Weekly.

## Obituary Notes

Daniel Schoonmaker, who died in Springfield, Mass., a short time ago at the age of 85, is said to be the oldest silver plater in the United States. The deceased was one of the oldest active business men in Springfield and was engaged in business until the day before his death. He was a native of Bethlehem, N. Y., having been born there Aug. 15, 1823, and served his apprenticeship in silver plating trade in Albany, N. Y., but came to Springfield in 1857 and remained in business there for the remainder of his life, carrying on his silver plating shop in Taylor St. for over 30 years.

The friends in the trade of Frank B. Woodruff were deeply grieved recently to hear that he had died at Rocky Mount, N. C. Mr. Woodruff, who was 40 years old, was a son of Fred. D. Woodruff, a retail jeweler of Rocky Mount, and was associated with his father in business at Keyport, N. J., under the style of Fred. D. Woodruff & Son before the latter moved to North Carolina. Later he started business at Keyport and three years ago again joined his father at Rocky Mount. Mr. Woodruff is survived by a widow and three children, a brother and sister.

## Trade Gossip.

The M. T. Fleischman Co., Heyworth building, Chicago, Ill., has just issued its "Standard" catalogue for 1908-1909. This is a large volume nine by 12 inches, printed on heavy paper and contains 250 pages of interesting information for the retail jeweler. A postal card will bring it to any jeweler who writes to the company for it.

Frank M. Whiting & Co., North Attleboro, Mass., have just issued a very attractive booklet showing a few pieces of popular-priced goods. The booklet is bound in tan-colored covers with a leaf design pattern in the border. The articles advertised are shown in clear half-tone cuts on heavy glazed paper and include a variety of acceptable offerings. The book contains 15 pages of illustrations and is 10½ by eight.

"Giant" alarm clocks with dials 10¼ inches across and standing 15½ inches are shown among the attractive exhibits now to be seen at the salesrooms of Theodore Schisgall, importer of clocks, 116 Chambers St., New York. The numerals on these clocks are 1¾ inches high, and the clock has an alarm which rings for a long time. The line of cuckoo clocks shown by the same firm is most comprehensive, and includes a large variety of styles and patterns.

R. G. Stokey was recently taken into custody in Dallas, Tex., on the complaint of Taylor Bros., jewelers of that place and Houston, Tex. Stokey is accused of embezzlement. There were four cases in all against the accused. In the first case, the bonds were fixed at \$5,000 to await the action of the Dallas County Grand Jury, and in the other three cases at \$500 each. In default of bail, Stokey was recommitted to the Dallas County jail. A large amount of pawned property was turned over to Taylor Bros., pawnbrokers.

# WARNING

It has come to our attention that some manufacturers are making mesh bags that infringe upon our patent rights. We hereby warn all manufacturers making such mesh bags and all dealers handling the same that we shall prosecute all infringers to the fullest extent of the law.

The above mesh is fully covered by letters patent No. 837,219, issued November 27, 1906, to our Mr. M. T. Goldsmith. Our rights will be fully protected, and we hereby give notice that suit will be brought against anyone making, or selling, or having in his possession with intent to sell, any article containing such mesh not made by us.

UNITED STATES PATENTS.

ISSUE OF OCT. 6, 1908

900,145. ALARM. THOMAS E. H. BUCHANAN, Wheeling, W. Va. Filed Jan. 20, 1908. Serial No. 411,622.

In an intermittent alarm, a clock having an alarm-spring winding-shaft and an alarm shaft, a lever pivotally carried by the alarm-spring winding-shaft, a star-wheel carried by the arbor of the timekeeping train and adapted to move said lever forward, a guide-plate fixed upon the alarm shaft, a trigger

pivotally mounted on said alarm shaft, and means for normally maintaining said trigger and plate in fixed relation, said means being controlled by said lever, and said trigger being adapted to be tripped with relation to said plate by said star-wheel.

900,148. ENGRAVER'S SPOON-HOLDER. FRED W. CROCKER, North Baltimore, O. Filed Jan. 25, 1908. Serial No. 412,608.

A work-holder attachment for engravers' blocks, comprising a pair of jaws each having a concavity lengthwise the top thereof, a slot extending

throughout the length of the under side of the jaws, and a series of pins or pegs adjustable in said block and having heads fitting said slots to permit adjustment of the jaws at various angles to each other.

900,183. WATCH-MOVEMENT. WALTER B. MEHL, Waltham, Mass., assignor to the E.

Howard Watch Co., Waltham, Mass. Filed Feb. 29, 1908. Serial No. 418,466.

In a stem winding and setting watch, the combination with a movement plate, of an arbor rotatably supported thereby, a clutch slidingly mounted upon said arbor, a clutch lever pivoted to said plate for operating the clutch, a manually operated setting lever pivoted to said plate and adapted

to move and lock said clutch lever in its setting position, and a spring one end of which holds said setting lever in both its setting and winding positions, and the opposite end of which spring engages and returns said clutch lever to its winding position.

900,293. ALARM-CLOCK. RUDOLF METZ, Oberursel in Taunus, Germany. Filed March 27, 1908. Serial No. 423,772.

An alarm device, especially adapted for people who are hard of hearing, or deaf, comprising in

combination, a casing, an alarm-clock, located in said casing, a sounding device connected with said alarm-clock, a hammer operated by said sounding device and a clip.

900,317. PORTABLE CASE FOR CLOCKS AND THE LIKE. WILLIAM H. SLATTERY, New York, assignor to Deitch Bros., New York. Filed March 24, 1908. Serial No. 422,877.

In an article of the class described, the combination of a casing, an aperture formed in the

casing, a movable element adapted to form a support for the casing, and means connected with said movable element for opening and closing said aperture.

900,399. STRIKING MECHANISM FOR CLOCKS AND THE LIKE. JONAS P. L.

LINDSTROM, Paris, France. Filed Sept. 29, 1900. Serial No. 31,557.

A striking mechanism comprising a revolving and deviating hammer, and mechanisms for oper-

ating the same, a main shaft, a snail on said shaft, a second shaft and let off cam thereon, and connections between the hammer operating mechanism, the snail and the let off cam.

900,529. PROGRAM ATTACHMENT FOR CLOCKS. JULIUS W. HANSEN, Princeton, Ind. Filed Feb. 28, 1908. Serial No. 418,339.

In an attachment of the character described, a clock having a striking mechanism, a minute dial operatively connected to said clock, a series of trip pins on said dial, a lifting rod adapted to be

engaged by said pins to start said striking mechanism, a contact brush, means actuated by said striking mechanism to engage said brush and thereby close an electrical circuit at any desired time.

DESIGNS.

39,599. BADGE. THOMAS F. GAYNOR, New York.

Filed Aug. 28, 1908. Serial No. 450,793. Term of patent 3 1/2 years.

39,600. BADGE. MARSHALL A. HUDSON, Syracuse, N. Y. Filed Aug. 10, 1908. Serial No.

447,916. Term of patent 14 years.

39,601. BROOCH. HENRY C. PERLEY, New Ro-

chelle, N. Y., assignor to Perley & Bro.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."

PUBLISHED OCT. 6, 1908.

Many Foreign Manufacturing Firms Locate in Great Britain to Comply with New British Patent Law.

OUR consul at Nottingham, Frank W. Mahin, sends the following report on the effects of the new British patent law on foreign patentees:

The representative of a British firm making a specialty of securing factories and factory sites for applicants is quoted to the effect that many applications have been received from foreigners, induced thereto by the provision of the new law requiring articles patented in the United Kingdom to be manufactured here. An important feature of the applications already made is that the manufacturers demand works much larger than are necessary to make the patented article, giving as the reason that they cannot run works in England on the patents alone, and therefore intend to make other goods which have hitherto been imported ready-made. Consequently the volume of new manufacturing business brought to this country is expected vastly to exceed what is directly attributable to the influence of the new law.

It is stated that nearly 2,000 patents are now within the scope of the law, and if these were all manufactured in this country 30,000 to 40,000 people would be given employment.

The law became operative Aug. 28, 1908. Thirty foreign firms had then completed arrangements to open factories in Great Britain. Among them are a number of American firms. Many firms in the United States and in Germany have negotiations for factories or sites under way. The principal articles made by the American firms are wire cloths, telephone implements, shoes, typewriters and phonograph records.

W. H. Hegeman has taken possession of the store which he purchased recently at Northwood, Ia.

## The Construction of Freak Clocks With a Single Wheel

IN the attempts made to reduce horological mechanism to its greatest simplicity it does not appear that constructors will be able to retrench on the system of three wheels for a clock capable of recording hours, minutes and seconds, writes Paul Ditisheim, in *Revue Internationale d'Horlogerie*.

The ingenuity of inventors is nevertheless applied to the discovery of a still more simple form, and there is in sight the realization of the feat of constructing a clock with but one wheel, and even a clock going without any wheel at all.<sup>1</sup>

In his work on the Soltykoff collection, Pierre Dubois reproduces an article, dated Paris, Nov. 22, 1723, extracted from the *Gazette d'Amsterdam* of Nov. 30.

"The curé of St. Cyr has presented to the Academy of Sciences a clock that follows exactly the movement of the sun, by means of a single wheel, which the most skilful geometers have not been able to devise, but which, however, has been approved."

A memorandum made by M. de Rivaz describes other attempts made in the same direction. He at first substituted for the wheel work of a clock, four-toothed sectors, working one into the other; he subsequently made, in 1740, a clock that had no wheel in its movement, but simply three dial-work wheels; the pendulum controlled the seconds wheel, which, at each revolution, allowed one tooth of the minute wheel to pass, and this at each revolution, a tooth of the hour wheel; in escaping the latter re-imparts to the pendulum the impulse necessary to move it during the following hour.

J. A. Lepaute, in his treatise on horology,<sup>2</sup> mentions that the oldest son of Julien le Roy proposed to him to construct a clock in which there should be only one toothed sector, held by steps attached to the balance. The minute wheel pushes the sector for the period of a minute, and the sector

<sup>1</sup>M. L. Reverchon, to whose knowledge I am indebted for much of the information given here, will shortly publish a new article on the subject of these clocks.

<sup>2</sup>"Triaté d'Horologie," containing all that is necessary to know about clocks and watches. By J. A. Lepaute, royal horologist. Paris, 1767.

returns by means of its own weight or with the aid of a counter-weight, during the following minute, every two minutes; the pendulum, placed at the side of the wheel re-

FIG. 1.

ceiving the stroke of a tooth of the minute wheel to restore its movement.

The author adds that repeated attempts and infinite trouble were demanded in the realization of this idea and to bring it to a condition for presentation to the king in May, 1751. In this clock the wheel renews the movement every minute, receiving itself its impetus from a weight as in ordinary clocks.

In August, 1752, Lepaute simplified this construction, having devised a clock *without wheels*, by employing a bell-work, which received the impulse at each stroke of the bell and did not require any movement wheel, only the sectors and but two dial-work wheels.

Finally, two years later, the brother of J. A. Lepaute completed a new clock, based

FIG. 2.

on the same principle, but the impulse in which was renewed every minute, without depending on the irregularities caused by the duration of 12 strokes of the bell work.

"This work was the most difficult that I know," concludes Lepaute. This explains why the practical solution of the construction of clocks with a single wheel has not been more general. As a matter of fact, outside of the really extraordinary specimen (Fig. 1), to which we shall later refer, there is perhaps no other example in existence, and the Conservatory of Arts and Trades itself, which is so complete in retrospective collections, does not possess one.

Constructed at La Chaux-de-Fonds<sup>3</sup> in the year 1780, the magnificent clock of

<sup>3</sup>We must remember that they made clocks at La Chaux-de-Fonds, before making watches, while the contrary took place at Lœce, where Daniel Jean Richard was the first horologist on a small scale.

The Favorite Movement with both Trade and Public

## The Omega Movement

stands in high favor with the trade, and is constantly increasing in popularity for the reason that the public is quick to appreciate its merits.

The man who carries an Omega is proud of it and misses no opportunity to sound its praises to his friends. He finds it invariably and uniformly reliable. He learns to depend upon it and it never abuses his confidence.

**Ω**  
**OMEGA**

**Adaptable, Interchangeable, and Suited to all Requirements**

The Omega is made in all sizes to fit regular American cases, besides a number of Swiss sizes. Every part is interchangeable, and all are made with lever escapements, double roller and pendant set. There are six different grades — from seven jewels to twenty-one jewels — adjusted to heat, cold, and five positions.

ALL JOBBERS, OR JEWELERS' CIRCULAR PUBLISHING CO.

Samuel Roy and his sons, which should find an appropriate place in one of our museums, has but a single wheel; it is without pinions, it goes eight hours, indicates hours, minutes and seconds and repeats the time every quarter of an hour.

As shown in Fig. 2, the figures representing the hours in this curious dial are disposed spirally. A single hand indicates simultaneously the hour and the minute; in following this spiral line, it lengthens automatically. On arriving at the culminating point, 12, the hand runs back and falling instantly and vertically downward from the XII, then continues its movement.

The usual wheel work of the minute train is thus done away with. The seconds hand moves from left to right for a minute and resumes its course from right to left during the following minute.

The wheel A (Fig. 3) is actuated by the motive weight B; its arbor carries the hour and minute hands, while its movement is regulated by the escapement (C) attached to the arbor of the seconds hand. This escapement admits of the use of two pallets; when the wheel acts on the entrance pallet, the arbor moves from left to right and produces a reverse motion on the exit pallet. The escapement has attached to its staff a rack or sector, F, of 15 teeth, which permits the passage of a double escapement carried by the potence G, fastened to the pendulum. Every minute, when the escapement (C) permits the wheel A to pass, the latter actuates the escapement H, attached to the pendulum, so that it imparts for the period of one minute the impulse necessary to maintain the oscillations.

As the pendulum is relatively very heavy (its weight is upwards of 25 pounds), the difference in the amplitudes is but slightly noticeable between the commencement and the end of the minute.

The bell work includes therefore a single wheel (J). This wheel has a double denture, or row of teeth, that of the hours and that of the quarter hours, operating the hammers (m n) striking the bells K. The movement of the wheel is regulated by two escapements placed at L, combined with the displacement of the counter-weight pendulum (M).

This aggregation is connected to the mechanism of the clock by the rod (N), which produces each quarter of an hour, the release of the bell-work of hours and quarter hours.

The single wheel clock we have just described was given to Charles Coulern by Jacob Robert, founder of the clock factory at Fontainemeleri. M. Robert, who had it for 60 years, had never seen it go; several horologists who were entrusted with its repairs declared that it could not work. Charles Coulern succeeded in getting it in condition so well that since 1865 its performance has left nothing to be desired.

Samuel Roy and his sons have constructed their remarkable clocks with complicated movements,<sup>4</sup> but the capital piece here described may be considered as a masterpiece of mechanical construction, and we accord to it the standard of talent and of perseverance which should be ascribed to these

horologists, contemporaries of Jaquet-Droz and of Maillardet.

Historical Watches.

IN a fascinating work entitled "Choses d'Autrefois," by M. Ernest Gagnon, account is given of a watch of exceptional value which was bequeathed by the dying Marquis of Montcalm. Among those who helped to support Montcalm after he had been wounded on the doubly fatal day,

FIG. 3.

Sept. 13, 1759, was a young soldier of the Regiment of Berry, named Jean Jamme dit Bellegarde. He was born in Saint Louis de Versailles in the year 1732. He did not return to France with the regiment, but remained in Canada, and in 1761 married the widow of Louis Dupuis (Marie Françoise Garrigue or Guerv.). One of his grandchildren, a Madame Laflamme, when advanced in years, used to say that her grandfather possessed a watch of exceptional value which he had received from the Marquis of Montcalm on his deathbed as a keepsake. M. Gagnon, the author of

"Choses d'Autre," has heard the same story from a number of other people in the County of Bellechasse.

But what, asks the writer, has become of that watch, associated with such hallowed memories—with the last moments of Montcalm's painfully closing life, and with the mournful thoughts that marked the announcement that he had ceased to breathe? Well, a few days after he had published his book containing the tradition of Jean Jamme Bellegarde's deathbed keepsake, M. Gagnon received a letter from the late Judge Baby, the well-known Canadian antiquarian and historian, which shed a strange light on the subject. Judge Baby wrote that there once lived in Quebec a family, the head of which was called Ainslie Young, who held an important government position. Mr. Young married a Mlle. Baby, daughter of the Hon. Francois Baby and Marie Anne Tardieu de Lanaudiere. Among the many children of this couple was one John, who studied law and became an advocate. He lived in Saint Louis St., within the walls. Being a near relative of the Judge and also his neighbor, they often saw each other. John (Ainslie) Young had several objects, which a picker-up of unconsidered trifles and especially a student of Canadian history with a collector's taste might well envy and covet. Among other possessions was a double-cased watch, which bore on one side, as the Judge had taken pains to verify, the arms of Montcalm.

This watch Judge Baby had handled again and again, and they drew from him admiration in accord with his young enthusiasm. At that time he was not more than 20 years of age. In 1853 a fire broke out in Young's house, and the room in which he slept and in which he kept his treasures was considerably damaged. Worst of all, the watch and pistols disappeared, and he could never afterwards find any trace of them. Did they become a prey to the flames or did they fall into the hands of thieves? Neither the owner nor his friend and kinsman was able to find an answer to this question. And was the watch really the one bestowed upon Jean Jamme Bellegarde by Montcalm?

Another historic watch has just been talked about. John McCord, founder of the McCord family in Canada, presided at the meeting called at Quebec at the house of Miles Prentice, innkeeper, on Oct. 30, 1773, to consider the expediency of petitioning for a house of Assembly. The watch by which Mr. McCord, who was a punctual man of business, timed the opening and closing of that meeting is still keeping time, and is still in the possession of a McCord. This watch, too, has a coat of arms.

A fire, Sept. 21, damaged the jewelry store of John O. Allen, West Nashville, Tenn. The ignition of gasoline is given as the cause of the origin of the fire.

Burglars, believed to be professionals, recently broke into the store of Frederick W. Hayes, Broken Bow, Nebr., and stole nearly \$1,000 in cash and a large amount of merchandise, including jewelry. The thieves gained entrance through a back window and had little difficulty in opening the large safe.

## The Old Clock in the Tower of St. Rombant's Church, at Malines, Belgium.

THE old clock in the tower of St. Rombant's church, at Malines, Belgium, having been so frequently referred to of late as the second largest in the world, in connection with the largest clock in existence, just erected in New York harbor, a few details and data regarding it will doubtless prove of interest.

The principal dimensions and proportions of the dials of St. Rombant's church clock, which, before the advent of the American

count of its being equipped with a very old Flemish carillon. The history of this carillon was written some years ago by an archaeological savant of Malines, Dr. Van Dorslaer, and we will add the salient features of his description to our data concerning the clock, which we obtained from a communication to *La Nature* by M. Reverchon.

The carillon is composed of 45 bells, divided into four octaves. The total weight

kilos. The intricate mechanism of these chimes and some of the bells are shown in the accompanying illustration.

Since the installation of the first carillon, which contained eight bells, Malines has had an official bell-ringer.

Since 1881 this office has been held by M. Joseph Denyn, who has established a reputation for numerous installations of carillons and whose concerts are highly appreciated.

The dials, which, as already stated, were installed in 1708, were constructed by James Willmore, an English clockmaker, at that time resident in Malines. He received for the four dials and the hands a cash payment of 10,000 francs and a yearly pension, for 14 years, of 450 francs.

The accompanying illustration of the

SKELETON DIALS OF THE GREAT CLOCK IN ST. ROMBANT'S CHURCH, MALINES, BELGIUM.

clock, for many years enjoyed the distinction of being the largest in the world, and are to-day the largest in Europe, are as follows: the large circles are of 11.72 meters diameter, the small ones 7.52 meters.\*

The space left free between the two circles is 2.10 meters wide. It is in this space that the figures representing the hours are disposed, their height being 1.96 meters, with a breadth of 25 centimeters. The half hours are marked by dots or points, each 60 centimeters high and 42 centimeters in extreme width.

The hands, which mark the hours (one on each dial)—there are no minute hands—measure 5.62 meters in length and are 86 centimeters across at their greatest breadth.

There are four of these dials, which were set up in 1708, and have been repaired in 1775, in 1823, and the last time in 1871-74. The clock, constructed in 1527, by Vrancke-Wauters, worked until 1861, when it was equipped with an electric releasing or unlocking system by Canon Michiels.

The clock is especially interesting on ac-

count of these bells is in the neighborhood of 35,000 kilos. Thirty-one of them were cast in 1674, by the celebrated Pierre Hémony, the most illustrious of European bell-founders. An excellent musician and profoundly versed in acoustics, Pierre Hémony, of Amsterdam, has left behind him a large number of peals of bells remarkable for their accuracy and harmony.

On other bells of Malines we find the names of various founders, but little less famous than Pierre Hémony; the Waghevens, who flourished at the end of the 15th and beginning of the 16th centuries; Melchior de Haze, of the end of the 17th century; Georges Dumery, of the first half of the 18th century, and above all, Andreas Van den Gheyn, of the race of Van den Gheyns, who have been renowned bell-founders since 1450.

The largest of the Malines bells, which sounds the Si flat, weighs 8,884 kilograms. It is modern and dates from 1844. The second largest, which sounds Do, dates from 1696; it is signed Melchior de Haze, and weighs 6,000 kilograms. The third, Ré, weighs 4,235 kilos, and the fourth, cast in 1498, by Simon Waghevens, weighs 3,000

tower of St. Rombant's church shows two of the dials, which are of open work (skeleton dials) and applied to the face of the tower wall, their construction permitting their use for recording time, without impairing the architectural effect of the structure. Not very far from the church stands a monument around which the dial of the huge clock is reproduced in exact size in colored stone, and anyone who wishes to verify the statements regarding the dimensions can measure the periphery by walking around it.

A. E. Palmer, Grand Forks, N. Dak., recently reported the loss of \$600 worth of stock which was stolen by burglars. A ring was found on a window-sill at the Great Northern station.

A thief, during a storm at Belleville, Ill., about a week ago, used a diamond glass cutter on a display window in the store of Knapp Bros., at that place, and stole a tray of gold wedding rings worth \$200. The empty tray was found in the alley south of the store the next morning.

\*This represents a circumference of 56 meters, so that each hour is marked by an arc of the circle three meters in length.

### Special Railroad Movements

To secure and hold the railroad trade there is no more attractive and permanently satisfactory line than the V. & C. Special Railroad Movements.

The watches in question have been in use for many years by a great many railroad men on all important lines in this country, and have shown a degree of accuracy and reliability which is unparalleled.

Many railroad watch inspectors have assured us that the rigid requirements of a railroad watch are met by the V. & C. to a degree which is beyond criticism, and which places the line in a class by itself.

You should have a representative showing of these railroad movements—17 to 21 jeweled, adjusted to heat, cold and position, and lever set—in order to get your share, and more than your share, of this most desirable class of business.

# STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

## Suggestions Offered by a Practical Jeweler to Overcome Certain Difficulties Met in the Trade

NEW HAVEN, Conn., Oct. 7, 1908.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

The jewelry business is one of the most dangerous businesses in which a person can be engaged for the reason that the stock in a good store is most valuable and the temptation of many people to get hold of some of it without pay is exceptionally strong. A jewelry store should be arranged with two lines of show cases and clerks should be stationed on both sides, so when a person comes in the store he can be under the eyes of the clerk in front and back of him (or her); there will then be little chance for a person to do any shoplifting.

No jewelry store, however, should be arranged with one line of show cases, just for that reason. The most valuable stock, such as diamonds and watches, should not be in the first show case, but kept as far away from the front door as possible, so that a person who tries to get away with valuable jewelry will have as long a distance as possible to go.

The first show case nearest the window should contain the cheapest goods, the next show case goods that are a little more valuable, and so on, the most valuable stock being in the last show case. A good plan would be to have solid gold and silver goods on one side and goods of a cheaper grade in the show cases on the other side. This arrangement will enable you to be on your guard and to protect your most valuable stock against theft. It is very desirable to have a diamond room in which to display diamonds, as this is a safer method than displaying them in a show case. A diamond broker, one morning, was showing diamonds in our store by the first show case and a young man was standing near him. I did not pay any particular attention to him, but he managed to get one of the papers of loose diamonds, so you see you cannot be too careful. It is a good plan to have trays of two different colors, *e. g.*, red for solid gold and blue for gold plated wares. For silver and silver plated goods you could have two other colors.

Jewelry stores ought to be located in buildings adapted to the special needs of the jewelry business and architects ought to make this a study. Jewelry stores should be very wide. It is well to have two show

windows, the larger the better, but, by all means, the store should be wide, so as to have two lines of show cases. There should be plenty of room between the show cases and the wall cases, say, about five or six feet. The sash doors should not slide, but should lift up, so two clerks can conveniently use two adjoining sash doors at the same time. With this end in view, the ceiling ought to be about 20 feet high. As is well known, a high ceiling also improves hygienic conditions.

I believe that jewelers in all cities should organize, *i. e.*, form a society or club and meet at least every three months, or four times a year. Each jeweler should inform the members of his trade of his experiences and the dangers to which he is exposed. Each could inform the other of the tricks of swindlers, etc., and thus do mutual good to all concerned. I think jewelers can make just as much money by being friends with one another as by being enemies. What is the sense of one jeweler's antipathy for another jeweler, because both happen to be in the same business.

Why should one jeweler intentionally run down another jeweler's stock and hope, by so doing, to make a sale at his rival's expense. There is nothing gained in this way, in the long run. All of these things leak out sooner or later. Jewelers should protect each other and try to do business in a square, upright and honest manner. Don't criticise another's trade unjustly and unwarrantedly.

Jewelers should make it a point, when visiting other cities, to pay their respects to fellow members of the trade and discuss and note down helpful business points which may be obtained from each other. Any "quick sellers" which the out-of-town jeweler carries should also be noted. You should make your store as attractive as possible as to gas fixtures, wall cases, counters, trays, the arrangement of stock, etc. Don't have anything dirty. An attractive store is a paying advertisement for any merchant. Always remember one person recommends another. No merchant has power to please everybody, but he can please a great many. The important things to be guarded against in the business are shoplifting, burglary, tarnishing and the sale of shoddy jewelry

by merchants who are not legitimate jewelers.

I have found out that at least 75 per cent. of the jewelry thefts are committed by members of the female sex. This is a hard statement to make, but it is true.

It is a most difficult task to judge the honesty or dishonesty of those who enter the store. The ideal way would be to know who every person is, so if he does anything criminal you can get a warrant for his arrest. This knowledge, of course, is unobtainable, so one must simply do the best one can and use all the care possible. Shoplifting is a great curse to the jewelry trade and, in my opinion, any attempt by an adult to steal jewelry should be punishable by five years' imprisonment in State's prison. If a boy under 21 years of age is the guilty party, he should be sent to a reform school; if it be a girl, she should be sent to the industrial school until she is 21 years old. I believe that such a law should be passed by the Legislatures of all the States in the Union and a copy of it displayed conspicuously in all jewelry stores, show windows, etc., where everybody can see it.

Jewelry stores have not as much police protection as they should have. No jewelry store should be opened for business without at least a good detective. In a word, the jeweler should use every effort to keep dishonest persons out of his place of business.

C. S.

### The Unusual in Business Literature.

IT is inherently American to long for, and look for, change—improvement—novelty. That very "unusualness" stamps the American wherever he may go and with however many other peoples he may mix. Your average Yankee among a crowd of other nationalities is invariably the most conspicuous—not, perhaps, in appearance, but in his way of looking at things, of saying things and doing things. He generally makes the most favorable and the most lasting impression, too, just because he is pleasantly "unusual." He does not try to be—he *is*—unusual, and he can't help it.

The "unusual" in advertising will ever be the most successful because it naturally gets the quickest attention. It would be a mistake to say that more eyes seek it than the ordinary kind. Really it *attracts* and *holds* more eyes than the commonplace can or ever will.

There may be nothing in a name—until it is advertised.—*Advertising Chat.*

**Storekeeping Department.**

**The Retail Jewelry Store of S. I. Rodberg & Son, Baltimore, Md.**

ILLUSTRATED below is the retail jewelry store of S. I. Rodberg & Son, Baltimore, Md., whose business was established in 1854. The store is located in the Hotel Caswell building, at 26 W. Baltimore St., and is 38 feet long and 18 feet wide, the ceiling being 15 feet high. The interior is attractively furnished with mahogany fixtures. There are three show cases, each eight feet long, made entirely of glass and having a base of mahogany and white marble. The cabinet drawers in the back of the case are lined with felt for the protection of the stock.

Special trays, lined with blue velvet, have been designed to match the show cases and fixtures.

There is a plate glass wall case, 25 feet in length, which has curved ends. On top of this are electric cabinet fixtures, the lights being enclosed in translucent glass. Half of this wall case opens into the corridor of the hotel, so that patrons going in or coming out that way are attracted by the display. The side wall fixtures match the large wall case, and are 25 feet long. They are embellished by two large beveled plate glass mirrors. On either side of the mirrors there is a watch repair case made of beveled glass and lined with felt.

The beauty of the mirrors is enhanced by electroliers and fancy electric lights, which are arranged close by.

The show window of this store is very striking, being made entirely of glass, thus allowing a full view of the stock on display. In the upper part of the show window is an electric clock, the different hours being indicated by means of electric bulbs. The flooring of the store is of terrazzo.

F. M. Dillon, Bonner Springs, Kans., is now at Gas City, Kans.

**An All Hallowe'en Window Display.**

THE Hallowe'en window illustrated herewith is composed of Hallowe'en features, with mirrors and hand glasses, reflectors of futures as a dominant group. The candelabra make another timely article, and when lighted will be reflected in

Inasmuch as courtships and sentiment are associated with Hallowe'en, rings are an important element of a Hallowe'en window display. All sorts of jewelry can be arranged at the sides and a good showing would be made by hall clocks or others with hands pointing to the figure XII.

An article offering suggestions in adver-

the numerous glasses, making a brilliant exhibit.

The boxes contain engagement rings, and the wedding rings are arranged as shown in the illustration.

tising to accompany this display will be found in the retail advertising department.

**Know Thy Goods.**

GENERALLY speaking, the services of a specialist are worth all he asks. This does not refer to the self-styled expert who is prepared to dash off an ad for boots, bonbons, jewelry or automobiles at a moment's notice and can grind out a whole series for all of them in a day and a half. It refers to the man who wants the run of the place, a second talk with the proprietor, if occasion requires it, and the privilege of making inquiries of workmen, heads of departments and clerks so that when he gets down to ad-writing he will be armed with a knowledge of what he is writing about and the points to be played up. He wants facts and won't write ads. until he gets them.

"The Ginger Bug and Other Things" is the title of another little book by Frank Farrington and published by the Merchants' Helps Publishing Co., of Delhi, N. Y. The book gets its leading title from an amusing little poem whose purpose is to instil a spirit of hustle and ambition into indifferent workers. The "other things" are genuinely good things, and act as sharp prods along the road to success. The pages are 3½x6 inches and bound in cardboard. The book sells for 10 cents.

# RETAIL JEWELERS ADVERTISING

## How and What to Advertise for Hallowe'en and Thanksgiving

Examples of Early Fall Advertising Illustrated and Reviewed

**H**ALLOWE'EN and Thanksgiving are two occasions on which the jeweler can advertise rings and novelties effectively. The eve of all Saints' Day, known as Hallowe'en, is every year becoming more and more popular both with the young and the old folks as a time of reunion and celebration. Thanksgiving's reputation as a day of

good fun-maker, a neatly designed silver baby rattle for some confirmed old bachelor.

Unique hat pins, bar pins, lockets, bracelets, mesh bags, etc., will appeal to the gentle sex, while scarf pins, link buttons, rings, watches, cigar cutters, fountain pens, etc., will suffice for mere man. These are merely a few of the many articles which

this week's issue, in the Storekeeping Department, an original design for a timely display.

The advertisements shown on this page were used during September. W. H. Carew, Streator, Ill., used the rather oddly designed advertisement shown in the group in a space of six inches, single column. The fact that clocks are advertised exclusively adds considerable strength to this announcement.

"Watches for Students" were advertised by the Plumb Jewelry Co., Des Moines, Ia., in a space of eight inches, single column.

During the State fair held recently at Wheeling, W. Va., C. N. Hancher, of that city, advertised briskly in the local dailies. The accompanying advertisement, which has been reduced from five inches, double column, offers an invitation to out-of-town visitors to call at the jewelry establishment and inspect the stock.

Andrew H. Frandsen, Monmouth, Ill., on Sept. 5, in a space of four and three-quarter

EARLY FALL ADVERTISEMENTS USED BY RETAIL JEWELERS IN DIFFERENT TERRITORIES.

home gathering and feasting has long since been established. Attractive little souvenirs should be advertised as suitable favors for those who gather round the festive board and the inevitable card board as well.

Besides these novelties a general line of articles might be advertised as gifts, but special emphasis should be laid on the former. In the way of silver novelties there might be sold at a moderate price paper cutters, silver-mounted scissors, stamp boxes, toilet articles, silver-backed hand mirrors, puff boxes and, what will prove a

may be advertised and which never fail to please the recipient.

Neatly printed advertisements of not less than four and one-half inches, single column, should exploit this kind of stock in the local daily every day for at least two weeks before the occasion.

Seasonable catch phrases would be: "Hallowe'en Favors," "Hallowe'en Jewelry," "Thanksgiving Trinkets," "Gifts for Thanksgiving," "Thanksgiving Tokens."

The show window should not be forgotten and THE JEWELERS' CIRCULAR—WEEKLY illustrates in

inches, double column, advertised sterling silver spoons at 50 cents each, at a special sale. The remarkably low price attracted many patrons.

The announcement of T. & E. Dickinson & Co., Buffalo, N. Y., which occupied four inches, double column, gives a list of high-class articles suitable as wedding gifts. The general tone of the advertisement is dignified.

The J. J. Sweeney Jewelry Co.'s announcement, which was published in a local daily in Houston, Tex., during the early

**Retail Advertising Department.**

part of September, calls attention to solid gold signet rings, brooches, bracelets, watches and diamond rings, the range of prices of the latter being from \$10 to \$750. The other prices quoted are varied enough to appeal to a general class of purchasers. The entire announcement measures nine and one-quarter inches high by eight and one-half inches wide. The feminine figure alone in the announcement, used as the main illustration, occupied a space of nine and one-quarter inches by three and one-quarter inches. The omission of this illustration would not impair the appearance of the advertisement. In this space might be illustrated other articles of jewelry accompanied by suitable text. The feminine figure is inartistic, and, moreover, likely to evoke the risibility of other members of her sex, owing to the passé style of her sleeves. The pose of the left arm and hand is very awkward.

J. F. Safford & Son, Rochester, N. H., advertised timely articles in the shape of school watches. The printer, however, has hardly done justice to the typographical display.

The neat little advertisement of J. Abramson, Los Angeles, Cal., measures, in the original, only two and one-quarter inches, single column. In this small space we find a pleasing typographical display, neat border, a suggestion of freshness and newness, brief description and the quotation of a range of prices.

"All the New 1908 Ideas" makes a fitting introduction for the text which follows in the advertisement of seven inches double column of C. A. Tucker, Lincoln, Nebr. The text in the body of the announcement is about as general in style as possible, being, in fact, too general a style to adopt frequently. It is the consensus of opinion that the merchant in the home town makes his strongest plea for business by specializing, by quoting prices and by hammering on quality.

The advertisement of five inches, single column, of J. B. Ingalls, Rock Island, Ill., quotes no prices, neither does it mention any article specifically. The strongest part of the announcement is the phrase "Accept our word for it, or ask our patrons." The present text would make a good introduction in a larger advertisement.

Brock & Feagans, Los Angeles, Cal., call attention to an exhibition of cut glass in their show windows by means of a well-written advertisement of four inches, double column.

Reproduced herewith is a double ad. used by the Mermod, Jaccard & King Jewelry Co., St. Louis, Mo. Each ad. occupied a space of five and three-quarter inches, single column. This is a most desirable method of advertising, as it makes each of the two "specials" advertised prominent and makes a stronger impression than would be made if the desk lamp and rings were all advertised together in one announcement. This is an excellent example of special advertising.

A comparison of the ring advertisement of the latter concern and that of the Paul-Gale-Greenwood Co., Norfolk, Va., will

show how much more effectively an advertisement appears with a terse description of the stock and the quotation of prices.

R. F. N.

**What Some Jewelers Say.**

**I**T'S Up to You—If you want new and up-to-date Xmas presents this year you surely will have to see our line and get our prices, and you can come early, select your presents and we will hold same for you until you are ready to lift them (engraving free) and no old stock. Everything new and up-to-date. Clark & Bigelow, Washington, Pa.

**Jewelry Repairing.**—The possibilities of repairing and reconstructing jewelry even in the most dilapidated conditions are great. Rings without sets can be rebuilt and new stones supplied. Set rings can be converted into signet rings. Old-time watch guards can be made into handsome necklaces. Old heirlooms, too dilapidated to wear, that have been laid aside, can be rebuilt and transformed into charming old-fashioned ornaments. All these things can be done

the diamond, has been looked upon as the most desirable of all gifts. It is more appreciated, gives greater pleasure and has the most intrinsic worth of anything you can buy. Nothing safer as an investment, nothing more beautiful as an ornament. Our stock of fine diamonds is by far the largest of any other stock in the State, and our prices are guaranteed as low as you will pay elsewhere for doubtful quality. Special, \$100 diamond rings for either lady or gentleman, on sale at \$84.50; \$75 diamond rings on sale at \$62.50; \$50 diamond rings on sale at \$38.50. A. Rosenfield, Leavenworth, Kans.

**Exclusive Jewelry.**—For birthday or wedding presents, jewelry of exceptional design and unusually clever workmanship will be found here, in a profusion of varieties. A fine assortment of rich cut glass and fancy hand-decorated china also carried in stock. Small profits satisfy us. Wedell Bros., Elgin, Ill.

"One Figure" more or less in the price of an article may mean quality or lack of quality. The path of safety lies between extravagantly high and ridiculously low

QUAINT LITTLE ADVERTISEMENTS OF W. C. STULL, VALDEZ, ALASKA. [Rather an amusing but forceful argument why the home jeweler should be patronized is embodied in the second advertisement.]

by us in our repair department in such a neat and thorough way that the old brooch or ring or necklace becomes at once a most treasured piece of jewelry. A trial of some article will more than convince you of our superior ability to handle this class of work. E. H. Goulding's Sons Co., Alton, Ill.

A good watch will last a lifetime with proper care. A poor one is a continuous expense. Our stock comprises the best American and foreign makes in the various styles cases. Each watch fully guaranteed. Buckingham & Flippin, Lynchburg, Va.

**Souvenir Spoons.**—Just as soon as a new design appears on the market our buyers secure it for our store. For that reason you can always find the latest here. The list: School buildings, library, post-office, bottle factory, clay works, city of Streator. We have these spoons in sterling silver and some are gold lined. Crest and birthday spoons. The latest things in crest and birthday spoons. W. H. Carew, Streator, Ill.

Confidentially there are just two sides to any question and no more. The question arises, where to buy jewelry. That means you have to decide between our store and others. To see our goods and make comparisons elsewhere is sufficient. Our perfect goods count, but our "rockbottom" prices settle it. If it's satisfaction you want, come here. R. E. Lockwood, Walton, N. Y.

**Diamonds Endure Always.**—Since time immemorial the queen of all precious stones,

prices and leads right to our store. We sell jewelry at absolutely fair figures. Comparison with prices prevailing elsewhere will give an insight to our values. Henry Birkenbusch, Pekin, Ill.

**An Attractive Booklet.**

"**BOOK of Diamonds**" is the title of an attractively printed booklet of 48 pages, 5 by 8½ inches, which is being distributed by the Mermod, Jaccard & King Jewelry Co., St. Louis, Mo. The cover pages are gray, printed in dark red and black. The inside pages are of a fine quality of heavy gloss paper, and are profusely illustrated with fine half-tone reproductions of a varied assortment of high-class diamond jewelry. There are also shown illustrations of the various departments of the store. The price of every article illustrated is quoted.

The introduction contains a brief history of the diamond, including its discovery, composition, cutting, etc., and this leads naturally into a description of the facilities possessed and advantages offered by the concern in the way of cutting and purchasing diamonds. Among the articles illustrated are several which are noteworthy for artistic workmanship and originality. Readers of the book are informed on the last page that the concern's large catalogue, entitled "Book of Gifts," will be forwarded, postpaid, upon request. The booklet is dignified in tone, and will undoubtedly impress the better class of purchasers.

# WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]  
No attention paid to communications unless accompanied by full name and address of the writer.

**QUESTION No. 2128.—To Sharpen Files by Chemicals.**—How can I sharpen old files? I have many lying around my repair bench which I could use if they could be sharpened in some way. S. F.

**ANSWER:**—Files may be sharpened by chemical means so they will be very satisfactory, but they do not serve so well for fine work because the alignment is partly lost. There are several ways of sharpening them: (1) Boil the files in a strong washing soda or potash solution in order to free them from all grease, oil or gum. They should be boiled only long enough to clean them, then dipped into a solution of four parts of water and one part of nitric acid. The length of time depends on the file; if fine cut, then a few minutes will suffice. Coarser ones require a longer immersion. (2) Clean the files as above, then wash in warm water and dry by heat. In a flat wooden vessel put 1½ pints of warm water and in this lay the files. Mix together finely powdered blue vitriol, three ounces; powdered borax, three ounces, and put this over the files. With a wooden stick stir well together and move the files so the mixture will come in contact with all parts of the files. Add to this 10½ ounces of sulphuric acid and one-half ounce cider vinegar. After a short time remove, the fine files first, rinse off in water, dry and oil with olive oil. (3) Files may also be sharpened with a sand blast. Clean them first, as above, then hold them under the sand blast, using sharp glass or flint sand, which will freshen them up so they will cut better. Files are quickly cleaned with a steel circular scratch-brush secured to a fast-running lathe. Files will cut best when clean and free from oil or gum. They are often thrown aside as worn out, but a thorough cleaning will often put them in excellent condition.

**QUESTION No. 2129.—Foils for Stones**—How are the foils made for the various colored stones? F. S.

**ANSWER:**—Foils are made of sheet tin or copper, silvered and rolled thin between rolls, polished or colored according to the color desired. For cheap articles, the tin is employed, but for the better class of articles copper is used. The silvered and polished metal leaves are employed where white foil is wanted. The same is used for colored foils, by varnishing over for the various colored stones. We will give a few colors which may be used. (1) *Blue.*—Turnbull's blue ground with pale quick-drying oil. (2) *Green.*—Pale shellac dissolved in alcohol and tinged green by dissolving verdigris in it. (3) *Yellow.*—A weak solution of alcoholic shellac can be

tinged to obtain various shades of yellow with the following: Turmeric, annatto, saffron or socotrine aloes. Dissolve any of the above in the alcoholic shellac. (4) *Red.*—Carmine dissolved in spirits of hartshorn. (5) *Garnet.*—Dragon's blood dissolved in rectified spirits of wine. (6) *Amethyst.*—Lake and Prussian blue finely ground in pale drying oil. (7) *Ruby.*—Lake ground in shellac varnish. Is used when the color turns on the purple. Bright lake ground in oil is used when the color turns on the scarlet or orange.

**QUESTION No. 2130.—Gilding Liquor.**—How can I make a gilding liquor for freshening up gold trinkets? G. L.

**ANSWER:**—A gilding liquor, suitable for dipping and freshening up gold articles, is made with alum and common salt, one ounce each; purified niter, two ounces; water, one-fourth pint. The cleaned pieces are dipped in this for just a moment, then rinsed in cold water and dried. If the gold articles remain too long in the dip, too much gold will be dissolved from the surface.

**QUESTION No. 2131.—Glue for Ivory and Leather.**—What kind of glue is suitable for mending ivory? Also give me a formula for a glue suitable for fine leather pocket books. G. I.

**ANSWER:**—A glue that is suitable for ivory and bone repairs is made by boiling isinglass in water until it is very thick, when enough zinc-white is added to make the whole of the consistency of molasses. If this is applied to the parts to be mended while warm, it will cause the glue to fill better in the fine breaks and will hold better. A glue best suited for fine leather goods is made of rye whisky, eight ounces; water, eight ounces; starch, two ounces. The whole is mixed together into a paste. Dissolve three-fourths ounce of good glue in eight ounces of water, and to this add two ounces of turpentine. Mix all together. Put in a bottle and keep for use.

**QUESTION No. 2132.—Coloring Gold Jewelry After Repairing.**—After repairing and soldering gold jewelry the pieces are very much discolored. Please give me a formula for restoring the color by dipping. C. G.

**ANSWER:**—To color gold jewelry, two coloring formulæ may be used. For the first usually a dip is made of 170 parts muriatic acid, 230 parts saltpeter, 115 parts cooking salt, 150 parts water. For the second a strong color, frosted or matt, prepare the following: 20 parts cooking salt, 30 parts concentrated muriatic acid, 10 parts nitric acid, 400 parts of water. Swilling the gold pieces in this dip will in most cases

bring out a good color. But should the coloring not be satisfactory, then it is best to go over with a soft brass wire scratch-brush, secured to the lathe, using plenty of water in which was put a little soap bark. Scratch-brush the gold very lightly until it all looks clean and even. Rinse off well, and if the color is not right then plunge into the coloring dip again.

## A Peculiar Result in Attempting to Oxidize Green Gold.

(Laboratory Experiment, described in the *Brass World*.)

**I**N attempting to oxidize a green gold deposit obtained by the electro-deposition of a gold solution containing a small quantity of silver, a peculiar phenomenon was produced. It was believed that, inasmuch as the gold deposit contained considerable silver, it would be attacked by a hot liver of sulphur solution. It was in making this experiment that the effect was noticed.

The green gold deposit itself, when plated upon brass, could not be changed in any way by immersion in a hot liver of sulphur solution, even though strong. A number of pieces were tried in this manner and it was found that one of them was colored nearly black by the liver of sulphur, while the others were not affected.

It was finally discovered, however, that the piece which was thus turned black by the liver of sulphur had been silver-plated, and over this the green gold had been deposited.

In order to confirm this result, a number of articles of brass were first silver-plated and then given a green gold deposit, and a number of others were not silver-plated, but the green gold was deposited directly on the brass. All of the pieces which had been silver-plated and then given the green gold deposit, were colored black by the liver of sulphur, but those on which the gold had been deposited directly on the brass were not in any way affected. In other words, if an article is first silver-plated and then given a green gold deposit, it will be colored by the liver of sulphur, but if placed directly on brass or copper (this was also tried) the gold is not colored.

Why this should take place is not clear. The green gold deposit that was put on was quite heavy. In fact, a deposit of half an hour was tried and the same result was obtained. The gold deposit was scratch-brushed before applying the liver of sulphur.

The color produced by the liver of sulphur is not particularly satisfactory for ornamental work, as it has a slaty shade, but these results are given more to show the peculiar results than to advocate any use for it.

There has recently been placed upon the market a substance known as glazoloid, which, it is claimed, will prevent the tarnishing of silver and gold and silver-plated ware. It is also claimed that the substance imparts a brilliant, permanent luster to combs, hair ornaments, etc. The article to be treated is first cleaned from all grease spots or other marks, and is then painted with the glazoloid by a few up and down strokes, care being taken that an even and smooth surface is obtained.

### Pottery Products of the United States in 1907.

THE total value of the pottery products of the United States in 1907, as reported to the statisticians of the United States Geological Survey, was \$30,143,474—a decrease of \$1,297,410, or 4.13 per cent. from the value in 1906. Compared with the figures for 1905, however, those for 1907 are much larger, showing a gain of \$2,224,580, or 7.97 per cent., and the value of the 1907 products is more than twice as great as that of the pottery made in 1898.

As in former years, pottery products, except earthenware and stoneware, were reported from but few States in 1907. White ware, or what is known as "general ware," was produced, as in 1906, in nine States, sanitary ware in seven States, and porcelain electric supplies in nine. Red earthenware, the commonest of the pottery products, which can be made from almost any red-brick clay, was reported from 32 States.

#### RANK OF THE STATES.

Ohio was the leading pottery producing State, with wares valued at \$13,533,193, or 44.90 per cent. of the total. This is a decrease of \$457,160, or 3.27 per cent. from the value of the wares in 1906, which was \$13,990,359, or 44.50 per cent. of the total. In 1905 the value of the Ohio wares was \$13,024,071, or 46.65 per cent. of the total. New Jersey was second in rank in 1907, with wares valued at \$6,985,626, or 23.18 per cent. of the total, as compared with a value of \$7,282,658, or 23.16 per cent. of the total, for wares produced in 1906.

West Virginia, fifth in rank in 1906, passed both New York and Pennsylvania and became third in 1907, with wares valued at \$2,159,132, or 7.16 per cent. of the total, as compared with wares valued at \$1,588,553, or 5.05 per cent. of the total, in 1906—an increase in 1907 of \$570,577, or 35.92 per cent.

New York was fourth in both 1906 and 1907, the value of the product in the latter year being \$1,934,498, a gain of \$66,151, or 3.54 per cent.

Pennsylvania, which was third in 1906, with wares valued at \$2,410,817, was fifth in 1907, the value of the wares decreasing to \$1,309,878, a loss of \$1,100,939, or 45.67 per cent.

#### GREAT POTTERY CENTERS.

The two leading pottery States—New Jersey and Ohio—produced in 1907 more than 68 per cent. of the pottery of the entire country. In New Jersey 93.32 per

cent. of the total for the State was made in Trenton; in Ohio the great pottery center is East Liverpool, but its proportion of the State's total in 1907 was much less than that of Trenton, being but 42.33 per cent. In 1906 these cities produced, respectively, 93.25 per cent. and 43.98 per cent. of the State totals. Together the two cities produced 40.63 per cent. of the value of the pottery for the whole country in 1907, Trenton contributing 21.63 per cent. and East Liverpool 19 per cent.

#### VALUE OF PRODUCTS OF DIFFERENT CLASSES.

The wares known as "C. C." "white granite," "semiporcelain," and "semi-vitreous porcelain," representing the general household wares and composing the bulk of what is known as "pottery," are from a monetary standpoint the most important pottery products of this country, their value amounting in 1907 to \$13,913,680. As compared with the value of these products in 1906, this is a decrease of \$238,823, or 1.69 per cent.; it is, however, a gain of 5.43 per cent. over the value of such wares produced in 1905. Ohio was the leading producer, reporting wares valued at \$9,419,960, or 67.70 per cent. of the whole. West Virginia stood second, with wares valued at \$1,651,732, and New Jersey, which held second place in 1906, was third in 1907, with products valued at \$1,225,691.

The most interesting of the pottery products—china, including bone china, delft, and belleck ware—showed a slight increase in value, from \$1,787,776 in 1906 to \$1,930,669 in 1907, a gain of 7.99 per cent. As in previous years, these products were reported from but four States, with New Jersey at the head and New York second. These States produce nearly all the china made in this country.

Red earthenware was reported from 32 States, with Massachusetts at the head, Pennsylvania second, and Ohio third in value of products. In 1906 Ohio stood first, Massachusetts second, and Pennsylvania third. The total value of this ware in 1907 was \$845,465, as compared with \$909,262 in 1906—a loss of \$63,797, or 7.02 per cent. As compared with the value of the products in 1905, however, the 1907 value is greater by \$64,828, or 8.30 per cent.

Stoneware and yellow and Rockingham wares were reported from 30 States in 1906 and from 29 in 1907, Montana dropping from the list. Ohio was the leading producer, reporting in 1907 wares valued at \$1,648,213, or 38.5 per cent. of the whole.

Illinois was second and Pennsylvania third in both years. The total value of these products in 1907 was \$4,280,601, a gain over the value in 1906 of 2.07 per cent.

Sanitary ware and products of the porcelain electric supply branches of the pottery industry, being used almost exclusively in construction, showed a decline in value as the result of the decrease in building operations. The output of sanitary ware in 1907 came from seven States, the value amounting to \$4,863,222.

#### IMPORTS, EXPORTS AND CONSUMPTION.

The pottery imports into the United States in 1907 were valued at \$13,585,612 and the domestic production at \$30,143,474, a total of \$43,729,086. After deducting the exports (domestic \$1,131,641 and foreign \$36,538), there appears to have been a net consumption of pottery products valued at \$42,560,907, of which the domestic production was 70.82 per cent., as against 72.26 per cent. in 1906. Although the proportion of domestic production to consumption declined slightly in 1907, its trend in previous years has been steadily upward, and it will no doubt continue to increase until the domestic potter will supply the demand for the higher grades of his wares as he now supplies that for the lower grades. The general tendency in quality of domestic pottery is undoubtedly upward, and the fact that there was a marked advance during 1907 in the production of distinctively American china augurs well for the future of the industry.

A statistical report on the clay-working industries of the United States, prepared by Jefferson Middleton, of the United States Geological Survey, has just been published by the Survey as an advance chapter from "Mineral Resources of the United States, Calendar Year 1907." Copies of this report may be obtained by applying to the Director of the Survey at Washington, D. C.

#### King Alfonso in a Hurry to Buy Jewelry.

BEFORE leaving for France after his recent visit to England, King Alfonso made a call on a well-known firm of jewelers in Regent St. After a cursory glance around the show rooms he looked at his watch and exclaimed:

"I wish to buy a few things, but am in a great hurry."

He purchased a number of sets of game bird menu holders in silver and enamel, a gold elephant charm, some handsome diamond ornaments, and other pieces of jewelry, then remarking that he had only 10 minutes in which to catch the train, suddenly swept up all the articles from the

### World Expositions in Various Lands.

#### AMERICAN EXHIBITIONS IN LONDON NEXT YEAR.

THE announcement is made that a Golden West and American Industries Exhibition is to be held at Earls Court, London, England, from May to October, inclusive, 1909. The commissioner for the United States in this enterprise is J. W. Ryckman, who may be addressed for the present at The Ansonia, 73d St. and Broadway, New York. He states in a letter to the Bureau of Manufactures:

"This exhibition will be conducted under most distinguished British and American patronage (the Lord Mayor of London heading the advisory committee, which includes also a number of American consuls in the United Kingdom). It will take place in England's most popular exposition grounds, in which the first and only distinctly American exhibition in the United Kingdom was held in 1887. That exhibition was successful in promoting an immense increase in the commerce of this country with Great Britain and Europe, and it is quite certain that the one now being organized will be of immeasurable service in bringing about a still larger participation of American manufacturers and producers in the commerce of Europe. The opportunity is timely and exceptional.

"The exhibition of any invention will not prejudice the inventor's right to apply for and obtain a British patent, provided the exhibitor gives notice to the comptroller of the British patent office of his intention to exhibit the invention, and before or with six months from the date of the opening of the exhibition applies for a patent."

#### INTERNATIONAL AND COLONIAL EXHIBITION NEXT YEAR.

Consul-General Robert J. Wynne, of London, reports that he is in receipt of a communication from Imre Kiralfy, commissioner-general of the Franco-British Exhibition, stating that it has been decided to hold in the palace and grounds at Shepherd's Bush, London, during the Summer of 1909 a great international and colonial exhibition, expressing the hope that the project will have the co-operation of the United States Government.

With a view to making the exhibition a success, the commissioner requests to be placed in communication with commercial and industrial bodies who take particular interest in exhibition matters, in order to secure an important display of exhibits from the United States.

#### INTERNATIONAL ART EXHIBITION NEXT YEAR AT MUNICH, GERMANY.

Count Von Hatzfeldt-Wildenburg, the German chargé d'affaires at Washington, transmits copies of a programme of the Tenth International Art Exhibition, to be held at Munich from June 1 to Oct. 31, 1909. The collective exhibits will be from

the various European countries and the United States, to which are admissible works of art in the different branches—painting, sculpture, architecture, engraving and art industry. First and second class gold medals will be awarded on the basis of artistic value of the works alone, without regard to distribution among states or art centers.

A limited number of the programmes printed in English may be obtained from the Bureau of Manufactures. The German chargé d'affaires, in forwarding these, writes in part:

"The Royal Bavarian Government and the Munich Artists' Association, in conjunction with the Munich Secession (school of impressionist art) will direct all their energy toward insuring as full success to this exhibition as accompanied its predecessors, and with the co-operation of foreign countries, toward making it afford a brilliant representation of international art.

"If there should be a large participation of American artistic circles in the exhibition, the German Imperial Government would have no objection to sending a special Government commissioner to represent them."

#### EXHIBITION OF INVENTIONS AND APPLIANCES AT ST. PETERSBURG, RUSSIA.

In reporting that an international exhibition of latest inventions will be held from April 21 to June 23, 1909, in St. Petersburg, in the Michael Manege, Consul James W. Ragsdale outlines the programme:

It will be organized by the Society of Military, Marine and Rural Science, which enjoys the Imperial patronage. The programme of said exhibition embraces subjects referring to military and maritime technics, to the management of estates, to ways of communication, to constructive work and to other branches of national economy, as, for instance, to new industrial and factory appliances, to electrotechnics, to novelties contributory to the comfort of the home and to improvements in fire-fighting appliances.

New inventions in the sphere of the fine arts, medicine, sport, etc., are also included in the programme. Exhibitors may benefit by free return carriage of their goods from the exhibition. Foreign exhibits will be admitted duty free on condition that they be returned abroad within two months from the closing of the exhibition. Exhibitors will be required to remove their goods within five days from the close of the exhibition.

Applications to participate in said exhibition must be presented not later than Jan. 14, 1909.

#### POSTPONEMENT OF THE INTERNATIONAL EXHIBITION AT TOKIO, JAPAN.

The State Department makes the announcement officially that the world's fair which was to have been held at Tokio in 1912 has been postponed by the Japanese until the year 1917.

L. Walker, formerly of Peoria, Ill., is now in business in Ridgway, Pa., where he has opened an attractively furnished store at 107 N. Broad St.

IMPORTED CRYSTAL  
AND POTTERY

C. J. DIERCKX, 38  
Murray St., New

York, who has recently become the sole

agent in the United States for the firm of Bayerische Krystallglasfabrik Steigerwald Ludwigsthal, N.D.B., is at present exhibiting an attractive line of Bavarian crystal, gold and enameled glass ware. Included in this display are crystal crushed fruit dishes showing a white leaf pattern against a delicate green background. Ice cream sets, some in gold and white and flashed enamel designs are also shown, together with sets of dainty glass grape washers. These offerings are enameled in attractive patterns. Mr. Dierckx has also added a line of art pottery which includes many unique styles and shapes in imitation of mahogany, rose wood and brier wood. Some of the vases are outlined with pattern designs of flowers which can be painted in by china decorators. Many of the objects shown are modeled after antique designs. The coloring and workmanship is excellent.

RICH CUT GLASS FOR  
THE HOLIDAYS

\*  
AT their ware-  
rooms, 36 Mur-  
ray St., New York, C.  
Dorflinger & Sons, Inc.,

are at present offering an attractive line of cut glass, which includes many dainty novelties suitable for the retail jeweler's stock. Vases in a number of shapes and sizes are shown in many cuttings, among which is one with a round base and long, slender stem, embellished with heavy pattern. One of the larger pieces now on exhibition is a cut glass lamp which combines beauty with utility. It is heavily built and is decorated with a most attractive pattern. The display of bonbon dishes, nappies and fruit and salad dishes is larger than ever before. Large and small cut glass serving dishes suitable for bread or cake trays are cut in attractive patterns, which include the staple star designs. Many other pieces are also prominent in this display, most of which will surely meet with the approval of jewelers seeking attractive articles for their holiday stock.

THE RAMBLER.

A. W. Harwood, Barre, Mass., contemplates moving to Athol, Mass., in the near future.

A fire was discovered early one morning, recently, in the rear of the store of the Petter Jewelry Co., Hannibal, Mo., but the prompt work of the fire department prevented the spreading of the flames to an adjoining building. The building occupied by the jewelers was damaged to the extent of \$900, and the jewelry stock was also considerably damaged. The loss is said to be fully covered by insurance.

## Mercantile Fountain Pens

Show Case supplied with 1½ dozen assortment.

bridge the gap between high priced pens and the cheap kind that are sold with misgivings. The various assortments permit a dealer to arrange his department as may be desired.

The assortments with which we furnish our attractive show cases are as follows:—

1 dozen	..	\$15.00 net
1½ "	..	29.40 "
2 "	..	35.40 "
3 "	..	56.70 "
4 "	..	65.75 "
6 "	..	102.00 "

The margin of profit on this line is very liberal, and the satisfaction resulting from use is well known. Send for complete catalogues showing styles and show cases prepared for display purposes.

## THE TEST OF SELLING ABILITY

Is a record of sales made by our firm during the past ten months given below. Year after year we present to the Jewelry Trade the strongest credential evidence of unequaled ability. Will be pleased to send our references of former triumphs covering a period of a longer partnership of Jewelry Auctioneers than ever before existed, numbering hundreds, covering every important city. In the leading twenty-five cities we have sold from two to nine engagements.

We have sold more merchandise—conducted more successful sales—than all of our competitors combined. It costs no more to secure our services than that of men with no recognized talent.

### SALES MADE DURING THE PAST 10 MONTHS:

KEIL & HETTICH, entire stock, \$75,000, eight weeks. Our ninth sale in Chicago.  
 BISKIND BROS., seven weeks. Our seventh sale in Cleveland, O.  
 The J. C. MELLICHAMP Stock, Atlanta, Ga., entire stock. Seventh sale in this city.  
 THE MIER JEWELRY CO., Aberdeen, Miss.  
 THE MYERS BROS. CO., York, Pa.  
 L. LUCKHARDT, entire stock, six weeks, over \$30,000. Johnstown, Pa.  
 W. F. KIRKPATRICK & CO., six weeks. St. Joseph, Mo.  
 W. J. EROE (formerly Hanna & Eroe). Our third sale. New Castle, Pa.

FRANK C. TAYLOR, Carlisle, Ky., entire stock.  
 R. VAN KUREN & CO. Our second sale, over \$38,000. Savannah, Ga.  
 H. F. HARRISON & CO., Sault Ste. Marie, Mich. Second sale, six weeks, midsummer.  
 CHICAGO AUCTION AND COMMISSION CO., Wabash Ave., Chicago, four weeks.  
 J. F. BALDWIN & CO., Shelbyville, Ky.  
 F. MELLUISH, entire stock, in June and part of July. Ottawa, Kan.  
 MARGILETH & McFARLAND, second sale, Springfield, Ohio.  
 C. E. MARVIN, Howell, Mich., entire stock.

### BECAUSE

Auctioneers under the most favorable conditions make a few successful sales, and from necessity are obliged to make use of the same firms' names, is not good evidence of their talent. We have made hundreds of sales, scores of them under unfavorable circumstances where others had failed—all a success by our methods. In any large stock we will sell in competition with any other firm a given number of days, leaving the selection to the employer, and if we are not chosen do not want a dollar for our services.

## INTERCHANGEABLE CHATELAIN WATCH OR LOCKET FOB

The above illustrations represent a few of our newest ideas. The Chatelaine Watch Fob and the Chatelaine Locket Fob to be worn at the belt: more secure than the old fashioned Chatelaine: does away with soiling the dress or shirt waist: safety catch on back of the Watch Fob, making the watch secure, also Washburn fastener, attaching Fob to belt.

Our Locket Fob has already proven itself to be a great seller. We predict for our Watch Fob great results. It is a winner. Write for samples. We sell the wholesale trade only.

*The Special Manufacturers for the Retail Jewelry Trade*

47 JOHN STREET, NEW YORK

57 WASHINGTON STREET, CHICAGO

The only manufacturers who make College Fraternity Pins for the trade. A complete assortment always in stock. Illustrated catalog shows the entire line with list prices. Manufacturing pins for local sororities and fraternities, a specialty. Designs cheerfully furnished.

**CROWN PLIER No. 331**

For clamping the collar of crowns on dust-proof cases while removing same from pendant. This is usually found a difficult task but easily done with the help of this plier.

Nickel plated.....each, \$ .60

**SHELDON'S PATENT HAIRSPRING COLLET REMOVER**

No need of any more distorted hairsprings or bent balances. Every watchmaker knows how troublesome it is to remove the collet without either distorting the hairspring or bending the balance; with the aid of this tool the difficulty is overcome. The tool is provided with a pair of spring fingers, curved at the ends and ground very thin and sharp. By tilting the balance the jaws may be slid under the hairspring and by pressing the jaws together it will readily loosen the collet and then by turning the central screw, which has a hole in the end to receive the staff pivot, you can force the collet from the staff, without injury to balance or hairspring. The adjustable screw nut is provided to avoid wear or injury to the jaws. A glance at the illustration will demonstrate the utility of this tool. Finely nickel plated.

**Price, each, \$1.25**

**ECHARCO WATCH GLASS CABINET No. 15 (Patented)**

Top View, Showing Skeleton Frame of Drawer. Accumulation of dust and chips is impossible.

The Most Modern Watch Glass Cases are the Echarco, Nos. 15 and 20.

These Cabinets have many new features not found in any other. Novelty and usefulness are the chief arguments in their favor.

**Construction and Material.**—The cases are made of oak, finely finished and of attractive appearance. The sides of Cabinet No. 15 are paneled. Partitions are of basswood and put together in the best manner possible.

**Partitions** are skeleton, preventing accumulation of dust, chips, etc.

**The Bottoms** of Cabinet No. 15 are hollow, while Case No. 20 has a special drawer to receive chips, dust, etc.

**Arrangement for Glasses.**—Case No. 15 has nine drawers with a total of 1,547 spaces, and Case No. 20 with four drawers has 784 spaces, to hold glasses in upright position.

**Labeling of drawers**, as shown in cut, is on the pulls of the drawers and done in gold bronze on black background.

**Dimensions and Weight of Case No. 15.**—Width, 24 inches; Height, 29½ inches; Depth, 12 inches; Weight, net, 45 lbs.; Weight, including packing case, 75 lbs.

**Dimensions and Weight of Case No. 20.**—Width, 26 inches; Height, 13¾ inches; Depth, 11¼ inches; Weight, net, 30 lbs.; Weight, including packing case, 50 lbs.

The construction of drawers, the arrangement of partitions to economize space and weight, and the novel method of showing contents on drawer-pulls are all prominent characteristics and extremely well thought of.

**Price, No. 20, Each, \$7.75**  
 " No. 15, " 16.00

**ECHARCO WATCH GLASS CABINET No. 20 (Patented)**

**SET OF 12 BEADING TOOLS, WITH INTER-CHANGEABLE HANDLES No. 50**

The rosewood handles have brass bushing so that the beading tools may be used by hand or hammer.

**Per Set, \$2.00**

**SET OF 6 CARBORUNDUM DISKS No. 100**

The variety of shapes should make this a desirable article on the bench.

**Per Set, 90c.**

# Leadership in Business

like leadership in anything else, is simply the working out of nature's law of the survival of the fittest. Show me a business that is successful and I will show you, in ninety-nine cases out of a hundred, one that deserves to be. The law of the universe constantly seeks and demands the best and casts out the useless and unfit.

If you would be successful you cannot afford to give anything less than the best that is in you, and that man is worse than a fool who undertakes to succeed by trickery, chicanery or dishonesty, for when he attempts to cheat his neighbor, or deliver less than he sells, he injures himself beyond repair. His deceit will find him out and surely tear down and destroy.

It has been our constant aim in business to deliver more than we sold. Our sun is still shining.

# How Shall a Retail Jeweler Advertise?

Read our Customers' Letters and write us for Samples of Catalogs and Particulars

STORE OF G. A. SCHLECHTER, READING, PA.  
READING, Pa., Jan. 24th, 1908.

(Extracts from letter.)

THE ARNSTINE BROS. COMPANY, Cleveland, Ohio.

Gentlemen:—Answering your letter regarding your Catalog, I would say that I was very well pleased with them, and do not see how the appearance of the book could have been improved.

Your dealings with me have been perfectly satisfactory and have given no cause for complaint.

Thanking you for past favors, I remain,

Yours very truly,

G. A. SCHLECHTER.

This firm used The Arnstine Bros. Company Catalogs in 1906 and 1907, and again placed an order for 1908.

STORE OF J. A. REULING, WYMORE, NEB.

WYMORE, Neb., Jan. 13th, 1908.

(Extracts from letter.)

THE ARNSTINE BROS. COMPANY, Cleveland, Ohio.

Dear Sirs: Replying to your favor of the 4th, regarding my opinion of the benefits from sending out your Catalogs, will say this: Owing to the financial stringency, and in order to stimulate the Christmas trade, I used several methods of advertising, among which was a premium scheme. The effect of all this advertising was beneficial—exceedingly so, considering the general business depression.

Just what per cent. of this business should be credited to the Catalogs, I am unable to state. I am convinced, however, that they are a good medium of advertising, and, if closely followed up, will prove very beneficial, and can highly recommend them. With best wishes, I am,

Yours truly,

J. A. REULING.

This firm used The Arnstine Bros. Company Catalog in 1907, and again placed an order for 1908.

STORE OF A. DOBROWSKY, REDDING, CAL.

REDDING, Cal., Jan. 9th, 1908.

THE ARNSTINE BROS. COMPANY, Cleveland, Ohio.

Gentlemen.—In regard to Catalogs, I don't really know what to think myself, as the panic naturally made things bad, but I know they brought business.

I think I could do better next year with them than I did this year. No doubt your traveler will be through here this Summer again, when I will talk it over with him.

Yours very truly,

A. DOBROWSKY.

# Real Rose Hat Pins

**This will be the largest selling article this Fall and Winter—it is already.**

So remarkable are the sales of DELAMOTHE Real Rose Hat Pins that we do not expect dealers to believe same until they have actually tried them out. It does not seem possible that during JULY this product was sold by Retailers at the rate of two to twenty dozen daily—EVERY day. The retailers' profit is unusually large. Not only are they proved big sellers, but they are a great attraction for the stores that sell them. The largest Advertising Campaign in years is behind this product. Every possible Advertising and Selling Help will be furnished Dealers gratis. This product will be sold to the best dealers only, and retail prices will be strictly maintained.

DELAMOTHE Real Rose Hat Pins are made out of live roses, changed by a secret process into metal, then finished in attractive colorings and mounted on Hat Pins. This SECRET process is a recent discovery of Prof. L. G. Delamothé, a noted French Electro-Chemist, and is *owned solely* by the Delamothé Natural Art Decorating Co., Spokane, Washington, for which this Company is the Sole Distributor. It is the ONLY process by which an OPEN Rose can be perfectly metallized. This product is made in the finest manner possible, and its high quality will be maintained. The Roses used are grown in Oregon and Washington, famous the world over for their beauty and superiority—made where these Roses grow. No two Real Rose Hat Pins are alike. Finished in five colors to conform to the prevailing fashions in millinery. Six sizes, from the smallest rosebud to the full blown flower.

**Not sold through Jobbers.**

*Do not buy inferior imitations. Sold direct only.*

**Write for Illustrated Price List**

# A Timely Suggestion

**L**AST month the Whiting Company directed attention to two of their new patterns—the “MADAM JUMEL” in Flat Ware, and the “FLORENTINE” in Toilet Ware.

These patterns, both of which have already attained a notable degree of success, are indicative of the general scope and character of the Whiting Company's recent productions in sterling silver ware.

Those Jewelers, therefore, who wish to add to their stock of silver ware suitable for the Fall and Holiday Trade will find the entire line of Whiting goods marked by the same characteristics of graceful design, admirable workmanship, and moderate prices as distinguish the “Madam Jumel” and the “Florentine.”

