This Report is not a guarantee, warrant or approval. This Report contains only the characteristics of the diamond described herein after it has been graded, tested, examined and analyzed by GIA Gem Trade Laboratory under ISO accreditation, and/or has been inspected using the techniques and equipment available to GIA Gem Trade Laboratory at the time of the examination and/or at the time of being accepted, including fully automated light leak and laser/reticle analysis, Fourier transform infrared (FTIR) analysis, ultraviolet-visible spectroscopy, electronic color balance, high intensity short wave fluorescence imaging system, optical measuring device, stress laser measuring device, PrecisionScope[®], ultraviolet lamps, reticle gauge, additional visual color comparators, spectroscope, Illuminator Pedestal[®], immersion liquid, ultraviolet-visible and infrared spectrometers, X-ray fluorescence spectrometer, secondary microscopy systems, beta radiation scintillation detector, radiation survey meter, X-ray fluorescence spectrometer, and auxiliary instruments as necessary. The symbols denote internal characteristics (inclusions). Green or black symbols denote external characteristics (blemishes). Diagram is an approximate representation of the diamond, and approximate shown indicates type, position, and approximate size of clarity characteristics. All clarity characteristics may not be shown. Details of finish are not shown. The recipient of this Report may wish to consult a credentialed jeweler or diamond merchant about the importance and interrelationship of cut, color, clarity and carat weight.