# “NAUTILUS”

## Special String-Pearls at a Special Low Price

SPECIAL COLOR—SPECIAL WEIGHT—SPECIAL MAKE—SPECIAL PRICE

“NAUTILUS,” the new tone tint in Fishskin Pearls  
that has set all the jewelry trade guessing

The softest, dreamy, creamy rose shade—a tint far more beautiful than many real stones. A lustre that means immediate sales to those that see them.

The “NAUTILUS” shade is of course the exclusive production of our Paris house. Another great feature of the “NAUTILUS” Pearl is its unusual weight.

We have just received an importation of 12,000 strings of “NAUTILUS” Pearls in all sizes. Because these beautiful necklaces have arrived a little late to be sent out with our regular line, we are making a special price that is remarkable for the quality.

All regular sizes, \$15 a dozen strings  
Strings with graduated sizes, \$18 a dozen

Easily retailable from \$2.50 to \$5.00 a necklace. Necklaces finished with good rolled plate clasps, \$2 per dozen strings extra.

**Ready for immediate delivery.** Let us send you a selection upon approval. You can't afford to let this opportunity pass if you want a real big leader in your holiday stock. Write at once to

# THE WILLIAM B. KERR CO.

*Specialists in Small Wares and Novelties in both  
Gold and Silver*

Three essentials of commercial success distinguish  
The William B. Kerr Company's productions:

**Admirable Workmanship.**—Every article exhibits in its smallest detail the perfection of modern silversmithing.

**Attractive Design.**—The graceful lines and refined ornamentation demanded by the best customers characterize all these productions.

**Moderate Price.**—Despite their superiority of design and workmanship, these goods are sold at thoroughly practical prices.

Office,  
NEWARK, N. J.

320 Fifth Ave., New York CORNER OF  
32ND STREET

## Individuality

In your selection of bags it behooves you to buy those bags which stand out prominently as possessing an individuality of pattern, as opposed to the common goods scattered promiscuously around. You will find that the women know and discriminate in favor of the former every time. An inspection of the W. & D. line by you will lead you right.

## The Sternau Teakettle Set.

Every housewife that enters your store would admire this Teakettle Set. She would appreciate its usefulness—would remember the many occasions when she has needed just such a set with which to prepare a quick "tea" for her family or friends.

Then when you pointed out to her its many features of superiority, showed her that the set lacks nothing, and that it is of matchless *Sternau-ware*, she will in all probability make the purchase. Made in Silver-plate, Nickel-plate or Copper.

Send for Catalogue A illustrating many articles suitable for the jewelry trade.

## The Williams Bros. Mfg. Co.—"Quality Ware"

### CARVING SET—QUEEN ELIZABETH DESIGN

The latest of our well-known "Queen" Patterns is illustrated above. While each pattern we produce is more artistic, perhaps than its predecessors, we can hardly improve the *quality*. The Queen Elizabeth may be had either in bright or French Gray—5-oz. or 12-oz. plate. Almost any article of flat ware now ready.

THE WILLIAMS BROS. MANUFACTURING COMPANY, GLASTONBURY, CONN.  
(Plant Established 1846)

# “CHIPPENDALE.”

The word “CHIPPENDALE” is synonymous with refinement, grace, strength and extreme practicability. The Chippendale pattern recently produced by this company represents the Chippendale spirit and feeling in every particular. It is without question the most beautiful line of flatware ever placed on the market.

## The Shepard Manufacturing Co.

MELROSE HIGHLANDS, MASS.

We are the leading manufacturers of high-class wares in Cloisonne French Transparent Enamels. Formerly these goods were made abroad, and the work done by hand, and the prices charged for the goods put them beyond the reach of the ordinary buyer. By our process of manufacture we are able to put on the market work that is equal in every respect, including design, finish, and the beautiful transparent effects that are obtained in the foreign productions, and at a price that is only a fraction of the cost of the imported articles. Many of our newest designs are made up from the advanced 1909 designs from Paris. The enamel fad is on in this country as well as in Europe, and we are the leaders in the line.

Our representatives are out with a full line of samples, and it would pay you to await their call, and to see our line before purchasing.

Our new Fall lines include the following:

<i>Gentlemen's Vest Buttons</i>	<i>Ladies' Dress Buttons</i>
<i>Cuff Links</i>	<i>Buckles</i>
<i>Stick Pins</i>	<i>Hair Pins</i>
<i>Bon-Bon Boxes</i>	<i>Hat Pins and Brooches</i>

They embody several of the latest creations from the celebrated French artists.

General Selling Agents:

JOHN W. SHERWOOD :: :: FRANK E. HARMER

THE STAPLE quality of Black Jewelry is well known. Every woman in mourning wears the black brooch and long black chain. They are equally in favor with the elderly. A superior line of such Black Jewelry is here introduced. Displays include the popular French Jet, as well as examples of Whitby Jet. The designs are exceptionally effective, many of them being novel for jewelry of this class. At the same time they retain the essential elements of dignity and taste. Jet Brooch designs include: HORSESHOES, BUTTERFLIES, PANSIES, FLEUR-DE-LIS, BAR EFFECTS. They retail at from \$1.00 to \$5.00. A profitable staple needs no argument.

**“Krementz-Bodkin Back”**  
**STUD and VEST BUTTON**

Pat. Feb. 16, 1904

“Not One-Piece but One-Piece Construction.”

The simplest and best mechanical Stud or Vest Button made.

KREMENTZ & CO. invite the following comparisons (or any others that you can think of):

**CONSTRUCTION.**

The “KREMENTZ” Bodkin Stud and Vest Button

1. Is absolutely solderless
2. Is made of solid, hard spring metal throughout
3. Has no spring or tubing to bend or break

**QUALITY**

The highest grade of mother-of-pearl, half pearls, whole pearls, diamonds, sapphires or whatever material is used.

**FINISH**

The regular “KREMENTZ” finish which has helped very materially in the building up of our business.

**OPERATION**

Very simple. Easily inserted or removed without fear of bending the post or marring the shirt or vest.

**PRICES**

Lower than those of any other makers.

**DURABILITY**

See our guarantee.

**GUARANTEE**

If for any cause whatever, a “Krementz-Bodkin Back” Stud or Vest Button should be damaged either in the hands of the dealer or wearer, a new one will be given in exchange, without charge. “Krementz-Bodkin Back” Studs and Vest Buttons are made in large variety of patterns in 14-kt. gold and platinum, set with pearls and diamonds.

# THE RING THAT MADE HISTORY

**T**HE SIGNET RING was the sign manual of kings. It made history. It is surrounded by a wealth of tradition. It is the most personal of rings. Durand Signet Rings measure up to the high ideal of what such rings should be. An extensive line, full of distinctiveness, character and beauty.

PRICES: \$3.00 to \$200.00

DURAND & CO.

49-51 FRANKLIN STREET  
NEWARK, N. J.

## Telling Points in Scarf Pins

THE DIFFERENCE in Scarf Pins is like the difference in men. Some like effects that are extreme, loud and grotesque. Others prefer the quiet appeal of intrinsic worth, the grace of refinement. It is to the latter class that the Scarf Pins of this house are specially attractive.

Not that they are costly. Quite the contrary. A variety of semi-precious stones is used to great advantage. Thus good dressers buy a number of these Pins to vary with scarf and attire. The designs are really beautiful. A pleasure to see; a pleasure to buy; a pleasure to sell; a pleasure to wear. Profitable.

# OFFICIAL ELK EMBLEMS

The following is taken from Official Circular No. 1, issued by Hon. R. H. Holland, Grand Exalted Ruler of the Elks:

NAME AND EMBLEM.

The Commission on Protection of Name and Emblem submitted an exhaustive report which will be printed in full in the proceedings of the Grand Lodge. This commission also reported to the Grand Lodge a design which was unanimously adopted as the Official Emblem of the Order and the commission was instructed to have the same fully protected by Letter Patent. Unfortunately the description of the emblem has appeared in the public prints from which cuts have been designed and printed purporting to be the genuine. Manufacturing jewelers in utter disregard of our rights are flooding the market with a so-called Official Emblem. I therefore deem it my duty as Grand Exalted Ruler to denounce this unwarranted interference with our rights and to call upon every brother to REFUSE TO PURCHASE OR TO WEAR THESE SO-CALLED OFFICIAL EMBLEMS. The commission is actively at work and as soon as these complications are adjusted or rights protected and permission granted to manufacture and place the genuine official emblem on the market, the order will be advised by official circular.

# Mr. Jeweler:

Do you know that hundreds of your competitors in all parts of the country are making a specialty of Fans? Do you know that even a small line of Fans, properly displayed, will "dress up" the whole appearance of your stock? Of course, the Fans themselves must be suitable for jewelers, and must be bought from one who thoroughly understands the requirements of your trade. There is but one such house in America—

# "New Process" GILLETTE Blades

## Have You Got Them in Stock?

"New Process" GILLETTE blades have been an instantaneous success.

They differ in price, quality, appearance and style of package from the previous kind, and the public is being notified of the change by full-page advertisements in all the leading magazines.

More than two million GILLETTE users will now accept only "New Process" GILLETTE blades. If you have them in stock before other dealers in your locality you will get the business, and at the new price your profit is a very liberal one.

"New Process" blades are manufactured by newly-invented machines and processes, making them superior in appearance, operation and endurance to any blades ever produced by anyone.

These machines are automatically regulated, and grind, hone and sharpen each blade individually with the utmost precision.

Every cutting edge is perfect, and possesses a degree of keenness not produced by any other process.

"New Process" blades are finished with a high polish that renders them easy to

clean. Since dust and moisture do not cling readily to a polished surface, these blades are practically immune from rust.

"New Process" blades are packed in a handsome nickel-plated box which seals itself hermetically every time it is closed. This shuts out all dampness and effectively protects the blades from rust in any climate, land or sea. When empty, the box forms an attractive waterproof match safe.

**The set now contains twelve blades.**

**The Retail Price is \$1.00 per set.**  
Twelve sets are packed in a carton.

To those who are not handling the GILLETTE, we suggest, "Get Busy." Get the sales resulting from our huge advertising campaign—the increased business and profits that the co-operation of our Sales Department will bring you.

YOUR customers are continually seeing GILLETTE advertisements and they want the razor. Eventually they buy it somewhere.

**WHY NOT OF YOU?**

Write us for catalog and liberal discounts to dealers.

**Holiday goods now ready for dealers. Send for catalog.**

## WENZEL JAMNITZER AND HIS WORK.

The 400th Anniversary of Birth of Germany's Foremost Goldsmith—A Few Words on His Life and Some of His Notable Productions.

AMONG the many men eminent in the fields of science, art and industry whose natal anniversaries occur during the present year, workers in precious metals will be especially interested in the fourth centenary anniversary of the birth of Wenzel Jamnitzer, whose portrait we present herewith, and whose standing as a master in his craft is imperishably established in the existing specimens of his work, some of which we also illustrate.

In forming an impartial, exhaustive judg-

WENZEL JAMNITZER.

ment of the merits of an artist's productions we must primarily possess a knowledge of the chief events of his life, and of the peculiarities of his work; also as to whether his productions are of interest only from a historical point of view, or whether, in their most important parts, they unmistakably display, in connection with their purely artistic and enduring character, such features, often fortuitous, as are related to transient motives or technique, and which, at the present time, may not be practiced. In the work of Wenzel Jamnitzer, Germany's most famous goldsmith, the 400th anniversary of whose birth occurs this year, all these characteristics are encountered.

That which we have so far learned with certainty in regard to Jamnitzer is as follows: We know how he looked, at least in his later years (see the accompanying portrait, made from a plaster cast in 1568, as a wax high-relief of Jamnitzer). Furthermore, the date of his birth and the exact day of his death are on record, as well as the dates of certain other events in his life. The chief source of information regarding these are "Nachrichten von Künstlern und Werkleuten Daselbst," by

Johann Neudörfer, the famous recorder and accountant of Nuremberg (1497-1563), published in 1547. Neudörfer was personally acquainted with Jamnitzer. For the sake of their originality we give Neudörfer's records, as far as they relate to Wenzel and his brother, Albrecht Jamnitzer, in their naive, quaint language, in so far as it can be preserved in translation, as follows: "No. 38. Wenzel and Albrecht, the Jamnitzer Brothers, Goldsmiths.

"It might be said, that as these two brothers are my friends, I have been too easy in praising them, for this reason I will allow the honorable Council, my esteemed masters, and all other artists who have seen their work daily, to judge, so that I may not be accused of partiality. . . . The first thing that pleased me most in connection with them both, is that they have brought their father and mother from Vienna, so that they might honor them and do all the good possible for them, for which reason also God has endowed their sons with art and favor. These two brothers, in devising art and in the distribution of their finished work, are as one; one does not advance his own at the expense of the other, much less conceal the least or the greatest from one another. They work both in silver and gold, have a wonderful knowledge of perspective and proportions, engrave

both arms and seals in silver, stone and iron. They melt the finest colors in glass and have attained a high degree of perfection in silver etching; what they are capable of casting in little animals, reptiles, plants and bouquets and

JAMNITZER'S COAT OF ARMS.

the silver vessels they decorate with these, has never before been accomplished. They have presented me with a whole bouquet in silver, with all sorts of flowers and foliage cast, the leaves and plants being so delicate and thin, that by blowing on them they may be

(Pat. Dec. 18, 1900, and Feb. 5, 1901.)  
(Sectional View of the Larter Shirt Stud.)

## MANY YEARS AGO

The jewelry trade discarded spiral shirt studs because of the time and trouble required to insert them in the shirt, and the backs working out of position often caused the loss of a valuable stud.

The same old trouble is found with all shirt studs made with a back that has to be pushed or pulled into place.

**AUTOMATIC ACTION** is the only appliance that can overcome this trouble.

Larter Shirt Studs and Larter Vest Buttons have a strong spring coiled inside the piston which makes them **AUTOMATIC in ACTION** and when placed in the eyelet-hole or button-hole they lock themselves and cannot fall out.

Each is made in patterns to please all tastes and for all occasions.

made to sway. But for all this they give God alone the glory."

Wenzel Jamnitzer was born in 1508 in Vienna (not in Nurnberg, as formerly asserted). In 1534 he was made "Master" in Nurnberg, and in 1556 was elected nominee for the Supreme Council, and in 1574 became a member of that body. Jamnitzer's home was on the "Zisselgass." From other sources it is learned that he employed—sometimes, at least—many journeymen and apprentices, or work people. Jamnitzer was therefore undoubtedly a well-to-do, if not a rich, man. The fact alone that he was goldsmith for four emperors—Charles V., Ferdinand I., Maximilian II. and Rudolph II. (from 1519 until the date of his decease, 1585), his membership in the council, his business relations, among others with arch-dukes and other powerful people—all these circumstances, as well as his last will and testament, establish this fact.

Dating from the 17th century is extant a portrait representing a lady of Nuremberg with the inscription, "Anna Wenzel Jamnitzerin, aetat 54 (aged 54). Undoubtedly this relates to the wife of the master.

Quite surprising and exceedingly interesting discoveries in relation to Jamnitzer, were made through the latest investigations which are associated with three names: Ernst Mummenhoff, David v. Schoenherr, and, above all, Max Frankenburger. First of all, Schönherr has secured authentic information to the effect that Wenzel Jamnitzer was descended from an old, highly respected and very wealthy family of goldsmiths. The Jamnitzer family can be traced to the middle of the 15th century; the original seat of the family was Vienna, Neustadt. Already in 1450 the Jamnitzers displayed the same arms as did later Wenzel—the lion's head, front, in the shield, two buffalo horns, with the lion's head between them as a crest.

As the patriarch of the family, we find in 1430 "Hans von Jemnitz," with his wife, Dorothea, probably a cloth fuller, who owned his own residence in the German nobility quarter in Vienna. The son of this Hans "Leonhard Jemnitzer," authentically the first goldsmith in the family, was a member of the city council in 1450, '51, '53, '54, '56, '57 and '59, received in 1447 a present of a house in Vienna, from the Emperor Frederic, and in 1451 accompanied this monarch on his coronation journey to Rome. Gradually he acquired five houses in Vienna Neustadt, and other valuable possessions. Of these he gave the "Ramhof" in 1448 to his son Veit. Concerning the latter, unfortunately, nothing of an historical character has been ascertained.

In addition to this line—Hans, Leonhard and Veit—there appears to be a second, authentically, in Vienna Neustadt: Caspar Jamnitzer, father and son. The first is recorded as a goldsmith and citizen, with his wife, Wandula, in 1446. In 1450 Wandula was a widow. Of Caspar, Jr., the first record is in 1464—in this year a house was transferred to him by his cousin, Leonhard Jamnitzer—and the last in 1468. The founder of these two lines were evidently brothers. From which line Wenzel Jamnitzer was descended remains to be authentically determined.

His father was named Hans Jamnitzer,

his mother Elizabeth, so at least the names of the register of deaths in St. Sebald reads in 1549. (As above stated, the son had taken the parents home to him in Nuremberg). The father had also been a goldsmith.

The origin of the family generally may be traced to a village of Jennitz. A place of this name is known to exist in Moravia, and a second in the Pilsen district, Bohemia. Here, too, further investigations are necessary, whereby the style of spelling "Jamnitzer" would doubtless be justified. Thus had the master styled himself in letters in his later years, and in the title of a work on geometry; thus he is also styled in his epitaph. In addition, however, we find such names as Jamitzer, Jamicz, Gamitzer, Gemitzer, Jomitzer; also the first name spelled sometimes with "z," sometimes with "tz." Those who know the arbitrariness with which in the 15th and 16th centuries orthography and names were treated will not be astonished at these differences in spelling.

Wenzel Jamnitzer died on December 15, 1585, and was buried on December 19. In the death register of the Sebald parish the entry is made in red ink, a distinction accorded to prominent persons, as follows: "The honorable and wise Mr. Wenzel Jamnitzer, goldsmith to the Roman Emperor, of the Zisselgass."

The Frenchman, Malpé, styles the master "the Janissary," and maintains that he was on one occasion in Constantinople, "to work there." That is very improbable. Very likely the French pronunciation of the name Jamnitzer by the uncritical French writer led to the suggestion of the tale in regard to the sojourn of the artist in Turkey.

Wenzel Jamnitzer was married at St. Sebald, in Munich, to Anna Braunreuchin (died April 6, 1575). Neudoerfer (see above) speaks only of "the little sons" of Wenzel Jamnitzer, and for a long time this statement was doubted, or else it was supposed that the two sons of Jamnitzer had died young. Then v. Schoenherr found, in a letter written by Jamnitzer to the Archduke Ferdinand on July 21, 1838, the statement that a piece of work entrusted to him had been delayed in execution, because he had sent his oldest son, on account of work, to the Duke of Ferrara, in Italy. Through investigations made by Frankenburger we now learn that the name of this oldest son was Caspar.

Altogether, however, Master Wenzel had 11 children: Caspar (born 1535), Walthasar (born 1536), Anna (born 1540), Susanna (born 1542), Hesta (born 1544), Maria (born 1545), Wenzeslaus (born 1548), Elizabeth (born 1550), Abraham (born 1555), Daniel (born 1557) and Hans, the year of whose birth is not known. The latter was the source of much solicitude to his father, as shown by the very interesting last will and testament of Jamnitzer, published by Von Mummenhoff and dated Aug. 12, 1584. The father had, in the meantime, become reconciled to the dissipated Hans, and stipulated that the latter should be charged only 100 florins against this legacy, on account of his father's expenditures, on his behalf. (Hans Jamnitzer died in 1603.)

On July 22, 1544, Albrecht, Wenzel's

brother, married Sibilla Hertzin; they had seven children, and suffered financial reverses; April 1, 1555, on account of his debts, Albrecht decamped from Nuremberg, and in the same year he died. Master Wenzel's daughter, Susanna, married, in 1561, the goldsmith, Martin Holwek. Wenzel's son Hans married Susanna Wagner in 1562 and became a master in 1563.

Wenzel's daughter Anna married goldsmith Hans Straub, and the daughter Maria, the same year, married "artist" Valentin Maler, who, on account of the capability of his father-in-law, against the protest of the

he always came out of the various disputes and lawsuits with honor. With competitors and work-people, too, at that time, there were serious annoyances. Wenzel was even robbed by them several times. At one time he was interrogated, as an expert, concerning the nominal worthlessness of the masterpiece of a goldsmith's apprentice, and on his decision the mastership was withheld and the applicant compelled to present the masterpiece within half a year of better execution.

The correspondence between Archduke Ferdinand and Jamnitzer, as revealed in the Innsbruck town council's archives, gives us a deep insight into the condition of the goldsmith's trade in the 16th century, as to the manner in which the leading men behaved, even toward the foremost men in the craft, like Jamnitzer; how they pressed for the execution of the most expensive work, and how often they failed in the most important points—the furnishing of the requisite precious metal or the payment of the stipulated fees and advances in money. We find here, in the case of Wenzel Jamnitzer, the same lamentable experience with the nobles as is described in the autobiography of his famous Italian colleague, Benvenuto Cellini.

About 20 specimens of goldsmith work and several astronomical or astrological devices have so far been recognized as of Wenzel Jamnitzer's make, but there may be more works of art of the same origin. As Wenzel Jamnitzer's mark or sign he adopted the lion's head from his coat-of-arms, as is proved beyond doubt, often with a "W" set above or beside it.

The most famous specimens of Jamnitzer's work are the jewelry casket in the Green Vault in Dresden and the Merkel centerpiece, in the possession of Baron von Rothschild, in Paris. Our front cover shows a photograph of the jewelry casket, while the interior of the lid is illustrated on page 63. On page 73 of the anniversary number of THE CIRCULAR-WEEKLY, Feb. 5, 1908, will be found two illustrations of the centerpiece, one showing the general appearance of the magnificent piece, the other the centerpiece in sections, demonstrating the details of its construction, in which also the separate portions at the foot, the head of the figure, etc., can be seen.

(To be continued.)

E. W. Parno was recently appointed mayor at Greene, Ia. Mr. Parno has been engaged in the retail jewelry business at that place for several years.

DOUBLE NAUTILUS'S CUP IN THE ROYAL TREASURY, MUNICH.

sworn guild, was made a master by order of the council.

Wenzel Jamnitzer's life was, however, not free from sad incidents. Thus in 1570 his daughters Elizabeth and Barbara (both unmarried) died; in 1572 his son Wenzeslaus died abroad, and, as already stated, his wife died in 1575.

On Oct. 28, 1580, Abraham Jamnitzer married Catherine Kirchberger, who bore him four children. According to a council note, made in 1587, this Catherine is said to have run away from her husband, after conducting herself criminally with one Dr. Maier. Concerning Valentin Maler and his descendants, we are unable, owing to lack of space, to go into details. We can only state that the master, in addition to marked successors, encountered many misfortunes, especially of a financial character, but that

## Annual Report on the Production of Precious Stones.

Text of the United States Geological Survey's Advance Pamphlet on Gems and Gem Minerals for 1907, compiled by Douglas B. Sterrett.

(Continued from issue of Oct. 14.)

### SAPPHIRE (Continued).

**American Sapphire Co.**—Through the courtesy of John T. Morrow and C. H. Burr, consulting and attendant engineers for the American Sapphire Co., the writer was shown through the plant of that company and was assisted in the preparation of the following notes. The plant of the American Sapphire Co., operating on the same gem-bearing dike as the New Mine Sapphire Syndicate, is located in the canyon of Yogo Creek. The early work by former owners on this portion of the sapphire-bearing dike consisted of shafts and openings on the east side of the canyon. Some of these were near the edge of the bench land above, and others in the canyon walls. Prospects and shafts were also made across Yogo Canyon and along a tributary gulch to the west. Three different dikes are reported to have been located. One of these, in the bottom of the tributary canyon, was opened several years ago by a shaft about 100 feet deep, and good sapphire ore was found.

The mining of the dike rock by the present company is accomplished by drifts with stopes under the cliff on the east side of the canyon and a shaft at the mouth of the drift a little above the bottom of the canyon. This shaft was about 70 feet deep in September, 1907, and in pay ore. It was reported that the depth was about 100 feet early in 1908, and that the shaft was equipped with an electrical hoist capable of sinking to 1,000 feet. The level of the workings in the canyon is about 265 feet below the mouth of the old shaft on the cliff. The main drift has been carried to the east nearly 500 feet, with many hundred feet of levels and stopes above. The dike is somewhat irregular in shape and contains alternate rich and barren portions. The latter seem to be due, in places, to abundant inclusions of limestone, while in other places the dike pinches around projecting portions of the limestone walls. The outcrop of the dike in the foot of the canyon wall was not at first located, since it was rather indefinite and was partly covered with large blocks of talus. A crosscut tunnel was driven from the north side until the dike was located, and from this the main drift was carried eastward on the one side, and the dike traced to its outcrop in the canyon wall on the other. A large body of pay rock, apparently over 45 feet wide, was located by the crosscut and drift. Though the relation of this ore body to the dike was not definitely known at the time of the writer's visit, it seemed to cut across the regular dike with a dip of about 40° to the east. No definite hanging wall had been located, though the pay streak was about 12 feet thick from the foot wall. This body of ore had been brecciated and the broken masses squeezed into slickensided lenses.

The mine is equipped with a track running to the mill near by. The track is protected between these points by a shed, in order that severe weather may not interfere with operations. The ore is handled in steel dump cars of improved pattern.

The method of treating the sapphire ore is quite different from that used by the New Mine Sapphire Syndicate, the ore receiving special mill treatment soon after mining. It has been found that over 50 per cent. of the ore removed by blasting is fine enough for milling without disintegration by weathering. The ore direct from the mine, after passing through four-inch grizzlies, is digested with water in heavy revolving screens. The latter discharge three classes of material, the fines or slimes, which are immediately discarded, the oversize or material still in lumps, which is saved for further treatment, and the digested matter ready for sizing and concentration. The lump material is left in stock piles to weather for a period of several months, by which time it is readily digested in the revolving screens and concentrated. After sizing, the digested material is concentrated on Woodbury jigs arranged to treat three sizes, three-fourth and three-eighth inch and six-mesh. Two jigs are run in series for safety. These jigs are handling about 75 tons in a day of seven and one-half hours at the time of the visit, though from 200 to 225 tons could be treated in 24 hours.

The concentrates from the jigs, in rare cases,

run as high as 30 per cent. sapphire, five to 10 per cent. being more common. The concentrates containing the watch-jewel sizes, or culls, are treated on a Blake-Morscher electrostatic concentrator and their grade brought up to between 50 and 90 per cent. sapphire. The final cleaning, as with the larger sizes suitable for cutting, is accomplished by hand picking. In filling hurry orders this cleaner is of value, since it enables a large quantity of sapphire to be selected much more quickly than could be done by hand alone. On the other hand, part of the sapphire goes over with the tailings, which require more labor to pick over than the original concentrates.

The operations of the American Sapphire Co. have not yet reached the capacity of the plant, since much time has been consumed in perfecting the method of concentration in use and in exploratory work in the mine. The production of sapphires suitable for cutting amounted to over 100,000 carats between April and December of 1907. In addition, several thousands ounces of culls for watch jewels, hearings and instruments of precision, were obtained at the same time.

**Variegated Sapphire Co.**—The auriferous placer sapphire deposits on Dry Cottonwood Creek, 16 miles N. 70° E. of Anaconda, were exploited with a dredge during 1907 by the Variegated Sapphire Co. under the management of William Dodd. The deposits are located at an elevation of over 6,000 feet, nearly 1,500 feet above the valley of Deer-lodge River, to which Dry Cottonwood Creek is tributary. The company owns some two miles of gulch land with beds of gravel 40 to 100 feet wide and from 10 to 14 feet thick. The gravels in some of the gulches to the side of the company's land and in the flats below are also reported as carrying sapphires.

The country rock in the region around the mine is a quartz porphyry, in places nearly a biotite granite. This porphyry is rather fine grained and composed of quartz and feldspar phenocrysts, with biotite laths and crystals in a ground mass. The quartz occurs in clear, glassy crystals and rounded grains, some of them fractured, thickly scattered through the rock. The feldspar, chiefly a plagioclase, has largely decomposed to kaolin in the surface rock examined. This kaolinization has taken place both within the crystals, on their exterior, and in the ground mass. The biotite also seems to have been partially hydrated, and in thin section under the microscope has a low birefringence and a strong dark-green to brownish-black pleochroism.

The source of the sapphires is not known. Mr. Dodd reports their occurrence farther up the gulch than the part examined, in a rock like the porphyry described above. The gravels in the gulch consist chiefly of blocks of porphyry, some of them rounded into cobbles, others flat and slab-like with but partially rounded corners. The overburden or top of the deposit, consisting chiefly of black mud with but little gravel through it, is three to four feet thick.

The dredge used by the company is of the hucket type, and has a capacity of 750 cubic yards in 24 hours. It is operated by a steam engine, and has a dynamo for its electric light equipment. The material from the dredge buckets goes to a revolving screen from which everything over one inch in diameter is separated and turned into the pond under water at the back of the dredge, while everything under one inch in diameter is run over 56 feet of riffles. The debris from the sluice and the riffles is piled on the coarse material at the back of the dredge. In this way a dam is built which retains the water in the pond on which the dredge floats. By excavating before and constructing a dam behind, the dredge will be worked up the gulch. The grade of the gulch is not light, and the flow of the creek during the Summer is quite small. The dredge cuts a square face in the gravels across the gulch. The overburden is first removed for a width of six feet upstream, being run directly through the dredge without washing. Mercury is placed in the riffles to catch gold, and clean-ups are made weekly. The sapphire concentrates are washed from the sluices of the dredge into a bin and are later sieved and panned down.

The gold recovered from concentrates is mostly fine, though nuggets worth several dollars have been reported. It is said the value of the gold

obtained is sufficient to pay operating expenses. The larger part of the sapphire, either on account of small size or poor color, is suitable for mechanical purposes only, as watch and meter bearings. Some of the sapphires are suitable in size, quality and color for cutting as gems. The predominant colors of the Dry Cottonwood sapphires are deep and light aquamarine and pale yellowish green. Other colors are clear and smoky blue, light and dark topaz yellow, straw yellow, yellowish green like olivine, light and dark pink; some stones are nearly ruby red, lilac and pale amethystine, and some are colorless. The pleochroism of some of the sapphires is marked, the same crystal appearing greenish when viewed across the prism and blue through its length, or pale and deeper pink, as the case might be. It is not unusual to find aquamarine-colored stones with a pink spot in the center. This combination furnishes an attractive gem when cut. A feature of the deep pink colored sapphires is their rich and beautiful color under artificial light, even when not very attractive in natural light.

The sapphires occur in rough crystals, often with curved faces, as irregular rounded masses, and as waterworn pebbles. The surfaces of those which are not waterworn are very much etched and corroded. One yellowish-green sapphire crystal, weighing a little over 4½ carats, had very much the shape of a rough diamond crystal. This effect is largely due to the fact that the development of the basal and rhombohedral faces produced a form resembling an octahedron. This apparent octohedral form along with marked curvature of the faces and peculiar etching produces the effect described. The proportion of waterworn sapphires is not large, and only a few show a large amount of wear. A few red and cinnamon-red garnets, mostly small, are found in the concentrates with the sapphires.

**American Gem Mining Syndicate.**—The operations of the American Gem Mining Syndicate for sapphires were confined to two gulches on the north side of the West Fork of Rock Creek, in Granite County, about 15 miles southwest of Phillipsburg. These gulches are nearly a mile apart and are known as Anaconda Gulch on the west and Meyer Gulch on the east. Both drain to the south, Anaconda Gulch with a rather steep grade cutting through a small stretch of flat country along part of its course. Sapphires are said to have been found in the gulches and scattered over the surface of an area of about two square miles in this region.

The country rock around the sapphire deposits consists of coarse and fine grain porphyry, porphyritic tuff, conglomerate, quartzite, siliceous slate, and black limestone, the geological relations of which have not been worked out. In and near Anaconda Gulch the rocks underlying parts of the sapphire deposits are conglomerate, porphyritic tuff resembling conglomerate where the inclusions are plentiful, and porphyry. The bed rock in the lower part of Meyer Gulch is a dense, siliceous slaty rock of purplish color with a little black limestone. To the west of the sapphire-bearing deposits on the flats near Anaconda Gulch is rather coarse porphyry, probably granite porphyry, and to the north is fine porphyry. Ledges of tuff or conglomerate outcrop at one place on the flats where sapphires have been worked, and the gravels over part of the flats contain angular to subangular debris of porphyry, tuff and conglomerate.

The porphyritic tuff is composed of feldspar and glassy quartz phenocrysts in a fine slate-gray matrix with inclusions of quartzite and other material. The inclusions observed range from an inch or two down in size, and the phenocrysts average about one-sixteenth of an inch across. The conglomerate at the sapphire deposits is composed of pebbles of quartz, red, brown and gray sandstone and quartzite, gray and black chert, and a serpentine-like material, with a siliceous cement, the whole containing decomposed feldspar fragments throughout. The pebbles range in size from about two inches down. About a mile to the east of the mine is a bed of very coarse conglomerate forming cliffs 60 to 70 feet high along the north side of the West Fork. The pebbles of this conglomerate are composed of sandstone, quartzite, siliceous slate and chert, with a compact, hard, red, jaspery matrix. These pebbles are well rounded and range in size up to 10 and 12 inches in diameter. While a number of them are very similar to those of the finer conglomerate at the sapphire mine, the frequent quartz pebbles of the latter seem to be lacking. There are pebbles and fragments of light-yellowish and greenish-gray to green serpentine-like mineral included in the coarse conglomerate to the east of and in the

DIAMONDS

conglomerate and tuff at the sapphire mine. Large blocks of apparently the same material were found on the flats at the mine. The latter consisted of a fine-grained greenish-gray matrix with translucent dark-green blocks, resembling crystal fragments, included in it. Both the matrix and the inclusions were soft and like serpentine. In thin section the greenish inclusions were seen to be very fragmentary with a light, porous, kaolin-like looking material between the fragments. The latter were composed of many small, doubly refracting particles and fibers extinguishing at all angles.

The gravels in Anaconda Gulch vary from 30 to 100 feet in width and from a few inches to eight or 10 feet in thickness. At the bends and in some of the hollows along the gulch gravel bars extend up the hillsides short distances. On portions of the flats along the gulch gravel beds occur, and good deposits of sapphire are reported to exist in channels leading to the gulch. At one place on the flats the gravels, and probably also the decayed tuff or conglomerate, have been washed for sapphires over an area of a number of feet square. The gravels in Meyer Gulch are from 30 to 40 feet wide in the lower part and from 100 to 200 feet wide farther up the gulch. In thickness they vary from a foot or two up to eight or 10 feet, and are probably as much as five feet thick over a large portion of the area.

The gravels in both Anaconda and Meyer gulches are sluiced down with small hydraulics. The first part of the sluice is over bed rock and from this portion the boulders and coarse debris are forked out. The finer material is then washed down through board sluices over cross riffles. The latter are removed and cleaned up each day. In Meyer Gulch the tailings from the riffles are carried through several hundred yards of wooden sluice to remove the waste from the gulch near the workings. This sluice has riffles with bars parallel to its length, largely to protect the boards of which it is constructed, though partly to catch sapphires that have washed over the cross riffles. The parallel riffles are cleaned up at wide intervals of time. All of the concentrates are further cleaned on a jig operated by a small water wheel. The concentrates from the jig are oven-dried and shipped for picking. Gold is also saved from the concentrates. The tailings from the jigs contain rutile in elongated, much water-worn pebbles, scaly hematite in quartz, garnet, corundum, pyrite, manganese ore, siliceous iron pebbles, and other minerals.

The sapphires from the Rock Creek region are principally used for mechanical purposes, though some are of good color and quality and of sufficient size to be cut as gem stones. The prevailing color is some shade of green, as the yellowish and bluish green of beryl and aquamarine. Blue, yellow, purple, pink and red sapphires are found, however. The greater part of the sapphires are shipped to Switzerland, where they are cut for use as watch jewels and for other bearings.

#### COLORADO.

C. A. Beghtol reports the discovery of sapphire in the matrix in Fremont County, Colo., by a prospector named Weston. The latter would not reveal the locality.

#### INDIA.

*Kashmir.*—The production of sapphire during 1906 from the Kashmir mines<sup>1</sup> amounted to 2,837 carats, valued at £1,327.

*Burma.*—In the operations of the Burma Ruby Mines Co. during the year closing with Feb. 28, 1907, sapphires valued at £1,132 was produced.<sup>2</sup> The quantity of sapphire produced is not given separately, but is combined with that of spinel and ruby, the total of which amounted to 326,855 carats.

#### CEYLON.

A blue sapphire weighing 466 carats after cutting and polishing is reported to have been found in Ceylon during 1907.<sup>3</sup> If the report is true, this is the largest blue sapphire on record, and if the stone is of good color and free from flaws it should be worth several thousand dollars.

#### AUSTRALIA.

*Queensland.*—The value of the sapphire production of the Anakie field during 1907 is given at about £40,100,<sup>4</sup> as compared with £18,000 in 1906. The miners sell their sapphires to resident dealers,<sup>4</sup> who in turn ship them to merchants in

Europe. Probably 75 per cent. of the stones go to Germany. The average price per ounce paid for sapphires during the last five years has been approximately as follows: 1903 and 1904, 15 shillings; 1905, 15 shillings to £1; 1906 and 1907, £1 4s. The sapphires are graded into three classes—first class blue, second class blue, and "machine stones," named in order of their value. The use made of the "machine stones" is not definitely known, though it is supposed they are applied in mechanical apparatus.

(To be continued.)

## REIGNING PARIS FASHIONS.

### LATEST FADS IN JEWELRY, BAGS AND DECORATIONS SEEN IN FRANCE'S CAPITAL.

PARIS, Oct. 12.—There is a craze for antique medals, locket and brooches intended to contain the photograph or miniature of the loved one, and which is jealously guarded from the curiosity of friends because of a secret spring, which can be opened only by the person wearing the ornament. They are engraved with mystic characters significant of some tender sentiment and of quaint shape and design into which the mystic scarab sometimes enters.

A unique ornament for the neck simulates a lace collar of turn-down old time fashion, composed of delicate openwork platinum studded with hundreds of tiny diamonds with larger ones punctuating the joining of the network, and finished with a jabot of the same light character. It is especially adapted to ladies whose throats are too fleshy to look well in the high and tight *collier de chien*, and is a most expensive ornament.

For the toilet table are large powder boxes of silver-gilt with an ivory top artistically sculptured and rimmed with amethysts.

A fine clock in imitation of an antique is in the shape of a Grecian temple of Napoleon blue enamel, sown with golden stars. The pillars of gilt are wreathed with silver garlands, and the whole stands upon a base of lapis lazuli with claw feet. The dial is replaced by a tiny watch, diamond-rimmed and pendant from swinging golden chains.

A *pendentif* which is very unique is set with rose and green tourmaline and baroque pearls. A baroque pearl of immense size is basket shaped, has a gold handle and is gem incrustated and utilized as a pendant.

A becoming necklace falls low on the breast and is made of a network of fine gold wire threaded with small diamonds and punctuated with turquoises the size of a pea.

Luxury runs rampant in Paris, as women are wearing on their low-cut shoes enormous buckles, some of gold or silver in *l'Art Nouveau* style, while others are set with semi-precious stones. These make a fitting pendant to the heel bracelet I spoke of in a previous article.

Garter clasps, both for round and side garters attached to the corset, are often very expensive, and are made of *repoussé* gold or delicately etched with monogram, often relieved by tiny diamonds or other precious stones. Even corset clasps and the hook for the front are sometimes made of gold or silver.

The belt buckle is less exploited than formerly, as almost all bodices have belts of their own, and with the corselet no clasps or buckles are necessary. However, with the lingerie waist worn with the sep-

arate skirt, some sort of buckle is imperative. Very neat and elegant are the big square designs in enamel which are made in all of the fashionable shades to match any colored toilette. White enamel is a favorite, as it looks well with anything. I saw a very handsome buckle on the Rue de la Paix, which was rather oblong than square, and showed a gold wrought plaque on one side and on the other an exquisite bit of carved ivory in the form of a feminine figure, with graceful swirling drapery.

A bracelet about an inch wide was made of the fine platinum wire in almost infinitesimally small links, while on the surface was a pattern of lozenges in reddish gold set at intervals with sapphires. And speaking of bracelets reminds me that the jewelers and glove manufacturers alarmed that the long sleeve has superseded the short one, have met, and it is declared have formed a protective syndicate, with the object of insisting that the long sleeve be abolished. Whether they will be able to impose their will upon the dressmakers, remains to be seen, but to me the issue is doubtful. Of course, ball gown sleeves remain short, and here is always an opportunity for the bracelet. They are also not out of place worn over the long sleeve of transparent material, which is buttoned from elbow to wrist in order to fit closely.

The jewelers might also make tiny gold and jeweled buttons to serve this purpose, to offset any neglect of the bracelet. Some of the sleeves are buttoned on the outside from the shoulder to the back of the hand with showy gilt and silver buttons. Here again is an opportunity for the jeweler, as such ornaments might be of real metal and gems instead of the imitations. The enormous Empire clasp of Napoleon blue enamel with the historic laurel wreaths might also be made a triumph of the goldsmith's cunning, instead of, as it usually is, but gilded metal and paste.

A new lorgnette is made so that it can fold quite flat in a gentleman's vest pocket. The two lenses are separated by a nickel plaque and can be adjusted at will. These skeleton lorgnettes are very convenient and take up no appreciable room. The ordinary ones are often in the way, for a man cannot carry them in a bag as a lady does.

The hat pin craze affords scope for the jeweler, although real gold and jeweled hat pins are not purchased every day for the reason that when the hat is removed at the theater they are liable to be lost. Simple and not expensive are large oblong hat pins of iridescent or faintly tinted mother-of-pearl, enclosed in an openwork gold setting or covered with a delicate network of gold or silver. Tortoise shell hat pins in which are imbedded diamond chips appeal to the woman of simple tastes. Great golden balls are incrustated with tourmaline turquoises, coral, or any other not too costly stone.

The jewelers here are selling handsome nail sticks of colored or white mother-of-pearl, gold or silver mounted.

For the desk are crystal stands with a gilt decorated candlestick and colored wax candle, while by its side is the crystal seal supported on gilded brackets, while the wax reposes on the little stand. Another style shows a gilded clip from which the sealing wax hangs. COUNTESS DE MONTAIGU.

### Beware of This Swindler Who Seeks His Victims Among Traveling Salesmen.

There is a very clever swindler at large, and though the reports that THE CIRCULAR-WEEKLY has received indicate that he has been confining his operations to wholesale jewelers and traveling salesmen representing wholesale manufacturing concerns, nevertheless the retail jeweler should also beware of him, particularly as he often uses the retailer for an introduction to his intended victim.

A short time ago this man called at the store of Sol. Sallan, 91 Woodward Ave., Detroit, Mich., and told the jeweler that he was Ike Kramer, of Columbus, O., and was about to open a store at Lima. He asked Mr. Sallan if he could direct him to some of the wholesale houses and to let him know if there were any drummers in town, particularly representatives of diamond houses. As it happened at that time, in Mr. Sallan's store, was J. Segal, a traveler for Weiner & Carson, importers of diamonds and manufacturers at 15 Maiden Lane, New York, and Mr. Sallan introduced the supposed Kramer to Segal. The man talked business with the jewelry drummer for awhile and finally made an appointment to meet him at the Hotel Pontchartrain the next morning.

Mr. Segal had first suspected that all was not right with the so-called "Kramer," and before he arrived at the hotel arranged with the porter to stand outside his door, but after his (Kramer's) arrival the latter's engaging ways overcame the traveler's suspicion and the salesman showed him a quantity of goods, from which the alleged customer picked out \$1,300 worth. Throughout his conversation and while selecting his goods "Kramer" appeared very businesslike and seemed to know what he was talking about. He asked no credit, saying he wished to pay spot cash, but he told the traveler that the extra expense of fitting up his store at Lima had practically exhausted his cash, and that he was going to cash a check also, and that he would pay for the goods the following morning.

Mr. Segal had the articles selected and put up in a package which he put in a trunk, sending the remainder of his stock down to the hotel's vault. A short time later "Kramer" (the customer) suggested to Segal that they share the same room, but this Segal refused to do, his suspicion being again aroused by the fact that the man knew the jewelry was in the trunk in the room.

Segal was again called upon by his customer in the evening, who told him that the hotel people had rented his room. This Segal found to be a fact, because "Kramer" did not have any baggage and did not pay in advance, so the traveler guaranteed the bill of the customer, with the result that the latter skipped on the following day without paying Mr. Segal, who also found that the check for \$5 given by "Kramer" was worthless.

Mr. Segal then made an investigation and discovered at Columbus that there was a Mr. Kramer in the jewelry business who was a reputable merchant, and who told Segal that this swindler had used his (Kramer's) name for some time, and that

he was very anxious to catch hold of him, as was his brother-in-law, Mr. Kridel. He said that the man had just been released from the penitentiary, and from what he had learned had already swindled some wholesale merchants in New York and other places. The man is also believed to be a hotel beat.

After the alleged Kramer had picked out the goods Mr. Segal gave him a duplicate bill for them on the billhead of Weiner & Garson, and he is very much afraid the man may use this in other swindling operations, claiming that he was a customer of this concern.

The man is described as about 28 or 30 years old, and is evidently a Polish Jew. He talks with a distinct accent. He is about five feet four inches high, weighs about 135 pounds and has a smooth-shaven face. One of his striking characteristics is a pronounced limp. He evidently knows something about the jewelry trade, is an excellent talker and has a way of disarming suspicion.

### Look Out for This Man, Wanted at Fitchburg, Mass., to Answer Forgery Charge.

FITCHBURG, Mass., Oct. 14.—The police of this city are anxious to get hold of Claude B. Lasell, or Laselle, 60 years old, who is wanted here to answer a charge of

CLAUDE B. LASSELL, WANTED AT FITCHBURG, MASS.

passing a forged check on F. L. Parkhurst, a local jeweler. According to the circular sent out by Chief of Police Tinsley, charges of forgery and larceny have both been made against him, and jewelers who may have seen him, or in any way know of his whereabouts, are requested to notify Chief Tinsley at once.

Lasell is about five feet 5 inches tall, weighs about 200 pounds, has dark chestnut hair and blue eyes. He has a gray mustache, when he wears one, but when last seen had a clean-shaven face. By occupation he is a canvasser or salesman, but is personally interested in fire departments and makes a practice of visiting fire stations.

The store of Goodell & Edwards, Oxford, Nebr., was broken into, last week, by burglars, who stole \$50 worth of jewelry. Entrance was gained by breaking a glass over the rear door. The loot consisted chiefly of rings and bracelets. A millinery establishment adjoining the jewelry store was also entered, but nothing was taken.

### Paris Pearl and Diamond Markets Show Improvement—Poor Stocks of Pearls Prevent Sales.

PARIS, Oct. 10.—Business in the pearl trade during the month of September, though somewhat livelier, was not so active as it has been in past years at this season. This was partly due to the fact that the season started very late, owing to the hot weather which has kept a large number of persons out of town, and foreigners crossing Paris on their return home did not come in in as large quantities as the shopkeepers expected.

The diamond trade was even livelier than the pearl trade in the last few weeks, and a number of important sales have been recorded. Most of these resulted from the resorting of stocks, and also the filling of orders for North American shippers. Russia has been an active buyer in the diamond market recently.

One of the reasons that the transactions in the pearl trade has not been livelier is to be found in the poor stocks on hand, as many orders for certain sizes and qualities could not be filled because the goods were not to be had. Fresh shipments of pearls are selling quickly, and dealers are willingly paying from 20 to 25 per cent. more than they did four months ago. Drilled pearls of medium quality are very much in demand, and poor offers for these

are not considered at all by the better houses. Emeralds of four to five grains of good quality are also being called for considerably.

The well-known firm of M. Grünberg has been turned into a limited company under the style of M. Grünberg & Co., with a capital of \$1,000,000.

Louis A. Goldschmidt, who was also known as "Baron" Goldschmidt, has disappeared. The debts which he has left behind are reported to be \$100,000. G. K.

The firm of Joss & Brister, known as "The Watch Shop," New Philadelphia, O., has incorporated under the laws of Ohio with a paid up capital stock of \$12,000. The corporation will be known as the Watch Shop Co. The officers are: President, J. E. Joss; vice-president, R. R. Ricksecker; secretary, C. E. Brister.

The Gustave Fox Co., Cincinnati, O., is busy getting out an order for 5,000 Taft pins, which are very unique as well as attractive in design.

**Thief Gets Away With Contents of Cash Drawer After Locking Jeweler in His Own Vault.**

WELLSVILLE, N. Y., Oct. 17.—A daring and well-planned robbery was perpetrated at the jewelry store of Fred W. Ward, in this village, last evening, and the fact that the robber got away with only \$57 in cash and no jewelry was due more to luck than anything else. As it was, Mr. Ward had an experience that he will long remember, as he spent some time an involuntary prisoner in his own vault.

Early in the evening while the street was full of people a well-dressed man asked to see some cartridges which were usually kept in the vault. Mr. Ward was alone in the store at the time, but, suspecting nothing, went into the vault after the articles. As soon as he had gone inside the stranger slammed the door and turned the combination, making the jeweler a helpless prisoner.

It was evidently the thief's intention to loot the store of its most valuable articles, but the imprisoned jeweler succeeded in making so much noise that the robber feared that he would attract the attention of the people on the outside. Therefore, hastily grabbing the money drawer, which had about \$57 in cash, the thief fled. Mr. Ward's cries soon attracted attention and the store quickly filled with people. From the inside Mr. Ward explained the combination of the safe, which was opened by a friend, and he was released.

The thief has not yet been caught and the police are working on the case.

**Death of Henry Tissot.**

Henry Tissot, who had been connected with the jewelry trade in New York for a number of years, died at his home, 214 Guernsey St., in the Greenpoint section of Brooklyn, N. Y., last Wednesday. Mr. Tissot had to give up active work some time ago and of late has been seriously ill. Despite the best of care his strength failed and death put an end to his suffering.

Henry Tissot was born 59 years ago in New York, where he spent his early life. He was at one time a furniture salesman, and in January 1883, entered the jewelry trade with F. J. Martens, as a member of the firm of F. J. Martens & Tissot. This firm succeeded Schwitter & Martens. Mr. Tissot succeeded to the business in 1884. He continued alone, doing a large business, until 1896, when he met with business reverses, and since then had done a small business, principally with private customers. For a number of years he was at 1 Maiden Lane, and last May moved his office to 68 Nassau St.

Mr. Tissot was a quiet, reserved man and was highly respected by those who knew him closely. He is survived by a widow, one son, a sister and a brother.

The funeral was held Friday evening, the Rev. Dr. A. V. Wittmeyer officiating. Interment was in Greenwood Cemetery.

Frank D. Ausman, St. Marys, O., recently presented the local Board of Public Service with an attractive eight-day clock, which has been installed in the City building.

**National Monthly Import and Export Statistics.**

WASHINGTON, D. C., Oct. 11.—The records of the Treasury Department containing the following comparative statistics of interest to the jewelry trade for August, 1906 and 1907, and for the eight months ending Aug. 31, 1907 and 1908:

**Exports of Jewelry, Clocks, Watches, Silverware and Kindred Lines from New York.**

WASHINGTON, D. C., Oct. 11.—The following were the exports of jewelry, plated ware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just past:

- Auckland: 120 cases clocks, \$2,349; 3 cases optical goods, \$234; 10 cases plated ware, \$375.
- Bremen: 1 case jewelry, \$420; 1 jeweled sword, \$195; 1 case plated ware, \$220.
- Bombay: 12 cases clocks, \$237.
- Buenos Ayres: 2 cases jewelry, \$1,954; 1 case optical goods, \$114; 3 cases watches, \$2,155.
- Christiana: 4 cases clocks, \$170.
- Copenhagen: 10 cases clocks, \$284.
- Colon: 1 case silverware, \$230; 6 cases clocks, \$349; 3 cases watch cases, \$447; 1 case thermometers, \$135.
- Hamburg: 3 cases optical goods, \$294; 6 cases watches, \$5,250.
- Havre: 8 cases jewelry, \$570.
- Havana: 1 case jewelry, \$119; 3 cases plated ware, \$397; 6 cases clocks, \$165; 4 cases jewelry, \$119.
- Gothenburg: 5 cases clocks, \$2,000.
- Guayaquil: 9 cases plated ware, \$718.
- Iquitos: 1 case jewelry, \$127.
- Leith: 2 cases thermometers, \$120.
- Liverpool: 8 cases clocks, \$156; 3 cases watches, \$1,500; 1 case jewelry, \$800; 1 case silverware, \$494; 48 cases clocks, \$533; 1 barrel jewelers' ashes, \$2,500; 6 cases watch material, \$2,500; 1 case silverware, \$512; 1 case jewelry, \$497; 10 cases clocks, \$599.
- London: 2 cases watches, \$175; 1 case plated ware, \$375; 1 case silverware, \$214; 19 cases clocks, \$2,090; 45 cases clocks, \$686.
- Lyttleton: 2 cases plated ware, \$165.
- Melbourne: 19 cases clocks, \$200; 49 cases clocks, \$3,846; 3 cases optical goods, \$241; 94 cases clocks, \$1,255; 1 case watches, \$153.
- Para: 14 cases clocks, \$270; 7 cases watches, \$1,057.
- Sheffield: 4 barrels jewelers' sweepings, \$2,100.
- Southampton: 64 cases watches, \$3,877.
- Sydney: 47 cases plated ware, \$382; 162 cases clocks, \$2,569.
- Trinidad: 3 cases watches, \$105.
- Savannah: 1 case silverware, \$210; 26 cases clocks, \$2,023.
- Vera Cruz: 11 cases clocks, \$291.

Hopkins & Brenner, Edgerton, O., have been succeeded by Hopkins & Son.

G. H. Geer, of the G. H. Geer Jewelry Co., Jackson, Tenn., has enlarged his store by the addition of 20 feet at the rear. The interior is being renovated and equipped with new fixtures and wall cases.

**Philadelphia Engraver Decamps After Getting Jewelry from Various Firms on Memorandum.**

PHILADELPHIA, Pa., Oct. 17.—David A. Browne, aged about 32 years, 2028 N. 11th St., formerly an engraver widely known among the leading jewelers of this city, and until recently in the employ of the Bailey, Banks & Biddle Co., has decamped with thousands of dollars' worth of diamonds and jewelry obtained on memoranda from leading members of the trade. Browne is reported as having been located on the Pacific Coast. What impelled him to deceive men in the trade who trusted him is not known. He was not known to have any entanglements or any vices which would bring about an extravagant manner of living.

Among those from whom he is alleged to have obtained jewelry are S. Kind & Sons, 1110 Chestnut St.; Emil J. Hertz, 13th and Chestnut Sts.; H. O. Hurlburt & Sons, 14 S. 10th St.; L. P. White, 9th and Chestnut Sts.; Joseph Deschamps, 701 Chestnut St.; Paul Souder, 9th St. near Chestnut St., and some others whose names have not yet been disclosed. His plan was to go to the jewelers and obtain goods on memorandum. Knowing him well and knowing his long career in the trade, where he was employed since he was a boy by various jewelers, no one questioned him, and nearly all say that so convinced were they of his uprightness and honor that he could have obtained much more jewelry from them had he asked.

Detectives were assigned to trace Browne after his disappearance about 10 days ago, and are reported to have located him in Los Angeles, and also to have recovered pawn tickets for much of the jewelry. Emil Hertz and Frank Kind have worked indefatigably in their efforts to aid the detectives, and to them is due much of the credit for recovering the pledged jewelry. So far as is known, Browne skipped town after having secured about \$3,000 worth of goods.

E. F. Scott, Chamberlain, S. Dak., was in Chicago on a business trip, last week.

### Proceedings of Advisory Committee of the N. E. M. J. & S. Association.

PROVIDENCE, Oct. 17.—A meeting of the advisory committee of the New England Manufacturing Jewelers' and Silversmiths' Association was held in the rooms of the association Thursday afternoon, at which time final arrangements were made for the annual business meeting on Oct. 31. In addition to the annual dinner for active members, the election of officers and the reading of reports of officers and committees, papers will be presented on the subjects of "German Agreement," "Credits" and the "Free Labor Bureau."

Attention was called to a circular letter that has been sent to the manufacturers and business men of this city by the Earl & Prew Express Co., giving notice that on and after Oct. 17 no packages addressed to New York or other destinations will be received for less than 25 cents. For many years it has been customary for the express company to charge 15 cents for the ordinary package sent by the manufacturing jewelers and the addition of 10 cent tariff on these will make a material difference to the manufacturers from the fact that a majority of the manufacturing jewelers prepay their express packages. The matter was discussed by the committee and George H. Holmes and Alfred K. Potter were appointed a sub-committee to hold a conference with the management of the express company and to report at the next meeting of the advisory board.

The special committee appointed some time ago to establish a free employment bureau in connection with the association reported that the room adjoining the association's headquarters had been secured and fitted up for the purpose and had been opened for business. They are in charge of George W. Richards and already several manufacturers have filed applications for men wanted while several men seeking employment have registered.

### A. J. Hope, Who Stole Diamonds from Several Chicago Firms, Gives Himself Up to the Police.

CHICAGO, Oct. 17.—A. J. Hope, formerly employed by the Chicago branch of the Jewelers' Board of Trade, walked into the Central Station last Wednesday and surrendered himself to the police. He is now awaiting trial on charges of larceny. His attorney visited several of his victims last week and pleaded for leniency.

On March 9 last Hope obtained a four-carat diamond and a 2½-carat diamond, together valued at \$1,200, from Norris, Alister & Co., claiming he had a customer for them and agreeing to report the next day, whether he had sold them or not. He failed to appear as he had promised, and search for him revealed the fact that he had disappeared.

A warrant was sworn out for his arrest on the charge of larceny by bailee, and subsequent inquiry developed the fact that he had also gotten three one-carat stones valued at \$600 from the Herbert W. Allen Co., \$1,025 worth of diamonds from the Dryer, Lochau & Ohm Co., \$425 worth from the S. F. Scott Co. and \$250 worth from C. J. Roehr & Co. He also owed

various small amounts for money borrowed from the Chicago jewelry trade.

A few days after Hope disappeared he sent back the pawn tickets for the diamonds he had pledged, and these were turned over to the firms who had been his victims.

### Superintendent of Silver Factory Commits Suicide by Drinking Cyanide of Potassium.

TAUNTON, Mass., Oct. 14.—Samuel Reid, superintendent of the Poole Silver Co.'s factory, committed suicide by drinking cyanide of potassium shortly after the noon hour to-day. He was 40 years of age.

Mr. Reid had been employed at the Poole silver factory for several years, and was recently promoted to the position of superintendent. The care of the large factory and many smaller matters has caused him much worry, and several times he has threatened to kill himself. To-day he decided to carry out his plans, and as soon as the noon whistle blew and the employes hurried out to lunch the man went to the third story of the factory building and drank the poisonous acid. He drank a quantity of the fluid, which is used in the plating department, and at once became weak and fell unconscious to the floor.

The sudden noise caused by the fall attracted the attention of several women who are employed in an adjoining room. Going to where Mr. Reid lay they discovered his condition and at once summoned assistance. A physician, who was summoned at once, said that death had been instantaneous.

Friends and other employes of the factory can give no reasons for his deed except business worry, as Mr. Reid was well known and highly respected. He leaves a widow

### Involuntary Bankruptcy Petition Filed Against C. M. Plarr Mfg. Co., Buffalo, N. Y.

BUFFALO, N. Y., Oct. 14.—An involuntary bankruptcy petition was filed against the C. M. Plarr Mfg. Co., wholesale jewelers, in the United States Circuit Court, yesterday afternoon, by four creditors whose claims total \$1,913.39. The petitioning creditors and their claims are: R. F. Simmons Co., \$526.50; Fontneau & Cook Co., \$193.41; Ernest D. Gilmore, \$101.33; E. A. Potter Co., \$192.15. The alleged act of bankruptcy was committed on October 10 last, when the company paid a judgment for \$212.78.

The C. M. Plarr Mfg. Co., a corporation, has done business at 232-234 Walnut St. P. H. Plarr is president, C. M. Plarr is treasurer and general manager, and Thomas H. Noonan is secretary. The company was incorporated in 1894 with an authorized capital of \$25,000, and succeeded to the business which Mr. Plarr formerly conducted individually, and which he established in 1893. The concern claimed a paid-up capital of \$17,500, and carried a moderate stock. All of the members stood well with the jewelry trade, and their creditors are principally in New York, Providence and the Attleboros.

Robert Wright & Son, Salamanca, N. Y., has sold out to Robert Wright, Sr.

### Negro Arrested for Stealing \$25,000 Worth of Diamonds from S. C. Powell, Taken to Chicago for Trial.

CHICAGO, Oct. 19.—Foster George, a negro charged with the theft of \$25,000 worth of diamonds from S. C. Powell, New York, was brought to this city, last Friday, from St. Louis, where he had been arrested, as noted in the last issue of THE CIRCULAR-WEEKLY. S. C. Powell came here from New York to attend the examination last Saturday. The case was postponed for a few days.

The facts which led up to George's arrest follow: A retail jewelry customer of the Eisenstadt Mfg. Co., St. Louis, Mo., called one day to have some diamonds mounted, and told Joseph Friede, who has charge of the diamond department, that he had a negro customer who was having a great many diamonds mounted. Friede's suspicion was aroused, and he notified the Pinkerton detectives. The latter shadowed George, the negro in question, and saw him pawn the diamonds immediately after they were mounted.

George's arrest followed, and about 213 carats of loose diamonds, 15 carats of mounted diamonds and \$100 in cash were found in his possession. This represented about two-thirds of the diamonds stolen.

George said he was in Chicago on June 30, the day Powell missed his wallet, and that at 11 A. M. he met a negro on Wabash Ave., who dropped a package. George questioned him, he says, and the other negro offered to divide the contents of the wallet if he (George) would keep quiet. As two-thirds of the diamonds were found in George's possession, the police think the division was very unequal if George's story is true.

The time the negro prisoner says the diamonds were found was just one hour and a half after the theft was discovered.

Mr. Powell identified all the diamonds as his own. This was easy to do, as the quantity lost consisted of m $\acute{e}$ l $\acute{e}$ e and quarter-carat stones, and their sizes, quality and weights tallied with the articles found. Since getting hold of the stolen goods George had made several trips west, pawning small stones in different cities.

Fred Mayer, with the Bruhl Bros. & Henius Co., was on the same train that brought George here in charge of Asher Rossetter, general superintendent for the Pinkerton Detective Agency in St. Louis, and George told Mr. Mayer he never thought it was so hard a job to get rid of diamonds as he found it to be. George was not a Pullman conductor, as was stated in the newspaper dispatches, but served for a short time on a dining car.

J. T. Teeters & Co., exclusive jewelry jobbers, have moved into their new quarters in the Lincoln Hotel annex, Lincoln, Nebr. The new room, located at 121-123 N. 9th St., is arranged especially for the company's wholesale business, having a large fireproof vault in which to secure the valuable stock. The fixtures are in mahogany, and are the finest that money can purchase. The company now has one of the best-equipped wholesale jewelry establishments west of Chicago.

**Death of August Trenkmann.**

August Trenkmann, a leading and well-known manufacturer of tortoise shell goods, of New York, died at his home, 183 Hecwes St., Brooklyn, Friday, from a complication of diseases, after an illness of about a year.

Mr. Trenkmann was born in Germany, Oct. 2, 1831, and came to this country when a youth with his parents, Henry and Marie Trenkmann. He was engaged in the tortoise shell goods business for a number of years and was also active in real estate. He had a large establishment on Center St., but retired from business in 1906.

Deceased had been a resident of the Eastern District, Brooklyn, for more than 40 years, and enjoyed the acquaintance of a wide circle of friends. He is survived by a widow, Wilhelmina Zindel; five sons, Henry, Robert, Charles, Frederick and Edward, and two daughters, Josephine and Emma.

Funeral services were held at the home Sunday evening by Rev. Dr. Meurey, of Jersey City, N. J. Interment was in the Lutheran Cemetery.

**Death of P. Ralph Copeland.**

ROCKFORD, Ill., Oct. 14.—P. Ralph Copeland, superintendent of the factory of the Rockford Silver Plate Co., of this city, died yesterday afternoon at his home on 10th St., after a short illness. Deceased was seized with paralysis on Oct. 5 while at the shop and gradually grew worse until the end.

Mr. Copeland, who had been for 24 years with the plant of which he was superintendent, and was well known and respected throughout this section, had recently passed his 40th year. He was born in Winnebago, Aug. 14, 1868, and came to Rockford in 1881. A few years later he entered the employ of the silver plate concern as an errand boy, but by his diligent attention to his duties and his natural brightness, progressed until he became superintendent of the entire plant.

Mr. Copeland is survived by a widow, a mother and two brothers. He was prominent in labor and Masonic circles, and was master of E. F. W. Ellis Lodge, A. F. & A. M. The funeral will be held Saturday at Winnebago, and will be in charge of the Rev. Mr. Williamson, of the First Presbyterian Church.

**Death of Andrew Lewis.**

HARRISONBURG, Va., Oct. 16.—Andrew Lewis, for many years a well-known jeweler and silversmith of this town, died Sunday morning near Marshal in Fauquier County, as a result of several strokes of paralysis, which he received during the past three years.

Deceased, who was one of the oldest members of the trade in the State, was born June 1, 1829, in Monroe County, and when a young man went to Fairmount, where he started in business. He continued with varying success and in 1854 moved to Harrisonburg, where he established the jewelry store, to which he devoted the remainder of his business career. About 10 years ago he retired and since

that time had made his home with his stepson.

During the Civil War, Mr. Lewis served on the Confederate side with the 10th Virginia Infantry, until the end of the hostilities. He was prominent in the Masonic Order and as a Confederate Veteran. He is survived by three brothers.

**Death of Louis A. Martin.**

Louis A. Martin, Sr., for many years a well-known horologist of New York city, died on Wednesday, Oct. 14, at his home, 824 Bloomfield St., Hoboken, N. J. He was born in Geneva, Switzerland, on April 21, 1835, and came to America in 1855. He was engaged in business at 76 Nassau St. as a watch importer and watchmaker for more than 40 years, but retired in 1901.

Mr. Martin had been a resident of Hoboken since 1868. He served in the 55th Regiment on Col. Le Gall's staff in civil war times and recruited and drilled soldiers for the front. He was one of the founders of the crematory at Fresh Pond, L. I. His body was cremated there.

Mr. Martin is survived by his widow and two sons, Louis A. Martin, Jr., professor of mechanics at Stevens Institute of Technology, and Paul J. Martin, an engineer for the Quintard Iron Works, of New York.

**Death of Solomon Loucheim.**

Solomon Loucheim, one of the oldest jewelers in Harlem, New York, died Thursday night at his home, 180th St. and St. Nicholas Ave., at the age of 65. He was for 30 years in business as a retail jeweler at Third Ave. and 120th St. He was a prominent Mason and a Civil War veteran.

Deceased started in business as a member of the firm of Levy & Loucheim, and continued until he met with business reverses in 1884. The business was resumed by Pauline, his wife, and continued under her name until Jan 1, 1904, when Milton S. Loucheim, a son, was admitted to an interest, and the business continued as Loucheim & Son.

**Games Rolled by the Jewelers' Bowling League of New York.**

The following were the scores of the teams of the Jewelers' Bowling League of New York in the games rolled last week:

Oct. 12.—Solidarity Watch Case Co.	751	849	751
vs. Aikin-Lambert Co.	958	771	822
Oct. 13.—H. A. Meyers.	829	779	805
vs. Jos. Fahys & Co.	786	767	861
Oct. 14.—C. F. Wood & Co.	839	744	885
vs. Jewelers' Circular-Weekly.	629	783	739
Oct. 15.—H. W. Wheeler & Co.	833	779	784

W. P. Mullholland, Big Timber, Mont., has gone to Livingston, Mont.

**Involuntary Bankruptcy Petition Filed to Set Aside Creditors' Execution Against A. B. Froude, Passaic, N. J.**

PASSAIC, N. J., Oct. 17.—An involuntary petition in bankruptcy has been filed against W. Bradford Froude, a retail jeweler at 224 Main Ave., and Edward Thomas Moore has been appointed temporary receiver of the business, and has taken possession of the store.

The petition in bankruptcy was filed by B. & L. Veit, New York, who are Mr. Froude's heaviest creditors, on a claim amounting to about \$5,000. Another large creditor, who recently got judgment against the jeweler, was Chas. Engle, and on his execution for \$4,000 the stock in the store was sold, Mr. Engle buying it in for \$3,000. The petition in bankruptcy seeks to have set aside the judgment and sale under it, and to have Mr. Froude declared a bankrupt.

Mr. Froude's troubles were a surprise to his friends, of whom he had many. He started in business in 1895 in a small way, but by his own diligence and progressiveness built up an excellent trade. In 1902 he bought the store property which he recently occupied, remodeling it at a cost of about \$4,000 to suit his business. For some time past his health has not been good and he has been going to the West Indies every Winter. This caused his business to suffer and he has been running behind for more than a year.

F. H. Coolidge has opened a store at Hood River, Ore.

S. M. Whitehead has just engaged in business in Middlesboro, Ky.

A. P. Donnelly recently began business at 55 W. Broad St., Westerly, R. I.

Lewis & Clewley have started in business at 76 Dorrance St., Providence, R. I.

H. M. Reed recently commenced business as a retail jeweler in Battle Creek, Nebr.

Samuel McCollom will shortly open a retail jewelry store in Winchester, Ind.

T. S. Williams, last week, began business as an engraver at 151 Wabash Ave., Chicago, Ill.

C. E. Foster has opened a store at Sheridan, Ore., and is making a specialty of repair work.

Seddon & Schaefer is the name of a new concern in Wallingford, Conn. They will manufacture cut glass.

Charles M. Smith & Co. are about to open a retail jewelry store in the Easman Block, Margaretville, N. Y.

M. T. Goldsmith & Co. have begun manufacturing jewelry in Newark, N. J. They are located at 103 Oliver St.

The Westerly Jewelry Mfg. & Engraving Co. has opened a factory in Clark St., Westerly, R. I., to manufacture flat ware.

Capt. Emil F. Miller, in company with his son, Frank L. Miller, has started in business at 9 Calender St., Providence, R. I.

The Universal Supply Co. is the name of a new concern which will manufacture gold jewelry at 9 Calender St., Providence, R. I.

The Gilbreth Bros. Co. has taken space on the fourth floor of the Fitzgerald building, 183 Eddy St., Providence, R. I., for the manufacture of flat ware.

The Bruce Jewelry Co. was recently incorporated in Denver, Colo., with a capital of \$10,000. The incorporators were A. J. Bruce, S. T. Horthorn and Charles I. Horthorn.

Louis S. Smith, formerly of Todd & Smith, Beverly, Mass., has opened a new store on Cabot St., at that place, the partnership having been dissolved. Thomas Todd will continue at the old location.

### Obituary Notes.

Mareus Wade, 62 years of age, formerly engaged in the jewelry business in Baltimore, Md., died near Mt. Joy, Pa., Oct. 13, at the home of his brother.

Joseph Reeser, formerly engaged in the jewelry trade in Lancaster, Pa., first as member of the firm of Reeser & Herr, and later in business by himself, died on Oct. 14, aged 62 years. For years he was a prominent Republican politician in Lancaster County, and held office as Clerk of

Quarter Sessions Court and Register of Wills.

Edward Kersey, an old jeweler of Richmond, Va., died Wednesday last at his home, 312 N. 27th St. Deceased was born 95 years ago, and is said to have been the oldest member of the trade in the south, as well as one of the oldest Confederate veterans. He was in business for many years on Main St., between 14th and 15th Sts. Mr. Kersey is survived by two sons, three daughters, seven grandchildren and two great-grandchildren.

Arthur S. Miner, formerly the head of the firm of A. S. Miner & Co., dealers in fine china and glass ware, 126 State St., Binghamton, N. Y., died Oct. 9 in his home at Harpersville. The deceased was born in North Stonington, Conn., March, 1849, but came to Binghamton when about 19 years old. He conducted business until 1905, when he retired. The funeral was held from his late home and the interment took place in Spring Forest Cemetery, Binghamton.

John W. Schroeder, who for years conducted a watch and clock repairing shop at 201 13th St., Jersey City, N. J., was found dead at his work bench last Thursday afternoon. He had been stricken with heart disease. Schroeder lived alone. He was between 50 and 60 years old. A customer found him in a natural posture, the fatal seizure coming as he was examining a watch. Relatives took charge of the body. Dr. Converse, the county physician, was notified and granted a burial certificate.

E. M. Eubank, who was found dead at his place of business in Huntington, Tenn., Oct. 4, had long been known as a jeweler, and had been in business at Huntington chiefly as a repairer for many years. Mr. Eubank had been a cripple and had been subject to epileptic attacks. He slept behind his jewelry store and when he did not appear one morning the place was broken into and he was found in his room dead. It is believed that he died during one of his attacks. His remains were taken to his former home at Westbury for burial.

### Buffalo, N. Y.

Charles F. Heintz, of Heintz Bros., ring makers at 86 Ellicott St., recently returned from a European trip.

A. J. Best, of Best & Co., at 11 E. Genesee St., has been on a business trip in New York and Philadelphia.

George R. Fox, optometrist at 618 Main St., has been elected a member of the Buffalo Optometrical Society.

Messrs. Downs and Morse, of Ostby & Barton Co., Providence, R. I., recently called on their Buffalo customers.

Louis Gottlieb, optometrist in T. C. Tanke's jewelry store, 378 Main St., has been visiting relatives in Philadelphia. Charles Mitchnick is his assistant.

Silverware consisting of knives, forks and spoons, valued at about \$75, was recently stolen from the jewelry store of Yung & Debus, 184 E. Genesee St.

The marriage of Charles A. Schopp, a jeweler in the court of Ellicott Square, to Miss Isabel Mann Fraser, of Syracuse, will take place at the home of the bride on Wednesday, Oct. 28.

Best & Co., jewelers, of 11 E. Genesee

St., have been renovating their store. The improvements include new lights, new ceiling decorations and a marble and plate glass case for an outside display.

Mr. White, of White, Wile & Warner, 285 Washington St., recently visited Providence with a view to buying new machinery for the firm's modern factory. V. F. Leseritz, western representative of the firm, has returned home after a four months' trip.

Nelson A. Soggs, a well known retail jeweler of Niagara Falls, underwent an operation recently at the Memorial Hospital in that city. While the operation was of a serious nature it was later reported to be entirely successful and Mr. Soggs is now convalescent.

The following jewelers were in the Buffalo market last week: W. I. Eastwood, Cowlesville; E. R. Muller, Batavia; C. F. Hurd, Medina; George Engel, Springville; E. A. Koetsch, North Tonawanda; F. D. Kelsey, East Aurora, N. Y., and A. C. Kirberger, Warren, Pa.

A stone was recently thrown through the large plate glass window in Present & Co.'s store, 44 Main St. Max L. Lowenthal, manager of the company, created much amusement and incidentally did some effective advertising by placing near the break in the glass a large sign, on which was well displayed the following: "Such Attractive Goods at Such Prices! The People Try to Get Them Through the Window." A hand pointing to the opening also appeared on the sign.

Members of the Retail Jewelers' Association, this city, recently met at the home of the president, William Elmann, on W. Utica St. After a business session they were entertained by Mr. Elmann, who provided an enjoyable luncheon for his guests. The association was organized a few months ago and is in a flourishing condition. Only strictly retail jewelers belong to the organization, the purpose of which is the protection of its members. The membership is now about 40 and is steadily increasing. Besides Mr. Elmann, the other officers are A. Zilliox, vice-president; Louis Schutt, secretary, and Eugene Tanke, treasurer.

Samuel Salmeson, 35 years old, is under arrest here on a charge of larceny in connection with his dealings with a Buffalo clothing house. A member of this house was so impressed with Salmeson's apparent frankness that he later introduced the stranger to Simon Cohen, a jeweler at 331 Main St. The alleged swindler secured two pearl rings and a locket from Mr. Cohen without paying for them. Salmeson claimed he had clothing stores in Salt Lake City and Goldfields, Nev. When word was received in Buffalo that these claims were probably unfounded the suspicions of Mr. Cohen and the Buffalo merchant who introduced Salmeson to Cohen were aroused. The police were notified and Salmeson was arrested. When searched he had only \$1. An examination of the prisoner's coat showed that it was made in Toledo, O. An effort is being made to see if the prisoner is wanted in that city. Mr. Cohen's jewelry is in charge of the police.

Edwin L. Hunt, formerly of Penfield, Ill., is now at Potomac, Ill.

I am back at headquarters with a full line of  
strictly new **Semi-precious Ceylon, Ural,  
Brazil and Native Stones.** Many entirely  
new cuttings in Fantastic Pendants, Drops, etc.,  
not to be found elsewhere. Designers requiring  
Bizarre and Oriental effects should send for  
sample papers.

**LOUIS J. DEACON,** ATLANTIC CITY, N. J.  
116 So. New Jersey Ave.

## Providence.

### TRADE CONDITIONS.

The past week has witnessed continued prosperity in the jewelry business and concerns in this city and vicinity have received a number of good orders. All over the country the conditions appear to be improving without regard to the political contests, according to the reports that are being received by the manufacturers. From the middle west the reports say that business in both wholesale and retail lines is better than at any time during the past year. Along the Pacific coast the salesmen are sending back many orders that indicate nearly as good conditions as before the financial flurry of last November.

A. V. Hammerberg is making a business trip through Iowa for Hamilton & Hamilton, Jr.

William H. Luther is prominently spoken of for re-election as police commissioner of this city.

Mr. and Mrs. Theodore W. Foster returned last week from a trip to New York and Chicago.

H. F. Tourtellot has returned from an extended western trip in the interest of the Waite-Thresher Co.

D. N. Jacoby is showing the samples of the Providence Stock Co. of this city through the middle west.

The annual catalogue of the Providence Art Metal Co. of this city in being distributed among the trade.

James B. Smith, with the Wolcott Mfg. Co. of this city, has removed to East Orange, N. J., with his family.

E. White, with the George L. Vose Mfg. Co., is on a business and pleasure trip through the south and southwest.

George McDonald has started on an extended southwestern business trip in the interests of the John T. Mauran Mfg. Co.

Edwin Lowe & Co., Inc., manufacturers of rings at 116 Chestnut St., have closed, and are reported as offering its plant for sale.

Mr. and Mrs. William C. Foster are receiving congratulations on the birth of a son, Theodore William Foster, on Thursday.

The Universal Supply Co. is the name of a new concern for the manufacture of gold shell rings and jewelry that has started at 9 Calender St.

J. W. Richardson & Co., of this city, is a creditor for \$117 of Walter E. Bush Co., 123 Liberty St., New York, which went into bankruptcy last week.

At the Republican State Convention, Wednesday, Roswell C. Smith was elected to succeed Walter H. Durfee as a member of the State Central Committee.

John Hclbrook, vice-president of the Gorham Co., and his bride removed to this city last week, from New York, and will reside temporarily on Orchard Ave.

A sneak thief stole from the office of the William B. Streeter & Co., 38 Friendship St., last week, an overcoat valued at \$25, belonging to the foreman, Arthur H. Smith.

Lewis & Clewley have started in business at 76 Dorrance St., room 412. They will do ornamental engraving and designing, also monograms and all styles of lettering.

Mitchell & Straker, 95 Pine St.; Max Deutz, 26 Fountain St., and Fessenden & Co., Inc., 100 Friendship St., have been

elected members of the Jewelers Board of Trade.

The Gilbreth Brown Co. is the style of a new concern that has taken shop room on the fourth floor of the Fitz Gerald building, 183 Eddy St., for the manufacture of silverware.

Mrs. Ellen M. Brown, widow of John A. Brown, of the old time watch case manufacturing concern of Brown & Ladd, died in this city Oct. 14, in the 71st year of her age.

Arthur W. Barrus, with the Gorham Co., was re-elected State Secretary of the Rhode Island State Council Junior Order of American Mechanics, at the annual session the past week.

William G. Lawton, son of John F. P. Lawton, secretary and assistant treasurer of the Gorham Co., is named on the State ticket as a candidate for Secretary of State by the Prohibitionist party.

It was announced Saturday that every creditor in this city and the Attleboros of F. W. Sackett, New York, has signed the agreement so that a settlement in a short time is practically assured.

William B. Streeter spent several days the past week in his catboat *Netor* and on Prudence Island, whither he went with a party of five on a hunting trip. He reports the ducks very plentiful.

George W. Parks has received the nomination for Mayor on the Republican ticket. If elected, he will be the first manufacturing jeweler to occupy the Mayor's chair since Charles Sydney Smith in 1891.

William H. Waite, president of the Waite-Thresher Co., was elected a member of the executive committee of the Rhode Island Sunday School Association at the annual meeting last Wednesday.

The new factory of the Westerly Jewelry Mfg. & Engraving Co., on Clarke St., Westerly, started up last week with a small force, which it is expected will be increased shortly. The firm manufactures plated ware.

The copartnership existing between Jake Solinger and William Feintuch, for the manufacture of jewelry, has been dissolved by mutual consent, Mr. Feintuch purchasing his partner's interest, and will continue the business of rhinestone jewelry.

During the past week the Manufacturing Jewelers Board of Trade has distributed the following dividends to its members who are creditors of the concerns: F. C. Hoppe Co., Chicago, 65 per cent. cash, and J. T. Evans, of Boise, Ia., 30.6 per cent.

A. P. Donnelly, formerly of North Kingstown, has opened a watch and jewelry store at 55 West Broad St., Westerly. He is a graduate of the Philadelphia College of Horology and for the past two years has been the head watchmaker for H. J. Cook Co., Knoxville, Tenn.

Capt. Emil F. Miller, for 27 years a member of the North Attleboro, Mass., Fire Department, and formerly employed by Cheever-Tweedy Co., of that place, as a colorer and plater, in company with his son, Frank L. Miller, is starting in business for himself at 9 Calender St., this city.

The creditors of James F. Byrne, watchmaker, jeweler and optician, 335 Westminster St., this city, held a meeting last week at the office of his assignee, P. J. Cun-

ningham in the Banigan building. The situation was discussed and it was finally decided that it was better to allow the business to be continued rather than go into bankruptcy.

Among the buyers in town the past week were noted the following: A. L. Stone, of Stone Bros., Chicago; William J. Ward, of New York; Miss Ida Munzer, of Siegel, Cooper & Co., New York; W. E. Smith, and Mr. Britts, of Jonas Long & Co., Milwaukee; M. L. Schwab, of Guthman, Solomons & Co., New York; Charles Wolson and Hermann Pichel, of Samstag & Hilder Bros., New York; S. Lebolt, of A. M. Rothschild & Co., Chicago, and A. Schwab, of Cleveland.

H. A. Kirby had a narrow escape from serious if not fatal injury in an automobile accident Saturday evening. He was riding up Clifford St. in his large touring auto when at the corner of Chestnut St. he collided with an electric car with sufficient force to throw the electric off the rails. His machine was badly damaged, but he was not even bruised, although the impact of the two vehicles was heard a considerable distance and two women passengers on the electric were hurt.

A fire that broke out in the manufacturing jewelry establishment of H. F. Scullian & Co. on the third floor of the Brown-Ives building, Orange and Clifford Sts., at an early hour Sunday morning, caused slight damage. The blaze started under one of the benches, but the heat set the sprinklers in operation and the flames were soon extinguished. Water occasioned some damage in the shop where the fire started and also in the shop of the Westmacott Gas Furnace Co., on the first floor.

The board of directors of the Manufacturing Jewelers Board of Trade held a meeting at the rooms Thursday forenoon, at which Robert E. Budlong presided. After the transaction of routine business and the auditing of accounts the report of the special committee which was appointed some time ago to consider the matter of larger rooms for the association made its report. This committee, consisting of Edward B. Hough, Everett L. Spencer and Alfred K. Potter, reported that it was absolutely necessary for the association to have larger quarters at once and stated that the committee had an option on a suite of rooms which would more than double the present floor space. The committee was given full power to act in the matter.

Anthony J. Cebral, 20 years of age, was arrested after a long chase from the manufacturing jewelry district through the business center of the city on Thursday afternoon. He went to the jewelry shop at 59 Clifford St., ostensibly looking for work. He left taking with him a vest that had been hanging in the closet in the shop of the George L. Vose Mfg. Co. The vest belonged to Edgar A. Mowry, treasurer of the company, and was valued at \$2, but in it were a watch valued at \$30, a chain worth \$5 and \$7 in cash. Investigating the youth's record and whereabouts of the last few months, it was discovered that he was the acknowledged leader of a gang of young thieves who had been doing a considerable business in their line for some time. No less than 20 cases of breaking

and entering will be placed against Cebal when he comes before the grand jury for trial.

H. A. Kirby and family have returned to this city from their Summer home on Warwick Neck.

Everett I. Rogers, of Parks Bros. & Rogers, was in New York the past week on business connected with the firm.

James McDonald, representing the Wolcott Mfg. Co., has returned from a successful trip among the western trade.

It was learned the past week that several of the manufacturing jewelers of this city and vicinity who have sent their trade-marks to Canada for registration under the provisions of the Canadian Stamping Law, which went into effect Oct. 1, have received their applications back, with refusal of registration. It is reported that in nearly every instance where registration has been refused it is explained from the office of the Secretary of Agriculture in Toronto, that the trade-marks are so similar to jewelry trade-marks already registered at England, Scotland and other places that they cannot be accepted. The manufacturers here who have been confronted by this difficulty are practically at a standstill in the matter. It means either the sending of their goods into the Canadian markets without any trade mark or stamp or else the adoption of a new trade-mark and the getting out a complete set of stamping dies for marking the jewelry and also the printing of new cards and other literature.

Armory Tonquay, the youth who was arrested in this city last week for having in his possession a lot of jewelry that he was endeavoring to dispose of at pawnshops and which later were found to have been stolen from the jewelry store of the Luzo-American Co., Fall River, was taken to that city a few hours after his arrest here. When arraigned Wednesday morning before Judge McDonough in the district court at Fall River he admitted breaking into and entering four different places. Tonquay gave his occupation as that of a jewelry salesman and said that he came from New York. He told the court that he had been making breaks in numerous towns and cities within a radius of 150 miles of New York and returning immediately to that city after making a raid. In this manner he had succeeded in eluding the police for several months. Manuel J. Ferreira, manager of the Luzo-American store, identified the articles of jewelry recovered from the pawnshops in this city and placed the valuation on the goods at \$265.75. Four charges of breaking and entering and larceny were preferred against Tonquay, to which he entered a plea of guilty in each case and he was held in \$2,000 bonds.

### Lebanon, Pa.

H. A. Seidel has improved his business place by installing a new wall case.

The Lebanon Retail Merchants' Association has appointed a committee to boss the membership.

Mrs. T. W. Block, wife of the well-known Huntingdon jeweler, entertained the H. P. T. Club, of that place, at her Summer home, Cliff House, last week.

Among the delegates to the convention of the State Sportsmen's Association, to be

held, Oct. 28 and 29, in Harrisburg, will be J. C. Schmidt, who will represent the Keystone Gunning Club, of Lebanon.

Among the members of the Muskrat Club, of Lebanon, and this city who returned last week from a successful two weeks' outing at Riverton, W. Va., was George P. Stoll, who caught the largest fish, a 5 $\frac{1}{2}$ -pound black bass.

### North Attleboro.

Harry Wilmarth is home from a trip for V. H. Blackinton & Co.

Harry Fisher has returned from a trip for Furbish, Swift & Fisher.

J. P. Bonnett & Son are enlarging their quarters in the company shops.

Curtis Reed has returned from a trip in the interests of the H. F. Barrows Co.

Howard S. Black left, last Friday, on an initial trip for J. P. Black. He visited New Hampshire and Vermont.

Walter White has assumed charge of the coloring and electroplating department at the J. F. Sturdy Sons Co. factory.

Melville Rhodes was presented Thursday evening with a Morris chair by the members of Sumner Lodge of the Knights of Pythias.

A third dividend of 10 per cent, is promised to the depositors of the Jewelers' National Bank by Dec. 1. The announcement was made Thursday.

Whiting & Davis and the Plainville Stock Co. were forced to suspend operations on Monday afternoon. An accident to the shafting stopped the power.

Charles T. Paye, of the Paye & Baker Mfg. Co., collected a good-sized contribution to the campaign fund of the National Republican Committee from among the local manufacturers.

Frederic E. Sturdy, Herbert K. Sturdy and Frank M. Sturdy have made application for letters testamentary in settling the estate of the late John F. Sturdy. A hearing will be given at the New Bedford Probate Court, Nov. 6.

The Hanlon-Thornton Co. has engaged the space in the Whitney building on Chestnut St. formerly occupied by the P. J. Callowhill Co. The Hanlon firm has been located on Smith St. since its organization several years ago. Removal to its new quarters will take place this week.

Emil F. Miller and Frank L. Miller will go into the coloring and jewelry business in Providence under the firm name of E. F. Miller & Son. Mr. Miller has resigned as colorer for the Cheever, Tweedy Co., and has also given up his position as captain of the fire department, a place he has held for 27 years.

Fire Chief Garverich, of Harrisburg, Pa., is investigating the fire which started one day, last week, in the watch repairing shop of M. Berman, at 422 Walnut St., and damaged about \$1,100 worth of property before it was extinguished. Berman said he was cleaning watches in the morning shortly before 10 o'clock and was using a lamp to heat solder when the lamp was knocked over. The flames immediately spread and he ran out and down the street. Several men standing on the street saw the smoke coming from the building and turned in an alarm.

### Attleboro.

Bernard Rothschild is traveling in the west.

E. C. Pepper, St. Louis, was a local visitor last week.

James Simms, of Simms & Co., has been elected to the Democratic Senatorial Committee.

Harry R. Holbrook made a trip through Connecticut, last week, in the interests of the Holbrook Mfg. Co.

Frederick W. Lincoln, of J. M. Fisher & Co., has been nominated for Congress by the Prohibitionists of the 14th District.

Arthur Wollberg, an employe of the Standard Button Co., lost a finger while working on a burring machine, last Friday.

Among the orders received by Attleboro manufacturers the past week were messages that the privilege of cancellation was retained up to Nov. 10.

The bowling team of the Standard Button Co. in the Jewelers' League climbed up to a tie with W. E. Richards & Co. at the close of last week's schedule.

Fred Hill won the Autumn cup of the Highland Golf Club for superior skill at golf. He defeated Fred Chipman in the final round after a spirited contest.

Harold E. Sweet, conservator of the property of Walter E. Haywood, was given permission by the Probate Court to sell land in Attleboro at a sitting Friday.

Many local jewelers are interested in the Attleboro Sanitarium & Hospital Co., which has been capitalized for \$200,000 under the laws of Rhode Island. The incorporators are John M. Fisher, Dr. Nicola and W. H. Draper, of Providence.

Bracelets and chain purses are in demand this Fall more than any other jewelry articles. Every local paper contains advertisements calling for more purse makers. One advertisement last week sought 250 people to make purses at home.

The Rothschild Bros. Co. has entirely removed from the Old Steam Power building, and is now comfortably settled in the Bates building on County St. The effects of the Klingtite Comb Co. have also been moved from Worcester and consolidated with the main concern.

Frank Brady, night watchman at the Horton-Angell factory, was startled early Thursday morning by a heavy crash of glass on the south side of the building. Hurrying to that section of the shop, the watchman found a partridge had broken through the window.

Mr. and Mrs. John D. Spaulding held a reception in Mansfield, Thursday night. A feature of the party was a second wedding. Mr. Spaulding, who is the son of D. S. Spaulding, the prominent jewelry manufacturer, was secretly married in New York several weeks ago to Miss Wellington, a teacher.

A man giving the name of R. French, who was a guest at the Depot Hotel, Elkhart, Ind., Oct. 8, left a small unpaid bill which he said would be settled by the Chas. M. Robbins Co., by whom he claimed he was employed. The members of this jewelry concern do not know French, never employed him, and never heard of him.

J. L. Harr has bought the business of the Pillsbury-Pratt Co., Nora Springs, Ia.

# THE CHESTERFIELD

The immediate success of this pattern with the Trade, upon its introduction, indicates a wholesome reaction from the elaborate, over-ornate designs with which the market has been flooded during the past few seasons, and its success also indicates that the trade are prepared to place before their patrons silverware of a higher artistic character whenever offered by manufacturers in whom they have confidence.

Out of the latter half of the XVIII Century there are few figures more interesting than that of Lord Stanhope, Earl of Chesterfield, statesman, wit and man of fashion.

His epoch was marked in literature and art by a revival of the classical ideals. The excavations at Pompeii, begun in 1748, were revealing treasures of ancient art which public taste was eagerly turning to for inspiration. Silverware, furniture and decorative art in general were reverting to a style more austere and subdued than that which had preceded. The Brothers Adam in England have left us many beautiful examples of this neo-classic art, and in France the private apartments of Queen Marie Antoinette also contain many typical instances of the exquisite workmanship of the Louis Seize period.

In its chaste and severely simple outline, the motif of the spoon is truly characteristic of the times. The decorative effect obtained by a tasteful arrangement of husks, swags, Grecian border, and such motifs of the period, is most happy in producing a design thoroughly representative of Chesterfield and his epoch in elegance and refinement worthy of the period.

We have something interesting to say about the Chesterfield to dealers throughout the United States who will write us direct for this information.

## Philadelphia.

D. R. Rilche, Royersford, Pa., spent last week on a gunning expedition.

William Norton resigned his position with S. Kind & Sons, 1110 Chestnut St., last week.

R. T. Chapman, Atlantic City, left, last week, for a vacation trip through Maryland and Virginia.

John Warmingham, 4069 Market St., was thrown from a trolley car last week, but not seriously injured.

John Ernst, watchmaker for the trade, has removed from the corner of 7th and Sansom Sts. to 36 S. 7th St.

M. F. Jacot, Allentown, Pa., was a visitor to this city, last week, spending a few days, combining business and pleasure.

Roy Phillips, late with John Ernst, 7th and Sansom Sts., has accepted a position as watchmaker with C. R. Smith & Son, 184 Market St.

On pleasure trips to the city recently were Samuel Ludwig and wife, of C. W. Bixler & Co., Easton, Pa., and J. C. Beitel and daughter, Catauqua, Pa.

The Bailey, Banks & Biddle Co. made an especially attractive display, last week, of new electroliers, in designs to harmonize with the various periods of interior decorations.

Henry Bolte, of Atlantic City, stopped off in this city, last week, after having returned from a Fall vacation, including visits to Stroudsburg, Delaware Water Gap and Boston.

The Burgoyne-Bingham Co., engravers, 25 S. 9th St., applied to Harrisburg, last week, for an amendment to their charter making the concern, the Burgoyne Co., incorporated.

Samuel Young, 1030 Columbia Ave., is receiving the congratulations of his friends in the trade upon a visit made to his home, last week by the stork, who left the youngest of the Youngs.

A. T. Johnson, formerly an instructor at the Philadelphia College of Horology, last week bought out the retail jewelry store of Mrs. M. E. Smith, at Smyrna, Del., and immediately assumed the control and management of it.

The plant of the Philadelphia Comb Co., bankrupts, Worrall and Tacony Sts., Frankford, is to be sold at a trustee's sale Tuesday of next week. Included in the sale will be a large stock and modern machinery and appliances for combmaking.

Oscar A. Stauffer, who is associated in the retail jewelry business with his father in Palmyra, N. J., skipped out from this city, last week, with Miss Elsie Ball, 1713 N. 17th St., and drove to Wilmington, Del., where they were married. Parental blessings followed at once.

A meeting of the creditors of Max Henschel, bankrupt retail jeweler, formerly of Germantown Ave., was held recently before Referee Edward F. Hoffman in the Harrison building. It was the first meeting of the creditors, and it is reported that the bankrupt's affairs will be speedily wound up.

Through the hearty support of his friends throughout the trade Harry Barry, of M. Sickles & Sons, who is entered in the contest for prize seats offered by the *North*

*American* upon the opening of the Hammerstein's new Philadelphia Opera House, was advanced, last week, from the 72d to 67th place and hopes this week to be still further advanced.

Among the visitors to this city's trade, last week, were the following: D. Krause, N. Wales; R. W. Quicksall, Mt. Holly, N. J.; Henry Bolte, Atlantic City; Ivan Jensen, Riverside, N. J.; Robert Holt, Clifton Heights; Roland Oliver, Burlington, N. J.; L. L. Bickings, Norristown; A. M. Kendall, Millville, N. J.; John MacPherson, Mauch Chunk.

Eager inquiries are being made by many Philadelphia wholesale jewelers to ascertain the whereabouts of Samuel Oster, a manufacturing jeweler, who has not been seen since Tuesday of last week about his place of business at 719 Sansom St. So far the inquiries have proved fruitless. His total obligations to the trade are reported to be about \$2,000, and it is to get an accounting that Mr. Oster is being sought. No formal action has been taken by any of his alleged creditors.

The Penn Smelting & Refining Works, 906 Filbert St., have installed an electrolytic plant for the refining of gold, silver, platinum, tin, zinc, copper and other metals, and are now making a specialty of absolutely pure metals for the jewelry trade. R. L. Whitehead, who has had wide experience as a metallurgical expert, and who recently equipped the United States Government mints at Denver and San Francisco with electrolytic refining plants, has now become affiliated with this company and has charge of assaying and refining departments.

## Rochester.

### TRADE CONDITIONS.

The local jewelry trade, which has been very quiet recently, was given an impetus the last 10 days by the first industrial exposition of the local Chamber of Commerce. There were many rural visitors and Rochesterians turned out as never before, thronging the main streets all week. Jobbers report business as picking up gradually and are in a more optimistic mood.

Word was received from Lockport, N. Y., last week, that Neil McIntyre, who said he was a jewelry salesman working for M. L. Danks, of this city, had reported to the police that he had been assaulted and robbed by two men to whom he was selling jewelry. He was knocked unconscious and jewelry samples worth \$800 stolen from him.

At the first annual exposition of the Rochester Chamber of Commerce held at Convention Hall, last week, Bastian Bros. and the Van Bergh Silver Plate Co. both exhibited and had very attractive and interesting displays. Bastian Bros. made a special feature of their celluloid and metal novelties, and a full line of class pins and badges were shown. The background of the booth was devoted to metal and celluloid signs. Placed on one side of the booth was a stamping machine on which was demonstrated the process of making campaign and other buttons. The Van Bergh Silver Plate Co. showed a very attractive display of tea sets, silver trays, silver-backed brushes, loving cups, candelabra, tankards, etc.—in fact, anything in silver plate. The

display occupied two large cases, and was in charge of F. W. Van Bergh, assisted by Miss M. L. McGinty.

## Boston.

C. S. Cook, Jr., general manager of A. Stowell & Co., is on a hunting trip in northern Maine.

Employees of the Shreve, Crump & Low Co. will have their annual dinner next Monday evening.

The Thomas Long Co. has opened a manufacturing department at 28 Chauncey St., occupying an entire floor.

E. C. Stetson, representing the Woodman-Cook Co., has been on a trip through northern New England during the past week.

M. N. Smith, of the Smith-Patterson Co., is at Atlantic City. H. W. Patterson, of the company, is on a hunting trip in the Maine woods.

Charles W. Downing, for about a score of years in the diamond department of Bigelow, Kennard & Co., is now with Hodgson, Kennard & Co.

A. W. Armington, diamond buyer for the Shreve, Crump & Low Co., is at the Hollywood Club game preserves in the Adirondacks on a hunting expedition.

Among the buyers in town the past week was Col. Charles Osgood of H. A. Osgood & Son, Lewiston, Me., who has just been elected a member of the Maine State Senate.

D. E. Cooley, clockmaker for some time with A. Stowell & Co., has taken a position with the William Senter Co., Portland, Me. Albert Hannaford, who has been with L. J. Wyman & Co., of State St., takes the position vacated by Mr. Cooley.

Maynard & Potter have had on exhibition in an effective group at their store this month the most elaborate display of opals, it is claimed, ever thus shown in this city. The October birth stone was thereby brought to the attention of many people.

Hodgson, Kennard & Co. will shortly occupy the handsome addition to their store at the corner of State and Devonshire Sts. They will gain upward of 1,500 square feet of floor space, and will have one of the most beautiful jewelry store interiors in Boston.

Fred Gagnon, claiming to be from Ogdensburg, was arrested Oct. 16 in the suburban city of Quincy, charged with attempting to break into the jewelry store of T. I. Williams. The burglar alarm gave warning of an attempt to pry open a window, and a patrolman who heard it took Gagnon into custody.

An action to recover diamonds sold to a pawnbroker has been begun by the Nathan & Hurst Co., of this city, against Patrick H. McCarthy, at Springfield. It is alleged by the plaintiff that the defendant purchased several diamonds which had been bought on the instalment plan, but not paid for before being sold to the pawnbroker. An attachment for \$300 in the case has been filed in the registry of deeds at Springfield.

A. H. Peacock, 227½ Elm St., Dallas, Tex., recently sustained a loss of \$500 by fire. There was no insurance.

The first instalment of the article upon Wenzel Jamnitzer, Germany's famous goldsmith, the 100th anniversary of whose birth was celebrated this year, begins in this number of THE CIRCULAR WEEKLY, and will be found on pages 63, 64 and 65, while an illustration of a notable work of this artist appears on the front cover of this issue. To our esteemed German contemporary, the *Journal der Goldschmiedekunst*, we are indebted for most of the information contained in the article and also for some of the illustrations used.

A SERIES of articles published in the *Saturday Evening Post*, of which the third appeared last week, is entitled "Frauds and Deceptions in Precious Stones," and is written by Dr. George F. Kunz. While interesting to the many readers of this progressive publication, these articles will undoubtedly have a good effect upon the jewelry trade in general, because the exposé which Dr. Kunz has given of the frauds in gems and jewelry perpetrated upon the public, both of this country and in Europe, drives home forcibly one point in the minds of the reader; that is, that no matter how careful he may be in selecting; no matter how much ordinary knowledge he may have about gems and jewelry, he is at all times liable to become the victim of the sharper (and the larger the purchase the greater the risk), and that his only safety lies in buying from an established jeweler on whose reputation he can depend. Inasmuch as many of the frauds cannot be noticed until months and sometimes years after the purchase has been made, the wise buyer and the man who seeks safety in the investment of his money is he who goes to a jeweler whom he knows he can find not only in a week, or a month, or a year, but in many years after the purchase has been made, and one who can be called upon to make good for any defect or flaw which may come to light. The legitimate dealer will lose nothing, but will undoubtedly discourage buying from mail order, fly-by-night, itinerant as well as foreign merchants, by calling these articles to the general attention of the public in his vicinity.

**Important Opinion as to Scientific Precious Stones.**

AT the recent convention of German jewelers in Heidelberg, where the question as to the nature of the so-called artificial or "scientific" precious stones was exhaustively discussed and a resolution expressing an attitude of opposition towards excessive advertisement of these productions was adopted, Court Jeweler Th. Heiden, in the name of the "Association of Jewelers, Gold and Silversmiths of Bavaria," spoke in favor of hearing an opinion of a prominent authority in regard to the entire subject. According to the *Journal der Goldschmiedekunst*, this has now been rendered, the well-known mineralogist, Prof. Dr. Conrad Oebbecke, of the technical high school in Munich, having expressed himself as follows, concerning artificial precious stones:

"Between the natural and the artificial precious stones, the material difference will always exist, that one is a natural, the other an artificial product. Up to the pres-

Publicity brings customers

ent time, I have not seen a single artificial precious stone that could not be recognized as such. The claim that the artificial stones are not to be distinguished from the natural gems, that they are absolutely free from defects, etc., according to my experience, is not justifiable. Even if it is possible to produce precious stones having the same crystallographic, physical and chemical properties as the natural gems, they are nevertheless not equal in value to the natural product. No more so than an ever so carefully executed and deceptively similar copy of a work of art, a painting, a piece of sculpture, etc., can be called the original. The artificial products, made in the laboratory, are not formed under the same conditions as the natural article, and for this reason we may rest assured that even should the present scientific methods of distinguishing the genuine from the artificial precious stones fail, further scientific investigation will reveal a method that will make the distinction possible. Interesting as may be the success thus far attained in the production of artificial precious stones, and while we may congratulate ourselves on the progress made in chemical technics in this direction, to the connoisseur, these articles will always be artificial products that can never deprive the natural stones of their value. On the contrary really beautiful natural precious stones will only be the gainer. The claim that synthetic stones will ever break the market for real precious stones, is, in my opinion, utterly unfounded."

This important expression of opinion, from so accurate a connoisseur, a scientific authority of the highest rank, cannot but contribute greatly to the elucidation of the whole situation, even in the least interested public circles.

**Latin America as a Clock and Watch Market.**

ACCORDING to statistics compiled by our Government and also the reports of our consuls, the market for American clocks and watches in South American countries shows that, in the main, the trade is in a prosperous condition. During the past fiscal year our exports of these articles to all South American countries was reported as \$362,752, as against a total value of \$334,571 in 1906-07. The export value of shipments to Central America show an increase from \$18,370 to \$20,824; for the Argentine Republic there is an increase from \$70,169 to \$94,639, and to Brazil from \$96,582 to \$113,717. The returns covering these shipments destined to Mexico, on the other hand, show a material decrease, for whereas in 1906-07 the value was \$56,449 in 1907-08 it was only

# FIRST HANDS

## CROSS & BEGUELIN

Importers and Cutters of Diamonds and Precious Stones

43 Rue de Meslay, PARIS

Telephone,  
480 John

31 Maiden Lane, NEW YORK

\$46,641; the other country showing a material decrease was Chili, from \$52,215 to \$42,482. To the remaining countries in South America the shipments show an increase from \$40,486 to \$44,449.

It must be evident that while this trade is small, yet it is one well worthy of cultivation. Only personal representation will serve to meet the exigencies of the situation, and one of the most important factors is that the person representing any special line of trade shall, when taking orders, familiarize himself with shipping and customs requirements and regulations. With this detail work our European competitors are fully familiar, and, in order to meet them on anything like equal terms, special attention should be paid to these matters.

### Canada Notes.

B. S. Yumie has gone on a buying trip to New York, for Ryrie Bros., Toronto, Ont.

The store of G. B. Ball, Stettler, Alta., was destroyed by fire on Tuesday, Oct. 13.

Grau & Co., Ltd., jewelry manufacturers, Toronto, Ont., have assigned to E. R. C. Clarkson.

H. B. Kent, of B. & H. B. Kent, Toronto, Ont., is on a duck shooting expedition, on Lake Simcoe.

Adolph S. Levy, of Levy Bros. Co., Hamilton, Ont., left last week for England and the European markets.

L. Herbert Luke, of Ambrose Kent & Sons, Toronto, Ont., accompanied by Mrs. Luke, is visiting St. Catharines, Ont.

Out-of-town jewelers calling on the Toronto (Ont.) trade last week included: Alex. Gibson, Peterborough; A. H. Beath, Sudbury; J. T. Skales, Mount Forest, and A. Morphy, London, all Ontario.

Robert Inkster's store, 233 James St. Hamilton, Ont., was visited by burglars early on the morning of Thursday, Oct. 8, two locks on the door being forced with a chisel. About \$150 worth of goods were taken.

Harold Harford was arrested in Toronto, Ont., last week, for defrauding a number of second-hand dealers by offering for sale apparently valuable gold rings bearing a 14-karat stamp. He sold them to about 10 dealers, asking only \$3 each, the buyers evidently suspecting that they were stolen goods and taking them without testing them. When melted down they proved to be cheap metal, gold washed and worth about 25 cents each, but the dealers under the circumstances submitted to the loss rather than complain to the police. On Wednesday, Oct. 7, Harford was committed to jail for six months as a vagrant.

Over two years ago the firm of T. J. Porte & Markle, Winnipeg, Man., on receiving a consignment of diamonds from London, found that one of the largest stones was missing from the package. The English dealer insisted that it had been sent and no trace of it could be found. Last week when the firm was removing from the old store on Main St., a workman, who was cleaning up the diamond room, raised one of the boards of the floor to look for the lens of an optical glass which had rolled into a crevice and discovered the missing gem. It was worth \$250 when bought, but has since appreciated in value.

Mark.

## H. A. KIRBY

85 SPRAGUE STREET  
PROVIDENCE, R. I.

9-11-13 MAIDEN LANE  
NEW YORK CITY

### Good Gold Jewelry

*It's the  
only kind  
we make*

A RATHER COMMONPLACE DECLARATION, WE'LL AGREE, BUT WE MAKE IT WITH AN INSPIRING REVERENCE FOR THAT MUCH-ABUSED WORD "GOOD." OUR JEWELRY IS GOOD ALL OVER—GOOD THROUGH AND THROUGH. IT ISN'T ALONE SUPERFICIALLY IMPRESSIVE, IT GOES BEYOND THAT, SUPPORTING ITS VISIBLE DIGNITY WITH MATERIAL QUALITIES THAT MAKE IT MOST ENDURING. FURTHERMORE, LIKE EVERYTHING IMPRESSIVE, IT HAS A PERSONALITY—CHARACTERISTICS THAT EASILY HELP IDENTIFY IT AS A KIRBY PRODUCT. ASK TO SEE THE KIRBY LINE BEARING THE ABOVE TRADE-MARK.

## New York Notes.

Morris Eisenstadt, of the Eisenstadt Mfg. Co., St. Louis, Mo., is in town.

A. L. Stone, head of Stone Bros.' Chicago store, is in town buying stock.

S. K. Merrill, of the S. K. Merrill Co., Providence, R. I., was in town last week.

Constad & Uydebroeck have opened a retail store at 195 Flatbush Ave., Brooklyn.

E. Stelhi, Chicago, sailed from this city recently on the *Kaiser Wilhelm II* for Europe.

Fred E. Sturdy, of the J. F. Sturdy's Sons Co., Attleboro Falls, Mass., was in town last week.

Mr. Hopkins, silverware buyer for R. H. Macy & Co., visited several of the eastern factories last week.

George Goldberg, with the Untermeyer Robbins Co., 71 Nassau St., has returned from a western trip.

Mr. Harris, a Cleveland, O., retail jeweler, will shortly open a new store on 14th St., near Fifth Ave.

St. Elmo Coombs, with the Paye & Baker Mfg. Co., North Attleboro, Mass., was in town last week.

J. Breen, James A. Houston's jewelry buyer, Boston, Mass., was a visitor in this city one day last week.

I. Kahn, buyer for Hochschild, Kahn & Co., Baltimore, Md., was at the local offices of the concern last week.

George A. Whiting, of Sturtevant & Whiting, North Attleboro, Mass., was at the New York office last week.

L. P. Kadison, of the firm of Fera & Kadison, 65 Nassau St., sailed Wednesday morning for Europe on the *Lusitania*.

Roy Thompson, with C. Ray Randall & Co., spent several days last week at the factory of the firm in North Attleboro.

Charles Downs, traveler for F. H. Cutler & Co., North Attleboro, Mass., returned to this city, last week, from an extended trip.

Bert Noble, who travels for Sturtevant & Whiting, North Attleboro, Mass., in the far West, was a New York visitor last week.

Charles F. Brinck, with the Crescent Watch Case Co., 21 Maiden Lane, has returned from a trip through the middle west.

Lewis Zahn, formerly employed by William Wise & Sons, Brooklyn, is now in the employe of Cross & Beguelin, 31 Maiden Lane.

Staiger & Sons are now settled in their new quarters at 170 Broadway, room 507. The firm moved from 926 Broadway, Brooklyn.

Louis Selig, a leading jeweler of Elizabeth City, N. C., was a visitor in this city last week. He made his headquarters at the Herald Square Hotel.

Mortimer Kollender, who has previously made his office with N. J. Weil, in the Lorsch building, has taken an office in the Singer building, room 2609.

Chas. H. Conant, formerly with Chester Billings & Son, has started in a general diamond brokerage business and will occupy an office in the Singer building.

F. R. Vaughan and F. L. Burnett, of the firm of Vaughan & Burnett, jewelers of Brattleboro, Vt., were visitors at the offices of THE CIRCULAR—WEEKLY last week. They

made their headquarters at the Grand Union Hotel.

William H. Cotter, formerly with the Bugbee & Niles Co., but now employed by Bernard Bandler & Son, 65 Nassau St., returned from a business trip last week.

E. N. Wolf, manager of Jacques Basinger's city office, is in Europe, visiting the Paris office of the concern. During his absence Mr. Karl, of Paris, is in charge of the local office.

Edward Muttendorf, formerly with E. & J. Swigart, Cincinnati, O., and now of the firm of Randolph & Muttendorf, Williamson, W. Va., was in town last week buying stock for a new store to be opened at Bluefield, W. Va.

Dieges & Clust, 23 John St., designed and made the diamond-studded gold watch fobs which were presented to each member of the New York "Giants," through the *New York American*, last Sunday night. The money was collected by 10-cent subscriptions.

The Judson C. Andress Co. has been incorporated under the laws of the State of New York to manufacture and deal in diamonds, clocks and jewelry, with a capital of \$15,000. The incorporators are: J. C. Andress, Harvey B. Blakeslee and Wm. H. Belander, all of New York.

For the loss of three fingers on his right hand Chas. W. Mooney, a silversmith, recovered a verdict in the Supreme Court in White Plains, last week, of \$3,500, against the Mauser Mfg. Co., Mt. Vernon. The plaintiff contended that a plunger on which he was working was defective.

By order of the United States District Court an auctioneer will sell to-morrow, at 10.30 A. M., the assets of Samuel Weinstock, 161 Rivington St., against whom a petition in involuntary bankruptcy was filed recently. The sale will include rings, watches, pins, fixtures, etc. L. B. Dekoven is the receiver.

Dr. George F. Kunz, of the precious stone department of Tiffany & Co., gave an address Saturday at the laying of the cornerstone of a memorial arch erected at Stony Point by the Daughters of the Revolution of New York State. The arch was erected to commemorate the battle of Stony Point. It is erected at Stony Point Park.

John D. Rose, the young man who called on Dieges & Clust, 23 John St., recently and purchased jewelry valued at \$67.50 for which he gave a bogus check for \$77.50 on the National Bank of Commerce, and was arrested by Detective Lieutenant Monahan, has been held in \$500 bail for trial. The bail was furnished and the young man is now at large.

According to the reports from Government headquarters, the imports of clocks and watches for the month of August, 1908, was \$189,649, as compared with \$279,221 for the same time in 1907; diamonds, \$1,371,037 for 1908, as compared with \$3,622,518 for the month of August, 1907, and jewelry, \$186,684 for 1908, as compared with \$166,507 for 1907. Exports of clocks and watches for the month of August, 1908, is given at \$201,540, as compared with \$286,814 for a corresponding time last year.

Chas. Geist, who conducts a jewelry store and optical parlors at 764 Columbus Ave.,

reports that last week a man came to his place of business and asked for a lady's gold watch which the man said was brought there for repairs by his sister. He said that the charges on the watch were to be \$1.50. When asked what the name on the identification tag was he could not give it and guessed two names, neither of which appeared on any of the watches left to be repaired. After a short time he left the store, when he found that he could not give an explanation sufficiently satisfactory to get the watch. The man was undoubtedly a crook and his scheme proved a failure.

Edward Feistel, a well-known jewelry salesman, employed by H. J. Meyers, 20 Maiden Lane, died Tuesday, Oct. 13, at his home, 812 Eagle Ave., Bronx, of cirrhosis of the liver, after an illness of some months. He was compelled to give up work in June and went to Meadow Hill, in Orange County, to rest, and in hope of help, but did not improve. He returned to his home where he grew worse until his death. Deceased was born in 1858 and was at different times a representative for Mr. Konawitz and Hersberg & Feistel. He was a member of the Knights of Pythias. He leaves a widow and five children. The funeral was held Friday morning, and the interment was in Washington Cemetery, near Coney Island, Brooklyn.

At a meeting held in the Yale Club last week the Business Men's Republican Association made final arrangements for the Taft & Sherman parade, Oct. 31. The organization includes representatives of 19 business organizations of this city. Col. John L. Shepherd, who is active in the matter, urges all those in the trade who are desirous of entering the parade to call at once at the headquarters of the Jewelers' Club, 15 Maiden Lane, and obtain enrollment blanks in order to enable those desiring to participate to form companies and select captains for the event. It is urged that this matter be not delayed as the time is short. Col. Shepherd will be marshal of the day, and it is hoped that a large representation from the trade will be present. The Waltham Watch Co. band will furnish the music.

The suit of Thomas L. Martin to recover \$4,400 from Alfred H. Smith & Co., diamond merchants, at 452 Fifth Ave., was tried, last week, in the Supreme Court before Justice Dowling and a jury and ended in a dismissal of the complaint. Martin sued to recover two per cent. on \$220,000, the price at which the Smith firm sold a black pearl necklace to Mrs. Collis P. Huntington four years ago. Martin alleged that he had been instrumental in bringing about the sale of the necklace by introducing a representative of Smith & Co. to Mrs. Huntington, and that therefore he was entitled to his commission. It was established by Martin's own admission on the stand that the necklace was sold to Mrs. Huntington by William D. N. Perine, and that Martin had never introduced Perine to Mrs. Huntington.

Friends in the trade extend their sympathy to D. D. Brokaw, owing to the death of his son Lester. The young man and his brother, DeWitt C., Jr., had been operated

(Continued from page 89.)

upon in the Muhlenberg Hospital for vari-cocele. DeWitt recovered, but Lester sank steadily and lockjaw developed. He died Tuesday night, Oct. 13. Deceased was only 19 years old. The funeral was held from the home in Plainfield Friday.

Frank Jeanne, of the firm of Wm. S. Hedges & Co., 170 Broadway, sails to-day for Europe on the *Oceanic*.

It is announced that the Elk Jewelry Mfg. Co., 51 Maiden Lane, has changed its name to the Alfred Schickerling Jewelry Co.

The successor of G. P. Granberry, whose retirement was noted in last week's issue of THE CIRCULAR-WEEKLY, is J. B. Haskin, 170 Broadway.

Mr. Hartman, of the Hartman Jewelry Co., Wapakoneta, O., was a visitor in town last week and made his headquarters at the Hotel Marlboro.

The Gorham Co. has been awarded the contract for the making of the silver testimonial to be presented to Senator Morgan G. Buckley, of Connecticut. Designs were recently submitted.

At the historical conference and bazaar for the benefit of the City History Club, to be held in the large ballroom of the Hotel Plaza, Nov. 13 and 14, Mrs. George Lung will preside at the Dutch booth, where there will be an exhibit of old Dutch silver and china, many of the articles will be for sale.

At the New York Evening High School for Men, at 59th St. and Tenth Ave., the following courses are now open: Design and modelling, apprentices in metal work, jewelry and similar trades, arts and crafts. This department offers a technical training in the making of jewelry and art metal work.

Schedules in bankruptcy of Solomon Eisenberg, jeweler of New Rochelle, show liabilities of \$2,480 and assets of \$362 cash in the hands of the sheriff of Westchester County, proceeds of sale of his stock under an execution. The schedules were filed Monday in the United States District Court in this city.

A composition settlement of Anzelewitz Bros., 125 Canal St., at 30 cents on the dollar, has been confirmed by Judge Holt, of the United States District Court. The settlement is in notes at six, nine, 12, 14 and 16 months. An involuntary petition in bankruptcy was filed against the concern in August. The firm's liabilities are about \$15,000, mostly new debts incurred since the compromise of 35 cents on the dollar accepted last October. The nominal assets were about \$9,969.

An offer of 40 cents on the dollar has been made by Maurice Brower, 12 John St. Schedules in bankruptcy of Mr. Brower filed in the United States District Court in June show liabilities of \$435,196 and assets of \$81,918, of which \$80,000 is property in revision. A special meeting of creditors will be held at the office of Referee in Bankruptcy Stanley W. Dexter, 71 Broadway, Oct. 29, at 4 p. m., for the purpose of considering the application to compromise certain claims asserted against the estate arising out of the pledging of certain stock by the bankrupt.

Many rare American and foreign gold and silver coins, together with fractional paper money and other varieties of currency, were sold by Auctioneer Dan R. Kennedy at the Elder Auction Rooms on Friday and Saturday. An octagonal \$50 gold piece of California, dated 1851, brought \$130, and a five dollar Mormon gold piece of 1819 sold for \$35. A rare variety of the 1907 Saint Gaudens \$10 gold piece, known as the "wire edge" coin, which instead of the usual broad milling shows just a knife-like edge, was bid in for \$10. It is said that but 25 of these pieces got into the hands of the collectors.

Abel Bros. & Co., 64 John St., importers of gems and manufacturing jewelers, have signed a lease for several years for the three upper floors in the building at the corner of Maiden Lane and Nassau St., previously occupied for many years by Chester Billings & Son. Abel Bros. & Co. have been located for nine years at their old quarters, but found it necessary to obtain larger floor space. The two upper floors in the new location will be utilized for manufacturing purposes and the lower floor for the office. They expect to move the office about Nov. 10, but will probably not move their factory until after the Christmas season.

The Board of United States General Appraisers decided Saturday that the local customs authorities are in error in returning umbrella and cane handles composed of gold and sterling silver set with precious stones for duty as "jewelry," with a tax of 60 per cent. Instead the Board holds that the articles should be classified as "manufactures of metal," at 45 per cent. The Appraiser reported that the precious stones set in the handles are the components of chief value, and on this ground justified the heavy assessment. General Appraiser Sharretts, in sustaining the claim of Knauth, Nachod & Kuhne of this city for the imposition of the lower rate, lays down the rule that in order to be jewelry the articles must be worn for personal adornment.

Judge Holt in the United States District Court has dismissed the petition in bankruptcy filed against Franklin W. Sackett, wholesale dealer in jewelry, 59 Maiden Lane, on Aug. 21. A settlement at 62½ cents on the dollar has been accepted by the creditors. The payment of the settlement is as follows: 25 per cent. in note indorsed by William E. Thorn, payable three months after the proceedings are dismissed; 12½ per cent. in note by Mr. Sackett and payable June 1, 1909, indorsed by Whitman S. Mead; 12½ per cent. payable in note of Mr. Sackett, payable Oct. 1, 1909, and indorsed by Mr. Mead; 12½ per cent. in notes of Mr. Sackett as follows: Jan. 15, 1910, 2 per cent.; April 15, 1910, 2 per cent.; July 15, 1910, 1 per cent.; Oct. 15, 1910, 1 per cent.; Jan. 15, 1911, 2 per cent.; April 15, 1911, 1 per cent.; July 15, 1911, 1 per cent., and Oct. 15, 1911, 2½ per cent. A number of the creditors did not finally favor the proposition of placing the business in the hands of trustees and felt that a secured or practically secured proposition would be more satisfactory. A 45 per cent. proposition was raised to 50 per cent. and later to 62½ per cent., of which 50 per cent. is secured by the in-

dorsement of Messrs. Thorn and Mead. The liabilities are placed at \$52,686, of which amount \$50,725 is to merchandise creditors. The assets amount to nominally about \$51,500.

## Connecticut.

At the recent Republican caucus, held in Wallingford, F. A. Wallace was nominated for the office of representative.

Herbert W. Leavenworth, at a recent meeting of the Board of School Visitors, of Wallingford, was elected purchasing agent.

Capt. H. B. Carter has resigned his position as foreman in the Waterbury Clock Co.'s factory, Waterbury, after 18 years' service.

J. Seddon and H. Schaefer have engaged in the manufacture of cut glass in Wallingford, under the firm style of Seddon & Schaefer.

Samuel Armstrong Kirby, son of Samuel H. Kirby, New Haven, and Miss Lillian Emerson, Ansonia, will be united in matrimony, Oct. 28.

Senator Irving H. Chase, who is well known in the jewelry trade, delivered an address at an enthusiastic meeting of the Taft Marching Club, held in Waterbury, on the evening of Oct. 13.

Burglars, one night, last week, entered the retail jewelry store of Eugene H. Rowe, 91 Grand Ave., New Haven, and stole five watch fobs valued at about \$100. The loot was taken from the show window, which had been broken by the thief.

L. R. Norton, treasurer of the Mechanics' Savings Bank, Winsted, who was taken suddenly ill at the office of the Wm. L. Gilbert Clock Co. during the early portion of last week, as he was attending a meeting of the directors of the concern, has so far recovered that he is able to be at the bank for a short time each day.

### Death of Otto H. Werner.

CENTERVILLE, Md., Oct. 15.—Otto H. Werner, a jeweler and prominent citizen of this town, died at his home, Kidwell Ave., at an early hour this morning, after an illness of nearly three months of stomach and liver trouble.

Mr. Werner was born in Germany in 1846, and came to Baltimore during his minority. In 1882 he engaged in business in Centerville with Eugene Arringdale, and shortly thereafter purchased the stock. Since then he has conducted one of the largest jewelry stores on the Eastern Shore.

Mr. Werner was a Mason of long standing, a Knight of Pythias and member of the Methodist Protestant Church. He leaves a widow and four children.

Kors Bros., Independence, Kans., are erecting a new electrically illuminated watch sign in front of their establishment. The sign has a diameter of 6½ feet.

M. J. Averbeck, 12 Maiden Lane, New York, has issued a catalogue which he sells in quantities to retail jewelers for distribution to the consumer. This enables the retailer to obtain an attractive catalogue for his customers at a much lower price than he could have them printed. No name but that of the retailer appears in the book.

## The Gold Chain House

## Pittsburg.

Aaron West, who has been ill for several months, has returned to business, much to the delight of his friends.

George S. Dunbar returned home Saturday from a trip to the lakes, and makes a trip to the northwest in a few days.

The Pittsburg Watch Co. has again opened its stores for business, creditors, as previously stated in THE CIRCULAR-WEEKLY, having accepted 25 per cent. on the dollar in settlement of their claims.

The mother of R. J. Henne, 6018 Center Ave., last week celebrated the 83d anniversary of her birth, which was an event of much interest to Mr. Henne and his friends. Despite her advanced age, Mrs. Henne is hale and hearty.

The Pittsburg Association of Credit Men gave a luncheon at McCreery last Thursday afternoon, which was attended by a number of local jewelers. About 25 new members were added to the association, which appears to be growing rapidly in membership.

George P. Christy, trustee for J. F. Murphy, who recently filed a petition in bankruptcy, advertises that he will offer for sale the stock and fixtures in the bankrupt's store at Dawson, Pa., Thursday, Oct. 22. The terms of the sale will be 10 per cent. cash at time of sale and balance when goods are turned over. Charles A. Tuit and John S. Christy are the counsel for the trustee.

The members of the Jewelers' Duckpin League rolled their first game of the season Monday, Oct. 12. The J. R. Reed team succeeded in taking three out of four; the Wattles took four straight from the Terheyden's, and the L. W. Vilsack's succeeded in taking four straight from August Loch's team. The highest individual score was made by Brosch, of the Wattles' team. The teams met again last night for play.

The Executive committee of the Pennsylvania Retail Jewelers' Association will shortly select the date for the next meeting of the association, in Harrisburg. It is likely that the date will be some time during the first week of next June. The officers desire to hold the meeting so as not to conflict with the dates of any other jewelry organizations or those kindred to the trade. New members are being added to the association almost daily.

A number of out-of-town merchants were in Pittsburg last week, buying stock, among them being William Hunt, Uniontown; B. F. Robinson, Clarksburg, W. Va.; C. A. Lohman, Braddock; A. Teplitz, McKees Rocks; R. H. Wolf, Smithton; Frank Worrell, Canonsburg; T. H. McNary, Washington; H. B. Potthof, Latrobe; F. H. Hayes, Washington; W. F. Krieg, Wheeling, W. Va.; George V. Brady, Washington; Frank Blosser, New Kensington.

Large crowds collected about the front of Henry Terheyden's place in Smithfield St. all of last week to watch a diamond cutter whom he had engaged to cut and polish stones. At times the crowd about the establishment has been four and five deep. It is proving quite a drawing-card to the house. Mr. Terheyden has the diamond cutter and his outfit snugly quartered in a building adjoining his store, he having

obtained the use of the window for display purposes for a number of months. He is highly elated with his experiment.

Henry A. Barrett, president of the Geo. B. Barrett Co., narrowly escaped being killed in an automobile accident a few days ago. His car met in collision with one owned by Dr. and Mrs. H. W. Taylor, and the machines came together with such force that the occupants of both were more or less injured. It was at first reported that Mr. Barrett, who is not in the best of health, was seriously hurt, but this proved to be untrue. He was badly shaken up and bruised and his machine damaged. The other car was badly wrecked, but both machines have been repaired. The accident occurred at Lang Ave. and Thomas Boulevard.

Samuel K. Reich, who last week was sentenced in Brooklyn to serve a term of not less and not more than 10 years, for swindling jewelers, may be brought to Pittsburg to stand trial here after he is released from the New York State prison. Reich is the man who got away with diamonds, valued at \$900, owned by John Bain, of 1015 Wylie Ave., by working a slick short-change scheme, fully set forth in THE CIRCULAR-WEEKLY at the time. A charge was lodged against him here. It was a source of much satisfaction to the local jewelers to know that Reich has been put away for safekeeping for some time to come.

Edward Foy, alias Clark, recently made an attempt to escape from the Western Penitentiary. Foy is wanted in Columbus, O., to answer a charge of robbing a jeweler there of \$5,000 worth of diamonds and wanted to get away from the penitentiary, for the reason that he knows a 10-year sentence is staring him in the face, as soon as he is released here. In this connection a scandal is liable to result in Pennsylvania, as Clark made and then repudiated a statement, accusing a guard of being implicated in the plot to let him and Walter Dorman, one of the members of the Biddle gang out, the guard to receive \$1,000 for feigning he was asleep. The plot failed. The matter was brought out in an investigation of the affairs of the prison made last week by a special committee from the State Board of Charities.

The Pittsburg police have been very active in their efforts to catch the swindler who endeavored to pass off a bogus check on C. S. Wiley at his place of business in Forbes St. two weeks ago. Several arrests were made, and Mr. Wiley viewed the prisoners, but was not able to recognize any of them. One of the men arrested claimed to be a relative of C. M. Schwab, whose name was signed to the check presented to Mr. Wiley. The man was visiting in Pittsburg from Homestead, and as he was not the man wanted he was released by the police. Mr. Wiley is of the opinion that the swindler has left the city. Detectives Porter and Roach last week arrested a man, who gave the name of F. J. Prince and other aliases, who is wanted here for passing several forged checks, but he is not the man Mr. Wiley is looking for.

A. L. Walker, Faulkton, S. Dak., returned recently from an eastern trip.

## Newark.

Frank Milhening, Chicago, son of J. Milhening, visited the office of Herpers Bros., Crawford St., this week.

The Elm Co., Lafayette St., has been obliged to take on several new hands during the past week to meet a rush of work.

Ten silver watches have been stolen from the second-hand jewelry store of Charles Strumfeldt, 183 Broom St., according to a report received at the Fourth Precinct. Entrance was gained through a front window.

Walter S. Noon, western representative for the Cory Co., Halsey and Marshall Sts., who was at the office of his firm this week, reported an improvement in conditions on the Pacific Coast with a prospect of increased activity before the month is out.

Those from this city who attended the Democratic National Convention at Denver, Col., purchased small gold nuggets as souvenirs of the trip and the rough bits of gold are now appearing as pendants. Wives and sisters of the delegates have had the nuggets fitted with chains and this novelty has temporarily overshadowed for their possessors the lockets and pendants usually worn.

Charles Keil, a jeweler, 582 Hunterdon St., figured as the plaintiff in the trial of an action for \$5,000 damages against the Public Service Railway Co. before Judge Heisley and a jury in the Supreme Court circuit recently. While Keil was trying to alight from a Plank road car February 9, 1906, at Sixteenth Ave. and 6th St., he received injuries that he said kept him in bed for 13 days. The defense was that it was Keil's own fault that he was hurt.

Albert Lache, principal of the Newark Drawing School, has issued letters to the manufacturers of this city inviting them to encourage the attendance of their employes. The letter calls attention to the fact that the school is again in session and points out that the classes in jewelry designing have been formed to meet the requirements of both beginner and those more advanced in the trade and that the courses are free to all those who show qualifications.

Owing to the recent robberies and attempted thefts at the factories of Newark manufacturers unusual vigilance is being exercised and it is believed that what threatened to be an epidemic of petty thievery has been stopped in time to discourage further attempts on the part of the burglars. Many of the factories are fitted with the most approved burglar alarm systems and during the past 10 days have been examined and placed in perfect working condition. Particular care is taken to remove all filings from the pans when the workmen leave the buildings each evening, as in two of the recent robberies the thieves depended on this material almost entirely for their loot. Manufacturers agree in saying that those responsible for the thefts must have had an intimate knowledge of jewelry manufacturing and the conditions existing in the buildings entered, as the ordinary thief would not have realized the value of the rough material and filings taken. It is believed that the robberies of the past two weeks will all be traced to the same gang. The police are now working on several clues which promise developments.

# A New Chatelaine Pin

“CREMAILLIÈRES”

(HOOK ON)

Patent applied for

Front view.

Three-quarter view.

No hooks to loosen. The bow slides right<sup>t</sup> over the pin, thus providing absolute security to the watch.

Letters patent have been applied for, and the trade is cautioned that our rights will be fully protected, and anyone making or selling any infringing pin will be vigorously prosecuted.

### Chicago Notes.

F. E. Wallis is now on a trip east.  
Frank Whiting is back from the Pacific Coast.

W. S. Sparrow has returned from the Pacific Coast.

Geo. Weidig has returned from a trip to the northwest.

S. W. Lindsay, Omaha, Nebr., was here all of last week.

F. Hedeen, 1603 W. 35th St., has enlarged his store.

Herbert E. Cobb has returned from a northwestern trip.

Melvin Hill is now representing Spies Bros. in the south.

Sam Barnett has returned from a three weeks' trip to Denver.

"Billy" Dunn, with Arnold & Steere, is on a trip to the northwest.

Hugh King has moved from his Summer home at Bass Lake to the city.

E. A. Moore now represents L. Fritzsche & Co. in Chicago and the west.

Mr. and Mrs. George Weisgerber, Salina, Kans., were visitors here last week.

A. L. Howard, Beloit, Wis., has been on the sick list for the past four weeks.

Mr. and Mrs. C. H. Clifford, Platteville, Wis., were in this market, last week.

L. Eisenbach, with A. Hirsch & Co., will remain out west until after the holidays.

Theo W. Foster, accompanied by Mrs. Foster, paid a visit to Chicago, last week.

W. A. Fay, with the John T. Mauran Mfg. Co., has returned from an eastern trip.

F. J. Jones, of the Sterling Mfg. Co., Cedar Rapids, Ia., visited Chicago last week.

A. Hirsch, accompanied by Mrs. Hirsch, is spending a month at Excelsior Springs, Mo.

Ernest M. Lunt, Chicago manager for the Towle Mfg. Co., is back from a visit to the factory.

E. Roth, general manager of the Western Clock Mfg. Co., visited the Chicago office last week.

James W. Clark has returned from a trip east, which included a visit to his home in Connecticut.

Ernest Bliss, of the Bliss Bros. Co., Attleboro, Mass., paid a flying visit to this city last week.

W. C. Swenson, secretary of the Barton-Parker Mfg. Co., Cedar Rapids, Ia., was here, last week.

J. Christensen, formerly manager for Goldman Bros., has gone into the dairy

business with his brother in Milwaukee, Wis.

Mr. and Mrs. Harold M. Collins, Petoskey, Mich., stopped over here, last week, on their honeymoon trip.

S. T. A. Lottis and Joe Finn returned, last week, from a quick diamond purchasing trip to New York.

Mr. Litcher, formerly jewelry buyer for the John M. Smyth Co., is no longer connected with that concern.

J. E. Weimer, Marcus, Ia., was here, last week, buying the opening stock for his new store in that town.

The wife of John Gaard, a retail jeweler at Beloit, Wis., underwent an operation last week, and is critically ill.

A second dividend from the bankrupt estate of the Shourds, Adcock, Teufel Co. will be declared on Nov. 4.

C. T. A. Smith and Paul Storm, representing Reed & Barton, came in from the road for a few days last week.

Miss Edna Levy, with Despres, Bridges & Noel, has recovered from her recent illness, and is again able to resume her duties.

J. T. Brayton, of the Julius King Optical Co., is on a hunting and fishing trip in northern Wisconsin with a party of friends.

The Manufacturing Jewelers' Association of Chicago held their first meeting since the Summer at Vogelsangs on Monday last.

Fire recently destroyed the jewelry store of G. Frangiamore & Co., 63 Oak St. The damage claimed is \$4,000, covered by insurance.

Ed. Hume has severed his connection with the Potter & Buffinton Co., and will represent Scofield, Melcher & Scofield in the west.

D. N. Jacoby, representing the Providence Stock Co., and M. L. Jacoby, representing the Manchester Mfg. Co., visited this city, last week.

G. W. Stolz, retail jeweler of Saginaw, Mich., was here, last week, and paid a visit to the Elgin National Watch Co.'s plant at Elgin, Ill.

Mr. and Mrs. John Schmelzer, Centralia, and Mr. and Mrs. John R. Reeves, Mount Pulaski, Ill., were guests of J. Ziegler here, last week.

The residence of J. C. Howard, with J. Becker & Co., was recently entered by burglars and about \$300 worth of jewelry and clothing was stolen.

Joe Crawford, with J. W. Forsinger, returned from a western trip, last week, and is now on a trip east. Louis R. Millar,

with the same firm, is back from a southern trip.

George A. Hallenbeck, president of the Simon L. & Geo. H. Rogers Co., visited G. O. E. Smalley, their Chicago representative, last week.

A second and last dividend of 14½ per cent. has been declared to the creditors of the Madson & Steele Co. Checks will be mailed in about 10 days.

Mr. Tobin, of Tobin & Canham, Springfield, Ill., was married, Oct. 20, to Miss Lena Jones, Rochester, Ill. Mr. and Mrs. Tobin are now on their wedding trip to the southwest.

The many friends of Mr. and Mrs. Edmond J. Hahn will be sorry to learn of the death of their little baby girl, Josephine Adele Hahn, who passed away recently, aged three months.

Fred S. Williams, engraver and die setter formerly with the Phoenix Engraving Co., has gone into business for himself and is making his headquarters with E. A. Dayton & Co., 151-3 Wabash Ave.

News was received here, last week, that the show windows of the jewelry store of Alfred E. Palmer, Grand Forks, N. Dak., were smashed one night recently, and about \$600 worth of watches and jewelry stolen.

Diamond men in town last week were: S. C. Powell; Fred Mayer, with the Bruhl Bros. & Henius Co.; Otto Sinauer, with Oppenheimer Bros. & Veith; Cyrus Price; Albert Levy, with Marchand Frères, and Norbert Hoffman, with Eichberg & Co.

C. A. Cole, Mount Carmel, Ill., who is also a member of Cole & Hull, Winterset, Ia., was here, last week, buying stock. Mr. Cole's brother, who managed the store at Mount Carmel, was forced to take his wife to California on account of her poor health, and C. A. Cole is now managing the Mount Carmel store while Mr. Hull is running the Winterset store.

The Chicago office of the Seth Thomas Clock Co. is busy these days, shipping street and tower clocks. The concern recently shipped a two-dial street clock to J. L. Murphy, Livingston, Mont., and one to Max Krieger, Milwaukee, Wis. This house also furnished a large four-dial street clock for the new store of David Goldman, Milwaukee, and a four-dial tower clock for the Jefferson City, Mo., State penitentiary.

Louis Bruns, for 10 years with the Juergens & Andersen Co., and who for some years past has represented this house on the Pacific Coast, with headquarters at Denver,

You will save Money. Get the Styles and Dependable Qualities

WE MAKE

**The Alliance Ring**

The graceful style of the Alliance Ring is rapidly supplanting the use of the old-style wedding ring. The joints are invisible, and whenever engraving is desired it is done in the inside surface. Can be easily separated by inserting a pin in inside pinhole.

14 karat, 3 dwts., each, \$1.25 per dwt.; in dozen lots, \$1.15 per dwt., net; 18 karat, 3 dwts., \$1.40 per dwt.; in dozen lots, \$1.30 per dwt., net.

MADE ONLY BY  
**LEONARD KROWER**

Wholesale Manufacturing Jeweler and Optician  
 536-538 Canal Street, New Orleans, La.

Colo., will sever his connection with the concern, Dec. 1 next. Mr. Bruns has bought out the retail jewelry store of the estate of Amos N. Wright, Portland, Ore., and will refit the store, increase the stock and continue the business in that city.

Among the buyers in town, last week, were: Henry W. Hardie, Holland, Mich.; Jas. J. Dalglish, Grundy Center, Ia.; M. F. Tinsley, Harlan, Ia.; Will H. Beck, Sioux City, Ia.; Henry Rank, silverware buyer for the Bunde & Upmeyer Co., Milwaukee, Wis.; E. E. Chandler, Boone, Ia.; Adam Innig and W. A. Pfister, Sheboygan, Wis.; Grace E. Orendorff, Delavan, Ill.; J. D. Patterson, Port Huron, Mich.; William G. Stolz, Saginaw, Mich.; Fred Overstreet, Paxton, Ill.; Mr. Levin, Levin Jewelry Co., Calumet, Mich.; C. Jansen, Davenport, Ia.; S. A. Asquith, Waterloo, Ia.; T. E. Alyea, Earlville, Ill.; H. H. Trockenbrod, Manchester, Ill.; C. F. Graff, Elkhorn, Wis.; Mrs. Enma Wehmhoff, Burlington, Wis.; J. R. Jenkins, Jenkins & Saltsman, El Paso, Ill.; Daniel Doering, Wakarusa, Ind.; Thos. Bufton, Union Grove, Wis.; Geo. Mueller, Dean & Mueller, Arapahoe, Nebr.; Geo. L. Goodale, Lenox, Ia.; Joseph Chero, Iron River, Mich.; Samuel O. Adams, Polo, Ill.; C. H. Bagley, of F. D. Day & Co., Duluth, Minn.; H. Post, Decatur, Ill.; C. I. Josephson, Moline, Ill.; Richard Weitlich, Sturgeon Bay, Wis.; A. H. Frandsen, Monmouth, Ill.; A. J. Lauch, Kankakee, Ill.; Chas. Maurer, Champaign, Ill.; G. J. Johnson, Paxton, Ill.

### Denver.

Peter Sorensen, a well-known designer and engraver of this city, has left for New York.

Max Dawedauff, formerly of San Francisco, Cal., has bought the stock of M. Molineck, 927 15th St.

Faxon B. Park, manager of Dan S. Park & Co., Cheyenne, Wyo., returned to Cheyenne, last week, after spending a couple of weeks in Denver.

Harry Gossett, late owner of the Brunswick Bowling Alleys, is now employed by the Lyman Bros. Jewelry Co. as the manager of that concern's factory.

Among the marriage licenses issued last week was one to Hugh McLaughlin and Miss Cecelia Klemmer. Mr. McLaughlin is city salesman for the W. W. Hamilton Jewelry Co., of this city. He and his bride will reside in this city when they return from their honeymoon.

C. A. Syman, of the Syman Bros.' Jewelry Co., 828 16th St., this city, one day last week, stopped a runaway horse which was dashing up 16th St. during the noon hour. At the time of the runaway the streets were crowded with pedestrians and several barely escaped being struck.

Dan S. Park, of Dan S. Park & Co., Cheyenne, Wyo., and also of Watson & Newell and Wilcox & Wagoner, Denver, has returned from a trip through the middle west. Mr. Park reports a very successful trip, and says that the Fall business in his estimation will be very satisfactory.

E. L. Deacon, formerly with Frank Hurd, of this city, has bought out J. B. Flatow. Mr. Flatow was the successor to Dan S. Park & Co. Mr. Deacon intends to put in

a new and complete line of material, of which Jos. Richdale will have charge. The firm will do business at the old headquarters of Dan S. Park & Co., room 18, Jacobson building.

The Denver Safe Deposit Co., which will open for business about Dec. 1, will institute a day and night service, and be equipped with a large show room directly connected with the vaults for the use of jewelry salesmen. The location, at 1534 California St., is in the center of the first-class retail trade, and is directly connected with the Hotel Standish.

### Los Angeles.

Emory Wright is assisting George H. Curry, 138 S. Broadway.

Armand Weilish, formerly with George Graves, San Francisco, is in this city on a business trip.

J. Herbert Hall, Pasadena, passed through this city, a few days ago, on a business trip to San Francisco.

Messrs. Hambright and Walsh are both preparing to start out on the road, expecting to be out until Christmas.

Rubin & Clark are having a new front put in and other improvements made in their new store at 331 S. Spring St.

H. T. Brown, traveling representative of Gilmore & Lee, started a few days ago for a trip through the southern portion of the State.

Leonard Woelz, formerly manager of the Simon Conradi Co., has returned from his wedding trip. He has not yet engaged in business.

E. T. Willis, recently with S. B. Bailey, 353 S. Broadway, has accepted a position with Jos. Mayer & Bro., Seattle, as traveling representative.

C. A. Liffiton, new traveling representative for the E. W. Reynolds Co., is making his maiden trip for that house, going over the southern California territory.

The Whitley Jewelry Co. has added six new men to its force. They are A. E. Eacrett, Belville Lanning, L. F. N. Neuwirth, H. E. Anthony, Reuben Kerkum and W. J. Buffet.

"Gilbert Robert Gilmore, born Oct. 10, 1908," is the inscription on a delicate little visiting card which R. H. Gilmore, of Gilmore & Lee, is proudly presenting to his friends.

Theodore Lyons, New York, and O. Lipman, of the workshop, are going to Arizona soon, to look at a turquoise mine prospect on which Mr. Lipman holds an option. A sale of the property from Mr. Lipman to Mr. Lyons is being considered.

Carl Entenmann, of the Carl Entenmann Jewelry Co., is again busy in his factory after his four months' visit to Europe. He reports the jewelry business in the parts of Germany visited by him to be no better than in this country.

Out-of-town jewelers who have been in this city recently include: E. T. Lewis, Long Beach; R. L. Arnold and M. W. Wiard, San Diego; George Kryhl, of C. P. Kryhl & Son, Santa Ana; A. De Paeme-laere, Gardena; J. E. Peters, Long Beach.

S. Simmons, 315 S. Spring St., now has his gem-cutting factory in full operation, having turned out his first work last week.

He expects to employ about eight men, although he has only half that number at work at present. He recently sold an exceptionally large lot of uncut turquoise.

Jerome T. Martin, formerly of Buffalo, N. Y., has been engaged as an outside salesman for Garretson & Hubbell, who have just gone into the manufacturing business at 342 S. Broadway. James D. Bell, formerly with Chas. L. Crawford & Co., Peoria, Ill., is the die cutter and engraver for the new firm. The firm purposes to manufacture first-class goods and cater to the best trade.

Leonard Vett, who pleaded guilty to the theft of a \$120 set of diamond earrings from J. Mackowsky, on May 21, was sentenced by Judge Jannison, a few days ago, to two years in Folsom penitentiary. Mrs. Lucia Vett, who was accused jointly with her husband, was acquitted at a recent trial, but the jury disagreed as to Vett. He consented to plead guilty if a second grand larceny charge against him should be dismissed.

### Milwaukee.

#### TRADE CONDITIONS.

Milwaukee jewelers are predicting that the coming holiday trade will be exceptionally good. General manufacturing industries in the city are fast returning to the normal stage, money is more plentiful and confidence is being restored. Collections are proving to be very satisfactory and jewelers are doing less credit business than a few months ago.

L. A. Eppenstein, Chicago, visited this city, last week.

H. Henrich, New York, called upon the Milwaukee trade, last week, introducing a new salesman, who will cover the field hereafter.

A handsome new display window has been completed by A. F. Puls, located on the second floor of the Public Service building. The new window is especially attractive at night when it illuminates an otherwise dark street. Mr. Puls is official time-keeper for the Milwaukee Electric Railway & Lighting Co.

Carl Manfred, San Francisco, a recent Milwaukee visitor, told of conditions existing in the Caroline Islands, which threaten to hurt the pearl trade. The government has placed a 10 per cent. tariff on the products of the islands, which means something of a death blow to trade. Mr. Manfred says that already the tariff has stopped the traffic in pearl trading.

The regular monthly meeting and dinner of the Milwaukee Jewelers' Club was held at the Hotel Blatz Wednesday. The attendance was especially large and various matters of interest to the trade were discussed between the banquet courses. Secretary Franklin Thomson was unable to be present, owing to the fact that he celebrated his wedding anniversary, which fell on that date.

The action brought by David Goldman to recover damages as a result of the tearing down of his street clock, last Spring, has been dismissed by stipulation in the Milwaukee courts. The costs of the action, amounting to \$38.33, were charged to Mr. Goldman. The case was watched with much interest in the city, as Mr. Goldman brought it in the nature of test proceedings with the sanction of the Milwaukee Jewelers' Club.

## Cincinnati.

### TRADE CONDITIONS

Business here seemed to be stimulated considerably during the past week owing to the Knights Templar Conclave, which brought several thousand visitors to our city. There was a good representation of jewelers, many of whom are prominent officials in this order. While there were no large sales to speak of, there was quite a demand for souvenir articles and small goods in the retail business. The auction sales of the Duhme Jewelry Co. and the Oskamp Jewelry Co. obtained their share of patronage from the visitors, and are still going on. These auctions do not affect the trade generally among the retailers as was first feared. The stores throughout the city report business is improving and is up to what it has formerly been at this time in the year.

Jonas Wise, of Frohman & Co., has started on his regular northern business trip.

Sol Fox, of Fox Bros & Co., sailed, Oct. 13, for Europe, where he will engage diamond cutters for his house.

George Schemel, the son of Anthony Schemel, 1943 Central Ave., has entered the services of Barker & Frisens.

S. M. Whitehead, Middlesbro, Ky., has just opened a new store, for which he was here buying stock the past week.

Duhme Bros., Covington, Ky., have discontinued their musical department and are putting in a large line of clocks.

Samuel McCollum, Winchester, Ind., was here, last week, buying the opening stock for his new store in that place.

C. S. Bennett, bookkeeper for the Frank Herschede Co., is kept away from his business by what is feared will be a long illness.

George Graeser, with Edward F. Kaelin, and Miss Lillie Schone, of this city, were married last week, and their many friends in the trade extended congratulations.

Louis H. Albert, of Albert Bros., is enjoying a 10 days' stay at West Baden, Ind. Henry J. Weiss, bookkeeper of the same firm, has returned from a pleasure trip.

The employes of the Oskamp Jewelry Co., some of whom have been with this company since its origin, are gradually making connections with other firms in the city. Henry Schroeder has taken a position with Herman Lange, Arcade and Vine Sts.; John Helmas, watchmaker, is now located with the Duhme Jewelry Co., and "Al" Whitman has gone with the Frank Herschede Co.

Out-of-town jewelers here during the past week buying stock included: F. W. Bromberg, Birmingham, Ala.; J. W. Sparks, Sabina, O.; Grant Luzader, Pennsboro, W. Va.; J. D. Ward, Rising Sun, Ind.; A. Boiarsky, Charleston, W. Va.; E. Israel, Harrison, O.; L. T. Vimont, Millersburg, Ky.; Albert Stamm, Williamsburg, O.; E. F. Starks, Newport, Ind.; J. L. Young, Ft. Wayne, Ind.; Frank Fullilove, Owenton, Ky.; Miss A. Barret, French Lick Springs, Ind.; A. Davidson, Shelburn, Ind. and F. J. Schell and wife, Xenia, O.

Members of the Knights Templars in the jewelry trade who were in this city during the Knights Templar conclave the past week included: L. W. Lewis, Columbus, O.; P. W. Stark, Manchester, O.; F. E. Brand, Mr. Marvin and Edward Warfel, Findlay, O.; W. T. Born, Kenton, O.; Lewis Lea and J. T. Montgomery, Sandusky, O.; H. A. Bedell and wife, Jackson, O.; John Selbert, Frankfort, Ky.; Mr. Colbert, Athens,

O.; Albert Zoellner, Portsmouth, O.; Walter Wittlig and wife, Marietta, O.; F. G. Wittlinger and wife, Middletown, O.; John Knoeke, Lexington, Ky.; Frank Hemm and C. F. Schlegel, Chillicothe, O.; John Bucher, International Silver Plate Co.; C. D. Brooke, Coshocton, O.; George Deuble, Canton, O.; W. Bohlender, of W. T. Eby & Co., Dayton, O.; A. Sargent, Crooksville, O.; R. L. Andrews, Leesburg, O.; F. D. Knapp, Toledo, O.; O. G. Kelley, Eaton, O.; A. Hershberger and wife, Shreve, O.; S. F. Kaufman, Attica, O.; A. P. Lower, Bradford, O.; Mr. Melville, Lima, O.; John Gardner, Dennison, O.; F. C. Haller, Fremont, O.; C. K. Hamilton, Lebanon, O.; F. A. Schweeting, Oxford, O.; R. Myers, Van Wert, O.; Mr. Keller, Georgetown, Ky., and J. A. Sloncker, Scio, O.

## Minneapolis and St. Paul.

Alfred Anderson, Minneapolis, has returned from a business trip to Chicago.

J. Falk has opened a new store at the corner of 8th Ave. S. and Washington Ave., Minneapolis.

White & MacNaught, Minneapolis, have begun to move their stock and fixtures to a new location at 596 Nicollet Ave., in the Andrus building.

A. P. Meyer has re-engaged in the jewelry business on S 7th St., between First and Second Aves. S. Minneapolis, after having been in the printing business for a short time.

John D. Bodfors, 304 Nicollet Ave., Minneapolis, has started to remodel the interior of his store. He will have more store space when the improvements are completed.

Among out-of-town jewelers who visited the Twin Cities recently were: L. J. Hunter, Tracy, Minn.; A. W. Carlson, Lindstrom, Minn.; J. M. Cubbison, Minnetonka, N. Dak.

Miss Anna Newman, 20 years of age, who recently escaped from the State Hospital for the Insane, at Rochester, Minn., was located, last week, in the retail jewelry store of F. H. Harm & Bro., 387 Robert St., St. Paul, after the authorities had been searching for her for about a month.

## Detroit.

A. J. Tulian, Alpena, was in this city the past week.

Henry Kahn has been succeeded by the Imperial Mfg. Co.

Wm Ulrich is in charge of the jewelry department installed by Geo. A. Marsh & Co.

Adolph Enggass was in Saginaw recently visiting his daughter, who has just been married.

R. G. Allison, St. Johns, and W. F. King, Jr., Adrian, came in for the baseball games last week.

Among other out-of-town jewelers in this market, recently, were: A. E. Winans, Chelsea; O. F. Kleckner, Milan, and E. J. Peters, Tecumseh.

O. R. Wilson, 105 Okmulgee Ave., Muskogee, Okla., called on some of the local jewelers a few days ago. He is a jeweler and optician of that city.

## Indianapolis.

William J. Hoffman, of Hoffman & Lauer, has returned to work, after a week's illness.

The jewelry store of Frank Gipson, Arlington, was slightly damaged by fire one day last week.

Miss Bernadetta Murphy has taken a position with J. P. Mullally, succeeding Miss Myrtle Hiddinger.

A business and pleasure trip to Memphis, Tenn., is being made by E. M. Craft, of the A. P. Craft Co. Mr. Craft will be gone two weeks.

Julius C. Walk and C. J. Kiefer left Monday, of last week, for a fishing trip to Lake Maxinkuckee. They will be away for two weeks.

Charles Hammer, a local pawnbroker, was fined \$50 and costs in the Criminal Court, last week, for unlawfully wearing a Masonic emblem.

E. H. Froecking left, last week, for Oklahoma City, Okla., where he has taken a position with A. L. Cohen. He was formerly with the Arts and Crafts Shop.

In the organization of the Liberal League, last week, J. P. Mullally was honored with the office of president. Mr. Mullally is also president of the Indianapolis Retail Jewelers' Association.

Mayor Charles A. Bookwalter, last week, appointed Ferd. L. Mayer, of Charles Mayer & Co., a member of the Board of Park Commissioners. The position carries no salary, but is a responsible one.

In an effort to stimulate interest in the trade, the Arts and Crafts Shop, on Massachusetts Ave., has offered three months' free instruction in engraving to young men who are interested in the work and have had some experience.

Charles B. Dyer has taken into partnership with him his brother, John Dyer, and the firm name will be known as Dyer Bros.' Arts and Crafts Shop. Mr. Dyer was an engraver with Charles Mayer & Co. for several years. His successor has not been appointed.

Mrs. Adeline Hiddinger has announced the marriage of her daughter, Myrtle, to Charles Langbein, the ceremony having been performed at St. Patrick's Church, Oct. 9. Mr. Langbein is with Hoffman & Lauer. Miss Hiddinger was formerly employed by J. P. Mullally.

Out-of-town jewelers in this city, last week, included: J. W. Hudson, Fortville; S. B. Merrick, Plainfield; Mrs. B. Maier, Edinburg; Clyde Porter, Tipton; H. J. Hoffman, Ladoga; C. A. Bassett, Anderson, and Mr. Booth, of Booth & Son, Tipton.

The John Herron Art Institute has on exhibition a collection of Persian curios collected by Dr. John G. Wishard. Included in the collection are half a dozen silver teaspoons of striking design. As the Persians do not sip coffee with a spoon, the spoons are made with a hole in the bowl to prevent a breach of etiquette.

A fraud order was issued by the Post-Office Department, last week, against the Rogers Silverware Co. and the Rogers Mfg. Co., doing business from headquarters in Boston and Worcester, Newark, N. J., and New York.

FINE MADE DIAMOND MOUNTINGS  
AND SPECIAL ORDER WORK.

FRANKEL BL'D'G,  
45-49 JOHN ST.  
NEW YORK.

## "SELL WHAT YOU HAVE, NO MATTER WHAT YOUR CUSTOMER MAY WANT!"

Is the order often issued to salesmen, but does it always pay? Surely the best advertisement is a satisfied customer. For instance: A lady enters a country store and, addressing the clerk, says: "I should like to have six sheets of fly paper."

The Instructed Clerk—"Very sorry, madam, but we sold the last we had on hand this morning. We have, however, some very fine sand paper, will you let me show it to you?"

### BUT IS THIS MUCH BETTER?

Scene. Country Jewelry Store. Enter Lady Customer—"I should like to have something in a small diamond drop and chain."

The Proprietor "I am so sorry, madam, but I sold the last one a few days ago, could I not persuade you to purchase something else? For instance, I have a nice line of cluster rings" (mentally, have had them for ten years).

Lady "No, thank you, I know what I want."

**MORAL:** Have your old clusters made into salable drops and necklaces by ROEDE.

SEND POSTAL FOR SUGGESTIONS

### St. Louis.

F. W. Drosten, of the Frederick W. Drosten Jewelry Co., is out of the city on a hunting trip.

Local friends of Otis Richbourg, Morrilton, Kans., have learned that he has removed to Wagner, Okla. His store there will be opened the latter part of this month.

Edward Gerson, formerly a diamond merchant at room 306, Commercial building, died, Oct. 11. Mr. Gerson mysteriously disappeared several months ago, and business associates did not know where to locate him.

Philip H. Nolting, 4182 Delmar boulevard, was married, Thursday of last week, to Miss Julia M. Mehlig, of St. Louis. Young Mr. Nolting is a son of Phil Nolting, a pioneer jeweler on Vandeventer Ave. He recently opened the store on Delmar boulevard.

Sneak thieves who used a duplicate key got into the store of the People's Loan Co., 713 Pine St., one morning last week, and made away with \$500 worth of fraternity pins, lodge badges, watch fobs, stick pins and small jewelry articles. The robbery was committed in the early morning hours, and no trace of the thieves has yet been obtained. The plunder was carried away in two stolen suit cases.

Alfred C. Wilson, assignee of the J. P. Morgan Jewelry Co., pursuant to an order of the Circuit Court, received sealed bids for the sale of the entire stock of jewelry, watches, fixtures, etc., of the above-mentioned concern, located at 205 Equitable building, in this city, until yesterday. One of the conditions for the bidding was that each bid should be sealed and accompanied by a certified check for \$500.

Among the out-of-town jewelers in St. Louis the past week were: C. J. Miller, California, Mo.; L. S. Smith, Kosciusko, Miss.; W. W. Johnson, Doniphan, Mo.; Jeff. B. James, Marshfield, Mo.; John Hartmiller, Lebanon, Mo.; H. Heintz, Mount Olive, Ill.; George Porth, Jefferson City, Mo.; Perry Short, Monett, Mo.; F. O. Leidel, Troy, Ill.; B. C. Bowden, Mayfield, Ky.; Charles Goodrich, Caruthersville, Mo.; O. E. DeWerthern, Columbia, Mo.; Enno Dick, New Baden, Ill.; Mr. Gmelich, of Gmelich & Schmidt, Boonville, Mo.

### Pacific Northwest.

L. C. Henrichsen, Portland, Ore., is taking an outing at Cloverdale, Ore.

The store of F. W. Stein, Miles City, Mont., was entered a short time ago by burglars, and stock valued at \$500 was stolen.

The store of S. S. Bettman, Bremerton, Wash., was robbed of a \$200 solitaire ring last week. The theft occurred while Mr. Bettman was in Seattle.

The store of D. Shuman, 615 W. Holly St., Bellingham, Wash., was broken into recently, and stock valued at about \$100 was carried away. Entrance was effected to the store by smashing the plate glass window.

A well-dressed young man, who claimed to be a representative of the Elgin National Watch Co., and giving his name as Willard Bell, has been arrested for defrauding an

innkeeper at Prairie City, Ore. He will also be prosecuted on other charges.

Rather than stand trial on the charge of looting the store of A. Toepelt, Doty, Wash., last November, George Wyatt pleaded guilty when his case came up before the court at Chehalis, last week, and was immediately sentenced to the State prison for a long term.

### Kansas City.

Robert Lindsay, Chicago, has taken a position as jeweler with the Meyer Jewelry Co.

Mr. Campbell, of the retail jewelry firm of Hart, Parker & Campbell, Shreveport, La., was in this city last week.

J. W. Brown, who has been house salesman for the Ward & Crellin Jewelry Co. for some time, is now covering a Missouri territory.

Leslie White, with the Ward & Crellin Jewelry Co., is in this city this week, taking in the stock show, and filling his trunks for another trip.

P. R. Preston, with the Edwards & Sloane Jewelry Co., has been making a short trip to Eldorado Springs, Mo., calling on the trade in that section.

Clem B. Altman has purchased the property on the northeast corner of 11th and Locust Sts. for a consideration of \$60,000, and will erect a business building.

Louis Meyer, president of the Meyer Jewelry Co., spent several days of last week at Chanute, Kans. H. N. Snow, of the concern, made a short trip to Chicago last week.

The following out-of-town jewelers, not elsewhere mentioned, visited in this city last week: A. J. Carruth, Herington, Kans.; Leslie Hutton, Lebo, Kans.; E. Neuenschwander, Lowry City, Mo.; C. H. Paxton, Paola, Kans.; A. L. Howard, Louisburg, Kans.; W. T. Brown, Sterling, Kans.; Kelley Bros., Greensburg, Kans.; G. P. Roberts, McCune, Kans.; R. E. Bertholf, Cherokee, Kans.; W. G. Glick, Junction City, Kans.; D. D. Johnson, Sedgwick, Kans.; Ora Stutzman, Garden City, Mo.; T. S. Green, Cestos, Okla.; A. C. Rosser, of A. C. Rosser & Co., Osage City, Kans.; Mr. Rosser, Topeka, Kans.; M. B. Gordon, Braymer, Mo.; J. O. Bates, Manhattan, Kans.; A. Eisberg, Princeton, Mo.; W. R. Pearce, Gardner, Kans.; G. H. Avery, Glen Elder, Kans.; M. O. Quibb, Everton, Mo.; W. W. Pace, Windsor, Mo.; W. N. Kirkman, Edgerton, Kans.; R. S. Settle, Kearney, Mo.; F. A. Wesley, Holyrood, Kans.; Arthur West, Galena, Kans.; O. A. Karnes, Overbrook, Kans.; R. W. Goucher, Clay Center, Kans.; J. W. Bishop, of the Bishop Jewelry Co., Claremore, Okla.; C. W. Wiedman, Knobnoster, Mo.; C. G. Post, North English, Ia.; Carl Ricker, Emporia, Kans.; Elmer Fry, Belleville, Kans.; Mrs. Walter Starcke, Junction City, Kans.; E. R. Kennedy, La Crosse, Kans.; R. C. Libby, Weir, Kans.; F. Ritter, Leavenworth, Kans.

S. Lazarus & Co., manufacturing jewelers in the Masonic Temple, Chicago, have just issued a 36-page catalogue illustrating more than 1,000 pieces of jewelry, including rings, mountings, locketts, etc. The book is well printed on heavy paper, and will be sent free to retail jewelers on application.

### San Francisco.

Joseph H. Norris, special representative of Shreve & Co., is now out on the road visiting that firm's customers, and reports excellent success. When heard from last he was at Stockton, Cal., and expected to be in that city for several days.

The W. K. Vanderslice Co. is still looking for a down-town location, and has several under consideration. A site will be chosen this time west of Kearny St., as it is here that the high-class shopping trade will be found when the firms get settled once more.

The wholesale firms which recently moved to the new Jewelers building, on Post St., are all well settled and are expecting a number of other jewelers to follow them soon. Many of the smaller firms in the Kamm building are tied down by leases and will move just as soon as it is possible for them to make the change.

The local police are on the lookout for the men suspected of perpetrating the \$50,000 robbery at Evanston, Wyo., last month, as it is thought that the men are here and that an attempt may be made to dispose of some of the plunder in the pawnshops. Chief Biggy has received a description of the stolen jewelry and information leading to the identity of the men who committed the theft.

### Pacific Coast Notes.

F. E. Jenkins, Santa Paula, has returned from a business trip to Fillmore, Cal.

Hare & Arnold, San Diego, have dissolved partnership, Mr. Arnold having bought the interests of his partner and become sole proprietor.

W. P. Maddux has purchased the business of B. Jackson, Lincoln, Cal., and is now installing an entirely new stock. Mr. Jackson has removed to Gridley, where he opened a store, Oct. 10.

The silver cup offered to the Victoria Club, to be played for by the women golfers of the club, will be manufactured by the Gorham Co., having been ordered through F. Pequegnat, who will engrave the names of the winners.

The Mesa Grande Gem Co., through J. W. Rockwood and the Naylor Gem Co., has presented to the Chamber of Commerce at San Diego, Cal., some specimens of gems taken from nearby mines, and these are now on exhibition.

Manager Burger, of the T. B. Clark jewelry concern, is now spending nearly all his time at the new store in San Pedro. He intended at first to open an auction sale, but on account of the prohibitive license of \$30 a day, demanded by the city authorities, he has not done so.

The Jupiter Consolidated Jewel Co., which was recently incorporated at Fresno, Cal., will start a jewel-cutting and polishing plant in that city about Nov. 1. The firm will deal almost exclusively in California stones, principally tourmaline, topaz, chrysoptase, ruby and garnet. A. L. Benson, Chicago, will have charge of the shop, and R. D. Sibley will be the local representative.

Moses B. Hirschfield, Hancock, Mich., moved recently to Milwaukee, Wis.

## Omaha.

Jno. Voss, with J. P. Frenzer, has returned from his vacation.

R. P. Rasmussen, Edgar, Nebr., was in this city, last week, calling on old friends.

Fred Brodegaard & Co. presented a diamond ring to the Benson Eagles last week.

Wm. Nere, with the Hutson Optical Co., has left for Valentine, Nebr., on a hunting trip.

L. Ketterer, with Jos. P. Frenzer, is now in western Nebraska, enjoying a hunting trip.

W. H. Valhowe, with the Shock Mfg. Co., is home from a short business trip to O'Neill, Nebr.

L. A. Holliday, Douglas, Wyo., has taken a position as watchmaker with the Mawhinney & Ryan Co.

W. H. Eyer, Little Sioux, Ia., and Phil. Folsom, Ashland, Nebr., were in this city replenishing stock last week.

Grover Peterson, with the Sol. Bergman Jewelry Co., is making a business trip through the State of Nebraska.

Miss Emma Quinn, for 15 years in the employ of the Mawhinney & Ryan Co., as buyer, was married, last week, to M. J. Lawson, of this city.

F. B. Harris, Lincoln, Nebr., accompanied by his family, has returned from an extensive trip abroad. Mr. Harris was in this city for a few days of last week.

## Toledo.

### TRADE CONDITIONS.

Toledo jewelers are interested in and are taking an active part in Toledo's annual trade week which will occur next week. Considerable money has been spent in arranging to bring jobbers, merchants and private customers to Toledo for many miles around.

E. Merrill, senior member of the Merrill Broer Co., returned Saturday from a two weeks' trip through the east and middle west.

W. A. Rankin, manufacturing jeweler, 513 Jefferson Ave., has purchased a lot on Scottwood Ave. and will shortly begin the erection of a fine new residence.

Chester Richmond is back with J. George Kapp, 415 Summit St., after a short term employment elsewhere. Mr. Richmond has been with Mr. Kapp about 15 years.

Hull Bros., umbrella manufacturers, are contemplating some important improvements and enlargements in their store and manufacturing establishment on Summit St.

William Veler, who for many years has conducted a jewelry store at Starr Ave. and East Broadway, has temporarily leased his store to M. Sandoz. Mr. Veler will erect a handsome new building for the People's State Bank, of which he is a stockholder.

The store of J. D. McConnell, jeweler at Greenspring, O., about 30 miles southeast of this city, was totally destroyed by fire early last week. The fire was one of the most disastrous in the history of the town and a greater portion of the business portion of the city shared the fate of Mr. McConnell's store.

L. T. Dillon & Co., Litchfield, Minn., have sold out to E. W. Gruenhagen, Vienna, S. Dak.

**READ THIS  Brother Jeweler**

This is an exact copy of the advertisement placed by this Company in the Cincinnati Enquirer of October 16th, 1908.

I also wish to state that I now have three first-class Jewelry auctioneers to assist me, and remember, Brother Jeweler, that I am **the Recognized Leading Jewelry Auctioneer of America.**

**THE AUCTION SALE**

Of THE OSKAMP JEWELRY COMPANY is meeting with wonderful success, sales running into thousands of dollars daily, due to many reasons:

First, the name of OSKAMP stands without a stain for honest and honorable dealings.

Second, five thousand of their old customers know their stock of diamonds is one of the finest in America, and was selected by Wm. S. P. Oskamp, one of the most noted experts of diamonds in this country for the past thirty years. The public will find no off color or poor color diamonds in this stock and have over one quarter of a million dollars' worth of fine goods to select from.

Last, but not least, the Auctioneer, Mr. DAN I. MURRAY, of New York, is one of the most celebrated jewelry auctioneers in the world, who is also an expert on diamonds and everything in fine jewelry and bric-a-brac, having spent twenty years of careful study on these lines.

Mr. Murray is the auctioneer who closed out the stock of Dodd, Werner & Co., of this city, who retired from business a few years ago. The public will remember his gift of explanation of the quality of every piece of goods he sold in this sale, which was the finest stock ever sold in this city; the Oskamp Jewelry Co. knew of his expert knowledge of goods, and that is why they employed him to conduct their sale.

Come and join the crowds that are here daily to hear him talk. The leading professional men of the city who know and appreciate a gifted orator are here daily to hear Mr. Murray. We welcome you to come and hear this gentleman salesman. You will benefit also by his knowledge of goods, which he imparts to you on the explanation of every piece of goods he sells. Remember the sales daily from 10 A. M. to 6 P. M.

**OSKAMP JEWELRY COMPANY,**

S. W. Cor. 5th and Vine Streets, Cincinnati, Ohio.

## Special Notices.

(Continued from page 107.)

### BUSINESS OPPORTUNITIES.— Continued.

FOR SALE, half interest in an old, well established, big paying jewelry business located in a beautiful and healthy southwestern city of 20,000 or more population and good outside country to draw from; enjoying a fashionable trade with finest selected stock and fixtures; finest store in this section; business in A1 standing commercially as well as with its customers; made money during panic; finest opportunity for good, lively man with \$15,000 to \$16,000 cash; sickness cause for selling. Address "T., 317," care Jewelers' Circular-Weekly.

CANON CITY, COLO., population 10,000, the healthiest city in the United States, offers for sale a prosperous and beautiful jewelry store, located in the business center on main street; all new mahogany fixtures; art glass window; price \$1,000, including all the fixtures, safe and part of stock; complete with all the stock, \$3,000. G. L. Gunther, Canon City, Colo.

DO YOU WISH TO RETIRE? Are you looking to raise ready cash quick? We are ready to purchase your entire or surplus stock of diamonds and jewelry, no matter how large it may be; we also advance liberal cash on same; highest prices paid for entire stocks; communicate with us before consulting others and get quick returns; communications strictly confidential. Address Brooklyn Purchasing Syndicate, 608 Broadway, Brooklyn, N. Y., Telephone, 2328, Williamsburg.

### For Sale.

SAFE, largest made, fire and burglar proof, large double chests, cost \$1,500, will sell for \$400; get specifications; other sizes also. Ohio Safe Co., 905 Freeman Ave., Cincinnati, O.

FOR SALE, good chain stock of jewelry and fixtures, also stationery and office supplies; reason for selling, poor health. For particulars write "H. A., 410," care Jewelers' Circular-Weekly.

DIAMONDS, cash bargains, sizes  $\frac{1}{4}$  to  $\frac{3}{4}$  carat, \$69 per carat; about 40 diamonds left; very desirable. Rubenstein Bros., diamond cutters, 14 Maiden Lane, New York; Telephone, Cortlandt 1624.

FOR SALE, pair of bullion balances, capable of weighing to 1,000 ounces, made by Troemner of Philadelphia; 26 inch beam, 8 inch pan rests, brass scoop, leveling screw feet, mahogany and glass case with drawer complete; are in good condition and will sell at about half the price when new. Apply W. H. Williams, 709 Sansom St., Philadelphia, Pa.

### To Let.

DESK ROOM or window space to let, fine light. Inquire Room 41, 68 Nassau St., New York.

DESK ROOM to let in large light office. Inquire Room 106, 10th Floor, 1 Maiden Lane, New York.

DESIRABLE space for rent for watchmaker in best located building in Chicago; rent moderate. Address E. C. Jacob, 806 Columbus Memorial Bldg., Chicago, Ill.

LOFT, 1,500 square feet, equipped with machinery for jewelry or light manufacturing; cheap; elevator service. Address "N. C., 581," care Jewelers' Circular-Weekly.

UNEXCELLED furnished desk and safe privileges, also private partitioned office with rolltop desk, suitable for watchmaker, engraver, setter or stone broker. Inquire of Superintendent, Cookroft Building, 71 Nassau St., New York.

### Miscellaneous.

PORTRAIT MINIATURES copied from any photo on watches, dials, brooches and lockets. Goldstein Engraving Co., 45 Maiden Lane, New York.

[IN WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN, THE UNITED STATES PATENTS THAT HAVE EXPIRED AND THE REGISTERED TRADE-MARKS.]

UNITED STATES PATENTS.

ISSUE OF OCT. 13, 1908

**900,833. FOUNTAIN-PEN.** ALONZO T. CROSS, Providence, R. I. Filed Aug. 21, 1906. Serial No. 331,517. Renewed May 14, 1908. Serial No. 432,902.

A fountain-pen provided with an ink-duct adapted for the passage of ink from the reservoir to the

writing pen, and having an air-duct leading upward to the ink reservoir, and an automatic valve adapted to close the air-duct, to regulate the flow of ink to the pen.

**900,855. ATTACHMENT FOR CLOCKS.** ERNEST A. HUMMEL, St. Paul, Minn., assignor to Albert L. Haman, St. Paul, Minn. Filed June 29, 1907. Serial No. 381,469.

In combination with the pendulum of a clock, a pair of members movably supported adjacent

thereto and formed with grooves to receive the opposite sides of said pendulum, means holding said members locked together with the pendulum fitted in said grooves, and a stationary block secured between and engaging with said members to hold the same rigid and in locking position.

**900,944. FOUNTAIN-PEN.** JACOB J. MEAD, New York, assignor to the Mead Fountain Pen Co. Filed Nov. 2, 1907. Serial No. 400,413.

In a fountain-pen, the combination with a barrel,

a feeder and a point, of a piston fitted to and mounted in said barrel, a stem having a longitudinal slot therein and branch slots forming therewith a part of a bayonet joint, whereby said pis-

ton may be reciprocated, and a sleeve carrying a pin seated in said longitudinal slot and adapted to enter said branch slots, mounted on said stem and exposed exteriorly of the pen, whereby said sleeve may be reciprocated with said stem or independently thereof.

**901,050. ELECTRIC CLOCK.** CHARLES H. WHITE, Sparrows Point, Md. Filed April 24, 1907. Serial No. 369,928.

In an electric clock, the minute arbor thereof provided with a tight ratchet wheel, a rocker which is loose on the arbor having an extended weighted arm and carrying a pawl which engages with the teeth of the ratchet wheel together with a shank bearing an armature, a cam suspended loosely from the arbor, an independent spring-

held lever having a notch therein to receive the cam, means to communicate motion from the rocker to the cam and thereby in the vibratory motion of the rocker, throw the cam into and out of the said notch, combined with a magnet and a contact plate for the notched lever, the said magnet notched lever and contact plate being in an electric circuit.

DESIGNS.

**39,613. BADGE.** JOHN P. MULLALLY, Indianapolis, Ind. Filed Aug. 24, 1908. Serial No.

450,120. Term of patent 7 years.

**39,614. BADGE.** BURTON THOMPSON, New York. Filed Aug. 27, 1908. Serial No. 450,696.

Term of patent 3 1/2 years.

**39,615. BADGE OR SIMILAR ARTICLE.** OSCAR W. GRAY, Cambridge, Mass., assignor to Joseph Cowan, Boston, Mass. Filed Aug.

1, 1908. Serial No. 446,499. Term of patent 7 years.

**39,616. WATCH-CHARM OR SIMILAR ARTI-**

CLE. MAURICE J. WOHL, New York, as-

signor to the Economy Electric Co. Filed June 16, 1908. Serial No. 438,867. Term of patent 14 years.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."]

PUBLISHED OCT. 13, 1908.

Ser. No. **32,435.** (CLASS 27. HOROLOGICAL INSTRUMENTS.) THE HAMPDEN WATCH Co., Canton, O. Filed Jan. 25, 1908.

Particular description of goods.—Watches and watch movements and parts thereof.

Ser. No. **36,639.** (CLASS 37. PAPER AND STATIONERY.) L. E. WATERMAN Co., New York. Filed Aug. 13, 1908.

Particular description of goods.—Safety-clips for fountain-pens and pencils.

BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS, 1907, FROM The Illustrated Official Journal.)

ISSUE OF SEPT. 30, 1908.

**13,829. TIME-RECORDERS.** C. MERCIER, London. June 14.

Relates to modifications in the type-wheels and the platen and strip-feed mechanism of time-recording apparatus for workmen, etc. The operating-lever 15 has a baffle box 35, Figs. I. and IV., for the thumb-piece 37, to prevent insertion of wire or tampering, and has pivoted catches 13, 29 for operating the platen and winding-on drum. The platen consists of a plunger 4 resting on a piston 7 having a tubular extension enclosing the operating-spring 9, the piston being lowered by a shouldered catch 13 till this is tripped by the incline 19; the spring then operates the platen with unvarying force. A washer 22, loose on a stud 23 and attached to the spring, rotates at each stroke and distributes the wear on the piston 7. The spring catch 29 pivoted to the lever 15 engages a series of holes 32 in the drum 28 so as to feed the strip at each stroke. The index type 24 on the second printing-dial is mounted movably against a spring 25, as shown, so as to yield on being struck in order to ensure even impression. The type-dial 1 fits on studs on the flange 62, Fig. II.b, of a conical sleeve 61 fitting on the hub of the pinion 58 and having a key engaging a slot in the hub of the clock hand 57. In the second form of the invention, the force of the platen stroke is mainly controlled by a strong spring 51 acting on a bolt 50, which must be thrust back by

**Atlanta, Ga.**

John W. Murrell, who has been connected with the retail jewelry business for many years, is now associated with the business of Harry L. Dix, Inc., in the Candler building.

Homer K. Nehr, well known among the young jewelers of Atlanta, recently bought an interest in the business of the Eugene V. Haynes Co., and is now connected with this firm.

The second annual convention of the National Society for the Promotion of Industrial Education will be held in this city, Nov. 19, 20 and 21, 1908. The headquarters of the society will be at the Piedmont Hotel, where the banquet will be held on Thursday evening. The meetings of the convention will be at the State Capitol, House of Representatives. The exhibition of work by pupils of the trade schools will be arranged in the corridors of the State Capitol, surrounding the House of Representatives.

August Warren, formerly of A. Warren & Son, opened a new store in Calumet, Mich., Oct. 12, under the style of the Warren Jewelry Co. Mr. Warren's new business is at 321 Fifth St., where he is carrying an exceedingly large stock of jewelry, watches, silverware, cut glass, clocks and kindred lines. He is making a feature of his repairing department, which is under his personal charge.

**Lancaster, Pa.**

Cyrus Kline is in Boston, visiting his brother.

Howard Forrest is on a trip to New York and Rochester.

H. F. Yergey, Columbia, has been visiting Philadelphia.

J. M. Kreider, Ephrata, has installed a fine burglar-proof safe in his store.

L. W. Davidson, of the Jewelers Board of Trade, New York, paid a visit to Lancaster last week.

L. M. Fein, a Reisville (N. C.) jeweler and optician, who is north on a pleasure trip, was in Lancaster last week.

G. William Reisner, manufacturing jeweler, has returned from a trip through the Cumberland Valley, Pennsylvania.

Howard Overdeer, late with Foster & Cochran, has re-entered the service of Ezra F. Bowman's Sons as an engraver.

Miss Jeannetta M. Wrey, 28 years old, for years employed at the Hamilton Watch Factory, died Oct. 14, from consumption.

Frank Patton, who went to Colorado six months ago, suffering from pulmonary troubles, has returned home in excellent health.

C. E. Foose, of the Non-Retailing Co., is home from a western trip. Howard Detterlein, of the same firm, is visiting eastern Pennsylvania.

S. Kurtz Zook, who retired from the presidency of the Retail Merchants' Association at the annual meeting, Oct. 13, gave an interesting talk on the work accomplished during the past year.

Frank A. Dietz and John L. Kohr, students of the Ezra F. Bowman Technical School, have been spending a week at Atlantic City, N. J. John A. Shober has returned from a trip to New York.

The people whose watches and jewelry W. T. Gardner had in his possession when he closed his store here and departed for Kalamazoo, Mich., may be interested in knowing that he has just been located in Chicago. None of his creditors appear willing to go to the trouble and expense of starting proceedings to bring him back to Lancaster.

Among the jewelers in Lancaster last week were J. H. Sensenig and C. E. Hinkle, New Holland; H. Frank Maurer, Strasburg, Pa.; A. K. Brubaker and H. L. Oberlin, of Oberlin Bros., Columbia, Pa.; Frederick Matthias, Millersville, Pa.; Victor Burdell, Seranton, Pa.; Oscar Jones, Trenton, N. J.; Charles Leibman, Wilmington, Del.; Julius Ferris, Columbus, O.; John P. Porter, Milwaukee, Wis.

C. L. Taylor will hereafter conduct the business of Taylor & Klar, Dennison, O.

"Christmas Suggestions for Gift Givers" is the title of a very attractive booklet which the Peninsular Engraving Co., Detroit, Mich., have issued. It is finely printed on enameled paper, and contains a number of beautiful plates in natural colors, showing enameled and stone-mounted jewelry and other plates of silver novelties and watches. These booklets are supplied in quantities to the better class of retail jewelers for distribution to their customers.

# THE HOROLOGICAL REVIEW

## The Theory and Practice of Clockmaking.

By Sir Henry Hardinge Cunynghame, K.C.B., in the *London Watchmaker*.

### PART I.

THE mysterious character of time has led philosophers to wonder how far its existence is real, or, at least, how far it is in reality, as we understand it. These views culminated in the opinion of Kant, who treated time as a mere form or condition of

FIG. 1.

human receptivity, so that as apart from sentient beings time had no existence at all.

I have not time here to follow the interesting train of reasoning by which the great thinker sought to show the subjective character of time, but I may briefly say that he considered his conclusions established by the fact that time of itself cannot be conceived apart from other things, and that it

FIG. 2.

has no material objectivity. ("Critique of Pure Reason," Part 1, Sec. 2.)

Those whose method of thinking leads them away from abstract speculation will, no doubt, deride these views. For them matter is matter and time is time, and they

wish to know nothing more about them. And for the practical clockmaker this view must be sufficient. To him time is a reality, and his art is directed to find means for its measurement.

To this end we must endeavor to determine a standard of measurement for time. A number at once present themselves. The speed of thought might be a standard, were it not so uncertain. We might watch chemical changes, or the growth of animals or plants. But, of all the changes which go on around us, and on which we might base our standard of time, none appears more suitable than the motion of matter through space. And of all the bodies in motion, and modes of motion, none appears more suitable than the rotation of the earth upon its axis. From historical and astronomical considerations, which it would be out of place to consider here, it appears probable that the velocity of spin of the earth upon its axis is uniform. If it changes, and some think that its velocity does change, then such variation in its rate of speed is exceedingly small, and for our purposes inappreciable. So smooth and steady is this spin in space that we can detect no irregularity, and it has always been selected as the standard of measurement of time.

Since the spin of the earth upon its axis is regular, it follows that the stars ought to pass the meridian uniformly, and in regular order. And this would be the case if the earth's axis were always parallel to itself in space. But this is not so. Just as a top, when it spins, not only turns, but also "wobbles" round on its point, so the earth's axis slowly revolves in a cone making a complete revolution in 40,000 years. Whence it happens, that each year the place of the stars slowly varies.

For the purpose of clockmaking, however, we may treat the sidereal revolution of the stars as constant.

It has been customary from the earliest ages, among the Chaldeans and the Egyptians, to treat the complete days as divided into 24 hours, divided into three watches of eight hours each, commencing at midnight.

The Greeks adopted a different system. They divided the day, from sunrise to sunset, into 12 hours; and likewise the night. Whence it followed that the length of the

Greek hour and day constantly varied—whereas the Egyptian is uniform.

The division into 60 minutes and 60 seconds is derived from the ancient nations—especially the Greeks. For it must be remembered that our present decimal notation was quite unknown to the Greeks.

Even in such a work as the great syntax of Ptolemy, all the calculations are made in 60th parts, not in decimals. And hence, minutes and seconds were also used in the computation of time. When the decimal system, first adumbrated by Archimedes, developed by the Arabians, and then reintroduced into Europe, came into vogue, the measurement of time was left unchanged.

FIG. 3.

And we inherit from the Greeks our minutes and seconds of time.

The sidereal day is divided into 24 hours, each of 60 minutes, and each minute contains 60 seconds. Such a system would, however, be inconvenient for popular use. In that case the hours of the day would depend upon the meridian passage of the stars, not upon the meridian passage of the sun. For, of course, as the earth while it rotates on its axis, turns round the sun, S, in the same direction, while it makes 366 rotations on its axis as compared with the fixed stars, it only makes 365 as compared with the sun. If, therefore, the sun and a star are in a line, when viewed from the earth, then when the earth has made one revolution as compared with the stars it will have made more than a rotation as compared with the sun.

This may be seen from Fig. 1. The lines to the fixed star, E S, E' S' may be treated as parallel, owing to the immense distance of the star, which makes the want of parallelism between E S and E' S' incapable of being measured even by delicate telescopes. Whence, then, it is clear that the sidereal day, or the earth's time of turning once on its axis with regard to the star is shorter than its time of turning on its axis with regard to the sun, by the angle E L E', where E E' is the amount traveled by the earth in a day. And it is also clear

The above reproduction of a photograph taken in front of our factory at Waterbury, Conn., will serve to acquaint the readers of "The Jewelers' Circular" with the Missionary-Salesmen of the New England Watch Company.

Beginning with the back row, and reading from left to right, the names of the men and their territories are as follows: John Cruess, New York State; S. R. Warner, Minnesota, Wisconsin and the Dakotas; H. C. Warner, West Virginia, Ohio, Kentucky and Tennessee; W. J. Butterfield, Chicago; F. Van Olinda, Pennsylvania; second row, R. C. Vaughn, Illinois; R. P. Clark, Indiana and Michigan; A. L. Atkins, Sales Manager; Carl Wolff, Kansas, Missouri and Oklahoma; front row, W. C. Gretter, South Atlantic and Gulf States; D. H. Raymond, Iowa and Nebraska; W. P. Gretter, Jr., Assistant Sales Manager; L. E. Gretter, New England States; Everett T. Allen, New Jersey, Delaware and Maryland; bottom step, W. L. Hough, New York City.

In addition to those whose pictures are given, Messrs. E. N. Holland, covering Arkansas and Texas, and Harry C. Birch, whose territory is in the principal cities of the South, are also connected with the Waterbury Office.

Buir W. Freer is Pacific Coast representative, with offices at 717 Market Street, San Francisco.

These men are in convention this week at the Waterbury office, but will soon be in their respective territories again, ready to serve you.

## The New England Watch Co.

Waterbury, Conn.

that the angle  $E S E'$  is  $1/365$ th part of  $360^\circ$ , whence then the lag of the sun among the fixed stars will be 24  $365$ ths hours daily, or nearly three minutes 56 seconds. Moreover, since the path of the sun round the earth is an ellipse, with the sun not in the center, but in one of the foci, it will follow that sun time constantly varies, the day of 24 hours being rather shorter in Winter than in Summer.

In order to get rid of this inconvenience it is customary to take as our measure of

FIG. 4.

time an imaginary "mean" sun, which is supposed to go round the earth in 24 hours at a uniform speed. It takes 365 days six hours nine minutes 9.6 seconds of civil time for the earth to make the complete circuit of its path. Hence, then, the sidereal day, or time of revolution of a star round the earth to the same meridian, that is to say 24 hours of sidereal time is 23 hours 56 minutes 49 seconds of civil time.

From this it, of course, follows that the sidereal hour, minute and second are shorter than the civil hour, minute and second, so that a civil clock does not keep the same time as a sidereal clock, of which the pendulum is shorter.

On April 15 the sidereal and civil time agree, thence onward the sidereal day is

FIG. 5.

shorter than the civil day. True sun time, that is, the time shown by the apparent sun, will, of course, be different again from civil time. But apparent sun time is not used. All that is done is to note the civil mean time on which the apparent sun is on the meridian. This is 12 o'clock mean time on April 15. After that, the sun's shadow on the dial (that is, apparent time) is in advance of mean time till again they become the same. Tables are given in nautical almanacs for correcting mean time into sidereal time, and *vice versa*, and also the variation of time is given, that is to say, the civil time for every day of the year while the apparent sun is on the meridian.

I do not propose to go into the history of clocks, because it has been made the subject of many books, among which I may mention the fine work of F. J. Britten on "Old Clocks and Watches and Their Makers." (London: B. T. Batsford, 1904.)

It does not seem certain that anything of the nature of a modern clock existed in Europe until the early part of the 14th century. From that time onwards for about 300 years clocks were constructed in various churches and abbeys. They were all upon one system. It is difficult to divine who was the inventor of these clocks. In England a monk of Glastonbury, Peter Lightfoot, seems to have been our earliest clockmaker, and a clock made by him for the Abbey still exists.

At the dissolution of the monasteries the clock and works were transferred to Wells Cathedral, where the dial now remains. The inside was renovated in 1835, but the works, which are now about 580 years old, are still going at the museum in South Kensington.

The working of this curious old clock will be understood from the adjoining diagram. A crown-wheel, which is so called from the shape of its teeth, is mounted on a shaft, in bearings, and caused to revolve by means of a weight or spring. A shaft carries two leaves or pallets,  $p p$  (Fig. 2). These engage the teeth of the crown wheel so that, as it revolves, the pallets are alternately pushed to and fro, causing a reciprocating motion to be given to the shaft. In order to slow down this reciprocating, a balance is fastened to it, with weights at the ends. It is clear that at each reciprocation two forces meet and oppose one another, viz., that produced by the push of the point of the teeth against the pallet, and that produced by the inertia of the staff, which swinging the other way, presses the pallet against the tooth. The former at last overcome the latter, because it has the constant pull of gravity for its cause, while the other has only the inertia of the balls which is gradually exhausted. As soon as that takes place, the crown wheel advances a step and the movement is repeated.

This movement is called an escapement. The principle of it is to let the teeth of the crown-wheel "escape" at intervals from the clutch of the pallet. If the wheel has 30 teeth and the weights swing once in a second, the wheel will rotate once in a minute, and then, by means of cogwheels or some equivalent device, its motion can be communicated to the hands of a clock, or made to release other trains of wheels, which cause figures to move and perform the motions of ringing bells or riding round, which were so popular in olden days, and the taste for which, in our days, has passed away.

It will, of course, be seen that this escapement was scientifically imperfect. If the clock became stiff or clogged the driving weight was less effective to move it, hence the impulse diminished. The resistance, however, would similarly diminish. Thus it by no means happened that the amplitude of swing was always the same. It will be shown hereafter that the time of vibration of this escapement varies with the arc of swing of the balance. If, therefore, the amplitude of swing is changed the time will change also.

Galileo was the first to observe that the swings of a pendulum are performed in very nearly equal time, whatever be the arc of swing. He used this discovery to make a counting machine by which doctors should measure the rate of pulse-beat of their patients, but he never utilized it further or applied it to clocks. His son, Vincenzo, is believed to have done so, though it is claimed that Huygens, a Dutch mathematician, was the first inventor.

In any case, to Huygens is due the credit of investigating the mathematical conditions of the swing of a pendulum, a task which Galileo, though greatly superior in genius to Huygens, never accomplished.

The theory of the pendulum will be dealt with hereafter.

The practical improvements proposed by Huygens are as follows:

First, having discovered that the true isochronism of a pendulum depended upon its having a cycloidal arc, and that a common pendulum, though nearly isochronous, is not truly so, for very different arcs of swings he proposed to make the arc cycloidal by making the pendulum of a flexible cord, swinging between two arcs,  $a b$ ,  $a c$ , by which means the path  $d e$  was made cycloidal, but the friction of the cord intro-

FIG. 6.

duced more error than it cured (Fig. 3). His discovery caused the clocks which existed in his day to be converted into pendulum clocks.

This was really very easy, for it was only necessary to remove the balance arm and to replace it by a pendulum, and you had a clock which would go far better than with the verge or balance. Most old 17th century clocks will be found on examination to have been altered to pendulum clocks.

There were, however, considerable disadvantages still left with the crown wheel escapement, because each release demanded that the pendulum should oscillate through a considerable angle, and thus the swing of the bob was very wide. This introduced error; for, as we shall see, the law that makes the pendulum isochronous is only true when the arc of swing is small. To remedy this, Hooke invented the anchor escapement, which enables a release to be effected with but a small swing of the pendulum; this is in use in grandfather clocks in our own days.

The adjoining figure of the anchor escapement, or better still, a careful examination of the works of a grandfather's clock, will show the action. (See Fig. 4.)

When the anchor is in the position shown in the diagram, the tooth  $b$  presses upon the pallet B and tends to drive it away, thus forcing the pendulum rod, which is fastened to the axle D of the anchor, to move to the

right. As soon, however, as the tooth *b* is clear of *B* this pushing action terminates and the pendulum, by virtue of its weight, is free to swing back again from right to left. The wheel, however, cannot turn round, for the pallet *A* stops the teeth from moving. When, however, the pendulum comes to the left hand, the pressure of the teeth on the pallet *A* urges the anchor and pendulum round from left to right, and so the action goes on.

It is to be observed that as soon as the tooth quits the pallet *B* a tooth slips into pallet *A*, with the ticking sound that is well known. As, however, the pendulum has inertia, it does not stop at once, but goes onward on its path, causing the teeth to be pushed up backwards along *B*. This causes a recoil. If any grandfather's clock be noticed this recoil may be observed. We shall later return to this question and examine the consequences of the recoil. It is enough here to say that it produces inaccuracies in the time keeping. To avoid them, the dead beat escapement of Graham was invented, the only difference between it and the anchor, the changed form given to the pallets.

This beautiful escapement has merits which have always excited the admiration of all who have studied it. Curiously enough, as I think I shall be able to show, its chief point of merit was overlooked by Sir George Airy in his excellent analysis of escapements. This escapement in practice is almost perfect for astronomical clocks. I shall recur later to the mode of designing it. The great advantage of the anchor and dead beat escapements was that they enabled the arc of vibration of the pendulum to be small.

As I shall subsequently show, it is not true that the common pendulum is isochronous, no matter what the extent of the swing. The difference of time of swing is not great between a small one and one that is only slightly longer. But when once the arc depasses three or four degrees, a very small difference of swing produces a perceptible difference of time of swing, and hence the time keeping would depend on exact uniformity of arc of swing, a condition very difficult to attain in practice, as will subsequently be shown.

The anchor escapement was not the only invention of that great mechanic, Dr. Hook. He likewise invented the first form of the compensation pendulum. Knowing that an iron seconds pendulum rod expanded about 1/4000th of an inch for each degree Fahrenheit, and that this expansion produced an error of about one-fourth second in a day, it was clear that in Winter at freezing point a clock would go about 12 seconds a day faster than in Summer at a temperature of 80 degrees F. And an ordinary grandfather clock is subject to this error.

Hook designed to keep the bob of the pendulum at a uniform level. He, therefore, proposed a rhombohedral pendulum with iron sides, but a horizontal copper diagonal, so arranged that on a rise of temperature, the expansion of the copper rod *d a* carried the bob upwards as much as the expansion of the four iron sides let it downwards, so that the distance *A B* remained constant. (See Fig. 5.)

This made, of course, a very clumsy pendulum, for the length of the rod was con-

siderable, and the thing looked like a kite.

The next great improvement upon clock escapements was the invention by Graham of the dead beat escapement. This consisted in cutting away a portion of the anchor, as shown in Fig. 6, so that the tooth, instead of riding up from *a* to *b*, and thus causing a recoil, rides along on the level *a* to *b'* keeping perfectly steady the while, so that the seconds hand attached to the escape wheel remains motionless or "dead." The advantage of this movement was that the pendulum at each side of the swing is not under the influence of any force, but only subject to the friction retardation as the tooth runs from *a* to *b'*. At first sight it might appear that this friction was a drawback. It will, however, when we come to deal with escapements, be shown to be an advantage, and one of the circumstances which conduce to the excellence of Graham's escapement.

Another invention by Graham, which has been widely used, is the compensation mercury pendulum. A rod of iron or steel, 100 cm. long, expands about .0012 cm. for each one degree C. increase of temperature. This can only be compensated by making the center of gravity of the bob expand upwards by similar amount. Now the coefficient of expansion of mercury, when enclosed in a glass vessel, is found to be about .00008. Hence a jar of mercury, about 15 cm. high, will have its center of gravity raised by about .0012 cm. for each one degree C. of increase of temperature, so that its expansion upwards will compensate the expansion downwards of the steel rod. A more exact computation of the mercury pendulum will be given further on.

Harrison, the famous clockmaker, to whose exertions we are indebted for the earliest chronometer, invented the gridiron pendulum. The principle of this pendulum is to arrange a gridiron of seven or nine bars alternately of brass and iron so that the upward expansion of the brass bars compensates the downward expansion of the iron ones. The method of compensating the pendulum will also be given.

To Huygens we owe the endless cord and weight for winding, by which means the operation of winding does not arrest the impulse or driving force of the weight on the clock. The same effect is produced by Harrison's maintaining spring, or by the bolt and shutter.

Meanwhile a totally different escapement had been proposed, and was in use for watches. Tompion was the originator of the idea of a detached escapement, by which is meant an escapement which gives an impulse to the pendulum through a small arc in the center of its swing, and then is detached, leaving the pendulum absolutely free. The freedom of a pendulum at the ends of its swing is highly to be desired. For it must be remembered that by reason of the isochronism of the pendulum, a bob projected from its lowest point of rest will rise to a height and return, and its time of excursion and journey back is entirely independent of the force of the push out. But this independence is only true if the pendulum is quite detached and free. When, then, it follows that an escapement which only engaged the pendulum at the middle of the swing would be an advantage.

Berthoud, in France, contrived various

forms of detached escapements for watches, but I am not aware that one was designed for a clock earlier than a chronometer escapement for a clock mentioned in Rees' "Encyclopaedia," which is said to be anonymous. This makes a very effective one.

Sir George Airy contrived an escapement much on the same plan, which has been going successfully at Greenwich for many years.

Meantime, however, another plan was suggested both for watches and clocks. Inasmuch as the friction of a train varies very much, it was suggested to put a small mainspring close to the escapement and then keep winding it up repeatedly to a fixed amount at frequent intervals, using for this purpose a large mainspring and train. This was called a remontoir. The effect was excellent and answers well.

Another plan also suggested and carried into practice on the same principle as the remontoir, namely, to use a train of wheels to wind up a weight and let it fall at suitable intervals upon the pendulum rod. By this means the driving impulse given to the pendulum would be always uniform. This plan, called the gravity escapement, was first suggested in the 18th century by Cummings. A practical form of it was devised by Mudge, a famous watchmaker, and one on his system is still going at Dent's shop in Cockspur St. Mudge's escapement had, however, several faults which were remedied in Bloxham's escapement.

This, however, was said not to be a success, so Becket Denison, who afterwards became Lord Grimthorpe, made some alterations in the design, and added a fly to steady it. This escapement has usually gone by the name of Denison's escapement, but the merit of its invention unquestionably belongs to Bloxham, who published several profound and excellent mathematical investigations on the pendulum, and who also invented the diploidscope. The gravity escapement is not detached.

I may add that about two years ago I made a detached gravity escapement that seems to present some useful features, and which lends itself very well to use for electrical clocks.

To trace the progress of invention in electric clocks, which, in my opinion, are the clocks of the future, would be an almost endless task. Briefly, it may be said that electric clocks are divided into three types.

(1) Where the pendulum is actuated by the intermittent attraction of an electromagnet.

(2) Where the pendulum is driven by a mechanical escapement wound up at regular intervals by electricity.

(3) Where the escapement is actuated electro-magnetically.

In all these cases the current can be employed to drive a number of dials.

Then, again, there is a group of clocks electrically synchronized:

(1) By intermittent action of electromagnets on the pendulum.

(2) By the action of electrically-driven cams upon the hands.

An enormous number of different varieties of the above have been invented, but not many of them have been made practically successful. For there is no branch of mechanics in which it is so difficult to turn theory into successful practice.

Mechanical Window Displays

## Constructed With a View to Enhancing the Attractiveness of the Jeweler's Show Window

By Otto Jonas

### The Man in the Moon.

SOME time will be required in order to build this display, but time is really the only important item.

A dozen ping-pong balls, a few sheets of

as shown in Fig. A, pass a stout piece of twine through each of the holes, then mortise the two boards, as shown in Fig. B.

Finish your framework by tacking light strips of wood from point to point, and

Reduce your barrel hoop to a size just about large enough to allow Fig E to rotate easily inside of it and not cause friction, and fit a large sheet of cardboard to this hoop. Then sketch on the cardboard a rough outline of a human face, cutting for eyes and mouth holes of a size just large enough to permit the ping-pong balls to partly protrude and still not so large that the balls can pass through.

Cut these holes very carefully. Be sure to get them just right and avoid the risk of ruining your larger piece of cardboard. It is well to experiment, first, on some odd bit of cardboard, and when the proper size is determined, to use it as a pattern. Nail the cardboard to the hoop and you have Fig. F. As this cardboard will have to withstand considerable pressure, it should be tacked on the hoop with large-headed tacks, placed half an inch apart.

When drawing the face, color the mouth and holes cut for the teeth red. Those balls used as eyes can be lined off with broad, black stripes (Fig. G), so that when they revolve it will cause the "eyes" to change in appearance, as though a man were rolling his eyes.

Nail your hoop face to the edge of a box in such a position that it will allow the base of the fan to rest well within the box and give Fig. D a chance to revolve freely. This part (Fig. D) should be adjusted to fit close against and inside of Fig. H, just allowing space between for the ping-pong balls to be inserted.

Fig. I shows the completed apparatus (being a cross-sectional view), with all parts in proper working position, the balls having been stuck into the holes previously. When the current is turned on, the revolving of the inner disc causes these balls to turn rapidly, slowly, all together, sometimes only one; in fact, they behave most erratically, and this spasmodic action gives a very weird effect.

When putting the balls into position two people will be required, as the balls must be placed in loosely. This is done most readily by laying the fan face upward, and then righting the entire affair after balls are placed.

Be sure to hold the two discs tightly together. While doing this, and as a precaution, do not connect the fan with the current until all is finally adjusted.

When everything is arranged and found to be running smoothly the fan should be clamped down tightly, by screwing the base in the required position. If your fan is not of the variety that can be screwed down, a

Fig. A.

Fig. B.

Fig. C.

Fig. D.

Fig. H.

Fig. E.

Fig. I.

Fig. F.

Fig. G.

very stiff cardboard, an extra wide barrel hoop of as smooth a finish as possible, and a few bits of wood comprise all the material needed, and when arranged as described will form a puzzling and unique attraction. First get two pieces of soft wood, about an inch thick and two inches wide, and cut them the same length as the blades of your fan. After boring holes through the ends,

then tack on to the frame a circular piece of cardboard. This must be very well fastened. Fig. C is a rear view showing the work described.

Remove the wire guards from your fan and tie tightly to your fan blades the framework just built, and you have Fig. D, which is a front view; Fig. E is a side view of the arrangement.

couple of strips of wood can be nailed to brace it right.

The complete affair can be thoroughly tested to make sure it is in proper working order before placing it in the window.

The assembling of the various parts as herewith described is not difficult, and the entire device is comparatively simple but it may require several trials before all is adjusted to work satisfactorily and easily.

Do not be easily discouraged, as by exercising a little patience you can soon get all in proper shape and will then be repaid for your time spent, as the effect will be absolutely unique. As with all fan-controlled displays, the effect is much enhanced if the mode of operation is kept a secret, so it is well to arrange so that every view of the fan is hidden from the passer-by. Screen the rear part of the window so that the mechanism cannot be viewed from the interior of the store.

Signs appropriate for this window could read as follows:

The man in the moon never looked down upon  
BETTER VALUES.

These peculiar Moonstones  
are not for sale,  
But we offer a fine line of precious stones.

The man up above  
Won't tell what he saw.  
Buy the ring here  
Then speak to papa.

### The Genuine Worth of a Man.

NEVER mistake bustle for hustle. Recently we were asked what we thought of a certain young man. The inquirer remarked incidentally: "He seems to be so slow." Now this, we submit, was no proper judgment, and we made it plain that it wasn't. If that inquirer had said the young man didn't accomplish much in the course of a day we would have agreed with him that the case should be rested there.

But—"he seemed so slow!" Did you ever notice the carts removing the earth from an excavation? Ever see them in a line passing along a thoroughfare, the horses tugging at their tasks, but ever on the move and ever making by the most direct course for their destination? Haven't you often pointed to a new building foundation where a week or a few days before was a barren lot with the exclamation: "That certainly was quick work?" And yet, every step in the procedure was slow. It is like the local on the railroad that puffs and snorts and shrieks and jerks with a great howdy-do; and the express, traveling only at the best rate of the local, but making fewer stops, nips seconds and minutes and hours from the running time, with no noise and no bluster, and is well back on the return journey when it salutes the boisterous local still making laboriously for the main depot.

Judge your man by what he *does*, not by what he *seems* to be. A lot of bosses have had their eyes opened to the merits of the quiet plodder. He not only gets there, but if he's loyal and conscientious and sincere, he puts it all over the shuffling, talkative bluffer. He's more dependable because his judgment is sounder. He's quicker because he has less to undo. He proves his worth by his work. And some day, when he hies

suddenly off to a more responsible position, his erstwhile employer rubs his eyes and wonders why he had been so blind to real merit. Remember this. One of your clerks may be more valuable to you as a friend-maker than as a salesman.

Your prestige means your profit. When you find your establishment is rated higher than your competitor's, that people prefer to deal with you and have more confidence in you, give the credit where it is due. The modest plodder is a worth-while asset, after all.

Now we are nearing dangerous ground. The employe asks: "Shall I change my location if better prospects appear?" As-

### The Lazarus Jewelry Store, Macon, Ga.

ILLUSTRATED below is the attractively furnished establishment known as the Lazarus Jewelry Store, Macon, Ga. The store is 80 feet long and 20 feet wide. The fixtures are of mahogany and the cases are of the most modern type. The floor is tiled and the walls are decorated with water color on a gypsine background, the coloring being light green running into white.

The wreaths in the walls are composed of inlaid doublets, representing rubies, sapphires and emeralds. The connecting center of the wall cases is made of art glass, a

INTERIOR VIEW OF THE LAZARUS JEWELRY STORE, MACON, GA.

surely. The man who pays you weekly wage doesn't add a few extra dollars for sentiment's sake, does he? Not unless he's the rare exception. With him it's a business proposition, pure and simple. If he can get another man to do your work at material reduction in salary, he's going to do it.

Don't mistake our meaning. We do not insinuate that years of devoted service go unrewarded. But we do insist that the young man who aims high and would reach the summit must avail of every opportunity to get there. He can't afford to stay in a rut. He can't afford to quibble and parley over every advance. Time is fleeting. Your best days are these days. Put your very soul into your daily task, and if, knowing you deserve recognition you do not get it, quit! That's plain talk. It's common sense. The merchant who disagrees is the sort that makes promises and fails to keep them in the belief that his subordinate wouldn't dare to be independent. Think it over.—*The Haberdasher.*

J. C. Riley, Winnebago, Minn., was a recent visitor in Des Moines, Ia., on a business trip.

The contents of the store of Edward L. Boyd Doe Run, Pa., were sold by the sheriff, Oct. 8.

representation of a diamond ring being shown in each of the two domes.

The establishment held a formal opening recently, and the store was illuminated at night by 150 incandescent lights.

### The Way of the Enterprising.

DURING the recent horse show held in Lawrence, Mass., the Radius Jewelry Co., of that place, had a display which attracted a great deal of attention. The display included typical horse show jewelry arranged on a velvet background of turquoise blue.

\* \* \*

An attractive exhibition of Illinois watches, showing the evolution of the watch from the crude state to the finished product, is being shown in the window in the store of J. H. Reed, Indianapolis, Ind. The exhibit is in the charge of Charles M. Siemmons, of the Illinois Watch Co. Among other things, 500,000 jewels in settings and 450 running movements on a design shaped like a watch are shown.

\* \* \*

A. Frank, Winona, Minn., has an attractive display in the window in his store at 115 3d St., E. It consists of a miniature launch and boat. The launch is 49 inches long and the other boat 20 inches.

# WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]  
No attention paid to communications unless accompanied by full name and address of the writer.

**QUESTION No. 2133.—To Prepare Horn for Combs, Etc.**—(1) How can I silver a pair of cow's horns? (2) How is horn prepared for combs? (3) How can I color the brown streaks on a buffalo horn?

T. S. H.

**ANSWER:**—(1) Horn can be silvered by freeing perfectly from oil and painting first with a saturated solution of gallic acid and then with a solution of 20 parts of nitrate of silver in 100 parts water. Repeat the coating alternately until the black color is replaced by a slight silver tint; then paint once more with the silver solution. Complete by rubbing down with cream of tartar solution. (2) Horns to be used for combs are sawed across into lengths, then immersed in boiling water for half an hour, by which it is softened. While hot it is held in the flame of a wood or coal fire, turning so that the inside and outside is exposed to the flame. Keep in the flame until it reaches about the temperature of molten lead, and in consequence becomes soft. When soft, a knife is run through the horn, cutting it open lengthwise. The edges are caught with two pairs of pincers and the horn is flattened out and put under gentle pressure—just enough to flatten out sufficiently, but not hard enough to break any part. The shape of the combs are now worked out by sawing, filing, or with suitable tools on a lathe. The teeth are made by saws. These teeth are afterward smoothed with files, polished and buffed. (3) To remove brown streaks on buffalo horns, apply several times to the polished horn, with a brush or rag, a dilute solution of nitrate of silver until the desired intensity is obtained. Allow to dry in the sun after each application, and polish when sufficiently black.

**QUESTION No. 2134.—Replacing Barrel Hook.**—Can you recommend a method of replacing a barrel hook that is more durable than the one which is pressed out of the barrel rim?

E. N.

**ANSWER:**—The barrel hook which is screwed into the barrel rim is a very desirable one, and can be made in the following manner: Drill a hole in the barrel centrally, and broach it slanting in the direction to hold the spring. The hole is then tapped, and a threaded brass wire, shaped in the form of a hook, may be screwed in. To make a success of this method, the hook must be screwed in tightly, which is done by tapping the hole in the barrel a little smaller than the thread of the pin.

**QUESTION No. 2135.—To Solder Aluminum.**—Kindly tell me of some material

which I can use for soldering aluminum.

A. M. G.

**ANSWER:**—A very desirable aluminum solder was obtained by Richard, and published recently in the *Journal der Goldschmiedekunst*. The soldering compound consists of 29 parts of tin, 11 parts of zinc, one part of aluminum and one part of 5 per cent. phosphor of tin.

## A Practical Rose Gold Solution.

IN experimenting with numerous formulas for the production of this finish, says a writer in the *Metal Industry*, I found that the rose finish in nearly all cases could not be produced without the application of the sand blast or other means of producing a dead surface. In some formulas the acid copper is advised, and while this method is satisfactory for cheap articles of gold, it is not advisable because a few minutes in the acid copper bath gives quite a thickness of deposit, and as soon as the rose finish becomes worn a copper color appears, which becomes oxidized very readily.

Of the numerous formulas prescribed the yellow prussiate of potash, carbonate of potash and chloride of gold combinations are stated to give excellent results. This formula produces a rose finish on yellow. The addition of copper to obtain the desired effect is not advisable, owing to the karat effect liable to be produced. The various phosphate of soda and bisulphate of copper combinations have been tried, but these do not produce even as good a color as the prussiate of potash formulas, although for light color gilding and for brightness of deposit they are more desirable.

The formula that I have found gives the most satisfaction, and one I have been able to find in any text book upon plating or in any publication relating to the deposition of metals is composed of ammonuret or fulminate of gold, cyanide of potassium and hyposulphite of soda. With this the rose gold effect is no doubt caused by the soda salt, as the fulminate of gold in potassium cyanide was one of the earliest formulas used in electric gilding, and in many of the older manufacturing concerns is still in vogue, owing to the richness of the gilded deposit.

The solution is prepared as follows: One troy ounce of 24-karat gold is dissolved in aqua regia (three parts hydrochloric acid and one part nitric acid), using about six ounces of the mixed acids. Heat is applied with a sand or hot water bath to assist so-

lution. As soon as the gold has been dissolved, clean cold water should be added, as it is not necessary to evaporate the solution to produce the neutral chloride of gold used in many other gilding formulas.

For the purpose of precipitation a regular gallon glass battery jar can be used to advantage, as the precipitate can be more readily observed. Place the diluted gold chloride solution in the jar and add more water until about two-thirds full; now add 26 per cent. ammonia water very carefully until all the gold has been precipitated as a brown spongy mass. If care is exercised every particle of gold can be thrown down, but an excess of ammonia must be avoided, as gold salt is somewhat soluble in ammonia. The precipitate should be allowed to settle, and then the clear ammonia water should be siphoned off. At least four washings should be used to remove all trace of the ammonia. The precipitate is now fulminate of gold, which should always be kept under water as, if allowed to become dry, it is a violent and dangerous explosive.

A solution of cyanide of potassium should be prepared by dissolving the cyanide in clean cold water until  $4\frac{1}{2}$  degrees Baume is reached. Now, to four gallons of the cyanide solution add the one-ounce fulminate of gold and a perfectly clear liquid will result. To each gallon of solution add one-half ounce of hyposulphite of soda and it is ready for use.

Maintain the bath at 160 to 180 degrees. The anodes should be of 24-karat gold, but platinum or electric light carbons free from copper coating may be used. A current strength of  $2\frac{1}{2}$  to four volts can be safely used, but the amperage must be very low on account of the rapidity of the deposit.

This formula will gild any article made from the copper-tin alloys by simple immersion. Articles made from the base metals, such as lead and antimony, spelter and iron, when brass or copper plated, can be readily gilded by immersion and a good color can be obtained. When only a gold effect is required a few seconds' immersion will produce a rich yellow color.

To obtain the rose gold effect upon cheap articles, when only a film of gold is desired, the acid copper deposit is advantageous; but the high lights should be first relieved by finely pulverized pumice stone. After gilding bicarbonate of soda should be used in relieving the high lights. For articles of karat gold a few seconds immersion with a fairly strong current will be sufficient. To produce the light rose the current should be reduced a few seconds after the strong current has been applied. This method yields a rich rose gold, which, when relieved in the usual way, gives excellent results.

When an extremely dark rose gold is required a little more hyposulphite of soda may be added, or when the color is not addition, as gold is very soluble in the solution, due to the excess of cyanide. The solution needs very little attention if the sufficiently deep. The fulminate of gold should be added when occasion requires it, but when anodes of pure gold are employed it is not very often necessary to make such right temperature is maintained and, very little experience is required to obtain the best results.

### Ming. or Not Ming. That Is the Question.

It is a pretty story of the morals of our forefathers and of Mr. John Chinaman's ancestors, this question of Ming china ware. You see the Ming dynasty lasted from 1368 to 1644 and its beautiful green porcelain ware has made an everlasting international reputation. But *how* beautiful was this ware? We have to take the Chinese historian's word for the grandeur of conception exhibited in this Ming ware for lack of proof positive that we possess any. Or, if what we proudly proclaim to emanate from the potters of that period of ceramic splendor is really and truly Ming, then said Ming ware is, to use a vulgar term, not quite "what it is cracked up to be."

The earliest reputed pieces in Europe's possession came over the seas during Queen Elizabeth's reign (1558-1603) and these pieces are inferior to Tsing dynasty (1644-1661) products. The Russian ambassador in 1692 wrote: "The finest china is not exported, or at least very rarely." So there you are. Experts are of the opinion that most, if not all, of our Ming ware in our collections was "potted" in the Kang-he period (1661-1722).

And again we have specific evidence that John Chinaman had an aptitude for *re-producing*, and followed up his abilities in that direction to his "top bent." To join in the conspiracy concocted in those "good old times" the Britisher, Dutchman, and other "civilized" gentry that were so highly favored as to have access to that forbidden "Flowery Kingdom," used to plant orders with those wiley clay bakers to furnish Ming ware (marks and all, mind you!) fresh and hot from the ovens. And the decoration often tells the lie, for it is quite generally of a pattern not dreamed of in the Ming dynasty with its symbol laws and precise system of tell-tale definition.

We must also remember the Ming dynasty happened in troublous times and fragile china ware was short lived when the rebellious looters got around among the hated royal and mandarin palaces. So, if you have a piece of the real old Ming and reputable experts can furnish proofs of its birthright (not *near*-Ming, mind you) you have something worth guarding as closely as your dear sweet wife.

Of course, if you yourself were one of the glorious heroes that marched their way (during the late "Boxer" unpleasantness) until they found themselves in the emperor's "Summer Palace" and you *swiped* (don't say *stole*) a piece of the precious ware from that sequestered nook, you *may*

be likely to hold in your possession the Simon Pure. But if "some friend got it from a relative whose brother was in the navy, in Chinese waters," etc., don't hug the brittle piece too closely to your heart. Its beautiful historical value may come peeling off any old day.

And how mighty consoling to the rest of us to know that if we don't own any Ming in our cabinets, nobody else does in our burgh, so there. C. W. C.

### Newcomb Pottery of Old New Orleans.

NEWCOMB pottery, while displayed in stores in 40 cities from Boston to San Francisco, has not yet become an important commercial production. Possibly it may always remain a modest feature, even of the best china stores, yet its influence will grow steadily larger in creating a higher standard of pottery decoration.

It had its origin in the art department of Newcomb College, Tulane University of Louisiana, a dozen years ago. Under the supervision of women who are, or have been, students, a quiet, but sure, advance has been made after the usual experimental period.

The educational and artistic viewpoint is the only one really considered at present. The management believes the ware will eventually so commend itself that the sales department will need no especial attention. Direct profits have never been made for the pottery department, and should the growing favor of this beautiful and distinctively American ware bring large returns, the money would be expended in widening opportunities for young women of artistic proclivities, who must earn their own living and yet avoid uncongenial work. The pieces are bought outright from the artists at a percentage of the selling price, and the balance covers manufacturing cost. The saving to the State of the higher skill of such persons will be helpful in developing the south. Manufactures which call for artistic labor have been lacking in the tributary region, partly because there are so few trained minds and hands in the line of designing and decorating.

To learn and practice a profession affording profit and reputation to the individual has become possible for many bright women who have been benefited by the existence of the Newcomb pottery.

An ardent desire on the part of the founders to create a style of ware noticeable for its originality and beauty has reached successful fruition. Reproductions of the rich and distinctive flora and scenery of the sunny south has enriched Newcomb pottery. The decorations include designs drawn from

the live oak, magnolia, orange and pine trees, the flowers, water and landscape of the gulf coast, all material rarely used elsewhere, for the potters' art lends a charm and beauty new to the public.

Each piece of ware is original in design and never duplicated. It is signed by the artist and potter and bears a registered number. The workers feel that the responsibility of a sign design is the same as that which exists in the case of signed pictures, and that a reputation is at stake. All ware must pass the approval of a jury of experienced artists before it receives its trade-mark, which is the college monogram, and an evidence of the genuineness of the piece.

The clays used in the body are blended from beds owned by them at Biloxi, Miss., and those at Iuka, Miss., which form an exceedingly strong body almost of stone ware composition. One kind of ware from this case is a light gray, and by a careful selection of the strata in one of the beds a clear white is obtainable.

The very names, Newcomb and Tulair, seem redolent of fair and sunny regions where the great Mississippi flows southwest to the sea. Newcomb pottery is in a class all its own, representing an American type of exceeding merit, recognized at the World's Fair in Paris in 1900 and at all the home expositions.—*The Glass and Pottery World*.

### Beautiful Bronzes by an American Artist

AT the Metropolitan Museum of Art, New York, there is now on exhibition a large collection of bronzes by many of the most famous sculptors of this and other times. Among the exhibits are three pieces by Frederick Remington, the American artist, who has made a special feature of the study of western life. "The Mountain Man," the title given one of the three subjects in question, shows a typical western Indian riding a horse down a steep incline. The horse is carefully picking his way step by step. Across the saddle in front of the rider is a long rifle and at the back is a roll of blankets. "The Bronco Buster" shows a plunging horse ridden by a plainsman. The man holds a whip in one hand and the ease with which he keeps his seat on the horse is faithfully depicted. "The Cheyenne," the last of the three pieces, shows an Indian riding a pony at full speed. He holds in front of him a long spear and at his back is a shield.

E. O. Arnold, Lakefield, Minn., has been away for two weeks in Northern Minnesota, on a hunting expedition.

**The British Commercial Traveler.\***

THE methods and manners of the British commercial traveler are much the same as are those of the fraternity on this side of the big pond. He covers less territory and does his work much more leisurely than the hustling, bustling American or Canadian salesman; but he has the same tastes, the same frailties and the same fondness for lively companionship that have characterized the gentleman of the sample-case for a couple of generations.

One English traveler will cover the midland counties, the south and east, and Wales; another will have territory covering northern England and Scotland. There is, as a rule, a third man for Irish territory. Men who carry large and bulky samples have their samples opened out in sample rooms, as in Canada and the United States, but many carry no more than a small handbag full of colored photographs, which they can carry direct to their customers, eliminating the time spent in inducing the merchant or his buyer to go to the hotel to examine the samples and the considerable expense attached to the transportation of heavy trunks. This class of travelers usually stop at temperance hotels where the rates run from 6 shilling to 7 shillings a day, including tea, bed and breakfast.

The English knight of the grip travels fast. The regular train service is excellent, and the towns are close together, sometimes not more than 10 miles apart; but there are local customs to be observed, which compel the traveler who wishes to make good time to keep himself well posted. One of the more important of these customs is a municipal habit of early closing on certain days of the week. Some towns take Wednesday afternoons off, and others take their weekly half-holidays on Thursdays. Therefore, if the traveler errs in his calculations he is "stuck" for two half days.

Train accommodations are comfortable. The coaches are divided into compartments accommodating eight to 10 persons, with six compartments to a coach.

I used to finish my day's work about 5 o'clock, after which I would write my letters. This done, I would sometimes go to the theatre, or spend the evening with a congenial company of fellow travelers in the "commercial" room. This is usually a large and comfortable place where, in the Winter evenings, all the traveling men in the town meet, sit around the fireplace and tell stories, discuss current topics and put in a very pleasant and profitable time.

My experience with the British commercial traveler convinces me that he is alert, invariably on the watch for new accounts and expanding old ones. A majority of the travelers are married men, and distances in the United Kingdom make it possible for them to get to the bosoms of their families for the week end. Commercial men there do not call on the trade, as a rule, on Saturdays, so that it is possible to leave home on Monday morning early and do a day's work, and return on Friday evening after a full day's business to have Saturday and Sunday at home.

Each one is a member of the Commercial

Travelers' Association, one of the principal benefits of membership in which is the week-end certificate, which enables him to travel to and from his home once a week for a single fare. These week-end tickets are procurable on presentation of a booklet issued by the association. This booklet is signed by the firm for which he is traveling and contains the traveler's photograph. The booklet contains 52 blank forms, one for each week in the year, and good from noon on Friday until Tuesday morning on any railway. Membership in the association also carries with it half price for storage of trunks, but this is a small matter with pottery and glass travelers, for few of them carry more than two trunks.

The English commercial traveler lives a far less strenuous existence than his fellows on this side of the water. You will find all ages on the road—some young, some with silver hair and 60 or more Winters to their credit. As a rule, the pottery and glass men have had some factory experience (which is exceedingly useful), and constitute a bright and highly intelligent section of the business community.

Traveling in the Kingdom does not involve all-night rides on illy-ventilated sleeping cars. Hotel beds are the worst they have to put up with, and that is only for four nights each week, for unless it be in the Summer time, and the seaside calls, nearly every commercial traveler in Great Britain goes home for the week-end. I have found the British traveler a congenial companion, less reserved with strangers than the typical American traveler, able to relate a good tale and enjoy a good joke, and a happy-go-lucky sort of fellow who extracts his full measure of pleasure out of life as he goes along.

**Export of Black Forest Clocks.**

ACCORDING to *Jewelry and Horology Exportation*, published in the interests of the German export trade, the Black Forest clock industry, dating from the beginning of the 18th century, has held its place in the markets of Europe and America for over 200 years. This success is ascribed to the wood carvings, cuckoo clocks, and similar specialties.

At one time division of labor and the introduction of modern factory methods in the United States threatened not only to drive the German clocks from the American market, but the American clocks even entered into competition in Europe with the German product. The Black Forest people introduced modern methods, however, and not only regained their former state of prosperity, but have greatly increased their output. Since 1880 the clocks exported have increased over 300 per cent.

Within the past six years France has more than doubled her imports of Black Forest clocks, the Argentine Republic has tripled her imports, and the United States has more than quadrupled hers. However, Great Britain is the heaviest purchaser, taking one-third of the total exports.

L. E. Hunt & Co., formerly of Woodruff, Kans., are now at Superior, Nebr.

H. W. Graham has sold his stock at Newton, Ia., to Behner & Behner.

A LARGE ASSORTMENT OF CUT GLASS

THE salesrooms of the J. D. Bergen Co., 38 Murray St., New York, are just now filled with a most attractive assortment of cut glass, which includes a line of 45 styles of pitchers which are adapted for table use. These articles are shown in a variety of cuttings, among which is the spray and star patterns. Water bottle sets, including six glasses, are included in the display, and offer an excellent selection. In one set shown the bottle has a round base and long neck. The display of novelties such as puff boxes, small trays, etc., is very large.

A POPULAR IDOL—"BILLIKIN"

THE new god of good luck, "Billikin," an idol four inches high, sitting down, is the latest craze. He is "the god of things as they ought to be"; a smiling, red-headed, diminutive idol, who is fast winning a place in the public favor. "Billio" is made in plaster, metal, paper, gold and silver, and it is safe to predict that "Billikin" jewelry will soon be a popular addition to the retailer's stock. "Billikin" is the creation of Florence Pretz, a poor art student who was trying to work her way through school. He is never sold, but is loaned for 100 years at one cent a year, the entire sum payable in advance. So great has the demand for this novelty been that the Billikin Co. was formed to manufacture the little idols. Billikin is the god of smiles and optimism; look at him and you laugh; tickle his toes and he wrinkles his nose and eliminates grouches and wrath.

HOLIDAY LINES OF FINE CRYSTAL

THE Pairpoint Corporation has on exhibition at its New York salesroom, 38 Murray St., a most attractive line of cut glass, suitable for the present season's needs. Jewelers visiting these salesrooms will find a wide variety from which to select holiday stock. Among the offerings is an attractive boat-shaped fruit or salad dish, which is attracting attention. The dish has a round base, on the under side of which is cut a star pattern, the top being plain. From this base rises a substantial standard attractively cut and supporting the body of the dish, the bottom of which is free of decoration. The top of the standard, however, has a daintily cut star pattern, which, when seen from above, presents a most pleasing effect. The rest of the dish is heavily cut in a beautiful design. The line of crystal cut glass lamps seen at these salesrooms, includes a number of attractive patterns, as does the display of electroliers. The company also shows dainty sugar and cream sets, bon-bon dishes, small tray holders, etc. THE RAMBLER.

## INTERCHANGEABLE CHATELAINE WATCH OR LOCKET FOB

The above illustrations represent a few of our newest ideas. The Chatelaine Watch Fob and the Chatelaine Locket Fob to be worn at the belt: more secure than the old fashioned Chatelaine: does away with soiling the dress or shirt waist: safety catch on back of the Watch Fob, making the watch secure, also Washburn fastener, attaching Fob to belt.

Our Locket Fob has already proven itself to be a great seller. We predict for our Watch Fob great results. It is a winner. Write for samples. We sell the wholesale trade only.

 ABSOLUTELY SECURE.

**CLOSING HOLE PUNCHES No. 60**

A well made Set of Punches of nicely graded sizes. Numbers indicate 10ths of millimeters.

Per set, \$1.50

**SHELDON'S PATENT HAIRSPRING COLLET REMOVER**

No need of any more distorted hairsprings or bent balances. Every watchmaker knows how troublesome it is to remove the collet without either distorting the hairspring or bending the balance; with the aid of this tool the difficulty is overcome. The tool is provided with a pair of spring fingers, curved at the ends and ground very thin and sharp. By tilting the balance the jaws may be slid under the hairspring and by pressing the jaws together it will readily loosen the collet and then by turning the central screw, which has a hole in the end to receive the staff pivot, you can force the collet from the staff, without injury to balance or hairspring. The adjustable screw nut is provided to avoid wear or injury to the jaws. A glance at the illustration will demonstrate the utility of this tool. Finely nickel plated.

Price, each, \$1.25

**ECHARCO WATCH GLASS CABINET No. 15 (Patented)**

Top View, Showing Skeleton Frame of Drawer. Accumulation of dust and chips is impossible.

The Most Modern Watch Glass Cases are the Echarco, Nos. 15 and 20.

These Cabinets have many new features not found in any other. Novelty and usefulness are the chief arguments in their favor.

**Construction and Material.**—The cases are made of oak, finely finished and of attractive appearance. The sides of Cabinet No. 15 are paneled. Partitions are of basswood and put together in the best manner possible.

**Partitions** are skeleton, preventing accumulation of dust, chips, etc.

**The Bottoms** of Cabinet No. 15 are hollow, while Case No. 20 has a special drawer to receive chips, dust, etc.

**Arrangement for Glasses.**—Case No. 15 has nine drawers with a total of 1,547 spaces, and Case No. 20 with four drawers has 784 spaces, to hold glasses in upright position.

**Labeling of drawers**, as shown in cut, is on the pulls of the drawers and done in gold bronze on black background.

**Dimensions and Weight of Case No. 15.**—Width, 24 inches; Height, 29½ inches; Depth, 12 inches; Weight, net, 45 lbs.; Weight, including packing case, 75 lbs.

**Dimensions and Weight of Case No. 20.**—Width, 26 inches; Height, 13¾ inches; Depth, 11¼ inches; Weight, net, 30 lbs.; Weight, including packing case, 50 lbs.

The construction of drawers, the arrangement of partitions to economize space and weight, and the novel method of showing contents on drawer-pulls are all prominent characteristics and extremely well thought of.

Price, No. 20, Each, \$7.75

" No. 15, " 16.00

**ECHARCO WATCH GLASS CABINET No. 20 (Patented)**

**SET OF 12 BEADING TOOLS, WITH INTER-CHANGEABLE HANDLES No. 50**

The rosewood handles have brass bushing so that the beading tools may be used by hand or hammer.

Per Set, \$2.00

**SET OF 6 CARBORUNDUM DISKS No. 100**

The variety of shapes should make this a desirable article on the bench.

Per Set, 90c.

# Leadership in Business

like leadership in anything else, is simply the working out of nature's law of the survival of the fittest. Show me a business that is successful and I will show you, in ninety-nine cases out of a hundred, one that deserves to be. The law of the universe constantly seeks and demands the best and casts out the useless and unfit.

If you would be successful you cannot afford to give anything less than the best that is in you, and that man is worse than a fool who undertakes to succeed by trickery, chicanery or dishonesty, for when he attempts to cheat his neighbor, or deliver less than he sells, he injures himself beyond repair. His deceit will find him out and surely tear down and destroy.

It has been our constant aim in business to deliver more than we sold. Our sun is still shining.

# A Timely Suggestion

**L**AST month the Whiting Company directed attention to two of their new patterns—the “MADAM JUMEL” in Flat Ware, and the “FLORENTINE” in Toilet Ware.

These patterns, both of which have already attained a notable degree of success, are indicative of the general scope and character of the Whiting Company's recent productions in sterling silver ware.

Those Jewelers, therefore, who wish to add to their stock of silver ware suitable for the Fall and Holiday Trade will find the entire line of Whiting goods marked by the same characteristics of graceful design, admirable workmanship, and moderate prices as distinguish the “Madam Jumel” and the “Florentine.”

## BIRTH-MONTH SPOONS

**N**OTHING is more suitable for a birthday gift than a handsome souvenir spoon, especially when you are able to make a choice from such a unique and attractive line as we herewith present for your consideration on this and the preceding page.

Careful study has been made in the designing of the different patterns, that each month should be represented by its symbolic flower.

This, together with the exceptionally fine die work, heavy weight and beautiful gray finish, prove them to be the finest set of Birth-Month spoons ever offered to the Trade.

Their beauty cannot be adequately described. They must be seen to be fully appreciated.

Write us and let us tell you what special inducements we can offer in regard to this handsome Flemish Oak display box, velvet lined, with plate glass cover

These spoons are made and are for sale by

## “NAUTILUS”

### Special String-Pearls <sup>at</sup> a Special Low Price

SPECIAL COLOR  
SPECIAL WEIGHT  
SPECIAL MAKE  
SPECIAL PRICE

“NAUTILUS,” the new tone tint in Fishskin Pearls that has set all the jewelry trade guessing

The softest, dreamy, creamy rose shade—a tint far more beautiful than many real stones. A lustre that means immediate sales to those that see them.

The “NAUTILUS” shade is of course the exclusive production of our Paris house. Another great feature of the “NAUTILUS” Pearl is its unusual weight.

We have just received an importation of 12,000 strings of “NAUTILUS” Pearls in all sizes. Because these beautiful necklaces have arrived a little late to be sent out with our regular line, we are making a special price that is remarkable for the quality.

All regular sizes, \$15 a dozen strings  
Strings with graduated sizes, \$18 a dozen

Easily retailable from \$2.50 to \$5.00 a necklace. Necklaces finished with good rolled plate clasps, \$2 per dozen strings extra.

Ready for immediate delivery. Let us send you a selection upon approval. You can't afford to let this opportunity pass if you want a real big leader in your holiday stock.

Of course there are other great values represented in our Parisian Novelties, which include the greatest assortment of Brooches, Hat Pins, La Vallieres, Buckles, Bayaderes, Pearl Necklaces and Collars, and our complete stock of Jets in both dull and bright.

## CHOPARD FRÈRES CO.

MAKERS OF

### FRENCH JEWELRY NOVELTIES

PARIS, 35 Rue des Trois Bornes

56 Maiden Lane, NEW YORK

*Fair Warning*

*Delamothe Real Rose Hat Pins are not handled by Jobbers — They sell only to imitations, and the imitations do not sell in places where the Delamothe Real Rose Hat Pins are on sale.*

*Every genuine DELAMOTHE Real Rose Hat Pin, has the name stamped on the pin here →*

**REAL ROSE  
HAT PINS**

Something really new to sell —which sells. The largest selling article put on the market for years. Not only a large profit maker and seller, but a great drawing attraction for the stores which sell them.

DELAMOTHE Real Rose Hat Pins are made out of live roses, which by a secret process changes them into metal, and are then mounted on hat pins and finished in several colors to conform to the prevailing fashions in millinery. Being made out of real roses there can be no two alike. The process used for making DELAMOTHE Real Rose Hat Pins is the discovery of Prof. L. G. Delamothe, and is the only process by which open roses can be perfectly metalized. This process is owned solely by the DELAMOTHE Natural Art Decorating Co., of which this company are the sole distributors to retailers.

WE DO NOT SELL THROUGH JOBBERS.

*Write at once for Illustrated Price List or Two Dozen Trial Assortment on approval.*

**DELAMOTHE DISTRIBUTING CO.**  
Sole Distributors  
SPOKANE, WASH., U. S. A.

# The Travelers' Line

Articles of Refinement  
and Convenience

which have demonstrated their merit in large sales and their practicability in actual use. For travelers everywhere and at all times.

# SPECIAL Blackinton Locket Combination

## 18 Old Reliable W. & S. B. ★ Locketts for \$31.15

Above are shown 18 of the *handsomest* and most *salable* locketts ever produced. The price of this combination of locketts to Retail Jewelers is \$31.15, and the total retail selling price is \$51.92.

This is undoubtedly the most desirable combination of locketts ever offered. There is *not a poor or doubtful seller* in the lot. With the locketts we give *free of charge* a handsome velvet lined case in which to display them, and keep them in perfect condition.

This combination is sold *only through the jobbing trade* and the universal price of the 18 locketts and velvet lined case is \$31.15 to Retail Jewelers. The *retail selling price* of each locket is plainly marked on a tag, the prices ranging from \$2.08 to \$3.50 and aggregating \$51.92 for the lot.

Order early to insure prompt delivery. If your jobber cannot supply you write us direct and we will tell you where to get the goods.

**These goods are NOT sold to department stores or retail catalog houses.**

# The Shepard Manufacturing Co.

MELROSE HIGHLANDS, MASS.

We are the leading manufacturers of high-class wares in Cloisonne French Transparent Enamels. Formerly these goods were made abroad, and the work done by hand, and the prices charged for the goods put them beyond the reach of the ordinary buyer. By our process of manufacture we are able to put on the market work that is equal in every respect, including design, finish, and the beautiful transparent effects that are obtained in the foreign productions, and at a price that is only a fraction of the cost of the imported articles. Many of our newest designs are made up from the advanced 1909 designs from Paris. The enamel fad is on in this country as well as in Europe, and we are the leaders in the line.

Our representatives are out with a full line of samples, and it would pay you to await their call, and to see our line before purchasing.

Our new Fall lines include the following:

<i>Gentlemen's Vest Buttons</i>	<i>Ladies' Dress Buttons</i>
<i>Cuff Links</i>	<i>Buckles</i>
<i>Stick Pins</i>	<i>Hair Pins</i>
<i>Bon-Bon Boxes</i>	<i>Hat Pins and Brooches</i>

They embody several of the latest creations from the celebrated French artists.

# The "Krementz-Bodkin Back" STUD and VEST BUTTON

Pat. Feb. 16, 1904

"Not One-Piece but One-Piece Construction."

The simplest and best mechanical Stud or Vest Button made.

KREMENTZ & CO. invite the following comparisons (or any others that you can think of):

### CONSTRUCTION.

The "KREMENTZ" Bodkin Stud and Vest Button

1. Is absolutely solderless
2. Is made of solid, hard spring metal throughout
3. Has no spring or tubing to bend or break

### QUALITY

The highest grade of mother-of-pearl, half pearls, whole pearls, diamonds, sapphires or whatever material is used.

### FINISH

The regular "KREMENTZ" finish which has helped very materially in the building up of our business.

### OPERATION

Very simple. Easily inserted or removed without fear of bending the post or marring the shirt or vest.

### PRICES

Lower than those of any other makers.

### DURABILITY

See our guarantee.

### GUARANTEE

If for any cause whatever, a "Krementz-Bodkin Back" Stud or Vest Button should be damaged either in the hands of the dealer or wearer, a new one will be given in exchange, without charge. "Krementz-Bodkin Back" Studs and Vest Buttons are made in large variety of patterns in 14-kt. gold and platinum, set with pearls and diamonds.

## Telling Points in Scarf Pins

14kt.

Only

**T**HE DIFFERENCE in Scarf Pins is like the difference in men. Some like effects that are extreme, loud and grotesque. Others prefer the quiet appeal of intrinsic worth, the grace of refinement. It is to the latter class that the Scarf Pins of this house are specially attractive.

Not that they are costly. Quite the contrary. A variety of semi-precious stones is used to great advantage. Thus good dressers buy a number of these Pins to vary with scarf and attire. The designs are really beautiful. A pleasure to see; a pleasure to buy; a pleasure to sell; a pleasure to wear. Profitable.

## WARNING!

We learn that certain  
manufacturers are mak-  
ing Leaf Brooches that  
are an infringement up-  
on our patent rights.

We hereby warn all  
manufacturers making  
such Leaf Brooches, and  
all dealers handling the  
same, that we shall pro-  
secute all infringers to  
the fullest extent of the  
law.

The number of our  
patent is 39,458.

# LEROY MANUFACTURING COMPANY

26 JOHN STREET, NEW YORK

# OFFICIAL ELK EMBLEMS

The following is taken from Official Circular No. 1, issued by Hon. R. H. Holland, Grand Exalted Ruler of the Elks:

**NAME AND EMBLEM.**

The Commission on Protection of Name and Emblem submitted an exhaustive report which will be printed in full in the proceedings of the Grand Lodge. This commission also reported to the Grand Lodge a design which was unanimously adopted as the Official Emblem of the Order and the commission was instructed to have the same fully protected by Letter Patent. Unfortunately the description of the emblem has appeared in the public prints from which cuts have been designed and printed purporting to be the genuine. Manufacturing jewelers in utter disregard of our rights are flooding the market with a so-called Official Emblem. I therefore deem it my duty as Grand Exalted Ruler to denounce this unwarranted interference with our rights and to call upon every brother to REFUSE TO PURCHASE OR TO WEAR THESE SO-CALLED OFFICIAL EMBLEMS. The commission is actively at work and as soon as these complications are adjusted or rights protected and permission granted to manufacture and place the genuine official emblem on the market, the order will be advised by official circular.

Mounted in Sterling Silver and Gold in a large assortment of designs.

Send for new Illustrated Catalog in colors containing prices.

**The Barber Jewelry Mfg. Co.,** 36 GOLD STREET NEW YORK CITY

DO YOU REALIZE what it means to manufacture gold chains of excellent quality and faultless construction and sell them at prices much below what the retailer ordinarily pays for chains of similar quality? It means that we have a well organized factory and prefer selling these chains ourselves directly to the trade, thereby giving you the benefit of what it would cost to maintain a necessarily expensive organization of traveling men.

**THAT NEW CHAIN** we are exploiting is solderless and flexible, without stringing, 15-inch lengths only. **IT SELLS AT SIGHT.**

Write for a sample.

The Den, The Desk,  
The Dresser, The Toilet  
Table, The Sideboard,  
The Dining Table and  
The Living Room.

The trade is cordially invited to call at our show rooms and inspect our new Fall productions

## Do you know that SILVER DEPOSIT WARE

worthy of the name should improve in appearance when in use? That is true of our goods because the silver is heavy and the engraving is bold and deep so that when the article is in use the engraved effect is brought out strong and the contrast is more pleasing to the eye than when new. This is a feature you should consider because you do not want goods that become unsalable when in stock.

What we state about our deposit goods is also true of our line of

PHOTO FRAMES, CLOCKS, BELT BUCKLES, Etc.

All of our goods are hand engraved and etched, not die or machine work. It cost us more to make but the price to you is the same as you pay for the imitation.

We make a large assortment of inexpensive articles as well as the more costly pieces and as our prices are uniformly low our goods are in demand at all seasons of the year.

## TO THE TRADE

We would respectfully submit our references in the form of a Booklet, believing the strongest argument to be submitted to the jeweler contemplating an Auction to be credential evidence. The time was when the ideal Auctioneer depended on his voice and suggestive story telling. He was sharp at deception and banked on his trickery as his stock in trade. Today the successful Auctioneer is primarily a salesman, a specialist; his work has grown and widened; it has come under the fixed rules of business which demand honesty as a *cornerstone*. The Auction Sale is recognized as the sale of the Auctioneer. he is responsible; his reputation depends on his ability, his personality, his being quick-witted and magnetic. He must keep within the bounds of propriety. We have the longest established partnership ever existing among jewelry auctioneers; have sold in all the principal cities of America. from two to a dozen times, hundreds of successful sales all over the United States. We believe in the *Square Deal* by the buyer and seller.

# New Stone and Jewel Device

## For Jewelers and Watchmakers

No. F116.

Absolutely the handiest and best device known for picking up, handling and setting stones. Equally useful to the watchmaker in handling watch jewels and jewel pins of every description. Also handy for design workers.

This stone handling device is in the form of a wax stick, which quickly and safely picks up any size stone or jewel with no chance of "getting away" which so often happens when using a tweezer. It is very simple as shown in illustration.

Every repairer and stone handler should have one. It is made in the style of a screw pencil and can easily be carried in the pocket.

PRICE EACH - - - 50 CENTS

# "New Process" GILLETTE Blades

## Have You Got Them in Stock?

"New Process" GILLETTE blades have been an instantaneous success.

They differ in price, quality, appearance and style of package from the previous kind, and the public is being notified of the change by full-page advertisements in all the leading magazines.

More than two million GILLETTE users will now accept only "New Process" GILLETTE blades. If you have them in stock before other dealers in your locality you will get the business, and at the new price your profit is a very liberal one.

"New Process" blades are manufactured by newly-invented machines and processes, making them superior in appearance, operation and endurance to any blades ever produced by anyone.

These machines are automatically regulated, and grind, hone and sharpen each blade individually with the utmost precision.

Every cutting edge is perfect, and possesses a degree of keenness not produced by any other process.

"New Process" blades are finished with a high polish that renders them easy to

clean. Since dust and moisture do not cling readily to a polished surface, these blades are practically immune from rust.

"New Process" blades are packed in a handsome nickel-plated box which seals itself hermetically every time it is closed. This shuts out all dampness and effectively protects the blades from rust in any climate, land or sea. When empty, the box forms an attractive waterproof match safe.

The set now contains twelve blades.

The Retail Price is \$1.00 per set. Twelve sets are packed in a carton.

To those who are not handling the GILLETTE, we suggest, "Get Busy." Get the sales resulting from our huge advertising campaign—the increased business and profits that the co-operation of our Sales Department will bring you.

YOUR customers are continually seeing GILLETTE advertisements and they want the razor. Eventually they buy it somewhere.

WHY NOT OF YOU?

Write us for catalog and liberal discounts to dealers.

Holiday goods now ready for dealers. Send for catalog.

# THE JEWELERS' CIRCULAR

WITH WHICH ARE CONSOLIDATED  
 THE HOROLOGICAL REVIEW  
 THE JEWELERS' WEEKLY THE JEWELERS REVIEW

VOL. LVII.

WEDNESDAY, OCTOBER 28, 1908.

No. 13.

## An Artistic Collarette and Pendant of Pure Egyptian Style.

FOLLOWING the suggestion of many of our readers to give prominence to striking and original American products in gem-set jewelry THE CIRCULAR-WEEKLY today illustrates on the front cover a notable example of the goldsmith's art. It is distinctly Egyptian in character, and is distinguished by the unique quality of the design, as well as by the fact that in its conception it is consistent throughout, which everyone who is familiar with the type of the art it portrays will recognize.

The artist has chosen as his subject the style prevailing during the reigns of the Pharaohs, and has worked out his *motif* in

reposeful attitude. As guardians of the temple are sphinxes resting on the spreading wings of the rising sun. The lower part of the pendant is beautifully set off with Egyptian lotus flowers. The significance of the entire pendant design is the attempt to portray the Egyptian conception of peace and power.

The collarette itself is composed of a series of lapis lazuli scarabs alternating with sphinx heads. In the mounting of these scarabs the adders and the lotus flowers are employed, the sphinx heads being crowned with the lotus flowers.

The whole jewel, which is made throughout of 18-karat gold, is a work of art and of great beauty, and was made as an exhibition piece and shown at the Art Insti-

## Handsome Centaur Cups from Pompeii.

ALTHOUGH the famous Boscoreale silver treasure reposes in a Paris museum, viz., the Louvre, it is but natural that Italy should have retained in its own museums some fine specimens of ancient silver work from Herculaneum and Pompeii. The Naples Museum, for instance, contains some handsome pieces of this kind. Among the most remarkable specimens are the Centaur silver vases shown on this page.

The centaur, a fabled monster having the head, arms and body of a man from the waist up, united to the body and legs of a horse, was a favorite decorative *motif* in ancient times.

The finds of Pompeii, which was buried

HANDSOME CENTAUR CUPS FROM POMPEII IN THE NAPLES MUSEUM.

the true old Egyptian style, being enabled to do so with the aid of the knowledge brought down to us concerning its forms of art. A casual examination will show that every part of the ornamentation of this piece has a symbolical significance, which should make it all the more interesting. The whole piece is made as a collarette and pendant to be worn as a talisman or amulet.

The principal ornament is the pendant, whose centerpiece consists of a finely cut scarab of lapis lazuli, around which is wound the Uraes asp, the head of which is upturned and serves as a means to suspend therefrom a smaller scarab attached to an Egyptian key, while the centerpiece is further set off by the rays of the rising sun. This in turn is surmounted by the façade of a temple, on the center of which is a sphinx, on either side of which are two vultures in

tute, Chicago, some time ago. The workmanship is of such a character that it brings out effectively the different features with great faithfulness and detail, and reflects credit on the makers, the Schrader-Wittstein Co., Chicago.

The Ball & Putnam Jewelry Co. was recently incorporated in Joplin, Mo. The firm has a capital of \$20,000. The incorporators are John B. Ball, R. Putnam and John E. Putnam.

John Lloyd, Northumberland, Pa., who pleaded guilty on three indictments of robbery, including the stores of Frank Dowling, Northumberland; Russell Bros. and M. Howell, Sunbury, Pa., from which considerable jewelry plunder was secured, was sentenced recently to serve two years in the penitentiary at solitary confinement.

in 79 A. D., are by no means numerous. Only in one house 14 silver vessels were found together, which belong to the Greek-Roman period; in fact, some incline to the belief that they are purely Greek.

Beside the above vases or cups there are preserved in the same museum a cup embellished with a fine relief design representing the apotheosis of Homer, also various plaques and vessels, buckets, incense burners, tripods, etc., all decorated in a striking manner.

The second hand store of N. Watelsky, New Castle, Ind., was broken into one night last week by burglars who carried away 11 watches and a large amount of other jewelry, valued in all at \$150. The same store was entered about a year ago when a large amount of jewelry was stolen.

(Pat. Dec. 18, 1900, and Feb. 5, 1901.)  
(Sectional View of the Larter Shirt Stud.)

## MANY YEARS AGO

The jewelry trade discarded spiral shirt studs because of the time and trouble required to insert them in the shirt, and the backs working out of position often caused the loss of a valuable stud.

The same old trouble is found with all shirt studs made with a back that has to be pushed or pulled into place.

**AUTOMATIC ACTION** is the only appliance that can overcome this trouble.

Larter Shirt Studs and Larter Vest Buttons have a strong spring coiled inside the piston which makes them **AUTOMATIC in ACTION** and when placed in the eyelet-hole or button-hole they lock themselves and cannot fall out.

Each is made in patterns to please all tastes and for all occasions.

## LARTER & SONS

21-23 Maiden Lane, New York, N. Y.

Pacific Coast Representatives:  
A. I. Hall & Son, Inc., Jewelers' Bldg.  
Post Street, San Francisco, Cal.

## ELSIE BEE'S FASHIONS.

ATTRACTIVE NOVELTIES NOTED IN A LADY'S RAMBLES  
AMONG THE JEWELERS.

**B**AROQUE pearls are being used generously on lorgnon chains. Sometimes as many as 47 large pearls have been applied to a single chain.

\* \* \*

There is a great demand for Japanese coral.

\* \* \*

Large hat pins are still in vogue, although there are no distinctly new designs.

\* \* \*

More brooches are being sold than pendants. The reason lies in the fashion for jabots.

\* \* \*

The long sleeve has sounded the knell of the bangle. Bracelets and bangles will still be worn, however, to some extent, over the sleeve.

\* \* \*

A jeweler of prominence predicts a return to the plainer jewelry as a reaction from the ornate styles that have been holding sway so long.

\* \* \*

There is a decided demand for beads of amethyst and jade. With a gold bead intervening between the color, these necklaces are very attractive.

\* \* \*

The flask with collapsing cup is the best seller among these useful articles. The cup, when closed, forms a plate for the monogram in the center of the flask.

\* \* \*

A unique set of book marks is in the form of figures—Dickens characters cut out of silver. They are copied from well-known pictures of this famous author's heroes and heroines.

\* \* \*

There is an attempt to reintroduce the chatelaine. As a large ring to be worn on the finger, it holds vanity cases, pencil, lockets containing pictures, and numerous other trinkets.

\* \* \*

A new bracelet consists of a thin wire of gold, at one end of which is a large cabochon emerald, while at the other is a small loop that fits over the emerald and thus serves as a clasp.

\* \* \*

A baroque pearl with an oddly serrated edge that imitates that of a petal is being charmingly applied to the edelweiss design in brooches. The centers are composed of a single diamond, a pearl, or gold.

\* \* \*

A new cigar moistener is in the shape of a cigar, dull and rough in finish to resemble the surface of the leaves. There are two small openings through which the sponge may be seen. It is an attractive and most practical accessory of the box of cigars.

\* \* \*

The auto match box constitutes an invaluable possession for the owner of a machine. It is like the usual match box in shape, except that it is much longer and is made to accommodate those new matches which, when once ignited, will not go out either in the strongest wind or the most drenching rain. They form an excellent gift to the auto enthusiast. **ELSIE BEE.**

## Annual Report on the Production of Precious Stones.

Text of the United States Geological Survey's Advance Pamphlet on Gems and Gem Minerals for 1907, compiled by Douglas B. Sterrett.

(Continued from issue of Oct. 21.)

### SMITHSONITE.

Translucent apple-green smithsonite, not only furnishing beautiful cabinet specimens but cutting pretty gems, has been found in large masses in the Magdalena mining district, New Mexico. This smithsonite occurs in the Kelly mine, which is being developed by the Tri-Bullion Smelting and Development Co. It was found in a zinc vein in a cavity or vug several feet wide and 25 feet long, which it lined and partly filled with odd-shaped masses. The surface of the smithsonite masses has a mammillary structure which is drusy with the edges of many small projecting crystals. The mineral assumes odd shapes and sometimes nearly a globular form. One specimen, seen in the New York office of the Tri-Bullion Co., was roughly about the size and shape of the head and bust of a man. It had a beautiful light-green color and was covered with drusy mammillary lumps an inch or two across.

This green smithsonite occurs in shells or layers, up to an inch or two in thickness, coating rough, irregular masses of typical dry bone or carbonate zinc ore. The shells of smithsonite have a columnar structure across them, with a slight radial arrangement of the columns. Ordinary smithsonite or zinc carbonate is colorless or white. This material contains variable quantities of a copper salt, which give it a beautiful green color. The copper stain is not evenly distributed through the mineral, but occurs in layers parallel with its surfaces. This smithsonite is being cut and sold as a gem in some of the Western States. It yields handsome cabochon stones similar to chrysoprase, though of course not so hard and therefore less valuable than that mineral. Mr. Hart, of Manitou, Colo., reports that the rough mineral for gem purposes brought from \$2 to \$5 per pound at Magdalena.

### SPHALERITE.

Dr. George E. Ladd reports that sphalerite crystals from the zinc-lead mines of Missouri are used locally in jewelry without cutting. The clear, rich, resin-colored crystals make handsome stick pins. The mineral is too soft, however, for extensive use.

### SPODUMENE.

#### KUNZITE AND HIDDENITE.

*United States.*—There was a large production of lilac-colored spodumene or kunzite in the southern California gem region during 1907. The output of gem spodumene amounted to about 125 pounds of selected material, part of which was pale green, colorless, and yellowish. The production came from the Pala Chief and the Caterina mines, near Pala, and the Mack mine, near Rincon, all in San Diego County.

The development for the emerald-green spodumene or hiddenite deposit in North Carolina was described under "Beryl." Further work on the lilac and pale-green spodumene deposit at Andover, Oxford County, Me., has yielded mineral of good color, though clear only in small patches. F. G. Hillman reported surprisingly beautiful gems cut from material that had been pronounced valueless by two dealers in precious stones.

*Madagascar.*—Albert Dabren, mining engineer of Madagascar, reports the discovery of gem kunzite and hiddenite on that island. In a personal letter to the writer, dated Tananarivo, May 1, 1908, Mr. Dabren states that the material is comparable with that of California and North Carolina in beauty.

### TOPAZ.

#### UNITED STATES.

Topaz was produced in Utah, California, Texas, Maine and New Hampshire during 1907. Prof. F. W. Clarke mentions an occurrence of topaz on Baldface Mountain, near North Chatham, N. H., where faintly bluish and colorless crystals, suitable both for specimen and cutting, are found. This locality is only a few miles from the Stoneham, Me., topaz locality.

*Texas.*—The production of topaz in Texas came from a new locality, near Streeter, Mason County, and was reported by R. L. Parker to amount to about 20 pounds. Part of this topaz was found as pebbles in the drift of a small branch and part in place in pockets embedded in yellowish clay, associated with crystals of smoky quartz, tabular feldspar and mica. Mr. Parker describes the topaz as varying from colorless to white, bluish, greenish

and amber in color. Of three specimens sent to the Survey, one is a cleavage fragment of a water-worn crystal, colorless and perfectly clear; another crystal is perfectly clear with a slight bluish tint; and the third, a large crystal weighing about 4½ ounces, is clear in portions, with a delicate bluish-green tint. It is probable that very beautiful material will be obtained from this locality.

Though well supplied with faces, the two crystals available for examination apparently presented no new forms. The forms determined with reasonable certainty by hand measurements were the prisms m(110), l(120) and g(130), brachy-pinacoid h(010), macrodome h(203), brachydomes f(021) and y(041), and pyramids u(111), v(121), o(221) and i(223). The character of the crystal faces varies considerably on the two crystals. Some are polished; others are clouded, etched and striated.

*California.*—The production of topaz from California came from the gem mines four miles N. 75° E. of Ramona, San Diego County, and principally from the Little Three mine at this locality. These mines produce, besides topaz, hyacinth-colored garnet, tourmaline, quartz and albite or cleveclanite. Some of these stones yield rich gems, while others form beautiful cabinet specimens. The mines from which they are obtained are described under "Gem Minerals of Southern California."

### TOURMALINE.

#### UNITED STATES.

The production of tourmaline amounted to about 2,140 pounds of rough gem crystals. California contributed the bulk of the production, and Colorado, Maine and Connecticut made up the remainder. The greater part came from the mines of the Himalaya Mining Co., the Mesa Grande Gold and Gem Mining Co., at Mesa Grande, San Diego County, and the Pala Chief mine at Pala. The mines of the Royal Gorge region, Colorado, operated by C. A. Beightol & Co., were the next largest producers. J. D. Endicott reports the discovery of a new tourmaline deposit in pegmatite inclosed in garnetiferous mica schist in Fremont County, Colo. A new deposit of tourmaline was reported from the Pala region, San Diego County, Cal., by John W. Reed, late in 1907. A pocket opened in this deposit contained over 150 crystals, some two or three inches in diameter and several inches long, which had a lavender color. Several tourmaline mines in California are described under the "Gem Minerals of Southern California."

#### INDIA.

The production of tourmaline from the Ruby Mines District of Burma during 1906 amounted to 193 pounds, valued at £1,001, as compared with 161 pounds, valued at £1,500 in 1905.<sup>1</sup> E. C. S. George, deputy commissioner of the Ruby Mines District, describes the workings for tourmaline<sup>2</sup> about a mile east of Maingin. These deposits were worked by the Chinese about 150 to 200 years ago. According to local tradition they were again opened temporarily by Kachins about 40 years ago. About 1885 the deposits were reopened and more systematically worked until 1895 under Pir Seinde. Since 1899 they have been worked by licenses, and during the last three years this locality has produced about £200 worth of tourmaline annually.

The tourmaline occurs in soft, decomposed, granitic veins, generally covered by a thick layer of jungle soil. Isolated crystals are sometimes found in the yellowish earth associated with the granite or the red soil capping it. The discovery of the deposits made from shafts four or five feet square with underground workings is almost entirely accidental. Some of the shafts are about 100 feet deep, which seems to be the limit of the native skill. The tourmaline is sorted into three classes: (1) Best pink rubellite; (2) darker colored crystals, lower part brown or black; (3) fragmentary crystals of any color, or imperfect small crystals. The best varieties bring from £80 to £100 per viss (3.65 pounds).

### TURQUOISE.

There was a production of nearly 600 pounds of rough selected turquoise and of nearly 3,000 pounds of turquoise matrix during 1907, from Arizona, Nevada, Colorado, New Mexico and Cali-

fornia. The greater part of the production came from the mines near Mineral Park, Ariz. The output from Colorado came from the mines near La Jara, Conejos County, operated by the Colorado Turquoise Mining Co. This company reported development work by two tunnels 200 feet and 100 feet long, respectively, and four shafts 105 feet, 97 feet, 70 feet and 50 feet deep, respectively. E. H. Davis, of Mesa Grande, Cal., mentions the discovery in December, 1907, of a turquoise deposit in the Colorado desert on Carrizo Creek. Turquoise seams in a dark matrix are especially suitable for cameo coverings, and some of the native material has been used with excellent results for this purpose by F. J. Essig, of Chicago, and William Petry, of Los Angeles. This turquoise cameo stone comes from Esmeralda County, Nev., and consists of good blue turquoise in seams an eighth of an inch or more in thickness in a dark gray chalcedony matrix. The latter furnishes a good background for the turquoise carving.

#### NEW MEXICO.

Turquoise is known to occur at several places in the Burro Mountains of Grant County, N. Mex. A description of one of these deposits—that of the Azure Mining Co., about 15 miles southwest of Silver City—with notes on the geology of the surrounding region, has been given by Edward R. Zalinsky.<sup>3</sup> The Azure mine, the American Gem and Turquoise Co. mine, one-half mile south-east, and the Porterfield Turquoise Co. mine, one-half mile south of the Azure mine, were briefly visited by the writer in the Fall of 1907. The following description has been prepared from Mr. Zalinsky's article and the writer's notes:

During the last part of 1907 a small amount of work was done on the Azure mine, opening up the lower levels and preparing to push developments during 1908. The mine had not been operated since 1905. The American Gem and Turquoise Co. mines also have been idle for the last few years. The Porterfield turquoise mine was not worked during 1907, though there was a large production from small excavations in 1906.

The country rock of the turquoise region is granite which presents various phases in texture, composition and degree of alteration. The greater part of the granite has a porphyritic texture, which varies from coarse to very fine. Much of this granite has undergone such extensive kaolinization that it is often difficult to determine the constituent feldspathic minerals. The texture varies considerably and in some places is finer grained and more porphyritic than in others. A common variety of the granite has coarse pink feldspar phenocrysts. A thin section cut from a specimen of this granite collected at the Copper King mine, about one-third mile southwest of the head of the Azure mine, contained orthoclase, a plagioclase, quartz, biotite altering to chlorite, magnetite and zircon. Another section cut from a specimen from near the east wall of the Azure vein contained orthoclase, a little plagioclase, probably albite, and quartz in grains and veinlets. The feldspars were partially kaolinized and the kaolin much stained with limonite. Another form of occurrence is a spotted porphyritic granite with phenocrysts of orthoclase and plagioclase two or three millimeters square. A thin section from this variety of rock at the Porterfield mine contained orthoclase and plagioclase in phenocrysts and biotite shreds scattered through a groundmass of feldspar and quartz. All of the feldspars were partially kaolinized.

Mr. Zalinsky describes the occurrence of mica-andesite porphyry stocks and andesite dikes of pre-Tertiary and Tertiary age. It was probably during the intrusion of these bodies that the rock of the region was fractured and mineralized. The turquoise deposits adjoin the copper deposits of the Burro Mountains on the northwest, and copper staining is present throughout their extent.

*Azure Turquoise Mine.*—The Azure mine has been worked on an immense scale by an open cut that is about 60 feet deep in its deepest portion, from 70 to 100 feet wide, and about 200 yards long, with adits on two levels below the open work. The vein is in a badly fractured zone and strikes about northeast with a dip of 45° to the southeast; it is about 40 feet wide, though locally over 60 feet wide. The joints produced during fracturing dip both parallel to the vein and across it to the northwest. Slickensides and evidence of movement are more pronounced on the fissures parallel to the vein, and two sub prominent fractures form the walls of the vein through part of its extent at least. The country rock is porphy-

## Rose Diamonds

ritic granite, badly altered through kaolinization, portions of which form the mass of the vein. A large amount of silicification has hardened the rock in many places so that it does not resemble ordinary decomposed granite. This silicification is represented by the deposition of quartz in part throughout the rock and in part in seams and veinlets cutting it at all angles.

Turquoise occurs as veins and veinlets filling the joints and fissures in the rock and as nuggets. In places these veinlets are mere films, and in others they are as much as three-fourths of an inch thick. Part of the turquoise is found in groups of small rounded masses resembling nuggets, fitted roughly together though separated from one another by kaolin or clay and enveloped in it. These groups of nuggets generally fill a flattened lenticular-shaped pocket in one of the veinlets. The best turquoise came from a portion of the vein known as the "Elizabeth pocket," which extends from the second level to the surface, a height of 40 to 60 feet, and may include a width of 40 feet and a length along the vein of 150 feet. The vein rock near this pocket is cut by an unusually large number of quartz seams and veinlets up to a half inch wide. These contain crystallized cavities in places, and veins of turquoise sometimes contain quartz crystals penetrating them. The quartz veinlets sometimes give place to turquoise veinlets or include patches of turquoise. Where portions of the rock are less altered and pink feldspars occur, turquoise of a bright blue color is found. Turquoise veinlets of different shades of color are found crossing each other, indicating different periods of deposition and different sources of material.

Good turquoise was found at other places in the vein than in the Elizabeth pocket. To the northeast of this pocket much of the turquoise had a greenish cast, while still farther along good blue variety was more plentiful. To the northeast of the open cut the Azure mine did not yield much turquoise of good color in a drift several hundred feet long. To the southwest of the open cut the vein is readily traced for several hundred yards up Morrills Canyon. It contains very little turquoise, however, but has been proved to carry fairly rich copper ores. William R. Wade, who has directed the openings of this vein for copper, reports that a little turquoise was found in the Copper King mine at a depth of 410 feet. In the workings at the Azure mine the best turquoise was found at depths of less than 100 feet. Pyrite or sulphides were not observed associated with the turquoise, though the wall rocks are colored red with hematite in places. Where the feldspars of the rock have been the most extensively kaolinized turquoise is found mostly in nugget form. In less altered rock hard vein turquoise is found, and both varieties are found in moderately altered rock.

Mr. Zalinsky mentions the various colors found in turquoise at the Azure mine and the associations with other minerals and matrix. Nearly all shades of blue and green occur—dark blue, sky blue, light blue, bluish green, light green and dark green—and in some cases reddish-brown, chocolate, and violet-colored material has practically the same composition as turquoise. A combination of colors in the same piece is not uncommon, especially in mottled matrix, as bright blue spots or lines in paler turquoise. The mineral halloysite is associated with turquoise in olive-green and grayish masses and in nugget form similar to turquoise nuggets. Halloysite is opaque to translucent and has a waxy luster. When moist and fresh from the mine the halloysite has about the consistency of candle wax. It hardens and cracks on exposure to the air, however, though it does not become so hard as turquoise. Among numerous associations the following were noted: Pale-blue vein turquoise with a network of yellowish-brown hydrous aluminum phosphate streaks; blue-white vein turquoise containing open cracks and streaks of darker material; light-blue vein turquoise containing yellow spots of phosphate, quartz grains, and darker veinlets of purple and blue parallel to the walls.

The turquoise from the Elizabeth pocket is probably the finest ever found in the world. Much of it is of a deep blue color, slightly translucent, and over six in hardness, so that it makes a fine wearing gem. The cut gems of good quality from the Azure mine are marked with a circle on the lower side, and such stones are guaranteed to hold their color for a number of years or to be replaced. Mr. Zalinsky states that the Azure mine has produced turquoise to the value of several million dollars since 1891.

Mr. Zalinsky suggests that the turquoise was

formed in the vein where copper-bearing solutions, rising in fissures with a northwest dip, crossed phosphate-bearing solutions rising in fissures parallel to the vein with a southeast dip. In support of this theory the occurrence of such copper minerals as malachite and chrysocolla in the copper fissures above the supposed phosphate fissures is cited. It is thought the phosphoric acid of the turquoise was derived from the decomposition of apatite in the original granite and the alumina from the decomposition of the feldspar of the same rock. Where copper was supplied in excess, the turquoise runs toward green in color. The proper proportion of copper gives the best bright blue gem of greater hardness than where the copper was not present in sufficient quantity. In the latter case the turquoise is of pale color and inferior hardness, and apparently this variety grades into simple phosphate of aluminum.

*American Gem and Turquoise Co. Mines.*—The operations of the American Gem and Turquoise Co. were upon the deposits in the Parker mine and near the prehistoric workings about 200 yards to the northwest. At the latter place the recent work consists of two tunnels, of about 50 and 80 feet in length, driven in from a small open work at the outcrop on a hillside. One of these tunnels running southwest followed prominent seams, which carry turquoise in places and dip about 50° to the southeast. The other tunnel cut across the direction of the prominent seams and appeared to be exploratory work. The country rock is typical quartz porphyry with prominent glassy quartz phenocrysts and badly kaolinized feldspar crystals.

Mining at the Parker mine was accomplished principally by open cuts, of which two are fairly large. The one to the north was made in a gully running east, and is nearly 100 yards long and 10 to 25 feet deep. The country rock is hard quartz porphyry like that near the prehistoric workings. A number of seams carrying turquoise cross the open cut in a northeast direction with southeast dips. Other seams, and one especially prominent seen in the end of the cut, run nearly east and west with a high northerly to vertical dip. Turquoise occurs in films, seams, nuggets and irregular masses in the matrix. The prominent seam mentioned was from two to six inches thick, and carried pale turquoise and matrix in masses of nearly equal thickness. Much of the turquoise in this seam is too soft and of too poor color to be of great value; part, however, would yield good matrix gems.

The openings farthest south consist of irregularly shaped open work with a small amount of tunneling. The main cut is nearly 50 feet deep on one side and probably 100 feet across. This cut is situated on the contact of the typical quartz porphyry on the northeast and the altered country granite on the southwest. The rock is jointed in different directions, some of the seams running northeasterly. The turquoise occurs in films and veinlets in many of the joints, and some of a fine bright blue color nearly a quarter of an inch thick was seen in the open cut.

Part of the turquoise from these mines is of the same high grade as much of that from Burro Mountains. The guaranteed cut gems of this company are marked with a cross (x) on the back.

*Porterfield Turquoise Mine.*—The Porterfield Turquoise mine is on the west side of St. Louis Canyon, on each side of the mouth of a small gully. The work at this mine has not been extensive and consists of several tunnels and shafts with small open cuts and prospect pits. Two of the deeper shafts are between 40 and 50 feet deep, and the longest tunnel is nearly 170 feet in length. Turquoise of the best quality was found most plentifully during 1906 in irregular open work near the bottom of the gully.

The country rock at the mine consists of different types of granite porphyry. A prominent type has large crystals or phenocrysts of red orthoclase through a quartz and biotite matrix, and approaches a granite in texture. Another type is a finer spotted porphyry, composed of orthoclase with some plagioclase and quartz phenocrysts in a groundmass of feldspar and quartz. Biotite is locally present in quantity in small six-sided crystals generally badly altered to chlorite. Another type is a quartz-feldspar granite, somewhat porphyritic, in which biotite and similar minerals are lacking. In the majority of these rocks the feldspars have been partially kaolinized, while abundant silicification has taken place. The latter is represented by much secondary quartz binding the particles of rock more closely together and in seams cutting the rock in various directions.

Turquoise has been found in prospects in a belt about 100 yards wide and over 200 yards long in

a direction east of north and west of south. This area is marked by numerous joints, of which many prominent ones strike northeast, though others cut across this direction at various angles. The turquoise occurs in seams, veinlets, lenses, and groups of nodules or nuggets in lens-shaped masses. Among the minerals associated with turquoise the most common is a white, kaolin-like clay which coats the nuggets and in places forms an important part of the filling of seams. Among other minerals observed associated with turquoise and in turquoise-bearing seams were hematite, quartz, limonite, hyalite opal, chalcedony and greenish, waxy halloysite, which in places assumes the form of nuggets like turquoise. The turquoise occurs in seams running in various directions, the larger veinlets often having stringers extending out in seams crossing them. The joints and seams in the vicinity of turquoise-bearing ground often show indications of turquoise in the form of blue, bluish-green, green, yellowish-green, and whitish coatings or stains.

Choice lots of turquoise that range from deep robin's-egg blue to blue of pale shades and that would yield one color gems of 10 to 20 carats (or even of 30 carats) are reported to have been obtained from this mine. The largest yield of turquoise of one color is in stones of one to 10 carats, while considerable matrix material and mottled turquoise are reported to have been found. Mottled turquoise presents a number of variations of light-blue turquoise speckled with dots of deeper blue. In one specimen seen the dark blue mottling consisted of small dendritic masses resembling the markings in moss agate. Judge M. M. Porterfield, owner of the mine, states that the deep-blue stones of finest quality when cut bring from \$1 to \$10 per carat for those under 10 carats in weight and \$10 or more per carat for those weighing over 10 carats. The matrix stones bring from 25 cents to \$1 per carat, and the mottled turquoise brings a little more than the matrix. The Porterfield turquoise when cut is marked with a cross (x) on the lower side, as are those of the American Gem and Turquoise Co. With better facilities for marketing, the production of the Porterfield mine could probably be considerably increased.

(To be continued.)

### Costly Gold Guns of an Indian Prince Melted and Converted Into Bullion.

I LEARN with profound regret (writes a correspondent) that His Highness the Maharajah-Gaekwar of Baroda has melted down and converted into bullion the celebrated gold and silver cannon of Baroda. I say "with profound regret" for sentimental reasons.

Of these costly but useless toys, the silver guns were the inspiration of a former Gaekwar. In order to "go one better" than his predecessor, the late Gaekwar (he who was charged in 1875 with the attempted murder of Colonel Phayre), had the gold guns cast and mounted at a cost, it is said, of £100,000. They reposed in the State armory and were the wonder and admiration of all visitors to the capita.

On State occasions, however—such as coronations, marriages, etc.—the gold and silver guns were always brought out to take part in the procession. They were "horsed" by teams of magnificent white oxen, which were fittingly caparisoned, i. e., in cloth of gold for the gold guns and cloth of silver for the silver guns.

The native gunners and drivers regarded their charges as sacred and the writer has seen offerings of rice, fruit, fowls, etc., deposited upon the muzzles of these weapons. (?) in the Baroda barracks. Such offerings have now "had their day and ceased to be," for the present Maharajah-Gaekwar happens to be a man of both practical politics and practised economy, and he would not maintain the "guns" for a merely sentimental reason.—*Westminster Gazette.*

## MOUNTED and UNMOUNTED DIAMONDS

Being large IMPORTERS, our stock consists of the best that is obtainable in loose diamonds in all sizes and qualities and as MANUFACTURERS, we are in a position to mount these diamonds in mountings of exceptional merit and of the highest grade of workmanship.

Try us when you wish Mounted or Unmounted Diamonds. You will find our prices right. Catalog on request.

**Death of Daniel F. Persell.**

JAMESTOWN, N. Y., Oct. 21.—Daniel F. Persell, a prominent merchant of this city, and one of the leading jewelers of this section of the State, died yesterday morning at his home, 11 W. 2d St., as the result of a stroke of apoplexy, as he was about to get out of bed. Mr. Persell's death was a great shock to his friends and business associates, because he had apparently been in robust health almost up to the moment of his demise. Monday night until 11.30 he had been up with a member of the trade talking business and went to bed in apparently excellent spirits.

Few business men in this section of the State were more popular or had a greater number of friends in business and social life than did the deceased. In fraternal circles he was exceedingly well-known, being prominent in the Jamestown Lodge of Elks, Jamestown Aerie of Eagles, the Knights of Pythias and other organizations, all of which were well represented by large delegations at the funeral, which takes place to-morrow afternoon and which will be in charge of the Jamestown Lodge of Elks.

Mr. Persell was born in Panama, N. Y., March 21, 1860, but has lived in Jamestown since he was 16 years old. He started to learn the jewelry trade at the store of Sereno N. Ayres, then one of Jamestown's leading jewelers, and later was employed at the store of Frederick J. Fuller and J. A. Kaiser. After mastering all details of the business Mr. Persell started for himself in 1902, when with E. H. Goodenough he formed the partnership of Goodenough & Persell, the firm locating in the store which had formerly been occupied by Mr. Kaiser, Mr. Persell's last employer. In October, 1894, the business was moved to the Wellman building. Later Mr. Goodenough retired and Mr. Persell continued the business, turning it into a stock company, under the style of the D. F. Persell Co.

The deceased is survived by a widow and a son, Daniel E. Persell, and also by a brother and two sisters.

### **Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.**

WASHINGTON, D. C., Oct. 21.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

Amapola: 5 cases clocks, \$103.  
 Bangkok: 17 cases clocks, \$192.  
 Barcelona: 1 case silverware, \$212.  
 Basle: 1 case jewelry, \$350.  
 Berlin: 5 cases clocks, \$225.  
 Berne: 6 cases watches, \$550.  
 Bremen: 2 cases plated ware, \$224; 4 cases watches, \$6,677.  
 Buenos Ayres: 13 cases clocks, \$360; 1 case jewelry, \$201.  
 Capetown: 71 cases clocks, \$1,259.  
 Colon: 2 cases optical goods, \$318; 1 case clocks, \$130.  
 Fiume: 1 case jewelry, \$233.  
 Glasgow: 34 cases clocks, \$1,345.  
 Gothenburg: 5 cases clocks, \$158.  
 Jena: 1 case optical goods, \$126.  
 Kobe: 144 cases clocks, \$5,423.  
 Hamburg: 5 cases optical goods, \$553; 4 cases optical goods, \$1,262.  
 Havana: 32 cases clocks, \$582.  
 Havre: 2 cases silverware, \$750; 2 cases optical goods, \$224; 1 case jewelry, \$125.  
 Hong Kong: 26 cases clocks, \$292.

Hull: 2 cases plated ware, \$100; 2 cases thermometers, \$180; 4 cases plated ware, \$123; 2 cases jewelry, \$402.

La Paz: 2 cases plated ware, \$100.  
 Las Palmas: 16 cases clocks, \$231.

Liverpool: 14 cases clocks, \$825; 2 cases jewelry, \$1,090, 80 cases clocks, \$1,180.

London: 5 cases watch oil, \$160; 29 cases clocks, \$755; 9 cases optical goods, \$2,943; 26 cases clocks, \$1,641; 1 case watches, \$200; 1 case silverware, \$250; 2 cases thermometers, \$285; 1 case jewelry, \$120; 33 cases clocks, \$678; 22 cases clocks, \$744; 13 cases optical goods, \$4,822.

Manila: 13 cases plated goods, \$2,133; 5 cases optical goods, \$100.

Melbourne: 19 cases plated ware, \$2,102; 149 cases clocks, \$2,965; 16 cases watches, \$1,931.

Montevideo: 1 case optical goods, \$320; 5 cases plated ware, \$337; 2 cases watches, \$937.

Moscow: 6 cases clocks, \$338.

Rangoon: 33 cases clocks, \$627; 1 case jewelry, \$1,315.

Rio de Janeiro: 195 cases clocks, \$5,025; 1 case jewelry, \$405; 2 cases watches, \$385; 1 case optical goods, \$756; 16 cases clocks, \$231.

Southampton: 1 case optical goods, \$513; 2 cases silversmiths' sundries, \$230; 11 cases watches, \$1,099; 2 cases plated ware, \$158; 16 cases watches, \$2,583; 3 cases silversmiths' sundries, \$432.

Sydney: 162 cases clocks, \$1,493.

Valparaiso: 3 cases optical goods, \$427; 1 case watches, \$163; 34 cases clocks, \$420.

### **Clerks of New York Jewelry House Charged With Stealing from Their Employers.**

Arthur C. Diehl and Alexander W. Aiken, clerks in the employ of Black, Starr & Frost, jewelers at 438 Fifth Ave., New York, who were arrested last Wednesday night charged with stealing \$70 worth of jewelry from the firm, were held for further examination in the Tombs Police Court Thursday upon the request of Assistant District Attorney Ward. Although the specific charge against the two former clerks of the firm is only the larceny of a small sum, it is thought the total amount stolen will probably reach \$1,000.

Vice-President Wm. H. Rich, of the jewelry firm, some time ago, in tracing a piece of jewelry which had been misplaced, found that it had passed through the hands of Diehl, where he lost track of it, and as the gem was one of several which could not be accounted for, he became suspicious. After tracing the jewel to Diehl, he recalled that the mysterious disappearance of the gems had ceased at about the time, eight months ago, when Diehl had been promoted to the repair department. The young man was called to the office of the vice-president last week and confessed that by checking articles off the register, which is kept of all jewelry, he had been able to get away with a number of pieces. In his confession he implicated Aiken.

Mr. Rich had detectives from headquarters arrest Diehl and Aiken. Diehl lives at 314 E. 116th St., and Aiken's home is 118 W. 144th St. Diehl is single but Aiken, who is six years older, is married.

Mr. Rich told a CIRCULAR-WEEKLY reporter that the amount of goods taken would probably reach about \$1,000. According to newspaper stories a girl is mixed up in the case. Aiken, the detectives say, was friendly with a girl, to whom he gave valuable presents, and the girl's father, it is claimed, started a search and found several jewelry boxes bearing the name of Black, Starr & Frost in the girl's room. The father went to the firm and the investigation followed.

### **Silverman Jewelry Co., Pittsburg, Pa., Now in Voluntary Bankruptcy.**

PITTSBURG, Pa., Oct. 22.—Ella Bell, doing a wholesale jewelry business as the Silverman Jewelry Co., in Penn Ave., today filed a voluntary petition in bankruptcy in the United States District Court. The schedules filed with the petition place the liabilities at \$8,746.84 and the assets at \$6,384.15. Of the amounts owing by the company, Harry H. Silverman, who was employed as clerk and salesman, claims that \$562.50 is due him as salary, he receiving \$25 a week for his services. The First National Bank of Pittsburg also holds a note secured by B. I. Levenson and Henry H. Silverman, both of whom, it is stated in the petition, are insolvent.

There are a large number of creditors scheduled. Those to whom the concern's indebted for amounts exceeding \$50 are as follows: Wm. H. Luther & Son, \$299; W. A. Sturdy Mfg. Co., \$505; S. & B. C. Weinhaus, \$199; Smith Bros., \$80; Strauss Bros. & Co., \$39; New Haven Clock Co., \$121; A. Schwab, \$553; American-Swiss Watch Co., \$472; Grafner Bros., \$42; McRae & Keeler, \$281; Freeman, Daughday & Co., \$455; Hipp, Didisheim & Bro., \$103; Irons & Russell, \$53; W. H. Wilmath, \$75; R. E. Earle Mfg. Co., \$75; International Watch Co., \$94; M. F. Williams & Co., \$30; Frederick Speidel, \$70; Keller, Becker & Co., \$73; North American Watch Co., \$175; Singer Bros., \$95; Standard Chain Co., \$97; Standard Button Co., \$215; Bates & Bacon, \$139; National Optical Co., \$104; J. Schwartzkoff & Co., \$95; A. Strauss & Co., \$151; O. Gottlieb & Co., \$57; Mason, Howard & Co., \$89; A. Tancer, \$222; Sturdy Bros., \$119; Marden & Kettley, \$72; Crossin & Co., \$409; Capron & Co., \$69; D. F. Briggs Co., \$156; R. L. Griffith & Son Co., \$479; Waite, Mathewson & Co., \$106; Wildpett & Saacke, \$85; E. L. Spencer, \$222; P. & A. Linton, \$68; F. M. & J. L. Cobb, \$152, and Ida H. Silverman and the Land Title & Trust Co. of Philadelphia, \$382 for money loaned.

The petition sets forth that the fixtures and furniture in the store are valued at \$500. The accounts owing by debtors amount to \$389, with additional accounts of \$1,888 of doubtful value, owing the petitioner. The petitioner also sets forth that there is \$17 on deposit in the Cosmopolitan National Bank, this institution being one of two which closed its doors about two months ago. The bankrupt also places the value of personal property at \$299 exempt from confiscation, under the bankruptcy act. The stock in trade is stated to be worth \$2,745.

The affairs of the bankrupt have been referred to W. R. Blair.

The business was started by Hyman Silverman, who went to the wall in 1889. He was afterwards employed by a wholesale jewelry firm for about five years and about 1895 again started in business under the style of the Silverman Jewelry Co. The business was formerly located at 709 Penn Ave., but moved to 703 Penn Ave. in April of 1896. The business has at various times been in the name of one of the Silverman family as trustee for the others and Ella Bell, who, as trustee, filed the bankruptcy petition, is a daughter of the founder.

## OUR PURCHASES

notwithstanding dull times, have continued uninterrupted. Our European offices have been carefully observing the condition of the market, availing themselves of every opportunity it offered in the way of securing numerous advantageous lots which we are now in the position to offer.

Among other goods we have now a number of VERY ATTRACTIVE SERIES OF PEARLS in

ROUND, BOUTONS and ORIENTAL BAROQUES

**Awards Granted to British Exhibitors of Jewelry, Silverware, Horological and Kindred Lines at the Franco-British Exhibition.**

LONDON, Oct. 18.—The following is the list of the British firms which have received awards for their exhibits of jewelry, gold and silverware, watch, clock and cutlery and kindred lines at the Franco-British Exhibition. It will be noticed that R. & S. Garrard have a grand prix for each class, jewelry and silversmithing, and also that E. Dent & Co., the makers of "Big Ben," have the only grand prix for British watches and clocks and the only grand prix for nautical instruments.

The awards in full are:

**SILVERSMITHS' WORK AND ENAMELING.**

*Hors Concours.*—Goldsmiths' and Silversmiths' Co., Ltd.

*Grand Prix.*—Elkington & Co., Ltd.; R. & S. Garrard; Flavelle, Roberts & Sankey, Ltd. (Australia).

*Diploma of Honor.*—Mappin & Webb, Ltd.; Peto, Bennett, Melbourne, Australia.

*Gold Medal.*—Catchpole & Williams, Alfred Clark, the Indian Government.

*Silver Medal.*—Harman & Co., Association Diamond Merchants, Brigg & Sons, Stewart Dawson & Co., Ltd.

*Bronze Medal.*—Miss N. Agar, for enameling.

*Honorable Mention.*—Robinson Bros., J. Cook & Sons, Ltd.; Hemming Manufacturing Co., the Government of Burma, the Queensland Government, the West Australian Government, G. L. Gorer & Co., Pinnuswarny Pathat & Co., Maung Po Kyan, Maung Yin Maung, Maung Po Kin, Maung Po Yin.

**GOLDSMITHS' WORK AND JEWELRY.**

*Hors Concours.*—Goldsmiths' & Silversmiths' Co., Ltd.

*Grand Prix.*—R. & S. Garrard, the Queensland Government, Brisbane, the West Australian Government.

*Diploma of Honor.*—Mappin & Webb, Ltd.

*Gold Medal.*—Catchpole & Williams, Elkington & Co., Ltd.; Association of Diamond Merchants, E. Dent & Co., Ltd.

*Silver Medal.*—W. E. Wood, Stewart Dawson & Co., Ltd.; Alfred Clark, Robinson Bros.; Miss D. F. Hilton, for enameling.

*Bronze Medal.*—Widmers, Ltd.; Flavelle, Roberts & Sankey, Ltd. (Australia), G. L. Gorer & Co.

*Honorable Mention.*—Misses N. Agar, E. Bethune, Ada Bilton, E. M. Booth, L. M. Cox, A. E. Hood, E. Kirkpatrick, G. F. Nure, A. M. Rowland, L. Rimmington, Van Someren, Woodward, A. M. Taylor, E. Vinter, A. Warne, Mrs. Hadaway, Mrs. Whipple, Mrs. E. Dick, Byramji Cursetji (India).

**CLOCK AND WATCHMAKING.**

*Grand Prix.*—British Horological Institute, E. Dent & Co., Ltd.

*Diploma of Honor.*—Charles Frodsham & Co., Ltd.; S. Smith & Sons, Ltd.

*Gold Medal.*—Elkington & Co., Ltd.; Chubb & Sons Lock & Safe Co., Ltd.

*Silver Medal.*—Stewart Dawson & Co., Ltd.; Robinson Bros.

*Bronze Medal.*—Alfred Clark, Dobbyn & Co.

**CUTLERY.**

**LEATHER MANUFACTURE.**

*Grand Prix.*—Mappin & Webb, Ltd.

*Diploma of Honor.*—Alfred Clark.

*Bronze Medal.*—Stewart Dawson & Co., Ltd.

**ASSAYERS, ETC.**

*Grand Prix.*—Johnson, Matthey & Co., Ltd.

**MATHEMATICAL AND SCIENTIFIC INSTRUMENTS.**

*Grand Prix.*—E. Dent & Co., W. F. Stanley & Co., Ltd.; Negretti & Zambra, J. H. Dallmeyer, Ltd.

*Diploma of Honor.*—J. H. Stewart, J. Pullischer, R. S. Neumann.

**SURGICAL INSTRUMENTS.**

*Gold Medal.*—J. Piffischer.

**Manager of Installment Jewelry House, Providence, R. I., Arrested After a Large Shortage Is Discovered.**

PROVIDENCE, R. I., Oct. 24.—Archie E. Blood, 30 years of age, who has been employed for five years by Caesar Misch, Inc., at 400 Westminister St., and has been manager of the jewelry department of the concern for some time, was taken to police headquarters yesterday by Inspector Monahan. The detective has been working on the books of the firm's jewelry department for some time and it is claimed that he has found a shortage of about \$2,500 in that department.

The arrest of Blood and the discovery of the alleged shortage came about in a curious way. Until Inspector Monahan notified the management of the store that articles were being stolen from that place nothing was known about it there. Monahan's suspicions were aroused some weeks ago when he discovered that many people were getting watches and diamonds cheap down town. He looked up several of these cases and his suspicions were aroused.

It is claimed by the police that the detective traced some of the watches and diamonds to the Misch store. After he was sure of his ground the detective went to the store and told Manager Charles E. Cohen of his discovery. That was early in the week. The young man was taken to headquarters at that time but after he had promised to mend his ways, Mrs. Misch, widow of the late owner, decided not to prosecute him and he was allowed to return to his work.

After that the books of the jewelry department were thoroughly examined by an accountant, and upon the alleged shortage of \$2,500 being found, Blood was rearrested. He was held on a charge of embezzlement.

Because Chief Inspector Horton told the court that two diamonds valued at \$30 each have been recovered and other articles alleged to have been stolen by Blood have been traced to Boston, Judge Lee, in the Sixth District Court Monday continued the hearing of the case against the

young man until Nov. 6. He was arraigned Monday on a warrant charging him with the embezzlement of four watches valued at \$51, two chains of the value of \$7.50, four diamonds valued at \$110, one diamond ring valued at \$30 and two watches valued at \$22, the whole valued at \$220.50.

Blood entered a plea of not guilty and was locked up under \$1,500 bail.

**Advisory Council of the N. E. M. J. & S. Association Arrange Details for Annual Meeting and Banquet.**

PROVIDENCE, R. I., Oct. 23.—The weekly meeting of the advisory council of the New England Manufacturing Jewelers and Silversmiths' Association, Inc., was held at the rooms of the association, 42 Weybosset St., yesterday afternoon and an unusual amount of business transacted. The proposed amendments that are to be presented at the annual meeting were discussed at length.

George H. Holmes and Albert K. Potter, of the committee appointed at the last meeting to confer with Henry Prew, of the Earle & Prew Express Co., regarding the advance in freight rates between this city and New York, made an interesting report. It was stated that Mr. Prew pointed out that the manufacturing jewelers for many years had occupied a place in what might be called a preferential class and that the advance in tariff simply brought them within the scope of all other shippers of merchandise.

One member of the council reported that he had just returned from a visit to Canada where he went for the purpose of making a personal investigation of the difficulties surrounding the new stamping law and at the particular request of the Commissioner of Agriculture he presented the circular issued by the Canadian Department of Agriculture with special reference to the stamping law, and advised a careful consideration thereof.

It was reported that the labor bureau which has been opened adjoining the rooms of the association, with Mr. Richardson in charge, has been in operation about 10 days, and that a number of applications had been filed with the clerk, several having already been placed with manufacturers.

It was stated that the annual meeting of the association will be held at Masonic Temple Hall, Saturday evening next. Supper will be served promptly at 6.30 o'clock, after which the president and other officers will make their annual reports, and the election of officers for the ensuing year will take place. The members will be favored by addresses by men in the trade on practical subjects that have been selected with especial reference to prevailing and prospective conditions in the trade. Among the topics to be presented will be the recent "German Agreement," "Credits," "Free Labor Bureau." A speaker from New York State will also make an address upon a subject of vital interest. For the convenience and to insure the attendance of the Attleboro and North Attleboro members, special cars will be provided, leaving North Attleboro at 4.20 p. m., Attleboro at 4.40 p. m.

### Man Accused by Several Jacksonville, Fla., Jewelers, Captured, and Stolen Property Recovered.

JACKSONVILLE, Fla., Oct. 21.—Members of the jewelry trade of this city were pleased yesterday over the capture of a young man while in the act of stealing a diamond ring at the jewelry store of the R. J. Riles Co., N. Bay St., as this led to the recovery of property which had previously been stolen from several other concerns, among them the Greenleaf & Crosby Co. and Hess & Slager. The prisoner, who gave his name as J. N. Allport, 24 years old, pleaded not guilty and was later released from the county jail, awaiting trial, under bail of \$750.

The man walked into the store of the R. J. Riles Co. shortly after 8 o'clock yesterday morning and asked to look at some diamond rings. He was waited upon by A. G. Davis, a clerk, who, carefully watching him, noticed that he constantly used but one hand in looking over the rings, while the other he laid carelessly on the counter. As the clerk missed a ring from the tray, which the man had been looking at, he suspected that the customer concealed it in the idle hand. He grabbed his hand and discovered the trick. The ring which the stranger was trying to get away with was valued at \$300.

Davis held the man in the store while he sent for a policeman, and Allport was taken to police headquarters. When searched \$10 in money, another diamond ring, a gold locket, a gold fob, chain, watch, stick-pin and cuff buttons were found on his person, and part of these articles were later identified by representatives of Hess & Slager and the Greenleaf & Crosby Co. as having been stolen from their stores.

### Bids Solicited and Received and Contracts Awarded by Government Departments.

WASHINGTON, D. C., Oct. 21.—The purchasing agent of the Isthmian Canal Commission is inviting proposals, until Nov. 9, for six non-striking wall clocks, 12-inch face, regulator pattern, eight-day.

WASHINGTON, D. C., Oct. 24.—The Life Saving Service has made the following awards for supplies for delivery at Grand Haven, Mich., during the present fiscal year: Eight-day marine clocks, Chelsea Clock Co., \$13.50 each; liquid boat compasses, Edwin S. Lorsch, \$17.40 each; binocular glasses, 26-inch field, no award.

For delivery at New York: Thirty-four life buoy barometers, Edwin S. Lorsch, \$5.80 each; 42 leather cases for Imhauser's time detectors, Nanz Clock Co., \$1.15 each; ditto, Hahn's time detectors, Nanz Clock Co., \$1.20 each; eight-day marine clocks, Chelsea Clock Co., \$13.25 each; 10 liquid boat compasses, Edwin S. Lorsch, \$17.14 each; 10 binocular glasses, 26-inch field, Edwin S. Lorsch, \$7.80 each; 20 telescopes, day and night adjustment, Edwin S. Lorsch, \$9.57 each; Newman's improved time detectors, Newman Clock Co., \$43 each; Hahn's time detectors, Nanz Clock Co., \$25 each.

WASHINGTON, D. C., Oct. 24.—The Navy Department has received the following bids for installing complete one watchman's

clock system at Fort Mifflin: E. Howard Clock Co., \$1,698; H. J. Kunzig, Philadelphia, \$1,600; McKay Engineering Co., Baltimore, \$1,177; American Waltham Watch Co., \$1,198.

### Death of Alfred Bailat.

Alfred Bailat, head of the firm of Alfred Bailat & Son, repairers of jewelry, 109 Tillary St., Brooklyn, died at his home, 199 Bridge St., Brooklyn, Wednesday of last week. Mr. Bailat was born in Stuttgart, Germany, June 27, 1846, and was of Swiss parentage. He was a member of the United French Society and the Forerunners of America.

For a long time Mr. Bailat did repairing

FOSTER GEORGE, INDICTED AT CHICAGO ON CHARGE OF STEALING \$25,000 WORTH OF DIAMONDS FROM S. C. POWELL, NEW YORK.

for the jewelry trade at 36 Maiden Lane, N. Y., while his son Alfred Bailat, Jr., managed the business on Tillary St., Brooklyn. The deceased, who is survived by a widow and one son, died at the age of 62.

The funeral services were held Sunday afternoon at 2 o'clock and the interment was in Evergreen cemetery.

### The Diamond Markets.

AMSTERDAM, Oct. 13.—Although the after effects of the recent crisis are still making themselves felt in many directions, some trades have recovered to a large extent from the depression. The most striking example of this recovery is given by the diamond industry. Less than half a year ago 5,000 out of the 8,000 diamond workers in Amsterdam were out of employment. By Sept. 15 this number had decreased to 1,100 and last week a further drop to 850 occurred, reducing the number of unemployed for the first time in the current year to below 1,000.

Part of these were only idle temporarily, so that the assistance which is being given by the union to its unemployed members had only to be paid to about 600 men.

LONDON, Oct. 17.—While England is suffering from severe trade depression, the diamond trade reports brisk business.

Joseph Snyder recently purchased the business of J. D. Huggins, Youngstown, O.

### Negro Charged With Stealing \$25,000 Worth of Diamonds from S. C. Powell Indicted at Chicago.

CHICAGO, Oct. 24.—Foster George, alias George Foster, alias "Jim" Smith, alias "Sam" Williams, alias Ford, arrested in St. Louis, Oct. 12, and brought here, charged with robbing S. C. Powell of \$25,000 worth of diamonds, was indicted here last Monday. The negro had previously signified his intention of pleading guilty, but evidently changed his mind on the advice of his lawyer and pleaded "not guilty." This halted the trial and a continuance was granted him.

About 100 carats of m $\acute{e}$ lée and quarters were either sold or pawned by George. His

method was to have the diamonds mounted with pieces of jewelry and then pawn them. He is known to have made extensive trips to get rid of the stolen diamonds, on one trip going as far as Winnipeg.

As told in last week's issue of THE CIRCULAR-WEEKLY, George was arrested in St. Louis by Pinkerton detectives after he had tried to dispose of a number of mounted diamonds. The negro took four stones to a retail jewelry store in St. Louis and the retailer took the jewelry to a wholesale house. The Pinkerton detectives were notified and they shadowed the negro until he was arrested. A large quantity of m $\acute{e}$ lée was found hidden away in his shoes and clothing. A small quantity of cheap jewelry was also found in the room where he was arrested. Of the \$25,000 worth of goods missing it is hard to state the value of the amount recovered, but conservative estimate places it at about \$17,000, and it is hoped that more will be recovered later.

An investigation of the history of the negro, who is being held in the case, reveals the fact that he was arrested some time ago in Minnesota and served a term in prison, and that later he was arrested in Chicago for stealing a watch and served time in a workhouse. It was the opinion of the police, at the time that the negro was captured, that he would make a confession, but he refused to make a statement of any kind. The stolen diamonds had been pawned by him in St. Paul, Winnipeg, Kansas City, St. Louis and Chicago.

**Man Arrested at Buffalo, N. Y., May Have Swindled Other Jewelers.**

BUFFALO, N. Y., Oct. 24.—Samuel Salmeson, or Samuelson, who, as told in the last issue of THE CIRCULAR-WEEKLY, was arrested here recently on a charge of grand larceny in the second degree, is being held by the police, his case having been adjourned for a few days in order that they may determine whether there are any other charges against him, or whether he is wanted in any other cities to answer to more serious offenses. He is charged here with having obtained two rings and locket from Simon Cohen, 331 Main St., by misrepresentation.

The Buffalo police learned from THE

SAMUEL SALMESON OR SAMUELSON UNDER ARREST AT BUFFALO, N. Y.

CIRCULAR-WEEKLY that the man had been identified by a jewelry traveling salesman as a swindler who had tried to rob him in Detroit. The local police and the Pinkerton detectives are both working on the man's record at the present time.

The portrait of Samuelson, which was sent by the Buffalo police to THE CIRCULAR-WEEKLY immediately after he was taken, was shown to J. Segal, salesman for Weiner & Garson, 15 Maiden Lane, N. Y., who, as told in THE CIRCULAR-WEEKLY last week, had an experience in Detroit with a man who swindled him for a very small amount and apparently tried to rob him of a quantity of jewelry. The man introduced himself under the name of Ike Kramer, of Columbus, O., and Segal learned from the real Ike Kramer, of that city, later, that the swindler had been operating for some time under his name. After examining the portrait of Samuelson, Mr. Segal said he was undoubtedly the man whom he had met in Detroit, and these facts were telegraphed to the Buffalo police.

The Jewelers' Protective Union also took up the matter and instructed the Pinkerton detectives to look into the case against Samuelson, look up his record and see what charges there might be against him.

Members of the trade who have had any experience with the man are requested to

notify THE CIRCULAR-WEEKLY immediately, or send word direct to the Chief of Police, Buffalo, N. Y.

**Watchmaker Commits Suicide at East Radford, Va., While Suffering from Hallucinations.**

EAST RADFORD, Vt., Oct. 21.—T. Donaldson, an expert watchmaker, committed suicide Saturday afternoon in the jewelry store of L. W. Clark, by whom he had been employed for about three years, during a fit of temporary insanity brought on by an over-dose of liquor and drugs. The man was seized with the delusion that he was about to be lynched, took poison after opening a vein in his arm. The body was

discovered by Mr. Clark about 6 p. m., Saturday, on his return from Roanoke.

Mr. Donaldson, who was a Scotchman by birth, was 36 years old, and had lived in this country for 15 years. The funeral services were held Monday at the cemetery in East Radford and were conducted by Rev. Mr. Mayers.

**P. J. Koke, Grand Rapids, Mich., Adjudged a Bankrupt in Proceedings Brought by Creditors.**

GRAND RAPIDS, Mich., Oct. 21.—Peter J. Koke, jeweler, was adjudged bankrupt in the United States District Court yesterday, and the case was referred to Kirk E. Wicks, referee in bankruptcy. Henry Schull has been appointed receiver, with power to continue the business pending the appointment of a trustee.

Mr. Koke, who was in business at 145 Monroe St., has been in business here since 1898, and is well known. Before starting for himself he was employed by D. L. Thompson, of this town, and had previously worked in Chicago.

The present proceedings were begun by creditors who filed an involuntary petition in bankruptcy, Oct. 9.

The Gibbs & Mims Jewelry Co., Inc., Ensley, Ala., will hereafter be known as the Gibbs Jewelry Co.

**Look Out for This Check Swindler Who Has Been Operating in Louisville, Ky.**

George Wolf & Co., 528 Fourth Ave., Louisville, Ky., report that a man giving his name as James B. Fowler called, last week, at their establishment and purchased a diamond weighing  $\frac{3}{8} + \frac{1}{8}$  in a Tiffany mounting, giving in payment a bogus check for \$164.85. The jewelers paid him \$37.35, the difference between the price of the stone and the check. The check was on the Bank of Moore, Carthage, N. C., and was signed O. A. Marshall, assistant cashier. The jewelry firm telegraphed the bank and learned that no such check was out, and to have the maker arrested.

The same man is wanted in Louisville, Ky., by a wholesale whiskey house, where he bought a bill of goods and tendered a worthless check drawn on the City National Bank, Knoxville, Ky. The goods were to be shipped Nov. 1. He also disposed of a check on the Commercial Bank & Trust Co., Louisville, signed by Westinghouse Moh Co., and endorsed by R. C. Irwin.

Geo. Wolf & Co. report that the man was entertained in the city and that he called at their establishment about closing time. They say that they could identify him.

The Louisville police have sent out the following description of the man: About 28 years old, 5 feet 9 inches tall, weighs 175 pounds, light and slightly kinky hair, smooth face, rather florid complexion and pleasant looking. He has an effeminate voice, and bluish grey eyes. He wore a small black alpine hat.

The description tallies with that published in THE JEWELERS' CIRCULAR Oct. 14, of a man who had been working in Pittsburgh, Pa.

A liberal reward is offered for the capture of the man.

**Games Rolled Last Week by the Jewelers' Bowling League of New York.**

The H. A. Meyers bowling team has forged to the lead in the Jewelers' bowling league fight during the past week, and are now leading the race with a percentage of .916. The following were the scores of the teams in the games rolled last week:

**New York Jeweler Shot by Daring Thief**

**Maurice Tannenholz Receives Two Bullets While Chasing Robber Who Had Run Out Of His Store With Jewelry.—Thief Jumps in Automobile Taxicab and Escapes.—Over 200 New York Detectives Searching for the Desperado, Who Is Believed to Have Been a Former Strikebreaker.**

One of the most daring and startling robberies that has ever occurred in New York City and which was followed by an attempt to kill the jeweler who was the victim, was enacted last Thursday evening about 6.30 p. m. at the diamond and silverware store of H. Tannenholz, conducted by Maurice Tannenholz and his mother, Mrs. Hannah Tannenholz, at 755 Lexington Ave., between 59th and 60th Sts., Manhattan. A young man, who entered the store, after examining some diamond jew-

elry that he would return shortly, left the store, and people who were standing in the vicinity at that hour say that they noticed a taxicab standing about the corner of E. 60th St. and Lexington Ave., and that the man went to this taxicab and talked with two men who were in it. The people in the jewelry store were suspicious of their visitor, and Mr. Goldstein told Mrs. Tannenholz to put a quantity of the stock in the safe. At about this time Maurice Tannenholz returned to the store, but before he could be informed of the suspicion of the others the stranger returned and went directly to him. The visitor did not seem decided in his own mind about buying diamonds, saying that he thought perhaps his money might be invested in real estate. The diamond merchant told him that that was a matter which he would have to settle himself, but that he would show him some diamonds. The stranger decided that the diamonds were the better investment.

Jeweler Tannenholz then took from a tray of diamonds a pair of earrings and a diamond ring which his customer examined. Mrs. Tannenholz did not like the appearance of the stranger and passed around the counter toward the door and whispered to the watchmaker that the man was a thief and for him to get to the door. As the watchmaker turned around the stranger seized the earrings and dashed for the door. Mrs. Tannenholz, seeing the man trying to make his escape, threw an iron gate before the door, and, as the stranger reached her, the plucky woman seized him and was thrown to the floor as the gate was dashed open. In the palm of her hand the latter discovered a sharp cut, which, it is thought, came from a knife in the stranger's hand.

The robber dashed toward the 60th St. corner, with the jeweler in close pursuit, followed by the watchmaker. As the fugitive rushed up Lexington Ave. the taxicab moved along toward him, but as he reached it he was grabbed by the jeweler, who threw both arms about his waist. The stranger reached to his hip pocket, drew a pistol and fired three shots. The jeweler fell to the sidewalk and the taxicab raced toward Second Ave.

The watchmaker ran after the taxicab, into which the stranger had jumped. At that moment a large red touring car, in which was only one man, appeared at the street near the running watchmaker. He shouted to the chauffeur of the car to chase the cab and the red touring car started in pursuit. The fleeing taxicab was blocked for a moment by a car and it looked as if the touring car would overtake the taxicab. People in the crowd said afterward that the men in the body of the taxicab drew revolvers and commanded the driver of the touring car to go back, with threats of shooting him. As soon as the surface car got out of the way the taxicab shot across the avenue at full speed toward

Second Ave. and then turned north, where all trace of it was lost.

After Mr. Tannenholz fell his mother and step-brother gave up trying to overtake the thief and helped him into the drug store at 750 Lexington Ave., where physicians began working over him. A call was sent to the Presbyterian Hospital for an ambulance and the Police Department were notified. At the hospital it was found that two bullets had entered the left side of the jeweler's abdomen. One of the bullets was abstracted, but the other the physicians have been unable to remove as yet. It is lodged in the man's kidney.

Josiah Dolowitch, the watchmaker, when seen by a CIRCULAR-WEEKLY reporter at the store on Friday morning, told the story of the robbery as follows: "The man came in the store about 6.30 and inquired

MAURICE TANNENHOLZ, JEWELER SHOT BY TAXICAB ROBBER.

ely shown him, grabbed two earrings, each valued at \$450, and made his escape in a taxicab. Not only were the diamonds stolen, but Jeweler Tannenholz was shot and badly wounded in attempting to stop the thief.

At the time the robbery occurred Mrs. Tannenholz, a woman of 60 years, and her son, by a former marriage, Jonas R. Goldstein, were in the store together with the watchmaker, Josiah A. L. Dolowitch, and one woman customer. The stranger introduced himself with the remark that he was a friend of Constant A. Andrews, president of the United States Savings Bank, and he had some money which he wished to invest in diamonds. He inquired for Maurice Tannenholz, and then produced a letter of introduction written on the stationery of the Hotel Cadillac. It read:

Oct. 20.  
Maurice Tannenholz—Dear Sir: Permit me to introduce to you Mr. George H. Leopold, a valued depositor of the United States Savings Bank, and an old personal friend of mine. Mr. Leopold has \$2,000 he intends to invest in diamonds. Trusting that you may be able to transact business to your mutual advantage, I remain, yours truly,

CONSTANT A. ANDREWS, President.

Mr. Goldstein, who waited on the man, told him that Mr. Tannenholz, the manager of the store, was out. The man, say-

MRS. HANNAH TANNENHOLZ, MOTHER OF WOUNDED JEWELER, WHO WAS ALSO INJURED AT TIME OF THE ROBBERY.

for Mr. Tannenholz, saying that he would like to buy some diamonds, as he wished to invest his money in that way or in real estate. I looked at him, but did not like his appearance. At the time that he was in here a lady was in the store and Mr. Goldstein was waiting on her. The man inquired for Maurice Tannenholz and then left the store. When he returned the woman customer had been waited upon and Mr. Tannenholz was then in the store and turned his attention to the new customer. He took from the case two earrings and the man took them in his hands to examine them and suddenly turned and rushed to the door.

"Mrs. Tannenholz cried out as the man rushed by her and we all gave chase. The man ran to a taxicab which was waiting, but was grasped by Mr. Tannenholz, and in order to get away shot him. I ran after the taxicab and directed another automobile to give chase, but the fugitive escaped."

The man who visited the store and shot the jeweler is described as being between 30 and 35 years of age, with a black mustache, sprinkled with gray, ashy-yellow complexion, about five feet 10 inches in height; his hair is black, sprinkled with gray, and he has light-blue eyes. His car-

3 MAIDEN LANE, NEW YORK

riage was erect, and he was dressed in a dark suit and black derby, from which the initials in the leather band had been cut. He wore a checked blue shirt, and when he talked showed a gold tooth in his upper jaw. He acted as if he was familiar with the diamond business and had been accustomed to associate in good society.

The automobile which chased the taxicab bore the letters "B. N. Y.," indicating that it belonged to the department of bridges or buildings, but the number of the taxicab was not obtained because of the smoke coming from the machine. There was no policeman in sight at the time of the robbery and for 20 minutes after the shooting. At the drug store messages were sent in every direction and finally a policeman was found near Second Ave.

When the thief rushed out of the store he left the forged letter behind him, and in his struggle with Tannenholz he dropped his hat, and these are the only tangible clues that the police have.

Detectives called upon Constant Andrews, president of the United States Savings Bank, 606 Madison Ave. He declared that the letter was a rank forgery. The stranger gave the name of Leopold at the jewelry store. Mr. Andrews said that he had never heard the name and did not believe that the man had ever had any dealings with the bank. At the Cadillac Hotel the police were unable to obtain any clue.

Fully 200 detectives from headquarters are working on the case. They have visited the different taxicab stands in an attempt to locate the cab used by the stranger. A detective inspector, who is working on the case, when seen by a CIRCULAR-WEEKLY reporter, refused to give out any statement as to whatever he might say would be purely surmise, so far, and the thing to be done was to get busy on the case. Daily papers stated that the police are inclined to think that the work was that of western criminals who had determined to do profitable crimes before leaving for their western homes.

A clue to the possible identity of the thief was picked up while detectives were trying to run down the taxicab. They learned that among the strike-breakers brought on here from the west by Waddell & Mahon, a firm of private detectives, was a man whose description exactly fits that of the man who entered the jewelry store and shot Tannenholz. This man was discharged by Waddell & Mahon two or three days after he went to work.

Two women who have visited the store often recently are thought by the police to have possibly been implicated in the robbery. The police are looking for them.

Mr. Tannenholz is reported to be getting along better than was at first expected, and hopes are now entertained of his recovery. He will not be operated on for the recovery of the bullet imbedded in his kidney until he becomes stronger.

Extensive improvements have just been completed in the store of W. L. Jones, Martinsburg, W. Va.

A large and attractive clock has been donated by J. F. Carr, Portsmouth, O., to the new church of the Holy Redeemer at that place

Among the traveling representatives in Milwaukee, Wis., last week, were: P. H. Waterman, E. Howard Watch Co.; M. Hofer, M. A. Mead & Co.

R. G. How, Murrell, Bennett & Co., London, Eng.; A. Peterson, J. Abeles, Montreal, and A. W. Bishop, Adolph Frankau & Co., Ltd., Montreal, were in Toronto, Ont., last week.

Traveling representatives in Los Angeles, Cal., recently, included: Messrs. Cantor and King, Nord man Bros.; Mr. Lucas, Fishel, Nessler & Co.; John Jepson, Riker Bros.; R. F. Allen, Morgan & Allen; George F. Miller, Gorham Co.; J. Percy Wrayton, Durand & Co.

Among the travelers in Buffalo, N. Y., recently, were: George Bédiant, Rogers Silver Plate Co.; Mr. Landow, Homan Mfg. Co.; George Kenrick, Reed & Barton; F. C. Williams, Jennings Bros. Mfg. Co.; H. Ollendorff, I. Ollendorff Co.; Hofman, Eichberg & Co.; Mr. Baker, Jacobs Bros.; Mr. Brigham, Cheever, Tweedy & Co.; Mr. Allsopp, Allsopp Bros.; Henry Delerson, H. E. Oppenheimer & Co.; Mr. Hart, Albert Lorsch & Co.; Mr. Millholland, Berrelli & Vitelli; Mr. Kieferhaffer, Julius Mamluck & Son.

Among the traveling representatives visiting the trade in Lancaster, Pa., recently, were: John Young, Simpson, Hall, Miller & Co.; William C. Montanye, American-Swiss Watch Co.; H. C. Woods, Dominick & Haff; Mr. Burns, William L. Gilbert Clock Co.; Robert Champett, C. Ray Randall & Co.; T. A. Brennan, L. Witsenhausen Co.; F. C. D. Bonnor, F. & F. Felger; Willis B. Ehlers, Ehlers & Co.; John T. Vansant, Moore & Son; W. T. Francis, Waterbury Clock Co.; Leo Pohorick, Spiro & Hirsch.

Traveling salesmen visiting Boston, Mass., during the week, included: Ed. Colby, Towle Mfg. Co.; Louis Nordlinger, L. & M. Kahn & Co.; "Jack" Townsend, D. C. Townsend & Co.; Mr. Sternberger, Stern Bros. & Co.; Henry C. Ward, Durand & Co.; Mr. Simonson, Ludwig Nissen & Co.; G. A. Hinckle; Frank I. Locklin, Battin & Co.; Messrs. Graff and Washbourne, Graff, Washbourne & Dunn; De Forrest Ely, Barbour Silver Co.; T. G. Frothingham (who has just returned from a trip west); George H. Sylvia, Pairpoint Corporation; Walter Clark, W. G. Clark & Co.; Louis Barrows, H. F. Barrows Co.; H. C. Barnum, Shafer & Douglas.

The following traveling representatives were in St. Louis, Mo., during the past week: W. A. Watts, T. G. Hawkes & Co.; C. N. Perley, Perley & Bros.; M. G. Cook, Alvin Mfg. Co.; Mr. Bliss, Wordley, Allsopp & Bliss Co.; A. J. Sherrard, Enos Richardson & Co.; I. J. Rosenthal, Rothschild Bros. & Co.; Otto Linauer, Oppenheimer Bros. & Veith; Mr. Curran, A. J. Hedges & Co.; H. N. Van Bergen, Snow & Westcott Co.; F. C. Allen, Edmond E. Robert; A. J. Parker, Osmun-Parker Mfg. Co.; Mr. Thomas, H. P. Sinclair & Co.

Traveling representatives who called on the trade in Omaha, Nebr., during the past week, included: G. S. Melville, D. Wilcox & Co.; John A. Lossau, Martin-Copeland Co.; Jack Levin, Martin, Low & Taussig; G. S. Fulrath, Sanford & Bennett; Alvin A. Cahn, Aikin-Lambert Co.; E. B. Frank, Pairpoint Corporation; Henry Freund, Henry Freund & Bro.; J. E. Austin, Handel Co.; Eugene Denike, Abel Bros. & Co.; Leo Cahn, G. A. Veck; F. R. Horton, Carter, Howe & Co.; George W. Birnbaum, Julius Wodiska; Chas. E. Lachner, Hayes Bros. Co.; A. F. Lowenthal, Albert F. Lowenthal; Mr. Torrence, Lays-Christie Co.; Mr. Lewkowitz, Niagara Cut Glass Co.; H. Stoyer, Bates & Bacon.

Among the traveling representatives who visited the trade at Pittsburg, Pa., last week, were the following: Mr. Tucker, Wm. B. Durgin Co.; George A. Jochum, C. Cornelhsen; Charles T. Dougherty, Osmer-Dougherty Co.; M. F. Loomis, C. Sydney Smith & Co.; J. T. Griffith, Jr., Carter, Howe & Co.; Mr. Singleton, Adams & Singleton; John S. Cunningham, E. L. Spencer Co.; Fred H. " 24.....	23 11-16d.	53¾¢
" 26.....	23 11-16d.	53¾¢

**Providence Jeweler Convicted of Receiving Stolen Goods Appeals and Asks That Case be Argued in Another County.**

PROVIDENCE, Oct. 26.—John Nelson, the N. Main St. jeweler, was heard Saturday in the Superior Court through his counsel on a motion to take the case, in which he was adjudged guilty in the Sixth District Court of receiving stolen goods, out of Providence county for trial before a jury.

Nelson was tried before Judge Christopher M. Lee, of the Sixth District Court, some time ago, on the charge of receiving from a man who came from Attleboro, gold and silver scraps that had been stolen from a manufacturing jewelry concern of that place. This man testified that the stuff was stolen by him and that some of it was delivered to Nelson by handing him an overcoat with the stolen material in the pockets. The Attleboro man admitted the theft of the scrap and was fined.

After Judge Lee had imposed sentence to the Providence County Jail, the case was taken to the Superior Court on an appeal. Nelson claims that conditions are such that he cannot get justice in Providence county and he accordingly petitions for a change of venue. This case is one in which the Jewelers' Protective Association is very much interested, as it is claimed that Nelson has been before the courts on several similar cases, but was never convicted before.

THE STAPLE quality of Black Jewelry is well known. Every woman in mourning wears the black brooch and long black chain. They are equally in favor with the elderly. A superior line of such Black Jewelry is here introduced. Displays include the popular French Jet, as well as examples of Whitby Jet. The designs are exceptionally effective, many of them being novel for jewelry of this class. At the same time they retain the essential elements of dignity and taste. Jet Brooch designs include: HORSESHOES, BUTTERFLIES, PANSIES, FLEUR-DE-LIS, BAR EFFECTS. They retail at from \$1.00 to \$5.00. A profitable staple needs no argument.

## REIGNING PARIS FASHIONS.

LATEST FADS IN JEWELRY, BAGS AND DECORATIONS  
SEEN IN FRANCE'S CAPITAL.

PARIS, Oct. 19.—A good-luck necklace consists of small four-leaved clover connected by looped chains and with for pendant a very large pink clover blossom set in the midst of dark green enameled leaves.

Delicacy is the feature of neck ornaments when the dog collar is not becoming. These are slender gold or silver chains, almost invisible from which dangle a single diamond of the purest water, invisibly set and looking as if a drop of dew had fallen and been caught.

There is a renaissance in household silver, the ponderous Georgian and Jacobean styles being revived. They correspond with the heavy furnishing of that period, but seem rather out of place when the furnishing is of a lighter fashion. However, dinner services are quaint and interesting. They are reproduced and modernized by the silversmith, and are not out of place on the table of to-day. Queen Anne silver is also liked, the 17th century plate being of convex shape with accentuated handles. The outlines are graceful, if not extremely ornate, the modernized reproductions preserving the characteristics of the era.

New salt cellars and toothpick receptacles are made in the slender graceful shape of a Venetian gondola, and are of frosted or bright silver, gold lined; the salt spoons are shaped like long-handled oars.

A magnificent punch bowl, a replica of one used by the Hapsburg kings, in mediaeval banquet halls, is an exquisite piece of workmanship. It is of stupendous size, and on the bowl in high relief is depicted a battle scene. The lid is ornamented with more peaceful emblems, flowers and fruit and capped with an upright martial figure—a mailed knight holding aloft a battle flag. The whole is set upon a salver sculptured in the same fashion.

## TABLE DECORATIONS.

At those seasons of the year when natural flowers are rare and costly, they may be replaced by the most delicate reproductions in tinted china. An oblong bowl of the clearest crystal is set upon a long mirror, and in it appear to grow these indestructible porcelain blossoms, roses, chrysanthemums, tulips, etc., in exquisite tints. This central ornament is enclosed by tall vases also of crystal, alternating with low glass bowls, and in these a single natural flower is placed. They are linked together with crystal or glass chains. A pretty idea is to substitute two-inch satin ribbon for the chains, which are passed about each slender vase and tied in a big bow, the ribbon connecting the vases being of the dominant color of the floral decorations. Loops of porcelain or ribbon made flowers may also be substituted. For a permanent table decoration there are square porcelain tubs imitating the green wooden boxes of the garden and, in which are ferns or artificial blossoms.

Large baskets of white china in plaited design are pretty when used as flower receptacles. To vary the monotony some hostesses keep on hand quaint little Dresden figures in fancy costume shepherdesses and their swains, Cupids with puffed-out cheeks or tiny boys and girls in Kate Greenaway

costumes, which are placed wherever they are most effective.

## FANCY AUTOMOBILE AND HAND BAGS.

This season fashion decrees that in the ornamental high-priced bags the old-time flat *aumoniere* or alms bag shape of the Middle Ages, should be worn. To be sure, they can contain but little, but are all sufficient for carrying a small coin purse, kerchief and the omnipresent flat powder puff. By the way, the Parisian is never without the latter article, and does not hesitate to extract it from her purse and use it in a restaurant or even on the street. Hence the success of the more voluminous bags containing the puff, a tiny silver powder box and a smaller one for rouge with also the useful mirror which may be propped up against the side and top of the bag and in which one may view one's face by sections.

The velvet, moire and satin alms bag comes within the domain of the jeweler, but there is nothing very novel in either shape or decoration. With a calling costume a lady carries one of these flat bags, perhaps of royal purple velvet richly worked in gold or silver bullion in a 15th century design, with often a coronet or crest surmounting the conventional pattern. There are besides bags of white or pearl gray satin made in the form of an old-time purse and secured by rings of faceted steel or gem-incrusted gilt. The bags, elaborately beaded in a floral pattern and hand made, are never out of fashion, and are always expensive accessories of the toilet.

Opera bags for containing the lorgnette are fashioned from net, very durable, with fish-scale paillettes overlapping each other so closely that they are a shimmer of brilliant electric blue, of purple, of orange, of green, very effective by artificial light. Long fan bags for balls are of ivory-tinted moire wrought in a rococo design in ribbon work and chenille. Sometimes they are accompanied by the handbag for containing the *mouchoir*, which corresponds in decoration.

There are stiff purses of gold, silver or gun metal elaborately decorated and often incrusted with semi-precious stones. English women are addicted to very ornate cigarette cases, for they are enthusiastic devotees of the weed. They differ but little in shape from the metal purse, and hold a dozen cigarettes and a tiny match box, with often an amber mouthpiece. Chain purses do not reveal great variety, but are extremely elegant, the gold ones showing clasps in which are embedded rubies, emeralds or diamond. One had on its entire surface lattices in platinum, while at each of the interstices was a flashing gem. Zig-zags, plaids and stripes in vari-colored gold and platinum vary the monotony of these expensive bags. Tiny ones are heart shape, the chain work in the shape of a coil, the clasp jewel rimmed, while a scintillant stone is set in the center.

In leather there is a fancy for embossed styles, those in checkerboards or in radiations being the favorites. The sun-ray bags often converge in the center and have for their objective point a tiny gold-faced stem-winder watch. Others are shaped like a flattened flower, with ribbon handles passed through slits, the purse being concealed inside. Antelope, suede, morocco and Rennes

are the most liked leathers. Pretty little finger purses are of white satin or kid, painted with a genre scene or landscape. Soft golden brown suede or deerskin is made in raised stripes, imitating the texture of corduroy.

The Vienna manufacturers often send out quaint conceits in costly hand bags, one in the semblance of a great brown night moth, the spread wings forming the shape, and which are veined and decorated, the centers being of oblong cabochons of colored mother-of-pearl. The reverse side is of velvet skin in a moire antique pattern. Japanese frogskin is a new material and is of a soft mottled gray. Other bags are of glazed kid perforated in disks, and showing another color beneath in simulation of polka dots or lozenges.

Alligator bags have no longer a shiny surface, but are dull finished.

A gorgeous bag is in the shape of an open peacock's tail. It is of green leather studded with blue and green stones in the hues of the feathers. An immense scarab is another design, expressed in the inexplicable blue-green of the sacred Egyptian insect. Small flat purses are made in all of the latest tints to match costumes, and are of grained morocco in pale blue, pink, lavender, etc, their only decoration being an ornate monogram. Most of the new leather *portemonnaies* are of rather square shape, not too large, but so well arranged that a number of small things necessary to one's comfort may be contained in a restricted space. Not much metal is visible, only perhaps a narrow gold or silver binding or a twisted thread of gold wire.

The accentuated *directoire* fashions have given a fresh impetus to the bag manufacturer, for a pocket is an utter impossibility with the ultra clinging costumes of to-day. In old prints we see the ladies of the *Directoire* always carrying a bag more or less ornate, and to-day they are scarcely less the invariable accompaniment of the toilette, the useful leather article for shopping and the more elegant velvet or satin *aumoniere* for more ceremonious occasions.

A novel idea in the decoration of shoes is a bandau of diamonds to be fastened on the bottom of the high Louis XV. heel.

Very ornate is what the owner called a dinner ring, but which covers the entire back of the hand. It was in the form of a spider web, each golden thread set with tiny diamonds, while in the center was a spider in black enamel with ruby eyes and head of incrusted diamonds; a fly of gray metal with emerald head was entangled in the glittering web. This was attached by slender chains to a narrow bracelet of precious stones, while a ring on the middle finger held it in place lower down. It was a unique and striking ornament, but in somewhat barbaric taste.

Of propitious omen is a tiny watch set in a golden horseshoe studded with diamond nails and worn in guise of a locket about the neck.

Very showy is a bird of paradise expressed in diamonds and colored gems, the wide-open tail showing all the colors of the rainbow.

COUNTESS DE MONTAIGU.

G. H. Martin, formerly of Malta, Ill., has moved to Genoa, Ill.

# GORHAM GOLDWARE

## HOLIDAY GIFTS OF SOLID GOLD

¶ The increasing demand on the part of people of taste and refinement for wares of solid gold induces the Gorham Company to direct the attention of the Jewelry Trade to the comprehensive nature of the Company's stock of such articles.

¶ It includes loving cups of various sizes, Toilet and Manicure Sets complete in every detail, Cologne Bottles, Pocket Knives and Scissors, Tea, Coffee and Birthday Spoons and Christening Sets, Photograph Frames, Pincushions, Puff and Bonbon Boxes, Flasks, Cigarette Cases, Match Boxes and Card Cases.

¶ Fashioned by the most expert of goldsmiths, distinguished by the individuality of its design, Gorham Goldware has attained the same high reputation which for three-quarters of a century has characterized Gorham Silverware.

FROM complaints often made by subscribers of THE CIRCULAR-WEEKLY it is evident that there is a class of railroad men, termed by some "rounders," who have been skipping from place to place, and, while actually working as railroad employees, apparently take the positions for the purpose of swindling jewelers. The men will arrive in a town, go to work on a railroad and immediately buy a good railroad watch from a local jeweler on instalments. They stay until the first pay day, then skip out (generally getting out of the State), pawn the watch and try the same game at another town. One man in particular, who is said to hail from Pittsburg, seems to have been very successful in this game, and when last heard of had skipped from Owosso, Mich., where he had swindled a local jeweler. The man sometimes gives the name of Nelson, and jewelers are cautioned to be especially careful of this man in particular. Should they receive a visit from him they are requested to wire, at once, to the Chief of Police, of Owosso, Mich.

THE JEWELERS' CIRCULAR-WEEKLY reaches the largest number of possible buyers at the least cost. The most profitable medium to use for marketing your goods.

and having found its value, there is little doubt that they will continue to do so hereafter, in good times and bad.

It is for this reason that throughout the past year THE CIRCULAR-WEEKLY has continued to gain in circulation at a rate larger than ever before, and what is more, has grown stronger with its readers and in closer touch with them than at any time since it was first issued nearly 40 years ago. This has been brought home to us not only by the number of new subscribers who have been added to our list, but by statements of subscribers who have called at the office, letters of commendation and inquiries that have been sent to us, and by the reports of our traveling men and correspondents throughout the country. We learn also that other large and strong publications in other mercantile fields have had the same experience, while weaker publications and those that have not been giving service of value to their subscribers have suffered during the same period.

A point to be born in mind and one we can never lose sight of is that a large part of the strength of the paper comes from the co-operation of the subscribers, as much of the information that we have been able to put before our readers, whether of a technical or news nature, has often come directly from our readers or has been the result of inquiries or suggestions made by subscribers. It is for this reason that we urge every one of the jewelers who compose the family of CIRCULAR-WEEKLY readers not only to read the paper carefully every week, but to consider himself one part of a great organization working for the common good of the craft in the dissemination of instructive and helpful information, THE CIRCULAR-WEEKLY being the means to this end.

Proper Use of the **T**HAT is nothing that comes to the merchant, particularly the man in the small country districts, that is, or at least can be, of greater aid to him than his trade paper, when the latter properly fulfills its mission. This is especially true in the jewelry trade, if we may judge from the letters that we are constantly receiving from subscribers, as the progressive merchants have for years been using THE CIRCULAR-WEEKLY as an auxiliary in both the buying and selling ends of their business, as well as a medium for general information and protection.

However (and we say it to regret), for a long time there were a class of subscribers who never got the full value of the service which THE CIRCULAR-WEEKLY gave to them, simply because, as they expressed it, "they were too busy to read" and simply looked at certain features in which they had direct interest or which appealed to them for the moment. Happily, this class of readers has been growing fewer and fewer until the number is now so small that it is hardly a factor to be considered, and with the diminishing of this class, the strength of THE CIRCULAR-WEEKLY and its usefulness to the trade has continually increased.

When times are good and business is rushing some of the jewelers were able to get along without careful consideration of the information which was supplied to them weekly, but during the late business depression, when many of these merchants saw that they must use every effort to get what little business was to be had, they fell back upon the aid which came to them regularly then, but which had been so often ignored previously. Many (to quote the words of one of them) were surprised to find how useful their trade journal could prove, and how much valuable information it contained, both as to the mercantile and technical side of the business. True, many of these men had for the first time, this year, the leisure to permit a proper perusal of the 100 to 140 pages which come to them 52 times a year, but once having done so

**To Improve Trade-Mark Law.** **F**IRMS in the jewelry and kindred lines will be interested to learn that a strong effort will be made at the coming session of Congress to secure the enactment of the Smoot bill, amending the Trade-Mark Act of 1905. This bill was passed by the Senate last session and favorably reported by the House Committee on Patents, too late, however, to secure its passage by the House.

This bill modifies the existing law in two particulars. First, it obviates the necessity on the part of the applicant for registration either to ascertain or to allege that no one has the right to use the proposed mark in a foreign country, and, second, it permits an applicant to present a written description of his trade-mark, as well as a facsimile

thereof, if it is thought to be advisable.

Commenting on these proposed amendments a well-known authority on the trademark question recently said:

"Concerning the first amendment, inasmuch as use in this country is controlling in determining who was the first to adopt and use a trade-mark, it does not appear to be necessary for an applicant for registration to allege in the declaration that no other person has the right to use the mark, inasmuch as the foreign use of a mark does not inhibit registration in this country. It appears to be sufficient for the applicant merely to allege that no other person, firm, corporation or association has the right to use the trade-mark in the United States.

"As to the second point, it should be understood that under the present act there can be no description of the mark unless color forms a material feature thereof. It is found in many cases that the drawing does not convey an adequate understanding of the trade-mark itself, and it is therefore desirable that some brief description be permitted. Applicants often desire to present a description, inasmuch as their drawings are always restricted to the showing of the mark as it appears on the goods themselves or the packages containing the goods. They are of the opinion that the description of the mark will give them a broader protection than a mere showing of the mark. This may be particularly true in cases where the mark sought to be registered is a word-mark. In such cases there is a possibility of the mark being restricted to the particular form shown, where as the applicant seeks protection for the word in any form in which it may be used, and if he be permitted to describe the mark as consisting of this word broadly this restriction could not possibly occur. It is believed that if a description of the mark is permitted in certain cases the public will be given greater information as to the mark registered and possibly applicants may acquire broader protection."

Azulite is the name given to a new gem material found in the Sierra Madre Mountains in Mexico. It is between 6. and 7. in hardness and is of a beautiful sky-blue color, interlined with streakings of pinkish-white. It comes in narrow seams between massive fossilized limestone and diorite, being found in kidneys or enclosed in a matrix of other vein matter, varying in size from a pea to a small-sized apple. Some has been found on the surface, where evidently it has lain exposed to the elements for perhaps centuries, and the color is fine as that which is mined below the earth's surface. The territory where this gem is found is probably the most inaccessible on the American continent, being in the midst of the strongholds of the Yaqui Indians, the only tribe of American Indians that has never been conquered by the white races, and against whom constant warfare is carried on by the Mexican Government. Many beautiful specimens have been found, but as yet the supply seems to be very limited, and the probability is that the deposit is comparatively small. A company has been formed to market this gem material, and William J. Carey, 3 Maiden Lane, is the New York agent.

### Good Gold Jewelry

*It's the  
only kind  
we make*

A RATHER COMMONPLACE DECLARATION, WE'LL AGREE, BUT WE MAKE IT WITH AN INSPIRING REVERENCE FOR THAT MUCH-ABUSED WORD "GOOD." OUR JEWELRY IS GOOD ALL OVER—GOOD THROUGH AND THROUGH. IT ISN'T ALONE SUPERFICIALLY IMPRESSIVE, IT GOES BEYOND THAT, SUPPORTING ITS VISIBLE DIGNITY WITH MATERIAL QUALITIES THAT MAKE IT MOST ENDURING. FURTHERMORE, LIKE EVERYTHING IMPRESSIVE, IT HAS A PERSONALITY—CHARACTERISTICS THAT EASILY HELP IDENTIFY IT AS A KIRBY PRODUCT. ASK TO SEE THE KIRBY LINE BEARING THE ABOVE TRADE-MARK.

## New York Notes.

Peter Sorensen, a designer of jewelry, Denver, Colo., is in town.

A. J. Best, of Best & Co., Buffalo, N. Y., was a recent visitor in this city.

Mr. Sheff, of Sheff Bros., Wheeling, W. Va., bought jewelry in town last week.

Fred M. Cook, of Whiting & Davis, returned last Thursday from a road trip.

Howard Forrest, Lancaster, Pa., was noticed in the Maiden Lane district last week.

B. S. Vunie, jewelry buyer for Ryrie Bros., Ltd., Toronto, Can., was here last week.

Moe Eliassof, of Eliassof Bros. & Co., Albany, N. Y., was a local visitor last Friday.

The Arizona Turquoise Mining Co. has leased the store and basement at 39 W. 34th St.

A large delegation from Maiden Lane were present at the Vanderbilt Cup race Saturday.

George Simmons, with the B. S. Freeman Co., Attleboro Falls, was at the Astor House last week.

Frank H. Cutler, North Attleboro, Mass., visited the local offices, Friday and Saturday of last week.

J. E. Becker, buyer for the J. G. Myers Co., Albany, N. Y., was at 31 Union Sq. for several days last week.

William L. Bushee, with A. A. Bushee & Co., Attleboro, Mass., was a guest at the Astor House last week.

Fred A. Howard, of the Frank M. Whiting Co., North Attleboro, was in the city the greater part of last week.

K. Lucius Taylor, with Riley & French, stopped in this city, last week, en route for the factory at North Attleboro.

Harry Hull, junior member of Barden & Hull, Attleboro, Mass., was at his local offices, 13 Maiden Lane, last week.

Al Sweet, traveler for J. F. Sturdy's Sons Co., Attleboro Falls, Mass., stopped in town for a few hours, last week, while on his way home from a western trip.

William Rothchild and J. E. Hartman, traveling salesmen for C. M. Levy, 90 William St., have returned to this city from trips of three and two months, respectively.

Edward Hume, formerly a western traveler for the Potter & Buffinton Co., Providence, R. I., has accepted a similar position with Scofield, Melcher & Scofield, Plainfield, Mass.

J. B. Curtis, manufacturer of diamond mountings, 82 Nassau St., has taken Peter Schneider into partnership and the firm will hereafter be known as Curtis & Schneider.

Abe M. Forman, who was formerly employed by Jos. Cohn & Bro., 51, Maiden Lane, has again entered the employ of the same firm. He has been in business with Mr. Satzman, under the style of Satzman & Forman, 102 Fulton St.

The first meeting and dinner of the Boost Club for this season was held Thursday evening in the rooms of the Aldine Association, 111 Fifth Ave., New York. Judge Charles F. Moore presided, and a number of prominent men were among the speakers of the evening. T. Arthur Baker furnished entertainment.

L. Witsenhausen has resigned as secre-

tary and treasurer of the relief committee of the Assurance League of America and Samuel B. Mann, treasurer of the Aikin-Lambert Jewelry Co., has accepted the appointment, to succeed Mr. Witsenhausen. At present there are no applications for relief before the committee.

The Board of United States General Appraisers decided last week that white china lamps of elaborate and ornamental designs imported by Gilman, Collamore & Co., New York, must stand duty at 60 per cent, under the provision in the tariff for decorated china. The importers contended the lamps should be dutiable at 55 per cent, but their claims were overruled by Judge Hay, who wrote the decision for the Board.

A party of Attleboro jewelry manufacturers, consisting of Harry Clap, of the Daggett & Clap Co.; Alpin Chisholm, of the Bugbee & Niles Co.; Amos Blackinton, of Bates & Bacon, and Ernest Qvarnstrom, of Carter, Qvarnstrom & Remington, came over to this city by automobile in Mr. Clap's car, last week, to witness the Vanderbilt Cup race. They stopped at the Hotel Knickerbocker during their stay in this city.

"Moe" Lenkowsky, 79 Rivington St., waited on a well-dressed woman, last Wednesday, who seemed determined to look over all of his stock, but saw nothing that pleased her fancy. After she had departed Lenkowsky discovered that two diamond brooches, worth \$45, were missing. He caught the woman in front of the door. She said she was Mary S. Laughran, of Glen Cove, L. I., when arraigned in Essex Market Court, pleaded guilty and was held in \$1,000 bail for trial.

Whether Jacob Brenner, a jeweler, living at 34 7th St., garrotted his wife, or whether, as he testified, she tried to choke herself, was a question on which a jury in the Court of General Sessions, last Wednesday, could not agree. Brenner was on trial on a charge of assault in the first degree, and his wife testified that he tried to choke her with a rope covered with chamois. There were no witnesses to the alleged assault, and the man testified the woman tried to choke herself.

Schedules in bankruptcy of Solomon Eisenberg, New Rochelle, N. Y., filed last week in the United States District Court show liabilities of \$2,480 and assets of \$362 cash in the hands of the sheriff of Westchester County, proceeds of sale of his stock under an execution. Among the creditors are the Biggens-Rodgers Co., \$127; R. L. & M. Friedlander, \$122; Woodman Cook Co., \$96; Parker Fountain Co., \$132; Louis Dolgin, \$347; Sam Rosenthal, \$345; Ideal Cut Glass Co., \$87, and Pool Silver Co., \$80.

In the United States District Court, Wednesday, Judge Holt granted a discharge in bankruptcy of Louis Halpert, a diamond setter and dealer at 51 Maiden Lane, against whom an involuntary petition in bankruptcy was filed early in January last. Mr. Halpert's liabilities were \$24,642, about \$12,000 of which it was stated at the time of his bankruptcy was for accommodation notes which he gave to Eisler & Laubheim prior to their failure. It was the liability on these notes for which he said he had received no consid-

eration, that was responsible for his embarrassment. Mr. Halpert is now again in business at 51-53 Maiden Lane.

In the Court of Appeals recently the case of the Yale Wonder Clock Co. against James E. Surman, 32 Park Pl., was argued and decision was reserved. The action was brought in the Supreme Court several years ago to recover the price of an automatic machine, and the defendant, who admitted the delivery and non-payment charge, set up a defense that the machine in question was a gambling device. The case went to a referee, who found the machine was a legal and legitimate device, and that the contract was valid. An appeal was taken to the Appellate Division in the third department, which sustained the judgment in favor of the plaintiff, and from the Appellate Division the case was taken to the Court of Appeals, where it was argued Oct. 15.

There has been on exhibition during the past week at the Fifth Ave. store of Tiffany & Co. a cup which is to be competed for by the Automobile Club of America at Savannah, Ga., on Thanksgiving Day, Nov. 26. The cup is of 18-karat gold and was made by the firm exhibiting it. The cup rests on a mahogany base, on which is a circlet of gold shields, bearing the dates from 1908 to 1917 consecutively. Around the base of the cup is a circlet of raised work, and about the center is a raised work design in leaf effect and the words "Automobile Club of America" in large letters of gold. The cup has heavy handles, and on the rim is perched an eagle with outstretched wings holding in its beak a wreath. On the front of the cup is an automobile wheel with a blue enamel rim.

The parade of the Businessmen's Republican Association, which will be held Saturday, Oct. 31, is a subject of general conversation in the Maiden Lane district. The jewelry trade expects to marshal a force of 3,000 men. The marching jewelers will be divided into two divisions. The first division will be headed by the Waltham Watch Co.'s band of 50 pieces and Col. John L. Shepherd will be the marshal. He will be assisted by 10 aids. The second division will be headed by Squadron A, N. Y. S. military band of 45 pieces. This division will be in charge of Charles F. Brinck, who will also have 10 aids to assist him. Each company will comprise 16 men and captain, and as fast as the lists containing the names of the different companies are received at headquarters canes and badges will be given out. Four large banners and eight large American flags will be carried by the paraders. Each company will have a right and left guide, who will also carry flags and help keep the men in line. Orders from headquarters direct that the lines of marchers be four paces apart. The trade in the Maiden Lane and John St. district, generally, will close offices at 12 o'clock in order to give their employes time to prepare for the parade. It is expected that the jewelry division will take its place in line of march at about 1 p. m. Rear Admiral Joseph Coghlan, who is to head the parade, and his personal staff will be mounted; the other paraders will proceed on foot. The

marshals and their aids are to wear silk hats.

L. Levy, Syracuse, N. Y., was seen in this city last week.

G. T. Case, New Haven, Conn., was a visitor in this city last week.

M. Loeb, of the Duerber-Hampden Watch Works, Canton, O., was a caller in town last week.

Alvin L. Strasburger, of Louis Strasburger's Sons & Co., 2 Maiden Lane, sailed yesterday for Europe on the *Kronprinzessin Cecile*.

Directors of the Silversmiths' Co. have declared the regular quarterly dividend of one per cent., payable Nov. 16, to stockholders of record, Nov. 10.

Wm. E. Staiger, of the firm of Staiger & Sons, 170 Broadway, was, last week, elected president of the Peer Co., Inc., 97 Water St., dealers in coffees and teas.

Judge Holt, in the United States District Court, has granted a discharge in bankruptcy to Samuel M. Schlomowitz, 5 E. 98th St., formerly a jeweler. The liabilities are \$2,918.

Sigmund Stern, of Stern Bros. & Co., 68 Nassau St., celebrated his 50th birthday anniversary yesterday, he having been born on the same day as President Roosevelt, Oct. 27, 1858.

Jacob Scharf has taken the interest formerly held by Max Medak in the firm of Medak & Klein, diamond setters, 41 Maiden Lane. The firm name now is Scharf & Klein. Mr. Medak died in July.

The Banks & Ferris Co. has been incorporated under the laws of the State of New York to deal in jewelry, with a capital of \$3,000. The directors are Mary E. Banks, Irving E. Ferris, and Elizabeth B. Ferris, all of Port Chester, N. Y.

The Jewelers Board of Trade is sending out a first and final dividend of 36¼ per cent. in the matter of E. F. Whittemore, Denver, Colo., and a first dividend of 10 per cent. in the matter of the Lawrence Jewelry Co., Cleburne, Tex.

The first meeting of creditors of Ashley & Merwin, 1327 Fulton St., Brooklyn, who were adjudged bankrupts on July 14, will be held in room 5 of the Postoffice building, Brooklyn, Nov. 6, at 2 p. m. A. T. Stoutenburgh is the referee in bankruptcy.

James J. Richards, Jr., has begun an action in the Supreme Court to recover \$30,000 from the estate of his father, on the ground that his father, by fraud and deceit, obtained and kept this money from him. John R. Greason, of John R. Greason & Son, 14 John St., as executor of the father's will, has set up as a defence that there was no fraud, but that young Richards was well aware of and ratified all the transactions connected with the \$30,000. The Appellate Division decided, last week, that before the action can proceed to trial Richards must reply to this defence and show how he purposes to meet it.

W. H. Rogers, president of the Nassau Bank, died at his home 103 Hancock St., Brooklyn, Sunday morning, of heart trouble, at the age of 71 years. Mr. Rogers, when 16 years old, entered the employ of

the Chatham National Bank and in 1857 began his career with the Nassau Bank. He worked from the lowest desk to the position of cashier, which place he held from 1869 to 1907. He was elected vice-president in 1907 and in less than a month, upon the death of Frank H. Richardson, became president. Funeral services were held last night at the late home of the deceased. The burial was in Cypress Hills Cemetery. He is survived by a widow and five children.

Retail jewelers of this city are advised to be exceedingly cautious in dealing with a man who may offer them bonds in payment for jewelry. The man, who was a former Fifth Ave. merchant, recently called at the jewelry store in the vicinity of 34th St. and selected \$2,000 worth of articles. He then offered to pay the merchant with two \$1,000 bonds of a brewing concern, having coupons attached, bearing six per cent. interest. The jeweler investigated and could find nothing to prove the brewing concern was in existence, so refused the offer. There was nothing in the transaction of a criminal nature as far as the purchaser was concerned, and had the jeweler accepted the bonds in lieu of cash and later found them to be worthless he would practically have had no redress. Members of the trade to whom this offer may be made are cautioned to be careful and to investigate the character of the bond offered before agreeing to accept them or parting with their stock.

An application for a new trial in the suit of Mary G. Boeck as assignee for her husband, J. Edward Boeck, against Alfred H. Smith and Harrison B. Smith, was denied last week by Justice Dayton in the Supreme Court, Special Term, Part 3. The application for a new trial was made upon the ground of newly discovered evidence. The case was originally brought in the New York Supreme Court to recover 10 per cent. commission claimed on a sale of \$60,000. Judgment was rendered for the plaintiff for \$660.80. This judgment was not based upon the specific agreement for 10 per cent., but upon an allowance of reasonable value for two per cent. commission for goods actually sold. The action was commenced in 1904 and the trial occurred in April, 1906. The case was appealed to the Appellate Division and the judgment affirmed. It then went to the Court of Appeals and the appeal was dismissed. The newly discovered evidence upon which the present application for a new trial is based is to the effect that in April, 1907, J. Edward Boeck absconded with goods to the value of \$100,000 and over and that he was indicted May 23, 1907, arrested in April, 1908, pleaded guilty and was sentenced in May, 1908. The only ground upon which this testimony is now sought to be introduced at the proposed new trial is in effect that, had it been offered to the jury in 1906, it might have served to discredit J. Edward Boeck's testimony given at that time. In denying the motion for a new trial last week the court said that the evidence offered, even if it could be received, does not seem to warrant any reasonable presumption of a different verdict, nor does it appear, at the time of the agreement, that Boeck was not a person whose word could be believed, whatever his character may have been three years later.

J. F. Mitchell will shortly open a store at Anadarko, Okla.

H. Deutsch has opened a store at 2107 Wentworth Ave., Chicago, Ill.

A. M. Cross has opened a new store at 207 Pine St., Long Beach, Cal.

A. M. Taylor, about a week ago, began business in Louisville, O., as a retail jeweler.

O. D. Wolfe has begun business as a watch and jewelry repairer in Woodbury, Ga.

F. H. Theile has just opened a jewelry and optical store at 114 E. 7th St., Chattanooga, Tenn.

W. P. Seward, Newark, O., contemplates engaging in the retail jewelry business in Rushsylvania, O.

Fraid & Falk have opened a store in a new building on Washington St., near 13th St., Minneapolis, Minn.

Frank Warfel has started in the retail jewelry and repairing business at 107 Washington Ave., Argenta, Ark.

The Superior Art Shop is the name of a new jewelry concern which has been opened at 318 Superior St., Toledo, O.

W. W. Watkins, formerly of St. Paul, Minn., has just opened a store in the new Davidson building, on 4th St., San Diego, Cal.

The Peetz Jewelry Co. was recently incorporated at Davenport, Ia., with a capital stock of \$1,000. The officers are: President, August H. Hinrichs; vice-president, Charles F. Maas; secretary, Henry Peetz.

Richardson & Trowbridge is the name of a new firm in Leominster, Mass. Mr. Trowbridge, who has been admitted to partnership by Mr. Richardson, was employed for some time in Nashua, but was formerly in Leominster.

A. F. Laity, who is employed as jeweler at the store of J. C. Schutz, Madison, S. Dak., will resign his position, Nov. 1, and engage in business on his own account, in the same place. He will make a special feature of the optical business.

The Waltham Jewel Co. is the name of a concern which was organized recently, at Kittery, Me., for the purpose of manufacturing and dealing in watch jewels. The capital stock is \$500,000, of which nothing has been paid in. The officers are: President, H. Mitchell, Kittery; treasurer, S. K. Morrison, Portsmouth, N. H.

In the show window of Mrs. Victoria Ash's store, 1165 Broadway, Brooklyn, is a dainty gold watch, which will be given to the most popular school teacher in that section. A ballot is given to every purchaser of a dollar's worth or more of goods. The tickets are to be deposited with the jeweler. The contest ends Jan. 10.

# WORKSHOP NOTES

For JEWELERS and WATCHMAKERS

100 Pages New Matter

Containing 300 Pages (size, 7½ x 10½ inches), Bound in Cloth, Stiff Covers

A collection of the latest practical receipts on the manufacture and repairing of watches and clocks, and on the various processes entering into the manufacture and repairing of jewelry, as coloring, polishing, enameling, annealing, oxydizing, etc., in short, a thorough compendium of the numerous mechanical departments of the jewelers' and watchmakers' shop.

This book is the most useful, comprehensive and perfect publication for the workman at the bench, and should be in the hands of every jeweler and watchmaker in the country. It is the only book of its kind published.

PRICE, by mail postpaid, \$2.50

PUBLISHED BY

THE JEWELERS' CIRCULAR PUBLISHING CO.

11 JOHN STREET, COR. BROADWAY (Corbin Building), NEW YORK

## Buffalo, N. Y.

A. J. Best has returned from an eastern trip.

M. B. Rosenthal, traveler for Present & Co., is in Ohio this week.

F. Schultz, of F. Schultz & Co., 1010 Broadway, has typhoid fever.

Eugene Tanke, a well-known jeweler, has been visiting in St. Catharines, Ont.

Edward A. Muth, representing E. A. Sipe and the Union Novelty Co., Buffalo, is in Jacksonville, Fla., this week.

J. Rollin Ansteth, jeweler at 13 Brisbane building, who has been giving much of his attention to repair work for the past two years, has branched out as a jobber in jewelry.

T. C. Bunch, manager of the jewelry department of the William Hengerer Co., announces that besides his regular stock he has added a first-class repair and watch department. O. Cravens, an expert in his line, has taken a position as head of the repairing department.

According to a report from Niagara Falls, the plant of the Oneida Community, Ltd., in the lower milling district, in that city, was threatened for a time by fire last Friday night. The blaze started in a store-house. It is said that the damage done to the building and stock is about \$100.

The marriage of Charles A. Schopp, Elliott Sq., to Miss Isabel Mann Fraser took place at the home of the bride's parents, in Syracuse, on Oct. 28. The best man was Collin Fraser, brother of the bride, and Miss Mary Fraser was the bridesmaid. Mr. and Mrs. Schopp spent their honeymoon in the east. Their home will be at 301 Bird Ave., this city.

The following jewelers were in the Buffalo market last week: E. J. Peek, Joliet, Ill.; H. L. Fox, Dunkirk; John Laing, East Otto; A. W. Kelsey, Franklinville; E. A. Koetsch, North Tonawanda; I. Traub, Niagara Falls; E. M. Richardson, Lockport; P. M. Riley, Holland, N. Y.; L. J. Reznor, Port Alleghany, Pa.; Miss Crandall, Springville; C. D. Barnes, Gowanda, N. Y.

According to a report from Bath, N. Y., a man is in jail, in that place, held on suspicion of being implicated in the burglary of a jewelry store in Lockport, N. Y. The prisoner, when arraigned, was questioned where he secured several pieces of jewelry found secreted upon him when arrested. After several evasive replies he finally admitted that he was wanted in Lockport.

A. E. Sipe, diamond merchant, Brisbane building, has received word from I. Hennig, diamond broker, Audrey House, London, Eng., that the London office of the United States Express Co. writes that all shipments of diamonds entrusted to their care for reforwarding to America are insured by them from the moment the diamonds are received at the express company's office until delivery is made to the consignee. The express company's rate of 2s. 6d. per 100 pounds freight covers this insurance against every risk. On Aug. 1, 1907, the rate was 5s. per 100 pounds, and on Oct. 1, 1907, that rate was reduced to 2s. 6d.

King & Eisele will establish a new department, in which they will handle emblems, badges and class pins, with display

rooms on the ground floor of their building. Mr. Dodd will be in charge. Samuel Goldberg, connected with the clock and silverware department of that firm as city salesman, is now covering out-of-town territory.

John C. Yung, of Yung & Debus, 184 E. Genesee St., was recently married to Miss Ida J. Hehr at the home of the bride's parents, 171 Carlton St. The Rev. Mr. Eberling performed the ceremony. The best man was Mr. Debus, business partner of the bridegroom. Henry J. Hehr was groomsmen, Miss Winifred Hehr, bridesmaid, and Miss Anna Yung, maid of honor. Mr. and Mrs. Yung spent their honeymoon in the east.

## Pittsburg.

W. W. Mather leaves, this week, on a trip through northwestern Pennsylvania.

W. H. Bowers, formerly of Glassport, has accepted a position with J. R. Reed & Co.

L. B. Mather, New Castle, was in Pittsburg, last week, attending the exposition, which closed Saturday night.

Charles S. Moore went to Ohio last week on a tour for Sam F. Sipe, selling diamonds wholesale, exclusively.

James R. Brown, who returned from a trip made through northern Ohio, reports business considerably improved.

George C. Johnson, Leetonia, has moved into a new store room at that place, where he has much better quarters than formerly.

H. M. Taylor, Louisville, O., formerly employed in a watch factory, has opened a new store at that place. Taylor has the stand formerly owned by E. Sollenberg, who died a short time ago.

Henry A. Barrett, of the Geo. B. Barrett Co., who was injured a short time ago in an automobile collision, is able to be out and continues to take daily spins in a new machine. Mrs. Geo. B. Barrett, who has been at Atlantic City for four or five months, has returned home.

Heeren Bros. & Co. made the handsome gold medal presented to Abraham Lippman by his friends on the occasion of the philanthropists 70th anniversary. One thousand other medals in bronze were distributed to Mr. Lippman's friends who were present at the festivities.

The Jewelers' Duckpin League rolled again last week on the Davis alleys, resulting in the following scores: E. P. Roberts & Sons took four straight from the Vilsaeks, the Terheyden team took four straight from August Loch, and the J. R. Reed team lost three out of four games to W. W. Wattles & Sons.

A fire which started Oct. 21 at Fayette City, Pa., a town about 30 miles from Pittsburg, destroyed the jewelry store of Karat & Poal, entailing a loss to the firm of \$4,500, with only \$1,000 insurance. Members of the firm, which is a new one, were in Pittsburg last week buying stock and visited several local establishments.

Out-of-town jewelers in Pittsburg last week included Henry Hartman, Wapakoneta; B. E. Brown, Monessen; John Linenbrink, Rochester; F. B. McKinley, Washington; Charles A. File, Mars; C. L. Kuhn, Scottsdale; H. R. Brown, Donora; Charles A. Loughman, Braddock; D. L. Cleeland, Butler; J. F. Stoops, Leechburg.

The first evening dinner of the season, of the Pittsburg Association of Credit men, will be held at the Joseph Horne Co. dining room, on the evening of the presidential election, where the members will get the returns. Arrangements have been made to get the news by leasing a special wire and a large number of jewelers, anxious to learn the outcome of the presidential election, will be there to hear the news.

W. C. Hannah has bought the bankrupt stock of W. J. Eroo, New Castle, who recently filed a petition in voluntary bankruptcy in the United States District Court here, and is now auctioning off the stock. The price paid is said to have been \$2,067. Eroo's liabilities amounted to \$15,751.98, and his assets were placed at \$8,395.01. The affairs of the bankrupt will be settled up as soon as possible.

The Pittsburg Chamber of Commerce is considering the advisability of making a trade tour of the principal cities of the South and West and to Mexico, Cuba and Porto Rico, to advertise Pittsburg and introduce the merchants to the trade of the centers named. If the trip is made, special trains and steamers will be chartered to convey the party. Many think well of the plan and some definite action is expected to be taken within a week or two.

Charles Edwards, the thief who broke into the store of Henry Terheyden, Oct. 1, and in doing so set off an alarm in the office of the Holmes Protective System, was called for sentence last week in Criminal Court and sent to the Western Penitentiary for a term of three years. He pleaded guilty to the charge. The story of the arrest was fully set forth in the CIRCULAR WEEKLY, Oct. 7. Edwards attempted to shoot an officer at the time the police were giving chase and was himself shot. Edwards did not get anything at the Terheyden store.

The entire stock of merchandise belonging to the bankrupt estate of Sol. Seleznick was sold recently for \$750. The leasehold is valued at from \$500 to \$1,000 and has not yet been sold. In addition to this Seleznick has a small equity in some real estate, the value of which our attorneys have been unable to learn. The preferred claims for rent and wages amount to about \$600, exemption \$300, so that the indications are that there will be very little, if anything, for unsecured creditors. The attorneys say that they do not expect a dividend to be declared inside of three or four months.

G. A. Boss, formerly engaged in the jewelry business at McKees Rocks, a suburb of Pittsburg, while riding down a steep grade in Kennedy township a few days ago, lost control of his bicycle and fell over a 30-foot embankment, breaking his back. Boss was removed to the McKees Rocks hospital, where at last accounts he was still alive, with slight hopes of his recovery. Mr. Boss sold out his jewelry business a short time ago and since that period had been living quietly in McKees Rocks. He is well known in Pittsburg and the news of the accident was a great shock to his friends.

Chas. H. Morrison, Topeka, Kans., has sold out to G. N. Rankin.

23 to 25 Looijersgracht, Amsterdam, Holland

## THOMAS R. REID, AUCTIONEER

### 14 Years Experience in Selling Fine Stocks

#### THIS IS WHAT I HAVE DONE IN A FEW MONTHS:

On July 8, 1908, I opened a sale for the John C. Gossler Importing Co., 1209 Boardwalk, Atlantic City, N. J. This firm enjoys the distinction of being the largest importers of rare Gold and Silver Art Treasures, Bronzes and original Oil Paintings of any firm in the United States.

I sold five weeks, averaging over \$24,000 weekly. On March 21, 1908, I opened a second sale for this same concern, and sold three weeks, averaging over \$17,000 weekly. On June 20 they again wired me, and I made a 10 weeks' sale for them, which was a record-breaker, taking in in August alone over \$52,000. Write this firm and see what they have to say about me.

Look up the concerns for whom an auctioneer has done business as thoroughly as you do the auctioneer. Can mail letters and references from concerns all over the United States for whom I have done business in the past 14 years.

Write or wire me for date. If you wish to see me personally before holding a sale I will call and see you.

Write me for a list of references and letters and I will furnish them from some of the leading jewelers in this country. Then look me up.

---

CHICAGO, WEDNESDAY, OCTOBER 28, 1908.

No. 13.

### Chicago Notes.

L. E. Fay has returned from the Pacific coast.

Mr. and Mrs. Izri W. Lederer were here last week.

Chas. S. Purdy, Providence, R. I., visited this city last week.

Theo. Jacobs is now on a western trip, in the interests of his firm.

S. W. Carroll has removed from Winn, Mich., to Vestaburg, Mich.

"Mike" Lambert, of Henry Zimmern & Co., was in town last week.

O. Keith, of Keith & McChesney, Iowa City, Ia., was here last week.

O. A. Starke, of the Star Watch Case Co., was in this city last week.

Sid Lebolt, jewelry buyer for Rothschild's, is on a trip to New York.

R. Maypole has been engaged by Spies Bros. to represent them in the west.

M. H. Cowen, with Rettig, Hess & Madsen, is on a trip to the Pacific coast.

Steve Bridges, of Despres, Bridges & Noel, is on a trip to the Pacific coast.

Edmund Guilbault has removed from Lake Linden, Mich., to Calumet, Mich.

George G. Gambrill, of the Eisenstadt Mfg. Co., St. Louis, was here last week.

Miss E. Bell, with the Watson & Newell Co., is engaged to be married to G. Smith.

J. W. Armbruster, of the Illinois Watch Co., spent a few days here during the past week.

A. Binswanger, jewelry buyer for the Siegel-Cooper Co., has returned from New York.

Simon Ellis, reported in a jewelry paper to be a bankrupt jeweler, is a bankrupt grocer.

Geo. Steiner has been engaged by Bach & Co., to represent them in Chicago and vicinity.

Dave Martin has been engaged by Norris, Alister & Co. to assist in the jewelry department.

G. W. Finckenaue, with the Alvin Mfg. Co., is on a trip through Kansas and Nebraska.

Briggs & Dodd, jewelry auctioneers, are making a sale for Bernard Weingerter, Akron, O.

H. Deutsch, formerly of New York, has opened a jewelry store at 2407 Wentworth Ave., this city.

Reuben H. Cohen, representing Geo. H. Cahoon & Co., has removed to room 301 Heyworth building.

F. T. Lotz, with the Juergens & Anderson Co., has returned from a trip through Missouri and Nebraska.

The Dennison Mfg. Co. has removed from 128 Franklin St. to E. Randolph St., between Michigan and Wabash Aves.

W. N. Tuscano, president of the Knickerbocker Silver Co., paid a visit to the Chicago office of the company last week.

Fire broke out on the premises of Louis Ritter, 1005 Milwaukee Ave., last Wednesday, but little damage was done.

C. W. Harmon, of Jos. Fahys & Co. and the Alvin Mfg. Co., and H. B. O'Brien, of the Alvin Mfg. Co., were here last week.

Albert M. Dueber, of the Dueber-Hampden Watch Works, and Dan W. Douglass, with the same concern, were here last week.

Harvey Lohmiller, of Farrell & Lohmiller, who was recently married, was here last week with his bride on a honeymoon trip.

George Edwards, first vice-president of the International Silver Co., visited the Chicago offices of that corporation last week.

F. S. Hannah is the new jewelry buyer for the John M. Smyth Co. Mr. Hannah recently came to this country from South Africa.

On account of ill-health I. Goodman, a retail jeweler at 487 W. North Ave., is closing out his stock preparatory to retiring from business.

C. Litcher, formerly jewelry buyer for the John M. Smyth Co., has been engaged by Graffe & Stanek to represent them in Chicago and nearby towns.

C. H. Allen, of C. H. Allen & Co., was here, last week, arranging with J. W. Stoneburner for the latter to represent C. H. Allen & Co. in the west.

W. D. Turner, of Turner Bros., returned, last week, from a five weeks' far western trip. At North Yakima, Wash., Mr. Turner attended the wedding of his sister.

The Billiken Jewelry Co. has been incorporated here, with a capital of \$2,500. The incorporators are Henry L. Stern, Henry A. Gardiner, Jr., and William France Anderson.

Peter A. Peterson, 787 W. North Ave., recently sustained a loss by fire in his retail jewelry store at that address. Mr. Peterson is selling out his stock and intends to go to Oklahoma.

C. R. Pearsall, with the J. H. Leyson Co., Salt Lake City, Utah; Adolph Hahn, Durango, Col.; S. A. Andrews,

Tacoma, Wash., and Morris Eisenstadt, St. Louis, Mo., stopped over here, last week, on their way home from the east.

It was erroneously reported, last week, that Edgar Huhn had severed his connection with the Potter & Buffinton Co. Mr. Huhn will remain with that concern till January next, after which time he will represent Scofield, Melcher & Scofield.

Ernest M. Kyser, buyer for the retail watch department of Marshall Field & Co., was married last Wednesday to Miss Bertha Ella Jacob. Mr. and Mrs. Kyser are now on a wedding trip to Texas, and after their return will be at home, 1095 E. 60th St.

At the last meeting of the Manufacturing Jewelers' Association, of Chicago, the following new board of directors was elected: Fred Blauer, R. Dreyer, Mr. Wilson, Mr. Hildebrand, F. H. Jacobson, S. Wechter, Fred Spies. These directors will meet this week and elect officers for the coming year.

Among the buyers in town last week were: H. E. Snyder, Fairfield, Ia.; Henry C. Hulett, Marshall, Mich.; Geo. Williams, of Geo. R. Calhoun & Co., Nashville, Tenn.; Julius Krause, Joliet, Ill.; F. O. Okerberg, De Kalb, Ill.; Chas. E. Hodgen, Kokomo, Ind.; A. Y. Boswell, Tulsa, Okla.; Capt. Henry W. Klopff, Neillsville, Wis.; James Kramer, Clarinda, Ia.; J. W. Neasham, Ottumwa, Ia.; F. L. Bosworth, Minneapolis, Minn.; Julius Liebenow, Green Bay, Wis.; Chas. Ham, Frankfurt, Ind.; Lee F. Dresser, Michigan City, Ind.; L. A. Fondersmith, Hocpeston, Ill.; J. H. Bryans, Storm Lake, Ia.; Claud Howard, Frankfurt, Ind.; H. W. Slingluff, New London, Ia.; C. F. Ingalls, Waukegan, Ill.; Geo. Blomstrom, Escanaba, Mich.; C. T. J. De La Porte, Berlin, Wis.; Carl McKee, Tuscola, Ill.; C. F. Hallfarth, Henry, Ill.; R. L. Jenkins, Amboy, Ill.; Joseph Homann, Calumet, Mich.; David Jacobs, Muskegon, Mich.; W. J. Feetham, Sault Ste. Marie, Mich.; Mr. Lewis, of Lewis & Van Sickle, Oscaloosa, Ia.; Mr. Foster, of Shreve & Co., San Francisco, Cal.

Burglars recently broke the show window in the jewelry store of J. F. Hartwell, Oklahoma City, Okla., and made off with stock valued at nearly \$900, including three diamond rings, three watches, one bracelet, one cameo brooch, and 12 diamond and pearl pins. Two men were later taken into custody suspected of the crime. Both denied the charges.

*65th Year*

Traveling Stars

**L. BAUMAN JEWELRY CO.**

NEW CENTURY BLDG. ST. LOUIS NINTH AND OLIVE STREETS

## Cincinnati.

J. C. Miller, of the Miller Jewelry Co., is calling on his southern trade.

Fred Krueger, of Gebhardt Bros., has started on a tour through Indiana and Kentucky.

"Sig" Strauss, of Lindenberg, Strauss & Co., has returned from a business trip in the south.

Mr. Olnhausen, of Olnhausen & Smith, Celina, O., called in this city, last week, on his return from Mammoth Cave.

The Gustave Fox Co. has secured a patent on a new elk head emblem which is unique and attractive. The antlers form the letters B. P. O. E.

F. H. Theile, Chattanooga, Tenn., was here, last week, buying the stock for the new jewelry and optical business he has just opened at 111 E. 7th St., in that city.

C. H. Harris, of Harris & Johnson, jewelers and opticians, Chattanooga, Tenn., was here, last week, purchasing the opening stock for a new store which he has just opened at Rockwood, Tenn.

Albert Voige, with Adolph Muehlmann, and Miss Mary Muehlmann, daughter of the latter, were married, Oct. 14. The couple have just returned from their honeymoon and are receiving congratulations from their trade friends and others.

The wife of George Fox, of Fox Bros. & Co., last week, sustained quite a serious injury to her arm in slipping and falling to the pavement on Burnett Ave. She was taken to the Jewish hospital near by, where she received immediate surgical attention.

The Herschede Motor Car Co. was incorporated, Oct. 24, with \$50,000 capital stock. Among the incorporators are L. B. Herschede, W. J. Herschede and A. T. Herschede, connected with the Herschede Hall Clock Co. and the Frank Herschede Co.

David Gradison, a jeweler in the Arcade, recently contracted to pay a total rental of \$30,000 for a 10-year lease of the store-room at 436 Vine St., last occupied by the Burlington Route. A new front is to be put in and other changes made at a cost of \$2,500. The store is in the Wiggins block. Mr. Gradison expects to gain possession Nov. 15.

Out-of-town jewelers in this city, last week, buying stock, included: A. Aman, Dayton, O.; William Shire, Paris, Ky.; Frank Emmerling, Hillsboro, O.; A. Stamm, Williamsburg, O.; J. W. Hissey, Kingston, O.; Louis B. Fuchs, Chillicothe, O.; Frank Fullilove, Owenton, Ky.; L. P. Zurborn, Waverly, O.; J. H. Noyes and E. E. Stutie, Osgood, Ind.; J. B. Hesselbrook, Liberty, Ind.

Among the out-of-town jewelers here, last week, attending the centennial celebration of the Grand Lodge of Masons of Ohio, were: J. A. Slonecker, Scio, O.; J. A. Worrell, Washington Court House, O.; Lewis Lea, Sandusky, O.; A. Meseke and wife, Oberlin, O.; John Zelly, Eaton, O.; I. W. Rice, Greenwood, O.; B. Ullman, Myrtle, O.; M. B. Ullery, Covington, O.; Henry Moser and wife, Wapakoneta, O.; Massie Johnson and wife, Indianapolis, Ind.; S. F. Kaufman, Attica, O.; A. Axman, Middletown, O.; F. P. Frishie, Lancaster, Ky.; A. Y. Boswell, Tulsa, Okla.;

J. E. Zimmerman, New Holland, O., and Earl Wolf, Loudonville, O.

Walter Mayer, of Wallenstein, Mayer & Co., one of Cincinnati's young hustling jewelers is gaining considerable reputation as a sportsman as well. It appears that during dull hours in his business trips through the United States he devotes his time either to hunting or fishing, and as a result of these pastimes the company's offices are beginning to have the appearance of a natural history museum. The last addition, a beautiful 5½-foot stuffed fish, arrived from Florida last week. Mr. Mayer made the catch some time ago when on a trip to Cuba, and had sent it to a taxidermist in Jacksonville, who prepared it for mounting.

## Kansas City.

### TRADE CONDITIONS.

There has been considerable buying for the holidays, and traveling men are sending in encouraging reports. The long dry spell all through the central west had a tendency to make dealers somewhat cautious, but the recent rains, it is thought, will give all lines of business a new impetus. The corn crop may be a little short, but the loss will be more than made up by liberal yields of other grains, and of fruits and vegetables, for all of which good prices are being obtained by producers.

H. W. Porter, of the Porter & Weiser Jewelry Co., is enjoying a fishing trip in Arkansas.

J. F. Mitchell, who is about to open a store in Anadarko, Okla., purchased stock here, last week.

J. Rankin, formerly with the Meyer Jewelry Co., has accepted the position of watchmaker with H. E. Wuerth, a Main St. jeweler.

Otto Knaul, traveling representative of the Woodstock-Hoefler Watch & Jewelry Co., is in town stocking up for another trip. He reports business in his territory as very good.

The following new students have been entered at the Kansas City Polytechnic Institute: Fred C. Briggs, Pratt, Kans.; John Gunder, Kansas City, Mo., and Chris. Hiltenmeyer, Blackwater, Mo.

R. L. Warner, of Warner & Reid, who recently purchased the business of Kionka & Kionka, took a trip through northern Kansas, last week, and did a good business. His partner, O. A. Reid, is on the road this week.

New students who have been enrolled at the Kansas City Horological and Optical School include: Claude B. Nichols, Litchfield, Mich.; Dr. Nellie M. Cramer, Kansas City, Mo.; Charles Oren, Anson, Tex., and A. C. Dunkleberger, Pawnee, Okla.

H. W. Westley, a former pupil of the Missman School of Engraving, is being treated for tuberculosis at Rock Ford, Colo. A recent letter from him brings the information that his health is greatly improved and the prospect of complete recovery encouraging.

The following out-of-town jewelers called on the trade in Kansas City last week: W. L. Solmon, Tarkio, Mo.; Geo. Weisgerber, Salina, Kans.; W. E. Payne, Boulder, Colo.; R. W. Goucher, Clay Center, Kans.; C. L. Drekhorn, Oskaloosa, Kans.; John Gilles and wife, Fort Scott, Kans.; W. H. Schrack, Pratt, Kans.

## St. Louis.

Ben C. Bowden, Mayfield, Ky., and Mr. Tobin, Springfield, Ill., were in this city last week.

H. H. Kaesser, of the firm of Kaesser Bros., 2326 Franklin Ave., is rejoicing over the advent of an heir.

Morris Eisenstadt, of the Eisenstadt Mfg. Co., has just returned to his desk, after having been in the East for three weeks.

Samuel Kober, of the E. Maritz Jewelry Mfg. Co., returned to St. Louis, Friday, after a three weeks' trip through Tennessee, Arkansas and Mississippi.

Among the out-of-town jewelers in this city, during the past week, were: Mr. Chambers, Heinrichs & Chambers, Jefferson City, Mo.; T. J. Ellis, Jonesboro, Ark.; Charles Goodrich, Caruthersville, Mo.; Otto Friedrich, Cape Girardeau, Mo.; W. C. Pfaffle, Enid, Okla., and A. Kaebitz, Red Bud, Ill.

William E. Tamplin, traveling representative for the Providence Stock Co., in the northwest, has been successful in drawing for the government lands in Dallas, S. Dak. His prize of a quarter section was announced last week. Tamplin is a St. Louis man, and when not traveling for his firm resides at 2303 N. 10th St., in this city.

The F. W. Drost Jewelry Co. filed suit in the Circuit Court here, on Thursday, against James P. O'Neil, 35 Washington terrace, a scion of a wealthy St. Louis family, for a bill of \$982.80. In the suit it is alleged that young O'Neil bought goods to that amount and, on Sept. 14, sent the Drost firm a check on the Third National Bank for that amount, which was protested by the bank. Mr. O'Neil is said to be in New York now. The sheriff is directed by the suit to levy on his home in Washington terrace here, but that is vacant.

Foster George, the negro porter who confessed that he robbed S. C. Powell, of New York, of \$30,000 worth of diamonds, was indicted in Chicago, last Monday, according to despatches from there. The negro was arrested in this city several days earlier through the efforts of the local police and the Pinkertons, two months after Mr. Powell missed the gems. The catch is considered one of the best in a year in St. Louis. Several thousand dollars' worth of precious stones were found sewed in the negro's clothing, when he was apprehended.

In the issue of Oct. 14 there appeared an item, under Attleboro notes, to the effect that Henry Mason was traveling through the south for the Bliss Bros. Co., of Attleboro. This was absolutely incorrect, as Mr. Mason is not and has never been with the Bliss Bros. Co., but is connected with an entirely different concern. It caused the Bliss Bros. Co. considerable annoyance, because in some quarters it was taken to mean that the firm had a traveler calling upon the retail jewelry trade. As a matter of fact, the Bliss Bros. Co. states that it has no traveler in the south, as the entire output goes exclusively to the jobbing trade now as it has for the last 35 years.

# H. J. HOOPER & Co.

## NEW YORK'S LEADING JEWELRY AUCTIONEERS

It does not require the service of an auctioneer to give your goods away. You can do that yourself. I get the price. Let me prove it by sending you testimonials from all over the country that will substantiate it.

The names that I publish below are merchants I have sold for direct; there are no wholesalers among them. You may write to any jewelry wholesaler in New York; he will tell you of the honorable way I do business.

L. Robins, Oswego, N. Y.

## Indianapolis.

I Groh attended the annual convention of the Loyal Order of Moose, at Uniontown, Pa., last week.

E. M. Craft has returned from a business and pleasure trip to Memphis, Tenn., having had a successful trip.

E. H. Froecking, who went to Oklahoma City, Okla., recently, to accept a position with a manufacturing jewelry concern, has returned and is again with Chas. B. Dyer.

After having been in business for some time, Mrs. Frances Worthington, Westfield, has sold her jewelry stock to the J. R. Heley Co., who will continue the business.

The Baldwin-Miller Jewelry Co. has placed its new 76-foot sign across the front of the third floor of the State Life building. It is one of the largest advertising signs in the city.

Part of last week was spent in Brown County by William Reed, who recently purchased a tract of land there. He went to superintend the setting out of fruit trees in a 22-acre orchard.

Charles B. Dyer, of the Arts and Crafts Shop, supplied the set of table silver to the congregation of Grace Pro-Cathedral, at Huntington, last week. A subscription was taken and the service is to be presented to the pastor.

The annual election of officers of the Indianapolis Retail Jewelers' Association will be held at the regular monthly meeting of that organization, on Monday evening, Nov. 2. According to the present programme, it is probable the present officers will be re-elected, provided J. P. Mullally will accept the presidency again.

Several Indiana jewelers, although not as many as usual, were in this city, last week. Among the number were: C. N. Hetzner, Peru; J. W. Hudson, Fortville; A. W. Owens, Greenwood; J. A. Miessen, Cicero; Mr. Johnson, of the Johnson Jewelry Co., Anderson; Aaron Pursel, Noblesville, and W. E. Inman, Bloomfield.

Miss Emma Binsac, well known in local jewelry circles, died at Oakland, Cal., Oct. 22, after a long illness, following a surgical operation. For 15 years Miss Binsac was employed by Horace A. Comstock, holding a responsible position. She went to California, several weeks ago, hoping to regain her health. Burial occurred at Oakland, on Saturday.

Considerable attention has been attracted during the past week by a clock without a movement, exhibited in the show window in the store of H. Cohen & Sons, 50 Pennsylvania St. The dial is enameled on the window and no mechanism is visible. The clock was made by the company and is similar to the "Wonder Clock" that has been shown here.

Charles Mayer, of Charles Mayer & Co., will be one of the committee from the Merchants' Association that will meet with committees from other commercial and civic organizations to discuss proposed reform legislation. Mr. Mayer recently assisted in drafting a set of resolutions covering needed improvements in county offices that have been adopted by all candidates for election.

Suit was filed in the Superior Court here, last week, by J. H. Reed, a retail jeweler,

against William Foor, formerly a hotel proprietor. The suit was for \$500 damages for three diamonds said to have been lost by Foor. Some time ago, according to Reed, Foor took three diamonds from the store, expecting to sell them on commission, but later lost them. It is said that Foor claimed to have a customer for a diamond, when he took the three.

## Milwaukee.

H. Rogers, of the Henry Rogers & Son Co., Lake Geneva, Wis., was a recent visitor in Milwaukee.

H. W. T. Brake and E. Hartenberg, with A. F. Puls, visited the factory of the Elgin National Watch Co., Elgin, Ill., last week.

E. H. Warnke, of E. H. Warnke & Co., made a trip by automobile recently to Silver Lake, near West Bend, Wis., where he spent a few days.

Hugo Eisfelder has left Owatonna, Minn., and is now associated in the jewelry business with his father, Frederick G. Eisfelder, at Boscobel, Wis.

Henry Bayer, Whitewater, Wis., was here last week, having made the trip by automobile. Various other points in the State were visited by Mr. Bayer.

H. T. Grosheider, formerly engaged in the engraving business in Kansas City, has been engaged as manager of the engraving department of E. H. Warnke & Co.

W. H. Murphy, Murphy Bros., Fox Lake, Wis., has sold his business and stock to Oscar Leitcher, formerly connected with the establishment. Mr. Murphy was a recent Milwaukee visitor.

W. W. Wallis, one of the oldest jewelers and pawnbrokers of this city, recently died at his home here. An estate of more than \$60,000 was left by Mr. Wallis. The heirs are now closing up the business on 3d St., and present plans are that the establishment will be discontinued.

Among the out-of-town jewelers in Milwaukee last week, not elsewhere mentioned were: J. T. Wendling, Chilton; J. B. Kimball, Waukesha; H. R. Vergeront, Montfort; W. E. Pauer, West Bend; F. P. Beswick, Racine, and the senior member of Schneider & Son, Burlington.

Among the names of the committee of 50 appointed to wait upon Mayor Rose to demand the suspension of Chief Thomas A. Clancy, of the Milwaukee fire department, and a public hearing of the discharged firemen, was that of Archie Tegtmeyer, a well-known southside jeweler. Mr. Tegtmeyer has issued a public announcement protesting against the unauthorized use of his name and is indignant over the position in which he and other well-known business men have been placed.

Wisconsin jewelers are well pleased with the idea of having a board of three examiners to test the knowledge and ability of watchmakers and indications are that the board will meet with excellent success. "We are proud," says Theodore Schelle, Milwaukee jeweler, who is chairman of the new board of examiners, "that Wisconsin leads in this new movement, being the first State that has taken actual steps in the direction of elevating the standard of the art of watchmaking." Other members

of the board, Julius Sauermann, Milwaukee, and W. H. Becker, Beaver Dam, are confident that the plan will result in advantage to jewelers all over the State. The examinations are to be oral and manual. The board will have the applicant do a piece of work and will grade him according to a fixed standard. In addition to issuing a certificate to the workman found to possess an adequate knowledge of his trade, the board will try to secure employment for him. It is planned to hold not less than two examinations during each year.

## Omaha.

E. O. Furen, of T. L. Combs & Co., has returned home from a hunting trip.

Mrs. C. L. Shook spent a few days of last week in St. Paul, Minn., visiting her parents.

S. W. Lindsay and wife have returned from a visit in Chicago. While there Mr. Lindsay purchased holiday stock.

Mrs. J. F. Theolecke, Pocatello, Idaho, visited this city for a few days, last week, on her return home from a trip to Iowa.

John Albright, David City, Nebr.; S. A. Sherrerd, Woodriver, Nebr., and William M. Kusel, Hooper, Nebr., were in this city, last week, purchasing stock.

Robert Ingalls, of the firm of C. F. Ingalls & Bro., Waukegan, Ill., was in this city, for a few days, of last week, visiting friends on his return home from California.

While passing through this city en route to the convention of the National Women's Christian Temperance Union, held in Denver, last week, Mrs. Lillian M. Stevens, national president, was presented with a beautiful silver loving cup by Mrs. Louis Borsheim, in behalf of the Omaha W. C. T. U. Mrs. Clara Burbank, delegate from Omaha, presented to Miss Gordon, vice-president, a silver souvenir spoon engraved with gold-enrod (the State flower) and the date, from Frances Willard Union, of this city.

## Toledo.

Scharbach Bros., 505 Summit St., have remodeled and improved their store building.

William Walcott is having the watch sign in front of his store, 318 Summit St., renovated and remodeled.

Charles Tschumy, formerly of Toledo but now a jeweler at Genoa, has just moved into a fine new residence at that place.

Mr. and Mrs. S. L. Basch are entertaining Miss Hattie Hirsch, of Chicago. Mr. and Mrs. Basch were formerly of Chicago until a branch jewelry store was opened in Toledo some months ago.

L. P. Christiancy, 507 Madison Ave., has increased his stock and now carries a full line of all kinds of jewelry. A portion of his store room is occupied by C. P. Parker, optician, one of the younger opticians of the city.

The latest addition to the jewelry and fine arts stores of Toledo is the Superior Art Shop, 318 Superior St. Earl V. Sala is proprietor and special attention will be given to art goods, picture frames and jewelry souvenirs....

**Los Angeles.**

**TRADE CONDITIONS.**

There is continued evidence of growing confidence in the future in this section. The wholesalers are all doing a very satisfactory business. This is, of course, the holiday season among wholesalers. While the retail dealers do not yet feel the impulse so strongly as the wholesalers, there is a general gradual improvement and all are hopeful of having a very fair holiday trade.

J. B. Rowe, 217 N. Spring St., has been enlarging and improving his store.

J. Wiesenberger, 453 S. Broadway, is taking a week's rest at Murrietta Hot Springs.

J. C. Fleming & Co. have just placed a large new sign in front of their store.

John Belfiles, with H. F. Wallace, has just returned from three weeks' vacation at Fresno.

Percy H. Greer, jewelry auctioneer, has returned to Los Angeles after a short residence in San Francisco.

Geo. L. Bannister, 309 S. Spring St., has refitted his store with new fixtures, preparatory for the holiday trade.

Alfred Bullion, San Francisco, representing different factory lines, has been spending a few days in this city, accompanied by his wife.

C. O. Goldman, 1908 S. Main St., was one of the participants in a big minstrel and vaudeville entertainment given last Friday evening, at the Mason Opera House.

H. T. Brown, traveling representative of Gilmore & Lee, recently returned from a northern trip and has again started out for a tour of the cities south of Los Angeles.

Among the out-of-town jewelers in Los Angeles, recently, were: H. Scudder, San Diego; Geo. L. Dietrich and B. Hartfield, Anaheim; Miss Kendall, of Kendall & Smith, Pasadena.

The Whitley Jewelry Co. has just delivered a large and elegant clock made to order for a prominent Los Angeles woman of wealth. The clock is entirely hand made and the case is made to harmonize with the interior of the house.

The Donovan & Seamans Co. has installed in its new store a department devoted entirely to ecclesiastical goods. It comprises a complete line of chalices, crucifixes, candlesticks, and in fact everything in this line used in the Roman Catholic and Episcopal churches. It is the only department of the kind in Los Angeles.

Wm. C. Libs, of Hambright & Walsh, participated in the great rabbit drive in Antelope Valley, 75 miles north of this city, a few days ago. This drive was necessitated by the overwhelming numbers of jack-rabbits which swarmed over that section, destroying the crops. Estimates of the number of jack-rabbits killed run from 5,000 to 10,000.

Three handsome trophies to be given as prizes for a 24-hour automobile race soon to be run here have been on exhibition the past week in a Spring St. window. The first comprises a large diamond-studded crescent, containing 23 stones, under which is suspended as a pendant a carefully executed design, in gold, of an automobile. The piece is valued at \$1,500. The second and third prizes are medals valued at \$100 and \$100, respectively. They were all furnished by E. B. Dukeman, room 403, O. T. Johnson building.

## San Francisco.

### TRADE CONDITIONS.

The rainy season has set in all along the Coast, and with this manifest arrival of Winter the usual demand for jewelry is becoming quite pronounced and retailers locally are unanimous in their declarations that business is considerably better than it has been for some time past. Dealers are finding the holiday demand setting in already in a small way, and during the past week many of them have been asked to set goods aside for Christmas delivery. If this continues and becomes general it may result in many dealers laying in their holiday stocks a little earlier than usual. The wholesale business is increasing rapidly in volume, and during the past week there has been a small army of out-of-town dealers in the city making purchases. The population of the State has grown so materially during the past year that there is every reason to suppose that trade will be heavier in most places than in past seasons. Business conditions in the country districts are fully normal again, and it is only in the large cities that any trace of the recent panic can be discerned.

Fred A. Smith, 1718 Devisadero St., has been making improvements in his store and is preparing for a good holiday trade.

J. B. Whitney & Co. have completed the installation of fixtures in their offices in the Kamm building, where they will make their permanent home.

Roy P. Mathews, of the material house of the Roy P. Mathews Co., will be married within a short time and will make an extended wedding tour.

R. Bujannoff, the manufacturing jeweler and silversmith, who for many years was located in the Lick building, with an entrance on Lick place, is back at the same old location again. Mr. Bujannoff is one of the pioneers in the jewelry business in San Francisco.

Among the out-of-town jewelers who have been in this city during the past week were: H. H. Wiendieck, Watsonville; G. C. Wilkins and P. H. Shuey, Red Bluff; H. O. Chute, Vallejo; C. L. Hall, Woodbridge; F. Stumm, Benicia; Jos. B. Williams, Susanville; J. J. Wilson, Dunsmuir; H. Wachhorst, Sacramento; Otto Poulson, Richmond; Mr. Wichman, Honolulu; Frank Golden, Reno, Nev., and Walter A. Lord, Goldfield, Nev.

The large jewelry stores on Van Ness Ave. have decided to remain in their present locations until after the commencement of the new year and then it is expected there will be a general exodus downtown on the part of those who have been able to secure suitable locations. There are some available stores along Market St. at the present time, but the high class retail business is to be done in the district centering on Grant Ave., and but few stores here are ready for tenants. Some of the large establishments announce that they would have moved had it been possible to become established in good shape before the rains set in, but that now they will wait for the rest of the retail trade.

## Pacific Coast Notes.

J. Rosenstein, Bisbee, Ariz., was one of those burned out during the recent big fire in that city.

C. E. Perham, San Pedro, Cal., has been succeeded in business by I. Kamstra, formerly of Safford, Ariz.

Curtis & Lederer had a formal opening of their new store in San Luis Obispo, Oct.

15. They bought most of their stock in Los Angeles.

A. M. Cross has just completed his new store at 207 Pine St., Long Beach, Cal. He moved into it last week.

E. H. Smith is now at his new location in the Jorn building, Orange, Cal., where he has three times the amount of floor space of his former store.

L. C. Koberg is finishing the decorating in his store at Healdsburg, Cal., and will occupy it this week. The store is 18 feet by 90 feet, and is in a reinforced concrete building, being practically fireproof. A special sale is being conducted at the old location in order to get rid of old stock.

R. H. Wilson, Ocean Park, Cal., has just installed a new set of show cases and wall cases in his store at 114 Pier Ave. The woodwork is of solid mahogany. Mr. Wilson recently engaged an expert, who will pay special attention to the mounting of gems found along the beaches in this vicinity.

## Minneapolis and St. Paul.

J. T. Ellingbo, Minneapolis, has the sympathy of his many friends owing to the recent death of his wife.

Nie Zellar, LeRoy, Minn., has sold his business, and is now taking a course in optometry, in Minneapolis.

T. V. Moreau, Inc., opticians, Minneapolis, is opening a store in St. Paul, in the Chamber of Commerce building, at 6th and Robert Sts.

White & MacNaught, formerly at 407 Nicollet Ave., Minneapolis, are now located at the new address, 506 Nicollet Ave., in the Andrus building.

E. A. Kirchner, of Kirchner & Renich, and S. H. Clausin, of S. H. Clausin & Co., Minneapolis, were recently members of the district court jury for two weeks.

The plate glass windows in the stores of S. Jacobs & Co., and of the R. G. Winter Jewelry Co., Minneapolis, were badly scratched by a diamond, last week, the marking being in the form of a square, of about 18 inches. The police think the object of the deed was robbery, and jewelers generally have been warned to be on their guard.

Among the out-of-town jewelers in the Twin Cities recently, were: Paul W. Berens, West Hope, N. Dak.; G. E. Halgren, Watertown, Minn.; J. W. Rhodes, Detroit, Minn.; Proctor & McIntyre, Valley City, N. Dak.; George H. Lang and wife, Mankato, Minn.; F. B. Logan, Royalton, Minn.; Mr. Fisher and Mr. Van Ness, of the C. B. Collins Co., Groton, S. Dak.; B. K. Nessfield, Northville, S. Dak.; L. J. Hunter, Princeton, Minn.; J. A. Anderson, Lambertton, Minn.; T. J. Thompson, Barron, Wis.

One of the manufacturing jewelry firms of Minneapolis is seeking an engraver and chaser who gave the name of Eugene alias Robert Renard. The firm advertised for a man and Renard answered from Jacksonville, Fla., and asked to have his railroad fare—\$35—advanced to him, which was done. He came as far as Chicago, and then wrote that he had encountered accidents and needed a little more money, and \$3.50 more was forwarded. He again

wrote saying that he had lost his ticket while on the way to the train, and wanted more assistance. The firm declined to give further aid and started the police after him on the ground of obtaining money by false pretenses. Renard is described as being five feet, eight inches tall, and smooth shaven. He wore a brown derby hat and a steel grey suit. He claims to be an all-around engraver and a French-Canadian by birth.

## Connecticut.

The American Silver Co., Bristol, is now running its factory on full time.

The E. Ingraham Co., Bristol, last week, began to operate its factory on a full time schedule.

The Waterbury Clock Co., Waterbury, is now operating its factory on a schedule of 12½ hours per day.

J. C. Tracy, Willimantic, Conn., who has been ill for a number of weeks, has recovered sufficiently to be able to be at his place of business again.

The gold and silver refining plant of Handy & Harman, Bridgeport, was damaged to the extent of \$300 by fire, Oct. 20.

Wilbur B. Hall, Meriden, last week sustained severe bruises and contusions in a runaway accident. None of the injuries is serious.

Charles J. Heinemann, in the employ of Factory "N," International Silver Co., Meriden, is Republican candidate for senator.

Thomas J. Kelley, at one time alderman and now Democratic candidate for representative, is an employe at factory "E," International Silver Co., Meriden.

George A. Hill, at one time in the employ of Factory "L," International Silver Co., Wallingford, died, last week, at his home, at that place, aged 25 years.

Julius Genel, New York, and Anna Zobruft, of Waterbury, were united in marriage in the city hall at New Haven, Oct. 20. The groom is a jeweler in the metropolis.

A handsome memorial to Samuel Dodd, Meriden, late president of the International Silver Co., is being erected in St. Andrew's Episcopal Church, at that place. Mr. Dodd was an officer of the parish for a number of years and always took a lively interest in ecclesiastical affairs.

The trustee's sale of the bankrupt stock of the Harvel Jewelry Co., which had stores at Mt. Vernon, Girard, Divernon, Raymond, Litchfield and Farmersville, Ill., is announced by John Ball, Farmersville, Ill., the trustee of the estate. A portion of the stock will be sold at Litchfield, Nov. 10, beginning at 11 A. M., and the balance of the stock at Mt. Vernon, Nov. 12, beginning at 11 A. M. The property now located at Litchfield is invoiced at \$34,492, and that at Mt. Vernon at \$8,953. A deposit of 20 per cent. of the bid by each purchaser will be required at the conclusion of the sale. Copies of the inventory are to be seen at the office of the Jewelers Board of Trade, New York, or printed catalogues and other information may be had from the trustee or his attorneys, Robert Matheny, Springfield, Ill., and L. V. Hill, Litchfield, in the same State.

# The COMB HOUSE

**W**E illustrate a few of our 2,500 new designs, which are made up in 14K., 10K., sterling and gold filled stock, for the enterprising jewelry trade, that are ready for immediate delivery. Our Fall line is now ready for your inspection.

We are also manufacturers of an exclusive line of REAL Tortoise Shell Hair Ornaments for the fine trade.

Selection packages cheerfully sent responsible jewelers

**Wagner Comb Manufact'r'g Co.**

Hartford Bldg.  
41 Union Sq., New York

## Canada Notes.

C. A. Welsman & Co., Toronto, Ont., are retiring from business.

L. Ripstein, Winnipeg, Man., has disposed of his business to Jacob Ripstein.

A. G. Carter, 524 Main St., Winnipeg, Man., is selling off his stock at auction.

Martin L. Miller, Dutton, Ont., has given a chattel mortgage for \$271 to P. W. Ellis & Co., Toronto, Ont.

The death of A. Hetherington, father of Arthur Hetherington, secretary of the Goldsmiths' Stock Co., Toronto, Ont., occurred in Toronto, on Wednesday, Oct. 20.

Out-of-town jewelers calling on the Toronto, Ont., trade, last week, included: Oliver Milburn, Peterborough, Ont.; E. W. Ross, North Bay, Ont., and Mr. Neal, with D. R. Dingwall, Ltd., Winnipeg, Man.

W. E. Coutts, head of the stationery department of Ryrie Bros., Toronto, Ont., was married Thursday, Oct. 22, to Miss Lottie Robertson, Toronto. On Wednesday evening previous, Mr. Coutts was entertained at dinner by a number of the members of the staff of Ryrie Bros. in honor of his approaching nuptials. Mr. and Mrs. Coutts have gone on a wedding trip to New York and the Eastern States.

Thomas J. Porte & Markle, Winnipeg, Man., have been appointed official time inspectors for the Grand Trunk Pacific Co., throughout Western Canada. Special telegraphic connection has been made from the observatory at McGill University, Montreal, to their place of business, giving them the correct time daily. Porte & Markle will appoint divisional inspectors at each divisional point on the line to inspect the timepieces of the men.

## Rochester.

M. B. Rosenthal, with Philip Present, left, recently, on his western trip.

H. H. Pulver, well known among the jewelry trade of Rochester, has opened a new store at 68 Clinton Ave. S. The store is tastefully decorated, and the arrangement of the fixtures and displays is very attractive. The show window is very attractive.

The Henry C. Wisner Co. secured some good advertising by taking advantage of the industrial exposition held here recently. In the first place, the concern advertised to give free to the first applicants, women, 250 seats at the windows in the building for viewing the parade. Then they had a series of 12 photographs taken of different sections of the procession. The series is very attractive and includes a photograph of a Wisner wagon all covered with flowers, with the name Wisner spelled out in large letters.

The first meeting of the season of the Rochester Credit Men's Association was held, last week, at the Chamber of Commerce rooms. The main business before the house was the report of delegates to the national convention at Denver. Ira D. Kingsbury gave the report, which was illustrated with stereopticon slides made by Mr. Kingsbury. Nominations of officers for the ensuing year were made as follows: Ira D. Kingsbury, president; W. J. Trimble, vice-president; Lee Richmond, treasurer. The election will be held at the annual meeting next month.

11 Maiden Lane, - NEW YORK  
131 Wabash Avenue, - CHICAGO

## Providence.

T. R. Kilkenny & Co., 109 Friendship St., are working three nights a week until 9 p. m.

Charles D. Cook, of the Cook, Dunbar, Smith Co., Inc., seamless wire, has returned from an extended trip among the firm's western trade.

Dutce Wilcox, of D. Wilcox & Co., was elected vice-president, and his son, Howard D. Wilcox, of the same concern, one of the directors of the Peoples Savings Bank, at the recent annual meeting.

Among the foreign importations received through the Providence Custom House the past week were the following: From Bremen, 5 packages of imitation precious stones, one package of jewelry and one package of china.

The E. F. Miller Co., formerly manufacturing jewelers of North Attleboro, which recently discontinued business at that place, is now installing machinery at 9 Calender St., Providence, for the purpose of carrying on a business of electro plating and coloring.

Major Howard D. Wilcox, Inspector of Rifle Practice of the Rhode Island National Guard, and Brig. Gen. Herbert S. Tanner, were guests at the complimentary supper given by the officers of the Second Regiment to the members of the rifle team of that regiment last Thursday evening at the State Armory.

George A. Forsyth, with the Thornton Bros. Co., has been elected unanimously Colonel of the First Regt. Infantry, Rhode Island National Guard. Colonel Forsyth has been a member of the State Militia for upward of 30 years, and was captain of one of the companies of the Rhode Island Volunteers in the Spanish-American War.

A large majority of the creditors of the Silverman Jewelry Co., of Pittsburg, Pa., which went into bankruptcy last week, are located in this city and the Attleboros. They are interested for about \$8,000 or \$9,000. This is one of the firms to which an extension had been granted and the local creditors are much put out at the outcome.

Among the jewelry buyers in town last week were the following: Miss M. Anderson, with John Wanamaker, Philadelphia; Miss Henrietta Graff, with Berg Bros., New York; R. Bolle, formerly with M. W. Carr, Cambridge, Mass., now of the Premier Novelty Co., Chicago; Miss R. S. Merebaum, with the Simpson-Crawford Co., New York, and J. A. Becker, of John G. Myers & Co., of Albany, N. Y.

Among those seated on the platform at the big Republican ratification meeting at Infantry Hall, on Thursday evening were the following connected with the manufacturing jewelry business: Henry Fletcher, Nathan B. Barton, Harry Cutler, F. A. Ballou, Fred D. Carr, George W. Gardiner, George H. Holmes, R. S. Hamilton, William H. Luther, Isaac B. Lawton, Henry G. Thresher and William H. Thurber.

Charles H. Ballou & Co., who started in business at 289 Thurbers Ave., as manufacturers of gold corrugated and plain beads and necklaces, about six weeks ago, have already been forced to more than double the capacity of their plant and have added a number of screw and drop presses during

the past week. Charles R. Ballou, the son of the senior member of the firm, has taken the road and has sent in some large orders.

Miss Mabel W. Luther has been holding an exhibition of enamels and jewelry at the Rhode Island School of Design that is very beautiful and complete. The articles are designed and made by Miss Luther, whose work is quite universally known. In the exhibition are some very beautiful designs in colored enamels set with semi-precious stones, exquisite necklaces, belt buckles, bracelets and other ornaments.

James G. Kilkenny made his maiden trip to New York, last week, for Henry Lederer & Bro. This makes the fifth member of the Kilkenny family to take the sample bag in the interests of a manufacturing jewelry concern from this city. The others, headed by the dean of the family, Thomas F. Kilkenny, manager for Capron & Co.; Thomas R. Kilkenny, of T. R. Kilkenny & Co.; William Kilkenny, for the United Wire & Supply Co., and Leo Kilkenny, for the Thomas W. Lind Co.

The corporation of Edwin Lowe & Co., 116 Chestnut St., resumed business Thursday after being closed for about 10 days, during the adjudication by the Superior Court of a portion of the estate of the late Edwin Lowe. The day before the court entered a decree authorizing the trustee to sell 452 shares of the stock of the company for \$3,000. The statement in the last issue of THE CIRCULAR-WEEKLY that the plant was reported to be for sale was misleading, as it was merely the block of stock, since sold, that was involved.

Henry Fletcher, treasurer of the Fletcher-Burrows Co., has been nominated for Mayor of this city on the Republican ticket in place of George W. Parks, who declined after receiving the nomination of the party. Mr. Parks was in New York when he heard that he had been nominated, and in his letter of declination he said: "Interests which have arisen since I left home have made it impossible for me to accept the nomination." Mr. Fletcher had been a nominee for Alderman, and one of the Councilmen was advanced to take his place, and Aldridge G. Pearce, superintendent of the F. T. Pearce Co., was nominated to fill the vacancy on the council.

## Boston.

Joseph Cowan is on a business trip through the middle west.

The Boston Jewelers' Club will hold its annual election of officers at the next meeting, which will take place early in November.

James S. Blake, of Kettell & Blake, who is one of the most prominent Masons in Boston and a Shriner of high rank, was installed, Oct. 21, as the eminent commander of Boston Commandery, K. T.

Alexander Marbodi, one of the workmen who was injured by the explosion and fire recently at the plant of the Ideal Comb Co. in Cambridge, died, last Wednesday, as the result of the severe burns sustained by him.

Harris & Lawton, Inc., of this city, to cut jewels and manufacture jewelry, have been incorporated with a capital of \$100,000. The officers are: President, Frederick M. Harris, 686 Blue Hill Ave., Dorchester;

treasurer, Charles O. Lawton, 226 Huntington Ave., Boston; clerk, Ernest J. Bailey, 34 Liberty St., Everett.

Frank W. B. Pratt's clock establishment on Franklin St. has been in the hands of a force of men for remodeling and re-decorating, greatly improving the interior. An efficient Tungsten electric lamp system of lighting has also been installed. Mr. Pratt's invitation to visit the renovated store bears a handsome steel engraving of his portrait, cabinet size.

The mystery surrounding the disappearance of Frank J. Burns, a jewelry salesman, last December, remains as deep as it was before the finding of a pile of bones in the woods four miles outside of Athol last week. After Medical Examiner James Oliver had examined the bones he declared they were those of a sheep. So the sensational stories with which the papers fairly "teemed" for a day or two proved to be without foundation.

E. A. Cowan & Co. are adding about 4,000 square feet to their establishment in the Jewelers building, and workmen are busy remodeling the adjoining premises, which give them a double frontage on Washington St. The present quarters will be used for the material and tool department, and the new portion for the general jewelry jobbing department.

The case of George M. Rogers, of the Rogers Silverware Co., whose prize puzzle and silverware swindle game got him into trouble with the Post-Office authorities, who charged him with using the mails with intent to defraud, was to have come up for trial, Oct. 21, but on the day previous he signified his willingness to plead guilty, and Judge Dodge imposed a fine of \$300. The other indictment against him was placed on file. The indictment against Eugene M. Richmond, who was implicated with Rogers, it was alleged, was "nol prossed."

It was reported, last week, that a suit will soon be filed in Middlesex County against Chief McLaughlin and Officer Pineo, of the Melrose police department, by S. Wepzler, a jewelry salesman, for alleged false arrest. Two weeks ago Pineo arrested Wepzler for peddling without a license. When the case came up in the Melrose court it was dismissed without a hearing. Wepzler is employed by J. S. Round & Co., and sells jewelry on credit. Many of the merchants in the small towns do not like the idea and appeal to the police, but as he carries no goods and simply takes orders he does not technically violate any law, it is asserted.

There has been a larger buying movement lately. Among those visiting the Boston jobbers during the week were: Frank P. Moore, Stonington, Me.; H. O. Spencer, Caribou; John W. Springall, Dexter; D. Lewis Allen, Pittsfield; H. F. Burgess, Fairfield; A. P. Trask, Bangor; R. C. Blethen, Dexter; Mr. Ross, Ross Bros., Calais; L. D. Clark, Springvale, Me.; William P. Robinson, Portsmouth, N. H.; Mr. Friswell, William Friswell estate, Norwich, Conn.; Mr. Fulcher, Perry & Fulcher, Great Barrington; D. J. Sullivan, New Bedford; S. K. Gurney, Brockton; William H. Pratt, for Harry Raynes, Lowell; E. S. Brooks, Palmer; C. E. Powers, Webster; M. F. Wood, Lowell; H. B. Locke, Amesbury; H. S. Hewett, Brockton, Mass.

### North Attleboro.

James P. Black is home from a two weeks' trip through Maine.

Charles E. Makinson, an old jewelry worker, died last week in his 62d year.

Louis W. Wise, of the T. I. Smith Co., is building two new houses on High St.

Mr. Angell is back from a western trip in the interests of the George L. Paine Co.

Joseph Coddling was in New York, last week, on business for Coddling & Heilborn Co.

Fred B. Brigham has returned from a trip in the interests of Cheever, Tweedy Co.

Bert Noble, who travels the western circuit for Sturtevant & Whiting, was at the factory last week.

The J. F. Sturdy Sons' Co. has installed an interior telephone service. The bracelet department of this company is now working overtime.

Frost Lord, Waltham, a former manufacturing jeweler of North Attleboro, was in town last Saturday. He had just returned from a visit to California.

Robert H. Haslam has been engaged to cover the western territory for the A. L. Lindroth Co., a new concern recently started in the company shops. The firm is working 12 hours daily.

Elton B. Fisher, on Thursday, established a new record at the golf links of the Country Club. He completed the 18 holes in the autumn handicap tournament in 79 strokes. This is the best score of the year.

The L. G. Young Co., Plainville, has been incorporated. The capital is \$10,000 and the directors are: James McCarthy, Woonsocket, president; Thomas E. McCaffery, Attleboro, vice-president, and L. G. Young, Plainville, secretary and treasurer. The concern recently started in business in a building of the Plainville Land Co., the space occupied being that formerly had by Barden & Hull before their removal to Attleboro. The president of the new company, Mr. McCarthy, is a wealthy dry goods merchant of Woonsocket. Mr. McCaffery is a prominent Attleboro business man. Mr. Young, who is manager of the business, is a skilled jeweler.

### Attleboro.

William H. Saart passed the week end on the Cape, fishing.

Col. Sidney O. Bigney presided at a Republican rally last week.

A. C. Becken, Chicago, visited Attleboro jewelers last Wednesday.

Ernest D. Gilmore and W. E. Coles are enjoying a vacation at Great Pond, Me.

Brush fires threatened the Regnell-Bigney Co. shop last week on two different occasions.

E. M. Bliss, of Bliss Bros. Co., has returned from a business trip in the interests of his concern.

Walter E. Hayward has given the contract for the erection of a fine residence on Hayward St.

The R. F. Simmons Co. and W. E. Richards & Co. bowling teams are still tied for first place in the Jewelers' League.

Miss Irene Cook, daughter of William A. Cook, of the Fontneau & Cook Co., was

married, Saturday afternoon, to Maurice L. Blair.

George J. Kelley was in an automobile collision last week, but fortunately escaped without injuries. Mr. Kelley's machine was badly wrecked. The accident happened at the corner of Union and Park Sts.

A certificate of incorporation under the laws of Massachusetts was filed last week by the Leach & Miller Co. The concern is capitalized for \$16,000; 160 common shares are issued, valued at \$100 each.

Several jewelers were honored at the annual election of officers by Ezekiel Bates Lodge of Masons. Harry D. Lincoln was chosen worshipful master; Elmer S. Smith, junior warden; Frank W. Weaver, treasurer, and Willard A. Enfield, trustee.

The effects of Menard, Charette & Menard were sold at a sheriff's sale last week to satisfy nine creditors. The machinery, dies and other effects were sold to various individuals. The whole amount realized was but a little over \$270. Nothing could be realized on a line of campaign material, the season being so far advanced.

The school committee is considering the advisability of changing the name of the Sanford St. school to the Charles E. Bliss school. It is thought that in this way the town could in a measure show its appreciation of the many years of faithful labor performed in the interests of Attleboro schools by the late Charles E. Bliss.

### Obituary Notes.

A dispatch from Portland, Ore., Oct. 21, stated that R. T. Butterworth, a jeweler of St. John, a suburb of that city, was shot dead Tuesday night by a highwayman, near his residence. The object of the crime was presumably to secure a \$350 diamond ring which Butterworth wore.

Major William Downey, one of the oldest residents of Honeoye Falls, N. Y., who died recently from a stroke of paralysis, was for many years in the jewelry business there. The deceased was a native of Ireland, having been born in Tyrone County in 1825, and came to America when 19 years of age. After going to various sections, he finally located in Rochester, and in 1852 went to Honeoye Falls, where he started in the jewelry business. He later went into the general merchandise business, and had also been in the produce line. Deceased was married in 1855, his wife dying in 1894. He was a veteran of the Civil War and prominent in Masonic circles.

John H. Rhoades, who was found dead in the lobby of the Arcade Hotel, East Norton St., Columbus, O., Oct. 16, has been identified as a former jeweler of Marion and Carey, of that State. Mr. Rhoades, who was about 60 years old, walked into the hotel early one morning and took a seat; when the porter later attempted to wake him, he was discovered dead in the chair. Heart disease was given as the cause. Rhoades had been engaged in the jewelry business a number of years. For a long time he was at Marion, but from there went to Bluffton, Nev., then to Carey, returning to Marion about 1897. He did a repair business and carried practically no stock. He had not been in business for the last five years or more.

The directors are: Edwin Leach, president; William E. Richards, treasurer, and Frank I. Babcock. The concern has been located on Union St. for some years and has heretofore been conducted as a firm.

### Newark.

Burstow & Kolmar, Columbia St., have had their safe inclosed and fitted with a new burglar alarm. This firm has been obliged to take on half a dozen hands in the past 10 days.

Traveling representatives of several Newark firms returned to town this week and advised against any further work on the road until after election. They assert that retailers will not open negotiations until the campaign uncertainty has been settled.

Joseph Beisler, who was accused of selling or concealing \$400 worth of materials from William L. Glorieux, 13 Railroad Ave., was arrested this week and paroled for a hearing. Beisler claims that he has a mortgage on the material which is missing.

Clinton F. Robinson, New England representative of the Schwarzkopf Mfg. Co., reported at the office of his firm this week after a trip in eastern Pennsylvania, where he has been for some time past. George S. Weiss, Chicago representative of the company, has written that orders are picking up in the western territory.

Irving J. Schwartz, of L. Barnett & Co., and Miss Huldah Lewengood, of this city, were married during the past week and are now on their wedding tour. Mr. Schwartz, who is a partner in the Barnett firm, is well known throughout trade circles in the east and congratulations have been coming into the company's office on Crawford St. for several days past. On the return of Mr. and Mrs. Schwartz they will be given a warm welcome.

### Washington, D. C.

Postmaster General Meyer last week issued a fraud order against the Globe Gem Co., and the Scott Collection Agency of Lonsdale, R. I. The Globe Gem Co. is charged with having advertised to give two heavy gold plated rings, set with pearls, etc., to persons selling a dozen boxes of its breath perfumes at 10 cents each. Postal inspectors who investigated the case reported that the rings were not as represented. When its agents delayed remittances the Globe Gem Co., operating as the Scott Collection Agency, undertook to make collections.

Major Sylvester, head of the Police Department here, has sent out a descriptive circular asking for the arrest of two employees of jewelry stores of this city, who are wanted to answer charges of grand larceny. The men's names are Leon Krooler, 25 years old, formerly employed by A. O. Hutterly, 723 7th St., N. W., who disappeared with two watches belonging to Mr. Hutterly and Harry Klammovitz, also known as Klam, Davis, and under other names, 28 years old, against whom a charge is lodged by Louis Cohen, 613 Seventh St., N. W., who claims that he took a number of watches and several articles of jewelry

## Philadelphia.

R. W. Ewing has sold his jewelry store in West Grove and has gone to Texas to locate.

Louis Stern, of L. Stern & Co., who makes his headquarters in this city, was at the factory in Providence all of last week, looking after work for the Christmas trade.

Louis Sickles, of M. Sickles & Sons, spent a few days last week, in New York on business. John Bair, of the jewelry factory of the firm, was married last Wednesday.

An involuntary bankruptcy petition was filed Monday against E. E. Sanborn & Son, 1942 Callowhill St. It is reported that Mr. Sanborn has not been at his office for several weeks.

I. A. Deisher, a prominent retail jeweler of Reading, Pa., was one of the delegates, last week, to the Congress of the Anti-Vaccination League held in this city and attended by prominent anti-vaccinationists from all parts of the country.

Louis Spoerhase, 1078 Lancaster Ave., is making extensive alterations to his store, especially with the view of adding increased space in the rear. Mr. Spoerhase owns the property and yearly has improved it so that at present it is one of the handsomest store properties in West Philadelphia.

William C. Green, of Robert C. Green's Son, Pottsville, was in the city, Saturday to Monday, coming down, as is his yearly custom, to witness the Penn.-Indian football game. Mr. Green was the guest of L. P. White, whom he accompanied to Franklin Field in the latter's automobile.

The will of the late Charles E. Lewis, 4600 Frankford St., Frankford, who was perhaps the best-known retailer of that section of the city, was admitted to probate, last week, by Register of Wills Irwin. He apportions his estate solely among members of his family. The business is being continued by the family for the present at the old stand.

As the special guests of L. H. Eisemlohr, a member of the Jewelers' Club, 25 of the most prominent and influential members of the club went with him, Saturday, at noon, to the Eagle Club, of Charlestown, Md., in which Mr. Eisemlohr is prominent, to remain over until Sunday and to fill in the time gunning, fishing and having a good time generally.

Bonwit, Teller & Co., a new concern, will operate a large store at the southwest corner of 13th and Chestnut Sts., in this city, before the holidays. The firm will carry merchandise for retail such as is usually carried by a department store, but will also carry jewelry, especially gold and silver buckles, pins, brooches, cuff buttons, silver mesh bags, etc.

Among the visitors to this city's trade, last week, were the following: A. T. Johnson, Smyrna, Del.; H. B. Shanely, Quakertown, Pa.; J. A. Deisher, Reading, Pa., and an officer of the Pennsylvania Retail Jewelers' Association; John MacPherson, Mauch Chunk; Roland Oliver, accompanied by Mrs. Oliver, of Burlington, N. J.; J. W. Parrish, Newark, Del.; R. W. Quicksall, Mt. Holly, N. J.

Poland Bros., retail jewelers, 4347 Main St., Manayunk, this city, are to be incor-

porated as retail jewelers, Nov. 16, under the name of Poland Bros., Inc. The firm is made up of Abraham L., Meyer D. and Fannie Poland. Formal application for the granting of articles of incorporation was made last week. Poland Bros. have long been established in business in Manayunk, where they have a large and attractive store.

The Philadelphia Jewelers' Club will have a special wire in its club headquarters, 1228 Chestnut St., election night, next Tuesday. Returns will be announced as soon as received. Throughout the day and election night the club house will be open to its members and their friends, for whom special entertainment and refreshments will be provided. The club expects the trade to take full advantage of its hospitality on election night.

A. Austin Wilmot, aged 33 years, formerly employed as a salesman for Klopfer Bros., proprietors of the J. Castleberg Jewelry Co., instalment dealers, in the Mint Arcade building, was sentenced, last week, to one year in the Eastern Penitentiary for the embezzlement of about \$500 worth of diamonds and jewelry from his employers. Albert Aarons, of the firm of Wessles & Aarons represented Klopfer Bros. The prosecution was made largely because of the desire of the jewelers to make of Wilmot's offense an object-lesson to other young men entering into the employ of jewelers who do likewise.

H. J. Limeburner, president of the Business Men's Association of Pennsylvania, and a prominent optician, declares that 271 candidates for the State Legislature, have been pledged to repeal the Mercantile Tax Law and that more than 40,000 merchants have indorsed the struggle for the law's repeal. Nearly all retail jewelers, both large and small, have always complained of the law collecting one mill on the dollar on the amount of business done by the merchant. It is not entirely because of the tax, but because of the publicity it gives the affairs of the merchant that it is objected to. The Bailey, Banks & Biddle Co. vainly tested the constitutionality of the law.

The huge clock on the City Hall tower, the largest in America and over 500 feet above the street surface, got a cranky spell on it again last week and stopped. The damage was soon repaired, but it afforded opportunity for wits to make funny comments and for newspapers to give the mammoth clock a scolding for throwing people off in their schedules. Joseph Gaskill and E. Hammett now have full charge of the great timepiece. A little disturbance in the diaphragm of the master appliances is attributed to be the cause of the clock's stoppage. However, in justice to the makers, it may be said that the clock is an admirable timekeeper, and only rarely goes wrong.

Breitinger & Sons, a new corporation, announce the purchase of the old established business conducted for 31 years under the name of Breitinger & Kunz, wholesale and retail dealers in watches, clocks and jewelry at 37 and 39 N. 9th St. Following the death of Mrs. R. Kunz, recently, the old concern was liquidated and G. C. Kunz, her son, sold out the Kunz interests in the concern. Shortly before Mrs. Kunz's death she sold out all her stock in the American Cuckoo Clock Co., of which the

old members of the firm of Breitinger & Kunz were the founders, and young Mr. Kunz has accordingly no longer any connection with or interest in either concern.

John Van Dusen, of Van Dusen & Stokes Co., has returned from a five months' trip abroad, in the course of which he circled the world. This was his annual visit to the markets of the Old World in search of rare gems, unique jewelry, valuable antiques and Oriental curios, of which his firm makes a specialty. He journeyed west by way of San Francisco, visiting Honolulu, and spent a month in Japan, where he made extensive purchases of the latest patterns in Japanese goods, and in China, where he made large purchases of jade. He next visited India, and while in Ceylon made purchases of sapphires, rubies and cat's-eyes, one of the latter being a beautiful stone weighing 13 $\frac{3}{4}$  carats and of the finest grade. Mr. Van Dusen states that the pearl fisheries at Ceylon, which have been controlled by the English Government and worked by them for a long period, were sold two years ago to a syndicate, which has not allowed any fishing for pearls since that time, and it is still uncertain when fishing will be resumed, as the purpose of the suspension is to build up the pearl fisheries. He next visited Egypt, Constantinople, Smyrna, Athens and finally Italy, and at Naples invested largely in coral.

## Harrisburg, Pa.

Miss Theresa Lowengard, daughter of the late pawnbroker, was wedded, Oct. 19, to S. B. Simon, Newark, N. J. They took a southern bridal trip.

Charles Blenheim, an alleged traveling salesman, who about one month ago swindled a number of York merchants out of small sums by means of worthless checks, was sentenced, last week, to serve nine months in jail.

A party of Japanese merchants, who desired to secure a license to open a jewelry, novelty and bric-à-brac store in York, were told by the authorities that it would cost them \$100 per month. They will not open the store in York, and the home merchants are vastly pleased in consequence.

Merchants along Market and 3d Sts., including a number of jewelers, have signified their willingness to accept the terms of the Harrisburg Light, Heat & Power Co. for a continuous system of outdoor electric lighting along their business places, which will illuminate these two thoroughfares quite brilliantly.

Seven years in the Eastern Penitentiary was the sentence imposed on Frank McCarthy, who pleaded guilty, last week, to the charge of robbing May's jewelry store in York. Harry Mann was found guilty on a similar charge and sentenced to four years in the penitentiary, while David Seager was found guilty of receiving stolen goods and sentenced to three years in the penitentiary. McCarthy turned state's evidence, and testified against Mann and Seager, also charged with the crime. Charles Beaver, who, it is alleged helped commit the robbery, is at present a fugitive, having jumped his bail.

## News Gleanings.

Albert L. Walker, Faulkton, S. Dak., returned from an eastern trip last week.

G. N. Hadley, formerly of Frederick, Okla., has moved his entire stock to Grandfield, Okla.

A brick building, 25x50 feet, is being erected at Pullman, Wash., to be occupied by L. B. Miller, a jeweler.

Salomon Spitz, Sante Fe, N. Mex., has just returned from an extended trip to the buying centers in the east.

J. W. Mathis, who succeeds F. B. Sweet & Co., Marshall, Minn., has renovated his store and put in a new stock.

C. D. Trott, Duluth, Minn., has moved from 5 W. Superior St. to 20 E. Superior St., where he has more commodious quarters.

Herbert O. Hanson, who has been engaged in the jewelry business at Superior, Wis., expects to open a store in Spokane, Wash.

The store of Ben. F. Lavalley, Reynolds, N. Dak., was entered by burglars recently. Jewelry worth \$1,500 and \$70 in cash were taken.

Thos. Morris, Crookston, Minn., has moved into his new building on 2d St. The building has an enameled white glazed brick front.

Three men were arrested at Sheridan, Wyo., recently, suspected of being the men who robbed the store of F. W. Stein at Miles City, Mont.

C. G. Swanson, Parker, S. Dak., has sold a half interest in his jewelry business to Wm. Marxen. The firm is now known as Swanson & Marxen.

M. Glavins & Co., jobbers in plated jewelry and novelties, have moved from 316 Josephine St., to more comfortable quarters at 508 Nassau block, Denver, Colo.

J. E. Geiwitz, La Crosse, Wis., has moved to the opposite side of the Hoeschler store. In his new quarters he has additional space and better accommodations for his stock.

A dispatch from Barboursville, Ky., last week, stated that the fire which destroyed a complete block in that town Oct. 14 had caused damage to the amount of \$500 to the Shannon Jewelry Store.

As the changes in the First National Bank block of Rochester, Minn., will not be made until next Spring, J. B. Bickle, of that place, will remain in his present location during the Winter.

L. E. Hubbard, Park City, Utah, and W. T. Denn & Co., Nephi, Utah, have formed a co-partnership under the firm name of the Hubbard-Denn Co., to open a jewelry store at 59 E. 3d South St., Salt Lake City, Utah.

Louis Hunziker, Pendleton, Ore., vigorously denies a previously published report that he disposed of his business at that place. Mr. Hunziker is actively engaged in business at Pendleton at the present time and has no intention of selling out.

After breaking the show window in the store of E. M. Frost, 201 E. Fayette St., Syracuse, N. Y., Albert Collins, a negro, grabbed a quantity of jewelry, but was captured before he could escape. The man pleaded guilty later and was sentenced to 10 months in the penitentiary.

The John J. Lange Jewelry Co., Racine, Wis., has moved into its newly furnished store at 507 Sixth St. Mr. Lange started in business at that place 15 years ago, on State St., where he had a small store. Three years afterward he moved to larger quarters in Sixth St., where he remained for 12 years.

Capt. E. R. Cook, of Cook & Jaques, a well known Trenton, N. J., jeweler, celebrated his 77th birthday, Wednesday last, and the *Trenton Gazette* took this occasion to publish a long sketch of Capt. Cook's career, together with a half-tone portrait of the jeweler.

Charles W. Wilcox, Milford, Mass., Oct. 20, celebrated the 42d anniversary of the founding of the business which he now conducts at 138 Main St., that city, and the occasion was the subject of many congratulatory messages to him and a note in the local paper giving a sketch of his career.

Ralph Tobin, of the firm of Tobin & Canham, Springfield, Ill., was married Oct. 22 to Miss Ellen Jones, of Rochester, N. Y. Rev. T. F. Hartment, of the First M. E. Church, of that city, officiated. After a wedding trip in the west, Mr. and Mrs. Tobin will make their home at 702 S. Glenwood Ave., Springfield, Ill.

It is reported that J. D. Croom, Charleston, S. C., formerly of Macon, Ga., is in bankruptcy. Mr. Croom, prior to going to Macon, was at Fort Valley. He carried a rather cheap stock, but a large one, and was well regarded in the jewelry markets of Chicago and New York, where his principal creditors have been in the past.

Burglars, on the evening of Oct. 19, broke into the jewelry store of Robinson & Son, Springfield, Mass., and stole about \$380 worth of stock. Entrance was gained through a rear window which had been opened by means of a jimmy. Among the plunder are 14 fountain pens, seven gold ring mountings, several belt buckles, etc.

C. H. Hooten, Tonopah, Nev., is exhibiting a large emerald, which he claims to have found in Death Valley. He also has some smaller uncut emeralds which he says he found in the valley, but he refuses to state just where they were discovered. George F. Blakeslee, a Tonopah jeweler, has examined the stones and pronounces them excellent specimens.

A woman who is said to be a physician, and who gave the name of Miss C. L. Silliman of New York, was arrested Thursday night in Washington, D. C., charged with stealing souvenir spoons. After she was taken into custody the fact was brought out that a number of jewelry and bric-a-brac stores had made complaints that the woman had jewelry and other articles sent to hotels where she could not be found. The police believe that the prisoner is slightly deranged and decided to keep her under observation for several days.

Judge Kirby recently handed down a decision in an interesting injunction suit brought by Fred E. Stevens against County Clerk Gabhardt, which involved the scope of a pawnbroker's license. Stevens, who conducts a jewelry and pawnbroker's shop on 6th St., insisted that his license permitted him to sell pistols and firearms, whereas the county clerk insisted that he should pay \$100 for a license to sell these articles.

Judge Kirby decided that the pawnbroker's license permitted him to handle such firearms as regularly came to him in the course of his business, and that he did not need an extra license to do so.

A. Thoma & Sons, Piqua, O., will celebrate the 70th anniversary of the founding of this firm to-day, to-morrow and Friday by a holiday opening and reception at their store. The event, which is one well worthy of commemoration, has excited no little interest at Piqua and the members of the firm are already in receipt of many messages of felicitation and congratulation. The store has been especially decorated for the reception of customers and souvenirs will be given during the three days. Altogether, it will be one of the most notable occasions in the history of the firm since the business was established in 1838.

The corporate name of F. J. Day & Co., Duluth, Minn., has been changed to Bagley & Co. There has been no change made in the policy or personnel of the company. The president and treasurer is Cassius H. Bagley; vice-president, Mrs. F. D. Day; secretary, George C. Spaulding. C. H. Bagley has been associated with the concern for 18 years and was admitted to active partnership in 1894, when the firm name became F. D. Day & Co. Mr. Bagley has been managing head of the firm for two years prior to and ever since the demise of Mr. Day, in 1890. The establishment at 315 W. Superior St. has been undergoing alterations which necessitated a temporary removal, but the concern is now reinstated in the old quarters. The improvements which have been made make the store one of the most attractive in the northwest.

### Recent Decisions by General Appraisers on Jewelry and Kindred Lines.

Decisions of the Board of United States General Appraisers, New York, in cases involving duties on jewelry and kindred lines, have been announced in the last week as follows:

**GOLDSTONES.**—Protests of Albert Lorsch & Co. (New York). Opinion by Sharretts, G. A. Protests sustained as to goldstones. G. A. 6089 (T. D. 26555) followed.

**HAT PINS.**—Protest of Mills & Gibb (New York). Hat pins were held dutiable as manufactures of the component of chief value, as claimed by the importers. T. D. 28391 followed.

**TOY NECKLACES.**—Protests of Henry Buss & Co. *et al.* (New York). Protests sustained as to toy necklaces. G. A. 6658 (T. D. 28391) followed.

**JEWELRY—ORNAMENTS—TOYS.**—Protest of Geo. Borgfeldt & Co. (Baltimore), protest of John D. Gluck & Son, protests of M. Goldberg *et al.*, protests, etc., of Isaacs, Vought & Co., protest of H. Nordlinger's Sons, protests, etc., of Albert Lorsch & Co., and protests, etc., of Strauss Bros. & Co. (New York). These protests related to various articles, such as pins, ornaments, necklaces, fan chains, etc., most of which were classified as jewelry and which the importers contended were dutiable as toys, imitation precious stones, precious stones, or according to the component material of chief value. These contentions were sustained as to various items in accordance with repeated decisions of the Board.

[IN WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN THE UNITED STATES PATENTS THAT HAVE EXPIRED AND THE REGISTERED TRADE-MARKS.]

UNITED STATES PATENTS.

ISSUE OF OCT 20, 1908

901,333. FINGER RING. JOHN E. FITZGERALD, Providence, R. I. Filed May 2, 1908. Serial No. 430,573.

In a finger ring, the combination of a box or head; a signet plate having a central post with a ball at the extremity of said post; and two resilient locking bars extending in contact and parallel with each other, having central semi-circular locking seats, respectively, which register with each other, through which registering locking seats said ball is movable by pressure applied to the signet plate to confine said signet plate in a position flush with the outer rim of said box or head.

901,462. WATCHMAN'S TIME-REGISTER. ABRAHAM A. NEWMAN, Chicago. Filed Dec. 14, 1907. Serial No. 406,423.

In a time-register, the combination of an engaging member having angular peripheral projections, adapted to be rotated by a clock-driven

arbor, a record dial having a central aperture provided with angular indentations corresponding in size and contour to the angular projections on the said engaging member, and means for securing the said dial in position on the engaging member.

901,487. ROLLER FOR WATCHES. JOSEPH SCHOOP, Springfield, Wis. Filed Aug. 14, 1907. Serial No. 388,480.

A roller having a circular groove in its face, a

transverse jewel hole extending into a part of said groove, combined with a ring adapted to seat in

said groove, and provided with means to secure a jewel in the jewel hole.

901,737. ALARM-CLOCK. WILSON E. PORTER, New Haven, Conn., assignor to the New Haven Clock Co., New Haven, Conn. Filed June 8, 1908. Serial No. 437,312.

In an alarm-clock, the combination with a 12-hour time-dial which is utilized for setting the alarm, of an alarm-hand arranged concentrically

with the said 12-hour time-dial, means located at one side of the center of the said dial and operated by the time mechanism of the clock for releasing the alarm-mechanism of the clock once in 24 hours, and an alarm-setting mechanism also located at one side of the center of the dial and geared to the said alarm-hand.

901,822. ATTACHMENT FOR TIMEPIECES. FREDERICK PAQUETTE, Toledo, O., assignor of one-half to Fred Kuehn, Toledo, O. Filed Oct. 31, 1907. Serial No. 400,117.

An indicating attachment for watches and clocks comprising a plate having apertured lugs for the

reception of the hour hand thereof, set screws operating through said lugs to secure said plates, a curved band having spaced pointers, and radial arms extending between said plate and the ends of said band.

DESIGNS.

39,622. EMBLEM. LEONARD JAMES FOX, Cincinnati, O. Filed July 16, 1908. Serial No. 443,943. Term of patent 14 years.

39,623. FINGER RING OR SIMILAR ARTICLE. JOHN ANTHONY DE LUISI, Cincinnati, O., assignor to himself and Merrick Linley Bates, Cincinnati, O. Filed July 20, 1908. Serial No. 444,549. Term of patent 14 years.

39,624. KNIFE, SPOON OR SIMILAR ARTICLE. GUSTAVE STROHAKER, Wallingford, Conn., assignor to the International Silver

Co., Meriden, Conn. Filed June 18, 1908. Serial No. 439,258. Term of patent 7 years.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."

PUBLISHED OCT. 20, 1908.

Ser. No. 30,436. (CLASS 27. HOROLOGICAL INSTRUMENTS.) J. J. ELLIOTT & SONS, LTD., Clerkenwell, England. Filed Oct. 5, 1907.

Particular description of goods.—Clocks and watches.

Ser. No. 36,316. (CLASS 27. HOROLOGICAL INSTRUMENTS.) SPROHNLE & Co., Chicago. Filed July 24, 1908.

TRIBUNE

Particular description of goods.—Watches.

70,931. WATCHES, WATCH CASES AND WATCH MOVEMENTS. AMERICAN-SWISS WATCH Co., New York.

Filed July 2, 1908. Serial No. 35,923. Published Aug. 18, 1908.

70,993. WATCHMAKERS' TOOLS. KENDRICK & DAVIS, Lebanon, N. H.

Filed June 17, 1908. Serial No. 35,438. Published Aug. 18, 1908.

BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS, 1907, FROM *The Illustrated Official Journal*.)

ISSUE OF OCT. 6, 1908.

13,900. PENS. E. HAHN and A. EBERSTEIN, Berlin. June 15.

A fountain-pen 2 is provided with a cap 1 having a distinctively colored end 4, so that the position of the nib can be recognized when the holder is closed. The end 4 may be interchangeable, when it can be varied according to the color of the ink

employed. If the pen is provided with a nib which is withdrawn into the holder when not in use, the end 4 carries a plug 5 to close the mouth of the sleeve 6, and a pin 7 to prevent the displacement of the pen handle 8.

14,005. STUDS AND SOLITAIRES. T. MORTON, Birmingham. June 18.

An improvement in two-part studs of the kind described in Specification No. 14,215, A.D. 1906, has reference to the spring clip in the base which holds the end of the central peg. The spring 7

# "HULL"

is the "Sterling" Mark for  
**UMBRELLAS**

## Why It Will Pay You to Put In a Line of "Hull" Umbrellas:

**First**—A nice assortment of "HULL" Detachable and Interchangeable Handle Umbrellas will not require a large investment but will brighten up your Christmas stock and likewise readily sell at a handsome profit.

**Second**—"HULL" handles can be shown in an exceedingly small space and the bases laid away in a drawer to be fitted to the handles when the customer calls.

**Third**—It is the foremost and only practical detachable and interchangeable umbrella on the market.

**Fourth**—It is stronger than any other umbrella, either regular or detachable.

**Fifth**—It is the outcome of our best thought, the best workmanship and the best material that money can buy, and you will never have to apologize for a dollar's worth of these goods sold over your counter.

Write us and we will send you a device which shows up the handles just as though you were looking at the real article.

is of wire, and is of circular form with the ends bent inwards to form loops 10. The loops rest against the conical portion 12 of the shank, so as

to resist an upward pull. According to the Provisional Specification, this conical support may be a separate piece.

**14,274. TIME-RECORDERS FOR WORKMEN, ETC.** F. M. RUSSELL and A. J. JUNG, Willesden, London. June 20.

In order to ensure the accurate operation of the hour type disk from the minute disk, the pawl A engaging the ratchet-wheel attached to the former is spring-pressed and pivoted to the arm B, which

engages a snail cam D which may be attached to the minute-disk, the pawl during the complete movement being in contact with an adjustable stop E. A spring detent C prevents backward motion.

Complete specifications accepted Sept. 30, 1908. 1907.

- 35,201. MATCH-HOLDER.** EDWIN CALDWELL, New York.

**Lancaster, Pa.**

H. H. Greiner, South Bethlehem, visited Lancaster, last week, on business.

W. J. O'Brien, with J. R. Wood & Sons, New York, visited the trade here last week.

Joseph Levin, New York, has taken a position with Marcus Edelstein as jeweler. Lewis G. Snell, late of Butler, has gone to Ashland, Pa., to take a position as jeweler.

A. G. McLaughlin has gone to Reading to take a position as engraver with the Evans' Jewelry Store.

The Lancaster Clock & Watch Repairing Co. has removed its business to the corner of W. King and Mulberry Sts.

Dr. H. Holmes Boyd, optician, returned home, last week, from a successful hunting trip in central Pennsylvania.

Lewis Moulton, Columbia, who went to Denver, Colo., for his health, died there Oct. 19, from pulmonary troubles.

Miron W. Thrash, Attica, Ind., has entered the Ezra F. Bowman Technical School as a student in watchmaking.

Andrew J. Levergood has gone to Cardiff, Wales, his birthplace, on a visit, it being his first visit since he left it, a child of seven years.

G. Edward Fleischer, with Ezra F. Bowman's Sons, has returned from a two weeks' vacation trip to Philadelphia, Atlantic City and Merchantville, N. J.

A handsome, large silver, gold-lined loving cup, presented, Oct. 23, by the Boys' High School to the retiring principal, Prof. Kraybill, was furnished by Aug. Rhoads.

A. H. Rosenstein, president of the Lancaster Silver Plate Co., is off on a trip to Philadelphia and New York. Joseph Harman, foreman of the works, is also visiting New York.

Dade Fisher Grove, optician for Louis Weber & Son, was married, Oct. 21, in Columbia to Miss Blanche Elizabeth Graybill, of Columbia. The happy pair are spending their honeymoon on a trip to the New England States.

Miss Esther Shaub, a clerk for the H. S. Meiskey Co., while returning home with a lady friend one evening, last week, was assaulted by two roughs, who threw pepper into their eyes and then fled. No reason for the act can be ascribed.

The jewelry stores of Lancaster were closed Saturday evening, Oct. 24, along with all other business places, on account of the big Republican demonstration. It was a bad night to close, though, as Saturday night is the most important business period of the week for the jewelry trade.

John B. Roth, Jr., has just finished a number of handsome gold badges for the local theatrical association. Mr. Roth was recently complimented, in his rôle as a musician, by being requested to prepare the musical programme for the reception to be given the Pennsylvania German Society at its approaching meeting in Lancaster.

**Handsome Cup Made for Winner of Auto Races in Philadelphia During Founders' Week.**

WHAT is generally regarded as being one of the handsomest and most expensive cups ever presented as a trophy in an automobile race, was recently designed and made by the Bailey, Banks & Biddle Co., of Philadelphia, Pa., and is now in the concern's factory to have placed upon it an etching of the winning car and the name of the chauffeur who directed the car about sharp turns, up and down grades, over a 200-mile course to victory.

The cup stands three feet high and has a width from handle to handle of two feet. It is of sterling silver with a weight of

THE "FOUNDERS' WEEK" AUTOMOBILE TROPHY.

nearly 500 ounces, and cost \$2,000. It has only two handles, each of which is surmounted with miniature automobile wheels in silver, the hand modeling of the wheels and the cup handles having been done perfectly.

Just above the ebony base of the cup is a large enameled seal in blue and gold of the Quaker City Motor Club, the donors of the cup. On the opposite side is the city flag likewise enameled in blue and gold. The cup is surmounted by a dome-like structure in miniature imitation of the City Hall, and with a silver figure of William Penn above it.

The chasing and etching and engraving of the cup are regarded as displaying the best talents of the most skilled workmen of the country. The firm manifested considerable pride in its achievement and has received the warm congratulations of others in the trade. The cup was displayed in the firm's Chestnut St. show windows.

G. W. Dillon, Manly, Ia., has sold out to J. W. Hurd, Hanlontown, Ia.

# Now It's The Lord Elgin

The demand to-day is for thin watches.

The public have been waiting for a thin Elgin Watch—now it's here—the

## LORD ELGIN

The  
Thinnest  
Watch  
Made  
in  
America  
with  
Enamel Dial

the thinnest watch made in America with enamel dial.

Like all Elgin Watches—it was not put on the market until worthy to carry with it the Elgin reputation for reliability.

Every Lord Elgin is cased at the factory and timed in the case—the most accurate thin watch in America.

Four grades—7, 15, 17, and 17 Jewels adjusted. 18K and 14K solid gold cases, also 25 year filled cases.

Furnished with metal dials, plain or engraved, gilt or silver.

Prices furnished on application by your jobber, or write the Company for only authorized price list.

ELGIN NATIONAL WATCH COMPANY

Factories, Elgin, Ill., U. S. A.

New York Office, 15 Maiden Lane

General Offices, 131 Wabash Ave., Chicago

## Career of the Celebrated Austrian Horologist, Joseph Thaddeus Winnerl

THE celebrated horologist, Joseph Thaddeus Winnerl, was born Jan. 25, 1799, at Murstyre, Austria. Where he served his apprenticeship is not recorded, but while still in his youth he left his native land to visit the other countries in which horology was practised as an art. He was located for a time in Altona, where he found employment under Kessel and subsequently visited Copenhagen, where he was employed by the famous Jürgensen, by whom—a rare occurrence—he was complimented on his skill.

In 1829 he came to Paris and worked with some of the most famous horologists, and about 1832 established his own business in the Passage Lorette as a maker of marine chronometers.

The jury of awards, at the exposition of productions of French industry, held in 1839, accorded him a gold medal, a formal re-acknowledgment of which he received from the jury of the exposition of 1844, at the close of which he was made a chevalier of the Legion of Honor.

In the meantime, in 1843, he had submitted to the Society of Encouragement, a modified anchor escapement for clocks, which was made the subject of a special report by Barcn Seguiet; the same year he laid before the same society a description of seconds counters of his invention.

The grand prize was accorded him by the jury of awards at the Universal Exposition of 1855, at the close of which he was elevated to the position of an officer of the Legion of Honor.

His appointment, as horologist to the Observatory of Paris, followed in 1856, and during the next year he read a paper on clocks of precision to the Horological Society of Paris, and a paper by him on "Rules for the Construction of the Duplex Escapement" was presented before the same society.

In 1859 he was appointed Municipal Councillor of the City of Paris, an office he held until he retired from business in 1870.

Recognizing the marked ability of Mr. Winnerl, the director of the naval depot, in 1873, suggested to the minister of marine his selection as horological expert to the navy, and he was appointed by ministerial

decree, dated Nov. 17 of that year, to this important office, which he retained until his decease.

In 1876 he presented before the Academy of Sciences a compensation balance of his invention, which embodied the faculty of reducing the middle temperature error in compensation.

Some years after he relinquished his business Mr. Winnerl removed to Audrey,

JOSEPH THADDEUS WINNERL.

a small town in the department of Seine and Oise, where his death occurred on the 25th of January, 1886.

The creations of his skill and genius included about 500 marine chronometers, as well as pocket chronometers, seconds counters and various astronomical clocks among the latter two timepieces made for the Observatory of Paris, a compensating clock of the Harrison system, of steel and brass, with the modified Thomas Reide escapement, two clocks similar to the preceding for the naval depot, in one of which the brass rods of the pendulum were replaced by aluminum rods.

To this list must also be added a number of regulators, of standing clocks (half seconds) and numerous watches, made by him for lovers of the finest horological work.

All his productions, concludes A. L. Berthoud in *L'Horloger*, were characterized by great precision of execution, and they revealed a fine taste in their construction, reminiscent of the work of Henri Motel.

### Watch Jeweling.

By H. REINECKE.

ONE branch of watch repairing which has been very much developed in recent years is the examination, replacing and selection of hole jewels and the correcting and replacing of pallet stones in lever escapements.

The manufacture and setting of jewels has been and is even now a profession by itself, which needs a good deal of instruction, knowledge and experience. Of late years, however, the better class of watch repairers has acquired a good deal of skill in these branches of their profession, the necessity for which has manifested itself in the very extended use of jewels in all grades of watches.

The use of hole jewels is of a different complexion and has been so in years past, both as to the mode of setting and the selection of their material. The English medium grade of hole jewels had their distinguishing features by being set mostly in full plates and being of large size, which the price of the material allowed. This material was principally chrysolite, a stone very hard and tough, allowing the application of ordinary tools.

The Swiss, on the other hand, set their jewels in bars, which were mostly garnets, a stone more brittle and requiring special tools for setting, and needing more moderate proportions on account of smaller amount of room.

For the better class of watches rubies or sapphires were used. Sapphires, when of the best quality, stand at the head of the corundum class, and are much preferred for watch jewels on account of their uniform hardness.

The use of both of these gems requires great knowledge and experience. At first the ruby was extensively used in high-grade watches. But the better knowledge regarding this stone caused it largely to be superseded by the sapphire. The defects of the former are its varying hardness and its chemical composition. The latter indicate the presence of oxide of iron and other mineral substances. These chemical impurities cause the oil that is used with the ruby-jeweled watches to deteriorate rapidly, more particularly when used in connection with steel; the latter, together with ruby,

# WALTHAM

## SILVER FINISH RAILROAD DIALS

Special attention is called to the new Silver Finish Metal Railroad Dials which are now supplied on the following movements at a slight extra charge:

**18 size and 16 size Vanguard**  
**18 size and 16 size Crescent St.**  
**No. 845**  
**16 size Riverside**  
**No. 645**

The dull white silver surface, with the bold figures and heavy marks render these dials unusually legible. Practical trials have clearly demonstrated that for the exacting requirements of railroad service they are much superior to enamel dials.

### WALTHAM WATCH COMPANY

WALTHAM, MASS.

loses the polish, which fact has caused duplex watches with steel escape wheels to be discarded. Highly colored lever pallets of this jewel are often pitted on their acting surfaces, probably on account of the excess of the coloring substances contained in these stones.

The sapphire is much preferred on account of its superior hardness. It takes a much higher polish, and may also be preferred on account of the absence of the injurious coloring substance. The coloring of the sapphire passes, at different times, through all the shades of blue, which seems to impart to the stone a sort of greasy nature, and is said to consist of cobalt. The manufacture of duplex watches with sapphire rollers and brass escape wheels has been known to produce wonderful and durable timepieces.

Marine chronometer makers seemed to understand the superiority of the sapphire for hole and pallet jewels, for seldom any other jewel is met with in the best productions of this kind of timepiece.

It is also noteworthy that some English lever watches of ancient make are met with which have pointed teeth, steel escape wheel and sapphire pallet, which were stated to have been excellent timepieces and to have rendered good service for a long number of years without change of oil.

#### Worm Pinions in French Clocks.

IN old French clocks it often happens that the pinion leaves become worn by the wheel teeth, causing irregularities in the depthing. In cases where the pinion leaves are worn and the pivots are still in good condition, the error can be remedied without turning in new pinions. If, for instance, the third pinion and escape pinion are worn, the third pinion leaves can be turned back from the outer end, the same thickness as the third wheel, and the pivot shoulder may also be turned back the same distance, the pivot remade, polished and shortened.

The pivot hole of the top plate is then broached out to about twice its original size, and a bushing with a thick shoulder may be turned true on an arbor, and riveted into the plate. The thickness of the bushing depends entirely on the amount the pinion was shortened, and giving the right end shake to the pinion. Through this operation the third wheel and its pinion are shifted, and a fresh portion of both the third and escape pinions is brought into action. Practically as good results will be obtained as by turning in two new pinions.

Herman Busch, a jeweler of Denver, Colo., has the sympathy of his many friends owing to the recent death of his son, Frederick C. Busch, who was accidentally shot and killed in the mountains near Fort Collins, a short time ago. The young man was shot while attempting to crawl under a barbed wire fence, his gun, which had been left standing by one of the fence poles, having fallen and exploded. The deceased was well known in Denver, and had served in the First Colorado, Company B, during the Philippine war. He was a member of the Spanish War Veterans' Association and of the Woodmen of the World.

#### Watch Errors and Their Remedies.

THE most enigmatical watch is the one that stops in a certain position, and can seldom, however, be detected at a standstill. The cause of the stoppage is so slight that the least movement will bring it into motion, and watches of that sort are often regarded as off-timers. Generally this error appears after a watch has been cleaned, and although tested and precisely regulated by the repairer in several positions, a watch that is subject to such errors will attain a certain position in the pocket, and the stoppage will occur. The duration of the standstill will last until disturbed by the indirect movement of the owner.

The space between the pallet and the end of the escape wheel tooth is so trifling that a liberal amount of sideshake of their respective pivots will tend to bring the escape tooth in contact with the body of the pallet. After a watch has been running several years, deflections of the pivots and holes naturally occur. The sideshakes of the pivots, although not causing the watch to stop, will, however, frequently lead to the above-mentioned error.

In order to ascertain whether the escape tooth touches the body of the pallet, the latter is cleaned in benzine, replaced in the watch, and a speck of oil is put on the edge of the escape tooth. The escape wheel is then rotated until the oiled tooth passes the pallet. The pallet is afterward removed and examined. If any sign of oil is visible on the body of the pallet, it is evident that the watch will be subject to that peculiar stoppage. The correction of this error is a very simple one.

The side shake of the escape and pallet can be eliminated by closing the respective holes with a round punch to accurately fit their pivots, and the body of the pallet may be reduced with a file. In cases where the pallet is made of steel, the superfluous part must be stoned off with a small oil stone.

#### DIFFICULTIES WHEN BALANCE IS TOO CLOSE TO CENTER WHEEL.

A common imperfection is a balance that is too close to the center wheel. It can often be observed, especially in thin model watches, that there is more vacuum between the pallet bridge and the balance than between the balance and the center wheel, and there is only sufficient space to prevent the balance from striking. Even though this imperfection will not cause any immediate effect on the motion, it will leave an opening for future complications. If, for instance, the balance staff does not possess the required temper, and the surface of the end stone is in a crude condition, the friction will grind down the top of the balance pivot, thus increasing the end shake of the balance, and causing the balance, when in a vertical position, to drop closer to the center wheel. In such cases, this error will not cause an absolute stoppage, but the occasional contact of the balance and center wheel will reduce the motion and the watch will gain in a vertical position.

There are various methods of remedying this error: A very simple and clean job can be done by reducing the length of the lower balance pivot, sinking the balance closer to the pallet bridge and leaving more vacuum between balance and center wheel.

The superfluous end shake, which is administered to the balance through this operation, is then reduced by slightly bending the balance cock downward.

To avoid the marking of the balance cock it is advisable to place the balance cock on the bench when bending is essential, and a tap with a hammer on a wooden punch will impart the required changes.

Another method can also be used to correct the above-mentioned imperfection: It is the truing of the balance downward. This job, however, requires skilful practice in truing a balance perfectly; otherwise, the balance will lose its poise, and the timing of the watch will be a difficult task.

#### RESULTS OF DEFECTIVE BALANCE PIVOTS.

It should be the ambition of every watch repairer to time his repairs to the utmost exactness, as the owners of the watch estimate the ability of the repairer according to the accuracy of the timepiece. The repairer should consequently prepare the watch so that it may be submitted to close timing, and that requires the perfection of the balance, balance pivots, jewels, and hairspring. It might be supposed that because polished balance pivots are essential, in order to obtain a standard motion, all that is needed is to repolish the crude balance pivots. Practical experience, however, contradicts this belief. When the pivots of a balance are polished, the size is naturally reduced, and the side shake of the balance pivots in the jewels is increased. When, for instance, only the upper balance pivot needs repolishing, the lower being in perfect condition, the result will be that after the operation the upper pivot will have more side shake than the lower, thus causing a poor motion in a horizontal position. When a watch is placed in a horizontal position and the upper balance pivot has more side shake than the lower one, the weight of the balance will draw the upper pivot to the extreme body of the jewel hole, and cause the lower pivot to bind. In this case the watch will gain in a horizontal position, and an exact timing will be an impossibility. It is therefore essential to change the balance jewel wherever a crude pivot is refinished.

Remarkable results can also be obtained in timing by poisoning the balance. An untrue hairspring, or one that is out of level and center, will cause difficulties in exact timing. When the hairspring, instead of being perfectly level, is disked up or down, the friction of the balance pivots will increase, through the pressure or lifting of the hairspring, according to the direction in which the hairspring is disked. This defect can be remedied with little difficulty, and the result in exact timing will be of great importance. C. R.

(To be continued.)

On board the steamship *Lusitania* there are 49 clocks, all controlled by a master clock in the chart house.

In the Britannia Palace of Applied Arts at the White City in London there is on display a clock 12 feet high, which is an exact reproduction of the great 70-foot tower clock in the square of St. Mark, at Venice. The four stories of the tower in the model, as in the original, are constructed of white marble with panels of colored marble and mosaics of gold and lapis lazuli.

**Novel Principle of Electric Precision Clock.**

By M. A. R. BRUNNER, Berlin.

THE pendulum of every clock or watch is, of course, subjected to friction and must receive from time to time a small impulse, otherwise it would stop. The escapement, with which the pendulum is connected, receives an unequal friction through the varying friction of the pallets with the teeth and the working thus becomes somewhat irregular. Electric clocks have no escapement connecting the gears with the pendulum, but have instead, contact springs and swinging pallets. These close and open the current and produce a sliding friction. It must also be borne in mind that the contact surfaces wear out and therefore even an electric clock does not always run with absolute precision. Various inventions have been made to solve the problem.

As said before, the pendulum must be connected in some way with the gears and

USE OF SELEN CELLS IN ELECTRIC CLOCKS.

hands. Yet it is not necessary to do this mechanically. A ray of light or electricity will do it also, and this was the idea of a German student. The wonderful metal selen which has made wireless telegraphy possible has the power to diminish its resistance in conducting currents if it is in bright light. Selen is a black mass, like sealing wax, very brittle and melts at 100 degrees C. In this state it is nearly an insulator. If it is heated in a paraffine bath gradually to 210 degrees and left there for eight to 10 hours, and then carefully cooled without shaking it, it will have changed the color, and its conducting power will be much increased.

Not only the light but also the temperature has some influence upon its properties. While with all other metals the resistance increases with the heating, the contrary takes place with selen. Its sensitiveness to light, however, becomes less with increased temperature. Advantage is taken of these curious properties in horology as follows: It is clear that an electric ray exerts the least imaginable friction upon the pendulum.

As seen in the accompanying sketch an electro-magnetic pendulum carries a disk with a longitudinal rectangular slot, S<sub>1</sub>, in front of which there is a shade with an equal slot, S<sub>2</sub>. The shade is stationary and the rays from a light source, for instance an electric lamp several yards away, fall together upon the slot. Behind the pendulum two cylindrical selen cells, Z<sub>1</sub> and Z<sub>2</sub>, are arranged a little in front of the

diacaustics of a parabolic cylinder mirror, within the circuit of the electromagnet, E, below the pendulum, and in the circuit of one or more sympathetic clocks. If now the pendulum is made to swing, the selen cells are alternately lighted and darkened and a periodic alteration of their resistance takes place in the rhythm of the swinging. Selen has another peculiarity, i.e., its inertia, which is greater than that of any other metal. On this account a distortion takes place which effects the resistance changes against the oscillations of the pendulum. Through these alone the pendulum receives in short intervals, a small impulse. If the inertia did not exist, the pendulum, when swinging out of its lowest position, would receive a retarding power application. On the other hand, if it would return to its former position, it would receive an impulse of the same power, so that the former would be compensated; but there is no excess left and the result is zero. But as there is some friction, the pendulum would gradually stop.

In order to take advantage of the inertia of the selen the lighting and darkening of the cells must take place very quickly. This is indeed the case when the pendulum passes the centerline, i.e., its stationary position, as it has at that moment the greatest speed. The electromagnet must not be placed vertically beneath the lowest position of the pendulum, but a little sidewise, as it shall apply some power to the pendulum in the moment when the latter goes through that position, viz., the center line.

The greater part of the resistance alterations takes place in a period of two seconds, so that we have to give the pendulum a swinging duration of two seconds in order to utilize the changes of resistance as much as possible. The amplitude of the pendulum must be sufficient to make possible a thorough lighting and darkening of the selen cells. By employing a condenser we can unite the rays of the line of light source to a strip one-tenth of an inch wide at the slot, so that an amplitude of the pendulum of about ¼ inch at the slot is quite enough.

With such small swinging angles small alterations of the elongation now scarcely influence the isochronism of the swinging. But to avoid any undesired influence a spring device is employed. With such small swinging the pendulum is very sensitive to the unavoidable air currents and therefore the amplitude of the astronomical clocks is made large. This fault, however, can be prevented if we place the pendulum in a vacuum which does not present any serious difficulty. In our case we have no work to do with the pendulum contrary to other clocks which must be wound up or fitted with new contacts from time to time. But there are other advantages. Firstly, the retarding influence of the air resistance is impossible, and secondly, the changes of temperature of the pendulum and the selen cells are a minimum. As said before, the selen cells are used to the best advantage if the pendulum is made to swing two seconds. In order to do this in a vacuum an immense glass vessel would be necessary. We can, however, get over

this difficulty if we suspend a shorter pendulum a little above its center of gravity. This kind of pendulum has been used in other instances, but the drawback is that it is very susceptible to changing friction in the suspension point, on account of the small directive force. Therefore it is a better plan to use a second pendulum of ordinary construction.

According to the outlined theory a model was built by a German student and it was demonstrated that one could keep the pendulum going in this way, although it was not touched by any mechanism. The application of this principle will be useful not only for astronomical precision clocks but also for time telegraphy, if, by means of a standard clock, a number of sympathetic clocks shall be kept coinciding as the standard pendulum need only light one selen cell of relatively large size and makes superfluous all otherwise necessary contacts, which feature is the most valuable of this principle.

**A Device for Replacing Jewel Pins.**

JEWEL pins are fastened in the roller with shellac, and the removal of the roller table for such an operation is unnecessary. An instrument very appropriate for this purpose can be made in the shape of a hook and flattened on the end. It is advisable to use copper wire for the device in order to retain the heat. The instrument is heated and placed between the roller and the balance. The heat will melt the shellac, and the remaining part of the broken jewel pin can be removed. The hole of the roller table is then properly cleaned, all the old shellac being removed. The instrument is again heated and placed in the same position as before. A piece of shellac is now held over the hole of the roller table until the hole is filled with the flowing shellac. Then the new jewel pin is inserted and placed in the proper position.

**Horological Notes.**

THE Boston & Maine Railroad is installing a new type of standard clock in the principal stations along the eastern and western divisions. The new timepieces are designed to enable the trainmen to run their trains on an accurate time basis. Standard Cambridge time is still sent out at 8 and 9 o'clock from Boston, and the clocks are being regulated by it. It is expected that after being adjusted they will run with a variation of not more than a second a month. One of these clocks was put in the telegraph office at the local passenger station several weeks ago. It faces the window at which the trainmen register in plain view and is an accommodation to patrons desiring accurate time as well. The new timepiece is seven feet in length and 18 inches wide. It is enclosed in a polished oak case, with glass front showing the swinging pendulum, mercury tubes and attachments for regulating. It has a mercurial pendulum filled with 28 pounds of mercury, and runs eight days at each winding.

A new town clock has been placed in the tower of the City Hall building in Columbia, S. C.

# STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

## The Palatial Retail Jewelry Establishment of Friedlander Bros., in Berlin, Germany.

AMERICAN readers of THE CIRCULAR-WEEKLY will be particularly interested in the views and description of the retail jewelry store of Friedlander Bros., in Ber-

lin, after having seen illustrated in this department so many jewelry establishments in this country.

work of a well-known painter, Prof. Karl Taubert, and include busts of four famous goldsmiths of the past—Benvenuto Cellini, Schrenk, Jamnitzer and Dinglinger. The

MAIN SALESROOM OF FRIEDLANDER BROS.' PALATIAL STORE IN BERLIN.

lin, after having seen illustrated in this department so many jewelry establishments in this country.

This store, which is known as the Royal Jewelry Store, is the most notable in Germany, and is situated in one of the most prominent streets in Berlin. There are three separate show windows, in which are displayed the latest products of the jewelry art. The walls of the main sales room, which is located on the ground floor, are covered with oak of a dull brown finish. On the east side of the store there is a partitioned alcove, the wall being made of mirrors. In front of this stands a long chest shaped like a table. In the center of this mirror wall there is a door leading to the vaults built for the safeguarding of the most costly stock. The lunettes on different parts of the walls show the artistic

walls and doors are also embellished with artistic carvings.

The light for this salesroom is obtained during the day through the large front windows, and from the top through a large glass skylight. In the evening it is illuminated by electric light that shines through the glass ceiling, and from large chandeliers suspended from the ceiling. Besides this illumination, all wall and show cases, with their costly contents, are separately illuminated with concealed electric lamps. Both sides of the store are equipped with tall wall cases in which silverware and novelties are displayed.

The center of the salesroom is equipped with two rows of modern show cases, dividing the room into two parts. Opposite these show cases are placed a number of tables on which customers may examine the

different articles displayed by the salesman. At each of these tables are comfortable chairs and an electric lighting device.

The reception room, which is used only by exclusive society and members of the royal court, is elaborately furnished in the style of the 18th century, and copied from one of the rooms of Queen Marie Antoinette in the castle at Fontainebleau. The two busts, one on each side of the mantelpiece, are those of the German Emperor and Empress.

Particularly interesting is the equipment of the different vaults. In places where least anticipated instructed employes of the firm can remove secret partitions from the wall and open a door leading to a vault

RECEPTION ROOM.

(Designed from a room of Marie Antoinette, at Fontainebleau.)

filled with glittering and costly articles. The contrivances of the safes in the main salesroom and in the upper floors, the controlling stations, etc., are also very complicated. Although not less than 70 clerks are employed in the salesrooms, everything goes on almost noiselessly and in perfect order.

The man who has been persistent in advertising has gone to the top of the commercial ladder. The man who has failed to put his soul and strength into his advertising, who has grown discouraged easily, has dropped back to the bottom. Yet the new business men, the men who are just entering the lists of trade, who are just donning the armor for the strife, do not always profit by the lessons which others have learned. They try it for themselves, just as though the immutable laws of distribution and publicity change for them. They learn after a while, but some of them learn all too late to profit by it.—*Michigan Tradesman.*

### Another View of the Mail Order Evil.

At the State convention of the Michigan Retail Jewelers' Association, held at Detroit, an address was delivered on the mail-order question by Joseph Gilbert, secretary-treasurer of the Co-operating Merchants' Co., Chicago, Ill., which aroused considerable interest and was thoroughly discussed by those present. Mr. Gilbert's remarks were in part as follows:

"Retail merchandising is passing through a crisis at the present time and the mail order question is but one of the manifestations arising out of the economic needs of the times. Instead of trying to combat this apparent evil we should first ascertain whether it is in the line of progress or not, as if it is not it will die of itself, while on the other hand, if it meets a need of the times, nothing we can do will prevent it from succeeding.

"This whole question is purely an economic one and no amount of sentiment will avail in solving it. Every human activity involves an exchange of service, and competition is simply an attempt of two or more individuals to render the same service. Consequently success or failure is determined by the degree of efficiency attained by comparison one with another. As is well known, in the field of production and distribution of commodities, economy is most essential; that is, the securing the maximum result with the minimum effort. Since organization and system are most conducive to this end we find large corporate enterprises supersede small businesses in production; hence the growth and success of the so-called trusts. Were any one to try and compete with these giant establishments by following the antiquated method of hand labor, we all know the result would be failure, because large capital makes possible organization of the most capable men, since it offers greater rewards than is attendant on small individual enterprise, even where the latter can exist under the most favorable circumstances.

"Everything points to the fact that the same processes that have marked the progress of production are to-day apparent in distribution. The reason for this is because capital must ever seek fields for reinvestment, and since production is so highly organized, distribution offers a more fertile field.

"Consequently we see large capital entering the domain of retail merchandising and introducing all the economic features that are only possible to perfect organization. This is the one great fact that retail merchants must realize, and instead of railing against their successful competitors they must endeavor to so equip themselves as to be equally efficient or relinquish the field. Success or failure is determined entirely by going with the natural trend of things or bucking the inevitable. The individual retailer who recognizes that we are now in an era of specialization and organization in merchandising, as in everything else, will not try to do the impossible—or what is equally as foolish, try to ignore facts—but will adjust himself to these new conditions and will succeed just in proportion as he does so.

"Retail merchandising of the future will

be conducted on a large scale, because this is the only way whereby the greatest efficiency can be attained. This does not mean necessarily that private corporations will own everything and that we shall all be their employes, but it does mean that whatever other form of doing things exists it must be just as efficient in its operations. We shall therefore see two forms of the same thing from now on occupying the field of retail merchandising successfully, one being large department stores and chains of stores owned by private capitalists, and the other being what we might term co-operative corporations, where a combination exists between small merchants similarly situated. Such a combination would make possible the practice of all the economy attending the operations of the large capital-

even greater opportunities for achieving success and acquiring wealth as ever in the past, it is along different lines. The young man starting in life to-day, whether in the field of production or distribution, must make up his mind whether he wants to court success in a co-operative way or as a specialist in the employ of gigantic corporations. To attempt to save a little capital and start in a small competitive way belongs to the past, and none but a fool essays to travel that road.

"For those already in business and who wish to continue, the same thing applies, for we are now in an era of great undertakings which calls for the ability of highly organized forces. The standard of excellence is daily getting higher and higher. The men who achieved success in the past

A FRONT VIEW OF THE ESTABLISHMENT OF FRIEDLANDER BROS., BERLIN.

ist enterprise and therefore place both upon a more equal footing.

"Collective buying and collective advertising would give greater power to each individual than he could possibly exert otherwise, and at the same time would leave him a very large field in which to employ initiative in other directions. One can easily see that since we shall always have small as well as large communities, the merchant on the ground is far better able to satisfy the needs of his respective community than is a large corporation many miles distant, provided he possesses the same economic advantages. Do not lose sight of the fact that formidable though the mail order house has already proven itself as a competitor, it can, and probably will, become still more so by being the center of supply for thousands of small stores scattered throughout the country, which will be agencies merely. That this is not visionary can be seen in the trend which things are already taking along this line, as witness the growth of chain stores everywhere apparent.

"We must realize that nothing remains stationary and while there are as great, and

did so because they were in accord with the spirit of the age in which they lived. It is foolish to try to copy after them in detail and yet that is what many are trying to do. What we must do is to pattern after them by getting in accord with the spirit of our own age, by doing which we shall occupy the places of honor and be leaders in our respective callings, and failure to do this will make us the hewers of wood and drawers of water to the few who take advantage of our ignorance. Let us therefore organize, drop our petty jealousies and work together for our common good."

A new 1908 political manual containing electoral and popular votes of the States, platforms of both parties, biographies of the candidates, and a mass of other political facts of value to the voter, has been published by Bunde & Upmeyer Co., Milwaukee, Wis.

A. H. Beer, Versailles, Ind., held his 12th annual pumpkin show, recently. Awards were made for all kinds of farm products, and a band furnished music. There were many races and contests, including a calf race, which caused no little amusement.

By A. A. CHRISTIAN, in Paris Edition of the New York Herald.

AMERICA is the best place in the world in which to shop, for every need and every article, the whole year through. Paris has tariff advantages on gloves, England on woolens and each country on some

find, or extraordinary values. American advertising is more rigidly truthful than is any other line of literary work, and the public responds to its own good advantage. European stores—and chiefly those of

cause art and beauty, other than feminine beauty, are far less plentiful in America. Dresden, Vienna, Berlin and Munich lead Europe in window-dressing.

The American ideal in business is volume, and volume is being fought for in every way possible. That is one reason why America serves its shopping public so well; it takes small profits, in its clamor for volume. Judged by the generally available reports of the profits of European stock company stores and their total sales, they get far larger margins than do our stores.

I have heard the objection, here and at home, that American stores which advertise "bargain days" can give only the most indifferent sort of service, and that the London plan of only two bargain sales a year, at the turn of the season, is better. So it is, compared with the service of

special line, but no other gives such service as does America in the great aggregate. The driving of business by advertising—by newspaper advertising, I mean—is the secret. Competition is very keen, and Americans are educated shoppers. Every store is in constant comparison with every other of the same class in its city. Each vies for favor by offering through the newspapers inducements either in the way of tempting variety, an interesting exclusive

London and Paris—depend on window displays with signs to the limit of daring, to draw people in. The better American stores devote their window space largely to education in the beautiful showing, the finest goods they have gathered, showing proper color blending—in a word, teaching by picture and emphasizing their power as providers. The American store window is a treat, perhaps the more heartily appreciated be-

stores that advertise spasmodically—heavily one day, not at all the next, but little another day. But I have proved beyond question that if a store advertises—big or little, as is justified—in the same space every day, it will draw about the same business each day. Of course, we cannot make the Summer season as profitable as the Christmas season, but we do largely offset even Summer dullness. With a fairly equal business all

## Retail Advertising Department.

through the week we can approach the ideal in good service-giving, and that economically. By driving things at high pressure, with our full-page advertisements every day, we have a difference not exceeding five per cent. between the sales of the best and the poorest day of the week. Plenty of people to care for a business and little overplus means true economy and the possibility of lessening prices to the customer.

I do not pretend to say that American methods would sweep Europe. I do say that American methods fit America. Our methods are not wholly original. Rather, they are eclectic; we take the best from all schools and all lands. Eclectic and electric for the dynamo force of newspaper advertising keeps the wheels spinning.

It is not the European stores that need waking up; it is the business departments of European newspapers. Look how European stores strive to win trade? Catalogues are issued continually. One store is said to publish 300 different catalogues yearly. If an average of 100,000 copies of each is distributed, think of the cost of postage alone. And if 100,000 copies are mailed daily, how small the number of readers, compared with the audience of 2,000,000 people, whom we reach every morning with the newspapers.

In 10 years England could be transformed into a newspaper advertising country, if the newspapers would abolish their hampering rules and let merchants have lower advertising rates in proportion to space used. The newspapers practically repel business.

The advertisements illustrated on the adjoining page are mostly typical October announcements. The advertisers and the original size of the advertisements, from left to right, are as follows: H. J. Cook Co., Knoxville, Tenn., six inches by eight and three-quarter inches wide; T. H. McNary, Washington, Pa., four and one-half inches, single column; Ernsting Co., San Diego, Cal., four and one-half inches, double column; W. C. Graves & Bro., Memphis, Tenn., six inches, double column; E. W. Parker, La Crosse, Wis., four and one-quarter inches, single column; John B. Varick Co., Manchester, N. H., nine and one-half inches, triple column; the Whitley Jewelry Co., Los Angeles, Cal., 11¾ inches by 13 inches wide; Montgomery Bros., Los Angeles, Cal., 11 inches, double column; C. L. Ruth & Son, Montgomery, Ala., six and one-quarter inches, single column; Jacob Bennett, Norfolk, Va., three inches, single column; J. Jessop & Sons, San Diego, Cal., three and one-quarter inches, double column; Adolph Roth, successor to George E. Wilkins, Syracuse, N. Y., two inches, single column.

The store of C. W. Elliott, 350 Main St., Galesburg, Ill., was recently robbed of miscellaneous jewelry worth \$200. It is believed that the thief entered the store by means of a key. The loot includes 11 rings, half a dozen watches, several watch cases and scarf pins.

## The Topsy Element in Advertising.

ONE vital point about an advertising campaign that many people seem to overlook is, that it will grow as it goes along, especially if it is a new campaign, says a writer in *Printers' Ink*.

In reading the effusions of the ad. critics one is continually being admonished to be sure that each advertisement is the best you can make it—don't be satisfied with the first or second writing, but rewrite it a dozen times if necessary, until you are certain it couldn't be improved. Pick your mediums so that they will be absolutely right, and so forth.

Poppycock! Why, if a business house succeeded in doing this it would need only one advertisement and a couple of mediums, because it would, at one bound, the very first time, have attained perfection.

An advertising campaign wants, first of all, a good strong spine in the shape of a plan. But the plan isn't the advertising—it is chiefly made up of things the advertising is expected to accomplish, flavored with a liberal tincture of the policy of the house. After that, allow plenty of margin for changes in argument and mediums, adapting the advertising to conditions as they develop or change. Leave room for expansion. Turn the advertising out, and let it grow up like Topsy.

One of the pupils of the veteran John E. Powers was advertising man in a paint and glass business. He showed the master some advertisements that covered every item in a great retail and wholesale stock, together with all the points of policy. Mr. Powers told him that he couldn't write that sort of an omnibus ad. every day and have time for anything else, and advised him to take up just one point day by day and cover it in a little three or four inch single column announcement, and make his army as he marched, like Napoleon.

Business conditions change. The public changes with the seasons. Advertising must change, too, or become ossified. There was never yet an advertising man so shrewd, or with so much experience of every kind of business as to be able to definitely lay out in advance a fixed advertising policy for even a corner peanut stand. For the moment a peanut stand begins to advertise effectively it begins to change its own public, and the character of its trade. It will bring to the surface new factors in competition, and set new standards of service. The business, in other words, will begin to grow, and the advertising must grow with it, and no man can foretell what a year may bring forth.

Through the country, in both retail and manufacturing lines, there are concerns that seem to have an absolutely fixed policy in advertising. Their copy is definite and certain. Nothing swerves them. Get acquainted with the men who conduct such advertising, however, and you will find them tireless experimenters, both in copy and mediums, continually trying something new, something different, and shaping policy by results. But nobody sees the experiments. They are conducted on a small scale, here an argument added, or a publication, and there another dropped. When the experiment develops something excel-

lent, then it is added to the main campaign, and thus that appearance of solidity is secured.

No, advertising isn't writing a world-beating announcement the first time, nor waiting until everything is perfect before beginning. It's making a start somehow, and writing a better ad. the second time through experience of short-comings in the first, and doing better the second year, and hitting a good pace, and getting second wind, and going on, and on, and on.

## A New Brodnax Booklet.

AN interesting piece of business literature is exemplified in the booklet recently issued by George T. Brodnax, Memphis, Tenn. The body of the cover pages is red, embellished by a striking design embossed and cleverly colored to represent ivory. The firm name and trade-mark are artistically incorporated in the design, underneath which, in raised letters, is printed the word "Diamonds."

The inside pages are seven and three-quarter inches by nine inches, but so folded as to approximate the measurements of the cover pages, which are four inches by nine and one-quarter inches. Every left-hand page contains attractive half-tones illustrating diamond jewelry. Prices are also quoted on the adjoining page. Not the least interesting part of the text is the introduction, entitled "How Diamonds Should Be Sold." Among other things, the introduction says: "No price should ever be cut, for it is not right to make the desirable customer who trusts you pay more than the one who takes up your time by haggling over prices. . . . We have found that the majority of people only want to be certain that they are receiving the best price that anyone else gets, and that most of the haggling over price-cutting was done just to insure that they did get the proper price. This discussion of price takes time, and time means extra clerk hire, and in having only one low cash price we are able to serve you with less expense and to sell you diamonds for materially less than we could if we asked you one price, and then, after a long wrangle, took what we should have asked in the first place."

One of the selling methods adopted by the concern is what is known as the "deferred payment plan," which is explained in the booklet. According to this plan one-fifth of the price of the diamond, as marked in plain figures on the tag, may be paid upon its purchase. A small percentage, increasing slightly according to the length of time, is added, not on the full price of the diamond, but only on the amount left after the cash payment has been deducted.

The last page of the booklet shows views of the interior of the handsomely furnished store and the mail order department.

D. A. Hixson, Lockport, N. Y., left, last week, for a short trip to Grand Forks, N. Dak., where he has farming interests.

The A. Graves Co., Memphis, Tenn., has completed extensive improvements in the interior of its establishment at 93 Main St. New show cases and fixtures made of mahogany have been installed. The scheme of interior decorations has been made to harmonize with the furniture.

# Clutch-Point-Pencils

The most perfect pencil ever made for permanent use.  
Holds any size lead.  
No wobbling or sliding of point.  
Requires no sharpening.

Always the same length and will last indefinitely. No separate parts to work loose or get out of order.

*The flanged screw end regulates the lead by a clutch at the tapering point*

Made in Silver and Gold plate in many styles and sizes. In attractive display cartons. Special holly design boxes for Christmas trade. An exceptionally useful and inexpensive gift. Write for Catalogues.

# WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]  
No attention paid to communications unless accompanied by full name and address of the writer.

**QUESTION No. 2136.—Gold and Silver Filings.**—When melting silver filings, also gold filings, should any grease be put on the ingot before pouring? Also tell me why do silver bars crack on the side when rolling? I. M. S.

**ANSWER:**—It is not necessary to use grease for melting gold or silver filings. Rub the crucible on the inside with powdered borax before putting the filings in. Use enough flux to cause the melted gold or silver to run together. As a flux, use the carbonate of soda potash and a little borax, stirring vigorously so that the metal will be well mixed before pouring out. Cracks on the edges of the rolled silver are sometimes caused by rolling too much before annealing, or the silver may contain some other metal, which would cause trouble. The cracking is somewhat overcome by rolling the silver hot. Always roll in one direction, and before cross rolling, anneal.

**QUESTION No. 2137.—Tarnished Gold Dials.**—Please let me know what will remove tarnish from gold dials. F. H. & Co.

**ANSWER:**—If the gold dials are only slightly tarnished they may be cleaned by rubbing with a soft cotton flannel and borax in a little water; finish by drying with a soft linen cloth. If this does not remove the tarnish, try a solution made of potassa, one part; water, five parts, and proceed as above. If a stronger solution is required, take cyanide of potassium two ounces; water, one-half pint. After wiping with the cyanide until the tarnish is removed, wipe off with some cold water in order to remove the cyanide. If the dials can be laid in any of the above solution, just long enough to remove the tarnish, then any of above solutions will answer. But it is not always advisable to do this, because the numerals may be filled with some wax or lacquer and that would remove them. It is best to wipe and rub them with a cloth instead of resorting to the dip.

**QUESTION No. 2138.—Hardening Brass Springs.**—Will you kindly inform me of some method to harden small brass springs? L. H.

**ANSWER:**—Brass can only be hardened by compression. Hammering the brass in its rough condition with a smooth-faced hammer will stiffen it sufficiently for spring purposes. Unskilful hammering, however, if too long continued, will make the metal brittle. A very thin brass spring can be made elastic by burnishing it with a steel burnisher.

**QUESTION No. 2139.—Producing Chemi-**

**cally Pure Copper.**—I want to obtain chemically pure copper in small quantities. How can I quickly produce this? P. C.

**ANSWER:**—Chemically pure copper can be easily produced by dissolving one part of blue vitriol in 10 parts of water, to which a few drops of hydrochloric acid have been added. Immerse in the fluid a stout piece of sheet zinc and move it about until the fluid is completely colorless. The copper is then separated on the zinc in the form of a delicate matt brown powder (cement copper), which is filtered off, washed in distilled water, dried and preserved in a closely sealed receptacle.

**QUESTION No. 2140.—Tarnishing of Silver.**—What is the cause of highly polished silver on frames as well as the mesh of mesh purses and bags becoming tarnished so easily? I have carefully examined and find them clean and free from sulphur, acids or anything which may cause the tarnish. How can the tarnish be removed and prevented? T. O. S.

**ANSWER:**—All silver will tarnish when exposed to the air or light, but the tarnish will appear more quickly where gas is burned, or in show cases where there is tissue paper or silk linings, which contain traces of acids, or where there are soft rubber, ammonia or other odor-producing oxides which will facilitate the tarnishing. If the tarnish be not too deep, it may be removed by drawing the articles through a warm cyanide dip. Rinse off in cold, then in hot, water and dry in sawdust. The tarnish can also be washed off with strong soap suds, to which is added a little ammonia. When dry the pieces should be covered with a colorless lacquer.

### Cement for Repairing Celluloid.

**A** SUBSTANCE which, it is claimed, is exceptionally serviceable as a cement for the repairing of articles made of celluloid, is known as "zyloloid." Considerable difficulty has always been experienced in the mending of combs and other articles made of celluloid, and this new substance will, for that reason, be much appreciated. The broken surface of celluloid is painted with the cement and then pressed together for a moment or so until set. It is then put away and allowed to harden for about an hour, the length of time depending upon the extent of surface treated.

Harry Kilgore was recently taken into custody at Lincoln, Nebr., accused of attempting to steal a valuable diamond from the store of Frederick Gardner, 1006 O St., in that city.

### Experiments in Hardening Silver.

**S**OME experiments were recently published by E. Pannain in the *Gaz. Chim. Ital.*, 38, I, 349-351, 1908, on an attempt to find metals other than copper for hardening silver used for making coins. He says:

"The experiments were made with a view to find metals or alloys capable of replacing copper in silver coins. Silver can be alloyed with cobalt, nickel and manganese only with difficulty, but more readily upon the addition of a third metal.

If copper and silver be melted with nickel, cobalt and manganese respectively, alloys are obtained containing the three constituent metals in different proportions. The alloys rich in silver are white, malleable and capable of being polished, and harder than those containing silver and copper only.

"The alloys containing nickel and cobalt are magnetic. They are prepared by first heating the nickel or cobalt strongly, and then adding the copper or other base metal, and finally the silver. A better method is to melt a suitable alloy of nickel and cobalt and then add the silver. Care must be taken to employ a sufficiently high temperature, otherwise the mixture separates into two parts—one very rich in silver, and the other containing only about 30 per cent. of this metal.

"The alloys are especially suitable for coinage owing to the care needed in their preparation, as this renders the making of counterfeits difficult. Moreover, they are harder and thus more durable than ordinary silver coins, and their magnetic properties allow of their ready identification."—*The Brass World.*

### An Improved Bell-Metal.

**A**N improved bell-metal has been patented by Ezra W. Van Duzen, of the E. W. Van Duzen Co., of Cincinnati, O., the well known brass founders and bell manufacturers (U. S. patent 891,576, June 23, 1908). According to the *Brass World* the novelty lies in the mixture, and the following alloy is used:

Copper .....	16 parts.
Zinc .....	4 parts.
Tin .....	1 part.

This mixture, the inventor says, may be varied to a slight degree when the occasion demands. The advantages claimed are that a thinner bell may be made without danger of cracking, and much cheaper than a bell made of copper and tin alone.

He says: "I am enabled to produce bells up to about 40 pounds in weight, having a tone equal or superior to that of the best bells cast from the best copper and tin bell-metal heretofore in use. Bells formed of this improved alloy will bend rather than crack or break. They may be made of thinner metal, thus rendering the bells lighter in weight and much more serviceable than heretofore."

Two men were recently taken into custody in Leadville, Colo., accused of robbing the store John K. McDonald. Mr. McDonald, who is 70 years of age, was awakened by the noise of the intruders. He shouted for help, but was beaten into unconsciousness before aid arrived.

### Mexican Mosaic Pottery.

By RANDOLPH T. GEARE, in the *Glass and Pottery World*.

NO one knows who were the first potters of Mexico. The industry is a very venerable one, to say the least, and the methods employed have been handed down from father to son from time immemorial.

One of the principal centers of the pottery industry is Cuernavaca ("Cow's horn") and the type of the products made there is very different in certain respects from the wares made in other Mexican towns, such as Guadalajara, Puebla, Oaxaca and elsewhere.

Cuernavaca pottery is made in the village of San Antonio, just outside the city of that name. The dwellers in almost every one of the adobe houses in that village are clay workers, and each house is a workshop.

The pottery is made entirely by hand and by the following process.

#### HOW THE CLAY IS PREPARED.

After the clay is procured it is first thoroughly dried in the sun, then pulverized with a wooden mallet and passed through a fine-meshed, brass-wire cloth. (In olden times the Indians used handkerchiefs or a piece of cotton shirting for that purpose.) The pulverized clay is then soaked in water, passing it through a sieve and afterward mixing the dry clay and kneading it to the right consistency.

#### ON THE POTTER'S WHEEL.

On the upper part of an old style potter's wheel is next placed a mold of the size necessary for the body of the object to be made. This is covered all over with the proper thickness of clay, which is then patted and shaped with a wooden paddle and with the hands.

"The Indian potter turns the model about before him by scraping his bare toes on the lower portion of the wheel," writes Mr. Arthur B. Butman, United States Special Agent, "and during the revolutions he continues to smooth the clay with a narrow strip of wet cloth until the desired surface is obtained. The narrow standard, or legs, as the case may be, are then fashioned, and the article removed from the mold and placed in the same inverted position, until such time as the standard shall have dried sufficiently to hold the weight of the body. Handles, spouts, etc., are all formed by hand, without molds, and joined by means of clay slime and prepared clay."

#### HOW INLAID DECORATION IS APPLIED.

We now reach the most interesting and characteristic part of the process, which consists in applying inlaid decoration and justifies the name given this pottery in the heading of this present article. True, the materials are crude and the inlaying slow

and primitive, and yet, like all inlaid work, it is a sure sign of the artistic temperament. Small bits of broken china are employed for the purpose, and the decorations principally used are molded reptiles and insects, molded leaves and flowers and stamped border designs in Grecian and conventionalized patterns.

The design for the inlaid work is first drawn on the damp clay and traced with a sharp-pointed stick, after which it is slowly wrought by pressing bits of china, of the proper shape, into the clay, with the glazed surface on the outside. The article is then smoothed with a wet cloth and placed in the drying room.

#### THE USE OF LIVE SPECIMENS.

In preparing plaster of paris molds for such decorations as insects, reptiles, etc., live specimens are used, to insure accuracy of detail. The decorations are formed by carefully pressing the clay into the mold and removing it with equal care. The edges are then trimmed and the molded decoration placed in its proper position on the piece of pottery, clay slime being used as a cement. A thread of fiber is used for trimming the edges, one end being held in the mouth and the other in the hand.

#### HOW THE POTTERY IS DRIED.

While the pottery object is being dried great care is taken to protect it from sun and wind, especially for the prevention of cracking the molded decorations. If cracks appear in them before the article is dried, the decoration can be renewed, but if afterward, the piece of pottery is entirely worthless.

When the drying process is finished, the article is exposed to the sun, for complete treating before it is painted and burned. Pottery made at Cuernavaca is painted with only one color—yellow—and after this has been applied, the jar, or whatever it is, is ready for burning.

#### THE BURNING PROCESS.

This process, like the others, is very primitive and is thus described by Mr. Butman: "No permanent kiln is used for burning, each individual process being accompanied by the building of a kiln of the size required. A number of jars, approximately 18 inches in height and nine inches in diameter, are placed on an open space of ground, as closely together as possible, between and around the outer edges of which is laid the fuel. Flat pieces of previously burned pottery are used to cover the jars and fuel, upon which are piled the articles to be burned. The whole is then completely covered with "tomales" (round, flat slates, which are for cooking the "tortillas," a sort of a pancake and universal peon food, by being placed over burning charcoal). The

fuel is then set on fire, and when well alight green briars or wet hay is thrown over the pile. The "burning" lasts about two hours, after which period, and while still hot, the kiln is uncovered. Each article is taken out with an iron rod, and allowed to cool in the air. After "burning," the color of the painted portions turns to a dark terra cotta color.

Cuernavaca potters receive from 37 centavos to 1 peso a day; and the foreman, about 8 pesos a week. When it is remembered that it takes 10 centavos to make a peso, and that the latter is only equal to 49.8 cents in our money, it will be evident that these painstaking and artistic artisans will be old, very old, before they can retire on their savings.

### High Prices for Porcelain.

ON June 2, Christie, Manson & Woods sold at their rooms in London the remarkable collection of fine porcelain belonging to the Earl of Lauderdale. The chief lot was a pair of fine old Sèvres vases, which though slightly damaged, were the cause of keen competition. The bidding began at 500 guineas, and after a spirited struggle, in which many took part, the sale resolved itself into a duel between Charles Davis and the representative of Asher Wertheimer. At 3,600 guineas the latter won. Nearly cylindrical in shape, the vases are painted with oval panels of cupids in a landscape and river scenes on a gros-bleu ground. Between each pair of panels are gilt wreaths of foliage and acorns enclosing an *ail-de-perdrix* ground. Reliefs of white and gold straps are on the lower parts, with gilt laurel-wreaths around the lips. The vases are 12½ inches high, and mounted on square ormolu plinths, and will make a happy and effective decoration for some splendid interior.

The other items sold included a pair of Vincennes cups and saucers, £189 (Hodgkins); a cabaret, painted by Tandart in 1776, £120 15s. (Wills); and another cabaret by Noel, 1775, £110 5s. Several pieces of Chinese porcelain were sold. A pair of *famille verte* vases, Kangtze, fetched £420 (Thompson); a Kangtze cylindrical vase £273 (Huggins); a Kein Lung cistern, £388 10s. (Levine Davis); and a *famille verte* oviform case and cover, £304 10s. (Larkin).

The following were mounted with old French ormolu: A pair of ewers realized £273; a pair of Kangtze pear-shaped bottles, £157 10s. (Durlacher); and a Ming vase and cover, £105. A Dresden dinner service made £651, and a dessert service en suite, £136 10s. (Harding). The total was £9,543 19s. 6d.—*London Pottery Gazette*.

**Expanding Trade in American Jewelry Exports in Various Parts of the World.**

WASHINGTON, D. C., Oct. 23.—While imports of jewelry into the United States during recent years have been declining, the exportations of such goods have been on the increase. During the fiscal year 1903 the American purchases abroad of jewelry, manufactures of gold and silver, aggregated \$2,007,433, nearly one-half from France, one-fourth from Germany, and one-eighth from Austria Hungary. In 1907 the imports were reduced to \$1,779,527. The American jewelry makers are becoming active in the foreign field, as the following statistics of exportations indicate:

	1903.	1905.	1907.
Jewelry .....	\$939,797	\$1,033,808	\$1,287,111
All other manufactures of gold and silver.....	353,224	385,417	773,033
Jewelers' sweepings.....	174,158	48,850	324,103

Canada has been the best market for American jewelry, taking \$836,852 worth in 1907, compared with \$611,240 worth in 1903, and \$378,231 worth of all other manufactures of gold and silver in 1907, against \$173,182 worth in 1903. Mexico was also a considerable customer, while Argentina increased her purchases of jewelry from the United States from \$4,688 in 1903 to \$23,116 in 1907; Brazil from \$6,455 to \$38,563, and Ecuador, \$4,434 to \$13,970. Only a small, stationary American jewelry trade was transacted in other South American countries. Cuba, however, purchased \$44,294 worth in 1907, against \$28,585 in 1903.

The export trade in timepieces has also been active, more than keeping pace with the increase in importations. The statistics for recent fiscal years follow:

	Imports.			Exports.		
	1903.	1905.	1907.	1903.	1905.	1907.
Clocks .....	\$499,626	\$486,765	\$610,060	\$1,001,724	\$1,192,246	\$1,445,290
Watches .....	2,182,684	2,479,730	2,983,113	1,041,805	1,124,168	1,723,982

The largest sales of American clocks have been in the United Kingdom, the amount in 1907 being \$332,484; Canada, \$300,563 worth; Australia and New Zealand, \$257,672; British India, \$102,743, and about \$60,000 each to Brazil and Japan.

In American watches Canada led with purchases to the value of \$708,434 in 1907, Japan following with \$352,470, the United Kingdom with \$291,502, and Germany with \$120,818.

American jewelry and timepiece factories are seeking extended markets for their productions, and their inquiries to consular officers have brought interesting reports which follow.

**FAVORABLE PROSPECTS FOR EXTENSION OF TRADE IN COLOMBIA.**

Consul Isaac A. Manning sends from Cartagena the following information regarding the opportunities for the sale of American jewelry, and especially watch chains, in that part of Colombia:

"I have talked with a number of merchants handling these lines here and am sure there is a good sale for this line of goods, and that when economic conditions

improve, as they are sure to do in a short time, there will be a chance to increase the trade very considerably.

"While the custom-house statistics show a very small import of jewelry, this represents very little of the import, for most of this sort of merchandise comes by registered mail and the records are kept in the post-office. Thus the records of import show but 5 or 6 kilos (kilo = 2.2 pounds) of jewelry in a year of all classes of good gold and plated ware. The sale of cheap jewelry is considerable, but it is not an attractive trade, and that which is supplied comes from Europe.

"Of the better goods the importations are more largely from the United States, and I am told that the demand is for goods of good quality, the purchaser preferring to pay the price and own something good. Fault has been found with some shipments of watch chains, neck chains, etc., because, while marked guaranteed for five years, the goods soon show black oxidization, and the house shipping them refused to carry out the guaranty.

"There is no necessity that watch chains or neck chains be made up in any special pattern for this trade, except that they should be from small to medium sizes. In watch chains there should be nothing put up except the best heavy rolled plate or filled plate. In most goods 14 karat should be the lowest grade, and especially is this true of ladies' neck chains, which are made

short and in small patterns to be worn constantly with keepsake lockets and religious objects. The necessity for making these of strong and good material will be evident when it is known that these are rarely removed from the neck, not even during the bath.

"The usual device used on men's watch chains for fastening to the buttonhole is the spring ring, this being generally preferred to the bar, although some bars are sold.

"American chains and jewelry of all kinds are popular here, being usually more of the quality required in this trade, being well made, attractive patterns, and seeming to satisfy the taste better than those from other countries.

"Goods for this trade should be packed and carded as lightly as possible, as the duties have to be considered. The duty on jewelry, including all packing, is \$2.55 per kilo, specific, and an additional ad valorem of 5 per cent. Samples could be purchased here of what is being generally sold, if so desired.

"As to the demand for other jewelry,

there is a good sale for collar buttons, cuff buttons (these should be in links), and small attractive brooches, and also some demand for bracelets, but generally running to the chain bracelet with the padlock attachment.

"There is a good sale for American watches, several merchants here carrying small lines, usually of the standard makes (such as Waltham, Elgin, Illinois, etc.), and the trade prefers a good Boss filled case, or a pure silver case. Sizes should be modern and light. In rings, etc., the demand seems to be generally for small settings in diamonds, or other precious stones, or in signet styles, with monogram on gold plate. These must be good to sell. I am not sure whether anything could be done here with imitation diamonds, but few of them are seen. Genuine diamonds in all manner of settings are common here."

**AMERICAN GOODS LACK THE NECESSARY STAMP OF GUARANTEE FOR SOUTH AFRICAN MARKET.**

Consul R. B. Mosher, of Port Elizabeth, in the following report explains why American jewelry is not popular in Cape Colony:

"Close and open curb watch chains seem to be mostly in demand. The bar is the only thing used. American charms, pendants and fobs do not sell, which is also true of plated chains. Quite a number of neck chains are sold, all light patterns. American goods are not in demand, due largely to the absence of marks of guarantee. Rolled gold watches are the only staple line in South Africa.

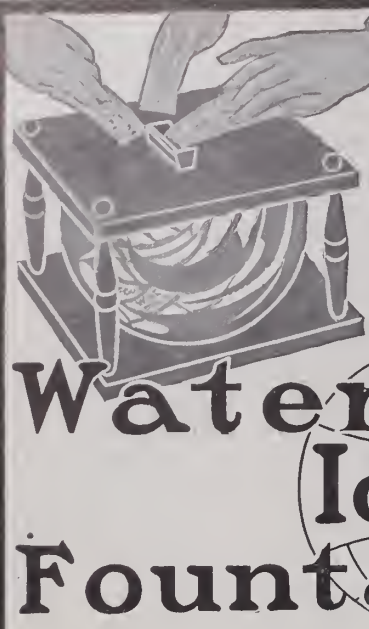

"As to selling other kinds of American jewelry, including the extension bracelet, the prospects are not good until some mark of guarantee is adopted, similar to the English hall mark.

"For the first six months of 1906 and 1907 the importations of jewelry into Cape Colony amounted, respectively, to \$178,722 and \$159,105, of which about 90 per cent. came from the United Kingdom, 6 per cent. from Germany, and one-half of 1 per cent. from the United States.

"The present duty on jewelry is 15 per cent. ad valorem, with a rebate of 3 per cent. ad valorem in favor of English goods."

[Lists of jewelry dealers in various parts of the world are listed at the Bureau of Manufactures, Washington, D. C., where they may be copied by the trade.]

The Welsh & Bro. Co., one of the oldest and best-known jewelry firms in Baltimore, Md., has recently passed out of the hands of the receivers, which had been appointed June 19. The order for release was signed by Judge Gorter in Circuit Court No. 2, upon the petition of the receivers, F. E. Walsh, Jr., A. E. Donaldson and Creditor G. Osborn. The receivers were directed by the court to turn over to the concern all its property. The order also discharged the receivers and dismissed the bill of complaint of David C. Townsend & Co., upon which the receivers had been appointed, with the consent of the company. The firm has been in business in Baltimore for 28 years, having succeeded Canfield & Co.

**CLEAN  
RECORD**  
Waterman's  
Ideal  
Fountain Pen

presents a clean record when it asks your endorsement.

A clean record, free from blots, skips or spatter, shows the quality you need in supplying the demands of your trade. You can trust a Waterman's Ideal to faithfully represent the standard of your store.

*School Work, Business Activity, Professional Service, Social Correspondence*, all call for some one of the great selection of Waterman's Ideal Fountain Pen. For every demand there is an appropriate style, and for every "hand" there is a pen point to "suit."

Complete information, and our selling plans for the Fall and Christmas trade, will gladly be furnished upon request.

*Waterman Co., 173 Broadway, N.Y.*

## Mr. Jeweler:

Do you know that hundreds of your competitors in all parts of the country are making a specialty of Fans? Do you know that even a small line of Fans, properly displayed, will "dress up" the whole appearance of your stock? Of course, the Fans themselves must be suitable for jewelers, and must be bought from one who thoroughly understands the requirements of your trade. There is but one such house in America—
